Rev. 11/15/85

Senate Bill 295
Fiscal Note Analysis
Prepared by Division of Retirement & Benefits
Department of Administration
February 21, 1986

Analysis: Passage of this bill would require insurers to offer an option to receive certain minimum coverage for treatment of a mental or nervous condition.

It is our understanding that an employer, as policy holder of a group plan, could elect this option for covered employees. Employees in a group plan could not make this election on an individual basis.

The State of Alaska now provides mental health coverage for all eligible employees. The level of this coverage is somewhat less than that provided for in the bill in an effort of cost containment in the Plan. Health insurance benefits are determined at the bargaining table. This bill would not affect our present level of coverage or cost.

Should the higher level of coverage described in the bill be incorporated into the state's health plans, FY 87 costs to the state are estimated to increase by $1,522,024.

This cost is calculated as follows:

The increase of $2.65 per month health cost times the number of state employees (13,200) times 12 months equals	$419,760
The change in the PERS employer contribution rate (.12%) times the estimated FY 87 state PERS salaries ($590,176,728) equals	$708,212
The change in the TRS employer contribution rate (.075%) times the estimated FY 87 state TRS salaries ($68,569,578) equals	$ 51,427
The changes in the TRS state match contribution rate (.075%) times the estimated FY 87 TRS system salaries ($456,833,417) equals	$342,625
Total	$1,522,024

SENATE BILL NO. 295

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act requiring insurers to offer coverage for the treatment of a mental or nervous condition in certain health insurance policies."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 21.42 is amended by adding a new section to read:

Sec. 21.42.365. COVERAGE FOR TREATMENT OF A MENTAL OR NERVOUS CONDITION. (a) An insurer that issues for delivery, delivers, or renews a health insurance policy in the state after the effective date of this section shall offer the insured an option to receive the following minimum coverage for treatment of a mental or nervous condition of the insured or other person who would otherwise be covered by the insured's health insurance policy:

(1) 45 days a year of inpatient treatment for each covered individual;

(2) 30 visits a year of outpatient treatment for each covered individual.

(b) The health insurance policy may impose reasonable contract limitations, but may not require that the insured pay a higher deductible or co-payment for a cost for treatment of a mental or nervous condition than for a cost for treatment of another condition or illness.

(c) In this section

(1) "co-payment" means the portion of the cost to be paid by the insured;

SB 295

(2) "cost" means the lesser of the following:

(A) the actual charge for the treatment received for a mental or nervous condition; or

(B) the usual, customary and reasonable charge for the treatment in the judicial district of this state where the treatment was rendered;

(3) "health insurance policy" means a hospital or medical expense policy, or a nonprofit health care corporation plan;

(4) "inpatient treatment" means continuous treatment of more than 12 hours in a 24-hour period in the psychiatric unit of a general hospital licensed under AS 18.20, in a psychiatric hospital that is licensed under AS 18.20, or in a hospital in the state that is specifically exempt under AS 18.20.020 from the licensing requirements of the state;

(5) "mental or nervous condition" means an impairment of psychobiological processes that is severe enough to cause social, psychological, or biological malfunctioning; "mental or nervous condition" includes a substantial disorder of thought, mood, perception, orientation, or memory that significantly impairs judgment, behavior, capacity to recognize, or ability to cope with the ordinary demands of life; mental retardation, epilepsy, drug addiction, and alcoholism do not constitute a mental or nervous condition although a person who suffers from one or more of these conditions may also be suffering from a mental or nervous condition;

(6) "outpatient treatment" means treatment that is not inpatient treatment and that is provided under the supervision of

(A) a psychiatrist who is licensed as a physician in the state and certified in psychiatry by the American Board of Psychiatry and Neurology;

(B) a physician who is employed by the federal government in this state and certified in psychiatry by the American Board of Psychiatry and Neurology; or

(C) a psychologist or psychological associate licensed under AS 08.86.

* Sec. 2. AS 21.87.340 is amended to read:

Sec. 21.87.340. OTHER PROVISIONS APPLICABLE. In addition to the provisions contained or referred to previously in this chapter, the following chapters and provisions of this title also apply with respect to service corporations to the extent applicable and not in conflict with the express provisions of this chapter and the reasonable implications of the express provisions, and for the purposes of the application the corporations shall be considered to be mutual "insurers":

(1) AS 21.03

(2) AS 21.06

(3) AS 21.09, except AS 21.09.090

(4) AS 21.18.010

(5) AS 21.18.030

(6) AS 21.18.040

(7) AS 21.18.120

(8) AS 21.21.321

(9) AS 21.36

(10) AS 21.69.400

(11) AS 21.69.520

(12) AS 21.69.600, 21.69.620, and 21.69.630

(13) AS 21.78

(14) AS 21.90

(15) AS 21.42.345 - 21.42.365 [AND 21.42.355]

(16) AS 21.89.040

(17) AS 21.89.060.

January 22, 1986

JAN 3 0 1986

The Honorable Jan Faiks
The Alaska State Legislature
P.O. Box V (MS 3100)
Juneau, AK 99811

Dear Senator Faiks:

During the 1985 session of the legislature, you introduced Senate Bill 295, "an act requiring insurers to offer coverage for the treatment of a nervous and mental condition in certain health insurance policies."

Through the courtesy of your staff, I was asked to review the text of the bill, to point out areas which might be a problem to us, and to provide some general cost figures should such a benefit be elected by a group purchasing coverage for a nervous and mental condition from Blue Cross of Washington and Alaska. As I informed your staff, our Plan suggested four wording changes in the text of the bill. The first change appears on page 1, lines 15 and 16, "... condition of the insured or other person who would otherwise be covered by ...." We suggest the word "eligible" be inserted between the words "other" and "person" and that the phrase "who would otherwise be" be deleted. This addition and deletion would make the statement clearer as to who may be covered by the benefit.

The second change appears on page 2, lines 4-6. The bill reads "the usual, customary and reasonable charge for the treatment in the judicial district of the state where the treatment was rendered." This statement could put this section in conflict with the proposed usual, customary and reasonable part of the rules on unfair claims that are expected to be adopted by the Division of Insurance in late January or early February 1986. We suggest the deletion of the last 12 words of lines 4-6. It is important to Blue Cross of Washington and Alaska and other carriers to have uniform rules governing the administration of usual, customary and reasonable charges in order to avoid increased costs and confusion for the provider and patient alike.

BACK UP INFORMATION

Our third suggested change occurs where the word "certified" appears on both page 2, line 28 and page 3, line 2. We suggest the phrase "or eligible for certification" be added after the word "certified." This additional phrase may make it easier for a patient to access professional care. The eligible for certification language will access care from a physician who has completed their residency requirements in psychiatry but may be waiting for the results of the examinations.

The fourth wording change suggested by our Plan is found on page 3, lines 4 and 5, "a psychologist or psychological associate licensed under AS 08.86." I am suggesting the deletion of all words after "psychologist" on line 4. The scope of practice of the psychological associate (AS 08.64.164(a)(b)(c)and(d)) will prevent their providing services or supervision in situations unspecified by their license, registered with their board, or not approved by a supervising psychologist. It is important to the Plan that services for nervous and mental conditions be of high quality and provided in such a manner as to reduce excessive utilization.

Blue Cross of Washington and Alaska's Actuarial Department has made some general estimates regarding costs of providing this nervous and mental condition benefit to groups. These estimates are made without the knowledge of the mix of potential patients, locations of groups, or other medical or demographic information. More exact figures would be available if specific information were available. Using the following characteristics, Blue Cross of Washington and Alaska developed some very broad information on expected costs for this coverage.

Community size	11 to 24 persons
Deductable	$100.00
Co-insurance	20 percent

Limits of Coverage	Employee Only	Employee Spouse Children	Employee Spouse	Employee Children
45 days inpatient hospitalization	$0.65	$ 1.79	$ 1.30	$1.17
50 hours per year outpatient care	4.55	12.51	9.10	8.19
	$5.20	$14.30	$10.40	$9.36

The offering of benefits for specific situations, illnesses or conditions is an equitable method of providing coverage to groups and their members. The choice remains with the group where it may have been negotiated or otherwise determined by the group and its members. In this manner, the health benefit dollar can be utilized to provide the most appropriate benefits for that group. Requirements to provide coverage neglect consideration of the location of the group, the availability of competent providers, the needs of the employees and even the availability of funds to provide basic coverage.

I hope this letter will provide you with positive information for your consideration. If I can be of further assistance, please do not hesitate to contact me at the Anchorage District Office, 563-2728, or my Juneau home, 586-3141.

It will be a pleasure to work with you on the legislation.

Sincerely,

Martin E. Tirador, Senior Representative
Corporate Relations

Department of Commerce & Economic Development / POSITION PAPER

SB 295 "An Act requiring insurers to offer coverage for the treatment of a mental or nervous condition in certain health insurance policies."

The department does not favor the mandate of any kind of health insurance in a policy voluntarily purchased. The department has in the past supported legislation addressing provider discrimination or recipient discrimination. This proposal does not address a discrimination issue. It mandates specific levels of coverage for treatment of a nervous or mental condition.

While the bill does not directly impact the programs of the Division of Insurance, it does impact market availability of health insurance in this State. The areas of concern with this legislation include:

1. This bill conflicts with the ERISA preemption and the NLRA provisions relating to plans which are established pursuant to a collective bargaining agreement.

2. This bill will tend to force the small to medium sized insurer from the marketplace for lack of underwriting expertise relating to the mandated coverage or ability to write it economically.

3. A demand for the coverage has not become evident. If a coverage is economic and there is sufficient demand for it, competition will assure that coverage is available;

4. The bill does not apply to self-insurers and, since it does not, may lead to the self-insuring of risks that should not be self-insured.

5. The cost of the mandated coverage can be of such consequence as to discourage purchase at all or to force exclusion of more popular coverages such as vision care and dental care. To the degree that available dollars for health care are fixed, this bill has the effect of decreasing health care dollars for things now covered.

6. The Federal Government is currently considering a tax on the cost of benefits above a certain amount. It would be unfair to force a person into a position where coverages he or she dos not want or does not need cause taxation for coverages that are wanted and needed.

Loren H. Lounsbury, Commissioner

Senate

April 22, 1985

MEMORANDUM

TO: Members of Senate Labor and Commerce Committee

FROM: Senator Jan Faiks

SUBJECT: Background on Senate Bill 295

This bill will require insurers to offer their customers the opportunity to purchase minimum mental health coverage in all health insurance policies sold in Alaska.

Currently, twelve states have passed similar laws which require that policy holders be given the opportunity to purchase mental health insurance. Fourteen other states take a stronger position; they do not give the policy holders an option, but rather require that minimum mental health coverage be included in every health insurance policy.

This bill adopts the "mandatory option" approach because it allows subscribers to decide whether the benefits of mental health coverage are worth the added premium costs, and it preserves this option for the collective bargaining process.

Most states that require mental health coverage also define the minimum coverage that must be offered. Senate Bill 295 requires a minimum of 45 days of inpatient treatment and 30 visits of outpatient treatment per year.

These requirements are consistent with the requirements of other states. For inpatient services, four states require a minimum of 30 days, while two other states require 45 days. For outpatient services, minimum requirements are expressed in either visits (one other state calls for thirty per year) or dollar limits (six state have minimums ranging from $500 to $1000 per year). The remaining states require only that mental health benefits be on par with those offered for other illnesses.

When mental health coverage is offered, usually the benefits are much less tha those available for other treatment. Insurers will often require that their customers pay a higher deductible or a greater portion of the cost of mental health services.

In a 1980 survey of health insurance plans in Alaska, 87% offered inpatient coverage and 74% offered outpatient coverage for mental illness. If these plans follow a national pattern which was identified in a 1983 study, only half of our plans will offer inpatient and less than 10% will offer outpatient benefits that are equal to coverage that is offered for other illnesses.

In order that mental health coverage be given parity with other coverages, then, this bill requires that the former be offered under the same terms as the latter.

There are several myths that have impeded the requiring of mental health coverage in health insurance policies. According to one belief, the costs of psychiatric treatment are unpredictable and uncontrollable.

This belief stems in part from the common perception of mental illness in terms of only its more serious forms, like schizophrenia. However, only 15% of persons who are treated in private mental hospitals suffer from this acute disease. For most forms of mental illness, only one hospital stay with several follow-up visits are all that is needed for successful treatment.

From seven to ten percent of subscribers use mental health benefits when these are available in their policies. This is approximately the same rate that subscribers use extra care from other medical specialists.

There is no evidence that mental health benefits are abused at a rate that differs from other health benefits. If insurers are concerned about accountability, they can subscribe to peer review services that will review the validity of individual claims. These services have shown a costs-to-savings ratio of 1:100.

It is true that mental health coverage will mean higher premium cost to subscribers. However, this cost is not substantial. A national survey of 79 major corporate plans revealed that the average annual premium increase for each subscriber was $29.47.

On the other hand, psychotherapy produces savings in the form of increased employee productivity and reduced absenteeism. The Equitable Life Assurance Society has verified that every dollar invested in mental health treatment results in a three dollar increase in productivity.

Medical science has long recognized the correlation between physical disease and mental health. Many dollars that are now paid for other medical services are actually paid for the indirect treatment of mental impairments. In addition, studies have proven that direct treatment of mental problems results in lower costs for other medical care.

In a 1983 study, a moderate amount of psychotherapy was shown to significantly reduce hospital costs for persons suffering from four different types of chronic disease. Another study that same year showed that patients who received outpatient psychotherapy treatment used 56% fewer medical services than those who had not been treated.

Finally, there is a cost savings that will be enjoyed by the State of Alaska. Nationwide, the state governments pay about 50% of the total cost of our mental health bill. When subscribers are given access to mental health coverage on the same basis as other medical benefits, more of this burden will be shifted from the State to the private sector.

CHAIRMAN'S INFORMATION: SB 295

by Sackett
Zharoff and

SCS CSHB 305(L&C), relating to barbers, hairdressers, and cosmetologists,

Page 3, line 6: following the word "instructor" delete the period, add a semi-colon and the word or, and on line 7, add a new subsection to read:

(6)have completed a combination of coursework and apprenticeship acceptable to the board. (Sec. 1 Ch 159 SLA 1980).

IN THE SENATE

BY THE LABOR AND COMMERCE COMMITTEE

CS FOR SENATE BILL NO. 295 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act requiring insurers to offer certain coverage for the treatment of a mental or nervous condition in certain health insurance policies."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 21.42 is amended by adding a new section to read:

Sec. 21.42.365. COVERAGE FOR TREATMENT OF A MENTAL OR NERVOUS CONDITION. (a) An insurer that issues for delivery, delivers, or renews a health insurance policy in the state after January 1, 1987, shall offer the insured an option to receive the following minimum coverage for treatment of a mental or nervous condition of the insured or other person who would otherwise be covered by the insured's health insurance policy:

(1) 45 days a year of inpatient treatment for each covered individual;

(2) a total of 50 hours a year of outpatient treatment for each covered individual, accumulated in any increments of time.

(b) The health insurance policy may impose reasonable contract limitations, but may not require that the insured pay a higher deductible or co-payment for a cost for treatment of a mental or nervous condition than for a cost for treatment of another condition or illness.

(c) In this section

(1) "co-payment" means the portion of the cost to be paid by the insured;

(2) "cost" means the lesser of the following:

(A) the actual charge for the treatment received for mental or nervous condition; or

(B) the usual, customary and reasonable charge for the treatment;

(3) "health insurance policy" means a hospital or medical expense policy, or a nonprofit health care corporation plan;

(4) "inpatient treatment" means continuous treatment during a 24-hour period in the psychiatric unit of a general hospital licensed under AS 18.20, a psychiatric hospital that is licensed under AS 18.20, or a hospital in the state that is specifically exempt under AS 18.20.020 from the licensing requirements of the state;

(5) "mental or nervous condition" means a mental disorder identified in

(A) the Diagnostic and Statistical Manual of Mental Disorders (Third Edition) published by the American Psychiatric Association; or

(B) the ICD-9-CM (First Edition) published by the Commission on Professional and Hospital Activities;

(6) "outpatient treatment" means treatment that is not inpatient treatment and that is provided by one or more of the following, or by a person who is under the direct supervision of one or more of the following, has a master's or doctorate degree in psychology, nursing, or social work, and is employed by the same health care facility as the person or persons providing the direct supervision,

(A) a psychiatrist who is licensed as a physician in the state and certified, or eligible for certification, in psychiatry by the American Board of Psychiatry and Neurology;

(B) a physician who is employed by the federal

government in the state and certified or eligible for certification in psychiatry by the American Board of Psychiatry and Neurology; or

(C) a psychologist licensed under AS 08.86.

* Sec. 2. AS 21.36.090(d) is amended to read:

(d) Except to the extent necessary to comply with AS 21.42.365, a [A] person may not practice or permit unfair discrimination against a person who provides a service covered under a group disability policy that extends coverage on an expense incurred basis, or under a group service or indemnity type contract issued by a nonprofit corporation, if the service is within the scope of the provider's occupational license. In this subsection, "provider" means a state licensed physician, dentist, osteopath, optometrist, chiropractor, or nurse midwife.

* Sec. 3. AS 21.87.340 is amended to read:

Sec. 21.87.340. OTHER PROVISIONS APPLICABLE. In addition to the provisions contained or referred to previously in this chapter, the following chapters and provisions of this title also apply with respect to service corporations to the extent applicable and not in conflict with the express provisions of this chapter and the reasonable implications of the express provisions, and for the purposes of the application the corporations shall be considered to be mutual "insurers":

(1) AS 21.03

(2) AS 21.06

(3) AS 21.09, except AS 21.09.090

(4) AS 21.18.010

(5) AS 21.18.030

(6) AS 21.18.040

(7) AS 21.18.120

(8) AS 21.21.321

(9) AS 21.36

(10) AS 21.69.400

(11) AS 21.69.520

(12) AS 21.69.600, 21.69.620, and 21.69.630

(13) AS 21.78

(14) AS 21.90

(15) AS 21.42.345 - 21.42.365 [AND 21.42.355]

ANALYSIS: Attach a separate page if necessary.

The bill amends the Board of Chiropractic Examiners to include naturopaths, therefore creating the Board of Chiropractic and Naturopathy Examiners. It increases the composition of the board from five to six members by adding one nonvoting ex officio naturopath member. Costs mentioned above result from adding the sixth member to a board that already meets twice each year and administers exams in conjunction with

10/25/85

each meeting. Travel costs of $1.2 could be reduced to $.7 if the composition of the board were to remain at five members. If reduced by attrition, the replacement of one chiropractic member from Anchorage could be replaced with a naturopath as early as July 1986, therefore reducing per diem costs by $.5.

An explanation of travel costs follow:

Based on two meetings with exams held in Anchorage -

Transportation from Juneau to Anchorage = $352 x 2 =	$ 704.00
Per diem based on three days at $80 per day = $240 x 2 =	480.00
	$1,184.00

REVENUE:

Although there may be as many as six naturopaths in Alaska, we are certain of three practicing naturopaths, and therefore revenues are based on the three practitioners.

AS 08.20.180 currently establishes fees for licensure. Revenues shown are 'new' revenues to be generated from licensing naturopaths. These revenues will be in addition to the revenues generated through the licensing of Chiropractors.

Initial license fee (quadrennial renewal period) = $200 x 3 = $600

Revenues may be increased by the end of four years depending on the number of new practitioners who obtain licensure in the interim.

POSITION PAPER

SENATE BILL NO. 297

"An Act relating to the licensing of practitioners of naturopathic medicine; and providing for an effective date."

BACKGROUND

The Bill defines naturopathy as a "system of healing the human body that includes diagnosis and treatment through the use of natural agencies, forces, processes, and products with emphasis on the response of the individual to the disease rather than its treatment in isolation."

There is controversy over the scientific basis of naturopathic medicine. In a 1968 study, the U.S. Department of Health, Education and Welfare stated that "naturopathic theory and practice are not based upon the body of basic knowledge related to health, disease and health care which has been widely accepted by the scientific community." This position has remained unaltered. There is apparently also some division within the ranks of naturopathic physicians with some ascribing solely to "hygienic and prophylactic measures" while others include diagnostic procedures, minor surgery and the use of certain drugs within the scope of naturopathic practice.

There are two four-year colleges of naturopathic medicine in the United States, one in Portland and one in Seattle. In addition, there is a correspondence curriculum in naturopathy available from the Bernadean University in Van Nuys, California but graduates of that program would not be eligible for Alaska licensure under the terms of this Bill.

Alaska currently has no statute providing for the licensure of naturopathic physicians. The Attorney General has held that, to the extent that naturopathy constitutes the practice of medicine as defined in the Alaska Statues, any person practicing naturopathy would be required to be licensed by the State Board of Medical Examiners. Proponents of naturopathy consider a requirement for medical licensure to be unfair since their discipline is considered, in their view, to be quite distinct from conventional medicine.

DISCUSSION

While certain conditions may be amenable to treatment through naturopathic methods, others would not. A few examples would include malignancies, diabetes in certain age groups or of certain degrees of severity, certain types of infectious diseases, etc. Similarly, it is not always possible to determine the benign or malignant nature of a superficial lesion by its gross appearance. Protection of the public would require that the public clearly understands the limitations of the naturopathic approach and that the practitioner be able to recognize those conditions in which his or her therapy would not be beneficial.

POSITION PAPER/Department of Health & Social Services

While naturopathic practitioners are eligible for licensure in some states, several of those states impose restrictions limiting practice to "drugless therapy" and, in some cases, prohibiting surgery.

DEPARTMENTAL POSITION

The Department has reservations about the appropriateness of naturopathic treatment for certain types of illnesses. However, the Department recognizes that certain health care consumers desire to use the services of a naturopath and is, therefore, neutral on this bill. The Department defers to the Department of Commerce and Economic Development on the merits of licensure and the establishment of a Board.

Department of Commerce & Economic Development / POSITION PAPER

SSSB 297: An Act relating to the licensing of practitioners of naturopathic medicine; and providing for an effective date.

The Department of Commerce and Economic Development and the Division of Occupational Licensing are opposed to SSSB 297, An Act relating to the Practice of Naturopathy, as currently written.

The bill establishes a new chapter under Title 8, Businesses and Professions, to recognize the practice of naturopathy in Alaska. The bill both recognizes the practice of naturopathy and exempts the practice from the provisions of the Medical Practice Act, 08.64. The division does not object to recognizing the practice of naturopathy in Alaska, but opposes the exemption from the Medical Practice Act.

Apparently, the proposed exemption is one means of resolving the current controversy over what practices are acceptable in naturopathy and what practices are, instead, the practice of medicine. To date, there has been no comprehensive definition of the field of naturopathy distinct from the definition of the practice of medicine. The difficulty in developing such a definition is understandable, given the current definition of the practice of medicine in AS 08.64.380:

(2) "practice of medicine" or "practice of osteopathy" means

(A) for a fee, donation or other cosideration, to diagnose, treat, operate on, prescribe for, or administer to, any human ailment, blemish, deformity, disease, disfigurement, disorder, injury, or other mental or physical condition; or to attempt to perform or represent that a person is authorized to perform any of the acts set out in this subparagraph;

(B) to use or publicly display a title in connection with a person's name including "doctor of medicine," "physician," "M.D.," or "doctor of osteopathic medicine" or "D.O.," or a specialist designation including "surgeon," "dermatologist," or a similar title, or any title which tends to show that the person is willing or qualified to diagnose or treat the sick or injured;

It appears that, because it remains difficult to define the practice of naturopathy, a proposal is being made to simply exempt naturopaths from the Medical Practice Act. The result of this, however, would be that a naturopath who meets the minimal requirements in 08.45.010 can practice medicine just as a licensed physician can, and with no licensing constraints.

Although the division is sympathetic to the problem, the division cannot support this proposal, which has the potential for severe threat to the public safety.

The division would not oppose the recognition in statute of practice of naturopathy, especially if that will lend credence to naturopaths in their effort to define the allowable practices of naturopaths. Although there are few naturopaths in the state, there is strong support for naturopathy as an alternative health service which should be acknowledged.

However, it is important to understand that recognition of naturopaths is likely to be interpreted incorrectly by the general public as regulation or licensing of naturopaths. In fact, it is clear that this is the understanding from literature being distributed by supporters of the bill. This bill would not regulate or license naturopaths, and passage may, instead, provide a false sense of security that the state is checking the credentials of naturopaths before practice and revoking licenses where naturopaths do not meet the educational standards in the bill. This is not correct. As written, the bill would provide authority to the division to respond only to complaints that a naturopath is practicing medicine without an exemption from the Medical Practice Act.

Nancy Dunn, Director, 465-2534
Division of Occupational
Licensing

Date: 4/28/86

Loren H. Lounsbury, Commissioner
Department of Commerce and
Economic Development

Date: 4/29/86

Department of Commerce & Economic Development / POSITION PAPER

SB 297: "An Act relating to the licensing of practitioners of naturopathic medicine and providing for an effective date."

The Department of Commerce and Economic Development and the Division of Occupational Licensing would support this legislation with proposed amendments.

One objective of licensing in Alaska is to ensure that practitioners providing services to consumers are competent and qualified in order to protect the health, welfare and safety of the public. The division is concerned that this legislation proposes licensing a group whose scope of practice encompasses that of other licensed professions, but whose educational level is not comparatively equivalent to practitioners of those occupations.

Information from other naturopathic licensing jurisdictions indicates that the education level of naturopathic practitioners is comparatively lower than that of medical doctors. Most licensing jurisdictions require a naturopath to have undertaken two years of undergraduate studies and to be a graduate of a four-year naturopathic college. By comparison, most medical colleges require a four-year degree prior to entry into a four-year medical program and one to three years of residency internship depending on specialty area. In addition to minor surgery, Section 08.45.160 also authorizes the scope of naturopathic practice to include aspects of the practices of psychology, physical therapy, and medicine.

The following amendments are proposed:

Section 08.45.150. FEES, should be amended to reference AS 08.01.065 to allow licensing fees to be set in regulations. Standard language used in other licensing areas states "The department shall set fees under AS 08.01.065 for each of the following: (1) application fee; (2) examination fee; (3) initial license fee; (4) renewal license fee." This amendment will allow examination costs to be included as part of the total costs of the licensing function. Note that the present fiscal note reflects only an estimate of the costs for examinations since we have not yet located an available naturopathic licensing exam.

Section 08.45.160. SCOPE OF NATUROPATHIC MEDICINE, would authorize a new licensing group to provide services that are traditionally medical (minor surgery, sutures, acupuncture, to draw blood, etc.). Of the seven states which license naturopathic medicine, we are aware that two states (Oregon and Utah) allow "minor surgery" to be performed. We recommend that "minor surgery" be defined extensively or eliminated from the scope of practice.

Section 08.45.170. RENEWAL, should be amended to require that licenses be renewed biennially on a date set by the department. The division suggests the following language be incorporated into Section 08.45.170 "(a) A license issued under this section shall be renewed biennially on a date set by the department." This amendment is consistent with AS 08.01.100 and would simplify administrative processing of license renewals.

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the practice of naturopathy; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.20.010 is amended to read:

Sec. 08.20.010. CREATION AND MEMBERSHIP OF BOARD OF CHIROPRACTIC AND NATUROPATHY EXAMINERS. There is created the Board of Chiropractic and Naturopathy Examiners consisting of six [FIVE] members appointed by the governor, including one nonvoting ex officio member.

* Sec. 2. AS 08.20.020 is amended to read:

Sec. 08.20.020. MEMBERS OF BOARD. Four members of the board shall be licensed chiropractic physicians who have practiced chiropractic in this state not less than two years. One member of the board shall be a person with no direct financial interest in the health care industry. The ex officio member shall be a person who is licensed under this chapter to practice naturopathy. Each member serves without pay but is entitled to per diem and travel expenses allowed by law.

* Sec. 3. AS 08.20.100 is amended to read:

Sec. 08.20.100. PRACTICE OF CHIROPRACTIC OR NATUROPATHY WITHOUT LICENSE PROHIBITED. A person may not practice chiropractic or naturopathy in the state without a license.

* Sec. 4. AS 08.20.110 is amended to read:

Sec. 08.20.110. APPLICATION FOR LICENSE. A person desiring to practice chiropractic or naturopathy shall apply in writing to the

board.

* Sec. 5. AS 08.20.120(b) is amended to read:

(b) The board may issue a license to practice chiropractic without examination to an applicant under AS 08.20.140.

* Sec. 6. AS 08.20.120 is amended by adding a new subsection to read:

(c) An applicant shall be issued a license to practice naturopathy if the applicant provides proof satisfactory to the board that the applicant has a degree from

(1) an accredited 4-year college or university; and

(2) a school of naturopathy that required four years of attendance at the school.

* Sec. 7. AS 08.20.140 is amended to read:

Sec. 08.20.140. LICENSURE BY CREDENTIALS. The board may issue a license without examination to an applicant for a license to practice chiropractic if the applicant presents [PRESENTING] satisfactory proof of the possession of a license or certificate of registration in good standing in a state or territory of the United States, or a foreign country, if the requirements for registration at the date of the applicant's license were essentially equivalent to those in this chapter for a license to practice chiropractic.

* Sec. 8. AS 08.20 is amended by adding new sections to read:

Sec. 08.20.145. DISCLOSURES REQUIRED BY PERSON WHO PRACTICES NATUROPATHY. (a) A person who practices naturopathy shall clearly disclose that the person's training and practice is in naturopathy

(1) to each patient; and

(2) on all material used in the practice of naturopathy and made available to patients or to the public.

(b) A person who practices naturopathy without being covered by malpractice insurance shall disclose to each patient that the person

does not have the insurance.

Sec. 08.20.147. RESTRICTIONS ON PRACTICE OF NATUROPATHY. A person who practices naturopathy may not

(1) give, prescribe, or recommend in the practice

(A) a prescription drug;

(B) a controlled substance;

(C) a poison;

(2) engage in surgery;

(3) use the word "physician" in the person's title.

* Sec. 9. AS 08.20.160 is amended to read:

Sec. 08.20.160. TEMPORARY PERMITS. Temporary permits <u>to practice chiropractic</u> may be issued to persons apparently qualified until the next regular meeting of the board.

* Sec. 10. AS 08.20.175(a) is amended to read:

(a) When it finds that a <u>licensee under this chapter</u> [CHIROPRACTOR] is guilty of an offense under AS 08.20.170, the board may impose the following sanctions singly or in combination:

(1) permanently revoke the [CHIROPRACTOR'S] license to practice;

(2) suspend the [CHIROPRACTOR'S] license for a determinate period of time;

(3) censure the <u>licensee</u> [CHIROPRACTOR];

(4) issue a letter of reprimand to the <u>licensee</u> [CHIROPRACTOR];

(5) place the <u>licensee</u> [CHIROPRACTOR] on probationary status and require the <u>licensee</u> [CHIROPRACTOR] to

(A) report regularly to the board upon matters involving the basis of probation;

(B) limit practice to those areas prescribed;

(C) continue professional education until a satisfactory degree of skill has been attained in areas determined by the board to need improvement;

(6) impose limitations or conditions on the practice of the licensee [CHIROPRACTOR].

* Sec. 11. AS 08.20.175(b) is amended to read:

(b) The board may withdraw probationary status of a licensee [CHIROPRACTOR] if it finds that the deficiencies which required the sanction have been remedied.

* Sec. 12. AS 08.20.175(c) is amended to read:

(c) The board may summarily suspend a [CHIROPRACTOR'S] license before final hearing or during the appeals process if the board finds that the licensee [CHIROPRACTOR] poses a clear and immediate danger to the public health and safety if the licensee [CHIROPRACTOR] continues to practice. A licensee [CHIROPRACTOR] whose license is suspended under this section is entitled to a hearing by the board no later than seven days after the effective date of the order. The licensee [CHIROPRACTOR] may appeal the suspension after a hearing to a court of competent jurisdiction.

* Sec. 13. AS 08.20.200 is amended to read:

Sec. 08.20.200. UNLICENSED PRACTICE A MISDEMEANOR. A person who practices chiropractic or naturopathy in the state without a license in violation of AS 08.20.100 is guilty of a misdemeanor, and upon conviction is punishable by a fine of not more than $1,000. or by imprisonment for not more than a year, or by both. [IN PROSECUTIONS UNDER THIS SECTION, EVIDENCE THAT THE DEFENDANT HAS FAILED TO FILE THE DEFENDANT'S CERTIFICATE OF REGISTRATION WITH THE BOARD IS PRIMA FACIE EVIDENCE THAT THE DEFENDANT IS NOT A LICENSED CHIROPRACTOR.]

* Sec. 14. AS 08.20.210 is amended to read:

Sec. 08.20.210. FRAUDULENT CERTIFICATES. A [ANY] person who obtains or attempts to obtain a chiropractic or naturopathic certificate by dishonest or fraudulent means, or who forges, counterfeits, or fraudulently alters a [ANY SUCH] certificate is punishable by a fine of not more than $500, or by imprisonment for not more than six months, or by both.

* Sec. 15. AS 08.20.220 is amended to read:

Sec. 08.20.220. DEFINITIONS [CHIROPRACTIC DEFINED]. In this chapter,

(1) "chiropractic" means [CHIROPRACTIC IS] the science of locating and correcting interference with nerve energy transmission and expression within the human body, and the employment and practice of drugless therapeutics, including physiotherapy, hydrotherapy, mechanotherapy, phytotherapy, electrotherapy, chromotherapy, thermotherapy, thalmotherapy, correcting and orthopedic gymnastics, and dietetics which includes the use of foods and those biochemical tissue building products and cell salts found within the normal human body, without the use of drugs or surgery;

(2) "controlled substance" has the meaning given in AS 11.-71.900;

(3) "naturopathy" means the use of hydrotherapy, dietetics, electrotherapy, sanitation, suggestion, mechanical and manual manipulation for the stimulation of physiological and psychological action to establish a normal condition of mind and body

* Sec. 16. AS 08.01.010(2) is amended to read:

(2) Board of Chiropractic and Naturopathy Examiners (AS 08.20.010);

* Sec. 17. AS 08.03.010(c)(2) is amended to read:

(2) Board of Chiropractic and Naturopathy Examiners

(AS 08.20.010) -- June 30, 1988.

* Sec. 18. AS 09.55.560 is amended to read:

Sec. 09.55.560. DEFINITIONS. In AS 09.55.530 - 09.55.560

(1) "health care provider" means a chiropractor licensed under AS 08.20; a dental hygienist licensed under AS 08.32; a dentist licensed under AS 08.36; a nurse licensed under AS 08.68; a dispensing optician licensed under AS 08.71; a naturopath licensed under AS 08.20; an optometrist licensed under AS 08.72; a pharmacist licensed under AS 08.80; a physical therapist licensed under AS 08.84; a physician licensed under AS 08.64; a podiatrist; a psychologist and a psychological associate licensed under AS 08.86; and a hospital as defined in AS 18.20.130, including a governmentally owned or operated hospital; a corporate entity covered under AS 21.88.050(b)(12); and an employee of a health care provider acting within the course and scope of employment;

(2) "board" means an arbitration board established under AS 09.55.535;

(3) "panel" means an expert advisory panel established under AS 09.55.536.

* Sec. 19. AS 47.08.050 is amended to read:

Sec. 47.08.050. SERVICES EXCLUDED FROM COVERAGE. Annually, the committee shall determine in light of appropriated funds and expected need the medical expenses reimbursable under this chapter, except that the following are not reimbursable:

(1) dentistry and optometry unless prescribed by a licensed dentist or physician as medically necessary as the result of the injury or illness;

(2) elective medical or surgical procedures;

(3) drugs and medications not prescribed by a licensed

physician;

(4) services received as a result of a pregnancy or birth without unusual complications;

(5) private psychological or psychiatric treatment or private alcoholism treatment, unless not available from public agencies or programs;

(6) chiropractic services and services provided by a person who practices naturopathy;

(7) services not of a medical nature;

(8) medical services currently provided to persons in the custody of the Department of Corrections;

(9) costs incurred before July 1976.

* Sec. 20. AS 47.17.070 is amended to read:

Sec. 47.17.070. DEFINITIONS. In this chapter

(1) "child" means a person under 18 years of age;

(2) "child abuse or neglect" means the physical injury or neglect, sexual abuse, sexual exploitation, or maltreatment of a child under the age of 18 by a person who is responsible for the child's welfare under circumstances which indicate that the child's health or welfare is harmed or threatened thereby;

(3) "child care provider" means an adult individual, or an employee of an organization, who provides care and supervision to a child for compensation;

(4) "department" means the Department of Health and Social Services;

(5) "institution" means a private or public hospital or other facility providing medical diagnosis, treatment, or care;

(6) "neglect" means the failure to provide necessary food, care, clothing, shelter, or medical attention for a child;

(7) "organization" means a group or entity that provides care and supervision for compensation to a child not related to the caregiver, and includes a child care facility, pre-elementary school, head start center, child foster home, residential child care facility, recreation program, children's camp, and children's club;

(8) "person responsible for the child's welfare" means the child's parent, guardian, foster parent, a person responsible for the child's care at the time of the alleged child abuse or neglect, or a person responsible for the child's welfare in a public or private residential agency or institution;

(9) "practitioner of the healing arts" includes chiropractors, dental hygienists, dentists, health aides, nurses, nurse practitioners, optometrists, osteopaths, naturopaths, physical therapists, physicians, physician's assistants, psychiatrists, psychologists, psychological associates, religious healing practitioners, and surgeons;

(10) "sexual exploitation" means

(A) permission or encouragement to a child for prostitution prohibited by AS 11.66.100 - 11.66.150 by a person responsible for the child's welfare;

(B) permission, encouragement, or activity involved in the unlawful exploitation of a minor prohibited by AS 11.41.-455 by a person responsible for the minor's welfare.

* Sec. 21. This Act takes effect immediately in accordance with AS 01.-10.070(c).

IN THE SENATE BY ABOOD

SENATE BILL NO.297

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the licensing of practitioners of naturopathic medicine; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.01.010 is amended by adding a new paragraph to read:

(26) regulation of naturopathy or naturopathic medicine under AS 08.45.

* Sec. 2. AS 08 is amended by adding a new chapter to read:

CHAPTER 45. NATUROPATHS.

ARTICLE 1. REGULATION OF NATUROPATHY.

Sec. 08.45.010. DUTIES AND POWERS. The department shall

(1) evaluate the qualifications of applicants for licenses under this chapter;

(2) conduct hearings and keep records necessary to carry out the purposes of this chapter; and

(3) license naturopaths and renew licenses in accordance with AS 08.45.100 - 08.45.170.

ARTICLE 2. LICENSING OF NATUROPATHS.

Sec. 08.45.100. LICENSE REQUIRED. A person may not engage in the practice of naturopathy or naturopathic medicine unless that person has a valid license issued under this chapter.

Sec. 08.45.110. REQUIREMENTS FOR A LICENSE. To be eligible for a license to practice naturopathy or naturopathic medicine, an applicant must have the following qualifications:

(1) a high school diploma or its equivalent;

(2) completion of three full years of postsecondary education at an accredited college or university;

(3) graduation from a school of naturopathy or naturopathic medicine that requires for graduation the successful completion of a course of resident instruction as follows:

(A) nine or more months of attendance a year for four years;

(B) successful completion of a course of instruction totaling 4,000 hours or more; the course of instruction must include 1,500 hours of clinical experience, and the following subjects: anatomy, physiology, histology and embryology; microbiology; pathology; immunology; public health; physical, clinical, and x-ray diagnosis; first aid and emergency medicine; obstetrics and gynecology; orthopedics; minor surgery and proctology; otolaryngology; physiotherapy and manipulative techniques; dietetics and clinical nutrition; botanical medicine; naturopathic theory; therapeutics and clinical practice; and jurisprudence;

(4) successful completion of an examination given by the department; the department may waive the examination if the applicant has successfully passed a similar examination in another state or in Canada;

(5) no history of suspension or revocation for disciplinary reasons of a license to practice naturopathy issued by another state or a province of Canada;

(6) United States citizenship or lawful admission as a permanent resident to this country; and

(7) good moral character.

Sec. 08.45.120. EXAMINATION. (a) The department shall hold an examination for a license to practice naturopathy or naturopathic medicine at a time, place, and manner determined by the department. The department shall hold the examination at least twice a year if the demand exists. The department shall limit the examination to the subjects listed in AS 08.45.110(3). Each of the subjects listed in AS 08.45.110(3) constitutes a separate examination section. The examination must be objective and written, but the department may supplement the written examination with oral examinations and demonstrations or other practical tests.

(b) A passing grade on the examination is an average of 75 percent for the entire examination with a score below 70 percent for no more than two sections.

Sec. 08.45.130. RECIPROCITY. The department may license a person to practice naturopathy or naturopathic medicine if the person is currently licensed to practice naturopathy or naturopathic medicine in another state or a province of Canada and

(1) that state or province maintains professional licensing standards equivalent to or higher than those in this chapter;

(2) that state or province extends the same licensing privilege to those holding a license to practice naturopathy or naturopathic medicine in this state; and

(3) the person demonstrates to the satisfaction of the department qualifications equal to those required of a person licensed under this chapter.

Sec. 08.45.140. DENIAL OF RENEWAL, SUSPENSION OR REVOCATION OF LICENSE. The department may, to the extent necessary to protect the public, reprimand or prescribe rehabilitation or education for, or suspend, revoke, or decline to renew the license of, a licensee who

(1) has obtained a license under this chapter by fraud or deceit;

(2) wilfully violates a provision of this chapter or a regulation adopted under this chapter;

(3) habitually overuses alcoholic beverages;

(4) unlawfully uses a controlled substance;

(5) impersonates a medical doctor;

(6) practices naturopathy or naturopathic medicine under an assumed name;

(7) is incompetent;

(8) engages in dishonest or misleading business practices; or

(9) is convicted of a crime involving moral turpitude, including murder, sexual assault, robbery, kidnapping, incest, arson, burglary, theft, and forgery.

Sec. 08.45.150. FEES. The department shall charge the following fees:

(1) application for examination $100

(2) license issuance or biennial renewal 200

Sec. 08.45.160. SCOPE OF NATUROPATHIC PRACTICE. (a) A naturopath may

(1) perform physical examinations, write prescriptions for substances authorized by this chapter, and sign birth and death certificates;

(2) use systems of diagnosis for which the naturopathic physician has been trained under AS 08.45.110(3);

(3) treat patients by physiological, nutritional, psychological, mechanical, electrical, manual, hydrotherapeutic, or phytotherapeutic methods, that are recognized naturopathic methods,

including acupuncture and the use of mineral and organic substances and agencies;

(4) draw blood for laboratory purposes, and use electrical or other methods for the repair and care of superficial lacerations and abrasions, benign superficial lesions, and the removal of foreign bodies located in superficial structures; and

(5) practice natural childbirth, including related minor surgical procedures.

(b) A naturopath may not

(1) except as provided under (a)(5) of this section, perform surgery;

(2) use controlled substances;

(3) use radiation therapy; or

(4) use drugs, except local anesthetics, minerals, and extracts, compounds or concentrates obtained from plants or animals.

Sec. 08.45.170. RENEWAL. (a) A license issued under this section is valid for two years from the date of issuance.

(b) Before the department renews a license issued under this chapter, the licensee shall submit to the department evidence that the licensee has completed 20 hours of continuing education.

(c) The department may exempt a licensee from the continuing education requirement of (b) of this section if a licensee submits an application setting out extenuating circumstances that justify granting the exemption. The department may not give to a licensee more than one exemption under this subsection in a five-year period.

(d) The department shall prescribe by regulation the courses that will satisfy the continuing education requirements of this section.

ARTICLE 3. GENERAL PROVISIONS.

Sec. 08.45.200. TITLES AND ABBREVIATIONS. (a) A person licensed under this chapter may use the following titles: "Naturopath," "Naturopathic Physician" or its abbreviation, "N.P.," "Doctor of Naturopathy" or its abbreviation, "N.D." A person licensed under this chapter may not use a title in a manner that suggests that the person practices a form of medicine or a healing art other than naturopathy or naturopathic medicine.

(b) A person may not use a title or abbreviation listed in (a) of this section unless the person is licensed under this chapter.

Sec. 08.45.205. VIOLATIONS. (a) Except as provided in (b) of this section, a person is guilty of a class B misdemeanor if the person

(1) fraudulently obtains or furnishes a license, renewal, or record required by this chapter;

(2) wilfully violates a provision of this chapter or a regulation adopted under this chapter.

(b) A person who practices naturopathy or naturopathic medicine without a valid license issued under this chapter is guilty of a class A misdemeanor.

Sec. 08.45.220. DEFINITIONS. In this chapter

(1) "controlled substance" has the meaning given in AS 11.-71.900;

(2) "department" means the Department of Commerce and Economic Development;

(3) "naturopath" means a person who practices naturopathy or naturopathic medicine;

(4) "naturopathy" or "naturopathic medicine" means a system of healing the human body that involves diagnosis and treatment through the use of natural agencies, forces, processes, and products,

with an emphasis on the response of the individual to the disease rather than treatment of the disease in isolation.

* Sec. 3. Notwithstanding AS 08.45.110 as enacted in sec. 2 of this Act, a person may apply for and receive a license to practice naturopathy if the person

(1) is a resident of the state;

(2) is practicing naturopathy in the state on the effective date of this Act;

(3) has a valid license to practice naturopathy issued, after examination, by another state or a province of Canada;

(4) has graduated from a school of naturopathy that satisfies the requirements of AS 08.45.110(3) as enacted in sec. 2 of this Act; and

(5) applies for the license within 30 days of the effective date of this Act.

* Sec. 4. This Act takes effect July 1, 1986.

Scott Jamison
Paul Doyle

CHAIRMAN'S INFORMATION: CSSSSB 297(L&C)

1) BILL TITLE: "An act relating to the practice of naturopathy; and providing for an effective date."

a) Introduced: Sen Abood

b) Co-sponsors:

2) INTENT: This measure provides for the licensure of "naturopathic" practitioners, and would place them under the Board of Chiropractic Examiners. It provides for the expansion of the Board including the appointment of a nonvoting "ex officio" naturopath.

The bill also limits the practice of naturopathy to prevent the use of prescription drugs, controlled substances, poisons, the practice of surgery, and the use of the word physician in the person's title.

FISCAL NOTE: 0 for the original bill

3) ADDITIONAL REFERRALS: HESS, Finance , Rules

b) Assign to sub committee for further review?
c) Move from committee?
d) Close public hearings?

6) COMMITTEE ACTION?

a) amendments?
b) CS adoption? Need to adopt the Senate L&C CS

MEMORANDUM State of Alaska

TO: Michael Thill, Staff Assistant
Senate Labor & Commerce Committee

DATE: April 11, 1986

FILE NO:

TELEPHONE NO: 465-3600

FROM: Harold M. Brown
Attorney General
By: Peter B. Froehlich
Assistant Attorney General

SUBJECT: Pettijohn v. State, -- naturopath appeal

You asked by telephone yesterday about the effect and meaning of the March 28, 1986 Decision and Order in Pettijohn v. State (Case No. 3AN-84-160 consolidated), by Judge Shortell. The decision affirmed the Medical Board's September 20, 1984 decision and order which prohibits Patton D. Pettijohn from performing in the course of his naturopathy practice, activities which constitute the practice of medicine because he is not licensed under AS 08.64. The decision does not change, but rather merely upholds, the prohibition against practicing medicine without a license that has existed since at least 1949 (AS 08.64.170(a)) and the definition of the practice of medicine which was rewritten in 1983 (AS 08.64.380(2).

Neither the recent superior court decision nor any existing statutes or regulations prohibit the practice of naturopathy itself. Naturopaths can continue to practice naturopathy as long as they do not at the same time practice medicine in any way. To the extent the two practices overlap, however, naturopaths are still barred from all activities included within that overlap. Naturopaths can also, of course, practice lay midwifery under ch. 33, SLA 1985.

We expect the March 28 Decision and Order to be appealed, but we are confident of our ability to successfully defend it. We will be consulting with the division of occupational licensing and the medical board concerning the practical and enforcement ramifications of the court's decision and order. It is likely that the 4 or 5 known naturopaths in the state will be contacted to ensure that they understand the limits within which they can practice naturopathy under the existing laws which have been upheld by the court.

A copy of both the court's and the board's decisions and orders are attached, along with the board's March 1, 1984 answers to clarifying questions. Please let us know if we can provide any further information.

POSITION PAPERS

STATE OF ALASKA
THE LEGISLATURE

LEGISLATIVE AFFAIRS AGENCY

POUCH Y · STATE CAPITOL
JUNEAU, ALASKA 99811
907-465-3800

MEMORANDUM April 14, 1986

SUBJECT: Liability of state for exempting the practice of naturopathy from the practice of medicine

TO: Senator Fred Zharoff
Chair, Labor and Commerce Committee

FROM: Theresa L. Bannister TLB
Legislative Counsel

You have requested an opinion whether or not the state would be liable for injuries suffered by a patient of a naturopath if the state passed a law exempting the practice of naturopathy from the practice of medicine. The short answer is that the state would not be liable for such injuries. There do not appear to be constitutional problems with the general concept of enacting such an exemption, and the doctrine of sovereign immunity would prevent a tort action for such injuries against the state.

Under the doctrine of sovereign immunity, the state is immune from liability unless the state provides by statute for liability. The reason behind this immunity is to limit judicial reexamination of decisions properly entrusted to other branches of government. See Industrial Indemnity Co. v. State, 669 P.2d 561, 563 (Alaska 1983). AS 09.50.250 states the actions that can be brought against the state and includes tort actions. However, subsection (a) of that statute contains two major exceptions that are relevant to your question.

One exception prohibits a claim based on the negligence of a state employee or agency when performing a discretionary function or duty. Decisions that rise to the level of planning or policy-making are considered discretionary acts that do not give rise to tort liability, while decisions that are merely operational in nature are not considered to be discretionary acts and therefore are not immune from liability. See, e.g., State v. I'Anson, 529 P.2d 188, 193 (Alaska

1974). Since the making of statutes is certainly policy-making, the enactment of such a statute by the legislature and the planning and policy-making in the implementation of the statute would be discretionary acts for which the state could not be held liable in tort for personal injuries, even if it were claimed that these acts were performed without due care.

The other exception prohibits tort actions based upon an act or omission of a state employee who exercises due care in the execution of a statute or regulation, whether or not the statute or regulation is valid. Therefore, if the state implemented such a bill with all due care, the state would not be liable for patient injuries, whether the particular implementing act amounted to a discretionary or operational act.

Therefore, it does not appear that the enactment or implementation of a statute exempting the practice of naturopathy from the practice of medicine would expose the state to liability for the personal injury claims of patients of naturopaths. The liability of the state regarding such a statute would be no different from its ordinary liability exposure for carrying out governmental functions.

If I can be of further assistance, please advise.

Alaska Professional Sportfishing Association
P. O. Box 6748
Anchorage, Alaska 99502

Attention: Bud Hodson
Sec Treas APSA

Dear Mr. Hodson:

Thank you for your letter and material regarding the licensing of Sportfishing Guides Statewide.

We have examined the material very closely and agree with all points of the proposed statutes.

The sportfishing guide industry must be regulated. It has always been the contention of this association to establish some type of regulations and/or statutes relating to sportfishing guides.

The only possible change in the proposed wording relates to 08.xx.210 Unlawful Acts. We would like to see a more definite time of reporting offenses. We feel that a too long of reporting time allows "non-resident" violators the opportunity to avoid prosecution.

I urge the Administration, State Legislators andall other interested parties to consider for adoption some statutes for regulating sportfishing guides.

Yours Truly

Harry Gaines

Subject: The licensing of Sportfishing Guides Statewide

As much as we dislike regulations or government interference, it is apparent that the state needs regulations governing sportfishing guides and outfitters, to protect the public, resources and sportfish guiding industry. It is also apparent that the industry needs controls to protect the aesthetic value of a "wilderness experience".

The commercial sportfishing industry is growing at an accelerated pace. A study in 1982 by ADF&G Habitat Div. showed the Sportfish guiding and outfitting industry generated over 30 million dollers for guiding and or related services, in the Bristol Bay area. For 1985 we think that figure will top 40 million dollers. It is fast becoming "Big Business". We feel that state wide, the industry is worth over 100 million dollers annually.

The most publicize problem area for our industry is the Kenai River. The problem there is simply too much impact. A river can hold only so many guides and anglers. This problem is associated with the large population of Anchorage and the road access to the Kenai peninsula.

The problem areas go far beyond the Anchorage vicinity rivers. For example: U.S. Fish & Wildlife service has placed a moratorium on issuing any additional guiding permits for the Togiak National Wildlife Refuge and also the Yukon Delta Wildlife Refuge. The U.S. Fish & Wildlife Service has determined that rivers within these refuges have to much guiding impact. These areas of the state are as remote as you can get. According to a report from U.S.F&WS on guided anglers for the Togiak Wildlife Refuge in 1983, there were a total of 1521 clients for 5489 client use days, in 1984 there were 2073 clients for 10,086 client use days. Other areas of the state have been equally impacted.

We feel that our industry still has room to grow and that growth is healthy but on the other hand the uncontrolled growth and popularity of sportfishing in Alaska is presenting a lot of problems.

Reactions from bush communities and thier fears of local rivers becoming another "Kenai River" situation has created a negative outlook on our industry.

Nonresident and resident individuals and companies are portraying themselves as expert and knowledgeable guides advertising and selling guided trips to rivers and areas where they have never been before and in some cases have never been to Alaska before.

ALASKA PROFESSIONAL
SPORTFISHING ASSOCIATION

P.O. Box 6349
Anchorage, Alaska 99502
907-248-1714

Unethical and naive guides are abusing the resource, trespassing on native lands, littering and conducting unsafe operations.

There is a growing concern amongst local sportfishermen who do use guides, that the guides are dominating all of the "fishing Holes".

These are some of the problems that we are encountering and that give our industry and Alaska a bad reputation. To take a guided sportfishing trip in Alaska is not cheap. The prices range from $100 to $400 per day not including travel to and from the state. Because of the high prices it is quite appealing to get into the business, especially when all it takes is a couple of rafts and tents to get started in the float trip business. Unfortunatly the fishermen are usually the ones that get burned on this kind of deal.

With an industry of this size and expanding to the point of saturating the state it is our position that some sort of state regulations should be adopted to control quality, safety and expansion of the Sportfish Guiding Industry.

Governor Bill Sheffield
Office of the Governor
State of Alaska
Pouch A
Juneau, Alaska 99811

January 9, 1985

Dear Bill:

Pursuant to our conversation in Juneau with reference to suggested legislation to regulate sportfishing guides. The enclosed is our suggested wording for a statute to accomplish these goals.

With the help of the Alaska Professional Sportfishing Association and other interested parties including the Attorney General's Office and the Division of Occupational Licensing, we have spent over 500 man hours compiling these suggested regulations. It is our feeling and that of the big game Guide Licensing and Control Board members, that to license and regulate possibly 3000 sportfishing guides and 450 big game guides with a single combined board would be counter productive and not to the best interest of the resource and the public.

In light of the fact that a suggested fee of $100 per resident license and $250 for a non-resident license, in excess of $300,000 could be generated to the general fund to substantiate budgetary requirements for a separate board. If additional revenues are required to justify a separate board, than the industry is supportive of increasing the license fees. One possibility is to have the licensing fees set by regulation rather than statute, to facilitate any increases in revenue requirements as needed to administer the board.

In consideration of the size and diversity of the industry which includes: Fixed lodges, wilderness camps, float trips, charter boats, air taxies and freelance guides. We have determined that this legislation could not directly address the problems of the industry but could set up a vehicle to do so. This legislation is intended to:

1: Make the guides competent and responsible.
2: Protect the public and resources.

3: provide a fair vehicle for new licensees to qualify.
4: Promote the orderly growth of the industry.
5: Create a board to administer and implement regulations as required.

It is not our intent that a value should be placed on any license or permit at the time of transfer.

At the meeting hosted by the Alaska Professional Sportfishing association on December 14, 1984. The following agencies were represented for a review of the proposed wording and the over all concept of the legislation. In attendance were representatives from: Alaska Dept of Fish & Game Sportfish Division, Alaska State Parks, U.S. Park Service, U.S. Fish & Wildlife Service, U.S. Forest Service. Comments made by those in attendance were positive and supportive of the proposed legislation. It was felt that this licensing proposal would compliment and simplify the different agencies administrative responsibilities and that the board would provide a vehicle for cooperation and communication between the agencies and the guiding industry.

With out further help from the Attorney Generals office, we felt it unwise to include wording for a grand-father clause at this time. It is our intent that those currently in the sportfish guiding business that are qualified, should be grand-fathered in.

As much as we dislike regulations or government interference, it is apparent that the State needs regulations to protect both the public and the resources. It is also apparent that the industry needs controls to protect the aesthetic value of a "wilderness trip". If I can be of any further help, please call at me at your convenience.

Sincerely,

151

Chuck Wier

JANUARY 27, 1986

FEB 3 1986

SENATOR FRED ZHAROFF
ALASKA STATE LEGISLATURE
POUCH V (MS3100)
JUNEAU, ALASKA 99811

DEAR SENATOR ZHAROFF:

I'VE BEEN REVIEWING TWO SENATE BILLS THAT ARE CURRENTLY IN COMMITTEE (NUMBER 294 AND 304). BOTH BILLS HAVE FAR REACHING AFFECTS UPON THE ECONOMIC INTERESTS OF MANY PEOPLE IN KODIAK. BOTH BILLS ARE DIFFICULT TO UNDERSTAND, IN RESPECT TO THE ACTUAL OBJECTIVES.

I'LL FIRST COMMENT UPON BILL NO. 294, WHICH I ASSUME IS RELATED TO THE SENATE CONCURRENT RESOLUTION NO. 18, THAT ESTABLISHES OBJECTIVES AND DETAILED CRITERIA FOR ASSIGNMENT OF GUIDE AREA PERMITS. CERTAINLY A BETTER TRACKING OF AREA PERMITS ISSUED BY THE GUIDE BOARD HAS BEEN LONG OVERDUE.

SENATE BILL NO. 294 MAY ASSIST IN SERVING SOME OF THESE CONSIDERATIONS, BUT LIKE MOST BILLS, FINDS INCLUSION OF ITEMS THAT COULD BE VERY SELF SERVING FOR THE SUPPORTERS OF THE LEGISLATION. MY MAIN CONCERN IS SEC. 08.54.090 OF THE BILL, WHICH ESTABLISHES AN OUTFITTERS LICENCE. I HAVE NO PROBLEM WITH AN OUTFITTERS LICENCE, IF IT SHOULD BE A NECESSARY MONITORING SYSTEM OR A DEFINITE DEFINITION OF OUTFITTING THAT WOULD BE IN HARMONY WITH PRESENT ESTABLISHED OUTFITTER OPERATIONS. I CERTAINLY OBJECT TO PART (1) AND (2) , THAT WOULD PLACE THIS TYPE OF BUSINESS UNDER COMPLETE CONTROL OF MASTER AND REGISTERED GUIDES.

I CAN ONLY SPEAK FOR KODIAK ISLAND, INWHICH THE OUTFITTING BUSINESS HAS BEEN A MORE RECENT EXPANSION OF ECONOMIC GAIN FOR A GREAT NUMBER OF THE ISLANDS RESIDENTS. MOST OF THIS ACTIVITY HAS BEEN GENERATED BY PROVIDING SERVICES FOR DEER HUNTING AND SPORTFISHING.

OVER THE PAST TWO YEARS, I HAVE INVESTED CONSIDERABLE MONEY INTO THIS TYPE OF SERVICE AND HAVE DEVELOPED PHOTOGRAPHY AND SIGHTSEEING TYPES OF OPERATIONS, WHICH HOPEFULLY WILL EXPAND IN THE FUTURE.

IT IS OBVIOUS THAT ANY BILL OF THIS NATURE NEEDS TO BE CAREFULLY STUDIED, TO INSURE THAT EXISTING OPERATORS WILL NOT FIND THEMSELVES LEGISLATED OUT OF BUSINESS, FOR THE BENEFIT OF A SELECT FEW. IT SHOULD BE KEPT IN MIND, THAT THE MAJORITY OF THE REGISTERED GUIDES, DO NOT RESIDE IN KODIAK AND MANY OPERATE BY REMOTE CONTROL FROM OTHER AREAS OF THE STATE AND POSSIBLY EVEN FROM LOCATIONS OUT OF THE STATE. I'VE ACCEPTED THE BEAR HUNTING GUIDE SYSTEM, AS A CLOSED ENTRY OPERATION, SINCE IT WAS A LONGTERM ESTABLISHED SYSTEM, THAT WAS EMBRACED BY BOTH FEDERAL AND STATE REGULATORY SUPPORT. I CERATINLY OBJECT TO THIS EXCLUSIVE RIGHT BEING APPLIED TO ALL OTHER TYPES OF RESOURCE UTILIZATION. I HAVE DIFFICULTY IN ACCEPTING THIS EXPANSION OF RIGHTS TO SUBSISTENCE TYPE GAME, SMALL GAME, SIGHTSEEING AND PHOTOGRAPHY UTILIZATION OF OUR RESOURCES.

referred to L+C

IN RESPECT TO SENATE BILL 304, I FIND EXTREME DIFFICULTY TO REALLY UNDERSTAND WHAT IT MEANS. CURRENTLY, TO THE BEST OF MY KNOWLEDGE, THE ONLY SPORTFISH GUIDING RESTRICTIONS IS THE KENIA RIVER, EXCEPT FOR REFUGE LAND USE PERMITS (ATTACHED EXAMPLE). THE BILL PROVIDES FOR NO DEFINED ENTRY OF SPORTFISH GUIDES LOCATED IN THE REMAINDER OF THE STATE. CURRENTLY YOU ARE A SPORTFISH GUIDE, IF YOU CHOOSE TO PROVIDE THAT TYPE OF SERVICE OFF FEDERAL LANDS (REFUGE) ON KODIAK, ISLAND. THE SAME APPLIES FOR PHOTGRAPHY, SIGHTSEEING, SMALL GAME AND ANY OTHER TYPE OF GUIDING REQUIRING KNOWLEDGE OF THE LOCAL AREA.

AGAIN, I HAVE NO PROBLEM WITH A LICENCING REQUIREMENT, IF THIS TYPE OF ACCOUNTABILITY IS NECESSARY, BUT WOULD LIKE TO SEE WHAT THE ACTUAL REQUIREMENTS WILL BE, PAST PARTICIPATION CONSIDERATIONS, SO THAT EXISTING OPERATIONS WOULD NOT BE ELIMINATED FROM THIS TYPE OF BUSINESS.

BASICALLY I'VE NEVER BEEN A GREAT ADMIRER OF THE OPERATIONS OF THE GUIDE BOARD AND WOULD RATHER SEE THESE FUNCTIONS BE CONTROLED BY THE BOARD OF FISHERIES AND THE GAME BOARD.

THANK YOU FOR YOUR TIME AND HOPE THAT ANY PROGRESS OF THESE BILLS WILL ALLOW AMPLE REVIEW.

SINCERELY,

Jack

JACK LECHNER

FORM 3-1383
(REV. 11/75)

UNITED STATES DEPARTMENT OF THE INTERIOR
U.S. Fish and Wildlife Service

Kodiak National Wildlife Refuge

SPECIAL USE PERMIT

Permit number	Sta. No. to be credited
KD-21-85	74530

Contract number

Date: March 26, 1985

Permittee *(Name and address)*

Jack Lechner
P. O. Box 1616
Kodiak, Alaska 99615

Period of use *(inclusive)*

From April 1 1985
To December 31 1985

Purpose *(Specify in detail privilege requested, or units of products involved)*

To conduct a commercial sport fish guiding operation and photography guiding operation on specified Refuge lands.

Description *(Specify unit numbers; metes and bounds; or other recognizable designations)*

Use involving overnight camping is allowed only within the Spiridon and Little River drainages. Day use is permitted on all Refuge lands/waters. Photography guiding is not subject to overnight camping area restrictions listed above. All special conditions for sportfish guiding also apply to photography guiding.

Amount of fee $ 100.00 If not a fixed fee payment, specify rate and unit of charge: _____

[X] Full payment

[ ] Partial payment-Balance of payments to be made as follows:

Record of Payments

Payment received 3/27/85, check # 528

Special Conditions

1. See attached supplemental Special Conditions.
2. The following items are required for completion of this permit:
   a. Permit fee.
   b. Proof of liability insurance (see special condition number 7).
   c. Letter of concurrence if operations will be conducted on Native selected lands.

This permit is issued by the U.S. Fish and Wildlife Service, and accepted by the undersigned, subject to the terms, covenants, obligations, and reservations, expressed or implied therein, and to the conditions and requirements appearing on the reverse side.

This bill establishes the licensing of sport-fish guides in two categories, registered and assistants. Although the bill authorizes the licensing function to be administered by the department, it places the sport-fish act under AS 08.54 which establishes the Guide Licensing and Control Board to oversee the practice of hunting guides in Alaska.

CONTINUATION of FISCAL NOTE ANALYSIS

For Bill/Resolution No. SB 304

PERSONAL SERVICES:

1 Licensing Examiner I, Range 12A, GGU, 12 months in Juneau 33.1

TRAVEL:

This would provide travel and per diem funding for the Licensing Examiner to administer an examination in Homer since a large number of sport-fish guides are from the Kenai Peninsula area. $352 x 240 (3 days per diem) = $592.00

An additional examination can be administered in Juneau for the Southeast area at no additional travel costs.

CONTRACTUAL:

In FY 87, funding of $2.5 would provide the following:

-Design of a sport-fish licensing examination under contract, based on costs incurred during a similar contract agreement with the hunting guide exams. 1.5

-Miscellaneous operating costs for telephone, printing of applications and statute books; and other publications such as public notices in accordance with the Administrative Procedure Act for two exams at $20 per notice x 3 papers. 1.0

In FY 88, funding of $8.2 would provide the following:

-Litigation costs for hearing officers, court reporters, witnesses, etc., based on similar costs incurred by hunting guides which amount to approximately 5% of the allocated contractual funds for this purpose. 7.2

-Miscellaneous operating costs for telephone, printing of applications and statute books, renewal forms; and other publications such as public notices in accordance with the Administrative Procedure Act for two exams at $20 per notice x 3 newspapers. 1.0

Succeeding years are based on a 5% increase.

SUPPLIES:

This funding will provide stationary, envelopes, pens, pencils and other desk top supplies to support the licensing function. 1.0

EQUIPMENT:

This funding will provide standard office equipment for the Licensing Examiner position. 3.3

Expenditures identified in this fiscal note are less than for other proposed licensing bills because of the absence of a board. While revenues appear to be high, they are the result of estimated numbers of eligible licensees provided by supporters of the bill.

If the fee structure is amended to allow licensing fees to be established by regulations under AS 08.01.065, fees will be amended to reflect the actual cost of the licensing activity.

Supporters of the bill have advised that there may be as many as 2500 registered sport-fish guides eligible for licensure upon enactment of the bill. However, we are unable to identify the number of assistant sport-fish guides who may be eligible for licensure. Therefore, based on Section 08.54.790(f) which states "a registered sport-fish guide may not employ or supervise more than three assistant sport-fish guides at the same time", this fiscal note is based on three assistant sport-fish guides to each registered sport-fish guide for a total of 7500 assistant sport fish guides in the first year (2500 x 3 = 7500).

REVENUES are based on licensing fees established in the current bill.

FY 87:	2500 Registered sport-fish guides x $150 biennial fee	= $	375.0
	7500 Assistant sport-fish guides x $25 annual fee	=	187.5
		$	562.5

There is no sure method upon which a reasonable estimate of new registered sport-fish guides can be determined. Therefore, a 5% increase in the number of new applicants over the 2500 licensed in the first year has been added. The revenue figures are subject to change if more concrete numbers of eligible licensees are identified.

FY 88:	7500 Assistant sport-fish guides renewing x $25	= $	187.5
	375 new Assistant sport-fish guides x $25	=	9.4
	125 new Registered sport-fish guides, assuming that at least half are non-residents:		
	62 non-resident registered sport-fish guides x $450	=	27.9
	63 resident registered sport-fish guides x $150	=	9.5
	125 new Registered sport-fish guides x $25 exam fee	=	3.1
		= $	237.4

FY 89:	7875 Assistant sport-fish guides renewing x $25	= $	196.9
	394 new Assistant sport-fish guides x $25	=	9.9
	131 new Registered sport-fish guides, assuming that at least half are non-residents:		
	65 non-resident registered sport-fish guides x $450	=	29.3
	66 resident registered sport-fish guides x $150	=	9.9
	131 new registered sport-fish guides x $25 exam fee	=	3.3
	2625 registered sport-fish guides renewing of which 62 are non-residents:		
	62 x $450 biennial fee	=	27.9
	2563 x $150 biennial fee	=	384.5
		= $	661.7

FY 90:	8269 Assistant sport-fish guides renewing x $25	= $	206.7
	413 new Assistant sport-fish guides x $25	=	10.3
	137 new Registered sport-fish guides, assuming that at least half are non-residents:		
	68 non-resident registered sport-fish guides x $450	=	30.6
	69 resident registered sport-fish guides x $150	=	10.4
	137 new Registered sport-fish guides x $25 exam fee	=	3.4
		= $	261.4
FY 91:	8682 Assistant sport-fish guides renewing x $25	= $	217.1
	434 new Assistant sport-fish guides x $25	=	10.9
	138 new Registered sport-fish guides, assuming that at least half are non-residents:		
	69 non-resident registered sport-fish guides x $450	=	31.1
	69 registered sport-fish guides x $150	=	10.4
	138 new Registered sport-fish guides x $25 exam fee	=	3.5
	2762 Registered sport-fish guides renewing of which 264 are non-residents:		
	264 x $450 biennial fee	=	118.8
	2498 x $150 biennial fee	=	374.7
		= $	766.5

Department of Commerce & Economic Development / POSITION PAPER

SB 304: "An Act establishing sport-fishing guide licenses."

The Department of Commerce and Economic Development, Division of Occupational Licensing, is neutral on this bill. We are aware that the bill is directed at reducing congestion on the Kenai and other popular fishing rivers. In addition, the Office of the Governor and the Department of Natural Resources favor the regulation of guides in general.

As the bill is written, this reduction would be accomplished by establishing requirements for examination, recommendations, bonding, insurance and a record free of certain convictions. However, the bill does not provide for the assignment of exclusive guiding areas, which is how the existing Guide Board currently limits hunting pressure by guides within a specific geographic area. Thus, the bill does not provide guaranteed relief from overcrowding in popular areas.

The division supports the opportunity to discuss whether or not regulation of sport-fish guides is needed at this time for reasons of consumer protection, which are more directly related to the intent of licensing and enforcement.

Division staff contacted the following agencies for records of complaint against sport-fish guides with the following results: Consumer Protection has no complaints on file for FY 84-FY 86 in Juneau and Fairbanks offices; the Anchorage office shows 5-6 per year. Fifty percent of those complaints were resolved amicably between the guide and complainant. The Better Business Bureau reported no complaints statewide for that period. The Anchorage Chamber of Commerce reported two complaints in 1985.

It is possible that other complaints bypass these offices and that small claims lawsuits are filed instead. However, without further documentation of complaints in this area, it would appear that the bill establishes a complex system of regulation out of proportion to need in terms of consumer protection.

In the event this bill passes, the department prefers that the responsibility of licensing sport-fish guides be placed under the existing Guide Licensing and Control Board, to provide for exchange of information regarding resource management, to ensure that complaints are acted on by professionals with knowledge of the field, and in the eventuality that area assignments are required. Such a step may require reformation of the Guide Board to include licensed sport-fish guides.

The division also recommends that Section 08.54.780 be amended to delete reference to more than one complaint as the basis for disciplinary action. The Division of Legislative Audit recommended deletion of a similar provision in the currently existing Guide Board statutes on the basis that such a provision is a constraint to effective disciplinary action.

We have also proposed several amendments to the bill in the interest of conforming to existing statutes controlling the division's administrative responsibilities, including the handling of complaints. Other proposed amendments are made in the interest of clarity.

Nanty Dunn, Director
Division of Occupational Licensing

Date: 3/17/86

Loren H. Lounsbury, Commissioner
Department of Commerce and
Economic Development

lt4909t-3/4

The Division of Occupational Licensing offers the following amendments to SB 304, An Act establishing sport-fish guide licenses.

Section 08.54.710(9) on page 2, line 14, delete ". . . [PREPARED AND]." This amendment will allow the division to contract with someone knowledgable in the field of sport-fish guiding to prepare an examination similar to the contract which developed the exam for hunting guides.

Section 08.54.720, page 2, line 27, consider the deletion of "[IS EMPLOYED AND]" from the requirements for an Assistant Sport-fish guide license. It appears that this language is based on current guide statutes. However, the level of supervision required in sport-fish guiding may be less needed than that of hunting guides. This section as written could be construed as unnecessarily restricting entry into the profession.

Section 08.54.730, page 3, amend language to read:

Sec. 08.54.730. DURATION OF SPORT-FISHING LICENSES. [(a)] A [REGISTERED] sport-fishing guide license issued under this chapter expires biennially on a date set by the department [TWO YEARS FROM THE DATE OF ISSUANCE].

[(b) An assistant sport-fishing guide license expires on year from the date of issuance.]

Combining both (a) and (b) into one section will make this section conform with standard language found throughout other licensing statutes and in AS 08.01, the Central Licensing Act. The purpose of this amendment is to set one date on which all licenses shall be renewed. This allows renewals to be processed more efficiently.

Section 08.54.740, page 3, lines 16 - 21, amend to read: (a) The department shall, by regulations adopted under AS 08.01.065, establish fees for sport-fishing professionals for the following: [LICENSE FEES FOR REGISTERED SPORT-FISHING GUIDES ARE AS FOLLOWS]

(1) application fee;
(2) examination fee;
[1] (3) nonresident registered sport-fishing license and renewal fee; [, BIENNIAL . . . . $450]
[2] (4) resident sport-fishing license and renewal fee; [, BIENNIAL . . . . 150]
[3] (5) assistant sport-fishing license and renewal fee; [, ANNUAL . . . . 25]

This amendment will allow licensing fees to be established by regulations to reflect the actual costs of the activity for which the fee is charged.

Section 08.54.760, Examination Fee. Delete this section since it is incorporated into the previous section 08.54.750.

Section 08.54.770, page 3, regarding complaints should be amended to read:

> "Sec. 08.54.770. COMPLAINTS. The department shall notify an individual licensed under AS 08.54.700 - 08.54.900 of each complaint received against the individual within two weeks of receiving the complaint, unless in the department's opinion, the complainant is a flight risk or to do so may otherwise jeopardize the conduct of an investigation."

An alternative would be to delete this entire section since the Administrative Procedure Act, (AS 44.62.360) establishes the formal procedure to be followed when acting on complaints.

Section 08.54.780(a)(1), page 4, lines 1 - 7, delete. It is contrary to public protection to wait until three complaints have been filed against a licensee before initiating a hearing. One valid complaint should be substantial reason to start the hearing process.

Section 08.54.780(b), page 4, line 11, delete "[RENEWAL OF]." The section as presently written would allow the department to take disciplinary action against renewal of a license. After a hearing, the department should be able to take action against the license under any circumstances, and not limited to the renewal.

08.54.780(b)(1), lines 13-14. Language in this section gives the board or the department broad authority to define what constitutes an activity which "adversely affects the natural resources of the State." We recommend that this section be more specific.

08.54.780(c)(3), lines 24-25. This section is unclear regarding the types of violations that would constitute the two violations necessary to revoke a license. Must the violations be two federal, two state or could they be one "federal" and one "state"?

08.54.780(e), amend this subsection to specifically identify the agencies to be contacted. Presently, all contact with other agencies for hunting guide licenses are conducted by the Division of Fish and Wildlife Protection in the Department of Public Safety.

Section 2, page 7, line 2 and all references to Game Guides thereafter, delete 'Game' if licensing is to be administered by the department, and refer to our original suggestion of placing Sport-fish Guides under a separate chapter.

Section 4 (a)(4), page 7, line 13-14, and amend to read: ". . . board if a board regulates the act or practice involved under AS 08.01.010" or as determined by the department [UNDER AS 08.54.700 - 08.54.900 FOR SPORT-FISHING GUIDES];

Section 4 (a)(9), lines 21-22, amend to read the same as mentioned in section (a)(4).

RE : Senate Bill relating to sport-fishing guide licensing

I would appreciate your assistance in having the above-referenced bill scheduled for committee consideration as soon as possible.

I have discussed this bill with a number of sport-fishing businesses throughout the state who support the proposal.

If you have any questions about the proposal, or need additional information, please feel free to contact my office.

THE ALASKA RAILROAD CORPORATION

Senate Bill No. 312

Free Transportation to Senior Citizens

Financial Impact Statement

The Alaska Railroad Corporation (ARRC) provides this statement of the financial impact of Senate Bill No. 312, if enacted. The bill would require that the ARRC provide free transportation of Senior Citizens over 65 years of age on its passenger trains on a space-available basis. These comments speak only to the financial impact of the Senate bill, important legal concerns will be discussed in a separate letter.

Because the majority of the passengers carried on the railroad ride during the four-month summer tourist season and travel for scenic enjoyment as opposed to necessity, the percentage of senior travelers is extremely high. In addition, over 90% of these persons are visiting Alaska as tourists for only a few days or weeks. Only four or five thousand Alaskans would benefit from this provision annually, while as many as 164,000 non-resident tourists would be eligible for free transportation.

The financial affect of this action on the ARRC's passenger services would be devastating. In 1984 this service lost $1.8 million. We project a $1.5 million loss in 1985. Final figures are expected in February. In 1986 due to more efficient operations, the loss is expected to total $1 million. If S.B. 312 were enacted, the 1986 losses would escalate to $2.9 million, a 292% increase. With this massive increase in passenger losses ARRC would request a state appropriation for the purpose of offsetting passenger losses.

Each passenger riding the express trains serving Denali National Park pays an average of $43.00 for tickets. A Whittier Shuttle patron contributes an average of $6.00 for passage on this shorter journey. Thus, substantial amounts of ARRC revenue are jeopardized should free transportation be allowed for a major portion of our ridership.

Based on ARRC statistics and a 1983-84 Alaska Department of Labor tourism study, approximately 72% of our Denali Park passengers, and 40% of our Whittier Shuttle riders, are seniors over 65 years of age.

These passengers share the following characteristics:

- Over 65 years of age,
- In a tourist status,
- Not a resident of Alaska,
- Traveling on the railroad as part of a 10-18 day Alaska vacation,
- Are traveling as part of a vacation itinerary which requires advance reservations months ahead,
- Making a "once in a lifetime" visit to the 49th State.

"SPACE-AVAILABLE" TRANSPORTATION WOULD CREATE MAJOR PUBLIC PROBLEM

Because tourist must plan and book various transportation and attraction facilities months in advance of travel, it is paramount that they reserve train reservations in the same manner. This provision helps the ARRC plan for space and to provide equipment and services as required.

The space-available free transportation option may encourage many visitors and travel agents to forego advance reservations. Unpredictable numbers appearing on the day of travel for ticketing may lead to unhappy situations involving passengers and between passengers and the railroad. Such a result would adversely impact the Alaska tourism program and injure railroad transportation . In addition, the costs of handling passengers in this manner would further escalate the losses that the ARRC bears in handling passengers.

Trains would become consistently late even before they left their starting point as persons waiting for "space available" seats eventually could outnumber reserved and pre-ticketed patrons. On trains such as the Whittier Shuttle, which interconnects with the scheduled state marine highway system, the result would be unacceptable to passengers and the railroad.

ATTACHMENT: Statistical and Financial Impact Table

THE ALASKA RAILROAD CORPORATION

EFFECTS ON PASSENGER SERVICES UPON ENACTMENT OF S.B. NO. 312

CALENDAR YEAR 1985

PASSENGERS CARRIED		SENIOR CITIZENS ARRC ESTIMATE		ESTIMATED FINANCIAL IMPACT	
TRAIN	NUMBER CARRIED	PERCENT OF TOTAL	NUMBER CARRIED	1985 REVENUE	REVENUE AFTER S.B.3
Denali Express	83,138	72%	59,859	$3,574,934	$1,000,981

			TOTAL	$4,460,282	1,532,189

NET LOSS OF REVENUE --- $ 2,928,093

Sources of data:

- ARRC statistics,
-Alaska Department of Labor

CHAIRMAN'S INFORMATION:

1) BILL TITLE: "An act relating to free passenger service for seniors on the Alaska Railroad."

a) Introduced: Sen Kerttula

b) Co-sponsors:

2) INTENT: Measure grants free passenger service to seniors (65 years old or older) on the Alaska RR. Provides that RR shall give free passage on a space available basis, and along routes and during periods that passenger service is provided to the general public.

FISCAL NOTE: ARRC estimates that the enactment of this bill would boost passenger service losses to $2.9 million for 1986; ARRC feels they would need an appropriation to off set passenger losses.

NOTE: Situation with the free RR transport is a little different than the ferry. Passengers normally board the ferry in Seattle, but RR people would already have to be in Alaska to get on at Whittier. ARRC feels this bill will have negative impacts on the RR. These include:

1) impact planning and reservations
2) unpredictable numbers of people would show on the day of transportation; may result in bad P.R. for RR; may have bad impact on tourism;
3) may impact schedule of RR

3) ADDITIONAL REFERRALS: Sen Finance

4) PUBLIC HEARINGS:

Senate Labor & Commerce Committee

AMENDMENT

SB 312

amend line 12, "passenger service on the Alaska Railroad for state residents [PEOPLE] 65 years of age. . ."

ALASKA RAILROAD CORPORATION

P.O. Box 7-2111 • Anchorage, Alaska 99510-7069

January 21, 1986

Members of the Senate Commerce Committee
Alaska State Legislature
Pouch V, Mail Stop 3100
Juneau, Alaska 99811

Re: Senate Bill No. 312 "An Act relating to free passenger service for seniors on the Alaska Railroad"

Dear Members of the Senate Commerce Committee:

Thank you for this opportunity to provide comments upon Senate Bill No. 312, an act directing the Alaska Railroad Corporation ("ARRC") to provide free passenger transportation for seniors.

Where they can be accommodated, special provisions for those persons 65 years of age and older serve laudable goals in our communities as a means of rewarding important economic and societal contributions and supplementing retirement incomes. Our comments concerning SB No. 312 should not be misconstrued as a failure to recognize the respect deserving of our older Americans. We do, however, wish to express serious reservations with regard to this proposal.

ARRC concerns are legal and financial in nature. Preliminarily, common carriers subject to the jurisdiction of the Interstate Commerce Commission ("ICC") are prohibited from providing transportation to passengers without charge except as specifically noted. 49 USCA §11905. Exceptions include caretakers of livestock, milk, or fruit, newspaper carriers, baggage agents, employees and their families, etc. Seniors are not named as a separate exception. As a part of the transfer of the Alaska Railroad into state ownership, the federal government required, and Alaska agreed, that the state-owned railroad would be subject to ICC jurisdiction. Beyond this important legal impediment, the legislation also raises significant financial concerns.

ARRC passenger service is already in trouble. Although the corporation has acted aggressively in reducing losses, $1.5 million in lost operating revenue resulted last year and 1.8 million in 1984. A separate ARRC financial impact statement projects a 292% increase in 1986 passenger service losses in 1986 should seniors travel for free on the Alaska Railroad. Free passage to such a large contingent of our summer guests would jeopardize the entire program without state subsidization of passenger service. Any purposeful reduction of railroad revenues also contradicts an earlier legislative mandate and erodes the original administrative and legislative mission charted for the railroad. The state Alaska Railroad Corporation Act ("ARCA") specifies that the ARRC shall be a "viable economic entity" operating the Alaska Railroad self-sufficiently according to sound business management practices. Slashing passenger revenues will certainly endanger the viability of this concept.

If our comments presented at this time raise questions or concerns, please contact us at your convenience. Although our admiration for seniors and their important contributions has not diminished, we do request your close scrutiny of the legal and financial ramifications of SB 312.

Sincerely,

Larry D. Wood
Chief Counsel

cc: F. G. Turpin, President and Chief Executive Officer, ARRC
Members of the Board of Directors, ARRC

THE ALASKA RAILROAD CORPORATION

Senate Bill No. 312

Free Transportation to Senior Citizens

Financial Impact Statement

The Alaska Railroad Corporation (ARRC) provides this statement of the financial impact of Senate Bill No. 312, if enacted. The bill would require that the ARRC provide free transportation of Senior Citizens over 65 years of age on its passenger trains on a space-available basis. These comments speak only to the financial impact of the Senate bill, important legal concerns will be discussed in a separate letter.

Because the majority of the passengers carried on the railroad ride during the four-month summer tourist season and travel for scenic enjoyment as opposed to necessity, the percentage of senior travelers is extremely high. In addition, over 90% of these persons are visiting Alaska as tourists for only a few days or weeks. Only four or five thousand Alaskans would benefit from this provision annually, while as many as 164,000 non-resident tourists would be eligible for free transportation.

The financial affect of this action on the ARRC's passenger services would be devastating. In 1984 this service lost $1.8 million. We project a $1.5 million loss in 1985. Final figures are expected in February. In 1986 due to more efficient operations, the loss is expected to total $1 million. If S.B. 312 were enacted, the 1986 losses would escalate to $2.9 million, a 292% increase. With this massive increase in passenger losses ARRC would request a state appropriation for the purpose of offsetting passenger losses.

Each passenger riding the express trains serving Denali National Park pays an average of $43.00 for tickets. A Whittier Shuttle patron contributes an average of $6.00 for passage on this shorter journey. Thus, substantial amounts of ARRC revenue are jeopardized should free transportation be allowed for a major portion of our ridership.

Based on ARRC statistics and a 1983-84 Alaska Department of Labor tourism study, approximately 72% of our Denali Park passengers, and 40% of our Whittier Shuttle riders, are seniors over 65 years of age.

These passengers share the following characteristics:

- Over 65 years of age,
- In a tourist status,
- Not a resident of Alaska,
- Traveling on the railroad as part of a 10-18 day Alaska vacation,
- Are traveling as part of a vacation itinerary which requires advance reservations months ahead,
- Making a "once in a lifetime" visit to the 49th State.

"SPACE -AVAILABLE" TRANSPORTATION WOULD CREATE MAJOR PUBLIC PROBLEM

Because tourist must plan and book various transportation and attraction facilities months in advance of travel, it is paramount that they reserve train reservations in the same manner. This provision helps the ARRC plan for space and to provide equipment and services as required.

The space-available free transportation option may encourage many visitors and travel agents to forego advance reservations. Unpredictable numbers appearing on the day of travel for ticketing may lead to unhappy situations involving passengers and between passengers and the railroad. Such a result would adversely impact the Alaska tourism program and injure railroad transportation . In addition, the costs of handling passengers in this manner would further escalate the losses that the ARRC bears in handling passengers.

Trains would become consistently late even before they left their starting point as persons waiting for "space available" seats eventually could outnumber reserved and pre-ticketed patrons. On trains such as the Whittier Shuttle, which interconnects with the scheduled state marine highway system, the result would be unacceptable to passengers and the railroad.

Office of the Senior Citizen Ombudsman

Senator Jalmar Kerttula
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Senator Kerttula:

Re: Older Alaskans of Whittier

I have received a petition from twenty-nine senior citizen residents of Whittier, Alaska (which constitute over ten percent of the population of the city) requesting that senior citizens over age sixty years be afforded travel on the Alaska Railroad with the same privilege as granted under the Alaska Marine Highway System.

As you know, the city of Whittier is isolated from direct access by road and, during the winter, from access by water. The only transportation into the city is by train. Travel to and from Anchorage for needed medical services is expensive for those living on fixed incomes.

Specifically, the Older Alaskans of Whittier request that residents over sixty years of age who reside in a city not served by road and where the Alaska Railroad is the only transportation provider be afforded free transportation as granted by the Alaska Marine Highway System.

Our office processes complaints on behalf of older Alaskans and this petition is outside the scope of this office. I am therefore forwarding it to you for your consideration.

The contact person in Whittier on behalf of the Older Alaskans of Whittier is Mr. Austin Simonds, PO Box 753, Whittier, Alaska 99693.

Thank you very much.

Very truly yours,

William O'Connor
Senior Citizen Ombudsman

PETITION TO THE ALASKA RAILROAD

We the undersigned, being members of the "Older Alaskans of Whittier" and residents of the community, hereby petition the Alaska Railroad that any person at least sixty years of age of any Alaskan community located along the railroad service area which is isolated year round from the rest of Alaska, except by the train service rendered by the Alaska Railroad, that Senior Citizens of such communities shall be allowed free transportation. Senior Citizens of Alaska wishing to travel to such isolated communities by railroad will be granted the same fare reduction.

All Senior Citizens of Alaska will be accorded a 50% discount on fares except as outlined above.

RE: Opposition to House Bill 313, Relating to Mandated Insurance Coverage of Mental Health Treatments

Dear Senator Zharoff:

The Health Insurance Association of America (HIAA) opposes House Bill 313 as introduced, which would require insurers to provide specified benefit coverage for treatment of mental or nervous conditions.

The HIAA is a national trade association representing 338 insurance companies who write approximately 86% of the private health insurance sold in the United States. Most of the companies licensed to sell health insurance in the state of Alaska are members of the HIAA. While the volume of business that these companies conduct in Alaska is small in relation to their overall business, we nevertheless take Alaskan legislation that is adverse to the industry quite seriously.

The HIAA favors the freedom of contract that allows insurance purchasers to obtain the kind of available benefit coverage they need or want and can afford. We oppose legislative mandates that restrict consumers' freedom to choose the benefits they wish to purchase and that limit insurers' ability to control costs and keep rates down. House Bill 313 would impose such mandates. Mental health benefits are among the most costly, if not the most costly of benefit coverages, and House Bill 313 would mandate mental health benefit coverage levels sig ificantly higher than those required in any other state that has addressed the issue of mental health insurance coverage. In addition, the bill would provide no upper limit to the dollar amount of such coverage. The cost to an insurer of paying benefits for the required two months of hospitalization, three months of partial hospitalization and thirty out-patient treatment visits per year would be staggering. It is conceivable that affordable premium rates could not be established for individual policies that would be adequate to make such benefit coverage feasible to an insurer.

The net effect of mandating the level of benefits coverage in House Bill 313 would be to increase the cost of benefit coverage to insurers and to drive up the price of insurance premiums to the consumer. This would result in increasing the cost of doing business for employers who offer group coverage to their employees and could lead to their deciding either to discontinue group coverage entirely or to self-insure.

The increased costs of private insurance caused by mandated benefit laws has, in fact, caused employers nationwide to drop their commercial group coverage. Over four years, 1980 - 1984, the percentage of American employers who self-insure jumped from 19% to 57%. Self-insurers are not regulated by state insurance laws and cannot be required to offer specified insurance benefits, nor can employees of self-insureds invoke the protections afforded by insurance laws to employees covered by commercial group insurance. Self-funding therefore has the negative effect of leaving those included in such plans unprotected by insurance regulation against such things as the plan's insolvency. It also results in a loss of revenue to the states, since self-insured plans are not subject to premium tax liability.

For all of the cited reasons the HIAA opposes House Bill 313. If you have any questions concerning our position, or if I can be of any assistance in providing additional information, please do not hesitate to contact me at the Chicago Legal Office of the Association (telephone: 312/297-1490) or Gordon Evans, who is our registered lobbyist in Juneau.

Very sincerely,

Amanda Sheedy

SENATE BILL NO. 333

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act changing the name of the Alaska State Housing Authority."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 18.55.020(a) is amended to read:

(a) There is created in the Department of Commerce and Economic Development the Alaska State Building [HOUSING] Authority consisting of the commissioner of commerce and economic development or the commissioner's [HIS] designee and four residents of the state.

* Sec. 2. To be consistent with the change made by sec. 1 of this Act, wherever in the Alaska Statutes and in regulations adopted under those statutes "Alaska State Housing Authority" is used, it shall be read as referring to the Alaska State Building Authority. Under AS 01.05.031 the revisor of statutes shall implement this section in the statutes, and, under AS 44.62.125(b)(6), the regulations attorney shall implement this section in the administrative regulations.

STATE OFFICE COMPLEX FINANCING TASK FORCE

October 29, 1985

The Honorable Bill Sheffield
Governor
State of Alaska
Pouch A
Juneau, AK 99811

Governor Sheffield:

On June 28, 1985, you appointed the State Office Complex Financing Task Force and requested that this Task Force "explore the concept of lease-purchasing as a viable means of obtaining adequa' and reasonably priced State office facilities, and to make recommendations to you and the Legislature as to the comprehensive public policy in this area that ensures the State's needs are met in the most efficient manner possible." More particularly, this assignment related to the "financing of large-scale State office complexes." In accordance with this charge, the Task Force has conducted a series of hearings which have involved evaluations by a large number of knowledgeable individuals, including representatives from the State government, legal counsel, and advisors and underwriters of governmental securities. In additon, a series of background documents were prepared to assist the Task Force in conducting its evaluation. It should be emphasized that, r rsuant to to vour charge, our efforts focused on financing options as opposed to many other factors that critically impact

BACK UP INFORMATION

the leasing or purchasing of State office buildings. Certain of these other items will be identified later in this letter.

This letter of transmittal sets forth in summary form our recommendations for the financing of large-scale State office buildings. The material contained in this letter is discussed in more detail in the accompanying two documents: "Lease-Revenue Bonds: Preferred Approach for Financing Public Ownership of State Office Buildings," dated October 11, 1985, and "Review of Alternatives to the State of Alaska for Purchasing or Leasing Office Space," dated September 10, 1985.

We would like to emphasize that our recommendations apply to financing office facilities which meet two criteria. First, space requirements in a particular location, such as Anchorage, Fairbanks, or Juneau, would have to be large; and second, the State would have to desire, as a governmental efficiency measure, to consolidate its office space and operations. During the course of our examination, we reviewed the primary and conventional forms of purchasing or leasing office space, consisting of: (1) the use of cash, (2) State general obligation bonds, (3) the true or operating lease, (4) certificates of participation, and (5) lease-revenue bonds.

We have concluded that the best way of financing State office complexes that meet the above criteria would be

lease-revenue bonds. However, we would like to emphasize that it is possible that a future environment would alter this approach as the most cost-effective and appropriate form for the State to pursue.

The principal reasons for this recommendation are: (1) the advantages of public ownership, (2) the economics related to the program, (3) the credit implications for the State, and (4) administrative efficiency. First, State leases of facilities under private ownership are generally renegotiated or rebid every three to five years. Through public ownership, vulnerability to rent increases would be reduced. At the same time, recent Federal legislation has reduced the benefits of the private ownership option when space is used by tax-exempt entities within a single structure. Second, extensive financial analysis was performed on the five options identified above, and it was concluded that the lowest cost to the State would be lease-revenue bonds, unless the State decided to sell general obligation bonds with a maturity substantially longer than the present maturity structure which corresponds to the "Prudhoe Bay curve." Third, while the State could decide to alter its maturity structure and sell general obligation bonds for this purpose, we concluded that the use of lease-revenue bonds, while a liability of the State's general fund, would be less likely to affect the State's credit standing than the issuance of general obligation debt for this purpose. Early

on, the Task Force adopted the principle that its recommendation should have the least effect on the State's general obligation rating. Finally, the State has utilized lease-revenue bonds in the past to finance State office complexes. Thus, administratively, the use of lease-revenue bonds is simple, straight-forward and has an acceptable track record, as demonstrated by the previous debt sold by the Alaska State Housing Authority.

The major features of our recommendation are as follows. First, the State would sell lease-revenue bonds for the purposes identified above through an existing State authority. Second, the debt sold by the authority to finance the obligations would be secured by periodic lease payments made by the State to the authority. If the Alaska State Housing Authority (ASHA) were selected for the financing of State office buildings, we would propose that ASHA be identified as the Alaska State Building Authority; the Task Force received testimony and concluded that there should be interest rate benefits with this slight modification because of the greater acceptance in the credit markets of State office building bonds than of housing securities. While we at present envision that lease-revenue securities would be the most cost-effective form of financing of buildings to meet our criteria, we recommend that the issuing authority also have the ability to sell certificates of participation. Finally, we propose that the

financing structure, individual financings and other debt management aspects of the program be subject to approval by the State Bond Committee to make sure that efforts are consistent with overall State debt management goals and practices.

In referring to ASHA as an appropriate entity through which the financing would flow, we did not and do not exclude the Alaska Industrial Development Authority (AIDA) as a possible financing entity. Although it has been primarily a tool to enhance private sector investment, AIDA possesses authority to own and operate State projects and presently is actively pursuing the road and port development for the DeLong Mountains transportation system which will be owned and operated by the State.

We would like to emphasize that there was a series of important areas related to State office building purchasing and financing which fell outside the scope of our work. Among the issues which we thought we should specifically identify as being outside the scope of our responsibility were: an evaluation of the impact of our recommendations on the affected local real estate and on the local tax base; the appropriate use of small leases or leases for office space that did not fit the criteria identified above; the public policy of legislative or other authorization of the recommended financing structure; various construction aspects, such as "design-build-factors"; and the State's specific space requirements on either an

aggregate or a local basis.

Additionally, we did not address the matter of public participation in the decision-making process. Obviously, some projects, such as office buildings, should be developed in cooperation with the planning and zoning commissions of the affected municipalities. Other projects may require a wholly different method of public participation. It appeared to us that the choice as to method of public participation would largely be dictated by the type of project and its location.

Finally, the choice between lease-revenue bond financing and general obligation bond financing was made because of the recognition that some essential State projects, such as roads, may require general obligation bond financing. Because State office buildings may suitably be financed through lease-revenue bonds, we believed that the general obligation debt capacity of the State should be reserved for those projects for which lease-revenue bond financing would not be suitable.

We appreciate the opportunity to provide this assistance to you and the State of Alaska. We are hopeful that our recommendations satisfy your requirements at this time, and we stand ready to answer any questions and to provide any further information that you or other members of your administration

may request.

Best regards,

Jim Lentine

SUBJECT: SB 340, SURPLUS LINES INSURANCE

WHEN COMMITTEE HEARINGS ARE SCHEDULED, PLEASE CALL. NO ZERO FISCAL IMPACT WITH SB 340. IT DOESN'T REDUCE THE BROKERS RESPONSIBILITY, JUST REMOVES THE BOND FOR PAYMENT OF CLAIMS. THIS PAYMENT IS THE INSURANCE COMPANY'S RESPONSIBILITY. THE $200,000 BOND IS STILL IN PLACE, AND THE 4 PER CENT SURPLUS LINES TAX IS STILL PAID.

Department of Commerce & Economic Development / POSITION PAPER

SB 340: "An Act changing the conditions for licensing surplus lines insurance brokers."

The department is not in favor of this legislation. This legislation removes access by insureds to the $200,000 surplus lines broker's bond. It provides that the bond will no longer be available to guarantee return premiums or payment of proper losses. It would respond only to guarantee taxes and fines payable to the State.

The surplus lines broker is the licensee who can place insurance business in markets that are not subject to regulation under Alaska insurance law, the nonadmitted market. This broker is the "expert" upon whom insureds rely for the placement of their insurance with reliable, solvent and secure insurance companies. If the broker fails in this responsibility, the insured has only the broker's bond for his protection. The current bond was adopted in 1984 to provide some public protection for business placed in the nonadmitted market. Prior to that time there was no public protection, and there were instances where such was needed, particularly with aviation and marine coverages.

This legislation does not suggest an alternative form of protection for the public and would leave the court as the only remedy open to an aggrieved insured. The legislation in which the bond was adopted also included provisions that would allow the brokers to establish a degree of self-regulation as a further protection for the public. To date there has been no effort in that direction. We believe that removal of this protection is not acceptable to the public. Accordingly, we oppose the bill.

CC. Sen. Zharoff

February 12, 1986

Senator John Binkley
Alaska State Legislature
Pouch V (MS3100)
Juneau, Alaska 99811

FEB 1 8 1986

Dear John:

I would like your assistance on Senate Bill 354, "An Act relating to reinstatement of certain nonprofit historical aircraft corporations to corporate status; and providing for an effective date", I would like you to vote no on this bill.

As you know I have been in the aviation business for the past 10 years. I have always been interested in aviation history and have tried to work with all of the museums.

But the above bill deals strictly with a corporation, (Alaskan Historical Aircraft Society), that has been operating illegally for the past 5 years. The State of Alaska dissolved it for not filing there annual reports for 1979. But they have continued to act as a nonprofit museum to the general public. They have sought moneys and donations claiming to be a museum; received aircraft for the museum to have and preserve, but have turned around and sold them to people in California; are now trying to buy a 1930 vintage aircraft for $150,000. while the owners only paid $30,000. for the aircraft. The Internal Revenue Service is looking into the Society because of various complaints they have received about donations and tax write offs.

John, I hope you will help me by voting no on this bill and letting others know why. I can't believe that the legislature would introduce a bill defending such illegal actions.

Thank you for your time.

Sincerely,

Richard Odgers

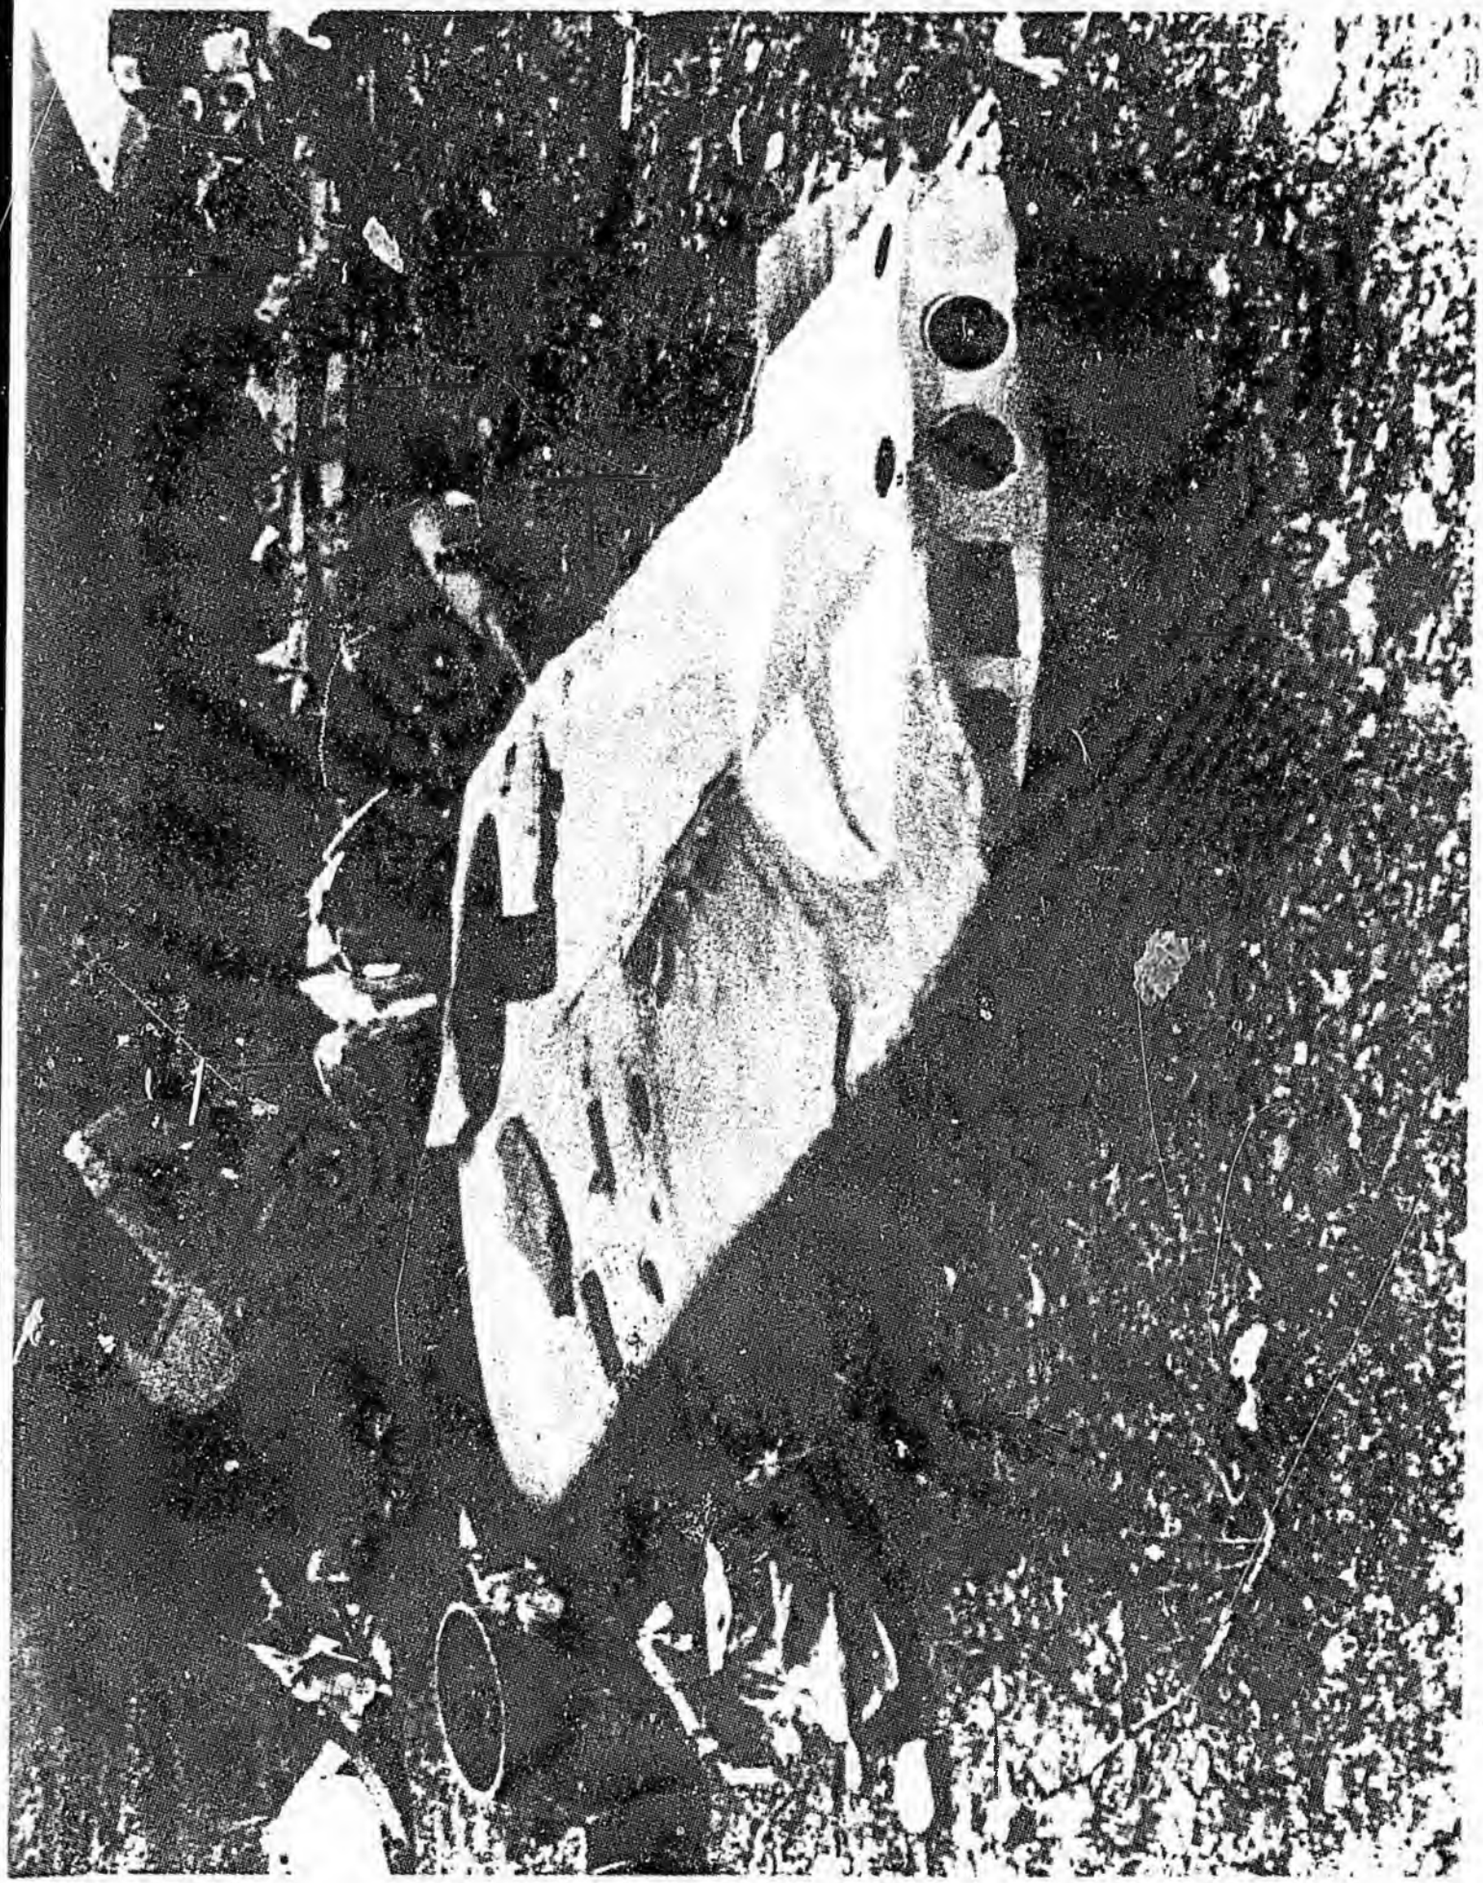
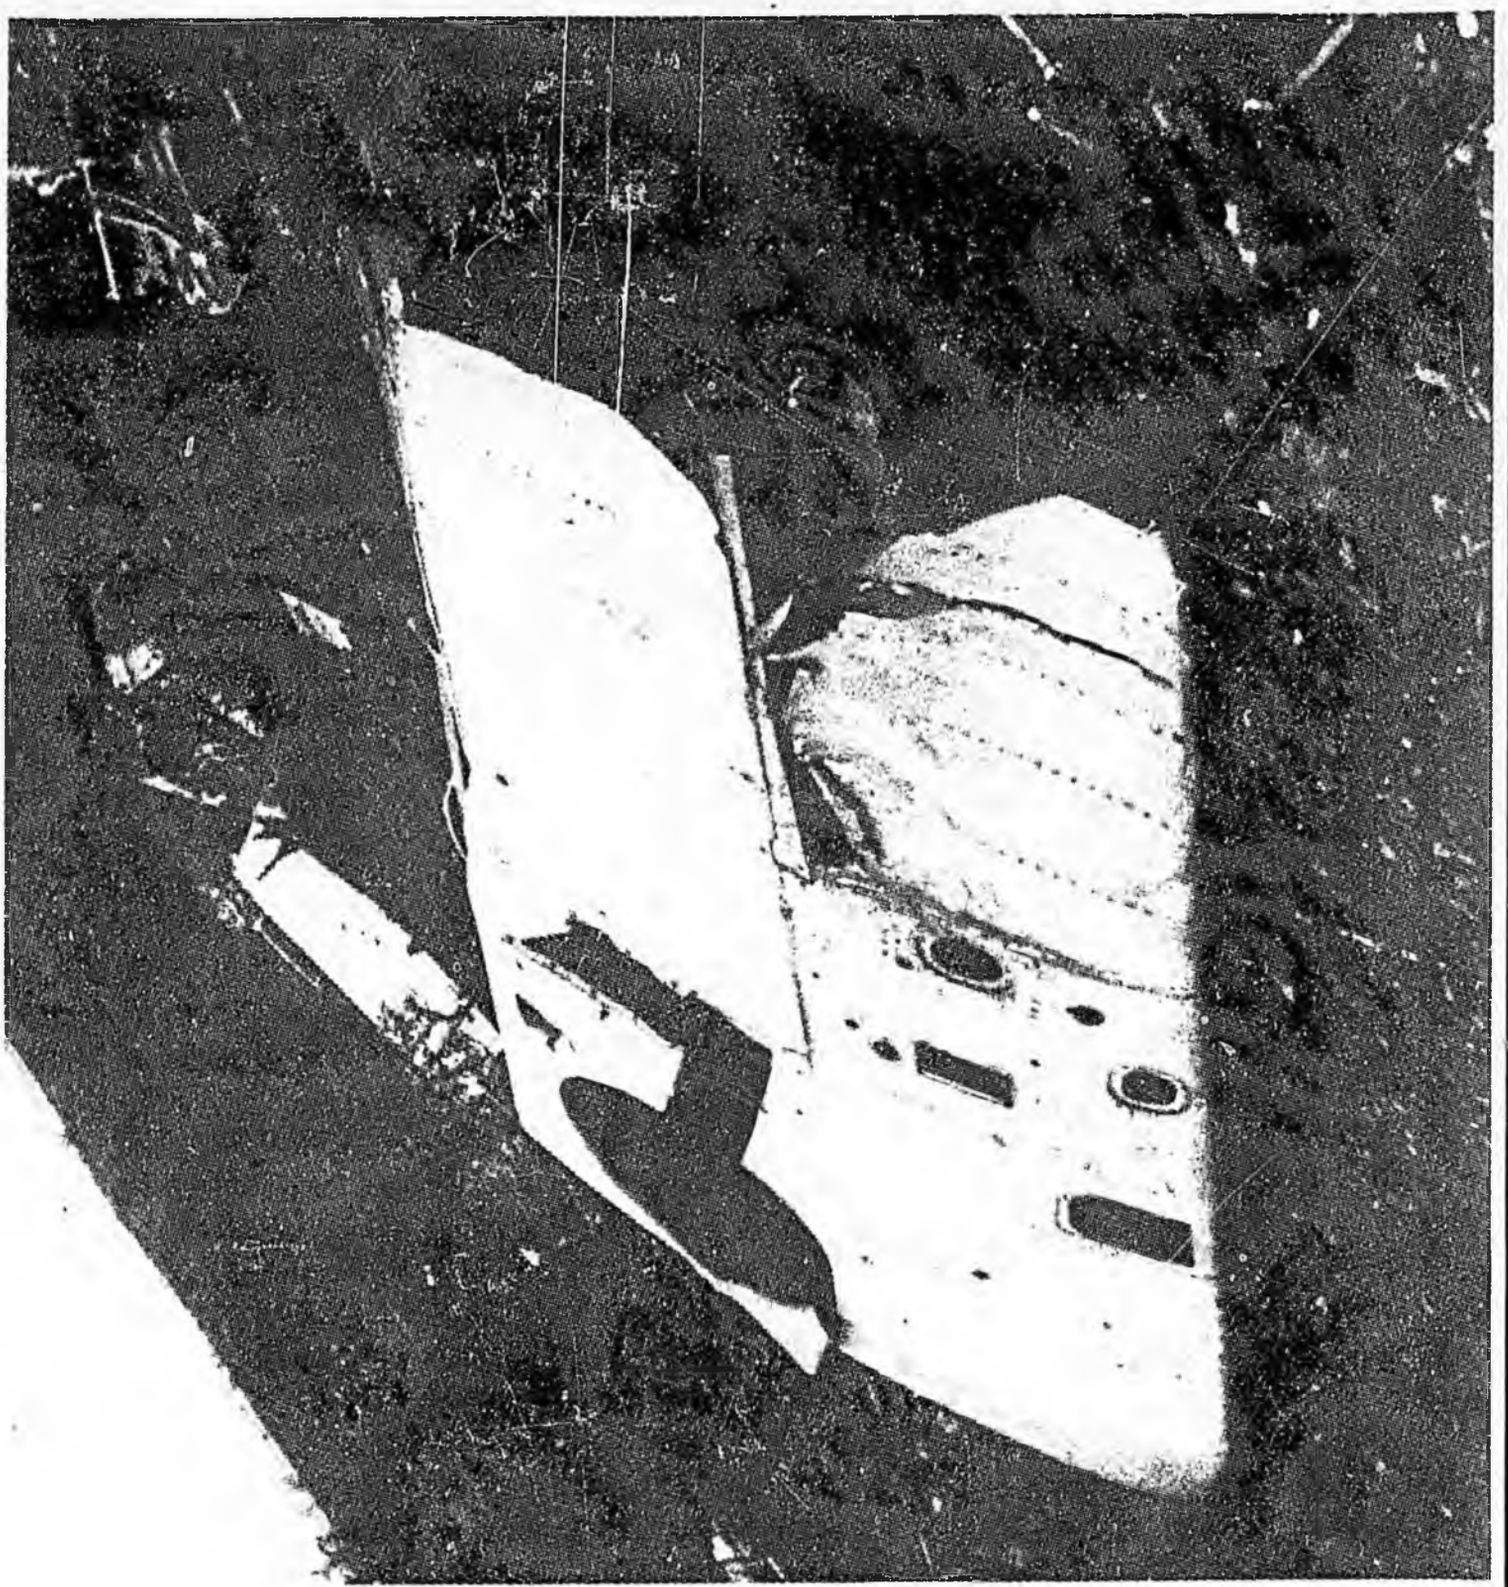
Dear Mr. Fox:

This is in response to your letter dated July 18, 1985 concerning the tax exempt status of the Alaskan Historical Aircraft Society.



After extensive search efforts it has been determined that we have no record that the organization is a tax exempt organization under 501(a) of the Internal Revenue Code by virtue of an approved application; therefore we no documents responsive to your request.

Sincerely,



Olga A Rhodes

AC Form 8050-1 (3/79) OBSOLETE

cc: Sen. Zharoff

February 12, 1986

Senator Jan Faiks
Alaska State Legislature
Pouch V(MS3100)
Juneau, Alaska 99811

FEB 18 1986

Dear Senator Faiks:

I am writing to you in regards to Senate Bill 354. I understand this bill is to reinstated Ted Spencers Alaskan Historical Aircraft Society. I am asking you to vote "no".

As a small business person I have certain responsibilities to my clients and the general public. I am governed by many different agencies, federal, state and city. All of them require me to file annual reports and paperwork, and I know as a business I must file these to operate legally.

The Alaskan Historical Aircraft Society was dissolved by the State of Alaska in 1981 because they did not file there annual reports in 1979. The State waited 2 years before dissolving them. It now has been 6 years since those reports were to have been filed. I don't believe this cann be called an oversight on the part of the Alaskan Historical Aircraft Society.

Throughout these last 5 years they have been claiming to be a nonprofit museum, accepting and soliciting donations of money, aircraft and memorabilia, deceiving the public.

Two of these aircraft donated by Cal C. Aviation Inc. of Fairbanks (under the assumption the aircraft would be preserved as part of our heritage) have been sold to private individuals, one went to California and one to one of the Board of Directors.

IRS is presently investigating Ted Spencer and the Alaskan Historical Aircraft Society, because of the many complaints they have received from those who have donated to them and have found out they could not use there tax write offs they received from the Alaskan Historical Aircraft Society.

With this bill and especially lines 25 through 28 you would reinstate and grant a pardon for there fraudulent behavior. I hope you will receonsider and vote no on this bill, as I can not understand how the legislature could approve.

Sincerely,

Janie Munson

Dear Mr. Fox:

This is in response to your letter dated July 18, 1985 concerning the tax exempt status of the Alaskan Historical Aircraft Society.

After extensive search efforts it has been determined that we have no record that the organization is a tax exempt organization under 501(a) of the Internal Revenue Code by virtue of an approved application; therefore we no documents responsive to your request.

Sincerely,

Olga A Rhodes

CATCH LINE
LEGISLATIVE FINDINGS.
TEXT (a) The legislature finds that

(1) because of its unique climate and its distance from the contiguous states, the state has historically suffered from unique social, seasonal, geographic, and economic conditions that result in an unstable economy;

(2) the unstable economy is a hardship on the residents of the state and is aggravated by the large numbers of seasonal and transient nonresident workers;

(3) the rate of unemployment among residents of the state is one of the highest in the nation;

(4) the state has one of the highest ratios of nonresident to resident workers in the nation;

(5) the state has a compelling interest in reducing the level of unemployment among its residents;

(6) the construction industry in the state accounts for a substantial percentage of the available employment;

(7) construction workers receive a greater percentage of all unemployment benefits paid by the state than is typical of other states;

(8) historically, the rate of unemployment in the construction industry in the state is higher than the rate of unemployment in other industries in the state;

(9) it is appropriate for the state to consider the welfare of its residents when it funds construction activity;

(10) it is in the public interest for the state to allocate public funds for capital projects in order to reduce unemployment among its resident construction workers;

(11) the influx of nonresident construction workers contributes to or causes the high unemployment rate among resident construction workers because nonresident workers compete with residents for the limited number of available construction jobs;

(12) nonresident workers displace a substantial number

of qualified, available, and unemployed Alaska workers on jobs on state funded public works projects;

(13) the state has a special interest in seeing that the benefits of state construction spending accrue to its residents;

(14) the natural resources of land owned by the state belong to the citizens of the state;

(15) Alaskans have chosen to use the majority of the royalties derived from the state's natural resources to fund state government;

(16) the vast majority of the state's revenue is derived from natural resource income rather than from other forms of taxation;

(17) because the state has no personal income tax or sales tax, nonresident workers use services provided by the state but do not contribute fairly to the costs of those services; and

(18) Alaskans, more than the residents of other states, suffer economically when nonresidents displace qualified residents since resident workers contribute local taxes as well as their share of the royalties from natural resources.

(b) The legislature further finds that

(1) the state and its political subdivisions, when acting as a market participant in funding public works projects, should give Alaska residents an employment preference to promote a more stable economy;

(2) the state and its political subdivisions have a duty of loyalty to their citizens and should fulfill this duty by giving residents preference for employment on public works projects they fund;

(3) there is a legitimate and compelling governmental interest and that the public health and welfare will suffer if state residents are not afforded employment preference in state-funded construction-related work.

It is assumed that conditions are such that the bill will have its intended effect on employers. Specifically this implies the following assumptions. (1) Corporations that hire non-residents have enough tax liability to take advantage of at least some of the available credit. (2) Every employer takes full advantage of the available tax credit when making hiring decisions. (3) Projected non-petroleum corporate income taxes increase at the rate of inflation (i.e. constant real non-petroleum corporate income tax). (4) The distribution of projected corporate income taxes among industries remains constant. (5) The distribution of jobs between residents and non-residents for calendar year 1986 is the same as that shown for 1984 in the Department of Labor study of January 17, 1986[1] (6) Non-resident wages have grown at a rate equal to the inflation rate since 1984. (7) That the historic relationship between the unemployment rate in Alaska and the national unemployment rate continues.[2] It is also assumed that sufficient data is obtainable to establish causality between unemployment and significant social ills and between non-resident employment and resident unemployment.

The Department of Labor study shows a state-wide total of 63,280 jobs held by non-residents. Using the assumptions above to project taxes and non-resident wages by industry shows that if 14% of the positions held by non-residents are filled by State residents the non-petroleum corporate income tax will be reduced to zero. Additionally, if the oil and gas and mining industry fills all 3,156 of the non-resident jobs with State residents corporate petroleum income taxes will be reduced by $9.5 million. While the potential impact is to eliminate the corporate income tax the actual impact may differ depending upon: (1) how the Department of Labor determines unemployment areas, the cause of unemployment in underemployment areas and the existence of social ills in underemployment areas; (2) whether the increase in employed residents is enough to lower the unemployment rates in underemployment areas below the national average. The accompanying table shows the number and percentage of jobs now filled by non-residents that would need to be filled by residents in order to eliminate the corporate non petroleum income tax. The chart also shows the number of unemployment claims for each industry group and shows the number of those claims that come from residents if all industries employ the average percentage of non-resident workers.

---

1 Non-residents Working in Alaska, A Special Study to Measure the Economic Impact of Non-Residents on Alaska's Economy During Calendar Year 1984, Alaska Department of Labor, January 1986.

2 Since 1969 the only years that the Alaska, unemployment rate has been less than or equal to the national rate were 1975, 1976 and 1982. See Alaska's Economy Since Statehood: The ISER Map Economic Data Base, University of Alaska ISER February 1984. See also Annual Planning Information, Alaska Department of Labor, 1985.

Economic Impact

1. Increase in jobs available to Alaskans.
2. A drop in the instate unemployment rate due to drop in migration.
3. The tax credit may tend to increase job turnover as employers attempt to stay eligible for the credit.
4. Could tend to lower wages as employers require pay cuts to avoid layoffs.
5. Could provide a subsidy to union busting employers as the State picks up half of the first $6,000 in wages paid to new employees.
6. Incentives for fraudulent PFD claims may be greatly increased as employers may require proof of eligibility prior to hiring.
7. Could put pressure on the PFD program to certify eligibility more quickly and more often.

CONTINUATION of FISCAL NOTE ANALYSIS

For Bill/Resolution No. SSSB 360

This legislation requires an annual report that designates areas as underemployment areas. The determination in Sec. 43.20.041 (c) (2) that "nonresident employment is a significant contributing cause of the high resident unemployment" will require this department to collect extensive occupational information by resident status. We would need two additional staff persons, a Labor Economist II and a Statistical Clerk, to complete the required report. Costs associated with these positions are shown on the attached - Request for New Position forms. In addition to the position costs we would require $35,000 for data processing operations, $10,000 for data processing applications, and $6,050 a year for equipment lease and maintenance. $8,500 of the data processing applications expense would be a one-time item, while the rest of the costs would be ongoing. The following assumptions were made in preparing the fiscal note:

1. An annual report designating underemployment areas would be completed by January 31 each year beginning in 1987.

2. On-going collection of occupational titles would be required from employers, and extensive computer matching would be necessary to determine residency status.

3. Beginning in 1988 occupational displacement information would be highlighted requiring continuation of both the existing occupational information budget levels, and the additional information on the occupational titles.

4. The collection of occupational titles from firms will be phased in over a three year period. Industries identified as having the highest dollar payments to nonresidents in 1984 would be targeted first:

   First Year - construction, oil and gas mining, and food processing;

   Second Year - all first year industries plus business services, local government, miscellaneous services, eating and drinking places, air transportation, and state government; and

   Third Year - all industries.

5. "Economic region" will be defined as the six economic regions for which economic data is published by the Alaska Department of Labor.

6. Costs to determine that "resident unemployment has caused significant social ills" for each of the economic regions annually has not been included at this time. A thorough analysis of the available social data which can be released from other departments will require additional time. Case data would be required on all social problems in the state.

CONTINUATION of FISCAL NOTE ANALYSIS

For Bill/Resolution No. SSSB 360

The costs to accomplish this section will greatly exceed all of our other costs associated with this bill.

7. The Department of Revenue will be responsible for all enforcement actions and the collection of all wage and job training costs.

8. The list of approved training cost will be the same as that used for JTPA, and there will be coordination between employers and the Service Delivery Areas of JTPA to determine approved training programs.

9. Work would begin on the report on July 1, 1986.

10. Annual inflation of 4% on non-personal services items.

For B&M Use Only
Key Number __ __ - __ __ - __ __ - __ __ - __ __

Justification

This position will have primary responsibility for the analysis of data and preparation of the annual resident hire report. Specifically the duties would include:

1. Coordinate the collection and monitor the validity of relevant resident hire related statistics from other agencies including the Department of Revenue and the Division of Labor Standards and Safety.
2. Coordinate the updating and crossmatching of resident hire related data files on the mainframe computer with the analyst programmer.
3. Analyze microcomputer resident hire data bases to generate resident hire related tables and reports. The reports will include data relating to occupational displacement of nonresidents by economic region and other related economic statistics associated with issue of resident hire.
4. Supervise the Statistical Clerk that will prepare the basic resident hire data tables for the report.
5. Prepare the annual resident hire report.

Contractual services costs include phone, training, printing, and other miscellaneous items. The equipment expense for a desk, chair, etc. would be a one time item.

Key Number __ __ - __ __ - __ __ - __ __ - __ __

Justification

This position will support the labor economist in preparing an annual report on the effect of nonresident employment on Alaskans. Secondarily this position would assist on the quality control of occupational titles which would be submitted by employers each quarter. Specifically the duties would be:

1. Update tables of economic information by resident status.
2. Load information into spreadsheets to show occupational displacement of residents by nonresidents.
3. Assist in the quality control of the occupational displacement of residents by nonresident workers.

The other position will work on the quality control of occupational titles which would be submitted by employers each quarter. Specifically the duties would be:

1. Review detailed edit listings.
2. Update edit data files.
3. Call employers for clarification when necessary.
4. Correct occupational titles.
5. Prepare computer summaries of results.

Contractual costs for this position includes phone, training, printing, etc. Equipment expense for desk, chair, cabinets, etc. would be a one time item.

SPONSOR SUBSTITUTE FOR SENATE BILL NO. 360

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to tax credits for employing and training residents; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. PURPOSE. The legislature recognizes that the state has a significant unemployment problem. This Act is intended to better fulfill the state's duty of loyalty to its citizens, reduce unemployment among residents of the state, remedy social harms resulting from chronic unemployment, and encourage the training of state residents so that they are better qualified to compete for job opportunities.

* Sec. 2. LEGISLATIVE FINDINGS. The legislature finds:

(1) the findings made in AS 36.10.005 continue to accurately describe the social, economic, and employment situation in the state;

(2) nonresident workers displace a substantial number of qualified, available, and unemployed residents, and the displacement is a substantial contributing cause of the high rate of unemployment among state residents;

(3) high and persistent unemployment breeds severe social problems including alcoholism and domestic violence;

(4) the findings of the Department of Labor of the State of Alaska in its report entitled "Nonresidents Working in Alaska; A Special Study to Measure the Economic Impact of Nonresidents on Alaska's Economy During Calendar Year 1984" support the need for a resident hiring preference;

(5) private sector investment in job training and vocational education programs will help qualify unemployed Alaskans for higher-skilled job opportunities.

* Sec. 3. AS 43.20.036 is amended by adding a new subsection to read:

(j) For purposes of calculating the income tax payable under this chapter, the taxpayer may apply as a credit against tax liability an Alaska hire credit under AS 43.20.041, for employment of state residents who satisfy the eligibility requirements, equal to the sum of

(1) 50 percent of the qualified first-year wages, as defined in 26 U.S.C. 51(b)(2), to a maximum credit of $3,000 for each eligible employee, paid or incurred by the employer during the taxable year;

(2) 25 percent of the qualified second-year wages, as defined in 26 U.S.C. 51(b)(3), to a maximum credit of $3,000 for each eligible employee, paid or incurred by the employer during the taxable year; and

(3) 50 percent of the verifiable job training costs, as determined by regulations adopted by the commissioner of labor, to a maximum credit of $3,000 for each eligible first-year employee, and 25 percent of the verifiable job training costs to a maximum credit of $3,000 for each eligible second year employee.

* Sec. 4. AS 43.20 is amended by adding a new section to read:

Sec. 43.20.041. ALASKA HIRE TAX CREDIT. (a) An employer is entitled to claim an Alaska hire credit under AS 43.20.036(j) if the employer hires an eligible state resident.

(b) An employee is eligible under this section if the employee satisfies the residency requirements for eligibility for a permanent fund dividend under AS 43.23.005 on the date immediately preceding the

date of hire and on that date the employee was a resident of an underemployment area and

(1) was receiving unemployment benefits under AS 23.20 or would have been eligible to receive benefits but had exhausted them;

(2) was not employed and had registered to find work with a public or private employment agency or a local hiring hall;

(3) was underemployed or marginally employed as determined under regulations adopted by the Department of Labor; or

(4) had completed a job training program approved by the Department of Labor and is either not employed or is engaged in employment that does not use the skills acquired in the job training program.

(c) The Department of Labor shall prepare an annual report that designates areas as underemployment areas. The department shall examine each economic region of the state and shall find that an area is an underemployment area if

(1) the area suffers from a resident unemployment rate that is higher than the national average;

(2) nonresident employment is a significant contributing cause of the high resident unemployment; and

(3) resident unemployment has caused significant social ills.

* Sec. 5. This Act applies to employees first hired by an employer on or after January 1, 1986.

* Sec. 6. This Act is retroactive to January 1, 1986.

* Sec. 7. This Act takes effect immediately in accordance with AS 01.-10.070(c).

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to tax credits for employing and training residents; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. PURPOSE. The legislature recognizes that the state has a significant unemployment problem. This Act is intended to better fulfill the state's duty of loyalty to its citizens, reduce unemployment among residents of the state, remedy social harms resulting from chronic unemployment, and encourage the training of state residents so that they are better qualified to compete for job opportunities. If the courts find that a portion of AS 43.20.036(j) or 43.20.041 is unconstitutional, the public interest requires that the remaining portions be implemented as fully as possible.

* Sec. 2. LEGISLATIVE FINDINGS. The legislature finds:

(1) the findings made in AS 36.10.005 continue to accurately describe the social, economic, and employment situation in the state;

(2) nonresident workers displace a substantial number of qualified, available, and unemployed residents, and the displacement is a peculiar source of the high rate of unemployment among state residents;

(3) high and persistent unemployment breeds severe social problems including alcoholism and domestic violence;

(4) the findings of the Department of Labor of the State of Alaska in its report entitled "Nonresidents Working in Alaska; A Special Study to Measure the Economic Impact of Nonresidents on Alaska's Economy

During Calendar Year 1984" support the need for a resident hiring preference;

(5) private sector investment in job training and vocational education programs will help qualify unemployed Alaskans for higher-skilled job opportunities.

* Sec. 3. AS 43.20.036 is amended by adding a new subsection to read:

(j) For purposes of calculating the income tax payable under this chapter, the taxpayer may apply as a credit against tax liability an Alaska hire credit under AS 43.20.041, for employment of state residents who satisfy the eligibility requirements, equal to the sum of

(1) 50 percent of the qualified first-year wages, as defined in 26 U.S.C. 51(b)(2), to a maximum credit of $3,000 for each eligible employee, paid or incurred by the employer during the taxable year;

(2) 25 percent of the qualified second-year wages, as defined in 26 U.S.C. 51(b)(3), to a maximum credit of $3,000 for each eligible employee, paid or incurred by the employer during the taxable year; and

(3) 50 percent of the verifiable job training costs, as determined by regulations adopted by the commissioner of labor, to a maximum credit of $3,000 for each eligible first-year employee, and 25 percent of the verifiable job training costs to a maximum credit of $3,000 for each eligible second-year employee.

* Sec. 4. AS 43.20 is amended by adding a new section to read:

Sec. 43.20.041. ALASKA HIRE TAX CREDIT. (a) An employer is entitled to claim an Alaska hire credit under AS 43.20.036(j) if the employer employs an eligible state resident for at least six consecutive months for a tax credit on first-year wages and 18 consecutive

months for a tax credit on second-year wages. The credit for first-year wages may only be claimed in the tax year in which the resident completes 12 consecutive months of employment with the employer, or in which the last day of the resident's consecutive employment with the employer occurs, whichever comes first. The credit for second-year wages may only be claimed in the tax year in which the resident completes 24 consecutive months of employment with the employer, or in which the last day of the resident's consecutive employment with the employer occurs, whichever comes first.

(b) An employee is eligible under this section if the employee satisfies the residency requirements of AS 43.23.005(a) on the date immediately preceding the date of hire and on that date the employee was a resident of an underemployment area designated under (c) of this section and

(1) was receiving unemployment benefits under AS 23.20 or would have been eligible to receive benefits but had exhausted them; or

(2) was not employed and had registered to find work with a public or private employment agency or a local hiring hall.

(c) The Department of Labor shall report annually to the legislature and the governor on the status of employment in the state, the effect of nonresident employment on the employment of residents in the state, and methods to increase resident hire. The report may designate areas as underemployment areas. A designation is valid for two years immediately following a determination by the commissioner of labor. The commissioner of labor shall determine that an economic region of the state or the state as a whole is an underemployment area if the commissioner finds that

(1) the rate of unemployment within the area is

substantially higher than the national rate of unemployment;

(2) the lack of employment opportunities in the area has contributed to serious social or economic problems in the area; and

(3) employment of workers who are not residents is a peculiar source of the unemployment of residents of the area.

(d) An employer may not claim a tax credit under this section if the employer terminated the employment of a resident in the expectation of receiving a greater tax credit under AS 43.20.036(j). If an employer terminates the employment of a resident and then hires a resident to fill the position within three months after the termination and if the employer would be entitled to a greater tax credit under AS 43.20.036(j) for the subsequent employment, there is a presumption that the employer acted in expectation of a greater tax credit. The employer may overcome the presumption by showing by clear and convincing evidence that the employer terminated the employee for cause or that the employee left the employment voluntarily.

* Sec. 5. If a provision of AS 43.20.036(j) or 43.20.041, or the application of a provision to a person or circumstance, is held invalid, the remainder and the application to other persons or circumstances is not affected by the holding. The remainder shall be enforced to the greatest extent constitutionally permissible under the constitutions of the United States and the State of Alaska.

* Sec. 6. This Act applies to employees first hired by an employer on or after January 1, 1986.

* Sec. 7. This Act is retroactive to January 1, 1986.

* Sec. 8. This Act takes effect immediately in accordance with AS 01.-10.070(c).

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to tax credits for employing and training residents; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. PURPOSE. The legislature recognizes that the state has a significant unemployment problem. This Act is intended to better fulfill the state's duty of loyalty to its citizens, reduce unemployment among residents of the state, remedy social harms resulting from chronic unemployment, and encourage the training of state residents so that they are better qualified to compete for job opportunities.

* Sec. 2. LEGISLATIVE FINDINGS. The legislature finds:

(1) the findings made in AS 36.10.005 continue to accurately describe the social, economic, and employment situation in the state;

(2) nonresident workers displace a substantial number of qualified, available, and unemployed residents, and the displacement is a peculiar source of the high rate of unemployment among state residents;

(3) high and persistent unemployment breeds severe social problems including alcoholism and domestic violence;

(4) the findings of the Department of Labor of the State of Alaska in its report entitled "Nonresidents Working in Alaska; A Special Study to Measure the Economic Impact of Nonresidents on Alaska's Economy During Calendar Year 1984" support the need for a resident hiring preference;

(5) private sector investment in job training and vocational

education programs will help qualify unemployed Alaskans for higher-skilled job opportunities.

* Sec. 3. AS 43.20.036 is amended by adding a new subsection to read:

(j) For purposes of calculating the income tax payable under this chapter, the taxpayer may apply as a credit against tax liability an Alaska hire credit under AS 43.20.041, for employment of state residents who satisfy the eligibility requirements, equal to the sum of

(1) 50 percent of the qualified first-year wages, as defined in 26 U.S.C. 51(b)(2), to a maximum credit of $3,000 for each eligible employee, paid or incurred by the employer during the taxable year;

(2) 25 percent of the qualified second-year wages, as defined in 26 U.S.C. 51(b)(3), to a maximum credit of $3,000 for each eligible employee, paid or incurred by the employer during the taxable year; and

(3) 50 percent of the verifiable job training costs, as determined by regulations adopted by the commissioner of labor, to a maximum credit of $3,000 for each eligible first-year employee, and 25 percent of the verifiable job training costs to a maximum credit of $3,000 for each eligible second-year employee.

* Sec. 4. AS 43.20 is amended by adding a new section to read:

Sec. 43.20.041. ALASKA HIRE TAX CREDIT. (a) An employer is entitled to claim an Alaska hire tax credit under AS 43.20.036(j) on first-year wages if the employer employs an eligible state resident for at least six consecutive months. An employer is entitled to claim an Alaska hire tax credit under AS 43.20.036(j) on second-year wages if the employer employs an eligible state resident for at least 18 consecutive months.

(b) The tax credit for first-year wages under (a) of this section may only be claimed in the tax year in which the resident completes 12 consecutive months of employment with the employer, or in which the last day of the resident's consecutive employment with the employer occurs, whichever comes first. The tax credit for second-year wages under (a) of this section may only be claimed in the tax year in which the resident completes 24 consecutive months of employment with the employer, or in which the last day of the resident's consecutive employment with the employer occurs, whichever comes first.

(c) An employee is eligible under this section if on the date immediately preceding the date of hire

(1) the employee satisfies the residency requirements of AS 43.23.005(a);

(2) the employee was a resident of a zone of underemployment designated under (d) of this section, the place of employment was located in that zone of underemployment, and the employee

(A) was receiving unemployment benefits under AS 23.20 or would have been eligible to receive benefits but had exhausted them; or

(B) was not employed and had registered to find work with a public or private employment agency or a local hiring hall.

(d) The Department of Labor shall report annually to the legislature and the governor on the status of employment in the state, the effect of nonresident employment on the employment of residents in the state, and methods to increase resident hire. The report may designate areas as underemployment areas. A designation is valid immediately and for the next two fiscal years following a determination by

the commissioner of labor. The commissioner of labor shall determine that a zone of underemployment exists if the commissioner finds that

(1) the rate of unemployment in the zone is substantially higher than the national rate of unemployment;

(2) a substantial number of residents in the zone have experience or training in occupations in which nonresidents are employed;

(3) the lack of employment opportunities in the zone has contributed to serious social or economic problems in the zone; and

(4) employment of workers who are not residents is a peculiar source of the unemployment of residents of the zone.

(d) An employer may not claim a tax credit under this section if the employer terminated the employment of a resident in the expectation of receiving a greater tax credit under AS 43.20.036(j). If an employer terminates the employment of a resident and then hires a resident to fill the position within three months after the termination and if the employer would be entitled to a greater tax credit under AS 43.20.036(j) for the subsequent employment, there is a presumption that the employer acted in expectation of a greater tax credit. The employer may overcome the presumption by showing by clear and convincing evidence that the employer terminated the employee for cause or that the employee left the employment voluntarily.

* Sec. 5. If a provision of AS 43.20.036(j) or 43.20.041, or the application of a provision to a person or circumstance, is held invalid, the remainder and the application to other persons or circumstances is not affected by the holding. The remainder shall be enforced to the greatest extent constitutionally permissible under the constitutions of the United States and the State of Alaska.

* Sec. 6. This Act takes effect immediately in accordance with

AS 01.10.070(c).

MEMORANDUM

TO: Senator Zharoff, Chairman
Senate Labor and Commerce Committee

FROM: Senator Jan Faiks

SUBJECT: Revised CS for Senate Bill 360, an Act relating to tax credits for employing and training residents

My staff met with Bob Landau of the Department of Labor concerning their suggestions for improving Senate Bill 360. Together, they agreed on the following changes to the 4-14-86 committee substitute.

I would appreciate your having these drafted into a new committee substitute and scheduling the bill for a rehearing.

1. Wherever the words "unemployment area(s)" or "area(s)" appear, replace these with "underemployment zone(s)" or "zone(s)".

2. On page 3, line 24, after the word "two", add the word "fiscal".

3. On page 4, add the following subsection to (c): (d) a substantial number of residents in the zone have experience or training in occupations in which nonresidents are employed.

The above changes will make SB 360 uniform with other local hire bills.

4. On page 3, rewrite or place into another section the language dealing with the tax years in which the credits can be claimed. The current placement after the provision

dealing with required consecutive employment has confused readers.

5. On page 3, in subsection (b) beginning line 10, add the following additional criterion: on the date immediately preceding the date of hire the place of employment was located in the same underemployment zone as the employee's place of residence. This will prevent employers from discriminating against local unemployed residents in favor unemployed residents from other areas of the state.

6. On page 4, please delete sections 6 and 7. These sections are unnecessary because employees will not be eligible for a tax credit until after the Department of Labor designates underemployment areas. According to the Department, the earliest that a designation could be made would be January 31, 1987.

Thank you.

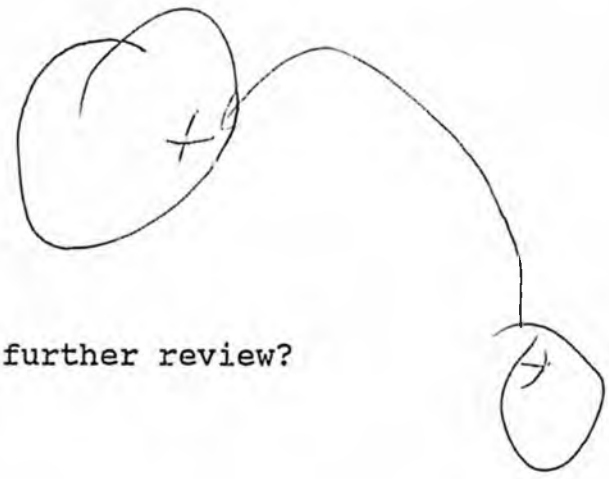
CHAIRMAN'S INFORMATION: SSSB 360

1) BILL TITLE: "An act relating to tax credits for employing and training residents; and providing for an effective date."

a) Introduced: Fiaks, Bennett, Zharoff, Devries, Rodey, and P Fischer

b) Co-sponsors:

2) INTENT: This measure creates an "Alaskan Hire Tax Credit" for an employer who hires an eligible resident. The bill enacts a series of tax credits, including a credit for training costs (maximum of $3,000), and details the eligibility criteria.



FISCAL NOTE: 2 from the Department of Revenue (- $33.2 million in revenue and $2.0 contractual) and a DOL F/N of $136.2

Re: Analysis of the Economic Effect of SB 360

Dear Senator Faiks,

In response to a request from Stephen White of your staff, I am enclosing a short analysis of the economic effect of SB 360, a bill providing tax credits for the hiring of resident Alaskans.

The basic equation for calculating the economic effect of displacing a nonresident worker, as measured by the change in income to Alaska residents, is the sum of two parts, as follows:

Change in income of Alaska residents	=	Net increase in income of newly hired Alaska resident	+	Multiplier effect of increased income spent in Alaska

The net increase in income of the newly hired Alaska resident is the salary he receives minus any public benefits foregone, typically unemployment insurance payments.

Net increase in income of newly hired Alaska resident	=	Salary at new job	-	Foregone public benefits

The multiplier effect (the increase in income of other Alaskans) is calculated using the additional income spent locally due to the displacement of the nonresident as the base to which an economic multiplier is applied.

Multiplier effect of increased income spent in Alaska	=	[multiplier]	x	[Net increase in income of newly hired Alaska resident	-	Local spending by nonresident]

For example, if we assume the following:

weekly salary of Alaskan = $557 (average weekly earnings of recipients of unemployment compensation in 1984)

public benefits foregone = $140 (average weekly unemployment compensation in 1984)

local spending of nonresident = 25% of earnings

multiplier = .5

then the impact on Alaskan resident income of displacing a nonresident for one week by one unemployed resident would be about $557--$417 going to the resident worker and $139 to Alaskans in other industries because of the multiplier effect.

$$[\$557 - \$140] + .5\,[\$557 - \$140 - \$139] =$$

$$\$417 \quad + \quad \$139 \quad \approx \quad \$557$$

In this analysis, the income of the nonresident has no value.

In applying this formula to an analysis of SB 360, the critical variable is the percentage of credits which would be used to hire unemployed residents who would not otherwise get a job. In other words, how many credits "hit the target" for which they are designed. This depends upon the ability of the Department of Labor to designate as "underemployment areas" regions which do not have significant seasonal fluctuations in employment and high job turnover rates from other causes.

Absent such sharp designations, it seems likely on the basis of limited evidence that a large portion of the credits would be used to hire unemployed Alaskans who would have found jobs in the absence of the credits.

Alaska Department of Labor data show that in 1984, 45,453 persons submitted initial unemployment compensation claims and only 45.6 percent of these people exhausted their benefits. The remaining 24,749 either found employment prior to exhausting their benefits or dropped out of the labor market (79 percent [36,063] of these claims were from within the state, but the percentage of these claimants exhausting their benefits is not reported [ADOL, Unemployment Insurance Actuarial Study and Financial Handbook, December 1985]).

ALASKA LEGISLATURE COMMITTEE FILES 1985-1986 8072

4190 SLAB SB 360 - SB 367

1070

Because of the seasonal nature of a number of Alaska industries, it is not surprising that a large portion of people filing for unemployment would find new jobs before their benefits were exhausted. These hirings would in general be eligible for the credit. In addition, there is a normal turnover of people in any industry as employers and employees continually strive to improve their circumstances. This phenomenon also accounts for some of the unemployment and hiring of individuals who have not exhausted benefits.

An estimate (very rough) of the potential for the credits to be used up by this rehiring process, in the absence of targeting, is provided by comparing first payments of unemployment compensation by industry in 1984 (p. 46 of the ADOL, Unemployment Insurance Actuarial Study and Financial Handbook) with the Department of Revenue (DOR) "fiscal note," attached to SB 360, an analysis of the number of resident hirings by industry necessary to eliminate the tax. With a few notable exceptions, the number of credits necessary to reduce the tax liability to zero is small compared to either the number of individuals receiving unemployment compensation or the apparent number rehired before exhaustion of benefits. For example, 11,376 people who said their occupation was construction received unemployment compensation, and apparently about half were rehired before their payments expired. In contrast, DOR estimated that only 1,232 job credits would be necessary to eliminate all tax liability for that industry. The major exceptions to this imbalance are the oil and gas, trade, and finance industries, where the number of claimants is commensurate with the DOR estimates. For example, there were only 1,170 first-time unemployment compensation payments to Alaskans in mining (primarily oil and gas) while DOR estimated 3,156 nonresident jobs displaced would not be enough to eliminate the tax liability in that industry.

Thus, the potential range of impact is great and largely dependent upon targeting. With "perfect targeting," complete use of the credits, and nonresident displacement consistent with the DOR job mix, the direct income displaced from nonresidents to residents would be $171.1 million ($86.3 in oil and gas, $22.2 in construction, and the remainder in other industries). This is the result of hiring 3,156 Alaskans in oil and gas and 8,559 Alaskans in other industries at the same wage as the displaced nonresidents. Assuming a multiplier of .5 and a 25 percent local spending factor for nonresidents, the total impact on Alaska income would be equal to $171 million, or about $5 for each $1 of state tax income foregone.

A more likely result is that "targeting" would be difficult to achieve. Many of those hired to receive a tax credit would be unemployed Alaskans who would have been hired eventually anyway. If one-fourth of the credits are "on target" for oil and gas and

one-fifth for other industries (a rough judgment based solely on a comparison of the DOR analysis of the number of jobs needed to eliminate the tax and the Department of Labor figures for the unemployed by industry) and if the credits were fully utilized, the impact on resident income would be $39 million, about $1.22 of income for each public dollar lost.

I am not in a position to offer any comments on the reduction in public expenditures which would result from the passage of SB 360. Since the unemployment insurance program is not funded out of the state general fund, a reduction in unemployment benefits paid would not directly impact the state treasury. The question of reduced payments for the treatment of social ills arising from unemployment is best addressed by an expert in the field.

I hope this information is useful to you as you consider this and other legislation relating to the issue of local hire.

Sincerely,

Scott Goldsmith

Faiks seeks local hire tax break

by Bruce Scandling
Associated Press

JUNEAU — Employers would get a tax break for hiring state residents, according to a new proposal introduced less than a week after the Alaska Supreme Court tossed out the state's local hire law.

Companies could deduct up to $6,000 a year from their tax bills for each newly hired Alaskan, under a plan drafted by Sen. Jan Faiks, an Anchorage Republican who co-chairs the Senate Finance Committee.

The deduction would apply only to workers hired after the law was enacted. The tax break would be good for the first two years a worker was on the job.

"I couldn't think of a better way to encourage employers to hire Alaskans," said Faiks, who modeled the law after a federal tax code providing incentives for the hire of minority and disadvantaged workers.

Although the financial ramifications of the bill have not been calculated, the proposal would likely cost the state millions of dollars in lost tax revenue.

According to the state Department of Revenue, 3,000 corporations in Alaska reported taxable income in 1982, the last year for which complete records are available.

"Presumably, there will be some fiscal impact," said Bruce Botelho, deputy commissioner in the Revenue Department. "I'm sure we're going to be asked for the impact on that."

Faiks said employers would determine the residency of workers according to their eligibility for an Alaska Permanent Fund dividend. A person who has lived

See Proposal, page A-8

Proposal

Continued from page A-1

in Alaska for six months and plans to stay is eligible for the dividend.

The new proposal comes less than a week after the Alaska Supreme Court struck down the state's local hire law. In a unanimous opinion, the court said attempts to give Alaskans priority for jobs on state-funded projects is discriminatory, and a violation of the U.S. Constitution.

Ron Zobel, the Anchorage attorney who successfully argued against the local hire law, said Thursday he has questions about tax incentives which would work against non-residents.

"I would not be willing to say that a court would uphold such a scheme, although in this instance the law is a little more complicated," Zobel said.

He said the state supreme court and other courts have continually ruled that efforts to keep jobs away from non-residents are against the law.

"That very purpose of preventing the disposition of jobs (to non-residents) is constitutionally unenforceable," Zobel said.

Faiks said she still supports current attempts in the legislature to rewrite the local hire law with new figures showing the drastic economic impact of non-resident hire in Alaska. But the tax-incentive proposal could be a more well-received approach, she said.

"I think the courts have said that you can't just force people to hire Alaskans," said Faiks.

The measure would also provide incentives for companies to train Alaska workers, she said.

IN THE SENATE

BY THE LABOR AND COMMERCE COMMITTEE

CS FOR SPONSOR SUBSTITUTE FOR SENATE BILL NO. 360 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to tax credits for employing and training residents; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. PURPOSE. The legislature recognizes that the state has a significant unemployment problem. This Act is intended to better fulfill the state's duty of loyalty to its citizens, reduce unemployment among residents of the state, remedy social harms resulting from chronic unemployment, and encourage the training of state residents so that they are better qualified to compete for job opportunities. If the courts find that a portion of AS 43.20.036(j) or 43.20.041 is unconstitutional, the public interest requires that the remaining portions be implemented as fully as possible.

* Sec. 2. LEGISLATIVE FINDINGS. The legislature finds:

(1) the findings made in AS 36.10.005 continue to accurately describe the social, economic, and employment situation in the state;

(2) nonresident workers displace a substantial number of qualified, available, and unemployed residents, and the displacement is a peculiar source of the high rate of unemployment among state residents;

(3) high and persistent unemployment breeds severe social problems including alcoholism and domestic violence;

(4) the findings of the Department of Labor of the State of Alaska in its report entitled "Nonresidents Working in Alaska; A Special Study to Measure the Economic Impact of Nonresidents on Alaska's Economy

During Calendar Year 1984" support the need for a resident hiring preference;

(5) private sector investment in job training and vocational education programs will help qualify unemployed Alaskans for higher-skilled job opportunities.

* Sec. 3. AS 43.20.036 is amended by adding a new subsection to read:

(j) For purposes of calculating the income tax payable under this chapter, the taxpayer may apply as a credit against tax liability an Alaska hire credit under AS 43.20.041, for employment of state residents who satisfy the eligibility requirements, equal to the sum of

(1) 50 percent of the qualified first-year wages, as defined in 26 U.S.C. 51(b)(2), to a maximum credit of $3,000 for each eligible employee, paid or incurred by the employer during the taxable year;

(2) 25 percent of the qualified second-year wages, as defined in 26 U.S.C. 51(b)(3), to a maximum credit of $3,000 for each eligible employee, paid or incurred by the employer during the taxable year; and

(3) 50 percent of the verifiable job training costs, as determined by regulations adopted by the commissioner of labor, to a maximum credit of $3,000 for each eligible first-year employee, and 25 percent of the verifiable job training costs to a maximum credit of $3,000 for each eligible second-year employee.

* Sec. 4. AS 43.20 is amended by adding a new section to read:

Sec. 43.20.041. ALASKA HIRE TAX CREDIT. (a) An employer is entitled to claim an Alaska hire credit under AS 43.20.036(j) if the employer employs an eligible state resident for at least six consecutive months for a tax credit on first-year wages and 18 consecutive

months for a tax credit on second-year wages. The credit for first-year wages may only be claimed in the tax year in which the resident completes 12 consecutive months of employment with the employer, or in which the last day of the resident's consecutive employment with the employer occurs, whichever comes first. The credit for second-year wages may only be claimed in the tax year in which the resident completes 24 consecutive months of employment with the employer, or in which the last day of the resident's consecutive employment with the employer occurs, whichever comes first.

(b) An employee is eligible under this section if the employee satisfies the residency requirements of AS 43.23.005(a) on the date immediately preceding the date of hire and on that date the employee was a resident of an underemployment area designated under (c) of this section and

(1) was receiving unemployment benefits under AS 23.20 or would have been eligible to receive benefits but had exhausted them; or

(2) was not employed and had registered to find work with a public or private employment agency or a local hiring hall. [;]

[(3)] [(4)]

(c) The Department of Labor shall report annually to the legislature and the governor on the status of employment in the state, the effect of nonresident employment on the employment of residents in the state, and methods to increase resident hire. The report may designate areas as underemployment areas. A designation is valid for two years immediately following a determination by the commissioner of labor. The commissioner of labor shall determine that an economic region of the state or the state as a whole is an underemployment area if the commissioner finds that

(1) the rate of unemployment within the area is

substantially higher than the national rate of unemployment;

(2) the lack of employment opportunities in the area has contributed to serious social or economic problems in the area; and

(3) employment of workers who are not residents is a peculiar source of the unemployment of residents of the area.

(d) An employer may not claim a tax credit under this section if the employer terminated the employment of a resident in the expectation of receiving a greater tax credit under AS 43.20.036(j). If an employer terminates the employment of a resident and then hires a resident to fill the position within three months after the termination and if the employer would be entitled to a greater tax credit under AS 43.20.036(j) for the subsequent employment, there is a presumption that the employer acted in expectation of a greater tax credit. The employer may overcome the presumption by showing by clear and convincing evidence that the employer terminated the employee for cause or that the employee left the employment voluntarily.

* Sec. 5. If a provision of AS 43.20.036(j) or 43.20.041, or the application of a provision to a person or circumstance, is held invalid, the remainder and the application to other persons or circumstances is not affected by the holding. The remainder shall be enforced to the greatest extent constitutionally permissible under the constitutions of the United States and the State of Alaska.

* Sec. 6. This Act applies to employees first hired by an employer on or after January 1, 1986.

* Sec. 7. This Act is retroactive to January 1, 1986.

* Sec. 8. This Act takes effect immediately in accordance with AS 01.-10.070(c).

Alaska State Legislature

CS SSSB 360(L&C): Sectional Analysis

Section 1) Purpose Section

Section 2) Legislative Findings relating to unemployment among state residents, social "costs" associated with unemployment, and the need for private sector investment in job training and voc ed programs to help qualify unemployed Alaskans for higher skilled job opportunities.

Section 3) Adds a new section which provides for an Alaskan hire tax credit for employers who satisfy specific requirements.

Tax credit to be computed as follows:

Tax credit equal to the sum of:

50% of the first year wages, or a maximum of $3,000 for each eligible employee;

25% of second year wages, up to $3,000 for each eligible employee;

50% of the verifiable job training costs, as determined by DOL regs, up to a max of $3,000 for first year employees; 25% of the job training costs for a maximum of $3,000 for each eligible second year employee.

Section 4) Entitlement for the Alaska Hire Tax Credit. An employer is entitled to a "first year" tax credit if he hires an eligible state resident for at least 6 consecutive months, and a "second year" tax credit, on second year wages, after 18 consecutive months of employment.

First year wage credits may only be claimed in the tax year in which the employee completes 12 months of consecutive employment or is terminated, whichever comes first.

Tax credit for second year wages may only be claimed in the tax year in which the employee completes 24 consecutive months of employment with the employer, or the resident employee is terminated, whichever comes first.

An employee is eligible under this section who satisfies the PFD residency requirements, (on the date immediately preceding the date of hire) and is a resident of an area which is defined as "underemployed". Employee must also meet the following additional requirements:

1) is either receiving UI benefits or would be recieving them if the resident had not exhausted them;

2) not employed but has registered for work;

DOL shall make an annual report designating underemployment areas

DOL to examine each economic region of the state to determine if an area is an "underemployment" area. The criteria for underemployment area is as follows:

1) resident unemployment is substantially higher than the national average;

2) lack of employment opportunities in the area has contributed to serious social and economic problems in the area.

3) nonresident hire is a peculiar source of high resident unemployment.

Employer may not claim a tax credit if the employer terminated an employee in expectation of getting a larger tax credit. Defines situations in which it can be "presumed" that the employer terminated an employee in hopes of getting a greater tax credit. Also provides a method of overturning such a "presumption", based on clear and convincing evidence.

Section 5) If a provision of this act is held invalid, the remainder shall be enforced to the greatest extent permissable under the US and Alaskan Constitutions.

Section 6) Application: Applies to employees first hired by an employer on or after January 1, 1986.

Section 7) Retroactive to January 1, 1986

Section 8) Immediate effective date.

BILL SHEFFIELD
GOVERNOR

SB 365

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

January 27, 1986

The Honorable Don Bennett
President of the Senate
Alaska State Legislature
P. O. Box V
Juneau, AK 99811

Dear Senator Bennett:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill relating to the authority of insurance brokers.

This bill will add a new AS 21.27.200(c), to provide that, for purposes of receiving payment of an insurance premium, a broker is legally considered an agent of the insurance company. Upon payment, the person who made the payment to the broker is immediately covered by the policy. This will be true even if the broker fails to forward the premium to the insurance company.

This bill will offer insureds greater protection against disreputable brokers who collect premiums and then fail to place the actual insurance coverage.

Sincerely,

Bill Sheffield

Bill Sheffield
Governor

TRANSMITTAL LETTER

Department of Commerce & Economic Development / POSITION PAPER

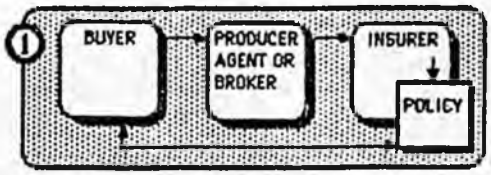
SB 365: "An Act providing that a broker is the agent of an insurer for payment of premium; and providing for an effective date."

This is a Governor's bill and the department supports the bill. It would provide that, for purposes of receiving payment of an insurance premium, a broker is legally considered an agent of the insurance company. This legislation does not give the broker the ability to bind coverage with an insurance company that has not given him that authority.

Alaska insurance law currently recognizes and licenses several types of insurance producer. These are agent, broker, solicitor, general agent, and surplus lines broker. Three of these, the agent, the solicitor of an agent, and the general agent, have a direct contractual relationship with the insurance company in which it places business. The effect of this is that when an agent, solicitor under an agent, or general agent receives premium from an insured, it is the same as though the insurance company had received the funds, even if the insurance company never receives the money.

The situation with a broker is not as clear. The broker by definition represents the insured, not the insurance company. It is possible that a legal argument could be made to attempt to treat the broker as an agent of the insurer, but it would not be a strong argument and not uniformly applicable. This was recognized when the surplus lines model law was drafted by the National Association of Insurance Commissioners in 1983 and adopted in Alaska law in 1984. Alaska Statute 21.34.130 provides that collection of premium by a surplus lines broker is considered collection by the insurance company writing the coverage.

During the past two years, it has become clear that a similar law is needed for brokers. Two large broker insolvencies have occurred where insureds have paid the broker who in turn has failed to remit those funds to the insurer resulting in cancellation of coverage for nonpayment of premium. The insured then suffers a loss of coverage and monies. In most cases, the insured person did not know in which capacity the producer was acting, let alone understand and appreciate the distinction.



Loren H. Lounsbury, Commissioner
Department of Commerce & Economic Development

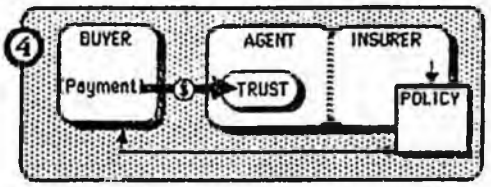
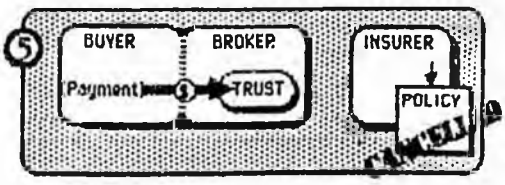
INSURANCE PURCHASE TRANSACTIONS COMMENTS FOR SB 365

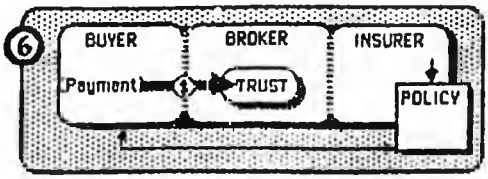
In the typical insurance purchase transaction, the buyer (insured) places an order with a producer (agent or broker), who in turn places the order with an insurance company who issues the policy. See Figure 1.



As part of the transaction, the prospective insured and the producer arrive at an agreement concerning the terms of payment for the insurance policy, usually paying in full within 30 days of effecting coverage. These funds, when paid to the producer, are received in a trust account, accounted for and paid to the appropriate party when due. This requirement is found in AS 21.27.360. The producer is responsible for payment of those monies to the insurer by 30 to 45 days following the end of the month in which the transaction was effective. That means that the money is not due to the insurance company from the producer until 31 to 75 days after the effective date of coverage and sometimes more. See Figure 2. Most transactions, except direct bill, occur in this manner.



In some cases, the producer violates the law and misappropriates the premium monies to his own use and does not forward them to the insurance company. Normally, the insurance company will send a notice of cancellation for nonpayment of premium when that occurs. See Figure 3.



The buyer of insurance will usually not know whether his insurance person has a license as an insurance agent, insurance broker, or both. The buyer will rarely know which license of a producer is being used on a particular transaction. Further, the distinction between the two is unlikely to be understood by most buyers of insurance. Yet, this distinction may be and has been a critical point when a misappropriation occurs, because the public protection is different with the two types of license.

If the buyer conducts his transaction with a producer acting under his agents license, the buyer has protection from the misappropriation of the agent. Since the insurer has appointed the producer to act as its agent, any collection of premium IS collection by the insurer. Any misappropriation by the agent of an insurer will have no impact on the insurance policy. Thus any cancellation by the insurer would be rescinded as soon as the the insured had made payment to the agent. See Figure 4.

When the buyer conducts his transaction with a producer acting under his brokers license, the buyer has no protection from the misappropriation of the broker. The broker is the representative of the buyer, not the insurer. A misappropriation by the broker results in cancellation of any coverage. See Figure 5. During the past two years, there have been several massive misappropriations resulting in loss to buyers in excess of $500,000. Currently, several more similar situations are under investigation.

SB 365 proposes to provide protection to the buyer by establishing a special relationship between the broker and the insurer. The broker would be the agent of the insurer for the purpose of the collection of premium only. When the broker collects premium from the buyer for a policy he has placed, it would be the same as though the buyer had paid the insurer directly. The logic behind this proposal, is that the insurer is in a position to control the monetary actions of the broker or certainly influence them more readily than is possible for the buyer. See Figure 6. We urge passage of this legislation.

PREPARED BY: ALASKA DIVISION OF INSURANCE
March 24, 1986

* Need to move the "2nd" L&C CS.

THIS MEASURE WILL OFFER CONSUMERS (INSUREDS) GREATER PROTECTION AGAINST BROKERS WHO COLLECT MONEY FOR PREMIUMS AND THEN FAIL TO PLACE INSURANCE COVERAGE. RECENT BROKER INSOLVENCIES HAVE RESULTED IN SITUATIONS WHERE THE INSURED HAS PAID MONEY TO THE BROKER, AND THE BROKER HAS FAILED TO PAY THE PREMIUM TO THE INSURANCE COMPANY. THIS IN TURN HAS RESULTED IN THE CANCELLATION OF POLICIES, (FOR NONPAYMENT OF PREMIUM), AND THE CONSUMER HAS LOST BOTH THE INSURANCE COVERAGE AND HIS MONEY.

IF THERE ARE TECHNICAL QUESTIONS ABOUT THE L&C CS:

THE L&C CS MADE TECHNICAL CHANGES IN SECTION 1 TO CLARIFY THE EXEMPTION WHICH OCCURS IN SECTION 2 OF THE MEASURE. SECTION 2 OF THE MEASURE HAS BEEN REPHRASED TO CLARIFY THE RELATIONSHIP BETWEEN THE BROKER AND INSURER, I.E. COMPETENT EVIDENCE OF PAYMENT FOR SPECIFIC COVERAGE FROM A SPECIFICALLY NAMED INSURER.

SB 365: Summary

This bill will offer consumers (insureds) greater protection against brokers who collect money for premiums and then fail to place insurance coverage. Recent broker insolvencies have resulted in situations where the insured has paid money to the broker, and the broker has failed to pay the premium to the insurance company. This in turn has resulted in the cancellation of policies (for nonpayment of premium) and the insured has lost both the insurance coverage and his money.

The L&C CS separated the sentences in section 1 to clarify that the exemption referenced in (c) pertains to both (1) and (2).

Section 2) of the CS was also rephrased to make clear the relationship between the broker and the insurer. i.e. competent evidence of payment for specific coverage from a specifically named insurer.

CHAIRMAN'S INFORMATION: CSSB 365 (L&C)

STATE OF ALASKA

BILL SHEFFIELD, GOVERNOR

DEPARTMENT OF LABOR

OFFICE OF THE COMMISSIONER

P.O. BOX 1149
JUNEAU, ALASKA 99802
PHONE: (907) 465-2700

March 11, 1986

Mr. Michael Thill
Labor and Commerce Committee
Alaska State Senate
Pouch V
Juneau, AK 99811

Dear Michael:

This is in response to your request for information on Senate Bill No. 367 and its companion bill, House Bill No. 466.

Senate Bill 367 would establish three new types of resident employment preferences on public construction projects to replace the current resident employment preference in AS 36.10.010 which has been found to be unconstitutional by the Alaska Supreme Court.

As the State agency charged with the administration and enforcement of resident hire preferences, the Department of Labor strongly supports the creation of these new employment preferences. The Department believes that because the new preference categories are much more narrowly focused than existing law, they stand a much better chance of being factually and legally supported in the event of a challenge. The preferences are specifically tailored to benefit only those unemployed and disadvantaged Alaskans who are most in need of employment.

Under this bill, the Department of Labor will have substantial research and enforcement responsibilities. In order to provide the necessary factual foundation to support each of the new employment preferences, the Department will have a continuing obligation to research and compile economic and statistical data on various aspects of employment and unemployment in Alaska. Because many of the criteria which would trigger application of the preferences cannot be substantiated with currently available information, the department's research staff will be required to go well beyond the bounds of its recent study on nonresidents working in Alaska.

Enclosed is a listing of the amendments which would be required to Senate Bill No. 367 to align it with the amendments that have so far been made or offered to House Bill No. 466. Of course, not all of these amendments were initiated by the Department of Labor. Nonetheless, we do support them and would recommend that they be incorporated into Senate Bill No. 367.

House Bill No. 466 is continuing to be refined so other amendments to it will no doubt follow.

Thank you for your interest.

Sincerely,

Eileen Plate
Special Assistant

CSSB 367: Sectional Analysis

Section 1) Purpose Section

Section 2) Legislative finding that the ratio of employees on a payroll who were refused or did not apply for a PFD to those who received a PFD is a reasonable indicator of the nonresidents/residents employed on a public works project.

When determining the nonresident/resident ratios on a public works project, the commsiioner may consider on site surveys, interviews, questionaires, examination of employees vehicle registrations, and payroll information.

The following are reasonable indicators of resident/nonresident ratios:

1) the ratio of applicants for UI benefits who list out of state residences/in state residences;

2) the ratio of UI covered employees who did not apply for or were denied PFD's/eligible employees for PFD's;

Further Legislative Findings:

1) the number of residents unable to find work is considerably higher than unemployment rates based on nationally accepted measures;

2) rural residents work search efforts do not meet the federal definitions of unemployment because of a continuing lack of opportunities in the rural areas of the state.

Section 3) An employer subject to the hiring requirements of this chapter may request assistance from DOL in locating qualified employees. After a request for assistance, DOL shall refer qualified applicants to the employer. Employer shall cooperate with the Department.

If DOL is unable to refer a sufficient number of qualified residents, the commissioner may approve the hiring of residents ineligible for the hiring preference and non residents to fill the work force needs.

Section 4) Commissioner of DOL shall adopt regs to encourage and require the hiring of residents to the maximum extent permitted by law.

Section 5) Adds new sections to 36.10

36.10.130: The AG and the Commissioner of DOL shall report every 2 years to the Legislature and the Governor on the status of employment in the state, the effect of nonresident employment on employment of residents, and methods to increase resident hire. Report to be submitted by Jan 31 of the first session of a legislature.

36.10.140: Eligibility for Preference:

A resident is eligible if he registers with DOL, and:

1) is receiving UI benefits or has exhausted them;

2) is not working and has registered to find work;

3) underemployed or marginally employed;

4) has completed an OJT program, approved by DOL; and is unemployed or marginally employed in relation to the skills acquired;

Requires employer, subject to this chapter, to certify with DOL that resident employees are eligible for the preference.

36.10.150: Determination of Underemployed Areas:

After the Commissioner of DOL determines that an economic region of the state, or the whole state, is an "underemployed area", for the next 2 years qualified local residents shall be granted work preference on projects within the local area.

Commissioner determines that an economic region is an underemployed area if:

1) Rate of unemployment exceeds the national rate of unemployment;

2) substantial number of residents desire work that would be done on a public works project;

3) lack of work has contributed to social and economic problems in the area;

4) employment of nonresidents results in unemployment of residents;

36.10.160: Economically Distressed Area Preference

After a determination by the Commissioner of DOL that an area is economically distressed, for the next 2 years qualified residents shall be given preference for at least 50% of work on a project which is located within the area. This preference applies to worker hours on a craft by craft basis.

Commissioner to determine economically distressed area:

1) unemployment in the area exceeds the national average by 5% points;

2) lack of employment results in social and economic problems;

3) nonresident employment results in unemployment for residents;

36.10.170 Economically Disadvantaged Minority Preference

After commissioner determines that minority residents of an economic region are economically disadvantaged, for the next 2 years they shall be given a preference for at least 25% of the work on each project within the area. Preference applies to worker hours on a craft by craft basis.

Commissioner to determine whether minority residents of an area are economically disadvantaged as follows:

1) civilian minority population of the area exceeds the average civilian minority population of the state;

2) either the % of unemployment of civilian minority residents of the area is 2 times the % of unemployment of nonminority residents, or the civilian minority population has suffered past economic discrimination;

3) economic disadvantage of minority residents has contributed to social and economic problems in the area.

4) employment of nonresidents results in the unemployment of civilian minority residents of the area;

Defines minority as a Black, Hispanic, Asian or Pacific Islander, American Indian, or Alaska Native, as those terms are defined by the EEO Commission.

36.10.180: Projects Subject to Preference

1) contracts let by a municipality

2) construction project funded wholly or partly with state money

3) public works project under a grant to a municipality;

4) public works project under a grant to a named recipient;

5) public works project under a grant to an unincorporated community;

If the Governor declares an economic disaster then the preference under that chapter supercedes the preference for contracts awarded by the state.

Commissioner shall define the boundaries of an economic region or area where the preference applies;

36.10.190: Penalties

Person who makes a false sworn statement for eligibility certification is subject to criminal prosectuion for perjury. (Class B Felony)

Person who makes an unsworn falsification is subject to perjury (Class A misdemeanor);

In addition to criminal penalties, a person who is guilty of falsifying statements of certification, whose conviction is not reversed, shall forfeit future rights for employment preference under this chapter.

36.10.900: Effect of Judicial Decisions

If a provision of this chapter is held invalid, the remainder of this chapter shall not be affected by that holding. The remainder shall be enforced to the greatest extent possible under the Alaska and US Constitutions.

36.10.990: Definition "qualified"

Section 6) Adds definitions of "craft' and "resident"

Section 7) DOL to require compliance with this chapter for a municipal grant for a public works project;

Section 8) DOL to require compliance with this chapter on grants to named recipients;

Section 9) DOL to require compliance with this chapter for public works projects funded by grants to unincorporated communities;

Section 10) Provisions of this act do not apply to a contract entered into before the effective date of this act, unless the contracts require compliance with resident hire provisions that take effect during the term of the contract.

Section 11) repealer

Section 12) repealer

Section 13) Effective date for the repealer in section 12 conditioned upon actions of the court and its consideration of appeal on the Robison vs Francis decision.

Section 14) Sections 1-11 have an immediate effective date;

CHAIRMAN'S INFORMATION: CSSB 367(L&C)

1) BILL TITLE: "An act relating to Alaskan resident employment preference; and providing for an effective date."

a) Introduced: Faiks, Josephson, Sturgulewski, and V Fischer.

b) Co-sponsors:

2) INTENT: This measure establishes a resident hire preference for public works projects and details the eligibility criteria. The CS contains extensive Purpose and Findings sections and creates a series of "preference" situations. These include:

1) Eligibility for preference

2) Determination of "Underemployed Areas".

3) "Preference for Residents of Economically Distressed Areas".

4) "Preference for Economically Disadvantaged Minorities"

The CS details what projects will be subject to preference, and what the penalties shall be for false certification. The bill requires the Department of Labor to assist employers in locating qualified resident workers, and it contains an "escape" mechanism for those employers who are unable to fill their work force needs with residents.

CS incorporates amendments proposed by the Dept of Labor to put the bill in accord with the House version;

FISCAL NOTE: 2 from the Department of Labor $331.9 + $161.3 for a total of $493.2

3) ADDITIONAL REFERRALS: Judiciary, Rules

IN THE SENATE

BY THE LABOR AND
COMMERCE COMMITTEE

CS FOR SENATE BILL NO. 367 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to Alaskan resident employment preference; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. PURPOSE. The legislature recognizes that the state has a significant unemployment problem. This Act is intended to better fulfill the state's duty of loyalty to its citizens, reduce unemployment among residents of the state, remedy social harms resulting from chronic unemployment, and assist economically and socially disadvantaged residents. If the courts find that a portion of AS 36.10 is unconstitutional, the public interest requires that the remaining portions be implemented as fully as possible.

* Sec. 2. AS 36.10.005 is amended by adding new subsections to read:

(c) The legislature further finds that the ratio of employees on a certified payroll who did not apply for or were refused a permanent fund dividend under AS 43.23 to employees who were found eligible to receive a dividend is a reasonable but not exclusive indicator of the ratio of nonresident to resident employees on a public works project.

(d) When determining the ratio of nonresident to resident employees working on a public works project, the commissioner may consider information gathered from on-site surveys of public works projects including individual interviews, questionnaires, examination of the state of registration of vehicles owned or operated by employees, and other information acquired from inspection of certified payrolls.

(e) The legislature finds that the following factors are reasonable but not exclusive indicators of the ratio of nonresident to resident employees in the state:

(1) the ratio of applicants for unemployment insurance who list out-of-state residences to applicants who list residences in the state;

(2) the ratio of employees who are subject to unemployment insurance coverage and who did not apply for or were denied a permanent fund dividend to employees who were found eligible for a dividend.

(f) The legislature finds that

(1) the number of state residents who are unable to find work is considerably higher than is reflected by unemployment rates based on nationally accepted measures;

(2) many rural state residents who wish to work do not seek employment as frequently as necessary to meet federal definitions of unemployment because of continuing lack of employment opportunities in rural areas of the state.

* Sec. 3. AS 36.10.070 is repealed and reenacted to read:

Sec. 36.10.070. UNAVAILABILITY OF PREFERRED WORKERS. (a) An employer subject to hiring requirements under this chapter may request the Department of Labor to assist in locating qualified, eligible employees. After receiving a request for assistance, the department shall refer qualified, eligible, available residents to the employer to fill the employer's hiring needs. The employer shall cooperate with the department.

(b) If the department is unable to refer a sufficient number of qualified, eligible, available residents able to perform the work, the commissioner of labor may approve the hiring of residents who are not

eligible for preference and nonresidents for the balance of the request.

* Sec. 4. AS 36.10.075 is amended by adding a new subsection to read:

(b) The commissioner of labor shall adopt regulations to encourage and require the hiring of residents to the maximum extent permitted by law.

* Sec. 5. AS 36.10 is amended by adding new sections to read:

Sec. 36.10.130. RESIDENT HIRE REPORT. The attorney general and the commissioner of labor shall report biennially to the legislature and the governor on the status of employment in the state, the effect of nonresident employment on the employment of residents in the state, and methods to increase resident hire. The report shall be submitted by January 31 of the first session of a legislature.

Sec. 36.10.140. ELIGIBILITY FOR PREFERENCE. (a) A person is eligible for an employment preference under this chapter if the person registers as required by the Department of Labor, is a resident, and

(1) is receiving unemployment benefits under AS 23.20 or would be eligible to receive benefits but has exhausted them;

(2) is not working and has registered to find work with a public or private employment agency or a local hiring hall;

(3) is underemployed or marginally employed as defined by the department; or

(4) has completed a job-training program approved by the department and is either not employed or is engaged in employment that does not use the skills acquired in the job-training program.

(b) An employer subject to a resident hiring requirement under this chapter shall certify that persons employed as residents under the preference are eligible for the preference.

Sec. 36.10.150. DETERMINATION OF UNDEREMPLOYED AREA. (a)

Immediately following a determination by the commissioner of labor that an economic region of the state is an underemployed area or that the state as a whole is an underemployed area, and for the next two years after the determination, qualified residents of the area who are eligible under AS 36.10.140 shall be given preference for work on each project under AS 36.10.180 that is wholly or partially sited within the area.

(b) The commissioner shall determine that an economic region of the state or the state as a whole is an underemployed area if the commissioner finds that

(1) the rate of unemployment within the area is substantially higher than the national rate of unemployment;

(2) a substantial number of residents in the area desire work in occupations that would be employed on a public works project;

(3) the lack of employment opportunities in the area has contributed to social or economic problems in the area; and

(4) employment of workers who are not residents is a peculiar source of the unemployment of residents of the area.

Sec. 36.10.160. PREFERENCE FOR RESIDENTS OF ECONOMICALLY DISTRESSED AREAS. (a) Immediately following a determination by the commissioner that an economic region of the state is an economically distressed area, and for the next two years after the determination, qualified residents of the area who are eligible under AS 36.10.140 shall be given preference for at least 50 percent of employment on each project under AS 36.10.180 that is wholly or partially sited within the economically distressed area. The preference applies to worker hours on a craft-by-craft basis.

(b) The commissioner shall determine that an area is an economically distressed area if the commissioner finds that

(1) the unemployment rate in the area exceeds the national rate of unemployment by at least five percentage points;

(2) the lack of employment opportunities in the area has contributed to social or economic problems in the area; and

(3) employment of workers who are not residents is a peculiar source of unemployment of residents of the area.

Sec. 36.10.170. PREFERENCE FOR ECONOMICALLY DISADVANTAGED MINORITY RESIDENTS. (a) Immediately following a determination by the commissioner that the minority residents of an economic region are economically disadvantaged, and for the next two years after the determination, qualified minority residents of the area who are eligible under AS 36.10.140 shall be given preference for at least 25 percent of employment on each project under AS 36.10.180 that is wholly or partially sited within the area. The preference applies to worker hours on a craft-by-craft basis.

(b) The commissioner shall determine that minority residents of an area are economically disadvantaged if the commissioner finds that

(1) the civilian minority population of the area exceeds the average civilian minority population for the state;

(2) either the percent of unemployment of civilian minority residents of the area is at least two times the percent of unemployment of nonminority residents of the area or the civilian minority population of the area has suffered past economic discrimination;

(3) the economic disadvantage of civilian minority residents of the area has contributed to social or economic problems in the area;

(4) employment of workers who are not residents is a peculiar source of unemployment of civilian minority residents of the area.

(c) In this section, a person is considered to be a member of a minority if the person is black but not of Hispanic origin, Hispanic, Asian or Pacific Islander, American Indian or Alaskan Native, as those terms are defined by the Equal Employment Opportunity Commission.

Sec. 36.10.180. PROJECTS SUBJECT TO PREFERENCE. (a) The preferences established in AS 36.10.150 - 36.10.170 apply to

(1) the performance of contracts let by a municipality for construction, repair, preliminary surveys, engineering studies, consulting, maintenance work, or any other retention of services necessary to complete a given project;

(2) a construction project that is partly or wholly funded by state money if the state or an agency of the state, a department, office, agency, state board, commission, regional school board with respect to an educational facility under AS 14.11.020, public corporation, or other organizational unit of or created under the executive, legislative or judicial branch of state government, including the University of Alaska and the Alaska Railroad Corporation, is a signatory to the construction contract;

(3) work performed on a public works project under a grant to a municipality under AS 37.05.315;

(4) work performed on a public works project under a grant to a named recipient under AS 37.05.316; and

(5) work performed on a public works project under a grant to an unincorporated community under AS 37.05.317.

(b) If the governor has declared an area to be an area impacted by an economic disaster under AS 44.33.285, then the preference for residents of the area established under AS 44.33.285 - 44.33.310 supercedes the preference under AS 36.10.150 and 36.10.160 for contracts awarded by the state.

(c) The commissioner shall define the boundaries of an economic region or an area within which a preference applies.

Sec. 36.10.190. PENALTIES. (a) A person who makes a false sworn statement in connection with a certification of eligibility for an employment preference under this chapter is subject to criminal prosecution for perjury as provided in AS 11.56.200.

(b) A person who makes an unsworn falsification, with the intent to mislead a public servant in the performance of a duty, in connection with a certification of eligibility for an employment preference under this chapter, is subject to criminal prosecution as provided in AS 11.56.210.

(c) In addition to criminal penalties imposed by state law, if a person is convicted of a crime in connection with a false statement made in a certification required under AS 36.10.140, and the conviction is not reversed, that person shall forfeit all future rights to eligibility for an employment preference under this chapter.

Sec. 36.10.900. EFFECT OF JUDICIAL DECISIONS. If a provision of this chapter, or the application of a provision to a person or circumstance, is held invalid, the remainder of this chapter and the application to other persons or circumstances shall not be affected by the holding. The remainder shall be enforced to the greatest extent constitutionally permissible under the constitutions of the United States and the State of Alaska.

Sec. 36.10.990. DEFINITION. In this chapter "qualified" means possesses the requisite education, training, skills, or experience to perform the work.

* Sec. 6. AS 36.95.010 is amended by adding new paragraphs to read:

(9) "craft" means a recognized construction trade;

(10) "resident" means a person who establishes residency

under AS 01.10.055.

* Sec. 7. AS 37.05.315 is amended by adding a new subsection to read:

(e) The Department of Labor shall require a municipality awarded a grant for a public works project under (a) of this section to comply with the hiring preferences under AS 36.10.150 - 36.10.170 for employment generated by the grant.

* Sec. 8. AS 37.05.316 is amended by adding a new subsection to read:

(b) The Department of Labor shall require a recipient awarded a grant for a public works project under (a) of this section to comply with the hiring preferences under AS 36.10.150 - 36.10.170 for employment generated by the grant.

* Sec. 9. AS 37.05.317 is amended by adding a new subsection to read:

(b) The Department of Labor shall require the qualified incorporated entity awarded a grant or agents or contractors with whom the Department of Community and Regional Affairs contracts under (a) of this section to comply with the requirements of AS 36.10.150 - 36.10.-170 for employment generated by the grant or contract if the grant or contract is for a public works project.

* Sec. 10. The provisions of this Act do not apply to a contract entered into before the effective date of this Act unless the contract includes a provision requiring compliance with laws regarding the hiring of Alaska residents that take effect during the term of the contract.

* Sec. 11. AS 36.95.010(4) and (5) are repealed.

* Sec. 12. AS 36.10.010 is repealed.

* Sec. 13. Section 12 of this Act takes effect April 17, 1986, or immediately, in accordance with AS 01.10.070(c), whichever is later, if the final decision of the Alaska Supreme Court in Robison v. Francis, File No. S-493, Opinion No. 3011, January 17, 1986, is not submitted for review to the United States Supreme Court. If the decision is submitted for review

but the United States Supreme Court declines to accept review, then sec. 12 of this Act takes effect on the date of the order of the United States Supreme Court declining to accept review. If the United States Supreme Court accepts review, then sec. 12 of this Act takes effect on the date of a final decision of the United States Supreme Court affirming the decision of the Alaska Supreme Court.

* Sec. 14. Sections 1 - 11 of this Act take effect immediately in accordance with AS 01.10.070(c).

CONTINUATION OF FISCAL NOTE ANALYSIS

For Bill/Resolution No. CSSB 367 (L&C)

This legislation requires a biennial report that designates eligible areas. Determination that "employment of workers who are not residents is a peculiar source of the unemployment of residents of the area" will require this department to collect extensive occupational information by resident status. Two statistical clerks and one Labor Economist II would complete the report. Request for New Position forms are attached which explain position duties and costs.

The contractual services costs are detailed as follows:

Description	FY 87	FY 88	FY 89	FY 90	FY 91
Key Entry	$ 40.0	$ 60.0	$ 62.0	$ 64.0	$ 66.0
DP operations	120.0	135.0	150.0	153.0	156.0
DP applications	30.0	4.5	4.7	4.9	5.1
Printing	4.5	2.0	4.5	2.1	5.0
Phone (Toll service)	12.0	12.5	13.0	6.0	6.2
Equipment lease	8.0	8.3	8.7	9.0	9.4
Equipment maintenance	.8	.8	.9	.9	.9
Training, shipping, & misc.	2.9	2.4	2.4	2.6	2.6
	$218.2	$225.5	$246.2	$242.5	$251.2

The following assumptions were made in preparing this fiscal note:

1. An annual report designating underemployment areas would be completed by January 31 of the first session of each legislature year beginning in 1987.

2. On-going collection of occupational titles would be required from employers, and extensive computer matching would be necessary to determine residency status.

3. Beginning in 1988, occupational displacement information would be highlighted requiring continuation of both the existing occupational information budget levels, and the additional information on occupational titles.

CONTINUATION OF FISCAL NOTE ANALYSIS

For Bill/Resolution No. CSSB 367

4. The collection of occupational titles from firms will be phased in over a three year period. Industries identified as having the highest dollar payments to nonresidents in 1984 would be targeted first:

   First Year - construction, oil and gas mining, and food processing;

   Second Year - all first year industries plus business services, local government, miscellaneous services, eating and drinking places, air transportation, and state government; and

   Third Year - all industries.

5. In addition to the occupational information, reporting of the residency status by industry and area would be necessary.

6. All minority demographic and economic information, except that required from contractors on state funded construction projects, will be derived from the decennial census. No costs are included for this in this fiscal note.

7. Work would begin on the first report July 1, 1986.

Justification

This position will have primary responsibility for the analysis of data and preparation of the annual resident hire report. Specifically the duties would include:

1. Coordinate the collection and monitor the validity of relevant resident hire related statistics from other agencies including the Department of Revenue and the Division of Labor Standards and Safety.
2. Coordinate the updating and crossmatching of resident hire related data files on the mainframe computer with the analyst programmer.
3. Analyze microcomputer resident hire data bases to generate resident hire related tables and reports. The reports will include data relating to occupational displacement of nonresidents by census area and other related economic statistics associated with issue of resident hire.
4. Supervise the Statistical Clerk that will prepare the basic resident hire data tables for the report.
5. Prepare the annual resident hire report.

Contractual services costs include phone, training, and other miscellaneous items.

Justification

One position will support a labor economist to prepare an annual report on the effect of nonresident employment on Alaskans. Secondarily this position would assist on the quality control of occupational titles which would be submitted by employers each quarter. Specifically the duties would be:

1. Update tables of economic information by resident status.
2. Load information into spreadsheets to show occupational displacement of residents by nonresidents.
3. Assist in the quality control of the occupational displacement of results by nonresident workers.

The other position will work on the quality control of occupational titles which would be submitted by employers each quarter. Specifically the duties would be:j

1. Review detailed edit listings.
2. Update edit data files.
3. Call employers for clarification when necessary.
4. Correct occupational titles.
5. Prepare computer summaries of results.

Contractual costs for these positions include phone, training, and other miscellaneous items.

CONTINUATION of FISCAL NOTE ANALYSIS

For Bill/Resolution No. CS for SB 367 (L&C)

Currently the Division of Labor Standards and Safety (LS&S) receives weekly certified payroll documents for all public construction projects as required in AS 36. Under this bill the department will use the public construction certified payroll forms as source documents to determine the legal domicile of persons employed on public construction projects. In certain cases the department will also be scrutinizing the ethnic makeup of the employees to determine the utilization of minorities.

These certified payroll documents are now collected and summarized manually by the Division of Labor Standards and Safety. This fiscal note will fund the automation of the certified payroll documents. This will allow a more timely determination of residency status of persons employed on public construction projects. This automation will also assist in providing a list of employees with incomplete or questionable data. The existing investigative staff will then resolve the questionable items through personal contact with employees and employers.

Reports will be developed for the Research and Analysis Section to allow them to do crossmatch reviews with other data sources (e.g. Permanent Fund Dividend).

Specific costs are as follows:

Contractual Services

Professional fees for data entry	80.0
DP Applications/programming development (one time only $17.0)	20.0
DP Support (misc. chargeback)	3.0
DP Telecommunications	.8
Communications (phone and postage)	5.0

LEGISLATIVE FINDINGS.
TEXT (a) The legislature finds that

(1) because of its unique climate and its distance from the contiguous states, the state has historically suffered from unique social, seasonal, geographic, and economic conditions that result in an unstable economy;

(2) the unstable economy is a hardship on the residents of the state and is aggravated by the large numbers of seasonal and transient nonresident workers;

(3) the rate of unemployment among residents of the state is one of the highest in the nation;

(4) the state has one of the highest ratios of nonresident to resident workers in the nation;

(5) the state has a compelling interest in reducing the level of unemployment among its residents;

(6) the construction industry in the state accounts for a substantial percentage of the available employment;

(7) construction workers receive a greater percentage of all unemployment benefits paid by the state than is typical of other states;

(8) historically, the rate of unemployment in the construction industry in the state is higher than the rate of unemployment in other industries in the state;

(9) it is appropriate for the state to consider the welfare of its residents when it funds construction activity;

(10) it is in the public interest for the state to allocate public funds for capital projects in order to reduce unemployment among its resident construction workers;

(11) the influx of nonresident construction workers contributes to or causes the high unemployment rate among resident construction workers because nonresident workers compete with residents for the limited number of available construction jobs;

(12) nonresident workers displace a substantial number of qualified, available, and unemployed Alaska workers on jobs on state funded public works projects;

(13) the state has a special interest in seeing that the benefits of state construction spending accrue to its residents;

(14) the natural resources of land owned by the state belong to the citizens of the state;

(15) Alaskans have chosen to use the majority of the royalties derived from the state's natural resources to fund state government;

(16) the vast majority of the state's revenue is derived from natural resource income rather than from other forms of taxation;

(17) because the state has no personal income tax or sales tax, nonresident workers use services provided by the state but do not contribute fairly to the costs of those services; and

(18) Alaskans, more than the residents of other states, suffer economically when nonresidents displace qualified residents since resident workers contribute local taxes as well as their share of the royalties from natural resources.

(b) The legislature further finds that

(1) the state and its political subdivisions, when acting as a market participant in funding public works projects, should give Alaska residents an employment preference to promote a more stable economy;

(2) the state and its political subdivisions have a duty of loyalty to their citizens and should fulfill this

duty by giving residents preference for employment on public works projects they fund;

(3) there is a legitimate and compelling governmental interest and that the public health and welfare will suffer if state residents are not afforded employment preference in state-funded construction-related work.

DEFINITIONS.
TEXT In this title unless the context requires otherwise

(1) "contractor" means the contractor including subcontractors performing work necessary to facilitate public construction;

(2) "laborer, mechanic, or field surveyor" means a person who engages in work which is basically physical or unskilled in nature; or who engages in work, requiring the

use of tools or machines, which basically consists of the shaping and working of materials into some type of structure, machine or other object; or who engages in outdoor tasks related to the operation of findings and delineating contour, dimensions, position, topography, as of any part of the earth's surface, by preparation of measured plan or description of any area or other portion of country or of road or line through any area or other portion of country;

(3) "public construction" or "public works" means the on-site field surveying, erection, rehabilitation, alteration, extension or repair, including painting or redecorating of buildings, highways or other improvements to real property under contract for the state, a political subdivision of the state, or a regional school board;

(4) "qualified" means a person who, except for apprentices, is a journeyman mechanic in that person's particular trade;

(5) "resident" means a person who maintains a domicile in the state; domicile is the true and permanent home of a person from which that person has no present intention of removing and to which that person intends to return whenever away from that home;

(6) "state or a political subdivision of the state" means any state department, state agency, state university, borough, city, village, school district or other state subdivision;

(7) "wages" includes fringe benefits;

(8) "retainage" means money withheld from a contractor until completion of a contract or satisfaction of other contingency as evidenced by approval of the applicable pay estimate.

GRANTS TO MUNICIPALITIES.
TEXT (a) When an amount is appropriated or allocated as a grant to a municipality, the Department of Administration shall promptly notify the municipality of the availability of the grant. When the Department of Administration receives an

agreement executed by the municipality which provides that the municipality (1) will spend the grant for the purposes specified in the appropriation or allocation; (2) will allow, on request, an audit by the state of the uses made of the grant; and (3) assures that, to the extent consistent with the purpose of the appropriation or allocation, the facilities and services provided with the grant will be available for the use of the general public, the Department of Administration shall pay the grant directly to the municipality. The agreement executed by a municipality under this section shall be on a form furnished by the Department of Administration and shall be executed within 60 days after the effective date of the appropriation or allocation.

(b) An appropriation or allocation for a grant to a municipality for construction of a public facility lapses if substantial, ongoing work on the project has not begun within five years after the effective date of the appropriation or allocation.

(c) In accepting a grant of money for construction of a public facility, a municipality covenants with the state that it will operate and maintain the facility for the practical life of the facility and that the municipality will not look to the state to operate or maintain the facility or pay for its operation or maintenance. This requirement does not apply to a grant of money for repair or improvement of an existing facility operated or

AS37.05.315 DOCUMENT

maintained by the state at the time the grant is accepted if the repair or improvement for which the grant is made will not substantially increase the operating or maintenance costs to the state.

(d) Not less than 20 percent of a grant shall be paid to a municipality within 10 days of the effective date of the agreement under (a) of this section. The remainder of the grant shall be paid either in monthly installments equal to the amount of grant money the municipality expended in the previous month or in a lump sum as determined by the Department of Administration.

GRANTS TO NAMED RECIPIENTS.

TEXT When an amount is appropriated or allocated to a department as a grant for a named recipient which is not a municipality, the department to which the appropriation or allocation is made shall promptly notify the named recipient of the availability of the grant and request the named recipient to submit a proposal to provide the goods or services specified in the appropriation act, or both, for which the appropriation or allocation is made. At the same time, the department may issue a request for proposals from other qualified persons to provide the same goods or services, or both, in the same area. The department shall contract with the named recipient unless the Office of the Governor, with due regard for any local expertise or experience among those making proposals, determines that an award of the contract to a different party would better serve the public interest. If the contract is awarded to another party than that named by the legislature, the basis of that action shall be stated in writing at the time the grant is issued and a copy of the written statement shall be sent to the Legislative Budget and Audit Committee. A contract shall be executed within 60 days after the effective date of the appropriation or allocation. The purchase of the goods or services, or both, shall be in accordance with AS 37.05.230(1)(B).

Committee on Labor & Commerce

Pouch V
State Capitol
Juneau, Alaska 99811

CSSB 377(L&C): Sectional Analysis

Section 1) Creates a new chapter which provides for limits on amounts and recoveries through civil action.

CAP ON NON ECONOMIC DAMAGES

09.17.010: limits non economic damages to $250,000 for each claim based on a separate incident or injury.

09.17.020: Requires that verdicts be itemized between economic and noneconomic loss. Further provides that economic losses include certain categories of compensation and that a verdict must determine compensation for existing and future losses.

STRUCTURED SETTLEMENTS/PERIODIC PAYMENTS

09.17.030 Requires that an award of future damages, <u>at the request of a judgement creditor</u>, in excess of $50,000 must be paid to the maximum extent feasible by periodic payments rather than lump sum payments. Requires the court to make specific findings regarding periodic payment, and provides the court may require the judgement debtor to post security. A judgement requiring periodic payment must specify the recipient, amount, interval between payments, and number of payments to be made. Judgement may be modified only if the creditor dies, in which case the payments go to persons the judgement creditor owed a duty of support prior to death. Allows the court to penalize a judgement debtor who fails to make required payments. Upon expiration of the obligation, any security given reverts to the judgement debtor. The judgement may be recorded but does not become a lien before payment is due.

Modification in the latest CS <u>removes</u> an interest rate provision for increasing periodic payments at an annual rate of 5% from the date that judgement is entered.

09.17.040 Establishes by statute the rule already established by case law, that contributory fault diminishes recovery, but does not bar a plaintiff from seeking compensation.

SEVERAL LIABILITY

09.17.050 Requires the jury or court to apportion damages between each party to the lawsuit, if there is more than one party to the action. Each party is assigned a percentage of fault, and damages are awarded based on the percentage. Changes the existing rule of joint and several liability to one of several liability only.

SEVERAL LIABILITY

09.17.060 Provides that if a person settles a claim, the settlement does not release anyone else unless the agreement so provides. However the sum of the total claim is reduced by the amount of the released persons share of the damages determined under 09.17.050 (several liability).

09.17.900: Definition of "fault"

MANDATORY ARBITRATION

Section 2) Requires personal injury actions seeking damages less than $100,000, exclusive of costs, interest, and attorney fees, must first be arbitrated under 09.43, before a lawsuit can be commenced.

PREJUDGEMENT INTEREST

Section 3) Provides that if a party defending against a claim makes an offer of settlement that is more favorable than the judgement finally entered, the claim shall bear no interest from the date of offer of settlement, to the date of judgement.

Section 4) MANDATORY ARBITRATION provides that an award made under arbitration may be appealed to the proper court.

60 DAY APPEAL TO THE MANDATED ARBITRATION

Section 5) Provides that an appeal of an arbitration award must be filed within 60 days of an award. Also requires a new trial of the issues, if an appeal is filed.

AMENDMENT TO CIVIL RULE 82

Section 6) Provides that attorney fees c not be awarded unless the court finds malice ad faith, or reckless disregard of the rig s of another in causing the injury. The curre.t CS also defines "reckless disregard of the rights o another".

Section 7) amendment on mandatory arbitration following from section 4)

Section 8) Repeals current 09.16, the existing chapter concerning contribution among joint torfeasors

Section 9) provides for the amendment of Civil Rule 49; requires the jury to answer special questions on the amount of damages, percentages of fault, and to itemize the verdict between economic and noneconomic damage.

Section 10) Provides for the amendment of Civil rule 52; requires court to make findings regarding amount of damages and percentage of fault to be allocated among parties.

Section 11) Provides for the amendment of Civil Rule 58; requires the court to include a specific item in its judgement.

Section 12) Provides for the amendment of Civil Rule 68; on prejudgement interest;

Section 13) Provides for the amendment of Civil Rule 82; would only allow for attorneys fees and costs in an action after findings of bad faith, malice, or reckless disregard for another in causing the injury.

Section 14) Applicability section

Section 15) Review requirements on the effect of tort reform changes. Legislature requests the Governor to direct the Division of Insurance to assess the effects of of this act on premiums being charged for liability insurance. Reports would be due on March 1st, 87, 88, and 89.

Section 16) Immediate effective date.

AMENDMENT 2

Page 2, line 23, through page 3, line 2, delete all material and insert the following:

Sec. 09.17.020. PUNITIVE DAMAGES. (a) Punitive damages may not be awarded in an action, whether in tort, contract, or otherwise, unless supported by clear and convincing evidence. Fifty percent of any punitive or exemplary damages that may be adjudged against the party defending the claim shall be awarded to the benefit of the state and when paid deposited in the general fund.

(b) The amount of punitive damages awarded to the state shall be considered a part of the amount recovered by the claiming party for purposes of calculating an award of attorney fees.

(c) Except for purposes of seeking execution on a judgment, the state may not bring or be joined in an action based on punitive damages that may be awarded under this section.

2. Punitive Damages. Throughout the debate in the legislature, the major issue surrounding punitive damages was whether to raise the level of standard of proof from a "preponderance of the evidence" to "clear and convincing evidence" and also whether those damages (since they are like fines) should go to the state or to the individual who is injured. The compromise embodied in this amendment provides that the standard of proof will be raised to "clear and convincing evidence" and that 50 percent of the damages will go to the state, thus providing public benefits while at the same time retaining an incentive for an injured party to sue for the damages.

The Senate Finance version went at the problem from a wholly different direction. It provides that the plaintiff keeps all of the punitive damages, but he can only receive them if he can prove that the conduct complained of was malicious, deliberate or constitutes a felony. This is a major change in present law.

Punitive damages under present law can be awarded when a party's conduct is in "reckless disregard" of the rights of others, in addition to acts done with malice toward another. The Senate Finance bill also requires a pre-hearing on whether punitive damages may even be claimed. This adds an unnecessary and costly step to the process.

The ultimate effect of these two changes from existing law is that no one will ever claim them, even in circumstances where the defendant's behavior is outrageous or reckless.

This amendment does not change the general circumstances under which punitive damages may be awarded but does affect who gets them.

AMENDMENT 3

Page 4, line 2 through page 5, line 7, delete all material.

3. Periodic Payments. To understand the periodic payments section of the bill, you have to understand how damages are computed in tort actions under present law. Under present law, if a 55 year old man is permanently disabled and he is making $10,000 a year, his wage loss is figured at his present salary over his remaining useful work life, i.e. $10,000 for 10 years or $100,000. No account is made under the present system of the fact that due to inflation, the injured party would probably be making $15,000 in the sixth year, $17,500 in the eighth year and more in the tenth year. In addition, no account is taken of the fact that through normal advancement in his job he would receive higher pay over time than he received when he was injured. The theory is that if you give him now all the money he would have earned over time computed on the basis of his present salary, he can invest that sum and stay even with inflation and what he might have earned through advancement.

Other states reduce the lump sum to present value since it is compensation for future losses. But other states compute future wage loss to reflect inflation and advancement. Alaska law does not permit reduction of awards for future wage loss to present value. But it also does not allow awards to reflect inflation or future advancement.

Thus, the results in Alaska are roughly equal to those in other states.

The section of the Senate Finance bill regarding periodic payments really has nothing to do with the fact that payments are spread out over time. Most large settlements today are paid periodically as a voluntary matter. What this section really does is to vastly reduce the amount injured parties receive by paying over time only a fraction of the amounts they would have received in wages if they had not been injured, even with the cost of living adjustment provided for in the bill. For example, information from the firm of Legal Ecomonic Evaluations of Palo Alto indicates that if a jury awards $500,000 to a 20 year old person with a future life expectancy of 59.5 years, the base annual periodic payment would be $8,403 ($500,000 divided by 59.5 years). Assuming 3% annual inflation, the value of the $500,000 judgment is effectively reduced under the mandatory periodic payments provisions of this bill to $129,082, the amount that needs to be invested now to produce $8,403 per year. Similarly, a $500,000 award to a 50 year old with a life expentancy of 31.07 years, would mean a base annual periodic payment of $16,092. Again assuming 3% inflation, the value of the $500,000 judgment in

that case is effectively reduced under this bill to $215,028.

This amendment eliminates the provision on periodic payments since they are already being done voluntarily and the only real reason for treating the subject in the legislation is to reduce the amount that plaintiffs would receive over time. If people are not allowed to show a jury what their future damages really would have been, it makes no sense to reduce the award for future damage to "present value." The system we have is not broken; it does not require fixing in this area.

AMENDMENT 4

Page 7, line 28, delete "several liability" and insert, "joint and several liability, except that a party who is allocated less than 50 percent of the total fault of all the parties may not be jointly liable for more than twice the percentage of fault allocated to that party."

4. Apportionment of Damages. Under present law, if three defendants are held liable for an injury to a plaintiff, they each bear full responsibility for the total amount of the damage. This is "joint and several" liability. If one of the defendants pays the full amount of the judgment he has rights under law to contribution from the other defendants. If one of those defendants has no money, the courts uniformly conclude that the problem of insolvency is one that the remaining defendants who contributed to the accident will have to bear, rather than reducing the award of an injured plaintiff who is not at fault. That is, the defendants will get less contribution from one another, but the plaintiff's award will not be reduced.

Some persons are concerned that juries are holding some defendants, like states and cities with "deep pockets," only minimally liable, but the result under joint and several liability is that they end up getting stuck for the whole judgment. Accordingly, this amendment seeks a compromise which would insure that defendants only minimally liable would not be held responsible for all the damage, while still providing a cushion for innocent parties who were seriously injured by multiple defendants, some of whom might be insolvent. The amendment continues the rule of joint and

several liability but changes it to provide that a defendant is never more responsible in damages than for twice his percentage of fault for the injury. If in fact then a defendant is only liable for five percent of an injury, he cannot be held responsible for more than ten percent of the total damages. Only if a defendant is responsible for at least 50 percent of the injury can he be held liable for the entire amount of the damages. Even then, he would still have the right to seek contribution from the other defendants who were also liable for the injury.

The proposed Senate Finance version would limit responsibility on the basis of "several" liability by saying that you are responsible in damages only for your percentage of fault as decreed by a jury. Even if the allocation of fault were an exact science, which it is not, this proposal would entirely shift the risk of insolvent defendants from the remaining defendants who are at fault to a plaintiff who is blameless and injured. The issue here is not whether a party should be responsible in damages for more than their percent of fault; the issue is when a party who is at fault has no money, who should bear the risk -- the plaintiff or other parties at fault. This amendment attempts to compromise that issue; the Senate Finance version, which to

our knowledge has been adopted no where in the U.S., does not.

AMENDMENT 7

Page 10, line 24, through page 11, line 2, delete all material and renumber remaining sections accordingly.

Page 11, line 29 through page 12, line 3, delete all material and renumber remaining sections accordingly.

7. Award of Attorney Fees - Rule 82. This amendment would delete the provision concerning the award of attorney fees, and thus leaves in place Rule 82 of the Supreme Court which permits the court to award at least a token fee to the victorious party in a lawsuit. Rule 82 is the major weapon against persons who file frivolous lawsuits. Coverage for Rule 82 - attorney fees is generally exempted in most insurance policies already so its existence or nonexistence will have no impact on insurance rates. The Senate Finance version eliminates Rule 82 for negligence and product liability actions. This means if some one sues you without cause for negligence and you win, you will not be able to receive even minimal help in paying your attorney fees. The Senate Judiciary version is clearly better.

Honorable Fred Zharoff
Alaska State Senate
Pouch V
Juneau, AK 99811

Dear Senator Zharoff:

Senate Bill 377 is before you on the Senate Floor for consideration. The Health Association of Alaska respectfully requests your favorable consideration of this legislation.

We support the Finance Committee substitute which has been reported to the floor. We request that you vote for it in its present form and vote against any amendments. It is a bill which is not everything we would like to see, but it is in a form that we believe will assist markedly in relieving the crisis in liability insurance availability while being sensitive to the rights of individuals.

We believe that the fiscal note that was prepared for the Finance Committee demonstrates the potential savings from the reforms included in SB 377. Additionally, it should be noted that in California where many of these reforms have been applied to medical cases there has been a measurable difference in both price and availability of insurance.

Thank you for your consideration in this matter.

Sincerely,

Dennis L. DeWitt
Executive Director

CS FOR SENATE BILL NO. 377 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to civil actions; amending Alaska Rules of Civil Procedure 49, 52, 58, 68, and 82; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 09 is amended by adding a new chapter to read:

CHAPTER 17. LIMITATIONS ON CIVIL LIABILITY.

Sec. 09.17.010. NONECONOMIC DAMAGES. (a) In an action to recover damages for personal injury based on negligence, damages for noneconomic losses shall be limited to compensation for pain, suffering, inconvenience, physical impairment, disfigurement, loss of enjoyment of life and other nonpecuniary damage.

(b) The amount of damages awarded by a court or jury under (a) of this section may not exceed $250,000 for each claim based on a separate incident or injury.

Sec. 09.17.020. ITEMIZED VERDICTS. In every case where damages for personal injury are awarded by the court or jury, the verdict shall be itemized between economic loss and noneconomic loss, if any, and economic loss shall be further itemized by category. Itemization of economic loss by category includes: (1) amounts intended to compensate for reasonable expenses that have been incurred, or which will be incurred, for necessary medical, surgical, x-ray, dental, or other health or rehabilitative services, drugs, and therapy; (2) amounts intended to compensate for lost wages or loss of earning capacity; and (3) all other economic losses claimed by the plaintiff or granted by

the jury. A verdict shall further determine the amounts intended to compensate for injury or losses incurred before the verdict and amounts intended to compensate for losses that will be incurred in the future.

Sec. 09.17.030. PERIODIC PAYMENTS. (a) In an action to recover damages for personal injury, the court shall, at the request of a judgment creditor, enter judgment ordering that amounts awarded for future damages be paid to the maximum extent feasible by periodic payments rather than by a lump-sum payment if the award equals or exceeds $50,000 in future damages. The court may require a judgment debtor to post security adequate to assure full payment of future damages awarded by judgment.

(b) A judgment ordering payment of future damages by periodic payments shall specify the recipient, the dollar amount of the payments, the interval between payments, and the number of payments or the period of time over which payments shall be made. Payments may be modified only in the event of the death of the judgment creditor, in which case payments may not be reduced or terminated, but shall be paid to persons to whom the judgment creditor owed a duty of support, as provided by law, immediately before death. The court that rendered the original judgment, may, upon petition of a party in interest, modify the judgment to award and apportion the unpaid future damages in accordance with this section.

(c) If the court finds that the judgment debtor has exhibited a continuing pattern of failing to make payments under (b) of this section, the court shall find the judgment debtor in contempt of court and, in addition to the required periodic payments, shall order the judgment debtor to pay the judgment creditor any damages caused by the failure to make periodic payments, including costs and attorney fees.

(d) Following expiration of all obligations specified in the periodic payment judgment, the obligation of the judgment debtor to make further payments shall cease and security given under (a) of this section shall revert to the judgment debtor.

(e) A certified copy of a judgment or order of the court issued under this section may be recorded under AS 09.30.010, but may not become a lien upon real property before the date that payment becomes due.

Sec. 09.17.040. EFFECT OF CONTRIBUTORY FAULT. In an action based on fault seeking to recover damages for injury or death to person or harm to property, contributory fault chargeable to the claimant diminishes proportionately the amount awarded as compensatory damages for an injury attributable to the claimant's contributory fault, but does not bar recovery.

Sec. 09.17.050. APPORTIONMENT OF DAMAGES. (a) In all actions involving fault of more than one party to the action, including third-party defendants and persons who have been released under AS 09.17.-060, the court, unless otherwise agreed by all parties, shall instruct the jury to answer special interrogatories or, if there is no jury, shall make findings, indicating

(1) the amount of damages each claimant would be entitled to recover if contributory fault is disregarded; and

(2) the percentage of the total fault of all of the parties to each claim that is allocated to each claimant, defendant, third-party defendant, and person who has been released from liability under AS 09.17.060; for this purpose the court may determine that two or more persons are to be treated as a single party.

(b) In determining the percentages of fault, the trier of fact shall consider both the nature of the conduct of each party at fault

and the extent of the causal relation between the conduct and the damages claimed.

(c) The court shall determine the award of damages to each claimant in accordance with the findings, subject to a reduction under AS 09.17.060, and enter judgment against each party liable on the basis of rules of several liability. The court also shall determine and state in the judgment each party's equitable share of the obligation to each claimant in accordance with the respective percentages of fault.

Sec. 09.17.060. EFFECT OF RELEASE. A release, covenant not to sue, or similar agreement entered into by a claimant and a person liable discharges that person from liability to the claimant, but it does not discharge another person liable upon the same claim unless the release, covenant not to sue, or similar agreement provides for discharge. However, the claim of the releasing person against other persons is reduced by the amount of the released person's equitable share of the obligation, determined in accordance with the provisions of AS 09.17.050.

Sec. 09.17.900. DEFINITIONS. In this chapter

(1) "fault" includes acts or omissions that are in any measure negligent or reckless toward the person or property of the actor or others, or that subject a person to strict tort liability; the term also includes breach of warranty, unreasonable assumption of risk not constituting an enforceable express consent, misuse of a product for which the defendant otherwise would be liable, and unreasonable failure to avoid an injury or to mitigate damages; legal requirements of causal relation apply both to fault as the basis for liability and to contributory fault;

(2) "future damages" includes damages for future medical

treatment, care or custody; loss of future earning capacity; or any future noneconomic loss.

* Sec. 2. AS 09.10 is amended by adding a new section to read:

Sec. 09.10.075. PERSONAL INJURY ACTIONS THAT MUST BE ARBITRATED. A person may not bring an action for damages based on personal injury when the amount in controversy is less than $100,000, exclusive of costs, interest and attorney fees, unless the controversy is first arbitrated under AS 09.43.

* Sec. 3. AS 09.30.065 is amended to read:

Sec. 09.30.065. OFFERS OF JUDGMENT. On or before the 60th day following the filing of an answer in a civil action, and on the fifth day following the day discovery closes as ordered by the court, [EITHER THE PARTY MAKING A CLAIM OR] the party defending against a claim may serve upon the party making the claim [ADVERSE PARTY] an offer to allow judgment to be entered in complete satisfaction of the claim against that defending party for the money or property or to the effect specified in the offer, with cost then accrued. If within 10 days after the service of the offer the claiming [ADVERSE] party serves written notice that the offer is accepted, either party may then file the offer and notice of acceptance together with proof of service, and the clerk shall enter judgment. An offer not accepted within 10 days is considered withdrawn and evidence of that offer is not admissible except in a proceeding to determine the form of judgment after verdict. If the judgment finally entered on the claim as to which an offer has been made under this section is not more favorable to the claiming party [OFFEREE] than the offer, the claim may not bear interest from the date of the offer to the date of judgment [THE INTEREST AWARDED UNDER AS 45.45.010(a) AND ACCRUED UP TO THE DATE JUDGMENT IS ENTERED SHALL BE ADJUSTED AS FOLLOWS:

(1) IF THE OFFEREE IS THE PARTY MAKING THE CLAIM, THE INTEREST RATE SHALL BE REDUCED BY TWO PERCENT A YEAR;

(2) IF THE OFFEREE IS THE PARTY DEFENDING AGAINST THE CLAIM, THE INTEREST RATE SHALL BE INCREASED BY TWO PERCENT A YEAR].

* Sec. 4. AS 09.43.110 is amended to read:

Sec. 09.43.110. CONFIRMATION OF AN AWARD. Upon application of a party, the court shall confirm an award unless

(1) within the time limits imposed by AS 09.43.120 and 09.43.130 grounds are urged for vacating or modifying or correcting the award, in which case the court shall proceed as provided in AS 09.43.120 and 09.43.130; or

(2) an appeal is taken under AS 09.43.160(c).

* Sec. 5. AS 09.43.160 is amended by adding a new subsection to read:

(c) An award made as a result of arbitration required by AS 09.-10.075 may be appealed to the proper court. The appeal shall be filed within 60 days after notice of an award is made under AS 09.43.080. The court shall grant a trial de novo if an appeal is filed under this subsection.

* Sec. 6. AS 09.60.010 is amended by adding a new subsection to read:

(b) Notwithstanding (a) of this section, the court may not award attorney fees to a prevailing party in an action for damages to the person or to property in the absence of a specific finding that the party at fault acted with malice, in bad faith, or with reckless disregard of the rights of another in causing the injury. In this subsection, "reckless disregard of the rights of another" means a lack of consideration of the rights of another in a manner that is reasonably likely to cause damage to the person or property of another.

* Sec. 7. AS 22.10.020(d) is amended to read:

(d) The superior court has jurisdiction in all matters appealed

to it (1) from a subordinate court; (2) by a party to an arbitration award under AS 09.43.160(c); [,] or (3) an administrative agency when appeal is provided by law. The hearings on appeal from a final order or judgment of a subordinate court or administrative agency shall be on the record unless the superior court, in its discretion, grants a trial de novo, in whole or in part.

* Sec. 8. AS 09.16.010, 09.16.020, 09.16.030, 09.16.040, 09.16.050, and 09.16.060 are repealed.

* Sec. 9. AS 09.17.020 and 09.17.050 enacted in sec. 1 of this Act have the effect of amending Alaska Rule of Civil Procedure 49 by requiring the jury to answer the special interrogatories listed in AS 09.17.050 regarding the amount of damages and the percentages of fault to be allocated among the parties and to itemize the verdict regarding economic and noneconomic loss as specified in AS 09.17.020.

* Sec. 10. AS 09.17.050 enacted in sec. 1 of this Act has the effect of amending Alaska Rule of Civil Procedure 52 by requiring the court to make specific findings regarding the amount of damages and the percentages of fault to be allocated among the parties.

* Sec. 11. AS 09.17.020, 09.17.030 and 09.17.050 enacted in sec. 1 of this Act have the effect of amending Alaska Rule of Civil Procedure 58 by requiring the court to include a specific item in its judgment.

* Sec. 12. AS 09.30.065 as amended by sec. 3 of this Act has the effect of amending Alaska Rule of Civil Procedure 68 by providing that prejudgment interest stops accruing from the date of an offer by a defending party that a claiming party fails to increase at judgment.

* Sec. 13. AS 09.60.010 as amended by sec. 6 of this Act has the effect of amending Alaska Rule of Civil Procedure 82 by allowing costs and attorney fees in an action for personal injury or property damage only after a specific finding of malice, bad faith, or reckless disregard of the rights

of another in causing the injury.

* Sec. 14. APPLICABILITY. Sections 1 - 7 of this Act apply to all causes of action accruing after the effective date of this Act.

* Sec. 15. LEGISLATIVE INTENT. The legislature intends that the changes made in this Act to the code of civil procedure should be reviewed three years after the effective date of the Act, to determine if additional modifications or changes are necessary. To achieve effective review, the legislature requests that the governor direct the division of insurance to monitor the effect of this Act on premiums being charged for liability insurance and to report the effect to the legislature no later than March 1, in 1987, 1988, and 1989.

* Sec. 16. This Act takes effect immediately in accordance with AS 01.-10.070(c).

BY THE LABOR AND COMMERCE COMMITTEE

CS FOR SENATE BILL NO. 377 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to civil actions; amending Alaska Rules of Civil Procedure 49, 52, 58, 68, and 82; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 09 is amended by adding a new chapter to read:

CHAPTER 17. LIMITATIONS ON CIVIL LIABILITY.

Sec. 09.17.010. NONECONOMIC DAMAGES. (a) In an action to recover damages for personal injury based on negligence, damages for noneconomic losses shall be limited to compensation for pain, suffering, inconvenience, physical impairment, disfigurement, loss of enjoyment of life and other nonpecuniary damage.

(b) The amount of damages awarded by a court or jury under (a) of this section may not exceed $250,000. per incident / per suit

Sec. 09.17.020. ITEMIZED VERDICTS. In every case where damages for personal injury are awarded by the court or jury, the verdict shall be itemized between economic loss and noneconomic loss, if any, and economic loss shall be further itemized by category. Itemization of economic loss by category includes: (1) amounts intended to compensate for reasonable expenses that have been incurred, or which will be incurred, for necessary medical, surgical, x-ray, dental, or other health or rehabilitative services, drugs, and therapy; (2) amounts intended to compensate for lost wages or loss of earning capacity; and (3) all other economic losses claimed by the plaintiff or granted by the jury. A verdict shall further determine the amounts intended to

Re-phrased plus substantive change on interest payments;

compensate for injury or losses incurred before the verdict and amounts intended to compensate for losses that will be incurred in the future.

Sec. 09.17.030. PERIODIC PAYMENTS. (a) In an action to recover damages for personal injury, the court shall, at the request of a party, enter judgment ordering that amounts awarded a judgment creditor for future damages be paid to the maximum extent feasible by periodic payments rather than by a lump-sum payment if the award equals or exceeds $50,000 in future damages. A judgment ordering the payment of future damages by periodic payments must also require that each periodic payment be increased at the annual rate of five percent from the date that judgment is entered. The court may require a judgment debtor to post security adequate to assure full payment of future damages awarded by judgment.

(b) A judgment ordering payment of future damages by periodic payments shall specify the recipient, the dollar amount of the payments, the interval between payments, and the number of payments or the period of time over which payments shall be made. Payments may be modified only in the event of the death of the judgment creditor, in which case payments may not be reduced or terminated, but shall be paid to persons to whom the judgment creditor owed a duty of support, as provided by law, immediately before death. The court that rendered the original judgment, may, upon petition of a party in interest, modify the judgment to award and apportion the unpaid future damages in accordance with this section.

(c) If the court finds that the judgment debtor has exhibited a continuing pattern of failing to make payments under (b) of this section, the court shall find the judgment debtor in contempt of court and, in addition to the required periodic payments, shall order the

judgment debtor to pay the judgment creditor any damages caused by the failure to make periodic payments, including costs and attorney fees.

(d) Following expiration of all obligations specified in the periodic payment judgment, the obligation of the judgment debtor to make further payments shall cease and security given under (a) of this section shall revert to the judgment debtor.

(e) A certified copy of a judgment or order of the court issued under this section may be recorded under AS 09.30.010, but may not become a lien upon real property before the date that payment becomes due.

Sec. 09.17.040. EFFECT OF CONTRIBUTORY FAULT. In an action based on fault seeking to recover damages for injury or death to person or harm to property, contributory fault chargeable to the claimant diminishes proportionately the amount awarded as compensatory damages for an injury attributable to the claimant's contributory fault, but does not bar recovery.

Sec. 09.17.050. APPORTIONMENT OF DAMAGES. (a) In all actions involving fault of more than one party to the action, including third-party defendants and persons who have been released under AS 09.17.060, the court, unless otherwise agreed by all parties, shall instruct the jury to answer special interrogatories or, if there is no jury, shall make findings, indicating

(1) the amount of damages each claimant would be entitled to recover if contributory fault is disregarded; and

(2) the percentage of the total fault of all of the parties to each claim that is allocated to each claimant, defendant, third-party defendant, and person who has been released from liability under AS 09.17.060; for this purpose the court may determine that two or more persons are to be treated as a single party.

(b) In determining the percentages of fault, the trier of fact shall consider both the nature of the conduct of each party at fault and the extent of the causal relation between the conduct and the damages claimed.

(c) The court shall determine the award of damages to each claimant in accordance with the findings, subject to a reduction under AS 09.17.060, and enter judgment against each party liable on the basis of rules of several liability. The court also shall determine and state in the judgment each party's equitable share of the obligation to each claimant in accordance with the respective percentages of fault.

Sec. 09.17.060. EFFECT OF RELEASE. A release, covenant not to sue, or similar agreement entered into by a claimant and a person liable discharges that person from liability to the claimant, but it does not discharge another person liable upon the same claim unless the release, covenant not to sue, or similar agreement provides for discharge. However, the claim of the releasing person against other persons is reduced by the amount of the released person's equitable share of the obligation, determined in accordance with the provisions of AS 09.17.050.

Sec. 09.17.900. DEFINITIONS. In this chapter

(1) "fault" includes acts or omissions that are in any measure negligent or reckless toward the person or property of the actor or others, or that subject a person to strict tort liability; the term also includes breach of warranty, unreasonable assumption of risk not constituting an enforceable express consent, misuse of a product for which the defendant otherwise would be liable, and unreasonable failure to avoid an injury or to mitigate damages; legal requirements of causal relation apply both to fault as the basis for

liability and to contributory fault;

(2) "future damages" includes damages for future medical treatment, care or custody; loss of future earning capacity; or any future noneconomic loss.

old 3

* Sec. 2. AS 09.10 is amended by adding a new section to read:

Sec. 09.10.075. PERSONAL INJURY ACTIONS THAT MUST BE ARBITRATED. A person may not bring an action for damages based on personal injury when the amount in controversy is less than $100,000, exclusive of costs, interest and attorney fees, unless the controversy is first arbitrated under AS 09.43.

4

* Sec. 3. AS 09.30.065 is amended to read:

Sec. 09.30.065. OFFERS OF JUDGMENT. On or before the 60th day following the filing of an answer in a civil action, and on the fifth day following the day discovery closes as ordered by the court, [EITHER THE PARTY MAKING A CLAIM OR] the party defending against a claim may serve upon the party making the claim [ADVERSE PARTY] an offer to allow judgment to be entered in complete satisfaction of the claim against that defending party for the money or property or to the effect specified in the offer, with cost then accrued. If within 10 days after the service of the offer the claiming [ADVERSE] party serves written notice that the offer is accepted, either party may then file the offer and notice of acceptance together with proof of service, and the clerk shall enter judgment. An offer not accepted within 10 days is considered withdrawn and evidence of that offer is not admissible except in a proceeding to determine the form of judgment after verdict. If the judgment finally entered on the claim as to which an offer has been made under this section is not more favorable to the claiming party [OFFEREE] than the offer, the claim may not bear interest from the date of the offer to the date of judgment [THE

INTEREST AWARDED UNDER AS 45.45.010(a) AND ACCRUED UP TO THE DATE JUDGMENT IS ENTERED SHALL BE ADJUSTED AS FOLLOWS:

(1) IF THE OFFEREE IS THE PARTY MAKING THE CLAIM, THE INTEREST RATE SHALL BE REDUCED BY TWO PERCENT A YEAR;

(2) IF THE OFFEREE IS THE PARTY DEFENDING AGAINST THE CLAIM, THE INTEREST RATE SHALL BE INCREASED BY TWO PERCENT A YEAR].

* Sec. 4. AS 09.43.110 is amended to read:

Sec. 09.43.110. CONFIRMATION OF AN AWARD. Upon application of a party, the court shall confirm an award unless

(1) within the time limits imposed by AS 09.43.120 and 09.43.130 grounds are urged for vacating or modifying or correcting the award, in which case the court shall proceed as provided in AS 09.43.120 and 09.43.130; or

(2) an appeal is taken under AS 09.43.160(c).

* Sec. 5. AS 09.43.160 is amended by adding a new subsection to read:

(c) An award made as a result of arbitration required by AS 09.-10.075 may be appealed to the proper court. The appeal shall be filed within 60 days after notice of an award is made under AS 09.43.080. The court shall grant a trial de novo if an appeal is filed under this subsection.

* Sec. 6. AS 09.60.010 is amended by adding a new subsection to read:

(b) Notwithstanding (a) of this section, the court may not award attorney fees to a prevailing party in an action for damages to the person or to property in the absence of a specific finding that the party at fault acted with malice, in bad faith, or with reckless disregard of the rights of another in causing the injury.

* Sec. 7. AS 22.10.020(d) is amended to read:

(d) The superior court has jurisdiction in all matters appealed to it (1) from a subordinate court; (2) by a party to an arbitration

award under AS 09.43.160(c); [,] or (3) an administrative agency when appeal is provided by law. The hearings on appeal from a final order or judgment of a subordinate court or administrative agency shall be on the record unless the superior court, in its discretion, grants a trial de novo, in whole or in part.

13

* Sec. 8. AS 09.16.010, 09.16.020, 09.16.030, 09.16.040, 09.16.050, and 09.16.060 are repealed.

14

* Sec. 9. AS 09.17.020 and 09.17.050 enacted in sec. 1 of this Act have the effect of amending Alaska Rule of Civil Procedure 49 by requiring the jury to answer the special interrogatories listed in AS 09.17.050 regarding the amount of damages and the percentages of fault to be allocated among the parties and to itemize the verdict regarding economic and noneconomic loss as specified in AS 09.17.020.

15

* Sec. 10. AS 09.17.050 enacted in sec. 1 of this Act has the effect of amending Alaska Rule of Civil Procedure 52 by requiring the court to make specific findings regarding the amount of damages and the percentages of fault to be allocated among the parties.

16

* Sec. 11. AS 09.17.020, 09.17.030 and 09.17.050 enacted in sec. 1 of this Act have the effect of amending Alaska Rule of Civil Procedure 58 by requiring the court to include a specific item in its judgment.

17

* Sec. 12. AS 09.30.065 as amended by sec. 3 of this Act has the effect of amending Alaska Rule of Civil Procedure 68 by providing that prejudgment interest stops accruing from the date of an offer by a defending party that a claiming party fails to increase at judgment.

18

* Sec. 13. AS 09.60.010 as amended by sec. 6 of this Act has the effect of amending Alaska Rule of Civil Procedure 82 by allowing costs and attorney fees in an action for personal injury or property damage only after a specific finding of malice, bad faith, or reckless disregard of the rights

96

* Sec. 14. APPLICABILITY. Sections 1 - 7 of this Act apply to all causes of action accruing after the effective date of this Act.

* Sec. 15. LEGISLATIVE INTENT. The legislature intends that the changes made in this Act to the code of civil procedure should be reviewed three years after the effective date of the Act, to determine if additional modifications or changes are necessary. To achieve effective review, the legislature requests that the governor direct the division of insurance to monitor the effect of this Act on premiums being charged for liability insurance and to report the effect to the legislature no later than March 1, in 1987, 1988, and 1989.

* Sec. 16. This Act takes effect immediately in accordance with AS 01.-10.070(c).

CS FOR SENATE BILL NO. 377 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to civil actions; amending Alaska Rules of Civil Procedure 49, 52, 58, 68, and 82; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 09 is amended by adding a new chapter to read:

CHAPTER 17. LIMITATIONS ON CIVIL LIABILITY.

Sec. 09.17.010. NONECONOMIC DAMAGES. (a) In an action to recover damages for personal injury based on negligence, damages for noneconomic losses shall be limited to compensation for pain, suffering, inconvenience, physical impairment, disfigurement, loss of enjoyment of life and other nonpecuniary damage.

Waiv. P. limit

(b) The amount of damages awarded by a court or jury under (a) of this section may not exceed $250,000.

Sec. 09.17.020. ITEMIZED VERDICTS. In every case where damages for personal injury are awarded by the court or jury, the verdict shall be itemized between economic loss and noneconomic loss, if any, and economic loss shall be further itemized by category. Itemization of economic loss by category includes: (1) amounts intended to compensate for reasonable expenses that have been incurred, or which will be incurred, for necessary medical, surgical, x-ray, dental, or other health or rehabilitative services, drugs, and therapy; (2) amounts intended to compensate for lost wages or loss of earning capacity; and (3) all other economic losses claimed by the plaintiff or granted by the jury. A verdict shall further determine the amounts intended to

compensate for injury or losses incurred before the verdict and amounts intended to compensate for losses that will be incurred in the future.

Sec. 09.17.030. PERIODIC PAYMENTS. (a) In an action to recover damages for personal injury, the court shall, at the request of a party, enter judgment ordering that amounts awarded a judgment creditor for future damages be paid to the maximum extent feasible by periodic payments rather than by a lump-sum payment if the award equals or exceeds $50,000 in future damages. In entering judgment ordering the payment of future damages by periodic payments, the court shall make a specific finding as to the dollar amount of periodic payments that will compensate the judgment creditor for future damages. The court may require a judgment debtor to post security adequate to assure full payment of future damages awarded by judgment.

(b) A judgment ordering payment of future damages by periodic payments shall specify the recipient, the dollar amount of the payments, the interval between payments, and the number of payments or the period of time over which payments shall be made. Payments may be modified only in the event of the death of the judgment creditor, in which case payments may not be reduced or terminated, but shall be paid to persons to whom the judgment creditor owed a duty of support, as provided by law, immediately before death. The court that rendered the original judgment, may, upon petition of a party in interest, modify the judgment to award and apportion the unpaid future damages in accordance with this section.

(c) If the court finds that the judgment debtor has exhibited a continuing pattern of failing to make payments under (b) of this section, the court shall find the judgment debtor in contempt of court and, in addition to the required periodic payments, shall order the

judgment debtor to pay the judgment creditor any damages caused by the failure to make periodic payments, including costs and attorney fees.

(d) Following expiration of all obligations specified in the periodic payment judgment, the obligation of the judgment debtor to make further payments shall cease and security given under (a) of this section shall revert to the judgment debtor.

(e) A certified copy of a judgment or order of the court issued under this section may be recorded under AS 09.30.010, but may not become a lien upon real property before the date that payment becomes due.

Sec. 09.17.040. EFFECT OF CONTRIBUTORY FAULT. In an action based on fault seeking to recover damages for injury or death to person or harm to property, contributory fault chargeable to the claimant diminishes proportionately the amount awarded as compensatory damages for an injury attributable to the claimant's contributory fault, but does not bar recovery.

Sec. 09.17.050. APPORTIONMENT OF DAMAGES. (a) In all actions involving fault of more than one party to the action, including third-party defendants and persons who have been released under AS 09.17.060, the court, unless otherwise agreed by all parties, shall instruct the jury to answer special interrogatories or, if there is no jury, shall make findings, indicating

(1) the amount of damages each claimant would be entitled to recover if contributory fault is disregarded; and

(2) the percentage of the total fault of all of the parties to each claim that is allocated to each claimant, defendant, third-party defendant, and person who has been released from liability under AS 09.17.060; for this purpose the court may determine that two or more persons are to be treated as a single party.

(b) In determining the percentages of fault, the trier of fact shall consider both the nature of the conduct of each party at fault and the extent of the causal relation between the conduct and the damages claimed.

(c) The court shall determine the award of damages to each claimant in accordance with the findings, subject to a reduction under AS 09.17.060, and enter judgment against each party liable on the basis of rules of several liability. The court also shall determine and state in the judgment each party's equitable share of the obligation to each claimant in accordance with the respective percentages of fault.

Sec. 09.17.060. EFFECT OF RELEASE. A release, covenant not to sue, or similar agreement entered into by a claimant and a person liable discharges that person from liability to the claimant, but it does not discharge another person liable upon the same claim unless the release, covenant not to sue, or similar agreement provides for discharge. However, the claim of the releasing person against other persons is reduced by the amount of the released person's equitable share of the obligation, determined in accordance with the provisions of AS 09.17.050.

Sec. 09.17.900. DEFINITIONS. In this chapter

(1) "fault" includes acts or omissions that are in any measure negligent or reckless toward the person or property of the actor or others, or that subject a person to strict tort liability; the term also includes breach of warranty, unreasonable assumption of risk not constituting an enforceable express consent, misuse of a product for which the defendant otherwise would be liable, and unreasonable failure to avoid an injury or to mitigate damages; legal requirements of causal relation apply both to fault as the basis for

liability and to contributory fault;

(2) "future damages" includes damages for future medical treatment, care or custody; loss of future earning capacity; or any future noneconomic loss.

* Sec. 2. AS 09.16 is amended by adding new sections to read:

Sec. 09.16.011. RIGHT TO CONTRIBUTION. (a) Except as otherwise provided in this chapter, where two or more persons become jointly or severally liable in tort for the same injury to person or property or for the same wrongful death, there is a right of contribution among them even though judgment has not been recovered against all or any of them.

(b) The right of contribution exists only in favor of a tortfeasor who has paid more than that tortfeasor's pro rata share of the common liability, and the total recovery of that tortfeasor is limited to the amount paid in excess of the pro rata share. A tortfeasor is not compelled to make contribution beyond the tortfeasor's pro rata share of the entire liability.

(c) There is no right of contribution in favor of a tortfeasor who has intentionally caused or contributed to the injury or wrongful death.

(d) A tortfeasor who enters into a settlement with a claimant is not entitled to recover contribution from another tortfeasor whose liability for the injury or wrongful death is not extinguished by the settlement nor in respect to an amount paid in a settlement that is in excess of what was reasonable.

(e) A liability insurer, who by payment has discharged in full or in part the liability of a tortfeasor and has thereby discharged in full its obligation as insurer, is subrogated to the tortfeasor's right of contribution to the extent of the amount it has paid in

excess of the tortfeasor's pro rata share of the common liability. This provision does not limit or impair a right of subrogation arising from any other relationship.

(f) This chapter does not impair the right of indemnity under existing law. If one tortfeasor is entitled to indemnity from another, the right of the indemnity obligee is for indemnity and not contribution, and the indemnity obligor is not entitled to contribution from the obligee for any portion of the indemnity obligation.

(g) This chapter does not apply to breaches of trust or of other fiduciary obligation.

Sec. 09.16.021. PRO RATA SHARES. In determining the pro rata shares of tortfeasors in the entire liability

(1) their relative degrees of fault may not be considered;

(2) if equity requires, the collective liability of some as a group constitutes a single share; and

(3) principles of equity applicable to contribution generally shall apply.

Sec. 09.16.031. ENFORCEMENT. (a) Whether or not judgment has been entered in an action against two or more tortfeasors for the same injury or wrongful death, contribution may be enforced by separate action.

(b) Where a judgment has been entered in an action against two or more tortfeasors for the same injury or wrongful death, contribution may be enforced in that action by judgment in favor of one against other judgment defendants by motion upon notice to all parties to the action.

(c) If there is a judgment for the injury or wrongful death against the tortfeasor seeking contribution, a separate action by that tortfeasor to enforce contribution must be commenced within one year

after the judgment has become final by lapse of time for appeal or after appellate review.

(d) If there is no judgment for the injury or wrongful death against the tortfeasor seeking contribution, the right of contribution is barred unless that tortfeasor has either

(1) discharged by payment the common liability within the statute of limitations period applicable to claimant's right of action against the tortfeasor and has commenced the action for contribution within one year after payment; or

(2) agreed while action is pending against the tortfeasor to discharge the common liability and has within one year after the agreement paid the liability and commenced the action for contribution.

(e) The recovery of a judgment for an injury or wrongful death against one tortfeasor does not of itself discharge the other tortfeasors from liability for the injury or wrongful death unless the judgment is satisfied. The satisfaction of the judgment does not impair any right of contribution.

(f) The judgment of the court in determining the liability of the several defendants to the claimant for an injury or wrongful death is binding as among the defendants in determining their right to contribution.

Sec. 09.16.041. RELEASE OR COVENANT NOT TO SUE. When a release or covenant not to sue or not to enforce judgment is given in good faith to one of two or more persons liable in tort for the same injury or the same wrongful death

(1) it does not discharge any of the other tortfeasors from liability for the injury or wrongful death unless its terms so provide; but it reduces the claim against the others to the extent of any

amount stipulated by the release or the covenant, or in the amount of the consideration paid for it, whichever is the greater; and

(2) it discharges the tortfeasor to whom it is given from all liability for contribution to any other tortfeasor.

Sec. 09.16.051. UNIFORMITY OF INTERPRETATION. This chapter shall be so interpreted and construed as to effectuate as far as practical the general purpose of making uniform the law of those states that enact it.

Sec. 09.16.061. SHORT TITLE. This chapter may be cited as the Alaska Uniform Contribution among Tortfeasors Act.

* Sec. 3. AS 09.10 is amended by adding a new section to read:

Sec. 09.10.075. PERSONAL INJURY ACTIONS THAT MUST BE ARBITRATED. A person may not bring an action for damages based on personal injury when the amount in controversy is less than $100,000, exclusive of costs, interest and attorney fees, unless the controversy is first arbitrated under AS 09.43.

* Sec. 4. AS 09.30.065 is amended to read:

Sec. 09.30.065. OFFERS OF JUDGMENT. On or before the 60th day following the filing of an answer in a civil action, and on the fifth day following the day discovery closes as ordered by the court, [EITHER THE PARTY MAKING A CLAIM OR] the party defending against a claim may serve upon the <u>party making the claim</u> [ADVERSE PARTY] an offer to allow judgment to be entered in complete satisfaction of the claim <u>against that defending party</u> for the money or property or to the effect specified in the offer, with cost then accrued. If within 10 days after the service of the offer the <u>claiming</u> [ADVERSE] party serves written notice that the offer is accepted, either party may then file the offer and notice of acceptance together with proof of service, and the clerk shall enter judgment. An offer not accepted

within 10 days is considered withdrawn and evidence of that offer is not admissible except in a proceeding to determine the form of judgment after verdict. If the judgment finally entered on the claim as to which an offer has been made under this section is not more favorable to the claiming party [OFFEREE] than the offer, the claim may not bear interest from the date of the offer to the date of judgment [THE INTEREST AWARDED UNDER AS 45.45.010(a) AND ACCRUED UP TO THE DATE JUDGMENT IS ENTERED SHALL BE ADJUSTED AS FOLLOWS:

(1) IF THE OFFEREE IS THE PARTY MAKING THE CLAIM, THE INTEREST RATE SHALL BE REDUCED BY TWO PERCENT A YEAR;

(2) IF THE OFFEREE IS THE PARTY DEFENDING AGAINST THE CLAIM, THE INTEREST RATE SHALL BE INCREASED BY TWO PERCENT A YEAR].

* Sec. 5. AS 09.30.065 is repealed and reenacted to read:

Sec. 09.30.065. OFFERS OF JUDGMENT. On or before the 60th day following the filing of an answer in a civil action, and on the fifth day following the day discovery closes as ordered by the court, either the party making a claim or the party defending against a claim may serve upon the adverse party an offer to allow judgment to be entered in complete satisfaction of the claim for the money or property or to the effect specified in the offer, with cost then accrued. If within 10 days after the service of the offer the adverse party serves written notice that the offer is accepted, either party may then file the offer and notice of acceptance together with proof of service, and the clerk shall enter judgment. An offer not accepted within 10 days is considered withdrawn and evidence of that offer is not admissible except in a proceeding to determine the form of judgment after verdict. If the judgment finally entered on the claim as to which an offer has been made under this section is not more favorable to the offeree than the offer, the interest awarded under AS 45.45.010(a) and

accrued up to the date judgment is entered shall be adjusted as follows:

(1) if the offeree is the party making the claim, the interest rate shall be reduced by two percent a year;

(2) if the offeree is the party defending against the claim, the interest rate shall be increased by two percent a year.

* Sec. 6. AS 09.43.110 is amended to read:

Sec. 09.43.110. CONFIRMATION OF AN AWARD. Upon application of a party, the court shall confirm an award unless

(1) within the time limits imposed by AS 09.43.120 and 09.43.130 grounds are urged for vacating or modifying or correcting the award, in which case the court shall proceed as provided in AS 09.43.120 and 09.43.130; or

(2) an appeal is taken under AS 09.43.160(c).

* Sec. 7. AS 09.43.110 is repealed and reenacted to read:

Sec. 09.43.110. CONFIRMATION OF AN AWARD. Upon application of a party, the court shall confirm an award unless within the time limits imposed by AS 09.43.120 and 09.43.130 grounds are urged for vacating or modifying or correcting the award, in which case the court shall proceed as provided in AS 09.43.120 and 09.43.130.

* Sec. 8. AS 09.43.160 is amended by adding a new subsection to read:

(c) An award made as a result of arbitration required by AS 09.-10.075 may be appealed to the proper court. The appeal shall be filed within 60 days after notice of an award is made under AS 09.43.080. The court shall grant a trial de novo if an appeal is filed under this subsection.

* Sec. 9. AS 09.60.010 is amended by adding a new subsection to read:

(b) Notwithstanding (a) of this section, the court may not award attorney fees to a prevailing party in an action for damages to the

person or to property in the absence of a specific finding that the party at fault acted with malice, in bad faith, or with reckless disregard of the rights of another in causing the injury.

* Sec. 10. AS 22.10.020(d) is amended to read:

(d) The superior court has jurisdiction in all matters appealed to it (1) from a subordinate court; (2) by a party to an arbitration award under AS 09.43.160(c); [,] or (3) an administrative agency when appeal is provided by law. The hearings on appeal from a final order or judgment of a subordinate court or administrative agency shall be on the record unless the superior court, in its discretion, grants a trial de novo, in whole or in part.

* Sec. 11. AS 22.10.020(d) is repealed and reenacted to read:

(d) The superior court has jurisdiction in all matters appealed to it from a subordinate court, or administrative agency when appeal is provided by law. The hearings on appeal from a final order or judgment of a subordinate court or administrative agency shall be on the record unless the superior court, in its discretion, grants a trial de novo, in whole or in part.

* Sec. 12. The following laws are repealed: AS 09.10.075; AS 09.17.-010, 09.17.020, 09.17.030, 09.17.040, 09.17.050, 09.17.060, 09.17.900; AS 09.43.160(c); and AS 09.60.010(b).

* Sec. 13. AS 09.16.010, 09.16.020, 09.16.030, 09.16.040, 09.16.050, and 09.16.060 are repealed.

* Sec. 14. AS 09.17.020 and 09.17.050 enacted in sec. 1 of this Act have the effect of amending Alaska Rule of Civil Procedure 49 by requiring the jury to answer the special interrogatories listed in AS 09.17.050 regarding the amount of damages and the percentages of fault to be allocated among the parties and to itemize the verdict regarding economic and

noneconomic loss as specified in AS 09.17.020.

* Sec. 15. AS 09.17.050 enacted in sec. 1 of this Act has the effect of amending Alaska Rule of Civil Procedure 52 by requiring the court to make specific findings regarding the amount of damages and the percentages of fault to be allocated among the parties.

* Sec. 16. AS 09.17.020, 09.17.030 and 09.17.050 enacted in sec. 1 of this Act have the effect of amending Alaska Rule of Civil Procedure 58 by requiring the court to include a specific item in its judgment.

* Sec. 17. AS 09.30.065 as amended by sec. 4 of this Act has the effect of amending Alaska Rule of Civil Procedure 68 by providing that prejudgment interest stops accruing from the date of an offer by a defending party that a claiming party fails to increase at judgment.

* Sec. 18. AS 09.60.010 as amended by sec. 9 of this Act has the effect of amending Alaska Rule of Civil Procedure 82 by allowing costs and attorney fees in an action for personal injury or property damage only after a specific finding of malice, bad faith, or reckless disregard of the rights of another in causing the injury.

* Sec. 19. APPLICABILITY. Sections 1, 3, 4, 6, 8, 9, and 10 of this Act apply to all causes of action accruing after the effective date of this Act.

* Sec. 20. APPLICABILITY. Sections 2, 5, 7, and 12 of this Act apply to all causes of action accruing on or after July 1, 1989.

* Sec. 21. Sections 2, 5, 7, 11, and 12 of this Act take effect July 1, 1989.

* Sec. 22. Sections 1, 3, 4, 6, 8, 9, 10, and 13 - 19 of this Act take effect immediately in accordance with AS 01.10.070(c).

PROCEEDINGS TO COMPEL OR STAY ARBITRATION.

TEXT (a) On application of a party showing an agreement described in AS 09.43.010, and the opposing party's refusal to arbitrate, the court shall order the parties to proceed with arbitration, but if the opposing party denies the existence of the agreement to arbitrate, the court shall proceed summarily to the determination of the issue and if the agreement is found to exist shall order arbitration.

(b) On application, the court may stay an arbitration proceeding commenced or threatened on a showing that there is no agreement to arbitrate. The issue, when in substantial and bona fide dispute, shall be immediately and summarily tried and the stay ordered if no agreement is found to exist. If found for the opposing party, the court shall order the parties to proceed to arbitration.

(c) If an issue subject to arbitration under the alleged agreement is involved in an action or proceeding pending in a court having jurisdiction to hear applications under (a) of this section, the application shall be made in that court. Otherwise the application may be made in any court of competent jurisdiction.

(d) An action or proceeding involving an issue subject to arbitration shall be stayed if an order for arbitration or an application for the order has been made under this section or, if the issue is severable, the stay may be with respect to the issue only.

(e) An order for arbitration may not be refused on the ground that the claim in issue lacks merit or because a fault or ground for the claims sought to be arbitrated has not been shown.

VACATING AN AWARD.
TEXT (a) On application of a party, the court shall vacate an award if

(1) the award was procured by fraud or other undue means;

(2) there was evident partiality by an arbitrator appointed as a neutral or corruption in any of the arbitrators or misconduct prejudicing the rights of a party;

(3) the arbitrators exceeded their powers;

(4) the arbitrators refused to postpone the hearing upon sufficient cause being shown for postponement or refused to hear evidence material to the controversy or otherwise so conducted the hearing, contrary to the provisions of AS 09.43.050, as to prejudice substantially the rights of a party; or

(5) there was no arbitration agreement and the issue was not adversely determined in proceedings under AS 09.43.020 and the party did not participate in the arbitration hearing without raising the objection.

(b) The fact that the relief is such that it could not or would not be granted by a court of law or equity is not ground for vacating or refusing to confirm the award.

(c) An application under this section shall be made within 90 days after delivery of a copy of the award to the applicant. However, if the application is predicated upon corruption, fraud or other undue means by either the opposing party or an arbitrator, it shall be made within 90 days after the grounds are known or should have been known.

(d) In vacating the award on grounds other than those stated in (a)(5) of this section the court may order a rehearing before new arbitrators chosen as provided in the agreement, or in the absence of a provision in the agreement, by the court in accordance with AS 09.43.030, or, if the award is vacated on grounds set out in (a)(3) or (4) of this section, the court may order a rehearing before the arbitrators who made the award or their successors appointed in accordance with AS 09.43.030. The time within which the agreement requires the award to be made is applicable to the rehearing and commences from the date of the order.

(e) If the application to vacate is denied and no motion to modify or correct the award is pending, the court shall confirm the award.

MODIFICATION OR CORRECTION OF AWARD BY COURT.

TEXT (a) On application made within 90 days after delivery of a copy of the award to the applicant, the court shall modify or correct the award if

(1) there was an evident miscalculation of figures or an evident mistake in the description of a person, thing or property referred to in the award;

(2) the arbitrators have awarded upon a matter not submitted to them and the award may be corrected without affecting the merits of the decision upon the issues submitted; or

(3) the award is imperfect in a matter of form not affecting the merits of the controversy.

(b) If the application is granted, the court shall modify and correct the award to effect its intent and shall confirm the award as modified and corrected. Otherwise, the court shall confirm the award as made.

(c) An application to modify or correct an award may be joined in the alternative with an application to vacate the award.

RIGHT TO CONTRIBUTION.
TEXT (a) Except as otherwise provided in this chapter, where two or more persons become jointly or severally liable in tort for the same injury to person or property or for the same wrongful death, there is a right of contribution among them even though judgment has not been recovered against all or any of them.

(b) The right of contribution exists only in favor of a tortfeasor who has paid more than that tortfeasor's pro rata share of the common liability, and the total recovery of that tortfeasor is limited to the amount paid in excess of the pro rata share. No tortfeasor is compelled to make contribution beyond the tortfeasor's pro rata share of the entire liability.

(c) There is no right of contribution in favor of any tortfeasor who has intentionally caused or contributed to the injury or wrongful death.

(d) A tortfeasor who enters into a settlement with a claimant is not entitled to recover contribution from another tortfeasor whose liability for the injury or wrongful death is not extinguished by the settlement nor in respect to any amount paid in a settlement which is in excess of what was reasonable.

(e) A liability insurer, who by payment has discharged in full or in part the liability of a tortfeasor and has thereby discharged in full its obligation as insurer, is subrogated to the tortfeasor's right of contribution to the extent of the amount it has paid in excess of the tortfeasor's pro rata share of the common liability. This provision does not limit or impair any right of subrogation arising from any other relationship.

(f) This chapter does not impair any right of indemnity under existing law. If one tortfeasor is entitled to indemnity from another, the right of the indemnity obligee is for indemnity and not contribution, and the indemnity obligor is not entitled to contribution from the obligee for any portion of the indemnity obligation.

(g) This chapter does not apply to breaches of trust or of other fiduciary obligation.

ENFORCEMENT.
TEXT (a) Whether or not judgment has been entered in an action against two or more tortfeasors for the same injury or wrongful death, contribution may be enforced by separate action.

(b) Where a judgment has been entered in an action against two or more tortfeasors for the same injury or wrongful death, contribution may be enforced in that action by judgment in favor of one against other judgment defendants by motion upon notice to all parties to the action.

(c) If there is a judgment for the injury or wrongful death against the tortfeasor seeking contribution, any separate action by that tortfeasor to enforce contribution must be commenced within one year after the judgment has become final by lapse of time for appeal or after appellate review.

(d) If there is no judgment for the injury or wrongful death against the tortfeasor seeking contribution, the right of contribution is barred unless that tortfeasor has either

(1) discharged by payment the common liability within the statute of limitations period applicable to claimant's right of action against the tortfeasor and has commenced the action for contribution within one year after payment; or

(2) agreed while action is pending against the tortfeasor to discharge the common liability and has within one year after the agreement paid the liability and commenced the action for contribution.

(e) The recovery of a judgment for an injury or wrongful death against one tortfeasor does not of itself discharge the other tortfeasors from liability for the injury or wrongful death unless the judgment is satisfied. The satisfaction of the judgment does not impair any right of contribution.

(f) The judgment of the court in determining the liability of the several defendants to the claimant for an injury or wrongful death is binding as among the defendants in determining their right to contribution.

JURISDICTION OF THE SUPERIOR COURT.
TEXT (a) The superior court is the trial court of general jurisdiction, with original jurisdiction in all civil and criminal matters, including probate and guardianship of minors and incompetents. Except for a petition for injunctive relief under AS 25.35.010 or 25.35.020, an action that falls within the concurrent jurisdiction of the superior court and the district court may not be filed in the superior court, except as provided by rules of the supreme court.

(b) The jurisdiction of the superior court extends over the whole of the state.

(c) The superior court and its judges may issue injunctions, writs of review, mandamus, prohibition, habeas corpus and all other writs necessary or proper to the complete exercise of its jurisdiction. A writ of habeas corpus may be made returnable before any judge of the superior court.

(d) The superior court has jurisdiction in all matters appealed to it from a subordinate court, or administrative agency when appeal is provided by law. The hearings on appeal from a final order or judgment of a subordinate court or administrative agency shall be on the record unless the superior court, in its discretion, grants a trial de novo, in whole or in part.

(e) An appeal to the superior court is a matter of right, but an appeal from a subordinate court may not be taken by the defendant in a criminal case after a plea of guilty, except on the ground that the sentence was excessive. The state has no right to appeal in criminal cases, except to test the sufficiency of an indictment or information or to appeal a sentence on the ground it is too lenient.

(f) An appeal to the superior court may be taken on the ground that a sentence of imprisonment of 90 days or more was excessive and the superior court in the exercise of this jurisdiction has the power to reduce the sentence. When a sentence is appealed by the state on the ground it is too lenient, the court may not increase the sentence but may express its approval or disapproval of the sentence and its reasons in a written opinion.

(g) In case of an actual controversy in the state, the superior court, upon the filing of an appropriate pleading, may declare the rights and legal relations of an interested party seeking the declaration, whether or not further relief is or could be sought. The declaration has the force and effect of a final judgment or decree and is reviewable as such. Further necessary or proper relief based on a declaratory judgment or decree may be granted, after reasonable notice and hearing, against an adverse party whose rights have been determined by the judgment.

(h) The superior court, in an action for divorce, separation, or child support, affecting inalienable stock in a corporation organized under 43 U.S.C. 1601-1628 (Alaska Native Claims Settlement Act), may order the stock transferred to the spouse, a child, or a guardian or custodian for a child, but may not order it sold on the open market or transferred to other persons.

(i) The superior court is the court of original jurisdiction over all causes of action arising under the provisions of AS 18.80. A person who is injured or aggrieved by an act, practice or policy which is prohibited under AS 18.80 may apply to the superior court for relief. The person aggrieved or injured may maintain an action on behalf of that person or on behalf of a class consisting of all persons who are aggrieved or injured by the act, practice or policy giving rise to the action. In an action brought under this subsection, the court may grant relief as to any act, practice or policy of the defendant which is prohibited by AS 18.80, regardless of whether each act, practice or policy, with respect to which relief is granted, directly affects the plaintiff, so long as a class or members of a class of which the plaintiff is a member are or may be aggrieved or injured by the act, practice or policy. The court may enjoin any act, practice or policy which is illegal under AS 18.80 and may order any other relief, including the payment of money, that is appropriate.

METROPOLITAN LIFE INSURANCE COMPANY, et al., Appellants

v

W. G. WARD, Jr., et al.

470 US —, 84 L Ed 2d 751, 106 S Ct —

[No. 83-1274]

Argued October 31, 1984. Decided March 26, 1985.

Decision: State statute taxing out-of-state insurance companies at a higher rate than domestic insurance companies held not to have legitimate state purpose for purposes of equal protection clause.

SUMMARY

A group of foreign insurance companies filed claims with Alabama state insurance authorities contending that an Alabama statute imposing a substantially higher gross premiums tax on out-of-state insurance companies than on domestic companies, and allowing the out-of-state companies to reduce their tax rate by investing certain percentages of their total assets in specified state assets and securities, violated the equal protection clause as applied to them. The Circuit Court for Montgomery County, Alabama, upheld the denial of these claims, ruling that the statute was rationally related to the legitimate state purposes of encouraging the formation of new domestic insurance companies and encouraging capital investment in the state by foreign insurance companies. The Court of Civil Appeals of Alabama affirmed as to the legitimacy of these purposes but remanded for an evidentiary hearing on the issue of rational relationship. The insurance companies waived their right to such a hearing and appealed as to the legitimacy of the stated legislative purposes. The Supreme Court of Alabama denied certiorari, and judgment was subsequently entered in favor of the state and the intervenor domestic companies.

On appeal, the United States Supreme Court reversed and remanded. In an opinion by POWELL, J., joined by BURGER, Ch. J., and WHITE, BLACKMUN, and STEVENS, JJ., the court held that the Alabama statute could not be sustained under the equal protection clause ruling that the promotion of domestic business within a state by discriminating against foreign corpora-

tions that wish to compete by doing business there is not a legitimate state purpose, and that the encouragement of capital investment in state assets and securities also is not a legitimate state purpose when furthered by discrimination.

O'CONNOR, J., joined by BRENNAN, MARSHALL, and REHNQUIST, JJ., dissented, expressing the view that the majority opinion was unsupported by precedent and distorted the constitutional balance, threatening the freedom of both state and federal legislative bodies to fashion appropriate classifications in economic legislation.

HEADNOTES

Classified to U.S. Supreme Court Digest, Lawyers' Edition

Constitutional Law § 369; Insurance § 6 — equal protection — foreign corporations — insurance companies — illegitimacy of purposes of discriminatory tax law

1a–1f. A state law imposing a higher premiums tax on foreign insurance companies than on domestic insurance companies, and allowing foreign companies to reduce but not eliminate the disparity in tax rates by investing certain proportions of their assets in state assets and securities, cannot be justified under the equal protection clause by its asserted purpose of promoting domestic business within the state, which is not a legitimate state purpose for purposes of the equal protection clause where it is accomplished by discriminating against foreign corporations that wish to compete by doing business in the state, or by its asserted purpose of encouraging investment in state assets, which is also not a legitimate state purpose when furthered by discrimination. (O'Connor, J., and Brennan, Marshall, and Rehnquist, JJ., dissented from this holding.)

Constitutional Law § 349 — equal protection — state discrimination against nonresidents

2. The equal protection clause forbids a state to discriminate in favor of its own residents solely by burdening the residents of other state members of the federation.

Constitutional Law § 369; Insurance § 6 — equal protection — insurance companies — McCarran-Ferguson Act

3. Although the McCarran-Ferguson Act, 15 USCS §§ 1011–1015, exempts the insurance industry from commerce clause restrictions, it does not purport to limit in any way the applicability of the equal protection clause.

Commerce § 144; Constitutional Law § 313 — commerce clause and equal protection clause — comparison of tests governing validity of state laws

4. Under commerce clause analysis, the state's interest served by a state law, if legitimate, is weighed against the burden the state law would impose on interstate commerce; in the equal protection context, however, if the state's purpose is found to be legitimate, the state law stands as long as the burden it imposes is found to be rationally related to that purpose.

SYLLABUS BY REPORTER OF DECISIONS

An Alabama statute imposes a substantially lower gross premiums tax rate on domestic insurance companies than on out-of-state (foreign) insurance companies. The statute permits foreign companies to reduce but not to eliminate the differential by investing in Alabama assets and securities. Appellant foreign insurance companies filed claims for refunds of taxes paid, contending that the statute, as applied to them, violated the Equal Protection Clause. The State Commissioner of Insurance denied the claims. On consolidated appeals to a county Circuit Court, in which several domestic

companies intervened, the statute was upheld on summary judgment. The court ruled that the statute did not violate the Equal Protection Clause because, in addition to raising revenue, it served the legitimate state purposes of encouraging the formation of new insurance companies in Alabama and capital investment by foreign insurance companies in Alabama assets and securities, and that the distinction between foreign and domestic companies was rationally related to those purposes. The Alabama Court of Civil Appeals affirmed the finding as to legitimate state purposes, but remanded for an evidentiary hearing on the issue of rational relationship. On certiorari to the Alabama Supreme Court, appellants waived their rights to such an evidentiary hearing, and the court entered judgment for the State and the intervenors on appellants' equal protection challenge to the statute.

Held: The Alabama domestic preference tax statute violates the Equal Protection Clause as applied to appellants.

(a) Under the circumstances of this case, promotion of domestic business by discriminating against nonresidents is not a legitimate state purpose. Western & Southern Life Ins. Co. v State Board of Equalization of California, 451 US 648, 68 L Ed 2d 514, 101 S Ct 2070, distinguished. Alabama's aim to promote domestic industry is purely and completely discriminatory, designed only to favor domestic industry within the State, no matter what the cost to foreign corporations also seeking to do business there. Alabama's purpose constitutes the very sort of parochial discrimination that the Equal Protection Clause was intended to prevent. A State may not constitutionally favor its own residents by taxing foreign corporations at a higher rate solely because of their residence. Although the McCarran-Ferguson Act exempts the insurance industry from Commerce Clause restrictions, it does not purport to limit the applicability of the Equal Protection Clause. Equal protection restraints are applicable even though the *effect* of the discrimination is similar to the type of burden with which the Commerce Clause also would be concerned. Pp 6–12.

(b) Nor is the encouragement of the investment in Alabama assets and securities a legitimate state purpose. Domestic insurers remain entitled to the more favorable tax rate regardless of whether they invest in Alabama assets. Moreover, since the investment incentive provision does not enable foreign insurers to eliminate the statute's discriminatory effect, it does not cure but reaffirms the impermissible classification based solely on residence.

—— So 2d ——, reversed and remanded.

Powell, J., delivered the opinion of the Court, in which Burger, C. J., and White, Blackmun, and Stevens, JJ., joined. O'Connor, J., filed a dissenting opinion, in which Brennan, Marshall, and Rehnquist, JJ., joined.

APPEARANCES OF COUNSEL

Matthew J. Zinn argued the cause for appellants.

Warren B. Lightfoot argued the cause for appellees.

Justice Powell delivered the opinion of the Court.

[1a] This case presents the question whether Alabama's domestic preference tax statute, Ala Code §§ 27-4-4 and 27-4-5 (1975), that taxes out-of-state insurance companies at a higher rate than domestic insurance companies, violates the Equal Protection Clause.

I

Since 1955,[1] the State of Alabama has granted a preference to its domestic insurance companies by imposing a substantially lower gross premiums tax rate on them than on out-of-state (foreign) companies.[2] Under the current statutory provisions, foreign life insurance companies pay a tax on their gross premiums received from business conducted in Alabama at a rate of 3 percent, and foreign companies selling other types of insurance pay at a rate of 4 percent. Ala Code § 27-4-4(a) (1975). All domestic insurance companies, in contrast, pay at a rate of only 1 percent on all types of insurance premiums. § 27-4-5(a).[3] As a result, a foreign insurance company doing the same type and volume of business in Alabama as a domestic company generally will pay three to four times as much in gross premiums taxes as its domestic competitor.

Alabama's domestic preference tax statute does provide that foreign companies may reduce the differential in gross premiums taxes by investing prescribed percentages of their worldwide assets in specified Alabama assets and securities. § 27-4-4(b). By investing 10 percent or more of its total assets in Alabama investments, for example, a foreign life insurer may reduce its gross premiums tax rate from 3 to 2 percent. Similarly, a foreign property and casualty insurer may reduce its tax rate from 4 to 3 percent. Smaller tax reductions are available based on investment of smaller percentages of a company's assets. Ibid. Regardless of how much of its total assets a foreign company places in Alabama investments, it can never reduce its gross premiums tax rate to the same level paid by comparable domestic companies. These are entitled to the 1 percent tax rate even if they have no investments in the State. Thus, the investment pro-

1. The origins of Alabama's domestic preference tax statute date back to 1849, when the first tax on premiums earned by insurance companies doing business in the State was limited to companies not chartered by the State. Act No. 1, 1849 Ala Acts 5. A domestic preference tax was imposed on and off throughout the years until 1945, when the State restored equality in taxation of insurance companies in response to this Court's decision in United States v South-Eastern Underwriters Assn. 322 US 533, 88 L Ed 1440, 64 S Ct 1162 (1944). Act No. 156, 1945 Ala Acts 196–197. In 1955, the tax was reinstated, Act No. 77, 1955 Ala Acts 193 (2d Sp Sess), and with minor amendments, has remained in effect until the present.

2. For domestic preference tax purposes, Alabama defines a domestic insurer as a company that both is incorporated in Alabama and has its principal office and chief place of business within the State. Ala Code § 27-4-1(3) (1975). A corporation that does not meet both of these criteria is characterized as a foreign insurer. § 27-4-1(2).

3. There are two exceptions to these general rules concerning the rates of taxation of insurance companies. For annuities, the tax rate is one percent for both foreign and domestic insurers, Ala Code § 27-4-4(a) (1975), and for wet marine and transportation insurance, the rate is three-quarters of one percent for both foreign and domestic insurance companies, § 27-4-6(a).

vision permits foreign insurance companies to reduce, but never to eliminate, the discrimination inherent in the domestic preference tax statute.

II

Appellants, a group of insurance companies incorporated outside of the State of Alabama, filed claims with the Alabama Department of Insurance in 1981, contending that the domestic preference tax statute, as applied to them, violated the Equal Protection Clause. They sought refunds of taxes paid for the tax years 1977 through 1980. The Commissioner of Insurance denied all of their claims on July 8, 1981.

Appellants appealed to the Circuit Court for Montgomery County, seeking a judgment declaring the statute to be unconstitutional and requiring the Commissioner to make the appropriate refunds. Several domestic companies intervened, and the court consolidated all of the appeals, selecting two claims as lead cases[4] to be tried and binding on all claimants. On cross-motions for summary judgment, the court ruled on May 17, 1982, that the statute was constitutional. Relying on this Court's opinion in Western & Southern Life Ins. Co. v State Board of Equalization of California, 451 US 648, 68 L Ed 2d 514, 101 S Ct 2070 (1981), the court ruled that the Alabama statute did not violate the Equal Protection Clause because it served "at least two purposes, in addition to raising revenue: (1) encouraging the formation of new insurance companies in Alabama, and (2) encouraging capital investment by foreign insurance companies in the Alabama assets and governmental securities set forth in the statute." App to Juris Statement 20a-21a. The court also found that the distinction the statute created between foreign and domestic companies was rationally related to those two purposes and that the Alabama Legislature reasonably could have believed that the classification would have promoted those purposes. Id., at 21a.

After their motion for a new trial was denied, appellants appealed to the Court of Civil Appeals. It affirmed the Circuit Court's rulings as to the existence of the two legitimate state purposes, but remanded for an evidentiary hearing on the issue of rational relationship, concluding that summary judgment was inappropriate on that question because the evidence was in conflict. 437 So 2d 535 (1983). Appellants petitioned the Supreme Court of Alabama for certiorari on the affirmance of the legitimate state purpose issue, and the State and the intervenors petitioned for review of the remand order. Appellants then waived their right to an evidentiary hearing on the issue whether the statute's classification bore a rational relationship to the two purposes found by the Circuit Court to be legitimate, and they requested a final determination of the legal issues with respect to their equal protection challenge to the statute. The Supreme Court denied certiorari on all claims. Appellants again waived their rights to an evidentiary hearing on the rational relationship issue and filed a joint motion with the

4. Metropolitan Life Insurance Co., a New York corporation, was chosen to represent the life insurance claimants, and Prudential Property and Casualty Co., a New Jersey corporation, was chosen as representative of the nonlife claimants. See App 314-315.

other parties seeking rehearing and entry of a final judgment. The motion was granted, and judgment was entered for the State and the intervenors. This appeal followed, and we noted probable jurisdiction. 466 US ——, 80 L Ed 2d 455, 104 S Ct 1905 (1984). We now reverse.

III

Prior to our decision in Western & Southern Life Ins. Co. v State Board of Equalization of California, supra, the jurisprudence of the applicability of the Equal Protection Clause to discriminatory tax statutes had a somewhat checkered history. Lincoln National Life Ins. Co. v Read, 325 US 673, 89 L Ed 1861, 65 S Ct 1220 (1945), held that so-called "privilege" taxes, required to be paid by a foreign corporation before it would be permitted to do business within a State, were immune from equal protection challenge. That case stood in stark contrast, however, to the Court's prior decisions in Southern R. Co. v Greene, 216 US 400, 54 L Ed 536, 30 S Ct 287 (1910), and Hanover Fire Ins. Co. v Harding, 272 US 494, 71 L Ed 372, 47 S Ct 179, 49 ALR 713 (1926), as well as to later decisions, in which the Court had recognized that the Equal Protection Clause placed limits on other forms of discriminatory taxation imposed on out-of-state corporations solely because of their residence. See, e.g., WHYY, Inc. v Glassboro, 393 US 117, 21 L Ed 2d 242, 89 S Ct 286 (1968); Allied Stores of Ohio, Inc. v Bowers, 358 US 522, 3 L Ed 2d 480, 79 S Ct 437, 9 Ohio Ops 2d 321, 82 Ohio L Abs 312 (1959); Wheeling Steel Corp. v Glander, 337 US 562, 93 L Ed 1544, 69 S Ct 1291, 40 Ohio Ops 101, 55 Ohio L Abs 305 (1949).

In Western & Southern, supra, we reviewed all of these cases for the purpose of deciding whether to permit an equal protection challenge to a California statute imposing a retaliatory tax on foreign insurance companies doing business within the State, when the home States of those companies imposed a similar tax on California insurers entering their borders. We concluded that Lincoln was no more than "a surprising throwback" to the days before enactment of the Fourteenth Amendment and in which incorporation of a domestic corporation or entry of a foreign one had been granted only as a matter of privilege by the State in its unfettered discretion. 451 US, at 665, 68 L Ed 2d 514, 101 S Ct 2070. We therefore rejected the longstanding but "anachronistic" rule of Lincoln and explicitly held that the Equal Protection Clause imposes limits upon a State's power to condition the right of a foreign corporation to do business within its borders. Id., at 667, 68 L Ed 2d 514, 101 S Ct 2070. We held that "[w]e consider it now established that, whatever the extent of a State's authority to exclude foreign corporations from doing business within its boundaries, that authority does not justify imposition of more onerous taxes or other burdens on foreign corporations than those imposed on domestic corporations, unless the discrimination between foreign and domestic corporations bears a rational relation to a legitimate state purpose." Id., at 667–668, 68 L Ed 2d 514, 101 S Ct 2070.

[1b] Because appellants waived their right to an evidentiary hearing on the issue whether the classification in the Alabama domestic preference tax statute bears a rational relation to the two purposes upheld

by the Circuit Court, the only question before us is whether those purposes are legitimate.[5]

A

(1)

The first of the purposes found by the trial court to be a 'egitimate reason for the statute's classification between foreign and domestic corporations is that it encourages the formation of new domestic insurance companies in Alabama. The State, agreeing with the Court of Civil Appeals, contends that this Court has long held that the promotion of domestic industry, in and of itself, is a legitimate state purpose that will survive equal protection scrutiny. In so contending, it relies on a series of cases, including Western & Southern, that are said to have upheld discriminatory taxes. See Bacchus Imports, Ltd. v Dias, 468 US ——, 82 L Ed 2d 200, 104 S Ct 3049 (1984); Pike v Bruce Church, Inc., 397 US 137, 25 L Ed 2d 174, 90 S Ct 844 (1970); Allied Stores of Ohio, Inc. v Bowers, supra; Parker v Brown, 317 US 341, 87 L Ed 315, 63 S Ct 307 (1943); Carmichael v Southern Coal & Coke Co. 301 US 495, 81 L Ed 1245, 57 S Ct 868, 109 ALR 1327 (1937); Board of Education v Illinois, 203 US 553, 51 L Ed 314, 27 S Ct 171 (1906).

The cases cited lend little or no support to the State's contention. In Western & Southern, the case principally relied upon, we did not hold as a general rule that promotion of domestic industry is a legitimate state purpose under equal protection analysis.[6] Rather, we held that Cali-

5. The State and the intervenors advanced some 15 additional purposes in support of the Alabama statute. As neither the Circuit Court nor the Court of Civil Appeals ruled on the legitimacy of those purposes, that question is not before us, and we express no view as to it. On remand, the State will be free to advance again its arguments relating to the legitimacy of those purposes.

As the dissent finds our failure to resolve whether Alabama may continue to collect its tax "baffling," post, at 4, we reemphasize the procedural posture of the case: it arose on a motion for summary judgment. The Court of Civil Appeals upheld the Circuit Court's ruling that the two purposes identified by it were legitimate, but the appellate court remanded on the issue of rational relationship as to those purposes because it found the evidence in conflict. In order to obtain an expedited ruling, appellants waived their right to an evidentiary hearing only as to the purposes "which the lower courts have determined to be legitimate." App to Juris St, at 2a. Thus, for this Court to resolve whether Alabama may continue to collect the tax, it would have to decide de novo whether any of the other purposes was legitimate, and also whether the statute's classification bore a rational relationship to any of these purposes—all this, on a record that the Court of Civil Appeals deemed inadequate.

6. We find the other cases on which the State relies also to be inapposite to this inquiry. Bacchus Imports, Pike, and Parker discussed whether promotion of local industry is a valid state purpose under the Commerce Clause. The Commerce Clause, unlike the Equal Protection Clause, is integrally concerned with whether a state purpose implicates local or national interests. The Equal Protection Clause, in contrast, is concerned with whether a state purpose is impermissibly discriminatory; whether the discrimination involves local or other interests is not central to the inquiry to be made. Thus, the fact that promotion of local industry is a legitimate state interest in the Commerce Clause context says nothing about its validity under equal protection analysis. See infra, at ——-——, 84 L Ed 2d 760–761.

Moreover, neither Bacchus nor Pike ruled that a State's ability to promote domestic industry was unlimited, even under the Commerce Clause. Thus, in Bacchus, although we observed as a general matter that "a State may enact laws pursuant to its police powers that have the purpose and effect of encouraging domestic industry," 468 US ——, ——, 82 L Ed 2d 200, 104 S Ct 3049 (1984), we held

taxes. See Bacchus Dias, 468 US ——, 82 104 S Ct 3049 (1984); Church, Inc., 397 US 2d 174, 90 S Ct 844 Stores of Ohio, Inc. v Parker v Brown, 317 Ed 315, 63 S Ct 307 hael v Southern Coal 01 US 495, 81 L Ed : 868, 109 ALR 1327 of Education v Illinois, 51 L Ed 314, 27 S Ct

fornia's purpose in enacting the retaliatory tax—to promote the *interstate* business of domestic insurers by deterring other States from enacting discriminatory or excessive taxes—was a legitimate one. 451 US, at 668, 68 L Ed 2d 514, 101 S Ct 2070. In contrast, Alabama asks us to approve its purpose of promoting the business of its domestic insurers in Alabama by penalizing foreign insurers who also want to do business in the State. Alabama has made no attempt, as California did, to influence the policies of other States in order to enhance its domestic companies' ability to operate interstate; rather, it has erected barriers to foreign companies who wish to do interstate business in order to improve its domestic insurers' ability to compete at home.

[2] The crucial distinction between the two cases lies in the fact that Alabama's aim to promote domestic industry is purely and completely discriminatory, designed only to favor domestic industry within the State, no matter what the cost to foreign corporations also seeking to do business there. Alabama's purpose, contrary to California's, constitutes the very sort of parochial discrimination that the Equal Protection Clause was intended to prevent. As Justice Brennan, joined by Justice Harlan, observed in his concurrence in Allied Stores of Ohio, Inc. v Bowers, 358 US 522, 3 L Ed 2d 480, 79 S Ct 437, 9 Ohio Ops 2d 321, 82 Ohio L Abs 312 (1959), this Court always has held that the Equal Protection Clause forbids a State to discriminate in favor of its own residents solely by burdening "the residents of other state members of our federation." Id., at 533, 3 L Ed 2d 480, 79 S Ct 437, 9 Ohio Ops 2d 321, 82 Ohio L Abs 312. Unlike the retaliatory tax involved in Western & Southern, which only burdens residents of a State that imposes its own discriminatory tax on outsiders, the domestic preference tax gives the "home team" an advantage by burdening *all* foreign corporations seeking to do business within the State, no matter what they or their States do.

The validity of the view that a State may not constitutionally favor its own residents by taxing foreign corporations at a higher rate solely because of their residence is confirmed by a long line of this Court's cases so holding. WHYY, Inc v Glassboro, 393 US, at 119–120, 21 L Ed 2d 242, 89 S Ct 286; Wheeling Steel Corp. v Glander, 337 US, at 571, 93 L Ed 1544, 69 S Ct 1291, 40

that in so doing, a State may not constitutionally impose a discriminatory burden upon the business of other States, merely to protect and promote local business, id., at ——, 82 L Ed 2d 200, 104 S Ct 3049. Accord Armco Inc. v Hardesty, 467 US ——, ——, 81 L Ed 2d 540, 104 S Ct 2620 (1984). Likewise, in Pike, the Court held that the state statute promoting a legitimate local interest must "regulat[e] evenhandedly." 397 US, at 142, 25 L Ed 2d 174, 90 S Ct 844.

Other cases cited by the State are simply irrelevant to the legitimacy of promoting local business at all. Carmichael relates primarily to the validity of a state unemployment compensation scheme, and Board of Education deals with the State's ability to regulate matters relating to probate. Bowers is the only one of the State's cases that involves the validity under the Equal Protection Clause of a tax that discriminates on the basis of residence of domestic *versus* foreign corporations. That case does little, however, to support the State's contention that promotion of domestic business is a legitimate state purpose. It was concerned with encouraging nonresidents—who are not competitors of residents—to build warehouses within the State. See infra, at ——-——, 84 L Ed 2d 760.

Ohio Ops 101, 55 Ohio L Abs 305; Hanover Fire Ins. Co. v Harding, 272 US, at 511, 71 L Ed 372, 47 S Ct 179, 49 ALR 713; Southern R. Co. v Greene, 216 US, at 417, 54 L Ed 536, 30 S Ct 287. See Reserve Life Ins. Co. v Bowers, 380 US 258, 13 L Ed 2d 959, 85 S Ct 951 (1965) (per curiam). As the Court stated in Hanover Fire Ins. Co., with respect to general tax burdens on business, "the foreign corporation stands equal, and is to be classified with domestic corporations of the same kind." 272 US, at 511, 71 L Ed 372, 47 S Ct 179, 49 ALR 713. In all of these cases, the discriminatory tax was imposed by the State on foreign corporations doing business within the State solely because of their residence, presumably to promote domestic industry within the State.[7] In relying on these cases and rejecting Lincoln in Western & Southern, we reaffirmed the continuing viability of the Equal Protection Clause as a means of challenging a statute that seeks to benefit domestic industry within the State only by grossly discriminating against foreign competitors.

The State contends that Allied Stores of Ohio, Inc. v Bowers, supra, shows that this principle has not always held true. In that case, a domestic merchandiser challenged on equal protection grounds an Ohio statute that exempted foreign corporations from a tax on the value of merchandise held for storage within the State. The Court upheld the tax, finding that the purpose of encouraging foreign companies to build warehouses within Ohio was a legitimate state purpose. The State contends that this case shows that promotion of domestic business is a legitimate state purpose under equal protection analysis.

[1c] We disagree with the State's interpretation of Allied Stores and find that the case is not inconsistent with the other cases on which we rely. We agree with the holding of Allied Stores that a State's goal of bringing in new business is legitimate and often admirable. Allied Stores does not, however, hold that promotion of domestic business by *discriminating* against foreign corporations is legitimate. The case involves instead a statute that *encourages nonresidents*—who are not competitors of residents—to build warehouses within the State. The discriminatory tax involved did not favor residents by burdening outsiders; rather, it granted the nonresident businesses an exemption that residents did not share. Since the foreign and domestic companies involved were not competing to provide warehousing services, granting the former an exemption did not even directly affect adversely the domestic companies subject to the tax. On its facts, then, Allied Stores is not inconsistent with our holding here that promotion of domestic business within a State, by discriminating against foreign corporations that wish to compete by doing business there, is not a legitimate state purpose. See 358 US, at 532–533, 3 L Ed 2d 480, 79 S Ct 437, 9 Ohio Ops 2d 321, 82 Ohio L Abs 312 (Brennan, J., concurring).

ırgues nonetheless

ically the primary
ıminatory taxes such as

that it is impermissible to view a discriminatory tax such as the one at issue here as violative of the Equal Protection Clause. This approach, it contends, amounts to no more than "Commerce Clause rhetoric in equal protection clothing." Brief for Appellee Ward 22. The State maintains that because Congress, in enacting the McCarran-Ferguson Act, 15 USC §§ 1011–1015 [15 USCS §§ 1011–1015], intended to authorize States to impose taxes that burden interstate commerce in the insurance field, the tax at issue here must stand. Our concerns are much more fundamental than as characterized by the State. Although the McCarran-Ferguson Act exempts the insurance industry from Commerce Clause restrictions, it does not purport to limit in any way the applicability of the Equal Protection Clause. As noted above, our opinion in Western & Southern expressly reaffirmed the viability of equal protection restraints on discriminatory taxes in the insurance context.[8]

[4] Moreover, the State's view ignores the differences between Commerce Clause and equal protection analysis and the consequent different purposes those two constitutional provisions serve. Under Commerce Clause analysis, the State's interest, if legitimate, is weighed against the burden the state law would impose on interstate commerce. In the equal protection context, however, if the State's purpose is found to be legitimate, the state law stands as long as the burden it imposes is found to be rationally related to that purpose, a relationship that is not difficult to establish. See Western & Southern, 451 US, at 674, 68 L Ed 2d 514, 101 S Ct 2070 (if purpose is legitimate, equal protection challenge may not prevail so long as the question of rational relationship is "'at least debatable'" (quoting United States v Carolene Products Co. 304 US 144, 154, 82 L Ed 1234, 58 S Ct 778 (1938)).

The two constitutional provisions perform different functions in the analysis of the permissible scope of a State's power—one protects interstate commerce, and the other protects persons[9] from unconstitutional discrimination by the States. See Bethlehem Motors Corp. v Flynt, 256 US 421, 423–424, 65 L Ed 1029, 41 S Ct 571 (1921). The effect of the statute at issue here is to place a discriminatory tax burden on foreign insurers who desire to do business within the State, thereby also incidentally placing a burden on interstate commerce. Equal protection restraints are applicable even though the *effect* of the discrimination in this case is similar to the type of burden with which the Commerce Clause also would be concerned. We reaffirmed the importance of the Equal Protection Clause in the in-

8. In fact, as we noted in Western & Southern, the legislative history of the McCarran-Ferguson Act reveals that the Act was Congress's response only to United States v South-Eastern Underwriters Assn. 322 US 533, 88 L Ed 1440, 64 S Ct 1162 (1944), and that Congress did not intend thereby to give the States any power to tax or regulate the insurance industry other than what they had previously possessed. Thus Congress expressly left undisturbed this Court's decisions holding that the Equal Protection Clause places limits on a State's ability to tax out-of-state corporations. See 451 US, at 655, n 6, 68 L Ed 2d 514, 101 S Ct 2070.

9. It is well established that a corporation is a "person" within the meaning of the Fourteenth Amendment. E.g., Western & Southern, supra, at 660, n 12, 68 L Ed 2d 514, 101 S Ct 2070.

surance context in Western & Southern and see no reason now for reassessing that view.

[1d] In whatever light the State's position is cast, acceptance of its contention that promotion of domestic industry is always a legitimate state purpose under equal protection analysis would eviscerate the Equal Protection Clause in this context. A State's natural inclination frequently would be to prefer domestic business over foreign. If we accept the State's view here, then any discriminatory tax would be valid if the State could show it reasonably was intended to benefit domestic business.[10] A discriminatory tax would stand or fall depending primarily on how a State framed its purpose—as benefiting one group or as harming another. This is a distinction without a difference, and one that we rejected last term in an analogous context arising under the Commerce Clause. Bacchus Imports, Ltd. v Dias, 468 US, at ——, 82 L Ed 2d 200, 104 S Ct 3049. See n 6, supra. We hold that under the circumstances of this case, promotion of domestic business by discriminating against nonresident competitors is not a legitimate state purpose.

B

[1e] The second purpose found by the courts below to be legitimate was the encouragement of capital investment in the Alabama assets and governmental securities specified in the statute. We do not agree that this is a legitimate state purpose when furthered by discrimination. Domestic insurers remain entitled to the more favorable rate of tax regardless of whether they invest in Alabama assets. Moreover, the investment incentive provision of the Alabama statute does not enable foreign insurance companies to eliminate the discriminatory effect of the statute. No matter how much of their assets they invest in Alabama, foreign insurance companies are still required to pay a higher gross premiums tax than domestic companies. The State's investment incentive provision therefore does not cure, but reaffirms, the statute's impermissible classification based solely on residence. We hold that encouraging investment in Alabama assets and securities in this plainly discriminatory manner serves no legitimate state purpose.

IV

[1f] We conclude that neither of the two purposes furthered by the Alabama domestic preference tax statute and addressed by the Circuit Court for Montgomery County, see supra, at 3, is legitimate under the Equal Protection Clause to justify the imposition of the discriminatory tax at issue here. The judgment of the Alabama Supreme Court accordingly is reversed, and the case is remanded for further proceedings not inconsistent with this opinion.

It is so ordered.

10. Indeed, under the State's analysis, *any* discrimination subject to the rational relation level of scrutiny could be justified simply on the ground that it favored one group at the expense of another. This case does not involve or question, as the dissent suggests, post, at ——, 84 L Ed 2d 774, the broad authority of a State to promote and regulate its own economy. We hold only that such regulation may not be accomplished by imposing discriminatorily higher taxes on nonresident corporations solely because they are nonresidents.

Justice **O'Connor,** with whom Justice Brennan, Justice Marshall and Justice **Rehnquist** join, dissenting.

This case presents a simple question: Is it legitimate for a state to use its taxing power to promote a domestic insurance industry and to encourage capital investment within its borders? In a holding that can only be characterized as astonishing, the Court determines that these purposes are illegitimate. This holding is unsupported by precedent and subtly distorts the constitutional balance, threatening the freedom of both state and federal legislative bodies to fashion appropriate classifications in economic legislation. Because I disagree with both the Court's method of analysis and its conclusion, I respectfully dissent.

I

Alabama's legislature has chosen to impose a higher tax on out-of-state insurance companies and insurance companies incorporated in Alabama that do not maintain their principal place of business or invest assets within the State. Ala Code § 27-4-4 et seq. (1975). This tax seeks to promote both a domestic insurance industry and capital investment in Alabama. App to Juris Statement 20a-21a. Metropolitan Life Insurance Company, joined by many other out-of-state insurers, alleges that this discrimination violates its rights under the Equal Protection Clause of the Fourteenth Amendment, which provides that a State shall not "deny to any person within its jurisdiction the equal protection of the laws." Appellants rely on the Equal Protection Clause because, as corporations, they are not "citizens" protected by the privileges and immunities clauses of the Constitution. Hemphill v Orloff, 277 US 537, 548–550, 72 L Ed 978, 48 S Ct 577 (1928). Similarly, they cannot claim Commerce Clause protection because Congress in the McCarran-Ferguson Act, 59 Stat 33, 15 USC § 1011 et seq. [15 USCS §§ 1011 et seq.], explicitly suspended Commerce Clause restraints on state taxation of insurance and placed insurance regulation firmly within the purview of the several States. Western & Southern Life Ins. Co. v State Board of Equalization, 451 US 648, 655, 68 L Ed 2d 514, 101 S Ct 2070 (1981).

Our precedents impose a heavy burden on those who challenge local economic regulation solely on Equal Protection Clause grounds. In this context, our long-established jurisprudence requires us to defer to a legislature's judgment if the classification is rationally related to a legitimate state purpose. Yet the Court evades this careful framework for analysis, melding the proper two-step inquiry regarding the State's purpose and the classification's relationship to that purpose into a single unarticulated judgment. This tactic enables the Court to characterize State goals that have been legitimated by Congress itself as improper solely because it disagrees with the concededly rational means of differential taxation selected by the legislature. This unorthodox approach leads to further error. The Court gives only the most cursory attention to the factual and legal bases supporting the State's purposes and ignores both precedent and significant evidence in the record establishing their legitimacy. Most trou-

bling, the Court discovers in the Equal Protection Clause an implied prohibition against classifications whose purpose is to give the "home team" an advantage over interstate competitors even where Congress has authorized such advantages. Ante, at ——, 84 L Ed 2d 759.

The Court overlooks the unequivocal language of our prior decisions. "Unless a classification trammels fundamental personal rights or is drawn upon inherently suspect distinctions such as race, religion, or alienage, our decisions presume the constitutionality of the statutory discriminations and require only that the classification challenged be rationally related to a legitimate state interest." New Orleans v Dukes, 427 US 297, 303, 49 L Ed 2d 511, 96 S Ct 2513 (1976). See, e.g., Lehnhausen v Lake Shore Auto Parts Co. 410 US 356, 35 L Ed 2d 351, 93 S Ct 1001 (1973). Judicial deference is strongest where a tax classification is alleged to infringe the right to equal protection. "[I]n taxation, even more than in other fields, legislatures possess the greatest freedom in classification." Madden v Kentucky, 309 US 83, 88, 84 L Ed 590, 60 S Ct 406, 125 ALR 1383 (1940). "Where the public interest is served one business may be left untaxed and another taxed, in order to promote the one or to restrict or suppress the other." Carmichael v Southern Coal & Coke Co. 301 US 495, 512, 81 L Ed 1245, 57 S Ct 868, 109 ALR 1327 (1937) (citations omitted). As the Court emphatically noted in Allied Stores of Ohio, Inc. v Bowers:

> "[I]t has repeatedly been held and appears to be entirely settled that a statute which encourages the location within the State of needed and useful industries by exempting them, though not also others, from its taxes is not arbitrary and does not violate the Equal Protection Clause of the Fourteenth Amendment. Similarly, it has long been settled that a classification, though discriminatory, is not arbitrary or violative of the Equal Protection Clause of the Fourteenth Amendment if any state of facts reasonably can be conceived that would sustain it." 358 US 522, 528, 3 L Ed 2d 480, 79 S Ct 437, 9 Ohio Ops 2d 321, 82 Ohio L Abs 312 (1959) (citations omitted).

See also Western & Southern Life Ins. Co. v State Board of Equalization, supra, at 674, 68 L Ed 2d 514, 101 S Ct 2070; Minnesota v Clover Leaf Creamery Co. 449 US 456, 464, 66 L Ed 2d 659, 101 S Ct 715 (1981).

Appellants waived their right to an evidentiary hearing and conceded that Alabama's classification was rationally related to its purposes of encouraging the formation of domestic insurance companies and bringing needed services and capital to the State. Thus the only issue in dispute is the legitimacy of these purposes. Yet it is obviously legitimate for a State to seek to promote local business and attract capital investment, and surely those purposes animate a wide range of legislation in all 50 States.

The majority evades the obvious by refusing to acknowledge the factual background bearing on the legitimacy of the State's purpose or to address the many collateral public benefits advanced by Alabama. Instead, the Court dismisses the

State's arguments by merely stating that they were not ruled on by the courts below. Ante, at ——, n 5, 84 L Ed 2d 758. In point of fact, the full range of purposes documented before this Court was also argued and documented before the Alabama Circuit Court. See Record, Vols VI, VII, VIII. That court found *"at least* two purposes, in addition to raising revenue: (1) encouraging the formation of new insurance companies in Alabama, and (2) encouraging capital investment by foreign insurance companies in the Alabama assets and governmental securities set forth in the statute." App to Juris Statement 20a-21a (emphasis added). As appellants concede, these purposes are simply a step in achieving the "larger set of purposes [whose] premise . . . is that domestic insurance companies, on the whole, benefit the state in ways which foreign companies do not." Brief for Appellants 31.

In any event, it is settled law that the appellee may assert any argument in support of the judgment in his favor, regardless of whether it was relied upon by the court below. Dandridge v Williams, 397 US 471, 475, n 6, 25 L Ed 2d 491, 90 S Ct 1153 (1970). The Court's failure actually to resolve whether Alabama may continue to collect its tax, see ante, at ——, n 10, 84 L Ed 2d 762, is all the more baffling, since appellants took the exceptional step of conceding the factual issues to assure a speedy resolution of numerous pending lawsuits disruptive of industry stability. See Brief for State of Alaska et al. as Amici Curiae 1–2. Our precedents do not condone such a miserly approach to review of statutes adjusting economic burdens. See, e.g. Allied Stores of Ohio, Inc. v Bowers, supra, at 528–529, 3 L Ed 2d 480, 79 S Ct 437, 9 Ohio Ops 2d 321, 82 Ohio L Abs 312; McGowan v Maryland, 366 US 420, 425, 6 L Ed 2d 393, 81 S Ct 1101, 17 Ohio Ops 2d 151 (1961); United States v Carolene Products Co. 304 US 144, 152–153, 82 L Ed 1234, 58 S Ct 778 (1938); Borden's Farm Products Co. v Baldwin, 293 US 194, 209, 79 L Ed 281, 55 S Ct 187 (1934). The Court had consistently reviewed the validity of such statutes based on whatever "may reasonably have been the purpose and policy of the State Legislature, in adopting the proviso." Allied Stores of Ohio, Inc. v Bowers, supra, at 528–529, 3 L Ed 2d 480, 79 S Ct 437, 9 Ohio Ops 2d 321, 82 Ohio L Abs 312. It is to that inquiry that I now turn.

Alabama claims that its insurance tax, in addition to raising revenue and promoting investment, promotes the formation of new domestic insurance companies and enables them to compete with the many large multistate insurers that currently occupy some 75% to 85% of the Alabama insurance market. App 80. Economic studies submitted by the State document differences between the two classes of insurers that are directly relevant to the well-being of Alabama's citizens. See id., at 46–129. Foreign insurers typically concentrate on affluent, high volume, urban markets and offer standardized national policies. In contrast, domestic insurers such as intervenors American Educators Life Insurance Company and Booker T. Washington Life Insurance Company are more likely to serve Alabama's rural areas, and to write low-cost industrial and burial policies not offered by the larger

national companies.[1] Additionally, Alabama argues persuasively that it can more readily regulate domestic insurers and more effectively safeguard their solvency than that of insurers domiciled and having their principal places of business in other states.

Ignoring these policy considerations, the Court insists that Alabama seeks only to benefit local business, a purpose the Court labels invidious. Yet if the classification chosen by the State can be shown *actually* to promote the public welfare, this is strong evidence of a legitimate State purpose. See Note, Taxing Out-of-State Corporations After Western & Southern: An Equal Protection Analysis, 34 Stan L Rev 877, 896 (1982). In this regard, Justice Frankfurter wisely observed that:

> "[T]he great divide in the [equal protection] decisions lies in the difference between emphasizing the actualities or the abstractions of legislation.
>
> "To recognize marked differences that exist in fact is living law; to disregard practical differences and concentrate on some abstract identities is lifeless logic." Morey v Doud, 354 US 457, 472, 1 L Ed 2d 1485, 77 S Ct 1344 (1957) (Frankfurter, J., dissenting).

A thoughtful look at the "actualities of [this] legislation" compels the conclusion that the State's goals are legitimate by any test.

II

The policy of favoring local concerns in State regulation and taxation of insurance, which the majority condemns as illegitimate, is not merely a recent invention of the States. The States initiated regulation of the business of insurance as early as 1851. See Report of the Comptroller General, Issues and Needed Improvements in State Regulation of the Insurance Business, GAO Report B-192813, p 5 (Oct. 9, 1979) (GAO Report). In 1944, however, this Court overruled a long line of cases holding that the business of insurance was an intrastate activity beyond the scope of the Commerce Clause. United States v South-Eastern Underwriters Assn. 322 US 533, 88 L Ed 1440, 64 S Ct 1162. "The decision provoked widespread concern that the States would no longer be able to engage in taxation and effective regulation of the insurance industry. Congress moved quickly, enacting the McCarran-Ferguson Act within a year of the decision in South-Eastern Underwriters." St. Paul Fire & Marine Insurance Co. v Barry, 438 US 531, 539, 57 L Ed 2d 932, 98 S Ct 2923 (1978). See H R Rep No 143, 79th Cong, 1st Sess, 2 (1945); 91 Cong Rec 479–480 (1945) (remarks of Sen. Ferguson); id., at 487 (remarks of Sen. Ellender).

The drafters of the Act were sensitive to the same concerns Alabama now vainly seeks to bring to this Court's attention: the greater responsiveness of local insurance com-

1. "Industrial insurance" is the trade term for a low face-value policy typically sold door-to-door and maintained through home collection of monthly or weekly premiums. Alabama currently has more industrial insurance in force than any other State. Burial insurance is another form of insurance popular in rural Alabama that is offered exclusively by local insurers. By contrast, Metropolitan Life, like many multistate insurers, has discontinued writing even whole-life policies with face values below $15,000. App 173–176.

the greater re-
cal insurance com-

panies to local conditions, the different insurance needs of rural and industrial states, the special advantages and constraints of state-by-state regulation, and the importance of insurance license fees and taxes as a major source of State revenues. See, e.g., Hearings on S 1362 before the Senate Subcommittee on the Judiciary, 78th Cong, 1st Sess, 3, 10, 16–17 (1943) (letter of Gov. Sharpe of South Dakota stressing role of domestic insurers that provide "poor man" and rural policies adapted to farming concerns); 90 Cong Rec 6564 (1944) (remarks of Rep Vorhis). "As this Court observed shortly afterward, '[o]bviously Congress' purpose was broadly to give support to the existing and future state systems for regulating and taxing the business of insurance.' Prudential Insurance Co. v Benjamin, 328 US 408, 429 [90 L Ed 1342, 66 S Ct 1142, 164 ALR 476] (1946)." St. Paul Fire & Marine Insurance Co. v Barry, supra, at 539, 57 L Ed 2d 932, 98 S Ct 2923.

The majority opinion correctly notes that Congress did not intend the McCarran-Ferguson Act to give the States any power to tax or regulate the insurance industry other than they already possessed. But the legislative history cited by the majority, ante, at ——, n 7, 84 L Ed 2d 760, relates not to differential taxation but to decisions of this Court that had invalidated State taxes on contracts of insurance entered into outside the State's jurisdiction. See H R Rep No. 143, 79th Cong, 1st Sess, 3 (1945). The Court fails to mention that at the time the Act was under consideration the taxing schemes of Alabama, Arizona, Arkansas, Illinois, Kansas, Kentucky, Maine, Michigan, Mississippi, Ohio, Oklahoma, Oregon, South Dakota, Tennessee, Texas, Washington, and Wisconsin all incorporated tax differentials favoring domestic insurers. See App 377–379.

Any doubt that Congress' intent encompassed taxes that discriminate in favor of local insurers was dispelled in Prudential Insurance Co. v Benjamin. Cf. Note, Congressional Consent to Discriminatory State Legislation, 45 Colum L Rev 927 (1945) (discussing the issues of constitutional power posed by the Act). There a foreign insurer challenged a tax on annual gross premiums imposed on foreign but not domestic insurers as a condition for renewal of its license to do business. Congress, the foreign insurer argued, was powerless to sanction the tax at issue because "the commerce clause 'by its own force' forbids discriminatory state taxation." Prudential Insurance Co. v Benjamin, 328 US 408, 426, 90 L Ed 1342, 66 S Ct 1142, 164 ALR 476 (1946). A unanimous Court rejected the argument that exacting a 3% gross premium tax from foreign insurers was invalid as "somehow technically of an inherently discriminatory character." Id., at 432, 90 L Ed 1342, 66 S Ct 1142, 164 ALR 476. The Court concluded that the McCarran-Ferguson Act's effect was "clearly to sustain the exaction and that this can be done without violating *any* constitutional provision." Id., at 427, 90 L Ed 1342, 66 S Ct 1142, 164 ALR 476 (emphasis added).

Benjamin expressly noted that nothing in the Equal Protection Clause forbade the State to enact a law such as the tax at issue. Id., at 438, and n 50, 90 L Ed 1342, 66 S Ct 1142, 164 ALR 476. In this regard the Court relied in part on Hanover Fire Ins. Co. v Harding, 272 US 494,

of insurance popular in
, offered exclusively by

-life policies with face
App 173–176.

71 L Ed 372, 47 S Ct 179, 49 ALR 713 (1926), a decision that explicitly recognized that differential taxation of revenues of foreign corporations may not be arbitrary or without reasonable basis. See Western & Southern Life Ins. Co. v State Board of Equalization, 451 US, at 664, n 17, 68 L Ed 2d 514, 101 S Ct 2070. The Commerce Clause, Benjamin emphasized, is not a "one way street" but encompasses congressional power "to discriminate against interstate commerce and in favor of local trade," "subject only to the restrictions placed upon its authority by other constitutional provisions." 328 US, at 434, 90 L Ed 1342, 66 S Ct 1142, 164 ALR 476. Where the States and Congress have acted in concert to effect a policy favoring local concerns, their action must be upheld unless it unequivocally exceeds "some explicit and compelling limitation imposed by a constitutional provision or provisions designed and intended to outlaw the action taken entirely from our constitutional framework." Id., at 435–436, 90 L Ed 2d 1342, 66 S Ct 1142, 164 ALR 476.

Our more recent decision in Western & Southern in no way undermines the force of the analysis in Benjamin. Western & Southern confirms that differential premium taxes are not immune from review as "privilege" taxes, but it also teaches that the Constitution requires only that discrimination between domestic and foreign corporations bear a rational relationship to a legitimate state purpose. Benjamin clearly recognized that differentially taxing foreign insurers to promote a local insurance industry was a legitimate State purpose completely consonant with Congress' purpose in the McCarran-Ferguson Act.

The contemporary realities of insurance regulation and taxation continue to justify a uniquely local perspective. Insurance regulation and taxation must serve local social policies including assuring the solvency and reliability of companies doing business in the State and providing special protection for those who might be denied insurance in a free market, such as the urban poor, small businesses and family farms. GAO Report 10–13; State Insurance Regulation, Hearing before the Subcommittee on Antitrust, Monopoly and Business Rights of the Senate Committee on the Judiciary, 96th Cong, 1st Sess, 19–21 (1979) (hereinafter Insurance Regulation). Currently at least 28 of the 50 States employ a combination of investment incentives and differential premium taxes favoring domestic insurers to encourage local investment of policyholders' premiums and to partially shelter smaller domestic insurers from competition with the large multistate companies. App 66.

State insurance commissions vary widely in manpower and expertise. GAO Report 14. In practice, the State of incorporation exercises primary oversight of the solvency of its insurers. Id., at 36–38. See generally Dunne, Risk, Reality, and Reason in Financial Services Deregulation: A State Legislative Perspective, 2 J Ins Reg 342 (1984) (prepared by the Conference of Insurance Legislators). See, e.g. Ala Code § 27-2-21 (Supp 1984); Ill Rev Stat, ch 73, ¶ 745 (1983); (power to examine books of domestic insurers); Ala Code § 27-32-1 et seq. (1975); Ill Rev Stat, ch 73, ¶¶ 799, 800 (1983) (commissioner's authority to assume control to prevent insolvency); see generally Wis Stat Ann, ch 620, Prefatory Commit-

ch 620, Prefatory Commit-
tee Comment—1971, pp 536, 546 (1980) (noting lesser control over nondomestic's financial operations). Even the State-of-incorporation's efforts to regulate a multistate insurer may be seriously hampered by the difficulty of gaining access to records and assets in forty-nine other States. Dunne, supra, at 356. Thus the security of Alabama's citizens who purchase insurance from out-of-state companies may depend in part on the diligence of another State's insurance commissioner, over whom Alabama has no authority and limited influence. In the event of financial failure of a foreign insurer the State may have difficulty levying on out-of-state assets. See, e.g., South Carolina ex rel Phoenix Life Ins. Co. v McMaster, 237 US 63, 73, 59 L Ed 839, 35 S Ct 504 (1915). Since each State maintains its own insurance guarantee fund, the domestic insurers of the States where a multistate insurer is admitted to do business may ultimately be forced to absorb local policyholders' losses. Dunne, supra, at 372–373.

Many have sharply criticized this piecemeal system, see, e.g., GAO Report i-iii; Schmalz, The Insurance Exemption: Can it be Modified Successfully?, 48 ABA Antitrust L J 579 (1979), but Congress has resisted suggestions that it modify the McCarran-Ferguson Act to permit greater federal intervention. See GAO Report 1; Insurance Regulation, supra. This Court cannot ignore the exigencies of contemporary insurance regulation outlined above simply because it might prefer uniform federal regulation. Given the distinctions in ease of regulation and services rendered by foreign and domestic insurers, we cannot dismiss as illegitimate the State's goal of promoting a healthy local insurance industry sensitive to regional differences and composed of companies that agree to subordinate themselves to the Alabama Commissioner's control and to maintain a principal place of business within Alabama's borders. Though economists might dispute the efficacy of Alabama's tax, "[p]arties challenging legislation under the Equal Protection Clause cannot prevail so long as 'it is evident from all the considerations presented to [the legislature], and those of which we may take judicial notice, that the question is at least debatable.'" Western & Southern Life Ins. Co. v State Board of Equalization, 451 US, at 674, 68 L Ed 2d 514, 101 S Ct 2070, quoting United States v Carolene Products Co. 304 US, at 154, 82 L Ed 1234, 58 S Ct 778. Moreover, appellants waived their right to challenge the tax measure's effectiveness.

III

Despite abundant evidence of a legitimate state purpose, the majority condemns Alabama's tax as "purely and completely discriminatory" and "the very sort of parochial discrimination that the Equal Protection Clause was intended to prevent." Ante, at ——, 84 L Ed 2d 759. Apparently, the majority views any favoritism of domestic commercial entities as inherently suspect. The majority ignores a long line of our decisions. In the past this Court has not hesitated to apply the rational basis test to regulatory classifications that distinguish between domestic and out-of-state corporations or burden foreign interests to protect local concerns. The Court has always recognized that there are certain legitimate restrictions or policies in which, "[b]y definition, dis-

crimination against nonresidents would inhere." Arlington County Board v Richards, 434 US 5, 7, 54 L Ed 2d 4, 98 S Ct 24 (1977) (per curiam). For example, where state of incorporation or principal place of business affect the State's ability to regulate or exercise its jurisdiction, a State may validly discriminate between foreign and domestic entities. See G. D. Searle & Co. v Cohn, 455 US 404, 71 L Ed 2d 250, 102 S Ct 1137 (1982) (difficulty of obtaining jurisdiction over nonresident corporation provides a rational basis for excepting such corporations from statute of limitations); Metropolitan Casualty Ins. Co. v Brownell, 294 US 580, 79 L Ed 1070, 55 S Ct 538 (1935) (domicile of insurer relevant to statute of limitations as foreign insurers offices and funds generally located outside state); Board of Education v Illinois, 203 US 553, 562, 51 L Ed 314, 27 S Ct 171 (1906) (State's greater control over domestic than foreign nonprofit corporations justifies discriminatory tax).

A State may use its taxing power to entice useful foreign industry, see Allied Stores of Ohio, Inc. v Bowers, 358 US, at 528, 3 L Ed 2d 480, 79 S Ct 437, 9 Ohio Ops 2d 321, 82 Ohio L Abs 312, or to make residence within its boundaries more attractive, see Zobel v Williams, 457 US 55, 67-68, 72 L Ed 2d 672, 102 S Ct 2309 (1982) (Brennan, J., concurring). Though such measures might run afoul of the Commerce Clause, "[n]o one disputes that a State may enact laws pursuant to its police powers that have the purpose and effect of encouraging domestic industry." Bacchus Imports, Ltd. v Dias, 468 US ——, ——, 82 L Ed 2d 200, 104 S Ct 3049 (1984); Western & Southern Life Ins. Co. v State Board of Equalization, supra, at 668, 68 L Ed 2d 514, 101 S Ct 2070. Cf. Edgar v MITE Corp. 457 US 624, 646, 73 L Ed 2d 269, 102 S Ct 2629 (1982) (Powell, J. concurring in part) (noting State's interest in protecting regionally based corporations from acquisition by foreign corporations).

Moreover, the Court has held in the dormant commerce clause context that a State may provide subsidies or rebates to domestic but not to foreign enterprises if it rationally believes that the former contribute to the State's welfare in ways that the latter do not. Hughes v Alexandria Scrap Corp. 426 US 794, 49 L Ed 2d 220, 96 S Ct 2488 (1976). Although the Court has divided on the circumstances in which the dormant Commerce Clause allows such measures, see id., at 817, 49 L Ed 2d 220, 96 S Ct 2488 (Brennan, J., dissenting), surely there can be no dispute that they are constitutionally permitted where Congress itself has affirmatively authorized the States to promote local business concerns free of Commerce Clause constraints. Neither the Commerce Clause nor the Equal Protection Clause bars Congress from enacting or authorizing the States to enact legislation to protect industry in one State "from disadvantageous competition" with less stringently regulated businesses in other States. Hodel v Indiana, 452 US 314, 329, 69 L Ed 2d 40, 101 S Ct 2376 (1981). See also Western & Southern, supra, at 669, 68 L Ed 2d 514, 101 S Ct 2070 (with congressional approval, States may promote domestic insurers by seeking to deter other States from enacting discriminatory or excessive taxes).

The majority's attempts to distinguish these precedents are unconvincing. First the majority suggests

's attempts to distin-
recedents are uncon-
the majority suggests

that a State purpose might be legitimate for purposes of the Commerce Clause but somehow illegitimate for purposes of the Equal Protection Clause. No basis is advanced for this theory because no basis exists. The test of a legitimate State purpose must be whether it addresses valid State concerns. To suggest that the purpose's legitimacy, chameleon-like, changes according to the constitutional clause cited in the complaint is merely another pretext to escape the clear message of this Court's precedents.

Next the majority asserts that "a State may not constitutionally favor its own residents by taxing foreign corporations at a higher rate solely because of their residence," citing cases that rejected discriminatory ad valorem property taxes, defended as taxes on the "privilege" of doing business. Ante, at ——, 84 L Ed 2d 759–760. See, e.g., WHYY, Inc. v Glassboro, 393 US 117, 21 L Ed 2d 242, 89 S Ct 286 (1968); Wheeling Steel Corp. v Glander, 337 US 562, 93 L Ed 1544, 69 S Ct 1291, 40 Ohio Ops 101, 55 Ohio L Abs 305 (1949); Hanover Fire Ins. Co. v Harding, 272 US 494, 71 L Ed 372, 47 S Ct 179, 49 ALR 713 (1926); Southern R. Co. v Greene, 216 US 400, 54 L Ed 536, 30 S Ct 287 (1910). These decisions were addressed in Western & Southern, and the classifications were characterized as impermissibly discriminatory because they did not "'rest on differences pertinent to the subject in respect of which the classification is made.'" 451 US, at 668, 68 L Ed 2d 514, 101 S Ct 2070, quoting Power Manufacturing Co. v Saunders, 274 US 490, 494, 71 L Ed 1165, 47 S Ct 678 (1927). As the majority concedes, none of these decisions intimates that the tax statutes at issue in the decisions rested on relevant differences between domestic and foreign corporations or had purposes other than the raising of revenue at the out-of-state corporations' expense.

In fact, the Court noted in several of these opinions that foreign corporations *may* validly be taxed at a higher rate if the classification is based on some relevant distinction. No such distinction, however, had been demonstrated or even alleged. See WHYY, Inc. v Glassboro, supra, at 120, 21 L Ed 2d 242, 89 S Ct 286 ("This is not a case in which the exemption was withheld by reason of the foreign corporation's failure or inability to benefit the State in the same measure as do domestic nonprofit corporations"); Wheeling Steel Corp. v Glander, 337 US, at 572, 93 L Ed 1544, 69 S Ct 1291, 40 Ohio Ops 101, 55 Ohio L Abs 305 ("the inequality is not because of the slightest difference in Ohio's relation to the decisive transaction"); Southern R. Co. v Greene, 216 US, at 416–417, 54 L Ed 536, 30 S Ct 287 (parties conceded that the business of the foreign and domestic corporations was precisely the same).[2] Lack-

2. The only cited authority that arguably addressed the issue raised in the instant case is a per curiam reversal and remand without opinion of a decision upholding a discriminatory ad valorem tax on a foreign insurer's fixtures and other tangible property. See Reserve Life Ins. Co. v Bowers, 380 US 258, 13 L Ed 2d 959, 85 S Ct 951 (1965). A reversal and remand is more enigmatic even than a summary affirmance, which has precedential value only as to "the precise issues necessarily presented and necessarily decided." Mandel v Bradley, 432 US 173, 176, 53 L Ed 2d 199, 97 S Ct 2238 (1977). Decisions without opinion may not be equated with "an opinion by this Court treating the question on the merits." See Edelman v Jordan, 415 US 651, 670–671, 39 L Ed 2d 662, 94 S Ct 1347 (1974).

ing the threshhold requirement of an articulated distinction relevant to an asserted purpose, the classifications at issue in these decisions could never have survived rational basis scrutiny and no such analysis was even attempted. These precedents do not answer the question posed by this case: whether a legislature may adopt differential tax treatment of domestic and foreign insurers not simply to raise additional revenue but with the purpose of affecting the market as an "instrument of economic and social engineering"? P. Hartman, Federal Limitations on State and Local Taxation § 3:2 (1981). The majority's suggestion that these cases necessarily decided the issue before us, as promotion of domestic business is "logically the primary reason for enacting discriminatory taxes such as those at issue [in the cited cases]," is mere speculation. See ante, at ——, n 6, 84 L Ed 2d ——.

In treating these cases as apposite authority, the majority again closes its eyes to the facts. Alabama does *not* tax at a higher rate solely on the basis of residence; it taxes insurers, domestic as well as foreign, who do not maintain a principal place of business or substantial assets in Alabama, based on conceded distinctions in the contributions of these insurers *as a class* to the State's insurance objectives. The majority obscures the issue by observing that a given "foreign insurance company doing the same type and volume of business in Alabama as a domestic company" will pay a higher tax. Ante, at ——, 84 L Ed 2d 755. Under our precedents, tax classifications need merely "res[t] upon some reasonable consideration of difference or policy." Allied Stores of Ohio, Inc. v Bowers, supra, at 527, 3 L Ed 2d 480, 79 S Ct 437, 9 Ohio Ops 2d 321, 82 Ohio L Abs 312. Rational basis scrutiny does not require that the classification be mathematically precise or that *every* foreign insurer or *every* domestic company fit to perfection the general profile on which the classification is based. "[T]he Equal Protection Clause does not demand a surveyor's precision" in fashioning classifications. Hughes v Alexandria Scrap Corp, 426 US at 814, 49 L Ed 2d 220, 96 S Ct 2488.

IV

Because Alabama's classification bears a rational relationship to a legitimate purpose, our precedents demand that it be sustained. The Court avoids this clear directive by a remarkable evasive tactic. It simply declares that the ends of promoting a domestic insurance industry and attracting investments to the State *when accomplished through the means of discriminatory taxation* are not legitimate state purposes. This bold assertion marks a drastic and unfortunate departure from established equal protection doctrine. By collapsing the two prongs of the rational basis test into one, the Court arrives at the ultimate issue—whether the *means* are constitution—without ever engaging in the deferential inquiry we have adopted as a brake on judicial impeachment of legislative policy choices. In addition to unleashing an undisciplined form

"Indeed, upon fuller consideration of an issue under plenary review, the Court has not hesitated to discard a rule which a line of summary affirmances may appear to have established." Fusari v Steinberg, 419 US 379, 392, 42 L Ed 2d 521, 95 S Ct 533 (Burger, C. J., concurring) (1975).

S Ct 533 (Burger, C. J.,

of Equal Protection Clause scrutiny, the Court's approach today has serious implications for the authority of Congress under the Commerce Clause. Groping for some basis for this radical departure from equal protection analysis, the Court draws heavily on Justice Brennan's concurring opinion in Allied Stores v Bowers, 358 US 522, 530, 3 L Ed 2d 480, 79 S Ct 437, 9 Ohio Ops 2d 321, 82 Ohio L Abs 312 (1959), as support for its argument that 'the Equal Protection Clause forbids a State to discriminate in favor of its own residents solely by burdening 'the residents of other states' members of our federation.'" Ante, at ——, 84 L Ed 2d 759, quoting 358 US, at 533, 3 L Ed 2d 480, 79 S Ct 437, 9 Ohio Ops 2d 321, 82 Ohio L Abs 312.

As noted in Western & Southern, Justice Brennan's interpretation has not been adopted by the Court, "which has subsequently required no more than a rational basis for discrimination by States against out-of-state interests in the context of equal protection litigation." 451 US, at 667, n 21, 68 L Ed 2d 514, 101 S Ct 2070. More importantly, to the extent the Court today purports to find in the Equal Protection Clause an instrument of federalism, it entirely misses the point of Justice Brennan's analysis. Justice Brennan reasoned that "[t]he Constitution furnishes the structure for the operation of the States with respect to the National Government and with respect to each other" and that "the Equal Protection Clause, among its other roles, operates to maintain this principle of federalism." 358 US, at 532, 3 L Ed 2d 480, 79 S Ct 437, 9 Ohio Ops 2d 321, 82 Ohio L Abs 312. Favoring local business as an end in itself might be "rational" but would be antithetical to federalism. Accepting arguendo this interpretation, we have shown that the measure at issue here does not benefit local business as an end in itself but serves important ulterior goals. Moreover, any federalism component of equal protection is fully vindicated where Congress has explicitly validated a parochial focus. Surely the Equal Protection Clause was not intended to supplant the Commerce Clause, foiling Congress' decision under its commerce powers to "affirmatively permit [some measure of] parochial favoritism" when necessary to a healthy federation. White v Massachusetts Council of Construction Employers, 460 US 204, ——, 75 L Ed 2d 1, 103 S Ct 1042, (1983). Such a view of the Equal Protection Clause cannot be reconciled with the McCarran-Ferguson Act and our decisions in Western & Southern and Benjamin.

Western & Southern established that a state may validly tax out-of-state corporations at a higher rate if its goal is to promote the ability of its domestic businesses to compete in *interstate* markets. Nevertheless, the Court today concludes that the converse policy is forbidden, striking down legislation whose purpose is to encourage the *intrastate* activities of local business concerns by permitting them to compete effectively on their home turf. In essence, the Court declares "We will excuse an unequal burden on foreign insurers if the State's purpose is to foster its domestic insurers activities in *other* States, but the same unequal burden will be unconstitutional when employed to further a policy that places a higher social value on the domestic insurer's *homestate* than interstate activities." This conclusion is

not drawn from the Commerce Clause, the textual source of constitutional restrictions on State interference with interstate competition. Reliance on the Commerce Clause would, of course, be unavailing here in view of the McCarran-Ferguson Act. Instead the Court engrafts its own economic values on the Equal Protection Clause. Beyond guarding against arbitrary or irrational discrimination, as interpreted by the Court today this Clause now prohibits the effectuation of economic policies, even where sanctioned by Congress, that elevate local concerns over interstate competition. Ante, at ——, 84 L Ed 2d ——. "But a constitution is not intended to embody a particular economic theory . . . . It is made for people of fundamentally differing views." Lochner v New York, 198 US 45, 75–76, 49 L Ed 937, 25 S Ct 539 (1905) (Holmes, J., dissenting). In the heyday of economic due process, Justice Holmes warned:

> "Courts should be careful not to extend [the express] prohibitions [of the Constitution] beyond their obvious meaning by reading into them conceptions of public policy that the particular Court may happen to entertain." Tyson & Brother v Banton, 273 US 418, 445–446, 71 L Ed 718, 47 S Ct 426, 58 ALR 1236 (1927) (Holmes, J., dissenting, joined by Brandeis, J.) (emphasis added).

Ignoring the wisdom of this observation, the Court fashions its own brand of economic equal protection. In so doing, it supplants a legislative policy endorsed by both Congress and the individual States that explicitly sanctioned the very parochialism in regulation and taxation of insurance that the Court's decision holds illegitimate. This newly unveiled power of the Equal Protection Clause would come as a surprise to the Congress that passed the McCarran-Ferguson Act and the Court that sustained the Act against constitutional attack. In the McCarran-Ferguson Act, Congress expressly sanctioned such economic parochialism in the context of state regulation and taxation of insurance.

The doctrine adopted by the majority threatens the freedom not only of the States but also of the Federal Government to formulate economic policy. The dangers in discerning in the Equal Protection Clause a prohibition against barriers to interstate business irrespective of the Commerce Clause should be self-evident. The Commerce Clause is a flexible tool of economic policy that Congress may use as it sees fit, letting it lie dormant or invoking it to limit as well as promote the free flow of commerce. Doctrines of equal protection are constitutional limits that constrain the acts of federal and state legislatures alike. See, e.g., Califano v Webster, 430 US 313, 51 L Ed 2d 360, 97 S Ct 1192 (1977); Cohen, Congressional Power to Validate Unconstitutional State Laws: A Forgotten Solution to an Old Enigma, 35 Stan L Rev 387, 400–413 (1983). The Court's analysis casts a shadow over numerous congressional enactments that adopted as federal policy "the type of parochial favoritism" the Court today finds unconstitutional. White v Massachusetts Council of Construction Employers, 460 US, at ——, 75 L Ed 2d 1, 103 S Ct 1042. Contrary to the reasoning in Benjamin, the Court today indicates the Equal Protection Clause stands as an independent barrier if

courts should determine that either Congress or a State has ventured the "wrong" direction down what has become, by judicial fiat, the one-way street of the Commerce Clause. Nothing in the Constitution or our past decisions supports forcing such an economic straight-jacket on the federal system.

V

Today's opinion charts an ominous course. I can only hope this unfortunate adventure away from the safety of our precedents will be an isolated episode. I had thought the Court had finally accepted that

> "the judiciary may not sit as a superlegislature to judge the wisdom or desirability of legislative policy determinations made in areas that neither affect fundamental rights nor proceed along suspect lines; in the local economic sphere, it is only the invidious discrimination, the wholly arbitrary act, which cannot stand consistently with the Fourteenth Amendment. New Orleans v Dukes, 427 US, at 303–304, 49 L Ed 2d 511, 96 S Ct 2513 (citations omitted).

Because I believe that the Alabama law at issue here serves legitimate State purposes through concededly rational means, and thus is neither invidious nor arbitrary, I would affirm the court below. I respectfully dissent.

Referred: Labor and Commerce
and Finance

BY THE RULES COMMITTEE BY
REQUEST OF THE GOVERNOR

IN THE SENATE

SENATE BILL NO. 379

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the premium tax for domestic insurers."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 21.09.210(b) is amended to read:

(b) Each insurer, and each formerly authorized insurer with respect to premiums received while an authorized insurer in this state, shall pay a tax on the total direct premium income received during the year ending on the preceding December 31 and paid for the insurance of property or risks resident or located in the state other than wet marine and transportation insurance, after deducting from the total direct premium income the applicable cancellations, returned premiums, the unabsorbed portion of any deposit premium, all policy dividends, unabsorbed premiums refunded to policy holders, refunds, savings, savings coupons and other similar returns paid or credited to policyholders with respect to their policies. No deductions may be made of cash surrender value of policies. Considerations received on annuity contracts are [SHALL] not [BE] included in the direct premium income and are [SHALL] not [BE] subject to tax. The tax must [SHALL] be paid to the director annually before April 1, and, except as provided in AS 21.69.390(c), is computed at the rate of

(1) [FOR DOMESTIC COMPANIES, 1 PER CENT;]

(2) for hospital and medical service corporations, 6 percent of their gross premiums, less claims paid;

(3) for companies other than [DOMESTIC AND] hospital and

medical service corporations, 3 percent.

* Sec. 2. This Act applies to the tax due by April 1, 1987 for the tax year beginning January 1, 1986 and to the tax due for subsequent tax years.

SB 379: Summary

Current law provides that domestic insurers pay a 1.5% premium tax on gross premiums, while nondomestic companies are required to pay 3%. A recent US Supreme Court case raised constitutional questions concerning the differential rate of these tax structures, and the Department of Law estimates that the state is exposed to a potential liability of approximately $14.5 million if this statute is not corrected.

BILL SUMMARY

Department of Commerce & Economic Development / POSITION PAPER

SB 379: "An Act relating to premium tax for domestic insurers."

This legislation eliminates the the tax preference currently granted to domestic insurance companies by standardizing the rate for domestic and nondomestic insurance companies.

AS 21.09.210(b) provides that domestic insurance companies pay premium tax at the rate of one and one-half percent of gross premiums, while nondomestic companies pay three percent of gross premiums. A recent U.S. Supreme Court case, Metropolitan Life Insurance Co. v. Ward, U.S., 53 U.S.L.W. 4699 (June 10, 1985), raises serious questions concerning constitutionality of the differential rate structure. This bill is proposed to correct the problem and not jeopardize our premium tax law. The bill has the further benefit of raising the total amount of premium tax collected. We are in favor of the legislation.

BILL SHEFFIELD
GOVERNOR

d379

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

January 31, 1986

The Honorable Don Bennett
President of the Senate
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Senator Bennett:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill relating to the premium tax paid by domestic insurers.

Under present law, AS 21.09.210(b) provides that domestic insurers pay premium tax at the rate of one and one-half percent of gross premiums, while nondomestic companies pay three percent of gross premiums. A recent U.S. Supreme Court case, Metropolitan Life Insurance Co. v. Ward, ___ U.S. ___, 53 U.S.L.W. 4699 (June 10, 1985), raises serious questions concerning the constitutionality of the differential rate structure. In order to correct this problem and not jeopardize our premium tax laws, this bill will eliminate the preference for domestic insurers by standardizing the rate at three percent for both categories of insurance companies. The bill has the further benefit of raising the total amount of premium taxes collected. I urge your support of this bill.

Sincerely,

Bill Sheffield
Governor

Re: SB 379 (Premium tax for domestic insurers)

Dear Chairman Zharoff:

As indicated in the governor's transmittal letter dated January 31, 1986, this bill is necessary due to a recent United States Supreme Court case, Metropolitan Life Insurance Co., v. Ward, 105 S.Ct. 1676 (1985), which calls into serious doubt the constitutionally of the present Alaska premium tax law.

Enclosed is a chart prepared from data compiled by the division of insurance, Department of Commerce and Economic Development, showing the amount of premium taxes collected by the state from foreign insurance companies between 1974 and 1984. As you can see, the state collected approximately $14.5 million in 1985, for the 1984 tax year.

We can assume this figure is a good indication of the premium amount the state will collect in future years. Foreign insurance companies, claiming the entire tax is unconstitutional, are now making their entire tax payments under protest. Thus, the state is currently exposed to possible liability in excess of $14.5 million per year until the statute is corrected. 1/

1/ A good argument can be made that if a refund is required, it should be only one-half of all taxes paid, or approximately $7.25 million annually. This represents the difference between the amount paid by the companies (three percent) and the amount they would have paid, were they domestic companies (one and one-half percent).

Given the state's declining revenues, it is very important that this bill be passed this year, to prevent possible future state losses of $7 - 14 million per year.

Sincerely,

HAROLD M. BROWN
ATTORNEY GENERAL

FROM: Jan Faiks, Senator

SUBJECT: Senate Bill 384 - Board of Electrical Examiners

As you know, the Division of Legislative Audit's performance report on the Board of Electrical Examiners recommends the board be sunset.

To this end, I want to share with you and the committee members comments I received on the audit from Kent Lee Woodman of the Alaska Independent Electrical Contractors Association. I think you will find the information helpful in your review.

FEB 25 1986

Attn: Representive H.A. "Red" Boucher.

Subject: SB 384

Dear Representive Boucher:

SB 384 was recently introduced in the Senate. If adopted this bill will extend the term or life of the board of electrical examiners. The board is due to "sun set" if some form of legislative action is not taken to extend its life, this year.

It is my hope the bill will not make it out of the Senate Labor and Commerce committee. The History of activity concerning the board of electrical examiners has been highlighted by service to special interests, obstruction to right and lawful pursuit of a better life by a large number of Alaskans, an unconscionable amount of State money totally wasted and improperly spent on acts of obstruction and destruction of Alaskan's attempting to follow the American dream of personal advancement in their lives, use of the board and department employee's by the administration to punish those not currently in its favor, outright deceit and untruthfullness by department personnel have become common practice when dealing with the Alaskan public, the board and Department are formed and pledged to serve.

Other states with boards such as ours produced simular results and in most cases their Legislatures considered the problems caused by these boards, added up the wasted cost and arrived at the conclusion to eliminate them. As you know, there are now only a hand ful of states left with our type of counter-productive license system.

As a key Alaskan Legislator and a leading member of the House Labor and Commerce committee I urge you to oppose passage of SB 384 or any other measure which would extend the life of the board of Electrical Examiners and its Department staff.

Sincerely

Charlie Bussell
CEO ABEC

Mr. Kevin Henderson
Div.of Occupational Lic.
P.O.Box D-LIC Juneau,Alaska 99811

MAR 2 1 1986

Dear Mr. Henderson,

I wish to express a complaint concerning the examination for Electrical Administrator, Inside Wiring. I realize that many persons hold this license,both by test and by a grandfather grant. However, very few have passed the last two tests given in Anchorage.

On the test of June 85, I did not have my application on file in time because I had been told by the Anchorage office-Frontier building that August 85 would be the first upcoming test. I felt something was unusual about this 'short notice' test, so wrote to Linda Janidlo at the Ombudsmans office asking to find out how many took the test and how many passed it. I wanted no names, just numbers. Received a reply dated July 9 '85 from Mr. Treager, director-division of occupational licensing stating "thirty six applicants took the examination.Because of priority work load,we cannot tell you how many passed the exam."

I have applied for and taken the last two exams of August 85 and January 86. My scores were 63% and 65.42%. This is absolutely ridiculous!! At this point I wish to state that 'in my opinion' the board of Electrical Examiners are not properly doing their job. First- evidently they are not screening all applicants properly or there would not be such a high percentage of failing test grades. Possibly they are allowing persons to take the test who have no electrical knowledge.
Secondly- if a person has the experience required to take the test, the test itself should be a mere formality. If my semi-official information is correct, on the test of January 86 there were 67 qualified applicants who took the test. 59 of these persons failed the test. Approximately 88% of the applicants failed to reach a minimum 70% score!

The real problem is that the test is unrealistic and is not designed as a measure of competency. It is designed to discourage and fail applicants. I have been informed that two gentlemen(I know them both) were paid $50.00 for each question submitted to be used for the inside wiring test. Naturally they would soon run out of legitimate questions and resort to every page of every electrical book to keep coming up with obscure questions. I am certain that I could do the same, and probably would, at that price. However, failing such a test would not make an examinee 'not qualified to do electrical work in Alaska'. By the same token, passing such trivia would not qualify an unqualified person.

I have been working in the electrical construction field for over 37 years. Began in Sept.1948 as electrical apprentice and have been at it continuosly through the ranks to electrical superintendent and electrical contractor. Still hold a electrical contractors license in California, although have been an Alaskan for the past 15 years. All this time has been as a member of I.B.E.W. and I hold a 35 year pin from same. I mention this only because it is very easy to check my credentials that way.

Also on the inside wiring test were quite a few questions pertaining to telephone and inside communications. The state has a separate license and exam for this specialty and I resent being tested for it on the inside wiring test. The questions missed and the time wasted on this portion may have contributed to my failing the test. 12 AAC 32.100 states that(person holding current license in inside wiring will be granted a license in inside communications**without examination**)

The state employees in the division of occupational licensing are not my complaint. My complaint is the actual test and the poor passing percentage.

The final blow is this. The next test after January 86 is sometime in the fall of 86. This will be after the fiscal year ends June 30 and a new $200.00 fee will be required.

Sincerely,

Paul Z. Mead

STIPULATION OF SETTLEMENT AND PROPOSED ORDER

It is hereby stipulated by and between the Department of Commerce and Economic Development, Division of Occupational Licensing, by its attorney, the Attorney General of the State of Alaska ("the Department"), and Kent Lee Woodman, Yellow Electric Company, Inc., ("the Company") and each of the Company's corporate divisions ("the Divisions") as follows:

A. On November 28, 1983, the Department issued a Temporary Cease and Desist Order under AS 08.01.087(b)(1) against Respondents. That order was amended by an Amended Temporary Cease and Desist Order dated May 24, 1984. The Amended Temporary Cease and Desist order stated, in summary, that one or more Divisions of the Company were operating under their divisional names, which names were not registered with the Department as required by AS 08.18.011. (The name of one of the corporate divisions, Yellow Electric, Ltd., is registered with the Department under AS 08.18.011.) The order further stated that Kent Lee Woodman was acting as electrical administrator for each of the Divisions of the Company.

B. Counsel for Respondents and for the Department have discussed the issues raised in the Amended Temporary Cease and Desist Order, and it is the purpose of this Stipulation and Order to provide for compromise and settlement of all issues without the necessity of proceeding to a formal hearing at which

ANCHORAGE, ALASKA 99501
PHONE: (907) 276-3550

the Respondents would have the opportunity to present a defense with regard to the allegations set forth in the Amended Temporary Cease and Desist Order.

THEREFORE, the following stipulation is agreed to and submitted for the purpose of allowing its terms to become an order of the Department.

IT IS STIPULATED AND AGREED AS FOLLOWS:

1. The Department has jurisdiction over Respondents and the subject matter contained in this Stipulation and Order and in the Amended Temporary Cease and Desist Order.

2. Respondents neither admit nor deny the allegations of wrongdoing stated in the Amended Temporary Cease and Desist Order.

3. Respondents understand that they have a right to a hearing with regard to the facts admitted in paragraph 4 below. Respondents further understand and agree that, by waiving their rights to a hearing and admitting the facts and conduct contained in paragraph 4 below, they are relieving the Department of its burden of proving these facts and conduct, and are voluntarily and knowingly giving up their right to present their defense by oral and documentary evidence, to submit rebuttal evidence, and to conduct such cross examination of witnesses as they may desire.

4. Respondents admit and agree as follows:

a. Yellow Electric Company, Inc. is an Alaska corporation in good standing;

b. Amber Electric, Ltd., Yellow Electric, Ltd., Yellow Electric Service, Yellow Electric Commercial, Yellow Electric Residential, Yellow Electric Bush, Amber Electric, Ltd., and Northern Electronics are each a corporate division of Yellow Electric Company, Inc.;

c. Each of the Divisions listed above, and the Company itself, engage in activities for which registration is required under AS 08.18.011.

DEPARTMENT OF LAW
OFFICE OF THE ATTORNEY GENERAL
ANCHORAGE BRANCH
1031 W. FOURTH AVENUE, SUITE 200
ANCHORAGE, ALASKA 99501
PHONE: (907) 276-3550

d. Yellow Electric, Ltd. is registered as a contractor under AS 08.18.011;

e. None of the Company's other Divisions is registered as a contractor under AS 08.18.011;

f. Yellow Electric Company, Inc. is not registered as a contractor under AS 08.18.011, except through the registration of its divisional name, Yellow Electric, Ltd.

5. Respondents do not deny the use of the divisional names referenced above, nor do they seriously dispute the factual allegations which were the subject of the Cease and Desist Order. Respondents disagree, however, with the Department's position that Respondents violated Alaska law by operating under unregistered divisional names. However, Respondents do not desire to contest the Department's position at a formal administrative hearing.

6. Respondents agree that:

a. Not later than five (5) business days from the effective date of this Stipulation and Order, Respondents shall have applied to transfer the registration of Yellow Electric, Ltd. to Yellow Electric Company, Inc., and to change the electrical administrator designation of Kent Lee Woodman from Yellow Electric, Ltd. and Amber Electric, Ltd. to Yellow Electric Company, Inc.;

b. Not later than September 3, 1984, all signs on any and all real and personal property owned by Yellow Electric Company, Inc., which presently display only the name of one or more Divisions, shall have been changed to show the Company name in conjunction with the divisional name: for example, "Amber Electric Ltd., a Division of Yellow Electric Company, Inc.";

DEPARTMENT OF LAW
OFFICE OF THE ATTORNEY GENERAL
ANCHORAGE BRANCH
1031 W. FOURTH AVENUE, SUITE 200
ANCHORAGE, ALASKA 99501
PHONE: (907) 276-3550

c. Not later than sixty (60) days from the effective date of this Stipulation and Order, the Respondents shall have changed all stationary and advertisements in such a way that no divisional name appears alone without the Company's name, for example, "Amber Electric, Ltd., a Division of Yellow Electric Company, Inc."

Respondents may continue using stationery currently in stock, but it must be altered, by stamp or otherwise, to clearly and conspicuously indicate that the Division is a Division of the Company. All future orders of stationery for each Division shall show the Division name only in conjunction with the Company name;

d. Any advertisements which cannot be changed within the time period specified in (c) above because of infrequency of publication or other matters beyond Respondents' control, shall be changed by Respondents at the earliest possible time;

e. Respondents shall promptly notify all persons with whom they have outstanding and uncompleted contracts under the name of any Division of the fact that the Division is a division of the Company; and

f. Respondents shall abide by the requirements of AS 08.18.011 and .051 and AS 08.40.130, and henceforth shall never use a divisional name except in conjunction with the registered corporate name.

g. Without limiting the Department's general authority to conduct investigations, Respondents and the Department agree that each of Respondents' business premises may be inspected by the Department to verify Respondents' compliance with this Stipulation and Order on three occasions occurring between September 3, 1984 and two years following the effective date of this Stipulation and Order. The Department agrees that these inspections will be con-

ducted during normal business hours, and the Respondents agree to fully cooperate in and allow the inspections. Respondents further agree to provide the Department with such other or additional assurances of Respondents' compliance with this Stipulation and Order as the Department may reasonably require.

7. The Department agrees that:

a. Respondents may properly operate under the name of a Division, if and only if the Division name is always used in conjunction with the Company's name and if and only if the Company is registered under the Company's own name; and

b. Respondents shall have the periods of time specified in paragraph 5 above to accomplish the changes described in that paragraph.

8. Nothing in this Stipulation and Order, including but not limited to paragraph 6(a) above, prohibits the Company from changing its name or that of any or all of its Divisions as may be allowed by applicable laws. However, the Respondents agree to provide the Department prior written notice of proposed name changes.

9. If, during the next two years, the Department has reasonable grounds to believe that any of the Respondents are in violation of this Stipulation and Order, the Department may initiate an action under AS 08.01.087, AS 08.40.170 and/or AS 08.18.121 against any or all of the Respondents. If, after a hearing in such an action, it is determined that this Stipulation and Order has been violated, the violation shall be grounds for suspending or revoking the registrations of or otherwise disciplining the Respondents, and/or for the issuance of a permanent cease and desist order against Respondents. These rights of the Department are in addition to, and not in lieu of, any

PROPOSED DECISION

As the parties have stipulated to a result in this matter which appears to the hearing officer to be a fair settlement, this Stipulation is adopted as the proposed decision in this matter.

DATED this 7 day of August, 1984, at Anchorage, Alaska.

Jack D. Clark

Jack D. Clark, Hearing Officer

FINAL ORDER

The Division of Occupational Licensing of the Department of Commerce for the State of Alaska, having examined the Stipulation and proposed Order dated August 7, 1984 by hearing officer Jack D. Clark, hereby adopts the Stipulation and proposed Order as its final Order in this matter.

DATED this 24 day of August, 1984, at Juneau, Alaska.

FILE: EE-84-768

TEMPORARY CEASE AND DESIST ORDER
(AS 08.01.087(b)(1)

TO: Kent Lee Woodman
Amber Electric Ltd.
1658 East 59th Avenue
Anchorage, Alaska 99507

1. As a result of an investigation conducted by the Division of Occupational Licensing it has been determined that:

You are operating an Electrical Contracting business known as "Amber Electric Ltd." without registration as a specialty or general contractor. This operation is evidenced by your advertisements as "Amber Electric Ltd" contained on pages 8, 348 and 349 of the 1983 Anchorage telephone book. This is in violation of Alaska Statute 08.18.011. Records of this division indicate that you are the electrical administrator for Yellow Electric Ltd., therefore, you cannot act as electrical administrator for both Yellow and Amber Electric. By doing so, you are also in violation of AS 08.40.130. Division records also show that you were informed by a member of this division on or about 4/1/81 that a separate contractor license and electrical administrator would be required for you to operate as "Amber Electric Ltd". Additionally, inquiry to the Department of Revenue and the Division of Corporations reveals that you have no business license for Amber Electric Ltd. nor is Amber Electric Ltd. registered as a corporation, thus constituting violation of Alaska Statutes 43.70.020 and 09.50.310 respectively.

2. Notification has been made to the members of the Board of Electrical Examiners of the proposed issuance of this Temporary Cease and Desist Order and a majority of the board members do not object to its issuance.

3. Issuance of this Temporary Cease and Desist Order is in the public interest.

IT IS THEREFORE ORDERED pursuant to AS 08.01.087(b)(1) that you immediately CEASE AND DESIST from further practice as an Electrical Administrator for Amber Electric Ltd. and from further operation of Amber Electric Ltd. until such time as you have the requisite license to do so.

4. Upon your written request within 15 days of receipt of this order a hearing will be set and thereafter a further order will be entered; if no such request is received, this order shall stand as entered.

This order is effective on receipt by you.

DATED THIS 28 DAY OF November 1983 at Juneau Alaska.

RATIONALE' AND EXPLANATION
Proposed changes: Statutes and Administrative Code

FORWARD:

In the extensive review of the statutes and regulations pertinent to this package, several changes were made simply to clarify or to clear up English errors. Such changes are NOT reviewed in the following text, as they should be obvious. The following text reveals the thinking behind each pertinent change.

* Sec 08.01.110 (2): This change moves a great deal of the Electrical licensing and related matters FROM the Department of Commerce and Economic Development, TO the Department of Labor.

  It has been discussed many times that the lines of authority, communication and enforcement sweep back and forth between these two departments with no logic at all, and often times creating confusion and duplication. This is the first of several areas where we propose that the Board of Electrical Examiners, the testing and licensing of Administrators and the Testing, licensing, inspecting and enforcement procedures for craftsmen, all fall under the same Department. We are aware of NO OTHER STATE in which such an illogical splitting of functions and authorities exists.

* Sec 08.40.130: This change would allow an Administrator with more than one license to administer for a company with each license. As an example, an Outside Communications license could be vested with a communications company, while an Inside Wiring license could be with an electrical contractor.

  We suspect that it was never the intent of the original drafters to prevent this, however, the language does stop it cold currently. Concerns for the continuity of supervision should be reduced considerably with reference to that subject in the materials which follow.

* Sec. 08.40.175: This short addition complies with the intent of HB 328.

* Sec. 08.40.195: This change would enable Administrators to extend their supervision and inspection activities to more jobs, especially concurrently, through the medium of a new technician, the MASTER JOURNEYMAN ELECTRICIAN, described below. We maintain that this section is impossible to comply with currently without several Administrators on staff and constantly traveling.

  Additionally, the law is currently written only to cover the <u>materials</u> and not the <u>installation</u> or labor. This change would fix that.

  Finally, the change would be more specific as to the duties of the Administrator, in an attempt to make it more difficult for them to be "absentee" or "leased" licenses of people who are not actively involved in the practices or final product.

  There has been considerable discussion through the years that licensing of "private" inspectors would go a long way towards resolving the extreme shortage of funds and personnel available to the state in providing standards of inspection of work to afford an acceptable level of public safety. This is especially true in higher growth areas which have no local inspection. We maintain that should such a system become possible under law, that it would be these highly qualified Master Journeymen Electricians and Electrical Administrators which would be best suited and trained. Note that application is required. This text would enable the department to initiate such a plan for the first time, thus reducing costs and concerns for public safety.

* Sec. 18.60.660. This section provides a clarification to prevent difficulties in interpreting the law concerning such items as "zero lot line" and "condominiums" where the units are multi-family, but NOT rented out to the public as with apartments and hotels.

* Sec 18.62.050(c): This change simply deletes improper references to a trade union over compatible competition, and allows both the NEC and AIECA to provide the input. Present language constitutes an illegal advantage to the union, and constitutes an unfair labor practice in law.

  This change would not restrict previous IBEW/NEC activities at all.

* 8 AAC 90.160: This whole section is designed to create a new level of technical supervisor called a MASTER JOURNEYMAN ELECTRICIAN, compatible with other states, and to fit the rationale' above under "supervision". The balance of this section simply repairs some bad language or makes the material more readable and understandable.

  NOTE the change under item (6), which again, deletes reference to the union, and makes it possible for both entities to make input.

  NOTE: new item (C) gives a little more substance to certificates of fitness from other states.

  NOTE: item (7), which was recently deleted by the legislature, is back in, but with a qualifier indicating that the only "grandfather" licenses to be considered are those of folks who have remained in the industry in some capacity, and not those who came out of hibernation after 12 years asleep and out of touch.

* 8 AAC 90.170: This is in concert with Mechanical Inspection's desires not to have to fund for and conduct the testing for the new classification. Such tests are available nationally.....from no less than IEC chapters. It places a little more formality on the important new classification, and prevents cries of "foul" in the testing and certifying to come.

* 8 AAC 90.175, 176, 177 & 178. This section introduces for the first time, the licensed signal and communications technician. Much has been said in the past about this career field. Portions of their work are covered by the NEC, and the Municipality of Anchorage is currently studying inspection of all "low voltage" work. Suffice it to say there are many unqualified and unsupervised people installing alarm, communications, data, signal and control circuits, wiring and equipment upon which the public must rely. The delay for compliance provides notice and opportunity for all to bring their operations into compliance with no undue hardship on any one individual or firm.

* 8 AAC 90.205(c) adds the material contained in Representative Robin Taylor's HB 328.

* 8 AAC 90.900 (2), (4) & (10) include language required to support the concept of licensing low voltage technicians. Item (15) includes Master Journeyman Electrician in another section that requires it, for continuity. (16) modifies the limits of a RESIDENTIAL WIREMAN: He or she would still be limited to residential work with no more than four (4) living units on a foundation....IF HE OR SHE IS IN CHARGE OF THE JOB.

  What it changes, is that if he or she works on, say an 8-plex where a Journeyman is in charge and in place, the wireman may be treated as a Journeyman for purposes of body count and apprentice ratio....i.e. not as an apprentice as it currently is.

  NOTE: This situation has been discussed many times, and there is cautious agreement in the state that wiremen on a larger residential job are journeymen for the purposes of apprentices working there as well, provided that a journeyman is in charge....but it needs put in writing.

* 12 AAC 32.250(a)(5): This section is currently up for change to require the notarized letters, which creates a real problem. Oftentimes the writers of the letters are no longer in business, perhaps even dead. Strict enforcement of such a provision would render many, many hours of work experience invalid for lots of people! This change would give the Mechanical Inspection people some freedom to validate; a practice they have been performing for several years now in unusual cases, on a form they already have.

* 12 AAC 32.320: simply adds IEC and AIECA to the list of approved sponsoring organizations for the bi-annual workshops. There is no reason in the world that they should not be included , and their exclusion at printing time simply shows the ignorance and short-sightedness of the original drafters.

* 12 AAC 32.910(2): This completes the changes required to move everything electrical out of Commerce and into Labor. Sections (4) & (10) incorporate the communications technicians for continuity. (15) Adds the Master Journeyman Electrician into the last place it needs to appear to make the new classification complete.

Respectfully submitted this 09th day of May 1985

KENT LEE WOODMAN
Director of Administration
AIECA

IN THE HOUSE BY TAYLOR

HOUSE BILL NO. ___

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to Electrical Administrators, Electrical craftsmen, and providing for an immediate effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.01.110 is amended to read:

Sec. 08.01.110. DEFFINITIONS. In this chapter

(1) "board: includes the boards and commissions listed in 08.01.010;

(2) "department" means the Department of Commerce and Economic Development, except in the case of the Board of Electrical Examiners, in which case it means the Department of Labor;

(3) "commissioner" means the commissioner of commerce and economic development, except in case of the Board of Electrical Examiners in which case it means the Commissioner of Labor;

(4) "license" means any license, certificate, permit, or registration or similar evidence of authority issued by one of the boards listed in AS 08.01.010;

(5) "licenseee" means any person who holds a license;

(6) "occupation" means any of the trades or professions for which licensure is required by one of the boards listed in AS 08.01.010.

* Section 2. AS 08.40.130 is amended to read:

Sec. 08.40.130. ADMINISTRATOR LIMITED TO ONE LICENSED CONTRACTOR. No person may qualify for or operate as an electrical administrator for more than one registered contractor with each license.

* Section 3. AS 08.40.175 is amended by adding a new subsection to read:

08.40.175(c). A person who makes an inspection for the commissioner under this section must be licensed to perform the kind of work being examined.

* Section 4. AS 08.40.195 is amended to read:

Sec. 08.40.195. (a) [PERSONAL] SUPERVISION. A person licensed under this chapter as an electrical administrator who contracts to install or repair electrical wiring, conduits, devices, fixtures, equipment or other electrical materials for transmitting, using or consuming electrical energy must [personally inspect those materials after installation and repair] establish a formal supervision system for the electrical contractor he or she represents, which develops the on-site supervision by the administrator and/or journeyman master electrician; the communications, coordination, records and system(s) required to adequately manage such construction and assure proffessional standards of electrical construction and complaince with the national Electrical Code and local amendments thereto, unless the installation or repair amounts to simple or highly standardized work performed in less than 24 man-hours by personnel generally under the supervision of the electrical administrator, or consists entirely of major component or exact system replacement.

* Section 5. AS 08.40.195 is amended by adding new subsections to read:

Sec. 08.40.195 (b) An electrical administrator who provides supervision under section (a) of this statute, shall have direct and regular contact with the inspecting and/or supervising journeyman master electrician who regularly inspects each phase of the work performed and the materials supplied. This direct and regular contact shall consist of at least a minimum of periodic review of plans and specifications, methods of construction and installation, procedures and inspection results, to assure complaince with the provisions of the National Electrical Code and all local amendments thereto.

Sec. 08.40.195 (c) An electrical administrator who provides supervision under sections (a) and (b) above, shall make periodic sampling visits to various work sites and shall maintain plans, specifications, as-built drawings and/or contract documents of all projects for at least one (1) year following completion of said project.

* Section 6. AS 18.60.610 DELEGATION OF AUTHORITY is amended by preceeding the previous text with "(a)" and adding a new paragraph.

Sec 18.60.610 (b) Upon application to the department, a person licensed and qualified as a master journeyman electrician in accordance with AS 08.40.195, AS 08.90.160, 8 AAC 90.900 and 8 AAC 32.910, and who is an electrical administrator or employed and supervised by a licensed electrical administrator in accordance with AS 08.40.90, 130, 195, 200 and 12 AAC chapter 32, may be authorized by the commissioner to inspect the electrical wiring for a public or commercial structure or a residential structure as defined in AS 18.60.660 provided, however, that such inspection is not for electrical work performed by his or her own employer. Such inspections will be documented on forms provided by the department. Authorization by the commissioner under this section constitutes a grant of full authority to act within the provisions of AS 18.60.580 - 18.60.660 with the same immunities and privileges accorded to the state in the performance of these duties. A person or entity whose electrical wiring installation is found, by the authorized inspector, not to meet the standards prescribed, has the right to appeal to the commissioner for a new inspection. The commissioner shall, within fifteen (15) days, furnish a new inspection by a designee not associated with the person, firm or utility who performed the original inspection.

* Section 7. AS 18.60.660 DEFFINITIONS is amended by adding a new paragraph to read:

Sec 18.60.660 (5) "residential structure" means buildings such as single-family and multi-family units used for residence, including condominiums.

* Section 8. AS 18.62.050 ISSUANCE AND CONTENTS OF CERTIFICATE is amended to read:

Sec 18.62.050(c). verification by an Alaska-based [labor union] <u>electrical trade association which has an apprenticeship and training program certified by the U.S. Department of Labor, Bureau of Apprenticeship and Training,</u> of <u>an applicant's</u> [member's] qualifications to meet the requirements for a certificate of fitness may be accepted in lieu of examination or other requirement for issuing a certificate[ion] under this chapter.

* Section 9. This Act takes effect immediately in accordance with AS 01.10 .070(c).

CORRISPONDING CHANGES TO AAC

ARTICLE 3. ELECTRICIAN CERTIFICATE OF FITNESS.

Section

160. Journeyman electrician/master journeyman electrician certificates of fitness

165. Electrician trainee certificate of fitness

170. Electrician Examination

175. Communications journeyman technician certificate of fitness

176. Communications technician trainee certificate of fitness

177. Communications technician examination

8 AAC 90.160. JOURNEYMAN ELECTRICIAN/MASTER JOURNEYMAN ELECTRICIAN CERTIFICATE OF FITNESS.

(a) An electrician certificate of fitness authorizes the holder to perform work which is subject to the standards established in AS 18.60.580.

(b) A[n] master journeyman electrician, journeyman electrician, journeyman power lineman, maintenance electrician or residential wireman certificate of fitness will be issued by the department upon payment of the fee required under AS 18.62.030, if the applicant respectively

(1) for MASTER JOURNEYMAN ELECTRICIAN: submits documented proof that he or she has a minimum of six (6) years' or 10,000 hours' experience in the electrical trade, of which the last two (2) years or 3,000 hours have been as a supervising and/or inspecting journeyman, and passes an examination prescribed by the department and administered at least quarterly by an approved national testing institution; an accredited apprenticeship classroom program or educational training in the electrical field may be substituted for up to six (6) months' or 1,000 hours' work experience in the trade. An additional six (6) months' or an additional 1,000 hours of formal educational training in management of people, principals of project management and/or electrical inspection may be substituted for the requirement of the last two (2) years; or

(2) [(1)] for JOURNEYMAN ELECTRICIAN: submits documented proof that he or she has a minimum of four (4) years' or 8,000 hours' experience in the electrical trade and passes an examination given by the department; an accredited apprenticeship classroom program or educational training in the electrical field may be substituted for up to six (6) months' or 1,000 hours' work experience in the trade; or

(3) [(2)] for JOURNEYMAN POWER LINEMAN: submits documented proof that he or she has a minimum of four (4) years' or 8,000 hours' experience as a power lineman and passes an examination given by the department; an accredited apprenticeship classroom program or educational training in the electrical field may ber substituted for up to six (6) months' or 1,000 hours' work experience in the trade; or

(4) for MAINTENANCE ELECTRICIAN: submits documented proof that he or she has a minimum of three (3) years' or 6,000 hours' experience as a maintenance electrician and passes an examination given by the department; an accredited apprenticeship classroom program or educational training in the electrical field may be substituted for up to three (3) months' or 500 hours' work experience in the trade; or

(5) [(3)] for RESIDENTIAL WIREMAN: submits documented proof that he or she has a minimum of two (2) years' or 4,000 hours' experience as a residential wireman and passes an examination given by the department; an accredited apprenticeship classroom program or educational training in the electrical field may be substituted for up to three (3) months' or 500 hours' work experience in the trade; or

(6) [(5)] presents to the department, on a form provided by the department, a sworn affidavit from an official of an Alaska-based [union] electrical trade association which has an Apprenticeship Training Program certified by the U.S. Department of Labor, Bureau of Apprenticeship and Training, which shows that the applicant meets the experience requirements set forth in paragraphs (1), (2), (3), (4) or (5) of this section, and passes an examination given by the department; the affidavit must specify

(A) the number of qualifying hours experience the applicant claims for the classification for which he or she seeks certification; apprenticeship hours must be noted if this time is being used for qualification; and

(B) the inclusive dates during which the hours claimed in (A) of this paragraph were worked.

(C) Compatible certificates properly issued in other States with experience and testing requirements which are the same or substantially the same as those required in Alaska, may be accepted by the department to substantitate hours and/or experience for the purposes of qualifying to take the applicable examinations.

(7) [(6)] presents documented proof that he or she was actively engaged in the respective work catagory of the electrical trade in the state for one or more years before January 1, 1973, provided, however, that the person has maintained a continuous, licensed presence in the electrical field from that time to the of application.

8 AAC 90.170. ELECTRICIAN EXAMINATION. (a) Examinations for journeyman electrician, journeyman power lineman, maintenance electrician and residential wireman are available by appointment at the offices of the division in Juneau, Anchorage and Fairbanks. Arrangements for examinations in other [places] locations may be made [by writing the Anchorage office or] by contacting any office of the division.

(b) Examinations for master journeyman electrician shall be conducted at least quarterly by a national testing institute, as prescribed by the department. Arrangements for testing shall be made in the same manner as noted above.

(c) [(b)] A person who fails to pass the examination given by the department may be reexamined after thirty (30) days following the date of the most recent examination. A person who fails to pass the examination for master journeyman electrician, may be reexamined at the next quarterly examination if he or she applies in a timely manner.

8 AAC 90.165. ELECTRICIAN TRAINEE CERTIFICATE OF FITNESS.

- no changes to this section -

8 AAC 90.175. COMMUNICATIONS JOURNEYMAN TECHNICIAN CERTIFICATE OF FITNESS. (a) A communications technician certificate of fitness authorizes the holder to perform work which is subject to the standards established in AS 18.69.580.

(b) A journeyman communications technician or communications technician certificate of fitness will be issued by the department upon payment of the fee required by AS 18.62.030, if the applicant respectively

(1) for JOURNEYMAN COMMUNICATIONS TECHNICIAN: submits proof that he or she has a minimum of four (4) years' or 8,000 hours' experience in the electrical/communications trade and passes an examination given by the department; an accredited apprenticeship classroom program or educational training in the electrical/communications field may be substituted for up to six (6) months' or 1,000 hours' work experience in the trade; or

(2) for COMMUNICATIONS TECHNICIAN: submits proof that he or she has a minimum of two (2) years' or 4,000 hours' experience in the electrical/communications trade and passes an examination given by the department; an accredited apprenticeship classroom program or educational training in the electrical/communications field may be substituted for up to three (3) months' or 500 hours' work experience in the trade; or

(3) presents to the department, on a form provided by the department, a sworn affidavit from an official of an Alaska-based electrical/communications trade association having an apprenticeship training program certified by the U.S. Department of Labor, Bureau of Apprenticeship & Training, which shows that the applicant meets the experience requirements set forth in paragraphs (1) or (2) of this section and passes an examination given by the department; the affidavit must specify

(A) the number of qualifying hours experience the applicant claims for the classification for which he or she seeks certification; apprenticeship hours must be noted if this time is being used for qualification; and

(B) the inclusive dates during which the hours claimed in (A) above were worked;

(4) OR submits documented proof that he or she was actively engaged in the respective work catagory of the electrical/communications trade in the state for one or more years before 15 May 1985.

8 AAC90.176 COMMUNICATIONS TECHNICIAN TRAINEE CERTIFICATE OF FITNESS.

(1) A communications technician trainee certificate of fitness authorizes the holder to perform work which is subject to the standards established in AS 18.60.580 and performed under the conditions set out under this section.

8 AAC 90.177. COMMUNICATIONS TECHNICIAN EXAMINATION.

(1) Examinations for journeyman communications technician and communications technician are available by appointment at the offices of the division in Anchorage, Fairbanks and Juneau. Arrangements for examinations in any location may be made by contacting any office of the division.

(b) A person who fails to pass the examination given by the department may be reexamined after thirty (30) days following the date of the most recent examination.

8 AAC 90.178. COMPLIANCE.

Compliance with the various provisions of communication technician licensing is required by 01 January 1987.

8 AAC 90.180, 185 RENEWAL AND REVOCATION OF CERTIFICATES OF FITNESS.

- no changes to this section -

8 AAC 90.190. APPEALS.

- no changes to this section -

8 AAC 90.205. RIGHT OF INSPECTION. (a) An inspector must be given free access during reasonable hours to any premises where plumbing or electrical work subject to the standards established in AS 18.60.580 and AS 18.60.705 is being performed.

(b) The inspector may request any person performing work for which a certificate of fitness is required, to present [exhibit] the certificate of fitness. (c) The inspector may immediately serve upon a person performing work without a certificate of fitness, a notice to cease any further work for which a certificate is required, until a certificate of fitness appropriate to the job is obtained from the department. The inspector will serve a copy of the notice on the worker's employer.

(d) An inspector performing inspections under this section shall be licensed for the kind of work being examined or inspected.

8 AAC 90.900 DEFINITIONS.

(note: Item (1) remains unchanged)

(2) "apprentice" means a worker at least sixteen (16) years of age who is employed to learn a skilled trade through participation in a systematic form of instruction and on-the-job work experience designed to provide the worker with knowledge of the theoretical and technical subjects related to the communications, electrical or plumbing trade;

(Note: Item (3) remains unchanged)

(4) "communications technician" means a person who performs work necessary to the installation and construction of communicatos control, alarm, data and other low voltage circuits as defined by the National Electrical Code, and equipment within buildings and within property lines, restricted to residential units, or commercial structures of two (2) stories or less, acting in the position of supervising technician for that project. Communications technicians shall be considered as "journeymen" for purposes of apprentice ratios on larger projects where a journeyman communications technician is supervising.

(Note: old numbers (4) through (8) remain unchanged except that their numbering sequence is increased by one for the above.)

(10) "journeyman communications technician" means a person who performs work necessary to the installation and construction of communications, control, alarm, data and other low voltage circuits as defined by the National Electrical Code, and equipment within buildings and within property lines of any given property; the term does not include a person performing electrical or electrical line work in buildings, in underground or overhead construction.

(Note: old numbers (9) through (13) remain unchanged except that their numbering sequence is increased by two for the above)

(15) "master journeyman electrician" means a person who performs all the duties and functions noted for "journeyman electrician" in item (11) above, plus certain supervisory and inspection functions in accordance with AS 08.40.195 and AS 16.60.610. The master journeyman electrician provides project management, personnel supervision and inspection of electrical projects for compliance with the National Electrical Code and local amendments thereto.

(16) [14] "residential wireman" means a person who performs work necessary to the installation, construction, and operation of residential electrical systems, beginning at the point of attachment of the service drop or the service laterial on the load side of the meter, and whose work as a supervising journeyman is limited to residential occupancies providing for no more than four (4) residential units on a common foundation, or as a non-supervisory journeyman on residential units of more than four (4) units on a common foundation;

(Note: Old number 15 remains unchanged except that it is now advanced to number (17) because of the new items above)

* Article 7: APPLICATIONS:

12 AAC 32.250(a) (5) notarized certificate in support of applicant's experience and qualifications, or letters of recommendation that have been substantiated and documented during reference checks, for licensure as an electrical administrator from three (3) persons licensed in any state in the electrical industry.

* Article 8: CONTINUING EDUCATION:

12 AAC 32.320. APPROVED WORKSHOPS. (a) To be approved by the board, the subject material of a continuing education workshop must cover the most recent published edition of the National Electrical Code or the most recent published edition of the National Electrical Safety Code.

(b) Continuing education workshops sponsored by the following are approved by the board if they meet the requirements of (a) of this section:

(1) National Electrical Contractors Association;

(2) International Brotherhood of Electrical Workers;

(3) International Association of Electrical Inspectors; and

(4) Independent Electrical Contractors, Inc; and

(5) Alaska Independent Electrical Contractors Association.

* Article 9: DEFINITIONS. 12 AAC 32.910. DEFINITIONS. In this chapter

(1) "board" means the Board of Electrical Examiners.

(2) "communications technician" means a person who has at least two (2) years' or 4,000 hours' experience in the communications technicial wiring field and holds or is otherwise entitled to hold a certificate of fitness issued by the Department of Labor under AS 18.62.

(3) [(2)] "department" means the Department of Labor [Department of Commerce and Economic Development]

(4) [(3)] "four-plex" means a building containing four (4) dwelling units erected on a common foundation.

(5) "journeyman communications technician" means a person who has at least four (4) years' or 8,000 hours' experience in the communications technicial wiring field and holds or is otherwise entitled to hold a certificate of fitness issued by the Department of Labor under AS 18.62.

(6) [(4)] "journeyman lineman" or "journeyman electrician" means a person who has at least four (4) years' or 8,000 hours' experience in the electrical trade as described in AS 08.40.200(3) and

(A) holds a certificate of fitness as issued by the Department of Labor under AS 18.62; or

(B) meets all of the qualifications for receipt of a certificate of fitness and has applied for but not yer received, the certificate;

(7) "master journeyman electrician" means a person who is qualified and licensed as in item (6) above, and who has an additional two (2) years' or 2,000 hours' field experience in supervision and inspection, together with completion of special examinations provided by the department.

(Note: old numbers (6) through (9) are unchanged except that each receives a higher number to accomodate the changes above)

end end end end

COMMENTS ON PROPOSED LABOR REGULATION CHANGES

VERBAL TESTIMONY 04 NOVEMBER 1985

MY NAME IS KENT LEE WOODMAN. I AM THE DIRECTOR OF ADMINISTRATION FOR THE ALASKA INDEPENDENT ELECTRICAL CONTRACTORS ASSOCIATION, AND ADMINISTRATOR FOR COMMONWEALTH, LTD. OF ANCHORAGE.

THOUGH OUR ASSOCIATION DID NOT RECEIVE THE PROPOSED RULE MAKING, SUFFICIENT LICENSED ADMINISTRATORS AND CRAFTSMEN DID SO THAT WE BECAME AWARE OF THE TEXT OF THE PROPOSED CHANGES ON MONDAY 14 OCTOBER 1985.

PRIOR TO A TECHNICAL DISCUSSION OF EACH OF THE SEVERAL CHANGES, WE HAVE SEVERAL COMMENTS AND A QUESTIONS.

QUESTIONS: WHAT HAS HAPPENED TO THIS ASSOCIATION'S SUGGESTED CHANGES? SOME OF THEM PARALLEL THESE, BUT DIG DEEPER INTO A TOTAL REPAIR. OUR MASTER JOURNEYMAN ELECTRICIAN SUGGESTION WAS CAREFULLY THOUGHT OUT AND PRESENTED. OUR WORK WAS DONE IN TEDIOUS DETAIL AND PRESENTED LOGICALLY, CORRECTLY AND IN A FORMAT WHICH WAS TOTALLY COMPATIBLE WITH THE REGULATIONS AND THE PROCESSES INVOLVED IN SUCH CHANGES.

WHERE DID THESE PROPOSED CHANGES COME FROM? WHO INITIATED THEM? WERE ALL THE SUGGESTIONS INCORPORATED? IS THERE MORE? HOW DO THEY RELATE TO OUR SUGGESTIONS? WHY WAS THE U.S. DEPARTMENT OF LABOR, BUREAU OF APPRENTICESHIP AND TRAINING NOT NOTIFIED OF THE PROPOSED CHANGES?

COMMENTS: AS USUAL, THESE PROPOSED CHANGES APPENDED ABSOLUTELY NO EXPLANATION, RATIONALE' OR DISCUSSION. AS A RESULT, THE PROPOSED CHANGES RAISE AS MANY OR MORE QUESTIONS THAN THEY PROPOSE TO RESOLVE. ADDITIONALLY, AS 18.60.580 IS REFERENCED AS A NEW AREA TO BE IMPLEMENTED. MOST ELECTRICIANS WILL NOT HAVE THIS STATUTE ON FILE, NECESSITATING SEVERAL HUNDRED TRIPS TO THE LAW LIBRARY FOR A COPY. IT IS ONLY ONE PAGE AND COULD HAVE BEEN EASILY INCORPORATED IN THE MAILING, FACILITATING FAR BETTER RESPONSE FROM A TRADE WHICH IS AT ABSOLUTE MAXIMUM WORK SATURATION AT THIS TIME.

FAILURE TO INCLUDE A COPY WITH THE RULE CHANGE, ALONG WITH FAILURE TO PROVIDE ANY DISCUSSION OR JUSTIFICATION FOR THE CHANGES, IS EITHER CALCULATED TO PRODUCE THE MINIMUM INPUT, OR AT BEST, HAS PRECISELY THAT EFFECT. AS A RESULT, THE ONLY PEOPLE WHO HAVE THE WHEREWITHALL TO RESPOND WILL MOST LIKELY BE AIECA AND NECA. NOT VERY REPRESENTATIVE. FAILURE TO NOTICE THE BAT APPARENTLY EXCLUDES ONE OF THE MOST INTERESTED PARTIES, IN VIOLATION OF THE INTENT AND SPIRIT [illegible] OF THE ALASKA ADMINISTRATIVE CODE, IF NOT THE LETTER OF THE CODE.

INDIVIDUAL COMMENTS:

8 AAC 90.115 (A) & (B): WE ASSUME THAT THESE TWO NEW SECTIONS ARE INSERTED HERE FOR SOME HOUSECLEANING PURPOSE, AND SUBJECT TO ACCEPTANCE OF THE ENTIRE CONCEPT,WE HAVE NO SPECIFIC OBJECTION.

8 AAC 90.130 THROUGH .150: THESE SECTIONS RELATE TO THE PLUMBING FIELD, IN WHICH WE HAVE NO EXPERTISE. WE HAVE NO COMMENTS.

8 AAC 90.160(B): THIS CHANGE NOT ONLY ALLOWS INCLUSION OF THE NEW PROPOSED CATAGORIES, BUT ALSO STRAIGHTENS OUT SOME HERETOFOR TEDIOUS AND CONFUSING LANGUAGE. SUBJECT TO COMMENTS ON THE NEW CATAGORIES THEMSELVES, WE APPROVE OF THIS CHANGE.

8 AAC 90.160(C) MINIMUM QUALIFICATIONS: WE HAVE NO SPECIFIC OBJECTION TO FURTHER REFINING THE CONTENT OF THE EXPERIENCE REQUIRED OF NEWLY LICENSED JOURNEYMEN, BUT WE ARE GREATLY CONCERNED WITH HOW YOU PLAN TO HANDLE <u>PRESENTLY LICENSED</u> JOURNEYMEN.

A. WHAT WILL PRESENTLY LICENSED JOURNEYMEN (OR THOSE WHO ARE LICENSED BY THE TIME THESE CHANGES TAKE EFFECT) BE REQUIRED TO DO TO RETAIN OR TO RENEW THEIR LICENSES?

B. WHAT TIME FRAME WILL APPLY TO THE PRESENT JOURNEYMEN'S COMING INTO COMPLIANCE?

C. IF A PRESENTLY LICENSED JOURNEYMAN HAS SAY 12,000 HOURS, BUT LACKS 200 IN LOW VOLTAGE APPLICATIONS, WHAT WILL HE OR SHE DO UPON RENEWAL?

D. WILL FULLY QUALIFIED JOURNEYMEN BE ABLE TO PERFORM THE FUNCTIONS OF THE NEWLY PROPOSED TITLES OF LOW VOTAGE SIGN AND ELEVATOR ELECTRICIANS IN A MANNER SIMILAR TO A JOURNEYMAN BEING ABLE TO PERFORM LOW VOLTAGE AND RESIDENTIAL WIREMAN TASKS PRESENTLY?

E. WHAT WILL PRESENT LOW VOLTAGE TECHNICIANS DO THE MOMENT THESE REGULATIONS BECOME EFFECTIVE? WHAT IS THE PHASE-IN TIME PERIOD? HOW WILL IT BE HANDLED?

F. WE WERE GIVEN TO UNDERSTANT THAT THE MAINTENANCE ELECTRICIAN WAS A POSITION WHICH CAUSED SOME DIFFICULTIES WITH FIELD ENFORCEMENT AND THAT THERE WAS INTEREST IN DELETING THE TITLE. IS THIS NOT THE BEST TIME TO DO SO?

G. WHAT IS THE PURPOSE AND CONCEPT BEHIND CREATING THESE NEW POSITIONS? ARE WE NOT, IN FACT, JUST GOING ALONG AND MAKING THE PRESENT SITUATION LEGAL? IF THIS IS SO, IS THAT PROPER JUSTIFICATION? WHAT OTHER STATES HAVE EXPERIENCE WITH THESE MANY CLASSIFICATIONS?

8 AAC 90.165 (A) & (B): WE HAVE NO DIFFICULTY WITH THESE CHANGES, WHICH APPEAR LARGELY HOUSEKEEPING.

8 AAC 90.165 (C): WE HAVE A GREAT DEAL OF DIFFICULTY WITH ANY PROPOSED CHANGE TO THE RATIO OF JOURNEYMEN TO APPRENTICE AS SHOWN! WE HAVE BEEN PRESENTED WITH ABSOLUTELY NO RATIONALE', EXPLANATION, OR EXCUSE FOR THIS RATIO TO BE TIGHTENED. IT APPEARS TO BE A CLEAR AND BLATANT EFFORT TO MAKE ALL PRIVATE TRADE WORK COMPLY WITH THE INFLATED AND GREEDY CONDITIONS OF DAVIS BACON JOBS.

A. A LICENSED, EXPERIENCED JOURNEYMAN CAN EASILY HANDLE AND SUPERVISE TWO (2) OR MORE APPRENTICES IN THE TYPICAL WORK ENVIRONMENT. FOR THOSE SPECIFIC INDIVIDUALS OR JOBS WHERE SUCH A CONDITION IS NOT LOGICAL, SUPERINTENDANTS MAY SIMPLY LIMIT THE PARTICULAR CIRCUMSTANCES; NO REGULATIONS NEED BE PROMULGATED.

B. FORCING THE LOWER RATIO OF APPRENTICE TO JOURNEYMAN WILL RAISE THE COST OF ALL ELECTRICAL WORK DONE IN THE STATE, FOR NO EFFECTIVE PURPOSE WHATSOEVER.

C. MOST INDEPENDENT SHOPS HAVE ON THEIR EMPLOYMENT, A RATIO SIMILAR TO THE PRESENT AUTHORIZATION OF TWO-TO-ONE. IMPOSITION OF SUCH AN UNNATURAL LIMITATION NOW WOULD FORCE THEM TO DISCHARGE "SURPLUS" APPRENTICES, WHO WOULD THEN BE ON THE JOBLESS MARKET TO BE SUPPORTED BY THE STATE.

D. AIECA'S APPROVED APPRENTICESHIP TRAINING PROGRAM CURRENTLY HAS ENROLLED ALMOST 75 APPRENTICES IN VARIOUS LEVELS OF TRAINING. SOME OF THEM ARE NOT YET EMPLOYED, BUT ARE IN THE COURSES SEEKING EMPLOYMENT. (IMPOSITION OF THIS ARTIFICIAL LIMITATION WOULD RENDER THE PROGRAM IN COMPLETE DISARRAY, TO NO ONE'S BENEFIT BUT PERHAPS THE IBEW.)

E. PRESENTLY SHOPS BID WORK BASED UPON THE PRESENT RATIO, ENABLING PORTIONS OF THE WORK TO BE BID AT LOWER RATES THAN JOURNEYMAN. SUCH A NEW LIMITATION WOULD HAVE THE IMMEDIATE IMPACT OF RAISING THE COST TO HOME AND COMMERCIAL BUILDERS, FOR NO APPARENT GAIN OR REASON.

F. AIECA ANTICIPATES THAT THE PROPOSAL HAS EITHER COME FROM THE IBEW, NECA OR SOMEONE WITH SUCH LEANINGS. FOR JUSTIFICATION, WE'D SUSPECT THAT SAFETY AND QUALITY CONTROL ARE URGED. TO THIS WE'D REPLY: "SHOW US SOME ACCIDENT HISTORY; SHOW US SOME QUALITY CONTROL STUDIES THAT DIRECTLY RELATE TO THE RATIOS AND WE CAN ALL SIT DOWN AND GO THRU THEM TOGETHER."

WE FLATLY AND EMPHATICALLY REJECT THIS TRANSPARENT ATTEMPT TO RAISE INDEPENDENT COSTS AND PRICES FOR NO REAL REASON.

HAND OUT A DEMONSTRATES COST INCREASES.
HAND OUT B DEMONSTRATES THE EFFECT ON A SMALL SHOP.

8 AAC 90.170: WE HAVE NO DIFFICULTY WITH THIS REPEAL. IT APPEARS TO BE COUPLED WITH 90.115, COVERED AT THE BEGINNING OF THIS REPORT.

8 AAC 90.180: WE HAVE NO DIFFICULTY WITH THIS IN GENERAL, EXCEPT THAT (B)((3) MAKES REFERENCE TO A STATUTE NOT INCLUDED IN THE PACKAGE, AND NOT INCORPORATED IN EITHER OF THE DEPARTMENT'S PUBLISHED BOOKLETS. AS 18.62.580 ONLY DIRECTS THAT THE STATE'S STANDARDS ARE THE NATIONAL ELECTRICAL CODE AND THE NATIONAL ELECTRICAL SAFETY CODE. THERE IS NO REFERENCE TO WHETHER THE TRAINING SHALL BE RECURRENT TRAINING, UPGRADE TRAINING, BASIC STUDY, NEW CODE FAMILIARIZATION OR SOME MIX OF THE ABOVE. EVEN ARTICLE 8, 12 ACC RELATING TO CONTINUING EDUCATION FOR ADMINISTRTORS, GIVES B SLIGHT ADDITIONAL CLARIFICATION. THIS SECTION NEEDS SPECIFICS. HANDOUT C TO THIS DISCUSSION IS OUR RECOMMENDATION OF SOME SAMPLE WORDING.

THE AREA BRINGS UP SEVERAL QUESTIONS:

A. IF A PRESENT JOURNEYMAN CAN PERFORM THE FUNCTIONS OF EACH OF THE THREE NEW TITLES, MUST HE OR SHE THEN AMASS 24 HOURS OF TRAINING (8 IN EACH AREA) FOR HIS OR HER RENEWAL?

B. MAY A PRESENT JOURNEYMAN RENEW AND PERFORM IN ONE OR TWO OF THE CLASSIFICATIONS?

C. HOW WILL SUCH A JOURNEYMAN BE IDENTIFIED FOR INSPECTION AND JOB PERFORMANCE?

(WE'D NOTE THAT OUR PROPOSED MASTER JOURNEYMAN ELECTRICIAN IS ONE EASY WAY TO MEET THIS DIFFICULTY)

D. ARE THE 8 HOURS OF TRAINING FOR EACH YEAR OF A $40.00 CERTIFICATE, ANNUALLY, OR FOR EVERY 3 YEARS FOR A $75.00 CERTIFICATE, IAW AS 18.62.030?

E. ARE THE 8 HOURS OF TRAINING THE SAME FOR THE PRESENT JOURNEYMAN AND THE 3 NEW CLASSES?

F. ARE THE 8 HOURS APPLICABLE TO RESIDENTIAL ELECTRICIAN?

5-5-5-5-5

8 AAC 90.185 (4): WE HAVE A GREAT DEAL OF TROUBLE WITH THIS NEW LINE, AND WE PROJECT THAT YOU WILL ALSO. IT IS FAR TOO BROAD; GIVES MUCH TOO MUCH POWER TO THE FIELD WITH VIRTUALLY NO RESTRICTIONS. WE PROJECT THAT EVEN WITH THE BEST OF PEOPLE ON BOARD, THERE WILL BE BREAKDOWNS IN COMMUNICATION AND CONTROL AND THERE WILL BE ABUSES OF THIS SECTION.

WE FURTHER PROJECT THAT SHOULD SUCH AN ABUSE BE APPEALED THAT THIS REGULATION WILL BE STRUCK DOWN SUMMARILY AS UNCONSTITUTIONALLY BROAD. NOTE THAT MUCH MORE TIGHTLY WRITTEN REGULATIONS AND STATUTES THAN THIS HAVE BEEN SO STRUCK DOWN.

IT HAS ALL THE APPEARANCES OF A POWER GRAB. IT IS NOT REQUIRED, IT IS OVERLY GRABBY AND IS MOST LIKELY ILLEGAL.

8 AAC 90.900: WE HAVE SEVERAL PROBLEMS WITH THIS SECTION.

(1) "ACCREDITED". WE RESENT THIS DILLUTION OF THE ACCREDITATION PROCESS TO ENABLE COURSES OFFERED BY UNIVERSITIES, COMMUNITY COLLEGES, HIGH SCHOOLS, AND VOCATIONAL REHABILITATION SHOPS TO AUTOMATICALLY ACHIEVE THE SAME HIGH STATUS AS THOSE SCHOOLS ADMITTED UNDER THE U.S. DEPARTMENT OF L[illegible] BUREAU OF APPRENTICESHIP AND TRAINING.

THIS BUREAU HAS CONSIDERABLE AND NATIONAL CREDABILITY. TO TAKE A TIGHTLY CONTROLLED PROGRAM AND OPEN IT UP TO THE WORLD WITHOUT ANY CRITERIA, NO COURSE CONTENT, NO MINIMUM HOURS OF TRAINING, NO PROSPECTUS OR THE LIKE IS SO FOOLHEARDY AS TO MAKE READERS WONDER WHERE THE AUTHOR'S HEAD WAS. WHAT COULD POSSIBLY BE THE JUSTIFICATION FOR SUCH AN EDUCATIONAL CASTRATION?

ADDITIONALLY, THE BUREAU OF APPRENTICESHIP AND TRAINING WAS NOT SERVED OR CONSULTED ON THIS MASSIVE CHANGE; A REGRETTABLE OMISSION OF MAJOR PROPORTION.

(9) "JOURNEYMAN". AGAIN YOU HAVE MADE REFERENCE TO A STATUTE WHICH IS NOT NORMALLY IN THE ELECTRICIAN'S LIBRARY. IT ALSO APPEARS OVERLY BROAD AND OPEN-ENDED - NEEDS SPECIFICS.

(9)(A) CHANGING "THE TRANSFORMER" TO "PAD-MOUNTED TRANSFORMER" IS A CHANGE THAT DEFIES LOGIC AND OUR UNDERSTANDING. IT WOULD HAVE THE EFFECT OF MOVING TRANSFORMER VAULTS AND POLE MOUNTED TRANSFORMERS TO SOME OTHER CLASS OF CRAFTSMAN. WHY IS THIS SOUGHT? WHO PROPOSED IT? WHAT IS IT SUPPOSED TO ACCOMPLISH?

WE OBJECT BECAUSE IT WOULD REMOVE HISTORICALLY ACCOMPLISHED WORK FROM AN EXISTING CRAFTSMAN TO SOME OTHER CRAFTSMAN, WITH NO DEMONSTRATED PURPOSE.

(D) WHY DELETE REFERENCE TO THE NATIONAL ELECTRICAL CODE?

(11) "JOURNEYMAN LINEMAN". THE PROPOSED CHANGE AT THE END OF THIS PARAGRAPH IS IN DIRECT OPPOSITION TO THE CHANGE IN JOURNEYMAN ABOVE. IF A JOURNEYMAN CAN RUN LINE TO THE SECONDARY SIDE OF A TRANFORMER, DOES THIS CHANGE MEAN THAT A JOURNEYMAN LINEMAN MAY ALSO? WHY THE DUPLICTY? IS IT DUPLICITY?

(13) "MAINTENANCE ELECTRICIAN". AGAIN, AS ABOVE, WE'D HEARD THAT THIS WAS A TOUGH CATAGORY TO POLICE. WHY NOT DUMP IT NOW?

(14) "RESIDENTIAL ELECTRICIAN". WE HAVE NO DIFFICULTY WITH CHANGING HIS OR HER NAME FROM "WIREMAN" TO "ELECTRICIAN", BUT WHAT OF OUR SUGGESTION THAT WE END SOME CONFUSION ON HOW TO TREAT SUCH AN EMPLOYEE? WE SUGGESTED THAT WE ONCE AND FOR ALL PUT IN PRINT THAT A RESIDENTIAL ELECTRICIAN IS CONSIDERED A JOURNEYMAN FOR PURPOSES OF APPRENTICE ASSIGNMENT. WE SUGGESTED FURTHER, THAT HE OR SHE BE CONSIDERED A NON-SUPERVISING JOURNEYMAN WHEN HE OR SHE IS EMPLOYED AS PART OF A CREW ON A COMPLEX LARGER THAN A 4-PLEX. THESE SHOULD BE CONSIDERED NOW.

(15) "TRAINEE". DOES THIS PROPOSED CHANGE MEAN THAT A TRAINEE/APPRENTICE MAY NOT BE PLACED WITH A RESIDENTIAL ELECTRICIAN OR ONE OF THE OTHER NEW CLASSES?

(18) "LOW VOLTAGE ELECTRICIAN". WHY DOES THIS NOT INCLUDE INSTALLATION OF TELECOMMUNICATION EQUIPMENT? IF SAFETY IS A CONCERN, WE NOTE THAT AS ONE EXAMPLE ALONE, A TELECOMMUNICATIONS TECHNICIAN INSTALLS THE INTERCOMM SYSTEM ON A LARGE BUILDING WHERE THERE ARE SPECIAL FIRE DEPARTMENT CONNECTIONS FOR SAFETY. WE RECOMMEND THAT TELECOMMUNICATIONS TECHNICIANS BE INCLUDED.

WE HAVE NOT SEEN THIS HEARING NOTICED IN THE PRESS, AND WOULD LIKE A COPY OF YOUR PROOF OF PUBLICATION IN ACCORDANCE WITH THE ALASKA ADMINISTRATIVE CODE.

WE'D SUMMARIZE WITH THE OPENING COMMENTS: WHY WAS NO BACKGROUND STATEMENT INCLUDED, SHOWING WHAT PROBLEMS WERE ATTEMPTING TO BE OVERCOME? WHY WAS NOT A COPY OF THE REFERENCED STATUTES INCLUDED? WHY HAVE WE HEARD NOTHING FROM OUR SUGGESTIONS; SUBMITTED IN ENTIRELY COMPATIBLE FORMAT, INCLUDING COMPLETE JUSTIFICATION BY LINE ITEM?

THANK YOU FOR ALLOWING US TO PARTICIPATE. I AM PREPARED FOR GENERAL QUESTIONS?

HAND OUT B - Impact on small shop

Assume small shop with 3 employees: 1 Journeyman and 2 Apprentices under present statute.

Assume $18.00/hour for Journeyman plus 26% benefits and overhead = $22.68/hour.

Assume $10.00/hour for Apprentices plus 26% benefits and overhead = $12.60/hour each.

Assume 2 to 1 ratio -

1 X 22.68 + 2 X 12.60 = cost/hour = $47.88 for a total shop cost, or an average of $15.96/hour billed.

Now assume modified 3 man shop; 2 Journeymen and 1 Apprentice:

2 X 22.68 + 1 X 12.60 = $57.87 for a total shop cost, or an average of $19.29/hour billed out.

To minimize this impact, the shop then hires a 4th man; another apprentice:

2 X 22.68 + 2 X 12.60 = $70.47 for a total shop cost, or an average of $17.61.

This is an increase in cost of over 10%, and for the 3 man shop, it's over 18%!

Now the shop must go out and attempt to develop additional work to cover the cost increases, in an atmosphere in which other shops are doing the same thing. It will not work. Some will go out of business and the remaining firms will raise their costs to the public for absolutely no good reason.

HAND OUT A - LABOR CALCULATIONS

ASSUME A PROJECT OF $10,000 ELECTRICAL BILLING.

ASSUME LABOR REPRESENTS 42%. THEREFORE LABOR IS $4,200.00.

ASSUME A JOURNEYMAN IS EMPLOYED AT $18.00/HOUR NET AND AN APPRENTICE AT $10.00/HOUR NET. ASSUME 26% OVERHEAD AND BENEFITS AND YOU HAVE: $22.68/HOUR FOR JOURNEYMAN AND $12.60/HOUR FOR APPRENTICE.

ASSUME PRESENT 2 TO 1 RATIO:

1 X 22.68 + 2 X 12.60 = COST/HR = $47.88
$4,200.00 DIVIDED BY 47.88 = 87.71 HOURS.

87.71 X 22.68 =	$1,989.26	(JOURNEYMAN)
87.71 X 2 X 12.60 =	$2,210.29	(APPRENTICE)
CHECK SUBTOTAL	$4,199.55	

ASSUME 1 TO 1 RATIO:

3 X 87.71 HOURS = 263.13 HOURS

263.13 HOURS DIVIDED BY 2 = 131.56 HOURS

131.56 X 22.68 =	$2,983.78	(JOURNEYMAN)
131.58 X 12.60 =	$1,658.79	(APPRENTICE)
TOTAL COST	$4,542.57	[1 TO 1 RATIO]
MINUS ABOVE	$4,200.00	[2 TO 1 RATIO]
ADDITIONAL COST	$ 343.02	OR 8.16% LABOR INCREASE!

HAND OUT C - SAMPLE WORDING FOR TRAINING
8 AAC 90.180 (B)(3)

(3) SUBMITS EVIDENCE THAT THE CERTIFICATE HOLDER HAS SATISFACTORILY COMPLETED EIGHT HOURS OF CONTINUING TECHNICAL EDUCATIONAL TRAINING, APPROVED BY THE DEPARTMENT, MEETING THE MINIMUM STANDARDS OF AS 18.60.580 FOR ELECTRICIANS AND AS 18.60.705 FOR PLUMBERS, AND INCLUDING AT MINIMUM:

A) FOUR (4) HOURS OF REVIEW OF CHANGES IN THE LATEST APPLICABLE CODE; AND

B) TWO (2) HOURS OF BASIC THEORY REVIEWAND SAFETY; AND

C) TWO (2) HOURS OF GENERAL INDUSTRY PROCEDURES, APPLICATIONS AND NEW MATERIALS USE.

AIECA

ALASKA INDEPENDENT ELECTRICAL CONTRACTORS ASSOCIATION

SENATOR JAN FAIKS
Alaska State Senate
Pouch V, State Capitol Building
Juneau, Alaska 99811

Dear Senator Faiks, 14 February 1986

Thank you very much for sending me a copy of the Audit Report on the Electrical Examination Board, and for soliciting my comments.

I have taken the liberty of reviewing them and presenting my findings to our organization, in order that the response be that of a much wider population. It did not take very much study, for our files are full of difficulties relating to this Board, not the least of which is that it has been managed with severe overtones of politics and union control for many years. We will not, however, dwell on this aspect, but stick to the materials developed by the audit.

Generally: We support the first recommendation of the audit, to allow the Board to sunset as quickly as possible.

We also support the recommendation that much of the functions be taken over by the Department of Labor.

We make these UNANIMOUS recommendations because it is our position that the Board, as it is presently constituted and operated, is: Inefficient, duplicative, non-responsive, non-productive, non-cooperative; and its functions could be performed much more effectively by the Department of Labor.

Appended to this letter are two (2) parts: 1. Specific comments on the audit. 2. Comments on this organization's past attempts to make similar changes, proposed changes to statutes and regulations and the like.

In closing, we'd like to remind you and other legislators and staffers who may have access to this response, that our organization represents the Independent Electrical Contractors in the state. There are more of us than there are of the "others", by business licenses, by employees, by permits, by every measure except that small segment of cross-country high tension line contractors.

Our organization was founded in 1977 and is a non-profit trade association dedicated to safer and more efficient electrical practices and products in Alaska. We do NOT negotiate wages for our members as NECA does. We do NOT develop work rules for our employees as do NECA and the IBEW.

Thank you again for your interest and for contacting me. Please let us know what we can do to assist!

FOR THE PRESIDENT

KENT LEE WOODMAN
Director of Administration

APPENDIX I
Comments on Audit 08-1221-86-R
Board of Electrical Examiners

This appendix will relate by page and paragraph number in the original report to facilitate cross reference.

PAGE 3, PARA 1: There appears to be a typo in the 4th and 5th lines: The Board members are appointed by the GOVERNOR, not the BOARD.

PAGE 5, PARA 2: Concur 1000% that continuation of the Board is not necessary to protect the public's health, safety and welfare, PROVIDED, however, that careful work is done to make certain that each proper function is performed by the correct agency, and that proper resources are allocated to allow continuation. (we note that the Sunset of the ATC last year was an absolute shambles, and that the surviving agencies have no expertise and no resources to enforce anything)

PAGE 5, PARA 4: DO NOT CONCUR that anyone needs to adopt more stringent control of an Administrator's "personal" inspection of each job. See same subject in Appendix II of this response for all details. AS 08.40 is WRONG in its approach, and its development and publication was ill-advised and impractical.

PAGE 5, Para 7: The Board needs to improve communications WITH EVERYONE! In all the time since we formed in 1977, the BOARD HAS NEVER RESPONDED TO ANYTHING WE EVER SENT THEM! They have NEVER solicited our input, NEVER commented on input we made, NEVER coordinated proposed regulations, NEVER reported back on regulations which were proposed but not implemented.

They operate 100% in a vacuum, doing "what is best for us", but totallyj ignoring a vast pool of expertise; the very administrators who are in the field night and day.

PAGE 5, PARA 8: Reciprocity sounds good, but has grave difficulties. One of them is detailed very nicely and very acurately by the Commissioner of the Department of Commerce in his comments appended to the back of the Audit; that of cooperation and coordination with other states. It is tedious at best, and not destined to happen in the near future for the mountain of work that is required.

The second aspect relates to a REAL problem discussed elsewhere in the audit: ABSENTEE ADMINISTRATORS. One thing that keeps a "lid" on the problem currently, is that one must get up here and go through the processes during one of the windows of opportunity four (4) times a year. If one could simply forward a copy of a certificate from say New Jersey, and obtain an Alaskan Administrator's license, we'd be awash with outsiders who either never return, and sign off on work from a retirement city, or who simply do not have the qualifications.

Alaska's rules and test are pretty high level. Many other states do not have the same classifications, let alone the high standards. LET THIS PROGRAM CONTINUE AT ITS OWN PACE, but don't knock the Board or the Departments of Labor or Commerce for not implementing an almost impossible, perhaps undesirable program.

PAGE 7, PARA 1: AGREE 1000% that the Administrator's must be retained. Loss of all that has been gained in regulation and control to date, would create total anarchy. The little authority and the minimum resources presently available to keep things legal, would evaporate to the extreme detriment of Pulbic Health and Safety. See our comments in Appendix II relating to creation of MASTER JOURNEYMAN ELECTRICIAN to help even more in this area.

PAGE 7, PARA 2: More of the same as above; agree totally.

PAGE 7, PARA 3: Agree totally with the first part, but then again, if the Board sunsets, and Labor takes over, the monitoring is already present. This failure to have the data passed on from an agency that already collects it, simply underscores the present duplicity and rationale' to dump it.

Do NOT agree with the second half, relating to personal supervision. See item above, and expansion in Appendix II of this response.

PAGE 7, PARA 4: Do not necessarily agree with this comment. The Board may be guilty of lots of malfeasance as relates to how they have treated some applicants in the past, but those charges must be met head-on and individually. Simply matching the failure rate against some "goal" is NOT the criteria to measure the board's effectiveness or the importance of the examinations or screening processes.

As noted above, the Alaskan standards are high. There is no shortage of Electrical Administrators; there are plenty to go around, and creating between 60 and 110/year is plenty to meet demand.

Use great caution not to set quotas of passing rates, or the importance of the program will deteriorate, again, to the public's vast detriment.

PAGE 7, PARA 7: Concur, as above.

PAGE 7, PARA 8: Concur, as above.

PAGE 8, PARA 2: Agree with the second half, which relates to the importance of having a central figure accountable as a justification for retention of the Administrator function, but do NOT agree with the personal inspection aspect, as above. Again, see comments in Appendix II of this response.

PAGE 8, PARA 3: Concur completely; hence our suggestion that the entire program be taken over by Labor. See our materials suggesting this and drafting legislation and regulation changes to accomodate this concept, attached to Appendix II of this response.

PAGE 8, PARA 5 & 6: TOTALLY DISAGREE. Again, see comments in Appendix II and its attachments. AS 08.40.195 is one of the most ill-conceived, impractical statutes on the books!

PAGE 9, PARA 1: Concur with the second half, ref comments about "non-resident" administrators above, do NOT concur with front half, as above.

PAGE 9, PARA 2: Concur completely. This is a tough one to work on. Almost anything anyone has developed to date fails the constitutional test of unduly restricting an American Citizen's right to travel interstate. It needs work, however.

PAGE 9, PARA 4: Strongly DISAGREE, per above, and per comments and materials in Appendix II to this response.

PAGE 10, PARA 4: Concur completely. As seen in the attachments to Appendix II of this response, we even go further and feel that we need to license the technicians. Obviously, grandfather rights must apply to those of us who have been performing both functions with considerable investment in equipment, rolling stock, tools and people all these years.

PAGE 11, PARA 8: Concur 100%. Obviously, if the Board is sunseted, this problem goes away, because Labor communicates very well with Labor.

PAGE 14, PARA IV, A: Concur 1000%. As stated in the cover letter to this response, the Board has NEVER, EVER coordinated or communicated with this group, even to the point of failing the test of the Alaska Administrative Code as relates to advertising etc.

PAGE 14, PARA V, A: This is pure BULL. The Board has done almost everything possible to let folks know that their input is not only not utilized, not desired, but that it may even be USED AGAINST THEM IN THE FUTURE!

PAGE 14, PARA VI, A: I understand that there have been several CASH SETTLEMENTS of claims of applicants for licenses to the Board, when Board members mismanaged their authority and allowed personal, business and union considerations to dictate successful candidates. Check with Representative Robin Taylor for some details. Check also with the AG's office, who handled the settlements.

PAGE 23, PARA 2: Concur completely that the Board should be discharged and that the licensing of Administrators should continue.

PAGE 24, PARAS 1, 2 & 3: Concur with qualification on paragraph 3: the responsibility for licensing Administrators should be moved to LABOR.

PAGE 24, PARA 4: Strongly disagree. Of the three-part system that currently exists, (Board, Labor and Commerce), Commerce plays the SMALLEST PART. Labor does the examination in the field for technician's compliance, why then should another department supervise the operations of their supervisors. It should all be moved into ONE DEPARTMENT, once and for all: LABOR. See additional comments on this subject in Appendix II.

PAGE 24, PARA 5: More as above. Admits duplicity.

PAGE 25, PARA 1: Absolutely NOT; see comments above & in Appendix II.

PAGE 25, PARA 2: Mild concurrance. We have already commented on this proposed regulation, and find it mildly non-objectionable. The real problem, however, is the out of state folks and a poorly written statute. See additional in Appendix II.

PAGE 25, PARA 3. We concur with his concurring.

PAGE 25, PARA 4: We concur completely. His analysis is excellent! END

APPENDIX II
Specific Comments on
Relationship With Board, Commerce and Labor

There are several elements to this appendix. For each element I have provided copies of all the correspondence relating, in order to enable the reader to have all the thinking and communications available for analysis. The attachments to this Appendix are merely the "proof", and need not be read in detail unless something in this Appendix creates a question.

I - NOMINATION TO THE BOARD:

Last year we became aware that two (2) seats on the State Board of Electrical Examiners would vacate soon. We determined to nominate an INDEPENDENT for one of the seats. The first several attachments to this Appendix provide copies of the original nomination, the letters of endorsement and other communications relating to the case. As can be clearly seen, we made a MAJOR nomination, substantially supported.

The Governor's Office instead elected to appoint Mr Walt Gardner, a long time member of the "Old Boy" union network. When we requested copies of his nomination, resume' and letters of recommendation, we received a MISERABLE seven page, lackluster resume'. All attempts from that date to this, to obtain the other material, have met with absolute refusal on the part of the Office of the Governor. We can only assume that he simply had NO RECOMMENDATIONS. We are extremely distressed that the Governor would refuse to even tell us who nominated him!

We were then in a position of deciding whether to make a mass mailing to all legislators, requesting that they block his confirmation. We were starting that effort when your package arrived and we saw that simple SUNSET was by far a better solution to the over all problem.

BOTTOM LINE: This package and its treatment in Juneau, is additional proof that politics/union hold sway over the operations of this Board.

II - 02 September 1983 Altercation with the Board:

The next batch of attachments relate to difficulty in obtaining a clear reading on a confusing statute, which resulted in a flat refusal to provide a copy of some proposed regulations changes.

III - 28 November 1983 Appearance before the Board:

Though we were never provided the text of the proposed regulations changes as requested above, we were finally able to obtain a set through out own contacts. The attachments constitute the text of a presentation to the Board by Woodman, representing AIECA.

Among other items in that presentation, were complaints about COMMUNICATIONS, to the point; violation of the State's Administrative Procedures Act. In that proposed rule making and our response, was the first effort to inflict "PERSONAL INSPECTION" on Administrators. The text says it all!

THE BOARD NEVER RESPONDED TO EVEN ONE SINGLE LINE OF ALL THAT INPUT, and in fact, the only response Woodman received after the presentation, was the presentation, publically, of a humiliating CEASE AND DESIST NOTICE, by the Board. What a waste of time. They were just sitting there laughing and then they dumped an expensive harassment on one of our member firms.

IV - CEASE & DESIST ORDER:

The next batch of documents relate to the above noted order placed on Woodman the moment he completed his public testimony before the Board. (the meeting, by the way, was held at the NECA building in Anchorage..... How blatent can you get?!)

As can be seen, after the attorneys got their money, absolutely nothing happened. We wasted government and private money and time for nothing. It was a senseless harassment of a company that does everything by the numbers, while the wasted efforts could have been brought to bear on the catching of real offenders and unlicensed folks.

V - 25 April 1985 Communications to Labor; bad legislation:

This package includes a letter to the Department of Labor, with copies to Commerce, the AG and others. It points out a grave difficulty with AS Sec 08.40.195, and recommends a fix. WE NEVER RECEIVED A RESPONSE FROM ANYONE!

VI - 06 May 1985 Letter and comments on proposed changes:

This letter documents again the Board's inability to even get routine correspondence in the hands of the proper people. They simply never provided a copy of the proposed changes to us in DIRECT VIOLATION OF THE ALASKA ADMINISTRATIVE CODE. In spite of the lack of notification, we made a great effort to provide input which is the balance of the attachment. We NEVER RECEIVED A SINGLE COMMUNICATION ON THIS PRESENTATION OR OUR LETTER FROM ANYONE!

VII - 21 May 1985 Proposed changes to Statutes and Regulations:

This is an EXTREMELY IMPORTANT ATTACHMENT! We made a major effort to search through all the appropriate statutes and regulations in a coordinated attempt to get them all fixed and heading the same direction. To our knowledge, NEVER HAS THERE BEEN A COOPERATIVE EFFORT TO REPAIR FAULTY STATUTES AND/OR REGULATIONS.

We made this major effort and provided an extremely valuable body of study in a sincere effort to help the state repair some real problems. WE NEVER RECEIVED A SINGLE BIT OF COMMUNICATION ON ANY PART OF IT FROM ANYONE and yet it addresses problems everyone seems to agree need addressing.

VIII - 29 May 1985 proposed Department of Labor regulation changes:

As the cover letter in this package dramatically states, they FAILED UTTERLY IN THEIR DUTIES TO COMMUNICATE THEIR PROPOSED CHANGES LOGICALLY, TIMELY AND PROPERLY. Nevertheless, we made a massive effort to come to grips with the material and provide a major input.

WE NEVER RECEIVED ANY RESPONSE FROM ANYONE ON THIS PACKAGE.

IX - 04 November 1985 Testimony on Rule Changes:

The attachment here is the text of the testimony presented at public hearing in Anchorage. A copy of the text was provided to the recorder.

Once again, we were not served any of the proposed changes. Additionally, the hearing was held in a far too small room with over 100 people standing in the halls who could not hear testimony before or after them. During our testimony, which was carefully pared down to minimum length, and mercifully presented one time by one representative of over 26 companies, the room, which was loaded with IBEW "crowd scene" hooted, catcalled and attempted to cut the testimony to a minimum.

It was a joke. If I did not know better, I'd have said it was southern "justice", circa 1938. WE HAVE NEVER RECEIVED A SINGLE IOTA OF FEEDBACK FROM ANYONE ON ANY PART OF THIS PRESENTATION!

X - SUMMARY:

If you look through the texts of the attachments, you will see that they repeat the same errors over and over again:

1. People who write and formally request "Party of Record" status are NOT afforded copies of anything.
2. Suspenses when anything at all becomes available are non-existant.
3. Proposed Statute/Regulation changes NEVER have any justification or rationale' attached so one can come to grips with what the problem is that the proposed changes are supposed to fix.
4. Most changes proposed are NEVER coordinated between Labor, Commerce and the Board, and oftentimes conflict with others by another branch of government.
5. NEVER does any entity communicate back to folks who make input, or make requests for specific information, in writing!
6. Even proposed regulations which have been beaten down into defeat by overwhelmingly negative response, rise again with almost the same wording a year later, this time with no notice, in an attempt to ram them through anyway when no one is looking!

RECOMMENDATION:

Not only does this "triumvirate" need to be reduced by at least a factor of 1/3, when the Board does sunset, a careful, coordinated plan needs developed so that the problems do not simply move to new shoulders.

We highly recommend that a real cleanup, a real efficiency move, would be to get it all under one roof: LABOR. There is no benefit to having one set of investigators harassing an Administrator for technical compliance, and another set from a different department harassing the Administrator's Journeyman about technical compliance.

Finally, much has been said about "absentee" Administrators, and Unlicensed contractors. ALMOST NOTHING has been done to fix the problem. Over and over again come new proposed rules to tighten up on THE ADMINISTRATORS AND THE COMPANIES WHO ARE HERE, AND WHO ARE DOING IT RIGHT! [It's called "preaching to the choir']

The new rules about us all having to repaint our trucks and re-do all our letterhead to include our license number works a hardship on us, but does NOTHING WHATSOEVER to stop the unlicensed and absentee folks!

The efforts to have properly operating Administrators somehow be responsible for personal supervision and inspection of each and every job is A PHYSICAL IMPOSSIBLITY. No one has addressed the fact that the LAW IS WRITTEN BADLY.

We need to pool our thinking and get a workshop together to brainstorm a fix for this one. Recommend LABOR, COMMERCE, the AG's Office, NECA and AICECA.

SB 384: BOARD OF ELECTRICAL EXAMINERS
SUMMARY OF INFORMATION

LEGISLATIVE BUDGET AND AUDIT REPORT

A. findings:

Purpose of Board is to enforce the electrical code by monitoring current administrators and to test qualified applicants for administrator.

1. The Board does not directly enforce codes now, DOL does through electrical inspectcrs. The inspectors are responsible for large jurisdictions, so, they are dependent on administrators' reports. DOL recieved reports. The Board gets them later.
   note: 20% of the administrators at this time have permanent addresses outside the state.

2. Tests given by the Board are too broad (include subjects not applicable to the job an administrator does) and have a high rate of failure.

3. The Board should make sure that applicants are qualified. Most applications have not been accompanied by evidence of electrical licensure or letters of recommendation.

B. recommendations:

1. ENFORCEMENT
   Can be retained by the DOL, as is done now, through retaining Administrators and continuing to collect their reports.

2. PERSONAL SUPERVISION
   LB&A suggestes that the Board needs to require evidence that sites have been personally inspected by Administrators.

   Both the LB&A audit and Ak. Independent Electrical Contractors Association (AIECA) state that it is physically inpossible for administrators to inspect all sites. AIECA suggests that a requirement be made (probably in the Ak. Administrative Code) that each site have a MASTER JOURNEYMAN to do onsite supervision of all inspections so that administrators would only have to do spot checks. AIECA suggests that the job of an administrator should be to develop quality procedures and policy for a

job site, not ongoing inspections.

3. EXAMINATIONS
Tests should be limited to the category being tested for.

4. QUALIFIED APPLICANTS
Applicants should be required to prove they are qualified electricians before they are tested.

5. BOARD COMMUNICATIONS
LB&A suggested taht the Board be required to improve communications with the DOL so that violations that are reported come to the Board's attention so they can take appropriate actions.

6. RECIPROCITY
LB&A suggested the Board provide for reciprocity.

Commissioner Lounsbury rebutted in the report that reciprocity was not possible because other states will not share their examination information much less enter into reciprocal testing. There is a national effort afoot to have a national electrical administrators test, which should come forth in "the next couple of years" (Com. Lounsbury)

ADDITIONAL INFORMATION:

A. Appointment of Walt Gardiner

The Kent Woodman Story:
Administrator for Yellow Electric, Director of Administration for AIECA (Ak. Independent Electrical Contractors Asso.), was issued a cease and desist order for Amber Electric, div of Yellow.

Was endorsed for Bd. of Examiners by Robin Taylor, Jay Kerttula, AIECA, and others.

Walt was appointed. Kent and AIECA repeatedly asked the Gov's office who nominated Walt and Gov's office refuesed to tell.

The feeling of Charlie Bussell and Kent Woodman is that the Board is appointed to serve political interests and is inhibiting the efforts of those in the industry who wish to become administrators. Current appointments are one point of their arguement.

B. Testing of Administrators

As discussed earlier, tests are too difficult and too broad. This is limiting the number of Electrical Administrators in Alaska, which Charlie Bussell and Kent Woodman claim is part of the

Board's inability to serve its purpose.

COVERING THE BOARD'S DUTIES IF THEY SUNSET

Enforcement of code can continue to be done by administrators and DOL inspectors without the Board.

Testing and licensure can be handled by the Division of Occupational Licensing, probably in cooperation with DOL.

Loren H. Lounsbury, Commissioner
Department of Commerce and Economic
Development
P.O. Box D-LIC
Juneau, Alaska 99811

Dear Commissioner Lounsbury:

I understand that there is currently a bill in Senate Labor and Commerce, SB 384, that deals with the sunset of the Board of Electrical Examiners, and that it has had one public hearing already. While it is too early to predict the outcome of this bill, I understand the Committee is looking closely at the recommendation of the Legislative Budget and Audit Committee to sunset the Board.

If sunset occurs, it seems to me that this would have some impact on the proposed regulation changes in your January 17 notice, and in fact may negate them. It would be helpful to me if you could explain what the potential impact would be either with or without the Board sunset.

I would also like to formally request that you delay final approval of the proposed changes in the regulations of the Board of Electrical Examiners in your January 17 notice until the sunset issue has been resolved or until it has been made clear that the sunset would not affect the proposed regulations.

Sincerely,

Representative H.A. "Red" Boucher

February 17, 1986

Mr. Kevin Henderson
Division of Occupational Licensing
P. O. Box D-LIC
Juneau, Alaska 99811

Dear Mr. Henderson:

I have received several copies of the proposed changes to the statutes and regulations governing the Board of Electrical Examiners. At present, I am in contact with twelve other persons in the electrical industry as concerned with the proposed changes as I am.

The proposed changes are only more restrictive to the majority and favor in some instances only a small minority.

Enclosed is a list of the changes with revisions to make them more equitable. As proposed by the Board of Examiners, the changes would increase costs to the public through added administrative expense. The consumer would also have additional costs passed on as the cost of doing business. The applicant for a license would also be more restricted as he would lose rights now afforded by statute in its present form.

I am sure the public good should be considered and I hope my suggestions will be of help with your deliberations which are greatly appreciated.

Thank you for your time and attention.

Sincerely,

B. Herbert

12.AAC.32.001 (4) Should be amended to read:

(4) An Alaska registration as a professional electrical engineer plus -

(A) Management experience in the electrical construction industry as a field engineer, office engineer or in a similar engineering position for at least four of the six years immediately preceding the date of application;

(B) Experience as a journeyman lineman in outside construction for three of the six years immediately preceding the date of application;

(C) Certified inspector for the State of Alaska or one of its municipalities with experience as a journeyman lineman in outside construction for two of the four years immediately preceding the date of application;

(D) Full time instructor at a school approved by the Board with experience as a journeyman lineman in outside construction for two of the four years immediately preceding the date of application.

12.AAC.32.090 (2) Is amended to read:

(2) Construction Management experience in inside wiring as a field superintendent, field engineer, or similar position for at least four of the six years immediately preceding the date of application; or

12.AAC.32.090 (4) Should be amended to read:

(4) An Alaska registration as a professional electrical engineer plus -

(A) Management experience in the electrical construction industry as a field engineer, office manager or in a similar position for at least four of the six years immediately preceding the date of application; or

(B) Experience as a journeyman electrician in outside construction for three of the six years immediately preceding the date of application; or

(C) Certified electrical inspector for the State of Alaska or one of its municipalities with experience in inside construction as a journeyman for two of the four years immediately preceding the date of application; or

(D) Full time electrical instructor at a school approved by the Board and experience in inside construction as a journeyman for two of the four years immediately preceding the date of application.

12.AAC.32.240 Examination Papers - Should be amended to read:

All examination papers will be preserved for a period of at least one year after notification of grade results, during which time any candidate who has failed the examination may inspect his or her papers in the presence of a Board member or his designee. However, no person may inspect examination papers during the 20 days immediately preceding any examination.

12.AAC.32.350 Exemption From Continuing Education

In agreement with changes.

12.AAC.32.900 Licensed Electrical Administrator is Responsible for Completed Project

This section should remain as is.

12.AAC.32.910 Change of Employer or Company Affiliation

This new addition is not necessary and should not be added.

PROGRAM BILL # //

GOVERNOR'S PROGRAM BILL

1985 Extraordinary Session

M E M O R A N D U M

AN ACT to amend the general municipal law, the insurance law, the education law, and the local finance law, in relation to making available to municipalities a system of self-insurance, reciprocal insurance, joint insurance funding, and making certain conforming changes in relation thereto, the cancellation and renewal of commercial risk, municipal risk and professional liability insurance policies, the issuance of property/casualty insurance on a group basis for commercial risks, municipal risks and professional liability; and to amend the civil practice law and rules, in relation to limiting the liability of public entities and public employees and periodic payment by public entities and public employees of certain judgments against them; and repealing sections three thousand four hundred twenty-six and three thousand four hundred twenty-seven of the insurance law relating to the termination of product liability and professional liability insurance policies

Purpose:

To allow various local governmental entities to organize and subscribe to a reciprocal insurer or to participate in a joint insurance fund and to expand their existing authority to engage in self-insurance programs.

To establish cancellation and renewal provisions for commercial risk and municipal risk insurance policies, and to amend such provisions as they currently apply to professional and product liability policies.

To authorize the issuance of property/casualty insurance policies on a group basis for commercial risks, municipal risks and professional liability.

To limit the liability of public entities and public employees and provide for the periodic payment by public entities and public employees of certain large judgments.

Summary of Provisions:

Section 1 sets forth the legislative intent regarding the authority given to local governmental entities to organize reciprocal insurers or joint insurance funds.

Sections 2 through 11 amend the General Municipal Law and Sections 22 through 25 amend the Education Law, to accomplish the following:

1. The liability and casualty reserve fund established by Chapter 684 of the Laws of 1979 has been expanded to a self-insurance reserve fund which will authorize local governmental entities to use the fund for various types of property/casualty insurance and to pool their revenues. The entities to which such authorization is given are municipal corporations as defined in section 2 of the General Municipal Law, school districts (except school districts in cities with a population of 125,000 or more), boards of cooperative educational services, fire districts, and special improvement districts governed by separate boards of commissioners.

2. Local governmental entities, as specified above, are authorized to establish pooling arrangements to be known as "joint insurance funds" which will serve as an alternative or supplement to various types of property/casualty insurance authorized or required by law. The joint insurance funds will be created from pooled contributions of the entities which agree to assume risk on a group basis.

Section 13 of the bill adds a new section 335 to the Insurance Law to require that each insurance company issuing municipal liability insurance file a semi-annual report with the Superintendent of Insurance detailing all municipal liability claims made against its insureds and all claims paid. Section 13 also provides that the Superintendent of Insurance shall submit a report on June 1, 1987 to the Governor and the Legislature containing a summary of the data collected, an assessment of the status of municipal liability insurance costs, and recommendations for changes to reduce or contain such costs.

Section 14 of the bill adds a new paragraph 12 to subsection (b) of section 2305 of the Insurance Law to include within the list of types of rate filings which require the prior approval of the Superintendent, municipal liability insurance when written by a licensed insurer which is owned by, or whose membership or subscribers are principally comprised of, local governmental entities.

Sections 12 and 18 of the bill amend sections 107 and 6102 of the Insurance Law to enable local governmental entities as specified above to join together under a common name to exchange insurance contracts on the reciprocal plan through an attorney-in-fact.

Section 19 of the bill adds a new subsection (j) to section 6102 of the Insurance Law to require any such reciprocal insurer (whose membership is limited as set forth above) to comply with all the applicable provisions of the Insurance Law, including Article 76 (Property/Casualty Insurance Security Fund), and with such additional standards as the Superintendent of Insurance shall prescribe by regulation.

Section 20 of the bill amends section 6104(a) of the Insurance Law, which presently provides that no authorized reciprocal insurer which issues assessable policies shall make any new agreement for insurance with any subscriber which does not have assets in his, their or its own right in an amount not less than $10,000 in excess of liabilities. The bill would increase the $10,000 amount to $50,000.

Section 21 of the bill sets forth a conforming amendment to the Local Finance Law to provide a "period of probable usefulness" for the contribution of the locality to fund the reciprocal insurers.

Section 15 of the bill adds a new section 3426 to the Insurance Law to establish cancellation and renewal provisions for commercial risk, municipal risk and professional liability policies.

The bill establishes a minimum one year required policy period and provides that cancellation of covered policies may not take place during this period except for certain specific reasons set forth in the bill.

The bill also provides that commercial risk and professional liability insureds must be given sixty days notice of nonrenewal and municipal risks must be given one hundred twenty days notice of nonrenewal.

A copy of all notices of cancellation, nonrenewal and conditional renewal sent to municipal risk insureds must be

forwarded to the superintendent concurrently with the notice to the insured.

The provisions of this new law would not apply to policies issued through residual market vehicles such as the Assigned Risk Pool, the Fire Pool and the Medical Malpractice Insurance Association.

Section 16 of the bill repeals existing Section 3426 (relating to professional liability insurance contracts) and existing Section 3427 (relating to product liability insurance)

Section 17 of the bill renumbers existing section 3435 of the Insurance Law to be section 3439 and adds a new section 3435 which authorizes the approval of insurance policies which provide property/casualty insurance on a group basis for commercial risks, municipal risks, and professional liability. The bill requires that the Superintendent of Insurance promulgate regulations prior to the approval of such policies.

Sections 26 through 31 add a new Article 16 to the Civil Practice Law and Rules to require that a plaintiff must exhaust all diligent efforts to collect the equitable share of a judgment apportioned to a public entity or public employee's co-defendants prior to seeking recovery of such co-defendants' equitable share from the governmental defendant. The bill also provides that if a public entity or public employee is properly called on to assure payment in full of the judgment by paying the equitable share of a co-defendant, the governmental defendant would be entitled to make any such payment which exceeds $100,000 in equal installments over a period of five years.

The bill defines "public entity" as (a) the state of New York, (b) a county, city, town, or village, (c) a school district or board of cooperative educational services, (d) a fire district, and a special improvement district governed by a separate board of commissioners, special district or district corporation.

The term "public employee" is defined to mean any employee of a public entity as defined in the bill while acting within the scope of his public employment or duties, but does not include an independent contractor.

Section 32 of the bill sets forth an immediate effective date, except that section 13 would take effect April 1, 1986, section 16 would take effect January 1, 1986, sections 15 and 16 shall apply to all policies issued or

renewed on or after January 1, 1986, and sections 26 through 31 shall take effect February 1, 1986 and apply to all actions or proceedings instituted on or after its effective date.

Existing Law:

Chapter 684 of the Laws of 1979 established a liability and casualty reserve fund for self-insurance programs.

Currently, the local governmental entities referred to in sections 12 and 18 of the bill cannot participate in the formation of a reciprocal insurer. The present required net worth amount for a subscriber to a reciprocal is $10,000.

The Insurance Law currently provides minimum cancellation and renewal provisions for personal lines, private passenger automobile, professional liability and product liability policies. In general, no provision in the law regulates the cancellation or nonrenewal of commercial or municipal risk policies.

The Insurance Law currently does not permit the issuance of property/casualty insurance policies on a group basis. The bill would authorize the issuance of such policies for commercial risks as well as for municipal risks and professional liability.

Under existing law, in actions against public entities and employees and other parties, all the defendants are jointly and severally liable to the plaintiff for any judgment rendered against them. Plaintiffs are permitted to recover the full amount of a judgment from the governmental defendant, regardless of the other defendants' ability to pay their equitable share.

Statement in Support:

Joint Insurance Funds and Municipal Reciprocal Insurance

Recent increases in the cost of commercial insurance for municipalities has made it difficult to obtain adequate protection at reasonable cost. The number and amount of lawsuits pending against local governments have grown significantly in recent years. This, coupled with other economic factors affecting insurance companies, has created a very serious problem for municipalities to meet their insurance needs.

During the past decade municipal liability insurance costs have escalated, requiring local governments to spend a larger percentage of their budgets on insurance. This problem has been coupled with the growing need for such insurance and a general decrease in the availability of such coverage in the normal market. Local governments can no

longer tolerate such a situation, but their only alternative has been self-insurance.

The bill would provide new alternatives for local officials to consider as they face increasing costs for insurance.

Joint Insurance Funds - This bill would provide authorization for local governments to form and participate in insurance pools (called "joint insurance funds"). Properly managed insurance pools can result in both cost savings and cost stability. Provisions contained in this bill provide for minimum standards that are intended as a prerequisite that will facilitate proper management and operating practices.

The definition of the participants in the reciprocal insurer (in sections 12 and 18 of the bill) is consistent with the definition of the participants in the joint insurance fund, so that there will be two alternatives--regulated reciprocals and unregulated pools, for the same parties to consider.

Municipal Reciprocal Insurance - This bill will allow governmental entities to join together and engage in the exchange of contracts of insurance through a reciprocal plan. A reciprocal is created by a group of participants known as "subscribers" who under a common name and through an attorney-in-fact engage in the business of insuring one another. Contracts of insurance are exchanged among subscribers on a reciprocal basis so that each insured is also an insurer.

Management of the reciprocal is through an attorney-in-fact who is empowered to act on behalf of the subscribers. The attorney-in-fact is responsible for all functions required in the conduct of the business. The attorney-in-fact in turn is subject to the control of an advisory committee elected by the subscribers. The attorney-in-fact maintains a separate account for each subscriber and the account is credited with the subscriber's initial surplus contribution and the subscriber's share of any future earnings. The attorney-in-fact would also be in a position to supply loss prevention and control assistance and render technical advice in this highly specialized field.

The organization and operating requirements for a reciprocal insurer are stipulated in Article 61 of the Insurance Law. Due to the uniqueness of a reciprocal whose membership is limited to local governments, this bill authorizes the Superintendent to promulgate additional standards in order to facilitate the reciprocal's

organization, safeguard its financial soundness, and ensure the continuance of a viable organization.

The bill provides for prior approval of the municipal reciprocal insurer's rates. Coverage of the municipal reciprocal insurer by the Property/Casualty Insurance Security Fund is retained so that this type of reciprocal insurer is treated in the same manner as other reciprocals.

Increase in Net Worth Required for Subscriber - A reciprocal insurer is an unincorporated group of individuals or corporations that exchange insurance contracts through an attorney-in-fact. Each member or subscriber of a reciprocal assumes a liability for a portion of the losses of the other subscribers. This is accomplished by requiring each subscriber to enter into a contract which sets forth the subscriber's liability and grants authority to the attorney-in-fact to operate on his or its behalf.

Therefore, each subscriber must have substantial resources which the subscriber can call upon to meet its share of any underwriting deficiencies. The attorney-in-fact must ascertain and monitor the financial condition of each subscriber and requiring a minimum net worth of $50,000 is not unreasonable in today's times. In view of the tremendous decrease in the value of the dollar since the existing $10,000 net worth requirement was established more than a generation ago, a substantial increase in such amount is justified.

The increase will also affect the amount of net worth required for individuals who become members of the Lloyds underwriters of New York heretofore organized in this State under section 6116 of the Insurance Law, since section 6116(b) provides that "every such Lloyds underwriters shall be subject to all of the provisions of this chapter which are applicable to reciprocal insurers."

Cancellation and Nonrenewals

The commercial property and casualty insurance industry has recently engaged in the indiscriminate cancellation and nonrenewal of a large number of commercial and municipal insureds. These cancellations have frequently occurred during the policy term, with only minimal notice to the insured. Similarly, insureds have been informed of an insurer's intention to non-renew policies with only a few weeks' or even days' notice.

Obviously, such short term notices of cancellation and nonrenewal place an inordinate burden on the insureds. The tight market makes obtaining replacement coverage, a difficult task, more burdensome by the inadequacy of the notices provided.

The bill would eliminate indiscriminate and irresponsible mid-term cancellations of commercial risk, municipal risk and professional liability policies, as well as establish minimum time limits for notification of nonrenewal.

Group Insurance Policies see fictitious group law.

Consumers of the commercial property/casualty insurance industry are currently facing severe constriction in the availability of some insurance products and the affordability of those products which are still available.

Repeal fictitious group law 21.36.190

The availability of property/casualty insurance on a group basis to the members of associations or organizations whose membership is of a relatively homogeneous nature (i.e. housing associations, day care centers, etc.) and for public entities could result in reduced underwriting costs and enhance both the availability and affordability of insurance products for these consumers.

Exhaustion of Remedies

The bill would protect taxpayers by requiring that a plaintiff must exhaust all diligent efforts to collect the equitable share of a judgment apportioned to a governmental entity's co-defendants prior to seeking recovery of such co-defendants' equitable share from the governmental defendant. Taxpayers should not be called on to finance lack of diligence on the part of the plaintiff in obtaining satisfaction of judgments,

The bill would recognize that in the event a governmental defendant is properly called on to assure payment in full of the judgment by paying the equitable share of a co-defendant, the governmental defendant should be entitled to make a large payment in equal installments over a period of years instead of a lump sum payment.

Budget Implications:

The bill should provide savings to public entities in the state.

PRESS RELEASE
FOR IMMEDIATE RELEASE
FOR FURTHER INFORMATION CONTACT:
SENATOR JOE P. JOSEPHSON
465-4525

10 February 1986
12:30 p.m.

Senator Joe Josephson (D.-Anchorage) today introduced SB 392 to help reduce the cost of insurance and make more insurance coverage available.

"My bill recognizes the real problems that exist today, and which cry out for change in certain cases of medical and dental malpractice, day care centers, and claims in which a minor has sustained personal injury", Senator Josephson said.

"In my judgment", he added, "proposals for wholesale changes in tort law will not be enacted at this session -- and should not pass without careful study and assurances that benefits to the public, in the form of better coverage and lower premiums, will follow from their passage.

"But we can make some changes that still preserve for victims of negligence the benefits of the common law of Alaska as it has developed over the years, case-by-case", Senator Josephson asserted.

SB 392 provides that in medical or dental malpractice cases, suits against day care providers, and claims in which a minor has sustained injury, if future damages are awarded in excess of $250,000, the defendant or the defendant's insurance carrier can provide an approved annuity plan for instalment payments instead of a lump sum payment. The annuity program would be available as a way of meeting the defendant's obligation to pay amounts in excess of $250,000 for future pain and suffering, future lost wages or earnings

(or other future economic losses), or future expenses for health care or rehabilitative services.

To protect judgment creditors, security for the payment of the instalments would be required; each annuity plan would require approval by the Director of Insurance; and lump sum payments could be ordered in a case of demonstrated hardship, failure to post required security, or failure to pay a scheduled instalment when due.

"Passage of SB 392 will help doctors, dentists, and day care centers obtain coverage at reasonable rates", Senator Josephson said.

"Moreover, SB 392 gives better protection to the rights of injured minors than can be assured under existing law. Today, the guardian of an injured minor obtains immediate control of the entire award, when the award is satisfied. Under SB 392, except in cases of hardship, a portion of the award for future damages will be paid in monthly instalments, and so enhance the minor's involvement in financial planning decisions as the minor moves towards or reaches adulthood. SB 392 thus assures that proceeds of an award are used for the minor's care and properly accounted for.

"SB 392 is not, of course, the total answer", the senator concluded. "In fact, I am preparing other legislation for introduction this week which, like SB 392, will be carefully designed to improve the climate for insurance buyers and premium payers without seeking what is unattainable in 1986 or without doing fundamental violence to the civil law as we know it today."

Official Business

Pouch V
State Capitol
Juneau, Alaska 99811

January 29, 1986

Tamara Cook, Esquire
Director
Division of Legal Services
Legislative Affairs Agency
P.O. Box Y
Juneau, Alaska 99811

Dear Ms. Cook:

This letter constitutes a drafting request which you will want to refer, probably, to whomever on your staff has the greatest familiarity with insurance legislation.

I ask that there be drafted for possible introduction by me a bill addressing certain problems in property/casualty insurance.

First, I wish to authorize local government entities, including school districts (and inclusive of REAAs) to establish pooling arrangements to be known as "joint insurance funds", which will serve as an alternative or supplement to various types of property or casualty insurance authorized or required by law.

AS 21.75 provides already for reciprocal insurance for local government entities, but does not provide for joint insurance funds. I wish to cure this apparent omission. I enclose materials from the State of New York which may help your draftsperson.

Second, I wish to repeal AS 21.36.190, which discourages the formation of groups for insurance purposes. It is now clear that group insurance policies in the existing environment should be encouraged, not discouraged.

Third, I have another idea I wanted pursued. In entering judgments in actions for medical or dental malpractice, in actions against day care centers, and in all tort situations where the recovery is for the benefit of a minor, I would afford to the defense an opportunity to request the trial judge, if the findings include future damages exceeding $250,000 (e.g., for future pain and

suffering, wage loss, and medical expense), for the opportunity to provide an annuity contract that will pay the remaining amounts of future damages exceeding $250,000 in periodic installments. The present value of the annuity contract would be determined in accordance with generally accepted actuarial practices by applying the discount rate in effect at the time of the award to the full amount of the remaining future damages. The period of time over which such periodic payments shall be made and the period used to calculate the present value of the annuity contract would be the period determined by the trier of fact in arriving at the itemized verdict, or, if the verdict is not itemized, by the court that is entering the judgment, except that the period shall not exceed ten years. The amount of the judgment should reflect the interest rate attributable to unpaid judgments in Alaska. Unless otherwise agreed, the annual sum arrived at would be paid in equal monthly installments payable in advance.

Any annuity contract provided would require approval by the Director of Insurance of the State of Alaska prior to acceptance by the Court and would be executed by a qualified insurer licensed to do business in the State.

If the security is not posted within 30 days, the Court on motion of the judgment creditor may order the judgment to be paid in lump sum.

Please see the enclosed materials from New York, which provide that no portion of any periodic payment allocable to loss of future earnings will be reduced or terminated by reason of the death of the judgment creditor, but would be paid to persons to whom the judgment creditor owed a duty of support immediately prior to his death to the extent that such duty of support exists.

Please also note section 5036 in the enclosure which provides that any time after entry of the judgment, a judgment creditor or successor in interest can seek to establish that the continued payment of the judgment in periodic installments will impose a hardship, in which case the court may order that payment of remaining payments, or a portion thereof, be made in lump sum.

Sincerely,

Joe P. Josephson

Joe P. Josephson
State Senator

STATE OF NEW YORK

6750

1985-1986 Regular Sessions

IN SENATE

June 28, 1985

Introduced by COMMITTEE ON RULES -- (at request of the Governor) -- read twice and ordered printed, and when printed to be committed to the Committee on Finance

AN ACT to amend the public health law, the civil practice law and rules, the education law, the insurance law, and the judiciary law, in relation to medical and dental malpractice, making an appropriation therefor and providing for the repeal of certain provisions added by this act upon their expiration

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

Section 1. Legislative findings and declaration. The legislature hereby finds and declares that a comprehensive reform of the medical and dental malpractice adjudication system is necessary in order to ensure the continued availability and affordability of quality health services in New York state. Escalating malpractice insurance premiums discourage physicians and dentists from initiating or continuing their practice in New York and contribute to the rising cost of health care as premium costs are passed along to the health care consumer. The legislature finds, therefore, that steps must be taken to reduce the cost of malpractice insurance and to restrain associated health care costs, while assuring the availability of compensation for persons injured as a result of malpractice. By expediting case resolution, discouraging frivolous claims and defenses, moderating attorney contingency fees, limiting the opportunity for double recoveries, and requiring the periodic payment of large future awards, the legislature intends to reduce the escalating cost of malpractice insurance and to improve the adjudication of malpractice claims. The legislature further finds that hospitals must enhance their efforts to reduce medical and dental malpractice through the establishment of medical and dental malpractice prevention programs and through greater scrutiny of physicians and dentists prior to granting hospital privileges and that increased resources should be devoted

EXPLANATION--Matter in *italics* (underscored) is new; matter in brackets [ ] is old law to be omitted.

LBD11526-01-5

to the investigation and prosecution of professional misconduct. The legislature finds that the public interest further requires that premium levels for physicians and dentists must be restrained to the extent feasible in order to maintain high quality medical services for New York and to explore alternative long-term approaches to the malpractice issue.

§ 2. Paragraph (a) of subdivision one of section twenty-eight hundred three-e of the public health law, as amended by chapter one thousand five of the laws of nineteen hundred eighty-four, is amended to read as follows:

(a) Hospitals and other facilities approved pursuant to this article shall make a report or cause a report to be made within thirty days of the occurrence of any of the following: the suspension, restriction, termination or curtailment of the training, employment, association or professional privileges or the denial of the certification of completion of training of an individual licensed pursuant to the provisions of title eight of the education law or of a medical resident with such facility for reasons related in any way to alleged mental or physical impairment, incompetence, malpractice or misconduct or impairment of patient safety or welfare; the voluntary or involuntary resignation or withdrawal of association or of privileges with such facility to avoid the imposition of disciplinary measures; or the receipt of information which indicates that any professional licensee or medical resident has been convicted of a crime; the denial of staff privileges to a physician if the reasons stated for such denial are related to alleged mental or physical impairment, incompetence, malpractice, misconduct or impairment of patient safety or welfare.

§ 3. Such law is amended by adding two new sections twenty-eight hundred five-j and twenty-eight hundred five-k to read as follows:

§ 2805-j. Medical and dental malpractice prevention program. 1. Every hospital shall maintain a coordinated program for the identification and prevention of medical and dental malpractice. Such program shall include at least the following:

(a) The establishment of a quality assurance committee with the responsibility to review the services rendered in the hospital in order to improve the quality of medical and dental care of patients and to prevent medical and dental malpractice. Such committee shall oversee and coordinate the medical and dental malpractice prevention program and shall insure that information gathered pursuant to the program is utilized to review and to revise hospital policies and procedures. At least one member of the committee shall be a member of the governing board of the hospital who is not otherwise affiliated with the hospital in an employment or contractual capacity;

(b) A medical and dental staff privileges sanction procedure through which credentials, physical and mental capacity and competence in delivering health care services are periodically reviewed as part of an evaluation of staff privileges;

(c) The periodic review of the credentials, physical and mental capacity and competence in delivering health care services of all persons who are employed or associated with the hospital;

(d) A procedure for the prompt resolution of grievances by patients or their representatives related to accidents, injuries, treatment and other events that may result in claims of medical or dental malpractice;

(e) The maintenance and continuous collection of information concerning the hospital's experience with negative health care outcomes and incidents injurious to patients, patient grievances, professional liability premiums, settlements, awards, costs incurred by the hospital for patient injury prevention and safety improvement activities;

(f) The maintenance of relevant and appropriate information gathered pursuant to paragraphs (a) through (e) of this subdivision concerning individual physicians and dentists within the physician's or dentist's personnel or credential file maintained by the hospital;

(g) Education programs dealing with patient safety, injury prevention, staff responsibility to report professional misconduct, the legal aspects of patient care, improved communication with patients and causes of malpractice claims for staff personnel engaged in patient care activities;

(h) Continuing education programs for medical and dental staff in their areas of specialty; and

(i) Policies to ensure compliance with the reporting requirements of section twenty-eight hundred three-e of this article and subdivision eleven of section two hundred thirty of this chapter.

2. Any person who, in good faith and without malice, provides information to further the purposes of the medical and dental malpractice prevention program or who, in good faith and without malice, participates on the quality assurance committee shall not be subject to an action for civil damages or other relief as a result of such activity.

3. The commissioner shall make, adopt, promulgate and enforce such rules and regulations as he may deem appropriate to effectuate the purposes of this section.

§ 2805-k. Investigations prior to granting or renewing privileges. 1. Prior to granting or renewing professional privileges or association of any physician or dentist or hiring a physician or dentist, a hospital or facility approved pursuant to this article shall request from the physician or dentist and the physician or dentist shall be required to provide the following information:

(a) The name of any hospital or facility with or at which the physician or dentist had or has any association, employment, privileges or practice;

(b) Where such association, employment, privilege or practice was discontinued, the reasons for its discontinuation;

(c) Any pending professional medical or dental misconduct proceedings or any pending medical malpractice actions in this state or another state, the substance of the allegations in such proceedings or actions, and any additional information concerning such proceedings or actions as the physician or dentist may deem appropriate;

(d) The substance of the findings in such actions or proceedings and any additional information concerning such actions or proceedings as the physician or dentist may deem appropriate;

(e) A waiver by the physician or dentist of any confidentiality provisions concerning the information required to be provided to hospitals pursuant to this subdivision; and

(f) A verification by the physician or dentist that the information provided by the physician or dentist is true and accurate.

2. Prior to granting privileges or association to any physician or dentist, or hiring a physician or dentist, any hospital or facility approved pursuant to this article shall request from any hospital with or at which such physician or dentist had or has privileges, was associated, or was employed, the following information concerning such physician or dentist:

(a) Any pending professional medical conduct proceedings or any pending medical malpractice actions, in this state or another state;

(b) Any judgment or settlement of a medical malpractice action and any finding of professional misconduct in this state or another; and

(c) Any information required to be reported by hospitals pursuant to section twenty-eight hundred three-e of this article.

3. If requested by the department, a hospital shall provide documentation that, prior to granting privileges, association or employing a physician or dentist, it has complied with the requirements of subdivisions one and two of this section and that, prior to renewing privileges, association or employment, it has complied with the requirements of subdivision one of this section. Copies of the information and documentation required pursuant to subdivisions one and two of this section shall be placed in the physician's or dentist's personnel or credentials file maintained by the hospital.

4. Any hospital which receives a request for information from another hospital pursuant to subdivision one or two of this section shall provide such information concerning the physician or dentist in question to the extent such information is known to the hospital receiving such a request, including the reasons for suspension, termination, curtailment of employment or privileges at the hospital. Any hospital or hospital employee providing such information in good faith shall not be liable in any civil action for the release of such information.

§ 4. Subdivision (d) of section thirty-one hundred one of the civil practice law and rules is amended to read as follows:

(d) [Material prepared for litigation. The following shall not be obtainable unless the court finds that the material can no longer be duplicated because of a change in conditions and that withholding it will result in injustice or undue hardship:

1. any opinion of an expert prepared for litigation; and

2. any writing or anything created by or for a party or his agent in preparation for litigation]

Trial preparation.

1. Experts. (i) Upon request, each party shall identify each person whom the party expects to call as an expert witness at trial and shall disclose in reasonable detail the subject matter on which each expert is expected to testify, the substance of the facts and opinions on which each expert is expected to testify, the qualifications of each expert witness and a summary of the grounds for each expert's opinion. However, where a party for good cause shown retains an expert an insufficient period of time before the commencement of trial to give appropriate notice thereof, the party shall not thereupon be precluded from introducing the expert's testimony at the trial solely on grounds of noncompliance with this paragraph. In that instance, upon motion of any party, made before or at trial, or on its own initiative, the court may make whatever order may be just. In an action for medical or dental malpractice, a party, in responding to a request, may omit the names of medical or dental experts but shall be required to disclose all other information concerning such experts otherwise required by this paragraph.

(ii) Further disclosure concerning the expected testimony of any expert may be obtained only by court order upon a showing of special circumstances and subject to restrictions as to scope and provisions concerning fees and expenses as the court may deem appropriate. However, a party, without court order, may take the testimony of a person authorized to practice medicine or dentistry who is the party's treating

or retained expert, as described in paragraph three of subdivision (a) of this section, in which event any other party shall be entitled to the full disclosure authorized by this article with respect to that expert without court order.

2. Materials. Subject to the provisions of paragraph one of this subdivision, materials otherwise discoverable under subdivision (a) of this section and prepared in anticipation of litigation or for trial by or for another party, or by or for that other party's representative (including an attorney, consultant, surety, indemnitor, insurer or agent), may be obtained only upon a showing that the party seeking discovery has substantial need of the materials in the preparation of the case and is unable without undue hardship to obtain the substantial equivalent of the materials by other means. In ordering discovery of the materials when the required showing has been made, the court shall protect against disclosure of the mental impressions, conclusions, opinions or legal theories of an attorney or other representative of a party concerning the litigation.

§ 5. Such law and rules is amended by adding a new rule thirty-four hundred six to read as follows:

Rule 3406. Mandatory filing and pre-calendar conference in dental and medical malpractice actions. (a) Mandatory filing. Not more than sixty days after issue is joined, the plaintiff in an action to recover damages for dental or medical malpractice shall file with the clerk of the court in which the action is commenced a notice of dental or medical malpractice action, on a form to be specified by the chief administrator of the courts. Together with such notice, the plaintiff shall file: (i) proof of service of such notice upon all other parties to the action; (ii) proof that, if demanded, authorizations to obtain medical, dental and hospital records have been served upon the defendants in the action; and (iii) such other papers as may be required to be filed by rule of the chief administrator of the courts. The time for filing a notice of dental or medical malpractice action may be extended by the court only upon a motion made pursuant to section two thousand four of this chapter.

(b) Pre-calendar conference. The chief administrator of the courts, in accordance with such standards and administrative policies as may be promulgated pursuant to section twenty-eight of article six of the constitution, shall adopt special calendar control rules for actions to recover damages for dental or medical malpractice. Such rules shall require a pre-calendar conference in such an action, the purpose of which shall include, but not be limited to, encouraging settlement, simplifying or limiting issues and establishing a timetable for disclosure, future conferences, and trial. The timetable for disclosure shall provide for the completion of disclosure not later than twelve months after the notice of dental or medical malpractice is filed and shall require that all parties be ready for the trial of the case not later than eighteen months after such notice is filed. The initial pre-calendar conference shall be held after issue is joined in a case but before a note of issue is filed and before a medical malpractice panel hearing, if any, is scheduled. To the extent feasible, the justice convening the pre-calendar conference shall hear and decide all subsequent pre-trial motions in the case and shall be assigned the trial of the case. The chief administrator of the courts also shall provide for the imposition of costs or other sanctions, including imposition of reasonable attorney's fees, dismissal of an action, claim, cross-claim, coun-

terclaim or defense, or rendering a judgment by default for failure of a party or a party's attorney to comply with these special calendar control rules or any order of a court made thereunder. The chief administrator of the courts, in the exercise of discretion, may provide for exemption from the requirement of a pre-calendar conference in any judicial district or a county where there exists no demonstrated need for such conferences.

§ 6. Subdivision (d) of rule forty-one hundred eleven of such law and rules, as added by chapter nine hundred fifty-five of the laws of nineteen hundred seventy-six, is amended to read as follows:

(d) Itemized verdict in medical or dental malpractice actions. In a medical or dental malpractice action the court shall instruct the jury that if the jury finds a verdict awarding damages it shall in its verdict specify the applicable elements of special and general damages upon which the award is based and the amount assigned to each element, including but not limited to medical expenses, dental expenses, loss of earnings, impairment of earning ability, and pain and suffering. In a medical or dental malpractice action, each element shall be further itemized into amounts intended to compensate for damages which have been incurred prior to the verdict and amounts intended to compensate for damages to be incurred in the future. In itemizing amounts intended to compensate for future damages, the jury shall set forth the period of years over which such amounts are intended to provide compensation. In computing said damages, the jury shall be instructed to award the full amount of future damages, as calculated, without reduction to present value.

§ 7. Subdivision (b) of section forty-two hundred thirteen of such law and rules, as amended by chapter seven hundred one of the laws of nineteen hundred eighty-four, is amended to read as follows:

(b) Form of decision. The decision of the court may be oral or in writing and shall state the facts it deems essential. In a medical or dental malpractice action or in an action against a public employer or a public employee who is subject to indemnification by a public employer with respect to such action or both, as such terms are defined in subdivision (b) of section forty-five hundred forty-five, for personal injury or wrongful death arising out of an injury sustained by a public employee while acting within the scope of his public employment or duties, a decision awarding damages shall specify the applicable elements of special and general damages upon which the award is based and the amount assigned to each element, including but not limited to medical expenses, dental expenses, loss of earnings, impairment of earning ability, and pain and suffering. In a medical or dental malpractice action, each element shall be further itemized into amounts intended to compensate for damages which have been incurred prior to the decision and amounts intended to compensate for damages to be incurred in the future. In itemizing amounts intended to compensate for future damages, the court shall set forth the period of years over which such amounts are intended to provide compensation. In computing said damages, the court shall award the full amount of future damages, as calculated, without reduction to present value.

§ 8. Subdivision (a) of section forty-five hundred forty-five of such law and rules, as added by chapter seven hundred one of the laws of nineteen hundred eighty-four, is amended to read as follows:

(a) Action for medical or dental malpractice. In any action for medical or dental malpractice where the plaintiff seeks to recover for the

cost of medical care, dental care, custodial care or rehabilitation services, loss of earnings or other economic loss, evidence shall be admissible for consideration by the court to establish that any such past or future cost or expense was or will, with reasonable certainty, be replaced or indemnified, in whole or in part, from any collateral source such as insurance (except for life insurance), social security (except those benefits provided under title XVIII of the social security act), workers' compensation or employee benefit programs (except such collateral sources entitled by law to liens against any recovery of the plaintiff). If the court finds that any such cost or expense was or will, with reasonable certainty, be replaced or indemnified from any collateral source, it shall reduce the amount of the award by such finding, minus an amount equal to the premiums paid by the plaintiff for such benefits for the two-year period immediately preceding the accrual of such action and minus an amount equal to the projected future cost to the plaintiff of maintaining such benefits. In order to find that any future cost or expense will, with reasonable certainty, be replaced or indemnified by the collateral source, the court must find that the plaintiff is legally entitled to the continued receipt of such collateral source, pursuant to a contract or otherwise enforceable agreement, subject only to the continued payment of a premium and such other financial obligations as may be required by such agreement.

§ 9. Such law and rules is amended by adding a new article fifty-A to read as follows:

ARTICLE 50-A

PERIODIC PAYMENT OF

JUDGMENTS IN MEDICAL AND DENTAL MALPRACTICE ACTIONS

5031. Basis for determining judgment to be entered.
5032. Form of security.
5033. Posting and maintaining security.
5034. Failure to make payment.
5035. Effect of death of judgment creditor.
5036. Adjustment of payments.
5037. Settlements.
5038. Assignment of periodic installments.
5039. Duties of superintendent of insurance.

§ 5031. Basis for determining judgment to be entered. In order to determine what judgment is to be entered on a verdict in an action to recover damages for dental or medical malpractice under this article, the court shall proceed as follows:

(a) The court shall apply to the findings of past and future damages any applicable rules of law, including set-offs, credits, comparative negligence pursuant to section fourteen hundred eleven of this chapter, additurs, and remittiturs, in calculating the respective amounts of past and future damages claimants are entitled to recover and defendants are obligated to pay.

(b) The court shall enter judgment in lump sum for past damages, for future damages not in excess of two hundred fifty thousand dollars, and for any damages, fees or costs payable in lump sum or otherwise under subdivisions (c) and (d) of this section. For the purposes of this section, any lump sum payment of a portion of future damages shall be deemed to include the elements of future damages in the same proportion as such elements comprise of the total award for future damages as determined by the trier of fact.

(c) Payment of litigation expenses and that portion of the attorney's fees related to past damages shall be payable in a lump sum. Payment of that portion of the attorney's fees related to future damages for which, pursuant to this article, the claimant is entitled to a lump sum payment shall also be payable in a lump sum. Payment of that portion of the attorney's fees related to the future periodically paid damages shall also be payable in a lump sum, based on the present value of the annuity contract purchased to provide payment of such future periodically paid damages pursuant to subdivision (a) of this section.

(d) Upon election of a subrogee or a lien holder, including an employer or insurer who provides workers' compensation, filed within the time permitted by rule of court, any part of future damages allocable to reimbursement of payments previously made by the subrogee or the lien holder shall be paid in lump sum to the subrogee or the lien holder in such amount as is calculable and determinable under the law in effect at the time of such payment.

(e) With respect to awards of future damages in excess of two hundred fifty thousand dollars in an action to recover damages for dental or medical malpractice, the court shall enter judgment as follows:

After making any adjustments prescribed by subdivisions (b), (c) and (d) of this section, the court shall enter a judgment for the amount of the present value of an annuity contract that will provide for the payment of the remaining amounts of future damages in periodic installments. The present value of such contract shall be determined in accordance with generally accepted actuarial practices by applying the discount rate in effect at the time of the award to the full amount of the remaining future damages, as calculated pursuant to this subdivision. The period of time over which such periodic payments shall be made and the period of time used to calculate the present value of the annuity contract shall be the period of years determined by the trier of fact in arriving at the itemized verdict; provided, however, that the period of time over which such periodic payments shall be made and the period of time used to calculate the present value for damages attributable to pain and suffering shall be ten years or the period of time determined by the trier of fact, whichever is less. The court, as part of its judgment, shall direct that the defendants and their insurance carriers shall be required to offer and to guarantee the purchase and payment of such an annuity contract. Such annuity contract shall provide for the payment of the annual payments of such remaining future damages over the period of time determined pursuant to this subdivision. The annual payment for the first year shall be calculated by dividing the remaining amount of future damages by the number of years over which such payments shall be made and the payment due in each succeeding year shall be computed by adding four percent to the previous year's payment. Where payment of a portion of the future damages terminates in accordance with the provisions of this article, the four percent added payment shall be based only upon that portion of the damages that remains subject to continued payment. Unless otherwise agreed, the annual sum so arrived at shall be paid in equal monthly installments and in advance.

(f) With the consent of the claimant and any party liable, in whole or in part, for the judgment, the court shall enter judgment for the amount found for future damages attributable to said party as such are determinable without regard to the provisions of this article.

§ 5032. Form of security. Security authorized or required for payment of a judgment for periodic installments entered in accordance with this article must be in the form of an annuity contract, executed by a qualified insurer and approved by the superintendent of insurance pursuant to section five thousand thirty-nine of this article, and approved by the court.

§ 5033. Posting and maintaining security. (a) If the court enters a judgment for periodic installments, each party liable for all or a portion of such judgment shall separately or jointly with one or more others post security in an amount necessary to secure payment for the amount of the judgment for future periodic installments within thirty days after the date the judgment is entered. A liability insurer having a contractual obligation and any other person adjudged to have an obligation to pay all or part of a judgment for periodic installments on behalf of a judgment debtor is obligated to post security to the extent of its contractual or adjudged obligation if the judgment debtor has not done so.

(b) A judgment creditor or successor in interest and any party having rights may move that the court find that security has not been posted and maintained with regard to a judgment obligation owing to the moving party. Upon so finding, the court shall order that security complying with this article be posted within thirty days. If security is not posted within that time and subdivision (c) of this section does not apply, the court shall enter a judgment for the lump sum as such sum is determinable under the law without regard to this article.

(c) If a judgment debtor who is the only person liable for a portion of a judgment for periodic installments fails to post and maintain security, the right to lump sum payment described in subdivision (b) of this section applies only against that judgment debtor and the portion of the judgment so owed.

(d) If more than one party is liable for all or a portion of a judgment requiring security under this article and the required security is posted by one or more but fewer than all of the parties liable, the security requirements are satisfied and those posting security may proceed under subdivision (b) of this section to enforce rights for security or lump sum payment to satisfy or protect rights of reimbursement from a party not posting security.

§ 5034. Failure to make payment. If at any time following entry of judgment, a judgment debtor fails for any reason to make a payment in a timely fashion according to the terms of this article, the judgment creditor may petition the court which rendered the original judgment for an order requiring payment by the judgment debtor of the outstanding payments in a lump sum. In calculating the amount of the lump sum judgment, the court shall total the remaining periodic payments due and owing to the judgment creditor, as calculated pursuant to subdivision (b) of section five thousand thirty-one of this article, and shall not convert these amounts to their present value. The court may also require the payment of interest on the outstanding judgment.

§ 5035. Effect of death of judgment creditor. (a) Unless otherwise agreed between the parties at the time security is posted pursuant to section five thousand thirty-three of this article, in all cases covered by this article [illegible]ich future damages are payable in periodic installments, the liabil[illegible]ayment of any installments for medical, dental or other costs of hea[illegible] care or noneconomic loss not yet due at the

death of the judgment creditor terminates upon the death of the judgment creditor.

(b) The portion of any periodic payment allocable to loss of future earnings shall not be reduced or terminated by reason of the death of the judgment creditor, but shall be paid to persons to whom the judgment creditor owed a duty of support immediately prior to his death to the extent that such duty of support exists under applicable law at the time of the death of the judgment creditor. Such payments to such persons shall continue for the remainder of the period as originally found by the jury or until such duty of support ceases to exist, whichever occurs first. In such cases, the court which rendered the original judgment may, upon petition of any party in interest, modify the judgment to award and apportion the future payments of such unpaid future damages in accordance with this subdivision which apportioned amounts shall be payable in the future as provided for in this article. In the event that the judgment creditor does not owe a duty of support to any person at the time of the death of the judgment creditor or such duty ceases to exist, the remaining payments shall be considered part of the estate of the judgment creditor. In such cases, the court which rendered the original judgment may, upon petition of any party in interest, convert those portions of such periodic payments allocable to the loss of future earnings to a lump sum by calculating the present value of such payments in order to assist in the settlement of the estate of the judgment creditor.

§ 5036. Adjustment of payments. (a) If, at any time after entry of judgment, a judgment creditor or successor in interest can establish that the continued payment of the judgment in periodic installments will impose a hardship, the court may, in its discretion, order that the remaining payments or a portion thereof shall be made to the judgment creditor in a lump sum. The court shall, before entering such an order, find that: (i) unanticipated and substantial medical, dental or other needs have arisen that warrant the payment of the remaining payments, or a portion thereof, in a lump sum; (ii) ordering such a lump sum payment would not impose an unreasonable financial burden on the judgment debtor or debtors; (iii) ordering such a lump sum payment will accommodate the future medical and other needs of the judgment creditor; and (iv) ordering such a lump sum payment would further the interests of justice.

(b) If a lump sum payment is ordered by the court, such lump sum shall be calculated on the basis of the present value of remaining periodic payments, or portions thereof, that are converted into a lump sum payment. The remaining future periodic payments, if any, shall be reduced accordingly.

§ 5037. Settlements. Nothing in this article shall be construed to limit the right of a plaintiff, defendant or defendants and any insurer to settle dental or medical malpractice claims as they consider appropriate and in their complete discretion.

§ 5038. Assignment of periodic installments. An assignment of or an agreement to assign any right to periodic installments for future damages contained in a judgment entered under this article is enforceable only as to amounts: (a) to secure payment of alimony, maintenance, or child support; (b) for the cost of products, services, or accommodations provided or to be provided by the assignee for medical, dental or other health care; or (c) for attorney's fees and other expenses of litigation incurred in securing the judgment.

§ 5039. Duties of superintendent of insurance. The superintendent of insurance shall establish rules and procedures for determining which insurers, self-insurers, plans or arrangements are financially qualified to provide the security required under this article and to be designated as qualified insurers.

§ 10. Such law and rules is amended by adding a new section eighty-three hundred three-a to read as follows:

§ 8303-a. Costs upon frivolous claims and counterclaims in dental and medical malpractice actions. (a) If in a dental or medical malpractice action, an action or claim is commenced or continued by a plaintiff or a counterclaim, defense or cross claim is commenced or continued by a defendant that is found, at any time during the proceedings or upon judgment, to be frivolous by the court, the court shall award to the successful party costs and reasonable attorney's fees not exceeding ten thousand dollars.

(b) The costs and fees awarded under subdivision (a) of this section shall be assessed either against the party bringing the action, claim, cross claim, defense or counterclaim or against the attorney for such party, or against both, as may be determined by the court, based upon the circumstances of the case. Such costs and fees shall be in addition to any other judgment awarded to the successful party.

(c) In order to find the action, claim, counterclaim, defense or cross claim to be frivolous under subdivision (a) of this section, the court must find one or more of the following:

(i) the action, claim, counterclaim, defense or cross claim was commenced, used or continued in bad faith, solely to delay or prolong the resolution of the litigation or to harass or maliciously injure another;

(ii) the action, claim, counterclaim, defense or cross claim was commenced or continued in bad faith without any reasonable basis in law or fact and could not be supported by a good faith argument for an extension, modification or reversal of existing law. If the action, claim, counterclaim, defense or cross claim was promptly discontinued when the party or the attorney learned or should have learned that the action, claim, counterclaim, defense or cross claim lacked such a reasonable basis, the court may find that the party or the attorney did not act in bad faith.

§ 11. Subdivision five of section sixty-five hundred nine of the education law is amended by adding a new paragraph (d) to read as follows:

(d) Having his license to practice medicine revoked, suspended or having other disciplinary action taken, or having his application for a license refused, revoked or suspended or having voluntarily or otherwise surrendered his license after a disciplinary action was instituted by a duly authorized professional disciplinary agency of another state, where the conduct resulting in the revocation, suspension or other disciplinary action involving the license or refusal, revocation or suspension of an application for a license or the surrender of the license would, if committed in New York state, constitute professional misconduct under the laws of New York state.

§ 12. Subdivision eleven of section sixty-five hundred nine of such law, as added by chapter three hundred forty of the laws of nineteen hundred eighty, is amended to read as follows:

(11) A violation of section twenty-eight hundred three-d or twenty-eight hundred five-k of the public health law.

§ 13. Section six thousand five hundred twenty-four of such law is amended by adding a new subdivision ten to read as follows:

(10) For every license or registration issued after the effective date of this subdivision, an additional fee of ninety dollars shall be paid and deposited in the general fund for the purpose of increasing expenditures made pursuant to section two hundred thirty of the public health law in relation to the operation of the office of professional medical conduct within the department of health. The amount of the funds expended as a result of such increase shall not be greater than such additional fees collected over the licensure period.

§ 14. Subdivision one of section one hundred forty-eight-a of the judiciary law, as amended by chapter ninety-five of the laws of nineteen hundred seventy-eight, is amended to read as follows:

1. Each appellate division of the supreme court shall establish within its judicial department a medical malpractice panel or panels to facilitate the disposition of medical malpractice actions, including malpractice actions where a hospital is a named defendant, in the supreme court; provided, however, the provisions of this section shall not apply to the disposition of such actions in the fifth judicial district or in the county of Suffolk. The number and locations of such panels and the rules governing the operation thereof shall be determined by the respective appellate divisions.

§ 15. Subdivisions two, three and four of section four hundred seventy-four-a of such law, as added by chapter nine hundred fifty-five of the laws of nineteen hundred seventy-six, are amended to read as follows:

2. Notwithstanding any inconsistent judicial rule, a contingent fee in a medical or dental malpractice action shall not exceed the amount of compensation provided for in [either of] the following [schedules] schedule:

[SCHEDULE A]

[50] 30 percent of the first [$1,000] $250,000 of the sum recovered;
[40] 25 percent of the next [$2,000] $250,000 of the sum recovered;
[35] 20 percent of the next [$22,000] $500,000 of the sum recovered;
[25] 15 percent of the next $250,000 of the sum recovered;
10 percent of any amount over [$25,000] $1,250,000 of the sum recovered[; or

SCHEDULE B

A percentage not exceeding thirty-three and one-third percent of the sum recovered, if the initial contractual arrangement between the client and the attorney so provides, in which event the procedure hereinafter provided for making application for additional compensation because of extraordinary circumstances shall not apply].

3. Such [percentage] percentages shall be computed on the net sum recovered after deducting from the amount recovered expenses and disbursements for expert testimony and investigative or other services properly chargeable to the enforcement of the claim or prosecution of the action. In computing the fee, the costs as taxed, including interest upon a judgment, shall be deemed part of the amount recovered. For the following or similar items there shall be no deduction in computing such percentages: liens, assignments or claims in favor of hospitals, for medical care, dental care and treatment by doctors and nurses, or of self-insurers or insurance carriers.

4. In the event that claimant's or plaintiff's attorney believes in good faith that the fee [schedules] schedule set forth in subdivision two of this section, because of extraordinary circumstances, will not give him adequate compensation, application for greater compensation may

be made upon affidavit with written notice and an opportunity to be heard to the claimant or plaintiff and other persons holding liens or assignments on the recovery. Such application shall be made to the justice of the trial part to which the action had been sent for trial; or, if it had not been sent to a part for trial, then to the justice presiding at the trial term calendar part of the court in which the action had been instituted; or, if no action had been instituted, then to the justice presiding at the trial term calendar part of the Supreme Court for the county in the judicial department in which the attorney has an office. Upon such application, the justice, in his discretion, if extraordinary circumstances are found to be present, and without regard to the claimant's or plaintiff's consent, may fix as reasonable compensation for legal services rendered an amount greater than that specified in the [schedules] schedule set forth in subdivision two of this section, provided, however, that such greater amount shall not exceed the fee fixed pursuant to the contractual arrangement, if any, between the claimant or plaintiff and the attorney. If the application is granted, the justice shall make a written order accordingly, briefly stating the reasons for granting the greater compensation; and a copy of such order shall be served on all persons entitled to receive notice of the application.

§ 16. The insurance law is amended by adding a new section two thousand three hundred forty-three to read as follows:

§ 2343. Medical malpractice insurance rates; special additional provisions regarding such rates. (a) Whereas the provisions of a chapter of the laws of nineteen hundred eighty-five regarding medical and dental malpractice will have both a prospective and retrospective effect upon the loss experience of physicians, dentists and hospitals professional liability insurers, including the medical malpractice insurance association, the superintendent is directed forthwith to review rates previously in effect for the period commencing July first, nineteen hundred eighty-four and ending June thirtieth, nineteen hundred eighty-five, and, where appropriate, require modification of such rates for such period.

(b) Any such modified rate shall remain in effect as a provisional rate for the period commencing July first, nineteen hundred eighty-five and ending on November thirtieth, nineteen hundred eighty-five. The superintendent, subsequent to December first, nineteen hundred eighty-five, shall approve final rates for the period commencing July first, nineteen hundred eighty-five and ending June thirtieth, nineteen hundred eighty-six. No insurer shall have the duty to file for final rates for the period commencing July first, nineteen hundred eighty-five prior to December first, nineteen hundred eighty-five.

(c) Notwithstanding any other provision of this chapter, no application for an order of rehabilitation or liquidation of a domestic insurer whose primary liability arises from the business of medical malpractice insurance, as that term is defined in subsection (b) of section five thousand five hundred one of this chapter, shall be made on the grounds specified in subsection (a) or (c) of section seven thousand four hundred two of this chapter at any time prior to December first, nineteen hundred eighty-five.

(d) The superintendent shall promulgate a regulation, which may be amended from time to time, establishing a physicians professional liability insurance merit rating plan which reflects an individual physician's or surgeon's experience with respect to incidents or occur-

rences of alleged medical malpractice. The regulation shall establish standards and limitations intended to insure that merit rating plans are reasonable and are not unfairly discriminatory, inequitable, violative of public policy or otherwise contrary to the best interests of the people of this state. Such regulation shall include:

(1) reasonable standards to be applied in arriving at premium rates, surcharges and discounts based on an evaluation of the hazards of the insured, geographical area, specialties of practice, past and prospective loss and expense experience for medical malpractice insurance written and to be written in this state, trends in the frequency and severity of losses, and the limited nature, if any, of the practice of the insured;

(2) rules for recognizing experience of individual risks;

(3) any other factors deemed relevant in a system of merit rating for the purpose of establishing equitable merit rates.

The superintendent shall also consider, in establishing such regulation, whether premium rates unfairly burden physicians who are initiating their practice, those who are transitioning to retirement or those who practice part-time or hold academic positions.

Insurers shall review merit rating plans which were approved by the superintendent prior to the promulgation of the regulation required by this subsection and shall, before January first, nineteen hundred eighty-six, file with the superintendent statements that their merit rating plans conform with the regulation, or file an appropriate plan or amendments to their existing plans which will bring them into compliance with the standards of the regulation. Any such amendments shall become effective upon approval by the superintendent.

§ 17. Such law is amended by adding a new section three thousand four hundred thirty-seven to read as follows:

§ 3437. Insurance contracts for medical malpractice; availability of additional coverages. (a) Every authorized insurer which issues a policy of medical or dental malpractice insurance with primary levels of insurance in an amount equal to or greater than one million dollars for each claimant under that policy and three million dollars for all claimants under that policy in any one year must make available, and, if requested by the policyholder, provide coverage of at least one million dollars per claimant and three million dollars for all claimants in excess of such primary levels of insurance. Such insurers shall, subject to the approval of the superintendent, make available and, if requested by the policyholder, provide additional excess coverage in an amount requested by such policyholder.

(b) With respect to the excess coverage and additional excess coverage required to be made available on and after July first, nineteen hundred eighty-five by subsection (a) of this section, the superintendent shall establish and promulgate provisional rates to be charged for such excess coverage and additional excess coverage. The superintendent, subsequent to December first, nineteen hundred eighty-five, shall approve final rates for such excess coverage and additional excess coverage for the period commencing July first, nineteen hundred eighty-five and ending June thirtieth, nineteen hundred eighty-six. No insurer shall have the duty to file for final rates for such excess coverage or additional excess coverage for the period commencing July first, nineteen hundred eighty-five prior to December first, nineteen hundred eighty-five.

§ 18. Paragraph one of subsection (e) of section five thousand five hundred two of such law is amended to read as follows:

(1) To issue, or to cause to be issued, policies of insurance to physician applicants subject to primary limits specified in the plan of operation not in excess of one million dollars for each claimant under one policy and three million dollars for all claimants under one policy in any one year, and excess coverage as provided in this paragraph. Each applicant shall be entitled to purchase a policy providing primary limits not to exceed one million dollars for each claimant and three million dollars for all claimants in any one year. In addition, any applicant insured by the association in an amount equal to or greater than one million dollars for each claimant and three million dollars for all claimants in any one year, or any other applicant covered under a policy or policies providing such primary levels of insurance against liability for medical or dental malpractice that is issued by an authorized insuror, shall be entitled to purchase a policy from the association providing excess coverage of at least one million dollars per claimant and three million dollars for all claimants in any one year. The association shall, subject to the approval of the superintendent, make available, and if requested by the applicant, provide additional excess coverage in an amount requested by such applicant. With respect to the coverage required to be made available on and after July first, nineteen hundred eighty-five by this paragraph, the superintendent shall establish and promulgate provisional rates to be charged for such excess coverage and additional excess coverage. The superintendent, subsequent to December first, nineteen hundred eighty-five, shall approve final rates for such excess coverage for the period commencing July first, nineteen hundred eighty-five and ending June thirtieth, nineteen hundred eighty-six. The association shall not have the duty to file for final rates for such excess coverage and additional excess coverage for the period commencing July first, nineteen hundred eighty-five and prior to December first, nineteen hundred eighty-five.

§ 19. Every general hospital which maintains facilities for providing emergency medical care shall purchase a policy for excess insurance coverage, as authorized by paragraph one of subsection e of section five thousand five hundred two and section three thousand four hundred thirty-seven of the insurance law, or shall provide equivalent excess coverage in a form approved by the superintendent of insurance, for medical or dental malpractice occurrences between July first, nineteen hundred eighty-five and June thirtieth, nineteen hundred eighty-six for physicians or dentists requesting such coverage and having professional privileges in such hospital who, from time to time, provide emergency medical or dental care in such hospital to persons who require such care, provided, however, that such physicians or dentists must have in force an individual policy, from an insuror licensed in this state of primary malpractice insurance coverage in amounts of no less than one million dollars for each claimant and three million dollars for all claimants under that policy during the period of such excess coverage for such occurrences. During such period, such policy for excess coverage must, when combined with the physician's or dentist's primary malpractice insurance coverage, total an aggregate level of two million dollars for each claimant and six million dollars for all claimants from all such policies with respect to occurrences in such year. In the event that a physician or dentist has professional privileges in more than one hospital, such excess coverage shall be purchased or provided by the hospital designated by such physician or dentist as the hospital with which the physician or dentist is primarily affiliated.

§ 20. Notwithstanding the provisions of subdivision five of section twenty-eight hundred seven-a of the public health law, the commissioner of health or his designees shall adjust the inpatient revenue cap for those general hospitals which are required to purchase a policy for excess insurance coverage for medical malpractice occurrences or who provide equivalent excess insurance coverage pursuant to section nineteen of this act. An adjustment shall be made to the inpatient revenue cap of such hospitals to reflect the cost of such excess coverage for the period of July first, nineteen hundred eighty-five to December thirty-first, nineteen hundred eighty-five. Such adjustment shall be made by the commissioner of health within sixty days of submission of adequate evidence of costs incurred for such excess coverage.

§ 21. Notwithstanding the provisions of article twenty-eight of the public health law relating to rate adjustment, the commissioner of health or his designee shall adjust the established rate for those general hospitals which are required to purchase a policy for excess insurance coverage for medical malpractice occurrences or who provide equivalent excess coverage pursuant to section nineteen of this act. An adjustment effective January first, nineteen hundred eighty-six, shall be made to the established rate to reflect the cost of such excess coverage for the period January first, nineteen hundred eighty-six to June thirtieth, nineteen hundred eighty-six and shall not be carried forward.

§ 22. The chief administrator of the courts shall conduct a study of the impact of section fourteen of this act upon the disposition of medical malpractice actions in the fifth judicial district and in the county of Suffolk, as compared to medical malpractice actions in the seventh judicial district and in the county of Nassau. On or before January first, nineteen hundred eighty-eight, the chief administrator shall prepare and transmit to the legislature, the governor and the chief judge of the court of appeals a report of his findings, including but not limited to numbers of actions brought, the speed with which cases reached final disposition, and the impact of the panels on the adjudication of the action, together with any appropriate recommendations.

§ 23. Severability. If any provision of any section of this act shall be held void or unconstitutional, all other provisions and all other sections of this act which are not expressly held to be void or unconstitutional shall continue in full force and effect.

§ 24. Appropriation. The sum of two million dollars ($2,000,000), or so much thereof as may be necessary, is hereby appropriated to the department of health from any moneys in the state treasury in the general fund to the credit of the state purposes account not otherwise appropriated, to improve and expand the operations of the office of professional medical conduct. Such sum shall be payable on the audit and warrant of the state comptroller on vouchers certified or approved by the commissioner of health, or his duly designated representative in the manner prescribed by law.

§ 25. This act shall take effect July first, nineteen hundred eighty-five; provided, however, that: section four of this act shall be applicable to any actions commenced on or after such date; sections five, six, seven, eight, nine and ten of this act shall be applicable to any action for dental or medical malpractice commenced on or after such date; section fourteen of this act shall apply to medical malpractice actions for which a medical malpractice panel hearing has not been conducted by such date; section fifteen of this act shall be applicable to any retainer agreement executed on or after such date; section three

thousand four hundred thirty-seven of the insurance law, as added by section seventeen of this act, shall be of no further force or effect on and after July first, nineteen hundred eighty-six when upon such date such section of the insurance law shall be deemed repealed; the amendment made by section eighteen of this act to paragraph one of subsection (e) of section five thousand five hundred two of the insurance law shall be of no further force or effect on and after July first, nineteen hundred eighty-six when upon such date the provisions of paragraph one of subsection (e) of section five thousand five hundred two of the insurance law as they existed immediately before the effective date of section eighteen of this act shall be deemed revived and in full force or effect on and after such date; section nineteen of this act shall be of no further force or effect on and after July first, nineteen hundred eighty-six; section twenty of this act shall be of no further force or effect on and after December thirty-first, nineteen hundred eighty-five; and except that section twenty-one of this act shall take effect on January first, nineteen hundred eighty-six and shall be of no further force or effect on and after July first, nineteen hundred eighty-six.

Alaska State Legislature
Senate

Official Business

Pouch V
State Capitol
Juneau, Alaska 99811

February 21, 1986

The Honorable Fred Zharoff
Chairman
Senate Labor and Commerce
Committee
P.O. Box V
Juneau, Alaska 99811

Dear Chairman Zharoff:

All legislators realize the insurance problems of our constituents across Alaska.

Many of us are reluctant, however, to adopt wholesale changes in the law of torts. The principles of torts have evolved through judicial decisions, here and elsewhere in our country, over the centuries. Personally, I am hesitant to support any abrupt changes that would represent legislative intervention into a process of case-by-case development of the law.

That is especially true inasmuch as we do not know whether changes in tort law will have significant effects upon the insurance market place.

At the same time, I do believe we can make certain changes that may ameliorate the problems of insurance premium-payers today.

That is why I have offered SB 392, now before your Committee. I believe that the changes proposed in SB 392 would be productive, and that the Legislature could monitor its effects in the market place.

SB 392 would apply in certain actions for mental or dental malpractice, or where personal injuries are sustained by a minor who recovers a verdict, or where day care facilities or nurseries are defendants.

I have selected these particular areas because the problems of the health care community are well known; some

doctors are giving up their specialties or practices, or are practicing with no insurance at all. These trends are not good for the public.

The day care business is often only marginally profitable in the first place. The effects, therefore, of a dramatic rise in insurance premiums, resulting from a few well-publicized cases of child sexual abuse elsewhere in the country, are extremely serious. Like medical and dental care, day care is of critical importance to our economy and quality of life.

Lump sum payments when a minor has suffered a severe personal injury are often not in the minor's best interests. The proceeds of a judgment or recovery pursuant to settlement may not be used for the benefit of the minor. By the time the minor attains the age of majority, or maturity, important choices have already been made that will control the minor's financial destiny. Thus, by allowing a payment of a portion of the recovery to be paid in instalments, through approved, secured, annuity plans, SB 329 would often inure to the benefit of the injured person, while reducing the costs of the judgment debtor and the judgment debtor's insurance carrier.

I believe the bill is well balanced. It allows for the defendant to request that a portion of itemized damages for future loss to be paid through an approved annuity contract that is interest-bearing. The director of insurance would have to approve the annuity contract before it could be accepted by the court. If any instalment is not paid when due, the judgment creditor may obtain an order requiring that all outstanding payments be remitted by lump sum, without discount to present value.

On the other hand, if the judgment creditor can show genuine hardship, the court may order a lump sum satisfaction of the judgment.

If the judgment creditor dies, the liability to pay for future pain and suffering, or health care costs, terminates. However, the dependents or heirs of the judgment creditor would be entitled to receive after the judgment creditor's death money representing lost future earnings.

In summary, this bill calls for using the "structured settlement" approach in certain cases, and is limited to actions where the recovery for future loss exceeds $250,000. It will save defendants and insurance carriers money, but it

will not involve any changes to the law of negligence or tort liability, since it reaches only to the question of how verdicts are to be itemized and how a judgment is to be paid.

It is not a perfect answer to the issues before the legislature, but it is a sound piece that deserves, I think, discussion and consideration.

I look forward to discussing the bill with the Committee at its earliest opportunity.

With best wishes, I am

Sincerely,

Joe P. Josephson
State Senator

JPJ:rak

PROGRAM BILL # 118

AN ACT

to amend the general municipal law, the insurance law, the education law and the local finance law, in relation to making available to municipalities a system of self-insurance, reciprocal insurance, joint insurance funding, and making certain conforming changes in relation thereto, the cancellation and renewal of commercial risk, municipal risk and professional liability insurance policies, the issuance of property/casualty insurance on a group basis for commercial risks, municipal risks and professional liability; and to amend the civil practice law and rules, in relation to limiting the li-

ability of public entities and public employees and periodic payment by public entities and public employees of certain judgments against them; and repealing sections three thousand four hundred twenty-six and three thousand four hundred twenty-seven of the insurance law relating to the termination of product liability and professional liability insurance policies

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

Section 1. Legislative intent. The legislature finds that recent increases in the cost of commercial insurance for municipalities has made it difficult to obtain adequate protection at reasonable cost.

The legislature finds that the state can take several steps that would provide alternatives for local officials faced with increasing costs for insurance, improve the municipal insurance information system to accurately reflect local government risk, and recognize the impact of pressures within the marketplace on questions of cost and availability of coverage.

One important step is state authorization for local governments to form and participate in insurance pools. Properly managed insurance pools can result in both cost savings and cost stability. Provisions contained in this act provide for minimum standards that are intended as a prerequisite that will facilitate proper management and operating practices.

The legislature also finds that a reciprocal insurer form of organization is well suited to achieve the objectives of cost containment and availability of coverage for municipalities. In order to provide an environment which will help local officials to obtain adequate protection at reasonable cost, the legislature hereby enacts the following provisions.

§ 2. Section six-n of the general municipal law, as added by chapter six hundred eighty-four of the laws of nineteen hundred seventy-nine, paragraph d of subdivision nine as amended by chapter eight hundred five of the laws of nineteen hundred eighty-four and subdivision eleven as amended by chapter three hundred seventy-seven of the laws of nineteen hundred eighty-four, is amended to read as follows:

§ 6-n. [Liability and casualty reserve fund] Self-insurance reserve fund; self-insurance by municipal corporations. 1. a. "Municipal corporations", as used in this section, shall mean a municipal corporation, as defined in section two of this chapter, school district[,] [except a school district in a city with a population of one hundred twenty-five thousand or more], board of cooperative educational services, fire district, a district corporation, a special district and a special improvement district governed by a separate board of [commissioner] commissioners.

b. "Judgments", "actions" and "claims", as used in this section, shall mean those judgments, actions and claims against the municipal corporation [that are founded upon tort or that arise out of any acts or omissions of officers or employees of the municipal corporation that result in personal injuries or property damage if such officers or employees, at the time the damages were sustained, were executing or performing, or in good faith purporting to exercise or perform, their powers and duties] involving those types of protection for which a municipal corporation has elected to self-insure pursuant to subdivision two of this section.

2. Notwithstanding any provision of law to the contrary, the governing board of a municipal corporation which is otherwise authorized or required by general, special or local law, charter, rule or regulation to obtain and maintain any type of insurance as described in section one thousand one hundred thirteen of the insurance law, except those specified in paragraphs one, two, three, eighteen and twenty-three of subsection (a) of such section, for municipal, school or fire purposes, from any insurance company created by or under the laws of this state or any insurance company authorized by law to transact business in this state,

is hereby authorized to elect to act as a self-insurer either in whole or in part for any or all types of protection it is otherwise authorized or required to obtain and maintain from any such insurance company.

3. The governing board of any municipal corporation which is, or shall hereafter become, a self-insurer pursuant to subdivision two of this section may establish a reserve fund to be known as [a liability and casualty reserve fund] the self-insurance reserve fund of such municipal corporation, provided, however, no municipal corporation shall establish a reserve fund pursuant to this section for any type of coverage authorized in subdivision two of this section if such municipal corporation has already established a reserve fund for such purpose under any other provision of law.

[3] 4. There may be paid into such fund:

a. Such amounts as may be provided by budgetary appropriations;

b. Amounts from any other fund authorized by this chapter by resolution subject to permissive referendum; and

c. Such other funds as may be legally appropriated.

[4] 5. The cash balance of such fund at the end of any fiscal year shall not exceed the greater of one hundred thousand dollars or five per centum of the total budget for such fiscal year. The amount paid into such fund during any fiscal year shall not exceed the greater of thirty-three thousand dollars or [one and two-thirds] three per centum of the total budget for such fiscal year.

[5] 6. The moneys in such fund shall be deposited in one or more of the banks or trust companies designated in the manner provided by law as depositories of the funds of such municipal corporation. The governing board, or the chief fiscal officer or officer having custody of such

money of such municipal corporation, if the governing board shall delegate such duty to him, may invest the moneys in such fund in obligations specified in section six-f of this chapter; provided, however, that moneys of school districts and boards of cooperative educational services may be invested in obligations specified in section seventeen hundred twenty-three-a of the education law. Any interest earned or capital gain realized on the money so deposited or invested shall accrue to and become part of such fund.

[6] 7. The chief fiscal officer shall account for this fund separate and apart from all other funds of the municipal corporation. Such accounting shall show: the source, date and amount of each sum paid into the fund; the interest earned by such fund; capital gains or losses resulting from the sale of investments of this fund; and for each type of protection the order, source thereof, date and amount of each payment from this fund; the assets of the fund, indicating cash balance and a schedule of investments. The chief fiscal officer, within sixty days of the end of each fiscal year, shall furnish a detailed report of the operation and condition of this fund to the governing board.

[7. Notwithstanding any provision of law to the contrary, municipal corporations, shall not have the power to enter into agreements, among themselves or one for the other, to pool their reserve fund established pursuant to subdivision two of this section for the payment of judgments, actions and claims.]

8. The chief fiscal officer shall also keep a separate account within the self-insurance reserve fund for each type of protection the municipal corporation elects to self-insure pursuant to subdivision two of this section.

9. Any action or claim shall be compromised or settled by the governing board, officer or employee of the municipal corporation authorized to settle or compromise actions or claims on behalf of the municipal corporation.

[9] 10. An expenditure may be made from this fund for the payment of all or part of the cost, including interest, of:

a. Judgments;

b. Actions that have been compromised or settled and that have been approved by the court in which the action or proceeding is pending;

c. Claims that have been settled or compromised and that have been approved by a justice of the supreme court of the judicial district in which the municipal corporation is located;

d. The uninsured portion of any loss to property owned by a municipal corporation if such loss is one for which insurance is authorized pursuant to paragraphs four, five, six, nine, ten, twelve and subparagraph (A) of paragraph seven of subsection (a) of section one thousand one hundred thirteen of the insurance law.

e. Expert or professional services rendered in connection with the investigation, adjustment or settlement of claims, actions or judgments.

f. Any or all of the contribution required to subscribe to a reciprocal insurer, as defined in subsection (a) of section one hundred seven of the insurance law, or to participate in a joint insurance fund, as defined in section one hundred nineteen-ooo of this chapter.

[10] 11. The order of the court or the justice approving such settlement or compromise may be granted upon motion of the body, officer or employee of the municipal corporation authorized to do so, supported by an affidavit setting forth the cause of action or claim against the municipal corporation and also such other information which, in its or

his opinion, will enable the court or justice to arrive at a determination that such compromise or settlement is just, reasonable and to the interest of the municipal corporation. Such body, officer or employee may also present the affidavit of other persons in support of such motion. The court or the justice, in order to arrive at such a determination, may require such body, officer or employee to present additional information by a supplementary affidavit or affidavits or may require other persons to present additional information by their affidavits.

[11] 12. Notwithstanding subdivisions [eight] nine and [nine] ten of this section, the governing body of any municipal corporation may [make] approve an expenditure from this fund, without judicial approval, for the compromise or settlement of any action or claim when such municipal corporation is a subscriber to a reciprocal insurer, as defined in subsection (a) of section one hundred seven of the insurance law, or is a participant in a joint insurance fund, as defined in section one hundred nineteen-ooo of this chapter, or where the amount of such settlement or compromise does not exceed [ten] twenty-five thousand dollars.

[12] 13. The members of the governing board shall be guilty of a misdemeanor if they:

a. Authorize a withdrawal from this fund for any purpose except as provided in this section; or

b. Expend any money withdrawn from this fund for a purpose other than as provided in this section.

[13] 14. If, after the establishment of such fund, the municipality determines that such fund is no longer needed, the moneys remaining in such fund may be transferred to any other reserve fund of the municipal corporation authorized by this chapter that is comprised of moneys which were raised on the same tax base as the moneys in the reserve fund esta-

blished under this section or section thirty-six hundred fifty-one of the education law, only to the extent that the moneys in this fund shall exceed the sum sufficient to pay all liabilities incurred or accrued against it. Prior to the discontinuance of such fund, the fiscal and legal officers of such municipal corporation shall certify to the governing board thereof the amount that may be necessary to retain in such fund to satisfy all liabilities incurred or accrued against it and such sum shall be retained in the fund for payment of such amounts or until later certified that such funds are no longer needed.

15. Notwithstanding any provision of law to the contrary, municipal corporations shall have the power to enter into agreements, among themselves, individually or through a plan sponsored by their respective statewide association, to pool their reserve funds established pursuant to subdivision three of this section with any other contributions of funds, from appropriations or any other source, and to make expenditures therefrom, and perform functions one for the other related thereto, for the purpose of organizing and/or participating in a reciprocal insurer as defined in subsection (a) of section one hundred seven of the insurance law, or to organize and/or join a joint insurance fund as defined in section one hundred nineteen-ooo of this chapter.

§ 3. Such law is amended by adding a new section ninety-nine-p to read as follows:

§ 99-p. Reciprocal insurer and joint insurance fund. Any "municipal corporation" as used in this section meaning municipal corporation, as defined in section two of this chapter, school district (except a school district in a city with a population of one hundred twenty-five thousand or more), board of cooperative educational services, fire district, district corporation, special district and a special improvement district

governed by a separate board of commissioners, may become a subscriber to a reciprocal insurer formed under article sixty-one of the insurance law, or become a participant of a joint insurance fund formed under article five-G of this chapter.

§ 4. Section one hundred nineteen-n of such law is amended by adding a new subdivision f to read as follows:

f. With respect to a joint insurance fund created pursuant to section one hundred nineteen-ooo of this article, the following terms shall mean:

1. "Municipal corporation". A municipal corporation, as defined in section two of this chapter, school district (except a school district in a city with a population of one hundred twenty-five thousand or more), board of cooperative educational services, fire district, district corporation, special district and a special improvement district governed by a separate board of commissioners.

2. "Governing body". The governing body of a municipal corporation participating in a joint insurance fund.

3. "Cooperative agreement". A written agreement entered into by two or more municipal corporations pursuant to the provisions of this article for the purpose of establishing or participating in a joint insurance fund.

4. "Board of directors". The board provided for in a cooperative agreement to administer a joint insurance fund.

5. "Administrative expenses". Expenses of operation of a joint insurance fund including but not limited to: compensation of employees, costs of office equipment and supplies, rental of facilities, and utility costs.

6. "Administrator". An officer of a joint insurance fund appointed by the board of directors who shall also be charged with care, custody, and control of funds of a joint insurance fund. Statewide associations representing municipal corporations may also be designated as the administrator, including but not limited to: the New York state association of counties, the New York state conference of mayors, association of towns of New York, and the New York school boards association.

7. "Fund". A joint insurance fund created pursuant to this article.

8. "Adjustment expenses". Expenses for investigative, processing, legal, actuarial, arbitration, and settlement services incurred in the adjustment of losses, claims, or benefits.

§ 5. Subdivision one of section one hundred nineteen-o of such law, as amended by chapter four hundred seven of the laws of nineteen hundred seventy-two, is amended to read as follows:

1. In addition to any other general or special powers vested in municipal corporations and districts for the performance of their respective functions; powers or duties on an individual, cooperative, joint or contract basis, municipal corporations and districts shall have power to enter into, amend, cancel and terminate agreements for the performance among themselves or one for the other of their respective functions, powers and duties on a cooperative or contract basis or for the provision of a joint service or a joint water, sewage or drainage project or for a joint insurance fund. Any agreement entered into hereunder shall be approved by each participating municipal corporation or district by a majority vote of the voting strength of its governing body. Where the authority of any municipal corporation or district to perform by itself any function, power and duty or to provide by itself any facility, service, activity, project or undertaking or the financing

thereof is, by any other general or special law, subject to a public hearing, a mandatory or permissive referendum, consents of governmental agencies, or other requirements applicable to the making of contracts, then its right to participate in an agreement hereunder shall be similarly conditioned.

§ 6. Such law is amended by adding a new section one hundred nineteen-ooo to read as follows:

§ 119-ooo. Joint insurance fund. 1. In addition to any other powers granted under this article, municipal corporations shall have the power to enter into a cooperative agreement for the purpose of establishing or operating or participating in a joint insurance fund. The term "joint insurance fund" means a joint fund created from the pooling of contributions of funds, from appropriations or any other source, by municipal corporations which collectively agree to assume risks from a loss or losses on a group basis or to purchase coverage on a group basis. Such fund may be established for any kind of insurance as described in section one thousand one hundred thirteen of the insurance law, except those specified in paragraphs one, two, three, eighteen and twenty-three of subsection (a) of such section. Such fund shall be an alternative or supplement to any policy or contract of insurance authorized or required by law. A joint insurance fund herein provided for shall not be considered insurance for the purpose of any other law of this state and shall not be subject to the regulations of the state insurance department except as provided herein. Any joint insurance fund established pursuant to this section to provide the kinds of insurance specified in paragraphs thirteen, fourteen, nineteen, twenty and twenty-one of subsection (a) of section one thousand one hundred thirteen of the insurance law

shall be subject to the provisions of section three thousand four hundred twenty of such law.

2. The cooperative agreement shall provide for the proper operation of the fund, and include provision for:

a. Administration of the fund by a board of directors, and specifying the number of members of such board and all other requirements necessary for the proper functioning of the board;

b. Appointment of an administrator and any other persons as may be necessary for the proper functioning of the fund;

c. Organization of the fund, including a roster of all participating municipal corporations and the names of all members of the board of directors;

d. Procedures to establish and promote an aggressive risk management program among fund members to include, but not limited to: identifying and reducing those risks which can be reduced through the implementation of better safety technologies, improved work techniques and sounder procedures, enforce the collection of any contributions or payment in default; for the addition to the fund of new municipal corporations or the withdrawal from the fund of municipal corporations, and for termination of the fund and disposition of its assets;

e. An annual determination by a casualty actuary who is a member of the American academy of actuaries that procedures for establishing reserves for losses are actuarially sound;

f. The method of apportioning costs and disposition, if any, of excess contributions;

g. An annual independent audit conducted in accordance with generally accepted auditing standards that shall include a review of the actuarial assumptions and adequacy of reserves and certification from a casualty

actuary who is a member of the American academy of actuaries that the actuarial assumptions continue to be sound and the level of reserves are adequate;

h. A method of accounting that is in conformance with generally accepted goverment accounting principles;

i. Provision for transmission of financial statements and audit reports of the fund to participating municipal corporations; and

j. Notice to each prospective participant that the fund is not subject to the insurance law except as provided herein, is not regulated by the superintendent of insurance, and is not covered by the property/casualty insurance security fund set forth in article seventy-six of the insurance law.

3. The cooperative agreement may authorize the board of directors to enter into contracts with any person, firm, or corporation for services necessary to perform the functions of a joint insurance fund; provided, however, that any such person, firm or corporation performing such functions must be licensed if the insurance law so requires.

4. The cooperative agreement may authorize the board of directors to adopt rules and regulations not inconsistent with law for the fair and equitable administration of the fund.

5. The cooperative agreement may delegate to the board of directors, or may authorize delegation by the board to an attorney or claims adjuster, or any other person or group, the power to compromise, arbitrate or otherwise settle claims.

6. The cooperative agreement may authorize the board of directors to purchase excess or catastrophe insurance on behalf of the fund. The cost of such insurance shall be apportioned in the manner specified in the cooperative agreement. Such insurance shall only be purchased from an

insurer authorized to do business in this state, or an unauthorized insurer if placed through a licensed excess lines broker.

7. There may be paid into a joint insurance fund (a) such amounts as may be contributed by participating municipal corporations through budgetary appropriation and/or from transfers from a self-insurance reserve fund created pursuant to section six-n of this chapter, (b) such amounts as may be contributed by officers and employees of participating municipal corporations pursuant to an employee benefit plan and (c) all amounts collected by the fund through subrogation of a claim paid by the fund to a participating municipal corporation.

8. An expenditure may be made from a joint insurance fund only to pay claims, losses, or benefits, including interest thereon, if any, and the administrative and adjustment expenses incurred in connection therewith, involving those types of protection for which the fund provides coverage as specified in the cooperative agreement.

9. Nothwithstanding any provisions of law to the contrary, a cause of action shall accrue to the fund for reimbursement in such sum or sums paid to a participating municipal corporation as against any third party against whom the participating municipal corporation shall have a cause of action for loss or injuries.

10. The administrator shall keep this fund separate and apart from any and all other funds of a participating municipal corporation. For each type of protection offered by the fund, the method of accounting shall show the order, source thereof, date and amount of each payment from this fund. The administrator, within sixty days of the end of the fiscal year, shall furnish a detailed report of the operation and condition of the fund to the board of directors, the superintendent of insurance, and the secretary of state. The report furnished to the sup-

erintendent of insurance and the secretary of state shall be available for public inspection.

11. Any moneys held by a joint insurance fund as reserves and any moneys not needed for day-to-day operations may be invested: (a) in special time deposit accounts in, or certificates of deposit issued by, a bank or trust company located and authorized to do business in this state, provided, however, that such time deposit account or certificate of deposit shall be payable within such time as the proceeds shall be needed to meet expenditures for which such moneys were obtained and provided further that such time deposit account or certificates of deposit be secured by a pledge of direct or guaranteed obligations of the United States of America or its agencies or obligations of the state of New York or obligations of any municipal corporation, school district or district corporation of the state of New York if such obligations are not in default as to principal or interest and are payable, as to both principal and interest, from (i) taxes levied or by law required to be levied upon all taxable property or all taxable income within the jurisdiction of such governmental unit or (ii) adequate special revenues pledged or otherwise appropriated or required to be provided for the purpose of such payment, excluding obligations payable solely out of special assessments on properties benefited by local improvements; or (b) in obligations of the federal government or obligations of the state of New York. Such obligations, unless registered or inscribed in the name of the joint insurance fund for which such investment is made, shall be purchased through, delivered to and held in the custody of a bank or trust company in this state and shall be sold or presented for redemption or payment only by such bank or trust company or dealer in obligations upon receipt of written instructions from the board of

directors or the administrator if the board of directors shall have delegated the duty of making investments to him. Such obligations shall be purchased only if they are payable or redeemable at the option of the holder within such time as the proceeds shall be needed to meet expenditures for which moneys so invested were obtained.

12. Notwithstanding subdivision two of this section, no fund shall be terminated unless the administrator shall certify that an amount of money sufficient to pay all expenditures, both accrued and contingent, has been placed in a fully collateralized escrow account.

13. Copies of the cooperative agreement shall be filed with the superintendent of insurance and the secretary of state at least sixty days prior to the effective date of the agreement. Such agreement shall be available for public inspection.

14. The authority contained in this section is intended to confirm and supplement authority already possessed by municipal corporations, as defined in subdivision a of section one hundred nineteen-n of this article, to enter into cooperative agreements to self-insure through a joint insurance fund. To the extent, however, that the provisions of this section may be inconsistent with other provisions of this article, the provisions of this section shall prevail. The authority contained in this section shall be in addition to and not in substitution for or a limitation of a municipal corporation's authority to participate in a county self-insurance plan established pursuant to article five of the workers' compensation law.

§ 7. Section one hundred nineteen-u of such law is amended by adding two new subdivisions i and j to read as follows:

i. The term "municipality" shall also mean a municipal corporation, as defined in section two of this chapter, school district (except a school

district in a city with a population of one hundred twenty-five thousand or more), board of cooperative educational services, fire district, district corporation, special district and a special improvement district governed by a separate board of commissioners, when a comprehensive study and report is prepared for the consideration of a joint insurance fund as defined in section one hundred nineteen-ooo of this chapter, or reciprocal insurer, as defined in subsection (a) of section one hundred seven of the insurance law.

j. The term "local agency" as defined in subdivision e of this section shall also mean the New York state association of counties, New York state conference of mayors, association of towns of the state of New York, and the New York school boards association for the purpose of conducting comprehensive studies and reports on reciprocal insurers and joint insurance funds.

§ 8. The opening paragraph of subdivision one and subdivision three of section two hundred thirty-nine-n of such law, as amended by chapter two hundred three of the laws of nineteen hundred eighty-three, are amended to read as follows:

Any county outside the city of New York, city, town, village, school district, board of cooperative educational services, or fire district or any combination thereof, or for the purpose of organizing and/or participating in a reciprocal insurer as defined in subsection (a) of section one hundred seven of the insurance law or to organize and/or participate in a joint insurance fund as defined in section one hundred nineteen-ooo of this chapter, any municipal corporation, as defined in section two of this chapter, school district (except a school district in a city with a population of one hundred twenty-five thousand or more), board of cooperative educational services, fire district, district corporation, spe-

cial district and a special improvement district governed by a separate board of commissioners, may create by agreement an intergovernmental relations council to strengthen local governments and to promote efficient and economical provision of local governmental services within or by such participating municipalities, and to that end such council shall have power to:

3. The board of supervisors of a county, the appropriate officials of a city, the governing body of a school district, board of cooperative educational services or fire district, the board of trustees of a village, or the town board of a town, or for the purpose of organizing and/or participating in a reciprocal insurer as defined in subsection (a) of section one hundred seven of the insurance law or to organize and/or participate in a joint insurance fund as defined in section one hundred nineteen-ooo of this chapter, the governing body of a municipal corporation, as defined in section two of this chapter, school district (except a school district in a city with a population of one hundred twenty-five thousand or more), board of cooperative educational services, fire district, district corporation, special district and a special improvement district governed by a separate board of commissioners, is hereby authorized to include annually in the budget and raise by taxation in such county, city, school district, village or town or for the purpose of organizing and/or participating in a reciprocal insurer as defined in subsection (a) of section one hundred seven of the insurance law or to organize and/or participate in a joint insurance fund as defined in section one hundred nineteen-ooo of this chapter, such municipal corporation, school district, board of cooperative educational services, fire district, district corporation, special district and special improvement district a sum to meet all or an appropriate share of the

actual and necessary expenses of establishing, maintaining and continuing such intergovernmental relations council.

§ 9. Subdivision one of section four hundred sixty-one of such law, as added by chapter eight hundred fifty-nine of the laws of nineteen hundred fifty-seven, is amended to read as follows:

1. (a) The term "public agency" shall mean any county, city, town, village, school district, improvement district or district corporation of the state of New York; and any local governmental unit, subdivision, or special district of another state.

(b) The term "public agency" shall mean any municipal corporation, as defined in section two of this chapter, school district (except a school district in a city with a population of one hundred twenty-five thousand or more), board of cooperative educational services, fire district, district corporation, special district and a special improvement district governed by a separate board of commissioners, when an agreement entered into pursuant to this article is for the purpose found in subparagraph twenty-four of paragraph (a) of subdivision one of section four hundred sixty-two of this article.

§ 10. Subparagraph twenty-three of paragraph (a) of subdivision one of section four hundred sixty-two of such law, as added by chapter seven hundred forty-one of the laws of nineteen hundred sixty-nine, is amended to read as follows:

(23) Roads and highways[.]

§ 11. Paragraph (a) of subdivision one of section four hundred sixty-two of such law is amended by adding a new subparagraph twenty-four to read as follows:

(24) Organization or participating in a reciprocal insurer or a joint insurance fund.

§ 12. Paragraph thirty-seven of subsection (a) of section one hundred seven of the insurance law is amended to read as follows:

(37) "Reciprocal insurer" means any aggregation of persons, municipal corporations as defined in section two of the general municipal law, school districts (except school districts in cities with a population of one hundred twenty-five thousand or more), boards of cooperative educational services, fire districts, district corporations, special districts, and special improvement districts governed by separate boards of commissioners, firms or corporations, called "subscribers" in article sixty-one of this chapter, who or which under a common name engage in the business of inter-insurance or exchanging contracts of insurance on the reciprocal plan through an attorney-in-fact having authority to obligate the subscribers severally, within such limits as may lawfully be specified in the subscriber's agreement, on contracts of insurance made with any subscriber as a policyholder through such attorney-in-fact acting on behalf of all other subscribers. Such term includes any reciprocal or inter-insurance exchange, by whatever name known, and any reference thereto as an insurer shall be deemed to mean any such aggregation of inter-insurers operating through an attorney-in-fact individually and collectively as an insurance organization for the benefit of its policyholders.

§ 13. Such law is amended by adding a new section three hundred thirty-five to read as follows:

§ 335. Reports of claims for municipal liability. (a) As used in this section:

(1) The term "municipal liability insurance" means insurance issued or delivered in this state insuring against liability of a municipal corporation, as defined in section two of the general municipal law, school

district (except a school district in a city with a population of one hundred twenty-five thousand or more), board of cooperative educational services, fire district, district corporation, special district and a special improvement district governed by a separate board of commissioners, for damages for personal injury, death or property damages.

(2) This section shall apply to all new and renewal policies written to become effective on or after the effective date of this section.

(b) Each insurance company engaged in issuing municipal liability insurance in this state as defined in this section shall file with the superintendent semi-annual reports of all claims for municipal liability made against any of its insureds and received by it during the preceding six month period, and all claims paid during that period.

(c) Such reports shall be in writing on a form prescribed by the superintendent and shall contain such information as the superintendent shall prescribe.

(d) Such reports shall be made to the superintendent on dates determined by the superintendent.

(e) Any report on the information contained therein, furnished or compiled pursuant to the provisions of this section shall be deemed to be a confidential communication and shall not be open for review or subject to a subpoena except by a public agency or authority of this state.

(f) The superintendent shall furnish not later than the first day of June, nineteen hundred eighty-seven, to the governor and the legislature a report containing (1) a summary of the data collected, (2) an assessment of the status of municipal liability insurance costs, and (3) recommendations, if appropriate, for statutory or administrative changes designed to reduce or contain such costs.

§ 14. Subsection (b) of section two thousand three hundred five of such law is amended by adding a new paragraph twelve to read as follows:

(12) municipal liability insurance, as such term is defined in section three hundred thirty-five of this chapter, when such insurance is written by a licensed insurer which is owned by, or whose membership or subscribers is principally comprised of municipal corporations as defined in section two of the general municipal law, school districts (except school districts in cities with a population of one hundred twenty-five thousand or more), boards of cooperative educational services, fire districts, district corporations, special districts and special improvement districts governed by separate boards of commissioners.

§ 15. Such law is amended by adding a new section three thousand four hundred twenty-six to read as follows:

§ 3426. Commercial risk insurance policies; municipal risk insurance policies; professional liability policies; cancellation and renewal provisions. (a) Definitions:

(1) "Commercial risk policy" means a contract of insurance issued or issued for delivery in this state, on a risk located in this state, arising from the conduct of an association, business, corporation or other organization, insuring any of the following contingencies:

(A) loss of or damage to real property not used for residential purposes;

(B) loss of or damage to real property used for residential purposes which consists of more than four dwelling units;

(C) loss of or damage to personal property;

(D) losses or liabilities arising out of the ownership, operation, or use of a motor vehicle, predominantly used for business purposes;

(E) liabilities of persons acting as officers or directors; or

(F) other liabilities, including product liability, for loss of, damage to, or injury to persons or property.

(2) "Municipal risk policy" means a contract of insurance issued to a public entity as defined in paragraph five of this subsection.

(3) "Product liability" means liability of the insured for damages for personal injury, death or property damage, where liability is based upon negligence, implied warranty or strict liability, arising out of a design, inspection, testing or manufacturing defect, or any other defect in a product, or is based upon any failure to warn, or to properly instruct in the use of a product or for any liability for any damage arising out of the handling or use of any product manufactured, sold, handled or distributed by the insured or work completed by or on behalf of the insured.

(4) "Professional liability policy" means a contract of insurance covering liability arising out of the practice of any profession for which a license is required by the education department, the health department, or any other governmental authority of this state, or out of the operation of a duly certified hospital with respect to the treatment of patients.

(5) "Public entity" means:

(A) the state of New York;

(B) a county, city, town, village or any other political subdivision or civil department or division of the state;

(C) a school district, board of cooperative educational services or any other governmental entity or combination or association of governmental entities operating a public school, college or community college or university;

(D) a fire district, public improvement or special district or district corporation;

(E) a public authority, commission, agency or public benefit corporation; or

(F) any other public corporation or other governmental instrumentality or unit in the state of New York.

(6) "Required policy period" means a period of one year from the date as of which a commercial risk, municipal risk or professional liability policy is first issued or renewed.

(7) "Nonpayment of premium" means the failure of the named insured to discharge any obligation in connection with the payment of premiums on a policy of insurance or any installment of such premium, whether the premium is payable directly to the insurer or its agent, or indirectly under any premium finance plan or extension of credit. Payment to the insurer, or to an agent or broker authorized to receive such payment, shall be timely, if made within fifteen days after the mailing to the insured of a notice of cancellation for nonpayment of premium.

(8) "Renewal" or "to renew" means the issuance and delivery by an insurer, at the end of the policy period, of a policy superseding a policy previously issued and delivered by the same insurer, or the issuance or delivery of a certificate or notice extending the term of a policy beyond its policy period or term; provided, however, that any policy with a policy period or term of less than one year shall, for the purpose of this section, be considered as if written for a policy period or term of one year, or any policy with no fixed expiration date, shall, for the purpose of this section, be considered as if written for successive policy periods or terms of one year.

(9) "Administrative suspension" means a temporary suspension of a driver's license pending a hearing, prosecution or investigation or an indefinite suspension of a driver's license because of the failure of the person suspended to perform an act, which suspension will be terminated by the performance of the act by the person suspended.

(b) During the first sixty days a commercial risk, municipal risk or professional liability policy is in effect, no notice of cancellation shall be issued or be effective unless it states or is accompanied by a statement of the specific reason or reasons for such cancellation.

(c) After a commercial risk, municipal risk or professional liability policy has been in effect for sixty days, or upon the effective date if the policy is a renewal, no notice of cancellation shall be issued to become effective unless such cancellation is based on one or more of the following:

(1) With respect to all commercial risk, municipal risk and professional liability policies:

(A) nonpayment of premium;

(B) discovery of fraud or material misrepresentation in the obtaining of the policy or in the presentation of a claim thereunder;

(C) discovery of willful or reckless acts or omissions increasing the hazard insured against, or a willful violation of any policy conditi

(D) physical changes in the property insured occurring after issuance or last annual renewal anniversary date of the policy which result in the property becoming uninsurable in accordance with the insurer's objective, uniformly applied underwriting standards in effect at the time the policy was issued or last renewed;

(E) required pursuant to a program approved by the superintendent as necessary because a continuation of the present premium volume of an in-

surer would be hazardous to the interests of policyholders of the insurer, its creditors or the public; or

(F) a determination by the superintendent that the continuation of the policy would violate or would place the insurer in violation of this chapter.

(2) With respect to commercial automobile insurance policies, in addition to the bases for cancellation set forth in paragraph one of this subsection, suspension or revocation during the required policy period of the driver's license of any person who customarily operates an automobile insured under the policy, other than a suspension issued pursuant to subdivision one of section five hundred ten-b of the vehicle and traffic law or one or more administrative suspensions arising from the same incident which has or have been terminated prior to the effective date of cancellation.

(3) With respect to professional liability policies, in addition to the bases for cancellation set forth in paragraph one of this subsection, revocation or suspension of the insured's license to practice his profession, or, if the insured is a hospital, it no longer possesses a valid operating certificate under section twenty-eight hundred one-a of the public health law.

(d) (1) Unless the insurer, at least sixty days in advance of the end of the required policy period in the case of commercial risk and professional liability insurance policies, or one hundred twenty days in advance of the end of the required policy period in the case of municipal risk policies, mails or delivers to the named insured, at the address shown in the policy, a written notice of its intention not to renew such policy, or to condition its renewal upon change of limits, elimination of any coverages or change in the type of coverage provided, the named

insured shall be entitled to renew the policy upon timely payment of the premium billed to the insured for the renewal. The specific reason or reasons for nonrenewal or conditioned renewal shall be stated in or shall accompany the notice. This paragraph shall not apply when the named insured, an agent or broker authorized by the named insured, or another insurer of the named insured, has mailed or delivered written notice that the policy has been replaced or is no longer desired.

(2) A copy of each notice of cancellation, nonrenewal and conditioned renewal issued on a municipal risk policy shall be mailed or delivered to the superintendent concurrent with its mailing or delivery to the named insured.

(e) This section shall not apply to policies issued pursuant to a plan established under article fifty-three, fifty-four or fifty-five of this chapter.

§ 16. Sections three thousand four hundred twenty-six and three thousand four hundred twenty-seven of such law are REPEALED.

§ 17. Section three thousand four hundred thirty-five of such law is renumbered section three thousand four hundred thirty-nine and a new section three thousand four hundred thirty-five is added to read as follows:

§ 3435. Group property/casualty insurance; commercial risk policies.

(a) Definitions:

(1) "Commercial risk policy" means a contract of insurance issued or issued for delivery in this state, on a risk located in this state, arising from the conduct of an association, business, corporation or other organization, insuring any of the following contingencies:

(A) loss of or damage to real property not used for residential purposes;

(B) loss of or damage to real property used for residential purposes which consists of more than four dwelling units;

(C) loss of or damage to personal property;

(D) losses or liabilities arising out of the ownership, operation, or use of a motor vehicle, predominantly used for business purposes;

(E) liabilities of persons acting as officers or directors; or

(F) other liabilities, including product liability, for loss of, damage to, or injury to persons or property.

(2) "Municipal risk policy" means a contract of insurance issued to a public entity as defined in paragraph five of this subsection, arising from the conduct or activities of a public entity, insuring any of the following contingencies:

(A) loss of or damage to real property not used for residential purposes;

(B) loss of or damage to real property used for residential purposes which consists of more than four dwelling units;

(C) loss of or damage to personal property;

(D) losses or liabilities arising out of the ownership, operation, or use of a motor vehicle, predominantly used for business purposes;

(E) liabilities of persons acting as officers or directors; or

(F) other liabilities, including product liability, for loss of, damage to, or injury to persons or property.

(3) "Product liability" means liability of the insured for damages for personal injury, death or property damage, where liability is based upon negligence, implied warranty or strict liability, arising out of a design, inspection, testing or manufacturing defect, or any other defect in a product, or is based upon any failure to warn, or to properly instruct in the use of a product or for any liability for any damage aris-

ing out of the handling or use of any product manufactured, sold, handled or distributed by the insured or work completed by or on behalf of the insured.

(4) "Professional liability policy" means a contract of insurance covering liability arising out of the practice of any profession for which a license is required by the education department, the health department, or any other governmental authority of this state, or out of the operation of a duly certified hospital with respect to the treatment of patients.

(5) "Public entity" means:

(A) the state of New York;

(B) a county, city, town, village or any other political subdivision or civil department or division of the state;

(C) a school district, board of cooperative educational services or any other governmental entity or combination or association of governmental entities operating a public school, college or community college or university;

(D) a fire district, public improvement or special district or district corporation;

(E) a public authority, commission, agency or public benefit corporation; or

(F) any other public corporation or other governmental instrumentality or unit in the state of New York.

(b) Notwithstanding any other provision of this chapter, commercial risk policies and professional liability policies providing group coverage to members of commercial or professional associations and organizations whose membership is of a homogeneous nature, and municipal risk policies providing group coverage, may be approved subject to regula-

tions to be promulgated by the superintendent for the kinds of insurance set forth in subsection (c) of this section.

(c) Group commercial risk policies may be written pursuant to this section for any of the kinds of insurance authorized by subsection (a) of section one thousand one hundred thirteen of this chapter except the kinds of insurance authorized by paragraphs one, two, three, sixteen, seventeen, eighteen, twenty-one, twenty-two and twenty-three of such subsection.

(d) Policies of insurance approved pursuant to this section shall not be eligible for the filing exemptions specified in section six thousand three hundred one of this chapter.

§ 18. Subsection (a) of section six thousand one hundred two of such law is amended to read as follows:

(a) Twenty-five or more persons, firms [and], corporations, or, in the alternative, municipal corporations as defined in section two of the general municipal law, school districts (except school districts in cities with a population of one hundred twenty-five thousand or more), boards of cooperative educational services, fire districts, district corporations, special districts and special improvement districts governed by separate boards of commissioners, each having the qualifications of subscribers as prescribed in this article, may organize a reciprocal insurer to do any one or more of the basic kinds of insurance set forth in subsection (a) of section four thousand one hundred one of this chapter. However, any reciprocal insurer authorized to do the business of workers' compensation insurance shall be deemed to be a mutual carrier within the meaning of the definition of that term in section one hundred six of the workers' compensation law and shall be subject to the provisions of article six-A of such law.

§ 19. Section six thousand one hundred two of such law is amended by adding a new subsection (j) to read as follows:

(j) Any reciprocal insurer organized pursuant to this section and whose membership is limited to municipal corporations, as defined in section two of the general municipal law, school districts (except school districts in cities with a population of one hundred twenty-five thousand or more), boards of cooperative educational services, fire districts, district corporations, special districts and special improvement districts governed by separate boards of commissioners, shall be required to comply with all the applicable provisions of this chapter including the provisions of article seventy-six of this chapter, and with such additional standards as the superintendent shall prescribe by regulation. Such reciprocal insurer shall establish and promote an aggressive risk management program among subscribers to include, but not limited to: identifying and reducing those risks which can be reduced through the implementation of better safety technologies, improved work technologies and sounder procedures.

§ 20. Paragraph one of subsection (a) of section six thousand one hundred four of such law is amended to read as follows:

(1) No authorized reciprocal insurer shall make any new agreement for insurance containing a provision for contingent liability of subscribers with any person, firm [or], private corporation, municipal corporation, as defined in section two of the general municipal law, school district (except a school district in a city with a population of one hundred twenty-five thousand or more), board of cooperative educational services, fire district, district corporation, special district and a special improvement district governed by separate boards of commissioners who or which does not have assets in his, their or its own right in an

ALASKA LEGISLATURE COMMITTEE FILES 1985-1986 8672
4194 SLAB SB 392 - SB 404

10 74

amount not less than [ten] fifty thousand dollars in excess of liabilities as shown by a commercial agency report as hereinafter provided, or by a sworn statement on file with the attorney-in-fact, verified by such subscriber or by an officer of a corporation subscriber.

§ 21. Paragraph (a) of section 11.00 of the local finance law is amended by adding a new subdivision eighty-three to read as follows:

83. Certain liability insurance. Payments, other than annual insurance premiums, required of a subscriber of a reciprocal insurer formed under article sixty-one of the insurance law, five years, except where such payments amount to more than one per centum of the average assessed valuation of such subscriber, ten years.

§ 22. Subdivision six of section sixteen hundred four of the education law is amended to read as follows:

6. To insure the school buildings, furniture and school apparatus in an insurance company created by or under the laws of this state, [or] in an insurance company authorized by law to transact business in this state, or in a joint insurance fund created by or under the laws of this state, and to comply with the conditions of the policy, and raise by a district tax the amount required to pay the premiums thereon.

§ 23. Subdivision eight of section seventeen hundred nine of such law, as amended by chapter six hundred ninety-five of the laws of nineteen hundred sixty-nine, is amended to read as follows:

8. To insure the schoolhouses and their furniture, apparatus and appurtenances, and the school library, in some insurance company created by or under the laws of this state, [or] in some insurance company authorized by law to transact business in this state, or in a joint insurance fund created by or under the laws of this state, and to comply with the conditions of the policy, and raise the sums required for pre-

miums by district tax; provided, however, that the members of the board shall not be personally liable for any claim arising out of the use or condition of the aforementioned property if the board, after due diligence, is unable to obtain such insurance.

§ 24. Subdivision eight-c of section seventeen hundred nine of such law, as amended by chapter three hundred eighteen of the laws of nineteen hundred seventy-nine, is amended to read as follows:

8-c. To establish and maintain a program of reserves not to exceed three per centum, exclusive of any planned balance presently authorized, of the annual budget of the district to cover property loss and liability claims. In the event that three per centum, exclusive of any planned balance presently authorized, of the annual budget of the district would result in less than fifteen thousand dollars, the total reserve funds may be for an amount not to exceed fifteen thousand dollars. Separate funds shall be established for property loss and for liability claims and the separate identity of each fund shall be maintained whether its assets consist of cash or investments or both. The moneys in such funds shall be held in separate bank accounts and may be invested in obligations specified in section seventeen hundred twenty-three-a of this chapter. Any interest earned or capital gain realized on the moneys so deposited shall accrue and become part of such funds. Such reserve funds shall not be reduced to amounts less than the total of the amounts estimated to be necessary to cover incurred but unsettled claims or suits including expenses in connection therewith other than by payments for losses for which such amounts were established. Payments from such reserve funds shall not be made for purposes other than those for which such funds were established without authorizations by vote of the electors of the district, except that such board may authorize use

of such funds other than amounts allocated for unsettled claims or suits including expenses in connection therewith to pay premiums for insurance policies purchased to insure subsequent losses in areas previously self-insured, in the event of dissolution of the self-insurance plan. The cash balance of such reserve fund at the end of any fiscal year shall not exceed five per centum of the total budget for such fiscal year when the district enters into an agreement to pool their reserve fund for the purpose of organizing and/or participating in a reciprocal insurer as defined in subsection (a) of section one hundred seven of the insurance law or to organize and/or participate in a joint insurance fund as defined in section one hundred nineteen-ooo of the general municipal law.

§ 25. Subdivision thirteen of section two thousand twenty-one of such law, such section as renumbered by chapter eight hundred one of the laws of nineteen hundred fifty-three, is amended to read as follows:

13. To authorize the trustees to cause the schoolhouses, and their furniture, appurtenances and school apparatus to be insured by any insurance company created by or under the laws of this state, or any other insurance company authorized by law to transact business in this state, or in a joint insurance fund created by or under the laws of this state.

§ 26. Declaration of legislative findings and intent. The legislature hereby finds that the state, its local governments and public employees, by virtue of the nature of the services provided and the functions performed by the state and local governments and because of the consequences of unlimited liability on effective government process, should be liable for their actions only to such extent and subject to such conditions as are provided in this act. Actions against the state and its local governments are burgeoning and judgments for personal injury and

property damage are being rendered in amounts which place great burdens on public budgets. Local governments across the state have experienced substantial increases in liability, the impact of which has been most severe for smaller municipalities.

While the legislature continues to recognize the right of persons who suffer injury as a result of acts of public entities and public employees to recover for the harm suffered, it has now become necessary for this state, like a majority of the states, to place reasonable limits on such recovery. It is therefore reasonable and necessary to limit the liability of public entities and public employees to their equitable share of damages, unless the injured party has exhausted all of its remedies against the other parties, and to provide for the periodic payment by public entities and public employees of their excess liability which exceeds a specified monetary amount.

§ 27. The civil practice law and rules is amended by adding a new article sixteen to read as follows:

ARTICLE 16

LIMITED LIABILITY OF PUBLIC ENTITIES AND PUBLIC EMPLOYEES

Section 1600. Definitions.

1601. Application.

1602. Liability of public entities and public employees limited to equitable share of judgment.

1603. Contribution and indemnification.

§ 1600. Definitions. As used in this article:

1. The term "public entity" means (a) the state of New York, (b) a county, city, town, or village, (c) a school district (except a school district in a city with a population of one hundred twenty-five thousand

or more), or board of cooperative educational services, (d) a fire district, district corporation, special district, or special improvement district governed by a separate board of commissioners.

2. The term "public employee" means any employee of a public entity, as defined in subdivision one of this section, while acting within the scope of his public employment or duties, but does not include an independent contractor. Such term includes a former employee and an employee's estate or judicially appointed personal representative.

§ 1601. Application. The provisions of this article shall apply to all claims against any public entity or public employee for personal injury, property damage or wrongful death, except for claims against any public entity or public employee for damages because of injury or death resulting from health care or treatment rendered or failed to be rendered to any person.

§ 1602. Liability of public entities and public employees limited to equitable share of judgment. (a) Notwithstanding any other provisions of law, when a judgment in an action for personal injury, property damage or wrongful death is entered by the injured party against a public entity or public employee, or both and another party, the payment, if any, by the public entity or public employee to an injured party shall not exceed the equitable share of the judgment recovered against such public entity or public employee, as determined in accordance with the provisions of section fourteen hundred two of this chapter, unless such injured party has complied with the requirements set forth in subdivision (b) of this section.

(b) The public entity or public employee shall be liable to pay the excess over and above the equitable share of the judgment recovered against such public entity or public employee only if the injured party

has filed with the court an affidavit upon notice to all parties which demonstrates and describes in detail the diligent efforts it has taken to exhaust those remedies available and which may reasonably be available as determined herein to collect such excess from the other party or parties. Upon review of all affidavits submitted pursuant to this subdivision, the court shall determine whether any further efforts must be made before the public entity or public employee shall be required to pay the excess and shall have the power to order any further efforts which it may deem reasonable and necessary. Any party against whom judgment has been entered may submit an affidavit to the court in connection with the foregoing procedures within ten days of receipt of the injured party's affidavit. If an affidavit in opposition is filed, the court shall render its determination under this subdivision within thirty days of submission of all affidavits. If no affidavit in opposition is filed, the injured party shall be deemed to have fulfilled his obligations under this subdivision.

If the injured party, at the time of an impleader action, could have sued a party who has been impleaded by a public entity for contribution and indemnification and has failed to do so, the public entity shall not be liable to pay the excess to the injured party attributable to such impleaded party beyond the amount that the public entity has recovered or will recover as determined by the court pursuant to this section from such impleaded party in accordance with the requirements of this subdivision.

(c) (1) In the event the excess described in subdivision (b) of this section exceeds one hundred thousand dollars plus any amounts that will be paid from such excess to a lien holder or subrogee on account of expenses that are compensated in the judgment, the public entity and pu-

blic employee shall satisfy their liability for the amount over and above one hundred thousand dollars by paying it in equal installments over a period of five years and upon such dates as the court shall determine.

(2) If, at any time after entry of judgment, a judgment creditor or successor in interest can establish that the continued payment of the judgment in periodic installments will impose a hardship, the court may, in its discretion, order that the remaining payments or a portion thereof shall be made to the judgment creditor in a lump sum. The court shall, before entering such an order, find that: (i) unanticipated and substantial other needs have arisen that warrant the payment of the remaining payments, or a portion thereof, in a lump sum; (ii) ordering such a lump sum payment would not impose an unreasonable financial burden on the judgment debtor or debtors; (iii) ordering such a lump sum payment will accomodate the future needs of the judgment creditor; and (iv) ordering such a lump sum payment would further the interests of justice.

(3) If a lump sum payment is ordered by the court, such lump sum shall be calculated on the basis of the present value of remaining periodic payments, or portions thereof, that are converted into a lump sum payment. The remaining future periodic payments, if any, shall be reduced accordingly.

(d) Nothing in this section shall be construed to affect or impair any right of a public entity or public employee under section 15-108 of the general obligations law:

§ 1603. Contribution and indemnification. The limitation set forth in this article shall apply to any claim for contribution or indemnification, but shall not include:

(a) a claim for indemnification if, prior to the accident or occurrence on which the claim is based, the claimant and the public entity had entered into a written contract in which the public entity had expressly agreed to indemnify the claimant for the type of loss suffered; or

(b) a claim for indemnification by a public employee, including indemnification pursuant to section fifty-k of the general municipal law or section seventeen or eighteen of the public officers law.

§ 28. If any provision of section twenty-seven of this act shall be held to be invalid or ineffective in whole or in part or inapplicable to any person or situation, it is the purpose and intent of section twenty-seven of this act that all other provisions shall be separate and fully effective and the application of any such provision to other persons or situations shall not be affected.

§ 29. Section twenty-seven of this act shall not be construed to impair, alter, limit, modify, abrogate or restrict any immunity or right of indemnification available to or conferred upon any public entity or public employee, or to confer a right of action upon any person against a public entity or public employee; nor shall anything in section twenty-seven of this act be construed to impose liability on a public entity or public employee for any negligent or wrongful act or omission.

§ 30. The provisions of section twenty-seven of this act shall not apply to claims under the workers' compensation law.

§ 31. The provisions of section twenty-seven of this act shall not be construed to affect the limitation set forth in section twenty-a of the court of claims act.

§ 32. This act shall take effect immediately, provided, however, that

(a) section thirteen of this act shall take effect on the first day of April next succeeding the date on which is shall have become a law;

(b) section sixteen of this act shall take effect January first, nineteen hundred eighty-six;

(c) sections fifteen and sixteen of this act shall apply to all policies issued or renewed on or after January first, nineteen hundred eighty-six; and

(d) sections twenty-six, twenty-seven, twenty-eight, twenty-nine, thirty and thirty-one of this act shall take effect February first, nineteen hundred eighty-six and shall apply to all actions or proceedings instituted on or after its effective date.

BILL SHEFFIELD
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

February ... 1986

The Honorable Don Bennett
President of the Senate
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Senator Bennett:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill relating to the electric cooperative and telephone cooperative taxes.

This bill will amend AS 10.25.540 to expressly authorize the Department of Revenue to use standard tax assessment and collection procedures in enforcing the electric cooperative and telephone cooperative taxes. At the present time, this section does not expressly provide for the levy of penalties or interest if the taxpayer fails to file a return or pay the tax on time. Without this change, there is little incentive for a taxpayer to comply with this tax statute. This bill will correct that problem, and I urge your support.

Sincerely,

Bill Sheffield

University of Alaska

Risk Management Collateral Fund

Collateral Fund:

Pool of money for payment of large uninsured claims.

Benefits:

Provides security to excess carriers.

Alternative to purchase of high cost primary coverage.

Alternative to campus assessments for large losses.

Provides annual investment income.

Characteristics:

Limited access to only large specified claims.

Reimbursement requests on a specific claim basis.

Investment earnings available for reimbursement of claims or expansion of the fund.

SB 399

University of Alaska
Risk Management Collateral Fund
HB-531/SB-399

1986 Risk Management Problems:

- **Premiums have increased for primary layers of coverage.**
- **Selected primary and excess coverages are not available.**

Effect on University of Alaska

- The University must respond to increased costs by:
  - Increasing deductible levels
  - Decreasing limits of insurance coverage
  - Deleting of selected insurance coverages
  - Limiting funds available for loss prevention
  - Assessing campus instructional programs for losses
- The University must thus assume greater loss liability, meaning:
  - Specific exposures and coverages are uninsured
  - Budget instability due to large uninsured exposures
  - Wide fluctuation in annual loss levels
  - Decreased ability to forecast loss levels
  - Inability to settle claims promptly once funds are depleted

Risk Management Collateral Fund Characteristics:

- Nonlapsing collateral fund held by Department of Revenue
- Pays for uninsured losses in excess of self-insured levels
- Used for liability and property losses
- Legislature may replenish fund as necessary
- Independent actuarial determination of loss assumption levels used each year by Department of Administration and University
- Annual reporting of activity to OMB and Legislative Budget & Audit

Benefits of Fund:

- Provides alternative to high-cost primary coverage
- Provides security to excess insurance carriers
- Provides budget stability
  - Funds large uninsured claims
  - Funds excluded coverages above self-insurance levels
  - Limits annual loss levels in operating budget
- Provides funding for prompt settlement of claims
- Provides alternative to campus assessment or deficits
- Investment earnings accrue to state instead of insurance companies

PROGRAM EXECUTION.
TEXT (a) Except as limited by policy decisions of the governor, appropriations by the legislature, and other provisions of law, the several state agencies have full authority for administering their program service assignments and are responsible for their proper management.

(b) Each state agency shall prepare an annual plan for the operation of each of its assigned programs except for programs that are exempted from this requirement by the office. The operations plan shall be prepared in the form and content and be transmitted on the date prescribed by the office.

(c) The office shall

(1) review each operations plan to determine that it is consistent with the policy decisions of the governor and appropriations by the legislature, that it reflects proper planning and efficient management methods, that appropriations have been made for the planned purpose and will not be exhausted before the end of the fiscal year;

(2) approve the operations plan if satisfied that it meets the requirements under (1) of this subsection; otherwise, the office shall require revision of the operations plan in whole or in part.

(d) No state agency may increase the salaries of its employees, employ additional employees, or expend money or incur obligations except in accordance with law and properly approved operations plan.

(e) Transfers or changes between objects of expenditures or between allocations may be made by the head of a state agency upon approval of the office. No transfers may be made between appropriations except as provided in an act making the transfers between appropriations.

(f) The office shall report quarterly to the governor and the legislature on the operations of each state agency, relating

actual accomplishments to those planned and modifying, if necessary, the operations plan of any agency for the balance of the fiscal year.

(g) The governor may direct the withholding or reduction of appropriations to a state agency at any time during the fiscal year only if the governor determines that

(1) the planned expenditures can no longer be made due to factors outside the control of the state which make the expenditure factually impossible; or

(2) estimated receipts and surpluses will be insufficient to provide for appropriations.

(h) The increase of an appropriation item based on additional federal or other program receipts not specifically appropriated by the full legislature may be expended in accordance with the following procedures:

(1) the governor shall submit a revised program to the Legislative Budget and Audit Committee for review;

(2) 45 days shall elapse before commencement of expenditures under the revised program unless the Legislative Budget and Audit Committee earlier recommends that the state take part in the federally or otherwise funded activity;

(3) should the Legislative Budget and Audit Committee recommend within the 45-day period that the state not initiate the additional activity, the governor shall again review the revised program and if the governor determines to authorize the expenditure, the governor shall provide the Legislative Budget and Audit Committee with a statement of the governor's reasons before commencement of expenditures under the revised program.

SB 399: SUMMARY

SB 399 would allow the legislature to appropriate funds to establish a non-lapsing risk management collateral fund for the University of Alaska to cover uninsured losses. After the fund is established the legislature would be able to appropriate earnings from temporary investments from the fund, restore funds spent on claims and reappropriate recoveries from losses to the fund. The Department of Administration and University of Alaska would set loss assumption levels. The Department of Administration would be required to submit a yearly report on activities and expenditures to the Office of Management and Budget and to the Legislative Budget and Audit Committee.

FISCAL NOTE

HB 531

For Bill/Resolution No. HB 531 Page 1 of 2

This bill establishes a Risk Management Collateral Fund in the general fund. The fund is to be used to pay for uninsured losses at the University of Alaska in excess of pre-established loss assumption levels. The loss assumption levels are to be determined annually by the Department of Administration and the University of Alaska based on independent actuarial assumptions.

Creation of a risk management collateral fund was recommended to the University by Corroon and Black Corporation, the State's risk management consultants. Their proposal considered the primary layer of general liability insurance, the $4.7 million in coverage between $300,000 and $5 million. This coverage currently costs the University $317,500 annually. Corroon and Black recommended an initial appropriation to the fund "in the range of $2.5 - $5.0 million." The University is requesting establishment of the fund at the lower end of this range. Also covered by the fund would be losses in other lines of insurance, or in areas not covered by insurance companies.

Coopers and Lybrand, certified public accountants, gave preliminary estimates to the University based on insurance industry statistics and estimates. The actuarial assumptions used for this fiscal note should be revised prior to the beginning of the fiscal year, but will have little effect on the size of the fund. Assuming that the risk management collateral fund provides coverage for claims of up to $5 million, the estimated retained loss for fiscal year 1987 in general liability would be $2,119.3. For auto liability, the estimated retained loss would be $76.4. Retained losses for property insurance were not calculated by Coopers and Lybrand.

Position Paper
SB 399

SB 399 establishes a risk management collateral fund for the University of Alaska. This fund will be utilized to pay uninsured property and casualty claims excess of established loss assumption levels.

The fund creates a viable method for the university to increase self insurance obligations, avoid prohibitive premium costs for primary layer excess insurance and maintain uninterrupted program operations.

The bill as proposed requires the Department of Administration to submit an annual report on the activity of the fund. This requirement adds an insignificant administrative task, with no fiscal impact, on the department.

The Department of Administration supports the proposed legislation.

CSSB 404 Sectional Analysis

Section 1) Makes an exception in the fictitous group statutes for municipalities, school districts, and REAAs so that groups of them covered by a group workers compensation policy need not have a constitution or bylaws.

Section 2) Exempts joint arrangements formed under section 12 of the draft from the prohibition against "fictitous groups" that are formed for the purpose of insurance.

Section 3) Changes terminology to reflect other changes in the bill.

Section 4) Shifts the exceptions currently found in the AS 21.36.300 (repealed in the bill) to AS 21.36.210(d).

Section 5) Shifts the substance of AS 21.36.210 (e) (repealed in the bill) to AS 21.36.210(f) by inserting the term "personal insurance"; "personal insurance" is defined in section 11 of the bill to cover the types of insurance formerly described in AS 21.36.210(e).

Section 6) Provides for a 20 day notice period for cancellation of personal insurance except in cases of non payment of premium, for which there is a 10 day notice period.

Section 7) Provides for a 60 day notice period for the cancellation of business or commercial insurance except in cases of nonpayment of premium, for which there is a 10 day notice period.

Section 8) Requires the return of unearned premium within 30 days after notice if business or commercial insurance is cancelled.

Section 9) Provides for a 20 day notice of non renewal of personal insurance and a 60 day notice of nonrenewal of business and commercial insurance.

Section 10) Makes technical changes to conform to other amendments.

Section 11) Definitions

Section 12) 21.76.010 Authorizes joint insurance arrangements by municipalities, school districts, and REAAs. Allows group self insurance only for property insurance. Allows purchase of coverage on a group basis for the types of insurance not described in (c) (1) and (2).

21.76.020 Exempts joint insurance arrangements from regulation by the Director of the Division of Insurance.

21.76.030 Prescribes the types of provisions that must be contained in agreements that set up joint insurance arrangements.

21.76.040 Prescribes the financial provisions that must be contained in agreements that set up joint insurance arrangements, including a requirement for an annual audit.

21.76.050 Allows the board of directors of a joint insurance arrangement to contract with someone to run the arrangement

21.76.060 Allows the directors to delegate the power to settle claims on behalf of a joint insurance arrangement.

21.76.070 Allows a joint insurance arrangement to obtain excess insurance.

21.76.080 Requires a joint insurance arrangement to establish a fund to receive contributions from members and to pay out claims or other expenses, depending on the type of arrangement.

21.76.090 Requires the filing of the agreement establishing a joint insurance arrangement.

21.76.100 Provides that the agreement may allow the board of directors to adopt regulations for the operation of the arrangement.

21.76.110 Gives subrogation rights to a joint insurance arrangement.

21.76.900 Definitions.

Section 13) Exempts joint insurance arrangements from a general requirement that insurers for workers compensation must join in the assigned risk pool.

Section 14 and 15) Exempts joint insurance arrangements from laws that currently already exempt reciprocals composed of municipalities.

Section 16) repeals sections dealing with the cancellation of insurance policies in order to correspond to other sections in the bill to which substance of these sections was transferred.

Section 17) Effective date.

Department of Commerce / POSITION PAPER
Economic Development

SB 404: "An Act relating to insurance, authorizing joint insurance arrangements, repealing a prohibition against certain types of group insurance, and providing for an effective date."

This legislation allows municipalities, school districts and Regional Educational Attendance Areas to establish joint insurance arrangements for group assumption of losses or group purchase of insurance coverage.

This bill effectively allows self insurance by groups of municipalities, school districts and Regional Educational Attendance Areas. This is probably a reasonable action provided the parties to the grouping are fully aware of the implications of that action, and the Division of Insurance has no regulatory responsibility for those groups.

Markets are currently available for workers compensation, and group purchase is possible through a safety group. We view inclusion of workers' compensation in this bill as a reduction of the protections built into the system for the benefit of the injured worker. Insurer financial regulation, 100% backup by the Alaska Insurance Guaranty Act, rate regulation, and more accrue to assure that the insurer meets its obligations in a timely fashion. We believe that that action is unnecessary for workers' compensation insurance.

This bill repeals the fictitious group statute. That statute is intended to avoid unfairly discriminatory rates. We have no problem with removing the entities impacted by the joint insurance arrangement from that law, except for workers compensation, but the law should not be repealed.

We recommend that Section 5 on page 7, which repeals AS 21.36.190, be amended to read:

Add a new subsection to AS 21.36.190 to read:

(e) Except as provided in (d)(2)-(4) of this section, this section does not apply to coverage purchased through a joint insurance arrangement formed under AS 21.76.

Also on page 1, line 23, after "disability," insert the words "workers' compensation."

Letter of Intent for CSSB 404 (L&C)

It is the intent of the Senate Labor and Commerce Committee that the Division of Insurance urge both domestic and foreign insurance companies, conducting business in the state, to write insurance policy contracts in comprehensible, "layman's" language.

CHAIRMAN'S INFORMATION: CSSB 404 (L&C)

1) BILL TITLE: "An act relating to insurance; authorizing joint insurance arrangements; repealing a prohibition against certain types of group insurance; and providing for an effective date." N.B. L&C CS has a title change which will need to be moved when we adopt CS for discussion purposes.

The new Title reads: "An act relating to cancellation and nonrenewal of insurance; authorizing joint insurance arrangements; and providing for an effective date."

We also have a letter of intent on "easy read contracts" which must be adopted.

a) Introduced: By Sen Josephson

b) Co-sponsors:

2) INTENT: This measure, (CS), has been expanded to include more strict requirements on cancellation notices for insurance policies, as well as time certain dates for the return of unearned premium on business and commercial insurance.

The bill also authorizes "joint insurance arrangements" (group insurance pools) for municipalities, school districts, and REAA's for property insurance.

FISCAL NOTE: Not received

IN THE SENATE

BY THE LABOR AND COMMERCE COMMITTEE

CS FOR SENATE BILL NO. 404 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to cancellation and nonrenewal of insurance; authorizing joint insurance arrangements; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 21.36.190(d) is amended to read:

(d) This section does not apply to workers' compensation insurance when issued to an association of employers formed for purposes other than the purchase of insurance and that

(1) has a constitution and bylaws; the requirement of this paragraph does not apply to municipalities, school districts, and regional educational attendance areas;

(2) incorporates a safety program;

(3) as a group has preferred characteristics over similar risks written on an individual basis; and

(4) has filed and received approval from the director for the rating program to be applied to the group.

* Sec. 2. AS 21.36.190 is amended by adding a new subsection to read:

(e) The provisions of (a) and (b) of this section do not apply to coverage purchased through a joint insurance arrangement formed under AS 21.76.

* Sec. 3. AS 21.36.210(a) is amended to read:

(a) An insurer may not exercise its right to cancel a policy of personal [AN] automobile insurance [POLICY] except for the following reasons:

(1) nonpayment of premium; or

(2) the driver's license or motor vehicle registration of either the named insured or of an operator who resides in the same household as the named insured or who customarily operates a motor vehicle insured under the policy has been under suspension or revocation during the policy period or, if the policy is a renewal, during its policy period or the 180 days immediately preceding its effective date.

* Sec. 4. AS 21.36.210(d) is amended to read:

(d) This section does not apply to

(1) the failure to renew a policy, except as to coverage in force for less than 12 months;

(2) a policy that has been in effect less than 60 days at the time notice of cancellation is mailed or delivered by the insurer, unless it is a renewal policy;

(3) a policy issued under an automobile assigned risk plan or automobile insurance plan;

(4) a policy insuring more than four motor vehicles;

(5) a policy covering the operation of a garage; automobile sales agency, repair shop, or service station; or public parking place;

(6) a policy providing insurance only on an excess basis;

(7) any other contract providing insurance to the named insured, even though the contract may incidentally provide insurance with respect to motor vehicles.

* Sec. 5. AS 21.36.210(f) is amended to read:

(f) An [NOTWITHSTANDING (e) OF THIS SECTION, AN] insurer may not exercise its right to cancel a policy of personal insurance other than personal automobile insurance, except for the following reasons [THE

TYPE DESCRIBED IN (e) OF THIS SECTION IF ONE OF THE FOLLOWING CONDITIONS OR CIRCUMSTANCES ARISES]:

(1) nonpayment of premiums, including nonpayment of additional premiums, calculated in accordance with the current rating manual of the insurer, justified by a physical change in the insured property or a change in its occupancy or use;

(2) conviction of the insured of a crime having as one of its necessary elements an act increasing a hazard insured against;

(3) discovery of fraud or material misrepresentation made by the insured or a representative of the insured in obtaining the insurance or by the insured in pursuing a claim under the policy;

(4) discovery of a grossly negligent act or omission by the insured that substantially increases the hazards insured against; or

(5) physical changes in the insured property that result in the property becoming uninsurable.

* Sec. 6. AS 21.36.220 is amended to read:

Sec. 21.36.220. NOTICE OF CANCELLATION. An insurer may not exercise its right to cancel a personal insurance policy unless a written notice of cancellation is mailed or delivered to the named insured, at the address shown in the policy, at least 20 days before the effective date of cancellation. However, if [, EXCEPT THAT WHEN] cancellation is for nonpayment of premium, the notice shall be mailed or delivered to the named insured at the address shown in the policy at least 10 days before the effective date of cancellation, and must [SHALL] include or be accompanied by a statement of the reason for the cancellation. [THIS SECTION DOES NOT APPLY TO THE FAILURE TO RENEW A POLICY, EXCEPT AS TO COVERAGE IN FORCE FOR LESS THAN 12 MONTHS.]

* Sec. 7. AS 21.36.220 is amended by adding a new subsection to read:

(b) An insurer may not exercise its right to cancel a policy of

business or commercial insurance unless a written notice of cancellation is mailed or delivered to the named insured, at the address shown in the policy, and to the agent or broker of record, at least 60 days before the effective date of cancellation. However, if cancellation is for nonpayment of premium, the notice shall be mailed or delivered to the named insured at the address shown in the policy and to the agent or broker of record at least 10 days before the effective date of cancellation, and must include or be accompanied by a statement of the reason for the cancellation.

* Sec. 8. AS 21.36 is amended by adding a new section to read:

Sec. 21.36.235. RETURN OF PREMIUM UPON CANCELLATION. If an insurer cancels a policy under AS 21.36.220(b), it shall return any unearned premium to the agent or broker of record or directly to the insured or premium finance company, if applicable, by the effective date of cancellation, except that if cancellation is for nonpayment of premium, any unearned premium shall be returned within 30 days after the notice of cancellation is given. If the unearned premium is returned by the insurer to a person other than the insured, that person shall promptly return the unearned premium to the insured unless otherwise provided by agreement between the person and the insured.

* Sec. 9. AS 21.36.240 is amended to read:

Sec. 21.36.240. FAILURE TO RENEW. An insurer may not fail to renew a <u>personal insurance</u> policy in force for less than 12 months. An insurer may not fail to renew a policy [IN FORCE FOR 12 MONTHS OR MORE] unless a written notice of nonrenewal is mailed or delivered to the named insured, at the address shown in the policy, at least 20 days <u>for a personal insurance policy, and at least 60 days for a business or commercial insurance policy,</u> before the expiration date of

the policy [,] or of the anniversary date of a policy written for term longer than one year or with no fixed expiration date. This section does not apply

(1) if the insurer has in good faith manifested in any way its willingness to renew;

(2) in case of nonpayment of premium for the expiring policy; or

(3) if the insured fails to pay the premium as required by the insurer for renewal.

* Sec. 10. AS 21.36.250 is amended to read:

Sec. 21.36.250. NOTICE OF ELIGIBILITY. When a policy of automobile liability insurance is cancelled, other than for nonpayment of premium, or <u>is not renewed in accordance with</u> [FOR FAILURE TO RENEW A POLICY OF AUTOMOBILE LIABILITY INSURANCE TO WHICH] AS 21.36.240 [APPLIES], the insurer shall notify the named insured of possible eligibility for automobile insurance through the automobile assigned risk plan, or automobile insurance plan. The notification <u>must</u> [SHALL] accompany or be included in the notice of cancellation or nonrenewal required by <u>AS 21.36.220</u> [AS 21.36.230] and 21.36.240.

* Sec. 11. AS 21.36.310 is amended to read:

Sec. 21.36.310. DEFINITIONS. In AS 21.36.210 - 21.36.310

<u>(1) "business or commercial insurance" means insurance other than personal insurance, life insurance, disability insurance, title insurance, or an annuity contract;</u>

<u>(2)</u> "nonpayment of premium" means failure of the named insured to discharge when due any obligations of the named insured in connection with the payment of premium on a policy, or any installment of the premium, whether the premium is payable directly to the insurer or its agent or indirectly under any premium finance plan or extension

of credit;

(3) "personal automobile insurance" means insurance not related to business or commercial activities, covering [(2) "POLICY" MEANS AN INSURANCE POLICY COVERING THE RISKS AND EXPOSURES LISTED IN AS 21.36.210(e) OR AN AUTOMOBILE POLICY THAT INCLUDES] automobile liability [COVERAGE], uninsured or underinsured motorists [MOTORIST COVERAGE], automobile medical payments [COVERAGE], or automobile physical damage [COVERAGE], that is delivered or issued for delivery in this state, [INSURING AS THE NAMED INSURED, ONE INDIVIDUAL OR HUSBAND AND WIFE RESIDENT OF THE SAME HOUSEHOLD,] and under which the insured vehicles are of the following types only:

(A) a motor vehicle of the private passenger or station wagon type that is not used as a public or livery conveyance, nor rented to others, or

(B) any other four-wheel motor vehicle with a load capacity of 1,500 pounds or less that is not used in the occupation, profession, or business of the insured, nor used as a public or livery conveyance, nor rented to others;

(4) "personal insurance" does not include an annuity contract or a policy of life insurance, disability insurance, or title insurance; the term means personal automobile insurance, or insurance covering

(A) loss of or damage to real property that is used predominantly for residential purposes and that does not consist of more than four dwelling units;

(B) loss of or damage to personal property, including personal effects, household furniture, fixtures and equipment located in not more than four dwelling units; or

(C) legal liability of natural persons for loss of,

damage to, or injury to, persons or property if the insuranc
does not cover liability arising from or in connection wit
business or commercial activities;

(5) [(3)] "renewal" or "renew" means

(A) the issuance and delivery by an insurer of policy replacing at the end of the policy period a policy previ ously issued and delivered by the same insurer,

(B) the issuance and delivery of a certificate o notice extending the term of a policy beyond its policy period o term, or

(C) the extension of the term of a policy beyond it policy period or term under a provision for extending the polic by payment of a continuation premium.

* Sec. 12. AS 21 is amended by adding a new chapter to read:

CHAPTER 76. JOINT INSURANCE ARRANGEMENTS.

Sec. 21.76.010. AUTHORITY TO ESTABLISH JOINT INSURANCE ARRANGE MENTS. (a) Municipalities, school districts, and regional educa tional attendance areas may enter into cooperative agreements wit each other for the purpose of establishing, operating, or participat ing in joint insurance arrangements through which the participatin members agree to pool contributions and

(1) assume risks from losses on a group basis; or

(2) purchase coverage on a group basis.

(b) A joint insurance arrangement under (a)(1) of this sectio may be only for property insurance.

(c) A joint insurance arrangement under (a)(2) of this sectio may be for any kind of insurance defined by this title except for

(1) life, annuity, disability, and title insurance; and

(2) surety.

(d) A joint insurance arrangement shall be considered an alternative or supplement to any other policy or contract of insurance authorized or required by law, including insurance under AS 21.75.

Sec. 21.76.020. REGULATION BY DIVISION OF INSURANCE. A joint insurance arrangement may not be considered insurance for the purpose of any other law of the state and is not subject to regulations of the director except as expressly provided in this chapter.

Sec. 21.76.030. GENERAL PROVISIONS OF COOPERATIVE AGREEMENTS. A cooperative agreement shall provide for the proper operation of the joint insurance arrangement, and include provisions for

(1) administration of the arrangement by a board of directors, specifying the number of members of the board and other requirements necessary for the proper functioning of the board;

(2) appointment of an administrator and other persons as necessary for the proper functioning of the arrangement;

(3) organization of the arrangement, including a roster of participating members and the names of the members of the board of directors;

(4) procedures to establish and promote an aggressive risk management and program among the members of the arrangement, including procedures for identifying and reducing the risks that can be reduced through implementing better safety technologies and improved work techniques and procedures;

(5) enforcing the collection of contributions or payments in default from members of the arrangement;

(6) the addition of new members to the arrangement or the withdrawal of members from the arrangement;

(7) the method of apportioning costs and disposition of excess contributions;

(8) transmission of financial statements and audit report of the arrangement to participating members;

(9) terminating the arrangement and disposing of its assets; and

(10) establishing and administering a joint insurance fund.

Sec. 21.76.040. FINANCIAL PROVISIONS OF AGREEMENTS. (a) A cooperative agreement must include a provision requiring an annual determination by a casualty actuary who is a member of the American Academy of Actuaries that procedures for establishing reserves for losses of the joint insurance arrangement are actuarially sound.

(b) A joint insurance arrangement shall be subject to an annual independent audit. The audit shall be conducted in accordance with generally accepted auditing standards and must include a review of the actuarial assumptions used for establishing the reserves under (a) of this section. The audit report must include certification from a casualty actuary who is a member of the American Academy of Actuaries that the actuarial assumptions continue to be sound and the level of the reserves are adequate.

(c) A joint insurance arrangement shall use a method of accounting that conforms with generally accepted government accounting principles.

Sec. 21.76.050. CONTRACTING WITH PRIVATE ADMINISTRATORS. A cooperative agreement may authorize the board of directors to enter into contracts for services necessary to perform the functions of a joint insurance arrangement. The person contracting to perform the functions must be appropriately licensed under this title if this title so requires.

Sec. 21.76.060. DELEGATION OF POWER TO SETTLE CLAIMS. A cooperative agreement may delegate to the board of directors, or authorize

delegation by the board to another person or group, the power to compromise, arbitrate, or otherwise settle claims on behalf of the arrangement.

Sec. 21.76.070. EXCESS INSURANCE. A cooperative agreement may authorize the board of directors to purchase excess or catastrophic insurance on behalf of the joint insurance arrangement. The cost of the insurance shall be apportioned in the manner specified in the joint insurance agreement. The board may purchase insurance under this section only from an insurer authorized to do business in the state or from an unauthorized insurer if the insurance is placed through a licensed surplus lines broker.

Sec. 21.76.080. JOINT INSURANCE FUND. (a) A joint insurance arrangement shall establish a joint insurance fund. The fund consists of money

(1) contributed by members of the joint insurance arrangement through budgetary appropriations or transfers from a self-insurance reserve; and

(2) collected by the joint insurance arrangement through subrogation of a claim paid from the fund to a member of the arrangement.

(b) An expenditure may be made from a joint insurance fund only to pay claims, losses, or benefits, including interest on them, and the administrative and adjustment expenses incurred in connection with them, involving the types of protection for which the fund provides coverage as specified in the joint insurance agreement.

(c) The administrator shall keep the fund separate from other funds of a member of a joint insurance arrangement.

(d) For each type of protection offered by the joint insurance arrangement, the method of accounting must show the order, source,

date, and amount of each payment from the fund.

(e) Within 60 days of the end of the fiscal year, the administrator shall furnish a detailed report of the operation and condition of the fund to the board of directors and the director of insurance. The report furnished to the director of insurance shall be available for public inspection.

(f) Money held by a fund as reserves and money not needed for daily operations may be invested by the board of directors.

(g) A fund may not be terminated unless the administrator certifies that an amount of money sufficient to pay accrued and contingent expenditures has been placed in a fully collateralized escrow account.

Sec. 21.76.090. FILING OF AGREEMENT. The board of directors shall file a copy of the cooperative agreement with the director of insurance at least 60 days before the effective date of the agreement. The agreement shall be available for public inspection.

Sec. 21.76.100. REGULATIONS. A cooperative agreement may authorize the board of directors to adopt regulations not inconsistent with law for the fair and equitable administration of the joint insurance arrangement and the joint insurance fund.

Sec. 21.76.110. SUBROGATION. A joint insurance arrangement has a cause of action for reimbursement of money paid to a participating member for a loss or injury if the participating member recovers money for the loss or injury from a third party. The joint insurance arrangement also has a direct cause of action for reimbursement against a third party responsible for loss or injuries sustained by a participating member if the joint arrangement has paid money to the participating member for the loss or injuries.

Sec. 21.76.900. DEFINITIONS. In this chapter

(1) "adjustment expenses" means expenses for investigative,

processing, legal, actuarial, arbitration, and settlement services incurred in the adjustment of losses, claims, or benefits;

(2) "administrator" means a person or group appointed by the board of directors to administer a joint insurance arrangement or a joint insurance fund;

(3) "board" or "board of directors" means the board of directors provided for in a cooperative agreement;

(4) "cooperative agreement" means a written agreement entered into by two or more entities described in AS 21.76.010 for the purpose of establishing, operating, or participating in a joint insurance arrangement;

(5) "fund" or "joint insurance fund" means a fund established under AS 21.76.080;

(6) "joint insurance arrangement" means a joint insurance arrangement authorized under AS 21.76.010.

* Sec. 13. AS 21.39.155(a) is amended to read:

(a) The director may require carriers, except a reciprocal insurer formed by and insuring only a group of municipalities or nonprofit public utilities under AS 21.75 or a joint insurance arrangement formed under AS 21.76, as a condition of writing a line of insurance dealing with workers' compensation, to participate in an assigned risk pool if the director finds that mandatory carrier participation is in the public interest.

* Sec. 14. AS 21.80.180(5) is amended to read:

(5) "insolvent insurer" means an insurer

(A) authorized to transact insurance in this state, except an assessable reciprocal insurer formed by and insuring only municipalities or nonprofit public utilities, a joint insurance arrangement formed under AS 21.76, the Medical Indemnity

Corporation of Alaska, and the Health Care Providers Joint Underwriting Association established under AS 21.88, either at the time the policy was issued or when the insured event occurred and

(B) determined to be insolvent by a court of competent jurisdiction;

* Sec. 15. AS 21.80.180(6) is amended to read:

(6) "member insurer" means a person, except an assessable reciprocal insurer formed by and insuring only municipalities or nonprofit public utilities, a joint insurance arrangement formed under AS 21.76, the Medical Indemnity Corporation of Alaska, and the Health Care Providers Joint Underwriting Association established under AS 21.88, who

(A) writes any kind of insurance to which this chapter applies under AS 21.80.020 including the exchange of reciprocal or interinsurance contracts, and

(B) is licensed to transact insurance in this state;

* Sec. 16. AS 21.36.210(e), 21.36.230, and 21.36.300 are repealed.

* Sec. 17. This Act takes effect immediately in accordance with AS 01.-10.070(c).

IN THE SENATE

BY THE LABOR AND COMMERCE COMMITTEE

CS FOR SENATE BILL NO. 404 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to insurance; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 21.36.190(d) is amended to read:

(d) This section does not apply to workers' compensation insurance when issued to an association of employers formed for purposes other than the purchase of insurance and that

(1) has a constitution and bylaws; the requirement of this paragraph does not apply to municipalities, school districts, and regional educational attendance areas;

(2) incorporates a safety program;

(3) as a group has preferred characteristics over similar risks written on an individual basis; and

(4) has filed and received approval from the director for the rating program to be applied to the group.

* Sec. 2. AS 21.36.190 is amended by adding a new subsection to read:

(e) The provisions of (a) and (b) of this section do not apply to coverage purchased through a joint insurance arrangement formed under AS 21.76.

* Sec. 3. AS 21.36.210(a) is amended to read:

(a) An insurer may not exercise its right to cancel a policy of personal [AN] automobile insurance [POLICY] except for the following reasons:

(1) nonpayment of premium; or

(2) the driver's license or motor vehicle registration of either the named insured or of an operator who resides in the same household as the named insured or who customarily operates a motor vehicle insured under the policy has been under suspension or revocation during the policy period or, if the policy is a renewal, during its policy period or the 180 days immediately preceding its effective date.

* Sec. 4. AS 21.36.210(d) is amended to read:

(d) This section does not apply to

(1) the failure to renew a policy, except as to coverage in force for less than 12 months;

(2) a policy that has been in effect less than 60 days at the time notice of cancellation is mailed or delivered by the insurer, unless it is a renewal policy;

(3) a policy issued under an automobile assigned risk plan or automobile insurance plan;

(4) a policy insuring more than four motor vehicles;

(5) a policy covering the operation of a garage; automobile sales agency, repair shop, or service station; or public parking place;

(6) a policy providing insurance only on an excess basis;

(7) any other contract providing insurance to the named insured, even though the contract may incidentally provide insurance with respect to motor vehicles.

* Sec. 5. AS 21.36.210(f) is amended to read:

(f) An [NOTWITHSTANDING (e) OF THIS SECTION, AN] insurer may not exercise its right to cancel a policy of personal insurance other than personal automobile insurance, except for the following reasons [THE TYPE DESCRIBED IN (e) OF THIS SECTION IF ONE OF THE FOLLOWING

CONDITIONS OR CIRCUMSTANCES ARISES]:

(1) nonpayment of premiums, including nonpayment of additional premiums, calculated in accordance with the current rating manual of the insurer, justified by a physical change in the insured property or a change in its occupancy or use;

(2) conviction of the insured of a crime having as one of its necessary elements an act increasing a hazard insured against;

(3) discovery of fraud or material misrepresentation made by the insured or a representative of the insured in obtaining the insurance or by the insured in pursuing a claim under the policy;

(4) discovery of a grossly negligent act or omission by the insured that substantially increases the hazards insured against; or

(5) physical changes in the insured property that result in the property becoming uninsurable.

* Sec. 6. AS 21.36.220 is amended to read:

Sec. 21.36.220. NOTICE OF CANCELLATION. An insurer may not exercise its right to cancel a personal insurance policy unless a written notice of cancellation is mailed or delivered to the named insured, at the address shown in the policy, at least 20 days before the effective date of cancellation. However, if [, EXCEPT THAT WHEN] cancellation is for nonpayment of premium, the notice shall be mailed or delivered to the named insured at the address shown in the policy at least 10 days before the effective date of cancellation, and must [SHALL] include or be accompanied by a statement of the reason for the cancellation. [THIS SECTION DOES NOT APPLY TO THE FAILURE TO RENEW A POLICY, EXCEPT AS TO COVERAGE IN FORCE FOR LESS THAN 12 MONTHS.]

* Sec. 7. AS 21.36.220 is amended by adding a new subsection to read:

(b) An insurer may not exercise its right to cancel a policy of business or commercial insurance unless a written notice of

cancellation is mailed or delivered to the named insured, at the address shown in the policy, and to the agent or broker of record, at least 60 days before the effective date of cancellation. However, if cancellation is for nonpayment of premium, the notice shall be mailed or delivered to the named insured at the address shown in the policy and to the agent or broker of record at least 10 days before the effective date of cancellation, and must include or be accompanied by a statement of the reason for the cancellation.

* Sec. 8. AS 21.36 is amended by adding a new section to read:

Sec. 21.36.235. RETURN OF PREMIUM UPON CANCELLATION. If an insurer cancels a policy under AS 21.36.220(b), it shall return any unearned premium to the agent or broker of record or directly to the insured or premium finance company, if applicable, by the effective date of cancellation, except that if cancellation is for nonpayment of premium, any unearned premium shall be returned within 30 days after the notice of cancellation is given. If the unearned premium is returned by the insurer to a person other than the insured, that person shall promptly return the unearned premium to the insured unless otherwise provided by agreement between the person and the insured.

* Sec. 9. AS 21.36.240 is amended to read:

Sec. 21.36.240. FAILURE TO RENEW. An insurer may not fail to renew a <u>personal insurance</u> policy in force for less than 12 months. An insurer may not fail to renew a policy [IN FORCE FOR 12 MONTHS OR MORE] unless a written notice of nonrenewal is mailed or delivered to the named insured, at the address shown in the policy, at least 20 days <u>for a personal insurance policy, and at least 60 days for a business or commercial insurance policy,</u> before the expiration date of the policy [,] or of the anniversary date of a policy written for a

term longer than one year or with no fixed expiration date. This section does not apply

(1) if the insurer has in good faith manifested in any way its willingness to renew;

(2) in case of nonpayment of premium for the expiring policy; or

(3) if the insured fails to pay the premium as required by the insurer for renewal.

* Sec. 10. AS 21.36.250 is amended to read:

Sec. 21.36.250. NOTICE OF ELIGIBILITY. When a policy of automobile liability insurance is cancelled, other than for nonpayment of premium, or is not renewed in accordance with [FOR FAILURE TO RENEW A POLICY OF AUTOMOBILE LIABILITY INSURANCE TO WHICH] AS 21.36.240 [APPLIES], the insurer shall notify the named insured of possible eligibility for automobile insurance through the automobile assigned risk plan, or automobile insurance plan. The notification must [SHALL] accompany or be included in the notice of cancellation or nonrenewal required by AS 21.36.220 [AS 21.36.230] and 21.36.240.

* Sec. 11. AS 21.36.310 is amended to read:

Sec. 21.36.310. DEFINITIONS. In AS 21.36.210 - 21.36.310

(1) "business or commercial insurance" means insurance other than personal insurance, life insurance, disability insurance, title insurance, or an annuity contract;

(2) "nonpayment of premium" means failure of the named insured to discharge when due any obligations of the named insured in connection with the payment of premium on a policy, or any installment of the premium, whether the premium is payable directly to the insurer or its agent or indirectly under any premium finance plan or extension of credit;

(3) "personal automobile insurance" means insurance not related to business or commercial activities, covering [(2) "POLICY" MEANS AN INSURANCE POLICY COVERING THE RISKS AND EXPOSURES LISTED IN AS 21.36.210(e) OR AN AUTOMOBILE POLICY THAT INCLUDES] automobile liability [COVERAGE], uninsured or underinsured motorists [MOTORIST COVERAGE], automobile medical payments [COVERAGE], or automobile physical damage [COVERAGE], that is delivered or issued for delivery in this state, [INSURING AS THE NAMED INSURED, ONE INDIVIDUAL OR HUSBAND AND WIFE RESIDENT OF THE SAME HOUSEHOLD,] and under which the insured vehicles are of the following types only:

(A) a motor vehicle of the private passenger or station wagon type that is not used as a public or livery conveyance, nor rented to others, or

(B) any other four-wheel motor vehicle with a load capacity of 1,500 pounds or less that is not used in the occupation, profession, or business of the insured, nor used as a public or livery conveyance, nor rented to others;

(4) "personal insurance" does not include an annuity contract or a policy of life insurance, disability insurance, or title insurance; the term means personal automobile insurance, or insurance covering

(A) loss of or damage to real property that is used predominantly for residential purposes and that does not consist of more than four dwelling units;

(B) loss of or damage to personal property, including personal effects, household furniture, fixtures and equipment located in not more than four dwelling units; or

(C) legal liability of natural persons for loss of, damage to, or injury to, persons or property if the insurance

does not cover liability arising from or in connection with business or commercial activities;

(5) [(3)] "renewal" or "renew" means

(A) the issuance and delivery by an insurer of a policy replacing at the end of the policy period a policy previously issued and delivered by the same insurer,

(B) the issuance and delivery of a certificate or notice extending the term of a policy beyond its policy period or term, or

(C) the extension of the term of a policy beyond its policy period or term under a provision for extending the policy by payment of a continuation premium.

* Sec. 12. AS 21 is amended by adding a new chapter to read:

CHAPTER 76. JOINT INSURANCE ARRANGEMENTS.

Sec. 21.76.010. AUTHORITY TO ESTABLISH JOINT INSURANCE ARRANGEMENTS. (a) Municipalities, school districts, and regional educational attendance areas may enter into cooperative agreements with each other for the purpose of establishing, operating, or participating in joint insurance arrangements through which the participating members agree to pool contributions and

(1) assume risks from losses on a group basis; or

(2) purchase coverage on a group basis.

(b) A joint insurance arrangement under (a)(1) of this section may be only for property insurance.

(c) A joint insurance arrangement under (a)(2) of this section may be for any kind of insurance defined by this title except for

(1) life, annuity, disability, and title insurance; and

(2) surety.

(d) A joint insurance arrangement shall be considered an

alternative or supplement to any other policy or contract of insurance authorized or required by law, including insurance under AS 21.75.

Sec. 21.76.020. REGULATION BY DIVISION OF INSURANCE. A joint insurance arrangement may not be considered insurance for the purpose of any other law of the state and is not subject to regulations of the director except as expressly provided in this chapter.

Sec. 21.76.030. GENERAL PROVISIONS OF COOPERATIVE AGREEMENTS. A cooperative agreement shall provide for the proper operation of the joint insurance arrangement, and include provisions for

(1) administration of the arrangement by a board of directors, specifying the number of members of the board and other requirements necessary for the proper functioning of the board;

(2) appointment of an administrator and other persons as necessary for the proper functioning of the arrangement;

(3) organization of the arrangement, including a roster of participating members and the names of the members of the board of directors;

(4) procedures to establish and promote an aggressive risk management and program among the members of the arrangement, including procedures for identifying and reducing the risks that can be reduced through implementing better safety technologies and improved work techniques and procedures;

(5) enforcing the collection of contributions or payments in default from members of the arrangement;

(6) the addition of new members to the arrangement or the withdrawal of members from the arrangement;

(7) the method of apportioning costs and disposition of excess contributions;

(8) transmission of financial statements and audit reports

of the arrangement to participating members;

(9) terminating the arrangement and disposing of its assets; and

(10) establishing and administering a joint insurance fund.

Sec. 21.76.040. FINANCIAL PROVISIONS OF AGREEMENTS. (a) A cooperative agreement must include a provision requiring an annual determination by a casualty actuary who is a member of the American Academy of Actuaries that procedures for establishing reserves for losses of the joint insurance arrangement are actuarially sound.

(b) A joint insurance arrangement shall be subject to an annual independent audit. The audit shall be conducted in accordance with generally accepted auditing standards and must include a review of the actuarial assumptions used for establishing the reserves under (a) of this section. The audit report must include certification from a casualty actuary who is a member of the American Academy of Actuaries that the actuarial assumptions continue to be sound and the level of the reserves are adequate.

(c) A joint insurance arrangement shall use a method of accounting that conforms with generally accepted government accounting principles.

Sec. 21.76.050. CONTRACTING WITH PRIVATE ADMINISTRATORS. A cooperative agreement may authorize the board of directors to enter into contracts for services necessary to perform the functions of a joint insurance arrangement. The person contracting to perform the functions must be appropriately licensed under this title if this title so requires.

Sec. 21.76.060. DELEGATION OF POWER TO SETTLE CLAIMS. A cooperative agreement may delegate to the board of directors, or authorize delegation by the board to another person or group, the power to

compromise, arbitrate, or otherwise settle claims on behalf of the arrangement.

Sec. 21.76.070. EXCESS INSURANCE. A cooperative agreement may authorize the board of directors to purchase excess or catastrophic insurance on behalf of the joint insurance arrangement. The cost of the insurance shall be apportioned in the manner specified in the joint insurance agreement. The board may purchase insurance under this section only from an insurer authorized to do business in the state or from an unauthorized insurer if the insurance is placed through a licensed surplus lines broker.

Sec. 21.76.080. JOINT INSURANCE FUND. (a) A joint insurance arrangement shall establish a joint insurance fund. The fund consists of money

(1) contributed by members of the joint insurance arrangement through budgetary appropriations or transfers from a self-insurance reserve; and

(2) collected by the joint insurance arrangement through subrogation of a claim paid from the fund to a member of the arrangement.

(b) An expenditure may be made from a joint insurance fund only to pay claims, losses, or benefits, including interest on them, and the administrative and adjustment expenses incurred in connection with them, involving the types of protection for which the fund provides coverage as specified in the joint insurance agreement.

(c) The administrator shall keep the fund separate from other funds of a member of a joint insurance arrangement.

(d) For each type of protection offered by the joint insurance arrangement, the method of accounting must show the order, source, date, and amount of each payment from the fund.

(e) Within 60 days of the end of the fiscal year, the administrator shall furnish a detailed report of the operation and condition of the fund to the board of directors and the director of insurance. The report furnished to the director of insurance shall be available for public inspection.

(f) Money held by a fund as reserves and money not needed for daily operations may be invested by the board of directors.

(g) A fund may not be terminated unless the administrator certifies that an amount of money sufficient to pay accrued and contingent expenditures has been placed in a fully collateralized escrow account.

Sec. 21.76.090. FILING OF AGREEMENT. The board of directors shall file a copy of the cooperative agreement with the director of insurance at least 60 days before the effective date of the agreement. The agreement shall be available for public inspection.

Sec. 21.76.100. REGULATIONS. A cooperative agreement may authorize the board of directors to adopt regulations not inconsistent with law for the fair and equitable administration of the joint insurance arrangement and the joint insurance fund.

Sec. 21.76.110. SUBROGATION. A joint insurance arrangement has a cause of action for reimbursement of money paid to a participating member for a loss or injury if the participating member recovers money for the loss or injury from a third party. The joint insurance arrangement also has a direct cause of action for reimbursement against a third party responsible for loss or injuries sustained by a participating member if the joint arrangement has paid money to the participating member for the loss or injuries.

Sec. 21.76.900. DEFINITIONS. In this chapter

(1) "adjustment expenses" means expenses for investigative, processing, legal, actuarial, arbitration, and settlement services

incurred in the adjustment of losses, claims, or benefits;

(2) "administrator" means a person or group appointed by the board of directors to administer a joint insurance arrangement or a joint insurance fund;

(3) "board" or "board of directors" means the board of directors provided for in a cooperative agreement;

(4) "cooperative agreement" means a written agreement entered into by two or more entities described in AS 21.76.010 for the purpose of establishing, operating, or participating in a joint insurance arrangement;

(5) "fund" or "joint insurance fund" means a fund established under AS 21.76.080;

(6) "joint insurance arrangement" means a joint insurance arrangement authorized under AS 21.76.010.

* Sec. 13. AS 21.39.155(a) is amended to read:

(a) The director may require carriers, except a reciprocal insurer formed by and insuring only a group of municipalities or nonprofit public utilities under AS 21.75 or a joint insurance arrangement formed under AS 21.76, as a condition of writing a line of insurance dealing with workers' compensation, to participate in an assigned risk pool if the director finds that mandatory carrier participation is in the public interest.

* Sec. 14. AS 21.80.180(5) is amended to read:

(5) "insolvent insurer" means an insurer

(A) authorized to transact insurance in this state, except an assessable reciprocal insurer formed by and insuring only municipalities or nonprofit public utilities, a joint insurance arrangement formed under AS 21.76, the Medical Indemnity Corporation of Alaska, and the Health Care Providers Joint

Underwriting Association established under AS 21.88, either at the time the policy was issued or when the insured event occurred, and

(B) determined to be insolvent by a court of competent jurisdiction;

* Sec. 15. AS 21.80.180(6) is amended to read:

(6) "member insurer" means a person, except an assessable reciprocal insurer formed by and insuring only municipalities or nonprofit public utilities, a joint insurance arrangement formed under AS 21.76, the Medical Indemnity Corporation of Alaska, and the Health Care Providers Joint Underwriting Association established under AS 21.88, who

(A) writes any kind of insurance to which this chapter applies under AS 21.80.020 including the exchange of reciprocal or interinsurance contracts, and

(B) is licensed to transact insurance in this state;

* Sec. 16. AS 21.36.210(e), 21.36.230, and 21.36.300 are repealed.

* Sec. 17. This Act takes effect immediately in accordance with AS 01.-10.070(c).

Introduced: 2/13/86
Referred: Labor and Commerce
and Finance

IN THE SENATE BY JOSEPHSON

SENATE BILL NO. 404

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to insurance; authorizing joint insurance arrangements; repealing a prohibition against certain types of group insurance; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 21 is amended by adding a new chapter to read:

CHAPTER 76. JOINT INSURANCE ARRANGEMENTS.

Sec. 21.76.010. AUTHORITY TO ESTABLISH JOINT INSURANCE ARRANGEMENTS. (a) Municipalities, school districts, and regional educational attendance areas may enter into cooperative agreements with each other for the purpose of establishing, operating, or participating in joint insurance arrangements through which the participating members agree to pool contributions and

(1) assume risks from losses on a group basis; or

(2) purchase coverage on a group basis.

(b) A joint insurance arrangement may be for any kind of insurance defined by this title except for

(1) life, annuity, disability, and title insurance; and

(2) surety.

(c) A joint insurance arrangement shall be considered an alternative or supplement to any other policy or contract of insurance authorized or required by law, including insurance under AS 21.75.

Sec. 21.76.020. REGULATION BY DIVISION OF INSURANCE. A joint insurance arrangement may not be considered insurance for the purpose

of any other law of the state and is not subject to regulations of the director except as expressly provided in this chapter.

Sec. 21.76.030. GENERAL PROVISIONS OF COOPERATIVE AGREEMENTS. A cooperative agreement shall provide for the proper operation of the joint insurance arrangement, and include provisions for

(1) administration of the arrangement by a board of directors, specifying the number of members of the board and other requirements necessary for the proper functioning of the board;

(2) appointment of an administrator and other persons as necessary for the proper functioning of the arrangement;

(3) organization of the arrangement, including a roster of participating members and the names of the members of the board of directors;

(4) procedures to establish and promote an aggressive risk management and program among the members of the arrangement, including procedures for identifying and reducing the risks that can be reduced through implementing better safety technologies and improved work techniques and procedures;

(5) enforcing the collection of contributions or payments in default from members of the arrangement;

(6) the addition of new members to the arrangement or the withdrawal of members from the arrangement;

(7) the method of apportioning costs and disposition of excess contributions;

(8) transmission of financial statements and audit reports of the arrangement to participating members;

(9) terminating the arrangement and disposing of its assets; and

(10) establishing and administering a joint insurance fund.

Sec. 21.76.040. FINANCIAL PROVISIONS OF AGREEMENTS. (a) A cooperative agreement must include a provision requiring an annual determination by a casualty actuary who is a member of the American Academy of Actuaries that procedures for establishing reserves for losses of the joint insurance arrangement are actuarially sound.

(b) A joint insurance arrangement shall be subject to an annual independent audit. The audit shall be conducted in accordance with generally accepted auditing standards and must include a review of the actuarial assumptions used for establishing the reserves under (a) of this section. The audit report must include certification from a casualty actuary who is a member of the American Academy of Actuaries that the actuarial assumptions continue to be sound and the level of the reserves are adequate.

(c) A joint insurance arrangement shall use a method of accounting that conforms with generally accepted government accounting principles.

Sec. 21.76.050. CONTRACTING WITH PRIVATE ADMINISTRATORS. A cooperative agreement may authorize the board of directors to enter into contracts for services necessary to perform the functions of a joint insurance arrangement. The person contracting to perform the functions must be appropriately licensed under this title if this title so requires.

Sec. 21.76.060. DELEGATION OF POWER TO SETTLE CLAIMS. A cooperative agreement may delegate to the board of directors, or authorize delegation by the board to another person or group, the power to compromise, arbitrate, or otherwise settle claims on behalf of the arrangement.

Sec. 21.76.070. EXCESS INSURANCE. A cooperative agreement may authorize the board of directors to purchase excess or catastrophic

insurance on behalf of the joint insurance arrangemen The cost of the insurance shall be apportioned in the manner specified in the joint insurance agreement. The board may purchase insurance under this section only from an insurer authorized to do business in the state or from an unauthorized insurer if the insurance is placed through a licensed surplus lines broker.

Sec. 21.76.080. JOINT INSURANCE FUND. (a) A joint insurance arrangement shall establish a joint insurance fund. The fund consists of money

(1) contributed by members of the joint insurance arrangement through budgetary appropriations or transfers from a self-insurance reserve; and

(2) collected by the joint insurance arrangement through subrogation of a claim paid from the fund to a member of the arrangement.

(b) An expenditure may be made from a joint insurance fund only to pay claims, losses, or benefits, including interest on them, and the administrative and adjustment expenses incurred in connection with them, involving the types of protection for which the fund provides coverage as specified in the joint insurance agreement.

(c) The administrator shall keep the fund separate from other funds of a member of a joint insurance arrangement.

(d) For each type of protection offered by the joint insurance arrangement, the method of accounting must show the order, source, date, and amount of each payment from the fund.

(e) Within 60 days of the end of the fiscal year, the administrator shall furnish a detailed report of the operation and condition of the fund to the board of directors and the director of insurance. The report furnished to the director of insurance shall be available

for public inspection.

(f) Money held by a fund as reserves and money not needed for daily operations may be invested by the board of directors.

(g) A fund may not be terminated unless the administrator certifies that an amount of money sufficient to pay accrued and contingent expenditures has been placed in a fully collateralized escrow account.

Sec. 21.76.090. FILING OF AGREEMENT. The board of directors shall file a copy of the cooperative agreement with the director of insurance at least 60 days before the effective date of the agreement. The agreement shall be available for public inspection.

Sec. 21.76.100. REGULATIONS. A cooperative agreement may authorize the board of directors to adopt regulations not inconsistent with law for the fair and equitable administration of the joint insurance arrangement and the joint insurance fund.

Sec. 21.76.110. SUBROGATION. A joint insurance arrangement has a cause of action for reimbursement of money paid to a participating member for a loss or injury if the participating member recovers money for the loss or injury from a third party. The joint insurance arrangement also has a direct cause of action for reimbursement against a third party responsible for loss or injuries sustained by a participating member if the joint arrangement has paid money to the participating member for the loss or injuries.

Sec. 21.76.900. DEFINITIONS. In this chapter

(1) "adjustment expenses" means expenses for investigative, processing, legal, actuarial, arbitration, and settlement services incurred in the adjustment of losses, claims, or benefits;

(2) "administrator" means a person or group appointed by the board of directors to administer a joint insurance arrangement or a joint insurance fund;

(3) "board" or "board of directors" means the board of directors provided for in a cooperative agreement;

(4) "cooperative agreement" means a written agreement entered into by two or more entities described in AS 21.76.010 for the purpose of establishing, operating, or participating in a joint insurance arrangement;

(5) "fund" or "joint insurance fund" means a fund established under AS 21.76.080;

(6) "joint insurance arrangement" means a joint insurance arrangement authorized under AS 21.76.010.

* Sec. 2. AS 21.39.155(a) is amended to read:

(a) The director may require carriers, except a reciprocal insurer formed by and insuring only a group of municipalities or nonprofit public utilities under AS 21.75 or a joint insurance arrangement formed under AS 21.76, as a condition of writing a line of insurance dealing with workers' compensation, to participate in an assigned risk pool if the director finds that mandatory carrier participation is in the public interest.

* Sec. 3. AS 21.80.180(5) is amended to read:

(5) "insolvent insurer" means an insurer

(A) authorized to transact insurance in this state, except an assessable reciprocal insurer formed by and insuring only municipalities or nonprofit public utilities, a joint insurance arrangement formed under AS 21.76, the Medical Indemnity Corporation of Alaska, and the Health Care Providers Joint Underwriting Association established under AS 21.88, either at the time the policy was issued or when the insured event occurred, and

(B) determined to be insolvent by a court of

competent jurisdiction;

* Sec. 4. AS 21.80.180(6) is amended to read:

(6) "member insurer" means a person, except an assessable reciprocal insurer formed by and insuring only municipalities or nonprofit public utilities, a joint insurance arrangement formed under AS 21.76, the Medical Indemnity Corporation of Alaska, and the Health Care Providers Joint Underwriting Association established under AS 21.88, who

(A) writes any kind of insurance to which this chapter applies under AS 21.80.020 including the exchange of reciprocal or interinsurance contracts, and

(B) is licensed to transact insurance in this state;

* Sec. 5. AS 21.36.190 is repealed.

* Sec. 6. This Act takes effect immediately in accordance with AS 01.-10.070(c).

FICTITIOUS GROUPS.
TEXT (a) An insurer, whether an authorized or unauthorized insurer, may not make available through a rating plan or form, property, casualty or surety insurance to a firm, corporation, or association of individuals, a preferred rate or premium based upon a fictitious group of the firm, corporation, or association of individuals.

(b) A form or plan of insurance covering a group or combination of persons or risks may not be written or delivered inside or outside this state to cover persons or risks in this state at a preferred rate or on a form other than that offered to persons not in the group or combination and to the public generally, unless the form, plan of insurance, and the rates or premiums to be charged have been submitted to and approved by the director as being not unfairly discriminatory and not otherwise in conflict with (a) of this section or with AS 21.39 to the extent that AS 21.39 is, by its terms, applicable to it.

(c) This section does not apply to mortgage guaranty insurance, life insurance, disability insurance, or annuity contracts.

(d) This section does not apply to workers' compensation insurance when issued to an association of employers formed for purposes other than the purchase of insurance and that

(1) has a constitution and bylaws;

(2) incorporates a safety program;

(3) as a group has preferred characteristics over similar risks written on an individual basis; and

(4) has filed and received approval from the director for the rating program to be applied to the group.

LIMITS ON CANCELLATION.
TEXT (a) An insurer may not exercise its right to cancel an automobile insurance policy except for the following reasons:
(1) nonpayment of premium; or
(2) the driver's license or motor vehicle registration of either the named insured or of an operator who resides in the same household as the named insured or who customarily operates a motor vehicle insured under the policy has been under suspension or revocation during the policy period or,

if the policy is a renewal, during its policy period or the 180 days immediately preceding its effective date.

(b) During the policy period, a modification of automobile physical damage coverage, except coverage for loss caused by collision, whereby provision is made for the application of a deductible amount not exceeding $100 is not a cancellation of the coverage or of the policy.

(c) Renewal of a policy does not constitute a waiver or estoppel with respect to grounds for cancellation that existed before the effective date of the renewal.

(d) This section does not apply to the failure to renew a policy, except as to coverage in force for less than 12 months.

(e) An insurer may not cancel an insurance policy that covers

(1) loss of or damage to real property that is used predominantly for residential purposes and does not consist of more than four dwelling units;

(2) loss of or damage to personal property, including but not limited to personal effects, household furniture, fixtures and equipment located in not more than four dwelling units; or

(3) legal liability of natural persons for loss of, damage to or injury to persons or property when the insurance does not cover liability arising from or in connection with business or commercial activities.

(f) Notwithstanding (e) of this section, an insurer may cancel a policy of the type described in

(e) of this section if one of the following conditions or circumstances arises:

(1) nonpayment of premiums, including nonpayment of additional premiums, calculated in accordance with the current rating manual of the insurer, justified by a physical change in the insured property or a change in its occupancy or use;

(2) conviction of the insured of a crime having as one of its necessary elements an act increasing a hazard insured against;

(3) discovery of fraud or material misrepresentation made by the insured or a representative of the insured in obtaining the insurance or by the insured in pursuing a claim under the policy;

(4) discovery of a grossly negligent act or omission by the insured that substantially increases the hazards insured against;

(5) physical changes in the insured property that result in the property becoming uninsurable.

TEXT In AS 21.36.210 - 21.36.310

(1) "nonpayment of premium" means failure of the named insured to discharge when due any obligations of the named insured in connection with the payment of premium on a policy, or any installment of the premium, whether the premium is payable directly to the insurer or its agent or indirectly under any premium finance plan or extension of credit;

(2) "policy" means an insurance policy covering the risks and exposures listed in AS 21.36.210(e) or an automobile policy that includes automobile liability coverage, uninsured motorist coverage, automobile medical payments coverage, or automobile physical damage coverage, delivered or issued for delivery in this state, insuring as the named insured, one individual or husband and wife resident of the same household, and under which the insured vehicles are of the following types only:

(A) a motor vehicle of the private passenger or station wagon type that is not used as a public or livery conveyance, nor rented to others; or

(B) any other four-wheel motor vehicle with a load capacity of 1,500 pounds or less that is not used in the occupation, profession or business of the insured, nor used as a public or livery conveyance nor rented to others;

(3) "renewal" or "renew" means

(A) the issuance and delivery by an insurer of a policy replacing at the end of the policy period a policy previously issued and delivered by the same insurer,

(B) the issuance and delivery of a certificate or notice extending the term of a policy beyond its policy

period or term, or

(C) the extension of the term of a policy beyond its policy period or term under a provision for extending the policy by payment of a continuation premium.

TEXT In this chapter, unless the context requires otherwise,

(1) "account" means any one of the three accounts created by AS 21.80.040;

(2) "association" means the Alaska Insurance Guaranty Association;

(3) Repealed, sec. 20 ch 21 SLA 1985.

(4) "covered claim" means an unpaid claim, including one of unearned premiums, which arises out of and is within the coverage and not in excess of the applicable limits of an insurance policy to which this chapter applies issued by an insurer, if the insurer becomes an insolvent insurer after August 6, 1970, and (A) the claimant or insured is a resident of this state at the time of the insured event; or

(B) the property from which the claim arises is permanently located in this state; "covered claim" does not include any amount due a reinsurer, insurer,

insurance pool, or underwriting association, as subrogation recoveries or otherwise;

(5) "insolvent insurer" means an insurer

(A) authorized to transact insurance in this state, except an assessable reciprocal insurer formed by and insuring only municipalities or nonprofit public utilities, the Medical Indemnity Corporation of Alaska, and the Health Care Providers Joint Underwriting Association established under AS 21.88, either at the time the policy was issued or when the insured event occurred, and

(B) determined to be insolvent by a court of competent jurisdiction;

(6) "member insurer" means a person except an assessable reciprocal insurer formed by and insuring only municipalities or nonprofit public utilities, the Medical Indemnity Corporation of Alaska, and the Health Care Providers Joint Underwriting Association established under AS 21.88, who

(A) writes any kind of insurance to which this chapter applies under AS 21.80.020 including the exchange of reciprocal or interinsurance contracts, and

(B) is licensed to transact insurance in this state;

(7) "net direct written premiums" means direct gross premiums written in this state on insurance policies to which this chapter applies, less return premiums thereon and dividends paid or credited to policyholders on direct business; "net direct written premiums" does not include premiums on contracts between insurers or reinsurers.

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act exempting certain telephone and electric utilities from regulation by the Alaska Public Utilities Commission."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 42.05.711(e) is amended to read:

(e) Notwithstanding any other provisions of this chapter, an [ANY] electric or telephone utility that does not gross $50,000 annually or that has fewer than 250 subscribers is exempt from regulation under this chapter unless 25 percent of the subscribers petition the commission for regulation. The commission may not combine the revenue or subscribers of different utilities owned by the same company when determining whether a utility is exempt under this subsection.

b) CS adoption?

Department of Commerce
Economic Development

/ POSITION PAPER

SB 426 "An Act exempting certain telephone and electrical utilities from APUC regulation."

The Commission is opposed to this bill. The Commission agrees that AS 42.05.711 should be amended to provide a uniform and consistent opportunity for economic exemption regardless of the type of utility service offered to the public. However, the Commission disagrees that customer number is an acceptable criterion for exemption. One of the reasons it has been proposed to alter the statute is to the assumption that the financial well-being of small utilities necessitates economic deregulation. The Commission proposes that the limit should be reflective of revenue levels, not customer levels.

The history of Commission proceedings reflects that some of the utilities with the fewest customers are those with the most problems and whose customers have most benefited from the oversight and assistance of the Commission. If this Act were passed, the Legislature would need to assure itself that, absent the Commission authority, there is an agency with sufficient authority to address health and safety problems arising from a utilities operation.

Further, the Commission observes that this bill would legislatively deregulate some small utilities whose customers, under a deregulation election, have mandated that their utilities not be exempt from Commission regulation.

The Commission also wishes to point out concerns regarding exemption of telephone utilities. Given the sweeping changes taking place in the telecommunications industry as mandated by the Federal Communications Commission, the technical interconnection between all telephone systems and the fact that some local exchange telephone costs are shared by all Alaskan telephone consumers, the Commission raises the question of whether for purposes of an overall statewide telecommunications policy, it would be appropriate for the Legislature to consider excluding telephone utilities in the majority of the state's communities from regulation.

TO: All Members of Labor & Commerce Committee

FROM: Senator Coghill

RE: SB 426

I believe that the economic regulation of small power and telephone utilities is not in the best interest of the consumer or the utility operator.

This statement concerning the consumer, may seem paradoxical, since the economic regulation of these small utilities is supposed to ensure the well being of the consumer.

After speaking with five owners of small utilities, representing 15 operations, it is apparent that the costs associated with compliance--rate hearings and annual reports-- passes on to the consumer unreasonable increases.

For example, one utility calculates its annual cost of compliance at between $40-60,000 a year.

Another estimates that a rate case over an 18 month period cost more than $180,000.

Another on-going rate case has cost $26,000 so far.

I think it is necessary to balance the need for regulation against the burden to the operator and the cost to the consumer.

These costs have been passed on to the consumer. One operator estimates that about $400 per subscriber has been passed on to his customers in little over a year.

These costs are made up of attorneys fees, consultants and accountant fees that must be paid to comply.

BACK UP INFORMATION

None of the utilities owners we spoke to objected to retaining the statutes dealing with safety and maintenance of their facilities. I certainly do not object to the retention of these statutes either.

The utility owners' intent is to sell their services based on normal business considerations and not on hikes predicated on an inflated rate caused by regulation.

I want the economic regulation issue to be controlled on the local level. Under SB 426, a petition signed by 25% of the subscribers will commence regulation. Only 63 subscribers, maximum, need object to the deregulated operation.

I do not believe we need this kind of protectionism when it is costing the people it is attempting to protect.

Nationally, other states have deregulated or substantially eased the regulatory burden of small utilties. Illinois, Iowa, Minnesota and Nebraska have done so. Presently the legislatures in Utah and Virginia are considering the issue.

With state revenues as they are, it makes sense to fashion ways in which we can cut down administrative costs and attempt to lower costs to the consumer related to those administrative costs.

Alaska State Legislature

Senate

Committee on Labor & Commerce

Pouch V
State Capitol
Juneau, Alaska 99811

Official Business

SSSB 426: Summary

This measure expands one of the economic deregulation sections of the APUC statutes, (42.05.711(e), to include electric or telephone utilities with less than 250 subscribers.

Additionally, the APUC would not be permitted to combine the revenue or subscribers of different utilities, owned by the same company, to circumvent this economic deregulation proposal.

The measure also retains the provision for utility subscribers to petition the APUC (vote of 25% of subscribers) for economic regulation.

POWER OF SUSPENSION.
TEXT (a) When the legislature is not in session, the Administrative Regulation Review Committee may by an affirmative vote of not less than two-thirds of the members of the committee suspend the effectiveness of the adoption of or amendment to a regulation adopted after adjournment of the previous regular session of the legislature, until 30 days after the legislature reconvenes.

(b) The effectiveness of an adoption or amendment of a regulation is suspended on the date a resolution of the Administrative Regulation Review Committee resolving that the regulation be suspended is filed with the lieutenant governor. If an adoption of or amendment to a regulation is not effective on the date a resolution is filed with the lieutenant governor, the effectiveness of the adoption or amendment which is the subject of the committee's resolution is suspended from the date the adoption or amendment would otherwise become effective under AS 44.62.180.

(c) Action under (a) of this section may not be undertaken unless all interested parties are afforded an opportunity to be heard at a hearing held upon 15 days' notice to those parties.

(d) The provisions of this section do not apply to emergency regulations.

POWERS.
TEXT The Administrative Regulation Review Committee has the following powers:

(1) to organize and adopt rules for the conduct of its business;

(2) to hold public hearings;

(3) to require all state officials and agencies of state government to give full cooperation to the committee or its staff in assembling and furnishing requested information;

(4) to examine all administrative regulations to determine if they properly implement legislative intent;

(5) to make recommendations for legislative annulment of administrative regulations under AS 44.62.320;

(6) to prepare and distribute reports, memoranda, or other materials;

(7) to promote needed revision or repeal of regulations that have been adopted by state departments and agencies and, when the committee determines a regulation should be repealed or amended, to introduce a bill that would enact a statute that would supersede or nullify the regulation;

(8) to investigate findings that are transmitted to the committee by a standing committee in accordance with AS 24.05.182 and, as appropriate, to either introduce a bill annulling the regulation or exercise the committee's power to suspend the effectiveness of the regulation in accordance with AS 24.20.445.

NOTICE OF PROPOSED ACTION.
TEXT (a) At least 30 days before the adoption, amendment, or repeal of a regulation, notice of the proposed action shall be

(1) published in the newspaper of general circulation, or trade or industry publication, that the state agency prescribes and in the Alaska Administrative Journal;

(2) mailed to every person who has filed a request for notice of proposed action with the state agency;

(3) if the agency is within a department, mailed or delivered to the commissioner of the department;

(4) when appropriate in the judgment of the agency,

(A) mailed to a person or group of persons whom the agency believes is interested in the proposed action, and (B) published in the additional form and manner the state agency prescribes;

(5) furnished the Department of Law together with a copy of the proposed regulation, amendment, or order of repeal for the department's use in preparing the opinion required after adoption and before filing by AS 44.62.060;

(6) furnished to all incumbent State of Alaska legislators and the Legislative Affairs Agency;

(7) furnished to the standing committee of each house of the legislature having legislative jurisdiction over the subject matter treated by the regulation under the Uniform Rules of the Alaska State Legislature, together with a copy of the proposed regulation, amendment, or order of repeal for the committee's use in conducting the review authorized by AS 24.05.182;

(8) furnished to the staff of the Administrative Regulation Review Committee.

(b) If the form or manner of notice is prescribed by statute, in addition to the requirements of filing and mailing notice under this chapter, the notice shall be published, posted, mailed, filed or otherwise publicized as prescribed by the statute.

(c) The failure to mail notice to a person as provided in this section does not invalidate an action taken by an agency under AS 44.62.180 - 44.62.290. DEFINITIONS.
TEXT (a) In AS 44.62.010 - 44.62.320, unless the context otherwise requires,

(1) "lieutenant governor" means the office of the lieutenant governor in the executive branch of the state government, or another agency designated by executive order under the constitution;

(2) "order of repeal" means a resolution, order or other official act of a state agency which expressly repeals a regulation in whole or in part;

(3) "regulation" means every rule, regulation, order, or standard of general application or the amendment, supplement or revision of a rule, regulation, order or standard adopted by a state agency to implement, interpret, or make specific the law enforced or administered by it, or to govern its procedure, except one which relates only to the internal management of a state agency; "regulation" does not include a form prescribed by a state agency or instructions relating to the use of the form, but this provision is not a limitation upon a requirement that a regulation be adopted under this chapter when one is needed to implement the law under which the form is issued; "regulation" includes "manuals," "policies," "instructions," "guides to enforcement," "interpretative bulletins," "interpretations," and the like, which have the effect of rules, orders, regulations or standards of general application, and this and similar phraseology shall not be used to avoid or circumvent this chapter; whether a regulation, regardless of name, is

covered by this chapter depends in part on whether it affects the public or is used by the agency in dealing with the public;

(4) "state agency" means a department, office, agency, or other organizational unit of the executive branch, except one expressly excluded by law, but does not include an agency in the judicial or legislative branches of the state government.

(b) In AS 44.62.330 - 44.62.630, unless the context otherwise requires,

(1) "agency" includes the state boards, commissions and officers listed in AS 44.62.330 and those to which this chapter is made applicable by law or executive order involving reorganization under the constitution;

(2) "agency member" means a person who is a member of an agency to which AS 44.62.330 - 44.62.630 apply, and includes a person who individually is an agency;

(3) "hearing officer" means a hearing officer qualified under AS 44.62.350;

(4) "party" includes the agency, the respondent, and a person, other than an officer or an employee of the agency in an official capacity, who has been allowed to appear in the proceeding;

(5) "respondent" means a person against whom an accusation is filed under AS 44.62.360 or against whom a statement of issues is filed under AS 44.62.370.

(c) In this chapter "teleconferencing" means information exchange by audio or video medium.

CONTINUATION of FISCAL NOTE ANALYSIS

For Bill/Resolution No. SB 429

This bill adds new sections to the Administrative Procedure Act that require that agencies adopting regulations, under the Act, consider the probable economic effect of the proposed action on small businesses and small municipalities. Although these changes may cause a fiscal impact for several departments, the Department of Law adopts few regulations of its own, and the bill will probably not have a direct fiscal impact on the department. The department does, however, review all regulations prior to their adoption, and it sometimes assists other departments in drafting their regulations. To the extent that we are requested to advise other agencies about the sufficiency of their efforts to conform to the economic analysis provisions in this bill, we can expect innumerable requests for advice. These requests will probably result in our regulations and legislative drafting staff becoming more swamped than they already are.

Because we cannot accurately predict the additional workload that will occur if this bill becomes law, we are not requesting fiscal note funds at this time. Such a request may become necessary in the future, and the potential for this additional cost should be noted while the bill is being considered.

CONTINUATION of FISCAL NOTE ANALYSIS

For Bill/Resolution No. SB 429

While the Department of Environmental Conservation certainly supports and encourages the concept of responsiveness of government to the public it serves, the ability to do so will (for this legislation, at least) require the hiring of a Research Analyst III and a half-time Clerk Typist III. We also envision the need for minimal contractual services when proposed regulatory changes involve complex matters affecting a diverse population.

We would point out that many of our regulations have federal mandates behind them, requiring federal approval before promulgation. If such regulations were excluded from the requirements of AS 44.63.020 and AS 44.63.030 (although AS 44.63.030(a)(1) and (2) represent theories of responsible rule-making which we support), we could reduce our fiscal note to a half-time Research Analyst III with minimal contractual services.

Position Title	Research Analyst III			No. of Positions	Range/Step	Barg. Unit	Gov.	Approv.	Disapp.
				1	18A	GGU

For B&M Use Only
Key Number __ __ - __ __ - __ __ - __ __ - __ __

Justification

Because of the complex nature of this agency's programs, and the wide variety of entities and individuals served and affected, this position's expertise would be required to provide the various analyses and reports and summaries required by the legislation.

This position would coordinate data from staff who write regulations, from affected entities, and from other appropriate sources, analyzing impace and making recommendations to staff; preparing required analyses, documents, and notices, with staff input and evaluation as to correlation between data, federal requirements, and the like.

For more complex matters, this position would work closely with an economics-type contractor to achieve the provisions of the law.

Costs associated with this position include average per-employee costs for contractual and commodities. Equipment expense for a desk, chair, etc. are a one-time expenditure.

CONTINUATION of FISCAL NOTE ANALYSIS

For Bill/Resolution No. SB 429

In order for the department to comply with the provisions of SB 429, the addition of two staff members would be necessary. A Regulations Specialist II and a Clerk Typist III, both located in Juneau, would be necessary for the additional research, analyses and documentation required by the bill. (See attached New Position Justification Forms for detail).

More specifically, the Regulation Specialist would be responsible for developing the Department's agenda of proposed regulations twice yearly, and for the review of departmental regulations before July 1, 1991. Also, this position would be responsible for coordinating with consulting firms to prepare the initial "flexibility analysis" on all proposed regulations. Expertise does not currently exist in the department to complete this type of analysis. We estimate $30,000 in contracts would be required each year. The Regulations Specialist would be able to prepare the final analysis.

Also required is additional published information when notices of regulations are placed in newspapers. We estimate an addition of $6,000 in advertising expenses each year to meet these requirements.

Assumptions:

1. The department would have 10 regulation proceedings a year that would fall under the requirements of this bill.

2. Effective date of July 1, 1986.

3. Annual inflation of 4% on non-personal service items.

Justification

This position would be responsible for coordinating the department's activity in meeting the requirements of this bill. The person would review all proposed regulations to determine if they are justified and develop 1) the agenda of proposed regulations twice yearly and 2) a plan for periodic review of the Department's regulation as required under this bill. The position would contract with consulting firms for the completion of the initial "flexibility analysis". This position would complete the final "flexibility analysis".

Costs associated with this position would include average per-employee costs for contractual and commodities. The equipment expense for a desk, chair, etc. would be a one-time cost.

Justification

This position would handle the clerical duties associated with this bill. The position would keep records of all proposed actions on all regulations in the department and assure the additional documentation requirements of this bill are met. This person would make sure all correspondence was properly handled and type the justifications, file logs and other required documents.

Costs associated with this position are average per employee costs. The equipment expense for a desk, chair, cabinets, etc. would be a one-time cost.

To comply with this act and enact the regulations needed, the commission would require a full-time regulations specialist for the first two years and then at least a half-time regulations specialist for the years after that. The act would add enormously to the paperwork burden in producing regulations.

ANALYSIS: Attach a separate page if necessary.

The bill adds four new requirements to the process of adopting regulations to ensure special consideration that notices and public hearings are given to small entities.

Although Section 44.63.200(a) of the bill provides each agency with the flexibility to amend the definition of "small business" or "small organization" as appropriate (see attached)

Prepared by: Jennifer Strickler, Management Analyst Phone: 465-2144
Division: Occupational Licensing Date: 3-19-86

to the activities of the agency, Occupational Licensing has no method to differentiate small versus large businesses currently licensed.

Contractual expenditures will result from printing, postage and hearing costs of providing direct notification to all licensees within each professional occupation which has the potential of including "small entities".

*Costs have been repeated in subsequent years since, without actually experiencing the impact of this bill, it is extremely difficult to predict future charges for the variables involved.

It is expected that this legislation will delay the length of processing time currently required for each individual regulation project from approximately six months to nine months.

In addition, to comply with provisions to be included in each notice, much of the attention of the Regulations Specialist would be devoted to satisfying these new requirements.

The Division assists in the regulatory process of 23 licensing areas including regulations promulgated under the Centralized Licensing Act. During each year, approximately 20 regulation topics are handled within each licensing occupation.

Therefore, having to prepare an initial flexibility analysis, final flexibility analysis and conduct periodic review of regulations, in addition to the initial review of all existing regulations before 1991, may require a new Regulations Specialist position in the future to keep up with the increased workload.

Contractual costs were based on:

1.	Printing costs at .36¢ per document multiplied by the number of affected licensees within each occupation;	$ 8.7
2.	Postage costs of .22¢ multiplied by the number of affected licensees;	5.3
3.	Public Notice costs printed in three newspapers of general circulation, which is standard practice within this agency;	2.1
4.	Public Hearing costs using the teleconference network based on the standard two hour hearing at $50 per site, per hour, and assuming that the sites of Anchorage, Fairbanks and Juneau are on the network;	4.8*
		$20.9

*Note: Hearing costs for 4 licensing areas were based on a one hour teleconference because of the small number of licensees affected.

The above calculation is a summary of more detailed calculations on file with this agency.

To satisfy the requirement that all existing regulations (12 loan programs) be reviewed and analyzed, a one-month professional services contract at $5,000 will be let in FY 87. Advertising, printing, and mailing costs are estimated at $2,000 for the initial review in FY 87 and $500 for new regulations and changes in succeeding years.

ANALYSIS: Attach a separate page if necessary.

The bill requires the acquisition and use of data concerning cost impact of regulation o components of the overall group regulated by the division. We do not have in-house expe tise in this area, so it will be necessary to contract for these needs. The amount show is an estimate. Based on the size of the group regulated, we feel it is conservative.

ANALYSIS: Attach a separate page if necessary.

Public utilities are, in essence, given an exclusive franchise by the commission to operate in their defined service areas, which would constitute them as dominant entities in their field. Thus, it is arguable whether the provisions of the legislation would be applicable to the regulations of the commission.

CONTINUATION of FISCAL NOTE ANALYSIS

For Bill/Resolution No. SB 429

Moreover, the commission notes that it has geared its regulations in several respects to consider the size of the utilities covered by them. For example, uniform systems of accounts, rate design, cost of service, and load research requirements are based on the utility size. Moreover, in practice, the commission's staff is directed to provide small utilities with assistance to the greatest extent possible. The commission is always sympathetic to waivers of specific statutory or regulatory requirements where the intended public benefits are clearly outweighed by the burdens imposed on small utilities.

The projected expenses reflected in this fiscal note are the estimated costs of public notices and newspaper advertising associated with regulations review. If it is determined that this bill is applicable to public utilities, these direct costs would be incurred. Also necessary would be the annual commitment of approximately five person-months of effort on the part of commissioners and staff in performing the review and analysis required. Although this allocation would not require an addition of new positions, it would be made at the expense of other regulatory responsibilities. Clearly, other statutory time frames would be negatively impacted at the very time when the Legislature is considering proposals to shorten the processing time for most commission proceedings.

CONTINUATION of FISCAL NOTE ANALYSIS

For Bill/Resolution No. SB 429

The division has regulations in effect relating to the administration of the 13 loan programs in this department.

This fiscal note assumes the minimum additional workload to comply with Periodic Review of Regulations (AS 44.63.070) and promulgation of new or amended regulations (AS 44.63.010-.060). This is foreseen as an effort which can be accommodated by a professional service contract. This approach is believed to be the most efficient, least-cost approach.

CONTRACTUAL SERVICES

FY 87

Professional Service Contract:	3 months @ $5.0	$15.0
Printing and Postage		1.0
		$16.0

The contractor will be required to prepare and implement the overall plan to review the division's current regulations within the time frame specified in the proposed legislation. The contractor will coordinate publishing in the Alaska Administrative Journal, receive public comment, analyze the criteria set out under proposed AS 44.63.070(b)(1-5), and prepare a recommendation supporting continuation, amendment or repeal of the regulations.

FY 88 - FY 91

Professional Service Contract:	1 month @ $5.0	$ 5.0
Printing and Postage		.5
		$ 5.5

The contractor will perform the flexibility analysis as required for promulgating new or amended regulations.

SENATE BILL NO. 429

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to regulations that affect small businesses, small organizations, and small governmental jurisdictions; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. FINDINGS AND PURPOSE. (a) The legislature finds that

(1) when adopting regulations to protect the health, safety, environment, and economic welfare of the state, agencies should seek to achieve statutory goals as effectively and efficiently as possible without imposing unnecessary burdens on the public;

(2) laws and regulations designed for application to large scale entities have been applied uniformly to small businesses, small organizations, and small governmental jurisdictions even though the problems that gave rise to government action may not have been caused by those smaller entities;

(3) uniform regulatory and reporting requirements have in numerous instances imposed unnecessary and disproportionately burdensome demands including legal, accounting and consulting costs upon small businesses, small organizations, and small governmental jurisdictions with limited resources;

(4) the failure to recognize differences in the scale and resources of regulated entities has in numerous instances adversely affected competition in the marketplace, discouraged innovation and restricted improvements in productivity;

(5) unnecessary regulations create entry barriers in many industries and discourage potential entrepreneurs from introducing beneficial products and processes;

(6) the practice of treating all regulated businesses, organizations, and governmental jurisdictions as equivalent may lead to inefficient use of agency resources, enforcement problems, and, in some cases, to actions inconsistent with the legislative intent of health, safety, environmental, and economic welfare legislation;

(7) alternative regulatory approaches that do not conflict with the stated objectives of applicable statutes may be available to minimize the significant economic impact of regulations on small businesses, small organizations, and small governmental jurisdictions;

(8) the process by which regulations are developed and adopted should be reformed to require agencies to solicit the ideas and comments of small businesses, small organizations, and small governmental jurisdictions to examine the impact of proposed and existing regulations on the entities, and to review the continued need for existing regulations.

* Sec. 2. AS 44 is amended by adding a new chapter to read:

CHAPTER 63. REGULATIONS AFFECTING SMALL ENTITIES.

Sec. 44.63.010. REGULATORY AGENDA. (a) During the months of January and July of each year, each agency shall publish in the journal a regulatory flexibility agenda

(1) describing briefly the subject area of any regulation that the agency expects to propose or adopt that is likely to have a significant economic impact on a substantial number of small entities;

(2) summarizing the nature of any proposed regulation under each subject area listed under (1) of this subsection, the objectives and legal basis for the proposed regulation, and an approximate schedule for completing action on each regulation for which the agency

has issued a notice of proposed regulation-making; and

(3) containing the name and telephone number of an agency official knowledgeable concerning the items listed in (1) of this subsection.

(b) Each regulatory flexibility agenda shall be transmitted to the office of enterprise, for comment.

(c) Each agency shall endeavor to give notice of the agenda to small entities or their representatives by direct notification or publication of the agenda in publications likely to be obtained by the small entities and shall invite comments upon each subject area on the agenda.

(d) An agency may consider or act on a matter not included in a regulatory flexibility agenda and may decline to consider or act on a matter listed in the agenda.

Sec. 44.63.020. INITIAL FLEXIBILITY ANALYSIS. (a) When an agency is required by AS 44.62.190 or any other law to publish notice of proposed action for a proposed regulation, the agency shall prepare and make available for public comment an initial flexibility analysis. The analysis shall describe the effect of the proposed regulation on small entities. The initial flexibility analysis or a summary shall be published in the journal when the notice of proposed action is published. The agency shall send a copy of the initial flexibility analysis to the office of enterprise.

(b) Each initial flexibility analysis shall

(1) describe the reasons why action by the agency is being considered;

(2) contain a succinct statement of the objectives of, and legal basis for, the proposed regulation;

(3) describe and, if feasible, estimate the number of small

entities to which the proposed regulation will apply;

(4) describe the reporting, record-keeping and other compliance requirements of the proposed regulation, including an estimate of the classes of small entities that will be subject to the requirement and the type of professional skills necessary for preparing the report or record;

(5) identify, to the extent practicable, relevant regulations that may duplicate, overlap, or conflict with the proposed regulation.

(c) An initial flexibility analysis shall also describe any significant alternatives to the proposed regulation that accomplish the stated objectives of applicable statutes and that minimize the significant economic impact on small entities. The analysis shall discuss significant alternatives including

(1) the establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities;

(2) the clarification, consolidation, or simplification of compliance and reporting requirements under the regulation for the small entities;

(3) the use of performance rather than design standards; and

(4) an exemption from coverage of the regulation, or any part, for the small entities.

(d) An agency head may waive or delay the completion of some or all of the requirements of this section by publishing in the journal, not later than the date of publication of the final regulation, a written finding, with reasons, that the final regulation is being adopted in response to an emergency that makes compliance or timely

compliance with this section unpracticable.

Sec. 44.63.030. FINAL FLEXIBILITY ANALYSIS. (a) When an agency adopts a final regulation after being required by AS 44.62.190 or any other law to publish a notice of proposed action, the agency shall prepare a final flexibility analysis. Each final flexibility analysis shall

(1) state succinctly the need for, and the objectives of, the regulation;

(2) summarize the issues raised by the public comments in response to the initial flexibility analysis and the agency's assessment of the issues, and contain a statement of changes made in the proposed regulation as a result of the comments; and

(3) describe each significant alternative to the regulation that was consistent with the stated objectives of applicable statutes and was designed to minimize significant economic impact of the regulation on small entities that the agency considered, and state the reasons that the agency rejected the alternative.

(b) The agency shall make copies of the final flexibility analysis available to members of the public and shall publish in the journal at the time of publication of the final regulation under AS 44.62.180 a statement describing how the public may obtain copies.

(c) Except as provided in AS 44.63.040(b), an agency head may not waive the requirements of this section. An agency head may delay the completion of the requirements of this section for not more than 180 days after the date of publication in the journal of a final regulation by publishing in the journal, not later than the date of publication of the final regulation, a written finding, with reasons, that the final regulation is being adopted in response to an emergency that makes timely compliance with this section impracticable. If the

agency does not prepare a final regulatory analysis under this section within 180 days from the date of publication of the final regulation, the regulation lapses and has no effect. The agency may not adopt the substance of the regulation in a second emergency regulation until it has completed a final flexibility analysis.

Sec. 44.63.040. AVOIDANCE OF DUPLICATIVE OR UNNECESSARY ANALYSES. (a) An agency may perform the analyses required by AS 44.63.010 - 44.63.030 in conjunction with or as a part of another agenda or analysis required by law if the other analysis satisfies these sections.

(b) If the head of the agency certifies that a regulation will not have a significant economic impact on a substantial number of small entities, the agency is not required to comply with AS 44.63.020 and 44.63.030. The agency shall publish the certification and a succinct statement explaining the reasons for the certification in the journal when the notice of proposed action for the regulation is published or when the final regulation is published. The agency shall provide the certification and statement to the office of enterprise.

(c) An agency may consider a series of closely related regulations as one regulation for the purposes of AS 44.63.010 - 44.63.030 and 44.63.070.

Sec. 44.63.050. PREPARATION OF ANALYSIS. In complying with AS 44.63.020 and 44.63.030, an agency may provide either a quantifiable or numerical description of the effects of a proposed regulation or alternatives to the proposed regulation, or more general descriptive statements if quantification is not practicable or reliable.

Sec. 44.63.060. PROCEDURES FOR GATHERING COMMENTS. When a regulation is adopted that will have a significant economic impact on a substantial number of small entities, the head of the agency

adopting the regulations or the official of the agency responsible for adoption of the regulation shall assure that small entities have been given an opportunity to participate in the process through techniques including

(1) inclusion in an advanced notice of proposed adoption of regulation, if issued, of a statement that the proposed regulation may have a significant economic effect on a substantial number of small entities;

(2) publication of general notice of the proposed regulation in publications likely to be obtained by small entities;

(3) direct notification of interested small entities;

(4) open conferences or public hearings concerning the regulation for small entities; and

(5) adoption or modification of agency procedural regulations to reduce the cost or complexity of participation in the process by small entities.

Sec. 44.63.070. PERIODIC REVIEW OF REGULATIONS. (a) Before January 1, 1987, each agency shall publish in the journal a plan for the periodic review of the regulations issued by the agency that have or will have a significant economic impact upon a substantial number of small entities. The agency may amend the plan by publishing the revision in the journal. The purpose of the review is to determine whether the regulations should be continued without change, or should be amended or rescinded to minimize significant economic impact on a substantial number of the small entities. The plan must provide for the review by July 1, 1991, of all the agency regulations existing on July 1, 1986, and for the review of a regulation adopted after July 1, 1986, within five years of the effective date of the regulation. If the head of the agency determines that completion of the review of

existing regulations is not feasible by the established date, the agency head shall certify that fact in a statement published in the journal and may extend the completion date by one year at a time for a total of not more that five years.

(b) In reviewing regulations under (a) of this section, the agency shall consider the

(1) continued need for the regulation;

(2) nature of complaints or comments received concerning the regulation from the public;

(3) complexity of the regulation;

(4) extent to which the regulation overlaps, duplicates or conflicts with other state regulations, and, to the extent feasible, with federal and local governmental regulations; and

(5) length of time since the regulation has been evaluated or the degree to which technology, economic conditions, or other factors have changed in the area affected by the regulation.

(c) Each agency shall annually publish in the journal a list of the regulations to be reviewed under this section during the succeeding 12 months. The list shall include a brief description of each regulation and the need for and legal basis of the regulation and shall invite public comment on the regulation.

Sec. 44.63.080. JUDICIAL REVIEW. (a) Except as provided in (b) of this section,

(1) a determination by an agency concerning the applicability of this chapter to an action of the agency is not subject to judicial review;

(2) a flexibility analysis prepared under AS 44.63.020 or 44.63.030 and agency compliance or noncompliance with this chapter is not subject to judicial review.

(b) When an action for judicial review of a regulation is instituted, the flexibility analysis for the regulation shall constitute part of the whole record of agency action in connection with the review.

Sec. 44.63.090. REPORTS AND INTERVENTION RIGHTS. (a) The office of enterprise shall monitor agency compliance with this chapter and shall report at least annually to the governor and the legislature.

(b) The office may appear as amicus curiae in an action brought in a court to review a regulation and may present views on the effect of the regulation on small entities.

(c) A court shall grant the application of the office to appear in an action under (b) of this section.

Sec. 44.63.200. AGENCY AMENDMENT OF DEFINITIONS. (a) An agency may amend, by regulation, the definition of "small business" or "small organization" if the amended definition is appropriate to the activities of the agency. An agency shall consult with the office of enterprise before amending "small business." An amendment to "small business" may establish a maximum number of employees or dollar volume of business for an enterprise in an industry.

(b) An agency may amend, by regulation, the definition of "small governmental jurisdiction" if the amendment is appropriate to the activity of the agency and is based on factors including location in rural or sparsely populated areas or an area with limited revenue due to the population of the jurisdiction.

(c) An agency that is not subject to AS 44.62.010 - 44.62.290 of the Administrative Procedure Act and that intends to amend a definition under (a) or (b) of this section shall provide an opportunity for public comment before adopting the amendment and shall publish the

amended definition in the journal.

Sec. 44.63.210. DEFINITIONS. In this chapter

(1) "agency" means an agency in the executive branch of state government;

(2) "journal" means the Alaska Administrative Journal under AS 44.62.175;

(3) "office of enterprise" means the office of enterprise in the Department of Commerce and Economic Development;

(4) "regulation" means a regulation adopted under AS 44.62 or any other law, except a regulation of particular applicability relating to rates, wages, corporate or financial structures or reorganizations, prices, facilities, appliances, services or allowances or to valuations, costs, or accounting, or practices relating to the rates, wages, structures, prices, appliances, services, or allowances;

(5) "small business" means a small business that is independently owned and operated and is not dominant in its field; "ONLY"

(6) "small entity" means a "small business," small organization, or small governmental jurisdiction;

(7) "small governmental jurisdiction" means a municipality, school district, or special district, with a population of less than 50,000;

(8) "small organization" means a not-for-profit enterprise that is independently owned and operated and is not dominant in its field.

* Sec. 2. Notwithstanding AS 44.63.010(a), as enacted by sec. 1 of this Act, the first publication of regulatory agendas must occur by January 31, 1987.

* Sec. 3. AS 44.63.020 and 44.63.030 as enacted by sec. 2 of this Act do not apply to regulations for which a notice of proposed action is issued

before July 1, 1986.

* Sec. 4. This Act takes effect July 1, 1986.

IN THE SENATE

BY THE LABOR AND COMMERCE COMMITTEE

CS FOR SENATE BILL NO. 429 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to regulations that affect small businesses and small municipalities; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 24.20.460 is amended to read:

Sec. 24.20.460. POWERS. The Administrative Regulation Review Committee has the following powers:

(1) to organize and adopt rules for the conduct of its business;

(2) to hold public hearings;

(3) to require all state officials and agencies of state government to give full cooperation to the committee or its staff in assembling and furnishing requested information;

(4) to examine all administrative regulations to determine if they properly implement legislative intent;

(5) to make recommendations for legislative annulment of administrative regulations under AS 44.62.320;

(6) to prepare and distribute reports, memoranda, or other materials;

(7) to promote needed revision or repeal of regulations that have been adopted by state departments and agencies and, when the committee determines a regulation should be repealed or amended, to introduce a bill that would enact a statute that would supersede or nullify the regulation;

(8) to investigate findings that are transmitted to the committee by a standing committee in accordance with AS 24.05.182 and, as appropriate, to either introduce a bill annulling the regulation or exercise the committee's power to suspend the effectiveness of the regulation in accordance with AS 24.20.445;

(9) to monitor agency compliance with the requirements of AS 44.62.197, and make recommendations to an agency regarding the adequacy of its analyses and of its responses to public testimony.

* Sec. 2. AS 44.62 is amended by adding a new section to article 3 to read:

Sec. 44.62.177. REGULATORY AGENDA. (a) During the months of January and July of each year, each agency shall publish in the Administrative Law Journal a regulatory flexibility agenda that

(1) describes briefly the subject area of any regulation that the agency expects to propose or adopt that is likely to have a significant economic impact on a substantial number of small entities;

(2) summarizes the nature of any proposed regulation under each subject area listed under (1) of this subsection, the objectives and legal basis for the proposed regulation, and an approximate schedule for completing action on each regulation for which the agency has issued a notice of proposed regulation-making; and

(3) contains the name and telephone number of an agency official knowledgeable concerning the items listed in (1) of this subsection.

(b) An agency may consider or act on a matter not included in a regulatory flexibility agenda and may decline to consider or act on a matter listed in the agenda.

(c) In this section, "small entity" has the meaning given in AS 44.62.197.

* Sec. 3. AS 44.62 is amended by adding a new section to read:

Sec. 44.62.197. ECONOMIC ANALYSIS; SMALL ENTITIES. (a) Before publishing notice under AS 44.62.190, an agency planning to adopt, amend, or repeal a regulation shall analyze the probable economic effect of the proposed action on small businesses and small municipalities. The analysis must

(1) consider the types and numbers of small entities that will probably be affected by the proposed action, including the types that will bear the costs of the proposed action and those that will benefit from it;

(2) consider the probable economic effect of the proposed action, both as to kind and amount, upon the affected entities;

(3) review the reasons for the proposed action, in light of the probable economic effect on small entities;

(4) identify whether there are less costly or less intrusive means of achieving the purpose of the proposed action;

(5) identify, to the extent practicable, relevant regulations that may duplicate, overlap, or conflict with the proposed regulations.

(b) After the close of public proceedings under AS 44.62.210, the agency shall prepare, as a final analysis for a regulation-adoption project, a brief summary from the analysis required by (a) of this section and the agency's comment on public testimony, whether that testimony was written or oral. The agency's comment on the testimony must identify changes made in response to the testimony and must include a brief statement of the reason for rejecting a proposal, if any, that was not adopted by the agency. The agency's statement under this subsection may summarize the reasons and the testimony in aggregate form so as to avoid duplication and unnecessary detail.

(c) If the head of the agency certifies in writing that a regulation will not have a significant economic effect on a substantial number of small entities, the agency shall make a succinct statement as to why it is not required to comply with this section. The certification must be submitted to the lieutenant governor for filing with the regulation.

(d) An agency may consider a series of closely related regulations as one regulation for the purposes of this section.

(e) Analyses under this section are not subject to judicial review. Action taken may not be invalidated on the ground that the contents of an analysis are insufficient or inaccurate.

(f) In this section

(1) "small business" means a business corporation or a nonprofit corporation, a partnership, or a sole proprietorship, that is licensed in the state and transacts business in the state, and

(A) employs 50 or fewer employees in the state, excluding seasonal employees; or

(B) has annual gross sales, or value of services provided, of $1,000,000 or less;

(2) "small entity" means a small business or small municipality;

(3) "small municipality" means a municipality with a population of 10,000 or fewer persons.

* Sec. 4. AS 44.62.200(a) is amended to read:

(a) The notice of proposed adoption, amendment, or repeal of a regulation shall include

(1) a statement of the time, place, and nature of proceedings for adoption, amendment, or repeal of the regulation;

(2) reference to the authority under which the regulation

is proposed and a reference to the particular code section or other provisions of law which are being implemented, interpreted, or made specific;

(3) an informative summary of the proposed subject of agency action;

(4) other matters prescribed by a statute applicable to the specific agency or to the specific regulation or class of regulations;

(5) a summary of the fiscal information required to be prepared under AS 44.62.195;

(6) a summary of the analysis required by AS 44.62.195(a) and the address from which a complete copy of the analysis may be obtained.

* Sec. 5. REVIEW OF EXISTING REGULATIONS. (a) Before January 1, 1991, each agency shall review the regulations adopted by that agency and in effect as of July 1, 1986, that have or will have a significant economic effect upon a substantial number of small entities. The purpose of the review is to determine whether the regulations should be continued without change, or should be amended or repealed to minimize a significant economic effect on a substantial number of the small entities. If the head of the agency determines that completion of the review of existing regulations is not feasible by January 1, 1991, the agency head shall certify that fact in writing and may extend the completion date by one year.

(b) In reviewing regulations under (a) of this section, the agency shall consider the

(1) continued need for the regulation;

(2) nature of complaints or comments received concerning the regulation from the public;

(3) complexity of the regulation;

(4) extent to which the regulation overlaps, duplicates, or conflicts with other state regulations, and, to the extent feasible, with federal and local governmental regulations; and

(5) length of time since the regulation has been evaluated or the degree to which technology, economic conditions, or other factors have changed in the area affected by the regulation.

(c) In this section

(1) "agency" has the meaning given "state agency" in AS 44.62.-640(a);

(2) "small entity" has the meaning given in AS 44.62.197.

* Sec. 6. AS 44.62.197, enacted by sec. 3 of this Act, does not apply to regulations for which a notice of proposed action is issued before July 1, 1986.

* Sec. 7. This Act takes effect July 1, 1986.

(b) An agency may consider or act on a matter not included in a regulatory flexibility agenda. An agency may decline to consider or act on a matter listed in the agenda. The agency shall state why it is declining to act on the matter. An agency may not refuse to consider or adopt a regulation solely because the proposed regulation

was not included in the agency's regulatory agenda.

(c) In this section, "small entity" has the meaning given in AS 44.62.197.

* Sec. 3. AS 44.62 is amended by adding a new section to read:

Sec. 44.62.197. ECONOMIC ANALYSIS; SMALL ENTITIES. (a) Before publishing notice under AS 44.62.190, an agency planning to adopt, amend, or repeal a regulation shall analyze the probable economic effect of the proposed action on small businesses and small municipalities. The analysis must

(1) consider the types and numbers of small entities that will probably be affected by the proposed action, including the types that will bear the costs of the proposed action and those that will benefit from it;

(2) consider the probable economic effect of the proposed action, both as to kind and amount, upon the affected entities;

(3) review the reasons for the proposed action, in light of the probable economic effect on small entities;

(4) identify whether there are less costly or less intrusive means of achieving the purpose of the proposed action;

(5) identify, to the extent practicable, relevant regulations that may duplicate, overlap, or conflict with the proposed regulations.

(b) After the close of public proceedings under AS 44.62.210, the agency shall prepare, as a final analysis for a regulation-adoption project, a brief summary from the analysis required by (a) of this section and the agency's comment on public testimony, whether that testimony was written or oral. The agency's comment on the testimony must identify changes made in response to the testimony and must include a brief statement of the reason for rejecting a proposal,

if any, that was not adopted by the agency. The agency's statement under this subsection may summarize the reasons and the testimony in aggregate form so as to avoid duplication and unnecessary detail.

(c) If the head of the agency certifies in writing that a regulation will not have a significant economic effect on a substantial number of small entities, the agency shall make a succinct statement explaining the reasons for the certification and why it is not required to comply with this section. The certification must be submitted to the lieutenant governor for filing with the regulation.

(d) An agency may consider a series of closely related regulations as one regulation for the purposes of this section.

(e) Analyses under this section are not subject to judicial review. Action taken may not be invalidated on the ground that the contents of an analysis are insufficient or inaccurate.

(f) In this section

(1) "small business" means a business corporation or a nonprofit corporation, a partnership, or a sole proprietorship, that is licensed in the state and transacts business in the state, and

(A) employs 50 or fewer employees in the state, excluding seasonal employees; or

(B) has annual gross sales, or value of services provided, of $1,000,000 or less;

(2) "small entity" means a small business or small municipality;

(3) "small municipality" means a municipality with a population of 10,000 or fewer persons.

* Sec. 4. AS 44.62.200(a) is amended to read:

(a) The notice of proposed adoption, amendment, or repeal of a regulation shall include

(1) a statement of the time, place, and nature of proceedings for adoption, amendment, or repeal of the regulation;

(2) reference to the authority under which the regulation is proposed and a reference to the particular code section or other provisions of law which are being implemented, interpreted, or made specific;

(3) an informative summary of the proposed subject of agency action;

(4) other matters prescribed by a statute applicable to the specific agency or to the specific regulation or class of regulations;

(5) a summary of the fiscal information required to be prepared under AS 44.62.195;

(6) a summary of the analysis required by AS 44.62.197(a) and the address from which a complete copy of the analysis may be obtained.

* Sec. 5. REVIEW OF EXISTING REGULATIONS. (a) Before January 1, 1991, each agency shall review the regulations adopted by that agency and in effect as of July 1, 1986, that have or will have a significant economic effect upon a substantial number of small entities. The purpose of the review is to determine whether the regulations should be continued without change, or should be amended or repealed to minimize a significant economic effect on a substantial number of the small entities. If the head of the agency determines that completion of the review of existing regulations is not feasible by January 1, 1991, the agency head shall certify that fact in writing and may extend the completion date by one year.

(b) In reviewing regulations under (a) of this section, the agency shall consider the

(1) continued need for the regulation;

(2) nature of complaints or comments received concerning the regulation from the public;

(3) complexity of the regulation;

(4) extent to which the regulation overlaps, duplicates, or conflicts with other state regulations, and, to the extent feasible, with federal and local governmental regulations; and

(5) length of time since the regulation has been evaluated or the degree to which technology, economic conditions, or other factors have changed in the area affected by the regulation.

(c) In this section

(1) "agency" has the meaning given "state agency" in AS 44.62.-640(a);

(2) "small entity" has the meaning given in AS 44.62.197.

* Sec. 6. AS 44.62.197, enacted by sec. 3 of this Act, does not apply to regulations for which a notice of proposed action is issued before July 1, 1986.

* Sec. 7. This Act takes effect July 1, 1986.

PHONE: (907) 465-3600

April 7, 1986

Honorable Fred Zharoff, Chairman
Senate Labor & Commerce Committee
Alaska State Legislature
P. O. Box V
Juneau, Alaska 99811

Re: SB 429 (regulations affecting small businesses, etc.)
Our file: 66-3-86-0414

Dear Senator Zharoff:

You will find attached copies of fiscal notes by the following departments:

Department of Administration,
Department of Commerce & Economic Development,
Department of Community & Regional Affairs,
Department of Corrections,
Department of Education,
Department of Environmental Conservation,
Department of Health & Social Services,
Department of Labor,
Department of Law,
Department of Military & Veterans' Affairs,
Department of Public Safety, and
Department of Transportation & Public Facilities.

These fiscal notes are based on the original SB 429. I did not receive the draft committee substitute until Friday, April 4, and I believe that the various state agencies directly affected by this bill have not yet seen that draft. I am forwarding these fiscal notes to you so that your committee will have everything available as it considers the bill. The draft should substantially reduce the costs.

On March 24, following your committee's last hearing on this bill, Senator Fahrenkamp, the bill's sponsor, and I met with her staff, your staff, and David Dougherty (from the federal Small Business Administration) to discuss the bill. On the following day, I prepared for Senator Fahrenkamp a draft revision. It was understood that, although I was trying to help the senator address some of the problems identified as being in the original version of the bill, my efforts did not mean that the

Administration or the Department of Law endorsed either the original version or the draft substitute. It was also understood that the senator would send a copy to Mr. Dougherty for his comments.

I believe that your committee has been furnished copies of my March 25 letter to Senator Fahrenkamp and of the draft substitute. So I will not repeat the content of that letter here.

It appears that the April 4 draft CS prepared in the Legislative Affairs Agency is very similar to my draft, with, however, some significant changes.

The gist of the attached fiscal notes is that the bill is unnecessary, too burdensome, costly, and without sufficient (if any) benefit to the public. The draft substitute bill, which the various agencies have not yet seen and have not commented upon, will substantially reduce those costs and burdens, but it is not clear that it will produce anything of great value to the public. This time of severe fiscal constraints and reduced staffs is not the best one for imposing new functions and duties on a broad range of state agencies.

Here are some general and specific comments:

1. While commending Senator Fahrenkamp's long-standing interest in regulatory reform, I have not been able to identify a particular problem for which this bill is the solution. I have read the senator's written statement which she presented to your committee on March 24, 1986, and I have no quarrel with her objective of making state agencies more "sensitive to new regulatory burdens." However, most agencies are indeed aware of that now, and the duties imposed by the bill seem unnecessary to achieve any greater sensitivity.

2. A bill such as this appears to be inspired by a particular problem pertaining to a particular function of the state government, implemented, in part, by administrative regulations. But the bill speaks in broad terms, thus affecting all agencies and all functions.

3. If there is a particular function of the state government, being performed by some identified state agency, a simple amendment to the statutes specifically affecting that function would be a better way to achieve the senator's objective.

4. Some agencies, such as the Department of Environmental Conservation and the Department of Health and Social Services, administer programs closely associated with federal agencies and subject to federal requirements. For many of these, it is simply not feasible to undertake some special "flexibility analysis" for small businesses when preparing and adopting regulations.

5. Some agencies, such as the Department of Corrections and the Department of Military and Veterans' Affairs, do not adopt regulations affecting small businesses and a broadly sweeping statute such as in this bill and the draft committee substitute) is simply unnecessary.

6. Section 1 of the draft committee substitute merely adds to the duties of the legislature's Administrative Regulation Review Committee. In doing so, it relies on the new requirement in the proposed AS 44.62.197 (economic analysis for small entities). While we do not support the new statutory requirement in the proposed AS 44.62.197, we do not object to the committee performing an oversight function. The current standard for regulation validity is "reasonable necessity." AS 44.62.030. The language of the amendment proposed in sec. 1 could be made to refer simply to the existing standard.

7. Section 2 of the draft committee substitute will require each agency to prepare a "regulatory agenda" twice a year. The need for this is certainly questionable, especially since an agency is not bound by it (see the proposed AS 44.62.177(b)). Under the current AS 44.62.190, an agency is required to give a broad distribution to the notice of proposed regulation adoption, at least 30 days before the adoption. It is not clear that, in addition to the currently required saturation notice, this regulatory agenda would provide anything more than a time-consuming irritant to each regulation-adopting agency.

8. Section 2 also relies on the terms "significant economic impact," "substantial number," and "small entities." Although the last of these three terms is defined, the first two are not. This leaves a great deal of vagueness which would make accurate compliance with the requirement very difficult.

9. Section 3 of the draft committee substitute is, of course, the heart of the bill. Although this version would be much more administratively feasible than the version in

the original bill, it still imposes requirements that select one kind of member of the public -- "small entities" -- for special treatment. It thus imposes a burden on all agencies that will produce little benefit, if any, to the general public.

10. The definitions of "small business" and "small municipality," in the proposed subsec. (f) (page 4 of the draft CS), raise some questions. Although the approach taken is that offered in the draft that I did for Senator Fahrenkamp on March 25, the numbers of employees and the amount of annual gross sales, in the definition of "small business," and the size of the population of "small municipalities," have been made much larger. Although I am not qualified to state firmly just what those numbers should be, it appears that the draft CS uses numbers that are far too large for the Alaska context.

Thank you for this opportunity to comment, and I would be happy to continue working with Senator Fahrenkamp and her and your staff on this matter.

Yours truly,

HAROLD M. BROWN

14/1D1/0326-02/2

CONTINUATION OF FISCAL NOTE ANALYSIS
FOR SENATE BILL 429

ANALYSIS:

A. Assumptions

1. Enactment of Senate Bill No. 429 would add a new chapter to AS 44. This new chapter pertains to small entities and the possible impact upon them by regulation changes. This bill increases the number of tasks required for notification of possible changes as well as requires a periodic review of all regulations. The estimates which follow are based on the existence of fourteen chapters of regulations of the Department of Administration in the Alaska Administrative Code and the assumption of at least two proposed changes per year per chapter.

B. Listing Of Activities

1. Section	Task Description	Per Proposed Regulation Change
44.63.010	Prepare and publish regulatory flexibility agenda (based upon required six tasks)	6 hours
44.63.020	Prepare initial flexibility analysis (based upon required six tasks)	6 hours
44.63.030	Prepare final flexibility analysis (based upon required three tasks)	5 hours
	TOTAL	17 hours

2. Section	Task Description	Required On Annual Basis
44.63070	Periodic review plan (based upon required five considerations)	10 hours
44.63.070(c)	Prepare and publish current years' review schedule	4 hours
	TOTAL	14 hours

3. Inflation is estimated at 3 percent per year.

B. Staff Requirement

1. Each proposed regulation change is estimated to require 17 hours per year. If two changes are proposed for each chapter of the Department of Administration's regulations which impact small entities, then 2 x 14 x 17 = 476 hours per year of additional processing are required by Senate Bill 429. Additionally, on an annual basis, the periodic review plan and current year's review schedule must be prepared and published requiring 10 + 4 = 14 hours per year.

2. 476 + 14 = 490 employee hours ÷ 47 weeks = 10.43 employee hours/week

COMPUTATION APPENDAGE of FISCAL NOTE ANALYSIS
FOR SENATE BILL 429

1. Additional Staff Requirements Analysis

a. General Government Unit (GGU)

Hours per Year	=	1,950 hours per year
Annual Leave	=	(75)
Five Days Sick Leave	=	(37.5)
Holidays (ten days)	=	(75)
Employee Annual Hours Worked	=	1,762.5 hours per year

1,762.5 hours per year ÷ 37.5 hours per week = 47 weeks per year

b. Staff--one part-time Administrative Assistant I, Range 12

$12.75 per hour x 10 hours per week x 52 weeks	= $6,630.00
Benefits for less than 15 hours per week: 11.16%	= $ 739.1
TOTAL:	$7,369.91

2. Other Costs Analysis

Contractual Total: $10,696

Duplicating--$196

Assume 28 Initial Flexibility Analyses and 28 Final Flexibility Analyses to be published at four pages each to meet criteria as established by AS 44.63, mailed to 25 interested/impacted small entities:

2 analyses x 28 regulations x 4 pages x 25 parties x $.035 = $196

Advertising--$10,500

Sec. 44.63.010(3)(c) requires publication of the regulatory agenda in "publications likely to be obtained by small entities." Each of the assumed twenty-eight proposed regulatory changes flexibility agendas printed in the newspaper in Fairbanks, Anchorage, and Juneau would cost:

28 agendas x 3 papers x $125 = $10,500

Supplies: $600

1 employee x $50 month x 12 months = $600

FY 87

POSITION PAPER
SB 429

This bill would establish the requirement to publish semiannually a "Flexibility Agenda" in which the department is required to publish a list of regulations they may pursue within the next six months and send a separate notice to any and all small businesses, small government entities, or small organizations which may be impacted, as well as sending a copy to the Office of Enterprise. Prior to commencing public hearings or a period of public input, the department must publish an "initial flexibility analysis" which includes the impact on small entities, identifies which small entities will be impacted, how they will be impacted, what skills will be necessary to comply with the regulations, as well as any alternatives such as different compliance standards for small entities.

Once a regulation is adopted, a final flexibility analysis is required incorporating all factors stated above.

There are two primary regulatory areas that would be impacted by the bill. The area of competitive bidding for State contracts for the purchase of goods, services, and professional services which would impact small businesses; and the regulations governing municipal grants which would impact small government entities. This department has the responsibility of assuring that municipalities for which the monies were appropriated have spent the monies consistent with the stated purposes and in conformance with the grant agreement.

As stated earlier, the vast majority of regulations promulgated by this department does not warrant a distinction between large and small entities, and to be required to comply with the provisions of this bill would be burdensome beyond any benefits derived, as well as create a double standard which would not be in keeping with the best interests of the State.

The Department of Administration opposes passage of this bill.

CONTINUATION of FISCAL NOTE ANALYSIS

For Bill/Resolution No. SB 429

The division has regulations in effect relating to the administration of the 13 loan programs in this department.

This fiscal note assumes the minimum additional workload to comply with Periodic Review of Regulations (AS 44.63.070) and promulgation of new or amended regulations (AS 44.63.010-.060). This is foreseen as an effort which can be accommodated by a professional service contract. This approach is believed to be the most efficient, least-cost approach.

CONTRACTUAL SERVICES

FY 87

Professional Service Contract:	3 months @ $5.0	$15.0
Printing and Postage		1.0
		$16.0

The contractor will be required to prepare and implement the overall plan to review the division's current regulations within the time frame specified in the proposed legislation. The contractor will coordinate publishing in the Alaska Administrative Journal, receive public comment, analyze the criteria set out under proposed AS 44.63.070(b)(1-5), and prepare a recommendation supporting continuation, amendment or repeal of the regulations.

FY 88 - FY 91

Professional Service Contract:	1 month @ $5.0	$ 5.0
Printing and Postage		.5
		$ 5.5

The contractor will perform the flexibility analysis as required for promulgating new or amended regulations.

ANALYSIS: Attach a separate page if necessary.

Public utilities are, in essence, given an exclusive franchise by the commission to operate in their defined service areas, which would constitute them as dominant entities in their field. Thus, it is arguable whether the provisions of the legislation would be applicable to the regulations of the commission.

CONTINUATION of FISCAL NOTE ANALYSIS

For Bill/Resolution No. SB 429

Moreover, the commission notes that it has geared its regulations in several respects to consider the size of the utilities covered by them. For example, uniform systems of accounts, rate design, cost of service, and load research requirements are based on the utility size. Moreover, in practice, the commission's staff is directed to provide small utilities with assistance to the greatest extent possible. The commission is always sympathetic to waivers of specific statutory or regulatory requirements where the intended public benefits are clearly outweighed by the burdens imposed on small utilities.

The projected expenses reflected in this fiscal note are the estimated costs of public notices and newspaper advertising associated with regulations review. If it is determined that this bill is applicable to public utilities, these direct costs would be incurred. Also necessary would be the annual commitment of approximately five person-months of effort on the part of commissioners and staff in performing the review and analysis required. Although this allocation would not require an addition of new positions, it would be made at the expense of other regulatory responsibilities. Clearly, other statutory time frames would be negatively impacted at the very time when the Legislature is considering proposals to shorten the processing time for most commission proceedings.

ANALYSIS: Attach a separate page if necessary.

To comply with this act and enact the regulations needed, the commission would require a full-time regulations specialist for the first two years and then at least a half-time regulations specialist for the years after that. The act would add enormously to the paperwork burden in producing regulations.

The bill requires the acquisition and use of data concerning cost impact of regulation components of the overall group regulated by the division. We do not have in-house exp tise in this area, so it will be necessary to contract for these needs. The amount shc is an estimate. Based on the size of the group regulated, we feel it is conservative.

To satisfy the requirement that all existing regulations (12 loan programs) be reviewed and analyzed, a one-month professional services contract at $5,000 will be let in FY 87. Advertising, printing, and mailing costs are estimated at $2,000 for the initial review in FY 87 and $500 for new regulations and changes in succeeding years.

The bill adds four new requirements to the process of adopting regulations to ensure special consideration that notices and public hearings are given to small entities.

Although Section 44.63.200(a) of the bill provides each agency with the flexibility to amend the definition of "small business" or "small organization" as appropriate (see attached)

CONTINUATION of FISCAL NOTE ANALYSIS

For Bill/Resolution No. SB 429

to the activities of the agency, Occupational Licensing has no method to differentiate small versus large businesses currently licensed.

Contractual expenditures will result from printing, postage and hearing costs of providing direct notification to all licensees within each professional occupation which has the potential of including "small entities".

*Costs have been repeated in subsequent years since, without actually experiencing the impact of this bill, it is extremely difficult to predict future charges for the variables involved.

It is expected that this legislation will delay the length of processing time currently required for each individual regulation project from approximately six months to nine months.

In addition, to comply with provisions to be included in each notice, much of the attention of the Regulations Specialist would be devoted to satisfying these new requirements.

The Division assists in the regulatory process of 23 licensing areas including regulations promulgated under the Centralized Licensing Act. During each year, approximately 20 regulation topics are handled within each licensing occupation.

Therefore, having to prepare an initial flexibility analysis, final flexibility analysis and conduct periodic review of regulations, in addition to the initial review of all existing regulations before 1991, may require a new Regulations Specialist position in the future to keep up with the increased workload.

Contractual costs were based on:

1. Printing costs at .36¢ per document multiplied by the number of affected licensees within each occupation;	$ 8.7
2. Postage costs of .22¢ multiplied by the number of affected licensees;	5.3
3. Public Notice costs printed in three newspapers of general circulation, which is standard practice within this agency;	2.1
4. Public Hearing costs using the teleconference network based on the standard two hour hearing at $50 per site, per hour, and assuming that the sites of Anchorage, Fairbanks and Juneau are on the network;	4.8*
	$20.9

*Note: Hearing costs for 4 licensing areas were based on a one hour teleconference because of the small number of licensees affected.

The above calculation is a summary of more detailed calculations on file with this agency.

CONTINUATION of FISCAL NOTE ANALYSIS

For Bill/Resolution No. SB 429
Municipal and Regional Assistance Division

EXPLANATION

The requirements of this bill will add a substantial amount of time, cost and effort to the regulation drafting and implementaton process. The language of the bill is somewhat vague so it is difficult to determine with a great deal of precision what the exact costs of this measure will be on this Division. The preparation and distribution of regulatory agendas, initial and final flexibility analyses, and more extensive notification and comment gathering procedures are additional tasks that will be costly. Quantifying the effects of proposed regulations and alternatives will also consume resources for which this agency does not presently budget.

This fiscal note reflects a desire to avoid hiring new staff as the costs of complying with this bill would occur on an intermittent basis. Much of the regulation drafting now done by the Division is performed by program staff. Much of this actual drafting would be contracted out to attorneys to allow staff to perform the new agenda, analysis, and notification duties.

ASSUMPTIONS

It is assumed that the Division will annually undertake three major regulation efforts related to new programs, or substantially revise regulations of existing programs. An annual inflation rate of 5% is applied to fiscal years after FY 87.

FISCAL ANALYSIS

Travel		1,800
3 additional trips per year for program managers to conduct open conferences or public hearings as required under AS 44.63.060. 3 trips @ $600 per (includes per diem)	1,800	
Contractual		22,000
Professional Services - attorney fees for regulation drafting 120 hours @ $125 per	15,000	
Contractual (cont'd)		
Communications -		
Toll call for teleconference public hearings and open conference	5,000	
Postage for additional notification	1,000	
Advertising and printing	1,000	
Supplies		500
Office Supplies for Notification	500	

CONTINUATION of FISCAL NOTE ANALYSIS

For Bill/Resolution No. SB 429

Division of Community Development

Explanation:

The implementation of this bill would substantially increase the cost of regulation drafting and implementation. Since regulations are drafted and updated on an irregular basis, it is difficult to estimate the actual increased cost for any given year. However, we can say with certainty that for each set of regulations drafted or updated, the cost would increase by at least one third. The additional expense can be attributed to the preparation and distribution of regulatory agendas, initial and final flexibility analyses, and the increased notification and comment solicitation procedures.

Assumptions:

For purposes of responding to this request we are assuming that DCD will be involved with three separate regulation draftings or updates during each of the coming five (5) years. Under the present system we would estimate that this activity would require the equivalent of one staff person's full time attention for ninety (90) days. We would also estimate that the new requirements included in SB 429 would increase the activity by one third, or the equivalent of one person's full time attention for thirty (30) days. Because the increased activity has legal implications we would want to budget for 150 hours of contractual legal services.

We estimate that each of the three separate legal activities would require at least three and a half (3 ½) trips, so we have included a total of ten (10). We also estimate that the combined cost of supplies itemized in the fiscal note would cost $2,000.00. The cost increase for each year reflects a 4% increment. We believe our estimates are probably conservative.

CONTINUATION of FISCAL NOTE ANALYSIS

For Bill/Resolution No. SB 420

While the Department of Environmental Conservation certainly supports and encourages the concept of responsiveness of government to the public it serves, the ability to do so will (for this legislation, at least) require the hiring of a Research Analyst III and a half-time Clerk Typist III. We also envision the need for minimal contractual services when proposed regulatory changes involve complex matters affecting a diverse population.

We would point out that many of our regulations have federal mandates behind them, requiring federal approval before promulgation. If such regulations were excluded from the requirements of AS 44.63.020 and AS 44.63.030 (although AS 44.63.030(a)(1) and (2) represent theories of responsible rule-making which we support), we could reduce our fiscal note to a half-time Research Analyst III with minimal contractual services.

For B&M Use Only
Key Number __ __ - __ __ - __ __ - __ __ - __ __

Justification

Because of the complex nature of this agency's programs, and the wide variety of entities and individuals served and affected, this position's expertise would be required to provide the various analyses and reports and summaries required by the legislation.

This position would coordinate data from staff who write regulations, from affected entities, and from other appropriate sources, analyzing impace and making recommendations to staff; preparing required analyses, documents, and notices, with staff input and evaluation as to correlation between data, federal requirements, and the like.

For more complex matters, this position would work closely with an economics-type contractor to achieve the provisions of the law.

Costs associated with this position include average per-employee costs for contractual and commodities. Equipment expense for a desk, chair, etc. are a one-time expenditure.

SB 429

An assumption is made that the Department has an average of 10 major new regulations or regulations amendment projects yearly and 20 smaller or emergency regulations projects yearly.

A team of three new staff persons would be needed to work with the Special Assistant to the Commissioner for Legal Affairs. This team would aid staff of the divisions promulgating regulations in preparing the flexibility analyses required in the bill and setting up the plans for regulations review.

Summary of Costs -- FY87

Personal Services - salary, benefits, overtime for 3 staff	100.2
Travel - for hearings, meeting with affected public	9.5
Contractual - communications, risk management, equipment maintainence, advertising	9.3
Supplies - office supplies	.5
Equipment - 3 desks, 3 chairs, 3 calculators, 1 IBM Displaywriter, 1 bookcase, 1 file cabinet	14.9
TOTAL	134.4

Costs for years beyond FY87 are adjusted by 3.5% yearly. Equipment costs are one time only.

CONTINUATION of FISCAL NOTE ANALYSIS

For Bill/Resolution No. SB 429

In order for the department to comply with the provisions of SB 429, the addition of two staff members would be necessary. A Regulations Specialist II and a Clerk Typist III, both located in Juneau, would be necessary for the additional research, analyses and documentation required by the bill. (See attached New Position Justification Forms for detail).

More specifically, the Regulation Specialist would be responsible for developing the Department's agenda of proposed regulations twice yearly, and for the review of departmental regulations before July 1, 1991. Also, this position would be responsible for coordinating with consulting firms to prepare the initial "flexibility analysis" on all proposed regulations. Expertise does not currently exist in the department to complete this type of analysis. We estimate $30,000 in contracts would be required each year. The Regulations Specialist would be able to prepare the final analysis.

Also required is additional published information when notices of regulations are placed in newspapers. We estimate an addition of $5,000 in advertising expenses each year to meet these requirements.

Assumptions:

1. The department would have 10 regulation proceedings a year that would fall under the requirements of this bill.

2. Effective date of July 1, 1986.

3. Annual inflation of 4% on non-personal service items.

Position Title			No. of Positions	Range/Step	Barg. Unit	Gov.	Approv.	Disapp.

For B&M Use Only
Key Number __ __ - __ __ - __ __ - __ __ - __ __

Justification

This position would be responsible for coordinating the department's activity in meeting the requirements of this bill. The person would review all proposed regulations to determine if they are justified and develop 1) the agenda of proposed regulations twice yearly and 2) a plan for periodic review of the Department's regulation as required under this bill. The position would contract with consulting firms for the completion of the initial "flexibility analysis". This position would complete the final "flexibility analysis".

Costs associated with this position would include average per-employee costs for contractual and commodities. The equipment expense for a desk, chair, etc. would be a one-time cost.

CONTINUATION of FISCAL NOTE ANALYSIS

For Bill/Resolution No. SB 429

This bill adds new sections to the Administrative Procedure Act that require that agencies adopting regulations, under the Act, consider the probable economic effect of the proposed action on small businesses and small municipalities. Although these changes may cause a fiscal impact for several departments, the Department of Law adopts few regulations of its own, and the bill will probably not have a direct fiscal impact on the department. The department does, however, review all regulations prior to their adoption, and it sometimes assists other departments in drafting their regulations. To the extent that we are requested to advise other agencies about the sufficiency of their efforts to conform to the economic analysis provisions in this bill, we can expect innumerable requests for advice. These requests will probably result in our regulations and legislative drafting staff becoming more swamped than they already are.

Because we cannot accurately predict the additional workload that will occur if this bill becomes law, we are not requesting fiscal note funds at this time. Such a request may become necessary in the future, and the potential for this additional cost should be noted while the bill is being considered.

MEMORANDUM State of Alaska

TO: Arthur H. Peterson
Assistant Attorney General
Legislation/Regulations Section

DATE: 27 March 1986

FILE NO:

TELEPHONE NO: 269-1565

FROM: MG Edward G. Pagano
The Adjutant General

SUBJECT: SB 429 ("flexibility analysis" for small businesses)

The Department of Military and Veterans Affairs has had virtually no occasion to publish regulations which affect businesses; large or small. Accordingly, the Department does not feel it would be appropriate to take a position either favorable or contrary to this bill. Although there are undoubtedly indirect costs associated with the regulatory process which impact upon the Department, there is no direct fiscal impact and accordingly a "zero" fiscal note is appropriate from the Department of Military and Veterans Affairs.

CONTINUATION of FISCAL NOTE ANALYSIS

For Bill/Resolution No. SB 429

The Department's approach to the requirements of the Act would be to contract research/analytical expertise to develop impact statements as well as flexibility analysis as related to small entities, and to make periodic review assessments of regulations as would be indicated by the Department's plan published in the Alaska Administrative Journal. The contractual expertise time necessary to meet the requirements found in this piece of legislation would be estimated at 90 days per year.

Since the costs would be spread out amongst the various entities of the Department, the contractual costs would be placed in the Commissioner's Office and dispersed as necessary.

A 5% inflation factor is added beginning FY88.

300 Contractual		$62.0
Research/analysis		
90 days @ $100/day for 6 hours per day	$54.0	
Incidental computer use	5.0	
Incidental travel related to above	3.0

CONTINUATION of FISCAL NOTE ANALYSIS

For Bill/Resolution No. SB 429

This proposed legislation is apparently an attempt to require those agencies with regulation adoption authority to be more responsive to small businesses, small organizations and small governmental jurisdictions.

The additional costs involving the regulation adoption process is based on the assumption that the Department would propose three regulation changes per year and review two existing regulations per year as required under Sec. 44.63.070 of the bill.

Expenditure Detail

1. Personal Services for review of existing regulations, attendance at additional hearings and analysis of hearing comments and testimony. (10.0)

2. Travel for holding additional hearings and meetings. (5.0)

3. Contractural: additional advertising, mailouts and telephone to notify affected entities of reviews, hearings and meetings. (6.0)

Dept. of Transportation & Public Facilities

Position Paper

BILL NO: SB 429

APPROVED: R. J. Knapp
Commissioner

TITLE: Relating to Regulations Affecting Small Businesses, Organizations and Governments

DATE: 3/28/86

SB 429 apparently is an attempt to require those agencies with regulation adoption authority to be more responsive to small businesses, small organizations and small governmental jurisdictions during the adoption process.

The bill would make the regulation adoption process unnecessarily cumbersome and burdensome and is superfluous as the existing Administrative Procedures Act has sufficient language to require proper notification of all affected parties and require that affected parties be given adequate opportunity to present statements, arguments or contentions either orally or in writing on proposed regulations.

This Department feels that existing statutes are adequate to properly control the regulation adoption process and opposes SB 429.

For further information call Susan Fleischhauer at 465-3900.

CHAIRMAN'S INFORMATION: CSSB 429(L&C)

1) BILL TITLE: "An act relating to regulations that affect small businesses and small municipalities; and providing for an effective date."

a) Introduced: Sen Fahrenkamp

b) Co-sponsors:

2) INTENT: This measure concerns the promulgation of regulations under the Administrative Procedures Act and imposes duties on agencies before adopting, amending, or repealing regulations. These duties include an economic analysis on the impact of regs on "small entities", "small businesses" and "small municipalities".

N.B. With the projected budget axe to the Administrative Journal, the bill will have a major flaw.

FISCAL NOTE: We currently have 12 fiscal notes from some of the affected agencies, however the agencies have not had a chance to prepare F/N's on the new CS.

3) ADDITIONAL REFERRALS: Judiciary, ~~Finance~~ and Rules

4) PUBLIC HEARINGS:

a) Sponsor:

b) Public Witnesses:

5) BILL ACTION:

a) Hold in committee?
b) Assign to sub committee for further review?
c) Move from committee?
d) Close public hearings?

6) COMMITTEE ACTION?

a) amendments?
b) CS adoption? Need to move for the adoption of the L&C CS.

REGULATORY FLEXIBILITY

States are requiring their agencies to perform an analysis of the impact any proposed regulation would have on small business and adopt administrative rules which minimize the negative impact and reflect the special needs and problems of small business.

Discussion: Regulatory flexibility legislation seeks to make state agencies sensitive to new regulatory burdens which may have a crippling impact on the ability of small businesses to create jobs.

Regulatory Flexibility legislation requires the state regulating agency to consider the following measures for reducing impact on small business:

(1) establish less stringent compliance or reporting requirements;
(2) establish less stringent schedules or deadlines for compliance or reporting requirements;
(3) consolidate or simplify compliance with the rule and regulation or reporting requirements;
(4) establish performance standards to replace design or operational standards; or
(5) exempt small businesses from any or all requirements of the rule and regulation.

Often small businesses have insights into the situations being regulated which affect them, and the regulators should make every effort to involve them in the deliberations on the regulation.

The Regulatory Flexibility Act of 1980 imposes this requirement on federal regulators. According to a 1983 study by the U.S. Small Business Administration's Office of Advocacy, twenty-one states have adopted legislation which would require this regulatory review, and six states currently have it under consideration.

Regulations imposed by government agencies may have a greater impact on small business than on their larger competitors. For example, while regulatory controls are necessary and appropriate in many areas, regulators must be sensitive to the needs of small business in devising regulations and the cumulative affect of regulations on a small business. This is particularly important since small business is the primary generator of new jobs -- a trend that is projected to continue according to most economists.

U.S. Small Business Administration

March 1985

SBA

Annual Report of the Chief Counsel for Advocacy on Implementation of the Regulatory Flexibility Act

Executive Summary

The Regulatory Flexibility Act of 1980 (5 U.S.C. 601 et seq.) (RFA or the Act) was enacted to ensure that Federal regulators consider the impact of government regulations upon small business. The Office of the Chief Counsel for Advocacy of the U.S. Small Business Administration is charged by Congress to oversee implementation of the RFA. In the four years since the law's enactment, the Office of Advocacy has been instrumental in increasing decisionmakers' awareness of the regulatory problems confronting small business.

Significant strides were made in 1984 by the Office of Advocacy and business community to promote small business interests before regulatory agencies, the Congress and the courts. The 98th Congress expanded the opportunity for small business regulatory analysis by enacting the "Small Business and Federal Procurement Competition Enhancement Act of 1984" (P.L. 98-577). This law expands notice and comment rulemaking procedures to include procurement rules issued by Federal agencies. Because the RFA applies to all rulemakings that must follow notice and comment procedures, the procurement regulations of agencies such as the General Services Administration and Department of Defense will be subject to the RFA. At the same time, the Office of Management and Budget has targetted small business procurement-related paperwork for special scrutiny.

The U.S. Court of Appeals for the D.C. Circuit reaffirmed the reviewability of agency compliance with the RFA. In Thompson v. Clark, 741 F.2d 401 (D.C. Cir. 1984), the court affirmed its decision in Small Refiner Lead Phase-Down Task Force v. Environmental Protection Agency, 705 F.2d 506 (D.C. Cir. 1983), which held that a court may review the content of any regulatory flexibility analysis in determining the reasonableness of a rule and may overturn a rule due to a defect in such analysis. Thompson v. Clark provides another step in the evolving line of cases defining the scope of judicial review of compliance with the Act.

This report reviews agency compliance with the RFA in 1984. In general, agencies have become increasingly aware of the effects that government regulations may exert upon small business. Agencies have improved regulatory flexibility analyses by using better economic data, by engaging in more extensive outreach efforts, by devising internal agency regulatory procedures for complying with the Act, and by increasing communication with the Office of Advocacy. This report details agency reliance on the above-mentioned analytic and regulatory tools to achieve

APPENDIX I

State Efforts to Reduce Small Business Regulatory Burdens

Following the lead of the Federal Government, many states have enacted legislation and initiated programs to promote small business competition. Recognizing the need to reduce regulatory burdens and increase small business' participation in the rulemaking process, many states have enacted Regulatory Flexibility Acts (RFAs) and Paperwork Reduction Acts (PRAs). In 1984, 26 states had RFAs and 16 states had PRAs (see list that follows). Such legislation is currently under consideration in several states.

In 1984, the following states had regulatory flexibility measures in effect, either by legislation or executive order:

Arizona
California
Colorado
Delaware
Indiana
Iowa
Kentucky
Louisiana
Maine
Maryland
Massachusetts
Michigan
Minnesota
Montana
New Hampshire
New York
Ohio
Oregon
Pennsylvania
Rhode Island
Texas
Utah
Virginia*
Washington
West Virginia
Wisconsin

The following states had paperwork reduction legislation or executive orders in effect in 1984:

Kentucky
Louisiana
Massachusetts
Michigan
Minnesota
Missouri
New Jersey*
New York
North Dakota
Ohio
Oregon
Pennsylvania
Tennessee
Virginia*
West Virginia
Wisconsin

*By executive order.

To help achieve the goal of lessening regulatory hardships on small business, an increasing number of states have established state small business offices, government advisory councils, task forces, and state small business conferences. More and more states are publishing reports on small business and are even developing state small business data bases.

These programs, in conjunction with the significant number of state programs that provide small businesses with financial and management assistance, should strengthen small business' position in the economy and its ability to create an increasing number of our nation's new jobs.

Honorable Bettye Fahrenkamp
Alaska Senate
Pouch V Juneau 99811

Dear Senator Fahrenkamp:

On behalf of FNA's Economic Development program, I would like to commend you and extend our appreciation for your bill #429, to require consideration of alternative regulatory approaches in light of the impact of proposed regulations on small businesses. This bill is a good example of the wise and helpful leadership you have long provided.

I spoke with Mr. David Dougherty, the federal representative (SBA Seattle) who handles the federal bill; he feels such laws work well and achieve important benefits. Mr. Dougherty was my first supervisor many years ago (1970); he is an insightful and productive person, who has done many things to make government more efficient and productive. His insights and positive work have earned him a good respect and regard.

With so many areas where our businesses are hurting to survive, and so many adverse impacts of regulations, this bill can be an important benefit. Thank you for your attention to this need.

Sincerely,

Bob Keller

CSSB 429(L&C): Sectional Analysis

Section 1) Expands the duties of the Admin Reg Review Committee to include monitoring compliance with economic analysis requirements. Additionally, the committee would make recommendations on the adequacy of analyses developed by agencies, and the agencies response to public testimony.

Section 2) Adds a new section to the Admin Procedures Act. During January and July of each year, agencies shall publish a "regulatory flexibility agenda" in the Administrative Journal. This agenda shall describe the subject of regs likely to have economic impact on small entities, summarize the objective of the reg, and provide the name and phone number of an official who has knowledge of these items.

Agency may act on a matter not included in the agenda, or may decline to consider or act on a matter in the agenda.

Section 3) Adds a new section on ECONOMIC ANALYSIS FOR SMALL ENTITIES.

Before publishing a notice to adopt, amend, or repeal a reg, the agency shall analyze the probable economic impact on small businesses and small municipalities.

The analysis must consider the type and number of small entities affected as well as the cost and benefit to those types. Also requires consideration of the probable economic effects, and a review of the reasons for the reg, in light of the economic effects. Analysis shall also identify less costly means of achieving the goal, and identify current regs that may duplicate, overlap, or conflict with the proposed regs.

After the close of public proceedings the agency shall prepare a final analysis. Final analysis to contain a brief summary of the economic analysis, and the agency's comments on oral or written public testimony. Comments on testimony must identify changes made in response to the testimony, and the reasons for rejecting a proposal which was not adopted by the agency. Agency may summarize these comments to avoid duplication and unnecessary detail.

If an agency certifies in writing that a reg will not have a significant economic impact on small entities, the agency shall make a brief statement of noncompliance with these requirements. The written certification must be filed with the Lt. Governor.

Agency may consider closely related regs as one reg for the purposes of this section.

Analyses are not subject to judicial review, and actions on regs may not be invalidated by the contents of these analyses.

Defines "small business", "small entity", and "small municipality".

Section 4) Amends the Admin Procedures Act by requiring a summary of the economic analysis and the address where a complete copy of the analysis may be obtained.

Section 5) Prior to January 1, 1991, agency shall review regs in effect on 7/1/86 which have significant economic impact on a substantial number of small entities. Purpose of the review will be to determine the effect of the regs and whether they should be continued, amended, or repealed.

If the head of an agency determines they can not complete the review by 7/1/91, he may certify in writing and recieve an additional year for said review.

In reviewing the regulations, the agency shall consider the need for the reg, public complaints about the reg, and the complexity of the reg. Review shall also consider whether the reg duplicates, overlaps, or conflicts with other regs, and the length of time since the reg has been evaluated.

Section 6) Applicability of section 3

Section 7) 7/1/86 effective date.

Department of Commerce & Economic Development / POSITION PAPER

SB 437: "An Act relating to the practice of denturity."

This legislation provides for the licensing of denturists.

Sections 7, 8, and 9 of this bill amend the Insurance Code to reflect the licensing of denturists. The sections impacted are primarily designed to prevent unfair discrimination against specified health care providers which, with this bill, would include denturists. We have no objection to this legislation.

Loren H. Lounsbury, Commissioner
Department of Commerce & Economic Development

Date: 3/24/86

John L. George, Director of Insurance

Date: 3/27/86

1t0262K

Department of Commerce & Economic Development / POSITION PAPER

SB 437: An Act relating to the practice of denturitry.

The bill specifies criteria for licensure and charges the department with the responsibility to administer the licensing function.

The Department of Commerce and Economic Development, Division of Occupational Licensing is opposed to this bill. The department feels the bill is premature and the department is opposed to accepting responsibility for licensing a health profession without a board. If the bill were to be enacted, we would recommend that the licensing of denturists and denturitry interns be the responsibility of the Board of Dental Examiners, with the staff support of the Division of Occupational Licensing. Attached are technical amendments which would make the language of the bill conform to that of current licensing statutes.

Discussions with dentists, one of who is a member of the Board of Dental Examiners, indicate that licensing of denturists might not be the best interest of the public as the bill is written. Information received indicates that the practice of denturitry requires minimal education in many aspects of the provision of dental care. For example, denturitry programs not provide training in biological and physiological aspects of patient care, including life saving devices and techniques. Therefore, according to the dentists, a denturist may be proficient in the making of dentures; however, if dentures are prepared without taking into consideration the results of a dental examination patient care could be at a sub-standard level and could result in oral cancer, jaw problems and other complications.

The services of denturitry may appeal to the general public as a cost-savings measure. However, the public is unlikely to be aware of the differing standard of dental care being provided by denturists as opposed to dentists. One means for overcoming these objections and potential public protection problems would be to require a complete dental examination by a dentist prior to providing denturitry services. This has been suggested to the Division by members of the dental community.

Information received from an out-of-state denturist in support of licensing legislation stated that at the present time there are no practicing denturists in the State of Alaska. However, passage of licensing legislation would attract interest of at least two out-of-state practitioners. Because of the small number of practitioners involved, costs to administer the licensing are low, although a denturitry examination would need to be developed or procured. However, the absence of public demand for licensing of this occupation indicates that government regulation is not required at this time.

Nancy Dunn, Director 465-2534
Division of Occupational Licensing

PROPOSED AMENDMENTS TO SB 437
An Act relating to the practice of denturitry.

Throughout the bill, the terms certificate, license and registration are used interchangeably. To be consistent with the intent of the legislation in establishing licensure, and given that each individual term is a separate method of regulation, the terms licensing or licensure should be used.

Page 3, line 27: Delete "certificate of registration" and insert "License"

Page 4, lines 5 and 6: Delete "or will have graduated by the date of the examination". Arrangements for examinations must be made in advance to order the exams, arrange for exam sites and public notice the examinations. It is administratively difficult to verify graduation credentials at the last minute and particularly on the day of the examination.

Page 5, line 17: Delete "and a certificate of registration"

Page 5, line 18: Add "...applicant who meets the requirements of 08.87.020(a)(3) and pays..."

Page 5, line 19: Delete "and certificate"

Page 5, lines 27 and 28: Delete "certificate of registration" and insert "license".

Page 5 line 29: Delete "licensee's registration certificate" and insert "license".

Page 6, lines 1 - 7: Amend to read:

> "occupational licensing shall mail a form for renewal [OF THE CERTIFICATE] to each licensed denturist. Failure to receive the renewal [REGISTRATION] form does not exempt a licensee from renewing the license [CERTIFICATE].
>
> (b) A licensee who practices in an established office with an address other than the address shown on the license [FOR WHICH THE LICENSEE'S REGISTRATION CERTIFICATE IS ISSUED] shall obtain a branch office registration [CERTIFICATE] for each office.

Page 6, lines 8 - 11: Amend to read:

> (c) The department may not renew a branch office registration [CERTIFICATE] and shall revoke the license of a denturist who fails to renew the registration and license prior to the expiration date [APPLY FOR RENEWAL OF CERTIFICATION WITHIN ONE YEAR OF EXPIRATION].

ARTHUR R. RORAFF, D.D.S., M.S.
DIPLOMATE, AMERICAN BOARD OF PROSTHODONTICS
FELLOW, AMERICAN COLLEGE OF PROSTHODONTISTS

March 25, 1986

Senator Fred Zharoff:
Senate Labor and Commerce Committee
Room 121 Capitol
Juneau, Alaska 99811

RE: Senate Bill #437, "An Act relating to the practice of denturity"

Dear Senator Zharoff:

I believe this bill will cause irreversible harm to the health of many Alaskans. Some of this harm will occur over a period of years, caused by people with insufficient knowledge and skill to evaluate, plan, and provide an adequate health care service.

As the only Diplomate of the American Board of Prosthodontics in private practice in Alaska, a specialist in denture services for over 25 years, and a dentist for over 30 years, I am strongly opposed to this bill for the following reasons:

1. Excellent denture service is already being provided by an abundance of available, fully qualified, well-trained, licensed dentists practicing in Alaska.

2. Senior citizens requiring denture services almost always present complicating geriatric problems which necessitate special care and treatment.

In conjunction with my position as an Associate Director, Dental Programs, at Anchorage Community College, it is my privilege to examine patients who request care through Mabel T. Caverly Senior Citizen Center. I estimate about 80% of these patients require prosthodontic care; most of this prosthodontic care is so difficult and complicated it would challenge advanced graduate students in leading dental colleges. Much of this required care that I observe needs to be accomplished in a team with other specialists, including physicians, and all other dental specialists. Many require corrective surgery for problems caused by old dentures. These patients have special problems which cannot be treated by laboratoy technicians, or anyone with minimal training. Incidently, my time for these services at Anchorage Community College is being provided free.

3. The courses to provide denture service taken by dentists during dental school are the mimumum considered necessary.

The long dental school curriculum is designed to provide sufficient education so a doctor can safely and reliably treat routine patients. This curriculum not only includes many intense pre-dental school basic science requirements, but also two years of preclinical physiologic sciences in dental school, many times in the same classes with medical students. And only then, with this understanding and knowledge, do dental students begin treating patients under supervision.

2550 SPENARD ROAD, SUITE 206 ANCHORAGE, ALASKA 99503
TELEPHONES: OFFICE: (907) 272-4143 HOME: (907) 345-6905

ARTHUR R. RORAFF, D.D.S., M.S.
DIPLOMATE, AMERICAN BOARD OF PROSTHODONTICS
FELLOW, AMERICAN COLLEGE OF PROSTHODONTISTS

4. The clinical care of prosthodontic patients is far different and exceedingly more complex than the laboratory procedures; the relatively routine laboratory phase of denture construction must not be confused with the far more complex clinical phases.

Each prosthodontic patient has a great variation in individual problems, and there are many scientific methods and concepts from which the dentist selects to address them. Not only must this evaluation and treatment plan be accomplished, but each step of treatment must be precisely executed with skill, care, and judgment. Even dental specialists, with ten or more years of college education, realize this on a daily basis. People who believe that complete dentures are constructed by making a simple impression, then forwarding it to a laboratory for the remaining procedures of construction, have not been told the truth. Anyone attempting to convey the concept that a laboratory technician, or "denturist," is adequately trained to provide clinical prosthodontic care is guilty of a cruel hoax.

5. My experience in clinical prosthodontics strongly indicates that we do not need more providers with even less experience than dentists, but more dentists with more advanced training and experience.

The passage of this bill would be a big step backwards in this age of rapid scientific and high-tech progress. It would not uptdate anything, but rather eliminate the requirement to utilize basic medical knowledge.

6. Certified Dental Technicians, and other dental laboratory technicians, have for years provided an excellent service to all Alaskans through and under the authorizations of licensed dentists.

Nearly all dental laboratory technicians serve dental health very conscientiously, but recognize they are not qualified to safely and competently treat patients. The laboratory technician works with a knowledge of dental materials, laboratory instruments, and artistic concepts in support of a prescription and authorization of a dentist.

The American Dental Association approves of the program of education, experience, and testing necessary to become a Certified Dental Technician. However, these technicians are not qualified to evaluate, diagnose, treat, or directly provide care for patients. In general, this group opposes "denturism." Actually, anyone can become a non-certified dental laboratory technician without any course, training, or license at all. Not even a high school diploma is required!

7. "Denturist," "denturism," and "denturity" are words fabricated by a small group of dental laboratory technicians without a dental degree or license, who desire to independently and directly treat patients without the supervision of established laws, or proven professional dental standards.

Some "denturists" have gained trial-and-error, on-the-job training somewhere, sometimes by illegally practicing dentistry. This is an obsolete professional education system similar to the preceptorships utilized a hundred or more years ago to train dentists. Courses that some "denturists" profess to have taken are short, elementary, and academically inferior to nursing school programs.

2550 SPENARD ROAD, SUITE 206 ANCHORAGE, ALASKA 99503
TELEPHONES: OFFICE: (907) 272-4143 HOME: (907) 345-6905

ARTHUR R. RORAFF, D.D.S., M.S.
DIPLOMATE, AMERICAN BOARD OF PROSTHODONTICS
FELLOW, AMERICAN COLLEGE OF PROSTHODONTISTS

8. Neither the American Dental Association, nor any of it's affiliated societies, recognize, approve, examine, or accredit any "denturist" organization, group, school, or individual.

No one is "board certified by the American Dental Association" because the Association does not issue any such certificates.

The American Academy of Denturity is of questionable credentials because I have yet to find anyone who has heard of it.

Any schools of "denturity," if any exist, are of questionable nature because there is no one to examine their credentials, or certify their programs.

9. "Denturity" and "denturism" are being promoted purely under the innuendo and mirage of economic advantage for the people of Alaska.

Consumer and access-advocacy groups sometimes comment "We can't afford dentists because they charge so much." Most likely this attitude occurs because many patients are not aware of the complexities of modern dental care, not aware of what happens "behind the scenes," and not aware of the great overhead expense. The fact is that anyone providing prosthodontic services will have the same overhead --- utilities, rent, salaries, supplies, etc.--- which consume the major portion of a gross income. Therefore, it is not likely that consumer cost can be any different under "denturism," unless the proponents of this bill advocate either providing substandard care, or donating services with minimal net income.

Despite denture service fees that are considered high by many lay people, there are numerous general dentists, even with all their excellent education, who prefer not to treat edentulous patients in their practices. This is soley because the challenges and complexities of complete denture care and treatment frequently make it financially unrewarding, or at least unpredictable. With that as a fact, it makes no sense whatsoever to delegate denture treatment problems to a person with pathetically little education in patient health care.

10. A removable partial denture can rarely be properly designed and constructed without altering the shape of soft tissue or tooth structure.

"Denturists" must not and cannot alter or cut teeth or soft tissue. Therefore, it can only be concluded "denturists" intend to routinely provide removable partial dentures which are inadequately designed and prepared.

The above views are my own opinions, gained from experience in the practice of prosthdontics. I believe they are essentially correct information, and serve as a guide to help retain good dental and general health for Alaskans.

Thank you.

Sincerely,

Arthur R. Roraff, D.D.S., M.S.

and legally. Estimated service company fees of $50,000 and attorney fees of $50,000 are minimum figures. Four thousand travel expense would be utilized by the division director and financial examiner to attend the division-sponsored organizational meetings envisioned as necessary to bring the reciprocals into existence, and educate the clientele. These meetings would be nearly identical to the two meetings in 1985 sponsored and fostered by this division which were attended by legislators (and staff), financiers, brokers, agents, fishing industry organizations, marine surveyors, marine safety experts, adjusters and attorneys. Creation of these reciprocals will, in turn, create an even greater need for these meetings.

Commercial Fishing Industry Financial Institutions	None known

FISCAL IMPACT: ☐ NONE ☐ FISCAL NOTE ATTACHED

BACKGROUND/LEGISLATIVE INTENT

Hull and P&I insurance for commercial fishing boats has increased many fold in cost and is simply not available from time to time. This bill facilitates formation of reciprocal marine insurance companies which "pool" risks, and are a proven form of dealing with this crisis.

ANALYSIS OF BILL/PROGRAM EFFECTS

Section 1: Financial and technical assistance for formation of reciprocals;
Section 2: Takes marine reciprocals out of worker's comp. pools;
Section 3: House cleaning changes to Section 4;
Section 4: Types of marine in reciprocals by reg.;
Section 5: Surplus set by reg. on marine recip.;
Section 6: (d) financial and technical assistance, (e)(1) documents, (2) reinsurance, (3) subscriber rules and mgmt., (4) financing expenses, (5) assists in managing;
Section 7: May issue nonassessable policies;
Section 8: Marine reciprocals out of Guaranty Act;
Section 9: Clean up of Guarantee Act language.

AMENDMENTS PROPOSED

None.

IN THE SENATE BY ELIASON

SENATE BILL NO. 442

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to reciprocal insurers that provide marine insurance; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. FINDINGS. A crisis exists in the marine insurance market that is seriously affecting persons who fish commercially in the state. The development of insurance reciprocals to provide marine insurance would help alleviate this crisis. Persons who fish commercially in the state are generally unable to bear the cost of developing reciprocal insurers to provide marine insurance, particularly in light of the depressed condition of certain segments of the fishing industry. The Department of Commerce and Economic Development should provide financial and technical assistance to persons who wish to form reciprocal insurers to provide marine insurance.

* Sec. 2. AS 21.39.155(a) is amended to read:

(a) The director may require carriers, except a reciprocal insurer formed by and insuring only a group of municipalities or nonprofit public utilities under AS 21.75 or a reciprocal insurer formed under AS 21.75 to provide marine insurance, as a condition of writing a line of insurance dealing with workers' compensation, to participate in an assigned risk pool if the director finds that mandatory carrier participation is in the public interest.

* Sec. 3. AS 21.75.020(a) is amended to read:

(a) Except as provided in (c) of this section, a [A] reciprocal

insurer may, upon qualifying as provided for by this title, transact any kind or kinds of insurance defined by this title, other than life or title insurances.

* Sec. 4. AS 21.75.020 is amended by adding a new subsection to read:

(c) The director shall establish by regulation the type of marine insurance that a reciprocal insurer may provide.

* Sec. 5. AS 21.75.050 is amended by adding a new subsection to read:

(e) Notwithstanding (a) - (c) of this section, the director shall establish by regulation the level of surplus to be maintained by a reciprocal insurer providing marine insurance.

* Sec. 6. AS 21.75.060 is amended by adding new subsections to read:

(d) The director may provide financial and technical assistance to persons who wish to establish a reciprocal insurer to provide marine insurance under this chapter.

(e) The areas the director may assist the person with under (d) of this section include

(1) preparing the documentation necessary to form the reciprocal insurer;

(2) obtaining reinsurers for the reciprocal insurer;

(3) preparing subscriber rules and management procedures for the reciprocal insurer;

(4) financing the formation expenses of the reciprocal insurer;

(5) managing the reciprocal insurer.

* Sec. 7. AS 21.75.230 is amended by adding a new subsection to read:

(d) Notwithstanding (a) - (c) of this section, a reciprocal insurer that provides marine insurance may issue policies that are nonassessable.

* Sec. 8. AS 21.80.180(5) is amended to read:

(5) "insolvent insurer" means an insurer

(A) authorized to transact insurance in this state, except an assessable reciprocal insurer formed by and insuring only municipalities or nonprofit public utilities, a reciprocal insurer formed under AS 21.75 to provide marine insurance, the Medical Indemnity Corporation of Alaska, and the Health Care Providers Joint Underwriting Association established under AS 21.88, either at the time the policy was issued or when the insured event occurred, and

(B) determined to be insolvent by a court of competent jurisdiction;

* Sec. 9. AS 21.80.180(6) is amended to read:

(6) "member insurer" means a person, except an assessable reciprocal insurer formed by and insuring only municipalities or nonprofit public utilities, a reciprocal insurer formed under AS 21.75 to provide marine insurance, the Medical Indemnity Corporation of Alaska, and the Health Care Providers Joint Underwriting Association established under AS 21.88, who

(A) writes [ANY KIND OF] insurance to which this chapter applies under AS 21.80.020 including the exchange of reciprocal or interinsurance contracts, and

(B) is licensed to transact insurance in the [THIS] state;

* Sec. 10. This Act takes effect immediately in accordance with AS 01.-10.070(c).

MAR 12 1986

Senator Fred Zharoff
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Fred:

First, I want to thank you for having Bill Hall come to our annual meeting and explain the reasons behind S.B. 442.

Our association strongly supports passage of this bill, along with a fiscal note to facilitate the Director of Insurance's Office in doing the necessary research to define the regulations needed. As you know, the availability of re-insurance through London is one of the keys to any successful group pool effort.

Again, we appreciate your interest and support on this matter.

Sincerely,

Phil McCrudden

THIS MEASURE FACILITATES THE FORMATION OF MARINE INSURANCE "POOLS", AND ALLOWS THE DIRECTOR OF THE DIVISION OF INSURANCE AUTHORITY TO ESTABLISH SUCH POOLS. THE DIVISION OF INSURANCE WILL ESTABLISH SURPLUS REQUIREMENTS THRU REGULATION, AND MAY PROVIDE TECHNICAL ASSISTANCE TO GROUPS WISHING TO PARTICIPATE IN MARINE RECIPROCALS.

THE LEGISLATION WAS DEVELOPED FROM RECOMMENDATIONS MADE BY THE SENATE ADVISORY COMMITTEE DURING A RESEARCH PROJECT ON MARINE INSURANCE AVAILABILITY, AND HAS THE SUPPORT OF FISHERMAN'S GROUPS AS WELL AS THE DIVISION OF INSURANCE. I URGE FAVORABLE CONSIDERATION OF THIS MEASURE.

CHAIRMAN'S INFORMATION: SB 442

1) BILL TITLE: "An act relating to reciprocal insurers that provide marine insurance; and providing for an effective date."

a) Introduced: By Sen Eliason

b) Co-sponsors:

2) INTENT: This measure facilitates the formation of marine reciprocal insurance "pools", and allows the director of the Division of Insurance authority to establish such pools. The Division of Insurance will establish surplus requirements thru regulation, and may provide technical and financial assistance to groups wishing to participate marine reciprocals.

FISCAL NOTE: 104.0

3) ADDITIONAL REFERRALS: Finance, Rules

4) PUBLIC HEARINGS:

a) Sponsor:

b) Public Witnesses:

5) BILL ACTION:

a) Hold in committee?
b) Assign to sub committee for further review?
c) Move from committee?
d) Close public hearings?

6) COMMITTEE ACTION?

a) amendments?
b) CS adoption?

SB 442: Sectional Analysis:

Section 1) FINDINGS section describes the current situation in the marine insurance market, and speaks to the development of insurance reciprocals to help alleviate the effects of this crisis. Also requests DCED to provide technical and financial assistance to persons wishing to form such reciprocals.

Section 2) Exempts reciprocal marine insurance groups from the workers comp assigned risk pool which may be mandated by the Div of Insurance.

Section 3) specifies the insuring powers of reciprocals, but limits the powers of marine insurance reciprocals.

Section 4) Director to establish, thru regulation, the type of marine insurance a reciprocal may provide.

Section 5) Director to establish the surplus requirements of marine reciprocals insurers.

Section 6) Director may provide technical and financial assistance for the establishment of marine insurance reciprocals.

Director may assist with the necessary documentation, obtaining reinsurance, preparing rules and management procedures, financing the formation expenses, and management of reciprocals.

Section 7) Policies of a marine insurance reciprocal are non assessable.

Section 8) exempts marine insurance reciprocals from the provisions of the Guarantee Act

Section 9) further clarification of reciprocals exemption from the Guarantee Act

Section 10) Immediate effective date.

Dr. Dennis Nixon is Chairman of the University of Rhode Island's graduate Marine Affairs program.

Safety Conference Pinpoints Problems

Solutions more elusive

by Clark Miller

An impressive array of information was presented at last month's 1984 Fishing Industry Health and Safety Conference. For two days the experts told fishermen the causes, economics and preventives for everything from drug abuse and lower back pain to fires and instability. But when the dust had settled, it was clear that safety information had been of secondary importance. What had really taken place was a summit conference in response to the insurance crisis.

Vessel owners, naval architects, government officials and insurance executives met together December 12-13 at Seattle's Westin Hotel. They faced two questions: Who is responsible and what role can regulation play in a solution? Each group stated its case, questioned the other three and declared what it wanted from them. The value of the conference lay not in what it settled—it settled nothing—but in what it stirred up.

Certain moments stand out as representative of what took place. When panelist Anthony V. Raia, a San Francisco insurance executive, was asked by a marine engineer why the insurance industry won't set design standards for the vessels it insures, Raia said it was because insurance men don't know anything about boat design. (Raia seemed an ironically appropriate choice for the panel; he himself has never insured a fishing boat—he said he can't figure out how to make a profit doing so.)

The insurance industry must rely on marine architects to evaluate vessels, said naval architect Jonathan Parrott. The problem is that no one evaluates the architects. Vessel surveys vary widely, and often the bad news costs more.

This was illustrated by naval architect George Nickum. He recalled that when his office used to survey tuna boats, one in four was found unsafe. Approval, for instance, might hinge on removing one or two tanks. Instead of following the advice, the owner would go south for a new survey and a new insurance company.

And so, as the day wore on, the big red ball—responsibility—bounced around the ballroom, from fishermen to architects to insurance men to the Coast Guard and back to fishermen. Somehow it always bounced back to the fishermen, to their chagrin and fury. Bart Eaton, captain of the F/V *Amatuli*, wondered who is responsible when the Alaska Department of Fish and Game sends boats out of Dutch Harbor in 80 mph winds for a 24-hour opening? Only the fisherman?

And the big blue ball—regulation—bounced along behind the red one. No one noticed it at first, since an axiom of most discussion of the insurance crisis is that "burdensome regulations" must be avoided. And yet fishermen and others were soon heard requesting certification of skippers, mandatory training of crews, regulation of the marine insurance industry, legislative changes in the legal status of fishermen, and insurance industry regulations on vessel design.

Dr. Dennis Nixon set the stage. Chairman of the University of Rhode Island's graduate program of marine affairs, he is author of *A Commercial Fisherman's Guide to Marine Insurance and Law.* Addressing the first day's luncheon, he suggested that the root of the insurance crisis is twofold: a terrible safety record for which the fishing industry must take responsibility, even though it has been forced to take chances by many outside forces; and a legal system that leaves vessel owners unjustly vulnerable to liability.

Regarding safety, Nixon said 44 of 242 vessels lost in 1983 were in Alaska, and that 95% were the result of human error. The pressure factors? Hasty conversions, short seasons, large mortgages and lousy fishing. Two other less obvious factors include the concept of "agreed value" of the vessel, which Nixon said has been handled too casually between owners and surveyors (Is a vessel worth what it cost to build, or what it will now bring on the market?)

The other factor is the insurance industry's traditional indifference to marine safety standards. Since marine insurance is unregulated, any company that tries to set such standards risks being buried by the competition. So the insurance industry has treated all fishermen as equal risks. After all, as Raia pointed out, marine insurance accounts for only 1% of the premiums paid in the U.S. "It's not a serious matter for us," he said.

Regarding the legal system, Nixon flatly stated that the combination of the Jones Act and the unseaworthiness remedy has made it impossible to defend a personal injury case. The Jones Act allows a seaman to sue his employer for compensatory damages if he can prove negligence, *including negligence of other crewmembers.* The doctrine of unseaworthiness enables an injured seaman to recover against the vessel if his injury was caused by an unseaworthy condition of the vessel, its equipment or crew, *whether or not the condition was caused by the negligence of the owner.*

Nixon sees bringing fishermen under workman's compensation laws as the answer. Meanwhile, he thinks the crisis can be alleviated by more insurance pools; higher deductibles and lower agreed value; increased vigilance by owners in picking brokers (ask to see their "errors and omissions" policy) and insurance companies; a new interest in safety by the insurance industry; and a new attitude among insurance companies of suspicion toward every claim.

During the ensuing panel discussion, Raia said his company had taken in $16 million in premiums for hull insurance, while paying out $34 million. He said the mathematics are simple: The West Coast fleet is worth $1 billion, losses are $40 million a year, so the insurance industry needs a minimum of 4% a year to break even. He said the only offer to interest him lately comes from an owner with a wholly-owned fleet; the owner has offered to insure 15% himself, and wants only total loss insurance.

Back-up Information

jackets

level for fishermen is extra-

tion.

Dave Campbell of the Seattle Fire Department observed that fishermen usually respond to a fire by preparing to abandon ship, rather than fighting the fire. Given the technology and

slides to show how the physical tasks in fishing attack the back and how to get relief.

When introducing the conference—what he called a "three-ring circus" of safety subjects—moderator John Sabella, asso-

Seattle attorney Doug Fryer said owners used to consider an accident the broker's problem, but not anymore. The smart owner probes the financial health of the companies behind the broker. Fryer had two pieces of advice: Make sure your broker is aware of the full extent of your operation. Pay the maintenance and cure for an injured seaman on time, up front, regardless of circumstances.

More advice came from San Francisco broker Boyd Crosby: Request the names of your broker's companies, make sure they are rated by *Best's Aggregates and Averages*; an industry rating source (U.S.-based companies only), and get an annual report. Spread your risk by limiting the amount insured by any one company to 5-10%. An insolvent insurance company is like a liferaft that doesn't inflate. If it fails, you're last holding the bag.

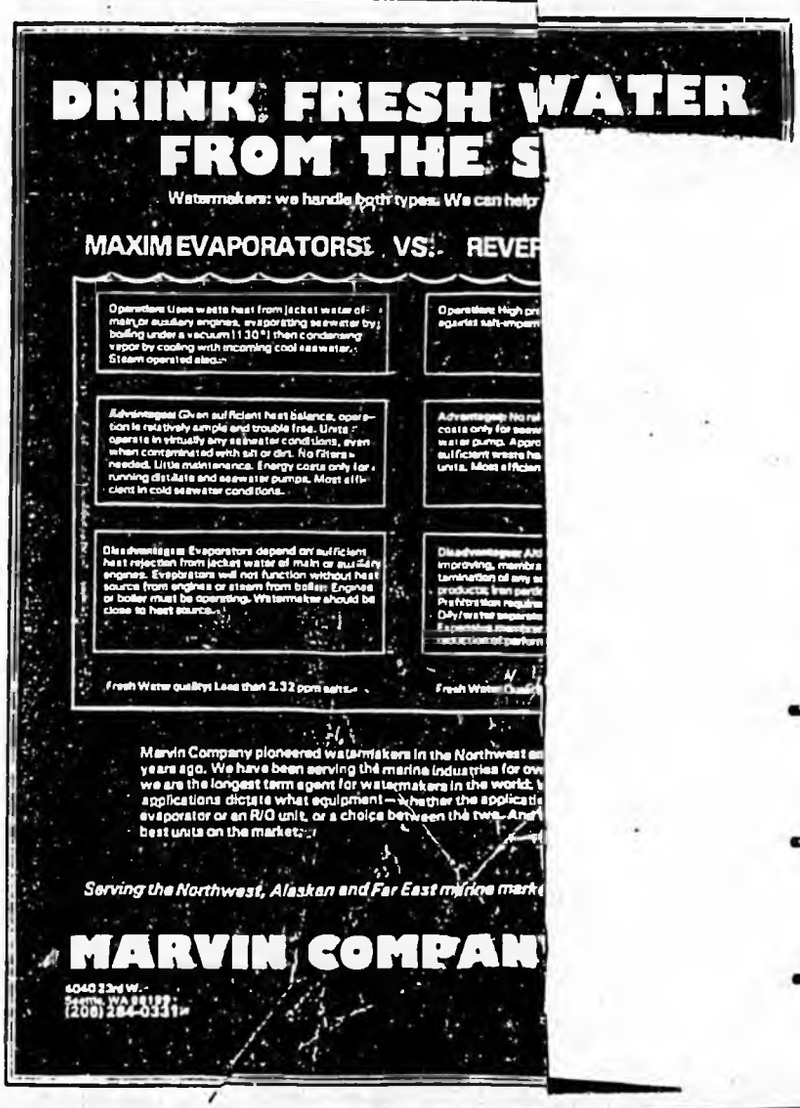
Washington state deputy insurance commissioner Bob Higley predicted that many marine insurance companies will soon go under. He said they got rid of their "true underwriters" a few years ago, when high interest rates made it smart to insure anyone with cash. The insurers could invest and reap rich rewards despite the inevitable claims. Now that rates are down, it is once again a matter of measuring risk. Furthermore, Higley warned that there is no protection against illegitimate companies in an unregulated industry. He feels it is time to set minimum standards.

Seattle attorney Paul Pollak and Rod Moore of Representative Don Young's staff both took shots at Nixon's proposal to get fishermen under some sort of federal compensation law. Pollak favors licensing and training for masters and crew, as done by many other countries, in order to improve safety, but fears that vessel regulations would change the nature of the business, forcing out the small operator. Fryer added that the Coast Guard does not want more work anyway—its budget is shrinking.

At the end of the day two impressions lingered. First, fishermen need to buy insurance much worse than insurers need to sell it. Second, fisherman would like the insurance industry to impose safety standards, but the insurers have no interest in doing so—they see no way to do so successfully.

The second day, the stresses boiled over between fishermen and another group of professionals—the naval architects. (Best one-liner of the conference, told after a Coast Guard safety expert had reported on recent testing of garment ensembles in rough seas: "Next time," said the fisherman, "test the buoyancy of naval architects in rough seas.")

The morning panel on stability got off to a lively start when moderator Bruce Adee, head of the University of Washington's Fishing Vessel Safety Center, apologized for having failed to locate a fisherman willing to be on the panel. Tom Casey, a fisherman who now represents Wesmar Marine Electronics, manufacturer of the SC44 stability computer, shot to his feet, declared that he had been denied a place on the panel, and then asked why naval architects as a whole have failed to eliminate capsizings. (Later, another fisherman, Barry Fisher, stated that he and other fishermen had also been turned down.)



Adee asked Nickum, who played a role in the creation of the widely used International Maritime Organization (IMO) stability guidelines, to explain how they came about. Nickum said that until 1960, when the impetus began for new standards, the "wind heel method" had been used by the Coast Guard to prove intact stability of passenger vessels (the angle of heel could not exceed 14° or 1/2 of freeboard in a 60 knot broadside wind).

Then a Finn named Rahola, working on his doctoral thesis, tracked down data on ten capsized Baltic coasters (all allegedly sunk without operator error) and compared the data with that of successful Baltic coasters. He deduced several parameters for stability, including that the righting arm could not be less than eight inches and that the maximum righting energy should occur at not less than 30°.

Nickum was part of the international effort to substantiate the "Rahola Principle." All the countries involved except the U.S. had data available on their fleets. For three years, eighty vessels were studied, the lion's share of the tabulating being done by hundreds of Russian graduate students at the University of Kaliningrad. (Nickum said the Russian education system

Virtually every manufacturer of safety and survival equipment was represented at the 1984 Fishing Industry Health and Safety Conference.

includes many naval engineering departments, any one of which turns out more naval architects and engineers in a year than does our whole country.)

Thus was born the IMO standards. Nickum knows of only one vessel that capsized after passing them. Adee knows of none. "Most were grossly under," he said. Nickum hastened to add that stability is not enough for true safety. He faulted naval architects for designing vessels that don't have water-tight houses and yet are documented as sound. The threat of downflooding can negate perfect stability.

The problem with IMO standards is that they are designed for large vessels, 79 feet or more. Adee said smaller boats need to have even higher parameters, as well as better operators.

Regarding the "constant trim method," a substitute stability guide, Nickum said it is no good for broad stern vessels.

As for the new generation of large, multi-tanked vessels, Adee said the complex assortment of tanking conditions makes applying any stability standards difficult.

Nickum said he would like to see strict application of IMO standards to all conversions and new boats, and strict concurrence with all conditions by the operators. He has participated twice in failed efforts to get underwriters to set up a small central agency to review the work of naval architects.

Parrott urged the adoption of a uniform standard for the *stability book*, saying that currently there is a wide range of response to any given vessel.

Naval architect Jacob Fisker-Anderson stated flatly that he has never seen a conversion that improved stability—always the reverse.

Someone asked if a stability computer was the solution, but the panel seemed inclined to avoid the question until Casey said Adee only gets cold water when he drinks it, while fishermen are drowning in it. Parrott quipped, "Spoken like a true salesman," and then the panel voiced its concerns about the Wesmar SC44 stability computer.

Fisker-Anderson said the SC44 measures GM, the distance between the center of gravity and the metacentric point (the point where buoyancy meets the vessels center line). The higher the GM, the more stability and less comfort. But GM must be seen in context—the more freeboard you have, the less important GM becomes.

Parrott said the SC44's program includes the vessel's "rolling constant," or normal roll period, but that in reality the rolling constant is not constant. It varies according to the loading condition. Although no one said so, it would appear that the ideal computer would have a different program for each of its basic loading conditions.

Changing the subject, someone asked Fisker-Anderson if the Coast Guard's "simplified stability test," which is used on small passenger vessels, is applicable to fishing vessels. He said no, fishing vessels vary too much from each other; there aren't enough common denominators. Also, there isn't a large enough data base on small vessels to make a simplified test for fishing vessels.

Nickum suggested the use of water-flume stabilizers for crab boats. They decrease roll by constantly transferring water in the opposite direction of the roll.

Regarding weight gain, Parrott said all vessels put on weight, that studies show that the average new vessel gains 10% of its weight in the new first year. Fisker-Anderson said a deadweight survey should be done at the end of the first year ("It's a cheap form of insurance," he said.)

Regarding the role of the seaway in capsizings, Adee said he has not been able to capsize his model in head, quarter-head or beam seas (however, his model doesn't hold water on deck—water on deck with beam seas can be deadly), but that following and quarter-following seas are killers. His advice for operators about to capsize: Cut power completely; then turn *slowly* into the waves; then investigate.

Regarding draft marks, Fisker-Anderson said all ships should have them, no matter how small. Parrott said one fishing vessel in ten has accurate draft marks.

As the sequence of all these remarks suggests, it was difficult to focus on the issue of stability. Understanding and solving the problem involves filling major information gaps. Skipper Bart Eaton drew applause when he asked why the Coast Guard only investigates major fatalities. Why not talk to the survivors of the near misses? He would like to see a sort of no-fault accident report—"Nobody learns anything when the attorneys zip the lips," he said.

Fishermen Eaton, Fisher and Dean Adams (longliner, F/V *Quest*) composed the final panel of the conference. After listening for two days, this was the fisherman's chance to express himself, and the panelists let fly, racing the clock to disburden themselves.

Eaton said he uses a chain of command, a daily checklist of procedures, and informal psychological testing of prospective crewmen to increase safety. ("Time moves pretty fast when the world starts coming apart," he said.) He uses a private detective to investigate suspicious claims; and he signs crewmen on and off, to reduce his liability.

Fisher said he is going to try a new employee contract, something he can use in court if necessary. The prospective crewman will have the chance to inspect the vessel for safety, review the stability book, and question the qualifications of the skipper. He will know what is

Joe Upton

The author at age 3 before "the test."

IN I jumped. "Oogh!, oogh, oogh, oogh!"

I gasped for breath. The water was so much colder than I thought it would be. I struck out in the fastest dog paddle Southeast has ever seen, making sounds like a sea lion pup.

Half-way through I still had not taken a breath. I knew I couldn't go any farther. I was ready to get out.

"Hey Jasona! What are you doing? You're almost there. Take a deep breath, just relax, there you go, you can finish, come on you can do it." My forever confident father.

I did finish. I climbed onto the float shivering and gasping but completely happy and life-jacketless.

That was two summers ago. This winter I have noticed that my sister and father have been making quite a few mysterious night-time trips to the White Rock swimming pool. All I can say is, "Good luck, Sis." □

SAFETY

continued from page 10

expected from him, and will sign that the vessel is seaworthy.

From now on, Fisher's winter crew in Alaska will be required to wear work suits that provide some buoyancy and warmth. The suits will be purchased new each year by the boat. Also, Fisher would like to see certification of skippers and more participation by the insurance industry in safety.

As the conference ended, a local broker sounded a hopeful note when he said the insurance industry needs the help of fishermen in learning what a good risk is and how to evaluate it. Conference organizer Barry Collier of the Fishing Vessels Owners Association, one of several sponsoring organizations, reminded the audience that this was simply the first step in a major effort to turn things around, and the meeting was adjourned. □

Insurance crisis: Fishing in rough seas

2/14/86

Cancellations increase risks for fishermen

By KIRK McALLISTER
THE JUNEAU EMPIRE

Commercial fishermen Russ Barton got a surprise in the middle of the salmon season last year.

A week before the insurance on his 36-foot boat was supposed to be renewed, the company canceled his policy and he was unable to find another company to provide coverage.

Barton has been fishing out of Juneau for 22 years as a gillnetter, troller and longliner. He also fishes for herring and dungeness crab. He has versatility, experience and has made only two claims on his insurance since he began fishing.

But now he can't get insurance. And he isn't alone.

Jack Cadigan, executive director of the United Fishermen of Alaska, said as many as 50 percent of the commercial fishing vessels operating in Alaska may end up without insurance.

That could cause a variety of problems. It could mean many commercial fishermen will operate in the unpredictable waters off Alaska with no protection against loss. Banks and the state could end up in an odd situation, too, since insurance is a standard requirement for most boat loans and fishermen who operate without insurance are technically not complying with the terms of loan and could be subject to foreclosure.

"It's a dangerous situation," Cadigan said. "It could get to the point where someone could be denied their livelihood and the bank end up with a boat they can't sell. Or the increased cost of insurance could mean his overhead is so high he can't make his boat payments or he has to skip engine maintenance or repairs, which means safety could be affected."

In short, it will make a risky business even riskier. Commercial fishing is the most dangerous occupation in the country, with a death rate seven times the national average, according to a recent U.S. Coast Guard study.

That study revealed that 200 fishing vessels a year were lost in U.S. waters between 1970 and 1983 and an additional 9,500 vessels were damaged at sea. There were 7,000 deaths associated with these accidents.

As a high-risk business, commercial fishing was a natural victim when the insurance industry began experiencing hard times last year. The number of companies writing marine coverage in Alaska dropped from more than 30 to less than five.

Because of financial losses the insurance industry no longer has the capacity to cover the demand for policies. Because of that some commercial fishermen are caught in the squeeze.

"These days if you say commercial fisherman to an insurer they start to wince immediately," Cadigan said. "There's no denying there's a inherent danger in the (fishing) industry and the insurance industry is worried about their exposure to risk. Besides the numbers are small – the whole state of Alaska equates to a suburb of L.A. as far as the insurance companies are concerned."

Difficulties with getting insurance for a commercial fishing vessel, however, depends on the age and kind of boat.

Mike Miller, president of Northern Marine Insurance Inc. of Juneau, the only specialist and largest marine insurer in the state, said there are "problem classes" of boats that are getting tough to insure. These include boats that are over 10 years old, have wooden hulls, or have had previous claims. Large crab boats and trawlers that operate in dangerous areas such as the Bering Sea have also been difficult to insure. Less than half of boats in the problem classes are able to get insurance.

Miller said his company insures between 1,000 and 1,500 commercial fishing vessels. Most are "mom and pop" owner-operated seine, gillnet and troll vessels. Insurance premiums for those boats have increased an average of 30 percent, but rates are expected to level off this year, he said.

"I'd say insurance for fishing vessels is a problem but not a catastrophe," Miller said. "If you're not in one of the problem classes there you should be able to get insurance but if you have a problem boat, you have serious problems."

Fisherman Russ Bartoo: Insurance problems spread through industry.

'These days if you say commercial fisherman to an insurer they start to wince immediately.'

—Jack Cadigan, executive director of the United Fishermen of Alaska

Possible solutions: To ease the insurance crunch, a proposal to allow formation of insurance "pools," in which groups of fishermen band together to insure themselves, has been introduced in the Alaska Legislature.

Pools have been used successfully in Washington state for many years and have included some Alaska boats in their membership. They are not, however, currently allowed under Alaska law.

Sen. Fred Zharoff, D-Kodiak, said something must be done to ease the insurance crunch. He said he was looking into the possibility of allowing pools or other forms of self-insurance and encouraging safety programs for the fishing industry.

"This (the insurance problem) is adding to the operating burden of many fishermen," Zharoff said. "People have got to be able to fish to make their boat payments. These vessels need to get out and work and harvest the resource. If the insurance industry sees an effort by the fishing industry to be safer then it should ease the situation."

John George, director of the state Division of Insurance, said several insurance brokers are interested in managing or administering insurance pools for fishermen.

In addition, there is an insurance company (George declined to reveal the name of the firm) that has recently said it is willing to commit a substantial amount of money to fishing boat insurance in Alaska. The company is not interested in large crab boats or trawlers but wants to specialize in providing insurance to seiners, gillnetters and trollers.

George said the company wants to combine information on the safest kind of boats to insure with information on who are the safe operators among fishermen and therefore the best risks.

"This underwriter is looking for superior risks in terms of boats and people, George said. "Their attitude is that a good guy in a bad boat is better than a bad guy in a good boat. It's a good sign but it may not be the answer for everybody. This company is going to skim the cream in terms of risk leaving the skim milk left over."

In addition to private company interest, the state has been watching the fishing insurance problem closely since commercial fishing is a major industry in Alaska and the state is involved with financing boat loans.

George said one action that could be taken is encouraging the formation of "reciprocal insurance companies" by groups of fishermen. Like pools, reciprocal companies are groups of people that insure each other, but unlike pools, the reciprocals are subject state regulations and oversight.

A Senate Advisory Council report on marine insurance suggests that the director of the Division of Insurance could set up regulations governing reciprocals for fishermen, including deciding how much money would be required to begin and maintain coverage for members.

Other possibilities include state grants or federal and state loan guarantees to help get insurance groups started for fishermen. Currently, reciprocal companies insure workers in the timber industry and rural electrical workers.

While several options are open to ease the problem, just about everyone agrees safety in the fishing industry needs to be improved.

"If someone is forced out of commercial fishing because they can't get insurance, maybe that's not necessarily bad," said insurance director George. "If the bad risks are eliminated, it helps the overall safety situation. It could save a fisherman's or a crewman's life."

The Senate Advisory Council report agrees with that assessment.

"The fundamental problem is not the cost or unavailability of insurance," the report said. "Rather it is the poor safety record of the fishing industry which has produced an unacceptably high loss of human life and financial investment."

9/24/85

Anchorage Dai

Trouble snags fishing industry co

By KEN FRANCKLING
United Press International

GLOUCESTER, Mass. — Nino Brancaleone's 90-foot stern trawler, the Sacred Heart, sat in port one summer day while he made a top-to-bottom crew change that he gambled will keep him in business.

When his $600,000, 5-year-old blue-and-white trawler came in that morning, each crewman had collected $700 for 10 days at sea — about half of the average pay on a "decent" voyage for one of Gloucester's bigger boats. The Sacred Heart lost $400 on the trip, not even meeting its expenses.

That afternoon, Brancaleone laid off his regular Gloucester crew. He brought in a new "go-getter" skipper and crew from Portland, Maine, that took the Sacred Heart out to a different fishing ground, trying different methods they felt might reap a profit from the sea.

"We've got to try something. It's not worth staying in business, but we're hanging in there," Brancaleone said. "Two years ago, it was good here. We were paying the bills."

Brancaleone is known as one of Gloucester's most successful fishermen. As his fellow Sicilians in this historic seaport put it, Brancaleone has been a fisherman for so long — 41 years — he has fish blood coursing through his veins.

And he is worried.

Passage of the 200-mile limit that denied foreign fleets unlimited access to U.S. waters beginning in 1977 did not bring the bonanza that New England fishermen expected.

Catches are down and the industry has been brought to its knees by unprecedented import competition from Canada, an adverse international boundary decision, and a marine insurance crisis.

These woes extend far beyond the once-bountiful waters plied for more than 350 years by the hardy, independent New England fishermen.

From New England's scallopers and groundfishermen to shrimpers in the Gulf of Mexico, from the southern California tuna fleet to Alaska's king crabbers, the commercial fishing industry — America's first industry — is in deep trouble.

• The $488 million shrimp industry, occupying most of the 30,000-man commercial fishing fleet in the Gulf of Mexico and South Atlantic, is hurt by foreign competition that provided 71 percent of U.S. consumption last year.

• On all coasts, the insurance industry has been hit so hard by losses from a rash of sinking and huge crew injury awards that very few companies will write marine insurance any more. Costs have doubled and tripled for boat owners, if and when they can find coverage.

"It's very critical. They've been hit tremendously hard. It's not so much a question of rates; it's a question of whether they can get the insurance or not," said Kell Freeman of the National Marine Fisheries Service in St. Petersburg, Fla.

• In Alaska, the king crab industry is in a state of collapse because of overfishing and environmental factors. Multimillion dollar crab boats, 90-to 120-feet long, sit in port. Six others sank in the Bering Sea within one month early last year.

• Southern California's tuna fleet is in sad shape even though the fish are plentiful. Because three out of the four U.S. canneries have shut down, the 75-boat fleet was forced to unload much of its catch in Guam and Puerto Rico.

• Foreclosures in the salmon industry have hurt the new insurance market in the north Pacific, while the fishery itself has bounced back to what could be a banner season for the fleet off California, Oregon and Washington.

"We do have an industry in trouble," says Allen E. Peterson Jr., director of the National Marine Fisheries Service's Northeast Center in Woods Hole, Mass.

"In all likelihood, it is falling on tough times and will continue to for the near future. The strength of the dollar makes it harder to sell our product overseas, and makes it easier to import.

Ironically, the myriad problems come at a time when Americans are being encouraged by doctors to eat more seafood.

Eating fish has been known to be good for your health ever since Eskimos were found to suffer almost no heart disease, even though they ate large amounts of seal and whale blubber, which is high in saturated fat.

In Gloucester and other New England ports, fishermen are surviving only by fishing harder, taking new financial risks, changing techiques and species they fish for, or by pure luck.

"I don't know how we're going to make it," Brancaleone said. "The Russians are gone. The Germans are gone, but the fish are gone with them."

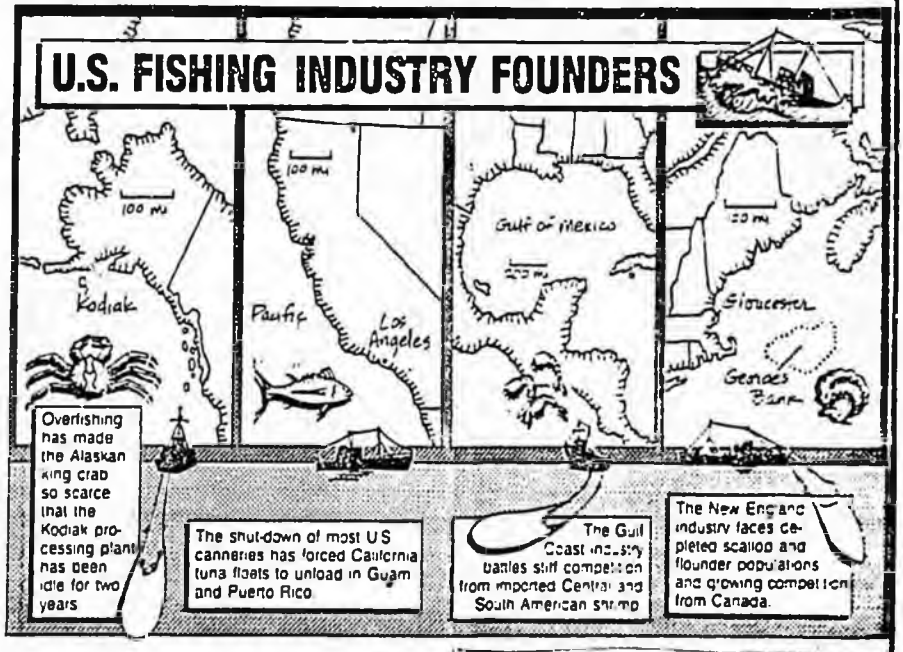
On top of his mortgage for the Sacred Heart, Brancaleone pays $54,000 a year in marine insurance. Without it, he cannot risk leaving the dock.

Nearly all companies have stopped insuring commercial fishing boats and write no new insurance in Gloucester, where 40 of the fleet's 200 boats have sunk since 1980. Many sank in suspiciously calm waters, without loss of life or serious injury. There was usually a friend or relative fishing nearby who was able to rescue the crew.

"Now, the insurance you can get is twice as expenseive and covers less. You must have hull insurance in order to get loans. It's a pretty tough problem," said Dennis W. Nixon, coordinator of the University of Rhode Island's Marine Affairs Program.

Nixon is an expert on the marine insurance problem and is studying possible options for Congress to overhaul the system.

"I'm not going to say all of the sinkings were deliberate," Nixon said. "Vessel maintenance is often at the bottom of the list of things to do."



Those who continue to fish are trying to make the best of a bad situation.

"This is a business. It is no longer a romanticism of the ocean. Some pretty damn high investment is going into it," says James Costakes, general manager of the New Bed-

United Press International

Nino Brancaleone says the 200-mile limit has not been the godsend he expected.

ast to coast

ford, Mass., Seafood Producers Association.

A lot of those dollars come from a product known as New Bedford gold — scallops. Scallops and yellowtail flounder are the dominant catches for New Bedford's 250-boat fleet.

Both species are in trouble. There is not enough fish coming in to supply New Bedford's 22 processing plants, so the processors are dependent more and more on fish trucked in from Canada to keep their operations open. Five plants closed in the past year.

"In the bonanza years, a guy on deck could make $50,000 to $60,000 (a year). Now, on an excellent vessel, you'd be lucky to make $30,000 to $35,000, and you're spending a lot more time out to sea to get that," said Costakes, a fisherman himself for 30 years.

When the 200-mile limit took effect eight years ago, the United States made its claim to the offshore fisheries that would no longer be plied helter-skelter by huge foreign factory fleets.

Vessel construction increased 70 percent in one year as old wooden boats were scrapped in favor of larger, steel-hulled trawlers. The New England fleet mushroomed from 590 boats in 1976 to 892 by 1981.

As the foreign catch dropped by roughly 25 percent in the year after the 200-mile limit was imposed, the domestic catch rose by 16 percent. But biologists worried whether the fleet increase and improved technologies would in effect deplete the fishery. Experts now disagree about whether that happened, or whether the current downturn in stocks is just a natural, cyclical event.

New England's fishermen, stung but unable to reverse the decline, are going after what they see as man-made problems — boundary disputes and outside competition for the lucrative fresh fish market they have traditionally supplied.

Last October, the World Court ended a simmering border dispute between the United States and Canada by dividing the North Atlantic fishing grounds on Georges Bank. The Americans wound up with the largest chunk, but Canada got the brass ring — the Northeast Peak, a spawning ground rich with lobster, scallops and haddock.

It was the last straw for U.S. fishermen already bitter about government subsidies that allow their Canadian counterparts to sell for less on the U.S. market. In some cases, Canadian fishermen can sell their fish for less than it costs U.S. boats to catch it.

This August, the North Atlantic Fisheries Task Force petitioned the federal government to impose a 10- to 20-percent tariff on imports of Canadian groundfish — including haddock, hake, cod, flounder, pollock and sole. They claim it will allow them to compete fairly with the Canada's fishermen.

Stephen Greene, assistant trade counselor at the Canadian Consulate in Boston, defends his country's subsidies as comparable to the U.S. bailout of Chrysler. He predicts the two governments will agree to mutual access to the fishing grounds sometime in the future.

Gulf Coast fishermen sympathize with import problems in the Northeast, and are offering financial support. Imports also account for the bulk of U.S. shrimp consumption, with most of it coming from Central and South America. Ecuador ranks No. 1 worldwide in shrimp production.

"A fair comparison might be with the textile or shoe industries in the United States," said Richard Raulerson, of the National Marine Fisheries Service in St. Petersburg, Fla. "You and I would rather buy cheap shoes and clothes instead of expensive shoes and clothes."

The U.S. fishing industry is not yet in the same state of decay as the shoe industry. But none of the fishermen or industry experts sees a short-term solution to the decline — and the long term is even more clouded. As Costakes of the producers' association puts it, "We've always had a 'survival of the fittest' philosophy. But it very hard to work under these conditions."

Most dangerous job: Commercial fishing

Death of son drives parents to campaign for safety

By DAVID FOSTER
The Associated Press

Robert and Peggy Barry knew little about the dangers of commercial fishing when their 20-year-old son, Peter, landed a summer job on a salmon boat off Alaska's coast.

Their first lesson was swift and unforgiving. On Aug. 20, word came that Peter's boat had sunk in the frigid waters off Kodiak Island. He and his five crewmates had perished.

The Barrys' grief was deep, but it turned to anger after Robert, a career diplomat based in Washington, D.C., did some research. Peter Barry had been an adventurous Yale student lured by the romance of a fisherman's life; his father was appalled to learn how easy it is to die a fisherman's death.

Coast Guard figures show an average of 250 U.S. fishing boats sink and 75 fishermen die off the nation's coast each year. Commercial fishing is by far the country's most dangerous industry, with a death rate seven times the national average of all industries, and twice that of mining, the second-most hazardous occupation.

Yet, in safety matters, the fishing industry is virtually unregulated.

"It is too late now to help Peter," Barry says. "But publicizing the danger of commercial fishing and imposing minimal regulations on it may help others to avoid his senseless death."

The Barrys have begun a crusade for safer fishing, lobbying congressmen, writing letters and articles. Along the way, they've encountered a government reluctant to impose new rules and an industry that, while opposing regulation, may yet work toward greater safety on the seas for another reason — economic survival in an age of skyrocketing insurance rates.

The stormy Alaska waters that claimed Peter Barry are infamous for dramatic sinkings — since 1981, an

Searchers find no sign of boat or its crewmen

The Associated Press

JUNEAU — In a six-hour flight over the stormy North Pacific, a Coast Guard search plane on Thursday failed to find survivors or debris from a fishing vessel believed to have sunk on Tuesday.

"But search conditions were pretty bad," Petty Officer Allen Sparks said in a telephone interview Thursday night.

The crew of the C-130 search plane spotted the vessel's emergency signal beacon again Thursday, but nothing else, Sparks said. He said the weather had been poor

Commercial fishermen earn their livelihood in the nation's most dangerous occupation

Continued from Page A-1

average of 72 boats a year have sunk in P[illegible] Northwest and Alaska waters, with 108 deaths during the same period.

But wherever fishermen work the open ocean, from New England's Georges Bank to the Gulf of Mexico, the death rate is similar.

"In Alaska, they usually lose the whole vessel with everyone aboard," says Capt. Gordon Piche, national chairman of a Coast Guard task force created last year to promote vessel safety. "In the Gulf, they have just as many people dying, but it's usually one at a time — a man may fall overboard or get wound up in a winch."

Despite the dangers, the Coast Guard does not inspect fishing boats for safety. The agency requires fire extinguishers and life preservers, but can only recommend that boats carry survival suits, life rafts, and emergency radio beacons, which help rescuers home in on a foundering ship.

Peter Barry's boat, the Western Sea, had little safety equipment, officials say. The 58-foot, wood-hulled seiner was built in 1915. It carried no life raft, and the crew wore only life preservers, even though survival suits covering the entire body are needed to last more than an hour in northern waters.

"Peter's death was avoidable because the boat he was on should never have been allowed to go to sea," Robert Barry says.

One reason for the lack of safety rules or inspection programs is the lack of enforcement money, Coast Guard officials say. The agency is scrambling just to maintain its current budget, never mind trying to add new programs.

Another reason is the belief that safety regulations create a false sense of security. "They take the responsibility away from the fishermen," Piche says. "We can try to legislate safety, but if fishermen become aware of safety, it will work better."

To that end, Piche's task force recently published a series of guidelines for vessel stability, radio and navigation equipment, fire protection, life-saving equipment, and shipboard wiring and machinery.

The task force is working with a group of Bering Sea fishermen to translate those technical bulletins into more understandable terms. A safety guide to be published next spring will be a model for guides in other fishing areas, Piche says.

Such guidelines, in the hands of insurance companies, may become the biggest lever yet in forcing the safety issue. Until now, insurance companies have had few ways to distinguish between a safe boat and a dangerous one. So all fishermen, prudent and reckless alike, have suffered with soaring insurance rates.

"They've lost a lot of credibility because of their safety record," Piche says.

Fishermen are quick to say it's not their fault the ocean is dangerous.

"So many things can happen out there. It doesn't matter what you know — anything can happen," says George Jones Jr., 21, a third-generation scallop fisherman out of New Bedford, Mass.

The sometimes-marginal economy of fishing often forces fishermen to take risks, says Jack Cadigan, executive director of the United Fishermen of Alaska. In the Bering Sea king crab fishery, he says, "it's an almost absolute necessity to pile up the boat with crab pots, which raises the center of gravity and makes it more likely to turn turtle. That's not going to be simply ended just by the addition of safety equipment."

People like Jones and Cadigan were well represented at congressional field hearings held this year in Seattle, Boston and San Diego. High insurance rates were their main complaint. No legislation has been introduced yet to help fishermen weather the insurance storm, but legislators are predicting some kind of bill by spring.

"We feel like we're getting somewhere," Piche says.

But not far or fast enough, Peggy Barry says. "They all seem to be interested in the insurance end of it, without being sufficiently interested in the safety end of it."

The Barrys still know little about how their son died. Bodies of three crew members have never been found. Only shattered fragments of the Western Sea have been recovered, making it look, as one Coast Guard official put it, "like somebody had just torn it apart."

The Barrys live with that image day and night, determined to help prevent more such tragedies. They say it's not enough to rely on high insurance rates to force compliance with safety guidelines.

"That would be fine if the vessels that didn't comply had a big red sign saying, 'Hey, watch out for us.' It's criminal neglect that a kid from Washington can go out to get a job and there's no way for him to know which boats are safe," Peggy Barry says.

Coast Guard search for boat, crewmen yields no trace

Continued from Page A-1

since the search started Tuesday, with 50-knot winds, 20-foot seas and half-mile visibility.

Coast Guard officials said early Thursday they believed the missing boat could be the Aleutian Harvester from Homer. A radio conversation between the vessel and another boat was broken suddenly Tuesday morning, and the Aleutian Harvester had not been heard from since, said Coast Guard spokesman Glenn Rosenholm.

The Aleutian Harvester, with three men aboard, was fishing in the area where the emergency signal was picked up, about 30 miles south of Unalaska, at the eastern end of the Aleutian Islands.

A C-130 crew Tuesday reported spotting a life raft and what appeared to be two bodies in the water. A nearby fishing boat, the Golden Alaska, recovered the life raft in howling winds and 20-foot seas, but was unable to confirm the report, Coast Guard spokesman Glenn Rosenholm said.

The Coast Guard was first alerted to the vessel's problems Tuesday morning, when a satellite picked up signals from a position-indicating rescue beacon. Searchers have spotted the beacon each day and have left it in the water to get an idea of where currents might have taken crew members or debris from the ship.

   b) CS adoption?

Department of Commerce & Economic Development / POSITION PAPER

SB 443: "An Act concerning the monthly reports of surplus lines insurance brokers."

This legislation requires that the monthly report required to be filed by surplus lines insurance brokers each month include loss information in addition to the premium information provided.

The surplus lines market is the nonadmitted market which, historically, has represented a substantial part of Alaska's market for a number of lines of insurance. Principal among these are aviation and marine coverages. Because such a large portion of these lines is placed in markets where the information about losses is almost nonexistent, it is difficult to attract markets when the loss data is unavailable. Placements in the surplus markets occur because there is not an admitted market willing or available to write particular coverages.

This market, since it is not subject to direct regulation, is a difficult one from which to draw information concerning underwriting results. What regulation exists is exercised through the licensee placing business in this market. This is true in all states.

While the information sought by this bill is desirable, it will be unverifiable by the division or by the surplus lines broker and, thus, unreliable. The surplus lines broker is at the mercy of the insurer for information about results. Nevertheless, it is better than no information at all. The value of this legislation is that it does send a message to the unregulated market that more data is wanted than is now available, and that attention is focusing on that market. For this reason, we support this legislation.

Department of Commerce & Economic Development / POSITION PAPER

SB 444: "An Act relating to civil actions; and amending Alaska Rules of Civil Procedure 49 and 58; and providing for an effective date."

This bill is focused on a variety of tort reforms. The position of the department on these issues is neutral.

This bill has an impact on the Division of Insurance. The division would be required to adopt regulations under this legislation to determine which insurers, self insurers, plans, or arrangements are financially qualified to provide security under the section dealing with security for payment of annuity, and to designate those entities as qualified insurers. This requires a fiscal impact and places the division in the position of making regulatory judgments concerning entities that it does not regulate. The entire expense can be avoided, as well as the conflict avoided, by using a slightly different approach to Sec. 09.30.480, which changes the fiscal impact to $0.

On Page 7, replace lines 9 - 14 with the following:

> Sec. 09.30.480. ELIGIBLE SECURITIES FOR PAYMENT OF ANNUITY. A governmental entity with taxing authority, or an insurer authorized under AS 21.09 by the Director of Insurance to sell annuities, is qualified to provide the security required under AS 09.30.430.

Loren H. Lounsbury, Commissioner
Department of Commerce and Economic Development

Re: Request for hearing SB 444, SB 445, and SCR 35

Dt: March 10, 1986

Attached is a file of background information on SB 444, SB 445, and SCR 35 relating to insurance. I'd appreciate your scheduling all three bills for a hearing before the Labor and Commerce Committee at your earliest convenience.

SB 445 proposes changes in requirements of how the insurance industry operates and provides for a multi-state reinsurance compact with other states.

SB 444 proposes three changes in torts, including a cap on non-economic awards, sliding scale for plaintiff's attorney fees and a periodic payment schedule.

SCR 35 is directed at the need for federal oversight of the insurance industry. The resolution requests the Governor to work with other states to get federal action and reconsideration of the current exemption from federal antitrust laws. The resolution also requests that the Governor look into establishing a state or multistate reinsurance pool.

Please contact me or my staff should you have any questions or need additional information.

RE: Omnibus Insurance Reform bills; SB 444, SB 445, and SCR 35.

DT: February 18, 1986

Today I introduced two bills and a resolution designed to provide Alaskans relief from the insurance crisis.

Many Alaskans are facing crises in cost and availability of general liability insurance. Municipalities, health care providers, architects, engineers,fishermen, truckers, and others from around the state are appealing to legislators to solve the problem.

There is no single or simple solution to the insurance crisis. That can only come about through a combination of state and federal administrative oversight and regulations, development of alternative insurance mechanisms, and changes in the torts. (A tort is a wrong against a person or thing. It is an injury or damage, for which civil action can be brought). In addition, the basic manner in which the insurance industry manages its resources and investments needs to be improved.

The legislation takes an omnibus approach: The bills offer a combination of proposals covering the rights of the insured, roles and duties of Alaska's Division of Insurance, and operation of the insurance industry in the state. The resolution is directed at broader issues of national concern.

SB 445 proposes a number of changes in the way Alaska regulates the insurance industry:

* The Division of Insurance is to hire an actuary. An actuary uses statistics to calculate risks and premiums for insurance. An Alaska based actuary would provide local data on industry

During Interim • 1024 W. 6th Avenue, Suite 204C • Anchorage, Alaska 99501 • (907) 278-3654

needs and fairness of insurance coverage

* A consumer advocate section is established in the Division of Insurance. Currently, the Division of Insurance provides consumer assistance on a time available basis. The advocate's responsiblity would be to represent the rights and interests of the insured during performance of the divisions duties

  The cost of the advocate section would be covered by licenses, fees, and taxes collected by the division from insurance companies operating in the state

* An arms-length relationship is required between the Division of Insurance and the Insurance industry

* Director of the Division of Insurance is to report on tort awards, status of market assistance plans, and data from insurers on their Alaska operations for 1975-1985

* The Division of Insurance is to provide a report by January 1987, on the status of Alaska's insurance problem and list of the division's needs to fulfill its duties

* Cancellation of insurance is prohibited except for nonpayment of premium

* 60 days prenotification is required in case of nonrenewal

* A hearing on rate filing increases of 25% or more must be conducted by the Division of Insurance

SB 444 proposes three changes in torts:

* A $500,000 cap is placed on non-economic awards for general liability cases

* A sliding scale is established for plaintiff's attorney fees

* Periodic payments are to be made to claimants over 10 years and a bond is required to guarantee that if a company goes out of business an award will still be paid

* * *

SCR 35 requests the Governor to work with the US Congress, the federal administration, and other states to:

* Eliminate the current insurance industry exemption from anti-trust laws, and

* Look into national regulation of the insurance industry

* Establish national and multistate reinsurance arrangements

In 1945 the US Congress exempted insurance companies from federal antitrust laws, therefore regulation of the insurance industry is left to the states. National and multinational corportions constitute the insurance industry. These conglomerates operate in a world wide arena. The national and multinational aspects of the insurance crisis need to be addressed by Congress and the federal administration.

This legislation is, of course, only part of the total effort required to resolve the insurance crisis. Bills pending in the Legislature would establish insurance pools for high risk insurance markets. Such pools need to be supplemented by joint efforts with other states for reinsurance. Reinsurance is used by a company to cover capital for policies written beyond its means. The reinsurance companies are backing away from the market and leaving national and local companies without the capital necessary to cover their costs. Multi-state or national reinsurance would provide insurance companies with protection against major losses that cannot be covered by the companies themselves.

FR: Senator Vic Fischer

RE: Sponsor Substitute to SB 445; establishing a Multi-state reinsurance compact.

DT: March 7, 1986

The sponsor substitute for SB 445 introduced today adds provisions for a multi-state reinsurance compact to the original bill that deals with the way Alaska regulates the insurance industry.

The compact would:

* establish an Interstate Reinsurance Commission, consisting of three resident members from each compacting state, as an agency and corporate body of each compacting state

* establish a reinsurance fund made up of money contributed to it by compacting states and premiums paid for reinsurance coverage

* require that a study be conducted on the need for insurance and reinsurance in the participating states, the resources for meeting the needs, and the long-range effects of the compact on the availability of insurance rates that are not excessive; study results would be used by the Commisison in determining who to provide reinsurance to.

* provide the Commission with authority to draft uniform legislation dealing with problems of insurance availability in the compacting states

Compacts between Alaska and other states are fairly common. The state is a member of interstate compacts for education, crime, public advocacy, radio active waste management, placement of children, and tax collection

The reinsurance compact would fill a major void in the current insurance situation and would complement other measures being considered by the legislature. Many companies

During Interim: 1024 W. 6th Avenue • Anchorage, Alaska 99501 • (907) 278-3654

operating locally have declined to renew insurance policies because they are unable to get reinsurance -- insurance bought to cover insurance transactions of the insurance companies.

In response to the problem of obtaining reinsurance, a few bills have been introduced in the House that would establish a state reinsurance pool. A problem with an independent Alaska pool is that the state may not have sufficient population and funds to support a reinsurance pool. However, if Alaska were to combine resources with other states, a state reinsurance program might be possible - and one of the major problems insureds are facing might be resolved.

With this addition, SSSB 445 proposes that:

* an actuary be hired by the Division of Insurance to calculate risks and premiums for the Alaska insurance market

* a public advocate section be established in the Division of Insurance to represent the rights and interests of the insuraed during performance of the divisions duties

* the Division of Insurance maintain an arms length relationship with the Industry

* the Division of Insurance report on the Alaska insurance market, the status of the problem, and the division's needs to fulfill its duties

* cancellation of insurance premiums be prohibited except for nonpayment of premiums

* 60 days notice be required before a policy is denied

* the Division of Insurance be required to conduct a hearing for rate filing increases of 25% or more

In February, I also introduced SB 444 that proposes three changes in the torts, and SCR 35 that addresses national and interstate solutions. When combined, these bills provide a comprehensive package directed at the major components of the insurance crisis.

Dear Senator Zharoff:

Senator Eliason's office called and informed me that the "55 and Alive" bill was recently introduced in your committee.

The American Association of Retired Persons, which represents over 20 million members nationally and 20,914 in the State of Alaska, heartily endorse passage of the legislation.

Anything you can do as chairman to pass this out of your committee with a "Do Pass" recommendation will be greatly appreciated.

Sincerely,

John E. Dapcevich
Chairman

OLDER ALASKANS COMMISSION

A Bill to be Entitled

An act to provide that any rates, rating schedules, or rating manuals for the liability, personal injury protection, and collision coverages of a motor vehicle insurance policy submitted to or filed with the Insurance Commissioner shall provide for an appropriate reduction in premium charges, determined by the individual insurer, as to such coverages when the principal operator on the covered vehicle is an insured 55 years of age and older for a three year period after successfully completing a motor vehicle accident prevention course approved by the Department of Motor Vehicles.

Be it Enacted by the Legislature of the State of

Section 1. Any rates, rating schedules, or rating manuals for the liability, personal injury protection, and collision coverages of a motor vehicle insurance policy submitted to or filed with the Insurance Commissioner shall provide for an appropriate reduction in premium charges as to such coverages when the principal operator on the covered vehicle is an insured 55 years of age and older for a three year period after successfully completing a motor vehicle accident prevention course approved by the Department of Motor Vehicles. Any discount used by an insurer shall be presumed appropriate unless credible data demonstrates otherwise.

Section 2. The premium reduction required by this section shall be effective for an insured for a three year period after successful completion of the approved course, except that the insurer may require, as a condition of providing and maintaining the discount, that the insured:

(a) Not be involved in an accident for which the insured is at fault;

(b) Not be convicted, plead guilty or nolo contendere to a moving traffic violation, or to a traffic related alcohol or narcotics offense; and

(c) Have maintained a driving record free of violations and liable accidents for a three year period prior to course completion;

Section 3. Upon successfully completing the approved course, each person shall be issued a certificate by the organization offering the course which shall be used to qualify for the premium discount required by this section.

Section 4. This section shall not apply in the event the approved course is taken as punishment specified by a court or other governmental entity resulting from a moving traffic violation.

Section 5, Each participant shall take an approved course every three years to continue to be eligible for the reduction in premiums.

Position Paper

Automobile Insurance Discount

The State Legislative Committee of the American Association of Retired Persons proposes that legislative steps be taken to reduce automobile insurance premiums for motor vehicle operators age 55 and older who complete a state-approved driver education course.

Rationale: Motor vehicle operators age 55 and older are a unique population and have specific physiological considerations and driving problems. How do these individuals compare with age brackets in safe driving practice and incidence of accidents?

In order to obtain an accurate picture it is not enough to consider only age and number of accidents, its necessary to factor in the annual number of miles driven per year. Research shows that the number of annual miles driven by motor vehicle operators begins to decline significantly after age 55. Therefore, an important consideration with regard to the safe driving practices and abilities of older persons is the criteria used to determine accident involvement statistics.

The record of the older driver is good when calculated on the basis of accidents per driver. When the same figures are examined on the basis of miles driven annually, a different picture emerges. This more significant and meaningful statistic highlights the urgent need for corrective measures to re-educate older drivers.

Because older persons drive fewer miles, corrections must be made for driving exposure. When this factor is included in accident involvement rates, and the involvement per exposure is determined, a U-shaped curve of accidents versus age results. Violation and accident rates per mile are higher for the youngest and oldest drivers and lower for those in the middle ranges. Although one can quibble over the exact placement of the curve, a general "U" configuration has emerged in every major study undertaken during the past 10 years.

The National Safety Council reports that when the number of miles driven is taken into account, drivers age 55 and over have a poorer accident record than drivers in their middle years.

The U. S. Department of Transportation identifies the older driver as being age 60 and older and in a group which requires special consideration in the development of driver improvement training procedures. The National Highway Safety Forecast points out that the older driver is adjudged at fault more than middle aged drivers, and due to the population age shifting currently underway in America, is perhaps one of the fastest growing highway safety problem areas.

Older drivers have problems when involved in driving situations requiring quick response, full vision and interaction with other drivers. Typical violations include failure to yield right-of-way, improper turning, incorrect lane changing, passing, and entering and leaving expressways.

The older driver learned to drive during the first forty years of this century, well before the advent of formal driver education programs in the public school systems. The older driver that has completed a formal driver training course is the exception rather than the rule.

These individuals may experience physical changes which affect driving abilities and attitudes. People age at different rates, so age alone is not a fair criterion for determining driving competence. There is no question, however, that driving ability can be affected by the aging process. The gradual failure of sensory acuity associated with aging reduces the quantity and accuracy of information capable of being processed. This reduces the ability of the individual to respond or react to his environment with the speed and judgment current traffic often requires.

Eighty-five to ninety percent of all sensory input needed to drive comes via the eye. Unfortunately, as one ages the need for more illumination increases, glare sensitivity rises, dark adaption lessens, and peripheral vision narrows. Hearing loss also presents problems for older drivers. It is also broadly accepted that as one ages muscles tend to weaken or atrophy.

Primary Objective: By passage of this legislation, will create an economic incentive for older drivers to take a driver improvement course and thereby improve their driving capabilities. This reduces their chances of accident and accident claim filings, and creates a safer driving environment for all . Notably, the proposed legislation brings this about without cost to the state.

The older driver earns the driver improvement discount by taking a positive, preventive step. This incentive discount is given in addition to any other marketing discounts, such as for non-smokers, seat-belt wearers, those reaching a certain age, etc.

The automobile insurance industry writes policies on accidents per age group, and thus considers older drivers to be a reduced risk because of the fewer miles that they drive. In fact, some insurance companies reduce premiums for drivers after age 55 or 65, much the same as they do for drivers after age 25. The issue is not whether some automobile insurance companies may or may not reduce rates for older drivers as a marketing tool. The primary issue is reducing accidents per mile involving drivers age 55 and older.

Action in other states: Legislation has been enacted in 16 states and the District of Columbia which require all automobile insurance companies conducting business in those states to provide a premium reduction to graduates of state-approved driver improvement courses. The list now includes:

State	Discount	Age	Effective Date
AR	Approp. 5-20%	55+	1981
CT	Approp. Min. 5%	62+	1983
DE	10% on liab. & personal injury protection	16+	1982
DC	Approp. 5-10%	55+	1985
FL	Approp. reduction	65+	1986
KY	Approp. reduction	55+	1984

State	Discount	Age	Effective Date
IL	Approp. 5-10%	55+	1982
LA	Approp. 5-10%	55+	1984
MN	Approp. reduction	65+	1985
ND	Approp. 8-10%	55+	1983
NY	Min. 10% on liability	16+	1981
OK	Approp. reduction	55+	1986
RI	Approp. reduction	55+	1984
TN	Approp. 8-10%	55+	1984
TX	10% of premium	16+	1974
VA	Approp. reduction	55+	1985
WY	Not less than 10% of premium	60+	1983

Many other state legislatures are considering this legislation. It is hoped that will add this legislation to its statutes.

CONCERNS AND RESPONSES REGARDING OLDER
DRIVER DISCOUNT LEGISLATION

Prepared by AARP's State Legislative Committee

A. CONCERN: Since statistics seem to show drivers age 55 and older among the safest on the road, what is the rationale for legislation that would encourage participation at a driver improvement course?

RESPONSE: The National Safety Council finds that drivers age 55 and older have a poorer accident record, considering the number of miles driven, than do drivers in their middle years. The U. S. Department of Transportation statistics agree: older drivers are at fault more frequently than middle age drivers in accidents and violations reported by law enforcement officials.

It is not enough to consider only age and the number of accidents. From this limited perspective one sees that drivers 55 and older make up 24% of the driving population, yet are involved in only 18% of the accidents. But when driving exposure is considered, measured by the number of miles driven, older drivers have a higher percentage of accidents than their population warrants. Violation and accident rates per mile is higher for the youngest and oldest drivers, and lower for those in the middle range.

Research shows that the aging processes that affect driving generally become significant when persons reach their fifties. The U. S. Department of Transportation recommends that special consideration be given to older drivers when driver improvement courses are developed.

B. CONCERN: Since a number of driver improvement courses already exist, why aren't older drivers enrolling?

RESPONSE: Older drivers do enroll in driver improvement courses, nationwide and here in . Many more will do so, however, when an economic incentive is available through legislative mandate. Experience in other states that have passed this type of legislation has shown that most people need an economic incentive to actively seek improvement of their driving skills. In of our neighboring states, experience with this legislation and of older drivers are now enrolling there. Should enact this bill, there will be accident claim reductions and fewer injuries and fatalities on our roads as well.

C. CONCERN: It seems that older drivers are being singled out for special consideration. Isn't this age discrimination? Why not allow drivers of all ages to participate in any mandated insurance incentive program?

RESPONSE: The American Association of Retired Persons is interested in resolving problems of older persons. However, if will pass legislation allowing discounts for all drivers attending driver improvement courses, we would not be opposed. We have been informed by numerous insurance companies and insurance trade associations that they are against legislation involving the younger driver. In fact they have fought against including drivers below age 55 in many states where legislation has been enacted for drivers age 55 and over. This legislation does not establish a special category of drivers in any discriminating sense. It simply recognizes an area of need and provides an incentive to help older drivers and the insurance industry reduce accidents and accident claims.

D. CONCERN: Many automobile insurance companies already offer discounts for older drivers based on accidents per age group. Would this legislation jeopardize these discounts?

RESPONSE:

Sixteen states and the District of Columbia have already enacted similar legislation. The discount provided to graduates of approved driver improvement courses is the last discount applied. The automobile insurance industry writes policies on accidents per age group and thus considers older drivers a good risk, due to the fewer miles that they drive. In fact, some insurance companies reduce premiums for drivers after age 55 or 65, much the same as they do for drivers after age 25.

The goal of mandated legislation, however, is to provide an incentive discount on automobile insurance premiums that encourages older drivers to take a driver improvement course and to reduce the chances of accidents and claim filings. The driver earns the discount by taking a positive prevention step, unrelated to any other discount.

The discount given graduates of approved driver education courses is given in addition to any other marketing discounts provided to non smokers, seat belt wearers, those reaching a certain age, etc. None of these marketing discounts was dropped when states mandated this legislation.

E. CONCERN: Would drivers not involved in driver improvement courses have to subsidize the discount provided to those who complete one of the approved courses by paying higher premiums?

RESPONSE: This has not been the case in the other mandated states. In Texas where the insurance discount has been in effect for 10 years, the phrase used by insurance companies is that the discount is "fully earned". Although most states recently enacted this legislation, it is our belief that time will show a accident and violation reduction. The insurance companies will save money due

to fewer accident claim filings. As a consequence drivers not participating in the mandated insurance driver improvement program will not pay a higher premium, but will be encouraged by their insurance companies to enroll in a driver improvement course.

F. CONCERN: Why must the word mandated to be included in the language? Can't the language be changed to allow voluntary participation?

RESPONSE: Any company may provide a voluntary discount at present. Unfortunately, few have chosen to do so. If all are required to participate, insurance companies have said that they would go along.

G. CONCERN: The legislation includes the term "appropriate reduction" and contains a retake feature. What does this mean?

RESPONSE: The term "appropriate reduction" would allow competition within the insurance industry of to set the reduction percentage. In other words, if the bill becomes law, no one would dictate the terms of an "appropriate reduction" to the state's insurance industry. Each company in the state would set its own discount rate and be able to raise or lower the percentage each year based on the accident claims experience of policyholders that graduate from approve driver improvement courses.

Experience in other states with similar legislation has demonstrated the competitiveness of this feature. Companies have selectively increased refresher course discounts as a marketing tool to attract new clients.

The insurance trade associations also feel that any individual graduating from an approved course should retake an approved curriculum every two or three years. This keeps information current, and also refreshes the driver on necessary skills and techniques to remember.

H. CONCERN: What research is available to prove driver improvement courses work?

RESPONSE: Numerous studies have been conducted on the well known courses, and the results demonstrate effectiveness. It is worth noting that no state has rescinded this type of legislation, and to remember the 10 years' experience in Texas that finds discounts to be "fully earned".

The insurance industry, however, considers these evaluations to be limited tests that do not demonstrate 'statistical significance' in their accident or violation reduction findings. In order to

satisfy the insurance industry, and demonstrate 'statistical significance', an older driver course evaluation must involve 20,000-30,000 students, randomly assigned to a control group that doesn't take the course and a treatment group that completes the course. Both groups need to be followed for a period of time via questionnaires and a sample of Department of Motor Vehicle records must be accessed to validate self report forms. Financially and logistically, this has proved impossible for course developers. The insurance industry has not been willing to initiate a study of this size or to work with course developers.

I. CONCERN: Does AARP make money on its driver improvement course?

RESPONSE: No. AARP actually subsidizes approximately two-thirds of overall program costs, and charges each participant a minimal fee to offset the balance of expenses. Sponsors' purpose behind driver improvement courses, at least for the major well-known programs, is education rather than financial reward. But AARP is not in a position to speak conclusively for other organizations.

J. CONCERN: Why is it that several of the states which have passed this legislation have only a small percentage of eligible drivers participating to date?

RESPONSE: Although approved courses are widely publicized, they need help from the insurance companies to notify potential participants. Automobile insurance companies doing business in should be requested to notify their eligible policyholders that the discount can be obtained upon completion of an approved course.

K. CONCERN: How would the legislation be implemented?

RESPONSE: In the proposed legislation, an appropriate state agency is designated to select the courses that will be approved for the mandated insurance discount program. In most states the Department of Motor Vehicles has been selected. Program regulations and guidelines are usually drawn up in consultation with officials of states which have already passed similar legislation.

L. CONCERN: Will this legislation cost the state anything?

RESPONSE: There is no fiscal note for the state.

SB
463

Bill No. Senate Bill 463

Date March 18, 1986

Title "An Act imposing requirements on employers who hire nonresidents for employment in the state; and providing for an effective date."

Contact: Robert Bacolas
465-4870
Eileen Plate
465-2700

SB 463 would impose a variety of requirements on employers who hire nonresidents to work in Alaska.

Under the bill, employers who hire nonresidents to work in the state are required to certify to the Department of Labor within 20 days after the date of hire each o that the various requirements have been satisfied. The employer would also be required to file a report with the Department every six months, summarizing the information contained in the certifications of individual employees. Civil fines of up to $1,000 and other penalties are authorized for violation of the hiring requirements.

Because this bill raises significant legal and constitutional questions, we strongly recommend that a thorough legal analysis be done on the bill prior to any further consideration. In particular, we believe it is important to establish a factual foundation showing that nonresidents are causing or contributing to significant health and safety problems in the state. We are unaware of the availability of such information at the present time.

From an administrative standpoint, the Department of Labor would be required to monitor and audit the certifications and reports filed by employers. The Department would also be responsible for conducting any necessary enforcement for any violations found. Presumably the Department would also administer the surety bonding requirement contained in proposed Sec. 23.10.500(a)(4); however, the bill should be amended to expressly assign the bonding authority to the Commissioner of Labor. Finally, the Department would be required to adopt regulations to administer the provisions of the bill.

Because of the additional responsibilities which would be assumed by the Department of Labor, a fiscal note is attached.

APPROVED:

for Jim Robison, Commissioner
Department of Labor

FISCAL NOTE

CONTINUATION of FISCAL NOTE ANALYSIS

For Bill/Resolution No. SB 463

In order to implement the provisions of this bill the Department would need three additional Wage and Hour Investigator I's and a Clerk Typist III. The investigators would be located in Anchorage, Juneau, and Fairbanks. Specific duties and costs associated with these positions are on the attached New Position Request forms. Additional costs would be as follows:

$11,000	Communications
8,000	Printing & Advertising
18,000	Legal fees
$37,000	

The communication expense would be for long distance phone calls around the state to verify reports. Printing and advertising expense would be incurred when informing the public via television, radio, and posters of the requirements of the law. Legal fees are for the services of lawyers for hearings and appeals which may occur.

The following assumptions were made when preparing this fiscal note:

1. Employers will file reports for 65,000 to 70,000 nonresidents per year.
2. Extensive travel would be required to verify the accuracy of employer reports.
3. An effective date of 7/1/86.
4. Annual inflation of 4% for non-personal service items.

Position Title	No. of Positions	Range/Step	Barg. Unit	Gov.	Approv.	Disapp.

	Program Receipts	1028	
	CIP Receipts	1061	
	Other		

For B&M Use Only
Key Number __ __ - __ __ - __ __ - __ __ - __ __

Justification

These investigators would be responsible for enforcing the provisions of this bill. Specifically, they would verify that surety bonds were posted, audit certification reports to verify their accuracy, level fines when violations are found, and ensure the public has knowledge of the bill. Travel would be required to various employers for auditing and verification purposes. Contractual and commodity costs are average per-employee expenses. The equipment cost would be for desk, chairs, cabinets, etc., and would be a one-time item.

Justification

This position would handle the clerical functions as required in the bill. The position would process and maintain records of the certificates and the reports when received from employers. A log of surety bonds would be kept by this person. Typing of regulations and distribution of informational posters would also be duties. Contractual and commodity costs are average per-employee expenses. The equipment expense would be for a desk, chair, etc., and would be a one-time item.

SB 463: Sectional Analysis

Section 1) Adds new sections to AS23.10

23.10.500 DUTIES OF EMPLOYERS

When an employer hires a nonresident, the employer shall insure the following:

1) provide the employee with paid transportation from the work site in Alaska to his place of residence, and clothing and supplies adequate for protection of the employee.

2) provide troopers and police with a list of felony convictions of the employee for the last 20 years.

3) require the employee to have a certificate of good health prior to commencing work;

4) post a surety bond of $10,000 to be forfeited to the state if an employee brings a serious infectious or communicable disease or an employee with a prior felony conviction commits a felony in this state, while an employee of an employee of an employer.

5) require an employee to register his motor vehicle in the state;

6) require the employee to have an Alaskan Drivers license.

b) Employer to provide the employee with an orientation program to acquaint the employee with Alaska culture and environment.

c) An employer shall certify to DOL within 20 days after hiring a nonresident, that the requirements of this section have been met. Employer shall file a report with DOL every 6 months summarizing information from the certifications.

d) employer who forfeits bond may not be licensed in an occupation or perform work in the state for 5 years.

e) Employer liable for a civil fine of $1,000 for each violation.

23.10.510 Department of Labor to adopt regs for this chapter

23.10.520: Dept of H&SS shall establish by regs the requirements for a certificate of good health. Before issuance of this certificate, the department shall require the employee to submit evidence that he is free from serious and infectious communicable disease.

23.10.600 Definitions

Section 2) Immediate effective date.

Introduced: 3/14/86
Referred: Labor and Commerce

IN THE SENATE

BY THE LABOR AND COMMERCE COMMITTEE

SENATE BILL NO. 463

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act imposing requirements on employers who hire nonresidents for employment in the state; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 23.10 is amended by adding new sections to read:

ARTICLE 7. NONRESIDENT HIRE.

Sec. 23.10.500. DUTIES OF EMPLOYERS. (a) When an employer hires a person who is not a resident of this state, the employer shall

(1) provide the person, on the first day of employment, with fully paid transportation from the work site in this state to the person's place of residence and with clothing and other personal supplies adequate to protect the employee from the effects of the climate and environment of the work site;

(2) provide the police department or state troopers' office nearest to the work site a list that includes the date and place of each felony conviction of the employee within the past 20 years;

(3) require the employee to secure a certificate of good health under AS 23.10.530 before the employee begins work for the employer in this state;

(4) post a surety bond in the amount of $10,000 to be forfeited to the state if a nonresident employee brings a serious infectious or communicable disease into the state or if a nonresident employee with a prior felony conviction required to be reported under (a)(2) of this section commits a felony in this state while an

employee of the employer;

(5) require the employee, if the employee owns a motor vehicle located in this state, to register the vehicle in this state under AS 28.10; and

(6) require the employee, if the employee has a driver's license issued by a licensing jurisdiction other than this state, to secure an operator's license under AS 28.15.

(b) An employer who hires a nonresident for work in this state shall provide the employee with an orientation program to acquaint the employee with Alaskan culture and environmental concerns, to make the employee sensitive to the ecosystem and habitat of the area or areas of the state in which the employee will work, and to minimize the negative impact of the nonresident on the prevailing culture and environment.

(c) An employer who employs a person who is not a resident of this state shall certify within 20 days after the date of hire to the Department of Labor that the requirements of this section have been met. The employer shall file a report with the Department of Labor every six months summarizing the information from the certifications and containing other information required by the department.

(d) An employer who forfeits a bond under (a)(4) of this section may not be licensed in an occupation or to perform work in this state for five years after the date of forfeiture.

(e) An employer who violates this section is liable for a civil fine of $1,000 for each violation.

Sec. 23.10.510. REGULATIONS. The Department of Labor shall adopt regulations under AS 44.62 (Administrative Procedure Act) to implement this chapter.

Sec. 23.10.520. CERTIFICATES OF HEALTH. The Department of

Health and Social Services shall establish by regulation the requirements for issuing certificates of good health. Before issuing a certificate, the department shall require an applicant to submit evidence that the applicant is free from serious infectious or communicable disease.

Sec. 23.10.600. DEFINITIONS. In AS 23.10.500 - 23.10.600,

(1) "employee" means a person who performs a service for wages or other remuneration under a contract of hire, written or oral, express or implied and includes a person employed by the state or a political subdivision of the state;

(2) "employer" means a person who has at least one employee and includes an agent of an employer.

* Sec. 2. This Act takes effect immediately in accordance with AS 01.-10.070(c).

The Honorable Fred Zharoff
Alaska State Senate
P.O. Box V
Juneau, AK 99811

Dear Senator Zharoff:

Thank you for the opportunity to share a "Rationale for Public Health Nurse Involvement in Communicable Disease Control Activities" with you.

In spite of preventive efforts, incidents involving communicable disease are predictably going to occur, we just don't know where and when. With a state the size of Alaska the major network to maintain surveillance and control is through the public health nurse because of her educational background and status as a local public health representative.

If you have further questions related to the enclosed document or other public health related activities, do not hesitate to contact me again.

Sincerely,

Elizabeth Ward

Elizabeth Ward, M.N.
Director

Enclosure

Rationale for Public Health Nurse Involvement in Communicable Disease Control Activities

The long range goal of any communicable disease program is eradication of disease. To date, in history, only one communicable disease has been eradicated; in May 1980, the World Health Assembly declared smallpox eradicated worldwide. Smallpox was successfully eradicated because it was vaccine preventable, highly infectious, had a relatively short incubation period, man was the only reservoir, and mortality and morbidity was very high. Communicable disease control is a global issue, which exceeds national, state and local boundaries.

In Alaska, communicable disease control is a public health issue governed by various statutes. Article VII, Section 4 of the Alaska Constitution states "the legislature shall provide for the promotion and protection of public health". AS 44.29.020 states "the Department of Health & Social Services shall administer the state's program of public health and social services, including public health nursing services." Since the establishment of the Territorial Health Department in 1936, public health nurses have been the field agents carrying out the purposes and functions of the Division of Public Health, Department of Health & Social Services. AS 18.050.030 states "the Department (Health & Social Services) shall cooperate with the federal government in matters of mutual concern pertaining to public health, the control of communicable disease, ---."

The first step in the control of communicable disease is its rapid identification followed by notification to the local health authority that the disease exists within a particular area. Regulations for the control of diseases of public health significance in Alaska is found in 7AAC 27.005 (see Attachment 1).

The following incident exemplifies a real life situation in Kodiak. In September 1984, a crew member from a Taiwanese fish processing ship was hospitalized at Kodiak hospital with active tuberculosis which was reported to the Section of Communicable Disease Control. As a local representative of the Health Department the public health nurse became the coordinator among the private medical community, Communicable Disease Control and port and immunization officials. Although the person with active disease was promptly returned to his own country, a lot of follow-up was necessary. The public health nurse provided the tuberculin screening and follow-up of the 36 Taiwanese crew members and 20 American fishermen who had direct contact with the active case. The PHN's activities were not completed until 9 months later when the ship left Alaskan waters. One to two years of surveillance is common in follow-up of any active tuberculosis case when all goes well.

The public health nurse as official representative of the Department of Health and Social Services initiates tuberculin testing to meet requirements of mandated programs or as a diagnostic tool. The public health nurse then initiates referral for diagnosis and instructs the client, family and community as needed. The public health nurse provides follow-up of contacts to active tuberculosis cases and is a patient advocate through the complex and often confusing health care delivery system. The public health nurse maintains liaison between the client, the community health aide, the physician and tuberculosis control unit of Communicable Disease Control. The public health nurse with the assistance of the tuberculosis unit of Communicable Disease Control is delegated the responsiblity of managing the follow-up of the TB case in the community regardless of who follows the medical management of the case. Successful management of tuberculosis requires knowledge of epidemiology and community organization in addition to in-depth knowledge of the disease process and the drugs used. Getting the client fully treated often involves ingenuity, perserverance, skill and time. The public health nurse is the health care provider with the requisite skills and status to carry out the multiple long-term aspects of tuberculosis management.

Since March 1, 1977 "No Shots - No School" requirements in Alaska have been strictly enforced. Public health nurses have the responsibility for ensuring that parents of infants and children are instructed on the value of immunizations, for obtaining the vaccines, giving them and documenting the individuals' immunization status. As with childhood immunizations, the giving of influenza and pneumococcal vaccine to targeted high risk populations has also been delegated to public health nursing.

Sexually transmitted diseases are most often managed by the public health nurse. Skill in interviewing and the assurance of confidentiality enable the public health nurse to elicit the contact information needed to break the chain of infectivity.

Communicable disease control activities in Alaska continue to be essential as reflected in the 25% more cases of TB in 1985 than 1984, the whooping cough cases in Southeast and other parts of the State in Spring 1985 and the new public health issues associated with AIDS. It is only in the last couple years that Alaska has not had the dubious distinction of the highest gonorrhea rate in the country. In spite of other pressing health related issues, communicable disease prevention must continue to be a priority for public health nurses.

ALASKA ADMINISTRATIVE CODE

CHAPTER 27: PREVENTIVE MEDICAL SERVICES

ARTICLE 1.
CONTROL OF DISEASES OF PUBLIC HEALTH SIGNIFICANCE

7 AAC 27.005. REPORTING BY HEALTH CARE PROVIDERS

(a) The following common diseases of public health significance must be reported by the physician, nurse, or other health care professional who prescribes for or attends a person with these diseases or suspected diseases: amebiasis, botulism, brucellosis, campylobacter, diphtheria, giardia, gonorrhea, hepatitis (type A or B, or non A - non B), legionnaire's disease, meningitis, mumps, paralytic shellfish poisoning, pertussis, psittacosis, Reye's Syndrome, rheumatic fever, rubella, rubeola, salmonella, shigella, syphilis, trichinosis, tuberculosis, tularemia, typhoid, yersinia, severe reactions to any vaccination, and epidemic outbreaks or unusual incidences of communicable disease.

(b) The following rare diseases of public health significance must be reported by the physician, nurse, or other health care professional who prescribes for or attends a person with these diseases or suspected diseases: acquired immune deficiency syndrome (AIDS), cholera, echinococcus, encephalitis, leprosy, malaria, poliomyelitis, plague, rabies, smallpox, tetanus, and yellow fever.

(c) Reports must be submitted to the Department of Health and Social Services, division of public health, orally or on a form provided by the division of public health promptly after first discovering or suspecting the existence of the disease or disease outbreak. Each report must give the name, address, age, sex, and race of the person diagnosed as having the reported disease and the name and address of the health care provider reporting the disease.

(d) Outbreaks or unusual incidences of diseases which are known or suspected to be related to exposure to environmental toxic or hazardous material must be reported by the physician, nurse, or other health care professional who prescribes for or attends those affected. (Eff. 8/21/74, Reg. 51; am 9/20/75, reg. 55; am / / , Reg.).

Authority: AS 18.05.040(1)

7 AAC 27.007. REPORTING BY LABORATORIES:

(a) Public, private, military, hospital, or other laboratories performing serologic, immunologic, microscopic, biochemical or cultural tests within the State of Alaska must report evidence of the following diseases of public health significance at the time of identification or suspected identification: amebiasis, anthrax, botulism, brucellosis, campylobacter, cholera, diphtheria, echinococcus, enteropathogenic Escherichia coli, giardia, gonorrhea, hepatitis (Type A or B), influenza, Legionella pneumophilia, leprosy, leptospirosis, malaria, meningitis, meningococcal disease, mumps, pertussis, plague, poliomyelitis, psittacosis, rabies (human or animal), rubella, rubeola, salmonella, shigella, smallpox, syphilis, tetanus, trichinosis, tuberculosis, tularemia, typhus, yellow fever, and Yersinia enterocolitica.

(b) Reports must be submitted to the Department of Health and Social Services, division of public health, orally or on a form provided by the division of public health, or on a legible copy of the original laboratory report form promptly after the examination or test is performed. Each notification must give the date and result of the test performed, the name or identification code sufficient to identify the patient to the health care provider, and, when available, the age of the person from whom the specimen was obtained, and the name and address of the health care provider for whom the examination or test was performed.

(c) When acting on the basis of information received from laboratory notification, the division of public health will not, except in instances of overriding public health considerations, contact the patient without first requesting and obtaining the permission of the physician or other health care provider.

(d) All laboratory notifications required by this section are confidential and are not open to public inspection. (Eff. 8/21/74, Reg. 51; am 9/20/75, Reg. 55; am / / , Reg.).

Authority: AS 18.05.040(1)

Attachment 1

7 AAC 27.008. REPORTING BY HOSPITALS.

To maintain accurate incidence rates of cancer, and to assist planning and evaluation of cancer control programs, all hospitals licensed in the State of Alaska shall report newly diagnosed cancer cases, with the exception of noninvasive skin cancers, to the Division of Public Health. Reports shall be submitted at least once a year on forms provided by the department, and shall include as a minimum the name, age, sex, race, community of residence, date of diagnosis, and primary site. (Eff.9/20/75, Reg.55)

Authority: AS 18.05.040(1)

7 AAC 27.010. CONTROL OF COMMUNICABLE DISEASES IN MAN

(a) The provision on methods of control of communicable diseases outlined in the Control of Communicable Diseases in Man, American Public Health Association, Thirteenth Edition, 1981, are adopted by reference as the regulations governing 'Preventive Measures,' 'Control of Patients, Contacts and the Immediate Environment,' and 'Epidemic Measures.' (Eff. 6/10/62, Reg. 6; am 8/21/74, Reg. 51; am / / ,Reg.)

(b) The provisions of (a) of this section are not applicable to the control of rabies in animals or on the reporting of diseases of public health significance. (Eff. 6/10/62, Reg. 6; am 8/21/74,Reg. 51)

Authority AS 18.05.040(1)

7 AAC 27.015. OCCUPATIONAL HEALTH DUTIES.

The division of public health may investigate places of employment and study conditions which might be responsible for ill health of industrial workers or their families. (Eff. / / , Reg)

Authority: AS 18.05.040

7 AAC 27.016. RIGHT OF INSPECTION

The division of public health may have access to any establishment and records of any establishment in the discharge of its official duties in accordance with law. (Eff. / / , Reg.)

Authority: AS 18.05.040

7 AAC 27.017. REPORTING OF DISEASE

Diseases which are known or suspected to be a result of a worker's occupation must be reported to the division of public health by the physician, nurse, or other health care professional who prescribes for or attends the person with the disease. (Eff. / / ,Reg.)

Authority: AS 18.05.040

7 AAC 27.020. CONTROL OF ANIMAL DISEASES TRANSMISSIBLE TO HUMANS.

(a) Quarantine. The standards for quarantine are:

(1) Whenever any case of rabies or other animal disease dangerous to the health of human beings is reported as existing in any area, the Department of Health and Social Services will make an investigation as to whether the disease exists and as to the probable area of the state in which man or animal is endangered by it. If the Department of Health and Social Services, in conjunction with the Department of Natural Resources, finds that any such disease exists, a quarantine will be declared against all of those animals which are designated in the quarantine order within the area specified in the order. If the quarantine is for the purpose of preventing the spread of rabies, the order will contain a warning to the owners of animals within the quarantined area to confine on the owner's premises or tie down all animals so as to prevent biting. After such an order is issued, any animal found running at large in the quarantined area or known to have been removed from or to have escaped from the area may be destroyed by a peace officer or by a person designated by the Department of Health and Social Services.

Department of Commerce & Economic Development / POSITION PAPER

SB 465: "An Act relating to dishonored checks and providing an effective date."

We have reviewed Senate Bill 465 and find that it is legislation that carries our support. Senate Bill 465 further defines actions that can be taken in situations where checks are dishonored, a situation that occurs all too often in Alaska.

This bill has no direct effect on our responsibility to regulate the financial institutions for safety and soundness. It would, therefore, be no expense to our agency if this legislation should pass.

TEXT	Senator Halford moved and asked unanimous consent that SENATE BILL NO. 469 be held to the April 15 calendar. Without objection, the bill will be on the April 15 calendar. SENATE BILL NO. 469 (exempting commercial fishermen from workers' compensation coverage) which was held from April 14 was read the second time. Senator Halford moved and asked unanimous consent that SENATE BILL NO. 469 be considered engrossed, advanced to third reading and placed on final passage. Without objection, it was so ordered. SENATE BILL NO. 469 was read the third time. The question being: "Shall SENATE BILL NO. 469 (exempting commercial fishermen from workers' compensation coverage) pass the Senate?" The roll was taken with the following result:

CHAMBER HOUSE
TEXT The Labor and Commerce Committee has considered SENATE BILL NO. 469 (exempting commercial fishermen from workers' compensation coverage) and reports it back as follows: Navarre (Chairman), Koponen, Davis, Boucher, Collins and Hanley recommend do pass.
A letter of intent, signed by Navarre (Chairman), appears below:

House Labor & Commerce Committee
Letter of Intent
for
SB 469

"It is the intent of the Legislature that SB 469, An Act exempting commercial fishermen from workers' compensation coverage, be used to clarify potential issues, not to imply that fishermen may have been covered by workers' compensation prior to the enactment of the legislation."
SB 469 was referred to the Finance Committee.

Workers' Comp (exempting fishermen)

SENATE BILL NO. 469, by the Labor & Commerce Committee. Would exempt commercial fishermen from state workers' compensation laws. Would take effect 90 days after governor signs bill.

Introduced April 1, 1986 and referred to Labor & Commerce.

Workers' Comp (exempting fishermen)

SENATE BILL NO. 469, (see page 404). Reported back to the Senate April 10 by Labor & Commerce recommending it do pass. Concurring: Zharoff (Chair), Sackett and Ray. To Rules.

Workers' Comp. (exempting fishermen)

SENATE BILL NO. 469, (see pages 404;443). Received in the House 4/16/86 and referred to Labor & Commerce and Finance.

Workers' Compensation (exempting fishermen)

SENATE BILL NO. 469, (see pages 404;443). Passed the Senate April 15, 1986, 17-0-1-2. Excused: Gaghill. Absent: Kerttula, Sackett.

Workers' Compensation (exempting fishermen)

SENATE BILL NO. 469, (see pages 404;443;484;487). Reported back to the House April 22, 1986 by Labor & Commerce recommending that it do pass. Concurring were Navarre (chair), Koponen, Davis, Boucher, Collins and Hanley. Referred to Finance.

The following letter of intent accompanied the committee report:

> "It is the intent of the Legislature that SB 469, An Act exempting commercial fisherman from workers' compensation coverage, be used to clarify potential issues, not to imply that fishermen may have been covered by workers' compensation prior to the enactment of the legislation."

SIGNING DO PASS:

SIGNING OTHER RECOMMENDATIONS:

Chairman

CHAIRMAN'S INFORMATION: SB 465

1) BILL TITLE: "An act exempting commercial fisherman from workers' compensation coverage."

a) Introduced: Senate Labor and Commerce Committee

b) Co-sponsors:

2) INTENT: This measure exempts commercial fisherman from workers comp coverage, and seeks to eliminate a duplicate remedy available to injured fisherman. Currently, fisherman have access to compensation under federal maritime law, but a 1962 Alaska Supreme Court decision afforded duplicate coverage for fisherman when injured "shoreside".

Without this exemption, a vessel owner could be required to carry both P&I ocverage for federal remedies as well as workers comp.

FISCAL NOTE: 0 (Not yet received from the Dept of Labor)

3) ADDITIONAL REFERRALS: Sen Rules

4) PUBLIC HEARINGS:

LETTER OF INTENT - SB 469
4/21/1986

It is the intent of the Legislature that SB 469, An Act exempting commercial fishermen from workers' compensation coverage, be used to clarify potential issues, not to imply that fishermen may have been covered by workers' compensation prior to the enactment of the legislation.

Bill No. SB No. 469

Date April 18, 1986

Title "An Act exempting commercial fishermen from workers' compensation coverage."

Contact Jacque McClintock
465-2790

The Department has no objection to the provisions of SB 469 exempting commercial fishermen from workers' compensation coverage.

This legislation does not change any current practice in Alaska's Workers' Compensation System, but does serve to clarify "twilight zone" issues of potentially overlapping coverage that have resulted from various Supreme Court decisions.

We recommend a statement or finding be included making it clear to the courts that the legislative intent of the bill is to clarify potential issues, not to infer that fishermen may have been covered by workers' compensation prior to enactment of the legislation.

APPROVED:

Jim Robison
Commissioner

POSITION PAPER/Department of Labor

I would set aside the trial court's findings, express and implied, and would reverse the judgment appealed from and order that a decree be entered for the defendant Innes.

CORDOVA FISH & COLD STORAGE COMPANY and Underwriters Lloyds of London, Appellants,

v.

Gerald T. ESTES and Alaska Workmen's Compensation Board, composed of B. G. Johnson, Chairman, A. D. Wallace, member, and L. H. Shaffer, member, Appellees.

No. 126.

Supreme Court of Alaska.

Jan. 26, 1962.

Rehearing Denied April 11, 1962.

Workmen's compensation case. The Alaska Industrial Board made an award of compensation to a fisherman against a cannery operator, and, on appeal, the Superior Court of the State of Alaska, First District, James A. von der Heydt, J., affirmed. The cannery operator appealed. The Supreme Court, Dimond, J., held that State Compensation Act applied to injuries sustained by crab fisherman, moving crab pots on boat deck, where he was hired to fish crab for local cannery on percentage basis, crabbing was daytime operation conducted in inland waters of state, state had primary and vital concern with his well-being and any maritime interest involved was slight so that application of state compensation system could not cause any undesirable disuniformity in maritime law.

Affirmed.

1. Workmen's Compensation ⇐93

State Compensation Act applied to injuries sustained by crab fisherman where he was hired to fish crab for local cannery on percentage basis, crabbing was daytime operation conducted in inland waters of state, state had primary and vital concern with his well-being and any maritime interest involved was slight or marginal so that application of state compensation system could not cause any undesirable disuniformity in maritime law. A.C.L.A.1949, §§ 43-3-1 to 43-3-39 as amended; Longshoremen's and Harbor Workers' Compensation Act, § 1, 33 U.S.C.A. § 901.

2. Workmen's Compensation ⇐1446

Determination of whether employer-employee relation existed between cannery operator and fisherman hired on percentage basis was discretionary with board, and finding of such relationship was supported by evidence. A.C.L.A.1949, § 43-3-9.

F. M. Doogan (of Faulkner, Banfield, Boochever & Doogan), Juneau, for appellants.

Ralph E. Moody, Atty. Gen., and John E. Havelock, Asst. Atty. Gen., for appellees.

Before NESBETT, C. J., and DIMOND and AREND, JJ.

DIMOND, Justice.

Estes, a crab fisherman, suffered a back injury at the end of a fishing day while moving crab pots on the deck of a boat which was tied to a dock. The Alaska Industrial Board made an award under the Alaska workmen's compensation act,[1] finding that he had sustained a compensable injury arising out of the course of his employment with Cordova Fish & Cold Storage Company. On appeal to the superior court the Board's decision was affirmed. Cordova has appealed to this court—its principal point being that no relief could be given under the Alaska act because of the supremacy of maritime law.

1. Sections 43-3-1 to 43-3-39, ACLA 1949, as amended. This statute was in effect at the time of the injury in 1958. It has since been superseded by a new law, SLA 1959, ch. 193.

[1] The root of the problem is found in the Jensen [2] case, decided by the Supreme Court in 1917. It was held that New York's Workmen's Compensation Act, McKinney's Consol.Laws c. 67, could not constitutionally be applied to a stevedore fatally injured on board ship while engaged in unloading cargo at a New York pier. The court announced the doctrine that state legislation can have no application if it "works material prejudice to the characteristic features of the general maritime law, or interferes with the proper harmony and uniformity of that law in its international and interstate relations." [3] Since Jensen's injuries were maritime, the locus being on navigable waters, and since the nature of his employment was maritime, it was determined that application of the state compensation act would prejudice the uniformity of maritime law.

The court recognized, however, that there would be instances where the general maritime law may be affected by state legislation.[4] The first of these, as applied to workmen's compensation, was exemplified in the Rohde [5] case, decided in 1922. Applying a doctrine previously worked out in a death act case,[6] the Supreme Court held that the uniformity of maritime law is not prejudiced by application of a state law to maritime employment which is local in character, and that work is deemed local if it has no direct relation to navigation or commerce.[7] Thus emerged the "maritime but local" doctrine, following which a considerable body of case law developed classifying borderline cases one way or the other.[8]

An illustrative case involving an Alaskan fisherman, where the employment was held to be of local concern, is Alaska Packers Ass'n v. Marshall [9], decided by the Court of Appeals for the Ninth Circuit in 1938. Two men were employed to fish for the company, which included operation of a fishing vessel. In addition, they had shoreside duties such as working in the cannery, conditioning the fishing vessels, and mending fishing gear. They were customarily on the boat fishing from Monday to Saturday during the salmon run.[10] They ate and slept on the vessel, and approximately once every twenty-four hours delivered their catch to a lighter anchored on the fishing grounds. While they were engaged in fishing, and had been away from shore for several days, the vessel was destroyed in a storm and both men were drowned.

The question for determination was whether the state compensation act applied.[11] The court recognized the dual character of the employment: in one aspect, local, because the men never sailed their boats beyond a few miles from the cannery to which their catch was taken; and in another aspect, maritime, because they sailed their boats in navigable waters. But the court found from considering the details of the employment contract that the gathering of the cannery's raw materials was a mere incident in the canning process and there-

7. Grant Smith-Porter Ship Co. v. Rohde, supra note 5, 257 U.S. at 475–476, 42 S.Ct. 157 (66 L.Ed. at 324).

8. A selection of "maritime but local" cases is found in 2 Larson, Workmen's Compensation Law § 89.22 (1952), and in Davis v. Dept. of Labor, 317 U.S. 249, 253 n. 2, 63 S.Ct. 225, 87 L.Ed. 246, 249 (1942).

9. 95 F.2d 270 (9th Cir. 1938).

10. The period of the salmon run at this time was about 20 days.

11. The California act, rather than that of Alaska, was relied upon, presumably since the contract of employment was made in California. See Alaska Packers Ass'n v. Indus. Acc. Comm., 294 U.S. 532, 55 S.Ct. 518, 79 L.Ed. 1044 (1935).

fore local in character. It was held that there was a single locus of employment and that there was no disturbance of uniformity of employer-employee relationship if certain portions of the contract were to be regarded as maritime, and yet the employment status were to be controlled by state law. The court determined that the regulation of the rights, obligations and consequent liabilities of the company to the two men, by application of state law, would not work prejudice to any characteristic feature of maritime law. It was held, in fact, that "To deny compensation *would work deep prejudice to the compensation system*, now so widely accepted as 'necessarily' an incident to such creative service as supplying the material to this food canning plant, and which enlightened statesmanship, with its eyes opened to modern concepts of human relations, has enacted in so many of the states." [12] Application of the state compensation act was held not barred by the Jensen doctrine.

We hold that the control of Estes' status as an employee comes within the principles of the Marshall case. Estes had been hired by Joseph Balestrieri, operator of Cordova Fish & Cold Storage Company, to fish crab on a percentage basis. Balestrieri furnished the boat and repairs and hired and paid a helper. The crabbing was a daytime operation conducted in the inland waters of the state within a couple of hundred yards to a mile from shore. It consisted of Estes taking the boat out, baiting the pots and submerging them, and returning to the City of Cordova for the night. The next morning he would again take the boat out and lift the pots, remove the crabs, and rebait the pots and again submerge them. He then returned to the shore-based cannery with the crab. It took twenty minutes to get to the crab pots, six to eight hours lifting pots, and from 45 minutes up to an hour to return. In addition to the fishing, when bait was not available for purchase, Estes dug it on the land. This was an essential part of the crabbing operation.

In Marshall the court found that the fishing incidents of the employment were by function and distance local to the cannery and part of the canning enterprise.[13] The same situation exists here. The primary function of Estes' employment was to provide raw materials for the cannery operation. That the fishing was necessarily local to Cordova's plant is shown by the fact that the catch could not be sold to any other cannery. The distance was local since the fishing was done within a relatively short distance from the cannery. Estes had a shore duty, since at times he was required to dig bait—a necessity if crab were to be caught.

Considering these aspects of employment, predominantly local in character, we find that the state has a primary and vital concern with Estes' status and well-being. If there is any maritime interest involved, it is slight or marginal. We do not see how the operation of the state compensation system can cause any undesirable disuniformity in the scheme of maritime law.[14]

In support of its argument that maritime law provides the exclusive remedy, Cordova cites Parker v. Motor Boat Sales,[15] decided by the Supreme Court in 1941. This case concerned an employee of a store which sold boats and maritime supplies. He was hired primarily as a janitor and porter, and his work was almost entirely on land. He went along with another employee in a small boat in a river to test an outboard motor, and was drowned when the boat capsized. The Supreme Court affirmed an award made under the Longshoremen's and Harbor Workers' Act,[16] reversing the court

of appeals. That court had held that the decedent's employment was so local in character that the state compensation act, rather than the federal act, was applicable.[17] The Supreme Court stressed that the maritime character of the employment was not to be determined by the habitual performance of duties on land, but by the activity in which decedent was engaged at the time of the accident, that is, riding in a boat on a navigable river.[18]

This decision would appear to have done away with the "maritime but local" doctrine, and to have established the rule that states could not validly provide relief for an injury occurring on navigable waters.[19] It would support Cordova's argument on this appeal, if it had been the last word on the subject by the highest court. But it was not. In 1942 the Supreme Court decided Davis v. Dept. of Labor,[20] which involved a steel worker who, while engaged in dismantling a bridge across a navigable river, fell into the river and was drowned. This time the Supreme Court held that the state compensation act could be applied. It based its decision not on the "local concern" exception to maritime employment, but on a new concept. It found that certain employees occupied "that shadowy area within which, at some undefined and undefinable point, state laws can validly provide compensation."[21] This was denominated as a "twilight zone in which the employees must have their rights determined case by case, and in which particular facts and circumstances are vital elements."[22] Relying on the fact that the decedent was, as a matter of actual administration, protected under the state compensation act, and that there was no conflicting process of administration since no action had been taken under the Longshoremen's and Harbor Workers' Act, the court found the facts of the case did not overcome the strong presumption of constitutionality in favor of the state statute.

The significance of this case, it has been said, "lies in its obvious attempt to set up a means of escape for the difficulties in drawing a line between State and Federal Authority under the doctrine of the Jensen case."[23] Its practical effect, it has been said elsewhere, is to permit an employee in a situation such as in Davis to recover either under the federal act or a state statute[24], and to resolve all borderline cases "in favor of coverage by the first act under which application is made by the claimant."[25] If that is what Davis holds, it would seem clear that Estes' employment would fall within the twilight zone and that state compensation coverage would be valid. As a matter of actual administration, Estes is in fact protected by the Alaska statute, the Alaska Industrial Board having found the act was intended to include commercial fishermen such as Estes.[26]

24. Justice Frankfurter's concurring opinion in Davis v. Dept. of Labor, 317 U.S. 249, 259, 63 S.Ct. 225, 87 L.Ed. 246, 252 (1942).

25. 2 Larson, Workmen's Compensation Law § 89.24, at 414 (1952).

26. The act was clearly intended to encompass the fishing industry. § 43-3-5 ACLA 1949 permitted one entitled to compensation to have a lien against the employer's property. As an example of what the statute meant, it was stated: "In the case of an employee injured or killed while engaged in fishing or in the packing, canning, or salting of fish, or

There was no conflicting process of administration between federal and state law, since Estes sought relief only under the Alaska act. Under these circumstances, together with those relating to Estes' employment, we could rely as the Supreme Court did in Davis on the presumption of constitutionality in favor of Alaska's statute as it pertains to Estes, and affirm the Board's determination on that ground.

Cordova argues, however, that Estes was a seaman, and that the twilight zone doctrine relates only to overlap between the Longshoremen's and the Harbor Workers' Act and state compensation statutes, and not between state acts and seamen's remedies. That proposition appears to be supported by a 1948 decision of the Court of Appeals for the First Circuit.[27] In 1956 the opposite view was expressed by a state court which held that the twilight zone approach was not limited to longshoremen, but included seamen as well.[28]

It is probably unnecessary for us to pass upon that question. We do not perceive any real difference between (1) the connection that must exist between a state and employment involving some maritime interest to come within the twilight zone, and (2) the connection that must exist between a state and such employment to come within the maritime and local concept. The general idea appears to us to be the same: a recognition of the right of a state to confer the kind of protection it thinks wise on persons or employments in which it has a legitimate interest. In a realistic sense, that interest is just as significant where Estes is concerned as it is for other employees of Cordova who work ashore in the cannery.[29] We find that all of the circumstances of the case point to an accommodation favoring application of the state compensation act, and that this will not interfere with the true demands of maritime law.

[2] The second point raised by Cordova is that Estes cannot recover under the Alaska compensation act in any event because no employer-employee relationship existed between Cordova and him. The Board found otherwise on the basis that Cordova had the right to control, the right to hire and fire, and that it furnished the tools Estes needed, that is, the boat and the pots.

The pertinent statutory provision which was in effect at the time of injury reads as follows:

> Any person rendering service for another, other than as an independent contractor, or as expressly excluded herein, is presumed to be an employee within the meaning of this Act. The term "independent contractor" shall be taken to mean, for the purposes of this Act, any person who renders service, other than manual labor, for a specified result, under the control of his principal as to the result of his work only and not as to the means by which such result is accomplished.[30]

This means that one is to be regarded as an employee if the principal has the right to control the details of the work. It is clear from the Board's decision that it had evidence before it on the four principal factors showing right of control, namely: (1) direct evidence of right or exercise of control; (2) method of payment; (3) furnishing of equipment; and (4) the right to fire.[31] The findings of the Board showed it considered evidence that Balestrieri hired and paid a helper for Estes; that the man-

other branch of the fish industry, the lien shall extend to the entire packing, fishing, salting or canning plant or establishment and all property used in connection therewith; * * *."

27. Gahagan Const. Corp. v. Armao, 165 F.2d 301, 301 (1st Cir. 1948), cert. denied, 333 U.S. 876, 68 S.Ct. 905, 92 L.Ed. 1152 (1948).

28. Beadle v. Mass. Bonding & Ins. Co., 87 So.2d 339 (La.App. 1956).

29. See 2 Larson, Workmen's Compensation Law § 89.30 (1952).

30. Section 43-3-9 ACLA 1949.

31. 1 Larson, Workmen's Compensation Law § 44.00 (1952).

ner of payment was on a percentage basis; that the employer furnished the boat, repairs and crab pots; and that Balestrieri fired Estes on one occasion. From this evidence the Board determined the employer-employee relationship did exist. Its determination should not be reversed unless there was an abuse of discretion.[32] We perceive none. The finding that the employer-employee relationship existed between the parties is supported by the evidence.

The judgment is affirmed.

AREND, J., concurs in the result.

v.

Phil C. ANDERSON, and Multi-Venture of Fairbanks, Alaska, Inc., an Alaskan Corporation, Appellees.

Phil C. ANDERSON, and Multi-Venture of Fairbanks, Alaska, Inc., an Alaskan Corporation, Appellants,

v.

Fred A. POPE, Appellee.

Nos. 79, 89.

Supreme Court of Alaska.

March 3, 1962.

Rehearing Denied April 13, 1962.

Suit against owner and operator of tractor to recover damages for injuries sustained by plaintiff when dozer blade attached to tractor fell, while operator was attempting to change angle of blade, causing arm of blade to strike plaintiff. The Superior Court, Fourth District, Everett W. Hepp, J., entered judgment dismissing the suit on the merits, and plaintiff appealed and defendants cross-appealed. The Supreme Court, Von der Heydt, Superior Court Judge, held, inter alia, that the evidence was insufficient to establish prima facie negligence of defendants and that failure to find that tractor operator had duty to inspect center pin, by which dozer blade was attached to tractor, before attempting to change angle of blade and warn plaintiff of dangerous condition was not error, in view of uncontroverted testimony of operator, testifying as plaintiff's witness.

Judgment affirmed and cross-appeal dismissed.

1. Automobiles ⇨244(2)

Evidence was insufficient to establish prima facie negligence of owner or operator of tractor, being sued for injuries sustained by plaintiff when dozer blade attached to tractor fell, while operator was attempting to change angle of blade, causing arm of blade to strike plaintiff. Rules of Civil Procedure, rule 41(b).

2. Automobiles ⇨244(2)

Failure to find that tractor operator was negligent in failing to inspect center pin, by which dozer blade was attached to tractor, before attempting to change angle of blade and warn plaintiff of dangerous condition was not error, in view of uncontroverted testimony of tractor operator, testifying as plaintiff's witness in suit against owner and operator of tractor for injuries sustained by plaintiff when dozer blade fell. Rules of Civil Procedure, rule 41(b).

3. Appeal and Error ⇨843(2)

Where dismissal of action for failure to establish prima facie negligence was affirmed on appeal, defendants' contentions on cross-appeal that trial court erred in failing to make findings as to assumption of risk by plaintiff and that plaintiff was acting

32. "Abuse of discretion is established if the agency has not proceeded in the manner required by law, the order or decision is not supported by the findings, or the findings are not supported by the evidence." THE SUPREME COURT OF THE STATE OF ALASKA

WILBUR G. ANDERSON, Appellant, v. ALASKA PACKERS ASSOCIATION; ALASKA PACIFIC ASSURANCE COMPANY; ALASKA WORKERS' COMPENSATION BOARD, Appellees.	File No. 5101 O P I N I O N [No. 2436 - November 13, 1981]

Appeal from the Superior Court of the State of Alaska, Third Judicial District, Anchorage, James K. Singleton, Judge.

Appearances: James F. Vollintine, Anchorage, for Appellant. Charles P. Flynn, Burr, Pease & Kurtz, Inc., Anchorage, for Appellees.

Before: Rabinowitz, Chief Justice, Connor, Burke and Matthews, Justices, and Cooke, Superior Court Judge.* (Compton, Justice, not participating.)

BURKE, Justice.

---

* Cooke, Superior Court Judge, sitting by assignment made pursuant to article IV, section 16 of the Constitution of Alaska.

This is an appeal from a final judgment of the superior court affirming a decision of the Alaska Workers' Compensation Board. The Board's decision denied an injured seaman's claim for benefits under the Alaska Workers' Compensation Act, AS 23.30.005-.270. We affirm, having concluded that the claim is one subject to the exclusive jurisdiction of the United States.

Appellant Wilbur G. Anderson, a commercial fisherman, was injured on June 17, 1977, when he became entangled in a winch aboard the Crane, a purse seine vessel owned by Alaska Packers Assocation. Anderson, the captain of the vessel, was operating the Crane under a lease agreement with Alaska Packers. The injury occurred while the vessel was fishing in navigable waters, approximately one mile from Chignik Lagoon, a small coastal village in southwestern Alaska.

Anderson filed a claim against Alaska Packers and its insurance carrier, Alaska Pacific Assurance Company, contending that he was an employee of Alaska Packers and, therefore, entitled to compensation benefits under the Alaska Workers' Compensation Act. The Alaska Workers' Compensation Board ruled that Anderson was an independent contractor, rather than an employee of Alaska Packers, and

denied his claim. On appeal to the superior court, the Board's decision was affirmed. This appeal followed.[1]

I

The United States Constitution, article III, section 2, provides that "[t]he judicial power [of the federal government] shall extend to all cases . . . of admiralty and maritime jurisdiction . . . ." Section 1333 of title 28 of the United States Code gives the federal district courts "original jurisdiction, exclusive of the courts of the States, of: (1) Any civil case of admiralty or maritime jurisdiction, saving to suitors in all cases all other remedies to which they are otherwise entitled." Gilmore and Black define admiralty jurisdiction as extending

> to all waters, salt or fresh, with or without tides, natural or artificial, which are in fact navigable in interstate or foreign water commerce, whether or not the particular body of water is wholly within a state, and whether or not the occurrence or transaction that is the subject matter of the suit is confined to one state.

---

1. The superior court affirmed the Board's decision upon the ground that there was substantial evidence supporting its conclusion that Anderson was an independent contractor. The court's decision did not address the question of exclusive federal jurisdiction, although the issue was raised in a timely fashion and discussed at oral argument. The Board, in its decision, did mention this issue, but the Board, like the superior court, apparently concluded that it had jurisdiction to consider Anderson's claim on the strength of our holding in Cordova Fish & Cold Storage Co. v. Estes, 370 P.2d 180 (Alaska 1962).

G. Gilmore & C. Black, The Law of Admiralty § 1-11, at 32 (2d ed. 1975) (footnote omitted).

The policy behind the grant of exclusive jurisdiction is to ensure a nationally uniform system of maritime law. The Lottawanna, 88 U.S. (21 Wall.) 558, 575, 22 L. Ed. 654, 662 (1874), cited with approval in Moragne v. States Marine Lines, 398 U.S. 375, 402, 26 L. Ed. 2d 339, 357 (1970).

The United States Supreme Court recently had occasion to discuss the interrelationship of state compensation laws and the exclusive federal admiralty jurisdiction. Justice Brennan wrote for a unanimous court in Sun Ship, Inc. v. Pennsylvania, 447 U.S. 715, 65 L. Ed. 458 (1980) that:

> The evolution of the law of compensation for workers injured in maritime precincts is familiar. In 1917, Southern Pacific Co. v. Jensen, 244 U.S. 205 (1917), declared that States were constitutionally barred from applying their compensation systems to maritime injuries, and thus interfering with the overriding federal policy of a uniform maritime law. Subsequent decisions invalidated congressional efforts to delegate compensatory authority to the States within this national maritime sphere. Knickerbocker Ice Co. v. Stewart, 253 U.S. 149, (1920); State v. Washington V.W.C. Dawson & Co., 264 U.S. 219, (1924). At the same time, the Court began to narrow the Jensen doctrine by identifying circumstances in which the subject of litigation might be maritime yet "local in character," and thus amenable to relief under state law. Western Fuel Co. v. Garcia, 257 U.S.

> 233, 42 S.Ct. 89, 66 L.Ed. 210 (1921); Grant Smith-Porter Ship Co. v. Rohde, 257 U.S. 469, 42 S.Ct. 157, 66 L.Ed. 321 (1922). And, in 1927, Congress was finally successful in extending a measure of protection to marine workers excluded by Jensen by enacting a federal compensation law--the Longshoreman's and Harbor Workers' Compensation Act [LHWCA], 33 U.S.C. § 901 et seq. That statute provided, in pertinent part, that "[c]ompensation shall be payable [for an injury] . . . occurring upon the navigable waters of the United States . . . if recovery . . . through workmen's compensation proceedings may not validly be provided by State law."

Id. at 717, 65 L. Ed. at 458.

Excluded from the coverage of the LHWCA at their own request, see Gilmore & Black, supra, at 427, were masters or members of the crew of vessels, 33 U.S.C. § 902(3), as these "seamen" were covered by the traditional maritime remedies of maintenance and cure, the Jones Act (46 U.S.C. § 688), and liability for unseaworthiness of a vessel. These divisions between persons doing similar work, or doing work subject to characterization as being in one or more categories, engendered questions in the courts in the years following the Jensen decision. Concerning those covered by the LHWCA, the Sun Ship court spoke of three "jurisdictional spheres":

> At the furthest extreme, Jensen commanded that nonlocal maritime injuries fall under the LHWCA. "Maritime but local" injuries "upon the navigable waters of

> the United States," 33 U.S.C. § 903(a), could be compensated under the LHWCA or under state law. And injuries suffered beyond navigable waters--albeit within the range of federal admiralty jurisdiction--were remediable only under state law.

Sun Ship, 447 U.S. at 719, 65 L. Ed. at 462.

The use of the term "sphere," as opposed to a term denoting precise boundaries between federal and state jurisdiction, was appropriate because, as the court recognized, "the boundary at which state remedies gave way to federal remedies was far from obvious in individual cases." Id. at 718, 65 L. Ed. at 461. The difficulties led the court to establish "a regime of concurrent jurisdiction," id., in the "twilight zone" between federal and state compensation programs. Davis v. Dept. of Labor, 317 U.S. 249, 87 L. Ed. 246 (1942). The high court has not created a twilight zone between the state acts and the traditional seaman's remedies, Gilmore & Black, supra, at 434, but the commentators see little reason why seamen should not also be entitled to the benefits of a twilight zone theory of jurisdiction. Id. at 434 n.335; 4 A. Larson, The Law of Workmen's Compensation § 90.41 (1980).

It seems apparent that Anderson is indeed a "seaman" within the meaning that term has come to have. See Offshore Co. v. Robinson, 266 F.2d 769, 779 (5th Cir. 1959); 4 A. Larson, supra, § 90.21. Anderson is also plainly excluded from the coverage of the LHWCA as a master or

member of the crew of the Crane. 33 U.S.C. § 902(3). We find it unnecessary to determine whether there is a twilight zone between the seamen's remedies and the workers' compensation system because we find Anderson's employment "on his vessel in navigable waters is in 'clear daylight' . . ." Alaska Indus. Bd. v. Alaska Packers Ass'n, 186 F.2d 1015, 1917 (9th Cir. 1951).

As noted, the twilight zone was created because of the difficulty encountered in determining when an injury was of a "maritime but local" nature. 4 A. Larson, supra, § 89.51, at 16-258 to 16-259. The cases in the area of local concern centered around activities with a close connection to the land, and not on persons engaged in traditional maritime occupations and tasks. Thus, in London Guarantee & Accident Co. v. Indus. Accident Comm'n, 279 U.S. 109, 73 L. Ed. 632 (1929), the court refused to apply the local concern exception to the claim on behalf of a seaman engaged in an effort to board a boat that had broken loose from its mooring less than a mile from shore. Though the decedent was employed only on vessels that operated within five miles of the shore for pleasure fishing, it was held that the state could not constitutionally make a compensation award. Id. at 125, 73 L. Ed. at 637.

Anderson seeks to avoid a similar holding by citation of our decision in Cordova Fish & Cold Storage Co.

v. Estes, 370 P.2d 180 (Alaska 1962). Estes relied on the "maritime but local" exception to the Jensen rule, and the injured claimant there was engaged in moving crab pots on the deck of a boat tied to a dock. Id. In view of the London Guarantee holding,[2] we see no way to extend Estes to the injury that occurred to Anderson while he was actually engaged in fishing on navigable waters.

We note that other cases in which the local concern doctrine was invoked to provide a state remedy for an injury within the admiralty jurisdiction involve facts, like Estes, with a closer connection to land-based activity than to traditional maritime work. See cases cited in 4 A. Larson, supra, § 90.30, at 16-352 n.70. Where the facts

---

2. While it has been suggested several times since the Jensen case was decided that the Court had abandoned the principles stated there, e.g., Note, Has the Jensen Case Been Jettisoned?, 2 Stan. L. Rev. 536 (1950), the case instead has "a tenacity which refuses to acquiesce in occasional contemporary reports of its final rejection . . . ." Flowers v. Travelers Ins. Co., 258 F.2d 220 (5th Cir. 1958), cert. denied, 359 U.S. 920, 3 L. Ed. 2d 582 (1959). Thus, in Askew v. Am. Waterways Operators, Inc., 411 U.S. 325, 36 L. Ed. 2d 280 (1973), the court noted its prior statement that "Jensen and its progeny mark isolated instances where 'state law must yield to the needs of a uniform federal maritime law when this Court finds inroads on a harmonious system,'" id. at 338, 36 L. Ed. 2d at 289, and stated that such instances occur with respect "to suits relating to the relationship of vessels, plying the high seas and our navigable waters, and to their crews." Id. at 344, 36 L. Ed. 2d at 293. We hold here that Anderson's case comes within the Court's description of Jensen's applicability.

instead show a claimant engaged in wholly maritime work, the courts have declined to lengthen the shadow of the twilight zone, and have remitted the claimants to their federal remedies. E.g., Bearden v. Leon C. Breaux Towing Co., 365 So. 2d 1192 (La. App. 1978); Valley Towing Co. v. Allen, 109 So. 2d 538 (Miss. 1959). We do likewise here.

The superior court's judgment is AFFIRMED.

BY THE LABOR AND COMMERCE COMMITTEE

SENATE BILL NO. 469

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act exempting commercial fishermen from workers' compensation coverage."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 23.30.230 is amended by adding a new subsection to read:

(b) A commercial fisherman, as defined in AS 16.05.940, is not covered by this chapter.

SB 469: Summary

This measure exempts commercial fisherman from workers' compensation coverage and seeks to correct a potentially difficult situation which developed out of a 1962 Alaska Supreme Court Case. (See back up report)

Currently, commercial fisherman have access to injury compensation under Federal Maritime Law, and workers comp coverage would provide duplicate remedies. Without this exemption, a vessel owner would be required to carry both P&I coverage for federal maritime remedies, as well as a workers' compensation policy. As a further consideration, it was not the original intention of the workers' compensation act that commercial fisherman be provided such coverage, and this measure clarifies that exemption in statute.

BILL SUMMARY

Bill No. SB No. 469

Title "An Act exempting commercial fishermen from workers' compensation coverage."

Date April 3, 1986

Contact: Jacque McClintock
465-2790

The Department has no objection to the provisions of SB 469 exempting commercial fishermen from workers' compensation coverage.

This legislation does not change any current practice in Alaska's Workers' Compensation System, but does serve to clarify "twilight zone" issues of potentially overlapping coverage that have resulted from various Supreme Court decisions.

APPROVED:

Jim Robison

A REPORT ON THE COST AND AVAILABILITY OF MARINE INSURANCE IN ALASKA

BY
A. W. HALL
SENIOR ADVISOR, SENATE ADVISORY COUNCIL

30 January 1986

BACK UP INFORMATION

fledgling self insurance program with limited capital reserves should not be subject to such risk. Fortunately, such insurance is obtainable from private insurance companies although at a high premium. If the present efforts to improve the system of providing compensation for injured fishermen are successful, then premium costs should be reduced.

C. THE ALASKA WORKMAN'S COMPENSATION LAW

It is recommended that an amendment be passed to the Alaska Workman's Compensation law that exempts commercial fishermen from the provisions of the act. This is desirable for the following reasons.

1. It was not the original intent of the act that commercial fishermen by covered by it.

2. Fishermen have access to a system of injury compensation under maritime law.

3. A duplication of programs is unnecessarily confusing and is unaffordably expensive.

4. Although described as inadequate, the existing system of compensating injured fishermen is presently under study for the purpose of possible congressional overhaul. A solution defined by federal law would be much more definitive and efficient than a system characterized by overlapping jurisdictions and duplications of effort and cost.

D. COMMERCIAL FISHERIES MANAGEMENT

It is recommended that a legislative resolution be passed requesting that safety be a factor to be considered in the development of all fishery management plans and regulations.

E. EDUCATION

It is recommended that the University of Alaska be directed to investigate the possibility of developing instructional programs on fishing vessel risk management or safety at sea that could be taught through the marine advisory program or community college system.

It is quite possible that a program such as this could be an important part of any organized effort to improve the safety record of the fishing industry. Like driver education programs it could be used as a means to improve individual abilities using reduced insurance premiums as an incentive.

Enclosure

The insurance crisis in the marine industry in Alaska is, in part, merely a reflection of the fact that litigation costs and awards are getting higher. This fact is in turn, in part, merely a reflection of the fact that the fishing industry in Alaska has numerous dangers inherent in the industry. In one area, however, insurance premiums are higher than need be because of an unnecessary duplication of coverage and remedies to fishermen. The nature of that duplication and the ease with which it can be eliminated are easily explained.

In 1962 the Alaska Supreme Court considered the case of a fishermen who was injured on his vessel while that vessel was tied to a dock. It was undisputed that this fisherman would have available to him the full panoply of federal maritime remedies which are generally seen as extremely generous and beneficent to the fishermen. The question presented to the Alaska Supreme Court was whether the fishermen was also entitled to benefits under the terms of the Alaska Workers' Compensation Act. Looking to two factors, the court concluded that this fishermen fell within the "twilight zone" of coverage between the federal maritime remedies and the Alaska Workers' Compensation Act, and was entitled to the benefits of either or both. See Cordova Seafoods v. Estes, 370 P.2d 180 (1962). The factors looked to by the Alaska Supreme Court in determining that there was coverage under the Alaska Workers' Compensation Act were (1) the fact that the employee had

some shore-side duties (digging bait); and (2) that the nature of his fishing business was inherently of a local concern.[1/]

Virtually all fishermen have some shoreside duties including mending gear, storing pots, buying food for the galley, or other such activities. Under the Estes case, those fishermen are entitled to benefits under the Alaska Workers' Compensation Act if injured while the vessel is tied up to the dock. If the fishermen does not have Alaska Workers' Compensation coverage in addition to his standard P&I coverage, there is a presumption under the Alaska Workers' Compensation Act that the accident was caused by the negligence of the vessel owner and that there was no contributory negligence on the part of the injured employee. See AS 23.30.080. These claims can be asserted in civil litigation. There may be coverage under the standard P & I policy for such litigation. However, the vessel owner comes into such a lawsuit with one hand tied behind his back because of the presumptions which exist if there is no insurance. In addition, if there is no insurance and the employee should chose to pursue his workers' compensation remedy, the vessel owner will have to pay any such award out of his pocket. Depending upon the severity of the

---

1/ Subsequently, in 1981, the Alaska Supreme Court concluded that a fishermen who was injured while his vessel was underway was not entitled to the benefits of the Alaska Workers' Compensation Act. See Anderson v. Alaska Packers Assoc., 635 P.2d 1182 (Alaska 1981).

injury, such awards can easily reach six figures. With this twofold penalty for the failure to insure under the Alaska Workers' Compensation Act the prudent owner must carry both a standard P&I policy for federal maritime remedies and a workers' compensation policy. This overlap in coverages need not exist and creates an unnecessary expense to the vessel owner.

A fishermen working on a fishing vessel has available to him extremely generous remedies under the federal maritime law. The only time that such a fishermen is additionally entitled to the benefits of the Alaska Workers' Compensation Act is in the fortuitous event that his injury occurs while the vessel is tied up. Fishermen who are injured at sea do not have available to them the remedies of the Alaska Workers' Compensation Act. The normal shore-based employee does not have available to him the benefits of the federal maritime law. It is only in this peculiar case of a fishermen who is injured while his vessel is tied up that duplicate coverage exists. There is no justifiable policy reason for providing such a duplication of remedies when that duplication mandates increased insurance costs. The most effective way of eliminating this coverage is through the Alaska Legislature. Coverage under the terms of the Alaska Workers' Compensation Act is purely a matter of state law. Such coverage can easily be eliminated with a very minor amendment to the Alaska Workers' Compensation Act. Such an amendment would preclude the necessity of the vessel owner having Alaska Workers' Compensation

Act coverage. Although this is but a very small slice of the insurance premium, it is a simple, justifiable, and easily obtained legislative remedy to partially reduce the significant exposure that a vessel owner has for personal injury insurance premiums.

HEADINGS TITLE 16.
Fish and Game.
CHAPTER 05.
Fish and Game Code.
ARTICLE 7.
General Provisions.
CITATION Sec. 16.05.940.
CATCH LINE
DEFINITIONS.
TEXT In AS 16.05 - AS 16.40

(1) "aquatic plant" means any species of plant, excluding the rushes, sedges and true grasses, growing in a marine aquatic or intertidal habitat;

(2) "barter" means the exchange or trade of fish or game, or their parts, taken for subsistence uses

(A) for other fish or game or their parts; or

(B) for other food or for nonedible items other than money if the exchange is of a limited and noncommercial nature;

(3) "a board" means either the Board of Fisheries or the Board of Game;

(4) "commercial fisherman" means an individual who fishes commercially for, takes, or attempts to take fish, shellfish, or other fishery resources of the state by any means, and includes every individual aboard a boat operated for fishing purposes who participates directly or indirectly in the taking of these raw fishery products, whether participation is on shares or as an employee or otherwise; however, this definition does not apply to anyone aboard a licensed vessel as a visitor or guest who does not directly or indirectly participate in the taking; and the term "commercial fisherman" includes the crews of tenders or other floating craft used in transporting fish;

(5) "commercial fishing" means the taking, fishing for, or possession of fish, shellfish, or other fishery resources with the intent of disposing of them for profit, or by sale, barter, trade, or in commercial channels; the failure to have a valid subsistence permit in possession, if required by statute or regulation, is considered prima facie evidence of commercial fishing if commercial fishing gear as

specified by regulation is involved in the taking, fishing for, or possession of fish, shellfish, or other fish resources;

(6) "commissioner" means the commissioner of fish and game unless specifically provided otherwise;

(7) "department" means the Department of Fish and Game unless specifically provided otherwise;

(8) "domestic mammals" include musk oxen, bison, and reindeer, if they are lawfully owned;

(9) "fish" means any species of aquatic finfish, invertebrate, or amphibian, in any stage of its life cycle, found in or introduced into the state, and includes any part of such aquatic finfish, invertebrate, or amphibian;

(10) "fish derby" means a contest in which prizes are awarded for catching fish;

(11) "fishing derby association" means a civic, service, or charitable organization in the state, not for pecuniary profit, whose primary purpose is to promote interest in fishing for recreational purposes and which has been in existence for five years before applying for a permit under this chapter, but does not include an organization formed or operated for gaming or gambling purposes;

(12) "fish or game farming" means the business of propagating, breeding, raising, or producing fish or game in captivity for the purpose of marketing the fish or game or their products, and "captivity" means having the fish or game under positive control, as in a pen, pond, or an area of land or water which is completely enclosed by a generally escape-proof barrier;

(13) "fur dealing" means engaging in the business of buying, selling, or trading in animal skins, but does not include the sale of animal skins by a trapper or hunter who has legally taken the animal, or the purchase of animal skins by a person, other than a fur dealer, for the person's own use;

(14) "game" means any species of bird, reptile, and mammal, including a feral domestic animal, found or introduced in the state, except domestic birds and mammals; and game may be classified by regulation as big game, small game, fur bearers or other categories considered essential for carrying out the intention and purposes of AS 16.05 AS 16.40;

(15) "hunting" means the taking of game under AS 16.05 - AS 16.40 and the regulations adopted under those chapters;

(16) "nonresident" means a person who is not a resident of the state;

(17) "nonresident alien" means a person who is not a citizen of the United States and whose permanent place of abode is not in the United States;

(18) "operator" means the individual by law made responsible for the operation of the vessel;

(19) "resident" means a person who for 12 consecutive months has maintained a permanent place of abode in the state and who has continually maintained a voting residence in the

state; and in the case of a partnership, association, joint stock company, trust, or corporation, "resident" means one that has its main office or headquarters in the state; however, a member of the military service who has been stationed in the state for the preceding 12 consecutive months is a resident for the purposes of this paragraph, and the dependent of a resident member of the military service, who has been living in the state for the preceding year is a resident for the purposes of this paragraph, and a person who is an alien but who for one year has maintained a permanent place of abode in the state is a resident for the purposes of this paragraph;

(20) "seizure" means the actual or constructive taking or possession of real or personal property subject to seizure under AS 16.05 - AS 16.40 by an enforcement or investigative officer charged with enforcement of the fish and game laws of the state;

(21) "sport fishing" means the taking of or attempting to take for personal use, and not for sale or barter, any fresh water, marine, or anadromous fish by hook and line held in the hand, or by hook and line with the line attached to a pole or rod which is held in the hand or closely attended, or by other means defined by the Board of Fisheries;

(22) "subsistence fishing" means the taking of, fishing for, or possession of fish, shellfish, or other fisheries resources for subsistence uses with gill net, seine, fish wheel, long line, or other means defined by the Board of Fisheries;

(23) "subsistence uses" means the customary and traditional uses in Alaska of wild, renewable resources for direct personal or family consumption as food, shelter, fuel, clothing, tools, or transportation, for the making and selling of handicraft articles out of nonedible by-products of fish and wildlife resources taken for personal or family consumption, and for the customary trade, barter, or sharing for personal or family consumption; for the purposes of this paragraph, "family" means all persons related by blood, marriage, or adoption, and any person living within the household on a permanent basis;

(24) "take" means taking, pursuing, hunting, fishing, trapping, or in any manner disturbing, capturing, or killing or attempting to take, pursue, hunt, fish, trap, or in any manner capture or kill fish or game;

(25) "taxidermy" means tanning, mounting, processing, or other treatment or preparation of fish or game, or any part of fish or game, as a trophy, for monetary gain, including the receiving of the fish or game or parts of fish or game for such purposes;

(26) "trapping" means the taking of mammals declared by regulation to be fur bearers;

(27) "vessel" means a floating craft powered, towed, rowed, or otherwise propelled, which is used for delivering, landing, or taking fish within the jurisdiction of the state,

but does not include aircraft.

BOARD: REAL ESTATE COMMISSION

TITLE: Real Estate Commission

DEPT: Department of Commerce and Economic Development

AUTHORITY: AS 08.88.011

STATUS: 86/06/30

REQUIREMENTS: LEGISLATIVE CONFIRMATION

PROHIBITIONS:

TERM: 4 years - staggered

DESCRIPTION: 7 members appointed by Governor: 5 real estate brokers or associate brokers licensed in Alaska for 3 years, to represent each judicial district, and 1 at-large; if none available from second judicial district, 2 shall be at-large; plus 2 public members; Commission appoints Executive Director; Commission elects chair.

SPECIAL FACTS: Quorum - majority (at least 2 judicial districts represented)

FUNCTION: Regulates and controls licensing, suspensions, revocations of real estate industry; manages surety claim fund

COMPENSATION: Standard travel/per diem

MEETINGS: 6 times per year, 2 days each; 6-12 committee meetings per year; 24 days total

*FOR FURTHER INFORMATION CONTACT: Executive Director, Real Estate Commission, Frontier Building, 3601 C Street, Suite 722, Anchorage, AK 99501 - 563-2169

THIS MEASURE EXEMPTS PERSONS WHO INSTALL AND WIRE SUBMERSIBLE PUMPS IN WATER WELLS FROM THE LICENSURE REQUIREMENTS AS ELECTRICAL ADMINISTRATORS. CONCERNS HAVE BEEN EXPRESSED BY WATER WELL PUMP INSTALLERS OVER THE CURRENT LAW WHICH REQUIRES THE WIRING TO BE DONE BY AN ELECTRICIAN AND INSPECTED BY AN ELECTRICAL ADMINISTRATOR.

**** YOU WILL NEED TO MOVE THE L&C AMENDMENT ON THE FLOOR*****

AN AMENDMENT WAS OFFERED IN THE SENATE LABOR AND COMMERCE COMMITTEE TO LIMIT THE ELECTRICAL WIRING PROVISIONS TO THE WELL HEAD CONTROL UNIT <u>IF OUTSIDE OF A BUILDING OR STRUCTURE.</u> THIS AMENDMENT WAS SUPPORTED BY THE DEPARTMENT OF LABOR, AND HAS THE EFFECT OF ALLOWING AN INSTALLER OF SUBMERSIBLE PUMPS TO WIRE TO THE CONTROL UNIT IF IT IS LOCATED OUTSIDE OF A BUILDING OR STRUCTURE, OR TO THE WELL HEAD IF THE CONTROL UNIT IS OUTSIDE A STRUCTURE.

AMENDMENT OCCURS ON PAGE 2, LINE 13: after unit insert:

<u>if outside a building or a structure.</u>

Alaska Water Well Assn.
P.O. Box 110435
Anchorage, AK 99511-0435

April 12, 1986

Representative Sam Cotten
District 15
Pouch V
Juneau, AK 99811

Dear Sam:

First, I would like to thank you for your efforts and assistance thus far in our communications regarding the State Department of Labor's proposed certificate of fitness program for water well pump installers. Your great support was acknowledged at the annual Alaska Water Well Association meeting in February and was extremely well received by the membership.

The research material provided by your staff is first rate and has been quite useful in responding to inquiries.

Sam, we seem to have another obstacle on this subject, specifically opposition to the proposed exemption for a water well pump installer by permitting them to go to the load side of the disconnect. The terminology used in SB 474 implies limiting service to the well head. The crucial term here is <u>well head controller unit</u> which we suggest would better serve the need by reading <u>well pump system controls.</u>

At the request of your office, I spoke with Mr. Al Dwyer, the inspector responsible for electrical functions in Southeast Alaska.

Mr. Dwyer expressed a serious concern over improper installation by present contractors, and indicated he wanted their level of responsiblility to terminate at the well head. The reasons he stated were that (A) installations he has inspected were of poor workmanship. (B) The cable being used inside the household was the twisted three wire material designed for use in the wet environment of the well. (C) This wire was being stapled to the floor joists, etc. leaving a potential fire hazard in the years to come. (D) The contractors responsible for this workmanship have been warned previously but

persist in the stated practice. (E) Commercial installations such as stores, gas stations and office buildings have wiring codes that are specifically different than those required in residential construction and consequently, these contractors are not versed in the proper techniques and codes and therefore are not qualified to perform those installations.

Sam, all of Mr. Dwyer's objections are valid concerns, however I believe he is trying to prevent the certificate of fitness program from doing what it is designed to do; to pre-qualify people within a given industry by testing and minimum experience standards set at levels which would prevent persons utilizing improper installation knowledge from being licensed. If this is allowed, then why do we even have a certificate of fitness program? It is a lot like the stereotype attitude used in racial prejudice. If one person is lazy, all like him are lazy.

I would like to address what seems to be the logical corrective approach to Mr. Dwyer's objections by reviewing them one at a time.

(A) Present installations are of poor workmanship. If there is a defined code where proper techniques are stated and the observation is not based on personal preference of technique, the card carrying contractor should be informed as such. If he then fails to correct the error or continues to perform shoddy work at other installations, his certificate of fitness should be revoked thereby putting him out of business until such time as he is reinstated. The first suspension could be something like 60 days with a requirement for re-passing the exam, while a second suspension (or third) should be permanent.

(B) The cable being used inside the household is the twisted three wire material designed for use in the wet environment of the water well. Surely there is a code in this State that requires the use of either a Romex or UF type cable in that type of installation. If such a code exists, the contractor should be required to comply or have his certificate either revoked or suspended per the above mentioned procedure.

If not, Mr. Dwyer's objection is a personal one that should not be considered, because if we let field inspectors be the interpreters of various laws, there will be no consistency in the field for the contractors to follow. As a result, project cost overruns will run rampant on construction jobs and shoddy workmanship will be even more prevalent as the contractor tries to cut cost in other areas due to being caught doing something that is perfectly acceptable in other parts of the State.

(C) The potential for a fire hazard existing in these conditions is obvious, and I am in complete agreement with Mr. Dwyer. A double insulated wire such as Romex or UF should be used inside the house per existing codes.

(D) The contractors have been warned previously of shoddy workmanship, but persist in their ways. Fine, use the program to weed them out, but don't knock the program if you're (sic) not using it properly! The whole purpose of a Certificate of Fitness program is to improve the quality of workmanship in the respective industry and provide a mechanism for establishing and maintaining competency.

(E) Commercial installations such as stores, gas stations, office buildings have wiring codes that are specifically different than those required in residential construction and consequently, these contractors are not versed in the proper techniques and codes and therefore are not qualified to perform those installations.

It has already been agreed to by the AWWA membership and the Department of Labor that two classifications need to exist; one fo residential and one for commercial. We suggest Mr. Dwyer's object on could easily be remedied by allowing only contractors certificated for residential service to connect as far as the load side of the disconnect on residential applications only. Those certificated for and servicing commercial work should limit their service to the source side of the motor controller and not be involved in running wire to the source from the controller.

Mr. Dwyer objected to my suggestion of allowing the commercial contractor to service beyond the well head, but it is imperative that they be allowed to do so. Otherwise, costs for the system owner will rise due to the requirement of at least one additional service personnel to be at the job site while the equipment is being installed and tested. Again, the exam for a certificate is properly structured to adequately test the knowledge of the individual as well as his practical experience.

We feel it is imperative that the certificated pump system installer be allowed to service the system to the above stated levels to avoid unnecessary call backs resulting in high costs to the consumer and also to avoid tarnishing the image of the installer by having provided a product that fails. If the electrician doesn't install the controller equipment provided by the pump manufacturer, then the warranty for the motor is void. Who pays for a motor that burns out on start-up wh- the proper ambient compensated quick trip overload heaters were not installed by the electrician?

All too often, we experience installations where the control circuit was installed by a licensed journeyman electrician where the motor or control failed upon start-up simply because the electrician connected the third lead from the motor to a ground at the control box, rather than follow the manufacturer's wiring diagram located inside the cover of the enclosure, or use a Romex 2 wire with ground from the well head to the control. These failures aren't the responsibility of the pump installer, but because he provided the equipment, the electrician and/or consumer turns and points a finger at him, expecting him to warranty the allegedly "defective" product.

Unfortunately, I have yet to experience an electrician come forth and admit that he's made a mistake and buy the compontent(s) necessary to repair the fault.

On commercial installations, the motor manufacturers very emphatically state that if their control requirements are not met, they will not warrant the product. That is because they recognize the potential for human health hazard should a failure occur. However, on most applications, particularly 3 phase, again, the journeyman electrician feels his practical experience makes him more qualified than the factory's design engineers and he doesn't provide the overload protection they require.

Who is to pay for the burned out motor when they haven't followed the directions? It isn't the pump installer's problem, nor is it the supplier's problem. The manufacturer has already protected himself by stating his requirements in his installation and operation instruction manual. The pump installer has normally paid for this equipment before he gets paid, and in this situation, he is forced to submit to the demands of the owner to get his money, even though he is not the responsible party.

If, as Mr. Dwyer states, the licensed journeyman electricians are fully qualified in motor start circuits, I wonder why it is that my employer is asked several times each construction season to warrant failures directly attributable to improper techniques practiced by these same licensed electricians.

It is extremely disturbing to realize one individual that has had experience with a limited number of contractors representing a very small segment of this state's population could influence such a major decision by making a few casual comments while being uninformed about all aspects of the subject being discussed. If this situation is an example of how our system works, there is definitely a need for improvement in the system.

Sam, I'm enclosing a copy of the National Water Well Association's primer on their Certified Pump Installer program which is the testing standard the AWWA has suggested the Department of Labor adopt in this program. You will also find a copy of a cover letter NWWA sends out which confirms the need for proper practical experience to pass these exams. By reviewing it, you will see it requires more than knowledge of how to turn wrenches and squeeze a pair of crimping pliers to pass and become recognized by the National Association as a Certified Pump Installer. Mr. Dwyer is of the belief the exam is geared primarily towards health concerns for well construction, which isn't correct.

You will also find enclosed copies of the letters we submitted to the Department of Labor at the public hearing held November 4th in Anchorage.

Again, Thank you for your assistance in our cause. If I may be of further help, please feel free to contact me at 563-3424 days or at home evenings at 344-4707 (unlisted.)

Respectfully,

Barry L. McCormack

Subject: Licensing and Certification of Fi[illegible]s Exams for Water Well Installers.

Gentlemen:

As a supplier, we applaud your good intention of requiring water well installers to take a qualifying exam for licensing and to certify their fitness as an experienced, competent technician to install and service commercial and residential water systems.

This move should help to stem the tide of disreputable firms and individuals that have managed to tarnish the image of the Alaskan water well installer from continually coming into Alaska from Outside when their reputations prevent them from making an acceptable living wage in their economically depressed home area. We view this as an opportunity to improve the level of competency of the people in the industry and possibly reduce some of the excessive competitiveness brought on by the insurgence of these people into the Alaska marketplace.

We feel it is imperative that we express concern over the definition you have proposed for a "water well installer." The definition given leads us to believe you would not permit the water well installer to install the control box for a three wire submersible pump, nor install the pressure tank. We further see this as a problem for the few cases where a jet pump is needed, either as a booster pump or as the sole pumping source for the water system.

Experience as a supplier that is asked to warranty defective products leads us to object to the limitation you have placed on the water well installer with this definition. Not once, but several times each year, we are asked to warranty failed motors and control boxes because some certified journeyman electrician wired the control in accordance with all he has been taught. When we question the cause of failure and find that the electrician grounded the third lead, which is part of the start circuit for the motor. This is definitely not a warrantable failure. When the electricians are questioned why they didn't follow the instructions in the cover of the control, their typical response is that they thought the manufacturer had made a mistake in the wiring diagram.

Each year nearly one million domestic submersible water pumps are produced in the United States. This statistic comes from the Water Systems Council, a consortium of the 26 major water system manufacturers. Surely none would make that mistake consitently for several years, or they would go out of business due to insurmountable warranty costs.

It appears that a licensed electrician feels that he is entitled to redesign a circuit at will and then not have to accept responsibility for his actions and warrant the failed product.

And what about the situation where the journeyman plumber installs a pressure tank too small for the capacity of the pump in the well? The pump cycles on and off too frequently and either burns out the motor or a component of the control box. What happens if the plumber installs a pre-pressurized tank when the water well installer has made provisions for a galvanized tank by installing a bleeder orifice in the vertical drop pipe? The consumer continually gets air out the faucets, possibly breaking dishes and glasses until the plumber comes out to change the tank, probably to another pre-pressurized tank thinking the first was defective. This becomes another situation where the supplier is asked to warranty a product that is in fact not defective but simply improperly applied because the installing technician was not aware of the total system design.

Many times we've received calls from plumbers and system owners complaining about the limited amount of water (drawdown) they are able to get out of the pre-pressurized tank on each pumping cycle. This comes from not having matched the pressure switch's pre-set operating range with the air charge in the tank. Again, this causes undue rapid cycling of the pump unit and possibly a failure which is not warrantable.

Alaska has many aquifers which yield very little water. In some cases, not enough for a standard water system to work. Consequently, special controls and storage tanks along with a booster pump must be used to provide the water system owner with a water supply adequate to pass the lending instutition's requirements and those of the Department of Environmental Conservation. In those instances, the total system design becomes even more important, as there are several areas where mismatched equipment could lead to system failure and costly repairs. Failures of this nature are not warrantable.

Who pays for these unnecessary failures? The consumer, the technician, the supplier and the manufacturer all wind up paying through either cash outlay or reputation for not giving in to every incompetent's demands.

The water well installer must be able to install the complete system from the pump in the well thru the exit of the pressure tank, as it is a system requiring a complete balanced design. If the system is not balanced or some of the necessary components are left out, the results can spell disaster for the water system owner as they will be plagued with problems or faced with ridiculously high repair bills when they have to have a "journeyman plumber," "service/sewer plumber," "maintenance electrician" and a "water well installer" all come to the point of service at the same time to diagnose the defect and then hopefully, repair it to an acceptable operating condition.

Again, we applaud the intent of setting a standard for more qualified technicians in the industry, but implore you to allow the "water well installer" to have complete control over the installation of the system thru the tank and its necessary accessories, and the electrical circuit providing power to the system from the breaker box forward. This will follow suit with the training provided by manufacturers at in the field seminars and the National Water Well Association's Certified Pump Installer (CPI) examination program.

We also suggest that you not give "Grandfather Rights" to ar individuals other than those holding NWWA CPI certificates, as as you would otherwise only perpetuate the problem of unqualified operating in the Alaska water well industry. We urge you to consider using the NWWA'S CPI exam as a measurable standard to qualify any and all licensee's.

Respectfully,

Subject: Proposed Licensing of "Water Well Installers"

Gentlemen:

The Alaska Water Well Association (AWWA) submits the following information on behalf of member and non-member water well/pump installers and Alaskan water well owners.

Ten (10) states are known to require licensing of water well/pump installers currently. Those states are California, Colorado, Delaware, Hawaii, Illinois, Maryland, Michigan, New Hampshire, New Jersey and Tennessee. Several additional states have proposed legislation under consideration to license water well/pump installers.

Each of the 10 licensing states has a licensing board with appointed members ranging from 5 to 13 total members of which 1 to 6 are current licensed resident specialty contractors serving from 2 to 5 year terms. They usually represent various geographic areas of the respective state.

Qualifications for applicants vary from no required time in service to as much as 5 years in service with the majority using 2 years, which the proposed 4,000 hours experience would equate to if the applicant were to work steady 40 hour weeks for 51 of 52 weeks over a two year period.

Several but not all require a performance bond ranging from $2,000.00 to $10,000.00. All require an examination, with some requiring either written or oral and some offering a choice to be made by the licensing board. Translators are provided by some where they may be needed.

The regulating or licensing State agency varies from state to state with most being regulated by the agency or department equal to Alaska's Department of Environmental Conservation (D.E.C.).

Presently the State of Alaska recognizes the National Water Well Association (NWWA) by reference to NWWA publications and studies in D.E.C. publications regarding practices for installation and sizing of Class A, B, and C water systems. The NWWA is recognized by the United States Geological Survey division of the Department of the Interior by requesting its assistance thru chapter and affiliate state associations in monitoring and recording the quantity and quality of water well activity over the preceding decade.

The NWWA has utilized its own voluntary certification program for the last decade. To become certified, individuals must have at least two years full time experience in an operational or supervisory capacity in pump installing to be eligible to take the exams. If the state in which the applicant operates requires licensing, he must show evidence of having this license before he can become certified. Membership in the NWWA is not required.

The exams consist of a general test on well drilling and at least one additional exam from any one of 13 specialty categories available. These categories test the applicant's ability to use his equipment on the particular types of products used in his area, giving consideration to the local geological formations.

To maintain certification, individuals are required to renew annually and demonstrate they have attended at least 20 hours of approved continuing education each three-year period.

These exams are given upon request of local chapter and affiliate associations, however, NWWA strictly requires enforcement of a neutral, non-licensable individual such as a State or Federal employee or an NWWA staff member acting as proctor during the examination.

It is the position of the Alaska Water Well Association, by majority of the Board of Directors to support licensing and Certificate of Fitness exams for water well/pump installers in the State of Alaska.

We do object to wording used in definition of a "water well installer" in that the 'work necessary to the installation of commercial and residential wells' 'is limited to the pump installation terminating at the well head.' It should be understood that our reasons for this objection are not only for our behalf but also on behalf of the Alaskan water well owners as they will suffer increased cost on initial installations and aftermarket service of their water well system.

None of the aforementioned states has explicitly established a limit of service to be performed by the installer. Some do specifically include the water system as a whole by including provision to service as may be necessary to protect such water from contamination and all construction involved in connecting pumping units or pressure tanks into the water supply system of buildings served by the well from which the pump is supplying water. Provision is also included for repair to existing installations.

As this proposed change is written, responsibility for warranty of the water system design lies spread over as many as 4 separate parties. Consumer costs will rise considerably when each contractor has to raise prices to cover possible errors by the other involved parties should they error in selection of appropriately sized equipment or make an improper installation resulting in failure of another party's installed equipment.

Presently, when a well/pump installer performs a new installation, he may provide in addition to the pump and it's required electrical control, the water and electrical lines between the well and tank as well as the pressure tank and it's required appurtenances for proper operation of these components as a <u>system</u>.

When a consumer needs service currently, one phone call can result in a service call to diagnose and rectify the fault by one technician. However, if the proposed change is passed as written, as many a 4 technicians may be required to analyze and rectify the problem. With current labor rates from $45.00 to 60.00 per hour, the wording of this change would be a grave injustice to the typical well owner, because getting all the required parties together at one time will be next to impossible, in addition to horrendously expensive.

The AWWA requests that the State of Alaska Department of Labor revise the term 'water well installer' to "pump and water system installer." We also request that the definition be revised to include installation of the complete water system from the pump installed in the well thru the first gate valve from the exit of the pressure tank, (not to be more than 24 linear pipe inches from the tank outlet) and to the circuit breaker box with electrical service limited to the circuit(s) required to operate the pump and its related controls.

With many low producing aquifers in Alaska it is not uncommon for the water system to require the use of a storage tank, high and low level controls for same and the well plus a booster pump. If the 'water well installer' is not permitted to be directly involved in the selection, application and <u>installation</u> of this equipment, severe water shortage problems may be experienced by the homeowner.

Alaska presently has several NWWA certified pump installers. The AWWA urges the Department of Labor to recognize the NWWA certification program as its testing standard for the State's Certificate of Fitness exam. This coupled with the above request to redefine a water well installer should result in a cohesive comprehensive program that will benefit all Alaskans served by water wells.

We respectfully request that you carefully consider the re-wording we've suggested to this proposed change before submitting a final format to the legislature.

Sincerely,

R.P.

Ronald Palmer, President
Alaska Water Well Assoc' tion

SB 474: Summary

This measure expands the list of exemptions from electrical administrator licensing requirements. The amendment adds persons who install submersible pump motors and wire them to the well head controller unit in water wells.

Introduced: 4/9/86
Referred: Labor and Commerce

BY THE LABOR AND COMMERCE COMMITTEE

IN THE SENATE

SENATE BILL NO. 474

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to exemptions from licensing requirements as electrical administrators; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.40.190(b) is amended to read:

(b) This chapter does not apply to a [ANY] person engaged in

(1) the manufacture or repair of electrical apparatus or equipment;

(2) electrical work, the cost of which does not exceed $5,000, involving residences or small commercial establishments in communities

(A) which have a population of under 500; or

(B) which are over 50 miles by air or water transportation from the business place of an electrical administrator licensed under this chapter;

(3) electrical installation on residential property which is owned by the installer or a member of the installer's immediate family and not intended for sale at the time of making the installation;

(4) the operation, maintenance or repair of a television or radio broadcasting system and the installation of a radio broadcasting system under 500 watts input power except for A.C. power supply and wiring;

(5) the installation, maintenance and repair of elevators

so long as the work is performed by an agent or employee of the elevator industry and is confined to the elevator control system, which system does not include the power supply, wiring and motor connection;

(6) the operation, maintenance and repair of telephone, telegraph, and intercommunication facilities;

(7) the installation, maintenance and repair of fire alarm, intrusion alarm or other low voltage signaling systems of 48 volts to ground or less;

(8) the maintenance or repair of diesel electric engines installed on heavy construction equipment, either in a shop or on a job site;

(9) the installation in a water well of the submersible pump motor and the wiring to the well head controller unit; if outside building or structure.

* Sec. 2. This Act takes effect immediately in accordance with AS 01.10.070(c).

Department of Commerce & Economic Development / POSITION PAPER

SB 474 An Act relating to exemptions from licensing requirements as electrical administrators.

The department does not oppose this bill.

Bill No. Senate Bill 474

Date April 22, 1986

Title "An Act relating to exemptions from licensing requirements as electrical administrators; and providing for an effective date."

Contact: Eileen Plate
465-2700
Robert Bacolas
465-4870

Senate Bill 474 proposes to exempt the installation of water well pumps from the electrical administrator licensing requirements.

Although the Department has no particular objection to allowing an installer to wire a submersible pump and position it in the well, wiring from the well head to the controller should be performed by a qualified electrician and inspected by an electrical administrator. A controller can be located anywhere in a home, school or other building and it is critical that the person installing the wiring is knowledgeable of the proper wiring method required for the particular occupancy in which the wiring is being done. Further, since it is not possible for the Department of Labor to inspect every electrical installation, the supervision of such work by an electrical administrator is essential.

The Department is opposed to water well pump wiring being installed beyond the well head by a person other than a qualified electrician under the supervision of an electrical administrator.

Senate Bill 474 would not have a fiscal impact on the Department of Labor.

APPROVED:

Jim Robison, Commissioner
Department of Labor

POSITION PAPER/Department of Labor

CHAPTER = 08.40
SECTION = 08.40.190
TITLE = 08
HEADINGS TITLE 8.
Business and Professions.
CHAPTER 40.
Electrical Administrators.
ARTICLE 3.
General Provisions.
CITATION Sec. 08.40.190.
CATCH LINE
EXCLUSIONS.
TEXT (a) This chapter does not apply to any utility or municipality engaged in

(1) electrical construction and maintenance of electrical wiring for the generation and distribution of electrical current where the wiring is an integral part of a system owned and operated by that utility or municipal light and power department;

(2) the installation, operation, maintenance, or repair of telephone, telegraph, signal or communication systems when the work is performed by the employees of that utility.

(b) This chapter does not apply to any person engaged in

(1) the manufacture or repair of electrical apparatus or equipment;

(2) electrical work, the cost of which does not exceed $5,000, involving residences or small commercial establishments in communities

(A) which have a population of under 500; or

(B) which are over 50 miles by air or water transportation from the business place of an electrical administrator licensed under this chapter;

(3) electrical installation on residential property which is owned by the installer or a member of the installer's immediate family and not intended for sale at the time of making the installation;

(4) the operation, maintenance or repair of a television or radio broadcasting system and the installation of a radio broadcasting system under 500 watts input power except for A.C. power supply and wiring;

(5) the installation, maintenance and repair of elevators so long as the work is performed by an agent or employee of the elevator industry and is confined to the elevator control system, which system does not include the power supply, wiring and motor connection;

(6) the operation, maintenance and repair of telephone, telegraph, and intercommunication facilities;

(7) the installation, maintenance and repair of fire alarm, intrusion alarm or other low voltage signaling systems of 48 volts to ground or less;

(8) the maintenance or repair of diesel electric engines installed on heavy construction equipment, either in a shop or on a job site.

(c) Work within the exclusionary provisions of this section is nevertheless subject to the inspection provisions of AS 08.40.070 and must follow the regulations regarding workmanship adopted by the board.

HISTORY (Sec. 8 ch 158 SLA 1960; am sec. 1 ch 79 SLA 1967; am sec. 10 ch 53 SLA 1977; am secs. 7, 8 ch 71 SLA 1980)

PHONE: (907) 465-2534

March 26, 1986

Honorable Sam Cotten
Alaska House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Representative Cotten:

Mr. Bill Stoltze advised that our suggested wording for an exemption from the electrical administrator act for water well drillers appeared quite limited.

I discussed this further with Al Dwyer, Electrical Inspector, to further critique the wording suggested in my letter to you dated March 24, 1986. My suggested wording was:

AS 08.40.190(b)(9). This act does not apply to any person engaged in

(9). Water well drillers for installation of the submersible pump motor and the wiring to the well head controller unit.

The intent is to assure that the installer can install the pump motor and bring the wire to the top of the well, but not to wire into the controller units, whether they be automatic or manual switching units. After our critique, to assure the installer who is not properly licensed to perform the wiring work does not make any connections at the controller unit or elsewhere toward the energy source, perhaps the wording should be shortened to read:

(9). Water well drillers for installation of the submersible pump motor and the wiring to the top of the well.

As I mentioned in my previous letter, there are many and varied safety problems and various electrical code requirements that vary pertaining to connecting the installed pump to a controller unit and the energy source. If improperly installed there can be serious danger to persons and property according to the well location compared to the energy source. Mr. Dwyer still advises that it would be unwise to extend the exemption any further than the well head, up to but not including into the controller unit.

Thank you for this opportunity to provide comments to you on this matter. Feel free to contact this office again for further assistance.

Sincerely,

Richard H. Long
Chief Investigator and
Acting Director

SUBJECT: Proposed amendment to SB 487 concerning general regulation adoption authority

As I mentioned to you by telephone yesterday, there is an additional clarifying amendment that should be included in SB 487 on the Real Estate Commission. That amendment would correct an apparent oversight which has resulted in the absence of an explicit grant to the commission of general regulation adoption authority. Currently, AS 08.88 includes two explicit grants to the commission of specific regulation adoption authority, but no grant of the typical general regulation adoption authority usually given to occupational licensing boards and commissions.

The commission has the following explicit specific regulation adoption authority:

> Sec. 08.88.081. COMMISSION REGULATIONS. The commission shall adopt regulations pertaining to the responsibilities of persons licensed under this chapter and the grounds for revoking or suspending a license.
>
> Sec. 08.88.111. COMMISSION REGULATIONS. The commission shall adopt procedural regulations describing
>
> (1) how it conducts an examination;
>
> (2) how a person applies to take an examination, applies for a license, and registers that person's office.

I propose that AS 08.88.081 be amended to add a general regulation adoption authorization and at the same time consolidate the two specific authorities as follows:

> * Sec. 2. AS 08.88.081 is amended to read:
>
> Sec. 08.88.081. COMMISSION REGULATIONS. The commission shall adopt regulations <u>necessary to carry out the purposes of this chapter including regulations</u>
>
> <u>(1)</u> pertaining to the responsibilities of persons licensed under this chapter and the grounds for

revoking or suspending a license;

(2) describing how it conducts an examination; and

(3) describing how a person applies to take an examination, applies for a license, and registers that person's office.

Renumber the following sections of the bill accordingly.

Of course, AS 08.88.111 should then be repealed.

This additional amendment would clarify that the Real Estate Commission has the same general regulation adoption authority as do other agencies. We believe that the commission has this authority implicitly, even without this amendment but it would be better to make the authority explicit.

Concerning SB 487 as a whole, we believe that the bill includes both some desirable housekeeping amendments and some amendments that may not be desirable, or that at least may require more study.

Please let me know if I can provide you or the committee any further information on this proposed amendment to SB 487, or on the entire bill.

Senator Frank Ferguson
Alaska State Legislature
Pouch V (MS 3100)
Juneau, Alaska 99811

Dear Senator Ferguson:

The reading of Resolution Number Nine into the Commerce Committee log was received with astonishment.

This association is recipient of consecutive safety awards, has no written nor verbal complaint by members, public, Federal or State agencies.

We take pride in our ability to provide service of high quality and continuity. When the "Bristol Bay winds" blow at excess of seventy miles an hour, our line crews are able to busy themselves with inside work rather than emergency exposure to the climatic conditions with repair.

The total systems unscheduled outage last year amounted to one half minute per consumer. The highly technical service requirements to the United States Air Force Base at King Salmon, fourteen miles from our generation plant, indicates they have the best quality and continuity of service in the Alaska command.

It is felt such service would be unattainable with "poor safety" conditions as referred to in Resolution Number Nine to the Commerce Committee.

We request your consideration to withdraw Resolution Number Nine in lieu of the aforementioned remarks.

If you have written complaint of safety infraction we should appreciate such to enable our prompt attention. Work and system safety is of prime concern of our Board of Directors, employees, management and members. Our annual budget has allocation of one hundred hours for safety training alone.

On another subject, we should like to thank you for your assurance to Dave Hutchens that the P.C.E. program shall be properly addressed by your office. We too should like to offer any data our office has that might assist you with reference to P.C.E.

In closing, we once again should appreciate your passing along any information you have of safety infractions within our system to enable our prompt attention and removal or repair.

Sincerely,

Claude E. Franke

ANALYSIS OF BILL/PROGRAM EFFECTS

Although the department is in favor of any bill that would assist its efforts in business development, the department feels that the creation of a new task force is not needed at this time. The advocacy BRU of the department is already engaged in many of the proposed task force activities. Given the funding which will be required for such a task force to operate, the advocacy BRU could provide the same results.

The department is in support, however, of requesting the Governor to direct the Attorney General to investigate and recommend measures available to the State to assure that small businesses get a proportinate share of State business.

The purpose of SCR No. 2 is to establish a task force to assess small business in Alaska and make recommendations. Specifically, the task is charged with:

1. emphasizing and promoting small business development and maintenance in Alaska;
2. assisting in securing adequate sources of bonding, credit and loans for small, Alaska-owned businesses; assuring, wherever possible, that State funded construction projects are specified, modified, and contracted in a manner to assure a reasonable proportion of State funded construction projects are performed in small, Alaska-owned businesses; and
3. assuring that a reasonable portion of State funded construction and procurement dollars be contracted through small owned businesses.

For the purposes of this Fiscal Note, it will be assumed that this will be an interagency task force with the following departments represented:

The Commissioners of the Departments of Commerce and Economic Development, Revenue, Labor, and Transportation and Public Facilities and/or their designees;

The task force will have one-day meetings on a quarterly basis.

The task force will submit a final report to the Governor, Legislature, and the general public with its findings and recommendations.

Senator Vic Fischer (907) 465-4954
Alaska State Legislature
Pouch V • Juneau, Alaska 99811 • (907) 465-4954

February 6, 1985

To: Senator Fred Zharoff, Chair and
Members, Senate Labor and Commerce Committee

From: Senator Vic Fischer

Re: SCR 2 - Small Business Development in Alaska

During the 1982 Interim, the Senate State Affairs Committee conducted an investigation into the effects of state contracting procedures on small, minority and female owned businesses in Alaska.

In the course of that study, and through subsequent testimony before committee hearings on small business development in Alaska, it's become apparent that problems facing minorities and women are basically the same as those facing all small Alaska-owned businesses.

Besides the obvious problems associated with high costs,extreme weather, lack of infrastructure, and vast distances, small businesses face major problems in dealing with the state, particularly on state funded construction projects.

The state has no comprehensive policy of support and advocacy for small business development. We don't even have a working defination of "small" business that realistically reflects the kind of "mom and pop" operations most of us think of when we think of "small".

State construction projects are contracted in a manner that, often as not, preclude any Alaskan-owned business from successfully bidding, at least as a prime contractor. That leaves Alaskans in the position of competing for subcontracts, usually with a large "outside" prime.

Lack of technical assistance, inability to secure adequate bonding, credit or financing, and an impossibly tight cash flow, makes successful competition for a sub-contracts extremely difficult for small, local businesses. Meanwhile, the concrete continues to be poured and Alaskans continue to stand in the cold while someone else reaps the benefits of state funded construction projects.

Small businesses are the state's best source of employment, new industry, local control, and a diversified economy. In spite of this, small businesses are folding at a phenomenal rate due to insurmountable problems with obtaining adequate bonding, financing, and technical assistance.

[redacted]

Background Materials

During Interim • 1024 W. 6th Avenue, Suite 204C • Anchorage, Alaska 99501 • (907) 278-3654

SCR 2 asks the Governor to address these concerns through several measures, including appointing a task force to assess state policy in contracting, local hire, and small business advocacy, and to recommend measures that will:

- emphasize and promote small business development and maintenance
- assist in securing adequate sources of bonding, credit, and loans for small, Alaskan-owned businesses
- specify, modify and contract state-funded construction projects a manner to assure a reasonable portion of the work is performed by small, Alaska-owned businesses

Further, SCR 2 asks the Governor to direct the Attorney General to investigate and recommend measures available to the state to assure that a reasonable portion of state-funded construction and procurement dollars be contracted through small, Alaskan-owned businesses, consistent with provisions of the United States and State of Alaska's constitutions.

Encouraging small business development in Alaska is the single most effective thing the state can do to provide for new industry and a stable economic base, opportunities for future growth to Alaska's young people, a diversified economy, and jobs for Alaskans.

More than that, the state benefits greatly from local businesses with strong community, family, and cultural commitments to Alaska. That business community, with proper nurturing, can maintain and strengthen the overall economy, mobilize the state's full productive capacity, and preserve and expand the competition basic to our free enterprise system.

It will take a push from both the legislative and executive branch to end this policy of "benign neglect" and take an active lead in assuring that small, Alaska-owned businesses benefit from publicly funded construction projects and an enhanced business climate.

I believe SCR 2 is an important step in that direction and I urge your positive consideration of this measure.

Small Business

Small business has always been an integral and vital part of American life. Prior to the onset of rapid industrialization, it dominated the economy. Following the emergence of large corporations in the late nineteenth century, observers predicted that small companies would become obsolete with the eventual nationalization of the economy; despite major changes in the social, economic, and political environment, however, small businesses in America have persisted in significant numbers. They constitute approximately 99.8 percent of the companies in the United States, produce about 38 percent of the nation's goods and services, and account for more than 47 percent of the jobs in the private sector.

A widespread preoccupation with industrial and commercial giants has obscured the contributions small business has made to America's growth and development. For example, few people are aware that between 1953 and 1973 close to half of the major innovations introduced into U.S. industry came from firms with fewer than 1,000 employees—and a quarter of those originated in firms with fewer than 100. In addition, small business has outshone big business with respect to job-creating efficiency. As a

"Technology for Community Enterprise Development" address, Second National Conference on New Enterprise Development, Washington, D.C., March 2, 1981.

Dorn Books, Minneapolis

1979 MIT study demonstrated, small companies were responsible for 7.4 million, or 78 percent, of the 9.6 million new jobs added to the U.S. economy between 1969 and 1976.

Today small business continues to serve as a symbol of opportunity and enterprise in our system of values, but there is reason to be concerned about its future. The cumulative impact of government regulations, the escalating cost and concomitant scarcity of capital, the decreasing availability of technology, and heightened competition from big business have combined over the past decade to bring about a serious deterioration in the climate for small business. The mortality rate of new companies is shocking: only about 20 percent of those that are started each year manage to survive, and close to 400,000 fail annually. These figures affect not only would-be entrepreneurs, but also the millions of Americans who could be sharing in the abundant benefits and countless skilled jobs that would have resulted had these businesses been successful.

If we are to save small business, we—meaning big business, government, non-profit and for-profit endeavors, community organizations, and all other major segments of our society—must join in a massive and systematic effort to nurture the innovative potential and profitable growth of existing small businesses and stimulate the creation of still more new businesses and small firms. We already have at hand the technological, professional, and management resources needed to implement this systematic effort. However, many of these lie dormant or underutilized in corporations, government offices, universities, and other places. We must find ways to assemble them, apply them, and make them more accessible to small business. To achieve these objectives, we must revise existing government policies and commercial practices that inhibit the use of these resources, find better ways of distributing them, and enlist the aid of community-based organizations in coordinating and focusing the talents of business, academia, and state and local governments.

In 1978, I chaired a committee which made a number of

nich made a number of

recommendations to Jordan Baruch, then Assistant Secretary of Commerce, aimed at making capital and management resources more available to small, technically oriented enterprises. Specifically, the committee advocated the following: (1) reducing capital gains taxes to 25 percent for firms employing between 100 and 500 workers, and to 10 percent for firms with fewer than 100 employees; (2) deferring the capital gains tax for firms that re-invest the proceeds from their stock sales in small businesses; (3) raising to $200,000 the threshold at which the full corporate income tax takes effect for small businesses; (4) increasing the carry-forward provisions for small business start-up losses from five to ten years; and (5) restoring qualified stock option plans for key employees.

In 1977-78, the 95th Congress reduced the maximum tax on capital gains to 28 percent; in 1979-80, the 96th Congress followed this example by reducing it further to 20 percent. Pending legislation reflects two more of the committee's recommendations: a carry-forward period of ten years for start-up losses, and the deferral of taxes when the proceeds from stock sales are re-invested in small business.

The committee also suggested means by which research could be further stimulated and the technology developed by big business and government be made more useful to small enterprises. These included: (1) requiring each government agency to allocate at least 10 percent of its R&D budget to helping small business; (2) allowing small companies to establish and maintain tax-deductible reserves for R&D use in times of financial hardship; and (3) redirecting some government-sponsored research into improving small farms and food processors, and making food production less capital- and fossil fuel-intensive.

The first two of these recommendations are contained in pending legislation, but little attention has been given to date to the redirection of funds for agricultural purposes. There are two exceptions: the National Science Foundation recently set aside some funds for research applicable to small-scale agriculture, and the Department of Agriculture has stated its intention to do likewise. Generally speaking, though, no major legislative action has been taken on these matters. This may be due to a lack of awareness of the

tremendous potential inherent in small-scale agriculture and food processing. Control Data is one of the few companies to recognize this potential and act on it; since 1979, we have been committed through Rural Ventures to fostering the development of small-scale agriculture and food-processing enterprises.

Finally, the committee made two recommendations designed to improve the diffusion of technology to small businesses: (1) that each government agency allocate five percent of its R&D funds for technology transfer; and (2) that tax incentives be provided to induce large companies to make their technologies more available to small companies.

Traditional methods of technology transfer have proved ineffective. Were government agencies to begin devoting five percent of their R&D budgets to technology transfer, these funds could be used primarily to encourage individual researchers to contribute their time and skills to identifying commercial applications. The incentives could be tied to the benefits realized from the transfers of the technologies involved.

On October 21, 1980, Congress acknowledged the feasibility of this idea by passing the Stevenson-Wydler Technology Innovation Act of 1980, which mandates that each government agency allot one-half of one percent of its R&D funds to technology transfer. While this falls short of the recommended amount, it is a step in the right direction. No effort has yet been made to give corporations tax incentives for sharing their technologies.

More is needed than budget allocations and tax incentives, however. To increase the flow of technology to small business, a well-defined technology transfer system must be established and implemented. Control Data offers two such systems, Technotec and Worldtech. Technotec is a commercially available computer-based information storage and retrieval network; its memory holds massive amounts of information about technologies that can be quickly recalled. Worldtech is a marketing service that gives subscribers assistance in finding, transferring, and applying specific technologies. One method of transfer in-

volves the establishment of small companies based on replicable technologies in fields including microcircuitry, small-scale agriculture, and food processing.

There are resources besides technology that are not being wisely used. Huge reservoirs of untapped management and professional expertise exist in both big business and universities. Most small businesses urgently require professional and management consulting help, especially during start-up and the early years. Although several consulting programs already exist under the sponsorship of government agencies, local chambers of commerce, universities, and other organizations, these tend to be sporadic, not easily accessible, and not specific enough. A far better approach would be for business, universities, and community-based organizations to work together to develop a systematic method of delivering consulting and other support services to small business.

Since big business is the largest single source of persons qualified to do consulting work, it is especially important for it to recognize the profit potential inherent in aiding small companies. That this is not mere theory has been demonstrated by Control Data's success with a variety of approaches, including Business Advisors, Inc., Control Data Business Centers, and Control Data Business and Technology Centers.

Business Advisors, Inc. (BAI) was organized in 1979 to provide professional assistance to small enterprises in the areas of finance, technology management, manufacturing and processing, communications, marketing, personnel, operations, and strategic and business planning. It is unique with respect to quality, diversity, and affordability. The majority of the people involved are Control Data employees who are made available to small businesses on a part-time, temporary basis. Information about them and their specific skills is entered in a computerized "skills data bank." Also listed are the names and capabilities of retired persons and university personnel who have indicated their interest in and availability for consulting work. This arrangement has proved beneficial to all concerned: to small businesses that obtain the consulting help they need; to Control Data employees who offer their services and find

Senate State Affairs Committee
1982 Interim Report

EFFECTS OF STATE CONTRACTING PROCEDURES ON SMALL AND MINORITY-OWNED ALASKAN BUSINESSES

During the 1982 interim, the Senate State Affairs committee investigated the effects of state construction contracting procedures on small and minority-owned business in Alaska. This is a report on that effort.

Specifically, the committee examined an interagency agreement between the state Department of Transportation and Public Facilities (DOTPF) and the Alaska State Commission on Human Rights (ASCHR) affecting minority owned businesses contracting with the state.

The following report includes a review of that agreement, description of development and transmittal of a polling questionnaire, an analysis of the results, and recommendations based on suggestions and information received during the course of administering the questionnaire.

ASCHR/DOTPF AGREEMENT

In 1980 the ASCHR entered into an agreement with DOTPF to increase participation of minority owned businesses in contracting for state funded capital projects.

DOTPF agreed to take affirmative action in insuring minority owned business had an equitable chance to successfully bid state funded projects. Included in the agreement were provisions requiring that DOTPF:

- create the position of Minority Business Enterprise officer in DOTPF
- Prepare and distribute a policy and procedure memorandum outlining the scope and authority of the MBE officer
- charge the MBE officer with responsibility for developing and implementing an affirmative action plan
- identify and certify MBE's
- require successful prime contract bidders to submit proof of having contacted MBE's as subcontractors (when they intend to subcontract) for information and to solicit bids
- be responsible for notifying and informing minority owned businesses of contracting bids and procedures
- establish, print, maintain, update and distribute a MBE directory

DOTPF and ASCHR also agreed on goals for assuring a reasonable percent of total state construction dollars were contracted to minority owned businesses. Those goals required that 7.5% of total construction dollars for projects under $100,000, not subject to competitive bid, to be contracted through MBE's in FY 1981 (the first year of the agreement), 11.5% in FY 1982, and 15% in FY 1983. Identical percentage goals were agreed upon for total subcontracting dollars on wholly state funded construction projects.

These goals were not considered quotas, and terms of the agreement provided that justified failure by DOTPF to meet these goals would not be considered to be a breach of the agreement.

The agreement further required that ASCHR actively monitor DOTPF's compliance and required DOTPF to provide adequate and accurate records to enable the Commission to document their compliance.

This agreement represented final resolution of a complaint originally filed with the Commission in December, 1978. After several months of negotiations between agencies, it was finalized and went into effect for the first time in 1980.

By June of 1982, a quest editorial in the Anchorage Times by E. Louis Overstreet, charged that DOTPF had not complied with the agreement. He based this charge on an "unreleased report" that "documents the failure of DOTPF to live up to the provision of an agreement it entered into with the Alaska Human Right commission in February 1980".

Shortly after that editorial appeared, a constituent delivered a copy of the ASHRC file charging DOTPF with non-compliance to the Senate State Affairs Committee. That constituent requested the committee to review the effectiveness of the agreement in increasing minority business participation and to find out why the ASCHR was "suppressing" a report of non-compliance under the "cover" of confidentiality.

The committee formally requested a compliance report from the ASCHR. ASCHR, however, was statutorily prevented from meeting the committees request due to terms of the agreement with DOTPF* and restrictions under state law (AS 18.80.115).

The ASCHR subsequently filed an action in superior court charging DOTPF with non-compliance on October 14, 1982. However, until they had exhausted conciliation efforts, and met the time provisions for filing and rebuttal laid out in the agreement, they were prevented from disclosing any information about DOTPF's compliance or non-compliance.

---

* Part III, paragraph 4, of the agreement states: "Whether or not a breach of this agreement has occurred shall be determined by the superior court. Prior to filing an action seeking any such determination by the superior court, the parties agree to maintain strict confidentiality regarding any alleged breach and any conciliation efforts".

Because of the confidentiality restrictions, the committee was unable to enlist the help of the Commission or the Department in determining compliance with and effectiveness of the agreement. At the time they were asked to investigate, it was impossible to predict whether there had been compliance, how long conciliation efforts may take or, indeed, if they were being pursued at all.

The Committee met the same restriction and frustration the minority business community faced when asking for swift and affirmative state action in increasing opportunities to participate in state funded construction projects. In addition, as the committee of oversite, Senate State Affairs was vitally interested in how seriously state agencies complied with agreements made with the Commission.

In order to independently determine the effectiveness of this agreement, the committee prepared and distributed a questionnaire to prime and subcontractors relating to state construction contract award procedures, specifically as they apply to minority owned businesses and the DOTPF/ASCHR agreement.

Following is a description of that questionnaire, an analysis of the results, and recommendations based on suggestions and information received during the course of administering the questionnaire.

QUESTIONNAIRE DESCRIPTION AND METHOD

Two questionnaires were prepared by Committee staff with help from minority businesses, DOTPF's Minority Business Enterprises officer, the Minority Business Assistance Center, and the ASCHR Systemic Discrimination Unit. One was directed to prime contractors, the other to minority owned businesses eligible to subcontract a DOTPF project. (Copies of questionnaire are attached).

Committee staff obtained a list of bid applicants for DOTPF construction projects from 1980 to 1982 and were able to compile a mailing list from that information. When it could be determined, only successful bidders for DOTPF contracts were sent prime contractor questionnaire.

A mailing list for minority owned business was compiled from a directory provided by DOTPF's Minority Business Enterprise officer, the Minority Business Assistance Center, and other constituent sources. Each was sent a Minority Business Enterprise questionnaire.

In addition to returned questionnaires, some recipients phoned or wrote to the committee to provide additional comments or suggestions regarding state contracting procedures and small or minority owned businesses. Copies of that correspondence is available on request.

The two questionnaires covered a time period from June of 1980 through June of 1982 (the same time period as ASCHR's affirmative action agreement with DOTPF), and limited themselves to state funded construction projects.

Besides specific contracting information, contractors were also asked to provide suggestions and recommendations for legislation (or no legislation), to address the philosophical and public policy considerations of minority business set aside programs, and, in some cases, to provide business and personal history (residency, years in business, etc.)

Each questionnaire was accompanied by a Senate State Affairs Committee cover letter explaining the purpose of oversite on the DOTPF/ASCHR agreement. The committee requested return of the questionnaires within two weeks of transmittal and enclosed a self addressed, stamped envelope in an attempt to increase timely participation in the polling process.

STATISTICAL ANALYSIS OF QUESTIONNAIRES

Prime Contractor Questionnaire:

- 436 questionnaires mailed, 49 returned = 11.2% return rate
- nearly half the respondents claimed to have been a successful DOTPF contractor during the time period covered.
- 20% claimed not to be aware of the MBE Directory, 25% didn't use the directory to locate sub-contractor, and nearly half said the "maintained their own list" for locating sub-contractors.
- significant number of respondents were not aware that a MBE contact form was required as part of a DOTPF bid package.
- 36% of respondents said they have never been contracted by DOTPF regarding minority owned businesses and state contracting.
- most prime contractors felt DOTPF was making a serious effort in assuring MBE's adequate opportunity to bid state construction contracts.
- 20 % of prime contractors said they were philosophically opposed to minority owned set aside or advocacy programs and that current MBE programs should be eliminated.
- 18% of respondents felt no legislative action was necessary.

Subcontractor Questionnaire:

- 450 mailed out, 58 returned = 12.9% return rate
- 79% of the respondents were certified as MBE's (12 in 1982, 17 in 1981, 11 in 1980)

- Over half the respondents indicated no awareness of MBE officer services
- over half claimed never to have received bid information from DOTPF.
- 28% of respondents had subcontracted on DOTPF projects.
- 33% of respondents claimed to have been contacted by prime contractors
- 67% of respondents claimed never to have been contacted by prime contractors
- of the successfully bid contracts, most were less than $100,000.
- less than half of the respondents knew about the MBE contact form requirement.
- a majority of likely construction project bidders said they had problems getting bonding and credit.
- over half the respondents businesses have been operating in Alaska for over 3 years with half of those over five years.
- over half the respondents have lived in Alaska over 10 years with over half of them having lived here more than 20 years.

The general questions in the minority business questionnaire addressed and identified problems preventing small Alaskan owned businesses from successfully bidding on state funded construction contracts. A discussion of those problems follows.

PROBLEMS IDENTIFIED

In the last ten years, billions of dollars have been allocated for state funded construction contracts. The sudden explosion of construction, coupled with the size and scope of many projects, has placed small and minority owned Alaskan businesses at a tremendous disadvantage in successfully bidding for contracts.

Besides the "normal" problems with Alaskan-based businesses (high cost of labor and transportation, vast distances, little infrastructure etc.), small and minority owned businesses face special problems.

Minority owned businesses are usually small businesses (under $. million dollars in gross revenues per fiscal year) and are often unable to get bonding, loans or credit, for large-scale contracts. In

addition, they are often unaware of bidding procedures or notices, and are out of the mainstream of the contracting "network".

A brief review of DOTPF construction contract awards from 1978 through 1982 illustrates the problem well. While nearly 50% of the awards are in amounts under $1 million dollars, they represent less than a third of total contract dollars. The vast majority of total construction dollars go to a relative handful of contracts over $1 million dollars.

Most large-scale construction projects are awarded to out-of-state contractors. Even the existing state statute giving a bidders preference to Alaskan-based business, is not sufficient to overcome the competitive edge large, national or international companies have in bidding state funded construction contracts.

Since most of these prime contractors tend to subcontract to other "outside" companies, small and minority owned Alaskan businesses are excluded from taking advantage of the massive input of state dollars into capital projects.

The executive branch has attempted to address this issue through the ASCHR/DOTPF agreement but, so far, has been unable to insure that a reasonable portion of state funded construction dollars remain in Alaska through contracting with small and minority owned businesses.

LEGISLATIVE RECOMMENDATIONS

Specific statutes need addressed by the legislature, to assure a reasonable opportunity for Alaskan owned small businesses to participate in the current flood of state funded construction projects.

Following are recommendation for legislation based on information obtained from the questionnaires:

1. Establish an Alaska Small Business Administration under the Department of Commerce and Economic Development (DCED), modeled after the federal program that would: a) define small businesses for the purpose of this administration, b) provide a source of credit and bonding for Alaska based small businesses, c) promote and advocate for small business development and maintenance in Alaska.

2. Create a statewide office of minority business enterprises in the Department of Commerce and Economic Development, to aide, advocate and support small, minority owned businesses in Alaska.

3. Define "small" Alaskan-based businesses to realistically reflect the average assets and capabilities of existing contractors. Defining "small" as a business having under $2 million dollars in gross revenues for the year preceeding application for certification under an Alaskan small business administration, appears, from the questionnaire, to be a reasonable definition for Alaska.

4. Give adequate bidder preference to Alaska-based businesses that are small and/or minority owned. The current 5% bidders preference should be raised to a 15% preference to small, Alaskan based businesses. The 15% preference should require that the low bidder receive the contract if they re-submit a bid within 10% of the next lowest bid submitted.

5. Require prime contractors and joint ventures to award no less than 50% of total subcontract dollars to small or minority owned Alaskan businesses identified and certified by the Department of Commerce and Economic Development.

6. Include women, Viet Nam veterans and other economically disadvantaged classes of Alaskans in minority status for the purpose of these contracting considerations.

7. Require that no less than 30% of state funded construction contracts be awarded in amounts under $1 million dollars with half of those in amounts under $250,000.

8. Pass a legislative resolution calling upon the Governor to create a task force to address state policy in contracting, local hire, and small business advocacy. Require that the executive, judicial, and legislative branch, as well as other working Alaskans, are included in the task force to assure full representation.*

9. Require surety bonders to keep adequate records to document why businesses are denied credit or bonding.

---

* Court decisions on the jurisdiction and authority of states to limit employment and contracting opportunities to residents or "protected" classes of citizens have been many and varied. A U.S. supreme court decision, issued in February 1983, upheld a Boston Mayor's Executive Order requiring that 50% of wages paid on city funded or administered construction projects be limited to Boston residents.

Based on the findings of that decision, Senate Bill 174, was introduced in the Alaska legislature on March 10, 1983, by Senator Joe Josephson. SB 174 requires that, when a construction project is wholly funded by state money and the state or an agency of the state is signatory to the contract, worker hours on a craft-by-craft basis must be performed at least 50% by bona fide state residents.

SB 174 adopts the specific language of the U.S. Supreme Court decision and replaces AS 36.10.010 in an attempt to strengthen Alaska hire preference laws to meet anticipated court challenges.

While not directly affecting small and minority business contracting, it appears that the Boston decision puts Alaska "back in the residency business". Alaska's authority to grant bidder preferences to resident owned small businesses, for instance, is strengthened by the supreme courts decision.

Official Business

To: Alaskan Contractors (Prime Contractor Questionnaire)

From: Senator Vic Fischer, Chair
Senate State Affairs Committee

Date: September 29, 1982

Re: Minority business contracting

In the last five years, massive amounts of public dollars have gone to the State Department of Transportation and Public Facilities (DOTPF) for statewide construction projects.

It is the intent of the legislature that all Alaskan businesses are assured an equal chance to bid on and participate in state funded capital projects.

In order to assure this, the State Human Rights Commission entered into an agreement with DOTPF in June of 1980 to increase participation of minority owned small businesses in state construction contracting.

As the committee of oversite for the Human Rights Commission, the Senate State Affairs Committee is vitally interested in how seriously state agencies comply with agreements made with the Commission. We cannot determine this without your help.

The enclosed questionnaire was prepared by the Committee to help determine just how effective that agreement has been. Direct information from you is the only way to verify or refute the success of this agreement. Your response will be greatly appreciated.

The scope of this questionnaire includes contracts and sub-contracts involving minority owned businesses from June 1980 to June 1982. It does not include female owned businesses nor projects paid through federal, municipal or private funds.

The purpose of the agreement is to help, not hinder, your efforts to include small minority owned businesses in subcontracting procedures. We need to know if you think it has been successful and where you feel the system could be improved.

Please return this questionnaire by October ~~15~~ 22 to Senator Vic Fischer, Chair, Senate State Affairs Committee, 1024 W 6th Avenue, Suite 204-C, Anchorage, Alaska 99501. We have enclosed a self-addressed, stamped envelope for your convenience. For further information call Ginger Baim, in my office, at 278-3654.

SCR 20: Summary

Purpose of this legislation is to encourage marine insurance availability at competitive rates. This resolution requests the Governor to direct the Division of Insurance to conduct a study which will provide marine insurance underwriters with information concerning fisheries management and safety.

The resolution requests the study to include identification of factors contributing to vessel safety and recommendations to achive safer vessel operations.

Findings of this study are to be reported to the Legislature and the Board of Fisheries so they may consider the adoption of safety regs that address the costs and availability of marine insurance.

NUKA POINT FISHERIES
P.O.B.1113 HOMER, AK 99603-1113 (907)235-8778

TO WHOM IT MAY CONCERN:

Regarding the insurance s ation for vessels and crew, I would like to make a few comm and relate a few experiences we have had in this area.

First the boat owner is in a catch-22 dilemma. The banks loan money to buy boats and demand yearly payments. Banks also demand insurance to protect their collateral. Insurance companies name their expensive premium and demand payment. Boats do not fish until insurance is in effect. No fishing--no money for insurance or loan payments.

Secondly, the insurance premiums were affordable in the less than 3.5% range. Now 4% is the lowest (on a crab boat) and up to 10% has been quoted. If fish prices and available product climbed at the same rate insurance would still be affordable. Such is not the case.

We own a crab boat. In 1980-82 the rate was about 2%. In the fall of 1983 it was 2.85% if we purchased a stability computer; otherwise it would be 3.25%. For the fall of 84, we have port risk only awaiting the insurance market to level out. We are hoping for 4% for the 85 season. We have been warned it could go to 7%. Our lender requires we insure for 1.5 million. The premium difference is $45,000.

Another example of outrageous premiums--Our crab boat is also a tow boat. We requested a quote for trip insurance for travelling from Homer to Nome and return with a disabled tug. Normal trading

warranties go almost to Nome. The trip would take about 20 days. The premium--$25,000.

I don't know the answer to this problem. Insurance companies have definitely experienced tremendous claims; however, most companies I know have considerable assets and are accustomed to making substantial profits. Some companies are lax in scrutinizing clients and insure questionable boats.

One aspect that could be looked at is the liability boat owners and underwriters face regarding crewmen injuries. No other industries I know of face such all-encompassing responsibilities in the event of an accident. Several applicable laws date back years to when crewmen were slaves. Laws need to be updated to make crewmen at least partly responsible for their own safety. The boat owner should provide a safe work place but if the crewman is negligent, i.e. inebriated, the vessel owner should not be liable.

Thank you for listening.

Jessie Nelson

Jessie Nelson

UNITED FISHERMEN OF ALASKA

[illegible]

Cass M. Parsons
Executive Director

January 25, 1985

Honorable Bill Sheffield
Governor
State of Alaska
Pouch A
Juneau, Alaska 99811

Dear Governor Sheffield:

The United Fishermen of Alaska are concerned about a major problem the fishing industry is currently experiencing. The problem is the prohibitive cost or unavailability of vessel insurance From all reports we have received, the problem appears to have been cause by two factors. First, the Insurance Company of North America (INA) entered the Alaskan marine market several years ago offering premiums of around 4% (of the vessel value). This premium was much lower than other companies were offering so INA succeeded in essentially cornering the market on the larger crabbers/trawlers in Alaska. Secondly, there followed two terrible years when one out of every seven crab vessels sunk. Subsequently, INA pulled out, giving many boats only 15 days notice. The other companies remain unwilling to return to the Alaskan marine market.

The few crabbers/trawlers who can find insurance are not getting full coverage and are paying premiums as high as 12%. That means a vessel valued at $1 million (a common value) must pay a premium cost per year of $120,000! As a result, people are going fishing uninsured or are staying home because it costs less. Consequently, many Alaskan fishermen are in danger of losing their vessels.

This is a rather simplistic explanation as there are other factors involved, but it does provide a basic picture of what has occurred. There are two spin-offs about which you should also know. First, although full-time crabbers caused the problem, the problem now extends to vessels who are only crabbing part-time (large seiners, trawlers, etc.) and to many other vessels that don't fish for crab but are being penalized by high premiums from companies trying to spread the losses.

It is our view that several things must occur in order to help solve this problem. First, we need to discover what the principal cuases of the accidents are; i.e., equipment failure, operator error, improper safety equipment, etc. and then recommend specific changes to prevent the accidents from occurring. We could mandate annual vessel checks for certain equipment and we could recommend changes in fisheries management policies so that skippers and crew are not fishing in an exhausted condition. We could recommend that every fisherman and crewmember take a course on fishing vessel safety.

It is very important that we identify the specific causes of vessel accidents. We will gather the information from the vessel owners and skippers which requires carefully worded and confidential quentionaires. We will need to contract with the underwriters for the information they have on file since it is unlikely they will want an outsider looking at confidential information. Additionally, we will need to gather accident report information from the coast guard.

We feel the UFA is the organization that should conduct this review because we have the expertise available and we have access to the fishermen. We also have the ability through our board of directors to make carefully considered recommendations that other fishermen will respect. Furthermore, the results of this study will be published in the Alaska Fisherman's Journal. Recommendations will be made to the Governor's Office, Legislature and Board of Fish.

Thank you for your consideration.

Sincerely,

Cass M. Parsons
UFA Executive Director

To Whom it May Concern,

We are all aware many Alaskan fishermen are having a pretty rough time "hanging in there" due to declining crab and shrimp stocks, increased vessel effort and near disaster halibut and herring prices. What's making things worse is that insurance rates are sky-rocketing. It is almost impossible for many to go fishing if you are lucky enough to even find insurance.

On Dec. 31st 1984 our current insurance policy expires on our 80 foot wooden boat. I have been told by many companies it will be hard for us to find insurance in the coming year and maybe impossible if we decide to fish tanner crab. If we are lucky enough to renew for another year we can be sure premiums will be much higher than the $36,0000.00 wehave paid this year. Our policy does not even have a lay-up warrenty and we are allowed only nine months of fishing - unless we want to pay more of course.

So many fishermen cannot even afford to go fishing because insurance rates are currently running 5½ - 10% the value of the vessel. The rates are even higher if you plan to crab fish. I know many fishing boats will be tied to the docks this upcoming crab season; others will be out taking a chance with no insurance. We deliberated for days on whether to pay $11,000.00 to fish tanner crab in Cook Inlet for two months. Between the insurance and the other expenses the figures barely add up to take the chance and go. Furthermore, I made dozens of phone calls checking into prospective insurance markets and was told that many companies will not write new marine policies and many more are looking for every reason possible to drop you. For instance, this crab season we were not allowed to lease out our boat; our policy would be cancelled unless we personally hired a skipper.

Many marine fiancial institutions are urging fishermen to convert their boats and forge into new fisheries. But I ask, how can we when we are paying these outrageous premiums for vessel insurance? We need state legislation and funds generated to create a statewide or community insurance pool to alleviate this problem. Strict measures could be enforced on the vessels condition, upkeep and skipper creditability before joinning into a pool. I see

no immediate relief in the months ahead for insurance rates to drop back down in the two to three percent range - WE NEED ACTION NOW!

Sincerely,

Deborah Leerhuser

F/V Kamishak Queen

Nov 7, 1984

To Whom It May Concern,

I am writing in regards to the problems we are having with vessel insurance in Alaska.

As you know, the crab fishing industry is at a all time low. Many fishing boats and their companies are having a hard time making ends meet. Which may be the reason for the loss of some crab fishing boats,-Lack of funds to maintain and repair as needed.

The cost of vessel insurance is steadily increasing. Where it use to cost 1.8% (of the value of your vessel) per year, went to 3.0% and now is 8.0%. In some cases even higher. We can't survive a year with rates that equate to 40,000.00 dollars to 50,000.00 dollars a year.

There needs to be some flexibility for clients with good past records. Some of us don't cut corners when it comes to our boats. We maintain our engine rooms in good running condition, at <u>all</u> times. We should'nt have to carry the burden for those who don't.

Possibilty a solution would be for the insurance underwriters, to be more selective with their clientele. Have a representative from their company come visit the boat requesting insurance. Have this representative be knowledgeable in both the insurance field and fishing industry. Require him (or her) to of run a vessel before, so he knows what a well maintained engine room looks like. And then charge vessel insurance rates according to that representatives report.

y

Kamishak Bay Fishing Co. Bob Tremain - Bill Bledsoe
P.O. Box 418 - Homer, Alaska 99603 (907) 235-8076
F/V Kamishak Queen

" My experience with insurance companies has not been good. We have never had a claim. Bob Tremain maintains his boats very well. We take great care and a good deal of time preparing for any season. We recenty rerigged our vessel 'Kamishak Queen' from a crabber to a black cod longliner with freezing ability also.

We informed our insurance broker of this venture 3 months before we were actually able to leave on our first black cod trip. "There was'nt any problem" according to all the many telephone conversations we had with the insurance broker. We called to inform them that the vessel was about to leave the harbor, on her first trip for black cod and they at that time, decided to cancel us and gave us 15 days to find new coverage or fish with no insurance. Which was impossible due to our financing.

We had informed them 3 months in advance of the changes in fishing industy, skipper and fishing grounds. We were still charged for cancellation of the policy. Does that seem fair? Not to us. Espesially being as we had to find a new broker and underwriters. Plus pay a large cash down payment, again. (we had sunken all our money into the rerigging for black cod) We were upset!

We need some help to form some dind of balance between us and our insurance companies. Fishing is very frustrating anyway, we don't need insurance hassles too.

Thank you for listening.

Dian Tremain

This article is a copy taken from the November issue of Pacific Fishing Magazine and it suggests that insurance rates will begin to drop down into the 4 to 5 percent range in January 1985. From the many insurance companies I spoke with recently this is not true; rates are expected to remain in the 5 to 10 percent range. Furthermore, domestic markets are not re-entering the commercial fishing insurance markets, as stated.

How To Survive the Insurance Squeeze

Amo[illegible] all the other crises facing fishe[illegible] one is more serious than th[illegible] crisis in insurance. Insurance companies now consider the fishing industry too great of a risk and many will no longer provide hull and machinery and protection and indemnity insurance at any price. There are hundreds of stories of fishermen who are unable to find insurance for their boats. Consider these:

An Oregon fisherman with 20 years of experience and no insurance losses tried to get $500,000 of insurance. His boat is worth $1 million, but he decided to insure at the bare minimum. He wanted to take his 80-foot crabber to the Pribilofs. When that fact became known, he could not find any insurance.

Take a well known king crabber from Seattle. He was lucky and able to find somebody to cover him. The cost is what hurt. Where he had paid a bit over $80,000 a few years ago, the insurance companies now quote him an insurance premium of over $300,000 for the same level of hull and P & I coverage.

Although these big boats offer the most dramatic examples of the current insurance crisis, brokers up and down the coast report that all fishing vessels are suffering dramatic escalation in their insurance costs.

No Domestic Carriers

As of early September, there were at the most two domestic carriers that would even consider insuring West Coast commercial fishing vessels. This has meant that brokers must go to foreign carriers, principally located in London, to find enough insurance for their fishermen clients.

Why are the insurance companies afraid of the fishing industry? The reason is simple: they've lost a lot of money the last few years, particularly on Alaskan crabbers. In many instances, the insurance premiums paid hardly came close to matching the amount of losses claimed.

At the present time, a large Alaskan crabber can find enough insurance coverage to equal about $2.3 million. This insurance comes from three sources. First, $1 million from London carriers. Second, $1 million from insurance pools. Third, $300,000 from a couple of domestic carriers.

This sounds like plenty of insurance at first glance, but the average Alaska king crabber has a value of $1.5 million to $3 million. In other words, there is not now enough insurance capacity to fully cover most crabbers.

The current squeeze does not only affect boats that fish Alaska. That used to be the case. According to most brokers, the new demarcation is not geographic but monetary. Any vessel valued at more than $300,000 will have a difficult time finding adequate insurance coverage no matter where the boat fishes. Those vessels worth less than $300,000 may be able to obtain adequate coverage but only at rather exorbitant rates.

A Solution Comes

The current rate structure ranges between 5½ percent and 10 percent of the value of the boat. The more losses you have had in the past, the higher the rate you'll have to pay. And, again, no one company at the present time will assume the total risk. That means that your broker must shop among several carriers until the total risk is assumed.

Most brokers expect this situation to ease within the next several months. The fact that the London carriers are willing to take even some risk on fishing vessels is a good sign. In the past, U.S. insurance carriers have followed the lead of the London carriers. In other words, look for the domestic insurance companies to re-enter the commercial fishing market.

When will they come back? Estimates range from this month to January 1985.

What about the rates then? They will be lower than now, according to most observers. Look for premiums ranging between 4 percent and 5 percent. This may not be as good as the 2 percent to 3 percent of a few years ago, but they are far more palatable than the current rates.

10 Actions To Take

There are several actions you can take to increase the chance that you'll get all the coverage you need when you need it.

1. Investigate any possible source of insurance. Keep your ear tuned to any rumors. Admittedly, your broker will probably know what's available, but never assume anything.
2. Use a major insurance broker. If you use an established broker who's familiar with the fishing industry, you'll have a better chance of finding what insurance is available.
3. Get tenure with your broker. In other words, find a good broker and stay with him. Don't switch brokers for trivial reasons or a rate that's only marginally lower than your present rate. If you develop loyalty in your broker, your broker will work harder to find the insurance you need.
4. Join a pool. Lay the groundwork now to get into a pool.
5. Join a fleet. Boats in a fleet have a better chance of getting insurance. What's a fleet? Simply a group of boats that work the same area, or work for the same processor, or have some loose bond among them.
6. Cut your insurance to cover your equity, not the full value of your boat.
7. Have a good record. The fewer accidents, the fewer insurance claims, the better risk you are.
8. Be an owner-operator. Absentee owners or investor-owners are not looked upon favorably by insurance companies. The skippers of these boats change too often. The insurance company feels more secure if you are sharing the risk, and as an owner-operator you do.
9. Get an up-to-date, out-of-water survey of your boat. This will provide the basis for a realistic valuation of your boat.
10. Accept a larger deductible where possible. Some fishermen have even gone so far as to accept "total loss risk." In other words, the boat is covered only if it is a total loss.

Be sure not to panic in the tight insurance market. Don't jump at a deal that's too good to be true. Probably it isn't true. Be sure that the insurance you get is good insurance (see *Pacific Fishing*, February 1984).

RE: Vessel Insurance in Crab Fisheries
Research Request 85-034

Lisa Weissler of your staff asked us for historical information on the insurance market for crab boats. She also asked what actions might make insurance cheaper and easier to purchase. I contacted representatives of fishermen's organizations, the marine insurance industry, and the State Division of Insurance for information. I found that they all are concerned about the current shortage of crab vessel insurance, but have no immediate solutions to suggest. Their assessments are provided below, along with a number of longer range policy options. I have also attached an article from the November issue of Pacific Fishing which makes several specific recommendations to fishermen seeking insurance coverage.

Overview

Five years ago there were several surplus carriers underwriting marine insurance for the Alaska crab fleet at a premium rate of 7 to 8 percent of the insured value.[1] The largest carrier was Lloyd's of London. In 1981 or so, when the high value crab boats flooded the market, the Insurance Company of North America (INA) sought to tie up the crab market by dropping their rates to 1.5 to 4 percent,[2] depending on the vessel and operator. The other carriers, who had been losing money even at 8 percent, pulled out. In 1982-83, INA reportedly collected $3.5 million in premiums and incurred $34 million worth of losses on

[1]Surplus carriers are not "admitted" or regulated by the State. They can only offer classes of insurance, such as marine, which are not readily available through admitted carriers.

[2]At this rate they were not expecting any profit on their underwriting. Their strategy, called "cash flow underwriting," was to earn profits on their investments before claims had to be paid.

marine insurance. Twelve to thirteen big boats sank that year, approximately one out of seven in the fleet. The best known of these were the Americus and Altair which rolled over with a load of pots in fair weather conditions in March of 1983. Following these heavy losses INA pulled out of marine insurance for large vessels, canceling many policies on 30 days notice. The other carriers are reluctant to reenter the market in light of the recent loss experience.

All the fisheries nationwide are currently experiencing substantial rate increases for marine insurance but none is harder hit than the Bering Sea and Aleutian crab fleet. Several of the boats were not able to leave port this year for lack of insurance. The big trawlers that fish the Bering Sea and Aleutians are also having some difficulty getting insurance. The smaller crab boats that fish inside waters can get insurance, but some have reported prohibitive premium rates. Premiums on a $575,000 Southeast seiner/crabber jumped from $18,000 in 1983 to $43,000 in 1984.

The current insurance crunch in the crab fishery is directly related to the boom/bust cycle of king crab. The boom in the late seventies fostered the construction of a fleet of multi-million dollar vessels. The bust in the last two seasons has radically shortened the season and made it difficult for the big boats to cover mortgage payments and operating expenses. There is more pressure on the boats to fish every hour, regardless of weather, and to transport all their pots in one load to minimize travel time. Experienced skippers and crew who expect high returns are leaving the fishery and being replaced by less experienced operators and crew. Vessel maintenance is being shorted. Vessels are being converted to trawl part-time, which radically changes their stability characteristics. Market values for the vessels have dropped radically, in many cases below the outstanding mortgage balance. There are rumors that some vessels have been deliberately sunk to collect the insurance. All these factors contribute to the high losses in recent years, and the consequent tightening of the insurance market.

High losses have also fostered a renewed concern for safety. A Fishing Industry Safety and Health Conference has already been planned for December 12, 1984, in Seattle. Sponsoring organizations include North Pacific Vessel Owners Association, Association of Marine Underwriters of Seattle, National Fisherman, and National Marine Fisheries Service, NOAA. (For more information contact National Marine Fisheries Service, NOAA, FNWR2, 7600 Sand Point Way N.E., Seattle, WA 98115).

Stability studies are being conducted at the University of Washington to analyze the causes of the vessel sinkings. The finding so far is that the problem is not primarily one of design, but human error. The operators often don't understand the stability calculation tables and

don't use them properly when loading their boats. Small boats are not as much of a problem because they are more responsive and easier to judge by feel. More information on stability problems is now being published in fishing journals. As renewed safety consciousness permeates the fleet, fewer losses should eventually translate into lower premium rates and more underwriting capacity.

Most insurance carriers are not very familiar with the fishing industry. The Alaska insurance brokers I spoke with felt that the premium increases on the small crab boats are not justified by their loss experience; they are simply getting caught up in the same insurance net with the big boats. They also believe that underwriting losses could be substantially reduced if the carriers paid more attention to the age, experience, and practices of the operator. Owner-operators have significantly fewer losses than absentee owners. The Alaska-based fleet also has substantially fewer losses than the Seattle-based fleet.

Several carriers are writing marine insurance, but the coverage is limited due to the shortage of reinsurance. Brokers I spoke with have been able to piece together as much as $1 million worth of coverage through several insurance carriers. The only firm that will underwrite Bering Sea crabbers presently is Lloyd's of London, and that too is difficult to obtain. Brokers are currently negotiating with other carriers to enter the market.

Limited amounts of insurance is also available to fishermen who qualify through the four Seattle-based pools. The pools are insurance cooperatives in which any premiums in excess of losses are redistributed to the members. Premium rates are 5 percent. To be admitted to a pool, a fisherman must be recommended in writing by three members and approved by the board. The pools are very conservative about who they admit, since the members' money is directly at stake. Pool members also strive to reduce losses by policing each other's safety practices and helping each other out in risky situations. One of the pools, United Marine Fund, experienced no losses in 1983 and was able to refund 100% of members' premiums. Between the four pools, $1 million worth of coverage is available. Pool members are also more likely to get insurance through a carrier, as they are regarded as a better risk.

POLICY OPTIONS AND PROSPECTS

1. Let the market take care of it. Brokers seeking new sources of marine coverage are currently negotiating with insurance carriers. If the price is right, carriers will reenter the market. Several of my contacts mentioned that the reinsurance market is improving again and predicted that within the next

few months carriers will reenter the marine insurance market. For the big crab boats, they are predicting premium rates of about 14 percent. There will likely be a difficult period of economic readjustment, and some boats may find that fishing is uneconomical.

2. Organize a pool. To establish a pool in Alaska, ten or more people need to incorporate and organize as a reciprocal insurer under AS 21.75. Or, if AS 21.75.330 were amended to allow marine insurance coverage, the incorporators could organize as a cooperative insurer, which is a little easier. A substantial amount of capital would be needed to get started, and the pool would have to be very conservative in its membership and coverage until it was firmly established.[3]

3. Legislatively create a public corporation to issue marine insurance, akin to the Medical Indemnity Corporation of Alaska which provides medical malpractice insurance. One potential problem in this approach is that the most knowledgeable people to review applications for coverage are other fishermen in the same fishery. These individuals may have difficulty, however, in turning down their friends and neighbors. This is less of a problem in pools because the reviewers have a personal financial stake in minimizing losses.

4. Improve the safety record of the fleet. Lowering losses will make the market more attractive to insurance carriers, as well as save lives. For this, fisherman education is basic. The upcoming conference is a good start. More could be done through fishermen's publications and organizations.

5. Management changes aimed at lessening the time and load pressures on fishermen might also help fishermen fish more safely. The National Council for Fishing Vessel Safety and Insurance in Washington D.C. is conducting a federally funded study on the safety impact of fish management policies. A similar study could be done for Alaska. Policy changes that could be examined include re-establishing the bait up period, timing openings and closures to avoid fishing in bad weather, instituting pot limits, or limiting the number of boats in the fishery to the point that seasons can be lengthened.

---

[3]A pool may make the remaining market less attractive to carriers, however, as pools cream off the good risks and leave the bad for the carriers.

6. Hiring larger vessels to transport the pots to and from the grounds would help prevent overloading and improve safety. One freighter could serve a whole fleet of Bering Sea crabbers.

7. Provide more information to insurance carriers. If the carriers were better able to discriminate between good risks and bad risks, they might be more willing to underwrite marine insurance. A study of risk factors could be funded by government or industry.

8. Fishermen engaged in joint ventures with foreign companies might be able to purchase insurance through their foreign partner.

9. Protection and indemnity insurance problems, while not as severe as hull insurance problems, could be addressed through Congressional action amending the Jones Act to institute liability limitations or establish a workers' compensation type program.

* * * *

I hope this memorandum answers your questions. If you would like me to examine any of these (or other options) in more detail, please contact me.

How To Survive the Insurance Squeeze

Among all the other crises facing fishermen, none is more serious than the current crisis in insurance. Insurance companies now consider the fishing industry too great of a risk and many will no longer provide hull and machinery and protection and indemnity insurance at any price. There are hundreds of stories of fishermen who are unable to find insurance for their boats. Consider these:

An Oregon fisherman with 20 years of experience and no insurance losses tried to get $500,000 of insurance. His boat is worth $1 million, but he decided to insure at the bare minimum. He wanted to take his 80-foot crabber to the Pribilofs. When that fact became known, he could not find any insurance.

Take a well-known king crabber from Seattle. He was lucky and able to find somebody to cover him. The cost is what hurt. Where he had paid a bit over $80,000 a few years ago, the insurance companies now quote him an insurance premium of over $300,000 for the same level of hull and P & I coverage.

Although these big boats offer the most dramatic examples of the current insurance crisis, brokers up and down the coast report that all fishing vessels are suffering dramatic escalation in their insurance costs.

No Domestic Carriers

As of early September, there were at the most two domestic carriers that would even consider insuring West Coast commercial fishing vessels. This has meant that brokers must go to foreign carriers, principally located in London, to find enough insurance for their fishermen-clients.

Why are the insurance companies afraid of the fishing industry? The reason is simple: they've lost a lot of money the last few years, particularly on Alaskan crabbers. In many instances, the insurance premiums paid hardly came close to matching the amount of losses claimed.

At the present time, a large Alaskan crabber can find enough insurance coverage to equal about $2.3 million. This insurance comes from three sources. First, $1 million from London carriers. Second, $1 million from insurance pools. Third, $300,000 from a couple of domestic carriers.

This sounds like plenty of insurance at first glance, but the average Alaska king crabber has a value of $1.5 million to $3 million. In other words, there is not now enough insurance capacity to fully cover most crabbers.

The current squeeze does not only affect boats that fish Alaska. That used to be the case. According to most brokers, the new demarcation is not geographic but monetary. Any vessel valued at more than $300,000 will have a difficult time finding adequate insurance coverage no matter where the boat fishes. Those vessels worth less than $300,000 may be able to obtain adequate coverage but only at rather exorbitant rates.

A Solution Comes

The current rate structure ranges between 5½ percent and 10 percent of the value of the boat. The more losses you have had in the past, the higher the rate you'll have to pay. And, again, no one company at the present time will assume the total risk. That means that your broker must shop among several carriers until the total risk is assumed.

Most brokers expect this situation to ease within the next several months. The fact that the London carriers are willing to take even some risk on fishing vessels is a good sign. In the past, U.S. insurance carriers have followed the lead of the London carriers. In other words, look for the domestic insurance companies to re-enter the commercial fishing market.

When will they come back? Estimates range from this month to January 1985.

What about the rates then? They will be lower than now, according to most observers. Look for premiums ranging between 4 percent and 5 percent. This may not be as good as the 2 percent to 3 percent of a few years ago, but they are far more palatable than the current rates.

10 Actions To Take

There are several actions you can take to increase the chance that you'll get all the coverage you need when you need it.

1. Investigate any possible source of insurance. Keep your ear tuned to any rumors. Admittedly, your broker will probably know what's available, but never assume anything.
2. Use a major insurance broker. If you use an established broker who's familiar with the fishing industry, you'll have a better chance of finding what insurance is available.
3. Get tenure with your broker. In other words, find a good broker and stay with him. Don't switch brokers for trivial reasons or a rate that's only marginally lower than your present rate. If you develop loyalty in your broker, your broker will work harder to find the insurance you need.
4. Join a pool. Lay the groundwork now to get into a pool.
5. Join a fleet. Boats in a fleet have a better chance of getting insurance. What's a fleet? Simply a group of boats that work the same area, or work for the same processor, or have some loose bond among them.
6. Cut your insurance to cover your equity, not the full value of your boat.
7. Have a good record. The fewer accidents, the fewer insurance claims, the better risk you are.
8. Be an owner-operator. Absentee owners or investor-owners are not looked upon favorably by insurance companies. The skippers of these boats change too often. The insurance company feels more secure if you are sharing the risk, and as an owner-operator you do.
9. Get an up-to-date, out-of-water survey of your boat. This will provide the basis for a realistic valuation of your boat.
10. Accept a larger deductible where possible. Some fishermen have even gone so far as to accept "total loss risk." In other words, the boat is covered only if it is a total loss.

Be sure not to panic in the tight insurance market. Don't jump at a deal that's too good to be true. Probably it isn't true. Be sure that the insurance you get is good insurance (see *Pacific Fishing*, February 1984).

IN THE SENATE

SENATE CONCURRENT RESOLUTION NO. 20

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

Relating to insurance of fishing vessels.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

WHEREAS the cost of marine hull insurance for ~~crab, trawl, and~~ diversified seine ~~fishing vessels~~ in the state is prohibitively expensive, and often this insurance is only available in part or not available at all; and

WHEREAS this problem occurs statewide and is preventing vessel owners from diversifying into other fisheries and in some cases preventing vessel owners from fishing; and

WHEREAS this situation has resulted primarily from the high number of fishing accidents in recent years; and

WHEREAS the high number of accidents has resulted in tragic and in almost all cases, avoidable instances of loss of life; and

WHEREAS underwriters of marine insurance in the state have ceased issuing policies of insurance for this type of risk due to this situation; and

WHEREAS many marine insurance underwriters are not familiar with the fishing industry and the causes of fishing accidents;

BE IT RESOLVED by the Alaska State Legislature that the Governor is requested to direct the Department of Commerce and Economic Development, division of insurance, to conduct a study to provide the underwriters of marine insurance in the state with information concerning fisheries management and safety that will encourage them to make insurance available at competitive rates; and be it

FURTHER RESOLVED that the study

(1) quantify the contribution of operator factors and nonoperator factors, such as weather;

(2) identify which of these operator and nonoperator factors could be reduced by changes in fisheries management policy;

(3) identify specific types of safety problems;

(4) determine the viability of a statewide or industry insurance pool;

(5) make recommendations designed to achieve safer vessel operations; and be it

FURTHER RESOLVED that the findings of this study be reported to the Alaska State Legislature and to the ~~State Board of Fisheries~~ 2nd Session of 14th Leg. Dept. of F.S. so that they may consider adoption of safety regulations that address the factors causing an increase in the cost of marine insurance.

Juneau, AK 99811

Re: SCR 21, Relating to local hire

Dear Senator Zharoff:

I am responding to a request from one of your staffers for our comments regarding SCR 21, "Relating to a report on maximizing local hire." The resolution would request the Attorney General and the Commissioner of Labor to prepare a report for the Legislature on a course of action that the state may take in order to maximize local hire.

Although the Department of Law certainly could participate in a report which would outline the present legal precedents and limitations on the state's ability to encourage local hire, we believe the real need at this point is for the preparation of a study which examines the problem of unemployment in Alaska and the extent to which the employment of nonresidents in various industries affects or aggravates the unemployment problem for residents. Such a study, at least with respect to construction employment in the state, is proposed in HB 295, which has now passed the House. Ideally, such a study should be expanded (with the funds necessary to accomplish that) to include a review of the unemployment problem of Alaska residents in other industries in which the Legislature might wish to consider the possibility of creating local hire requirements (e.g., fish processing and timber).

If I can provide any further information with respect to this matter, please do not hesitate to contact me.

Sincerely,

NORMAN C. GORSUCH
ATTORNEY GENERAL

SENATE CONCURRENT RESOLUTION NO. 21

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

Relating to a report on maximizing local hire.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

WHEREAS the unemployment and underemployment of Alaskans causes serious social and economic problems in the state; and

WHEREAS the legislature is seeking ways to remedy the unemployment and underemployment of Alaskans;

BE IT RESOLVED by the Alaska State Legislature that the attorney general and the commissioner of labor are requested to report to the legislature by the first day of the Second Session of the Fourteenth Legislature on a course of action the state may take in order to maximize local hire.

Chairman's Information:

1) SCR 21: "Relating to a report on maximizing local hire"

   a) Introduced: Sen Josephson, and Sen Zharoff

   b) Co-Sponsors:

2) INTENT: Requests that the attorney general and the commssioner of labor report to the Legislature on the first day of the second session of the 14th Legislature on a course of action the state may take to maximize local hire.

   FISCAL NOTE: We have 2 fiscal note versions for this bill. One fiscal note is predicated on the passage of HB 295 (Study of unemployment and local hire issues) and is for $69.0. If HB 295 does not pass, then a fiscal note of $89.0 accompanies this resolution.

Bill No. Senate Concurrent Resolution No. 21

Title "Relating to a report on maximizing local hire.

Date April 26, 1985

Contact: Robert W. Landau
465-2700
Eileen Plate
465-2700

Senate Concurrent Resolution No. 21 requests the Attorney General and the Commissioner of Labor to report on a course of action the state may take to maximize local hire in Alaska. The scope of the proposed inquiry would broadly cover the entire labor force employed in both the public and private sectors.

Currently, the state's local hire requirements apply only on public construction projects. However, as state revenues decline, it is essential that all industries and geographic areas of the state be examined in order to maximize the economic benefits of local hire and reduce the adverse impact of unemployment and underemployment.

Preliminary statistics prepared by the Department of Labor suggest that many industries in Alaska currently employ significant numbers of nonresidents. The Department believes it is important to conduct further research to identify those industries and areas with the highest percentages of nonresidents and to ascertain the precise impact of wages paid to both residents and nonresidents on the Alaska economy and the cost of government.

Once an adequate statistical foundation has been established, the state will be in a much better position to make policy and to evaluate the economic and legal implications of any local hire policy.

The Department of Labor supports Senate Concurrent Resolution No. 21. A fiscal note is attached.

FISCAL NOTE ANALYSIS

THE LEGISLATURE OF THE STATE OF ALASKA
FOURTEENTH LEGISLATURE
BILL/RESOLUTION NO.: SCR 21
TITLE: "Relating to a report on maximizing local hire"
AGENCY AFFECTED: Department of Labor

This resolution requests a report to the legislature on a course of action to maximize local hire.

Assumptions:

1. Further research is necessary to: a) establish an accurate benchmark of nonresident to resident employees and wages by industry and area; b) survey employees for reasons associated with high nonresident hire; and c) analyze the benchmark data and employer responses for policy implications.

2. Work would begin July 1, 1985, and be conducted with a written report to be submitted to the Alaska Legislature on January 14, 1986.

3. If House Bill 295 is funded at $100,000 then the costs associated with this resolution would be reduced by $20,000.

4. The Alaska Department of Labor will assign a Labor Economist III for three months, a Labor Economist II for six months, and a Statistical Technician I for six months to research and provide this information.

Senator Vic Fischer
Alaska State Legislature • P.O. Box V • Juneau, Alaska 99811 • (907) 465-4954

TO: Interested Parties

FR: Senator Vic Fischer

RE: Sponsor Substitute to SSSCR 35; relating to general liability and property insurance.

DT: March 25, 1986

The sponsor substitute for SCR 35 introduced today adds provisions directed at broad insurance issues of state and national concern.

The resolution is a necessary complement to both the insurance bills being considered in the Senate and House.

SCR 35 combined with the Labor and Commerce bills provides a package of proposals covering some reforms of the legal system, rights of the consumer, roles and duties of Alaska's Division of Insurance, and operation of the insurance industry in Alaska.

The resolution directs the Governor to work with other states, the Council of State Governments and other national organizations, the federal administration, and Congress to investigate:

* proposals for national regulation of the insurance industry
* establishment of multi-state insurance pools for high-risk markets
* development with other states of a multistate reinsurance compact

The resolution also directs the Division of Insurance to provide the next state legislature with a report on the status of liability and property insurance in Alaska as well as identify the Division's needs to help increase the availability of affordable insurance.

horage, Alaska 99501 • (907) 278-3654

Department of Commerce & Economic Development / POSITION PAPER

SSSCR 35: "Relating to general liability and property insurance."

This resolution requests the Governor to work with others to investigate national regulation of insurance, multistate pools for high risk markets and multistate reinsurance compacts.

Although we feel that federal regulation of insurance will be to the detriment of Alaskans due to our small population and unique problems, we have no objection to working with any group to investigate any proposal which may positively affect market availability.

The resolution requires reports to the Legislature in three specific areas. The first uses the terms availability and affordability. Unless a clear definition of affordability is provided, the report would be meaningless. What is affordable to one person may be unaffordable to another. Reports on adequacy or excessiveness of rate relative to potential exposure is possible.

The resolution requires a report to the Legislature by the Division of Insurance on resource or statutory changes needed in order to increase availability and affordability of insurance. Although such a report could be written, subject to previous comments on affordability, it circumvents the procedures set up by the Executive Branch and poses a potential constitutional question over separation of powers by requiring an Executive Branch agency to make reports concerning policy issues directly to the Legislature rather than through the Governor. That problem would be avoided by reporting through the Governor.

Any meaningful study or coordination with national groups involves travel out of state and thus has a fiscal impact. We have prepared the minimum amount for any meaningful or serious activity. Anything less would be ineffective.

Position Paper
SJR 2

This resolution would put before the voters of the state an amendment to the Constitution of the State of Alaska dealing with limits on appropriations and the number of employees of the State. The resolution will amend and clarify the appropriation limit currently found in Article IX, Section 16, of the Constitution. It would also impose an employment limit of 4% of the state's population. This position paper deals only with the latter provision.

Proposed Article IX, Section 16, subsection (g) provides the definition of population: "In this section 'population' means total resident population of the state computed under the method of computation used in the most recent federal decennial census." This provision presents technical problems. The "method of computation" used in the decennial census is always a physical count. If the resolution intends to provide for annual population figures, an annual count is required. The "continuously compounded annual rate of change" referred to in proposed subparagraph (b)(2) is not established by the United States Census Bureau and is therefore not an appropriate estimate.

The United States Census Bureau does provide population estimates. These estimates are subsequently revised for two years. The estimates are generally based on stable states with large populations. They vary considerably from the estimates prepared by the Alaska Department of Labor. For example, the estimates for July 1, 1982, differ by 4,000 residents; the estimates for July 1, 1983, differ by 29,000 residents; preliminary unpublished estimates for July 1, 1984, differ by 38,000 residents. With a 4% limit on the number of employees, this represents a difference of 1,520 employees. We believe expert advice from the Research and Analysis Section of the Department of Labor should be secured in drafting appropriate language for annual population estimates.

There will also be a problem with timeliness. The first estimate of population as of July 1 from the United States Census Bureau is not available until several months later. In other words, a fiscal year would be well underway before population at the start of the year, and therefore the maximum employee limit, is known.

Finally, there will be a problem of allocation of positions. For example, if the University of Alaska system were to grow in national and international prominence and attract a rapidly growing student body with an increase in facility and staff, soon the 4% cap on employees would be exceeded. Although the appropriation of student tuition to the University would not be subject to the spending limit (see proposed subsection (e)), the positions created because of the appropriation would be subject to the employee limit. The positions would have to come from the Legislative, Judicial, and Executive Branches with a corresponding decrease in their abilities to meet their Constitutional responsibilities.

Position Paper
SJR 2

The approach which better serves the state's interest is to manage state government human resources rather than focusing on controlling the number of employees. Managing state government human resources involves using all the management tools of planning, organizing, staffing, directing, as well as controlling. Management is necessary because the relationships among state population, state government programs, and state government employees is dynamic. Consequently, establishing a fixed relationship between population and state employees will not always ensure that state programs will be administered in a manner commensurate with the State's needs.

To suggest that a known ideal relationship exists between population and the number of state employees is incorrect. No one knows if the ideal balance is 4% or 3½% or 4½% or any other number. However, even more troublesome is the suggestion that the relationship is linear, that is, that state government employment should rise following increases in population and should fall immediately following decreases in population. Although those programs involving the direct delivery of formula-funded services would show a direct relationship to population, other programs, such as development, may not. In addition, some employment stabilization programs may need to increase activity immediately following the out migration resulting from the winding down of a large construction or resource exploitation project. Furthermore, the opening of state-managed facilities such as pioneer homes or prisons may require increases in employees not in line with changes in population.

Although we state these examples of complexities in the relationship between population and state employees, the Department of Administration does share the concerns of continual growth in state government employment. Indeed, efforts in this department to develop an effective Productivity Improvement Center demonstrate a commitment to better utilize current staffing levels. Other efforts by the Sheffield Administration reflect the same commitment.

SENATE JOINT RESOLUTION NO. 2

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

Proposing an amendment to the Constitution of the State of Alaska relating to limiting the number of state employees and increases in appropriations.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. Article IX, sec. 16, Constitution of the State of Alaska, is amended to read:

SECTION 16. APPROPRIATION AND EMPLOYMENT LIMITS [LIMIT]. (a) Except for appropriations for Alaska permanent fund dividends, appropriations of revenue bond proceeds, appropriations required to pay the principal and interest on general obligation bonds, and appropriations of money received from a non-State source in trust for a specific purpose, including revenues of a public enterprise or public corporation of the State that issues revenue bonds, appropriations from the treasury made for a fiscal year for operation of state government may not exceed the lesser of two-thirds of the estimated revenue for the fiscal year or the appropriations made in fiscal year 1985 for operation of state government adjusted by the cumulative change prescribed in this section [SHALL NOT EXCEED $2,500,000,000 BY MORE THAN THE CUMULATIVE CHANGE, DERIVED FROM FEDERAL INDICES AS PRESCRIBED BY LAW, IN POPULATION AND INFLATION SINCE JULY 1, 1981. WITHIN THIS LIMIT, AT LEAST ONE-THIRD SHALL BE RESERVED FOR CAPITAL PROJECTS AND LOAN APPROPRIATIONS]. The legislature may exceed this limit in bills for appropriations to the Alaska permanent fund [AND IN BILLS FOR APPROPRIATIONS FOR CAPITAL PROJECTS, WHETHER OF BOND PROCEEDS OR

OTHERWISE], if each bill is approved by the governor, or passed by affirmative vote of three-fourths of the membership of the legislature over a veto or item veto, or becomes law without signature, and is also approved by the voters as prescribed by law. [EACH BILL FOR APPROPRIATIONS FOR CAPITAL PROJECTS IN EXCESS OF THE LIMIT SHALL BE CONFINED TO CAPITAL PROJECTS OF THE SAME TYPE, AND THE VOTERS SHALL, AS PROVIDED BY LAW, BE INFORMED OF THE COST OF OPERATIONS AND MAINTENANCE OF THE CAPITAL PROJECTS.] No other appropriation for operation of state government in excess of this limit may be made except to meet a state of disaster declared by the governor as prescribed by law. The governor shall cause any unexpended and unappropriated balance to be invested so as to yield competitive market rates to the treasury.

(b) The appropriation limit established by this section shall be cumulatively adjusted annually through the end of the preceding fiscal year by the sum of the following percentages:

(1) the annual rate of change in the consumer price index for all urban consumers for the Anchorage Metropolitan Area as published by the Bureau of Labor Statistics of the United States Department of Labor for the fiscal year one year before the current fiscal year, but if significant change is made in the method of computing the consumer price index or if the index is discontinued another index may be presented by law;

(2) the continuously compounded annual rate of change in the estimated population of the State, as established by the United States Census Bureau for the period between the previous two decennial censuses.

(c) The base date for determining changes in population and inflation under (a) of this section is July 1, 1981.

(d) The appropriation limit shall be determined as of July 1 of

the year before the fiscal year in which the limit applies.

(e) As used in this section, "appropriations for operation of state government" does not include appropriations for capital projects, for state loans, appropriations for municipal revenue sharing, municipal assistance, or of taxes shared with municipalities, or appropriations for primary and secondary education.

(f) The total number of employees of the state, of agencies of the state and of the University of Alaska may not exceed four percent of the population of the state as determined under this section. For purposes of determining the number of employees each full-time employee shall be included and the hours worked by each employee other than full-time shall be converted to full-time equivalent employment and each full-time equivalent employee shall be included.

(g) In this section "population" means total resident population of the state computed under the method of computation used in the most recent federal decennial census.

* Sec. 2. The amendment proposed by this resolution shall be placed before the voters of the state at the next general election in conformity with art. XIII, sec. 1, Constitution of the State of Alaska, and the election laws of the state.

Alaska State Legislature

Senate

Official Business

Pouch V
State Capitol
Juneau, Alaska 99811

To: Senator Bill Ray
Chairman of Judiciary Committee

From: Senator Frank R. Ferguson

Date: January 19, 1984

Subject: Proposed Letter of Intent

LETTER OF INTENT SSSB 326

It is the intent of the Legislature that for the purposes of calculating the spending limit in Sponsor Subsitute for Senate Bill 326 the following equation be used:

Base x 1 + (rate of growth in population + inflation adjustment) = Limit

The base is $2,500,000,000 for fiscal year 1982. For each succeeding fiscal year the base shall be adjusted by the rate of change in population and the Anchorage Consumer Price Index-Urban (CPI-U)

The rate of change in population shall be calculated as the continuously compounded annual rate of change between 1970 and 1980 (April 1) estimates of population established by the U.S. Census Bureau in their decennial censuses. For example, the rate of change for the 1980's is computed as follows:

$$\text{Population}_{1980} = \text{Population}_{1970} \cdot e^{rt} \text{ or}$$

$$\text{Rate of Change} = r = \frac{\ln(\text{population } 1980/\text{population } 1970)}{t} \text{ or}$$

$$\text{Rate of Change} = .0284 = \frac{\ln(401851/302583)}{10}$$

The rate of change in the Anchorage (CPI-U) computed as the July to July change in the index as published by the U.S. Department of Labor, Bureau of Labor Statistics.

SJR 2

Major Provisions:

+ Limits Operating Budget to FY 85 Level plus inflation & population growth; OR if revenues decline no more than two-thirds of available funds can be used for the operating budget.

+ Limits Number of State Employees to 4% of state population

+ Pulls out "pass thru funds" from operating budget:

  # Municipal Assistance
  # Revenue Sharing
  # Other Shared Taxes
  # Education Foundation Formula
  # Loans
  # Capital Projects

SJR2 Sectional Analysis:

Proposes an amendment to the Constitution of the State of Alaska with regard to appropriation and employment limits;

Section 1) Establishes an appropriations limit for the State operating budget as follows:

May not exceed the lesser of:

a) 2/3rds of the revenue estimate for the fiscal year, or
b) FY85 operating budget appropriations "adjusted".

Annual adjustments to be made as follows:

Add the annual rate of change in the CPI for the Anchorage Metropolitan Area as published by the Bureau of Labor Statistics/US Department of Labor, for the preceeding fiscal year.

If, however, significant change is made in the computation method, or if the index is discontinued, another index may be presented by law.

plus the continuously compounded annual rate of change in the US Census Bureau's state population estimates for the period between the 2 previous decennial censuses.

July 1st 1981 BASE date for population & INFLATION

Approp limit July 1 YEAR before FY

ANCHORAGE CONSUMER PRICE INDEX-URBAN PERCENTAGE ANNUAL CHANGE DURING THE TWO PREVIOUS FISCAL YEARS; TWO, USE THE UNITED STATES CENSUS BUREAU PERCENTAGE CONTINUOUSLY COMPOUND ANNUAL RATE OF CHANGE USING THE PREVIOUS TWO DECENNIAL CENSUS; AND THREE, ESTABLISH THE APPROPRIATION LIMIT BASE AS $2.5 BILLION DOLLARS FOR FISCAL YEAR 1982 WHICH ALLOWS THE CUMULATIVE CHANGES IN THE FEDERAL INDICES OF POPULATION AND INFLATION TO BE USED STARTING WITH FISCAL YEAR 1983.

THE ANCHORAGE CONSUMER PRICE INDEX-URBAN IS USED BECAUSE IT WOULD BE CONSISTENT WITH OTHER FEDERAL PROGRAMS WHICH USE THE INDEX. ALSO, MANY STATE LABOR CONTRACTS USE THE CONSUMER PRICE INDEX-URBAN; THE EDUCATION FOUNDATION FORMULA FOR FISCAL YEAR 1985 USES THE CONSUMER PRICE INDEX-URBAN AS MANDATED BY THE LEGISLATURE LAST

Approps for "operation of State Government" not to include Approps for Capital, State loans Mun Rev Sharing, Mun Assistance Taxes shared with Municipalities

SESSION IN HOUSE BILL 251; AND THE HOUSING FACTOR HAS BEEN ADJUSTED IN THE FEDERAL CALCULATION OF THE CONSUMER PRICE INDEX-URBAN, AND NOW IS MORE SUPERIOR, ESPECIALLY IN ALASKA WHERE THE STATE HEAVILY SUBSIDIZES THE HOUSING INDUSTRY.

IN ADDITION, ALTHOUGH THE CONSUMER PRICE INDEX-URBAN CALCULATES THE "BASKET OF GOODS" OF GROCERY ITEMS, IT IS THE MOST CONSERVATIVE INDEX AVAILABLE AND ONE THAT IS MOST READILY IDENTIFIED BY THE PUBLIC.

THE UNITED STATES CENSUS BUREAU POPULATION FIGURES FROM THE PRE IOUS TWO DECENNIAL CENSUSES ARE USED BECAUSE IT TAKES THE GUESSWORK OUT OF THE CALCULATIONS OF THE SPENDING LIMIT. THE UNITED STATES CENSUS FIGURES WOULD PROVIDE A CONSISTENT INDEX WHICH HAS NEVER BEEN SUCCESSFULLY

CHALLENGED IN COURT. THE CONTINUOUSLY COMPOUND RATE OF CHANGE IS USED BECAUSE THE STATE'S POPULATION IS GROWING EVERY DAY.

THE BASE OF $2.5 BILLION DOLLARS FOR FISCAL YEAR 1982 IS USED TO FIND THE RATE OF CHANGE IN THE INFLATION FACTOR TWO YEARS ARE NEEDED. THE CONSTITUTIONAL AMENDMENT STATED THE STARTING DATE FOR THE LIMIT IS JULY 1, 1981. THUS, FROM JULY 1, 1981 TO JULY 1, 1982 GIVES US OUR BASE, AND JULY 1, 1982 TO JULY 1, 1983 GIVES US THE NUMBER TO COMPARE AGAINST THE FIRST YEAR WHICH THEN GIVES THE ANNUAL RATE OF CHANGE TO BE USED THE SECOND YEAR.

THE INDICES PROPOSED IN SPONSOR SUBSTITUTE SENATE BILL 326 WOULD PROVIDE FOR A TRUE "SPENDING LIMIT" WHICH THE VOTERS INTENDED TO HAVE. BY

SENATE JOINT RESOLUTION NO. 2

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

Proposing an amendment to the Constitution of the State of Alaska relating to limiting the number of state employees and increases in appropriations.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. Article IX, sec. 16, Constitution of the State of Alaska, is amended to read:

SECTION 16. APPROPRIATION AND EMPLOYMENT LIMITS [LIMIT]. (a) Except for appropriations for Alaska permanent fund dividends, appropriations of revenue bond proceeds, appropriations required to pay the principal and interest on general obligation bonds, and appropriations of money received from a non-State source in trust for a specific purpose, including revenues of a public enterprise or public corporation of the State that issues revenue bonds, appropriations from the treasury made for a fiscal year for operation of state government may not exceed the lesser of two-thirds of the estimated revenue for the fiscal year or the appropriations made in fiscal year 1985 for operation of state government adjusted by the cumulative change prescribed in this section [SHALL NOT EXCEED $2,500,000,000 BY MORE THAN THE CUMULATIVE CHANGE, DERIVED FROM FEDERAL INDICES AS PRESCRIBED BY LAW, IN POPULATION AND INFLATION SINCE JULY 1, 1981. WITHIN THIS LIMIT, AT LEAST ONE-THIRD SHALL BE RESERVED FOR CAPITAL PROJECTS AND LOAN APPROPRIATIONS]. The legislature may exceed this limit in bills for appropriations to the Alaska permanent fund [AND IN BILLS FOR APPROPRIATIONS FOR CAPITAL PROJECTS, WHETHER OF BOND PROCEEDS OR

OTHERWISE], if each bill is approved by the governor, or passed by affirmative vote of three-fourths of the membership of the legislature over a veto or item veto, or becomes law without signature, and is also approved by the voters as prescribed by law. [EACH BILL FOR APPROPRIATIONS FOR CAPITAL PROJECTS IN EXCESS OF THE LIMIT SHALL BE CONFINED TO CAPITAL PROJECTS OF THE SAME TYPE, AND THE VOTERS SHALL, AS PROVIDED BY LAW, BE INFORMED OF THE COST OF OPERATIONS AND MAINTENANCE OF THE CAPITAL PROJECTS.] No other appropriation for operation of state government in excess of this limit may be made except to meet a state of disaster declared by the governor as prescribed by law. The governor shall cause any unexpended and unappropriated balance to be invested so as to yield competitive market rates to the treasury.

(b) The appropriation limit established by this section shall be cumulatively adjusted annually through the end of the preceding fiscal year by the sum of the following percentages:

(1) the annual rate of change in the consumer price index for all urban consumers for the Anchorage Metropolitan Area as published by the Bureau of Labor Statistics of the United States Department of Labor for the fiscal year one year before the current fiscal year, but if significant change is made in the method of computing the consumer price index or if the index is discontinued another index may be presented by law;

(2) the continuously compounded annual rate of change in the estimated population of the State, as established by the United States Census Bureau for the period between the previous two decennial censuses.

(c) The base date for determining changes in population and inflation under (a) of this section is July 1, 1981.

(d) The appropriation limit shall be determined as of July 1 of

the year before the fiscal year in which the limit applies.

(e) As used in this section, "appropriations for operation of state government" does not include appropriations for capital projects, for state loans, appropriations for municipal revenue sharing, municipal assistance, or of taxes shared with municipalities, or appropriations for primary and secondary education.

(f) The total number of employees of the state, of agencies of the state and of the University of Alaska may not exceed four percent of the population of the state as determined under this section. For purposes of determining the number of employees each full-time employee shall be included and the hours worked by each employee other than full-time shall be converted to full-time equivalent employment and each full-time equivalent employee shall be included.

(g) In this section "population" means total resident population of the state computed under the method of computation used in the most recent federal decennial census.

* Sec. 2. The amendment proposed by this resolution shall be placed before the voters of the state at the next general election in conformity with art. XIII, sec. 1, Constitution of the State of Alaska, and the election laws of the state.

SJR 45: Summary

This resolution urges Congress to revise the present system for compensating injured commercial fisherman. The resolution finds that liability insurance for commercial fisherman is often unavailable, too expensive for many fisherman, and the method of compensation is inefficient. Additionally, the resolution references 3 studies which support the need for changes to the system of compensation for injured fisherman.

SENATE JOINT RESOLUTION NO. 45

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

Relating to compensation for injuries to commercial fishermen.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

WHEREAS the United States commercial fishing industry is facing a crisis in the cost and availability of marine insurance; and

WHEREAS the Alaska commercial fishing industry is experiencing severe economic costs as a result of these problems; and

WHEREAS these costs are having a detrimental impact on the people and the communities of the state; and

WHEREAS the most troublesome part of the marine insurance crisis is the method by which injured fishermen are compensated and the resultant impact on the protection and indemnity insurance (P&I) policy; and

WHEREAS the system for compensating injured commercial fishermen is established under federal law; and

WHEREAS a 1957 survey and study sponsored by the U.S. Fish and Wildlife Service concluded that the system "...disregards completely the financial, economic, and operational characteristics of the industry"; and

WHEREAS the study also stated that "the system is unjust because it is wasteful and slow and it fosters misunderstanding and bitterness between employer and employees"; and

WHEREAS the study recommended that the system be replaced by a more equitable one; and

WHEREAS a more detailed study sponsored by the National Oceanic and Atmospheric Administration in 1976 recommended the consideration of an alternative liability system; and

Introduced: 3/3/86
Referred: Labor and Commerce

FOURTEENTH LEGISLATURE - SECOND SESSION

Relating to compensation for injuries to commercial fishermen.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

WHEREAS the United States commercial fishing industry is facing a crisis in the cost and availability of marine insurance; and

WHEREAS the Alaska commercial fishing industry is experiencing severe economic costs as a result of these problems; and

WHEREAS these costs are having a detrimental impact on the people and the communities of the state; and

WHEREAS the most troublesome part of the marine insurance crisis is the method by which injured fishermen are compensated and the resultant impact on the protection and indemnity insurance (P&I) policy; and

WHEREAS the system for compensating injured commercial fishermen is established under federal law; and

WHEREAS a 1957 survey and study sponsored by the U.S. Fish and Wildlife Service concluded that the system "...disregards completely the financial, economic, and operational characteristics of the industry"; and

WHEREAS the study also stated that "the system is unjust because it is wasteful and slow and it fosters misunderstanding and bitterness between employer and employees"; and

WHEREAS the study recommended that the system be replaced by a more equitable one; and

WHEREAS a more detailed study sponsored by the National Oceanic and Atmospheric Administration in 1976 recommended the consideration of an alternative liability system; and

WHEREAS a 1985 study sponsored by the National Council of Fishing Vessel Safety and Insurance also recommends sweeping changes in the existing system of compensating injured fishermen and warns that "This is ... probably the last time this issue will be presented before Congress. Either the system will be changed, or the industry will not be strong enough to return"; and

WHEREAS the Congress is presently evaluating the problem and considering possible solutions to it;

BE IT RESOLVED by the Alaska State Legislature that Congress is respectfully requested to take whatever action is necessary to revise the present system for compensating injured fishermen so that it will be fair to commercial fishermen and affordable by the vessel owners.

MEMORANDUM

TO: Senator Fred Zharoff
Alaska State Legislature

FROM: Bill Hall,
Senior Advisor

DATE: March 14, 1986

SUBJECT: SJR 45 regarding changes to Federal Maritime Law (Jones Act) as it relates to marine insurance.

Attached to this memo is a copy of a resolution under consideration by the Legislature of Hawaii regarding the above mentioned subject. The Hawaiian resolution (unlike our resolution) makes a specific recommendation to adopt a Federal workmen's compensation system for injured fishermen in place of the existing system.

I had recommended that the Alaska resolution (SJR 45) not contain any specific recommendations because I did not believe that we were well enough informed to make an intelligent decision at this time. I still believe that we need more information on this subject, but I am more convinced than ever that we should consider a workmen's compensation program as a possible solution. I say this with the knowledge that Al Burch of the Alaska Dragger's Association has testified at a Congressional hearing on the subject that a workmen's compensation system would not be acceptable because it would be unaffordable to boat owners. I am not convinced that this is true, and I am working with Paul Troeh, Deputy Director of the Division of Insurance to develop some cost data on the system.

Congressional hearings on this subject are scheduled to begin April 16. There are three probable options that will be considered regarding Congressional action. They are:

1. Maintain the existing system by doing nothing;

2. Modify the existing system, and;

3. Replace the existing system with a workmen's compensation program.

I don't believe that there is support at this time for Option 1. However because of a study sponsored by the National Council of Fishing Vessel Safety and Insurance there is considerable interest in a proposed solution that would constitute Option Number 2. There is also some support developing for Option Number 3. Sources in Washington, D.C. do not believe that Congress will complete action on any maritime insurance legislation this year. However, the process of considering options will begin, and it is important that the needs of the Alaskan fishing industry be considered in that process.

Because this is such an important issue, I have been working with Jack Cadigan, Executive Director of UFA, and Craig Wiese of the Alaska Sea Grant Program in organizing a meeting on the subject to be held in Juneau on April 4 of this year. UFA will host the meeting, and will invite every fishermen's organization in the State (including those organizations not affiliated with them) to send a representative. It is hoped that this meeting will result in the development of an Alaskan Fishing Industry consensus as to what specific changes in Federal Maritime Law are the most desirable. It is also planned that the meeting will address the subject of insurance pools so that some indication of interest will be available regarding SB 442.

I will keep you informed on the results of these activities. Please let me know if you have any suggestions or requests.

SENATE RESOLUTION

REQUESTING THAT THE UNITED STATES CONGRESS AMEND THE JONES ACT TO EXCLUDE COMMERCIAL FISHERS.

WHEREAS, there are two chapters of federal law which apply to persons injured in the course of maritime employment; and

WHEREAS, the Longshoremen's and Harbor Worker's Compensation Act affords quick monetary compensation to all injured maritime workers except members of the crew and masters, while the Jones Act covers these two categories; and

WHEREAS, the two pieces of legislation appear to be mutually exclusive, in that workers covered under the Jones Act do not have access to the remedies available under the Longshoremen's and Harbor Worker's Compensation Act; and

WHEREAS, rising insurance rates for commercial fishers who are subject to the Jones Act have increased costs and slowed expansion in this vital industry; and

WHEREAS, the Jones Act, unlike the Longshoremen's and Harbor Worker's Compensation Act, has no provision rendering inoperative state laws which create parallel remedies such as workers' compensation; now, therefore,

BE IT RESOLVED by the Senate of the Thirteenth Legislature of the State of Hawaii, Regular Session of 1986, that the Legislature requests the United States Congress to amend the Jones Act to exclude commercial fishers and amend the Longshoremen's and Harbor Worker's Compensation Act to include commercial fishers; and

BE IT FURTHER RESOLVED that certified copies of this Resolution be transmitted to the Speaker of the United States

INTRODUCTION

The subject of this report is the Alaska commercial fishing industry and the problems it is experiencing in obtaining fishing vessel insurance. The report, which is based on research conducted over the past three and one half months, contains recommendations on solutions to these problems with specific attention to the subject of pools as a form of self insurance.

One important, and inescapable, conclusion that the research has produced is that the cost and availability of fishing vessel insurance in Alaska is not the only problem that needs to be addressed. Rather, it is a symptom of the real problem which is the poor safety record of the Alaskan fishing industry. This record documents the loss of too many human lives and fishing vessels. The cost of these losses in terms of human suffering and financial impact is unacceptable on any social scale and is certainly unaffordable on any economic scale.

The preceding statement is not intended to suggest that nothing can be done to improve the cost, the availability or the quality of fishing vessel insurance. There is room for improvement. However, improvement cannot occur without either an overall improvement of the safety record of the fishing industry, or the development of a means by which the safe fisherman can be distinguished from the unsafe fisherman. In the latter situation, the benefits of improved insurance would not be shared by the fishing industry as a whole, but only by those who could demonstrate that they were safe operators. From a social perspective it is obvious that such an approach by itself would not be acceptable. However, in addition to efforts to improve the entire Alaska fishing industry's safety record, it is an important part of any overall solution.

One fundamental fact is absolutely clear. The need for insurance is a function of the risk inherent in the activity to be insured. If there is no risk of loss then there is no need for insurance. Furthermore, the cost of insurance is determined by the magnitude of the risk. If the risk of loss can be reduced or eliminated then so can the need for (and the cost of) insurance. To the extent that risk is a function of human behavior, it will be influenced by any change in human behavior. The challenge then appears to be one of determining the best and most acceptable method available for changing human behavior.

I. BACKGROUND TO THE PROBLEM

There is no law or regulation that requires fishing vessel owners to purchase marine insurance. However, lenders such as banks or the State of Alaska Commercial Fishing Loan Program

require that a borrower purchase specified insurance coverage as a condition of the loan agreement which is required by the mortgage document. Because the majority of fishing vessels in Alaska are subject to a marine mortgage, they are required to have insurance. If a vessel owner does not or cannot obtain the required insurance, then he is in violation of his mortgage agreement which places him in default and subject to foreclosure proceedings.

Fishing vessel owners are required by their mortgage holders to obtain two types of marine insurance coverage. One is a form of property and casualty insurance called hull and machinery and the other is a form of liability insurance called protection and indemnity or P & I. These two types of insurance are defined in two separate policies and are often provided by different companies or groups of companies.

Beginning in 1985 Alaskan fishermen began experiencing problems with both the cost and the availability of marine insurance. Premiums for typical hull and machinery policies for the Alaska salmon fleet on the average increased by approximately 30% with increases in some areas as high as 50 percent. Premiums for P & I insurance increased an average of 50 percent. Furthermore, coverage for some classes of vessels such as older wood boats or some Bering Sea crab boats was, and still is, unavailable at any price. Also, some vessel owners found the amount of their coverage reduced at the same time that their premiums were increased.

II. REASONS FOR THE PROBLEM

A. THE FISHING INDUSTRY

Faced with a situation that threatens their livelihood, many fishermen have been asking questions such as "Why do we have this problem?", "Who is responsible?", "What can we as fishermen do to solve it?", and "What can government do to help us?". The answers to these questions can be found in an examination of the insurance industry with particular regard to marine insurance and the fishing industry with particular regard to its safety record. Factors and circumstances unique to both industries have combined to create a multifaceted problem the solution of which will require the cooperation of fishermen, insurance companies and government.

Fishing has historically been a high risk industry. However in recent years the loss record of the U. S. fishing industry in terms of both money and human lives has been deteriorating. A recent U.S. Coast Guard study has revealed that commercial fishermen have the worst safety record of all U.S. industries with a death rate of 7 times the national average for all industry groups. Loss rates for large fishing vessels are 5 to 7 times greater than loss rates for U.S. ocean going cargo ships with a total of 2,414 documented fishing vessels lost at sea during the twelve years from 1970 to 1982. Also during that

period, another 9,503 vessels were damaged at sea, and deaths from loss of vessel, damage to vessel, or accident onboard vessel, numbered 1,271.

There is reason to believe that these increases are the result of recent developments in two areas: the increased importance and value of fish as a food source, and the passage of legislation that extended the jurisdiction of the United States over its fisheries resources to 200 miles. With these two developments the number of fishermen employed in the U.S. fishing industry has increased from 140,538 in 1970 to an estimated 223,000 in 1983. For those same years the number of fishing vessels has increased from 87,161 to 127,100. These increases have had three consequences. One is an increase in the overall value of the U.S. fishing fleet. A second is an increase in the cost and sophistication of the typical fishing vessel, and the third is a shortage of experienced and qualified fishermen available to operate the increased number of vessels. These factors, combined with the instability inherent in the fishing industry as a result of fluctuations in the availability of fish stocks as well as their market prices, have contributed to a situation where the fisherman is often under great economic pressure to produce. He is therefor forced to expose himself to risks that he would normally avoid.

The fundamental problem is not the cost or unavailability of insurance. Rather it is the poor safety record of the fishing industry which has produced an unacceptably high loss of human life and financial investment. But, even with this high rate of losses it is theoretically possible to provide insurance coverage if the insurance companies could quantify the risk and had the financial capacity to cover the losses. However, the price that would have to be charged for such insurance would most probably be unaffordable, and that is in fact one of the facets of the present problem. So, one of the major reasons for recent increases in the cost of fish boat insurance is the high rate of losses experienced by the U.S. fishing industry. Also, at the present time the U.S. insurance industry because of heavy financial losses, has lost the capacity to write all the insurance for which there is a demand. This has also contributed to the increase in premiums as well as the decrease in availability. The functional aspects of this problem must therefor be examined in terms of the present structure and status of the insurance industry.

B. THE INSURANCE INDUSTRY

Regulation of the insurance industry has been delegated to the states by the federal government. The states have vested their regulatory powers in insurance commissioners who through a national organization have worked to promote uniformity in the regulatory process. One of the generally accepted uniform principals is the requirement that an insurance company must have one dollar in reserves for every three dollars of insurance

that it writes. The amount of reserves that a company has then determines its capacity to write insurance. If a company suffers a decrease of reserves through payment of claims or investment losses then it must reduce the amount of insurance that it writes.

Historically the insurance industry has been a cyclical business alternating from periods of profit to periods of losses. Unfortunately, as a result of a cycle begun in the late 1970's the industry is now going through a down cycle of unprecedented proportions. Consequently, its capacity to write insurance has been significantly diminished; forcing many companies to cut back or eliminate not only the amount but often the type of insurance that they were writing. This has impacted the insurance market in Alaska by reducing the number of companies writing marine coverage from over 30 to less than 5, and those companies have both raised their rates and limited the amount of coverage that they are writing.

One reason for this situation is the fact that fish boat insurance constitutes only one tenth of one percent of the business written by insurance companies in the United States. It is also a category of insurance that has not been very profitable. So, when insurance companies are forced to reduce the amount of insurance that they are writing as a result of their diminished capacity; they naturally eliminate those categories of coverage that were the least profitable and that generated the least amount of business.

It is expected that as underwriting companies replenish their reserves through increases in the premiums charged, the number of companies writing marine coverage will increase. However, it is not expected that premiums for hull and machinery coverage will be decreasing as they are presently at levels which are considered to be the minimums necessary to support the coverage being written at the rate that losses are being experienced.

C. FEDERAL MARITIME LAW

Marine insurance like other forms of insurance is regulated by the states. However, because federal maritime law governs the ownership and operation of documented fishing vessels, the extent and nature of insurance contracts and their application are also subject to federal law. This is particularly true in the area of liability insurance where federal law governs the method by which injured fishermen are compensated. Unfortunately this system of compensation which was designed to protect the well being of merchant seamen has not been well suited to the needs and capabilities of the nation's commercial fishing industry. A study sponsored by the federal government during the 1950's included the following criticism about this method of compensating injured fishermen.

> ... it disregards completely the financial, economic, and operational characteristics of the industry. Furthermore, the system in itself is unjust because it is wasteful and slow and it fosters misunderstandings and bitterness between employer and employees. Moreover, it encourages the use of dishonest methods by both parties because court awards often are not in proportion to the employee's injury or need.

This 30 year old criticism is still valid today and if anything, the situation is now even worse because of two developments. In 1981 the Reagan administration closed the Public Health Service Hospitals to commercial fishermen thereby eliminating the free medical care that they had previously received. As a result of this the burden for providing medical care fell on the boat owner who had to provide for it through his protection and indemnity insurance. This of course increased the amount of claims paid by insurance companies (which they had not anticipated). It also placed the injured fisherman in an adversarial relationship with his employer as a claimant under the insurance policy or as a plaintiff in a court of law. The second development has been the increasing number of personal injury claims being filed by fishermen in the courts. In this regard the fishing industry is not unlike other industries that are now seeking relief through legislation that would reform the nation's tort laws. However, unlike other industries, the fishing industry cannot obtain relief through changes in state law. It must seek changes in federal law which is a much more difficult challenge.

III. POSSIBLE SOLUTIONS

Because, as has previously been stated, the problem of fish boat insurance is a multifaceted one, there is no simple, comprehensive solution. However, there are opportunities for improving the situation if the problem is broken down into some of its constituent parts. This section is therefore organized into subsections each of which contains a definition of a problem with recommendations for possible solutions to that problem.

A. IMPROVE FISHING INDUSTRY SAFETY RECORD

If the costs associated with losses in the fishing industry can be reduced, then the costs that must be bourn by a system of insurance will be less. If the cost of providing insurance coverage decreases, then the cost to those purchasing the insurance should also decrease. One means to achieve a reduction in losses is to improve the safety record of the fishing industry, and this can only be done by changing human behavior. Options available for changing human behavior include changes through the force of law, changes through economic requirements, and changes through economic incentive.

Opportunities for legislating requirements for human conduct include a.) extending the jurisdiction of existing federal laws and regulations from the U.S. maritime industry to the fishing industry and b.) passage or modification of state laws and regulations governing the operations of the fishing industry.

At the present time the option of extending federal regulatory authority to the fishing industry is not a politically viable option. The coast guard has testified at recent congressional hearings that they do not presently have the funding available to pay for implementation of such a program, and in fact they have been threatened with substantial budget cuts by the Reagan Administration over the past several years. Now, with the problems created by passage of the Gramm-Rudman legislation which requires congress to balance the budget within the next several years, it appears that additional budget cutting will be necessary. It is unlikely that the coast guard will escape this process, and it is virtually certain that their budget will not be increased to fund a new program of fishing vessel safety.

Because federal law preempts state law in the jurisdiction of the nation's maritime industry (which includes the fishing industry), the states have limited authority to regulate. However, within that limitation, there does appear to be some opportunity for regulation in the form of requirements for safety equipment as a condition of receiving a commercial fishing license. The authority for the state to do this has not been definitively determined. But, based on court decisions over the past several years and the a refusal of the federal government to exercise their authority, there appears to be some opportunity for the state to act.

One area in which the state's authority to act is not in doubt is the existing body of laws and regulations governing commercial fishing in the state. There is evidence that regulations determining the opening and closing dates of fishing seasons, the areas to be fished, and the type or size of vessels licensed to fish all have an impact on the risk to which fishermen and their vessels are exposed. For this reason it would seem prudent that safety should be a required consideration in the development of such regulations and laws.

The option for changing human behavior as a condition of receiving insurance (which would be change through economic requirement) has been rejected by the insurance industry. This possibility had been suggested by representatives of the U.S. Coast Guard in testimony given to a congressional committee in Seattle last August. The coast guard had testified that they were unable and unwilling to begin regulation of the fishing industry, but that they were in the process of developing a set of voluntary safety standards. They suggested that the insurance industry could require compliance with the standards as a condition of obtaining insurance. The insurance industry representatives rejected this suggestion stating that the

promotion and enforcement of safety standards was not their business.

The last option for changing human behavior through economic incentives may be the best opportunity available to the commercial fishing industry. But, it is an opportunity only if a mechanism can be found for implementing it. That mechanism may very well be the formation of self insurance programs which would place the responsibility for regulation on the fishing industry itself. This approach has in fact worked very successfully for a number of fishermen pools that have been operating out of the state of Washington since the early 1940's. These pools, which refer to themselves as funds, insure many boats that operate in the Alaskan fisheries from Kodiak to Ketchikan. However, because they do not wish to be subject to the authority of state insurance regulatory agencies and their requirements, they studiously avoid referring to their activities as constituting a form of insurance. And in fact the bylaws of one such fund contains the following statement, "No insurance business of any kind shall be done as such business is understood under the statutes of the State of Washington." Notwithstanding the foregoing, the pools have successfully provided economic protection to fishing vessel owners for over 40 years, and they have had an extremely good record. The following quotation from the bylaws of one of these pools defines its purpose and serves to illustrate its contribution to the promotion of safety at sea.

> The purpose of this organization is to create and maintain a fund for the reimbursement of marine losses suffered by members occasioned by perils of the seas or fire or by certain collision liabilities; to work for the elimination of careless and reckless operation of fishing vessels; to maintain staunch and seaworthy fishing vessels; and to afford assistance to fellow member's vessels in distress at a reasonable rate of compensation.

B. INSURANCE POOLS

The foregoing section regarding fishermen's insurance pools addresses the value of self insurance as a mechanism for changing human behavior as it relates to safety in the fishing industry. This value can be viewed as a long term social value that results from an ongoing program to reduce the loss of human lives and vessels to the Alaskan fishing community. However another potential value of insurance pools lies in the opportunity they offer for fishermen who are safe operators to differentiate themselves from fishermen who are unsafe operators. By so doing, the good operators will benefit from an insurance program the cost of which is based on their record of operations and not the record of the fleet in general. One additional advantage to such a program would be a lower cost due to the absence of the need for the program to generate profits for underwriters. These values can be viewed as short term economic values that improve the profitability of the Alaskan fishing community.

As previously stated, the Washington state based fishermen's insurance pools (as they are popularly called) have been operating in the Alaskan fisheries for over 40 years. However, in their present form, they are technically not in compliance with Alaskan law, and are therefor illegal. Nevertheless, they have been providing a valuable and a reliable service to the fishermen of both Washington and Alaska. And with the present crises that exists in the marine insurance industry, it would not be prudent to reduce the amount of protection available to the fishing industry. On the contrary, it would seem that a prudent course of action would involve passage of legislation that would permit the formation of Alaska based fishermen's insurance pools.

C. FISHERMEN'S COMPENSATION SYSTEM

The subject of marine liability insurance has been examined in the previous section of this report entitled "FEDERAL MARITIME LAW". That section outlined the inadequacies of the present system for providing fishermen's compensation and suggested the need for changes to the federal law that governs the system. It is important to note here that the problems associated with this situation are not new. They have been the subject of a number of congressionally funded studies going back as far as the early 1950's all of which have recommended changes to the federal law.

Now, once again, there is another congressionally funded study being conducted, and there are legislative solutions being considered. This latest effort is of greater importance than past efforts because of the increased liabilities (and therefor costs) to which boat owners are now exposed. The increased exposure of the vessel owner is the direct result of court decisions that have broadened the circumstances under which a boat owner is liable for accidents to crewmen both on and off the vessel. It is therefore extremely important that the fishing industry of each state participate in the development of a national fishing industry consensus on the best solution to this problem so that the appropriate legislation can be developed and passed by congress. Without some modification of the law, the cost of P & I insurance may very well become unaffordable.

There is also one area of Alaska's workmen's compensation law that has been identified as a problem for fishing vessel owners. As a result of a recent court decision, fishing vessel owners are subject to the requirements of the workmen's compensation laws in situations where their crewmen have shore side duties. The court decision stated that a fishing vessel crewman who was injured while performing duties on shore was eligible to collect under the law. With this judgement, crewmen enjoy a duplication of remedies where they can collect under the workmen's compensation no-fault system while at the same time

retaining the right to pursue existing remedies under maritime law. In order for a vessel owner to comply with the law and protect his investment, he must now obtain both P & I insurance as well as workmen's compensation coverage. This duplication is not necessary to protect crewman and it creates an unnecessary financial burden on the boat owner who may not be able to afford the increase costs.

IV. RECOMMENDATIONS

Preceding sections of this report have identified problems and made general suggestions for solutions. This section contains specific recommendations for action by the Alaska Legislature.

A. INSURANCE POOLS

It is recommended that legislation be passed that contains provisions to:

1. authorize the Director of Insurance to develop, with input from interested fishermen groups, a plan for the creation and implementation of marine insurance reciprocal associations for the purpose of providing property and casualty insurance coverage for commercial fishermen,

2. authorize the Director of Insurance to promulgate regulations necessary for the implementation and operation of marine insurance reciprocal associations,

3. authorize the Director of Insurance to set the level of surplus required of marine insurance reciprocal associations by regulation,

4. authorize approved marine insurance reciprocal associations to issue policies that are nonassessable,

5. appropriate to the Division of Insurance the funding necessary to accomplish the foregoing tasks.

Because of the present crises in insurance many groups are considering the possibilities of self insurance as a solution to their problems. This is true for many different kinds of insurance in many different parts of the nation. For all of these groups a fundamental question that they must answer is "Who will fund the program?". One group in New Jersey that is in the process of forming a fishermen's mutual insurance association with the assistance of a combined federal and state grant is considering the possibility of state loan guarantees as a back up to the contributions of policy holders. Other groups have indicated an interest in obtaining financial assistance from the government.

That is not the case in regard to this recommendation. For one reason, the recent decline in state oil revenues makes the availability of state funding unlikely. However, what is possibly a more important reason is the need to maintain the ability of any reciprocal to be selective in its choice of participants. If the use of public funds were to compromise this freedom of choice to any degree, it could threaten the success of the program.

The question still remains as to how a marine insurance reciprocal can be funded. The answer that offers the greatest promise at this time is through a combination of policy holder contributions in conjunction with excess insurance obtained from companies known as reinsurers. The important point to make is that persons expert in the field of marine insurance believe that it is possible to structure a marine insurance reciprocal program without the need for financial assistance from the state. However, the best method by which this can be done is not now known because more information needs to be developed as to the number of fishermen interested in such a program and the availability of reinsurers willing to participate.

The foregoing recommendation has therefor been developed because it offers a solution to the problem that provides the maximum flexibility at the lowest cost.

B. FISHERMEN'S LIABILITY INSURANCE

It is recommended that the Alaska Legislature hold hearings on the problems relating to the methods by which injured fishermen are compensated, and its impact on the cost and availability of protection and indemnity insurance. The purpose of the hearings would be to develop an Alaskan consensus on the best solution to the problem which would be communicated to the U.S. Congress in the form of a legislative resolution.

This subject is timely because a study has recently been completed on the problem which was funded by the National Council of Fishing Vessel Safety and Insurance. The study contains recommendations for congressional action (including amendments to the Jones Act) and will be considered by congress in the coming months. It is important that the recommendations of the report be examined to determine if they offer the best solution to the problem for Alaska's fishermen. Based on reactions to a preliminary version of this report there is reason to believe that there is some question as to whether or not it constitutes the best approach to the problem.

It is important to note here that the earlier recommendation for the formation of insurance pools for property and casualty insurance intentionally omits liability insurance. This is because the cost of a liability insurance program is difficult to quantify because of the system for determining awards for claims. This subjects liability insurance programs to great risk since the cost of the coverage is potentially open ended. A

fledgling self insurance program with limited capital reserves should not be subject to such risk. Fortunately, such insurance is obtainable from private insurance companies although at a high premium. If the present efforts to improve the system of providing compensation for injured fishermen are successful, then premium costs should be reduced.

C. THE ALASKA WORKMAN'S COMPENSATION LAW

It is recommended that an amendment be passed to the Alaska Workman's Compensation law that exempts commercial fishermen from the provisions of the act. This is desirable for the following reasons.

1. It was not the original intent of the act that commercial fishermen by covered by it.

2. Fishermen have access to a system of injury compensation under maritime law.

3. A duplication of programs is unnecessarily confusing and is unaffordably expensive.

4. Although described as inadequate, the existing system of compensating injured fishermen is presently under study for the purpose of possible congressional overhaul. A solution defined by federal law would be much more definitive and efficient than a system characterized by overlapping jurisdictions and duplications of effort and cost.

D. COMMERCIAL FISHERIES MANAGEMENT

It is recommended that a legislative resolution be passed requesting that safety be a factor to be considered in the development of all fishery management plans and regulations.

E. EDUCATION

It is recommended that the University of Alaska be directed to investigate the possibility of developing instructional programs on fishing vessel risk management or safety at sea that could be taught through the marine advisory program or community college system.

It is quite possible that a program such as this could be an important part of any organized effort to improve the safety record of the fishing industry. Like driver education programs it could be used as a means to improve individual abilities using reduced insurance premiums as an incentive.

F. MANDATORY SAFETY REQUIREMENTS

It is recommended that study and public hearings be conducted on the subject of state mandated safety requirements. According to information provided by the Legislative Affairs Division of Legislative Counsel, the state may have limited authority to require that certain safety equipment be carried on commercial fishing vessels as a condition of obtaining a commercial fishing license. This authority might also extend to requirements for demonstration of minimum competency or experience in the operation of commercial craft. This subject will most certainly generate considerable controversy, and therefor should be approached with great care for its potential impact on the commercial fishing industry.

V. CONCLUDING REMARKS

The present crises in marine insurance is a result of events that have occurred in both the fishing and the insurance industries. Some improvement in the cost and availability of marine insurance for Alaska's fishermen may occur as a result improving economic conditions in the insurance industry. However, substantial improvement in these areas cannot occur without a reduction in the loss of human life and the destruction of fishing vessels suffered by the commercial fishing industry.

Historically, the United States fishing industry has not been subjected to the extent of government regulation in the area of safety that other industries have had to endure. This freedom has been one of the attractions of the industry that has been valued and protected by many of its participants. However there are those who would now argue that fishermen should not have the right to be reckless with their own lives and certainly not the lives of others. Freedom in this sense may very well be defined by the song verse; "Freedom's just another word for nothing left to lose."

IN THE _____

BILL NO. _____

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to marine insurance; amending Alaska Statutes 21.75.020, 21.75.050, 21.75.200 and 21.80.020; and providing for an appropriation."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 21.75.020 is amended by adding a new section to read:

(C) The Director shall specify by regulation the types of marine risk a reciprocal may insure.

* Section 2. AS 21.75.050 is amended by adding a new section to read:

(D) Notwithstanding the foregoing provisions and the provisions of Section 21.75.230, if a reciprocal insurer insures marine risks the level of surplus shall be set by regulation by the Director.

* Section 3. AS 21.75.200 is amended by adding a new section to read:

(E) A reciprocal insurer that insures marine risks as authorized by AS 21.75.020(C) may issue policies that are nonassessable.

* Section 4. AS 21.80.020 is amended by adding a new sentence to read:

A domestic reciprocal that insures marine risks is exempt from the requirements of this chapter.

* Section 5.

The Legislature recognizes the crisis that has arisen in the marine insurance market now faced by persons who fish commercially in Alaskan waters. The development of marine insurance reciprocals will help remedy this crisis. The Legislature recognizes that, particularly in light of the depression affecting segments of the fishing industry, fishers are poorly situated to bear the cost of developing marine insurance reciprocals. The sum of $200,000 is appropriated to the Division of Insurance for the purpose of contracting for legal and management services necessary to develop marine insurance reciprocal pro forma documents in compliance with A.S. 21.75.060, 21.75.080, 21.75.100,

21.75.130, 21.75.170, policies and such other subscriber rules and management procedures as may be appropriate.

* Section 6.

This Act takes effect immediately in accordance with AS 01.10.070(c).

INFORMATIONAL LETTER RE MEMBERSHIP IN THE UNITED MARINE FUND

PURPOSE AND COVERAGE: The purpose of the fund is to create and maintain a fund for the reimbursement of marine hull and machinery losses suffered by members. It is also to work for the careful and able operation of vessels. We offer the broadest coverage available and at reasonable rates with refunds to member as best possible.

MEMBERSHIP: To become a member of the fund you must submit an application with some references of people belonging to the fund to vouch for you. This application, then, is brought before the board of directors for approval. We can insure up to $350,000 per vessel for hull and machinery. We take most every type of fishing vessel including seiners, halibut, trollers, draggers, and crab boats. Generally, we do not encourage boats under 30 or 35 feet in length or under $20,000 in value.

MEANS OF OPERATION: The fund is managed by a manager and a board of directors. At the annual meeting, changes or policies are set and the board is elected by the members. All members have a vote.

RATES OF MEMBERSHIP: We charge a rate or premium of 5% of the amount carried in the fund. This is divided into quarterly payments payable at least by March 31st, June 30th, September 30th, and year end. In the last quarter, members will take lay-up credit for the whole year. That is any time their vessel was tied up over 15 days. With the lay-up off, the rate becomes some less than 5%, depending on the number of months tied up. Therefore, your actual rate would become:

With no lay-up at all	5.00%
With 2 months lay-up	4.58
With 4 months lay-up	4.16
With 6 months lay-up	3.75
with 8 months lay-up	3.33
with 10 months lay-up	2.91

This rate, after lay-up, is paid each year for four years. Each year a refund is set aside, depending on yours and the funds loss experience. In the fifth year you are still charged the 5% rate but your account is credited with the first year's refund. That means, then, that you are three years behind in your refunds and they come due in turn each following year. These refunds make up our reserves for bad years, if any-or for catastrophe. If you sell your boat, retire, etc., you will have three or four years refunds coming which are paid out by check.

REFUNDS: Over the more than fifty year experience of the fund, we have never failed to pay a refund. Some have been big and some have been small, but probably, on the average, have run about 70% for the whole 50 years or so. Lately, in the last ten years, they have been better with an average of about 85%. Our best have been 100% and lowest 40% or so.

STRENGTH: An important consideration when buying protection for your boat is the ability of the fund to pay. Lately, a few commercial insurance companies have gone broke, sometime in mid term for the insured and he has nothing for the money he

BYLAWS

OF

AMERICAN MARINE FUND

ARTICLE I

Name

The name of this organization shall be American Marine Fund.

ARTICLE II

Place of Business

The office and place of business of the Fund shall be in Seattle, Washington. All meetings of the members and of the Board of Directors shall be held in Seattle, Washington.

ARTICLE III

Purpose of Organization

The purpose of this organization is to create and maintain a fund for the reimbursement of marine losses suffered by members and to work for the elimination of careless and reckless operation of fishing vessels, to maintain staunch and seaworthy fishing vessels, and to give help to fellow members' vessels in distress, at a reasonable rate of compensation.

ARTICLE IV

Membership

1. Membership in the Fund shall be confined to owners of steel hull fishing vessels.

2. Continued membership is dependent upon the member being a fishing vessel owner with a record of careful and able operation of his vessel.

3. Any member wishing to enter more than one vessel with the Fund shall apply to the Board of Directors, which may at its discretion accept or refuse such entry.

4. A member whose membership is canceled for nonpayment of required contributions may be reinstated at the discretion of the Board of Directors upon payment of all delinquent contributions.

5. The widow or surviving children of a deceased member may retain his membership if the vessel is managed by a person approved by the Board of Directors.

6. All members shall have the same rights and privileges.

ARTICLE V

Membership Meetings

1. The annual meeting of members shall be held on the third Monday in January at 7:30 p.m. At each annual meeting the membership shall elect new directors in the place of those whose terms expire, in accordance with Article VI hereof. Their election shall be by ballot. Special meetings of the membership may be called by the majority of the directors or upon written demand by ten or more members served upon the manager, such demand to specify the particular business to be brought before such meeting.

2. Written notice of the annual meeting of members shall be mailed to each member in good standing by the Business Manager at least ten (10) days before the date of said meeting and similar notice shall be given of special meetings. The notice of special meeting shall state the business to be brought before such meeting. No business shall be brought before any special meeting if not stated in the notice thereof.

3. All members who have paid their contributions for the current quarter as provided in Article IX shall be entitled to express themselves at any meeting of the members, but only one vote may be cast for any one vessel, and only by members in person.

4. One-fifth of the total membership shall constitute a quorum at any annual or special meeting of the members.

ARTICLE VI

Administration

The affairs of this organization shall be administered by a board of seven (7) directors chosen in the following manner: At the time of organization three directors shall be chosen for three (3) years, two directors for two (2) years, and two directors for one (1) year. At each succeeding annual meeting vacancies shall be filled for three (3) year terms. Outgoing directors shall act as alternates for a term of one year.

ARTICLE VII

Board of Directors

1. The Board of Directors shall have the management of the organization and full control thereof as provided in these Bylaws and any amendments thereof.

2. All applications for membership shall be passed on by the Board. A quorum of the directors may approve or reject a particular application by a majority vote, and/or may freeze membership by not accepting any new applications. Upon the request of any director an application for membership may be decided by secret ballot.

3. The directors shall, from their own number, appoint a chairman who shall preside at all meetings of the Board and of the membership. They shall also appoint a vice-chairman to take the chairman's place in case of his absence or inability to act.

4. If a director becomes unable or unwilling to serve, the Board may appoint a new director to serve in his place until the next annual meeting.

5. The Board may meet from time to time as the directors themselves shall decide, and the chairman may call meetings of the Board at any time. Notice of such meetings shall be given in accordance with such rules as the Board itself adopts from time to time. Four (4) members of the Board shall constitute a quorum.

6. The Board shall have the authority to establish valuations and to survey any vessel entered in the Fund. The Board shall have the authority to limit the amount a member may enter in the Fund.

7. Upon written application by a member, the Board shall have authority to decide whether or not to cover a vessel operating south of Latitude 12° North down to Latitude 5° South. The Board shall also have authority to increase rates as it deems necessary on vessels authorized to operate in these waters.

8. The Board shall appoint a Business Manager, whose duties shall be as hereinafter provided. In case of the death, disability or resignation of the Manager the vacancy thus created shall be filled at once. The Manager need not be a member of the organization, nor shall the Board appoint an insurance agent as Manager.

ARTICLE VIII

Business Manager

1. The Business Manager shall furnish a Fidelity Bond in an amount of at least $50,000.00 which shall be raised as the Fund increases, guaranteeing the faithful performance of all his duties.

2. The Manager shall be custodian of all funds belonging to the Fund. He shall deposit receipts in such depository or depositories as the Board of Directors shall designate. He shall disburse funds as approved by the Board.

3. The Manager shall keep an accurate record of all business transacted for this organization.

4. The Manager shall give the notices required for meetings of the Board of Directors and of the membership, and shall act as secretary at all such meetings.

5. The Manager shall be paid compensation in the amount of 5% of receipts of the organization.

ARTICLE IX

Rules for Conduct of Business

1. In all instances the Fund will record the agreed value of a vessel and also that part of the agreed value entered with the Fund. No entry with the Fund shall exceed $100,000.00. That part of the agreed value of a vessel entered with the Fund shall be the basis upon which contributions are assessed and losses are prorated and reimbursed.

2. Losses of members shall be adjusted and reimbursed in accordance with the terms of the American Hulls Pacific [1938] form, but with the limitations otherwise stated in these Bylaws.

3. Members shall not be reimbursed for loss of power skiffs whether on board the member's vessel or otherwise.

4. The right to reimbursement under these Bylaws is subject to the following warranties, to the same effect as though they were incorporated in the American Hulls Pacific [1938] form:

(a) Territorial Limits. Vessels shall trade only from Latitude 12° North to Latitude 65° North, and east of Longitude 172° East.

(b) Stability Test. Vessels equipped with fish holding tanks must have aboard a current, approved stability letter or report from an approved naval architect.

(c) Bilge Alarm. All vessels shall be equipped with a bilge alarm system installed to warn of water entry above a safe level.

(d) Fire Alarm. All vessels shall be equipped with at least one fire alarm system.

(e) Survey. All vessels shall engage a professional surveyor every second year to survey the vessel and will provide the Fund with a copy of the survey. All of the surveyor's recommendations must be complied with.

5. Warranted free from particular average under $10.00 per foot of the Vessel's registered length, but nevertheless, if the Vessel shall have been stranded, sunk on fire, or in collision with any other ship or vessel, the Fund shall pay damage occasioned thereby in accordance with Article IX, Section 8, of these Bylaws.

6. In case of accident, the member must notify the Manager or one of the directors promptly and before having repairs made to his own vessel. If another vessel is damaged, the member must notify the Manager or a director promptly so that the Fund can protect its interest.

7. In all cases of loss or damage involving a member's vessel, two of the directors, if available (or two members if no directors are available) may serve as surveyors to determine extent of damage and necessary repairs to be undertaken for the owner's account, and to prepare and approve specifications for repairs. In lieu of survey by directors or members, the Manager may engage a professional marine surveyor.

8. Any member claiming reimbursement for loss shall submit proof of loss, and the Board may require additional proof before taking action on the claim. The Board will notify the member of the action taken by the Board to adjust and approve or disapprove his claim. No member or other person interested in reimbursement shall be entitled to interest upon the amount which may be due from the Fund until 30 days after such notification.

9. Claims for losses shall be adjusted in accordance with the practice of marine underwriters at the port of Seattle at the date of loss. The Fund reserves the right to do its own surveying and adjusting.

10. No reimbursement shall be afforded if a vessel shall be sold, assigned, pledged, chartered or placed under new management, whether voluntary or otherwise, without prior notification to the Manager and written approval executed by him.

11. Contribution rates for members shall be five percent (5%) per year, with no allowance for layup time.

Each member who enters this organization before February 1, 1987 shall give the Fund a promissory note in the amount of $10,000.00 or ten percent (10%) of that member's entry with the Fund, whichever is less. The note shall be payable to the order of American Marine Fund upon demand within two (2) years of the date of the note. The note shall be signed by the member and his spouse. The form of promissory note is attached hereto as Schedule A.

If the Fund receives payment of the promissory note given by a member as above provided, said payment shall thereupon become an indebtedness of the Fund in favor of the member and shall bear interest thereafter at the prime rate then charged by Seattle-First National Bank. Regardless of whether the Fund demands payment of the promissory note given by a member as above provided, the Fund shall reduce by $500.00 the member's contribution for each of the first two (2) full years of membership following the expiration of the term of the note. The Fund may transfer or negotiate promissory notes made by members in such manner as is approved by the Board. The provisions of these Bylaws shall not be binding upon any holder of the said notes other than the Fund.

If a vessel is sold by a member, the Fund shall return that member's promissory note unless it has been negotiated. If the note has been negotiated, and if the purchaser of the vessel is approved by the Board for membership, the Board shall waive the requirement that the purchaser give a promissory note.

12. If a vessel is sold by a member, the prorated unexpired membership dues shall be refunded, or may be transferred to the new owner upon approval by the Board.

13. Membership contributions shall be paid quarterly in advance no later than the first days of January, April, July and October. Any member more than ninety (90) days delinquent in payment of his contribution shall be automatically canceled as a member.

14. The expiration date of all memberships shall be December 31 of each year. The first year the members to pay dues in full, the unexpired balance on December 31 to be credited to their new membership for the ensuing calendar year.

15. If a vessel is covered for a portion of a year and has a claim during that time, the member is liable for a full year's dues, and any balance due the Fund on account thereof shall be deducted from the amount due under the claim if sufficient to cover, and if not, shall be paid in full by the member.

16. Each member shall promptly notify the Manager or a director of any hull and machinery insurance which he carries on his vessel beyond the protection afforded under these rules.

17. Should the United States of America or any of its instrumentalities be deemed a member of this organization because of an interest as mortgagee, mortgage guarantor, or otherwise, in any vessel entered in this organization and be afforded reimbursement as a payee under these Bylaws, this organization shall have full rights of subrogation against the United States of America to the extent of any loss paid for which any member other than the United States of America could bring suit against the United States of America under the Suits in Admiralty Act, Public Vessels Act, Federal Tort Claims Act, or Tucker Act to recover for such loss, and notwithstanding the fact that the United States of America may be deemed to be a member of this organization and as payee for reimbursement of a loss, such loss shall be considered to have been paid to and sustained by any member other than the United States of America in the first instance.

ARTICLE X

Overhead Expenses

The directors are not allowed to exceed five percent (5%) on contributions to the Fund to defray necessary expense.

ARTICLE XI

Surplus

All surplus from contributions shall be credited to each individual member at the end of each year in proportion to his contribution to the Fund for the year. If any member has received any payment from the Fund during a year on account of losses, the amount to be credited to him from the surplus under the foregoing provisions shall be reduced by the amount or amounts so paid to him for losses, but no payments for losses for preceding years shall be so deducted. Each year's surplus shall at all times, until withdrawn as hereinafter provided, be available as a part of the Fund for the purpose of paying losses sustained by members, without regard to such credits; provided, however, that such surplus shall not be available for payment of future losses or any other disbursements in any year until the current year's contributions and income have been exhausted, and if in any year there is no current surplus, and further funds are required to pay claims, such further payments shall be charged against the yearly surpluses from the preceding four years in the inverse order of their establishment. Withdrawals from a year's surplus may be made after the fifth year of its establishment to such an extent as two-thirds of the membership in good standing shall decide.

The net earnings from investment of the members' current contributions and surplus shall be used to pay claims, expenses and taxes and the excess of such net earnings, if any, shall be set aside for the payment of future claims, expenses and taxes and shall not be credited or paid to the members. Upon a dissolution of the Fund, any net earnings remaining after the payment of all outstanding claims, expenses and taxes shall be distributed to such charitable, religious, educational, scientific and literary organizations (contributions to which are deductible for federal and State of Washington income tax purposes) and in such amounts as the directors shall select.

ARTICLE XII

Expulsion

1. The Board of Directors shall have full and complete authority to expel any member and thereby cancel all rights afforded by these Bylaws when in its sole discretion any member is detrimental to or does not abide by the purposes of the organization.

2. Expulsion of a member and cancellation of his membership shall be made in the following manner: The Board of Directors shall prepare specifications of any charge made against the member. A copy of such specifications together with a notice of hearing thereon before the Board of Directors shall be mailed by registered mail, return receipt requested, postage prepaid, to the member in question at his last address appearing on the books of the organization. Said notice shall be mailed at least ten (10) days before the hearing. It shall request the member to be present at the hearing. The member in question shall be given full opportunity to respond to the charge, and thereafter the Board of Directors shall vote by secret ballot upon expulsion. Expulsion shall require the votes of at least five (5) directors. If expulsion is approved by the Board of Directors the same shall become effective ten (10) days from the date of the vote thereon.

3. Any money due an expelled member shall be paid in accordance with the provisions of Article XI of these Bylaws.

ARTICLE XIV

Losses

No member, director, agent, servant, or attorney of this organization shall be liable for any loss suffered by any member, and no assessment shall be levied on any of them under any circumstances for the purpose of paying losses or for any other purpose, either directly or indirectly. If the fund created does not suffice to

reimburse for the aggregate losses during a year, the deficiency shall be prorated among all proven claims for the year during which the deficiency occurs after application of the surplus provided in Article XI. No insurance business of any kind must be done as such business is understood under the statutes of the State of Washington.

ARTICLE XV

Amendments

These Bylaws may be amended at the annual meeting of the members, or at any special meeting called for that purpose, by a majority of a quorum of the whole membership.

Schedule A

PROMISSORY NOTE

Dated at Seattle, Washington, _____, 198___. $10,000.00

FOR VALUE RECEIVED, the undersigned promises to pay to the order of American Marine Fund upon demand made on or before two years from the date of this note, the sum of TEN THOUSAND DOLLARS ($10,000.00), in lawful money of the United States. Payment to be made at such place as the holder may direct in writing.

If payment is not made promptly upon demand as above provided, this note shall bear interest at the rate of twelve percent (12%) per annum from the date of demand until paid, and if this note shall be placed in the hands of an attorney for collection or if suit shall be brought to collect any of the principal or interest of this note, the undersigned promises to pay any reasonable attorneys' fees and agrees that venue of suit may be laid in King County, State of Washington. The maker of this note executes the same as a principal and not as a surety and waives presentment, demand, protest, notice of protest, notice of dishonor, and notice of nonpayment. If this note is signed by more than one person the obligations of the signers shall be joint and several.

Juneau, Alaska 99811

Dear Bill:

It was a pleasure to meet you in Anchorage on November 14th. The "twilight zone" can reasonably effectively be removed from the Alaska Workers' Compensation Act by the addition of the following language.

> No compensation under this Act shall be payable in respect of the death or disability of a master or member of a crew of any vessel.

This language is taken from the Longshore and Harbor Workers' Compensation Act, 33 U.S.C. Section 903(a)(1). If accompanied by appropriate legislative history concerning the intent of this language, it should clearly remove coverage for those engaged in the fishing industry who retain numerous federal maritime rights and whose remedies are only extended under the Alaska Act during such times as their vessels are tied up to wharves.

I would be delighted to assist in this project if any additional help is necessary.

Very truly yours,

FAULKNER, BANFIELD,
DOOGAN & HOLMES

REPRESENTATIVE JOHNE BINKLEY

MEMORANDUM

March 22, 1985

TO: Representative Al Adams

From: Representative Johne Binkley
Chair of Subcommittee on HB 5

RE: House Bill 5

The subcommittee on House Bill 5 is recommending that the full committee adopt the proposed House Finance Committee Substitute with a revised fiscal note dated March 21, 1985.

This fiscal note would increase the contractual line item in order to hire two industrial hygienist for a two year period to carry out the survey program, particularly in small school districts, as the large districts have for the most part complied. Personal Services would be provided to hire a temporary industrial hygienist for the certification program for ten months to do regulations and start the program.

The Department of Labor will try to run the program with the FY87 amounts indicated in the fiscal note. The subcommittee indicated that if that amount was not sufficient additional funds should be requested in the FY 87 budget.

BREAKDOWN OF ASBESTOS PROJECTS
FUNDED FROM CHAPTER 24, SLA 1984

Cordova City Schools - $48,870.79- Asbestos Removal from Mt. Eccles Elementary School basement. PROJECT COMPLETE.

Delta/Greely School District - $99,500 - Survey & Removal of asbestos at Delta Junction and Ft. Greely Schools. Final inspection and reinsulation.

Tanana City School District - $285,104.25 - Removal of asbestos in main boiler room, classrooms, teachers lounge, bathroom, and fan room , above ceiling tiles, water lines and heating pipes . Reinsulation with fiberglass. Encapsulation of asbestos in hallway boiler room. Clean up and final inspections. PROJECT COMPLETE.

Petersburg City Schools - $107,000 - Removal of asbestos from old high school building.

Alaska Gateway School District - $75,206.26 - Specifications, technical, and professional services for the removal and encapsulation of asbestos containing material at Tok School. Final inspection. PROJECT COMPLETE.

Lake & Peninsula School District - $6995.00 - Inspection of 14 school sites and abatement at three sites where asbestos was identified.

Kodiak Island Borough Schools - $89,673.76 - Funds were spent as follows:
Kodiak Jr. High - demolition phase of remodel for asbestos removal.
Port Lions School - Removal of asbestos pipe insulation at elementary school.
Old Main Elementary - Removal of asbestos pipe insulation.
Kodiak High School - Removal of asbestos fireproofing from roof beam above Gym and cost estimate and analysis for total high school project.
ALL OF THE ABOVE PROJECTS ARE COMPLETE

Sitka Borough Schools - $150,000 - Asbestos removal from boiler rooms at Sitka High School, Blatchley Jr. High and Etolin St. Elementary School.

Juneau Borough Schools - $400,000 - Survey of 11 schools in the district and removal of all asbestos found.

Fairbanks North Star Borough School District - $697,000 - Removal of all asbestos containing structural materials throughout the school district. Fairbanks has requested an additional $500,000 for completion of this project.

Mat-Su Borough Schools - $225,000 - Funds applied for 3/85 for asbestos abatement.

04.0106	Nonionizing Radiation	120
04.0107	Effective Dates	122
04.0108	Sources of Standards	123
04.0109	Standards Organizations	124

04.0102 Asbestos. (a) Definitions, for the purpose of 04.0102.

(1) "Asbestos" includes chrysotile, amosite, crocidolite, tremolite, anthophylite, and actinolite.

(2) "Asbestos fibers" means asbestos fibers longer than five micrometers.

(b) Permissible exposure to airborne concentrations of asbestos fibers.

(1) Standard effective July 7, 1972. The 8-hour time weighted average airborne concentrations of asbestos fibers to which any employee may be exposed shall not exceed five fibers, longer than five micrometers, per cubic centimeter of air, as determined by the method prescribed in 04.0102(e).

(2) Standard effective July 1, 1976. The 8-hour time weighted average airborne concentrations of asbestos fibers to which any employee may be exposed shall not exceed two fibers, longer than five micrometers, per cubic centimeter of air, as determined by the method prescribed in 04.0102(e).

(3) Ceiling concentration. No employee shall be exposed at any time to airborne concentrations of asbestos fibers in excess of 10 fibers, longer than five micrometers, per cubic centimeter of air, as determined by the method prescribed in 04.0102(e).

(c) Methods of compliance.

(1) Engineering methods.

(A) Engineering controls. Engineering controls, such as, but not limited to, isolation, enclosure, exhaust ventilation, and dust collection, shall be used to meet the exposure limits prescribed in 04.0102(b).

(B) Local exhaust ventilation

(i) Local exhaust ventilation and dust collection systems shall be designed, constructed, installed, and maintained in accordance with the American National Standard Fundamentals Governing the Design and Operation of Local Exhaust Systems, ANSI Z9.2-1971, which is incorporated by reference herein.

(ii) See 1910.8 of the Federal Occupational Safety and Health Act concerning the availability of ANSI Z9.2-1971, and the maintenance of a historic file in connection therewith. The address of the American National Standards Institute is given in 04^109.

(C) Particular tools. All hand-operated and power-operated tools which may produce or release asbestos fibers in excess of the exposure limits prescribed in 04.0102(b), such as, but not limited to, saws, scorers, abrasive wheels, and drills, shall be provided with local exhaust ventilation systems in accordance with 04.0102(c)(1)(B).

(2) Work practices.

(A) Wet methods. Insofar as practicable, asbestos shall be handled, mixed, applied, removed, cut, scored, or otherwise worked in a wet state sufficient to prevent the emission of airborne fibers in excess of the exposure limits prescribed in 04.0102, unless the usefulness of the product would be diminished thereby.

(B) Particular products and operations. No asbestos cement, mortar, coating, grout, plaster, or similar material containing asbestos shall be removed from bags, cartons, or other containers in which they are shipped, without being either wetted, or enclosed, or ventilated so as to prevent effectively the release of airborne asbestos fibers in excess of the limits prescribed in 04.0102.

(C) Spraying, demolition, or removal. Employees engaged in the spraying of asbestos, the removal, or demolition of pipes, structures, or equipment covered or insulated with asbestos, and in the removal or demolition of asbestos insulation or coverings shall be provided with respiratory equipment in accordance with 04.0102(d)(2)(C) and with special clothing in accordance with 04.0102(d)(3).

(d) Personal protective equipment.

(1) Compliance with the exposure limits prescribed by 04.0102(b) may not be achieved by the use of respirators or shift rotation of employees, except:

(A) During the time period necessary to install the engineering controls and to institute the work practices required by 04.0102(c);

(B) In work situations in which the methods prescribed in 04.0102(c) are either technically not feasible or feasible to an extent insufficient to reduce the airborne concentrations of asbestos fibers below the limits prescribed by 04.0102(b); or

(C) In emergencies.

(D) Where both respirators and personnel rotation are allowed by 04.0102(d)(1)(A), (B) or (C), and both are practicable, personnel rotation shall be preferred and used.

(2) Where a respirator is permitted by 04.0102(d)(1), it shall be selected from among those approved by the Bureau of Mines, Department of the Interior, or the National Institute for Occupational Safety and Health, Department of Health, Education, and Welfare, under the provisions of 30 CFR Part 11 (37 F.R. 6244, Mar. 25, 1972), and shall be used in accordance with 04.0102(d)(2)(A), (B), (C) and (D).

(A) Air purifying respirators. A reusable or single use air purifying respirator, or a respirator described in 04.0102(d)(2)(B) or (C), shall be used to reduce the concentrations of airborne asbestos fibers in the respirator below the exposure limits prescribed in 04.0102(b), when the ceiling or the 8-hour time weighted average airborne concentrations of asbestos fibers are reasonably expected to exceed no more than 10 times those limits.

(B) Powered air purifying respirators. A full facepiece powered air purifying respirator, or a powered air purifying respirator, or a respirator described in 04.0102(d)(2)(C), shall be used to reduce the concentrations of airborne asbestos fibers in the respirator below the exposure limits prescribed in 04.0102(b), when the ceiling or the 8-hour time weighted average concentrations of asbestos fibers are reasonably expected to exceed 10 times, but not 100 times, those limits.

(C) Type "C" supplied-air respirators, continuous flow or pressure-demand class. A type "C" continuous flow or pressure-demand, supplied-air respirator shall be used to reduce the concentrations of airborne asbestos fibers in the respirator below the exposure limits prescribed in 04.0102(b), when the ceiling or the 8-hour time weighted average airborne concentrations of asbestos fibers are reasonably expected to exceed 100 times those limits.

(D) Establishment of a respirator program.

(i) The employer shall establish a respirator program in accordance with the requirements of the American National Standards Practices for Respiratory Protection, ANSI Z88.2–1969, which is incorporated by reference herein.

(ii) See 1910.6 of the Federal Occupational Safety and Health Act concerning the availability of ANSI Z88.2–1969 and the maintenance of a historic file in connection therewith. The address of the American National Standards Institute is given in 04.0108.

(iii) No employee shall be assigned to tasks requiring the use of respirators if, based upon his most recent examination, the examining physician determines that the employee will be unable to function normally wearing a respirator, or that the safety or health of the employee or other employees will be impaired by his use of a respirator. Such employee shall be rotated to another job or given the opportunity to transfer to a different position whose duties he is able to perform with the same employer, in the same geographical area and with the same seniority, status, and rate of pay he had just prior to such transfer, if such a different position is available.

(3) Special clothing. The employer shall provide, and require the use of, special clothing, such as coveralls or similar whole body clothing, head coverings, gloves, and foot coverings for any employee exposed to airborne concentrations of asbestos fibers, which exceed the ceiling level prescribed in 04.0102(b).

(4) Change rooms.

(A) At any fixed place of employment exposed to airborne concentrations of asbestos fibers in excess of the exposure limits prescribed in 04.0102(b), the employer shall provide change rooms for employees working regularly at the place.

(B) Clothes lockers. The employer shall provide two separate lockers or containers for each employee, so separated or isolated as to prevent contamination of the employee's street clothes from his work clothes.

(C) Laundering.

(i) Laundering of asbestos contaminated clothing shall be done so as to prevent the release of airborne asbestos fibers in excess of the exposure limits prescribed in 04.0102(b).

(ii) Any employer who gives asbestos-contaminated clothing to another person for laundering shall inform such person of the requirement in 04.0102(d)(4)(C)(i) to effectively prevent the release of airborne asbestos fibers in excess of the exposure limits prescribed in 04.0102(b).

(iii) Contaminated clothing shall be transported in sealed impermeable bags, or other closed, impermeable containers, and labeled in accordance with 04.0102(g).

(e) Method of measurement. All determinations of airborne concentrations of asbestos fibers shall be made by the membrane filter method at 400–450 X (magnification) (4 millimeter objective) with phase contrast illumination.

(f) Monitoring.

(1) Initial determinations. Within six months of the publication of 04.0102 every employer shall cause every place of employment where asbestos fibers are released to be monitored in such a way as to determine whether every employee's exposure to asbestos fibers is below the limits prescribed in 04.0102(b). If the limits are exceeded, the employer shall immediately undertake a compliance program in accordance with 04.0102(c).

(2) Personal monitoring.

(A) Samples shall be collected from within the breathing zone of the employees, on membrane filters of 0.8 micrometer porosity mounted in an open- face filter holder. Samples shall be taken for the determination of the 8-hour time weighted average airborne concentrations and of the ceiling concentrations of asbestos fibers.

(B) Sampling frequency and patterns. After the initial determinations required by 04.0102(f)(1), samples shall be of such frequency and pattern as to represent with reasonable accuracy the levels of exposure of employees. In no case shall the sampling be done at intervals greater than six months for employees whose exposure to asbestos may reasonably be foreseen to exceed the limits prescribed by 04.0102(b).

(3) Environmental monitoring.

(A) Samples shall be collected from areas of a work environment which are representative of the airborne concentration of asbestos fibers which may reach the breathing zone of employees. Samples shall be collected on a membrane filter of 0.8 micrometer porosity mounted in an open-face filter holder. Samples shall be taken for the determination of the 8-hour time weighted average airborne concentrations and of the ceiling concentrations of asbestos fibers.

(B) Sampling frequency and patterns. After the initial determinations required by 04.0102(f)(1), samples shall be of such frequency and pattern as to represent with reasonable accuracy the levels of exposure of the employees. In no case shall sampling be at intervals greater than six months for employees whose exposures to asbestos may reasonably be foreseen to exceed the exposure limits prescribed in 04.0102(b).

(4) Employee observation of monitoring. Affected employees, or their representatives, shall be given a reasonable opportunity to observe any monitoring required by 04.0102 and shall have access to the records thereof.

(g) Caution signs and labels.

(1) Caution signs.

(A) Posting. Caution signs shall be provided and displayed at each location where airborne concentrations of asbestos fibers may be in excess of the exposure limits prescribed in 04.0102(b). Signs shall be posted at such a distance from such a location so that an employee may read the signs and take necessary protective steps before entering the area marked by the signs. Signs shall be posted at all approaches to areas containing excessive concentrations of airborne asbestos fibers.

(B) Sign specifications. The warning signs required by 04.0102(g)(1)(A) shall conform to the requirements of 20 inches by 14 inches vertical format signs specified in 02.0105 and to 04.0102(g)(1)(B). The signs shall display the following legend in the lower panel, with letter sizes and styles of a visibility at least equal to that specified in 04.0102(g)(1)(B).

Legend	Notation
Asbestos	1 in. Sans Serif, Gothic or Block
Dust hazard	½ in. Sans Serif, Gothic or Block
Avoid breathing dust	¼ in. Gothic
Wear assigned protective equipment	¼ in. Gothic
Do not remain in area unless your work requires it.	¼ in. Gothic
Breathing asbestos dust may be hazardous to your health	14 point Gothic

Spacing between lines shall be at least equal to the height of the upper of any two lines.

(2) Caution labels.

(A) Labeling. Caution labels shall be affixed to all raw materials, mixtures, scrap, waste, debris, and other products containing asbestos fibers, or to their containers, except that no label is required where asbestos fibers have been modified by a bonding agent, coating, binder, or other material so that during any reasonably foreseeable use, handling, storage, disposal, processing, or transportation, no airborne concentrations of asbestos fibers in excess of the exposure limits prescribed in 04.0102(b) will be released.

(B) Label specifications. The caution labels required by 04.0102(g)(2)(A) shall be printed in letters of sufficient size and contrast as to be readily visible and legible. The label shall state:

CAUTION

Contains Asbestos Fibers
Avoid Creating Dust
Breathing Asbestos Dust May Cause
Serious Bodily Harm

(h) Housekeeping.

(1) Cleaning. All external surfaces in any place of employment shall be maintained free of accumulations of asbestos fibers if, with their dispersion, there would be an excessive concentration.

(2) Waste disposal. Asbestos waste, scrap, debris, bags, containers, equipment, and asbestos-contaminated clothing, consigned for disposal, which may produce in any reasonably foreseeable use, handling, storage, processing, disposal, or transportation, airborne concentrations of asbestos fibers in excess of the exposure limits prescribed in 04.0102(b), shall be collected and disposed of in sealed impermeable bags, or other closed, impermeable containers.

(i) Recordkeeping.

(1) Exposure records. Every employer shall maintain records of any personal or environmental monitoring required by 04.0102. Records shall be maintained for a period of at least 20 years and shall be made available upon request to the Assistant Secretary of Labor for Occupational Safety and Health, the Director of the National Institute for Occupational Safety and Health, and to authorized representatives of either.

(2) Employee access. Every employee and former employee shall have reasonable access to any record required to be maintained by 04.0102(i)(1) which indicates the employee's own exposure to asbestos fibers.

(3) Employee notification. Any employee found to have been exposed at any time to airborne concentrations of asbestos fibers in excess of the limits prescribed in 04.0102(b) shall be notified in writing of the exposure as soon as practicable but not later than five days of the finding. The employee shall also be timely notified of the corrective action being taken.

(j) Medical examinations.

(1) General. The employer shall provide or make available at his cost, medical examinations relative to exposure to asbestos required by 04.0102(j).

(2) Preplacement. The employer shall provide or make available to each of his employees, within 30 calendar days following his first employment in an occupation exposed to airborne concentrations of asbestos fibers, a comprehensive medical examination, which shall include, as a minimum, a chest roentgenogram (posterior–anterior 14 x 17 inches), a history to elicit symptomatology of respiratory disease, and pulmonary function tests to include forced vital capacity (FVC) and forced expiratory volume at one second ($FEV_{1.0}$).

(3) Annual examinations. On or before January 31, 1973, and at least annually thereafter, every employer shall provide, or make available, comprehensive medical examinations to each of his employees engaged in occupations exposed to airborne concentrations of asbestos fibers. Such annual examination shall include, as a minimum, a chest roentgenogram (posterior–anterior 14 x 17 inches), a history to elicit symptomatology of respiratory disease, and pulmonary function tests to include forced vital capacity (FVC) and forced expiratory volume at one second ($FEV_{1.0}$).

(4) Termination of employment. The employer shall provide, or make available, within 30 calendar days before or after the termination of employment of any employee engaged in an occupation exposed to airborne concentrations of asbestos fibers, a comprehensive medical examination which shall include, as a minimum, a chest roentgenogram (posterior–anterior 14 x 17 inches), a history to elicit symptomatology of respiratory disease, and pulmonary function tests to include forced vital capacity (FVC) and forced expiratory volume at one second ($FEV_{1.0}$).

(5) Recent examinations. No medical examination is required of any employee, if adequate records show that the employee has been examined in accordance with 04.0102(j) within the past one-year period.

(6) Medical records.

(A) Maintenance. Employers of employees examined pursuant to 04.0102(j) shall cause to be maintained complete and accurate records of all such medical examinations. Records shall be retained by employers for at least 20 years.

(B) Access. The contents of the records of the medical examinations required by 04.0102(j) shall be made available, for inspection and copying, to the Assistant Secretary of Labor for Occupational Safety and Health, the Director of NIOSH, to authorized physicians and medical consultants of either of them, and, upon the request of an employee or former employee, to his physician. Any physician who conducts a medical examination required by 04.0102 (j) shall furnish to the employer of the examined employee all the information specifically required by 04.0102(j) and any other medical information related to occupational exposure to asbestos fibers.

04.0103 Ventilation. (a) Abrasive blasting.

(1) Definitions applicable to 04.0103.

(A) Abrasive. A solid substance used in an abrasive blasting operation.

(B) Abrasive-blasting respirator. A continuous flow air-line respirator constructed so that it will cover the wearer's head, neck, and shoulders to protect him from rebounding abrasive.

(C) Blast cleaning barrel. A complete enclosure which rotates on an axis, or which has an internal moving tread to tumble the parts, in order to expose various surfaces of the parts to the action of an automatic blast spray.

(D) Blast cleaning room. A complete enclosure in which blasting operations are performed and where the operator works inside of the room to operate the blasting nozzle and direct the flow of the abrasive material.

(E) Blasting cabinet. An enclosure where the operator stands outside and operates the blasting nozzle through an opening or openings in the enclosure.

(F) Clean air. Air of such purity that it will not cause harm or discomfort to an individual if it is inhaled for extended periods of time.

(G) Dust collector. A device or combination of devices for separating dust from the air handled by an exhaust ventilation system.

(H) Exhaust ventilation system. A system for removing contaminated air from a space, comprising two or more of the following elements: (a) enclosure or hood, (b) duct work, (c) dust collecting equipment, (d) exhauster, and (e) discharge stack.

(I) Particulate-filter respirator. An air purifying respirator, commonly referred to as a dust or a fume respirator, which removes most of the dust or fume from the air passing through the device.

(J) Respirable dust. Airborne dust in sizes capable of passing through the upper respiratory system to reach the lower lung passages.

(K) Rotary blast cleaning table. An enclosure where the pieces to be cleaned are positioned on a rotating table and are passed automatically through a series of blast sprays.

(L) Abrasive blasting. The forcible application of an abrasive to a surface by pneumatic pressure, hydraulic pressure, or centrifugal force.

(2) Dust hazards from abrasive blasting.

(A) Abrasives and the surface coatings on the materials blasted are shattered and pulverized during blasting operations and the dust formed will contain particles of respirable size. The composition and toxicity of the dust from these sources shall be considered in making an evaluation of the potential health hazards.

(B) The concentration of respirable dust or fume in the breathing zone of the abrasive-blasting operator or any other worker shall be kept below the levels specified in 04.0101.

SUBCHAPTER 1 - GENERAL SAFETY CODE

ARTICLE 4 - PERSONAL PROTECTIVE EQUIPMENT

01.0401 General requirements. (a) Application. Protective equipment, including personal protective equipment for eyes, face, head, and extremeties, protective clothing, respiratory devices, and protective shields and barriers, shall be provided, used, and maintained in a sanitary and reliable condition wherever it is necessary by reason of hazards of processes or environment, chemical hazards, radiological hazards, or mechanical irritants encountered in a manner capable of causing injury or impairment in the function of any part of the body through absorption, inhalation or physical contact.

(b) Employee-owned equipment. Where employees provide their own protective equipment, the employer shall be responsible to assure its adequacy, including proper maintenance, and sanitation of such equipment.

(1) Other personal safety equipment or clothing, such as rubber gloves, rubber boots, leggings, aprons, hand pads, safety belts, life lines, buoyant vests, shall be furnished to the employees who are exposed to hazards where such device may be expected to prevent injury.

(c) Design. All personal protective equipment shall be of safe design and construction for the work to be performed.

(d) Sterilization. Goggles, rubber gloves, respirators and other protectors shall not be interchanged among employees unless they have been sterilized.

01.0402 Eye and face protection. (a) General.

(1) Protective eye and face equipment shall be required where there is a reasonable probability of injury that can be prevented by such equipment. In such cases, employers shall make conveniently available a type of protector suitable for the work to be performed, and employees shall use such protectors. No unprotected person shall knowingly be subjected to a hazardous environmental condition. Suitable eye protectors shall be provided where machines or operations present the hazard of flying objects, glare, liquids, injurious radiation, or a combination of these hazards.

(A) An employer must provide all employees working with acids, protective clothing, as well as any other equipment needed for safety purposes.

(B) Goggles, hard hats, masks, shields, or other prescribed face, eye and head protection shall be worn by employees who are engaged in welding, grinding, torch cutting, snagging or chipping, handling molten metals, caustics, or who are exposed to harmful rays, dust or flying materials of any kind.

(2) Protectors shall meet the following minimum requirements.

(A) They shall provide adequate protection against the particular hazards for which they are designed.

(B) They shall be reasonably comfortable when worn under the designated conditions.

(C) They shall fit snugly and shall not unduly interfere with the movements of the wearer.

(D) They shall be durable.

(E) They shall be capable of being disinfected.

(F) They shall be easily cleanable.

(G) Protectors shall be kept clean and in good repair.

(3) Persons whose vision requires the use of corrective lenses in spectacles, and who are required by this standard to wear eye protection, shall wear goggles of one of the following types:

(A) Spectacles whose protective lenses provide optical correction.

(B) Goggles that can be worn over corrective spectacles without disturbing the adjustment of the spectacles.

(C) Goggles that incorporate corrective lenses mounted behind the protective lenses.

(4) Every protector shall be distinctly marked to facilitate identification only of the manufacturer.

(5) When limitations or precautions are indicated by the manufacturer, they shall be transmitted to the user and care taken to see that such limitations and precautions are strictly observed.

(6) Design, construction, testing, and use of devices for eye and face protection shall be in accordance with American National Standard for Occupational and Educational Eye and Face Protection, Z87.1-1968.

01.0403 Respiratory protection. (a) Permissible practice.

(1) In the control of those occupational diseases caused by breathing air contaminated with harmful dusts, fogs, fumes, mists, gases, smokes, sprays, or vapors, the primary objective

shall be to prevent atmospheric contamination. This shall be accomplished as far as feasible by accepted engineering control measures (for example, enclosure or confinement of the operation, general and local ventilation, and substitution of less toxic materials). When effective engineering controls are not feasible, or while they are being instituted, appropriate respirators shall be used pursuant to the following requirements.

(2) Respirators shall be provided by the employer when such equipment is necessary to protect the health of the employees. The employer shall provide the respirators which are applicable and suitable for the purpose intended. The employer shall be responsible for the establishment and maintenance of a respiratory protective program which shall include the requirements outlined in 01.0403(b).

(3) The employee shall use the provided respiratory protection in accordance with instructions and training received.

(b) Requirements for a minimal acceptable program.

(1) Written standard operating procedures governing the selection and use of respirators shall be established.

(2) Respirators shall be selected on the basis of hazards to which the worker is exposed.

(3) The user shall be instructed and trained in the proper use of respirators and their limitations.

(4) Where practicable, the respirators should be assigned to individual workers for their exclusive use.

(5) Respirators shall be regularly cleaned and disinfected. Those issued for the exclusive use of one worker should be cleaned after each day's use, or more often if necessary. Those used by more than one worker shall be thoroughly cleaned and disinfected after each use.

(6) Respirators shall be stored in a convenient clean, and sanitary location.

(7) Respirators used routinely shall be inspected during cleaning. Worn or deteriorated parts shall be replaced. Respirators for emergency use, such as self-contained devices shall be thoroughly inspected at least once a month and after each use.

(8) Appropriate surveillance of work area conditions and degree of employee exposure or stress shall be maintained.

(9) There shall be regular inspection and evaluation to determine the continued effectiveness of the program.

(10) Persons should not be assigned to tasks requiring use of respirators unless it has been determined that they are physically able to perform the work and use the equipment. The local physician shall determine what health and physical conditions are pertinent. The respirator user's medical status should be reviewed periodically (for instance, annually.)

(11) Approved or accepted respirators shall be used when they are available. The respirators furnished shall provide adequate respiratory protection against the particular hazard for which it is designed in accordance with standards established by competent authorities. The U.S. Department of Interior, Bureau of Mines, and the U.S. Department of Agriculture are recognized as such authorities. Although respirators listed by the U.S. Department of Agriculture continue to be acceptable for protection against specified pesticides, the U.S. Department of the Interior, Bureau of Mines, is the agency now responsible for testing and approving pesticide respirators.

(c) Selection of respirators. Proper selection of respirators shall be made according to the guidance of American National Standard Practices for Respiratory Protection Z88.1-1969.

(d) Air quality.

(1) Compressed air, compressed oxygen, liquid air, and liquid oxygen used for respiration shall be of high purity. Oxygen shall meet the requirements of the United State Pharmacopoeia for medical or breathing oxygen. Breathing air shall meet at least the requirements of the specification for Grade D breathing air as described in Compressed Gas Association, Commodity Specification G-7.1-1966. Compressed oxygen shall not be used in supplied-air respirators or in open circuit self-contained breathing apparatus that have previously used compressed air. Oxygen must never be used with air line respirators.

(2) Breathing air may be supplied to respirators from cylinders or air compressors.

(A) Cylinders shall be tested and maintained as prescribed in the Shipping Container Specification Regulations of the Department of Transportation (49 CFR Part 178.)

(B) The compressor for supplying air shall be equipped with necessary safety and standby devices. A breathing air-type compressor shall be used. Compressors shall be constructed and situated so as to avoid entry of contaminated air into the system and suitable in-line purifying sorbent beds and filters installed to further assure breathing air quality. A receiver of sufficient capacity to enable the respirator wearer to escape from a contaminated atmosphere in event of compressor failure, and alarms to indicate compressor failure and overheating shall be in-

stalled in the system. If an oil-lubricated compressor is used, it shall have a high-temperature or carbon monoxide alarm, or both. If only a high-temperature alarm is used, the air from the compressor shall be frequently tested for carbon monoxide to insure that it meets the specifications in 01.0403(d)(1).

(3) Air line couplings shall be incompatible with outlets for other gas systems to prevent inadvertent servicing of air line respirators with nonrespirable gases or oxygen.

(4) Breathing gas containers shall be marked in accordance with American National Standard Method of Marking Portable Compressed Gas Containers to Identify the Material Contained, Z48.1-1954; Federal Specification BB-A-1034a, June 21, 1968, Air, Compressed for Breathing Purposes; or Interim Federal Specification GG-B-00675b, April 27, 1965, Breathing Apparatus, Self-Contained.

(e) Use of respirators.

(1) Standard procedures shall be developed for respirator use. These should include all information and guidance necessary for their proper selection, use and care. Possible emergency and routine uses of respirators should be anticipated and planned for.

(2) The correct respirator shall be specified for each job. The respirator type is usually specified in the work procedures by a qualified individual supervising the respiratory protective program. The individual issuing them shall be adequately instructed to insure that the correct respirator is issued. Each respirator permanently assigned to an individual should be durably marked to indicate to whom it was assigned. This mark shall not affect the respirator performance in any way. The date of issuance should be recorded.

(3) Written procedures shall be prepared covering safe use of respirators in dangerous atmospheres that might be encountered in normal operations or in emergencies. Personnel shall be familiar with these procedures and the available respirators.

(A) In areas where the wearer, with failure of the respirator, could be overcome by a toxic or oxygen-deficient atmosphere, at least one additional man shall be present. Communications (visual, voice, or signal line) shall be maintained between both or all individuals present. Planning shall be such that one individual will be unaffected by any likely incident and have the proper rescue equipment to be able to assist the other(s) in case of emergency.

(B) When self-contained breathing apparatus or hose masks with blowers are used in atmospheres immediately dangerous to life or health, standby men must be present with suitable rescue equipment.

(C) Persons using air line respirators in atmospheres immediately hazardous to life or health shall be equipped with safety harnesses and safety lines for lifting or removing persons from hazardous atmospheres or other and equivalent provisions for the rescue of persons from hazardous atmospheres shall be used. A standby man or men with suitable self-contained breathing apparatus shall be at the nearest fresh air base for emergency rescue.

(4) Respiratory protection is no better than the respirator in use, even though it is worn conscientiously. Frequent random inspections shall be conducted by a qualified individual to assure that respirators are properly selected, used, cleaned and maintained.

(5) For safe use of any respirator, it is essential that the user be properly instructed in its selection, use and maintenance. Both supervisors and workers shall be so instructed by competent persons. Training shall provide the men an opportunity to handle the respirator, have it fitted properly, test its facepiece-to-face seal, wear it in normal air for a long familiarity period, and, finally, to wear it in a test atmosphere.

(A) Every respirator wearer shall receive fitting instructions including demonstrations and practice in how the respirator should be worn, how to adjust it, and how to determine if it fits properly. Respirators shall not be worn when conditions prevent a mask to skin face seal. To assure proper protection, the facepiece fit shall be checked by the wearer each time he puts on the respirator. This may be done by following the manufacturer's facepiece fitting instructions. Conditions which could prevent a mask to skin face seal may be a growth of beard, sideburns, a skull cap that projects under the facepiece, or temple pieces on glasses. Also the absence of one or both dentures can affect the fit of a facepiece. The worker's diligence in observing these factors shall be evaluated by periodic check.

(B) Providing respiratory protection for individuals wearing corrective glasses is a serious problem. A proper seal cannot be established if the temple bars of eye glasses extend through the sealing edge of the full facepiece. As a temporary measure, glasses with short temple bars or without temple bars may be taped to the wearer's head. Wearing of contact lenses in contaminated atmosphere with a respirator shall not be allowed. Systems have been developed for mounting corrective lenses inside full facepieces. When a workman must wear corrective lenses as part of the facepiece, the facepiece and lenses shall be fitted by qualified individuals to provide good vision, comfort, and a gas-tight seal.

(C) If corrective spectacles or goggles are required, they shall be worn so as not to affect the fit of the facepiece. Proper selection of equipment will minimize or avoid this problem.

(f) Maintenance and care of respirators.

(1) A program for maintenance and care of respirators shall be adjusted to the type of plant, working conditions, and hazards involved, and shall include the following basic services:

(A) Inspection for defects (including a leak check.)

(B) Cleaning and disinfecting.

(C) Repair, and

(D) Storage

Equipment shall be properly maintained to retain its original effectiveness.

(2) Inspection of respirators.

(A) All respirators shall be inspected routinely before and after each use. A respirator that is not routinely used but is kept ready for emergency use shall be inspected after each use and at least monthly to assure that it is in satisfactory working condition.

(B) Self-contained breathing apparatus shall be inspected monthly. Air and oxygen cylinders shall be fully charged according to the manufacturer's instruction. It shall be determined that the regulator and warning devices function properly.

(C) Respirator inspection shall include a check of the tightness of connections and the condition of the facepiece, headbands, valves, connecting tube, and canisters. Rubber or

elastomer parts shall be inspected for pliability and signs of deterioration. Stretching and manipulating rubber or elastomer parts with a massaging action will keep them pliable and flexible and prevent them from taking a set during storage.

(D) A record shall be kept of inspection dates and findings for respirators maintained for emergency use.

(3) Routinely used respirators shall be collected, cleaned, and disinfected as frequently as necessary to insure that proper protection is provided for the wearer. Each worker should be briefed on the cleaning procedure and be assured that he will always receive a clean and disinfected respirator. Such assurances are of greatest significance when respirators are not individually assigned to workers. Respirators maintained for emergency use shall be cleaned and disinfected after each use.

(4) Replacement or repairs shall be done only by experienced persons with parts designed for the respirator. No attempt shall be made to replace components or to make adjustment or repairs beyond the manufacturer's recommendations. Reducing or admission valves or regulators shall be returned to the manufacturer or to a trained technician for adjustment or repair.

(5) Storage of respirators.

(A) After inspection, cleaning, and necessary repair, respirators shall be stored to protect against dust, sunlight, heat, extreme cold, excessive moisture, or damaging chemicals. Respirators placed at stations and work areas for emergency use should be quickly accessible at all times and should be stored in compartments built for the purpose. The compartments should be clearly marked. Routinely used respirators, such as dust respirators, may

be placed in plastic bags. Respirators should not be stored in such places as lockers or tool boxes unless they are in carrying cases or cartons.

(B) Respirators should be packed or stored so that the facepiece and exhalation valve will rest in a normal position and function will not be impaired by the elastomer setting in an abnormal position.

(C) Instructions for proper storage of emergency respirators, such as gas masks and self-contained breathing apparatus, are found in "use and care" instructions usually mounted inside the carrying case lid.

(g) Identification of gas mask canisters.

(1) The primary means of identifying a gas mask canister shall be by means of properly worded labels. The secondary means of identifying a gas mask canister shall be by a color code.

(2) All who issue or use gas masks falling within the scope of 01.0403 shall see that all gas mask canisters purchased or used by them are properly labeled and colored in accordance with these requirements before they are placed in service and that the labels and colors are properly maintained at all times thereafter until the canisters have completely served their purpose.

(3) On each canister shall appear in bold letters the following:

(A) Canister for _____
or Type N Gas Mask Canister.

SUBCHAPTER 1 - GENERAL SAFETY CODE

Article 1 - General Safety and Health Considerations

01.0101 Purpose and Scope. (a) This subchapter sets forth the occupational safety and health standards adopted by the Commissioner of Labor for the purpose of providing the Alaskan work force with a healthful and safe place to work.

01.0102 Employer Requirements. (a) The employer shall furnish to each of his employees, employment and a place of employment which are free from recognized hazards that are causing or are likely to cause death or serious physical harm to his employees. This shall be implemented by the employer by complying with these regulations.

(b) The employer shall initate and maintain accident prevention programs for the prevention of occupational illness and disease.

(c) Employers shall display a poster, furnished by the Alaska Department of Labor, in places where notices to employees are generally posted. The poster will outline appropriate provisions of AS 18.60.010 to AS 18.60.105.

01.0103 Employee Requirements. (a) Each employee shall comply with all regulations contained in this chapter which are applicable to his own actions while on the job.

(b) Employees shall conscientiously use all safety devices, procedures, and personal protective equipment required by these regulations.

01.0104 Reporting of Injuries. Occupational injuries shall be reported in accordance with AS 18.60.058.

01.0105 Accident-Prevention Program. (a) Program organization.

(1) Every employer shall start and maintain an accident prevention program. The program shall provide that personnel knowledgeable in the field of occupational safety and health shall make daily inspections of on the job equipment and activities. The employer shall insure that immediate action be taken to eliminate all hazards.

(2) Each employer shall adopt a code of safe practices and procedures which applies to his operation and which embraces the applicable provisions of these regulations. It shall be the obligation of the employer to have the safe practices code posted in a conspicuous location at each job site office.

(3) Each employer shall insure that the supervisory personnel shoulder their share of the responsibility for accidents. It is suggested that a written report be submitted by each supervisor associated with an accident. These reports should suggest a feasible means of avoiding future accidents of a similar nature.

(b) Recommendations.

(1) Each employer should display an interest in safety matters by:

(A) The display of safety posters and warning signs. A sign indicating how many consecutive accident free days have passed is often worthwhile.

(B) Considering the advisability of posting a list of all foremen who have kept their crews accident free for a certain period of time.

(C) Considering the advisability of establishing various forms of safety competition, including suitable rewards or recognition to individuals and crews with good records.

(c) General safety requirements.

(1) Anyone known to be under the influence of intoxicating liquor, narcotics or drugs shall not be allowed on the job while in that condition. Further, horseplay, scuffling, and other acts which tend to have an adverse influence on the safety or well-being of the employees shall be prohibited.

(2) No one shall knowingly be permitted or required to work while his ability and alertness is impaired by fatigue, illness, or other causes that might unnecessarily expose him or others to injury.

STATE OF ALASKA

DEPARTMENT OF LABOR

BILL SHEFFIELD, GOVERNOR

BOX 1149
JUNEAU, ALASKA 99802
PHONE:
(907) 465-2700

January 31, 1985

The Honorable Max Gruenberg
Pouch V
Juneau, Alaska 99811

Dear Representative Gruenberg:

In response to your request during the January 25, 1985 hearing on Sponsor Substitute for House Bill No. 5, An Act Establishing an Asbestos Health Hazard Abatement Program, the department is providing you with the following information:

1. A copy of the State and Federal OSHA asbestos regulations dealing with worker protection.

2. We have contacted the states of Maryland and New Jersey which have requirements for certification of asbestos workers and asked them to send us copies of their laws, regulations and guidelines on this subject. We will send you copies as soon as we receive this material. We plan to study these materials to determine what type of guidelines should be adopted in Alaska.

3. There are some private training/consultation firms that will provide, for a fee, training in asbestos handling and abatement that employers could use to certify their workers. During the past 12 months, the department has been contacted by Sam Summeg who represents Polytechnic of 2023-2, Blueberry, Fairbanks, and by Phil Pleasant of 4437 East 7th Avenue, Anchorage, who represents Tenn-Tex Co., Inc. offering to provide asbestos health hazard training.

   We have also contacted Alaska Health Project, a non-profit training and information provider, and they have indicated a willingness to provide such training. Lawrence D. Weiss, Executive Director of Alaska Health project, indicated that his organization would need approximately a $80,000 grant or loan to properly develop such training. According to Mr. Weiss these monies would be needed for front end costs to hire a trainer and to procure the training materials necessary to develop the course. After the course is developed, Alaska Health Project, could recover most of these costs by charging a fee from those attending the course.

07-G6LH

All of the above training would be available to both non-union and union employers and employees.

Several other organizations such as the Association General Contractors (AGC), the Laborer's Union and the Asbestos Workers Union also put on asbestos training. These courses, however, may be available only to members of these organizations. Another potential source of such training is the American Society of Safety Engineers who have sponsored various safety and health training courses in the past.

Also, the department as well as other government agencies such as EPA provide, on a very limited basis, training on asbestos. This training would, of course, be open to all interested persons.

4. We can assure you that all interested parties will have an opportunity to provide recommendations to the department when it develops its guidelines for the certification program. We will need the help of organizations such as AGC to come up with an effective, yet reasonable set of guidelines that will assure the protection of the worker, the student, the teacher, and the public when asbestos is identified and the hazard is abated in Alaska's school buildings.

5. The department will enter into an agreement with EPA so that it can assist school districts to comply with EPA regulations. No revision of the current legislation is required for the department and EPA to enter into such an agreement.

We appreciate the opportunity to work with you on this important bill and if there is any further information you require, please let us know.

Sincerely,

Robert W Jordan, Deputy Comm.

for Jim Robison
Commissioner

Silicates (less than 1% crystalline silica):		
Mica	20	
Soapstone	20	
Talc (non-asbestos-form)	20[e]	
Talc (fibrous). Use asbestos limit		
Tremolite (see talc, fibrous)		
Portland cement	50	
Graphite (natural)	15	
Coal dust (respirable fraction less than 5% SiO_2)		2.4mg/M³ or 10mg/M³
For more than 5% SiO_2		%SiO_2+2
Inert or Nuisance Dust:		
Respirable fraction	15	5mg/M³
Total dust	50	15mg/M³

NOTE: Conversion factors—mppcf × 35.3 = million particles per cubic meter = particles per c.c.

[a] Millions of particles per cubic foot of air, based on impinger samples counted by light-field technics.

[d] The percentage of crystalline silica in the formula is the amount determined from air-borne samples, except in those instances in which other methods have been shown to be applicable.

[e] Both concentration and percent quartz for the application of this limit are to be determined from the fraction passing a size-selector with the following characteristics:

[f] Containing <1% quartz; if 1% quartz, use quartz limit.

Aerodynamic diameter (unit density sphere)	Percent passing selector
2	90
2.5	75
3.5	50
5.0	25
10	0

The measurements under this note refer to the use of an AEC instrument. The respirable fraction of coal dust is determined with a MRE; the figure corresponding to that of 2.4 Mg/M³ in the table for coal dust is 4.5 Mg/M³.

(Secretary of Labor's Order No. 8-76 (41 CFR Part 25059); 29 CFR Part 1911)

[39 FR 23502, June 27, 1974. Redesignated and amended at 40 FR 23073, May 28, 1975; 42 FR 22525, May 3, 1977; 43 FR 2600, Jan. 17, 1978; 43 FR 5963, Feb. 10, 1978; 43 FR 13567, Mar. 31, 1978; 43 FR 19624, May 5, 1978; 43 FR 27394, June 23, 1978; 43 FR 45809, Oct. 3, 1978; 43 FR 53007, Nov. 14, 1978; 43 FR 57602, Dec. 8, 1978; 46 FR 32022, June 19, 1981]

§ 1910.1001 Asbestos.

(a) *Definitions.* For the purpose of this section, (1) "Asbestos" includes chrysotile, amosite, crocidolite, tremolite, anthophyllite, and actinolite.

(2) "Asbestos fibers" means asbestos fibers longer than 5 micrometers.

(b) *Permissible exposure to airborne concentrations of asbestos fibers*—(1) *Standard effective July 7, 1972.* The 8-hour time-weighted average airborne concentrations of asbestos fibers to which any employee may be exposed shall not exceed five fibers, longer than 5 micrometers, per cubic centimeter of air, as determined by the method prescribed in paragraph (e) of this section.

(2) *Standard effective July 1, 1976.* The 8-hour time-weighted average airborne concentrations of asbestos fibers to which any employee may be exposed shall not exceed two fibers, longer than 5 micrometers, per cubic centimeter of air, as determined by the method prescribed in paragraph (e) of this section.

(3) *Ceiling concentration.* No employee shall be exposed at any time to airborne concentrations of asbestos fibers in excess of 10 fibers, longer than 5 micrometers, per cubic centimeter of air, as determined by the method prescribed in paragraph (e) of this section.

(c) *Methods of compliance*—(1) *Engineering methods.* (i) *Engineering controls.* Engineering controls, such as, but not limited to, isolation, enclosure, exhaust ventilation, and dust collection, shall be used to meet the exposure limits prescribed in paragraph (b) of this section.

(ii) *Local exhaust ventilation.* (a) Local exhaust ventilation and dust collection systems shall be designed, constructed, installed, and maintained in accordance with the American National Standard Fundamentals Governing the Design and Operation of Local Exhaust Systems, ANSI Z9.2-1971, which is incorporated by reference herein.

(b) See § 1910.6 concerning the availability of ANSI Z9.2-1971, and the maintenance of a historic file in connection therewith. The address of the American National Standards Institute is given in § 1910.100.

(iii) *Particular tools.* All hand-operated and power-operated tools which may produce or release asbestos fibers in excess of the exposure limits prescribed in paragraph (b) of this section, such as, but not limited to, saws,

scorers, abrasive wheels, and drills, shall be provided with local exhaust ventilation systems in accordance with subdivision (ii) of this subparagraph.

(2) *Work practices*—(i) *Wet methods.* Insofar as practicable, asbestos shall be handled, mixed, applied, removed, cut, scored, or otherwise worked in a wet state sufficient to prevent the emission of airborne fibers in excess of the exposure limits prescribed in paragraph (b) of this section, unless the usefulness of the product would be diminished thereby.

(ii) *Particular products and operations.* No asbestos cement, mortar, coating, grout, plaster, or similar material containing asbestos shall be removed from bags, cartons, or other containers in which they are shipped, without being either wetted, or enclosed, or ventilated so as to prevent effectively the release of airborne asbestos fibers in excess of the limits prescribed in paragraph (b) of this section.

(iii) *Spraying, demolition, or removal.* Employees engaged in the spraying of asbestos, the removal, or demolition of pipes, structures, or equipment covered or insulated with asbestos, and in the removal or demolition of asbestos insulation or coverings shall be provided with respiratory equipment in accordance with paragraph (d)(2)(iii) of this section and with special clothing in accordance with paragraph (d)(3) of this section.

(d) *Personal protective equipment*—(1) Compliance with the exposure limits prescribed by paragraph (b) of this section may not be achieved by the use of respirators or shift rotation of employees, except:

(i) During the time period necessary to install the engineering controls and to institute the work practices required by paragraph (c) of this section;

(ii) In work situations in which the methods prescribed in paragraph (c) of this section are either technically not feasible or feasible to an extent insufficient to reduce the airborne concentrations of asbestos fibers below the limits prescribed by paragraph (b) of this section; or

(iii) In emergencies.

(iv) Where both respirators and personnel rotation are allowed by paragraphs (d)(1) (i), (ii), or (iii) of this section, and both are practicable, personnel rotation shall be preferred and used.

(2) Where a respirator is permitted by paragraph (d)(1) of this section, it shall be selected from among those approved by the Bureau of Mines, Department of the Interior, or the National Institute for Occupational Safety and Health, Department of Health, Education, and Welfare, under the provisions of 30 CFR Part 11 (37 F.R. 6244, Mar. 25, 1972), and shall be used in accordance with subdivisions (i), (ii), (iii), and (iv) of this subparagraph.

(i) *Air purifying respirators.* A reusable or single use air purifying respirator, or a respirator described in paragraphs (d)(2) (ii) or (iii) of this section, shall be used to reduce the concentrations of airborne asbestos fibers in the respirator below the exposure limits prescribed in paragraph (b) of this section, when the ceiling or the 8-hour time-weighted average airborne concentrations of asbestos fibers are reasonably expected to exceed no more than 10 times those limits.

(ii) *Powered air purifying respirators.* A full facepiece powered air purifying respirator, or a powered air purifying respirator, or a respirator described in paragraph (d)(2)(iii) of this section, shall be used to reduce the concentrations of airborne asbestos fibers in the respirator below the exposure limits prescribed in paragraph (b) of this section, when the ceiling or the 8-hour time-weighted average concentrations of asbestos fibers are reasonably expected to exceed 10 times, but not 100 times, those limits.

(iii) *Type "C" supplied-air respirators, continuous flow or pressure-demand class.* A type "C" continuous flow or pressure-demand, supplied-air respirator shall be used to reduce the concentrations of airborne asbestos fibers in the respirator below the exposure limits prescribed in paragraph (b) of this section, when the ceiling or the 8-hour time-weighted average airborne concentrations of asbestos fibers are reasonably expected to exceed 100 times those limits.

ALASKA LEGISLATURE COMMITTEE FILES 1985-1986 8672

4202 SLAB HB 5

1082

(iv) *Establishment of a respirator program.* (*a*) The employer shall establish a respirator program in accordance with the requirements of the American National Standards Practices for Respiratory Protection, ANSI Z88.2-1969, which is incorporated by reference herein.

(*b*) See § 1910.6 concerning the availability of ANSI Z88.2-1969 and the maintenance of a historic file in connection therewith. The address of the American National Standards Institute is given in § 1910.100.

(*c*) No employee shall be assigned to tasks requiring the use of respirators if, based upon his most recent examination, an examining physician determines that the employee will be unable to function normally wearing a respirator, or that the safety or health of the employee or other employees will be impaired by his use of a respirator. Such employee shall be rotated to another job or given the opportunity to transfer to a different position whose duties he is able to perform with the same employer, in the same geographical area and with the same seniority, status, and rate of pay he had just prior to such transfer, if such a different position is available.

(3) Special clothing: The employer shall provide, and require the use of, special clothing, such as coveralls or similar whole body clothing, head coverings, gloves, and foot coverings for any employee exposed to airborne concentrations of asbestos fibers, which exceed the ceiling level prescribed in paragraph (b) of this section.

(4) Change rooms: (i) At any fixed place of employment exposed to airborne concentrations of asbestos fibers in excess of the exposure limits prescribed in paragraph (b) of this section, the employer shall provide change rooms for employees working regularly at the place.

(ii) Clothes lockers: The employer shall provide two separate lockers or containers for each employee, so separated or isolated as to prevent contamination of the employee's street clothes from his work clothes.

(iii) Laundering: (*a*) Laundering of asbestos contaminated clothing shall be done so as to prevent the release of air-borne asbestos fibers in excess of the exposure limits prescribed in paragraph (b) of this section.

(*b*) Any employer who gives asbestos-contaminated clothing to another person for laundering shall inform such person of the requirement in paragraph (d)(4)(iii)(*a*) of this section to effectively prevent the release of airborne asbestos fibers in excess of the exposure limits prescribed in paragraph (b) of this section.

(*c*) Contaminated clothing shall be transported in sealed impermeable bags, or other closed, impermeable containers, and labeled in accordance with paragraph (g) of this section.

(e) *Method of measurement.* All determinations of airborne concentrations of asbestos fibers shall be made by the membrane filter method at 400-450 × (magnification) (4 millimeter objective) with phase contrast illumination.

(f) *Monitoring*—(1) *Initial determinations.* Within 6 months of the publication of this section, every employer shall cause every place of employment where asbestos fibers are released to be monitored in such a way as to determine whether every employee's exposure to asbestos fibers is below the limits prescribed in paragraph (b) of this section. If the limits are exceeded, the employer shall immediately undertake a compliance program in accordance with paragraph (c) of this section.

(2) *Personal monitoring*—(i) Samples shall be collected from within the breathing zone of the employees, on membrane filters of 0.8 micrometer porosity mounted in an open-face filter holder. Samples shall be taken for the determination of the 8-hour time-weighted average airborne concentrations and of the ceiling concentrations of asbestos fibers.

(ii) Sampling frequency and patterns. After the initial determinations required by paragraph (f)(1) of this section, samples shall be of such frequency and pattern as to represent with reasonable accuracy the levels of exposure of employees. In no case shall the sampling be done at intervals greater than 6 months for employees whose exposure to asbestos may reasonably be foreseen to exceed the

limits prescribed by paragraph (b) of this section.

(3) *Environmental monitoring.* (i) Samples shall be collected from areas of a work environment which are representative of the airborne concentrations of asbestos fibers which may reach the breathing zone of employees. Samples shall be collected on a membrane filter of 0.8 micrometer porosity mounted in an open-face filter holder. Samples shall be taken for the determination of the 8-hour time-weighted average airborne concentrations and of the ceiling concentrations of asbestos fibers.

(ii) *Sampling frequency and patterns.* After the initial determinations required by paragraph (f)(1) of this section, samples shall be of such frequency and pattern as to represent with reasonable accuracy the levels of exposure of the employees. In no case shall sampling be at intervals greater than 6 months for employees whose exposures to asbestos may reasonably be foreseen to exceed the exposure limits prescribed in paragraph (b) of this section.

(4) *Employee observation of monitoring.* Affected employees, or their representatives, shall be given a reasonable opportunity to observe any monitoring required by this paragraph and shall have access to the records thereof.

(g) *Caution signs and labels*—(1) *Caution signs*—(i) *Posting.* Caution signs shall be provided and displayed at each location where airborne concentrations of asbestos fibers may be in excess of the exposure limits prescribed in paragraph (b) of this section. Signs shall be posted at such a distance from such a location so that an employee may read the signs and take necessary protective steps before entering the area marked by the signs. Signs shall be posted at all approaches to areas containing excessive concentrations of airborne asbestos fibers.

(ii) *Sign specifications.* The warning signs required by paragraph (g)(1)(i) of this section shall conform to the requirements of 20" × 14" vertical format signs specified in § 1910.145(d)(4), and to this subdivision. The signs shall display the following legend in the lower panel, with letter sizes and styles of a visibility at least equal to that specified in this subdivision.

Legend	Notation
Asbestos	1" Sans Serif, Gothic or Block.
Dust Hazard	1" Sans Serif, Gothic or Block.
Avoid Breathing Dust	1" Gothic.
Wear Assigned Protective Equipment.	1" Gothic.
Do Not Remain In Area Unless Your Work Requires It.	1" Gothic.
Breathing Asbestos Dust May Be Hazardous To Your Health.	14 point Gothic.

Spacing between lines shall be at least equal to the height of the upper of any two lines.

(2) *Caution labels*—(i) *Labeling.* Caution labels shall be affixed to all raw materials, mixtures, scrap, waste, debris, and other products containing asbestos fibers, or to their containers, except that no label is required where asbestos fibers have been modified by a bonding agent, coating, binder, or other material so that during any reasonably foreseeable use, handling, storage, disposal, processing, or transportation, no airborne concentrations of asbestos fibers in excess of the exposure limits prescribed in paragraph (b) of this section will be released.

(ii) *Label specifications.* The caution labels required by paragraph (g)(2)(i) of this section shall be printed in letters of sufficient size and contrast as to be readily visible and legible. The label shall state:

CAUTION

Contains Asbestos Fibers

Avoid Creating Dust

Breathing Asbestos Dust May Cause Serious Bodily Harm

(h) *Housekeeping*—(1) *Cleaning.* All external surfaces in any place of employment shall be maintained free of accumulations of asbestos fibers if, with their dispersion, there would be an excessive concentration.

(2) *Waste disposal.* Asbestos waste, scrap, debris, bags, containers, equipment, and asbestos-contaminated clothing, consigned for disposal, which may produce in any reasonably fore-

seeable use, handling, storage, processing, disposal, or transportation airborne concentrations of asbestos fibers in excess of the exposure limits prescribed in paragraph (b) of this section shall be collected and disposed of in sealed impermeable bags, or other closed, impermeable containers.

(i) *Recordkeeping*—(1) *Exposure records.* Every employer shall maintain records of any personal or environmental monitoring required by this section. Records shall be maintained for a period of at least 20 years and shall be made available upon request to the Assistant Secretary of Labor for Occupational Safety and Health, the Director of the National Institute for Occupational Safety and Health, and to authorized representatives of either.

(2) *Access.* Employee exposure records required by this paragraph shall be provided upon request to employees, designated representatives, and the Assistant Secretary in accordance with 29 CFR 1910.20 (a)-(e) and (g)-(i).

(3) *Employee notification.* Any employee found to have been exposed at any time to airborne concentrations of asbestos fibers in excess of the limits prescribed in paragraph (b) of this section shall be notified in writing of the exposure as soon as practicable but not later than 5 days of the finding. The employee shall also be timely notified of the corrective action being taken.

(j) *Medical examinations*—(1) *General.* The employer shall provide or make available at his cost, medical examinations relative to exposure to asbestos required by this paragraph.

(2) *Preplacement.* The employer shall provide or make available to each of his employees, within 30 calendar days following his first employment in an occupation exposed to airborne concentrations of asbestos fibers, a comprehensive medical examination, which shall include, as a minimum, a chest roentgenogram (posterior-anterior 14 × 17 inches), a history to elicit symptomatology of respiratory disease, and pulmonary function tests to include forced vital capacity (FVC) and forced expiratory volume at 1 second ($FEV_{1.0}$).

(3) *Annual examinations.* On or before January 31, 1973, and at least annually thereafter, every employer shall provide, or make available, comprehensive medical examinations to each of his employees engaged in occupations exposed to airborne concentrations of asbestos fibers. Such annual examination shall include, as a minimum, a chest roentgenogram (posterior-anterior 14 × 17 inches), a history to elicit symptomatology of respiratory disease, and pulmonary function tests to include forced vital capacity (FVC) and forced expiratory volume at 1 second ($FEV_{1.0}$).

(4) *Termination of employment.* The employer shall provide, or make available, within 30 calendar days before or after the termination of employment of any employee engaged in an occupation exposed to airborne concentrations of asbestos fibers, a comprehensive medical examination which shall include, as a minimum, a chest roentgenogram (posterior-anterior 14 × 17 inches), a history to elicit symptomatology of respiratory disease, and pulmonary function tests to include forced vital capacity (FVC) and forced expiratory volume at 1 second ($FEV_{1.0}$).

(5) *Recent examinations.* No medical examination is required of any employee, if adequate records show that the employee has been examined in accordance with this paragraph within the past 1-year period.

(6) *Medical records*—(i) *Maintenance.* Employers of employees examined pursuant to this paragraph shall cause to be maintained complete and accurate records of all such medical examinations. Records shall be retained by employers for at least 20 years.

(ii) *Access.* Records of the medical examinations required by this paragraph shall be provided upon request to employees, designated representatives, and the Assistant Secretary in accordance with 29 CFR 1910.20 (a)-(e) and (g)-(i). These records shall also be provided upon the request to the Director of NIOSH. Any physician who conducts a medical examination required by this paragraph shall furnish to the employer of the examined employee all the information specifi-

cally required by this paragraph, and any other medical information related to occupational exposure to asbestos fibers.

(Secs. 6(b), 8(c) and 8(g) (84 Stat. 1593, 1599, 1600; 29 U.S.C. 655, 657), the Secretary of Labor's Order 8-76 (41 FR 25059) and 29 CFR Part 1911, Ch. XVII of Title 29)

[39 FR 23502, June 27, 1974. Redesignated at 40 FR 27073, May 28, 1975, and amended at 41 FR 11505, Mar. 19, 1976; 45 FR 35281, May 23, 1980]

§ 1910.1002 Coal tar pitch volatiles; interpretation of term.

[illegible] used in § 1910.1000 (Table Z-1), tar pitch volatiles include the polycyclic hydrocarbons which volatilize from the distillation residues of coal, petroleum, wood, and other organic matter.

(Sec. 8(g), 84 Stat. 1600, 29 U.S.C. 657)

[39 FR 23502, June 27, 1974. Redesignated and amended at 40 FR 23073, May 28, 1975]

§ 1910.1003 4-Nitrobiphenyl.

(a) *Scope and application.* (1) This section applies to any area in which 4-Nitrobiphenyl, Chemical Abstracts Service Registry Number 92933 is manufactured, processed, repackaged, released, handled, or stored, but shall not apply to trans-shipment in sealed containers, except for the labeling requirements under paragraphs (e) (2), (3), and (4) of this section.

(2) This section shall not apply to solid or liquid mixtures containing less than 0.1 percent by weight or volume of 4-Nitrobiphenyl.

(b) *Definitions.* For the purposes of this section: (1) "Absolute filter" is one capable of retaining 99.97 percent of a mono disperse aerosol of 0.3 μm particles.

(2) "Authorized employee" means an employee whose duties require him to be in the regulated area and who has been specifically assigned by the employer.

(3) "Clean change room" means a room where employees put on clean clothing and/or protective equipment in an environment free of 4-Nitrobiphenyl. The clean change room shall be contiguous to and have an entry from a shower room, when the shower room facilities are otherwise required in this section.

(4) "Closed system" means an operation involving 4-Nitrobiphenyl where containment prevents the release of 4-Nitrobiphenyl into regulated areas, non-regulated areas, or the external environment.

(5) "Decontamination" means the inactivation of 4-Nitrobiphenyl or its safe disposal.

(6) "Director" means the Director, National Institute for Occupational Safety and Health, or any person directed by him or the Secretary of Health, Education, and Welfare to act for the Director.

(7) "Disposal" means the safe removal of 4-Nitrobiphenyl from the work environment.

(8) "Emergency" means an unforeseen circumstance or set of circumstances resulting in the release of 4-Nitrobiphenyl which may result in exposure to or contact with 4-Nitrobiphenyl.

(9) "External environment" means any environment external to regulated and nonregulated areas.

(10) "Isolated system" means a fully enclosed structure other than the vessel of containment of 4-Nitrobiphenyl, which is impervious to the passage of 4-Nitrobiphenyl, and which would prevent the entry of 4-Nitrobiphenyl into regulated areas, nonregulated areas, or the external environment, should leakage or spillage from the vessel of containment occur.

(11) "Laboratory type hood" is a device enclosed on three sides and the top and bottom, designed and maintained so as to draw air inward at an average linear face velocity of 150 feet per minute with a minimum of 125 feet per minute; designed, constructed, and maintained in such a way that an operation involving 4-Nitrobiphenyl within the hood does not require the insertion of any portion of any employee's body other than his hands and arms.

(12) "Nonregulated area" means any area under the control of the employer where entry and exit is neither restricted nor controlled.

(13) "Open-vessel system" means an operation involving 4-Nitrobiphenyl in an open vessel, which is not in an iso-

04.0102 Asbestos. (a) Definitions, for the purpose of 04.0102.

(1) "Asbestos" includes chrysotile, amosite, crocidolite, tremolite, anthophylite, and actinolite.

(2) "Asbestos fibers" means asbestos fibers longer than five micrometers.

(b) Permissible exposure to airborne concentrations of asbestos fibers.

(1) Standard effective July 7, 1972. The 8–hour time weighted average airborne concentrations of asbestos fibers to which any employee may be exposed shall not exceed five fibers, longer than five micrometers, per cubic centimeter of air, as determined by the method prescribed in 04.0102(e).

(2) Standard effective July 1, 1976. The 8–hour time weighted average airborne concentrations of asbestos fibers to which any employee may be exposed shall not exceed two fibers, longer than five micrometers, per cubic centimeter of air, as determined by the method prescribed in 04.0102(e).

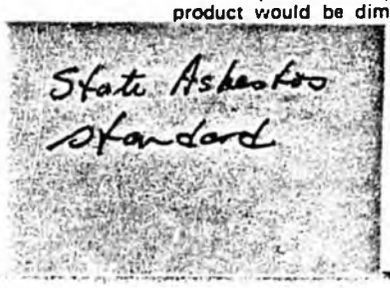
(3) Ceiling concentration. No employee shall be exposed at any time to airborne concentrations of asbestos fibers in excess of 10 fibers, longer than five micrometers, per cubic centimeter of air, as determined by the method prescribed in 04.0102(e).

(c) Methods of compliance.

(1) Engineering methods.

(A) Engineering controls. Engineering controls, such as, but not limited to, isolation, enclosure, exhaust ventilation, and dust collection, shall be used to meet the exposure limits prescribed in 04.0102(b).

(B) Local exhaust ventilation.



(i) Local exhaust ventilation and dust collection systems shall be designed, constructed, installed, and maintained in accordance with the American National Standard Fundamentals Governing the Design and Operation of Local Exhaust Systems, ANSI Z9.2–1971, which is incorporated by reference herein.

(ii) See 1910.6 of the Federal Occupational Safety and Health Act concerning the availability of ANSI Z9.2–1971, and the maintenance of a historic file in connection therewith. The address of the American National Standards Institute is given in 04.0109.

(C) Particular tools. All hand–operated and power–operated tools which may produce or release asbestos fibers in excess of the exposure limits prescribed in 04.0102(b), such as, but not limited to, saws, scorers, abrasive wheels, and drills, shall be provided with local exhaust ventilation systems in accordance with 04.0102(c)(1)(B).

(2) Work practices.

(A) Wet methods. Insofar as practicable, asbestos shall be handled, mixed, applied, removed, cut, scored, or otherwise worked in a wet state sufficient to prevent the emission of airborne fibers in excess of the exposure limits prescribed in 04.0102, unless the usefulness of the product would be diminished thereby.

(B) Particular products and operations. No asbestos cement, mortar, coating, grout, plaster, or similar material containing asbestos shall be removed from bags, cartons, or other containers in which they are shipped, without being either wetted, or enclosed, or ventilated so as to prevent effectively the release of airborne asbestos fibers in excess of the limits prescribed in 04.0102.

(C) Spraying, demolition, or removal. Employees engaged in the spraying of asbestos, the removal, or demolition of pipes, structures, or equipment covered or insulated with asbestos, and in the removal or demolition of asbestos insulation or coverings shall be provided with respiratory equipment in accordance with 04.0102(d)(2)(C) and with special clothing in accordance with 04.0102(d)(3).

(d) Personal protective equipment.

(1) Compliance with the exposure limits prescribed by 04.0102(b) may not be achieved by the use of respirators or shift rotation of employees, except:

(A) During the time period necessary to install the engineering controls and to institute the work practices required by 04.0102(c);

(B) In work situations in which the methods prescribed in 04.0102(c) are either technically not feasible or feasible to an extent insufficient to reduce the airborne concentrations of asbestos fibers below the limits prescribed by 04.0102(b); or

(C) In emergencies.

(D) Where both respirators and personnel rotation are allowed by 04.0102(d)(1)(A), (B) or (C), and both are practicable, personnel rotation shall be preferred and used.

(2) Where a respirator is permitted by 04.0102(d)(1), it shall be selected from among those approved by the Bureau of Mines, Department of the Interior, or the National Institute for Occupational Safety and Health, Department of Health, Education, and Welfare, under the provisions of 30 CFR Part 11 (37 F.R. 6244, Mar. 25, 1972), and shall be used in accordance with 04.0102(d)(2)(A), (B), (C) and (D).

(A) Air purifying respirators. A reusable or single use air purifying respirator, or a respirator described in 04.0102(d)(2)(B) or (C), shall be used to reduce the concentrations of airborne asbestos fibers in the respirator below the exposure limits prescribed in 04.0102(b), when the ceiling or the 8-hour time weighted average airborne concentrations of asbestos fibers are reasonably expected to exceed no more than 10 times those limits.

(B) Powered air purifying respirators. A full facepiece powered air purifying respirator, or a powered air purifying respirator, or a respirator described in 04.0102(d)(2)(C), shall be used to reduce the concentrations of airborne asbestos fibers in the respirator below the exposure limits prescribed in 04.0102(b), when the ceiling or the 8-hour time weighted average concentrations of asbestos fibers are reasonably expected to exceed 10 times, but not 100 times, those limits.

(C) Type "C" supplied-air respirators, continuous flow or pressure-demand class. A type "C" continuous flow or pressure-demand, supplied-air respirator shall be used to reduce the concentrations of airborne asbestos fibers in the respirator below the exposure limits prescribed in 04.0102(b), when the ceiling or the 8-hour time weighted average airborne concentrations of asbestos fibers are reasonably expected to exceed 100 times those limits.

(D) Establishment of a respirator program.

(i) The employer shall establish a respirator program in accordance with the requirements of the American National Standards Practices for Respiratory Protection, ANSI Z88.2–1969, which is incorporated by reference herein.

(ii) See 1910.6 of the Federal Occupational Safety and Health Act concerning the availability of ANSI Z88.2–1969 and the maintenance of a historic file in connection therewith. The address of the American National Standards Institute is given in 04.0109.

(iii) No employee shall be assigned to tasks requiring the use of respirators if, based upon his most recent examination, the examining physician determines that the employee will be unable to function normally wearing a respirator, or that the safety or health of the employee or other employees will be impaired by his use of a respirator. Such employee shall be rotated to another job or given the opportunity to transfer to a different position whose duties he is able to perform with the same employer, in the same geographical area and with the same seniority, status, and rate of pay he had just prior to such transfer, if such a different position is available.

(3) Special clothing. The employer shall provide, and require the use of, special clothing, such as coveralls or similar whole body clothing, head coverings, gloves, and foot coverings for any employee exposed to airborne concentrations of asbestos fibers, which exceed the ceiling level prescribed in 04.0102(b).

(4) Change rooms.

(A) At any fixed place of employment exposed to airborne concentrations of asbestos fibers in excess of the exposure limits prescribed in 04.0102(b), the employer shall provide change rooms for employees working regularly at the place.

(B) Clothes lockers. The employer shall provide two separate lockers or containers for each employee, so separated or isolated as to prevent contamination of the employee's street clothes from his work clothes.

(C) Laundering.

(i) Laundering of asbestos contaminated clothing shall be done so as to prevent the release of airborne asbestos fibers in excess of the exposure limits prescribed in 04.0102(b).

(ii) Any employer who gives asbestos-contaminated clothing to another person for laundering shall inform such person of the requirement in 04.0102(d)(4)(C)(i) to effectively prevent the release of airborne asbestos fibers in excess of the exposure limits prescribed in 04.0102(b).

(iii) Contaminated clothing shall be transported in sealed impermeable bags, or other closed, impermeable containers, and labeled in accordance with 04.0102(g).

(e) Method of measurement. All determinations of airborne concentrations of asbestos fibers shall be made by the membrane filter method at 400–450 X (magnification) (4 millimeter objective) with phase contrast illumination.

(f) Monitoring.

(1) Initial determinations. Within six months of the publication of 04.0102 every employer shall cause every place of employment where asbestos fibers are released to be monitored in such a way as to determine whether every employee's exposure to asbestos fibers is below the limits prescribed in 04.0102(b). If the limits are exceeded, the employer shall immediately undertake a compliance program in accordance with 04.0102(c).

(2) Personal monitoring.

(A) Samples shall be collected from within the breathing zone of the employees, on membrane filters of 0.8 micrometer porosity mounted in an open-face filter holder. Samples shall be taken for the determination of the 8-hour time-weighted average airborne concentrations and of the ceiling concentrations of asbestos fibers.

(B) Sampling frequency and patterns. After the initial determinations required by 04.0102(f)(1), samples shall be of such frequency and pattern as to represent with reasonable accuracy the levels of exposure of employees. In no case shall the sampling be done at intervals greater than six months for employees whose exposure to asbestos may reasonably be foreseen to exceed the limits prescribed by 04.0102(b).

(3) Environmental monitoring.

(A) Samples shall be collected from areas of a work environment which are representative of the airborne concentration of asbestos fibers which may reach the breathing zone of employees. Samples shall be collected on a membrane filter of 0.8 micrometer porosity mounted in an open-face filter holder. Samples shall be taken for the determination of the 8-hour time-weighted average airborne concentrations and of the ceiling concentrations of asbestos fibers.

(B) Sampling frequency and patterns. After the initial determinations required by 04.0102(f)(1), samples shall be of such frequency and pattern as to represent with reasonable accuracy the levels of exposure of the employees. In no case shall sampling be at intervals greater than six months for employees whose exposures to asbestos may reasonably be foreseen to exceed the exposure limits prescribed in 04.0102(b).

(4) Employee observation of monitoring. Affected employees, or their representatives, shall be given a reasonable opportunity to observe any monitoring required by 04.0102 and shall have access to the records thereof.

(g) Caution signs and labels.

(1) Caution signs.

(A) Posting. Caution signs shall be provided and displayed at each location where airborne concentrations of asbestos fibers may be in excess of the exposure limits prescribed in 04.0102(b). Signs shall be posted at such a distance from such a location so that an employee may read the signs and take necessary protective steps before entering the area marked by the signs. Signs shall be posted at all approaches to areas containing excessive concentrations of airborne asbestos fibers.

(B) Sign specifications. The warning signs required by 04.0102(g)(1)(A) shall conform to the requirements of 20 inches by 14 inches vertical format signs specified in 01.1202(d)(4), Subchapter 1, General Safety Code, AOSAHS, and to 04.0102(g)(1)(B). The signs shall display the following legend in the lower panel, with letter sizes and styles of a visibility at least equal to that specified in 04.0102(g)(1)(B).

Legend	Notation
Asbestos	1 in. Sans Serif, Gothic or Block
Dust hazard	3/4 in. Sans Serif, Gothic or Block
Avoid breathing dust	¼ in. Gothic
Wear assigned protective equipment	¼ in. Gothic
Do not remain in area unless your work requires it.	¼ in. Gothic
Breathing asbestos dust may be hazardous to your health	14 point Gothic

Spacing between lines shall be at least equal to the height of the upper of any two lines.

(2) Caution labels.

(A) Labeling. Caution labels shall be affixed to all raw materials, mixtures, scrap, waste, debris, and other products containing asbestos fibers, or to their containers, except that no label is required where asbestos fibers have been modified by a bonding agent, coating, binder, or other material so that during any reasonably foreseeable use, handling, storage, disposal, processing, or transportation, no airborne concentrations of asbestos fibers in excess of the exposure limits prescribed in 04.0102(b) will be released.

(B) Label specifications. The caution labels required by 04.0102(g)(2)(A) shall be printed in letters of sufficient size and contrast as to be readily visble and legible. The label shall state:

CAUTION

Contains Asbestos Fibers
Avoid Creating Dust
Breathing Asbestos Dust May Cause
Serious Bodily Harm

(h) Housekeeping.

(1) Cleaning. All external surfaces in any place of employment shall be maintained free of accumulations of asbestos fibers if, with their dispersion, there would be an excessive concentration.

(2) Waste disposal. Asbestos waste, scrap, debris, bags, containers, equipment, and asbestos-contaminated clothing, consigned for disposal, which may produce in any reasonably foreseeable use, handling, storage, processing, disposal, or transportation, airborne concentrations of asbestos fibers in excess of the exposure limits prescribed in 04.0102(b), shall be collected and disposed of in sealed impermeable bags, or other closed, impermeable containers.

(i) Recordkeeping.

(1) Exposure records. Every employer shall maintain records of any personal or environmental monitoring required by 04.0102. Records shall be maintained for a period of at least 20 years and shall be made available upon request to the Commissioner of Labor, the Director of the Division of Occupational Safety and Health, and to authorized representatives of either.

(2) Employee access. Every employee and former employee shall have reasonable access to any record required to be maintained by 04.0102 (l)(1) and 8 AAC 61.270 which indicates the employee's own exposure to asbestos fibers.

(3) Employee notification. Any employee found to have been exposed at any time to airborne concentrations of asbestos fibers in excess of the limits prescribed in 04.0102(b) shall be notified in writing of the exposure as soon as practicable but not later than five days of the finding. The employee shall also be timely notified of the corrective action being taken.

(j) Medical examinations.

(1) General. The employer shall provide or make available at his cost, medical examinations relative to exposure to asbestos required by 04.0102(j).

(2) Preplacement. The employer shall provide or make available to each of his employees, within 30 calendar days following his first employment in an occupation exposed to airborne concentrations of asbestos fibers, a comprehensive medical examination, which shall include, as a minimum, a chest roentgenogram (posterior–anterior 14 x 17 inches), a history to elicit symptomatology of respiratory disease, and pulmonary function tests to include forced vital capacity (FVC) and forced expiratory volume at one second ($FEV_{1.0}$).

(3) Annual examinations. On or before January 31, 1973, and at least annually thereafter, every employer shall provide, or make available, comprehensive medical examinations to each of his employees engaged in occupations exposed to airborne concentrations of asbestos fibers. Such annual examination shall include, as a minimum, a chest roentgenogram (posterior–anterior 14 x 17 inches), a history to elicit symptomatology of respiratory disease, and pulmonary function tests to include forced vital capacity (FVC) and forced expiratory volume at one second ($FEV_{1.0}$).

(4) Termination of employment. The employer shall provide, or make available, within 30 calendar days before or after the termination of employment of any employee engaged in an occupation exposed to airborne concentrations of asbestos fibers, a comprehensive medical examination which shall include, as a minimum, a chest roentgenogram (posterior–anterior 14 x 17 inches), a history to elicit symptomatology of respiratory disease, and pulmonary function tests to include forced vital capacity (FVC) and forced expiratory volume at one second ($FEV_{1.0}$).

(5) Recent examinations. No medical examination is required of any employee, if adequate records show that the employee has been examined in accordance with 04.0102(j) within the past one-year period.

(6) Medical records.

(A) Maintenance. Employers of employees examined pursuant to 04.0102(j) shall cause to be maintained complete and accurate records of all such medical examinations. Records shall be retained by employers for at least 20 years.

(B) Access. The contents of the records of the medical examinations required by 04.0102 (j) shall be made available, in accordance with 8 AAC 61.270 for inspection and copying, to the Assistant Secretary of Labor for Occupational Safety and Health, the Director of NIOSH, to authorized physicians and medical consultants of either of them, and, upon the request of an employee or former employee, to his physician. Any physician who conducts a medical examination required by 04.0102 (j) shall furnish to the employer of the examined employee all the information specifically required by 04.0102 (j) and any other medical information related to occupational exposure to asbestos fibers.

04.0103 Ventilation. (a) Abrasive blasting.

(1) Definitions applicable to 04.0103.

(A) Abrasive. A solid substance used in an abrasive blasting operation.

(B) Abrasive-blasting respirator. A continuous flow air-line respirator constructed so that it will cover the wearer's head, neck, and shoulders to protect him from rebounding abrasive.

(C) Blast cleaning barrel. A complete enclosure which rotates on an axis, or which has an internal moving tread to tumble the parts, in order to expose various surfaces of the parts of the action of an automatic blast spray.

(D) Blast cleaning room. A complete enclosure in which blasting operations are performed and where the operator works inside of the room to operate the blasting nozzle and direct the flow of the abrasive material.

(E) Blasting cabinet. An enclosure where the operator stands outside and operates the blasting nozzle through an opening or openings in the enclosure.

(F) Clean air. Air of such purity that it will not cause harm or discomfort to an individual if it is inhaled for extended periods of time.

(G) Dust collector. A device or combination of devices for separating dust from the air handled by an exhaust ventilation system.

(H) Exhaust ventilation system. A system for removing contaminated air from a space, comprising two or more of the following elements: (a) enclosure or hood, (b) duct work, (c) dust collecting equipment, (d) exhauster, and (e) discharge stack.

(I) Particulate-filter respirator. An air purifying respirator, commonly referred to as a dust or a fume respirator, which removes most of the dust or fume from the air passing through the device.

(J) Respirable dust. Airborne dust in sizes capable of passing through the upper respiratory system to reach the lower lung passages.

(K) Rotary blast cleaning table. An enclosure where the pieces to be cleaned are positioned on a rotating table and are passed automatically through a series of blast sprays.

(L) Abrasive blasting. The forcible application of an abrasive to a surface by pneumatic pressure, hydraulic pressure, or centrifugal force.

(2) Dust hazards from abrasive blasting.

(A) Abrasives and the surface coatings on the materials blasted are shattered and pulverized during blasting operations and the dust formed will contain particles of respirable size. The composition and toxicity of the dust from these sources shall be considered in making an evaluation of the potential health hazards.

(B) The concentration of respirable dust or fume in the breathing zone of the abrasive-blasting operator or any other worker shall be kept below the levels specified in 04.0101.

Asbestos Abatement Fact Finding Committee

I Introduction

Commissioner Robison to satisfy many petitions to approve asbestos abatement training programs, such as described by the following excerpt from a "Request for Proposals" by the Municipality of Anchorage:

> "Contractor shall provide notarized certification by name and social security (number) certifying that all employees involved in asbestos removal have been thoroughly instructed through an Asbestos Removal Training Program as approved by the State of Alaska Department of Labor in the hazards of exposure to asbestos fibers; proper care and use of protective clothing; decontamination procedures and all other conditions and requirements as reviewed under relevant DOSH, EPA, and OSHA standards."

and a response by the purchasing officer to the members of the request for proposal evaluating committee to wit: That eight of the nine proposers offered training programs of varying scope and strength. "Not withstanding inferences to the contrary, no federal, state, or municipal guidelines exist against which specific training programs can be objectively evaluated. Absent such guidelines, the adequacy of individual programs remain in question."

The Commissioner recognizing the need as identified above and his responsibility to lead the way in this critical area of worker safety and health, appointed our industry (government, labor and management) task force to act as a fact finding committee for asbestos abatement and related problems.

The committee represents all aspects of this industry with over 125 years combined experience in asbestos-related work.

The committee includes:

1. Chair, Ambrose Bittner - State Director
   U.S. Department of Labor - Bureau of Apprenticeship and Training; Member, Alaska Safety Advisory Council

2. Co-Chair, Ron Cunningham - Safety and Health Director
   Alaska General Construction Company
   Member AGC Safety Committee

3. Ray Jorgensen - Chief of Industrial Health Compliance
   Alaska Department of Labor, Division of Labor Standards and Safety, Occupational Safety and Health Section

4. Dan Middaugh - Member Asbestos Workers Local 97
   Joint Apprenticeship and Training Committee
   Asbestos Abatement Instructor
   President, Board of Directors, Alaska Health Project

5. Leonard Limtiaco - Occupational Safety & Health Manager
   U.S. Department of Labor, Occupational Safety and
   Health Administration

6. Joe Churchill - Manager
   E. J. Bartell Company
   Secretary - Asbestos Workers Joint Apprenticeship and
   Training Committee
   President, Alaska Chapter, Western Insulation
   Contractors Association
   Secretary-Treasurer - Western Insulation Contractors
   Association

7. Les Lauinger - Training Director
   AGC - Laborers Training Trust
   Instructor - Asbestos Abatement

8. Nancy Cannington - Special Assistant to the Commissioner
   Executive Assistant - Alaska Safety Advisory Council

The Committee in its collective wisdom did not attempt to reinvent a wheel, but rather outline and describe existing practices and procedures. The committee report outlines procedures and programs to deal with the safety and health concerns of those involved in an asbestos abatement project.

Our report follows.

II Scope

This report is intended to describe recommended rules which are in existence and to establish minimum content for an acceptable training program, provide for certification of trainers, recognition of trainers, and to establish the requirements for a presurvey and provide disposal procedures while performing demolition, removal, enclosure, remodeling and disposal of asbestos contaminated materials.

III Asbestos Abatement Safety and Health Standards, Rules and Regulations

A. Agencies

There are many regulations that must be followed to implement an effective asbestos abatement program. There are, for the most part, four agencies that are responsible for administering asbestos related regulation:

1. U.S. Environmental Protection Agency (EPA)

2. Alaska Department of Environmental Conservation (DEC)

3. U.S. Department of Labor, Occupational Safety and Health Administration (OSHA)

4. Alaska Department of Labor, Labor Standards and Safety Division, Occupational Safety and Health Section (DOSH)

B. Regulations

EPA and DEC regulation covers non-work related exposures, transportation and disposal of asbestos containing material. Municipalities have set up procedures and areas for the disposal sites. Virtually all of the OSHA regulations are mirrored by DOSH regulation. The State Department of Labor has enforcement jurisdiction at most places of employment in Alaska (exceptions are navigable water ways and federal/ military employees). The regulations and/or industry standards are:

1. EPA 40 CFR Part 61 Subpart M

The Environmental Protection Agency's 40 CFR Part 61 is the national emission standard for hazardous air pollutants. Subpart M is the national emission standard for asbestos.

2. Occupational Safety and Health Standards Subchapter 4, Article 1, Occupational Health and Environmental Control (OH & EC)

Occupational SAfety and Health Standards Subchapter 4, Article 1, Occupational Health and Environmental Control (OH & EC) Section 04.0102 specifically lists the requirements to abate exposure to asbestos. It defines the permissible exposure to airborne concentrations of asbestos fibers, methods of compliance, monitoring and medical records.

3. Occupational Safety and Health Standards Subchapter/General Safety and Health Code (GSC) Articles/Section 01.0101 to Article 15

   Occupational Safety and Health Standards Subchapter/General Health Safety Code Articles/ Section 01.0101 to Article 15.15.0101(j)(14) lists the requirements for establishing an accident prevention program, work platforms, hazardous materials and operations, personal protective equipment including respiratory protection, medical and first aid, fire protection, etcetera on to hazard communication (the right to know and be informed of hazardous substances in the work places).

4. 30 CFR Part II (37F.R. 6244, Mar. 25, 1972)

   Provides for the approval of respirators by NIOSH.

5. Alaska Statutes (AS) Section 1860.010-18.60.105

   Alaska Statutes Secs. 18.60.010-18.60.105 Alaska Department of Labor, Division of Labor Standards and Safety "Prevention of Accident and Health Hazards". This statute lists the duties of the Department of Labor. Some of the duties described enable the Department of Labor to (a) plan and execute safety programs, including educational campaigns, (b) establish and enforce occupational safety and health standards, (c) participate in occupational safety and health programs, and (d) assist employers to identify and obtain information on toxic and hazardous substances and develop employee education programs.

6. Alaska Administrative Code (AAC) Title 8 8AAC60.010-8AAC 80.010.

   Alaska Administrative Code Title 8 8AAC60.010-8AAC80.010 Alaska Department of Labor Division of Labor Standards and Safety charge the division with the responsibility and the authority to:

   a. Enforce all laws and lawful orders requiring work and work places to be safe and healthful;

   b. Investigate disabling or fatal occupational injuries and illnesses;

   c. Develop occupational safety and health standards which, after adoption, have the affect of law and,

d. Establish special orders, or rules and regulations, to cover a specific place of employment or process or work.

Section 8 AAC 61.270 provides for the access to records of employee's past or present exposure to toxic substances or harmful physical agents and job duties or working conditions by the Department of Labor and employees or their representatives.

7. American National Standards (ANSI) 288.2-1969 and 1980 are adopted by reference in the GSC and OH & EC.

American National Standards 288.2 - 1969 and 1980 cover the use of respiratory protection.

288.2 - 1980 section 7.2 requires the respirator issuer and wearer be given adequate training by a qualified person and describes training subjects (topics).

288.2 - 1969 section 7.4 requires the supervisors and workers be so instructed by competent persons and lists minimum training (topics).

American National Standards 29.2 - 1971 addresses the design and operation of local exhaust systems required to control exposure to asbestos.

In addition to enforced regulations, the agencies have enforcement policies and regulation interpretations that affect the owner/operator, contractor/employer, and worker/employee of asbestos abatement/compliance programs.

IV Asbestos Abatement Project Responsibilities

A review of the standards and regulations in Section III of this report revealed a need for the assignment of specific responsibilities of owners/operators, contractors/employers and workers/employees prior to the initiation or commencement of work on any asbestos abatement project. Therefore, this Fact Finding Committee has determined that specific responsibilities be assigned:

A. Owners/Operators

1. Ensure that a survey is conducted to identify the presence of asbestos materials and the actual location of these materials prior to the preparation of bid specifications for the abatement project.

2. Include in the bid specifications the designated disposal site and methods/procedures for disposal.

3. Provide in the bid specifications the requirements for inspection and monitoring of the work performance during the abatement project.

B. Contractor/Employer

1. Provide a skilled workforce of qualified workers who have received safety and health training prior to commencement of any asbestos abatement work.

2. Provide adequate material and equipment to safely perform the asbestos abatement project such as: approved respirators, personal protective equipment and clothing, work clothing change rooms, disposal packaging materials and monitoring equipment. (Reference - Attachment 1)

3. Ensure that trainers/instructors and supervisors are familiar with Safety and Health Rules and Regulations and Environmental Protection Agency Standards.

4. Provide a written training program for workers and maintain documentation of the completed training of each worker.

C. Workers/Employees

1. Be familiar with and abide by Safety and Health requirements and procedures when working with asbestos materials.

2. Be familiar with personal protective equipment and ensure that equipment and protective clothing are used and worn when working with asbestos materials.

V Recommended Procedures for Abatement Projects

In Alaska, the magnitude of the asbestos problem is just now being uncovered. Recently, many of our schools, military structures, and other public and private buildings have been found to contain asbestos. Legislation has been introduced this year to determine in more detail the extent of the asbestos problem in Alaska. At issue is the actual and potential dangers from "intermittent" asbestos exposure Alaskan construction workers face as they remodel and/or demolish these structures. In order to combat this problem and prevent future unsuspected asbestos exposure to Alaskan

workers, a proper survey of any building and plant prior to remodel or demolition is the most important first step.

Such a survey would check all materials in a building or plant that are known to possibly contain asbestos. Materials found to contain asbestos would then be charted as to type and amount (percentage) of asbestos present. This would allow the survey personnel to recommend removal/handling techniques to keep exposure at a minimum. (Reference Attachment 2)

A. Owner/Operator

1. Have survey performed by appropriate agency. (Reference Attachment 3)

Only properly trainined personnel should pre-survey remodel/demolition operations for asbestos-bearing materials. Survey personnel must be familiar with building construction, as well as be acquainted with all materials that may contain asbestos. Such persons should be capable of locating the suspect materials, collecting bulk samples, checking the samples and following them through the lab procedure and making recommendation on how to handle these materials during demolition/remodel.

The training of survey technicians is very important. These persons are the key in preventing unnecessary exposure to asbestos. Survey personnel must be proficient in self protection, removal, encapsulation, monitoring, lab techniques, basic building construction and identification of asbestos bearing materials.

2. Disposal Site

It is recommended that each owner/operator be required to identify, in the bid specifications of all asbestos abatement projects, the location of the disposal site and provide disposal procedures to include as a minimum : (Reference Attachment 3)

a. The geographical area or locale which the disposal facility will accept materials from.

b. The time and dates that the facility will accept asbestos materials for disposal.

c. Procedures for making arrangements for disposal to include contact points and telephone numbers.

d. Procedures for packaging, transporting, labeling and processing of the materials for acceptance at the disposal facility.

3. Specifications for Worker Safety-Health and Environmental Concerns.

The following general specifications are recommended for demolition, removal, disposal, enclosure and remodeling of asbestos abatement projects. If these recommended specifications are incorporated into contracts and strictly enforced, the exposure of asbestos to both public and employees will avoid unsafe and unhealthful exposures. Contractors must receive training and must train their workers in safe work practices. Owners/operators of buildings must identify projects with asbestos contained materials prior to issuance of bids. (Reference Attachment 4)

a. Regulations

Contractors shall comply with the requirements of the EPA regulations, OSHA regulations on asbestos, and any applicable State and Local Government regulations which are incorporated by reference.

b. Scope of Work

1. The contractor shall furnish all labor, materials, services, insurance, and equipment necessary to carry out the operation in accordance with the EPA and OSHA regulations (and any applicable State and Local Government regulations).

2. The contractor shall be responsible for obtaining approval for a waste disposal site in compliance with section 61.25 of the EPA regulations.

3. Contractors shall post the EPA, OSHA, State DOSH and any applicable Local Government regulations at the job site.

c. Workers Protection (any and all personnel entering contaminated area)

1. The contractor shall provide workers with approved respirators as determined by the exposure level (filtration or air supplied) as applicable. The contractor shall provide a sufficient quantity of filters approved for asbestos so that workers can change filters

during the work day. Filters shall not be used any longer than one (1) work day. The respirator filters shall be stored at the job site in the change room and shall be totally protected from exposure to asbestos prior to their use.

2. Workers shall always wear a respirator properly fitted on the face in the work area.

3. Contractors shall instruct and train workers in proper respirator use.

4. Workers shall wear disposable, full-body coveralls and disposable head and foot wear in the work area. Footwear may be disposable. Non-disposable footwear shall be left in the work area at all times until disposal at job completion.

5. The contractor shall set up a decontamination facility to include a shower outside of the work area. (Example: Reference Attachment 5)

6. All workers without exception shall:

   a. Remove street clothes in the change room and put on the disposable coveralls and head covers and respirator before entering the work area.

   b. Remove the disposable coveralls, head covers and footwear in the work area before leaving the work area. Still wearing their respirators, proceed to the showers and remove their respirators while showering with soap and water.

   c. Shower at the end of each day's work before entering the change room to change into street clothes.

7. Workers shall not eat, drink, smoke, chew gum, or chew tobacco in the work area. To eat, drink or smoke, workers shall remove the disposable work clothes and footwear in the work area before leaving the work area. Still wearing their respirators, workers shall proceed to the showers and remove respirators while showering with soap and water. Workmen shall then dress into new, clean, disposable coverall to eat, smoke, or drink. The new coverall can be worn to reenter the work area.

8. The contractor shall provide a respirator and disposable coveralls, head cover, and footwear to any official representative who inspects the job site.

9. All persons entering the work area shall wear an approved respirator and disposable coveralls, head cover, and footwear.

d. Work Area Preparation

1. The Contractor shall set up a decontamination facility outside of the work area which will consist of a change room, shower area, and equipment area. (Reference Attachment 5)

2. The contractor shall isolate the work area for the duration of the work by completely sealing off all openings and fixtures in the work areas including, but not limited to, heating and ventilation ducts, doorways, corridors, windows, skylights, and lighting with plastic sheeting taped securely in place.

3. The contractor shall build double barriers of plastic sheeting at all entrances and exits to the work area so that the work area is always closed off by one barrier when workers enter or exit.

4. All floor and wall surfaces in the work area shall be covered with plastic sheeting taped securely in place to protect from water damage (or damage by sealants).

5. Before the work has begun, the contractor shall wet clean all removable items and equipment, remove them from the work area, and then return these items and equipment to the work area after the job has been completed and the area has been decontaminated.

6. The contractor shall cover all non-removable items and equipment in the work area with plastic sheeting taped securely in place.

7. After work area isolation the contractor shall take out detachable electrical heating, ventilation equipment, and other items located on the asbestos material, clean them before covering with plastic sheeting taped securely in place, and return them to their proper places after the job has been completed and the work area has been decontaminated.

8. The contractor shall remove all heating, ventilation, and air conditioning system filters, pack them in sealable plastic bags (6-mil minimum) for burial in the approved waste disposal site and replace them with new filters.

9. The contractor shall establish emergency and fire exits from the work area. Emergency procedures shall have priority.

e. Method of Removal

1. The asbestos material shall be sprayed with water containing a wetting agent to enhance penetration. A fine spray of the amended water shall be applied to reduce fiber release preceeding removal of the asbestos material. The material shall be sufficiently saturated to prevent emission of airborne fibers in excess of the exposure limits prescribed in the OSHA and State regulations referenced in these specifications.

2. The asbestos material shall be removed in small sections by two-man teams on staging platforms. Before beginning the next section, the material shall be packed while still wet into sealable plastic bags (6-mil minimum) and placed into fiber or metal drums or skips for transport. Bags, drums, and skips shall be marked with the OSHA/State DOSH label prescribed by the OSHA/State DOSH regulations referenced in these specifications. The outside of all containers shall be clean before leaving the work area.

3. All plastic sheeting, tape, cleaning material, clothing and all other disposable material or items used in the work area shall be packed into sealable plastic bags (6-mil minimum) and placed into metal or fiber drums or skips for transport. The drums and skips shall be marked with the OSHA/State DOSH label prescribed by the OSHA/State DOSH regulations referenced in these specifications.

4. The contractor shall transport the sealed drums or skips to the approved waste disposal site. The sealed plastic bags may be dumped from the drums into the burial site unless the bags have been broken or damaged. The damaged bags shall be left in the drum and the entire contaminated drum shall be buried. Uncontaminated drums may be recycled.

5. As a highly recommended engineering control method and as an industrywide practice whenever feasible, HEPA filtered air exhaust should be used to create a negative pressure and allow for thorough cleanup.

f. Decontamination of Work Area

1. The contractor shall completely decontaminate all tools before removal from work area. The contractor shall clean all surfaces with a HEPA filtered vacuum (HEPA - High Efficiency Particulate Absolute) and/or water. (HEPA vacuums fail when used on wet material.) After cleaning the work area, the contractor shall wait 24 hours to allow for settlement of dust and then wet-clean all surfaces in the work area. After completion of wet-cleaning and when all surfaces are completely, dry, the contractor shall take two air samples, minimum six hours duration each, within 48 hours and 24 hours apart. Such air samples shall be taken while activities normal to the use of the area are simulated i.e., sweeping floor, dusting counters, vacuuming with standard vacuum, air handling system functioning, or any other air disturbing activity that would normally take place in the area after takeover by owner/operator.

2. If the air samples results show that the work area has not been decontaminated, the contractor shall repeat the cleaning and air monitoring until the work area is in compliance.

3. After the work area is found to be in compliance, all entrances and exits are unsealed and the plastic sheeting, tape, and any other trash and debris is disposed of in sealable plastic bags (6-mil minimum) and buried in the approved waste disposal site.

g. Air Monitoring

1. Air monitoring shall be conducted by a certified agency/laboratory to ensure compliance with the OSHA/State DOSH regulations.

2. Air monitoring will be conducted according to the method prescribed by OSHA/State DOSH regulations.

3. Air monitoring shall be performed to provide the following samples during the period of asbestos operations.

Area to be Sampled	Minimum Number of Samples for each Work Day	Each Sample Minimum Time
Work Area	2	6 Hrs.
Personnel	Each Job Title	6 Hrs.
Outside Building	1	6 Hrs.
Outside Work Area	1	6 Hrs.

B. Contractor/Employer

1. Provide Asbestos Abatement Training Program

The Committee recommends a minimum three-day asbestos training program, as outlined in Attachment 6.

2. Provide Qualified Supervisors and Instructors

The Committee recommends the following minimum requirements:

a. Recognize distinction between legal vs. recommended practices.

b. Capable of reading analyses between bulk and air samples.

c. Know requirements of OSHA, State DOSH, EPA and DEC in regards to asbestos.

d. Knowledge of jurisdictional issues between regulatory agencies listed in item C.

e. Knowledgeable in respirator requirements.

C. Worker/Employee

1. The employee should receive instruction pertaining to aforementioned training. (Health effects, respirator program, abatement procedures, engineering controls, waste disposal, and any applicable regulations.)

2. Follow procedures outlined in the training program.

3. Participate in on-the-job safety meetings.

4. Work with the contractor to identify and participate in any corrective actions deemed necessary.

5. Avoid shortcuts in work procedures involving safety.

6. Be a productive and safe worker by following recommended practices.

VI. Conclusions - Committee Recommendations to the Commissioner

1. Require pre-surveys for asbestos containing materials in demolition and remodeling projects. Pre-survey should be performed by competent person using a check list of prominent asbestos containing materials.

2. Identify appropriate sites and provide operational guidelines for disposal of asbestos containing materials consistent with VA2, page 7.

3. Adopt minimum training standards for asbestos abatement (Reference Attachment 6)

4. Establish instructor qualifications for Asbestos Abatement training (Reference VB2, page 8)

5. Require workers to successfully complete minimum training program prior to employment in hazardous or contaminated work areas, (Reference VC2 Page 9)

We further recommend that the Commissioner adopt certification procedures for standards of training, instructor qualifications and worker skills.

Respectfully Submitted:

Ambrose Britton II — Chairman

Ronald E. Cunningham — Co-Chairman

Daniel McClanahan — Member

Lloyd L. Churchill — Member

Leslie H. Jennings — Member

Leonardo P. Fuentes — Member

MUNICIPALITY OF ANCHORAGE
SOLID WASTE SERVICES

OPERATIONS PROCEDURE

TITLE: ASBESTOS DISPOSAL

EFFECTIVE DATE:

1. Only asbestos generated within the Municipality will be accepted for disposal.

2. Asbestos will be accepted at the Merrill Field Landfill on a scheduled basis. (The time and dates will be established by the department.)

3. Prior arrangements, by the asbestos generator/disposer, will be made with the Processing and Disposal General Foreman before asbestos is accepted.

4. Asbestos must be transported, packaged, and marked in accordance with all federal, state, and municipal regulations. These regulations include, as a minimum:

   -transport in a closed vehicle
   -asbestos must be thoroughly wetted and placed in a water tight container before burial. Containers may be barrels, drums, or doubled 6 mil or thicker plastic bags. All asbestos containers will display the following label:

   CAUTION
   CONTAINS ASBESTOS
   AVOID OPENING OR BREAKING CONTAINER
   BREATHING ASBESTOS IS HAZARDOUS TO YOUR HEALTH

   -all containers will be hand placed in designated area.
   -any asbestos containers determined by Solid Waste Services to be inadequate will be repackaged or removed, by the disposer, from the Merrill Field Landfill immediately.

5. All asbestos will be covered on a daily basis by at least six inches of soil.

6. Cost for disposal of asbestos will be based on actual time and materials and will include but not be limited to equipment rental, equipment operator's time, administrative time and cover material as required.

Attachment 4

GENERAL INSTRUCTIONS AND GUIDELINES FOR ASBESTOS REMOVAL

1. Notify proper authorities of intent to remove asbestos

2. Seal off work area, put up caution signs and build change areas and transition area.

3. If possible, have adequate "wet down" water supply available. If a pressure system is not available, provide sprayer cans.

4. Provide each employee with duplicate copies of the Asbestos Removal Instructions. Retain employee-signed copy in files.

5. Have all equipment necessary, i.e., disposable coveralls, respirators, etc., available.

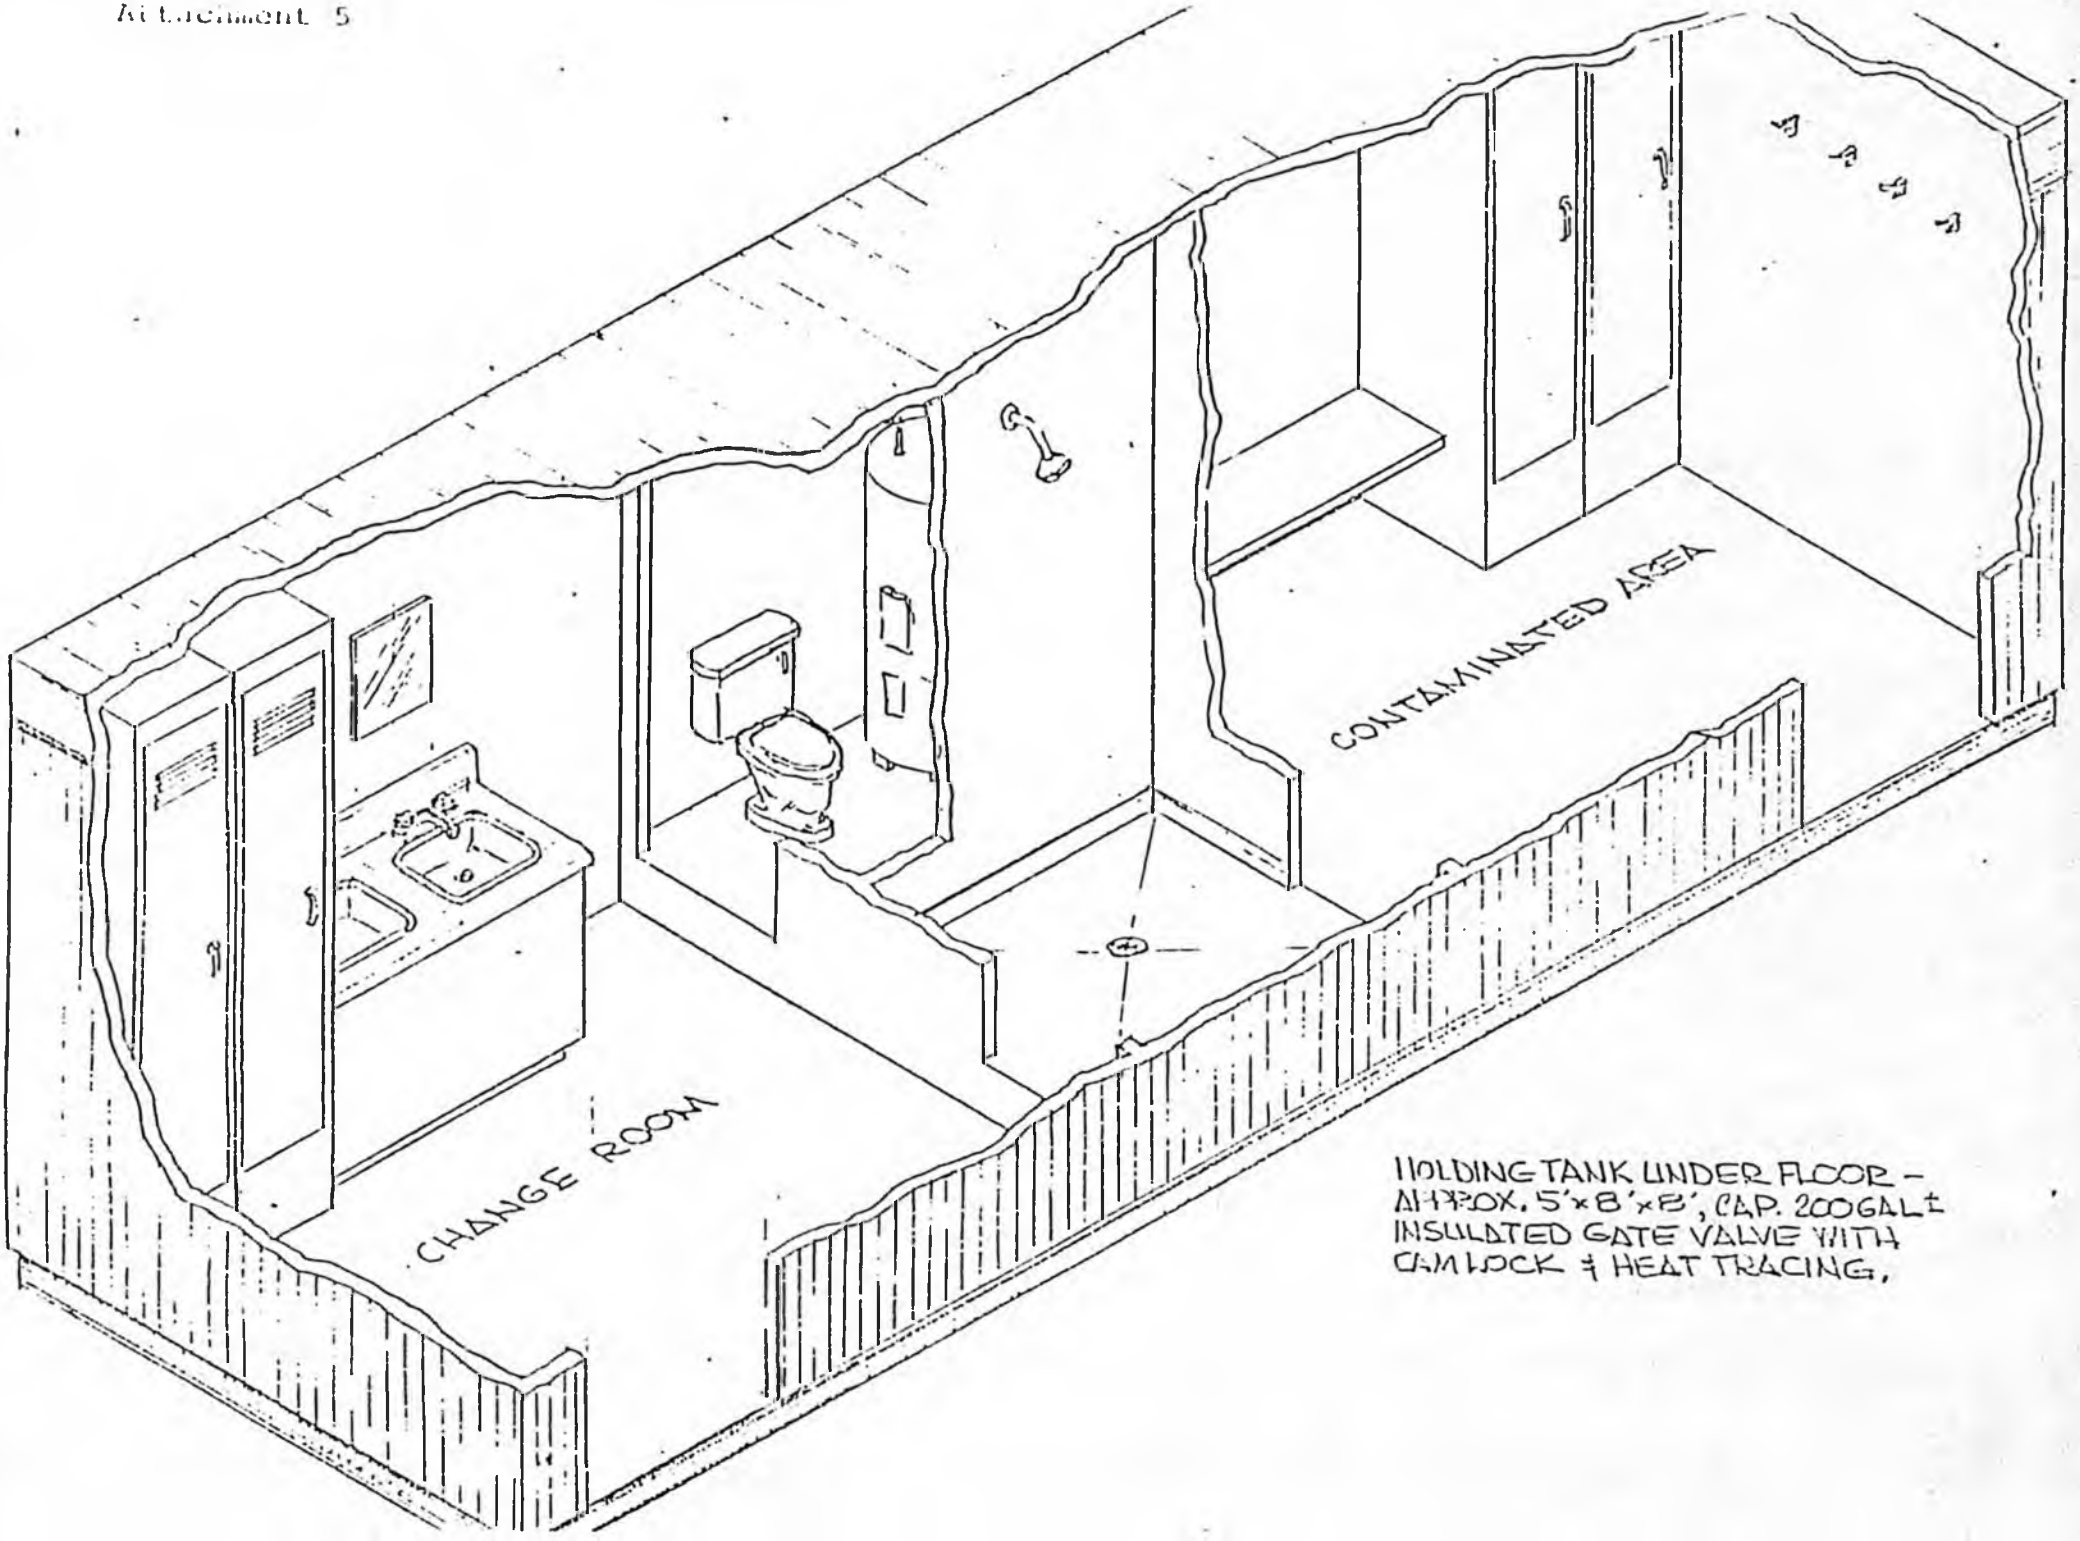
6. Have air monitoring equipment in position.

7. Proceed with the removal and bagging procedure.

8. Dispose of waste. The dump area should be checked out prior to actual haouling to be sure it will accept asbestos waste.

9. Provide to each employee, by hand or mail, duplicate copies of the medical examination form. Retain employee-signed copy in files.

10. Records of all medical examinations shall be retained for the required 20 years storage.



11. Monitoring records will also be retained for the required 20 years storage.

12. Any employee found to have been exposed to airborne concentrations of asbestos fibers in excess of the limits set in paragraph (b) of the)SHA standards shall be notified in writing within five (5) days.

13. The key to a successful operation is the keep the fiber count down. This means containment of the fibers either by water or encapsulation.

14. Check local EPA or State requirements.

The Honorable Joe P. Josephson
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Senator Josephson:

The Anchorage School District has been monitoring the asbestos fiberous material that is located within 55 schools since 1979. This requirement was federally mandated by the Environmental Protection Agency (EPA). In June, 1983, we were again mandated by the EPA to post each school that contained asbestos and to notify all occupants of the building of its location.

The Anchorage School District structured a formal process by which prequalified bidders were selected and given the opportunity to bid on six abatement projects. Bartlett-Begich Junior/Senior High School was a separate item due to the magnitude of asbestos within the school. The five other schools were bid as a unit which includes West, East, and Dimond High Schools, Clark Junior High School, and Mt. Spurr Elementary School.

The bids were opened on Wednesday, May 9, 1984. The base bid for Bartlett had a low $13,005,300 and a high of $22,166,000. We received three bids for this project. We received two bids for the five school project with a high of $1,980,000 to a low of $1,538,240.

We will be approximately $10 million short from awarding a contract for the removal of asbestos at Bartlett. At the present time the District is very appreciative of the approximately $6.5 million which was awarded in HB 403.

The low bid, if accepted, is $14,543,540. This bid indicates that Bartlett would have to be closed for at least one semester. The District is analyzing some of the options for Bartlett's 2,000 students which would not impact on the educational program.

If Bartlett was to be completed over two summers, it would require an additional $4 million. This, however, does not include storage for all of the furniture and equipment housed in Bartlett's 324,000 square feet.

The options available to us is to reject all bids, rebid the five schools by themselves, or reject Bartlett because of lack of funds. This question comes to the School Board on May 21, 1984, and it is imperative that the District receive the funding for this very important program.

We have appreciated all your efforts on behalf of the Anchorage community, its children, and their future.

Sincerely,

E. E. (Gene) Davis

E. E. (Gene) Davis, Ed.D.

March 7, 1984

RECEIVED

Honorable Joe Josephson
Alaska State Legislature
Pouch V (MS 3100,
Juneau, Alaska 99811

Dear Senator Josephson:

Subject: Asbestos Abatement Program For The Anchorage School District

The following information has been gathered to provide you with backup knowledge of the asbestos problem facing the Anchorage School District.

The Anchorage School District has not moved hastily into its decision on asbestos. The District began by implementing the EPA's voluntary asbestos identification program in 1979, and continued with the EPA's mandatory asbestos identification and notification program in 1982. The School Board appointed a Technical Advisory Panel which included local and state health officials, outside medical consultants with expertise and knowledge of asbestos health hazards, School Board members, and local government and civic leaders. This Panel was Chaired by School Board Member Jim Robinson. The Panel did not just debate the issue, but researched it on their own, attended educational and informational seminars, and solicited advice and information from knowledgeable and experienced sources, before making their recommendations.

Enclosed is School Board Memorandum #534 (82-83), May 23, 1983, which approved the recommendations by the Panel and authorized the Superintendent to search for a competent firm to assist the District in designing the abatement program. The firm of Gobbell Hays Pickering was approved by the School Board on July 11, 1983, ASD Memorandum #9 (83-84). The firm is from Nashville, Tennessee. It was chosen to do the design work and the monitoring of the abatement project. This firm has done over 500 school buildings and over 140 hospitals and government-type buildings. They have over 230 personnel in their firm and are well versed on the current state of the art of asbestos removal and replacement processes.

Also enclosed is the U. S. Attorney General's Asbestos Liability Report to the Congress and it states "Congress has determined that 'medical science has not established any minimum level of exposure to asbestos fibers which is considered to be safe to individuals exposed to fibers' and 'the presence in school buildings of friable or easily damaged asbestos creates an unwarranted hazard to the health of the school children and school employees who are exposed to such materials.'"

Enclosed is some medical research data which indicates that there are no safe lower limits of exposure. A letter from Mr. Wayne Tansil, Gobbell Hays Pickering, is enclosed which outlines encapsulation problems versus removal, and other information indicating the hazards of asbestos.

There are numerous reported examples of premature deaths from low-level exposure. Steve McQueen died of mesothelioma--his only reported exposure was a summer as a dock worker. A similar situation was reported with a Georgia Tech football coach. A Yale librarian was reported to have died of mesothelioma after seven years working in a library with deteriorating asbestos fireproofing above a dropped ceiling. A thirteen year old boy died of mesothelioma developed from exposure to asbestos while helping his father work on brake linings.

I believe the information contained within this booklet outlines the compounding health hazard to school children of asbestos exposure. This means children exposed to friable asbes[illegible] at an early age have the possibility of being affecte[illegible]y an asbestos-related disease in the prime of life, given the 20-30 year latency period of such diseases.

If I could be of further assistance, please let me know.

Sincerely,

L. T. Freeman
Assistant Superintendent
for Business Management

KETCHIKAN GATEWAY BOROUGH SCHOOL DISTRICT

Darroll Hargraves
SUPERINTENDENT

ASBESTOS HAZARD ABATEMENT in the KETCHIKAN GATEWAY BOROUGH SCHOOL DISTRICT

INTRODUCTION:

Asbestos hazard abatement and rehabilitation of existing schools is a recognized need in Ketchikan. The situation leaves planners anxious to create safe and adequate abatement. Hazard abatement efforts require considerable financial backing. State involvement in funding efforts is an essential component of asbestos hazard abatement. The asbestos dilemma is a serious one, with no easy solution. Some Alaskan communities have experienced considerable expense in asbestos abatement programs. Excessive expense and unsafe removal are situations that Ketchikan wants to avoid.

PRUDENT PLANNING:

Good planning for asbestos removal is prudent, necessary and will allow for a variety of options to be investigated. The planning stage is a vital, necessary and cost saving effort. It is initially inexpensive when compared to the long term inconvenience of a poorly planned hazard abatement program.

POUCH Z • KETCHIKAN, ALASKA 99901 • (907) 225-2118

COMMUNITY PRIORITY:

Education is a high priority in Ketchikan. Local taxpayers have recently passed a 16.9 million dollar bond issue which will enable the District to meet construction and maintenance needs.

Impending growth due to the anticipated opening of a new molybdenum mine near Ketchikan has forced the community to pay close attention to the current and future needs of public schools in Ketchikan, and make improvements as needed. The threat of asbestos means that state dollars are needed for study and subsequent asbestos hazard abatement.

BUDGET REQUIREMENTS:

A minimum of $1.5 million will be required to begin hazard abatement procedures in the Ketchikan schools. Limited study of the asbestos problem indicates that asbestos is present in some schools. Continued investigation is required to fully identify the extent of the problem.

Some asbestos hazard abatement and code upgrades will be in order subsequent to the initial study. Administration of the study and subsequent remedy is also a necessary expense.

CONCLUSION:

State sponsored allocation of the necessary funds to put adequate plans in place will help provide for an organized plan for encapsulation, containment or removal of asbestos throughout School District facilities. Such action will put Ketchikan in a position to "plan for the future" and deal with asbestos in a well organized, safe manner.

INFORMATION FOR NANCY BENNETT, Health Education and Social Services Committee.

The following information augments Les Riedlinger's January 25th's testimony regarding the need to ensure that the $26,000,000.00 proposed by HB57 has sufficient provision to accommodate $2,000,000.00 in additional funding for asbestos removal at the Fairbanks North Star Borough School District.

ITEM 1

Of the 31 major buildings managed by FNSBSD, 11 remain to be addressed in terms of asbestos removal. The amounts needed for each of the eleven is as follows:

$247,000	- Barnette Elementary School
160,000	- University Park Elementary School
342,000	- Hunter Elementary School
209,000	- Hutchison Career Center
37,000	- Joy Elementary School
915,000	- Lathrop High School
397,000	- Main School
229,000	- Nordale Elementary
214,000	- North Pole Elementary
257,000	- Ryan Junior High School
10,000	- West Valley High School
$3,017,000	- Total Cost
1,052,000	- LESS: Funds on hand from prior Legislative Appropriations
$1,965,000	- Additional Asbestos Removal Need. This amount takes into account total project costs, i.e. sampling, bid documents, construction award, consultants, etc.

ITEM II

With respect to a gross cost estimating guide for asbestos removal, the FNSBSD has developed the following format. It is based upon bid experience; advice from consultants and in-house technical expertise.

It can be applied, however, only in those instances where the need is to remove insulation from pipe, conduits, ducts, boilers, etc. It can not be used for costing asbestos removal associated

with its use as an acoustical control, fire protection, or any other spray application.

The format works as follows:

- Calculate the total number of linear feet of pipe insulation and the total number of square feet associated with boiler, hot water tank wrapping, etc.

- Each of these linear and square feet than is assigned the value of one unit.

- For each unit that is openly accessible, calculate $45.00/unit for total removal, replacement and all other project related costs such as bid documents, sampling, monitoring, consultant fees, contingencies, etc.

- For each unit that concealed, i.e. inaccessible without first demolishing rigid barriers such as floors, ceilings, and walls, calculate $75.00/unit. This amount covers all associated project related costs including replacement.

ITEM III

Finally, Mr. Riedlinger addressed that Fairbanks in conjunction with its consultants had developed a model set of asbestos removed technical specifications which incorporated all EPA rules and guidelines. They are attached.

ALASKA FEDERATION OF NATIVES, INC.
1984 ANNUAL CONVENTION

RESOLUTION NO. 84-32

TITLE: ASBESTOS ABATEMENT IN ALASKA SCHOOLS

WHEREAS, Believing that friable asbestos, similar to that which was discovered in schools in the Anchorage School District, exists in numerous other schools in school districts throughout the State; and

WHEREAS, Knowing that an Asbestos Technical Panel, convened in Anchorage by the Anchorage School Board, reviewed thoroughly health hazards associated with asbestos in Anchorage schools; and as a result, recommended that friable asbestos be removed from Anchorage schools as an unacceptable health hazard; and

WHEREAS, Believing that many Alaskan school children in school districts other than Anchorage may be exposed to health hazards from asbestos that are preventable,

NOW THEREFORE BE IT RESOLVED that the Alaska Federation of Natives urges the Governor to form a special task force with representatives of the Department of Health and Social Services, Department of Labor, Department of Education, Department of Transportation and Public Facilities, Department of Environmental Conservation, appropriate federal agencies, parents of school children, and teachers to implement an asbestos abatement program in all Alaska schools, including those under Bureau of Indian Affairs jurisdiction, in accordance with recognized standard for asbestos abatement and

BE IT FURTHER RESOLVED that the Alaska Federation of Natives urges implementation of an asbestos abatement program which will include the following tasks:

1. Implement and insure completion of a comprehensive survey to identify and categorize asbestos in all Alaska schools.

2. Evaluate health hazards associated with any asbestos (friable asbestos and asbestos in other forms) discovered in the survey and make recommendations for appropriate medical surveillance of students, teachers and workers exposed to asbestos.

BILL SHEFFIELD, GOVERNOR

DEPARTMENT OF LAW

OFFICE OF THE ATTORNEY GENERAL

POUCH K – STATE CAPITOL
JUNEAU, ALASKA 99811
PHONE: (907) 465-3600

January 25, 1985

Honorable Max F. Gruenberg, Jr.
Co-Chair
House Committee on Health, Education
and Social Services
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Representative Gruenberg:

I am responding to your letter of January 23, 1985, inquiring whether inclusion of the proposed provisions of section 1 of SSHB 5 is necessary, in light of certain advice provided by this office to the Commissioner of Education last summer. A copy of that Memorandum of Advice is attached for your information.

While probably not necessary to deal with the most egregious asbestos situations, I suspect there still could be a variety of situations arising which, although not qualifying as a "emergency" under the general provisions of AS 14.03.030(2), would nonetheless fall within the scope of the proposed language in section 1 of SSHB 5. Consequently, I believe it would be advisable to include that language in the bill, both to assure that these lower-level asbestos problems are encompassed within the "emergency closure" provisions and to clarify the Commissioner of Education's authority in this regard.

Sincerely,

NORMAN C. GORSUCH
ATTORNEY GENERAL

MEMORANDUM State of Alaska

TO: The Honorable Harold Reynolds
Commissioner
Department of Education

DATE: August 29, 1984

FILE NO: 366-017-85

TELEPHONE NO: 465-3600

FROM: Norman C. Gorsuch
Attorney General

By: Ronald W. Lorensen
Deputy Attorney General
Department of Law

SUBJECT: Emergency school closures under AS 14.03.030(2)

This confirms our conversation on Thursday, August 23, 1984.

Upon further review and analysis, I believe some clarification of my May 28, 1984, */ letter to Senator Joe Josephson regarding the scope of the "emergency school closure" provision of AS 14.03.030(2) is in order. In that letter I indicated in fairly absolute terms that planned activities such as an asbestos abatement program could never qualify as adequate grounds for an "emergency school closure."

The May 28 letter does not adequately acknowledge the discretion which AS 14.03.030(2) vests in you, as Commissioner of Education, to determine what constitutes an "emergency" justifying deviation from the normal 180-day school term. Under the law, "emergency closure days" may only be substituted for days in session with your approval. Since the legislature did not define "emergency" under AS 14.03.030(2), it is left to you to apply the appropriate standard and conditions for granting an "emergency school closure" based on the general policy and purposes underlying the school laws. See, e.g., Kenai Peninsula Fishermen's Co-op Association v. State, 628 P.2d 897, 907 (Alaska 1981).

As I indicated in my May 28 letter, pre-planned construction or maintenance activities would not normally be considered to constitute a situation covered by AS 14.03.030(2). However, that general conclusion should not be taken as implying that you may never approve a closure for a pre-planned activity when, in the exercise of your discretion in reviewing a specific case, you conclude that an emergency situation exists.

RWL:vrb

cc: Honorable Joe Josephson
Alaska State Senator

U.S. ENVIRONMENTAL PROTECTION AGENCY

REGION X

1200 SIXTH AVENUE

SEATTLE, WASHINGTON 98101

MAR 14 1985

REPLY TO ATTN OF: M/S 524

MAR 1 1985

Jim Robison, Commissioner
Alaska Department of Labor
P. O. Box 1149
Juneau, Alaska 99802

Dear Mr. Robison:

The U.S. Environmental Protection Agency (EPA) has been given the responsibility for implementation of the Asbestos School Hazard Abatement Act of 1984 (ASHAA). This Act addresses asbestos abatement procedures and the disbursement of financial assistance for schools performing asbestos abatement projects. It does not include identification, recordkeeping and notification requirements for friable asbestos in school buildings. These tasks are incorporated in the Asbestos-in-Schools Identification and Notification Rule promulgated in accordance with the Toxic Substance Control Act (TSCA).

The Asbestos Action Program in the EPA Office of Pesticides and Toxic Substances has been given the authority to fund cooperative agreements with some states whose projects fall within the funding limits imposed by ASHAA. The disbursement of funds under this program is contingent upon a 25% match by the respective recipient.

Projects which are eligible for funding include: 1) development of a state license/certification program for asbestos abatement contractors and maintenance personnel (EPA can provide a model abatement contract specification, and a model state contractor licensing regulation for state use), 2) asbestos abatement training for contractors and supervisory personnel, 3) voluntary technical assistance to schools in assessing hazards and deciding on abatement strategies, 4) dissemination of asbestos information to school employees, teachers, school administrators, and parents.

If the State of Alaska intends to request federal funding under this program, a pre-application proposal (Enclosure A) should be submitted to EPA as soon as possible. The project(s) identified in your pre-application will be reviewed. If the projects are approved you will be requested to submit completed application forms to EPA by April 15, 1985. The application forms can be obtained from our EPA Juneau Office (907) 586-7619.

Both the pre-application and the ensuing completed application proposals should be submitted to: Asbestos Action Program, U.S. EPA, TS-788A, 401 M Street S.W., Washington, D. C. 20460, Attn: Stephen Schanamann. Copies of the proposal should be sent to Kathryn Pazera, EPA, Alaska Operations Office, 3200 Hospital Drive, Suite 101, Juneau, Alaska 99801, and John Seitz, Office of Compliance Monitoring, U.S. EPA, 401 M Street, S.W., Washington, D.C. 20460.

If you should have any questions on this material, please contact Kathryn Pazera, 586-7619.

Sincerely,

SUBJECT: Asbestos Licensing and Control Regulations

I have enclosed a copy of the Asbestos Licensing and Control Regulations. Final changes were published in the Maryland Register on January 7, 1983.

The regulations were approved by Secretary Buck on December 27, 1982. The regulations will become effective on February 25, 1983. However, in order to provide time for businesses to train employees and apply for licenses, the Department is delaying the effective date of the licensing regulations until April 1, 1983.

Inquiries concerning applications for licenses to conduct asbestos projects should be directed to Mr. Frank Whitehead, Air Management Administration, 201 West Preston Street, Baltimore, Maryland 21201 (301-383-2776).

Inquiries concerning application for approval of training courses should be directed to Dr. Katherine Farrell, Division of Environmental Disease Control, 201 West Preston Street, Baltimore, Maryland 21201 (301-383-2759).

Yours Truly,

Joel H. Cooper
Air Management Administration

Enclosure

Maryland State Department of Health and Mental Hygiene
201 West Preston Street
Baltimore, Maryland 21201

(As amended through: December 27, 1982)

10.18.15 Toxic Air Pollutants
.01 Definitions
.02 Control of NESHAP Sources
.03 Control of Asbestos

.01 DEFINITIONS

A. "Asbestos project" means any activity involving the demolition, renovation, or encapsulation of friable asbestos materials.

B. "Demolition" means the wrecking or taking out of any load-supporting structural member and any related removing or stripping of friable asbestos materials.

C. "Encapsulate" means to coat, bind, or resurface walls, ceilings, pipes, or other structures to prevent friable asbestos from becoming airborne.

D. "Friable asbestos material" means any material that contains more than 1 percent asbestos by weight and that can be crumbled, pulverized, or reduced to powder, when dry, by hand pressure.

E. "National Emission Standards for Hazardous Air Pollutants source" (NESHAP source) means any source of mercury, beryllium, vinyl chloride, or asbestos (as defined in 40 CFR §61.21), which is subject to the provisions of 40 CFR Part 61, 1981 edition.

F. "Renovation" means the removal or stripping or friable asbestos materials used on any pipe, duct, boiler, tank, reactor, turbine, furnace, or structural member. Operations in which load-supporting structural members are wrecked or taken out are excluded.

G. "Structural member" means any load-supporting member, such as beams and load-supporting walls, or any non-supporting member, such as ceilings and non-load-supporting walls.

.02 CONTROL OF NESHAP SOURCES

A person may not construct, modify, or operate, or cause to be constructed, modified, or operated any NESHAP source which results or will result in violation of any provisions of 40 CFR Part 61, 1981 edition.

.03 CONTROL OF ASBESTOS

A. Applicability.

(1) This regulation applies to any person engaged in an asbestos project within Maryland.

(2) If a provision of Regulation .03 conflicts with Regulation .02, Regulation .02 takes precedence.

B. Control of Emissions from an Asbestos Project which is a NESHAP Source.

(1) Any Asbestos Project which is a NESHAP Source.

A person engaged in any asbestos project in which more than 260 feet (80 meters) of pipe covered or coated with asbestos materials are stripped or removed, or 160 square feet (15 square meters) of asbestos materials used to cover or coat any duct, boiler, tank, reactor, turbine, or structural member are stripped or removed shall comply with the following:

(a) Caution Signs.

Display 20-inch by 14-inch caution signs wherever airborne asbestos fibers may be present, in accordance with MOSH Regulation 29 CFR 1910.1001.

(b) Surfactant.

Wet asbestos materials to be stripped or removed with a solution containing one fluid ounce of surfactant mixed with five gallons of water. Surfactants containing 50 percent polyoxyethylene ester and 50 percent polyoxyethylene ether or equivalent are acceptable.

(c) Waste Disposal.

(i) Deposit all asbestos wastes, sealing tape, plastic mop heads, sponges, filters, and disposable clothing in clearly labeled containers and seal.

(ii) Wet large structural components containing asbestos material that cannot be placed in containers before loading and cover before transporting to the disposal site.

(iii) Transport and dispose of asbestos waste in a manner to prevent asbestos from becoming airborne. If disposing of asbestos waste within the State, use a landfill or site approved by the Department.

(d) Cleaning and Monitoring.

(i) For buildings or structures which are to be completely demolished: After removing any asbestos materials, clean the work area until no residue of asbestos material is visible.

(ii) For any other asbestos project which is subject to §B(1) above: After removing any asbestos materials, clean all surfaces in the work area using the water and surfactant solution prescribed in §B(1)(b). When the surface has dried, vacuum any remaining dry residue on all surfaces using a vacuum equipped with a high efficiency particulate air (HEPA) filter. Repeat the sequence of wet mopping and vacuuming in 24-hour intervals until no residue is visible and the airborne concentration of asbestos fibers longer than 5 microns is less than 0.1 fibers per cubic centimeter (8-hour time-weighted average).

(iii) For monitoring required by §B(1)(d)(ii) above, use procedures specified in the National Institute for Occupational Safety and Health (NIOSH) Analytical Method #P&CAM 239, Asbestos Fibers in Air, or equivalent.

(e) Enclosing and Sealing Materials.

Plastic sheeting shall be 6 mils thick or equivalent. Tape shall be either duct tape or equivalent waterproof tape.

(2) Demolition.

A person subject to §B(1) and engaged in demolition shall also comply with the following:

(a) Before beginning any demolition project, cover all windows, doors, and other openings with plastic sheeting and seal with tape.

(b) If a structure or building is to be partially demolished, construct a barrier of plastic sheeting sealed with tape to prevent asbestos from entering any portion of the structure or building not to be demolished, and seal ducts, including air conditioning and heat ducts, before wetting and removal.

(c) Wet all components that contain or may contain asbestos before stripping the asbestos or before removing those portions or supports which are to be removed.

(d) Wet the structure and components as necessary to assure that the asbestos materials remains wet during removal, loading, and transportation.

(3) Renovation.

A person subject to §B(1) and engaged in renovation shall also comply with the following:

(a) Before beginning any renovation project, remove all movable objects from the work area and cover all non-movable objects with plastic sheeting taped securely in place. Cover floors, other large areas such as walls, and all windows in the work area with plastic sheeting sealed with tape. Shut down all forced-air ventilation to the work area and seal exhaust and intake ducts.

(b) Construct double barriers of plastic sheeting at all entrances and exits to work area. Construct a decontamination area within the work area to be used for removal of contaminated protective clothing and for storage of contaminated items and tools. Provide a clean room where workers obtain clean protective clothing and respirators before entering the work area.

(c) Wet all areas or surfaces that contain or may contain friable asbestos. Assure that the asbestos-containing materials remain wet during the removal process.

C. Control of Asbestos from any other Asbestos Project.

(1) A person engaged in any other asbestos project not subject to Regulation .03B shall take reasonable precautions to prevent asbestos from becoming airborne.

(a) Wetting any asbestos (except asbestos to be encapsulated);

(b) Taking measures such as sealing the work area and using appropriate work practices to minimize the dispersal of particulate asbestos;

(c) Leaving no visible residue of asbestos after completing the project;

(d) Sealing asbestos waste in an appropriate container; and

(e) Disposing of the asbestos at a site or landfill approved by the Department in a manner that prevents asbestos from becoming airborne.

D. Exemptions.

(1) The Department may, on a case-by-case basis, approve an alternative procedure for control of emissions from an asbestos project provided that the person submits the alternative procedure to the Department in writing and demonstrates to the satisfaction of the Department that compliance with the prescribed procedures is not practical or not feasible, or that the proposed alternative procedure provides equivalent control of asbestos. The Department, following its review, may approve an alternative procedure if it determines that it will minimize the emissions of asbestos into the air.

(2) A person may not be exempt from the requirements of 40 CFR Part 61, 1981 edition except as provided there.

..Maryland State Department of Health and Mental Hygiene

Baltimore, Maryland 21201

(As amended through: December 27, 1982)

10.18.23 License to Remove or Encapsulate Asbestos

.01 Definitions
.02 General Requirement
.03 Request for Determinations of Applicability
.04 Worker Protection Requirement
.05 License Application
.06 Action on an Application
.07 Reprimands, Suspensions, and Revocation
.08 Duration and Renewal of a License
.09 Notification
.10 Records
.11 Health and Safety Training
.12 Penalties

.01 DEFINITIONS

A. "Asbestos project" means any activity involving the demolition, renovation, or encapsulation of friable asbestos materials.

B. "Business entity" means a partnership, firm, association, corporation, sole proprietorship, or other business concern.

C. "Demolition" means the wrecking or taking out of any load-supporting structural member and any related removing or stripping of friable asbestos materials.

D. "Encapsulate" means to coat, bind, or resurface walls, ceilings, pipes, or other structures to prevent friable asbestos from becoming airborne.

E. "Friable asbestos material" means any material that contains more than 1 percent asbestos by weight and that can be crumbled, pulverized, or reduced to powder, when dry, by hand pressure.

F. "License" means any authorization issued by the Department to encapsulate or remove asbestos.

G. "Renovation" means the removal or stripping of friable asbestos materials used on any pipe, duct, boiler, tank, reactor, turbine, furnace, or structural member. Operations in which load-supporting structural members are wrecked or taken out are excluded.

H. "Structural member" means any load-supporting member, such as beams and load-supporting walls; or any non-supporting member, such as ceilings and non-load-supporting walls.

.02 GENERAL REQUIREMENT

A business entity may not engage in any asbestos project unless it is licensed by the Department under this chapter.

.03 REQUEST FOR DETERMINATION OF APPLICABILITY

A. A business entity may request that the Department determine whether a project is an asbestos project subject to this chapter. The Department will make the determination in writing not later than 30 days after it has received a written request describing the asbestos-containing materials, the proposed project, and the business entity.

B. An erroneous determination by the Department that a project is not subject to this chapter only relieves the business entity from the requirements of this chapter to the extent that the Department was provided with the appropriate information to make a correct determination.

.04 WORKER PROTECTION REQUIREMENTS

A. Respiratory Protection Program.

A business entity, before it engages in any asbestos project, shall prepare a written respiratory protection program as defined in MOSH regulation at 29 CFR 1910.134 and make the program available to the Department and workers at the job site.

B. Physical Examination.

The business entity shall ensure that each worker who will be involved in an asbestos project has been examined within the preceding year and has been declared by a physician to be physically capable of working with [while] wearing a respirator.

C. Training.

The business entity shall ensure that each employee or agent of the business entity who will come in contact with asbestos or will be responsible for an asbestos project receives the following training:

(1) An initial course approved by the Department, completed before engaging in any asbestos projects; and

(2) An annual review course approved by the Department.

D. Protective Clothing and Equipment.

The business entity shall provide workers with protective clothing and equipment including the items listed below and ensure that workers involved in any esbestos project use the items:

(1) Disposable clothing, including hair cover, foot covers, and gloves, as appropriate; and

(2) Respirators approved by the National Institute of Occupational Safety and Health (NIOSH), and at a minimum, capable of being qualitatively fit tested using positive and negative methods.

E. No Smoking, Eating, or Drinking.

The business entity shall ensure that there is no smoking, eating or drinking in the work area.

F. Alternative Procedures.

The Department may, on a case-by-case basis, approve an alternative to a worker protection requirement in §§A-E for an asbestos project provided that the business entity submits the alternative procedure to the Department in writing and demonstrates to the satisfaction of the Department that the proposed alternative procedure provides equivalent worker protection.

.05 LICENSE APPLICATION

A. To apply for or to renew a license, a business entity shall:

(1) Submit a completed application to the Department on forms provided by the Department; and

(2) Pay the fee in §B below by certified check made payable to the Department of Health and Mental Hygiene.

B. License Fee.

Number of Employees to be Engaged in Asbestos Projects	License Fee
2 or less	$ 50
3 to 5	$200
6 or more	$300

.06 ACTION ON AN APPLICATION

A. Within 15 work days after receiving an application, the Department will acknowledge receipt of the application and notify the applicant of any deficiency in the application. Within 60 calendar days after receiving a completed application, including all additional information requested by the Department, the Department will issue a license or deny the application.

B. Denial.

(1) The Department will deny an application if it determines that the applicant has not demonstrated the ability to comply fully with applicable requirements, procedures, and standards established by the:

(a) Department in this chapter and in COMAR 10.18.15;

(b) U.S. Environmental Protection Agency in 40 CFR Part 61; and

(c) Maryland Occupational Safety and Health Program in 29 CFR Part 1910.1001 and .134

(2) If the Department denies a license, the Department will return to the applicant the application fee, less $25.

(3) The Department will send the denial of an application by certified mail. The applicant may request a hearing within 10 days after receipt of the certified mail. If it receives a timely request, the Department will hold a hearing in accordance with Article 41, §251 et seq., Annotated Code of Maryland.

C. Conditions and Generic Alternative.

(1) In granting a license, the Department may impose reasonable terms and conditions to ensure continuous compliance with the requirements of this chapter.

(2) In granting a license, the Department may approve an alternative procedure for controlling emissions from a specified type of asbestos project provided that the following conditions are satisfied:

(a) The business entity submits in writing a specific, detailed description of the type of asbestos project and the alternative procedure;

(b) The business entity demonstrates to the satisfaction of the Department that compliance with a procedure prescribed in COMAR 10.18.15.03 is not practical or not feasible or that the proposed alternative procedure provides equivalent control of asbestos; and

(c) The Department determines that compliance with the proposed alternative procedure will minimize the emission of asbestos in the air.

.07 REPRIMANDS, SUSPENSIONS, AND REVOCATION

As provided in Sections §§6-415 and 6-416 of the Health-Environmental Article, Annotated Code of Maryland, and subject to applicable hearing requirements, the Department may reprimand any licensee or revoke or suspend any license.

.08 DURATION AND RENEWAL OF A LICENSE

A. Unless the Department revokes or suspends a license, the license shall remain in effect for 1 year from the date of issuance.

B. The Department may renew a license annually if the business entity:

(1) Submits a completed application for a renewal on forms provided by the Department no sooner than 90 days and no later than 30 days before the license expires;

(2) Pays to the Department by certified check a renewal application fee as specified in Regulation .05B; and

(3) Has complied fully with all applicable requirements.

.09 NOTIFICATION

A. NESHAP Sources.

A person who intends to engage in an asbestos project which is a NESHAP source shall notify the Department in accordance with the requirements of 40 CFR Part 61, 1984 edition.

B. All Other Asbestos Projects.

After obtaining or renewing a license, a business entity shall notify the Department at least 3 days before beginning each of its first two planned asbestos projects. A business entity shall notify the Department of additional asbestos projects upon request by the Department.

.10 RECORDS

A. Eached licensed business entity shall maintain records of all asbestos projects which it performs, and shall make these records available to the Department upon request. The business entity shall retain the records for at least 6 years.

B. The business entity shall record the following information for each project:

(1) Name and address of supervisor responsible for the project;

(2) The location and description of the project, and the estimated amount of asbestos removed or estimated area encapsulated at each project;

(3) Starting and completion dates;

(4) Summary of the procedures used to comply with applicable requirements; and

(5) Name and address of the waste disposal site where the asbestos waste was deposited.

.11 HEALTH AND SAFETY TRAINING

A. Application for Approval of a Training Course.

A person may apply for approval of a course on the health and safety aspects of asbestos demolition, renovation, and encapsulation for purposes of Regulation .04C by submitting a written application on forms provided by the Department.

B. Criteria for Initial Course.

In order to obtain or retain Department approval, a person sponsoring a course shall substantially satisfy the following criteria:

(1) Provide at least 5 hours of instruction on the following topics:

(a) Recognition of asbestos, including its physical characteristics and uses;

(b) Health hazards, including the relationship between asbestos exposure, smoking, and diseases;

(c) Worker protection, including respiratory protection, protective clothing, safety equipment, air monitoring, medical surveillance, and personal hygiene;

(d) Work practices, including area preparation, decontamination, and waste disposal;

(e) A detailed description of respirators and their use and care, including the degree of protection afforded, fitting and testing procedures, and maintenance and cleaning;

(f) Requirements, procedures, and standards established by the:

(i) U.S. Environmental Protection Agency at 40 CFR Part 61, Subparts A and B,

(ii) Maryland Occupational Safety and Health Program at 29 CFR Part 1910.134, and

(iii) Department in this chapter and in COMAR 10.18.15

(2) Provide each student at least 15 minutes of individual instruction consisting of individual respirator fit tests and an opportunity to use respirators.

(3) Ensure that instruction is given or supervised by:

(a) An industrial hygienist who is at least Core certified by the American Board of Industrial Hygiene; or

(b) An individual with equivalent education and experience as determined by the Department.

(4) Maintain lists of students trained and the dates on which training occurred, and make this information available to the Department upon request.

(5) Provide an opportunity for students to complete written course evaluations.

(6) Issue to each student who completes the course a certification of attendance containing information required by the Department.

C. Criteria for Review Course.

In order to obtain or retain Departmental approval, a person sponsoring a review course shall provide at least 2 hours of instruction adequately addressing the topics in §B(1) and shall substantially satisfy the criteria in §B(2)-(6).

D. Action on an Application for Course Approval.

(1) The Department will acknowledge receipt of an application within 10 working days after receiving the application.

(2) The Department will act on an application within 90 days after it is complete.

(3) The Department will approve a course if the Department determines the course substantially satisfies or will substantially satisfy the criteria in §B or C.

.12 PENALTIES

A person who violates any provision of this chapter or any regulation in this chapter is liable to the criminal or civil penalties under the Health-Environmental Article, §6-422, Annotated Code of Maryland.

REMARKS

AD-69 (R-10-84) N.J. DEPARTMENT OF LABOR

RECEIVED FEB 04 1985

P. L. 1984, CHAPTER 173, *approved October 31, 1984*

1984 Assembly No. 1820 (*Official Copy Reprint*)

AN ACT concerning the application, removal, and encapsulation of asbestos, and making an appropriation.

BE IT ENACTED *by the Senate and General Assembly of the State of New Jersey:*

1. The Legislature finds that the application, **enclosure,** removal and encapsulation of asbestos when improperly performed creates unnecessary health and safety hazards which are detrimental to the State's interest, and that of its citizens, in terms of wage loss, insurance, medical expenses, disability compensation payments, family life, preservation of human resources and unfair competition to craftspersons, their unions and their employers.

2. The Legislature declares it to be its purpose and policy to reduce asbestos-related hazards by:

a. Encouraging contracting parties, citizens and insurance companies in their efforts to reduce disabling asbestos hazards and to stimulate initiation of new and to perfect existing programs for controlling the application, use and removal of asbestos, an extremely dangerous substance;

b. Creating a climate for developing innovative methods, techniques and approaches for dealing with life-destroying asbestos materials;

c. Encouraging competence, knowledge and reduced exposure to asbestos through the licensing of contractors and workers;

d. Providing for the adoption of standards for the application,

EXPLANATION—Matter enclosed in bold-faced brackets [thus] in the above bill is not enacted and is intended to be omitted in the law.

Matter printed in italics thus is new matter.

Matter enclosed in asterisks or stars has been adopted as follows:

*—Assembly Amendments adopted in accordance with Governor's recommendations September 20, 1984.

RECEIVED FEB 04 1985

OSB/JUDICIAL

enclosure, removal, encapsulation, storage, sale, disposal and use of asbestos and asbestos-containing material; and

e. Establishing an enforcement program for these standards, which shall include reporting procedures.

3. As used in this act:

a. "Asbestos" means the asbestiform varieties of chrysotile (serpentine); crocidolite (riebeckite); amosite (cummingtonite-grunerite); anthophyllite; tremolite; and actinolite;

b. "Asbestos-containing material" means any material which contains more than 1% asbestos by weight;

[c. "Commissioner" means the Commissioner of Labor, or his designee;]

[d.] *c.* "Employee" means any person suffered or permitted to work by an employer;

[e.] *d.* "Employer" means a body, board, person, corporation, partnership, proprietorship, joint venture, fund, authority or similar entity employing, permitting or suffering another to work. This term shall apply to private employers and to the State, its political subdivisions and any boards, commissions, schools, institutions or authorities created or recognized thereby*[;*

f. "Journeyman" means a person who has served a four-year apprenticeship in the asbestos and frost-worker field].

4. Any private or public agency letting contracts for application, *enclosure,* removal or encapsulation of asbestos shall include in these contracts specifications that these contracts are to be performed by contractors and subcontractors licensed by the *[commissioner]* *Commissioner of Labor*.

5. No employer shall either directly or indirectly perform any of the functions of application, *enclosure,* removal, or encapsulation of asbestos without first obtaining a license from the *[commissioner]* *Commissioner of Labor*. This license shall be in writing, shall be dated when issued, shall contain an expiration date, and shall be signed by the commissioner. It shall give the name and address of the employer to whom it is issued. Licensed employers shall post a sign indicating, in letters more than four inches in height, "LICENSED BY THE STATE OF NEW JERSEY FOR ASBESTOS WORK," readily visible outdoors at the work site. The actual license shall be readily available at the work site for inspection by reprsentatives of the *[commissioner]* *Commissioners of Labor and Health* and the contracting agency.

6. Every employee, performing functions of application, *enclosure,* removal, or encapsulation of asbestos shall first procure from the *[commissioner]* *Commissioner of Labor* a perfor-

mance permit. *No permit shall be issued unless the employee has taken a course of training in asbestos control and removal, passed an examination thereon, and demonstrated the ability to perform asbestos control and removal safely, in accordance with the current state-of-the-art technology. The Commissioner of Health shall certify the course of training necessary.* This permit shall be in writing, shall be dated when issued, shall contain an expiration date, and shall be signed by the *[commissioner]*. **Commissioner of Labor*. It shall give the name and address of the employee to whom it is issued. The permit shall be carried upon the worker's person and be readily available for inspection by representatives of the *[commissioner]* **Commissioners of Labor and Health** and the contracting agency.

7. Beginning not later than one year following the effective date of this act, licenses and permits shall be issued by the *[commissioner]* **Commissioner of Labor*, or his designee, and shall be valid for at least 12 months, in accordance with regulations promulgated under provisions of the "Administrative Procedure Act," P. L. 1968, c. 410 (C. 52:14B-1 et seq.). Fees for these licenses shall not exceed, for a 12-month period, $100.00 for a license and $25.00 for a permit, in accordance with a fee schedule contained in the regulations.

8. Not later than six months after the effective date of this act, the *[commissioner]* **Commissioners of Labor and Health jointly** shall, in consultation with the *[Commissioner of Health, and the]* Commissioner of Environmental Protection, adopt all standards and regulations which *[he deems]* **they deem* necessary for the proper administration and enforcement of this act. These standards and regulations shall include, but shall not be limited to, protective equipment specifications; application, **enclosure,* removal, and encapsulation procedures; administrative penalties; waste disposal; self-monitoring; cleanup; health checkup; license and permit issuance and revocation; fee charges; experience necessary for license or permit qualification; general subject matter of qualifying examinations; and continuing education. License and permit qualification standards shall include provision for *[asbestos and frost-worker foremen and journeymen, with at least one year in journeyman status at the effective date of this act,]* **experienced asbestos workers** to apply for and receive a permit without examination for a period not in excess of one year from the effective date of this act.

9. This act, and its standards and regulations, shall be enforced by the *[commissioner]* **Commissioners of Labor and Health*,

who *[has]* *have* the right-of-entry to all pertinent premises and records for purposes of inspection and information. In the event *[the]* *that either* commissioner believes that an imminent hazard exists, he is empowered to apply to a court of competent jurisdiction to restrain and cause to cease the activity which is the cause of the hazard.

10. Any person who hinders or delays the *[commissioner]* *Commissioner of Labor or Health*, or *[his]* *the* authorized representative *thereof*, in the performance of *[his duties in enforcing]* *the duty to enforce* this act, or fails to obtain licenses or permits required by the provisions of this act, or refuses to make these licenses or permits accessible to *[the]* *either* commissioner, or *[his]* *the* authorized representative *thereof*, or otherwise violates any provision of this act or any regulation adopted under this act, is guilty of a disorderly persons offense and liable to a fine of $1,000.00 or imprisonment not in excess of six months, or both. As an alternative, or in addition to, the fines and imprisonment specified by this section, *[the]* *either* commissioner, or *[his]* *the* designee *thereof* may impose, after granting an opportunity to be heard, an administrative penalty, not to exceed $1,000.00 for each offense, in accordance with a schedule promulgated by regulation.

11. Any employer who discriminates against or otherwise sanctions an employee who complains or cooperates with the *[commissioner]* *Commissioner of Labor or Health*, or *[his]* *the* designee *thereof*, in administering this act is a disorderly person and upon conviction is subject to the penalties specified in section 10 of this act.

12. There is appropriated *[the sum of $75,000.00]* from the General Fund *$75,000.00* to the Department of Labor *and $75,000.00 to the Department of Health* for the first-year administration of this act.

13. This act shall take effect immediately.

January 18, 1984

MEMORANDUM

To: HESS Committee members

From: Nancy Bennett, Committee staff

Re: Asbestos history/Alaska information

IN YOUR FOLDER:

A copy of SSHB 5, asbestos health hazard enabling legislation, and HB 57, the companion appropriation bill.

A section analysis of SSHB 5 and memorandum from DOTPF on the costs of inspecting state buildings for asbestos.

School district information on asbestos.

Relevant periodical and newspaper articles.

Information from the EPA/Alaska specific.

Alaska Health Project asbestos packet.

Packet of materials from the Association of General Contractors

ALASKA SCHOOLS INFORMATION:

The EPA has estimated from their Alaskan survey that only half of the school districts have inspected their facilities for asbestos, leaving approximately 220 buildings for review. By regulation, all schools in the USA were to be tested by June 30, 1983, parents and school boards were to be notified of the findings, school employees were to be instructed on minimization of health risks and records were to be maintained on testing and notification.

District needs in Alaska for asbestos abatement:

Kodiak	$ 1,138,507	
Petersburg	107,000	
Delta Greely	99,700	
Cordova	120,000	
Nenana	15,000	
Anchorage	11,000,000	(Phase II)
Skagway	25,000	
Kuspuk	5,296	
Mat-Su	105,959	
Juneau	300,000	(expended, estimate the possiblility of several million)

Ketchikan (unknown, estimates the possiblity of several million)

HISTORY

Following World War II, asbestos was widely recognized as a miracle fiber - it was an excellent insulator and would not burn - and was therefore widely used in construction during the "Baby Boom" period.

Asbestos was known to be dangerous long before Congressional hearings in the late 1970's, when the Johns-Manville Corporation admitted to paying physicians to down-play the health hazards. Most early reported cases were among pipefitters and shipyard workers who faced heavy exposure in the workplace, but it was soon discovered that family members and people living in close proximity to factories were also affected. Asbestos is an inert material which cannot be removed from the body, and although the symptoms of asbestosis and mesothelioma often take decades to surface, the diseases are always fatal.

Congressional action in 1980 aimed at the removal of asbestos from schools was prompted by the increased susceptibility of children to asbestos because of their higher activity level and elevated respiration.

In 1984, the EPA began applying sanctions to individual school districts for non-compliance, rewrote their regulations for demolition and renovations with asbestos products and have more recently been receiving public pressure to take a more aggressive stance on asbestos in schools. Many speculate that the regulations were designed to bring pressure on states to fund asbestos removal by public notification, placing districts in the precarious position of raising concern about an issue they are unable to address financially. The $172 million authorized by the Asbestos Health Hazard Detection and Control Act of 1980 was never appropriated, although the federal government has made limited funds available in some schools on federal land.

A flurry of lawsuits filed in the last few years against manufacturers, contractors and school districts has pointed out confusion over the issue of liability. In addition, resource limitations of the EPA (they have .1 staff working on asbestos in Alaska) have created difficulty for rural schools districts to receive the type of assistance needed in this technical area

ALASKA CHAPTER

ASSOCIATED GENERAL CONTRACTORS OF AMERICA, INC.

Position Statement

on legislation establishing

AN ASBESTOS HEALTH HAZARD ABATEMENT PROGRAM

CSSS HB 5 (FIN)am

APRIL 3, 1985

POSITION PAPER ON CSSS HB 5

The Alaska Chapter, Associated General Contractors of America, Inc. (A.G.C.) represents more than 900 companies, including most of the general contracting companies engaged in Alaska's commercial construction. We appreciate the opportunity to comment on CSSS HB 5 (FIN)am.

The A.G.C. agrees with the intension of this bill - the abatement of asbestos health hazards. Many A.G.C. contractors are or have been involved in this very important safety effort. There is, however, a section of the bill that unnecessarily duplicates existing safety regulations and should, therefore, be deleted.

Before continuing it may be worth noting that the term certification is semantically incorrect. The correct term for government approval or permission is license. Webster's New World Dictionary defines license as; formal permission to do something; especially authorization by law to do some specified thing.

Specifically, we draw your attention to Page 5, Section 18.28.030, Certification Programs. In this section, the Department of Labor is given authority to license contractors and employees who intend to conduct asbestos abatement.

What the bill essentially requires is a State license to do asbestos work. But is there a need for such a license? We think not.

Another serious concern that needs to be addressed is that of liability. Asbestos work is plagued with lawsuits. Through the proposed Department of Labor licensing program, the State may become party to these suits by licensing contractors, employees and labor organizations as competent to undertake this work, the State may have liability if an employer or employee is licensed improperly. We suggest an opinion from the attorney general's office be obtained prior to passage of this bill from committee.

Finally, in examining the fiscal requirements of this proposed licensing program, it appears that millions of dollars would be needed for its administration, rather than the proposed $300,000. It is virtually impossible to competently administer the proposals contained in HB 5 for $300,000. We suggest that an inadequately administered program is worse than no program at all. A realistic fiscal note must be developed so that lawmakers may assess the true costs of proposed legislation.

We believe once the true cost of this program is known, the question will arise: What does a licensing program provide that is not already enforceable under existing DOSH general safety code regulations? The answer is "nothing". Sufficient asbestos health standards already exist, including requirements for employer training and proper respirator usage.

In conclusion, we request this committee to thoroughly determine the fiscal costs of the proposed legislation, including potential State liability and to balance the cost against the benefits received. A.G.C. contends that for the licensing program, the dollar cost will be high and without significant benefits due to the existence of sufficient asbestos health standards presently exist.

We strongly urge the deletion of the licensing section of CSSS HB 5.

FISCAL NOTE

THE LEGISLATURE OF THE STATE OF ALASKA
FOURTEENTH LEGISLATURE
BILL/RESOLUTION NO: CS SS for HB 5 (House Labor and Commerce Committee)
TITLE: "An Act relating to establishing asbestos health hazard abatement"
AGENCY AFFECTED: Department of Labor

There are approximately 550 school buildings in Alaska. Of these buildings we know that 140 buildings have been surveyed for asbestos. This is based on information from the U.S. Environmental Protection Agency (EPA), that they have made on-site inspections for compliance with their regulations in the Juneau, Anchorage, Fairbanks, Ketchikan, Sitka and Kodiak school districts. These school districts contain approximately 140 buildings. We are estimating that of the pproximately 410 other school buildings, that a third have been properly surveyed or a school district will use a private consultant to survey their buildings. We estimate therefore, that the department will be required to make physical inspections of approximately 270 buildings that have either not been surveyed or have been improperly surveyed.

It is important that these school districts survey their buildings within two years to allow them time to budget and plan for the work necessary to abate the asbestos health hazards in their school districts.

It is assumed that the responsibility for training and certification outlined in AS 18.38.030 of CS SS HB 5 (L&C) will mainly be with the employer and that the department will only be responsible for establishing training guidelines and certifying training programs.

A lead industrial hygienist, a clerk typist and monies to enter into a contract for surveying and abatement evaluation will be needed for the first year. To assure that the program is implemented without delay, we would need to hire the industrial hygienist and clerk on July 1, 1985. We estimate that it will take two months to set up the schedule for surveying schools and three months to develop the regulations and guidelines for the certification program. Because of difficulties we anticipate in hiring a full-time position for only 10 months, we would enter into a contract by September with two other health specialists to perform the majority of the surveys. It is estimated that by the end of the first year, we would survey and evaluate potential health hazards in approximately 220 of the 270 school buildings yet to be surveyed. In the first year of operation the one time special costs would include:

- Sampling Pumps (3)	$6,000.00
- Training Films/Slides	$4,000.00
- Air Supplied Respirators (3)	$3,000.00
- Protective Clothing (3)	$3,000.00
- Contract for Two Health Specialists	$110,000.00
- Contract to Analyze the Bulk Asbestos Samples (5 per buildings)	$38,500.00

During the second year only the hygienist and clerk would be maintained to monitor the completion of the program and to continue the certification program. These positions will also be retained in FY 88, 89, and 90 to certify, evaluate, and monitor the training programs of contractors who work with asbestos. It is assumed in FY's 88-90 that personal services costs will increase by 3.5% per year and non-personal services will increase by 6% per year.

I Causes of death among 17,800 insulators (1). Estimated exposure approximately 15 fibers/ml. of mostly chrysotile and some amosite throughout working life. Note that almost 10% of deaths were due to asbestosis, but that the major problem is cancer.

TABLE 1 DEATHS AMONG 17,800 ASBESTOS INSULATION WORKERS IN THE UNITED STATES AND CANADA, JANUARY 1, 1967 TO DECEMBER 31, 1976*

Underlying Cause of Death	Expected†	Observed (BE)	Observed (DC)	Ratio, Observed/Expected (BE)	Ratio, Observed/Expected (DC)

†Expected deaths are based upon white male age-specific U S death rates of the U S National Center for Health Statistics, 1967-1976

‡Rates are not available, but these have been rare causes of death in the general population

(BE) Best evidence Number of deaths categorized after review of best available information (autopsy, surgical, call)

(DC) Number of deaths as recorded from death certificate information only

II Concept of mesothelioma as a "signal" tumor (2). When mesothelioma occurs in the United States, the cause is likely to be past asbestos exposure until proven otherwise. But note that mesothelioma is frequently mis-diagnosed, especially the peritoneal (abdominal) variety, and hence under-reported. Mesothelioma may occur with minimal exposure (bystanders, household contacts, neighborhood cases).

III Lung cancer numerically the most important problem. This burden falls mainly on cigarette smokers (3). Risk of lung cancer among cigarette smoking insulators approximately 53 times risk of non-smoking U.S. white males. However, risk is elevated among non-smoking and ex-smoking insulators as well.

IV Latency Period. Crucial concept for understanding asbestos-related diseases. Note that only a few deaths of lung cancer, mesothelioma, and the other asbestos-related diseases occur prior to 20 years from the time of first exposure (4). However, the duration of exposure need not be long (a few days for mesotheliomas, a few weeks, perhaps, for lung cancer - the lower limits are not entirely known). Note that if exposure begins early, cancers will occur in young adulthood or middle age.

(DC): Number of deaths as recorded from death certificate information only.

V Dose-Response Relationship. Extremely complex subject. All data available are compatible with a linear dose-risk relationship with a levelling-off, or "saturation", of risk at higher levels. The corollary of this is: no known zero-risk exposure level (5).

VI Medical Surveillance of People Exposed to Asbestos. Contents of such a program determined by objective:

A. Objective: to determine whether asbestos exposure has been sufficient in a given population to cause disease. For this objective, medical data are a useful adjunct to dust measurements, engineering specifications and information concerning work practices. Unique advantage of medical data: dust levels in the past cannot be known if no measurements were done, but the human body acts as an "integrator" of exposure over the years. Most useful medical tools here would be chest X-ray, medical history, occupational history and search for mesothelioma deaths among people with sufficient latency period (20 years or more since first exposure).

B. Objective: Minimization of disease among those known to have been exposed and known to be at risk. This objective essentially calls for secondary prevention of disease, early detection, and aggressive treatment of early lesions, especially cancer.

VII Elements of the Port Allegany Asbestos Health Program

A. Establishment of a computerized registry of all those at risk: workers and their household contacts.

1. Maintenance of the registry (address changes, name changes, etc.)

B. Establishment of intensive medical surveillance tailored to each person's degree of risk (cigarette smoking, latency very important). Utilization of standard cancer-detection tests: chest X-rays, sputum cytology, stool blood, examination of mouth, tongue and throat, etc.

C. Health education for those at risk. Necessary to provide a balanced view of the risks; useful in promoting compliance with program, calming unwarranted fears, and promoting good health behavior.

D. Smoking cessation assistance. A powerful intervention.

E. Continuing education for local medical providers concerning asbestos-related diseases.

F. Adjunct measures: influenza and pneumonia vaccines.

G. Review and evaluation.

I. ASBESTOS--ITS TYPES, ORIGIN, AND CHARACTERISTICS

Asbestos is a name given to a number of naturally-occurring fibrous silicates, the word asbestos being derived from the Greek word similarly spelled, meaning inextinguishable. There are two main varieties of asbestos; the serpentine form, which is characterized by long, soft, flexible, and finely-polished strands, which may be woven into a cloth, of which chrysotile is the primary representative, and the amphiboles, which occur as straight, needle-like fibers, of which crocidolite, amosite, and anthophyllite, tremolite, and actinolite are the primary examples.

Chrysotile makes up approximately 70% of the world production of asbestos and is mined primarily in Quebec, Canada, which produces 95% of the world production of chrysotile. Chrysotile is also produced in Vermont, the Union of South Africa, Russia, and to a lesser extent, in certain parts of Europe. Its unique characteristic is the fact that the long, white, silky fibers can be woven into cloth, whereas the other types of asbestos do not have this capability. All types of asbestos have the outstanding characteristics of being almost indestructible on exposure to body fluids, highly resistant to heat, and extremely resistant to acid erosion. Chrysotile is especially resistant to heat, being able to withstand 500 degrees centigrade, but is less resistant to acid erosion, and in bodily tissues, for example, the magnesium gradually tends to be leached out over many years.

Crocidolite is blue asbestos is produced primarily in the Cape of South Africa, especially since 1910, and makes up approximately 3.5% of the world production of asbestos. It is more acid resistant and hence is used often in marine insulation and aboard ship, is less resistant to heat, being able to withstand only 200 degrees Centigrade. Its needle-like morphology enable it to penetrate further and deeper than the other types of asbestos in body tissues.

Amosite is produced largely in Transvaal South Africa, primarily since 1907; and has somewhat coarser brownish fibers which have the outstanding characteristic of being more acid-resistant and hence is used primarily in marine insulation and shipbuilding. It was also widely used in pipe and boiler lagging in buildings.

Anthophyllite is mined predominatly in Finland, is the coarsest of the asbestos silicates, is less heat resistant, being able to withstand only 200 degrees Centigrade, and has an inherent tensile strength much less than crocidolite. It is not flexible, and is used primarily in the chemical industry. Its exposure is associated with greater incidence of pleural plaques and rarely, if ever, is mesothelioma seen in men exposed to this type of asbestos. Anthophyllite makes up less than 1% of world usage of asbestos. It is only rarely found in building insulation.

The other two little-used types of asbestos are tremolite and actinolite. Tremolite is a more brittle asbestos, has a fairly good heat resistance, and it, as well as actinolite make up each less than 1% of world asbestos production. Actinolite is rarely used, although it is very acid and heat resistant. Tremolite has been found in some talc mines causing asbestos contamination of certain talc products.

Table 1. Varieties of asbestos[1]

Variety	Colour	Major components (%)			Approximate formulae
		Si	Mg	Fe	
Chrysotile	white	40	38	2	$3MgO.2SiO_2.2H_2O$
Amphiboles					
Amosite	grey brown	60	2	40	$5.5FeO.1.5MgO.8SiO_2.H_2O$
Anthophyllite	white	58	29	6	$7MgO.8SiO_2.H_2O$
Crocidolite	blue	50	–	40	$Na_2O.Fe_2O_3.3FeO.8SiO_2.H_2O$
Tremolite	white	55	15	2	$2CaO.5MgO.8SiO_2.H_2O$
Actinolite	white				$2CaO.4MgO.FeO.8SiO_2.H_2O$

II. THE USES OF ASBESTOS

The United States used over 5 million tons of asbestos yearly in 1974, most of which came from the Quebec mines. Most was used for fire-proofing and insulating materials, especially in the construction industry where it was incorporated into cements, tiles, felts, and garments. In the textile industry, uses are fire-proof draperies and floor tiles, the former as used on theater curtains, asbestos sheets, and in the use of asbestos building boards. Plasterers applied an asbestos mix on steel foundations in order to prevent the steel from buckling in case of fire; this asbestos mix hardened within 8 hours without cracking or shrinking and without interrupting other construction activities. Boats and ships were similarly treated. Formerly, over 3 million pounds of fire-proofing mixture, which contains 30% chrysotile asbestos were used annually, and when sprayed, approximately 25% of the material goes directly into the air rather than being applied to building surfaces, and hence, workers may inhale as much as 50 million fibers in an eight-hour day. For this reason the use of a wet mixture of asbestos applied by trowelling was the preferred method of application. The practice of spraying asbestos-containing insulation in buildings was banned by the EPA in the 70s. In 1982, the United States used less than one-half million tons of asbestos, a significant decrease from the 1974 level referred to above.

Asbestos products resist heat and withstand abrasive forces. Chrysotile makes up 50% of the brake-lining material in brakes, and hence, workers exposed to this use of asbestos in repairing brake linings, are exposed to asbestos dust themselves. If not properly controlled, clouds of the asbestos dust appear in the air in this and other circumstances. Asbestos is also used in certain papers, paints, and plastics, where the positives charge of the chrysotile combines with the filler in pigment to form a more durable product. Similar friction products are used on

railroad cars, airplanes, and industrial machinery. The ship-building industry has been a major user of asbestos because the substance is good for insulating boilers, steam pipes, hot water pipes, nuclear reactors in ships, both in initial fitting and in repairs and refittings. Various sealants and patching tape compounds contain asbestos, and both floor and ceiling insulating tiles in the past often used asbestos.

It is apparent, therefore, that a large number of workers are exposed to asbestos; indeed, somewhere between 18 and 11 million U.S. workmen have been exposed to asbstos dusts during their lifetime in the past 40 years, including approximately 4½ million shipyard workers, 300,000 textile workers, 100,000 insulation workers, and perhaps another 3 to 5 million workers who handle asbestos at some course during its manufacture. It is apparent that individuals exposed include those who mine the asbestos, those who work in the mills in which asbestos is crushed, and those who manufacture the asbestos products-are all at risk in varying degrees. Those who load and truck the asbestos ore as in using it for rock filler on roads, as is the case in at least one area in Maryland are at risk, as well as the people who drive on this particular road. Carpenters are exposed when they cut asbestos board, or when they work in the presences of insulators or other workers working with the asbestos products themselves. Any worker aboard ship or working in shipyards is similarly exposed to asbestos dust, and indeed even families of workers who work in the vicinity of a shipyard or mine are at similar risk, including the families, for example, of shipyard workers, where asbestos dust may be brought home on the clothes of the workers, if proper precautions are not taken. The demolition of buildings containing old asbestos exposes such workers, as well as passers-by, to varying degrees of exposure to the asbestos dust. During the past 15 years it has become increasingly apparent that indirect family exposure, workers and family living near a mine, mill, or shipyard, represent a secondary risk not

previously appreciated. It has been demonstrated beyond a doubt that a period of time as short as one month's exposure to asbestos dust results in a significant risk to the individual from asbestos-associated diseases.

III. FATE AND BIOLOGIC EFFECTS OF INHALED ASBESTOS PARTICLES

It has been shown that the aerodynamic behavior of asbestos particles is a function primarily of the diameter of the fiber. It has been shown that fibers larger than 5 microns in diameter are precipitated out primarily in the nose and bronchi or upper parts of the bronchial tree, while fibers between 1 and 5 microns are capable of descending into the lower portions of the bronchial tree into the respiratory bronchioles. Only fibers less than 1 micron in diameter are capable of entering the air spaces or alveoli, where they may more readily penetrate the lung tissue. It is also apparent with asbestosis that gravity must play a part in the deposition of asbestos particles, as lung scarring is more prominent in the lower lung field suggesting that the weight of the particles tends to allow them to be deposited in the lower lung fields primarily. Once the asbestos fibers enter lung tissue approximately 25% of them become coated or walled off by macrophages, the scavengers of the lung, which try to wall off foreign particles to prevent tissue injury. At least 75% of the smaller fibers are not similarly walled off and remain uncoated and more difficult to see by usual light microscopy, and can only be seen with the higher magnification of electron microscopy.

The coated asbestos fibers, are called asbestos bodies, may be seen by regular light microscopy. These asbestos bodies are probably better called ferruginous bodies, as it has been demonstrated that other foreign particulates in the lung, primarily talc and probably zeolite, as found in certain towns in Turkish Anatolia, also have the capability of forming a similar-appearing coated fiber. The ferrugionous body is a long, beaded, rod-shaped particle of asbestos or talc having clubbed ends, staining darkly with iron stain and very easily picked up, when present, by the light microscope. This coating contains ferritin or iron granules

with some amorphous material of up to 5 microns in diameter, the latter apparently representing the breakdown process of macrophages and containing acid mucopolysaccharide with hemosiderin content. In most instances, however, the ferruginous body is diagnostic of asbestos exposure, while the presence of uncoated asbestos fibers can be confirmed by electron microscopy when necessary, by lung tissue obtained by either open lung biopsy, needle biopsy, or transbronchial biopsy. It is theorized that the physical characteristics of each asbestos fiber plays a distinct part in the type of disease produced in man.

IV. CELLULAR EFFECTS OF ASBESTOS

Once the asbestos fibril has penetrated lung tissue, local irritation there causes increased permeability of cellular membranes and as a result of this over a long period of time the particles are surrounded by macrophages, some chemical leaching or digestion of the magnesium, especially in chrysotile, occurs, macrophage death occurs, and fibrosis or scarring of the lung is stimulated in an effort to wall off these particles and prevent further lung damage. Chrysotile is probably the most potent in causing asbestosis than are the other types of asbestos. It is probable that the degree of the reaction is definitely related to the number of fibers inhaled into the lung as well as the individual's inherent biologic susceptibility or reactivity. It has been shown that both the total years of exposure, the dustiness of the job account for the cumulative dust exposure, and that these exposures are directly related to patient's symptoms, lung function tests, x-ray changes, the development of lung cancer, as well as mortality statistics. It is apparent, however, that mesothelioma needs much less exposure to the asbestos dust than the other diseases associated with asbestos.

In analyzing the presence of coated and uncoated fibers in the lung, it has been demonstrated that in carefully conducted studies almost 98% of all urban dwellers have asbestos fibrils or bodies in their lungs, this being in a higher percentage of men, in a greater number of older people, and in a greater percentage of individuals who work with shipping or docking areas or in industrial sites. The longer one lives in an urban area the higher the percentage and the greater the number of asbestos fibrils and ferruginous bodies have been found. Interestingly, ferruginous bodies are rarely found in the hilar lymph nodes or beyond the lung itself.

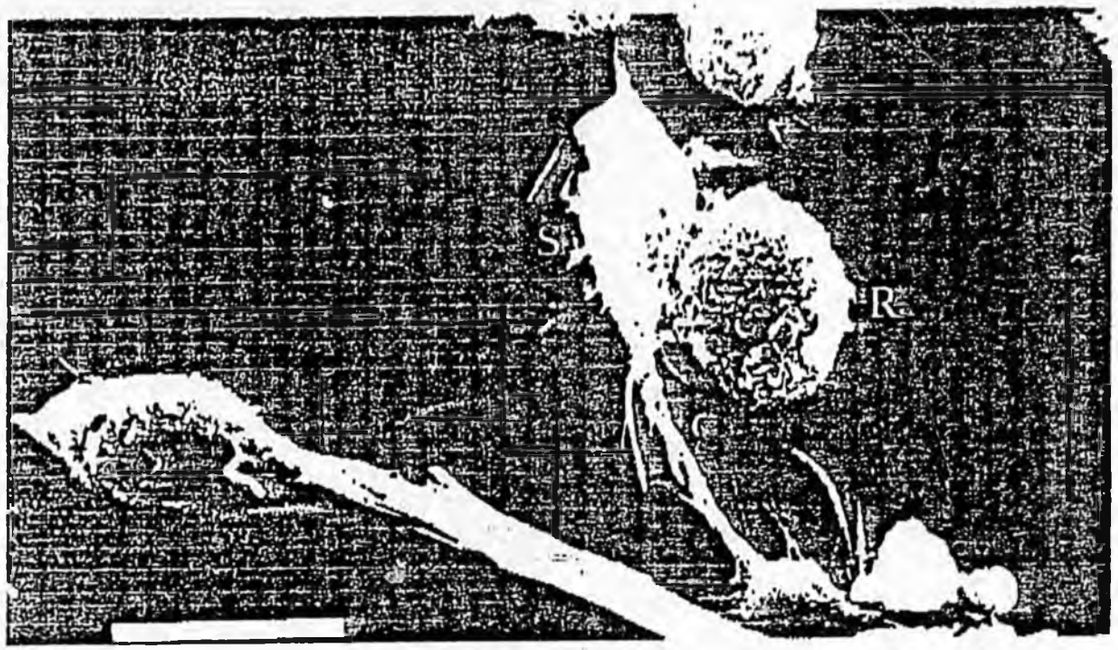

FIGURE 6. Scanning electron micrograph of untreated UICC chrysotile asbestos fibers associated with bovine alveolar macrophages: cells(S) were often observed spread along asbestos fibers with additional rounded macrophages (R) nearby (1940 x , bar = 10 μm).

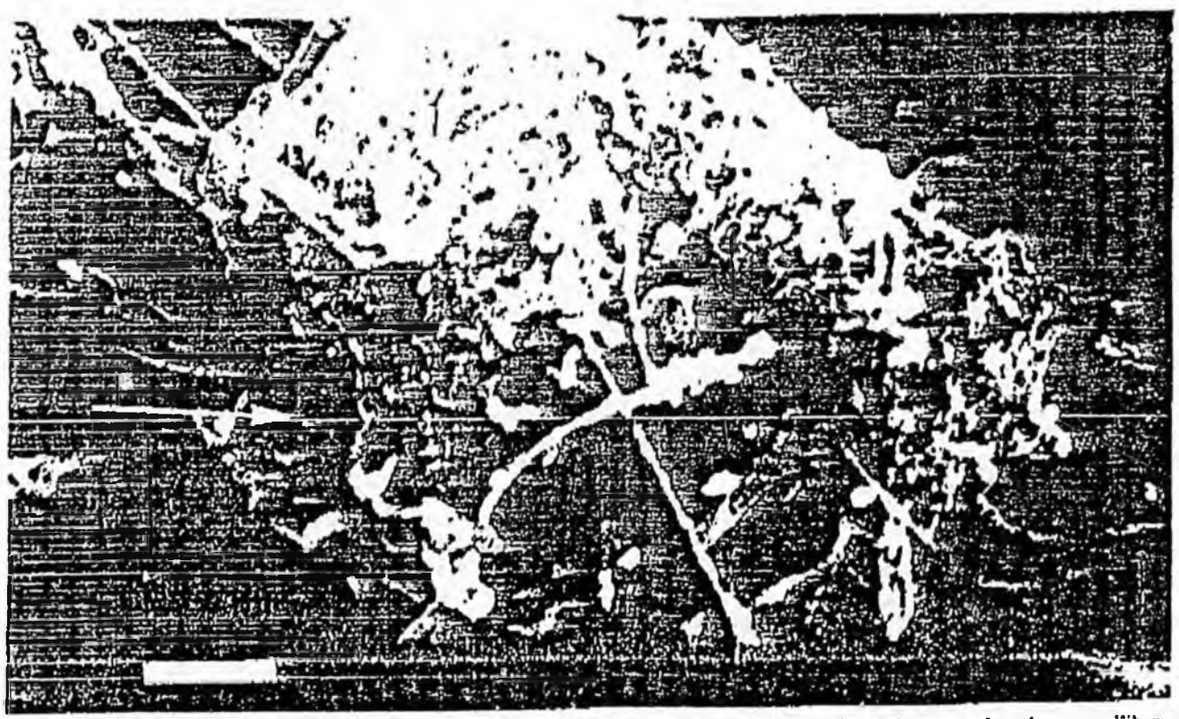

FIGURE 7. Some macrophages appeared mottled with numerous holes and a loss of typical membrane surface features. Fibers, previously X-ray irradiated, are visible (arrow) on such cells (9,700 x , bar = 1 μm).

Micrographs reprinted from: R. Valentine, et. al., "Thermal Modification of Chrysotile Asbestos: Evidence for Decreased Cytotoxicity". Environmental Health Perspectives. Vol. 51, September 1983.

V. ASBESTOS INDUCED OR ASSOCIATED DISEASES

There are six general areas of human disease caused by or at least strongly associated with exposure to asbestos dust. Most important, certainly historically, is that of diffuse interstitial pulmonary fibrosis or asbestosis. In previous years before adequate control of asbestos dust in the air was obtained, approximately 20%, or 1 out of 5 miners, would develop significant pulmonary fibrosis with the characteristic gradually progressive exertional dyspnea or shortness of breath, characteristic of this entity. With better precautions used in the handling of asbestos during more recent years, it is already noted that perhaps up to only 10% or 1 out of 10 miners have been afflicted with interstitial fibrosis of the lungs. Chest x-rays made over the years in a group of asbestos insulation workers have shown a gradually increasing number of abnormal chest x-rays with the passage of time, there being approximately 10% abnormal within 10 years, 44% abnormal within 20 years, 73% abnormal within 30 years, 87% abnormal within 40 years, and practically 94% of all chest x-rays show some abnormality secondary to asbestos dust inhalation in workers who have been exposed for over 40 years. The peak age for the development of disability in asbestos workers occurs after 20 years of exposures, in other words, after the worker has been exposed from 15-25 years. He may indeed have worked only 1-3 years in asbestos dust, and yet, 15-20 years later, full-blown asbestosis of the lung becomes apparent, indicating that the scarring in the lung progresses even after exposure to the asbestos dust per se has stopped. It is also interesting that the progression to moderate or severe pulmonary fibrosis is not related entirely to dosage, but perhaps to some genetic factors not fully understood at this time.

Examination of the lungs of the man who has died of asbestosis shows that there is diffuse fine fibrotic scarring scattered throughout primarily the lower halves of both lung fields, frequently but not usually associated with some degree of centrilobular or bullous emphysema, and with relative retraction or generalized decrease in size of the lung in the involved areas. X-ray changes of these same lungs demonstrate a ground-glass appearance of linear scarring or fibrosis with partial obliteration of the diaphragmatic and heart borders primarily in the lower lung fields. During the worker's lifetime, pulmonary function studies show what is called a restrictive defect, characterized by a decreased vital capacity, diffusing capacity, and arterial oxygen content secondary to the diffuse scarring throughout the lower lung fields. One of the earliest changes that can be discovered, in fact, is that of the decreased vital capacity which can be recognized by doing pulmonary function studies. There are occasions when more complicated pulmonary function tests such as the use of the diffusion capacity, measurement of alveolocapillary oxygen gradients and exercise blood gas tests will show an abnormality before pulmonary function studies, but this is the exception rather than the rule. The use of the chest x-ray coupled with pulmonary function studies, as is required now by OSHA, are reasonable and practical means of measuring and picking up these changes as early as they can in general be.

On occasion, it is desirable or even necessary to prove that a patient or worker has pulmonary asbestosis, and this nowadays can be done without an open lung biopsy which requires a major chest operation. The abbreviated procedure being that of transbronchial bronchoscopy with biopsy of a tiny bit of lung tissue. This tissue, if carefully examined by electron microscopy for uncoated fibers, and for coated fibers or ferruginous bodies by light microscopy can frequently give unequivocal evidence of underlying asbestosis. It must be mentioned, however,

that efficient evaluation of electron microscopy requires the full day of a trained microscopist or pathologist in order to adequately examine a single specimen. Exposure to crocidolite probably accounts for more fibrosis than chrysotile exposure. Although we do not know what the actal fiber level is insofar as the threshold for human disease, in this instance (pulmonary fibrosis) workers are currently living longer, are having less disability due to pulmonary fibrosis, and their disease entities are picked up sooner.

The second most common disease entity related to asbestos dust exposure is that of the pleural plaque. This is a hyalinized and often calcified discrete parietal pleural plaque, not located on the wall of the lung, but on the pleura lining the chest wall and never on the lung itself. These plques are extrapleural and occur most commonly in workers exposed to anthophyllite fibers. The hyaline or calcified plaque is picked up often on routine chest x-ray as an ill-defined modular density along the margin of the lung which is almost pathognomonic of asbestos exposure. Interestingly, only 15% of the plaques are found on chest x-rays that are actually identified at autopsy, illustrating that multiple chest x-rays would need to be done in order to pick up all or most of these densities.

Clinically these plaques are rarely, if ever, symptomatic, and if a plaque is found on the chest x-ray, one can anticipate that individuals with the plaque will have a higher than expected incidence of bronchogenic carcinoma, otherwise they have little significance except for that of a signpost which calls out "asbestos". Another rare and more recently recognized disease apparently induced by asbestos fibers is that of the exudative reaction or pleural effusion of which there have been approximately 70 cases described in the medical literature. These cases are diagnosed partly by exclusion, that is, by ruling out all other causes for pleurisy with effusion, and in some instances, by parietal pleural biopsy in which asbestos

bodies and fibers are found in areas of pleural thickening and associated local pneumonitis or pneumonia. The development of this benign pleural effusion in the worker may occur in as little as 1 or as long as 5 years after exposure to asbestos. There is no specific treatment for this entity.

The malignant mesothelioma of the pleura or peritoneum, which was first described in a case reported in 1946, has become increasingly more common during the past 30 years, primarily in workers exposed to asbestos to the exclusion of other people generally. It is now well accepted that malignant mesothelioma can be induced by asbestos dust inhalation for as short a period of time as 1 or 2 months primarily to crocidolite fibers, less frequently with amosite fibers and least with chrysotile fibers, while anthophyllite fibers have not been known to produce this entity. It is interesting to speculate that the size of the fibers is the most important aspect in explaining this variation, as the crocidolite fibers are the tiniest and most needle-like of all, and therefore can penetrate deep into the tissues lining the lung and the peritoneum in order to produce this cancerogenic effect. It is also interesting that more cases are produced in those workers who are the furthest along the line in the processing of the asbestos ore, the fewest cases of mesothelioma occurring in the workers with the heaviest of the ore exposure. This implies that processing breaks down the asbestos into finer particles which are better able to penetrate deep into the tissues of the lungs. Mesothelioma is more often found, therefore, in industries which use crocidolite and amosite asbestos, as in the shipyard workers, and in workers exposed to manufactured products using these types of asbestos fibers. During the past 10 years, it has become apparent that the wives, sons and daughters of asbestos workers and individuals who live in the vicinity of shipyards where asbestos dust is used, are often the ones who, though they have no direct exposure to asbestos in their work, inhale the particles brought home by their husbands in their work

clothes or breathe in the particles from the air blown from the shipyards where asbestos is being used. Among the seventeen thousand insulation workers in America at this time, approximately one worker every two weeks dies of mesothelioma. This is in contrast to the general association among people at large of only one case of mesothelioma per million persons in the United States.

The mesothelioma usually develops in the pleural or peritoneal surfaces and spreads diffusely around and into the lung or abdominal cavity with death generally occurring within 1 year after the tumor is recognized. Pulmonary fibrosis or asbestosis is usually associated with mesothelioma in varying degrees, and ferruginous bodies are generally found in the lung, although they are not generally found in the mesothelioma itself. Uncoated fibers of asbestos can usually be found by electron microscopy.

The clinical features of mesothelioma are generally insidious with weight loss, lassitude, chest or shoulder pain, abdominal swelling or obstruction of the intestine, with generally rapid progression of the disease with average survival being less than one year. Adequate treatment is not yet available but appropriate chemotherapy is currently being evaluated. The amount of asbestos fibers needed to produce mesothelioma is apparently much less than that necessary to produce asbestosis or pulmonary fibrosis.

Carcinoma of the lung has been associated with asbestos exposure since the early 1930's, definitely confirmed by 1947. During the past ten years it is anticipated that from 15 to 20% of men having significant asbestos exposure die of carcinoma of the lung. There is a greater incidence of adenocarcinoma of the lung in asbestos workers, probably related to the fact that asbestos dust pervades every part of the lung especially in the periphery where the cells which develop into the

adenocarcinoma are more plentiful. The worker's likelihood of developing carcinoma of the lung is slightly greater in the worker who has pleural plaques noted on chest x-ray. Cancer of the lung can be more effectively treated than mesothelioma of the pleura or peritoneum, and for this reason, early diagnosis by chest x-ray or in cetain instances by Pap smears of sputum may be helpful in effecting palliative relief of symptoms and indeed cures in some patients, if they are discovered early enough in their clinical course. For this reason, annual chest x-rays in every asbestos-exposed individual should be carried out for their lifetime. The longer the duration of the asbestos-exposed worker's employment the greater the risk of developing lung cancer. Even 1 month of working with asbestos was enough to increase the instance of bronchogenic carcinoma, in that the instance of cancer was twice as much in such a worker, as in one who has no asbestos exposure. After two years of exposure the instance of lung cancer increases to six times that of the normal person, and after ten years rises markedly. The smaller the dose of asbestos, it has been found, the longer the induction period before the cancer deevelops. In general, when cancer of the lung is first diagosed, 75% of them are inoperable at that time. If the lung cancer can be found as a small peripheral nodule resected by lobectomy, 40 to 50% will survive for as long as 5 years.

The final area of asbestos-associated disease, mainly where the relationship is less positive as to the etiologic agent being asbestos, includes other tumors or cancers which are found to be of greater incidence in workers or people exposed to asbestos. At this time, cancer of the esophagus, larynx, stomach, colon, and more recently the pancrease, are definitely in increased numbers as compared with the general population, and hence pose added risk to the asbestos worker. These entities are, in general, two to five times more common in asbestos workers than in the general populace.

VI. RELATIONSHIP OF SMOKING TO ASBESTOS INDUCED DISEASES

In August 1978, Johns-Manville, the biggest producer of asbestos products in the United States, not only had banned smoking entirely in the company work area, but has since established a policy that no person who smokes will be hired by the company for any operation where there is a possibility of exposure to asbestos, and that applies to the entire plant, including the officers. Even visitors to the plant are prohibited from smoking inside the plant itself. This action is to be strongly commended, and yet it was not enforced without considerable controversy. What in fact are the effects of smoking or not smoking on the health of the asbestos worker?

Insofar as pulmonary fibrosis or asbestosis of the lung, there is little or no effect on the scarring in the lung insofar as whether the worker smokes or does not smoke. There is no question, however, that smoking aggravates and causes to develop a significantly greater obstructive defect in the lung, which further increases the worker's shortness of breath, and especially his amount of cough and expectoration, as compared with the non-smoking worker who develops asbestosis. There is also no apparent statistical role in the development of mesothelioma of the pleura or of the peritoneum in asbestos workers, and the same probably applies to the development of the asymptomatic pleural plaque and the benign pleural effusion. There is, however, a greater incidence of cancer of the stomach and larynx associated with smoking, but it may not have a significant effect insofar as the asbestos worker is concerned.

Wherein, therefore, is the data for forbidding smoking in an asbestos plant? Statistically it has been shown that the non-smoking asbestos worker will develop

cancer of the lung approximately five times more commonly than the non-smoking, non-asbestos worker. This proportion, in itself is relatively mild, but significant. In the smoking asbestos worker, however, there is a multiplicative or synergistic effect in that there is a fifty-four times greater rate of cancer of the lung than in the non-smoking, non-asbestos-exposed individual, and these facts are borne out that approximately 15-20% of all asbestos-exposed workers in previous years will develop carcinoma of the lung, almost one of every five workers. This is in sharp contrast to the one or two out of each hundred to one hundred fifty workers who do not smoke. In other words, the worker's chance of developing cancer of the lung is 20 times greater if he smokes while working in an asbestos environment than if he does not smoke. Unfortunately, banning smoking on company premises does not stop the person from smoking, but an adequate educational program by management, backed up by labor, is the best approach towards reducing the high incidence of lung cancer in these individuals.

VII. DURATION OF EXPOSURE AS RELATED TO DISEASE DEVELOPMENT

TABLE I

ROENTGENOLOGIC CHANGES IN ASBESTOS INSULATION WORKERS

Years of Exposure (yr).	No.	Percent Normal	Percent Abnormal	Asbestosis 1	2	3
40+	121	5.8	94.2	35	51	28
30-39	194	12.9	87.1	102	49	18
20-29	77	27.2	72.8	35	17	4
10-19	379	55.9	44.1	158	9	0
0-9	346	89.6	10.4	36	0	0
	1,117	51.5	48.5	366	126	50

Selikoff et. al.

In general, the initial exposure of the asbestos worker to asbestos dust may be measured in decades for convenience in categorization. For example, in the fibrosis induced by asbestos dust there are few changes noted during the first ten years, but during the second ten years, mild changes occur. These changes moderate from ten to twenty-nine years after the initial exposure, and result in a greater degree of pulmonary scarring during the fourth decade. As shown in Table I, pulmonary fibrosis, as evidenced by x-ray changes, becomes increasingly more prominent the longer the time from initial onset of exposure. Practically every asbestos worker who has worked for over forty years or has had forty years from the initial exposure has some evidence by chest x-ray of lung or pleural abnormality not found in the normal individual. The same applies to the development of disability in these workers, in that the average person who develops asbestosis or pulmonary fibrosis becomes disabled somewhere between the fifteenth and the twenty-fifth year peaking at the twentieth year following initial exposure to the dust.

The same findings are similarly true with mesothelioma and lung cancer, as is shown by the accompanying Figure 2 (below).

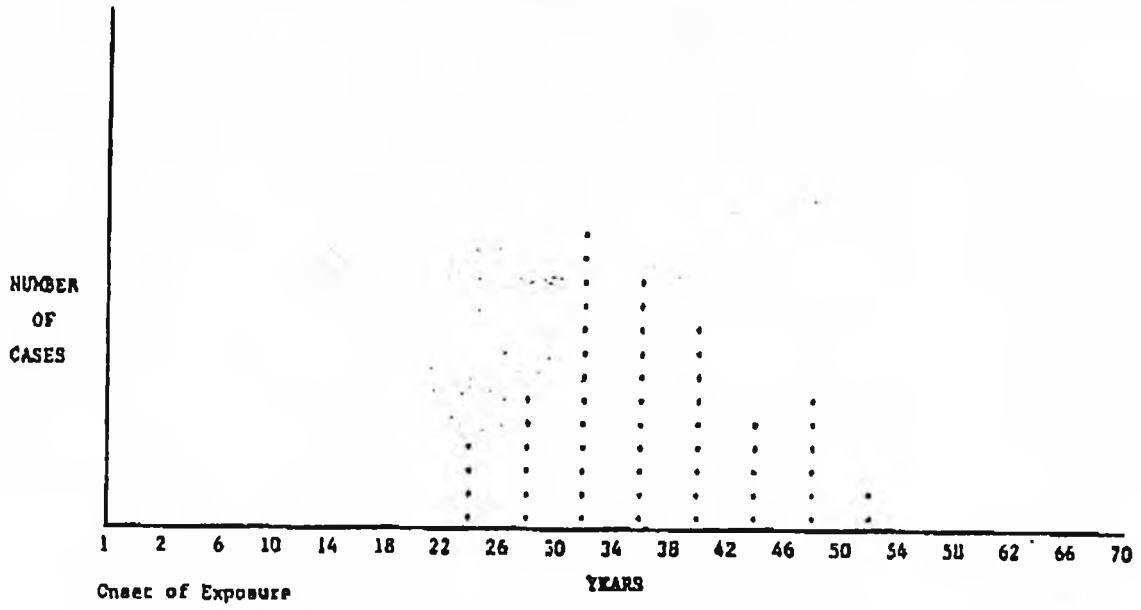

Figure II. Fifty-six cases of neoplasm of the lung or pleura (each case represented by a dot). The elapsed time from onset of exposure is shown on the base line.

The individual exposed to asbestos dust will develop cancer in approximately eight or ten out of every hundred workers rarely before twenty years from the date of initial exposure, and usually over thirty years after the initial exposure, which indeed may not be more than one or two months total exposure time for this entity to develop. The average age of development is approximately 31.8 years for mesothelioma, while for lung cancer, which rarely occurs before thirteen years after initial exposure, the average age of development from date of onset of initial exposure to asbestos dust is approximately 30.7 years. As mesothelioma and lung cancer are relatively late-developing asbestos-induced diseases, it is quite likely that an even greater percentages or workers will develop these cancers as they become older.

29 & 30

The primary importance of recognizing the time lag between initial exposure and the development of the disease is many current laws concerning Workmans' Compensation, Social Security benefits, and Workers' Pension Plans, contain a statute of limitations which states that the person is not liable for a company-induced disease, if the disease is discovered or diagnosed more than two, five, or perhaps seven years from the date the worker left the company's employment. State, federal and company rules or laws need to be modified in order to accept the medical facts related above. Each of these three major disability diseases; pulmonary fibrosis, mesothelioma, and lung cancer, all may develop twenty to thirty-five years or longer after the exposure to the asbestos dust has terminated.

Asbestos: Still a danger in schools

by Elaine S. Knapp

For Phyllis Adams and Ann Gibbs the last year has been a frustrating one—trying to get their local school board to remove asbestos from the school their children attend.

"It's frustrating, our children are being poisoned and there's not a..ything ve can do," Mrs. Gibbs declared. What the Lexington, Kentucky, housewife has done is work through the PTA, form a group of concerned parents, go door-to-door telling parents of the danger, gather hundreds of signatures on petitions, read volumes on asbestos, call and write federal agencies and confront the school administrator and board.

After a year of parental pressure being applied and at least a decade after school authorities knew of the asbestos hazard, Mrs. Gibbs said, "We don't think anything will be done until the government makes them (the school board)." School authorities maintain the asbestos will be cleaned up if money is available for renovation next year.

Ironically, the major government effort to control asbestos lies in Mrs. Gibbs and others like her. Telling parents and teachers that their school has asbestos and relying on them to ressure local action is the heart of the U.S. Environmental .'rotection Agency's (EPA) strategy to rectify the nationwide problem of asbestos in schools.

No effective federal program exists to protect schoolchildren from asbestos, state efforts vary widely and local schools often ignore the danger due to the cost of cleanup.

Asbestos dangers

Any exposure to asbestos involves some health risk, according to the Congress, the EPA and the scientific community. Children are especially vulnerable, according to the EPA guidance document on asbestos sent to schools. Their remaining life expectancy provides the 20 to 40 years it takes for disabling and fatal asbestos-related diseases to develop. Large numbers of children may be exposed in a contaminated school and exposure is continuous during the school year. Children are active and breathe more frequently than adults, possibly inhaling more asbestos fibers. Smoking can increase the cancer risk due to asbestos exposure.

Most hazardous is friable asbestos that can be crumbled. It sends deadly fibers into the air which may lodge in the lungs indefinitely, according to EPA's guidance document. Asbestos workers often develop a chronic and debilitating lung disease called asbestosis. Lower and shorter exposure can result in death many years later.

Asbestos diseases include: 1) asbestosis, a disease in which asbestos clogs the lungs, 2) pleural calcification, a deposit of alcium salts in the lung lining, 3) malignant tumors of the lung, 4) mesothelioma, a rapid and fatal cancer of the lung and 5) intestinal and uterine cancers.

Hot potato

Asbestos in the schools has been a "hot potato" tossed among various levels of government and federal agencies. One reason is that removal of asbestos can be quite expensive, especially if large areas of buildings are affected. Funding is basically up to local schools as is asbestos detection and control. No federal funds are available and state aid varies.

The U.S. EPA requires schools to inspect for asbestos and notify parents and [school] employees of asbestos hazards. The EPA doesn't require removal or abatement. "The theory is that PTAs and employees would pressure local districts to take remedial action," said Terrell Hunt, assistant to EPA Deputy Administrator Alvin Alm.

However, a recent internal EPA report found that many schools did not meet EPA's June 1983 deadline for asbestos detection, record keeping and notification.

No federal funds

Federal funds of $172 million authorized by the Asbestos School Hazard Detection and Control Act of 1980 were never appropriated. Grants were promised for schools to identify asbestos hazards and loans for mitigation of asbestos hazards. But funds were never requested by the Department of Education, reported John Bennett, aide to U.S. Representative George Miller, D-Calif., who sponsored the act. In 1983, a $50 million recommendation by the House was omitted in a House-Senate conference.

The U.S. Department of Education had a task force which set standards for state grants in 1980, according to W. Stanley Kruger, deputy director for state and local programs. However, when the program wasn't funded, the department "deferred to EPA," Kruger said.

Under pressure from Congress, the department reactivated its task force in October 1983 and is gathering information on asbestos to send to chief state school officials, Kruger said. The department also reactivated its requirement that states file plans for asbestos in the schools' programs and report on their progress every six months. All but two states have filed.

EPA's program

The federal effort has largely been a requirement by the EPA that schools inspect for asbestos hazards, sample and analyze material to determine if asbestos is present, keep records of the inspection, post notices, and notify parents and employees if asbestos is found. Although schools were to comply with the rule by June 1983, the EPA doesn't know how many did. It does not require schools to report to it and must send federal inspectors to schools to check their records. EPA staff said when the EPA regulation was written that the administration op-

This is a reprint of a portion of an article appearing in State Government News, *March 1984. It is authored by and printed with permission of Elaine S. Knapp, its editor.*

posed imposing a data reporting requirement. The EPA recently doubled its field force of inspectors by adding 16 people through a contract with the American Association of Retired Persons, Hunt said. These include retired architects and engineers. Primarily, EPA staff look at school records and physically inspect some schools. However, there are not enough inspectors to cover but a small portion of the nation's schools.

In providing technical advice, EPA can help schools determine the best strategy for evaluating the risk and responding to asbestos, Hunt said. He said that anything short of removal is considered a short-term solution.

Connie Derocco, environmental protection specialist with EPA, said that out of 1,527 schools inspected in 468 districts, some 60 percent did not comply with EPA rules. Most failed to notify and warn PTAs and employees of asbestos materials [manufacturers]. Schools know they will be pressured once the word is out, and they are hesitant to deal with the asbestos problem, Derocco explained. After receiving a notice of noncompliance, schools have 30 days to act before the EPA files a civil complaint.

Labor union concern

An estimated 3.24 million schoolchildren and 648,000 school employees are potentially exposed to asbestos, according to Kitty Conlan, research analyst with the Service Employees International Union (SEIU).

The SEIU is lobbying Congress to fund the 1980 act for grants and loans to schools. Schools don't have the money to clean up on their own, Conlan said. "It's a nationwide problem which affects the health of millions of people."

SEIU is suing the EPA to require schools to clean up flaking asbestos. "Schools say if EPA thinks asbestos is so bad, then EPA would require them to get rid of it," Conlan commented.

EPA does give schools good technical advice on how to get rid of asbestos, Conlan noted. But some schools accept the lowest bid rather than follow EPA guidelines. If the cleanup is not done right, the asbestos danger can be worsened.

Conlan said SEIU doesn't think suing asbestos' manufacturers is worthwhile, citing lack of action on suits filed by asbestos workers. "We're hesitant to have our members litigate themselves to death," she said.

Conlan added that school districts can also be held responsible for asbestos. "They can face a big liability," she commented.

Lawsuits filed

A number of lawsuits on behalf of school boards and building owners in Kentucky, Mississippi, New Hampshire, Florida, South Carolina, Alabama and Tennessee have been filed by a South Carolina law firm.

Daniel Speights (a school board attorney) noted that legal theories available to school boards against manufacturers of asbestos include: contract (the products were not fit for the use intended), negligence (the manufacturers were negligent in informing users of the risks associated with the products), strict liability (manufacturers should be strictly liable for failing to warn of asbestos hazards), and restitution (manufacturers have a duty to abate the hazard).

A civil action filed on behalf of the Barnwell, South Carolina, school district notes that school districts and public officials could be held liable for failing to abate a health hazard.

A September 1981 report by the U.S. attorney general to Congress recommended that school authorities seek to recover asbestos abatement expenses from asbestos manufacturers. The report said federal litigation would be ineffective unless Congress imposed liability on asbestos manufacturers.

Asbestos manufacturers are being sued by at least 20,000 people on the grounds that the companies knew of asbestos hazards and covered them up, according to a September article in the *National Journal*.

A 1983 report from the Rand Institute says that asbestos litigation and compensation has cost an estimated $1 billion over the past decade. Only 37 cents of every dollar went for actual compensation to plaintiffs. Estimates of the number of deaths due to asbestos over the next 30 years range from 74,000 to 265,000.

What you should do about asbestos in your school

Given current asbestos rules and regulations, PTAs should check on the following:

1. Was each school in your district inspected for friable asbestos? If not, request this action immediately.
2. Was an analysis of asbestos samples, using polarized light microscopy, conducted?
3. Are records of the asbestos inspection on file in the school district?
4. Does the PTA have a copy of the report in its records?

In schools where asbestos was found, has the school complied with the following:

1. Did the school district notify the children's parents, either directly or through the PTA?
2. Were school employees notified of the location of the materials?
3. Did the school post a standard form in administrative and custodial areas?
4. Are measures being taken, if not already completed, to remove asbestos in the school?
5. Did the school district provide maintenance and custodial employees with instructions for reducing exposure to asbestos?

If asbestos was found in your school, but corrective measures are not being taken, the following steps should be pursued:

1. The PTA should work with the school to affect removal or abatement. Invite parents, teachers, employees of the building, the school principal, and the superintendent to a PTA meeting. Request information about the degree of the asbestos problem and what plans are being developed for cleanup.

2. If plans are not under way or seem unsatisfactory, contact the school board to inform it of your concern. If informal discussions do not produce results, get the issue on the agenda of the next school board meeting. Be prepared to provide the facts, including the inspection reports and the cost of abatement, to school board members.

3. Meanwhile, inform your state legislature and the U.S. Congress about the problems and the degree of difficulty there is in terms of cleanup.

4. If the school board is unable or unwilling to ameliorate the problem, one resort would be a lawsuit. Be sure that you have tried every alternative before taking this step.

Asbestos in Schools Still a Problem

The federal government and the states have taken some actions over the past year to protect school children and others from exposure to asbestos.

Due to its fire retardant and insulating qualities, asbestos is used in hundreds of products. "Friable" asbestos, the kind that easily crumbles into microscopic fibers that can be inhaled, is very hazardous according to the Environmental Protection Agency (EPA). Studies have linked exposure to asbestos to lung diseases and cancer.

Federal Activities

In 1982, the EPA issued rules requiring public and private elementary and secondary schools to identify friable asbestos-containing building materials, maintain records, and notify employees and parent-teacher organizations of the results. The deadline for inspections was June 28, 1983.

According to a recent EPA survey, 93 percent of America's school buildings have been inspected, and 35 percent of them have friable materials that contain asbestos. The survey also revealed that 67 percent of the schools have taken action to control the substance in their buildings. However, only 34 percent of the schools have complied with major requirements of the 1982 rule.

The lack of uniform federal standards, particularly for definition of hazard and worker protection, is viewed by many as a flaw in the EPA's asbestos-in-schools program.

At least one state has moved to set its own standard. The New Jersey Asbestos Policy Committee in October recommended to Gov. Thomas Kean an "action guideline" at 0.003 fibers per cubic centimeter of air, and a decision-making protocol for building owners. Rules are expected to be proposed early this year. The federal Center for Disease Control has proposed an "action level" of 0.01 fibers per cubic centimeter, or three times higher than the proposed New Jersey standard.

In 1984, Congress passed the Asbestos School Hazard Abatement Act to provide loan and grant money to school districts seeking to abate friable asbestos-containing materials in schools. The act appropriated $50 million for fiscal 1984, and authorized $50 million for fiscal 1985 and $100 million per year for five years thereafter. Conservative estimates of the price tag for school abatement actions are in the range of $1.6 billion to $2 billion. "Typical" abatement projects cost from $100,000 to $500,000 per school.

This legislation created a number of deadlines for state authorities. By Nov. 20, 1984, state governors were to submit a plan to EPA on procedures for maintaining records on the presence, detection and abatement of asbestos. States must also meet deadlines to submit priority lists of schools that are candidates for abatement, and financial assistance applications.

What States Have Done

A number of states are undertaking their own legislative and regulatory initiatives. The most common state approach has been to appoint a state asbestos coordinator. State programs have focused on school buildings and other state-owned facilities.

Most states leave asbestos removal or cleanup to local school districts. A handful of states mandate cleanup or provide funds for removal. Even when state funding is provided, the local districts often must set their own standards for asbestos management.

In 1984, seven state legislatures adopted legislation on asbestos in schools or public buildings, according to the Safe Buildings Alliance, comprised of manufacturers of asbestos (see table). Five of those seven states passed funding bills for asbestos removal or control: California, Iowa, Minnesota, Nebraska and New Jersey. Delaware created an ad hoc committee to consider a comprehensive state plan on asbestos in state-owned buildings. Louisiana authorized the state attorney general to assist local school districts in bringing suit against asbestos manufacturers, suppliers and installers. Iowa also passed an asbestos contractor licensing law.

During the 1983-84 legislative sessions, 28 states considered legislation on the issue of asbestos-containing materials in buildings, according to the Safe Buildings Alliance.

(Editor's Note: This article was condensed from a CSG Backgrounder on "Asbestos in Buildings," compiled by John F. Welch, president of the Safe Buildings Alliance in Washington, D.C., and Kevin J. Fay, of Alcalde, Henderson and O'Bannon in Rosslyn, Virginia, in cooperation with Jon Grand, a former CSG staff member. For a copy of the entire report, contact the Order Department, The Council of State Governments, Iron Works Pike, P.O. Box 11910, Lexington, KY 40578. Ask for Backgrounder No. 118402. Single copies are free to state officials.)

Definitions:

Legislation adopted—states that have specifically enacted a program, funding measure or commissioned a *study on asbestos in buildings.*

State funding—states that have established a funding program or cost sharing with local school districts.

State assistance—states that provide literature, training, inspections, certification or technical assistance to local school districts.

Local funding option—states that have authorized local school districts to raise funds for asbestos programs through local taxes.

Contractor certification and training—states that mandate certification, training or licensing of asbestos contractors.

Encapsulation allowed—states that allow encapsulation of asbestos materials as a viable control option.

EPA NC citation—states in which public or private school districts have been cited by the U.S. EPA for not complying with federal asbestos inspection regulations.

Notes:

(a) Asbestos being removed from schools under a court order obtained by the state attorney general in a suit against the state school boards.

(b) Special committee or task force created to study the problem.

(c) State attorney general is to assist local schools in bringing civil suit against asbestos manufacturers, suppliers and installers.

(d) Money available either through foundation aid programs or local funding is mandatory.

(e) Funding is available for asbestos control in government buildings.

(f) Training only.

(g) Mandatory state inspection program.

(h) Inspector certification required.

Asbestos: Still a Danger in Schools

By Elaine S. Knapp, editor

For Phyliss Adams and Ann Gibbs the last year has been a frustrating one—trying to get their local school board to remove asbestos from the school their children attend.

"It's frustrating, our children are being poisoned and there's not anything we can do," Mrs. Gibbs declared. What the Lexington, Kentucky, housewife has done is work through the PTA, form a group of concerned parents, go door-to-door telling parents of the danger, gather hundreds of signatures on petitions, read volumes on asbestos, call and write federal agencies and confront the school administrator and board.

After a year of parental pressure being applied and at least a decade after school authorities knew of the asbestos hazard, Mrs. Gibbs said, "We don't think anything will be done until the government makes them (the school board)." School authorities maintain the asbestos will be cleaned up if money is available for renovation next year.

Ironically, the major government effort to control asbestos lies in Mrs. Gibbs and others like her. Telling parents and teachers that their school has asbestos and relying on them to pressure local action is the heart of the U.S. Environmental Protection Agency's (EPA) strategy to rectify the nationwide problem of asbestos in the schools.

No effective federal program exists to protect school children from asbestos, state efforts vary widely and local schools often ignore the danger due to the cost of cleanup.

Asbestos Dangers

Any exposure to asbestos involves some health risk, according to the Congress, the EPA and the scientific community. Children are especially vulnerable, according to the EPA guidance document on asbestos sent to schools. Their remaining life expectancy provides the 20 to 40 years it takes for disabling and fatal asbestos-related diseases to develop. Large numbers of children may be exposed in a contaminated school and exposure is continuous during the school year. Children are active and breathe more frequently than adults possibly inhaling more asbestos fibers. Smoking can increase the cancer risk due to asbestos exposure.

Most hazardous is friable asbestos that can be crumbled. It sends deadly fibers into the air which may lodge in the lungs indefinitely, according to EPA's guidance document. Asbestos workers often develop a chronic and debilitating lung disease called asbestosis. Lower and shorter exposures are linked to lung and other cancers. Even brief exposure can result in death many years later.

Asbestos diseases include: 1) asbestosis, a disease in which asbestos clogs the lungs, 2) pleural calcification, a deposit of calcium salts in the lung lining, 3) malignant tumors of the lung, 4) mesothelioma, a rapid and fatal cancer of the lung, and 5) intestinal and uterine cancers.

Where It Is, What to Do

Use of asbestos materials was common in schools and other buildings from the mid-1940s until EPA banned sprayed asbestos in 1973. Friable (or soft) asbestos-containing material was used for fireproofing,

insulation or decoration. It was usually sprayed on overhead surfaces, steel beams, ceilings, walls and pipes.

As friable asbestos material ages, it breaks down and releases fibers into the air. School activities can damage or disturb asbestos, such as a ball hitting a gym ceiling. Asbestos material can be disturbed by maintenance activities, vandalism, water damage or vibration from people or machinery and release fibers into the air.

Many experts believe removal of asbestos is the only final and satisfactory solution to asbestos exposure. However, removal may cost more initially and be more complicated. Temporary measures include encapsulation by spraying asbestos with a sealant or enclosing the asbestos. EPA and other experts warn that such temporary measures make removal more difficult and dangerous later on, and must be constantly monitored.

The EPA guidelines call for asbestos work only after construction of sealed containment barriers and worker protection as mandated by OSHA. All but asbestos workers should be kept out of the sealed area and worker change rooms are required.

Hot Potato

Asbestos in the schools has been a "hot potato" tossed among various levels of government and federal agencies. One reason is that removal of asbestos can be quite expensive, especially if large areas of buildings are affected. Funding is basically up to local schools as is asbestos detection and control. No federal funds are available and state aid varies.

The U.S. EPA requires schools to inspect for asbestos and notify parents and employees of asbestos hazards. The EPA doesn't require removal or abatement. "The theory is that PTAs and employees would pressure local districts to take remedial action," said Terrell Hunt, assistant to EPA Deputy Administrator Alvin Alm.

However, a recent internal EPA report found that many schools did not meet EPA's June 1983 deadline for asbestos detection, record keeping and notification.

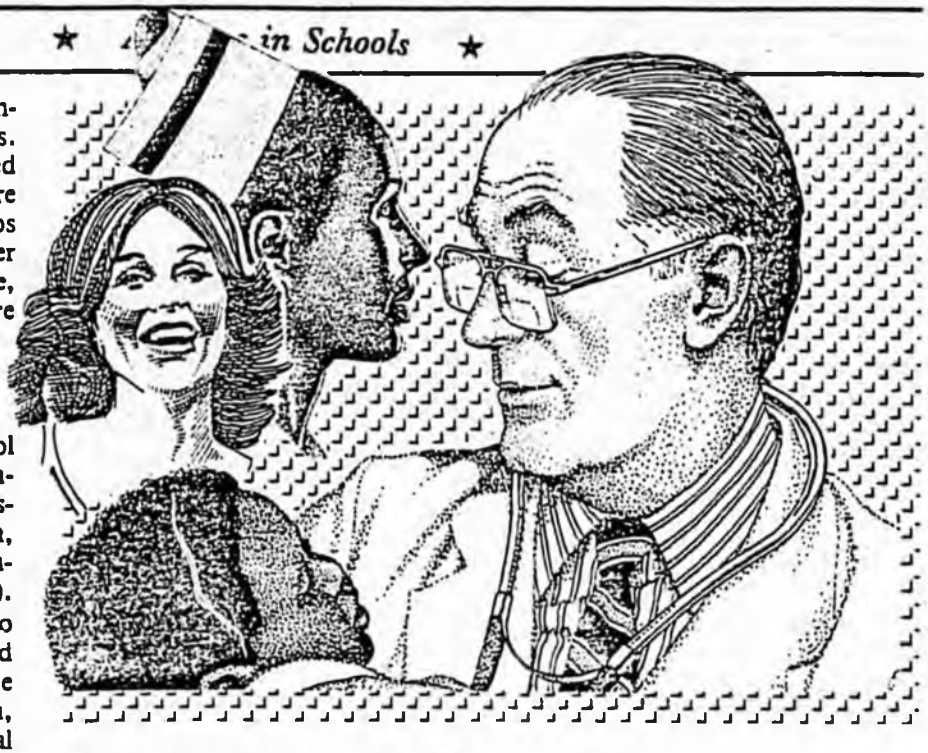
No Federal Fund

Federal funds of $172 million authorized by the Asbestos School Hazard Detection and Control Act of 1980 were never appropriated. Grants were promised for schools to identify asbestos hazards and loans for mitigation of asbestos hazards. But funds were never requested by the Department of Education, reported John Bennett, aide to U.S. Rep. George Miller, D-California, who sponsored the act. In 1983, a $50 million recommendation by the House was omitted in a House-Senate conference.

The U.S. Department of Education had a task force which set standards for state grants in 1980, according to W. Stanley Kruger, deputy director for state and local education programs. However, when the program wasn't funded, the department "deferred to EPA," Kruger said.

Under pressure from Congress, the department reactivated its task force in October 1983 and is gathering information on asbestos to send to chief state school officials, Kruger said. The department also reactivated its requirement that states file plans for asbestos in the schools' programs and report on their progress every six months. All but two states have filed.

EPA's Program



The federal effort has largely been a requirement by the EPA that schools inspect for asbestos hazards, sample and analyze material to determine if asbestos is present, keep records of the inspection, post notices, and notify parents and employees if asbestos is found. Although schools were to comply with the rule by June 1983, the EPA doesn't know how many did. It does not require schools to report to it and must send federal inspectors to schools to check their records. EPA staff said when the EPA regulation was written that the administration opposed imposing a data reporting requirement. The EPA recently doubled its field force of inspectors by adding 16 people through a contract with the American Association of Retired Persons, Hunt said. These include retired architects and engineers. Primarily, EPA staff look at school records and physically inspect some schools. However, there's not enough inspectors to cover but a small portion of the nation's schools.

In providing technical advice, EPA can help schools determine the best strategy for evaluating the risk and responding to asbestos, Hunt said. He said that anything short of removal is considered a short-term solution.

Connie Derocco, environmental protection specialist with EPA, said that out of 1,527 schools inspected in 468 districts, some 60 percent did not comply with EPA rules. Most failed

cont'd pg. 6

to notify and warn PTAs and employees of asbestos materials. Schools know they will be pressured once the word is out, and they are hesitant to deal with the asbestos problem, Derocco explained. After receiving a notice of noncompliance, schools have 30 days to act before the EPA files a civil complaint.

Labor Union Concern

An estimated 3.24 million school children and 648,000 school employees are potentially exposed to asbestos, according to Kitty Conlan, research analyst with the Service Employees International Union (SEIU).

The SEIU is lobbying Congress to fund the 1980 act for grants and loans to schools. Schools don't have the money to cleanup on their own, Conlan said. "It's definitely a federal responsibility," Conlan said. "It's a nationwide problem which affects the health of millions of people."

SEIU is suing the EPA to require schools to cleanup flaking asbestos. "Schools say if EPA thinks asbestos is so bad, then EPA would require them to get rid of it," Conlan commented.

EPA does give schools good technical advice on how to get rid of asbestos, Conlan noted. But some schools accept the lowest bid rather than follow EPA guidelines. If the cleanup is not done right, the asbestos danger can be worsened.

Conlan said SEIU doesn't think suing asbestos' manufacturers is worthwhile, citing lack of action on suits filed by asbestos workers. "We're hesitant to have our members litigate themselves to death," she said.

Conlan added that school districts can also be held responsible for asbestos. "They can face a big liability," she commented.

Lawsuits Filed

A number of lawsuits on behalf of school boards and building owners in Kentucky, Mississippi, New Hampshire, Florida, South Carolina, Alabama and Tennessee, have been filed by a South Carolina law firm.

Daniel Speights noted that legal theories available to school boards against manufacturers of asbestos include: contract (the products were not fit for the uses intended), negligence (the manufacturers were negligent in informing users of the risks associated with the products), strict liability (manufacturers should be strictly liable for failing to warn of asbestos hazards), and restitution (manufacturers have a duty to abate the hazard).

A civil action filed on behalf of the Barnwell, South Carolina, school district notes that school districts and public officials could be held liable for failing to abate a health hazard.

A September 1981 report by the U.S. attorney general to Congress recommended that school authorities seek to recover asbestos abatement expenses from asbestos manufacturers. The report said federal litigation would be inefficient unless Congress imposed liability on asbestos manufacturers.

Asbestos manufacturers are being sued by at least 20,000 people on the grounds that the companies knew of asbestos hazards and covered them up, according to a September article in the *National Journal.*

A 1983 report from the Rand Institute says that asbestos litigation and compensation has cost an estimated $1 billion over the past decade. Only 37 cents of every dollar went for actual compensation to plaintiffs. Estimates of the number of deaths due to asbestos over the next 30 years range from 74,000 to 265,000.

Future Problems

Generally, 15-40 years can elapse between asbestos exposure and manifestation of certain diseases. For instance, shipyard workers exposed during World War II may only now be filing claims, according to the Rand study. Despite this knowledge, no attempt is being made to monitor school children exposed to asbestos.

An internal EPA memo written in November 1978 called for long-term surveillance of children who are exposed. The memo noted that when they reach adulthood these children could then be informed and notified of their childhood exposure. They could be medically examined more frequently for respiratory diseases and cancer.

EPA Regions, States

Because no one tracks data on asbestos in the schools on a national basis, *State Government News* interviewed asbestos coordinators in five of the 10 EPA regions and several state asbestos coordinators.

Generally, the federal regional EPAs have switched their emphasis from providing technical assistance on identifying and dealing with asbestos in the schools to checking school records on asbestos inspections. Most found a high percentage of schools either had not inspected or had not notified parents and employees of asbestos in the schools as required by the EPA.

State programs differ widely in scope and authority. While a few states fund asbestos removal and cleanup, most simply help schools identify asbestos or provide other technical assistance.

Region I

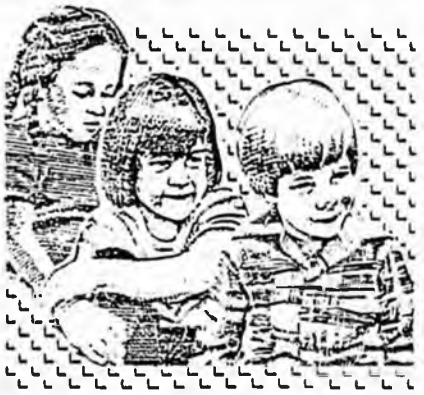
"Compliance is terrible," said Paul Heffernan, asbestos coordinator for EPA Region I covering Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island and Vermont.

Five full-time EPA inspectors have visited 160 districts covering 400 schools and issued 58 notices of noncompliance. Of the EPA violations, 37 percent had not even inspected and 53 percent had not notified parents or employees of asbestos found. Many school administrators didn't want to be "bothered," others had not read the regulation and others simply refused to post a warning in the building.

Oddly enough, schools in states which had asbestos programs in the late 1970s were most difficult to convince they needed to inspect for asbestos in ways not done in earlier years. For instance, the latest regulations require inspection of pipes and boiler rooms.

With 3,300 school districts in the region, there is no way EPA can inspect them all, Heffernan said. However, press releases announce schools found in violation, so the hope is that other schools will inspect rather than see themselves in the headlines.

Asbestos abatement efforts vary widely even in the same school district and among neighboring school districts, Heffernan said. He said West Haven, Connecticut, had an effective program while North Haven, next door, had none. While Hartford, Connecticut, spent $6 million on big problems in five schools, it had not tackled "mini-disasters" in 37 others. The same situation existed in Boston.



In the region, New Hampshire sent a checklist of EPA requirements plus abatement actions to help schools comply with the EPA.

Connecticut has granted $6.5 million since 1976 to localities for asbestos control in schools, reported Richard Krissinger, coordinator of school facilities, state Department of Education. State grants range from 40 to 80 percent of cost, depending on the aid formula the town qualifies for. If asbestos is found, the "chances are good it will be removed," Krissinger said. "We treat it as a health violation."

The state "accepts encapsulation" as an abatement measure, but doesn't encourage it. Krissinger said, "We believe removal is the only answer."

Al Siniscalchi, acting chief of the toxic hazard section of the Connecticut Department of Health Services and Education, noted that the state also provides technical assistance to schools. Schools were sent EPA guidelines and seminars were co-hosted by the state and EPA Region I.

A job freeze has reduced a former staff of nine to four and most inspec-

tions are now done by local health departments. Connecticut does follow-up inspections after asbestos removal to make sure the school is safe. Safe disposal of large amounts of asbestos is supervised by the state Department of Environmental Protection.

Maine is in good shape, according to Roy Nisbett, director of the Division of School Facilities. Most of the asbestos found was confined to pipe wrapping and boiler rooms. The state notified schools of the EPA rule and 90 percent complied with inspection requirements, Nisbett said. The Division of Industrial Safety trained school personnel to conduct asbestos inspections.

A proposed bill in Maine would authorize a bond issue to reimburse local schools for the cost of asbestos removal and repair.

In spite of the fiscal contraints caused by Proposition 2 1/2, public pressure has spurred asbestos abatement in Massachusetts, said Mike Malchik, assistant engineer, Division of Occupational Hygiene. "Parents and teachers are adamant about getting it (asbestos) down," Malchik said. The legislature allocated $2 million in 1983-84 to repay part of school removal costs if removal is recommended by the state.

Massachusetts inspects public buildings and schools, samples, analyzes samples and recommends abatement measures. There are at least five engineers and a project engineer available. The schools are being re-surveyed based on new guidelines, as inspections in 1978 only covered sprayed-on asbestos in public areas.

Region II

EPA Region II asbestos coordinator, Arnold Freiberger, has seven inspectors to check some 3,000 schools in New York and New Jersey. Out of 108 districts inspected, only 13 were in compliance with EPA rules, 32 had minor violations and 63 had either failed to inspect or identify asbestos or to post notices and notify parents and teachers.

New York has provided funds for asbestos control, reported Henry Binzer, associate in school business management, state Department of Education. In addition to state grants of $1.75 million annually for the past four years, school districts may tap state building aid for asbestos control.

An annual state survey of schools revealed 509,000 square feet of potentially hazardous asbestos.

The New York State School Asbestos Safety Act of 1979 required schools to identify asbestos and, if it is hazardous, take control measures. Encapsulation is most popular with schools. "The problem is that still has to be watched," Binzer noted. Removal is permanent, but expensive.

The state does not give advice on specific jobs, but provides an educational program for contractors and information to schools.

cont'd pg. 8

New Jersey doesn't provide specific aid for asbestos removal, but schools can get assistance through the foundation aid program, said Dr. Irving M. Peterson, manager, Facility Planning Services, state Department of Education.

In 1979, a governor's Task Force on Asbestos set minimum specifications for removal of friable asbestos. The specifications, which contractors must follow, require notification of state and federal agencies prior to the start of a project, require documentation of the contractor's qualifications, and require the contractor to follow stringent procedures for removal. The standards do not permit encapsulation (by coating the asbestos-containing layer) in New Jersey.

The state must approve all construction projects, plans, make field inspections to assure the work area is set up properly so contamination doesn't spread and check at the end of the project. Contractors, agents and workers must all attend a one-day state-EPA seminar and carry certification cards on the job.

Out of 2,400 public schools in New Jersey, asbestos removal projects have been approved in 350. Costs have totaled $46 million, for an average of $131,000 per school. It's up to local districts to remove the asbestos and as many as 100 more may not have acted yet.

Region IV

EPA doesn't have the resources to inspect school compliance with asbestos regulations, declared Dwight Brown, asbestos coordinator for Region IV covering Alabama, Georgia, Kentucky, Mississippi, North Carolina, South Carolina and Tennessee.

Most commonly, schools have either failed to inspect or to notify parents, Brown noted. He added that common law requires building owners to identify and notify occupants of hazards, and to provide medical surveillence if there is evidence of exposure.

Region IV also provides technical assistance and its intensive seminars on asbestos are attended by many from outside the region.

Most of the asbestos found in Georgia schools was in boiler rooms or pipe wrapping and has been corrected, said Lovett Fletcher, asbestos coordinator. State environmental, health and education departments worked with the U.S. EPA to provide information and hold seminars for superintendents. In addition, 70 environmental health specialists were trained to assist local systems. Schools with acute problems could get matching state aid through the state capital outlay, Fletcher said.

Kentucky helps schools comply with EPA inspection requirements, but has no money to aid them, said Jim Judge, unit director of property insurance, Department of Education. Asbestos cleanup was estimated to cost $26 million last year, but a survey now underway could change that estimate. Judge noted that the EPA doesn't require removal and many schools "are hesitant to post a warning." Asbestos problems in the state's 180 districts range from major ones with ceilings to boiler rooms.

Affected schools mostly include those built from World War II to the early 1970s. Judge said certain architects used lots of asbestos while others didn't.

South Carolina selected the critical points of EPA's regulations in requiring public and private schools to inspect, sample and analyze for asbestos, said Lee Bacot, asbestos coordinator, Department of Health and Environment. Results of the school surveys and health hazard assessments were required to be publicized in meetings and by notifying parents.

Out of 1,200 public schools, 1,080 or 90 percent complied with EPA's rule and 270 found friable asbestos. Only about 30 percent of the 450 private schools complied.

Asbestos inspectors must be certified by the state and must send survey results to the state. A one-day course is offered by the state to consultants and state and local staff. Schools are provided information, but the state does not provide specific advice or any funds.

Tennessee had a governor's task force on asbestos in 1978, according to Robert Foster, chief, technical services, Division of Air Pollution Control, Bureau of the Environment.

Out of 1,773 schools, 150 reported potentially hazardous asbestos.

The state provides free analysis of suspected asbestos materials, provides information to schools, and conducts training sessions. Because there is a shortage of EPA inspectors, Tennessee Gov. Lamar Alexander wrote the EPA offering to help enforce the inspections. However, EPA has not responded. The state plans to proceed to develop the data anyway, Foster said.

"We're convinced asbestos in the schools is one of the more important health problems," Foster declared. "It's an absolute human carcinogen. It causes serious irreversible health effects. Even brief exposure can cause painful disease. Children are

EPA's new rule requiring parental notice "triggered a lot of work," Peterson said. As many projects were approved last year as in the previous four years.

even at more risk."

The goal should be to eliminate the hazard, Foster continued, while the EPA only requires inspections and warnings which can lead to panic and make schools vulnerable to unscrupulous contractors. People need to be educated on how to abate the hazard, he said. He added that although "most want to do the best, it's hard to convince them that a little dust out of the ceiling will kill them."

"I've gone in schools where the material (asbestos) was hanging off chairs," Foster said. In that case the superintendent closed the schools upon the state's recommendation. More troublesome are marginal situations, Foster noted, where schools don't understand the potential hazard. "They look to the state or federal government," he said. "But hope for federal or state aid is a loser."

Region V

"There's quite a few violations of EPA's rule," said Anthony Restaino, asbestos coordinator for Region V covering Illinois, Indiana, Michigan, Minnesota, Ohio and Wisconsin.

Many school officials thought asbestos "was a low priority, didn't take time to inspect, didn't touch asbestos-materials to see if it crumbled or didn't notify parents or employees," Restaino said. Out of 43 school districts inspected, 29 were in violation. The Region V inspection staff was recently doubled to eight.

Illinois treats asbestos as a health and public safety issue, said Ralph Morrisette, architect, school facilities and organization section, State Board of Education.

Under Illinois law, school boards can hire an architect to determine if school building conditions endanger lives. After a survey of the cost to remove the asbestos, the local district can levy a tax for the amount without a referendum. Because schools are able to raise the funds, most of those with asbestos are having it removed, Morrisette said.

Most Wisconsin schools have inspected for asbestos, reported Nori Roden, school asbestos program coordinator, Department of Health and Social Services.

Out of 3,027 schools, 3,006 inspected and 1,089 found friable asbestos. Corrective action was taken by 583: 395 rewrapped pipes, 94 removed asbestos, 33 enclosed it and 61 encapsulated it.

Wisconsin has had an asbestos program since 1980. The Department of Industrial Labor and Human Relations conducted asbestos inspections when it conducted fire and other safety inspections. Samples were analyzed by the state lab. The Department of Public Institutions targeted schools for the free inspections, helped with record keeping, and provided technical assistance and consultation services. The health department computerized and coordinated the data and consults on health effects of asbestos.

A position paper being developed by the health department will most likely recommend removal of all friable asbestos, Roden said. "We're cautious of encapsulation and enclosure," she said. Advantages of the temporary measures include less cost and time, but the disadvantage is the "asbestos is still in the building," Roden said.

Minnesota in 1983 authorized a $25 per pupil unit capital expenditure levy and aid for asbestos removal or encapsulation and PCB cleanup with Department of Education approval.

Region VIII

The major violation found in Region VIII is that schools "aren't willing to put up notices," said Steve Farrow, EPA asbestos coordinator for Colorado, Montana, North Dakota, South Dakota, Utah and Wyoming. Instead, schools are trying to remove or encapsulate the asbestos first, he said.

Of the states, Farrow said that Utah's problems were with pipes and boiler rooms, North Dakota was making progress and Wyoming had few major problems.

Chuck Johanningmeier, technical advisor for the region, said, "Many people hoped it would go away. Medically, it is just getting worse." A Fargo teacher had contacted the EPA after discovering asbestos debris left in a school storeroom. Not long afterwards, the lawyer for the teacher's estate reported the man had died of mesothelioma (a rare cancer associated with asbestos exposure).

Unqualified contractors can do more damage than if the asbestos was left alone, Johanningmeier said. A proposed measure before the Colorado Legislature will require contractors to be certified to work on asbestos.

In another case, a contractor left asbestos which students and teachers dusted up. As a result the EPA is helping write specifications in a contract for cleanup which will be available to others as well.

There are some bright spots as well. Johanningmeier praised the work of Gill Johnson, the asbestos coordinator for a Jefferson County, Colorado, district. Johnson overcame school resistance and succeeded in cleaning up the asbestos in the district's schools.

No Cavalry in Sight

Although asbestos was recognized as a nationwide health problem by the Congress in 1980, there's no real federal effort to protect the health of exposed school children. Even though most states have asbestos coordinators, few states mandate cleanup or provide funds for removal. Essentially, asbestos removal or cleanup is left up to local school districts. Local school officials may not be willing or understand how to inspect for asbestos. Some may not understand the health dangers or legal liability they incur by allowing asbestos to remain. Apparently, many refuse to adequately notify parents or teachers if asbestos is found. Even then, students have no choice but to attend the school and teachers may be fearful of retribution if they take action. Many schools don't have or don't want to spend the money it takes to remove or cleanup asbestos.

Alvin L. Alm, deputy administrator of the EPA, recently acknowledged that the agency was reconsidering its approach to asbestos in the schools.

* * *

Leonard P. Stavisky

State Responsibility for the Control of Asbestos in the Schools

Asbestos, widely used in construction, is hazardous to human health. Schools represent the most pressing concern for public policymakers who are faced with the asbestos issue. With few exceptions, compulsory attendance laws exist throughout the United States. Typically, state statutes prescribe that minors from six to 16 years old attend school for approximately 180 days a year. Parents and guardians have no discretion in this matter and those who refuse may be charged with neglect. As a result of these laws, government's legal and ethical responsibilities may be greater in this area than in others where one's presence is voluntary or where minors are not involved.[1]

On the school asbestos issue, the educational and public health mandates of existing state constitutions come into conflict. In the language of one state constitution: "The legislature shall provide for the maintenance and support of a system of free common schools, wherein all of the children of the state may be educated." The same constitution further stipulates that "the protection and promotion of the health of the inhabitants of the state are matters of public concern and provision therefore shall be made by the state and by such of its subdivisions (including school districts) and in such manner, and by such means as the legislature shall from time to time determine." Obviously, though teaching and learning cannot be suspended, the public deserves ironclad guarantees that the instruction will be offered in a safe environment.[2]

Such guarantees come in implied warranties of quality — the presumption that a product is free from substantial, latent defects which are not obvious through inspection; these appeared in Roman edicts as early as 150 B.C. In modern commercial practice, the term warranty has always meant that the conditions are exactly as they have been stated, that standards of quality exist, and that those in positions of responsibility recognize their obligation to repair or replace defective parts. Implied warranty of quality exist even in cases in which there is no sale. Thus, nonprofit institutions have been named as defendants under breach of warranty.[3]

Statutory law has extended the boundaries. In real property law, states have enacted warranties of habitability which presume that a dwelling is suitable for human habitation and that the occupants will not be subjected to conditions which are "dangerous, hazardous or detrimental to their life, health or safety." Similar language appears in occupational safety codes, public health laws and environmental protection legislation.[4] In recent decades, government has become a landlord — involved in the ownership and management of public housing. Formerly private buildings have been acquired through "in rem" proceedings resulting from non-payment of taxes. Does the warranty of habitability therefore apply to the public sector?[5] Does it extend to other physical settings such as schools? Presumably, when a child is enrolled in a public school, for which

taxes are paid in lieu of tuition, there is an implied warranty that professional services will be rendered in a building that is free from conditions and substances which are hazardous to health.[6]

Asbestos, a hydrated mineral silicate which was widely used for fireproofing, soundproofing and decorating during the post-World War II construction boom, was introduced in Great Britain in 1932 and in the United States three years later. Between 1946 and 1972, sprayed-on asbestos was used in school auditoriums, gymnasiums, classrooms, hallways and libraries. Of the one million tons consumed in the United States in a single year, the material was applied to insulation, ceilings, floor tiles, cement, roofing and shingles. Homes, offices, factories, government buildings, private institutions and places of public accommodation were laden with this ubiquitous substance. More than 3,000 known asbestos products came into use.[7]

Concern over the impact on human health arose as a result of the inordinately high rates of disease discovered among employees handling asbestos in mining, manufacturing and construction. During the 1950's and 1960's, clinicians and researchers reviewed the medical records of asbestos workers and established positive correlations between persons who had been exposed to extraordinarily high asbestos air concentrations and specific diseases such as: 1) asbestiosis, a non-malignant scarring of the lungs; 2) bronchogenic carcinoma, a malignancy of the lungs; 3) mesothelioma, a malignancy of the lining of the abdomen or chest cavity, and 4) cancer of the gastrointestinal tract (esophagus, stomach, colon or rectum). By the early 1970's, medical researchers at the National Cancer Institute demonstrated in laboratory experimentation that malignancies "comparable to those resulting from asbestos exposure in man, can be induced rapidly in the rat and hamster by direct intrapleural application of asbestos. Such experiments attest to the carcinogenity of asbestos and offer an excellent means of investigating those carcinogenic mechanisms involved," these studies concluded.[8]

Government has responded in various ways. Since 1970, the Occupational Safety and Health Administration (OSHA) has regulated working conditions in the asbestos industry. In 1973, the United States Environmental Protection Agency prohibited the spraying of asbestos materials for fireproofing and insulation. Five years later, the ban was extended to all forms of sprayed asbestos, including decorative applications. Agencies of government promulgated regulations to control the industrial discharge of asbestos materials into the air and water. The sale of spackling compounds containing asbestos and the use of asbestos in insulation fireplaces was halted. Placing asbestos on the list of hazardous materials is under consideration. In all sections of the country, monitoring and informational programs have been initiated by federal, state and local authorities.[9]

Efforts have also been made to verify the effects of asbestos in non-occupational settings, but here the information has been imprecise. Abnormally-high disease rates have been linked to people who live near asbestos mines and factories. Among the families of asbestos workers, diseases have been traced to the minute particles brought into homes of the workers' clothing, Nevertheless, attempts to define standards that would be applicable outside of industrial settings have been opposed by an unexpected source. Scientists who have worked in this field appear unwilling or unable to provide definitive answers to the question of what represents a "safe" level of exposure to asbestos over a given period of time. Researchers are currently unprepared to support publicly or privately an accepted standard such as nanograms of asbestos per cubic meter of air nor are they willing to risk their reputations or the health of the public by categorically stating that the presence of asbestos below certain levels is tolerable. In the opinion of many reputable scientists, there is no way to compromise with a carcinogenic substance.[10]

Asbestos fibers, which are neither chemically nor biologically degradable, are virtually indestructable. Once the particles have been released into the environment, the slightest turbulence disturbs those that have already settled. People are constantly exposed to asbestos in the air they breathe, in the water they drink and in the food they eat. Processed asbestos fibers are more hazardous than the natural mineral. The thin strands which are by-products of the manufacturing process are easily inhaled or ingested. Asbestos fills the urban environment as a result of incessant braking of motor vehicles, building construction and demolition projects, and the incineration of certain plastic products. In suburban and rural areas, asbestos exposure is most likely to stem from mines, mills, manufacturing plants and waste disposal sites.[11]

Although asbestos permeates the environment in various settings, outdoors the moving air currents disperse the particles to reduce the levels of concentration. Indoors, the presence of asbestos poses a special hazard. Architects have designed many structures with inoperable windows. At one time, planners even specified windowless schools for blighted urban neighborhoods. Within such enclosed ventilation systems, asbestos particles are continually recycled throughout these buildings.[12]

Most educational officials have not kept adequate records to deal with asbestos in their schools. State and local authorities never examined the building specifica-

tions to check for the presence of asbestos. Even when plans were reviewed by state agencies in order to determine eligibility for building aid, officials simply looked at the adequacy of the space in relation to the educational program. After a few years, those plans that had been filed by the school districts were routinely discarded in some states in order to "save space." As a result of a new wave of concern about asbestos in the schools, state and local educational authorities may be compelled to reassemble information which was once available to them when the schools were originally constructed or remodeled."[13]

Progress in this field has been painfully slow. By the late 1970's, only 27 states and the District of Columbia were known to have conducted any asbestos inspections. Approximately 15 states had looked at more than a few schools. Of these, New Jersey, Massachusetts and New York had each inspected more than 1,000 school facilities, while Indiana, Rhode Island, Michigan and Vermont had each examined more than 100 buildings. California and New Mexico had simply reported "many" inspections. Rhode Island, the only state which had presumably inspected all of its buildings identified asbestos in 19 locations. Seventeen states, primarily in the South, the Middle West and the Far West, had not reported any school asbestos inspections. In other states, the extent of the testing remained uncertain. Individual school districts undertook limited inquiries, but approximately forty per cent of the states in the nation had no asbestos programs at all. Nationally, no agency of the United States Government could provide reliable information as to how many schools had asbestos problems."[14]

Two principal methods exist for determining whether asbestos is present in a school — visual inspection and laboratory testing. The most common method of detecting asbestos in a friable or crumbling condition involves direct observation. Unfortunately, visual inspections can be quite subjective and deceptive. What appears to be asbestos to the naked eye may prove under a microscope to be some other material. On the other hand, asbestos may be concealed in unconventional forms. Laboratory analysis of air samples offers more reliable identification. However, the levels of asbestos may fluctuate dramatically from place to place within the same facility and vary from day to day, depending on how much activity preceded the collection of the sample."[15]

Funding poses another problem. Optical laboratory tests may cost $30 to $50 per air sample. To be accurate, multiple tests may be necessary; different locations within a building may have to be sampled at different times. Electron microscopic analysis may cost ten times as much as optical testing and finding competent laboratories is sometimes difficult. A Connecticut laboratory incorrectly labelled cellulose as asbestos. The error was not detected until the ceiling had been removed, at considerable cost to the local school district."[16]

Policymakers, the educational community and the public are caught in a cruel dilemma. There should be no danger to the life, health or safety of any child or adult in any school. On the other hand, the educational process cannot grind to a halt. Creating a sense of public panic or uncertainty is not the answer. Neither is indifference to the problem. What is needed is an immediate, responsible nationwide plan for school asbestos indentification and control. The commitment to act must involve lawmakers, boards of education and school administrators throughout the United States.

First, those entrusted with responsibility for the schools must become familiar with the fact that asbestos materials appear in various forms under different names such as chrysotile, amosite, crocidolite, tremolite, anthrophyllite and actinolite. Often, more than one form of asbestos is present and the fibers are frequently combined with other products.

While it would be desirable to deal with all types of asbestos at once, fiscal constraints dictate a strategy that focuses on those forms and conditions which knowledgeable scientists agree are hazardous to human health. Accordingly, many authorities have suggested that school officials concentrate on asbestos which has been sprayed on structures or applied in the form of plaster or textured paints. In addition, the physical condition of the asbestos should be considered. As a general guideline, an imminent hazard is likely to exist where the asbestos material is flaking, dusting, or shows similar evidence of damage, deterioration or disturbance because of abuse, abrasion, water leakage or forced air circulation which results in dispersing asbestos fibers and particles in the school."[17]

School-by-school surveys can be mandated by state statute or by the rules and regulations promulgated by the chief state school officer or the state board of education. With scientific and technical information provided by the state, preferably the superintendent of public instruction or commissioner of education after consultation with the department of health or the environmental protection agency, the school districts can proceed with the inspections. In most instances, the custodian who works in the school building daily is in a position to know where asbestos may be present. Regional training programs may be desirable to enhance the skills of those who conduct the preliminary surveys. Materials suspected of containing asbestos can be sent to approved

public or private laboratories for analysis."[18]

Once the asbestos has been identified and corrective action is required, there are three methods of dealing with the problem: 1) encapsulation, involving the use of a sealant which covers the original asbestos material and prevents further flaking; 2) structural containment, in which a permanent partition is installed between the asbestos area and the public and 3) removal of the asbestos."[19]

Each control method poses certain problems. A chemical sealant may be the easiest to apply and the least expensive technique, but it may not hold up for a long period of time. The very act of applying a chemical covering may damage some of the asbestos. Furthermore, in these days of mercurial changes in scientific data, there is no guarantee that a particular sealant itself may not subsequently stand accused as a hazard to health.

Structural containment is predicated upon the assumption that the area will not have to be accessible at a later date. Many school buildings have been designed to utilize the space between a ceiling and the floor above for electrical, plumbing, heating and ventilation installations. If a permanent partition is installed rather than a suspended ceiling made up of removable tiles, workmen may not be able to check faulty wiring, water leakage or a breakdown in the air circulation system. Also, although the asbestos will no longer be visible to the pupils and staff, asbestos particles may continue to be recycled through ventilation ducts after a new structural separation has been built.

Total removal is obviously the most comprehensive method. Nevertheless, substantial skill is required. The act of extricating the asbestos may pose a hazard for the occupants of the building and the workmen. Consequently, removal may have to take place during vacation periods. In most cases, work areas have to be sealed off from other sections of the building and care exercised to guarantee that asbestos particles do not become lodged in the air circulation system. Removal is also the most expensive program.[20]

Although not as dramatic, asbestos poses the same type of public health menace as the Three Mile Island nuclear reactor accident in Pennsylvania, the radiation near the desert testing sites of Utah and Nevada or seepage of toxic wastes from the Hooker Chemical Company in the Love Canal area of western New York. Public policymakers cannot risk having a whole generation of young adults discover 20 or 30 years from now that they have contracted lung cancer and other malignancies as a result of prolonged exposure to asbestos in the schools.

The United States Environmental Protection Agency is considering a plan for long-term surveillance of children exposed to asbestos in seriously contaminated schools. Unfortunately, the effort is fraught with complications. In an unpublished, in-house report, EPA acknowledges that the effects of asbestos exposure will not be evident for many years to come. "Medical examination of children now, whether to document exposure or to detect clinical disease, would be fruitless," the staff report concludes. "The psychological and monetary costs would be considerable. If a means were available to identify exposed school children so that they could be located years later, positive steps could be taken. As adults these persons could be informed of their childhood exposure and advised of the proper measures they personally could take." In the next breath, however, the agency has acknowledged the superficial, conscience-soothing nature of this recommendation, by admitting that "although no cures are currently known for asbestos-induced diseases, therapeutic research continues; it may be possible by then to apply *palliative* (emphasis added) measures. Without a means of identifying these children now almost nothing can be done to help them in the future." As a temporary expediency, some EPA officials have suggested issuing Social Security numbers to these children so that at a later date someone could open the sealed files and advise these people of their fates."[21]

The federal government, the states and local school districts should obviously pursue immediate programs of prevention and abatement instead of waiting to notify potential cancer victims that they have been needlessly exposed to an incurable disease. In the absence of an adequately-funded federal policy which would require appropriate corrective action throughout the country, the most promising approach seems to fall within the realm of the states. State legislation could establish goals and procedures which would:

1. Develop precise, scientific definitions of asbestos materials.

2. Identify the circumstances under which certain forms of asbestos pose hazards to human health.

3. Require the state commissioner of education — in consultation with state health or environmental officials — to: a) inform school authorities of the asbestos hazards; b) advise school districts of the methods of identifying, sampling and testing materials suspected of containing asbestos and constituting a health hazard; c) direct the school districts to undertake surveys of school buildings throughout the state; d) maintain current records regarding the condition of asbestos in the schools based upon periodic surveys by local school officials or inspections by the state education agency; e) provide scientific and technical assistance to the

school districts; f) require the districts to prepare and submit abatement plans; g) promulgate standards under which the containment or removal of asbestos shall proceed; h) establish regional training programs for contractors and supervisors engaged in eliminating asbestos hazards and i) monitor the implementation of these programs.

4. Establish timetables for abatement programs within state school asbestos legislation and create advisory councils of representatives from state education agencies; local school districts; medical, public health, architectural and engineering professionals; employers and employees in the construction industry; parents and the general public.[22]

Implementing such a state plan will inevitably be influenced by considerations of cost. New York City school officials estimated that the price of containing or removing all of the asbestos found in nearly 300 schools could easily range between $35 and $50 million. While construction costs are not uniform throughout the nation, an effective program in any state is certain to be expensive. In several New Jersey schools, expenditures for sealing ranged from $1 to $2 per square foot, while removal and replacement of asbestos ceilings varied between $2 and $5 per square foot. Without additional funding from federal or state government, real danger that school districts facing fiscal constraints, taxpayer revolt and declining enrollment may delay the implementation of asbestos identification and abatement.[23]

Asbestos control is not an ordinary building need. Surely in a health emergency, an overriding state or national obligation might be invoked. However, certain guarantees are required. A building treated for asbestos should not be one which is likely to be closed within the foreseeable future because of age or declining enrollment. The state must expect, and receive, adequate assurances that there are no other facilities available to accommodate the students and that the building utilization rate is above a minimum percentage. The anticipated life of the structure should also be considered before asbestos funding is provided. School officials must be prepared to justify the continued occupancy of any building for which major asbestos abatement is ordered.

What is the federal role in the detection, containment or removal of asbestos? In 1980, a year after the enactment of the New York State Asbestos Safety Control Act, parallel legislation was approved by Congress and signed into law by President Carter. However, there is no certainty that the United States Asbestos School Hazard Detection and Control Act will provide immediate and adequate relief for school systems that are concerned with asbestos problems. Although the legislation set up a fund for testing and evaluating potential hazards and ostensibly created a loan program to assist in the containment or removal of asbestos, the program is presently unfunded. The future of this program is further complicated by the results of the 1980 presidential election and the apparent unwillingness of the Reagan administration to implement new federal regulations for school asbestos control.[24]

There are public policy lessons to be derived from the school asbestos experience. Initially, lay decision makers feel unqualified to judge public health issues. Eventually, they may recognize that there is uncertainty even within the scientific community, that potential victims have not been warned of imminent life-threatening hazards and that a chasm exists between research and public policy. Practitioners in medicine and public health, producers and distributors of asbestos as well as the construction industry neglected to subject the mineral to ample, long-range testing before using it. Tragic and unforeseen mistakes were made by architects and engineers who specified the incorporation of asbestos in building plans and by the educational authorities who approved and then destroyed the working drawings which would have illuminated its use and the extent of the present predicament. Finally, state and local governments nationwide incorporated the use of asbestos in building codes and issued certificates of occupancy attesting to the safety of the structures.

Nevertheless, the search for villains is pointless. Decisions do not wait for convenient time or circumstances, nor pause for optimum technical nor fiscal resources. Policy makers who are presently confronted with urgent crises may not have created the original conditions which they are called upon to correct. Furthermore, some problems defy government's best available solutions.

The decision making process has been compared to a multiple choice examination. In approaching the school asbestos issue, public officials could adopt a wait and see attitude or appoint a study commission. In this situation, such a choice would be deadly, for it would endanger the lives of a whole generation of students and educators who would be needlessly exposed to a known carcinogenic substance.

A second alternative would be to raise the level of public consciousness, to alert the teachers and parents of school-age children that asbestos, in various forms, pervades the educational system. In so doing, the alarmists would create a climate of fear, making it impossible for instructional programs to continue until all questions have been answered. However, a third more realistic option is to undertake an immediate

investigation of the scope and nature of the problem and use every available federal, state and local resource to finance corrective action.

Sensing the complexity of the total picture, reviewing the available scientific data, assessing the impact of each option, accepting responsibility and, ultimately, deciding upon the most propitious policy are essential ingredients for dealing intelligently with the school asbestos issue. However, any course of action may establish new conditions for which the ramifications are unknown or unanticipated. Beyond the schools, there are libraries and museums, community centers and civic auditoriums, as well as other public buildings and quasi-public facilities which contain asbestos. The legal and ethical principles inherent in the doctrine of implied warranty will not stop at the schoolhouse door. Future legislation and litigation will expand the boundaries.[23]

10. A nanogram is a billionth of a part. The scientific community's unwillingness to agree upon "standards" for asbestos in non-occupational settings was expressed at a conference convened by the New York State Assembly Education Committee on February 6, 1979, in Albany, New York. Officials of the State Health Department, the State Education Department and the Environmental Sciences Laboratory of the Mount Sinai School of Medicine, among others, attended this meeting. A subsequent memorandum from an official of the State Education Department stated the problem in this manner: "Health authorities will not establish threshold levels for exposure to asbestos fiber in the air [,] stating that no exposure is acceptable." Memorandum from C. Stanton Baltzel to Milton Musicus, "Proposed Legislation Pertaining to Asbestos," March 6, 1979. The Environmental Defense Fund also maintains that "there is no safe level of exposure to asbestos . . . . Even a small exposure carries with it a meaningful and avoidable risk. ASBESTOS

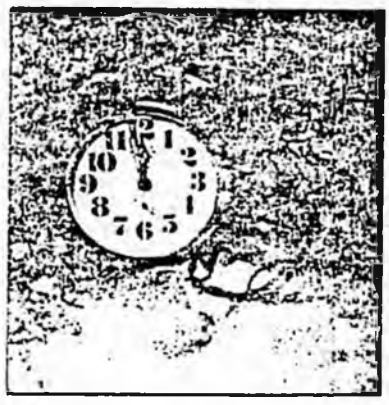
The clock is ticking in your schools, and inaction could prove to be devastating



By Kathleen McCormick

ALL TALK AND no action: That's the way the asbestos-in-schools game has been played in the past several years by the federal government and thousands of U.S. school systems. It's time—past time—to respond to the potentially fatal hazards of asbestos in our schools. The ante has been raised in recent months, and from the look of things, school boards that haven't complied yet with federal regulations concerning inspection, notification, and record keeping could be in for a rough time. And even if you *have* made the inspections, posted the required notices, and notified parents and staff of potential health risks in your schools, you still might be the target of a lawsuit should a student or staff member become ill or die because of an asbestos-related disease.

That's not exactly reassuring news, but you can take some steps to meet federal regulations and protect your students and staff. Prudent school leaders would do well to consider carefully some of the recent developments in medical research, federal enforcement, and legal actions. Read on:

The medical risks

As far back as the 1930s, manufacturers of asbestos knew the substance was a killer. But the American public first became aware of the hazard when the Environmental Protection Agency (E.P.A.) banned some uses of sprayed-on asbestos in 1973, after research concluded that thousands of shipyard workers who had handled the substance during World War II were dying (or had died) of asbestos-related diseases. Five years later, an award-winning article in this magazine broke the disconcerting news to school leaders that U.S. schoolchildren faced imminent danger from asbestos: In schools built between 1946 and 1973, tens of thousands of tons of asbestos products were used for fireproofing, soundproofing, and insulating ceilings, walls, pipes, and boilers. As friable (loose or flaking) asbestos materials age, they release tiny particles into the air; if enough particles are inhaled, they can cause cancer and a variety of respiratory ailments. And if these materials get wet (say, from a roof that leaks) or are disturbed (perhaps by maintenance workers who fix electrical wiring in the ceiling), countless particles are dispersed, presenting an even greater health hazard.

The asbestos ante has been raised in recent months, and boards that don't respond could be in for trouble

What are the risks? Cancer, for starters: The most common form of asbestos-related cancer is lung cancer. Next is mesothelioma, a rare and fatal tumor of the membrane linings in the chest or abdominal cavities; its only known cause is asbestos. Exposure to the deadly mineral filaments released by asbestos also has been proved to cause cancers of the colon, rectum, stomach, esophagus, kidney, larynx, and pharynx. An associated disease is asbestosis, a scarring of the lungs that progressively robs the victim of breath and sometimes of life. The effects of asbestos are pervasive even among people who don't work directly with the stuff: Research has shown that among the immediate families of asbestos workers, 1 percent of the family members died from an asbestos-related cancer, and one-third were afflicted with asbestosis.

The number of airborne asbestos particles in your schools, of course, is considerably smaller than what asbestos workers once were exposed to on a daily basis. But that doesn't reduce the overall risk—nor does it absolve you from the responsibility of dealing with the problem. Dr. Edwin C. Holstein, clinical assistant professor at the Environmental Science Laboratories of Mount Sinai School of Medicine in New York, explains: "All scientific evidence suggests there is no safe dose of asbestos. Any exposure, no matter how small, will increase the risk of cancer." Dr. Holstein and his colleagues at Mt. Sinai, the preeminent U.S. institution for medical research on asbestos, have concluded the substance is a public health problem that must be remedied as soon as possible.

"For any one person, the risk is low," says Dr. Holstein. "But for a school system, sheer numbers tell you that you have a problem. It's like the half-full/half-empty glass of water," he notes. "The optimists say the health risks of asbestos are tiny; the pessimists—including public health authorities—know some people are going to die from exposure to asbestos."

Kathleen McCormick is assistant editor of the JOURNAL.

OPINIONS EXPRESSED BY THE JOURNAL OR ANY OF ITS AUTHORS DO NOT NECESSARILY REFLECT POSITIONS OF THE NATIONAL SCHOOL BOARDS ASSOCIATION

And they'd like to see schools help prevent those deaths—no matter how few—by removing the risk.

It could be many years before we're able to draw conclusions on the effects of asbestos exposure in schools. The risks vary, of course, depending on individual people, the condition and location of asbestos materials in school buildings, and the amount and duration of exposure. The appalling truth, according to Dr. Holstein: "It's false reassurance if no one is sick [now], because they might be sick by 1990 and dead by 1992." But despite the tendency for people to personalize this kind of highly emotional, life-and-death issue, he says, school board members and administrators should assure concerned parents that "there's no need to get hysterical; it's a problem that can be remedied."

The remedy

At the very least, you already should have complied with all federal regulations pertaining to asbestos in schools. Three sets of regulations have been issued. First, Department of Education (ED) regulations specify *how* states must distribute information on asbestos to schools, according to the Asbestos School Hazard Detection and Control Act of 1980. Second, Occupational Safety and Health Administration regulations detail procedures for the protection and decontamination of asbestos abatement workers and for measuring airborne asbestos. Schools engaged in containing and removing the friable fibers must comply with these procedures. Third—and more to the point—are the E.P.A. regulations: As of June 1983, you're responsible for having met the requirements of Section 6(a) of the Toxic Substances Control Act (T.S.C.A.), which were specified in "Friable Asbestos-Containing Materials in Schools; Identification and Notification Rule" (47 *Federal Register* 23360, May 27, 1982).

E.P.A. issued this rule because its Technical Assistance Program (TAP), launched in 1978, had limited success in getting schools to comply voluntarily with previous E.P.A. inspection and record-keeping guidelines. The T.S.C.A. rule applies to all elementary and secondary schools, except those built after December 31, 1978, and those that can document they already have checked buildings and either found no friable asbestos or satisfactorily dealt with the material. Schools were given one year to comply with the requirements.

(1) *Inspection.* You must inspect each building for friable materials.

(2) *Sampling.* If you find friable materials, you must take samples, following E.P.A. instructions.

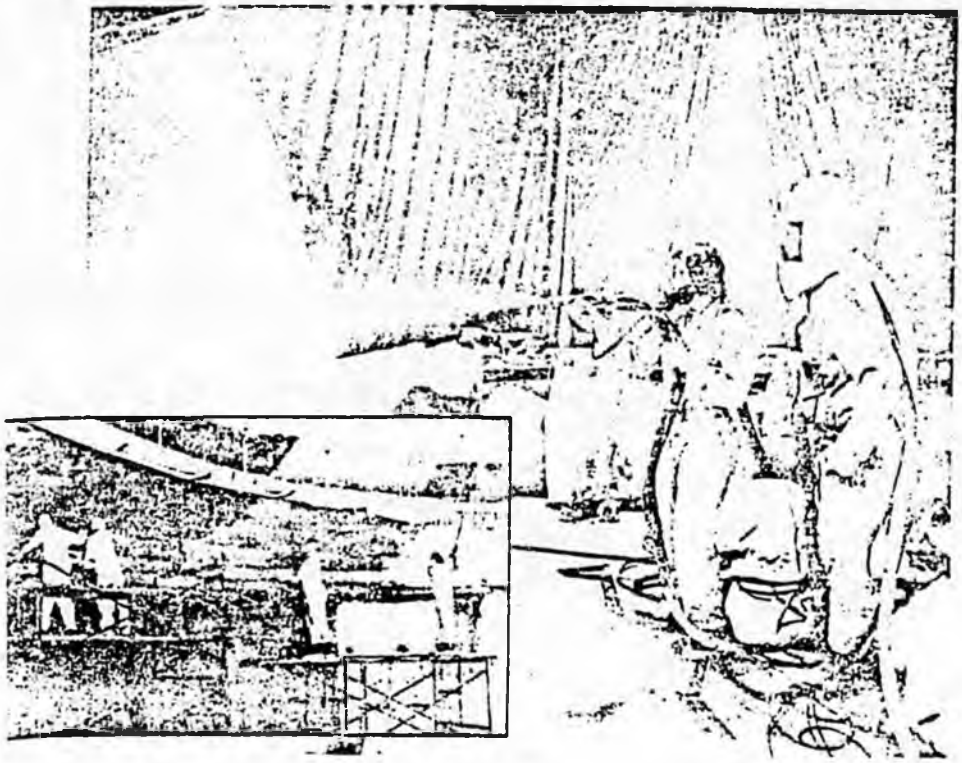
(3) *Analysis.* A qualified laboratory must perform an analysis using polarized light microscopy, a sophisticated (and expensive) technique for measuring the amount of asbestos fibers in asbestos-containing materials.

(4) *Warnings and notifications.* You must post warning signs wherever you find friable asbestos-containing materials in schools—and send written notification to the staff and the P.T.O. of each school involved, specifying where the hazardous materials are located.

Note that the T.S.C.A. rule does *not* require you to remove, cover, or encapsulate the asbestos; it's up to individual school systems to decide how to dispense with the offending material. The rule also doesn't require you to report your findings to E.P.A., although you *do* need to keep complete and detailed records documenting your compliance with the T.S.C.A. rule.

Once you've found asbestos in your schools, you have a choice of four acceptable ways to resolve the problem: (1) removing the material altogether; (2) enclosing the areas containing asbestos to prevent fibers from escaping; (3) encapsulating completely the area that contains or is coated with asbestos; and (4) observing and maintaining the affected surfaces to avoid any damage that could cause the release of more fibers. Experts say removal is the only surefire way to rid your schools finally and completely of asbestos hazards. But the removal process itself is an extremely dangerous undertaking; a faulty or incomplete removal job could present even greater health hazards to your students and staff, as well as to asbestos abatement workers. So before you contract for any asbestos containment or removal work, refer to the technical advice presented in the E.P.A. document, "Guidance for Controlling Friable Asbestos-Containing Materials in Buildings," published in March 1983. And even though other measures might work in some schools, many school systems have found that public pressure is brought to bear on the school board to remove asbestos completely—regardless of expense.

The cost



E.P.A. estimates that as many as 14,000 U.S. schools might contain dangerous friable material composed of more than 1 percent asbestos—which means more than 3 million students and 250,000 staff members are at risk right now. The agency estimates the total cost of asbestos abatement at $1.4 billion nationwide, or $100,000 per school building. Some school systems already have spent millions. According to Dwight Brown, formerly asbestos coordinator for E.P.A. Region IV in Atlanta, schools can expect to pay between $3 and $10 per square foot for asbestos removal—and the price can go as high as $28 per square foot. What drives the cost so high is the need for sophisticated analysis equipment and clothing to protect workers, Brown explains. Analysis of asbestos samples using an electron microscope goes for between $200 and $500 per sample—and you might need scores of samples to determine the hazard level in only one school.

Without a doubt, asbestos is a financial burden for school systems. At President Reagan's behest, Congress repeatedly has refused to provide funds to accompany the federal regulations it requires schools to obey. Part of the Asbestos School Hazard Detection and Control Act of 1980, for example, called for $700 million in grants and interest-free loans to help state and local education agencies identify and correct asbestos hazards in schools; no appropriations were made. Don't count on E.P.A. for changes in the funding situation, either: Officials there say they have no plans to request or provide money for school systems to deal with asbestos problems.

School systems in several states are fortunate to be reimbursed for expenses they incur in removing asbestos. In the past four years, for example, New York has given more than $12 million in grants and state building aid to help local asbestos removal programs. And in the same period, Florida has appropriated $10.5 million for asbestos removal. These are notable exceptions, however. Most school leaders have to dig into general operating budgets to come up with the funds. Such cost considerations, along with federal regulations that are at once technical and vague, have caused many school leaders to avoid the issue of asbestos altogether. But ducking the issue can only bring harm to your schools.

The consequences

Forewarned is forearmed: E.P.A. is stepping up its monitoring of schools' compliance. Although the agency has no conclusive statistics, E.P.A. officials say the rate of noncompliance by schools is high. Proferred proof: An E.P.A. staff

Space-age procedures are needed to eliminate asbestos from schools. Here, abatement workers wet down and remove the substance from a school gymnasium.

memorandum in August 1983 indicated that 80 percent of a sample of 167 schools were in violation of the E.P.A. inspection rule. And, according to E.P.A.'s compliance monitoring office, inspections conducted in 275 school systems since June 1983 show that 190—nearly 70 percent—had not complied with E.P.A. regulations on obtaining asbestos samples, notifying parents, keeping records, and so forth. The 275 school systems inspected include approximately 80 of the 100 largest school systems in the U.S.

Now something is being done about that kind of slackness: In fact, E.P.A. inspectors could come knocking on your door any day, asking to see your records. You could be cited for violations of T.S.C.A. on these grounds: failure to inspect schools; failure to sample friable materials; failure to analyze asbestos samples; failure to notify parents and staff; and failure to keep records.

Depending on the number and type of violations, your schools could be fined as much as *$25,000 per day per violation*—an amount that quickly could snowball into an outrageous sum. Here's how the fine system works: If E.P.A. finds you haven't complied with T.S.C.A., your central office will be given 30 days to certify compliance in writing. If certification isn't received within 30 days, E.P.A. files a civil complaint against your schools. Agency officials then will ask to see a compliance schedule as a demonstration of your good intentions. If these negotiations fail—if you don't cooperate—E.P.A. will attempt to collect the fines it has levied against your schools.

If you think the E.P.A. is making idle threats, think again: Under the direction of old/new Director William Ruckleshaus, E.P.A. has become more vigilant [illegible] is going after asbestos in schools as one [illegible]s Top Ten priority items. E.P.A.'s design in these aggressive actions is to force schools into compliance through pressure from the community, according to Connie DeRocco, a specialist in E.P.A.'s asbestos enforcement program. It stands to reason that school board members and administrators would tend to choose compliance over the chance that a concerned parent might blow the whistle on the schools' negligence.

Other signs that E.P.A. means business: The agency is doubling its monitoring staff for fiscal year 1985. And then there's the Philadelphia case: E.P.A. has threatened to set a precedent by filing a civil complaint for noncompliance against the Philadelphia schools, to the tune of $378,000 in fines ($6,000 for each of 63 nursery and day care centers housed in buildings leased by the school system that weren't inspected for asbestos). School officials are trying to head off the complaint by inspecting the buildings; E.P.A. officials say they are willing to negotiate as long as the Philadelphia schools can show they mean to comply fully with E.P.A. regulations.

But public pressure also is mounting on E.P.A. itself to issue more stringent and specific regulations on asbestos in schools. In response to a petition filed last November by the Service Employees International Union—prompted by the asbestos-related death of a school custodian—E.P.A.'s Ruckleshaus announced in late February that the agency will set formal standards for schools to remove or seal crumbling asbestos materials.

The legal ramifications

Before you make any decisions about asbestos in your schools, consult your school attorney. Advice from Dwight Brown, who has conducted seminars on asbestos in schools for the past five years: Devise a three-part legal action plan with your attorney concerning cost recovery, tort claim defense, and the process of administering contracts for removing and disposing of asbestos.

One legal question on everyone's mind: Can you recover costs of removing asbestos from the manufacturers of the material? "The Attorney General's Asbestos Liability Report to the Congress," published in September 1981, says schools should have a good chance of recovery in court. The bankruptcy last year of a major asbestos producer, Johns Manville Co., cast a pallor over what some school attorneys had held were excellent chances to recover costs. But in February, Lexington County School District No. 5 in South Carolina brought suit against U.S. Gypsum Co. to recover approximately $300,000—the cost of removing asbestos from Irmo High School. (The potentially precedent-setting case was about to come to trial as the JOURNAL went to press.) The school system is being represented by Daniel A. Speights of Hampton, S.C. Speights anticipates having filed as many as 30 asbestos-related lawsuits against U.S. Gypsum Co., National Gypsum Co., and W.R. Grace & Co. by July on behalf of school systems in Florida, Alabama, Mississippi, New Hampshire, and other states. He says these cases stand a "good chance" of winning. The Lexington suit, then, could open the floodgates for thousands of lawsuits against asbestos manufacturers.

Other legal issues you should be aware

Asbestos-control funds sought from legislatures

The Environmental Protection Agency is threatening to require schools to eliminate asbestos or face closure.

In autumn 1982, the U.S. House of Representatives voted to appropriate $50 million to provide school districts with interest-free loans to help defray the cost of removing or controlling asbestos in school buildings. But the measure, authorized under the Asbestos School Hazard Detection and Control Act that was passed in 1980 but never funded, failed to win the support of the Senate. When a conference committee also decided against asbestos-control funds, the chances that Washington would provide money for removal became remote.

The defeat of the funding measure is likely to mean that state legislatures will feel increased pressure from school officials to come up with asbestos-control funds. Some states — New York and Alabama, for example — already have provided such funds. Alabama uses a $75-million fund drawn from oil and gas revenues. In Mississippi, state education officials planned to go to the Legislature to ask for funds to offset the estimated $20 million it will cost to remove asbestos from schools, schools.

The continued absence of federal funding comes at a time when public pressure to deal with asbestos in the schools is increasing in many areas, in part because the Environmental Protection Agency may now issue a press release announcing which schools have not met the requirements of its regulation. Under the EPA regulation, all public and private schools were required to inspect for friable (crumbling) asbestos by June 28, 1983. If they found asbestos but took no action, the schools were required to notify parents and staff members. Although there is no federal requirement that asbestos be removed from the schools, the belief was that knowledge of its presence would generate enough public pressure to force action.

What this strategy of the EPA did not take into account, however, is that many school districts lack the money to pay for the often costly abatement procedures, and would instead simply fail to notify anyone of the presence of crumbling asbestos. As of last fall, an EPA survey outlined in an internal memorandum found that about 66 percent of all schools had not complied with some component of the regulation. The most common violation, the survey found, was failure to notify.

Although more school districts are belatedly complying with the regulation, according to EPA officials, the problem of funding remains serious for some. A report prepared for the Senate Appropriations Committee by the U.S. Department of Education estimated the cost of removing asbestos from schools nationwide at $1.4 billion. Under the loan program authorized in the 1980 legislation, the federal share of this would be $700 million. Acknowledging that there are no firm data to support this estimate, the report places the number of schools with an asbestos problem at 14,000. The estimated cost of removal is $100,000 per school, according to the draft report. That figure is dramatically higher in some areas: Jackson, Miss., faces a $6-million bill, and in Philadelphia school officials estimated the cost at $17 million. Others, of course, will require much less money because their asbestos situation is less dire.

A growing concern that they will be held liable for any asbestos-related illness — cancer, for example — contracted by students or staff is also prompting some school officials to step up the removal process and accelerate their quest for outside funding. Lawyers who handle asbestos litigation argue that, although no school suit of this type has been filed, school officials who do not remove a substance known to be hazardous will indeed be legally liable.

Some school districts — about 35 as of last fall — have filed suits of their own against asbestos manufacturers. Should one of these cases be decided in favor of a school district, more suits may follow, and favorable rulings would allow districts to recoup the cost of removal. Until then — barring the possibility of federal funding — districts have few places to turn and state legislators may find themselves the recipients of pleas from school officials.

— Susan Walton

States help employees buy out failing firms

Since the mid-1970s, more than 6,000 businesses across the nation have become, wholly or in part, owned by their employees. In most cases, employees have simply purchased stock through Employee Stock Ownership Plans (ESOPs), and there has been little state involvement.

When the number of plant shutdowns and relocations rose during the recent recession, however, legislators in several states sought ways to encourage "buyouts" of ailing firms by employees to save their jobs.

At least 12 states — California, Delaware, Illinois, Maryland, Massachusetts, Michigan, Minnesota, New Jersey, New York, Ohio, Oregon, and West Virginia -- have laws concerning worker ownership. Although some of these laws simply direct that state agencies study the issue, others, such as in California, Illinois, Michigan, and New York, have broader provisions that provide venture capital, technical assistance, and other help to workers attempting a buyout.

Maryland and Wisconsin also have strong legislation pending, while an attempt to add to New Jersey's law was vetoed last year by Governor Thomas H. Kean.

Essentially, there are two types of employee buyouts. The first is the most widely publicized — but least frequent — when, in a last-ditch attempt, employees try to save their jobs by buying a failing or unprofitable plant in danger of being closed. Weirton Steel in West Virginia is a recent example. This kind of buyout, however, constitutes "only about 1 percent of the total," according to Corey Rosen, director of the Center for Employee Ownership in Washington, D.C.

Far more common are ESOPs. In a typical plan, workers are simply offered company stock at market value rates.

Workers of firms that offer ESOPs typically own from 15 to 30 percent of the stock, although often the stock offered is nonvoting. ESOPs are encouraged by various federal tax incentives, and little state legislation has been enacted.

Instead, some state lawmakers have designed their efforts specifically to help employees purchase failing firms, particularly in already hard-hit urban areas. For example, in Illinois, Democratic state Representative Wyvetter H. Younge, hoping to "subsidize employment rather than unemployment," sponsored a bill that passed and was sign-

Asbestos: Still a danger in schools

by Elaine S. Knapp

For Phyllis Adams and Ann Gibbs the last year has been a frustrating one—trying to get their local school board to remove asbestos from the school their children attend.

"It's frustrating, our children are being poisoned and there's not anything we can do," Mrs. Gibbs declared. What the Lexington, Kentucky, housewife has done is work through the PTA, form a group of concerned parents, go door-to-door telling parents of the danger, gather hundreds of signatures on petitions, read volumes on asbestos, call and write federal agencies and confront the school administrator and board.

After a year of parental pressure being applied and at least a decade after school authorities knew of the asbestos hazard, Mrs. Gibbs said, "We don't think anything will be done until the government makes them (the school board)." School authorities maintain the asbestos will be cleaned up if money is available for renovation next year.

Ironically, the major government effort to control asbestos lies in Mrs. Gibbs and others like her. Telling parents and teachers that their school has asbestos and relying on them to pressure local action is the heart of the U.S. Environmental Protection Agency's (EPA) strategy to rectify the nationwide problem of asbestos in schools.

No effective federal program exists to protect schoolchildren from asbestos, state efforts vary widely and local schools often ignore the danger due to the cost of cleanup.

Asbestos dangers

Any exposure to asbestos involves some health risk, according to the Congress, the EPA and the scientific community. Children are especially vulnerable, according to the EPA guidance document on asbestos sent to schools. Their remaining life expectancy provides the 20 to 40 years it takes for disabling and fatal asbestos-related diseases to develop. Large numbers of children may be exposed in a contaminated school and exposure is continuous during the school year. Children are active and breathe more frequently than adults, possibly inhaling more asbestos fibers. Smoking can increase the cancer risk due to asbestos exposure.

Most hazardous is friable asbestos that can be crumbled. It sends deadly fibers into the air which may lodge in the lungs indefinitely, according to EPA's guidance document. Asbestos workers often develop a chronic and debilitating lung disease called asbestosis. Lower and shorter exposure can result in death many years later.

Asbestos diseases include: 1) asbestosis, a disease in which asbestos clogs the lungs, 2) pleural calcification, a deposit of calcium salts in the lung lining, 3) malignant tumors of the lung, 4) mesothelioma, a rapid and fatal cancer of the lung and 5) intestinal and uterine cancers.

Hot potato

Asbestos in the schools has been a "hot potato" tossed among various levels of government and federal agencies. One reason is that removal of asbestos can be quite expensive, especially if large areas of buildings are affected. Funding is basically up to local schools as is asbestos detection and control. No federal funds are available and state aid varies.

The U.S. EPA requires schools to inspect for asbestos and notify parents and [school] employees of asbestos hazards. The EPA doesn't require removal or abatement. "The theory is that PTAs and employees would pressure local districts to take remedial action," said Terrell Hunt, assistant to EPA Deputy Administrator Alvin Alm.

However, a recent internal EPA report found that many schools did not meet EPA's June 1983 deadline for asbestos detection, record keeping and notification.

No federal funds

Federal funds of $172 million authorized by the Asbestos School Hazard Detection and Control Act of 1980 were never appropriated. Grants were promised for schools to identify asbestos hazards and loans for mitigation of asbestos hazards. But funds were never requested by the Department of Education, reported John Bennett, aide to U.S. Representative George Miller, D-Calif., who sponsored the act. In 1983, a $50 million recommendation by the House was omitted in a House-Senate conference.

The U.S. Department of Education had a task force which set standards for state grants in 1980, according to W. Stanley Kruger, deputy director for state and local programs. However, when the program wasn't funded, the department "deferred to EPA," Kruger said.

Under pressure from Congress, the department reactivated its task force in October 1983 and is gathering information on asbestos to send to chief state school officials, Kruger said. The department also reactivated its requirement that states file plans for asbestos in the schools' programs and report on their progress every six months. All but two states have filed.

EPA's program

The federal effort has largely been a requirement by the EPA that schools inspect for asbestos hazards, sample and analyze material to determine if asbestos is present, keep records of the inspection, post notices, and notify parents and employees if asbestos is found. Although schools were to comply with the rule by June 1983, the EPA doesn't know how many did. It does not require schools to report to it and must send federal inspectors to schools to check their records. EPA staff said when the EPA regulation was written that the administration op-

This is a reprint of a portion of an article appearing in State Government News, *March 1984. It is authored by and printed with permission of Elaine S. Knapp, its editor.*

posed imposing a data reporting requirement. The EPA recently doubled its field force of inspectors by adding 16 people through a contract with the American Association of Retired Persons, Hunt said. These include retired architects and engineers. Primarily, EPA staff look at school records and physically inspect some schools. However, there are not enough inspectors to cover but a small portion of the nation's schools.

In providing technical advice, EPA can help schools determine the best strategy for evaluating the risk and responding to asbestos, Hunt said. He said that anything short of removal is considered a short-term solution.

Connie Derocco, environmental protection specialist with EPA, said that out of 1,527 schools inspected in 468 districts, some 60 percent did not comply with EPA rules. Most failed to notify and warn PTAs and employees of asbestos materials [manufacturers]. Schools know they will be pressured once the word is out, and they are hesitant to deal with the asbestos problem, Derocco explained. After receiving a notice of noncompliance, schools have 30 days to act before the EPA files a civil complaint.

Labor union concern

An estimated 3.24 million schoolchildren and 648,000 school employees are potentially exposed to asbestos, according to Kitty Conlan, research analyst with the Service Employees International Union (SEIU).

The SEIU is lobbying Congress to fund the 1980 act for grants and loans to schools. Schools don't have the money to clean up on their own, Conlan said. "It's a nationwide problem which affects the health of millions of people."

SEIU is suing the EPA to require schools to clean up flaking asbestos. "Schools say if EPA thinks asbestos is so bad, then EPA would require them to get rid of it," Conlan commented.

EPA does give schools good technical advice on how to get rid of asbestos, Conlan noted. But some schools accept the lowest bid rather than follow EPA guidelines. If the cleanup is not done right, the asbestos danger can be worsened.

Conlan said SEIU doesn't think suing asbestos' manufacturers is worthwhile, citing lack of action on suits filed by asbestos workers. "We're hesitant to have our members litigate themselves to death," she said.

Conlan added that school districts can also be held responsible for asbestos. "They can face a big liability," she commented.

Lawsuits filed

A number of lawsuits on behalf of school boards and building owners in Kentucky, Mississippi, New Hampshire, Florida, South Carolina, Alabama and Tennessee have been filed by a South Carolina law firm.

Daniel Speights (a school board attorney) noted that legal theories available to school boards against manufacturers of asbestos include: contract (the products were not fit for the use intended), negligence (the manufacturers were negligent in informing users of the risks associated with the products), strict liability (manufacturers should be strictly liable for failing to warn of asbestos hazards), and restitution (manufacturers have a duty to abate the hazard).

A civil action filed on behalf of the Barnwell, South Carolina, school district notes that school districts and public officials could be held liable for failing to abate a health hazard.

A September 1981 report by the U.S. attorney general to Congress recommended that school authorities seek to recover asbestos abatement expenses from asbestos manufacturers. The report said federal litigation would be ineffective unless Congress imposed liability on asbestos manufacturers.

Asbestos manufacturers are being sued by at least 20,000 people on the grounds that the companies knew of asbestos hazards and covered them up, according to a September article in the *National Journal*.

A 1983 report from the Rand Institute says that asbestos litigation and compensation has cost an estimated $1 billion over the past decade. Only 37 cents of every dollar went for actual compensation to plaintiffs. Estimates of the number of deaths due to asbestos over the next 30 years range from 74,000 to 265,000.

What you should do about asbestos in your school

Given current asbestos rules and regulations, PTAs should check on the following:

1. Was each school in your district inspected for friable asbestos? If not, request this action immediately.
2. Was an analysis of asbestos samples, using polarized light microscopy, conducted?
3. Are records of the asbestos inspection on file in the school district?
4. Does the PTA have a copy of the report in its records?

In schools where asbestos was found, has the school complied with the following:

1. Did the school district notify the children's parents, either directly or through the PTA?
2. Were school employees notified of the location of the materials?
3. Did the school post a standard form in administrative and custodial areas?
4. Are measures being taken, if not already completed, to remove asbestos in the school?
5. Did the school district provide maintenance and custodial employees with instructions for reducing exposure to asbestos?

If asbestos was found in your school, but corrective measures are not being taken, the following steps should be pursued:

1. The PTA should work with the school to affect removal or abatement. Invite parents, teachers, employees of the building, the school principal, and the superintendent to a PTA meeting. Request information about the degree of the asbestos problem and what plans are being developed for cleanup.

2. If plans are not under way or seem unsatisfactory, contact the school board to inform it of your concern. If informal discussions do not produce results, get the issue on the agenda of the next school board meeting. Be prepared to provide the facts, including the inspection reports and the cost of abatement, to school board members.

3. Meanwhile, inform your state legislature and the U.S. Congress about the problems and the degree of difficulty there is in terms of cleanup.

4. If the school board is unable or unwilling to ameliorate the problem, one resort would be a lawsuit. Be sure that you have tried every alternative before taking this step.

35 U.S. School Boards Sue to Force Manufacturers to Remove Asbestos

By JAMES BARRON

With the Environmental Protection Agency stepping up its campaign against asbestos in schools, more than 35 school boards around the nation have filed lawsuits to get asbestos manufacturers to pay for removing the potentially hazardous material from their buildings.

The agency says 62 percent of the school districts it has inspected violate some of the Federal regulations that require local school officials to inspect and report on asbestos. Alvin Alm, Deputy Administrator of the E.P.A., said the figure dropped as low as 50 percent earlier in the year but climbed recently as the inspections continued.

To improve the compliance rate, the environmental agency has proposed fines of more than $300,000 against 16 school districts where Federal inspectors found problems.

Four of the school districts fined were in New Jersey: Brick Township, South Orange, Springfield Township and Dunellen. The largest fine was $102,000 against the Waterbury public schools in Connecticut. There, the agency said it had found that 16 of 26 schools contained asbestos that could become airborne.

Some Call E.P.A. Rules Vague

Some local school officials say the agency's rules are vague and subjective and its inspectors interpret them arbitrarily. But others have turned to the courts because of the high cost of removing asbestos, more than $100,000 a school by some estimates.

One case in South Carolina was settled last month when U.S. Gypsum agreed to pay $675,000 to the school district in Lexington County. One in Pennsylvania may be used as the basis for a suit that would consolidate all the claims against manufacturers by school boards around the country.

Asbestos was widely used as fireproofing insulation between World War II and the late 1970's. It has since been found to pose a threat of a variety of serious diseases, including mesothelioma, a cancer of the lining of the lungs that is often fatal.

The E.P.A. says it cannot estimate how many children face possible future health problems from attending classes in schools containing asbestos or how much exposure causes a health hazard. The National Education Association, which maintains that children are more susceptible to asbestos-related diseases than adults, says there are asbestos problems in 14,000 schools. The teachers' union has threatened to make asbestos removal a bargaining issue this year.

Under the Federal rules, more than 121,000 public and private schools with more than 50 million pupils are required to notify parents and school employees if asbestos is found by inspectors. In most cases, there are two types of asbestos in schools: asbestos in ceiling insulation and asbestos wrapping on plumbing and heating equipment.

The environmental agency's inspectors are supposed to check for asbestos that crumbles or can be pulverized at a touch, but they may also cite school districts for failing to keep detailed records on their own inspections.

"The unsettling thing is I'm afraid that is sidetracking the E.P.A.'s attention from the real issue, which is what's hazardous," said William Anderson, a lawyer who represents the National Association of School Boards. "It's also creating an adversarial situation. The E.P.A. is making enemies of many school districts as a result of what the schools see as nit-picking and unfair enforcement."

The Syracuse public schools complied with New York state regulations before the Federal environmental inspectors arrived. Ernest Rookie, the system's facilities supervisor, said the Federal inspectors questioned whether there was asbestos in an auditorium ceiling at Fowler High School.

"We had already taken samples in nine different spots," he said. "They were proved to be not asbestos. The E.P.A. came through and demanded a lab analysis. It cost $450, and we were sure that stuff wasn't asbestos."

Fine Is Called 'Unreasonable'

In Waterbury, Thomas G. Parisot, an assistant corporation counsel, called the proposed fine "unreasonable" and questioned how the agency had determined it. Long before the Federal inspectors showed up, he said, Waterbury made plans to have the asbestos removed.

"The E.P.A. inspected only four schools before it lowered the boom," he said. "They were not really familiar with the makeup of our school system when they issued their complaint. We say any asbestos-containing material is limited in comparison to other districts. We don't have any spray-on beam insulation, wall insulation, or the kinds of materials that are a great deal more friable."

He said samples taken before the E.P.A. inspection "indicated there was no exposure problem for airborne concentrations."

Many school boards are divided on how to proceed with the suits, stalled since Federal District Judge James M. Kelly ruled in Philadelphia that all the cases should be combined and tried there.

After lawyers representing many of the other districts with pending cases protested, he scheduled a hearing on whether to go ahead with the merged legal actions. The case before him originally concerned only the schools in Lancaster, Pa., which had sued the Lake Asbestos Company, a Canadian company, among others.

"To require thousands of lawsuits to be tried in one forum means that each individual school district will be lost in the mass," said Daniel Speights, a Hampton, S.C., lawyer handling more than a dozen cases. "Historically, parties in a class action do not get the amount in damages that they would get if they tried their cases separately. Many of them could file locally and try the case in a year or less."

David Berger, one of the lawyers who represented the Lancaster districts when the case began, said individual trials would prove "costly, repetitive and duplicative."

"If everyone operates independently," he said, "that might make it impossible for anyone to recover. There is no way this industry could withstand $4 billion or $5 billion in judgments relating to school claims, which is what would happen if we used the tremendously ineffective case-by-case basis."

Ruckelshaus En

By PHILIP SHABECOFF

Special to The New York Times

WASHINGTON, May 19 — One year after his return as Administrator of the Environmental Protection Agency, William D. Ruckelshaus is widely credited with restoring morale, stability, purpose and credibility to an agency he found in a state of chaos.

But his critics, including members of Congress and environmentalists, charge that he has failed in leadership on such important environmental issues as emissions into the air of sulfur and nitrogen oxides that fall in particles called acid rain, killing aquatic life and threatening forests; that he is seeking to weaken environmental regulation by weighing risks to health against other social values; that he is serving as a benign front for what the critics call the anti-environmental policies of the Reagan Administration.

In an interview in his office overlooking the Potomac, Mr. Ruckelshaus denied that the Administration was anti-environment.

"It is a fair criticism of this Administration that the environment is not one of its high priorities — it has not been a high priority of the President in his career," he said. But he added that "this Administration has much more sympathy for the environment than the Nixon Administration," though many major environmental laws were passed in that Administration's tenure. "In the

Bartlett calendar approved

By ANDREW PERALA
Daily News reporter

The Anchorage School Board unanimously approved an extended summer vacation for students at Bartlett High School next year to give contractors time to remove asbestos from campus buildings.

Representatives of the school's students, teachers, parents and staff had supported the new school calendar, which will also extend the school day by 90 minutes beginning Jan. 21, 1985.

Under the plan, students at Bartlett will be out of school from April 26 to Oct. 15, 1985. The long summer break will allow contractors to remove asbestos insulation from inside the school building.

In a separate action, the board approved a $14.8 million contract to Vertecs Corporation for removal of the asbestos.

Of that amount, $13.4 million will be for the base contract and $1.3 million will be reserved as a contingency fund.

The contingency fund, said district superintendant Gene Davis, will cover unforeseen problems encountered during the 150-day asbestos removal project.

"It has not even been determined how many lights will have to be removed" from the school's ceilings, Davis said.

Removal of the asbestos has been classified as an emergency and the state Department of Education ruled

See Page C-3, BARTLETT

Bartlett

Continued from Page C-1

recently that the district can alter the school calendar.

Any new asbestos-removal expenses over $20,000 will require approval of the board. Amounts under $20,000 will be approved at the discretion of the superintendant, Davis said.

The 5½-month Bartlett summer vacation won't come without a price, however. In order for students to get the equivalent of 162 days of classroom instruction, the class day will be lengthened by an hour and a half. Students will start school at 7:30 a.m. as usual, but will not be released from classes until 3:30 p.m.

The extra-long summer break aroused the most concern from the speakers before the School Board.

"Our one concern is that students remain active" during the long break, said Karla Josephson, who spoke on behalf of the high school's staff. "Most students do like the idea of a five-and-a-half month summer," said student representative Brian Schmidt. The calendar plan represents a better solution than attending school on Saturdays or double-shifting with another school, he said.

In conjunction with approving the new calendar, the board also approved spending an additional $231,432 in the spring semester of this school year to accommodate the extra costs of changing the school calendar.

About $98,000 will go toward the expected added costs of school buses the district will have to pay a bus contractor. And $78,000 will be allotted to local moving companies to move the hundreds of student desks and other furniture into the school's gymnasium.

EPA: schools ignore law about asbestos warnings

WASHINGTON (AP)—Local school officials, worried about their budgets or about "panic and hysteria," are widely ignoring a federal law requiring parents to be notified about dangerous asbestos in their school buildings, a government study says.

The study by the Environmental Protection Agency said that study said.

In many cases, the study said, school officials did not want to notify parents because of the money the school district would have to spend if forced to clean up the asbestos hazard.

School officials "are reluctant to notify parents because they believe this will result in a redirection of limited operating funds and-or create unnecessary panic and hysteria," the study said.

But whatever the reason, the EPA study added, it is undermining the program to get rid of hazards from asbestos that face millions of schoolchildren.

"The success or failure of the asbestos in schools rule, which relies heavily upon public involvement, is the degree to which information is communicated to the public," the study said. "Poor public awareness has resulted in only slight activity on the part of the parent groups in schools."

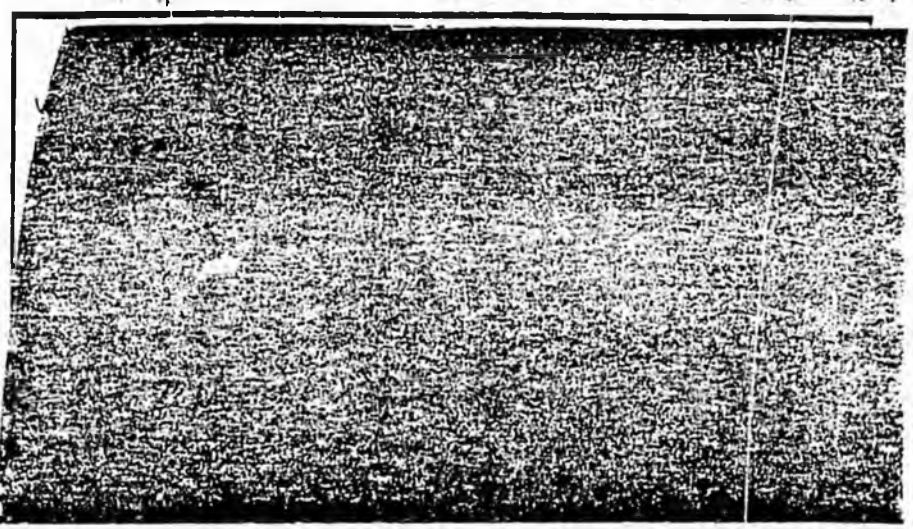
The finding are included in an internal program review requested by EPA Deputy Administrator Al Alm and completed in December. A copy was obtained by The Associated Press.

The study involves asbestos insulation that once was widely used in schools and other public buildings. Health officials now say that some types of asbestos can flake into microscopic particles that can be inhaled, causing lung cancer or other lung diseases. There is no known safe exposure level.

Under federal law, school officials are required to inspect their buildings for hazardous asbestos and to notify parents and school employees if it is found. It is then up to the local officials to decide what to do.

The law covers more than 37,000 public, private and parochial school systems with more than 50 million students.

The EPA study was intended to find out how well the program was working. Some of its findings, including the conclusion that two-thirds of the nation's schools are in violation of some part of the law, have been reported earlier.



The EPA study did not blame school officials alone. It also found that the agency itself needed to devote more money and people to the program, including more than doubling the EPA inspection program.

"The agency has not issued a high-level statement detailing the risks of exposure to asbestos and the importance of considering various abatement options," the study said. "The regions and the public have not been made fully aware and have received mixed signals on the seriousness of asbestos health hazards."

The congressional author of the asbestos in schools law, Rep. George Miller, D-Calif., focused on those shortcomings in his analysis of the report.

"This document, drafted by EPA's own experts, again confirms the shocking inadequacy of this administration's approach to a threat that endangers the health of millions of school children," Miller said. "It is apparent that at least some officials within EPA are trying to warn their agency about the consequences of the current policies."

Whatever the failings of the agency, however, the study indicated that school officials have not endorsed the program wholeheartedly.

Funding limits asbestos removal

Associated Press

Washington — Local school officials, worried about their budgets or about "panic and hysteria," are widely ignoring a federal law requiring parents to be notified about dangerous asbestos in their school buildings, a government study says.

The study by the Environmental Protection Agency said that of 275 schools inspected by EPA, 190 were found to be violating the federal law on asbestos insulation. Of those 190, the EPA said, 134 had violated the requirement that parents be notified of the excess levels.

"Consequently, we can conclude that the parents of students exposed are in many cases unaware of the existence of such a hazard," the study said.

In many cases, the study said, school officials did not want to notify parents because of the money the school district would have to spend if forced to clean up the asbestos hazard.

School officials "are reluctant to notify parents because they believe this will result in a redirection of limited operating funds and-or create unnecessary panic and hysteria," the study said.

But whatever the reason, the EPA study added, it is undermining the program to get rid of hazards from asbestos that face millions of schoolchildren.

"The success or failure of the asbestos in schools rule, which relies heavily upon public involvement, is the degree to which information is communicated to the public," the study said. "... Poor public awareness has resulted in only slight activity on the part of the parent groups in schools."

The finding are included in an internal program review requested by EPA Deputy Administrator Al Alm and completed in December. A copy was obtained by The Associated Press.

The study involves asbestos insulation that once was widely used in schools and other public buildings. Health officials now say that some types of asbestos can flake into microscopic particles that can be inhaled, causing lung cancer or other lung diseases. There is no known safe exposure level.

Under federal law, school officials are required to inspect their buildings for hazardous asbestos and to notify parents and school employees if it is found. It is then up to the local officials to decide what to do.

The law covers more than 37,000 public, private and parochial school systems with more than 50 million students.

Whatever the failings of the agency, however, the study indicated that school officials have not endorsed the program wholeheartedly.

Federal funds to help remove asbestos

by Stephen J. Downes 2/9/87
Times Writer

The federal government has offered at least $2.1 million to help remove asbestos at Bartlett High School, a school district official said Wednesday.

And federal dollars will also pay for removing asbestos at Mount Spurr Elementary School, said assistant superintendent Tom Freeman.

Freeman said the federal Department of Education made the offer in a letter received by the district Tuesday, after three months of lobbying by the school district and members of the school board.

The district wanted the federal government to pay a portion of the bill for the schools because they are both on federal land.

About 35 acres of Bartlett is on federal land and technically belongs to the federal government, Freeman said. The other 118 acres have been deeded to the municipality, he said. The district operates the whole school.

Mount Spurr is on Elmendorf Air Force Base. The school district estimates it will cost $80,000 to remove asbestos at the school.

Negotiations between the district and the DOE that might result in even more money being obtained are still continuing. The district is seeking additional funds because cost estimates for Bartlett are increasing, Freeman said.

The $2.1 million represents 39 percent — the federal government's share — of what the district originally believed the Bartlett project would cost: $5.5 million.

"We've informed them that it may be more," Freeman said.

Howard Games, a DOE project engineer in Seattle, said a request for the money would go to DOE offices in Washington as soon as the school district provides a revised estimate of the cost. The estimate could come as early next week.

Construction firms will be asked to come up with estimated costs of removing asbestos at Bartlett. The firms will also seek a way to complete the work without disrupting the school year, which could mean higher costs.

The federal Environmental Protection Agency has linked exposure to asbestos with lung cancer and other diseases. The Anchorage School Board last year ordered asbestos removed from all district buildings.

The state legislature is now considering a district request for $10 million to remove asbestos from six schools, among them Bartlett and Mount Spurr. Bartlett is the top priority and has by far the most asbestos.

Anchorage lawmakers have already proposed $8.7 million for Anchorage asbestos removal.

DOE representatives will come to Anchorage in the next couple of weeks to advertise for bids on the Mount Spurr project, Freeman said.

The bid specifications will be drawn up by Gobbell, Hays and Pickering, the firm evaluating the asbestos problem for the school district.

Another DOE official, Jim Ishihara, said the federal government is also paying for asbestos removal on other Alaska schools: a $2.2 million project at Reeve Junior and Senior High School in Adak, and a $230,000 project at nine schools in Fairbanks.

Parents, scientists tell EPA to ban asbestos in schools

By BETTY ANNE WILLIAMS
The Associated Press

WASHINGTON — Scientists, union officials and parents urged the Environmental Protection Agency on Monday to require the removal of the carcinogen asbestos from schools and other public buildings.

"Ultimately, what you will do is decide who will live and who will die," said Irving Selikoff, director of the environmental sciences laboratory at Mount Sinai School of Medicine and an authority on the health effects of asbestos.

"We're gazing at children being exposed to asbestos. We're seeing teachers, personnel being exposed. We don't really need any additional research about what can happen. What we need now is controls."

Selikoff and other witnesses testified as the EPA held the first of four hearings on what to do about the asbestos which was used in public building construction and insulation until it was pinpointed as a cancer-causing agent in humans in the late 1970s. Other hearings will be held in Boston, San Francisco and Chicago in June.

The hearings series was planned after the Service Employees International Union petitioned the EPA to issue an asbestos abatement rule which would assure the removal of the substance from schools and other types of public buildings.

William Borwegan, director of occupational safety and health for the union, said the EPA should be prepared to come up with more money and staff to implement a tougher standard and monitor its enforcement.

"At a minimum, the agency should immediately train at least 100 individuals that can act as technical advisers to advise building owners and local school districts on how to evaluate and control asbestos in building hazards," he said.

National Education Association Vice President Keith Geiger estimated that as many as 650,000 teachers and other workers and three million children are exposed to asbestos every school day in 14,000 institutions.

"An emergency exists in our schools. Each day that the asbestos hazard goes unabated, the likelihood increases that there will be more victims," he said.

The EPA believes only 250,000 teachers and other school personnel are at risk but does not quarrel with the other estimates cited by the NEA.

Geiger also called the asbestos problem "a national disaster" and said the federal government must take the lead in arranging for the cleanup.

School asbestos program failing

By Carol Stevens
USA TODAY

Mary Banscombe hopes to find out today if her sixth-grade son is being exposed to cancer-causing asbestos at his Goffstown, N.H., school.

The suburban Manchester district will get results of an inspection ordered after it was fined 11 days ago for failing to tell parents about possible asbestos dangers.

Meanwhile Banscombe, like many USA parents, is worried: "At this point we don't know what we're dealing with."

Says executive director James Fite of the White Lung Association: "Conditions in the nation's schools are absolutely horrible . . . and getting worse."

The federal Environmental Protection Agency's $24,000 fine against Goffstown was its first at any school.

It's been a decade since EPA outlawed asbestos as a fireproofing agent because of studies linking it to cancer. Yet EPA estimates asbestos is still present in as many as half the USA's 121,000 schools.

As a result, 3 million to 5 million children in schools built in 1940-60 risk asbestos exposure, says Arnold Fege of the National Congress of Parents and Teachers.

EPA's voluntary cleanup program is partly to blame. Schools had until June 1983 to inspect buildings and tell parents of the asbestos dangers.

Nine months after the federal deadline, EPA says the regulations have failed. Spot checks of 275 school districts found more than 69 percent violating asbestos standards.

Administrators say they can't afford cleanup at $100,000 per school.

LEGISLATIVE AFFAIRS AGENCY

M E M O R A N D U M April 15, 1986

SUBJECT: SCS SSHB 20 (L&C)
(Interest on deposits collected by public utilities)

TO: Senator Fred Zharoff
Chairman, Labor and Commerce Committee

FROM: Teresa B. Cramer TBC
Legislative Counsel

Enclosed is the Senate CS you requested to HB 20. The language added by the CS raises questions because it is not clearly reflected in the title. Article II, Section 13 of the Alaska State Constitution requires in part that

> The subject of each bill shall be expressed in the title.

The court has stated that a violation of this section must be substantial and plain before it will require an enactment to be set aside. North Slope Borough v. Sohio Petroleum Corp., 585 P.2d 534 (Alaska 1978).

The title to SCS SSHB 20 reads "relating to interest on deposits collected by public utilities." (Emphasis added) The Senate CS adds the following sentence to the bill:

> A public utility may collect and retain a deposit for contracted recurring monthly service.

To the extent that the language grants a public utility a right to collect and retain deposits, it is arguably beyond the scope of the title, which could be read as limited to interest on those deposits. It is also possible that the court would consider that the title was broad enough to encompass provisions concerning the deposits as well as the interest.

The safest course for the committee to follow would be to amend the title to clearly include the subject of deposits collected by public utilities, not merely the interest on those deposits. A title amendment would require permission to waive the rules since the bill originated in the House.

If I may be of further assistance, please advise.

SSHB 20: Summary

This measure requires a public utility to pay interest on utility deposits of $100 or more, at the legal rate of interest at the time the deposit was made. Exceptions to this requirement occur as follows:

1) If the deposit is in an interest bearing account, the utility shall pay the interest rate of that account.

2) In cases where delinquent payments interrupt service, the utility is not required to pay interest for 12 months following the reestablishment of service.

MEMORANDUM

TO: Representative Peter Goll

FROM: Nancy Pease Nancy Pease
Legislative Analyst

RE: Deposits to Public Utilities
Research Request 85-142

Bob Berry of your office requested the following information on deposits that public utilities may require of first-time customers or those with no established credit:

- the representative low, high and average deposit required;
- the total amount of deposits held by public utilities;
- the length of time the deposits are held;
- the administrative cost and the burden to public utilities if they were required to pay interest on the deposits, and;
- an indication of the lead time utilities would require to begin paying interest on deposits without undue burden to the utilities.

The attached table presents information on the customer deposit requirements of 28 electric, natural gas, water, sewer or refuse utilities across the state. The four smallest utilities surveyed do not require deposits from first-time customers or those with no established credit.[1] In addition, several utilities waive their deposit requirement for new customers who provide good credit references or for new residential customers who own or purchase a home.

---

[1]The Cities of Kotlik, Seldovia, North Pole and Dillingham each provide utility services to no more than 225 customers.

SPONSOR'S INFORMATION

Average deposits

Utilities which require a standard deposit from their new customers charge, on average, a $74 deposit to open a residential account and $142 to open a commercial account.

However, many utilities adjust the amount of a customer's deposit according to the monthly bills or credit histories of previous customers with similar service needs. Depending upon the methods used to calculate customer risk, residential deposits range from $10 for water and sewer service in Fairbanks to $600 for telephone service from the Matanuska telephone utility. Deposit requirements for new commercial accounts range from $19 for water service in Wrangell to $2,500 for electricity in Dillingham.[2] For those utilities which reported varying deposit requirements, the average low and high residential deposits are $29 and $130 respectively. The average low and high commercial deposits are $89 and $950 respectively.

Total Amount of Deposits Held by Public Utilities

Bob Berry indicated that the Alaska Public Utilities Commission (APUC) was providing you with the total deposits held by all APUC-regulated utilities. Based on the information gathered in this survey, we are unable to estimate the amount of deposits held by unregulated utilities. The 10 unregulated utilities which indicated in this survey that they require customer deposits hold a total amount of at least $1,180,000. Four of the unregulated utilites surveyed do not require deposits.

These 14 unregulated utilities represent only 20 percent of the approximately 70 unregulated utility corporations which provide electricity, natural gas, water, refuse removal, sewer or telephone service to Alaska consumers.[3] It is difficult to assess how accurately this survey reflects the sizes and types of unregulated utilities as well as

---

[2]David Bowker, General Manager of Nushagak Electric Co-operative in Dillingham, stated that Nushagak received permission from the Alaska Public Utilities Commission to charge commercial users a deposit of up to the estimated two-month billing. This policy was directed specifically toward fish processors after the utility suffered $50,000 in losses when fish processors went bankrupt.

[3]The survey included the following unregulated utilities: Fairbanks Municipal Utilities Systems, Ketchikan Public Utilities, Kodiak Municipal Utilities, and the Cities of Kenai, Petersburg, Sitka, Nome, Wrangell, Palmer, Unalaska, Kotlik, Seldovia, Dillingham and North Pole.

other unknown factors which may correlate to deposit policy. Because this sample is not necessarily representative, the information cannot be used to extrapolate the total amount of deposits for all utilities.

We were also unable to estimate the total amount of deposits by determining the average deposit charged per customer or per capita. Utilities' records show the number of customer accounts, but not necessarily the number of actual customers. One customer may pay a single deposit for several services or he may pay multiple deposits either to the same or different utility companies. An extrapolation of total deposits based on a per capita estimate would also be inaccurate because the percent of the population who are utility customers varies greatly in different localities.

Length of Time Deposits Are Held

Most of the surveyed utilities which require deposits refund them after either one or two years if the customer maintains good credit with the company. Nearly half (42 percent) of those utilities keep the deposits for two years. Four of the utilities surveyed hold the deposit until the customer closes the account. For those utilities which return customer deposits after a scheduled interval, the average period for holding deposits is 16 months.

Administrative Cost, Burden and Lead Time for Requiring Interest Payments on Deposits

The administrative cost to utilities of paying interest on customer deposits depends largely on whether the utility has a computerized accounting system. Spokespersons for several utilities which currently pay interest indicated that implementing the interest paying policy incurred a one-time computer programming cost. Their computers calculate interest monthly on each customer's deposit. The interest is either credited to the customer's bill once per year or is refunded with the deposit. Utility spokespersons who currently use computerized accounting sytems to pay interest estimated that implementing an interest paying policy would require very little lead time.

Some of the small utilities balance their customer accounts by hand. Calculating and paying interest for each customer deposit would increase considerably the accounting and clerical work for these utilities. The utilities clerk for the city of Kenai stated that the Kenai utility might find it advantageous to stop requiring deposits rather than handle the paperwork of paying interest on each deposit.

Several utilities spokepersons mentioned that administrative complications would arise in calculating and paying interest to customers delinquent on their payments. The amount held in deposit for a customer may change many times at irregular intervals if the customer is consistently late with his payments and is disconnected, has part of his deposit confiscated, or is required to pay additional deposits.

Utility spokespersons were not able to estimate the financial burden of paying interest without determining what portion of their customer deposits would be affected. The burden to each utility will depend on the amount of deposits on which it must pay interest and on the utility's current use of the deposits. There was no consistent pattern to utilities' management of the deposits. Some of the utilities hold their deposits in a general fund and use them for general operating expenses while other utilities keep the deposits in checking accounts or interest bearing saving accounts, either separately or in combination with other daily cash deposits.

Chugach Electric keeps its deposits in a noninterest bearing checking account because it must frequently make refunds. If the utility were forced to commit its deposits to an investment account, it would lose this flexibility. Utilities which enter deposits into their general funds would also lose operating flexibility.

Ketchikan Public Utilities currently keeps customer deposits in an interest bearing savings account and passes along interest to the depositers. The City of Sitka invests its customer deposits for a return of 8 or 9 percent, also passing most of the interest to depositers. These utilities will incur a minimal burden if interest payment is mandated.

CHAIRMAN'S INFORMATION: SCS SSHB 20(L&C)

1) BILL TITLE: "An act relating to interest on deposits collected by utilities."

a) Introduced: Goll, Sund, Marrou, Gruenberg, Taylor, and Davis.

b) Co-sponsors:

2) INTENT: This measure requires public utilities to pay interest on deposits of $100 or more, at the legal rate of interest at the time the deposit was made. Exceptions to this requirement occur as follows:

1) If the deposit is in an interest bearing account, the utility shall pay the interest rate of that account.

2) In cases where delinquent payments interrupt service, the utility is not required to pay interest for 12 months following the reestablishement of service.

SCS added an amednment which occurs on line 10 an 11 of page 1. The amendment makes it clear in statute that a public utility may collect and retain deposits for contracted monthly service.

FISCAL NOTE: 0

For an Act entitled: "An Act relating to interest on deposits collected by public utilities."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 42.05 is amended by adding a new section to read:

Sec. 42.05.365. INTEREST ON DEPOSITS. (a) A public utility may collect and retain a deposit for contracted recurring monthly service. A public utility that collects and retains a deposit of $100 or more for recurring monthly service shall pay interest on that deposit at or before the time it is returned. Interest paid under this section shall be at the legal rate of interest at the time the deposit is made. However, if the deposit is placed in an interest bearing account, the utility shall pay the interest rate of the interest bearing account.

(b) If delinquent payments result in interruption of service, a public utility is not required to pay interest under (a) of this section for 12 months after reestablishment of service.

HOUSE BILL 55

TESTIMONY BEFORE THE SENATE LABOR AND COMMERCE COMMITTEE
by Representative Virginia Collins
February 19, 1986

Purpose. One of the priority issues identified by the Governor's Task Force on Drunk Driving was State funding for directing and funding public awareness programs on alcoho. . l drug use and responsible motor vehicle operation. House Bill 55 is an attempt to respond to this concern. HB 55 is designed to improve public awareness and information at the sites where alcoholic beverages are purchased or consumed.

Statement of the Problem: In the last few years there has been an increased public interest in the problem of drinking and driving. In response to this rising concern, the State of Alaska in recent years has enacted legislation aimed at removing the drunk driver from our streets and thus reducing alcohol-related accidents and fatalities. These statutes provide for the following:

1. Raised legal drinking age of twenty-one.

2. An implied consent statute

3. Preliminary breath testing on the roadway

4. Administrative license revocation upon arrest

5. Breath test refusal penalties same as DWI conviction

6. Citizen reporting, i.e., REDDI

7. Definition of Breath Alcohol level at .10 illegal per se

8. Mandatory sentencing

9. Mandatory fines

10. Victim compensation

11. Driver licensing information

12. Rehabilitation education

13. Compliance with conditions of court order

14. Mandatory liability insurance

15. Four new judges in the Anchorage area

16. Decrease in time between arrest and sentencing

Despite all of these efforts, drinking and driving continues to be a significant problem for the citizens of our state.

Recent newspaper headlines attest to the increasing public interest in the drunk-driving problem. Much of this increase results from campaigns conducted by such citizen groups as MADD (Mothers Against Drunk Driving). Organizations like MADD have been very effective in enlisting public and official support for more severe penalties for drunk drivers. In the past, efforts to strenghthen drunk-driving laws have generally focused on increasing penalties.

One justification frequently cited for this approach is the apparent success of drunk-driving laws carrying strict penalties and ensuring that such penalties are actually carried out. Unfortunately, in the past it generally has been the experience that public concern has been temporary, and when the interest of the moment has passed, the intensity of the effort to overcome the drinking-driving problem tends to fade. If current efforts are to have a long-term effect, it is important that public awareness accompany all current and future legislation to stem the tide of drunk driving.

The passage of stricter drunk-driving laws alone will not reduce alcohol-related accidents or the incidents of drunk driving. For stricter laws to be effective, the public must know the laws and penalties and have an increased fear of apprehension and conviction.

To have an impact on the rate of accidents caused by drunk drivers, laws must not only be enacted but also well publicized and enforced. In some cases, it appears that current DWI laws and their penalties are not as highly publicized throughout Alaska as they could be.

A review of the research on the scope of the problem as it exists in other states as well as in Alaska is well documented. It is clear from reviewing the information that drinking and driving is a very complex problem which requires a combination or a variety of approaches. Although it appears from reviewing the literature that enactment of stronger drunk-driving laws has been successful in stemming the tide, it has not been entirely successful in eliminating the problem.

To be effective, enforcement programs must be accompanied by public information activities which ensure that there is a perception of increased probability of detection. A review of the research further indicates there is a strong connection between public awareness and the effectiveness of drunk-driving laws. Public awareness and accurate knowledge of the law, along with thorough enforcement procedures and stiff penalties are the major components, which will have a lasting impact on the large numbers of persons drinking and driving in Alaska, particularly in the case of social drinkers. Although this approach may not be as effective with problem drinkers, research indicates that the passage of stricter drunk-driving laws alone does not reduce alcohol-related accidents or the incidence of drunk driving. To increase the effectiveness of our efforts, the public must know the laws and the penalties and have an increased fear of apprehension and conviction.

The sale of alcohol is one of society's most highly regulated industries. There is good reason for this; it is a potentially dangerous substance posing extreme hazards to the health and welfare of consumers and motor vehicle operators on our public roads.

In the past decade, the vast majority of Americans have been concerned over public safety. This concern has risen steadily since 1971. In a recent Harris survey, 87% of the adult Americans polled blamed consumers themselves for injury resulting from misuse of products. Of the consumers surveyed, 73% believed that product safety objectives should be accomplished through publicity on product risks and dangers or by health warnings such as those required for cigarettes and over-the-counter drugs.

If a product has a hidden hazard, an unknowing consumer may be denied the valuable information necessary in deciding whether or not to risk using the product in the first place or how abuse of the product could impact his future welfare. Often, hazards in the use of alcohol are not visible to a consumer, and thus the consumer may not have a full appreciation for the severity of the decision to expose himself to that hazard. The probability of a hazard actually occurring, therefore, is of prime consideration in the consumer's behavior. Following this line of reasoning, an educated product consumer of alocholic beverages is likely to be a more responsible consumer.

RECOMMENDATIONS:

The approaches for dealing with the drunk-driving problem are many, which include punitive, educational, rehabilitation, and behavioral. The value of placing warning signs in establishments where alcohol is sold and/or consumed should be effective because the message is subliminal. Research has shown that subliminal advertising has a greater long-term effect in influencing behavior than any other form of advertising. The prominent display of DWI warning signs in establishments that sell alcohol would, over a period of time, effect consumer behavior in a positive manner. Subliminal messages are conveyed to the unconscious rather than to the conscious level. Once having established the message on the unconscious level, repeated exposure to the message reinforces its effect and eventually will lead to changes in behavior which will influence consumers of alcoholic beverages to act responsibly, not necessarily for the good of others, but for themselves.

HB 55 REPRESENTS GOOD LEGISLATION; IT MAXIMIZES THE EFFECT OF CURRENT LAW AT MINIMAL EXPENSE TO THE PUBLIC TREASURY. HB 55 CARRIES A ZERO FISCAL NOTE.

THANK YOU FOR THE OPPORTUNITY TO TESTIFY. ON BEHALF OF MYSELF AND ALL THOSE WHO WILL BENEFIT FROM THIS BILL, I REQUEST YOUR SUPPORT IN PASSING HB 55 OUT OF COMMITTEE.

I AM AVAILABLE FOR ANY QUESTIONS YOU MAY HAVE.

TIMELINE SUMMARY OF SIGNIFICANT LEGISLATION REGARDING CONTROL OF DRUNK DRIVERS

MUNICIPALITY OF ANCHORAGE	ALASKA STATE STATUTE

January, 1977

Established Mandatory Minimum Sentence:

1st offense	24 hours
2nd offense	3 days
3rd & subsequent	10 days

Illegal to operate motor vehicle with BAC .10% or higher (Per Se law)
(AO 267-76)

January, 1978

Adopted procedure whereby involuntary blood test was made in medical setting upon refusal of breathalyzer test.
(Administrative Procedure)

Established mandatory judicial referral for alcohol screening/rehabilitation
(ch. 152 SLA 1978)

Established mandatory jail sentence of 10 days for DWLS.

Disallowed limited license on second offense for serious traffic misdemeanors
(ch. 178 SLA 1978)

November, 1978
(11/28/78)

Increased Mandatory Minimum sentence:

1st offense	3 consecutive days
2nd & subsequent	10 consecutive days

(AO 78-230S)

November, 1979

Adopted breath as well as blood standard for measurement of BAC
(AO 79-194)

1980

(September)

Adopted mandatory minimum jail sentence:
1st offense 3 consecutive days
2nd offense 10 consecutive days

Illegal to operate motor vehicle with BAC .10% or higher

Adopted breath alcohol measurement standard

Established admissibility of refusal under implied consent law as evidence in prosecution
(ch. 129 SLA 1980)

(August)

Adopted state statute
(AO 80-122)

1981

Assumes validity of chemical test if taken within four hours of arrest
(AO 81-75)

[Reduction in hours of legal sale of alcohol]

1982
(September)

Established refusal under implied consent laws as misdemeanor offense with same sentence as DWI offense

Allowed for application of DWI law to airplanes and watercraft

Allowed forceable blood test for BAC in fatalities, injuries or cases where defendant is incapable of refusing

Required use of limited license for at least 60 days (rather than only 30 days)

Revised mandatory minimum sentence
1st offense 72 consecutive hours
2nd offense 10 consecutive days
20 days if subsequent offense within one year
(ch. 117 SLA 1982)

Adopted state statute but leaves in validity of chemical test if taken within four hours of arrest
(AO 82-126)

November, 1982

Allows forfeiture of motor vehicle to Municipality on 2nd or subsequent offense within 5 years of first offense

Permit impoundment (temporary seizure) of vehicle to Municipality for 30 days for 1st and 2nd offense, 60 days for 3rd offense and 90 days on 4th or subsequent offense.
(AO 82-205)

June, 1983
Effective 10/17/83

Revised mandatory minimum sentence
1st offense 72 hours (unchanged)
2nd offense w/in 10 years 20 days
3rd offense w/in 10 years 30 days

Established mandatory minimum fines
1st offense $250
2nd offense $500
3rd offense $1000

Established administrative revocation of driver's license by law enforcement officer if BAC is .10% or higher or driver refuses breath test. Driver receives 7-day temporary license; driver has seven days to appeal.

Revises terms of license revocation under administrative or court authority - provides minimums:
- 1st offense 90 days (last 60 days may be limited)
- 2nd offense 1 year
- 3rd offense 10 years

Court revocation may be either concurrent or consecutive with administrative action.

Revises procedure to recover valid license: driver must post SR22, pay fee and pass written and road test.

Revises penalty for driving with license revoked. If revocation was for 1st DWI conviction, mandatory minimum 30 days in jail. If revoked for 2nd or subsequent DWI, mandatory jail sentence of 90 days to serve.

Allows for impoundment or forfeiture of vehicle on 3rd & subsequent offense.

Suspended imposition of sentence is no longer permitted for DWI, Breath Test Refusal, or Driving with License Revoked.

[Minimum legal age to purchase/consume increased from 19 to 21 -- over three year period, effective January, 1984.]

[State tax on alcohol increased (last increase was 1962).]

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to liquor licensees' duty to contact taxis for patrons and to display alcohol warning signs."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 04.11.370 is amended to read:

Sec. 04.11.370. SUSPENSION AND REVOCATION OF LICENSES AND PERMITS. Except as provided in (b) of this section, a [A] license or permit shall be suspended or revoked if the board finds that one or more of the following grounds exists:

(1) misrepresentation of a material fact on an application for a license or permit;

(2) continuation of activities authorized under a license or permit would be contrary to the best interest of the public;

(3) failure on the part of the licensee to correct defects which constitute violations of this title, regulations adopted under this title, or other laws within a prescribed time after receipt of notice issued by the board or its agent;

(4) conviction of a licensee of a violation of a provision of this title, a regulation adopted under this title, or an ordinance adopted under AS 04.21.010;

(5) conviction of the agent or employee of a licensee of a violation of this title, a regulation adopted under this title, or an ordinance adopted under AS 04.21.010, if the licensee is found by the board to have either knowingly allowed the violation or to have

recklessly or with criminal negligence failed to act in accordance with the duty prescribed under AS 04.21.030 with the result that an agent or employee violates a law, regulation, or ordinance;

(6) failure of the licensee to comply with the laws and regulations pertaining to public health in the state;

(7) use of the licensed premises as a resort for illegal possessors or users of narcotics, prostitutes, or pimps; in addition to any other legally competent evidence, the character of the premises may be proved by the general reputation of the premises in the community as a resort for illegal possessors or users of narcotics, prostitutes, or pimps;

(8) occurrence of illegal gambling within the limits of the licensed premises;

(9) permitting any public offense involving moral turpitude to occur on the licensed premises;

(10) violation by a licensee of this title, a regulation adopted under this title, or an ordinance adopted under AS 04.21.010;

(11) violation by an agent or employee of a licensee of a provision of this title, a regulation adopted under this title, or an ordinance adopted under AS 04.21.010, if the licensee is found by the board to have either knowingly allowed the violation or to have recklessly or with criminal negligence failed to act in accordance with the duty prescribed under AS 04.21.030 with the result that the agent or employee violates the law, regulation, or ordinance.

* Sec. 2. AS 04.11.370 is amended by adding a new subsection to read:

(b) The board may not suspend or revoke a license or permit for the conviction of a licensee or permittee of a violation of AS 04.21.-035 or 04.21.036.

* Sec. 3. AS 04.16 is amended by adding a new section to read:

Sec. 04.16.205. PENALTY FOR FAILURE TO CONTACT TAXI OR DISPLAY ALCOHOL WARNING SIGNS. The board may impose a civil penalty, not to exceed $100, upon a licensee that the board finds, after notice and hearing, has violated AS 04.21.035 or 04.21.036.

* Sec. 4. AS 04.21 is amended by adding new sections to read:

Sec. 04.21.035. DUTY TO CONTACT TAXI. A licensee or a licensee's agent or employee shall make reasonable efforts to procure a taxi, where regular taxi service is available, for any person in the premises who requests a taxi. The licensee is not responsible for paying the cost of the taxi.

Sec. 04.21.036. DISPLAY OF ALCOHOL WARNING SIGNS. (a) A licensee, except a common carrier licensee, shall conspicuously display at the main public exit and in all restrooms, a sign that reads "Drunk Drivers Go To Jail - Why Risk It - Call A Taxi." The sign shall include a prohibitory symbol. The sign must be at least 18 inches wide and six inches high, with lettering at least one and one-fourth inches high.

(b) The state shall furnish, without cost, signs required under this section to any licensee requesting them.

CHAIRMAN'S INFORMATION: SCS CSHB 55(L&C)

1) BILL TITLE: "An act relating to liquor licensees' duty to contact taxis for patrons and to display alcohol warning signs."

a) Introduced: Rep Collins, Uehling, Gruenberg

b) Co-sponsors:

2) INTENT: Measure requires liquor licensees' to make reasonable efforts to call a taxi when a patron requests a taxi. Additionally it would require the posting of alcohol warning signs at each public entrance and exit. Violation of these provisions will result in the revocation or suspension of a licensees' permit.

Senate L&C CS modifies the penalty section for those licensees' who are in violation of this law, (civil fine not to exceed $100, imposed by the ABC Board after hearing and notice) and requires that signs be placed at the main exit and in all restrooms.

FISCAL NOTE: 0 (but with the proviso that the Dept of H&SS will fund the cost of the signs from its operating budget.)

The Honorable Fred Zharoff
Chair, Labor & Commererce Committee
Alaska State Senate
P.O. Box V
Juneau, Alaska 99811

Dear Senator Zharoff:

This is to inform you that this office has agreed to fund HB 55 for a total sum of $3,000.00. This funding was committed during House Judiciary testimony last year. We feel the signs as described in HB 55 would be in line with our drunk driving prevention inititive.

Sincerely,

Matthew C. Felix
Coordinator

Sec. 04.21.035. DUTY TO CONTACT TAXI. A licensee or a licensee's agent or employee shall make reasonable efforts to procure a taxi, where regular taxi service is available, for any person in the premises who requests a taxi. The licensee is not responsible for paying the cost of the taxi.

Sec. 04.21.036. DISPLAY OF ALCOHOL WARNING SIGNS. (a) A licensee, except a common carrier licensee, shall conspicuously display at the main public entrance and in one lighted area where alcohol is sold at retail, a sign that reads "Drunk Drivers Go To Jail - Why Risk It - Call A Taxi." The sign shall include a prohibitory symbol. The sign must be at least 18 inches wide and six inches high, with lettering at least one and one-fourth inches high.

(b) The state shall furnish, without cost, signs required under this section to any licensee requesting them.

CSHB 55(fin)am Summary:

Measure requires that a licensee make a reasonable effort to contact a taxi for a patron who requests one, and that the licensee display an alcohol warning sign at each entrance and exit of a licensed premiss. Further, the bill requires the state to furnish alcohol warning signs, without cost, to any licensee requesting them. Penalty provisions for violation of these sections would result in revocation or suspension of license or permit.

SCS CSHB 55 (L&C) would not invoke a penalty on the first conviction, and modifies the requirement for alcohol warning signs to be placed at each entrance and exit of a licensed premiss. SCS would require signs at the main public entrance and in one lighted area.

Latest Senate CS would require the posting of signs in all restrooms and at the main public exit of a licensed premiss. Penalty provisions may be imposed by the board, after a hearing and notice, and may include a civil penalty not to exceed $100.

According to testimony before the Judiciary Committee by the Department of Health + Social Services, Office of Alcoholism and Druge Abuse, that because this bill represents a positive approach to problems caused by alcohol abuse, the department is willing to fund the cost of the required signs up to the amount cited in the original fiscal note. The funds will come from the operating budget and require no additional appropriation.

CHAIRMAN'S INFORMATION: CSHB 63(L&C)

1) BILL TITLE: "An act relating to the plumbing code; and providing for an effective date."

a) Introduced: Governor

b) Co-sponsors:

2) INTENT: This measure adotps a portion of the 1985 plumbing code, as well as adopting the Uniform Solar Energy and the uniform swimming pool, spa, hot tub code in their entirety.

Under ther House version, plastic pipe is limited to type V nonrated residential construction, and also grandfathers in those projects which had used plastic pipe prior to the effective date of the act.

The L&C CS expands the use of plastic to type V residential construction, and increases the population threshold for exemption from plumbing code conformity. Additionally, the SCS places certain liabilities on municipalities for adopting standards which violate state code, and holds the state harmless for liability for damages arising from the installation of materials not permitted by the code.

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the plumbing code; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 18.60.705 is amended to read:

Sec. 18.60.705. PLUMBING CODE. The following publications are adopted [DEPARTMENT OF LABOR SHALL ADOPT,] as the official minimum plumbing code for the state: [,]

(1) the Uniform Plumbing Code, 1985 [1979] edition, adopted at the 54th [49TH] Annual Conference, September, 1983 [1978], International Association of Plumbing and Mechanical Officials, chs. 1 - 13 and appendices, Useful Tables, and Installation Standards, but excluding Part I, Administration, pages 1a - 6a, and subject to AS 18.60.710 - 18.60.740 and the changes specified in (b) of this section;

(2) the Uniform Solar Energy Code, 1985 edition, adopted at the 54th Annual Conference, September, 1983, International Association of Plumbing and Mechanical Officials, chs. 1 - 9 and appendices, but excluding Part I, Administration, pages 3 - 9; and

(3) the Uniform Swimming Pool, Spa and Hot Tub Code, 1985 edition, adopted at the 54th Annual Conference, September, 1983, International Association of Plumbing and Mechanical Officials, chs. 1 - 5, but excluding Part I, Administration, pages 1 - 9.

* Sec. 2. AS 18.60.705 is amended by adding a new subsection to read:

(b) The 1985 edition of the Uniform Plumbing Code adopted under (a)(1) of this section is adopted with the following changes:

(1) on page 37, chapter 4, Drainage Systems, section 401, Materials, subsection (a), sub-subsection (2), all material is excluded and the following language is adopted:

"(2) ABS or PVC installations may not be used in a hotel or motel and are limited to residential combustible construction of two stories or less."

(2) on page 45, chapter 5, Vents and Venting, section 503, Materials, subsection (a), sub-subsection (2), all material is excluded and the following language is adopted:

"(2) ABS or PVC installations may not be used in a hotel or motel and are limited to residential combustible construction of two stories or less."

(3) on page 75, chapter 10, Water Distribution, section 1004, Materials, subsection (a), the second and third sentences are excluded and the following language is adopted:

"Asbestos-cement, PE, or PVC water pipe that is manufactured to recognized standards may be used for cold water distribution systems outside a building. CPVC and PB water pipe and tubing may be used for hot and cold water distribution systems within a residential combustible building of two stories or less other than a hotel or motel."

* Sec. 3. AS 18.60.715 is amended by adding a new subsection to read:

(f) Notwithstanding any other provision of law, CPVC, PVC, and PB plastic pipes may be used for fire control sprinkler systems. The department may approve other types of plastic pipes for use in fire control sprinkler systems.

* Sec. 4. AS 18.60.735 is amended to read:

Sec. 18.60.735. BOROUGH OR CITY REGULATION. AS 18.60.705 - 18.60.740 do not affect the authority of a [ANY] municipality to

establish [PRESCRIBE] by ordinance, rule or order, standards for the municipality's [THEIR RESPECTIVE] areas of jurisdiction that are no less stringent than those established under AS 18.60.705. This chapter is not intended to duplicate or preempt code administration or enforcement by municipalities. An [ANY] organized municipality or unorganized village, whether or not the municipality or village is within an organized borough, having a population of less than 5,000 [2,500 POPULATION] is exempt from AS 18.60.705 - 18.60.740 [THE PROVISIONS OF THIS ACT].

* Sec. 5. AS 18.60.735 is amended by adding a new subsection to read:

(b) A municipality that establishes standards under (a) of this section is liable to a property owner for the cost of removing plumbing installed in compliance with a municipal standard if the plumbing is held to violate a state standard and for the cost of replacing the plumbing with plumbing that conforms to state standards, and shall hold the state harmless from liability for any damages arising from the use of the plumbing methods or materials that conformed to municipal standards but did not conform to state standards.

* Sec. 6. AS 18.60.740(1) is amended to read:

(1) "code" means the 1985 editions of the Uniform Plumbing Code, the Uniform Solar Energy Code, and the Uniform Swimming Pool, Spa and Hot Tub Code [1979 EDITION], adopted at the 54th [49th] Annual Conference, September, 1983 [1978], International Association of Plumbing and Mechanical Officials, as modified and adopted in AS 18.60.705;

* Sec. 7. Notwithstanding secs. 1, 2, and 6 of this Act, the installation of a plastic pipe, made from a substance permitted under the official state plumbing code as amended by this Act, in a plumbing or drainage system before the effective date of this Act may not be held to violate the

official state plumbing code as amended by this Act.

* Sec. 8. This Act takes effect immediately in accordance with AS 01.-10.070(c).

CS FOR HOUSE BILL NO. 63 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the plumbing code; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 18.60.705 is amended to read:

Sec. 18.60.705. PLUMBING CODE. The following publications are adopted [DEPARTMENT OF LABOR SHALL ADOPT,] as the official minimum plumbing code for the state: [,]

(1) the Uniform Plumbing Code, 1985 [1979] edition, adopted at the 54th [49TH] Annual Conference, September, 1983 [1978], International Association of Plumbing and Mechanical Officials, chs. 1 - 13 and appendices, Useful Tables and Installation Standards, but excluding Part I, Administration, pages 1a - 6a, and subject to AS 18.60.710 - 18.60.740 and the changes specified in (b) of this section;

(2) the Uniform Solar Energy Code, 1985 edition, adopted at the 54th Annual Conference, September, 1983, International Association of Plumbing and Mechanical Officials, chs. 1 - 9 and appendices, but excluding Part I, Administration, pages 3 - 9; and

(3) the Uniform Swimming Pool, Spa and Hot Tub Code, 1985 edition, adopted at the 54th Annual Conference, September, 1983, International Association of Plumbing and Mechanical Officials, chs. 1 - 5, but excluding Part I, Administration, pages 1 - 9.

* Sec. 2. AS 18.60.705 is amended by adding a new subsection to read:

(b) The 1985 edition of the Uniform Plumbing Code adopted under (a)(1) of this section is adopted with the following changes:

(1) on page 37, chapter 4, Drainage Systems, section 401, Materials, subsection (a), sub-subsection (2), all material is excluded and the following language is adopted:

"(2) ABS or PVC installations are limited to type VN residential construction."

(2) on page 45, chapter 5, Vents and Venting, section 503, Materials, subsection (a), sub-subsection (2), all material is excluded and the following language is adopted:

"(2) ABS or PVC installations are limited to type VN residential construction."

(3) on page 75, chapter 10, Water Distribution, section 1004, Materials, subsection (a), the second sentence is not adopted. The third sentence of subsection (a) is excluded and the following language is adopted:

"CPVC and PB water pipe and tubing may be used for hot and cold water distribution systems within a type VN residential building."

* Sec. 3. AS 18.60.740(1) is amended to read:

(1) "code" means the 1985 editions of the Uniform Plumbing Code, the Uniform Solar Energy Code, and the Uniform Swimming Pool, Spa and Hot Tub Code [1979 EDITION], adopted at the 54th [49th] Annual Conference, September, 1983 [1978], International Association of Plumbing and Mechanical Officials, as modified and adopted in AS 18.60.705;

* Sec. 4. Notwithstanding secs. 1 - 3 of this Act, the installation of a plastic pipe, made from a substance permitted under the code as amended by this Act, in a plumbing or drainage system before the effective date of this Act may not be held to violate the code as amended by this Act.

* Sec. 5. This Act takes effect immediately in accordance with

1 AS 01.10.070(c).

Bill No. Committee Substitute for House Bill 63 (L&C)

Title "An Act relating to the Plumbing Code."

Date February 11, 1986

Contact: Eileen Plate
465-2700
Bob Bacolas
465-4870

Committee Substitute for House Bill 63 provides for the modification and adoption of the 1985 Uniform Plumbing Code; and for adoption of the Uniform Solar Energy Code, and Uniform Swimming Pool, Spa and Hot Tub Code. The 1979 Uniform Plumbing Code currently in effect in Alaska is outdated.

The International Association of Plumbing and Mechanical Officials revises its minimum standards for the installation of plumbing every three years to incorporate technological advances, and the 1985 edition is the most recent effort in this regard. The standards for the installation of solar energy and the spa and hot tub standards have not previously been adopted in Alaska; the minimum standards for swimming pools were formerly included in the Uniform Plumbing Code.

In response to a number of water quality, worker safety and fire safety questions that have been posed on the use of plastic pipe in drainage and water distribution systems, the Committee Substitute modifies several provisions in the 1985 plumbing code to limit the use of plastic pipe in Alaska. As modified in this bill, Alaska's minimum plumbing standards on the use of plastic pipe would, therefore, be less restrictive than the 1979 code presently in effect and more restrictive than 1985 code per se. This appears to be a reasonable compromise on the issue.

The Department notes that Section 4 of the Committee Substitute provides that plastic pipe which was installed in the state prior to the effective date of the bill need not comply with either the 1979 code or the 1985 code as modified in this bill. The Department's understanding is that this "grandfather" clause stems from confusion that was created when various local governments adopted the 1982 or 1985 Uniform Plumbing Codes, which permitted such installations of plastic pipe. While the Department does not object to such a "grandfather" clause, it should be noted that it may be perceived as inequitable by those persons whom the Department has required to comply with the 1979 code. In several instances the Department's enforcement action in this regard has necessitated the removal of plastic pipe and installation of permissible materials.

This bill also removes an anomalous provision that instructs the Department of Labor to adopt the specific publications that constitute the plumbing code. The current statute leaves no discretion in the department as to whether to adopt or as to what to adopt. Thus the actions of the department in going

POSITION PAPER: Department of Labor

through the formal adoption procedures are unnecessary. Under the amendment in this bill, the statute will simply declare what constitutes the plumbing code. This is the approach already employed for the electrical code under AS 18.60.580.

Committee Substitute for House Bill 63 would not have a fiscal impact on the Department of Labor.

APPROVED:

Jim Robison, Commissioner
Department of Labor

DUTIES OF THE DEPARTMENT.
TEXT The department is responsible for the administration of the code. The department may promulgate regulations designed for maximum practical implementation of the code, and may grant exceptions from specific code provisions, where distance or other factors make implementation impractical. Specific consideration shall be given to outlying villages and sparsely populated areas to ensure that AS 18.60.705 18.60.740 will not impose an undue financial burden. The department may by regulation designate appropriate inspection to a public or private utility company. A company so designated may refuse utility connections if an installation does not meet the requirements of this code.

ADMINISTRATION.
TEXT (a) The code applies to all new construction, all new work in relocated buildings and to any alteration, repairs or reconstruction of buildings except as provided otherwise under AS 18.60.705 - 18.60.740.
(b) The department may inspect work installed, removed, altered or replaced on any plumbing, gas or drainage piping,

plumbing fixture, water heater or water treating equipment in a building or other location. No permit or inspection is required for the following work: the stopping of leaks in drains, soil, waste or vent pipes, the clearing of stoppages in or repairing of leaks in pipe valves or fixtures, repairs or alterations not of a substantive nature which can be reasonably exempted from inspection.

(c) Nothing in AS 18.60.705 - 18.60.740 prohibits a person from performing plumbing work on his own property.

(d) The department may adopt regulations establishing fees for inspections conducted under AS 18.60.705 - 18.60.740. Fees may be established under this chapter only for inspections requested by the owner of a structure.

(e) The department shall maintain a record of all plumbing inspections performed by it and of all inspection fees and permit fees collected by it.
