Lemon squeeze

Laws protect owners of bum cars, pickups

By KAY MONROE LEVINE
Daily News reporter

Your car says ka-chunk, ka-chunk, ka-thwwwwwup. Then it's "The Sounds of Silence."

The mechanic tells you it'll be $42 an hour for exploratory tinkering, the nearest parts are in Los Angeles and he's up to his eyebrows in work. Weeks later you have to threaten mayhem to get the car back and now it has this strange whine . . .

That may sound like an episode from "I Love Lucy," but consumer advocates say it can happen in Alaska.

More people complain about their cars — and repairs performed on those cars — than about anything else handled by the Attorney General's Consumer Protection Section. During fiscal year 1985, there were 660 vehicle-related complaints, topping the 404 complaints dealing with mail-order companies.

Rhonda Huffman, who runs the Alaska Better Business Bureau Auto Line program, doesn't know how many complaints her bureau handles but says the load is heavy.

Automotive complaints are high in Alaska because we don't have an abundance of

See Page D-2, STATE

State and federal laws aim to protect car buyers stuck with new or used lemons

Continued from Page D-1

mechanics — especially mechanics who know what they're doing, says Ronald "Scotty" Dawkins, who investigates auto fraud for the attorney general.

"If you look at some numbers, you'll find from 1977 till 1982, Alaska auto dealers had an increase in sales, measured in dollars, of 80 percent. During that same period, they increased the number of employees in the five or six percent range. You go into any of the dealers, there are lots if sales folks but there's nobody to fix the damned automobiles.

"We also don't pay the mechanics very well — the good ones move on to (North) Slope jobs, move on to construction jobs, move on to fixing fishing boats. Most good mechanics don't stay working for car dealers."

Dieter Wuerth, general manager at Pacific Mitsubishi, agrees that good mechanics are hard to come by, but he says wages are not the reason.

"Mechanics, by and large, are well-paid," he says. He attributes the nationwide shortage — despite healthy wages — to the complexity of modern automobiles and to the fact that mechanics have to work with asbestos and toxic chemicals.

Wuerth adds that customers fume about the cost of car maintenance because cars start depreciating in value just when they become more expensive to keep up.

If you're having trouble with cars or repairs, your options dealing with the problem include:

- Talking to the car dealer or repair shop involved in the dispute;
- Writing the manufacturer;
- Notifying the Attorney General's Consumer Protection Section;
- Notifying the Better Business Bureau;
- Going to court.

Before you file a formal complaint anywhere, you should talk to the owner of the shop or dealership first, consumer advocates say. This step is recommended by Consumer Protection but is *required* by the Better Business Bureau.

Another smart preliminary step is to check with a national auto safety hotline to find out if your problem is related to anything that's the subject of a manufacturer's recall. The hotline is operated by the National Highway Traffic Safety Administration. The number is (800) 424-9393.

This suggestion applies to used cars as well as new ones, says Dawkins, especially if your complaint relates to premature failure of some part or if your car has a problem with brakes or steering that mechanics can't diagnose. You'll also be helping to build up a valuable national record about mechanical defects in automobiles if you register your complaint with the traffic safety administration.

At this point, the complaint-resolution path begins to branch.

USED CARS

- **Complaints against private parties:** If you're having trouble with a car you bought from an individual, your only recourse — if the person won't take responsibility — is legal action. Small claims court is the place to go if the amount is less than $2,000; superior court handles cases that are more than $2,000.

- **Complaints against dealerships:** If you bought your secondhand car from a licensed dealer, you'll find several mechanisms for settling disputes.

One is the Attorney General's Consumer Protection Section. Workers here will ask you to fill out a complaint form or submit a letter describing your problem. It doesn't cost anything. Dawkins probably will handle your case unless it centers on deceptive advertising. In that case, you'll be working with attorney Sheridan Strickland.

Both these investigators rely on informal mediation whenever possible: They will telephone the shop owner or car dealer and try to convince him to "make it right," as Dawkins puts it. Because the caseload is so high, however, legal action is reserved for businesses that violate consumer protection statutes flagrantly or often.

Consumer Protection can require any business to respond to customer complaints and can file lawsuits in civil court against owners who commit fraud, run false advertising or misrepresent their goods.

Further, the section can turn over its most serious cases — like those involving automobile odometer rollbacks — to the District Attorney's office for criminal prosecution.

Another way to settle used-car complaints is through the voluntary mechanism run by the Alaska Better Business Bureau. This group, which opened in 1984, mediates complaints between nearly 600 member companies and their customers; expenses are paid by business membership fees. Businesses don't have to join the bureau, but those that do are required to respond to complaints and participate in arbitration if necessary.

NEW CARS

Owners having problems with new cars that are still under warranty have more ways to settle disputes. The ultimate solution is filing suit under the 1984 Alaska Lemon Law. The first known Lemon Law suit was filed against Ford Motor Co. on Jan. 8.

Your car might qualify as a lemon if:

- Mechanics have tried three times to repair the same defect while the warranty is in effect or while the original owner has had the car for a year or less;
- If the vehicle is out of service for repair for 30 or more business days during the same one-year period;
- Or if the problem substantially impairs the use or the market value of the vehicle.

For more details, contact Con-

sumer Protection for a brochure on the Lemon Law.

The law requires you to submit your Lemon Law case to an approved arbitration board before filing a civil suit in court. In Alaska, the attorney general has the authority to approve or disapprove such arbitration boards. The only one it has approved so far is the one at the BBB.

The BBB's Auto Line got under way in November 1984 and covers these manufacturers:

American Motors, Audi, Buick, Cadillac, Chevrolet and Chevrolet truck, General Motors Corp. (trucks only), Honda, Jeep, Nissan, Oldsmobile, Pontiac, Porsche, Renault, Rolls-Royce, Volkswagen, Volvo, Jaguar, Maserati, Peugeot and Saab.

But before you go to the BBB with a potential Lemon Law problem, there are several steps you should take first.

To start with, talk to the dealer or authorized repair shop about your problem. Follow up those calls with letters. If that doesn't resolve your grievance, write to the manufacturer's headquarters. If the car dealer won't give you the address, you can get it from the reference desk at the Z.J. Loussac Library. Always keep copies of letters and retain the originals of any documentation such as receipts, experts advise.

If the manufacturer agrees with your position, it may instruct the local dealer to handle your complaint.

If that doesn't work, your next step is the Better Business Bureau. The manufacturers listed above have volunteered to participate in arbitration. The arbitrator's decision is binding on the manufacturers, but not on you.

If you're not satisfied with the decision, you can hire an attorney and file a lawsuit.

Two major manufacturers not participating in the BBB's program are Ford and Chrysler Corp. They have in-house arbitration set-ups, and both have taken steps to gain Consumer Protection approval for their procedures.

If Consumer Protection approves these manufacturers' arbitration boards, participation will be mandatory for complaining customers.

In November, the attorney general rejected Chrysler's application because it was decided the process favored the manufacturer. Last Monday, Ford's application was turned down for the same reason. However, consumer officials say the door is open for both companies to re-apply.

Until and unless Ford and Chrysler arbitration boards are approved, the customer may bypass arbitration and take his case directly to court.

Since the Alaska Lemon Law and the BBB arbitration mechanism both are new, consumer experts say, it's not yet certain whether the Ford and Chrysler customers have a better deal. They may be fortunate because they can sue immediately; they may also be missing an opportunity for cheap and relatively easy complaint resolution.

A strong, private-sector arbitration program, seen as fair by industry and customers alike, would be invaluable, say consumer advocates; however, it may take some years to build such a program.

Linda Chamberlain is a paralegal who volunteers as an arbitrator for the Auto Line program. Before moving to Alaska, she served as an arbitrator in an Auto Line program in New York state.

She says the Alaska BBB should provide a comprehensive training program for arbitrators (they get a one-night meeting now); she also advocates a three-person panel to review "buy-back" decisions, those cases where an arbitrator orders the manufacturer to refund the customer's money.

☐ Where to find help:

• Alaska Better Business Bureau, 417 Barrow St., Anchorage 99501. 276-5901.

• State Consumer Protection Section, 1031 W. 4th Ave., Suite 300, Anchorage 99501. 279-0428.

• Workers at either agency can tell you how to contact a car manufacturer's in-house arbitration board.

USED CAR LEMON LAW USED CAR LEMON LAW

USED CAR LEMON LAW

State of New York Attorney General Robert Abrams

STATE OF NEW YORK
DEPARTMENT OF LAW
ALBANY 12224

ROBERT ABRAMS
ATTORNEY GENERAL

Dear New Yorker:

We have all heard stories of people who bought used cars only to experience breakdown after breakdown. Some people even have had difficulty making it from the used car lot to home without mishap. Unfortunately these stories are not fiction -- but painful facts.

Buyers of new cars are protected by the manufacturer's warranty and by various state laws. But until now, there has not been adequate protection for used car buyers even though used cars outsell new cars two to one. Now, New York State has passed the first law in the nation to offer real protection to the hundreds of thousands of New Yorkers who buy used cars each year from dealers.

The Used Car Lemon Law represents a great victory for consumers. My office was instrumental in formulating this bill and, along with others, worked hard to secure its passage. The new law, which went into effect November 1, 1984, provides long-needed consumer protection for used car buyers. It requires dealers to give consumers a written warranty when they buy a used car costing $1,500 or more. If the car has over 36,000 miles, the warranty lasts for 30 days or 1,000 miles; if the car has under 36,000 miles, the warranty lasts for 60 days or 3,000 miles. Most essential mechanical parts are covered.

The workings of this new law are explained in this publication prepared by my office to help consumers understand the law and how it affects and protects them.

If you have further questions about the lemon law for used cars or require additional assistance, write to my nearest local office.

Sincerely,

Robert Abrams

What Is The Purpose Of The Used Car Lemon Law?

The Used Car Lemon Law (General Business Law §198-b) provides a new legal remedy for buyers of used cars that turn out to be lemons. The law requires dealers to give consumers a written warranty the duration of which is determined by the mileage on the used car purchased. Under the warranty, dealers must either repair, free of charge, or replace used cars that turn out to be lemons.

Who Is Protected By The Used Car Lemon Law?

The law protects consumers who purchase any used passenger motor vehicle sold for $1500 or more from a dealer in New York State on or after November 1, 1984. A consumer is the purchaser of a used motor vehicle normally used for personal, family or household purposes. The spouse or child of the purchaser is covered if the car is transferred to either during the duration of any applicable warranty. Any other person entitled by the terms of the warranty to enforce its obligations is also covered.

The private sale of a used car between individuals is not covered by the lemon law.

Which Used Motor Vehicles Are Covered?

A used motor vehicle is a passenger motor vehicle which has been driven more than the limited use necessary in moving or road testing a new car prior to delivery. Used motorcycles, motor homes, off-road vehicles and cars which sell for less than $1,500 are not covered by the law. A "classic car" registered under §401 of the vehicle and traffic law is not covered.

Which Used Car Dealers Are Included?

A dealer is any person or business which sells or offers for sale a used car after selling or offering for sale three or more used cars in the previous twelve month period. Banks or other financial institutions are not included. Others excluded are: a business selling a used car to its own employee; a lessor selling a leased car to the lessee of that car; a family member or an employee of such lessee; the state or local government.

What Does The Law Require The Dealer To Do?

A dealer who sells a used car to a consumer is required to give the consumer a mandatory written warranty whose terms are specified in the law. This warranty is called a statutory warranty and must be honored by the dealer. The statutory warranty must specify that while it is in effect the dealer or

his agent will repair, free of charge, the failure of any part of the used car covered by the warranty. The dealer may elect to reimburse the consumer for the reasonable cost of repairing the failure of any covered part.

How Long Does The Warranty Last?

If the used car has 36,000 miles or less, the warranty must last for at least 60 days or 3,000 miles, whichever comes first.

If the used car has more than 36,000 miles, the warranty must last for at least 30 days or 1,000 miles, whichever comes first.

What Parts Are Covered?

Covered parts must at least include:

ENGINE -- All lubricated parts, water pump, fuel pump, manifolds, engine block, cylinder head, rotary engine housings and flywheel.
TRANSMISSION -- The transmission case, internal parts, and the torque converter.
DRIVE AXLE -- Front and rear axle housings and internal parts, axle shafts, propeller shafts and universal joints.
BRAKES -- Master cylinder, vacuum assist booster, wheel cylinders, hydraulic lines and fittings and disc brake calipers.
RADIATOR
STEERING -- The steering gear housing and all internal parts, power steering pump, valve body, piston and rack.
ALTERNATOR
GENERATOR
STARTER
IGNITION SYSTEM EXCLUDING BATTERY

What If The Dealer Does Not Give The Statutory Warranty?

If a dealer fails to give a consumer the written statutory warranty as required, the dealer is nevertheless considered to have given the warranty.

Can A Dealer Limit Coverage Under The Statutory Warranty?

Yes, but only as specified in the law. The law permits a dealer to add additional language to the statutory warranty excluding coverage:

(a) for a failure of a covered part caused by a lack of customary maintenance;
(b) for a failure of a covered part caused by collision, abuse, negligence, theft, vandalism, fire or other casualty and damage from the environment (windstorm, lightning, road hazards, etc.);

(c) if the odometer has been stopped or altered such that the vehicle's actual mileage cannot be readily determined or if any covered part has been altered such that a covered part was thereby caused to fail;

(d) for maintenance services and the parts used in connection with such services such as seals, gaskets, oil and grease unless required in connection with the repair of a covered part;

(e) for a motor tuneup;

(f) for a failure resulting from racing or other competition;

(g) for a failure caused by towing a trailer or another vehicle unless the used motor vehicle is equipped for this as recommended by the manufacturer;

(h) if the used motor vehicle is used to carry passengers for hire;

(i) if the used motor vehicle is rented to someone else;

(j) for repair of valves and/or rings to correct low compression and/or oil consumption which are considered normal wear;

(k) to the extent otherwise permitted by law, for property damage arising or allegedly arising out of the failure of a covered part; and

(l) to the extent otherwise permitted by law, for loss of the use of the used motor vehicle, loss of time, inconvenience, commercial loss or consequential damages.

Can The Dealer Cause Buyers To Waive Their Rights Under The Lemon Law By Use Of A Contract Clause?

No. Any contract clause which seeks to waive a buyer's rights under the Used Car Lemon Law is void.

Can A Dealer Give Additional Warranty Protection?

Yes. The statutory warranty sets only minimum obligations for dealers. A dealer may agree as part of the sale to give a consumer more warranty protection than the law requires. Extra warranty protection can be a matter of negotiation between the dealer and consumer.

What Should A Used Car Buyer Do If There Is A Problem?

The buyer should immediately report any malfunction or defect of a covered part to the dealer and give the dealer the opportunity to make the necessary repairs. If the consumer has notified the dealer of a problem within the warranty period, the dealer must make the repair even if the warranty has expired.

What Happens To The Warranty When The Car Is Being Repaired?

The warranty is extended during any in-shop time for repairs.

How Can The Buyer Help Prove He/She Is A Lemon Owner?

It is very important to keep careful records of complaints and copies of all work orders and repair bills.

What If The Dealer Does Not Repair The Car?

If the dealer is unable to repair the problem after a reasonable number of attempts, and if the problem "substantially impairs the value of the used car" to the consumer the dealer must accept the return of the car and make a refund. A refund includes the full purchase price plus the sales tax. A reasonable allowance may be taken by the dealer for any damage beyond normal wear or use. An adjustment may also be made for any modification to the car which either increases or decreases its market value.

Does The Law Set Limits On The Number Of Repair Attempts?

Yes. It is presumed that there have been a reasonable number of repair attempts by the dealer if during the statutory warranty period: (1) the same problem has been subject to repair three or more times and the problem continues to exist - or (2) the car is out of service by reason of repair for a cumulative total of 15 or more days. When calculating this 15 day total, days during which repairs could not be completed due to the unavailability of necessary parts are not included. However, the dealer is required to exercise due diligence in attempting to get the necessary parts and there is an absolute 45 day limit.

Under The Law, Can The Dealer Provide A Replacement Vehicle Instead Of A Full Refund To The Consumer?

Yes, if the consumer is willing to accept a replacement car instead of a full refund. But the decision to offer a replacement car rests with the dealer. If the dealer offers a replacement vehicle and the consumer agrees, the parties must negotiate between themselves any adjustment in price.

If A Trade-in Was Involved, How Is A Refund Determined?

The dealer can choose either to return any vehicle traded-in by the consumer at the time of the sale of the used car; or, to refund the wholesale value of the car when it was traded-in. The wholesale value must be determined by referring to the "NADA Used Car Guide"*. An adjustment may be taken for mileage, improvements or major defects that existed at the time of the trade-in. The dealer need not refund the value of the trade-in car listed in the sales contract. The sales contract must clearly describe this required method of calculating the value of any trade-in vehicle which is not returned to the consumer.

---

* The State Motor Vehicle Department is authorized to approve the use of an alternative guidebook.

Are There Any Exceptions To The Requirement For Refund Or Replacement?

Yes. The dealer does not have a duty to make a refund of the purchase price if: (1) the problem does not substantially impair the value of the car to the buyer; or (2) the problem is the result of the buyer's abuse, neglect or unreasonable alteration of the car.

What Type Of Problem Will Be Considered A Substantial Impairment Of The Value Of The Used Car To The Buyer?

There is no easy answer. It will depend on the facts in each case. In general, the buyer's complaint must be about a serious problem. A defect in the engine which makes the car inoperable is clearly substantial. Some courts have found that the cumulative effect of numerous minor defects can add up to a substantial impairment of value.

Is The Buyer Automatically Eligible For A Refund After A Reasonable Number Of Repair Attempts?

No. The buyer must first participate in any mediation procedure that the dealer may have established or joined if that procedure conforms to Federal Trade Commission regulations.

What Are The Major Federal Trade Commission Requirements For Mediation Procedures?

The mediation procedure must be: (1) free of charge; (2) non-binding on the buyer; (3) explained in the car warranty; (4) a decision must be generally given within 60 days after receipt of the buyer's complaint; and (5) the decision must be free from the influence of the dealer.

How Can A Buyer Find Out If A Particular Dealer's Mediation Procedure Complies With Federal Trade Commission Requirements?

A buyer can write to the Federal Trade Commission, Washington, D.C. 20508, or to the nearest office of Attorney General Robert Abrams.

What Happens After The Buyer Participates In A Mediation Procedure And Is Not Satisfied With the Decision?

The buyer can sue the dealer in court to enforce his/her rights under the law. In court, a car which has not been repaired after three attempts, or 15 days, will be presumed to be a lemon.

If The Buyer Decides To Sue The Dealer When Must The Lawsuit Be Started?

The lawsuit must be started within four years of the date of original delivery to the consumer.

If The Buyer Wins In Court Can Attorney's Fees Also Be Recovered?

Yes. The law authorizes the court to award reasonable attorney's fees to a buyer who wins in court.

Does The Used Car Lemon Law Eliminate Or Limit Any Of The Other Legal Remedies Already Available To Buyers Of Defective Cars Or Other Goods?

No. The Used Car Lemon Law adds to the buyer's arsenal of existing legal remedies. The most important of these remedies is the warranty of serviceability. (Vehicle and Traffic Law §417) This warranty cannot be waived by the buyer. It requires a dealer to certify to a used car buyer that the car is in condition and repair to render, under normal use, satisfactory and adequate service at the time of delivery. In addition, specified safety equipment must be in good working order. The Motor Vehicle Department can help a buyer to enforce this warranty.

Where Can I Get Help On Any Questions Regarding The Used Car Lemon Law?

You can contact the nearest office of Attorney General Robert Abrams listed in this pamphlet. You may also wish to consult your own lawyer.

This fact sheet was prepared by Assistant Attorney General Sandy Mindell and Assistant Attorney General In Charge of the Consumer Frauds and Protection Bureau, Peter Bienstock. Produced by the Office of Public Information, Joan Libby, Director.

RE: SB 424, Snow Tires

Last Wednesday the committee heard a committee substitute for SB 424, requiring snow tires on rental vehicles.

This CS reflects the concerns of the committee. It was observed that the committee is concerned about safety, but also desired setting up a workable structure for the rental owner.

In Sec. 1 (f) the CS reflects the dates now used throughout the state when snow tires can be used. The sponsor's original language is maintained, "shall equip vehicles from the rental fleet at each rental location," but no percentage or minimum number of vehicles is required to comply with this law.

"Rental fleet" is defined as unrented vehicles and those already rented. This provision would insure that the renter would not be penalized because he or she does not have a car available with snow tires.

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to studded tires or chains on rented motor vehicles."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 28.35.024 is amended by adding a new subsection to read:

(f) Except for that period when studded tires or chains are prohibited under AS 28.35.155, a person who rents motor vehicles to others shall, upon request of the person to whom the vehicle is to be rented, provide a vehicle equipped with studded tires or chains adequate to inhibit skidding or loss of control of the vehicle. This subsection does not apply to a person who rents motor vehicles to others if all available motor vehicles equipped with studded tires or chains are temporarily not at the rental location because they have been rented to a customer.

Dear Senator Coghill:

I'm now writing under a different hat as President of the Car and Truck Rental and Leasing Association (CATRALA) of Alaska. Representing that organization, I am most concerned about Senate Bill No. 424 - "An Act relating to studded tires or chains on rented motor vehicles.". We don't understand what triggered this, but here are our concerns:

- None of us are aware of any identified safety problem that requires this legislation. Indeed, knowledgeable Alaskan drivers know that under some winter conditions, the use of chains can be more rather than less hazardous -- or at best, offer no greater degree of safety.
- As a matter of policy, chains are not provided for local city travel or travel to nearby locations. Experience has shown that chains encourage some customers to try to go where they shouldn't during winter months or drive faster than is safe. The proposed bill could inadvertently result in unsafe use of our vehicles.
- Most rental agencies provide studded snow tires on the majority of rental vehicles, on the drive-wheels. However, at least one rental agency does not use them. The customer thus can make the choice.
- Certain of the high-quality radial tires are all-weather and are used year-round on some makes of cars.
- Thus, the bill imposes an added cost for no apparently justifiable reason.
- In general, such specificity in the law is poor practice and to the degree justified should be left to regulation.
- To the best of our knowledge, rental car operators are providing customers with cars that drive adequately under winter conditions. For example, chains are often provided as a matter of course to intercity travelers.

I understand that a hearing has been scheduled at 3:30 p.m., March 26, using the teleconference room here in Anchorage. Mr. Bob Vitale of Holiday Payless in Fairbanks would also like to testify at your Fairbanks teleconference center if that is possible. Please ask your staff to let me know.

Thank you for your consideration.

Sincerely,

Jack B. Hayes

Date: April 9, 1986

To: Senator Sackett

From: Max Gifford,
Administrative Aide

Subj: SB-424 relating to studded tires or chains on rental motor vehicles

The proposed Sen. Transportation Committee CS effectively kills the purpose and intent of your original bill. A rental agency would be happy to rent any vehicle to anyone who wanted studded tires or chains if they had them available. The fact is (and testimony to the committee verified that fact) rental agencies do not have studded tires or chains readily available for those who request them. Your bill simply requires that rental agencies make the effort to have such equipment on hand during certain months so that those who want them may request the equipment for the rental vehicle. If all the equipment is being used, then the potential customer has the choice to accept a vehicle without studded tires or chains or move on to another rental agency.

I talked with Mike Ford, Legal Services, and he said that the CS effectively makes the intent of the bill, moot.

MEMO - Gifford to Sackett

TO: All Committee Members

FROM: Committee Staff

RE: Today's meeting

Today the committee will hear SB 424, "An Act relating to studded tires or chains on rented motor vehicles." This bill, sponsored by Senator Sackett, would add a new section to Chapter 35, the miscellaneous provisions of the motor vehicle code. This bill would make it mandatory for car rental agencies to supply cars with studded tires or chains from October 1 to April 1 upon the request of the renter.

Mr. Jack Hayes, president of the Car and Truck Renting and Leasing Association and Mr. Bob Vitale of Holiday Payless in Fairbanks will be testify via teleconference.

Mr. Max Gifford of Senator Sackett's office will testify on the merits of the bill.

On another subject, the committee substitute for SB 428, the prepared rights of way bill, will be up for consideration.

Subj: SB-424, an Act relating to studded tires or chains on rented motor vehicles

As a result of a personal experience which happened to me last Fall, I have introduced SB-424, which adds a new subsection to AS 28.35.024, pertaining to the rental of motor vehicles.

I rented a vehicle in Anchorage last year on the day snow first fell last Fall. I inquired about having studded tires but was informed that the vehicle was equipped with adequate tires for the icy road conditions. Shortly after leaving the rental facility I attempted to brake and found that I had little or no control over the rental car. I bumped into the rear of another vehicle. Following the mishap I inquired as to the laws pertaining to renting vehicles and whether it was required to provide studded tires or chains when weather conditions warranted. I learned that such a law did not exist.

My staff contacted the National Safety Council and learned that chains and studded tires provided greater safety to motorists when ice and snow make road conditions dangerous. With this information at hand I decided it would be in the best interest of the driving public that they at least have the option of having studded tires or chains on vehicles they may rent. The facts seem clear, all-weather radial tires do not provide the driver of a vehicle with any additional safeguards while driving in snow or ice. The attached fact sheet from the National Safety Council supports the conclusion that the statutes should be amended to include provisions for studded tires or chains for those drivers who desire them.

☐ **FANCY SNOW TIRES STILL SPIN:** All that fancy tread work on snow tires doesn't do a heck of a lot for winter drivers, according to a National Safety Council study. In fact, the average snow tire performed *worse* than regular tires on glare-ice braking tests. Adding metal (i.e. studs or chains) to their rubber is the best safeguard for winter drivers, the study concludes. Here's the test results, based on percent improvement over regular tires:

TRACTION ON GLARE ICE:

snow tires	28 percent
studded snow tires	218 percent
tire chains	630 percent

TRACTION ON LOOSELY PACKED SNOW:

snow tires	51 percent
studded tires	no data
tire chains	313 percent

BRAKING ON GLARE ICE:

snow tires	-1 percent
studded tires	19 percent
tire chains	49 percent

BRAKING ON LOOSELY PACKED SNOW:

snow tires	13 percent
studded tires	no data
tire chains	37 percent

CONTINUATION of FISCAL NOTE ANALYSIS

For Bill/Resolution No. HB 600 and SB 428

The Department of Transportation and Public Facilities has some concern regarding the language of both House Bill No. 600 and Senate Bill 428. We do not understand the intent of these bills in view of present Alaska Statutes 44.42.020 and 09.55. Our major concern is with the words: "...prepared rights-of-way..." By statutes, acquisition would be limited to fair market value regardless of whether the right of way is "prepared" or not.

These bills appear to have no measurable fiscal impact on the Department of Transportation and Public Facilities as any funding for the acquisition would be by legislative appropriation.

CITY AND BOROUGH OF SITKA, State of Alaska, and Alaska Lumber and Pulp Co., Inc., a Corporation, Appellants,

v.

CONSTRUCTION AND GENERAL LABORERS LOCAL 942, International Unions of Operating Engineers Local 302, and Teamsters Local 959, State of Alaska, Appellees.

No. 5774/5811.

Supreme Court of Alaska.

May 7, 1982.

Unions filed complaint alleging various charges against a proposed timber contract between a lumber company and a city and alleging, in effect, that workers had received less than the prevailing wage in violation of statute. The Superior Court, First Judicial District, Sitka, Duane Craske, J., held that the unions were entitled to recover. Appeal was taken. The Supreme Court, Compton, J., held that: (1) the statute requiring payment by a contractor or a subcontractor who performs work on public construction in the state to pay not less than the prevailing rate of wages for work of similar nature in the region in which the work is done was applicable to a timber sale contract entered into by the lumber company and the city, since the clearing of timber pursuant to the contract was a substantial portion of a project for the construction of a hydroelectric dam, and (2) a stipulation entered into between the lumber company and the unions that, if the unions prevailed on the claim concerning the applicability of the statute, the remedy would be in the form of damages precluded a challenge to the issue whether the statute authorizes a private right of action.

Judgment affirmed.

1. Labor Relations ⇐1132

Timber sale contract is not generally subject to statute requiring payment by contractor or subcontractor who performs work on public construction in state to pay not less than prevailing rate of wages for work of similar nature in region in which work is done. AS 36.05.010.

2. Labor Relations ⇐1132

In determining whether timber sale contract between lumber company and city was subject to statute requiring contractor or subcontractor who performs work on public construction in state to pay not less than prevailing rate of wages for work of similar nature in region in which work is done, focus of inquiry was whether clearing of timber pursuant to contract related to construction of dam which was to be built on site. AS 36.05.010.

3. Labor Relations ⇐1132

Logging to be done pursuant to timber sale contract between lumber company and city was substantially related to construction of dam on that site and, therefore, was "public construction" subject to statute requiring contractor or subcontractor who performs work on public construction in state to pay not less than prevailing rate of wages for work of similar nature in region in which work is done. AS 36.05.010.

See publication Words and Phrases for other judicial constructions and definitions.

4. Labor Relations ⇐1132

Fact that timber sale contract between lumber company and city was separated from contract for construction of dam for hydroelectric project did not preclude determination that timber sale contract was subject to statute requiring contractor or subcontractor who performs work on public construction in state to pay not less than prevailing rate of wages for work of similar nature in region in which work is done. AS 36.05.010.

5. Labor Relations ⇐1132

Focus of statute requiring contractor or subcontractor who performs work on public construction in state to pay not less than prevailing rate of wages for work of

similar nature in region in which work is done is benefit of employees, not of contracting principals. AS 36.05.010.

6. Labor Relations ⇐1132

Whether government pays contractor or whether contractor pays public agency does not determine whether contract in question is subject to statute requiring contractor or subcontractor who performs work on public construction in state to pay not less than prevailing rate of wages for work of similar nature in region in which work is performed. AS 36.05.010.

7. Stipulations ⇐14(12)

Stipulation agreed to by lumber company that if unions prevailed in litigation seeking determination of whether statute requiring contractor or subcontractor who performs work on public construction in state to pay not less than prevailing rate of wages for work of similar nature in region in which work is done was applicable to timber sale contract between lumber company and city, remedy would be damages paid to workers, precluded lumber company from raising issue of whether statute authorized private right of action to recover back wages. AS 36.05.010.

James F. Clark, Robertson, Monagle, Eastaugh & Bradley, Juneau, and Peter S. Hallgren, Sitka, for appellants.

Bruce Monroe and Paul L. Dillon, Birch, Horton, Bittner, Monroe, Pestinger & Anderson, Juneau, for appellees.

Before BURKE, C. J., and RABINOWITZ, CONNOR, MATTHEWS and COMPTON, JJ.

OPINION

COMPTON, Justice.

This is an appeal from the judgment of the superior court which held that a timber sale contract executed between Alaska Lumber and Pulp Co., Inc. (ALP) and the City and Borough of Sitka (Sitka) was subject to the provisions of Alaska's "Little Davis-Bacon Act," AS 36.05.010.110. The logging and related clearing took place on land Sitka owned and upon which the Green Lake Hydroelectric Project, a dam, was to be built. The superior court further held that pursuant to a stipulation negotiated by the parties, the Unions were entitled to an award of damages. We affirm.

I. FACTUAL AND PROCEDURAL BACKGROUND

During 1974 Sitka began planning the Green Lake Project as a source of hydroelectric power. In 1977 the State of Alaska withdrew land needed for the Project from federal ownership pursuant to its statehood land acquisition rights. It then conveyed the land to Sitka on March 16, 1979.

In March 1979, Sitka published its intent to receive sealed bids through May 1 for the construction of the Green Lake Project. The bid offering, Contract No. 3, originally set out all the specifications for the construction of the dam, including the timber clearing specifications.[1]

On April 19, 1979, ALP submitted an irrevocable offer to pay Sitka two million dollars for the right to remove the commercial timber and to accomplish the clearing in accordance with the pertinent specifications set forth in Contract No. 3.

1. Sitka submits that it never intended to include the timber clearing with the dam construction bid offering. When Sitka Municipal Administrator, Fermin Gutierrez saw that the engineering consultant firm which had prepared the bid offering had included the timber clearing within Contract No. 3, Gutierrez directed the firm to analyze the cost differential between a separate timber sale contract and including the timber clearing in the dam contract. Ultimately, the firm concluded that a separate timber sale contract would be to Sitka's advantage, ostensibly because many dam contractors would not view the timber as a commercial asset.

The Unions dispute whether Sitka always intended for the timber contract to be separate from the dam construction contract. However, since the Unions obtained summary judgment below, we must construe all disputed factual inferences in Sitka's favor. *See Kodiak Island Borough v. Large*, 622 P.2d 440, 446 (Alaska 1981).

4. AS 36.05.030
The Departm
to determine

Sitka promptly published Addendum No. 2 to Contract No. 3 in order to notify prospective bidders that Sitka would award a separate contract for substantially all of the reservoir clearing. Sitka stated that to be awarded this separate contract, the bidder would have to offer more than ALP offered. Addendum No. 2 noted that ALP had offered to pay $2,000,000.00 to perform the reservoir clearing pursuant to the requirements of Contract No. 3.

The bids were opened on May 15. Sitka awarded the dam construction contract to S. J. Groves and Company and the timber sale contract to ALP. Sitka and ALP signed on June 13, 1979 an agreement entitled "Timber Sale Contract." The ALP-Sitka contract provided that Contract No. 3 was incorporated by reference. The original bid offering, Contract No. 3, stipulated that Little Davis-Bacon was applicable.[2] All parties agree that the dam construction contract is subject to the Act. The parties dispute, however, whether Addendum No. 2 exempted from the wage provision employees engaged in the severed logging and clearing activities, the work ultimately performed by ALP.[3] The ALP–Sitka contract did not contain any express wage stipulations.

The Alaska Department of Labor has the authority pursuant to AS 36.05.030 to determine whether a contract is subject to Little Davis-Bacon.[4] In April 1979, Sitka received a form letter from the Wage and Hour Division of the Department stating that the proposed timber sale contract would be subject to the Act. Sitka disagreed with that conclusion, and persuaded the Director of the Division, Dale Cheek, to investigate the matter further. The Director subsequently stated his tentative opinion that the Act did not apply to the timber sale contract. An advisory memorandum issued by the Office of the Attorney General reached a similar result.[5]

The Department of Labor declined, however, to issue a formal determination of Little Davis-Bacon coverage.[6] As a result, in June 1979 two workers filed a complaint in superior court containing two causes of action against Sitka and ALP (hereafter collectively referred to as Sitka). The first

2. The relevant provision in Contract No. 3 provided:

   303.12 Section 205.10, "Wage Rates".

   a. The contractor or its subcontractor shall pay wages which are not less than the current prevailing rate of wages as determined by the Alaska Department of Labor for labor of a similar nature in the region in which the work is done. The rate of wages shall be adjusted to the wage rate for each pay period as applicable under AS 36.05.010.

3. The Unions submit that the reference to Contract No. 3 incorporated the general wage stipulation set forth in section 303.12 of the contract. Sitka contends that Addendum No. 2 distinguished between the Contractor and the Clearing Contractor. The Clearing Contractor, in Sitka's view, was bound only by those sections of Contract No. 3 *specifically* required of the Clearing Contractor. As a consequence, Sitka's interpretation of Addendum No. 2 is that only the Contractor was bound by the wage stipulation.

   For purposes of this appeal, we will accept Sitka's interpretation of Addendum No. 2. *See supra* note 1. Accordingly, our disposition of this appeal is not based upon an interpretation of the timber sale contract.

4. AS 36.05.030(a) provides in pertinent part:

   The Department of Labor has the authority to determine the prevailing wage, and whether or not sections 10–110 of the chapter are being violated.

   See Fowler v. City of Anchorage, 583 P.2d 817, 820 (Alaska 1978).

5. The relevant portion of the advisory memorandum provided:

   While it is apparent that the contract between AL&P and Sitka necessarily involves work preparatory to the construction of the Green Lake Hydro Project to be performed by a general contractor, it is equally apparent that the primary purpose of the contract is one involving timber sales, not construction of a public work.

   Accordingly, it is our view that the provisions of AS 36.05.010 do not apply to the contemplated contract between [Sitka] and [ALP].

   Memorandum from Bruce Botelho, Assistant Attorney General, to Dale Cheek (May 15, 1979).

6. The superior court requested briefing from the parties regarding the propriety of remanding the matter to the Department of Labor. Both parties opposed the remand.

   We do not decide whether the Department of Labor is required pursuant to AS 36.05.030 to issue a formal determination of Little Davis-Bacon coverage where such coverage is disputed.

cause of action set forth various charges against the proposed Sitka-ALP timber contract. The second cause of action alleged, in effect, that the workers had received less than the prevailing wage in violation of Little Davis-Bacon.

In August 1979 all parties entered into a stipulation which was then filed with the superior court and signed by the judge. Pursuant to the stipulation, the Construction and General Laborers Local 942, the International Union of Operating Engineers Local 302 and the Teamsters Local 959 (hereafter collectively referred to as the Unions) were substituted as plaintiffs. Both the Unions and Sitka gave up certain rights in the stipulation. The Unions agreed not to seek a preliminary injunction or other injunctive relief. Sitka agreed not to raise procedural defenses. The parties also stipulated as follows:

> 5. Plaintiffs seek declaratory relief in this case. In the event the court rules in Plaintiffs' favor, on those issues raised in Plaintiffs' Second Cause of Action, it is agreed that Plaintiffs' remedy will be in the form of damages to be paid to workers doing the work, which is the subject matter of this lawsuit, in accordance with Alaska law. Damages shall be paid to the workers as ordered by the Court, but in no event shall the sum ordered paid to the workers exceed the gross amount of Fifty One Thousand Dollars ($51,000.00).

After entering into the stipulation, both parties moved for summary judgment. The sole issue disputed was whether the Sitka-ALP timber contract was for "public construction" and thus covered by Little Davis-Bacon. The superior court ruled that the timber contract was for public construction. Accordingly, the court granted summary judgment to the Unions on November 3, 1980.

One portion of the judgment awarded the Unions as damages the back wages which the workers would have received if ALP had paid them the prevailing wage. On April 6, 1981, the United States Supreme Court held that the federal Davis-Bacon Act, 40 U.S.C. § 276a (1969), (hereafter referred to as Davis-Bacon), does not provide workers a private cause of action for back wages under a contract which administratively has been determined not to call for Davis-Bacon work. *Universities Research Association, Inc. v. Coutu*, 450 U.S. 754, 101 S.Ct. 1451, 67 L.Ed.2d 662 (1981). Relying on *Universities Research*, ALP filed a motion in superior court on April 24 to set aside the portion of the judgment which awarded the Unions damages. ALP argued that Little Davis-Bacon does not give the Unions a private right of action to recover back wages. ALP also contended that the award of damages should be set aside because no evidence on damages existed in the record. Sitka filed on May 8 a memorandum in support of ALP's motion. The superior court denied the motion on June 1, 1981, holding that paragraph 5 of the stipulation, quoted above, precluded consideration of the issue.

Sitka and ALP appeal. They submit (1) that the court erred in holding that the timber contract concerned public construction subject to Little Davis-Bacon coverage, and (2) that it was improper for the court to award the Union damages. For the reasons discussed below, we affirm the superior court judgment.

II. TIMBER SALE CONTRACT

The principal issue presented on appeal is whether the work performed pursuant to the ALP-Sitka contract was "public construction" subject to the wage protections afforded by Little Davis-Bacon.[7] AS 36.05.-010 provides in part:

> A contractor or subcontractor who performs work on public construction in which the state, as defined by AS 36.95.-010(3), shall pay not less than the current prevailing rate of wages for work of a similar nature in the region in which the work is done.

7. We employ de novo review to the question of law raised by the summary judgment motion. *See Armco Steel Corp. v. Isaacson Structural Steel Co.*, 611 P.2d 507, 516 n.22 (Alaska 1980).

Public construction is defined in AS 36.95.-010(3) as "the on-site field surveying, erection, rehabilitation, alteration, extension or repair, including painting or redecorating of buildings, of highways or other improvements to real property under contract for the state, a political subdivision of the state; . . ."

[1] All parties properly agree that a timber sale contract is typically not subject to the Act. Sitka, accordingly, labels the disputed contract a "timber sale contract," arguing that any site preparation work was incidental to the dominant purpose of the contract, the sale of timber. The Unions, on the other hand, argue that the sale of merchantable timber was incidental to the site preparation necessary for the construction of the Green Lake Project, and thus characterize the contract as a "clearing contract." The labels employed by the parties are merely the conclusions of a more substantive analysis. The dispositive issue in our view is whether a contract, which may independently be outside the scope of Little Davis-Bacon, may nonetheless be subject to the Act where the specified work is substantially related to "public construction."

No prior Alaska court has addressed this issue. We turn, therefore, to federal authorities pertaining to the federal Davis-Bacon Act, 40 U.S.C. § 276a (1969), the model of the Alaska statutory scheme. *See Fowler v. City of Anchorage*, 583 P.2d 817, 821 (Alaska 1978); *1961 Op. Att'y Gen. No. 17* at 4 (Alaska, August 8, 1961).[8]

The federal regulations, 29 C.F.R. §§ 4.116(b)(1), 5.2(f) and 5.2(g) (1980), clearly indicate that clearing done at a dam site in preparation for the dam's construction is "construction" within the purview of Federal Davis-Bacon.[9] Section 5.2(g) defines construction under Davis-Bacon as "all types of work done on a particular building or work at the site thereof." "Building" or "work" is defined in section 5.2(f) as including: [10]

> *without limitation*, buildings, structures, and improvements of all types, such as bridges, *dams*, plants, highways, park-

8. It is useful here to set out the statutory construction rules for Alaska statutes modelled after those of other jurisdictions. A rebuttable presumption arises that when Alaska bases a statute on one from another jurisdiction, it adopts into the Alaska statute all previous cases from the other jurisdiction's statute. *Zerbe v. State*, 583 P.2d 845 (Alaska 1978); *Nicholson v. Sorensen*, 517 P.2d 766, 770 n.9 (Alaska 1973). *See also Fowler v. City of Anchorage*, 583 P.2d 817 (Alaska 1978). There is no such presumption when the cases from the other jurisdiction are decided *after* Alaska adopts its statute, though such cases may be persuasive. *Nicholson v. Sorensen*, 517 P.2d at 770 n.9.

No federal cases address the question of whether logging preliminary to dam construction is subject to Davis-Bacon coverage. The most important federal authorities to have discussed this issue are 29 C.F.R. §§ 4.116(b)(1), 5.2(f) and 5.2(g) (1980). Sections 5.2(f) and (g) were promulgated in 1951, before AS 36.95.-010(3), which defines "public construction," became law in 1972, but after the original sections of Little Davis-Bacon became law in 1931. While this court is not bound by the federal regulations, we will look to the federal regulations construing Davis-Bacon for assistance in interpreting Little Davis-Bacon.

9. The parties refer to three position letters promulgated by the United States Solicitor of Labor. The most recent letter, dated December 13, 1961 states that the clearing and selling of timber preliminary to dam building is not itself "construction" under federal Davis-Bacon. That opinion, however, does not discuss 29 C.F.R. §§ 5.2(f) and (g). It is also noteworthy that the December 13, 1961 letter opinion is contradicted by two other Solicitor of Labor opinions. One opinion, dated May 23, 1961, was signed by Charles Donahue, the same Solicitor of Labor who signed the other opinion discussed above. The May 23 opinion discusses a contract in which the Forest Service permits Boise Cascade to log timber in exchange for money and the construction of permanent roads within the national forest. The opinion states that Davis-Bacon covers the logging of timber preliminary and necessary to build the roads but not the other logging. The second opinion, dated September 27, 1960, concluded that the clearing of timber necessary to build a runway and aircraft parking for the navy was public construction.

The parties do not cite to any more recent positions adopted by the United States Solicitor of Labor with respect to the scope of Davis-Bacon coverage.

10. The federal government has proposed changes in 29 C.F.R. Part 5 (1980). *See* 44 Fed. Reg. 77,080 (1979). Sections 5.2(f) and (g) remain unchanged, however, except that they are renumbered sections 5.2(i) and (j).

ways, streets, subways, tunnels, sewers, mains, power lines, pumping stations, railways, airports, termir ls, docks, piers, wharves, ways, light houses, buoys, jetties, break-waters, levees, canals, dredging, shoring, rehabilitation and reactivation of plants, scaffolding, drilling, blasting, excavating, *clearing*, and landscaping. [Emphasis added.]

Section 4.116(b)(1) was promulgated in 1968 pursuant to the McNamara-O'Hara Act. This act regulates service contracts with the federal government. It exempts from its requirements the contracts which the Davis-Bacon Act covers. Section 4.116(b)(1) states in part:

For example, a contract for clearing timber or brush from land or for the demolition or dismantling of buildings or other structures may be a contract for construction activity subject to the Davis-Bacon Act where it appears that the clearing of the site is to be followed by the construction of a public building or public work at the same location. If, however, no further construction activity at the site is contemplated the Davis-Bacon Act may be considered inapplicable to such clearing....

[2] We conclude that the federal regulations set forth an appropriate test to establish the parameters of Little Davis-Bacon. Accordingly, the focus of inquiry in determining whether the ALP-Sitka contract concerned "public construction" subject to the Act is the extent to which the work relates to the construction of the dam.

[3] The superior court, properly employing this analytic approach, concluded that "the predominant characteristic [sic] is that the work to be done is an integral part of the dam construction and is therefore 'public construction'." We agree. The logging occurred on the dam site, land acquired from the state expressly for the purpose of constructing the dam and its watershed. Moreover, it is uncontroverted that the clearing specifications incorporated by reference in the contract were intended to render the site suitable for the construction of the dam. The fact that the clearing work was initially included in the bid offering is further evidence of the strong linkage between the ALP-Sitka contract and the construction of the dam. In sum, the logging and related clearing work performed by ALP pursuant to the contract was preliminary and essential to building the dam, and would not have occurred when it did but for the dam.

[4] Sitka rejects this mode of analysis. Sitka instead submits that the determination of Little Davis-Bacon coverage should only reflect the isolated characteristics of the timber contract without consideration of the broader context in which the contract arose. Sitka thus argues that once severed from the dam construction bid, the ALP-Sitka contract is essentially the same as any other timber sale contract, and is therefore outside the scope of Little Davis-Bacon coverage. We recognize, in this regard, that the disputed contract does in fact have many of the attributes of a prototypical timber sale contract.

Sitka's position, however, unduly exalts form over substance. Had the logging remained in the parent construction bid, it is clear that the wage protections would have been applicable. That Sitka determined that it was to its benefit to sever the logging and clearing work is functionally irrelevant. It is the nature of the work and the relationship of the logging work to the dam project which are the salient considerations.

[5] Sitka's reliance on the fact that the timber contract was severed from the dam contract is misplaced for the additional reason that such a rule would thwart the policies which underly Little Davis-Bacon. The fundamental purpose of Little Davis-Bacon is to assure that employees engaged in public construction receive at least the prevailing wage. The focus of the Act, quite clearly, is to the benefit of the employees, not the contracting principals.[11] To argue that Sitka should

that Sitka should be allowed to maximize the economic benefit to be derived from the sale of merchantable timber simply miscasts the focus of the Act. Presumably, ALP would have payed Sitka less for the right to remove the timber had the timber contract been determined to be subject to Little Davis-Bacon wage guarantees. Quite unlike the mythical sailor torn between Scylla and Charybdis, Sitka found itself in the enviable position of having to choose whether to maximize the return from the sale of timber or whether to stipulate that Little Davis-Bacon wage guarantees attached to the contract. Where "public construction" is involved, however, the legislature has provided that the tension must be resolved in favor of the employees. Sitka's position, in essence, invites the government to sever from a public construction bid offering any aspect of the endeavor which may have an unrelated profit incentive, such as the removal of a natural resource. Such a rule impermissibly enables a public agency to profit at the expense of workers engaged in activities instrumental to a public construction project.

Sitka also argues that the logging should not be considered public construction because ALP paid Sitka to log the timber whereas in the typical public construction contract the public agency pays the contractor. Sitka notes that AS 36.05.070(a) applies only to "a public construction contract exceeding $2,000." The statutory language cited by Sitka is plainly intended to restrict Little Davis-Bacon coverage to "substantial" public construction projects, i.e., those in excess of $2,000. The ALP-Sitka contract concerns an activity which can hardly be characterized as insubstantial. Viewing only the timber transaction, Sitka has conferred on ALP a benefit, the merchantable timber, which is valued by the parties at two million dollars.[12]

[6] In support of its contention that it is the flow of money from the government to a private contractor which is determinative of Little Davis-Bacon coverage, Sitka notes that AS 36.05.070(c)(4) requires the contracting public agency to withhold payments to contractors who violate the Act by failing to pay the prevailing wage. Sitka argues that section 36.05.070(c)(4) is the enforcement mechanism of the Act. The mechanism fails to work when, as in the instant case, the contractor pays the public agency rather than vice versa. Actually AS 36.05.070(c)(4) is only one of several enforcement mechanisms under the Act. The other enforcement mechanisms work equally well whether the contractor pays the public agency or the public agency pays the contractor. Under AS 36.05.060, violators of Little Davis-Bacon can be prosecuted criminally. AS 36.05.080 permits the contracting agency to terminate the contract if the contractor violates the Act by not paying the prevailing wage. AS 36.05.090(b) permits the workers to sue for back wages.[13] Under AS 36.05.030 the Department of Labor has the power to investigate violations, including the power to hold hearings where it can compel the attendance of witnesses and the production of books, papers and documents. Thus, we conclude that adequate enforcement mechanisms exist regardless of whether the money flows from the government to a private contrac-

contractors, but rather to protect their employees from substandard earnings by fixing a floor under wages on Government projects." *U.S. v. Binghamton Cons. Co.*, 347 U.S. 171, 177, 74 S.Ct. 438, 441, 98 L.Ed. 594, 599 (1953). *See Walsh v. Schlecht*, 429 U.S. 401, 411, 97 S.Ct. 679, 686, 50 L.Ed.2d 641, 650 (1977).

12. Once a sufficient nexus has been established between a contract and a public construction project, we may look to the value of the entire endeavor to ascertain if the $2,000 threshold requirement has been satisfied.

13. AS 36.05.090(b) provides in part:

> If the accrued payments withheld under the contract are insufficient to reimburse all the laborers, mechanics, or field surveyors with respect to whom there has been a failure to pay the wages required under section 70 of this chapter, the laborers, mechanics or field surveyors have the right of action or intervention or both against the contractor and his sureties conferred by law upon persons furnishing labor or materials. . . .
>
> As we discuss in part III, *infra*, the scope of the workers' private right of action remains undetermined.

tor, or from the contractor to a public agency.

III. PRIVATE RIGHT OF ACTION

[7] Sitka next contends that even if the logging work is deemed to be public construction within the meaning of Little Davis-Bacon, the Act does not authorize a private right of action for back wages.[14] As a consequence, Sitka submits that the award of damages was inappropriate. In paragraph 5 of the 1979 stipulation, however, Sitka agreed that if the Unions prevailed in the litigation, the remedy would be damages paid to the workers. The threshold inquiry, therefore, is whether or not to give effect to the stipulation agreed to by the parties.

The parties dispute the nature of the stipulation. The Unions characterize the stipulation as an "issue stipulation," and thus invoke the settled rule that such stipulations are binding on the parties.[15] Sitka, on the other hand, submits that the question of whether or not Little Davis-Bacon authorizes employees or their representatives to maintain a private right of action to recover back wages is a legal issue and thus cannot be foreclosed by stipulation.[16]

In our prior cases we have dealt with stipulations which merely foreclose consideration of a legal issue in a different fashion than stipulations which seek to resolve without judicial scrutiny a legal question.

Issue stipulations, on the one hand, save time and money for the litigants and for the court. *Godfrey v. Hemenway*, 617 P.2d 3, 8 (Alaska 1980); *Interior Credit Bureau v. Bussing*, 559 P.2d 104, 106 (Alaska 1977); *Greater Anchorage Area Borough v. City of Anchorage*, 504 P.2d 1027, 1031 (Alaska 1972). Moreover, issue stipulations are oftentimes a negotiated compromise in the parties' respective legal positions. Accordingly, we have on several prior occasions given effect to a stipulation which foreclosed consideration of a legal issue. *Hilbers v. Municipality of Anchorage*, 611 P.2d 31, 39 n.19 (Alaska 1980), is a recent example. In that case the parties stipulated that plaintiffs would raise only four identified constitutional challenges to ordinances regulating and licensing massage parlours in Anchorage. We rejected on appeal the plaintiff's attempt to raise constitutional challenges not sanctioned by the stipulation. Similarly, we have enforced a stipulation which precluded consideration of a due process challenge to the composition of a medical review committee,[17] and one which precluded consideration of the respective rights of the City and Borough of Anchorage regarding the installation of utility lines.[18]

14. At issue is whether the right of action authorized in AS 36.05.090(b) where a contract contains wage stipulations is also available where the contract in dispute does not contain wage stipulations. The United States Supreme Court held that federal Davis-Bacon does not provide workers a private cause of action to recover back wages where there has been an administrative determination of no Davis-Bacon coverage. *Universities Research Association, Inc. v. Coutu*, 450 U.S. 754, 101 S.Ct. 1451, 67 L.Ed.2d 662 (1981). We do not reach this issue.

15. *Fieser v. Stinnett*, 509 P.2d 1156, 1159 (Kan. 1973). *See generally* 83 C.J.S. Stipulations § 22 (1953).

16. Sitka relies on *Case v. Los Angeles Lumber Products Co.*, 308 U.S. 106, 114, 60 S.Ct. 1, 6, 84 L.Ed. 110, 119 (1939) to support its contention that a stipulation which prevents consideration of a legal issue is void. In *Case*, one party argued that in a stipulation his adversary had waived his right to attack the fairness of a plan. The Supreme Court ruled that even if under the terms of the stipulation the adversary had waived his right to attack the plan's fairness, the court still would permit the adversary to make the attack. The court declared that as a matter of law "a stipulation does not foreclose legal questions."

In *Utah v. United States*, 394 U.S. 89, 89 S.Ct. 761, 22 L.Ed.2d 99 (1969), however, the Supreme Court implicitly overruled *Case*. The court ruled that parties to a lawsuit may generally limit the issues which are tendered to the court for decision. Specifically, the court found valid a stipulation between Utah and the United States which precluded the parties from raising certain legal issues. *See also Perera Co. v. Goldstone*, 491 F.2d 386, 388 (9th Cir. 1974).

17. *Storrs v. Lutheran Hosp. and Homes Soc'y of America, Inc.*, 609 P.2d 24, 28 (Alaska 1980).

18. *Greater Anchorage Area Borough v. City of Anchorage*, 504 P.2d 1027, 1031 (Alaska 1972). The court noted that "[s]ound judicial policy

istrative regulati

We recently reiterated, on the other hand, that "[a]lthough the parties' efforts toward simplifying the issues in a case are always appreciated, stipulations as to the law are not binding upon the court." *Dresser Industries, Inc. v. Alaska Department of Labor*, 633 P.2d 998, 1004 (Alaska 1981). *See generally* 73 Am.Jur.2d. Stipulations § 5 (1974). Unlike stipulations which limit the issues presented to a court, stipulations as to questions of law may have a profound impact on third parties, the public, and the judicial process itself. Accordingly, we have refused to give effect to stipulations regarding a question of law which unduly interfere with vital interests of the public or which impermissibly impinge on judicial functions. *Dresser Industries, Inc. v. Alaska Department of Labor*, 633 P.2d at 1004 (Alaska 1981); *Harris v. Morris*, 531 P.2d 517, 519 (Alaska 1975); *Marks v. State*, 496 P.2d 66, 67 (Alaska 1972).[19]

We conclude that Sitka's agreement that the Unions' "remedy will be in the form of damages ... in accordance with Alaska law" necessarily encompassed a waiver of any legal issue which would defeat the award of damages. Sitka agreed not to raise procedural defenses and that damages would be the appropriate remedy were the Unions to prevail. The Unions, in return, agreed to dismiss the first cause of action, challenging the validity of the contract, and most importantly, to forego any attempt to obtain injunctive relief. Abandoning any entitlement to injunctive relief was a significant concession, since the cost attendant any delay in the construction of the project would undoubtedly have been substantial. The work now completed, it is of course impossible to "rescind" the stipulation and to return the parties to their respective status quo ante positions. It is particularly noteworthy that at the time the stipulation was negotiated, Sitka did not contend that the Unions could not maintain a private right of action to recover back wages. Only after the United States Supreme Court announced its decision in *Universities Research*, several months subsequent to the superior court's entry of summary judgment in favor of the Unions, did Sitka question the effect of the stipulation.

Sitka's attempt to classify the stipulation in dispute as one pertaining to a question of law is not persuasive. To be sure, the question of whether Little Davis-Bacon confers a private right of action to recover back wages is a question of general public importance. Yet resolution of the instant dispute by reference to the parties' stipulation does not in any manner taint the future consideration of that important issue. The impact on nonparties is inconsequential. Further, the stipulation between the parties does not impermissibly invade the prerogatives of this court.

We conclude that the stipulation precludes consideration of whether Little Davis-Bacon authorizes a private right of action to recover back wages. In accordance with the terms of the stipulation, therefore, the award of damages was appropriate.[20]

dictates that private settlements and sti lations between the parties are to be favored and should not be lightly set aside." *Id.* (footnote omitted.)

19. In *Harris* we refused to allow the parties to stipulate as to the content of jury instructions since "the trial judge has the direct responsibility of correctly instructing the jury." 531 P.2d at 519. Similarly, we declared in *Marks* that "[t]he public interest in criminal appeals does not permit their disposition by party stipulation." 496 P.2d at 67. And most recently, in *Dresser Industries* we rejected the parties' invitation to heed a stipulation which attempted to unduly restrict the judicial review of an administrative regulation.

In rejecting the stipulations at issue in *Dresser Industries* we noted the peculiar policy considerations implicated where stipulations impair a court's assessment of the validity of a regulation. "Laws are not to be declared invalid upon the consent of parties. We must determine their purpose and tendency for ourselves." 633 P.2d at 1005, *quoting, E. Fougera & Co. v. City of New York*, 224 N.Y. 269, 120 N.E. 642, 643 (1918).

20. The summary judgment order provides that the Unions will receive as damages the difference between what the employees would have received had the work been classified as public construction with the wage protections of Little Davis-Bacon and what the employees received pursuant to the contract. The order further

The judgment of the superior court is AFFIRMED.

STATE of Alaska, Appellant,

v.

ALASKA PUBLIC EMPLOYEES ASSOCIATION, Edward B. Coleman, Don Allen, Joe Anderson, Loy R. Bolt, Dwane Burgess, Frank Byerly, David Cooper, Harold Fencl, Fred C. Fowler, Tom Furbush, Steve Kosenic, Kurt Masingill, Homer Mayo, Ron Murry, Paul Tannenbaum, Jerry Velez, and Stan Wells, Appellees.

No. 5810.

Supreme Court of Alaska.

May 7, 1982.

Probation-parole officers and their employee association brought suit challenging firearms policy, promulgated by the Health and Social Services Commissioner, concerning the carrying of concealed firearms by probation-parole officers. The Superior Court, Third Judicial District, Anchorage, Ralph E. Moody, J., found the policy, which restricts the carrying of firearms to very limited circumstances, to be unworkable and, after reference of the dispute to a special master, propounded its own firearms policy and ordered the Commissioner to implement it. On the State's appeal, the Supreme Court, Matthews, J., held that the Commissioner, not the Superior Court, is charged with the responsibility for the day-to-day operation of the probation service, and the methods and equipment to be used by probation officers fall within the ambit of that responsibility; accordingly, the Superior Court may not, under the guise of an exercise of its authority to direct probation officers, propound a firearms policy, except in regard to firearms on court premises.

Reversed.

1. Courts ⇐55

Commissioner of the Department of Health and Social Services, not the superior court, is charged with the responsibility for the day-to-day operation of the probation service, and the methods and equipment to be used by probation officers fall within the ambit of that responsibility; accordingly, the superior court may not, under the guise of an exercise of its authority to direct probation officers, propound a firearms policy, except in regard to firearms on court premises. AS 33.05.010, 33.05.020, 33.05.030.

2. Courts ⇐55

Merely because probation officers are officers of the court and subject to its authority by virtue of statute does not mean that the court has administrative authority over them. AS 33.05.030.

3. Courts ⇐55

Superior court may direct individual probation officers to perform appropriate services, but it may not control the details by which those services are accomplished by establishing general policies. AS 33.05.010 et seq., 33.05.030.

provides that damages are to be paid directly to the workers who performed the reservoir clearing work. We note, though, that no evidence regarding the amount of damages exists in the record. The superior court ordered that the amount of damages will be determined through the submission of memoranda by the parties. We conclude that in the particular context of this case, such a procedure is adequate. The amount of damages can be readily and accurately ascertained since the Department of Labor determines the prevailing wage under 8 AAC 30.050 (Eff. 7/8/73), and both ALP and the Unions should have records which clearly indicate the wages previously received by the workers. If, however, the parties dispute the amount of damages, so that a genuine issue of material fact exists, the superior court must hold a hearing on this question.

NEGLIGENT MISREPRESENTATION — BREACH OF CONTRACT — INVESTMENT TAX CREDIT — DAMAGES

Orsini v. Bratten, Op. No. 3012, January 24, 1986

Investors sued investment consultant for negligent misrepresentation and breach of contract. The Superior Court, Van Hoomissen, J., entered judgment on behalf of investors. Rabinowitz, C.J., HELD:

(1) since consultant agreed to the amounts of lost investment tax credits, the court would not review the propriety of that award;

(2) the investors were not entitled to receive as damages interest repayed to federal or state governments since the investors had the use of such monies during the interim and were able to earn interest while they held it;

(3) given the record, the award for prospective tax liability could not be sustained; and

(4) the methods of calculating damages proposed by the investors were not appropriate since: (a) the investors were not entitled to be awarded what the consultant promised them since they did not bargain to receive a guaranteed return, but instead only bargained for investment advice, and (b) investors were not entitled to an amount representing the amount they would have received had they invested in real estate since that was too speculative a measure as a matter of law. AFFIRMED in part and MODIFIED.

PUBLIC CONTRACTS — BIDS — UNIT PRICES

Vintage Corporation, Inc. v. State, Op. No. 3013, January 31, 1986

Low bidder on a state project challenged award to bidder with lower unit prices. Van Hoomissen and Blair, JJ., granted summary judgment to the state. Matthews, J., HELD:

(1) the specifications applicable to the bids taken together clearly suggest that the total of the extensions of unit prices was to be used for informational and initial comparative purposes only — the critical terms are the written unit prices;

(2) in unit price contracts, the unit prices are written in words, while the total price is only written in figures — in bids for lump sum contracts, the total is required to be written in words as well as figures;

(3) the agency's interpretation that the specification addresses only discrepancies between prices in words and figures, rather than just unit price discrepancies, is reasonable and should control;

(4) a contracting officer, in determining whether a bidder obtained a competitive advantage because of such a discrepancy, must: (a) determine whether the bidder's claimed actual intent is apparent from the bid submitted; (b) if the contracting officer is unable to say from the documents that the bidder's intent was to bid the higher figure, no relief should be given and the unit prices bid should control; and (c) if the bidder's intent to bid at the higher figure is apparent, the officer must ask if it would be unconscionable to hold the bidder to his bid using the rule of construction that unit prices control — if not, no relief should be provided; and

(5) no competitive advantage was afforded here since: (a) the contracting officer could not say from reviewing the bid documents that the total bid figure, rather than the unit prices correctly added, was the bid apparently intended, and (b) thus, there was no occasion to consider the question of whether it would be unconscionable to hold the bidder to his bid despite his apparent intent. AFFIRMED. Compton, Burke, JJ., concurring, but arguing that resort to the specifications was inappropriate where there was no discrepancy in the bid — the error was, however, harmless.

LITTLE DAVIS-BACON ACT — ATTORNEY'S FEES — PUBLIC INTEREST LITIGANT

Alaska State Federation of Labor v. State, Op. No. 3014, January 31, 1986

Worker and labor federation sought declaratory and injunctive relief, alleging that Juneau construction project was subject to the Little Davis-Bacon Act. Superior Court, Carpeneti, J., granted summary judgment to the defendants. Burke, J., HELD:

(1) the project was not public construction subject to the act, even though expenditures of state monies occurred — the statute only applies to contracts with the state or a political subdivision;

(2) nor was the project primarily state funded — the state's funding by grant was indirect and relatively small;

(3) Civ. R. 82 gives the trial court broad discretion to award attorney's fees and such an award is reviewable only for an abuse of discretion — to constitute abuse, the discretion must be manifestly unreasonable or motivated by an inappropriate purpose;

(4) whether a party qualifies as a public interest litigant depends upon: (a) the effectuation of strong public policy; (b) the fact that numerous people would benefit from the litigation; (c) the fact that only a private party would have been expected to bring the action; and (d) the lack of economic incentives to bring the suit in the absence of important public issues;

(5) the trial court's award of attorney's fees was not an abuse of discretion since the federation was motivated primarily by private rather than public concerns; and

(6) there was no merit in the federation's argument that the work done by the defendants' attorneys was duplicative and excessive where no evidence of duplication was provided. AFFIRMED.

DIVORCE — PROPERTY DIVISION — EQUITABLE DIVORCE

Burcell v. Burcell, Op. No. 3015, January 31, 1986

Husband challenged property division by Superior Court, Souter, J., as clearly unjust and based on erroneous findings. Moore, J., HELD:

(1) the property division in a divorce proceeding is within the broad discretion of the trial court and will not be disturbed on appeal unless it is clearly unjust;

(2) AS 25.24.160(4) places all property acquired during a marriage, whether joint or separate, before the court for division — it also authorizes invasion of premarital holdings of either spouse when the balance of the equities requires;

(3) the trial court has broad discretion to invade premarital assets — some fact situations are sufficiently compelling that a refusal to invade is clearly unjust;

(4) on review, findings of fact are clearly erroneous if, based on the record as a whole, the court is left with a definite and firm conviction that a mistake has been made;

[2] Because the letters were not recorded, we agree with the Whites that they cannot revive any time-barred remedies based on the deed of trust, which is an "instrument affecting real estate" within the meaning of AS 09.10.200. The superior court reached the same conclusion in dictum in its opinion, and from our reading of the Walkers' briefs we believe they have conceded this point. Thus, we affirm the portion of the superior court's judgment enjoining the Walkers from seeking to enforce the deed of trust, and ordering them to request the trustee to reconvey the property at issue to the Whites.

[3] However, we have concluded that the portion of the judgment prohibiting the Walkers from acting to enforce their promissory note against the Whites personally must be reversed. Although this note was executed in connection with the sale of real estate, it is a personal note, and therefore is not subject to the recordation requirement of AS 09.10.200. Construing the letters most favorably to the Walkers,[4] we are of the opinion that excerpts from the letters of both William and Catherine White constitute, as a matter of law, acknowledgments of the debt within the intendment of AS 09.10.200.[5]

[4] The Whites contend that an acknowledgment under AS 09.10.200 must be "direct, unqualified and unconditioned." We cannot agree. The purpose of the statute of limitations is "to protect against the difficulties caused by lost evidence, faded memories and disappearing witnesses." *Byrne v. Ogle*, 488 P.2d 716, 718 (Alaska 1971). This purpose is not advanced by imposing rigorous requirements of formality on acknowledgments. Such requirements, in our opinion, would only heighten the statute's unfortunate effect of occasionally barring meritorious claims. *See* 1A A. Corbin, Corbin on Contracts § 223 (1963) (written promise or acknowledgment "may be sufficient even though it is informal and is in need of much explanatory evidence").

The judgment of the superior court is affirmed in part and reversed in part, and the case is remanded for further proceedings upon the Walkers' counterclaim based upon the subject promissory note.

BOOCHEVER, J., not participating.

Curwood GACKSTETTER and Betty Gackstetter, Appellants,

v.

STATE of Alaska, Appellee.

No. 4976.

Supreme Court of Alaska.

Oct. 24, 1980.

Owners appealed award of master in eminent domain proceeding. The Superior Court, Fourth Judicial District, Fairbanks, Warren W. Taylor, J., held that consideration of value to state of fill and gravel it received from the owners' land was an inappropriate measure of just compensation, and the owners appealed. The Supreme Court, Rabinowitz, C. J., held that the owners were justly compensated through employment of a fair market valuation measure for appropriated residential property,

4. In a motion for summary judgment, the trial court is required to draw all reasonable inferences in favor of the non-moving party and against the movant. *Alaska Rent-A-Car, Inc. v. Ford Motor Co.*, 526 P.2d 1136, 1139 (Alaska 1974).

5. William White wrote, "I would like to get things together and settle up with you in full. Or monthly or how ever." Catherine White's letter refers to "the debt owed herein," and calls her advice to the Walkers on how they might collect that debt "my last opportunity to try to help make it right." We observe that the note signed by the Whites made them jointly and severally liable to the Walkers, so that the Walkers need only show acknowledgment by either Mr. or Mrs. White, or both.

and consideration of value to state of fill and gravel it received from the owners' land was an inappropriate measure of just compensation.

Affirmed.

1. Eminent Domain ⇐131

"Fair market value" is defined as the amount of money which a purchaser willing but not obliged to buy property would pay to an owner willing but not obliged to sell it, taking into consideration all uses for which the land was suited and might in reason be applied.

See publication Words and Phrases for other judicial constructions and definitions.

2. Eminent Domain ⇐122

The just compensation to which an owner is entitled when his property is taken by eminent domain is regarded in law from the point of view from the owner and not of the condemnor; just compensation in the constitutional sense is what the owner has lost, and not what the condemnor has gained.

3. Eminent Domain ⇐131

Fair market value is usually equated with just compensation, in a taking by eminent domain, as it provides an objective standard by which to measure the loss to the owner; fair market value is not the end in itself, but merely a means to achieve the goal of just compensation.

4. Eminent Domain ⇐131

Consideration of value to the state of fill and gravel it received from land taken by eminent domain was an inappropriate measure of just compensation to the owners, who were justly compensated through employment of a fair market valuation measure for appropriated residential property.

Teresa L. Foster, Cole & Downes, Fairbanks, for appellants.

William R. Satterberg, Jr., Asst. Atty. Gen., Fairbanks, and Avrum M. Gross, Atty. Gen., Juneau, for appellee.

Before RABINOWITZ, C. J., CONNOR, BURKE and MATTHEWS, JJ., and ROWLAND, Superior Court Judge.

OPINION

RABINOWITZ, Chief Justice.

This appeal arises from an eminent domain proceeding. In 1976, the State of Alaska, in connection with the construction of the New Steese Expressway, condemned 3.464 acres of Curwood and Betty Gackstetter's property. Dirt and gravel, useful as fill for the cuts and depressions created by the highway construction, were removed by the state and deposited elsewhere along the project.[1]

[1] The case was referred to a master for determination of just compensation to be paid to the Gackstetters. The master awarded the Gackstetters $24,740.00, based on a conclusion that the highest and best use of the property was residential. It is undisputed that applicable Fairbanks North Star Borough zoning ordinances and restrictions prohibited development of the subject property as a gravel pit. The award was reached by determining the fair market value of the Gackstetters' property before and after the taking.[2]

The Gackstetters appealed to the superior court. The state then moved for partial summary judgment, seeking a ruling that

1. The Gackstetters' property was bounded by Engineer Creek Basin to the north and the bowl occupied by Fairbanks to the south. Materials utilized from the Gackstetters' land were deposited elsewhere on the project to fill the depression existing in the adjacent valley. The Gackstetters maintain they should be compensated for the value of the material taken from their land.

2. Fair market value is defined as the amount of money "which a purchaser willing but not obliged to buy the property would pay to an owner willing but not obliged to sell it, taking into consideration all uses for which the land was suited and might in reason be applied" 4 J. Sackman, Nichols on Eminent Domain § 12.-2[1] (rev. 3d ed. 1979) (footnotes omitted).

evidence of the value of the fill material would be inadmissible at trial. The superior court granted the motion, ordering that:

> Any evidence of special value or benefit to the property by virtue of the condemnation or due to the condemnor's needs or uses shall be inadmissible.

The Gackstetters have appealed this ruling of the superior court.[3]

On appeal, the Gackstetters do not contest the master's finding as to highest or best use of the property, nor do they dispute the compensation award as it was determined by the fair market value method. They admit that evidence of the value of the fill material was properly excluded from the determination of fair market value, since the value of the fill was created solely by the taker's demand for it. *United States v. Cors*, 337 U.S. 325, 332, 69 S.Ct. 1086, 1090, 93 L.Ed. 1392, 1399 (1949); *United States v. Miller*, 317 U.S. 369, 375, 63 S.Ct. 276, 280, 87 L.Ed. 336, 343 (1943). Instead, the Gackstetters proceed on the theory that fair market value is not constitutionally mandated, is inapplicable on the instant facts, and did not accord them just compensation. In their view, a form of unjust enrichment resulted from the state's non–compensable use of the fill material, and because of this, the measure of just compensation should be the value of the land to the condemnor. In addition, the Gackstetters contend there were material issues of fact in dispute which rendered summary judgment inappropriate.[4]

[2] We cannot agree that employment of the fair market value test in the case at bar precluded the Gackstetters from receiving just compensation. It is a basic tenet of eminent domain law that just compensation is determined by what the owner has lost and not by what the condemnor has gained. In *Nichols* it is stated that:

> The just compensation to which an owner is entitled when his property is taken by eminent domain is regarded in law from the point of view of the owner and not of the condemnor. In other words, just compensation in the constitutional sense is what the owner has lost, and not what the condemnor has gained.[5]

The United States Supreme Court defined just compensation in the following manner:

> The just compensation required by the Constitution to be made to the owner is to be measured by the loss caused to him by the appropriation. He is entitled to receive the value of what he has been deprived of, and no more. To award him less would be unjust to him; to award him more would be unjust to the public.

Bauman v. Ross 167 U.S. 548, 574, 17 S.Ct. 966, 976, 42 L.Ed. 270, 283 (1897); *see also Kimball Laundry Co. v. United States*, 338 U.S. 1, 5, 69 S.Ct. 1434, 1437, 93 L.Ed. 1765, 1772 (1949). This court has followed the same principle in measuring just compensation:

> The term just compensation implies full indemnification to the owner for the property taken. In other words the property owner should be placed as fully as possible in the same position as he was prior to the taking of his property.

Ketchikan Cold Storage Co. v. State, 491 P.2d 143, 150 (Alaska 1971).

3. The order of partial summary judgment was entered on August 13, 1979. The final judgment was entered in this case on September 25, 1979, pursuant to a stipulation for entry of final judgment, signed by the parties on August 13, 1979. That stipulation provided that the Gackstetters retained the right to appeal the superior court's order of partial summary judgment, and that the final judgment would be regarded as the operative document for appeal time computations.

4. The Gackstetters raised the following issues:

1. Whether the highway project in question was designed to take advantage of fill material on Defendant's property.

2. Whether from a purely engineering standpoint, and taking into account the goals of the highway project, it was necessary for the route to cross Defendant's property.

3. The amount of fill removed and used in the project, and the dollar value of such fill.

5. 3 J. Sackman, Nichols on Eminent Domain § 8.61 (rev. 3d ed. 1979) (footnotes omitted). *See also id.* at § 12.21; Uniform Eminent Domain Code, committee comment to § 1004, reprinted in *id.*, App. D-3 at App. 344.133.

[3] Fair market value is usually equated with just compensation, as it provides an objective standard by which to measure the loss to the owner.[6] Nevertheless, as the Gackstetters point out, fair market value is not the end in itself, but merely a means to achieve the goal of just compensation. 4 J. Sackman, Nichols on Eminent Domain § 12.2 (rev. 3d ed. 1979); *see also Babinec v. State*, 512 P.2d 563, 570 (Alaska 1973) *appeal after remand*, 586 P.2d 966 (Alaska 1978).[7] However, none of the authorities cited by the Gackstetters support their contention that value–to–the–taker is an appropriate measure of just compensation in the factual context of this case. In particular, the Gackstetters' reliance on *State v. Hammer*, 550 P.2d 820 (Alaska 1976), is misplaced. In *Hammer* we held that a temporary loss of profits during relocation, necessitated by condemnation, was compensable. In criticizing the argument that no recovery should be had for the destruction of a business incidental to condemnation, we stated:

> This approach has several serious flaws. First, it conflicts with our principle of compensation, which, instead of looking at the benefit to the condemnor as a measure of compensation, looks to the loss to the owner, as measured by an objective standard.[8]

[4] In the case at bar, the state appropriated residential property from the Gackstetters for which the Gackstetters were justly compensated through employment of a fair market valuation measure. We thus conclude that the superior court did not err in its determination that consideration of value to the state of the fill and gravel it received from the Gackstetters' land was an inappropriate measure of just compensation.[9]

AFFIRMED.

BOOCHEVER, J., not participating.

Jim BOOKEY, d/b/a Bookeys, Appellant,

v.

KENAI PENINSULA BOROUGH, Appellee.

No. 4878.

Supreme Court of Alaska.

Oct. 24, 1980.

In an action in which municipality sought to impose a civil penalty for failure to remit sales taxes, appeal was taken from a judgment of the District Court, James C. Hornaday, J. The Superior Court, Third Judicial District, James A. Hanson, J., entered a judgment permitting the imposition of civil penalties, and appeal was taken. The Supreme Court, Matthews, J., held that municipality had power to impose a civil penalty for failure to remit sales tax.

Affirmed.

6. *Ketchikan Cold Storage Co. v. State*, 491 P.2d 143, 150 (Alaska 1971).

7. In 4 J. Sackman, Nichols on Eminent Domain § 12.1[5] (rev. 3d ed. 1979) (footnotes omitted), it is stated that:

> The basic concepts of value which have been developed with relation to property acquired by means of eminent domain fall generally into three categories:
> (a) Value to taker,
> (b) Value to owner,
> (c) Market value.
> Value to the taker, while ordinarily rejected as a standard, is occasionally considered as an element in the determination of value where, as a factual proposition, the present adaptability of the property for the projected use is a determinative factor in creating a demand for such property by purchasers in the ordinary market. In other words, where special availability of the property for public use is an element in the establishment of general market value it may be considered.

8. *State v. Hammer*, 550 P.2d 820, 824 (Alaska 1976).

9. Our holding makes it unnecessary to address the Gackstetters' contention that the existence of genuine issues of material fact precluded the entry of partial summary judgment.

1. Department of Transportation and Public Facilities (§ 19.05.040)

Article 1. Department of Transportation and Public Facilities.

Section
40. Powers of department

Sec. 19.05.040. Powers of department. The department may

(1) acquire property:

(2) exercise the power of eminent domain;

(3) take immediate possession of real property, or any interest in it under a declaration of taking or by other lawful means;

(4) acquire rights-of-way for present or future use;

(5) control access to highways;

(6) regulate roadside development;

(7) preserve and maintain the scenic beauty along state highways;

(8) dispose of property acquired for highway purposes;

(9) accept and dispose of federal funds or property available for highway construction, maintenance, or equipment;

(10) enter into contracts or agreements relating to highways with the federal government, municipalities, a political subdivision, or with a foreign government, if the contract is approved by the federal government;

(11) establish, levy, and collect tolls, fees, charges, and rentals for the use of state roads, highways, bridges, crossings, and causeways; and

(12) exercise any other power necessary to carry out the purpose of AS 19.05 — 19.25. (§ 2 art III title I ch 152 SLA 1957; am § 3 ch 35 SLA 1971; am § 2 ch 162 SLA 1984)

Effect of amendments. — The 1984 amendment deleted "and" at the end of paragraph (10), inserted present paragraph (11), and redesignated former paragraph (11) as present paragraph (12).

Chapter 10. State Highway System.

1. Designation, Marking and Use (§ 19.10.060)
3. Construction (§ 19.10.170)

Article 1. Designation, Marking and Use.

Section
60. Regulation of weight and load of vehicles and use of highways during certain seasons

Sec. 19.10.010. Dedication of land for public highways.

NOTES TO DECISIONS

A utility may construct a powerline on an unused section line easement reserved for highway purposes under this section. Fisher v. Golden Valley Elec. Ass'n, Sup. Ct. Op. No. 2606 (File No. 5902), 658 P.2d 127 (1983).

AS 19.25.010 places Alaska among those states which permit powerline construction by a utility as an incidental and subordinate use of a highway easement. Fisher v. Golden Valley Elec. Ass'n, Sup. Ct. Op. No. 2606 (File No. 5902), 658 P.2d 127 (1983).

Sec. 19.10.060. Regulation of weight and load of vehicles and use of highways during certain seasons.

The department, with respect to highways under its jurisdiction, may

(1) establish limitations on weight, size, and load of vehicles;

(2) *[Repealed, § 25 ch 144 SLA 1977.]*

(3) prohibit the operation or impose restrictions on vehicular use of highways during certain seasons of the year. (§ 5 art III title II ch 152 SLA 1957; am § 1 ch 55 SLA 1963; am § 25 ch 144 SLA 1977; am § 2 ch 77 SLA 1982)

Cross references. For the duties of the Department of Commerce and Economic Development to operate weighing stations and enforce weight and load limitations based upon directions of the Department of Transportation and Public Facilities, see AS 44.33.020(25).

Effect of amendments. — The 1982 amendment inserted "size" in paragraph (1).

Article 3. Construction.

Section
170. Construction by department

Sec. 19.10.170. Construction by department.

(a) Except as provided in AS 36.98 and AS 44.33.300, it shall be the general policy of the department to require the construction of all highways under bid contract. However, subject to the provisions of (b) of this section, when the estimated cost of a construction project is less than $100,000 or when it appears to be in the best interests of the state, the department may perform the work notwithstanding any other provisions of law.

(b) Construction or professional services in connection with the construction of highways performed by the department under (a) of this section which have an estimated cost exceeding $5,000 may not be performed by the department unless the commissioner determines, in writing, that the cost to the state will be less than that incurred as a result of a formally advertised or negotiated contract. The determination of the commissioner shall be supported by findings of fact which shall set out enough facts and circumstances to clearly justify the determination. The determinations and findings shall be maintained as a permanent record of the department.

(c) In this section, "professional services" means architectural, engineering, or land surveying services. (§ 1 art III title IV ch 152 SLA 1957; am § 2 ch 277 SLA 1976; am §§ 1, 2 ch 104 SLA 1978; am § 1 ch 144 SLA 1982)

Effect of amendments. — The 1982 amendment inserted "AS 36.98 and" in the first sentence of subsection (a).

Chapter 20. Cooperation by and with the State.

Section
15. Local control of state transportation corridors

Sec. 19.20.015. Local control of state transportation corridors.

(a) A municipality, by resolution of its governing body, may request of the department the assumption of the department's responsibilities relating to planning of transportation corridors which are to be located within the boundaries or operating area of the municipality. After receipt of the request, the department shall provide by agreement for assumption by the municipality of the department's responsibilities relating to planning of transportation corridors, unless the commissioner determines that assumption of

is vacated, title to the strip inures to the owner of the tract of which it formed a part by the original survey. (§ 1 ch 123 SLA 1951; am § 1 ch 35 SLA 1953)

Opinions of attorney general. — For opinion discussing section line dedications for construction of highways, see 1969 Op. Att'y Gen., No. 7.

NOTES TO DECISIONS

Acceptance of federal grant. — The enactment of ch. 35, SLA 1953, was a positive act clearly manifesting the territorial legislature's intent to accept the federal grant under 43 U.S.C. § 932 of right of way for the construction of highways over public lands, not reserved for public uses. Girves v. Kenai Peninsula Borough, Sup. Ct. Op. No. 1168 (File No. 2016), 536 P.2d 1221 (1975).

Scope of use of easement. — Although the state expressly reserved a section line easement of 100 feet for use as a public highway when it sold two parcels of land, a development corporation planning to construct a public road along the easement could clear only the amount of trees reasonably necessary to construct the roadway. Anderson v. Edwards, Sup. Ct. Op. No. 2274 (File No. 4586), 625 P.2d 282 (1981).

Applied in Wessells v. State, Dep't of Hwys., Sup. Ct. Op. No. 1402 (File No. 2834), 562 P.2d 1042 (1977).

Collateral references. — 39 Am. Jur. 2d, Highways, Streets and Bridges, §§ 22-24.

39A C.J.S., Highways, § 1.

Right of municipality or public to use of subsurface of street or highway for purposes other than sewers, pipes, conduits for wires and the like. 11 ALR2d 180.

Description with reference to highway as carrying title to center or side of highway. 49 ALR2d 982.

Sec. 19.10.015. Establishment of highway widths. (a) It is declared that all officially proposed and existing highways on public lands not reserved for public uses are 100 feet wide. This section does not apply to highways which are specifically designated to be wider than 100 feet.

(b) Notwithstanding (a) of this section, a municipality may designate the width of a road which is not a part of the state highway system if the municipality maintains the road. (§ 1 ch 35 SLA 1963; am § 1 ch 158 SLA 1980)

Effect of amendments. — The 1980 amendment added subsection (b).

Collateral references. — Width and boundaries of public highway acquired by prescription or adverse user. 76 ALR2d 535.

NOTES TO DECISIONS

Applied in State v. I'Anson, Sup. Ct. Op. No. 1102 (File No. 2032), 529 P.2d 188 (1974).

Sec. 19.10.020. Designation of state highway system. The department may designate, locate, create, and determine what highways constitute the state highway system. In designating, locating, creating and determining the several routes of the state highway system, the department shall strive to attain the purposes and objectives set out in AS 19.05.125. (§ 1 art III title II ch 152 SLA 1957)

Sec. 19.10.030. Responsibility for system. The department is responsible for the construction and maintenance of the state highway system. (§ 2 art III title II ch 152 SLA 1957)

Sec. 19.10.040. Uniform system of marking and posting. The department shall classify, designate and mark highways under its jurisdiction and shall provide a uniform system of marking and posting these highways. The system of marking and posting shall correlate with and shall, as far as possible, conform to the recommendations of the Manual on Traffic Control Devices as adopted by the American Association of State Highway Officials. (§ 3 art III title II ch 152 SLA 1957)

Sec. 19.10.050. Traffic control signals. The department shall prescribe types of traffic control signals to regulate traffic on highways. These signals shall correlate with and, as far as possible, conform to the recommendations of the Manual on Uniform Traffic Control Devices as adopted by the American Association of State Highway Officials. The department shall prescribe uniform rules for the placing and installation of traffic control signals. (§ 4 art III title II ch 152 SLA 1957)

NOTES TO DECISIONS

Quoted in State v. I'Anson, Sup. Ct. Op. No. 1102 (File No. 2032), 529 P.2d 188 (1974).

Sec. 19.10.052. Local control of traffic control device systems.

Transferred to AS 19.20.017.

Revisor's notes. — This section was renumbered by the revisor of statutes pursuant to AS 01.05.031.

To impose liability on the state for its negligent failure to maintain Alaska highways through the winter would not place an "impossible burden" on the state. State v. Abbott, Sup. Ct. Op. No. 804 (File Nos. 1463, 1467), 498 P.2d 712 (1972).

Sec. 19.05.040. Powers of department. The department may

(1) acquire property;

(2) exercise the power of eminent domain;

(3) take immediate possession of real property, or any interest in it under a declaration of taking or by other lawful means;

(4) acquire rights-of-way for present or future use;

(5) control access to highways;

(6) regulate roadside development;

(7) preserve and maintain the scenic beauty along state highways;

(8) dispose of property acquired for highway purposes;

(9) accept and dispose of federal funds or property available for highway construction, maintenance, or equipment;

(10) enter into contracts or agreements relating to highways with the federal government, municipalities, a political subdivision, or with a foreign government, if the contract is approved by the federal government; and

(11) exercise any other power necessary to carry out the purpose of chs. 5 — 25 of this title. (§ 2 art III title I ch 152 SLA 1957; am § 3 ch 35 SLA 1971)

Legislative history reports. — For report on ch. 35, SLA 1971 (HB 387), see 1971 House Journal, p. 776.

NOTES TO DECISIONS

Department may acquire real property for highway through eminent domain. — The Department of Highways [now Department of Transportation and Public Facilities] may acquire real property for the purpose of constructing a highway through the exercise of eminent domain power, under the authority of this section, AS 19.05.080 — 19.05.120 and AS 19.20.040. Babinec v. State, Sup. Ct. Op. No. 908 (File No. 1539), 512 P.2d 563 (1973), rev'd on other grounds, 586 P.2d 966 (1978).

Sec. 19.05.045. Relocation payments.

Repealed by § 2 ch 60 SLA 1969.

Editor's notes. — The repealed section derived from § 1, ch. 93, SLA 1968.

Sec. 19.05.050. Roads in tourist and trailer camps. The department may adopt regulations governing the use of roads in tourist, trailer and other camps when public and private roads in or through the camps are used by, or are open to, the general public. (§ 1 ch 59 SLA 1955)

Sec. 19.05.060. Sale of obsolete equipment and material. The department may sell, exchange or otherwise dispose of obsolete machinery, equipment and material no longer needed, required or useful for construction or maintenance purposes. Money derived from the sale of the property shall be credited to the funds from which the purchase was originally made. (§ 3 art IV title IV ch 152 SLA 1957)

Sec. 19.05.070. Vacating and disposing of land and rights in land. (a) The department may vacate land, or part of it, or rights in land acquired for highway purposes, by executing and filing a deed in the appropriate recording district. Upon filing, title to the vacated land or interest in land inures to the owners of the adjacent real property in the manner and proportion considered equitable by the commissioner and set out by him in the deed.

(b) If the department determines that land or rights in land acquired by the department are no longer necessary for highway purposes the department may:

(1) transfer the land or rights in land to the Department of Natural Resources for disposal, or

(2) sell, contract to sell, lease, or exchange land or rights in land according to terms, standards and conditions established by the commissioner.

(c) Proceeds received from disposal of land or rights in land as authorized by this section shall be credited to the funds from which the purchase of the land was made originally. (§ 4 art IV title IV ch 152 SLA 1957; am § 4 ch 35 SLA 1971)

Article 2. Acquisition of Property

Section
80. Acquisition of land, rights-of-way, and materials by purchase or eminent domain
90. Declaration of taking
100. Acquisition of excess lands
110. Authority to condemn or acquire publicly owned property for the purpose of exchange
120. Authority to purchase property for the purpose of exchange
122. Utility corridor for extension of the Alaska Railroad

Sec. 19.05.080. Acquisition of land, rights-of-way, and materials by purchase or eminent domain. The department on behalf of the state and as part of the cost of constructing or maintaining a highway may purchase, acquire, take over, or condemn under the right and power of eminent domain land in fee simple or easements which it considers necessary for present public use, either temporary or permanent, or which it considers necessary and reasonable for the public use. By the same means, the department may obtain material, including clay, gravel, sand, or rock, or the land necessary to obtain material, including access to it. The department may acquire the land or materials notwithstanding the fact that title to it is vested in the

state or a department, agency, commission or institution of the state. (§ 1 art I title IV ch 152 SLA 1957)

Cross references. — For general provisions concerning eminent domain, see AS 09.55.240 — 09.55.460. For power of department of transportation and public facilities to exercise power of eminent domain, see AS 44.42.020(b).

NOTES TO DECISIONS

Department may acquire real property for highway through eminent domain. — The Department of Highways [now Department of Transportation and Public Facilities] may acquire real property for the purpose of constructing a highway through the exercise of eminent domain power, under the authority of AS 19.05.040, this section through AS 19.05.120, and AS 19.20.040. Babinec v. State, Sup. Ct. Op. No. 908 (File No. 1539), 512 P.2d 563 (1973), rev'd on other grounds, 586 P.2d 966 (1978).

Construction of state lease reserving right to grant right-of-way. — Provision in a lease issued by the State of Alaska, division of lands, expressly reserving the right to grant an easement or right-of-way across the leased property was construed to include an interagency transfer of a right-of-way to the Department of Highways. Wessells v. State, Dep't of Hwys., Sup. Ct. Op. No. 1402 (File No. 2834), 562 P.2d 1042 (1977).

Collateral references. — 27 Am. Jur. 2d, Eminent Domain §§ 325-332. 39 Am. Jur. 2d, Highways, Streets and Bridges, §§ 32-40.

39 C.J.S., Highways, §§ 1, 2, 25, 39, 53, 67.

Constitutionality of statutory provisions as to political corporations or divisions which shall bear cost of establishing or maintaining highway. 2 ALR 746; 123 ALR 1462.

Classification as regards counties or other political subdivisions permissible in statute imposing cost of construction or maintenance of highways upon property specially benefited. 77 ALR 1285.

Jurisdiction and power in respect of street or road which is part of or touching upon state or federal highway. 144 ALR 307.

Construction of streets and roads constituting part of state highway. 144 ALR 312.

Electric light or power line in street or highway as additional servitude. 58 ALR2d 525.

Inclusion or exclusion of first and last days in computing time for giving notice of hearing for location of public highway, which notice must be given a certain number of days before a known future date. 98 ALR2d 1397.

Extent and reasonableness of use of private way in exercise of easement granted in general terms. 3 ALR3d 1256.

Sec. 19.05.090. Declaration of taking. A declaration of taking in the form of an order signed by the commissioner, or by a designee of the commissioner within the department, declaring that the real property, or interest in it, or an easement, is necessary for the public use of the state vests title in the state. However, a declaration of taking is not effective until eminent domain proceedings have been instituted in the proper court, and a copy of the declaration of taking has been filed in the office of the recorder in the district where the land is located. The department shall pay from the appropriate fund into court the amount it considers represents a reasonable valuation for the lands, easement or materials taken. (§ 1 art I title IV ch 152 SLA 1957; am § 1 ch 88 SLA 1967)

Cross references. — For general provisions concerning eminent domain, see AS 09.55.240 — 09.55.460. For power of department of transportation and public facilities to exercise power of eminent domain, including declaration of taking, see AS 44.42.020(b).

NOTES TO DECISIONS

Access. — Although the language granting access was erroneously included in the declaration of taking of property for a controlled access facility, a party who purchased the remainder of the adjoining parcel for his insurance business acted reasonably in believing that he would have direct access and was entitled to compensation because he did not receive direct access. State v. 18,018 square feet, more or less, Sup. Ct. Op. No. 2232 (File No. 4637), 621 P.2d 887 (1980).

Sec. 19.05.100. Acquisition of excess lands. When a part of a parcel of land is taken and the remainder is in such shape or condition as to be of little value to its owner, or give rise to claims or litigation concerning severance or other damage, the department may acquire the whole parcel and may sell the remainder or exchange it for other property needed for state highway rights-of-way. (§ 2(1) art I title IV ch 152 SLA 1957; added by § 3 ch 122 SLA 1960)

Sec. 19.05.110. Authority to condemn or acquire publicly owned property for the purpose of exchange. When property, which is devoted to or held for another public use for which the power of eminent domain may be exercised, is taken for highway purposes, the department may, with the consent of the person or agency in charge of the other public use, condemn the real property to be exchanged for the real property so taken. This section does not limit the authorization of the department to acquire, other than by condemnation, property for that purpose in any other manner. (§ 2(2) art I title IV ch 152 SLA 1957; added by § 3 ch 122 SLA 1960)

Sec. 19.05.120. Authority to purchase property for the purpose of exchange. When the commissioner formally declares that it is in the best public interest of the state to do so, the department may acquire by purchase or otherwise privately or publicly owned land or an interest in it for the purpose of exchanging it for privately or publicly owned land which the department is authorized by law to acquire. (§ 2(3) art I title IV ch 152 SLA 1957; added by § 3 ch 122 SLA 1960)

Sec. 19.05.122. Utility corridor for extension of the Alaska Railroad. (a) Not later than April 1, 1982, the interior division of the department shall delineate a proposed utility corridor for the extension of the Alaska Railroad to the Canadian border. The proposed utility corridor shall include a complete legal description of the proposed railroad right-of-way.

(b) Within 90 days after receiving a report transmitting the work of the interior division of the department under (a) of this section, the

Cross references. — For appointment of masters, see Civ. R. 53; for hearing before master, see Civ. R. 72(h)(2).

NOTES TO DECISIONS

Judicial review inappropriate to proceedings under declaration of taking. — The concept of judicial review embodied in Alaska's general eminent domain statutes is inconsistent with, and inappropriate to, proceedings under a declaration of taking. Arco Pipeline Co. v. 3.60 Acres, More or Less, Sup. Ct. Op. No. 1177 (File No. 2419), 539 P.2d 64 (1975).

The question of necessity under a declaration of taking is not one for initial judicial consideration as in the case of other condemnation proceedings. Arco Pipeline Co. v. 3.60 Acres, More or Less, Sup. Ct. Op. No. 1177 (File No. 2419), 539 P.2d 64 (1975).

For distinction between proceedings in condemnation under a declaration of taking and those under a complaint seeking condemnation and an order for possession, see Arco Pipeline Co. v. 3.60 Acres, More or Less, Sup. Ct. Op. No. 1177 (File No. 2419), 539 P.2d 64 (1975).

Determination of whether parcel is within original scope of public project. — A determination in a particular case of whether a parcel is within the original scope of a public project subsequently enlarged to require the taking of the tract is a question for the trier of fact. State v. Alaska Continental Dev. Corp., Sup. Ct. Op. No. 2254 (File Nos. 4121, 4122), 630 P.2d 977 (1980).

No finding necessary to issuance of order appointing master. — No "finding" seems to be necessary to the issuance of the order appointing commissioners (now master) to appraise damages. Alaska Gold Recovery Co. v. Northern Mining & Trading Co., 7 Alaska 655 (1927).

And such order is not appealable. — The order appointing commissioners (now master) cannot be regarded as appealable. Alaska Gold Recovery Co. v. Northern Mining & Trading Co., 7 Alaska 655 (1927).

Except for abuse of discretion. — An order appointing commissioners (now master) can only be reviewed for an abuse of discretion, if at all. Alaska Gold Recovery Co. v. Northern Mining & Trading Co., 7 Alaska 655 (1927).

"Owner" includes purchaser under contract. — An instruction "that the term 'owner' to whom compensation must be paid, may include a purchaser under contract who has an interest in the land sought to be taken or damaged," is entirely proper. State v. Bradshaw Land & Livestock Co., 43 P.2d 674 (Mont. 1935), construing the Montana statute.

Cited in State, Dep't of Transp. & Pub. Facilities v. 0.644 Acres, Sup. Ct. Op. No. 2118 (File No. 4861), 613 P.2d 829 (1980).

Collateral references. — Propriety of court's consideration of ecological effects of proposed project in determining right of condemnation, 47 ALR3d 1267.

Sec. 09.55.310. Hearing. (a) The jury or master shall hear the allegations and evidence of persons interested and shall ascertain and assess the following:

(1) the value of the property sought to be condemned, and all improvements on it pertaining to the realty, and of each separate estate or interest in it; if it consists of different parcels, the value of each parcel and each estate or interest in each parcel shall be separately assessed;

(2) if the property sought to be condemned constitutes only a part of a larger parcel, the damages which will accrue to the portion not sought

to be condemned by reason of its severance from the portion sought to be condemned, and the construction of the improvements in the manner proposed by the plaintiff;

(3) separately, how much the portion not sought to be condemned and each estate or interest in it will be benefited, if at all, by the construction of the improvements proposed by the plaintiff; and, if the benefit is equal to the damages assessed under (2) of this section, the owner of the parcel shall be allowed no damages except the value of the portion taken; but if the benefits are less than the damages so assessed, the former shall be deducted from the latter and the remainder shall be the only damages allowed in addition to the value;

(4) if the property sought to be condemned is for a railroad, the cost of good and sufficient fences along the line of the railroad, and the cost of cattle guards where fences may cross the line of the railroad.

(b) As far as practicable, compensation shall be assessed for each source of damages separately. (§ 13.08 ch 101 SLA 1962; am § 2 ch 138 SLA 1968)

NOTES TO DECISIONS

I. General Consideration.
II. Just Compensation.
A. Generally.
B. Damages to Remainder.
C. Benefits to Remainder.
III. Role of Witnesses.

I. GENERAL CONSIDERATION.

Editor's notes. — All notes from Montana decisions appearing under this section are constructions of the Montana statute from which the section derives.

Measure of damages. — The measure of damages in a proceeding for the condemnation of land for public highway is the fair market value of the land sought to be condemned with the depreciation of such value of the land from which the strip is to be taken, less allowable deductions for benefits proven which values are to be determined as of the date of the commencement of the proceeding. Lewis & Clark County v. Nett, 263 P. 418 (Mont. 1928).

Independent parcels. — When parts of the same establishment are separated by intervening private lands, they are generally considered as independent parcels. State v. Bradshaw Land & Livestock Co., 43 P.2d 674 (Mont. 1935).

Duty of master. — It is the commissioners (master's) duty to examine the lands sought to be condemned, hear the allegations and evidence of all parties interested, and ascertain and assess the damages done to the persons whose lands are sought to be appropriated. Spratt v. Helena Power Transmission Co., 94 P. 631 (Mont. 1908).

Applied in State v. Hammer, Sup. Ct. Op. No. 1268 (File Nos. 2500, 2660), 550 P.2d 820 (1976).

Cited in Scavenius v. City of Anchorage, Sup. Ct. Op. No. 1182 (File No. 2193), 539 P.2d 1161 (1975).

II. JUST COMPENSATION.

A. Generally.

Valuation of property. — See notes under AS 09.55.330, analysis line II, "Just Compensation."

Fair market value is an appropriate measure of the just compensation guaranteed by Alaska Const., art. I, § 18. Dash

v. State, Sup. Ct. Op. No. 756 (File No. 1405), 491 P.2d 1069 (1971).

One criterion for determining value is what the property is worth on the market—its fair market value, and this is to be determined by a just consideration of all the uses for which a property is suitable. Dash v. State, Sup. Ct. Op. No. 756 (File No. 1405), 491 P.2d 1069 (1971).

The essential difference between market price and market value lies in the premises of intelligence, knowledge and willingness, all of which are contemplated in market value but not in market price. Stated differently, at any given moment of time, market value connotes what a property is actually worth and market price what it may be sold for. Dash v. State, Sup. Ct. Op. No. 756 (File No. 1405), 491 P.2d 1069 (1971).

"Best use" evidence. — See Dash v. State, Sup. Ct. Op. No. 756 (File No. 1405), 491 P.2d 1069 (1971).

In determining just compensation, usually measured by the "market value" of the property, the highest and most profitable use for which the land is adaptable may be considered to the extent that the prospective demand for such use affects the property's present market value. Dash v. State, Sup. Ct. Op. No. 756 (File No. 1405), 491 P.2d 1069 (1971).

A truly speculative or imagined use should not be considered. Dash v. State, Sup. Ct. Op. No. 756 (File No. 1405), 491 P.2d 1069 (1971).

Evidence of use as subdivision. — Many courts, including Alaska's, have allowed evidence of a reasonably probable subdivision to be admitted to prove the adaptability of the land for subdivision use. Dash v. State, Sup. Ct. No. 756 (File No. 1405), 491 P.2d 1069 (1971).

The majority of courts allow evidence of a potential subdivision only for the limited purpose of showing the adaptability of the land for subdivision purposes. Dash v. State, Sup. Ct. Op. No. 756 (File No. 1405), 491 P.2d 1069 (1971).

The courts are much more liberal in admitting evidence of a potential subdivision when some preliminary steps have been taken to develop the land. Dash v. State, Sup. Ct. Op. No. 756 (File No. 1405), 491 P.2d 1069 (1971).

Where there is testimony that the highest and best use of the property is as an industrial subdivision, and evidence that other property in the immediate area was subdivided for industrial purposes, the proposed subdivision is not purely conjectural or speculative. Dash v. State, Sup. Ct. Op. No. 756 (File No. 1405), 491 P.2d 1069 (1971).

If the land were adaptable for subdivision purposes, it would seem that the potential income to be derived from sales of the subdivided lots would be highly relevant to a determination of the "market value," especially to the extent that sophisticated investors who make decisions on the basis of income capitalization take part in market transactions. Dash v. State, Sup. Ct. Op. No. 756 (File No. 1405), 491 P.2d 1069 (1971).

Capitalization of income, in contexts other than proposed subdivisions, has been recognized as an accepted method of valuation by a number of jurisdictions. Although capitalization of anticipated proceeds from a proposed subdivision necessarily has a speculative element, it still has a direct impact on the property's market value since it will influence investment decisions and thereby affect supply and demand. Dash v. State, Sup. Ct. Op. No. 756 (File No. 1405), 491 P.2d 1069 (1971).

To the extent that the "just compensation" guarantee in Alaska Const., art. I, § 18, comprises a notion of fair market value rather than merely the price the property will bring in an imperfect market, income capitalization must be considered particularly apposite. Dash v. State, Sup. Ct. Op. No. 756 (File No. 1405), 491 P.2d 1069 (1971).

Even in a market place where a parcel's price is unaffected by its income potential, income capitalization must be considered to have a bearing on "market value." The danger that market price will not closely reflect market value is enhanced when the property is not currently generating income. Dash v. State, Sup. Ct. Op. No. 756 (File No. 1405), 491 P.2d 1069 (1971).

An expert's testimony which capitalized the anticipated rentals from a proposed recreational subdivision to arrive at an estimate of fair market value was properly admitted. Dash v. State, Sup. Ct. Op. No. 756 (File No. 1405), 491 P.2d 1069 (1971).

As to admission of expert testimony on market value based on the development costs and income capitalization of a potential subdivision, see Dash v. State, Sup. Ct. Op. No. 756 (File No. 1405), 491 P.2d 1069 (1971).

Questions relative to revenue produced from the property taken is admissible for the purpose of arriving at the market value of the property. State v. Peterson, 328 P.2d 617 (Mont. 1958).

Value of improvements. — If improvements on the property enhance the market value then the value of those improvements is material; if improvements do not enhance the market value, they are not material. State v. Peterson, 328 P.2d 617 (Mont. 1958).

The true rule seems to be for the witness to testify as to the nature of the improvements, their use, and then, probably, state that the improvements enhance the market value of the land. He may then testify as to the consideration of the improvements and their condition and value at the time of the condemnation. State v. Peterson, 328 P.2d 617 (Mont. 1958).

Testimony as to amounts invested in the lands and improvements would be incompetent, for it is the value of all such at the time summons is served that counts. State v. Peterson, 328 P.2d 617 (Mont. 1958).

Loss of business by relocation of highway. — It is clear that compensation cannot be had for loss of business by relocation of a highway and diversion of traffic. State v. Peterson, 328 P.2d 617 (Mont. 1958).

The owner of land abutting on a highway established by the public has no property or other vested right in the continuance of it as a highway at public expense, and, at least in the absence of deprivation of ingress and egress, cannot claim damages for its mere discontinuance, although such discontinuance diverts traffic from his door and diminishes his trade and thus depreciates the value of his land. State v. Hoblitt, 288 P. 181 (Mont. 1930).

Sale fifteen months after date of taking. — As to admission into evidence of a sale taking place fifteen months after the date of the taking by the state, see Dash v. State, Sup. Ct. Op. No. 756 (File No. 1405), 491 P.2d 1069 (1971).

B. Damages to Remainder.

Assessment of damages refers to "portion sought to be condemned." — The assessment of damages the award of the commissioners (master) provided for in this section is made with reference to property sought to be appropriated or "portion sought to be condemned," not to property already condemned at the time of the appointment. Alaska Gold Recovery Co. v. Northern Mining & Trading Co., 7 Alaska 655 (1927).

The award of damages is a substantial fact, which fixes the just compensation to which relator is entitled, until revised on appeal. State ex rel. Volunteer Mining Co. v. McHatton, 38 P. 711 (Mont. 1894).

Recoverable damages must be the natural and proximate consequence of the action taken; they must be direct and certain, actual and reasonable, readily ascertainable, and not remote speculative or contingent. Lewis & Clark County v. Nett, 263 P. 418 (Mont. 1928); State v. Bradshaw Land & Livestock Co., 43 P.2d 674 (Mont. 1935).

Not every possible element of depreciation is compensable. — It is not every possible element of depreciation in value for which compensation must be awarded in an eminent domain proceeding. Lewis & Clark County v. Nett, 263 P. 418 (Mont. 1928).

And attempt to enumerate elements of depreciation is futile. — Any attempt to enumerate the various circumstances which may enter into depreciation of the market value of a tract of land would be futile. Lewis & Clark County v. Nett, 263 P. 418 (Mont. 1928).

Highway destroying the close and requiring additional fencing. — One of the circumstances which directly depreciates the market value of land is that the opening of a highway through a fenced tract of land destroys the close and necessitates additional fencing in order to reestablish it. Lewis & Clark County v. Nett, 263 P. 418 (Mont. 1928).

An item of damages which would enter into the depreciation of the value of a tract is the cost of constructing a fence along the highway to maintain an enclosure. State v. Hoblitt, 288 P. 181 (Mont. 1930).

The damage suffered and the amount of depreciation is readily ascertainable by testimony as to the reasonable cost of construction of fences to maintain enclosure and the consideration of such an item has generally been up held. Lewis & Clark County v. Nett, 263 P. 418 (Mont. 1928).

Fence as fence. — In the absence of statutory justification therefor no allowance can be made for a fence as a fence. Lewis & Clark County v. Nett, 263 P. 418 (Mont. 1928).

Necessity of fencing and cost goes only to show depreciation by reason of taking. — Proof of the necessity of such fencing, and its cost, is proper only as a means of showing the depreciation in market value of the land by reason of the taking and use of a part of the land. Lewis & Clark County v. Nett, 263 P. 418 (Mont. 1928).

Maintenance of fences is too remote. — Maintenance of fences would be a known future burden upon the lands, but the claim should be disregarded as too remote, and as incapable of definite ascertainment or determination at the time the depreciation in value must be determined, i.e., as of the time of the commencement of the proceeding. Lewis & Clark County v. Nett, 263 P. 418 (Mont. 1928).

Appraisal of damages prior to construction of improvements. — When damages are appraised prior to the construction of the improvements for which the land is condemned, the estimate should be made on the assumption that the improvements will be properly constructed; and, if they are constructed pending the condemnation proceedings, the rule should be the same. The actual effect of the properly constructed improvements in the manner proposed by plaintiff as to the larger parcels should control the appraisal. If the improvements are improperly or negligently constructed, no additional damage should be given for this reason. City of Anchorage v. Scavenius, Sup. Ct. Op. No. 1183 (File Nos. 2214, 2222), 539 P.2d 1169 (1975).

Depreciation of adjacent tract. — In arriving at a conclusion as to the damages to be awarded, the triers of facts should consider all of the circumstances which immediately and directly depreciate the present market value of the portions of the whole tract adjacent to the strip sought to be taken as a right-of-way. Lewis & Clark County v. Nett, 263 P. 418 (Mont. 1928).

Costs and attorney's fees. — City was entitled to award of costs and attorney's fees for successful defense of negligence claim pertaining to pavement damage occurring when water main installed. City of Anchorage v. Scavenius, Sup. Ct. Op. No. 1183 (File Nos. 2214, 2222), 539 P.2d 1169 (1975).

C. Benefits to Remainder.

Effect of special benefits. — The rule in Alaska is that special benefits to the remainder can only be used to offset severance damages to the remainder. In the event that special benefits exceed severance damages, the landowner is still entitled to receive the full market value of the portion actually taken. Dash v. State, Sup. Ct. Op. No. 756 (File No. 1405), 491 P.2d 1069 (1971).

General enhancement of land values is not a proper element of benefit. — The general enhancement of values in land in the vicinity because of the construction of a road is not a proper element of benefit to be allowed. Gallatin Valley Elec. Ry. v. Neible, 186 P. 689 (Mont. 1919).

It may be stated as a general rule that general and neighborhood benefits resulting to the owner in common with others may not be set off against the damages to the owner. Gallatin Valley Elec. Ry. v. Neible, 186 P. 689 (Mont. 1919).

The benefits which may be deducted must be special or local, or such as result directly and peculiarly to the particular tract of which a part is taken. Gallatin Valley Elec. Ry. v. Neible, 186 P. 689 (Mont. 1919).

III. ROLE OF WITNESSES.

Role of expert witness in eminent domain proceedings. — See Dash v. State, Sup. Ct. Op. No. 756, (File No. 1405), 491 P.2d 1069 (1971).

Opinions of witnesses. — The opinions of witnesses must be resorted to determine (1) the value of the land taken; (2) the detriment, if any to the portion not taken, or, in other words the value of that not taken; and (3) the benefits, if any, to the portion not taken. Yellowstone Park R. Co. v. Bridger Coal Co., 87 P. 963 (Mont. 1906).

The right mode of proving value is to take the sworn opinions of those who are shown to be competent to give opinions on the subject, and let them be cross-examined as to the foundation of their opinions, their means of knowledge and the motives prompting them. Yellowstone Park R. Co. v. Bridger Coal Co., 87 P. 963 (Mont. 1906).

The question of how the taking of a right-of-way affects the premises in the market should logically be determined by testimony of qualified witnesses as to the cash market value of the premises today and what that value would be today considering the highway as constructed across them and permitting the witnesses, on cross-examination, to state the manner in which they arrived at their conclusion on the subject. Lewis & Clark County v. Nett, 263 P. 418 (Mont. 1928).

Competency of witnesses. — One who knows the real property in question and is familiar with the uses to which it may be put, may testify as to its market value. State v. Peterson, 328 P.2d 617 (Mont. 1958).

It must appear that the witness has some peculiar means of forming an intelligent and correct judgment as to the value of the property in question beyond what is

presumed to be possessed by men generally. State v. Peterson, 328 P.2d 617 (Mont. 1958).

Value of real estate may be proved by witnesses other than experts. State v. Peterson, 328 P.2d 617 (Mont. 1958).

The witness need not know of any sales and he need not be a technical expert. State v. Peterson, 328 P.2d 617 (Mont. 1958).

A witness as to value of property need not to have been engaged in buying or selling the same. State v. Peterson, 328 P.2d 617 (Mont. 1958).

Who are competent to give opinions on value of property is generally in the discretion of the trial judge. State v. Peterson, 328 P.2d 617 (Mont. 1958).

Weight of testimony is jury question. — The question of what weight to give witness' testimony is one for the jury to decide upon the evidence produced at the trial and under the court's instructions on the law. Alaska State Hous. Auth. v. Vincent, Sup. Ct. Op. No. 261 (File No. 458), 396 P.2d 531 (1964).

Admissibility of photographs or models of property condemned, 23 ALR3d 825.

Admissibility of evidence of proposed or possible subdivision or platting of condemned land on issue of value in eminent domain proceedings, 26 ALR3d 780.

Right in eminent domain proceeding to call as witness expert engaged but not called as witness by opposing party, 71 ALR3d 1119.

Necessity of trial or proceeding, separate from main condemnation trial or proceeding, to determine divided interest in state condemnation award, 94 ALR3d 696.

Sec. 09.55.320. Right to jury trial as to damages and value of property. An interested party may appeal the master's award of damages and valuation of the property, in which case there shall be a trial by jury on the question of the amount of damages and the value of the property, unless the jury is waived by the consent of all parties to the appeal. (§ 13.09 ch 101 SLA 1962)

Cross references. — For related court rules, see Civ. R. 72(h)(4) and (5).

Opinions of attorney general. — A prequalification system would appear to be a reasonable measure to implement the power of the department to determine the lowest responsible bidder on any particular job. 1958 Op. Att'y Gen., No. 27.

Sec. 19.10.220. Prior contracts unaffected.

Obsolete.

Revisor's notes. — This section is obsolete. It reads as follows: "Sections 170-250 of this chapter do not apply to contracts entered into before April 1, 1957."

Editor's notes. — The obsolete section derived from § 8, art. III, title IV, ch. 152, SLA 1957.

Sec. 19.10.230. Method of construction of highway ditches. A highway constructed or reconstructed shall be designed to permit water to drain from it into ditches which shall drain into coulees, rivers and lakes according to the surface and terrain where the highway is constructed in accordance with scientific highway construction and engineering in order to prevent the water from overflowing onto adjacent and adjoining lands. The natural flow and drainage of surface water shall not be obstructed, but it shall be permitted to follow the natural course according to the surface and terrain. (§ 7 art IV title II ch 152 SLA 1957)

The legislature distinguished access roads from highways by AS 19.30.020 and AS 19.30.040. Mercer v. Yutan Constr. Co., Sup. Ct. Op. No. 371 (File No. 631), 420 P.2d 323 (1966).

Sec. 19.10.240. Warning signs of road construction. Whenever the department enters into a contract for the construction of a highway, it shall, as a condition of the contract, provide that the contractor shall place suitable warning signs which can be read from a distance of 100 feet in daytime, and that he shall erect and place at night a red and white lantern or a torch or other effective device, of a type approved by the department, at both ends of the construction work, not less than 300 feet from it, warning the public that the road is under construction or improvement and is closed, impassable, or dangerous for travel. Nothing in this section makes the state liable for the failure of a contractor to erect warning signs. (§ 9 art IV title II ch 152 SLA 1957)

Sec. 19.10.250. Penalty for failure to erect warning signs. A contractor, foreman, or person in charge of work or repairs on a highway who fails or neglects to erect and maintain suitable warning signs as provided in AS 19.10.240 is punishable by a fine of not less than $10 nor more than $50, or by imprisonment in jail for not more than 60 days, or by both. (§ 10 art IV title II ch 152 SLA 1957)

Sec. 19.10.260. Replacement of permanent markers and filing of right-of-way map after construction. The department shall:

Obsolete.

Revisor's notes. — This section is obsolete. It reads as follows: "Sections 170-250 of this chapter do not apply to contracts entered into before April 1, 1957."

Editor's notes. — The obsolete section derived from § 8, art. III, title IV, ch. 152, SLA 1957.

Sec. 19.10.230. Method of construction of highway ditches. A highway constructed or reconstructed shall be designed to permit water to drain from it into ditches which shall drain into coulees, rivers and lakes according to the surface and terrain where the highway is constructed in accordance with scientific highway construction and engineering in order to prevent the water from overflowing onto adjacent and adjoining lands. The natural flow and drainage of surface water shall not be obstructed, but it shall be permitted to follow the natural course according to the surface and terrain. (§ 7 art IV title II ch 152 SLA 1957)

The legislature distinguished access roads from highways by AS 19.30.020 and AS 19.30.040. Mercer v. Yutan Constr. Co., Sup. Ct. Op. No. 371 (File No. 631), 420 P.2d 323 (1966).

Sec. 19.10.240. Warning signs of road construction. Whenever the department enters into a contract for the construction of a highway, it shall, as a condition of the contract, provide that the contractor shall place suitable warning signs which can be read from a distance of 100 feet in daytime, and that he shall erect and place at night a red and white lantern or a torch or other effective device, of a type approved by the department, at both ends of the construction work, not less than 300 feet from it, warning the public that the road is under construction or improvement and is closed, impassable, or dangerous for travel. Nothing in this section makes the state liable for the failure of a contractor to erect warning signs. (§ 9 art IV title II ch 152 SLA 1957)

Sec. 19.10.250. Penalty for failure to erect warning signs. A contractor, foreman, or person in charge of work or repairs on a highway who fails or neglects to erect and maintain suitable warning signs as provided in AS 19.10.240 is punishable by a fine of not less than $10 nor more than $50, or by imprisonment in jail for not more than 60 days, or by both. (§ 10 art IV title II ch 152 SLA 1957)

Sec. 19.10.260. Replacement of permanent markers and filing of right-of-way map after construction. The department shall:

Sec. 34.35.025. Parties to foreclosure. In an action to foreclose a lien created by AS 34.35.005 — 34.35.425, all persons personally liable and all lien holders whose claims have been filed, and all other persons interested in the matter in controversy or the property sought to be charged with the lien may be made parties. Persons who are not parties are not bound by the proceedings. (§ 26-9-6 ACLA 1949)

Collateral references. — 53 Am. Jur. 2d, Mechanics' Liens, §§ 359-373.

Sec. 34.35.030. Lien claim against different properties. If a lien claim is filed for the same labor against two separate kinds of property owned or claimed by different persons, the court shall determine the liability of each kind of property and designate which shall be sold first to discharge the amount of the lien claim. (§ 26-9-7 ACLA 1949)

Sec. 34.35.035. Several judgment for each claimant. In an action to enforce a lien judgment shall be given in favor of each person having a lien for the amount due the person, and the court shall order property subject to the lien to be sold by the peace officer in the same manner that property is sold on execution, or in any manner that the court considers proper. The proceeds of the sale shall be apportioned to the payment of each judgment pro rata, if the amount is insufficient to pay them in full. (§ 26-9-8 ACLA 1949)

Sec. 34.35.040. Order of priority and payment. [Repealed, § 19 ch 175 SLA 1978. For current law see AS 34.35.112.]

Sec. 34.35.045. Lienor's action on contract. Except as otherwise expressly provided, nothing in AS 34.35.005 — 34.35.425 may be construed to prevent a lienor under a contract from maintaining an action as if the lienor has no lien for the security of the debt and the bringing of this action does not prejudice rights under AS 34.35.005 — 34.35.425. (§ 26-9-11 ACLA 1949)

NOTES TO DECISIONS

Liens provided by statute create a cumulative remedy, and a lienor has the right to proceed by way of his lien or by an action at law. Mitchell v. Beaver Dredging Co., 8 Alaska 566 (1935).

Where the lien fails, the claimant may nevertheless have a personal judgment against the defendant personally liable in the cause. Mitchell v. Beaver Dredging Co., 8 Alaska 566 (1935).

Sec. 34.35.050. Lien for labor or materials furnished. A person s a lien, only to the extent provided under this chapter, to secure payment of the contract price if the person

1) performs labor upon real property at the request of the owner or agent of the owner for the construction, alteration, or repair of a ding or improvement;

2) is a trustee of an employee benefit trust for the benefit of viduals performing labor on the building or improvement and has irect contract with the owner or the agent of the owner for direct ments into the trust;

3) furnishes materials that are delivered to real property under a tract with the owner or the agent of the owner that are incorpo- d in the construction, alteration or repair of a building or rovement;

4) furnishes equipment that is delivered to and used upon real erty under a contract with the owner or the agent of the owner for construction, alteration or repair of a building or improvement;

5) performs services under a contract with the owner or the agent e owner in connection with the preparation of plans, surveys, or itectural or engineering plans or drawings for the construction, ation or repair of a building or improvement, whether or not ally implemented on that property; or

6) is a general contractor. (§ 26-1-1 ACLA 1949; am § 1 ch 20 SLA ; am § 1 ch 14 SLA 1953; am § 1 ch 57 SLA 1959; am § 1 ch 106 1967; am § 1 ch 175 SLA 1978)

NOTES TO DECISIONS

Editor's notes. — Many of the cases annotated below were decided under this section as it existed before the 1978 amendment.

Constitutionality of lien laws. — See Nordstrom v. Sivertsen-Johnsen Mining & Dredging Co., 5 Alaska 210 (1915).

The mechanic's lien law of Alaska was adopted originally from the lien law of Oregon. Arctic Lumber Co. v. Borden, 211 F. 50 (9th Cir.), cert. denied, 235 U.S. 704, 35 S. Ct. 209, 59 L. Ed. 433 (1914).

Alaska mechanic's lien laws were derived from those of Oregon. Vaara v. Ketchikan Spruce Mills, Sup. Ct. Op. No. 441 (File No. 829), 432 P.2d 618 (1967).

The purpose of legislatures in enacting mechanic's and materialman's lien laws is for the protection of the mechanic, insuring to him the fruits of his labor and providing the materialman with a speedy and efficacious mode of collecting his pay for materials furnished. Jorgensen Co. v. Sheldon, 2 Alaska 607 (1905).

And to secure lien priority of payment. — It is the purpose of the lien law to secure priority of payment of the price and value of work performed and materials furnished in erecting and repairing a building or other structure. Cascaden v. Wimbish, 161 F. 241 (9th Cir. 1908).

This article relating to mechanics' liens should be liberally construed. Russell v. Hayner, 130 F. 90 (9th Cir. 1904); Arctic Lumber Co. v. Borden, 211 F. 50 (9th Cir.), cert. denied, 235 U.S. 704, 35 S. Ct. 209, 59 L. Ed. 433 (1914). But see Goldstein v. Noble, 6 Alaska 282 (1920).

The evident spirit and purpose of this article is to do substantial justice to all parties who may be affected by its provisions, and the courts should avoid unfriendly strictness and mere technicality. Russell v. Hayner, 130 F. 90 (9th Cir. 1904).

Mechanic's lien statutes are to be liberally construed, with a view to effect substantial justice, and the fact that the lien claimant includes in his claim an item of his services for which the law gives him no lien will not defeat the lien if due to an honest mistake, and his lien in such a case may be enforced pro tanto if the true amount for which he is entitled to a lien may be segregated from the remainder. Pioneer Mining Co. v. Delamotte, 185 F. 752 (9th Cir. 1911).

Except to protect against undue severity. — Where the particular enactment deals fairly and equitably with both the owner and the lienor, the liberal interpretation seems to be the rule adopted; but where the statute seems to be unnecessarily severe upon one, and in favor of the other, resulting in manifest injustice, the courts have endeavored to relieve the severity, holding the party favored to a strict compliance with the statute. Jorgensen Co. v. Sheldon, 2 Alaska 607 (1905).

And parts upon which existence of lien depends should be strictly construed. — The safe and proper rule of construction of mechanic's lien statutes is that, while the remedial portions of these statutes should be liberally construed with a view to avoid defeating the purpose of the statute, yet those parts upon which the right to the existence of a lien depends, being in derogation of the common law, should be strictly construed. Morris v. Marsh, 3 Alaska 140 (1906).

They must be substantially complied with. — A mechanic's lien is purely of statutory creation, and can only be maintained by a substantial observance and compliance with the provisions of the statute. Whatever is made necessary to the existence of the lien must be performed, or the attempt to create it will be futile. A substantial adherence to the terms of the statute in the notice of the lien is indispensable. Russell v. Hayner, 130 F. 90 (9th Cir. 1904).

Thus, this section should be strictly construed. Rivers v. Pastro, 11 Alaska 491 (1948).

A strained construction to bring a person within this section is not permissible. Rivers v. Pastro, 11 Alaska 491 (1948).

Prior law construed. — This section as it existed prior to 1978 prohibited the creation of a valid mechanic's lien prior to the commencement of work on the site and the effectuation of visible improvements to the property. Torkla-Korman/Engineers v. Penland Ventures, Sup. Ct. Op. No. 2757 (File No. 6469), 671 P.2d 769 (1983). See now paragraph (4), which allows liens for work done in the preparation of plans "whether or not [they were] actually implemented."

This article is not, of its own terms, made applicable to public property. University of Alaska v. Simpson Bldg. Supply Co., Sup. Ct. Op. No. 1113 (File No. 2196), 530 P.2d 1317 (1975).

As to immunity of real prop University of Alaska from lien ment or foreclosure, see Unive Alaska v. Simpson Bldg. Supply C Ct. Op. No. 1113 (File No. 2196), 5 1317 (1975).

The landowner must have knowledge of the construction his interest can be subjected to a m man's lien. Vaara v. Ketchikan Mills, Sup. Ct. Op. No. 441 (File No 432 P.2d 618 (1967).

If the materialman relies on bo credit of the purchaser and the rity of the building, the materi can assert a lien. Dannemiller v. A Distribution Corp., Sup. Ct. Op. No (File No. 2895), 566 P.2d 645 (19).

Materialperson must demon that materials furnished were ally incorporated into the buildi project. Dannemiller v. AMFAC Dis tion Corp., Sup. Ct. Op. No. 1452 (Fil 2895), 566 P.2d 645 (1977).

No requirement that materia see that every piece used in struc — In the foreclosure of a materia lien, the materialman should not b quired to watch the progress of a stru to see that every piece of material plied by him was used therein, and if of the material has been used elsewh it rests with the defendant to show fact. Dannemiller v. AMFAC Distribu Corp., Sup. Ct. Op. No. 1452 (File 2895), 566 P.2d 645 (1977).

A materialperson has a burden to s by a preponderance that its mater were generally used in a project, bu need not show that each and every i was incorporated. Dannemiller v. AMF Distribution Corp., Sup. Ct. Op. No. 1 (File No. 2895), 566 P.2d 645 (1977).

A mechanic's lien will attach property for an improvement placed thereon if it has a physical beneficial connection therewith and essential to the convenient and comfo able use of the premises. Mitford v. Pri 353 F.2d 550 (9th Cir. 1965).

Lots in a subdivision are lienable f an engineer's labor on the subdivisio water and sewerage system. Mitford Prior, 353 F.2d 550 (9th Cir. 1965).

Effect of agreement establishin partnership. — For the purposes of th section, an agreement establishing a par nership or joint venturership does no affect one party's standing to file a lie against the other party's land. Urban Dev Co. v. Dekreon, Sup. Ct. Op. No. 108 (File No. 2028), 526 P.2d 325 (1974).

As to immunity of real property of University of Alaska from lien attachment or foreclosure, see University of Alaska v. Simpson Bldg. Supply Co., Sup. Ct. Op. No. 1113 (File No. 2196), 530 P.2d 347 (1975).

The landowner must have actual knowledge of the construction before his interest can be subjected to a materialman's lien. Vaara v. Ketchikan Spruce Mills, Sup. Ct. Op. No. 441 (File No. 829), 432 P.2d 618 (1967).

If the materialman relies on both the credit of the purchaser and the security of the building, the materialman may assert a lien. Dannemiller v. AMFAC Distribution Corp., Sup. Ct. Op. No. 1452 (File No. 2895), 566 P.2d 645 (1977).

Materialperson must demonstrate that materials furnished were generally incorporated into the building or project. Dannemiller v. AMFAC Distribution Corp., Sup. Ct. Op. No. 1452 (File No. 2895), 566 P.2d 645 (1977).

No requirement that materialman see that every piece used in structure. - In the foreclosure of a materialman's lien, the materialman should not be required to watch the progress of a structure to see that every piece of material supplied by him was used therein, and if some of the material has been used elsewhere, it rests with the defendant to show that fact. Dannemiller v. AMFAC Distribution Corp., Sup. Ct. Op. No. 1452 (File No. 2895), 566 P.2d 645 (1977).

A materialperson has a burden to show by a preponderance that its materials were generally used in a project. but it need not show that each and every item was incorporated. Dannemiller v. AMFAC Distribution Corp., Sup. Ct. Op. No. 1452 (File No. 2895), 566 P.2d 645 (1977).

A mechanic's lien will attach to property for an improvement not placed thereon if it has a physical or beneficial connection therewith and is essential to the convenient and comfortable use of the premises. Mitford v. Prior, 353 F.2d 550 (9th Cir. 1965).

Lots in a subdivision are lienable for an engineer's labor on the subdivision's water and sewerage system. Mitford v. Prior, 353 F.2d 550 (9th Cir. 1965).

Effect of agreement establishing partnership. — For the purposes of this section, an agreement establishing a partnership or joint ventureship does not affect one party's standing to file a lien against the other party's land. Urban Dev. Co. v. Dekreon, Sup. Ct. Op. No. 1083 (File No. 2028), 526 P.2d 325 (1974).

The meaning properly attaching to the word "contractor" as used in this section is one who has charge of the construction of the building, alteration, or repair by direction of or contract with the owner or his agent duly authorized to contract for him. Morris v. Marsh, 3 Alaska 140 (1906).

A lien of a contractor may include an item for supervision and overhead. Clay v. Sandal, Sup. Ct. Op. No. 74 (File Nos. 60 (a), (b)), 369 P.2d 890 (1962).

Labor for which lien is claim must come within statute. — While mechanic's lien statutes are to be liberally construed, so that their purpose may not be frustrated, and with a view to effecting substantial justice, yet, unless the labor performed for which the lien is claimed is such as comes within the contemplation of the statute, there can be no valid lien. Noble v. Gustafson, 204 F. 69 (9th Cir. 1913).

This section and AS 34.35.070 must be read and construed together, and as applied to an original contractor, in computing the time from which he must file his claim of lien, they provide that he must file it within 90 days from the date of the completion of his contract or within 90 days from the date of the construction of the building, or any part of such construction, under the contract. Bloom v. McCluskey, 7 Alaska 349 (1925).

There must be employment by the owner of the building or his agent. — To authorize a lien under the provisions of this section, there must be an employment by the owner of the building, or his authorized agent, and the employment of contractors by one who was occupying the land under a contract of purchase, does not constitute the employment contemplated by this section. Russell v. Hayner, 130 F. 90 (9th Cir. 1904).

Or owner must know of and fail to disclaim improvement. — If the person in charge is not in fact the agent of the owner, the interest of the owner shall, nevertheless, be liable for the improvement if it is constructed with his knowledge and he fails to post the required notice disclaiming responsibility. Cascaden v. Wimbish, 161 F. 241 (9th Cir. 1908).

Person in charge is prima facie owner's agent. — This section, AS 34.35.055 and 34.35.065, construed together, mean that the person in charge of the work shall prima facie be deemed to be the agent of the owner, and the prop-

erty of the latter shall be charged with the lien under the express provisions of this section. Cascaden v. Wimbish, 161 F. 241 (9th Cir. 1908). See AS 34.35.115.

Lessee is not owner's agent. — A lessee, contracting for improvements upon the demised premises, does not, merely by virtue of his relation as lessee, contract as the agent of the lessor, so as to subject the property to mechanics' liens therefor. Morris v. Marsh, 3 Alaska 140 (1906).

And lien is limited to leasehold unless owner fails to give notice of nonresponsibility. — If the work is done for a lessee of the property, liability is confined to the leasehold estate, if the owner had no knowledge of the construction of the improvement, or if, having such knowledge, he gave notice that he would not be responsible. Cascaden v. Wimbish, 161 F. 241 (9th Cir. 1908).

Or unless lease authorizes lessee to improve or improvements revert. — It is the general rule that where a lease contains a provision authorizing the lessee to make improvements by deducting the cost thereof from the rent, or where part of the consideration of the lease is the making by the lessee of improvements which become a part of the realty, or that the improvements made by the lessee shall revert to the lessor, a mechanic's lien may attach to the property for work done or materials furnished, pursuant to a contract with the lessee. Arctic Lumber Co. v. Borden, 211 F. 50 (9th Cir.), cert. denied, 235 U.S. 704, 35 S. Ct. 209, 59 L. Ed. 433 (1914).

It will attach to building erected by lessee that is to revert to lessor. — Where a lease provided that construction of a business building on the property by the lessee was a part of the consideration, but also provided that the building was to "attach to the said realty as a part thereof and become the property of lessor" upon the expiration or termination of the lease, as to a materialman's lien, the building had become an integral part of the leasehold estate, and was not an item of personal property to be considered separately from the realty upon which it was constructed and the lessee's interest in that realty. Clay v. Sandal, Sup. Ct. Op. No. 74 (File Nos. 60 (a), (b)), 369 P.2d 890 (1962).

Breach of contract bars enforcement of lien for work performed. — Where a contractor fails to perform a considerable part of the work required by his contract, his failure, regardless of his intentions, constitutes a bar to his enforcement of a lien for the work performed. Gillis v. Gillette, 13 Alaska 55, 184 F.2d 872 (9th Cir. 1950).

As where contract is willfully abandoned before completion. — See Gillis v. Gillette, 13 Alaska 55, 184 F.2d 872 (9th Cir. 1950).

Burden of proof on lien claimant to show compliance with statute. — Where the allegations of the complaint in regard to the work done upon a claim and the character thereof were put in issue by the answer, the burden of the proof is on the lien claimant to show by legally sufficient evidence the accrual of the lien under the terms of the statute which creates it, as well as under the terms of the contract under which the work was done. Pioneer Mining Co. v. Delamotte, 185 F. 752 (9th Cir. 1911).

Bare statement that other projects were being completed by a construction company at the same time that a particular project's modular units were being manufactured is insufficient, under the supreme court's precedents, to raise a triable issue of fact as to whether the material furnished to the construction company was actually incorporated into the particular project. University of Alaska v. Simpson Bldg. Supply Co., Sup. Ct. Op. No. 1113 (File No. 2196), 530 P.2d 1317 (1975).

A house builder's employee cannot recover back wages directly against the home buyers under a theory that the employee was a third-party beneficiary to a contract between the builder and the buyer. State v. Osborne, Sup. Ct. Op. No. 2034 (File No. 4385), 607 P.2d 369 (1980).

Applied in Kel Weatherstrip Co. v. Rankin, 15 Alaska 204, 124 F. Supp. 553 (D. Alaska 1954).

Mechanics' liens: mortgagee-lender's duty, in disbursing funds, to protect mortgagor against outstanding or potential mechanics' liens against the mortgaged property. 30 ALR4th 134.

Sec. 34.35.055. Land subject to lien. (a) The land upon which a building or other improvement described in AS 34.35.0[illegible] is constructed, together with a convenient space about the building or other improvement or so much as is required for the convenient use and occupation of it (to be determined by the judgment of the court at the time of the foreclosure of the lien), and the mine on which the work is performed or for which the material is furnished is also subject to the lien created by AS 34.35.050 — 34.35.120 if, at the time the work is started or the materials for the building or other improvements are first furnished, the land belongs to the person who causes the building or other improvement to be constructed, altered, or repaired.

(b) If the person owns less than a fee simple estate in the land, then only the interest of the person in it is subject to the lien.

(c) If the interest is a leasehold interest, and the holder forfeits the rights of the holder to it, the purchaser of the building or improvement and leasehold term, or so much of it as remains unexpired at a sale under AS 34.35.050 — 34.35.120 is considered to be the assignee of the leasehold term, and may pay the lessor all arrears of rent or other money and costs due under the lease.

(d) If the lessor regains possession of the land and property, or obtains judgment for the possession of it before the commencement of the construction, alteration, or repair of the building or other improvement, the purchaser may only remove the building or other improvement within 30 days after the purchase, and the owner of the land shall receive the rent due payable out of the proceeds of the sale, according to the terms of the lease, down to the time of the removal. (§ 26-1-2 ACLA 1949)

NOTES TO DECISIONS

The object of this section is to declare to what land the lien shall attend. Cascaden v. Wimbish, 161 F. 241 (9th Cir. 1908).

The legislature intended to confer the right of lien upon every laborer or mechanic whose work tends to improve lands or mines. Morris v. Marsh, 3 Alaska 140 (1906).

The purpose of extending a statutory lien to the land is because the value of the land is increased when a materialperson provides labor or material for a structure which is attached to the land. The lien should extend to the land, which is benefited by the materialperson. Dannemiller v. AMFAC Distribution Corp., Sup. Ct. Op. No. 1452 (File No. 2895), 566 P.2d 645 (1977).

Complaint is defective unless it alleges labor went to improvement. — The absence of an allegation that the labor went to the improvement of the owner's lands or mines is of itself fatal to the complaint. Morris v. Marsh, 3 Alaska 140 (1906).

And so is lien notice. —A lien notice simply to the effect that materials were

constructed or renovated by the state unless a certificate that the facility complies with adopted facility procurement has been issued. (§ 1 ch 216 SLA 1975)

Sec. 35.10.200. Definitions. In AS 35.10.160 — 35.10.200,

(1) "life cycle costs" means analytic techniques which provide data to describe the first cost of procurement of public facilities and the maintenance cost, operation cost and occupancy cost of the facilities;

(2) "policies" includes but is not limited to budget accounting and cost planning techniques, facility design techniques, and contractual techniques for the procurement of labor, materials and contractual services;

(3) Repealed by § 35 ch 168 SLA 1978. (§ 1 ch 216 SLA 1975; am § 35 ch 168 SLA 1978)

Effect of amendment. — The 1978 amendment deleted paragraph (3), which read "'public facilities' does not include highways or vessels of the marine highway system."

Chapter 15. Construction Procedures.

Section		Section	
10.	Construction by department	80.	Local control of state public works projects
20.	Request for public bids	90.	Use of appropriated funds
30.	Advertisement, bids, contracts, and informal bids	100.	Responsibility of department
40.	Procedures for the award of contracts	110.	Title to site and completion of project
50.	Award of contracts	120.	Definitions
60.	[Obsolete]		

Sec. 35.15.010. Construction by department. (a) Except as provided in AS 44.33.300, it shall be the general policy of the department to require the construction of all public works under bid contract. However, when the estimated cost of a construction project is less than $100,000, or when it appears to be in the best interests of the state, the department may perform the work, notwithstanding any other provisions of law. A complete record shall be kept by the commissioner or his designee of all transactions entered into under this section including names of employees involved in the transactions.

(b) Construction or professional services in connection with the construction of a public work performed by the department under (a) of this section which have an estimated cost exceeding $5,000 may not be performed by the department unless the commissioner determines, in writing, that the cost to the state will be less than that incurred as a result of a formally advertised or negotiated contract. The determination of the commissioner shall be supported by findings of fact which shall set out enough facts and circumstances to clearly justify the determination. The determinations and findings shall be maintained as a permanent record of the department.

(c) In this section, "professional services" means architectural, engineering, or land surveying services. (§ 1 art III title IV ch 152 SLA 1957; am § 5 ch 277 SLA 1976; am § 1 ch 143 SLA 1977; am § 4 ch 104 SLA 1978)

Cross reference. — For provisions requiring consistency with local government plans and ordinances before commencing construction of a public project, see AS 35.30.010 et seq.

Effect of amendments. — The 1976 amendment, in present subsection (a), added "Except as provided in AS 44.33.300" to the beginning of the first sentence.

The 1977 amendment, in present subsection (a), substituted "$100,000" for "$20,000" in the second sentence and added the third sentence.

The 1978 amendment added subsections (b) and (c).

Am. Jur. 2d and C.J.S. references. — 64 and 65 Am. Jur. 2d, Public Works and Contracts, §§ 105, 119, 211, 229.

72 C.J.S. Supplement, Public Contracts, § 1 et seq.

Sec. 35.15.020. Request for public bids. The department may request bids and award contracts for construction work. The department may require the contractor to furnish equipment, labor, materials, and supplies for the project, or it may elect to furnish the materials and supplies. If the department elects to provide materials and supplies for a project, it shall make the election at the time it adopts the construction program. The department shall request bids for the total of the materials and supplies for a project according to the class, type, and nature of the materials and supplies, and may award a contract upon the basis it considers efficient and economical, whether upon the basis of delivery to the construction project directly or to a central storehouse or storehouses maintained by the department. Those materials and supplies so purchased by the department may be delivered to the project site without expense to the contractor, or it may sell them to the contractor at cost and make the materials and supplies a part of the construction cost. (§ 3 art III title IV ch 152 SLA 1957)

ALR references. — Right of public authorities to reject all bids for public work or contract, 31 ALR2d 469.

Revocation, prior to execution of formal written contract, of vote or decision of public body awarding contract to bidder, 1 ALR3d 864.

Sec. 35.15.030. Advertisement, bids, contracts, and informal bids. When the estimated cost of any construction under this chapter exceeds $100,000, the department shall, except as provided in AS 35.15.010 and in AS 44.33.300, proceed to advertise, request bids, and award the contract in the manner provided in §§ 40 and 50 of this chapter. When any proposed construction contract is for a sum less than $100,000, it is discretionary with the department whether the contract is advertised and awarded in accordance with AS 35.15.040 and 35.15.050. In all events the department shall request informal bids from as many contractors as can be requested conveniently. A complete

record shall be kept by the commissioner or his designee of all transactions entered into under this section including names of employees involved in the transactions. (§ 4 art III title IV ch 152 SLA 1957; am § 31 ch 71 SLA 1972; am § 6 ch 277 SLA 1976; am § 2 ch 143 SLA 1977)

Effect of amendments. — The 1976 amendment inserted "and in AS 44.33.300" in the first sentence.

The 1977 amendment substituted "under this chapter exceeds $100,000" for "exceeds $20,000" in the first sentence, substituted "$100,000" for "$20,000" in the second sentence, and added the fourth sentence.

Legislative history report. — For report on ch. 71, SLA 1972 (HCSSB 383 am H), see 1972 House Journal, p. 899.

Am. Jur. 2d, ALR and C.J.S. references. — 64 Am. Jur. 2d, Public Works and Contracts, §§ 30-59.

Determination of amount involved in contract within statutory provision requiring public contracts involving sums exceeding specified amount to be let to lowest bidder, 53 ALR2d 498.

72 C.J.S. Supplement, Public Contracts, §§ 7-14, 17.

Sec. 35.15.040. Procedures for the award of contracts. (a) If federal funds are used, the award of the contract shall comply with federal law and the rules and regulations promulgated under it and with state law to the extent it is consistent with federal law.

(b) In all other cases, the award of the contract shall comply with this title, and AS 37.05, and the rules and regulations promulgated under them and which are consistent with this title. (§ 5 art III title IV ch 152 SLA 1957)

ALR references. — Validity of governmental requirement of oath of allegiance or loyalty, 18 ALR2d 302.

Construction and operation of "equal opportunities clause" requiring pledge against racial discrimination in hiring under construction contract, 44 ALR3d 1283.

Sec. 35.15.050. Award of contracts. The department shall award the contract to the lowest responsible bidder, or it may reject all bids. If no satisfactory bid is received, the department may readvertise the project. The department shall make the award in compliance with applicable federal law and the regulations promulgated under it, with this title, and in compliance with AS 37.05, and the rules and regulations promulgated under it, where they are not in conflict with this title and federal law. (§ 6 art III title IV ch 152 SLA 1957)

The purpose of this section and the Fiscal Procedures Act (AS 37.05) is not only to protect the state and the public purse from uneconomic contracts let because of failure to request competitive bids and because of possible favoritism, but also to insure that contractors are insured a certain amount of "fair play" in dealing with the state government and in competing with one another for state contracts. 1959 Op. Atty. Gen., No. 27.

The department has authority to require contractors to set up a system of prequalification of contractors as a prerequisite for bidding on state construction projects. 1959 Op. Atty. Gen., No. 27.

And under such system to require contractors to furnish periodic and financial statement. — 1959 Op. Atty. Gen., No. 27.

Without following the Administrative Procedure Act. — The department would not be required to follow the Administrative Procedure Act (AS 44.62) in adopting regulations to implement a program of prequalification of contractors. 1959 Op. Atty. Gen., No. 27.

Publication of regulations concerning bidding and letting of contracts in Administrative Code. — A policy of publishing regulations concerning bidding and letting of contracts in the Administrative Code is consistent with the Alaska Administrative Procedure Act, since these regulations are regulations in which an important portion of the public has a vital interest and since they are of great use to the portion of the public interested in dealing and contracting with the state. 1959 Op. Atty. Gen., No. 27.

Am. Jur. 2d, ALR and C.J.S. references. — 64 Am. Jur. 2d, Public Works and Contracts, §§ 63-81.

Effect of stipulation, in public building or construction contract, that alterations or extras must be ordered in writing, 1 ALR3d 1273.

Revocation, prior to execution of formal written contract, of vote or decision of public body awarding contract to bidder, 3 ALR3d 864.

The validity and construction of "no damage" clause with respect to delay in building or construction contract, 74 ALR3d 187.

Construction contract provision excusing delay caused by "severe weather", 85 ALR3d 1085.

72 C.J.S. Supplement, Public Contracts, §§ 15-17.

Sec. 35.15.060. Prior contracts unaffected [Obsolete].

Revisor's note. — This section is obsolete. It read as follows: "Sections 10-60 of this chapter do not apply to contracts entered into before April 1, 1957."

Editor's note. — The obsolete section derived from § 8 art. III title IV ch. 152 SLA 1957.

Sec. 35.15.080. Local control of state public works projects. (a) A municipality or, if the public work is an educational facility, a regional educational attendance area established under AS 14.08 may, by resolution of its governing body, request the assumption of all of the department's responsibilities relating to the planning and construction of a public works project of the state which is to be located within the boundaries or operating area of the municipality or regional educational attendance area and which would otherwise be constructed in the manner provided in AS 35.15.010. After receipt of the request, the department

(1) shall provide for the assumption by the municipality or regional educational attendance area of all of the department's responsibilities relating to the planning, design and construction of an educational facility;

(2) may provide by agreement for transfer to and assumption by the municipality of the department's responsibilities relating to the

(3) "municipality" means a general law or home rule city or organized borough, including but not limited to a unified municipality organized under AS 29.68.240 — 29.68.440. (§ 1 ch 57 SLA 1976; am § 2 ch 62 SLA 1978)

Effect of amendment. — The 1978 amendment deleted "on behalf of the state" following "rights-of-way and easements" in paragraph (1).

Chapter 20. Acquisition and Disposition of Property.

Section
10. Acquisition of land, rights-of-way, and materials by purchase or eminent domain
20. Declaration of taking
30. Acquisition of excess lands
40. Authority to condemn or acquire publicly owned property for the purpose of exchange
50. Authority to purchase property for the purpose of exchange
60. Sale of obsolete equipment and material
70. Vacating of lands or rights in land

Sec. 35.20.010. Acquisition of land, rights-of-way, and materials by purchase or eminent domain. The department, on behalf of the state and as part of the cost of constructing or maintaining a public work, may purchase, acquire, take over, or condemn under the right and power of eminent domain land in fee simple or easements which it considers necessary for present public use, either temporary or permanent, or which it considers necessary and reasonable for the public use. By the same means, the department may obtain material including clay, gravel, sand, or rock, or the land necessary to obtain the material, and the necessary land or easements to provide access to it. The department may acquire the land or material notwithstanding the fact that the title to it is in the state or a department, agency, commission or institution of the state. (§ 1 art I title IV ch 152 SLA 1957)

Cross reference. — For provisions relating to eminent domain proceedings, see AS 09.55.240 — 09.55.460.

This section and AS 35.20.020 grant to the Department of Public Works eminent domain powers, as well as the right to employ a declaration of taking in eminent domain proceedings. Tallman v State, Sup. Ct. Op. No. 862 (File No. 1612), 506 P.2d 679 (1973).

Am. Jur. 2d and C.J.S. references. — 26 Am. Jur. 2d, Eminent Domain, § 1 et seq.

29A C.J.S., Eminent Domain, § 1 et seq

Sec. 35.20.020. Declaration of taking. A declaration of taking, in the form of an order signed by the commissioner of the department, declaring that the real property, or an interest in it, or any easement is necessary for the public use of the state is sufficient to vest title in the state. However, a declaration of taking is not effective until eminent domain proceedings have been instituted in the proper court,

Right of employee of public contractor to maintain action against latter based upon statutory obligation as to rate of wages or upon provisions in that regard in the contract between contractor and the public. 144 ALR 1035.

Validity of statute, ordinance, or charter provision requiring that workmen on public works be paid the prevailing or current rate of wages. 18 ALR3d 944.

Construction and operation of "equal opportunities clause" requiring pledge against racial discrimination in hiring under construction contract. 44 ALR3d 1283.

Sec. 36.05.010. Wage rates on public construction. A contractor or subcontractor who performs work on public construction in the state, as defined by AS 36.95.010(3), shall pay not less than the current prevailing rate of wages for work of a similar nature in the region in which the work is done. The current prevailing rate of wages for each pay period is that contained in the latest determination of prevailing rate of wages issued by the Department of Labor before the end of the pay period. (§ 14-2-1 ACLA 1949; am § 1 ch 142 SLA 1972; am § 1 ch 89 SLA 1976)

Cross references. — As to wage rates for laborers and mechanics on public contracts, see AS 36.05.070.

NOTES TO DECISIONS

City's duty to publish applicable minimum wage schedules as part of bid specifications. — See notes under heading "Duty to publish minimum wage schedules," Fowler v. City of Anchorage, Sup. Ct. Op. No. 1699 (File No. 3586), 583 P.2d 817 (1978). AS 36.05.070.

Quoted in City of Sitka v. Construction & Gen. Laborers Local 942, Sup. Ct. Op. No. 2495 (File Nos. 5774, 5811), 644 P.2d 227 (1982).

Sec. 36.05.020. Basis for determining wage. A subcontract which is performed on public construction may be reduced to a basis of day labor for the purpose of determining whether or not the subcontractor or contractors have paid at not less than the prevailing scale of wage. (§ 14-2-2 ACLA 1949)

Sec. 36.05.030. Authority. (a) The Department of Labor has the authority to determine the prevailing wage, and whether or not this chapter is being violated. The department may when necessary for the enforcement of this chapter

(1) conduct investigations and hold hearings concerning wages;

(2) compel the attendance of witnesses and the production of books, papers and documents;

(3) promulgate regulations.

(b) If a person violates this chapter the attorney general shall, when requested by the Department of Labor, enforce these provisions. (§ 14-2-3 ACLA 1949; am § 2 ch 142 SLA 1972)

contractor wh
upon convicti

officer in the case of a political subdivision contract shall pay directly to laborers, mechanics or field surveyors from accrued payments withheld under the terms of the contract the wages due laborers, mechanics or field surveyors under AS 36.05.070.

(b) The state disbursing officer or the local fiscal officer shall distribute to all departments of the state government and to all political subdivisions of the state a list giving the names of persons who have disregarded their obligations to employees. No person appearing on this list and no firm, corporation, partnership or association in which the person has an interest may work as a contractor or subcontractor on a public construction contract for the state or a political subdivision of the state until three years after the date of publication of the list. If the accrued payments withheld under the contract are insufficient to reimburse all the laborers, mechanics, or field surveyors with respect to whom there has been a failure to pay the wages required under AS 36.05.070, the laborers, mechanics or field surveyors have the right of action or intervention or both against the contractor and his sureties conferred by law upon persons furnishing labor or materials, and in the proceedings it is not a defense that the laborers, mechanics or field surveyors accepted or agreed to accept less than the required rate of wages or voluntarily made refunds. (§ 3 ch 52 SLA 1959; am § 9 ch 142 SLA 1972)

NOTES TO DECISIONS

Quoted in City of Sitka v. Construction & Gen. Laborers Local 942, Sup. Ct. Op. No. 2495 (File Nos. 5774, 5811), 644 P.2d 227 (1982).

Sec. 36.05.100. Effect of AS 36.05.070 — 36.05.110 on other laws. AS 36.05.070 — 36.05.110 do not supersede or impair authority granted by state law to provide for the establishment of specific wage rates. (§ 4 ch 52 SLA 1959; am § 10 ch 142 SLA 1972)

Sec. 36.05.110. Contracts entered into without advertising. The fact that a public contract authorized by law is entered into upon a cost-plus-a-fixed-fee basis or otherwise, without advertising for proposals, does not make AS 36.05.070 — 36.05.110 inapplicable if they are otherwise applicable to the contract. (§ 5 ch 52 SLA 1959)

Sec. 36.05.120. Regulations governing contractors.

Repealed by § 17 ch 142 SLA 1972.

Editor's notes. — The repealed section derived from § 6, ch. 52, SLA 1959.

Chapter 10. Employment Preference.

Section		Section	
10.	Employment preference	40.	Application to contracts involving federal funds
20.	Apprentices	50, 60.	[Repealed]
30.	Reduction of work force		

Chapter 25. Contractors' Bonds.

Section
10. Bonds of contractors for public buildings or works
20. Rights of persons furnishing labor or material
25. Optional municipal exemption

NOTES TO DECISIONS

This chapter is modeled after the federal Miller Act. State ex rel. Palmer Supply Co. v. Walsh & Co., Sup. Ct. Op. No. 1583 (File No. 2816), 575 P.2d 1213 (1978).

Collateral references. — 17 Am. Jur. 2d, Contractors' Bonds, §§ 43-138; 64 Am. Jur. 2d, Public Works and Contracts, §§ 105-136.

72 C.J.S. Supplement, Public Contracts, §§ 41-61; 81A C.J.S., States, §§ 172-193.

Right of contractor with federal, state, or local public body to latter's immunity from tort liability. 9 ALR3d 382.

Sec. 36.25.010. Bonds of contractors for public buildings or works. (a) Except as provided in AS 44.33.300, before a contract exceeding $100,000 for the construction, alteration, or repair of a public building or public work of the state or a political subdivision of the state is awarded to a general or specialty contractor, the contractor shall furnish to the state or a political subdivision of the state the following bonds, which become binding upon the award of the contract to that contractor:

(1) a performance bond with a corporate surety qualified to do business in the state, or at least two individual sureties who shall each justify in a sum equal to the amount of the bond; the amount of the performance bond shall be equivalent to the amount of the payment bond;

(2) a payment bond with a corporate surety qualified to do business in the state, or at least two individual sureties who shall each justify in a sum equal to the amount of the bond for the protection of all persons who supply labor and material in the prosecution of the work provided for in the contract; when the total amount payable by the terms of the contract is not more than $1,000,000, the payment bond shall be in a sum of one-half the total amount payable by the terms of the contract; when the total amount payable by the terms of the contract is more than $1,000,000 and not more than $5,000,000, the payment bond shall be in a sum of 40 percent of the total amount payable by the terms of the contract; when the total amount payable by the terms of the contract is more than $5,000,000, the payment bond shall be in the sum of $2,500,000.

(b) This section does not limit the authority of a contracting officer to require a performance bond or other security in addition to those, or in cases other than the cases specified in (a) of this section.

(c) When no payment bond has been furnished, the contracting department shall not approve final payments to the contractor until the contractor files a written certification that all persons who supplied labor or material in the prosecution of the work provided for in the contract have been paid. (§ 1 ch 49 SLA 1953; am § 1 ch 77 SLA 1964; am § 14 ch 142 SLA 1972; am §§ 1, 2 ch 180 SLA 1976; am § 8 ch 277 SLA 1976; am 34 ch 108 SLA 1982)

Revisor's notes. — Subsection (a)(2) of this section has the figure of $2,500,000 as in the enrolled bill. The 1953 session laws incorrectly carried the figure as $2,800,000.

Effect of amendments. — The 1982 amendment substituted "$100,000" for "$50,000" near the beginning of the introductory paragraph of subsection (a).

NOTES TO DECISIONS

Purpose. — The purpose of this section and AS 36.25.020 is to protect persons who furnish labor or material for a state public works project from the risks of nonpayment. In exchange for providing such protection, the state is assured that material and labor will be readily furnished for its projects. State ex rel. White v. Neal & Sons, Sup. Ct. Op. No. 733 (File No. 1364), 489 P.2d 1016 (1971).

Like its federal counterpart, Alaska's statute is designed to protect persons who furnish labor or material for a state public works project from the risks of nonpayment. State ex rel. Palmer Supply Co. v. Walsh & Co., Sup. Ct. Op. No. 1583 (File No. 2816), 575 P.2d 1213 (1978).

Weight given to federal case law interpreting federal act. — In resolving disputes brought under this section, the supreme court will give more weight to principles derived from federal case law interpreting the Miller Act than to general common-law principles governing debtor-creditor relations. State ex rel. Palmer Supply Co. v. Walsh & Co., Sup. Ct. Op. No. 1583 (File No. 2816), 575 P.2d 1213 (1978).

Rights of persons furnishing labor or material. — See notes under AS 36.25.020.

Bonds required. — A payment bond as well as a performance bond is required for public contracts by this section. State ex rel. White v. Neal & Sons, Sup. Ct. Op. No. 733 (File No. 1364), 489 P.2d 1016 (1971).

Presumption. — Since under this section the awarding of the contract, and necessarily the making of payments under the contract, is conditioned upon the furnishing of a payment and performance bond, it may be concluded from the fact that payments were made under the contract that the required bond had been furnished the state. Such a conclusion is based upon the presumption that official duty has been regularly performed and that state officials would not have awarded the contract and made progress payments had the required bond not been filed. United Bonding Ins. Co. v. Castle, Sup. Ct. Op. No. 497 (File No. 876), 444 P.2d 454 (1968).

State duty to investigate validity of bonds. — The State of Alaska has the duty to investigate the validity of payment and performance bonds on state construction projects. Arctic Contractors v. State, Sup. Ct. Op. No. 1420 (File Nos. 2595, 2657), 564 P.2d 30 (1977).

For cases arising after 1972, there is no doubt about who has the duty to check the validity of public construction contract bonds, since in 1972 AS 36.05.035 was enacted, placing the burden of verifying such bonds on the state or its political subdivision. Arctic Contractors v. State, Sup. Ct. Op. No. 1420 (File Nos. 2595, 2657), 564 P.2d 30 (1977).

Although absent from this section, the burden on the contracting officer to determine the vitality of the surety can be read into the language "the contractor shall furnish to the state . . . a performance bond with a corporate surety qualified to do

business in the state..." Arctic Contractors v. State, Sup. Ct. Op. No. 1420 (File Nos. 2595, 2657), 564 P.2d 30 (1977).

Construction contractors have a continuing obligation to provide the required bonds even if the state does not discover defects in the bonds until after their acceptance. Arctic Contractors v. State, Sup. Ct. Op. No. 1420 (File Nos. 2595, 2657), 564 P.2d 30 (1977).

Burden of proof as to agency. — The purpose of this section and AS 36.25.020 is best served by placing the burden of proof as to agency on the insurance company, particularly in light of the insurance company's far superior access to the facts surrounding the agency. State ex rel. White v. Neal & Sons, Sup. Ct. Op. No. 733 (File No. 1364), 489 P.2d 1016 (1971).

Subrogation right of surety. — A surety who completes a contract or satisfies the claims of laborers and materialmen has established a subrogation right to all funds, progress payments, or retained percentages which are in the hands of the contractee. Reliance Ins. Co. v. Alaska State Hous. Auth., 323 F. Supp. 1370 (D. Alas. 1971).

Subrogation right of surety. — A surety who completes a contract or who satisfies the claims of laborers and materialmen has a superior equitable interest over one who made a loan to the contractor of monies which did not have to be applied to the construction contract. The surety, in such cases, has established a subrogation right to those funds retained by the obligee containing retained percentages. Reliance Ins. Co. v. Alaska State Hous. Auth., 323 F. Supp. 1370 (D. Alas. 1971).

The contractor or principal of the surety agreement cannot give an assignee a greater right in a retained percentage than that given the surety so long as the surety performs under the agreement. Reliance Ins. Co. v. Alaska State Hous. Auth., 323 F. Supp. 1370 (D. Alas. 1971).

Where the surety had assumed and completed the principal's contract and claimed monies due and payable to the contractor in the way of a progress payment at the time of default, and the assignee of the contractor had also made claim to the progress payment, the surety's claim to the progress payments was granted. Reliance Ins. Co. v. Alaska State Hous. Auth., 323 F. Supp. 1370 (D. Alas. 1971).

Debtor's power to designate account to which his payment should be applied. — A debtor, who is under a duty to a third person to apply funds he tenders to his creditor to a particular account, has the power to so designate that account as the one to which payment should be applied. The creditor is under a correlative duty to apply the money as directed by his debtor, even though he does not consent to the debtor's wishes. This principle does not depend upon misconduct or fraud. State ex rel. Palmer Supply Co. v. Walsh & Co., Sup. Ct. Op. No. 1583 (File No. 2816), 575 P.2d 1213 (1978).

Creditor's duty to apply payment to certain account. — Where there is sufficient evidence that a creditor knew or at least had reason to know that money received from a debtor came from a third party for application to a particular job account, the creditor was under a duty to apply the payment to such account. State ex rel. Palmer Supply Co. v. Walsh & Co., Sup. Ct. Op. No. 1583 (File No. 2816), 575 P.2d 1213 (1978).

Cases interpreting the Miller Act hold that when a creditor knows, or has reason to know, that the money paid to him is received from a particular bonded project, it is the creditor's duty to apply the payment received against the account for that project. State ex rel. Palmer Supply Co. v. Walsh & Co., Sup. Ct. Op. No. 1583 (File No. 2816), 575 P.2d 1213 (1978).

State did not waive right to require replacement bonds. — State did not waive its right to require and was not estopped from requiring the contractor on a 1962 construction project to obtain new bonds as replacements for bonds found defective after they had been accepted by the state and after the contractor had commenced work. Arctic Contractors v. State, Sup. Ct. Op. No. 1420 (File Nos. 2595, 2657), 564 P.2d 30 (1977).

Collateral references. — What is "accident" within provision of bond or contract indemnifying against damage or injury to person or property by accident in performance of building or construction contract. 12 ALR 1409.

Validity of condition in bond of contractor for public work which is beyond requirements of statute or ordinance with respect to claims of third persons. 18 ALR 1227.

Sec. 36.25.020. Rights of persons furnishing labor or material. (a) A person who furnishes labor or material in the prosecution of the work provided for in the contract for which a payment bond is furnished under AS 36.25.010 and who is not paid in full before the expiration of 90 days after the last day on which the labor is performed or material is furnished for which the claim is made, may sue on the payment bond for the amount unpaid at the time of the suit.

Chapter 95. General Provisions.

Section
10. Definitions

Sec. 36.95.010. Definitions. In this title unless the context requires otherwise.

(1) "contractor" means the contractor including subcontractors performing work necessary to facilitate public construction;

(2) "laborer, mechanic, or field surveyor" means a person who engages in work which is basically physical or unskilled in nature; or who engages in work, requiring the use of tools or machines, which basically consists of the shaping and working of materials into some type of structure, machine or other object; or who engages in outdoor tasks related to the operation of findings and delineating contour, dimensions, position, topography, as of any part of the earth's surface, by preparation of measured plan or description of any area or other portion of country or of road or line through any area or other portion of country;

(3) "public construction" or "public works" means the on-site field surveying, erection, rehabilitation, alteration, extension or repair, including painting or redecorating of buildings, highways or other improvements to real property under contract for the state, a political subdivision of the state, or a regional school board with respect to an educational facility under AS 14.08.161;

(4) "qualified" means a person who, except for apprentices, is a journeyman mechanic in that person's particular trade;

(5) "resident" means a person who maintains a domicile in the state; domicile is the true and permanent home of a person from which that person has no present intention of removing and to which that person intends to return whenever away from that home;

(6) "state or a political subdivision of the state" means any state department, state agency, state university, borough, city, village, school district or other state subdivision;

(7) "wages" includes fringe benefits;

(8) "retainage" means money withheld from a contractor until completion of a contract or satisfaction of other contingency as evidenced by approval of the applicable pay estimate. (§ 16 ch 142 SLA 1972; am § 3 ch 89 SLA 1976; am § 16 ch 14 SLA 1978; am § 2 ch 85 SLA 1982)

Effect of amendments. — The 1978 amendment, in paragraph (3) deleted "or" following "for the state" and added "or a regional school board with respect to an educational facility under AS 14.08.161" to the end.

The 1982 amendment, effective July 1, 1982, substituted "this title" for "AS 36.05 — 36.25" in the introductory language and added the definition of "retainage" in paragraph (8).

Sec. 44.42.010. Commissioner of transportation and public facilities. The principal executive officer of the Department of Transportation and Public Facilities is the commissioner of transportation and public facilities. (E.O. No. 39, § 2 (1977))

Sec. 44.42.020 Powers and duties. (a) The department shall

(1) plan, design, construct and maintain all state modes of transportation and transportation facilities and all docks, floats, breakwaters, buildings and similar facilities;

(2) study existing transportation modes and facilities in the state to determine how they might be improved or whether they should continue to be maintained;

(3) study alternative means of improving transportation in the state with regard to the economic costs of each alternative and its environmental and social effects;

(4) develop a comprehensive, long-range intermodal transportation plan for the state;

(5) study alternatives to existing modes of transportation in urban areas and develop plans to improve urban transportation;

(6) cooperate and coordinate with and enter into agreements with federal, state and local government agencies and private organizations and persons in exercising its powers and duties;

(7) manage, operate, and maintain state transportation facilities and all docks, floats, breakwaters and buildings, including all state highways, vessels, railroads, pipelines, airports, and aviation facilities;

(8) study alternative means of transportation in the state, considering the economic, social, and environmental impacts of each alternative;

(9) coordinate and develop state and regional transportation systems, considering deletions, additions, and the absence of alternatives;

(10) develop facility program plans for transportation and state buildings, docks and breakwaters required to implement the duties set out in this section, including but not limited to (A) functional performance criteria; and (B) schedules for completion;

(11) supervise and maintain all state automotive and mechanical equipment, aircraft, and vessels, except vessels and aircraft used by the Department of Fish and Game or the Department of Public Safety;

(12) supervise aeronautics inside the state, under AS 02.10;

(13) complete and maintain a current inventory of public facilities, including a projection of the serviceability of the facilities and projections of replacements and additions to facilities needed to provide the level of services programmed by the various user agencies, for municipalities with populations of less than 12,000 and for unincorporated communities, and perform those duties on a cooperative basis with larger municipalities;

(14) adopt energy performance standards for public facilities of the state, the construction of which begins after July 1, 1980; the standards shall be based on thermal and lighting energy standards established by the American Society of Heating, Refrigeration and Air Conditioning Engineers as adapted for application in high latitude, cold climate environs;

(15) provide planning assistance, including but not limited to energy audits and related technical services, to school districts and regional educational attendance areas to develop and implement

(A) standards for the design, construction and operation of rural educational facilities; and

(B) energy conservation measures for rural educational facilities.

(b) The department may

(1) engage in experimental projects relating to available or future modes of transportation and any means of improving existing transportation facilities and service;

(2) exercise the power of eminent domain, including the declaration of taking as provided in AS 09.55. (E.O. No. 39, § 2 (1977); am § 13 ch 168 SLA 1978; am § 12 ch 83 SLA 1980; am E.O. No. 50, § 10 (1981))

Cross references. — For the responsibility and authority of the supreme court over state court facilities, see AS 22.05.025.

Effect of amendments. — The 1980 amendment added paragraphs (14) and (15) to subsection (a).

The 1981 amendment, in subsection (a), deleted "communication facilities" following "transportation facilities" in paragraph (1), deleted "and communication facilities" following "modes and facilities" in paragraph (2), deleted "and communication" following "improving transportation" in paragraph (3), deleted "communication facilities" following "transportation facilities" in paragraph (7), deleted "and communication facilities" following "plans for transportation" in paragraph (10), deleted "and" at the end of paragraph (11), deleted "and communications" following "aeronautics" and substituted a semicolon for a period near the end of paragraphs (12) and (13). The amendment also deleted "and communication" following "facilities and service" in paragraph (1) of subsection (b).

Sec. 44.42.030. Regulations. The department may adopt regulations under the Administrative Procedure Act (AS 44.62) to implement, interpret, or make more specific its powers and duties. (E.O. No. 39, § 2 (1977))

Sec. 44.42.040. Departmental organization. The commissioner shall establish regions within the state. The functions of the department within each region shall be performed, to the maximum extent

RE: SB 450, Iliamna-Nondalton Intertie

The Iliamna-Nondalton Intertie has been an on-going state road project since the 1970s. In 1983 the Legislature appropriated $1,500,000 to begin construction of Phase I and another grant of $3,021,000 in 1984 for Phase II.

SB 450 would make a special appropriation of $9,000,000 to complete Phase III and IV of the project.

Phase III and IV would consist of bridge construction on the Newhalen River, estimated at $3.2 million with the remainder of the funds used for excavation, final dressing work and inspection and acceptance.

Without the additional appropriations the communities of Iliamna and Nondalton will be left with a uncompleted road, ending at the Newhalen River. This pioneer road can only be used in the winter, when the river is frozen over.

This road is especially important to the Nondalton community. A linkage to Iliamna will lower transportation costs substantially, since the airport at NonDalton cannot accommodate large aircraft due to runway length. Freight must be broken down at the Iliamna airport and loaded on smaller aircraft. This process adds significant costs to Nondalton's freight. Also Medivac aircraft cannnot land at Nondalton.

Attention: Thelma Cutler
Program Budget Analyst

Re: Capital Project Priorities

Dear Ms. Cutler:
d
The following is a list of the capital projects prioritized by the Nondalton City Council.

1. Iliamna-Nondalton Intertie. This project is our road project which will connect the Iliamna Airport to Nondalton. This project will remain a high community priority until completion as it will be a vital part of our transportation link to economic well-being of our community. Planning, design and cost estimates for the next phase are complete and will follow this letter.

2. Erosion Control. We received $50,000 in FY'85 for this project which will be used to plan and estimate costs to further prevent erosion in our city. More funds will be needed to do the actual work to control our erosion problem. Planning, design and cost estimates will follow when complete.

3. ~~Nondalton City~~ Hall Building. This building was built with funds from Municipal Assistance which, as you know, has been left unfunded by the legislature. There is currently $80,000 worth of work left to be done to this building before it is complete. Part of this is also landscaping to return the earthwork done back to its original condition. Planning, design and cost estimates will follow.

4. Water & Sewer. Additional funding for this project would hade all existing homes and businesses in the city on a water and sewer system. Public Health Service is currently connecting new HUD (U. S. Dept. of Housing and Urban Development) and BIA (Bureau of Indian Affairs) homes into the existing system, and, also, upgrading this existing system. Planning, design and cost esti-

mates can be obtained from Mr. Larry Lockyer, District Engineer; Environmental Health Branch; 701 C Street, Box 65; Anchorage, Alaska 99513.

5. Small Hydro Project. This project would be to utilize a creek for electrifying our water and sewer system. The cost of running our present system is high so if we could run it off a small creek near the village the cost would be reduced drastically. Planning, design and cost estimates are not available at this time.

Thank you for your time and consideration of the above capital projects priorities as defined by the Nondalton City Council.

Sincerely,

Lydia K. Wilson
Mayor

January 30, 1985

To: Rep. A. Herrmann
Sen. F. Zharoff
Office of the Governor

Ref: Capital Appropriation Request

Pursuant to your letter of January 21, 1985, the Council of the Municipality of Nondalton has established the following priorities for FY 85/86.

1. Phase 3 of the Iliamna Nondalton Inter-Tie Road Project. Including bridge installation and substantial completion of the project. Total funding required is $6.2 million dollars. Project equipment is on-site and Phase 2 will be completed by June 30, 1985.

2. Erosion Control for municipal roads, embankments and streams to eliminate the continued filling of the Nondalton Bay in Six Mile Lake. Funding requirement of $250,000. An expenditure in this amount at this time for hydroseeding equipment and supplies will eliminate a major dredging/containment program five years from now which could cost 10 to 20 times this prevention expense.

3. Municipal Hall Completion, consisting of interior finishes on the lower level, site work and exterior sealing and painting. Total funding required is $80,000.

4. Mini-Hydro Site Study. Two streams within the city limits have the potential to be developed into mini-hydro site with no significant impact to the fishery or the surrounding environment. We would like these sites studied to determine the feasibility of these site being used to offset municipal operating electrical costs.

Your time and consideration of these appropriations is greatly appreciated. Mr. James D. Wilson and Mr. Duffy Jackinsky, both Councilmen and former Mayor's, will be acting on our behalf this year in Juneau during the legislative process. If either myself or our staff can be of help or if you require additional information please do not hesitate to contact me.

Cooperatively yours,

Duffy Jackinsky

February 20, 1986.

Senator Fred Zharoff
P.O. Box V
Juneau, Ak. 99811

Dear Fred,

Thank you for introducing ~~the~~ SENATE 450 Bill which would appropriate funds to complete the ~~Iliamna~~ Nondalton Intertie. As a resident of Nondalton and as a member of the Nondalton City Council, here are some of the reasons that I think the bill should pass and the benefits the community will enjoy.

1. Fuel Costs: The original purpose of the road was to lower fuel costs. In 1975, when I first moved here, it was possible to buy a 55 gallon drum of gasoline for $40.00. That same 55 gallon drum can cost as much as $220.00 now. If the road were completed it would be possible for petrolium products (regular and avaition gas, heating oil, and lubercating oil mainly) to be barged up the Kvichak River To Iliamna or Newhalen and trucked to Nondalton at a savings of over $2.00/gal. We do have a bulk fuel storage here in the city but because of the prohibitave cost of flying oil and gas, or barging-trucking-barging fuel we have never been able to utilize the tanks to their full potential.

2. Local Hire: All of the heavy equipment operators who are working on the road project are residents of the Iliamna, Newhalen, Nondalton area. Many of our local residents depend solely on seasonal incomes from Bristol Bay fishing or firefighting for income. Passing the bill would insure the operators and laborers of a steady income until the completion of the project. Beyond the short term employment, the training and experience gained while working on the road would enable them to either seek employment elsewhere as trained operators or to work on other construction projects in the surrounding area.

3. Freight Costs: Other than local subsistance meat, fish, and berries, all food is flown in to Nondalton from Anchorage via Iliamna. The same is true of clothing, building materials and other essentials. The savings to residents, local business, school district and post office would be quite substantial if it were possible to truck from the Iliamna airfield rather than fly the freight and mail.

4. Airfares: It is presently cheaper to fly from Anchorage to Seattle than from Nondalton to Anchorage; again the double hauling of passengers. The road would benefit residents of the area, school district personnel, tourists, government officials and other travelers as it would be less expensive to travel by land than air.

5. Safety: Each year we must play our version of Russian Roulette when crossing Six Mile Lake or Newhalen River on the ice and each year someone loses and goes through the ice. We have been very fortunate that no lives have been lost recently, but a bridge would insure that no loss of life would occur while crossing the river. Another safety feature would be the possibility of transporting Med-evac patients from Nondalton to Iliamna. Our field here is not long enough for a Lear Jet to land so if the weather is bad a patient has to wait to get to the Med-evac plane.

6. Education: With the decreasing oil revenues and the possibility of a new funding formula for school districts it seems inevitable that our Local Regional School District will have less money to spend educating a growing population of students. The school district would save on the hauling of passengers and freight which is presently done by air. Another possible solution of saving money would be a centralized high school. Students from the three communities at a lower cost and better quality.

7. Future Local Economic Development: Nondalton has been designated Gateway to Lake Clark National Park. As there is no scheduled air transportation from Nondalton to Anchorage it is possible that the Gateway could be bypassed. We have a Doll Factory which is staffed by local people. More people passing through would mean more local sales. The local store, post office and lodges would also benefit. Individuals with property, boats, snowmachines, off road vehicles could increase sales and services or create business opportunities that do not now exist. The boat owners who have Bristol Bay Drift vessels could store them in their backyards instead of paying some boat storage facility in the Bristol Bay area as much as $2,000.00 per winter.

8. The City of Nondalton, as contractor for the road, has invested in heavy equipment for the road project. If we do not receive additional funds we will most likely have to sell the equipment. It would be much cheaper to continue to completion, rather than a yearly start up close down proceedure with the uncertainty of additional state appropiations.

I suppose the list of advantages for the Intertie and the benefits which would follow could go on and on but these are the most important that come to mind. Of course there is the other side of the picture...those who do not want the road. The most obvious are the Air Taxi operators and lodge owners. In all likelyhood they will adjust to the increased flow of people and benefit with more customers.

Well, guess that's the brunt of the wind in my sails. Would like to thank you for assisting our delegation from Nondalton, as well as the favor you did for me personally, while we were down in Juneau...and of course, also, introducing the Bill for completing the Intertie.

Sincerely,

Adolph W. Jackinsky

ILIAMNA-NONDALTON INTER-TIE

MUNICIPAL STATUS REPORT

In 1983, the Legislature appropriated $2,000,000 for the INIT project. The major planning decisions of the project were based on this amount. Despite various promises, $500,000 was chopped from this budget at the last possible minute. INIT was left with the responsibility of completing $2,000,000 of work, with only $1,500,000. All plans were modified immediately and cost became the major concern. The work was completed on schedule and within budget and the DOT/PF audit has been completed.

For 1984, the City of Nondalton's first pricrity was Phase II funding of the INIT project. This effort was supported by INNEC, in the non-profit arena, and by various private industry efforts in the region. The net result was a total funding of $3,000,000 for Phase II.

As was anticipated, the Newhalen municipality and communities of Iliamna and Pedro Bay had other higher priorities for their constituency (voters) and having already helped Nondalton with the initial funding of Phase I, in 1983, had to move on to their own local projects. The City of Nondalton has not forgotten the assistance given by the many people and organizations during that period.

As the only municipality with the INIT project in its top three (3) priorities, the City requested the grant assumption under AS 35.15.080 (a)/(b) from DOT/PF. A Transfer of Responsibility Agreement (TORA) was entered into last month making the City of Nondalton responsible for the work and the accounting.

As a result of this TORA the following is a brief outline of the intended municipal project guidelines.

PHILOSOPHY: During the early stages of a major project it is usually "Paper Driven" because the planning, engineering, permits etc. must be done. This portion of the INIT project was Phase I. Phase II will be "Work Driven" with the primary emphasis on moving dirt, building bridges and installing culvert.

FINANCIAL: The municipal approved project budget is attached. In general, the city will expend about $1,800,000 for this season and in preparation for 1985. The remaining $1,200,000 will be expended next spring as soon as weather allows construction to begin. It is anticipated that this will be sufficient to carry the project forward into September, 1985 when Phase III funding will be available.

EQUIPMENT: The City intends to use whatever equipment is locally available, provided that the rates charged are equitable to the equipment's ability to work. Certain large pieces of equipment will be purchased by the City for use on the project, with the intent that any surplus equipment at the end of the job will be sold locally pursuant to the requirements of AS Title 29. The City does not intend to purchase duplicate equipment to that in the region. The determination of the ability of the equipment to work and the equipment's operators will be made by the Project Superintendent, Donald Wright.

PAYROLL: Payroll will be weekly with a one week delay for all INIT project personnel. There will be no advances, normal overtime procedures for work in excess of 40 hours per week will apply. The work week will begin at 0001 each Monday morning and end at midnight on Sunday night.

EMPLOYMENT STATUS: As with all City of Nondalton municipal personnel, all project employees will be employees of NELCOR, and affiliate of the National Employee Leasing Corporation. These employees will be on lease to the municipality. The NELCOR program will include health insurance benefits, workmen's compensation, and a Federally approved 7.5% tax free, pension program in which employees are immediately vested. The NELCOR account will carry approximately six weeks salaries in a payroll account to insure that no delays occur in meeting the pay periods.

PROJECT HOURS: The initial working hours will be 10 hours per day, 6 days per week. This may change to fewer hours, pending weather. Hours will be set by the Project Superintendent.

ACCOUNTING & ADMINISTRATION: These functions will be performed at the municipal offices at Nondalton and Anchorage and at the Iliamna/Newhalen field offices as determined appropriate. An independent CPA accounting firm has been retained by the City to advise on accounting and audit proceedures.

LEGAL COUNSEL: The Municipality has retained Mr. Dave Walsh, Esq., as legal counsel. Mr. Walsh has considerable hands-on experience running a municipality, elections, municipal authority, and other background essential to a growing area.

FACILITY COORDINATION: Over the past three (3) years the municipality has done considerable work to find and activate the remaining ingredients necessary for regional economic independence, through the offices of the Facility Coordinator. Considering the long term successes of the INNEC, LPSD and others, our contract with NNC will be continued.

PROJECT SUPERINTENDENT: Don R. Wright, 33 years of road construction experience 10,000 hours operating cats, scrapers, backhoes etc., has moved over 6,000,000 million yards of dirt. Started and operated Alaska's largest equipment training program. AFN Chairman, ANSCA Settlement etc. His analysis of project performance, employment, contracts, and on-the-job decisions are final.

PROJECT SUPERVISOR: Harry E. Carter, 31 years administrative experience with village corporations, state government, AFN, Federal government, private industry etc. His determinations on administrative matters of how things get done on the project are final.

SAVINGS PROGRAM: The municipal economic planning studies show that one of the major components neessary during this stage of economic growth is the

establishment and implementation of an area wide savings program. This allows for the build-up of capital which in turn finances private industry, thus moving the area from dependence upon government programs into active participation in the financial world. The municipality will lead this program through its employee pension plans.

AUTONOMY: Upon completion of the INIT project, there will be a sufficiently large enough number of people interacting, that autonomy of certain groups will begin to occur. This can result in poor communications and a breakdown in the organizational structure, or may be utilized to stimulate economic independence.

ADVISORY COMMITTEE: The municipality recognizes that while it may be a catylst in the funding process, that its activities effect many. The purpose of the committee will be to receive input from private business, renewable resource managers, leaders of the government infrastructures, and other interested regional residents and leaders. It is hoped that the members of the Advisory Committee will keep the appropriate members of their autonomous groups informed on the matters of this project.

Attending Advisory Committee members will receive a stipend of $40.00 per meeting plus associated travel costs to the location of the meeting. Attendance is by invitation only and is anticipated to be every two months.

In accordance with the direction of the City Council Of Nondalton, and the power vested in the Office of Mayor thereof, the following Advisory Committee members are hereby appointed, subject to their acceptance of the position.

Ricky Delkittie, Maypr

CENTRAL REGION DESIGN & CONSTRUCTION

NONDALTON-NEWHALEN ROAD PROJECT
AUGUST 30, 1984

I. Project Scope

A. SLA 82/81 - 15.5 mile length; 20' width per AASHTO local road standards.

B. FY'83 Supplemental - Pioneer Road between Newhalen and Nondalton. Administered as grant.

II. Project History/Funding History

1972 - FHWA funding: Road construction project identified which included 7 miles of road between Newhalen and Iliamna and a new 18 mile road between Iliamna Airport and Nondalton.

1975 - Public Hearings: The Village of Nondalton was opposed to project. The Iliamna-Nondalton road portion of the project was eliminated. Limited turnout at public hearings.

1981 - SLA 82/81: $150,000 appropriated to update Design Field Survey and material work accomplished. Significant amount of design work remained to be done.

1982 - Public hearings: Overwhelming public support for the project. Communities urged DOT&PF to pursue acquisition of construction funds.

1983 - SLA 10/83: $1,000,000 for Pioneer Road construction.

1983 - Senate proposed FY'84 Capital Budget: $1,500,000 State match for FHWA road construction.

III. 1983 - SLA 107/83/75/17: The proposed $1,500,000 was reduced to $500,000 for the following reasons:

- $1.0 million has already been appropriated in SLA 10/83. It was felt that an additional $1.5 million could be used within the same fiscal year.

- Wanted to keep the community efforts going but also wanted to determine total cost of project, what standard of facility should be constructed who should have responsibility for completing project, and when project should be funded for completion.

IV. May 1983 - Executed transfer of responsibility agreement with City of Nondalton for 1.0 M to construct Pioneer Road 15.5 miles from Newhalen to proposed site of bridge crossing.

October 1983 - TCRA amended to 1.4 M.

June 1984 - First phase of project complete audit by DOT&PF.

July 1984 - Legislative funding:

CH 24	SLA	1984	$1,000,000
CH 171	SLA	1984	$1,500,000
CH 171	SLA	1984	$ 500,000

July 1984 - Executed TCRA with City of Nondalton for $15,000 for city to provide DOT&PF with proposal for use of 3.0 M for second phase of project.

August 1984 - DOT&PF received plans and proposal for second phase of project. Plans include stabilization of 15.5 miles of Pioneer Road; update bridge design and refurbish bridges for Newhalen River; purchase and installation of culverts and small bridge for Alexie Creek.

August/
September 1984 - DOT&PF will review plans; concur on scope of work; establish payment schedule; execute TCRA for 3.0 M.

SB

458

TESTIMONY TO SENATE TRANSPORTATION COMMITTEE
SB 458
March 5, 1986

Chairman Coghill and members of the Senate Transportation Committee, my name is Bob Jacobsen and I am here today as President of the Alaska Air Carriers Association. I would like to thank you for your willingness to deal with these small but important technical amendments to HB 133 enacted last year.

Very simply, the bill before you today (SB 458) is deemed necessary by the Division of Weights and Measurement Standards to adequately enforce the law which requires commercial air carriers to maintain at least $150,000 per seat in liability insurance ($300,000 for scheduled carriers). Statistics provided to you by the Division early this session indicate a less than satisfactory level of compliance based on the initial letters of notice to commercial carriers.

We have submitted as part of your committee packet a sectional rationale for each provision, and if you wish, I will go through each of the proposed changes with you.

As you are aware, the fiscal note for HB 133 last session was not funded, accounting, in part, for low compliance to date. The Governor has requested about $100,000 in his FY 87 operating budget for this program, and we urge you to support the request.

I would also like to take this opportunity to briefly mention our industry's serious problem with insurance rates. While we maintain our strong support for the minimum insurance requirements as a condition of business, we are having the same problems with dramatic escalation of rates as most other industries. We have lost several members during the last year due to bankruptcies or failure to obtain insurance at rates which would permit an operating profit. Others are on the verge of collapse.

If you want to help maintain viable air transportation in the future, we strongly urge your support of SB 377 this session.

Thank you for the opportunity to testify, and for your attention to our concerns.

Amendment 1 (Sec. 42.30.200(c)) specifically authorizes the Department of Commerce to stop aircraft from carrying passengers for hire until they secure the minimum required liability insurance. It also authorizes the Department to conduct investigations if necessary to find violators.

Amendment 2 (Sec. 42.30.200(e)) increases the size and severity of a fine to an air carrier who flies passengers for hire without first securing the minimum insurance levels required by HB 133 ($150,000 per seat). Without a more strict penalty, carriers may find it cheaper to ignore the law than to comply.

Amendment 3 (Sec. 42.30.225(b)) allows the insurance "certificate of compliance" to be posted in a visible location other than in the aircraft. This would be particularly helpful to the jet carriers which often interchange planes, thus making it difficult to post certificates in the aircraft. It would also reduce the cost of a certificate from $50 to $25.

Amendment 4 (Sec. 42.30.225(e)) provides specific authority to issue stop use orders if a carrier is operating without a state certificate of insurance.

Amendment 5 (Sec. 42.30.225(d)) provides for a specific penalty for a carrier who fails to obtain a certificate of insurance from the State.

Amendment 6 (Sec. 42.30.380(3)) clarifies the definition of aircraft to include rotor devices (helicopters).

RE: SB 458

This bill adds enforcement capabilities to the legislation passed last year setting up insurance requirements and certificates of compliance for air carriers.

Sect. 1 (c) allows the Department of Commerce and Economic Development, Division of Weights and Measures to investigate possible violations of financial responsibility requirements. It also enables DCEC to issue a stop work order when it is found that the air carrier is in noncompliance.

Sect. 2 (e) defines the penalties for violating the insurance requirements. The current penalty, a Class B misdemeanor, is upgraded to a Class A. The fine is increased from a minimum of $500 to a minimum of $1000 with the maximum fine to be $5000 per day of violation. The fine has been capped at $10,000 for each violation.

Sec. 3 amends AS 42.30.225 (b) and lowers the annual fee for the certificate of compliance from $50 to $25.

Sec. 4 amends AS 42.30.225 (e), dealing with certificates of compliance, and allows the Department to investigate whether an air carrier has a certificate of compliance. If not in compliance, the department may issue a stop work order.

Sec. 5 adds a new subsection to AS 42.30.225. The penalty for violating the certificate of compliance requirement is a Class B misdemeanor and may be fined not less than $500 or no more than $1000.

Sec. AS 42.30.380(3), a definition section, is amended to add rotor craft to the definition of aircraft.

PURPOSE

The purpose of the certification of compliance of air carriers is to provide the assurance that all persons who carry passengers or freight for commercial purposes intrastate in an aircraft, comply with the provisions in AS 42.30.200 and AS 42.30.225.

These provisions specify that the identified persons procure and maintain minimum amounts of insurance security and that the aircraft used for these purposes must be in compliance with federal safety regulations.

WHO DOES IT APPLY TO

AS 42.30.200 states that a person who carries passengers or freight for commercial purposes intrastate in an aircraft shall procure and maintain security as specified. For purposes of filing with the Department of Commerce and Economic Development, this paragraph is interpreted to mean those aircraft operating intrastate under Federal Aviation Administration regulations part 121 and 135.

AS 42.30.225 further requires that an annual certificate of compliance be obtained before a person uses an aircraft in air commerce.

In defining the applicability of the provisions of AS 42.30.200 - 42.30.380:

1. "air carrier" means a person undertaking to engage in air commerce, whethe directly or indirectly, or by lease, contract, or any other arrangement and whether over regular or irregular routes;

2. "air commerce" means carriage by aircraft of persons or freight for commercial purposes or hire in intrastate commerce, including the carriage by aircraft of persons or freight that move partly by aircraft and partly by other forms of transportation;

3. "aircraft" means a propeller or jet powered device used or designed for flight in the air;

4. "commercial purposes" means activities for which the person receives direct monetary compensation and does not include activities incidental to and done in furtherance of the persons primary business.

5. "freight" means commodities, articles, and cargo of whatever nature or value excluding garbage and trash.

REQUIREMENTS

A person who carries passengers or freight for commercial purposes intrastate in an aircraft must maintain the following minimum security:

1. $150,000 per seat for bodily injury or death in a single occurrence; and

2. $100,000 for property damage in a single occurrence.

Evidence of insurance must be filed with the Department of Commerce and Economic Development, Division of Measurement Standards, and may not be cancelled on less than 30 days written notice to the Division of Measurement Standards. This notification of cancellation must be clearly stated in the policy or endorsement for an insurance policy submitted as proof of financial responsibility. This 30 day notice period is measured from the date on which the Division of Measurement Standards receives notice.

A person may not use an aircraft in air commerce before obtaining an annual certificate of compliance for that aircraft from the Department of Commerce and Economic Development, Division of Measurement Standards. The application for the certificate of compliance must include:

1. proof of financial responsibility in the amounts previously identified;

2. a copy of the Federal Aviation Administration's air carrier operating certificate, for each aircraft;

3. a Federal Aviation Administration certificate to operate if you are a scheduled air carrier; and

4. a $50.00 annual fee for each aircraft being certified.

PROCEDURES

1. Complete an application for a certificate of compliance.

2. Attach copies of all required documents as outlined on the application.

3. Include the $50.00 annual fee for each aircraft.

4. Mail complete application package to:

Division of Measurement Standards
P.O. Box 111686
Anchorage, Alaska 99511

INSTRUCTIONS
APPLICATION FOR
ALASKA AIR CARRIERS CERTIFICATE OF COMPLIANCE

1. Name of the individual making application.

2. Name of business.

3. Mailing address. If the operating location is different, please specify.

4. Date of application.

5. Business telephone number.

6. List those aircraft that are used intrastate in Federal Aviation Regulations part 121 and 135 operation. Do not list those aircraft that are used in parts 61, 91, and 141 operations.

   Aircraft Description:
   Type of aircraft; make and model.

   Passenger Configuration:
   Number of passengers the aircraft is configured to carry. If aircraft is used for freight only, so designate. (AS 42.30.200(a) requires $150,000 per seat for bodily injury or death and $100,000 for property damage.)

   FAA Registration Number:
   Federal Aviation aircraft registration number.

7. The total number of aircraft listed in #6. If an addendum sheet is used, include total from #6 plus total from addendum sheet in this section.

8. AS 42.30.225(a). A person may not use an aircraft in air commerce before obtaining an annual certificate of compliance for that aircraft from the Department of Commerce and Economic Development, Division of Measurement Standards.

   AS 42.30.225(b). The annual fee for a certificate of compliance is $50.00.

   Multiply the number of aircraft listed in #7 times $50.00. Place that result in section #8. Enclose that amount with the application.

9. Attach a copy of the Federal Aviation Administration's, Air Carrier Operating Certificate, form number 8430-18.

10. Attach a certificate of insurance or have the insurance company mail the certificate direct. A telex message can be used for temporary verification while waiting for the original certificate. A certificate of compliance cannot be issued without proof of insurance per AS 42.30.225(1).

11. For State Use Only - Do Not Fill In. This form will be returned to you with this section filled in and all required certificates attached.

ORIGINAL AND ONE COPY OF ALL FORMS TO BE RETURNED TO THE DIVISION OF MEASUREMENT STANDARDS

Sec. 42.30.200. AIR CARRIER FINANCIAL RESPONSIBILITY. (a) A person who carries passengers or freight for commercial purposes intrastate in an aircraft shall procure and maintain security in the following minimum amounts:

(1) Liability for bodily injury or death of persons:

A limit of at least $150,000 for any one person in any one occurrence and a limit for each occurrence in any one aircraft of at least an amount equal to the sum produced by multiplying one hundred fifty thousand dollars ($150,000) by seventy five percent (75 percent) of the total rated seating capacity of the aircraft. [$150,000 PER SEAT FOR BODILY INJURY OR DEATH IN A SINGLE OCCURRENCE; AND]

(2) Liability for loss of or damage to property:

A limit of at least one hundred thousand dollars ($100,000) for each occurrence. [$100,000 FOR PROPERTY DAMAGE IN A SINGLE OCCURRENCE]

(b) Evidence of security required under (a) of this section shall be filed with the department and must be

(1) a policy or certificate of insurance issued by an insurer acceptable to the department; or

(2) a bond of a surety company licensed to write surety bonds in the state; or

(3) evidence accepted by the department, showing ability to self-insure; or

(4) other security approved by the department.

(c) The department may authorize department personnel to enforce this section and may adopt procedural regulations necessary to implement this section.

Commerce's Proposed Changes to AS 42.30.200, .205, 380 - (Air carrier financial responsibility)

(d) A policy of insurance, surety bond, or other form of security may not be cancelled on less than 30 days written notice to the department. This requirement must be clearly stated in the policy or endorsement for an insurance policy submitted as proof of financial responsibility under AS 42.30.225(a)(1). The 30 day notice period is measured from the date on which the department receives notice.

(e) A person who violates [(a) OF] this section is guilty of a class [B] A misdemeanor and is punishable by a fine of not less than [$500] $1,000 or more than [$1,000] $5,000.

Sec. 42.30.225. CERTIFICATION OF COMPLIANCE OF AIR CARRIERS. (a) A person may not use an aircraft in air commerce before obtaining an annual certificate of compliance for that aircraft from the department. The department shall issue or renew a certificate of compliance upon application and presentation of

(1) proof of financial responsibility required under AS 42.30.200;

(2) proof of compliance with Federal Aviation Administration requirements, and, where applicable, federal certification for scheduled airline service.

(b) The annual fee for a certificate of compliance is $50. The certificate is valid for a period of 12 months following the date of certification. The certificate shall be displayed [ON THE AIRCRAFT] so that it [IS] is visible to boarding passengers.

(c) The department may investigate complaints or violations of this section and conduct other investigations that the department considers appropriate and advisable to develop information on possible violations of AS 42.30.200 or AS 42.30.225 and may, upon completion of this investigation

where a violation of AS 42.30.200(a) exists, issue a stop use order. [USE OF AN AIRCRAFT IN AIR COMMERCE BEFORE OBTAINING A CERTIFICATE OF COMPLIANCE REQUIRED UNDER (a) OF THIS SECTION MAY BE CAUSE FOR DENIAL OF THE CERTIFICATE]

(d) A person who violates this section is guilty of a class B misdemeanor and is punishable by a fine of not less than $500 or more than $1,000. [A PERSON WHO HAS OBTAINED A CERTIFICATE TO USE AN AIRCRAFT IN AIR COMMERCE FROM THE ALASKA TRANSPORTATION COMMISSION BEFORE THE EFFECTIVE DATE OF THIS ACT IS NOT REQUIRED TO OBTAIN A CERTIFICATE OF COMPLIANCE UNDER (a) OF THIS SECTION UNTIL THE DATE THE INSURANCE POLICY FOR THE AIRCRAFT IS RENEWED]

(e) The department may authorize department personnel to enforce this section and may adopt procedural regulations necessary to implement this section.

Sec. 42.30.380. DEFINITIONS. (a) In AS 42.30.200 - 42.30.380,

(1) "air carrier" means a person undertaking to engage in air commerce, whether directly or indirectly, or by lease, contract, or any other arrangement, and whether over regular or irregular routes;

(2) "air commerce" means carriage by aircraft of persons or freight for commercial purposes or hire in intrastate commerce, including the carriage by aircraft of persons or freight that move partly by aircraft and partly by other forms of transportation;

(3) "aircraft" means a propeller, rotor or jet powered device used or designed for flight in the air;

(4) "commercial purposes" means activities for which the persons receives direct monetary compensation and does not include activities incidental to and done in furtherance of the person's primary business;

TESTIMONY TO SENATE TRANSPORTATION COMMITTEE
SB 458
March 5, 1986

Chairman Coghill and members of the Senate Transportation Committee, my name is Bob Jacobsen and I am here today as President of the Alaska Air Carriers Association. I would like to thank you for your willingness to deal with these small but important technical amendments to HB 133 enacted last year.

Very simply, the bill before you today (SB 458) is deemed necessary by the Division of Weights and Measurement Standards to adequately enforce the law which requires commercial air carriers to maintain at least $150,000 per seat in liability insurance ($300,000 for scheduled carriers). Statistics provided to you by the Division early this session indicate a less than satisfactory level of compliance based on the initial letters of notice to commercial carriers.

We have submitted as part of your committee packet a sectional rationale for each provision, and if you wish, I will go through each of the proposed changes with you.

As you are aware, the fiscal note for HB 133 last session was not funded, accounting, in part, for low compliance to date. The Governor has requested about $100,000 in his FY 87 operating budget for this program, and we urge you to support the request.

I would also like to take this opportunity to briefly mention our industry's serious problem with insurance rates. While we maintain our strong support for the minimum insurance requirements as a condition of business, we are having the same problems with dramatic escalation of rates as most other industries. We have lost several members during the last year due to bankruptcies or failure to obtain insurance at rates which would permit an operating profit. Others are on the verge of collapse.

If you want to help maintain viable air transportation in the future, we strongly urge your support of SB 377 this session.

Thank you for the opportunity to testify, and for your attention to our concerns.

Amendment 1 (Sec. 42.30.200(c)) specifically authorizes the Department of Commerce to stop aircraft from carrying passengers for hire until they secure the minimum required liability insurance. It also authorizes the Department to conduct investigations if necessary to find violators.

Amendment 2 (Sec. 42.30.200(e)) increases the size and severity of a fine to an air carrier who flies passengers for hire without first securing the minimum insurance levels required by HB 133 ($150,000 per seat). Without a more strict penalty, carriers may find it cheaper to ignore the law than to comply.

Amendment 3 (Sec. 42.30.225(b)) allows the insurance "certificate of compliance" to be posted in a visible location other than in the aircraft. This would be particularly helpful to the jet carriers which often interchange planes, thus making it difficult to post certificates in the aircraft. It would also reduce the cost of a certificate from $50 to $25.

Amendment 4 (Sec. 42.30.225(e)) provides specific authority to issue stop use orders if a carrier is operating without a state certificate of insurance.

Amendment 5 (Sec. 42.30.225(d)) provides for a specific penalty for a carrier who fails to obtain a certificate of insurance from the State.

Amendment 6 (Sec. 42.30.380(3)) clarifies the definition of aircraft to include rotor devices (helicopters).

(5) "department" means the Department of Commerce and Economic Development;

(6) "freight" means commodities, articles, and cargo, of whatever nature or value, excluding garbage and trash.

RE: SB 461, An Act relating to the naming of the Robert J. Mitchell Expressway

SB 461 proposes to name a section of the South Fairbanks Expressway between the Parks Highway and Airport Road interchange to the Richardson Highway after Robert J. Mitchell.

Sect.1 of the bill lays out background information about Mr. Mitchell explaining why the naming is appropriate.

On March 27 a public hearing was held in Fairbanks to gather comments regarding the naming. Of the twenty people testifying, 16 were in favor of naming the road the Robert J. Mitchell Expressway. Enclosed in your packets is the written testimony from the public hearing.

Signs must be changed from "Parks Highway" to "Mitchell Expressway". Six existing signs must be replaced and four proposed signs must be increased from 7 ft. to over 12 ft. in length. This portion of road is currently designated as the Parks Highway on the State road system. Recommend that the Fairbanks community be made aware of the proposed renaming and that they be allowed adequate opportunity for comment.

Text from Public Hearing in Fairbanks

Thursday, March 27, 1986

On House Bill 664, Senate Bill 461

12 Noon to Two P.M., Noel Wien Public Library

Senator Coghill

"Okay, we will bring our public hearing to order and its 12:10 p.m. and its the 27th of March 1986. The purpose of the hearing today is to discuss and gather opinions on House Bill 664 and Senate Bill 461, Both entitled an act relating to naming the Robert J. Mitchell Expressway. My name is Jack Coghill and I am chairman of the Senate Transportation Committee. It is my responsibility to hold the hearing. In order for us to name a road or a expressway after a person using federal funds we have to have a public hearing in the area in which it is going to effect.

I have known Bob Mitchell for as long as I can recall, I remember when he was working with the old road commission. After we all got out of the service he had already started his truck and tractor business. A lot of us boys, when we got out of the service, the first place that we went was to work with Bobby Mitchell. We were either greasing cats or working in one way or another. It was his way of keeping the home town boys going. After he expanded to the point that he had a freight service and got involved with Ghemm Company and was involved and was a tremendous supporter of the Interior of Alaska...the purpose of projecting this name forward as far as the transportation committee is concerned is that it is time that we in Alaska start naming some of our road and rights-of-ways after our old timers that are our contemporaries. We have people signing up, and as you come in we would like you to come forward and sit on one of the front seats so that we can tape you and put you in the record."

Senator Coghill read the letter from Bruce Stacer, dated March 26, 1986.

Testimony Given

Francis Erickson
1205 10th Avenue
Fairbanks, AK 99701
456-5358

"I am also a life long Alaskan, I have lived in Fairbanks for 64 years. I believe that this is very fine and very commendable, however, there are a lot of other pioneer truckers in this country that have not had much recognition, like Gezzy (spelling?) and Roggy (spelling?) just to name two. I think that it is about time that we get these older timers in. As far as a pioneer trucker, of course, Bobby started in 1945-46 after the war; and his partner Gerhatty, and his family, are certainly well know here. They have extended themselves over quite some expanse. Clyde is going to be the grand president of the grand igloo here in a couple of years. I think that he deserves some recognition also.

There are quite a few here, and as far as the Railroad Spur and the Mitchell race way and so on, there are other partners in that enterprise that never have received some recognition either. I don't know if you have to be deceased to receive recognition, but it kind of seems that way. I think that it is about time that we turned to some of the others here. Don't misunderstand, I was a friend of Bob Mitchell's and knew him all my life, but you people have a little more say so and when you get behind all of these things, it seems that when I read in the paper it has already been done. By the time that we get here and get to the hearing...this is the first time we heard of it. I didn't have time for...well to get background on some others that I would have named probably, because I just read it in the paper yesterday. So sometimes, I feel that we need a little more advanced warning of these hearing too."

Joe Tremarello
Box 80974
College, AK 99753

"I am a forty year resident of the Fairbanks area and I feel that it is very appropriate, and certainly support, House Bill 664 and Senate Bill 461 as stated. Not only for Bob's contribution to the area of construction, but as a parent raising his family here and his support to my background in teaching. His support to the schools and the staff over the years has been commendable. He did a lot for youth and I feel that it would be very appropriate to name this expressway after Bob."

Ken Fanning
Box 80292
College, AK 99708

"I would like to concur on the previous comments. I appreciate the fact that you are considering naming something after somebody of recent generation who, in fact, has left a strong family unit that is continuing on that way. I think, personally, that it is a good idea to consider naming this road after people that are continuing to support the community."

Oliver Backlund
No Address Given
President of the Fairbanks Pioneers Igloo

"I support this bill, I think that there is going to be a lot of other roads that we can name a lot of other Alaska pioneers after. I think Robert Mitchell was really active in the area and a respected local businessman. I really support this bill."

Joe Balch
7665 Salcha Road
Salcha, AK 99714

"I like Mitchell, although that was a few years ago, to tell you the truth. I would like to see the roads named after a man that was so industrial instead of some politician. He has seen his schooling through the school of hard knocks, actually, and I think that this is an appropriate name for it."

Shirley Demientieff
1205 Kennicott
Fairbanks, AK 99701

"I have been in Fairbanks for twenty years in all and I was born and raised in Nenana, as you know Mr. Coghill. I have no problem with naming roads after people. That does not bother me at all. I like the idea of the South Expressway, I think that it is long overdo, I think that it is something that we really needed. But my problem, Jack, is that when I first heard the name I said 'who is Robert Mitchell?' So far I heard...I don't even know if he is dead or alive...with no disrespect, I have no idea of his contributions have been. I am assuming that he is someone who is a good guy. My idea is a little bit different. I would think that...Natives make a population of 10-15% of the statewide population now and there is really nothing named after Native people in the interior...

What I would like to see is that the expressway be named after our champion dog racer. George Attla, seven time winner of the North American, eleven time winner of the Rondevue in Anchorage. He is a Huslia Hustler, he lives in North Pole, he will be using that road. That would be something that would be current, that is well known; when you ask who George Attla is, nobody is going to say 'who is George Attla?' they are going to know who he is. It would be something that I would be extremely proud of and that other people could be extremely proud of too. I just heard about this early this week but I have been able to get these names of people. This is strictly grass roots, not going anywhere other than FNA and Tanana Chiefs. Those are over a hundred names of people that feel the same way that I do about this expressway. (Ms. Demientieff brought a petition to the table and presented it to Senator Coghill) That (the petition) is in support of the name "George Attla Expressway."

Pete Eagan
P.O. Box 1170
Fairbanks, AK 99701
456-4793

"My name is Pete Eagan, I was born and raised here in Fairbanks and I have known Bob Mitchell since I was a child. He was a real good friend of my family's. Later on I had the honor to have worked for Bob when I was in high school and college. I learned a great deal from Bob. He was a very fine man, well liked by everyone in town. He had a terrific sense of humor, and he was definitely from the old school, where your word was your bond. If Bob told you he would do something, he would do it. He was very involved in the whole development of the South Fairbanks, Industrial area and I think that this would be a very fitting tribute to Bob to name this new expressway after him. Thank you."

Harold R. Herning
Box 1792
Fairbanks, AK 99701
488-2291

"I knew Bob for 43 years up until the time of his death. I think Bob, of all the people in Fairbanks, probably is one our truest Alaskans we have ever had. He was truly Alaskan in every sense and the naming in appropriate. This is his home ground. That is his life, to develop that area and I think that it is no more than appropriate that a man of his caliber be recognized. There is nothing that can be said about Bob that is wrong. The only thing that can be said is praise as far as Bob is concerned. I thank you."

Jim Desmond
No Address Given

"I would certainly like to testify for the bills to name the Expressway the Robert J. Mitchell. I knew Bob for years and years. A wonderful man, and inspiration to all the people that were my age when I was a teenager when we interacted with Bobby a lot. And I certainly feel that he is worthy of the honor."

Terry P. McLean
1907 Capital
Fairbanks, AK 99709

"Yes, Jack, I would like to testify in favor of the Robert J. Mitchell Expressway. I personally owe a great deal to Robert Mitchell and his partners in Ghemm Company. I was able to complete my education at the University of Alaska due to their summer and winter employment. Bobby Mitchell was always a friend as well as the boss. Although when he made up his mind to do something it was often difficult to get him to change his mind, he would always hear you out or listen to your suggestions and ideas. Although Air North is no longer flying it provided jobs for many many people and pilots that are today flying jets all over the United States and the World. Bobby Mitchell worked thousands of hours to building the runway at Metro Field and was always able to help people, no matter what the situation. Thousands of people have enjoyed stock car racing because Bobby Mitchell and Ghemm company allowed GFRA to build the race way across from the float pond at Metro Field. Many of the roads that were built that will intertie with the Expressway were built by Bobby Mitchell or people that he helped provide employment for. I feel that it really makes sense to honor those that have helped build the community and the character of the people living in the Fairbanks area."

Mark Ringstad
502 Monroe Street
Fairbanks, AK 99701
456-5734

"I knew Bob Mitchell all my life, was raised with him here in Fairbanks. Bob was in the construction industry and trucking industry all of his adult life. He was one of the prime movers for the railroad to go to the South Fairbanks area. He was one of the major developers of the entire Van Horn Road area. I think that it is most fitting and most appropriate to name that expressway after him."

Gary Wilken
2600 Riverview Drive
Fairbanks, AK 99701

"I carry with me some written testimony, Senator, from Bill Gordon and a letter from Pete Eagan Sr. and Dan Eagan, they are out of town and wanted to be sure that they heard today. Just a couple of things...it is difficult for me to talk about Bob Mitchell, he was such a big part of my life, Bob, as far as the South Fairbanks area, we all know, was one of the leaders in developing that area. I went to work with Bob in the early sixties when there was nothing but a dirt road and he lead us off into the muskeg and said 'this shall be a airport.' So, we know that he was one of the people that was instrumental. To name that highway after him is very fitting. I appreciate the opportunity to provide testimony and look forward to bills passing. Thanks, appreciate the opportunity."

Nancy Lee Baker
49 Timberland Drive
Fairbanks, AK 99701

"I would like to comment, and I am going to comment before I read the bill, my idea is that the road should be called the Parks Highway Extension, because that is what it logically is. That is what people will call it naturally. One reason that I am a little concerned is that I happen to make a small map myself (in the record). To put another name on it, for map makers and for tourists it seems to me that it would be utter confusion. Logically it is the Parks Highway extension. I have a lot of respect for the person named here, but that is beside the point. I don't think that we have a right to go around confusing the public."

Walley Burnett
1901 Crosson
Fairbanks, AK 99701

"Senator Coghill, it is nice to be here. Yesterday I talked to a couple of people and they mentioned that there was a possibility that they would be naming the South Fairbanks Expressway. Bob Mitchell was a long time Fairbanksan from a long time Fairbanks family. He was very instrumental in developing the Van Horn and Peger Road, in which this road will be passing through. If you will recall in the early days of the pipe line, Bob Mitchell was one of the main people involved in the development of the Railroad that went into the South Fairbanks area. He moved lots of gravel and made lots of roads, often with out pay. I feel that when we drive back and forth on Airport Road, Van Horn and Peger, and we do go through the expressway, we do think of our good friend Bob Mitchell. I whole heartedly would like to give my approval of putting his name into naming it the Mitchell Expressway."

Harvey Marlin
665 10th Ave.
Fairbanks, AK 99701

"I have lived in Fairbanks since 1929 and have know Bob Mitchell from that day forward. Not only as a classmate, but as a good and personal friend. When it came to my attention that this expressway was to be named, perhaps anyway, in memory of Bob Mitchell, I was very definitely impressed and I still am. I think that it is a very wise move. Bob was a gentleman that promoted for the City of Fairbanks all of his working years. As a matter of fact, he began his working career with the Alaska Road Commission. Both he and his partner began a trucking operation from Valdez to Fairbanks with the assistance of the veterans aid. There again they continued on in to the highway program, Clyde previous to that was a master mechanic to the road commission. Bob Mitchell has always been associated with the road system and has always done a great amount over and above walking the extra mile to make the roads within our community better, not always for pay, by the way. I think that this is a very wise choice and I am one thousand percent in favor of it."

Con Frank
200 Gold Dust Drive
Fairbanks, AK 99707
479-2828

"Well, I would like to say that I would endorse the naming of this section of highway for Robert Mitchell. I have known him almost forty years since I came to Alaska. He was one of the first people that I met when I came here. I have been a partner with him and closely associated with him for twenty years. He was a very positive person and dedicated a lot of his efforts to the development of Fairbanks, and especially the South Fairbanks area. He started out on South Cushman, he and his partner, started in there in 1948-49 and then gradually moved further south there to the Van Horn Road area. I would just like to say that I would endorse this naming."

Senator Coghill

"Thank you very much Mr. Frank, is there anyone else that would like to make a statement? If not, then our public hearing is closed. This will be transcribed and will be put into the record. It will be used in the deliberation of both the House and Senate. They may want to have more hearings. If that is the case, then this will be part of that record."

March 25, 1986.

To Whom It May Concern:

As a property owner and life-long resident of Alaska, I wholeheartedly support the naming of the "30th Avenue Bypass", the Robert J. Mitchell Expressway.

Bob Mitchell has made a lasting impact on the development of our community. More specifically, Bob contributed to much of the growth in South Fairbanks and the area south of Van Horn Road. His very business located along Cushman Street, along with his development of Metro Industrial Airport, inspired many others to follow. Without his dedication and early belief in Fairbanks' future the need for this bypass would probably be many years yet in the future.

It would be most fitting to name this highway in honor of one of Alaska's pioneers who gave so much of his time to his community. Please designate the "30th Avenue Bypass" the Robert J. Mitchell Expressway.

Sincerely,

Bill Gordon

Bill Gordon
Vice President

lr/BG

March 26, 1986

Senator Jack Coghill
Alaska State Legislature
Pouch V (MS 3100)
Juneau, Alaska 99811

Dear Senator Coghill:

It has come to my attention that there is a bill or resolution before the legislature regarding the naming of the new South Fairbanks Expressway. As proposed, this expressway between the Airport Road overpass and the proposed Richardson Highway overpass would be named the "Bob Mitchell Memorial Expressway."

I knew Bob since I was a child, and later on had the great fortune of working for him during my high school and college years. I learned a great deal about life and the value of good hard work during this time. Bob was a very fine man, and was heavily involved in the development of this South Fairbanks industrial area, rail spur, and road system.

I think that the naming of this expressway after Bob would be a very fitting tribute to a fine, highly-regarded individual. I would welcome and appreciate your support in this matter.

Sincerely,

Pete Eagan

Pete Eagan

March 25, 1986

Senator Jack Coghill
Alaska State Legislature
Pouch V (MS 3100)
Juneau, Alaska 99811

Dear Senator Coghill:

I respectfully request your consideration in naming that section of the South Fairbanks Expressway, between the Airport Road overpass and the proposed Richardson Highway overpass, the "Bob Mitchell Memorial Expressway".

Mr. Mitchell was a very fine individual and very instrumental in the development of the South Fairbanks Industrial area and its road system.

Thank you for your consideration on this request.

Very truly yours,

Dan F. Eagan

Mar 26, 1986

To Whom It May Concern:

As a life-long Alaskan, I strongly Recommend that the 30th Ave By-Pass be Named ~~the~~ in honor of, and in memory of, Robert J. Mitchell. Bobby Mitchell was also a life-long Alaskan. Even more importantly, he was truly a pioneer in the development of transportation, in particular, the highway system in and around Fairbanks. I knew him personally since 1937. He was a life-long resident of Fairbanks. After WWII, he used his GI loan to buy a caterpillar. Before the war (WWII) he worked ~~on~~ with the Alaska Highway Commission. He developed a trucking operation with Clyde Geraghty that serviced Valdez and Fairbanks. He was one of the founding partners in GHEMM Construction Co. and built many roads and bridges throughout Alaska. Bobby Mitchell devoted all 63 years of his life and his boundless energy and optimism to ~~the~~ his unshakable belief in the future of Fairbanks. He deserves to be remembered.

Validity, construction, and application of age requirements for licensing of motor vehicle operators, 86 ALR3d 475.

Sec. 28.15.040. Instruction permits and temporary licenses. [Repealed, § 19 ch 178 SLA 1978.]

Sec. 28.15.041. Classification of drivers' licenses. (a) The commissioner shall provide by regulation for the classification of drivers' licenses. The regulations shall specify license classifications which are reasonably necessary for the safe operation of the various types, sizes and combinations of motor vehicles. The regulations shall also establish medical standards, standards of driving conduct and proficiency, and other standards governing the issuance, renewal, or denial of these licenses. The department may examine each applicant to determine the applicant's qualifications according to the class of license applied for, and upon issuing a driver's license the department shall indicate on the license the classification for which an applicant for a license has qualified by examination. The regulations and any subsequent modifications under this section become effective only if approved by a concurrent resolution adopted by a majority vote of each house of the legislature.

(b) A person may not drive a school bus transporting school children, or a bus transporting school-age children or another motor vehicle when in use for the transportation of persons for compensation until the person has applied for and has been issued a license for that purpose under (a) of this section. The department may not issue a license under this subsection unless the applicant is at least 19 years of age, has had at least one year of driving experience, and the department is satisfied as to the applicant's good character, competence and fitness to be licensed; nor may the department issue the license until proper application has been made and all required driving, written, and physical examinations have been successfully completed. A license issued under this subsection expires on September 1 of the year following issuance. Application for renewal may be made by submitting to the department the results of a current physical examination and paying the required fee. (§ 19 ch 178 SLA 1978)

Sec. 28.15.050. Applications. [Repealed, § 19 ch 178 SLA 1978.]

SB 471

Article 1. Issuance, Expiration and Renewal of Licenses.

Section
11. Drivers must be licensed
21. Persons exempt from driver licensing
31. Persons not to be licensed
41. Classification of drivers' licenses
51. Instruction permit, temporary driver's license and special driver's permit
61. Application for driver's license or instruction permit; notice of anatomical gift procedure
71. Application of minors
81. Examination of applicants
91. Department may require re-examination
101. Expiration and renewal of driver's license; re-examination
111. Licenses issued to drivers; anatomical gift document
121. Restricted driver's license
131. License to be carried and exhibited on demand
141. Duplicate driver's license
151. Records to be kept by the department

Sec. 28.15.010. License required. [Repealed, § 19 ch 178 SLA 1978.]

Sec. 28.15.011. Drivers must be licensed. (a) A person may not be denied the privilege to drive a motor vehicle upon a highway in this state, except as prescribed by law.

(b) Every person exercising the person's privilege to drive, or exercising any degree of physical control of a motor vehicle upon a highway, vehicular way or area, or other public property in this state, is required to have in the possession of the person a valid Alaska driver's license issued under the provisions of this chapter for the type or class of vehicle driven, unless expressly exempted by law from this requirement.

(c) A person licensed under the provisions of this chapter may exercise in this state the privilege to drive a motor vehicle and is subject to the restrictions prescribed by this chapter. A municipality may not require a person to obtain any other driver's license to drive or operate a motor vehicle in this state. (§ 19 ch 178 SLA 1978)

IN THE SENATE BY THE TRANSPORTATION COMMITTEE

CS FOR SENATE BILL NO.471 (Transportation)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to drivers' licenses."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 28.15.041 is amended by adding a new subsection to read:

(d) Notwithstanding any other provision of law, a person may not drive a pilot car unless the person has a valid Alaska driver's license in the possession of the person. The operator of a pilot car must be at least 19 years of age, and have held a valid driver's license at least one year. In this subsection, "pilot car" means a motor vehicle used as an extension of the warning system of an oversized motor vehicle with or without a load, or of a motor vehicle carrying a permitted oversized load.

TO: All Committee Members

FROM: Committee Staff

RE: SB471, proposed pilot car bill

This bill adds a new subsection to the Motor Vehicle Code dealing with classifications of drivers' licenses.

The subsection would require pilot car drivers to have a license for the purpose of driving a pilot car. The drivermust be at least 19 year of age and have a dirvers' license for a year. Drivers' license is defined in Sec. 28.40.100 (a)(5) as "a license, permit or privilege, whether or not a person holds a valid license issued in this or another jurisdiction, to drive a motor vehicle under the laws of this state."

Pilot cars were regulated under the Alaska Transportation Commission. Under ATC, Canadian and Alaskan pilot cars would not cross the border. That is, a load heading north would pick up Alaskan pilot cars at the border and a load heading south would pick up Canadian pilot cars.

Since the sunsetting of the ATC, Alaskan pilot cars have still stopped at the border and the loads have been taken over by Canadian cars. On the other hand, Canadian pilot cars are now handling loads all the way to Prudhoe Bay. Commerce and Economic Development has estimated that there were over 400 Canadian pilot cars that crossed the border last month. At the going rate of $350 for a pilot car from the border to Prudhoe, that works out to a $140,000 loss to the state economy.

BILL SHEFFIELD, GOVERNOR

DEPARTMENT OF COMMERCE & ECONOMIC DEVELOPMENT

DIVISION OF MEASUREMENT STANDARDS

P.O. BOX 111686
ANCHORAGE, ALASKA 99511

PHONE: 907-345-7750

March 25, 1986

MAR 3 1 1986

Senator John B. Coghill, Chairman
Senate Transportation Committee
P.O. Box V
Juneau, Alaska 99811

Dear Senator Coghill:

The primary function of a pilot car is to provide safety and warning to the motoring public when encountering oversize loads on the State highway system. The amendment to AS 28.15.041 will assure that pilot car operators are familiar with the road system and driving conditions unique to Alaska.

As the Department charged with the administration and issuance of oversize and overweight permits, the Department of Commerce and Economic Development supports the amendment.

Sincerely,

Joe Swanson
Director

DEPARTMENT OF PUBLIC SAFETY

POSITION PAPER - SB 471

Oppose as written

April 8, 1986

SB 471. An Act relating to drivers' licenses.

I feel it is inappropriate to issue a separate class of license for the purpose outlined in this piece of legislation. Each separate class of license is generally established for safety purposes where it is felt operation of a specific type of vehicle is unique, and different testing methods are necessary. If there were accident statistics to reflect operators of pilot cars were causing a high number of accidents in comparison to miles driven, then a separate class may be justified. I know of no such statistics.

If the purpose of this legislation is to promote local hire, I would recommend an amendment to AS 28.15.011 by adding a subsection (d). The new subsection to contain wording similar to the following:

> "(d) A person may not drive a pilot car unless the person has a valid Alaska driver's license in their possession. An operator of a pilot car is not exempt under AS 28.15.021 (2). The operator of a pilot car must be at least 19 years of age, and have held a valid driver's license at least one year. In this subsection, "pilot car" means a motor vehicle used as an extension of the warning system of an oversized motor vehicle with or without a load, or of a motor vehicle carrying a permitted oversized load.".

This amendment would not require a separate class of license, and would be considerably easier to administer.

ROBERT J. SUNDBERG
Commissioner

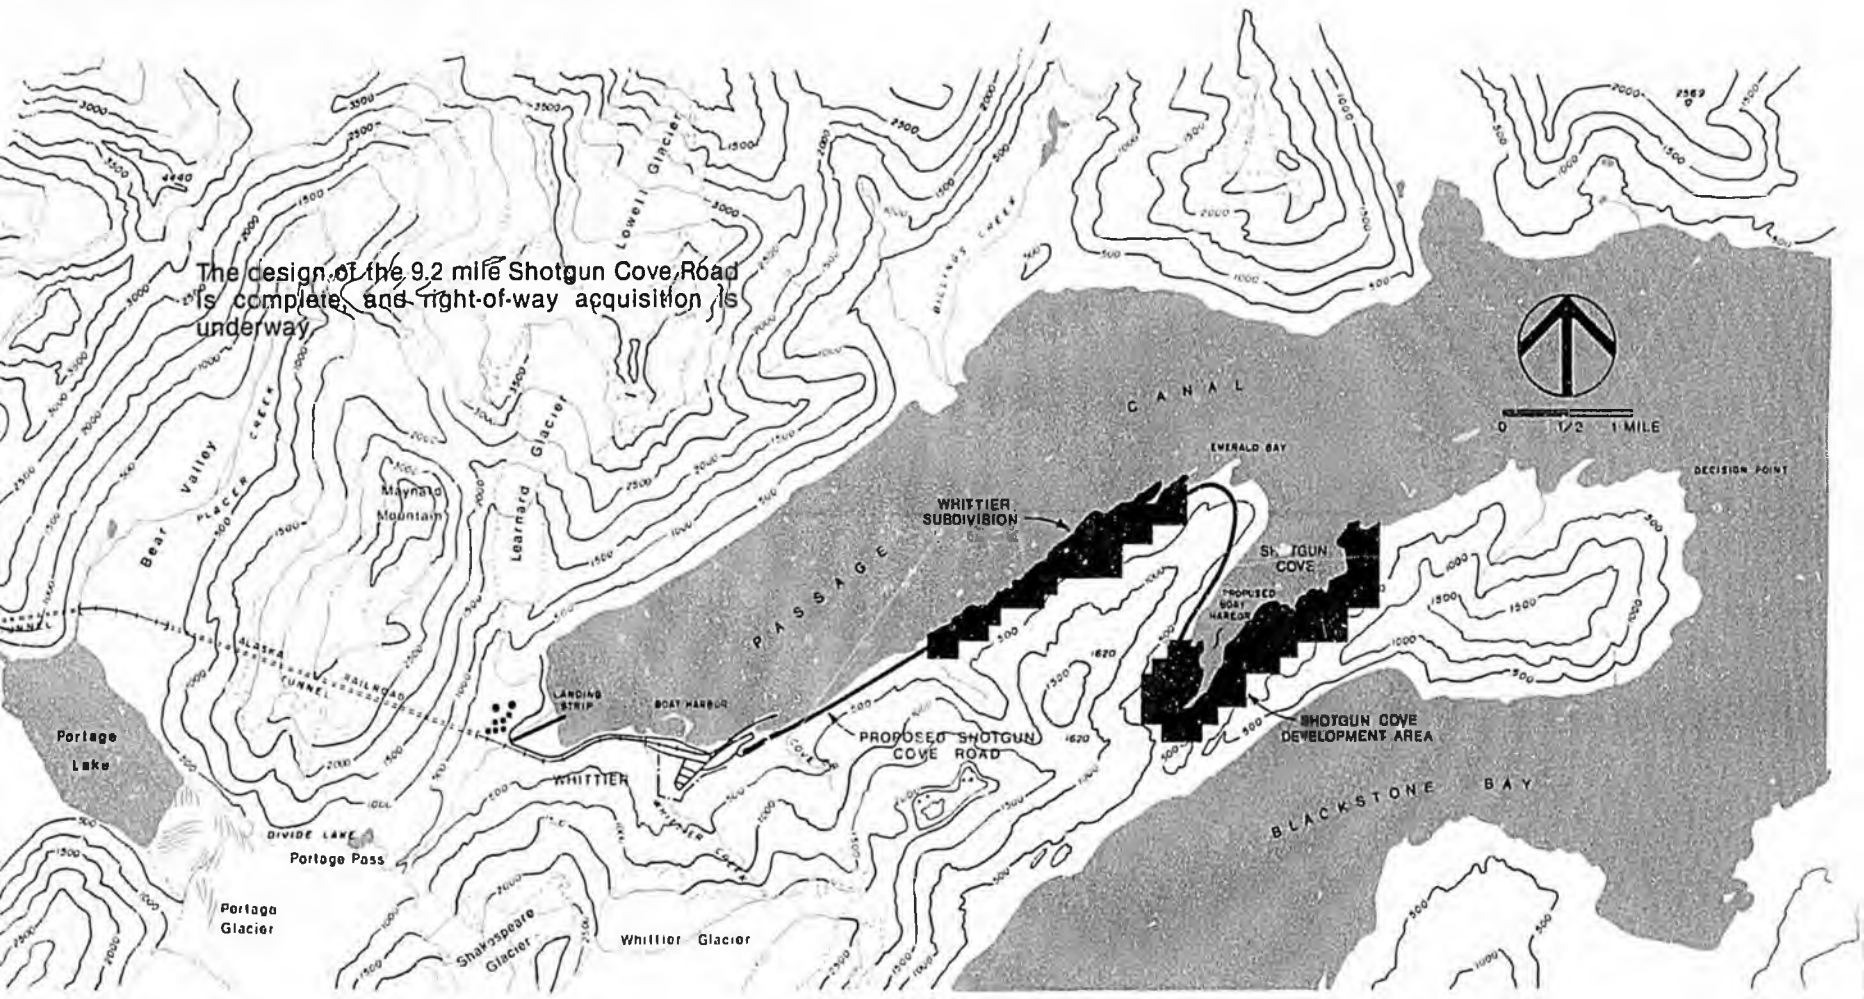
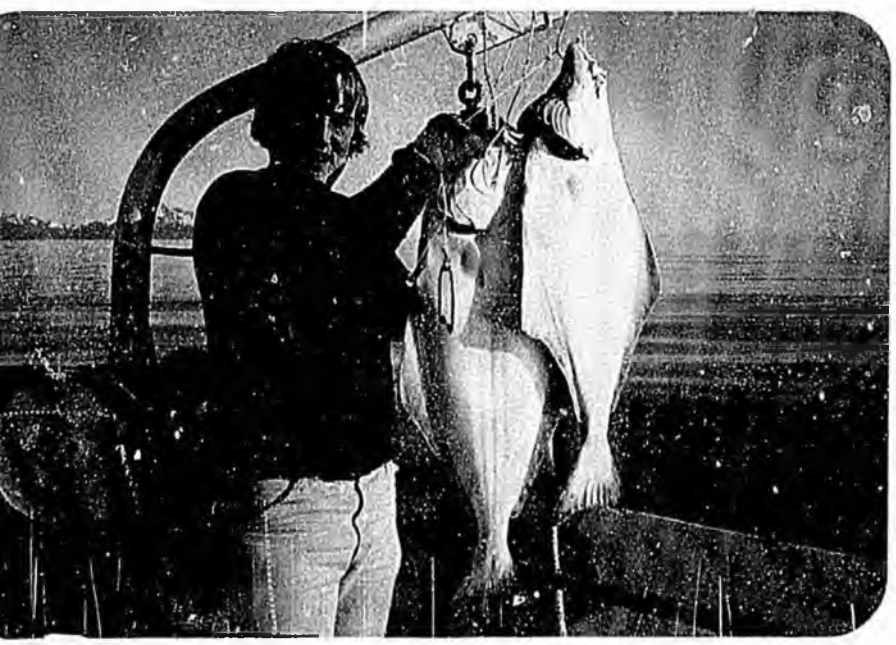
ourism is expanding dramatically in Prince William Sound. During 1983, seven ur boats docked in Whittier, 19 in 1984, and 34 are scheduled in 1985.

The construction of Shotgun Cove Road is vital to the total development of the City of Whittier. The road will provide convenient access to the proposed Shotgun Cove Small Boat Harbor, and to the proposed developments within Whittier Subdivision and Shotgun Cove Development area. The road will also provide a myriad of recreational and tourism related uses for the residents and visitors of Southcentral Alaska

We can use your support. If you are in agreement with the need for construction of Shotgun Cove Road, please contact Gov. William Sheffield, or your legislators.

The design of the 9.2 mile Shotgun Cove Road is complete, and right-of-way acquisition is underway





libut and salmon fishing, shrimping, and crabbing opportunities abound Prince William Sound.

Existing Whittier Small Boat Harbor. There is presently a waiting list of 350 who wish to berth their boats in Whittier.

Dept. of Transportation & Public Facilities

Position Paper

BILL NO: SCR 6

APPROVED: R. J. Knapp, Commissioner 4/8/

TITLE: Whittier to Shotgun Cove Access

DATE:

The Department of Transportation and Public Facilities (DOT/PF) appreciates the supportive comments for its work in investigating ways to improve transportation access to Whittier.

The Whittier to Shotgun Cove road is in the final stage of design. The Department is designing a 9.1 mile long road with a 26 foot wide gravel surface. The road traverses steeply inclined ground and therefore will require extensive rock excavation. The estimated project cost is $19.2 million which includes right-of-way acquisition, utilities relocation at the Whittier end of the road and construction. If funding is appropriated this year, construction could begin in 1986.

The Portage to Whittier (Whittier Access) project is in the preliminary engineering phase which will evaluate alternatives and make recommendations on a road access into Whittier. The preliminary engineering evaluation will look at several alternatives: 1) a road from Bear Valley around Maynard Mountain, 2) a new tunnel which would accommodate automobiles; and, 3) improvements to the existing tunnnel to allow both trains and vehicle traffic. A consultant has been hired to evaluate tunnel options and recommend an alignment through Maynard Mountain. The Department has begun work on the Environmental Impact Statement which will include the consultant's recommendations for the preferred tunnel alignment.

The current schedule for Federal Highway Administration (FHWA) approval of the Whittier Access project is as follows:

Consultant Contract completion	August, 1985
Draft Environmental Document	May, 1986
Approval to begin Design	December, 1986

Dept. of Transportation & Public Facilities

Position Paper

BILL NO: SCR 22

TITLE: Alternative Road System in Denali National Park

APPROVED: R. O. Knapp, Commissioner

DATE: 5/1/85

The Department of Transportation and Public Facilities supports SCR22 to initiate and complete environmental and location studies for three alternative routes to construct a road to Kantishna.

These routes may qualify under RS2477 and could be useful in providing a basic route for a road to Kantishna. However, the projected traffic volume on such a road is so high (5,000 vehicles a day during the summer) that a road built to required design standards may vary somewhat from the RS2477 right-of-way.

This road would provide a useful service by providing access for tourists into the park as well as for mining into the Kantishna area.

For further information call Susan Fleischhauer at 465-3900.

Senate Committee on Transportation

MEMORANDUM

TO: Committee Members

FROM: Committee Staff

DATE: 5-1-85

RE: SCR 22

SCR 22, relating to alternative access in the Denali National Park, will be in front of the committee today. This resolve requests that the Governor direct the commissioner of DOT/PF to study alternative access routes to Denali National Park.

Included in your packet you will find position papers from the divisions of Tourism and Minerals, the departments of Transportation and Fish and Game, and the National Park Service. Also included is part of the Fairbanks Chamber of Commerce's Interior Transportation Needs report. Finally there is a letter from Senator Coghill to members of the Alaska Congressional Delegation asking that they explore the problem of lack of access into the park.

KANTISHNA ACCESS

Warrants

A highway to the Kantishna area can be justified on the following basis:

Tourism is Alaska's second largest industry and Mt. McKinley is the State's number one tourist attraction. The park road is inadequate to serve this industry for the following reasons:

a. Geometrics, the road is substandard in width, alignment and grade. The road is hazardous as demonstrated by the rash of serious bus accidents that have occurred during the past few years.

b. Access is too restrictive, visitors must travel by bus (shuttle school buses or buses operated by park concessionaires). This ride can last up to six hours and is a source of discomfort, especially to senior citizens and young children.

c. Capacity, the demand has increased dramatically during the past decade as has the growth of tourism. The Interior Alaska Transportation Study estimated nearly 5000 vehicles by the year 2005.

d. Because time at vantage viewpoints is extremely limited, over 50% of those seeking a view of Mt. McKinley are disappointed.

e. The increase of traffic on this road has degraded the wildlife viewing aspect of this route.

Mining is also an important industry in Alaska and the Kantishna area is an important mining area. Recent assessments conducted by governmental officials documented the existance of commercial ore deposits. The existing road is inadequate to serve this industry because of slow moving tour bus traffic, and it is substandard.

FBKS. CHAMBER OF COMMERCE

Enhance the State's ability to assure our visitors and residents a quality experience. Mt McKinley is Alaska's crown jewel. Access and vantage viewing are at the sole discretion of the U.S. Park Service. However Alaska's entire tourist industry and the State's reputation suffer when visitors ride an uncomfortable bus for six hours and still do not get to see the main attraction.

Give opportunity for the private sector to provide tourist facilities that are now being provided by the government sector or not being provided at all. Mining claims in the Kantishna area are patented and can be used by the private developer to locate hotels, lodges, camping parks, hostels and other visitors facilities. The area provides an unsurpassed view of Mt. McKinley and visitors would have the opportunity to remain in the area for longer periods increasing their chances of seeing the mountain. (note, the cyclic type weather that occurs during the dry interior summer virtually assures all visitors a view of the mountain if they can remain there for a day or so.

The private sector is more sensitive to visitor satisfaction thus when this sector caters to our visitors the results are happier, longer and more return visits.

An alternate access to the Kantishna area would make it possible for the park service to redirect the park road traffic toward wildlife viewing. This is more compatable to that portion of the park's classification, (wilderness). It also provides a more focused and quality wildlife viewing concession.

A northern access, currently economically viable as far as the Kantishna area, can be extended toward the McGrath area to serve that area as the need warrants.

A northern access would tie into the existing park road, making it

possible to provide a loop system, a limited loop system or limited to wildlife tours. Note this would be a popular concession and with some imagination could be worked in two directions.

There is less precipitation on the north side of the Alaska Range than on the south. This can be documented through weather records but is clearly evident by the lack of glaciers on the north side when compared with the south side. Since viewing of the mountain is of paramount importance, this aspect cannot be overlooked when establishing park facilities, nor should the North or South faciiities be exclusive, both offer differing experiences making improvements not an either/or decision but rather one of establishing priorities.

It should also be recognizied that the Park is such a major attraction that constructing additional facilities will not provide a proportional increase in capacity as visitors will elect to extend their stay to experience all that is offered.

Issues and Strategy

Establishing a northern access will require careful planning and is subject to stipulations established in the National Interest Lands Act as well as the National Environmental Protection Act of 1969. It will be subject to critical review, organzied environmental and philosophical opposition.

Provision has been made in the National Interest Lands Act to mandate access deccision on a timely basis. When the environmental document is officially started a time frame also starts. This is an advantage, if the State has the project well in order. However, it can be a detriment if the State is unprepared to deal with all the issues that may surface, resulting in a decision that may not be in the best interest of the State. If that should occur, the ability to appeal is limited and the State may be required to began the process all over. Because of this, it is important that the DOTPF ensure that

all interested enities are involved, all issues identified and all decision making agencies be as much in accord as possible prior to starting the clock.

This can be accomplished by adding a preliminary phase to the normal location phase of a project. Generally the location report and environmental document are prepared at the same time. In this case it is recomended that the DOTPF prepare a draft location report and in so doing identify and resolve all issues with decision making agencies to gain as much of a consensus as possible, then begin the environmental document. The location report would be finalized concurrent with developing the environmental document.

Project description

Access to Kantishna via the north has three major alternatives, they are:

1. Via the Stampede trail to Stampede then through foot hills to Kantishna.

2. Via the old sled trail leaving the Parks Highway near Rex.

3. Via the proposed Nenana Agriculture access road to the Kantishna River then upriver to Kantishna (note, the route to the Kantishna River is already designed).

It is premature to speculate on which alternate is the most attractive. All have attractive aspects. Some have already been investigated to some degree and some aerial photographs are available. It is conceivable that the final routing will be a combination of these.

The road itself will be a major highway and probably have to be widen to four lanes by the year 2020. Initially it should be paved with two 12' lanes and 8' shoulders. Alignment and grade should be designed for 55 mph and should take advantage of the scenic opportunties. The road should be designed and classified as a State

Scenic Route.

Funding

Immediate funding needs are for the location phase. During that phase the merits of the project will be documented, standards adopted, ... alignment chosen and preliminary costs developed. The project will have location approval with authority to design and construct or it will be determine to be in the best interest of the State or Nation not to proceed.

Because of the sensitive nature of the project the DOTPF should allow ample lead time and funding to ensure that location documents will stand up to close scrutinity. At this time the cost to accomplish this is estimated at $500,000 with a time frame of three years.

This work entails field surveys aerial photography, research, concep-tal design, economic analysis, comparsion of alternatives, indepth agency coordination and public involvememt. The completed product will include:

-approved environmental impact statement with 4(f) determination

-approved location study report

-certified location public hearing documents

-draft soils report

-location approval.

United States Department of the Interior

NATIONAL PARK SERVICE

ALASKA REGIONAL OFFICE
2525 Gambell Street, Room 107
Anchorage, Alaska 99503 - 2892

IN REPLY REFER TO:

A22(ARO-SA)

February 13, 1985

FEB 19 1985

Honorable Jack Coghill
Alaska State Senate
Pouch V
Anchorage, Alasks 99811

Dear Senator Coghill:

We appreciate your request for our review and comments on Senate Bill 49 and the accompanying report and route map.

As you recognize, Denali National Park and Preserve is a major resource and asset to both the State of Alaska and the nation. I believe it is incumbent upon all of us at the state and federal levels to work together to assure that the experience for the visitor is enjoyable and that the wildlife and other resources of the park are preserved.

We agree with and support the goal of improving the visitor's experience. However, it would be inappropriate for the National Park Service to take a position on the proposed bill to appropriate $500,000 for a state feasibility study of a northern access route. As your study recognizes, the Alaska National Interest Lands Conservation Act (ANILCA) and the National Enviro nental Policy Act set forth procedures for analysis and consideration which must be followed before any decision to allow access across a national park. Title XI of ANILCA sets forth the process for reviewing and permitting construction of a new access route.

The quality of the visitor's experience in Denali National Park has been a major concern within our organization. As you know, we are currently in the process of designing a new visitor access center near the park headquarters and we will soon be contracting with another local firm for the design of the reconstruction of Denali Park Hotel. Recommended budgeting for these two projects totals $14.2 million. In addition approximately $15 million is programmed for improvements on the Denali Park Road.

A draft general management plan for Denali National Park will be released in March for public review and comment. This plan invites public comment on alternattive ways of improving the visitor's experience while preserving the wildlife and natural features which they come to see. As soon as it is available we will send copies of this draft plan to you and members of the Senate and House Resources Committees. We would very much appreciate your thoughts and recommendations.

NATIONAL PARK SERVICE

This summer we will also be working with the State Department of Natural Resources and the Department of Transportation and Public Facilities under a cooperative agreement to investigate the possibilities for developing visitor access and facilities on the south side of the Alaska Range. We were pleased to note that your report recognizes that development on the north and south sides is not an either or situation, and that the south side development would offer visitors a different experience in a landscape which is much in contrast to that of the north. Further, it is important to distribute the points of access to the natural resources of the Mt. McKinley massif so that they are readily accessible from both Anchorage and Fairbanks. We will keep you informed of the results of this cooperative study and look forward to your comments.

Sincerely,

Regional Director
Alaska Region

February 26, 1985

Mr. John Manly
Committee Aide
Senate Transportation
Committee
c/o Senator Coghill
Alaska State Senate
Pouch V
Juneau, AK 99811

Dear Mr. Manly:

This letter is in response to your request dated February 9, 1985, that the department prepare a brief statement on the fish and wildlife values and potential impacts associated with an extension of the state highway system to Kantishna via three alternative routes from the Parks Highway. It is our understanding that the three alternatives under consideration include access:

1. Via the Stampede Trail to Stampede then through the foothills to Kantishna;

2. Via the Rex Trail to the Kantishna River then upriver to Kantishna;

3. Via the proposed Nenana-Totchaket Agriculture access road to the Kantishna River then upriver to Kantishna.

Our Habitat Division has performed a review of the alternatives. An abbreviated summary of the fish and wildlife values and the department's recommendations relative to the three alternative routes follows.

Alternative #1 - Stampede Trail: Wildlife values adjacent to this route are moderate to high in importance. Black bear, grizzly bear, moose, caribou, and a variety of furbearers are present. Dall sheep are present along the north flank of the Alaska Range to the immediate south. The McKinley Caribou Herd historically utilized this area as prime overwintering and limited calving habitat. Although population abundance is currently low, an expansion of the herd size will necessitate use of this historic range. The

proposed route also transects important moose fall and winter concentration areas. Recreational and subsistence use is moderate and occurs predominately along the Stampede Trail. Trapping intensity is moderate to heavy.

Alternative #2 - Rex Trail: Fish and wildlife values adjacent to this route are moderate to high in importance. Black bear, grizzly bear, moose and a variety of furbearers are present in moderate numbers throughout most of the area. Significant populations of these species, however, are present within the Nenana, Teklanika, Toklat, and Kantishna River riparian corridors. Recreational and subsistence use is moderate to heavy within these river corridors. Human use outside of these corridors is limited.

The portions of the upper Kantishna River and Bearpaw River drainages affected by this route are considered critical waterfowl habitat areas, providing nesting and molting habitat for high concentrations of several species of waterfowl and stopover sites for cranes and other species that utilize the western Interior.

The Toklat River Springs located at the confluence of the Toklat and Sushana Rivers supports the largest known population of fall chum salmon in Alaska and is estimated to contribute 27% of the commercial and subsistence fall chum salmon harvest in the Yukon and Tanana River fisheries downstream from the mouth of the Kantishna River. The spring's area also supports a small population (500-600) of overwintering mallards which is believed to be the northern-most freshwater waterfowl wintering area in North America. The Toklat River Springs' fall chum salmon spawning area is considered critical habitat and has been nominated for legislative designation.

Alternative #3 - Totchaket Agriculture Access Road and Extension: Based upon the limited data presently available, most of the area adjacent to this route appears to have moderate to low fish and wildlife habitat value. Recreational hunting, subsistence use and trapping also appear to very light in the area. There are no critical habitat areas yet identified. From the standpoint of potential impacts, the department's primary concerns are related to those portions of the route which are (1) adjacent to the Kantishna River (which is a designated anadromous fish stream) or (2) require crossings of resident fish streams. Rather than influencing route selection, these concerns are normally addressed by the department, via its AS 16 authorities, through the provision of adequate mitigating measures as a component of route design and construction.

Recommendations: From the sole standpoint of minimizing impacts to fish and wildlife or their habitats, the department prefers that any extension of the state highway system to Kantishna be aligned along the Alternative #3 - Nenana-Totchaket Agriculture Access Road and Extension route.

The department appreciates the Senate Transportation Committee's solicitation of our concerns and recommendations. We remain available to provide additional information as may be needed.

Sincerely,

James Ayers
Special Assistant to
the Commissioner

Senator Jack Coghill, Chairman
Senate Transportation Committee
ALASKA STATE LEGISLATURE
Pouch V
Juneau, AK 99811

Dear Senator Coghill:

I have read your Senate Bill #49 and agree wholeheartedly that now is the time to agressively pursue the development of a road to Kantishna. Mt. McKinley is one of Alaska's greatest assets, however, many people have a disappointing experience in the Park because of inadequate facilities and limited viewing opportunities. Although we will never be able to guarantee a view of the mountain, increased access and facilities would provide us with an increased opportunity to satisfy the Alaska visitors.

We greatly appreciate your interest in this vital segment and fully support the efforts to begin this project.

If we can be of any further assistance please let me know.

Sincerely,

Thomas C. Tougas

March 4, 1985

MAR 4 1985

The Honorable Jack Coghill
Chairman
Senate Transportation Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Coghill:

The Office of Mineral Development has reviewed SB 49 calling for a feasibility study on building the Kantishna access highway.

The Kantishna area has long been recognized for its substantial gold resource. Numerous mining claims have been patented. In addition to gold, significant deposits of strategic metals such as tungsten and antimony have been discovered in the area. With access, the region has much enhanced potential to become once again a significant productive mining region.

Currently, traffic on the Denali Park road is restricted by the National Park Service which severely limits mining activity at Kantishna. This restriction also limits Alaska's rapidly growing visitor industry. Access would allow entry to Denali National Park to many more people now unable to visit because of the severe travel restrictions in effect on the Denali Highway. The Kantishna access would enable firms in the travel industry to construct additional hotels and visitor facilities on privately held land at Kantishna. Additionally, it would greatly facilitate the expanded used of the Stampede Mine as a training property for mining students from the University of Alaska.

Of the three alternative routes being considered, this office supports the Old Stampede Road route. This is the shortest of the options being considered. It makes use of a long established trail to Stampede and requires a relatively short extension through the foothills connecting Stampede to Kantishna.

Sincerely,

John F. M. Sims

Re: SB 49; Feasibility of Building a Road to Kantishna

A road to Kantishna would have two major economic advantages. First, it would provide a northern access for tourists into Denali Park. The Interior Transportation Study estimates that within twenty years such an access could generate 5,000 vehicles a day in the summer months. Secondly, the road would provide access for mining in the Kantishna area, and possible future extension to the Kuskokwim Valley.

The possible benefits to be derived from this project compare favorably with other major system extensions, such as extension of Chena Hot Springs Road to Twin Mountain, construction of a road to the Slate Creek asbestos deposit or a major rail extension.

Provided we receive the cooperation of the National Park Service, the feasibility study through location approval is expected to take about 27 months to complete. Because of this timeframe, we recommend that the lapse date be extended to June 30, 1987.

The amount of $500,000 for the study is adequate.

February 25, 1985

The Honorable Jack Coghill
Chairman
Senate Transportation Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Coghill:

Since statehood, Denali National Park and majestic Mt. McKinley have been one of Alaska's major travel attractions. A recent research report released by our Division of Tourism and compiled by the Department of Labor entitled "Alaska Traveler Survey and Visitor Industry Analysis 1983" shows that more than 70 percent of summer highway pleasure visitors indicated they had visited Anchorage and Fairbanks and 60 percent of these visitors reported they had visited Mt. McKinley/Denali.

Certainly a growing need for access into and through the park suggests that alternative access be explored. The legislation you have proposed in SB 49 calling for a feasibility study of building the Kantishna Access Highway would be a step in this direction.

Because traffic to the park continues to grow and considering the time needed to conduct a feasibility study, the sooner the necessary engineering and cost information is compiled, the sooner our State can move to have some control over the traffic flow to this unique vacation destination. The more visitors who can view the mountain and enjoy our wildlife, the more who will return home with an unequalled vacation experience.

Best regards,

Don Dickey

April 3, 1985

The Honorable Frank Murkowski, Stevens Young
317 Hart Building
Washington, D.C. 20510

Dear Frank:

During this legislative session, the Senate Transportation Committee, of which I am chairman, has considered a proposal to construct a Kantishna access road north of the Alaska Range to connect the Kantishna area with the Parks Highway.

Our State's most popular tourist attraction, the viewing of Mt. McKinley, has disappointed many tourists because inclement weather conditions prevent adequate viewing of the mountain. Summer tourists plan well in advance to visit our great state and the continent's highest mountain. According to Denali Park officials over 50% of the visitors do not even get a glimpse of Mt. McKinley because crowded conditions on the park road and at park facilities do not allow them to stay until the weather clears.

The proposed highway will help solve this problem by providing access to many excellent viewpoints of the mountain. The road will also allow access to private property in the area which can be used by individuals for the construction of new hotels and tourist facilities. Tourists can then be assured of a more satisfying visit to the park, and therefore, a more pleasurable trip to Alaska.

I have received correspondence from a variety of interested groups, including private tour groups and the Alaska State Division of Tourism recognizing the need to develop this project.

Tourism is Alaska's second largest industry. In light of the State's declining oil revenues, it seems prudent to me that we invest in this growing sector.

LETTER TO ALASKA DELEGATION

The proposed road to Kantishna would not only have positive effects on the Denali National Park and Alaska's tourist industry, it would also benefit the mining industry.

The Alaska Miners Association and its 2000 members have extended their support. Many rich mineral deposits are being worked - or have been identified - in the Kantishna area, and the existing access road is limited for miners to certain nighttime hours in the summer.

Presently, mining trucks cannot compete with tour buses which use the road all day long. A new highway will solve this problem and should enable further mining development.

The agriculture industry will also share the benefits of construction of a highway. Rich agricultural land exists in the area. Easy access to these lands will be of value.

The Department of Transportation and Public Facilities is in the process of adopting a five-year plan to answer our highway problems. Construction of the Kantishna Highway is part of that answer; particularly when we consider the growing pressure of visitors on Denali and the pivotal role such a road would play. Federal funding will be necessary to study and implement this project. I urge you to consider the construction of the Kantishna Access Highway and look forward to your reply.

Enclosed with this letter is a synopsis of the Kantishna Access Highway and various correspondence in support of this proposal.

Sincerely,

JBC:mcm

Re: Background materials for CSSJR 10

On Friday, March 15, the committee will consider CSSJR 10 (Res) which urges DNR and DOT/PF to enter into a memorandum of understanding with BLM regarding identification and establishment of RS 2477 rights-of-way throughout the state. These rights-of-way were created under a federal law which dates back to the 1860s, which said in essence that if a person blazed a trail across unappropriated federal lands, that became a public right-of-way. Now, with federal and state bureaucrats formulating land use plans, many of those public access ways are being threatened with vacation, if the State government does not act to assert its public right to the right-of-way.

The background materials, particularly the memorandum from the Citizens' Advisory Commission, explain the problem fairly well. Along with a highlighted copy of the Resources CS, these materials include:

- A statement prepared by Senator Coghill for presentation to the Resources Committee hearing

- The Citizens' Advisory Commission memo explaining the history of the problem

- The currently-effective M.O.U. between DOT/PF, DNR and BLM regarding the northern portion of the state.

- BLM position statement on RS 2477 rights-of-way

- BLM notation memo describing the procedure and effect of BLM notations of RS 2477 rights-of-way on BLM plats

- BLM memo to the Bureau of Indian Affairs regarding RS 2477 rights-of-way over native allotment parcels

- An inventory of RS 2477 trails compiled for assertion by DNR

Offered: 3/4/85

IN THE SENATE BY THE RESOURCES COMMITTEE

CS FOR SENATE JOINT RESOLUTION NO. 10 (Resources)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

Requesting that the Department of Natural Resources and the Department of Transportation and Public Facilities expedite the identification and establishment of rights-of-way for roads and trails on federal Bureau of Land Management plats which qualify under RS 2477.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

WHEREAS the Alaska National Interest Lands Conservation Act of 1980 placed 124 million acres of land in Alaska into 71 federal conservation units, and outlined specific use requirements and restrictions for those units; and

WHEREAS, contrary to the provisions of the Alaska National Interest Lands Conservation Act of 1980, there was no provision for establishing or protecting a transportation system in the development of comprehensive management plans for each conservation unit by the responsible federal management agency; and

WHEREAS several of the comprehensive management plans have been completed without recognition of existing roads and trails, preventing public access through these units to state and private lands and to state waters; and

WHEREAS comprehensive management plans for a minimum of nine national park and preserve units and five fish and wildlife refuge units are to be completed during calendar year 1985; and

WHEREAS the federal statutory authority for the establishment of

ADDED IN RESOURCES

recognized rights-of-way for roads and trails is contained in RS 2477 (43 U.S.C. sec. 932); and

WHEREAS the Department of Natural Resources and the Department of Transportation and Public Facilities on September 28, 1984, signed a Memorandum of Understanding with the federal Bureau of Land Management involving the northern region of Alaska only, establishing the procedure under which the rights-of-way could be recognized on Bureau of Land Management plats and in comprehensive plans for conservation units;

BE IT RESOLVED by the Alaska State Legislature that the Department of Natural Resources and the Department of Transportation and Public Facilities immediately develop, in consultation with other affected land owners and managers, and propose a Memorandum of Understanding with the Bureau of Land Management relative to the remainder of the state; and be it

FURTHER RESOLVED that the state agencies involved affirmatively solicit information from miners, engineers, land surveyors, environmentalists, outdoor groups, landholders, or other persons or organizations that may have knowledge of the historic use of roads and trails to assist the departments in the identification of those roads and trails that could qualify under the provisions of RS 2477 (43 U.S.C. sec. 932) for addition to the state transportation system, and that may be useful to the federal agencies developing comprehensive management plans for the various Alaska National Interest Lands Conservation units; and be it

FURTHER RESOLVED that the involved state agencies develop draft policies regarding management, maintenance, liability, vacation, categories, widths, and other relevant concerns related to RS 2477 roads and trails, and that the agencies review these draft policies with affected landowners and managers, and then present these draft policies to the legislature during the second session of the Fourteenth Alaska State Legislature.

COPIES of this resolution shall be sent to the Honorable Bill Shef-

field, Governor of the State of Alaska, to the Honorable Esther Wunnicke, Commissioner of Natural Resources, to the Honorable Richard J. Knapp, Commissioner of Transportation and Public Facilities, and to Michael J. Penfold, State Director of the Bureau of Land Management.

Citizens' Advisory Commission on Federal Areas

515 Seventh Avenue
Suite 310
Fairbanks, Alaska 99701
(907) 456-2012

TO: ALASKA LAND USE COUNCIL MEMBERS

FROM: CITIZENS' ADVISORY COMMISSION ON FEDERAL AREAS

RE: [redacted]

DATE: SEPTEMBER 13, 1984

In 1866 the U.S. Congress passed a law entitled "An Act granting the right of way to Ditch and Canal Owners over the Public Lands, and for other Purposes." Section 8 of this act, which generally dealt with mining activities on the public lands, read as follows: "And be it further enacted, That the right of way for the construction of highways over public lands, not reserved for public uses, is hereby granted."

This grant, more commonly known as Revised Statute (RS) 2477 (43 USC §932), was a standing offer by the Federal government until it was repealed with the passage of the Federal Land Policy and Management Act (FLPMA) of 1976. While RS 2477 is no longer the legal basis for the construction of new public highways, valid existing rights granted to the Territory, State and public of Alaska during the period of the act's efficacy are protected by FLPMA Section 701 and reaffirmed by ANILCA Section 1109.

There are perhaps 150 or more RS 2477 rights of way in Alaska, concentrated primarily in the interior, which were accepted directly by the public of the State and the Territory through actual construction and use. This is exclusive of the Section-line right of way dedicated by the State in AS 19.10.010. which legislation acts as formal acceptance of the grant offered. Informal acceptance, that which is accepted directly by the public through actual use, is an equally valid right recognized in case law on the subject.

On State owned lands, authority for the management of these public rights of way is vested in both the Department of Natural Resources (DNR) and the Department of Transportation and Public Facilities (DOT/PF). On Federal and private lands, DOT/PF has primary authority as the managing agency. This authority would extend to those ANILCA lands which were vacant and unreserved public lands during the period of time when the grant was in effect in the Territory and State. The Alaska Organic Act of 1884 was the legislation which brought United States law to Alaska, including RS 2477, and can be regarded as the date at which the grant became effective in the Territory.

In 1923 the Territorial legislature formally accepted the grant by dedicating all Section lines to be public highways with an

private or non-federal public land inholdings within the conservation system units, and to such lands adjacent to conservation system units, and are thus unaffected by the passage of this bill."

The State officials responsible for asserting the State's claims and managing these rights of way on behalf of the Alaskan public have been reluctant to do so. Perhaps this is due to a desire to de-polemicize the relations between the State and Federal governments since the passage of ANILCA. However, an absence of both a clear policy and the political will to follow through on such a policy is tantamount to a "de facto" abandonment of these rights of way. This Commission is implacable in its opposition to such an abandonment.

The Yukon-Charley National Preserve case involves more than the issue of access by RS 2477 and will be settled in a court of law. One thing is clear however, according to personnel in both the Alaska Department of Transportation and the Department of Natural Resources, the trail used in this instance is a valid, documented RS 2477.

The Citizens' Advisory Commission on Federal Areas proposes the formation of a work group or task force which will establish a procedure to confirm the State's RS 2477 claims. The Commission requests that the member agencies of the ALUC cooperate fully in the implementation of this proposal. Such cooperation would include agency acknowledgement of identified RS 2477 rights of way in the planning efforts of the CSUs, as well as adequate personnel and funding for the necessary research.

The Commission recommends that the Alaska Department of Transportation and Public Facilities and the Department of Natural Resources act as the co-lead agencies on behalf of the State in the task force. We recommend the Bureau of Land Management as the lead agency for the Federal government.

This matter is in urgent need of attention. Access to legitimate inholdings on the CSUs is not being adequately addressed despite the guarantees of ANILCA Section 1110. In the absence of a clear initiative on the part of the State, there is little the land management agencies of the Federal government are able or willing to do on the issue of RS 2477 while plans for the CSUs are being prepared. Timely action by the appropriate State agencies is necessary to ensure federal and private recognition of RS 2477 rights of way.

The Citizens' Advisory Commission on Federal Areas believes the ALUC is the proper channel through which this problem may be addressed. Formation of an intergovernmental task force will clear up some of the unanswered questions faced by private and public land managers.

easement of either 66 feet or 100 feet depending on the land status at the time of the dedication. Informal acceptance of the grant has occurred every time men cut their way through the wilderness during the gold rush in effect constructing public highways for all to use. Many years of use by succeeding fortune seekers, trappers, traders, subsistence users and recreationists along these routes has reinforced this legacy. Once granted and accepted, the vacant, unreserved public lands over which the right of way lies are severed from ownership by the federal government and pass to the Territory, the State or the public of those political entities.

The Alaska National Interest Lands Conservation Act (ANILCA) mandated the preparation of management plans for the lands added to the Conservation System Units (CSUs) created by that act. Unfortunately, both the Federal and State agencies have for the most part not adequately considered these public highways in the planning efforts now underway. Failure to confront the issue of RS 2477 has and will continue to do harm to the interests of the State, the Federal government and the Alaskan public.

Recently, a miner was arrested by Park Service personnel within the bounds of the Yukon-Charley National Preserve while moving a bulldozer along the Bulenberg Trail which both he and State officials claim is a valid RS 2477 right of way. The miner has patented and unpatented mining claims in the National Preserve to which he is guaranteed access by Section 1110 of ANILCA. These "guarantees" are honored by requiring miners and other traditional users of the lands in question to contend with considerable amounts of paperwork to receive permits providing access to these lands. This Commission believes that this system of permitting is contrary to the spirit and the letter of the law where legitimate RS 2477s are involved. Formal recognition of valid RS 2477 rights of way by the various Federal agencies would simplify the problem of access and allow the use of a transportation system that has been in existence for over eighty years. The use of valid rights of way belonging to the State of Alaska should not be subject to the issuance of permits by Federal land managers.

This is clearly the intent of the Congress as evidenced by the report of the Senate Energy and Natural Resources Committee (Report #96-413; November 14, 1979; page 303): "Those private lands, and those lands owned by the State of Alaska or a subordinate political entity, are not to be construed as subject to the management regulations which may be adopted to manage and administer any national conservation system unit which is adjacent to, or surrounds, the private or non-federal public lands. Federal laws and regulations of general applicability to both private and public lands, such as the Clean Air Act, the Water Pollution Control Act, U.S. Army Corps of Engineers wetlands regulations, and other Federal statutes and regulations of general applicability would be applicable to

SEMINAR
ON
SURVEYING & TITLE PROBLEMS

Friday, May 3, 1985

Egan Room
Centennial Hall
101 Egan Drive
Juneau, Alaska 99801

Totem Chapter 59 is presenting a program on Surveying and Title Problems. This program is designed to offer information on how the various surveying and title problems affect the private sector, Native organizations, municipal governments, and State and Federal agencies.

This program is intended for appraisers, attorneys, engineers, loan officers, realty brokers, R/W personnel, title examiners, and others concerned with the examination and insuring land titles and with platting, recording and surveying of lands in Alaska.

This program includes speakers from surveying organizations (both government and private) and title insurance agencies.

SEMINAR SCHEDULE

2:00-2:10 - Introduction
Thomas P. King, Seminar Coordinator

2:10-3:40 - "The Whys and Wherefores of Survey Controls and Evidence and Right of Way Problems with Case Histories"
Thomas G. Keopple, Owner, Keopple Surveys and
Robert J. Hungerford, Location Section, Southeast Region, Alaska DOT&PF

3:40-3:50 - Break

3:50-4:20 - "Procedures for Ordering Title Insurance"
David Hemmerling, Manager, Trans America Title Company

4:20-4:50 - "What Title Companies Require from Surveyors"
Glenn Prince, Manager, Title Insurance Agency

4:50-5:00 - Seminar Wrap-up
Thomas P. King, Seminar Coordinator

TOTEM CHAPTER 59 MEETING

Friday, May 3, 1985

Lumberjack Room
Cape Fox Sheffield Hotel
51 Egun Drive
Juneau, Alaska 99801

6:30-7:00 - Social Adjustment
7:00-8:00 - Dinner
8:00-9:00 - Chapter Meeting
Speaker: Senator Jack Coghill
Chairman, Senate
Transportation Committee

NONVERBAL COMMUNICATIONS
COURSE 210

Saturday, May 4, 1985

Egan Room
Centennial Hall
101 Egan Drive
Juneau, Alaska 99801

A high percentage of the meaning you place on a face-to-face interaction is nonverbal. This course shows you how to read the nonverbal signals being sent; it makes the students aware of the signals thay are unconsciously sending.

COURSE OUTLINE

Introduction
- External Clues to Internal States
- Touch Behavior
- What Meanings are Conveyed Nonverbally
- How Meanings are Conveyed Nonverbally

Facial Expressions and Eye Behavior
- How to Interpret
- How to Use
- How to Assess Impacts

Body Language
- Posture
- Gestures and Mannerisms
- Body Lean, Body Aim

Are You Close-in or Far-out?
- Territorially
- Human Distances
- Spacial Arrangements
- Social Networks

Course Length: 1 day - 8:30 - 5:00

SR/WA Credits: 16 in negotiations

Recertification Hours: 8

Instructor: Mike Moorman, Juneau, Alaska. Mike obtained his Ph.D. in Business Administration from The University of Washington. He has taught Management at Cal State(Hayward) and University of Alaska (Juneau). He spent 2 years teaching in Japan. He is now employed by the Office of Management & Budget in the Office of the Governor.

HISTORY OF THE ASSOCIATION . . .

The Association was founded in 1934 in Los Angeles by Frank C. Balfour, who was in charge of the right-of-way program for the California Department of Highways. The Association has since grown to 70 chapters with a total membership of over 11,000. Chapters now extend from Puerto Rico to Alaska and Hawaii to Quebec.

During the early years of the Association, representatives from the highway industry made up the major segment of the membership. This has significantly changed, with the Association now representing a wide range of public and private agencies and companies and a corresponding range of real estate activities. As a result, through training and contact, members have the opportunity not only to grow within their own areas of expertise, but also to become better acquainted with related disciplines.

MEMBERSHIP . . .

The International Right of Way Association (IR/WA) is an individual membership Association - there are no corporate memberships. Membership is restricted to individuals who are engaged in the right-of-way field. Right-of-way embraces the variety of specialized disciplines involved in the acquisition, management or disposal of real property for public agencies or investor-owned companies, including:

- Law
- Appraisal
- Property Management
- Engineering
- Relocation Assistance
- Environment
- Acquisition/Negotiation
- Land Titles
- Management

RESOLUTION #2-185

RESOLUTION PERTAINING TO ESTABLISHMENT OF RS 2477 RIGHTS-OF-WAY

WHEREAS, the development and production of natural resources in Interior Alaska is a significant element in the economic base of the Fairbanks community and the welefare of its inhabitants; and

WHEREAS, expansion of resource production is dependent on adequate access to areas in which resources are located; and

WHEREAS, access to a number of resource areas in Interior Alaska may become possible by the use of routes established in the past and which are included in the inventory of trails owned by the State of Alaska as asserted by Memorandum 00-2528, April 8, 1974, to the U.S. Bureau of Land Management; and

WHEREAS, the procedures for the assertion of RS 2477 Rights-of-Way by the State of Alaska has been established in a Memorandum of Understanding between the Alaska Department of Natural Resources (DNR), and the Alaska Department of Transportation and Public Facilities (DOTPF, and Bureau of Land Management (BLM), September 28, 1984, promulgated by the interior regional offices of these three agencies; and

WHEREAS, a coordinating committee comprising a representative of each agency (John Martin, DOTPF; Joseph Sullivan, DNR; Dwight Hempel, BLM) has been established; and

WHEREAS, the historical research, documentation and mapping required for the routes already inventoried and identification of trails not previously inventoried will require a significant effort and John Martin, DOTPF, and Joseph Sullivan, DNR, are investigating the manpower and funding requirements to accomplish this effort.

NOW THEREFORE, be it resolved by the Greater Fairbanks Chamber of Commerce that the implementation of RS 2477 Memorandum of Understanding dated September 28, 1984, AK-023-MU5-002, be strongly supported; and

BE IT FURTHER RESOLVED, that the State Legislature encourage this project by supporting adequate budget and/or priority assignment of personnel in DOTPF and DNR and similar support by given by the Federal Government to BLM; and

BE IT FURTHER RESOLVED, to encourage all organizations and individuals to develop and submit to DOTPF and DNR a list of priority routes known to them in Interior Alaska which will be of maximum benefit for mineral, agricultural, commercial and recreation and that routes which can support more than one of the above be given particular emphasis; and

BE IT FURTHER RESOLVED; that full consideration be given to the corridor concept, alternate established routes and to existing land rights of others, including private owners and the national interest lands, in identifying RS 2477 Rights-of-Ways; and

BE IT FURTHER RESOLVED, that copies of this Resolution be forwarded to:

(907) 456-2012

February 26, 1985

Honorable Bill Sheffield
Governor
State of Alaska
Pouch A
Juneau, Alaska 99811

Re: RS 2477 Rights-of-Way

Dear Governor Sheffield:

You will recall that the Citizens' Advisory Commission on Federal Areas in September proposed formation of a task force sanctioned by the Alaska Land Use Council (ALUC) which would establish a procedure for confirming the State of Alaska's claims to RS 2477 rights-of-way. Our specific proposal was withdrawn when Bureau of Land Management (BLM) State Director Mike Penfold revealed that the Department of Natural Resources (DNR), the Department of Transportation and Public Facilities (DOTPF) and the BLM were negotiating a Memorandum of Understanding (MOU) for the implementation of a procedure similar to the one we were proposing. The MOU was signed September 28, 1984.

Our proposal advised that a necessary element in the success of such an undertaking would be the cooperation of the member agencies of the ALUC in the implementation of any procedure developed. Such cooperation would include adequate funding and manpower for the research needed. At this time we must advise you that it is necessary that adequate funds be allocated to permit the State agencies involved, DNR and DOTPF, to meet their objective of identifying and confirming RS 2477 rights-of-way.

Management authority for RS 2477 rights-of-way which cross non-State lands is vested with the Alaska DOTPF. We recognize that there are legitimate management concerns espoused by Federal land managers, Native and other private landowners and environmental groups. Adequate opportunities for interested parties to plan for State management of these rights-of-way exist and can be expanded if necessary, but only if the State retains its present authority to do so.

You are no doubt aware of the rigorous permitting process that Title XI of ANILCA requires prior to construction of a Transportation and Utilities System (TUS) on or across a Conservation System Unit (CSU). Most knowledgeable people in and out of the State government regard this process as extremely difficult, if not completely unworkable. Because of the difficulties inherent

CITIZEN'S ADVISORY COMMISSION 2-26-85

in the Title XI process, it is critical that the management authority over, and State ownership of, RS 2477 rights-of-way be adequately recognized in the CSU planning efforts of federal agencies. Language recently adopted by the National Park Service (NPS) for inclusion in the General Management Plans that agency is preparing illustrates this:

> "The Park Service is aware the State might assert certain claims of rights-of-way under R.S. 2477. The Service intends to cooperate with the State (and any other claimant) in identifying these claims, the nature, extent and validity of which may vary depending on the circumstances under which they were acquired or asserted. Notwithstanding that certain R.S. 2477 rights-of-way may exist, it will still be necessary for users of any right-of-way to comply with applicable Park Service requirements." (emphasis added)

This is so despite the assurances of ANILCA Section 1109 which states:

> "Nothing in this title shall be construed to adversely affect any valid existing right of access."

We are painfully aware of the decline in State revenues and the necessity to minimize unessential expenditures. We are also aware that the economy of the State of Alaska is overly dependent upon the oil industry. The need to develop our resources in a rational manner to diversify our economy is more evident every day. The timber, mineral and tourist industries of the State must have access in order to expand. The rights-of-way granted the State through RS 2477 can play a vital role in this effort both as an alternative to Title XI and as leverage in securing more favorable decisions in Title XI and other resource management issues on federal lands.

We believe that it is of the utmost importance that the State of Alaska's ownership and management of these public rights-of-way be forcefully defended. By doing so, we can go a long way towards ensuring that debate over proposals to cross a CSU with a transportation system is managed here in Alaska rather than in Washington, D.C. As governor of our State, your support is necessary for the success of this endeavor.

Senate Joint Resolution #10 (SJR #10), sponsored by a bipartisan group of legislators, requests that DOTPF and DNR expedite the identification and establishment of rights-of-way for roads and trails on federal BLM plats which qualify under RS 2477. The Resolution also calls for the expansion of the current MOU, which presently applies only to the Interior region, into a statewide process. We endorse this resolution and urgently request that you give it your strongest support as well.

We also ask that you use the power of your office to insure that DOTPF and DNR receive adequate funding to implement an effective course of action pursuant to the objectives of SJR #10.

We reiterate our earlier acknowledgement that legitimate concerns by federal land managers, Native land owners and environmental groups exist. But these concerns over the management of RS 2477 rights-of-way are separate from the issue of ownership, and are more properly accommodated in the State transportation planning process. To allow management concerns to interfere with confirming ownership of the rights-of-way is to put the cart before the horse; it is analogous to requiring an "acceptable" land use plan to be in place before the State or the Native corporations can be issued a land conveyance.

We hope you will consider these points and see the interests of the State require positive action to preserve the full range of State prerogatives.

Sincerely,

Phil R. Holdsworth

Anchorage, Alaska [illegible]
(907) 272-1254 277-[illegible]35

RESOLUTION ADDRESSING PROPOSED PLOTTING OF R.S. 2477 RIGHTS-OF-WAY TO PUBLIC LAND RECORDS

WHEREAS, the State of Alaska and the Bureau of Land Management have entered into a memorandum of understanding to identify and plot RS 2477 rights-of-way to the public land records; and

WHEREAS, the Alaska Native Claims Settlement Act corporations are major land holders which may be severely impacted by this action without an opportunity to participate in the decisions; and

WHEREAS, the notation of the public land records may provide the State of Alaska with added weight, in the case of litigation of an RS 2477 right-of-way, without a factual basis; and

WHEREAS, neither the State nor the Bureau of Land Management propose to adjudicate RS 2477 rights-of-way under the terms of the memorandum of understanding; and

NOW, THEREFORE, BE IT RESOLVED by the Alaska Native Land Managers Association that the Alaska Native Land Managers Association opposes the plotting of RS 2477 rights-of-way to the public land records.

WE FURTHER REQUEST that the following actions be taken:

1. Alaska Native Claims Settlement Act corporations are actively involved in the identification process, and

2. The Bureau of Land Management and the State of Alaska establish clear standards of construction and use against which all RS 2477 rights-of-way are to be considered, and

3. The issue of abandonment is clearly defined and addressed, and

4. Each RS 2477 right-of-way is adjudicated by the Bureau of Land Management, and

5. An accurate centerline description is provided to the Bureau of Land Management prior to plotting, and

6. A case file is established which sets out the history of each RS 2477 right-of-way together with complete documentation of the timing, duration type and amount of use and location.

BE IT FURTHER RESOLVED that this resolution be forwarded to the Alaska Federation of Natives, the Bureau of Land Management, the State Department of Natural Resources, the State Department of Transportation and Public Facilities, Alaska's Congressional Delegation, and to all State legislators.

Duly adopted this 30th day of January, 1985, in Anchorage, Alaska.

Frances E. Zimmerman

December 21, 1984

Mr. Mike Penfold
State Director
Bureau of Land Management
Box 13
701 "C" Street
Anchorage, Alaska 99513

Dear Mr. Penfold:

We recently received copies of a Memorandum of Understanding (MOU) between BLM's Fairbanks District, DNR's North Central District, and DOT/PF's Northern Region. The MOU states in its Purpose that federal, state and local officials need to know the locations of RS 2477 rights-of-way assertions in order to manage their respective lands. The MOU goes on to set procedures under which DOT and DNR will submit evidence supporting RS 2477 r/w assertions and BLM's Fairbanks District will plot these assertions on the Master Title Plats (MTP).

We believe this is a serious mistake on BLM's part and will only add more confusion to land management in Alaska. RS 2477 r/w carry much more uncertainty than just their location. There continues to be unanswered questions about their width, the allowed uses, degree of public use needed to establish a valid grant; abandonment, and maintenance. By recording the State's asserted claims on MTP's, BLM perpetuates these vagaries and even passes them on to the recipients of lands conveyed by BLM. It is BLM's responsibility to convey clear title to land and it is the State's right to seek legal remedies to whatever argument they have with such title. By placing such nebulous claims as RS 2477's on their records, BLM adds credence to unproved assertions and puts those who receive BLM conveyances in the position of having to defend their titles from the moment they receive them. A government title then becomes a sham since the basic rights of the owner aren't even defined by the agency conveying the title.

Prior to the MOU, DOT/PF prepared a briefing paper on RS 2477 r/w which states in part:

> "If the State documents its claims, other parties are put in the position of challenging the State's claim rather than vice versa. Presently, the State would have to prove 'valid existing rights' on conveyed land. If the trails

TANANA CHIEFS OPPOSITION

were already on the status plats, anyone who disagreed would be in the position of challenging the State's claim. Asserting an RS 2477 claim in this manner is only an administrative determination since BLM does not adjudicate RS 2477 claims. If someone were to challenge the State, the State's claim would still have to be proven in court; however, we certainly would be in a much better position to do this."

Clearly the State's strategy is to cultivate doubt about titles to lands crossed by their asserted rights-of-way and to place the burden of proof on the patentee. BLM is promoting this strategy in your own Instruction Memo, AK-85-72 of November 28, 1984 stating that "the BLM does not need comment or concurrence from Native Corporations to note assertions on lands that it manages (including lands that are merely selected by such corporation)". Furthermore, that, "A Native Corporation is free to challenge the assertion, in court, after it acquires title".

The use of the word 'free' in this context is ludicrous. Native Corporations and individuals should be FREE from receiving clouded title to their lands after waiting 13 years, and FREE from having to defend their titles from assertions to nonspecific encumbrances.

By putting the State's assertions on MTP's, the BLM invites trespass by third parties such as miners, hunters and recreationalists. We believe that BLM, in effect, is creating the conditions whereby such trespass will certainly result. This would affect not only private lands but national parks, wildlife refuges, and wilderness areas, since the MOU covers "any land within the State of Alaska,...both state and non-state lands".

Section 4 of the MOU cites a State court decision contrary to BLM Manual 2801 B.1.a., which requires actual construction, rather than mere use to establish a valid grant. We would like to know which interpretation will apply to federal lands? Since the MOU only names the Fairbanks Distict, we would like to know what the statewide procedures are and what your bureauwide procedures are. We would also like to know what weight these assertions have on lands already patented or IC'd, and on Native Allotments; whether they are pending, approved or certificated. We would also like to know if landowners affected by these RS 2466 claims are being notified by BLM of these assertions and being given an opportunity to submit material for the case files.

These right-of-way assertions are going to cloud land titles all over the State and BLM's present course is only passing the problem on to those receiving BLM conveyances. It is BLM's responsibility to convey CLEAR title and to protect the integrity of selected lands under BLM's INTERIM management. To accomplish this BLM should seek a statute of limitations for asserting rights-of-way under RS 2477. There should be Federal regulations that clearly define the requirements to be met before a valid grant can issue, as well as the width of the right-of-way, the responsibility for maintenance, the allowed uses, seasonal use, cessation of use, notice and appeals. These rights-of-way will greatly affect the management and development of all our lands. Their requirements and rights granted must be no less clear than any other type of right-of-way and cannot be left to interpretation if a Federal land patent is to carry its weight as the beginning in the chain of title. Valid public access certainly needs to be protected, but in the present situation RS 2477 jeopardizes far more than it protects.

Sincerely,

TANANA CHIEFS CONFERENCE, INC.

Northern Alaska Environmental Center

218 DRIVEWAY
FAIRBANKS, ALASKA 99701
(907) 452-5021

TO: Senate Resources Committee
Arliss Sturgulewski, Chair

FROM: Randy R. Rogers, Director, NAEC

SUBJ: SJR 10--R.S. 2477

Date: February 21, 1985

In September the Bureau of Land Management and the Alaska Departments of Transportation and Natural Resources signed a memorandum of understanding, the full implications of which those parties are most likely not even aware. This memorandum establishes a procedure for placing formal assertions of R.S. 2477 rights-of-way by the state on both state and federal master title plats, signifying the legitimization of a state right-of-way.

The process of developing this agreement took place with absolutely no public involvement and, in fact, BLM would not even allow representatives of the Northern Alaska Environmental Center to review copies of the memorandum while in its draft stages. In addition to the lack of public involvement, representatives of the National Park Service, Fish and Wildlife Service, and native corporations, whose lands may be substantially impacted by this agreement, were not included on the committee that drafted the memo.

Revised Statute 2477 was originally established by the U.S. Congress in the Act of July 26, 1866. The entire, original statute provided:

> "The right of way for the construction of highways over public lands not reserved for public uses is hereby granted."

This law was established at a time when automobiles and D-9 Cats did not exist and a "highway" referred to a wagon trail at most.

Because the law is so vague most of the parameters defining the actual use of R.S. 2477 have been established through case law. Yet, there have been very few cases in Alaska which define how the law applies within the state. Despite this lack of a conclusive definition, the memorandum of understanding uses what small body of law is available to establish criteria for the BLM to accept the assertions. This will result in placing the burden of legally challenging the application of the law on individual persons who disagree with the shaky BLM definition.

There are literally hundreds of historic trails in Alaska which could possibly be claimed under R.S. 2477. Many of these trails cross portions of conservation units and have the potential to severely compromise the purposes for which the units were established.

ENVIRONMENTAL CENTER ANALYSIS

An example of one such trail is the Bielenberg Trail where a miner was arrested this fall when he moved mining equipment across the Yukon-Charley National Preserve to his mining claims on Woodchopper Creek. The miner contends that, because the route he was using is a public highway established under the terms of R.S. 2477 (a claim which has not been legally proven), he does not need an access permit from the National Park Service.

This case of trespass on NPS lands is now in court. Meanwhile, the State of Alaska has filed a formal assertion of this right-of-way with BLM under the process defined in the new memorandum of understanding, an action which jeopardizes NPS' position in court because of the R.S. 2477 policy of BLM. BLM, it should be pointed out, is an agency of the Department of the Interior, as is NPS.

Another controversy with regard to R.S. 2477 which is extremely disturbing involves Gates of the Arctic National Park. In February, 1984, the Department of Natural Resources sent a letter to NPS stating that, because the route of the Coldfoot Classic Sleddog Race lies on state-claimed R.S. 2477 rights-of-way and on navigable waterways, the organization conducting the race need not obtain a special-use permit from the Park Service.

This action regarding a sleddog race may be viewed as an innocent action; however, under the current state policy, or lack of policy, once the right-of-way is established it could be used for unrestricted mining access or other purposes which would be devastating to the wilderness resources of the park. In this instance, NPS responded to the state that the route would not be considered a valid right-of-way until legally proven through the courts.

This example further demonstrates the widely differing interpretations of R.S. 2477 by NPS and BLM. Although the agreement between BLM and the state is not intended to apply to lands not under BLM management, validation of the rights-of-way on BLM lands could establish a precedent that would be detrimental to legal challenges of their validity on NPS, Fish and Wildlife Service, native, or private lands.

In developing its R.S. 2477 policy, BLM has obviously not considered its ramifications to other land managing agencies, nor has it thoroughly considered how it will affect land under its own jurisdiction.

At the November 15, 1984, meeting of the Fairbanks District BLM Advisory Council, a BLM representative indicated that, if the state asserted an R.S. 2477 claim into the primitive portion of the White Mountains National Recreation Area, (which is closed to all off-road vehicle use) and the assertion met the criteria spelled out in the memorandum of understanding thereby ending up on the BLM master title plats, a miner could drive a D-9 Cat through the primitive area with no BLM approval required.

Many potential R.S. 2477 routes are important for their recreational use, but their status as such is unclear because of the confusion surrounding R.S. 2477. Two primary examples are the Chena Hot Springs Winter Trail and the Circle-Fairbanks Historic Trail.

In July, 1982, the state acknowledged that the Chena Hot Springs Winter Trail has standing as an R.S. 2477 right-of-way yet refused to protect the trail's recreational properties because it is not a "main or significant arterial thoroughfare." When the Fairbanks North Star Borough discussed the establishment of the Circle-Fairbanks Trail as a recreational trail, the Department of Natural Resources indicated that, because the trail is identified as an R.S. 2477, they could do nothing to manage it for recreational purposes.

The importance of clearing up the R.S. 2477 issue is demonstrated by the fact that over 30 percent of recreational trails in the Fairbanks North Star Borough inventory are tentatively identified as R.S. 2477 rights-of-way by the Department of Transportation.

Equally disturbing as the recent developments with the R.S. 2477 issue is that, although the new agreement between the state and BLM defines a procedure for placing R.S. 2477 rights-of-way on land status plats, thereby legitimizing the claims, the involved state agencies are not certain who will be responsible for managing, maintaining or accepting liability for the roads. And questions such as what period of non-use constitutes abandonment of the rights-of-way, if the rights-of-way are restricted to historical types and seasons of use, and what width the rights-of-way are, remain to be answered.

The manner in which this major state and federal action has taken place is highly questionable. It is irresponsible land management on the part of both the BLM and the state to establish an agreement or take action to validate any of these possible rights-of-way before it is known what purpose they will serve, what effects they will have on management of surrounding lands, how they will be managed, and where the legal responsibilities lie. The need to delineate how R.S. 2477 will be dealt with in Alaska is clear, but a procedure to administratively approve the rights-of-way without public involvement, and prior to an adequate understanding of how they will be managed makes a travesty of safeguarding the public interest.

The state and BLM should abolish the existing memorandum of understanding, examine the basic legal, fiscal, and management responsibilities associated with the rights-of-way, and establish a new procedure for solving this dilemma which is accompanied with full public involvement and the participation of all affected land owners and managers.

Dan Alex, President
Alaska Native Land Managers Association
Pouch 6699
Anchorage, AK 99502

Dear Dan:

Enclosed are copies of a recent MOU between BLM, DNR and DOT/PF (in Fairbanks), and a DOT/PF briefing paper on RS2477 Rights-of-Way. I have serious objections to them from both a land title and a land management perspective.

To begin, RS2477 Rights-of-Way are rights-of-way which, if valid, are rights granted outside the statutory realm of ANCSA or FLPMA, i.e., 43 USC 932. Basically, if a right-of-way is to be determined valid, the land over which it crossed had to be vacant, unreserved, public lands at the time use began and there has to be a determination, (frequently in court if the landowner objected), that there was sufficient public use or expenditure of public funds, to qualify under the statute. If determined valid, the right-of-way width was usually ditch to ditch. The only entity with the authority to adjudicate these rights is a court of law, not the BLM.

What this means in practical terms is that these rights-of-way have never been identified in title documents granted to private landowners in this state or elsewhere in the lower 48 until the State of Alaska pressured BLM to insert these rights-of-ways in native conveyances. Since BLM cannot, by law, adjudicate these rights, they are considered assertions until they are proven.

If a trail or road crossed a private landowners property and the landowner questioned the public's right to use the trail, the owner may block the trail. If the user objects, he can take the landowner to court to protect his right of access, or vice versa.

The MOU, needless to say, was written without native imput. It establishes a de facto adjudication process which places these rights-of-way on BLM's land status documents and ultimately in Native Land conveyances. The Native landowner has no opportunity to protest. The State, on the other hand, has gained another leg up on the private landowner by having these assertions of rights placed on the public land records and Native land title without

INTERIOR VILLAGE ASSOCIATION

an opportunity for complete adjudication in the proper forum. (Please read their briefing paper closely.) If the RS2477 assertion ends up in the land conveyance, the Corporation receives a clouded title document and faces potentially significant management problems.

The management problems can be significant. First, most of these RS2477 assertions are made on cold winter trails. With modern technology many people want to use these trails in the summertime, a period when it is impractical to use the trail in its winter location, so they begin to move this way and that to avoid the pot holes and permafrost areas creating new trails and often serious surface damages. This creates surface damage problems for the landowner. There is also a question whether the public has the right to use a winter trail in the non-winter months.

Secondly, as the DOT/PF briefing paper points out, even if an RS2477 is determined to be valid, the state has reserved the right to decline to maintain the rights-of-way. This leaves the landowner with continued resource destruction and the public using a potentially unsafe public right-of-way. In simple terms, the state wants its cake and eat it, too. I say that if they want the rights of ownership, they should accept the obligation to manage and maintain them!

My recommendation to the Native Land Managers is to consider these points and, if they agree, develop a strategy involving our congressional delegation and state legislators to remove these assertions from the public land records until proven valid in the proper forum and seek legislation that would require the state to accept management responsibility when they assert title.

Sincerely,

Paul C. Costello
President

Lavelle Black
Dept. of Interior
Alaska Program Staff (311)
18th and "C" Streets, N.W.
Washington, D.C. 20240

Dear Lavelle:

Here is the letter and enclosures we discussed today. As I indicated, they create problems in three related areas.

1). To begin, if I were a native landowner, I would be offended that BLM drafted such a document without any visible effort to involve the native community. As my lawyer friends would say, "It flies in the face of ANCSA."

2). Next, the MOU establishes a de facto adjudication of less than fee interests when BLM does not have the authority to adjudicate RS 2477 interests. The only forum to properly adjudicate them is with the landowner, or if that proves to be unsuccessful, in court. The only Federal land title to be prejudiced with these questionable assertions are native lands. In my experience I have never found a Federal patent in the Lower 48 which purported to adjudicate an RS 2477.

3). It represents land management philsophy at its least, i.e., the State would like title any way they can get it, but want "the right to refuse service" (maintenance) to anyone. This creates a conflict between the unsuspecting user and the landowner when a user attempts to use a damaged trail and finds that he cannot because of permafrost degradation, for example. He makes the choice of not going or just moving the trail over a bit to avoid the impassable section. Hence, he infuriates the landowner by destroying surface resources and trespassing. The user then faces an irate landowner, possible criminal charges and the State who chooses to do nothing. The Seventy Mile Trail in Eagle is a good example.

My solution is simple. Revoke the MOU and let the landowners and the State decide in the manner most practical which right is valid and who is responsible for that right. If a right is valid because there is a continuing public use and need, then let the State seek the funds to maintain the right-of-way on a case by case basis. BLM is helping neither themselves

nor the Native community nor, in the run, the taxpayers of this state, in trying to decide what is best for a situation that they have no legal obligation to be involved in.

I hope that this finds you well and enjoying the fall season in Washington. Give my regards to Bob.

Sincerely,

Paul C. Costello
President

LAND MANAGEMENT
JL 23 10 21 AM '84

REVISED STATUTE 2477 RIGHTS-OF-WAY

Legal Basis for RS 2477

Congress by the Act of July 26, 1866 granted rights-of-way for highways over unreserved public lands, and by doing so, established an extensive network of public rights-of-way in Alaska. This Act, now codified as 43 U.S.C. 932, Revised Statute (RS) 2477, states in full:

> "The right-of-way for the construction of highways over public lands not reserved for public uses is hereby granted."

Although RS 2477 was repealed October 21, 1976 by Public Law 94-579, section 706 (90 stat. 2793), those rights-of-way previously established remain valid.

Geographic and Historical Development

In Alaska, RS 2477 rights-of-way are concentrated mainly in the Interior, Western and Southwestern regions of the state and in the Copper River basin. In Southeastern and along the Southcentral gulf coast, RS 2477 was not as important to transportation because of the accessibility via water.

RS 2477 highways have provided much of the access to areas of Alaska in the past and continue to do so. Historically, these roads were used for trade routes and access to mining areas. Today, they serve as access for mineral development , forestry, recreation, agriculture, hunting, fishing, inter-village travel, and access to homesteads, homesites, and other land disposals. Most of the well established, frequently traveled trails appearing on U.S.G.S. topographic maps are RS 2477 highways.

Since the RS 2477 statute was written in such a brief and nonspecific manner, it does not establish criteria for determining the location or width of the rights-of-way nor does it define what constitutes a "highway." What was considered a "highway" 118 years ago when the law was passed differs greatly from the modern concept. Further, a procedure for identifying and claiming rights-of-way was not established.

At this time, there is confusion and differences of opinion regarding the location, validity and extent of RS 2477 highways in Alaska. Although RS 2477 highways exist in several states, this issue has taken on special significance in Alaska because of the remoteness and inaccessibility of much of the state.

Additionally, the Alaska Statehood Act, the Alaska Native Claims Settlement Act (ANCSA), and the Alaska National Interests Lands Conservation Act (ANILCA) all initiated major changes in land ownership in Alaska. As land is transferred from the Public Domain to the State, Native corporations, private individuals, and other Federal agencies, there is a diversity of views regarding access and land management policies. Some landowners wish to regulate use by type of vehicle, weight, time of year, etc. Some favor preserving

DOT/PF HISTORICAL ANALYSIS

access for local residents. Others prefer no access at all. Furthermore, as land is conveyed, the validity of RS 2477's is being questioned. Currently, in land conveyance documents, RS 2477 rights-of-way are protected only with the clause, "valid existing rights," with no visible evidence of them on the Federal or State land status plats. The existing Trail Inventory File, which catalogs many RS 2477 roads, is at a scale of 1:250,000 (standard U.S.G.S quad map) and does not show the the location of RS 2477's in sufficient detail to allow them to be entered on the land status plats.

Need for Procedures

Confusion among State and Federal agencies and private landowners as to the implementation of RS 2477 continues to hinder management and use of these highways. It has become apparent that the public requires assistance in identifying RS 2477 roads. State, Federal and local governments, Native corporations, and other property owners need to know the location and authorized uses of RS 2477 roads in order to reasonably manage their lands.

For rights-of-way, land selection, land claims and other land transfer actions, land status plats serve as part of offical records of land ownership for both the Federal government (through BLM) and the State government (through DNR). It is in the State's and the public's interest to establish these RS 2477 claims on both State and Federal land status plats, thereby asserting the RS 2477 claim and identifying its location. Placing the roads on the status plats would give more credibility to the State's claims and would establish, for the record, both a file and a geographic document asserting the claims. Thus, when land is conveyed, the State and public RS 2477 claims would be much more viable than simply a "valid existing rights" clause in a conveyance document. The location of each trail would be generally established, therefore it would be obvious to anyone researching land status that a right-of-way claim exists across a particular parcel.

If the State documents its claims, other parties are put in the position of challenging the State's claim rather than vice versa. Presently, the State would have to prove "valid existing rights," on conveyed land. If the trails were already on the status plats, anyone who disareed would be in the position of challenging the State's claim. Asserting an RS 2477 claim in this manner is only an administrative determination since BLM does not adjudicate RS 2477 claims. If someone were to challenge the State, the State's claim would still have to be proven in court; however, we certainly would be in a much better position to do this.

Other Findings

Discussions with DNR personnel in Anchorage who had been investigating regulations and court decisions relating to RS 2477's revealed the following points:

1) It appears that the definition of what constitutes a "highway" (which is the term used in the statute), is a matter for each state to determine. In Alaska, AS 19.45.001(8) defines a highway as that which "...includes a highway (whether in the primary or secondary systems), road, street, trail, walk, bridge, tunnel, drainage structure an other similar or related structure or facility, and right-of-way thereof..."

2) DOT&PF has management authority on RS 2477 where they occur on non-state land. Where RS 2477's occur on state land, DOT&PF has concurrent authority with the state agency having management authority over the land (usually DNR).

3) The courts have held that acceptance of an RS 2477 does not "impose on the public authority the duty to maintain." Therefore, a perfectly valid management decision might be to provide little maintenance or not to maintain a particular trail at all. Additionally, lack of maintenance over the years does not imply abandonment.

4) There are contradicting legal opinions regarding use restrictions, right-of-way vacations, and the role of a local government (ie. boroughs) in the management of RS 2477's.

Task Force on RS 2477

This issue was discussed at the Annual Meeting between the Bureau of Land and Regional Management (BLM) Fairbanks District Office and DOT&PF Northern Region on April 27, 1984. At that meeting it was decided to form a regional "task force" to discuss the situation. The Alaska Department of Natural Resources (DNR) was invited to join.

The Task Force on RS 2477 rights-of-way held its first meeting June 15, 1984. BLM, DNR and DOT&PF were present. The meeting established guidelines and procedures for asserting RS 2477 claims and having them established on the land status plats. The procedure is as follows:

1) A claim can be asserted by the State or any private individual.
2) A cover letter asserting a claim or accepting an RS 2477 grant must be submitted along with documentation suporting the date claimed. The date should preferably be based on expenditure of funds (public or private) or the earliest known date of public use. (An individual's time in constructing a road could be "translated" into funds).
3) A map at a scale no smaller than 1:63,360 depicting the route must be submitted with the supporting documentation and cover letter.
4) The trail number and quad number from the existing Trail Inventory File should be noted (if applicable) for clarification and cross-reference.
5) BLM will review each claim to verify that the land was "unreserved public land" as of the date claimed.
6) BLM will issue a serial number and establish a case file for each claim, as will DNR and DOT&PF. All correspondence should reference these numbers.
7) BLM will plot each trail claimed on their Master Title Plats and DNR will plot each one on the State's land status plats.
8) In order to prevent confusion, either DNR or DOT&PF will have the responsibility of submitting all necessary information to BLM.
9) All files, including maps, supporting data, etc., established by one agency should be duplicated and forwarded to the other agencies.

RS 2477 Coordination Committee for Northern Alaska

To provide a orderly manner for claiming RS 2477's and to avoid duplication of effort, the Task Force has suggested establishing an "RS 2477 Coordination Committee for Northern Alaska." This committee would consist of representatives from BLM, DNR and DOT&PF. Its purpose would be to coordinate and

prioritize efforts on asserting RS 2477 claims, to discuss any areas of disagreement and to keep each agency informed on the other agencies' efforts.

RS 2477 Management Review Board for Northern Alaska

Regarding the management of these roads, the Task Force has recommended establishing an "RS 2477 Management Review Board for Northern Alaska." This board would provide a forum to discuss differences relating to the management of RS 2477's. Problems which have come up in the past such as use restrictions, requests to vacate, and alignment, will continue. With contradicting legal opinions, an inter-agency forum for handling these issues would benefit all concerned and provide a multi-agency response to problems. Discussions could lead to possible solutions. Recommendation passed by this board would show a concerted effort by all agencies involved to provide thoughtful management actions. This would also provide one agency with the means to seek additional support in making a management decision. Additionally, any decision would be the result of the actions of several agencies rather than the decision of just one. DOT&PF as manager or co-manager of these roads would have veto power over any board recommendation.

Composition of this board would consist of two members from BLM, DNR and DOT&PF, with one member from the Citizens' Advisory Commission on Federal Areas and one invited member from a related professional organization (i.e., an officer of the International Right-of-Way Association). Temporary membership could be extended to governmental land managing agencies affected by matters under discussion and to private land owners affected. The board would meet as needed at the request of any board members.

Memorandum of Agreement

To implement the Task Force recommendations, a preliminary Memorandum of Understanding (MOU) between BLM, DNR and DOT&PF has been drafted. At this time, the MOU would exist only between BLM's Fairbanks District Office, DNR's Northcentral District, and DOT&PF's Northern Region. Northern and Interior Alaska is most affected by RS 2477 roads. Since the Fairbanks offices of these agencies have begun efforts, and established a precedent with the Bulenberg Trail, it was felt that an MOU at the District/Regional level would serve as a "testing area" for this procedure. Also, the archives of the University of Alaska-Fairbanks are the largest in the state, making Fairbanks better suited for the historcial research. Should this procedure succeed (as we are confident it will) then this MOU, or one similar, could be extended to other regions. A copy of the draft MOU is attached.

The participating agencies are in agreement that an effort such as this seems long overdue. It has the enthusiastic support of the BLM Fairbanks District Manager, Carl Johnson, who will be presenting this issue and the MOU concept to the BLM Advisory Council meeting on August 15, 1984 and to the Haul Road Meeting on August 23, 1984. It also has the support of the DNR Northcentral District Manager, Division of Land and Water Management, Jerry Brossia.

Program Needs

In order to complete this project, a commitment by DOT&PF and the other agencies is necessary. The prioritization and assertion of RS 2477 roads would be an ongoing process over several years (estimated 5 years for 100-150 trails). Historical research, personal interviews and preparation of maps are the

specific tasks needed for asserting the claims and having them plotted on land status plats. A rough estimate indicates that this effort would require approximately $100,000 per year which would provide for the research of 20 - 25 trails per year. This estimate is based on the time and effort actually spent for the Bulenberg Trail acquisition.

In order to accomplish this, there are a number of alternatives for DOT&PF to consider.

1) Funding Sources

a) A current source of capital money is in the Bulenberg Trail Aquisition project which has $95,000 remaining. This money was appropriated by the State Legislature for the purpose of aquiring the right-of-way of the Bulenberg Trail. DNR researched historical data and interviewed several people and asserted an RS 2477 claim. Since the right-of-way was secured in this manner (by DNR) most of the existing DOT&PF funds remains unspent. However, legislative action would be necessary to enable us to use the money on other trail acquisitions.

b) An item could be included in the FY 86 CIP Submittal which would change the existing Bulenberg Trail legislation and appropriate additional funds.

c) The RS 2477 activities could be included in the FY 86 DOT&PF operating budget as contractual and/or personal services.

2) Organization/Staffing

a) Should in-house staff be used, this project could be handled by either Planning, Right-of-Way or Special Projects. The decision of which group(s) to use would depend upon the manpower available and the funding levels of each section.

b) An alternative is to contract this project out to an independent firm which would prepare maps and research historical data for our use. This would require project management within DOT&PF.

c) Another alternative is a cooperative agreement with the University of Alaska-Fairbanks, using a Reimbursable Services Agreement (RSA). A university student could research historical data and provide the map(s) for the trails. This alternative has the advantage that DOT&PF would have more direct control over the person(s) doing the work. In addition this would probably be the least expensive alternative. Since this work is not so much difficult as it is time consuming, this project would be ideal for a student.

Recommendations

The MOU between BLM, DNR and DOT&PF should be reviewed and signed so this project may begin in a timely manner. First it must be decided whether

DNR or DOT&PF shall have the responsiblity to submit the supporting documentation to BLM.

We recommend that DOT&PF seek a revisied program change from the interim legislative committees to use the Bulenberg Trail appropriation for RS 2477 right-of-way acquisition. This amount could be used for the first year's work, beginning in FY 85.

Further, we recommend that an agreement with the University of Alaska-Fairbanks be entered into to establish a cooperative arrangement with a graduate level student(s) to research the historcial data for the trails and possibly to provide the maps needed.

The Coordination Committee should be appointed and meet promptly to establish the "first priority" trails so that the first efforts will begin with interagency cooperation.

Adequate funds should be budgeted in the FY 86 Capital and Operating Budgets to continue this activity.

RE: [redacted]

INTRODUCTION

The "Federal Land Policy and Management Act of 1976", Pub. L. 94-579, 90 Stat. 2493, Oct. 21, 1976 (herein also cited as the 1976 BLM Organic Act) provides a comprehensive plan for the management of the public lands of the United States. Title V of that Act contains provisions for obtaining rights of way "over, upon, under or through" the public lands and national forest system. Title VII of the Act recites the effect on existing rights and lists those statutes which were repealed upon the October 21, 1977 effective date of the Act. One such statute repealed in its entirety was R.S. §2477. That statute provided that: "the right of way for the construction of highways over public lands, not reserved for public uses, is granted". 43 U.S.C. §932, Act of July 26, 1866, ch. 262, § 8, 14 Stat. 253. The statute has been construed as an offer by the Federal government for a right of way for public highways across public lands, said offer being effective upon acceptance by the State or by public use. The case law interpreting the effect of this statute was concerned with such issues as:

a. What constitutes "acceptance" of the grant;

b. What effect acceptance had on mining homstead and other claims;

c. The date used in determining what constitutes "public lands, not reserved for public use" and;

d. The width of the public highway.

These issues will necessarily be important to the issue which is the subject of this memorandum. That issue is

whether or not the repeal of R.S. §2477, effective upon the enactment of the 1976 Federal Land Policy and Management Act, has any effect upon the rights granted and accepted before the repeal. Title VII of the 1976 Act provides that: "Nothing in this Act, or in any amendment made by this Act, shall be construed as terminating any valid lease, permit, patent, right-of-way, or other land use right or authorization existing on the date of approval of this Act". Sec. 701(a), Title VII, 90 Stat. 2793. Moreover, Section 509(a) of the 1976 Act states that "nothing in this title shall have the effect of terminating any right-of-way or right-of-use heretofore issued, granted, or permitted. However, with the consent of the holder thereof, the Secretary concerned may cancel such a right-of-way or right-of-use and in its stead issue a right-of-way pursuant to the provisions of this title." [emphasis added.] The main issue of this memorandum can therefore only be resolved through an examination of the character and extent of the rights which were granted and existed under R.S. § 2477 prior to its repeal in 1976.

I.

AN OVERVIEW OF THE NATURE OF THE OFFER AND THE ACCEPTANCE OF THE R.S. § 2477 HIGHWAY GRANT

A. Nature of the Grant

R.S. §2477 was an offer to dedicate any unreserved public lands for the construction of highways. The offer has been generally recognized as a present grant of an easement over public lands for highways. E.G. Wallowa County v. Wade, 72 P. 793 (Ore. 1903). It is also generally held that the grant becomes effective upon the date of acceptance. That a grant does not become effective until accepted by the grantee was said to be "almost elementary" by the Court in Ramstad v. Carr, 154 N.W. 195 (N.D. 1915). Similarly, the Court in Lovelace v. Hightower, 168 P.2d 864 (N.M. 1946), recognized that an offer to dedicate land must be accepted to become effective. Before looking at what

constitutes acceptance and the effect of such acceptance on the grant, it is important to inquire into the nature of the grant itself. This will be the scope of the following section.

1. R.S. § 2477 WAS A PRESENT, ABSOLUTE GRANT OF A RIGHT-OF-WAY OVER THE PUBLIC LANDS.

In reviewing plaintiff's claim for damages for the appropriation of his property lying along section lines for use as a public highway, the Court in Wells v. Pennington County, 48 N.W. 305 (S.D. 1891) construed the R.S. § 2477 grant as follows:

> Its words . . . import an immediate transfer of interests, not a promise of a transfer in the future . . . The object of the grant was to enable the citizens and residents of the states and territories where public land belonging to the United States were situated to build and construct such highways across the public domain as the exigencies of their localities might require, without making themselves liable as trespassers. And when the location of the highway and roads was made by competent authority or by public use, the dedication took effect by relation as of the date of the Act; the Act having the same operation upon the lines of the road as if specifically described in it.

48 N.W. at 306. [emphasis added.] The Court further recited the opinion of Justice Field in his decision in Railroad Co. v. Baldwin, 103 U.S. 426 (1880) which concerned a right-of-way grant to the railroad company in a similar type of congressional grant R.S. §2477. Quoting Justice Field, the Court in Wells stated:

> The language of the Act here, and of nearly all congressional acts granting lands, is in terms of a grant in praesenti. The Act is a present grant. 'There is hereby granted' are the

words used, and they import an immediate transfer of interests, so that, when a route is definitely fixed, the title attached from the date of the Act. The grant of the right-of-way . . . is a present absolute grant, subject to no conditions except those necessarily implied, -- such as that the road shall be constructed and used for the purposes designated. Nor is there anything in the policy of the government with respect to the public lands which would call for any qualification of the terms. Those lands would not be the less valuable for settlement by a road running through them. On the contrary, their value would be greatly enhanced thereby . . . we see no reason, therefore, for not giving to the words of present grant, with respect to the right-of-way, the same construction . . . [as] to the grant of lands . . . (emphasis added.)

The Court then addressed the contention that the grant was not an absolute grant but only a general offer effective when accepted under the theory that a grant "like any other contract" must have a grantor and grantee and an offer not accepted is not a contract. In the words of the Court, it was held that:

> It may, however, be admitted that the right acquired by the territory or the public was necessarily imperfect until the land accepted for highways was surveyed, and capable of identification; but when the land was surveyed, and the various section lines were designating it to be public highways as far as practicable, the right of the territory attached to them for that purpose, and took effect as of the date of the territorial law . . . The Act of Congress giving the right-of-way for the construction of highways over public lands, and the territorial law declaring all such lines, as far as practicable, to be public highways, and designating such highways to be 66 feet

wide, are noticed to all persons filing on public lands subsequent to the passage of these laws that they take them subject to the right-of-way for highway purposes . . . The territorial law located the highways upon all public lands upon the section lines, and this public grant or dedication was so accepted, and became valid as against the government, and therefore valid as against its subsequent grantee . . .

[48 N.W. at 307-308.] (emphasis added:)

It can thus be concluded that, according to this opinion of the South Dakota Supreme Court, the R.S. §2477 was an absolute, present grant effective upon acceptance, acceptance in that case being the territorial law declaring all section lines to be rights-of-way.

The courts have generally followed the opinion of the Wells Court. Thus, the Nebraska Court in Streeter v. Stalnaker 85 N.W. 47 (Neb. 1901), stated that R.S. §2477 "was a standing offer of a free right-of-way over the public domain, and as soon as it was accepted in an appropriate manner by the agents of the public, or the public itself, the highway was established". 85 N.W. at 48. Accord, Tholl v. Koles, 70 P. 881 (Kan. 1902). See also, McRose v. Bottyer, 22 P. 393 (Cal. 1889). In Town of Rolling v. Emrich, 99 N.W. 464 (Wis. 1904), the Court said that R.S. § 2477 "is doubtless a present grant of a right-of-way over public lands, but it does not become effective until accepted by the public". 99 N.W. at 465. Accord, Hillsboro Nat. Bank v. Ackerman, 189 N.W. 647 (N.D. 1922). Moreover, the Court in Wilderness Society v. Morton, 479 F.2d 842 (D.C. Cir. 1973), cert. den. 411 U.S. 917, concerned with the rights-of-way and special land-use permits for the trans-Alaska oil pipeline, stated that R.S. §2477 "acts as a present grant which takes effect as soon as it is accepted by the State". 479 F.2d at 882.

2. THE MEANING OF "PUBLIC LANDS NOT RESERVED FOR PUBLIC USE" UNDER R.S. §2477.

The above-cited cases stand for the principle that the highway grant was a present, absolute grant for rights-of-way across any public lands not reserved for public use which were owned by the United States at the time of the grant. The effect of the grant being a "present" one is that upon acceptance, the acceptance will relate back and become effective from the date of the grant. Faxon v. Lallie Civil Tp., 36 N.D. 634, 163, N.W. 531 (1917), citing, Township v. Skauge, 6 N.D. 388, 71 N.W. 544; Wells v. Pennington Township, to S.D. 6, 48 N.W. 305, 39 Am. St. Rep. 758; Railway Co. v. United States, 92 U.S. 733, 23 L.Ed. 634; Railway Co. v. Baldwin, 103 U.S. 426, 26 L.Ed. 578; Wright v. Roseberry, 121 U.S. 506, 7 S.Ct. 985, 30 L.Ed. 1042; French v. Fyan, 93 U.S. 169, 23 L.Ed. 8812; Northern Pac. Ry, Co. v. Barlow, 26 N.D. 159, 143 N.W. 903. That is to say that if the lands granted belonged to the United States at the time of the grant in 1866, or upon subsequent acquisition of lands by the United States, the 1866 Highway Act was made to apply to those lands. The acceptance, as long as the lands remain unreserved public lands at the date of acceptance, would relate back to the date of the grant. This is important in determining whether or not lands subject to a right-of-way were "public lands not reserved for public use" at the time of the grant and the acceptance of the grant. "The Federal Government's Section 932-type [R.S. §2477] offer to dedicate unreserved lands for highway purposes clearly does not become ripe until the government assumes ownership." Hayes v. Government of Virgin Islands, 392 F.Supp. 48 (D.Ct. Virgin Islands 1975). In that case the Court concluded that R.S. §2477 was made applicable to the Virgin Islands with the enactment of R.S. §1891, 48 U.S.C. §1490. enacted in 1875. R.S. §1891, repealed in 1933, related to the application of the United States Constitution and laws to all organized territories and to every territory subsequently organized

reasoned that the repeal of that statute before the acquisition of the Virgin Islands by the United States in 1935 did not affect the applicability of the laws of the United States, including R.S. §2477, to the territory, having found no intention by the Congress to indicate a contrary conclusion. Rather, the Court found that the objective of the repeal statute was a wholesale repeal of many statutes determined to be "obsolete" and noted that newer laws had replaced the statutes at least for the territories of Alaska and Hawaii. Moreover, Section 3 of the 1933 repeal statute provided that no rights or liabilities already existing before the appeal would be affected. Thus, upon acquisition of the lands by the United States in 1935, the highway grant was "ripe" for acceptance. The Court in United States v. Rogge, 10 Ak. 130 (D.Ct., 4th Div. Fairbanks, 1931), reached a similar result in finding that R. S. § 1981, effective when Alaska became an organized territory in 1884, allowed for the operation of R. S. §2477 to be ripe for acceptance in Alaska. Therefore, upon acquisition for public lands by the United States, the highway grant could be accepted as to those lands. However, the acceptance could only be effective, by the terms of the grant, as to "public lands, not reserved for public use".

In Paxon v. Lallie Civil To., 36 N.D. 634, 163, N. W. 531 (1917), writ of error dism. 250 U.S. 634 (1919), the plaintiff contended that the R. S. §2477 grant could not be accepted as to lands which have been part of an Indian reservation, reasoning that once the reservation was set aside for the Indians, the land was no longer public lands and the prior grant was therefore forever repealed by the congressional action. The Court disagreed. It held that the highway rights were vested rights where, prior to the establishment of the Indian reservation, the Highway Act had been in effect

for eight years and had been accepted by the territory for three years through enactment of a law declaring all section lines to be public highways. Act of Jan. 12, 1871, ch. 33 of Session Laws of Territory of Dakota of 1870-71. The Court stated that:

> It is also clear that the right granted to the State was not in the nature of a license, revocable at the pleasure of the grantor, but that highways once established over the public domain under and by virtue of the act became vested in the public, who had an absolute right to the use thereof which could not be revoked by the general government and whoever thereafter took the title from the general government took it burdened with the highways so established.

[163 N.W. at 533.] The Court believed that even though an Indian reservation was created that there was no intention by Congress in establishing the reservation to divest the public of highways rights already accepted. In 1915, the township had declared, as highways, four miles of section lines over these lands which were once reserved as an Indian reservation. In holding that the township need not compensate the owners for the 33-foot strip on either side of the section line, the Court reasoned that, since the highway rights were vested rights upon the opening of the reservation for settlement in 1904, the rights for the highways reverted to the original grantee, that being the State. The Court was of the opinion that if the public lands, after acceptance of the statutory grant, are then reserved for public use, once the use is abandoned the rights in the lands revert back to the grantee just as the right-of-way of a railroad company would revert to the property owners or the State if the railroad use discontinued. Thus, while the lands had not been surveyed until after the reservation was established, the Court held that the right of the Territory attached as soon as the section lines were identified as far as practicable for public highways and took effect as of the date of the territorial law. Therefore the plaintiff had no rights in the dedicated land upon his settlement of the lands in 1904.

The Court in Faxon v. Lallie, supra, held that the grant to the State under the Highway Act had vested prior to the establishment of the Indian reservation, so that subsequent grantees of the land could not claim the lands were not subject to the Act. The Court stated that the determinative time of deciding whether the lands are "public lands" is whether or not at the time of the grant and the subsequent acceptance, the lands belonged to the United States. The Court in Bird Bear v. McLean Cty., 513 F.2d 190 (8th Cir. 1975) agreed with the Faxon holding. In Bird Bear, the Indian trust-patentees brought an action for trespass and unlawful diminishment of their allotment. The issue was whether the Highway Act of 1866, 43 U.S.C. §932 (1970) granted an easement for section line roads over their property even though that property was held pursuant to a trust patent issued by the United States. The two roads in question were constructed along section lines in accordance with the N.D. Code, [C.C. §24-07-03 (1970), derived from ch. 330 of SL of Territory of the Dakota, 1870-71], said statute being an acceptance of the right-of-way grant of 43 U.S.C. §932. The Court in Bird Bear distinguished Bennett Cty., S.D. v. United States, 394 F.2d (8th Cir. 1968). In that case, it was held that the county could not maintain a road within the Pine Ridge Reservation without permission from the United States government for condemnation proceedings because the Treaty of 1851 was a recognition of Indian title. Thus, even though the Treaty had not spoken of the "reservation", land was in fact reserved for the use of the tribes and so these lands were not public lands upon the passage of the 1866 Highway Act. In Bird Bear, the Court held that the allotment of the Indian patentees was not part of the Reservation until 1880, so that in 1866, when the grant of the right-of-way initially attached, the land was still public land. Upon acceptance of the grant in 1871 by the Territory of Dakota, the grant became effective

as to these lands. In concluding that a right-of-way of individually-allotted land was not inconsistent with the congressional Indian policy, the Court affirmed the decision that the land allotted was subject to the prior statutory grant of right-of-ways to the State.

Other cases have dealt with public lands being subject to individual claims, so as to effectively withdraw the public lands from the terms of the R.S. § 2477 grant. If land was patented to an individual by the United States before acceptance of the grant, the public would have no right to assert over such lands. Ball v. Stephens, 158 P.2d 207 (Calif. 1945). Thus, if lands have been reserved, withdrawn, or subject to individual entry or patent prior to acceptance of the highway grant, the grant is ineffective as to these lands because the grant is only for "public lands not reserved for public uses." However, if these lands again become part of the unreserved public domain lands, according to Faxon, supra, they were again subject to acceptance as public lands under the R.S. § 2477 grant.

3. Summary

The R.S. § 2477 grant was a present transfer of interest in the public lands of the United States for highway purposes. Wells v. Pennington County, 2 S. D. 1, 48 N. W. 305 (1891); Wilderness Society v. Morton, 479 F.2d 842 (D.C. Cir. 1973), cert. den. 411 U.S. 917 (1973). Upon acceptance, a highway right-of-way was established. Streeter v. Stalnaker, 61 Neb. 205, 85 N.W. 47 (1901). The grant was ripe for acceptance at any time the government acquired ownership of the lands. Hayes v. Government of Virgin Islands, 392 F. Supp. 48 (D.Ct. Virgin Is. 1975). As long as the grant was accepted while the lands were public lands, the acceptance was effective against the federal government

and its subsequent grantees. Ball v. Stephens, 158 P.2d 207 (Calif. 1945). Moreover, the rights of the public, upon acceptance, became vested rights. Faxon v. Lallie Civil Tp., 26 N.D. 634, 163 N.W. 531 (1970). In light of these foregoing premises, it can then be concluded that the repeal of R.S. §2477 can have no effect as to properly accepted right-of-ways for highway purposes. Since the grant was a present transfer, it is necessary to inquire if the lands were unreserved public lands as of the date of acceptance of the grant. In Alaska, the grant has been held to be ripe for acceptance in 1884 when Alaska became an organized territory, the United States having acquired the territory in 1867. United States v. Rogge, 10 Ak. 130 (D.Ct. Ak. 1941). If it can be shown that the lands were public lands not reserved for public uses and were therefore ripe for acceptance, the grant will vest the highway rights in the public upon appropriate acceptance.

B. Nature of Acceptance.

1. ACCEPTANCE OF THE FEDERAL GRANT UNDER R.S. § 2477 CONSISTS OF ACTION BY THE PUBLIC OR THE PUBLIC AUTHORITIES SUFFICIENT TO MANIFEST THE INTENTION TO ACCEPT.

It has been held that R.S. §2477 created a standing offer of a free right-of-way over public lands and that as soon as it is accepted in an appropriate manner by the agents of the public or by the public itself, a highway is then established. Streeter v. Stalnaker, 61 Neb. 205, 85 N.W. 47 (1901). In that case, the Supreme Court of Nebraska held that there was sufficient evidence of a general and long continuous user as well as proof that the public authorities had exercised control over the road to establish an acceptance of the dedication of a public highway across plaintiff's lands. The claim was not based on adverse possession, but rather that the road became a public highway by dedication and acceptance

by the public use. Since the public authorities had not followed the "appropriate manner" in establishing a road under the general road laws, the Court relied more heavily on the evidence establishing continuous use by the public of the road since 1877. This rather concise opinion points out the various problems in proving that an acceptance of the offer of R.S. §2477 has been made. Acceptance made "in the appropriate manner" by public authorities means according to state or local laws and regulations. Thus, if the acceptance is to be so made, there must be inquiry into the laws of the State governing the establishment of roads within the state. For instance, the Board of County Commissioners is often given the jurisdiction over the roads within its jurisdiction and, to constitute a valid acceptance, the Board must have acted within its regulations as well as any applicable state law. Acceptance can also be found where the public has claimed to accept the federal grant. Proof of such acceptance is shown by evidence of continued use of the land as a "public highway". The cases diverge as to how long the use must continue in order to claim the right-of-way. Some courts have relied on the easement by prescription time period, while others, like Streeter, recognize that the use need only be enough to show the intent to accept, and need not be for a period of time sufficient to ripen the use into a right by prescription, there being no adverse claim but rather a claim to unreserved public land dedicated to the public by the federal government.

Under the laws of the Territory of Dakota, enforced since 1884, public highways could be established in one of three ways:

(1) Section lines, whether traveled or not, were already highways by virtue of legislative declaration and might be traveled and subjected to such use as far as practicab Sec. 1, ch. 29, Pol. Code. 1877;

(2) Roads, other than on section or quarter lines, established by the Board of County Commissioners on the petition of twelve freeholders; and

(3) by user for 20 years.

Koloen v. Pilot Mound Tp., 33 N.D. 529, 157 N.W. 672 (1916). In that case, the highway ran across the plaintiff's quarter-section of land. The Court first noted that the 1871 legislative enactment involving highways established on section lines was an acceptance by the territory of the federal grant and had remained in force in the territory and state ever since. It was the public act by the public authorities necessary to constitute acceptance. Here, however, the Court was not concerned with a section line highway. Therefore, the Court looked at whether there had been appropriate action by the Board or sufficient user to constitute acceptance. It was found that the county officials never exercised control over the alleged highways and that the highways surveyed by the county had been abandoned. Moreover, the public use had been obstructed so that the use could not be found to be continuous for the statutory 20 years. No highway was then found to be established in accordance with the State law.

As discussed previously, the Court in Faxon v. Lallie Civil Tp., supra, also held that the section line legislation of the Territory of Dakota constituted acceptance of the R.S. §2477 grant. There the court found that the 1881 acceptance was sufficient to deny plaintiff's claims for compensation on lands which had once been part of an Indian reservation. The Court held that, when the public use was abandoned, the right to maintain a highway on section lines revested in the public. While the legislative enactment of the Act of 1871 declaring that "all section lines in this territory shall be and are hereby declared public highways as far as practicable" was the necessary action to manifest the intention to accept the grant, a survey was necessary to perfect the right-of-way into a highway. However, the court found that

the effective date of the survey would relate back to the date of the original acceptance of the right-of-way.

In the case of Walcott Tp. v. Skaupe, 6 N.D. 382, 71 N.W. 544 (1894), cited with approval in Faxon, supra, the township brought suit to enjoin the defendant from obstructing an alleged highway. The highway was claimed as such by virtue of continuous user for 20 years. The defendant claimed that the lands were part of the public domain and could not therefore be subject to adverse user which is ineffective as against the government. The Court pointed out that highways by user are based either upon legal establishment or dedication, the continuous user for a period of 20 years being regarded only as conclusive evidence of either an original legal establishment or of a dedication. The other major argument of the defendant concerned the fact that the site in issue was upon an even-numbered section within the limits of the grant of odd-numbered sections to the Northern Pacific Railroad Company made in 1864. The Court held that if the Railroad Grant removed the odd-numbered sections from the operation of the highway grant, the highway grant could still be effective as to the even-numbered sections. A highway by prescription could certainly be established over the privately-owned railroad lands and thus the highway by prescription could run over the entire length of the road.

In the subsequent North Dakota case of Hillsboro National Bank v. Ackerman, 48 N.D. 1179, 189 N.W. 657 (1922), the Court reaffirmed the principles stated above. It was further noted by the court that the statutory right of establishing a highway by prescription had been repealed in 1897, and that since that time a highway by prescription could only be established by virtue of the common law. Later cases

then apply the common law to conclusively find that a highway grant had been accepted by the public. The court in Hillsboro National Bank further observed that section lines are public roads in accordance with the North Dakota statutes, and they may be open for use upon compliance with the relevant laws relating thereto by persons having the jurisdiction to do so. This could be done "without any survey being had", except where necessary by variations caused by natural obstacles." 189 N.W. at 659.

The plaintiff in Ball v. Stephens, 158 P.2d 207 (Calif. 1945), sought declaration of the existence of the public road across defendant's land which was necessary to the plaintiff for access to his mine. The Court first addressed the ways in which highways might be established under the federal highway grant in R.S. §2477. The Court noted that Congress had not specified or limited the methods to be followed and that it was then only necessary that a highway be established in accordance with the state in which it is located. The method of selection of a route and establishment as a public highway by public authorities was not involved in the case. The alternative method of public use was found to be the method whereby a public road had been established over the defendant's land. The Court stated that "dedication could also be effected without action by the state or county, by the laying out of a road and its use by the public sufficient and long to constitute an acceptance by the public of an offer of dedication. Evidence of user was properly received for the purpose of determining whether there had been sufficient use to prove acceptance . . . " 158 P.2d 208. The Court held that the defendant took its patent in 1928 subject to the right-of-way if the evidence substantiated that the road had been used by the public before patent had issued. The evidence noted by the Court included use of the road over the mountainous terrain as a trail, then for horse-drawn vehicles and later as one suitable for automobiles and

trucks. It was found that in about 1905 mining claims were located in the area and oil companies had moved in. The evidence, however, was unclear as to whether the road used by these people went as far down as the defendant's present land. But the Court was convinced that from 1910 the road was used for travel and that by 1918, when another oil development was undertaken, automobiles were driven over the road. The court concluded that while the travel over the road prior to patent in 1928 was irregular due to the terrain, and that only a limited number of people had occasion to go that route, the use of the road by hunters, vacationers, miners, and oil operators was sufficient to constitute acceptance of a federal grant for public use. The Court then held that if the road existed before patent, it was immaterial whether the route was used by the public after that time so long as it had not been legally abandoned. The Court held that the act of the defendant in constructing a gate across the road could not divest the right which the public had acquired before patent. It should be noted that the case did not turn on the length of time of use, but rather stands for the proposition that the existence of the dedication is a conclusion of fact to be made in each case based on sufficiency of evidence; that time is only one element involved in such evidence.

The time element for dedication by public use was also discussed in Lovelace v. Hightower, 168 P.2d 864 (N.M. 1946). Defendant claimed that the plaintiff had to show that the road was used for the 10 year statute of limitations time as applied to ways established by prescription. The New Mexico court held that the 10-year time period is not a factor in establishing highways by dedication. Rather, acceptance of the federal offer

to dedicate public lands for highways could be shown by general use for a long enough period to constitute acceptance. Therefore, each state may determine whether dedication is founded upon a prescriptive time period or merely by a factual continued use sufficient according to the trier of fact to constitute acceptance. Thus, in Brown v. Jolley, 387 P.2d 278 (Colo. 1963), the court found that a highway over public lands had been established over the defendant's land by use of the public for the statutory 20-year period. The fact that the roads had been removed from the county road system did not destroy the right of the public to use the road by virtue of their adverse continuous use.

The cases heretofore cited stand for well accepted principles relating to the acceptance of the highway grant under R.S. §2477. The grant constitutes an offer by the federal government to dedicate unreserved lands for highway purposes, said offer becoming effective upon acceptance by the public. Ball v. Stephens, supra; Lovelace v. Hightower, supra. Whether such offer is accepted is an issue to be determined under state law. Ball v. Stephens, supra. Acceptance can be made either by some positive act on the part of the public authorities authorized to establish or maintain highways or by public use sufficient to constitute acceptance. Streeter v. Stalnaker, supra; Koloen v. Pilot Mount Tp., supra; Ball v. Stephens, supra. It has been held that a legislative enactment to the effect that all section lines are declared public highways is sufficient to constitute acceptance by the public authorities. Faxon v. Lallie Civil Tp., supra; Koloen v. Pilot Mound Tp.; Hillsboro National Bank v. Ackerman, 48 N.E. 1179, 189 N.W. 657 (1922). The sufficiency of use by the public to constitute a highway by dedication has been held to be a factual determination made on a case-by-case basis, e.g., Lovelace v. Hightower, supra; based on a statutory prescriptive time period, e.g., Brown v. Jolley, supra;

or by the prescriptive period based on the common law, e.g., Hillsboro National Bank v. Ackerman, supra. These general principles from other jurisdictions as to what constitutes acceptance of the federal highway grant have been followed in Alaska.

2. IN ALASKA, THERE MUST BE SOME "POSITIVE ACT" BY THE PUBLIC AUTHORITIES CLEARLY MANIFESTING AN INTENTION TO ACCEPT THE GRANT, OR PUBLIC USER UNDER CONDITIONS SUFFICIENT TO PROVE ACCEPTANCE OF THE GRANT.

Clark v. Taylor, 9 Ak. 298 (D.Ct. 4th Div. 1938), involved an action to restrain the employees of the Alaska Road Commission from completing a bridge and constructing approaches to connect to the old road on plaintiff's placer mining claim. The Alaska Road Commission claimed that it had a right to maintain a road and bridge across the placer mining claim by virtue of the act of May 14, 1906, 34 Stat. 119, 48 U.S.C.A. §322, which authorized construction and maintenance of wagon roads and pack trails between mining or industrial camps to further the mining industry. It also claimed, under R.S. §2477, a right-of-way for the construction of highways over public lands. However, the Court held that no such right existed in 1917 because the locators of the mining claim had been granted by the Congress the exclusive right of possession and enjoyment, and thus R.S. §2477 was ineffective as against the plaintiff. While a road could be maintained it could only be the road already established by public use. The court discussed acceptance by the public of the R.S. §2477 dedication by adverse user, citing Bishop v. Hawley, 33 Wyo. 271, 238 P.274, Marchand v. Town of Maple Grove, 48 Minn. 271, 51 N.W. 606, Montgomery v. Sommers, 50 Or. 259, 90 P.274 as authority for acceptance of the R.S. §2477 dedication by public user. The Court stated

that since the original bridge had been used for 20 years by the public, under conditions creating a prescriptive right, the right became vested in the public. The court declined to decide whether the length of time required in Alaska for prescriptive rights-of-way is 20 years (as recognized by other courts in determining the creation of highways by adverse user) or 10 years (the local statute fixing the time for bringing an action for land). The remainder of the case dealt with the width of the right-of-way. Since the right-of-way was established by public user, the court held that the extent of the servitude is to be determined by the character and the extent of the user, and that the Commission had no right to extend the road beyond the width so established.

In Berger v. Ohlson, 911 Ak. 389 (D.Ct. 3rd Div. 1938), plaintiff alleged that the Alaska Railroad, through the defendant, had obstructed the public roadway leading to the City Dock. The railroad filed a demurrer, which was overruled, claiming that the railroad had been given the right-of-way to maintain a railroad over the road. The Court merely noted in this proceeding that the allegations of the plaintiff that the road existed before the railroad was established, must be taken as true and thus two mutual right-of-way easements existed. The court cited Hatch Bros. Cos. Co. v. Black, 25 Wyo. 109, 165 P. 578 as authority for the acceptance of the R.S. §2477 highway grant by the public without acceptance by public authorities, through continued use of the road under circumstances clearly indicating their intention to accept. The court held that the railroad, coming in after the highway had been established under the grant, took the right-of-way subject to the public use.

The court in United States v. Rogge, 10 Ak. 130 (D.Ct. 4th Div. 1941), discussed the right-of-way provisions of R.S. §2477 in great detail. The action was brought by the United States to establish its rights to

collect tolls on freight transported over the Richardson Highway pursuant to the regulations set out by the Secretary of the Interior. Defendant, as a ferry owner affected by the tolls, claimed that the highway had been used by the public from 1903 through 1906, before the government took charge of the maintenance of said highway, and that therefore, a right-of-way for a free highway was vested in the public under the grant. The government claimed that R.S. §2477 did not apply in the Territory of Alaska until 1912. R.S. §1891 provided that all the laws of the United States which were not general land laws but were locally applicable would be made applicable to the Territory of Alaska. The government claimed that since R.S. §1891 was not included in the 1900 Act, providing for various provisions for the territorial civil government, but was included in the 1912 Act, R.S. §1891 would not have applied to Alaska between 1900 and 1912. The court held that the 1900 Act did not purport to be a comprehensive codification of all the laws of Alaska and that the statute did not impliedly repeal R.S. §1891. The court concluded that the laws of the United States which were not locally inapplicable and were not general land laws were thus in effect in Alaska from 1903 and thereafter. The court then looked at whether R.S. §2477 was a general land law. It stated: "Clearly, a right-of-way is not the land itself, though it is classified as incorporeal hereditament. Section 2477 seems not to have been a general land law, but more of a law incident to the land laws." 10 Ak. at 149. The court found that owners of the mining claim and homesteaders had a right under R.S. §2477 for a right-of-way incident to their claims. The court stated:

> That Congress considered §2477, R.S.U.S. in effect is shown in the act approved May 14, 1898, wherein it mentioned that public highways now located should not be lost where railroads took rights-of-way under said act. Again, in the same act, it mentioned that the toll roads provided for in the act to be constructed by private individuals or corporations should not injuriously affect the public in its use of a road or trail in common use. If section 2477 was not in force, there was no possible way for there to have been public highways or roads in common use in Alaska at the time the act approved March 14, 1898 was enacted.

10 Ak. at 150. The court decided that R.S. §2477 was not a general land law because the right-of-way could be obtained without any public record and without procedures for filing applications and maps as required under the general land laws. The court further cited Nicholas v. Grassle, 83 Colo. 536, 267, P.196, and Leach v. Manhart, 1020 Colo. 129, 77 P.2d 652, as authority that R.S. §2477 was an express dedication of a highway and that acceptance was accomplished by use by those for whom it was necessary or convenient. The court upheld the defendant's contention that the right-of-way for a highway by public use between 1903 and 1906 was vested in the public but that the Congress was still free to impose toll regulations in the public interest.

Hamerly v. Denton, 359 P.2d 121 (Alaska 1961) involved an action to enjoin the obstruction of a road. The road crossed Hamerly's property and gave access beyond to Denton's homestead. Denton claimed that the road was a public highway. The court, in discussing R.S. §2477, 43 U.S.C.§ 932, stated:

> The operation of the statute in Alaska has been recognized. [Berger v. Oilson, D.C.D. Ak., 1938, 9 Ak. 389, Clark v. Taylor, D.C.D. Ak. 1938, 9 Ak. 298, U.S. v. Rogge, D.C.D. Ak. 1941, 10 Ak. 130] The territorial district court and the highest courts of several states have construed the act as constituting a congressional grant of right-of-way for public highways across public lands. But before a highway may be created, there must be either some positive act on the part of the appropriate public authorities of the state, clearly manifesting an intention

to accept a grant, or there must be public uses for such a period of time and under such conditions as to prove that the grant has been accepted. [See Berger v. Olson and Clark v. Taylor, supra; Kirk v. Schultz, 1941, 63 Idaho 278, 119 P.2d 266; Leach v. Manhart, 1938, 102 Colo. 128, 77 P.2d 652; Lovelace v. Hightower, 1946, 50 N.M. 50, 168 P.2d 864; Hatch Bros. Co. v. Black, 1917, 25 Wyo. 107, 165 P.518; State ex rel. Dansie v. Nolan, 1920, 58 Mont. 167, 191 P.150; Montgomery v. Somers, 1907, 50 Cr. 259, 90 P.674] 359 P.2d at 123.

Since there was no claim of establishment of the highway by public authority, the court held that the defendant then had the burden of proving that the road was "over public lands" and that the character of the use was sufficient to constitute acceptance. The court stated that "public lands" did not include lands which are subject to valid and existing homestead claims. During the period when the land in question was not so subjected to the homesteaders' claims, the court found that its use was infrequent, sporadic, and not necessary or convenient for public use. The court concluded that no public highway existed, for there had been no showing of dedication by the homesteaders to the public, nor an acceptance by public user.

The width of a proposed highway along the existing Farmers' Loop Road near Fairbanks was in issue in State v. Fowler, 1 A. L. J. No. 4, 7, Superior Ct., 4th dist, Civil Action No. 61-320, Sept. 26, 1962. The opinion by the Honorable Judge (now Justice) Rabinowitz cited Hamerly, supra for the proposition that the State had the burden of proving that the Farmers Loop Road was located over the public lands and that the character of the use constituted acceptance by the public under the 43 U.S.C. §932 grant. The extent of the user was held to be the applicable measure by which to determine the allowable width the State could claim rather than reliance on local laws and customs applicable to highways established by the public authorities.

Mercer v. Yukon Construction Co., 420 P.2d 323 (Ak. 1966), was primarily concerned with the Access Roads Act, AS 19.30.010-19.30.100, by which the State could contract for low standard, low-cost roads in areas rich in natural resources in order to promote development. The appellant contended that his grazing permit precluded a right-of-way road for public access. The court disagreed, holding that the lands under lease were public lands and that the State's contract with the Yukon Construction Co. to build a road under the Access Roads Act was a valid acceptance of the grant under 43 U.S.C. §932. Hamerly was held to be inapplicable here because in that case the homesteaders' rights would ripen into title, whereas the plaintiff in Mercer had only leasing rights. Moreover, Section 4(f) of the appellant's grazing lease stated that "nothing herein shall restrict the acquisition granting, or use of permits or rights-ofways under applicable law." The grazing rights were thus subordinated to the right-of-way.

The section line legislation in Alaska, under the provisions of AS 19.10.010, came under attack in Gibbs v. Campbell, No. 72-462, Superior Ct. 3d Jud. Dist., Jan. 8, 1973. The plaintiffs sought compensation for the State's taking of property through the construction of a pioneer access road along the section line of plaintiff's property pursuant to a petition of the local landowners. The State claimed it had title under color and claim of title for more than seven years in accordance with AS 09.25.050, that the action was barred because it had not been brought within 10 years after the cause of action accrued, and that the right for a 33-foot easement over plaintiff's property became vested in the State under 19.10.010. Plaintiff urged that the language of AS 19.10.010 did not meet the test of "clearly manifesting an intention to accept a grant" as required by the Alaska Supreme Court in Hamerly, supra. The court found

three separate reasons, "any of which is sufficient", to defeat plaintiff's claims. First, the court held that the plaintiff took his patent subject to the right of the State to construct a roadway along the section lines. The court, relying on the 1969 Opinion of the Attorney General No. 7 (December 18, 1969), held that the Territory of Alaska had accepted the R.S. §2477 highway grant by enactment of Ch. 19, S.L.A. 1923, and that such acceptance was being continually effective from 1923 until 1949 when the acceptance was repealed. The court then found that the federal grant was again accepted by Ch. 35, SLA 1953. Since the plaintiff had not entered the property until 1955, and only received patent in 1961, he took his land subject to the right of the State to construct a public highway along the section line without compensation therefor. The court also stated that the plaintiff was estopped to claim compensation because of his involvement in trying to get the road constructed, and further concluded that the action was barred by the statute of limitations.

While Wilderness Society v. Morton, 479 F.2d 842 (D.C. Cir. 1973), cert. den., 411 U.S. 917, involved many issues relating to the granting of right-of-ways and special land use permits for the Trans-Alaska oil pipeline, those will not be discussed herein except insofar as the opinion was concerned with the operation of the highway grant under 43 U.S.C. §932. The environmental groups challenged the Secretary's authority to issue a right-of-way to the State for a State highway. Alyeska Pipeline Service Company was to build the highway primarily for pipeline purposes but ultimately for use by the public. The Honorable Judge J. Skelly Wright held that the State only needed to manifest its intention to accept the highway grant by some positive act. Such intention had been so manifested by the passage of AS 19.40.010(a) declaring a need for a public highway from the Yukon River to the Arctic Ocean. 43 U.S.C. §932 was found to act "as a present grant

which takes affect as soon as it is accepted by the State". 479 F.2d at 882. In the footnote to this holding, the court recognized that, since R. S. § 2477 acts as a present grant, it is not generally necessary for the builder of the highway to apply for a right-of-way; however, the lands involved here were lands reserved for public use. Thus the section was not applicable and it was necessary for the State to request revocation or modification of the reservation in order to build the highway. The court concluded that an intention to build is all that is needed to accept the highway grant. Since the proposed highway was found to be needed by the public, according to State officials, the issuance of the right-of-way was properly within the authority of the Secretary, necessary only because of the prior public reservation of the lands in question.

The most recent Alaska Court opinion on the applicability of 43 U.S.C. §932 is Cirves v. Kenai Peninsula Borough, 536 P.2d 1221 (Ak. 1975). In that action, the appellant contested the right and power of the borough to construct a road on homesteaded property without any compensation to her. Appellant received a "notice of allowance" from the Department of Interior in 1958 to the property, and in 1961, received patent. The northern boundary of her property was the section line. Subsequent to 1961, the borough had constructed a junior high school adjoining the land on the northern boundary. Redoubt Drive, which ran along the section line prior to the school's construction, terminated one-quarter mile east of the boundary line between the boundary and the school site. That road was extended by the City of Soldotna in 1967 to provide access to the school. The borough subsequently extended Redoubt Drive by constructing a "pad" which rested partly on Cirves' property, and as a result of which she

brought this trespass action. The court held that the Kenai Peninsula Borough implicitly possessed the power to establish access to the school site through its powers to "establish, maintain and operate schools". Moreover, although no express reservation of the easement was included in Girves' patent, the court held that this did not preclude the borough from showing that a right-of-way had been established before Girves entered onto the property. The court accepted the borough's argument that Ch. 35, SLA 1953 constituted an acceptance of the 43 U.S.C. §932 highway grant, the enactment of Ch. 35 being the "positive act" needed under Hamerly v. Denton, 359 P.2d 121 (Ak. 1961) to manifest an intention to accept. The 1953 dedication of section lines as public highways was said to have been an implied acceptance of the highway grant, for the legislature could not dedicate something to which it had no right.

These Alaska cases reiterate the general legal principles concerning acceptance of R.S. §2477, the federal highway grant. The public may accept the grant by continued use, although it is not clear from the cases whether a specific time period of use be proved, or whether mere use manifesting an intention to accept is sufficient. Compare Clark v. Taylor, 9 Ak. 298 (D.C. D. Alas. 1938) and United States v. Rogge, 10 Ak. 130 (D.C.D. Alas. 1941). The State may accept the grant through legislation, which would constitute the necessary "positive act" indicating the intention to accept the grant. It has been held that the State accepted the grant through the legislation concerning access roads, Mercer v. Yukon Construction Co., 420 P.2d 323 (Ak. 1966), and with the enactment of Ch. 19 SLA 1923 and Ch. 35 SLA 1953 concerning highways along section lines, Gibbs v. Campbell, No. 72-462, Superior Court, Third Judicial District, January 8, 1973 and Girves v. Kenai Peninsula Borough, 536 P.2d 1221 (Ak. 1975).

3. SUMMARY

R.S. §2477 was a dedication by the United States of unreserved public lands for the establishment of highways. A showing of acceptance of the highway grant is all that is necessary in order to establish a highway under the grant. The acceptance can be shown by legislative acts or by continued public user. Once there has been an acceptance, the dedication is affective as of the date of acceptance. Koloen v. Pilot Mound Township, 33 N.D. 529, 157 N.W. 672 (1916), Lovelace v. Hightower, 168 P.2d 864 (N.M. 1946), Hamerly v. Denton, 359 P.2d 121 (Ak. 1961). This is true even if no survey has as yet been made, for the right takes effect on the date of acceptance. Faxon v. Lallie Civil Tp., N.D. 634, 163 N.W. 531 (1917). If acceptance of the grant is made before patent, the owner takes the land subject to the right-of-way. Ball v. Stephens, 158 P.2d, 207 (Ca. 1945). The width and extent of the right-of-way is determined according to State law. State v. Crawford, 441 P.2d 586 (Ariz. App. 1968). Thus when acceptance is made by public use, the easement is no greater than that which was reasonably necessary for the public use. Clark v. Taylor, 9 Ak. 298 (D.C.D. Alas. 1938), State v. Fowler, 1 ALJ No. 4, 7 Superior Ct. 4th Jud. Dis., C.A. No. 61320, September 26, 1962. If the right-of-way was established by the legislature, the applicable laws would apply in determining the extent of the right-of-way. State v. Crawford, supra. Moreover, upon acceptance, the rights of the public become vested rights for use of the designated public lands under the grant for highway purposes. Faxton v. Lallie Civil Tp., supra.

II

THE EFFECT OF THE REPEAL OF THE R.S. §2477

R.S. §2477 was a present, absolute grant of right-of-way for construction of highways over public lands not reserved for public uses. Wells v. Pennington County, 2 S.D. 1 48 N.W. 305 (1891); Wilderness Society v. Morton, 479 F.2d 842 (D.C. Cir. 1973), cert den. 411 U.S. 917 (1973); 1976 U.S.C.C.A.N. 6175, 6204. The grant became effective upon acceptance as long as the acceptance related to lands which were public lands of the United States and thus subject to acceptance. Faxon v. Lallie Civil Tp., 36 N. D. 634, 163 N.W. 531 (1917); Bird Bear v. McLean County, 513 F.2d 190 (8th Cir. 1975). Acceptance of the grant could be evidenced by some positive act on the part of the appropriate public officials. The declaration by the legislature that all section lines are public highways has been held to fulfill the requirement that public officials must demonstrate an intention to accept the highway grant. Wells, supra; Cirves v. Kenai Peninsula Borough, 536 P.2d 1221 (Ak. 1975). Acceptance could also be made by public use, the character and extent of which could prove that the grant is accepted. Hamerly v. Denton , 359 P.2d 121 (Ak. 1961).

According to the 1976 Federal Land Policy and Management Act, all rights-of-way granted under statutes superceded or repealed by the provisions of the Act are protected. 1976 Federal Land Policy and Management Act, Pub. L. 94-579, 90 Stat. 2793, Oct. 21, 1976; 1976 U.S.C.C.A.N. 6175, 6197. An acceptance by the public authorities, or by the public, of the highway grant under R.S. §2477 should therefore be protected as an existing right-of-way for highway purposes, and would be uneffected by the repeal. This is in accordance with the general principle that the dedication of land for public use can be withdrawn prior to acceptance, or may be rejected by revocation, or may be abandoned, by the grantee. See 23 Am. Jur. 2d Dedication, cited in 1969 Op. of the Attorney General

Dec. 18, 1969). Thus, after a proper acceptance of the offer, the withdrawal of the grant is immaterial.

In Alaska, the legislature accepted the R.S. §2477 grant first in 1923 and again in 1953. In 1923, the territorial government enacted ch. 19 SLA 1923 which read as follows:

> Section 1. A tract of four rods wide between each section of land in the Territory of Alaska is hereby dedicated for use public highways, the section line being the center of said highway. But if such highway shall be vacated by any competent authority the title to the respective strip shall inure to the owner of the tract of which it formed a part of the original survey. Approved April 6, 1923.

Therefore, all lands acquired from either the United States or the Territory after April 6, 1923, the effective date of the statute, was burdened with a 66-foot (one rod equals 16 1/2 feet) section line right-of-way. The law was codified in the 1933 Compiled Laws of Alaska, Section 1721. When the territorial laws were again compiled in 1949, the table of statutes indicated that Section 1721 was "invalid". No reason has been found for this apparent misconception. It has ready been seen that an organized territory could accept the highway grant. United States v. Rogge, supra; Hayes v. Government of Virgin Is., 392 F.Supp. 48 (D.Ct. V.I. 1975). However, the declaration of "invalidity" seems to have worked a repeal of the statute and therefore lands acquired on or after January 18, 1949 were not burdened with the highway easement until a reacceptance was made. It should be noted, however, that the repeal of the statute is not a repeal of the rights-of-way; therefore all land acquired in Alaska between April 6, 1923 and January 18, 1949 is subject to a territorial 66-foot section line right-of-way for highway purposes.

In 1951, the Territory of Alaska enacted the following provision in chapter 123, SLA 1951:

Section 1. A tract 100 feet wide between each section of land owed by the Territory of Alaska, or acquired from the Territory is hereby dedicated for use as public highways, the section line being the center of said highway . . . Approved March 23, 1951.

Thus the legislature limited the acceptance of lands owned by the territory. Thus would appear to bolster the argument that the 1949 declaration of invalidity of the 1923 statute was truly a repeal of the section line right-of-way acceptance across public lands of the United States. In 1953, the statute was amended to include "a tract four rods wide between all other sections in the territory". Ch. 35 SLA 1953. The 1953 statute is currently codified as AS 19.10.010. Thus, since 1953, land owned by either the Territory or the United States government is subject to this section line easement. The 1953 statute, effective continuously since March 21, 1953, constitutes the acceptance of the highway offer to dedicate public land for highway purposes which is necessary to complete the grant. The repeal of the grant by the 1976 BLM Organic Act would, therefore, have no effect on lands acquired since 1953; that is, lands would be burdened with the appropriate easement as long as the statute remains unrepealed in Alaska.

The history of acceptance of the highway grant in Alaska has necessarily presented many questions as to what lands are burdened by the section line the easement. These questions, however, may be answered through an analysis of the nature of the grant and acceptance as reviewed in the first section of this memorandum. It should initially be remembered that the repealing statute in the 1976 BLM Act provides that all existing rights of way are to be preserved. Federal Land Policy and Management Act, 1976, Title VII, Sec. 701(a), 90 Stat. 2793. In determining that there is an existing right of way over every section line in the State of Alaska, it need only be shown that the land was public land on

Unreserved

the United States [or land owned or acquired by the territory or state] at the time of the acceptance of the grant; specifically, that the land was public land between April 6, 1923 and January 17, 1949 or since March 21, 1953.

~~The opposite would be true if the land was not public between April 6, 1923 and January 17, 1949 or since March 21, 1953. The land would be forever subject to the right-of-way easement unless the highway is subsequently vacated by competent authority. This is true even if the section lines had not been surveyed for once the acceptance has been made, the right attaches as of that date and subsequent survey will only serve to protect the~~ right: Wells v. Pennington County, supra. Thus, in the 1969 Opinion of the Attorney General, No. 7, Dec. 18, 1969, Mr. Norman states at p. 6 that:

> Like the standing federal offer, the Alaska statutes are continuous in their operation, and they apply to "each" section of land in the state as it becomes eligible for the section line dedication. Public lands which come open through cancellation of an existing withdrawal, reservation, or entry, and subsequently acquired by the territory (or state), are all subject to the right-of-way.

As long as AS 19.10.010 is law in the State of Alaska, this statement of the law should hold true regardless of the fact that the federal offer has been withdrawn. Again, this is true because the offer has been accepted as to all of the section lines of the State as they become eligible for dedication, and an offer once accepted is not subject to withdrawal. Rather, the section line easement falls into the category of the "right-of-way heretofore granted" under Section 509 of the BLM Organic Act and is thus unaffected by that Act.

In conclusion, the repeal of R.S. §2477 should have no effect on those rights of way for highway purposes which were accepted prior to the repeal. The acceptance can be proved on a case-by-case basis if the acceptance is by public use. The territory and state authorities have accepted the grant as to all section lines in the State through the enactment of Ch. 19, SLA 1923 and Ch. 35, SLA 1953. Such declarations are all that is needed to constitute the "positive act" necessary to show the intention to accept as required in Hamerly. Upon survey, the section line highway may be established and the effective date of the right-of-way will be the date of the legislative acceptance. Thus, whether or not land is burdened with a highway easement will depend on the status of the land when the grant was accepted. That the grant is no longer operative has no affect on the prior acceptance or on the status of the land when accepted.

Instruction Memorandum No. AK-85-72
Expires 9/30/ 85

To: DM's and DSD's

From: State Director, Alaska

Subject: Notation of R.S. 2477 Right-of-Way Assertions on the Public Land Records

This memorandum is intended to supplement manual guidance on notation of R.S. 2477 right-of-way assertions. The BLM manual policy on notation of claimed R.S. 2477 is intended to facilitate BLM management of those lands it administers. BLM needs a sound transportation plan in order to effectively manage those public lands it administers; therefore, it is necessary to identify existing access routes on the Bureau's official records.

Notation of any particular R.S. 2477 assertion of right to these records is discretionary. The manual merely provides BLM a procedure of noting R.S. 2477 claims on its records, if BLM agrees that the assertions have at least potential validity. The manual procedure is not intended to force BLM to note assertions it believes to be questionable or invalid.

It should, however, be remembered that an R.S. 2477 grant is created by taking. The rights acquired thereunder attached immediately when the facility was first appropriated or constructed under the statute. Once a right-of-way is established under R.S. 2477, it may be abandoned only under procedures established by State law.

The BLM should work with the State of Alaska to identify those existing access roads and trails which may be potentially valid R.S. 2477 assertions. When BLM agrees that a right may exist (i.e. the assertion may be valid) under the statute, it should note the assertion on its official land status records. If BLM does not agree that the right may exist, the assertion should not be noted to the records. BLM's notation of a potential right does not validate an invalid assertion and its failure to note a valid assertion does not void such assertion. The actual validity or nullity of an R.S. 2477 assertion can only be determined by a court of competent jurisdiction.

If an R.S. 2477 is asserted on a road or trail historically used only as a winter trail and use begins to occur during the other seasons which causes environmental damage, BLM's recourse is to try to get the State to maintain the trail or for BLM to sue for damages on Federal lands. Seasonality of use should

BLM NOTATION MEMO

be defined by the type of use which existed at the time the trail or road was established or appropriated. The background and history of the trail may need to be checked to determine if use has been seasonal.

BLM will note potentially valid R.S. 2477 assertions only across lands which it administers. Notations will not be made on lands withdrawn for other agency use, unless BLM has an MOU regarding notation with that agency having jurisdiction over the land. Assertions of rights will not be noted on land which have been Interim Conveyed or Patented to a Native Corporation or Tentatively Approved or patented to the State of Alaska.

The BLM does not need comment or concurrence from Native Corporations to note assertions on lands that it manages (including lands that are merely selected by such corporations.) BLM is only acknowledging a claim of a valid existing right to such lands. Such an acknowledgment does not change the validity or invalidity of the right. The existence of such a potential right will not be cited in any conveyance document as an encumbrance. A Native Corporation is free to challenge the assertion, in court, after it acquires title.

BLM will not specifically reference an R.S. 2477 claim, assertion or notation in the deeds or patents it issues for any claim or entry made under the public land laws, unless the inclusion of a reference to such claim has been agreed to, in writing by all affected parties.

There may be situations where the State of Alaska may find it advantageous to acquire a right-of-way under Title V of the Federal Land Policy and Management Act in lieu of an R.S. 2477 notation. Patents for entries made after granting of a Title V right-of-way are made subject to the right-of-way.

It should also be noted that the BLM cannot impose restrictions or stipulations restricting the use of an R.S. 2477 road or trail for those purposes authorized by statute. Only the State can impose restrictions on such uses. However, R.S. 2477 did not authorize the construction of non- access facilities such as powerlines, pipelines, etc. Such facilities, if not covered by a granted right-of-way constitute unauthorized use.

In deciding whether to note an assertion on the BLM records, BLM may perform a field examination and/or prepare a report to substantitate its decision as to disposition of the assertion. However, such action is not required.

Bureau of Indian Affairs
Juneau

From: David S. Case
Attorney/Advisor

Subject: Rights of Way on Allotments --
R.S. 2477 and Other Access Questions

I. INTRODUCTION

A. Your Requests

Over the last twelve months you have directed three opinion requests to this office regarding access to and across Native allotments. Your first request (dated May 22, 1979) asked about the effect of Native occupancy on the establishment of section line road easements under R.S. 2477.[1] Your second request (dated July 6, 1979) was for general guidance about the method for assuring access to landlocked Native allotments you had advertised for sale. You also asked if you have to disclose any access problems in your sale advertisement. With respect to R.S. 2477 easements, you asked whether a section line easement for public access would suffice for private access to an otherwise landlocked

---

[1] The request was entitled "Effect of Statutory Reservations on Native Allotments" and was answered in a memorandum by Dennis Hopewell of this office, dated September 4, 1979. The section line easement question was specifically excluded from that response pending this reply.

Exhibit III

B.I.A. MEMO

allotment. Your final request (dated April 4, 1980) reduced to its essentials, asked whether the Indian right of way laws and regulations apply when the right of way on or through a certified allotment coincides with a surveyed section line easement arguably granted under R.S. 2477.

B. R.S. 2477 in Brief

R.S. 2477 is an 1866 Act "granting" highway rights of way over public lands in the following deceptively simple terms:

> The right-of-way for the construction of highways over public lands, not reserved for public uses, is hereby granted. Act of July 26, 1866, c. 262, sec. 8, 14 Stat. 253.

This act was initially codified as Revised Statute (R.S.) 2477 and later as 43 U.S.C. 932. It was repealed by Section 706(a) of the Federal Land Policy and Management Act (FLPMA) of October 21, 1976, PL 94-576, 90 Stat. 2743, 43 U.S.C. 1701, et seq.

Your questions focus on the section line easements appropriated by the Territory and State of Alaska under this federal authorizing legislation. The State statute appropriating the section line easements is codified as Alaska Statute (AS) 19.10.010. However, the the R.S. 2477 grant includes other kinds of rights of way other than those appropriated under this statute. On the other hand, you should note that the R.S. 2477 grant is specifically limited to rights of way over "public lands." The latter point is significant, because it is our opinion that Alaska Native use and occupancy sufficient to qualify for a certificate of allotment is also sufficient to withdraw the land occupied from "public land" status.

Finally, the State's acceptance of the R.S. 2477 grant along section lines has had an on-again, off-again history that must be taken into account when determining whether the easements granted under R.S. 2477 have ever been accepted by the State. Thus, the answers to your questions require some background in the meaning of the term "public lands" and in the history of the application of R.S. 2477 in Alaska. In order to give some direction to that discussion, however, we have provided short answers to each of the questions posed in your opinion requests.

II. SHORT ANSWERS

A. May 22, 1979 Request

We agree with the conclusion expressed at page 2 of your opinion request about the effect of Native use and occupancy on the establishment of a section line easement. However, we would state your conclusion more definitely: If use and occupancy were initiated after survey of the section line, then the section line easement is superior to the allottee's rights and a right-of-way across the allotment does not require the consent of the allottee or a grant from the United States. If use and occupancy began any time before the survey, then the easement can only be granted with the consent of the allottee and according to the applicable Indian right of way laws.

B. July 6, 1979 Request

We know of no principle requiring you to disclose whether or not there is access to advertised parcels; furthermore, otherwise valid section line easements can be used to provide private access, but they are also open to the public. Under some circumstances, however, easements by necessity can be implied across otherwise unencumbered lands to afford private access to landlocked parcels.

C. April 4, 1980 Request

Whether the Indian right of way laws apply to a Native allotment depends on whether the allottee commenced use and occupancy before or after a section line right of way was appropriated by survey.

III. DISCUSSION

A. R.S. 2477

1. History and Purpose of R.S. 2477

U.S. Supreme Court and Ninth Circuit cases have cast some doubt on whether R.S. 2477 applies in Alaska. A narrow reading of the U.S. Supreme Court's opinion in Central Pacific Railway Co. v. Alameda County, 284 U.S. 463 (1932), and the Ninth Circuit's later decision in U.S. v. Dunn, 478 F.2d 433, 445 (9th Cir. 1973) would indicate that R.S. 2477

was only a recognition of pre-existing rights rather than a grant of new rights. Strictly construed, this interpretation could mean that R.S. 2477 was never applicable to Alaska, since it was enacted in 1866, one year prior to the purchase of the Territory.

The Territorial and State cases, on the other hand, consistently characterize R.S. 2477 as "in effect, a standing offer from the federal government" for the grant of a right of way, Girves v. Kenai Peninsula Borough, 536 P.2d 1221, 1226 (Alaska 1975). Under this interpretation, the right of way has been held to come into existence upon the "acceptance" of the standing offer. See Berger v. Ohlson, 9 Alaska 389 (D. Alaska 1938); Clark v. Taylor, 9 Alaska 298 (D. Alaska 1938); United States v. Rogge, 10 Alaska 130 (D. Alaska 1941); State v. Fowler, 1 Alas. L.J. 7 (April 1963); Hammerly v. Denton, 359 P.2d 121 (Alas. 1961). Given the weight of authority in this jurisdiction and the historical reliance placed upon R.S. 2477 in Alaska as a source of rights of way across the public domain, we are unwilling to conclude that the statute has no applicability to Alaska. We suspect that if the question were squarely presented to the Ninth Circuit Court of Appeals it would agree.

It has been held that R.S. 2477 first became applicable in Alaska by the Organic Act of May 17, 1884, 23 Stat. 24, whereby Alaska first became an organized territory. Section 9 of that Act, among other things, provided that the laws of the United States be extended to the Territory of Alaska, U.S. v. Rogge, 10 Alaska, supra at 147. As noted previously, R.S. 2477 is construed as a standing offer from the federal government for the creation of a right of way, Girves v. Kenai Peninsula Borough, 536 P.2d, supra at 1226. Under this construction, it has been held that the offer can be accepted (and the right of way created) either (1) by a positive act of the state or territory clearly manifesting an intent to accept the offer, Hammerly v. Denton, 359 P.2d, supra at 123.[2/]

[2/] Accord: Wilderness Society v. Morton, 479 F.2d 842, 882 (D.C. Cir. 1973), cert. den'd. 411 U.S. 917.

or (2) by public use of the right of way for such a period of time and under such conditions as to prove that the offer has been accepted, id.

Statutory acceptance of the grant, formal expression on the part of public officials of an intention to construct a highway or actual public construction of a highway may all constitute acceptance of the R.S. 2477 grant by the "positive act" of the appropriate public authorities. Thus, in Girves, supra, the Alaska Supreme Court held that AS 19.10.010 (establishing a highway easement along all section lines in the State) was sufficient to establish a right of way along the boundary of plaintiff's homestead coinciding with a surveyed section line. In Wilderness Society v. Morton, 479 F.2d 842 (D.C. Cir. 1973), it was held that the State's application to the Bureau of Land Management to construct a "public highway" from the Yukon River to Prudhoe Bay, along with enabling State legislation, was sufficient to establish an acceptance of the federal grant. In addition, the actual construction or public maintenance of a highway may constitute acceptance. See Moulton v. Irish, 218 P.2d 1053 (Montana 1923), construction of highways; Streeter v. Stalnaker, 85 NW 47 (Nebraska 1901), public maintenance and improvement of highways.

Public use (sometimes called "public user") may also constitute acceptance of the grant in the absence of any positive official act. Whether any claimed use constitutes acceptance of the grant, however, is a question of fact to be decided by the court. It appears that continued and consistent use of a right of way across the public lands by even one person with an interest in the lands to which the road gives access may be sufficient to establish public user, State v. Fowler, 1 Alas. L.J., supra at 8 (April 1963). See also Hamerly v. Denton, supra at 125. However, the Alaska Supreme Court has held that mere desultory or occasional use of a road or trail does not create a public highway, id.3/

3/ Of course, it is no longer possible to accept the R.S. 2477 grant by any of these methods, because R.S. 2477 was repealed by FLPMA, supra, in 1976.

2. Allotments As "Public Lands"

By its terms, R.S. 2477 is only an offer for a right of way across "public lands." In discussing this term in the context of R.S. 2477, the Alaska Supreme Court has noted:

> The term "public lands" means lands which are open to settlement or other disposition under the land laws of the United States. It does not encompass lands in which the rights of the public have passed and which have become subject to individual rights of a settler. Hammerly v. Denton, supra at 123.

Beginning with the 1884 Organic Act, previously discussed, Congress has specifically provided for the protection of lands used or occupied by Alaska Natives. Section 8 of the Organic Act provided in part:

> That the Indians or other persons in [Alaska] shall not be disturbed in the possession of any lands actually in their use or occupation or now claimed by them but the terms under which such persons may acquire title to such lands is reserved for future legislation by Congress. 4/

Federal decisions have long recognized the statutory protection afforded Alaska Native use and occupancy. See, e.g., U.S. v. Berrigan, 2 Alaska 442 (D. Alas. 1904); U.S. v. Cadzow, 5 Alaska 125 (D. Alas. 1914). Departmental regulations and policy reinforce the statutes. See, e.g., 43 CFR §§ 2091.1(e), 2091.2-1, 2091.5, 2091.6-3; see also Government Appropriation of Rights-of-Way in Alaska, Opinion of the Associate Solicitor, Public Lands (M-36595, March 15, 1960, copy attached).

In analogous circumstances, the U.S. Supreme Court has consistently recognized that railroad land grants are not to be construed in derogation of Native use and occupancy

4/ Similar provisions appear in the following acts: Act of March 3, 1891, c. 561, 26 Stat. 1095, § 14; Homestead Act of May 14, 1898, c. 299, 30 Stat. 412, § 7; Act of June 6, 1900, c. 786, 31 Stat. 330, § 27.

rights. That is particularly true where those rights have been protected by treaty, Leavenworth L & GR Co. v. United States, 92 U.S. 733 (1875), or specific statutory exceptions, Buttz v. Northern Pacific Railway Co., 119 U.S. 55 (1886). See generally, Bardon v. Northern Pacific Railway Co., 145 U.S. 535, 540-543 (1892). Most significantly, the U.S. Supreme Court has specifically protected rights of individual Native occupancy against competing federal grants even in the absence of any statutory or treaty protections where those rights flow "from a settled government policy." Cramer v. United States, 261 U.S. 219, 229 (1923). Whether from the statutory protection afforded in the 1884 Organic Act and the other legislation specifically noted or from the settled government policy of protecting Alaska Native use and occupancy, we think it is clear that lands used and occupied by individual Alaska Natives are not "public lands" within the meaning of R.S. 2477 and that the R.S. 2477 grant cannot attach during any period of such occupancy.

3. Acts Accepting the R.S. 2477 Grant

(A) Section Line Easements. You have noted that AS 19.10.010 establishes rights of way of varying widths along the section lines in the State. As noted earlier, the Alaska Supreme Court has concluded this statute is a positive official act constituting acceptance of the R.S. 2477 grant, Girves, supra. The Territorial statute accepting the grant was originally enacted on April 6, 1923 (19 SLA 1923), but was subsequently repealed (perhaps inadvertently) on January 18, 1949. Op. Ak. Atty. Gen. No. 7 at 3 (December 18, 1969). The statute was subsequently reenacted in substantially its present form by the 1953 Territorial legislature (Act of March 21, 1953, 35 SLA 1953). Id. Thus, whether a section line easement has attached to Native occupied land must be viewed against the backdrop of the dates of Native occupancy and the dates during which Alaska's acceptance of the grant was in effect. The section line easements could only attach to lands not occupied by Natives between the dates of April 6, 1923, and January 18, 1949, and from March 21, 1953, forward.

Additionally, by the terms of the State statute, the acceptance is dependent on the existence of a "section line." In the Opinion previously noted, the State Attorney General also concluded that for the R.S. 2477 grant to attach under the statute, the "public lands must be surveyed and section lines ascertained," id. at 7. We agree with this conclusion; therefore, you must also determine whether

the lands in question were subject to individual Native use and occupancy on the date the section line was actually surveyed.[5]

(B) Other Official Acts of Acceptance. As noted earlier, other official actions (i.e., construction, repair, dedications, etc.) can constitute official acceptance of the R.S. 2477 grant. Whether such official action has created an R.S. 2477 right of way will have to be determined on a case-by-case basis.

(C) Public User. Rights of way claimed to have been created by public use must also be determined on a case-by-case basis. On the one extreme, an obvious public road established prior to Native use and occupancy would certainly be sufficient to constitute acceptance of the R.S. 2477 grant; see State v. Fowler, 1 Alas. L.J. 7, supra. On the other extreme, it is equally clear that desultory or occasional use of a road or trail by individuals having no interest in the land to which they obtain access is not sufficient to create an R.S. 2477 right of way, Hamerly v. Denton, supra. Whether a given use is sufficient to constitute acceptance of the R.S. 2477 grant, may have to be determined judicially in all but the most obvious cases.

4. Widths

By State statute, section line easements on "public lands" are four rods (66 feet) wide with the section line as a center of the dedicated right of way.[6] Other official

---

[5] The Attorney General also concluded that the R.S. 2477 grant attaches on the date the "protracted surveys" were published in the Federal Register. We do not agree with this position; as a practical matter, the protraction diagrams are not a reliable means of ascertaining the correct position of the surveyed section line.

---

[6] A right of way 100 feet wide is granted between sections of land owned by or acquired from the State. Since Native occupied lands could not fall within this category, section line easements on Native allotments will be confined to the 66 foot width.

acts could conceivably establish larger rights of way. Rights of way established by public user appear to be confined to the width actually used, State v. Fowler, supra.

B. Other Access Questions

1. Obligations To Provide Access

We do not believe either the allottee or the United States is obligated to provide a warranty of access to the purchaser of an allotment. By statute (AS 34.15.030) Alaska has incorporated the common law covenants for title into any deed which by its terms "conveys and warrants" real property to another. Thus, a deed substantially in the statutory form includes implied warranties that at the time of the conveyance the grantor: (1) is lawfully seized of the estate in fee simple and has the right and power to convey the premises; (2) that the premises are free from encumbrances and (3) that he warrants quiet enjoyment of the premises and to defend the title against all persons claiming the premises.

You have advised that you use a special warranty deed to convey restricted Indian lands. As you know, a special warranty deed limits the grantor's obligation to defend only against claims arising through him. It does not require the grantor to defend against claims arising through other persons, 21 CJS "Covenants" § 49. Except as so limited, we believe the deed form you used includes all of the statutory covenants implied by AS 34.15.030. None of these, however, include a covenant of access to the land granted. See generally, Powell on Real Property, ¶ 904, et seq. (1968 edition). Furthermore, AS 34.15.030 specifically provides: "No covenant is implied in a conveyance of real estate, whether the conveyance contains special covenants or not." We interpret this to mean that unless there is a specific covenant of access, the grantor is not obligated to provide it.

2. Easements By Conveyance Or Covenant

In spite of the protection this doctrine affords both the United States and the allottee, we recommend that as a prudent land manager you advise the allottee to provide whatever access it is within his power to provide incident to the sale of an allotment. That is especially true if, as in one case you described to us, the allottee is selling a

portion of the allotment which would be landlocked by the remaining lands of the allottee or others. In these circumstances, we advise you to insure that appropriate access is guaranteed through the allottee's other lands either by convenant or specific grant of easement. See generally, Powell on Real Property, ¶ 407 and 408. See also, 28 CJS Easements, § 23, et seq. Conversely, if the allottee's other lands will be landlocked by conveyance of a portion of the allotment to a third party, the allottee should insure that he is reserved an easement in the lands granted. See 28 CJS Easements, § 29. Under these circumstances, failure to provide or obtain access at the time of conveyance could result in later litigation to establish an easement by necessity.

3. Easements By Necessity

Easements by necessity are implied easements across otherwise unencumbered tracts where necessary to afford access to an otherwise landlocked parcel. See generally, Powell on Real Property, supra, ¶ 410. This doctrine comes into play only where there is a unity of ownership between the dominant and servient parcels at the time the landlocked (i.e., dominant) parcel was severed from the rest of the estate. The doctrine would apply to both examples discussed above where the grantor conveys a portion of the allotment thereby isolating either the land conveyed or the grantor's retained lands. In these circumstances, the courts have construed the intention of the parties to create an easement of necessity across the servient estate to provide access to the landlocked (i.e., dominant) estate.

As applied in this jurisdiction, the doctrine only requires proof of reasonable (as opposed to absolute) necessity in order to imply an easement. U.S. v. Dunn, 478 F.2d 443, 446 (9th Cir. 1973). Although the easement must be something more than a mere "convenience," it is not necessary to show that it is the only means of access to the property. In any event, the determination of whether the easement is a "reasonable necessity" is a fact question which involves considerations of public policy as well as the intent of the parties and the reasonable utilization to be made of the landlocked parcel. See generally, Powell on Real Property, supra, ¶ 410.

The doctrine has also been applied to Indian lands in this jurisdiction, cf. Superior Oil Co. v. United States, 353 F.2d 34 (9th Cir. 1965). The oil company in this case

sought to obtain an easement to move heavy oil drilling equipment across Indian reservation lands in order to drill on lands owned by a mission society and leased to the oil company. The mission society had previously been granted the land by the United States under a statute permitting such grants to religious organizations engaged in mission or school work on Indian reservations. The court concluded that although the mission society had an easement by necessity for mission purposes, the scope of that easement could not be expanded to accommodate the purposes of the oil company. We know of no principle which would preclude an easement of necessity from attaching to lands merely because they are Indian trust or restricted lands where the easement of necessity doctrine is otherwise applicable. See also, U.S. v. Clarke, 529 F.2d 984 (9th Cir. 1976), aff'd _____U.S._____, (No. 78-1693, March 18, 1980).

IV. SUMMARY

This, of necessity, has been a rather wide-ranging opinion dealing with the several general concerns you raised regarding easements across Indian allotments. We will summarize some of our conclusions below for ease of reference.

A. R.S. 2477 Easements

R.S. 2477 easements can be created either by the positive acts of authorized authorities or public user of a right of way across the "public lands." Native used and occupied lands, however, are not "public lands." Therefore, a right of way under R.S. 2477 can only be obtained if, at the time the R.S. 2477 grant is accepted, the lands were not subject to the individual use and occupancy rights of an Alaska Native who has applied for an allotment.

B. Section Line Easements

Whether a section line easement supersedes Native use and occupancy depends on whether the Native use and occupancy preceded either the statutory acceptance or actual survey of the section line easement. If Native use and occupancy began prior to April 6, 1923, or between January 18, 1949, and March 21, 1953, then the easement could not be imposed on those lands by subsequent survey of a section line. If unoccupied lands were surveyed either between April 6, 1923,

and January 18, 1949, or after March 21, 1953, then the section line easement supersedes Native occupancy rights.

C. Guarantees of Access

Although there is no legal requirement to guarantee access to otherwise landlocked allotments, you would be well advised to counsel the allottees to provide access if it is within their power to do so. It is especially important to provide access where there is an initial unity of title in the allottee. Under these circumstances an easement of necessity can be imposed to benefit a landlocked parcel. Providing access at the time of the grant will avoid later confusion and possible litigation.

D. Public or Private Access

You should also be aware that any R.S. 2477 right of access (whether by section line easement or otherwise) predating Native use and occupancy is a right of public access. While it may also permit private individuals to have access to otherwise landlocked parcels, it also permits the public at large to use the right of way. Of course, that does not permit the public to trespass on the allottee's or anybody else's private property.

September 7, 1984

Memorandum

To: Member of ALUC

From: State Director, Alaska

Subject: R.S. 2477 Issue Paper

Transmitted herewith is an issue paper which sets forth BLM's policy on R.S. 2477 rights-of-way. The policy has been altered enough in recent years to allow us to note these claims on our records provided the State takes the initiative and files an application for notation which meets the criteria set out in the issue paper.

In the absence of the State formally asserting its rights under the Statute, BLM has no choice but to consider the lands involved to be vacant public lands without established public access. BLM has had numerous discussions with the State concerning R.S. 2477 and the State is well aware of our policy and procedures.

Enclosed is a draft MOU between our Fairbanks District Office and the State of Alaska which is intended to facilitate the policy set out in the issue paper. Also enclosed is a copy of our BLM Manual section on R.S. 2477 and a copy of a Regional Solicitor's Office memorandum to the Bureau of Indian Affairs dated May 21, 1980.

The Fairbanks District Office and the State of Alaska, Department of Transportation and Public Facilities, Northern Region have been working on this Draft MOU for sometime now and have established a good working document which fits well within the constraints of our regulations.

Our first preference would be to have the cooperative State Federal work on R.S. 2477 started in Fairbanks proceed. However, we would not object to the Council taking this matter under its wing if this is what the State wishes. Under any circumstance, the State must clearly take the leadership role.

Michael J. Penfold
State Director

BLM POSITION

Issue Paper - R.S. 2477 Roads and Trails

Under DOI existing authority and policy, it is the responsibility of the State of Alaska to officially assert its claimed rights by filing applications for notation of such rights-of-way on our records. Such applications in addition to providing the information required to show the highway meets the four criteria set out below must provide a plottable description of the facility so that BLM's records can be properly noted.

The Act of July 26, 1866, R.S. 2477 (43 U.S.C. 932) provided:

> "The right-of-way for the construction of highways over public lands not reserved for public uses, is hereby granted."

This statute, which was repealed by the Federal Land Policy and Management Act (FLPMA) of October 21, 1976, 90 stat. 2743, has been interpreted as granting a right-of-way for public use over public land without limiting the method of establishment of that right-of-way. The grant becomes fixed when a public highway is definitely established in one of the ways authorized by the laws of the State where the land is located.

The Act (R.S. 2477) did not specify the extent of the grant, the width of the right-of-way, or the nature of the right conveyed. Since the Department does not grant such rights-of-way, it has consistently held that it has no authority to adjudicate claims made under this Act. Therefore, acknowledgements of such claims have not been inserted in Federal Land Patents. The courts have held that reservation of an R.S. 2477 right in our patents is not necessary to validate or protect rights-of-way created under the statute.

In order to facilitate proper management of the public land, the Department has to have sound transportation plans. It is, therefore, necessary to identify all public roads in a given area. To facilitate such identification the Bureau of Land Management has recently been given authority to note claimed R.S. 2477 highways (roads, trails, etc.) on its official status plats, provided that requests for notation meet the following criteria:

1. In order for a valid right-of-way to exist, there must have been actual construction of a highway. Mere use, planning, or survey is not considered construction. However, construction of the highway need not have occured all at once. Road maintenance often equals improvement and even construction. When the history of a road is questionable, it's existence in a condition adequate for public use may constitute evidence that construction has taken place.

2. The highway is free and open to the public at large.

3. The construction of the highway on unreserved public land must have occurred prior to repeal of R.S. 2477 on October 21, 1976.

4. The State must have a procedure to confirm the R.S. 2477 public highway right-of-way grant.

Once the State application is received, BLM has the responsibility to assure that the lands covered by the claimed right-of-way were, on the date of establishment of the highway, unreserved public lands. If the information submitted by the State meets the four criteria above, BLM assumes (it does not adjudicate the claim) that the road is a bona fide R.S. 2477 highway. The BLM then acknowledges the State's claim and plots the right-of-way on its records.

Any uses other than for highway purposes within the boundaries of an R.S. 2477 right-of-way must be permitted by BLM by a separate right-of-way grant. It should also be noted that the R.S. 2477 grant extends only to the right-of-way itself, it does not include ancillary facilities such as material sources and stockpile areas.

The Fairbanks District of BLM is currently working on a Memorandum of Understanding with the State of Alaska, Department of Transportation and Public Facilities. This MOU is intended to facilitate notation of the State's claimed R.S. 2477 rights on BLM's official records.

BLM has no objection to elevating this MOU to State level if the Council so desires. However, even if the MOU is elevated to State level, BLM cannot by law or regulation note the State's R.S. 2477 claims to its records until the State DOT/PF files a formal request for notation accompanied by a plottable description and a date of appropriation. The initiative to begin the record notation process rests with the State.

Further, until the State officially identifies its claimed R.S. 2477 rights, so they can be noted on the records, Federal agencies have no recourse but to treat the lands involved as if they were free and clear of encumbrances. As an example, numerous contacts were made with the State of Alaska during the planning process on the Steese NCA and the White Mountains NRA. At no time has the State of Alaska identified any R.S. 2477 claims within these planning areas.

COPY

MEMORANDUM OF UNDERSTANDING
BETWEEN ALASKA DEPARTMENT OF NATURAL RESOURCES AND
ALASKA DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES
AND
BUREAU OF LAND MANAGEMENT

PURPOSE

1. The purpose of this agreement is to establish the procedures for the assertion of RS 2477 rights-of-way by the Alaska Department of Natural Resources (DNR) and the Alaska Department of Transportation and Public Facilities (DOT&PF) to the Bureau of Land Management (BLM). Federal, state, and local officials need to know locations of RS 2477 public right-of-way assertions in order to assist such officials in their land and resource management decisions. The public needs to know the location of RS 2477 public right of way assertions to avoid unauthorized uses on private lands. This Memorandum of Understanding (MOU) will establish procedures that will enable RS 2477 rights-of-way assertions to be placed on land status plats.

BACKGROUND

2. RS 2477, formally codified as 43 U.S.C 932 (repealed by P.L. 94-579, Federal Land Policy and Management Act of October 21, 1976), provides:

> The right of way for the construction of highways over public lands, not reserved for public uses, is hereby granted.

3. By regulation found in 43 C.F.R. 2802.5 (b), the Bureau of Land Management has provided:

> In order to facilitate management of the public lands, any person or state or local government which has constructed public highways under the authority of RS 2477 (43 U.S.C. 932, repealed October 21, 1976) may file a map showing the location of such public highways with the authorized officer.

4. In Hamerly v. Denton, 359 P. 2d 121, 123 (Alaska 1961), the Alaska Supreme Court stated that the general rule regarding acceptance of the RS 2477 federal grant:

> Before a highway may be created, there must be either positive act on the part of appropriate public authorities of the state, clearly manifesting an intention to accept the grant, or there must be public use for such a period of time and under such conditions as to prove that the grant has been accepted.

DOT-DNR/BLM M.O.U.

5. The United States Department of the Interior, Office of the Solicitor, stated in a memorandum dated July 7, 1983:

> "[(T)he Department of the] Interior has long recognized that State law controls what constitutes a (R.S. 2477) highway within each state;" and

6. Alaska Statute 19.45.001(8) states:

> "Highways includes a highway (whether included in the primary or secondary systems), road, street, trail, walk, bridge, tunnel, drainage structure and other similar or related structure or facility, and right-of-way thereof, and further includes a ferry system, whether operated solely inside the state or to connect with a Canadian highway, and any such related facility;" and

7. WHEREAS by statute, AS 19 SLA 1923; 123 SLA 1951; 35 SLA 1953; AS 19.10.010, the State of Alaska has accepted the RS 2477 grant.

8. The RS 2477 grant has also been accepted in many cases by actual public use or expenditure of public monies on unreserved public lands for highway purposes.

POLICIES AND PROCEDURES

9. DOT&PF shall have responsiblity for asserting and for identifying and submitting maps to BLM of all RS 2477 rights-of-way established before October 21, 1976, identified on the list of state maintained highways. DOT&PF's responsibility under this paragraph includes both state and non state lands.

10. DNR or DOT&PF may identify, assert, and submit maps and evidence of use to BLM for all other RS 2477 rights-of-way established before October 21, 1976, situated upon any land within the State of Alaska.

11. DNR or DOT&PF shall accept evidence of use on any right-of-way established before October 21, 1976, from other state agencies, local governments, and members of the public. For all claims of RS 2477 rights-of-way which involve state land or provide access to state land or public water an ADL/LAS case file will be established.

12. DNR or DOT&PF may maintain duplicate sets of all files regarding RS 2477 rights-of-way. All newly created RS 2477 files, or any documents to be added to an existing file, will be duplicated and forwarded from one agency to the other.

13. All maps showing the location of RS 2477 rights-of-way established before October 21, 1976, submitted to BLM shall be the best maps possible but not of lesser detail than standard USGS maps at a scale 1:63,360. Maps and supporting documentation shall be submitted by both agencies concurrently. The submission of such maps showing the location of RS 2477 rights-of-way on public lands shall not be conclusive evidence as to their existence. Similarly, a failure to show the location of RS 2477 rights-of-way on any map shall not preclude a later finding as to their existence.

14. There shall be established an RS 2477 coordinating committee in the Northern Region of Alaska composed of DNR, DOT&PF and BLM. The purposes for this committee are as follows:

(a) coordination of agency priorities for identifying, locating, and asserting RS 2477 rights-of-way;

(b) coordination of RS 2477 processing procedures for identifying, locating, establishing case files, making assertions, and platting claims on both federal and state land status plats; and

(c) coordination of requests made to and by the agencies.

15. Each assertion of the existence of an RS 2477 right-of-way made pursuant to this agreement and the submissions to BLM will be reviewed by BLM to ensure the land was unreserved public land as of the date claimed and was established prior to the repeal of the law on October 21, 1976. BLM will not adjudicate the validity of RS 2477 assertions.

16. BLM, DNR, and DOT&PF shall each issue a serial number and establish a case file for each claim made pursuant to this agreement. All correspondence shall reference all agencies' file numbers.

17. BLM shall plot each RS 2477 right-of-way asserted on their Master Title Plats when the following criteria are met (BLM Manual 2801.24 B.1, Rel. 2-152, 9/10/82):

1. Criteria for identification of R.S. 2477 Public Highways, include four elements:

a. In order for a valid right-of-way to come into existence, there must have been the actual building (construction) of a highway. Mere use, planning, or surveying, does not equal construction. However, construction may not have occurred all at once. Road maintenance often equals improvement, or even construction.

Increments of maintenance over several years may equal construction. When public funds have been spent on the road it may be a public road. When the history of a road is unknown or questionable, its mere existence in a condition adequate for public use may be evidence that construction has taken place.

b. A highway is freely open to everyone. Roads that have had access restricted to the public by locked gates or other means may not be public highways.

c. The construction of a public highway on unreserved public land must have occurred prior to October 21, 1976.

d. A State has to have a procedure to confirm the R.S. 2477 public highway right-of-way permit.

18. This MOU establishes the state's procedure to confirm the RS 2477 and thereby fulfills item d in paragraph 17 above.

19. DNR shall plot each RS 2477 right-of-way asserted on their land status plats.

20. Nothing in this Memorandum of Understanding shall obligate any party in the expenditure of funds, or for future payments of money, in excess of appropriations authorized by law.

21. Each party agrees that it will be responsible for its own acts and the results thereof and each party shall not be responsible for the acts of the other parties; and each party agrees it will assume to itself risk and liability resulting in any manner under this agreement.

22. Nothing in this MOU is intended to limit agency or individual rights to normal administrative or judicial appeal processes.

23. Nothing herein is intended to conflict with Federal, State or local laws or regulations. If there are conflicts, this agreement will be amended as soon as practical to bring it into conformance with conflicting laws or regulations.

24. It is understood by all parties that individual citizens may be entitled to assert rights-of-way under RS 2477 notwithstanding this agreement. Nothing in this Agreement shall affect the right of private citizens to assert rights-of-way under RS 2477 in conformance with applicable law.

25. The effective date of this agreement shall be from the date of final signature. The agreement shall remain in effect until the parties jointly agree otherwise.

DATE: MAY 3, 1985

RE: CS FOR SJR 11

Our transportation committee substitute for Senate Joint Resolution 11, urging the repeal of certain portions of the Merchant Marine Act of 1920, is currently in your committee.

As detrimental to Alaskan commerce as some parts of this Act are, I feel their repeal is clearly in the best interest of Alaskans and the nation. It is our duty to let the United States know where we stand on this issue.

I would urge you to schedule CSSJR 11 for a hearing in the House Transportation Committee as soon as possible before the session ends. Thank you.

MEMORANDUM

To: Committee members
From: Committee staff
Date: Wednesday, February 27, 1985
Re: Subject of meeting

Attached are background materials relevant to SJR 11, which urges the repeal of the federal Jones Act, and which is the subject of this afternoon's committee meeting.

Included in the packet along with SJR 11 are:

- The Merchant Marine Act of 1920 (the Jones Act)
- The final report of the Alaska Statehood Commission, issued January, 1983, and recommending repeal of the Jones Act
- The executive summary of a report on the effect of the Jones Act prepared for the Statehood Commission
- The position of the Governor, dated June, 1983, supporting repeal of the Jones Act
- Text of the ATC initiative, which becomes effective on February 28 (tomorrow) and which includes a provision regarding repeal of the Jones Act
- A news clipping from the Seattle P-I, indicating local interest in the Jones Act

RE: SJR 11 REPEAL OF THE JONES ACT

BACKGROUND

The term 'Jones Act' refers to Section 27 of the Merchant Marine Act of 1920, which states;

> "No merchandise shall be transported by water, or by land and water,... between points in the U.S.... either directly or via a foreign port or for any part of the transportation, in any other vessel than a vessel built in and documented under the laws of the U.S. and owned by persons who are citizens of the U.S."

The purpose of the Merchant Marine Act of 1920 is:

> "That it is necessary for the national defense and for the proper growth of its foreign and domestic commerce that the United States shall have a merchant marine of the best equipped and most suitable types of vessels sufficient to carry the greater portion of its commerce and serve as a naval or military auxiliary in time of war or national emergency, ultimately to be owned and operated privately by citizens of the United States..."

JONES ACT EFFECT ON ALASKA

The Jones Act Cost Penalty.

The Jones Act restricts the "coastwise" waterborne transportation of the United States, including transportation between Alaska and Lower-48 ports and transportation within Alaska, to vessels that are US-built, US-owned, US-registered, and manned by US nationals. Detached from the other states on the extreme Northwest corner of North America, Alaska depends disproportionately on ocean transportation for its economic

links with the rest of the nation. The Jones Act has long been a point of contention between Alaskans and other Americans --- it was one of the grievances that motivated Alaska's struggle against "colonialism" and the desire to become a State; 24 years after Statehood some Alaskans still regard the law as a symbol of their state's second-class membership in the American union.

Whatever transportation-cost penalty the Jones Act carries is imposed disproportionately on the Alaska economy. In general, the relatively small size of Alaska's economy makes it a "price-taker" in national and international markets. That is, both the prices of goods exported from Alaska and those of goods imported into the state tend to be set in larger markets outside its borders. Higher transportation costs are thus added to the cost of Alaska's imports, and subtracted from the market prices of her exports. Thus, the prices of most consumer goods in Anchorage are composed of a price determined in some outside market, plus the transportation cost from that market to Anchorage. This does not include local distribution markups.

Alaska's position as a price-taker means that its economy tends to suffer a double penalty from any adverse transport-cost differential. In general, the state's exports to Lower-48 markets will have lower prices at their point of origin than would otherwise have been the case. The most obvious impact of this kind is on the state government's natural resource royalties and severence taxes, which are keyed to netback prices.

The biggest cost impacts of the Jones Act will be on crude oil, Alaska's chief export commodity. The estimated reduction in the value of Alaska crude resulting from the Jones Act is $225 million per year.

Alaska North Slope Crude must be shipped pursuant to Jones Act regulations, which provide an exclusive monopoly to U.S. flag ships for all domestic intercity shipborne freight. The transportation of ANS crude accounts for more than half the business conducted by the Jones Act tanker fleet. It is contended that the majority of Jones Act tankers, however, are aging, inefficient, and uncompetitive with foreign flag vessels. The inefficiency stems from; very high labor costs; direct tax subsidies for construction and operating costs; indirect tax subsidies from wellhead-price manipulation by vertically integrated oil-and-tanker companies, allowing greater shipping costs to be offset against reduced wellhead netbacks.

Below is a comparison of transportation differentials between markets:

Valdez to Japan	$0.50
Persian Gulf to Japan	1.00
	$0.50
Valdez to Gulf Coast	$4.00*
Persian Gulf to Gulf Coast	2.00
	$2.00

*With Trans Panama Pipeline ($5.00 without)

As shown from these equations, there is an efficiency loss equaling $2.50 per barrel. Consumers everywhere lose because economic efficiency has been sacrificed resulting in higher delivered costs to both markets. While Valdez to Gulf Coast is just twice the distance from Valdez to Japan, transportation costs are 10 times as high. The bulk of this expense is directly attributable to Jones Act tanker costs, which do not compete with foreign-owned tankers in the U.S. trades.

SUMMARY OF FINDINGS ON THE JONES ACT FOR THE ALASKA STATEHOOD COMMISSION

The Alaska Statehood Commission prepared a report in January of 1982. In this report was the commissions conclusions on the Jones Act. Listed below are some of those conclusions:

> The costs of industry subsidies are not evenly distributed nationwide, but are borne by heavy users of Jones Act protected shipping.
>
> Many Alaskans have called the Jones Act a gross form of discrimination against Alaska.
>
> We (AK Statehood Commission) believe that if national security requires a protected merchant fleet, all the nation - not just the states heavily dependent on shipping - should support the cost.
>
> Transportation is Alaska's lifeline, and Alaska's growth needs may be severely restricted by the Jones Act because of its inflexibility and the unwillingness of interests that benefit from the act to allow even small changes.
>
> We find from our preliminary studies of the Jones Act... (that it) discriminates blatantly against Alaskans, helps drive up the cost of living here, and stifles economic development.

NOT JUST ALASKA

The Jones Act repeal is not just an Alaskan issue. Other states are adversely impacted as well. A recent article in the Seattle Post Intelligencer, (2-22-85) mentions that the Jones Act has failed in many respects:

> The U.S. fleet has diminished over several decades from 1,300 to 400 vessels. Commercial shipbuilding in the country has come to a virtual standstill.

These laws "keep Seattle from becoming a premier destination for cruise ships. Foreign-flag ships, unable to transport passengers between U.S. ports, dock instead in Vancouver, B.C., when cruising to and from Alaska." "A cruise ship exemption could inject millions of dollars into the local economy from passenger traffic through Seattle."

CONCLUSION

The largest adverse effects of the Jones Act for Alaska are likely to be in the future, as transportation costs for crude oil and other minerals can be an important factor determining the economic feasibility of developing specific deposits.

Seattle P.I., Fri. Feb. 22

Jones Act is debated here

By Scott Maier
P-I Reporter

The economic trade-offs of protectionism for the U.S. maritime fleet have created powerful cross-winds over Puget Sound.

Laws that restrict coastal trade to domestic ships give U.S. shipyards their last hope of reviving the building ofcommercial ships. Local shipyards envision the Pacific Northwest as becoming the nation's center for cruise ship construction.

These same protectionist laws, however, keep Seattle from becoming a premier destination for cruise ships. Foreign-flag ships, unable to transport passengers between U.S. ports, dock instead in Vancouver, B.C., when cruising to and from Alaska.

These competing interests were highlighted yesterday at a Chamber of Commerce forum held on the Jones Act, a 1920 law intended to ensure the United States maintains a viable maritime industry.

Some forum participants, however, noted that the Jones Act has failed in many respects.

The U.S. fleet has diminished over several decades from 1,300 to 400 vessels. Commercial shipbuilding in the country has come to a virtual standstill. The nation uses jets instead of ships to mobilize its troops in warfare.

"We are looking at a dinosaur 65 years old," noted Richard Smith, forum moderator.

Ken Fox, senior vice president of Tacoma Boatbuilding Co., said not to give up yet on domestic ship construction. Fox said his company plans to invest $1.5 million for facilities to build an 800-passenger ship on order.

If financing for the cruise ship comes through, construction will keep 60 engineers and 200 craftsmen busy for several years, Fox said. About $30 million of materials will be bought locally to build the ship.

This boost to the Puget Sound economy would be dashed if an exemption to the Jones Act was provided for cruise ships, Fox said.

But a cruise ship exemption could inject millions of dollars into the local economy from passenger traffic through Seattle, said Barbara Goen, marketing director for the Rembold Corp., which is building a $53 million cruise ship terminal at Pier 66.

ANALYSIS: Attach a separate page if necessary

Bill would recommend action that would increase the value of Alaska's crude oil production by reducing transportation costs to lower 48 markets. As a result tax and royalty collections would increase by an estimated $86 million per year.

BACKGROUND

The purpose of the study is to provide "an expert and objective analysis of the economic effects of the Merchant Marine Act of 1920 (The Jones Act) on the economy of Alaska," considering:

- The costs which the Act adds to the ultimate price of important classes of freight coming to and leaving Alaska;
- The effect of the Act on the cost and standard of living in Alaska;
- The effect the Act has upon further development and expansion of shipping-dependent industries;
- The composition of the U.S.-flag Jones Act fleet;
- The effects higher shipping costs have on state revenues;
- Other important effects the Act may have upon Alaska's economy, resources, and future development.

The Jones Act

The term "Jones Act" refers to Section 27 of the Merchant Marine Act of 1920, which states:

> No merchandise shall be transported by water, or by land and water,....between points in the U.S.....either directly or via a foreign port or for any part of the transportation, in any other vessel than a vessel built in and documented under the laws of the U.S. and owned by persons who are citizens of the U.S.....

Because Section 27 restricts U.S. domestic waterborne trade to vessels of U.S. construction, U.S. registration, and U.S. ownership, the Jones Act has come to be referred to as the U.S. cabotage law. Cabotage refers to the reservation of a nation's domestic cargo to ships of that nation's fleet. It could be described as a form of protectionism applied to transportation services. In fact, the purpose of the Merchant Marine Act of 1920 is stated clearly in the preamble of the Act:

> That it is necessary for the national defense and for the proper growth of its foreign and domestic commerce that the United States shall have a merchant marine of the best equipped and most suitable types of vessels sufficient to carry the greater portion of its commerce and serve as a naval or military auxiliary in time of war or national emergency, ultimately to be owned and operated privately by citizens of the United States....

Factors Leading Up to Passage of the Act

To understand why the Merchant Marine Act of 1920 was enacted, it is first necessary to review the U.S. experience in World War I.

At the beginning of World War I in 1914, the British maintained the world's largest merchant fleet with over 8,500 vessels. The remaining protagonists, together with Britain, accounted for over 14,000 vessels or nearly 60 percent of the world fleet and over 65 percent of the world's tonnage.

As the warring nations recalled their merchant fleets to military service or lost them in action on the high seas, the U.S. began to experience a crippling scarcity of vessels for its on-going commerce. Commodities and goods were left literally rotting on the piers. A major shipbuilding program to provide the country with the ships necessary to carry men and materials to Europe for an extended war was undertaken. However, only a few vessels were delivered before the armistice ending World War I was declared in November of 1918.

The experience of World War I indicated to U.S. lawmakers the dangers of relying on foreign-flag fleets. In the summer of 1919, the Senate Commerce Committee chaired by Wesley L. Jones, Republican from the State of Washington (1909 to 1932), began working on a revision of the national maritime laws. Under Jones' direction the Merchant Marine Act of 1920 was passed into law.

EXCEPTIONS TO THE ACT

A variety of circumstances and conditions have resulted in differing exceptions to the Jones Act for some territories and states. The third and fourth proviso exceptions to Section 27 of the Merchant Marine Act of 1920 are examples of exceptions that apply to Alaska. For practical purposes, the third proviso allows the use of foreign owned, registered, and built ships for carrying cargoes between Alaska and the lower 48 states via Canadian ports so long as rail movement is involved, while the fourth proviso applies to movements on the Yukon River.

There are other exceptions. For instance, trade with the U.S. island possessions of Guam, Tutuila (American Samoa), Wake, Midway and Kingman Reef may be carried on foreign built U.S.-flag vessels.

Of direct interest to Alaska are the conditions that govern trade to the Virgin Islands. For historical reasons, the Virgin Islands are exempt from the Jones Act. As a result, Alaskan crude oil can be shipped out of Alaska on foreign-flag vessels to a refinery in the Virgin Islands. The product can then be shipped foreign-flag to the U.S. mainland. Data compiled by the Maritime Administration indicate that this route accounts for about 5 percent to 15 percent of Alaskan oil shipments.

THE JONES ACT FLEET

The Jones Act fleet consists of those vessels eligible to engage in the coastwise trade. Generally, that includes any vessels built in the U.S., under

U.S. ownership, registered under the laws of the U.S., and not restricted because of subsidy status. Vessels that have received Construction. Differential Subsidy (CDS) or are receiving Operating Differential Subsidy (ODS) from the Maritime Administration cannot serve the cabotage or coastwise trade without special waivers.

Currently, the Jones Act fleet accounts for 60.7 percent of U.S.-flag tonnage. Most of these vessels are tankers; in that category, 86.8 percent of all vessels are eligible for coastwise trading. Data appear in Table 1.

The Alaska trade fleet of six[1/] dry cargo freighters and 88 tankers constitutes 28.8 percent of the Jones Act fleet and 16 percent of the active U.S.-flag privately owned fleet.

Alaska trade freighters constitute only 8.6 percent of the total Jones Act eligible freighters. The containerships are smaller than those generally found in the Jones Act fleet and the Ro/Ro ships are larger. Among tankers, the Alaska trade fleet is made up of 34.4 percent of the total Jones Act fleet, but has 54 percent of the carrying capacity. This is because tankers in Alaska service are larger than the fleet average. Data appear in Table 2.

ALASKA WATERBORNE TRADE

Alaska's waterborne commerce is dominated by crude oil shipments from Valdez which accounted for 89.5 percent of Alaska's total port activity in 1979. When crude oil shipments are subtracted from the total, remaining waterborne commerce is 34.5 percent foreign imports and exports, 47.5 percent coastwise receipts and shipments, and 18 percent internal receipts and shipments. Data illustrating the relationship of total foreign, coastwise, and internal movement of the top ten Alaska ports is shown in Figure 1. Excluding crude oil shipments, the activity of the top ten Alaska ports includes approximately 60 percent of the state's total waterborne commerce.

Coastwise dry cargo shipments out of Alaska move primarily to the Pacific Northwest (Seattle and Tacoma). Of the total, 51.2 percent move to the Pacific Northwest, California receives 15.9 percent, and internal shipments within Alaska account for the remaining 32.9 percent.

Tanker movements from Alaska are destined primarily for refineries in California. Panama, the Pacific Northwest, and Hawaii also receive varying amounts of Alaska crude, based on the 1979 data.

Coastwise dry cargo shipments to Alaska originate to a large degree in the Pacific Northwest (77.3 percent). A very high proportion of the cargo moving to and from Alaska's smaller ports is transshipped via the major ports.

1/ Includes Sea-Land and TOTE; excludes barge services.

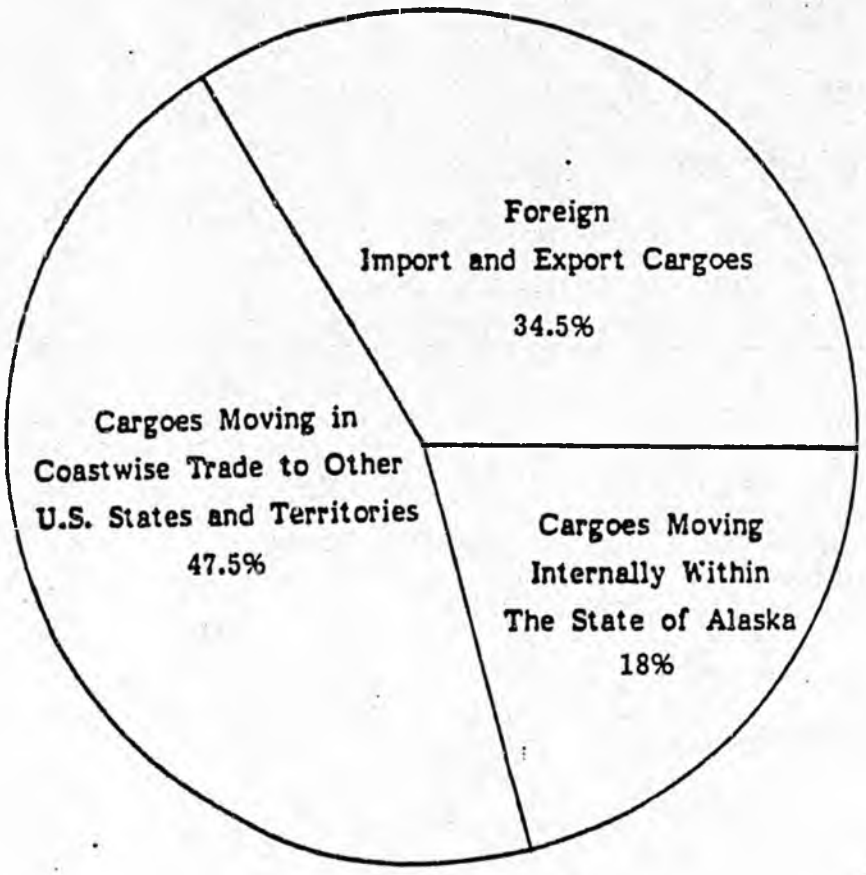
FIGURE 1

CARGO ACTIVITY OF CORPS OF ENGINEERS TOP 10 ALASKA PORTS
(EXCLUDING CRUDE OIL AT VALDEZ)
BASED ON TONS OF CARGO SHIPPED AND RECEIVED
1979



Tanker cargo being received in Alaska, consisting of petroleum products for consumption in the state, flows almost exclusively f.om California; a high percentage is redistributed from larger to smaller Alaska ports.

Anchorage is the primary receiving port for consumer products, building materials, and food. Whittier also serves the Anchorage market with the same categories of cargo. Most of the high volume cargoes (commodities registering annual volumes of 10,000 tons or more) moving into Alaskan ports other than Anchorage and Whittier, consist of petroleum products.

ALASKAN SHIPPING COSTS

The Impact of Costs on Rates

The cost of shipping in the Alaska trade, and the cost premium caused by the Jones Act, were estimated by comparing the cost of present vessel services with the probable cost of those services were they operated with foreign-flag ships. Although it is true that the observed impact on customers is conveyed through shipping rates, not underlying shipping costs, and that competition and value of service, or "what the traffic will bear," establish freight rates for each commodity in the short run, costs set the limits for freight rates in the long term. In other words, although cost and rate may not be the same or even similar for any given commodity at any given time, in the long run (and/or over a mixture of commodities carried in the same service), rates are, in fact, cost determined. Hence, the cost-based method is a valid approach for determining the relative impact of differing governmental policies which affect the long term character of a shipping market.

Shipping Costs

Ocean shipping costs can generally be divided into the following categories:

Capital
Manning and Subsistence
Fuel
Maintenance and Repair (M&R)
Supplies and Equipment
Insurance
Cargo Handling
Other Port Costs
Agency, brokerage, and Commission
Waterway Tolls and Pilot Fees
Corporate Overhead

There are exceptions, however. For example, tanker movements seldom involve meaningful cargo handling costs, because this function is provided by shipboard pumps, the cost of which is already part of other cost categories. Other types of shipping have other costs—e.g., container ownership in the case of container systems.

U.S.-flag Cost Disadvantages

Among the categories listed, not all are areas in which there are cost differences between U.S.- and foreign-flag vessels. The major areas in which U.S.-flag vessels are at a disadvantage are:

- Crew wages — Generally, U.S. manning costs are higher, due in part to higher rates of compensation and in many cases, higher manning levels.

- Insurance — Insurance is usually higher because of higher U.S. vessel repair costs and typically higher levels of medical care, workmen's compensation, etc.

- Vessel acquisition — Vessel acquisition costs are higher because of higher U.S. construction costs. In addition, delivery schedules in the U.S. are said to be much slower, introducing a cost of delay. The requirement for U.S. subsidized operators to purchase U.S.-built vessels has been temporarily waived, allowing U.S.-flag carriers to buy vessels overseas at cheaper prices. This does not apply in the domestic trades, however.

- Vessel Maintenance and Repair — Vessel M&R is higher due to the necessity for making repairs in the U.S.

- Overhead — Overhead is sometimes higher due to higher general levels of salary for U.S. headquarters office staffs, to the extra staff required for government compliance activity, and the fact that foreign lines use agents in the U.S.

- Fuel Costs — In most cases U.S. fuel costs are higher because steam turbine vessels are employed which have higher fuel consumption rates than foreign-flag vessels that traditionally use slow speed diesel engines.

U.S.- vs. Foreign-flag Shipping Comparisons

The SH&E Required Freight Rate model was used to calculate costs of U.S. and hypothetical foreign-flag vessels in a representative sample of Alaskan service, focusing on cost differences in the categories set out above. Summary results from four runs appear in Tables 3-6, as follows:

Table 3	-	Container vessel: Seattle-Anchorage
Table 4	-	Roll on/Roll off vessel; Tacoma-Anchorage
Table 5	-	Crude Oil Tanker; Valdez-Los Angeles
Table 6	-	Petroleum Products Tanker; California to various Alaskan ports.

These summary runs indicate that the relative impact of the Jones Act on Alaskan commerce varies with specific circumstances. For example, in liner trades[1/] (represented by container and Ro/Ro vessels) a significant part of the total cost relates to containers, cargo handling, and other cargo-related functions. These are not affected by the Jones Act. Hence, the relative cost difference between U.S.- and foreign-flag vessel service is less than, say, the tanker trades, where Jones Act-affected cost categories make up a much larger share of the total cost.

THE IMPACT OF SHIPPING COSTS DUE TO THE JONES ACT

Open Questions About the Jones Act

There are a number of unanswered questions relating to changing or eliminating the Jones Act. They include:

- Is it preferable to remove all provisions of the Act or a selected subset?
- What is the likely response by foreign shipping interests to a relaxation of the coastwise laws? On what terms would foreign owners and operators be interested in providing service?
- What immigration problems, if any, would result from employing foreign seamen in the Alaska coastwise trade?
- If foreign-flag operations can be introduced at great savings, what has impeded foreign-flag vessels from being used more extensively to carry coastwise cargoes via Canadian ports?
- What will be the U.S. labor reaction to the introduction of foreign ships and foreign crews and what secondary effect might this have on Alaska?

The Impact of The Act on Liner Services

The total U.S.-flag premium cost for liner services in the Alaskan trade (i.e., services which transport package cargo such as consumer goods, automobiles, machinery, etc.) is about $41 million per year, as follows:

	Container	Ro/Ro	Tug Barges
Cost per trip - U.S.-flag	$981,774	$1,024,030	$195,217
Cost per trip - foreign-flag	850,658	889,373	158,023
Net	$131,116	$134,657	$37,188
Voyages per year	X 155	X 100	X 200
	$20,322,980	$13,403,700	$7,437,600
		GRAND TOTAL	$41,226,280

1/ "Liner trades" refers to all ocean freighter services which handle packaged and piece goods, in contrast to "bulk trades" which handle petroleum, grain, ore, and other bulk commodities.

The cost penalty applies to commodities as a group. How it may be distributed to any specific commodity or group of commodities is uncertain; if any one item is judged to pay less premium, then something else must automatically be said to pay more, and the net result to the people of Alaska is essentially the same.

With regard to the relative impact of the Act on inbound versus outbound commodities, the analysis indicates it is northbound liner commodities which are most likely absorbing the cost premium, meaning the direct (or initial) impact of the Jones Act is falling more heavily on Alaskan receivers and consumers rather than on Alaskan businesses shipping their products southbound.

The Impact of the Act on the Crude Oil Trades

With regard to crude oil, the RFR analyses indicated the differential between U.S.- and foreign-flag tanker operations in the Valdez to Los Angeles service is $1.39 per long ton. For shipments from Valdez, transshipped at the Panama Canal and sent onward to the U.S. Gulf Coast, the differential would be $5.67.

Assuming an average annual U.S.-flag shipment rate of 80 million tons per year, with two-thirds moving to California and one-third to the Gulf Coast via Panama, the annual cost penalty ultimately being borne by Alaska through the netback mechanism is $225 million. Clearly, the Jones Act's major impact on Alaska is in the sphere of crude oil shipments.

MAJOR CONCLUSIONS

The Jones Act and Alaska's Liner Service

- Commerce of the State of Alaska moving in liner services, mostly consumer goods and business supplies, is absorbing an aggregate annual cost of approximately $41 million because of the restrictions imposed by the Merchant Marine Act of 1920.

- Due to the inherent directional imbalance of Alaska cargoes, the incidence of higher costs and rates is having the greatest impact on northbound cargoes.

- In the high-volume Anchorage-Pacific Northwest trade, the state may have a potential for reducing rates by stimulating backhaul cargoes. The extra cost of transportation for such cargoes would be low.

- In modern containerized-type operations, the bulk of the costs are not flag related. Consequently, the scope for cost and rate reductions as a result of introduction of foreign-flag services is not as great proportionately as in other sectors of the merchant marine.

The Jones Act and Alaska's Crude Oil Transportation Service

- Alaska's net return from its oil sales is being reduced due to the additional costs imposed by the Jones Act, which, based on current conditions, are approximately $225 million per year.

Current Use of Exemptions from the Act

- The State of Alaska has some relief available from the Merchant Marine Act of 1920. This relief is currently not being exploited. Non-use of this loophole does indicate that the cost savings ultimately available from use of foreign-flag vessels may not be as great as has sometimes been supposed.

Changes in U.S. Maritime Policy

- In view of the Administration's apparent position to uphold the Jones Act, efforts to have it rescinded in toto will be difficult in the immediate future.

- Given the recent lifting of prohibitions on overseas-built vessels for U.S. subsidized trades, the State of Alaska may wish to consider an effort to obtain a waiver of the requirement to use vessels built in the U.S. and place less emphasis on changing the remainder of the Jones Act.

- The State of Alaska should develop a coordinated, thoroughly-considered Jones Act strategy that seeks reasonable and politically attainable concessions in areas where the cost impacts are most meaningful. This approach has the potential for success, and can be instrumental in reducing the impact of the Jones Act on the State's economy.

Identical letters hand delivered to Senator Stevens and Senator Murkowski on February 22, 1985.

February 21, 1985

The Honorable Don Young
U.S. House of Representatives
2331 Rayburn House Office Bldg.
Washington, D.C. 20515

Dear Congressman Young:

As you know, on November 6, 1984 Alaska voters approved a ballot measure (Initiative No. 83-02) which directed me to "seek repeal of federal statutes (the Jones Act) which require the use of United States vessels to ship goods between United States ports." I am writing to ask for your assistance in seeking this result.

The application of the Jones Act to Alaska has both increased the costs of all domestic freight shipped to and from Alaska and prevented the utilization of the most efficient available transportation options. By imposing higher transportation costs on domestic commerce, the Jones Act also discourages the development of new petroleum and mineral deposits in Alaska.

According to the Alaska Statehood Commission, the federal government loses from $100-400 million dollars per year in oil revenues as a result of the higher transportation charges the Jones Act imposes on the movement of Alaska crude oil. The revenue loss occurs because transportation charges are deducted from the value of Alaska oil prior to the calculation of taxes. By reducing this value, the higher transportation charges also impede the development of marginal oil fields on Alaska's high cost North Slope.

Another serious problem with the application of the Jones Act to Alaska arises from the fact that it results in the strict separation of domestic and foreign waterborne commerce. Alaska could be economically served by vessels travelling from the U.S. Pacific Coast to the Orient. Western Alaska communities, with their severe employment

problems, would particularly benefit from the ability to combine their domestic trade with this foreign service. However, the vessels currently providing international service are prohibited from stopping in Alaska by the Jones Act. Promising fishing ventures have been hampered by these restrictions.

Studies of the cost of the Jones Act to Alaska consumers have determined that approximately $40 million dollars a year are added to the building materials, business supplies, and consumer goods shipped to Alaska. Given the existing high costs of living and working in Alaska, this additional burden is especially difficult for Alaskans to endure.

We understand the importance of the United States' cabotage laws and the necessity for a strong domestic merchant marine industry. However, Alaska is unfairly shouldering this goal by supporting about one-third of the entire Jones Act fleet, with the attendant effects of reduced resource development and higher costs. Nor has the Jones Act proved effective in stemming the decline of the U.S. merchant marine industry, which by relying on protectionism has lost business to other transportation modes and more efficient foreign ships and operators.

We realize that in the past Congress has shown no inclination to repeal the Jones Act. While recognizing the current situation, we would like to work closely with you in pursuing the objectives of the initiative. Toward this end, I will be in Washington, D.C. in late February and would like to discuss possible strategies with you at that time.

Thank you for your consideration of this important matter.

Sincerely,

Bill Sheffield
Governor

bcc: Attorney General Norman Gorsuch, Dept. of Law
Commissioner Loren Lounsbury, DCED
Commissioner Richard Knapp, DOTPF

Committee on Merchant Marine and Fisheries

strong American merchant marine fleet, and tugboat capacity, barge capacity, and the cargo ships themselves. It is the only way we can develop the State of Alaska with the dependable source of transportation that we need.

That is the reason I am a cosponsor of the bill. I want to congratulate you. This is a regional problem, a regional challenge, and hopefully through these hearings we will be able to solve that challenge and protect the great State of Alaska and the great State of Washington.

Thank you, Mr. Chairman.

Mr. BONKER. Thank you.

Mr. Bateman, do you have any opening comments?

Mr. BATEMAN. Thank you, Mr. Chairman.

I don't have a statement, I don't feel compelled to make one now. I congratulate those of you on your statements in support of a strong merchant marine and to enhance that.

Mr. BONKER. Thank you.

I would like to place in the record the comments from the ICC, a statement by Mr. Thomas Garside, a letter and accompanying fact sheets from Simon Palmer, Marine Charter Co., and the general manager for Navigation, Inc., and a memorandum from Totem Ocean Trailer Express, Inc.

[The ICC comments, Garside statement, Palmer letter, and Totem memorandum follow:]

PREPARED S[illegible]TEMENT OF THE INTERSTATE COMMERCE COMMISSION ON H.R. 1076

Mr. Chairman and members of the subcommittee: Thank you for the opportunity to comment on H.R. 1076, a bill "To strengthen the domestic water borne commerce of the United States." This bill would amend Section 27 of the Merchant Marine Act, 1920 (46 U.S.C. 883) by deleting the third proviso thereof.

In general, Section 27 requires that no merchandise may be transported by water, or by land and water between points in the United States, either directly or via a foreign port, in any vessel other than in a vessel built in the United States and owned by U.S. citizens. However, under the third proviso, Section 27 does not apply to merchandise transported between points in the continental U.S., including Alaska, over through routes recognized by the ICC, for which rate tariffs have been filed with the Commission, when such routes are in part over Canadian rail lines and their own or other connecting water facilities.

Thus, under existing law, if a rail carrier has a through route from a U.S. point over Canadian rail lines to a Canadian port and then to a U.S. point, and a tariff on file with the ICC for that route, a non-U.S. owned vessel could be used for the water segment.

During recent years, little use has been made of the third proviso. Formerly, the provision was used in connection with rail-car barges, a service no longer extensively utilized. In a cursory check of tariffs on file with the Commission,[1] the only third proviso filing located related to a movement from Texas to Alaska via Hill & Hill Truck Lines, Inc., Canadian Pacific, and Northern Transportation Co., Ltd., a Canadian water carrier. A copy of that filing is attached for information.

Under the implementing rules promulgated by the Department of the Treasury the ocean transportation portion of the service may not be performed by a foreign flag or otherwise non-coastwise-qualified vessel under the third proviso of 46 U.S.C § 883, absent an appropriate ICC tariff.

Deletion of the third proviso, it would appear, could have beneficial and detrimental effects. On the one hand, its deletion would presumably assure U.S. jobs and revenues for U.S. owned water carriers. On the other hand, its retention and utilization could conceivably increase competition and ultimately result in better service and or lower prices to the shipping public. The latter approach would appear to be consistent with the policy thrust of the major reform legislation affecting the jurisdiction of the Commission. However, we recognize that special considerations may be involved with regard to U.S. flag service. Accordingly, we believe that this is a policy decision which should be determined by the Congress, and thus take no position on the merits of H.R. 1076.

[1] It should be noted that our tariffs are not maintained in a manner which segregated third proviso filings.

Marine Chartering Co., Inc.

February 28, 1983

We believe the attached shows:

- Present coastal shipping capacity is only just adequate for Alaska's trade.

- The forecast doubling of Alaska's trade requires 3 million tons additional annual shipping capacity by 1990.

- Alaska Navigation's proposed service will meet some of this demand without depriving present operators of tonnage or causing any loss of jobs.

This letter and attachments has been sent to local, trade, State and Federal leaders whose support is earnestly requested. With a steady increase in trade volumes, Alaska Navigation's modest plans can harm no one but will only benefit Alaska, its trade and people who depend so much on efficient, competitively priced transportation.

As Managers of Alaska Navigation, Inc, we shall promptly respond to questions or requests for further information on the proposed service.

Very Truly Yours,

S.N.I. Palmer
General Managers for
Alaska Navigation, Inc.

for info.

SUMMARY

ALASKA NAVIGATION, INC. - PROPOSED SERVICE -

TRADE (Total Alaska)

Excluding bulk petroleum, grains, lumber, chemicals, etc.

Official Statistics:

1974	1.55 million tons annually	
1982	3.08 million tons annually	+ 109%
1990	6.45 million tons annually	

Therefore:

- A.N.I. will carry maximum 5.6% of present trade.
- Ships/barges now full will remain full.
- All present labour will remain fully employed.
- A shortage of capacity of 3 million tons annually by 1990 if more ships are not put into the trade.

SEWARD

A.N.I. service will promote port development.

Full time employment for about 23 men plus ancillary services (17% unemployment in the city).

ALASKA RAILROAD

$10 - 12 million additional gross revenue.

No capital expenditure required.

Will use existing rolling stock and manpower.

CONCLUSION

3.08 million tons 1982 to 6.45 million tons 1990 is officially forecast:

- Present shipping capacity will be insufficient.
- All operators/work forces now involved will remain fully employed.
- Alaska will need maximum shipping options.
- A.N.I. service should be actively supported by all who are concerned for Alaska's future.

ALASKA NAVIGATION, INC. - PROPOSED SERVICE

PREAMBLE

The following summary of present and forecast trade with Alaska from Canada and the contiguous United States, current shipping operators' service/capacity and Alaska Navigation's planned service, etc., etc. is presented to rectify some of the gross exaggerations and misinterpretations of the above operation put about by the incumbent carriers and other self interest groups.

Examination of our competitors' comments shows minimal reference to fact and no appreciation of the advantages to the people of Alaska (who ultimately pay the bill) of Alaska Navigation's proposed service.

INTRODUCTION

Alaska Navigation, Inc. (A.N.I.) with its registered, main office at Room 204, 1813 East First Avenue, Anchorage, Alaska 99501 was incorporated privately on September 3, 1982 expressely to operate shipping services into/out of the State of Alaska.

The incorporation was the result of many months' research which showed a present severe lack of peak season shipping capacity, a year-round general lack of ship (as opposed to barge) space and a critical lack of shipping capacity in future should trade continue to increase as projected.

In short there is an urgent demand for another ship operator.

The following are the facts of the situation

1.0. The Trade

1.1. Volume

Statistics and forecasts of the U.S. Maritime Commission, U.S. Army Corps of Engineers and Williams - Kuebelbeck and Associates (attached Addendum A) show the following:

In short tons the annual trade with Alaska as

	(a) Total	(b) Containerizable
1974	23.47 m.	1.55 m.
1978	56.42 m.	1.98 m.
1982	90.00 m.	3.08 m.
1990 (forecast)	112.00 m.	6.45 m.

(a) The Total includes (b) plus logs, woodchips, pulp, minerals, chemicals, crude petroleum, etc.

(b) Includes farm products, refrigerated goods, groceries, building products, machinery, transport equipment, commodities N.E.C.

NOTE: An actual doubling of annual tonnage in the containerizable category was experienced 1974 - 1982 and is projected to increase 1982 - 1990 by 109% or from 3.08 to 6.45 million tons.

This is a most significant statistic which proves that:

- Present shipping capacity will be insufficient in future.
- Present carriers will remain full therefore
- No decline in cargo volumes means no loss of jobs due to A.N.I. service.

The fact is that a doubling of cargo volumes in the next eight years cannot be accommodated by present carriers who will consequently sail with full ships and total employment will thus be assured for those handling this tonnage at present.

1.2. Anchorage/Whittier Shipments only in 1982

Sealand/Tote by ship	1,155,220.7 S/Tons	(47.8%)
Anchorage barge traffic	524,998.0 S/Tons	(21.7%)
Whittier railcar barge traffic	736,380.0 S/Tons	(30.5%)
	2,416,598.7 S/Tons	

(Note - These are approximate figures)

Two related important facts should be noted

(a) The proliferation of barge operations (52% of cargo) confirms the inadequacy of fast-transit ship capacity. Admittedly some low value cargo happily moves via slow railcar - barge services, but nowhere else in the world is ship capacity so inadequate as to compel general cargo shippers to transport valuable merchandise by barge 1,200 plus miles in such frequently adverse weather conditions.

(b) A.N.I.'s projected maximum weekly tonnage movement is about 3,300 short tons or a mere 5.6% of total tonnage currently moving and only 2.7% of the projected total in 1990.

1.3. Trade Summary

Minding there are some distortions due to seasonal cargo and shipping capacity fluctuations, it is self-evident that over the next eight years shipping services to Alaska will offer increasingly inadequate capacity for the projected volume of trade. By 1990 current shipping capacity will fall short of the trade demand by about 3 million short tons. This should be of concern to those working for the best interests of Alaska. Though Alaska Navigation's 172,000 tons annual movement is a minimal contribution to the projected demand for space, the service should nonetheless be encouraged for the sake of Alaska's trade.

2.0. Alaska Navigation's Service

Primarily because there are no suitable, economic U.S. built flag, etc. ships available, the company decided to operate, at least initially, with time-chartered foreign ships, thus necessitating use of the third proviso of the Jones Act (46 U.S.C. paragraph 883) as indeed does the Canadian National Railroad's Aquatrain service out of Prince Rupert.

2.1. Tariff

A.N.I. requested the Alaska Railroad to provide transportation within Alaska and from/to the port of discharge. A.R.R. decided to publish the necessary tariff (as they currently do for Alaska Hydrotrain and Aquatrain) which was subsequently withdrawn under instructions from (then) Secretary of Transportation Drew Lewis. The I.C.C. had accepted the tariff for Special Authority permitting its early validity.

A.N.I. plans to participate in further filings acceptable to the I.C.C.

A.N.I. is also aware of Bill S. 3000 introduced by Senator Slade Gorton of the State of Washington shortly after the incorporation of Alaska Navigation. This bill is indeed directed specifically against A.N.I.'s service as it proposes "grandfathering" all services in existence prior to September 1, 1982.

In view of the evident current and critical future requirement for additional shipping capacity on the Alaskan trade, it is to be hoped that those concerned with Alaska's future will ensure that Alaska's shipping options remain open and that the trade is not diverted totally into the hands of the major incumbent operators.

Once a tariff becomes effective A.N.I. will resume negotiations for the ships which it regrettably had to return to the Owners when the A.R.R. tariff was withdrawn.

Addendum B evidences the conclusion of these negotiations and thereby disproves allegations that A.N.I. sought to mislead I.C.C. by its request for Special Tariff Authority. Fortunately in the currently depressed shipping market suitable ships are available.

2.2. The Alaska Railroad

A.N.I. will utilize A.R.R. transportation services into/out of Seward. The A.R.R. provides both tariff and transportation services to Alaska Hydrotrain and Aquatrain at Whittier, Alaska at present.

A.N.I. projects gross revenues to A.R.R. from its Seward service of $10 - 12 m. annually with no capital expenditure being necessary.

(Opponents of A.N.I.'s service have argued that this additional revenue (much of it net as existing rolling stock only will be utilized) will in some way make A.R.R. a more expensive acquisition by the State of Alaska under the proposed transfer from Federal ownership!)

2.3. Seward

Currently the city has a 17% unemployment rate.

A.N.I. service will provide approximately 36,000 man/hours work annually for 23 men or full-time employment at 1,565 man/hours per man/year.

In view of the job protection afforded longshoremen and related services in Anchorage, Seattle, etc., by the officially projected increase in trade over the next eight years, the additional employment in Seward should be regarded as a plus for Alaska.

2.4. Shipper Support

A.N.I. is a small, privately owned company and it therefore would not have progressed thus far without fair assurance of shipper support.

A.N.I. holds the names of 40 such shippers who have agreed to be identified with the A.N.I. service and have stated their requirement for additional shipping capacity. For obvious reasons these names should remain confidential.

A.N.I. is in the process of obtaining further named support for the proposed service.

2.5. Labour

The question of the use of Union Labour is most sensitive and A.N.I. thus states categorically that all longshoremen, railway workers, seamen, truckers, etc., connected with its service will be members of internationally recognized, affiliated Unions.

3.0. Summary

Current U.S. law allows A.N.I. to operate a foreign flag ship Fraser Surrey, B.C. to Seward lifting U.S. cargo to/from the lower 48 States (with delivery to/from Fraser Surrey, B.C. by rail) once a through tariff has been accepted by the I.C.C.

Such a tariff should be accepted by the I.C.C. and A.N.I.'s through service actively supported by all involved in the trade and the future of Alaska because:

a. The use of barges by traders demonstrates a present shortage of suitable shipping capacity particularly in peak months.

b. By 1990 if nothing is done, this shipping capacity shortage will be about 3 million tons annually..

c. No operator or work force currently involved in the trade will lose business because trade volumes will double over the next eight years.

d. A.N.I. has shipper support.

e. Alaska relies totally on shipping to provide its economic lifeline. Administrators, legislators and lobbyists should be promoting ways of increasing Alaska's shipping options and not seeking to restrict them. Alaskan business needs more and competitive shipping services.

STATEMENTS OF HON. DONALD CRIPPS, MAYOR, CITY OF SEWARD, ALASKA; SIMON N. PALMER, VICE-PRESIDENT AND GENERAL MANAGER, ALASKA NAVIGATION, INC.; AND IRVIN P. COOK, JR., VICE-PRESIDENT, ALASKA INDUSTRIAL TRAFFIC SERVICE, INC.

STATEMENT OF DONALD CRIPPS

Mr. CRIPPS. Thank you, sir.

Mr. BONKER. Now that we know all about the city of Seward, you may proceed, sir.

Mr. CRIPPS. Mr. Chairman, Mr. Young, my presence at this hearing is not to portray myself as an expert in matters relating to the Merchant Marine Act of 1920. Rather I appear before you as the mayor of a small Alaska coastal community which has an underutilized port capable of handling world-class vessels and which currently—today—has 23-percent unemployment. We are a community of 1,828 souls situated at the head of a fjord—Resurrection Bay. This is a deep, year-round icefree body of water which, prior to the 1964 earthquake, served the bulk of the shipping needs of the State of Alaska. The earthquake devastated the port by severely damaging or completely wiping out the port structures in place at that time. We are now attempting to recover from this tragedy by carefully pursuing a construction program which will result in our having the capability to handle bulk cargo on a par with any facility. It will be several years until this effort will be completed. Meanwhile, we are attempting to market our port as it is now constituted. The southern terminus of the Alaska Railroad is in Seward, so that bulk and containerized cargo can move through the Port of Seward efficiently and with attendant economies.

A shipping firm has come to Seward with the request that they be permitted to move containerized cargo through our port destined for points throughout Alaska. Currently the Port of Anchorage and, to some extent, the Port of Whittier move the majority of products coming into the State. The addition of another carrier, we believe, would provide some competition to the carriers now serving Alaska's needs, and we view this as a healthy move. More importantly from our parochial perspective, it would provide some number of year-around jobs for Seward and would materially assist in reducing our current 23-percent unemployment. In the ongoing affairs of a metropolitan area, the creation or elimination of a dozen jobs would make precious little impact on the economy of the area. In a community of 1,800 people, a dozen jobs is very significant. This can mean that a dozen families can sustain themselves without reliance upon governmental assistance. It is to this end that we address our comments to you.

An application for tariffs made by Alaska Navigation is critical to the efforts just outlined. If the Jones Act is modified to exclude foreign-bottom vessels from engaging in coastwise trade between Canada and Alaska, the hopes we have for an improved local economy will fall far short of realization. The third provision of the Jones Act which allows a foreign-bottom ship to travel from a foreign port to an American port has been in existence for a long time. The concept of operations for the company now proposing to come into Seward would include Canadian freight as well as other cargo which would be consolidated at various vanning stations located in the Midwest and Northwestern States and shipped through a Canadian port. Present forecasted growth in Alaska shipping estimates a threefold growth factor by 1990. Much containerized cargo is now being moved into Alaska by barges. With the vagaries of the weather in the Gulf of Alaska, this is a tenuous mode of shipping. Power vessels are much to be desired over barges in conditions of heavy seas. The company proposing to come into Seward would operate power vessels.

I have included in the testimony two resolutions passed by the State legislature. I include them in an effort to portray the sense of the legislature in viewing this matter. I will not read them here. They are in the record of the statement.

As I stated at the beginning of my comments, I do not attempt to present myself as an expert in marine navigation or international trade. Rather I come to you as one who is attempting to do the very best I can to improve the status of the community which I serve. There is historic precedence for permitting foreign vessels to engage in coastwise trade between Canada and the ports in Alaska. We ask that this be continued.

Thank you, sir.

Mr. BONKER. Thank you, Mr. Mayor.

[The resolutions mentioned follows:]

STATE OF ALASKA RESOLUTIONS

The State Legislature in House Resolution No. 4 dated 2 February, 1983 stated: Whereas the Jones Act (Merchant Marine Act of 1920) was intended to protect our nation's merchant marine fleet; and

Whereas the Jones Act requires that vessels engaged in coastal trade between United States ports be built in the United States, be owned by United States citizens, and be operated by United States citizens, and

Whereas those requirements protect United States businesses engaged in coastal trade from unfair competition by foreign ships; and

Whereas the Alaska Statehood Commission, in its final report of January 1983, recommends that Alaska seek an amendment to the Jones Act which would allow foreign built vessels to be use in coastal trade between United States ports, and further recommends seeking ultimate repeal of the Jones Act in its entirety; and

Whereas the immediate and future economic, environmental and political impact of those recommendations should be weighed carefully before they are acted on; Be it

Resolved, That the Alaska House of Representatives respectfully requests the Governor to direct the Department of Labor to work with the House Labor and Commerce Committee and the House Judiciary Committee to prepare a critique of the Alaska Statehood Commission's Final Report regarding the Jones Act."

The State Senate in Senate Joint Resolution No. 13 dated 26, January, 1983 stated: Whereas the Merchant Marine Act of 1920, commonly know as the Jones Act, requires that vessels carrying goods between United States ports be built and registered in the United States and owned and crewed by United States nationals; and

Whereas the Act gives vessels protection from free market competition by foreign ships that have much lower construction and crew costs; and

Whereas as is typical of protected markets, higher freight rates follow in the United States coastwise trade; and

Whereas the Act was originally passed to build a sheltered environment for United States vessels to create domestic prosperity and wartime security, yet the United States merchant fleet has dropped by half since World War II while the tonnage has gone up sixfold; and

Whereas Alaska, Hawaii, and the noncontiguous territories of the United States pay higher freight rates imposed by the Act; and

Whereas the Alaska trade now supports nearly one-third of the entire Jones Act fleet; and

Whereas the effect of the Act is to reduce Alaska's state oil revenue, to raise the cost of all domestic freight coming to Alaska, and to discourage the development of new oil fields and mineral deposits in Alaska; and

Whereas the direct cost to Alaska's treasury due to the Act is $63-$176 million yearly and the direct cost to the federal treasury is $135-$378 million yearly; Be it

Resolved by the Alaska State Legislature, That the United States Congress is urged in the national interest to repeal the Merchant Marine Act of 1920; and be it further

Resolved, That until the Act is repealed, the United States Congress is urged to allow foreign-built ships into the Jones Act trade if they meet American safety standards, are registered in the United States, and are owned and crewed by United States nationals.

Mr. BONKER. Mr. Palmer.

STATEMENT OF SIMON N. PALMER

Mr. PALMER. Mr. Chairman, I am Simon Palmer, vice-president and general manager of Alaska Navigation. I have prepared testimony and I would like to have it entered into the record.

I have, which I shall comment on later, some telexes and messages from Alaskan shippers supporting the service that we propose and, therefore, opposing the bill which is under debate here.

In recent months my company has been planning a shipping service to Alaska which would operate under the law known as the Third Proviso of the Jones Act. Simply stated this is an exemption under the act which allows foreign-flag ships to carry cargo between U.S. points provided a tariff is filed with the ICC and provided a significant portion of the route covered by that tariff is over Canadian rail lines. Today that exemption effectively applies to Alaska alone, and therefore any debate on the subject should focus primarily on what is best for the State of Alaska.

It is relevant to this hearing to point out that Alaska Navigation was incorporated in Alaska on September 3, 1982, following some 6 months of investigation into the market demand for such a service, the optimum method of cargo transportation, competitors' services, size and activities and so on. We are a small, privately owned company and would not have proceeded even with our incorporation had we not been very certain of the demand for our operation in Alaska. Naturally our research became known to our competitors and on September 30, 1982, 27 days after our incorporation, bill S. 3000 was introduced in the Senate by Senator Gorton proposing elimination of the Third Proviso for 3 years but grandfathering operations in existence on September 1, 1982. That bill was never debated but has now been followed by the chairman's, Congressman Bonker's, bill which also proposes elimination of the Third Proviso exemption. Both Senator Gorton and Congressman Bonker represent the State of Washington, as we all know, the operational home of our competitor shipping services to Alaska.

As a businessman I naturally wish the Third Proviso exemption and my company's planned service under that law to be maintained. However, I also wish it to be maintained for the sake of Alaska, and that is the consideration which I feel must predominate when determining the fate of the Third Proviso. Whilst it would be discriminatory and immoral to pass into law a bill allowing others to operate under the Third Proviso, whilst preventing

my company from so doing, the effective limitation of Alaskan shipping services to those currently in existence would have a more serious and far-reaching effect on Alaska, its trade, industries, and consumers.

I respectfully urge that the law known as the Third Proviso of the Jones Act be left alone and not otherwise suspended, abolished, or tampered with. As I shall illustrate, Alaska is a unique State requiring maximum transportation options and opportunities, and the selfish interests and pressures behind proposals to eliminate the Third Proviso should therefore be secondary to what is determined as best for the people of Alaska.

The first point I would like to make is a brief background on Alaska's trade which is a significant element here.

It is a statistical fact that shipments in and out of Alaska totaled 1.5 million tons in 1974, 1.88 million in 1976, 1.98 million in 1978, and 3.3 million in 1982. Trade doubled in the 8 years 1974-1982. These figures do not include bulk cargo.

An admittedly high forecast calls for a further doubling of trade to 6.45 million tons annually by 1990 or in the next 8 years. In a recent newspaper report this figure was reportedly considered by one shipping company on the trade to be too high by more than half. However, even 40 percent of the forecast increase (if the official forecasts are wrong and that shipping company is correct) would be 1.26 million tons annually or the equivalent of an additional 8 ships a week each carrying 200 containers. My company proposed lifting the equivalent of one such ship a week.

The Third Proviso opportunity for additional shipping services into Alaska should not be denied that State, because present shipping operations are currently inadequate and, given even the low forecast cargo increase figures, they will evidently become increasingly unsatisfactory in the future.

No. 1, in support of this argument, Mr. Chairman, let me say that 1.46 million tons of domestic general cargo was handled through the Port of Anchorage in 1982. Of this, 79 percent was moved by ship by Sea-Land and TOTE, leaving over 20 percent to be moved by barge. Additionally, two other barge operators provide approximately weekly sailings into Whittier.

Now barge services are ideal for project cargo moving into undeveloped ports, but in this instance they can only be the result of inadequate shipping capacity.

No Alaskan importer would risk the weather damage and delays of barge shipment if he could move his merchandise by ship.

If the Third Proviso is eliminated, the only way of shipping the increased volume of traffic in future will be by barge and, according to the Alaskans I have spoken to, further barge service is not what they want.

No. 2, Whilst the ships of Sea-Land and TOTE are not full to capacity every voyage because of seasonal trade fluctuations, it is a fact, borne out by the experiences of most traders, that cargo is regularly shortshipped or turned away by those carriers during the April to October period of the year. I have letters and messages from 40 or more companies complaining about shipping space shortages and stating their need for additional shipping services

I did not attach them to my testimony, but just to tell you quickly, Mr. Chairman, Mr. Nerland for Nerland Home Furnishings, one of Alaska's leading shippers, writes, "As substantial shippers of freight to Alaska, we wish to be on record as in favor of continuing the Jones Act exemption, which allows competitive water carrier service to Alaska."

A second telex I have, from David Kilbourn of Northland Hubb, this is a related company, Mr. Chairman, to one of the largest grocery retail outlets in Alaska, he says, "Northland Hubb as a related shipper of products to Alaska has a major interest in seeing the Alaska shipping trade stay as competitive as possible."

One of the major roadblocks to the long-term development of our State has been the high cost of surface transportation. For this reason we strongly support the application of the Alaska Navigation and are against repeal of the Third Proviso of the Jones Act.

I have here the names of 40 further shippers who say: "We, the undersigned, understand that Alaska Navigation is in jeopardy due to political pressures from the Seattle, Wash., area.

"We desperately need additional service to Alaska because of space shortages that we have encountered in the past. We are in full support of Alaska Navigation providing a new service to Alaska."

Mr. BONKER. Are you submitting those letters for the record, Mr. Palmer?

Mr. PALMER. Yes, sir.

Mr. BONKER. I would ask unanimous consent that the letters and other supporting documents submitted by Mr. Palmer be included in the official record.

S. G. NERLAND•

)))))

REPLY VIA ITT

Mr. PALMER. The third point that I would like to make is the question of cost. In spite of recording massive profits every year, $103 million in 1981 and $157 million in 1982, Sea-Land still operates 35-year-old ships on the trade to Alaska when worldwide the shipping industry accepts that the economic life of a ship is a maximum of 20 to 25 years.

But of course Alaska pays the bill and has to accept the regular increases in freight rates because the present ship operators have a stranglehold on the trade. If the Third Proviso is eliminated, the only hope under current law for an alternative ship service for Alaskans will also be eliminated.

I emphasize ship service as opposed to further barge services.

I maintain that the Third Proviso should be kept because it encourages competition which would lower the cost of transportation as a result.

Those interests encouraging elimination of the Third Proviso argue that more carriers on the trade would result in reduced revenues for some operators whose unit costs and therefore rates would increase.

This is obvious nonsense and contrary to experiences in every other sector of the transportation industry worldwide.

What competition would do is eliminate the inefficient carrier, put a lid on freight-rate increases, and insure that Alaskans have a choice of carrier.

If the Third Proviso is abolished, Alaska, with its trade predicted to increase anywhere from 40 to 100 percent over the next 8 years, will have no shipping options other than TOTE's expensive RO-RO ships; Sea-Land's three, sometimes four, 35-year-old antiques; and a bunch of barges.

Who opposes the Third Proviso and why:

Predictably, those who wish to eliminate the Third Proviso are those who stand to gain most from the resulting elimination of potential competition. It is no mere coincidence that Senator Gorton's bill, S. 3000, should have been introduced as soon as it became apparent that my company's plans to operate a service were serious and had sufficient cargo support to make it viable.

So also with this bill. Although introduced for apparently the best of reasons, these would, on closer examination, be no more than a smokescreen for the removal of competition on a trade dominated by carriers operating out of the State of Washington.

My company's service, which is the immediate target of the proposal to eliminate the Third Proviso, would, if quotations of those seeking this change in the law are correct, cause the loss of thousands of jobs and millions of dollars investment in the State of Washington, dislocate a major segment of the Puget Sound economic infrastructure, and so forth.

I submit respectfully that this is nonsense. My company's plan is to lift approximately 200 containers on average per week or about 5.6 percent of the present trade requiring 25 men to load the ships.

Hardly a significant volume of cargo or loss of jobs particularly in view of even the low forecast increase in the Alaskan trade.

Again I urge that what is best for Alaska should be paramount when considering the Third Proviso situation. The exaggerated rhetoric of the self-interest groups in the State of Washington

should be considered in perspective; they are the desperate claims of shipping companies who have and wish to perpetuate a monopolistic grip on the Alaskan trade irrespective of the interests of the people of that State.

Arguments for Third Proviso elimination and answers. Proponents of the bill eliminating the Third Proviso will argue that a foreign-flag operator will lower freight rates, drive out U.S.-flag operators and, having established a monopoly, will then increase rates again.

Answers: The added rail cost of third-proviso shipping makes costs comparable to those of direct shipping operations.

Shipping monopolies are established by protectionist legislation such as this and not by competitive, open-market conditions.

The additional rail cost of third-proviso shipping is $490 for a 20-foot container, $680 for a 40-foot container, as against a total through cost to my company of just over $1,200 for a 20-foot container and $1,900 for a 40-foot container.

So you can see that the cost of shipping under the Third Proviso which necessitates rail carriage over Canadian lines adds a significant cost to our operation.

They also say that the domestic trade must be exclusive to U.S.-built flag shipping. The answer is no U.S. ships exist today which could lift the projected increase in Alaska's trade.

It is a matter of record that no order for U.S. merchant ships has been placed in U.S. yards for the year 1985.

In this situation, therefore, the Jones Act forces Alaskan consumers to subsidize inefficient overage shipping.

Some Third Proviso shipping is necessary to restrain U.S.-flag operators' rate increases.

The final argument often made is that U.S.-flag shipping is strategically vital. The answer is that eliminating the Third Proviso only harms Alaska; it does not promote U.S.-flag shipping.

Only the number of tugs and barges will increase.

A thought that strikes me is that if elimination of the Third Proviso were concurrent with allowing foreign-built U.S.-flag ships to operate on the Alaskan trade, that would be good for Alaska and U.S.-flag shipping.

In summary, may I say that trade with Alaska is irrefutably increasing; present ships are overfull most of the year even now; Alaska needs and should not be denied increased shipping options.

Elimination of the Third Proviso would be protectionist of the interests of the present shipping operators, discriminatory in the first place against my company and prejudicial to the interests of the people of Alaska.

There has been undue haste to eliminate the Third Proviso which makes one suspect that special interests and not Alaska's interests have been considered.

It is time Alaska and its particular requirement for maximum shipping opportunities was considered. The Third Proviso should not be suspended or eliminated.

Thank you, Mr. Chairman.

Mr. BONKER. Thank you, Mr. Palmer.

Mr. PALMER. Excuse me for making it so long.

Mr. BONKER. We believe in equal time. Mr. Cook.

STATEMENT OF IRVIN P. COOK, JR.

Mr. COOK. Thank you, I appreciate the opportunity to testify here today. My name is Irvin P. Cook, vice president and part owner of Alaska Industrial Traffic Service. We are a consulting company that aids shippers. Before I go further, I would like to define the word "shipper" as a person who tenders freight to the carrier. I know often the term shipper is used as a water carrier, but in this case we tender freight to a carrier, water, rail, whatever.

We provide consulting service to shippers and 80 clients who ship and carry goods to, from, and within the State of Alaska.

During this involvement in the Alaska transportation industry, we have become familiar with the needs of those moving freight to Alaska from the viewpoint of the purchaser of transportation. AITS recognizes the concepts that 46 U.S. Code, section 883, was established to encourage and preserve a strong merchant marine industry, and it supports that piece of legislation to that extent.

AITS recognizes that 46 U.S.C. 883 was not established for the purpose of stifling commerce; however, it is apparent that 46 U.S.C. 883 does in fact stifle trade to Alaska. In partial recognition of this, Alaska was incorporated into the Third Proviso.

AITS has, over the past 2 years, sought to augment the existing service to Alaska by use of one or two small ships. We were completely frustrated in our efforts. Suitable domestic bottom ships were unavailable. The only ships that were available were foreign built. The Third Proviso would have permitted the use of these ships out of Prince Rupert, or Vancouver, Canada, to Alaska.

Over the past 2 years various clients of ours have experienced delays in shipping due to demand exceeding the capacity of the two major ocean carriers to Alaska—Sea-Land Service, Inc., and Totem Ocean Trailer Express, Inc.—and every year more and more barge lines have come into the Alaska trade to handle the excess trade. A number of our clients have used barge service in lieu of operationally faster and operationally more reliable service of ships, because there has been inadequate shipping capacity.

One of our clients has already been notified by one of the major ocean carriers that in spite of the fact that he has been shipping an average of 12 vans per week, through the winter, his bookings will be cut back to 7 vans per week, during the coming summer months, and this is during his busiest period.

There is a firm by the name of Alaska Navigation, Inc., that proposes to enter into the Alaska trade. As near as I have been able to determine, Alaska Navigation, Inc., has been unable to find domestic-built ships suitable for this trade. Consequently, they had to resort to a foreign-built ship in an attempt to enter the Alaska trade.

The existence of 46 U.S.C. 883 has not fostered the building of the required ships. However, the Third Proviso has made it possible for additional carriage capacity to Alaska.

The question to be answered when reviewing the issue of whether the Third Proviso should be eliminated is, will the elimination of the Third Proviso really encourage and preserve a strong merchant

marine fleet? That is doubtful. What will happen is that the elimination of the Third Proviso will impede commerce to Alaska.

Currently, Knappton Corp. is operating railcar barges from Prince Rupert, Canada, to Alaska. In the past, Crowley Maritime Corp. operated a railcar ship from Vancouver, Canada, to Alaska. Both services are and were necessary for the economic growth of Alaska, and both services are and were performed with foreign bottoms, transporting goods originating and destined in the United States. Crowley Maritime has taken the *Trainship Alaska* out of service. Knappton Corp. is inaugurating its Korean-built bottom railcar barge *Aqua Train* April 20, 1983.

The existence of the Third Proviso allows carriers more flexibility in responding to the needs of the general shipping public.

Even if it is determined that there is currently adequate freight movement capacity to Alaska, that should not be considered. The Third Proviso allows carriers to be better able to respond to the demand for transportation. To eliminate the Third Proviso eliminates future possible responses to insufficient capacity that can hurt commerce in Alaska and that can hurt my clients.

Several of our clients have written letters of support of retaining the Third Proviso, and several have written in support of Alaska Navigation. Copies are attached.

Up to the middle of the last year, the current water carriers felt that they had to compete with certain commodity rates established by the rail-barge movement from Prince Rupert. When their ships became full this was no longer necessary, and their rates on those same commodities became higher. Without full competition these water carriers can and have allowed their prices to climb increasingly higher.

Alaska needs the Third Proviso.

I just obtained a telex to answer some of your questions on rates. If I may, in 1979, March 18, 1979, both TOTE and Sea-Land had a rate of $3.19 per hundredweight on iron or steel plate steel. Today, their rate, TOTE's rate, is $5.46, a 71-percent increase. Sea-Land has a rate of $5.03, representing a 58-percent increase.

As an aside, it should be noted that Sea-Land does charge an additional charge to pick up in the Seattle area on some freight.

What has happened here is that TOTE, in light of lack of excess capacity, has felt they were able and capable and prudent to increase their rates, and need not be competitive with Sea-Land.

The same has applied to foodstuffs, canned goods, et cetera. In March 1979, both TOTE and Sea-Land had a rate of $2.98. Today the rate for TOTE is $6.04, a rate increase of 102 percent. Sea-Land has a rate of $5.83. Again, there are possible additional pickup charges that apply on some freight in the case of Sea-Land.

Additionally, another client of ours, a department store, in 1973 said—said to us—that in 1973 transportation costs, as a percentage of total retail store sales, were 10 percent. Now it is 20 percent. For that reason, Alaska does need the Third Proviso. Thank you.

Mr. BONKER. Thank you, Mr. Cook.

I wish time permitted something of a rebuttal to all the points that you have raised either from committee members or from your competitors, many of whom are sitting back there shaking their heads as you have gone through the litany of charges and assumptions in your statements.

We don't have that much time. I am trying to conclude the hearings. I will raise just one question about your statement, Mr. Palmer, about competition.

You seem to imply that there is not much competition now in this trade route between the lower 48 and Alaska, at least on waterborne traffic.

The fact is you say that if the Third Proviso is abolished, Alaska with its trade predicted to increase anywhere from 40 to 100 percent over the next 8 years will have no shipping options other than TOTE's expensive RO-RO ships and Sea-Land's 35-year-old antiques and a bunch of barges.

Mr. PALMER. Yes.

Mr. BONKER. I hope you don't run against me sometime. That is an awful characterization of what I have always thought was one of the most efficient and modern carriers in the business. But anyway, with respect to this question of competition according to a recent article in the Journal of Commerce, March 8, 1982, it points out that in the Alaskan trade it is the most competitive of all of the domestic offshore trades involving 14 carriers who have filed financial reports and from that we know that no one of them accounts for more than 15 percent of the FMC-regulated traffic revenues.

I can't imagine having any more competition short of chaos than what we presently have in that trade route.

How can you claim it is not very competitive?

Mr. PALMER. Mr. Chairman, I think there are two points that you raised, the first is the Journal of Commerce statement that the Alaska trade is the most competitive of all domestic routes.

Mr. BONKER. That is according to the Journal of Commerce

Mr. PALMER. Right.

Mr. BONKER. They use as their information the filing of reports before the FMC.

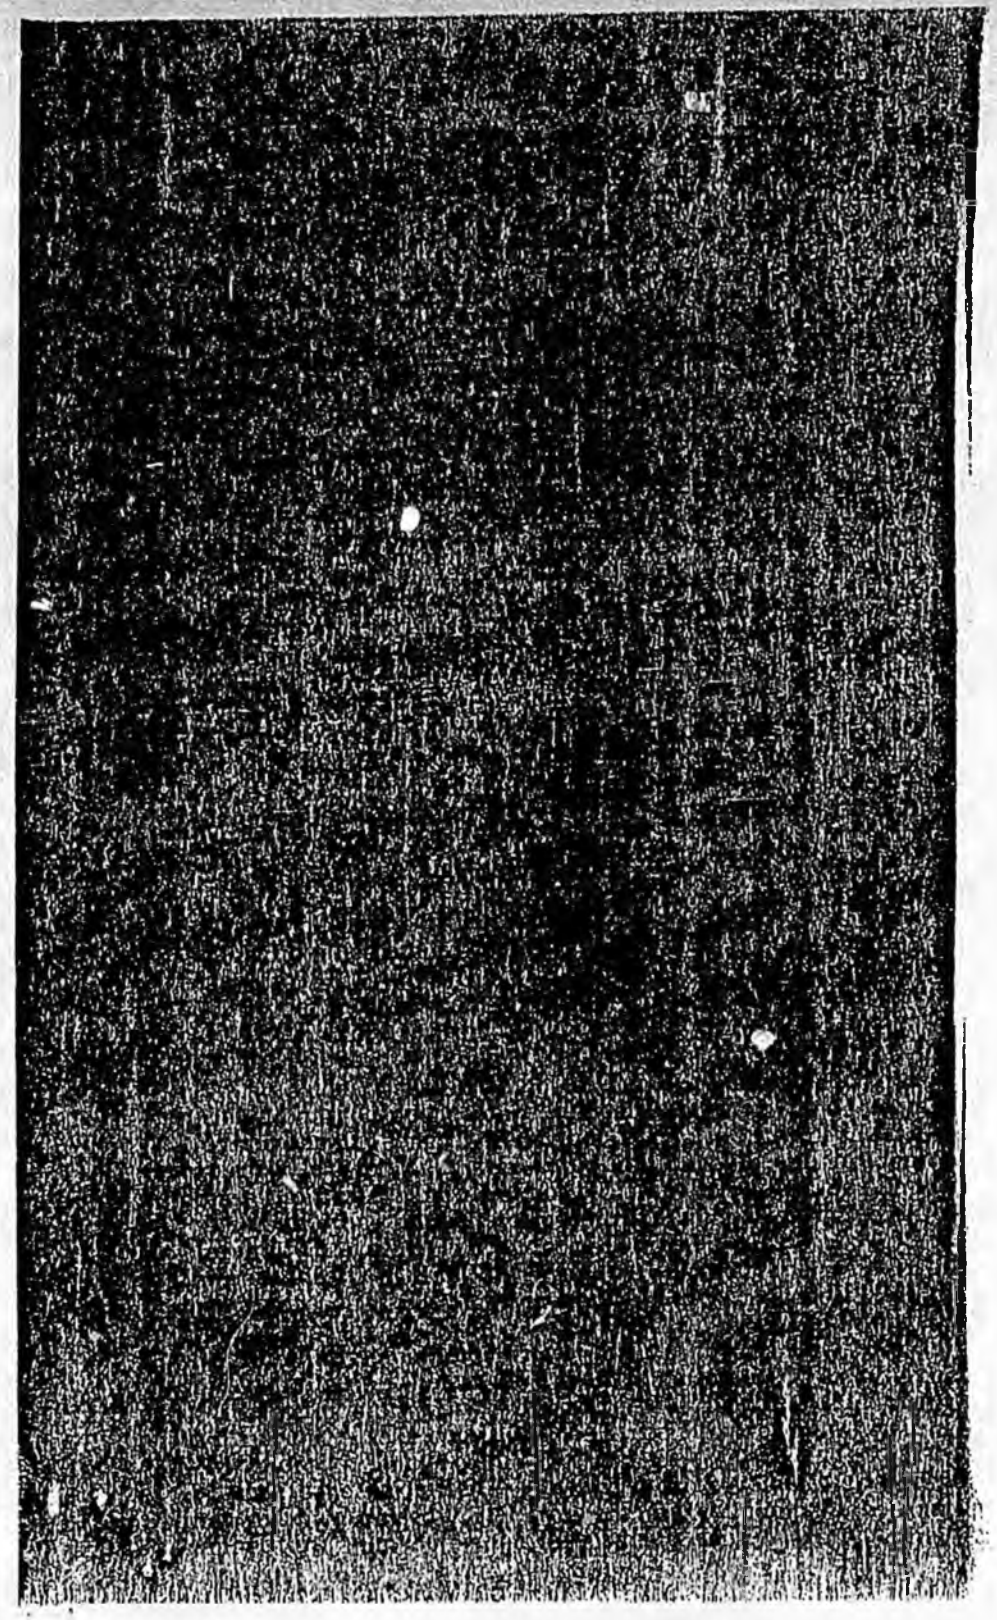
Mr. PALMER. My rebuttal or my comment on that statement is that competition is a very comparative thing. The transpacific trade has got 25 or 30, maybe more, operators, as Mr. Hiltzheimer knows.

The comparable domestic trades that the Journal of Commerce is talking about are trades from the east coast, for example, to Puerto Rico where there are two dominant carriers. The Navieras de Puerto Rico, and Sea-Land. The trade to Hawaii, yes, another comparable domestic trade, has one dominant carrier—Matson.

So actually, on their sort of statistics—four carriers on the Alaska trade would make it more competitive than any other domestic U.S. trade.

The second point you make of there surely being enough competition just looking at the Alaska trade. Certainly there are 14 or 15 carriers, but there are actually only three modes of transportation, one by Sea-Land and TOTE, fast, containerized, very efficient, very good, I am not——

Mr. BONKER. I am glad to see you acknowledge some of their merits.



Mr. PALMER. Right. The second is train barges, like Crowley, for example, and the third is other barges working break-bulk, and unitized cargo. It is a fact of doing business with Alaska as far as my understanding is concerned that cargo which moves on one carrier very definitely is of a type that would not move on another and would not either move on a third.

The barges take 10, 12, 14 days to Alaska, the ships take 3 days to get up to Alaska, and are not delayed by weather. You have a totally different segment of the trade going in each type of carrier. That is the reason for my saying Sea-Land and TOTE don't compete with each other effectively because for the major part of the year from April through October they are full.

The barge lines quote the same rates because they move a different type of cargo, same with the railcar barges.

Mr. BONKER. With respect to this question of increased trade and whether we have the capability to handle that trade, I thought Mr. Hiltzheimer made a valid point. They already have a substantial investment in this business and if the Third Proviso continues as the threat as do other foreign carriers undermining their investment, it will reduce their ability to handle that trade.

You can characterize them as people who are protecting their turf, as you have done in your statement, for example, but I imagine if you were in the same business, you would be saying the same things.

Mr. PALMER. Yes, Mr. Chairman. I probably would.

There is a point I would like to make here. Listening to the testimony before my own, the main point that seems to be coming out with some tremendous headline slogans involves statements about lost millions of dollars, and thousands of jobs and ruining economies of States and this sort of thing.

I should feel conceited that we have such tremendous ambitions. The fact of life, Mr. Chairman, is that we are planning to put on two ships, small ships, far smaller than anything operated by Sea-Land and TOTE and to lift a very small proportion of the cargo involving actually not Canadian rail companies, but Burlington Northern which I believe is a U.S. company.

If we were to raise rates after we had wiped everybody out of the trade, life dictates and the market conditions will dictate that further competition would come in and wipe us out. We are not so foolish as to want to monopolize the trade. With respect, sir, I would just like to state that I find the claims that we are about to monopolize the trade and deprive whole States of employment is grossly exaggerated and actually a hysterical accusation designed to create attention.

Mr. BONKER. Mr. Palmer, to be honest with ourselves, you may have modest intentions and we may find a loophole for you to put your one or two ships or barges through, but once that loophole is discovered, there are going to be a lot of other ships and more interest in it. We can see how greatly enlarged it could be and how it could jeopardize the status quo.

If we were only concerned about your involvement that wouldn't maybe be an imminent danger to anything economically speaking but once this loophole has been realized, once we have crossed the line with the ICC and we have seen a new dimension to the Third

FULL TEXT OF INITIATIVE
Initiative No. 83-02

For an Act entitled: "An Act terminating the Alaska Transportation Commission and repealing transportation laws administered by the commission; requiring persons who carry passengers or freight for hire to hold insurance or other security; and requiring the governor to lobby Congress for the repeal of the federal Jones Act."

BE IT ENACTED BY THE PEOPLE OF THE STATE OF ALASKA:

* Section 1. **STATEMENT OF PURPOSE.** The people of Alaska recognize that

(1) because of Alaska's great size and distance from markets, Alaskans must have access to efficient low-cost transportation in order for people and goods to move safely inside and outside the state;

(2) a little-known but powerful state regulatory agency, the Alaska Transportation Commission (ATC), creates motor and air carrier monopolies by legalized price fixing and tariffs, which artificially raises shipping rates and makes consumer goods more expensive for all Alaskans;

(3) the primary purpose of the ATC is to fix rates, not promote safety, and other government agencies can insure safety standards while allowing persons to contract freely for services;

(4) abolishing the ATC and its anti-competitive practices will subject air carriers and trucking companies to free market competition, thereby reducing freight rates, improving service, and saving Alaskan consumers millions of dollars each year;

(5) a federal law, known as the Jones Act, requires that ships bound for Alaska from other American ports must be built and registered in the United States and staffed with American crews, thereby granting such ships an unfair monopoly and protecting them from free market competition, which costs Alaskan consumers millions of dollars each year;

(6) the Jones Act should be repealed, and the governor should use all appropriate means to persuade Congress to do so.

* Section 2. AS 29.48 is amended by adding a new section to read:

Sec. 29.48.036. **REGULATION OF TRANSPORTATION CARRIERS.**

Notwithstanding AS 29.48.035(a), a municipality may not regulate an activity regarding transportation of passengers or freight for hire if the regulation conflicts with the regulation of that activity by the Alaska Transportation Commission as the regulation existed on April 1, 1983 under former AS 02.05, AS 42.07, or AS 42.10.

* Section 3. AS 42.30 is amended by adding a new section to read:

ARTICLE 5. **RESPONSIBILITIES OF MOTOR AND AIR CARRIERS.**

Sec. 42.30.200. **FINANCIAL RESPONSIBILITY.**

(a) A person who carries passengers or freight for hire intrastate shall procure and maintain security in an amount determined by the Department of Public Safety as necessary for the reasonable protection of the public against damages or injury caused by the person.

(b) Evidence of security required under (a) of this section shall be filed with the department and must be

(1) a policy or certificate of insurance issued by an insurer acceptable to the department; or

(2) a bond of a surety company licensed to write surety bonds in the state; or

(3) evidence accepted by the department, showing ability to self-insure; or

(4) other security approved by the department.

(c) The department may authorize enforcement officers to enforce this section.

* Section 4. AS 44.19 is amended by adding a new section to article 1 to read:

Sec. 44.19.035. **JONES ACT REPEAL.** The governor shall use best efforts and all appropriate means to persuade the United States Congress to repeal 46 U.S.C. secs. 861, et seq., known as the Jones Act. Until that Act is repealed, the governor shall publish an annual report documenting the harmful effects of the Act on Alaska commerce, and progress made towards its repeal. The report shall be submitted to the legislature no later than its convening each year.

* Section 5. If any provision of this Act is held invalid, the remaining provisions of this Act are severable and remain in effect.

* Section 6. AS 02.05.; AS 28.10.411(b); AS 39.25.120(c)(7); AS 39.50.200(b)(30); AS 42.07; AS 42.10; and AS 44.66.010(a)(2) are repealed.

BILL SHEFFIELD
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

STATE OF ALASKA - POSITION ON JONES ACT

The Merchant Marine Act (Jones Act), which was adopted by Congress in 1920, prevents the transportation of goods between U.S. ports on foreign-built vessels unless there is an intermediary stop at a foreign port. The State of Alaska favors an amendment to the Jones Act which would allow foreign-built ships into the U.S. coast cargo and passenger trade, provided that they meet American safety standards, and are U.S. owned, registered, manned, and repaired.

The intent of the Jones Act was to protect American ship builders and operators from free market competition by foreign ships which have lower construction and operating costs. The concern was that otherwise the United States would not have a sufficient merchant marine fleet for wartime demands. If, however, under the State's proposal, foreign-built vessels were still U.S. registered and operated, then they would be available during wartime or other periods of national emergency.

As a result of the Jones Act protection, freight rates are very high in the U.S. coast trade. In fact, where competition exists from land-based transportation service (rail and truck), the Jones Act merchant marine fleet has declined dramatically in the past twenty years. Because Alaska, Hawaii, and the noncontiguous territories (except the Virgin Islands) have no significant alternative to the Jones Act fleet, they bear the penalty of higher freight rates. The Alaska trade alone supports nearly one-third of the entire Jones Act fleet.

The Jones Act penalizes the U.S. and Alaska in several ways:

1) It reduces federal and state oil revenues by effectively imposing higher tanker transportation charges which are tax deductible. (This will be ameliorated by proposed C.D.S. regulations by the Federal Department of Transportation).

2) It limits U.S. markets for Alaskan products (fish, coal, minerals and timber) by contributing to higher destination costs as compared with export to the Pacific Rim nations.

3) It raises the cost of all domestic freight coming into the State, thereby contributing to a higher cost of living and depressing economic development.

4) It depresses the tourism industry in the Pacific Northwest and Alaska by raising the cost of tourist passage from Seattle to Alaska and limiting the flexibility of cruise ship itineraries.

In the future, these penalties will become more severe. As U.S. ships are constructed to replace existing ships, the cost differential between U.S. and foreign ship construction will increase. In a subsidized environment, Alaska and the domestic purchasers of Alaska products will have no choice but to pay higher freight rates.

Our proposal would eliminate the most expensive and burdensome aspect of the Jones Act while ameliorating impacts on the maritime industry. We expect that a future increase in the construction of U.S. naval vessels will help offset business lost as a result of foreign competition for cargo vessel construction. Further, it is anticipated that lower marine freight rates will increase shipping business, thereby creating a need for more U.S. maritime and service-related employees.

It should be recognized that the high cost of American shipbuilding has in fact inhibited the growth and development of U.S. maritime commerce. Foreign-built cruise ships utilizing Canadian ports because of Jones Act restrictions still encounter significant limitations on their operations when they bring their passengers into Alaskan ports. Presently, the Alaska Marine Highway system must turn away thousands of tourist users and passengers because of lack of space. Yet foreign-built ferry vessels, which could be used to expand Alaska's ferry service for everyone's benefit, are available at lower cost.

June 30, 1983

June 5, 1920.
[H. R. 10378.]
[Public, No. 261.]

CHAP. 250.—An Act To provide for the promotion and maintenance of the American merchant marine, to repeal certain emergency legislation, and provide for the disposition, regulation, and use of property acquired thereunder, and for other purposes.

Merchant Marine Act, 1920.

Policy for development of an American merchant marine, etc., declared.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That it is necessary for the national defense and for the proper growth of its foreign and domestic commerce that the United States shall have a merchant marine of the best equipped and most suitable types of vessels sufficient to carry the greater portion of its commerce and serve as a naval or military auxiliary in time of war or national emergency, ultimately to be owned and operated privately by citizens of the United States; and it is hereby declared to be the policy of the United States to do whatever may be necessary to develop and encourage the maintenance of such a merchant marine, and, in so far as may not be inconsistent with the express provisions of this Act, the United States Shipping Board shall, in the disposition of vessels and shipping property as hereinafter provided, in the making of rules and regulations, and in the administration of the shipping laws keep always in view this purpose and object as the primary end to be attained.

Shipping Board to execute provisions relating thereto.

Designated legislation repealed.

SEC. 2. (a) That the following Acts and parts of Acts are hereby repealed, subject to the limitations and exceptions hereinafter, in this Act, provided:

Emergency shipping fund provisions. Vol. 40, p. 182.

(1) The emergency shipping fund provisions of the Act entitled "An Act making appropriations to supply urgent deficiencies in appropriations for the Military and Naval Establishments on account of war expenses for the fiscal year ending June 30, 1917, and for other purposes," approved June 15, 1917, as amended by the Act entitled "An Act to amend the emergency shipping fund provisions of the Urgent Deficiency Appropriation Act, approved June 15, 1917, so as to empower the President and his designated agents to take over certain transportation systems for the transportation of shipyard and plant employees, and for other purposes," approved April 22, 1918, and as further amended by the Act entitled "An Act making appropriation to supply deficiencies in appropriations for the fiscal year ending June 30, 1919, and prior fiscal years, on account of war expenses, and for other purposes," approved November 4, 1918;

Transporting shipyard employees. Vol. 40, p. 535.

Acquiring shipbuilding plants, etc. Vol. 40, p. 1022.

Compensation for street railroads, etc. Vol. 40, p. 535.

(2) Section 3 of such Act of April 22 1918;

Appropriation for plants, etc. Vol. 40, p. 1022.

(3) The paragraphs numbered 2 and 3 under the heading "Emergency shipping fund" in such Act of November 4, 1918; and

Control of shipping charters. Vol. 40, p. 913.

(4) The Act entitled "An Act to confer on the President power to prescribe charter rates and freight rates and to requisition vessels, and for other purposes," approved July 18, 1918.

Construction, etc., by Shipping Board. Vol. 39, p. 730.

(5) Sections 5, 7, and 8, Shipping Act, 1916.

Limitations on repeals.

(b) The repeal of such Acts or parts of Acts is subject to the following limitations:

Existing contracts assumed.

(1) All contracts or agreements lawfully entered into before the passage of this Act under any such Act or part of Act shall be assumed and carried out by the United States Shipping Board, hereinafter called "the board."

Accruing rights, etc., declared valid.

(2) All rights, interests, or remedies accruing or to accrue as a result of any such contract or agreement or of any action taken in pursuance of any such Act or parts of Acts shall be in all respects as valid, and may be exercised and enforced in like manner, subject

to the provisions of subdivision (c) of this section, as if this Act had not been passed.

Incurred penalties to be enforced.

(3) The repeal shall not have the effect of extinguishing any penalty incurred under such Acts or parts of Acts, but such Acts or parts of Acts shall remain in force for the purpose of sustaining a prosecution for enforcement of the penalty therein provided for the violation thereof.

Completion of construction work authorized.

(4) The board shall have full power and authority to complete or conclude any construction work begun in accordance with the provisions of such Acts or parts of Acts if, in the opinion of the board, the completion or conclusion thereof is for the best interests of the United States.

Early liquidation of pending matters, directed.

(c) As soon as practicable after the passage of this Act the board shall adjust, settle, and liquidate all matters arising out of or incident to the exercise by or through the President of any of the powers or duties conferred or imposed upon the President by any such Act or parts of Acts; and for this purpose the board, instead of the President, shall have and exercise any of such powers and duties relating to the determination and payment of just compensation: *Provided*, That any person dissatisfied with any decision of the board shall have the same right to sue the United States as he would have had if the decision had been made by the President of the United States under the Acts hereby repealed.

Board to determine compensation.

Proviso.
Suit if decision unsatisfactory.

Shipping Act, 1916.
Vol. 39, p. 729, amended.

SEC. 3. (a) That section 3 of the "Shipping Act, 1916," is amended to read as follows:

United States Shipping Board.
Creation, appointment, etc.

"SEC. 3. That a board is hereby created to be known as the United States Shipping Board and hereinafter referred to as the board. The board shall be composed of seven commissioners, to be appointed by the President, by and with the advice and consent of the Senate; and the President shall designate the member to act as chairman of the board, and the board may elect one of its members as vice chairman. Such commissioners shall be appointed as soon as practicable after the enactment of this Act and shall continue in office two for a term of one year, and the remaining five for terms of two, three, four, five, and six years, respectively, from the date of their appointment, the term of each to be designated by the President, but their successors shall be appointed for terms of six years, except that any person chosen to fill a vacancy shall be appointed only for the unexpired term of the commissioner whom he succeeds.

Tenure of office.

Qualifications, and geographical distribution of commissioners.

"The commissioners shall be appointed with due regard to their fitness for the efficient discharge of the duties imposed on them by this Act, and two shall be appointed from the States touching the Pacific Ocean, two from the States touching the Atlantic Ocean, one from the States touching the Gulf of Mexico, one from the States touching the Great Lakes and one from the interior, but not more than one shall be appointed from the same State. Not more than four of the commissioners shall be appointed from the same political party. A vacancy in the board shall be filled in the same manner as the original appointments. No commissioner shall take any part in the consideration or decision of any claim or particular controversy in which he has a pecuniary interest.

Political division.

Pecuniary prohibition.

Other employment, etc., forbidden.

"Each commissioner shall devote his time to the duties of his office, and shall not be in the employ of or hold any official relation to any common carrier or other person subject to this Act, nor while holding such office acquire any stock or bonds thereof or become pecuniarily interested in any such carrier.

Division of duties, etc.

"The duties of the board may be so divided that under its supervision the directorship of various activities may be assigned to one or more commissioners. Any commissioner may be removed by the President for inefficiency, neglect of duty, or malfeasance in office.

Seal.

A vacancy in the board shall not impair the right of the remaining members of the board to exercise all its powers. The board shall have an official seal, which shall be judicially noticed.

Business procedure, legal assistance, etc.

"The board may adopt rules and regulations in regard to its procedure and the conduct of its business. The board may employ within the limits of appropriations made therefor by Congress such attorneys as it finds necessary for proper legal service to the board in the conduct of its work, or for proper representation of the public interest in investigations made by it or proceedings pending before it whether at the board's own instance or upon complaint, or to appear for or represent the board in any case in court or other tribunal.

Duties, etc., of existing board continued.

The board shall have such other rights and perform such other duties not inconsistent with the Merchant Marine Act, 1920, as are conferred by existing law upon the board in existence at the time this section as amended takes effect.

Temporary continuance of present commissioners.

"The commissioners in office at the time this section as amended takes effect shall hold office until all the commissioners provided for in this section as amended are appointed and qualify."

Vol. 39, p. 729, amended.

(b) The first sentence of section 4 of the "Shipping Act, 1916," is amended to read as follows:

Salary of members.

"SEC. 4. That each member of the board shall receive a salary of $12,000 per annum."

All Government acquired vessels, etc., transferred to Board.

SEC. 4. That all vessels and other property or interests of whatsoever kind, including vessels or property in course of construction or contracted for, acquired by the President through any agencies whatsoever in pursuance of authority conferred by the Acts or parts of Acts repealed by section 2 of this Act, or in pursuance of the joint resolution entitled "Joint resolution authorizing the President to take over for the United States the possession and title of any vessel within its jurisdiction, which at the time of coming therein was owned in whole or in part by any corporation, citizen, or subject of any nation with which the United States may be at war, or was under register of any such nation, and for other purposes," approved May 12, 1917,

Enemy vessels. Vol. 40, p. 75.

In Government use excepted.

with the exception of vessels and property the use of which is in the opinion of the President required by any other branch of the Government service of the United States, are hereby transferred to the board:

Proviso. Others under War or Navy Departments exempt herefrom.

Provided, That all vessels in the military and naval service of the United States, including the vessels assigned to river and harbor work, inland waterways, or vessels for such needs in the course of construction or under contract by the War Department, shall be exempt from the provisions of this Act.

Sales of acquired vessels to citizens directed.

SEC. 5. That in order to accomplish the declared purposes of this Act, and to carry out the policy declared in section 1 hereof, the board is authorized and directed to sell, as soon as practicable, consistent with good business methods and the objects and purposes to be attained by this Act, at public or private competitive sale after appraisement and due advertisement, to persons who are citizens of

Exception. *Post*, p. 991.

the United States except as provided in section 6 of this Act, all of

Terms, etc.

the vessels referred to in section 4 of this Act or otherwise acquired by the board. Such sale shall be made at such prices and on such terms and conditions as the board may prescribe, but the completion of the payment of the purchase price and interest shall not be deferred more than fifteen years after the making of the contract of sale.

Considerations entering into price fixing.

The board in fixing or accepting the sale price of such vessels shall take into consideration the prevailing domestic and foreign market price of, the available supply of, and the demand for vessels, existing freight rates and prospects of their maintenance, the cost of constructing vessels of similar types under prevailing conditions, as well as the cost of the construction or purchase price of the vessels to be sold, and any other facts or conditions that would influence a prudent, solvent business man in the sale of similar vessels or prop-

erty which he is not forced to sell. All sales made under the authority of this Act shall be subject to the limitations and restrictions of section 9 of the "Shipping Act, 1916," as amended.

Coastwise trade limitations.
Post, p. 994.

SEC. 6. That the board is authorized and empowered to sell to aliens, at such prices and on such terms and conditions as it may determine, not inconsistent with the provisions of section 5 (except that completion of the payment of the purchase price and interest shall not be deferred more than ten years after the making of the contract of sale), such vessels as it shall, after careful investigation, deem unnecessary to the promotion and maintenance of an efficient American merchant marine; but no such sale shall be made unless the board, after diligent effort, has been unable to sell, in accordance with the terms and conditions of section 5, such vessels to persons citizens of the United States, and has, upon an affirmative vote of not less than five of its members, spread upon the minutes of the board, determined to make such sale; and it shall make as a part of its records a full statement of its reasons for making such sale. Deferred payments of purchase price of vessels under this section shall bear interest at the rate of not less than 5½ per centum per annum, payable semiannually.

Permissive sales to aliens.

Condition, etc.

Interest on deferred payments.

SEC. 7. That the board is authorized and directed to investigate and determine as promptly as possible after the enactment of this Act and from time to time thereafter what steamship lines should be established and put in operation from ports in the United States or any Territory, District, or possession thereof to such world and domestic markets as in its judgment are desirable for the promotion, development, expansion, and maintenance of the foreign and coastwise trade of the United States and an adequate postal service, and to determine the type, size, speed, and other requirements of the vessels to be employed upon such lines and the frequency and regularity of their sailings, with a view to furnishing adequate, regular, certain, and permanent service. The board is authorized to sell, and if a satisfactory sale can not be made, to charter such of the vessels referred to in section 4 of this Act or otherwise acquired by the board, as will meet these requirements to responsible persons who are citizens of the United States who agree to establish and maintain such lines upon such terms of payment and other conditions as the board may deem just and necessary to secure and maintain the service desired; and if any such steamship line is deemed desirable and necessary, and if no such citizen can be secured to supply such service by the purchase or charter of vessels on terms satisfactory to the board, the board shall operate vessels on such line until the business is developed so that such vessels may be sold on satisfactory terms and the service maintained, or unless it shall appear within a reasonable time that such line can not be made self-sustaining. The Postmaster General is authorized, notwithstanding the Act entitled "An Act to provide for ocean mail service between the United States and foreign ports, and to promote commerce," approved March 3, 1891, to contract for the carrying of the mails over such lines at such price as may be agreed upon by the board and the Postmaster General: *Provided*, That preference in the sale or assignment of vessels for operation on such steamship lines shall be given to persons who are citizens of the United States who have the support, financial and otherwise, of the domestic communities primarily interested in such lines if the board is satisfied of the ability of such persons to maintain the service desired and proposed to be maintained, or to persons who are citizens of the United States who may then be maintaining a service from the port of the United States to or in the general direction of the world market port to which the board has determined that such service should be established: *Provided further*,

Investigation, etc., for establishing steamship lines to promote foreign and coastwise trade, etc.

Type, etc., of vessels.

Disposal of acquired vessels to citizens agreeing to operate such lines.

Temporary operation by Board, if none by citizens obtained.

Rates for ocean mail service, allowed.
Vol. 26, p. 832.

Provisos.
Preference in sales, etc., of vessels therefor.

Continuation of present service.

That where steamship lines and regular service have been established and are being maintained by ships of the board at the time of the enactment of this Act, such lines and service shall be maintained by the board until, in the opinion of the board, the maintenance thereof is unbusinesslike and against the public interests: *And provided further*, That whenever the board shall determine, as provided in this Act, that trade conditions warrant the establishment of a service or additional service under Government administration where a service is already being given by persons, citizens of the United States, the rates and charges for such Government service shall not be less than the cost thereof, including a proper interest and depreciation charge on the value of Government vessels and equipment employed therein.

Rates for Government service not to be less than cost, if citizens are operating same service.

Investigation directed for developing water commerce transportation facilities, etc.

Extent of, designated.

SEC. 8. That it shall be the duty of the board, in cooperation with the Secretary of War, with the object of promoting, encouraging, and developing ports and transportation facilities in connection with water commerce over which it has jurisdiction, to investigate territorial regions and zones tributary to such ports, taking into consideration the economies of transportation by rail, water and highway and the natural direction of the flow of commerce; to investigate the causes of the congestion of commerce at ports and the remedies applicable thereto; to investigate the subject of water terminals, including the necessary docks, warehouses, apparatus, equipment, and appliances in connection therewith, with a view to devising and suggesting the types most appropriate for different locations and for the most expeditious and economical transfer or interchange of passengers or property between carriers by water and carriers by rail; to advise with communities regarding the appropriate location and plan of construction of wharves, piers, and water terminals; to investigate the practicability and advantages of harbor, river, and port improvements in connection with foreign and coastwise trade; and to investigate any other matter that may tend to promote and encourage the use by vessels of ports adequate to care for the freight which would naturally pass through such ports: *Provided*, That if after such investigation the board shall be of the opinion that rates, charges, rules, or regulations of common carriers by rail subject to the jurisdiction of the Interstate Commerce Commission are detrimental to the declared object of this section, or that new rates, charges, rules, or regulations, new or additional port terminal facilities, or affirmative action on the part of such common carriers by rail is necessary to promote the objects of this section the board may submit its findings to the Interstate Commerce Commission for such action as such commission may consider proper under existing law.

Proviso.

Findings as to detrimental rail rates, etc., to be submitted to Interstate Commerce Commission for action.

Insurance required on vessels sold on deferred payments.

SEC. 9. That if the terms and conditions of any sale of a vessel made under the provisions of this Act include deferred payments of the purchase price, the board shall require, as part of such terms and conditions, that the purchaser of the vessel shall keep the same insured (a) against loss or damage by fire, and against marine risks and disasters, and war and other risks if the board so specifies, with such insurance companies, associations or underwriters, and under such forms of policies, and to such an amount, as the board may prescribe or approve; and (b) by protection and indemnity insurance with such insurance companies, associations, or underwriters and under such forms of policies, and to such an amount as the board may prescribe or approve. The insurance required to be carried under this section shall be made payable to the board and/or to the parties as interest may appear. The board is authorized to enter into any agreement that it deems wise in respect to the payment and/or the guarantee of premiums of insurance.

Fire, marine, etc.

Protection and indemnity.

Payment of premiums.

Insurance fund authorized for Government vessels, plants, etc.

SEC. 10. That the board may create out of net revenue from operations and sales, and maintain and administer, a separate insurance fund, which it may use to insure in whole or in part,

against all hazards commonly covered by insurance policies in such cases, any interest of the United States (1) in any vessel, either constructed or in process of construction, and (2) in any plants or materials heretofore or hereafter acquired by the board or hereby transferred to the board.

Construction loan fund.
Creation of, from revenues of board.

SEC. 11. That during a period of five years from the enactment of this Act the board may annually set aside out of the revenues from sales and operations a sum not exceeding $25,000,000, to be known as its construction loan fund, to be used in aid of the construction of vessels of the best and most efficient type for the establishment and maintenance of service on steamship lines deemed desirable and necessary by the board, and such vessels shall be equipped with the most modern, the most efficient, and the most economical machinery and commercial appliances. The board shall use such fund to the extent required upon such terms as the board may prescribe to aid persons, citizens of the United States, in the construction by them in private shipyards in the United States of the foregoing class of vessels. No aid shall be for a greater sum than two-thirds of the cost of the vessel or vessels to be constructed, and the board shall require such security, including a first lien upon the entire interest in the vessel or vessels so constructed as it shall deem necessary to insure the repayment of such sum with interest thereon and the maintenance of the service for which such vessel or vessels are built.

Use specified.

In aid of construction at private shipyards.

Limit, lien, etc.

Care, etc., of vessels by Board until disposed of.

SEC. 12. That all vessels may be reconditioned and kept in suitable repair and until sold shall be managed and operated by the board or chartered or leased by it on such terms and conditions as the board shall deem wise for the promotion and maintenance of an efficient merchant marine, pursuant to the policy and purposes declared in sections 1 and 5 of this Act; and the United States Shipping Board Emergency Fleet Corporation shall continue in existence and have authority to operate vessels, unless otherwise directed by law, until all vessels are sold in accordance with the provisions of this Act, the provision in section 11 of the "Shipping Act, 1916," to the contrary notwithstanding.

Emergency Fleet Corporation continued to operate vessels, etc.

Vol. 39, p. 732.

Sales of property other than vessels.

SEC. 13. That the board is further authorized to sell all property other than vessels transferred to it under section 4 upon such terms and conditions as the board may determine and prescribe.

Net proceeds of activities, etc.
Disposition of, until July 1, 1921.

SEC. 14. That the net proceeds derived by the board prior to July 1, 1921, from any activities authorized by this Act, or by the "Shipping Act, 1916," or by the Acts specified in section 2 of this Act, except such an amount as the board shall deem necessary to withhold as operating capital, for the purposes of section 12 hereof, and for the insurance fund authorized in section 10 hereof, and for the construction loan fund authorized in section 11 hereof, shall be covered into the Treasury of the United States to the credit of the board and may be expended by it, within the limits of the amounts heretofore or hereafter authorized, for the construction, requisitioning, or purchasing of vessels. After July 1, 1921, such net proceeds, less such an amount as may be authorized annually by Congress to be withheld as operating capital, and less such sums as may be needed for such insurance and construction loan funds, shall be covered into the Treasury of the United States as miscellaneous receipts. The board shall, as rapidly as it deems advisable, withdraw investment of Government funds made during the emergency under the authority conferred by the Acts or parts of Acts repealed by section 2 of this Act and cover the net proceeds thereof into the Treasury of the United States as miscellaneous receipts.

After July 1, 1921.

Investments made during emergency to be withdrawn, etc.

No charter hire required of vessels used by War Department.

SEC. 15. That the board shall not require payment from the War Department for the charter hire of vessels owned by the United

States Government furnished by the board from July 1, 1918, to June 30, 1919, inclusive, for the use of such department.

Housing of shipyard employees.
Authorizations for, terminated.
Vol. 40, p. 438.

SEC. 16. That all authorization to purchase, build, requisition, lease, exchange, or otherwise acquire houses, buildings or land under the Act entitled "An Act to authorize and empower the United States Shipping Board Emergency Fleet Corporation to purchase, lease, requisition, or otherwise acquire, and to sell or otherwise dispose of improved or unimproved lands, houses, buildings, and for other purposes," approved March 1, 1918, is hereby terminated: *Provided, however*, That expenditures may be made under said Act for the repair of houses and buildings already constructed, and the completion of such houses or buildings as have heretofore been contracted for or are under construction, if considered advisable, and the board is authorized and directed to dispose of all such properties or the interest of the United States in all such properties at as early a date as practicable, consistent with good business and the best interests of the United States.

Proviso.
Expenses allowed.

Early disposal directed.

Docks, etc., on Hudson River, Hoboken, N. J.
Board to take over, control, etc.

Vol. 40, p. 459.

SEC. 17. That the board is authorized and directed to take over on January 1, 1921, the possession and control of, and to maintain and develop, all docks, piers, warehouses, wharves and terminal equipment and facilities, including all leasehold easements, rights of way, riparian rights and other rights, estates and interests therein or appurtenant thereto, acquired by the President by or under the Act entitled "An Act making appropriations to supply urgent deficiencies in appropriations for the fiscal year ending June 30, 1918, and prior fiscal years, on account of war expenses, and for other purposes," approved March 28, 1918.

Other docks, etc., acquired for Army or Navy, may be transferred to Board.

The possession and control of such other docks, piers, warehouses, wharves and terminal equipment and facilities or parts thereof, including all leasehold easements, rights of way, riparian rights and other rights, estates or interests therein or appurtenant thereto which were acquired by the War Department or the Navy Department for military or naval purposes during the war emergency may be transferred by the President to the board whenever the President deems such transfer to be for the best interests of the United States.

Temporary transfers to Army or Navy for needs thereof, permitted.

The President may at any time he deems it necessary, by order setting out the need therefor and fixing the period of such need, permit or transfer the possession and control of any part of the property taken over by or transferred to the board under this section to the War Department or the Navy Department for their needs, and when in the opinion of the President such need therefor ceases the possession and control of such property shall revert to the board. None of such property shall be sold except as may be hereafter provided by law.

Sales restricted.

Vol. 39, p. 730.
Vol. 40, p. 900, amended.

SEC. 18. That section 9 of the "Shipping Act, 1916," is amended to read as follows:

Vessels purchased from Board by citizens, allowed American registry, etc.

"SEC. 9. That any vessel purchased, chartered, or leased from the board, by persons who are citizens of the United States, may be registered or enrolled and licensed, or both registered and enrolled and licensed, as a vessel of the United States and entitled to the benefits and privileges appertaining thereto: *Provided*, That foreign-built vessels admitted to American registry or enrollment and license under this Act, and vessels owned by any corporation in which the United States is a stockholder, and vessels sold, leased, or chartered by the board to any person a citizen of the United States, as provided in this Act, may engage in the coastwise trade of the United States while owned, leased, or chartered by such a person.

Proviso.
Foreign built vessels, etc., permitted coastwise trade if owned, etc., by citizens.

Operation under such registry, etc.

"Every vessel purchased, chartered, or leased from the board shall, unless otherwise authorized by the board, be operated only under such registry or enrollment and license. Such vessels while employed

solely as merchant vessels shall be subject to all laws, regulations, and liabilities governing merchant vessels, whether the United States be interested therein as owner, in whole or in part, or hold any mortgage, lien, or other interest therein. Merchant vessels, subject to laws, etc., thereof.

"It shall be unlawful to sell, transfer or mortgage, or, except under regulations prescribed by the board, to charter, any vessel purchased from the board or documented under the laws of the United States to any person not a citizen of the United States, or to put the same under a foreign registry or flag, without first obtaining the board's approval. Sales, etc., subject to approval of Board.

"Any vessel chartered, sold, transferred or mortgaged to a person not a citizen of the United States or placed under a foreign registry or flag, or operated, in violation of any provision of this section shall be forfeited to the United States, and whoever violates any provision of this section shall be guilty of a misdemeanor and subject to a fine of not more than $5,000, or to imprisonment for not more than five years, or both." Forfeiture for violations. Punishment imposed.

SEC. 19. (1) The board is authorized and directed in aid of the accomplishment of the purposes of this Act Special authority of Board.

(a) To make all necessary rules and regulations to carry out the provisions of this Act; Make necessary rules, etc.

(b) To make rules and regulations affecting shipping in the foreign trade not in conflict with law in order to adjust or meet general or special conditions unfavorable to shipping in the foreign trade, whether in any particular trade or upon any particular route or in commerce generally and which arise out of or result from foreign laws, rules, or regulations or from competitive methods or practices employed by owners, operators, agents, or masters of vessels of a foreign country; and Rules to meet unfavorable trade laws, competitive practices, etc., of foreign countries.

(c) To request the head of any department, board, bureau, or agency of the Government to suspend, modify, or annul rules or regulations which have been established by such department, board, bureau, or agency, or to make new rules or regulations affecting shipping in the foreign trade other than such rules or regulations relating to the Public Health Service, the Consular Service, and the Steamboat Inspection Service. Request departments, etc., to modify, etc., established rules thereof. Exceptions.

(2) No rule or regulation shall hereafter be established by any department, board, bureau, or agency of the Government which affect shipping in the foreign trade, except rules or regulations affecting the Public Health Service, the Consular Service, and the Steamboat Inspection Service, until such rule or regulation has been submitted to the board for its approval and final action has been taken thereon by the board or the President. Rules affecting foreign shipping trade subject to approval of Board. Exceptions.

(3) Whenever the head of any department, board, bureau, or agency of the Government refuses to suspend, modify, or annul any rule or regulation, or make a new rule or regulation upon request of the board, as provided in subdivision (c) of paragraph (1) of this section, or objects to the decision of the board in respect to the approval of any rule or regulation, as provided in paragraph (2) of this section, either the board or the head of the department, board, bureau, or agency which has established or is attempting to establish the rule or regulation in question may submit the facts to the President, who is hereby authorized to establish or suspend, modify, or annul such rule or regulation. Disagreements as to rules, etc., to be submitted to the President. Action thereon.

(4) No rule or regulation shall be established which in any manner gives vessels owned by the United States any preference or favor over those vessels documented under the laws of the United States and owned by persons who are citizens of the United States. No preferences to Government vessels over citizen owned.

Common carriers by water.
Vol. 39, p. 733, amended.

SEC. 20. (1) That section 14 of the Shipping Act, 1916, as amended, is amended to read as follows:

Specific restriction on transportation with foreign countries by.

"SEC. 14. That no common carrier by water shall, directly or indirectly, in respect to the transportation by water of passengers or property between a port of a State, Territory, District, or possession of the United States and any other such port or a port of a foreign country,—

Allowing deferred rebates.

"First. Pay, or allow, or enter into any combination, agreement, or understanding, express or implied, to pay or allow, a deferred rebate to any shipper.

Definition.

The term 'deferred rebate' in this Act means a return of any portion of the freight money by a carrier to any shipper as a consideration for the giving of all or any portion of his shipments to the same or any other carrier, or for any other purpose, the payment of which is deferred beyond the completion of the service for which it is paid, and is made only if, during both the period for which computed and the period of deferment, the shipper has complied with the terms of the rebate agreement or arrangement.

Using fighting ships.

"Second. Use a fighting ship either separately or in conjunction with any other carrier, through agreement or otherwise.

Definition.

The term 'fighting ship' in this Act means a vessel used in a particular trade by a carrier or group of carriers for the purpose of excluding, preventing or reducing competition by driving another carrier out of said trade.

Retaliating, etc., against shippers.

"Third. Retaliate against any shipper by refusing, or threatening to refuse, space accommodations when such are available, or resort to other discriminating or unfair methods, because such shipper has patronized any other carrier or has filed a complaint charging unfair treatment, or for any other reason.

Making unfair discriminatory shipping contracts.

"Fourth. Make any unfair or unjustly discriminatory contract with any shipper based on the volume of freight offered, or unfairly treat or unjustly discriminate against any shipper in the matter of

Details.

(a) cargo space accommodations or other facilities, due regard being had for the proper loading of the vessel and the available tonnage; (b) the loading and landing of freight in proper condition; or (c) the adjustment and settlement of claims.

Penalty for violations.

"Any carrier who violates any provision of this section shall be guilty of a misdemeanor punishable by a fine of not more than $25,000 for each offense."

New section.

(2) The Shipping Act, 1916, as amended, is amended by inserting after section 14 a new section to read as follows:

Determination by Board as to acts of persons not citizens.

"SEC. 14a. The board upon its own initiative may, or upon complaint shall, after due notice to all parties in interest and hearing, determine whether any person, not a citizen of the United States and engaged in transportation by water of passengers or property—

Violations of above provisions.

"(1) Has violated any provision of section 14, or

Party to combinations, etc., against American carriers by water.

"(2) Is a party to any combination, agreement, or understanding, express or implied, that involves in respect to transportation of passengers or property between foreign ports, deferred rebates or any other unfair practice designated in section 14, and that excludes from admission upon equal terms with all other parties thereto, a common carrier by water which is a citizen of the United States and which has applied for such admission.

Certificate of violation, etc., to the Secretary of Commerce.

"If the board determines that any such person has violated any such provision or is a party to any such combination, agreement, or understanding, the board shall thereupon certify such fact to the

Vessel owned, etc., refused entry until violation cease.

Secretary of Commerce. The Secretary shall thereafter refuse such person the right of entry for any ship owned or operated by him or by any carrier directly or indirectly controlled by him, into any port of the United States, or any Territory, District, or possession thereof, until the board certifies that the violation has ceased or such combination, agreement, or understanding has been terminated."

Coastwise laws. Extended to island Territories and possessions after February 1, 1922.

Board to establish passenger, etc., service therewith.

SEC. 21. That from and after February 1, 1922, the coastwise laws of the United States shall extend to the island Territories and possessions of the United States not now covered thereby, and the board is directed prior to the expiration of such year to have established adequate steamship service at reasonable rates to accommodate the commerce and the passenger travel of said islands and to maintain and operate such service until it can be taken over and operated and maintained upon satisfactory terms by private capital and enterprise: *Provided*, That if adequate shipping service is not established by February 1, 1922, the President shall extend the period herein allowed for the establishment of such service in the case of any island Territory or possession for such time as may be necessary for the establishment of adequate shipping facilities therefor: *Provided further*, That until Congress shall have authorized the registry as vessels of the United States of vessels owned in the Philippine Islands, the Government of the Philippine Islands is hereby authorized to adopt, from time to time, and enforce regulations governing the transportation of merchandise and passengers between ports or places in the Philippine Archipelago: *And provided further*. That the foregoing provisions of this section shall not take effect with reference to the Philippine Islands until the President of the United States after a full investigation of the local needs and conditions shall, by proclamation, declare that an adequate shipping service has been established as herein provided and fix a date for the going into effect of the same.

Provisos. Extension of period.

Philippine Islands coastwise trade regulations.

Application to Philippine Islands deferred until adequate service established.

Coastwise trade. Admission of vessels of foreign registry to, repealed.

Vol. 40, p. 392, repealed.

SEC. 22. That the Act entitled "An Act giving the United States Shipping Board power to suspend present provisions of law and permit vessels of foreign registry and foreign-built vessels admitted to American registry under the Act of August 18, 1914, to engage in the coastwise trade during the present war and for a period of one hundred and twenty days thereafter, except the coastwise trade with Alaska," approved October 6, 1917, is hereby repealed: *Provided*, That all foreign-built vessels admitted to American registry, owned on February 1, 1920, by persons citizens of the United States, and all foreign-built vessels owned by the United States at the time of the enactment of this Act, when sold and owned by persons citizens of the United States, may engage in the coastwise trade so long as they continue in such ownership, subject to the rules and regulations of such trade: *Provided*, That the board is authorized to issue permits for the carrying of passengers in foreign ships if it deems it necessary so to do, operating between the Territory of Hawaii and the Pacific Coast up to February 1, 1922.

Provisos. Foreign built of American registry allowed in, if owned by citizens.

Hawaii passenger travel on foreign ships permitted to February 1, 1922.

Tax exemptions allowed owners of American ships in foreign trade.

Vol. 40, p. 1088.

Amount.

Provisos. Equivalent amount to be used for building approved vessels in American shipyards.

SEC. 23. That the owner of a vessel documented under the laws of the United States and operated in foreign trade shall, for each of the ten taxable years while so operated, beginning with the first taxable year ending after the enactment of this Act, be allowed as a deduction for the purpose of ascertaining his net income subject to the war-profits and excess-profits taxes imposed by Title III of the Revenue Act of 1918 an amount equivalent to the net earnings of such vessel during such taxable year, determined in accordance with rules and regulations to be made by the board: *Provided*, That such owner shall not be entitled to such deduction unless during such taxable year he invested, or set aside under rules and regulations to be made by the board in a trust fund for investment, in the building in shipyards in the United States of new vessels of a type and kind approved by the board, an amount, to be determined by the Secretary of the Treasury and certified by him to the board, equivalent to the war-profits and excess-profits taxes that would have been payable by such owner on account of the net earnings of such vessels but for the deduction allowed under the provisions of this section:

Part of construction required from ordinary funds.

Provided further, That at least two-thirds of the cost of any vessel constructed under this paragraph shall be paid for out of the ordinary funds or capital of the person having such vessel constructed.

Income tax exemption on sales by citizens of American ships built prior to January 1, 1914.

That during the period of ten years from the enactment of this Act any person a citizen of the United States who may sell a vessel documented under the laws of the United States and built prior to January 1, 1914, shall be exempt from all income taxes that would be payable upon any of the proceeds of such sale under Title I, Title II, and Title III of the Revenue Act of 1918 if the entire proceeds thereof shall be invested in the building of new ships in American shipyards, such ships to be documented under the laws of the United States and to be of a type approved by the board.

Vol. 40, pp. 1057-1096.

New American ships to be built from proceeds.

Mails to be shipped on American vessels.

Contract assignments forbidden, etc.

SEC. 24. That all mails of the United States shipped or carried on vessels shall, if practicable, be shipped or carried on American-built vessels documented under the laws of the United States. No contract hereafter made with the Postmaster General for carrying mails on vessels so built and documented shall be assigned or sublet, and no mails covered by such contract shall be carried on any vessel not so built and documented. No money shall be paid out of the Treasury of the United States on or in relation to any such contract for carrying mails on vessels so built and documented when such contract has been assigned or sublet or when mails covered by such contract are in violation of the terms thereof carried on any vessel not so built and documented. The board and the Postmaster General, in aid of the development of a merchant marine adequate to provide for the maintenance and expansion of the foreign or coastwise trade of the United States and of a satisfactory postal service in connection therewith, shall from time to time determine the just and reasonable rate of compensation to be paid for such service, and the Postmaster General is hereby authorized to enter into contracts within the limits of appropriations made therefor by Congress to pay for the carrying of such mails in such vessels at such rate. Nothing herein shall be affected by the Act entitled "An Act to provide for ocean mail service between the United States and foreign ports, and to promote commerce," approved March 3, 1891.

Determination of rates, etc.

Prior Act not applicable.

Vol. 26, p. 830.

American Bureau of Shipping.

Classification of vessels by, recognized.

SEC. 25. That for the classification of vessels owned by the United States, and for such other purposes in connection therewith as are the proper functions of a classification bureau, all departments, boards, bureaus, and commissions of the Government are hereby directed to recognize the American Bureau of Shipping as their agency so long as the American Bureau of Shipping continues to be maintained as an organization which has no capital stock and pays no dividends: *Provided*, That the Secretary of Commerce and the chairman of the board shall each appoint one representative who shall represent the Government upon the executive committee of the American Bureau of Shipping, and the bureau shall agree that these representatives shall be accepted by them as active members of such committee. Such representatives of the Government shall serve without any compensation, except necessary traveling expenses: *Provided further*, That the official list of merchant vessels published by the Government shall hereafter contain a notation clearly indicating all vessels classed by the American Bureau of Shipping.

Provisos.

Government representative to be on committee.

Notation of, on official list of merchant vessels.

Cargo vessels.

Passengers carried on, limited.

SEC. 26. That cargo vessels documented under the laws of the United States may carry not to exceed sixteen persons in addition to the crew between any ports or places in the United States or its Districts, Territories, or possessions, or between any such port or place and any foreign port, or from any foreign port to another foreign port, and such vessels shall not be held to be "passenger vessels" or "vessels carrying passengers" within the meaning of the inspection laws and the rules and regulations thereunder: *Provided*, That nothing herein shall be taken to exempt such vessels from the laws, rules, and

Provisos.

Life saving equipment required.

regulations respecting life-saving equipment: *Provided further*, That when any such vessel carries persons other than the crew as herein provided for, the owner, agent, or master of the vessel shall first notify such persons of the presence on board of any dangerous articles, as defined by law, or of any other condition or circumstance which would constitute a risk of safety for passenger or crew.

Notice of risk, etc. to be given.

The privilege bestowed by this section on vessels of the United States shall be extended insofar as the foreign trade is concerned to the cargo vessels of any nation which allows the like privilege to cargo vessels of the United States in trades not restricted to vessels under its own flag.

Reciprocal allowance to foreign cargo vessels.

Failure on the part of the owner, agent, or master of the vessel to give such notice shall subject the vessel to a penalty of $500, which may be mitigated or remitted by the Secretary of Commerce upon a proper representation of the facts.

Penalty for failure to give notice of risk.

SEC. 27. That no merchandise shall be transported by water, or by land and water, on penalty of forfeiture thereof, between points in the United States, including Districts, Territories, and possessions thereof embraced within the coastwise laws, either directly or via a foreign port, or for any part of the transportation, in any other vessel than a vessel built in and documented under the laws of the United States and owned by persons who are citizens of the United States, or vessels to which the privilege of engaging in the coastwise trade is extended by sections 18 or 22 of this Act: *Provided*, That this section shall not apply to merchandise transported between points within the continental United States, excluding Alaska, over through routes heretofore or hereafter recognized by the Interstate Commerce Commission for which routes rate tariffs have been or shall hereafter be filed with said commission when such routes are in part over Canadian rail lines and their own or other connecting water facilities: *Provided further*, That this section shall not become effective upon the Yukon river until the Alaska Railroad shall be completed and the Shipping Board shall find that proper facilities will be furnished for transportation by persons citizens of the United States for properly handling the traffic.

Merchandise transported in coastwise trade, etc., in other than American vessels to be forfeited.

Provisos. Exception.

Application to Yukon River delayed.

SEC. 28. That no common carrier shall charge, collect, or receive, for transportation subject to the Interstate Commerce Act of persons or property, under any joint rate, fare, or charge, or under any export, import, or other proportional rate, fare, or charge, which is based in whole or in part on the fact that the persons or property affected thereby is to be transported to, or has been transported from, any port in a possession or dependency of the United States, or in a foreign country, by a carrier by water in foreign commerce, any lower rate, fare, or charge than that charged, collected, or received by it for the transportation of persons, or of a like kind of property, for the same distance, in the same direction, and over the same route, in connection with commerce wholly within the United States, unless the vessel so transporting such persons or property is, or unless it was at the time of such transportation by water, documented under the laws of the United States. Whenever the board is of the opinion, however, that adequate shipping facilities to or from any port in a possession or dependency of the United States or a foreign country are not afforded by vessels so documented, it shall certify this fact to the Interstate Commerce Commission, and the commission may, by order, suspend the operation of the provisions of this section with respect to the rates, fares, and charges for the transportation by rail of persons and property transported from, or to be transported, to such ports, for such length of time and under such terms and conditions as it may prescribe in such order, or in any order supplemental thereto. Such suspension of operation of the provisions of this section may be terminated by order of the commission whenever the board is of the

Restriction on lower rail charges for transportation from foreign countries, etc., by water carriers.

By American vessels excepted.

Suspension if no adequate facilities afforded by American vessels.

Termination when facilities afforded.

opinion that adequate shipping facilities by such vessels to such ports are afforded and shall so certify to the commission.

"Association."

SEC. 29. (a) That whenever used in this section—

(1) The term "association" means any association, exchange, pool, combination, or other arrangement for concerted action; and

"Marine insurance companies."

(2) The term "marine insurance companies" means any persons, companies, or associations, authorized to write marine insurance or reinsurance under the laws of the United States or of a State, Territory, District, or possession thereof.

Marine insurance associations.

Not illegal under antitrust laws.

Vol. 38, p. 730.

(b) Nothing contained in the "antitrust laws" as designated in section 1 of the Act entitled "An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October 15, 1914, shall be construed as declaring illegal an association entered into by marine insurance companies for the following purposes: To transact a marine insurance and reinsurance business in the United States and in foreign countries and to reinsure or otherwise apportion among its membership the risks undertaken by such association or any of the component members.

Apportionment of risks, etc.

Ship Mortgage Act, 1920.

SEC. 30. Subsection A. That this section may be cited as the "Ship Mortgage Act, 1920."

Definitions.

DEFINITIONS.

Subsection B. When used in this section—

"Document."

(1) The term "document" includes registry and enrollment and license;

"Documented."

(2) The term "documented" means registered or enrolled or licensed under the laws of the United States, whether permanently or temporarily;

"Port of documentation."

(3) The term "port of documentation" means the port at which the vessel is documented, in accordance with law;

"Vessel of the United States."

(4) The term "vessel of the United States" means any vessel documented under the laws of the United States and such vessel shall be held to continue to be so documented until its documents are surrendered with the approval of the board; and

"Mortgagee."

(5) The term "mortgagee," in the case of a mortgage involving a trust deed and a bond issue thereunder, means the trustee designated in such deed.

Recording of sales, conveyances, and mortgages of vessels of the United States.

RECORDING OF SALES, CONVEYANCES, AND MORTGAGES OF VESSELS OF THE UNITED STATES.

Collector of customs to record bill of sale, etc.

Subsection C. (a) No sale, conveyance, or mortgage which, at the time such sale, conveyance, or mortgage is made, includes a vessel of the United States, or any portion thereof, as the whole or any part of the property sold, conveyed, or mortgaged shall be valid, in respect to such vessel, against any person other than the grantor or mortgagor, his heir or devisee, and a person having actual notice thereof, until such bill of sale, conveyance, or mortgage is recorded in the office of the collector of customs of the port of documentation of such vessel, as provided in subdivision (b) of this subsection.

Record book.

Contents.

(b) Such collector of customs shall record bills of sale, conveyances, and mortgages, delivered to him, in the order of their reception, in books to be kept for that purpose and indexed to show—

(1) The name of the vessel;

(2) The names of the parties to the sale, conveyance, or mortgage;

(3) The time and date of reception of the instrument;

(4) The interest in the vessel so sold, conveyed, or mortgaged; and

(5) The amount and date of maturity of the mortgage.

Mortgages of vessels. Requirements to give preferred status, when sold, etc.

Subsection D. (a) A valid mortgage which, at the time it is made includes the whole of any vessel of the United States of 200 gross tons and upwards, shall in addition have, in respect to such vessel and as

of the date of the compliance with all the provisions of this subdivision, the preferred status given by the provisions of subsection M, if—

(1) The mortgage is indorsed upon the vessel's documents in accordance with the provisions of this section;

(2) The mortgage is recorded as provided in subsection C, together with the time and date when the mortgage is so indorsed;

(3) An affidavit is filed with the record of such mortgage to the effect that the mortgage is made in good faith and without any design to hinder, delay, or defraud any existing or future creditor of the mortgagor or any lienor of the mortgaged vessel;

(4) The mortgage does not stipulate that the mortgagee waives the preferred status thereof; and

(5) The mortgagee is a citizen of the United States.

Preferred mortgages.

(b) Any mortgage which complies in respect to any vessel with the conditions enumerated in this subsection is hereafter in this section called a "preferred mortgage" as to such vessel.

Indorsements, required on documents of vessel.

(c) There shall be indorsed upon the documents of a vessel covered by a preferred mortgage—

(1) The names of the mortgagor and mortgagee;

(2) The time and date the indorsement is made;

(3) The amount and date of maturity of the mortgage; and

(4) Any amount required to be indorsed by the provisions of subdivision (e) or (f) of this subsection.

Indorsement by collector, etc.

(d) Such indorsement shall be made (1) by the collector of customs of the port of documentation of the mortgaged vessel, or (2) by the collector of customs of any port in which the vessel is found, if such collector is directed to make the indorsement by the collector of customs of the port of documentation; and no clearance shall be issued to the vessel until such indorsement is made. The collector of customs of the port of documentation shall give such direction by wire or letter at the request of the mortgagee and upon the tender of the cost of communication of such direction. Whenever any new document is issued for the vessel, such indorsement shall be transferred to and indorsed upon the new document by the collector of customs.

Transfers to new documents.

Mortgages including other property.

(e) A mortgage which includes property other than a vessel shall not be held a preferred mortgage unless the mortgage provides for the separate discharge of such property by the payment of a specified portion of the mortgage indebtedness. If a preferred mortgage so provides for the separate discharge, the amount of the portion of such payment shall be indorsed upon the documents of the vessel.

Preferred mortgages, including more than one vessel.

Action of court on sale.

(f) If a preferred mortgage includes more than one vessel and provides for the separate discharge of each vessel by the payment of a portion of the mortgage indebtedness, the amount of such portion of such payment shall be indorsed upon the documents of the vessel. In case such mortgage does not provide for the separate discharge of a vessel and the vessel is to be sold upon the order of a district court of the United States in a suit in rem in admiralty, the court shall determine the portion of the mortgage indebtedness increased by 20 per centum (1) which, in the opinion of the court, the approximate value of the vessel bears to the approximate value of all the vessels covered by the mortgage, and (2) upon the payment of which the vessel shall be discharged from the mortgage.

Copies of record to mortgagor.

Subsection E. The collector of customs upon the recording of a preferred mortgage shall deliver two certified copies thereof to the mortgagor who shall place, and use due diligence to retain, one copy on board the mortgaged vessel and cause such copy and the documents of the vessel to be exhibited by the master to any person having business with the vessel, which may give rise to a maritime lien upon the vessel or to the sale, conveyance, or mortgage thereof.

Exhibition on vessel, etc.

The master of the vessel shall, upon the request of any such person, exhibit to him the documents of the vessel and the copy of any preferred mortgage of the vessel placed on board thereof.

Written notice of prior liabilities to be given by mortgagor to mortgagee.

Subsection F. The mortgagor (1) shall, upon request of the mortgagee, disclose in writing to him prior to the execution of any preferred mortgage, the existence of any maritime lien, prior mortgage, or other obligation or liability upon the vessel to be mortgaged, that is known to the mortgagor, and (2), without the consent of the mortgagee, shall not incur, after the execution of such mortgage and before the mortgagee has had a reasonable time in which to record the mortgage and have indorsements in respect thereto made upon the documents of the vessel, any contractual obligation creating a lien upon the vessel other than a lien for wages of stevedores when employed directly by the owner, operator, master, ship's husband, or agent of the vessel, for wages of the crew of the vessel, for general average, or for salvage, including contract salvage, in respect to the vessel.

Restriction for subsequent obligations creating a lien.

Claims upon vessel covered by a preferred mortgage.

Notice, etc.

Subsection G. (a) The collector of customs of the port of documentation shall, upon the request of any person, record notice of his claim of a lien upon a vessel covered by a preferred mortgage, together with the nature, date of creation, and amount of the lien, and the name and address of the person. Any person who has caused notice of his claim of lien to be so recorded shall, upon a discharge in whole or in part of the indebtedness, forthwith file with the collector of customs a certificate of such discharge. The collector of customs shall thereupon record the certificate.

Discharge, etc., of mortgages.

(b) The mortgagor, upon a discharge in whole or in part of the mortgage indebtedness, shall forthwith file with the collector of customs for the port of documentation of the vessel, a certificate of such discharge. Such collector of customs shall thereupon record the certificate. In case of a vessel covered by a preferred mortgage, the collector of customs at the port of documentation shall (1) indorse upon the documents of the vessel, or direct the collector of customs at any port in which the vessel is found, to so indorse, the fact of such discharge, and (2) shall deny clearance to the vessel until such indorsement is made.

Preferred mortgage.

Bills of sale, etc. Record requirements.

Subsection H. (a) No bill of sale, conveyance, or mortgage shall be recorded unless it states the interest of the grantor or mortgagor in the vessel, and the interest so sold, conveyed, or mortgaged.

Acknowledgments.

(b) No bill of sale, conveyance, mortgage, notice of claim of lien, or certificate of discharge thereof, shall be recorded unless previously acknowledged before a notary public or other officer authorized by a law of the United States, or of a State, Territory, District, or possession thereof, to take acknowledgment of deeds.

Record, etc., at new port of documentation.

(c) In case of a change in the port of documentation of a vessel of the United States, no bill of sale, conveyance, or mortgage shall be recorded at the new port of documentation unless there is furnished to the collector of customs of such port, together with the copy of the bill of sale, conveyance, or mortgage to be recorded, a certified copy of the record of the vessel at the former port of documentation furnished by the collector of such port. The collector of customs at the new port of documentation is authorized and directed to record such certified copy.

Interest on preferred mortgages.

(d) A preferred mortgage may bear such rate of interest as is agreed by the parties thereto.

Inspection of records permitted.

Subsection I. Each collector of customs shall permit records made under the provisions of this section to be inspected during office hours, under such reasonable regulations as the collector may establish.

Certified copies to be furnished.

Upon the request of any person the collector of customs shall furnish him from the records of the collector's office (1) a certificate

setting forth the names of the owners of any vessel, the interest held by each owner, and the material facts as to any bill of sale or conveyance of, any mortgage covering, or any lien or other incumbrance upon, a specified vessel, (2) a certified copy of any bill of sale, conveyance, mortgage, notice of claim of lien, or certificate of discharge in respect to such vessel, or (3) a certified copy as required by subdivision (c) of subsection H. The collector of customs shall collect a fee for any bill of sale, conveyance, or mortgage recorded, or any certificate or certified copy furnished, by him, in the amount of 20 cents a folio with a minimum charge of $1.00. All such fees shall be covered into the Treasury of the United States as miscellaneous receipts.

Fees for recording, copies, etc.

PENALTIES.

Penalties.

Subsection J. (a) If the master of the vessel willfully fails to exhibit the documents of the vessel or the copy of any preferred mortgage thereof, as required by subsection E, the board of local inspectors of vessels having jurisdiction of the license of the master, may suspend or cancel such license, subject to the provisions of "An Act to provide for appeals from decision of boards of local inspectors of vessels and for other purposes," approved June 15, 1918.

License of master to be canceled on failure to exhibit documents, etc.

Vol. 40, p. 602.

(b) A mortgagor who, with intent to defraud, violates any provision of subsection F, and if the mortgagor is a corporation or association, the president or other principal executive officer of the corporation or association, shall upon conviction thereof be held guilty of a misdemeanor and shall be fined not more than $1,000 or imprisoned not more than 2 years, or both. The mortgaged indebtedness shall thereupon become immediately due and payable at the election of the mortgagee.

Punishment for withholding notice of prior debts, etc., by mortgagor.

(c) If any person enters into any contract secured by, or upon the credit of, a vessel of the United States covered by a preferred mortgage, and suffers pecuniary loss by reason of the failure of the collector of customs, or any officer, employee, or agent thereof, properly to perform any duty required of the collector under the provisions of this section, the collector of customs shall be liable to such person for damages in the amount of such loss. If any such person is caused any such loss by reason of the failure of the mortgagor, or master of the mortgaged vessel, or any officer, employee, or agent thereof, to comply with any provision of subsection E or F or to file an affidavit as required by subdivision (a) of subsection D, correct in each particular thereof, the mortgagor shall be liable to such person for damages in the amount of such loss. The district courts of the United States are given jurisdiction (but not to the exclusion of the courts of the several States, Territories, Districts, or possessions) of suits for the recovery of such damages, irrespective of the amount involved in the suit or the citizenship of the parties thereto. Such suit shall be begun by personal service upon the defendant within the limits of the district. Upon judgment for the plaintiff in any such suit, the court shall include in the judgment an additional amount for costs of the action and a reasonable counsel's fee, to be fixed by the court.

On preferred mortgages.

Collector, for failure of duty, causing loss on contract covered by.

Failure of mortgagor, etc., to comply with requirements.

Jurisdiction of courts.

Service, etc.

FORECLOSURE OF PREFERRED MORTGAGES.

Foreclosure of preferred mortgages.

Subsection K. A preferred mortgage shall constitute a lien upon the mortgaged vessel in the amount of the outstanding mortage indebtedness secured by such vessel. Upon the default of any term or condition of the mortgage, such lien may be enforced by the mortgagee by suit in rem in admiralty. Original jurisdiction of all such suits is granted to the district courts of the United States exclusively. In

Enforcement of lien.

Exclusive jurisdiction of Federal court.

Notices to be given.

addition to any notice by publication, actual notice of the commencement of any such suit shall be given by the libellant, in such manner as the court shall direct, to (1) the master, other ranking officer, or caretaker of the vessel, and (2) any person who has recorded a notice of claim of an undischarged lien upon the vessel, as provided in subsection G, unless after search by the libellant satisfactory to the court, such mortgagor, master, other ranking officer, caretaker, or claimant is not found within the United States. Failure to give notice to any such person, as required by this subsection, shall not constitute a jurisdictional defect; but the libellant shall be liable to such person for damages in the amount of his interest in the vessel terminated by the suit. It in personam for the recovery of such damages may be brought in accordance with the provisions of subdivision (c) of subsection J.

Effect of failure.

Recovery of damages.

Operation of vessel by receiver.

Subsection L. In any suit in rem in admiralty for the enforcement of the preferred mortgage lien, the court may appoint a receiver and, in its discretion, authorize the receiver to operate the mortgaged vessel. The marshal may be authorized and directed by the court to take possession of the mortgaged vessel notwithstanding the fact that the vessel is in the possession or under the control of any person claiming a possessory common-law lien.

Possession by marshal.

"Preferred maritime lien." Meaning of.

Subsection M. (a) When used hereinafter in this section, the term "preferred maritime lien" means (1) a lien arising prior in time to the recording and indorsement of a preferred mortgage in accordance with the provisions of this section; or (2) a lien for damages arising out of tort, for wages of a stevedore when employed directly by the owner, operator, master, ship's husband, or agent of the vessel, for wages of the crew of the vessel, for general average, and for salvage, including contract salvage.

Termination of liens upon sale by court.

(b) Upon the sale of any mortgaged vessel by order of a district court of the United States in any suit in rem in admiralty for the enforcement of a preferred mortgage lien thereon, all preëxisting claims in the vessel, including any possessory common-law lien of which a lienor is deprived under the provisions of subsection L shall be held terminated and shall thereafter attach, in like amount and in accordance with their respective priorities, to the proceeds of the sale; except that the preferred mortgage lien shall have priority over all claims against the vessel, except (1) preferred maritime liens, and (2) expenses and fees allowed and costs taxed, by the court.

Attach thereafter to proceeds. Priorities.

Suit in personam in addition.

Subsection N. (a) Upon the default of any term or condition of a preferred mortgage upon a vessel, the mortgagee may, in addition to all other remedies granted by this section, bring suit in personam in admiralty in a district court of the United States, against the mortgagor for the amount of the outstanding mortgage indebtedness secured by such vessel or any deficiency in the full payment thereof.

Not applicable to realty, etc., covered by mortgage.

(b) This section shall not be construed, in the case of a mortgage covering, in addition to vessels, realty or personalty other than vessels, or both, to authorize the enforcement by suit in rem in admiralty of the rights of the mortgagee in respect to such realty or personalty other than vessels.

Transfers of mortgaged vessels and assignment of vessel mortgages.

TRANSFERS OF MORTGAGED VESSELS AND ASSIGNMENT OF VESSEL MORTGAGES.

Approval of Board necessary.

Subsection O. (a) The documents of a vessel of the United States covered by a preferred mortgage may not be surrendered (except in the case of the forfeiture of the vessel or its sale by the order of any court of the United States or any foreign country) without the approval of the board. The board shall refuse such approval unless the mortgagee consents to such surrender.

Interest of mortgagee if vessel forfeited for violation of law.

(b) The interest of the mortgagee in a vessel of the United States covered by a mortgage, shall not be terminated by the forfeiture of the vessel for a violation of any law of the United States, unless the mortgagee authorized, consented, or conspired to effect the illegal act, failure, or omission which constituted such violation.

Effect of sale by order of court.

(c) Upon the sale of any vessel of the United States covered by a preferred mortgage, by order of a district court of the United States in any suit in rem in admiralty for the enforcement of a maritime lien other than a preferred maritime lien, the vessel shall be sold free from all preexisting claims thereon; but the court shall, upon the request of the mortgagee, the libellant, or any intervenor, require the purchaser at such sale to give and the mortgagor to accept a new mortgage of the vessel for the balance of the term of the original mortgage. The conditions of such new mortgage shall be the same, so far as practicable, as those of the original mortgage and shall be subject to the approval of the court. If such new mortgage is given, the mortgagee shall not be paid from the proceeds of the sale and the amount payable as the purchase price shall be held diminished in the amount of the new mortgage indebtedness.

New mortgage, etc., by purchaser.

Effect on price.

Approval, etc., of assignments by Board.

(d) No rights under a mortgage of a vessel of the United States shall be assigned to any person not a citizen of the United States without the approval of the board. Any assignment in violation of any provision of this section shall be void.

Sales only to citizens.

(e) No vessel of the United States shall be sold by order of a district court of the United States in any suit in rem in admiralty to any person not a citizen of the United States.

Maritime liens for necessaries.

MARITIME LIENS FOR NECESSARIES

Persons entitled to. Vol. 36, p. 604.

Subsection P. Any person furnishing repairs, supplies, towage, use of dry dock or marine railway, or other necessaries, to any vessel, whether foreign or domestic, upon the order of the owner of such vessel, or of a person authorized by the owner, shall have a maritime lien on the vessel, which may be enforced by suit in rem, and it shall not be necessary to allege or prove that credit was given to the vessel.

Enforcement.

Authority to procure repairs, etc., presumed.

Subsection Q. The following persons shall be presumed to have authority from the owner to procure repairs, supplies, towage, use of dry dock or marine railway, and other necessaries for the vessel: The managing owner, ship's husband, master, or any person to whom the management of the vessel at the port of supply is intrusted. No person tortiously or unlawfully in possession or charge of a vessel shall have authority to bind the vessel.

Chartered vessels, etc.

Subsection R. The officers and agents of a vessel specified in subsection Q shall be taken to include such officers and agents when appointed by a charterer, by an owner pro hac vice, or by an agreed purchaser in possession of the vessel; but nothing in this section shall be construed to confer a lien when the furnisher knew, or by exercise of reasonable diligence could have ascertained, that because of the terms of a charter party, agreement for sale of the vessel, or for any other reason, the person ordering the repairs, supplies, or other necessaries was without authority to bind the vessel therefor.

Restriction.

Waiving of liens by agreement.

Subsection S. Nothing in this section shall be construed to prevent the furnisher of repairs, supplies, towage, use of dry dock or marine railway, or other necessaries, or the mortgagee, from waiving his right to a lien, or in the case of a preferred mortgage lien, to the preferred status of such lien, at any time, by agreement or otherwise; and this section shall not be construed to affect the rules of law now existing in regard to (1) the right to proceed against the vessel for advances, (2) laches in the enforcement of liens upon vessels, (3) the right to proceed in personam, (4) the rank of preferred maritime liens among

Rights not affected.

themselves, or (5) priorities between maritime liens and mortgages, other than preferred mortgages, upon vessels of the United States.

Statutes of States superseded.

Subsection T. This section shall supersede the provisions of all State statutes conferring liens on vessels, in so far as such statutes purport to create rights of action to be enforced by suits in rem in admiralty against vessels for repairs, supplies, towage, use of dry dock or marine railway, and other necessaries.

Miscellaneous provisions.

MISCELLANEOUS PROVISIONS.

Existing mortgages not affected.

Subsection U. This section shall not apply (1) to any existing mortgage, or (2) to any mortgage hereafter placed on any vessel now under an existing mortgage, so long as such existing mortgage remains undischarged.

Books, certificates, etc., to be furnished collectors.

Subsection V. The Secretary of Commerce is authorized and directed to furnish collectors of customs with all necessary books and records, and with certificates of registry and of enrollment and license in such form as provides for the making of all indorsements thereon required by this section.

Executory regulations to be prescribed.

Subsection W. The Secretary of Commerce is authorized to make such regulations in respect to the recording and indorsing of mortgages covering vessels of the United States, as he deems necessary to the efficient execution of the provisions of this section.

Laws repealed.
R. S., secs. 4192–4196, pp. 808, 809, repealed.
Vol. 36, p. 604, repealed.

Subsection X. Sections 4192 to 4196, inclusive, of the Revised Statutes of the United States, as amended, and the Act entitled "An Act relating to liens on vessels for repairs, supplies, or other necessaries," approved June 23, 1910, are repealed. This section, however, so far as not inconsistent with any of the provisions of law so repealed, shall be held a reenactment of such repealed law, and any right or obligation based upon any provision of such law and accruing prior to such repeal, may be prosecuted in the same manner and to the same effect as if this Act had not been passed.

R. S., sec. 4530, p. 876, amended.

SEC. 31. That section 4530 of the Revised Statutes of the United States is amended to read as follows:

Merchant seamen.
Payments while in port.
Vol. 36, p. 1165, amended.

"SEC. 4530. Every seaman on a vessel of the United States shall be entitled to receive on demand from the master of the vessel to which he belongs one-half part of the balance of his wages earned and remaining unpaid at the time when such demand is made at every port where such vessel, after the voyage has been commenced, shall load or deliver cargo before the voyage is ended, and all stipulations in the contract to the contrary shall be void: *Provided*, Such a demand shall not be made before the expiration of, nor oftener than once in, five days nor more than once in the same harbor on the same entry. Any failure on the part of the master to comply with this demand shall release the seaman from his contract and he shall be entitled to full payment of wages earned. And when the voyage is ended every such seaman shall be entitled to the remainder of the wages which shall be then due him, as provided in section 4529 of the Revised Statutes: *Provided further*, That notwithstanding any release signed by any seaman under section 4552 of the Revised Statutes any court having jurisdiction may upon good cause shown set aside such release and take such action as justice shall require: *And provided further*, That this section shall apply to seamen on foreign vessels while in harbors of the United States, and the courts of the United States shall be open to such seamen for its enforcement."

Provisos.
Limitations extended.

In full at end of voyage.

Vol. 38, p. 1165.

Setting aside of release.
R. S., sec. 4552, p. 880.

Applicable to foreign seamen in American ports.

Wages of seamen.
Vol. 38, p. 1168, amended.

SEC. 32. That paragraph (a) of section 10 of the Act entitled "An Act to remove certain burdens on the American merchant marine and encourage the American foreign-carrying trade, and for other purposes," approved June 26, 1884, as amended, is hereby amended to read as follows:

"SEC. 10. (a) That it shall be, and is hereby, made unlawful in any case to pay any seaman wages in advance of the time when he has actually earned the same, or to pay such advance wages, or to make any order, or note, or other evidence of indebtedness therefor to any other person, or to pay any person, for the shipment of seamen when payment is deducted or to be deducted from a seaman's wages. Any person violating any of the foregoing provisions of this section shall be deemed guilty of a misdemeanor, and upon conviction shall be punished by a fine of not less than $25 nor more than $100, and may also be imprisoned for a period of not exceeding six months, at the discretion of the court. The payment of such advance wages or allotment, whether made within or without the United States or territory subject to the jurisdiction thereof, shall in no case except as herein provided absolve the vessel or the master or the owner thereof from the full payment of wages after the same shall have been actually earned, and shall be no defense to a libel suit or action for the recovery of such wages. If any person shall demand or receive, either directly or indirectly, from any seaman or other person seeking employment, as seaman, or from any person on his behalf, any remuneration whatever for providing him with employment, he shall for every such offense be deemed guilty of a misdemeanor and shall be imprisoned not more than six months or fined not more than $500."

Payment in advance, etc., unlawful.

Punishment for violations.

Liability whether paid within or without United States territory.

Punishment for receiving pay from seamen for employment.

SEC. 33. That section 20 of such Act of March 4, 1915, be, and is, amended to read as follows:

Vol. 38, p. 1185, amended.

"SEC. 20. That any seaman who shall suffer personal injury in the course of his employment may, at his election, maintain an action for damages at law, with the right of trial by jury, and in such action all statutes of the United States modifying or extending the common-law right or remedy in cases of personal injury to railway employees shall apply; and in case of the death of any seaman as a result of any such personal injury the personal representative of such seaman may maintain an action for damages at law with the right of trial by jury, and in such action all statutes of the United States conferring or regulating the right of action for death in the case of railway employees shall be applicable. Jurisdiction in such actions shall be under the court of the district in which the defendant employer resides or in which his principal office is located."

Injuries to seamen in service.

Actions for damages allowed.

Resulting in death.

Jurisdiction of courts.

SEC. 34. That in the judgment of Congress, articles or provisions in treaties or conventions to which the United States is a party, which restrict the right of the United States to impose discriminating customs duties on imports entering the United States in foreign vessels and in vessels of the United States, and which also restrict the right of the United States to impose discriminatory tonnage dues on foreign vessels and on vessels of the United States entering the United States should be terminated, and the President is hereby authorized and directed within ninety days after this Act becomes law to give notice to the several Governments, respectively, parties to such treaties or conventions, that so much thereof as imposes any such restriction on the United States will terminate on the expiration of such periods as may be required for the giving of such notice by the provisions of such treaties or conventions.

Treaty restrictions on discriminatory customs and tonnage duties to be terminated.

Notice to be given foreign Governments.

SEC. 35. That the power and authority vested in the board by this Act, except as herein otherwise specifically provided, may be exercised directly by the board, or by it through the United States Shipping Board Emergency Fleet Corporation.

Delegation of powers to Emergency Fleet Corporation.

SEC. 36. That if any provision of this Act is declared unconstitutional or the application of any provision to certain circumstances be held invalid, the remainder of the Act and the application of such provisions to circumstances other than those as to which it is held invalid shall not be affected thereby.

Invalidity of any provision not to affect remainder of Act.

General meaning of terms used in this Act.

SEC. 37. That when used in this Act, unless the context otherwise requires, the terms "person," "vessel," "documented under the laws of the United States," and "citizen of the United States" shall have the meaning assigned to them by sections 1 and 2 of the "Shipping Act, 1916," as amended by this Act; the term "board" means the United States Shipping Board; and the term "alien" means any person not a citizen of the United States.

Vol. 39, pp. 728, 729.

Vol. 39, p. 729, amended.

SEC. 38. That section 2 of the Shipping Act, 1916, is amended to read as follows:

Controlling interest of corporations, etc., to be owned by citizens.

"SEC. 2. (a) That within the meaning of this Act no corporation, partnership, or association shall be deemed a citizen of the United States unless the controlling interest therein is owned by citizens of the United States, and, in the case of a corporation, unless its president and managing directors are citizens of the United States and the corporation itself is organized under the laws of the United States or of a State, Territory, District, or possession thereof, but in the case of a corporation, association, or partnership operating any vessel in the coastwise trade the amount of interest required to be owned by citizens of the United States shall be 75 per centum.

Coastwise trade.

Controlling interest not deemed owned by citizens.
Interests specified.

"(b) The controlling interest in a corporation shall not be deemed to be owned by citizens of the United States (a) if the title to a majority of the stock thereof is not vested in such citizens free from any trust or fiduciary obligation in favor of any person not a citizen of the United States; or (b) if the majority of the voting power in such corporation is not vested in citizens of the United States; or (c) if through any contract or understanding it is so arranged that the majority of the voting power may be exercised, directly or indirectly, in behalf of any person who is not a citizen of the United States; or (d) if by any other means whatsoever control of the corporation is conferred upon or permitted to be exercised by any person who is not a citizen of the United States.

Seventy-five per cent interests not deemed owned by citizens.
Interests specified.

"(c) Seventy-five per centum of the interest in a corporation shall not be deemed to be owned by citizens of the United States (a) if the title to 75 per centum of its stock is not vested in such citizens free from any trust or fiduciary obligation in favor of any person not a citizen of the United States; or (b) if 75 per centum of the voting power in such corporation is not vested in citizens of the United States; or (c) if, through any contract or understanding it is so arranged that more than 25 per centum of the voting power in such corporation may be exercised, directly or indirectly, in behalf of any person who is not a citizen of the United States; or (d) if by any other means whatsoever control of any interest in the corporation in excess of 25 per centum is conferred upon or permitted to be exercised by any person who is not a citizen of the United States.

Receivers and trustees included.

"(d) The provisions of this Act shall apply to receivers and trustees of all persons to whom the Act applies, and to the successors or assignees of such persons."

MEMORANDUM

To: Committee members

From: Committee staff

Re: SJR 26 Background information

This afternoon, the committee is scheduled to take up SJR 26, which represents the next logical step in the process begun by SB 141. As the members will recall, SB 141 would require the State to relinquish its right to certain highway rights-of-way created by the federal government through a series of public land orders (PLOs) in the late 40s and 50s.

After two hearings in this committee, it became apparent that the administration was totally opposed to the concept of relinquishment, partly because the Federal Highway Administration (FHWA) had indicated that it would not participate in funding to repurchase the rights-of-way. SJR 26 asks that Congress direct the Department of Transportation through FHWA to participate in this funding.

When the committee last heard SB 141, FHWA presented a comparison of the differences they saw between PLO rights-of-way, and those created by the Act of 1947 (later extinquished). Their interpretation - that the PLO rights-of-way are not precipitated on the 1947 Act - is also that of the State Supreme Court and of DOT/PF, but it is substantially different from that of the proponents of SB 141. They contend that the PLOs were issued by the Interior Department to clarify and define the rights-of-way reserved under the 1947 Act. The Supreme Court disagreed with this interpretation, maintaining that the PLO's were authorized by an Act of 1932, which gave the Interior Department general road-building and maintenance powers in Alaska.

The attached material contains correspondence researched after the court decision, which generally supports the contention that the Alaska Road Commission did not have adequate right-of-way reservation powers, based upon the 1932 Act, and therefore needed the 1947 Act and its consequent PLOs.

For further background on this issue, the members are asked to refer to their files on SB 141.

Dept. of Transportation & Public Facilities

Position Paper

BILL NO: Senate Joint Resolution No. 26

TITLE: Relating to the payment of just compensation to landowners for certain rights-of-way across land in Alaska

APPROVED: R. J. Knapp
Commissioner

DATE: 5-1-85

The Department of Transportation and Public Facilities has objected and will continue to object to the concept of the State purchasing rights-of-way which were granted to the State of Alaska by the Federal government for highway purposes.

The Department has no objection, however, to the intent of S.J.R. No. 26 providing that funds made available for this purpose do not come out of the annual apportionments for Federal-aid highways in Alaska.

For further information call Susan Fleischhauer at 465-3900.

UNITED STATES

DEPARTMENT OF THE INTERIOR

GENERAL LAND OFFICE

WASHINGTON

IN REPLY PLEASE REFER TO

☞ 1751330 "F"

JAN 20 1939

The Director,

Division of Territories and Island Possessions.

My dear Dr. Gruening:

Referring to your memorandum under date of December 17, 1938, relative to proposed reservations for the construction of roads, bridges, and trails in the Territory of Alaska, I will be glad to confer with you or your representatives at any time you may so desire.

There is apparently no authority for the issuance of an Executive order for the purpose of imposing a road reservation upon any land in the Territory which may hereafter pass into private ownership, and I am not certain that it would be necessary or advisable to recommend the enactment of legislation for such purpose.

Section 2477, U. S. R. S., provides: "The right-of-way for the construction of highways over public lands, not reserved for public uses, is hereby granted." No action on the part of the Government is deemed necessary to the operation of this statute. This grant becomes effective upon the construction or establishing of the highway in accordance with the State or Territorial laws. No reservation for rights-of-way so acquired is included in the patent when issued for the lands affected. (26 L. D. 446).

The acts of January 27, 1905 (33 Stat. 616), and May 14, 1906 (34 Stat. 192), incorporated in sections 321 to 337 inclusive, of Title 48 U. S. C., provides for the construction and maintenance of roads, trails, and bridges, by the board of road commissioners. A reservation for rights-of-way for roads constructed in pursuance of the provisions of these statutes, may be inserted in patents for the

Rec'd for files
after 1-14-1939

JOHNSON 1939

lands affected, upon the filing of profile maps showing the location of the road in accordance with instructions of the Department of July 8, 1930.

Section 17 of the act of November 9, 1921 (42 Stat. 212), provides for the granting of public lands or reserved lands of the United States for Federal Aid Highways. Grants under this statute may be acquired by the filing of maps in accordance with the regulation thereunder and the approval of such maps by the Secretary of the Interior. A reservation for rights-of-way acquired under this statute is incorporated in the patent issued for the lands affected.

The width of the rights-of-way which may be acquired under the above-mentioned statutes is not specified. The width of rights-of-way established under section 2477 is governed by the laws of the States or Territories (22 L. D. 145). The width of rights-of-way for roads or highways established or constructed under the provisions of the acts of January 27, 1905, and May 14, 1906, or acquired under section 17 of the Federal Aid Highway Act of November 9, 1921, would seem to be a matter of discretion as to what is deemed reasonably necessary for the construction and proper maintenance of the particular road or highway and governed by the width as surveyed and shown on the profile maps, the maps being evidence of the right-of-way and the basis for insertion of the reservation in any subsequent patent for the lands affected.

With respect to the illustrations given in the correspondence accompanying your letter, it appears quite certain that neither an Executive order nor legislation could afford any relief. In other words, a right-of-way over an area which is embraced in an entry, legally initiated and maintained according to law, is either by agreement with the party having the entry or through condemnation proceedings.

The correspondence accompanying your letter indicates that you are familiar with the instructions issued by the Department on July 8, 1930, in regard to the inclusion of reservations for roads constructed by the Government in all cases where rights of persons seeking to acquire title to any of such lands were initiated subsequent to the construction of the road. In order to put into effect those regulations, this Office must be furnished with maps and field notes of all constructed roads as well as those hereafter completed, so prepared as to make it possible to have proper notes placed on the tract books and adequate reservations inserted in patents. As is

also indicated by your correspondence, this matter was called to the attention of the Secretary of War by the Department on September 3, 1930, but up to this time no maps or field notes pertaining to constructed roads or roads hereafter to be constructed have been received in this office.

We shall be glad to go into these matters more fully in the conference that you have proposed.

The enclosure accompanying your letter is returned herewith.

Very truly yours,

Commissioner.

Enclosure.

The President of the Senate,

United States Senate,

a/12-10, 1940

Sir:

I enclose a draft of a bill "To amend an act entitled 'An Act providing for the transfer of the duties authorized and authority conferred by law upon the board of road commissioners in the Territory of Alaska to the Department of the Interior, and for other purposes', approved June 30, 1932".

The purpose of the proposed legislation is to protect the interests of the United States in constructing roads in the Territory of Alaska by providing a right-of-way on lands, now public domain, to which patents may in the future be issued.

The Alaska Road Commission, operating under the Department of the Interior by virtue of the Act approved June 30, 1932 (47 Stat. 446), and financed by Federal appropriations, is engaged in the construction and maintenance of roads, roadways, highways, tramways, trails, bridges, and other similar works in that portion of Alaska outside the national forests. The greater part of the area on which the operations of the Alaska Road Commission are conducted is public domain, and the location of rights-of-way on such lands presents no problem growing out of private ownership. For the proper location of the road and in the interest of public service it is necessary in some cases, however, to cross lands to which title has passed from the United States. These instances are becoming more numerous as the population of the Territory increases. Obtaining rights-of-way across privately owned lands has in a number of cases presented difficulties calling for court action and requiring the expenditure of Federal funds.

It is proposed, therefore, that in all patents for lands hereafter taken up in the Territory there shall be inserted a provision reserving to the Government a right-of-way for roads, roadways, highways, tramways, trails, bridges and appurtenant works or structures constructed or to be constructed by the authority of the United States. A provision accomplishing this may, it is thought, be inserted as an amendment to Section 2 of the Act approved June 30, 1932, supra., and the draft of the bill which I transmit has been written

ICKES 1940

accordingly. The proposed amendment is similar to the provision of the Act of August 30, 1890 (26 Stat. 391), which reserved rights-of-way for canals on lands west of the one hundredth meridian and is also similar to the provisions of the Act of March 12, 1914 (38 Stat. 305), in which rights-of-way for railroads were reserved to the United States in all patents for lands thereafter taken up in the Territory of Alaska.

The Director of the Bureau of the Budget has informed me that there is no objection to the presentation of the proposed legislation to the Congress.

Very truly yours,

(Sgd.) Harold L. Ickes

Secretary of the Interior.

PWG:abc.

Enclosure 1446881.

UNITED STATES
DEPARTMENT OF THE INTERIOR
OFFICE OF THE SECRETARY
DIVISION OF TERRITORIES AND ISLAND POSSESSIONS
WASHINGTON

February 4, 1943.

MEMORANDUM for Mr. Thoron:

The following is an outline of the background in this matter:

The purpose of the proposed legislation is to protect the interests of the United States in constructing roads in the Territory of Alaska by reserving a right-of-way on lands, now public domain, to which patents may in the future be issued.

The Alaska Road Commission, operating under the Department of the Interior by virtue of the Act approved June 30, 1932 (47 Stat. 446), and financed by Federal appropriations, is engaged in the construction and maintenance of roads, roadways, highways, tramways, trails, bridges, and other similar works in that portion of Alaska outside the national forests. The greater part of the area on which the operations of the Alaska Road Commission are conducted is public domain, and the location of rights-of-way on such lands presents no problem growing out of private ownership. For the proper location of the road, and in the interest of public service, it is necessary in some cases, however, to cross lands to which title has passed from the United States. These instances are becoming more numerous as the population of the Territory increases. Obtaining rights-of-way across privately-owned lands has in a number of cases presented difficulties, calling for court action and requiring the expenditure of Federal funds.

A case of this kind occurred two or three years ago in connection with the construction of a bridge across a stream adjoining a certain privately-owned mining claim. The owner of the land claimed that his property was very valuable because of a placer gold mine, and asked an exorbitant price for the right-of-way necessary in connection with the construction of the bridge. This resulted in considerable delay and expense. As a consequence of this and other like instances, the Alaska Road Commission, the Governor of Alaska, and Mr. Parks, the Cadastral Engineer of the Land Office, became convinced that legislation to reserve rights-of-way in future patents of land taken from the public domain, is desirable.

In response to a request from the Road Commission, the proposed legislation was drafted in this Division and submitted to the Department for consideration. It was discussed at a meeting of the Department Legislative Committee, which did not approve favorable action on the bill, presumably because of questions raised in the meeting as to whether legislation of this kind would not have a tendency to retard settlement in Alaska. Suggestion was also made that the bill should provide for payment of damages to crops and improvements on rights-of-way when

HAMPTON 1943

utilized by the United States. Such a provision is included in the most recent draft of the bill. As stated in Mr. Page's memorandum of September 18, apparently it was the opinion of the Legislative Committee that the bill was not of sufficient importance to justify its submission to Congress at that time, as such action might have resulted in deferring more urgent Alaska legislation which the Department proposed to submit.

In view of the foregoing, the bill was not submitted to the last session of Congress, and apparently it is again up for consideration in connection with the legislative program of the Department for the present session.

Ruth Hampton,
Assistant Director.

AFG
WHD

Colonel John Noyes
Commissioner of Roads
Alaska Road Commission
Juneau, Alaska

Dear Colonel Noyes:

Reference is made to the letter from Mr. Ike P. Taylor, Chief Engineer, Alaska Road Commission, dated July 28, 1948, in which he states in reference to our memorandum of July 25, that:

> "One print each of the plans of all the new roads we have located in the past few years have been forwarded to your Office. Please advise if it is now necessary for the Alaska Road Commission to submit three additional prints of these maps to the District Land Offices concerned with the written application, as outlined in your memorandum.
>
> "For your information, the plan maps of our road locations are on a scale of 400 feet to the inch and one print to cover a road location such as that, for instance, from the Forest Boundary to Homer on the Kenai Peninsula, 129 miles, would require approximately 320 square feet of blueprinting. The three sets required in your memorandum would total approximately 1,000 square feet."

An examination has been made of the more recent maps of highways filed by the Alaska Road Commission, namely, those of the Fairbanks-Chena Hot Springs, Paxson-McKinley Park, and the Forty Mile roads. These maps are excellent for general information, but they do not show the width or the lateral limits of the right-of-way with relation to the legal subdivisions of the public lands where surveyed. The maps are therefore incomplete for the purpose of notation of the tract book records under departmental instructions of January 13, 1916 (44 L.D. 513), as contemplated by our memorandum of July 25, 1949. Unless the lateral limits are shown, where the lands are surveyed, it cannot be definitely determined, for the purpose of posting, what subdivisions are affected.

As stated by Mr. Taylor, the maps in question are prepared on a scale of 400 feet to the inch. For your purposes these are excellent work scale maps, but for use in district land offices they pose a difficult problem of filing and handling, and the general scale as provided in the Department's rights-of-way

24/226

PUCKETT 1949

regulations (43 CFR, Parts 244 and 245) is 1000 and 2000 feet to the inch. If this scale is adopted by the Alaska Road Commission, it would reduce the length and size of the maps and effect a considerable saving in filing space.

We greatly appreciate your sending some of your work maps which have been used in connection with land classification work. These, we believe, are not in the form that can be efficiently used for filing in the District Land Offices.

In connection herewith, attention is called to the act of June 30, 1932 (47 Stat. 446, 48 U.S.C. Sec. 321a, seq.), under which the Alaska Road Commission is authorized to construct roads and highways over public lands in Alaska. This act contemplates that maps of definite location of roads so constructed shall be filed with the Bureau of Land Management. Obviously, the authority to construct roads as provided by the act, necessarily, by implication if not otherwise, authorizes the right to appropriate the rights-of-way for such roads. It is therefore believed that if the maps of the rights-of-way for the roads and highways constructed or established under authority of the 1932 act, showing the width of the rights-of-way appropriated, were filed and recorded in the District Land Office, in accordance with instructions of January 13, 1916 (44 L.D. 513), that the Government's rights in and to the roads and rights-of-way would be amply protected under the act as well as R.S. 2477 (43 U.S.C. Sec. 932), without the necessity of any withdrawals.

Very truly yours,

Lowell M. Puckett

Lowell M. Puckett
Regional Administrator

AB/fp

UNITED STATES
DEPARTMENT OF THE INTERIOR
ALASKA ROAD COMMISSION
JUNEAU, ALASKA

December 1, 1949

Mr. James P. Davis, Director
Division of Territories and Island Possessions
Department of the Interior
Washington 25, D. C.

My dear Mr. Davis:

At a recent meeting with Mr. Lowell Puckett, Regional Administrator, Bureau of Land Management, the method of handling withdrawals or reservations for roads rights-of-way was fully discussed.

The immediate problem is our deficiency in accurate maps of old roads which are required by the District Land Offices in connection with locating entrymen and in issuance of patents.

It was brought out by Mr. Puckett that because of the language of Public Land Order 601, all entries in surveyed areas affected by a road must be limited to one side only of the existing road. This is because the order used the word "withdrawn" and the Bureau of Land Management has ruled that no new entry can be made covering noncontiguous areas. One solution of the problem has been proposed by Mr. Puckett to his Washington office. Under Land Decisions Volume 43, page 551, it was held that a right-of-way withdrawal did not render the tracts lying on opposite sides of the withdrawn strip non-contiguous, and an entry embracing both sides of such strip should be allowed. I desire to strongly support Mr. Puckett's request and urge favorable consideration. Application of this decision would avoid much present confusion. By the time entrymen apply for patents in future, it is planned to have available in the District Land Offices accurate maps of our roads.

We believe the best solution of this problem would be a revision of Public Land Order 601 to change the language to read "are hereby reserved from all forms of appropriation". This language would be in accordance with the act of July 24, 1947 (Pub. Law 229, 80th Cong., 1st Session, 48 U.S.C., 1946 Ed., Supp. 1, 321D). It is our contention that this law was intended to avoid the difficulty of determining for each entry or patent the exact location of the road. The act provides in part:

"In all patents for lands hereafter taken up, entered, or located in the Territory of Alaska, and in all deeds by the United States hereafter conveying any lands to which it may have

NOYES 1949

reacquired title in said Territory not included within the limits of any organized municipality, there shall be expressed that there is reserved, from the lands described in said patent or deed, a right-of-way thereon for roads, roadways, highways, tramways, trails, bridges and appurtenant structures constructed or to be constructed by or under the authority of the United States or of any State created out of the Territory of Alaska."

It will be noted the act provides for a blanket reservation for rights-of-way for roads constructed or to be constructed. It is our contention that determination of the exact location of a road now existing through an entry made after the date of approval of the act is not necessary. The history of the bill indicates this was one of the specific difficulties to be corrected. The other was to avoid the necessity of obtaining easements for future roads which obviously could not be described in the patent.

The actual width of right-of-way to be reserved is determined by the class of road. It is believed Public Land Order 601 was primarily intended to establish these widths. With this information in the District Land Offices, entrymen or applicants for patent can be informed of the width of right-of-way in each case. It is probable certain roads will be reclassified in the future, in which case the right-of-way width would be changed. It is recommended favorable consideration be given to a revision of Public Land Order 601 to permit the Alaska Road Commission full latitude of operation under Public Law 229.

Sincerely yours,

John R. Noyes
Commissioner of
Roads for Alaska

cc: Mr. Puckett

UNITED STATES
DEPARTMENT OF THE INTERIOR
BUREAU OF LAND MANAGEMENT
Anchorage, Alaska

April 3, 1952

Mr. Ivander C. Smith
Box 2068
Anchorage, Alaska

Dear Mr. Smith:

By letter of March 29, you asked me to define the maximum legal right-of-way to which the Alaska Road Commission is entitled in those instances where entry was made and residence established prior to the construction of the road, and where subsequent patent contains no provision for road right-of-way.

We are unable to determine that there was a definition of the widths of rights-of-way by regulation or statute prior to Public Land Order 601 of August 10, 1949. Any legal settlement upon the land or filing made upon the land prior to August 10, 1949, on which legal occupancy and filing was carried through to consummation, rendered Public Land Order 601 inoperative, and no claim to a width of right-of-way as defined in Public Land Order 601 can be valid, in our opinion.

The act of July 24, 1947, 61 Stat. 418, 48 U.S.C., Sec. 321d, provided for the reservation of right-of-way for roads in patents and deeds on lands, the rights to which were inaugurated after the effective date of the act. This act did not, however, specify the widths of the rights-of-way.

It would appear that the acquiring of road rights-of-way before July 24, 1947, had been done by amicable agreement or condemnation.

Chapter 19, Session Laws of Alaska 1923, Section 1721, reserved a strip between sections 4 rods wide for public highways with the section line being the center of such highway. However, the 1923 law is listed as invalid in the new Alaska Code and we have been advised by the Attorney General that it is considered that this act is in fact invalid. I know of no test case that has been brought to test the validity of the law.

PUCKETT 1952

I understand that the legislature, at its last session, passed a law designating certain section lines on lands owned by the Territory as highway rights-of-way. Perhaps you are more familiar with this act than I.

I am uncertain as to the origin of the adoption of 66 feet as the standard width of right-of-way in Alaska prior to the promulgation of Public Land Order 601. Public Land Order 601, which together with Order No. 2665, enclosed, have established widths of rights-of-way for highways in Alaska.

Very truly yours,

Lowell M. Puckett

Re: 1947 Act Lands
00-302

Mr. Francis C. Turner
Federal Highway Administrator
Federal Highway Administration
Nassif Building
400 7th Street, S.W.
Washington, D.C. 20591

THROUGH: Mr. H. G. Tipton
Division Engineer

Dear Mr. Turner:

Reference is made to Mr. Tipton's memorandum of February 12, 1971, concerning participation of federal funds in the 1947 Act lands acquired prior to December 31, 1970. Mr. Tipton's memorandum is in response to our appeal of January 23, 1968, appealing your previous decision of June 30, 1967.

Perhaps a brief history of the 1947 Act reservation and how the reservation was exercised by the State of Alaska would help put our position into perspective.

Prior to the years of World War II, the Territory of Alaska experienced little road construction work. Much of the activity of the Alaska Road Commission and its predecessors was conducted across the public domain and required minimal right of way acquisition. A marked increase in population in the years following the war and a related increase in activities designated to reduce public lands to private ownership increased the frequency with which right of way was necessitated over lands to which title had passed from the United States.

In recognition of this trend and in an attept to reduce the expenditure of governmental funds, Congress passed the 1947 Act effective July 24, 1947.

The effect of this Act was to reserve to the United States or to any State created out of the Territory of Alaska a right of way across lands subsequently passing into private ownership and to thus avoid the necessity of re-acquiring lands for future road construction.

CAMPBELL 1971

The 1947 Act was repealed by Congress effective July 1, 1959. Thus, lands entered or patented after that date are not subject to the act. Title of lands entered or patented from July 24, 1947, to July 1, 1959, continued to remain clouded with the prospect of future road construction causing arbitrary transfers of unspecified portions of said land to the government, without due process or compensation, until April 14, 1966.

It is our position that the 1947 Act did in fact entitle the State of Alaska to utilize the right of way reserved by the act. Specific conveyance to the State at the time of statehood was not necessary because Congress specifically prescribed in the act that the reservation was to be extended to the newly created State of Alaska. The rights of the Federal Government in the 1947 Act rights of way passed to the State at the time of statehood.

The fourth session of the Alaska State Legislature, recognizing the inequalities of the 1947 Act, passed legislation effective April 14, 1966, commonly called the Alaska Right of Way Act of 1966, providing that no agency of the State may take privately owned property by the exercise of the 1947 Act reservation. The legislature's stated purpose was as follows, and I quote:

> "This Act is intended to alleviate the economic hardship and physical and mental distress occasioned by the taking of land, by the State of Alaska, for which no compensation is paid to the person holding title to the land. This practice has resulted in financial difficulties and the deprivation of peace of mind regarding the security of one's possessions to many citizens of the State of Alaska, and which, if not curtailed by law, will continue to adversely affect citizens of this state. Those persons who hold title to land under a deed or patent which contains a reservation to the state by virtue of the Act of June 30, 1932, ch 320, sec. 5, as added July 24, 1947, ch. 313, 61 Stat. 418, are subject to the hazard of having the State of Alaska take their property without compensation because all patents or deeds containing the reservation required by that federal act reserve to the United States, or the state created out of the Territory of Alaska, a right of way for roads, roadways, tramways, trails, bridges, and appurtenant structures either constructed or to be constructed. Except for this reservation the State of Alaska, under the Alaska constitution and the constitution of the United Sta :, would be required to pay just compensation for any land taken for a right of way. It is declared to be the purpose of this act to place persons with land so encumbered on a basis of equality with all other property holders in the State of Alaska, thereby preventing the taking of property without payment of just compensation as provided by law, and in the manner provided by law."

Subsequent to the enactment of the Alaska Right of Way Act of 1966 the Bureau of Public Roads advised us "that there can be no federal reimbursement for funds expended by the State of Alaska for the acquisition of right of way from land subject to the reservation contained in the 1947 Act." They also stated it would take federal legislation to effectively repeal the reservation.

In response to that statement the late Senator E. L. Bartlett introduced, (for himself and Senator Gruening) Senate Bill 2483 on September 28, 1967. Senator Bartlett's introductory remarks outlined the position of Alaskans affected by the 1947 Act and I quote his remarks from the Congressional Record of the Senate for September 28, 1967:

> "In 1947 Congress enacted a law -- 48, United States Code 321d -- which reserved an undefined highway right of way in all patents for federal public lands in Alaska. This law, commonly referred to as the 1947 Act, has become notorious in Alaska. While seemingly innocuous, the 1947 Act has worked inequities beyond belief as homesteads and other patented lands fall in the paths of urban development and highway improvement projects.
>
> Although the 1947 act was repealed in 1959, all of those persons who received patent to federal lands between 1947 and 1959 still live under the threat that a portion of their land might be taken for highway right of way purposes at any time without compensation. As a matter of fact, a substantial number of rights of way have already been acquired under the 1947 act without compensation to the landowners and many rights of way over such lands will undoubtedly be acquired in the foreseeable future.
>
> The State of Alaska has found a way to compensate patentees for takings under the right of way provision but the Federal Highway Administration refuses on legal grounds to pay the federal share of such compensation.
>
> Mr. President, it is my firm belief that no one could have foreseen the inequities inherent in passage of the 1947 Act. It is also my belief that corrective action is overdue. Therefore, I introduce today for appropriate reference a bill which would vacate and relinquish the reservation of rights of way authorized by the 1947 Act."

Hearings scheduled on Senator Bartlett's bill were cancelled first because of the assassination of Dr. Martin Luther King, Jr., and second because of the assassination of Senator Robert F. Kennedy.

Senator Bartlett's untimely death and Senator Gruening's unsuccessful bid for re-election made it necessary to reintroduce S. 2483. Senator Stevens graciously did this on February 7, 1969.

Alaska's Right of Way Act of 1966 voided the State's rights to utilize right of way over lands subject to the 1947 Act; Section 138(b) of the Federal-Aid Highway Act of 1970 vacated and relinquished reserved rights of way not utilized and provided that the reservation merged with the fee and was forever extinguished. We believe it was the intent of Congress to "clear the federal books" by the "housekeeping" Section 138(b) of the Federal Aid Highway Act of 1970 with their full realization that the State of Alaska had extinguished the 1947 Act reservation on April 14, 1966, as it had every right to do.

Unforeseen tragedies delayed Federal action several years causing State expenditures to climb past a million dollars. It was clearly Senator Bartlett's intent in introducing S. 2483 to allow Federal participation in the acquisition of "47 Act" right of way from the April 14, 1966, date.

Acquisition of right of way by the State of Alaska over lands subject to the 1947 Act subsequent to April 14, 1966, was made in accordance with all of the policies and procedures of the Bureau of Public Roads and subsequently the Federal Highway Administration. The rights of way so acquired were incorporated in federal-aid highway projects and therefore should be eligible for federal participation in their acquisition costs.

We respectfully request your further review of your June 30, 1967, and February 12, 1971, decisions and reversal of those decisions to allow federal participation in the acquisition costs of the lands in question.

Very truly yours,

for B. A. Campbell
Commissioner of Highways

Re: Federal Highway Rights-of-Way

Dear Don:

Enclosed you will find copies of correspondence which I have sent to Senators Stevens and Murkowski concerning an extremely serious problem in Alaska. I believe the informational letter to Senator Murkowski and its attachments are self-explanatory.

Once you have had an opportunity to review this, I will be contacting you to ask your support in stopping the State from harming not only our clients, the title insurance industry, but the thousands of Alaskans Statewide who do not have title insurance, many of whom are the original patentees.

Sincerely,

GROH, EGGERS & PRICE

Re: Federal Highway Easements in Alaska

Dear John:

Thank you for meeting with us during your visit last week in Alaska. It was a pleasure having the opportunity to meet you and we look forward to our future contact. As we discussed, we are presently embroiled in an extremely serious controversy for which we are seeking the aid of the Alaska Congressional Delegation. This letter and its enclosures will assist you in your preliminary investigation into this matter. At your earliest convenience, we would like to discuss the possibility of the introduction and passage of our proposed federal legislation with you, and the other members of the Alaska Congressional Delegation.

As you may recall from our meeting, the difficulty lies in the interpretation of a series of public land orders (PLOs) and department orders (DOs) which were issued by the Department of Interior in the late 1940's and early 1950's. Up through 1947 there existed two methods by which the Federal Government could create highway rights-of-way in Alaska. The first was a 1932 Act which was codified at 48 U.S.C. §321a through §322.1/ Pursuant to that Act the Department of Interior had the right to build and construct roadways in Alaska. Additionally, under 44 L.D. 513 the Department of Interior determined that the Federal Government had the right to establish a roadway by appropriation. That is,

---

1/ A copy of this legislation is attached and identified as Exhibit A. Also attached are the other relevant materials identified as discussed in this letter.

a combination of identifying a potential highway plus the allocation of specific funds from Congress was sufficient to reserve the right in the Federal Government to build the road.

In 1947, Congress, at the urging of the Department of Interior passed an amendment to the 1932 Act which was codified at 48 U.S.C. §321d. (Exhibit B.) Under 48 U.S.C. §321d the Department of Interior was required to place in every patent for land in Alaska taken up thereafter a reservation for a road right-of-way for the Federal Government. It is our opinion that the amendment in 1947 was designed to protect the Federal Government's interest in maintaining the right to build roads into those portions of Alaska which were being taken up by homesteaders and which were not yet subject to a 43 U.S.C. §932 section line dedication or a roadway established by appropriation under 44 L.D. 513. It also served the function of consolidating the power of the Department of Interior under the Act of 1932 by specifically requiring that the reservation be put in the patent so that settlers would be on notice.

In August of 1949, the Department of Interior under PLO 601 withdrew from all forms of appropriation certain rights-of-way for highways in Alaska. (Exhibit C.) Under PLO 601 highway widths of varying amounts were established for through, feeder and local roads. The "local" roads were never identified by name which causes particular problems.

Considerable controversy arose over the fact that PLO 601 was a withdrawal rather than the establishment of an easement or right-of-way. Consequently the Department of Interior published modifications of PLO 601 which culminated in the publication of DO 2665. (Exhibit D.) DO 2665 established easements in lieu of rights-of-way.

In the introductory language of DO 2665 the Secretary of the Interior indicated that he was publishing the order pursuant to 48 U.S.C. §321a. It is our belief that the authority cited by the Secretary deals with only the construction powers under the 1932 Act and must be viewed in the light of the 1947 Amendment which required that such easements and rights-of-way be reserved in the patents. However, it is this one "authority section" which has allowed the Alaska Supreme Court to circumvent both the Alaska and Congressional bills designed to eliminate these easements.

None of the withdrawals and easements created by PLO 601 and its successors including DO 2665 were noted in the patents of homesteaders in Alaska, although, all of the patents which were issued for lands taken up after 1947 contain the reservation required by the 1947 Act and 48 U.S.C. §321d. (Exhibit E, for example.) Further, at least in regard to local roads, there was no identification of the roads or of any record by which a homesteader or other interested individual could determine if his property was effected by such a right-of-way.

In 1959 the United States government quitclaimed its interest in the roads in Alaska to the State. The quitclaim deed does not specifically address the question of whether the Federal Government intended to pass its rights-of-way and reservations under the PLOs and DO 2665. The State of Alaska did not record its quitclaim deed until 1969 and it is impossible by referencing the quitclaim deed to determine whether any given parcel of land in Alaska was affected by the withdrawals or easements for roads.

In the mid 1960's concern over the possibility of the State taking land under the federal easements and rights-of-way surfaced and the State Legislature passed the Right-of-Way Act of 1966 (Exhibit F.) The 1966 Act states that "no agency of the state may take privately-owned property by the election or exercise of a reservation to the state acquired under the Act of June 30, 1932, ch. 320 §5, as added July 24, 1947, ch. 313, 61 Stat 418, and taking of property after the effective date of this Act by the election or exercise of a reservation to the state under that federal act is void."

The Federal Government also attempted to alleviate the unfairness of the federal reservations and easements for rights-of-way in patents issued to Alaskans between 1947 (the date of the Amendment of the 1932 Act) and 1959 (Alaska Statehood). Section 138(b) of the Federal-Aid Highway Act of 1970 states:

> Any right-of-way for roads, roadways, highways, tramways, trails, bridges and appurtenant structures reserved by section 321(d) of Title 48, United States Code (61 Stat. 418, 1949), not utilized by the United States or by the State or Territory of Alaska prior to the date of enactment hereof, shall be and hereby is vacated and relinquished by the United States to the end and intent that such reser-

> vation shall merge with the fee and be forever extinguished.

Unlike the State Right-of-Way Act, the federal legislation does not specifically indicate that it includes all reservations and easements created under the 1932 Act as Amended by the 1947 Act. However, we believe that that proposition is clear, that the 1947 Act was an Amendment to the 1932 Act which created an obligation on the part of the Federal Government to place in the patent a reservation for highway purposes. We have enclosed testimony by both Senator Stevens and State officials which clearly indicate that the State would not be taking the rights-of-way in the future. (Exhibit G.)

The State of Alaska however decided that since the PLOs state they were promulgated under the general authority of the Secretary of Interior and the DO 2665 was "apparently" promulgated under 48 U.S.C. §321a (the 1932 Act) they would attempt to take property despite both the State and Federal Acts designed to end the uncertainty and unfairness which had resulted from the creation of such easements and rights-of-way.

In a case which ultimately reached the Alaska Supreme Court entitled State v. Alaska Land Title Association, 667 P.2d 714 (Alaska 1983) (Exhibit H), the Alaska Supreme Court determined that the original withdrawals by PLO 601 culminated in the rights-of-way described in DO 2665. The Court further found that DO 2665 was published pursuant to 48 U.S.C. §321a. The Court determined that 48 U.S.C. §321a was a separate source of power for the Secretary of Interior to create easements from that identified in 48 U.S.C. §321d. That is, the court refused to recognize that the 1947 Act's purpose was to amend the 1932 Act to require that any easement created by the Secretary of Interior under the 1932 Act be placed on the patent.

The court went further to find that the Right-of-Way Act of 1966 passed by the Alaska Legislature applied only to the 1947 Act. This is in contradiction to the clear language of the 1966 Act. As noted earlier the Federal-Aid Highway Act of 1970 §138(b) can be on its face interpreted as applying only to the 1947 Act. Therefore, since the Alaska Supreme Court had already interpreted the 1947 Act as being separate from the 1932 Act the Federal-Aid Highway Legislation was ineffective.

It is interesting to note that the court did allow the one homeowner who is not protected by title insurance to prevail. In

that instance the court found that if the homesteader had entered the property prior to the date of the promulgation of PLO 601 (August 10, 1949) then PLO 601 would not be effective against him. The State has challenged this proposition and believes that a homesteader would not prevail against PLO 601 until the date he received his final certificate, usually significantly later in time from entry. There are currently two cases pending before the Alaska Supreme Court which will address this issue.

The State of Alaska has taken the position that it inherited the Federal Government's rights to the easements and rights-of-way under the PLOs pursuant to the quitclaim deed of 1959. They are further taking the position that even if a road had not been constructed at the time of the PLOs or had been subsequently moved, the State has the right to take the property without payment. The greatest difficulty with defending against this form of arbitrary action is that the PLOs and DOs do not specifically identify where a road is located on an entryman's property.

Additionally, the average landowner has no warning of the existence of a road. Since a significant number of individual homeowners do not have title insurance on their property, they are completely unprotected against the actions of the State. The State has further shown itself to be callous to the rights of such landowners by simply taking their land even in cases where their property would not be subject to the PLO due to entry prior to the effective date of PLO 601. Also, because the State does this on an as needed basis, there is no opportunity for homeowners to be appraised of the problem in advance. Only at the time the State finally determines that it will expand the highway does the homeowner learn that his property is to be taken and even then the only outcry is among a few owners along the proposed road expansion. Thus, the problem goes on without the property owners in Alaska having an opportunity to face the issue all at once.

The problem also extends to title insurance companies. Although contrary to prior decisions in other jurisdictions and the language of Alaska statutes, the Alaska Supreme Court has determined that publication of PLOs in the Federal Register, although not recorded in the recording district, and not describing specific parcels of land are to be considered "public records" for the purposes of determining the meaning of such language in title insurance policies. Title insurance companies have suddenly found themselves to be exposed to a tremendous liability without having initially included such risks in the setting of their premiums.

All sides of the issue agree that potential liability for the cost of all the property which could be seized under the PLOs is in excess of one billion dollars over a long period of time. This is a staggering amount for title insurance companies to incur without having already built the risk factor into their rate setting. Thus, there is a potential threat to the viability of the title insurance industry in Alaska to provide homeowners, businesses and banks with title insurance on an on-going basis.

It is our opinion that federal legislation can be proposed which will provide for adequate protection for Alaskan landowners. We have enclosed a working draft of language for such federal legislation based upon Congress declaring that the utilization of such easements without compensation is a violation of due process under the Fifth Amendment as applied to the State by the Fourteenth Amendment. Our research indicates such an approach would withstand judicial scrutiny. See Fitzpatrick v. Bitzer, 427 U.S. 445 (1976); Katzenbach v. Morgan, 384 U.S. 641 (1965); Ramirez v. Puerto Rico Fire Service, 715 F.2d 694 (1st Cir. 1983) Equal Employment Opportunity Commission v. Elrod, 674 F.2d 601 (7th Cir. 1982).

I want to thank you very much for your assistance in this matter and, as we noted in our meeting, it is not a problem which apparently is going to go away. Hopefully, after your office has had the chance to review the documentary materials you, Senator Stevens and Congressman Young will assist us in this endeavor. Mr. Greg Chapados is working on the problem in Senator Steven's office and I am transmitting a copy of this letter to Congressman Young.

Please let me know if you have any questions and we look forward to hearing from you in the near future.

Sincerely,

GROH, EGGERS & PRICE

MEMORANDUM

To: Committee members

From: Committee staff

Re: SJR 26 Background information

This afternoon, the committee is scheduled to take up SJR 26, which represents the next logical step in the process begun by SB 141. As the members will recall, SB 141 would require the State to relinquish its right to certain highway rights-of-way created by the federal government through a series of public land orders (PLOs) in the late 40s and 50s.

After two hearings in this committee, it became apparent that the administration was totally opposed to the concept of relinquishment, partly because the Federal Highway Administration (FHWA) had indicated that it would not participate in funding to repurchase the rights-of-way. SJR 26 asks that Congress direct the Department of Transportation through FHWA to participate in this funding.

When the committee last heard SB 141, FHWA presented a comparison of the differences they saw between PLO rights-of-way, and those created by the Act of 1947 (later extinquished). Their interpretation - that the PLO rights-of-way are not precipitated on the 1947 Act - is also that of the State Supreme Court and of DOT/PF, but it is substantially different from that of the proponents of SB 141. They contend that the PLOs were issued by the Interior Department to clarify and define the rights-of-way reserved under the 1947 Act. The Supreme Court disagreed with this interpretation, maintaining that the PLO's were authorized by an Act of 1932, which gave the Interior Department general road-building and maintenance powers in Alaska.

The attached material contains correspondence researched after the court decision, which generally supports the contention that the Alaska Road Commission did not have adequate right-of-way reservation powers, based upon the 1932 Act, and therefore needed the 1947 Act and its consequent PLOs.

For further background on this issue, the members are asked to refer to their files on SB 141.

RE: Analysis, SJR 29

Senate Joint Resolution 29 is self explanatory and stems from the desire of the cities mentioned in its title to maintain jet service through the essential air service.

Included in your packet is a copy of the resolution, and correspondence between the City of Wrangell and the U.S. Department of Transportation regarding Wrangell's reasons for requesting that the proposal to allow Convair 880 aircraft (a propeller driven aircraft) be rejected.

Juneau, Alaska 99811

Dear Jack:

I am writing with regard to State Senate Joint Resolution 29, which requests the U.S. Department of Transportation to continue to require jet service to the communities of Cordova, Yakutat, Petersburg, Wrangell, and Gustavus, Alaska.

In the past, Senator Stevens, Senator Murkowski and I have been successful in maintaining subsidized jet service to Southeast Alaska. However, due to the tremendous fiscal pressures caused by Grahamm-Rudman the chances for maintaining this program beyond December 31, 1986, appear doubtful.

In the meantime, I will continue to consult with the Department of Transportation regarding the future of this program. Additionally, I will be available to discuss the subject with you in more detail when I travel to Juneau in February.

With best regards,

Sincerely,

DON YOUNG
Congressman for All Alaska

P.S. Jack Hope to see you in Juneau soon!

ADOPTED AUGUST 1972

CITY of WRANGELL, ALASKA

INCORPORATED JUNE 15, 1903

BOX 531, 99929 (907) 874-2381

July 5, 1985

Mr. John V. Coleman, Director
Office of Essential Air Service
U.S. Department of Transportation
400 Seventh Street South West
Washington, D.C. 20590

Dear Mr. Coleman:

As an addendum to the enclosed Civic Part Questionnaire, the following letter will explain in more explicit detail the importance of continued commercial jet service to the City of Wrangell.

Wrangell is a city of 2,376 people located on the northern tip of Wrangell Island in Central Southeast Alaska. There are no roads to Wrangell. It is accessible only by air or water. The entire economy of Wrangell is dependent on these two modes of transportation, relying heavily on commercial jet service, our only high speed access to the major markets of Anchorage, Juneau, and the lower 48 states. Most of the people coming to Wrangell, as a destination point, for business or pleasure, travel by commercial jet.

The majority of our fly-in tourist trade would be unable or unwilling to come here if the only means available was by light aircraft, either scheduled or charter, for a variety of reasons. Limited vacation time, cumbersome scheduling, inadequate seating and luggage space, high cost, or just plain fear of flying in a light aircraft. The loss of scheduled jet service would be devastating to the Visitor Industry of Wrangell.

The Fishing Industry relies heavily on scheduled jet service to transport their product to markets in the lower 48 states. Four of the five seafood processors located in Wrangell deal exclusively in fresh or frozen product that is shipped by air to select markets in the lower 48. Seafood is susceptible to rapid spoilage and rapid price fluctuation so it requires the speed, special handling, and reasonable freight rates that commercial jet service provides. Jet service enables our processors to ship their products and have them arrive on time, in edible condition, and at a feasible cost. Without this service, they would be severely handicapped in servicing their markets properly. They would face the distinct possibilities of customer dissatisfaction, loss of revenue, and plant closure. The resulting domino effect would cause a drastic decline in Wrangell's fishing fleet because many fishermen would be forced to move to other ports in order to sell their product and others who were unable to move could be forced out of business.

CITY OF WRANGELL, ALASKA

Timber, our major industry, is heavily reliant on commercial jet service for delivery of replacement parts, small equipment, executive travel, and outside technical help. A situation that would be considered a minor breakdown in the lower 48 where parts are readily accessible, could cause a shutdown at the Wrangell Mill for want of a small but essential part or the expertise of a specialist, if scheduled jet service was not available.

Wrangell's entire economy evolves around the ability to provide efficient transportation for the goods, services and people that are the life blood of our community. Therefore it is essential that the federal government continues their support of commercial jet operations into Wrangell to help assure the future economic survival of our City.

Sincerely,

William B. Privett, Major
City of Wrangell, Alaska

November 14, 1985

Senator Robert Ziegler
307 Bawden
Ketchikan, Alaska 99901

Dear Senator Ziegler:

Enclosed is a copy of Mayor Privett's letter to Mr. William C. Boyd, with accompanying pertinent correspondence.

We ask your continued support in our efforts to maintain our present level of commercial jet service. We are just now getting back to square one after the 1982-83 mill and cannery closures. If we are denied this vital transportation link to our markets, it will cause irreparable damage to our two major employers and the consequent loss of jobs would severely impact our economic base.

Sincerely,

Jim Gove
Economic Development Director

Enclosure

U.S. Department of Transportation
Office of the Secretary of Transportation

400 Seventh St., S.W.
Washington, D.C. 20590

October 29, 1985

Honorable William Privette
Mayor
P. O. Box 531
Wrangell, Alaska 99929

Dear Mayor Privette:,

By Order 85-5-89, the Department of Transportation requested carriers interested in providing essential air service to Cordova, Yakutat, Petersburg, Wrangell and Gustavus, Alaska, to file service proposals, with subsidy requests if necessary. The Department's request was prompted by the impending end of Alaska Airlines' rate term for serving these communities on September 30, 1985.

Essential air service for each point, as established by Civil Aeronautics Board Order 80-1-167, requires seven round trips per week with large aircraft (over 60 seats). Off-peak season service at Gustavus requires only two round trips per week with small aircraft (up to 10 seats). The designated hubs for essential air service are as follows:

Eligible Point	Designated Hub
Cordova	Anchorage
Yakutat	Anchorage or Juneau
Petersburg	Juneau or Ketchikan
Wrangell	Juneau or Ketchikan
Gustavus	Juneau

Order 80-1-167 stated that although a certain size of aircraft was indicated in the essential air service determinations for points in Alaska, the Board would be willing to rely on operations with different size aircraft to meet the essential air service requirements provided that the number of frequencies were adjusted accordingly to provide sufficient capacity.

With respect to Cordova, Petersburg, Wrangell, Yakutat and Gustavus, however, Congress has directed us to rely only on large aircraft to meet the essential air service requirements unless the state agrees to service with smaller aircraft. This Congressional requirement is effective through December 31, 1986. In view of this requirement, we requested proposals for the period October 1, 1985, through December 31, 1986.

We are writing to the State and the civic officials of each of these communities to advise them of the status of the case at this time and to request their positions and comments on certain issues, as discussed below.

We received proposals to serve all five communities from Alaska Airlines and SEAIR Alaska Airlines. Alaska Airlines proposes to continue to provide its existing service pattern with B-737 and B-727 aircraft. SEAIR proposes to provide service with Convair 580 aircraft, which would require the agreement by the State in order for us to consider it. SEAIR filed two proposals. The first proposal involves one daily round trip operated over a linear route, Anchorage-Cordova-Yakutat-Juneau-Petersburg-Wrangell and return. The carrier requests an annual subsidy of $577,620 for this proposal. SEAIR's second proposal involves turnaround service between Anchorage and Cordova; Juneau and Yakutat and Juneau and Petersburg/Wrangell. SEAIR requests an annual subsidy of $437,902 for this proposal. SEAIR's proposals do not indicate specific schedules for Gustavus. However, the carrier has indicated that it intends to serve the point.

SEAIR has indicated that it does not want to hold a rate conference unless the State agrees to considering service with the Convair aircraft. As a first issue, therefore, we have requested the State's position on whether or not we should consider proposals with this equipment. If the State agrees to consider SEAIR's service proposal, we would hold a rate conference with the carrier.

We have concluded a rate conference with Alaska Airlines for its proposal, and the carrier has agreed to provide the service outlined in its proposal through December 31, 1986, for an annualized subsidy rate of $1,973,000.

In the event that the State does not agree to consider SEAIR's proposal, we would appreciate receiving your comments on Alaska Airlines' proposal and subsidy request for our consideration in making a decision in the case. Upon receipt of your comments, we plan to submit a recommendation to the Assistant Secretary on Alaska Airlines' proposal and subsidy request.

If the State agrees to considering SEAIR's proposal, we would hold a rate conference with SEAIR and afford Alaska Airlines an opportunity to amend its subsidy request. Following the completion of those procedures, we would advise you of the final service and subsidy requests and ask for your comments on the final proposals.

In order to complete this case as expeditiously as possible, we would appreciate receiving your response by November 15, 1985. An original and five copies of your response should be sent to William C. Boyd, Chief, Service Analysis Division I, S-63, Department of Transportation, 400 7th Street, S.W., Washington, D.C. 20590. A copy of your comments should also be sent to each carrier. If you have any questions, please contact Bernard Calure of my staff at (202) 426-9813 or Dick Steinman of our Alaska field office at (907) 271-5146.

Sincerely,

William C. Boyd

November 13, 1985

Mr. William C. Boyd, Chief
Service Analysis Division I, S-63
United States Department of Transportation
400 Seventh Street South West
Washington, D.C. 20590

Dear Mr. Boyd:

In response to yours of October 29, 1985, requesting our position regarding the proposal from SEAIR Alaska Airlines, I am enclosing a copy of my original letter to Mr. John V. Coleman of your office. The letter, dated July 5, 1985, clearly outlines our position on the essential air service issue. All of the parties listed as receiving copies of the original letter have gone on record as supporting our position.

In your current correspondence you indicate that SEAIR proposes service with Convair 580 aircraft for daily round trip service from Anchorage to Wrangell and points in between. SEAIR's proposal, as outlined in your letter, gives me cause for great concern for a number of reasons.

There is no mention of service south to Seattle via Ketchikan or to other points in the lower 48. The Convair 580 has marginal passenger capacity for our peak seasons and would be totally inadequate to meet the freight demands of Wrangell, let alone the additional demands of cities to our north. This past year we shipped 600,000 pounds of seafood to markets in the lower 48 states plus an additional 200,000 pounds of miscellaneous freight and mail for a total of 800,000 pounds. An increase of approximately 375,000 pounds in a two year period. Wrangell Forest Products, our major employer, is dependent on commercial jet service to and from the lower 48 for parts, technical personnel and Pacific Rim customers. Eight thousand passengers arrived from the south in 1985, the majority of which were tourists.

Our economic survival hinges on adequate air service. If we are unable to properly serve our timber, fishing, and tourism industries,

it will cause an economic catastrophe. Please consider these points carefully during your negotiations.

Sincerely,

William B. Privett

Executive Summary

The United States and the Republic of Korea have long enjoyed cordial aviation relations. These important allies have worked together to create a procompetitive air market in which carriers from both countries can operate profitably. However, progress in U.S.-Korea aviation relations has recently been stymied by the reluctance of the U.S. to ratify the 1980 Memorandum of Understanding (MOU) between the two nations.

The Republic of Korea strongly desires ratification of its 1980 aviation agreement with the United States. It believes that the obstacles to implementation of that agreement have been removed and that conditions now exist which will allow an end to the current deadlock.

A series of air transport agreements between the U.S. and Korea have conferred significant advantages on U.S. carriers:

-- The U.S. has designated 14 carriers to serve Korea while Korea has designated one carrier to serve the U.S.

-- Currently, U.S. airlines operate between Seoul and fourteen U.S. points. In contrast, the Korean carrier is only allowed to serve three points in the U.S.

-- U.S. carriers presently have unlimited rights to serve points beyond Korea and in fact serve five such points. Korean Air Lines (KAL) is not authorized to serve any beyond points.

In addition to favorable route rights, U.S. carriers serving Korea enjoy automatic fare approval, unrestricted charter rights, and the largest amount of cargo space allocated to foreign carriers at Kimpo International Airport. These factors, coupled with the large volume of U.S. Government business, have enabled the three U.S. carriers to compete effectively in the Korean market and to derive substantial profits from their services.

Although Korea has closely cooperated with the U.S. on aviation matters, and in fact, was one of the first countries in the world to accept a procompetitive bilateral agreement, its right to provide service to the U.S. is far more restricted than other nations offering transpacific service. Taiwan, Thailand, the Philippines and Japan all enjoy greater route rights to the U.S. than Korea. Moreover, Korea's conciliatory attitude on fares, designation, and capacity issues stands in stark contrast to the experience of U.S. carriers in many European and Latin American nations.

The rights granted to Korea by the 1980 Memorandum of Understanding represent a reasonable expansion of its present authority to serve the U.S. In return for additional benefits

conferred on U.S. carriers, KAL will receive full traffic rights at Anchorage, and the same rights with respect to Chicago and Oakland. For the first time, the 1980 agreement also provides for beyond rights to a single point in Europe. KAL's expanded route rights under the 1980 MOU are comparable to the rights presently enjoyed by other Asian nations and still leave U.S. carriers with a significant edge over their Korean counterpart.

Furthermore, the rights granted to KAL are matched by greater benefits for U.S. carriers serving Korea. The terms of the 1980 MOU permitted U.S. carriers to construct a new cargo terminal at Kimpo International Airport for their exclusive use. Flying Tiger, the U.S. all-cargo carrier, expressed its intention to construct the Kimpo cargo facility, but requested several concessions from the Korean Government before doing so. The Korean side made each one of these concessions, including:

-- an increase in the agreed-upon size of the facility; and

-- an increase in the amortization period for the facility from the ten-year period specified by Korean law to a twenty-year amortization period.

After obtaining these concessions, Flying Tiger advised the State Department that it no longer objected to the "immediate implementation of each of the rights granted to the Korean designated air carrier" as specified in the 1980 MOU.

Flying Tiger never began construction of the new cargo terminal because it lacked the necessary financial resources to complete it. Instead, the Korean Government pledged its commitment to build the cargo facility and in fact, has already commenced its construction. Completion is scheduled for early 1986. Once the facility is finished, U.S. carriers will have the capability to self-handle all cargo at Kimpo, fully implementing Korea's commitments under the 1980 agreement.

While the terms of the 1980 MOU will have been met by the Korean side, there is no sign that the U.S. is prepared to ratify the agreement and implement its provisions. Thus, KAL will be denied the benefits promised by the agreement while U.S. carriers continue to enjoy their already significant advantages while receiving additional rights on top of that. Because the commitment of the Korean Government to construct the cargo terminal at Kimpo has mooted U.S. objections to ratification, it seems grossly unfair to further delay implementation of the 1980 agreement.

By signing the 1980 Memorandum of Understanding, the U.S. undertook a commitment to seek its ratification and adhere to its provisions. The U.S. should now prove as good as its word by ratifying and implementing the 1980 agreement.

ANCHORAGE TRAFFIC RIGHT FOR KOREAN AIR

1. Status of Traffic Right at Anchorage

a) Under the 1978 Memorandum of Understanding between R.O.K. and U.S.A., Korean Air has the right to operate to New York via Anchorage with stopover right at Anchorage.

b) Under the 1980 Memoradum of Understanding between the two countries, Korean Air was granted the right to operate to Anchorage. However, this Understanding has not been ratified so that the Anchorage right is not in force.

c) In 1983, Korean Air requested an exemption to provide air transportation between Korea and Anchorage. However, Korean Air's request was denied on the ground that the 1980 Memorandum of Understanding was pending.

2. Operating Status at Anchorage

a) Korean Air operates total 40 flights to New York and Los Angeles via Anchorage as a technical stop as follows ;

KE 018	Seoul - Anchorage - New York	6 flights per week
KE 017	New York - Anchorage - Seoul	6 flights per week
KE 015	Los Angeles - Anchorage - Seoul	4 flights per week
KE 098	Seoul - Anchorage - New York	6 flights per week
KE 097	New York - Anchorage - Seoul	6 flights per week
KE 084	Seoul - Anchorage - Los Angeles	5 flights per week
KE 083	Los Angeles - Anchorage - Seoul	5 flights per week
KE 082	Seoul - Tokyo - Anchorage - Los Angeles	1 flight per week
KE 081	Los Angeles - Anchorage - Tokyo - Seoul	1 flight per week

b) Korean Air also provides 3 round - trip passenger flights between Seoul and Europe via Anchorage as a technical stop with all flights.

... / 3. Needs

3. Needs of Direct Service between Korea and Anchorage

a) No direct passenger service of any kind is provided by any U.S. or foreign carriers between Korea and Anchorage. Passengers wishing to travel between Korea and Alaska must use connecting passenger service which is inconveient, time-consuming and infrequent. And existing all-cargo service is via intermediate points with limited frequencies.

b) In the face of this dearth of air transportation service in the Korea - Alaska market, there is a great demand and urgent need for such air service by passenger and shippers alike.

c) The pressing need for improved air transportation service between Korea and Alaska also has been reflected by numerous expressions by support for Korean Air's service in the market by citizens, shippers, civic organizations and government officials in Alaska.

ATTN: Ms. Elizabeth Ziegler

Dear Ms. Ziegler:

Pursuant to our telephone conversation of yesterday, I am enclosing the booklet entitled "U.S.-Korea Aviation Relations and Ratification of the U.S.-Korea 1980 Memorandum of Understanding." Also included is a two page "Executive Summary."

I trust that the information and statistics contained in these documents will prove adequate support for the resolution being considered by the Alaska State Senate.

As you may be aware, Korean Air has been exerting every effort for quite some time to obtain authority for full traffic rights at Anchorage.

We sincerely appreciate the efforts being made by the Alaska State Senate in this regard, and hope that the seed being planted through the resolution will soon bear fruit.

Sincerely yours,

Lee Steiner

U.S.-KOREAN AVIATION RELATIONS AND RATIFICATION OF THE U.S.-KOREA 1980 MEMORANDUM OF UNDERSTANDING

I. INTRODUCTION

Since the inception of air transportation between the United States and the Republic of Korea, aviation relations between the two countries have been cordial and mutually beneficial. However, several differences of a minor nature have recently threatened to undermine this close and constructive relationship. These differences have caused the U.S. thus far to refuse to ratify and implement the provisions of an April 12, 1980 Memorandum of Understanding (MOU) with Korea concerning air transport services between the two countries. The reluctance of the U.S. to ratify the 1980 MOU has denied significant economic benefits to air carriers on both sides of the Pacific.

The Republic of Korea strongly desires ratification of its 1980 aviation agreement with the United States. It believes that the obstacles to implementation of that agreement have been removed and that conditions now exist which will allow an end to the current deadlock.

This paper will explore the present status of U.S.-Korea aviation relations, describe recent steps to resolve the outstanding issues, and suggest the advantages for both nations of an early and equitable resolution of their differences.

II. A BRIEF HISTORY OF U.S.-KOREAN AVIATION RELATIONS

Air services between the U.S. and Korea have been governed for almost thirty years by the 1957 U.S.-R.O.K. Air Transport Services Agreement. The air transport rights granted by the original agreement have been significantly expanded through several amendments to the basic document. The latest series of negotiations resulted in the 1978 and 1980 aviation agreements between the U.S. and Korea.

The 1978 U.S.-R.O.K. Memorandum of Understanding, signed ad referendum, significantly enhanced access and competition in the U.S.-Korea air market. The U.S. was given the right to designate an unlimited number of carriers to provide service to Korea. Moreover, the two countries agreed to a system of mutual disapproval of fares and rates, increasing the likelihood of fare reductions and fare discounts. In exchange, Korean Air Lines (KAL) was granted traffic rights to New York and passenger stopover rights at Anchorage. The 1978 MOU also raised for the first time the issue of self-handling of cargo by U.S. carriers at Kimpo International Airport (Seoul). At the request of the U.S. delegation, Korea agreed to special provisions for cargo handling by U.S. carriers.

Prior to ratification of the 1978 Memorandum of Understanding, the United States requested clarification of the provisions governing cargo self-handling at Kimpo. On March 14, 1979, the U.S. Ambassador in Seoul sent a letter to the Minister of Foreign Affairs specifying the handling rights to which U.S.

carriers would be entitled. In the same letter, the United States demanded that the Korean Government construct, or allow a U.S. carrier or U.S. carriers to construct, a new cargo terminal for the exclusive use of U.S. airlines. Even though the 1978 MOU was silent as to the construction of additional cargo facilities at Kimpo the Korean Government acceded to the United States' request. Following resolution of this issue, the United States and Korea exchanged diplomatic notes ratifying the 1978 Memorandum of Understanding.

One year after the 1978 agreement was ratified, representatives from the United States and Korea again met to discuss air transport relations between the two countries. During the talks, the Korean Government requested an expansion of the route schedule so that Korean Air Lines could offer service to additional points in the United States and points beyond. The delegations, in an April 12, 1980 Memorandum of Understanding, conferred on the Korean carrier traffic rights to Anchorage, Oakland and Chicago and beyond rights to one point in Europe. The new traffic rights, if implemented, would partially rectify the route imbalance which currently allows U.S. carriers to operate from <u>any</u> U.S. points via <u>any</u> intermediate points to <u>any</u> points in the R.O.K. and <u>any</u> points beyond while restricting the Korean carrier(s) to only three U.S. gateways without any beyond rights.

The 1980 MOU also provided that the Korean Government would give a U.S. carrier (Flying Tiger) the option to construct a new cargo terminal at Kimpo. If Flying Tiger chose not to exercise its option, the R.O.K. would construct the facility itself. The size of the facility would be no less than 2,688 square meters and would allow for both inbound and outbound cargo handling by U.S. carriers. Under the 1980 Memorandum of Understanding, the traffic rights granted to Korean Air Lines, except the traffic rights at Anchorage, were to be phased-in and tied to completion of the new cargo facility.

Although authorized to construct the Kimpo cargo facility and initially expressing interest in doing so, Flying Tiger decided not to proceed. It informed U.S. authorities in May 1983 that it did not have adequate financing to build the proposed facility. By choosing to forego construction, Flying Tiger delayed progress on the new terminal, preventing KAL from exercising its new traffic rights under the 1980 MOU.

The 1980 Memorandum of Understanding has not been ratified. Although Korea has repeatedly proposed its ratification to the U.S. Government, the United States has declined to ratify the MOU on the ground that the new cargo terminal at Kimpo must first be completed (notwithstanding the decision of Flying Tiger not to build the terminal as it originally stated it would). In order to resolve this issue and proceed with implementation of the 1980 agreement, the Korean Government has decided that it will construct the Kimpo cargo facility. Construction of the facility

is now under way and is expected to be completed by early February 1986. When completed, the new facility, which will exceed 4,032 square meters in size, will enable U.S. carriers to self-handle inbound, outbound and transit cargo at Kimpo. Thus, with construction of the new cargo facility, the major issue stalling implementation of the 1980 MOU has been resolved according to the terms of that agreement and in a manner which should be satisfactory to the United States.

III. BENEFITS UNDER THE U.S.-KOREA AVIATION AGREEMENTS

Despite the goodwill that has generally pervaded U.S.-Korea aviation relations, the 1980 Memorandum of Understanding is no closer to ratification today than it was five years ago. In large measure, the impasse over ratification results from the protracted controversy over the cargo facility at Kimpo, an issue which, as explained above, has now been resolved. However, also behind the failure to ratify the 1980 MOU is the view held by some in the U.S. aviation community that the agreement is "tilted" towards Korea. That is simply not the case. As the following analysis demonstrates, the economic rights enjoyed by U.S. carriers under the 1978 and 1980 agreements outweigh those enjoyed by KAL. Moreover, the benefits enjoyed by U.S. carriers serving Korea will only continue to grow as the Korean economy develops and trade and commerce between the two countries increases.

A. Structure Of The U.S.-Korea Air Market

The U.S.-Korea air market is presently served by one Korean carrier (Korean Air Lines) and three U.S. carriers (Pan American, Northwest and Flying Tiger). Pan Am, Northwest, and KAL conduct both passenger and cargo operations. Flying Tiger is strictly an all-cargo carrier.

Under the U.S.-Korea bilateral agreement as modified by the 1978 MOU, the route rights enjoyed by U.S. carriers are far greater than those allowed to KAL:

-- With the right to designate an unlimited number of carriers, the U.S. has designated 14 carriers to serve Korea while Korea has designated one carrier to serve the U.S. (Exhibit A, Table 4).

-- U.S. carriers may provide service between any points in Korea and any points in the U.S. Currently, U.S. airlines operate between Seoul and fourteen U.S. points. In contrast, the Korean carrier is only allowed to serve three points in the U.S. (Exhibit A, Table 5).

-- With respect to service beyond each country, U.S. carriers under the existing agreement have unlimited rights to serve points beyond Korea with full Fifth Freedom rights[1/] and in fact serve five such points and derive substantial economic benefits from such services. (Exhibit A, Tables 18, 19). KAL is not authorized to serve any beyond points.

The imbalance in route rights severely limits the competitive opportunities available to KAL. U.S. carriers can now operate, in both directions, from <u>any</u> U.S. points, via <u>any</u> intermediate points, to <u>any</u> points in Korea, and beyond Korea to

---

1/ Fifth Freedom rights are rights granted carriers of one country to carry local traffic (i.e., passengers and cargo) between the other country and a third country.

any points other than certain Communist countries.2/ KAL, on the other hand, has been limited to the same route rights for approximately thirty years, with the single addition of traffic rights to New York and stopover rights at Anchorage.

In addition to favorable route rights, U.S. carriers serving Korea enjoy automatic fare approval, unrestricted charter rights, and the largest amount of cargo space allocated to foreign carriers at Kimpo International Airport. These factors, coupled with the large volume of U.S. Government business, have enabled the three U.S. carriers to compete effectively in the Korean market and to derive substantial profits from their services.

As the Korean economy continues to grow and as the 1988 Summer Olympics approach, U.S. carriers will have further opportunity to exploit their advantages under the existing air agreement between Korea and the United States.

B. Total Market Statistics

By any objective standard, the U.S.-Korea air market is large and rapidly growing. As of October 31, 1984, the number of passengers traveling between Seoul and various points in the U.S. reached an annual figure of 496,813, a 69.4% rise over 1979. The statistics for cargo traffic are similarly impressive: 141,157,000 pounds of cargo ferried between the U.S and Korea last year, a 93.2% rise over 1979. These figures establish the

---

2/ In accordance with the 1980 Memorandum of Understanding, the Korean government consistently has advised the U.S. government that this restriction on beyond rights will be eliminated immediately upon ratification of the 1980 agreement.

U.S.-Korea air market as second largest of the transpacific passenger markets (Exhibit A, Table 2), and fourth largest of the transpacific markets for air cargo (Exhibit A, Table 3).

The U.S. participation in the market has been steadily rising over the past several years. Since 1978, the number of passengers enplaned at Seoul by U.S. carriers has grown at an average annual rate of 18.2% (Exhibit A, Table 10). Over the same period, freight enplaned by U.S. carriers at Seoul has increased each year by an average rate of 15.4%. (Exhibit A, Table 10). As the traffic carried by U.S. operators has risen, so has the number of flights between the U.S. and Korea. In May 1985, weekly flights by U.S. carriers serving the U.S.-Korea air market had risen by 31% over the prior year. The increase in the number of passenger flights by U.S. carriers has been particularly dramatic, nearly tripling in frequency over the past seven years. (Exhibit A, Table 10A). Most impressive of all, measured in terms of annual available seats, U.S. carriers will provide 60% of passenger capacity in this market in 1985 compared to the 40% share held by KAL. (Exhibit A, Table 8).

Translated into revenue, these figures mean significant earnings for U.S. airlines. Last year, U.S. carriers received an estimated $153 million from passenger operations in the U.S.-Korea market. (Exhibit A, Table 13). Cargo operations generated revenue of $68 million. (Exhibit A, Table 14). Total revenue has increased dramatically over the past six years, an upward trend which shows no signs of abating.

This analysis of the U.S.-Korea air market confirms the substantial benefits received by the U.S. under its aviation agreement with the Republic of Korea. Implementation of the 1978 MOU has dramatically increased revenue and traffic for U.S. carriers operating flights to Seoul. Ratification of the 1980 MOU would continue this record of growth by expanding the competitive opportunities available to U.S. carriers.

III. ARGUMENTS SUPPORTING RATIFICATION OF THE 1980 MEMORANDUM OF UNDERSTANDING

Over the years, the give-and-take of U.S.-R.O.K. negotiations has produced a series of agreements, which have somewhat improved the imbalance favoring the U.S. under the Air Transport Services Agreement between the two countries. The 1980 MOU is no exception to this pattern of continuing improvement. Its terms provide for an exchange of benefits intended to enhance competition in the U.S.-Korea air market. The following analysis summarizes the policy and economic justifications for ratification of the 1980 MOU, from both the U.S. and Korean perspective.

A. Korea Has Been Extremely Cooperative In Aviation Matters With The U.S.

The Republic of Korea has always been forthcoming in aviation relations with the U.S. As demonstrated by the discussion below, it has accommodated U.S. interests on several matters resulting in significant benefits for U.S. carriers. Ratification of the 1980 MOU would provide the basis for

continuing cooperation by the Koreans in aviation affairs and further cement the cordial ties between the U.S. and one of its most dependable allies.

1. The 1978 Memorandum of Understanding.

The 1978 U.S.-R.O.K. Memorandum of Understanding (MOU) was a precedent-setting agreement. At the time, the U.S. was aggressively pursuing an "open skies" policy in bilateral aviation agreements with foreign nations. "Open skies" meant greater competition in international air markets and was intended as the international corollary to deregulation at home. Although such agreements were uncommon at the time, Korea accepted a "liberal" bilateral treaty reflecting the procompetitive policies of the U.S. Government.

Korea was the first major country in the Far East and one of the first countries in the world to accept a procompetitive bilateral. While many foreign governments refused to sign such procompetitive agreements in order to protect their own carriers, Korea did not. Korea's acceptance of such an agreement was hailed by U.S. aviation officials as a major step in extending the "open skies" policy to Asia. In fact, shortly after the 1978 agreement was concluded, several other Asian nations (i.e., Singapore, Thailand and Taiwan) followed Korea's lead and agreed to procompetitive bilateral arrangements with the United States.

Under the "open skies" approach of the 1978 MOU, U.S. carriers serving Korea enjoy the unrestricted right to set fares, determine frequency of service, and select routes. This

contrasts sharply with the rights of U.S. carriers under other bilateral agreements regarding air transport services including those between the U.S. and some of its major trading partners and allies. Consider the following:

-- Many bilaterals restrict the number of carriers the U.S. can designate to provide international service. The agreements with Great Britain, Canada, Mexico, Italy, and the Philippines, to name a few, all impose firm limits on the number of designations.

-- Many of the same agreements also limit the routings over which U.S. carriers can operate.

-- Many bilaterals provide for unilateral disapproval of carrier fare initiatives. The agreements with Germany, Switzerland, and the United Kingdom permit prior governmental review of fares. Indeed, a spate of notices of rejection from the British government last fall precipitated a major crisis in U.S.-U.K. aviation relations.

-- Schedules frequently are subject to prior governmental review. Under the aviation agreement between the U.S. and Great Britain, carrier schedule increases must be negotiated every six months.

Significantly, these matters have never been the subject of a dispute between the U.S. and Korea. The 1978 MOU gave the U.S. the right of unlimited designation of carriers, with no restrictions on flight routes or schedules. Fares are reviewed according to a mutual disapproval system under which U.S. carriers are effectively able to set fares as they wish. On matters of capacity, as on most matters involving aviation, the U.S. and Korea see eye-to-eye.

2. Modification of the 1978 MOU.

When the U.S. sought additional rights for U.S. carriers, Korea once again acceded to its demands. The 1978 MOU was modified to allow U.S. cargo carriers greater self-handling rights at Kimpo International Airport. The U.S. refused to ratify the 1978 MOU until Korea specified the self-handling rights that U.S. carriers would enjoy. An additional concession, one which apparently is unique in the history of bilateral agreements, involved the commitment of the Korean Government to construct, or allow a U.S. carrier or U.S. carriers to construct, a new cargo terminal at Kimpo airport for the exclusive use of U.S. airlines.

3. Fifth Freedom rights.

Fifth Freedom rights, especially important for U.S. carriers, have been hotly contested in negotiations conducted by the U.S. with other nations. Often, the availability of Fifth Freedom rights determines the economic viability of a particular route. Out of a desire to protect their own carriers, most nations are extremely reluctant to allow U.S. carriers traffic rights to points in other countries. In fact, in the case of a number of countries such as Peru and Greece, the issue of Fifth Freedom rights led to the renunciation or near-renunciation of aviation agreements with the U.S.

Not so in the case of Korea. U.S. carriers serving Seoul have full Fifth Freedom rights to serve beyond points and presently provide such service to Hong Kong, Taipei, Manila,

Osaka, and Tokyo. Moreover, U.S. carriers may exercise Fifth Freedom rights beyond Seoul to points in the People's Republic of China if the 1980 MOU is ratified. Substantial traffic is generated by present Fifth Freedom markets. In 1982, the most recent year for which figures are available, U.S. carriers flew 197,179 passengers between Seoul and Tokyo, and 25,277 between Seoul and Taipei (Exhibit A, Table 18).

Korea's conciliatory attitude on Fifth Freedom rights is all the more remarkable given the fact that at present it has no similar rights in the U.S. Although the right to serve one beyond point in Europe was granted by the 1980 Memorandum of Understanding, that right has been held in abeyance by the failure of the U.S. to ratify the 1980 agreement.

4. Commencement of service by U.S. carriers.

Korea follows a laissez-faire approach with respect to start-up service by U.S. carriers. Both Braniff and Pan Am were able to initiate service to Seoul with a minimum of bother and delay. This is in stark contrast to the difficulties typically experienced in Latin America and Japan. Throughout Central and South America, the problems associated with start-up operations have been acute. Challenge Air Transport experienced particular difficulty in Guatemala and Peru, where its attempts to begin operations met delay after delay. Bureaucratic delays also stalled the commencement of service by United to Japan. The Japanese relented only after intense pressure from the U.S. including several retaliatory measures against Japan Air Lines.

U.S.-Korea aviation relations have never reached the nadir marked by United's application to serve Japan. U.S. carriers have been free to come and go from Seoul pretty much as they please.

As indicated by this review of U.S.-R.O.K. aviation relations, the Republic of Korea has been cooperative and flexible in negotiations with the United States. The cordial attitude of the Korean Government has led to pragmatic aviation agreements, emphasizing a balanced exchange of economic rights and opportunities. It is anomalous, to say the least, that the nation which has championed "open skies" should respond to the Korean approach of lowering constraints and promoting competition by refusing to ratify the 1980 Memorandum of Understanding. The present U.S. position not only penalizes a trusted American ally but undermines the basis for what has been up to now a very special relationship between the U.S. and Korea with respect to aviation affairs.

B. Ratification Of The 1980 MOU Will Guarantee U.S. Carriers Sufficient Space For Self-Handling Of Cargo At Kimpo International Airport.

The 1979 letter from the American Ambassador to the Korean Foreign Ministry secured for U.S. carriers the right to self-handle cargo at Kimpo airport. However, the size of the cargo area presently used by U.S. carriers prevents them from self-handling all freight.

The construction of a new cargo facility at Kimpo will provide a considerably larger space (in excess of 4,032 square meters) for the exclusive use of U.S. cargo carriers. The addition of this space will remove the physical constraints which currently prevent U.S. carriers from self-handling all their own cargo. Consequently, with the construction of the new facility, import, export, and transit cargo will be totally self-handled by U.S. carriers.

C. The Route Rights Granted To KAL Under The 1980 MOU Are A Reasonable Expansion Of Its Present Authority And Are Consistent With Similar Rights Granted To Other Nations.

In approaching the 1980 aviation negotiations, Korea sought an expansion of route rights for KAL. As previously noted, these route rights were severely limited and far less than the rights enjoyed by U.S. carriers serving Korea.

Prior to 1978, KAL was restricted to one U.S. route--from Seoul to Los Angeles, via Tokyo and with a mandatory stop in Honolulu. In the 1978 MOU, the U.S., in return for Korea's acceptance of a "liberal" bilateral agreement, granted to KAL the right to provide passenger and cargo service to New York, with passenger stopover rights (but not traffic rights) at Anchorage. The 1980 MOU allowed KAL full traffic (as opposed to stopover) rights at Anchorage, upon notification by the Korean Government that it had removed restrictions on service to Communist nations as part of the "beyond rights" of U.S. carriers serving Seoul. Under the same agreement, KAL was given rights to Oakland, upon completion of the new cargo facility at Kimpo International

Airport. One year after the cargo facility was completed, KAL was to receive rights to Chicago, and one year after that, beyond rights from one point in the U.S. to one point in Europe.

The new authority granted to KAL as part of the 1980 MOU was not given for "free" but resulted from negotiations between the U.S. and Korea. In each case, the new route rights were closely tied to additional benefits for U.S. carriers serving Seoul.

Moreover, the route rights granted to other countries under similar bilateral agreements are far more significant than those granted to Korea under the 1978 and 1980 agreements. Other Asian nations agreeing to procompetitive bilateral agreements received new route rights in return. Taiwan, for example, presently enjoys rights to Guam, Honolulu, Seattle, San Francisco, Los Angeles, Dallas, and New York, plus beyond rights to a point in Europe and a point in either Central or South America. Thailand enjoys rights to New York, Honolulu, Los Angeles, Guam, Seattle and one additional point, together with beyond rights to Canada and Europe. Even countries which have been restrictive in rights granted to U.S. carriers have enjoyed rights comparable to those conferred by the U.S.-Korea aviation agreements. The U.S.-Philippine agreement, for example, which contains strict capacity and designation limitations, grants Philippine carriers rights to Guam, Honolulu, San Francisco, Los Angeles and five points to be elected, together with beyond rights to three countries to be selected.

D. Implementation Of The 1980 MOU Will Mean Better Service For Chicago And San Francisco/Oakland.

The new route rights granted to KAL under the 1980 agreement will allow a boost in service to markets which at present are underdeveloped. Although Chicago and San Francisco/Oakland presently receive service from U.S. carriers flying to Korea, traffic and revenue generated by these points is far greater for other transpacific markets. For example, there are thirty-four weekly passenger flights to Tokyo from Chicago, non-stop and one-stop, with similar service from San Francisco 49 times a week. (Exhibit A, Table 20). Contrast this with the frequency of service to Seoul, which features only 16 weekly flights from Chicago and 12 flights from San Francisco. (Id.)

The figures for air cargo over these routes also indicate underdeveloped markets. Last year at Chicago, air cargo exports to and imports from Korea stood at 11.5% and 14.5%, respectively, compared to the same figures for trade with Japan (Exhibit A, Table 22). For San Francisco, the percentages are 8.5% and 13.8%. In other cities served by U.S. carriers, the air cargo figures for the U.S.-Korea and U.S.-Japan markets reflect a much narrower gap. (Id.). The addition of KAL service to Chicago and Oakland would spur competition between carriers, lower fares, and promote the development of those markets. However, this will only come about if the U.S. implements the 1980 Memorandum of Understanding.

IV. ACTIONS TAKEN BY KOREA CONCERNING THE 1980 MEMORANDUM OF UNDERSTANDING

The 1980 MOU stipulated several understandings. While the 1980 Agreement has not been ratified, the Korean Government has taken the necessary actions to implement most of the measures agreed upon. U.S. carriers have already been enjoying the benefits which these understandings provide for, such as the settlement of a storage facility problem and exemption of U.S. carrier ground handling equipment from the normally applicable customs duties.

The major issue which has prevented U.S. ratification and implementation of the 1980 Memorandum of Understanding concerns the construction of an additional cargo facility at Kimpo International Airport. The following account of the delays surrounding construction of the Kimpo cargo facility is intended to dispel any misconception that the Korean Government has disregarded its commitments under the 1980 agreement by impeding progress on the new cargo terminal.

The 1980 Memorandum of Understanding provided that the Korean Government would present to U.S. carriers a specific proposal for the construction of a new cargo facility and would provide the option for U.S. carriers to construct the building. The agreement further provided that, if the option was not exercised, the Korean Government would construct the facility on its own.

On May 8, 1980, less than four weeks after the agreement was signed, the Korean Government presented its specific proposal for construction of the new cargo facility to the U.S. carriers. The proposal, which was accompanied by preliminary design sketches, contemplated a facility of 2,688 square meters which would be erected immediately adjacent to the space then being allocated to the U.S. carriers. In a letter dated June 13, 1980, Flying Tiger notified the Korean Government that it was exercising its option to construct the facility and requested that the facility be expanded to comprise 4,032 square meters.

On November 17, 1980, the Korean authorities approved Flying Tiger's request, subject to the requirement that the facilities be constructed in conformity with applicable Korean laws and regulations and that, upon completion, title to the facility be transferred to the Korean Government as prescribed by the National Properties Act, a requirement which all companies in Korea must conform to.

In the months following the approval of its proposal, Flying Tiger did not submit construction plans or other information regarding the facility to the Korean authorities. Six months later, Flying Tiger submitted to Korean authorities a draft agreement to lease premises located at Kimpo in order to develop and construct a cargo facility consisting of 3,360 square meters. Because the draft agreement submitted by Flying Tiger contained terms inconsistent with relevant Korean laws, the Korean authorities advised Flying Tiger that its draft agreement did not

conform to Korean law and provided Flying Tiger with the appropriate forms and procedures to be followed in connection with construction of the facility. In June 1981, Korean officials advised the United States of the recent developments concerning the cargo facility at Kimpo.

On July 13, 1981, noting that Flying Tiger's delay was holding up implementation of the 1980 Memorandum of Understanding, the Korean Ministry of Transport sent a letter to Flying Tiger requesting it to commence construction "at the earliest possible date". Korean officials advised the U.S. State Department of the Ministry of Transport's letter to Flying Tiger. Flying Tiger did not respond to the letter.

Over the next thirteen months, Flying Tiger informally raised several objections, through the U.S. Embassy in Seoul, concerning existing Korean laws governing the construction of facilities at Kimpo Airport. The principal objection concerned the approximately ten year amortization period specified in Korean law -- a requirement which applied to all facilities constructed by Korean Air Lines or any other private company at Kimpo Airport. On June 15, 1982, the Korean authorities advised Flying Tiger that it would be allowed to amortize the new cargo facility over 20 years and requested "timely construction of the air cargo facility for early implementation of the Memorandum of Understanding". The U.S. Embassy in Seoul also was advised of this fact.

By letter dated April 28, 1983, Flying Tiger advised the Deputy Assistant Secretary of State that Flying Tiger was accepting the last proposal of the Korean Government for construction of the cargo terminal at Kimpo. In the same letter, Flying Tiger also stated that it was withdrawing "all objections to the immediate implementation of each of the rights granted to the Korean designated air carrier" as specified in the 1980 Memorandum of Understanding.

On May 10, 1983, Flying Tiger stated in a letter to the Deputy Assistant Secretary of State that it did not have the necessary financing resources to build the proposed facility at Kimpo:

> Under the Korean Government's proposal, no financial aid is available nor can the building itself be used as collateral for a construction loan. The lack of those advantages, combined with Flying Tiger's current financial condition, compel the carrier to forego at this time its option to build.

Flying Tiger has yet to advise the Korean Government as to its intentions with respect to the construction of the facility.

In order to resolve the issue and proceed with implementation of the 1980 Memorandum of Understanding, the Korean Government has undertaken the construction of the Kimpo cargo facility which has been delayed by Flying Tiger's inaction. The new facility will enable Flying Tiger and Northwest (and Pan American, should it so desire) to self-handle inbound, outbound and transit cargo at Kimpo. The U.S. carriers will have exclusive use of the facility on rental terms comparable to those

currently being enjoyed by the carriers. With the addition of the new building, U.S. carriers will have exclusive use of approximately one-third of the cargo area at Kimpo, with all other carriers - including Korean Air Lines - jointly sharing the remaining space.

When all of the facts surrounding construction of the new cargo facility at Kimpo are taken into account, the only possible conclusion must be that the Korean Government has demonstrated good faith - and considerable goodwill - in its efforts to implement not only this major issue but all issues of the 1980 Memorandum of Understanding. The 1980 agreement required the Korean authorities to present a proposal for the facility, and they did so. Flying Tiger exercised its option to construct the facility, and the Korean authorities urged the carrier to get on with the work. Flying Tiger requested an increase in the size of the facility by 50 percent, and the Korean authorities agreed. Flying Tiger requested relief from Korean regulations governing amortization, and the Korean authorities agreed. And, once Flying Tiger decided that it would not go forward with the facility due, in part, to its own financial condition, the Korean Government stepped forward to construct the multi-million dollar project. Such a record hardly supports the notion that the Republic of Korea has ignored its commitments under the 1980 Memorandum of Understanding.

V. CONCLUSION

For the past five years, the United States and Korea have been deadlocked over implementation of their 1980 air transport agreement. While Korea has on several occasions proposed formal ratification of the 1980 MOU, the United States has steadfastly refused, citing the lack of progress on a new cargo facility at Kimpo.

The commitment of the Korean Government to construct the cargo terminal at Kimpo has mooted U.S. objections to ratification. With construction already started, the interests of the U.S. are no longer served by a continued refusal to ratify the 1980 agreement. In fact, further delay in implementing the 1980 MOU will deny significant economic benefits and competitive opportunities in the U.S.-Korea air market.

By signing the 1980 Memorandum of Understanding, the U.S. undertook a commitment to seek its ratification and adhere to its provisions. The U.S. should now prove as good as its word and implement the 1980 agreement.

12 Korea is Fourth Most Active Point for U.S. Carriers in the Pacific, Tons Revenue Freight Enplaned by U.S. Carriers, 1980-1984

13 U.S. Carriers Derive More than $153 Million in Revenues From Passenger Service To/From Korea

14 U.S. Carriers Derive More Than $68 Million in Revenue From Carriage of Freight To/From Korea

15 U.S. Carriers Serving Korea Have Access to Large Fifth Freedom Markets

16 U.S. Carriers Serving Korea Operate Substantial Capacity in the Fifth Freedom Markets; Service Provided by U.S. Flag Carriers in Fifth Freedom Sectors To/From Seoul, 1978-1984 and Estimated 1985

17 U.S. Cargo Carriers Serving Korea Conduct Substantial Fifth Freedom Operations; Service and Capacity Provided by U.S. Cargo Carriers Over Fifth Freedom Sectors To/From Seoul, 1978-1984 and Estimated 1985

18 U.S. Passenger Carriers Serving Korea Derive Substantial Benefits from Fifth Freedom Markets; Traffic Over Fifth Freedom Sectors Into/Out of Seoul

19 U.S. Cargo Carriers Serving Korea Derive Substantial Benefits From Fifth Freedom Markets; Traffic Over Non-U.S. Sectors Into/Out of Seoul

20 Chicago and San Francisco are Relatively Underserved to Korea Considering Their Size and Importance; Weekly Non-Stop and One-Stop Passenger Flights, May 1985

21 Chicago and San Francisco Are Relatively Underserved to Korea Considering Their Size and Importance; Weekly Cargo Flights, May 1985

22 Chicago and San Francisco are Relatively Underserved to Korea; Using Japan as an Index, Air Freight in the Chicago-Republic of Korea Market Lags Behind New York/Los Angeles - Republic of Korea Markets (Where KAL Provides Service)

23 Measured Against USA-Japan Air Freight Markets, The USA-Republic of Korea Markets Most Laggard Are Chicago and San Francisco, 1979-1984

TABLE 1

KOREA IS THE SECOND LARGEST TRANSPACIFIC PASSENGER MARKET

	1983 Passengers
Between USA and:	
Japan	3,670,090
Republic of Korea	458,999
Hong Kong	400,978
Taiwan	280,922
Singapore	112,727

Note: The source data (US Immigration & Naturalization Service reports) frequently understate traffic levels in certain transpacific markets because reporting carriers fail to report true on-flight origin-destination and instead report only the first foreign port of arrival or last foreign port en route to the U.S. Thus, a Seoul-bound passenger on Los Angeles-Tokyo-Seoul flight may be recorded as a U.S.-Japan passenger rather than US-Korea. Similarly, a Hong Kong boarding passenger on a Hong Kong-Tokyo-Los Angeles flight may be recorded as a Japan-US passenger.

TABLE 12

TABLE 13

U.S. CARRIERS DERIVE MORE THAN $153 MILLION IN REVENUES FROM PASSENGER SERVICE TO/FROM KOREA

	Passengers	Miles	Passenger Miles (000)
Seoul-Seattle/Beyond	96,520 (1)		
- Anchorage/Beyond	780 (1)		
- West Coast/Beyond via Tokyo	110,688 (2)		
Subtotal	207,988	6,154 (4)	1,279,958
- Taipei	25,277 (1)	917	23,179
- Manila	346 (1)	1,629	564
- Tokyo	62,993 (3)	762	48,001
Total 1982	296,604 (3)		1,351,702
Growth to 1984 @ 34.4% (5)			1,816,687
Total Revenue @ yield of 8.45¢/RPM (6)			$153,510,093

Notes: (1) Revenue traffic by flight stage per ICAO Digest of Statistics No. 300 (1982).

(2) Estimated U.S.-SEL traffic via TYO @ 115% of SEL-SEA/beyond shown above, per relationship of frequencies in 1982.

(3) Total NWA enplaned traffic at SEL in 1982 was 148,302. Therefore, total traffic estimated at 296,604 (148,302 x2). All other traffic shown above totals 233,611, leaving a residual of 62,993. This traffic, regarded as fifth freedom traffic, brings total SEL-TYO flow to 173,681 (62,993 + 110,688). The resultant 173,681 is 23,498 less than the ICAO recorded traffic flow of 197,179.

(4) Average mileage of flight routings in 1982 between SEL and first (or last) U.S. mainland point.

(5) Growth in traffic from 1982 to YE 10/31/84 per enplanements at Seoul per Table 10. Part of growth attributable to entrance of Pan American in market.

(6) NWA experience in scheduled trans Pacific service in 1984.

U.S. CARRIERS DERIVE MORE THAN $68 MILLION IN REVENUE FROM CARRIAGE OF FREIGHT TO/FROM KOREA

Year 1984 - U.S.-Korea freight carried by U.S. flag carriers	28,757.2 tons (1)
Northwest/PAA (2) - 43.5%	12,509
Flying Tiger (3) - 56.5%	16,248
Mileage - NWA (3)	5,540
FTL (3)	6,483
Ton-Miles - NWA	69,299,860
- FTL	105,335,784
Total	174,635,644
Yield/RTM (4)	39¢
Revenue Total	68,107,901

Notes (1) Per Department of Commerce, Bureau of Census.

(2) Distribution based on enplanements at SEL

NWA/PAA	11,047	43.5%
FTL	14,369	56.5
Total	25,416	100.0%

(3) Mileage as flown between SEL and first (last) U.S. mainland point by all-cargo aircraft.

(4) NWA and FTL yields on transpacific operations are the same. PAA's is 42¢/per ton mile but PAA share of traffic was minor.

Department of Commerce & Economic Development / POSITION PAPER

SENATE RESOLUTION NO. 30

"A Resolution allowing Korean Airlines to pick up passengers at Anchorage airport."

The Department of Commerce and Economic Development strongly endorses the passage of Resolution No. 30.

The advancement of international trade and the diversification of our economy through the development of trade is a priority of this Administration. Objectives include attracting investments, increasing labor participation in our industries, and improving access to international markets. Obtaining the rights for Korean Airlines to pick up passengers in Anchorage is more than a symbolic event. Such a routing by Korean Airlines would give Alaska a direct access to our most active trading partner after Japan.

During the past several years, Korea has taken one of the most important investment roles of any foreign nation in Alaska's economy. From joint ventures in fishing, to coal exports, to in-state construction, Korea has provided an infusion of capital which represents a good faith interest in a long-term economic relationship with Alaska. Indeed, Korea sees Alaska as an ideal location for the development of a stable resource base and as a place where it can invest capital in response to increasing pressure by the U.S. government to reduce the U.S.-Korea trade deficit which is hovering in the billions. Investment in Alaska is especially attractive to the Koreans since they have the opportunity of investing in those resource industries which will benefit that nation.

Moreover, Korean construction technology is now rivaling Japan in many areas and the Korean construction industry is looking for new outlets or markets for this expertise. As Alaska continues to develop its infrastructure of port facilities and the like and as the State expands its industry to include new refineries and other facilities, so will Korea continue to operate in our marketplace.

Alaska can ill afford to presume, however, that Korea will develop our market potential with us unless our products are competitively priced and our citizens, from the government to the private sector, are supportive of creating an environment conducive to the expansion of trade. Such support can be represented by our own good faith efforts to make access to Alaskan markets easy and profitable for the Koreans. The rights to pick up passengers would represent successful progress toward creating a good trade atmosphere through a new partnership at the international airport.

The rights in question also mean a great deal of future capital for the State. Anchorage International Airport already provides millions of dollars of revenue for the State through both stopover rights and passenger pick-up rights. Japan Air Lines is the biggest customer of the State with millions of dollars generated through landing fees, passenger pick-up fees, duty free shopping revenue, and the tourist industry. Korea, however, is beginning to have more mobility as a national population. Business and leisure travel is becoming far more common than it was even five years ago as a result of an increase in disposable income and a relaxation in visa procedures. The rights in question would serve to stimulate an increased interest by the Koreans in developing the Alaskan market as a tourist destination rather than as merely a stopover location.

Anchorage International Airport, finally, is facing a very serious future issue involving the possibility of airlines establishing overflight routes which bypass the airport. The rights in question granting Korean Air Lines the ability to pick up passengers in Anchorage could positively impact this issue.

International airline landings at Anchorage International Airport have increased by 42% from 1981 to 1984. The increase in international landings is projected to continue through the 1980's. However, as the market for nonstop flights develops and new aircraft technologies are purchased, international passenger flights via Anchorage International Airport will likely decrease while nonstop flights over the U.S.S.R. and other routes will increase. The Boeing 747-400, expected to be in production in 1988-1989 and in use by 1990, will reduce fuel consumption by 10-12% over existing 747 aircraft while increasing passenger loads by up to 32%. It will have a flight range of 7,000 miles. The nonstop flight from Tokyo to London is 5,400 miles.

It is imperative, therefore, that the State work in conjunction with the Municipality of Anchorage and other appropriate groups to market Alaska as the ideal tourist destination that it is for visitors from the Pacific Rim. We also need to develop any other mechanisms which promote an anchoring of the international airline community at Anchorage International Airport. If there is a legitimate passenger market or other inducements for the carriers, it is unlikely that Anchorage International Airport would face catastrophic losses. However, we must act now to begin the anchoring process. The obtaining of the rights permitting Korean Air Lines to pick-up passengers in Anchorage is a logical and major first step in our process.

MEMO: March 25, 1985

TO: Sen. Jack Coghill
Chairman, Senate Transportation Committee

FROM: Rep. M. Mike Miller (Juneau)

RE: HB 1/Free ferry transport of goods for charities
Request for hearing in Senate Transportation Committee

You have in your committee CSHB 1(Transportation), which would allow the Alaska Marine Highway System to provide occasional free transport of essential goods -- food, clothing and furnishings -- for charitable (free) donations to the poor living in outlying communities served by the ferry system.

I would appreciate the early scheduling of a hearing on this bill by your committee if it can be arranged. There would be no fiscal impact on the ferry system as the bill is currently written, as transportation would be on a space-available basis, thereby not causing revenue losses from paying passengers.

The CS adopted by the House Transportation Committee and later passed by the House is an improvement of my original bill. It tightens eligibility requirements for charities to receive this privelege and prevents abuses. In addition to providing this limited privelege for charities, the bill also provides authority for the Marine Highway System to transport needed goods in declared disasters and emergencies, an authority that is unclear under existing statutes. Although the ferry system did provide emergency transport to Tenekee Springs following 1984's Thanksgiving Day storm and the resulting declared disaster by the Governor, the ferry system does not have statutory authority to do so. The bill would make that authority specific.

If you have any questions about the bill, or about the requested hearing, please contact me. For the information of your staff who may be researching the bill, the staff person handling the bill for me is Bob Speed (x-4990). He will be glad to provide any assistance or information required prior to hearings.

MEMORANDUM

To: Committee members

From: Committee staff

Re: Background on CS HB 1(Trans)

Tomorrow, the committee will take up CS HB 1(Trans), which proposes to allow free transportation of clothing and household goods for charitable organizations on board the Alaska Marine Highway ferries. This service would be used to move charitable items, primarily by the Salvation Army, from places where they have a surplus, like Juneau, to outlying villages where there is a distinct need. Salvation Army personnel testified to House Transportation hearings that they would likely use the free ferry ride to each of the Southeastern communities they serve two or three times each year.

As it was originally introduced, HB 1 was opposed by DOT/PF as it might be potentially easily-abused, and could create additional administrative work for the department. The department also anticipated problems loading and unloading free vans and trucks, which could increase the amount of time the ferries would be in port. Most of their concerns have been addressed in the committee substitute that was passed by the House, however, the department is still not wildly enthusiastic about the bill.

CS FOR HOUSE BILL NO. 1 (Transportation)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act authorizing the ferry system to transport certain items without charge."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 19.65 is amended by adding new sections to read:

Sec. 19.65.030. TRANSPORTATION OF GOODS FOR CHARITABLE ORGANIZATIONS. (a) To the extent that unsold space is available, the commissioner of transportation and public facilities may provide to authorized nonprofit charitable organizations free transportation of vans and vehicles on Alaska marine highway system vessels between Alaska ports only. A van or vehicle transported under this section may contain only clothing and household furnishings that are to be distributed without charge to needy individuals and families.

(b) The commissioner shall determine which organizations are authorized to receive free transportation services under (a) of this section and shall maintain a list of those organizations. Authorization is limited to organizations that have been in existence at least three years. The commissioner may establish additional criteria for authorization. A nonprofit charitable organization not authorized under this subsection may submit a written request for authorization. The request shall include the organization's justification for authorization.

(c) An organization may lose its authorization for failing to comply with the provisions of this section or regulations adopted under this section.

Sec. 19.65.040. EMERGENCY TRANSPORTATION OF GOODS. The commissioner of transportation and public facilities may provide for the free transportation of goods on Alaska marine highway system vessels during an emergency declared by the governor.

* Sec. 2. AS 19.65.030 is repealed three years after the effective date of this Act.

House Transportation Committee

RE: HB 1

The following suggestions were made in our January 22nd committee meeting for possible amendments. Staff was instructed to forward them to Legal Services for implementation into the work draft for CSHB 1. I have also attached a copy of the minutes from that meeting for your information. Please give me a call should you need to discuss this further.

SUGGESTED AMENDMENTS

1. Have the Department of Transportation and Public Facilities develop a list of authorized organizations in order to narrow the number of charities which could use the system for free.

2. Additional charitable organizations must petition the Commissioner with written justification to be admitted to that list.

3. Violators or abusers of the law would be excluded from the list.

4. Declare emergencies - let the Marine Highway System transport goods for free during times of emergencies. (This should be a separate section making it separate and distinct from the eligibility list of requirements; this would give DOT the ability to deal with emergency situations legally--an ability which, as we understand it, they do not have at the present time.)

5. The charitable organizations must be in existence for 3 years.

6. This provision shall sunset after 3 years.

7. Line 17 add the "free" between "distributed" and "to".

8. Line 12 add the word "unsold" between the words "that" and "space".

As you can tell from the minutes, the Committee is concerned with the potential abuse of this proposed legislation. Any assistance you can offer with attempting to close any such loopholes appreciated.

HB 1: An Act authorizing the ferry system to transport certain items for charitable organizations without charge.

The Department of Transportation and Public Facilities is opposed to the transport of items for charitable organizations without charge. The multitude of charitable organizations in the state would inundate the Alaska Marine Highway with requests. According to Department of Labor statistics, there are 892 potential charitable organizations in the State. The investigation and processing of these requests would require administrative time that could evolve into a requirement for additional personnel.

Small communities usually have a low economic base therefore high ratio of needy individuals and families. With many it is a way of life preferred over urban dwelling. The free carriage of these items could have a definite effect on the economy of a small community and would compete with private industry both in transportation and local businesses.

Operationally it is not feasible to carry vans on a space available basis. Vans are required to be loaded prior to other vehicles.

However we believe that HB 1 should be amended to provide this assistance to needy individuals in communities that have been declared a disaster area by the Governor.

FROM: Keith Kelton
Director
Division of Environmental Quality

SUBJECT: Spill Expense Reserve Account History and Status Report

In 1976, the Alaska Legislature passed its first major legislation addressing the problem of oil spills. It required oil spill contingency plans, proof of financial responsibility for cleanup efforts, as well as provisions for charges against terminal users and oil tankers based on the degree of spill risk their equipment and operations presented. Funds collected from the program were to be used to develop a contingency fund to meet cleanup costs in the event of a major spill. The fund was struck down by the courts, leaving the other two provisions intact.

In order to maintain the State's oil pollution control program, a new bill, HB 205, was introduced by the 1979 Legislature. This legislation extended the contingency plans and financial responsibility to offshore exploration and production facilities, and oil barges. The new legislation was to correct the defects in the 1976 law and ensure that Alaska had a strong program for preventing and mitigating the effects of an oil spill. Chapter 120, SLA 80, Section 53 provided $1,542,600 for HB 205 (FY 80), and provided a $1 million expense reserve and a fiscal note to start and fund the Oil Pollution Control Program. The Spill Expense Reserve was to pay costs directly involved in the abatement, containment, and removal of a discharge of oil or hazardous substances: the fiscal note provided for staff, equipment, and training.

House Journal Supplement No. 43 indicated that, "the cleanup reserve be maintained by capital appropriation at the $1 million level. The balance of the reserve should carry over from year to year. Subsequent budget requests may be less than $1 million." An additional $250,000 was appropriated in 1981 and another $250,000 in 1984.

Since the inception of the program, hundreds of spills have been cleaned up. Most of the expenses are charged directly to the spiller. When the spiller was unknown or the spill incident required immediate emergency action, the spill reserve was used to fund the cleanup work.

Some spills involve action by the courts and the Attorney General's Office. The account balance on January 31, 1985, was $410,080.74. There are several spills that are still in the litigation or pre-litigation stages and may require sizable funding. The Nome Gasoline Spill has cost over $680,000 to date.

On December 27, 1984, we received a reimbursement of $597,896.07 for spill expenses from the U.S. Coast Guard for the Nome Spill; this is the first time that the state has received federal funds for reimbursement of spill expenses.

On July 14, 1983, a settlement/agreement was reached between the State and the Alyeska Pipeline Service Company on the two spills that occurred over four years prior, the Atigun Pass Spill and the Mile Post 734 Spill. The settlement was for $350,000.

AS 46.03.758(k) states that "penalties received by the state under this section shall be deposited in the general fund and credited to a special account called the 'oil spill mitigation account.' The legislature may annually appropriate from the spill mitigation account a sum equivalent to the amount of penalties received under this section for the calendar year preceding the legislative session in which the appropriation is made, the appropriation to be made for the purpose of restoring and enhancing environments affected by oil pollution, including but not limited to the funding of aquaculture projects."

Amount expended in FY 84		$ 785,112.62
Amount expended for FY 85 to date		69,827.18
	TOTAL	$ 854,939.80
Amount recovered FY 84		354,541.73
Amount recovered FY 85 to date		608,885.58
	TOTAL	$ 963,427.31

We are asking for a capital appropriation of $550.0 for FY 86 to bring the Spill Reserve Account back up the $1.0 million level.

WORKSHEET

REVISED DATE

FY 86

Since the inception of the program, hundreds of spills have been cleaned up. Most of the expenses are charged to the spiller. If the spiller is unknown or the spill incident requires immediate emergency action, the spill reserve account is used to fund the cleanup work.

Some spills involve action by the courts and the Attorney General's Office. The account balance at this time is $447.0. There are several spills that have not been cleaned up completely and may require sizable funding. The Nome Gasoline Spill has cost over $680.0 to date and the North Slope Salvage Spill has cost over $38.0, both are under litigation.

From July 1980 to the end of August 1984, the amount received from spillers has been more than $470.0. Reimbursement from federal funds for the major part of the Nome Spill is expected upon completion of an audit by the U.S. Coast Guard.

We are asking for a capital appropriation of $550.0 for FY 86 to bring the Spill Reserve Account back up to the $1 million level.

COMPONENT Oil Pollution Control

REVISED DATE

FY 86

EXPLAIN THE REMAINING FIVE YEARS OF THE SIX-YEAR CAPITAL IMPROVEMENT PLAN (FY 87, 88, 89, 90, 91). DESCRIBE THE NEEDS TO BE MET IN THE COMING YEARS AND THE PROJECTS OR TYPES OF PROJECTS WHICH MAY BE REQUESTED TO MEET THOSE NEEDS. PLEASE INCLUDE MAJOR MAINTENANCE OR REPLACEMENT PROJECTS. ESTIMATE THE APPROXIMATE COST OF THE PROJECTS. IF THE PROJECTS ARE TO OCCUR SO FAR IN THE FUTURE OR ARE OF SUCH AN INDETERMINATE NATURE THAT A COST ESTIMATE WOULD NOT BE RELIABLE, PLEASE INDICATE THIS FACT. NOTE WHETHER A SIGNIFICANT PORTION OF THE TOTAL FUNDING WILL COME FROM NON-GENERAL FUND SOURCES. MAKE SPECIFIC REFERENCE TO FORMAL PLANNING DOCUMENTS USED AS A BASE FOR THIS DISCUSSION (FOR EXAMPLE, THE LONG-RANGE STATE TRANSPORTATION PLAN). PLEASE ATTACH A COPY OF PUBLISHED MATERIALS.

During the next five years, we would like to have yearly appropriations from the general fund that would keep the account at the $1 million level. All of the projects are of an indeterminate nature since we cannot predict when a spill will occur or its severity, location, chemical composition, or the environmental implications involved.

Chapter 116 SLA 1980 states "the two main purposes of this law are to provide protection to Alaskans from damage from oil spills and to provide the ability to clean up a spill and restore damaged areas."

The increase in oil and chemical development, increase in traffic and shipment of product, increased population and land development all lead to a broader spill experience potential. Our projection for following years will be based on records, experience and continuing projects.

AS 46.04.010 states the Department shall promptly seek reimbursement, either under 46.03.760(e) or from an applicable federal fund, for the expenses it incurs in cleaning up or containing a discharge of oil. Monies received under this section shall be deposited in the general fund.

In most cases the amount of requested appropriation will be offset by revenue received from fines and forfeitures.

FY 86

4. State Hazardous Waste Disposal Day Campaign

- This is the third year that ADEC has conducted this service to assure proper disposal of unregulated hazardous wastes from households and small businesses. This year ADEC requested the 4 municipalities contribute a percentage toward the cleanup. Testing and disposal costs are increasing so rapidly that the state will need to request a significant amount from municipalities next year or reduce services.

II. Site Investigations of Potentially Hazardous Waste Disposal

- In Alaska there are currently 97 potential uncontrolled hazardous waste sites identified on an EPA list. 45 of those sites are being investigated by the Department of Defense, 7 sites are being investigated by EPA, and during the past year ADEC performed preliminary investigations at 45 sites.

- ADEC ranked the 50 sites as to the significance of potential hazards and will be further evaluating 15 of the high ranking sites this summer. These site investigations may disclose potential or actual environmental contamination causing the site(s) to be listed as a federal Superfund site.

- To cope with any necessary remedial action, Alaska will need to establish a state site cleanup fund and hire additional staff to manage any corrective actions required at each site.

III. Drilling Muds and Fluids

- Drilling muds and fluids are excluded from regulation as a hazardous waste under both the federal and state hazardous waste statutes.

- Drilling muds are managed in Alaska under existing solid waste regulations for land disposal. Muds and fluids generated off-shore are regulated either under a state waste water discharge permit or a federal NPDES permits. In many cases muds are stored for re-use and the fluids reinjected into the formation.

- The existing statutes are strong enough to allow development of the states resources and minimize risks to the public and the environment. ADEC is developing internal guidelines for permit review and stipulations to assure consistency as well as protection of the environment considering the diverse geological and climatalogical conditions found in the state.

IV. Waste Oil

1. Oil Spill Expense Reserve

- Established by the 1980 legislature at $1.0 million level for the cleanup and litigation of coastal, inland, and underground oil spills.

- Current balance is $385,000.

- Requested $550,000 for FY 86.

- Expenditures to date - $1.12 million.
  Revenues to date - $1.10 million.

- A major spill cleanup, such as at Nome, can cost $700,000

- Anticipated FY 86 expenditures from the reserve is $300,000.

2. Road Oiling Regulations

- New regulations will become effective May 2, 1985.

- Regulations prohibit the use of contaminated oil on roads as a dust suppressant.

- Regulations define prohibited levels of PCBs, lead, volatile aromatics, and halogenated organics in road oil.

- Analytical testing is required of all road oil and sample analysis must be submitted to DEC before road oil permit is granted.

- Approximately 2 million gallons of waste oil is generated in Alaska per year.

- Approximately 1 million gallons is applied annually to roads in Alaska.

- EPA has stated their intent to ban road oiling throughout the U.S. by May 1987.

- EPA is now reviewing the federal hazardous and solid waste amendments of 1984 to determine whether Alaska and more than 30 other states will be allowed to issue road oiling permits this summer.

- Alternate dust suppressants exist and are in use throughout Alaska.

- Alternate methods of waste oil disposal exist (e.g. burning) but unresolved and logistical problems may limit their use in Alaska.

Dear Commissioner Neve':

Pursuant to our meeting with Dave Walker on November 2, 1984, the attached material is intended to provide background information on the State's Hazardous Waste Program; the intent of SB503, Section 1; an explanation as to how the Degree of Hazard (DOH) approach differs from the Federal regulatory scheme; general issues associated with pursuing a regulatory approach substantially different from the Federal program; and sections of the regulations which need to be deleted to obtain a proper beginning vehicle.

Please feel free to contact me or Tom Brooks if we can provide additional information.

Very truly yours,

WILLIAM W. HOPKINS
Executive Director

ALASKA OIL AND GAS ASSOCIATION
DISCUSSION PAPER ON ADEC HAZARDOUS WASTE PROGRAM
DECEMBER, 1984

BACKGROUND

In 1981 the Alaska State legislature passed AS 46.03, charging the Alaska Department of Environmental Conservation with the task of developing Hazardous Waste Management regulations which are "consistent with and substantially equivalent to" federal regulations. AOGA was informed on November 24, 1981 that the Department would begin preparation of a "plan" for the State's Hazardous Waste Program. In May 1982 AOGA received the first draft of the State's proposed regulations at the May 28, 1982 Hazardous Waste Advisory Work Group Meeting (HWAWG). At this meeting, ADEC discussed its intent to establish a State program parallel to the Federal program; so convincing was ADEC that AOGA's representative reported:

> "ADEC very much wants their Program to be "consistent with and substantially equivalent to" the Federal Program. Although there was a difference of opinion regarding the interpretation of certain complex sections of the Federal Program, I am not as concerned about this difference as I was when I first reviewed the draft regulations. This is because it can be resolved with a close reading of the regulations. The important point is that the State intended to, and thought they had, interpreted the existing regulations. This significantly assuages my concern that the State had been trying to greatly expand their authority in this program, and trying to include regulatory requirements much more restrictive than the existing Federal Program. ADEC was not trying to expand their program, <u>they were trying to interpret and parallel the Federal Program</u>. Interpretation problems are resolvable with some time devoted to discussing the various sections of the regulations in detail, and utilizing the existing background documents from these same discussions which occurred at the Federal level."

It was not until February 7, 1983, that AOGA received the first draft of State regulations which reflected a "Degree of Hazard" (DOH) regulatory mechanism (a mechanism which is patterned after Washington State's program and is divergent from Federal regulations).

It is appropriate at this time to briefly reflect on Washington's Program. Their program began with passage of their Hazardous Waste Disposal Act in 1976. As a result, Washington's program and the Federal program were being developed simultaneously with the basis for Washington's Program being defined by statute.* The Act took the form of three pages of general directives regarding the identification and management of hazardous wastes. Principal among these directives was the establishment of the "two tiered" designation system or "designation-based on degree of risk". The fundamental basis for designating wastes with this early program was biological and other testing.

In late 1980, the issue was again before the Washington legislature. Unfortunately, its designation process was sufficiently complex to preclude any meaningful review by the legislators. There was no discussion at the legislative level of various alternative approaches that would satisfy the State's enabling act, nor was there any realization that the technical complexities of the State agency's program may have been overly complex to meet the need at hand. Fueling the controversy was the fact that a State site (Commencement Bay) was designated a priority cleanup site under Superfund and other examples of egregious past practices were brought to light during the public hearing process. It is likely that these past practices were illegal under either pre-existing State law or the RCRA regulations and would not have been prevented had the new regulations been in place. Nevertheless, public concern led to a demand for "an approach more stringent than the minimum federal requirements". Hence, in late 1980 the State legislature amended the original act to provide authority to bring the State regulations into federal compliance and did not allow the flexibility to parallel the federal program.

Washington State adopted on February 4, 1982, their present regulatory program. It is a combination of the original concept of waste designation based solely on testing and the Federal concept of designation based on rulemaking and simple testing. In its first few years of operation, the program captured 15% more wastes than the Federal RCRA program. Of the incremental wastes captured, most were designated as "dangerous" wastes; a classification not intended by the original State act to receive the comprehensive management strategy that was to be applied to State designated "extremely hazardous wastes" or Federally designated "hazardous wastes".

*NOTE: The U.S. EPA began formulating the national program (RCRA) in 1976. In 1980, RCRA was significantly amended to its present regulatory framework. At this time EPA decided that waste classification based on testing was inappropriate. For a detailed discussion as to EPA's rationale behind this decision, re: FR Vol. 45, #98/May 19, 1980 pages 33164-33165, and 33105.

In 1984, Washington enacted legislation which required the Department of Ecology to conduct studies regarding the "best management practices" for "dangerous" waste disposal. In the interim and until such time as "best management practices" regulations are in place (July 1, 1986) "dangerous" wastes may not be disposed of at commercial, off-site land disposal facilities. "Dangerous" wastes are now being stored or disposed of on site or must be shipped to RCRA disposal sites out of state.

In addition to the State being unable to facilitate the installation of a "dangerous" waste disposal site, the State has also been ineffective over an eight-year period in facilitating the acceptance and/or installation of an in-state disposal site for "hazardous or extremely hazardous" wastes.

Regarding the Alaska program, on March 3, 1983, AOGA informed Mr. Hungerford that the proposed rules of February 7, which reflected the DOH scheme from Washington State, were in need of in-depth technical review and notified him of forthcoming technical comments. On April 6, 1983, AOGA provided ADEC an in-depth technical review of the regulations. These comments were the culmination of extensive efforts by many engineers, marine biologists, toxicologists, attorneys and corporate management level individuals. The Department informed AOGA's representative on the Advisory Group that the ADEC could not expend the money or the manpower to consider AOGA's comments prior to release of a public hearing draft. On April 11, 1983, AOGA strongly requested that the regulations not be released until AOGA's comments could be reviewed and considered.

On April 19, 1983, the regulations were moved to public notice, with no apparent review or consideration of the technical comments provided to ADEC by AOGA. On April 25, 1983, Commissioner Neve' wrote AOGA indicating that the "comments of every member of the work group...were reviewed seriously and did help significantly in the preparation of these draft regulations". On May 25, 1983, at the Public Hearing AOGA stated that we felt that there was a lack of consideration of our industry's input in the development of the April 11, 1983, draft regulations.

By June 8, 1983, AOGA had provided ADEC with extensive oral and written testimony which was developed by the Environmental Committee in conjunction with the following industry experts:

- Joan DiNal, Senior Counsel, Environmental Affairs for Atlantic Richfield Company.
- Michael Hulse, Environmental Analyst, IMCO Services.
- James P. Ray, Ph.D., Manager of Environmental Sciences Support, Shell Oil Company.

- Robert E. Abbott, Ph.D., Coordinator of Environmental Affairs, Conoco Inc.
- Philip Dorn, Ph.D., Shell Development Company.
- Ilene Danse, M.D., Senior Advisor, Environmental Health Protection, Chevron Environmental Health Center, Inc.

The Department issued their latest draft in October 1983 which failed again to address significant concerns which have been repeatedly expressed by our industry. The Department has accepted AOGA's comments on three sets of draft regulations and failed to address the problems identified by AOGA.

AOGA next presented its case to the legislature. During this process, AOGA participated in the drafting of SB503, a piece of legislation which involved a compromise between members of the environmental community, small business, ADEC, AOGA, Labor, the Governor's Office, Sen. Fahrenkamp's office, etc., on key issues, one of which was DOH vs. the Federal Program.

INTENT OF SB503, SECTION 1

The compromise reached between the various parties for the management and control of hazardous waste in Alaska was a very delicate one. Because the legislature did not desire any confusion over the intent of this legislation, it adopted a Letter of Intent drafted by the Senate Resources Committee. The intent of the Legislature was for the Department of Environmental Conservation to "evaluate the most appropriate mechanism by which to identify a waste characteristic of toxicity, persistence or carcinogenicity and other characteristics identified as hazardous by the EPA". In order for a proper and complete analysis to be performed, no prior assumptions can be made as to the "appropriate mechanism" to be used by the State in its hazardous waste program.

Any regulations that are ultimately developed by the Department "must incorporate the results of this analysis" according to the intent letter. The Legislature, by the action of adopting this wording, instructed the Department to make an analysis and evaluation with no preconceived bias or ideas as to the appropriate mechanisms and only after the analysis is completed are the regulations to be drafted.

In summary, the Legislature has instructed ADEC to begin anew on identifying the regulatory mechanism of waste designation.

EXPLANATION OF DOH VS. RCRA

On May 19, 1980, EPA promulgated RCRA regulations that designated wastes by a formal rulemaking process (lists) and four reproducible and supportable characteristic tests. They reviewed various DOH programs and concluded a DOH approach was not an appropriate waste designation mechanism. To qualify for interim authorization, a state program had to encompass all RCRA wastes. In Washington, the two approaches were consolidated, resulting in the most complex designation system in use in the nation.

To briefly summarize, the DOH program is based on the concept that different wastes should be regulated with different procedures based on the degree of risk presented to human health and the environment, as demonstrated by existing biological and other test data or test results produced by generators. Initially, when the DOH approach was being developed it was envisioned that such data would be the sole basis for designating wastes, and that testing (bioassay, etc.) would be mandatory for all generators.

Although not specifically a designation issue, it must be kept in mind that nationally the small quantity generator exclusions are now much lower. If applied to Alaska, particularly without any special provision for small quantity generators, the combination of a much lower quantity exclusion and an extremely complex designation mechanism will result in an unenforceable program.

One of the difficulties inherent in the DOH designation procedure is that there is no adequate or simple means to describe how the federal and state universes of waste compare. No straightforward comparison can be made between a given category of federal wastes and categories defined under the state program. Consequently, the waste generator would often need to retain expert assistance. For example, professional assistance is especially recommended in instances where a waste not regulated under RCRA has "flunked" the state's proposed toxicity bioassay test. Determinations must be made regarding whether the test animals responded adversely to the potential toxic constituents or whether a physiological response to test conditions was involved. Such determinations will be subjective and inconsistent.

Technical complexities aside, the legal theory underlying the DOH regulations represents a marked departure from that embodied in the federal RCRA regulations. The federal regulations specify the criteria that the EPA administrator will consider in adding wastes to the lists in the RCRA regulations. The administrator is to consider potential wastes from the standpoint of toxicity, persistence, bioaccumulation, genetic effects, etc., and then to add appropriate wastes through formal rulemaking procedures. Thus, EPA's approach for developing hazardous waste lists inherently addresses biological considerations but centralizes the testing under EPA.

In contrast, DOH regulations place the burden on each generator to determine whether a waste not otherwise encompassed by the RCRA regulations is part of the state universe of wastes, and as previously stated, this determination may be made based on uncertain test results.

An individual generator's determination that a waste not regulated by RCRA might, for biological or other reasons, be regulated under the DOH regulations does not lead to a conclusive rulemaking. Thus, the process of identifying state regulated wastes is not accompanied by the certainty and procedural due process protections that characterize the listing process at the federal level.

A legal burden of designation is not to be confused with the cost burden of testing. Under both the federal and state regulations, the generator pays testing costs, as is typical of most environmental programs.

A major difficulty with the DOH designation system is that it creates an area of legal and technical vagueness. For example, biological test data can be inconclusive with regard to actual toxicity. The test animals may react adversely to test conditions rather than to the suspected toxic constituents, thus resulting in the over-designation of wastes. To further complicate the bioassay issue, there are no standard bioassay procedures which have been accepted by the scientific community at large. Difficulties may arise if a generator relies on an initial series of bioassay test results that show a waste to be nonhazardous. A subsequent test on the same waste yielding a positive determination of toxicity by the same or yet another generator may result in liability to the generator, who relied on the first series of tests in good faith. In either case, the uncertainties involved in the biological response of laboratory test animals to potentially toxic wastes may create a large gray area of potential liability for generators.

Under the State's proposed regulations, a generator may apply to the state agency for a determination of hazardous or nonhazardous status of a given waste. (This procedure is specific to the individual generator and does not provide notice or opportunity for comment from other generators of similar or related wastes and the scientific community at large.) However, such a certification would still not shield the generator from potential liability in the event of an erroneous certification by the state agency. Again, this ad hoc certification process cannot be viewed as a substitute for the certainty inherent in the federal designation system. In summary, the DOH generator is truly "at risk" to a degree not experienced by generators in the rest of the nation.

GENERAL ISSUES ASSOCIATED WITH PURSUING A REGU TORY APPROACH SUBSTANTIALLY DIFFERENT THAN THE FEDERAL PROGRAM

A substantial departure from the Federal and national trend in hazardous waste management by Alaska will make the State's program continually fraught with inherent technical, legal, and economic problems. Such a program will not be as readily able to take full advantage of the continued evolution or efforts of the Federal program.

The technical aspects of the national program is not the product of a few staff specialists or even the combined effort of one or two states. Rather, the Federal program has been and will continue to be the product of a concerted effort by this country's regulatory agencies, academic/scientific community, private industrial sector and environmental organizations. This effort cannot begin to be equaled by any single state.

As you are probably aware, the management of hazardous wastes is technically and legally complicated and highly controversial. Should the State embark on a program substantially different than the Federal program, Alaska will have to expend considerable amounts of time and resources in pursuing the continued development of a program which will be fraught with continuing implementation, legal, educational and enforcement problems. On the other hand, a state program that parallels the national trend can take full advantage of the billions of dollars this country has and will continue to spend in further evolving and implementing hazardous waste regulations.

Again, a state that is contemplating an approach that differs fundamentally from the Federal program should consider the following questions:

- Will the alternative program, if based on fundamentally different technical theories, isolate the state from the larger body of developing scientific expertise at the national level?

- Will the alternative program, if based on different legal theories, create the need for a divergent trend of judicial interpretation and thereby isolate the state from legal developments at the national level?

- How will a fundamentally different program that is more expansive than its federal counterpart be reconciled with related programs such as Superfund that provide mechanisms for partial federal funding for incidents involving federally designated waters?

- How will the fundamentally different state program relate to the interstate aspects of hazardous waste transport and management? This involves issues of reciprocity and the equity of burdening another state's disposal facilities if the state of origin has not provided ample sites for its own wastes.

- How will a fundamentally different state program be modified to remain consistent with evolving RCRA requirements?

- Does the fundamentally different state program exacerbate the interstate problems of hazardous waste management?

- What is EPA's enforcement interest in an incident involving a nonfederal waste that is considered hazardous in the state of origin but not in the state where the incident occurs? This issue stems from the fact that authorized state programs operate in lieu of RCRA regulations.

- To what extent would a fundamentally different program be delayed in obtaining final authorization?

- Will funding levels by the State be adequate to implement and maintain a program that is technically and legally divergent from the Federal program?

SECTIONS TO BE DELETED TO OBTAIN A PROPER BEGINNING VEHICLE

The following is intended as a list to highlight those major portions of the October 26, 1983, draft which should be deleted, pending a detailed evaluation by the Department:

- 18 AAC 62.010 Definition of Hazardous Wastes
- 18 AAC 62.030 Lists of Hazardous Wastes
- 18 AAC 62.050 Discarded Chemical Products
- 18 AAC 62.060 Characteristic of Toxicity
- 18 AAC 62.070 Characteristic of Persistence
- 18 AAC 62.080 Characteristic of Carcinogenicity
- 18 AAC 62.120 Waste Extraction Procedure (WEP) Characteristic
- 18 AAC 62.140 Exclusions
- Article 5 - Management of Moderate Risk Wastes

For a more detailed discussion, attached are both oral testimony and detailed written comments which were provided to the Department at the May, 1983 Public Hearing.

In addition, attached is an article from the October 26, 1984, Environmental Reporter, entitled EPA Staff Summary of 1984 Amendments to Resource Conservation and Recovery Act. This recent reauthorization addresses the majority of the real or perceived "loopholes" in the RCRA regulations. The reauthorization amendments only reinforce ACGA's contention that the nation's commitment to properly manage hazardous waste is real and a divergence from the Federal program is unnecessary.

Juneau, Alaska 99811

Dear Representative Davis:

Alaska Health Project appreciates your interest in issues concerning hazardous wastes in Alaska. As you may know, I have been directly involved with this issue for about three years at both the state and local level. Reflecting on my involvment in this area brings to mind the need for the Legislature to become more educated about the issue and for the Legislature to decide whether it deems hazardous wastes a priority concern for the future. It is my hope that the oversight hearings, or hearings of that type become the vehicle for this type of education. Further, it is my hope that the Legislature attack that hazardous waste issue in a similar fashion to the way it investigated proposals to develop a full scale petrochemcial industry several years ago. The hazardous waste issue deserves legislative commitment and coordination with state and local agencies, the public and industry.

It is important, in my opinion, that Alaska work hard to develop a preventive approach to hazardous waste, rather than falling into a dangerous trap of simply developing a program that reacts to hazardous materials incidents.

In light of this, certain testimony at the teleconference concerned me. While I agree with industry on the need for some sort of a hazardous waste disposal facility in Alaska (not necessarily a landfill) and with their concern regarding the current time frame for selecting a site, I do not wish to see the development of a site supersede development and implementation of a "total" state hazardous waste program. To develop a disposal facility without a state definition for when a solid waste becomes hazardous could result in serious technical, legal, and political problems down the road.

While I am the first to admit that management programs (such as a disposal site) are perhaps dollar for dollar better at solving problems than a regulatory approach, central to any management approach is a regulatory foundation, which the state currently lacks. It is important that the state define, by regulation, when a waste becomes hazardous thus allowing Alaska to decide on hazardous waste management approaches. Determining

a state definition for hazardous wastes will also help industry with their plans to manage wastes as well as provide incentives for industry to reduce their wastes streams or investigate alternative processes which do not create a hazardous waste as defined by the State of Alaska.

Last year The Department of Environmental Conservation published a set of hazardous waste regulations which define hazardous waste by degree of hazard. While admittedly controversial, this approach provides a good starting point for future discussions. Regardless of the fact that earlier debates addressing this definition scheme resulted in a "cold war" relationship between industry and public interest organizations, it is important to confront this issue directly. Once the state can settle on a hazardous waste definition, all other aspects of the program will fall into place.

Once again, I sincerely appreciate your interest in this issue and I am available to discuss this issue with you at any time.

Cordially,

David Wigglesworth

Statement by ARCO Alaska, Inc.
for Presentation to the
House Oil and Gas Committee
April 24, 1985

By Dr. T.R. Fink, Manager
Environmental Conservation

Waste categories

Waste materials are regulated by both Federal and State requirements. In general, the Federal requirements pertain to hazardous wastes and the State requirements to non-hazardous wastes. All wastes should be handled in an environmentally sound manner. All wastes do not require the same degree of environmental protection.

Wastes are considered hazardous if they are listed as such by the Environmental Protection Agency of if they meet certain characteristics for ignitability, corrosivity, reactivity or toxicity. Diesel fuel and acids are two examples that, when discarded, meet the hazardous characteristics. Household garbage and sewage are solid wastes, not hazardous waste. Drilling mud is a waste common in our industry which is a solid waste but not a hazardous waste.

Alaska must develop a hazardous waste disposal site in the State

There is no hazardous waste disposal site available for general use in Alaska. Even if the various entities involved in the hazardous waste issue in Alaska were to agree on the definition of hazardous waste, the procedures for regulating hazardous waste, and the means for cleaning-up abandored hazardous waste sites, the hazardous waste problem in Alaska will not be resolved until there is a viable disposal option in Alaska. Costs, legal and technical restrictions and political considerations associated with shipping hazardous waste to the Lower 48 preclude it from being the answer for Alaska's hazardous waste.

The State of Alaska must be involved in the development of a hazardous waste management facility

NIMBYS - Not In My Back Yard Syndrome - is alive and well in Alaska. For a hazardous waste management facility to be developed in Alaska, the State of Alaska must be heavily involved. With the active involvement of the State we can take the most important step toward solving Alaska's hazardous waste problems.

The SB 503 timeframe for hazardous waste siting is too slow

SB 503 requires disposal options and sites to be selected by 1989. After disposal options and sites are selected, the permitting and construction phases will require four to five years to complete. Alaska can not afford to wait until the early 1990's to have a safe, permitted disposal option for Alaska hazardous waste.

The 1984 amendments to the Federal hazardous waste program have forced the siting issue to the forefront. The 1984 Federal amendments phase out land disposal, greatly increase the number of hazardous waste generators, require the study and listing of additional materials as hazardous waste, add a citizens's suit provision and increase the penalty provisions. The Amendments increase the cost and decease the options currently available for disposal in the Lower 48. There is no statewide hazardous waste disposal site available in Alaska.

A Governor appointed executive level committee is needed

The hazardous waste siting issue can best be resolved by a Governor appointed executive level committee with representatives from DEC, DNR, local government, environmental groups and industries. The task of the committee would be to develop a plan of action for siting a hazardous waste management facility in Alaska.

MEMORANDUM State of Alaska

TO: Ms. Billie Trent
Administrative Assistant
Department of Environmental
Conservation-Juneau

DATE: February 8, 1984

FILE NO: 122-548-84

TELEPHONE NO: 276-3550

FROM: Norman C. Gorsuch
Attorney General

SUBJECT: State v. Transportes del Este Navegacion, S.A., et al.

By: LL
Madeleine R. Levy
Assistant Attorney General
Natural Resources Section-Anchorage

The recent oil spill from the M/V Cepheus and the hearing on the temporary restraining order (T.R.O.) in that case point out the imminent need to amend AS 46.03.770 and AS 46.03-.765. Section 770 provides for detention of a vessel without warrant for security for oil spill damages assessed under AS 46.03.760(b) as that latter statute existed prior to the 1976 amendments. Under 770, a vessel may be released after posting a bond not to exceed $100,000.00. Prior to 1976, AS 46.03.760(b) permitted the court to assess liquidated damages for an oil spill not to exceed $100,000.00, so the limitation of a bond to $100,000.00 under 770 made sense at that time.

However, in 1976, the legislature repealed and re-enacted AS 46.03.760(b). § 9, ch. 220 SLA 1976. The re-enacted version eliminates <u>any</u> reference to a maximum amount of damages; it states only that damages assessed under section 760 may not be punitive and must be remedial and compensatory in nature. Section 770 should have been contemporaneously repealed and re-enacted to provide for a bond not to exceed the maximum amount of damages available under newly enacted 46.03.760 and 46.03.822. Unfortunately, section 770 was left untouched, but not unaffected, by the 1976 legislative changes.

The above discrepancy came to the forefront when we asked the court to grant the T.R.O. enjoining the Cepheus under AS 46.03.765 from leaving the port of Anchorage until it had complied with the requirements of AS 46.04.040(c) by posting a twenty million dollar bond. Attorneys for the Cepheus' owners argued that the proper remedy was not the requested injunctive relief but, rather, detention and release after posting $100,000.00 bond under AS 46.03.770. While we did prevail on our argument in front of Judge Shortell, we might not be so fortunate in the future. Since section 770 is a vestigial remnant emptied of meaning after the 1976 re-enactments contained in ch 220 SLA 1976, your department should request a bill repealing section 770 as a technical, corrective measure. I would urge you to seek such legislative relief immediately. In order to preserve detention

Department of Law Summary

of a vessel as a remedy under AS 46.03.765, I would suggest requesting the legislature to insert the following language in section 765 when and if 770 is repealed:

> Sec. 46.03.765. Injunctions. The superior court has jurisdiction to enjoin a violation of this chapter or AS 46.04, or of a regulation, a lawful order of the department, or permit, approval, or acceptance, or term or condition of a permit, approval, or acceptance issued under this chapter or AS 46.04. In actions brought under this section, temporary or preliminary relief, INCLUDING DETENTION OF A VESSEL, may be obtained upon a showing of an imminent threat of continued violation, and probable success on the merits, without the necessity of demonstrating physical irreparable harm. The balance of equities in actions under this section may affect the timing of compliance, but not the necessity of compliance within a reasonable period of time.

Please let me know if the Department of Law can be of further assistance in this regard.

RE: Sectional Analysis of H.B. 100

H.B. 100 makes technical, corrective amendments to Title 46; Chapter 3; Section-7 Prohibited Acts and Penalties.

Section 770 of AS 46.03 provides for detention of a vessel without warrant for security for oil spill damages assessed under AS 46.03.760(b).
Currently under this section, posting a bond of not over $100,000 may release a detained vessel. This section is inconsistent with the 1976 amendment to AS 46.03.760, which requires that the amounts assessed be "compensatory and remedial in nature" and not used for punitive purposes. A simultaneous amendment should have been made to AS 46.03.770, but did not occur.

This gap may allow a vessel to post a bond of $100,000, be released from detention, and leave millions of dollars of environmental damage behind

Section 1: Deletes the current $100,000 ceiling and sets the bond at

"an amount not to exceed the maximum amount of damages available under

AS 46.03.758, 46.03.760 and 46.03.822."

AS 46.03.758 pertains to civil penalties for discharges of oil.

AS 46.03.760 pertains to civil action for pollution; damages.

AS 46.03.822 pertains to strict liability for the discharge of hazardous

substances. (Statutes attached.)

Section 2: This amendment is another housekeeping measure. It amends AS 46.03.826(5) defining what actions constitute control of a vessel that will create strict liability for the discharge of hazardous substances under AS 46.03.822.

AS 43.826 only defines what "having control over a hazardous substance" entails; the phrase "owning or" is superfluous to the definition and has been deleted.

Honorable Marco Pignalberi
Alaska State House of Representatives
Pouch V
Juneau, Alaska 99811

Re: Due process and seizure of boats
File No. 366-477-85

Dear Representative Pignalberi:

We are responding to your request for opinion concerning the constitutionality of AS 46.03.770 which authorizes the detention of a vessel which has illegally discharged oil or ballast water; by the terms of § 770, the detention may occur in advance of a hearing to contest the propriety of the detention. You raised this question at a hearing of the House Transportation Committee on HB 100 on the morning of May 1, 1985.

The question was resolved by the Alaska Supreme Court in the case of F/V American Eagle v. State, 620 P.2d 657 (Alaska 1980), which involved a forfeiture proceeding brought against a boat for alleged violations of Alaska's laws regarding the king crab fishery. The vessel was seized by state officials on January 15, 1976 while it was unloading crab in Pelican. The state thereafter filed a complaint for forfeiture of the vessel.

The Alaska Supreme Court held as follows:

> The standards of due process under the Alaska and federal constitutions require that a deprivation of property be accompanied by notice and opportunity for hearing at a meaningful time to minimize possible injury. [citation omitted] Where property allegedly used in an illicit act is confiscated by government officials pending a forfeiture action, no notice or hearing is necessary prior to the seizure. [citation omitted] However, when the seized property is used by its owner in earning a livelihood, notice

> and an unconditioned opportunity to contest the state's reasons for seizing the property must follow the seizure within days, if not hours, to satisfy due process guarantees even where the government interest in the seizure is urgent.

Id. at 666-667.

The American Eagle case involved a statute which, like AS 46.03.770, does not set forth detailed procedures for contesting seizures; rather, an aggrieved owner may proceed under any statute, court rule or legal theory that will afford redress, or the state may bring the matter before the court, as usually occurs. Significantly, the court in American Eagle applied a hindsight test under which it does not require the legislature to map out in advance the administrative or judicial procedures to be followed after a seizure. So long as there is, in fact, "notice and opportunity for hearing at a meaningful time to minimize possible injury," there is no violation of due process. The Alaska Supreme Court reaffirmed these principles last year in State v. F/V Baranof, 677 P.2d 1245 (Alaska 1984).

If we may be of further assistance to you, please do not hesitate to call upon us.

January 10, 1986

The Honorable Jack Coghill
Chairman, Transportation Committee
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Coghill:

This letter is in reference to HB 100 (detention of vessels for oil spill violations) which is now before your committee for consideration. A copy of the bill is enclosed.

This legislation corrects an oversight which occurred when AS 46.03.760(b) was amended in 1976 to remove any ceiling for assessed oil spill damages. A simultaneous amendment should have been made to AS 46.03.770, removing the ceiling on bond limitations pending damage judgments, but that did not happen.

The effect of that oversight is that, while we could detain a vessel to secure $30 million in oil spill damages, that vessel could be released after posting the $100,000 maximum bond now required under § 770.

This serious discrepancy was discovered in January 1984 when the Greek vessel M/V CEPHEUS went aground near Anchorage, spilling in excess of 300,000 gallons of oil into Alaska waters. The State then sought a temporary restraining order and a $20 million bond under AS 46.04.040. Judge Shortell awarded the requested bond only because the vessel was planning to offload in Alaska waters. Had the vessel planned to simply leave Alaska, he would probably have allowed it to do so after posting the $100,000 bond.

DEC Position Paper

After the close call in the courtroom, the Attorney General's office suggested immediate amendment to § 770. It was stated that:

> Section 770 should have been contemporaneously repealed and reenacted [with § 760(b)] to provide for a bond not to exceed the maximum amount of damages available under newly enacted 46.03.760 and 46.03.822. Unfortunately, section 770 was left untouched, but not unaffected, by the 1976 legislative changes.

I trust this summary conveys the importance of this legislation, but please let me know whether you require anything further. I would appreciate your using your good offices to see that this bill receives a hearing in your committee early enough in the session to assure its becoming law this year.

Sincerely,

Bill Ross

Re: Due process and seizure of boats
File No. 366-477-85

Dear Representative Pignalberi:

We are responding to your request for opinion concerning the constitutionality of AS 46.03.770 which authorizes the detention of a vessel which has illegally discharged oil or ballast water; by the terms of § 770, the detention may occur in advance of a hearing to contest the propriety of the detention. You raised this question at a hearing of the House Transportation Committee on HB 100 on the morning of May 1, 1985.

The question was resolved by the Alaska Supreme Court in the case of F/V American Eagle v. State, 620 P.2d 657 (Alaska 1980), which involved a forfeiture proceeding brought against a boat for alleged violations of Alaska's laws regarding the king crab fishery. The vessel was seized by state officials on January 15, 1976 while it was unloading crab in Pelican. The state thereafter filed a complaint for forfeiture of the vessel.

The Alaska Supreme Court held as follows:

> The standards of due process under the Alaska and federal constitutions require that a deprivation of property be accompanied by notice and opportunity for hearing at a meaningful time to minimize possible injury. [citation omitted] Where property allegedly used in an illicit act is confiscated by government officials pending a forfeiture action, no notice or hearing is necessary prior to the seizure. [citation omitted] However, when the seized property is used by its owner in earning a livelihood, notice

> and an unconditioned opportunity to contest the state's reasons for seizing the property must follow the seizure within days, if not hours, to satisfy due process guarantees even where the government interest in the seizure is urgent.

Id. at 666-667.

The American Eagle case involved a statute which, like AS 46.03.770, does not set forth detailed procedures for contesting seizures; rather, an aggrieved owner may proceed under any statute, court rule or legal theory that will afford redress, or the state may bring the matter before the court, as usually occurs. Significantly, the court in American Eagle applied a hindsight test under which it does not require the legislature to map out in advance the administrative or judicial procedures to be followed after a seizure. So long as there is, in fact, "notice and opportunity for hearing at a meaningful time to minimize possible injury," there is no violation of due process. The Alaska Supreme Court reaffirmed these principles last year in State v. F/V Baranof, 677 P.2d 1245 (Alaska 1984).

If we may be of further assistance to you, please do not hesitate to call upon us.

RECEIVED
MAY 9 1985
DEPARTMENT OF
ENVIRONMENTAL CONSERVATION

Re: HB 100

Dear Representative Sund:

In a meeting of the House Resources Committee on HB 100 yesterday, there was some uncertainty about section two of the bill, which deletes the words "owning or" from AS 46.03.826(5). That provision currently provides that "owning or having control over a hazardous substance means producing, handling, storing, transporting or refining a hazardous substance...."

The problem the definition creates is this: The law imposes strict liability for hazardous substance spills on two classes of persons: (1) those who hold title to the substance, i.e., the owners; and (2) those who have control of the substance, e.g., the transporters or refiners. See AS 46.03.822. However, AS 46.03.826(5) defines "owners" to include only producers, handlers, storers, transporters or refiners; the definition of "owners" omits from the list of liable persons that person who actually has title to the substance. That omission may let the actual owner of the hazardous substance (who is blameworthy for selecting the handlers, transporters and refiners) off scot-free if a spill occurs.

The word "owner" has a clear definition in the common law and common usage. It is not necessary to define the term in the statute because the common law and common usage provide the definition applied in the Alaska courts. AS 01.10.010; AS 01.10.040. By removing the term from the definition section, we preserve its commonly-understood meaning and insure that both the owner's agents and the owner may be held strictly liable for

hazardous substance spills. This amendment is essential to insure the correct application of the law in the courts.

Thank you for you attention to our concerns.

Sincerely,

NORMAN C. GORSUCH

HOUSE BILL 100

DETENTION OF VESSELS FOR OIL SPILL VIOLATIONS

BEFORE THE ALASKA SENATE
February 27, 1986
11:00 a.m.

PURPOSE

HB 100 makes AS 46.03.770 consistent with itself, and with AS 46.03.760, to assure that the State will have enough "money in hand" to cover any damage done in the event of an oil spill.

BACKGROUND

When enacted, AS 46.03.760 provided for penalties not to exceed $100,000. In 1976, that statute was amended to remove any ceiling on assessed damages, but AS 46.03.770 retains an outdated reference to AS 46.03.760 and limits to $100,000 any bond posted in lieu of vessel detention.

This renders § 770 inconsistent with itself, and the reference to 760(b) no longer makes sense.

Under the current law, the State could hold a vessel to secure $30 million in oil spill damages, but that vessel could leave Alaska after posting a $100,000 bond. Such a scenario does not provide the type of cost recovery guarantee that adequately protects state interests.

IMPETUS FOR HB 100

This serious discrepancy was discovered when the Greek vessel M/V CEPHEUS went aground near Anchorage, spilling in excess of 300,000 gallons of oil into Alaska waters.

The judge in that matter ruled that a $20 million bond was necessary (based on the $20 million financial responsibility requirement elsewhere in the law) because the vessel planned to continue offloading in Alaska waters. Had the vessel planned to simply leave Alaska, he would probably have allowed it to do so after posting the $100,000 bond.

AS 46.03.770 should have been contemporaneously repealed and reenated with § 760(b) to provide for a bond not to exceed the maximum amount of damages available under newly enacted 46.03.760 and 46.03.822.

---

*Sec. 2, amending AS 46.03.826(5), merely restores the original, common sense meaning of the term "owner."

Attorney General

RE: Attached bill regarding detention of vessels for security for oil-pollution damages
Our file: 377-001-85

Attached is a bill that was requested by the Department of Environmental Conservation, and approved by your office on July 30, 1984. The bill simply makes the bond posting provision in the statute on detention of vessels involved in oil spills consistent with the 1976 amendment of the statute providing for damages for oil pollution. This is intended as a simple, but important, housekeeping amendment.

A nearly identical bill, SB 534 (Department of Law file no. 377-136-84), was prepared by this department last year, and was introduced by the Senate Resources Committee. That bill was still in committee when the legislature adjourned. The version which is presented now adds one technical change. Section 2 clarifies the definition of "owner" with regard to strict liability for oil spills and other hazardous substances. This, too, is merely a technical housekeeping amendment.

Also attached is a draft transmittal letter to the legislature.

Dept. of Environmental Conservation
NOV 8 10 51 AM

D R A F T

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill relating to the detention of vessels as security for oil-pollution damages and clarification of a definition relating to discharge of hazardous substances. This bill is intended to correct two statutory oversights brought to light as a result of the January 21, 1984 oil spill from the M/V Cepheus.

AS 46.03.760, providing for civil actions for pollution, and AS 46.03.770, providing for detention of vessels as security for oil-pollution damages, were both enacted by ch. 120, SLA 1971. As enacted, AS 46.03.760(b) set a maximum of $100,000 for liquidated damages to be assessed by the court in an oil-pollution case. And, as enacted, AS 46.03.770 provided for the court to release a detained vessel upon posting of a bond set by the court in an amount not to exceed $100,000. AS 46.03.770 referred to AS 46.03.760(b), and the two $100,000 provisions were compatible with each other.

However, in 1976, along with other amendments, AS 46.03.760(b) was amended to remove the $100,000 liquidated damages maximum, but AS 46.03.770 was not correspondingly amended. It has never been amended. This bill seeks to correct that oversight. It removes the reference to $100,000 and inserts a reference (in two places) to the

relevant civil penalty and damages statutes that were enacted and amended after AS 46.03.770 was enacted.

Second, AS 46.03.822 provides for strict liability for the discharge of hazardous substances, including oil, for a person owning or having control over the hazardous substance prior to its discharge. "Owning or having control over a hazardous substance" is presently defined in AS 46.03.826(5) in a manner which arguably negates the common sense definition of an owner. Section 2 of this bill corrects that problem by eliminating the word "owner" from the statutory definition section, thereby restoring the original meaning of that word.

Sincerely,

Bill Sheffield
Governor

IN THE HOUSE BY THE RESOURCES COMMITTEE

SENATE CS FOR HOUSE BILL NO. 100 (Resources)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to detention of vessels as security for oil-pollution damages; clarifying a definition relating to discharge of hazardous substances; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 46.03.770 is amended to read:

Sec. 46.03.770. DETENTION OF VESSEL WITHOUT WARRANT AS SECURITY FOR DAMAGES. A vessel that [WHICH] is used in or in aid of a violation of AS 46.03.740 - 46.03.750 may be detained after a valid search by the department, an agent of the department, a peace officer of the state, or an authorized protection officer of the Department of Fish and Game. Upon judgment of the court having jurisdiction that the vessel was used in, or was the cause of, a violation of AS 46.03.740 - 46.03.750 with knowledge of its owner or under circumstances indicating that the owner should reasonably have had this knowledge, the vessel may be held as security for payment to the state of the amount of damages assessed by the court under AS 46.03.758, 46.03.760, and 46.03.822. If [AS 46.03.760(b), AND IF] the damages [SO] assessed are not paid within 30 days after judgment or final determination of an appeal, the vessel shall be sold at public auction, or as otherwise directed by the court, and the damages paid from the proceeds. The balance, if any, shall be paid by the court to the owner of the vessel. The court shall permit the release of the vessel upon posting of a bond set by the court in an amount not to exceed the maximum

amount of damages available under AS 46.03.758, 46.03.760, and 46.03.822 [$100,000]. The damages received under this section shall be transmitted to the proper state officer for deposit in the general fund. A vessel seized under this section shall be returned or the bond exonerated if no damages are assessed under AS 46.03.758, 46.03.760, or 46.03.822 [AS 46.03.760(b)].

* Sec. 2. AS 46.03.826(5) is amended to read:

(5) "[OWNING OR] having control over a hazardous substance" means producing, handling, storing, transporting, or refining a hazardous substance for commercial purposes immediately before entry of the hazardous substance in or upon the waters, surface, or subsurface lands of the state, and specifically includes bailees and carriers of a hazardous substance;

* Sec. 3. This Act takes effect immediately in accordance with AS 01.-10.070(c).

Introduced: 2/6/76
Referred: Resources

IN THE SENATE

BY THE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

SPONSOR SUBSTITUTE FOR SENATE BILL NO. 267 am H (e.date added) re-engrossed

IN THE LEGISLATURE OF THE STATE OF ALASKA

NINTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the Department of Environmental Conservation; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 46.03.020(10)(C) is amended to read:

(C) protection of public water supplies by establishing minimum drinking water standards, and [SETTING] standards for the construction, improvement, and maintenance of public water supply systems;

* Sec. 2. AS 46.03.030(b) is amended to read:

(b) The department may grant [PAY] to a municipality, as funds are available, up to the lesser of 50 [25] per cent of the eligible [ESTIMATED] cost or 50 per cent of the eligible [ESTIMATED] cost not financed [BORNE] by the federal government, [IF THERE IS FEDERAL ASSISTANCE,] for [OF] public water supply, treatment and distribution systems and public sewage collection, treatment and discharge facilities for which construction has not commenced on or before the effective date of this Act [SYSTEMS, INCLUDING COLLECTION AND IMPOUNDING FACILITIES, AND OF THOSE PORTIONS OF SEWERAGE SYSTEMS NOT COVERED BY (a) OF THIS SECTION]. The eligible [ESTIMATED] cost of a project or portions of a project [ANY PART OF A SYSTEM] will be as determined by the federal agency granting [WHICH GIVES] the most monetary assistance [OR, IF NONE, BY THE DEPARTMENT]. On projects or portions of projects, for which federal participation is not available, eligible costs will be determined by the department. Projects [SYSTEMS] shall be constructed

Original Legislation

in accordance with [ACCORDING TO] plans and specifications approved by [THE FEDERAL AGENCY WHICH GIVES THE MOST MONETARY ASSISTANCE OR, IF NONE, BY] the department.

* Sec. 3. AS 46.03.100(a) is amended to read:

(a) A person who conducts an [A COMMERCIAL OR INDUSTRIAL] operation which results in the disposal of solid or liquid waste material or heated process or cooling water into the waters or onto the land of the state must procure a permit from the department before disposing of the waste material or water. The permit must be obtained for direct disposal and for disposal into publicly operated sewerage systems.

* Sec. 4. AS 46.03.110(a) is amended to read:

(a) An application for a permit shall be made on forms prescribed by the department or on forms prescribed by the United States Environmental Protection Agency and shall contain the name and address of the applicant, a description of his operations, the quantity and type of waste material sought to be disposed of, the proposed method of disposal, and any other information considered necessary by the department. Application for permit shall be made at least 60 days before commencement of a proposed discharge.

* Sec. 5. AS 46.03.110 is amended by adding a new subsection to read:

(e) If the department has certified a National Pollutant Discharge Elimination System permit under sec. 401 of the Federal Water Pollution Control Act Amendments of 1972 (33 U.S.C. Sec. 1341), and the United States Environmental Protection Agency has issued that permit to a person, the department may waive the requirements of this section, and adopt the federal permit as the permit required under sec. 100 of this chapter.

* Sec. 6. AS 46.03.180 is amended to read:

Sec. 46.03.180. CONFIDENTIALITY OF RECORDS. Records and information other than emission data in the possession of the department which relate to production or sales figures or to processes or production techniques of the owner or operator of an air contaminant source are considered confidential records of the department after application by the party and certification that their public disclosure would tend to adversely affect his competitive position.

* Sec. 7. AS 46.03.720 is amended to read:

Sec. 46.03.720. CONSTRUCTION AND OPERATION OF CERTAIN FACILITIES PROHIBITED. (a) No person may construct, extend, install or operate a sewerage [SEWAGE] system or treatment works, or any part of a sewerage [SEWAGE] system or treatment works, until plans for it are submitted to the department for review[,] and the department approves them in writing and issues a written permit. [THE DEPARTMENT MAY WAIVE THE REQUIREMENT THAT PLANS BE SUBMITTED TO IT.]

(b) No person may construct, extend, install or operate a public water supply system, or any part of a public water supply system until plans for it are submitted to the department for review and the department approves them in writing.

(c) The department may waive the requirements of this section.

* Sec. 8. AS 46.03 is amended by adding a new section to read:

Sec. 46.03.755. DISCHARGE REPORTING. (a) A person in charge of a facility, operation or vessel, as soon as he has knowledge of any discharge from the facility, operation or vessel in violation of secs. 740 or 750 of this chapter, shall immediately notify the department of the discharge.

(b) Notwithstanding (a) of this section, the department may enter into a written agreement with a person for the periodic reporting of minor discharges other than into the waters of the state.

* Sec. 9. AS 46.03.760 is repealed and re-enacted to read:

Sec. 46.03.760. CIVIL ACTION FOR POLLUTION; DAMAGES. (a) A person who violates or causes or permits to be violated a provision of this chapter or a regulation, a lawful order of the department, or a permit or term or condition of a permit issued under this chapter is liable, in a civil action, to the state for a sum to be assessed by the court of not less than $500, nor more than $100,000 for the initial violation, nor more than $5,000 for each day thereafter on which the violation continues, and which shall reflect, where applicable:

(1) reasonable compensation in the nature of liquidated damages for any adverse environmental effects caused by the violation, which shall be determined by the court according to the toxicity, degradability and dispersal characteristics of the substance discharged, the sensitivity of the receiving environment, and the degree to which the discharge degrades existing environmental quality;

(2) reasonable costs incurred by the state in detection, investigation, and attempted correction of the violation; and

(3) the economic savings realized by the person in not complying with the requirement for which a violation is charged.

(b) Actions under this section may not be used for punitive purposes, and sums assessed by the court must be compensatory and remedial in nature.

(c) The court, upon motion of the department or upon its own motion, may defer assessment of all or part of that portion of the sum imposed upon a person under (a)(3) of this section conditioned upon the person complying, within the shortest feasible time, with the requirement for which a violation is shown.

(d) As used in this section, "economic savings" means that sum which a person would be required to expend for the planning, acquisi-

tion, siting, construction, installation and operation of facilities necessary to effect compliance with the standard violated.

(e) In addition to liability under (a)--(d) of this section, a person who violates or causes or permits to be violated a provision of secs. 740--750 of this chapter is liable to the state, in a civil action, brought under sec. 822 of this chapter, for the full amount of actual damages caused to the state by the violation, including direct and indirect costs associated with the abatement, containment or removal of the pollutant, restoration of the environment to its former state, and all incidental administrative costs.

* Sec. 10. AS 46.03 is amended by adding a new section to read:

Sec. 46.03.765. INJUNCTIONS. The superior court has jurisdiction to enjoin a violation of this chapter, or of a regulation, lawful order of the department, or permit or term or condition of a permit issued under this chapter. In actions brought under this section, temporary or preliminary relief may be obtained upon a showing of an imminent threat of continued violation, and probable success on the merits, without the necessity of demonstrating physical irreparable harm. The balance of equities in actions under this section may affect the timing of compliance, but not the necessity of compliance within a reasonable period of time.

* Sec. 11. AS 46.03.790 is repealed and re-enacted to read:

Sec. 46.03.790. CRIMINAL PENALTIES. (a) A person who violates or who causes or permits a violation of a provision of this chapter, or of a regulation, lawful order of the department, or permit or term or condition of a permit issued under this chapter is guilty of a misdemeanor, and, upon conviction, shall be punished by a fine of not more than $25,000 and costs of prosecution.

(b) A person who wilfully violates a provision of this chapter, or

of a regulation, lawful order of the department, or permit or term or condition of a permit issued under this chapter is guilty of a misdemeanor, and, upon conviction, shall be punished by a fine of not more than $25,000 and costs of prosecution, or by imprisonment for not more than one year, or by both fine, costs, and imprisonment.

(c) Each day on which a violation described in (a) or (b) of this section occurs is considered a separate violation.

(d) A person who fails to provide or falsely states information required under sec. 755 of this chapter is guilty of a misdemeanor, and, upon conviction, is punishable by a fine of not more than $25,000, or by imprisonment for not more than one year, or by both. Each unlawful act constitutes a separate offense.

* Sec. 12. AS 46.03.810(a) is amended to read:

(a) A person is guilty of creating or maintaining a nuisance if he

(1) places or deposits upon a lot, street, beach, or premises, or upon[,] or anywhere within 200 feet of a public highway, [UNLESS THE HIGHWAY ABUTS UPON TIDAL WATER,] any garbage, offal, dead animals, or any other matter or thing, which would be obnoxious or cause the spread of disease or in any way endanger the health of the community;

(2) allows to be placed or deposited upon any premises owned by him or under his control garbage, offal, dead animals, or any other matter or thing which would be obnoxious or offensive to the public or which would produce, aggravate, or cause the spread of disease or in any way endanger the health of the community.

* Sec. 13. AS 46.03.822 is amended to read:

Sec. 46.03.822. STRICT LIABILITY FOR THE DISCHARGE OF HAZARDOUS SUBSTANCES. To the extent not otherwise preempted by federal law, a

person owning or having control over a hazardous substance which enters in or upon the waters, surface or subsurface lands of the state is strictly liable, without regard to fault, for the damages to persons or property, public or private, caused by the entry. [IF AN ACTION IS BROUGHT BY THE STATE TO RECOVER DAMAGES FOR OIL POLLUTION, LIABILITY IS LIMITED AS SPECIFIED IN SEC. 760(b) OF THIS CHAPTER.] In an action to recover damages, the person is relieved from strict liability, without regard to fault, if he can prove

(1) that the hazardous substance to which the damages relate entered in or upon the waters, surface or subsurface lands of the state solely as a result of

(A) an act of war,

(B) an intentional act or a negligent act of a third party, other than a party (or its employees) in privity of contract with, or employed by, the person,

(C) negligence on the part of the United States government or the State of Alaska, or

(D) an act of God; and

(2) in relation to (1)(B), (C) or (D) of this section, that he discovered the entry of the hazardous substance in or upon the waters, surface or subsurface lands of the state and began operations to contain and clean up the hazardous substance within a reasonable period of time.

* Sec. 14. AS 46.03 is amended by adding a new section to read:

Sec. 46.03.850. COMPLIANCE ORDER. (a) When, in the opinion of the department, a person is violating or is about to violate a provision of this chapter or a regulation or lawful order of the department, or a permit or a term of a permit issued by the department, the department may notify the person of its determination by personal service or

certified mail. The determination and notice do not constitute an order under sec. 820 of this chapter.

(b) The recipient of the determination must file with the department, within the time period specified in the notice, a report stating what measures have been and are being taken, or are proposed to be taken, to correct or control the conditions outlined in the notice.

(c) After the report is filed under (b) of this section or the time period specified for it has elapsed, the department may issue a compliance order in conformity with the authority of the department and the public policy declared in sec. 10 of this chapter. A copy of the compliance order shall be served personally or sent by certified mail to the person affected. A compliance order is effective upon receipt.

(d) Within 30 days after receipt, the recipient may request a hearing to review the compliance order. Failure to request a hearing within 30 days after the receipt of a compliance order constitutes a waiver of the recipient's right of review.

(e) The department shall hold a hearing within 20 days after receipt of a request for one under (d) of this section. After the hearing, the department may rescind, modify or affirm the compliance order.

(f) The attorney general shall seek enforcement of a compliance order.

* Sec. 15. AS 46.03 is amended by adding a new section to read:

Sec. 46.03.875. REMEDIES CUMULATIVE. All remedies provided by this chapter are cumulative, and the securing of relief, whether injunctive, civil or criminal, under a section of this chapter does not estop the state from obtaining relief under any other section of this chapter.

* Sec. 16. AS 46.03.900(12) is amended to read:

(12) "other wastes" means garbage, refuse, decayed wood, sawdust, shavings, bark, trimmings from logging operations, sand, lime cinders, ashes, offal, oil, tar, dyestuffs, acids, chemicals, <u>heat from cooling or other operations,</u> and other substances not sewage or industrial waste which may cause or tend to cause pollution of the waters of the state;

* Sec. 17. AS 46.03.900(20) is amended to read:

(20) "standard" means the measure of purity or quality for <u>air, water, and land</u> [WATERS] in relation to their reasonable and necessary use as established by the department;

* Sec. 18. AS 44.62.330 is amended by adding a new paragraph to read:

(43) Department of Environmental Conservation, except to the extent that secs. 360--400 of this chapter are inconsistent with the manner in which proceedings are initiated under the provisions of AS 46.03.

* Sec. 19. AS 46.03.030(a), 46.03.130, 46.03.230(a), 46.03.240 and 46.03.750(d) are repealed.

* Sec. 20. This Act takes effect immediately in accordance with AS 01.10.070(c).

ballast water from a cargo tank of a tank vessel into the waters of the state. A tank vessel may not take on petroleum or a petroleum product or by-product as cargo unless it arrives in ports in the state without having discharged ballast from cargo tanks into the waters of the state and the master of the vessel certifies that fact on forms provided by the department.

(b) The master of a tank vessel may discharge ballast water from a cargo tank of his tank vessel if it is necessary for the safety of the tank vessel and no alternative action is feasible to assure the safety of the tank vessel. (§ 3 ch 120 SLA 1971; am § 19 ch 220 SLA 1976; am § 3 ch 266 SLA 1976; am § 3 ch 116 SLA 1980)

Cross references. — As to discharge of ballast into navigable waters, see AS 30.50.020.

Effect of amendments. — The 1980 amendment rewrote this section.

Editor's notes. — Section 11, ch. 266, SLA 1976, provides: "Severability. If any provision of this Act or the application of it to any person or circumstance is held invalid, particularly those provisions that establish incentives for carriers to use vessels with certain safety or maneuvering capability features, the remainder of this Act and the application to other persons or circumstances, including but not limited to those provisions which create a coastal protection fund, shall not be affected."

Sec. 46.03.755. Discharge reporting. (a) A person in charge of a facility, operation or vessel, as soon as he has knowledge of any discharge from the facility, operation or vessel in violation of AS 46.03.740 or 46.03.750 shall immediately notify the department of the discharge.

(b) Notwithstanding (a) of this section, the department may enter into a written agreement with a person for the periodic reporting of minor discharges other than into the waters of the state. (§ 8 ch 220 SLA 1976; am § 4 ch 266 SLA 1976; am § 4 ch 116 SLA 1980)

Effect of amendments. — The 1980 amendment deleted "or AS 30.25.020" following "46.03.750" in subsection (a).

Editor's notes. — Section 11, ch. 266, SLA 1976, provides: "Severability. If any provision of this Act or the application of it to any person or circumstance is held invalid, particularly those provisions that establish incentives for carriers to use vessels with certain safety or maneuvering capability features, the remainder of this Act and the application to other persons or circumstances, including but not limited to those provisions which create a coastal protection fund, shall not be affected."

Sec. 46.03.758. Civil penalties for discharges of oil. (a) The legislature finds that

(1) recent information discloses that the discharge of oil may cause significant short and long-term damage to the state's environment. Even minute quantities of oil released to the environment may cause high mortalities among larval and juvenile forms of important commercial species, may affect salmon migration patterns, and may otherwise degrade and diminish the renewable resources of the state;

(2) the exact nature and extent of oil pollution can be neither documented with certainty nor precisely quantified on a spill-by-spill basis; however, in light of the magnitude of harm which may be caused by oil discharges, and the vital importance of commercial, sport and subsistence fishing, tourism, and Alaska's natural abundance and beauty to the economic future of the state, and its quality of life, it is the judgment of the legislature that substantial civil penalties should be imposed for the discharge of oil, in order to provide a meaningful incentive for the safe handling of oil and to insure that the public does not bear substantial losses from oil pollution for which, because of its subtle, long-term or unquantifiable nature, compensation would not otherwise be received; and

(3) the handling of oil in large quantities is a hazardous undertaking which poses a significant threat to the economy and environment of the state, which can be substantially reduced only by the taking of rigorous safety precautions involving considerable expense; conversely, persons handling oil in smaller amounts pose a correspondingly lower risk to the economy and environment of the state, and are capable of safe oil handling practices at correspondingly lower costs; in order to provide an incentive which is effective, but not punitive, it is necessary and appropriate that the assessment of civil penalties for discharges of small quantities of oil be left for case-by-case judicial determination, while insuring, through the penalty provisions of this section, that the handling of oil in large quantities occurs in a manner which will not impair the renewable resources of the state.

(b) No later than the 10th day after the convening of the Second Session of the Tenth Alaska Legislature, the department shall submit to the legislature regulations establishing the following schedule of fixed penalties for discharges of oil:

(1) Subject to (3) of this subsection, the penalties for the following categories of receiving environments may not exceed

(A) $10 per gallon of oil which enters an anadromous stream or other freshwater environment with significant aquatic resources;

(B) $2.50 per gallon of oil which enters an estuarine, intertidal or confined saltwater environment; and

(C) $1 per gallon of oil which enters an unconfined saltwater environment, public land or freshwater environment without significant aquatic resources.

(2) For discharges of oil which are caused by the gross negligence or intentional act of the discharger, or when the court finds that the discharger did not take reasonable measures to contain and clean up the discharged oil, the penalty shall be determined by multiplying the penalty established under (1) of this subsection by a factor of five.

(c) Regulations adopted under (b) of this section shall become effective 60 days after submission to the legislature, unless disapproved by a special concurrent resolution introduced in either house, and con-

curred in by a majority of the members in joint session within 60 days of the submission of the regulations. The department may periodically revise regulations adopted under (b) of this section. Revised regulations shall be submitted to the legislature no later than 10 days after the convening of the appropriate regular session of the legislature, and are subject to disapproval as specified in this subsection.

(d) The schedule shall vary according to the toxicity, degradability and dispersal characteristics of the oil. The schedule shall also vary according to the sensitivity and productivity of the receiving environment. Variations under this subsection may be by subcategories of receiving environments, specific receiving environments, or both. The maximum penalties established in (b) of this section shall apply to discharges in the most sensitive and productive of receiving environments within each category of receiving environment, and the penalty shall decrease for less productive or sensitive receiving environments.

(e) Upon the effective date of regulations adopted under (b) of this section, if a discharge of oil in excess of 18,000 gallons not permitted under applicable state and federal law occurs within the territorial jurisdiction of the state, or into or upon the adjacent outer continental shelf of the state, the following persons, in addition to the person causing or permitting the discharge, are jointly and severally liable to the state, in a civil action, for the full amount of penalties established in the regulations, or $100,000,000, whichever is less,

(1) if the discharge occurs from any commercial or industrial facility other than a vessel or offshore platform, the owner, lessee (or permittee), and operator of the facility;

(2) if the discharge occurs from a vessel,

(A) the owner and operator of the vessel; and

(B) the owner of the oil carried as cargo on the vessel at the time the vessel was loaded, if the loading occurred within the territorial jurisdiction of the state, or at a deepwater port or other offshore storage facility adjacent to the state; however, if the owner of the oil temporarily transfers ownership of the oil to another person, and the transfer has the purpose or effect of evading the vicarious liability imposed by this section, the transferor will be considered the owner of the oil for the purposes of this subsection; and

(3) if the discharge occurs from an offshore platform, the lessee (or permittee) of the tract or acreage upon which the platform is situated, and the operator of the platform.

(f) The court shall deduct from the penalties for which the person charged is liable under (e) of this section that amount of oil which was removed from the environment as a result of a cleanup operation undertaken in conformity with applicable state and federal law, unless the oil was removed by an agency of state, local or federal government. The dispersal of oil through the use of chemical agents or other means is not considered removal for the purposes of this subsection. The court may estimate the amount of oil removed.

(g) Except as provided in (f) and (j) of this section, the entire penalty specified in the regulations shall be imposed, except that a person who discharges oil into a receiving environment may demonstrate, by a preponderance of evidence, that mitigating circumstances relating to the effects of the discharge would make imposition of the full penalty inappropriate. In determining whether mitigating circumstances exist, the court shall recognize that scientific knowledge pertaining to oil spills is very limited and if there is insufficient knowledge either to predict a base case or to show mitigating circumstances varying from that base case, the administratively established schedule of penalties shall apply. If mitigating circumstances are proven by a preponderance of the evidence, the court may reduce or totally eliminate the penalty, in accordance with the purposes of this section.

(h) A person otherwise liable for penalties under (e) of this section is not liable if he demonstrates, by a preponderance of the evidence, that the discharge occurred solely as a result of

(1) an act of God;

(2) an act of a third person with intent to cause a discharge, unless the third person is a person with whom the person charged is made jointly and severally liable under (e)(1) — (3) of this section;

(3) a negligent or intentional act of the State of Alaska or the United States; or

(4) an act of war.

(i) Notwithstanding AS 46.03.875, a person liable under this section is not also liable for the discharge of oil under AS 46.03.760(a). A person causing or permitting a discharge of oil of 18,000 gallons or less not permitted under applicable state or federal law is liable for that discharge under the penalty provisions of AS 46.03.760(a); however, the court may impose a penalty of less than $500 for the discharge.

(j) The court may reduce the penalty imposed under this section if the person charged demonstrates, by a preponderance of the evidence, that the discharge was caused solely by a negligent act of a third person, unless the third person is a person with whom the person charged is made jointly and severally liable under (e)(1) — (3) of this section.

(k) Penalties received by the state under this section shall be deposited in the general fund and credited to a special account called the "oil spill mitigation account". The legislature may annually appropriate from the oil spill mitigation account a sum equivalent to the amount of penalties received under this section for the calendar year preceding the legislative session in which the appropriation is made, the appropriations to be made for the purpose of restoring and enhancing environments affected by oil pollution, including but not limited to the funding of aquaculture projects.

(l) As used in this section,

(1) "adjacent outer continental shelf" means that portion of the outer continental shelf which would be within the territorial jurisdiction of the state if its boundaries were extended seaward to the outer margin of the outer continental shelf;

(2) "confined saltwater environment" means a bay, sound or other partially enclosed saltwater body in which flushing through tidal or current action is significantly restricted;

(3) "discharge of oil" means the entry of oil into or upon the water or public land of the state (except oil discharges into an enclosed and impervious oil spill containment area), regardless of causation;

(4) "intertidal" means the ocean area between highest high water and lowest low water of tidal action;

(5) "offshore platform" means an offshore structure, whether floating or temporarily or permanently secured to the floor of the ocean or other water body, which is used primarily for the exploration for or production of oil or natural gas;

(6) "oil" means petroleum, crude oil, and any substance refined from petroleum or crude oil;

(7) "operator" means the person who, through contract, lease, sublease or otherwise, exerts general supervision and control of activities at the facility; the term includes, by way of example and not limitation, prime or general contractors, the master of a vessel (and his employer), or any other person who, through himself, his agents, or contractors, undertakes the general functioning of the facility;

(8) "vessel" means any form or manner of watercraft, whether or not capable of self-propulsion, except offshore platforms. (§ 1 ch 129 SLA 1977; am §§ 1-3 ch 128 SLA 1978; am § 110 ch 59 SLA 1982)

Cross references. — For provision that actions brought under this section may be brought directly against insurers or other persons providing evidence of financial responsibility, see AS 46.04.040(e).

Effect of amendments. — The 1978 amendment substituted the language beginning "and appropriate that the assessment of civil penalties" for "that the civil penalties imposed reflect a balance between the gravity of the discharge, the magnitude of risk, and the level of incentive necessary to induce safe operations" at the end of paragraph (3) of subsection (a), inserted "in excess of 18,000 gallons" near the beginning of the introductory paragraph of subsection (e), and added the second sentence of subsection (i).

The 1982 amendment, effective May 28, 1982, deleted "notwithstanding AS 30.25.20(b)" preceding "penalties" at the beginning of subsection (k).

Editor's notes. — Section 3, ch. 129, SLA 1977, provides: "If the application of AS 46.03.758 to discharges of oil solely into and upon the adjacent outer continental shelf of the state is held invalid, the application of that section to discharges of oil into and upon the water or public land within the territorial jurisdiction of the state is not affected by that holding. This severability provision is intended to clarify and not limit the severability provision of AS 01.10.030."

The schedule of civil penalties required by (b) of this section may be found at 18 AAC 510 — 18 AAC 600. The effective date (referred to in (e) of this section) of the regulation adopting the schedules is April 19, 1978.

AS 30.25.220, referred to in subsection (k), was repealed by § 11, ch. 116, SLA 1980. For provisions concerning oil pollution control, see AS 46.04.

Sec. 46.03.760. Civil action for pollution; damages. (a) A person who violates or causes or permits to be violated a provision of this chapter or AS 46.04, or a regulation, a lawful order of the department, or a permit, approval, or acceptance, or term or condition of a permit, approval, or acceptance issued under this chapter or AS 46.04 is liable, in a civil action, to the state for a sum to be assessed by the court of not less than $500 nor more than $100,000 for the initial violation, nor more than $5,000 for each day thereafter on which the violation continues, and which shall reflect, when applicable,

(1) reasonable compensation in the nature of liquidated damages for any adverse environmental effects caused by the violation, which shall be determined by the court according to the toxicity, degradability and dispersal characteristics of the substance discharged, the sensitivity of the receiving environment, and the degree to which the discharge degrades existing environmental quality;

(2) reasonable costs incurred by the state in detection, investigation, and attempted correction of the violation; and

(3) the economic savings realized by the person in not complying with the requirement for which a violation is charged.

(b) Actions under this section may not be used for punitive purposes, and sums assessed by the court must be compensatory and remedial in nature.

(c) The court, upon motion of the department or upon its own motion, may defer assessment of all or part of that portion of the sum imposed upon a person under (a)(3) of this section conditioned upon the person complying, within the shortest feasible time, with the requirement for which a violation is shown.

(d) As used in this section, "economic savings" means that sum which a person would be required to expend for the planning, acquisition, siting, construction, installation and operation of facilities necessary to effect compliance with the standard violated.

(e) In addition to liability under (a) — (d) of this section, a person who violates or causes or permits to be violated a provision of AS 46.03.740 — 46.03.750 is liable to the state, in a civil action brought under AS 46.03.822, for the full amount of actual damages caused to the state by the violation, including direct and indirect costs associated with the abatement, containment or removal of the pollutant, restoration of the environment to its former state, and all incidental administrative costs. (§ 3 ch 120 SLA 1971; am § 9 ch 220 SLA 1976; am § 5 ch 266 SLA 1976; am §§ 5, 6 ch 116 SLA 1980)

Cross references. — As to oil pollution control, see AS 46.04. For provision that actions brought under subsections (a) and (e) of this section may be brought directly against insurers or other persons providing evidence of financial security, see AS 46.04.040(e).

Effect of amendments. — The 1980 amendment substituted "AS 46.04" for "AS 30.25.020" and for "AS 30.25" and substituted "approval, or acceptance" for "or certificate" in two places, all in the introductory paragraph of subsection (a), deleted "except disbursements for pollution abatement cost under AS 30.25.260(a)(2)" following "violation" in paragraph (2) of subsection (a), and deleted the former second and third sentences of subsection (e), which read, respectively: "That portion of the damages recovered by the state in a civil action brought under AS 46.03.822 attributable to costs incurred by the department in the abatement, containment or removal of the pollutant resulting from a discharge of crude oil, refined petroleum products or their by-products shall be deposited in the coastal protection fund created under AS 30.25.220" and "Except for special risk charges collected under AS 30.25.270, a person holding a risk avoidance certificate may not be held liable for costs associated with the abatement, containment or removal of the pollutant."

NOTES TO DECISIONS

This section and AS 46.03.790 held not unconstitutional. — See Stock v. State, Sup. Ct. Op. No. 1076 (File No. 2007), 526 P.2d 3 (1974), decided prior to the 1976 amendment of those sections.

Recovery in trespass for injury to land caused by airborne pollutants. 2 ALR4th 1054.

Sec. 46.03.765. Injunctions. The superior court has jurisdiction to enjoin a violation of this chapter or AS 46.04, or of a regulation, a lawful order of the department, or permit, approval, or acceptance, or term or condition of a permit, approval, or acceptance issued under this chapter or AS 46.04. In actions brought under this section, temporary or preliminary relief may be obtained upon a showing of an imminent threat of continued violation, and probable success on the merits, without the necessity of demonstrating physical irreparable harm. The balance of equities in actions under this section may affect the timing of compliance, but not the necessity of compliance within a reasonable period of time. (§ 10 ch 220 SLA 1976; am § 6 ch 266 SLA 1976; am § 7 ch 116 SLA 1980)

missioner presents an imminent or present danger to the health or welfare of the people of the state or would result in or be likely to result in irreversible or irreparable damage to the natural resources or environment, and it appears to be prejudicial to the interests of the people of the state to delay action until an opportunity for a hearing can be provided, the department may, without prior hearing, order that person by notice to discontinue, abate or alleviate the condition or activity. The proscribed condition or activity shall be immediately discontinued, abated or alleviated.

(b) Upon receipt of an order of the department made under (a) of this section, the person affected has the right to be heard and to present proof to the department that the condition or activity does not constitute an actual or potential source of irreversible or irreparable damage to the natural resources or environment of the state, or that the order may constitute a substantial private hardship.

(c) In the commissioner's discretion or upon application made by the recipient of an order within 15 days of receipt of the order, the department shall schedule a hearing at the earliest possible time. The hearing shall be scheduled within five days of the receipt of the application. The submission of an application or the scheduling of a hearing does not stay the operation of the department's order made under (a) of this section.

(d) After a hearing the department may affirm, modify or set aside the order. An order affirmed, modified or set aside after hearing is subject to judicial review as provided in AS 44.62.560. The order is not stayed pending judicial review unless the commissioner so directs. If an order is not immediately complied with, the attorney general, upon request of the commissioner, shall seek enforcement of the order.

(e) The department may adopt additional regulations prescribing the procedure to be followed in the issuance of emergency orders. (§ 3 ch 120 SLA 1971)

Sec. 46.03.822. Strict liability for the discharge of hazardous substances. To the extent not otherwise preempted by federal law, a person owning or having control over a hazardous substance which enters in or upon the waters, surface or subsurface lands of the state is strictly liable, without regard to fault, for the damages to persons or property, public or private, caused by the entry. In an action to recover damages, the person is relieved from strict liability, without regard to fault, if he can prove

(1) that the hazardous substance to which the damages relate entered in or upon the waters, surface or subsurface lands of the state solely as a result of

(A) an act of war,

(B) an intentional act or a negligent act of a third party, other than a party (or its employees) in privity of contract with, or employed by,

(C) negligence on the part of the United States government or the State of Alaska, or

(D) an act of God, and

(2) in relation to (1)(B), (C) or (D) of this section, that he discovered the entry of the hazardous substance in or upon the waters, surface or subsurface lands of the state and began operations to contain and clean up the hazardous substance within a reasonable period of time. (§ 1 ch 122 SLA 1972; am § 13 ch 220 SLA 1976)

Cross references. — For provision that actions brought under this section may be brought directly against insurers or other persons providing evidence of financial responsibility, see AS 46.04.040(e).

Sec. 46.03.824. Damages. Damages include but are not limited to injury to or loss of persons or property, real or personal, loss of income, loss of the means of producing income, or the loss of an economic benefit. (§ 1 ch 122 SLA 1972)

MEMORANDUM

To: Committee members

From: Committee staff

Re: Background and analysis for CSHB 111 (Trans)am

On Monday, May 6, the committee will take up CSHB 111 (Trans)am, relating to local service roads and trails. This bill was introduced by the Governor as a housekeeping measure, and has been changed somewhat since its introduction.

Sections 1, 2, and part of 3 add language to allow for the use by the LSR&T program of a census other than the federal census. This change was made on the House floor with the general concern that with Alaska's dynamic, transient population, the federal census is too quickly outdated. The change would permit the use of a "state" census (provided such a census is ever instituted) or "other census approved by the department of community and regional affairs".

Sections 3, 4 and 6 delete the current inclusion of first class cities within the direct allocation portion of the program. Presently, and since 1982, each first class city is treated the same as a home rule city, a municipality or a borough, in that funds are allocated to it each year strictly by the formula. The net result has been that most of the allocations to first class cities are not enough to fund a project, even if the city saves up its allocations over five years, which they are allowed to do. By deleting first class cities, the boroughs (or DOT/PF for the unorganized borough) would decide which LSR&T requests would be funded in first class cities, based upon certain criteria (a listing of the criteria is included in the file).

Section 5 requires the commissioner's approval on design standards, right-of-way and widths for LSR&T projects involving federal-aid secondary routes.

Section 7 revises the definition of "local service road" to mean a road used by fewer than 750 vehicles a day, and is not on the primary, urban or interstate highway system.

Section 8 provides an immediate effective date.

Materials included in the members files are:

- CSHB 111 (Trans)am
- CSHB 111 (Trans)
- Original version of HB 111
- Zero fiscal note and DOT/PF analysis
- Governor's transmittal letter
- Comparison of distribution formulas
- Short summary of LSR&T program
- Summary of LSR&T projects
- Criteria to be used to determine priority of submitted projects
- House floor amendment (from House journal)
- Appropriate statutes

Although FY86 funding for the LSR&T program was cut during the recent budget adjustments, a special appropriation of $7 million is contained in HB 291, which has not yet emerged from House Finance.

CS FOR HOUSE BILL NO. 111 (Transportation) am

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to local service roads and trails; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 19.30.131(a) is amended to read:

(a) During each fiscal year the commissioner shall allocate sums appropriated or otherwise designated for expenditure upon local service roads for that fiscal year among the five allocation districts in the following manner: one-half in the ratio which the area of each allocation district bears to the total area of the state and one-half in the ratio which the population of each allocation district bears to the total population of the state as shown by the latest available federal <u>or state</u> census <u>or other census approved by the Department of Community and Regional Affairs</u>.

* Sec. 2. AS 19.30.131(b) is amended to read:

(b) The commissioner shall also further allocate the sums in each allocation district to the boroughs within each allocation district in the following manner: one-half in the ratio which the area of each organized borough (excluding salt water areas) within that district bears to the total area of the allocation district and one-half in the ratio which the population of each organized borough area within that district bears to the total population of the allocation district as shown by the latest available federal <u>or state</u> census <u>or other census approved by the Department of Community and Regional Affairs</u>.

HOUSE-PASSED VERSION

Sec. 19.30.161. DESIGN STANDARDS, RIGHTS-OF-WAY AND WIDTHS. Design standards, rights-of-way and widths for each local service road and trail project must [SHALL] have the prior approval of the commissioner, unless the project is under the supervision of a local government that has assumed local road powers. If the project is under the supervision of a local government that has assumed road powers, and the project is not located on a federal-aid secondary route, design standards, rights-of-way and widths shall be established by the local government. If a project under the supervision of a local government that has assumed road powers is located on a federal-aid secondary route, design standards, rights-of-way, and widths must have the prior approval of the commissioner.

* Sec. 6. AS 19.30.241(3) is amended to read:

(3) "local government" means an organized borough of any class, a unified municipality organized under AS 29.68.240 - 29.68.-440, [A HOME RULE CITY,] or a city of any [THE FIRST] class;

* Sec. 7. AS 19.30.241(4) is amended to read:

(4) "local service road" means a public road that is used by an average of fewer than 750 vehicles each day and that [WHICH] is not designated as a route on the approved primary, urban, or interstate federal-aid highway system;

* Sec. 8. This Act takes effect immediately in accordance with AS 01.-10.070(c).

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to local service roads and trails; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 19.30.131(c) is amended to read:

(c) The commissioner shall also further allocate portions of the sum allocated to any borough, either organized or unorganized, and to any home rule [OR FIRST CLASS] city within the borough in the following manner:

(1) one-half in the ratio which the area of each home rule [OR FIRST CLASS] city bears to the total area of the borough excluding salt water areas; and

(2) one-half in the ratio which the population of each home rule [OR FIRST CLASS] city bears to the total population of the borough as shown by the latest available federal census.

* Sec. 2. AS 19.30.141 is amended to read:

Sec. 19.30.141. ACQUISITION AND CONSTRUCTION PROGRAMS. Before October 1 of each fiscal year each local government eligible for allocation of funds under AS 19.30.131 shall submit to the commissioner for approval a five-year plan for the acquisition and construction of local service roads and trails. Before December 1 of each fiscal year the commissioner shall submit to the governor a five-year plan for the acquisition and construction of local service roads and trails, including the approved local government programs. An organized borough shall include in its five-year plan local service road

HOUSE TRANS. C.S.

acquisition and construction programs for all cities other than home rule [AND FIRST CLASS] cities within the boundaries of the borough. The commissioner shall include in the [HIS] five-year plan local service road and trail acquisition and construction within the unorganized borough.

* Sec. 3. AS 19.30.161 is amended to read:

Sec. 19.30.161. DESIGN STANDARDS, RIGHTS-OF-WAY AND WIDTHS. Design standards, rights-of-way and widths for each local service road and trail project must [SHALL] have the prior approval of the commissioner, unless the project is under the supervision of a local government that has assumed local road powers. If the project is under the supervision of a local government that has assumed road powers, and the project is not located on a federal-aid secondary route, design standards, rights-of-way and widths shall be established by the local government. If a project under the supervision of a local government that has assumed road powers is located on a federal-aid secondary route, design standards, rights-of-way, and widths must have the prior approval of the commissioner.

* Sec. 4. AS 19.30.241(3) is amended to read:

(3) "local government" means an organized borough of any class, a unified municipality organized under AS 29.68.240 - 29.68.-440, [A HOME RULE CITY,] or a city of any [THE FIRST] class;

* Sec. 5. AS 19.30.241(4) is amended to read:

(4) "local service road" means a public road that is used by an average of fewer than 750 vehicles each day and that [WHICH] is not designated as a route on the approved primary, urban, or interstate federal-aid highway system;

* Sec. 6. This Act takes effect immediately in accordance with AS 01.-10.070(c).

HOUSE BILL NO. 111

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to local service roads and trails; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 19.30.127 is repealed and reenacted to read:

Sec. 19.30.127. ALLOCATION DISTRICTS. (a) The state is divided into allocation districts that are identical to the department's operating regions.

(b) Where a department region boundary divides a local government unit, the allocation district boundary must be adjusted by the department to include the local government unit within the department region that contains the largest portion of the area of the local government unit.

* Sec. 2. AS 19.30.131(a) is amended to read:

(a) During each fiscal year the commissioner shall allocate sums appropriated or otherwise designated for expenditure <u>on</u> [UPON] local service roads for that fiscal year among the [FIVE] allocation districts in the following manner: one-half in the ratio which the area of each allocation district bears to the total area of the state and one-half in the ratio which the population of each allocation district bears to the total population of the state as shown by the latest available federal census.

* Sec. 3. AS 19.30.131(c) is amended to read:

(c) The commissioner shall also further allocate portions of the sum allocated to any borough, either organized or unorganized, and to

ORIGINAL HB 111

any home rule [OR FIRST CLASS] city within the borough in the following manner:

(1) one-half in the ratio which the area of each home rule [OR FIRST CLASS] city bears to the total area of the borough excluding salt water areas; and

(2) one-half in the ratio which the population of each home rule [OR FIRST CLASS] city bears to the total population of the borough as shown by the latest available federal census.

* Sec. 4. AS 19.30.141 is amended to read:

Sec. 19.30.141. ACQUISITION AND CONSTRUCTION PROGRAMS. Before October 1 of each fiscal year each local government eligible for allocation of funds under AS 19.30.131 shall submit to the commissioner for approval a five-year plan for the acquisition and construction of local service roads and trails. Before December 1 of each fiscal year the commissioner shall submit to the governor a five-year plan for the acquisition and construction of local service roads and trails, including the approved local government programs. An organized borough shall include in its five-year plan local service road acquisition and construction programs for all cities other than home rule [AND FIRST CLASS] cities within the boundaries of the borough. The commissioner shall include in <u>the</u> [HIS] five-year plan local service road and trail acquisition and construction within the unorganized borough.

* Sec. 5. AS 19.30.161 is amended to read:

Sec. 19.30.161. DESIGN STANDARDS, RIGHTS-OF-WAY AND WIDTHS. Design standards, rights-of-way and widths for each local service road and trail project <u>must</u> [SHALL] have the prior approval of the commissioner, unless the project is under the supervision of a local government that has assumed local road powers. If the project is under the

supervision of a local government that has assumed road powers, and the project is not located on a federal-aid secondary route, design standards, rights-of-way and widths must [SHALL] be established by the local government. If a project under the supervision of a local government that has assumed road powers is located on a federal-aid secondary route, design standards, rights-of-way, and widths must have the prior approval of the commissioner.

* Sec. 6. AS 19.30.241(3) is amended to read:

(3) "local government" means an organized borough of any class, a unified municipality organized under AS 29.68.240 -- 29.68.-440, [A HOME RULE CITY,] or a city of any [THE FIRST] class;

* Sec. 7. AS 19.30.241(4) is amended to read:

(4) "local service road" means a public road that is used by an average of fewer than 750 vehicles each day and that [WHICH] is not designated as a route on the approved primary, urban, or interstate federal-aid highway system;

* Sec. 8. This Act takes effect July 1, 1985.

ZERO FISCAL NOTE & ANALYSIS

ANALYSIS

The proposed bill is strictly a housekeeping measure and has no fiscal impact on either the operating or capital budget. No additional positions are required.

The proposed bill revises A.S. 19.30 in five areas:

1) AS 19.30.127 and AS 19.30.131(a) are reworded to make allocation district boundaries coincide with DOT&PF regional boundaries. This simplifies the allocation process of LSR&T monies.

2) AS 19.30.131(c) and AS 19.30.141 removes first class cities from district allocation. This change returns the first class cities to their former status which allows them to receive adequate funds to construct a project.

3) AS 19.30.161 is reworded to require LSR&T projects constructed on a federal-aid secondary route to be approved by the Commissioner of DOT&PF. This language change is needed to assure that federal requirements for roadway width, design standards and right-of-way are met.

4) AS 19.30.241(3) is necessary to enable any political subdivision of the State to construct and maintain a project under the provisions of this act.

5) AS 19.30.241(4) is reworded to limit LSR&T construction to low volume roads. The break between high volume roads and low volume roads is 750 vehicles per day.
Correction of an oversite of past legislation in defining specific routes of the Federal-aid highway system is necessary.

 NEW LEGISLATION

An Act relating to local service roads, trails and providing for an effective date.

These amendments to the Act are necessary in order to revise the out-of-date allocation areas, assure sufficient funding of projects under the priority system, clarify design standards for secondary federal routes, revise the local government definition to conform with other Alaska Statutes, limit LSR&T construction to low volume roads and correct an oversite of defining specific routes of the federal highway system.

BILL SHEFFIELD
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

January 23, 1985

The Honorable Ben Grussendorf
Speaker of the House
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Representative Grussendorf:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill relating to the local service roads and trails program. The bill makes minor amendments to existing statutes.

Section 1 repeals and reenacts AS 19.30.127. The current language establishes five allocation districts. The proposed language creates allocation districts by simply saying that they are identical to the Department of Transportation and Public Facilities' operating regions. When the local service roads and trails program was enacted in 1971 there were five highway districts within the Department of Highways. The allocation districts established in the statute coincided with those highway districts. Those allocation districts bear little relationship to the manner in which the state's highway program is administered today. There are currently three regional offices with headquarters in Anchorage, Fairbanks, and Juneau, respectively. This amendment will allow the program to be administered in a way that is consistent with the Department of Transportation and Public Facilities' current administrative structure. The amendment will enable the allocation districts to match any future changes in geographic organization of the department.

Additionally, sec. 1 of the bill provides a mechanism to address the problem of local governments which lie within two allocation districts. Subsection (b) of AS 19.30.127 will provide that the boundary between the allocation districts is to be adjusted to include the local government within the allocation district in which the largest portion of the local government's land is located.

Section 2 amends AS 19.30.131(a) by deleting the reference

GOVERNOR'S TRANSMITTAL LETTER

to five allocation districts. This amendment is necessary because of the new method of establishing the allocation districts found in sec. 1 of the bill.

Section 3 amends AS 19.30.131(c) by deleting first-class cities from direct allocations.

The need for this change is to provide first-class cities with adequate funds to construct local service roads. Presently, the law treats allocation of funds to first-class cities the same as home rule cities. Present allocations for most first-class cities are not adequate to construct a local service road project. This change in the law allows funding of projects for first-class cities through their respective borough or unorganized borough on a priority basis.

Section 4 amends AS 19.30.141 by deleting first-class cities from direct allocations as explained above.

Section 5 amends AS 19.30.161 by adding language requiring the prior approval of design standards, rights-of-way, and widths for projects which are constructed on a federal-aid secondary route, even though the project will be constructed by a local government that has assumed road powers. As a general proposition under the local service roads and trails program, if a local government has assumed road powers it is responsible for the maintenance of the facility after construction. Consequently, the state has little concern over the standards. In 1981, the nature of the program changed when AS 19.30.111 was amended to allow the use of program money on the federal-aid secondary highway system. These facilities can be quite complicated and the state is required to comply with various standards to continue to receive federal aid for the route. It is therefore appropriate that the commissioner of DOT/PF have a right of prior approval of design standards, rights-of-way, and width.

Section 6 amends AS 19.30.241(3) by adding language which includes second-class cities to conform with the definition of municipality in AS 29.78.010(8). This change is necessary to enable any political subdivision of the state to construct and maintain a project under the provisions of this bill.

Section 7 amends the definition of local service road to make it more precise.

Sincerely,

Bill Sheffield
Governor

Office of the City Clerk
832-5441
Incorporated November 17, 1921

City of Nenana

State of Alaska

January 14, 1986 JAN 17 1986

Senator John B. Coghill
Alaska State Legislature
Pouch V (MS 3100)
Juneau, Alaska 99811

Dear Senator Coghill,

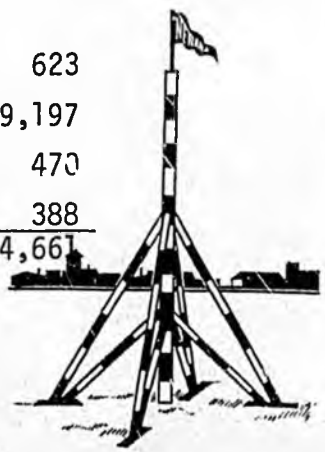
RE: LSR&T FUNDING LEVELS AND CSHB 111 * CHANGES TO TITLE 19, CHAPTER 30

After considerable research, I have assembled some interesting facts and figures regarding Allocation District Number Two of the Local Service Roads and Trails (LSR&T) program, and the basis for the Area/Population formula.

There are five allocation districts among which LSR&T funding is shared. Allocation District Two, to which the City of Nenana belongs, gets 23.6% of the total LSR&T funding in any given particular year.

The following is a breakdown of the percentages within District Two, along with the area and population figures for each.

	Percentage (in hundreths)	Area (square miles)	Population
1. Fairbanks North Star Borough	.437	7,500	53,983
- within FNSB -			
a) City of Fairbanks	[.212]	[30]	[22,645]
b) City of North Pole	[.007]	[3]	[724]
2. North Slope Borough (Eastern Portion)	.119	41,615	623
3. Unorganized Borough	.437	133,387	9,197
4. City of Nenana	.004	9	470
5. City of Tanana	.003	1	388
TOTALS	1.000	182,512	64,661



Now, speaking to CSHB 111, the only substantive change proposed in this bill appears to be allowing a State census (or other census approved by C&RA) figure to be substituted for the Federal census figure. For Nenana this would mean a population of approximately 592 instead of 470. I imagine that other communities would also increase their population figure's allowing for the use of the State census figures. Then, referring back to the area/population table, and understanding that the percentage figure is a derivative of the pro-rated area/population products, one can deduce that the change proposed by CSHB 111 will have very little positive benefit for the City of Nenana.

What is needed is a change in the allocation formula. The cities of Nenana, and Tanana, and North Pole don't stand a chance against the boroughs when the only criteria used in dividing the funds are area and population.

We should probably eliminate first class and home rule cities from the allocation formula direct appropriation process, and allow for our projects to be funded from another source on a prioritized needs basis. This would hopefully bring us back to thinking of project funding as it relates to a project rather than an area-population formula.

It is difficult to do any kind of a road project with $864! (The total of Nenana's allocation in 1985)

You might find the following table interesting as to Nenana's allocations in past years.

YEAR	Total L.S.R.& T Appropriation	Nenana's Allocation
1980	Funded on a needs basis	$30,000
1981	" " " " "	$60,000
1982	-0-	-0-
1983	$7.0 million	$ 6,046
1984	$3.5 million	$ 3,023
1985	$1.15 million	$ 864
1986	In D.O.T.'s CIP budget at a ZERO FUNDING LEVEL (7 million to start)	?

It looks as though, given the current proposed zero funding level for L.S.R. & T., that all the above discussion on a funding formula might be of little consequence this year. (I hear there is a L.S.R. & T funding request in HB291 - I will get a copy of this and provide you with some comments)

Sincerely,

Steve Bainbridge

Steve Bainbridge
City of Nenana

DRAFT

DRAFT

Proposed Senate Transportation Committee substitute to CSHB 111 am

For an Act entitled: "An Act relating to local service roads and trails; and providing for an effective date."

*Section 1. AS 19.30.131(a) is amended to read:

(a) During each fiscal year the commissioner shall allocate sums appropriated or otherwise designated for expenditure upon local service roads for the fiscal year among the five allocation districts in the following manner: one-half in the ratio which the area of each allocation district bears to the total area of the state and one-half in the ratio which the population of each allocation district bears to the total population of the state as shown by the latest available federal or state census or other census approved by the Department of Community and Regional Affairs.

*Section 2. AS 19.30.131 (b) is amended to read:

[And unorganized Municipalities]

(b) The commissioner shall also further allocate the sums in each allocation district to the boroughs within each allocation district in the following manner: one-half in the ratio which the area of each organized borough (excluding salt water areas) within that district bears to the total area of the allocation district and one-half in the ratio which the population of each organized borough area within that district bears to the total population of the allocation district as shown by the latest available federal or state census or other census approved by the Department of Community and Regional Affairs.

*Section 3. AS 19.30.131(c) is amended to read:

(c) The commissioner shall also further allocate portions of the sum allocated to any organized borough, [EITHER ORGANIZED OR UNORGANIZED] and to any home rule [OR FIRST CLASS] city within the organized borough in the following manner:

(1) one-half in the ratio which the area of each home rule [OR FIRST CLASS] city bears to the total area of the borough excluding salt water areas; and

(2) one-half in the ratio which the population of each home rule [OR FIRST CLASS] city bears to the total population of the borough as shown by the latest available federal or state census or other census approved by the Department of Community and Regional Affairs

DRAFT

DRAFT

DRAFT

*Section 4. AS 19.30.141 is amended to read:

Sec. 19.30.141. ACQUISITION AND CONSTRUCTION PROGRAMS. Before October 1 of each fiscal year each local government eligible for allocation of funds under AS 19.30.131 shall submit to the commissioner for approval a five-year plan for the acquisition and construction of local service roads and trails. Before December 1 of each fiscal year the commissioner shall submit to the governor a five-year plan for the acquisition and construction of local service roads and trails, including the approved local government programs. An organized borough shall include in its five-year plan local service road acquisition and construction programs for all cities other than home rule [AND FIRST CLASS] cities within the boundaries of the borough. The commissioner shall include in the [HIS] five-year plan local service road and trial acquisition and construction within the unorganized borough.

*Section 5. AS 19.30.161 is amended to read:

Sec. 19.30.161. DESIGN STANDARDS, RIGHTS-OF-WAY AND WIDTHS. Design standards, rights-of-way and widths for each local service road and trail project must [SHALL] have the prior approval of the commissioner, unless the project is under the supervision of a local government that has assumed local road powers. If the project is under the supervision of a local government that has assumed road powers, and the project is not located on a federal-aid secondary route, design standards, rights-of-way and widths shall be established by the local government. If a project under the supervision of a local government that has assumed road powers is located on a federal-aid secondary route, design standards, rights-of-way, and widths must have the prior approval of the commissioner.

*Sec. 6. AS 19.30.241(3) is amended to read:

(3) "local government" means an organized borough of any class, a unified municipality organized under AS 29.68.240- 29.68.440, [A HOME RULE CITY,] or a city of any [THE FIRST] class;

*Sec. 7. AS 19.30.241(4) is amended to read:

(4) "local service road" means a public road that is used by an average of fewer than 750 vehicles each day and that [WHICH] is not designated as a route on the approved primary, urban, or interstate federal-aid highway system;

*Sec. 8. This Act takes effect immediately in accordance with AS 01.10.070(c)

LOCAL SERVICE ROADS AND TRAILS PROGRAM

Primary Functions:

The Local Service Roads and Trails (LSR&T) program was established by the State Legislature in 1971 to provide for special needs to "bush" communities, rural communities and communities both within and outside of organized boroughs.

Local Service Roads and Trails was designed to aid communities in accomplishing projects that do not have the financial means nor the technical expertise to achieve alone. These projects were to be in the nature of roads, trails, bridges and boardwalks specifically. Special exceptions are considered and granted if justification is sufficient.

The LSR&T Program is wholly State funded. Wherever costs are not prohibitive, generally within organized boroughs, projects are awarded by bid contract. In the remote areas where, because of location and size of the project bid contracts cost are prohibitive, LSR&T maintains its own small fleets of equipment or rents equipment, if available, and directs the operation of the projects.

The scope of LSR&T is basically three-fold. This is particularly true for "bush" projects. It provides:

1. Needed projects to communities that have not the capabilities of accomplishing alone.

2. A source of training for construction work by employing local residents as laborers and equipment operators.

3. Provides supplemental income to communities that are single-income or subsistence oriented.

Project Limitation:

Local Service projects are confined to roads which are not part of the primary federal-aid system and are not the responsibility of corporate units or private individuals but are dedicated to public use. These projects cover wide ranging road needs. They include State recreation routes, connections between outlying villages and airports, villages and canneries, villages and port facilities, short routes needed to better integrate subdivision roads and State highways, and improvements to existing roads.

PROGRAM SUMMARY

PLANNING

Five Year Program

The allocation districts are the boundaries of the Highway Department established in 1970. The larger of the five districts being the Western District, engulfing nearly half of the land mass of Alaska, is administered by the Central and Northern Regions. This split jurisdiction is strictly an economic measure.

Whenever organized boroughs whose boundaries partially overlap allocation districts, the administrative responsibility lies with the primary region.

A construction program utilizing LSR&T construction equipment, State employees, village labor, and equipment rental when available, is the primary mode of operation in the unorganized boroughs of the Central, and Northern Regions. Programming the projects in the unorganized boroughs depends on requests from local governing bodies (both submitted and solicited), available road building materials, right-of-way access, and coordination of other projects in the area.

The State equipment fleet and maintenance personnel are utilized when local equipment is not available or when a contract for the work is not feasible.

The Local Service Roads and Trails Program is a vital link in the State road network. It is the only State program established for solving local transportation needs. During a typical construction season, several miles of new road, new and reconstructed boardwalk, year around foot trails, winter trail staking, foot bridges, paved bike paths and vehicle bridges are constructed with LSR&T funds.

These and other special projects are completed each year in answer to what the LSR&T is all about, "Get the people out of the mud". This program does a lot for all the people of Alaska and is presently performing a service the people of Alaska could not do without.

Summary

I. Definition

A. Purpose

a. To get people out of the mud
b. Flexibility of Program
c. To aid communities with no revenue
d. Economy of operation

B. Type of Projects

a. Local Service Roads
b. Year around foot trails
c. Winter trail staking
d. Bicycle paths
e. Erosion control
f. Foot bridges
g. Boardwalks

II. Allocation

A. F.Y. Year Legislation (6 million proposed)
B. Five Year Duration
C. 50-50 Factor, Area - Population
D. Operating Budget - Program Support

a. Bridge Design - Headquarters
b. Road Design and Advertising - Region
c. R/W Certification - Region
d. Construction Review - Region
e. Administration Headquarters and Region

III. Administration

A. Allocation District - Regional Control
B. Organized Boroughs and Home Rule Cities

a. Construction contract by Local Government
b. Local Government Labor and Equipment

C. Unorganized Boroughs

a. Construction Contract by Local Government or State
b. Village or City Labor and Equipment
c. State Equipment and Village Labor
d. State Equipment and State Employees
e. State Equipment and Village State Employees

IV. Five Year Program

A. Project Selection

a. Organized Boroughs, First Class Cities and Home Rule Cities

1. Select their own projects
2. Able to change program at will

b. Unorganized Boroughs

1. Cities and Villages select their own projects.
2. Region sets priorities within funds available.
3. Regions may subfill projects with funds available on non-federal routes.

APPLICANT GUIDELINES

Nature and Purpose of Program:

To provide State assistance in the development of roads and trails on routes that are not eligible for federal-aid matching funds.

Who May Apply:

Each organized borough, first class city and home rule city is eligible for a direct allocation, based on their population and area. All other areas are considered unorganized boroughs and are eligible for projects administered by the Department, subject to priority scheduling within the respective allocation districts.

Authorizing Legislation:

AS 19.30.111-251

Administrative Agency:

Department of Transportation and Public Facilities, State of Alaska.

Type of Assistance:

Financial and Engineering.

How Program is Financed:

100% State. Organized boroughs and home rule cities may supplement their allocation with local funding in any amount. Unorganized borough areas will be encouraged to provide local participation whenever possible. Federal and State grants can be used in conjunction with LSR&T funds.

How to Apply:

Each organized borough, first class city and home rule city may receive their allocation by submitting a five-year project program for the construction of such roads to their Regional DOT&PF Deputy Commissioner by October 1 of each year, indicating the priorities for construction on the program. When a project is approved, a project agreement will be drafted, and development of the project may proceed. No payment can be made for work done prior to execution of the project agreement.

Unorganized borough communities should provide input data for road needs in their areas to their Regional DOT&PF Deputy Commissioner, who will compile a five-year program and establish priorities for the unorganized borough projects within his jurisdiction. When a project is approved, the Department will proceed with development of the project.

LSR&T PROJECT SUMMARIES

MEMORANDUM

State of Alaska
Department of Transportation & Public Facilities

TO: John J. Simpson, Director
Standards and Technical
Services Division

DATE: February 10, 1984

FILE NO: 2519

TELEPHONE NO: 789-0841

FROM: Charles D. Karella
LSR&T Engineer
DC&M Standards

SUBJECT: LSR&T Program

This program is designed to accomplish the most with the least amount of State dollars under the rules and regulations of the Alaska State Statutes, 19.30.111 - 19.30.251.

FUNDING

First Allocation	1971	$ 6 Million
	1972	4 Million
	1974	8 Million
	1976	7 Million
	1978	15.8 Million
	1980	10 Million
Last Allocation	1983	7 Million
Total Allocation		$60.8 Million

Projects (Dollars)

Completed or under agreement	$54.5 Million
Reimbursements remaining	6 Million

Under the present allocation, Local Governments throughout the State share 57% of each LSR&T Bond issue. The unorganized boroughs share in the remaining 43%. Annual expenditures average to this percentage.

ANNUAL PROGRAM (Typical)

1. 150 Active Projects
   50 Road Projects Completed
   50 Miles of Road Completed
   2000 Miles of Winter Trail Staking
   Several Miles of Boardwalk
   Foot Trails and Bike Paths

2. Expenditures For Typical $6.0 Million Annual Program

Roads	$4.5 Million	(75%)

Includes $1.1 million (25%) for subdivision streets and roads.

Trail Staking	$100,000	(2%)
Boardwalks	600,000	(10%)
Foot Trails	200,000	(3%)
Bike Paths	100,000	(2%)
Shelter Cabins	50,000	(1%)
State Maintenance Routes	250,000	(4%)
Engineering and Administration	200,000	(3%)

3. Administrative support is $200,000 or 3%

PROGRAM PHASE OUT

During the period of time the program was in a phase-out status (1/2/82 to 7/25/83) no planning for future LSR&T projects was accomplished. As a result, it has taken some time to accelerate the program. A Statewide five-year program has now been prepared, and by the end of calendar year 1984, the program should be up to its former capability once again.

MANAGEMENT

LSR&T Managers and Project Engineers are tailored after the early Alaska bush pilots. Quite often, they have to operate by the seat of their pants, which is why this program is successful.

LSR&T PROGRAM 1977-1981

1. 250 road projects completed.
   Average Length one mile.
   Average cost $100,000.00

2. Expenditures $25 Million.

3.* $19.0 million for road projects, includes five million for subdivision roads.

4. $750,000 for project administration charged to projects.

*It is difficult to define subdivision roads or streets, i.e. access roads to new subdivisions can be considered an intergal part of the subdivision network or in some communities, it may be the only transportation corridor available. For this report, subdivision roads are those roads or streets within subdivisions, designated as such, by the local entity.

5. One million dollars for program support ($200,000 per year).

6. Administered several special legislative appropriated projects; totalling in excess of a million annually.

COST COMPARISON

The cost of a project constructed under contract ranges between 25% and 200% more than a comparable project constructed with local equipment rental when available or LSR&T equipment and local hire, depending on size and location. Much of this is due to our policy of paying the prevailing community wage.

PRESENT PROGRAM

See Attached.

SUMMARY

Over 95% of all Alaskan communities have had at least one LSR&T project since the program set out to "Get the people out of the mud" in 1971.

There are many reasons why the program is successful, least of which is the maximization of State dollars. The LSR&T Program offers more to a rural community than just a finished product; it offers a learning experience. Traditionally, LSR&T has been able to offer additional benefits to the community as the program is tailored to their needs.

The LSR&T program spends a considerable amount of time administering projects funded through special Legislative appropriations and grants. In administering these projects for the Department, the program guarantees the credibility of the State in its commitment to meet the transportation needs of the bush communities.

PROJECTS FUNDED

CENTRAL REGION June 30, 1982 to January 31, 1984

Unorganized Boroughs[1]	33 Projects	$2,483,730
Bristol Bay Borough	1 Project	54,753
Municipality of Anchorage	7 Projects	1,006,596
Matanuska-Susitna Borough	1 Project	211,600
Kenai Peninsula Borough	4 Projects	337,636
Kodiak Island Borough	1 Project	18,262
City of Kenai	3 Projects	84,288
Unalaska[2]	1 Project	25,443
TOTAL REGION	18 Projects	$1,738,578

(1) Includes 12 projects funded with $810,000 from 1983 allocation.

(2) Funded from 1983 allocation.

PROJECTS FUNDED

NORTHERN REGION June 30, 1982 to January 31, 1984

Unorganized Borough II	6 Projects	$678,425
Unorganized Borough IV (N)	7 Projects	510,850
Unorganized Borough V (N)	2 Projects	56,520
Total Unorganized Boroughs	15 Projects	$1,245,795 (1)
CITY OF FAIRBANKS	(2) Projects	$178,305
CITY OF NORTH POLE	(1) Project	11,243
Total Local Governments	3 Projects	$189,548 (2)
TOTAL REGION	18 Projects	$1,435,343

(1) Includes 13 projects funded with $1,175,000 from 1983 allocation.

(2) Includes 2 projects funded with $164,500 from 1983 allocation.

93% of these projects were funded with 1983 allocation.

PROJECTS FUNDED

SOUTHEAST REGION June 30, 1982 to January 31, 1984

Unorganized Borough III	13 Projects	$465,000(1)
CITY OF HAINES	1 Project	$ 34,000
CITY AND BOROUGH OF SITKA	3 Projects	251,000
CITY OF WRANGELL	1 Project	80,000
CITY OF PETERSBURG	1 Project	20,000
CITY AND BOROUGH OF JUNEAU	2 Projects	361,000
CITY OF KETCHIKAN	3 Projects	80,000
Total Local Government	11 Projects	$826,000(2)
TOTAL REGION	24 Projects	$1,291,000

(1) Includes 8 projects funded with $144,000 from 1983 allocation.

(2) Includes 6 projects funded with $291,000 from 1983 allocation.

don't know of any other way to do it."

Number 599

Representative Marrou: "Second class cities and second class boroughs are left out, they don't get anything?"

Commissioner Knapp: "They get it now."

Representative Marrou: "Even the third class borough?"

Commissioner Knapp: "Yes. You see the problem is you got the universe of people you distribute money to. The problem--and it is all done exactly the same way--the problem is that some elements of that universe are so small that the amount of money that they get doesn't do them or anyone else any good. If you could put it into some kind of nucleus-type effect, you could then have bigger numbers for the formula, put the money out, and maybe get some use out of it."

Number 607

Representative Davis, the issue of Pelican still unclear, wanted to know who makes the decisions in allocations.

Mr. Karella: "The department would make the decisions, but I would like, if you could bear with me, to read the requirements for prioritizing the projects. Pelican, for instance, is in an unorganized and that's eleven steps.

(1) The first priority step would be the number of projects done in the past with Local Service Roads and Trails funds.

(2) The amount of dollars funded in the past.

(3) The year the last project funded for the community.

(4) Local participation in funding of a project. If they furnish labor, equipment, or materials--quite often this happens.

(5) Availability of local equipment--do they have a back-hoe, a truck?

(6) Availability of local labor.

CRITERIA FOR PRIORITY

(7) The location of the Local Service Roads and Trails equipment. Our equipment is set up in the Northern Region and in the Central Region. We have one large fleet.

(8) The possibility of the Department of Transportation having a contract in the area.

(9) Maybe the department can get the job and tack it on an existing project.

(10) Whether the project is connected to the existing road system.

(11) Availability of a contractor on the site of the project during the proposed time of construction.

"With the organized boroughs, there are only six priority systems that we use.

(1) First off we use the need--just like Representative Shultz was talking about.

(2) The involvement of an L.I.D. For instance, in the Fairbanks North Star Borough they use the L.I.D. concept very heavily, so does Mat-Su. 'Local Improvement District.' If there is something like a road surface maintenance area, Fairbanks North Star Borough has 77 of them. That's how they funnel their dollars--into the road maintenance service areas who come up with half of the dollars which stretches their allocation quite strongly. They prefer that over anything else.

(3) The third priority is the viability..."

CHANGE TAPE #17, SIDE TWO

Number 004

Mr. Karella continued with the list of priorities for organized boroughs: "...several areas in the North Star would come up with priorities.

(4) Is the fundability transportation oriented? Is it going to be easier to maintain. It's a problem. You got to always look at the maintenance part of it.

(5) The number of past Local Service Roads and Trails projects--that's what they look

at too. If Seldovia had a project last year or two years ago and they don't have enough money for what they are asking for now and they are vying with the city of Soldotna, then the city of Soldotna would probably get the job.
(6) Again, they use the amount of dollars spent on these projects in the past.

"It's a real good priority system which the boroughs use and we use as administering the unorganized borough. The work in the past has been highly commended. It's a very young program--since 1971. It's been highly successful prior to 1981 when this change was made. There is going to be home rule cities that don't like it. The city of Nenana, said that 'We used to get a lot of money, now we don't get any.' Their apportionment went to a first class city. They were out of luck anyway when they became a home rule city."

Number 057

Representative Cato asked the committee whether it would be amenable if the staff, working with Mr. Karella, would work up a committee substitute. Representative Furnace so moved. Representative Cato repeated the motion and then brought before the committee a work draft of an appropriation bill entitled, "An Act making a special appropriation to the Department of Transportation and Public Facilities for local service roads and trails; and providing for an effective date." She read section one of the work draft: "The sum of $7,000,000 is appropriated from the general fund to the Department of Transportation and Public Facilities for allocations for local service roads and trails authorized under AS 19.30.111 - 19.30.251." She asked whether there were any problems with the appropriations bill.

Number 081

Representative Pignalberi questioned whether it were high enough. Representative Cato explained that Mr. Karella has said in the past that $7,000,000 is an excellent sum to work with. Mr. Karella confirmed this. Representative Cato said that she would entertain a motion to pass the bill out of committee. Representative Furnace moved to pass the bill out of committee with individual recommendations, but

LEGISLATIVE CITATIONS

Representative Clocksin moved and asked unanimous consent that the House approve the citation In Memoriam - Arnold Muldoon. There being no objection, it was so ordered and the citation was referred to the Chief Clerk for transmittal to the Senate.

THIRD READING OF HOUSE BILLS

CSHB 111(Trsp)

Representative Szymanski brought up reconsideration of COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 111 (Transportation) (relating to local service roads and trails; effective date).

CSHB 111(Trsp) was read the third time.

Representative Szymanski moved and asked unanimous consent that CSHB 111(Trsp) be returned to second reading for the purpose of specific Amendment No. 3. There being no objection, it was so ordered.

Amendment No. 3 by Szymanski, Cotten, Pignalberi, Marrou, Shultz, Larson, M.W. Miller, Navarre, Hurley and Pourchot:

Page 1, after line 8, insert new bill sections to read:

"* Section 1. AS 19.30.131(a) is amended to read:

(a) During each fiscal year the commissioner shall allocate sumsappropriated or otherwise designated for expenditure upon local service roads for that fiscal year among the five allocation districts in the following manner: one-half in the ratio which the area of each allocation district bears to the total area of the state and one-half in the ratio which the population of each allocation district bears to the total population of the state as shown by the latest available federal or state census or other census approved by the Department of Community and Regional Affairs.

* Sec. 2. AS 19.30.131(b) is amended to read:

(b) The commissioner shall also further allocate the sums in each allocation district to

HOUSE FLOOR AMENDMENT

CSHB 111(Trsp)

the boroughs within each allocation district in the following manner: one-half in the ratio which the area of each organized borough (excluding salt water areas) within that district bears to the total area of the allocation district and one-half in the ratio which the population of each organized borough area within that district bears to the total population of the allocation district as shown by the latest available federal or state census or other census approved by the Department of Community and Regional Affairs."

Page 1, line 9:

Delete "Section 1." and insert "Sec. 3."

Renumber remaining bill sections.

Page 1, line 19:

After "federal", insert "or state"

After "census" insert "or other census approved by the Department of Community and Regional Affairs"

Representative Szymanski moved and asked unanimous consent that Amendment No. 3 be adopted.

Representative Pettyjohn objected and withdrew his objection.

There being no further objection, Amendment No. 3 was adopted.

CSHB 111(Trsp)am

The question to be reconsidered: "Shall CSHB 111(Trsp)am pass the House?" The roll was taken with the following result:

CSHB 111(TRSP) AM

Yeas: 39 Adams, Binkley, Boucher, Cato, Clocksin, Collins, Cotten, Davis, Duncan, Frank, Fuller, Furnace, Goll, Gruenberg, Grussendorf, Hanley, Herrmann, Hurley, Jenkins, Koponen, Larson, Marrou, Martin, Miller,M.M., Miller,M.W., Navarre, Pearce, Pettyjohn, Phillips, Pourchot, Rieger, Ringstad, Shultz, Sund, Szymanski, Taylor, Thompson, Uehling, Wallis

Today you will find in your packets new information requested at the previous hearing on CS HB 111 (tran) am.

Enclosed are the following:

1. A draft Committee Substitute for CS HB 111 (tran) am.

2. A memorandum on the funding formula.

3. An explanatory letter from Dep. Comm. Warren Sparks.

4. A listings of cities effected under the different scenarios.

5. A breakdown of LSR&T allocations reflecting different scenarios.

Please bring this packet and the origional packet from the January 29 meeting. Thank you.

February 5, 1986

TO: All Members of the Transportation Committee

FROM: Committee Staff

RE: LSR&T Funding formula

Sec. 19.30.131. Allocation of Funds.

Subsection (a) Commissioner allocates local service roads monies among the five allocation districts. THe funds allotted are based on the ratio formula; one half of the funds are based on allocation district population (ADP) compared to the total state population (TPS); one half is based on a comparison of the allocation district area (ADA) and the total area of the state (TAS).

$$\frac{1}{2} \times \frac{ADP}{TPS} + \frac{1}{2} \times \frac{ADA}{TAS}$$

Subsection (b) Commissioner further allocates the above amounts in each allocation district (5) to each borough within each district.
The funds appropriated to the boroughs are based on a formula derived from; a ratio of one half of the organized borough's area (OBA) compared with the total allocation district area (ADA); and one half based on a ratio of the organized borough population (OBP) to the allocation district population (ADP).

$$\frac{1}{2} \times \frac{OBA}{ADA} + \frac{1}{2} \times \frac{OBP}{ADP}$$

Subsection (c) Commissioner further allocates the above amounts funds to any organized borough and to any home rule city within the organized borough. The funds appropriated to home rule cities in an organized borough is similar to the above ratios. One half of the home rule area (HRA) compared with organized borough's area (OBA); one half of the home rule population (HRP) to the organized borough's population (OBP).

Memo on Funding Formula/Cities Effected

$\frac{1}{2}\ \frac{HRA}{OBA}\ \frac{1}{2}\ \frac{HRP}{OBP}$

Subsection (d) The sums not allocated to the organized boroughs in (b) and (c) are allocated in the unorganized boroughs on a competitive basis between all communities, organized or unorganized.

STATE OF ALASKA

DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES

OFFICE OF THE COMMISSIONER

BILL SHEFFIELD, GOVERNOR

POUCH Z
JUNEAU, ALASKA 99811
PHONE: (907) 465-3900

January 31, 1986

The Honorable Jack Coghill
Senator
Alaska State Legislature
P.O. Box V
Juneau, Alaska 99811

Dear Senator Coghill:

In order to view the ramifications of the proposed changes to the funds distribution formulae in the LSR&T Act, I have prepared the following comparisons based on a one million dollar appropriation.

A. Distribution reflecting your proposal at the Senate Transportation Committee hearing January 29, 1986, which deletes the direct allocation to all first-class cities and the home-rule cities which are not within the boundaries of an organized borough. Projects for these local governments will have to compete with all cities and villages within their respective unorganized borough.

B. This distribution reflects CSHB 111 version which deletes only the first-class cities, returning the distribution method to pre-1981.

C. Distribution of funds by deleting direct allocations to any city, whereby all cities and villages within their respective allocation district would compete for funds.

I am also enclosing the distribution of LSR&T funds presently in use and a map reflecting the allocation districts for your use.

Sincerely,

Warren Sparks
Deputy Commissioner

Enclosure

HB

133

ALASKA AIR CARRIERS ASSOCIATION
TESTIMONY BEFORE
THE SENATE TRANSPORTATION COMMITTEE
FEBRUARY 6, 1986

Chairman Coghill and members of the Senate Transportation Committee, my name is Reed Stoops and I am here today to discuss the implementation of House Bill 133, which was passed last year. We would like to thank you for your cooperation in working with us on the legislation last year, and for your continuing interest in its implementation.

First, I will briefly comment on the Interim Committee report which addressed points raised in the letter of intent which accompanied HB 133. As you are aware, 1985 was not a very good year in terms of air safety. We had a total of 43 accidents, in which there were 17 fatalities. While this was a higher number of accidents than experienced during the last three years, it is below the number of accidents and fatalities in 1980-1981.

In trying to determine whether additional safety related requirements are necessary to insure improved safety in the air industry, we have to concur with the findings of the interim report that there is insufficient statistical analysis at this time to support the need for new requirements. We do, however, feel that we should try to improve accident data in 1986, as there could well prove to be a demonstrable need for higher standards of flight operations.

As to the need for additional pilot training, we feel strongly that this is vital to improved safety. The Alaska Aviation Safety Foundation has very recently completed a set of lesson plans designed specifically for Alaskan conditions. These are now being presented to pilots in communities throughout the State. With continued support from the State for this training effort, we hope to reduce air accidents through this voluntary program.

The implementation of HB 133 through the Department of Commerce and Economic Development has been acceptable administratively, but suffers from lack of enforcement. Shortly after passage of the bill last year, we found ourselves in disagreement with the Department over the enforceability of the provisions requiring a certificate of compliance for minimum insurance levels. An attorney general's opinion was requested last summer, but to our knowledge no written opinion has yet been completed. In the absence of enforcement, some air carriers are able to operate without the minimum insurance levels adopted in HB 133.

In order to correct this situation, we have reviewed suggested amendments to HB 133 prepared by the Department of Commerce, and wish to endorse several of them in order to assure that the bill will be enforced. I have prepared our recommendations, and enclose them for the committee's consideration, along with justification for each.

We urge you to prepare legislation which incorporates our suggestions, which we view as technical amendments, and which leaves alone the more controversial provisions of HB 133 such as the minimum insurance levels. We also endorse the Governor's budget request for additional administrative support to the Division of Weights and Measures to enforce HB 133.

Thank you for the opportunity to appear before you today.

Amendment 1 to Sec. 42.30.200(e) increases the size and severity of a fine to an air carrier who flies passengers for hire without first securing the minimum insurance levels required by HB 133 ($150,000 per seat). Without a more strict penalty, carriers may find it cheaper to ignore the law than to comply.

Amendment 2 to Sec. 42.30.225(b) allows the insurance "certificate of compliance" to be posted in a visible location other than in the aircraft. This would be particularly helpful to the jet carriers which often interchange planes, thus making it difficult to post certificates in the aircraft. It would also reduce the cost of a certificate from $50 to $25.

Amendment 3 to Sec. 42.30.225(c) specifically authorizes the Department of Commerce to stop aircraft from carrying passengers for hire until they comply with HB 133.

Amendment 4 to Sec. 42.30.225(d) provides for a specific penalty for a carrier who fails to obtain a certificate of insurance from the State.

Amendment 5 to Sec. 42.30.380(3) clarifies the definition of aircraft to include rotor devices (helicopters).

Study seeks to pinpoint factors in Alaska air crash

By CHRIS GEIGER
Daily News reporter

Alaska pilots who fly unfamiliar aircraft, land in Juneau, or fly on hunting trips may be taking a greater risk than they know.

According to statistics compiled by the state Epidemiology Office, about 46 percent of fatal crashes during a 19-year period involved pilots with less than 50 hours of experience in the plane they were flying. About 31 percent of accidents in the Juneau area and about 35 percent of hunting-related crashes were killers.

As part of a continuing study, the office has analyzed many other causes of Alaska aircraft crashes from 1963 to 1981 and put numbers to some of the specific dangers of Alaska aviation.

Although the numbers are more suggestive than definitive, said State Epidemiologist John Middaugh, they may help pinpoint factors that need more study — and eventually lead to safety measures by aircraft manufacturers and regulatory agencies.

Begun in 1983, the study analyzes Federal Aviation Administration and National Transportation Safety Board crash data for 3,887 general aviation accidents.

The study identi of 12,426 risk fa organized them in categories. The thre ics most often con accidents were pil weather and terrain.

Some of the spec dent factors analyze time of year, locatio aircraft, weather cc drug and alcohol carbon monoxide blood.

According to ti crashes of private showed a lower fata

See Page B-

Crash study

Continued from Page B-1

1.2 percent) than air taxi rashes (15.5 percent). The air ixi crashes were more often aused by weather conditions nd ground personnel, while rivate aircraft accidents ere more often the result of ilot error or hazardous ter- ain.

The study said the total umber of flying hours, and tal number of hours in the odel of aircraft that ashed, were of "striking im- ortance."

"Analysis . . . strongly sug- sts that experienced pilots e at high risk of accidents hen flying a new aircraft gardless of total numbers of urs of aviation experience," e study said.

Thirteen out of 309 Alaska lots involved in crashes — out 10 percent — had blood levels of the poisonous gas carbon monoxide that could have impaired their flying ability, the study says. Nine of the 309 pilots had drugs in their bloodstreams, and 36 — about 12 percent — had some level of alcohol.

The study also found:

• The proportion of fatal crashes to total accidents was highest in and near Juneau, followed by Ketchikan, Palmer, Cordova and Bettles.

• Flying associated with hunting was more likely to result in fatal accidents. Alaska NTSB chief Jim Michelangelo said this may be because hunters tend to overload their aircraft with game.

• Pilot error was cited in about 41 percent of all accidents. Inadequate preflight preparation, failure to maintain or reach flying speed, and aircraft overload were the most common specific causes.

• Passengers in helicopters that crash are more likely to get hurt than those in fixed-wing aircraft.

• Night flying was a cause of a significant number of deaths.

Seminars aimed at flying safety in Alaska

Continued from Page B-1

seminar already has been held in Bethel.

Next fall's seminars will be presented by longtime pilots with experience in the various subject areas, Zundel said, and will either be free or cost very little.

One of the lessons, called "Flight Techniques: Area Specific," consists of eight different seminars, each tailored to a different part of the state.

The other eight lessons are entitled:

• "Flight Techniques in Adverse Weather."

• "Pilotage and Navigation in Alaska."

• "Mountain Flying — General and Specific Pass Flying."

• "Fuel Handling and Management."

• "Cold Weather Operations."

• "Gathering and Interpreting Weather Information and Trends."

• "Landings and Takeoffs."

Nothing short of total safety will do

The Federal Aviation Administration has a lengthy record of achievement in Alaska few federal agencies can match. But the U.S. Department of Transportation's recent draft audit of the Alaska Region's Aviation Safety Enforcement Program raises some serious questions about FAA practices that have yet to be answered adequately.

Auditors discovered that the FAA was not inspecting Alaska air carriers with required frequency. They also revealed a lack of standard inspection procedures, a records management system that had fallen into disuse, and a pattern of reduced sanctions and penalties against carriers found in violation of air safety regulations. In response, an Alaska FAA spokesman charged the auditors were mistaken and misguided — but he would not release a copy of the FAA's official reply to the auditors.

The FAA audit is particularly troubling given one of the records that is available: the Alaska aviation accident record. According to the National Transportation Safety Board, there were 26 accidents involving air taxi operators between Oct. 1, 1984 and April 18, 1985. Seven of these accidents produced fatalities — 15 people were killed. That's a painful record.

Gone are the days when bush pilots routinely confronted danger and saved passengers' lives with aviation miracles. Today, Alaska commercial aviation is a business, not a form of wilderness adventure.

Although most Alaskan carriers surely operate in a responsible manner, Alaskans deserve continued assurance they can fly with confidence. Planes must be safe; pilots must prove they can do the job; companies must operate in a safe manner. There is no excuse for anything less than a premium on safety from the entire aviation industry. And the FAA must be there to see that regulations and requirements protecting the public are met. Nothing less than the highest standards — and enforcement levels — will do.

Seminars designed [illegible] flying conditions in state

By CHRIS GEIGER
Daily News reporter

Pilots in Georgia generally don't have to worry about whiteout conditions, fuel freezing into gel, or wings that get so cold they fall off.

But Alaska pilots have more to contend with, and that was part of the inspiration for a special curriculum on Alaska aviation developed by the Alaska Aviation Safety Foundation.

Under contract from the Legislature, the foundation completed the curriculum a month ago, and if all goes well will begin presenting its series of nine safety seminars in October. Videotapes of the seminars eventually will be distributed all over the state, a foundation spokesman said.

"The terrain and climate here are so different," said Dave Zundel, vice president of the foundation. "People need to know more specifics about what to expect."

The foundation, an educational arm of the Alaska Air Carriers Association, began developing the lesson plans a year-and-a-half ago, after studies by federal and private agencies indicated a need for such educational efforts, Zundel said. One free preliminary

Sec. 42.30.200. AIR CARRIER FINANCIAL RESPONSIBILITY. (a) A person who carries passengers or freight for commercial purposes intrastate in an aircraft shall procure and maintain security in the following minimum amounts:

(1) Liability for bodily injury or death of persons:

A limit of at least $150,000 for any one person in any one occurrence and a limit for each occurrence in any one aircraft of at least an amount equal to the sum produced by multiplying one hundred fifty thousand dollars ($150,000) by seventy five percent (75 percent) of the total rated seating capacity of the aircraft. [$150,000 PER SEAT FOR BODILY INJURY OR DEATH IN A SINGLE OCCURRENCE; AND]

(2) Liability for loss of or damage to property:

A limit of at least one hundred thousand dollars ($100,000) for each occurrence. [$100,000 FOR PROPERTY DAMAGE IN A SINGLE OCCURRENCE]

(b) Evidence of security required under (a) of this section shall be filed with the department and must be

(1) a policy or certificate of insurance issued by an insurer acceptable to the department; or

(2) a bond of a surety company licensed to write surety bonds in the state; or

(3) evidence accepted by the department, showing ability to self-insure; or

(4) other security approved by the department.

(c) The department may authorize department personnel to enforce this section and may adopt procedural regulations necessary to implement this section.

Commerce's Proposed Changes to AS 42.30.200, .205, 380 - (Air Carrier financial responsibility)

(d) A policy of insurance, surety bond, or other form of security may not be cancelled on less than 30 days written notice to the department. This requirement must be clearly stated in the policy or endorsement for an insurance policy submitted as proof of financial responsibility under AS 42.30.225(a)(1). The 30 day notice period is measured from the date on which the department receives notice.

(e) A person who violates [(a) OF] this section is guilty of a class [B] A misdemeanor and is punishable by a fine of not less than [$500] $1,000 or more than [$1,000] $5,000.

Sec. 42.30.225. CERTIFICATION OF COMPLIANCE OF AIR CARRIERS. (a) A person may not use an aircraft in air commerce before obtaining an annual certificate of compliance for that aircraft from the department. The department shall issue or renew a certificate of compliance upon application and presentation of

(1) proof of financial responsibility required under AS 42.30.200;

(2) proof of compliance with Federal Aviation Administration requirements, and, where applicable, federal certification for scheduled airline service.

(b) The annual fee for a certificate of compliance is $50. The certificate is valid for a period of 12 months following the date of certification. The certificate shall be displayed [ON THE AIRCRAFT] so that it [IS] is visible to boarding passengers.

(c) The department may investigate complaints or violations of this section and conduct other investigations that the department considers appropriate and advisable to develop information on possible violations of AS 42.30.200 or AS 42.30.225 and may, upon completion of this investigation

where a violation of AS 42.30.200(a) exists, issue a stop use order. [USE OF AN AIRCRAFT IN AIR COMMERCE BEFORE OBTAINING A CERTIFICATE OF COMPLIANCE REQUIRED UNDER (a) OF THIS SECTION MAY BE CAUSE FOR DENIAL OF THE CERTIFICATE]

(d) A person who violates this section is guilty of a class B misdemeanor and is punishable by a fine of not less than $500 or more than $1,000. [A PERSON WHO HAS OBTAINED A CERTIFICATE TO USE AN AIRCRAFT IN AIR COMMERCE FROM THE ALASKA TRANSPORTATION COMMISSION BEFORE THE EFFECTIVE DATE OF THIS ACT IS NOT REQUIRED TO OBTAIN A CERTIFICATE OF COMPLIANCE UNDER (a) OF THIS SECTION UNTIL THE DATE THE INSURANCE POLICY FOR THE AIRCRAFT IS RENEWED]

(e) The department may authorize department personnel to enforce this section and may adopt procedural regulations necessary to implement this section.

Sec. 42.30.380. DEFINITIONS. (a) In AS 42.30.200 - 42.30.380,

(1) "air carrier" means a person undertaking to engage in air commerce, whether directly or indirectly, or by lease, contract, or any other arrangement, and whether over regular or irregular routes;

(2) "air commerce" means carriage by aircraft of persons or freight for commercial purposes or hire in intrastate commerce, including the carriage by aircraft of persons or freight that move partly by aircraft and partly by other forms of transportation;

(3) "aircraft" means a propeller, rotor or jet powered device used or designed for flight in the air;

(4) "commercial purposes" means activities for which the persons receives direct monetary compensation and does not include activities incidental to and done in furtherance of the person's primary business;

(5) "department" means the Department of Commerce and Economic Development;

(6) "freight" means commodities, articles, and cargo, of whatever nature or value, excluding garbage and trash.

IN THE SENATE

BY THE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

SENATE BILL NO. 380

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to commercial vehicle financial responsibility; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 28.33.010(a) is amended to read:

(a) A person who carries passengers or freight for hire intrastate in a commercial motor vehicle or a person who carries freight in a motor vehicle for commercial purposes, or a person who rents or leases a motor vehicle for the use of another to carry freight shall procure and maintain security [IN THE FOLLOWING MINIMUM AMOUNTS:

(1) $200,000] for property damage, [IN A SINGLE OCCURRENCE;

(2) $500,000 FOR] bodily injury, or death, in a single occurrence, in minimum amounts set by the department in regulations adopted under this chapter.

* Sec. 2. AS 28.33.010(c) is amended to read:

(c) The department may authorize department personnel to enforce this section and shall [MAY] adopt [PROCEDURAL] regulations necessary to implement this section, including regulations to set minimum security amounts under (a) of this section.

* Sec. 3. Section 2 of this Act takes effect immediately in accordance with AS 01.10.070(c).

* Sec. 4. Section 1 of this Act takes effect on the effective date of regulations adopted under AS 28.33.010(c), amended in sec. 2 of this Act, which set the minimum security amounts required for commercial vehicles.

Governor's Proposed Bill

Offered: 5/12/85

Original sponsor: Rules/Governor

IN THE HOUSE BY THE CONFERENCE COMMITTEE

CONFERENCE CS FOR HOUSE BILL NO. 133

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to transportation safety and financial responsibility; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 28.10.041(a) is amended by adding a new paragraph to read:

(9) the vehicle is without a certificate of inspection required under AS 28.32.010.

* Sec. 2. AS 28.15.041 is amended by adding a new subsection to read:

(c) A person may not drive a commercial motor vehicle until the person applies for and is issued a license for that purpose under (a) of this section. The department may not issue a license under this subsection unless the applicant is at least 19 years of age, has held a valid driver's license at least one year, and has successfully completed all required driving tests and written and physical examinations. In this subsection, "commercial motor vehicle" has the meaning given in AS 28.32.900.

* Sec. 3. AS 28 is amended by adding a new chapter to read:

CHAPTER 32. COMMERCIAL MOTOR VEHICLE SAFETY INSPECTIONS.

Sec. 28.32.010. COMMERCIAL MOTOR VEHICLE SAFETY INSPECTIONS. A commercial motor vehicle may not be operated after January 1, 1986 without a certificate of inspection. An owner of a commercial motor vehicle shall renew a certificate of inspection at least semi-annually at an official inspection station under AS 28.32.030. The owner may

renew a certificate of inspection at any time during the office hours of the inspection station. An owner of a commercial motor vehicle shall display a current sticker of inspection visible from outside the vehicle in a location determined by the division.

Sec. 28.32.020. EXEMPTIONS. A commercial motor vehicle is exempt from the requirements of AS 28.32.010 if it is

(1) owned and operated by the federal government unless the vehicle is used to transport property of the general public for compensation in competition with other persons who own or operate a commercial motor vehicle subject to this chapter, and except to the extent regulation of vehicles operated by the federal government is permitted by federal law;

(2) used exclusively to transport ranch and farm products other than bulk milk; or

(3) customarily and historically used for commercial purposes for less than 20 hours per month.

Sec. 28.32.030. OFFICIAL COMMERCIAL MOTOR VEHICLE INSPECTION STATIONS. (a) A person may not operate an official commercial motor vehicle inspection station without a permit from the division. The division shall approve an application for permit to operate an inspection station if

(1) the division determines the inspection station has proper equipment and competent personnel; and

(2) a commercial motor vehicle inspector certified under AS 28.32.040 is employed at the inspection station.

(b) After the division approves an application for a permit to operate an official inspection station under (a) of this section, it shall provide the applicant with a permit and certificates of inspection.

(c) Upon receipt of a permit from the division under (b) of this section, the operator of an official commercial motor vehicle inspection station shall post the permit in a conspicuous place at the location designated by the division.

(d) The division may enter the premises of the operator of an official commercial motor vehicle inspection station during the station's business hours to inspect the work of a certified commercial motor vehicle inspector or to determine if the operator continues to meet the requirements of this section.

(e) The division shall suspend or revoke a permit of an operator of an official commercial motor vehicle inspection station if the operator fails to meet the requirements of this section.

(f) Upon notice of suspension or revocation of a permit under (e) of this section, the operator of an official commercial motor vehicle inspection station shall immediately terminate all inspection activities and, on demand by the division, return the permit and all unissued certificates of inspection. The division shall issue a receipt for all returned certificates of inspection.

(g) If a permit is suspended or revoked under (e) of this section, the division shall give the holder of the permit a hearing within 10 days after receipt of a written request filed with the division within 30 days after suspension or revocation.

(h) A permit to operate an official commercial motor vehicle inspection station may not be assigned, transferred, or used at a location other than the location designated by the division.

Sec. 28.32.040. CERTIFICATION OF COMMERCIAL MOTOR VEHICLE INSPECTORS. (a) A person may not conduct a commercial motor vehicle inspection at an official inspection station under AS 28.32.030 unless certified as a commercial motor vehicle inspector by the division.

(b) The division may suspend or revoke the certification issued to a commercial motor vehicle inspector under (a) of this section if the commercial motor vehicle inspector improperly conducts inspections or fails to comply with a provision of this section.

(c) If a certificate is revoked or suspended under (b) of this section the division shall give a commercial motor vehicle inspector a hearing within 10 days after the receipt of a written request filed with the commissioner within 30 days after revocation or suspension.

Sec. 28.32.050. ISSUANCE OF CERTIFICATE OF INSPECTION. (a) A person operating an official commercial motor vehicle inspection station shall issue a certificate of inspection to the owner of a commercial motor vehicle after determining that the commercial motor vehicle is in a safe and mechanically sound condition.

(b) A person operating an official commercial motor vehicle inspection station shall keep a record of each inspection performed at the station. The division may audit the records of an official inspection station at any time.

Sec. 28.32.060. FALSELY REPRESENTING TO BE AN OFFICIAL STATION. (a) A person may not represent a place as an official commercial motor vehicle inspection station unless the station is operating under a valid permit issued by the division under AS 28.32.030.

(b) A person may not issue a certificate of inspection under AS 28.32.050 unless the person holds a valid permit under AS 28.-32.030.

Sec. 28.32.070. COUNTERFEIT CERTIFICATES OF INSPECTION. (a) A person may not make, issue, or knowingly use an imitation or counterfeit of an official certificate of inspection.

(b) A person may not knowingly display or issue a certificate of inspection on a commercial motor vehicle unless the commercial

motor vehicle has met the requirements of AS 28.32.050(a).

Sec. 28.32.080. DUTIES OF COMMISSIONER. The commissioner of public safety shall adopt procedural regulations appropriate to achieve compatibility with other western states and procedural regulations necessary to implement this chapter.

Sec. 28.32.090. VIOLATION A MISDEMEANOR. A person who violates a provision of this chapter is guilty of a class B misdemeanor.

Sec. 28.32.900. DEFINITIONS. In this chapter,

(1) "commercial motor vehicle" means a vehicle used by the owner or another person for commercial purposes upon a highway or vehicular way with a daily traffic volume greater than 499 that is a part of the state highway system or is connected by another highway or vehicular way to the state highway system, if the vehicle is

(A) a school bus;

(B) a state or local government vehicle of more than 10,000 pounds unladen gross weight;

(C) a truck or bus of more than 10,000 pounds unladen gross weight; or

(D) a trailer of 5,000 pounds or more unladen gross weight attached to a vehicle described in (C) of this paragraph;

(2) "commercial purposes" means activities for which a person receives direct monetary compensation or activities for which a person receives no direct monetary compensation but are incidental to and done in furtherance of the person's primary business;

(3) "division" means the division of motor vehicles, Department of Public Safety.

* Sec. 4. AS 28 is amended by adding a new chapter to read:

CHAPTER 33. COMMERCIAL MOTOR VEHICLE FINANCIAL RESPONSIBILITY.

Sec. 28.33.010. FINANCIAL RESPONSIBILITY. (a) A person who

carries passengers or freight for hire intrastate in a commercial motor vehicle or a person who carries freight in a motor vehicle for commercial purposes, or a person who rents or leases a motor vehicle for the use of another to carry freight shall procure and maintain security in the following minimum amounts:

(1) $200,000 for property damage in a single occurrence;

(2) $500,000 for bodily injury or death in a single occurrence.

(b) Evidence of security required under (a) of this section shall be filed with the department and must be

(1) a policy or certificate of insurance issued by an insurer acceptable to the department; or

(2) a bond of a surety company licensed to write surety bonds in the state; or

(3) evidence accepted by the department, showing ability to self-insure; or

(4) other security approved by the department.

(c) The department may authorize department personnel to enforce this section and may adopt procedural regulations necessary to implement this section.

(d) A policy of insurance, surety bond, or other form of security may not be cancelled on less than 30 days' written notice to the department. This requirement must be clearly stated in the policy or endorsement for an insurance policy submitted as proof of financial responsibility under AS 42.30.225(a)(1). The 30-day notice period is measured from the date on which the department receives notice.

(e) A person who violates (a) of this section is guilty of a class B misdemeanor and is punishable by a fine of not less than $500 or more than $1,000.

(f) In this section "freight" means commodities, articles, and cargo, of whatever nature or value.

* Sec. 5. AS 42.30.200 is amended to read:

Sec. 42.30.200. AIR CARRIER FINANCIAL RESPONSIBILITY. (a) A person who carries passengers or freight for commercial purposes [HIRE] intrastate in an aircraft shall procure and maintain security in the following minimum amounts:

(1) $150,000 per seat for bodily injury or death in a single occurrence; and

(2) $100,000 for property damage in a single occurrence [AN AMOUNT DETERMINED BY THE DEPARTMENT OF PUBLIC SAFETY AS NECESSARY FOR THE REASONABLE PROTECTION OF THE PUBLIC AGAINST DAMAGES OR INJURY CAUSED BY THE PERSON].

(b) Evidence of security required under (a) of this section shall be filed with the department and must be

(1) a policy or certificate of insurance issued by an insurer acceptable to the department; or

(2) a bond of a surety company licensed to write surety bonds in the state; or

(3) evidence accepted by the department, showing ability to self-insure; or

(4) other security approved by the department.

(c) The department may authorize department personnel [ENFORCEMENT OFFICERS] to enforce this section and may adopt procedural regulations necessary to implement this section.

* Sec. 6. AS 42.30.200 is amended by adding new subsections to read:

(d) A policy of insurance, surety bond, or other form of security may not be cancelled on less than 30 days' written notice to the department. This requirement must be clearly stated in the policy or

endorsement for an insurance policy submitted as proof of financial responsibility under AS 42.30.225(a)(1). The 30-day notice period is measured from the date on which the department receives notice.

(e) A person who violates (a) of this section is guilty of a class B misdemeanor and is punishable by a fine of not less than $500 or more than $1,000.

* Sec. 7. AS 42.30 is amended by adding new sections to read:

Sec. 42.30.225. CERTIFICATION OF COMPLIANCE OF AIR CARRIERS. (a) A person may not use an aircraft in air commerce before obtaining an annual certificate of compliance for that aircraft from the department. The department shall issue or renew a certificate of compliance upon application and presentation of

(1) proof of financial responsibility required under AS 42.30.200;

(2) proof of compliance with Federal Aviation Administration requirements, and, where applicable, federal certification for scheduled airline service.

(b) The annual fee for a certificate of compliance is $50. The certificate is valid for a period of 12 months following the date of certification. The certificate shall be displayed on the aircraft so that is is visible to boarding passengers.

(c) Use of an aircraft in air commerce before obtaining a certificate of compliance required under (a) of this section may be cause for denial of the certificate.

(d) A person who has obtained a certificate to use an aircraft in air commerce from the Alaska Transportation Commission before the effective date of this Act is not required to obtain a certificate of compliance under (a) of this section until the date the insurance policy for the aircraft is renewed.

(e) The department may authorize department personnel to enforce this section and may adopt procedural regulations necessary to implement this section.

Sec. 42.30.380. DEFINITIONS. (a) In AS 42.30.200 - 42.30.380,

(1) "air carrier" means a person undertaking to engage in air commerce, whether directly or indirectly, or by lease, contract, or any other arrangement, and whether over regular or irregular routes;

(2) "air commerce" means carriage by aircraft of persons or freight for commercial purposes or hire in intrastate commerce, including the carriage by aircraft of persons or freight that move partly by aircraft and partly by other forms of transportation;

(3) "aircraft" means a propeller or jet-powered device used or designed for flight in the air;

(4) "commercial purposes" means activities for which the person receives direct monetary compensation and does not include activities incidental to and done in furtherance of the person's primary business;

(5) "department" means the Department of Commerce and Economic Development;

(6) "freight" means commodities, articles, and cargo, of whatever nature or value, excluding garbage and trash.

* Sec. 8. AS 44.33.020 is amended by adding a new paragraph to read:

(27) implement the safety and financial responsibility requirements for air carriers under AS 42.30.200 - 42.30.380.

* Sec. 9. This Act takes effect immediately in accordance with AS 01.-10.070(c).

MEMORANDUM

To: Committee Members

From: Committee Staff BC

Re: Meeting of February 5, 1986

Today the committee will be taking up a discussion of problems and potential solutions regarding the enforcement of what was known last year as HB 133. Commissioner Sundberg and Joe Swanson of DCED, Division of Measurement Standards, will be giving testimony on any problems with enforcement of the new statutes that they have run into.

Included in this packet is a copy of the Conference Committee Substitute passed by the House and Senate Conference Committee on HB 133 last year, a "clean up" bill introduced by the Governer's office, Commerce's proposed changes to the statutes, and a letter by the Insurance Company of North America to a company in Soldotna in response to the passage of HB 133.

We will also be continuing work on CSHB 111, please bring both 111 packets for that discussion, thank you.

FROM: Elizabeth Ziegler

RE: HB 133 positions

Tomorrow the following groups will be attend the committee meeting and voice their concerns regarding hb133.

This memo attempts to outline what those positions are, so you will be prepared.

Joe Swanson--has submitted proposed legislation regarding air carrier financial responsibility, enforcement and adding rotor craft to the definition of aircraft.

Reed Stoops--Air Carriers will also say that the portion dealing with enforcement of air certificate of compliance needs more teeth.

Comm. Sundberg and Jim Vaden--Public Safety will just talk about how much money is needed to implement the truck inspection safety program. They will report how the insurance certificate program went since its implementation last fall.

Alaska Trucking Assn.--will testify about how difficult it is to get insurance in the proscribed amounts of the bill.

Gov's office--no word they are coming, but they have introduced SB 380 to allow the dept. to promulgate regulations to deal with the insurance problem.

5, 1986

TO: SENATOR COGHILL

FROM: EZ

RE: TODAY'S MEETING

A. TODAY'S FIRST ORDER OF BUSINESS IS THE OVERVIEW OF WHAT HAS HAPPENED TO HB133 SINCE ITS PASSAGE LAST MAY.

1. FIRST CALL COMMISSIONER SUNDBERG TO TESTIFY

2. ASK SUNDBERG WHAT HAS BEEN IMPLEMENTED BY PUBLIC SAFETY SINCE PASSAGE.

3. ASK HOW THE PROGRAM HAS BEEN SET UP, I.E. THE INSURANCE CERTIFICATES AND WHAT IF ANYTHING HAS BEEN ACCOMPLISHED ON THE TRUCK SAFETY INSPECTION PLAN.

4. ASK SUNDBERG WHAT THE DEPARTMENT'S FISCAL NOTE IS ON THE IMPLEMENTATION OF HB 133.

5. ASK SUNDBERG HOW SOON WOULD THE GOVERNOR'S BUDGET MONIES WOULD BE AVAILABLE TO THE DEPARTMENT.

B. NEXT CALL JOE SWANSON, DIRECTOR, DIVISION OF MEASUREMENT STANDARDS, COMMERCE AND ECONOMIC DEVELOPMENT.

1. ASK JOE ABOUT WHAT MEASUREMENT STANDARDS IS DOING ABOUT THE AIR CARRIER CERTIFICATES OF COMPLIANCE PROGRAM IN HB133.

2. ASK JOE IF THERE ARE ANY PROBLEMS WITH THE BILL

C. NEXT CALL THE AIR CARRIERS

1. REED STOOPS WILL BE THERE.

2. ASK REED HOW THE AIR CARRIER INDUSTRY VIEWS HB 133 AND ANY CONCERNS.

D. NEXT CALL T.J. TRASHER, AK. TRUCKERS ASSN.

THE TRUCKERS CONCERN IS WITH FUNDING FOR THE TRUCK SAFETY PROGRAM.

C.
2.

ALASKA TRUCKING ASSOCIATION POSITION PAPER
ENFORCEMENT OF CHAPTER 104, SESSION LAW '85

THE ALASKA TRUCKING ASSOCIATION URGES THE SECOND SESSION OF THE 14TH LEGISLATURE TO ADEQUATELY FUND THE DEPARTMENT OF PUBLIC SAFETY FOR PROPER ENFORCEMENT OF THE STATE COMMERCIAL VEHICLE LAW.

THE ALASKA TRUCKING ASSOCIATION HAS SUPPORTED HOUSE BILL 133 THROUGH THE FIRST SESSION OF THE 14TH LEGISLATURE AND URGES THAT THIS BILL REMAIN INTACT.

THE ALASKA TRUCKING ASSOCIATION SUPPORTS FUNDING FOR:

The enforcement of the insurance provision which requires that a person who carries passengers or freight intrastate in a commercial motor vehicle shall procure and maintain insurance for property damage and bodily injury or death.

The promulgation of regulations to require a person who drives a commercial motor vehicle to apply for and be issued a license after successful completion of driving tests and written and physical examination.

The promulgation of regulations requirement that all vehicles registered in the State obtain a certificate of inspection, conducted in the private sector under State issued guidelines and control.

THE ALASKA TRUCKING ASSOCIATION BELIEVES FUNDING FOR MINIMUM SAFETY LAWS TO BE ENFORCED IS CRUCIAL FOR TODAY'S DEREGULATED ENVIRONMENT.

SUBJECT: NEW FINANCIAL RESPONSIBILITY REQUIREMENTS FOR ALASKA MOTOR VEHICLE OPERATORS

The 1985 Alaska State Legislature has enacted a major change in the motor vehicle financial responsibility requirements for your commercial clients. Because this change has arrived unexpectedly, and because the law is ambiguous on some key points, we would like to inform you of the actions we are taking to comply with the change.

Effective June 13, 1985, Alaska Statutes 28, was amended to include a new chapter, Chapter 33, which imposes a new requirement of financial responsibility as follows:

"A person who carries passengers or freight for hire intrastate in a commercial motor vehicle or a person who carries freight in a motor vehicle for commercial purposes, or a person who rents or leases a motor vehicle for the use of another to carry freight shall procure and maintain security in the following minimum amounts:

(1) $200,000 for property damage in a single occurrence;
(2) $500,000 for bodily injury or death in a single occurrence."

Unfortunately, Chapter 33 does not define the key phrase "for commercial purposes." There is a definition in Chapter 32, which relates to inspections, which states "In this chapter.....(2) 'commercial purposes' means activities for which a person receives direct monetary compensation or activities for which a person receives no direct monetary compensation but are incidental to and done in furtherance of the person's primary business;"

The Division of Motor Vehicles, Department of Public Safety, is using the Chapter 32 definition to interpret Chapter 33. They are also using the Chapter 32 definition of "commercial motor vehicle" to limit the the application of Chapter 33 to "....a vehicle used by the owner or another person for commercial purposes upon a highway or vehicular way.....if the vehicle is

(A) A school bus;
(B) A state or local Governmental vehicle of more than 10,000 pounds unladen gross weight;
(C) A truck or bus of more than 10,000 pounds unladen gross weight; or
(D) A trailer of 5,000 pounds or more unladen gross weight attached to a vehicle described in (C) of this paragraph."

Insurance Company of North America Response to HB 133

→ SDC by phone — told Frank Gorham that he could interpret statutes in part materially to give some definit ↓ said about legislative intent

These interpretations are based on an informal opinion from the Attorney General regarding the Legislature's intent.

The new Chapter 33 also requires your clients to file evidence of security meeting these requirements with the Division of Motor Vehicles. Because of the broad scope of the interpretation, this will cost us significant expense for filings and cancellations of those filings.

There is also a substantial question regarding the use of combined single limits to satisfy the law requirements. We believe that split limits may be mandated by the law. This poses a difficulty, as the vast majority of our commercial automobile liability coverage is now written at $500,000 CSL.

Because of the expense and effort involved in this matter, we will not pursue those risks which require filings. Please do not bind us on any new business which requires filings. If you must submit any such new business, we will require:

(1) Copies of the motor vehicle records (not merely the releases) for all drivers of all vehicles to be insured; and
(2) Complete four-year loss history, including amounts paid and reserved, premiums, carrier name and policy numbers.

Any applications submitted after August 1, 1985, without these items will be returned. We will not write this business unless supported by acceptable package collateral lines.

For supported renewals, and the few new risks we do accept, we will follow these procedures:

(1) All policies which require filings will be written for the same limits for all vehicles. We will not apply separate limits to exempted vehicles.
(2) No auto risks with filings will be written as part of a package policy. This is to enable us to control the filings and cancellations. We will remove any such risks from our in-force packages at expiration.
(3) We will not endorse in-force policies to new limits unless you request. At renewal, our policies will be available (for risks with filings) with three options:
    a) 500/500/250
    b) 500/500/500
    c) 500/1000/250

    Renewals with expiring limits of $500,000 CSL will be written at 500/500/500, unless you advise otherwise. Those with $1,000,000 CSL will be written at 500/1000/250, unless you request otherwise. Any request for higher limits than expiring, or for more than 500,000, per person, will be subject to very stringent underwriting, and we will limit our acceptance strictly to a few select risks.

4. Effective immediately, we will no longer write bobtail or dead-heading (non-trucking) liability. All such coverage will be non-renewed. No new bobtail coverage will be accepted after August 1, 1985. We will not make filings on this coverage.

These changes reflect our desire to offer coverage within a selected range of risks. It is important to remember that we will entertain no unsupported auto coverage, new or renewal, which requires filings. We wish to provide the coverage only for those accounts which offer a sufficient opportunity for an underwriting profit.

HB

1811

2D SS HB 181 - An Act relating to the maintenance of vessels of the Alaska Marine Highway System.

Chairman Adams said the bill would require ferries be maintained at Alaska ports if it could be done at competitive prices. He said the sponsor was proposing to expand the bill to cover all state vessels, not just ferries. He noted that the Department of Transportation and Public Facilities was currently unable to estimate the cost of the bill. He informed members the bill would be placed in a subcommittee consisting of Representatives Szymanski, chair; Duncan and Uehling.

REPRESENTATIVE TAYLOR said the purpose of the legislation is to ensure that the $77 million already invested by the state in maintenance facilities will be utilized. He discussed the difficulties faced by the Ketchikan and Seward facilities in trying to develop the capital infrastructure necessary to become competitive in the area of vessel repair. He discussed the 5% Alaska bidder preference in relationship to the bill and the bill as an Alaskan hire bill which could legally and constitutionally be enforced. He said there are several large vessels owned by different departments within the state which would not fall within the jurisdiction of the bill. For this reason, Representative Taylor said he would suggest language change to read "all state owned vessels".

REPRESENTATIVE CATO encouraged the Committee's support of the proposed changes to HB 181. She said originally she and Representative Taylor wanted a vehicle to require the state ferry system to utilize marine repair facilities in Seward and Ketchikan. She discussed state investments in the two facilities which had been made to date. According to Representative Cato, a University of Alaska vessel, based in Seward, had been sent to Seattle for prop repair instead of checking and utilizing the facility across the bay in Seward. She said the facility was capable of repairing the vessel; however, since no requirement existed requiring the vessel to first utilize state facilities, $50,000 was spent in fuel.

Representative Cato said there are skilled laborers available and passage of the bill would serve as an additional incentive for hiring and training of laborers to service the vessels. She noted the economic advantages to the communities of Ketchikan and Seward should the bill become law.

(Tape change, 86-28, Side 1)

Representative Larson referred to line 14 of the Transportation CS which states "that there is no facility in the state able and available to perform the maintenance at competitive prices" asking if it should not read able or available. Representative Cato said it should read "or" instead of "and".

RON GARZINI, MANAGER, CITY OF SEWARD, said he had been traveling in an effort to secure private venture capital in the Seward Marine industrial center. He advised members that in addition to the $74 million contributed by the state to develop the two facilities, the City of Seward had spent $4.6 million to develop their facility. He said this year they would do approximately $1.5 million private sector work, operating the facility on a short-term interim basis. Mr. Garzini informed members of inquiries made during their marketing efforts with regard to possible maintenance by the Seward facility of the state's vessels. He said it had been determined that the Seward facility could maintain 95% of the vessels in the Gulf of Alaska, and provide an asset to fisheries development and offshore oil and gas development in the Gulf. Mr. Garzini discussed their need for investment capital to complete the facility and concurrent need for a commitment by the state with regard to in-state maintenance of state vessels.

MIKE MEEHAN, VICE MAYOR, CITY OF SEWARD, reiterated Mr. Garzini's comments with regard to efforts made by the City of Seward to secure private investment emphasizing the need for state support. He urged the Committee to support the bill.

DON CUBLEY, REPRESENTING THE KETCHIKAN GATEWAY BOROUGH, CITY OF KETCHIKAN, CITY OF SAXMAN, INLAND BOATMANS UNION OF THE PACIFIC, AND MASTERS, MATES AND PILOTS UNION, testified in support of the bill. He said it is essential for the state to concentrate on diversification of the state's economy to new industries and revenue sources trying to revitalize traditional renewable resource industries. Mr. Cubley said new industries would create new jobs for Alaskans and keep revenues in-state. According to Mr. Cubley, the marine maintenance facilities in Ketchikan and Seward provide an excellent opportunity in diversifying the state's economy and reducing its dependence upon oil.

The bill was HELD in committee and assigned to a subcommittee consisting of Representatives Szymanski, chair; Duncan and Uehling.

ADJOURNMENT

The meeting adjourned at 2:50 p.m.

(Tape HFC 86-27, Side 1, #512-end)
(Tape HFC 86-27, Side 2)
(Tape HFC 86-28, Side 1, #000-#387)

SENATOR JAN FAIKS, SPONSOR OF THE BILL, said the bill would allow the Department of Health and Social Services to accept the JCAH inspections in lieu of yearly inspections. She said there are 14 hospitals in the state which pay for and receive JCAH inspections. She said this represents a slight duplication of effort. Senator Faiks said should the Department be allowed to receive the accreditation in lieu of their own inspections it would save the state time, effort, and money.

Representative Taylor said he strongly supported the bill.

Representative Ringstad MOVED AND ASKED UNANIMOUS CONSENT to report out of Committee House Committee Substitute for Committee Substitute for SB 45 (Judiciary) with a zero fiscal note. There being NO OBJECTION, it was so ordered and HCS CS SB 45 (Judiciary) was reported out of Committee with a "do pass" recommendation and zero fiscal note.

2dSS HB 181

2dSS HB 181 - An Act relating to maintenance of vessels of the Alaska Marine Highway System.

Chairman Adams informed members the bill had been assigned to a subcommittee consisting of Representatives Szymanski, chair; Duncan and Uehling. He advised members the subcommittee had drafted a proposed Finance Committee Substitute for their consideration.

Representative Szymanski explained the title was changed to include all marine vessels, language added to consider investment within the state of Alaska to marine repair facilities, and examination by the Commissioner of DOTPF concerning amount of state funds invested along with amortization, direct and indirect benefits to the economy, and state labor force. According to Representative Szymanski an exemption under AS 37.05.230, provisions relating to competitive bidding, would be allowed for contract awarded for the maintenance of marine vessels owned by the state of Alaska if the contract is awarded to an in-state facility.

In response to a question from Representative Pourchot concerning competitive bidding, Representative Taylor said it would be easy for the two major ship repair facilities in the Pacific Northwest to be able to under bid significantly work on Alaska's highway system for the first year or so. He said this could totally destroy the viability for the start of any business for either the Seward or Ketchikan site, consequently destroying the costs savings to the state of Alaska which would result. There was discussion concerning the estimated length of contracts.

Representative Larson referenced line 13 of the proposed Committee Substitute which read able "and" available recommending that it be changed to read able "or" available.

Representative Szymanski MOVED AND ASKED UNANIMOUS CONSENT to adopt the work draft dated 4/7/86 for 2d SS HB 181 as the Finance Committee Substitute for the bill. There being NO OBJECTION, it was so ordered.

Representative Larson MOVED to delete the word "and" on line 13 and reinsert the word "or" after able. There being NO OBJECTION, it was so ordered.

Representative Szymanski MOVED AND ASKED UNANIMOUS CONSENT to report out of Committee CS 2d SS HB 181 (Finance) with a zero fiscal note. There being NO OBJECTION, it was so ordered and CS 2d SS HB 181 (Finance) was reported out of Committee with a "do pass" recommendation and zero fiscal note.

HB 552

HB 552 - An Act relating to setting speed limits and neighborhood speed zones.

Chairman Adams said the bill would require that the Department of Transportation and Public Facilities take into account neighborhood concerns before setting speed zones and speed limits on state highways and roads. He said the bill had no fiscal impact until prior to the meeting at which time DOTPF submitted a request for $40,000 to hold public hearings required by the bill. Chairman Adams felt the hearings could be easily absorbed within the Department's budget therefore had prepared a zero fiscal note.

REPRESENTATIVE UEHLING, SPONSOR OF THE BILL, said the bill would require DOTPF to consider the presence of neighborhood schools, parks and pedestrian traffic when setting speed limits. He said state law charges DOTPF with setting speed limits; however, the Legislature has never really given DOTPF any indication of what factors should be considered when setting speed limits. According to Representative Uehling, speed limits are set according to internal policy called the "85th percentile". He informed members the Department almost solely relies upon the use of the 85 percentile, meaning they set speeds at the rate at which 85 percent of the drivers are currently driving. He said HB 552 would give local areas an initiative to help establish reduced speed limits in neighborhoods and help keep them low when new roads go in. He noted there are 12 co-sponsors on the bill and it had generated a number of inquiries from interested individuals.

Representative Pourchot cited an example of an arterial road in Anchorage which runs by schools, through residential areas, contains pedestrian crosswalks, etcetera. He asked if the bill would supersede what might otherwise be placed as a speed based on engineering and design. Representative Uehling said the bill would simply require the Department to consider resident's concerns as expressed through the hearing process.

CONTINUATION of FISCAL NOTE ANALYSIS

For Bill/Resolution No. CS For 2d Sponsor Substitute for HB 181

There are eventualities relating to the maintenance of vessels of the Alaska Marine Highway System within the State of Alaska that could be positive or negative in impact. At this point in time it is not possible to assess the fiscal-impact of the presently written bill.

There is the possibility that the higher costs of doing business in an "Alaskan Shipyard" could be somewhat offset by the savings generated from an interport differental or cost of delivery of a vessel to and from Alaska. On the other side, it would be less desirable for crewmembers to live outside Alaska and more would likely move back resulting in higher COLA payments.

The fiscal impact will remain unknown until some experience is generated in vessel repairs in Alaska.

SOUTHEAST CONFERENCE
P.O. Box 275 • Juneau, Alaska 99802
(907) 586-8000

April 3, 1986

Representative Al Adams
Chair, House Finance Committee
Alaska State Legislature
Juneau, AK 99811

Dear Representative Adams:

The Southeast Conference supports 2D SSHB 181 (relating to the maintenance of vessels) as it is now written. It is our opinion that interport differential and the Alaska bidder preference should allow the Ketchikan shipyard to bid competitively within the West Coast Ship repair market.

The Southeast Conference believes that the Ketchikan shipyard will have the ability to economically serve the Alaska Marine Highway and other potential customers. The shipyard will provide local employment and will benefit the State of Alaska.

We request that the House Finance Committee do pass this bill.

Sincerely,

John Farnan

Position Paper

BILL NO: 181 (2nd Sponsor Substitute) **APPROVED:** R. O. Knapp
Commissioner

TITLE: An Act relating to the Maintenance of Vessels of the Alaska Marine Highway System **DATE:**

The department agrees with the concept that Alaska Marine Highway System (AHMS) vessels should be repaired in Alaska.

However, we disagree with this bill as written as it removes the competitive process from repair contracts. In effect, this bill gives a "blank check" to the private shipyard operator to charge AMHS whatever he pleases since he would have a captive market.

AMHS has made a conscious effort to reduce repair costs and thus make more of the limited budget available for operations. One undesirable result of enactment of this bill, as written, could be an unreasonable increase in the cost of repairs which would be paid out of operating funds with the net result being a reduction in service to Alaskan communities.

Market economic factors favor the operator of the Ketchikan Shipyard. He will have three distinct economic advantages over outside shipyards.

1. He will have minimal capital costs to recover in his repair pricing.

2. He will have an Alaska bidders preference.

3. Any outside bidder will have an "interport differential" added to their bid in the evaluation process.

(Interport differential is the cost of positioning a vessel to another repair port. It includes full, crew repatriation, per diem, and any other identifiable direct cost of the positioning/repositioning. It is calculated for each vessel at each overhaul but would be in the neighborhood of $50,000.00 for a mainline vessel.)

The department recommends that the bill be modified by adding the words "at competitive prices" on line 15 following the word maintenance.

For further information call Susan Fleischhauer at 465-3900.

TO: Representative Al Adams
Chairman, House Finance Committee

From: Representative Robin L. Taylor

Subject: Committee Substitute for 2nd Sponsor Substitute for House Bill 181 (Transportation)

As you know, House Bill 181 will be before the House Finance Committee on April 3, 1986. I would like to offer the following ammendment to include all state owned vessels:

Section 19-65.030 is ammended to read:

All state owned vessels [a vessel of the Alaska Marine Highway System] may not be transported outside of the state for purposes of maintenance unless the Commissioner of Transportation and Public Facilities determines that there is no facility in the state able and available to perform the maintenance at competitive prices.

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the maintenance of marine vessels of the state; and providing for an expiration of the Act."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 36.20 is amended by adding a new section to read:

Sec. 36.20.020. MAINTENANCE OF STATE MARINE VESSELS. (a) A marine vessel owned by the state may not be transported outside of the state for the purpose of maintenance or repair unless the commissioner of transportation and public facilities determines that there is no facility in the state able to perform the maintenance at a price that is in the state's best interests. In making this determination, the commissioner shall consider, and document through written findings

(1) the amount of money the state has granted to, or otherwise invested in, marine vessel maintenance facilities in the state;

(2) the amortization, overhead, and start-up costs of the facilities in the state; and

(3) the direct and indirect benefits to the economy and labor force of the state that may be obtained by contracting with a facility in the state.

(b) AS 37.05.230 and the competitive bidding provisions of any other law do not apply to a contract for the maintenance or repair of a marine vessel owned by the state if the contract is awarded to a facility in the state.

Sec. 2. The provisions of this Act expire six years after the date it

ROBIN L. TAYLOR

April 23, 1986

R.L.T.

TO: Senator Jack Coghill
FROM: Representative Robin L. Taylor
RE: CS For 2nd SS HB181

CSSSHB181 in my estimation is one of the strongest local hire legislation. Its effect is not only going to be felt in Ketchikan and Seward but throughout the surrounding areas.

In the past ten years the state of Alaska has spent in excess of 54 million dollars in the area of marine vessel maintenance outside the state of Alaska (see attached). That is 54 million dollars that could have stayed in the state had we had a law such as the one proposed in the above bill.

The state of Alaska has invested 36 million dollars in the Seward ship yard facility and 38 million dollars in the Ketchikan facility. Unless we generate and encourage the use of these facilities, not only would we have wasted over 74 million dollars, but we will continue to send very much needed money and job opportunities outside of the state. In these days of declining revenues, we can not allow that to happen.

The result of this bill if it becomes law, will be the creation of approximately 200 jobs in Ketchikan and numerous jobs in Seward.

Therefore because of the above stated reasons, I urge you to give this bill your most positive consideration and if I can provide anymore information please do not hesitate to ask. I appreciate your prompt attention and dedication to the idea of state monies being spent within the state.

Dept. of Transportation & Public Facilities

Position Paper

BILL NO: CH For 2nd Sponsor Substitute for House Bill No. 181 (Finance)

TITLE: Maintenance of Marine Vessels of the State

APPROVED: R. J. Knapp, Commissioner

DATE: 4/23/86

The Department of Transportation and Public Facilities fully supports the performance of maintenance of Alaska public vessels within the state but believes that the economic factors of the market place will cause that to take place without waiving the competitive bidding provisions of AS 37.05.230. For instance, in the case of Alaska Marine Highway System (AMHS) vessels, an interport differential would be added to the bid of shipyards outside Alaska for the purpose of evaluation. Interport differential is defined as the extra costs such as fuel, crew transportation, per diem, pilotage, etc., that are incurred as a result of taking a vessel from the repair yard nearest to the vessel's operating area (Alaska) to any other yard. As an example, the current interport differential between Seattle and Portland on the contract for M/V COLUMBIA bow thruster installation is $32,500. Were the Ketchikan Shipyard now in operation, the interport differential between Ketchikan and Seattle on that contract would be at least $50,000, and between Ketchikan and Portland at least $77,000.

The economic advantage of interport differential to Alaska Shipyards is significant enough alone to provide a strong margin in favor of any Alaska Shipyard. In addition, the operators of Shipyards in Alaska (all private) also will have the advantage of reduced capital costs and the Alaska bid preference.

The disadvantage to the State of Alaska of waiving AS 37.05.230 or any other competitive bidding law is that such a waiver will in effect offer a blank check to the private operator of any shipyard located in Alaska. AMHS is appropriated a fixed amount annually to both maintain and operate the vessels. A conscious effort has been made to maximize funds spent for operations and to minimize funds spent on maintenance and repairs, consistent with safety and good engineering practices. The result of CS for 2nd SS for HB 181 as currently written would likely be an increase in the amount of money spent on maintenance and repairs and a decrease in the amount of money available for operations, resulting in less service to the public who depend on the AMHS for basic transportation needs.

The Department of Transportation and Public Facilities opposes CS for 2nd SS for HB 181 as currently written for the above stated reasons.

For further information call Susan Fleischhauer at 465-3900.

POSITION PAPER

Bill No. CH For 2nd Sponsor Substitute for House Bill 181 (Finance)

However, we are in favor of the overall objectives, and propose the following as an alternative.

A. Expand Alaska bidder preference factor from 5% to 15% on all marine repair contracts.

B. If qualified competition exists in state restrict bids to Alaska firms.

C. If qualified competition does not exist in state advertise as necessary taking into account Alaska bidder preference plus interport differentials.

MEMORANDUM State of Alaska

TO: Joe Camp
Deputy Commissioner
Department of Transportation
and Public Facilities

DATE: March 20, 1986

FILE NO:

TELEPHONE NO: 465-3603

FROM: Harold M. Brown
Attorney General

By: Gary I. Amendola
Assistant Attorney General
Transportation Section-Juneau

SUBJECT: Legislative Intent for CS for 2nd SSHB 181 (Trans)

You have asked for language to clarify the legislative intent of CS for 2d SSHB 181 (Trans), which amends AS 19.65 by adding a new section to read:

> Sec. 19.65.030. MAINTENANCE OF ALASKA MARINE HIGHWAY SYSTEM VESSELS. A vessel of the Alaska marine highway system may not be transported outside of the state for the purpose of maintenance unless the commissioner of transportation and public facilities determines that there is no facility in the state able and available to perform the maintenance at competitive prices.

Draft language of legislative intent could be as follows:

> The transportation committee supports the concept of using facilities located in the State of Alaska for the repair and maintenance of Alaska marine highway system vessels. The committee also recognizes, however, that the Alaska marine highway system is required under AS 37.05.230 to award a contract for the maintenance or repair of its vessels on the basis of competitive bidding. The committee does not intend this legislation to conflict with the provisions of AS 37.05.230 nor does it intend by this legislation to relieve the Alaska marine highway system of its obligation to award contracts for the maintenance or repair of its vessels except by competitive bid.

LETTER OF INTENT
FOR
CS FOR 2D SSHB 181 (TRSP)

The House Transportation Committee supports the concept of using facilities located in the State of Alaska for the repair and maintenance of the Alaska Marine Highway system vessels. The Committee also recognizes, however, that the Alaska Marine Highway System is required under AS 37.05.230 to award a contract for the maintenance or repair of its vessels on the basis of competitive bidding. The Committee does not intend this legislation to conflict with the provisions of AS 37.05.230 nor does it intend by this legislation to relieve the Alaska Marine Highway System of its obligation to award contracts for the maintenance or repair of its vessels except by competitive bid.

RE: CS 2d HB 181 (TRSP)

Would you please consider amending CS 2d HB 181(TRSP) to include all state vessels instead of only vessels of the Alaska Marine Highway System?

I understand several state agencies have vessels which should also be maintained in-state whenever possible. I believe we could simply change language to cover all state vessels and leave the responsibility of determination with the Commissioner of Transportation.

Please give Rhonda Cargill of our Transportation Committee staff a call and let her know what you decide, as I will be out of town until Sunday night. Rhonda will be more than happy to gather data to substantiate this amendment if you are agreeable to the idea.

Thanks so much for your consideration and assistance.

MEMORANDUM

TO: Representative Bette Cato

ATTN: Rhonda Cargill

FROM: Deb Pomeroy, Administrative Officer

RE: Vessels Owned by the State of Alaska
Research Request 86-155

You requested information on the number of boats larger than 16 feet that are owned by various departments of the State. I contacted Bob Head, Property Manager with the Division of General Services and Supply in the Department of Administration (DOA). He was able to provide computer printouts on vessels owned by all the State agencies with the exception of the University of Alaska.[1] The attached table contains the data on boats larger than 16 feet by department.

In addition to the nine ferries owned by the Marine Highway System, the State of Alaska owns 173 boats larger than 16 feet. The following is a breakdown of the size and ownership:

Size	# of boats	Ownership
> 45'	13	8--DF&G; 5--DPS
26' - 45'	26	12--DF&G; 12--DPS; 1--DOE; 1--Surplus
17' - 25'	130	96--DF&G; 27--DPS; 1--Corr.; 1--DEC 1--H&SS; 1--DNR; 2--DOT/PF; 1--Surplus
Unknown	6	4--DPS; 1--DNR; 1--Surplus

I hope this information answers your questions. It you have any questions or would like additional information, please contact this agency.

HYDER, Alaska

Known as "The Friendliest Ghost Town in Alaska". Hyder has an interesting history. The community is located on the fringe of Misty Fiord National Monument and the Tongas National Forest.

Photo by T.W. Parkin

The U.S. Corps of Engineers Storehouse No.4, located on the International Border, is the oldest masonary structure in Alaska. It is listed in the National Register of Historic Sites.

While in Hyder visit bars, gift shops, and cafes, or visit old mine sites worked at the turn of the century by prospectors hoping to find the "Mother Lode". At Fish Creek two miles northeast of Hyder see North America's largest species of Chum Salmon spawn during the months of July and August.

Before leaving don't forget the friendly tradition of being "Hyderized".

This brochure is funded in part by the Division of Tourism, State of Alaska.

STEWART, British Columbia

Located at the head of the Portland Canal Stewart has seen many changes take place. The town literally grew overnight as gold discoveries attracted over 10,000 prospectors and merchants to the area in 1906. Evidence of this exciting era still exists. Pilings, once used to support buildings above the tide flats, can still be observed along the shoreline.

Photo by L. Horne

On the way to Stewart why not stop at the fish ladder near Nass Bridge. Reportedly over 25,000 fish use this ladder annually.

With mining being the largest industry of the area Stewart has always been influenced by mineral prices. However, with the opening of Highways 37, tourists have realized the beauty of the region.

Several major movies have been filmed on location in the Stewart area. The first film, 'Bear Island', involved such stars as Donald Sutherland and Vanessa Redgrave. As the number of tourists increases each year, the town of Stewart meets their needs. A beautiful tent-camper park has been set up in town. A variety of accommodations and services are available in both communities.

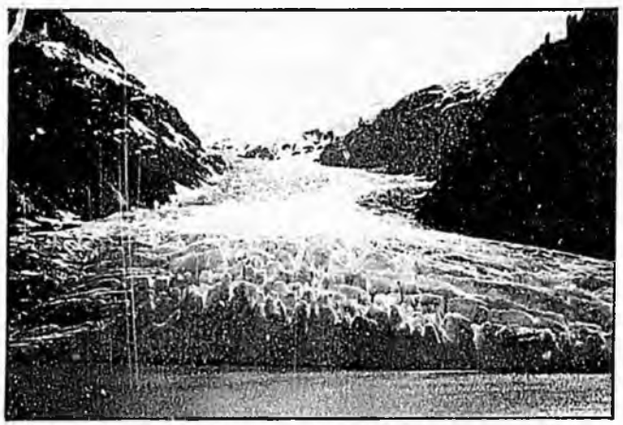

Photo by B. Wellwood

A breathtaking view of the Bear Glacier awaits all travellers on their way to Stewart. This beautiful ribbon of ice is located just 30 km east of Stewart.

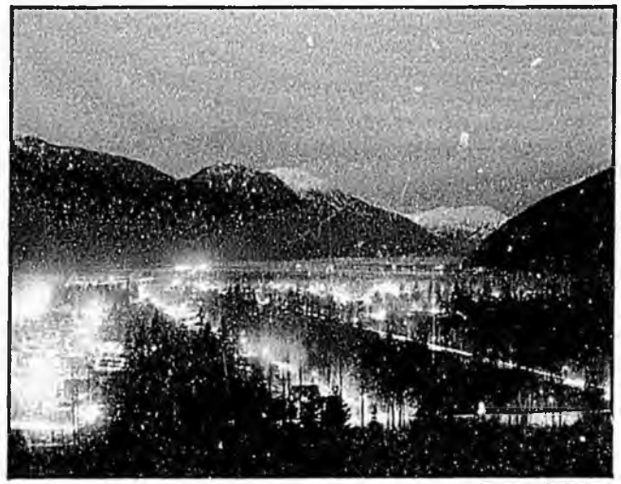

Photo by R. Eckert

The evening lights of Stewart are a welcome sight for travellers on the Portland Canal.

Events

Stewart-Hyder can boast of having the longest birthday party in North America. They begin celebrating on July 1st in Stewart and end on July 4th in Hyder. One special attraction is the international bed race which begins in Alaska and ends in British Columbia.

Alaska

Every year more tourists realize that they no longer have to travel for days on gravel roads to visit Alaska. With the last 28 km of road slated to be paved in 1984, people may now visit Alaska with a pleasant, relaxing drive.

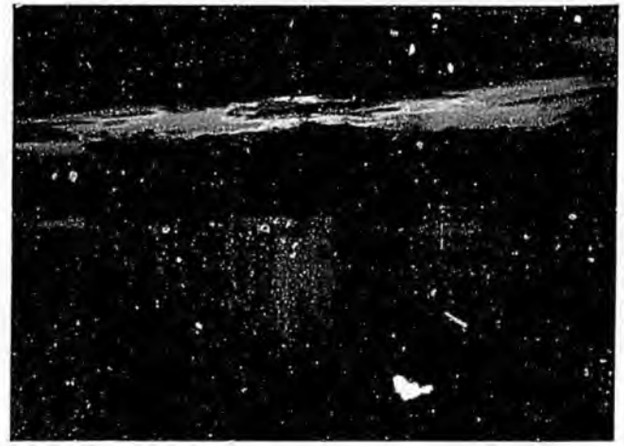

Photo by L. Perry

After a day on the lake, fishermen can relax to the splendor of a sunset over Meziadin Lake.

Photo by L. Horne

Stewart's splendid marina is the gateway to exciting fishing or magnificent scenery. Charter trips are available.

This frozen waterfall is only one of the many sights that makes winter hiking much more rewarding.

MEMORANDUM

To: Committee members

From: Committee staff JM

Re: File information on HB 201

On Monday, the committee is scheduled to hear HB 201, which would appropriate $22,000 to DOT/PF for weekly ferry service from Ketchikan to Hyder. This service would begin in 1987, if Hyder gets a dock and ferry terminal, however, the companion bill appropriating $2.1 million for construction of the facilities, HB 202, has been held up in House Finance.

There remains the possibility, however, that the ferry could use docking facilities in Stewart, B.C. (about a mile away), until the terminal is built in Hyder.

HOUSE BILL NO. 201

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act making a special appropriation to the Department of Transportation and Public Facilities to provide weekly summer Marine Highway service to Hyder; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. The sum of $22,000 is appropriated from the general fund to the Department of Transportation and Public Facilities for expenses incurred in providing weekly summer Marine Highway service to Hyder for the fiscal year ending June 30, 1986.

* Sec. 2. This Act takes effect July 1, 1985.

Expar. mailat

HYDER COMMUNITY ASSOC. INC.

P.O. BOX F
HYDER, ALASKA 99923 (604) 636-9148

March 25, 1985

MARINE HIGHWAY SERVICE — HYDER, ALASKA

The Southeast Alaska Transportation Plan published by the Alaska Department of Transportation in June, 1980 recommended that ferry service be introduced to Hyder in 1985.

The Governor's Alaska Marine Highway Task Force recommended in February, 1984 that ferry service would be economically viable and should be introduced between Ketchikan and Hyder in 1986.

Hyder is connected with Highway 16 via 141 miles of excellent paved highway, and provides a shorter highway route to the lower 48 states than from Prince Rupert.

The M/V Aurora is based at Ketchikan and has sufficient time in its current summer schedule to provide weekly round trips between Ketchikan and Hyder with no negative effect on the communities now served. The Aurora is currently crewed on a full time basis, and the only additional expense to provide service between Ketchikan and Hyder would be for fuel.

The Marine Highway Task Force projects that the proposed route would generate capacity passenger and vehicle loads in both directions, and increase revenues. Service with the Aurora on this route would provide an alternate to the Prince Rupert gateway, with an increase in the level of service between British Columbia and Southeastern Alaska.

Currently there are twenty-eight adults unemployed in Hyder, Alaska. Our year round population is one-hundred. Stewart, 1.5 miles away, has a population of approximately 1000. Hyder has three bars, three cafes, three gift shops, one grocery store and a motel. There is only one bar open now. One cafe is open on a full-time basis. One gift shop is open on a full-time basis. Needless to say these businesses are not covering their expenses of operation. The proposed service would provide a needed economic stimulus for the people of Hyder, Alaska.

The children who attend public school are bused into Stewart, B. C. Our electricity is furnished by B. C. Hydro. Our telephone area code is (604) British Columbia. If you call Alaska long distance information you will be informed that there is no such place as Hyder, Alaska. Now we only receive mail once per week — weather permitting. We have gone as long as six (6) weeks without mail service. A round trip charter to Ketchikan can cost as high as $1,000.00.

Documented Canadian border crossing statistics show inexcess of 20,000 visitors entering between May—August, 1985. These figures are based on a 40/hr work week.

I hope these ideas will assist you in your deliberations on establishing a terminal and ferry service at Hyder and that a favorable response can be obtained.

ANALYSIS HB 201

Service to Hyder could not begin until a suitable docking and terminal facility were constructed. Engineer estimates for site selection, design and construction would require from eighteen (18) to twenty-four (24) months.

Assumptions:

Assuming an eighteen (18) month time frame to put the facility on-line, terminal and vessel operating costs would not be required in FY 86 and in FY 87 only for the last quarter. FY 88 and onward, would require full funding for the operation of a summer schedule.

While the terminal building would be heated, lighted and have restroom facilities no state employee would be stationed in Hyder. A contractual arrangement with the City of Hyder or a local resident is opted and payment for services would be from ticket sale commissions generated by the contractor.

A link between Hyder and Ketchikan added to the present routes would provide a new option for travelers. This could result in an increase in traffic.

POSITION

HYDER, ALASKA - MARINE HIGHWAY SERVICE

The Department of Transportation and Public Facilities has no position on the concept of weekly Marine Highway summer service connecting to the land highway system of Hyder, Alaska. Such service would provide an alternate connection to the British Columbia land highway network, serve an increased number of Alaskans and provide a potential for increased visitor trade. This service is to be studied in the update of the Southeast Transportation plan due to be completed in December, 1985.

Docking, transfer and terminal facilities must be provided in Hyder before such service can begin.

Site selection, design and construction would require 18 to 24 months; therefore, if House Bill 202 is passed, service could begin in the summer of 1987 at the earliest.

A vessel could be made available to provide this service by shifting the summer season weekly port call of the M/V AURORA from Prince Rupert, B.C., to Hyder.

The distance from Ketchikan to Hyder is 130 nautical miles, compared to a distance of 92 nautical miles between Ketchikan and Prince Rupert. This results in a one way running time from Ketchikan to Prince Rupert of six hours and thirty minutes, versus slightly more than nine hours to Hyder for the M/V AURORA. Schedule time is available as indicated below.

Normal summer schedules call for the M/V AURORA to provide a connection to Prince Rupert on Tuesdays. This could be approximated from Hyder as follows:

CURRENT AURORA SCHEDULE

MON	LV	Hollis	7:30 AM
MON	AR	Ketchikan	10:15 AM
MON	AR	Ketchikan	2:45 PM
MON	AR	Hollis	5:30 PM

Hyder, 'Alaska's friendliest ghost town' is two miles away from Stewart, B.C.

A hidden Hyder

Ferry plan sets Southeast town abuzz

by Chriss Swaney
Times Business Writer

Hyder — Residents of this tiny southeast Alaskan community say the zip code is the only connection they have with their state and nation.

But "Alaska's Friendliest Ghost Town," — the inscription on a sign at the outskirts of the unpaved 250-acre community — may yet overcome its isolation if the legislature approves a bill that would provide weekly ferry service to the community and $2.1 million to build a dock and terminal there.

Hyder, located about 100 miles northeast of Ketchikan at the head of the Portland Canal, has no roads to Alaskan cities nor any regular marine or airline transportation. Flights must be chartered from Ketchikan and cost $250 one way. However, costs can reach more than $1,500 if snow or fog forces Bush pilots to bypass Rudyard Pass — a faster aerial route to Hyder.

Because of its remoteness, residents use Canadian money, hospitals, telephone exchanges and schools. Although Hyder has a small grocery store, residents say they drive two miles to nearby Stewart, B.C. to purchase dairy products.

"We need a dock and ferry terminal to keep the community alive," said John Chatham, administrator of the Hyder Community Association Inc. "We've been isolated too long," he said.

Many residents don't even know who their local representatives are because the community of 100 is bordered on the north and west by the Tongass National Forest and British Columbia on the east, Chatham said.

But the entire community recently jumped aboard Rep. Robin Taylor's bandwagon to lobby for construction of the ferry dock and terminal.

Taylor, R-Wrangell, introduced a bill to the legislature earlier this year asking for funds to build the ferry dock and terminal. The bill is now being studied by the House Finance Committee.

"We hope to see some kind of movement on the bill in the next couple of weeks," Taylor said. "I think Hyder residents have finally realized that the squeaky wheel does get some oil," he said.

Meanwhile, the economy of Hyder remains flat. Two of the community's three

See Hyder, page D-3

Hyder wants dock

Continued from page D-1

tourist gift shops are closed and the 11-room hotel is closed indefinitely. Sales also are down for the community's three bars and the one gift shop still open.

Dorothy Britton, owner of the "This and That Gift Shop" which is still open, said the proposed ferry terminal would help community morale and business. "We get about 60,000 tourists (mostly Canadians) each summer but things die in the winter and fall because of our remoteness," Britton said.

"We love the beauty of the area but we also need to be able to support ourselves," she said.

Another problem for Hyder businesses was the recent closure of two mines in Stewart. "Our bars and gift shops used to get a lot of business from the miners but now things are real slow," said Lawrence Marx, who has lived in Hyder the past 25 years.

Most Hyder residents are self-employed in construction, lumber and tourist-related jobs. A few residents work in California and live in Hyder during the summer.

"There are no food lines or anything yet because of the depressed economy, but we have delivered some canned goods and wood to several families," said preacher Don Hagen of the Brookside Baptist Church in Hyder.

Kathy Tschakert, whose 9-year-old daughter Amanda attends a Canadian school, said construction of the ferry dock would make Hyder residents feel more a part of their state and nation. "The Canadian schools are fine but I wish my daughter was singing "The Star Spangled Banner" instead of "Oh Canada."

CITY OF KETCHIKAN, ALASKA

RESOLUTION NO. 85-1424

A RESOLUTION REQUESTING THE IMPLEMENTATION OF ALASKA MARINE HIGHWAY SERVICE BETWEEN KETCHIKAN AND HYDER, ALASKA AND ESTABLISHING AN EFFECTIVE DATE.

WHEREAS, the Southeastern Alaska Transportation Plan published by the Alaska Department of Transportation in June, 1980 recommended that ferry service be introduced to Hyder in 1985, and

WHEREAS, the Governor's Alaska Marine Highway Task Force recommended in February, 1984 that ferry service would be economically viable and should be introduced between Ketchikan and Hyder in 1986, and

WHEREAS, Hyder is connected with Highway 26 via 141 miles of excellent paved highway and provides a shorter highway route to the lower 48 states than from Prince Rupert, and

WHEREAS, the Marine Highway Task Force projects that the proposed route would generate capacity passenger and vehicle loads in both directions and increase revenues, and

WHEREAS, service on this route would provide an alternate to the Prince Rupert gateway with an increase in the level of service between British Columbia and Southeastern Alaska, and

WHEREAS, the proposed service would provide a needed economic stimulus for the people of Hyder, Alaska.

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Ketchikan, Alaska, as follows:

Section 1. The City of Ketchikan strongly urges the State of Alaska to implement Alaska Marine Highway service between Ketchikan and Hyder, Alaska as soon as possible.

Section 2. The City Council hereby directs the City Clerk to distribute copies of this resolution to Governor Sheffield, Commissioner Knapp, Senator Ziegler, Representatives Sund and Taylor and Mr. John Chatham, President, Hyder Community Association, P.O. Box F, Hyder, Alaska 99923.

Section 3. This resolution shall become effective immediately upon passage and approval.

PASSED AND APPROVED by the Council of the City of Ketchikan, Alaska, this 21st day of February, 1985.

March 19, 1985

The Honorable Bette Cato
Chair, House Transportation Committee
Alaska House of Representatives
Pouch V (MS 3100)
Juneau, AK 99811

Dear Representative Cato:

The creation of the Wood-Tikchik State Park in 1978 was a significant step to protect the waters in which one-third of the Bristol Bay Sockeye Salmon spawn, an area of unique and outstanding scenic grandeur and to enhance our state's important tourism industry. At 1.5 million acres, this state recreation unit comprises one-half of the acreage of the entire state park system. It is the largest state park in America, and was popularly received by local residents.

House Bill 223 by Representative Herrmann is a fine bill, which I wholly support. The road between Dillingham and Aleknagik receives increasing recreation and subsistence user traffic to gain access to this outstanding park. To name the road "Gateway to Wood-Tikchik State Park" is a proper and appropriate action and I hope the House Transportation Committee supports the passage of Representative Herrmann's bill.

Sincerely,

Neil C. Johannsen
Director

Dear Representative Herrmann:

At the most recent City Council meeting, consideration was given to your proposed Bill to designate the road between Dillingham and Aleknagik, the gateway to Wood-Tikchik State Park.

The City Council supports this proposal, especially in light of the increased use this road is experiencing. As you know, the road provides a vital link between the regions largest City (Dillingham), and the Park.

Sincerely,

CITY OF ALEKNAGIK

School buses & seat belts

A discussion

Alaska Department of Education
Pouch F, Juneau, AK 99811
August 1985

Contents

Foreword 1
School buses and safety 2
Positions 5
The real danger 9
Conclusion 10

Foreword

The success of seat belts in reducing injuries and deaths in automobile accidents appears at first glance to apply also to school buses. Yet school buses are not equipped with seat belts. Why not?

Next to parents, those most concerned about the safety of children on school buses are the people responsible for the pupil transportation program. These people—school bus drivers, school bus driver instructors, and school district administrators involved in the day-to-day operation of school vehicles—are familiar with the many issues concerning seat belts on school buses. The subject has been studied for many years at the national and state levels, and much information is available on both sides of the issue.

The purpose of this publication is to provide

- information on why seat belts are not installed on school buses
- research results on the use of seat belts on school buses
- the positions of national and state safety organizations on the seat belt issue.

School buses and safety

Why seat belts are used in automobiles

One purpose of seat belts is to prevent the person wearing them from being thrown out of a vehicle during a collision. But, unlike automobiles, school bus seats are not located opposite a door which could open and allow passengers to be ejected upon impact. School buses usually have only two doors. Neither is located beside a passenger seat.

A second purpose of seat belts is to prevent the wearer from striking sharp objects in the vehicle during an accident. Again, automobiles and school buses are not the same. School buses do not have steering wheels, dashboards, and door and window handles protruding into the passenger compartments. The only person in a school bus threatened by these objects is the bus driver, who wears a seat belt.

Other differences between automobiles and school buses

Passengers in school buses are protected by careful padding of seats, seat backs, sides and aisles. During a sudden impact the padding cushions students and absorbs most of the impact.

The outer construction of school buses and automobiles also is different. A school bus is encased in a metal frame much like a metal rib cage. In comparison, modern automobiles have little reinforcement. Also the passenger compartment in buses is well above the bumper height of automobile bumpers, so the impact of a collision is not at the same height as an automobile. And the impact is not as great on the passengers. This is the reason why interstate buses, public transit buses and school buses are exempt from safety belt requirements. They have a natural safety edge because they are bigger and heavier than automobiles and their interiors are designed to provide much more safety.

School buses are safer for other reasons as well. Other drivers easily see them because of their bright yellow color, flashing lights, special markings and low traveling speed. School buses are also recognized for

the special cargo they carry—our children. These factors make drivers more cautious around school buses.

Federal school bus standards

The National Highway Traffic Safety Administration in the 1970s studied how to improve the interior of the passenger compartment of school buses. The research, based on many crash tests, resulted in major seating and body design recommendations. The federal government used these recommendations to require bus manufacturers to change the way school bus interiors were designed. The design changes required in school buses made after April 1, 1977 were:

- Seats were redesigned to meet specific spacing requirements.
- Seats were to be fully padded in front and back. Seat backs were heightened. These newly designed seats provided a padded cavity for passengers—a concept called compartmentalization—which crash tests proved to provide the most effective protection in a collision.
- School bus bodies were greatly strengthened to withstand heavy impacts from the side, front and rear. Improvements also were made to school bus roofs for protection in case of roll over.

Improvements were made to school bus fuel tanks and lines to lessen the possibility of fuel spillage during collision.

Compartmentalization

How does compartmentalization work? Upon vehicle impact, an unbelted child will slide forward on the seat and into the padded back of the seat ahead. This distributes the forces of impact and injuries most likely will be minor. On the other hand, the lap-belted child's hips will act as a fulcrum, throwing the upper body forward with great force. This may cause severe injuries to the abdominal region because of the pressures involved.

Tests conducted by the Southwest Research Institute in 1977 showed

that 40 inches or more of unobstructed space is required in front of a lap-belted passenger to avoid upper body and head injuries. Since school bus seats are closely spaced, the lap-belted child's throat or head will most likely strike the back of the seat ahead during an accident. In such cases, the head or throat will receive all the forces of the impact and could result in severe physical injuries.

Positions

The National Highway Traffic Safety Administration, the National Safety Council, and the National School Transportation Association have stated that current school bus safety standards in force since 1977 provide adequate protection for school bus passengers. The following are the positions of those organizations:

National Highway Traffic Safety Administration

The U.S. Department of Transportation in Issue Paper HS-806-000 dated September, 1981 states:

"The National Highway Traffic Safety Administration agrees that children should be protected on school buses but does not support a requirement for seat belts for passengers in large school buses. Improving the seating compartment eliminates the need for seat belts and provides sufficient crash protection."

National Safety Council

The National Safety Council in its policy statement *Protecting Pupil Passengers in School Buses* dated June 28, 1984, states:

"The Council recommends that until further research and testing demonstrate that pupils will be safer by the installation of seat belts in school buses, the Council believes that passive protection provided by compartmentalization as required by the current (1977) federal standard on school bus seating and crash protection protects seated pupil passengers in school buses with gross vehicle weight ratings (GVWR) greater than 10,000 pounds."

National School Transportation Association

The Board of Directors of the National School Transportation Association (NSTA) in its Spring, 1984 special edition of *National School Bus Report*, states:

"Those of us who work with the children and school buses every day feel that every new item that is added or changed on school buses should be well tested and engineered prior to being mandated as a regulation. That is why NSTA will continue to support the compartmentalization concept until documented research establishes that seat belts on school buses will raise the level of protection for the occupants."

Canadian Government

School bus tests have shown that in some crashes belted passengers suffer more severe injuries than those not belted. A case in point is the most recent crash tests by the Canadian government.

In 1984 the Canadian government sponsored crash testing to determine the effectiveness of seat belts in three sizes of school buses. Results of the crash testing were summarized in the December 19, 1984 issue of the *Bulletin*, published by the Supply and Services Division of the Canadian government, and a February 1985 technical memorandum on automotive safety entitled *School Bus Collision Tests,* published by Transport Canada of the Canadian government. These publications state:

"Transport Canada has reaffirmed that the safety features Canada (same as U.S. Federal Motor Vehicle Safety Standards) has incorporated into its school buses—well-padded, high-backed, energy-absorbing seats, spaced at controlled intervals—provide a safe environment without seat belts."

"The use of lap seat belts in any of the 3 sizes of recent model school buses which were tested may result in more severe head and neck injuries for a belted occupant than for an unbelted one in a severe frontal collision."

State of Arkansas

On March 25, 1983 a school bus accident in Jonesboro, Arkansas, killed nine persons including four students. The tragedy heightened concern for school bus safety among parents, interested citizens, school officials and legislators. Because of the accident, the Arkansas Legislature studied whether to install seat belts on school buses. In its September 20, 1984 report entitled *Feasibility of Requiring School Districts to Install Seat Belts on School Buses* the Arkansas Legislative Council concluded:

"It appears that based on the costs, the lack of data indicating a great fatality decline with the installation of seat belts, the possible dangers which could arise from the installation of the seat belts themselves, and the outstanding safety records of school buses in general, the issue of seat belts in school buses could be left as a decision to be made by individual school districts and should not be mandated by the legislature."

State of New Jersey

Independent groups in New Jersey have thoroughly studied over the last 15 years the subject of seat belts on school buses. The groups have not recommended installation of belts. A March 1, 1983 letter written by the New Jersey Department of Education regarding the research states:

"In any decision-making process involving the safety and well being of transported students, the bus internal and external safety environment must be carefully analyzed. Such questions as, 'Is what we are proposing more safe, less safe or as safe as what we already have?' (should be raised). It is apparent that there still are too many safety trade offs that, under highly critical questioning, prohibit mandated seat belts at this time."

State of Minnesota

In 1984 the Minnesota Legislature created a task force to answer concerns about school bus safety after fatal school bus accidents. The task force recommended against mandating seat belts in school buses.

State of Maryland

The Maryland Department of Education has concluded that seat belts would not improve the safety of pupils on school buses and may even present hazards to their safety. In the publication *Concerns about Seat Belts on School Buses* dated January, 1985, the department made these findings:

- If the bus rolls over on its side or roof during an accident, passengers may suffer serious injuries when releasing their seat belts because the bus roof would be three to four feet from their heads. Also, young children may find it difficult to unfasten a seat belt because of their suspended weight.
- If the school bus catches fire, particularly with unconscious children aboard, rescuers may not have enough time to release seat belts for as many as 60 children.

State of Alaska

The Department of Education in 1983 appointed a committee of school bus company representatives and school transportation officers to study school bus safety issues. In February 1985 the committee issued a resolution that since has been endorsed by the Alaska School Transportation Association and the Alaska Association for Pupil Transportation. The resolution states:

"The Alaska School Bus Safety Committee is agreed in its opinion that no legislative or regulatory action be taken in the State of Alaska to require seat belts on school buses until an authoritative body of test data has been produced showing conclusively that the overall safety of the ridership on pupil transportation buses is significantly enhanced."

The real danger

According to the National Safety Council, in 1983 55 pupils were killed in school bus accidents nationwide. Ten were school bus passengers and 45 were pedestrians approaching or leaving a loading zone.

Evidence does not show that fatalities inside the bus could have been prevented by seat belts. Most school bus accidents resulting in fatalities inside the bus involve another large vehicle such as a tractor-trailer combination or a railroad train. A section of the bus is usually torn away, intruded into or crushed. In these types of accidents it is sometimes evident that students would have suffered more severe injuries or even suffered a greater number of fatalities if they had been belted in some seat locations.

According to the National Safety Council, the greatest danger area for children is outside the school bus in an area known as "the loading zone." The loading zone is the area where pupils wait for the bus in the morning and get off the bus in the afternoon. Of the 45 fatalities in this area during 1983, more than half were killed when hit by the bus they regularly rode. The others were killed by motorists who failed to stop for school buses loading and unloading passengers.

The Alaska School Bus Safety Committee recommends that efforts be increased to lower loading zone fatalities. The committee's resolution:

"Alaska pupil transportation professionals should continue their ongoing efforts to reduce the incidence of external loading zone fatalities which exceed internal crash fatalities by a ratio of approximately 3 to 1 through state regulation of roadworthiness, in-depth school bus driver safety training, and preventative maintenance program for buses and that these same pupil transportation professionals should work diligently to develop a comprehensive program to promote loading and unloading zone safety awareness in the students' minds through classroom curriculum, in the motoring publics' mind through the public media, and in the parents' minds through use of parent-teacher associations and other concerned citizen groups."

Conclusion

The Department of Education has carefully reviewed available information about using seat belts in school buses. In light of the evidence, the department has concluded that it cannot support seat belt use in school buses until further testing shows that it is safer than compartmentalization.

Until such time, the department supports the position favoring compartmentalization of the National Highway Traffic Safety Administration, the National Safety Council and the National School Transportation Association.

The department also supports the Alaska School Bus Safety Committee's resolution that encourages greater efforts to reduce external loading zone fatalities. The department also encourages all concerned Alaskans to work with the Alaska School Bus Safety Committee in promoting programs on safety awareness in the loading and unloading zone area.

KODIAK ISLAND BOROUGH
RESOLUTION NO. 85-38-R

A RESOLUTION OF THE KODIAK ISLAND BOROUGH ASSEMBLY SUPPORTING COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 240 CONCERNING OVERTAKING AND PASSING SCHOOL BUSES.

WHEREAS, Committee Substitute for House Bill No. 240 has been introduced which increases the regulations on passing school buses and stiffens the penalties for violations of this law, and

WHEREAS, school bus passing has been a serious problem in the Kodiak Island Borough during the current school year, and

WHEREAS, the State Troopers and City Police cannot be everywhere at once which means a greater deterrence must be placed in this law to encourage citizens to abide within the law, and

WHEREAS, the school children must be protected while loading and unloading on school buses.

NOW, THEREFORE, BE IT RESOLVED that the Kodiak Island Borough Assembly strongly supports Committee Substitute for House Bill No. 240 and urges that it be passed and signed into law, and

BE IT FURTHER RESOLVED that copies of this resolution be sent to the following individuals:

The Honorable Bill Sheffield, Governor of Alaska
The Honorable M. Mike Miller, Chairman House Judiciary Committee
The Honorable Fred F. Zharoff, Senator District N
The Honorable David W. Thompson, Representative District 27

PASSED AND APPROVED this 4th day of April, 1985.

RE: HB 240

In today's packet you will find:

1. a sectional analysis of HB 240
2. a DOE position paper
3. resolutions in support of HB 240 from the Kenai Peninsula Borough, the Kodiak Assembly and the Alaska School Bus Committee
4. the Association of Alaska School Boards position paper
5. the Department of Public Safety position paper

HB 240 clearly defines what the penalties will be for passing or overtaking a school bus while the bus is loading or unloading. This new section is added to the miscellaneous provisons under Title 28, Motor Vehicles.

One convicted of this infraction will receive 6 points on his driver's license. A total of 12 points within one year will result in suspension, revocation or denial of a driver's license. The enclosed sectional analysis addresses under what circumstances one will be cited.

A RESOLUTION OF

THE ALASKA SCHOOL BUS SAFETY COMMITTEE

RELATIVE TO SCHOOL BUS STOP ARM VIOLATIONS

WHEREAS, the safety of all Alaska school children who are transported to and from school is jeopardized by motorists who pass school buses displaying the red flashing stop lights while loading and unloading school children, and

WHEREAS, these violations occur in rural areas as well as in urbanized areas each school day in Alaska where an estimated 2,000 violations occur each school year with a negligible citation and conviction rate estimated to be less than 1%, and

WHEREAS, in the absence of identification and conviction of these motorists there exists no effective deterrent to the continuing lack of sensitivity to the safety of Alaska school children and is a discouragement to pupil transportation professionals in Alaska, and

WHEREAS, current reporting requirements set out in Alaska state law for stop arm violations have proven to be usually impossible to satisfy in the everyday work situation, and

WHEREAS, conviction of motorists who commit these violations and endanger the lives of Alaska school children is effectively stifled because of these onerous requirements,

NOW THEREFORE BE IT RESOLVED, that the Alaska School Bus Safety Committee urges the Alaska State Legislature to strengthen the current law to allow for citation and vigorous prosecution of the registered owner of the vehicle responsible for violating the law.

Saundra C. Hutchins
Chairperson
Alaska School Bus Safety Committee

February 27, 1985
Date

The Real Danger Zone

According to National Safety Council statistics, 55 pupils were killed in school bus transportation accidents during 1983. Ten were passengers on school buses, and 45 were pedestrians either approaching or leaving a loading zone.

Of the fatalities inside the bus, no evidence exists that seat belts would have prevented any of these. Most school bus accidents resulting in fatalities inside the bus, involve another large vehicle such as a tractor-trailer combination or a railroad train. Usually a section of the bus is torn away or there is a serious intrusion into, or compression of, the passenger compartment. In these types of accidents it is sometimes evident that if pupils had been belted in some seat locations they would have suffered more severe injuries and/or a greater number of fatalities.

As can be surmised from the National Safety Council statistics, the greatest danger area for children is outside the school bus, in the loading zone--the area where pupils wait for the bus in the morning and are discharged from the bus in the afternoon. Of the 45 fatalities in this area during 1983, more than half were killed when hit by the bus they regularly rode. The others, by passing motorists who disobeyed the law reguiring motorists to stop for school buses loading and unloading passengers.

The Alaska School Bus Safety Committee recommends that emphasis be placed on reducing the incidence of external loading zone fatalities. Their Resolution dated February 27, 1985 states the following:

> Alaska pupil transportation professionals should continue their ongoing efforts to reduce the incidence of external loading zone fatalitites which exceed internal crash fatalities by a ratio of approximately 3 to 1 through state regulation of roadworthiness, in-depth school bus driver safety training, and preventative maintenance program for buses and that these same pupil transportation professionals should work diligently to develop a comprehensive program to promote loading and unloadong zone safety awareness in the students' minds through classroom curriculum, in the motoring publics' mind through the public media, and in the parents' minds through use of parent-teacher associations and other concerned citizen groups.

Conclusion

The Department of Education has carefully reviewed all material that we have been able to obtain on the subject, including information on recent crash testing done in Canada. Results of that testing indicate that in certain situations, belted passengers suffer more severe injuries than those not belted.

KENAI PENINSULA BOROUGH

RESOLUTION 85-49

URGING PASSAGE OF HOUSE BILL 240 BY THE LEGISLATURE.

WHEREAS, the safety of our children when transported to and from school is of paramount importance; and

WHEREAS, the most dangerous part of the trip is exiting the bus on a travelled roadway at the students regular stop.

WHEREAS, there have been increasing reports of vehicles passing school buses when they are stopped to let children on or off, threatening the lives and safety of the children; and

WHEREAS, House Bill 240 would allow prosecution of the owner of a vehicle identified as driving in violation of the law requiring vehicles to stop when the school bus is loading and unloading, and may help to cut down the number of violators and potential accidents;

NOW, THEREFORE, BE IT RESOLVED BY THE ASSEMBLY OF THE KENAI PENINSULA BOROUGH:

Section 1. That the Kenai Peninsula Borough Assembly supports House Bill 240 and urges passage immediately.

Section 2. That this resolution shall take effect immediately upon its adoption.

Section 3. That a copy of this resolution shall be sent to Governor William J. Sheffield, to Senators Edna DeVries, Paul Fischer, Jalmar M. Kerttula, and John C. Sackett, to Representatives Bette Cato, Andre Marrou, Mike Navarre, Kay Wallis, Mike Szymanski, David Thompson, Robin Taylor, and John L. Sund.

ADOPTED BY THE ASSEMBLY OF THE KENAI PENINSULA BOROUGH ON THIS 2nd DAY OF April, 1985.

ASSOCIATION OF ALASKA SCHOOL BOARDS

1985 FINAL RESOLUTIONS

Passed At November 1985 Annual Meeting

Association of Alaska School Boards Position Paper

85-31

REQUIRE WARNINGS BE ISSUED TO OWNERS OF VEHICLES
ACCUSED OF PASSING SCHOOL BUSES LOADING OR UNLOADING STUDENTS

WHEREAS, Alaska law requires all vehicles approaching a school bus loading or unloading children to come to a full stop without passing the bus until the bus warning lights have been turned off; and

WHEREAS, this practice is common to all states and communities to protect children from potential accidents in traffic; and

WHEREAS, persons acting in a wreckless manner that endangers the lives of children must be assured of penalties that are swift, sure and of suitable consequence to deter similar behavior; and

WHEREAS, laws in other states successfully support more active prosecution and punishment of drivers who endanger childrens' lives by illegally passing school buses while students are boarding or leaving the school bus,

THEREFORE BE IT RESOLVED, that the Association of Alaska School Boards supports changes in the law that allow the school bus driver or others reporting violations of this law to the local law enforcement agency to identify the vehicle license number and/or description of vehicle, date and time of the alleged violation to secure a warning against the owner of vehicle reportedly endangering children's lives.

Sectional Analysis of HB 240 ( )

Section 1 AS 28.35 is amended by adding a new section. Section 28.35.145(a) requires that a driver of a vehicle that meets or overtakes a school bus stopped on a highway or vehicular way or area must stop at least 30 feet before reaching the school bus when the bus has red lights flashing. The driver must remain stopped until the bus proceeds, or the red lights are extinguished.

Subsection (b) requires that the driver of a vehicle yield the right of way to a person crossing a highway or vehicular way or area to embark on or disembark from a school bus, regardless of whether the school bus has red lights flashing or whether the person crosses outside of a crosswalk.

Subsection (c) provides that the driver of a vehicle on a highway with separate roadways is not required to stop for a school bus on a different roadway or, when driving on a controlled access highway, for a school bus stopped in a loading zone if pedestrians are not permitted to cross the highway.

Subsection (d) provides that if convicted, the driver is guilty of an infraction and subject to a mandatory assessment of six demerit points. An infraction carries a maximum penalty of a $300 fine.

Subsection (e) is an entirely new subsection, and does not appear in HB 240 (Judiciary). This subsection provides that an owner, or in the case of a leased vehicle a lessee, is subject to a civil peralty not to exceed $100 if a vehicle owned or leased is operated in violation of this section. There are two exceptions to this provision. If the vehicle is stolen, or if the driver is convicted under subsection (d), the owner or lessee cannot be penalized. Also a lessor is not responsible if the lessor keeps a record of the name and address of the lessee. This subsection also provides that no loss of driver's license, privilege to drive, or assessment of demerit points can occur if this subsection is violated. Also this subsection specifies that it does not prohibit or limit prosecution of a vehicle driver under subsection (a) or (b). The subsection is patterned after a Minnesota statute, Minn. Stat. 169.44 (1) (c) (2), and is in substance identical to that law.

IN THE HOUSE

CS FOR HOUSE BILL NO. 240 ( )

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to overtaking and passing school buses."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 28.35 is amended by adding a new section to read:

Sec. 28.35.145. OVERTAKING AND PASSING SCHOOL BUS. (a) The driver of a vehicle that meets or overtakes a school bus stopped on a highway or vehicular way or area shall stop not less than 30 feet from the school bus before reaching it when there are in operation on the school bus flashing red lights as required by regulation. The driver may not proceed until the school bus proceeds and the flashing lights are no longer illuminated.

(b) When a school bus is stopped on a highway or vehicular way or area, whether or not there are in operation on the school bus flashing red lights as required by regulation, the driver of a vehicle shall yield the right-of-way to a person crossing a highway, vehicular way, or area to embark on or disembark from the school bus, whether or not the person is crossing within a marked crosswalk.

(c) The driver of a vehicle on a highway with separate roadways is not required to stop when meeting or passing a school bus that is on a different roadway or, if upon a controlled access highway, when a school bus is stopped off the highway in a loading zone that is part of, or adjacent to, the controlled access highway, and pedestrians are not permitted to cross the highway.

(d) A driver convicted under this section is guilty of an

infraction and, in addition to other penalties as provided by law, is subject to a mandatory assessment of six demerit points under AS 28.15.221 - 28.15.261.

(e) A vehicle owner, or in the case of a leased vehicle a lessee, may be punished by a civil penalty not to exceed $100, if the vehicle owned or leased by the person is operated in violation of this section. The owner or lessee may not be penalized if the vehicle was stolen, or the driver of the vehicle is convicted under (d) of this section. This subsection does not apply to a lessor of a vehicle if the lessor keeps a record of the name and address of the lessee. A violation of this subsection may not result in the loss of a driver's license or privilege to drive and does not constitute grounds for assessment of demerit points under AS 28.15.221 - 28.15.261. This subsection does not prohibit or limit the prosecution of a vehicle driver for violating (a) or (b) of this section.

The Honorable Max F. Gruenberg, Jr.
Co-Chair, House HESS Committee
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Representative Gruenberg:

I have reviewed HB-240 (Draft) you sent. It does not appear that the Division of Motor Vehicles would have a problem with this bill, however I have one reservation.

Under paragraph (e) of the bill, I question what recourse an owner would have if a civil penalty is imposed on them and they choose to contest the penalty. If the court system is the owner's recourse there would no fiscal impact on DMV. However, if this bill visualizes the Division of Motor Vehicles' administrative hearing officers as an avenue of recourse to affected owners, there would be a fiscal impact that would need to be evaluated.

If we don't receive further correspondence from you on this matter it will be assumed that the court system will be any affected owner's recourse. In the event the Division of Motor Vehicles will be involved in reviews of penalties, please advise and we'll prepare a fiscal note.

Sincerely,

John H. Lucking
Director

FROM: Richard A. Bradley
Legislative Counsel

You have requested a sectional analysis of the above described bill.

As a preliminary matter, note that a sectional analysis or summary of a bill should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents. If you would like an interpretation of the bill as it may apply to a particular set of circumstances, please advise.

Before preceding with the sectional analysis, it may be useful to offer some background comments.

> In 1940, in order to protect the roads that promoted the development of the Territory of Alaska, the Department of the Interior withdrew 150 feet of public lands along both sides of several "through roads," including the Glenn, Richardson, and Haines highways. [Public Land Order (PLO) 601.] Congress criticized these withdrawals as excessive, stating that they hindered commercial and private development, and, in 1956, enacted a law providing that if the Secretary [of the Interior] revoked such a withdrawal "the lands involved shall be subject to disposal only under laws specified by the Secretary of the Interior, subject to easements as established by the Secretary." [43 U.S.C. 971a.] The law authorized the Secretary to "sell such restored lands for not less than their appraised value, giving an appropriate preference right to the holders of adjoining

Sectional Analysis

claims or entries and to owners of adjoining private lands. [43 U.S.C. 971b.]

In 1958 the Department issued PLO 1613 revoking the earlier withdrawals, replacing them with easements, offering for sale "the lands released from withdrawal * * * which, at the date of this order, adjoin lands in private ownership," and providing that released lands which on the same date "adjoin lands in valid unperfected entries, locations or settlement claims, shall be subject to inclusion in such entries, locations and claims." [PLO 1613.] Owners of private lands and holders of such entries were given a preference right to purchase the adjoining released lands or to amend their entries to include them, respectively . . . .

Many adjoining landowners or entry holders applied for the released lands located between the adjoining lands and the centerline of the highway, made the required payments, and received receipts, but their applications were not processed [by BLM or the Interior Department] for many years. Many who applied subsequently sold the lands adjoining the released lands. In August 1984 BLM issued decisions granting the released lands to the original applicants. In these consolidated appeals, present adjoining landowners claim the released lands should have been granted to them.

Appellants argue that Congress intended that the released lands be granted to owners of adjoining lands . . . . The released lands are important, and sometimes essential, to the present owners of the adjoining lands for access to those lands . . . and of no practical use to the original applicants, some of whom are deceased persons . . . .

BLM's decisions state that when the "purchase price was received * * * and a receipt for the purchase price was issued * * * equitable title vested in the applicant * * *." [Citations omitted.] Once equitable title vests, in BLM's view, "the Secretary has no discretion in the issuance of a patent and events subsequent to such vesting can have no bearing upon the claimant's right to patent," citing Wyoming v. United States, 225 U.S. 489 (1921).

BLM's decisions must be affirmed. [Emphasis and bracketed material added.]

The above quote is from the decision of the Interior Board of Land Appeals, Robert and Patricia Bailey, IBLA 84-874 et al., decided November 22, 1985.

CSHB 321(Fin) am is a response to the land title situation described in the Bailey decision; the Bailey decision, in fact, implicitly invites this legislation (as I note below).

Section 1 of the bill amends AS 09.25.050 by adding a new subsection. The section itself now provides:

> Sec. 09.25.050. CONCLUSIVE EVIDENCE OF ADVERSE POSSESSION. The uninterrupted adverse notorious possession of real property under color and claim of title for seven years or more is conclusively presumed to give title to the property except as against the state or the United States.

Sec. 50(b) as added in Section 1 of the bill is significant; it provides that except for the "easement created by Public Land Order 1613 [the reservation of the highway itself], adverse possession will lie against property that is held by a person who holds equitable title from the United States" under PLO 1613.

Recall that the Bailey decision holds that those who applied for the land and received a receipt from BLM have "equitable title." If the applicant has not been in "possession" of the land, then the present person in possession may gain title to the land by the principles of adverse possession under AS 09.25.050, above.

Section 2 of the bill add a new section to AS 09.45, "Actions Relating to Real Property".

Sec. 09.45.015(a) establishes a "statutory presumption" that a patent for land that was issued after April 7, 1958 (the date of PLO 1613) to land that adjoined a highway reservation listed in section 1 of PLO 1613 is presumed to have conveyed land up to the center-line of the highway subject only to the reservation for the highway itself created by PLO 601 as well as any highway easement created by PLO 1613. The statutory presumption would be of use to a person litigating the title to the land released from PLO 601 by PLO 1613.

Sec. 09.45.015(b) makes a similar point in a different way: it provides that the burden of proof in litigation involving title to the released land is "on the person who claims that the patent did not convey an interest in land up to the center-line of the highway."

Section 3 of the bill provides for an immediate effective date.

If I may be of further assistance, please advise.

Re: CS for House Bill 321 (Finance) am

Dear Mr. Call:

You have requested our review of the above bill, a copy of which is attached. A brief analysis follows.

This bill has undergone a considerable number of revisions since its original introduction. In its original form, the bill appeared to eliminate certain valuable public highway easements created by Public Land Order 1613. As a result, the state would have had to incur considerable expenses in reacquiring these easements. In its present form (CS for HB 321 (Finance) am), the existence of these highway easements is protected. Section 1 of the bill, while it allows one to assert a claim of adverse possession against certain real property, makes it clear that an adverse possession claim cannot be made against a public road easement. Similarly, section 2 of the bill, while it creates a presumption that certain conveyances conveyed land up to the center-line of a PLO 1613 highway, makes it clear that such conveyances are subject to any highway easements created by PLO 1613.

In sum, the present version of this bill does not jeopardize the existence of any public highway easements.

Sincerely,

HAROLD M. BROWN
ATTORNEY GENERAL

Dept. of Transportation & Public Facilities

Position Paper

BILL NO: CS HB 321 (Fin) am

APPROVED: R. J. Knapp
Commissioner

TITLE: An Act relating to adverse claims and boundary disputes; and providing for an effective date

DATE: 4/11/86

CS for House Bill No. 321 (Finance) recognizes and excepts the reservations and easements created by Public Land Orders 601 and 1613. The bill places the burden of proof in litigation involving land adjoining a highway reservation created by Public Land Order 601 or a highway easement created by Public Land Order 1613 on the person who claims that the conveyance did not convey an interest in land up to the centerline of the highway.

This bill should have no fiscal impact on the Department of Transportation and Public Facilities nor involve the Department in disputes between claimants.

OFFICE OF HEARINGS AND APPEALS
INTERIOR BOARD OF LAND APPEALS
4015 WILSON BOULEVARD
ARLINGTON, VIRGINIA 22203

ROBERT AND PATRICIA BAILEY ET AL.

IBLA 84-874 et al. Decided November 22, 1985

Consolidated appeals from decisions of the Bureau of Land Management, Alaska State Office, determining that equitable title vested in Public Land Order No. 1613 applicants, approving issuance of patents, and rejecting Alaska State selection A-061179, in part, and conflicting Public Land Order No. 1613 applications. A-063457, et al.

Affirmed.

1. Act of Aug. 1, 1956—Patents of Public Lands: Generally—Public Lands: Alaska—Public Sales: Preference Rights—Withdrawals and Reservations: Revocation and Restoration

   Equitable title vests in preference right applicants for public lands, restored in accordance with 43 U.S.C. § 971a through e (1982) and Public Land Order No. 1613, when they have paid the purchase price and received a receipt from BLM, and BLM may properly grant them patents even though they have subsequently sold the lands adjoining the public lands.

APPEARANCES: Donald D. Hopwood, Esq., of Anchorage, Alaska, for appellants; 1/ Robert C. Babson, Esq., Office of the Regional Solicitor, Anchorage, Alaska, for the Bureau of Land Management.

1/ For appearances on behalf of other appellants, see Appendix A. Under the circumstances, we do not decide whether all of these appearances conform to the requirements of 43 CFR 1.3 governing who may practice before the Department.

Bailey Decision

OPINION BY ADMINISTRATIVE JUDGE IRWIN

In 1949, in order to protect the roads that promoted the development of the Territory of Alaska, the Department of the Interior withdrew 150 feet of public lands along both sides of several "through roads," including the Glenn, Richardson, and Haines highways. 2/ Congress criticized these withdrawals as excessive, stating that they hindered commercial and private development, and, in 1956, enacted a law providing that if the Secretary revoked such a withdrawal "the lands involved shall be subject to disposal only under laws specified by the Secretary of the Interior, subject to easements as established by the Secretary." 3/ The law authorized the Secretary to "sell such restored lands for not less than their appraised value, giving an appropriate preference right to the holders of adjoining claims or entries and to owners of adjoining private lands." 4/

In 1958 the Department issued PLO 1613 revoking the earlier withdrawals, replacing them with easements, offering for sale "the lands released from withdrawal * * * which, at the date of this order, adjoin lands in private ownership," and providing that released lands which on the same date "adjoin lands in valid unperfected entries, locations or settlement claims,

2/ Public Land Order No. (PLO) 601, Aug. 10, 1949, 14 FR 5048 (Aug. 16, 1949); see also PLO 757, Oct. 16, 1951, 16 FR 10749.
3/ 43 U.S.C. § 971a (1982).
4/ 43 U.S.C. § 971b (1982). The purpose of the law was to "permit the disposal of lands restored from [such] withdrawals * * * in such a manner as to recognize the equities of those landowners who have acquired lands abutting such withdrawals prior to their restoration." S. Rep. No. 2641, 84 Cong., 2d Sess., reprinted in 1956 U.S. Code Cong. & Ad. News 4052. 43 U.S.C. § 971a also authorizes the Secretary to permit amendment of the land-description of an unpatented claim or entry on adjoining land to include restored lands, notwithstanding any statutory limitation on the area which may be included in such a claim or entry.

shall be subject to inclusion in such entries, locations and claims." 5/ Owners of private lands and holders of such entries were given a preference right to purchase the adjoining released lands or to amend their entries to include them, respectively, for which they could apply any time after the date of the order by giving notice to the Bureau of Land Management (BLM). Failure to pay for the land or to make any required payments would cause a preference right claimant to lose his preference.

Many adjoining landowners or entry holders applied for the released lands located between the adjoining lands and the centerline of the highway, made the required payments, and received receipts, but their applications were not processed further for many years. 6/ Many who applied subsequently sold the lands adjoining the released lands. In August 1984 BLM issued decisions granting the released lands to the original applicants. 7/ In

5/ PLO 1613, Apr. 7, 1958, 23 FR 2376 (Apr. 11, 1958). Entries, locations and claims specifically named as included in Paragraph 8 of PLO 1613 were certificates to purchase under the Alaska Public Sale Act, 48 U.S.C. § 364a through e, (see 43 U.S.C. §§ 687b-687b-5, repealed by § 703(a), P.L. 94-579 90 Stat. 2789), and leases with option to purchase under the Small Tract Act, 43 U.S.C. § 682a, repealed by § 702, P.L. 94-579, 90 Stat. 2787.

6/ An adjoining landowner's application form read:

"I am the owner of the land described below and hereby make application to purchase the land lying between my property and the centerline of the Glenn Highway. I understand that patent, when issued, will be subject to an easement on this land for highway purposes, and to any other valid existing rights. I also understand that patent to the land between my property and the highway centerline will not be issued until the land has been surveyed and the plat of survey is filed in the Anchorage District and Land Office. I further understand that it is my responsibility to keep the Anchorage District and Land Office informed of any change of my address or transfer of title."

7/ In early November 1984, BLM published a legal notice of the list of the applications approved in the August decisions and mailed the notice to current owners of the adjoining lands. The notice gave current owners until Dec. 15, 1984, to file appeals. Because of our disposition of these appeals we need not decide whether the notice complies with 43 CFR 4.411(a) or whether persons who were served with the August decisions could file an appeal until Dec. 15, 1984, in accordance with the notice.

these consolidated appeals, present adjoining landowners claim the released lands should have been granted to them.

Appellants argue that Congress intended that the released lands be granted to owners of adjoining lands and that when the original applicants for the released lands sold their adjoining lands to appellants they intended to convey their rights to the released lands along with the adjoining lands. The released lands are important, and sometimes essential, to the present owners of the adjoining lands for access to those lands, appellants argue, and of no practical use to the original applicants, some of whom are deceased persons or dissolved corporations. Failure to grant them legal title to the released lands between the highway and their adjoining lands will cause great hardship, appellants claim.

BLM's decisions state that when the "purchase price was received * * * and a receipt for the purchase price was issued * * * equitable title vested in the applicant * * *." Equitable title vests then under 43 U.S.C. § 971b and PLO 1613, BLM states, because under the analogous provisions of the Isolated Tracts Act, 43 U.S.C. § 1171 (repealed by section 703(a), Federal Land Policy and Management Act of 1976, 90 Stat. 2789), it vests when a preference right applicant has tendered the purchase price and been issued a cash certificate by the Department. Willcoxson v. United States, 313 F.2d 884 (D.C. Cir.), cert. denied, 373 U.S. 932 (1963). 8/ Once equitable title vests, in BLM's view, "the Secretary has no discretion in the issuance of a patent and events subsequent to such vesting can have no bearing upon the

8/ BLM Answer at 7.

claimant's right to patent," citing Wyoming v. United States, 255 U.S. 489 (1921). 9/

[1] BLM's decisions must be affirmed. The language of the Act involved gives the Secretary the discretion to sell the released lands to adjoining landowners and to permit the holders of unperfected claims on adjoining lands to amend their land descriptions to include released lands. The language of 43 U.S.C. §§ 971a and 971b is that the Secretary "may sell" the restored lands and "may permit the amendment" of land descriptions to include them. Like the Isolated Tracts Act, supra, and unlike the statutes involved in the cases cited by appellants (e.g., Payne v. Central Pacific Railway Co., 255 U.S. 228 (1921)), the Act does not entitle one to rights in lands if he proves he meets the statutory requirements, but authorizes the Secretary to take action in his discretion. Willcoxson v. United States, supra at 888; Lewis v. Udall, 374 F.2d 180 (9th Cir. 1967); Estate of Lyle K. Gross, 77 I.D. 174 (1970); Jack H. Stockstill, 1 IBLA 278 (1971). In PLO 1613 the Secretary specified what a preference right claimant must do: give notice to BLM and pay for the land within the time specified by BLM. Once a claimant did these things and BLM accepted the payment and issued the receipt for the purchase price, his equitable title to the released land he applied for vested. The United States is therefore obligated to perform its duty to issue the patent, after completion of the appropriate survey and other ministerial acts. Benson Mining Co. v. Alta Mining Co., 145 U.S. 428 (1892). Whether the claimant (or his successor) intended to convey--or will be deemed to have conveyed--the released land when he sold his adjoining lands during

9/ Id.

the pendency of the claim is a matter of state law dependent on the circumstances of the transaction, 10/ not a matter for the Department to adjudicate. Finally, we must observe that although the delay in acting on the applications has certainly inconvenienced appellants, it was not for their benefit that the statute was enacted but rather for "landowners who * * * acquired lands abutting [the] withdrawals prior to their restoration," i.e., for the original applicants. 11/ BLM's decisions are therefore consistent both with applicable case law and with the intent of Congress.

Accordingly, pursuant to the authority delegated to the Board of Land Appeals by the Secretary of the Interior, 43 CFR 4.1, the decisions appealed from are affirmed.

BY

SUPPL NO 12

TO: Members, House Committee on Finance.

DATE: March 12, 1986

FROM: Rep. Sam Cotten

RE: Proposed CS for HB 321

The proposed CS for HB 321 aims to resolve rights-of way problems plaguing Chugiak area residents living along the Old Glenn Highway; it also affects similarly situated residents living on other Alaska highways. The problem stems from the federal government awarding ownership of a narrow strip of land in front of the lots to someone else.

The situation dates back almost 30 years when the Act of August 1, 1956 and Public Land Order 1613 (in 1958) allowed people to purchase highway lots and file for patents to the abutting highway easements. The intent of the law was to award the highway easement to the abutting landowner. However, after a decades-long delay, BLM has only recently started issuing these patents. In doing so, BLM has decided to award the patents to the original applicants, who in many cases, no longer live there, rather than the abutting owners. (In some cases the original applicants have died, in other cases the land has changed hands several times.) This administrative delay by BLM has meant that current highway residents face the situation of having someone else claim ownership to the highway easement they thought they owned. This clearly contradicts the intent of the law.

The situation has caused much distress and confusion among Chugiak area residents in particular. The lots have little value except nuisance value. The lots are fairly small, and are long narrow strips. They are also subject to highway easement which diminishes any potential value.

The original version of HB 321 required involvement by the Department of Transportation and would have used condemnation as the method to gain the P.L.O. lots. The proposed CS would solve the problem without cost to the state.

The proposed CS for HB 321 gives the abutting lot owner the

Cotten Memo

ability to gain possession of the P.L.O. highway lots, subject to any P.L.O. easements, by use of adverse possession laws. The bill changes the existing law of adverse possession, by allowing adjoining owners to count time they occupied the highway lot while legal title was held by the federal government toward the seven year period required to gain title to the land. This is legal, as the federal government has determined that title is transferred upon payment of the purchase price of the highway lot.

Additionally, the bill provides that in cases where the existing owner believes the sale included the highway lot, the highway lot owner has the burden of proving that the deed clearly excluded the highway lot. If the highway lot owner fails to meet this burden, the adjoining land owner will get the highway lot in a quiet title action.

Passage of this bill would give the affected highway property owners a way to resolve a serious problem. The Dept. of Transportation has issued a zero fiscal note for the proposed CS.

IN THE HOUSE BY THE TRANSPORTATION COMMITTEE

CS FOR HOUSE BILL NO. 409 (Transportation)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to training and licensing of school bus drivers; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 14.07.020(a) is amended by adding a new paragraph to read:

(14) establish, in coordination with the Department of Public Safety, a school bus driver training course.

* Sec. 2. AS 28.15.041(b) is amended to read:

(b) A person may not drive a [SCHOOL BUS TRANSPORTING SCHOOL CHILDREN, OR A BUS TRANSPORTING SCHOOL-AGE CHILDREN OR ANOTHER] motor vehicle when in use for the transportation of persons for compensation until the person has applied for and has been issued a license for that purpose under (a) of this section. The department may not issue a license under this subsection unless the applicant is at least 19 years of age, has had at least one year of driving experience, and the department is satisfied as to the applicant's good character, competence and fitness to be licensed; nor may the department issue the license until proper application has been made and all required driving, written, and physical examinations have been successfully completed. A license issued under this subsection expires on September 1 of the year following issuance. Application for renewal may be made by submitting to the department the results of a current physical examination and paying the required fee.

* Sec. 3. AS 28.15 is amended by adding a new section to read:

Sec. 28.15.046. LICENSING OF SCHOOL BUS DRIVERS. (a) In addition to the requirements of AS 28.15.041(a), a person may not drive a school bus transporting school children, or a bus transporting school-age children until the person has applied for and has been issued a license for that purpose under this section.

(b) The department may not issue a license under this section unless the applicant

(1) is at least 19 years of age;

(2) has had a license to operate a motor vehicle at least one year before the date of application;

(3) has successfully completed all required driving, written, and physical examinations;

(4) has submitted information sufficient to complete a background check consisting of a fingerprint check of national criminal records and state criminal records of the state or states in which the applicant has resided for the past two years;

(5) has completed a state approved school bus driver training course established under AS 14.07.020(a)(14) or has for the previous two years been licensed by the state to operate a school bus.

(c) The department may not issue a license under this section to an applicant who has been convicted of any of the following offenses within 20 years of the time of application:

(1) sexual abuse of a minor in any degree (AS 11.41.434 - 11.41.440);

(2) sexual assault in any degree (AS 11.41.410 or 11.41.-420);

(3) incest (AS 11.41.450);

(4) unlawful exploitation of a minor (AS 11.41.455);

(5) contributing to the delinquency of a minor

(AS 11.51.130);

(6) a felony involving possession of a controlled or imitation controlled substance (AS 11.71 or AS 11.73);

(7) a felony or misdemeanor involving distribution of a controlled or imitation controlled substance (AS 11.71 or AS 11.73);

(8) promoting prostitution in the first or second degree (AS 11.66.110 or 11.66.120).

(d) The department may not issue a license to an applicant who has been convicted of driving while intoxicated (AS 28.30.030) within two years of the time of application or to an applicant who has two or more convictions for driving while intoxicated within 10 years of the time of application.

(e) For purposes of determining whether an applicant has been convicted of an offense listed under (c) or (d) of this section, a conviction under prior state law or in another jurisdiction of an offense having elements substantially similar to those of the offenses listed in (c) or (d) of this section is considered a conviction.

(f) Costs of conducting the background check required under (b)(4) of this section shall be paid by the applicant. A license issued under this section expires on September 1 of the year following issuance. Application for renewal may be made by submitting to the department the results of a current physical examination and paying the required fee.

* Sec. 4. This Act takes effect September 1, 1987.

OUTLINE OF CSHB 409(TRSP)

"An Act relating to licensing of school bus drivers; and providing for an effective date."

I. Background of bill

The children, whose parents have entrusted the state to educate, must have school bus drivers of good character who are educated in safety.

Committee Substitute for House Bill No. 409 (Transportation) would set minimum requirements for school bus drivers. The bill would require the applicants to satisfy the Department of Public Safety that they are of good character and are competent and fit to be licensed to drive school age children.

CSHB 409 (TRSP) takes the existing Alaska State Department of Public Safety regulations [13 AAC 08.005-.060] and implements them into statute. In addition the bill adds the following:

1. The applicant must complete a state approved school bus driver training course. [Section 3, subsection (b)(5), page 2, lines 17-19.]

2. A school bus driver training course would be established under the Department of Education (AS 14.07.020(a)(14)) in coordination with the Department of Public Safety. [Section 1, page 1, lines 9-12.]

3. The applicant must supply the Department of Public Safety with sufficient information to complete a national criminal records check and a background check within the state or states which he or she has resided for at least the past 2 years. [Section 3, subsection (b)(4), page 2, lines 13-16.] [See also: 13 AAC 08.015(2)]

4. The applicant must not have been convicted of a felony or misdemeanor involving distribution of a controlled or imitation controlled substance. [Section 3, subsection (c)(7), page 3, lines 4-5.] [See also: 13 AAC 08.010(5).]

5. The applicant must not have been convicted of a felony involving possession of a controlled or imitation controlled

substance. [Section 3, subsection (c)(6), page 3, lines 2-3.]

6. The applicant must not have been convicted of driving while intoxicated within two years or must not have been convicted of multiple DWI's. [Section 3, subsection (d), page 3, lines 8-12.]

7. The applicant must bear the cost of background checks. [Section 3, subsection (f), page 3, lines 18-23.]

II. Sectional Analysis

Section 1 establishes a school bus driver training course under the Department of Education and requires that department to establish the course in coordination with the Department of Public Safety. AS 14.07.020(a), copy enclosed, is the statute delineating the duties of the Department of Education.

Section 2 deletes the existing authority of the Department of Public Safety to regulate licensing of school bus drivers.

Section 3 adds a new section governing licensing of school bus drivers. It sets forth specific licensing requirements and lists specific criminal convictions that would prevent licensing.

(a) requires school bus license before driving school bus allowed.

(b) requirements before issuing license; applicant must: be of minimum age (19), have had a valid license for at least one year before date of application, have passed driving, written, and physical examinations, have submitted information for national and state background checks, and has completed driver training course.

(c) listing of criminal offenses for which license can be denied. (Taken from 13 AAC 08.010(5).)

(d) DWI section.

(e) relating to state or out-of-state convictions.

(f) applicant pays for background checks.

Section 4 effective date section.

Re: CS HB 409 (Transportation)

Dear Representative Cato:

At the hearing yesterday you asked for confirmation in writing of the procedure to be followed by DMV concerning the licensing of school bus drivers pending the results of a fingerprint search.

If the applicant has satisfactorily completed the requirements for issuance of a school bus license, including submission of fingerprints, we will issue that person the license. If the results of the fingerprint search reflect the person is ineligible due to a conviction outlined in AS 28.15.046(c) or (d), the school bus license will be cancelled with notice being sent to the licensee, and the school district where the person is driving. This is the procedure currently being used (we began notifying school districts in May, 1985), and it has not created any problems. This is also the procedure used if the licensee is convicted of an unqualifying offense during the school year. The authority for cancelling the school bus license is AS 28.15.161.

The above procedure will work more smoothly than issuing a temporary permit pending outcome of the fingerprint search. From past experience, FBI fingerprint searches were conducted until October 1, 1981, the number of permits required to be cancelled will be very minimal. Also, we have little control over the time period necessary to conduct the search, and by use of the above procedure we will not be required to issue a new temporary permit if the search results are not received by the date the first temporary expires.

I would be happy to discuss this procedure with you if you have any further questions.

Sincerely,

Bill Brown
Chief of Driver Services

This legislation requires fingerprint search of FBI files on each original school bus driver applicant. The FBI charges $12.00 per search. DMV will receive approximately 733 original applications in FY88. DMV will be required to pay the FBI for the searches, however, the applicant is required to cover this cost. (cont')

CONTINUATION of FISCAL NOTE ANALYSIS

For Bill/Resolution No. CS HB 409 (Trans)

ANALYSIS (cont')

At time of application each applicant will be required to pay $12.00 (in addition to license fee), which will be deposited in the general fund. 733 applicants x $12.00 per search = $8,800. A 5% growth factor was used for FY89 and subsequent years.

INFORMATION

For the fiscal note dated 5-1-85, an estimate of the number of original school bus applicants was used. During 1985, statistics were compiled to obtain the actual number. This fiscal note is based on actual number of applicants in calendar year 1985, with a 5% growth factor.

JUNEAU, ALASKA 99811

OFFICE OF THE COMMISSIONER

January 27, 1986

MEMORANDUM

TO: The Honorable Roger Jenkins
Alaska State Legislature
House of Representatives

FROM: Harold Raynolds, Jr., Commissioner
Department of Education

SUBJECT: HB 409 - School Bus Driver Training

Enclosed per your request is information concerning the school bus driver training program that the Department of Education would administer pursuant to Section 2 (b) (6) of House Bill 409.

Enclosure

cc: Romayne Kareen

1/27/86

HB 409
Section 2 (b) (6)

SUMMARY OF PROPOSED SCHOOL BUS DRIVER TRAINING PROGRAM

1. Standardization of School Bus Driver Training

The Department of Education will develop a recommended school bus driver training program. This program will include guidelines for classroom curriculum as well as behind-the-wheel techniques and topics. This recommended program will be made available to districts as the foundation for local training plans.

Local districts will then be required to develop school bus driver training plans and submit them to the Department of Education (DOE) for approval. Working from the DOE model curriculum, local districts and their private contractors can adjust their training programs to reflect the needs of their particular area. For example, a plan from Anchorage would place more emphasis on inner city driving than would a plan from Dillingham. Successful completion of a DOE approved training plan will become a requirement for receiving a school bus driver's license.

2. Certification of School Bus Driver Instructors

In addition to the developement of a model driver training program, the DOE will design and operate a certification program for school bus driver instructors. Persons responsible for the instruction of school bus drivers will be required to gain certification through this instructors' class. The DOE will offer this program 2-3 times per year after the initial training of the driver instructors in the state. Instructors will be taught topics such as class presentation skills, class preparation, and use of AV materials, in addition to the DOE recommended driver training curriculum.

3. Increased Licensing Requirements

Requirements for school bus driver licensing will be changed to reflect the state emphasis on proper training. Prior to issuance of a school bus driver's license, the Division of Motor Vehicles will require proof that:.

a. The applicant successfully completed a DOE approved school bus driver training class; and

b. The class completed was taught by a DOE certified driver instructor.

In addition, prior to license renewal, an applicant must show proof of having received a required amount of inservice or refresher training.

The Department of Education will work with the Division of Motor Vehicles in establishing procedures for verification and documentation of approved training plans and instructor certification.

4. Program Activities

Contingent upon available funding, the Department of Education will accomplish the following activities:

a. Manuals will be developed for school bus drivers and school bus driver training instructors.

b. Workshops will be conducted to train school bus drivers in safe driving practices, and to train driver training instructors in teaching techniques.

c. Workshops will be conducted to assist school district administrators in identifying school bus driver training needs, and development of annual training plans for meeting local needs.

d. Workshops will be conducted for driver licensing examiners in how to give effective road tests in school buses to evaluate driver performance.

e. Training materials such as booklets, video cassettes, and films will be developed or purchased

f. Reporting forms and procedures to certify that training requirements were met will be developed.

g. Inservice training of school bus drivers will be conducted.

h. On-site monitoring and review of training programs will be conducted.

5. Examples of Subject Matter for Workshops to Train School Bus Driver Training Instructors and School Bus Drivers

a. Subject matter for the two above categories will overlap, and will include, but not be limited to, the following:

(1) Student Loading and Unloading Procedures
(2) Student Rider Procedures
(3) Safety and Emergency Procedures
(4) First Aid
(5) Defensive Driving
(6) Driving Skills

(7) Pre-Trip Inspection
(8) The Exceptional Child
(9) Student Management
(10) Driver's Role and Responsibilities
(11) State Rules and Regulations
(12) District Rules and Regulations
(13) Bus Components
(14) Field Trips
(15) Public Relations

b. In addition to the above, the curriculum for the Driver Training Instructor will include the following:

(1) Setting up a Classroom
(2) Proper Classroom Procedures
(3) Instructor Qualities
(4) Lesson Planning
(5) Four Step Instruction Process: preparation; presentation; application; evaluation
(6) Teaching Techniques:
  (a) creating positive teaching environment
  (b) motivating students to learn
  (c) provide learning resources
  (d) guiding students on subject matter
(7) Practice Teaching
(8) Proper and Effective Use of Teaching Aids

DRAFT

FIFTH DRAFT

ANCHORAGE, ALASKA

MASTER PLAN
FOR SCHOOL BUS
DRIVER TRAINING IN
ALASKA

APRIL 30, 1985

DRAFT

I. OPENING STATEMENT

The school bus industry is the largest transportation system in the world today. In order to understand its magnitude, we must visualize 400 thousand buses transporting 23 million students a total of 3 billion miles a year. Not only is it the largest system in the world, but statistics reveal it also to be the safest. Nationwide, pupil transportation is reported to be 7 times safer than the family car.

Research throughout the State of Alaska revealed a significant disparity of training requirements at the respective local levels ranging from practically nothing to those in excess of 40 hours. The obvious need for conformity of school bus driver training on a statewide basis became very apparent following that research.

A classic example of a disaster arising from non-conformity happened in Martinez, California in 1976 when a driver, untrained on a particular type of bus that had not been inspected by state authorities because of the pending sale of that bus, embarked on a field trip to another city. Because of a series of events contributing directly to driver error, the trip ended tragically on an off ramp with 29 student fatalities. The personal loss and suffering felt by so many, in this and many other school bus accidents involving injuries and fatalities, is magnified by the fact they could have been prevented by proper training and follow-up procedures.

In order to maintain the integrity of a system with a safety record second to none, there must be a formal, structured program of driver training

DRAFT

combined with a monitoring system that will ensure compliance throughout the state.

The growth and increasing population of Alaska intensified the demands on all concerned to establish a school bus transportation system which incorporates the ultimate in safe and efficient safety practices. As the business of transporting children becomes more professional and visible with all its related problems, more precise guidelines have been and continue to be established. Responsibilities of states, local districts, contractors, administrators, supervisors, and school bus drivers are becoming greater and greater. In our modern society, it appears that safe school bus transportation awareness is fast becoming more acute.

Although the burden of providing this safe transportation is the responsibility of everyone involved with the program, the State Department of Education has the primary responsibility for the formulation, direction and overall administration of the program.

II. GOALS AND OBJECTIVES

The ultimate goal is the assurance that all instructors and drivers will receive the same quality education necessary for optimum safety, efficiency and ultimate cost effectiveness.

To accomplish this goal, there must be designed, financed, implemented, administered, and monitored an ongoing comprehensive training and reporting program for all school bus related personnel in the State of Alaska. This would ensure that the State Department, School Districts, and local

contractors would be in compliance with a program designed for the protection and safety of all concerned.

Programs shall be designed for school bus driver trainer instructors, certified school bus driver trainers, certified school bus drivers and state licensing examiners.

Although a quality program for all is the ultimate goal, the diversification of the State of Alaska has to be taken into consideration. Therefore, in order not to handicap a district or contractor with an unreasonable program that may be unsuited to their size or respective areas and unique conditions, the Transportation Director of the local school district will be responsible for designing a school bus driver training program using material and information out of the approved training manual adopted by the Department of Education. Using the 40 hour recommendation as a yardstick to have properly trained drivers meet local requirements, programs can then be designed utilizing local expertise with training emphasis being directed to specific needs relative to that particular area of the state.

These respective training programs and/or all subsequent updates or revisions, shall be submitted to the State Transportation Director for approval by July 1, prior to the opening of school in that district.

No drivers will be certified by the Division of Motor Vehicles until notification of acceptance and approval of the training program for that

DRAFT

related area is received from the State Transportation Director.

Each training program will be limited to the life of the transportation contract in each respective area and none will exceed the life of that contract.

Because of inherent difficulties in designing programs for Alaska, with its size and unique situations, implementation of these training programs, approval of appropriate administrative authority, and providing for budgetary procedures, a realistic outlook should involve a multi-year plan.

III. PROGRAM NEEDS ASSESSMENT

A. Develop or obtain curriculum and all related training aids to fit the following categories with the corresponding time frames and subject matter:

1. CATEGORIES — TIME FRAME

CERTIFIED SCHOOL BUS DRIVER TRAINER.....80 hrs.

CLASSROOM.....40 hrs.

BEHIND-THE-WHEEL.....40 hrs.

CERTIFIED SCHOOL BUS DRIVER.....40 hrs.

CLASSROOM.....20 hrs.

BEHIND-THE-WHEEL.....20 hrs.

STATE LICENSING EXAMINERS.....8 hrs.

DRAFT

2. SUBJECT MATTER

a. SCHOOL BUS DRIVER TRAINER/SCHOOL BUS DRIVER

1) The subject matter for the two above categories will overlap, include, but not be limited to the following:

a) State Rules and Regulations

b) District Rules and Regulations

c) Student Management

d) Public Relations

e) Driver's Role and Responsibilities

f) Student Rider Procedure

g) Loading and Unloading

h) Safety and Emergency Procedures

i) Pre-Trip Inspection

j) Bus Components

k) Field Trips

l) First Aid

m) The Exceptional Child

n) Defensive Driving

o) Driving Skills

2) In addition to the above, the curriculum for the Driver Trainer will include the following:

a) Setting up a Classroom

b) Proper Classroom Procedures

c) Instructor Qualities

DRAFT

d) Lesson Planning

e) Four Step Instruction Process:

1] Preparation

2] Presentation

3] Application

4] Evaluation

f) Teaching Techniques:

1] Creating Positive Teaching Environment

2] Motivating Students to Learn

3] Provide Learning Resources

4] Guiding Students on Subject Matter

g) Practice Teaching

h) Proper and Effective Use of Teaching Aids

b. STATE LICENSING EXAMINERS

1) Hold a one day workshop to cover the following topics:

a) Explanation of the overall school bus driver Training program.

b) A behind-the-wheel segment to demonstrate the driving skills being taught in the program.

c) Coordinate any new requirements or testing procedures from the D.P.S. or possible future changes or revisions.

B. State Department of Education Pupil Transportation Director be authorized to certify and/or choose school bus driver trainer instructors from qualified authorities throughout the nation because of their many years of experience, education, and expertise in all aspects of the school bus industry and related subject matter.

C. The State Pupil Transportation Director shall be supplied with:

1. A list of school bus driver trainers to be certified upon the satisfactory completion of the required authorized programs. This affidavit shall be signed and attested to by the participating Driver Trainer Instructor(s).

2. A list of the School Bus Drivers, subsequent to the satisfactory completion of the required authorized training programs and prior to the application of the certified driver's license, shall be supplied with appropriate affidavit signed by the Driver Trainer(s).

D. The 20 hours behind-the-wheel time frame may be waived if the applicant can furnish proof or produce credentials verifying the satisfactory completion of a comparable training program or if the applicant's past driving experience, education and knowledge in the field of pupil transportation becomes evident to the driver trainer.

After an appropriate behind-the-wheel session of at least 2 hours for verification, a Training Waiver Certificate signed by the Certified Driver Trainer attesting to the qualifications and ability of the applicant may be issued for presentation to the D.M.V.

E. Prepare a training program for the State Licensing Examiners that would make them cognizant of training procedures and program content putting them in a position to question the legitimacy of either affidavit. The State Licensing Examiners would serve as an excellent check and balance of the driver training program.

F. Provide that a certified school bus driver's license shall be renewed every 2 years and:

1. Require 10 hours of in-service training per year in order to remain current in such subjects as:

   a. Classroom Instruction

   b. Behind-the-wheel Training

   c. Safety Road Check

   d. Safety Meetings

   e. "Roadeo" Competition

   f. State Conferences

   g. Job-Related Courses

2. Require an appropriate affidavit accompany the school bus driver and reflect the required 20 hours of in-service training when applying for license renewal.

G. Require a year-end report showing all training received by each certified school bus driver be supplied to the state pupil transportation director.

H. Design the appropriate form and establish reporting procedures for the necessary data to be provided to the State Department of Education Pupil Transportation Director. Examples:

1. List of all employees in their proper categories, showing subject matter, type, and amount of training received
2. State Licensing Examiners in-service
3. Copies of all Certified Training Affidavits and Certified Training Waiver Affidavits.
4. Proper and comprehensive accident reporting becomes a larger priority. The statistical data gleaned from this material could provide excellent subject matter for in-service training.

I. Utilize when possible, because of their strategic location throughout the state, Community Colleges and Extension Rural Education Facilities as sites for regional instruction or in-service training to minimize travel for rural personnel.

J. Develop video tape programming for certain types of training.

K. Design an on-site monitoring system to compliment the regularly established reporting procedure.

L. Establish a dollar value for budgetary purposes with immediate attention being given to the writing, study and evaluation of all the proposed programs.

M. Provide for adequate personnel for proper administration of the program.

N. Prepare, print and distribute the desired and related material.

IV. MULTI-YEAR PLAN FOR ACCOMPLISHMENT

Obviously a program of this magnitude will need an adequate amount of time to phase in the appropriate segments as they are developed and as budgetary consideration will allow.

The following listing will indicate the priorities for incorporating the different aspects of the total program and will no doubt encompass a multi-year time frame.

PHASE I PLANNING - BUDGETING

A. Hold a meeting with Director of Management, Law, and Finance and the Commissioner of Education to discuss goals and objectives of the Pupil Transportation training proposal as the first step toward a State approved program.

B. Prepare package for the Department of Education for the following considerations:

1. Approval of the program

2. Budgetary appropriations

3. Recommendations to include the appropriate language in the Department of Education Regulations that would assure a State mandated, regulated, and monitored school bus driver training program and related services.

4. Recommendations to include the appropriate language in the Department of Education Regulations that would provide for State Certification for School Bus Driver Trainers and School Bus Drivers.

PHASE II CURRICULUM - REPORTING

A. Prepare curriculum and establish visual aids needed for driver training program.

B. Print and distribute materials to local districts along with guidelines for the preparation for approval of their respective training programs.

C. Design, print, and distribute all forms to all related agencies needed for required reporting.

D. Determine and prepare curriculum and material needs for the driver trainer instructors workshop.

PHASE III IMPLEMENTATION - EVALUATION

A. Establish necessary workshops to acquaint contractor and district personnel with programs, forms, procedures, etc.

DRAFT

B. Establish workshops with D.M.V. personnel for program coordination.

C. Establish and begin annual workshop to qualify driver trainers.

D. Begin driver training program on local level.

E. Evaluate program for efficiency of training and reporting procedures.

PHASE IV RESTRUCTURE - REORGANIZE

Alter, change, redesign, or upgrade any portion of the program as needed or required.

VI. CLOSING STATEMENT

This plan has identified a need, spelled out the process to rectify that need, and provided for an ongoing program with room to fluctuate as the business it regulates varies according to the educational requirements of the community.

One of the major endeavors of the plan was to alleviate the discrepancies regarding school bus driver training while allowing a good measure of local control of respective school districts.

The concepts of permitting school districts, in conjunction with the local contractors, to submit their own training programs for approval is

totally new, but has a tremendous amount of merit. Factors such as attitudes, public relations, and cooperation will be greatly enhanced and possibly the programs submitted will even be more stringent than one developed on a state level, because of the flexibility to stress the proper emphasis where needed.

The adoption of this plan by the State Department of Education will fulfill their responsibility to formulate and administer a school bus driver training program and pave the way for future developments and progress.

DEPARTMENT OF PUBLIC SAFETY

POSITION PAPER - CS HB 409 (Trans)

Neutral

February 3, 1986

CS HB 409 (Trans) An Act relating to the training and licensing of school bus drivers.

This bill does not make any drastic changes in the licensing of school bus drivers. The major concern of school bus contractors and school bus drivers was taken care of in the committee substitute.

Present law indicates a school bus permit will not be issued until "the department is satisfied as to the applicant's good character, competence, and fitness to be licensed....." Thus, the department adopted regulations which specify who cannot be licensed. This bill takes the discretion away from the department and specifies in statute who cannot be licensed. This bill adds one criminal offense that is not in the regulations which disqualify an applicant, however, the department's regulations are much stricter in regard to driving offenses.

The cost mentioned in proposed section 28.15.046(f) is currently $12.00 for a fingerprint search of the national criminal records as required in AS 28.15.046(b)(4). Individual states do not charge for a fingerprint search for another state, as is required in AS 28.15.046(b)(4) if the applicant has resided outside Alaska within the two years prior to application.

Recommend Section 2 of the bill be repealed. Licensing of taxi drivers is presently handled at the local government level and the department would prefer to leave the control at the local level.

ROBERT J. SUNDBERG
Commissioner

POSITION PAPER OF THE DEPARTMENT OF EDUCATION

FOURTEENTH ALASKA LEGISLATURE
House Bill 409
March 7, 1986

The Department supports this bill.

for Harold Raynolds, Jr.
Commissioner

MEMORANDUM State of Alaska

TO: The Honorable Roger Jenkins
House of Representatives
Alaska State Legislature

DATE: March 10, 1986

FILE NO.:

THRU: Steve Hole
for Marshall L. Lind, Commissioner
Department of Education

TELEPHONE NO.: 465-2800

SUBJECT: CSHB 409

FROM: Romayne Kareen, Administrator RK
Pupil Transportation Services
Department of Education

Per your request, following is information regarding CSHB 409.

CSHB 409 requires school bus drivers to complete a state-approved school bus driver training program before being licensed by the Department of Public Safety to transport school children in school buses. Currently a driver need only pass a written and performance test in order to be issued a school bus driver permit.

The following are reasons for the department's support of this bill:

1. Adequate training of school bus drivers is essential in order to assure the safety of school children who ride buses to and from school.

2. Current training programs of school districts and bus contractors throughout the state range from approximately four hours to 40 hours for beginning drivers.

3. Training offered by school districts and bus contractors is inconsistent due to lack of statutory or regulatory requirements for content and amount of training.

4. During 1984, 45 pupils were killed nationwide in accidents involving school buses. Approximately ten were passengers on school buses and 35 were pedestrians either approaching or leaving the school bus loading zone. More than half of the pupil pedestrians were struck by the school bus which they were entering or leaving.

5. In Alaska, three pupils were fatally struck by school buses in the last three years.

6. During 1984, the Department appointed a committee of school district representatives and bus contractors to develop a master plan for school bus driver training needs in the state. A summary of the plan is attached. The plan is ready for implementation contingent upon available funding.

HB 409
Section 2 (b) (6)

SUMMARY OF PROPOSED SCHOOL BUS DRIVER TRAINING PROGRAM

1. Standardization of School Bus Driver Training

The Department of Education will develop a recommended school bus driver training program. This program will include guidelines for classroom curriculum as well as behind-the-wheel techniques and topics. This recommended program will be made available to districts as the foundation for local training plans.

Local districts will then be required to develop school bus driver training plans and submit them to the Department of Education (DOE) for approval. Working from the DOE model curriculum, local districts and their private contractors can adjust their training programs to reflect the needs of their particular area. For example, a plan from Anchorage would place more emphasis on inner city driving than would a plan from Dillingham. Successful completion of a DOE approved training plan will become a requirement for receiving a school bus driver's license.

2. Certification of School Bus Driver Instructors

In addition to the developement of a model driver training program, the DOE will design and operate a certification program for school bus driver instructors. Persons responsible for the instruction of school bus drivers will be required to gain certification through this instructors' class. The DOE will offer this program 2-3 times per year after the initial training of the driver instructors in the state. Instructors will be taught topics such as class presentation skills, class preparation, and use of AV materials, in addition to the DOE recommended driver training curriculum.

3. Increased Licensing Requirements

Requirements for school bus driver licensing will be changed to reflect the state emphasis on proper training. Prior to issuance of a school bus driver's license, the Division of Motor Vehicles will require proof that:

a. The applicant successfully completed a DOE approved school bus driver training class; and

b. The class completed was taught by a DOE certified driver instructor.

In addition, prior to license renewal, an applicant must show proof of having received a required amount of inservice or refresher training.

The Department of Education will work with the Division of Motor Vehicles in establishing procedures for verification and documentation of approved training plans and instructor certification.

4. Program Activities

Contingent upon available funding, the Department of Education will accomplish the following activities:

a. Manuals will be developed for school bus drivers and school bus driver training instructors.

b. Workshops will be conducted to train school bus drivers in safe driving practices, and to train driver training instructors in teaching techniques.

c. Workshops will be conducted to assist school district administrators in identifying school bus driver training needs, and development of annual training plans for meeting local needs.

d. Workshops will be conducted for driver licensing examiners in how to give effective road tests in school buses to evaluate driver performance.

e. Training materials such as booklets, video cassettes, and films will be developed or purchased.

f. Reporting forms and procedures to certify that training requirements were met will be developed.

g. Inservice training of school bus drivers will be conducted.

h. On-site monitoring and review of training programs will be conducted.

5. Examples of Subject Matter for Workshops to Train School Bus Driver Training Instructors and School Bus Drivers

a. Subject matter for the two above categories will overlap, and will include, but not be limited to, the following:

(1) Student Loading and Unloading Procedures
(2) Student Rider Procedures
(3) Safety and Emergency Procedures
(4) First Aid
(5) Defensive Driving
(6) Driving Skills

(7) Pre-Trip Inspection
(8) The Exceptional Child
(9) Student Management
(10) Driver's Role and Responsibilities
(11) State Rules and Regulations
(12) District Rules and Regulations
(13) Bus Components
(14) Field Trips
(15) Public Relations

b. In addition to the above, the curriculum for the Driver Training Instructor will include the following:

(1) Setting up a Classroom
(2) Proper Classroom Procedures
(3) Instructor Qualities
(4) Lesson Planning
(5) Four Step Instruction Process: preparation; presentation; application; evaluation
(6) Teaching Techniques:
  (a) creating positive teaching environment
  (b) motivating students to learn
  (c) provide learning resources
  (d) guiding students on subject matter
(7) Practice Teaching
(8) Proper and Effective Use of Teaching Aids

BOARD REPORT

Pouch F, Juneau, Alaska 99811
More Information: Harry Gamble 465-2821

FOR IMMEDIATE RELEASE
February 6, 1986

Here is the action from the State Board of Education meeting February 3 and 4 in Juneau. The Board:

*Approved a resolution supporting Governor Bill Sheffield's debt containment legislation, HB 520.

*Supported the following legislation: CSSB 240, which would increase the penalty for illegally passing a school bus; Executive Order 62, which would transfer fire service training responsibilities from the Department of Education to the Division of Public Safety; SB 230, which would increase from two to three years the requirement for teacher tenure, and would permit schools to dismiss teachers because of loss of funds; SB 104, which would increase from three to five years the maximum duration of pupil transportation contracts; SB 8, which would encourage school districts to offer curriculum in personal safety; SB 381, which would establish a forward funding provision for funding public schools; HB 526, which would provide funding to the Alaska State Museum for preservation of important artifacts of Alaska culture; and HB 409, which would provide for training and licensing of school bus drivers.

*Opposed the following legislation: SB 319, which would establish a separate unit within the Department of Education, with a governing board, to provide statewide services to severely handicapped students; CSHB 174, which would require teachers to be trained in first aid and emergency procedures.

*Voted to take no position on: HB 480, which would prohibit the use of corporal punishment in school districts as a form of discipline; and SCR 10, which would request that the State Board request local school boards to require the study of Alaska History including ramifications of the Alaska Native Claims Settlement Act (ANCSA). In taking no position on these two measures, the Board noted that most local school districts already have established policies regarding corporal punishment and that nearly all school districts either require Alaska history, including the ramifications of ANCSA, or they provide such classes as an elective.

The Board also:

*Accepted the Alaska Schools of the Future plan, for which Governor Sheffield provided $1.5 million in his FY 1987 operating budget request.

*Sent the following regulation for public comment: 4 AAC 06.27 (a)(b)(c), would be repealed and replaced with the

Representative Jenkins
P.O. Box V
Juneau, Alaska 99811

Dear Representative Jenkins;

Laidlaw Transit, Inc. is a school bus contractor working for the Anchorage School District and the Kenai Borough School District. We employee approximately 220 bus drivers and bus attendants in those two districts.

We wholeheartedly support House Bill No. 409, "An Act relating to training and licensing of school bus drivers; and providing for an effective date".

Sincerely,

Christine M. Flegel

Re: CSHB 409

Finally, after many years of struggles and frustrations, a bill supporting school bus driver training is proceeding through the legislature.

This long awaited and much needed legislation would benefit not only related State Departments, but all communities that transport school children, everyone else connected with pupil transportation, and also the other taxpayers of the state.

By providing the fiscal means, establishing Statute language, and incorporating the training program, this bill would fill the void now present regarding pupil transportation. At the present time there is no Statute language requiring any training program for school bus drivers, no State authorized training program of any kind, and no monitoring system reflecting the quality of personnel being employed, or any assurance they are receiving even minimum instruction.

Aside from the legal void that puts the State Department of Education and the taxpayers in a vulnerable position during any litigation involving pupil transportation, CSHB 409 would also ensure that reputable people are being hired and are receiving a standardized program of instruction preparing them for a most difficult task.

Therefore, I respectfully request your support for CSHB 409.

Sincerely;

Cecil Whitehurst

Dear Representatives:

As a member of the Alaska School Bus Safety Committee and Transportation Coordinator for our school district, I would like to speak, through this letter, in **support of HB 409.**

As the bill eliminates some of the discretion of the Department of Public Safety, it also mandates that individuals will be of good character before a bus driver's license is issued.

Thank you for your representation and support.

Sincerely,

Penny Little

ACCIDENT FACTS

1985 EDITION

National Safety Council

School bus accidents, 1984

School bus transportation accidents killed about 100 persons in 1984, including 45 pupils, 5 bus drivers and 50 other persons.

Of the pupils killed, about 10 were passengers on school buses and 35 were pedestrians either approaching or leaving a loading zone. More than half of the pupil pedestrian victims were struck by the school bus which they were entering or leaving.

Injuries in school bus related accidents totalled about 8,400 of which 5,500 were students.

The table on page 91 shows certain details of the injury and property damage accidents which occurred in 1984. Types of school bus accidents not itemized include an estimated 400 pedestrian, 100 bicycle, and 10 railroad accidents. About eight out of ten accidents involved property damage with no injuries.

Characteristics of school bus transportation

Interpretation of school bus accident data is complicated by the many variations between state operations, by lack of standard definitions of terms, and by lack of comparable reporting by states.

The state totals in the table on page 91 are shown as reported by the states. The U.S. totals are National Safety Council estimates developed by inflating the total from reporting states to compensate for the portion from missing states. State figures are weighted based on the number of pupils transported in that state. Procedures for estimating all U.S. totals on this page and in the table on page 91 were revised for the 1985 edition of *Accident Facts* and are not comparable to estimates from previous editions.

Terms and reporting classifications

Vehicles. Included are regular school buses and other nonfamily-owned vehicles used in transporting pupils.

Annual bus mileage. Total mileage includes deadheading (traveling with no pupil passengers) and extracurricular activity trips. Data from seven states indicate that deadheading may average about 14 per cent of total mileage, ranging from practically none in some states, up to one fourth of the total bus mileage in others, depending on arrangements for driver and bus storage. Extracurricular mileage, based on 18 states, is indicated to be about 9 per cent of total mileage, also with a wide range among states. Such mileage includes athletic and field trips, shuttle service, and so on.

Pupils transported daily. A pupil is counted only once for each day transported, although usually two one-way trips or more are made daily.

Pupil passenger miles and average bus occupancy. Total pupil passenger miles cannot be computed directly from total bus mileage and pupils transported. Reports indicate average bus occupancy as upwards of 35 pupils, but it may rise or fall several times on a single route trip, as a bus in some instances may serve several schools along the route. Average occupancy for all bus mileage, including deadheading, may be only about 40 per cent of capacity. The National Safety Council estimate of total pupil passenger miles for 1984 is 78.3 billion.

Route trip. A route trip may represent (1) a one-way trip from the point where the first pupil boards the bus to the point where the last pupil leaves it, (2) a round trip, or (3) several separate trips ending at the same school(s). Miles per route trip reported for 16 states ranged from 18 to 76, averaging 33 miles. Pupils carried per route trip ranged from 13 to 79, averaging 54 pupils. Route trips per bus ranged from 1 to 4, averaging 2.2 trips daily.

SCHOOL BUS
LOADING & UNLOADING
SURVEY

CALENDAR YEAR 1984 SCHOOL YEAR 84-85

The National School Bus Loading and Unloading Survey is a collection of fatality accident records provided by the state agencies responsible for school transportation safety and/or accident records. Only those fatality accidents involving school children in or around the loading or unloading areas of a school bus are included in this survey. On-board fatalities are excluded, as are pedestrian-type fatalities that occur when the school bus is not in the near vicinity at the time of the accident.

ACCIDENT SUMMARY REPORT

1. The driver of a vehicle passes through the stop arm and alternately flashing red lights of a school bus that was stopped to discharge students at a regularly scheduled stop. The fatality occurred as the student was crossing in front of the school bus. (7 yr. old female)

2. The students exited the bus and crossed the street in front of the bus. The driver was distracted a moment, looked in the mirrors (including the crossover mirror) and saw nothing. The driver started the bus forward. The child was underneath the bus, in front of the left front wheel. The bus moved approximately 18 inches with the left front wheel passing over the child. (6 yr. old female)

3. Three children exited the bus, two going around the front and one going around the rear. The child going around the rear slipped or fell under the right rear wheel and was run over. (8 yr. old male)

4. Child slipped or fell and was run over by the right rear wheel. (5 yr. old female)

5. The school bus was stopped at a loading area and the ignition wires began to spark and smoke; thus, the engine would not start. The bus driver went to call for another bus at a nearby residence. The bus started rolling down a slight negative grade. The students started jumping out of the entrance. The victim jumped as the bus swerved to the right off the shoulder and the right wheels ran over the victim. (7 yr. old female)

6. At a regular stop on the bus route one boy and two girls exited the bus. One girl usually crosses the street in front of the bus and the other two children stay on the side of the street which they exit the bus from. The driver became involved in a conversation with the mother of the boy concerning the child's behavior on the bus. When ready to leave the stop the driver shut off the amber and red flashing light system, checked the mirrors and proceeded forward. The driver felt a bump and several cars were blowing their horns. The driver then stopped the bus and saw the child lying in the roadway. The bus was noisy with the 14 or 15 remaining passengers and the driver stated that the crossover mirror moves out of adjustment all the time. (6 yr. old female)

7. Three students exited the bus at a regular stop. The driver observed the students begin to talk on the sidewalk and after waiting an undetermined amount of time, shut off the warning lights and checked all the mirrors (including the crossover mirror). The driver then moved the bus forward not knowing that the incident took place until looking in the rearview mirror. The child had been struck by the front of the bus. (5 yr. old female)

8. Oncoming vehicle was unable to stop for a child that was being unloaded from a school bus. (5-9 yr. old female)

9. Child was struck by a dump truck loaded with 25 tons of lime as child departed the bus.

10. Child was struck by an out of control pick up truck while waiting in front of house for the bus to arrive.

11. Child darted between school buses parked in the school drive into the path of an approaching school bus.

12. Child was struck by an approaching auto while waiting in front of her house for the bus to arrive.

13. A student departed the bus. The student dropped a book - the bus driver did not see the student and started the bus in motion. The student was struck by the front of the bus. (15 yr. old female)

14. The student exited the bus, darted across the front of the bus and was struck by a passing school bus. (10 yr. old male)

15. One bus was stopped for another (oncoming) school bus discharging passengers. When the stop arm of the bus discharging passengers was pulled in the driver of the other bus started forward. The driver then felt a bump and stopped the bus. The bus had hit a student who had exited one bus and then crossed in front of both busses. (10 yr. old male)

16. A child was struck by the right rear wheel of a school bus. (7 yr. old male)

17. 23 students were discharged at a five-way intersection. The Driver who was facing a stop sign, was distracted by traffic approaching from the left. The student, near the front of the bus, was waiting for an older sister to disembark. The sister, who was already on the other side of the street, called to the student at the same moment the driver closed the door, started forward and turned right. The student was knocked down by the front of the bus and run over by the right rear dual wheels. (6 yr. old female)

18. School bus was eastbound, stopped and let off 4 students. The bus continued east about 10 feet and turned onto a north-south road. The bus ran over a pedestrian at the intersection of the two roads. (5 yr. old female)

19. In both accidents the students got off the bus and walked around in front. The school bus driver did not see the children in front of the bus and ran over them. (5 yr. old male/6 yr. old female)

20. The student was at the bus stop and was hit by a passing automobile. The school bus was not at the stop at the time of the accident. (13 yr. old male)

THE ABOVE SUMMARY REPORTS WERE THOSE THAT HAD SUFFICIENT INFORMATION REPORTED TO INCLUDE IN THIS REPORT. THERE ARE ALSO AN OVERALL TYPICAL REPRESENTATION OF THE FATALITY ACCIDENTS WHICH OCCURRED.

SUMMARY

- *490 fatalities occurred to students 5, 6, 7 & 8 yrs. of age, or 69.0% of total.*
- *Students departing bus on way home involved in 67.9% of all fatalities in the study.*
- *School bus related accidents outnumber those involving "the other vehicle"*
- *In the 80,-84 calendar years, the school bus was involved in 69.2% of the accidents or 108 of the 156 fatalities that occurred.*

This survey is provided annually to the school transportation industry in an effort to alert individuals and organizations of the dangers involved in loading and unloading school children. Fatalities continue to occur at the bus stop, caused by a variety of circumstances and errors on the part of the school bus driver or a passing motorist. It points out the continuing need for forceful, advanced instruction to school bus drivers, and the need to increase our efforts to thoroughly inform the driving public about the requirements of the school bus stop law.

Limited quantities of this document are available from the address provided below. Please feel free to reproduce and utilize the survey data as desired, as it is provided specifically for this purpose.

Kids Need To Be Watched Too

A drop in passing vehicle-related fatalities is more than offset by a rise in school bus-caused fatalities.

By Roscoe Bernard

Whenever I learn of another child being killed by a school bus, I am tempted to emulate the often-quoted movie character Howard Beal, who in an agony of frustration, leaned from his window and shouted, "I'm mad as hell, and I'm not gonna take it anymore."

This seemingly facetious remark is not without merit because the number of children being killed by their own bus represents a terrible blight on an otherwise fantastic safety record. The blight can, in this writer's opinion, be substantially reduced if not totally eliminated.

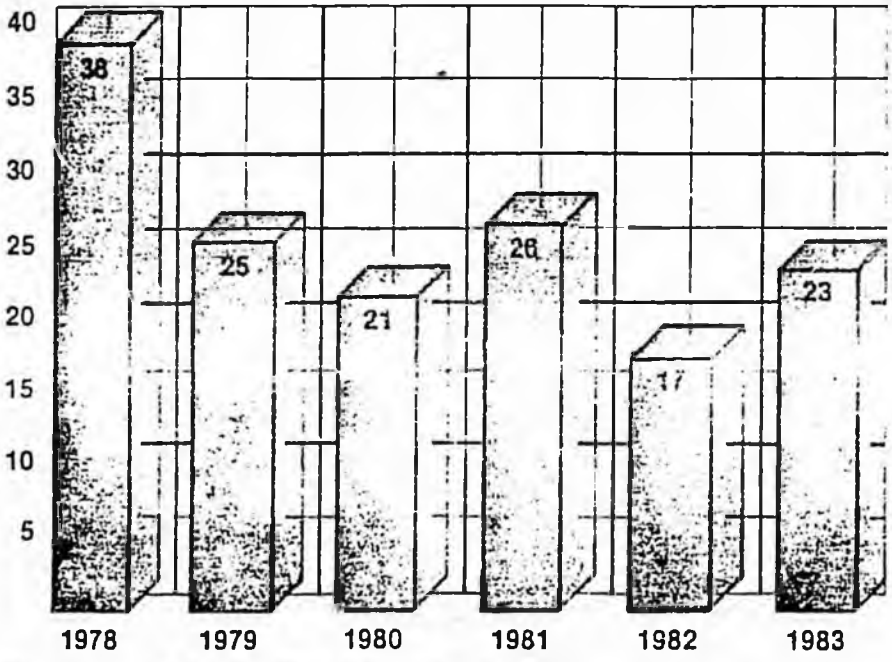
Although the school bus industry may point with pride to its overall safety record (National Safety Council Accident Facts, 1984 statistics show that the yellow school bus is the safest vehicle on the road), there is little pride in this one area. There is also no indication of appreciable improvement. Conversely, just when it seemed that there was a downward trend (see figure 1), the recently released School Bus Loading and Unloading Survey issued by the Kansas Department of Transportation reflects an alarming 35 percent increase over the preceding year.

The six year fatality average of 25 is relatively close to the average number killed by the vehicles passing a stopped school bus, i.e., 33, but the latter reflects a downward trend over the last few years (see graph 2).

We must address the question of why, in 1983-1984, our school bus drivers killed nearly three times as many children as did drivers of other vehicles in loading and unloading situations. Such statistics refute the argument that we have little control over those who jeopardize safety by passing a stopped school bus.

In recent years there has been a major push by individual companies, school districts, and state and federal organizations to increase public awareness. Thousands of dollars and countless man hours have gone into this effort and there, fortunately, is no indication that interest is abating. The market is presently saturated with safety devices ranging from crossing gates to radar screens, and experiments with strobe lights and signaling devices are on-going. Many states have either passed new legislation to deal with passing violations or have revised and strengthened existing laws already in place. In short, there has been a great deal of emphasis in this particular area, and it appears that progress is being made. Although it's probably premature to predict a trend, there has been a steady decline in this particular type of fatality. Its total elimination, however, is unrealistic for the simple reason that we don't have complete control. In some instances we have no control at all, and drivers are very often frus-

GRAPH I
SCHOOL CHILDREN KILLED BY SCHOOL BUS



are possible. It is far more important that we are absolutely certain we're not going to run over an unsuspecting child than it is to concern ourselves with the momentary delay to a motorist. There should never be any question.

Finally, it was suggested that the driver has the additional responsibility to those whose name is on the paycheck, i.e., the owner-operator or board of education. The inevitable suggestion that schedules must be met at all costs was made. Unfortunately, this is more truth than fiction: so long as we place anything before safety, nothing will change. I submit that the time of decisions is long overdue: the safety of children must never be compromised.

Reviewing the situation

It seems to me that we are continually looking at the situation in retrospect. Webster defines "retrospect" as a review or meditation of past events. In view of the record, we need to do more than meditate, and we must dwell on the future rather than the past. We can no longer accept the premise that these are unfortunate but unavoidable accidents, and they are going to happen regardless of what or anything we can do.

At the risk of sounding like a complete monster, let me suggest that in addition to letters of sympathy to distraught bus drivers, we should consider a letter or reprimand as well. To date, rarely, if ever, has there been any stigma attached to such an unfortunate tragedy other than the personal trauma and psychological burden that will never be erased.

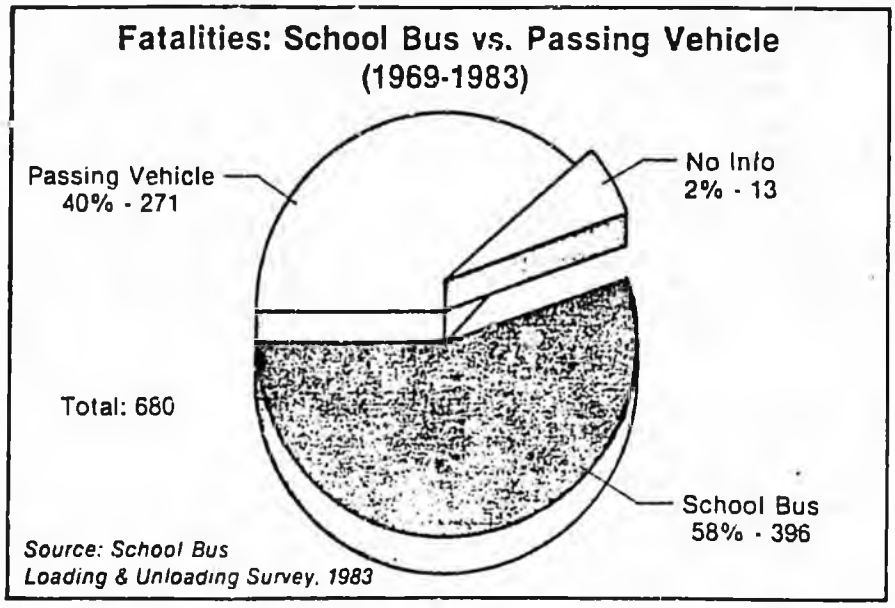
The burden of responsibility rests squarely on the shoulders of the child who is, of course, no longer available to plead his case. What defense do we have anyway? After all, he's only a six-year-old who is supposed to know better than to ever bend down in front of a vehicle to pick up some dropped papers. And then too, everyone who has ever driven a school bus or is remotely associated with school bus transportation knows that the beleagured school bus driver has too many responsibilities and distractions already. They can't be held responsible, right? WRONG — if they cannot be then who can? Although nothing will ever bring back the child or ease the pain of driver and parents, we should not fail to use every means at our disposal to draw attention to such senseless tragedies.

It's an accepted fact that the rear and sides of school buses are oftentimes difficult, if not impossible, to observe, but just as it is true with lights, stop arms and cross arms, a great deal of time and money has been spent perfecting mirrors that make it relatively easy to observe the area in front of a conventional school bus. Many states and districts now require a double set of mirrors on both right and left fenders which, if properly adjusted, enable the driver to clearly observe any object in front of the vehicle as well as along both sides.

One major bus body builder (American Transportation Corporation) has gone a step further in designing the new generation Patriot which noticeably enhances the driver's line of vision. It represents a substantial improvement in an area that has long plagued school bus operations and may well be a significant step in the right direction.

Many districts are becoming increasingly concerned, but unfortunately their heightened interest is frequently too late or too little.

I was disappointed when I read a recent article in the *Kansas City Star*, January 10, 1985, outlining a four-part safety program in the school district where a six-year-old was killed by her bus. The well-meaning district has focused its program on teaching school children about the possible dangers when they are near school buses, and the children will be taught from the manual the district has prepared. In addition, they will encourage children to take the manuals home and go over them with their parents. Possibly the most significant aspect of the entire plan is the involvement of the drivers, who will visit kindergarten through sixth grade classrooms to discuss safety. It has not, however, gone nearly far enough. Although my personal knowledge of this particular operation tells me that no effort will be too great insofaras ensuring that a similar tragedy will never occur, there is a decided void in the overall program. Everything they are doing is commendable, but they need to go much further. Drivers as well as children, parents and teachers, need to be heavily involved because they have the ultimate control. And what of school and transportation officials and board members? Where does their responsibility begin and end? School bus fatalities are everyone's responsibility. With total involvement this statistic can be eliminated.



trated by their inability to protect their children.

The reverse is true with children being killed by their own school bus drivers. With the possible exception of child unpredictability, our drivers *do* have absolute control. They need *never* run over a child who is in the process of loading or unloading. They *are* capable of *complete control* because they alone control the movement of the vehicle.

A continuing tragedy

The unremarkable aspect of this particular brand of genocide (it's systematic if not deliberate) is that findings continue to reveal identical patterns: "Child dropped item in front of bus and was in the process of picking it up when struck by the bus." Or, "Student struck by the rear wheels of the bus after departing on trip home." Or, "Student crossing in front of stopped bus and bent over to pick up some dropped papers."

The tragic statements go on, year after year. The only change involves the item being retrieved: A construction paper Christmas tree, Valentine, Easter bunny, or a bright orange pumpkin. These are signs of the season — the dangerous season between late August and early June. They clearly tell us that kids are kids, and they need to be watched over and protected by supposedly mature, intelligent adults.

This writer believes such an assumption is reasonable or else maturity would occur at a much earlier age. Nearly 80 percent of all children killed by their own bus or passing motorists are under 10 years of age. Such statistics cause some to conclude that children should not be exposed to traffic before they have had the maturity to cope with it.

At one time or another we have all witnessed a child's excitement or rampant emotion during special times likes Halloween, Christmas or Easter. They really do not need the additional emphasis to let us know that they're kids; they're already supercharged and unpredictable — but given this extra shot of adrenaline it's small wonder that they often act without benefit of thought or reason. The seasonal aspect should tell us nothing more than that we should redouble our awareness during these special times.

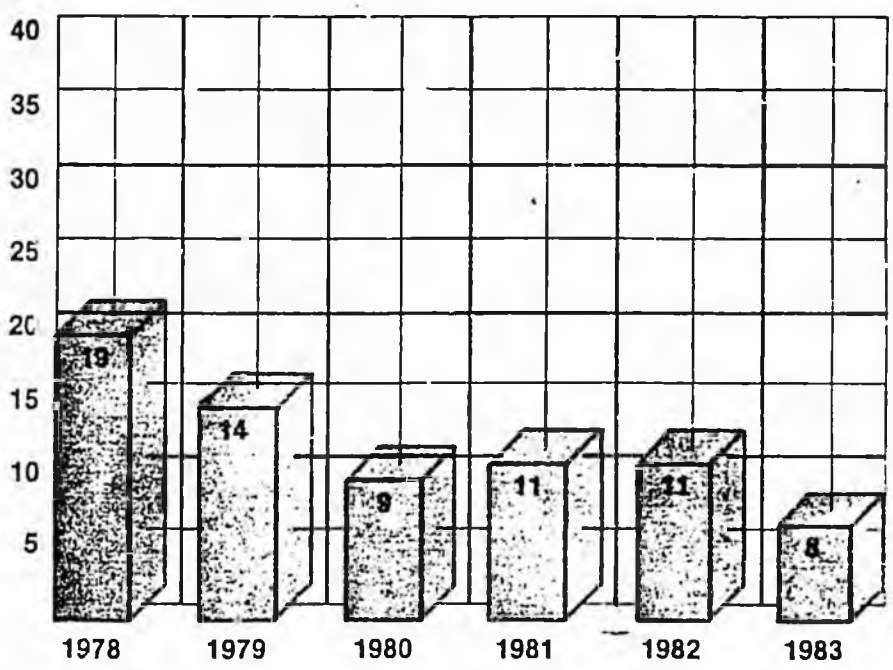
Brainstorming for solutions

During a recent brainstorming session fellow staff members discussed the impractical aspects of my contention that it is altogether possible to erase this statistic.

Among the several arguments presented was the suggestion that school bus drivers could not realistically be expected to always count and keep track of each child entering or leaving the bus. It was pointed out that in many instances, primarily in heavily populated urban areas, there are frequent bus stops during which numerous children load and unload. These children frequently disperse rapidly and go in many different directions. In like manner, when loading, they sometimes approach the bus in the same fashion. Additionally, these large stops are very often concentrated in the high density areas typified by trailer courts and public housing developments. These areas are often-times associated with depressed conditions and numerous pre-school children around the bus stops. Unfortunately, a subsequent decline in parental supervision and insistence on basic rules and regulations associated with proper loading and unloading procedures is frequently noted.

Although the forgoing is unfortunate, it should be all the more reason why drivers should never fail to count and record the exact number and location of all children and, under no circumstances, move until each is personally accounted for.

GRAPH II
SCHOOL CHILDREN KILLED
BY VEHICLE PASSING SCHOOL BUS



Another very valid argument presented was the suggestion that such accounting would be difficult at times because of additional stress placed upon already harassed drivers in heavy traffic conditions. Any additional delays can only add to already dangerous situations involving waiting motorists and passing violations. Here again I submit that this is all the more reason why there should be accurate accounting for every child.

Insofaras community relations, a great deal may be said for keeping everyone happy, or reasonably so, but at what cost? Misplaced values

Safe Passage

Driver training is the key

by Bill G. Loshbough

The good ol' days of handing a driver a set of keys, pointing him in the direction of the bus, and handing him a route sheet are gone. Districts must take an aggressive role in their pupil transportation programs. All too often, administrators ignore transportation until something serious happens and the lawsuits start, the community reacts and insurance costs escalate.

DRIVER training is one of the *most* critical areas of pupil transportation safety. Studies we have conducted in New Mexico indicate that there is a direct correlation between loss reduction and training and experience. We believe that a solid basic preemployment training program and an aggressive in-service training program—along with experience—will bring about a significant loss reduction.

Many times school officials question whether they can afford a driver training program. The answer is that you cannot afford *not* to have it. School districts have experienced, and will continue to experience, higher costs in fleet insurance. Districts must have a loss reduction program that not only includes an aggressive driver training program, but also includes a strong driver selection component, periodic evaluation, route supervision and vehicle maintenance. Districts should evaluate all accidents, regardless of severity, to determine how future incidents can be prevented. Tailor the program to meet those needs.

A comprehensive driver training program will also assist the district in protecting itself in lawsuits that may result from an accident or incident. The district must be in a position to show that they have done what is reasonable to provide their driver with adequate training.

The National School Transportation Association completed a survey in May, 1985, "School Bus Driver Licensing Procedures, Rules and Regulations." In the study, eleven states had no state law or policy requiring courses of instruction. Requirements ranged from seven hours to forty hours. Twenty states had no requirement for refresher courses. Several states do not have a requirement for a written or a road test at the end of the instruction. Nineteen states did not require trained instructors to teach the driver training course. This study points out that states have made significant progress in the area of driver training, but that we need to continue to expand and improve in this area.

Documentation

Another important aspect of the driver training program is documentation for the district's protection. Adequate training and certification of driver trainers is a must from a state or regional recognized program. In order to provide uniform, accurate training to drivers, the driver trainer should be given the tools to do the best job possible. Certification from a recognized program will assist the district in defending its program before the community or in the case of legal action.

Detailed records on each driver's training, including preemployment and in-service, are a *must*. These documents become invaluable in the case of a lawsuit or allegations by the community that a driver has not been properly trained.

Lesson plans used in each training session should be developed and maintained in order for the district and the driver trainer to document the training that drivers have received. These plans should include reference to all materials and training aids used in the program.

A file on all written and road tests should be maintained on all drivers, and should include periodic evaluations of drivers.

The driver training program should have generally standardized criteria (generally established by the state, but should have the flexibility to meet certain special needs of the local district).

The basic program should include, but not be limited to, state and local regulations and policies, general motor vehicle operating procedures, passenger management, familiarity with bus and equipment, procedures for loading/unloading children and actual driving tasks. This should be accomplished through classroom, behind-the-wheel and observation time.

Special education drivers need additional specialized training in the areas of the various exceptionalities and special procedures established by the district. Special education transportation aides should also receive this specialized train-

For Free data check 65 on Info card

ing so they have an understanding of the driver's role and responsibility.

Many outstanding driver training programs have been developed in the United States and Canada. I have had the opportunity to observe many of the programs in operation and will highlight a few.

In New Mexico, we have a 40-hour preemployment requirement which includes a minimum of six hours classroom, six hours behind-the-wheel, six hours observations, eight hours American Red Cross First Aid Course, eight hours National Safety Council Defensive Driving Course, and six hours additional behind-the-wheel or classroom, based on the evaluation of the driver.

New Mexico has conducted a one-week Pupil Transportation Institute since 1940. Drivers must attend the institute their first year of driving and then every three years in order to maintain their certification. The institute is held in late July/early August. The state provides funding to the districts for per diem and mileage, registration fees and a salary while the drivers are in attendance at the Institute. In addition, a minimum of eight hours per year must be spent in the local district on in-service training.

Detailed records on each driver's training are a must; these documents become invaluable in the case of a lawsuit or other allegations.

Volusia County, Florida, has an excellent training program for their drivers which includes a behind-the-wheel evaluation of each driver regardless of the number of years a driver has been employed. The behind-the-wheel evaluation instrument is one of the most comprehensive I have seen and gives a good evaluation tool to the district for determination of further training needed.

Safety Road-e-os

School Bus Safety Road-e-os are also an excellent training design that can be used to encourage competition among drivers. The National School Bus Safety Road-e-o booklet, which is printed by the National School Transportation Association, is an excellent resource.

Many training aids can be developed at low cost to the districts. Locally produced training aids are many times actually more effective than commercially produced, since drivers can relate to them. The use of videotapes and 35mm slides produced locally can be of great assistance. Transparencies, flip charts and posters can be developed at low cost to complement the training program. Numerous commercial films and slides are available that can be used effectively, but are more costly to the district. The National Safety Council has several low-cost training aids in the area of pupil transportation.

Driver training is a must regardless of the size of the school district, and it can be accomplished at relatively low cost by qualified instructors. A successful program will bring about a school transportation program that your community has confidence in. Remember, your school bus drivers can be your most visible public relations tool. ○

Loshbough is state transportation director for the New Mexico Department of Education. This article is based upon a presentation he made at ASBO's Las Vegas meeting in September, 1985.

Water so essential to life and yet it can be your worst enemy when you least expect it.

At last a product has been developed to make those unlikely leaks a little less frustrating.

Our Water Diverter protects those valuable areas and equipment from roof leaks until a more permanent solution can be accompanied.

It is our opinion that every building that has a fire extinguisher in case of a fire, or a first aid kit in case of an injury, should have at least one Water Diverter in case of a disastrous roof leak.

It is better to have one and not need it, than to need it and not have it.

Water Falls in the middle of the floor are not considered Fire Protection.

Keep the buckets out of sight - liability claims are there already.

DALLAS COUNTY CHECKS BUS DRIVERS FOR FELONY RECORDS

DALLAS, Jan. 29, (ED-LINE)--Dallas County school officials began an investigation into the records of its 900 school bus drivers after it was revealed that a bus driver, charged last week with molesting a 13-year-old special education student who rode his bus, had four criminal convictions--including two for aggravated rape.

A spokesperson for the county schools agency, which provides bus service for the Dallas school district and five suburban school districts, said immediate termination will result if drivers have committed "any vicious crime, such as rape, incest or molestation, or a crime with a firearm."

A check of county records by THE DALLAS MORNING NEWS indicated that 32 of the 900 bus drivers identified by the county schools agency late last year had at least one felony conviction, ranging from murder and attempted murder to aggravated rape and sex abuse. The study was based on data obtained from the county district clerk's office.

At least nine school bus drivers had one or more convictions for driving while intoxicated, according to the newspaper. The paper said computer records disclosed felony convictions that included two murders, two attempted murders, three aggravated robberies, a sex abuse case, an aggravated rape, 15 thefts, five burglaries and five cases involving delivery of a controlled substance.

The Dallas County schools provide transportation for about 43,000 students in six districts--Dallas, Irving, Coppell, Lancaster, Cedar Hill and DeSoto.

CAMPUS NOTEBOOK: JAN. 29, 1986

* College students at public four-year institutions paid an average of 7 percent more to go to school last fall. Tuition, fees, room and board for undergraduates increased to an average of $4,587 from $4,284 in the fall of 1984. The figures come from a survey by the American Assn. of State Colleges and Universities and the National Assn. of State Universities and Land Grant Colleges. Survey respondents said the increases were necessary because of inflation and inadequate state funding. Texas reported the highest increase in tuition and fees for state residents, rising 57 percent from $446 to $701. Non-state residents' tuition and fees increased 162 percent from the previous year to $3,764. Previously, Texas had the lowest in-state tuition and fee rates of any state. November 14, 1985

MEMORANDUM

TO: Representative Randy Phillips

FROM: Gretchen Kciser
Legislative Analyst

RE: School Bus Driver Training and Bus Safety
Research Request 86-009

You requested this agency to conduct a fifty state survey on school bus safety. Specifically, we were asked to obtain information about the following:

- requirements for a school bus driver license;
- state or local district reqirements for school bus driver training;
- state school bus driver manuals;
- special rules or regulations that school bus drivers are required to observe;
- programs in use regarding school bus safety equipment; and
- pending or proposed legislation concerning the above issues.

Table 1 provides a summary of the responses received from 40 states as well as the current school bus driver and safety practices in Alaska. Typically, state departments of education have general responsibilities for school transportation, while local school districts administer specific policies and practices. A number of states mentioned that they followed the national school transportation guidelines in Standard No. 17 (Pupil Transportation Safety) of the Federal Highway Safety Program Manual. The national standard provides minimum requirements for safe student transportation, including the identification, operation and maintenance of school buses; training of personnel; and administration of pupil transportation programs.

Requirements for School Bus Driver License

All states require school bus drivers to possess either a regular driver's or chauffeur's license. In addition, many require a school bus driver certificate which is issued by a state agency or local school district every one to four years. Written exams which test the driver's knowledge about state laws and regulations governing school buses are common. Behind-the-wheel road tests are also commonly required in order to be licensed to drive a school bus. Alaska requires a regular driver's license as well as written and road tests for prospective school bus drivers.

Most states indicated a minimum age requirement of 18 years. Thirteen of the 41 states for which we have information also place a maximum age limitation--typically 65 or 70 years--on school bus drivers. Alaska requires a minimum age of 19 and has no upper age limit for school bus drivers.

The majority of the states which responded to our survey, including Alaska, require an initial physical examination and periodic examinations thereafter, most commonly every one or two years. States usually provide a fairly extensive medical form to be completed by a licensed physician. States commonly require an assurance of the individual's ability to perform physical activity attendant with normal and emergency school bus operations.

Other requirements for licensing noted during the survey include: a) driving record checks (18 states); b) criminal record checks (10 states); c) required years of driving experience (6 states); d) first aid certificates (4 states); and e) character references (2 states). Alaska school bus driver regulations specify that a prospective school bus driver have a good driving record and at least one year driving experience.

School Bus Driver Training

Pre-service and in-service training programs vary among the states which responded to our survey. Eighteen states indicated that they have a mandatory state instruction program for school bus drivers. On the other hand, 12 states (including Alaska) do not have a state requirement regarding school bus driver training. Those states which do not have a required state training program generally train and certify local instructors and/or approve training developed by local school districts. A few states, including Alaska, rely on local training programs with no mention of state assistance or certification.

The Alaska Department of Education, in conjunction with the Alaska School Bus Driver Training Committee, has drafted a master plan for a statewide driver training program. The department has submitted a $233,000 FY 87 budget request to the governor in order to implement this master plan.[1] Under the draft plan, Alaska would require 40 hours of pre-service training (20 hours classroom and 20 hours behind-the-wheel) an. 0 hours annual in-service training. Of the states surveyed, California and Louisiana are the only states which currently require 40 hours of pre-service training (Florida will require this level of training in 1986). Eight other states surveyed require 20 to 30 hours of pre-service training of school bus drivers. States commonly require annual in-service training, although the amount of annual training varies between 3 and 16 hours.

School Bus Driver Manuals

Twenty-nine states surveyed, including Alaska, have state school bus driver manuals.[2] These manuals vary in format and length, but typically contain information on the following subjects:

- rules and regulations applicable to school bus drivers;
- driver responsibilities to school district and pupils;
- recommended driver practices regarding vehicle maintenance;
- proper operation of bus in typical traffic situations;
- basic first aid; and
- emergency procedures.

The current Alaska School Bus Driver Manual (revised in 1981) addresses all of the above subjects (Attachment A). Alaska's manual, however, is currently under revision and will place greater emphasis on emergency procedures, first aid and the transport of exceptional children.

---

[1]The draft master plan also includes a school bus inspection program developed by the Alaska School Bus Inspection Committee.

[2]Most states provided copies of these school bus driver manuals which are available to you at your request.

Special Rules and Regulations Applicable to School Bus Drivers

The states surveyed generally have a standard set of operating rules and procedures which school bus drivers must observe. These rules and regulations address the following general areas:

- driver's daily pre-trip inspection of bus interior and exterior;
- activation of bus warning lights before stopping the bus to load and unload pupils;
- proper off-road positioning of bus when loading and unloading pupils;
- stopping before railroad crossings;
- maximum speed limits on local and interstate roads;
- leaving driver seat only after setting the brake, turning off the ignition and removing the key;
- pupils seated and not in the stair well while bus is in motion;
- refueling bus when pupils are not present;
- limitations on backing the bus, particularly on school grounds;
- limitations on the number of hours of driving in a 24-hour period;
- wearing driver seat belt;
- no smoking or drinking on the bus; and
- reporting all accidents to school officials.

Chapter 4 of the Alaska School Bus Drivers Manual lists 30 rules and regulations in effect in Alaska (see Attachment A). It should be noted, however, that local school districts may promulgate additional regulations pertinent to local driving conditions.

Safety Equipment Pilot Programs

Eleven states surveyed, including Alaska, indicated that they were experimenting with various safety equipment. The most common equipment under testing (9 states) is the safety sensor--an electronic device which detects the presence of a child or object outside the bus.

Safety sensors are mounted on the front or rear of the bus exterior to monitor bus drivers' "blind spots" (Attachment B). The Alaska Department of Education is sponsoring a safety sensor pilot during the 1985-1986 school year. Thirteen safety sensors were purchased (at a cost of $250 each) and are being installed on school buses throughout the state.[3]

Other safety devices under testing by various states include:

- strobe lights on stop arm signals (replacements for standard flashing red lights);
- retroflective markings on bus exterior;
- strobe lights on top of bus (these are currently required by many states);
- additional exterior mirrors;
- roof escape hatches; and
- automatic tire chains or traction device.

Alaska experimented with strobe lights on stop arms on 17 buses statewide during the period October 1983 through May 1984. A survey of the school bus drivers indicated that the number of passing violations were reduced after installation of the strobe.

Georgia, South Carolina and Tennessee indicated that another safety device--a crossing gate--is required equipment on school buses in their states. The crossing gate (or "walk arm"), which is a metal bar attached to the front of the bus, swings forward to a 90-degree angle, thereby directing pupils away from the front of the bus as they cross. They are designed to eliminate dangerous situations which occur when small children cross directly in front of the bus and outside the driver's view.

Related Legislation

Twelve of the 41 states surveyed mentioned recent and pending legislative action on school bus bills. There are two bills before the Alaska Legislature: Committee Substitute for House Bill 240 (citation for vehicles passing a stopped bus) and House Bill 409 (requiring State-approved training for school bus drivers). Idaho also has a bill before

---

[3]Romayne Kareen, Administrator of Pupil Transportation, Alaska Department of Education, personal communication, November 1, 1985.

its legislature regarding citation of vehicles which pass stopped school buses. Arizona has a pending bill which would update various pupil transportation statutes.

Ohio and West Virginia have legislation pending which would require safety sensors and strobe lights on bus roofs, respectively. A safety-related measure requiring semi-annual school bus inspections will be proposed in the Minnesota legislature.

Five states (Louisiana, Massachusetts, New Hampshire, New Jersey and Vermont) mentioned seat belt bills which are either pending or have recently been defeated in their legislatures.

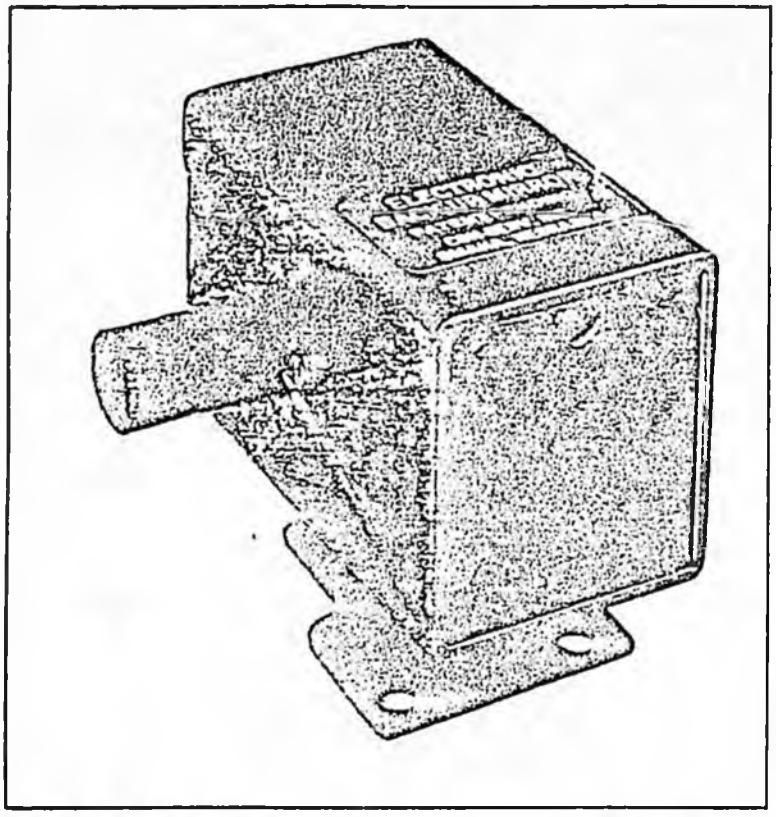
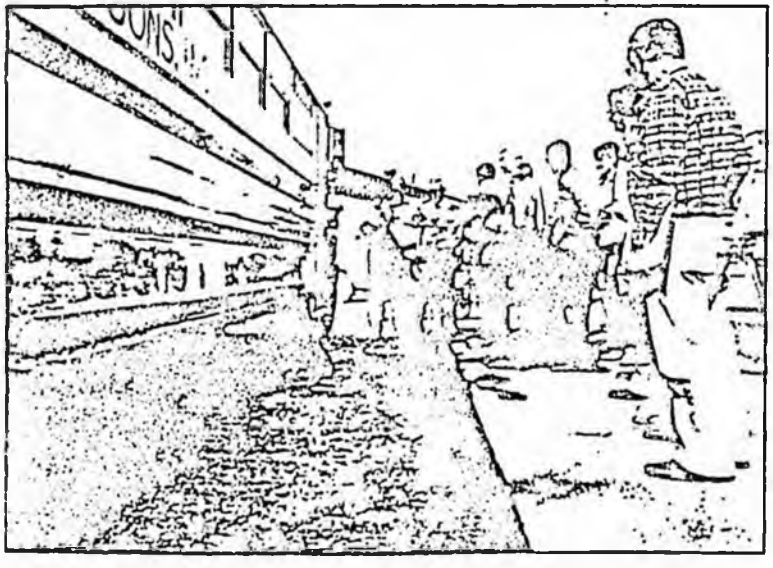
New Product Update

EXHIBIT X..

Con-Serv, Inc.

NEW PRODUCT UPDATE





As the bus moves forward, the Safety Sensor alerts the driver to the boy's presence. The Safety Sensor unit mounted for rear dual tires signals the driver and saves the boy from harm.

Introducing Con-Serv's New Safety Sensor™

Because of everyone's interest in pupil safety, Con-Serv, Inc. has introduced a revolutionary product — the Safety Sensor — a device that eliminates blind spots on any vehicle and is uniquely suited to school buses.

Many school bus operators have nightmares about student safety and property damage claims due to blind spots on a school bus.

For example:

A recent tragedy in the Midwest concerning a student being run over by a school bus sent chills and nausea through the community.

A 200-bus fleet in the Midwest reports $50,000 in property damage for just 14 months.

Extensive testing has proven blind spots can be eliminated. Savings in property damage, downtime, and litigation due to personal injuries more than justify the $225 for this modern radar-operated device.

Even the hazard of the rear dual tires on the entrance and exit side, where reportedly 3 out of 14 fatalities occur, can be eliminated. Tests have shown that this innovative new product can be positioned to give warning of a child near the rear or front of the bus.

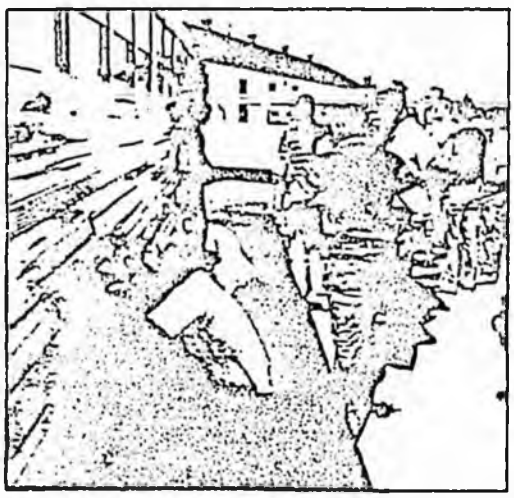
Sovereign Immunity Question Becomes A Growing Concern

Recent actions by courts and legislative bodies have left the issue of "sovereign immunity" in a state of ambiguity. School administrators and elected officials are very uncertain of their liability when entering into litigation. The courts have established precedent where school administrators and board members have been sued because the bus driver is considered an agent of that district.

When it comes to protecting young and handicapped children on school buses, the pivotal question is this: Have you done everything you can with the most up-to-date equipment to keep these children from getting hurt? In legal terminology it is a "state-of-the-art" question. Are you using the best available safety devices? The key to the defense of school boards and administrators is (1) the existence of sound transportation policies, (2) transportation personnel training and (3) use of "state-of-the-art" equipment.

The above is reprinted from "Safety Update/Handicapped Transportation" with the permission of William L. Bainbridge, Ph.D., Director, Public Priority Research Associates, Inc., Columbus, Ohio.

Safety Sensor was designed to eliminate "blind spots. Safety Sensor can reduce the staggering number of accidents that occur when bus drivers are unable to see students around their wheels.



Transportation superintendents at the Nebraska Transportation Conference inspect the Safety Sensor.

What is the Most Common Cause of School Bus Fatalities?

Most school bus fatalities have occurred at the loading and unloading point, rather than in moving accidents. On the average, for the past three years, 53 deaths per year were caused by the driver not seeing small children who stopped for various reasons around the wheels of the bus and were run over.

The above is an excerpt from "Safety Legislation Concerning School Buses", prepared for the 34th Annual Southeastern State Pupil Transportation Conference by the American Transportation Corporation, Conway, Arkansas.

Almost One Fourth of the Country Has Already Approved and/or Purchased the Safety Sensor

Eleven state approvals have been given to Con-Serv's Safety Sensor and numerous cities in each of those states have already placed orders. Units are being shipped to Nebraska, West Virginia, Virginia, Georgia, Florida, Texas, Tennessee, Arkansas, North Carolina, Ohio, and Oklahoma.

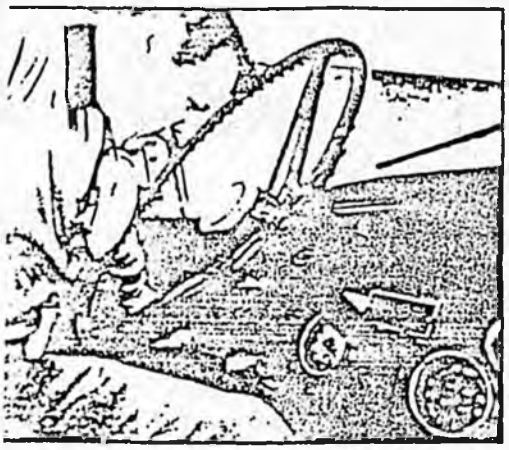
Many other states are now investigating the Safety Sensor's life-and property-protecting features.

Reactions to the Safety Sensor from Various Pupil Transportation Groups

Nebraska: "With a device like this, we should be able to eliminate our pupil fatalities!"

West Virginia: "This product should be mandatory on every school bus in the country."

Florida: "I really like the Safety Sensor and am going to put it on all my buses!



Jim Miner, Con-Serv s Quality Assurance Manager, points out the Safety Sensor's audio alarm and warning light.

Dean Bergman, Nebraska's State Director of School Transportation (center), discusses the Safety Sensor's many advantages with Con-Serv s representative, George Sturmon.

Principle of Operation

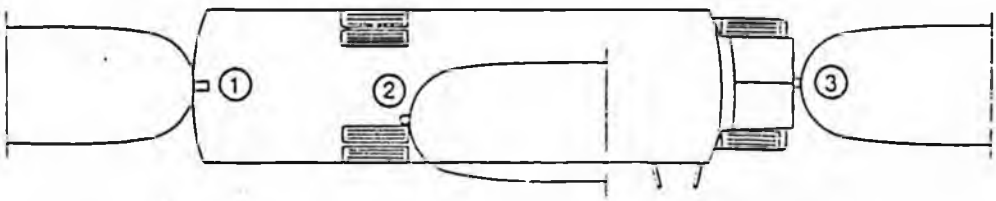
The Safety Sensor is a microwave radar device which uses the doppler shift principle to detect the presence of a moving target within the transceiver range. The unit is totally electronic and is composed of a transceiver, an antenna, an intermediate frequency amplifier and an audio alarm.

The Safety Sensor's transceiver is unaffected by magnetic fields. Its amplifier is designed to interface with any existing switch in order to activate the circuit during a chosen operation of the vehicle. ("Chosen operations" may include opening the bus door, turning on the parking lights, putting the vehicle in reverse, etc.) The amplifier drives the audio alarm and warning lights mounted in the vehicle cab.

Mud, dirt, ice or snow have no effect on the operation of Safety Sensor. Microwave radar penetrates and detects any moving or stationary object.

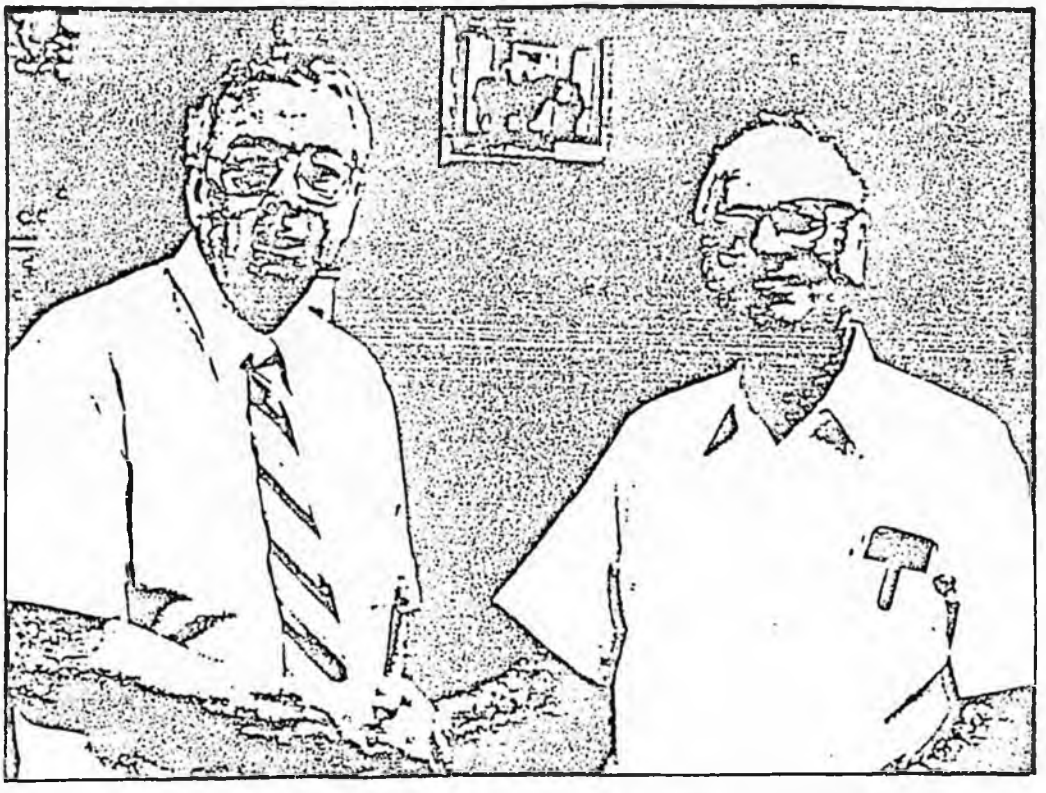
When a vehicle is placed in operation and is moving, the Safety Sensor will detect any stationary or moving object. Upon detection, a buzzer will activate and notify the operator that a hazard exists and and that he should apply his brake.

Placements of the Safety Sensor



The unit is activated when door opens and remains activated to detect any object or human until 10 seconds after door closes. This enables the driver to be warned of any human in the path of the wheels until he is well away from his original stationary position.

1. Safety Sensor placement for reverse travel
2. Safety Sensor placement to protect pupils from rear dual tires
3. Safety Sensor placement to protect small children crossing in front of bus



A. E. "Tony" Dombrowski, President of Con-Serv, Inc., and L. B. Billingsley, President of Billingsley Parts & Equipment, finalize their agreement.

Con-Serv, Inc. has appointed Billingsley Parts & Equipment to be Safety Sensor's national distributor. Safety Sensor is Con-Serv's new life- and property-protecting device, created especially for the school bus after-market.

PREVIOUS ACTION

HB 409: Read the first time on 04/29/85 and referred to TRSP, SA and Rules; no previous committee action to record.

HB 413: Read the first time on 05/01/85 and referred to TRSP, Fin and Rules; no previous committee action to record. Today TRSP reported out with 2DP, 3NR.

ACTION NARRATIVE

TAPE #42 SIDE ONE
Recording
Number 005

Chairman Cato called the meeting to order at 7:19 and noted that there was not yet a

quorum. She started the meeting anyway so that Mayor Tony Knowles, who was under a time constraint, could testify via the Legislative Teleconference Network on HB 413, sponsored by Representative Red Boucher and entitled, "An Act providing for the issuance of general obligation bonds in the amount of $350,000,000 for the purpose of paying the cost of transportation projects; calling for a special election on the question; and providing for an effective date."

Let the record show the following members present: Representative Davis, Representative Pignalberi, and Representative Cato.

Number 015

Mayor Knowles: "Thank you, Representative Cato. Thank you for the opportunity to give testimony on House Bill Number 413. I would like to register with the committee the whole-hearted support of Anchorage in support of the bill sponsored by Representative Boucher and Cotten which would provide for the issuance of $350,000,000 worth of bonds for the transportation projects all across the state. Obviously, I can not speak to the needs of areas other than Anchorage, but I do note that within that bill that the projects listed, most of which are part of the state and federal highway system, are completely supported through a public process in Anchorage that I have never seen the likes of which in a town that is unique in its diversity, this is the one area of consensus, of the greatest consensus that I have seen--particularly in light of the falling revenues, I applaud Representatives Boucher, Cotten, and other supporters of this measure for coming up with a financing package. If there are other packages, obviously that can meet the financial requirements of the state that still require the completion of the projects, that too would be satisfactory to Anchorage. If it's an important enough project, then we are whole-heartedly in support. I can represent numerous public groups that have formally endorsed the specific bill as well as the Anchorage Assembly."

Number 059

Representative Cato: "Thank you, Mayor

indirectly considered as user's fees for the services and roads that Anchorage does provide? Therefore, to me it's still a disproportionate amount concerning the people having to get there. If they don't have any roads in their district to get to Anchorage, then Anchorage is going to have to suffer also."

Mayor Knowles: "Perhaps in response to your question, there is no city in the nation that through its own, that I am aware of, that through its own financial resources pays for the state and federal road system."

Number 482 — Representative Shultz commented that Anchorage isn't the only place which faces rapid growth. He mentioned that several communities in his district have an even higher rate of growth than Anchorage."

Number 494 — Representative Davis thanked the mayor for his comments. Representative Cato also thanked the mayor for his testimony.

Number 505 — Representative Cato then brought before the committee HB 409, sponsored by Representative Jenkins and entitled, "An Act relating to licensing of school bus drivers; and providing for an effective date." She asked Representative Jenkins to testify on his bill, but he deferred his testimony so that people on the teleconference network could testify. Representative Cato then asked Romayn Kareen of the Department of Education to testify on the bill.

Ms. Kareen thanked the committee for hearing the bill and Representative Jenkins for sponsoring HB 409. Ms. Kareen: "Regarding Section 2(b)(6) that requires drivers to complete a state-approved school bus driver training course. The Alaska School Bus Driver Training Committee is formulating the master plan for a state-wide, mandatory school bus driver training program. We hope to have the plan completed by July and ready for implementation fiscal year 87 and we will need an appropriation to complete that project and implement the master plan. I just want to know that the work was in process regarding the driver training program."

Number 544

Representative Cato then asked Saundra Hutchins of Mat-Su to testify.

Ms. Hutchins: "I am the Pupil Transportation Coordinator for the Mat-Su school district and I am here to offer testimony on behalf of the Alaska Association for Pupil Transportation which is the district administrator's association and the Alaska School Bus Safety Week Committee which is sponsored by the Department of Education representing school districts and contractors.

"...We support the specifics of the bill. Looking at section 28.15.046(b) and looking down at number (4) and number (5) together. We very much support the criminal and background check both nationally and a state check back through the years. We feel that we have a responsibility to our parents and to our community to hire people who drive school bus drivers that have a good moral background. We feel we have a responsibility to make sure that they are trained properly and competent and able to do the job. We are concerned about individuals who do have a background that is not suitable for contact with children and looking down at section (c), in the same section, and looking at items (1), (2), (3), (4), (5), and (6) and (7) which are interconnected with numbers (4) and (5). We feel that it is very important that we don't have people who don't have this kind of background.

"There are some specific problems with (4) and (5) which are more procedural than in concept. The bill, as I understand it, indicates that we would have, that we would not be able to license and use an individual to drive a school bus until the national and the two-year state background check is complete. In talking with Bill Brown in Juneau in the Department of Public Safety and with Mr. Dave Garrison who is the aide for Representative Jenkins, we understand that that national background check could take as much as seven weeks. Also, that the state two-year check could take the same length of time and certainly up to a month. If this were true and if we were not allowed to license or use an individual to drive a

school bus until that criminal check has been completed, we would, by necessity, have to begin the hiring process and the licensing process as early as the month of June and possibly the end of June in order to have individuals to drive in the last week of August which is when many of our school districts open.

"Procedurally, that is not possible. The school bus drivers support themselves in the summer by other jobs. Many of them fish. The day after the last day of school, most of them are gone. If we were to have to fall into the way the bill is now written, we might even have to put together and give a screen in the month of May when we still have these people aboard just to get the screen process done.

"What we would like to suggest is that the provision be made similar to that which worked for the present law relating to teachers. Is that they are certified by the state and they may be hired by the district pending a background check, a criminal background check which is very similar to what is being suggested here. We would like to suggest is that we be allowed to licensed and to use these people pending the criminal background check which would make it, procedurally, we would be able to handle. Otherwise, it is not unlikely that we would end up on the first day without everybody that we needed in those buses. We don't want people driving a bus who have this kind of a background. But, procedurally, I am not sure that it will for us as it is presently written. There is strong feeling among school district people and the contractors that procedurally this won't work as it is presently written.

"I'd like to move to section, let me see, the same section. Go down to number (d). And this has to do with not licensing an individual who has been convicted of DWI and within two years and not licensing him at all if he has had two or more within twenty years. I very strongly support this provision. It is a source of problem now. We often do not know when an individual has been convicted of a DWI. We may have a bus driver out there there who has gotten a DWI

ticket in a private vehicle and we can find out--we have a chance generally. Very strongly support this provision. There needs to be some method to ensure, procedurally, that we will know when these things will occur. We have the same problem with (4) and (5). There needs to be some procedure to assure that school districts will know when an individual does have a DWI because otherwise, the individual is not going to tell us. We have that problem now. We have people who do get DWI and you just, sometimes you find about it and you then you are able to act. Very strong support for number (d).

"We very much support number (6) going back. This particular provision has to do with a mandated school bus driver training course. The Department of Education over the last year has been working with a large committee which represents a cross-section of a school district administrators and contractors to develop a standardized school bus training program. The hope is that it will be mandated as a minimum guide for all districts. That plan is not developed--as I understand it, it is in the final draft and will be ready for the review process with district and administrators and with the Department of Education. It then must be approved by the state school board. We very much support that kind of training program. The problem with it here with this particular bill is that it is not ready. The other problem is that this bill would be effective in 1985. The driver training program is not in place and has not been reviewed. There's no fiscal note for it. And there will be some cause to get it started. We think that it is a very necessary thing to have a mandated program. If there is some way of keeping this provision in the bill and not allowing for a later date for implementation, we would very much support that. We support a mandated driver training program. We need to standardize a program across the state and we need to set the minimums and some very good work has been taking place in that area...This bill does not state who would be responsible for developing that driver program. This particular bill comes under Public Safety and I don't know if that

necessarily means that the Department of Public Safety would then be responsible for a driver training program for school bus drivers. That may not be true. We would like to see the Department of Education charged with that responsibility because they are closer to this area than is the Department of Public Safety."

Number 651

Representative Cato: "In the position paper, you might be interested in this fact: we have considered deleting that number (6) from Robert Sundberg it says in regard to AS 28.15.046(b)(6)--this will require the state to have an approved school bus driver training course. The Department of Education is currently working on a master plan to include, so they are well aware of what you're doing. It does not appear that it will be complete by the effective date of this bill. Without such a program, no school bus driver permits could be issued. Each contractor presently has a training board program; however, they are not state approved. What was the completion date that you thought perhaps that if things went well, that you would be able to have the plan in place for a state-approved driver's training school?"

Ms. Hutchins: "Looking at the status and talking with Ms. Kareen, that probably they will have that in place as even as the fall. However, there's no fiscal note for it yet. So that would mean, at least a year before it could be implemented."

Ms. Kareen: "There will be an appropriation required for implementation for this driver training program to get it coordinated, to get the materials to sell it, to conduct work shops for instructors to go back to the respective areas and to train the school bus drivers, to conduct workshops for school districts, and we will have to develop a local plan for their own area for the required school bus driver training needs in their respective areas. So it will take at least a year to get it off the ground in an appropriation required for that. If we had monies in our FY 87 budget, we could begin working July 1, 1986 and could have the workshops conducted etcetera I would think by June 30, 1987."

Number 680

Representative Cato thanked the teleconference participants for their contribution. Ms. Hutchins thanked Representative Jenkins for sponsoring the bill.

Representative Cato then called to the table Bill Brown of the Department of Public Safety, Division of Motor Vehicles.

Mr. Brown: "This basically does two things as far as changing from the present system. We do a background check at this time; however, it's strictly of Alaska arrests. We, therefore, find out of an arrest in another state only if that person has been arrested up here also and therefore the record from the other state has been forwarded to Alaska. The two changes is, number 1, it requires the check to be made before the license is issued and, number 2, it requires..._a national check_."

CHANGE TAPE #42 TO SIDE TWO

Number 003

Mr. Brown described the current system of criminal checks and the issuance of school bus driver permits. Discussion then ensued on this topic.

Mr. Brown: "There's a couple concerns. One of them, I just hit on today: on subsection (e) on page three, on lines 12-14 where it refers to 'listed under (c) of this section,' it should also include, "under (c) or (d) of this section' if (d) is not added there. You can only count DWI's within Alaska. If (d) is added to that subsection (e), we could also count DWI's that occur in another in another state because (d) is very specific. It refers to DWI under an Alaska statute. Possibly, the statute section would not have to appear on lines 7 of page 3 and just refer to convictions of driving while intoxicated."

"...Another concern, of course, that we have is in regards to and it was expressed by Ms. Hutchins is is the time period that it takes to get a result of a fingerprint search--possibly, is something that the department would have to work on. In our position paper we indicated that it would be a three week lag. In my opinion, that's a minimum

at this specific time. It's the mail process that's the delay and not the computer process in Anchorage."

Number 069

Representative Pignalberi expressed his concern of how this bill affects school bus drivers and the contractors. Representative Cato expressed her belief that the bill does not go far enough and that it should apply to janitors and other people who are around school children. She asked Representative Jenkins if he could work on this bill during interim so that it would encompass this issue. Representative Jenkins did not object to this and said that he would work on this during interim. Representative Cato announced, then, that HB 409 would be held in committee.

Number 241

Representative Pignalberi moved to pass out of committee HB 413, "An Act providing for the issuance of general obligation bonds in the amount of $350,000,000 for the purpose of paying the cost of transportation projects; calling for a special election on the question; and providing for an effective date." Representative Cato repeated his motion and asked if there were any objections. Being none, so ordered.

Representative Cato asked if there was further business to be brought before the committee. Being none, she adjourned the meeting at 8:11.

PREVIOUS ACTION

ACTION NARRATIVE

TAPE ONE SIDE ONE
Number 000

The House Transportation Committee was called to order by Rep. Cato at 7:04 with the following members present: Rep. Shultz, Rep. Herrmann, Rep. Furnace.

Rep. Cato addressed HB 409 and reminded the committee to review the minutes from 05/09/86 when the bill was first heard and introduced Rep. Jenkins, the sponsor.

Number 040

Rep. Marrou joined the committee.

Rep. Jenkins testified that HB 409 would set minimum requirements for school bus drivers and puts the State Department of Public Safety regulations into law as well as add the following:

(1) Applicants must complete a state approved school bus driver training course.
(2) Applicants must supply the Department of Public Safety with sufficient information to complete national criminal records checks.
(3) The applicant must successfully complete a background check within the state or states which he or she has resided for at least the past 2 years.
(4) The applicant must not have been convicted of a felony or misdemeanor involving distribution of a controlled or imitation controlled substance.
(5) The applicant must not have been convicted of a felony or misdemeanor involving distribution of a controlled or imitation controlled substance.
(6) The applicant must not have been convicted of driving while intoxicated within two years or must not have been convicted of multiple DWI's.
(7) The applicant must bare the cost of background checks.

Rep. Pignalberi joined the Committee.

Rep. Jenkins reviewed a fiscal note and the sectional analysis from Legal Services.

Number 183

Rep. Cato suggested that Sec. 28.15.046 section b, number 6, be deleted by mutual consent of all members present due to a lack of an educational program at present.

Rep. Jenkins agreed.

Rep. Marrou questioned whether there are presently any problems which this bill is based upon.

Rep. Jenkins said he knows of 2 major accidents in the Eagle River area.

Rep. Marrou questioned whether those accidents would have been prevented by this bill.

Rep. Jenkins said he thinks so.

Rep. Marrou questioned whether such a small fiscal note is accurate. He also refuted having 20 years for the lenghth of time which persons with various criminal records can receive a license.

Rep. Jenkins said the numbers in the bill all came from the current Public Safety Regulations.

Number 302

Rep. Pignalberi said the title is too narrow for the scope of the bill since it applies to all commercial vehicles and compared it to HB 133 which passed into law last year.

Rep. Jenkins said the major difference between the bills is that HB 409 specifies age 19 rather than 21.

Rep. Pignalberi asked about the applicant's cost of obtaining a background check and asked if teachers are required to have a background check as well.

Rep. Jenkins said that other witnesses present were more informed this information.

Number 372

Bill Brown of Division of Motor Vehicles approached the committee and answered questions that the committee had previously asked. He specifically addressed the serverity of the 20 years penalty for two or more DWI's or other criminal offenses.

Number 441

Rep. Cato inquired into the difference between last year's and the more recent fiscal note.

Bill Brown said the first one was based on pure estimation because they did not have a database when devised and the newer note is based on actual numbers which have been tallied since the first note was written.

Number 453

Rep. Shultz asked, "Have you run this by the school bus contractors...how would a contractor that lives at Grizzly Lake, for example, have a training program?"

Bill Brown replied that he assumed the training program details would be handled by the Department of Education.

Rep. Shultz asked if the applicants did have to go to Anchorage for the training program, who would pay.

Bill Brown said he would like the Dept. of Education to answer that. He said he did not get input from any of the contractors.

Rep. Schultz said the committee should solicit input on this legislation from the bus contractors.

Number 492

Rep. Marrou stated that he objects to the fiscal notes because they seem arbitrarily constrewed.

Bill Brown said the purpose of the fiscal note is to cover the background check because the Dept. of Public Safety will have to write checks in their name to the F.B.I. and applicants will write their $12 check to the department: in effect, the fiscal note would just finance these transactions.

Rep. Marrou said this bill would not cost Alaska any money and therefore should not have a fiscal note.

Number 534

Rep. Pignalberi inquired as to the cost to the applicant.

Bill Brown said the applicants would need to pay the $12 plus an annual $2 school bus license which they are already paying at present.

Rep. Pignalberi asked for a reiteration on the time-lapse problem in procuring a background check.

Bill Brown said if the person has stayed in Alaska for the last 2 years, the search should only take 2 to 3 weeks but if the person resided out of the state within the last 2 years, the search has to be made south and it takes 6 or 7 weeks to get results. Additionally, it takes another week for the Dept. of Public Safety to process the application.

Rep. Pignalberi asked, "Do you have the authority to give them an interim license and let them work pending completion of the background check?"

Bill Brown told the committee they would have to amend this bill to allow that.

Number 572

Rep. Cato asked the committee and sponsor to consider an amendment that would allow the Department of Public Safety to issue temporary licenses until the background check has been completed.

Rep. Furnace objected to the temporary license amendment because he feels 3 weeks is reasonable time for an Alaskan to wait and 2 months is reasonable for a nonresident.

Rep. Marrou agreed with Rep. Furnace.

Rep. Cato asked if there is a motion to amend.

Rep. Pignalberi asked if the committee could work on the bill after the meeting.

Rep. Cato said the committee does not have to pass the bill today.

Number 606

Rep. Pignalberi declared a possible conflict of interest because he provides consulting services to a company that bids and does not now have bus contracts in the municipality of Anchorage.

Rep. Cato said that she thought the relationship was too remote.

Number 610

Sandra Hutchinson introduced herself and voiced her support for HB 409 and specified, "On page two of HB 409, line 5, ...talking about a clarification if the one year period is for licensing... We would support a clarification that specifies that the applicant for school bus license must have been licensed as an Alaskan driver for the one year immediately proceeding....

"On line number 9 and looking at number 4 and number 5 together, we're talking again about the background check: the national background check, the state of Alaska background check and the out-of-state check. This area is a real concern both to the contractors and to the school districts. It has been a concern and a problem for some time. The problem is that you get drivers who have a criminal, even a criminal action in process, you don't know about it or they've had previous criminal actions and convictions and you don't know about it. They could pick

up DWI's and you don't know about it. It has created problems in both the district operations and the contractor operations and particularly in the high growth areas. We support a background check: national, state and out-of-state, we think it's very important. The problem is with the timing and we would like to see the out-of-state background check moved up to number 4 to fall into the same provisions as the national background check. We read the bill to indicate that you must have successfully completed a state background check, an out-of-state background check, and apply for the national background check to be issued a pending lisense until the national background check has cleared. What we'd like to do is move the out-of-state background check to the same provision as the national because of the time frames. It is extremely long. The people who are being licensed as school bus drivers, maybe half of them are from other states. The real problem would be that many of the contractors would not be able to staff school buses with drivers in time, unless you start licensing in June. And because school bus driving is a seasonable work, they work during the winter, they drive school bus and when May comes you have an exodus. They're finding summer work to supplement their winter work. School bus driving is part-time, it does not provide full-time employment and therefore these people often work in the summer. So starting in June to do your training and background check is a real problem. We would like to request consideration of moving the requirement for the out-of-state background check to the same provision as the national background check which will give us a little more time.

"Number 6 is one of the most critical parts of this bill as (indiscernable) ask for reconsideration of your amendment. I have been with the school district ten years. I have been chairman of the state committee and the association for three. I've been in pupil transportation all of that time. I cannot remember a time when school bus driver training has not been an issue both to the contractors and the districts and we are not separated on this issue. We need a uniform mandatory training program. Training in the districts starts at little to nothing to expensive programs. Depending on what districts require or how well they monitor their programs of the contractors. The districts get the kind of program based on what they ask for and how well they make sure it happens. We do not have a uniform program. We do not have a mandatory program. At least two years ago, the Department of Education appointed a committee of districts and contractors to sit down and develop a uniform mandatory program that would work for small districts and large districts. At the time this bill came up, it was not complete. It has been completed over the summer. The department of Education did provide in their budget to

implement the program. It was sent to the Governor and it was cut in the Governor's office. Along with that program, was a school bus inspection program. It was a combination program where they utilized the same personnel to save money. So we lost the funding for both programs. At least two years ago the state also appointed an inspection committee to address the school bus inspection problems. Also again a committee of school district and contractors. The conference committee substitute bill 133, did not address school bus safety problems. We need a mandatory program for school bus training that program has been developed it is being prepared in final draft for the state school board.

"I would like to refer you now for the specifics of that program to Romayne Kareen who is here as the Transportation Officer for the state. It has full support and participation of contractors and school districts over a two year period. The program provides for training of an instructor from each of the districts or from each of the contractors. It provides for the basic minimums of a program. The school district and the contractor then have the option to put together a program that fits their district, meeting the basic minimums. They do that on site, they don't have to go to Anchorage. The program provided for an instructor that would go to their district and to the contractor to prepare, to train for them their own instructor, someone qualified in their own district to carry on from year to year. The fiscal note that was attached to that program was very small."

SIDE TWO
Number 000

Rep. Cato asked if the committee did not delete section 6, if there would be time in the hiring of bus drivers for them to have already had the training course prior to being hired.

Sandra Hutchinson replied that the program provides for phasing in and it only applies to new contracts.
She said, "...We really would suggest that number 6 be amended to designate the Dept. of Education as the agency to develop and implement and to monitor a mandatory driver training program, that there be a fiscal note attached, and that the provisions of the training program provide for new training for new people and for a much lesser refresher course for incoming drivers. There is time to put that in effect even for districts that do not have ongoing contracts however the program would apply as far as a mandatory program to districts with new contracts because it needs to be included in that contract that you would give your contractor. Otherwise it's something that your ongoing contractor would not be required to fill because

there is a cost to the district and to the contractor and there is a gearing up for it so there is a phase in of that situation. You don't go out and suddenly require everybody to do it because everybody's not prepared. But in a period of time and most of the contracts turn over in a five year period and we're not all on the same schedule, every year there's a few contracts. I think we had nine contracts come up this year. So there's a phase-over, in a period of five years everybody would be on it."

Rep. Pignalberi asked Sandra Hutchins if it would be acceptable to her if the committee reinstated a provision like section 6 but which would approve private driver training programs rather than create a "little bureaucracy in that department to establish and administer a driver training program."

Sandra Hutchins replied, "I think under the present program this could be done because the state would simply set the minimums and then the district submits their own program from the contractor. The contractor actually has his own program. He submits it to the district for approval and it goes to the state. So that would not preclude a private (indiscernable)."

Number 087

Rep. Marrou agreed with Rep. Pignalberi. He said that she made a "good case" for setting up private driving schools or the Mat-Su school district seting up a driving school. He noted that none of the other school districts in the state were present.

Sandra Hutchins said she was not representing Mat-Su. She said this issue has been researched and is the development of several district's work. She said the problem is that many districts do not require training and half the fatality statistics for students are caused by the driver which directly relates to training. She included, "The recommendations from the National Traffic Safety Administration to the National Highway Traffic Association, that agency which promulgates the rules for safety regarding school buses, was that rather than seat belts, money needs to be spent on driver training that provides for proper training of the drivers when transporting students because that's where the problems are. What we have is little or no training to considerable amounts of training and some of the districts like mine require it. We monitor it and we make sure the training happens, it's not happening: and that's the issue.

Number 130

She continued, "In response to the question of the bureaucracy:... in a sense, it all is. We're simply moving it from one state agency to another which we feel more appropriately is assigned.

Number

Rep. Pignalberi asked if there was a way to shift the emphasis away from state government.

Sandra Hutchins replied, "I think if you look at the program you'll see that the only thing that the state government will be doing here is (1) to require the mandatory program and to issue the basic minimums, (2) approve those programs (which are) set up by districts through your contractor that it does meet the basic minimums and (3) to provide a trainer to train those areas where they do not have access to the facilities and to the expertise.."

Number 170

Rep. Davis joined the committee.

Rep. Shultz asked how many times fatalities have occured in the state in the last decade.

Sandra Hutchins said once last year to her knowledge and referred him to Romayne Kareen. She said that statewide half of fatalities are caused by the driver, the other half are caused by motorists who pass when buses stop.

Rep. Shultz asked how Alaska compared to the rest of the states statistically with accidents and fatalities.

Sandra Hutchins replied that she believed it was a good record but again referred him to Romayne Kareen.

Number 205

Rep. Schultz asked if she could credit the good safety record to the concientious and concerned contractors.

Sandra Hutchinson agreed and said the reason that we don't have more children killed by the bus drivers is because we do have some training programs.

Rep. Marrou said he agrees with Rep. Shultz. He said that since school bus driving is essentially run on a district or private enterprise level, it is logical to keep it that way.

Rep. Cato explained that the school districts are funded by the state in full.

Rep. Herrman inquired if indeed all of the contractors support school bus training.

Sandra Hutchins said that contractors did and testified this last spring.

Rep. Davis asked for information specifying which districts currently don't train. He expressed concern for backup drivers having training and licensing in the case of absenses.

Sandra Hutchins replied that she didn't have that information with her. She also said that the contractors always have backup drivers available who go through licensing and full training.

Number 356

Rep. Cato instructed the committee staff to work with Rep. Jenkin's staff and bring this bill up the following week. She introduced Romayne Kareen.

Romayne Kareen responded to previous questions:

To Rep. Shultz she said there have been three fatalities in Alaska in the last three years involving school buses.

To Rep. Pignalberi she said that school bus drivers contract for lengths which vary from 3 to 5 years.

To Rep. Marrou and Rep. Pignalberi, regarding private enterprise, she said it wasn't the intent of the department's request for an appropriation to establish a bureaucracy and the department could contract with private industry to work closely with the department.

Number 405

Rep. Pignalberi asked how many employees are presently in the school district transportation administrator's office. He also asked if there is presently a standard for driver's training.

Romayne Kareen replied that she is the only one in that office and that there is only a federal standard, standard 17 that highly recommends 40 hours of training. However, the state of Alaska has not adopted standard 17. She added that at this point they have a "master plan" for a required program but they are not financially "geared up" to implement this plan.

Rep. Pignalberi asked that if section 6 were passed in some form, if the school districts would be left on there own to

work out the mechanics of a problem, either through a contractor or through their own means.

Romayne Kareen agreed and said that the program would begin in the development phase in July 1, 1986, pending an appropriation, and the implementation would begin July 1, 1987.

Rep. Pignalberi was concerned that the program budget impact would be larger than fiscal note showed. He suggested putting legislative intent language in the bill to ask the Department of Education "to go as far as they can with the master plan and come in for funding next year."

Number 454

Romayne Kareen listed the fiscal note figures and what they included. The fiscal note would be delivered to the committee legislators later in the day.

Rep. Cato asked Rep. Pignalberi to work with the sponsor and the Department of Education and Sandra Hutchins to change the bill so it can be scheduled next week.

Romayne Kareen said at that time she would bring some contractors to testify at that time.

Number 608

Rep. Cato adjourned the meeting at 8:20.

HOUSE TRANSPORTATION COMMITTEE

PREVIOUS ACTION:

HB 409:	DATE	PAGE	ACTION
	04/29/85 (H)	1159	READ THE FIRST TIME WITH REFERRAL(S)

ACTION NARRATIVE

TAPE ONE SIDE ONE

(A mix up with the tape begins the recording at 056. Numbers 000 to 056 are the completion of the meeting, which were actually taped over the beginning in error.)

Rep. Cato called the meeting to order at 7:00 a.m. with Rep. Marrou, Rep. Shultz, Rep. Furnace, Rep. Herrmann present.

Rep. Cato suggested that a motion be made to adopt the CS.

Number 056

Rep. Marrou objected to the adoption of the CS based on his

understanding that the fiscal note in committee does not apply to the CS and in his opinion, a driver training is not needed.

All present voted to adopt the CS except Rep. Marrou.

Rep. Cato described the four changes the CS has brought to HB 409:

(1) A section has been added to allow the Department of Education to develop, implement and monitor a mandatory driver training program.

(2) The out-of-state criminal check has been added to the section which covers that national background check in order to allow the Department of Safety to issue a temporary license pending investigation of the national and out-of-state check.

(3) A technical amendment was needed to include "driving while intoxicated" for purposed of determining whether an applicant has been convicted of an offense of this section.

(4) The effective date was changed to September 1, 1987, as the Department of Education would begin the development phase of the training course in July 1, 1986 pending an appropriation and would be implementing this program in 1987.

Rep. Davis joined the committee at 7:07.

Rep. Davis moved that the committee delete the words "and 5" from page 3, line 19.

There were no objections to that motion.

Number 134

Rep. Jenkins, the sponsor, spoke generally on behalf of the bill and the recent committee substitute of the bill.

Bob Shefchik testified from Fairbanks in favor of the bill.

Loretta Nistler testified from Delta Junction in favor of the bill.

Rep. Davis voiced his concern for the impact of this bill on smaller school districts.

Number 287

Lola May Field testified from Soldotna in favor of the bill.

Number 317

Don Swain testified from Fairbanks in favor of the bill.

Rep. Davis said that he would telecopy the CS to Fairbanks for Don Swain to look at.

Bill Brown clarified the subject of background checks for Don Swain.

Rep. Herrmann asked how far the $104,000 in the fiscal note would go.

Tom Hyatt testified from Anchorage in favor of the bill.

Number 445

Steve Kalmes testified from Anchorage in favor of the bill.

Rep. Davis asked how much an average school bus driver earns.

Steve Kalmes said between $8 and $12 per hour.

Rep. Davis asked if there is a particularly high turnover due to the pay.

Steve Kalmes said he saw more of a problem with the time lapses due to background checks and training.

TAPE ONE SIDE TWO

Number 000

Rep. Cato explained to Steve Kalmes that the CS would take care of his concern by providing for temporary licensing.

Rep. Davis requested Legislative Information to telecopy Steve Kalmes a copy of the CS.

Rep. Herrmann asked Mr. Hyatt if all the school bus contractors in the state are members of his organization.

Tom Hyatt said most of them are.

Number 062

Romayne Kareen testified in favor of the bill and volunteered to answer questions.

Rep. Davis asked if the fiscal note applied with the CS as it did the original bill.

Romayne said the driver training portion of the bill hasn't changed and the Department of Education's note was still accurate.

Rep. Davis asked where the temporary license costs would be counted.

Number 118

Rep. Furnace asked if the committee should view the two most recent fiscal notes to get the whole fiscal impact: one from Dept. of Public Safety and the most recent from Dept. of Education.

Romayne Kareen clarified that the Public Safety fiscal note balance was zero.

Number 142

Rep. Marrou said the fiscal note from the Dept. of Education is obsolete and does not apply to the CS.

Romayne Kareen restated that the same program has been brought forth to the CS and, therefore, the same fiscal note applies.

Rep. Marrou said the CS establishes a school bus driver training course but the original bill specifies a "state approved" training course.

Rep. Davis expressed his interpretation of the bill.

Number 215

Rep. Cato said she agreed with Rep. Davis.

Rep. Herrmann asked Romayne Kareen for clarification on contractor requirements pertaining to this bill.

Number 278

Rep. Shultz asked Bill Brown if the Division of Motor Vehicles could include in their regulations the temporary licensing procedure.

Rep. Cato said the committee will request a written commitment from the Dept. of Public Safety that they will adopt a temporary licensing procedure.

Romayne Kareen asked why the bill referenced the Dept. of Public Safety rather than the Dept. of Education.

Ronda Cargill clarified that the Dept. of Education is to oversee and coordinate the Dept. of Public Safety's shared role in regard to the bill's program.

Number 349

Rep. Marrou voiced his opposition to the "excessive" times stipulated in HB 409 and CS HB 409 in regard to DWI's and child molesters.

Rep. Marrou moved that the 20 years be changed to 10 on page 2, line 22 1/2, and on page 3, line 11 1/2, change 20 years to 5 years.

Rep. Davis objected to the motion.

Rep. Jenkins added that he derived these numbers for years from the Division of Motor Vehicle regulations.

Number 425

Rep. Shultz requested that the motion be divided into two parts.

Rep. Marrou restated the motion: page 2, line 22 1/2, change 20 years to 10 years.

Rep. Davis, Rep. Furnace, Rep. Herrmann and Rep. Cato objected to the motion. Rep. Marrou and Rep. Shultz voted yes. The motion was denied.

Rep. Marrou moved that page 3, line 11 1/2, change 20 years to five years.

Bill Brown clarified, " The current regulation in regards to the second DWI is permanent (license forfeiture) for school bus drivers".

Rep. Shultz said, "twenty years is about as close to permanent as you can get".

Every representative voted no on the second motion except Rep. Marrou.

Rep. Shultz moved that page 3, line 11 1/2, be changed from 20 years to 10 years.

This amendment was passed by Rep. Cato, Rep. Shultz, Rep. Herrmann, and Rep. Davis voting yes.

Rep. Shultz moved that CS 409 with the amendment be moved out of committee with individual recommendations.

ACTION NARRATIVE

TAPE 72 SIDE ONE
Number 000

The House State Affairs Committee meeting was called to order at 3:00 p.m. Members present were Rep. Hurley, Chair, and Reps. Cato, Collins, and Jenkins.

Number 015

Chair Hurley brought CSHB 409 (Transportation) before the committee for consideration.

Number 020

Rep. Jenkins, sponsor of the bill, thanked Chair Hurley for her prompt scheduling of the bill and stated that it has had three hearings in House Transportation Committee resulting in a good committee substitute.

Rep. Jenkins said that the legislation takes existing Alaska State Department of Public Safety regulations and implements them into statute and adds provisions for a bus driver training course, national criminal records check, and state background check. In addition, CSHB 409 states that individuals cannot be licensed if they have been convicted of certain felonies and misdemeanors.

Rep. Jenkins concluded by stating that the bill has wide support from school districts and school bus contractors.

Number 225

Rep. Cato stated that the bill received close scrutiny in the Transportation Committee and she feels it is a good bill.

Number 236

Chair Hurley announced that Bill Brown from the Department of Public Safety and Romayne Kareen from the Department of Education were available to answer questions if needed.

Number 260

Rep. Cato moved that CSHB 409 (Transportation) be passed out of committee with individual recommendations. There being no objections, the motion carried.

Number 323

Chair Hurley brought before the committee the subject of proposed campaign finance legislation. She stated that Theda Pittman, Director of the Alaska Public Offices Commission, was connected by teleconference to offer comments and answer questions should the need arise during discussion.

Chair Hurley said that it was not the committee's intent to take a negative stand on the Senate's legislation. In addition, she stated that the committee has a very rough draft before them to consider and discuss some policy decisions.

Number 358

Senator Bill Ray relayed information from the Senate State Affairs Committee. He stated that the committee had met today with the Attorney General and the Committee's legal counsel. A disagreement over several points involving penalties and enforcement resulted in a meeting being scheduled to work on a compromise.

Number 406

Chair Hurley thanked Senator Ray for his comments and asked him to tell Senator Abood that the House State Affairs Committee has no desire to compete with the Senate's legislation and is only considering a working draft to speed up the process due to the shortness of the session.

Number 445

The committee discussed contribution limits for political action groups.

Number 681

Rep. Boucher asked the chair if it would be possible to obtain information on the increased cost of campaigns.

Number 703

Ms. Pittman reported that her office had figures on campaign expenses and that in 1972 it cost $331.00 to

purchase what now costs $1,000. In addition she gave comparative figures for the average cost of running for the House and Senate in 1976 and 1982.

Number 832

Chair Hurley asked Ms. Pittman's opinion of SB 356, Sec. 15.14.350 regarding confidentiality of investigations.

Number 850

Ms. Pittman responded that she feels that the language overlooks what generally happens when an individual files a complaint. She stated that it is difficult to maintain confidentiality when the person filing the complaint often takes the matter to the press at the same time that they file with her office.

TAPE 72 SIDE TWO
Number 120

Chair Hurley stated that the committee will follow up on this issue and determine if language can be drafted which would address this concern.

Number 138

The committee discussed the reporting of expenditures.

Number 312

Chair Hurley stated that the committee will not consider the sections on violations and enforcement until the Senate has held their meeting to discuss these issues.

Number 489

Ms. Pittman announced that the next meeting of the Alaska Public Offices Commission is scheduled for February 27 and 28, 1986 in Anchorage.

Number 497

Chair Hurley thanked Ms. Pittman for her participation and stated that the committee would continue to work on various aspects of campaign finance legislation but postpone further discussion until the Senate State Affairs Committee has made some decisions regarding their bill.

Number 526

The meeting was adjourned at 4:15 p.m.

HOUSE FINANCE COMMITTEE
February 28, 1986
1:30 p.m.

(Tape HFC 86-19, Side 1, #000-end)

CALL TO ORDER

Chairman Adams called the meeting of the House Finance Committee to order at 1:30 p.m.

PRESENT

All members of the Committee were present except Representatives Duncan, Ringstad and Uehling. ALSO PRESENT: Representative Jenkins; Commissioner Nordale, Department of Revenue; Bruce Botelho, Deputy Commissioner, Taxation, Department of Revenue; Dorothy Jones, Mayor, Mat-Su Borough; Robert Van Hook, Tax Counsel, SOHIO Alaska Petroleum Company; and Jim Palmer, Associate Director, Government Affairs, SOHIO Alaska Petroleum Company.

SUMMARY INFORMATION

HB 409 An Act relating to licensing of school bus drivers; and providing for an effective date.

Transportation Committee Substitute reported out of committee with a "do pass" recommendation and two zero fiscal notes.

HB 502 An Act relating to disclosure of state tax assessments of the Department of Revenue.

Bill HELD in committee. Scheduled for further hearing on Monday, March 2.

HB 409

HB 409 - An Act relating to licensing of school bus drivers; and providing for an effective date.

Chairman Adams informed members the bill would require the Department of Education to train school bus drivers. He said the Department had been in the process of gearing up for this training for some time and the bill would also require school bus drivers to be licensed. Chairman Adams said in order to get a license a person would have to submit to a fingerprint check, which the applicant must pay for, and a person convicted of various felonies would be prohibited from getting a school bus driver's license. According to Chairman Adams, Department of Education had requested over $100,000 to train bus drivers, and even though the bill would not go into effect until the 1987 school year, they wished to start training this coming fiscal

year. At the suggestion of Representative Larson, Education Subcommittee Chairman, a zero fiscal note was prepared by Chairman Adams. He indicated that intent language would be added in the Department's budget to require the department to pay for the training with part of the $24 million they are requesting for pupil transportation.

REPRESENTATIVE JENKINS, SPONSOR OF THE BILL, informed members the bill had received hearings in several committees and was widely supported by school districts, school bus contractors and many individuals. He said the bill received community-wide support as well and encouraged its approval. He summarized the bill and changes made by the Transportation Committee.

DOROTHY JONES, MAYOR, MAT-SU BOROUGH, informed members they support CS HB 409 (Transportation) and urge its passage. Ms. Jones said parents like to have the feeling when their child gets on the bus they are entrusting them to a school district where safety is paramount. She encouraged the Committee to support the bill.

Representative Rieger MOVED to report out of committee CS HB 409 (Transportation) along with two zero fiscal notes dated 2/27/86 and 1/28/86. There being NO OBJECTION, it was so ordered and CS HB 409 (Transportation) was reported out of committee with a "do pass" recommendation and two zero fiscal notes.

HB 502

HB 502 - An Act relating to the disclosure of state tax assessments of the Department of Revenue.

COMMISSIONER NORDALE, DEPARTMENT OF REVENUE, referenced the Finance Committee Substitute work draft for HB 502, providing members with copies of suggested amendment changes (Attachment 1). Commissioner Nordale felt the bill would provide an excellent procedure to enable the Department of Revenue and the Legislature to establish, what she felt, the appropriate relationship with regard to the oversight of taxation matters, development of legislation, and conveyance of information necessary for informed decisions by the Legislature. According to Commissioner Nordale, the Department of Revenue had worked with members of the Committee to develop a bill which would address a number of issues and it was her feeling the Committee Substitute was the best draft obtainable at the time. She noted the procedure established in the bill was closely patterned after the federal procedure establishing the relationship between the U.S. Department of Treasury, IRS and Congress. Commissioner Nordale said due to the fact state tax laws are patterned closely after federal law, seeking federal basis for the procedure offers the Department precedential value.

Commissioner Nordale referenced the proposed amendments discussing each one briefly. She said their amendment number one, would insert on page 2, line 21 a new subsection 2, dealing with confidentiality of information. She noted their concern that all employees of the Legislature be covered by the requirement of confidentiality. Additionally, the Department recommended the deletion on page 4, line 4 of the language which would read "but the committee may not designate an employee or agent who has responsibility for a different investigations of the same taxpayer or third party". She said their reading of the proposed language is that it implies the Legislature could not adequately screen its own employees and the language suggested constriction on the Legislature to employ individuals who are not appropriate.

Amendment number 3, to insert at page 4, line 23 after "receipt", the word "safekeeping", would provide a mechanism for retaining confidential information as confidential according to Commissioner Nordale. She said it is a word used in agreements between the State of Alaska, Department of Revenue, and U.S. Internal Revenue Service and is frequently used in statute. The last amendment, to insert at page 4, line 26 a new subsection (k) to read: " (k) Nothing in this section permits the disclosure to the legislature of confidential information provided by the Internal Revenue Service under exchange agreements with the department" was specifically asked for by the IRS for inclusion in the bill. Commissioner Nordale encouraged the adoption of the new subsection to avoid any jeopardy of exchange agreements between the Department and Internal Revenue Service. There was discussion concerning the proposed amendments.

ROBERT VAN HOOK, TAX COUNSEL, SOHIO ALASKA PETROLEUM COMPANY, provided members with testimony outlining reasons for their opposition to HB 502 (Copy of testimony is on file).
He said HB 502 would empower a legislative panel to perform functions properly delegated to the Department of Revenue and would increase the likelihood of litigation. Mr. Van Hook said despite sanctions against disclosure of confidential information, SOHIO expressed concern that unauthorized disclosure of confidential information would result and such disclosure would cause material competitive prejudice.

Representative Szymanski questioned the effects of the bill on SOHIO regarding the tax audit process. Mr. Van Hook said the scope of the review is not identified at any time. He said they read the bill to say information could be submitted as soon as they file a return. He said there are no limitations outlined in the legislation as to what powers are included in the oversight function. He said federal law is more specific. There was discussion concerning SOHIO's internal controls for maintaining confidential information in-house.

Representative Cotten discussed SOHIO's concern that a Legislative panel could exceed permissible oversight functions, raising new issues and performing a secondary review of proposed audit settlements essentially performing an executive branch function. Mr. Van Hook discussed the concern in relationship to proposed settlements and settlement agreements. There was discussion concerning language contained in sections 2 and 3 dealing with disclosure and legislative immunity.

Representative Pourchot referred to SOHIO's proposal that HB 502 provide for notice to the taxpayer that the taxpayer's records have been requested and which records had been turned over to the legislative committee. He asked if there was a problem with this type of inclusion feeling it a reasonable request. Commissioner Nordale said they would discourage consideration of the amendment as the general practice is to avoid specific identity with respect to information so long as it does not diminish the real information which is necessary. Representative Pourchot did not see the notice having to be made prior to receipt of information by the Committee except in a case where information was being requested for a specific taxpayer. There was further discussion concerning types of information necessary for review.

(Tape Change, Side 2)

Representative Cotten MOVED AND ASKED UNANIMOUS CONSENT that the Committee adopt the Committee Substitute work draft dated 2/27/86 for HB 502. There being NO OBJECTION, it was so ordered.

Representative Binkley expressed his support of HB 502 noting the authority to review assessments is powerful and the Legislature needs to be careful as to assigning the authority to Legislative Committees. He MOVED to delete on page 3, line 24 after "may" the words "with the written concurrence of the speaker of the House of Representatives or the president of the Senate" and insert the words "by simple resolution" and on page 3, line 29, delete the word "request" and insert "resolution". There was discussion concerning the effects of the amendment in relationship to a committee of the legislature.

RECESS

Chairman Adams called a recess at 2:25 p.m. He recalled the meeting to order at 2:27 p.m. informing members he would continue to accept motions and conceptual motions with the intent the subcommittee would meet, incorporate said motions into a new draft Committee Substitute, and bring the bill before the Committee on Monday, March 3.

Representative Cotten MOVED AND ASKED UNANIMOUS CONSENT to adopt amendments number one through four as presented by the Department of Revenue and contained in Attachment 1. There being NO OBJECTION, it was so ordered.

Representative Pourchot MOVED to adopt a "conceptual amendment" to be contained on page three, line 29 which would state "notification shall be provided to a particular taxpayer when tax return information for that taxpayer has been requested". There being NO OBJECTION, it was so ordered.

ADJOURNMENT

The meeting adjourned at 2:30 p.m.

Collateral references. — 5 Am. Jur., Automobiles, § 151.

Sec. 28.15.041. Classification of drivers' licenses. (a) The commissioner shall provide by regulation for the classification of drivers' licenses. The regulations shall specify license classifications which are reasonably necessary for the safe operation of the various types, sizes and combinations of motor vehicles. The regulations shall also establish medical standards, standards of driving conduct and proficiency, and other standards governing the issuance, renewal, or denial of these licenses. The department may examine each applicant to determine his qualifications according to the class of license applied for, and upon issuing a driver's license the department shall indicate on the license the classification for which an applicant for a license has qualified by examination. The regulations and any subsequent modifications under this section become effective only if approved by a concurrent resolution adopted by a majority vote of each house of the legislature.

(b) No person may drive a school bus transporting school children, or a bus transporting school-age children or another motor vehicle when in use for the transportation of persons for compensation until he has applied for and has been issued a license for that purpose under (a) of this section. The department may not issue a license under this subsection unless the applicant is at least 19 years of age, has had at least one year of driving experience, and the department is satisfied as to the applicant's good character, competence and fitness to be licensed; nor may the department issue the license until proper application has been made and all required driving, written, and physical examinations have been successfully completed. A license issued under this subsection expires on September 1 of the year following issuance. Application for renewal may be made by submitting to the department the results of a current physical examination and paying the required fee. (§ 19 ch 178 SLA 1978)

Sec. 28.15.051. Instruction permit, temporary driver's license and special driver's permit. (a) Except as provided in (b) of this section, a person who is at least 14 years of age may apply to the

Chapter 07. Administration of Public Schools.

Article
1. Department of Education (§§ 14.07.020, 14.07.058)

Article 1. Department of Education.

Section
20. Duties of the department
58. Alaska School Activities Association

Sec. 14.07.020. Duties of the department. (a) The department shall

(1) exercise general supervision over the public schools of the state except the University of Alaska;

(2) study the conditions and needs of the public schools of the state and adopt or recommend plans for the improvement of the public schools;

(3) provide advisory and consultative services to all public school governing bodies and personnel;

(4) prescribe by regulation a minimum course of study for the public schools;

(5) establish, in coordination with the Department of Health and Social Services, a program for the continuing education of children who are held in detention facilities in the state during the period of detention;

(6) accredit those public schools which meet accreditation standards prescribed by regulation by the department; these regulations shall be adopted by the department and presented to the legislature during the first 10 days of any regular session, and become effective 45 days after presentation or at the end of the session, whichever is earlier, unless disapproved by a resolution concurred in by a majority of the members of each house;

(7) prescribe by regulation, after consultation with the state fire marshal and the state sanitarian, standards in addition to the requirements of AS 18.15.145 that will assure healthful and safe conditions in the public and private schools of the state including a requirement of physical examinations and immunizations in pre-elementary schools; the standards for private schools may not be more stringent than those for public schools;

(8) exercise general supervision over pre-elementary schools that receive direct state or federal funding;

(9) provide accredited elementary and secondary correspondence study programs available to any Alaskan through a centralized office of correspondence study;

(10) accredit private schools which request accreditation and which meet accreditation standards prescribed by regulation by the depart-

ment; nothing in this paragraph authorizes the department to require religious or other private schools to be licensed;

(11) review plans for construction of new public elementary and secondary schools and for additions to and major rehabilitation of existing public elementary and secondary schools and, in accordance with regulations adopted by the department, determine and approve the extent of eligibility for state aid of a school construction project begun after July 1, 1978; for the purposes of this paragraph, "plans" include educational specifications, schematic designs, and final contract documents;

(12) provide educational opportunities in the areas of vocational education and training, basic education, and fire-service training to individuals over 16 years of age who are no longer attending school;

(13) administer the grants awarded under AS 14.11.020.

(b) In this section "pre-elementary school" means a school for children ages three through five years if the school's primary function is educational. (§ 1 ch 98 SLA 1966; am § 2 ch 69 SLA 1971; am § 6 ch 104 SLA 1971; am § 1 ch 190 SLA 1975; am § 6 ch 50 SLA 1977; am §§ 1-3 ch 126 SLA 1978; am § 10 ch 147 SLA 1978; am § 1 ch 86 SLA 1979; am § 24 ch 59 SLA 1982; am §§ 1, 2 ch 92 SLA 1982; am § 2 ch 11 SLA 1984; am § 1 ch 32 SLA 1984)

Effect of amendments. — The first 1984 amendment designated the previously undesignated introductory language as subsection (a) and added subsection (b). The 1984 amendment also, in subsection (a), substituted "state fire marshal and the state sanitarian" for "Department of Health and Social Services" and inserted "including a requirement of physical examinations and immunizations in pre-elementary schools" in paragraph (7); in paragraph (8), deleted "In cooperation with the Department of Health and Social Services" at the beginning and substituted "pre-elementary schools that receive direct state or federal funding" for "public and private pre-elementary schools and over the educational component of nurseries as defined in AS 47.35.080(4); pre-elementary schools in this paragraph means schools for children ages three through five years when the school's primary function is educational"; and, in paragraph (10), deleted "elementary and secondary" following "accredit private" and added "nothing in this paragraph authorizes the department to require religious or other private schools to be licensed" at the end.

The second 1984 amendment inserted "in addition to the requirements of AS 18.15.145" in paragraph (7).

Sec. 14.07.058. Alaska School Activities Association. (a) There is created within the Department of Education the Alaska School Activities Association.

(b) The purposes of the association are to provide for the efficient governing of interscholastic activities through the promotion of those activities and other interschool contests or programs sanctioned by the association and to assist in the promotion of those other activities and interests as it may from time to time elect.

13 AAC 08.005. APPLICATION OF REGULATIONS. 13 AAC 08.005 – 13 AAC 08.060 apply to a person who operates a school bus when it is transporting a child, other than his own, to or from school or a school activity. (Eff. 12/31/69, Reg. 31)

Authority: AS 28.05.011
AS 28.15.041

13 AAC 08.010. DENIAL OF PERMIT. (a) A school bus driver permit may not be issued to an applicant who

(1) has been convicted with such frequency of serious traffic offenses as to indicate a disregard for traffic laws and the safety of others;

(2) has not been licensed to operate a motor vehicle for at least one year before the date of application;

(3) is not at the time of application validly licensed to operate a motor vehicle in Alaska or does not have a valid unlimited Alaska driver's license in his possession;

(4) has not attained the age of 19;

(5) has been convicted of any of the following offenses within 20 years of the time of application: sexual abuse of a minor; sexual assault; incest; unlawful exploitation of a minor; contributing to the delinquency of a minor; felony offense involving distribution of prohibited drugs; or promoting prostitution in the first or second degree.

(b) Repealed 5/2/81.

Authority: AS 28.05.011
AS 28.15.041

13 AAC 08.015. APPLICATION REQUIREMENTS. Applicants for an original school bus driver permit shall, at the time of application, furnish the following to the examiner in order for the application to be accepted:

(1) a completed health history on a form prescribed by the Department of Public Safety;

(2) two sets of applicant fingerprint cards.
(Eff. 12/31/69, Reg. 31; am 5/2/81, Reg. 78)
Authority: AS 28.05.011
AS 28.15.041

13 AAC 08.020. EXAMINATION OF APPLICANTS. (a) The school bus driver's written examination may not be administered to an applicant more than twice during any 12 consecutive months, and a one-week waiting period is required between the two tests allowed. A score of 80 is required to pass, and the test shall be comprised of questions concerning

(1) traffic laws and regulations; and

(2) school bus drivers' operating regulations promulgated by the Department of Education.

(b) The driving examination shall be administered in the type of equipment which the applicant is to operate, and the equipment shall be furnished by the applicant or his employer. The driving examination may not be administered to an applicant more than twice during any 12 consecutive months, and a one-week waiting period is required between the two tests allowed. A score of less than 31 is required to pass, and the examination shall consist of at least the following maneuvers:

(1) with engine off, starting engine and moving into the rest of the required maneuvers;

(2) two right-hand turns and two left-hand turns;

(3) where practical and possible, a railroad crossing stop;

(4) the use of special lighting and other special equipment required by regulation;

(5) movement through intersections controlled by signs or signals, unless such signs or signals are not available in the area of the examination;

(6) simulated loading and unloading of children.

(c) Where it is impractical for the department to administer the driving test, and upon agreement with the employer or other person acceptable to the department, the driving examination may be administered by the employer or other person acceptable to the department who shall certify to the proficiency of the applicant's driving skills by signing the examination form as the "examiner." Eff. 12/31/69, Reg. 31)

Authority: AS 28.05.011
AS 28.15.041

13 AAC 08.025. MEDICAL STANDARDS. (a) A school bus driver permit may not be issued to a person who does not meet the following minimum standards as certified by a medical doctor, a physician's assistant licensed by the State Medical Board, or an advanced nurse practitioner licensed by the Board of Nursing, on the form required in 13 AAC 08.015(1):

(1) the person must be free of communicable disease at the time of examination;

(2) the person must have a chest X-ray or "skin test" that shows the person to be free of tuberculosis;

(3) the person's visual acuity may not be less than 20/30 in one eye and 20/200 in the other eye, either with or without corrective lenses;

(4) the person may not have monocular vision;

(5) the person may not have a history of fainting spells, dizziness, convulsions, epilepsy, or cardiac ailment during the 12 consecutive months immediately preceding the examination;

(6) the person must have normal use of both hands, arms, and feet;

(7) the person may not have a physical disability that would prevent safe operation of a school bus under all driving conditions;

(8) the person may not presently be under treatment for excessive use of alcohol or drugs.

(b) Except as provided in (c) of this section, a renewal of a school bus driver permit may not be granted unless the requirements of (a)(1) – (8) of this section are met.

(c) When a person has a "skin test" that does not show the person to be free of tuberculosis, a chest X-ray is not required under (a)(2) of this section if within 18 months before the skin test the person had a chest X-ray that showed him to be free of tuberculosis. Nothing in this section, however, prevents the person conducting the examination from concluding that the X-ray is necessary for diagnostic purposes and requiring that an X-ray be taken.

(d) A report of an examination performed under this section by a physician's assistant or an advanced nurse practitioner must be signed by that person, and include the name of the collaborating physician. (Eff. 12/31/69, Reg. 31; am 5/2/81, Reg. 78; am 8/12/82, Reg. 83)

Authority: AS 28.05.011
AS 28.15.041

13 AAC 08.030. PERMIT TO BE CARRIED AND EXHIBITED. A driver of a school bus shall have in his immediate possession his school bus driver permit and his driver's license when operating a school bus transporting a child to or from school or a school activity and shall, upon the request of a police officer, display and temporarily give to the police officer for examination his school bus driver permit. (Eff. 12/31/69, Reg. 31; am 5/2/81, Reg. 78)

Authority: AS 28.05.011
AS 28.15.041

13 AAC 08.035. RESTRICTED PERMIT. A school bus driver permit shall, depending upon the type of vehicle in which the driving examination was given, be restricted as follows:

(1) if the examination was given in a school bus with a manufacturer's rated capacity of less than 24, the permit shall be restricted on its face to "15 passengers or less";

(2) if the examination was given in a school bus with a manufacturer's rated capacity of 24 or more, the permit shall be unrestricted and allows operation of any school bus. (Eff. 12/31/69, Reg. 31)

Authority: AS 28.05.011
AS 28.15.041

13 AAC 08.040. CANCELLATION OF PERMIT. The department will, in its discretion, cancel a school bus driver permit for the following:

(1) unintentional, erroneous information or improper application;

(2) repealed 5/2/81.

(Eff. 12/31/69, Reg. 31; am 5/2/81, Reg. 78)

Authority: AS 28.05.011
AS 28.15.041

13 AAC 08.045. SUSPENSION OR REVOCATION OF PERMIT. (a) A school bus driver permit will, in the department's discretion, be suspended by the department for

(1) driving a school bus in violation of the permit restrictions;

(2) conviction of a traffic offense which results in a limitation being placed on the driver's license, except an offense which requires revocation under (b) of this section;

(3) conviction of an offense which results in suspension or revocation of the driver's license, unless suspension or revocation is for a conviction of an offense which requires revocation under (b) of this section.

(b) A school bus driver permit will be revoked for

(1) conviction of driving while intoxicated;

(2) conviction of reckless driving;

(3) conviction of a third offense of driving in violation of permit restrictions;

(4) any reason that would be grounds for denial under 13 AAC 08.010;

(5) knowingly making a false statement or concealing a material fact or otherwise committing a fraud in an application for a permit;

(6) repealed 5/2/81.
(Eff. 12/31/69, Reg. 31; am 5/2/81, Reg. 78)
Authority: AS 28.05.011

13 AAC 08.050. PERIOD OF SUSPENSION OR REVOCATION. (a) The period of suspension of a school bus driver permit is as follows:

(1) violation of permit restrictions – first offense 30 days, second offense six months;

(2) for the duration of a limitation placed on the driver's license as provided by 13 AAC 08.045(a)(2);

(3) for the duration of the suspension or revocation of the driver's license as provided by 13 AAC 08.045(a)(3).

(b) the period of revocation of a school bus driver permit is as follows:

(1) one year for first conviction of driving while intoxicated or reckless driving, and permanent revocation for conviction of a second offense or the first offense if it occurred while driving a school bus;

(2) one year for third offense of driving in violation of permit restrictions;

(3) until applicant is eligible for reissuance if it is for a reason which would be grounds for denial under 13 AAC 08.010;

(4) one year for knowingly making a misrepresentation in an application for a permit;

(5) repealed 5/2/81.
(Eff. 12/31/69, Reg. 31; am 5/2/81, Reg. 78)
Authority: AS 28.05.011
AS 28.15.041

13 AAC 08.055. RE-EXAMINATION. Upon written request of a police officer, the Department of Education, or the employer of a school bus driver, the department will, in its discretion, upon giving 10 days' notice to the school bus driver, require him to submit to a part or all of the examination requirements. After examination the department will, in its discretion, if the school bus driver did not satisfactorily pass examination, revoke his permit until the examination is passed. Refusal or neglect to submit to re-examination will result in revocation of the permit until the examination is satisfactorily completed. (Eff. 12/31/69, Reg. 31; am 5/2/81, Reg. 78)
Authority: AS 28.05.011
AS 28.15.041

13 AAC 08.060. DEFINITIONS. In 13 AAC 08.005 – 13 AAC 08.060, unless context requires otherwise

(1) "convicted with such frequency of serious traffic offenses" means one conviction of driving while intoxicated or reckless driving during the 12 months immediately before application, or four convictions for any other violation of traffic law or regulations while driving a motor vehicle during the 24 months immediately before application, or two or more convictions for driving while intoxicated or reckless driving at any time before application;

(2) repealed 5/2/81;

(3) repealed 5/2/81;

(4) "permit" means a school bus driver permit issued by the department;

(5) "unlimited Alaska driver's license" means an Alaska driver's license which is not limited under the provisions of AS 28.15.201;

(6) "department" means Alaska Department of Public Safety. (Eff. 12/31/69, Reg. 31; am 5/2/81, Reg. 78)
Authority: AS 28.05.011
AS 28.15.041

13 AAC 08.075. DECLARATION OF INTENT. Repealed 1/26/79.

13 AAC 08.080. APPLICATION OF REGULATIONS. 13 AAC 08.080 – 13 AAC 08.110 apply to

(45) "safety zone" means the area of space officially set apart within a roadway for the exclusive use of pedestrians, and which is protected or marked by signs which are plainly visible at the time it is used as a safety zone;

(46) "school bus" means every motor vehicle that complies with the color and identification requirements set forth in the edition of Minimum Standards for School Buses and Minimum Standards for Alaska School Buses, which is in effect on the effective date of this section, and is used to transport children to or from school or in connection with school activities; it does not include buses operated by common carriers for the urban transportation of school children;

(47) "semitrailer" means a vehicle with or without motive power, other than a pole trailer, designed for carrying persons or property, drawn by a motor vehicle, and constructed so that part of its weight rests upon or is carried by another vehicle;

(48) "sidewalk" means that portion of a street between the curblines or the lateral lines of a roadway and the adjacent property lines, and intended for use by pedestrians;

(49) "snowmobile" means a motor vehicle designed to travel over ice or snow, and supported in part by skis, belts, cleats, or low-pressure tires;

(50) "solid rubber tire" means a tire of rubber or other resilient material which does not depend upon compressed air for the support of the load;

(51) "specially constructed vehicle" means vehicle required to be registered under A 28.10, which is not originally constructed unde a distinctive name, make, model, or type by a generally recognized manufacturer of vehicles and which is not materially altered from its original construction;

(52) "special mobile equipment" means a vehicle which is not designed or used primarily for the transportation of persons or property and only incidentally operated or moved over a highway, including but not limited to ditch digging apparatus, well boring apparatus, construction and maintenance machinery such as asphalt spreaders, bituminous mixers, bucket loaders, tractors other than truck tractors, ditchers, leveling graders, finishing machines, motor graders, road rollers, scarifers, earthmoving carryalls and scrapers, power shovels and drag lines, and self-propelled cranes and earthmoving equipment; it does not include house trailers, mobile homes, off-highway vehicles, dump trucks, truck-mounted transit mixers, cranes, or shovels, or other vehicles designed for the transportation of persons or property to which machinery has been attached.

(53) "stand" or "standing" means the halting of a vehicle, whether occupied or not, except temporarily for the purpose of and while actually engaged in receiving or discharging passengers,

(54) "stop" or "stopping" means a complete cessation from movement, or the halting, even momentarily, of a vehicle, whether occupied or not, except when necessary to avoid conflict with other traffic or in compliance with the directions of a police officer or traffic-control sign or signal;

(55) "street" means a highway as defined in AS 28;

(56) "through highway" means a highway or portion of highway on which vehicular traffic has preferential right-of-way, the entrances to which vehicular traffic from intersecting highways is required by law to yield the right-of-way to vehicles on the highway in obedience to a stop sign, yield sign or other official traffic-control device;

(57) "tow car" means a motor vehicle which is equipped for towing vehicles by means of a crane, hoist, tow bar, tow line or dolly, and is used primarily for towing or otherwise rendering assistance to other vehicles;

(58) "trailer" means a vehicle, with or without motive power, designed for carrying persons or property and for being drawn by a motor vehicle; it includes semitrailers and pole trailers;

(59) "transporter" means a person in the business of delivering vehicles which are required

13 AAC 04.097. SPECIAL SCHOOL BUS LIGHTING EQUIPMENT. (a) A school bus must, in addition to other equipment and distinctive markings required by this chapter, be equipped with signal lights mounted as high and as widely spaced laterally as practicable, which must display to the front two alternately flashing red lights located at the same level and to the rear two alternately flashing red lights located at the same level. The lights must be visible at 500 feet in normal sunlight. The alternately flashing red lights must be illuminated by the driver of the school bus when, but only when, the bus is stopped for the purpose of receiving or discharging school children, except that the lights may not be illuminated in

(1) a designated school bus loading or unloading area where the bus is entirely off the roadway and a child being received into or discharged from the bus is not required to cross the roadway; or

(2) an intersection or other place where traffic is controlled by a traffic-control signal or by a police officer.

(b) A school bus must be equipped with yellow signal lights mounted near each of the four red lights required in (a) of this section and at the same level but closer to the vertical centerline of the bus. These lights must display two alternately flashing yellow lights visible to the front and rear of the bus for a distance of at least 500 feet in normal sunlight. The yellow flashing lights must be illuminated by the school bus driver at least 100 feet, but not more than 500 feet, before every stop at which the alternately flashing red lights are illuminated, at which time the alternately flashing yellow lights authorized by this section must be turned off.

(c) Every school bus must have indicator lights readily visible to the driver of the bus, which automatically indicate to the driver of the bus when any of the alternately flashing lights authorized by this section are illuminated. (Eff. 6/28/79, Reg. 70)

Authority: AS 28.05.011

Editor's Note: This section is based partially on the former 13 AAC 04.090(b) and 150(c)–(e).

13 AAC 04.247. COLOR AND SPECIAL EQUIPMENT ON SCHOOL BUSES. (a) Every school bus used for pupil transportation must be painted National School Bus Chrome Yellow (National Bureau of Standards Color #1305). No other vehicle may display this color. A bus originally painted and used as a school bus which is no longer used as a school bus must be painted a color other than National School Bus Chrome Yellow before it may be driven on a highway or vehicular way or area.

(b) When transporting a school child to or from a school activity, a school bus must display signs as follows:

(1) the words "SCHOOL BUS" in black letters at least eight inches in height on a contrasting background, plainly visible to the front and rear; and

(2) the words "UNLAWFUL TO PASS WHEN RED LIGHTS FLASH" in black letters at least four inches but not more than six inches in height on a white background on the rear of the bus.

(c) A school bus with a manufacturer's rated capacity of 24 or more students must be equipped with a stop arm mounted on the left side of the vehicle. The lights on the stop arm must be automatically activated with the red flashing lights required by sec. 97(a) of this chapter. The stop arm must be at least 17 inches high at the side opposite the hinge and, when fully extended, extend 19 inches from the bus. The word "STOP" must be displayed on the stop arm in white letters on a red background, and two alternately flashing red lights must be mounted, one above the other, on the left side of the arm, which must flash and be visible to the front and rear when the arm is fully extended.

(d) The signs required by (b) of this section may not be displayed nor may the stop arm required by (c) of this section be extended on a school bus during times it is being used to transport persons not under the supervision of a school. (Eff. 6/28/79, Reg. 70)

FROM: Committee Staff

RE: CS HB 436 (Rules), "An Act requiring a properly equipped and staffed caboose on certain trains."

CS HB 436 would require a caboose on trains that exceed 1,000 feet in length, excluding 1) a train made of only locomotives and passenger coaches; 2) a train 1,825 feet in length composed of flat cars or trailers or containers on flat cars, on which toxic materials are carried in the first 1000 feet of the train; 3)or when an emergency situation prevents compliance.

A defective car may be entrained behind the caboose and moved to the nearest repair point if necessary.

Each violation of this section is punishable by a find of not less than $500 or more than $1000.

The Alaska Railroad does not view this as a safety issue, but more as a collective bargaining issue. The railroad would like this to be a matter of contract negotiations rather than a legislatively mandated decision.

On the other hand, the United Transportation Union believes that there is a geniune issue of safety involved and for this reason should be legislatively mandated.

The backup information in the committee packets takes up each of these positions.

The committee staff has a drafted committee substitute which modifies the exceptions to include trains with baggage cars, increases the length of flat cars with containers or trailers to 2500 feet in length and provides that if the railroad and the appropriate collective bargaining unit do not include provisions relating to cabooses on trains in their agreements, then cabooses are not necessary.

Re: CS for HB 436

Dear Mr. Call:

I would like to call your attention to two typographical errors in our bill review letter to you dated May 2, 1986.

On page 1 and elsewhere in our letter, the bill under review is referred to as HB 436. The more accurate identification of the bill reviewed is CS for HB 436. (A copy of CS for HB 436, the bill we reviewed in our May 2 letter, is attached.)

On page 2, approximately nine lines up from the bottom, a reference is made to HB 341. The intended reference here should have been to CS for HB 436.

Sincerely,

HAROLD M. BROWN
ATTORNEY GENERAL

May 2, 1986

Dixie Hudish
AFL-CIO Legislative
Representative

TESTIMONY ON CS HB 436 "Caboose Bill"

Mr. Chairman, members of the Committee:

For the record, my name is Dixie Hudish and I'm here representing the Alaska State AFL-CIO.

The Alaska State AFL-CIO wishes to go on record in support of CSHB 436.

This bill which requires the Alaska Railroad to properly equip and staff a caboose on certain trains, is essentially and unequivocably a safety issue. The Alaska Railroad management, in their previous testimony before the House State Affairs and Transportation Committees, would have us believe otherwise, as they state the Alaska Railroad Corporation has already been directed by the Legislature to provide a safe railroad operation. We contend it is one thing to direct the Alaska Railroad to run a safe operation and it is another thing to legislate safe operations..

The Alaska Railroad management also contends that the legislature should not be interfering with how they run the railroad. Let me assure you that when the Alaska Railroad Coproration Act was established, the residents of Alaska did not "give up" their legilative ability to regulate rail safety. Uppermost, we should keep in mind

that the Alaska Railroad is owned by the State and the right to regulate rail safety is the State of Alaska's responsibility. The State should do no less than to insure not only the safety of its employees but of the public.

Many of you have heard that modern technology now provides various automated devices that are supposed to reduce the risk of operating cabooseless trains, yet all these devices cannot replace the manned caboose, as was clearly pointed out by a Federal Judge in Nebraska in a court decision issued in May, 1985. Judge Urbom concluded in his decision that there is ample evidence that a crew member at the end of a train may see a safety threat that the electronic detector cannot see. The State had shown that detectors are fallible, that in the past they have failed to detect problems that the caboose crew was able to discover before they led to derailments and that the retention of the manned caboose plays a real role in the detection of equipment defects before they can cause derailments.

With increased transportation of hazardous and toxic materials on the Alaska Railroad, the safety of the public demands the stiffest assurance of rail safety on our trains. As we all know, it only takes one derailment incident involving hazardous and toxic materials to affect an entire community. The AFL-CIO is not saying that keeping cabooses on trains will insure no accidents. We are saying, that requiring cabooses on certain trains over 1,825 feet in length, with insurance that hazardous and toxic materials will be carried up front on the first 1,000 feet of the train, will certainly decrease the possibility of an incident.

Further, the Alaska Railroad management pointed out in their previous testimony before the House State Affairs Committee, that eliminating cabooses would be an exonomic saving factor. I would like to reply by quoting Craig Stoskopf, Safety Representative for the United Transportation Union in his letter to the Anchorage Daily Times, as I couldn't say it better. As quoted,

> "an employee spotting trouble carly can mean the difference between an incident and disaster costing millions of dollars and loss of life. Any short term cost savings would be instantly nullified in such a disaster."

We do not believe it is worth the dollars in labor costs to the Alaska Railroad to compromise the safety of the public and the train crew involved.

With this, the Alaska State AFL-CIO urges the Senate Transportation Committee to support CSHB 436.

Thank you

Mr. Blake Call, Secretary
Senate Transportation Committee
Alaska State Senate
P.O. Box V
Juneau, AK 99811

Re: Legal Review of HB 436

Dear Mr. Call:

You have requested our review of HB 436 with particular reference to § 1207(a)(4) of the Alaska Railroad Transfer Act (45 U.S.C. § 1201 et seq.).

Proposed Sec. 42.30.250(a) of this bill requires any train operating in Alaska that is more than 1000 feet long to have "a properly maintained and equipped caboose" attached as the rear car and staffed by a train conductor or a brakeman. This requirement does not apply to trains operating inside a railroad yard or terminal area. 1/

Since the only trains now operating in Alaska are those of the Alaska Railroad Corporation, our review of this bill must begin with a brief discussion of the practical effect of this bill on the Alaska Railroad and then an analysis of § 1207(a)(4) of the Alaska Railroad Transfer Act as it relates to this effect.

Except for passenger trains, it is our understanding that the Alaska Railroad presently operates only one train, the

---

1/ Other exceptions to this requirement include 1) trains exclusively composed of passenger coaches, 2) trains exclusively composed of flat cars carrying trailers or containers, provided such trains do not exceed 1825 feet in length and provided that any hazardous or toxic material are located in the first 1000 feet of the train, and 3) an emergency that prevents compliance with this requirement. See Sec. 42.30.260 of the bill.

Arctic Fox, without a caboose. This train operates with a crew of two persons, both of whom are required to be in the locomotive unit of the train. 2/ Should this bill become law, the Arctic Fox would fall within the criteria of Sec 42.30.250 and would be required to operate with a caboose. This would mean at least one additional crew member for this train, i.e., a train conductor or a brakeman. The practical effect of HB 436 on the Alaska Railroad thus would be to specify a minimum number of crew members that must be employed in the operation of one of its trains. And herein lies a legal difficulty. § 1207(a)(4) of the Alaska Railroad Transfer Act (ARTA) exempts the Alaska Railroad from any "requirement of any state or local law which specifies the minimum number of crew members needed to operate a train." § 1207(a)(4) of ARTA reads as follows:

> The operation of trains by the State-owned railroad shall not be subject to the requirement of any State or local law which specifies the minimum number of crew members which must be employed in connection with the operation of such trains.

On its face, § 1207(a)(4) appears to conflict with HB 341. If in fact this is the case, it is clear that the federal law must prevail. 3/

Now as to whether there is a real conflict here, it might be argued that § 1204(a)(4) should be interpreted to refer only to state or local laws in existence at the time of the passage of ARTA and is not meant to include state laws that might be passed after the effective date of ARTA. 4/ Such an interpretation, if correct, would remove the possibility of a conflict with ARTA.

2/ This factual data is taken from the position paper submitted by the Alaska Railroad on HB 436 dated February 14, 1986.

3/ Article VI, § 2 of the U.S. Constitution (the Supremacy Clause) requires that when a state and federal law conflict, the state law must yield to the federal law. See Tarbles case, 80 U.S. 397 (1872).

4/ There is of course a vast difference in meaning between "any state or local law" and "any existing state or local law."

There are, however, two major difficulties with the view that § 1204(a)(4) refers only to "existing" state laws. The first is that this is not what § 1204(a)(4) says; its text is clear and unambiguous. There is no particular mystery or complexity surrounding the concept of "existing laws." If this concept had been the one intended by Congress, it surely would have used the word "existing" in the section. That Congress obviously did not leads one to the reasonable judgment that they did not intend to limit the prohibition of § 1204(a)(4) to existing state laws. This being the case, established canons of statutory interpretation do not comfortably permit one to read the word "existing" into § 1207(a)(4). See, 2A, N Singer, Sutherland Statutory Construction (4th ed. 1984), §§ 4601, 46.01; Also see Wilson v. Municipality of Anchorage, 669 P.2d 569 (Alaska 1983). Accordingly, it is our opinion that a court construing § 1207(a)(4) of ARTA would rely on its plain meaning and would interpret the phrase "any law" to encompass both existing state laws and state laws enacted after the passage of ARTA.

Secondly, it is difficult to make much sense of the meaning of § 1207(a)(4) if it is to be read to refer only to existing state laws. Such an interpretation would mean that if there were any such state laws in existence at the time of the passage of ARTA, a state legislature, at some time after the effective date of ARTA, could simply repeal and then reenact the law thereby avoiding the § 1207(a)(4) prohibition. Since a law is never presumed to codify unreasonableness or futility, an interpretation leading to such a result is not likely to be readily accepted by a court. See 2A, N. Singer, Sutherland Statutory Construction, (4th ed. 1984), § 45.12; Also see Markham v. Cabell, 326 U.S. 404 (1945) and Glover v. Marine Banks of Beaver Dam, 345 N.W.2nd 449 (Wisc. 1984).

In summary, it is our opinion that HB 436, should it be enacted into law, would more likely than not be found to conflict with § 1207(a)(4) of ARTA.

Sincerely,

HAROLD M. BROWN
ATTORNEY GENERAL

LEGISLATIVE AFFAIRS AGENCY

M E M O R A N D U M May 2, 1986

SUBJECT: Requiring cabooses on certain trains (CSHB 436(Rules))

TO: Representative Bette Cato

FROM: Tamara Brandt Cook TBC
Director
Division of Legal Services

You have asked whether CSHB 436(Rules) requiring a properly equipped and staffed caboose on a train conflicts with 45 USC 1207(a)(4) (Alaska Railroad Transfer Act) which provides

> The operation of trains by the State-owned railroad shall not be subject to the requirement of any State or local law which specifies the minimum number of crew members which must be employed in connection with the operation of such trains.

Since CSHB 436(Rules) requires that a caboose be used on a train and that it be staffed by a train conductor or brakeman, an argument could be made that this constitutes a specification of the minimum number of crew members in violation of the federal law. However, I believe that the better interpretation would be that CSHB 436(Rules) does not violate the federal law because it does not directly specify a minimum number of total crew members on a train, but only that, whatever the number of crew members may be, one conductor or brakeman staff the caboose.

This interpretation is supported by the history behind enactment of 45 USC 1207(a)(4). That provision was intended to avoid a law in Alaska that very specifically established minimum crew sizes for trains and that was repealed under chapter 40, SLA 1983. Before its repeal AS 23.10.420 provided

> (a) No person operating an Interstate Commerce Commission-regulated railroad offering passenger service in this state may operate a train or engine, outside of

yard limits, regardless of the form of energy used for propulsion, unless it meets the following requirements:

(1) a passenger train shall have at least a minimum passenger crew, which shall consist of one locomotive engineer, one locomotive fireman (or helper), one conductor, one brakeman, and one flagman;

(2) a freight train shall have at least a minimum freight crew, which shall consist of one locomotive engineer, one locomotive fireman (or helper), one conductor, and two brakemen;

(3) a light engine without cars shall have at least a minimum light engine crew, which shall consist of one locomotive engineer, one locomotive fireman (or helper), and one conductor.

(b) Except for hostling movements and duties as negotiated for each railroad company, no person operating an Interstate Commerce Commission-regulated railroad offering passenger service in this state may operate an engine or locomotive, regardless of the form of energy used for propulsion, for switching cars or in transfer movements, unless every engine or locomotive is manned by a minimum crew consisting of one locomotive engineer, one conductor, and one brakeman.

(c) In this section "engine" includes connected, multiple units under single control

(d) A person who violates a provision of this section may be fined up to $500 upon conviction. Each violation constitutes a separate offense.

Since CSHB 436(Rules), while it contains a requirement regarding the staffing of trains, does not specify a minimum number of crew members like former AS 23.10.420 did and because the federal law prohibits the state from applying a law that ". . .specifies the minimum number of crew members . . ." but does not directly prohibit the state from enacting laws establishing other requirements regarding the staffing of trains, I believe that CSHB 436(Rules) could withstand a challenge if enacted. However, at the very best CSHB 436(Rules) would be open to a challenge under the federal law and it cannot be determined with certainty what the outcome to such a challenge would be.

Re: Alaska Caboose Legislation

Dear Mr. Gray:

The State Legislature is currently considering Senate Bill 313 and House Bill 436, which provide for a properly equipped and staffed caboose on freight trains over 1,000 feet in length. The bill is a public safety measure. Four other states have passed legislation requiring cabooses on freight trains, they are Virginia, Oregon, Montana, and Nebraska. I understand also that many states are adopting regulations or considering legislation on this same issue. While this legislation is not a "jobs" bill, it may effect the minimum number of crew members required to be employed for the operation of a train. Accordingly, you have asked whether this state enactment would be prohibited under the Alaska Railroad Transfer Act. For the reasons set out below, it is my opinion that the Alaska caboose legislation now proposed does not violate, and is not prohibited by, the Alaska Railroad Transfer Act (ARTA).

ARTA at 45 U.S.C. §120-7(a)(4) provides that:

> (a)(4) The operation of trains by the State-owned railroad shall not be subject to the requirement of any state or local law which has specified the minimum number of crew members which must be employed in connection with the operation of such trains.

The question of whether this federal law prohibits Alaska from regulating its own railroad can be approached in a number of ways. I will begin with a review of the legislative history.

When construing the statute, the court will examine the language of the statute first. However, after reviewing the language of the statute itself, the court will then refer to the legislative history to gain insight that may be helpful in determining the statute's meaning. City and Borough of Sitka v. IBEW, 653 P.2d 332 (Alaska 1982). The wording of 45 U.S.C. §1207(a)(4) can be construed as prohibiting the State from enacting any legislation which impacts the number of crew members employed in connection with the operation of trains. However, the legislative history indicates that the legislative intent, was to exempt the Alaska Railroad only from "existing" laws.

At the time of the Alaska Railroad Transfer Act, Alaska law strictly regulated the minimum crews necessary for passenger trains, freight trains, light engines, etc. AS 23.10.420. ARTA clearly exempted the state-owned railroad from that law. But, did ARTA also exempt the Alaska Railroad from any future enactments? The legislative history provides clear guidance. A report of the Committee of Commerce, Signs and Transportation states as follows:

> Section 8 of the bill governs the application of various federal and state laws to the state-owned railroad after its transfer to the state. . . . In general the Committee believes that in the future this state-owned railroad should be treated like all other railroads subject to federal and state laws. . . . Third, the Committee believes it would be inappropriate for the federal government to dictate to the state how it should set up and operate the railroad beyond what generally applies to all rail carriers under existing laws. Report of Committee on Commerce, Signs and Transportation, S.Rep. No. 97-479, 97th Cong. 2d Ses. Calendar No. 862EG10-12, 20 (1982).

Emphasis added. The legislative history speaks specifically to "existing laws." The history notes that "in the future" the Alaska Railroad should be like other railroads. This is a clear indication that Congress, when enacting ARTA, intended to deal only with the laws that were on the books at the time, and did not intend to prohibit the State from future regulation of its wholly owned railroad.

Another rule of statutory construction is that statutes relating to the same subject matter should be read together as a

whole so that the total regulatory scheme is preserved. Nash v. State Commercial Fisheries, 679 P.2d 477 (Alaska 1984). In addition, federal statutes must be construed consistently with one another. Get Oil Out v. Exxon Corp., 586 F.2d 726 (9th Cir. 1978). These statutory guidelines mean that §1207(a)(4) of ARTA must be viewed in the context of other federal regulations concerning railroads. Federal law generally allows states to enact caboose legislation. Federal law in Alaska should be no different.

ARTA makes the state-owned railroad subject to the Interstate Commerce Commission and the federal Railroad Safety Act. 45 U.S.C. §421, et seq. The federal Railroad Safety Act states at 45 U.S.C. §434:

> A state may adopt or continue in force any law, rule, regulation, order, or standard relating to railroad safety until such time the secretary has adopted a rule, regulation, order, or standard covering the subject matter of such state requirements. A state may adopt or continue in force an additional or more stringent law, rule, regulation, order, or standard relating to railroad safety when necessary to eliminate or reduce an essentially local safety hazard and when not incompatible with any federal law, rule, regulation, order, or standard and when not creating an undue burden on commerce. (Emphasis added.)

In Burlington Northern Railroad Co. v. State of Nebraska, C.B. 83-L423 (F.D.N.D., May 10, 1985), the court stated that because the Interstate Commerce Commission has not provided any guidance or any statutes regarding cabooses and the manning of cabooses, states are free to legislate in that area until the time that the Commission does regulate that area. Thus, in order for ARTA to be consistent with federal law, Alaska must be considered as having the right to pass safety measures concerning cabooses.

Even if Congress intended to exempt the state-owned railroad from future laws on crew size, it could not have intended that the state-owned railroad be exempt from state safety laws. In determining this kind of legislative intent the pre-enactment history is relevant, including the statutes in effect at the time that ARTA was passed. 2A Singer, N.J. Sutherland's Statutory Construction §48.03 (1984). In Section 1207(a)(4) and in the

legislative history, there is no indication that the purpose was specifically to prevent featherbedding. However, looking at the law in effect at the time ARTA was passed, and discussing the matter with persons knowledgable in the industry, it is clear that the law required more employees than was necessary. Clearly, Section 1207(a)(4) was enacted to prevent featherbedding. Since the Alaska caboose legislation is a bona fide safety measure and not a featherbedding measure, then it will not be in conflict with Section 1207(a)(4), regardless of the fact that it has some impact on railroad manning. In this regard, it is instructive to note that the court in the North Dakota case found that the caboose legislation was reasonably related to the protection of the health and safety of the citizens of the state. Burlington Northern, supra at 7.

In researching this question, we have examined a number of other issues. I will not discuss in depth the work that we have done. However, we do not believe that Section 1207(a)(4) is a violation by Congress of Alaska's Tenth Amendment rights. See, Garcia v. San Antonio Metro Transit Authority, 105 S. Ct. 1005 (1985). In addition, it does not appear that Congress is prohibited from addressing Alaska's law on minimum sizes of crewmen in a bill that does not address that problem with regard to the other states in the Union. See generally, State of South Carolina v. Katzenbach, 383 U.S. 301 (1966), where the Supreme Court upheld the Voting Rights Act of 1965 that was imposed on three particular states.

If you have any questions or if I can be of any further assistance, don't hesitate to contact me at your convenience.

Sincerely,

JERMAIN, DUNNAGAN & OWENS

SENATE CS FOR CS FOR HOUSE BILL NO. 436 (Transportation)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act requiring a properly equipped and staffed caboose on certain trains."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 42.30 is amended by adding new sections to read:

ARTICLE 6. CABOOSE REQUIRED.

Sec. 42.30.400. CABOOSE REQUIRED. (a) A train that exceeds 1,000 feet in length including locomotives shall have a properly maintained and equipped caboose, that is staffed by a qualified train conductor or brakeman, attached as the rear car while the train is moving over tracks outside a yard or terminal.

(b) This section applies to a railroad that transports goods or passengers for a fee.

Sec. 42.30.410. EXCEPTIONS. (a) AS 42.30.400 does not apply

(1) to a train composed only of locomotives, passenger coaches, and baggage cars;

(2) to a train not exceeding 2,500 feet in length, including locomotives, composed only of trailer on flat car equipment or container on flat car equipment provided that any hazardous or toxic materials on the train are located in the first 1,000 feet of the train as measured from the lead locomotive;

(3) if an emergency occurs in route that prevents compliance with that section; or

(4) unless a collective bargaining agreement between the railroad and an appropriate bargaining unit contains a provision

requiring compliance with AS 42.30.400.

(b) Notwithstanding AS 42.30.400, a defective car that cannot be entrained except behind the caboose may be attached as the rear car on a train and moved to the nearest terminal where it can be repaired.

Sec. 42.30.420. PENALTY. Violation of AS 42.30.400 is an offense punishable by a fine of not less than $500 and not more than $1,000. Each violation is a separate offense.

ALASKA RAILROAD CORPORATION

P.O. Box 7-2111 • Anchorage, Alaska 99510-7069

FACT SHEET

March 6, 1986

Contact: Vivian Hamilton
265-2675

HISTORY OF CABOOSES

Cabooses date back to the beginnings of railroading and served as a traveling office for the conductor. From the caboose the conductor and crewman could monitor the train's performance and apply the hand brakes when the engineer's whistle sounded. The entire crew often ate and slept in the caboose at terminals away from home. Today cabooses are less necessary. Computerization has replaced most of the conductor's paperwork duties. New technologies provide automatic detection systems for train problems and automatic braking systems are used in favor of hand brakes. Crews rarely have to sleep in cabooses anymore.

NATIONWIDE RAIL INDUSTRY TRENDS

In 1982 the national United Transportation Union (UTU), which represents trainmen, enginemen and conductors, and the nation's railroads agreed upon rules that called for the eventual elimination of cabooses on trains. As a result, most of the nation's biggest railroads have dropped cabooses from roughly one-fourth of their long distance freight trains. The 1982 agreement provided that railroads no longer have to purchase new cabooses or refurbish existing cabooses. Once its useful life has ended, a caboose need not be replaced. A more recent 1985 agreement has

APR 30 '86 15:32 ARRC.AK

sped the elimination of cabooses. Apparently frustrated with these negotiated agreements, and rebelling at the notion of losing cabooses, UTU has repeatedly taken its case to legislatures. Yet some 25 states have rejected the implementation of a caboose law; only four states currently require a caboose on freight trains, (only two adopted since the negotiated 1982 agreements.)

CABOOSES AT THE ALASKA RAILROAD CORPORATION

The Alaska Railroad Corporation has never eliminated a caboose from an existing freight train or commodity service. A new service begun in May 1985, the Arctic FOX (Freight Overnight Express), is a cabooseless train. Because the FOX is a short, fast, daily train which carries trailers and containers on flat cars, the union and Railroad managers agree that it does not require a caboose. Assigned with only two engines and entirely new equipment, the service also has no intermediate switching needs. Only a two-person crew is required.

Type of freight hauled, age of equipment, switching needs, and length of the train are key points in determining train makeup and crew assignments. Cabooses will be needed on most freight trains until new technologies such as wayside detectors are available to help reveal any train malfunctions.

MAJOR POINTS OF THE PROPOSED BILL

House Bill 436, as proposed, would require a manned caboose on all freight trains over 1,000 feet in length, including locomo-

APR 30 '86 15:33 ARRC,RNCH ALASKA

tives. This would apply to nearly all ARRC freight trains. A fine would be imposed for violations.

WHY THE ARRC OPPOSES HB 436

By requiring cabooses on all freight trains, this legislation would effectively limit the Railroad's ability to introduce innovative operations for a safer, more efficient enterprise. Legislative intervention in matters of ARRC management would also contradict a previous legislative directive that the Railroad "carry out its responsibilities on a self-sustaining basis" and "provide for the prudent operation of the Railroad." The ARRC has been operating according to sound business management practices and will continue to do so without additional legislation.

Mandatory caboose legislation would also undermine the bargaining process between unions and railroads, which have already addressed and resolved the caboose issue. If either side may use legislative processes to overturn agreements, contract negotiations will become virtually meaningless.

IS SAFETY AT STAKE?

The ARRC is already directed by the Legislature, the Federal Railway Administration and a host of other regulatory and occupational safety provisions to provide for safe rail operations. Additionally, the collective bargaining and arbitration process protects legitimate safety concerns while permitting railroads to implement more cost-effective technologies.

CABOOSELESS OPERATIONS - A MODERN DAY NECESSITY FOR RAILROADS

(6)

Summary

1. The historical purpose for the caboose has been eliminated by modern day technology.

The caboose has become a relic of a bygone era of railroading. Most major mainlines are now equipped with centralized traffic control, eliminating the need for a flagman on a halted train to walk back to flag following trains. In a centralized traffic control system, a dispatcher in an office often hundreds of miles away operates switches automatically and signals activated by the train itself warn off those behind it. It has been a long time since brakemen had to go over the tops of cars to set hand brakes on individual cars. The engineer controls air brakes on the entire train. Lighted electronic end-of-train devices mark the end of the train and electronic trackside detectors monitor overheated journal bearings and dragging equipment, a chore once performed visually by crewmen from the caboose. Finally, the use of cabooses by train crews as a home away from home where they bunked and ate their meals also belongs to a long gone era. Today, crews are provided with lodging and meals by the railroad.

2. A comprehensive study of the need for cabooses for safety purposes by a Presidential Emergency Board in 1982 stated:

"...cabooses may be eliminated in each class of service without undermining safety and operational considerations."

The Federal Railroad Safety Act of 1970 (45 U.S.C. 421 et seq.) was enacted by Congress to establish uniform railroad safety standards for the benefit of the public and railroad employees. The Act was designed to eliminate a hodgepodge of conflicting local railroad regulations which were a burden on interstate commerce and a burden to the pocketbooks of consumers. The Federal Railroad Administration, the agency responsible for administering the Federal Railroad Safety Act, has never determined that occupied cabooses contribute to safety.

3. The use of cabooses has historically been an item for labor/management negotiations.

The United Transportation Union reached a national agreement with the railroads on October 15, 1982 which specifically permitted and recognized the right of railroads to eliminate cabooses subject to certain guidelines. Today, elimination of cabooses continues to be negotiated or arbitrated pursuant to the National Agreement.

4. Cabooses are a financial burden to deregulated railroads.

Continued operation and maintenance of obsolete cabooses constitutes a costly and unnecessary waste of limited resources. If railroads and the jobs they provide are to survive in the highly competitive transportation market, they must eliminate wasteful spending of capital which inevitably is translated to higher shipping rates.

APR 30 '86 15:35 ARRC.RANCH ALASKA

45 USC 1207 a 4 (Portion of the Alaska Railroad Transfer Act)

§ 1207. State operation

(a) Laws, authorities, etc., applicable to State-owned railroad with status as rail carrier engaged in interstate and foreign commerce

(1) After the date of transfer to the State pursuant to section 1203 of this title, the State-owned railroad shall be a rail carrier engaged in interstate and foreign commerce subject to the jurisdiction of the Interstate Commerce Commission under chapter 105 of subtitle IV of Title 49, and all other Acts applicable to rail carriers subject to that chapter, including the antitrust laws of the United States, except, so long as it is an instrumentality of the State of Alaska, the Railroad Retirement Act of 1974 (45 U.S.C. 231 et seq.), the Railroad Retirement Tax Act (26 U.S.C. 3201 et seq.), the Railway Labor Act (45 U.S.C. 151 et seq.), the Act of April 22, 1908 (45 U.S.C. 51 et seq.) (popularly referred to as the "Federal Employers' Liability Act"), and the Railroad Unemployment Insurance Act (45 U.S.C. 351 et seq.). Nothing in this chapter shall preclude the State from explicitly invoking by law any exemption from the antitrust laws as may otherwise be available.

(2) The transfer to the State authorized by section 1203 of this title and the conferral of jurisdiction to the Interstate Commerce Commission pursuant to paragraph (1) of this subsection are intended to confer upon the State-owned railroad all business opportunities available to comparable railroads, including contract rate agreements meeting the requirements of section 10713 of Title 49, notwithstanding any participation in such agreements by connecting water carriers.

(3) All memoranda which sanction noncompliance with Federal railroad safety regulations contained in 49 CFR Parts 209–236, and which are in effect on the date of transfer, shall continue in effect according to their terms as "waivers of compliance" (as that term is used in section 431(c) of this title).

Portion prohibiting the State of Alaska from requiring a minimum number of personnel on trains

(4) The operation of trains by the State-owned railroad shall not be subject to the requirement of any State or local law which specifies the minimum number of crew members which must be employed in connection with the operation of such trains.

(5) Revenues generated by the State-owned railroad shall be retained and managed by the State-owned railroad for railroad and related purposes.

(6)(A) After the date of transfer, continued operation of the Alaska Railroad by a public corporation, authority or other agency of the State shall be deemed to be an exercise of an essential governmental function, and revenue derived from such operation shall be deemed to accrue to the State for the purposes of section 115(a)(1) of Title 26. Obligations issued by such entity shall also be deemed obligations of the State for the purposes of section 103(a)(1) of Title 26, but not obligations within the meaning of section 103(b)(2) of Title 26.

(B) Nothing in this chapter shall be deemed or construed to affect customary tax treatment of private investment in the equipment or other assets that are used or owned by the State-owned railroad.

(b) Procedures for issuance of certificate of public convenience and necessity; inventory, valuation, or classification of property; additional laws, authorities, etc., applicable

As soon as practicable after January 14, 1983, the Interstate Commerce Commission shall promulgate an expedited, modified procedure for providing on the date of transfer a certificate of public convenience and necessity to the State-owned railroad. No inventory, valuation, or classification of property owned or used by the State-owned railroad pursuant to subchapter V of chapter 107 of Title 49, shall be required during the two-year period after the date of transfer. The provisions of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) and section 6362(b) of Title 42 shall not apply to actions of the Commission under this subsection.

(c) Eligibility for participation in Federal railroad assistance programs

The State-owned railroad shall be eligible to participate in all Federal railroad assistance programs on a basis equal to that of other rail carriers subject to the jurisdiction of the Interstate Commerce Commission under chapter 105 of subtitle IV of Title 49.

(d) Laws and regulations applicable to National Forest and Park lands; covered lands; limitations on Federal actions

After the date of transfer to the state pursuant to section 1203 of this title, the portion of the rail properties within the boundaries of the Chugach National Forest and the exclusive-use easement within the boundaries of the Denali National Park and Preserve shall be subject to laws and regulations for the protection of forest and park values. The right to fence the exclusive-use easement within Denali National Park and Preserve shall be subject to the concurrence of the Secretary of the Interior. The Secretary of the Interior, or the Secretary of Agriculture where appropriate, shall not act pursuant to this subsection without consulting with the Governor of the State of Alaska or in such a manner as to unreasonably interfere with continued or expanded operations and support functions authorized under this chapter.

(Pub.L. 97–468, Title VI, § 608, Jan. 14, 1983, 96 Stat. 2573.)

References in Text. The antitrust laws, referred to in subsec. (a)(1), are classified generally to section 1 et seq. of Title 15, Commerce and Trade.

The Railroad Retirement Act of 1974, referred to in subsec. (a)(1), is Title I of Pub.L. 93–445, Oct. 16, 1974, 88 Stat. 1305, and is classified generally to subchapter IV (section 231 et seq.) of chapter 9 of this title. Such Title I completely amended and revised the Railroad Retirement Act of 1937 (approved June 24, 1937, c. 382, 50 Stat. 307), and as thus amended and revised, the 1937 Act was redesignated the Railroad Retirement Act of 1974. Previously, the 1937 Act had completely amended and revised the Railroad Retirement Act of 1935 (approved Aug. 29, 1935, c. 812, 49 Stat. 967). Section 201 of the 1937 Act provided that the 1935 Act, as in force prior to amendment by the 1937 Act, may be cited as the Railroad Retirement Act of 1935; and that the 1935 Act, as amended by the 1937 Act, may be cited as the Railroad Retirement Act of 1937. The Railroad Retirement Acts of 1935 and 1937 were classified to subchapter II (section 215 et seq.) and subchapter III (section 228a et seq.), respectively, of chapter 9 of this title. For complete classification of this Act to the Code, see section 231t of this title and Tables volume.

The Railroad Retirement Tax Act, referred to in subsec. (a)(1), is Act Aug. 16, 1954, c. 736, §§ 3201, 3202, 3211, 3212, 3221, and 3231 to 3233, 68A Stat. 431, which is classified generally

What's the real issue? Who should decide?

Point

by Frank G. Turpin

THE NOSTALGIC PICTURE of a brightly painted caboose tagging along behind a meandering freight train is part of the colorful tradition of railroading in Alaska and elsewhere. This historical perspective regarding cabooses has created through the years a very strong emotional reaction among railroaders, the general public, and now, most recently, from Alaska's legislators.

The status of the caboose has been debated in nearly 30 states in the last several years with only two states actually passing legislation requiring cabooses. Now it is Alaska's turn to look at the issue. The argument is a classic struggle between railroad companies who wish to modernize and improve system efficiencies and railroad unions who are seeking to protect jobs.

The proposed legislation being discussed in Juneau, HB 436, would require a manned caboose to accompany freight trains longer than 1,000 feet. The issue has been introduced under the label of "safety," but the real argument probably revolves around three separate questions:

1. Who should decide when to assign cabooses? The unions? The legislature? Or the Alaska Railroad management?

2. Is the railroad union leadership using safety as a guise for job protection?

3. Is the Alaska Railroad operating a safe and efficient system without a mandatory boose law?

BEFORE EXPLORING these questions it is important to state for the record that the Alaska Railroad does not plan to eliminate cabooses from its train operations in the near future. Until the railroad can install modern, automated equipment and invest in the detection devices that would allow elimination of cabooses, the railroad will continue to use them.

The technology and modernization that would be required to transform the Alaska railroad to a total "cabooseless" system is many dollars and years away from us right now. The railroad has never eliminated a caboose from an existing freight train. We believe, however, that it is inappropriate for a state legislature to interfere in what is essentially and historically a management or collective bargaining issue.

Currently the Alaska railroad operates only one train, the Arctic Fox, without a caboose. It has never had a caboose. The 10 to 15 car configuration and new, modern equipment deployed in this train allow for safe and efficient operation. This is a new service, providing fast trailer and container service between Anchorage and Fairbanks and expanding the number of total railroad jobs available. It has been accident-free since its inception last summer. Because the articulated flat cars are each 160 feet long, even this new train service would require a caboose if the proposed legislation is passed.

Despite much rhetoric from union spokespeople, safety and cabooses are not irrevocably linked as they insist. A recent National Railway Labor Conference study determined there was no significant difference from a safety standpoint whether a train was operated with or without a caboose. The accident frequency rate per million train miles for trains with cabooses was 5.19, while the frequency rate per million train miles for cabooseless operations was slightly better at 5.15. The bottom line is that a caboose is not essential for safety, or for its other traditional functions, such as administrative duties and lodging, with the advent of modern railroad technology.

UNTIL THIS modern technology is added to the Alaska Railroad, inspections are made by crew members either from their vantage point in the locomotive when they meet opposing trains or on the ground during an inspection known as a "roll by."

A "roll by" requires a crew member to leave the locomotive and stand at trackside to visually inspect the train as it is slowly pulled forward. After the train has passed the crewman completely, he crosses the tracks to inspect the opposite side of the train as it is backed up. He then returns to the locomotive. At least five of these inspections are performed on all freight trains traveling between Anchorage and Fairbanks.

Daily, all trains are inspected by railroad employees living and working along the tracks. Known as "maintenance of way" personnel, these employees are stationed about every 30 miles along the line.

The caboose legislation is essentially asking legislators to act on an issue that has already been resolved nationally in agreements between the union and the railroads. In 1982 both factions agreed to the eventual elimination of cabooses nationwide. Therefore, this kind of legislation is not needed, a conclusion reached by 26 other states when they rejected this effort by the national union to nullify the negotiated agreements through implementation of mandatory caboose laws. If passed, HB 436 would seriously restrict the future improvement, efficiency and productivity of the Alaska Railroad Corporation.

I FIRMLY BELIEVE that the caboose issue is a matter to be resolved by safety-conscious railroad managers on a train-by-train basis as they evalute train configurations, work assignments, and the availability of new technologies. The Alaska Railroad's safety record is excellent and we constantly seek ways to improve our performance. In fact, we are currently rated by the Federal Railroad Administration as the second safest in a class of 24 similar sized railroads nationwide.

I can assure you that the management and the employees of the Alaska Railroad Corporation are proud to work in Alaska and pledge that the Alaska railroad will continue to provide safe, efficient transportation for all Alaskans.

Frank G. Turpin is President and Chief Executive Officer of the Alaska Railroad.

When it comes to safety, technology can't replace experience

Counterpoint

by Clinton W. Gray

POSE THE QUESTION, "What is a railroad caboose?" to any Alaskan in the state, and you will find that the number of different answers you will hear is directly related to the number of times that you ask the question.

Try it on yourself. What does "caboose" mean to you?

Is a caboose the little red car on the end of the train that was (and still is) the featured character in the first book that you were able to read on your own as a child?

Is it merely the last car on a railroad train going across the road crossing? Is it the one car on that train that you are interested in enough to watch for, knowing that when it is clear of the crossing, you can now continue on with your business or trip?

Is the caboose (as one 9-year-old stated) "where the man stays and comes out and yells at us to quit playing on the track?"

Or is the caboose still the home-away-from-home for that "quaint" and unusual breed of men that work on those mysterious trains that come and go in the night carrying their equally mysterious cargo?

The answer to me, and to many others, is easy. It is easy for virtually hundreds of reasons. The purpose of a caboose is to protect against hazards associated with train derailments, shifted cargo, burning wheel bearings, right-of-way fires, highway-rail crossing accidents and many other mishaps.

There is ample evidence recorded to illustrate that each of these threats to the public and operating employees' safety is real and occurs with some degree of regularity. In my opinion, manned cabooses, used in conjuction with other safety devices, are the best means currently available to minimize the potentially disastrous effects of many of these safety threats.

SOME CRITICS of the present legislation to retain cabooses, including the Alaska Railroad Corporation, contend that electronic monitoring devices adequately detect failed equipment, fires and other safety threats without a manned caboose. First, I'd like to point out that the Alaska Railroad has few of these devices, and to my knowledge they are not planning to install additional devices in the near future. As important, the Outside railroads that have these monitoring devices have discovered they are not failsafe. It is recorded that trainmen have found that you can actually have a burning box car pass over a "hot box detector" without activating it. Moreover, these alternatives do not and cannot meet every need that is currently met by a manned caboose.

I will acknowledge that there is less need now for a manned caboose in certain situations, and I support the use of all available mechanical monitoring devices. But there is ample evidenece that a crew member at the end of a train can see a safety threat that electronic devices cannot detect and that retention of manned cabooses still plays an essential role in the early detection of equipment defects and other problems before they can cause derailments or other damages.

The Alaska Railroad management has testified that the caboose is a collective bargaining issue that should be negotiated. There would only be management and labor at the bargaining table. Unfortunately, no one would be there to represent the Alaskan public.

The Alaska Railroad has also testified that they already must comply with many federal safety regulations. While this general statement is not particularly relevant to the caboose issue, I nevertheless would like to point out that railroad safety legislation was a result of unnecessary accidents or worse yet, deaths of railroad employees or members of the public. I would hope that the Alaska legislature does not intend to play Russian roulette with whether unrelated safety regulations, new technology or no technology, could provide a safe rail system in Alaska. We should not forget the recent lessons of the Crown Point Alaska gas leak or the tragic space shuttle Challenger disaster.

THE CABOOSE is the single most important safety feature on a train, and a train needs all of its safety features, particularly in Alaska where long trains often carrying hazardous materials are transported through varied terrain and under many adverse conditions in highly populated and remote areas. It is simply not possible to replace with one or more machines, the eyes, ears, nose, voice and brain of an experienced employee who can see views of a moving train that cannot be seen from any other position, and who can detect and respond to a variety of problems at a moment's notice.

For these reasons, the Alaska legislature in its wisdom has the right and the obligation to take every reasonable step to guarantee that cabooses will continue to be used under appropriate circumstances to protect the safety of the general public and of our train crews. It is not enough to simply leave it to the Alaska Railroad Corporation to do the "right thing."

Clinton W. Gray worked as a conductor for 12 years on the Alaska Railroad and is Legislative Representative for the United Transportation Union Local 1626.

Editori

The obsolete caboose

THE FIRST QUESTION raised by the derailment of an Alaska Railroad coal train yesterday was, "Did it have a caboose?"

The answer is "yes."

That question and answer are pertinent because the House at Juneau voted approval on Monday of a bill that would require cabooses on most freight trains for safety reasons.

The records of the Alaska Railroad show that every freight train that has had a derailment — and there have been a half dozen or so since the state took over the railroad a year ago — has had a caboose. Conversely, the record shows that no freight train without a caboose has ever had an accident of any sort.

That last statement, although factual, has only limited significance because the railroad has only one train — the Arctic Fox — that operates without a caboose. However, railroads Outside have long records of operations without cabooses.

The national record for all railroads show there have been about the same number of accidents with cabooses as without. That means the presence of a caboose has nothing to do with the occurrence of accidents.

THE LEGISLATION requiring cabooses has the strong support of the United Transportation Union. It has approved the Alaska operations of the Arctic Fox, but now seeks to retain cabooses on all other trains. While the union claims the caboose will assure public safety, there is no factual basis to support it.

Railroad management contends economics and technology have made the caboose obsolete. The cars cost $80,000 each and weigh 27 tons. They are being replaced by a machine, known as an end-of-train device, that blinks a red light to warn following trains.

The original purpose of cabooses was to provide living quarters for train crews in the old days of long distance runs. Crews would be away from home for four or five days, or even more. The caboose was their rolling hotel.

With passage of time, operating speeds have increased, transit time decreased. The runs are shorter and crew time on duty is less.

WHEN THE STATE took over the railroad, the legislature forbade any state law that specified the number of crew members a train must have. In 1982 the UTU agreed to the elimination of cabooses under certain conditions. In 1985 it agreed to expedite their removal.

Those agreements showed the union's willingness to live with the newest trends and technology, as they did when coaling stations and water tanks were eliminated when steam locomotives were replaced by diesels.

The state has made it public policy to allow the railroad corporation to operate as a private enterprise, free of politics insofar as possible. The House is violating that policy by passing this bill, which would inject politics into railroad management.

To serve Alaskans best, the railroad must be allowed to operate like a railroad, not a political plaything.

Trainman says caboose unsafe, unnecessary

Letters to the editor

Dear Editor:

I recently retired from the Alaska Railroad after 35 years of service. At the time of retirement, I occupied the number one position on the conductor's seniority roster. From 1951 through 1974, I performed service as a brakeman conductor. I also served as vice-chairman of the grievance committee, as safety representative, and alternate legislative representative for the Brotherhood of Railroad Trainmen (predecessor organization to the United Transportation Union (UTU)), and had 30 years continuous membership in the Brotherhood of Railroad Trainmen and UTU combined.

Since 1974, I have held the positions of relief yardmaster, trainmaster, and retired as superintendent of transportation.

My entire railroad career of 35 years was spent as an operating employee, trainman, and/or officer. During that time, I have worked and ridden in wooden cabooses with coal stoves and oil lamps and in "new" steel cabooses with oil stoves and electric lights. They all, every one, have been hot and dusty in the summer, cold and odorous in the winter, and always noisy, uncomfortable and downright dangerous when moving.

The lookout function, which the UTU has alleged as most critical, has in this day and age of longer and faster trains become ineffective. The historic limitations of darkness, rain, blowing, swirling snow, and/or dust, plus track curvature which generally result in the inability of either the head end (engine) crew or the rear end (caboose) crew to see much more than a few cars ahead of the caboose or behind the engines, are further diminished by train length, with the majority of the train in the middle not being observed at all, or if observed, not clearly so. Therefore, railroad standard operating rules still require that roll-by (wayside) inspections be made by the train's crew and also require all other employees on the wayside (along the track) or on other trains, to likewise inspect each passing train.

The moving roll-by (wayside) inspection has proven to be, by far, the most reliable and effective manner of train inspection. The implication made by the UTU that train operation is safer with a manned caboose on the rear is just not so!

It is also notable that while no injuries to the public, communities, or families, etc., have occurred as a result of derailments on the ARR over the past five years, there were during that five-year period a total of seven personal lost-time injuries sustained by brakemen or conductors, either riding in or getting on or off a caboose.

One could easily conclude, and rightly so, that not only has "The Little Red Caboose" (which most people regard fondly as a reminiscent symbol of railroading) outlived its usefulness, but has in fact, become a negative factor in regard to railroad train safety.

The benefits of its continued use in almost all situations is not commensurate with the risk of injury to which its occupants are exposed nor with the expense of its operation and maintenance.

The Honorable Representative Cato
House of Representatives
P.O. Box V
Juneau, Alaska 99811

Dear Representative Cato:

I am writing of behalf of the United Transportation Union, Local 1826 regarding proposed amendments to HB436, An Act requiring a properly equipped and staffed caboose on certain trains. My clients have asked me to advise you that they intend to propose, through Representative Pignalberi and the House Rules Committee, the following amendments:

1) Line 12, after "property", add the words maintained and. This section would then read:

> "(1) A train that exceeds 1,000 feet in length including locomotives shall have a properly maintained and equipped caboose...."

This amendment should help assure that cabooses are used for their full useful lives and are not taken out of service prematurely due to lack of normal preventive maintenance.

2) An additional exception in 42.30.260 offered in the spirit of compromise which effectively would exempt the "FOX" from the requirements of 42.30.250 to read as follows:

> "3) to a train composed exclusively of TOFC (Trailer on Flat Car)/COFC (Container on Flat Car) equipment not exceeding 1825 feet in length including locomotives, provided that hazardous or toxic materials are located in the first 1,000 feet of the train as measured from the lead locomotive."

If you have any questions or comments, please give me a call.

Thanks.

Yours truly,

David Rogers

Wagstaff, Pope, and Rogers
UTU Proposed amendments to Original Bill

Dept. of Transportation & Public Facilities

Position Paper

BILL NO: HB 436 and SB 313

APPROVED: R. J. Knapp
Commissioner

TITLE: An Act requiring a properly equipped and staffed caboose on certain trains.

DATE: March 3, 1986

Although not an issue of direct concern to the Department of Transportation and Public Facilities (DOT&PF), it is appropriate to provide certain comments given the DOT&PF Commissioner's role on the Board of Directors of the Alaska Railroad Corporation (ARRC). However, it is important that these comments not be construed as the official position of the ARRC regarding HB 436. ARRC management should be contacted separately to solicit their formal views on this matter.

The central question underlying this legislation is whether to mandate by statute the use of cabooses for certain types of trains, with little regard for technological improvements and variety in train consists that may have a direct bearing on the need for cabooses. Evidence from the rail industry and at the Alaska Railroad suggests this sort of non-discretionary arrangement is unwarranted and may add unnecessary costs to train operations. More detailed information regarding these issues can be found in the ARRC's Position Paper on HB 436, dated February 14, 1986.

Another concern is DOT&PF's perception that this type of legislation may be inconsistent with the spirit and intent of the state Alaska Railroad Corporation Act (ARCA), which established the ARRC as an independent, public corporation to own and operate the Alaska Railroad under state ownership. ARCA sets out explicit direction regarding goals and objectives for operation and management of the Alaska Railroad, and provides broad powers for the ARRC Board of Directors to oversee and manage these responsibilities. Included are the requirements to provide "safe, efficient, and economical transportation," to "be exclusively responsible for the management of the financial and legal obligations of the Alaska Railroad," and to "carry out its responsibilities on a self-sustaining basis." HB 436 appears to run counter to this approach by attempting to limit management's ability to meet these different goals. This is unfortunate coming so soon following passage of ARCA, and the apparent absence of evidence that ARRC management has failed to meet its statutory responsibilities.

In summary, DOT&PF is unaware of any real evidence that suggests this legislation is warranted, and respectfully submits that HB 436 contradicts the spirit and intent of ARCA by unnecessarily attempting to legislate decisions reserved for management.

MEMORANDUM

TO: Representative Rick Uehling

ATTN: David Cobb

FROM: Mary Jennings MJ
Legislative Analyst

RE: Speed Limits in Other States
Research Request 86-113

You requested information regarding regulations and policies in other states which guide how speed limits are set, specifically, in parks, schools, and neighborhoods with children. You requested we examine policies in Arizona, California, Connecticut, Massachusetts, New York, Oregon, and Virginia.

Conclusions

Arizona, California, Massachusetts, Oregon, Virginia, and Washington have statutes that set speed limits in business, residential, and school areas.[1] In Connecticut and New York, the speed limit for state highways in these areas is set by the State Department of Transportation (DOT). Oregon was the only state that had a statute specifically applying to state highways in parks.

Arizona. According to statute, the speed limit for state highways in business or residential districts is 25 miles per hour (mph) and in school zones with children present the limit is 15 mph. Local authorities set the limits for roads within their jurisdiction, but cannot raise or lower speed limits by increments of more than 10 mph.

California. Speed limits are addressed in the California Vehicle Code. For state highways in residential or business districts the speed limit

---

[1]For various state definitions of these areas see Attachment A.

is 25 mph and the limit in school zones with children present is 25 mph. Local authorities may determine a different speed for roads in their jurisdiction under procedures set forth in the Vehicle Code.

Connecticut. In Connecticut, the DOT has the authority to set speed limits on state highways in residential, business, and school areas. Roads under the jurisdiction of local authorities must have speed limits approved by the DOT.

Oregon. For state highways in residential and business districts and state roads in parks and beaches, Oregon statute sets the speed limit at 25 mph. In school zones with children present the limit is 20 mph. The Oregon State Speed Control Board approves speed limits set by local authorities for roads under local jurisdiction.

Masschusetts. According to statute, the speed limit for state highways inside a residential or business district is 30 mph. In a school zone, the limit is 20 mph. Roads under the jurisdiction of local authorities must have speed limits approved by the DOT and the Registry of Motor Vehicles.

New York. The DOT sets speed limits for state highways in business, residential, and school areas. Roads under the jurisdiction of local authorities must have speed limits approved by the DOT.

Virginia. According to statute, the speed limit for state highways in business or residential districts is 25 mph. In schools zones with children present, the limit is 25 mph. Speed limits for roads under the jurisdiction of local authorities are set by the local authorities.

Washington. The Standard Speed Statute in Washington sets a limit of 25 mph for state highways in cities or towns. In school zones with children present, the limit is 20 mph. Speed limits for roads under the jurisdiction of local authority must be approved by the State Maintenance Engineer of the DOT.

I have attached pertinent statutes from California, Connecticut, Massachusetts, and Virginia. For your interest, I have also attached pertinent statutes from Indiana, Hawaii, Louisiana, and Pennsylvania. I hope you find this information useful. If you have any questions or if we can be of further assistance, please contact our office.

MJ

Attachments

Attachment A

Definitions from various states of business, residential and school areas.

Business

The California Vehicle Code defines business district as, "that portion of highway and the property contiguous thereto (a) upon one side of which highway, for distance of 600 feet, 50 percent or more of the contiguous property fronting thereon is occupied by buildings in use for business, or (b) upon both sides of which highway, collectively, for a distance of 300 feet, 50 percent or more of the contiguous property fronting thereon is so occupied. A business district may be longer than the distances specified in this section if the above ratio of buildings in use for business to the length of the highway exists."

Residential

The California Vehicle Code defines residence district as, "that portion of highway and the property contiguous thereto, other than a business district (a) upon one side of which highway, within a distance of a quarter of a mile, the contiguous property fronting thereon is occupied by 13 or more separate dwelling houses or business structures, or (b) upon both sides of which highway, collectively, within a distance of a quarter of a mile, the contiguous property fronting thereon is occupied by 16 or more separate dwelling houses or business structures. A residence district may be longer that one-quarter of a mile if the above ratio of separate dwelling houses or business structures to length of the highway exists."

Massachusetts statute defines residential area as, "a thickly settled district."

Oregon statute defines a residential area as, "highway that has solid residential type dwellings for 300 feet on both sides of the highway."

School Zone

Virginia statute defines school zone as, "between portable signs, tilt-over signs, or fixed blinding signs placed in or along any highway bearing the word 'school' or 'school crossing'."

The California Vehicle Code defines school zone as, "When passing a school building or the grounds thereof, contiguous to a highway and posted with a standard 'SCHOOL' warning sign, while children are going to or leaving the school either during school hours or during the noon recess period...when passing any school grounds which are not separated from the highway by fence, gate or other physical barrier while the grounds are in use by children and the highway is posted with a standard 'SCHOOL' warning sign."

Attachment B

Statutes pertaining to the setting of speed limits.

California Vehicle Code 1984

movement, in which event notice as applicable to such additional traffic lane shall be given by any official traffic control device.

(c) When right- or left-hand turns are prohibited at an intersection notice of such prohibition shall be given by erection of a sign.

(d) When official traffic control devices are placed as required in subdivisions (b) or (c), it shall be unlawful for any driver of a vehicle to disobey the directions of such official traffic control devices.

Amended Ch. 481, Stats. 1963. Effective September 20, 1963.
Amended Ch. 545, Stats. 1974. Effective January 1, 1975.

U-Turn in Business District

22102. No person in a business district shall make a U-turn, except at an intersection, or on a divided highway where an opening has been provided in accordance with Section 21651.

Amended Ch. 1318, Stats. 1961. Effective September 15, 1961.
Amended Ch. 622, Stats. 1970. Effective November 23, 1970.

U-Turn in Residence District

22103. No person in a residence district shall make a U-turn when any other vehicle is approaching from either direction within 200 feet, except at an intersection when the approaching vehicle is controlled by an official traffic control device.

Amended Ch. 255, Stats. 1963. Effective September 20, 1963.
Amended Ch. 622, Stats. 1970. Effective November 3, 1970.

Turning Near Fire Stations

22104. No person shall make a U-turn in front of the driveway entrance or approaches to a fire station. No person shall use the driveway entrance or approaches to a fire station for the purpose of turning a vehicle so as to proceed in the opposite direction.

Amended Ch. 622, Stats. 1970. Effective November 23, 1970.

Unobstructed View Necessary for U-Turn

22105. No person shall make a U-turn upon any highway where the driver of such vehicle does not have an unobstructed view for 200 feet in both directions along the highway and of any traffic thereon.

Amended Ch. 622, Stats. 1970. Effective November 23, 1970.
Amended Ch. 64, Stats. 1972. Effective March 7, 1973.

Starting Parked Vehicles or Backing

22106. No person shall start a vehicle stopped, standing, or parked on a highway, nor shall any person back a vehicle on a highway until such movement can be made with reasonable safety.

Turning Movements and Required Signals

22107. No person shall turn a vehicle from a direct course or move right or left upon a roadway until such movement can be made with reasonable safety and then only after the giving of an appropriate signal in the manner provided in this chapter in the event any other vehicle may be affected by the movement.

Amended Ch. 1996, Stats. 1959. Effective September 18, 1959.

Duration of Signal

22108. Any signal of intention to turn right or left shall be given continuously during the last 100 feet traveled by the vehicle before turning.

Signal When Stopping

22109. No person shall stop or suddenly decrease the speed of a vehicle on a highway without first giving an appropriate signal in the manner provided in this chapter to the driver of any vehicle immediately to the rear when there is opportunity to give the signal.

Method of Signaling

22110. The signals required by this chapter shall be given either by means of the hand and arm or by a signal lamp, but when the body or load on any vehicle or combination of vehicles projects 24 inches or more to the left of the center of the steering wheel so that a hand and arm signal would not be visible both to the front and rear of such vehicle or combination of vehicles, or under any condition when a hand and arm signal would not be visible both to the front and rear of the vehicle or vehicles, then the vehicle or vehicles shall be equipped with, and signals shall be given by, a signal lamp, except that implements of husbandry need not be equipped with signal lamps, but drivers of implements of husbandry shall give a hand and arm signal when required by this chapter.

Amended Ch. 118, Stats. 1961. Effective September 15, 1961.
Amended Ch. 1012, Stats. 1965. Effective September 17, 1965.
Amended Ch. 859, Stats. 1967. Effective November 8, 1967.

Hand Signals

22111. All required signals given by hand and arm shall be given from the left side of a vehicle in the following manner:

(a) Left turn—hand and arm extended horizontally beyond the side of the vehicle.

(b) Right turn—hand and arm extended upward beyond the side of the vehicle, except that a bicyclist may extend the right hand and arm horizontally to the right side of the bicycle.

(c) Stop or sudden decrease of speed signal—hand and arm extended downward beyond the side of the vehicle.

Amended Ch. 153, Stats. 1963. Effective September 20, 1963.
Amended Ch. 751, Stats. 1976. Effective January 1, 1977.

Schoolbus Signal

22112. The driver of a schoolbus shall operate the flashing red signal lamps required on the schoolbus at all times when children are unloading from the schoolbus to cross a highway or private road or when the schoolbus is stopped for the purpose of loading children who must cross a highway or private road to board the schoolbus, except that the signal lamps shall not be operated at any place where traffic is controlled by a traffic officer or official traffic control signal. The schoolbus signal lamps shall not be operated at any other time.

Amended Ch. 533, Stats. 1977. Effective January 1, 1978.
Amended Ch. 813, Stats. 1981. Effective January 1, 1982.

Local Authorities

22113. This chapter does not prevent local authorities, by ordinance, from prohibiting the making of any turning movement by any vehicle at any intersection or between any designated intersections.

CHAPTER 7. SPEED LAWS

Article 1. Generally

Temporary Maximum Speed Limit

22348. (a) Notwithstanding Section 22349, 22356, or any other provision of this chapter ( )[1], no person shall drive a vehicle upon a highway at a speed greater than 55 miles per hour.

(b) Any person who ( )[2] *drives* a vehicle upon a highway at a speed greater than 100 miles per hour is guilty of an infraction punishable, as follows:

(1) Upon a first conviction of a violation of this subdivision, by a fine of not to exceed five hundred dollars ($500). The court may also suspend the privilege of the person to operate a motor vehicle for a period not to exceed 30 days pursuant to Section 13200.5.

(2) Upon a conviction under this subdivision of an offense which occurred within three years of a prior offense resulting in a conviction of an offense under this subdivision, by a fine of not to exceed five hundred dollars ($500). The person's privilege to operate a motor vehicle shall be suspended by the Department of Motor Vehicles pursuant to subdivision (a) of Section 13355.

(3) Upon a conviction under this subdivision of an offense which occurred within five years of two or more prior offenses resulting in convictions of offenses under this subdivision, by a fine of not to exceed five hundred dollars ($500). The person's privilege to operate a motor vehicle shall be suspended by the Department of Motor Vehicles pursuant to subdivision (b) of Section 13355.

(c) Any vehicle subject to Section ( )[2] 22406 shall be driven in a lane designated pursuant to Section 21655, or if no lane has been *so* designated, in the right-hand lane for traffic or as close as practicable to the right-hand edge or curb. When overtaking and passing another vehicle proceeding in the same direction, ( )[4] *the* drivers shall use either the designated lane, the lane to the immediate left of the right-hand lane, or the right-hand lane for traffic as permitted under ( )[3] this code. If, however, specific lane or lanes have not been designated on a divided highway having four or more clearly marked lanes for traffic in one direction, any such vehicle may also be driven in the lane to the immediate left of ( )[4] *the* right-hand lane, unless otherwise prohibited under ( )[5] this code. This subdivision ( )[6] *does* not apply to a driver who is preparing for a left- or right-hand turn or who is in the process of entering into or exiting from a highway or to a driver who ( )[6] *is required* necessarily *to* drive in a lane other than the right-hand lane to continue on his intended route.

(d) This section shall remain in effect 120 days from the date that the 55-mile-per-hour national maximum speed limit, as specified in Section 154 of Title 23 of the United States Code, is repealed.

Added Ch. 1218, Stats. 1973. Operative January 1, 1974.
Amended Ch. 153, Stats. 1975. Effective June 28, 1975 by terms of an urgency clause.
Amended Ch. 217, Stats. 1978. Effective June 8, 1978 by terms of an urgency clause.
Amended Ch. 980, Stats. 1983. Effective January 1, 1984.
Amended Ch. 276, Stats. 1984. Effective January 1, 1985.
The 1984 amendment added the italicized material and at the point(s) indicated deleted the following:
[1] "to the contrary"
[2] "violates subdivision (a) by driving"
[3] "to the provisions of"
[4] "such"
[5] "shall"
[6] "must"

Basic Speed Law

22350. No person shall drive a vehicle upon a highway at a speed greater than is reasonable or prudent having due regard for weather, visibility, the traffic on, and the surface and width of, the highway, and in no event at a speed which endangers the safety of persons or property.

Amended Ch. 252, Stats. 1963. Effective September 20, 1963.

Speed Law Violations

22351. (a) The speed of any vehicle upon a highway not in excess of the limits specified in Section 22352 or established as authorized in this code is lawful unless clearly proved to be in violation of the basic speed law.

(b) The speed of any vehicle upon a highway in excess of the prima facie speed limits in Section 22352 or established as authorized in this code is prima facie unlawful unless the defendant establishes by competent evidence that the speed in excess of said limits did not constitute a violation of the basic speed law at the time, place and under the conditions then existing.

Prima Facie Speed Limits

22352. The prima facie limits are as follows and the same shall be applicable unless changed as authorized in this code and, if so changed, only when signs have been erected giving notice thereof:

(a) Fifteen miles per hour:

(1) When traversing a railway grade crossing, if during the last 100 feet of the approach to the crossing the driver does not have a clear and unobstructed view of the crossing and of any traffic on the railway for a distance of 400 feet in both directions along such railway. This subdivision does not apply in the case of any railway grade crossing where a human flagman is on duty or a clearly visible electrical or mechanical railway crossing signal device is installed but does not then indicate the immediate approach of a railway train or car.

(2) When traversing any intersection of highways if during the last 100 feet of his approach to the intersection the driver does not have a clear and unobstructed view of the intersection and of any traffic upon all of the highways entering the intersection for a distance of 100 feet along all such highways, except at an intersection protected by stop signs or yield right-of-way signs or controlled by official traffic control signals.

(3) On any alley.

(b) Twenty-five miles per hour:

(1) On any highway other than a state highway, in any business or residence district unless a different speed is determined by local authority under procedures set forth in this code.

(2) When passing a school building or the grounds thereof, contiguous to a highway and posted with a standard "SCHOOL" warning sign, while children are going to or leaving the school either during school hours or during the noon recess period. Such prima facie limit shall also apply when passing any school grounds which are not separated from the highway by a fence, gate or other physical barrier while the grounds are in use by children and the highway is posted with a standard "SCHOOL" warning sign.

Amended Ch. 1996, Stats. 1959. 1959. Effective September 18, 1959. Supersedes Ch. 11.
Amended Ch. 530, Stats. 1961. Effective September 15, 1961.
Amended Ch. 409, Stats. 1963. Effective September 20, 1963. Supersedes Ch. 397.
Amended Ch. 813, Stats. 1981. Effective January 1, 1982.

Decrease of State Highway Limits

22354. Whenever the Department of Transportation determines upon the basis of an engineering and traffic survey that the limit of 65 miles per hour is more than reasonable or safe upon any portion of a state highway where the limit of 65 miles is applicable, the department may determine and declare a prima facie speed limit of 60, 55, 50, 45, 40, 35, 30 or 25 miles per hour, whichever is found most appropriate to facilitate the orderly movement of traffic and is reasonable and safe, which declared prima facie speed limit shall be effective when appropriate signs giving notice thereof are erected upon the highway.

Amended Ch. 11, Stats. 1959. Effective September 18, 1959.
Amended Ch. 545, Stats. 1974. Effective January 1, 1975.

Variable Speed Limits

22355. Whenever the Department of Transportation determines upon the basis of an engineering and traffic survey that the safe and orderly movement of traffic upon any state highway which is a freeway will be facilitated by the establishment of variable speed limits, the department may erect, regulate, and control signs upon the state highway which is a freeway, or any portion thereof, which signs shall be so designed as to permit display of different speed limits at various times of the day or night. Such signs need not conform to the standards and specifications established by regulations of the Department of Transportation pursuant to Section 21400, but shall be of sufficient size and clarity to give adequate notice of the applicable speed limit. The speed limit upon the freeway at a particular time and place shall be that which is then and there displayed upon such sign.

Amended Ch. 11, Stats. 1959. Effective September 18, 1959.
Amended Ch. 78, Stats. 1973. Effective January 1, 1974.

Increase of Freeway Limit

22356. Whenever the Department of Transportation, after consultation with the Department of the California Highway Patrol, determines upon the basis of an engineering and traffic survey on existing freeway segments, or upon the basis of ( )[1] *appropriate* design standards and projected traffic volumes in the case of newly constructed freeway segments, that a speed greater than 65 miles per hour would facilitate the orderly movement of vehicular traffic and would be reasonable and safe upon any state highway, or portion thereof, which is a freeway with full control of access and without crossings at grade otherwise subject to a maximum speed limit of 65 miles per hour, the ( )[2] *Department of Transportation, with the approval of the Department of the California Highway Patrol,* may declare a higher maximum speed of 70 miles per hour, and shall cause appropriate signs to be erected giving notice thereof.

No person shall drive a vehicle upon ( )[3] *that* highway at a speed greater than 70 miles per hour.

Repealed Ch. 11, Stats. 1959. Effective September 18, 1959.
Added Ch. 1735, Stats. 1963. Effective September 20, 1963.
Amended Ch. 78, Stats. 1967. Effective November 8, 1967.
Amended Ch. 632, Stats. 1969. Effective November 10, 1969. Supersedes Ch. 91 and Ch. 138.
Amended Ch. 545, Stats. 1975. Effective January 1, 1975.
Amended Ch. 579, Stats. 1984. Effective January 1, 1985.
The 1984 amendment added the italicized material and at the point(s) indicated deleted the following:
[1] "approaching"
[2] "Secretary of the Business and Transportation Agency"
[3] "such"

Increase of Local Limits

22357. Whenever a local authority determines upon the basis of an engineering and traffic survey that a speed greater than 25 miles per hour would facilitate the orderly movement of vehicular traffic and would be reasonable and safe upon any street other than a state highway otherwise subject to a prima facie limit of 25 miles per hour, the local authority may by ordinance determine and declare a prima facie speed limit of 30, 35, 40, 45, 50, 55, or 60 miles per hour or a maximum speed limit of 65 miles per hour, whichever is found most appropriate to facilitate the orderly movement of traffic and is reasonable and safe. The declared prima facie or maximum speed limit shall be effective when appropriate signs giving notice thereof are erected upon the street and shall not thereafter be revised except upon the basis of an engineering and traffic survey. The provisions of this section shall not apply in respect to any 25-mile-per-hour prima facie limit which is applicable when passing a school building or the grounds thereof.

Amended Ch. 11, Stats. 1959. Effective September 18, 1959.
Amended Ch. 631, Stats. 1969. Effective November 10, 1969.

Decrease of Local Limits

22358. Whenever a local authority determines upon the basis of an engineering and traffic survey that the limit of 65 miles per hour is more than is reasonable or safe upon any portion of any street other than a state highway where the limit of 65 miles per hour is applicable, the local authority may by ordinance determine and declare a prima facie speed limit of 60, 55, 50, 45, 40, 35, 30 or 25 miles per hour, whichever is found most appropriate to facilitate the orderly movement of traffic and is reasonable and safe, which declared prima facie limit shall be effective when appropriate signs giving notice thereof are erected upon the street.

Amended Ch. 11, Stats. 1959. Effective September 18, 1959.

Decrease on Narrow Street

22358.3. Whenever a local authority determines upon the basis of an engineering and traffic survey that the prima facie speed limit of 25 miles per hour in a business or residence district or in a public park on any street having a roadway not exceeding 25 feet in width, other than a state highway, is more than is reasonable or safe, the local authority may, by ordinance or

resolution determine and declare a prima facie speed limit of 20 or 15 miles per hour, whichever is found most appropriate and is reasonable and safe. The declared prima facie limit shall be effective when appropriate signs giving notice thereof are erected upon the street.

Added Ch. 1614, Stats. 1965. Effective September 17, 1965.
Amended Ch. 1095, Stats. 1972. Effective March 7, 1973. Supersedes Ch. 372.

Decrease of Local Limits Near Schools

22358.4. Whenever a local authority determines upon the basis of an engineering and traffic survey that the prima facie speed limit of 25 miles per hour established by paragraph (2) or subdivision (b) of Section 22352 is more than is reasonable or safe, the local authority may, by ordinance or resolution, determine and declare a prima facie speed limit of 20 or 15 miles per hour, whichever is justified as the appropriate speed limit by such survey. No such ordinance or resolution shall be effective until appropriate signs giving notice thereof are erected upon the highway nor, in the case of a state highway, until such ordinance is approved by the Department of Transportation and such signs are erected upon the highway.

Added Ch. 102, Stats. 1974. Effective January 1, 1975.

Downward Speed Zoning

22358.5. It is the intent of the Legislature that physical conditions such as width, curvature, grade and surface conditions, or any other condition readily apparent to a driver, in the absence of other factors, would not require special downward speed zoning, as the basic rule of Section 22350 is sufficient regulation as to such conditions.

Added Ch. 11, Stats. 1959. Effective September 18, 1959.

Boundary Line Streets

22359. With respect to boundary line streets and highways where portions thereof are within different jurisdictions, no ordinance adopted under Sections 22357 and 22358 shall be effective as to any such portion until all authorities having jurisdiction of the portions of the street concerned have approved the same. This section shall not apply in the case of boundary line streets consisting of separate roadways within different jurisdictions.

Amended Ch. 209, Stats. 1963. Effective April 29, 1963.

Linking Districts on Local Highways

22360. Whenever a local authority determines upon the basis of an engineering and traffic survey that the limit of 65 miles per hour is more than is reasonable or safe upon any portion of a highway other than a state highway for a distance of not exceeding 2,000 feet in length between districts, either business or residence, the local authority may determine and declare a reasonable and safe prima facie limit thereon lower than 65 miles per hour, but not less than 25 miles per hour, which declared prima facie speed limit shall be effective when appropriate signs giving notice thereof are erected upon said street or highway.

Amended Ch. 11, Stats. 1959. Effective September 18, 1959.

Multiple-Lane Highways

22361. On multiple-lane highways with two or more separate roadways different prima facie speed limits may be established for different roadways under any of the procedures specified in Sections 22354 to 22359, inclusive.

Amended Ch. 209, Stats. 1963. Effective April 29, 1963.

Speed Limit Where Persons at Work

22362. It is prima facie a violation of the basic speed law for any person to operate a vehicle in excess of the posted speed limit upon any portion of a highway where officers or employees of the agency having jurisdiction of the same, or any contractor of the agency or his employees, are at work on the roadway or within the right-of-way so close thereto as to be endangered by passing traffic. This section applies only when appropriate signs,

indicating the limits of the restricted zone, and the speed limit applicable therein, are placed by such agency within 400 feet of each end of such zone. The signs shall display the figures indicating the applicable limit, which shall not be less than 25 miles per hour, and shall indicate the purpose of the speed restriction. Nothing in this section shall be deemed to relieve any operator of a vehicle from complying with the basic speed law.

Amended Ch. 515, Stats. 1970. Effective November 23, 1970.

Restrictions Because of Snow or Ice Conditions

22363. Notwithstanding any speed limit that may be in effect upon the highway, the Department of Transportation in respect to state highways, or a local authority with respect to highways under its jurisdiction, may determine and declare a prima facie speed limit of 40, 35, 30, or 25 miles per hour, whichever is found most appropriate and is reasonable and safe based on the prevailing snow or ice conditions upon such highway or any portion thereof. Signs may be placed and removed as snow or ice conditions vary.

Amended Ch. 515, Stats. 1970. Effective November 23, 1970.
Amended Ch. 545, Stats. 1974. Effective January 1, 1975.

Lane Speed Limits

22364. Whenever the Department of Transportation determines, upon the basis of an engineering and traffic survey, that the safe and orderly movement of traffic upon any state highway will be facilitated by the establishment of different speed limits for the various lanes of traffic, the department may place signs upon the state highway, or any portion thereof. The signs shall designate the speed limits for each of the lanes of traffic.

Added Ch. 1542, Stats. 1965. Effective September 17, 1965.
Amended Ch. 545, Stats. 1974. Effective January 1, 1975.
Amended Ch. 681, Stats. 1982. Effective January 1, 1983.

Article 2. Other Speed Laws

Minimum Speed Law

22400. (a) No person shall drive upon a highway at such a slow speed as to impede or block the normal and reasonable movement of traffic, unless the reduced speed is necessary for safe operation, because of a grade, or in compliance with law.

No person shall bring a vehicle to a complete stop upon a highway so as to impede or block the normal and reasonable movement of traffic unless the stop is necessary for safe operation or in compliance with law.

(b) Whenever the Department of Transportation determines on the basis of an engineering and traffic survey that slow speeds on any part of a state highway consistently impede the normal and reasonable movement of traffic, the department may determine and declare a minimum speed limit below which no person shall drive a vehicle, except when necessary for safe operation or in compliance with law, when appropriate signs giving notice thereof are erected along the part of the highway for which a minimum speed limit is established.

Subdivision (b) of this section shall apply only to vehicles subject to registration.

Amended Ch. 1304, Stats. 1959. Effective September 18, 1959.
Amended Ch. 545, Stats. 1974. Effective January 1, 1975.
Amended Ch. 364, Stats. 1979. Effective January 1, 1980.

Traffic Signals

22401. Local authorities in timing traffic signals may so regulate the timing thereof as to permit the movement of traffic in an orderly and safe manner at speeds slightly at variance from the speed otherwise applicable under this code.

Bridges and Structures

22402. The Department of Transportation may, in the manner provided in Section 22404 determine the maximum speed, not less than five miles per hour, which can be maintained with safety to any bridge, elevated structure, tube, or tunnel on a state highway. Said department may also make a determination with reference to any other highway upon receiving a request therefor from the board of supervisors or road commissioner of the county, the governing body of the local authority having jurisdiction over the bridge, elevated structure, tube, or tunnel.

Amended Ch. 545, Stats. 1974. Effective January 1, 1975.

Local Bridges and Structures

22403. Any local authority may, in the manner provided in Section 22404, determine the maximum speed, not less than five miles per hour, which can be maintained with safety to any bridge, elevated structure, tube, or tunnel under its jurisdiction, or may request the Department of Transportation to make such determination.

Amended Ch. 545, Stats. 1974. Effective January 1, 1975.

Revision of Speed Limit on Bridges and Structures

22404. The Department of Transportation or local authority making a determination of the maximum safe speed upon a bridge, elevated structure, tube, or tunnel shall first make an engineering investigation and shall hold a public hearing.

Notice of the time and place of the public hearing shall be posted upon the bridge, elevated structure, tube, or tunnel at least five days before the date fixed for the hearing. Upon the basis of the investigation and all evidence presented at the hearing, the department or local authority shall determine by order in writing the maximum speed which can be maintained with safety to the bridge, elevated structure, tube or tunnel. Thereupon, the authority having jurisdiction over the bridge, elevated structure, tube, or tunnel shall erect and maintain suitable signs specifying the maximum speed so determined at a distance of not more than 500 feet from each end of the bridge, elevated structure, tube, tunnel, or any approach thereto.

Amended Ch. 545, Stats. 1974. Effective January 1, 1975.

Violations on Bridges and Structures

22405. (a) No person shall drive a vehicle on any bridge, elevated structure, tube, or tunnel constituting a part of a highway, at a speed which is greater than the maximum speed which can be maintained with safety to such structure.

(b) Upon the trial of any person charged with a violation of this section with respect to a sign erected under Section 22404, proof of the determination of the maximum speed by the Department of Transportation or local authority and the erection and maintenance of the speed signs shall constitute prima facie evidence of the maximum speed which can be maintained with safety to the bridge, elevated structure, tube, or tunnel.

Amended Ch. 545, Stats. 1974. Effective January 1, 1975.

Maximum Speed for Designated Vehicles

22406. No person shall drive any of the following vehicles on a highway at a speed in excess of 55 miles per hour:

(a) A motortruck or truck tractor having three or more axles or any motortruck or truck tractor drawing any other vehicle.
(b) A passenger vehicle or bus drawing any other vehicle.
(c) A schoolbus transporting any school pupil.
(d) A farm labor vehicle when transporting passengers.
(e) A vehicle transporting explosives.

Amended Ch. 2134, Stats. 1959. Effective September 18, 1959.
Amended Ch. 62, Stats. 1961. Effective September 15, 1961.
Amended Ch. 376, Stats. 1963. Effective September 20, 1963.
Repealed and added Ch. 78, Stats. 1967. Effective November 8, 1967.
Amended Ch. 678, Stats. 1980. Effective January 1, 1981.

Decreasing Truck Speed Limit

22407. Whenever the Department of Transportation or local authority determines upon the basis of engineering studies and a traffic survey that the speed of 55 miles per hour is more than is reasonable or safe for vehicles mentioned in subdivision (a) of Section 22406 which have a manufacturer's gross vehicle weight rating of 10,000 pounds or more, in descending a grade upon any portion of a highway, the department or local authority, with respect to highways under their respective jurisdiction, may determine and declare a speed limit of 50, 45, 40, 35, 30, 25 or 20 miles per hour, whichever is found most appropriate to facilitate the orderly movement of traffic and is reasonable and safe, which declared speed limit shall be effective for such vehicles when appropriate signs giving notice thereof are erected upon the highway.

Amended Ch. 1210, Stats. 1965. Effective September 17, 1965. Supersedes Ch. 184.
Amended Ch. 78, Stats. 1967. Effective November 8, 1967.
Amended Ch. 82, Stats. 1973. Effective January 1, 1974.

Solid Tire

22409. No person shall operate any vehicle equipped with any solid tire when such vehicle has a gross weight as set forth in the following table at any speed in excess of the speed set forth opposite such gross weight:

When gross weight of vehicle and load is:	Maximum speed in miles per hour:
10,000 lbs. or more but less than 16,000 lbs.	25
16,000 lbs. or more but less than 22,000 lbs.	15
22,000 lbs. or more	12

Metal Tires

22410. No person shall operate any vehicle equipped with any metal tire in contact with the surface of the highway at a speed in excess of six miles per hour.

Decreasing Speed Limit on Grades

22413. Whenever a local authority determines upon the basis of an engineering and traffic survey that the prima facie limit of 25 miles per hour is more than is reasonable and safe on any portion of a street having a grade in excess of 10 percent, the local authority may by ordinance determine and declare a maximum limit of 20 or 15 miles per hour, whichever is found most appropriate and is reasonable and safe. The declared maximum speed shall be effective when appropriate signs giving notice thereof are erected upon the street.

Added Ch. 318, Stats. 1959.

Chapter 8. Special Stops Required

Stop Requirements

22450. The driver of any vehicle approaching a stop sign at the entrance to, or within, an intersection, or railroad grade crossing shall stop at a limit line, if marked, otherwise before entering the crosswalk on the near side of the intersection.

If there is no limit line or crosswalk, the driver shall stop at the entrance to the intersecting roadway or railroad grade crossing.

Amended Ch. 364, Stats. 1969. Effective November 10, 1969.

Stops for Train Signals

22451. (a) The driver of any vehicle approaching a railroad grade crossing shall stop not less than 15 feet from the nearest rail and shall not proceed until he can do so safely, whenever the following conditions exist:

Connecticut.

prima facie evidence that such speed is not reasonable, but the fact that the speed of a vehicle is lower than such limits shall not relieve the operator from the duty to decrease speed when a special hazard exists with respect to pedestrians or other traffic or by reason of weather or highway conditions.

(b) Any person who operates a motor vehicle at a greater rate of speed than is reasonable, other than speeding, as provided for in section 14-219, shall commit the infraction of traveling unreasonably fast.

(P.A. 75-577, S. 7, 126; P.A. 77-103; 77-340, S. 4; P.A. 84-429, S. 65.)

History: P.A. 77-103 clarified proviso re effective date of speed limits; P.A. 77-340 replaced first reference to parking areas for ten or more cars with parking areas as defined in Sec. 14-219a and specified infraction in Subsec. (b) as infraction "of traveling unreasonably fast"; P.A. 84-429 made technical changes for statutory consistency.

See chapter 881b.

Cited. 181 C. 515, 516, 519.
Cited. 38 CS 426, 431, 434, 435, 445. Cited. 39 CS 313, 314.

Sec. 14-219. Speeding. Absolute limits. (a) No person shall operate any motor vehicle (1) upon any highway, road or any parking area for ten cars or more, at such a rate of speed as to endanger the life of any occupant of such motor vehicle, but not the life of any other person than such an occupant; or (2) at a rate of speed greater than fifty-five miles per hour upon any highway.

(b) Any person who operates a motor vehicle (1) on a multiple lane, limited access highway at a rate of speed greater than fifty-five miles per hour but not greater than seventy miles per hour or (2) on any other highway at a rate of speed greater than fifty-five miles per hour but not greater than sixty miles per hour, shall commit an infraction, provided any such person operating a truck, as defined in section 14-260n, shall have committed a violation and shall be fined not less than one hundred dollars nor more than one hundred fifty dollars.

(c) Any person who violates any provision of subdivision (1) of subsection (a) of this section or who operates a motor vehicle (1) on a multiple lane, limited access highway at a rate of speed greater than seventy miles per hour or (2) on any other highway at a rate of speed greater than sixty miles per hour shall be fined not less than one hundred dollars nor more than one hundred fifty dollars, provided any such person operating a truck, as defined in section 14-260n, shall be fined not less than one hundred fifty dollars nor more than two hundred dollars.

(d) No person shall be subject to prosecution for a violation of both subsection (a) of this section and subsection (a) of section 14-222 because of the same offense.

(1949 Rev., S. 2407; 1961, P.A. 379, S. 2; 517, S. 15; 1963, P.A. 289; 595; February, 1965, P.A. 92; P.A. 73-253, S. 1; P.A. 75-577, 6, 126; P.A. 79-609, S. 1; P.A. 80-276, S. 1, 6; P.A. 84-372, S. 5, 9.)

History: 1961 acts amended Subsec. (a) to add parking areas for ten cars or more and deleted exception for Merritt Parkway from first sentence of Subsec. (b); 1963 acts established maximum speed limits in Subsec. (a)(2) and added roads of specially chartered municipal associations; 1965 act added district roads to Subsec. (a); P.A. 73-253 prohibited operation of vehicle at greater than reasonable speed on school property; P.A. 75-577 deleted provisions of Subsec. (a) re operation at greater than reasonable speed, deleted Subsec. (b) re determination of speed limits and relettered former Subsec. (c) as Subsec. (b); P.A. 79-609 reduced speed limit from seventy to fifty-five miles per hour with limit being generally applicable, special limit provisions were deleted; P.A. 80-276 inserted new Subsec. (b) re offenses deemed infractions and expanded Subsec. (c) re speeding offenses and replaced one hundred dollar maximum fine with one hundred dollar minimum fine and one hundred fifty dollar maximum fine; P.A. 84-372 established higher penalties for person operating a truck.

Mass.

Massachusetts

more than two feet above the road at a distance of thirty feet from the vehicle, except that such a spot light may be used for the purpose of reading signs, and as an auxiliary light in cases of necessity when the other lights required by law fail to operate.

No person, except a duly authorized person driving an emergency fire vehicle, shall operate a motor vehicle equipped with metal studded tires upon a public way between May the first and November the first; provided, however, the registrar may authorize the use of such tires before November the first, if weather conditions require the use thereof. Whoever violates the provisions of this paragraph shall be punished by a fine of not more than fifty dollars.

Printed in the U.S.A.

§16A. Stopped motor vehicles.

No person shall cause, suffer, allow or permit the unnecessary operation of the engine of a motor vehicle while said vehicle is stopped for a foreseeable period of time in excess of five minutes. This section shall not apply to (a) vehicles being serviced, provided that operation of the engine is essential to the proper repair thereof, or (b) vehicles engaged in the delivery or acceptance of goods, wares, or merchandise for which engine assisted power is necessary and substitute alternate means cannot be made available, or (c) vehicles engaged in an operation for which the engine power is necessary for an associate power need other than movement and substitute alternate power means cannot be made available provided that such operation does not cause or contribute to a condition of air pollution. Whoever violates any provision of this section shall be punished by a fine of not more than one hundred dollars for the first offense, nor more than five hundred dollars for each succeeding offense.

§17. Speed limits.

No person operating a motor vehicle on any way shall run it at a rate of speed greater than is reasonable and proper, having regard to traffic and the use of the way and the safety of the public. Unless a way is otherwise posted in accordance with the provisions of section eighteen, it shall be prima facie evidence of a rate of speed greater

than is reasonable and proper as aforesaid (1) if a motor vehicle is operated on a divided highway outside a thickly settled or business district at a rate of speed exceeding fifty miles per hour for a distance of a quarter of a mile, or (2) on any other way outside a thickly settled or business district at a rate of speed exceeding forty miles per hour for a distance of a quarter of a mile, or (3) inside a thickly settled or business district at a rate of speed exceeding thirty miles per hour for a distance of one-eighth of a mile, or (4) within a school zone established in conformance with standards of the department of public works at a rate of speed exceeding twenty miles per hour. Operation of a motor vehicle at a speed in excess of fifteen miles per hour within one-tenth of a mile of a vehicle used in hawking or peddling merchandise and which displays flashing amber lights shall likewise be prima facie evidence of a rate of speed greater than is reasonable and proper. If a speed limit has been duly established upon any way, in accordance with the provisions of said section, operation of a motor vehicle at a rate of speed in excess of such limit shall be prima facie evidence that such speed is greater than is reasonable and proper; but, notwithstanding such establishment of a speed limit, every person operating a motor vehicle shall decrease the speed of the same when a special hazard exists with respect to pedestrians or other traffic, or by reason of weather or highway conditions. Except on a limited access highway, no person shall operate a school bus at a rate of speed exceeding forty miles per hour, while actually engaged in carrying school children. *(Chgd. eff. 6/17/78; L. 1978, chap. 171).*

§18. Special regulations as to speed.

The city council, the traffic and parking commission of the city of Boston, the selectmen, park commissioners, a traffic commission or traffic director, or the department, on ways within their control, may make special regulations as to the speed of motor vehicles and as to the use of such vehicles upon particular ways, and may prohibit the use of such vehicles altogether on certain ways; provided, that except in the case of a speed regulation no such special regulation shall be effective unless it shall have been published in one or more newspapers, if there be any, published in the town in which the way is situated otherwise in one or more newspapers published in the county in which the town is situated; nor until after the department, and in the case of a speed regulation the department and the registrar, acting jointly, *(Chgd. by L.1984, chap. 84, eff. 9/13/84.)*

Virginia

ATTACHMENT A

§ 46.1-193. Maximum and minimum speed limits. — The maximum and minimum speed limits on highways of this State shall be as hereinafter prescribed.

(1) Maximum limits.

(a) Fifty-five miles per hour on the Interstate System of Highways or other limited access highways with divided roadways.

(b) Fifty-five miles per hour on nonlimited access highways having four or more lanes and on all State primary highways.

(c) Fifty-five miles per hour on highways not included in (a) or (b) if the vehicle is a passenger motor vehicle, passenger bus, United States post office bus, pickup or panel truck or a motorcycle; and forty-five miles per hour on such highways if the vehicle is a truck, road tractor, ~~tractor truck~~, or combination of vehicles designed to transport property, or is a motor vehicle being used to tow a vehicle designed for self-propulsion, or a house trailer.

(d) Thirty-five miles per hour or the minimum speed allowable, whichever is greater, on any highway other than an interstate highway, if the vehicle is being used as a school bus carrying children, and forty-five miles per hour on interstate highways; provided, however, that for any such vehicle which neither takes on nor discharges children between its point of origin and point of destination, the speed limit shall be forty-five miles per hour.

(e) Forty-five miles per hour on any highway if the vehicle or combination of vehicles is operating under a special permit issued by the State Highway and Transportation Commission in accordance with §§ 46.1-330 and 46.1-343. The State Highway and Transportation Commission may, however, prescribe a speed limit of less than forty-five miles per hour on any permit issued in accordance with §§ 46.1-330 and 46.1-343.

(f) Twenty-five miles per hour between portable signs, tilt-over signs, or fixed blinking signs placed in or along any highway bearing the word "school" or "school crossing." Such word or words shall indicate that school children are present in the vicinity. Any signs erected under this section shall be placed not more than six hundred feet from the limits of the school property or crossing in the vicinity of the school, which is used by children going to and from the school; provided that "school crossing" signs may be placed in any location if the Department of Highways and Transportation or the council of the city or town or the board of supervisors of a county maintaining its own system of secondary roads approves the said crossing for such signs. If the portion of the highway to be posted is within the limits of a city or town, such portable signs shall be furnished and delivered by such city or town. If the portion of highway to be posted is outside the limits of a city or town such portable signs shall be furnished and delivered by the State Highways and Transportation Department. It shall be the duty of the principal or chief administrative officer of each school or some responsible person designated by the school board, preferably not a classroom teacher, to place such portable signs in the highway at a point not more than six hundred feet from the limits of the school property and remove such signs when their presence is no longer required by this subsection. Such portable signs, tilt-over signs, or fixed blinking signs shall be placed in a position plainly visible to vehicular traffic approaching from either direction but shall not be placed so as to obstruct the roadway. Such portable signs, tilt-over signs, or blinking signals shall be in a position, or be turned on, for thirty minutes preceding regular school hours and for thirty minutes thereafter and during such other times as the presence of children on such school property or going to and from school reasonably requires a special warning to motorists. Provided, however, that the governing body of any city or town may, if the portion of the highway to be posted is within the limits of such city or town, increase or decrease the speed limit provided in this subsection only after justification for such increase or decrease has been shown by an

engineering and traffic investigation, and provided further that no such increase or decrease in speed limit shall be effective unless such increased or decreased speed limit is conspicuously posted upon the portable signs, tilt-over signs, or fixed blinking signs required by this subsection.

(g) Twenty-five miles per hour on highways in a business or residential district, except upon interstate or other limited access highways with divided roadways.

(h) Thirty-five miles per hour on highways in any city or town, except upon interstate or other limited access highways with divided roadways and except in business or residence districts.

(i) Notwithstanding the provisions of subdivisions (a), (b) and (c) of this subsection, the speed limits for passenger motor vehicles while towing utility, camping or boat trailers not exceeding an actual gross weight of twenty-five hundred pounds shall be the same as that for passenger motor vehicles.

(2) Minimum speed limits.

(a) No person shall drive a motor vehicle at such a slow speed as to impede the normal and reasonable movement of traffic except when reduced speed is necessary for safe operation or in compliance with law.

(b) Whenever the State Highway and Transportation Commissioner or local authorities within their respective jurisdictions determine on the basis of a traffic engineering and traffic investigation that slow speeds on any part of a highway consistently impede the normal and reasonable movement of traffic, the Commissioner or such local authority may determine and declare a minimum speed limit to be set forth on signs posted on such highway below which no person shall drive a vehicle except when necessary for safe operation or in compliance with law.

(3) Notwithstanding the foregoing provisions, the State Highway and Transportation Commissioner or other authority having jurisdiction over highways may decrease the speed limits set forth in subsections (1) (a) through (1) (c) of this section and may increase or decrease the speed limits set forth in subsections (1) (f) through (1) (h) of this section on any highway under its jurisdiction; and may establish differentiated speed limits for daytime and nighttime by decreasing for nighttime driving the speed limits set forth in subsections (1) (a) through (1) (c) of this section and by increasing for daytime or decreasing for nighttime the speed limits set forth in subsections (1) (f) through (1) (h) of this section on any highway under its jurisdiction. Such increased or decreased speed limits and such differentiated speed limits for daytime and nighttime driving shall be effective only when prescribed after a traffic engineering and traffic investigation and when indicated upon the highway by signs; provided, the increased or decreased speed limits over highways under the control of the State Highway and Transportation Commissioner shall be effective only when prescribed in writing by the Highway and Transportation Commissioner and kept on file in the Central Office of the Department of Highways and Transportation.

Any person violating this section shall be guilty of a traffic infraction and upon conviction shall be punished as provided in § 46.1-16.01. (Code 1950, § 46-212; 1950, p. 881; 1952, c. 666; 1954, c. 244; 1956, c. 364; 1958, c. 541; 1960, c. 153; 1962, c. 307; 1964, cc. 118, 408; 1966, c. 85; 1968, c. 641; 1972, cc. 89, 546, 553, 608; 1974, c. 528; 1977, c. 577; 1978, c. 605; 1980, c. 347.)

Cross references. — For definition of business district, see § 46.1-1 (1). For definition of residence district, see § 46.1-1 (24). As to additional penalty when violation occurs while transporting explosives or inflammable gas or liquid, see § 46.1-424.

This section applies to United States employee. — The provisions of this section, fixing the speed limit for automobiles on public highways, must be obeyed by a United States employee while engaged in transporting United States mail in a United States owned automo-

Indiana

139. Reckless driving — IC 9-4-1-56.1

A person operating a vehicle who recklessly:

(1) drives at such an unreasonably high rate of speed, or at such an unreasonably low rate of speed, under the circumstances, as to endanger the safety or the property of others, or as to block the proper flow of traffic;

(2) passes another vehicle from the rear while on a slope or on a curve where vision is obstructed for a distance of less than five hundred (500) feet ahead;

(3) drives in and out of a line of traffic, except as otherwise permitted; or

(4) speeds up or refuses to give one-half (1/2) of the roadway to a driver overtaking and desiring to pass;

commits a Class B misdemeanor; and, if the offense results in damage to the property of another person, the court shall recommend the suspension of the current driving license of the person for a fixed period of not less than thirty (30) days nor more than one (1) year.

140. Failure to dim headlights — IC 9-4-1-56.2

A person operating a vehicle who fails to dim bright or blinding lights when meeting another vehicle or pedestrian commits a Class B infraction.

141. Basic speed law — IC 9-4-1-57

(a) No person shall drive a vehicle on a highway at a speed greater than is reasonable and prudent under the conditions and having regard to the actual and potential hazards then existing. In every event speed shall be so restricted as may be necessary to avoid colliding with any person, or vehicle or other conveyance on or near, or entering a highway in compliance with legal requirements and with the duty of all persons to use due care.

(b) Except when a special hazard exists that requires lower speed for compliance with subsection (a), the limits specified in this section or established as authorized by this section shall be maximum lawful speeds, and no person shall drive a vehicle on a highway at a speed in excess of such maximum limits:

(1) Thirty (30) miles per hour in any urban district.

(2) Fifty-five (55) miles per hour on the interstate defense network of dual highways and in other locations.

(c) The maximum speed limits set forth in this section may be altered as authorized in sections 58 and 61 of this chapter.

(d) The driver of every vehicle shall, consistent with the requirements in subsection (a), drive at an appropriate reduced speed when approaching and crossing an intersection or railway grade crossing, when approaching and going around a curve, when approaching a hill crest, when traveling upon any narrow or winding roadway, and when special hazard exists with respect to pedestrians or other traffic or by reason of weather or highway conditions.

(e) In addition to the other limitations in this section, in section 58, and in any oversize vehicle permit issued under IC 9-8-1 and IC 9-8-1.6, no vehicle that exceeds:

(1) a width of eight (8) feet, six (6) inches;

(2) a height of thirteen (13) feet, six (6) inches; or

(3) a length of eighty (80) feet;

may be operated at a speed greater than forty-five (45) miles per hour.

142. Speed; local authorities, adjustment of limits — IC 9-4-1-58

(a) Whenever local authorities in their respective jurisdictions determine on the basis of an engineering and traffic investigation that the maximum speed permitted under this chapter is greater or less than reasonable and safe under the conditions found to exist on a highway or part of a highway, the local authority may determine and declare a reasonable and safe maximum limit thereon which:

1. decreases the limit within urban districts but not to less than twenty (20) miles per hour; or

2. increases the limit within an urban district but not to more than sixty (60) miles per hour during daytime and fifty (50) miles per hour during nighttime; or
3. decreases the limit outside an urban district, but not to less than thirty-five (35) miles per hour.

(b) Local authorities in their respective jurisdictions shall determine by an engineering and traffic investigation the proper maximum speed for all local streets and shall declare a reasonable and safe maximum speed permitted under this chapter for an urban district.

(c) Any altered limit established as hereinabove authorized shall be effective at all times or during hours of darknes or at other times as may be determined when appropriate signs giving notice thereof are erected on such street or highway.

(d) Local authorities shall not have power to alter speed limits on any highway or extension thereof in the state highway system except that incorporated cities and towns may establish speed limits on state highways upon which a school is located: Provided, That such limit shall only be valid if (1) the limit is not less than twenty (20) miles per hour, (2) the limit is imposed only in the immediate vicinity of the school, (3) children are present, (4) if the speed zone is properly signed, and (5) the department of highways has been notified of the limit imposed, by registered or certified mail.

143. Minimum speed law—operating trucks on interstate IC 9-4-1-59

Sec. 59. (a) No person shall drive a motor vehicle at such a slow speed as to impede or block the normal and reasonable movement of traffic except when reduced speed is necessary for safe operation or in compliance with the law. Any person who is driving at such slow speed and under such circumstances that three (3) or more other vehicles are blocked and can not pass on the left around this vehicle, shall give right-of-way to such vehicle by pulling off to the right of the right lane at the earliest reasonable opportunity and allowing the blocked vehicles to pass.

(b) Whenever the department of highways or local authorities within their respective jurisdictions determine, on the basis of an engineering and traffic investigation that slow speeds on any part of a highway consistently impede the normal and reasonable movement of traffic, the respective department of highways or such local authority may determine and declare a minimum speed limit below which no person shall drive a vehicle except when necessary for safe operation or in compliance with law. A limit so determined and declared by appropriate resolution, regulation or ordinance becomes effective when appropriate sign or signals giving notice of the limit of speed are erected along such part of a highway.

(c) All vehicles that travel at a speed less than the established maximum shall travel in the right lanes to provide for better flow of traffic on interstate defense network of dual highways.

(d) No person shall operate a truck, truck tractor, road tractor, trailer, semitrailer or pole trailer on the interstate defense network of dual highways in any lane except the far right lane, provided that, such vehicles may use the left lane for the purpose of passing a slower moving vehicle, entering or leaving the highway, or where a special hazard exists that requires for safety reasons, the use of an alternate lane.

(e) No person shall operate a truck, truck tractor, road tractor, trailer, semitrailer or pole trailer on any interstate highway consisting of three (3) or more lanes in one (1) direction, in any lane other than the two (2) far right lanes, provided that such vehicles may use an alternate lane where necessary to enter or leave a highway or where a special hazard exists that requires, for safety reasons, the use of an alternate lane.

(f) For the purpose of enforcing this section, the term "trailer" as used in subsections (d) and (e) shall mean the combination of any motor vehicle towing another vehicle or trailer.

(g) The department of highways shall complete the placement of signs or signals on all appropriate roadways no later than January 1, 1975.

144. Speed; state highways; maximum limits IC 9-4-1-61

Whenever the department of highways shall determine on the basis of an engineering and traffic investigation that any maximum speed hereinbefore set forth is greater or less than is reasonable or safe under the conditions found to exist at any intersection or other place or on any part of the state highway system, the department of highways may determine and declare a reasonable and safe maximum limit thereon, which shall be effective when appropriate signs giving notice thereof are erected. Such a maximum speed limit may be declared to be effective at all times or at such times as are indicated on said signs; and differing limits may be established for differing times of day, different types of vehicles, varying weather conditions, and other factors bearing on safe speeds, which shall be effective when posted on appropriate fixed or variable signs.

145. Motorized bicycles (mopeds)—operation of IC 9-4-1-61.1

A motorized bicycle may not be operated by any person under the age of fifteen (15) years, and may not be operated on the interstate defense network of highways or on sidewalks.

146. Speed—form of summons IC 9-4-1-62

(a) In every charge of violation of any speed regulation in this act, the complaint or affidavit, and the summons, warrant or notice to appear, shall specify the speed at which the defendant is alleged to have driven, and the prima facie or fixed speed applicable within the district or at the location.

(b) The provisions of this act declaring or providing for fixed and prima facie speed limitations shall not be construed to relieve the plaintiff in any civil action from the burden of proving negligence on the part of the defendant as the proximate cause of the damage alleged.

147. Driving left of center—when permitted IC 9-4-1-63

Upon all roadways of sufficient width, a vehicle shall be driven upon the right half of the roadway except as follows:

1. When overtaking and passing another vehicle proceeding in the same direction under the rules governing such movement;

2. When the right half of a roadway is closed to traffic under construction or repair;

3. Upon a roadway divided into three (3) marked lanes for traffic under the rules applicable thereon; or

4. Upon a roadway designated and sign-posted for one-way traffic.

5. Upon all roadways any vehicle proceeding at less than the normal speed of traffic at the time and place under the conditions then existing shall be driven in the right-hand lane then available for traffic or as close as practicable to the right-hand curb or edge of the roadway, except when overtaking and passing another vehicle proceeding in the same direction or when preparing for a left turn at an intersection or into a private road or driveway.

148. Trucks; lane restrictions; state highways IC 9-4-1-64

(a) As used in this section, the term "truck" shall mean any motor vehicle designed, used or maintained primarily for the transportation of property. The term "truck" shall include any motor vehicle designed and used primarily for drawing another vehicle and so constructed as to carry a load other than a part of the weight of the vehicle and load so drawn, and any motor vehicle designed and used primarily as a farm implement for drawing plows, mowing machines and other implements of husbandry.

(b) The department of highways is hereby authorized and empowered to restrict, by rule or regulation, the operation of any truck to a certain lane or lanes

Hawaii

every person shall drive at a safe and appropriate speed when approaching and crossing an intersection or railroad grade crossing, when approaching and going around a curve, when approaching a hill crest, when traveling upon any narrow or winding roadway, and when special hazards exist with respect to pedestrians or other traffic, or by reason of weather or highway conditions. [L 1971, c 150, pt of §1; am L 1977, c 8, §1]

Amendment Note

L 1977 rephrased first sentence and substituted "curve" for "curb".

Case Notes

For conviction, there must be evidence that the speed was unreasonable under the actual and potential hazards and conditions then existing. 1 H. App. 403, 619 P.2d 1102.

§291C-102 Noncompliance with speed limit prohibited. (a) No person shall drive a vehicle at a speed greater than a maximum speed limit and no person shall drive a motor vehicle at a speed less than a minimum speed limit established by county ordinance.

(b) The director of transportation with respect to highways under his jurisdiction may place signs establishing maximum speed limits or minimum speed limits. Such signs shall be official signs and no person shall drive a vehicle at a speed greater than a maximum speed limit and no person shall drive a motor vehicle at a speed less than a minimum speed limit stated on such signs. [L 1971, c 150, pt of §1; am L 1984, c 273, §8]

Amendment Note

L 1984 amended section generally.

Case Notes

In prosecution under this section, prosecutor has burden of proving that speed limit was established in one of ways specified in this section. 57 H. 277, 554 P.2d 767.

§291C-103 Racing on highways. (a) Except as provided in section 291C-149, no person shall drive any vehicle in any race, speed competition or contest, drag race or acceleration contest, test of physical endurance, exhibition of speed or acceleration, or for the purpose of making a speed record, and no person shall in any manner participate in any such race, competition, contest, test, or exhibition.

* * *

[am L 1984, c 273, §9]

Revision Note

Only the subsection amended is included in this Supplement.

Amendment Note

L 1984 amended subsection (a).

the forwarding court exercising jurisdiction shall immediately notify the Department of Public Safety thereof. Upon such notification and payment of an additional twenty-five dollars to the Department of Public Safety, the operator's license of the arrested person shall be renewed or reissued for the purpose of this Section. One-half of the additional fine imposed by this Section shall be forwarded by the Department of Public Safety to the forwarding court exercising jurisdiction, to be deposited in that court's criminal court fund and to be used in the same manner as the other sums deposited in said fund.

C. Repealed by Acts 1984, No. 763, § 1.

Added by Acts 1978, No. 301, § 2. Amended by Acts 1980, No. 779, § 1.

1980 Amendment: Added the "A." designating subsec. A, and in that subsection substituted "on" for "upon" before "his written", substituted "fee" for "fine" following "fifty dollar", and substituted "had" for "has" before "honored"; in subsec. B, substituted "dollars" for "dollar fine", and added "to be deposited in that court's criminal court fund and to be used in the same manner as the other sums deposited in said fund"; and added subsec. C.

1984 Legislation: Acts 1984, No. 763, § 1 repealed subsec. C which read: "C. The provisions of this Section shall not apply in Orleans Parish."

Notes of Decisions

Arrest 4
Construction and application 1
Guilty plea 2
Negligence 3
Validity ½

½. Validity

Person of ordinary reasonable intelligence can be expected to know what is "reasonable" and "proper" in control of his vehicle while operating it on public road in conforming his conduct thereto; therefore, this section proscribing failure to maintain reasonable and proper control of vehicle provided fair notice of prohibited conduct and was not unconstitutionally vague on theory that words "reasonable" and "proper" were vague and indefinite. State v. Jackson, Sup.1981, 404 So.2d 952.

1. Construction and application

Finding of negligence on part of driver of vehicle who was traveling at approximately 55 miles per hour in rainstorm and who subsequently pleaded guilty to failure to maintain reasonable and proper control of vehicle was not erroneous. Gregorie v. Hartford Acc. & Indem. Co., App.1977, 348 So.2d 186, writ denied 350 So.2d 1210, 1213.

2. Guilty plea

Although driver's guilty plea to failure to maintain reasonable and proper control of vehicle was not conclusive evidence of negligence, it was competent evidence of such negligence. Gregorie v. Hartford Acc. & Indem. Co., App. 1977, 348 So.2d 186, writ denied 350 So.2d 1210, 1213.

3. Negligence

Cab driver who violated at least two motorist's statutes in striking pedestrian, by failing to maintain control of vehicle and by driving on left side of roadway in marked no passing zone, was negligent, and such negligence was legal cause of pedestrian's injuries. Chiasson v. Whitney, App.1983, 427 So.2d 470, writ denied 433 So.2d 179, 180.

4. Arrest

Where arresting officer went to scene of accident and saw overturned vehicle, officer was informed by plaintiff's parents and sister that plaintiff was the owner and operator of vehicle, and that he had been operating vehicle when it went into the ditch, officer informed plaintiff's relatives that he needed to speak to plaintiff, but plaintiff never attempted to contact him, officer had probable cause to believe that plaintiff had committed the offense of failure to maintain

Louisiana

control, and officer could not be held liable for false arrest. Richard v. State, Through Dept. of Public Safety, App.1 Cir.1983, 436 So.2d 1265, writ denied 441 So.2d 1223.

PART IV. TRAFFIC REGULATIONS

SUBPART A. SPEED RESTRICTIONS

Law Review Commentaries
Contributory negligence as a matter of law—auto collisions in smoke, fog and dust. 28 La.L. Rev. 674 (1968)

§ 61. Maximum speed limit

Text effective if Congress does not repeal penalties for violating the fifty-five mile-per-hour speed limit.

No person shall operate or drive a vehicle on any highway of this state in excess of fifty-five miles per hour; however, if national speed limits are increased to an amount in excess of fifty-five miles per hour, the secretary is authorized to increase the maximum speed limit provided in this Section to a speed limit not in excess of such national speed limit.

Amended by Acts 1964, No. 369, § 1; Acts 1974, No. 521, § 1; Acts 1977, No. 113, § 1, eff. June 22, 1977.

For text effective only if Congress repeals penalties for violating the fifty-five mile-per-hour speed limit, see § 61, post.

§ 61. Maximum speed limit

Text effective only if Congress repeals penalties for violating the fifty-five mile-per-hour speed limit.

A. No person shall operate or drive a vehicle on any highway of this state, excluding Interstate highways, in excess of fifty-five miles per hour; however, if national speed limits are increased to an amount in excess of fifty-five miles per hour, the secretary is authorized to increase the maximum speed limit provided in this Section to a speed limit not in excess of such national speed limit.

B. No person shall operate or drive a vehicle on any Interstate highways of this state in excess of sixty-five miles per hour.

Amended by Acts 1964, No. 369, § 1; Acts 1974, No. 521, § 1; Acts 1977, No. 113, § 1, eff. June 22, 1977; Acts 1982, No. 191, § 1, eff. Jan. 1, 1983, only if Congress has repealed penalties for violating 55 mile-per-hour speed limit (eff. date suspended until sixty days after 1984 Regular Session by H.C.R. No. 4 of 1983).

For text effective if Congress does not repeal penalties for violating the fifty-five mile-per-hour speed limit, see § 61, ante.

Effective Date—1982 Amendment

Section 2 of Acts 1982, No. 191 provided:

"This Act shall become effective on January 1, 1983, if, and only if, Congress has repealed penalties for violating the fifty-five mile-per-hour speed limit provided in Title 23, Section 154, of the United States Code."

'85 Supplement

Note 6

between 40 and 45 miles per hour, with her eyes closed, defendants failed to sustain burden of proof of excessive speed on part of motorcycle's operator. Freeman v. Liberty Mut. Ins. Co., App.1965, 175 So.2d 659.

7. Proximate cause

Evidence supported finding that driver of truck which collided with automobile and subsequently struck second automobile, the occupant of which had received medical and workmen's compensation benefits under plaintiff's policy and collision benefits under plaintiff's automobile liability policy, was driving at an excessive rate of speed prior to collision with the first automobile and that the excessive speed was a proximate cause of the second collision. Fidelity & Cas. Co. of New York v. Aetna Life & Cas. Co., App.1971, 244 So.2d 255.

Testimony of investigating officer and outbound motorist supported finding in personal injury action by passenger in inbound car that outbound motorist was not negligent in crossing inbound lane when reentering highway after stopping at roadside telephone booth, and that excessive speed of inbound car was sole proximate cause of collision. Necaise v. Norris, App. 1970, 242 So.2d 282.

Violation of a speed law does not render a motorist liable unless the infraction is a cause in fact of the accident. McDaniel v. Welsh, App. 1970, 234 So.2d 833.

8. Last clear chance

Where defendant motorist observed 12-year-old pedestrian running toward highway at distance of 300 feet and recognized pedestrian to be child and defendant did not sound horn or slow his vehicle, defendant could reasonably have taken action to stop or slow vehicle so as to permit pedestrian to cross safely, and last clear change doctrine was applicable even though 12-year-old pedestrian was contributorily negligent in running onto heavily traveled highway with but momentary hesitation. Tate v. Hill, App.1967, 197 So.2d 107, writ denied 250 La. 911, 199 So.2d 919.

Where operator of plaintiffs' automobile approached intersection from right at about 15 to 20 miles per hour and observed defendant's vehicle when it was 25 to 30 feet from intersection and immediately applies brakes but collided with right rear fender of defendant's vehicle, operator of plaintiffs' vehicle was engaged in exercise of reasonable care and accident was precipitated by gross negligence of operator of defendant's vehicle and doctrine of last clear chance was not applicable. Kevlin v. Demarest, App.1967, 196 So.2d 336.

In order to invoke doctrine of last clear chance it must be proved that person invoking doctrine was in position of peril of which he was unaware or from which he was unable to extricate himself, that person against whom doctrine is invoked actually discovered or was in position where he could have discovered such other person's peril and that person against whom doctrine is invoked could have avoided accident with exercise of reasonable care. Id.

The doctrine of last clear chance did not apply to a case wherein preceding driver was struck from behind after driving onto highway where visibility had been reduced to a few feet because of low-lying, dense smoke mixed with heavy fog. Walden v. Employers Liability Assur. Corp., App.1967, 195 So.2d 350.

9. Intersections

Evidence in action arising out of collision which occurred at blind intersection of two gravel roads in rural area established that driver of southbound truck and trailer which was struck by eastbound truck was negligent in entering intersection in front of approaching preferred motorist when it was not safe to do so. Ernst v. O'Bannion, App.1973, 278 So.2d 830, writ denied 281 So.2d 749.

Driver of truck which entered intersection at moderate speed on light which had been favorable from 75 to 100 feet before truck reached intersection was not negligent in not according right-of-way and opportunity of completing movement through intersection to automobile which entered intersection at higher rate of speed on unfavorable light where there was little difference in the time the two vehicles entered the intersection, notwithstanding that automobile traveled further into the intersection than truck prior to collision. Meek v. State Farm Mut. Auto. Ins. Co., App.1971, 244 So.2d 661.

Southbound motorist who collided with northbound motorist who was executing left turn at intersection was negligent in going too fast and failing to keep a proper lookout under evidence that prior to collision northbound motorist had been stopped and was signaling for a left turn, that yellow caution light was on at intersection where 25-m.p.h. speed limit was in effect, that automobile of southbound motorist who testified that he did not remember his speed at time of collision left 61 feet of skid marks and that substantial damage occurred to both automobiles indicating a severe impact. Nellon v. State Farm Mut. Auto. Ins. Co., App.1971, 244 So.2d 303.

In view of length of defendants' northbound tractor-trailer rig, slow rate of speed at which it must have entered intersection, and length of time it took to cross intersection, plaintiff, no matter what speed his westbound vehicle was traveling, should have seen trailer rig in time to avoid collision and having failed to see what he should have seen, his negligence was a proximate cause of accident precluding recovery. Thomas v. Lee, App.1970, 243 So.2d 536, writ denied 257 La. 991, 244 So.2d 860.

Evidence in intersection collision case was insufficient to establish that northbound motorist was speeding and thus contributorily negligent at time of collision with eastbound motorist who entered favored street after stopping at stop sign. Hill v. Main Ins. Co., App.1970, 242 So.2d 623.

10. Hills and curves

Evidence that motorist who collided with state trooper's vehicle while the two vehicles were attempting to negotiate a blind curve on a narrow gravel road was familiar with the road, that he entered the blind curve at 35 miles per hour driving well to his left on the narrow road, and that, when the collision occurred, the left portion of each of the two vehicles was beyond the center line sustained determination that the motorist was causally negligent and thus could not recover from parish which maintained the road. Teseno v. St. Landry Parish Police Jury, App. 1977, 343 So.2d 452.

Evidence sustained finding that truck driver's negligence in attempting to enter highway having 60 m.p.h. speed limit in a long, slow moving truck and trailer within 200 feet of curve in that highway was sole cause of accident in which driver of automobile swerved to avoid striking truck, left highway, skidded on wet grass and ultimately struck building. Hebert v. Hanover Ins. Co., App.1971, 244 So.2d 55.

16. Turning

Leading motorist, who was struck from behind in multiple-vehicle accident, was not negligent in stopping in inner lane of hour-lane highway, giving required signal for left turn at intersection with break in neutral ground designed to permit left turns. Henderson v. Ancona, App. 1967, 197 So.2d 150.

19. Radar

Where defendant raised no objections to admissibility of radar and speedometer evidence at trial for speeding, alleged error or irregularity at trial could not be reviewed by the Supreme Court. State v. Kennedy, Sup.1981, 398 So.2d 1082.

20. Failure to prosecute

One-year time limitation for commencement of misdemeanor trial after institution of prosecution was not interrupted by defendant's failure to appear as directed by arresting officer, inasmuch as she was a 16-year resident at same address, which address was reflected on driver's license seized by arresting officer, and her testimony that she was not long absent from her home in two years following the offense and that no efforts were made to serve a warrant on her went uncontradicted, thus, since the time allowed for institution of prosecution had run without interruption, she was entitled to have charges against her dismissed. City of Baton Rouge v. Wheat, Sup.1979, 377 So.2d 1234.

21. Review

Where pro se defendant failed to object to admissibility of radar and speedometer evidence claimed error relating to admission thereof was not before reviewing court. State v. Alford, Sup.1980, 384 So.2d 761.

22. Trial

Defendant who was tried on counts of driving while intoxicated, second offense, illegally carrying a weapon, resisting arrest, and speeding at same time without mention of consolidation, so that charges would be considered as if joined and total possible punishment, which would be sum of maximum possible for each charge, was greater than six months imprisonment, was entitled to a jury trial. State v. Thompson, App. 3 Cir.1984, 446 So.2d 557.

§ 62. Maximum speed limit; certain vehicles

Text of subsec. A effective if Congress does not repeal penalties for violating the fifty-five mile-per-hour speed limit. For text of subsec. A effective only if Congress does repeal penalties for violating the fifty-five mile-per-hour speed limit, see subsec. A, post.

A. No person shall operate any freight carrying vehicle upon the highways of this state at a speed in excess of fifty-five miles per hour; however, if national speed limits are increased to an amount in excess of fifty-five miles per hour, the secretary is authorized to increase the maximum speed limit provided in this Subsection to a speed limit not in excess of such national speed limit.

Amended by Acts 1970, No. 150, § 1; Acts 1974, No. 521, § 2; Acts 1977, No. 113, § 1, eff. June 22, 1977.

Text of subsec. A effective only if Congress repeals penalties for violating the fifty-five mile-per-hour speed limit. For text of subsec. A effective if Congress does not repeal penalties for violating the fifty-five mile-per-hour speed limit, see subsec. A, ante.

'85 Supplement

A. (1) No person shall operate any freight carrying vehicle upon the highways of this state, excluding Interstate highways, at a speed in excess of fifty-five miles per hour; however, if national speed limits are increased to an amount in excess of fifty-five miles per hour, the secretary is authorized to increase the maximum speed limit provided in this Section to a speed limit not in excess of such national speed limit.

(2) No person shall operate any freight carrying vehicle upon the Interstate highways of this state at a speed in excess of sixty miles per hour.

Amended by Acts 1970, No. 150, § 1; Acts 1974, No. 521, § 2, Acts 1977, No. 113, § 1, eff. June 22, 1977; Acts 1982, No. 191, § 1, eff. Jan. 1, 1983 only if Congress has repealed penalties for violating the 55 mile-per-hour speed limit (eff. date suspended until sixty days after 1984 Session by H.C.R. No. 4 of 1983).

B. Forty-five miles per hour shall be the maximum speed at which a person shall be permitted to drive a vehicle which is towing a mobile home; however, when any such mobile home is not less than fifteen feet or more than thirty-two feet in length and is equipped with brakes or when such a mobile home is less than fifteen feet in length and is not equipped with brakes, a person may drive a vehicle towing any such mobile home at a speed not in excess of fifty-five miles per hour at any time between sunrise and sunset and not in excess of fifty miles per hour at any time between sunset and sunrise; however, if national speed limits are increased to an amount in excess of fifty-five miles per hour, the secretary is authorized to increase the maximum speed limit provided in this Subsection to a speed limit not in excess of such national speed limit.

Amended by Acts 1968, No. 181, § 1, Acts 1974, No. 521, § 2; Acts 1977, No. 113, § 1, eff. June 22, 1977.

[See main volume for text of C]

D. No person shall operate a school bus at a speed in excess of 55 miles per hour when transporting children, provided however, that the driver of a school bus transporting children under conditions which require frequent stops to receive and discharge such children shall not operate such school bus at a speed in excess of 35 miles per hour.

Amended by Acts 1966, No. 217, § 2.

Effective Date—1982 Amendment

Section 2 of Acts 1982, No. 191 (§ 1 of which amended subsec. A of this section) provided:

"This Act shall become effective on January 1, 1983, if, and only if, Congress has repealed penalties for violating the fifty-five mile-per-hour speed limit provided in Title 23, Section 154, of the United States Code."

Suspension of Acts 1982, No. 191, § 2

House Concurrent Resolution No. 4 of the 1983 Regular Session provided:

"WHEREAS, Act No. 191 of the 1982 Regular Session of the Legislature established a sixty-five mile per hour speed limit on Interstate highways in Louisiana; and

"WHEREAS, Section 2 of Act No. 191 of the 1982 Regular Session has the effective date of January 1, 1983; and

"WHEREAS, such effective date would apply if, and only if, Congress repeals the penalties for violating the fifty-five mile-per-hour speed limit provided in Title 23, Section 154, of the United States Code; and

"WHEREAS, Congress has not repealed these provisions; and

"WHEREAS, the present law is ineffective unless Congress repeals the penalties for violating the fifty-five mile-per-hour speed limit.

"THEREFORE, BE IT RESOLVED by the House of Representatives of the Legislature of Louisiana, the Senate thereof concurring, that the effective date of Section 2 of Act No. 191 of the 1982 Regular Session is hereby suspended until sixty days after the 1984 Regular Session of the Legislature."

1982 Amendment: Designated the previous text of subsec. A as par. A(1); in par. A(1), added, "excluding Interstate highways," and substituted "Section" for "Subsection"; and added par. A(2).

Notes of Decisions

Motorcycles 17
Negligence 18

3. Freight carrying vehicles—In general

In absence of evidence in action for wrongful death establishing legal speed limit on portion of highway on which pickup truck struck pedestrian, it would be concluded that 55-mile per hour speed of truck was within speed limit, in view of this section setting speed limit, for pickup trucks which do not exceed 6,000 pounds gross weight at 60 miles per hour. Demandre v. Robinson, App.1969, 220 So.2d 542.

4. —— Evidence, freight carrying vehicles

Where witnesses had only glimpse of vehicle before accident, little weight can be given to their estimates of speed. Scruggs v. McCraney, App.1970, 234 So.2d 262.

60 feet of skid marks before impact made it obvious that vehicle was traveling at high rate of speed. Id.

Evidence established that truck involved in collision with automobile that had entered highway from dirt road was traveling at speed in excess of rate of 50 miles per hour prescribed for that type of vehicle, as claimed by witness who watched truck go by about three-quarters of a mile before it came to the intersection. McQuillin v. Travelers Indem. Co., App.1965, 171 So.2d 691, writ denied 247 La. 623, 172 So.2d 703.

5. Intersections

In view of length of defendants' north-bound tractor-trailer rig, slow rate of speed at which it must have entered intersection, and length of time it took to cross intersection, plaintiff, no matter what speed his westbound vehicle was traveling, should have seen trailer rig in time to avoid collision and having failed to see what he should have seen, his negligence was a proximate cause of accident precluding recovery. Thomas v. Lee, App.1970, 243 So.2d 536, writ denied 257 La. 991, 244 So.2d 860.

14. Skidding

Evidence sustained finding that truck driver's negligence in attempting to enter highway having 60 m.p.h. speed limit in a long, slow moving truck and trailer within 200 feet of curve in that highway was sole cause of accident in which driver of automobile swerved to avoid striking truck, left highway, skidded on wet grass and ultimately struck building. Hebert v. Hanover Ins. Co., App.1971, 244 So.2d 55.

17. Motorcycles

In case in which motorcycle passenger testified that she estimated speed of motorcycle at between 40 and 45 miles per hour, with her eyes closed, defendants failed to sustain burden of proof of excessive speed on part of motorcycle operator. Freeman v. Liberty Mut. Ins. Co., App.1965, 175 So.2d 659.

18. Negligence

Evidence was sufficient to support determination that both motorists involved in intersectional automobile collision were negligent, one in driving at excessive speed and the second in not taking proper care in executing a left turn. Agency Rent-A-Car, Inc. v. Hamm, App.1981, 401 So.2d 1259.

§ 63. Establishing of speed zones

Acts 1972, No. 314, § 1 provides: "The Department of Highways is authorized, urged and requested to study the speed limits of the state system as presently existing and to adopt higher limits than the present statutory limits where safe to do so, and to consider the imposition of minimum limits on interstate highways."

Notes of Decisions

1. In general

In absence of evidence in action for wrongful death establishing legal speed limit on portion of highway on which pickup truck struck pedestrian, it would be concluded that 55-mile per hour speed of truck was within speed limit, in view of R.S. 32:62 setting speed limit for pickup trucks which do not exceed 6,000 pounds gross weight at 60 miles per hour. Demandre v. Robinson, App.1969, 220 So.2d 542.

§ 64. General speed law

[See main volume for text of A and B]

Text of subsec. C effective only if Congress repeals penalties for violating the fifty-five mile-per-hour speed limit.

'85 Supplement

that driver of first automobile involved in collision had been negligent in engaging in passing maneuver at high rate of speed and that drivers of third and fourth vehicles involved were also guilty of negligence in driving too closely to vehicles in front of them at speeds of 50 to 60 miles an hour, but evidence established that driver of second vehicle, which was lead automobile of group of automobiles overtaken by first automobile, was not negligent. Felt v. Privy, 1951, 240 La. 966, 126 So.2d 330.

Evidence that motorist attempted to pass truck with which he collided while traveling at 35 to 45 miles per hour through an unincorporated village of 100 inhabitants and that there was a sign a quarter of a mile from the village limits stating that the speed limit was 45 miles per hour and no other sign showing any necessity for reduction of speed and that the weather condition was good and the road was straight and level, did not show that motorist's speed was illegal so as to preclude recovery for damages sustained on ground that motorist was guilty of contributory negligence. Federal Ins. Co. v. Employers' Liability Ins. Corporation, App. 1941, 4 So.2d 626.

Evidence showed bus driver at fault in attempting to pass car in curve at excessive speed. Griffen v. Teche Transfer Co., 1932, 19 La.App. 157, 140 So. 113.

15. Parking

Evidence established that defendant's loaded truck upon crossing levee near center of highway became uncontrollable and collided with vehicle in which plaintiff was sitting, while the vehicle was stopped on the side of the highway, as a result of negligence of the truck driver in failing to keep the truck under proper control and to drive at proper speed. McDaniell v. Hargrove, App. 1940, 197 So. 292.

Collision between truck and automobile, stopping on wrong side of road in darkness after steering gear was broken and lights extinguished when struck in rear by another truck, was due to negligence of driver of former truck in proceeding at excessive speed, rather than automobile driver's intervening negligence. Penton v. Fisher, App.1934, 155 So. 35.

Main Volumn

Where driver of plaintiff's truck when blinded by lights of approaching automobile was negligent in not reducing speed, contributory negligence barred recovery for damages sustained in collision with unlighted parked truck. Safety Tire Service v. Murov, 1932, 19 La. App. 663, 140 So. 870.

If automobile driver was prevented from seeing unlighted parked motor-truck because of contour of road until within 20 feet of it, he could not recover because of his excessive speed. Sexton v. Stiles, 1930, 15 La.App. 148, 130 So. 821.

16. Turning

Where defendant motorist left gasoline filling station on right hand side of street and made left turn on main street of village without signaling and his automobile was rammed on its right hand side by oncoming automobile which was traveling at a speed not in excess of 25 miles per hour, defendant was negligent and his negligence was proximate cause of collision and fact that two automobiles were parked in front of defendant's own as he began left turn did not excuse him from consequences of his carelessness. Zurich Fire Ins. Co. of N. Y. v. Thomas, App.1951, 49 So.2d 460.

Excessive speed of automobile, striking rear of car making left turn into highway, which driver entered after looking to right without seeing any car within 85 yards, was sole proximate cause of accident. Fontanille v. Ducote, App.1934, 155 So. 40.

17. Sudden emergency

A motorist who was traveling through unincorporated village at speed in excess of legal rate at time he struck pedestrian was negligent in his driving, but such negligence was not actionable, where it appeared that it was not a proximate cause of the accident, in view of fact that pedestrian jumped in front of automobile when it was only 10 or 15 feet away. Hopson v. Neighbors, App.1940, 197 So. 282.

18. Right of way

Even though defendant had the right-of-way at an intersection over the plaintiff's automobile he was not justified in entering the intersection in the path of plaintiff's automobile, since he lost the benefit of the right-of-way when he mistakenly decided that he could resume sufficient speed to cross the half of the road on which plaintiff's automobile was approaching in time for defendant to get out of the path thereof. Singley v. Thomas, App.1951, 49 So.2d 465.

Evidence established that fatal automobile collision at road intersection was result of deceased's fast or reckless driving, though he had right of way. Watson v. Mundinger, App.1932, 144 So. 620.

19. Radar

It is legal to check speed of automobiles by radar timing on only one street by school bounded by four streets without checking speed on the other three streets. Op.Atty.Gen., 1956-58, p. 547.

§ 62. Maximum speed limit; certain vehicles

A. No person shall operate any freight carrying vehicles upon the highways of this state at a speed in excess of 50 miles per hour;

B. No person shall drive a vehicle which is towing a house trailer at a speed in excess of 45 miles per hour;

C. No person pulling or towing upon any highway of this State, with another vehicle, any vehicle designed, equipped or intended to operate under its own power shall operate the towing vehicle at a speed in excess of 45 miles per hour;

D. No person shall operate a school bus at a speed in excess of 45 miles per hour when transporting children, provided however, that the driver of a school bus transporting children under conditions which

C. Rolling roadblocks shall be prohibited from operating on all Interstate highways in the state.

Added by Acts 1982, No. 191, § 1, eff. Jan. 1, 1983, only if Congress repeals the 55 mile-per-hour speed limit (eff. date suspended until sixty days after 1984 Regular Session by H.C.R. No. 4 of 1983).

Effective Date—Subsec. C

Section 2 of Acts 1982, No. 191 (§ 1 of which enacted subsec. C of this section) provided:

"This Act shall become effective on January 1, 1983, if, and only if, Congress has repealed penalties for violating the fifty-five mile-per-hour speed limit provided in Title 23, Section 154, of the United States Code."

Suspension of Acts 1982, No. 191, § 2

House Concurrent Resolution No. 4 of the 1983 Regular Session provided:

"WHEREAS, Act No. 191 of the 1982 Regular Session of the Legislature established a sixty-five mile per hour speed limit on Interstate highways in Louisiana; and

"WHEREAS, Section 2 of Act No. 191 of the 1982 Regular Session has the effective date of January 1, 1983; and

"WHEREAS, such effective date would apply if, and only if, Congress repeals the penalties for violating the fifty-five mile-per-hour speed limit provided in Title 23, Section 154, of the United States Code; and

"WHEREAS, Congress has not repealed these provisions; and

"WHEREAS, the present law is ineffective unless Congress repeals the penalties for violating the fifty-five mile-per-hour speed limit.

"THEREFORE, BE IT RESOLVED by the House of Representatives of the Legislature of Louisiana, the Senate thereof concurring, that the effective date of Section 2 of Act No. 191 of the 1982 Regular Session is hereby suspended until sixty days after the 1984 Regular Session of the Legislature."

Acts 1972, No. 314, § 1 provides: "The Department of Highways is authorized, urged and requested to study the speed limits of the state system as presently existing and to adopt higher limits than the present statutory limits where safe to do so, and to consider the imposition of minimum limits on interstate highways."

1982 Amendment: Added subsec. C.

1. In general

Even though gore area and guardrail on highway did not meet standards that were existing at time of automobile accident, where both items met proper standards that were in existence at time highway was constructed, driver was speeding at time of accident, had blood alcohol level of .14 miligrams, driving pattern chosen by driver was in violation of this section and R.S. 32:61, 32:79, 32:82 regulating operation of motor vehicle, including improper lane change, and improper use of median, and of 88,000 vehicles which traversed that area every day there were only 24 accidents in that area in year immediately preceding driver's accident, gore area and guardrail did not create unreasonable risk of injury to driver. Usry v. Louisiana Dept. of Highways, App.1981, 402 So.2d 240, writ denied 404 So.2d 1259, reconsideration denied 406 So.2d 610, writ denied 406 So.2d 613

Where statistics as to number and types of accidents in area of highway in which fatal accident occurred indicated that signs, guardrails and gore area in existence at time of accident were adequate for motorist exercising ordinary care, and driver killed in accident was violating this section and R.S. 32:61, 32:79, 32:82 governing regulation of motor vehicle traffic at time of accident, wife of driver who was killed in accident failed to carry burden of establishing that hazardous conditions complained of, inadequate signs, defective guardrails, and gore area, were patently or obviously dangerous to reasonably careful and ordinarily prudent driver. Id.

Generally, a motorist may assume that a road is safe for travel even at night; but this rule does not apply where a motorist has actual knowledge of defect or hazard. Martin v. State, Through Dept. of Highways, App.1976, 322 So.2d 827.

This section prohibiting operation of motor vehicle upon highway at such slow speed as to impede normal and reasonable movement of traffic was inapplicable where preceding motorist had just entered highway from a controlled access ramp, was in process of accelerating and changing gears, was traveling at 15 to 20 miles per hour and one lane of dual lane bridge was unobstructed. Smiley v. Ellis, App.1974, 307 So.2d 150, application denied 310 So.2d 643.

The maximum speed limit of 65 miles per hour at point of collision was conditional under R.S. 32:64 providing that no person shall drive at speed greater than reasonable and prudent under the conditions and potential hazards existing, having due regard to the surface and width of highway and the weather. Beauregard v. Salmon, App.1967, 205 So.2d 634.

3. Negligence, in general

Evidence established that black man wearing dark clothing was lying motionless in middle of traffic lane on rural, unlighted highway at 3:50 a.m. on foggy night, and that truck driver was proceeding at safe speed and at safe distance behind other truck, relative to his speed, and thus, failed to establish that driver was negligent in failing to observe victim in time to avoid accident. Rayford v. Saia Motor Freight Lines, Inc., App. 1 Cir.1983, 442 So.2d 646, writ denied 444 So.2d 1242.

There was no manifest error in trial court's determination of gross negligence of driver of automobile which struck preceding vehicle from behind where there were 71 feet of skid marks left by this automobile, impact of collision propelled preceding vehicle into two vehicles which were immediately in front of it and where all other vehicles in vicinity were able to stop without causing collision. Andersen v. Craig, App. 1981, 401 So.2d 1022.

On-coming motorist, whose vehicle hydroplaned on water that had accumulated on unresurfaced portion of old highway and skidded into path of plaintiff's on-coming vehicle, was operating his vehicle in a negligent manner where he had traversed several miles over a portion of highway before the accident and was operating his vehicle at a speed greater than reasonable and prudent under the circumstances. Bush v. State, Through Dept. of Highways, App.1981, 395 So.2d 916, writ denied 399 So.2d 609.

Even if motorist had violated this section and R.S. 32:141, relating to obstruction of more than one-half of road bed, that did not automatically constitute negligence. Comeaux v. Sims, App. 1976, 328 So.2d 816.

Approach of police vehicle from opposite direction with blue flashing lights indicated to plaintiff truck driver that potentially dangerous situation existed so that plaintiff properly reduced his speed on overpass and was not negligent with respect to collision with following tank truck. Eubanks v. Brasseal, Sup.1975, 310 So.2d 550, on remand 318 So.2d 79.

Evidence that pickup truck driver was driving at approximately 45 miles per hour on wet rainy night when he apparently lost control of the truck, which bounced off a bridge railing and collided with oncoming automobile, sustained finding that driver of the pickup truck was negligent and that his negligence caused the accident, which resulted in automobile passenger's death. Wilson v. Pittman, App.1975, 307 So.2d 804.

Where road was straight and dry, visibility was unobstructed and following motorist had ample room in which to maneuver around preceding vehicle, if it were seen, following motorist was negligent in failing to observe preceding vehicle in time to avoid accident. Smiley v. Ellis, App.1974, 307 So.2d 150, application denied 310 So.2d 643.

Where semitrailer truck driver took no action to slow vehicle except to remove foot from accelerator upon noticing increasingly thickening layer of gravel on highway, low beam headlights provided visibility of only 50 to 60 feet, truck struck three-foot pile of gravel in roadway, and veered into opposite lane striking oncoming vehicle, truck driver was negligent. Tillman v. Canal Ins. Co., App.1974, 305 So.2d 602, writ denied 307 So.2d 630.

Driver of pickup truck was negligent in not taking necessary precautions to insure that 12-year-old child in rear of pickup truck was safely seated and in driving at excessive rate of speed in light of his knowledge that the child was seated on truck's tailgate and was liable for injuries sustained when child was thrown from the truck. Freeman v. Wilcox, App.1974, 303 So.2d 840, writ denied 307 So.2d 630.

Though defendant truck driver pled guilty to charge of prima facie speeding in connection

'85 Supplement

Main Volumn

Note 16

to a bridge, evidence for bus company was insufficient to rebut prima facie case in favor of passenger. Fernandez v. Tri-State Transit Co. of Louisiana, App.1940, 194 So. 84.

In action against bus company for injuries sustained by passenger, evidence warranted conclusion that bus operator was operating bus in an illegal manner and was not free of negligence, at time of accident, in view of damage resulting when bus struck a bridge, and operator's knowledge concerning wet condition of highway, narrowness of bridge, and poor tread of tires on rear wheels of bus. Id.

That truck skidded on somewhat steep approach to bridge considered extremely hazardous to automobile traffic did not raise presumption that driver was negligent. Siren v. Montague, App.1932, 142 So. 100.

Burden was on defendant motorist sued for damages sustained in collision to establish defense that his automobile was uncontrollable only because floor of bridge was slick as result of rain. McNabb v. Dugas, App.1932, 142 So. 174.

§ 63. Establishing of speed zones

A. Whenever the department shall determine upon the basis of an engineering and traffic investigation that any maximum speed set forth in this Chapter is greater or less than is reasonable or safe under the conditions found to exist upon any highway of this state, or any part thereof, the department may determine and declare a reasonable and safe maximum speed limit thereat, which, when appropriate signs giving notice thereof are erected, shall be effective at all times or at such specific times as may be determined by the department.

B. Whenever the department determines on the basis of an engineering and traffic investigation that slow speeds on any highway of this state, or part thereof, consistently impede the normal and reasonable movement of traffic, the department may determine and declare a minimum speed limit thereat, below which no person shall drive a vehicle except when necessary for safe operation or in compliance with law. Minimum speeds so determined shall become effective upon the erection of signs giving notice thereof. Acts 1962, No. 310, § 1.

Uniform Vehicle Code §§ 11-802, 11-804.

Law Review Commentaries

Admissibility in evidence of radar speed meter readings. 28 Tulane Law Rev. 308 (April 1954).

§ 64. General speed law

A. No person shall drive a vehicle on the highway within this state at a speed greater than is reasonable and prudent under the conditions and potential hazards then existing, having due regard for the traffic on, and the surface and width of, the highway, and the condition of the weather, and in no event at a speed in excess of the maximum speeds established by this Chapter or regulation of the department made pursuant thereto.

B. Except when a special hazard exists that requires lower speed for compliance with paragraph A of this section, no person shall operate or drive a motor vehicle upon the highways of this state at such a slow speed as to impede the normal and reasonable movement of traffic. Acts 1962, No. 310, § 1.

History and Source of Law

Source:

Acts 1938, No. 280, § 3.
Acts 1948, No. 502, §§ 4, 5.
R.S.1950, § 32:227.
Acts 1950, 2nd Ex.Sess., No. 3, § 1.

R.S.1950, § 32:227 provided:

"In addition to the specific speed limitations of this Chapter, no person shall operate any vehicle upon the highways of this state at other than a reasonable and proper speed under the circumstances, or at a speed endangering the persons or property of others.

"Whoever operates a vehicle in violation of the speed limitations of this Chapter shall be prima facie at fault and responsible for any accident proximately caused by such operation.

"In addition, whoever violates the speed limitations of R.S. 32:223, or the general speed limit of this Section while operating or driving a motor vehicle to which R.S. 32:223 applies, shall be fined not more than two hundred dollars or imprisoned for not more than ninety days, or both. A subsequent offense shall be punished by a fine of not less than twenty-five dollars, nor more than five hundred dollars, or imprisonment for not less than ten days nor more than six months or both.

"In addition, whoever violates the speed limitations of R.S. 32:225, 32:226, or the general speed limit of this section while operating or driving a motor vehicle to which R.S. 32:225 or R.S. 32:220 applies, shall for the first offense be fined not less than one hundred dollars nor more than five hundred dollars or imprisoned for not less than thirty days nor more than six months, or both; a second offense shall be punished by a fine of not less than two hundred dollars nor more than one thousand dollars or imprisonment for not less than sixty days nor more than one year, or both, and in addition the Department of Public Safety shall forthwith revoke, for a period of not less than sixty days nor more than one year, the chauffeur's or driver's license, or both, of the person convicted of a second offense upon receiving satisfactory evidence of such conviction or of the entry of a plea of guilty and sentence thereon, or of the forfeiture of bail of any such person charged with a second offense; a third or subsequent offense shall be punished by a fine of not less than five hundred dollars nor more than two thousand dollars and imprisonment for not less than six months nor more than one year, and in addition the Department of Public Safety shall forthwith revoke, for a period of not less than sixty days nor more than one year, the chauffeur's or driver's license, or both, of the person convicted of a third or subsequent offense upon receiving satisfactory evidence of such conviction or of the entry of a plea of guilty and sentence thereon, or of the forfeiture of bail of any such person charged with a third or subsequent offense.

"No sentence imposed under the authority of this Section shall be suspended."

The general speed limitation, and presumption of fault, in R.S.1950, § 32:227, were based on Acts 1938, No. 280, § 3, rule 4. The penalty provisions were based on Acts 1948, No. 502, §§ 4, 5.

Pennsylvania

SUBCHAPTER F
SPEED RESTRICTIONS

Sec.
3361. Driving vehicle at safe speed.
3362. Maximum speed limits.
3363. Alteration of maximum limits.
3364. Minimum speed regulation.
3365. Special speed limitations.
3366. Charging speed violations.
3367. Racing on highways.
3368. Speed timing devices.

Cross References. Subchapter F is referred to in section 6109 of this title.

§ 3361. Driving vehicle at safe speed.

No person shall drive a vehicle at a speed greater than is reasonable and prudent under the conditions and having regard to the actual and potential hazards then existing, nor at a speed greater than will permit the driver to bring his vehicle to a stop within the assured clear distance ahead. Consistent with the foregoing, every person shall drive at a safe and appropriate speed when approaching and crossing an intersection or railroad grade crossing, when approaching and going around a curve, when approaching a hill crest, when traveling upon any narrow or winding roadway and when special hazards exist with respect to pedestrians or other traffic or by reason of weather or highway conditions.

Cross References. Section 3361 is referred to in sections 1535, 3362, 3366 of this title.

§ 3362. Maximum speed limits.

(a) General rule.—Except when a special hazard exists that requires lower speed for compliance with section 3361 (relating to driving vehicle at safe speed), the limits specified in this subsection or established under this subchapter shall be maximum lawful speeds and no person shall drive a vehicle at a speed in excess of the following maximum limits:

(1) 35 miles per hour in any urban district.

(2) 55 miles per hour in other locations.

(3) Any other maximum speed limit established under this subchapter.

(b) **Posting of speed limit.**—No maximum speed limit established under subsection (a)(1) or (3) shall be effective unless posted on fixed or variable official traffic-control devices erected in accordance with regulations adopted by the department which regulations shall require posting at the beginning and end of each speed zone and at intervals not greater than one-half mile.

(c) **Penalty.**—Any person violating this section is guilty of a summary offense and shall, upon conviction, be sentenced to pay a fine of $35. Any person exceeding the maximum speed limit by more than five miles per hour shall pay an additional fine of $2 per mile for each mile in excess of five miles per hour over the maximum speed limit.

Cross References. Section 3362 is referred to in section 1535 of this title.

§ 3363. Alteration of maximum limits.

The department or local authorities on highways under their respective jurisdictions, upon the basis of an engineering and traffic investigation, may determine that the maximum speed permitted under this subchapter is greater or less than is reasonable and safe under the conditions found to exist upon any such highway or part thereof and establish a reasonable and safe maximum limit. The maximum speed limit may be made effective at all times or at times indicated and may vary for different weather conditions and other factors bearing on safe speeds. No maximum speed greater than 55 miles per hour shall be established under this section.

§ 3364. Minimum speed regulation.

(a) **Impeding movement of traffic prohibited.**—Except when reduced speed is necessary for safe operation or in compliance with law, no person shall drive a motor vehicle at such a slow speed as to impede the normal and reasonable movement of traffic.

(b) **Slow moving vehicle to drive off roadway.**—Except when reduced speed is necessary for safe operation or in compliance with law, whenever any person drives a vehicle upon a roadway having width for not more than one lane of traffic in each direction at less than the maximum posted speed and at such a slow speed as to impede the normal and reasonable movement of traffic, the driver shall, at the first opportunity when and where it is reasonable and safe to do so and after giving appropriate signal, drive completely off the roadway and onto the berm or shoulder of the highway. The driver may return to the roadway after giving appropriate signal only when the movement can be made in safety and so as not to impede the normal and reasonable movement of traffic.

(c) **Establishment of minimum speed limits.**—At any other time when the department or local authorities under their respective jurisdictions determine on the basis of an engineering and traffic investigation that slow speeds on any highway or part of a highway impede the normal and reasonable movement of traffic, the department or such local authority may determine and declare a minimum speed limit below which no person shall drive a vehicle except when necessary for safe operation or in com-

pliance with law. The minimum limit shall be effective when posted upon appropriate fixed or variable signs.

Cross References. Section 3364 is referred to in sections 4305, 6109 of this title.

§ 3365. Special speed limitations.

(a) Bridges and elevated structures.—

(1) No person shall drive a vehicle over any bridge or other elevated structure constituting a part of a highway at a speed which is greater than the maximum speed which can be maintained with safety to the bridge or structure when the structure is posted with signs as provided in this subsection.

(2) The department and local authorities on highways under their respective jurisdictions may conduct a traffic and engineering investigation of any bridge or other elevated structure constituting a part of a highway, and if it shall thereupon find that the structure cannot safely withstand vehicles traveling at the speed otherwise permissible under this title, the department or local authority shall determine and declare the maximum speed of vehicles which the structure can safely withstand, and shall cause or permit official traffic-control devices stating the maximum speed to be erected and maintained before each end of the structure.

(3) Upon the trial of any person charged with a violation of this subsection, proof of the determination of the maximum speed by the department and the existence of the signs shall constitute conclusive evidence of the maximum speed which can be maintained with safety to the bridge or structure.

(b) School zones.—When passing a school zone as defined and established under regulations of the department, no person shall drive a vehicle at a speed greater than 15 miles per hour. An official traffic-control device shall indicate the beginning and end of each school zone to traffic approaching in each direction. Establishment of a school zone, including its location and hours of operation, shall be approved by the department.

(c) Hazardous grades.—The department and local authorities on highways under their respective jurisdictions may conduct traffic and engineering investigations on grades which are considered hazardous. If the grade is determined to be hazardous, vehicles having a gross weight in excess of a determined safe weight may be further limited as to maximum speed and may be required to stop before proceeding downhill. The restrictions shall be indicated by official traffic-control devices erected and maintained according to regulations established by the department.

(d) Penalty.—Any person violating any provision of this section is guilty of a summary offense and shall, upon conviction, be sentenced to pay a fine of $35. Any person exceeding a maximum speed limit established under this section by more than five miles per hour shall pay an additional fine of $2 per mile for each mile in excess of five miles per hour in excess of the maximum speed limit.

(Oct. 10, 1980, No.147, eff. imd.)

that more quickly accomplish the procedures established under such provisions.

(5) Any incorporated city may by ordinance require that the driver of a vehicle involved in an accident file with a designated city department a copy of any report required to be filed under ORS 811.725. All such reports shall be for the confidential use of the city department but subject to the same requirements for release of such reports as provided for the release of such reports by the division under ORS 802.220 and 802.240. [1983 c.338 §8; 1985 c.16 §7; 1985 c.171 §2; 1985 c.459 §2a]

801.045 Permissive use of private roadway. Nothing in the provisions of the vehicle code described in this section shall prevent the owner of real property used by the public for purposes of vehicular travel by permission of the owner and not as a matter of right from prohibiting such use, or from requiring different or additional conditions than those specified or from otherwise regulating such use as may seem best to such owner. This section applies to the provisions of the vehicle code relating to abandoned vehicles, vehicle equipment, regulation of vehicle size, weight and load, the manner of operation of vehicles and use of roads by persons, animals and vehicles. [1983 c.338 §9]

801.050 Privilege of motorist to use highways. Subject to compliance with the motor vehicle law of this state, owners and operators of motor vehicles are granted the privilege of using the highways of this state. [1983 c.338 §10; 1985 c.16 §8]

801.055 Weight standards; Department of Transportation responsibility for weight determination. (1) References in the vehicle code to weights and measures refer to United States Standards thereof.

(2) For purposes of the vehicle code, the weights of vehicles, combinations of vehicles, parts of vehicles, wheels or axles shall be determined by the use of methods, procedures and devices established by the Department of Transportation by rule. The rules established in accordance with this subsection may include any or all of the following:

(a) Methods and procedures to determine weights when weighing devices or facilities are not convenient.

(b) Standards and certification procedures for weighing devices.

(c) Any other rules the department determines necessary or convenient for purposes of this subsection. [1983 c.338 §11; 1985 c.172 §1]

DEFINITIONS

801.100 Definitions generally. Except where the context requires otherwise, the definitions given in the vehicle code govern its construction. [1983 c.338 §12]

801.105 "Administrator." "Administrator" means the Administrator of the Motor Vehicles Division. [1983 c.338 §13]

801.110 "Alley." "Alley" means a street or highway primarily intended to provide access to the rear or side of lots or buildings in urban areas and not intended for through vehicular traffic. [1983 c.338 §14]

801.115 "Ambulance." "Ambulance" means any privately or publicly owned motor vehicle that is regularly provided or offered to be provided for the emergency transportation of persons suffering from illness, injury or disability. [1983 c.338 §15]

801.120 "Ambulatory disability." "Ambulatory disability" means a disability because of which a person:

(1) Is so severely physically and permanently disabled as to be unable to move from place to place without the aid of a wheelchair;

(2) Is not able to cross curbs because of paralysis or loss of function of the person's legs;

(3) Is missing one or both legs; or

(4) Has a permanently impaired or unsteady gait that makes it impossible or impractical to walk as a means of transportation. [1983 c.338 §16]

801.125 "Antique vehicle." "Antique vehicle" means a motor vehicle that is older than one-half the number of years between the current year and 1900 and that is maintained as a collector's item. [1983 c.338 §17]

801.130 "Assembled vehicle." "Assembled vehicle" means a vehicle:

(1) With a body that does not resemble any particular year model or make of vehicle;

(2) That is not a vehicle rebuilt by a manufacturer;

(3) That is not a vehicle built in a factory where the year model and make are assigned at the factory; and

(4) That is not an antique vehicle, a vehicle of special interest, a reconstructed vehicle or a replica. [1983 c.338 §18; 1985 c.402 §3]

801.135 "Axle." "Axle" means any structure or structures, whether in one or more segments, of any vehicle, supported by wheels and on which the wheels rotate, so spaced longitudinally that the centers thereof are included between two

vertical parallel transverse planes 40 inches apart. [1983 c.338 §19]

801.140 "Balance trailer." "Balance trailer" means every trailer, other than a self-supporting trailer, pole trailer or semitrailer, designed so that its weight and that of its load is substantially balanced upon its axle or axles and so that it couples to the towing vehicle with a device other than a fifth wheel hitch. The definition in this section is based upon design features and, except as otherwise provided in this section, does not prohibit a balance trailer from fitting into another classification of trailer based on use. [1983 c.338 §20; 1985 c.16 §9]

801.145 "Bail." "Bail" means money or its equivalent deposited by a defendant to secure the defendant's appearance for a traffic offense. [1983 c.338 §21]

801.150 "Bicycle." "Bicycle" means a vehicle that:

(1) Is designed to be operated on the ground on wheels;

(2) Has a seat or saddle for use of the rider;

(3) Is designed to travel with not more than three wheels in contact with the ground;

(4) Is propelled exclusively by human power; and

(5) Has every wheel more than 14 inches in diameter or two tandem wheels either of which is more than 14 inches in diameter. [1983 c.338 §22]

801.155 "Bicycle lane." "Bicycle lane" means that part of the highway, adjacent to the roadway, designated by official signs or markings for use by persons riding bicycles except as otherwise specifically provided by law. [1983 c.338 §23]

801.160 "Bicycle path." "Bicycle path" means a public way, not part of a highway, that is designated by official signs or markings for use by persons riding bicycles except as otherwise specifically provided by law. [1983 c.338 §24]

801.165 "Bus trailer." "Bus trailer" means any trailer designed or used for carrying human beings. [1983 c.338 §25]

801.170 "Business district." "Business district" means the territory contiguous to a highway when 50 percent or more of the frontage thereon for a distance of 600 feet or more on one side, or 300 feet or more on both sides, is occupied by buildings used for business. [1983 c.338 §26]

801.175 "Canceled." "Canceled," with reference to driving privileges or vehicle registration or title, means that the driving privileges, registration or title are declared void and terminated and new driving privileges, registration or title may be obtained only as permitted by law. [1983 c.338 §27; 1985 c.16 §10]

801.180 "Camper." "Camper" means a structure that:

(1) Has a floor;

(2) Is designed to be mounted upon a motor vehicle;

(3) Is not permanently attached to a motor vehicle upon which it is mounted;

(4) Is designed to provide facilities for human habitation or for camping;

(5) Is six feet or more in overall length;

(6) Is five and one-half feet or more in height from floor to ceiling at any point; and

(7) Has no more than one axle designed to support a portion of the weight of the camper. [1983 c.338 §28]

801.185 "Certificate of title." "Certificate of title" means a document issued by any jurisdiction specifically as evidence of vehicle ownership. Oregon issues certificate of title under ORS 803.045. Titles for snowmobiles are issued as provided under ORS 807.370. Titles for mobile homes are issued as provided under ORS 820.500. [1983 c.338 §29; 1985 c.16 §11]

801.190 "Class I all-terrain vehicle." "Class I all-terrain vehicle" means a motorized, off-highway recreational vehicle 50 inches or less in width with a dry weight of 600 pounds or less that travels on three or more low pressure tires and has a saddle for the operator. [1985 c.459 §2]

801.195 "Combination of vehicles." "Combination of vehicles" means two or more vehicles coupled together. [1983 c.338 §31]

801.200 "Commercial bus." "Commercial bus" means every motor vehicle designed or used for carrying passengers and their personal baggage and express for compensation, except:

(1) Taxicabs that:

(a) Are passenger vehicles with a passenger seating capacity that does not exceed five;

(b) Carry passengers for hire where destination and route traveled may be controlled by a passenger and the fare is calculated on the basis of any combination of an initial fee, distance traveled or waiting time;

(c) Are operated under a current license or permit issued by a city, county or other unit of local government where a permit or license is required for the operation of a taxicab; and

(d) Transport persons or property, or both, between points in Oregon.

vehicle and ordinarily used for transporting long or irregular loads capable generally of sustaining themselves as beams between the towing vehicle and the trailer. The definition in this section is based on design features and, except as otherwise provided in this section, does not prohibit a pole trailer from fitting into another category of trailer based on use. [1983 c.338 §70]

801.395 "Police officer." "Police officer" includes a member of the Oregon State Police, a sheriff, a deputy sheriff or a city police officer. [1983 c.338 §71]

801.400 "Premises open to the public." "Premises open to the public" includes any premises open to the general public for the use of motor vehicles, whether the premises are publicly or privately owned and whether or not a fee is charged for the use of the premises. [1983 c.338 §72]

801.405 "Reconstructed vehicle." "Reconstructed vehicle" means either:

(1) A vehicle that:

(a) Has a body that resembles and primarily is a particular year model or make of vehicle;

(b) Is not a vehicle rebuilt by a manufacturer;

(c) Is not a vehicle built in a factory where the year model and make are assigned at the factory; and

(d) Is not a replica; or

(2) A motor truck that has been rebuilt using a component kit if the manufacturer of the kit assigns a vehicle identification number and provides a manufacturer's certificate of origin for the kit. [1983 c.338 §75; 1985 c.402 §4]

801.410 "Registration" or "register." "Registration" or "register" means, when used in reference to vehicles, the recording of a vehicle as authorized for use within a jurisdiction and includes any documentation or devices issued as evidence of that authorization. This state registers vehicles as provided under ORS 803.350. [1983 c.338 §76]

801.415 "Registration plate." "Registration plate" means a plate issued by a jurisdiction as evidence of vehicle registration. This state issues registration plates under ORS 803.520. [1983 c.338 §78; 1985 c.16 §22]

801.420 "Registration weight." "Registration weight" means the loaded weight required to be declared and established as the maximum loaded weight at which certain vehicles will be operated on the highway. Vehicles for which registration weights must be declared and established and the procedures for establishing registration weights are described under ORS 803.430. [1983 c.338 §77; 1985 c.16 §21]

801.425 "Replica." "Replica," when used to refer to vehicles, means a vehicle with a body built to resemble and be a reproduction of another vehicle of a given year and given manufacturer. [1985 c.402 §2]

801.430 "Residence district." "Residence district" means the territory contiguous to a highway not comprising a business district when the frontage on one or both sides of the highway for a distance of 300 feet or more is mainly occupied by:

(1) Dwellings, churches, public parks within cities or other residential service facilities; or

(2) Dwellings and buildings used for business. [1983 c.338 §79]

801.435 "Revoked." "Revoked" with reference to driving privileges, vehicle registration or vehicle title means the termination thereof with new driving privileges or vehicle registration or vehicle title obtainable only as permitted by law. [1983 c.338 §80]

801.440 "Right of way." "Right of way" means the right of one vehicle or pedestrian to proceed in a lawful manner in preference to another vehicle or pedestrian approaching under such circumstances of direction, speed and proximity as to give rise to danger of collision unless one grants precedence to the other. [1983 c.338 §81]

801.445 "Road authority." "Road authority" means the body authorized to exercise authority over a road, highway, street or alley under ORS 810.010. [1983 c.338 §82]

801.450 "Roadway." "Roadway" means the portion of a highway that is improved, designed or ordinarily used for vehicular travel, exclusive of the shoulder. In the event a highway includes two or more separate roadways the term "roadway" shall refer to any such roadway separately, but not to all such roadways collectively. [1983 c.338 §83]

801.455 "School activity vehicle." "School activity vehicle" means a vehicle, other than a school bus, that is used to transport students to or from authorized school activities and that is not described by any of the following:

(1) A vehicle under regulation of the Public Utility Commissioner of Oregon, the United States Department of Transportation or the Interstate Commerce Commission.

(2) A vehicle, commonly known as a private passenger car or private passenger van, that is used by the owner of the vehicle or a relative of

(e) The expense of erecting any sign under this subsection shall be borne by the road authority having jurisdiction over the highway.

(f) All signs erected under this subsection shall comply with ORS 810.200.

(g) A speed established under this subsection may be effective for not more than 120 days.

(h) If the board establishes an emergency temporary speed under this subsection, the board shall determine whether the board should permanently change the speed within 120 days after the speed becomes effective. The board shall use authority otherwise granted to the board under this section if the board determines to permanently establish the speed.

(i) The board may only establish a speed under this subsection upon the application of the road authority for the highway. [1983 c.338 §162; 1985 c.16 §51]

810.190 State Speed Control Board procedures. The State Speed Control Board is subject to the following procedures while exercising its authority under ORS 810.180 unless otherwise provided under ORS 810.180.

(1) If the change in speed is requested by the road authority for a highway, the road authority must make written application for the board to conduct an investigation with respect to speed on the highway under this section. An application required under this subsection must state the speed recommended for the highway or section of highway by the requesting road authority.

(2) The board may determine the speed to designate under its authority by making or causing to be made an engineering and traffic investigation with respect to the existing speed on the highway.

(3) The board may make the investigation required under this section or, when requested by the road authority, may allow the following:

(a) The road authority to make the investigation and make a report of the investigation to the board.

(b) A city to make the investigation with respect to any highway within its corporate limits that is under the jurisdiction of the commission or a county and report the results of the investigation to the board.

(4) The board shall allow any road authority that is requesting an investigation under this section to participate with the board in the investigation.

(5) The board:

(a) May change the existing speed on the highway if the investigation establishes to the satisfaction of the board that the existing designated speed is greater or less than reasonable or safe under the conditions at the area.

(b) Shall not make a final determination to change a speed under this section unless the board has provided due notice and opportunity for hearing to the road authority affected thereby.

(c) Shall give written notice to affected road authority of the board's determination concerning a designated speed under this section.

(6) An affected road authority may file written objections to any speed established by the board under this section. If the road authority files a written objection and requests a hearing not more than 10 days after signs establishing the speed are posted, the board shall hold a hearing to reconsider the speed after giving written notice of the hearing to the affected road authority. The hearing must be held more than five days after giving of the written notice. [1983 c.338 §163; 1985 c.16 §52]

(Traffic Control Devices)

810.200 Uniform standards for traffic control devices; uniform system of marking and signing highways. (1) The commission may exercise the following authority with respect to the marking, signing and use of traffic control devices in this state:

(a) The commission shall adopt a manual and specifications of uniform standards for traffic control devices consistent with the provisions of the vehicle code for use upon highways in this state.

(b) The commission is authorized to provide a uniform system of marking and signing highways within the boundaries of this state.

(c) The commission is authorized to determine the character or type of traffic control devices to be used in this state.

(2) The authority granted under this section is subject to all of the following:

(a) The system of marking and signing established under this section shall correlate with and, as far as possible, conform to the system adopted in other states. The commission may include in the system signs and signals that show internationally recognized and approved symbols.

(b) So far as practicable, all traffic control devices in this state shall be uniform as to type and location.

pedestrian has entered the roadway and is carrying a white cane or is accompanied by a dog guide. This paragraph applies notwithstanding any other provisions of the vehicle code relating to traffic control devices.

(2) This section is subject to the provisions and definitions relating to the rights of pedestrians who are blind or blind and deaf under ORS 814.110.

(3) The offense described in this section, failure to yield the right of way to a blind pedestrian, is a Class B traffic infraction. [1983 c.338 §549; 1985 c.16 §280]

811.040 Failure to yield to pedestrian proceeding under traffic control devices; penalty. (1) The driver of a vehicle commits the offense of failure to yield to a pedestrian proceeding under traffic control devices if the driver does not yield the right of way to a pedestrian who is:

(a) Proceeding under a pedestrian control signal under ORS 814.010.

(b) Lawfully within an intersection or crosswalk in accordance with any traffic control device in a manner that complies with ORS 814.010.

(2) The offense described in this section, failure to yield to a pedestrian proceeding under traffic control devices, is a Class B traffic infraction. [1983 c.338 §550; 1985 c.16 §281]

811.045 Failure to yield to pedestrian when making turn at stop light; penalty. (1) A person commits the offense of failure to yield to a pedestrian when making a turn at a stop light if the person is driving a vehicle that is making a turn at a red light permitted under ORS 811.335 and the person does not yield the right of way to pedestrians lawfully within an adjacent crosswalk.

(2) The offense described in this section, failure to yield to a pedestrian when making a turn at a stop light, is a Class B traffic infraction. [1983 c.338 §551]

811.050 Failure to yield to bicycle on bicycle lane. (1) A person commits the offense of failure of a motor vehicle operator to yield to a bicycle on a bicycle lane if the person is operating a motor vehicle and the person does not yield the right of way to a person operating a bicycle or moped upon a bicycle lane.

(2) This section does not require persons operating mopeds to yield the right of way to bicycles if the mopeds are operated on bicycle lanes in the manner permitted under ORS 811.440.

(3) The offense described in this section, failure of a motor vehicle operator to yield to a bicycle on a bicycle lane, is a Class B traffic infraction. [1983 c.338 §698; 1985 c.16 §336]

811.055 Failure to yield to bicyclist on sidewalk. (1) The driver of a motor vehicle commits the offense of failure to yield the right of way to a bicyclist on a sidewalk if the driver does not yield the right of way to any bicyclist on a sidewalk.

(2) The driver of a motor vehicle is not in violation of this section when a bicyclist is operating in violation of ORS 814.410. Nothing in this subsection relieves the driver of a motor vehicle from the duty to exercise due care.

(3) The offense described in this section, failure to yield the right of way to a bicyclist on a sidewalk, is a Class C traffic infraction. [1983 c.338 §702; 1985 c.16 §340]

SPEED

(Basic Rule)

811.100 Violation of basic speed rule; penalty. (1) A person commits the offense of violating the basic speed rule if the person drives a vehicle upon a highway at a speed greater than is reasonable and prudent, having due regard to all of the following:

(a) The traffic.

(b) The surface and width of the highway.

(c) The hazard at intersections.

(d) Weather.

(e) Visibility.

(f) Any other conditions then existing.

(2) The following apply to the offense described in this section:

(a) The offense is as applicable on an alley as on any other highway.

(b) Speeds that are prima facie evidence of violation of this section are established by ORS 811.105.

(c) This section and ORS 811.105 establish limitation on speeds that are in addition to maximum speeds established and subject to penalty as described in the following:

(A) A fuel conservation maximum speed limit under ORS 811.110.

(B) Maximum speeds for motor trucks and passenger transport vehicles under ORS 811.115.

(C) Maximum speeds on ocean shores under ORS 811.120.

(3) The offense described in this section, violating the basic speed rule, is a Class B traffic infraction. [1983 c.338 §563]

811.105 Speeds that are evidence of basic rule violation. Any speed in excess of any of the following designated speeds is prima facie evidence of violation of the basic speed rule under ORS 811.100:

(1) Any speed posted by authority granted under ORS 810.180.

(2) If no speed is posted, any speed in excess of one of the following designated speeds is prima facie evidence of violation of the basic speed rule:

(a) Fifteen miles per hour when driving on an alley.

(b) Twenty miles per hour in a business district.

(c) Twenty miles per hour when passing school grounds or a school crosswalk if:

(A) Children are present; and

(B) Notice of the grounds or crosswalk is indicated plainly by traffic control devices conforming to the requirements established under ORS 810.200 and posted under authority granted by ORS 810.210.

(d) Twenty-five miles per hour in any residence district or public park.

(e) Fifty-five miles per hour in locations not otherwise described in this section. [1983 c.338 §564; 1985 c.16 §288]

(Maximum Speeds)

811.110 Violation of fuel conservation maximum speed limit; penalty. (1) A person commits the offense of violation of the fuel conservation maximum speed limit if:

(a) A fuel conservation maximum speed limit is established under ORS 810.180; and

(b) The person operates a vehicle at a speed in excess of the fuel conservation maximum speed limit.

(2) The following apply to the offense described in this section:

(a) A fuel conservation maximum speed limit established under ORS 810.180 is not subject to the basic speed rule under ORS 811.100 except where a special hazard or condition exists that requires a lower speed for compliance with the basic speed rule.

(b) In no event shall the division suspend or revoke a person's driving privileges in this state solely on the grounds that the person has incurred one or more convictions of a violation of the fuel conservation maximum speed limit.

(3) The offense described in this section, violation of the fuel conservation maximum speed limit, is a Class C traffic infraction. [1983 c.338 §565]

811.115 Violation of maximum speed for trucks and passenger transport vehicles; penalty. (1) A person commits the offense of violation of the maximum speed for motor trucks and passenger transport vehicles if the person drives any of the following vehicles at a speed greater than fifty-five miles per hour on any highway:

(a) A motor truck with a registration weight of more than 8,000 pounds.

(b) A school bus.

(c) A school activity vehicle.

(d) A worker transport bus.

(e) A bus operated for transporting children to and from church or an activity or function authorized by a church.

(f) Any vehicle used in the transportation of persons for hire by a nonprofit entity as provided in ORS 767.025 (13).

(2) The following apply to this section:

(a) This section does not apply to ambulances.

(b) Notwithstanding any other provision of this section, the motor vehicles referred to in this section are subject to the provisions of the basic speed rule under ORS 811.100.

(3) The offense described in this section, violation of maximum speed for motor trucks and passenger transport vehicles, is a Class B traffic infraction. [1983 c.338 §566; 1985 c.420 §9]

811.120 Violation of maximum speed limit on ocean shore; penalty. (1) A person commits the offense of violating the maximum speed limit on the ocean shore if the person drives a vehicle or conveyance on any part of the ocean shore in this state at a speed greater than any of the following:

(a) Any maximum speed for ocean shores that is established and posted under ORS 810.180.

(b) If no speed is posted under ORS 810.180, 25 miles per hour.

(2) The following apply to this section:

(a) This section is subject to the provisions relating to ambulances and emergency vehicles under ORS 820.300 to 820.320.

Washington

Chapter 34.04 RCW
ADMINISTRATIVE PROCEDURE ACT

Sections

34.04.010 Definitions.
34.04.020 Adoption of rules of practice and procedure——Organizational description——Records of decisions, orders, and opinions open to public——Exceptions——Effect of failure to comply.
34.04.022 Uniform procedural rules——Application——Conduct of contested cases.
34.04.025 Notices of intention to adopt rules——Opportunity to submit data——Proceedings on rule barred until twenty days after register distribution——Noncompliance, effect.
34.04.026 Specific reference to rule-making authority to be included——Alternatives——Format——Request for more specific reference.
34.04.027 Failure to give twenty days notice of intended action——Effect.
34.04.030 Emergency rules and amendments.
34.04.040 Rules filed with code reviser——Register——Effective dates——Report.
34.04.045 Statement of proposed rule's purpose and how implemented——Contents——Distribution by agency.
34.04.048 Withdrawal of proposed rules.
34.04.050 Code reviser to compile and edit rules, publish register——Removal of unconstitutional rules——Distribution of registers and codes——County law library trustees to maintain set——Judicial notice of rules.
34.04.052 Scope of editing and revision of rules.
34.04.055 Regulations on filing and form of rules and notices.
34.04.057 Style, format, and numbering of rules——Agency compliance.
34.04.058 Format and style of rules amending existing sections, adding new sections——Effect of failure to comply.
34.04.060 Petition for adoption, amendment, repeal of rule——Agency action.
34.04.070 Declaratory judgment on validity of rule——Small business economic impact statement action as part of record.
34.04.080 Declaratory ruling by agency——Petition——Court review.
34.04.090 Contested cases——Notice——Hearing——Summary orders——Informal disposition——Record——Findings of fact——Agency's powers.
34.04.100 Contested cases——Rules of evidence——Cross-examination.
34.04.105 Agency hearings and contested cases——Hearings, oaths, subpoenas, evidence, witnesses——Contempt.
34.04.110 Contested cases——Procedure when deciding officials have not heard or read evidence.
34.04.115 Consultation by agency officer as to issues.
34.04.120 Contested cases——Adverse decisions and orders——Findings and conclusions.
34.04.130 Contested cases——Judicial review.
34.04.133 Contested cases——Direct review by court of appeals.
34.04.135 Contested cases——Refusal of review by court of appeals.
34.04.140 Appeal to supreme court or court of appeals.
34.04.150 Exclusions from chapter or parts of chapter.
34.04.170 Provisions applicable to licenses and licensing.
34.04.210 Joint administrative rules review committee——Members——Appointment——Terms——Vacancies.
34.04.220 Review of proposed rules——Notice.
34.04.230 Review of existing rules——Notice——Hearing.
34.04.240 Committee objections to agency action——Statement in register and WAC.
34.04.250 Recommendations and reports by committee to legislature.
34.04.260 Review and objection procedures——No presumption established.
34.04.270 Agency review of own rules for conformity with federal law.
34.04.280 Reports by agency to office of financial management——Compilation by office of financial management provided to legislative officers.
34.04.290 Application of RCW 34.04.270 and 34.04.280.
34.04.900 Severability——1959 c 234.
34.04.901 Severability——1967 c 237.
34.04.910 General repeal and saving.
34.04.920 Effective dates——1959 c 234.
34.04.921 Effective date——1967 c 237.
34.04.930 Operation of chapter if in conflict with federal law.
34.04.931 Operation of 1967 amendatory act if in conflict with federal law.
34.04.940 Savings——Authority of agencies to comply with chapter——Effect of subsequent legislation.

Hearings, procedures, rule making by various agencies to be in accordance with Administrative Procedure Act: Cf. the pertinent statute under which the particular agency is established.

RCW 34.04.010 Definitions. The definitions set forth in this section shall apply throughout this chapter, unless the context clearly requires otherwise.

(1) "Agency" means any state board, commission, department, or officer, authorized by law to make rules or to adjudicate contested cases, except those in the legislative or judicial branches.

(2) "Rule" means any agency order, directive, or regulation of general applicability (a) the violation of which subjects a person to a penalty or administrative sanction; (b) which establishes, alters, or revokes any procedure, practice, or requirement relating to agency hearings; (c) which establishes, alters, or revokes any qualification or requirement relating to the enjoyment of benefits or privileges conferred by law; (d) which establishes, alters, or revokes any qualifications or standards for the issuance, suspension, or revocation of licenses to pursue any commercial activity, trade, or profession; or (e) which establishes, alters, or revokes any mandatory standards for any product or material which must be met before distribution or sale. The term includes the amendment or repeal of a prior rule, but does not include (i) statements concerning only the internal management of an agency and not affecting private rights or procedures available to the public, (ii) declaratory rulings issued pursuant to RCW 34.04.080, as now or hereafter amended, or (iii) traffic restrictions for motor vehicles, bicyclists, and pedestrians established by the secretary of transportation or his designee where notice of such restrictions is given by official traffic control devices.

(3) "Contested case" means a proceeding before an agency in which an opportunity for a hearing before

SPEED RESTRICTIONS

46.61.400 Basic rule and maximum limits. (1) No person shall drive a vehicle on a highway at a speed greater than is reasonable and prudent under the conditions and having regard to the actual and potential hazards then existing. In every event speed shall be so controlled as may be necessary to avoid colliding with any person, vehicle or other conveyance on or entering the highway in compliance with legal requirements and the duty of all persons to use due care.

(2) Except when a special hazard exists that requires lower speed for compliance with subsection (1) of this section, the limits specified in this section or established as hereinafter authorized shall be maximum lawful speeds, and no person shall drive a vehicle on a highway at a speed in excess of such maximum limits.

(a) Twenty-five miles per hour on city and town streets;

(b) Fifty miles per hour on county roads;

(c) Sixty miles per hour on state highways.

The maximum speed limits set forth in this section may be altered as authorized in RCW 46.61.405, 46.61.410, and 46.61.415.

(3) The driver of every vehicle shall, consistent with the requirements of subsection (1) of this section, drive at an appropriate reduced speed when approaching and crossing an intersection or railway grade crossing, when approaching and going around a curve, when approaching a hill crest, when traveling upon any narrow or winding roadway, and when special hazard exists with respect to pedestrians or other traffic or by reason of weather or highway conditions. [1965 ex.s. c 155 § 54; 1963 c 16 § 1. Formerly RCW 46.48.011.]

Rules of court: Monetary penalty schedule——JTIR 6.2.

Saving of existing orders, etc., establishing speed limits——1963 c 16: "This act shall not repeal or invalidate existing orders and resolutions of the state highway commission or existing resolutions and ordinances of local authorities establishing speed limits within their respective jurisdictions." [1963 c 16 § 7. Formerly RCW 46.48.016.] "This act" [1963 c 16], as amended, is codified as RCW 46.61.400 through 46.61.415, 46.61.425, and 46.61.440.

46.61.405 Decreases by secretary of transportation. Whenever the secretary of transportation shall determine upon the basis of an engineering and traffic investigation that any maximum speed hereinbefore set forth is greater than is reasonable or safe with respect to a state highway under the conditions found to exist at any intersection or upon any other part of the state highway system or at state ferry terminals, or that a general reduction of any maximum speed hereinbefore set forth would aid in the conservation of energy resources, the secretary may determine and declare a reasonable and safe lower maximum limit or a lower maximum limit which will reasonably conserve energy resources, for any state highway, the entire state highway system, or any portion thereof, which shall be effective when appropriate signs giving notice thereof are erected. The secretary may also fix and regulate the speed of vehicles on any state highway within the maximum speed limit allowed by this chapter for special occasions including, but not limited to, local parades and other special events. Any such maximum speed limit may be declared to be effective at all times or at such times as are indicated upon the said signs; and differing limits may be established for different times of day, different types of vehicles, varying weather conditions, and other factors bearing on safe speeds, which shall be effective (a) when posted upon appropriate fixed or variable signs or (b) if a maximum limit is established for auto stages which is lower than the limit for automobiles, the auto stage speed limit shall become effective thirty days after written notice thereof is mailed in the manner provided in subsection (4) of RCW 46.61.410, as now or hereafter amended. [1977 ex.s. c 151 § 34; 1974 ex.s. c 103 § 1; 1970 ex.s. c 100 § 2; 1967 c 25 § 1; 1963 c 16 § 2. Formerly RCW 46.48.012.]

Federal requirements——Severability——1977 ex.s. c 151: See RCW 47.98.070 and 47.98.080.

46.61.410 Increases by secretary of transportation——Maximum speed limit for trucks——Auto stages——Signs and notices. (1) Subject to subsection (2) below the secretary may increase the maximum speed limit on any highway or portion thereof to not more than seventy miles per hour in accordance with the design speed thereof (taking into account all safety elements included therein), or whenever the secretary determines upon the basis of an engineering and traffic investigation that such greater speed is reasonable and safe under the circumstances existing on such part of the highway. The greater maximum limit so determined shall be effective, when appropriate signs giving notice thereof are erected, or if a maximum limit is established for auto stages which is lower than the limit for automobiles, the auto stage speed limit shall become effective thirty days after written notice thereof is mailed in the manner provided in subsection (4) of this section.

Such maximum speed limit may be declared to be effective at all times or at such times as are indicated upon said signs or in the case of auto stages, as indicated in said written notice; and differing limits may be established for different times of day, different types of vehicles, varying weather conditions, and other factors bearing on safe speeds, which shall be effective when posted upon appropriate fixed or variable signs or if a maximum limit is established for auto stages which is lower than the limit for automobiles, the auto stage speed limit shall become effective thirty days after written notice thereof is mailed in the manner provided in subsection (4) of this section.

(2) The maximum speed limit for vehicles over ten thousand pounds gross weight and vehicles in combination except auto stages shall not exceed sixty miles per hour and may be established at a lower limit by the secretary as provided in RCW 46.61.405, as now or hereafter amended.

(3) The word "trucks" used by the department on signs giving notice of maximum speed limits shall mean vehicles over ten thousand pounds gross weight and all vehicles in combination except auto stages.

(4) Whenever the secretary shall establish maximum speed limits for auto stages lower than the maximum limits for automobiles, the secretary shall cause to be mailed notice thereof to each auto transportation company holding a certificate of public convenience and necessity issued by the Washington utilities and transportation commission. The notice shall be mailed to the chief place of business within the state of Washington of each auto transportation company or if none then its chief place of business without the state of Washington. [1977 ex.s. c 151 § 35; 1974 ex.s. c 103 § 2; 1970 ex.s. c 100 § 1; 1969 ex.s. c 12 § 1; 1965 ex.s. c 155 § 55; 1963 c 16 § 3. Formerly RCW 46.48.013.]

Federal requirements——Severability——1977 ex.s. c 151: See RCW 47.98.070 and 47.98.080.

46.61.415 When local authorities may alter maximum limits. (1) Whenever local authorities in their respective jurisdictions determine on the basis of an engineering and traffic investigation that the maximum speed permitted under RCW 46.61.400 or 46.61.440 is greater or less than is reasonable and safe under the conditions found to exist upon a highway or part of a highway, the local authority may determine and declare a reasonable and safe maximum limit thereon which

(a) Decreases the limit at intersections; or

(b) Increases the limit but not to more than sixty miles per hour; or

(c) Decreases the limit but not to less than twenty miles per hour.

(2) Local authorities in their respective jurisdictions shall determine by an engineering and traffic investigation the proper maximum speed for all arterial streets and shall declare a reasonable and safe maximum limit thereon which may be greater or less than the maximum speed permitted under RCW 46.61.400(2) but shall not exceed sixty miles per hour.

(3) The secretary of transportation is authorized to establish speed limits on county roads and city and town streets as shall be necessary to conform with any federal requirements which are a prescribed condition for the allocation of federal funds to the state.

(4) Any altered limit established as hereinbefore authorized shall be effective when appropriate signs giving notice thereof are erected. Such maximum speed limit may be declared to be effective at all times or at such times as are indicated upon such signs; and differing limits may be established for different times of day, different types of vehicles, varying weather conditions, and other factors bearing on safe speeds, which shall be effective when posted upon appropriate fixed or variable signs.

(5) Any alteration of maximum limits on state highways within incorporated cities or towns by local authorities shall not be effective until such alteration has been approved by the secretary of transportation. [1977 ex.s. c 151 § 36; 1974 ex.s. c 103 § 3; 1963 c 16 § 4. Formerly RCW 46.48.014.]

Federal requirements——Severability——1977 ex.s. c 151: See RCW 47.98.070 and 47.98.080.

46.61.425 Minimum speed regulation——Passing slow moving vehicle. (1) No person shall drive a motor vehicle at such a slow speed as to impede the normal and reasonable movement of traffic except when reduced speed is necessary for safe operation or in compliance with law: *Provided*, That a person following a vehicle driving at less than the legal maximum speed and desiring to pass such vehicle may exceed the speed limit, subject to the provisions of RCW 46.61.120 on highways having only one lane of traffic in each direction, at only such a speed and for only such a distance as is necessary to complete the pass with a reasonable margin of safety.

(2) Whenever the secretary of transportation or local authorities within their respective jurisdictions determine on the basis of an engineering and traffic investigation that slow speeds on any part of a highway unreasonably impede the normal movement of traffic, the secretary or such local authority may determine and declare a minimum speed limit thereat which shall be effective when appropriate signs giving notice thereof are erected. No person shall drive a vehicle slower than such minimum speed limit except when necessary for safe operation or in compliance with law. [1977 ex.s. c 151 § 37; 1969 c 135 § 1; 1967 c 25 § 2; 1963 c 16 § 6. Formerly RCW 46.48.015.]

Rules of court: Monetary penalty schedule——JTIR 6.2.

Federal requirements——Severability——1977 ex.s. c 151: See RCW 47.98.070 and 47.98.080.

46.61.427 Slow moving vehicle to pull off roadway. On a two-lane highway where passing is unsafe because of traffic in the opposite direction or other conditions, a slow moving vehicle, behind which five or more vehicles are formed in a line, shall turn off the roadway wherever sufficient area for a safe turn-out exists, in order to permit the vehicles following to proceed. As used in this section a slow moving vehicle is one which is proceeding at a rate of speed less than the normal flow of traffic at the particular time and place. [1973 c 88 § 1.]

46.61.428 Slow-moving vehicle permitted to drive on improved shoulders, when. (1) The state department of transportation and local authorities are authorized to determine those portions of any two-lane highways under their respective jurisdictions on which drivers of slow-moving vehicles may safely drive onto improved shoulders for the purpose of allowing overtaking vehicles to pass and may by appropriate signs indicate the beginning and end of such zones.

(2) Where signs are in place to define a driving-on-shoulder zone as set forth in subsection (1) of this section, the driver of a slow-moving vehicle may drive onto and along the shoulder within the zone but only for the purpose of allowing overtaking vehicles to pass and then shall return to the roadway.

(3) Signs erected to define a driving-on-shoulder zone take precedence over pavement markings for the purpose of allowing the movements described in subsection (2) of this section. [1984 c 7 § 71; 1977 ex.s. c 39 § 1.]

Severability——1984 c 7: See note following RCW 47.01.141.

46.61.430 Authority of secretary of transportation to fix speed limits on limited access facilities exclusive——Local regulations. Notwithstanding any law to the contrary or inconsistent herewith, the secretary of transportation shall have the power and the duty to fix and regulate the speed of vehicles within the maximum speed limit allowed by law for state highways, designated as limited access facilities, regardless of whether a portion of said highway is within the corporate limits of a city or town. No governing body or authority of such city or town or other political subdivision may have the power to pass or enforce any ordinance, rule, or regulation requiring a different rate of speed, and all such ordinances, rules, and regulations contrary to or inconsistent therewith now in force are void and of no effect. [1977 ex.s. c 151 § 38; 1974 ex.s. c 103 § 4; 1961 c 12 § 46-.48.041. Prior: 1955 c 177 § 5. Formerly RCW 46.48.041.]

Federal requirements——Severability——1977 ex.s. c 151: See RCW 47.98.070 and 47.98.080.

46.61.435 Local authorities to provide "stop" or "yield" signs at intersections with increased speed highways——Designated as arterials. The governing body or authority of any such city or town or political subdivision shall place and maintain upon each and every highway intersecting a highway where an increased speed is permitted, as provided in this chapter, appropriate stop or yield signs, sufficient to be read at any time by any person upon approaching and entering the highway upon which such increased speed is permitted and such city street or such portion thereof as is subject to the increased speed shall be an arterial highway. [1975 c 62 § 33; 1961 c 12 § 46.48.046. Prior: 1951 c 28 § 4; prior: 1937 c 189 § 66, part; RRS § 6360–66, part; 1927 c 309 § 5, part; 1921 c 96 § 41, part; 1919 c 59 § 13, part; 1917 c 155 § 20, part; 1915 c 142 § 34, part; RRS § 6362–5, part. Formerly RCW 46.48.046.]

Severability——1975 c 62: See note following RCW 36.75.010.

Designation of city streets as arterials, stopping on entering: RCW 46.61.195.

Traffic control signals or devices upon city streets forming part of state highways: RCW 46.61.085.

46.61.440 Maximum speed limit when passing school or playground crosswalks. Subject to RCW 46.61.400(1), and except in those instances where a lower maximum lawful speed is provided by this chapter or otherwise, it shall be unlawful for the operator of any vehicle to operate the same at a speed in excess of twenty miles per hour when operating any vehicle upon a highway either inside or outside an incorporated city or town when passing any marked school or playground crosswalk when such marked crosswalk is fully posted with standard school speed limit signs or standard playground speed limit signs. The speed zone at the crosswalk shall extend three hundred feet in either direction from the marked crosswalk. [1975 c 62 § 34; 1963 c 16 § 5; 1961 c 12 § 46.48.023. Prior: 1951 c 28 § 9; 1949 c 196 § 6, part; 1947 c 200 § 8, part; 1937 c 189 § 64, part; Rem. Supp. 1949 § 6360–64, part; 1927 c 309 § 3, part; 1923 c 181 § 6, part; 1921 c 96 § 27, part; 1917 c 155 § 16, part; 1915 c 142 § 24, part; RRS § 6362–3, part; 1909 c 249 § 279, part; Rem. & Bal. § 2531, part. Formerly RCW 46.48.023.]

Severability——1975 c 62: See note following RCW 36.75.010.

46.61.445 Due care required. Compliance with speed requirements of this chapter under the circumstances hereinabove set forth shall not relieve the operator of any vehicle from the further exercise of due care and caution as further circumstances shall require. [1961 c 12 § 46.48.025. Prior: 1951 c 28 § 11; 1949 c 196 § 6, part; 1947 c 200 § 8, part; 1937 c 189 § 64, part; Rem. Supp. 1949 § 6360–64, part; 1927 c 309 § 3, part; 1923 c 181 § 6, part; 1921 c 96 § 27, part; 1917 c 155 § 16, part; 1915 c 142 § 24, part; RRS § 6362–3, part; 1909 c 249 § 279, part; Rem. & Bal. 2531, part. Formerly RCW 46.48.025.]

Duty to use due care: RCW 46.61.400(1).

46.61.450 Maximum speed, weight, or size in traversing bridges, elevated structures, tunnels, underpasses——Posting limits. It shall be unlawful for any person to operate a vehicle or any combination of vehicles over any bridge or other elevated structure or through any tunnel or underpass constituting a part of any public highway at a rate of speed or with a gross weight or of a size which is greater at any time than the maximum speed or maximum weight or size which can be maintained or carried with safety over any such bridge or structure or through any such tunnel or underpass when such bridge, structure, tunnel, or underpass is sign posted as hereinafter provided. The secretary of transportation, if it be a bridge, structure, tunnel, or underpass upon a state highway, or the governing body or authorities of any county, city, or town, if it be upon roads or streets under their jurisdiction, may restrict the speed which may be maintained or the gross weight or size which may be operated upon or over any such bridge or elevated structure or through any such tunnel or underpass with safety thereto. The secretary or the governing body or authorities of any county, city, or town having jurisdiction shall determine and declare the maximum speed or maximum gross weight or size which such bridge, elevated structure, tunnel, or underpass can withstand or accommodate and shall cause suitable signs stating such maximum speed or maximum gross weight, or size, or either, to be erected and maintained on the right hand side of such highway, road, or street and at a distance of not less than one hundred feet from each end of such bridge, structure, tunnel, or underpass and on the approach thereto: *Provided*, That in the event that any such bridge, elevated structure, tunnel, or underpass is upon a city street designated by the transportation commission as forming a part of the route of any state highway through any such incorporated city or town the determination of any maximum speed or maximum gross weight or size which such bridge, elevated structure, tunnel, or underpass can withstand or accommodate shall not be enforceable at any speed, weight, or size less

than the maximum allowed by law, unless with the approval in writing of the secretary. Upon the trial of any person charged with a violation of this section, proof of either violation of maximum speed or maximum weight, or size, or either, and the distance and location of such signs as are required, shall constitute conclusive evidence of the maximum speed or maximum weight, or size, or either, which can be maintained or carried with safety over such bridge or elevated structure or through such tunnel or underpass. [1977 ex.s. c 151 § 39; 1961 c 12 § 46.48.080. Prior: 1937 c 189 § 70; RRS § 6360–70. Formerly RCW 46.48.080.]

Federal requirements——Severability——1977 ex.s. c 151: See RCW 47.98.070 and 47.98.080.

46.61.455 Vehicles with solid or hollow cushion tires. It shall be unlawful to operate any vehicle equipped or partly equipped with solid rubber tires or hollow center cushion tires, or to operate any combination of vehicles any part of which is equipped or partly equipped with solid rubber tires or hollow center cushion tires, so long as solid rubber tires or hollow center cushion tires may be used under the provisions of this title, upon any public highway of this state at a greater rate of speed than ten miles per hour. [1961 c 12 § 46.48.110. Prior: 1947 c 200 § 11; 1937 c 189 § 73; Rem. Supp. 1947 § 6360–73. Formerly RCW 46.48.110.]

46.61.460 Special speed limitation on motor-driven cycle. No person shall operate any motor-driven cycle at any time mentioned in RCW 46.37.020 at a speed greater than thirty-five miles per hour unless such motor-driven cycle is equipped with a head lamp or lamps which are adequate to reveal a person or vehicle at a distance of three hundred feet ahead. [1965 ex.s. c 155 § 57.]

46.61.465 Exceeding speed limit evidence of reckless driving. The unlawful operation of a vehicle in excess of the maximum lawful speeds provided in this chapter at the point of operation and under the circumstances described shall be prima facie evidence of the operation of a motor vehicle in a reckless manner by the operator thereof. [1961 c 12 § 46.48.026. Prior: 1951 c 28 § 12; 1949 c 196 § 6, part; 1947 c 200 § 8, part; 1937 c 189 § 64, part; Rem. Supp. 1949 § 6360–64, part; 1927 c 309 § 3, part; 1923 c 181 § 6, part; 1921 c 96 § 27, part; 1917 c 155 § 16, part; 1915 c 142 § 24, part; RRS § 6362–3, part; 1909 c 249 § 279, part; Rem. & Bal. § 2531, part. Formerly RCW 46.48.026.]

46.61.470 Speed traps defined, certain types permitted——Measured courses, speed measuring devices, timing from aircraft. (1) No evidence as to the speed of any vehicle operated upon a public highway by any person arrested for violation of any of the laws of this state regarding speed or of any orders, rules, or regulations of any city or town or other political subdivision relating thereto shall be admitted in evidence in any court at a subsequent trial of such person in case such evidence relates to or is based upon the maintenance or use of a speed trap except as provided in subsection (2) of this section. A "speed trap," within the meaning of this section, is a particular section of or distance on any public highway, the length of which has been or is measured off or otherwise designated or determined, and the limits of which are within the vision of any officer or officers who calculate the speed of a vehicle passing through such speed trap by using the lapsed time during which such vehicle travels between the entrance and exit of such speed trap.

(2) Evidence shall be admissible against any person arrested or issued a notice of a traffic infraction for violation of any of the laws of this state or of any orders, rules, or regulations of any city or town or other political subdivision regarding speed if the same is determined by a particular section of or distance on a public highway, the length of which has been accurately measured off or otherwise designated or determined and either: (a) The limits of which are controlled by a mechanical, electrical, or other device capable of measuring or recording the speed of a vehicle passing within such limits; or (b) a timing device is operated from an aircraft, which timing device when used to measure the elapsed time of a vehicle passing over such a particular section of or distance upon a public highway indicates the speed of a vehicle.

(3) The exceptions of subsection (2) of this section are limited to devices or observations with a maximum error of not to exceed five percent using the lapsed time during which such vehicle travels between such limits, and such limits shall not be closer than one-fourth mile. [1981 c 105 § 1; 1961 c 12 § 46.48.120. Prior: 1937 c 189 § 74; RRS § 6360–74; 1927 c 309 § 7; RRS § 6362–7. Formerly RCW 46.48.120.]

46.61.475 Charging violations of speed regulations. (1) In every charge of violation of any speed regulation in this chapter the complaint, also the summons or notice to appear, shall specify the approximate speed at which the defendant is alleged to have driven, also the maximum speed applicable within the district or at the location. [1965 ex.s. c 155 § 58.]

RECKLESS DRIVING, DRIVING WHILE INTOXICATED, VEHICULAR HOMICIDE AND ASSAULT

46.61.500 Reckless driving——Penalty. (1) Any person who drives any vehicle in wilful or wanton disregard for the safety of persons or property is guilty of reckless driving. Violation of the provisions of this section is a misdemeanor.

(2) The license or permit to drive or any nonresident privilege of any person convicted of reckless driving shall be suspended by the department for not less than thirty days. [1979 ex.s. c 136 § 85; 1967 c 32 § 67; 1965 ex.s. c 155 § 59.]

Severability——1979 ex.s. c 86: See note following RCW 13.24.040.

47.24.020 Jurisdiction, control of such streets. The jurisdiction, control, and duty of the state and city or town with respect to such streets shall be as follows:

(1) The department has no authority to change or establish any grade of any such street without approval of the governing body of such city or town, except with respect to limited access facilities established by the commission;

(2) The city or town shall exercise full responsibility for and control over any such street beyond the curbs and if no curb is installed, beyond that portion of the highway used for highway purposes. However, within incorporated cities and towns the title to a state limited access highway vests in the state, and, notwithstanding any other provision of this section, the department shall exercise full jurisdiction, responsibility, and control to and over such facility as provided in chapter 47.52 RCW;

(3) The department has authority to prohibit the suspension of signs, banners, or decorations above the portion of such street between the curbs or portion used for highway purposes up to a vertical height of twenty feet above the surface of the roadway;

(4) The city or town shall at its own expense maintain all underground facilities in such streets, and has the right to construct such additional underground facilities as may be necessary in such streets;

(5) The city or town has the right to grant the privilege to open the surface of any such street, but all damage occasioned thereby shall promptly be repaired either by the city or town itself or at its direction;

(6) The city or town at its own expense shall provide street illumination and shall clean all such streets, including storm sewer inlets and catch basins, and remove all snow, except that the state shall when necessary plow the snow on the roadway. In cities and towns having a population of fifteen thousand or less according to the latest determination of population by the office of financial management, the state, when necessary for public safety, shall assume, at its expense, responsibility for the stability of the slopes of cuts and fills and the embankments within the right of way to protect the roadway itself. The state shall install, maintain, and operate all illuminating facilities on any limited access facility, together with its interchanges, located within the corporate limits of any city or town, and shall assume and pay the costs of all such installation, maintenance, and operation incurred after November 1, 1954;

(7) The department has the right to use all storm sewers on such highways without cost; and if new storm sewer facilities are necessary in construction of new streets by the department, the cost of the facilities shall be borne by the state and/or city as may be mutually agreed upon between the department and the governing body of the city or town;

(8) Cities and towns have exclusive right to grant franchises not in conflict with state laws, over, beneath, and upon such streets, but the department is authorized to enforce in an action brought in the name of the state any condition of any franchise which a city or town has granted on such street. No franchise for transportation of passengers in motor vehicles may be granted on such streets without the approval of the department, but the department shall not refuse to approve such franchise unless another street conveniently located and of strength of construction to sustain travel of such vehicles is accessible;

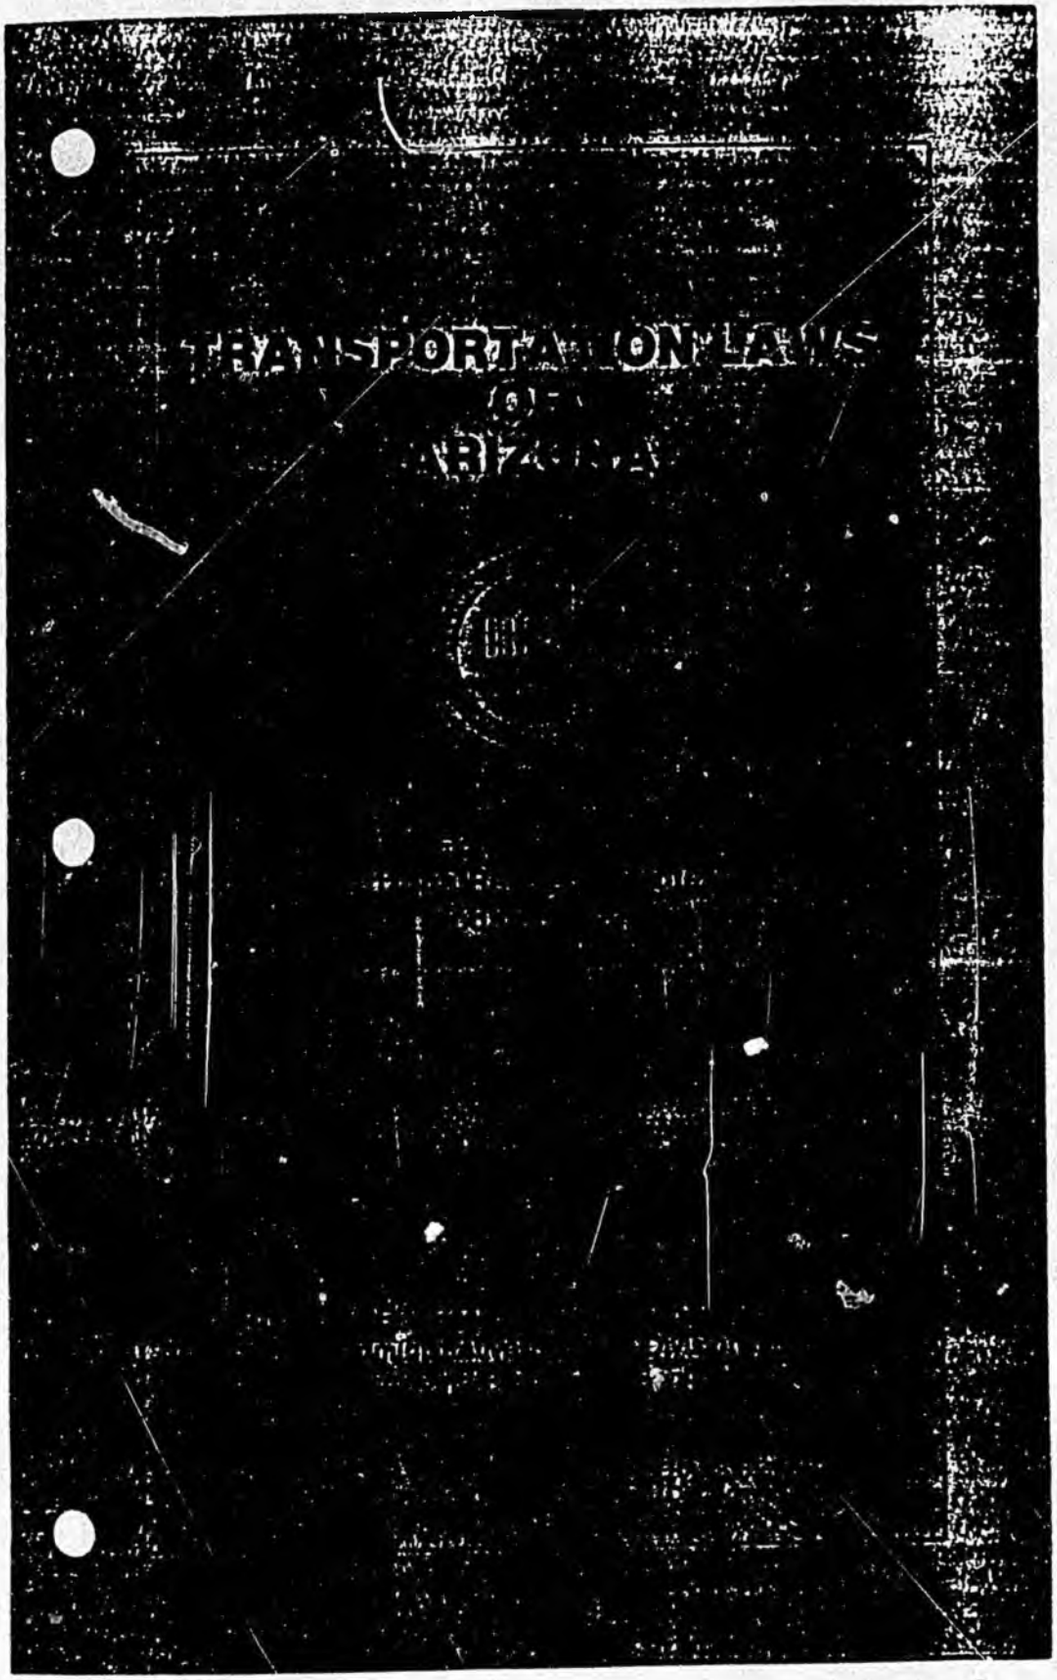
(9) Every franchise or permit granted any person by a city or town for use of any portion of such street by a public utility shall require the grantee or permittee to restore, repair, and replace to its original condition any portion of the street damaged or injured by it;

(10) The city or town has the right to issue overload or overwidth permits for vehicles to operate on such streets or roads subject to regulations printed and distributed to the cities and towns by the department;

(11) Cities and towns shall regulate and enforce all traffic and parking restrictions on such streets, but all regulations adopted by a city or town relating to speed, parking, and traffic control devices on such streets not identical to state law relating thereto are subject to the approval of the department before becoming effective. All regulations pertaining to speed, parking, and traffic control devices relating to such streets heretofore adopted by a city or town not identical with state laws shall become null and void unless approved by the department heretofore or within one year after March 21, 1963;

(12) The department shall erect, control, and maintain at state expense all route markers and directional signs, except street signs, on such streets;

(13) The department shall install, operate, maintain, and control at state expense all traffic control signals, signs, and traffic control devices for the purpose of regulating both pedestrian and motor vehicular traffic on, entering upon, or leaving state highways in cities and towns having a population of fifteen thousand or less according to the latest determination of population by the office of financial management. Such cities and towns may submit to the department a plan for traffic control signals, signs, and traffic control devices desired by



TRANSPORTATION LAWS

shall suspend the driving privilege of such person for the period of time ordered by the judge.

C. When a person convicted of a violation of this section has been previously convicted of a violation of this section, section 13-1102 or 13-1103, subsection A, paragraph 1, in the driving of a vehicle, 28-692 or 28-708 within a period of twenty-four months, such person is guilty of a class 1 misdemeanor and shall not be eligible for probation, pardon, parole, commutation or suspension of sentence or release on any other basis until such person has served not less than twenty days in jail. The judge shall require the surrender to him of any operator's or chauffeur's license of such convicted person and shall immediately forward to the department the license with the abstract of conviction. The department upon receipt thereof shall revoke the driving privilege of such person. The dates of the commission of the offense shall be the determining factor in applying this rule. A second or subsequent violation for which a conviction occurs as provided in this section shall not include a conviction for an offense arising out of the same series of acts. No judge may grant probation to or suspend the imposition or execution of a jail sentence or fail to secure the surrender to him of any license of any person for such a second or subsequent conviction.

D. The court may, upon pronouncement of any jail sentence under this section, provide in the sentence that the defendant may be permitted, if he is employed and can continue his employment, to continue such employment for not more than twelve hours per day nor more than six days per week, and the remaining day, days or parts of days shall be spent in jail until the sentence is served. He shall be allowed out of jail only long enough to complete his actual hours of employment and no longer.

ARTICLE 6 -- SPEED RESTRICTIONS

28-701. Reasonable and prudent speed; prima facie evidence; exceptions; classification

A. A person shall not drive a vehicle on a highway at a speed greater than is reasonable and prudent under the circumstances, conditions and actual and potential hazards then existing. In every event, speed shall be so controlled as may be necessary to avoid colliding with any object, person, vehicle or other conveyance on, entering or adjacent to the highway in compliance with legal requirements and the duty of all persons to exercise reasonable care for the protection of others.

B. Except as provided in subsections C and D or where a special hazard requires a lesser speed, any speed in excess of these speeds is prima facie evidence that the speed is too great and therefore unreasonable:

1. Fifteen miles per hour approaching school crossing.
2. Twenty-five miles per hour in any business or residential district.
3. Sixty-five miles per hour in other locations.

C. The speed limits set forth in this section may be altered as authorized in sections 28-702 and 28-703.

D. The maximum speed as provided in this section shall be reduced to that which is reasonable and prudent under the conditions and having regard to the actual and potential hazards then existing, such as when:

1. Approaching and crossing an intersection or railroad crossing.
2. Approaching and going around a curve.
3. Approaching a hill crest.
4. Traveling upon any narrow or winding roadway.
5. Special hazards exist with respect to pedestrians or other traffic or by reason of weather or highway conditions.

E. A person shall not drive a motor vehicle at a speed that is less than that which is reasonable and prudent under existing conditions.

28-701.01 Definitions

In this article, unless the context otherwise requires:

28-701.01. **Definitions**

1. "Freeway" means a highway in respect to which the owners of abutting lands have no right or easement of access to or from their abutting lands or in respect to which such owners have only limited or restricted right or easement of access, and which is declared to be such by the director of the department of transportation.

28-701.02. **Excessive speed**

A. A person shall not:

1. Exceed thirty-five miles per hour approaching a school crossing.

2. Exceed the posted speed limit in a business or residential district by more than twenty miles per hour, or if no speed limit is posted, forty-five miles per hour.

3. Exceed eighty-five miles per hour in other locations.

B. A person who violates subsection A is guilty of a class 3 misdemeanor.

C. A person charged with a violation of this section may not be issued a civil complaint for a violation of section 28-701 if the civil complaint alleges a violation arising out of the same circumstances.

28-702. **Establishment of state speed zones**

When the director determines upon the basis of an engineering and traffic investigation that any maximum speed limit is greater or less than is reasonable or safe under the conditions found to exist upon any part of a state highway, the director may determine and declare a reasonable and safe maximum speed limit for such location, which shall be effective when appropriate signs giving notice thereof are erected. A maximum speed limit, as declared pursuant to this section, may be declared to be effective at all times or at such times as are indicated on the speed limit signs. Varying speed limits may be established for different times of day, different types of vehicles, varying weather conditions, and other factors bearing on safe speeds. Such varying limits shall be effective when posted upon appropriate fixed or variable signs.

28-702.01. **Maximum speed limit; authority for order increasing; waste of a finite resource; fine; sanction**

A. No maximum speed limit on any public highway in this state shall be in excess of fifty-five miles per hour notwithstanding any other higher maximum speed limit previously established pursuant to any other provision of law. This shall not be construed as altering any existing maximum speed limit which is less than fifty-five miles per hour or to prevent the appropriate jurisdiction from establishing, altering, or lowering any maximum speed limit which is less than fifty-five miles per hour within its respective jurisdiction.

B. The speed limit for all types of motor vehicles shall be fifty-five miles per hour on any portion of any public highway that has four or more traffic lanes, the opposing lanes of which are physically separated other than by striping, which portion of highway has had a speed limit for all types of motor vehicles of fifty-five miles or more on November 1, 1973.

C. The director may order that this maximum speed limit be increased up to seventy-five miles per hour on an individual highway or on all highways in the state if the governor declares by proclamation that an emergency does not exist and that the receipt of federal highway funds would not be withheld.

D. It is unlawful for any person to drive a motor vehicle at a speed in excess of fifty-five miles per hour, or in excess of a higher maximum speed if changed as set forth under subsection C of this section.

E. If a person is charged with violating the provisions of subsection D of this section and the speed at which the defendant is alleged to have driven as provided in section 28-707, subsection A is sixty-five miles per hour or less or the court finds that the defendant violated subsection D of this section and that the speed at which the defendant drove was not in excess of sixty-five miles per hour the offense shall be designated as the waste of a finite resource currently in short supply, which is a petty offense.

F. If a person is charged with violating the provisions of subsection D of this section and the speed at which the defendant is alleged to have driven as provided in section 28-707, subsection A is more than sixty-five miles per hour and the court so finds the offense shall be designated as unlawful speed which is a class 3 misdemeanor.

G. If a person is convicted of a petty offense under this section:

1. No department or agency of this state shall consider such violation for the purpose of determining whether such person's operator's or chauffeur's license should be suspended or revoked.

2. An insurer shall not consider the violation as a moving traffic violation against the person for the purpose of establishing rates of motor vehicle insurance charged by the insurer nor shall the insurer cancel or refuse to renew any policy of insurance for such a violation.

3. The fine shall not exceed fifteen dollars plus the penalty assessment imposed pursuant to section 41-2403.

4. No report may be made under section 28-1061, subsection B.

28-702.02. **Authority to change speed signs on freeways**

When the director determines upon the basis of an engineering and traffic survey that the safe and orderly movement of traffic upon any state highway which is a freeway will be facilitated by the establishment of variable speed limits, the department may erect, regulate, and control signs upon the state highway which is a freeway, or any portion thereof, which signs shall be so designed as to permit display of different speed limits at various times of the day or night. Such signs shall be of sufficient size and clarity to give adequate notice of the applicable speed limit. The speed limit upon the freeway at a particular time and place shall be that which is then and there displayed upon such sign.

28-702.03. **Maximum speed limit on interstate system highway; out of state violation**

If a resident of this state is convicted of violating the maximum speed limit of fifty-five miles per hour on the interstate system highways of another state, but the speed at which the person is alleged to have driven is sixty-five miles per hour or less:

1. No department or agency of this state may consider the violation for the purpose of determining whether the person's operator's or chauffeur's license should be suspended or revoked.

2. An insurer shall not consider the violation as a moving traffic violation against the person for the purpose of establishing rates of motor vehicle insurance charged by the insurer nor shall the insurer cancel or refuse to renew any policy of insurance for such a violation.

28-703. **When local authorities may and shall alter maximum limits**

A. When local authorities within their respective jurisdictions determine upon the basis of an engineering and traffic investigation that the maximum speed permitted under this article is greater or less than is reasonable or safe under the conditions found to exist upon any part of a street or highway, the local authority subject to subsection D may determine and declare a reasonable and safe maximum speed limit at such location and based on such investigation may:

1. Decrease the limit at intersections.

2. Increase the limit within any business or residence district, but not to more than sixty-five miles per hour.

3. Decrease the limit outside any business or residence district.

4. Increase or decrease the limits on streets adjacent to school grounds.

B. Local authorities in their respective jurisdictions shall determine by an engineering and traffic investigation the proper maximum speed for all arterial streets and shall declare a reasonable and safe maximum limit thereon which may be greater or less than the maximum speed permitted under this article for a business or residence district.

C. Any altered limit established as provided for in this section shall be effective at all times, or during hours of darkness, or at other times as may be determined when appropriate signs giving notice thereof are erected upon such street or highway.

D. Alteration of maximum limits on state highways or extensions thereof in a municipality by local authorities shall not be effective until the alteration has been approved by the director.

E. Not more than six such alterations as provided for in this section shall be made per mile along a street or highway, except in the case of reduced limits at intersections, and the difference between adjacent limits shall not be more than ten miles per hour except for school crossings.

28-703.01. **End of speed zone; signs required**

The agency or authority establishing a speed zone under the provisions of sections 28-702 or 28-703 shall be responsible for erecting, at the beginning of each such zone a sign designating the maximum allowable speed within the zone, and at the end thereof a sign bearing either the word "resume speed" or setting forth the new maximum speed limit.

28-703.02. **Establishing speed on multiple-lane highways**

On multiple-lane highways and freeways with two or more separate roadways different prima facie speed limits may be established for different roadways under any of the procedures specified in sections 28-702, 28-703 and 28-703.01.

28-704. **Minimum speed regulation**

A. No person shall drive a motor vehicle at such a slow speed as to impede or block the normal and reasonable movement of traffic except when reduced speed is necessary for safe operation or in compliance with law.

B. Whenever the director or local authorities within their respective jurisdictions determine on the basis of an engineering and traffic investigation that slow speeds on any part of a highway consistently impede the normal and reasonable movement of traffic, the director or such local authority may determine and declare a minimum speed limit below which no person shall drive a vehicle except when necessary for safe operation or in compliance with law.

28-705. **Special speed limitation on motor-driven cycles**

No person shall operate any motor-driven cycle at any time mentioned in section 28-922 at a speed greater than thirty-five miles per hour unless such motor-driven cycle is equipped with a head lamp or lamps which are adequate to reveal a person or vehicle at a distance of three hundred feet ahead.

28-706. **Special speed limitations**

A. No person shall drive any vehicle equipped with solid rubber or cushion tires at a speed greater than a maximum of ten miles per hour.

B. No person shall drive a vehicle over any bridge or other elevated structure constituting a part of a highway at a speed which is greater than the maximum speed which can be maintained with safety to the bridge or structure, when the structure is signposted as provided in this section.

C. The director upon request from any local authority shall, or upon his own initiative may, conduct an investigation of any bridge or other elevated structure constituting a part of a highway, and if he thereupon finds that the structure cannot with safety to itself withstand vehicles traveling at the speed otherwise permissible under this article he shall determine and declare the maximum speed of vehicles which the structure can withstand, and shall cause or permit suitable signs stating such maximum speed to be erected and maintained at a distance of three hundred feet before each end of the structure.

D. Upon the trial of any person charged with a violation of this section, proof of determination of the maximum speed by the director and the existence of the signs shall constitute conclusive evidence of the maximum speed which can be maintained with safety to the bridge or structure.

28-707. **Charging violations and rule in civil actions**

A. In every charge of violation of any speed regulation in this article, the complaint and the summons or notice to appear shall specify the speed at which the defendant is alleged to have driven and the maximum speed applicable within the district or at the location.

B. The provision of this article declaring maximum speed limitations shall not be construed to relieve the plaintiff in any civil action, other than a civil action to impose a civil sanction, from the burden of proving negligence on the part of the defendant as the proximate cause of an accident.

28-708. **Racing on highways; classification**

A. No person shall drive any vehicle in any race, speed competition or contest, drag race or acceleration contest, test of physical endurance, exhibition of speed or acceleration, or for the purpose of making a speed record on a street or highway, and no person shall in any manner participate in any such race, competition, contest, test or exhibition.

B. Drag race is defined as the operation of two or more vehicles from a point side by side at accelerating speeds in a competitive attempt to outdistance each other, or the operation of one or more vehicles over a common selected course, from the same point, for the purpose of comparing the relative speeds or power of acceleration of such vehicle or vehicles within a certain distance or time limit.

C. Racing is defined as the use of one or more vehicles in an attempt to outgain, outdistance, or prevent another vehicle from passing.

D. A person who violates this section is guilty of a class 2 misdemeanor. If a person is convicted of a second or subsequent violation within twenty-four months of a first conviction, such person is guilty of a class 2 misdemeanor and shall not be eligible for probation, pardon, parole, commutation or suspension of sentence or release on any other basis until such person has served not less than ten days in jail.

E. The court may, upon pronouncement of any jail sentence under this section, in cases of extreme hardship provide in the sentence that the defendant may be permitted, if he is employed and can continue his employment, to continue such employment for not more than twelve hours per day nor more than six days per week, and the remaining day, days or parts of days shall be spent in jail until the sentence is served. He shall be allowed out of jail only long enough to complete his actual hours of employment and no longer.

F. When any person is convicted of a violation of the provisions of this section, the judge may, upon a first conviction, and shall upon a second or subsequent conviction for an offense committed within a period of twenty-four months require the surrender to him of any operator's or chauffeur's license of such person and immediately forward same to the department with the abstract of conviction. Upon a first conviction the judge may order the suspension of the driving privileges of such person for a period not to exceed ninety days. The department upon receipt of the license, abstract of conviction, and order of the court, in the case of a first conviction, shall suspend the driving privileges of such person for the period of time ordered by the judge. In the case of a second or subsequent conviction for an offense committed within a period of twenty-four months, the department upon receipt of the license and the abstract of conviction shall revoke the driving privileges of such person.

G. The director may give authorization in writing for any organized and properly controlled event otherwise prohibited by this section to utilize a highway or part of a highway. The authorization shall specify the time of the event, the highway or part of a highway to be utilized, and any special conditions the director may require for the particular event.

From: Rep. Rick Uehling
Subject: HB 552 "An Act relating to setting speed limits and neighborhood speed zones"
Date: April 12,1986

HB 552 would require DOT to consider the presence of neighborhoods, schools, parks, and pedestrian traffic when setting speed limits. I refer to this concept as Neighborhood Speed Zones.

Our State law charges DOT with setting speed limits but the Legislature has never given DOT any indication of what factors it should consider when setting speed limits. As a result, speed limits are decided according to DOT internal policies referred to by DOT as 'policies and procedures'. At the heart of these 'policies and procedures' is the use of the '85% percentile'. DOT sets speed limits on highways and other roadways under its jurisdiction at the rate at which 85% of the drivers are currently driving.

DOT only gives lip service to the consideration of neighborhood and pedestrian safety factors when setting speed limits. DOT always uses the '85% percentile' to overrule local resident's safety concerns about speed limits. Residents have no where to turn because DOT decisions are based upon their internal policies and there are no statutory or regulatory (AAC) guidelines.

HB 552 will give Legislative direction to DOT about setting speed limits and opens the process by which DOT sets speed limits by providing local governments, community councils and community organizations a right to a public hearings. It is important to note that HB 552 does not attempt to set speed limits in neighborhoods or take any authority away from the Commissioner of DOT, he retains final authority to set speed limits.

With the State spending hundreds of millions of dollars on new roads across the State, it is more important now than ever that there be some protections built into the system for our neighborhoods. Neighborhood Speed Zones (HB552) will be an important protection, not just for the safety of our Streets in Anchorage, but throughout the state as well.

Changes were made by the House State Affairs Committee to insure that DOT responds to the concerns of local government and

1526 K STREET • ANCHORAGE, ALASKA 99501 • (907) 274-4256
P.O. BOX V • JUNEAU, ALASKA 99811 • (907) 465-4821

neighborhood organizations by providing for public notice and the holding of public hearings.

The House Transportation Committee Substitute reorganizes the structure of the House State Affairs Committee in a clarifying manner to with regard to the local hearing process.

The House Finance Committee changed the the words "arterial roadways' (p.1,ln.13) to 'other roadways' to insure that 'collector roads' for which DOT sets speed limits are also covered in this legislation.

The House made a technical amendment on the floor (p.2,ln.2) to correct a House Finance oversight and changed the words 'neighborhood organization' (p.2,ln.4) to 'community organization.

With regard to the fiscal note placed on this legislation by DOTPF of $47,000, I support the House Finance fiscal note of zero.

RE: ~~SB~~ 689 Relating to required equipment on, and the transportation of certain loads by, motor vehicles

---

The committee will be taking up House Bill 689 on Monday, April 21st. This bill adds new sections to Title 28.35 of the Alaska Statutes, the miscellaneous provisions of the Department of Public Safety, that would require persons hauling gravel and like loads keep the loads from spilling.

Below are copies of both versions of the bill and a report by House Research on methods of lowering the danger of flying debris, opposite are copies of the present DOT regulations dealing with gravel haulers, the penalty that violators of this bill would face, a public safety opinion paper on the original bill and a zero fiscal note with analysis.

The department of public safety has informed staff that they are in favor of the bill as it is written and feel that it is sufficiently "air tight" to deal with the problem of gravel spillage. The Department of Commerce and Economic Development, Division of Measurement Standards (the weigh stations) has told staff that they have no problem with the bill, but, without the passage of Senate Bill 82 they will have no enforcement capabilities. The Alaska Association of General Contractors has worked closely with Representative Cotten on this bill and supports the present language.

CS FOR HOUSE BILL NO. 689 (Judiciary)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to required equipment on and the transportation of certain loads by, motor vehicles."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 28.35 is amended by adding new sections to read:

Sec. 28.35.251. CONTAINED OR CONFINED LOADS. (a) A person may not drive a motor vehicle loaded with sand, gravel, rock, or similar materials on a highway unless

(1) the load is contained or confined to prevent the load from dropping, shifting, leaking, or escaping, except that sand or other substances may be dropped, sprinkled, or sprayed for the purpose of cleaning or maintaining the highway or providing traction; and

(2) the load is subjected to treatment by methods, approved by the commissioner by regulation, designed to settle the load or remove loose material before the vehicle is driven on the highway.

(b) If a cover is used to contain or confine a load being driven on a highway, the cover shall be securely fastened to prevent the cover from becoming loose or detached, or from being a hazard to other users of the highway.

Sec. 28.35.253. ANTI-SPRAY DEVICES REQUIRED. A person may not drive a motor vehicle on a highway unless the vehicle is equipped with fenders, mud flaps, or other anti-spray devices adequate to prevent the vehicle from being a hazard to other users of the highway.

Sec. 28.35.255. PENALTY. A person convicted of violating AS 28.35.251 or 28.35.253 is guilty of an infraction.

For an Act entitled: "An Act relating to motor vehicles."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 28.35 is amended by adding a new section to read:

Sec. 28.35.165. MOTOR VEHICLE OPERATING RESTRICTIONS. (a) A person may not drive a loaded motor vehicle on a highway unless

(1) the load is contained or confined to prevent the load from dropping, shifting, leaking, or escaping, except that sand may be dropped for the purpose of securing traction, and water or another substance may be sprinkled in cleaning or maintaining a roadway;

(2) a cover used to contain or confine the load is securely fastened to prevent the cover from becoming loose or detached, or being a hazard to other users of the highway;

(3) a load consisting of gravel, sand, or other loose material is subjected to treatment by methods, approved by the commissioner by regulation, designed to settle the load or remove loose material before the vehicle is driven on the highway.

(b) A person may not drive a motor vehicle on a highway unless the vehicle is equipped with fenders, mud flaps, or other anti-spray devices adequate to prevent the vehicle from being a hazard to other users of the highway.

(c) A person charged with violating this section shall appear in court to enter a plea to the offense. A person convicted of violating this section may be punished by a fine of not more than $500.

MEMORANDUM

TO: Representative Barbara Lacher

FROM: Gretchen Keiser, Legislative Analyst

RE: Hazardous Debris from Commercial Vehicles
Research Request No. 84-116

Ann Plunkett of your staff requested this agency to investigate options for reducing the hazard of debris and construction materials, particularly gravel, which fly off commercial vehicles traveling on Alaska's roads. We were also asked to consider the practicality of enforcing the various options presented.

In summary, options for minimizing the problem of debris/gravel flying off commercial vehicles appear to be rather straightforward. As practical solutions, the truck driver can: 1) ensure that the truck is properly loaded; 2) secure the load in the bed of the truck; 3) ensure that tailgates, or bottom gates in the case of belly dump gravel trucks, are properly functioning and engaged; 4) clear the ledge around the bed of the truck; and 5) maintain proper anti-spray devices, or "mud flaps", behind the rear wheels. Furthermore, officials could increase enforcement of existing laws and regulations which address several of the above measures; however, this would likely divert enforcement effort from other priorties. Finally, the driver of a vehicle following the truck can: 1) allow for a greater distance between vehicles;and 2) seek compensation from the truck owner for damages caused by flying debris.

Truck Operator Measures

The uncontrolled release of gravel from a truck while in transit stems primarily from loose gravel falling off the ledges, spinning-off the top of the load in the bed, or leaking from partially sprung tailgates or bottomgates which no longer engage properly. In addition, gravel entrained in the tire treads can be sprayed toward the rear if the truck is not equipped with mud flaps. Making sure that a truck is not overloaded and cleaning the rig at the pit are reasonable measures to pursue. According to Bill Synder of the Association of General Contractors (AGC), AGC is aware of the problem and has conducted an educational campaign this spring in its weekly bulletin to its members urging

gravel haulers to clean their rigs before leaving the pit. AGC has also called gravel pit operators and urged them to load trucks properly and to level the loads. Requiring gravel haulers to cover their loads, however, would be time-consuming and costly, and AGC would oppose such efforts.

In the case of construction material scraps being hauled, debris hazards would be reduced if the driver: 1) limited the size of the load; and 2) secured the load properly.

Enforcement Measures

If self-policing by the truck operators is not effective, there are statutes and regulations which could be enforced more strenuously. The State Troopers, the primary enforcement agency, would have to divert staff effort from other duties in order to increase truck inspections. The statutes and the condition they address are summarized below:

Condition	Statute/Regulation	Enforcement Agency
Unsafe/defective equipment (e.g. sprung tailgates)	AS 28.05.011(3) 13 AAC 04.007	State Troopers
Lack of mud flaps	AS 28.05.011(2) 13 AAC 04.265	State Troopers
Unsecured load	AS 44.33.020(25) 17 AAC 25.040	State Troopers Commerce & Ec. Dev. (Weigh Stations)
Littering/ Unsecured load	AS 46.06.080(b)	State Troopers Environmental Cons.

The State Troopers have the authority to inspect vehicles for safe operating conditions and typically issue "fix it" citations which require repair of defective/unsafe equipment within a specified period of time (13 AAC 04.007). Similarly, mud flaps are required on all trucks under 13 AAC 04.265 and the regulation is enforced by the Troopers.

In 1982, operation of the State's weigh stations was transferred from the Department of Public Safety (State Troopers) to the Department of Commerce and Economic Development (Division of Measurement Standards). DCED maintains that it was not given the authority to issue citations in the case of unsecured load violations (under 17 AAC 25.040; attached). However, under authority delegated to DCED in the Imminent

Safety Hazard Program by the Alaska Transportation Commission, the weigh station inspectors can pull over vehicles until the condition is corrected.[1] Mr. Aves Thompson, Chief of Permits and Weigh Stations in DCED, interpreted a sprung tailgate or bottomgate on a gravel truck as an unsecured load that would be a violation covered under this program. Mr. Thompson stated that he receives complaints regarding the gravel hazard. His division recently cooperated with the State Troopers in an inspection operation between Palmer and Anchorage. The Troopers used the weigh station for inspection of trucks and noted problems with tailgates and gravel on ledges. In general, the State Troopers enforce the vehicle laws and regulations as much as they are able during their highway patrols, given their staffing and other responsibilities of higher priority.[2]

The Department of Environmental Conservation (DEC) has anti-littering enforcement authority under the Recycling and Reduction of Litter Law (AS 46.06; attached).[3] DEC routinely applies the secured load provision of the law in the issuance of warnings and citations to drivers of trucks carrying loads of construction material scraps [AS 46.06.080(b)]. However, the statute is somewhat ambiguous with respect to gravel loads because it exempts "mining products" from the secured load provision but fails to define mining products. DEC has not sought a legal opinion on this point. The department has focused primarily on the problem of litter in its common form (i.e., refuse) and has chosen not to enforce the gravel situation because of the ambiguity.

To our knowledge, the Municipality of Anchorage is the only local government to address the litter/debris situation with a local ordinance.[4] The "covered load ordinance" enacted in the fall of 1983 has been very successful in tackling the problem of unsecured loads

---

[1]CSSB 491 would give the department the authority to issue citations under AS 45.75.130. The bill is awaiting action in the House Labor and Commerce Committee.

[2]1st Sergeant Young, Alaska State Troopers Headquarters, Anchorage. Personal Communication, May 23, 1984.

[3]A bill (CSSB 500) to extend the litter law, which terminates on July 1, 1984, is currently in House Rules awaiting scheduling for floor action.

[4]The Fairbanks North Star Borough Assembly is considering a revision to its solid waste ordinance which would require covered or secured loads.

releasing trash and scrap construction materials enroute to the landfill. Once again, this ordinance has not been applied to gravel trucks. Attempts by municipal officials in Anchorage, Fairbanks North Star and the Mat-Su Boroughs to urge contractors and trucking firms to reduce their uncontrolled release of gravel from trucks have met with moderate success, at best.

Judging by the extent of the problem, it appears that greater educational efforts by the trucking industry itself are warranted. In addition, the State Troopers could be encouraged to enforce existing vehicular laws to the maximum extent possible and especially in areas where local governments have no policing powers, such as the Mat-Su and Fairbanks North Star Boroughs. A clarification of the application of the State's litter law to improperly loaded gravel trucks could be sought through the Department of Law. This might expand DEC's enforcement actions as well.

Passenger Vehicle Measures

Enforcement aside, the driver of passenger vehicles following trucks loaded with gravel appear to have two immediate remedies at their disposal. They can drive defensively and allow for greater distance between themselves and the loaded truck and potential hazard. Secondly, they can seek compensation from the trucking firm or contractor if their vehicle, or its windshield as is often the case, is damaged. If the driving public continually demands compensation and brings the situation to the attention of the firms' owners, there might very well be greater incentive for self-policing on the part of the firms.

We hope that this information will be of use to you.

Sec. 46.06.010. Powers and duties of the department [Terminates July 1, 1984]. The department shall

(1) serve as the coordinating agency among the various government and private organizations in the state which are involved in litter control and reduction and the recovery of energy or materials from litter;

(2) assist local governments in the adoption and amendment of ordinances relating to litter control and reduction;

(3) encourage, organize and coordinate voluntary local information campaigns which seek to focus the attention of the public on the reduction of litter and the recovery of materials and energy from litter;

(4) encourage, organize and coordinate voluntary or nonprofit local programs for the recovery of materials or energy from litter;

(5) encourage federal, state and local agencies to aid programs for the recovery of materials and energy from litter by providing publicity which encourages those programs and by allowing the use of publicly owned land, buildings, or equipment for those programs whenever possible;

(6) investigate the availability of, apply for, receive, and expend grants, loans or other funds available from any source, and, if it is appropriate and feasible, accept nonmonetary assistance in the form of services or equipment for use in programs established under this chapter;

(7) determine the types of materials or energy which may be profitably recovered from litter, and adopt regulations under the Administrative Procedure Act (AS 44.62) which require the recovery of the materials or energy;

(8) adopt other regulations under the Administrative Procedure Act (AS 44.62) necessary to implement this chapter; and

(9) develop methods for the measurement of litter in the state and encourage competition between municipalities to establish which municipality has the least litter. (§ 2 ch 149 SLA 1980)

Sec. 46.06.020. Annual report [Terminates July 1, 1984]. Not later than six months after the end of each fiscal year, the department shall prepare a detailed report describing and evaluating the actions taken and programs established under this chapter for submission to the governor and the legislature. The report must include

(1) the status and results of all grants made under this chap.

(2) an evaluation of the progress achieved by litter control and reduction programs; and

(3) an evaluation of the resources and energy recovered from litter in the state. (§ 2 ch 149 SLA 1980)

Sec. 46.06.030. Advisory council [Terminates July 1, 1984]. (a) There is created an advisory council to the department, which shall advise the department concerning the litter control and reduction, source separation and other programs for the recovery of energy and materials from litter under this chapter. The council may encourage the participation of industry, labor, municipalities, and the public in the programs administered by the department.

(b) The council consists of seven members appointed by the governor who are aware of and concerned with achieving the goals of this chapter. The members serve at the pleasure of the governor.

(c) The council shall meet annually, and may meet more frequently if necessary or desired. The members of the council serve without compensation but are entitled to per diem and travel expenses authorized by law for boards and commissions. (§ 2 ch 149 SLA 1980)

Sec. 46.06.040. Public awareness; motivation [Terminates July 1, 1984]. The department shall establish, provide advice concerning, and coordinate programs designed to

(1) encourage the public to recover material and energy from litter;

(2) use existing, and develop new, techniques and programs to reduce litter and littering;

(3) encourage the public not to litter and to engage in cleanup efforts; and

(4) advise the public of the state's anti-litter laws and regulations and encourage enforcement of those laws and regulations. (§ 2 ch 149 SLA 1980)

Sec. 46.06.050. Litter receptacles and anti-litter symbol [Terminates July 1, 1984]. (a) The department shall designate one or more types and sizes of litter receptacles for use in the state. The department shall make available for distribution throughout the state an anti-litter symbol of a uniform color and design adopted by the department. This anti-litter symbol must bear a statement of the penalties for littering, and the department shall design the anti-litter symbol so that it may be attached to litter receptacles. To aid public recognition and use of litter receptacles, the department may adopt an anti-litter symbol used in another state. The anti-litter symbol designed by the department must be attached to litter receptacles located in the public places of the state by the person or agency responsible for the placement of those receptacles.

(b) Litter receptacles designated for use in the state by the department shall be placed at public places in the state unless the public place

is specifically exempted by regulations adopted by the commissioner under the Administrative Procedure Act (AS 44.62). The number of receptacles required to be placed in each public place shall be determined by a formula related to the need for those receptacles. The requirements of this subsection are satisfied by the use of a litter receptacle which was in use before July 1, 1980, if the anti-litter symbol of the state is attached to the receptacle.

(c) A person owning or operating a privately owned public place at which litter receptacles are required under (b) of this section shall place litter receptacles at the public place at his own expense.

(d) Compliance with this section requires proper upkeep, maintenance and repair of a litter receptacle sufficient to permit the receptacle to serve the function for which it was designed and to prevent the receptacle from becoming unsightly.

(e) Responsibility for the placement of litter receptacles at publicly owned public places and for the removal of litter from those litter receptacles remains with the municipality or other public agency performing litter removal. Removal of litter from litter receptacles placed at privately owned public places remains the responsibility of the owner or operator of the privately owned public place.

(f) A person may not damage, deface, abuse or misuse a litter receptacle not owned by him so as to interfere with its proper function or to detract from its appearance.

(g) A person may not deposit leaves, clippings, prunings, garden refuse or household waste materials in a litter receptacle unless he has the permission of the owner of that receptacle.

(h) Except as provided in (i) of this section, a person who violates the provisions of (b) — (g) of this section is guilty of a violation and in addition to the punishment imposed by AS 12.55.035(b)(5), the court may order a person who violates this section to gather and dispose of litter in an area and for a length of time determined by the court.

(i) If a municipality of the state adopts an ordinance which prohibits the same conduct prohibited by (b) — (g) of this section, a violation of (b) — (g) of this section which occurs in the municipality is punishable under the provisions of the municipal ordinance if the punishment imposed under the ordinance is equal to or greater than the punishment imposed by AS 12.55.035(b)(5). (§ 2 ch 149 SLA 1980)

Sec. 46.06.060. Litter bags [Terminates July 1, 1984]. The department shall design and have produced a biodegradable litter bag bearing the state anti-litter symbol and a statement of the penalties for littering in the state. The department shall make litter bags available to the division of motor vehicles in the Department of Public Safety for this purpose. To the greatest extent practicable, the division of motor vehicles shall distribute one litter bag to each person who applies for registration or reregistration of his motor vehicle and shall notify the person of his responsibilities under the law. make litter bags available to all vessel owners and persons entering state by automobile. The commissioner shall designate distribution points for the broadest possible distribution of litter bags to persons entering the state by automobile or vessel. (§ 2 ch 149 SLA 1980)

Sec. 46.06.070. Litter patrol [Terminates July 1, 1984]. (a) The department shall establish a youth litter patrol program for the employment of young people on a seasonal basis. The department shall cooperate with federal, state or municipal programs that either employ young people or encourage their employment. The department may contract with other state agencies to provide administration and other support for the youth litter patrol established by this section.

(b) The department may adopt regulations under the Administrative Procedure Act (AS 44.62) which are necessary to implement this section. (§ 2 ch 149 SLA 1980)

Sec. 46.06.080. Littering prohibited [Terminates July 1, 1984]. (a) A person may not throw, drop, deposit, discard or otherwise dispose of litter from a vehicle or otherwise, on public or private property in the state or in waters in the state or under state jurisdiction unless

(1) the property is designated by a state agency or municipality as a site for the sanitary disposal of garbage or refuse, and the person is authorized to use the site for that purpose; or

(2) litter is placed in a litter receptacle so that the litter is prevented from being carried away or deposited by the elements upon public or private property or waters in the state or under state jurisdiction.

(b) A vehicle may not be driven or moved on a public highway or right-of-way unless it is constructed, loaded or covered to prevent its load from dropping, sifting, leaking or otherwise escaping from the vehicle. This subsection does not apply to a vehicle used (1) to deposit salt or sand to secure traction, (2) by a public agency to clean or maintain highways, or (3) to transport agricultural, mining or timber products. A person who operates a vehicle from which an object has fallen or escaped which obstructs or endangers travel upon a public highway or right-of-way shall immediately remove the object at his own expense or pay the cost of removal incurred by the state or by a person.

(c) A person who violates this section is guilty of a class B misdemeanor, and in addition to the punishment imposed by AS 12.55.035(b)(4) and 12.55.135(b), the court may order the person to gather and dispose of litter in an area and for a length of time determined by the court. (§ 2 ch 149 SLA 1980)

Sec. 46.06.090. Prohibited beverage containers [Terminates July 1, 1984]. (a) Beginning October 1, 1981, a person may not sell or offer to sell a nonglass beverage container which is designed and constructed so that the container is opened by detaching a metal ring or tab. This section does not apply to a beverage container which is opened by a detachable piece of tape, foil, or other soft material.

(b) Beginning October 1, 1981, a person may not sell or offer to sell beverage containers which are held together by plastic rings or similar plastic devices which are not degradable.

(c) A person who violates this section is guilty of a violation. Each sale or offer to sell is a separate offense. (§ 2 ch 149 SLA 1980)

Cross references. — As to fines for violations, see AS 12.55.035(b)(5).

Sec. 46.06.100. Notice to public [Terminates July 1, 1984]. The penalties imposed for littering shall be posted along the public highways of the state, at visitor centers, at entrances to state parks and recreational areas, at public beaches, and other publicly owned public places the commissioner determines necessary to accomplish the purposes of this chapter. The state agency or municipality responsible for litter removal from a public place shall post the notice required by this section. (§ 2 ch 149 SLA 1980)

Sec. 46.06.110. Enforcement authority [Terminates July 1, 1984]. (a) The following persons are authorized to enforce the provisions of this chapter:

(1) a state employee authorized by the commissioner; and

(2) a peace officer.

(b) The department shall prescribe a citation form which shall be used by all peace officers and persons in the state who are authorized to enforce the provisions of this chapter. (§ 2 ch 149 SLA 1980)

Sec. 46.06.120. Grants [Terminates July 1, 1984]. The department may make grants to state agencies, to municipalities, and to private organizations including nonprofit organizations for the establishment and operation of programs authorized under this chapter. A grant under this section may not exceed 18 months. A program qualifying for a grant under this section may include

(1) courses of instruction at, or the distribution of informative materials to, elementary and secondary schools;

(2) purchase and erection of roadside signs;

(3) organization and operation of litter removal activities conducted by municipalities, private organizations or service groups using volunteer help;

(4) a public information program to inform the public concerning the reduction of litter using the media including use of the electronic media;

(5) expansion of existing, and planning, design and construction of new, facilities for the recovery of materials and energy from litter;

(6) research and evaluation of markets for the materials and energy recovered from litter;

(7) advice and assistance, including information and consultation on available technology, operating procedures, organizational arrange-

ments, markets for materials or energy obtained from litter, tra.. tation alternatives, and publicity techniques;

(8) surveys by public agencies or recognized research organizations to assess the amount and composition of litter, and rates of littering;

(9) the purchase of litter receptacles;

(10) the creation or expansion of litter law enforcement programs;

(11) the initial purchase or lease of recycling equipment, the cost of operating that equipment, and the cost of storing and transporting materials before and after those materials are recycled. (§ 2 ch 149 SLA 1980)

Sec. 46.06.130. Conditions for grants [Terminates July 1, 1984]. (a) The department shall adopt regulations under the Administrative Procedure Act (AS 44.62) which establish

(1) eligibility requirements for applicants for a grant under AS 46.06.120;

(2) standards for the evaluation of proposals submitted by applicants for grants under AS 46.06.120; and

(3) other conditions for the receipt of a grant under AS 46.06.120 which are necessary to achieve the purposes of this chapter.

(b) The regulations adopted by the department under (a) of this section must meet the following criteria:

(1) if there is not enough money for grants to all eligible applicants, the following shall receive priority:

(A) a proposed program or project which most efficiently recovers materials or energy from litter;

(B) the proposed program or project which creates the greatest number of new jobs;

(2) the maximum amount for a single grant shall be established so that available money is distributed to a variety of programs;

(3) a grant may be made for new programs or for improvements to or additions to existing programs which were not previously financed by other existing resources of financing. (§ 2 ch 149 SLA 1980)

Sec. 46.06.140. Federal requirements [Terminates July 1, 1984]. If a federal department or agency issues a formal ruling that a section of this chapter will prevent the state from receiving federal financial participation in a program or activity established under this chapter, the section does not apply to the extent that it causes the program or activity to lose federal funding. (§ 2 ch 149 SLA 1980)

Sec. 46.06.150. Definitions [Terminates July 1, 1984]. In this chapter,

(1) "beverage container" means the individual, separate, sealed glass, metal or plastic bottle, can, jar or carton containing beer or other malt beverages or carbonated soft drinks, in liquid form;

(2) "commissioner" means the commissioner of environmental conservation;

(3) "department" means the Department of Environmental Conservation;

(4) "litter" means all waste materials susceptible to being dropped, deposited, discarded or otherwise disposed of upon property in the state or in waters under state jurisdiction; "litter" does not include the waste of the primary processes of mining or other extraction process, logging, sawmilling, farming or manufacturing;

(5) "litter bag" means a bag, sack or other container made of any material which is large enough and suitable to serve as a receptacle for litter inside a vehicle or vessel;

(6) "public place" means public or private property that is used or held out for use by the public, including but not limited to highways or other roads upon which vehicles are moved, parks, campgrounds, trailer parks, drive-in and fast food restaurants, gasoline service stations, parking lots for taverns, shopping centers and grocery stores and other parking lots which have a capacity for more than 50 vehicles, marinas, boat launching areas, boat moorage and fueling stations, public and private piers, beaches, bathing areas, school grounds, sporting event sites with seating capacity for more than 200 spectators, and business district sidewalks;

(7) "vehicle" means a mechanically driven device of any kind which is used for the transportation of a person or property on a public highway, trail or path;

(8) "vessel" means all descriptions of watercraft used or capable of being used as a means of transportation on the water. (§ 2 ch 149 SLA 1980)

RE: Other States Regulations Concerning the Transportation of Loose Fill Material
Research Request 86-124

You asked that we provide you with a summary of how other states regulate the operation of gravel trucks, particularly with regard to the covering of loads. The American Automobile Association (AAA) is providing us with a summary of state motor carrier laws compiled by the Canvas Products Association International. We will forward a copy of this summary to you upon its receipt.

Mr. Tom Kube of the AAA noted that this summary groups state laws relating to the transportation of loose fill material into several categories, the strictest of which includes states that require loads to be covered in most instances. Mr. Kube identified eight states that were assigned to this category: Florida, Massachusetts, Michigan, Mississippi, Missouri, Nebraska, New Hampshire and New York.

Florida and New Hampshire require all loads of loose fill to be covered in all circumstances. Mississippi, New York and Michigan require the load to be covered if the load is less than six inches below the top of the sides, front and back of the truck bed. Massachusetts law requires the load to be covered if it is not loaded in a way to prevent it from escaping. Nebraska requires a load to be covered if the material protrudes above the truck sides and Missouri requires a cover if the load can reasonably be expected to blow out of the truck. Copies of statutes from these states are attached.

We also contacted the motor carrier regulatory agencies of several states. Wyoming, Vermont and Pennsylvania all require loose fill loads to be loaded so that they do not spill out of the truck. If a cover is necessary to assure this, the driver will be cited if a cover is not used and the load spills. Tennessee requires a load to be covered if the top of the load is within four inches from the top of the truck sides. Colorado, Montana, Iowa, California and Arizona have laws that

allow peace officers to cite drivers if a spill occurs, but there are no requirements that the load be covered.

Enforcement within these states varies, although generally, any peace officer with the authority to enforce state laws can issue citations if material is spilled on the road. Enforcement officers of several states noted that laws directed toward spills on the roadway are not very effective in controlling material blowing out of a truck unless the quantity of material lost is significant. Most of the states we contacted also had vehicle inspection programs which periodically checked commercial trucks for safety hazards. This inspection includes mudflaps, tailgates and truck beds which can all cause loose fill loads to fly off the truck if in disrepair.

We have also attached a copy of House Research Memorandum 84-116, "Hazardous Debris from Commercial Vehicles."

I hope this information will be helpful. If you require additional information, please contact us.

DUMP TRUCK COVERING LAW DIRECTORY
United States and Canada - ~~1977~~ 1983 with add. -

This directory lists the applicable laws of all states and provinces which require the covering of dump trucks with a tarpaulin or restrict the spillage of loads on the highways. This directory is the result of a survey conducted by CPAI in the summer of 1976 and has been updated during the fall of 1977.

The general classification of each law appears next to the name of each state or province. These laws have been divided into four general categories by CPAI.

A - Laws which require covering in most instances.

B - Laws which require covering in limited instances.

C - Laws which restrict spillage and require the secure fastenings of loads and covers.

D - Laws which restrict spillage only.

There are nine states with category A laws. These are the strictest existing laws and are generally suitable as models for the other forty-one states. Florida's law is probably the clearest and most direct, while the New Hampshire law covers reasonable exceptions in the fullest detail. Ten states have laws which fall into category B, requiring covering in some instances, but the majority of the laws fall into category C or D. These laws quote part of the Uniform Vehicle Code, which is the model followed by many states for all their traffic laws. The 13 states in category C and the 17 states in category D are the prime candidates for stricter regulations since their current laws are unenforceable for most practical purposes.

In Canada, all ten provinces have some form of spillage law. Ontario has a strictly enforced law (category A). Quebec's law falls into category B, and there are four provinces with category C laws and four more with category D regulations.

Effective enforcement is the key to increased highway safety through dump truck covering. A strict law is sometimes not enough. In Missouri (category A) the law uses words like "shall have a protective cover," but the state police only enforce the requirement in extreme cases. In Connecticut and Georgia, on the other hand, strict enforcement of "C" type laws as a matter of state police policy has caused most dump trucks to be covered. The motoring public in these two states is fortunate to have police who are concerned about the spillage problem. In most states, "C" and "D" type laws are rarely enforced since the officer has to witness spillage before issuing a ticket. Effective enforcement is necessary with the strictest laws, but in the 30 states with "C" or "D" laws, the police need clear guidance from the legislature if the public is to be protected legally, instead of just luckily. For information on how each law is enforced in actual practice, the state or provincial police should be contacted. Most officers are very cooperative in telling how and when spillage tickets are issued.

ALABAMA (D) Section 58 (45a)

58 (45a) Spilling Loads

Whoever willfully and knowingly operates, owns, or causes to be operated on any public highway, road, or street a motor vehicle so loaded with gravel, rock, slag, bricks, sawdust, chips, wood products, or other like substances, in such manner or in such condition that the contents of the vehicle spill out and endanger the safety of the persons or property of motorists and pedestrians, is guilty of a misdemeanor and upon conviction shall be fined not more than $100.00.

ALASKA No Law

ARIZONA (C) Section 28-1006

28-1006. Loads on Vehicles

a. No vehicle shall be driven or moved on any highway unless the vehicle is so constructed or loaded as to prevent any of its load from dropping, sifting, leaking or otherwise escaping therefrom, except that sand may be dropped for the purpose of securing traction, or water or other substance may be sprinkled on a roadway in cleaning or maintaining the roadway.

b. No person shall operate on any highway a vehicle with any load unless the load and any covering thereon is securely fastened so as to prevent the covering or load from becoming loose, detached or in any manner a hazard to other users of the highway.

ARKANSAS (D) Section 75-805

75-805. Spilling Loads on highways prohibited - Exceptions.

No vehicle shall be driven or moved on any highway unless such vehicle is so constructed or loaded as to prevent any of its load from dropping, sifting, leaking or otherwise escaping therefrom, except that sand may be dropped for the purpose of securing traction, or water or other substance may be sprinkled on a roadway in cleaning or maintaining such roadway.

CALIFORNIA (B) Section 23114 and 23115

Spilling Loads on Highways

23114. No vehicle shall be driven or moved on any highway unless the vehicle is so constructed, covered, or loaded as to prevent any of its contents or load other than clear water or feathers from live birds from dropping, sifting, leaking, blowing, spilling, or otherwise escaping therefrom.

23115. No vehicle loaded with garbage, swill, cans, bottles, waste papers, ashes, refuse, trash, or rubbish, or any other noisome, nauseous, or offensive matter shall be driven or moved upon any highway unless the load is covered with a cover sufficient to prevent the load or any part of the load spilling upon the highway. This section does not prohibit a rubbish vehicle from being without cover while in the process of acquiring its load in circumstances

CALIFORNIA (B) cont.

wherein no law, administrative regulation, or local ordinance requires such cover.

This section does not apply to any vehicle engaged in transporting wet waste fruit or vegetable matter, or waste products from a food processing establishment.

COLORADO (D) Section 42-4-1208

42-4-1208. Spilling Loads on Highways Prohibited.

No vehicle shall be driven or moved on any highway unless such vehicle is constructed or loaded or the load thereof securely covered to prevent any of its load from dropping, sifting, leaking, or otherwise escaping therefrom; except that sand may be dropped for the purpose of securing traction or water or other substance may be sprinkled on a roadway in cleaning or maintaining such roadway.

CONNECTICUT (C) Section 14-271

14-271. Securing of Loads

a. No vehicle shall be driven or moved on any highway unless such vehicle is so constructed or loaded as to prevent any of its load from dropping, sifting, leaking or otherwise escaping therefrom in such manner or quantity as to constitute a hazard or nuisance to other users of the highway, except that sand may be dropped for the purpose of securing traction, or water or other substance may be sprinkled on a roadway in cleaning or maintaining such roadway.

b. No person shall operate on any highway any vehicle with any load unless such load and any covering thereon is securely fastened so as to prevent such covering or load from becoming loose, detached or in any manner a hazard to other users of the highway.

c. The provisions of this section shall not apply to motor vehicles registered as farm motor vehicles or vehicles used for farming purposes.

d. Any person who violates any provision of this section shall be fined not more than one hundred dollars for each offense.

DELAWARE (D) Section 4371

4371. Construction of Vehicles to Prevent Escape of Contents

a. No vehicle shall be driven or moved on any highway unless it is so constructed or loaded as to prevent its contents from dropping, sifting, leaking, or otherwise escaping therefrom.

b. Whoever violates subsection (a) of this section shall be fined not less than $5, nor more than $25, or imprisoned not less than 2 nor more than 10 days, or both. For each subsequent like offense within one year, he shall be fined not less than $25, nor more than $50 or imprisoned not less than 2 nor more than 15 days, or both.

DISTRICT OF COLUMBIA (B) Section 153 d and 153 f

Sec. 1531 (d) Spilling loads. No vehicle other than a streetcar shall be driven or moved on any street or highway unless such vehicle is so constructed or loaded as to prevent any of its load from dropping, sifting, leaking, or otherwise escaping therefrom, except that sand may be dropped for the purpose of securing traction, or water or other substances may be sprinkled on the roadway in cleaning or maintaining such roadway.

(f) Load limits - securing of loads. The weight of the load carried on any truck, tractor, trailer, or combination thereof, shall not exceed the manufacturer's rated load capacity of such truck, tractor, trailer, or combination thereof, and loads carried on such vehicles shall be adequately secured to prevent shifting or toppling or in any other manner becoming a hazard. Any tarpaulin or other covering used to protect the load carried on any such vehicles shall be securely fastened so as to prevent its detachment.

FLORIDA (A) Section 316.198

316.198. Loads on Vehicles

(1) No vehicle shall be driven or moved on any highway unless the vehicle is so constructed or loaded as to prevent any of its load from dropping, shifting, leaking, blowing, or otherwise escaping therefrom, except that sand may be dropped only for the purpose of securing traction or water or other substance may be sprinkled on a roadway in cleaning or maintaining the roadway.

(2) It is the duty of every owner and driver, severally, of any vehicle hauling, upon any public road or highway open to the public, dirt, sand, lime rock, gravel, silica, or other similar aggregate or trash, garbage, or any similar material which could fall or blow from such vehicle, to prevent such materials from falling, blowing, or in any way escaping from such vehicle. Covering and securing the load with a close-fitting tarpaulin or other appropriate cover is required.

GEORGIA (C) Section 95A-955

95A-955. Securing Loads on Vehicles

a. No vehicle shall be driven or moved on any public road unless such vehicle is constructed or loaded or covered so as to prevent any of its load from dropping, escaping, or shifting in such a manner as to create a safety hazard, provided that this section shall not prohibit the necessary spreading of any substance in public road maintenance or construction operations.

b. No person shall operate, or load for operation, on any public road any vehicle with any load unless said load and any covering thereon is securely fastened so as to prevent said covering or load from becoming loose, detached or in any manner becoming a hazard to other users of the public road.

c. Nothing in this section, nor any regulations based thereon, shall conflict with federal regulations or Georgia Public Service Commission regulations applying to the securing of loads on motor vehicles.

HAWAII (B) Section 15-21.4

Sec. 15-21.4. Loads to be Properly Secured.

(1) No vehicle shall be driven or moved on any highway, unless such vehicle is so constructed or loaded as to prevent any of its load from dropping, shifting, leaking, or otherwise escaping therefrom, except that sand may be dropped for the purpose of securing traction, or water or other substance may be sprinkled on a roadway in cleaning or maintaining the roadway.

(2) No vehicle shall be driven or moved on any highway when any load thereon is not entirely within the body of the vehicle; provided, however, that this prohibition shall not apply if the load is securely fastened by means of clamps, ropes, straps, cargo nets, or other suitable mechanical device to prevent such load from dropping onto the highway or from shifting in any manner nd, further that this proviso shall not be deemed to supersede the provisions of Section 15-21.3 hereinabove.

(3) No vehicle shall be driven or moved on any highway with any load consisting partially or entirely of loose paper, empty cartons, crates, or any other material susceptible of being blown or carried by the wind, unless such load is entirely covered by tarpaulin, net, canopy or other suitable material, effectively preventing any part of such load from being blown or carried by the wind; provided, however, this paragraph shall not apply to any vehicle carrying a load consisting entirely of soil, sand, coral or gravel, if such load is wetted down to prevent particles thereof from being blown or carried by the wind.

IDAHO No Law

ILLINOIS (C) Section 15-109

15-109. Spilling loads on highways prohibited.

a. No vehicle shall be driven or moved on any highway unless such vehicle is so constructed or loaded as to prevent any of its load from dropping, shifting, leaking or otherwise escaping therefrom, except that sand may be dropped for the purpose of securing traction, or water or other substance may be sprinkled on a roadway in cleaning or maintaining such roadway.

b. No person shall operate on any highway any vehicle with any load unless said load and any covering thereon is securely fastened so as to prevent said covering or load from becoming loose, detached, or in any manner a hazard to other users of the highway.

INDIANA (D) Section 9-8-1-2

9-8-1-2. Vehicles on State Highways

No vehicle shall be driven or moved on any highway unless such vehicle is so constructed or loaded as to prevent its contents from dripping, sifting, leaking or otherwise escaping therefrom.

IOWA (D) Section 321.460

321.460. Spilling loads on highways.

No vehicle shall be driven or moved on any highway unless such vehicle is so constructed or loaded as to prevent any of its load from dropping, sifting, leaking, or otherwise escaping therefrom, except that sand may be dropped for the purpose of securing traction, or water or other substance may be sprinkled on a roadway in cleaning or maintaining such roadway.

KANSAS (C) Section 8-1906

8-1906. Securing loads on vehicles.

a. No vehicle shall be driven or moved on any highway unless such vehicle is so constructed or loaded as to prevent any of its load from dropping, sifting, leaking or otherwise escaping therefrom, except that this section shall not prohibit the necessary spreading of any substance in highway maintenance or construc ion operations.

b. No person shall operate on any highway any vehicle with any load unless said load and any covering thereon is securely fastened so as to prevent said covering or load from becoming loose, detached or in any manner a hazard to other users of the highway.

KENTUCKY (D) Section 189.150

189.150. Escaping contents.

No vehicle shall be operated upon any highway unless it is so constructed as to prevent its contents from escaping.

LOUISIANA (C) Section 32.386.

32:386. Loads on Vehicles: Care Required Thereto

a. No vehicle shall be driven or moved on any highway of this state unless such vehicle is so constructed or loaded as to prevent any of its load from dropping, sifting, leaking or otherwise escaping therefrom, except that sand may be dropped for the purpose of securing traction, or water or other substance on a highway in cleaning or maintaining such highway.

b. No person shall operate on any highway of this State any vehicle with any load unless said load and any covering thereon is securely fastened so as to prevent the covering or load from becoming loose, detached or in any manner a hazard to other users of the highway.

MAINE (C) 1750 (h) and 1752

Ch. 1750 (h) No motor vehicle shall be operated unless the tailboard or tailgate, tarpaulins, chains (except ground or contact chains), ropes, stakes, poles and the like, or any part of the load, are securely fastened to prevent dangling, flapping, swinging or falling from side, end or top of load.

MAINE (C) Cont.

Ch. 1752 Injurious substances prohibited on ways and bridges; loads securely fastened

No person shall operate or cause to be operated upon any public way a vehicle with a load, unless such load is fastened, secured, confined or loaded to prevent any danger, reasonably to be anticipated, of any portion of said load from falling to the ground. The word "load" as used in this paragraph shall include, but shall not be limited to, firewood, pulpwood, logs, bolts or other material, but shall not include loose hay, pea vines, straw, grain or cornstalks.

MARYLAND (B) 14 - 106

Section 14-106. Loads on vehicles.

a. Dropping or leading loads; loose material. -- No motor vehicle, trailer, or semitrailer shall be driven or moved on any highway unless the vehicle is contructed or loaded to prevent any of its load from dropping, sifting, leaking, or otherwise escaping therefrom, except that sand may be dropped for the purpose of securing traction, or water or other substance may be sprinkled on a roadway in cleaning or maintaining the roadway. No person may transport or load for transporting any loose material in a motor vehicle, trailer, or semitrailer, on or over the public roads, streets, or highways of this State in violation of any of the requirements of this sub-section. "Loose material" includes dirt, sand, gravel, wood chips, or other material capable of blowing, falling, or spilling from a vehicle as a result of movement or of exposure to air, wind currents, or weather, but does not include agricultural products in their natural state. The Administrator, by rule and regulation, may specify any other types of material capable of spilling or blowing for purposes of this section.

b. Loads to be securely fastened; removal of debris. -- No person shall operate on any highway any vehicle with any load unless the load and any coverning thereon is securely fastened to prevent the covering or load from becoming loose, detached, or in any manner a hazard to other users of the highway. Furthermore, the owner of a vehicle which has caused dirt or debris to be deposited on the street shall be responsible for removing the same within a reasonable period.

MASSACHUSETTS (A) C. 85 - Sec. 36

C. 85 - Sec. 36

No person shall drive or move a vehicle on any way, as defined in section one of chapter ninety (90), nor shall the owner or bailee of any vehicle require or permit the same to be driven or moved on any way, unless such vehicle is constructed or loaded as to prevent any of its load from dropping, sifting, leaking or otherwise escaping therefrom and, if it is loaded with sand or gravel, unless its load is fully and adequately covered. This section shall not prohibit the dropping of sand for the purpose of securing traction, or the sprinkling of water or other substance on such a way in cleaning or maintaining the same. Whoever violates the provisions of this section shall be punished by a fine of not less than ten (10) nor more than fifty (50) dollars.

MICHIGAN (A)

Section 257.720

Sec. 720. (1) A vehicle shall not be driven or moved on a highway unless the vehicle is so constructed or loaded as to prevent its contents from dropping, sifting, leaking, blowing off, or otherwise escaping therefrom. The tailgate, faucets, and taps shall be securely closed to prevent spillage during transportation, whether loaded or empty, and the body of the vehicle shall not have any holes or cracks through which material can escape. Actual spillage of material on the highway or proof thereof is not necessary to prove a violation of this section. Any highway maintenance vehicle engaged in either ice or snow removal shall be exempt from this act.

(2) A commercial vehicle carrying a load, other than logs or tubular products, which is not complete enclosed shall either:

(a) Be loaded so that no part of the load making contact with any sideboard or side panel or rear part of the enclosure shall be within 6 inches of the top of the part of the enclosure contacted, unless the load is covered with firmly secured canvas or similar type covering.

(b) Have the load securely fastened to the body of the frame of the vehicle with binders of adequate number and of adequate breaking strength to prevent the dropping off or shifting of the load.

(3) A company or individual who loads or unloads a vehicle or causes it to be loaded or unloaded, with knowledge that it is to be driven on a public highway, in a manner as to cause a violation of subsection (1) shall be prima facie liable for a violation of this section.

(4) A person shall not operate a motor vehicle carrying logs or tubular products on a highway unless the following conditions are complied with:

(a) If the logs or tubular products are loaded crosswise or at right angles to the side of the vehicle, the logs or tubular products shall be securely fastened to the body or frame of the vehicle with not less than 2 binders which are secured to the frame at each end of the load and pass over the load so that the frame and binders completely encircle the load.

(b) If the logs or tubular products are loaded lengthwise of the vehicle, obliquely or parallel to the sides, the logs or tubular products shall be securely fastened to the body or frame of the vehicle with not less than 2 toggle binders which are secured to the frame at each end of the load and pass over the load so that the frame and binders completely encircle the load and 1 wrapping binder which completely encircle the load.

(c) The toggle and wrapping binders shall be made of steel chain or a combination of steel chain and wire rope, which shall not be less than 3/8 of an inch in diameter and have a breaking strength of not less than 12,000 pounds.

MINNESOTA (D) Sec. 169.81 Subd. 5.

Section 169.81, Subd. 5. Manner of Loading.

No vehicle shall be driven or moved on any highway unless such vehicle is so constructed, loaded, or the load securely covered as to prevent any of its load from dropping, sifting, leaking, or otherwise escaping therefrom, except that sand may be dropped for the purpose of securing traction, or water or other substances may be sprinkled on a roadway in cleaning or maintaining such roadway. This subdivision shall not apply to motor vehicles operated by a farmer or his agent when transporting produce he has produced.

MISSISSIPPI (A) Senate Bill 1648

Senate Bill 1648.

An act to require all trucks, trailers and other carriers with open tops when hauling sand, dirt, gravel or rock to use a cover when loaded and traveling on state and United States highways or in the alternative to be equipped with sideboards.

Be it enacted by the legislature of the State of Mississippi:

SECTION 1. Every truck, trailer or other carrier with an open top, while traveling upon any state, United States or interstate highway in the State of Mississippi and while carrying any load of sand, dirt, gravel or rock shall be equipped with a tarpaulin, canvas or other such top and same to be secured over the top of any load of sand, dirt, gravel, or rock.

SECTION 2. In lieu of the tarpaulin provided in Section 1 of this act, a truck, trailer or other carrier with an open top while traveling upon any state, United States or interstate highway in the State of Mississippi and while carrying any load of sand, dirt, gravel or rock shall be in full compliance with this act provided same is not loaded within six (6) inches of the top of the bed or is equipped with four (4) six inch (6") sideboards, which sideboards shall be attached one (1) each to the front, back and two (2) sides of the carrier body, and shall remain lowered while the body is being loaded, provided that no part of the load shall extend above the body of the carrier. After loading, the sideboards shall be raised and secured to remain raised during travel, and the space between the top of the sideboards and the top of the load making contact with the sideboards shall not be less than six (6) inches.

SECTION 3. The Motor Vehicle Comptroller, Mississippi Highway Patrol and other law enforcement agencies are hereby charged with enforcement of this act.

MISSISSIPPI (A) cont.

SECTION 4. Any person, firm or corporation operating a truck, trailer or other carrier on any state, United States or interstate highway not properly covered as set forth in Section 1 or without sideboards as set forth in Section 2 or in violation of any of the other provisions of said Section 2 shall be guilty of a misdemeanor and upon conviction shall be fined not less than Twenty-five Dollars ($25.00) nor more than One Hundred Dollars ($100.00) for each separate and distinct violation.

SECTION 5. This act shall take effect and be in force from and after July 1, 1974.

MISSOURI (A) Sec. 307.010

Section 307.010. Loads which might become dislodged to be secured -- Failure, penalty.

1. All motor vehicles, and every trailer and semitrailer operating upon the public highways of this State and carrying goods or material or farm products which may reasonably be expected to become dislodged and fall from the vehicle, trailer or semitrailer as a result of wind pressure or air pressure and/or by the movement of the vehicle, trailer or semitrailer shall have a protective cover or be sufficiently secured so that no portion of such goods or material can become dislodged and fall from the vehicle, trailer or semitrailer while being transported or carried.

2. Operation of a motor vehicle, trailer or semitrailer in violation of this section shall be a misdemeanor, and any person convicted thereof shall be punished as provided by law.

MONTANA No Law

NEBRASKA (A) Sec. 39-6, 129

Section 39-6, 129. Transportation of sand, gravel, rock; material covered with canvas.

No person shall transport any sand, gravel, rock less than two inches in diameter, or refuse in any motor vehicle on any hard-surfaced state highway if such material protrudes above the sides of that part of the vehicle in which it is being transported unless such material is enclosed or completely covered with canvas or similar covering. Any person who shall violate any of the provisions of this section shall be guilty of a misdemeanor and shall, upon conviction thereof, be punished by a fine of not less than five dollars nor more than twenty-five dollars.

NEVADA (C) 484.771

484.771. 1. No vehicle shall be driven or moved on any highway unless such vehicle is so constructed or loaded as to prevent any of its load from dropping, sifting, leaking or otherwise escaping therefrom, except that sand may be dropped for the purpose of securing traction, or water or other substance may be sprinkled on a roadway in cleaning or maintaining such roadway.

2. No person shall operate on any highway any vehicle with any load unless the load and any covering thereon is securely fastened so as to prevent the covering or load from becoming loose, detached or in any manner a hazard to other users of the highway.

NEW HAMPSHIRE (A) RSA 249:51

RSA 249:51. Spillage of Material

I. No vehicle shall be driven or moved on any highway unless such vehicle is so constructed or loaded as to prevent any of its load from dropping, sifting, leaking or otherwise escaping therefrom, except that sand may be dropped for the purpose of securing traction, or water or other substance may be sprinkled on a roadway in cleaning or maintaining such roadway.

II. No person shall operate on any highway any vehicle with any load unless said load and any covering thereon is securely fastened so as to prevent said covering or load from becoming loose, detached or in any manner a hazard to other users of the highway. Without limiting the foregoing provision, no person shall operate on any highway any open vehicle loaded with earth, sand, asphalt, stone, gravel or other particulate substance unless said vehicle is equipped with and said load is covered and secured by a close-fitting tarpaulin which prevents the escape of any substance from said load onto the highway.

III. Any person who violates the provisions of this section shall be guilty of a violation if a natural person, or guilty of a misdemeanor if any other person. Any person shall be liable to the state or town for any damage done to the highway by spillage.

IV. The provisions of paragraphs I, II, and III of this section shall not apply to a local farmer transporting his own farm products or materials incidental to his farming operations where such transporting requires incidental use of a public highway provided that such farmer shall not thereby be relieved of his duty to exercise reasonable care in carrying on such operations.

V. The provisions of paragraph II shall not apply to:

(a) The operation of highway building equipment as defined in RSA 259:1, XII and motor vehicles used in the construction of highways provided that such equipment or motor vehicle is used within a highway construction zone as prescribed by the commissioner, public works and highways, provided that the operator of any such vehicle shall not thereby be relieved of his duty to exercise reasonable care.

(b) The operation of municipal and state highway maintenance equipment.

(c) The operation of any vehicle on a highway at speeds of less than thirty miles per hour.

NEW JERSEY (B) 39:4-77

Section 39:4-77. Loading so as to spill prohibited; minimum safety standards; penalty.

No person shall cause or permit a vehicle to be so loaded that the contents or any part thereof may be scattered in any street whenever the load of any vehicle is of material other than farm products susceptible to scattering on a street and such load extends above the height of the sides or tail gate or rear of the body of the vehicle, such load shall be securely covered by a tarpaulin or other cover.

NEW MEXICO (C) 64-23-17

Section 64-23-17. Loads on vehicles.

a. No vehicle shall be driven or moved on any highway unless such vehicle is so constructed or loaded as to prevent any of its load from dropping, sifting, leaking, or otherwise escaping therefrom, except that sand may be dropped for the purpose of securing traction, or water or other substance may be sprinkled on a roadway in cleaning or maintaining such roadway.

b. No person shall operate on any highway any vehicle or combination of vehicles with any load unless said load and any covering thereon is securely fastened so as to prevent said covering or load from becoming loose, detached, or in any manner a hazard to other users of the highway.

NEW YORK (A) 380-a.

Section 380-a. Certain vehicles engaged in the transportation of loose cargo.

1. It shall be unlawful to operate on any public highway any open truck or trailer being utilized for the transportation of earth, sand, stone or similar loose substances, unless said truck or trailer has a cover, tarpaulin, or other device of a type and specification approved by the commissioner of transportation which completely closes in the opening on the said truck or trailer while said truck or trailer shall be so operated, so as to prevent the falling of any such substances therefrom. However, if the load is six inches below the top of the sides of such truck, the covering is not necessary.

2. The commissioner of transportation is authorized to make necessary rules and regulations to carry into effect the provisions of this section, applying such provisions to specific conditions and loads and prescribing means, methods and practices to effectuate such provisions.

3. The provisions of this section shall not apply to motor vehicles, trailers and semitrailers conveying "farm products" as defined in section two of the agriculture and markets law.

NORTH CAROLINA (D) 20-116, Sec. G

20-116, Section G. Size of vehicles and loads.

No vehicle shall be driven or moved on any highway unless such vehicle is

NORTH CAROLINA (D) cont.

so constructed or loaded as to prevent any of its load from dropping, sifting, leaking, or otherwise escaping therefrom, except that sand may be dropped for the purpose of securing traction, or water or other substance may be sprinkled on a roadway in cleaning or maintaining such roadway.

Trucks, trailers or other vehicles when loaded with rock gravel, stone or other similar substances which could blow, leak, sift or drop shall not be driven or moved on any highway unless the height of the load against all four walls does not extend above a horizontal line six inches below their tops when loaded at the loading point, or if not so loaded, unless the load shall be securely covered by tarpaulin or some other suitable covering, or unless it is otherwise constructed so as to prevent any of its load from dropping, sifting, leaking, blowing, or otherwise escaping therefrom.

Provided this section shall not be applicable to or in any manner restrict the transportation of poultry or livestock or silage or other feed grain used in the feeding of poultry or livestock.

NORTH DAKOTA (C) 39-21-44.1

Section 39-21-44.1. Vehicle to be constructed to prevent sifting or leaking loads.

No vehicle shall be driven or moved on any highway unless it is so constructed or loaded as to prevent its contents from dropping, sifting, leaking, or otherwise escaping therefrom, except that sand may be dropped for the purpose of securing traction, or water or other substance may be sprinkled on a roadway in cleaning or maintaining the roadway. No person shall operate on any highway any vehicle with any load unless the load and any covering thereon is securely fastened so as to prevent said covering or load from becoming loose, detached or in any manner a hazard to other users of the highway.

OHIO (B) C. 41 - Sec. 87A

C. 41 - Sec. 87A

No person shall drive or move a vehicle on any way, as defined in section one of chapter ninety (90), nor shall the owner or bailee of any vehicle require or permit the same to be driven or moved on any way, unless such vehicle is constructed or loaded as to prevent any of its load from dropping, sifting, leaking or otherwise escaping therefrom and, if it is loaded with sand or gravel, unless its load is fully and adequately covered. This section shall not prohibit the dropping of sand for the purpose of securing traction, or the sprinkling of water or other substance on such a way in cleaning or maintaining the same. Whoever violates the provisions of this section shall be punished by a fine of not less than ten (10) nor more than fifty (50) dollars.

OKLAHOMA (B) 14--105

Section 14--105. Loads on Vehicles.

a. No vehicle shall be driven or moved on any highway unless such vehicle is so constructed or loaded as to prevent any of its load from dropping, sifting, leaking, blowing or otherwise escaping therefrom, except that sand may be dropped

OKLAHOMA (B) cont.

for the purpose of securing traction, or water or other substances may be sprinkled on a roadway in cleaning or maintaining such roadway.

b. No person shall operate on any highway any vehicle with any load unless said load and any covering thereon is securely fastened so as to prevent said covering or load from becoming loose, detached or in any manner a hazard to other users of the highway. Any vehicle loaded with sand, cinders, or other loose material susceptible to blowing or escaping by reason of wind shall have such load covered or dampened so as to prevent the blowing or escaping of said load from the vehicle.

c. This section shall not apply to trucks loaded with livestock, poultry or agricultural products only except baled agricultural products, provided that any such truck shall be so constructed or loaded as to prevent such livestock or poultry from escaping therefrom.

OREGON (D) 483.510

Section 483.510. Sifting or leaking loads; permit for food processing by-products.

(1) Except as provided in subsection (2) of this section, no vehicle shall be driven or moved on any highway unless it is so constructed or loaded as to prevent its contents from dropping, sifting, leaking or otherwise escaping therefrom.

(2) Upon receipt of an application, the Department of Transportation, county court, or board of county commissioners, or the city council shall grant a written permit for the operation over highways or streets under their respective jurisdictions of vehicles transporting food processing plant by-products to be used for livestock feed from which there is fluid leakage. Such permits shall be issued for a maximum period of 60 days and shall be revocable if it is found by the granting authority that the amount or character of the fluid leakage is such that it constitutes a danger to other vehicles. This subsection shall have no effect after December 31, 1976.

PENNSYLVANIA (D) 75 P. S. 831

75 P. S. 831. Sifting or Leaking Loads.

No vehicle carrying inanimate contents shall be driven or moved on any highway unless such vehicle is so constructed or loaded as to prevent such contents from dropping, sifting, leaking or otherwise escaping therefrom.

RHODE ISLAND (B) 31-25-9 and 31-25-10 Sec. D

31-25-9 and 31-25-10, Sec. D. Prevention of leakage of load. Fastening of load and covering.

No vehicle shall be driven or moved on any highway unless such vehicle is so constructed or loaded as to prevent any of its load from dropping, sifting, leaking, or otherwise escaping therefrom, except that sand may be dropped for the purpose of securing traction, or water or other substance may be sprinkled on a roadway in cleaning or maintaining such roadway.

RHODE ISLAND (B) cont.

31-25-10 Sec. D. Fastening of load and covering.

No person shall operate on any highway any vehicle with any load unless said load and any covering thereon is securely fastened so as to prevent said covering or load from becoming loose, detached, or in any manner a hazard to other users of the highway.

No person shall operate a motor truck or other vehicle carrying or transporting any rubbish, refuse or other debris on any highway without first securely fastening a covering thereon to prevent the contents from falling to said highway. No person shall operate on any highway any vehicle with any load unless said load and any covering thereon is securely fastened so as to prevent said covering or load from becoming loose, detached, or in any manner a hazard to other users of the highway.

SOUTH CAROLINA (C) 46-660 & 46-661

46-660. Spilling loads on highways prohibited.

No vehicle shall be driven or moved on any highway unless such vehicle is so constructed or loaded as to prevent any of its load from dropping, sifting, leaking or otherwise escaping therefrom.

46-661. Loads to be firmly attached.

No person shall operate on any highway any vehicle with any load unless such load and any covering thereon is securely fastened so as to prevent such covering or load from becoming loose, detached or in any manner a hazard to other users of the highway.

SOUTH DAKOTA (D) SDCL 32-15-18

SDCL 32-15-18. Improperly Loaded Vehicle Unlawful.

No vehicle shall be driven or moved on any highway unless such vehicle is so constructed or loaded as to prevent its contents from dropping, sifting, leaking or otherwise escaping therefrom.

TENNESSEE No Law

TEXAS (B) Article 6701d-11 Section 3A

Article 6701d-11, Section 3A. Transporting Loose Materials.

a. No person, co-partnership, limited partnership, association, corporation, State, county, municipality, town, village, or any department or political subdivision thereof, their agents or employees, shall load or transport, cause to be loaded or transported, or aid or abet the loading or transporting, in a motor vehicle, commercial motor vehicle, truck-tractor, trailer or semi-trailer, any loose material on or over the public roads, streets or highways of this State in violation of any requirement of this section.

TEXAS (B) cont.

b. As used in this section, 'loose material' means dirt, sand, gravel, wood chips, or other material that is capable of blowing or spilling from a vehicle as a result of movement or exposure to air, wind currents, or weather, but shall not include agricultural products in their natural state.

c. The bed carrying the load must be completely enclosed on both sides by sideboards or sidepanels, on the front by a board or panel or by the cab of the vehicle, and on the rear by tailgate or board or panel, all of which must be so constructed as to prevent the escape of any part of the load because of blowing or spilling.

d. The top of the load making contact with any sideboard or sidepanel or front or rear part of the enclosure must not be within six inches of the top of the part of the enclosure contacted, and the highest point of the load must not be above any point on a horizontal plane equal in height to the top of the side, front, or rear part of the enclosure that is the least in height, or in the alternative by covering the load with a canvas or similar type covering firmly secured thereby creating a physical horizontal plane; and at no time shall the load exceed the six inches as stated in this section during transportation of load without being covered.

e. The excess spillage of loose material on the non-load carrying parts of the vehicle occasioned by or from the act of loading shall be removed before the vehicle is operated over a public road, street, or highway of this State.

f. The tailgate must be securely closed to prevent spillage during transportation, whether loaded or empty.

g. The bed shall not have any holes, cracks, or openings through which loose material may escape.

h. The residue of the transported loose material shall be removed from the non-load carrying parts of the vehicle upon completion of unloading before the vehicle is operated over a public road, street, or highway of this State.

i. Subsection (d) of this section does not apply to any load-carrying compartment that completely encloses the load or to the transporting of any load that is otherwise suitably covered or secured by other means which prevents the escape of loose material.

j. Nothing in this Section 3A applies to any vehicle or construction or mining equipment which is:

(1) moving between construction barricades on a public works project; or
(2) merely crossing a public road, street, or highway.

k. Any person, co-partnership, limited partnership, association, corporation, or any departmental head, agent or employee of the State or of any county, municipality, town, village, or any department or political subdivision thereof who fails to comply with the provisions of this section shall be guilty of a misdemeanor, and upon first conviction shall be fined a sum of not less than Twenty-five Dollars ($25) nor more than Two Hundred Dollars ($200), and on second conviction a sum of not less than Two Hundred Dollars ($200).

UTAH (C) 27-12-146

Section 27-12-146. Loads on Vehicles - Confining, securing and fastening load required.

No vehicle shall be driven or moved on any public highway unless such vehicle is so constructed or loaded as to prevent its contents from dropping, sifting, leaking or otherwise escaping therefrom, except that sand or other abrasives may be dropped for the purpose of securing traction or water or other substance may be sprinkled on a roadway in cleaning or maintaining such roadway.

No person shall operate on any public highway any vehicle with any load unless said load and any covering thereon is suitably fastened, secured and confined according to the nature of such load so as to prevent said covering or load from becoming loose, detached, or in any manner a hazard to other users of the highway.

VERMONT (D) T. 23, Sec. 1454

T. 23, Section 1454. Securing loads; penalty.

a. A person shall not operate a motor vehicle nor draw a trailer or semi-trailer on a highway unless the motor vehicle, trailer or semi-trailer is so constructed and loaded that it will create no hazard to other users of the highway.

b. Repealed.

VIRGINIA (D) 46.1-303 & 10-211

Section 46.1-303. Construction must prevent escape of contents.

No vehicle shall be operated or moved on any highway unless such vehicle is so constructed as to prevent its contents from dropping, sifting, leaking or otherwise escaping therefrom.

Section 10-211. Allowing escape of load material; penalty.

No vehicle shall be driven or moved on any highway unless such vehicle is constructed or loaded to prevent any of its load from dropping, sifting, leaking or otherwise escaping therefrom. Provided, however, that sand or any substance for increasing traction during times of snow and ice may be dropped for the purpose of securing traction, or water or other substance may be sprinkled on a roadway in the cleaning or maintaining of such roadway by the State or local government agency having that responsibility. Any person operating a vehicle from which any glass or objects have fallen or escaped, which could constitute an obstruction or damage a vehicle or otherwise endanger travel upon such public highway shall immediately cause the highway to be cleaned of all glass or objects and shall pay any costs therefor. Violation of this section shall constitute a Class I misdemeanor.

WASHINGTON (D) 46.61.655

Section 46.61.655. Permitting escape of load materials.

No vehicle shall be driven or moved on any public highway unless such vehicle is so constructed or loaded as to prevent any of its load from dropping, sifting, leaking or otherwise escaping therefrom, except that sand may be dropped for the purpose of securing traction, or water or other substance may be sprinkled on a roadway in the cleaning or maintaining of such roadway by public authority having jurisdiction. Any person operating a vehicle from which any glass or objects have fallen or escaped, which would constitute an obstruction or injure a vehicle or otherwise endanger travel upon such public highway shall immediately cause the public highway to be cleaned of all such glass or objects and shall pay any costs therefor.

WEST VIRGINIA (C) 17C-17-6

Section 17C-17-6. Loads to be securely fastened and not allowed to leak, escape, etc.

a. No vehicle or combination of vehicles shall be operated on any highway unless such vehicle or combination of vehicles is so constructed or loaded as to prevent any of its load from dropping, sifting, leaking, or otherwise escaping therefrom, except that sand may be dropped for the purpose of securing traction, or water or other substance may be sprinkled on a roadway in cleaning or maintaining such roadway.

b. It shall be unlawful to operate on any highway any vehicle or combination of vehicles with any load unless said load and any covering thereon is securely fastened so as to prevent said covering or load from becoming loose, detached, or in any manner a hazard to other users of the highway.

WISCONSIN (D) 348.10, Section 2
346.94, Sections 6 & 7

348.10, Section 2. Special limitations on load.

(2) No person shall operate a vehicle on a highway unless such vehicle is so constructed and loaded as to prevent its contents from dropping, sifting, leaking or otherwise escaping therefrom.

346.94, Sections 6 & 7.

(6) Debris on public or private property. No person shall throw or deposit any type of debris or waste material on or along any highway or on any other public or private property.

(7) Spilling loads of waste or foreign matter. The operator of every vehicle transporting waste or foreign matter on the highways of this State shall provide adequate facilities to prevent such waste or foreign matter from spilling on or along the highways.

WYOMING (D) — No statute citation available

"Dump trucks are not required to be covered during operation. Wyoming statutes do require that all vehicles be loaded as not to spill any substances on the roadway." Wyoming Highway Patrol

PUERTO RICO (A) — Section 1371 (b) 10

Section 1371 (b) 10.

(b) Except as otherwise provided by the Secretary through regulations promulgated for the purpose there shall not be operated or moved on public highways:

(10) "Any vehicle or trailer engaged in the transportation of refuse, soil, clay, mud, sand, cement, block or crushed stone, or any other nanalogous material, unless it is equipped with a body free from crevices, openings, or cracks and is not filled to overflowing so that any such material may spill or drop upon the pavement. Where the cargo consists of fine gravel, sand, lime, cement or refuse, or any other analogous material, said cargo shall be completely covered with a tarpaulin, oilskin or canvas so that it will not spill over or pollute the atmosphere to the detriment or prejudice of the public health and safety, provided, further, that on rainy days, if the source of the cargo is swampy, the vehicle's tires shall be cleaned or washed before entering a public road."

CANADIAN PROVINCES

ALBERTA (D) — Section 3.3.2

Section 3.3.2. Loose Materials.

When the load of a vehicle consists of loose material or of material liable to shift, slip, blow off or fall off while being conveyed, it shall be placed on the vehicle inside a container or otherwise so placed as to prevent it from falling off the vehicle.

BRITISH COLUMBIA (C) — Section 19.03

Section 19.03 (5)

No person shall drive or operate on a highway a vehicle unless it is so constructed or loaded as to prevent any of its load,

(a) from shifting or swaying in such a manner as to affect the operation of the vehicle; or
(b) from dropping, sifting, leaking, or otherwise escaping therefrom, but sand may be dropped for the purpose of securing traction, and water or other substance may be sprinkled on a roadway in cleaning or maintaining the roadway.

BRITISH COLUMBIA (C) cont.

Section 19.03 (6)

No person shall drive or operate on a highway a vehicle with any load unless the load and any covering thereon is securely fastened so as to prevent the covering or load from becoming loose, detached, or in any manner hazardous to other users of the highway.

NOVA SCOTIA (C) — Section 177

Section 177 (7)

7. (1) All vehicles transporting firewood, Christmas trees, tree branches, moss or seaweed or other similar loosely packed bulk materials, or liquid or semi-liquid materials shall be constructed in such a manner so as to prevent the contents thereof from dropping, shifting, leaking or otherwise escaping from the vehicle.

NOVA SCOTIA (C) cont.

(2) Loads consisting of sawdust, shavings or wood chips shall be covered entirely by a tarpaulin or other covering in a manner sufficient to prevent the escape from the vehicle of any portion of the load.

(2A) Subject to subsection (2B), loads consisting of salt, sand, gravel, asphalt, coal or other similar bulk materials shall be covered entirely by a tarpaulin, or other covering in a manner sufficient to prevent the escape from the vehicle of any portion of the load.

(2B) Where a vehicle carrying a load consisting of salt, sand, gravel, asphalt, coal or other similar bulk materials is adequately constructed or loaded to prevent the escape from the vehicle of any portion of the load, it shall not be necessary for the load to be covered by a tarpaulin or other covering.

ONTARIO (A) Ontario Regulation 632/76

O.R. 632/76

COVERING OF LOADS

1. In this Regulation,

(a) "clear aggregate" means gravel, crushed stone or slag in the form of particles that are not less than 3/8 inch in diameter or more than 1½ inches in diameter;

(b) "registered gross weight" means the weight for which a permit has been issued under the Act, the fee for which permit is based upon the weight of the vehicle or combination of vehicles and load; and

(c) "waste" means ordinary waste associated with municipal collection systems, including ashes, garbage, refuse and domestic waste.

2. (1) Subject to subsection 2, where a commercial motor vehicle or a combination of a commercial motor vehicle and trailer or trailers is being operated on a highway and is carrying a load that is:

(a) sand, gravel, crushed stone, slag, salt or any mixture thereof, where such substances are in the form of particles of up to 1½ inches in diameter;

(b) waste; or

(c) shredded scrap metal,

the portion of the load that is not enclosed by the vehicle or load container shall be covered with a covering that is made of tarpaulin, canvas, netting or other material capable of confining the load within the vehicle container or load container.

(2) Subsection 1 does not apply where the commercial motor vehicle or the combination of a commercial motor vehicle and trailer or trailers is being operated.

(a) in the course of applying sand, salt, a mixture of sand and salt or any similar substance to the highway for the purpose of winter highway maintenance;

(b) in the course of collecting waste;

(c) in the course of carrying waste where the vehicle does not have a gross weight or registered gross weight in excess of 10,000 pounds;

(d) in the course of carrying a load that is not waste and the vehicle does not have a gross weight or registered gross weight in excess of 18,000 pounds;

(e) in the course of carrying sand, gravel, crushed stone or slag, of which not less than 90 per cent is clear aggregate, where the highest point of the load does not extend above the top of the vehicle container or load container, and the perimeters of the load are not less than twelve inches beneath the top of the vehicle container or load container;

(f) in the course of carrying sand, gravel, crushed stone, slag, salt or any mixture thereof in December, January, February or March where the highest point of the load does not extend above the top of the vehicle container or load container, and the perimeters of the load are not less than twelve inches beneath the top of the vehicle container or load container;

(g) in the course of carrying agricultural products, where such vehicle is owned by a farmer;

(h) on a highway with,

(i) an untreated gravel or
(ii) an earth surface, or
(iii) a surface treated solely for dust abatement purposes;
or

(i) within the limits of a highway construction contract.

3. This Regulation comes into force on the 1st day of January, 1977.

QUEBEC (B) Section 11 - 38

Section 11 - 38. Security of Load

It is forbidden to drive or permit to be driven on a public highway any vehicle the load of which is not firmly bound, or sufficiently covered or otherwise secured.

Any policeman or officer of the Department who has reason to believe that a vehicle and its load constitute a public danger is authorized to detain the said vehicle until such condition has been rectified.

SASKATCHEWAN (D) Section 232

Section 232.

"No person shall cause or allow a vehicle to be so loaded that when the vehicle is driven on a public highway the load or any part thereof might drop onto the highway, and no person shall drive on a public highway a vehicle so loaded."

YUKON (D) Section 131

Section 131.

(1) Every motor vehicle or trailer shall be loaded in such a manner that no portion of the load may become dislodged or fall from the motor vehicle or trailer during transit.

Chapter 40. General Provisions.

Section		Section	
050.	Penalty for violations of law, regulations, and municipal ordinances	100.	Definitions for title
		110.	Short title

Sec. 28.40.050. Penalty for violations of law, regulations, and municipal ordinances. (a) It is a misdemeanor for a person to violate a provision of this title unless the violation is by this title or other law declared to be a felony or an infraction.

(b) A person convicted of a misdemeanor for a violation of a provision of this title for which another penalty is not specifically provided is punishable by a fine of not more than $500, or by imprisonment for not more than 90 days, or by both. In addition, the privilege to drive or the registration of vehicles may be suspended or revoked.

(c) Unless otherwise specified by law a person convicted of a violation of a regulation adopted under this title, or a municipal ordinance regulating vehicles or traffic when the municipal ordinance does not correspond to a provision of this title, is guilty of an infraction and is punishable by a fine not to exceed $300.

(d) An infraction, as provided for in (c) of this section, is not considered a criminal offense and may not result in imprisonment, nor is a fine imposed for the commission of an infraction considered a penal or criminal punishment; nor may the commission of a single infraction result in the loss of a driver's license or privilege to drive in this state except as may result from the accumulation of points under AS 28.15.221 — 28.15.261, or the registration of vehicles; nor does a person cited with an infraction have a right to trial by jury or to court-appointed counsel.

(e) Notwithstanding the maximum fine provided for infractions under (c) of this section, for the violation of regulations or special permits issued governing vehicle weight limits, overweight penalties shall be imposed at the rate of five cents for each pound of weight over the authorized weight limit for that vehicle. (§ 50-1-8 ACLA 1949; am § 12 ch 241 SLA 1976; am §§ 22, 23 ch 144 SLA 1977)

DOT REGS

MEMORANDUM State of Alaska

TO: Major Walter J. Gilmour
Field Enforcement Commander
Alaska State Troopers

DATE: 5/20/85

FILE NO:

TELEPHONE NO: 745-5258

FROM: Captain Terry McConnaughey
Commander, B Detachment
Alaska State Troopers

SUBJECT: Bail Schedule -
Karla L. Forsythe Letter

I would like to take this opportunity to offer the following comments on the letter from Karla Forsythe, re: uncovered loads.

The letter addresses the use of 13 AAC 02.530(d) and possible bail schedule modification as an enforcement tool for uncovered loads and is in error in several areas.

The majority of the complaints generated from the public are as a direct result of property damage (broken windshields, etc.) caused by gravel trucks, and the victim's inability to identify the responsible person or collect just compensation.

As it stands now, the State had no regulation requiring that gravel loads be covered or tarped; instead, a vehicle that spills a load is usually cited under 17 AAC 25.040(a) or (b) with a bail of $50.00.

Representative Cotten's concerns are certainly valid, the penalties are not sufficient for the offense, especially considering the safety hazard, property damage, and inconvenience cause to the general public. The entire traffic regulations and bail schedule are in dire need of revision. As you know, we no longer have any commercial vehicle regulations. all enforcement tools expired with the Alaska Transportation Commission, making many needed enforcement areas impossible.

I think that a mandatory court appearance for violations of 13 AAC 02.530(d) or 17 AAC 25.040(a) or (b) will do very little to correct the problem at hand, as the magistrates generally hesitate to convict and levy substantial fines. For example, recently a Palmer magistrate reduced a statutorily mandated fine after a conviction on an overloaded commercial vehicle from over $2,000.00 to $150.00. I also believe that a law requiring tarps on gravel loads would be counter-productive, that the flapping tarps could very well aggravate the problem. The flying rock causing the complaints and problems are not coming from the tops of loads in most cases. They are instead being released from worn gates, shaken off of under-carriages, rails, and wheels and propelled by revolving vehicle parts.

Public Safety Opinion

To correct this problem that has been causing Representative Cotten's constituents to complain, the law need a complete revision in the area dealing with anti-spray devices (fenders and flaps), unsafe vehicles, failure to contain loads, etc.

POSITION PAPER - CSHB 689 (Jud)

Support

April 2, 1986

CSHB 689 (Jud) - "An Act relating to required equipment on and the transportation of certain loads by, motor vehicles."

Our interpretation of this legislation is that it is an attempt to prevent damage often caused to private vehicles from gravel, rocks and like items falling from uncovered commercial vehicle loads.

The new provisions provided by this statute will be enforced during our current patrol activities. While no additional enforcement effort is anticipated, this statute will add strength to the current provisions.

Robert J. Sundberg

- D R A F T -

ALASKA/LOWER 48 STATES AIR FARES

DOT&PF - STATEWIDE AVIATION

December 2, 1985

I. INTRODUCTION

This paper conducts two analyses of air fares. The first is a comparison of representative airlines (RA) air fares over three types of routes:

(1) routes between points in Alaska,
(2) routes between points in Alaska and points in the Lower 48 States, and
(3) routes between points in the Lower 48 States.

The intent is to determine how RA air fares in Alaska compare to their air fares in the Lower 48 States. For ease of comparison and data collection, only coach and SuperSaver fares RA have been used.

The second analysis is a comparision of several of RA air fares and air fares of other airlines for trips of comparable length in the Lower 48 States. The intent of this analysis is to determine how RA air fares compare to fares of other airlines. Only coach fares have been compared, again for ease of comparison and data collection.

II. RA FARES; Within Alaska, Alaska to Lower 48 States, and Within the Lower 48 States

Table 1 compares average RA fares for three types of routes in Alaska and the Lower 48 States.

TABLE 1
RA
AVERAGE COACH AND SUPERSAVER
FARES/MILE

RA Routes	RA Coach Fares/Mile	RA SuperSaver Fares/Mile
Within Alaska	$.30	$.22
Alaska to Lower 48	.21	.15
Within the Lower 48	.22	.15

The Table shows that fares for travel within Alaska far exceed other fares. There may be a variety of explanations for this. Higher labor and operation costs and shorter stage lengths (flight distances) for RA routes within Alaska compared to the Lower 48 States could be one cause of the differential. In addition, traffic densities and load factors are likely to be lower in Alaska. The low traffic in Alaska also results in fewer carriers competing with RA compared to the relatively stiff competition for heavier traveled routes between Alaska and the Lower 48 States and between points in the Lower 48 States.

Table 1 also shows that RA fares for travel between Alaska and the Lower 48 States are comparable to their fares for travel within the Lower 48 States. Some fares are higher than others, but on the average, they are comparable.

Actual fares for travel between points in Alaska are shown in Table A-I in the Appendix. Only fares from Anchorage to outlying communities were used because RA routes to the outlying communities originate in Anchorage. For example, to fly Fairbanks to Deadhorse would require a flight from Fairbanks to Anchorage and another flight from Anchorage to Deadhorse.

Fares range from the highest fare/mile for service to Cordova which has low traffic, a short stage length and only air taxi competition, to the lowest fare in the Anchorage to Fairbanks market which has higher traffic, heavier loads, and greater competition. It should be noted that fares to points in Southeast Alaska are as much as three cents/mile less than the average fares for other routes within Alaska. These fares may be slightly artificially low due to subsidies provided through the Essential Air Service (EAS) program.

Actual fares for travel between Alaska and the Lower 48 States are shown in Table A-II in the Appendix. Fares have been shown from Anchorage, Fairbanks, and Juneau because most routes originate from these points. Coach and SuperSaver fares from Anchorage average about one cent/mile less than fares from Fairbanks and Juneau. The highest fares/mile are for routes to Seattle and Portland while the lowest fares/mile are for the longer routes to Phoenix and Tucson.

Actual fares for travel between points in the Lower 48 States are shown in Table A-III. Fares have been shown for travel from Seattle and Portland since most of the RA routes in the Lower 48 States arrive or depart from these cities.

III. AIR FARES:

This analysis compares air fares for several of RA routes to fares of other airlines for routes of comparable length in the Lower 48 States. Only coach fares are compared and none of RA routes entirely within the Lower 48 States were examined.

Table II summarizes the results of this comparison. This table shows that, except for routes from Fairbanks to Seattle and Anchorage to Deadhorse, RA flights were consistently cheaper per mile than routes of comparable length by other airlines.

This data has limitations in that only 5 or 6 Lower 48 routes were used for each comparison. In addition, in the case of comparisons of routes within Alaska to routes in the Lower 48 States, in some instances the aircraft flown in the Lower 48 are different from aircraft flown in Alaska. Furthermore, many routes within Alaska utilize 737 aircraft equipped for cargo and passenger loads. In general, however, it appears that RA fares are generally lower than fares of other airlines in the Lower 48 for routes of comparable length.

TABLE II
COMPARISON OF RA FARES TO OTHER AIRLINES' FARES

RA Route	Approximate Stage Length	RA Coach Fare/Mile	Other Airlines' Average Coach Fare/Mile for Lower 48 Routes of Comparable Length
Anchorage-Seattle	1450 miles	$.22	$.24
Fairbanks-Seattle	1550 miles	.25	.23
Juneau-Seattle	900	.25	.29
Ketchikan-Seattle	650	.27	.36
Anchorage-Deadhorse	627	.38	.36
Anchorage-Petersburg	677	.29	.36
Anchorage-Sitka	592	.29	.36
Anchorage-Wrangell	700	.27	.36
Anchorage-Bethel	500	.25	.42
Anchorage-Fairbanks	500	.21	.42
Anchorage-Nome	530	.37	.42
Anchorage-Kotzebue	540	.36	.42

The Lower 48 States routes used to compare to RA fares are shown in Tables A-IV-A1X.

IV. CONCLUSIONS

The data presented in this paper suggests three conclusions, based on a fare per mile comparison.

(1) RA air fares for travel within Alaska are substantially higher than its fares for travel to and within the Lower 48 States. Higher labor and operations costs in Alaska and lower stage lengths and load factors may be the primary reasons for the higher fares for travel in Alaska.

(2) RA air fares for travel from Alaska to the Lower 48 States are, on the average, comparable to RA fares for travel within the Lower 48 States.

(3) RA fares for travel within Alaska and from Alaska to the Lower 48 States are usually lower than fares of other airlines for routes of comparable length in the Lower 48 States.

MEMORANDUM

TO: Senator Jack Coghill

FROM: Representative Adelheid Herrmann

DATE: April 17, 1986

SUBJECT: Scheduling of CS HCR 36 (Fin)

As you know, my staff has been in touch with your office to request scheduling of House Concurrent Resolution 36, regarding intrastate airfares.

I know that the Senate Committee on Transportation has taken an active interest in the issue of air travel costs in Alaska and I hope that this bill will see prompt action.

I have attached some back-up information on the bill for your consideration. If you have any questions, please contact me.

Offered: 4/3/86
Referred: Rules

Original sponsors: Herrmann, Wallis and Thompson

IN THE HOUSE BY THE FINANCE COMMITTEE

CS FOR HOUSE CONCURRENT RESOLUTION NO. 36 (Finance)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

Relating to intrastate airline travel.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

WHEREAS intrastate air travel is an essential and often the only effective means of transportation within the state; and

WHEREAS competitive market forces in many other states have caused a decline in commercial air fares; and

WHEREAS these same competitive forces have not caused a significant decline in air fares offered by the major carriers for travel in many markets of the state; and

WHEREAS the cost of air travel between many areas of the state has become prohibitively expensive; and

WHEREAS the high cost of air travel may result from a lack of adequate competition and may constitute a violation of state or federal law;

BE IT RESOLVED by the Alaska State Legislature that the Governor is respectfully requested to direct the Department of Transportation and Public Facilities, and the Department of Commerce and Economic Development to jointly investigate the tariffs charged by major air carriers servicing various urban and rural areas of the state; and be it

FURTHER RESOLVED that the results of the investigation and in particular recommendations for action by the legislature be reported to the First Session of the Fifteenth Legislature by January 31, 1987.

ANCHORAGE, AK 99503 PHONE: 562-2924

SUBJECT: HCR 36 -- INTRASTATE TRAVEL

THE ALEUTIAN REGION SCHOOL DISTRICT SUPPORTS THE ATTENTION OF HCR 36 TO INVESTIGATE THE RATE CHARGE FOR INTRASTATE TRAVEL. RATE INCREASES HAVE RESTRICTED THE ABILITY OF RURAL DISTRICT TO OPERATE EFFECTIVELY. SEVERAL RURAL DISTRICTS ARE INVOLVED IN AN ATTEMPT TO NEGOTIATE THEIR RATES FOR REQUIRED DISTRICT TRAVEL. THIS EFFORT COULD BE GREATLY AIDED BY PASSAGE OF HCR 36.

FROM: SOUTHWEST REGION SCHOOLS, DILLINGHAM, AK 842-5287

RE: HCR 36 - RELATING TO AIRLINE TRAVEL

THE SOUTHWEST REGION BOARD OF EDUCATION SUPPORTS HCR 36 AND FURTHER REQUESTS THAT THE LEGISLATURE INVESTIGATE SOME FORM OF SUBSIDY AS CURRENTLY PRACTICAL WITH STUDENT TRAVEL ON THE STATE FERRY SYSTEM.

AIR TRAVEL IS THE ONLY FORM OF TRANSPORTATION BETWEEN OUR SITES OR MAJOR COMMUNITIES OUTSIDE OF OUR DISTRICT.

IT MAY BE OF INTEREST TO KNOW THAT THE COST OF A ROUND TRIP TICKET TO ANCHORAGE, 300 MILES FROM DILLINGHAM APPROXIMATES THE COST OF A ROUND TRIP TICKET FROM ANCHORAGE TO SAN FRANCISCO, 2,018 AIR MILES.

RE: HCR 36 RELATING TO AIR TRAVEL INTRASTATE

I WISH TO EXPRESS MY VIEWS ON HCR36. TRANSPORTATION COSTS IN THE BRISTOL BAY AREA ARE AT AN ALL TIME HIGH. ALTHOUGH WE ARE ENJOYING A REDUCED FARE PRESENTLY, THIS IS A TEMPORARY AND TIMELY FIXED RATE. IN A COUPLE OF WEEKS, WE AGAIN, WILL HAVE TO PAY THE INFLATED SCHEDULED RATES WHICH, FIRSTLY MAKES TRAVEL BY SMALL CHARTER AIRLINES MORE ATTRACTIVE WHICH IS PLACING MORE OF A RISK TO TRAVELERS. SMALL PLANES ARE MORE SUSCEPTIBLE TO THE HARSH WEATHER AND TERRAIN CONDITIONS BETWEEN THE ANCHORAGE AND BRISTOL BAY AREA.

SECONDLY, TRAVEL BETWEEN ANCHORAGE AND OUR AREAS IS COMPARED TO TRAVEL COAST TO COAST OUTSIDE. MANY PEOPLE ARE LIMITED TO TRAVEL OUTSIDE THE METROPOLITAN AREA BECAUSE OF THE HIGH COST OF AIRFARE LIMITING THE AVAILABILITY AND ACCESS TO LESS EXPENSIVE PRODUCTS FORCING US TO PAY THE HIGH COST LOCALLY. WE ARE A CAPTIVE AUDIENCE AND AT THE MERCY OF THESE AIR PIRATES.

TO: HOUSE TRANSPORTATION COMMITTEE
REPRESENTATIVE CATO, CHAIR, REPRESENTATIVES DAVIS, FURNACE, HERRMANN, MARROU
PIGNALBERI, SHULTZ

REPRESENTATIVES WALLIS AND THOMPSON

FROM: BILLIE BENEDICT, BOX 10019, DILLINGHAM, AK.

RE:

I WOULD LIKE TO FULLY SUPPORT REPRESENTATIVE HERRMANN'S, THOMPSON'S AND WALLIS' LEGISLATION FOR LOOKING INTO AIR FARES TO RURAL ALASKA AREAS. IN CHOOSING TO LIVE IN ISOLATION, WE WERE AWARE OF THE SACRIFICES. HOWEVER, THE HIGH AIR FARES ARE NOT ONLY AN INCONVENIENCE WHICH PREVENTS US FROM TAKING VACATION OUTSIDE OUR AREA, BUT MOST OF US LEFT FAMILIES BEHIND FROM WHOM WE ARE CUT OFF. ALSO, CONSIDER THE COST TO THE STATE FOR THESE AIR FARES WHEN STATE WORKERS AND WORKERS FROM STATE FUNDED ORGANIZATIONS TRAVEL. THE COST IN OUR COMMUNITY ALONE IS INCREDIBLE. I WOULD LIKE TO SEE SOMETHING POSITIVE DONE TO INCLUDE US IN THE REST OF THE WORLD.

EOM

STATEMENT OF REPRESENTATIVE ADELHEID HERRMANN

CS HCR 36: Intrastate Airfares

House Finance Committee

March 26, 1986

MISTER CHAIRMAN, MEMBERS OF THE COMMITTEE, I WOULD LIKE TO GIVE BRIEF TESTIMONY ON CS HCR 36, A RESOLUTION CONCERNING THE COST OF INTRASTATE AIRLINE TRAVEL -- THAT IS, AIR TRAVEL WITHIN THE STATE OF ALASKA.

IN THIS RESOLUTION, THE LEGISLATURE IS ASKING THE GOVERNOR TO DIRECT THE DEPARTMENT OF TRANSPORTATION AND THE DEPARTMENT OF COMMERCE TO INVESTIGATE THE AIRFARES BEING CHARGED BY THE MAJOR AIR CARRIERS TO RURAL ALASKA.

MISTER CHAIRMAN, IF YOU LOOK INSIDE YOUR COMMITTEE PACKETS YOU WILL FIND A BRIEF SURVEY OF AIRFARE COSTS FOR TRAVEL ROUND TRIP FROM ANCHORAGE TO SEVERAL COMMUNITIES IN MY DISTRICT. THESE FARES ARE JUST TRAVEL TO ANCHORAGE -- IF YOU ADD THE COST OF TRAVEL TO JUNEAU YOU CAN ADD ANOTHER COUPLE OF HUNDRED DOLLARS.

MISTER CHAIRMAN, FOR THE COST OF TRAVEL TO ANCHORAGE AND

JUNEAU FROM MANY OF THE COMMUNITIES IN MY DISTRICT YOU COULD TRAVEL ALL THE WAY ACROSS THE U.S. OR TO EUROPE.

I SHOULD ALSO LIKE TO NOTE THAT I DID A SIMILAR AIRFARE SURVEY OF THESE COMMUNITIES ALMOST EXACTLY ONE YEAR AGO AND HAVE FOUND THAT NEARLY ALL OF THESE FARES HAVE INCREASED -- SOME AS MUCH AS 10 TO 15 PERCENT. ONLY ONE FARE -- A SPECIAL WEEKEND FARE -- DECREASED IN COST.

MISTER CHAIRMAN, I THINK IT IS FAIR TO SAY THAT MANY OF MY CONSTITUENTS -- AND RESIDENTS THROUGHOUT THE ENTIRE STATE FOR THAT MATTER -- FEEL THAT AIRFARES LIKE THIS ARE OUTRAGEOUS. IN THE WAKE OF AIRLINE DEREGULATION, AIR TRAVEL CONSUMERS ARE IN THE DARK AND THERE IS A GENERAL PERCEPTION THAT THESE FARES ARE UNREASONABLY HIGH.

WHETHER THE MAJOR AIR CARRIERS ARE, IN FACT, CHARGING UNREASONABLE FARES IS NOT CLEAR AND THAT IS THE REASON FOR THIS RESOLUTION.

AS YOU CAN ALSO SEE FROM THE BACK-UP MATERIALS FOR THIS RESOLUTION, THE ALASKA DEPARTMENT OF TRANSPORTATION HAS UNDERTAKEN A VERY BRIEF ANALYSIS OF AIRFARES OF A "REPRESENTATIVE AIRLINE" WHICH HAS PRODUCED INCONCLUSIVE FINDINGS. AT THIS POINT, THE DEPARTMENT FEELS THAT IT REQUIRES ADDITIONAL EXPERTISE OUTSIDE OF THE DEPARTMENT TO PURSUE THIS QUESTION

FURTHER. ACCORDINGLY, YOU WILL FIND THAT THIS RESOLUTION HAS A FISCAL NOTE CALLING FOR AN APPROPRAITION OF 50,000 DOLLARS TO SUPPO: T THE NECESSARY INVESTIGATION OF AIRFARES. I WILL LET THE DEPARTMENT EXPAND ON THIS.

[NOTE: RON LIND SHOULD BE THERE TO REPRESENT DOTPF]

TO SUMMARIZE, MISTER CHAIRMAN, THE INTENT OF CS HCR 36 IS TO INVESTIGATE THE HIGH COST OF AIRFARES TO AND FROM RURAL AREAS OF THE STATE AND TO DETERMINE WHETHER THESE PRICES ARE REASONABLE. IS IT THE COST OF FUEL...? IS IT INSURANCE...? A LACK OF PASSENGERS...? WHAT EXACTLY IS IT THAT IS CAUSING THESE HIGH AIRFARES?

THANK YOU.

ALASKA/LOWER 48 STATES AIR FARES

DOT&PF - STATEWIDE AVIATION

December 2, 1985

I. INTRODUCTION

This paper conducts two analyses of air fares. The first is a comparison of representative airlines (RA) air fares over three types of routes:

(1) routes between points in Alaska,
(2) routes between points in Alaska and points in the Lower 48 States, and
(3) routes between points in the Lower 48 States.

The intent is to determine how RA air fares in Alaska compare to their air fares in the Lower 48 States. For ease of comparison and data collection, only coach and SuperSaver fares RA have been used.

The second analysis is a comparision of several of RA air fares and air fares of other airlines for trips of comparable length in the Lower 48 States. The intent of this analysis is to determine how RA air fares compare to fares of other airlines. Only coach fares have been compared, again for ease of comparison and data collection.

II. RA FARES; Within Alaska, Alaska to Lower 48 States, and Within the Lower 48 States

Table I compares average RA fares for three types of routes in Alaska and the Lower 48 States.

TABLE 1
RA
AVERAGE COACH AND SUPERSAVER
FARES/MILE

RA Routes	RA Coach Fares/Mile	RA SuperSaver Fares/Mile
Within Alaska	$.30	$.22
Alaska to Lower 48	.21	.15
Within the Lower 48	.22	.15

The Table shows that fares for travel within Alaska far exceed other fares. There may be a variety of explanations for this. Higher labor and operation costs and shorter stage lengths (flight distances) for RA routes within Alaska compared to the Lower 48 States could be one cause of the differential. In addition, traffic densities and load factors are likely to be lower in Alaska. The low traffic in Alaska also results in fewer carriers competing with RA compared to the relatively stiff competition for heavier traveled routes between Alaska and the Lower 48 States and between points in the Lower 48 States.

Table 1 also shows that RA fares for travel between Alaska and the Lower 48 States are comparable to their fares for travel within the Lower 48 States. Some fares are higher than others, but on the average, they are comparable.

Actual fares for travel between points in Alaska are shown in Table A-I in the Appendix. Only fares from Anchorage to outlying communities were used because RA routes to the outlying communities originate in Anchorage. For example, to fly Fairbanks to Deadhorse would require a flight from Fairbanks to Anchorage and another flight from Anchorage to Deadhorse.

Fares range from the highest fare/mile for service to Cordova which has low traffic, a short stage length and only air taxi competition, to the lowest fare in the Anchorage to Fairbanks market which has higher traffic, heavier loads, and greater competition. It should be noted that fares to points in Southeast Alaska are as much as three cents/mile less than the average fares for other routes within Alaska. These fares may be slightly artificially low due to subsidies provided through the Essential Air Service (EAS) program.

Actual fares for travel between Alaska and the Lower 48 States are shown in Table A-II in the Appendix. Fares have been shown from Anchorage, Fairbanks, and Juneau because most routes originate from these points. Coach and SuperSaver fares from Anchorage average about one cent/mile less than fares from Fairbanks and Juneau. The highest fares/mile are for routes to Seattle and Portland while the lowest fares/mile are for the longer routes to Phoenix and Tucson.

Actual fares for travel between points in the Lower 48 States are shown in Table A-III. Fares have been shown for travel from Seattle and Portland since most of the RA routes in the Lower 48 States arrive or depart from these cities.

III. AIR FARES,

This analysis compares air fares for several of RA routes to fares of other airlines for routes of comparable length in the Lower 48 States. Only coach fares are compared and none of RA routes entirely within the Lower 48 States were examined.

Table II summarizes the results of this comparison. This table shows that, except for routes from Fairbanks to Seattle and Anchorage to Deadhorse, RA flights were consistently cheaper per mile than routes of comparable length by other airlines.

This data has limitations in that only 5 or 6 Lower 48 routes were used for each comparison. In addition, in the case of comparisons of routes within Alaska to routes in the Lower 48 States, in some instances the aircraft flown in the Lower 48 are different from aircraft flown in Alaska. Furthermore, many routes within Alaska utilize 737 aircraft equipped for cargo and passenger loads. In general, however, it appears that RA fares are generally lower than fares of other airlines in the Lower 48 for routes of comparable length.

TABLE II

COMPARISON OF RA FARES TO OTHER AIRLINES' FARES

RA Route	Approximate Stage Length	RA Coach Fare/Mile	Other Airlines' Average Coach Fare/Mile for Lower 48 Routes of Comparable Length
Anchorage-Seattle	1450 miles	$.22	$.24
Fairbanks-Seattle	1550 miles	.25	.23
Juneau-Seattle	900	.26	.29
Ketchikan-Seattle	650	.27	.36
Anchorage-Deadhorse	627	.38	.36
Anchorage-Petersburg	677	.29	.36
Anchorage-Sitka	592	.29	.36
Anchorage-Wrangell	700	.27	.36
Anchorage-Bethel	500	.25	.42
Anchorage-Fairbanks	500	.21	.42
Anchorage-Nome	530	.37	.42
Anchorage-Kotzebue	540	.36	.42

The Lower 48 States routes used to compare to RA fares are shown in Tables A-IV-A1X.

IV. CONCLUSIONS

The data presented in this paper suggests three conclusions, based on a fare per mile comparison.

(1) RA air fares for travel within Alaska are substantially higher than its fares for travel to and within the Lower 48 States. Higher labor and operations costs in Alaska and lower stage lengths and load factors may be the primary reasons for the higher fares for travel in Alaska.

(2) RA air fares for travel from Alaska to the Lower 48 States are, on the average, comparable to RA fares for travel within the Lower 48 States.

(3) RA fares for travel within Alaska and from Alaska to the Lower 48 States are usually lower than fares of other airlines for routes of comparable length in the Lower 48 States.

MEMORANDUM

To: Committee members

From: Committee staff

Date: March 18, 1985

Re: Proposed SCS for CSHJR 16

This afternoon the committee is scheduled to take up HJR 16, which asks the federal government to continue the Essential Air Service subsidy until its originally scheduled termination date in 1988, rather than to phase it out this year, as President Reagan has proposed. The enclosed background material will explain the how important the program is to many Alaskan communities.

The proposed committee substitute does not change the intent of the original resolution, but does make the background a little more clear and specific.

In addition to the House version and the proposed cs, the background materials include:

- A short staff synopsis
- A senate advisory council memorandum explaining the program
- A CAB document explaining how eligibility for the subsidy is determined
- A copy of PL 98 - 443, CAB sunset legislation passed in 1984
- A copy of the House Conference report on CAB sunset
- Two articles from the Anchorage times explaining the effects of early phase-out of the program
- A short discussion of the subsidy from "Interior Alaska Transportation Study" by DOT/PF

RE: CS FOR HJR 16 (RELATING TO ESSENTIAL AIR SERVICE)

Background

"The Essential Air Service program which ensures air service to 147 small communities across the nation may fall victim to administration budget cuts.

"The Reagan administration's budget,... reportedly proposes the elimination of federal subsidies to the program, which would save $35 million to $45 million in fiscal 1986. The EAS program was instituted by Congress in 1978 when it deregulated the airline industry, to guarantee that service to be phased out in 1988, and in the past three years subsidies have substantially declined. The 1981 level of subsidies was $116 million, while last year only $36 million was issued out of a $51 million appropriation.

"Subsidized air service had existed before the creation of the EAS program. The EAS program had formerly been administered by the Civil Aeronautics Board, which expired Dec. 31, 1984, and is now under the purview of the Department of Transportation."1

---

1 AASHTO Journal, Cuts Proposed for Essential Air Service, February 1, 1985, p. 5.

STAFF SYNOPSIS

Proposed Cuts Would Be Devastating

The EAS program provides communities with passenger and cargo service. The people of these areas are dependent on these services. The effect of the proposed cuts would be immense. An article in the Anchorage Times, 02/03/85, gave a case study of the effect of the proposed cuts on the communities of Atka, in the Aleutians, and St. George, in the Pribilofs.

Atka

There are no roads in Atka, therefore, the 100 inhabitants rely on barges and air transport. Without Peninsula Airways, its subsidized carrier, Atka will be completely isolated.

St. George

Without service to St. George, the city will be unable to complete a new $13 million harbor. Without the new harbor, the islands bottomfishing industry would collapse. Without service, the city's tourist industry will deteriorate.

Like Atka and St. George, many communities involved in the EAS program are dependent on one industry. The proposed cuts would be disasterous to the economy of many of Alaska's towns and regions.

Explanation of 406

The Federal Aviation Act of 1958, under section 406, compensates carriers for providing service to communities which do not generate sufficient traffic to cover costs.

Section 419 (of the Airline Deregulation Act of 1978) is a method to fund essential air service to eligible points, i.e., a subsidy. This is intended to guarantee essential air service to small communities served only by one CAB certificated carrier. There are 230 communities in the state of Alaska which are eligible for essential air service.2 (although not all of them receive subsidized service)

CS FOR HOUSE JOINT RESOLUTION NO. 16 (Transportation) am

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

Relating to essential air service.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

WHEREAS Alaskan air carriers are recipients of federal funding under the U.S. Department of Transportation Essential Air Service program; and

WHEREAS the President of the United States has proposed a budget for fiscal year 1986 that would eliminate the Essential Air Service program; and

WHEREAS under the Airline Deregulation Act of 1978 (P.L. 95-504) Congress provided that the program would continue until 1988; and

WHEREAS Alaska has 38 communities that would be adversely affected by elimination of the funding; and

WHEREAS Alaskan air operators have been developing free market alternatives consistent with the deregulation of air transportation and the scheduled termination of the subsidy in 1988;

BE IT RESOLVED by the Alaska State Legislature that Congress fully fund the Essential Air Service program and that the U.S. Department of Transportation adhere to the scheduled 1988 timetable for elimination of the program.

COPIES of this resolution shall be sent to the Honorable Ronald Reagan, President of the United States; the Honorable George Bush, Vice-President of the United States and President of the U.S. Senate; the Honorable Robert Dole, Majority Leader of the Senate; the Honorable Thomas P. "Tip" O'Neill, Speaker of the U.S. House of Representatives; the Honorable Elizabeth Dole, Secretary of Transportation; and to the Honorable Ted Stevens and the Honorable Frank Murkowski, U.S. Senators, and the Honorable

CURRENT HOUSE VERSION

Don Young, U.S. Representative, members of the Alaska delegation in Congress.

SCS FOR CS FOR HOUSE JOINT RESOLUTION NO. 16 (Transportation)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

Relating to essential air service.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

WHEREAS Alaskan air carriers are recipients of federal funding under the U.S. Department of Transportation Essential Air Service program; and

WHEREAS the President of the United States has proposed a budget for fiscal year 1986 that would eliminate the Essential Air Service program; and

WHEREAS under the Airline Deregulation Act of 1978 (P.L. 95-504) Congress provided that the program would continue until 1988; and

WHEREAS more than 38 Alaskan communities would be directly and adversely impacted, and dozens of others would be indirectly impacted [ALASKA HAS 38 COMMUNITIES THAT WOULD BE ADVERSELY AFFECTED] by elimination of the funding; and

WHEREAS the Essential Air Service program provides communities with necessary passenger and cargo service; and

WHEREAS a lack of a state highway system forces Alaskans to be dependent on air travel; and

WHEREAS Alaskan air operators have been developing free market alternatives consistent with the deregulation of air transportation and the scheduled termination of the subsidy in 1988; and

WHEREAS a reduction or elimination of funds for the Essential Air Service program at this time will almost certainly cause a reduction or elimination of air service to those communities where it is not economically feasible to maintain present service without this program;

PROPOSED COMMITTEE SUBSTITUTE

BE IT RESOLVED by the Alaska State Legislature that Congress fully fund the Essential Air Service program and that the U.S. Department of Transportation adhere to the scheduled 1988 timetable for elimination of the program.

COPIES of th s resolution shall be sent to the Honorable Ronald Reagan, President of the United States; the Honorable George Bush, Vice-President of the United States and President of the U.S. Senate; the Honorable Robert Dole, Majority Leader of the Senate; the Honorable Thomas P. "Tip" O'Neill, Speaker of the U.S. House of Representatives; the Honorable Elizabeth Dole, Secretary of Transportation; and to the Honorable Ted Stevens and the Honorable Frank Murkowski, U.S. Senators, and the Honorable Don Young, U.S. Representative, members of the Alaska delegation in Congress.

Falls Church, Virginia, station of the Washington, D.C. metrorail system and Dulles International Airport in Virginia. The study shall include, but need not be limited to, a study of the feasibility of heavy rail, light rail, monorail, magnetic levitation systems, and any other appropriate transportation systems. The Secretary shall study the feasibility of each such system with and without intermediate stops.

(b) The Secretary shall complete the study required by subsection (a) and transmit the results thereof to Congress not later than one year after the date of enactment of this Act.

AIR SERVICE IN THE STATE OF ALASKA

SEC. 16. (a)(1) Notwithstanding any other provision of law, with respect to air transportation to each of the points in Alaska listed in paragraph (4), essential air transportation for purposes of section 419 of the Federal Aviation Act of 1958 shall neither be specified at a level of service nor operated with aircraft of lesser seating and cargo capacity than provided for in CAB Order 80-1-167 and its Appendices unless otherwise specified under an agreement between the Department of Transportation and the State of Alaska, after consultation with the community affected. This paragraph shall cease to be in effect on January 1, 1987.

(2) Notwithstanding any other provision of law, the total amount of compensation which may be paid under section 419 of the Federal Aviation Act of 1958 with respect to the points in Alaska listed in paragraph (4) shall not exceed $3,572,778 for each of the fiscal years 1985 and 1986 and shall not exceed $893,195 for service provided during the period beginning October 1, 1986, and ending at the close of December 31, 1986.

(3) The Secretary of Transportation shall study the feasibility of providing essential air transportation to each of the points in Alaska listed in paragraph (4) with aircraft having a smaller capacity than that required by paragraph (1), the level of compensation which would be required under section 419 of the Federal Aviation Act of 1958 for such transportation, and the impact of using such aircraft on the air transportation system in Alaska. The Secretary shall complete such study and submit a report of the results of such study to Congress not later than January 1, 1986.

(4) The points in Alaska referred to in paragraphs (1), (2), and (3) are Cordova, Yakutak, Gustavus, Petersberg, and Wrangell.

(b) Notwithstanding any other provision of law, no part of the order of the Civil Aeronautics Board in CAB docket number 38961 (CAB Order 84-6-77) shall enter into effect until after December 31, 1984.

And the Senate agree to the same.

NORMAN Y. MINETA,
GLENN M. ANDERSON,
ROBERT A. ROE,
GENE SNYDER,
JOHN PAUL HAMMERSCHMIDT,

MEMORANDUM

TO: Senator Coghill

FROM: Gene Doss
Systems Analyst

DATE: February 27, 1985

RE: Essential Air Service

The Essential Air Service Program came into being as a direct result of the Airline Deregulation Act of 1978. The program was, in effect, a sales pitch to those Congressmen who were not in favor of airline deregulation. What the Act did was guarantee a certain specified level of scheduled air service to those locations which might not otherwise receive it due to economic factors.

All of Alaska falls into the category covered by this Act and, in fact, was singled out as a special case before the Act went into effect. This special category was primarily due to the Alaskan geographic problems caused by the absence of an adequate road system to handle the necessary commercial traffic within the State. Commercial traffic in this instance is applicable to either passenger or freight service.

Level of service is determined to be a small or large airplane operation depending upon the type of service required and may be illustrated by the Gustavus route in Southeast Alaska. During the summer months, large aircraft make daily trips because of the great number of tourists who visit the area and the large volumes of freight transported. However, during the winter months when the volume of traffic is negligible, the route is still served by a small airplane making two scheduled trips per week.

Periodically, airlines bid on these essential routes which they do from a strictly business standpoint; that is, the airline agrees to supply the level of service required if there is sufficient profit to make the route worthwhile. This applies to any airline that wins a bid for servicing a particular route. It follows then, that if the Essential Air

SENATE ADVISORY COUNCIL MEMO

Service Program received a reduction or an elimination in funding, it will almost certainly cause a reduction or elimination of air service to those communities where it is not economically feasible to maintain a route.

The following attachments were supplied by the U.S. Department of Transportation, Anchorage, Alaska, and reflect the status of the Essential Air Service Program as of January, 1985. These attachments show the points in Alaska that receive Essential Air Service under the program and are broken into two categories; (1) points receiving subsidy and the subsidy amount and, (2) points receiving no subsidy.

Order 80-1-167

UNITED STATES OF AMERICA
CIVIL AERONAUTICS BOARD
WASHINGTON, D.C.

Issued Under Delegated Authority
January 25, 1980

Issued February 8, 1980

EFFECTIVE: APRIL 8, 1980

Essential Air Transportation Determination of Eligible Points in ALASKA under to section 419(a)(2)(A) of the Federal Aviation Act of 1958, as amended by the Airline Deregulation Act of 1978.	Dockets EAS-105 thru EAS-333 and EAS-347

ESSENTIAL AIR TRANSPORTATION DETERMINATION

Under section 419(a)(2)(A) of the Federal Aviation Act, as amended by the Airline Deregulation Act, the Board must determine by October 24, 1979, what constitutes essential air transportation for each certificated point which received service from one or no certificated carriers on October 24, 1978. Section 419(f)(2) of the Act states that "with respect to air transportation to any point in Alaska, essential air transportation shall not be specified at a level of service less than that which existed for such point during calendar year 1976, or two round trips per week, whichever is greater, unless otherwise specified under an agreement between the Board and the State agency of the State of Alaska, after consultation with the community affected." Congress asked us to confer with the communities and with state aviation officials to get their views on their essential air service, prior to making these determinations. To accomplish this for Alaska, we held a series of seven regional meetings throughout the state earlier this year to listen as state and community representatives gave their views on all aspects of the essential service program. 1/ Building on the input which we received at these meetings, we proposed guidelines for the essential air service determinations, and we requested comments on these guidelines from all interested parties. We then requested specific views from each community concerning its essential service in a questionnaire which was sent to the civic official of each community for which a determination was to be made.

1/ We held meetings in Anchorage, Bethel, Fairbanks, Juneau, Ketchikan, Kodiak and Nome. In addition we visited several Bush communities where we held at least 20 informal meetings with individuals and community representatives.

C.A.B. ELIGIBILITY DETERMINATION

With the adoption on August 31 of the final guidelines for essential air service determinations, 2/ we are now going forward with the determinations mandated by the Airline Deregulation Act.

The essential air service program provides, for the first time, assurance to a community that it will not lose its air service. Prior to the introduction of this program, communities received no guarantee that they would receive a particular level of service from the carriers serving them, nor a guarantee of the destination to which that service would be provided. They now have such a guarantee. Additionally, carriers in the past could, in some cases, drop their service at a point even when no other carrier was serving the point, without a replacement carrier entering the market. This often meant that the community disappeared from the air service map. In all, 129 communities lost their certificated air service in the 1968-1978 period. The essential service program guarantees that communities are no longer faced with such a bleak possibility.

In Alaska, we are required to make a determination for two hundred and thirty communities. In making our determination for each community we have considered the views of the communities 3/ and the communities' ability to generate air traffic based on historic traffic totals for both certificated and commuter carriers. 4/ Based on this information, we have made an analysis to determine each point's primary community of interest, and to determine which hub or regional center would assure the community access to the national air transportation system. Our essential air service determinations are set forth in Appendix A. Appendix B presents a description of the communities' present service, population and any appropriate notes. Appendix C contains the historic service for 1976 and 1978, the communities' requests for essential air service and our general comments on either their requests or our essential air service determinations. Appendix D sets forth the historic traffic data.

GENERAL APPROACH

A few remarks are in order here regarding our general approach and guidelines which we used in determining essential air service for Alaska communities. Particularly, it is important to reiterate our observations and conclusions which formed our guidelines in PR-213.

2/ PS-87 and PR-213; Parts 325 and 398 of the Board's rules.
3/ Community views were sought in a questionnaire which was sent to the civic official of each community.
4/ We have used commuter traffic data for communities where commuter airlines carry a significant amount of traffic, or provide service in key markets. Statistics submitted by commuter carriers are confidential for a one year period, but under section 298.66 of the Board's Economic Regulations, we find that it is in the public interest to disclose 1978 commuter traffic information in this order and all others defining essential air service.

The overall transportation needs of the state, the level of development and type of air transportation industry, and the logistical considerations in Alaska are substantially different from the rest of the country and require different essential air transportation findings. One of the major factors affecting air service in Alaska, particularly at the smaller communities, is the airport facilities. In many cases, airports consist of unpaved runways without any navigational equipment. During periods of bad weather, which are frequent, aircraft are unable to operate at these communities, and scheduled service becomes undependable because of frequent flight cancellations and delays. Consequently, the reliability of scheduled air service in Alaska is greatly reduced because of the absence of airports that can be served during adverse weather conditions. We are concerned about the importance of improved airport facilities to the development of air service in Alaska and to our statutory responsibility to ensure essential air transportation. Although we are not able to fund airport facilities under the essential air service program, we are prepared, where airport improvements are important to the availability and maintenance of essential air service, to relate these needs to the Department of Transportation which has jurisdiction in this area and to urge that it take steps to effect the necessary improvements.

The isolation of communities is also a major factor to be considered in essential air service determinations. The state highway system and the availability of surface modes of transportation are practically non-existent in a large portion of the state. Consequently, the typical Alaskan bush community relies almost exclusively on air transportation for its commercial and social ties with other communities. In many instances long distances separate the points. Even in cases where the distances are short, the terrain may not permit the operation of convenient and reliable surface transportation between communities.

As a result of these logistical circumstances and the relatively small populations of many Alaskan communities, a significant air taxi industry has developed in the state. The air taxis provide reliable, on-demand service, affording maximum flexibility in the timing of flights to meet individuals' needs. This system of service being provided in response to a specific demand for transportation is very practical, especially in the low density traffic areas prevalent in Alaska. In fact, as a result of the reliability and widespread availability of this type of service as compared to the usually infrequent operation of scheduled service at smaller communities in Alaska, the air taxi carriers are handling a sizable portion of the traffic, particularly passengers, in Alaska. Furthermore, judging by their success, air taxis have demonstrated that they can operate at fares that attract passengers and yet achieve sufficient profits to remain viable.

Severe weather is another factor that has an impact on the reliability and utility of air service. Adverse weather conditions frequently prohibit the operation of flights in Alaska. In addition, during certain parts of the year airport landing strips at many communities are not usable because of the effects of weather. Because of these conditions, scheduled flights are frequently disrupted, and the benefits of scheduled service are reduced. Although representatives at our meetings indicated that there is very little that can be done to overcome the problems of weather, they claim that these circumstances must be taken into account if the essential air service program is to be effective and viable.

The importance of mail and cargo needs was cited almost unanimously by spokespersons at our meetings. Alaskan communities are heavily dependent on air transportation to provide this service. We therefore have defined cargo and mail service as falling within the essential air service guarantee for Alaska. Frequent complaints were voiced about the irregularity of mail delivery and cargo service, the backlog of mail at the hubs,and the problems with the current system of postal contracting to federally certificated carriers. 5/ Under current contracting policy the Postal Service tenders mail only to certificated carriers and subcontract carriers even if other carriers, usually air taxis, are also operating to the certificated community. We were told that there are frequent instances where communities do not receive mail for extended periods because the contracted carrier has not operated a flight to the point even though during this time other carriers not allowed to transport the mail, particularly air taxis, have been operating to the point. Often, items being sent by post that require prompt delivery, such as perishable foods, are unnecessarily delayed at a distribution point because of this system. We favor a policy of allowing any air carrier--certificated, commuter or air taxi--to contract for mail delivery, and we have indicated this position to the Postal Service. We feel that this approach would alleviate some of the delays in mail delivery and improve this important part of air service to the communities in Alaska. It is our understanding that the Postal Service is now considering such an approach. With respect to backlogs under the existing subcontracting system, the certificated carrier is required by Part 293 of our regulations to provide for extra sections either with the subcontractor, through another air taxi, or with its own equipment. Until any changes take place in the postal contracting system, we will attempt to monitor the existing subcontract system to insure that the certificated carriers incur no undue backlogs.

SPECIFIC DETERMINATIONS

Our determinations rely on a system of regional service centers in addition to the FAA hubs. We believe that this system will best meet the needs of the Alaska communities for service to their major communities of interest and for access to the national air transportation system. In addition to the FAA hubs and regional centers listed in our guidelines in

5/ Outside of the federally certificated system in Alaska, the Postal Service has its own contracts with air taxi operators for mail delivery to noncertificated points.

Part 398, our determinations in this order include Seattle and several other regional centers. The complete list of hubs and regional centers we relied on include the FAA hubs of Anchorage, Fairbanks, Juneau, and Seattle, and the regional centers of Aniak, Barrow, Bethel, Bettles, Cordova, Cold Bay, Dillingham, Ft. Yukon, Galena, Ketchikan, King Salmon, Kodiak, Kotzebue, McGrath, Nome, Petersburg and St. Mary's. Because of the status of these regional centers as separate eligible points as well as "feeder" centers for outlying points in their areas, we have required that there be adequate service between the regional service centers and the FAA hubs to handle both the regional centers' essential air service needs and the traffic seeking access to the national air system from the other eligible points served through the regional centers.

As for aircraft requirements, we have considered various views and have concluded that for practical reasons we should not impose any overall minimum size for aircraft in Alaska. As attested to by most spokespersons in Alaska, small aircraft are operated at almost all communities in the state. In addition, operations with small aircraft, especially by air taxis, provide useful and high quality service and are reasonably reliable given the weather constraints. Under these circumstances, it is clear that service with small equipment will afford the best means of meeting the air service needs of many eligible points. However, where operational requirements, distances and duration of flights between eligible points and their designated hubs or regional centers require the operation of larger aircraft to provide usable service, we have included such a requirement in our determinations. Between some regional service centers and the FAA hubs we have required service with large aircraft because of the distances and the level of traffic from the surrounding communities at the regional center.

In general, we have required sufficient frequencies to accommodate both the number of passengers and accompanying baggage as well as normal cargo requirements of the communities. We recognize the critical importance of cargo air service for the communities in Alaska and therefore included cargo as a factor in determining the numbers of flights and capacity of service we guarantee. We have not specified actual freight capacity or aircraft to be operated for cargo purposes. Instead, we have required frequencies based on the overall passenger and cargo needs of the point. In considering cargo, we recognize that in Alaska cargo is frequently transported in the passenger compartment of aircraft and that the carriage of large cargo items can preclude the accommodation of passengers on a particular flight or alternatively the carriage of passengers may result in delays in transporting cargo. Thus, it is difficult to establish required service levels based on the separate capacity needs for passengers and cargo.. We examined the combined need for passenger and cargo service in determining the level of service required, and we expect that with the level we have set, both transportation needs, passenger and cargo, will be afforded service that meets the communities' essential air service needs.

In making our determinations, we have designated a specific level of essential service for each community based primarily on historic patterns of service. Should alternative patterns develop or different size aircraft be employed we will allow variations in the number of flights depending on the size of aircraft operated and the number of intermediate stops or points beyond the eligible point that share available capacity on the flights with the eligible point. As for maximum capacity, our rationale for imposing a ceiling of 80 seats per day in each direction for each eligible point in the rest of the country is that above the 80-seat level we are confident that the marketplace will satisfy the needs of the community for air service. Where we are confident that the marketplace in Alaska can respond to the needs of the community, we take a similar approach. In general, we guarantee service to accommodate up to 40 passengers per day in each direction and the community's cargo needs. We recognize though that the circumstances and the marketplace in Alaska are different than in the rest of the country, and therefore we have examined the individual situations and determined whether a level above this ceiling is required. As noted above, between the regional centers and the FAA hubs higher capacity levels are required in some cases to handle both the regional point's traffic and the traffic from the outlying eligible points being served through the regional center.

Our essential air service determinations for most points require scheduled service, and we anticipate relying on service by certificated carriers, state certificated carriers, commuter carriers operating under subcontract to the certificated carriers, and other commuter air carriers to meet this requirement. Even though our essential air service determination may only specify scheduled air service at a point, we fully expect that air taxi operators will be available and that they will play an important role in the overall air service of the communities. Alternatively, at a few points in Alaska we will rely for the most part on unscheduled service by air taxi operators for essential air transportation. We are convinced that at these points unscheduled on-demand service will provide better, more responsive service than scheduled service. The quality, reliability and public acceptance of air taxi operations in Alaska is high, and we are confident that where we rely on air taxis this type of service will meet the essential air service requirements of the community. At yet other points, we require as our essential air service determination that both air taxi and scheduled service be available if it is felt that the on-demand service should be guaranteed as a supplement to the scheduled service. A final variety of service we will rely on at certain communities is flag stop service by scheduled carriers.

We have generally imposed a maximum of two stops between the eligible point and the regional point or the FAA hub. The purpose of this provision is to assure communities that under normal circumstances convenient access to the national air transportation system will be permitted. However, in several cases we have determined that the historic pattern of more than two stops is required to insure that the carrier will continue to provide the community with its past number of frequencies. Regardless of the number of stops, we expect that the community will continue to receive available capacity equivalent to our definition and any change in the historic pattern of service either in frequencies, stops or aircraft size will result in an equitable adjustment in available capacity. The Act established 1976 as a reference for the level of essential air service in Alaska, and our determinations are, for the most part based on a community's present service or its 1976 level of service. The essential level was set at the greater of the two levels except in cases where the data indicated that available traffic and/or circumstances warranted the lower level. In only a few cases did we determine that essential service was less than the present service. One case involved three points (Haines, Skagway and Valdez) which receive high quality, competitive commuter service. Here we were confident that the marketplace will insure sufficient frequencies to accommodate all the traffic. Therefore, we guaranteed sufficient seats at a 50 percent load factor to accommodate the present traffic level. This is considerably less than the actual frequencies provided. Another case involved Prudhoe Bay, Homer and Kenai, none of which are regional points, yet the guarantee of seats sufficient to accommodate traffic at a 50 percent load factor exceeded our maximum capacity guarantee guideline of 80 seats in each direction per day. Therefore, we guaranteed only up to our ceiling of 80 seats.

We have had the benefit of close cooperation by the Alaska Transportation Commission in developing our essential air service determinations for Alaska. The Commission's help was especially important with regard to thirty-one of the points for which we found that less than the statutory minimum two round trips per week is required, simply because the available traffic does not warrant a higher level. We are authorized to drop below this two round trip minimum when the State of Alaska concurs, and they have done so for these very small points. 6/ As shown in the appendices to this document, many of the communities are very tiny or are characterized by seasonal industry such as a fish cannery. Another fourteen points involved essential service determinations of zero because it appeared that they have no population at all and 21 points involved essential air service determinations less than the 1976 level. In most cases the difference is insignificant such as one less trip per week in the peak or off-peak season. Here again, the State has concurred.

6/ See Appendix F.

We note that several of our determinations require frequencies which exceed the guideline of at least two daily round trips applicable to points in the lower 48 states. For instance, we determined that 58 weekly frequencies were essential at Valdez. However, we would emphasize that this was based on a small aircraft capacity of 8 seats. Should the aircraft size change in the future, then our determinations would also change accordingly.

Another point we should make about our determinations is that a number of markets now receive competitive service from state certificated carriers that was not in existence during our base traffic periods of 1976 and 1978. We are reluctant in most cases to determine all or part of this new service as essential since we are uncertain of its future development. In such cases we have set the definition at the highest level of past or present federally certificated service. We will be receptive, however, to any substantiated evidence which would warrant our setting a different level of essential air service.

Two final aspects of our determinations which we should elaborate on are their seasonal variations and aircraft specifications. Generally, we have set peak and off-peak levels of essential service. We do not intend to establish exact dates on these seasons since frequently they are more a function of natural phenomena such as "break-up" than the calendar. Carriers historically have adjusted their own schedules to coincide with seasonal shifts, and there is no reason to expect they will not continue to respond with service changes that are in the mutual best interests of the communities and themselves.

As for aircraft specification, we have defined each community's essential service on the basis of operations with certain sizes of aircraft. We did this for the convenience of all parties concerned with this program so they can readily comprehend the type of service we contemplate for each community. Normally, each community will continue to be served with one general size of aircraft because of traffic and airport considerations. Nevertheless, should a carrier contemplate a change in size of equipment we would expect that frequency would be adjusted to provide at least the capacity equivalent to our definition.

DATA PROBLEMS

In applying our guidelines to specific points we encountered several problems. First, a definitive analysis of certain communities' service needs was difficult because of the poor quality of available data. Unlike the 48 continental United States, there are no origin and destination data among the points within the state of Alaska. To the extent possible we utilized other data sources: service segment data, Forms 41, commuter reports (Part 298C) and subcontractor's reports (Part 293). Unfortunately, each of these sources also has limitations. 6/

6/ Service segment data. Three of the five Alaskan certificated carriers are not required to file service segment data (Kodiak-Western Alaska, Reeve Aleutian and Munz Northern). Alaska Airlines files service segment data for its mainline points, but not for its subcontracted bush points. Wien Air Alaska files service segment data for all of its points. However, its filings for bush points are not all inclusive of its subcontractors' activities at each point. For example, many points show no passenger enplanements when in fact a subcontractor carried passengers. Also the points show lower than actual cargo activity.

Form 41. This data source has several shortcomings. Alaska Airlines does not report data for its bush points and Wien's bush point data is not complete. In addition, it is impossible to identify cargo activity at bush points, because the majority of cargo activity is inbound, but only enplaned (outbound) cargo at each point is reported.

Commuter Reports (Part 298C). Many Alaskan commuters ignore the requirement to file these reports. Those that do report are not required to file aircraft departure data. Consequently, this data source is of limited value.

Subcontractor Reports (Part 293). Here again, many of the carriers do not send in reports. Certain carriers file their reports but the data are in such form that activity at a single point is impossible to identify. For instance, Bush Air files data by total flight rather than at each individual point. Moreover, we were relatively certain that Bush Air's reports are unreliable. For example, for seven consecutive quarters it reported identical departures, enplaned passengers and deplaned cargo on specific flights. It also appears that some carriers report all their activity at a particular point, while others report only activity related to its subcontract.

Finally, a significant portion of activity at bush points is conducted by air taxi charter operations which are not contained or required in any of the Board's data sources.

Another problem is that it is difficult to determine from our data sources the number of seats or cargo capacity provided at each bush point, either currently or historically. In the small aircraft category reported by many of the subcontract carriers, there are a variety of aircraft types ranging from four to ten seats and 500 to 1500 pounds cargo capacity, and the reports do not identify the type used at each point. Furthermore, the aircraft type used at a particular point probably varies from day to day.

Finally, as we stated earlier, we sent out questionnaires asking the communities to provide us with specific details about the service they have received and require. Only twenty five percent of the communities responded.

As a consequence of these deficiencies, our data base has limited utility as a tool for pinpointing a community's service requirements. Nevertheless, we are confident our determinations have been made on the basis of the most comprehensive and accurate data available on Alaskan air service, and we note again that we have consulted closely with our Alaska Field Representative and with the Alaska Transportation Commission to develop information and to reinforce the validity of our observations as fully as possible. Should better information be brought to our attention, we are prepared to amend our determinations.7/

CURRENT SERVICE

The vast majority of the points in Alaska receive essential service as defined in this order. Nevertheless, some of the current service does not fulfill the essential air service requirement specified in this order. In most cases the service available may be able to meet the communities' essential needs with only minor adjustments, and without the need for seeking proposals. Rather than embark on the process of seeking proposals to provide essential air service, we believe that through informal consultations with the communities and air carriers we may be able to work out agreements by which service patterns can be adjusted to meet the communities' essential air service requirements. However, we will not begin this process until after the 60-day appeal period or after the appeal procedure has been concluded. Following that we intend to convene a series of informal meetings between members of our staff, the state, the affected communities and the carriers to see that essential service is provided. Should we determine that Section 419 subsidy funds are required, we will not hesitate to authorize such expenditure.

As a final matter, at several Alaskan points the essential air service requirements are being fulfilled by commuter carriers. We will soon conduct inquiries and evaluations to determine their fitness to provide essential air service. We will audit all aspects of each carrier's operations including its

7/ We just recently received a 205-page report prepared by Parker Associates for the Alaska State Legislature concerning air service to rural Alaska. At the time we received the report we had already completed our analysis. Because of the statutory deadline for the essential air service determinations, we are not able to fully reflect its findings at this time. However, we will carefully review it in the near future and if the report reveals any inadequacies in our determinations we will amend this order accordingly.

safety record, compliance with FAA regulations, reliability, and other aspects of its operations which affect its fitness, willingness and ability to provide essential air service. When we have finalized our proposed rulemaking on commuter fitness 8/ and completed our investigations we will issue an order with our findings.

ACCORDINGLY, based on the above discussion and evaluation, we make the following essential air service determinations:

1. We determine that essential air transportation at all Alaskan eligible communities would consist of at least the service outlined in Appendix A;

2. These determinations shall become effective on the service date of this order;

3. We establish a 60-day period following the service date of this order for interested persons to submit an appeal of this decision containing specific objections supported with relevant economic data, stating how the determination departs from our guidelines for essential air service determinations, and stating the level of essential service that should be designated;

4. We will serve a copy of this order upon the civic officials and airport managers at the communities listed in Appendix A; The Governor of Alaska; the Alaska Transportation Commission; the air carriers, commuter airlines and air taxis listed in Appendix E; and the Board's Alaskan regional office; and

5. We will review this determination within 24 months of the date of service of this order unless circumstances justify an earlier review, or a petition for modification of this finding is filed and granted.

GS 4.110: 98-443

Public Law 98-443
98th Congress

An Act

To amend the Federal Aviation Act of 1958 to terminate certain functions of the Civil Aeronautics Board, to transfer certain functions of the Board to the Secretary of Transportation, and for other purposes.

Oct. 4, 1984
[H.R. 5297]

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

Civil Aeronautics Board Sunset Act of 1984.

SHORT TITLE

SECTION 1. This Act may be cited as the "Civil Aeronautics Board Sunset Act of 1984".

49 USC app. 1301 note.

AMENDMENT OF FEDERAL AVIATION ACT OF 1958

SEC. 2. Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Federal Aviation Act of 1958 (49 U.S.C. 1301 et seq.).

49 USC app. 1301 note.

TERMINATION AND TRANSFER OF FUNCTIONS UNDER THE FEDERAL AVIATION ACT OF 1958

SEC. 3. (a) Section 1601(b)(1)(C) is amended by striking out "Justice" and inserting in lieu thereof "Transportation".

49 USC app. 1551.

(b) Section 1601(a)(3) is amended by inserting after "Act" the following: "(other than section 204)".

(c) Section 1601(a) is amended by adding at the end thereof the following:

Effective dates.

"(4) The following provisions of this Act (to the extent such provisions relate to interstate and overseas air transportation) and the authority of the Board with respect to such provisions (to the same extent) shall cease to be in effect on January 1, 1985:

"(A) Sections 401 (l) and (m) and 405 (b), (c), and (d) of this Act (except insofar as such sections apply to the transportation of mail between two points both of which are within the State of Alaska).

49 USC app. 1371, 1375.

"(B) Section 403 of this Act.

49 USC app. 1373.

"(C) Section 404 of this Act (except insofar as such section requires air carriers to provide safe and adequate service).

49 USC app. 1374.

"(5) The following provisions of this Act and the authority of the Board with respect to such provisions shall cease to be in effect on January 1, 1985:

"(A) Sections 407 (b) and (c) of this Act.

49 USC app. 1377.

"(B) Section 410 of this Act.

49 USC app. 1380.

"(C) Section 417 of this Act.

49 USC app. 1387.

"(D) Sections 1002 (d), (e), (g), (h), and (i) of this Act (except insofar as any of such sections relate to foreign air transportation).

49 USC app. 1482.

51-139 O - 84 (473)

PL 98-443 - CAB SUNSET

49 USC app. 1382.

49 USC app. 1384.

"(6) Sections 412 (a) and (b) of this Act (to the extent such sections relate to interstate and overseas air transportation) and section 414 of this Act (to the extent such section relates to orders made under sections 412 (a) and (b) with respect to interstate and overseas air transportation) and the authority of the Secretary of Transportation under such sections (to the same extent) shall cease to be in effect on January 1, 1989.

49 USC app. 1378, 1379, 1384.

"(7) Sections 408 and 409 of this Act and section 414 of this Act (relating to such sections 408 and 409) and the authority of the Secretary of Transportation under such sections (to the same extent) shall cease to be in effect on January 1, 1989.

Alaska, mail transportation. 49 USC app. 1371, 1375.

"(8) Sections 401 (l) and (m) and 405 (b), (c), and (d) of this Act (to the extent such sections apply to the transportation of mail between two points both of which are within the State of Alaska) shall cease to be in effect on January 1, 1989.".

Alaska, mail transportation. 49 USC app. 1551. Effective date.

(d) Section 1601(b)(1)(D) is amended by inserting after "transportation" the following: "(other than for the carriage of mails between any two point. both of which are within the State of Alaska)".

(e) Section 1601(b)(1) is amended by adding at the end thereof the following:

"(E) All authority of the Board under this Act which is not terminated under subsection (a) of this section on or before January 1, 1985, and is not otherwise transferred under this subsection is transferred to the Department of Transportation.".

Alaska, mail transportation. Effective date.

(f) Section 1601(b) is amended by adding at the end thereof the following:

"(3) The authority of the Secretary of Transportation under this Act with respect to the determination of the rates for the carriage of mails between any two points both of which are within the State of Alaska is transferred to the Postal Service and such authority shall be exercised through negotiations or competitive bidding. The transfer of authority under this paragraph shall take effect on January 1, 1989.".

TRANSFERS OF FUNCTIONS UNDER OTHER LAWS

49 USC app. 1553.

SEC. 4. (a) There are hereby transferred to and vested in the Secretary of Transportation all functions, powers, and duties of the Civil Aeronautics Board under the following provisions of law:

(1) The International Air Transportation Fair Competitive Practices Act of 1974 (49 U.S.C. 1159b).

49 USC app. 1159b.

(2) The International Aviation Facilities Act (49 U.S.C. 1151-1160).

49 USC app. 1151 note.

(3) The Animal Welfare Act (7 U.S.C. 2131 et seq.).

(4) Section 11 of the Clayton Act (15 U.S.C. 21).

(5) Sections 108(a)(4), 621(b)(5), 704(a)(5), and 814(b)(5) of the Consumer Credit Protection Act (15 U.S.C. 1607(a)(4), 1681s(b)(5), 1691c(a)(5), and 1692l(b)(5)).

15 USC 1692l.

(6) Section 382 of the Energy Policy and Conservation Act (89 Stat. 939, 42 U.S.C. 6362).

(7) Section 401 of the Federal Election Campaign Act of 1971 (2 U.S.C. 451).

Alaska, mail transportation.

(8) Section 5402 of title 39, United States Code (to the extent such section relates to foreign air transportation and to air transportation between any two points both of which are within the State of Alaska).

(9) Sections 4746 and 9746 of title 10, United States Code.

(10) Section 3 of the Act entitled "An Act to encourage travel in the United States, and for other purposes" (16 U.S.C. 18b).

Effect

(b) The transfer of any authority under subsection (a) of this section shall take effect on January 1, 1985.

Alaska transp Effect

(c) The authority of the Secretary of Transportation under section 5402 of title 39, United States Code, with respect to air transportation between any two points both of which are within the State of Alaska shall cease to be in effect on January 1, 1989.

COLLECTION OF DATA

SEC. 5. (a) Section 329(b)(1) of title 49, United States Code, is amended to read as follows:

"(1) collect and disseminate information on civil aeronautics (other than that collected and disseminated by the National Transportation Safety Board under title VII of the Federal Aviation Act of 1958 (49 U.S.C. 1441 et seq.)) including, at a minimum, information on (A) the origin and destination of passengers in interstate and overseas air transportation (as those terms are used in such Act), and (B) the number of passengers traveling by air between any two points in interstate and overseas air transportation; except that in no case shall the Secretary require an air carrier to provide information on the number of passengers or the amount of cargo on a specific flight if the flight and the flight number under which such flight operates are used solely for interstate or overseas air transportation and are not used for providing essential air transportation under section 419 of the Federal Aviation Act of 1958;".

49 US

(b) The amendment made by this section shall take effect on January 1, 1985.

Effect 49 US

REPORTS

49 US note.

SEC. 6. (a) The Secretary of Transportation shall submit a report to the appropriate committees of Congress not later than July 1, 1987, listing (1) transactions submitted to the Secretary for approval under section 408 of the Federal Aviation Act of 1958, (2) interlocking relations submitted to the Secretary for approval under section 409 of such Act, and (3) the types of agreements filed with the Secretary of Transportation under section 412 of such Act, and, with respect to such transactions, interlocking relationships, and agreements, those that have been exempted from the operation of the antitrust laws under section 414 of such Act. The Secretary shall recommend whether the authority under such sections 408, 409, 412, and 414 should be retained or repealed with respect to interstate and overseas air transportation and with respect to foreign air transportation.

49 US 1378.

49 US 1379.

49 US 1382.

49 US 1384.

(b) The Secretary of Transportation and the Postmaster General shall each submit a report to the appropriate committees of Congress not later than July 1, 1987, describing how the Secretary and the Postmaster General have administered their respective authorities to establish rates for the air transportation of mail and setting forth the recommendations of the Secretary and the Postmaster General as to whether the authority to establish rates for the transportation of mail between points within the State of Alaska should continue to be carried out by the Secretary by regulatory ratemaking or by the Postal Service through negotiations or competitive bidding.

INCORPORATION BY REFERENCE

49 USC app. 1381.

SEC. 7. (a) Section 411 of the Federal Aviation Act of 1958 is amended by inserting "(a)" after "SEC. 411." and by adding at the end thereof the following new subsection:

"INCORPORATION BY REFERENCE

"(b) Any air carrier may incorporate by reference in any ticket or other written instrument any of the terms of the contract of carriage in interstate and overseas air transportation, to the extent such incorporation by reference is in accordance with regulations issued by the Board.".

(b) Section 411 of the Federal Aviation Act of 1958 is amended by inserting before subsection (a) (as designated by subsection (a) of this section) the following subsection heading:

"INVESTIGATIONS".

(c) That portion of the table of contents contained in the first section of the Federal Aviation Act of 1958 which appears under the center heading

"TITLE IV—AIR CARRIER ECONOMIC REGULATION"

is amended by striking out

"Sec. 411. Methods of competition.".

and inserting in lieu thereof

"Sec. 411. Methods of competition.
"(a) Investigations.
"(b) Incorporation by reference.".

REFERENCES TO CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY

49 USC app. 1371 note.

SEC. 8. Any reference in any law to a certificate of public convenience and necessity, or to a certificate of convenience and necessity, issued by the Civil Aeronautics Board shall be deemed to refer to a certificate issued under section 401 or 418 of the Federal Aviation Act of 1958.

MISCELLANEOUS AMENDMENTS

49 USC app. 1371, 1388.

49 USC app. 1301.

SEC. 9. (a)(1) Section 101(11) is amended to read as follows:

"(11) 'All-cargo air service' means the carriage by aircraft in interstate or overseas air transportation of only property or mail, or both.".

49 USC app. 1388.

(2) Section 418(b)(3) is repealed.

49 USC app. 1537.

(b) Section 1307(a) is amended by striking out ", after consultation with the Civil Aeronautics Board,".

49 USC app. 1159a.

(c) Section 11 of the International Aviation Facilities Act (49 U.S.C. 1159a) is amended in the second sentence by striking out "and the Civil Aeronautics Board" and by striking out "in collaboration with the Civil Aeronautics Board" and inserting in lieu thereof "in collaboration with the Secretary of Transportation".

49 USC app. 1159b.

(d) Section 2 of the International Air Transportation Fair Competitive Practices Act of 1974 (49 U.S.C. 1159b) is amended by—

(1) striking out "the Civil Aeronautics Board," in subsection (a);

(2) striking out "Civil Aeronautics Board" and "Board" each time they appear in subsection (b) and the first sentence of subsection (d) and inserting in lieu thereof "Secretary of Transportation" and "Secretary", respectively;

(3) striking out "and the Department of Transportation" in subsection (b)(2); and

(4) striking out the last sentence in subsection (d) and inserting in lieu thereof the following: "The Secretaries of State and Treasury shall furnish to the Secretary of Transportation such information as may be necessary to prepare the report required by this subsection.".

(e) Section 5314 of title 5, United States Code, is amended by striking out "Chairman, Civil Aeronautics Board.". Section 5315 of title 5, United States Code, is amended by striking out "Members, Civil Aeronautics Board.".

(f) Section 3726(b)(1) of title 31, United States Code, is amended by striking out "Civil Aeronautics Board" and inserting in lieu thereof "Secretary of Transportation with respect to foreign air transportation (as defined in the Federal Aviation Act of 1958)".

49 US note.

(g)(1) Sections 3401 (b) and (c) of title 39, United States Code, are each amended by striking out "Civil Aeronautics Board" and inserting in lieu thereof "Secretary of Transportation".

(2) Section 5005(b)(3) of title 39, United States Code, is amended by striking out "Civil Aeronautics Board" and inserting in lieu thereof "Secretary of Transportation if for the carriage of mail in foreign air transportation (as defined in section 101 of the Federal Aviation Act of 1958)".

49 US 1301.

(3) Section 5401(b) of title 39, United States Code, is amended by striking out "Civil Aeronautics Board" and inserting in lieu thereof "Secretary of Transportation".

(4) Section 5402 of title 39, United States Code, is amended—

(A) by striking out "Civil Aeronautics Board" each place it appears and inserting in lieu thereof "Secretary of Transportation";

(B) in the first sentence of subsection (a), by inserting "in foreign air transportation" after "points";

(C) in the second sentence of subsection (a), by striking out "10 percent of the domestic mail transported under any such contract or";

(D) in the first sentence of subsection (b), by inserting "in foreign air transportation" after "points";

(E) in the first sentence of subsection (c), by inserting "in foreign air transportation" after "points"; and

(F) by adding at the end thereof the following new subsections:

"(d) The Postal Service may contract with any air carrier for the transportation of mail by aircraft in interstate and overseas air transportation either through negotiations or competitive bidding.

"(e) For purposes of this section, the terms 'air carrier', 'interstate air transportation', 'overseas air transportation', and 'foreign air transportation' have the meanings given such terms in section 101 of the Federal Aviation Act of 1958 (49 U.S.C. 1301).

"(f) During the period beginning January 1, 1985, and ending January 1, 1989, the authority of the Secretary of Transportation and the Postal Service under subsections (a), (b), and (c) of this section shall also apply, and the authority of the Postal Service under subsection (d) shall not apply, to the transportation of mail by

Effect.

aircraft between any two points both of which are within the State of Alaska and between which the air carrier is authorized by the Secretary to engage in the transportation of mail.".

(h) Section 3502(10) of title 44, United States Code, is amended by striking out "the Civil Aeronautics Board,".

(i) Section 15(a) of the Animal Welfare Act (7 U.S.C. 2145(a)) is amended by striking out "the Civil Aeronautics Board" and inserting in lieu thereof "the Secretary of Transportation".

(j) Section 203(j) of the Agricultural Marketing Act of 1946 (7 U.S.C. 1622(j)) is amended by striking out "the Civil Aeronautics Board".

(k) Sections 4746 and 9746 of title 10, United States Code, are each amended by striking out "Civil Aeronautics Board" and inserting in lieu thereof "Secretary of Transportation".

(l) Section 7 of the Clayton Act (15 U.S.C. 18) is amended in the final paragraph by striking out "Civil Aeronautics Board" and inserting in lieu thereof "Secretary of Transportation" and by striking out "Commission, Secretary, or Board" and inserting in lieu thereof "Commission or Secretary".

(m) Section 11 of the Clayton Act (15 U.S.C. 21) is amended—

(1) in subsection (a), by striking out "Civil Aeronautics Board" and inserting in lieu thereof "Secretary of Transportation" and by striking out "Civil Aeronautics Act of 1938" and inserting in lieu thereof "Federal Aviation Act of 1958";

(2) in subsection (b), by striking out "Commission or Board" each place it appears and inserting in lieu thereof "Commission, Board, or Secretary"; and

(3) by striking out "commission or board" each place it appears in such section and inserting in lieu thereof "commission, board, or Secretary".

(n) The Consumer Credit Protection Act (15 U.S.C. 1601 et seq.) is amended by striking out "Civil Aeronautics Board" and inserting in lieu thereof "Secretary of Transportation" each place it appears in section 108(a)(4) (15 U.S.C. 1607(a)(4)), section 621(b)(5) (15 U.S.C. 1681s(b)(5)), section 704(a)(5) (15 U.S.C. 1691c(a)(5)), and section 814(b)(5) (15 U.S.C. 1692l(b)(5)).

(o) Section 3 of the Act entitled "An Act to encourage travel in the United States, and for other purposes" (16 U.S.C. 18b; 54 Stat. 773), is amended by striking out "the Civil Aeronautics Authority,".

5 USC 47. (p) Section 47(a)(7)(C) of the Internal Revenue Code of 1954 is amended by striking out "Civil Aeronautics Board" and inserting in lieu thereof "Secretary of Transportation".

5 USC 7701. (q) Section 7701(a)(33)(E) of the Internal Revenue Code of 1954 is amended by striking out "Civil Aeronautics Board" and inserting in lieu thereof "Secretary of Transportation".

9 USC app. 389. (r) Section 419(c)(1) is amended by striking out "416(b)(3)" and inserting in lieu thereof "416(b)(4)".

5 USC app. 382. (s) Section 412(c)(2) is amended by striking out "subsection (c) of this section" and inserting in lieu thereof "subsection (a) of this section".

9 USC app. 377. (t) Section 407(e) is amended by striking out the first sentence and inserting in lieu thereof the following: "The Board shall have access to all lands, buildings, and equipment of any air carrier or foreign air carrier when necessary for a determination under section 401, 402, 418, or 419 of this title that such carrier is fit, willing, and able. The Board shall at all times have access to all accounts, records, and memorandums, including all documents, papers, and correspondence, now or hereafter existing, and kept or required to be kept by air carriers, foreign air carriers, or ticket agents. The Board may employ special agents or auditors, who shall have authority under the orders of the Board to inspect and examine lands, buildings, equipment, accounts, records, and memorandums to which the Board has access under this subsection.".

49 USC app. 1371, 1372, 1388, 1389.

(u) Section 105(a)(1) is amended by striking out "interstate air transportation" and inserting in lieu thereof "air transportation".

49 USC app. 1305.

(v) The amendments made by this section shall take effect on January 1, 1985.

Effective date 5 USC 5314 n

TRANSFER AND ALLOCATIONS OF APPROPRIATIONS AND PERSONNEL

SEC. 10. (a) The personnel (including members of the Senior Executive Service) employed in connection with, and the assets, liabilities, contracts, property, records, and unexpended balances of appropriations, authorizations, allocations, and other funds employed, held, used, arising from, available to or to be made available in connection with, any function transferred by section 1601(b) of the Federal Aviation Act of 1958 or section 4 of this Act, subject to section 1531 of title 31, United States Code, shall be transferred to the head of the agency to which such function is transferred for appropriate allocation. Personnel employed in connection with functions so transferred, or transferred in accordance with any other lawful authority, shall be transferred in accordance with any applicable laws and regulations relating to transfer of functions. Unexpended funds transferred pursuant to this subsection shall only be used for the purpose for which the funds were originally authorized and appropriated.

49 USC app. 1554.

49 USC app. 1551.

(b) In order to facilitate the transfers made by section 1601(b) of the Federal Aviation Act of 1958 and section 4 of this Act, the Director of the Office of Management and Budget is authorized and directed, in consultation with the Civil Aeronautics Board and the heads of the agencies to which functions are so transferred, to make such determinations as may be necessary with regard to the functions so transferred, and to make such additional incidental dispositions of personnel, assets, liabilities, contracts, property, records, and unexpended balances of appropriations, authorizations, allocations, and other funds held, used, arising from, available to, or to be made available in connection with, such functions, as may be necessary to resolve disputes between the Civil Aeronautics Board and the agencies to which functions are transferred by section 1601(b) of the Federal Aviation Act of 1958 and section 4 of this Act.

(c) The Chairman of the Civil Aeronautics Board and the Secretary of Transportation shall, beginning as soon as practicable after the date of enactment of this Act, jointly plan for the orderly transfer of functions and personnel pursuant to section 1601(b) of the Federal Aviation Act of 1958 and section 4 of this Act.

EFFECT ON PERSONNEL

SEC. 11. (a) Employees covered by the merit pay system under chapter 54 of title 5, United States Code, who are transferred under section 10 of this Act to another agency shall have their rate of basic pay adjusted in accordance with section 5402 of such title. With respect to the evaluation period during which such an employee is transferred, merit pay determinations for that employee shall be

49 USC app. 1555. 5 USC 5401 et seq. 5 USC 5402.

5 USC 5402.

based on the factors in section 5402(b)(2) of such title as appraised in performance appraisals administered by the Civil Aeronautics Board in accordance with chapter 43 of title 5, United States Code, in addition to those administered by the agency to which the employee is transferred.

5 USC 3301 *et seq.*

(b) With the consent of the Civil Aeronautics Board, the head of each agency to which functions are transferred by section 1601(b) of the Federal Aviation Act of 1958 or section 4 of this Act is authorized to use the services of such officers, employees, and other personnel of the Board for such period of time as may reasonably be needed to facilitate the orderly transfer of such functions.

49 USC app. 1551.

SAVINGS PROVISIONS

49 USC app. 1556.

SEC. 12. (a) All orders, determinations, rules, regulations, permits, contracts, certificates, licenses, and privileges—

(1) which have been issued, made, granted, or allowed to become effective by the President, any agency or official thereof, or by a court of competent jurisdiction, in the performance of any function which is transferred by section 1601(b) of the Federal Aviation Act of 1958 or section 4 of this Act from the Civil Aeronautics Board to another agency, and

(2) which are in effect on December 31, 1984,

shall continue in effect according to their terms until modified, terminated, superseded, set aside, or revoked in accordance with law by the head of the agency to which such function is transferred, or other authorized officials, a court of competent jurisdiction, or by operation of law.

(b) The transfers of functions made by section 1601(b) of the Federal Aviation Act of 1958 and section 4 of this Act shall not affect any proceedings or any application for any license, permit, certificate, or financial assistance pending at the time such transfers take effect before the Civil Aeronautics Board; but such proceedings and applications, to the extent that they relate to functions so transferred, shall be continued. Orders shall be issued in such proceedings, appeals shall be taken therefrom, and payments shall be made pursuant to such orders, as if such sections 1601(b) and 4 had not been enacted; and orders issued in any such proceedings shall continue in effect until modified, terminated, superseded, or revoked by a duly authorized official, by a court of competent jurisdiction, or by operation of law. Nothing in this subsection shall be deemed to prohibit the discontinuance or modification of any such proceeding under the same terms and conditions and to the same extent that such proceeding could have been discontinued or modified if such sections 1601(b) and 4 had not been enacted.

(c) Except as provided in subsection (e)—

(1) the transfer of any function under section 1601(b) of the Federal Aviation Act of 1958 or section 4 of this Act shall not affect any suit relating to such function which is commenced prior to the date the transfer takes effect, and

(2) in all such suits, proceedings shall be had, appeals taken, and judgments rendered in the same manner and effect as if section 1601(b) of the Federal Aviation Act of 1958 and section 4 of this Act had not been enacted.

(d) No suit, action, or other proceeding commenced by or against any officer in his official capacity as an officer of the Civil Aeronautics Board shall abate by reason of the transfer of any function under section 1601(b) of the Federal Aviation Act of 1958 or section 4 of this Act. No cause of action by or against the Civil Aeronautics Board, or by or against any officer thereof in his official capacity shall abate by reason of the transfer of any function under section 1601(b) of the Federal Aviation Act of 1958 or section 4 of this Act.

49 USC app. 1551.

(e) If, before January 1, 1985, the Civil Aeronautics Board, or officer thereof in his official capacity, is a party to a suit relating to a function transferred by section 1601(b) of the Federal Aviation Act of 1958 or section 4 of this Act, then such suit shall be continued with the head of the Federal agency to which the function is transferred.

(f) With respect to any function transferred to another agency by section 1601(b) of the Federal Aviation Act of 1958 or by section 4 of this Act and exercised after the effective date of such transfer, reference in any Federal law (other than title XVI of the Federal Aviation Act of 1958) to the Civil Aeronautics Board or the Board (insofar as such term refers to the Civil Aeronautics Board), or to any officer or office of the Civil Aeronautics Board, shall be deemed to refer to that agency, or other official or component of the agency, in which such function vests.

49 USC app. 1551.

(g) In the exercise of any function transferred under section 1601(b) of the Federal Aviation Act of 1958 or section 4 of this Act, the head of the agency to which such function is transferred shall have the same authority as that vested in the Civil Aeronautics Board with respect to such function, immediately preceding its transfer, and actions of the head of such agency in exercising such function shall have the same force and effect as when exercised by the Civil Aeronautics Board.

(h) In exercising any function transferred by section 1601(b) of the Federal Aviation Act of 1958 or section 4 of this Act, the head of the agency to which such function is transferred shall give full consideration to the need for operational continuity of the function transferred.

DEFINITIONS

49 USC app. 1557.

SEC. 13. For purposes of this Act—

(1) the term "agency" has the same meaning such term has in section 551(1) of title 5, United States Code; and

(2) the term "function" means a function, power, or duty.

ACCESS FOR HANDICAPPED PERSONS

49 USC app. 1301.

SEC. 14. Section 104 is amended by adding at the end thereof the following new sentence: "In the furtherance of such right, the Board or the Secretary, as the case may be, shall consult with the Architectural and Transportation Barriers Compliance Board established under section 502 of the Rehabilitation Act of 1973, prior to issuing or amending any order, rule, regulation, or procedure that will have a significant impact on the accessibility of commercial airports or commercial air transportation for handicapped persons.".

29 USC 792.

STUDY OF TRANSPORTATION TO AND FROM WASHINGTON DULLES AIRPORT

49 USC note.

SEC. 15. (a) The Secretary of Transportation shall study the feasibility of constructing a rail rapid transit line between the West Falls Church, Virginia, station of the Washington, District of Columbia

metrorail system and Dulles International Airport in Virginia. The study shall include, but need not be limited to, a study of the feasibility of heavy rail, light rail, monorail, magnetic levitation systems, and any other appropriate transportation systems. The Secretary shall study the feasibility of each such system with and without intermediate stops.

(b) The Secretary shall complete the study required by subsection (a) and transmit the results thereof to Congress not later than one year after the date of enactment of this Act.

AIR SERVICE IN THE STATE OF ALASKA

pp. 1389 SEC. 16. (a)(1) Notwithstanding any other provision of law, with respect to air transportation to each of the points in Alaska listed in paragraph (4), essential air transportation for purposes of section pp. 419 of the Federal Aviation Act of 1958 shall neither be specified at a level of service nor operated with aircraft of lesser seating and cargo capacity than provided for in CAB Order 80-1-167 and its Appendices unless otherwise specified under an agreement between the Department of Transportation and the State of Alaska, after date. consultation with the community affected. This paragraph shall cease to be in effect on January 1, 1987.

(2) Notwithstanding any other provision of law, the total amount of compensation which may be paid under section 419 of the Federal Aviation Act of 1958 with respect to the points in Alaska listed in paragraph (4) shall not exceed $3,572,778 for each of the fiscal years 1985 and 1986 and shall not exceed $893,195 for service provided during the period beginning October 1, 1986, and ending at the close of December 31, 1986.

(3) The Secretary of Transportation shall study the feasibility of providing essential air transportation to each of the points in Alaska listed in paragraph (4) with aircraft having a smaller capacity than that required by paragraph (1), the level of compensation which would be required under section 419 of the Federal Aviation Act of 1958 for such transportation, and the impact of using such aircraft on the air transportation system in Alaska. The Secretary shall complete such study and submit a report of the results of such study to Congress not later than January 1, 1986.

(4) The points in Alaska referred to in paragraphs (1), (2), and (3) are Cordova, Yakutak, Gustavus, Petersburg, and Wrangell.

(b) Notwithstanding any other provision of law, no part of the order of the Civil Aeronautics Board in CAB docket number 38961 (CAB Order 84-6-77) shall enter into effect until after December 31, 1984. Effective date.

Approved October 4, 1984.

LEGISLATIVE HISTORY—H.R. 5297:

HOUSE REPORTS: No. 98-793 (Comm. on Public Works and Transportation) and No. 98-1025 (Comm. of Conference).

CONGRESSIONAL RECORD, Vol. 130 (1984):
June 5, considered and passed House.
Aug. 8, considered and passed Senate, amended.
Sept. 19, House agreed to conference report.

98TH CONGRESS
2d Session

HOUSE OF REPRESENTATIVES

REPORT
98-1025

CIVIL AERONAUTICS BOARD SUNSET ACT OF 1984

SEPTEMBER 14, 1984.—Ordered to be printed

Mr. MINETA, from the committee of conference, submitted the following

CONFERENCE REPORT

[To accompany H.R. 5297]

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 5297) to amend the Federal Aviation Act of 1958 to terminate certain functions of the Civil Aeronautics Board, to transfer certain functions of the Board to the Secretary of Transportation, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

SHORT TITLE

SECTION 1. This Act may be cited as the "Civil Aeronautics Board Sunset Act of 1984".

AMENDMENT OF FEDERAL AVIATION ACT OF 1958

SEC. 2. Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Federal Aviation Act of 1958 (49 U.S.C. 1301 et seq.).

31-006 O

CONFERENCE REPORT - CAB SUNSET

Falls Church, Virginia, station of the Washington, D.C. metrorail system and Dulles International Airport in Virginia. The study shall include, but need not be limited to, a study of the feasibility of heavy rail, light rail, monorail, magnetic levitation systems, and any other appropriate transportation systems. The Secretary shall study the feasibility of each such system with and without intermediate stops.

(b) The Secretary shall complete the study required by subsection (a) and transmit the results thereof to Congress not later than one year after the date of enactment of this Act.

AIR SERVICE IN THE STATE OF ALASKA

SEC. 16. (a)(1) Notwithstanding any other provision of law, with respect to air transportation to each of the points in Alaska listed in paragraph (4), essential air transportation for purposes of section 419 of the Federal Aviation Act of 1958 shall neither be specified at a level of service nor operated with aircraft of lesser seating and cargo capacity than provided for in CAB Order 80-1-167 and its Appendices unless otherwise specified under an agreement between the Department of Transportation and the State of Alaska, after consultation with the community affected. This paragraph shall cease to be in effect on January 1, 1987.

(2) Notwithstanding any other provision of law, the total amount of compensation which may be paid under section 419 of the Federal Aviation Act of 1958 with respect to the points in Alaska listed in paragraph (4) shall not exceed $3,572,778 for each of the fiscal years 1985 and 1986 and shall not exceed $893,195 for service provided during the period beginning October 1, 1986, and ending at the close of December 31, 1986.

(3) The Secretary of Transportation shall study the feasibility of providing essential air transportation to each of the points in Alaska listed in paragraph (4) with aircraft having a smaller capacity than that required by paragraph (1), the level of compensation which would be required under section 419 of the Federal Aviation Act of 1958 for such transportation, and the impact of using such aircraft on the air transportation system in Alaska. The Secretary shall complete such study and submit a report of the results of such study to Congress not later than January 1, 1986.

(4) The points in Alaska referred to in paragraphs (1), (2), and (3) are Cordova, Yakutak, Gustavus, Petersberg, and Wrangell.

(b) Notwithstanding any other provision of law, no part of the order of the Civil Aeronautics Board in CAB docket number 38961 (CAB Order 84-6-77) shall enter into effect until after December 31, 1984.

And the Senate agree to the same.

NORMAN Y. MINETA,
GLENN M. ANDERSON,
ROBERT A. ROE,
GENE SNYDER,
JOHN PAUL HAMMERSCHMIDT,
Managers on the Part of the House.

cargo air service between any pair of points both of which are within the State of Alaska or the State of Hawaii.

(4) If any all-cargo air service authorized by a certificate issued under this subsection is not performed to the minimum extent prescribed by the Board, it may by order, entered after notice and opportunity for a hearing, direct that such certificate shall, thereafter, cease to be effective to the extent of such service.

EXEMPTIONS

(c) Any applicant who is issued a certificate under this section shall, with respect to any all-cargo air service provided in accordance with such certificate, be exempt from the requirements of section 401(a) of this Act, and any other section of this Act which the Board by rule determines appropriate, and any rule, regulation, or procedure issued pursuant to any such section.

AIR CARRIER STATUS

(d) Any applicant who is issued a certificate under this section shall be an air carrier for the purposes of this Act, except to the extent such carrier is exempt from any requirement of the Act pursuant to this section.

SMALL COMMUNITY AIR SERVICE

GUARANTEED ESSENTIAL AIR TRANSPORTATION

SEC. 419. (a)(1) For purposes of this subsection, the term "eligible point" means any point in the United States to which, on the date of enactment of this section, any air carrier—

(A) is providing service pursuant to a certificate issued to such carrier under section 401 of this title; or

(B) is authorized pursuant to such certificate to provide such service, but such service is suspended on such date of enactment.

(2)(A) With respect to each eligible point which on the date of enactment of this section is served by not more than one air carrier holding a certificate issued under section 401 of this title, not later than the last day of the one-year period beginning on such date of enactment, the Board, after considering the views of any interested community and the State agency of the State in which such community is located, shall determine what is essential air transportation for such point.

(B) With respect to any eligible point which on the date of enactment of this section is served by more than one air carrier holding a certificate issued under section 401 of this title and which thereafter receives service by not more than one such air carrier, not later than the last day of the six-month period beginning on the date on which the Board receives notice that service to such point will be provided by not more than one such air carrier, the Board, after considering the views of any interested community and the State agency of the State in which such community is located, shall determine what is essential air transportation to such point.

(C) The Board shall periodically review the determination of what is essential air transportation to each eligible point, and may,

based upon such review and consultations with any interested community and the State agency of the State in which such community is located, make appropriate adjustments as to what is essential air transportation to such point.

(3) No air carrier shall terminate, suspend, or reduce air transportation to any eligible point below the level of essential air transportation established by the Board under paragraph (2) unless such air carrier—

(A) if such air carrier—

(i) holds a certificate issued under section 401 of this title, or

(ii) does not hold such a certificate, but is receiving compensation pursuant to paragraph (5) of this subsection for service to such eligible point,

has given the Board, the appropriate State agency or agencies, and the communities affected at least ninety days notice prior to such termination, suspension, or reduction; and

(B) if such air carrier does not hold such a certificate and is not receiving compensation pursuant to paragraph (5) of this subsection for service to such eligible point, has given the Board, the appropriate State agency or agencies, and the communities affected at least thirty days notice prior to such termination, suspension, or reduction.

(4) Whenever the Board determines that essential air transportation will not be provided to any eligible point without compensation—

(A) the Board shall provide notice that applications may be submitted by any air carrier which is willing to provide essential air transportation to such point for compensation under this subsection. In selecting an applicant to provide essential air transportation to such point for compensation the Board shall, among other factors, specifically consider—

(i) the desirability of developing an integrated linear system of air transportation whenever such a system most adequately meets the air transportation needs of the communities involved;

(ii) the experience of the applicant in providing scheduled air service in the vicinity of the communities for which essential air transportation is proposed to be provided; and

(iii) notwithstanding the provisions of clause (ii), with respect to any eligible point in the State of Alaska, the experience of an applicant in providing scheduled air service, or significant patterns of nonscheduled air service pursuant to an exemption granted pursuant to section 416 of this title, in Alaska; and

(B) the Board shall establish, in accordance with the guidelines promulgated under subsection (d) of this section, a rate of compensation to be paid for providing such essential air transportation.

(5) The Board shall make payments of compensation under this subsection at times and in a manner determined by the Board to be appropriate. The Board shall continue to pay compensation to any air carrier to provide essential air transportation to any eligible

point only for so long as the Board determines it is necessary in order to maintain essential air transportation to such eligible point.

(6) Notwithstanding section 401(j) of this title, if an air carrier has provided notice to the Board under paragraph (3) of such air carrier's intention to suspend, terminate, or reduce service to any eligible point below the level of essential air transportation to such point, and if at the conclusion of the applicable period of notice the Board has not been able to find another air carrier to provide essential air transportation to such point, the Board shall require the carrier which provided such notice to continue such service to such point for an additional 30-day period, or until another air carrier has begun to provide essential air transportation to such point, whichever first occurs. If at the end of such 30-day period the Board determines that no other air carrier can be secured to provide essential air transportation to such eligible point on a continuing basis, either with or without compensation, then the Board shall extend such requirement for such additional 30-day periods (making the same determination at the end of each such period) as may be necessary to continue air transportation to such eligible point until an air carrier can be secured to provide essential air transportation to such eligible point on a continuing basis.

(7)(A) If any air carrier (i) which is providing air transportation to any eligible point, and (ii) which is receiving compensation under this subsection or under section 406 of this title for providing such air transportation to such point, is required by the Board to continue service to such point beyond the date on which such air carrier would, but for paragraph (6) of this subsection, be able to suspend, terminate, or reduce service to such point below the level of essential air transportation to such point, then after such date such air carrier shall continue to receive such compensation until the Board finds another air carrier to provide essential air transportation to such point.

(B) If the Board requires an air carrier which holds a certificate issued under section 401 of this title and which is providing air transportation to any eligible point without compensation pursuant to paragraph (5) of this subsection or section 406 of this title to continue to provide essential air transportation to such point beyond the 90-day notice period after which, but for paragraph (6) of this subsection, such air carrier would be able to suspend, terminate, or reduce service to such point below essential air transportation for such point, then the Board shall compensate such air carrier for any losses that the air carrier incurs in complying with this subparagraph after the last day of such 90-day period, except that the Board shall not make any payments under this subparagraph, to any truck air carrier for service to such point after the last day of the one-year period beginning on the date on which any payment is made to such air carrier under this subparagraph for service to such point.

(C) If the Board requires an air carrier which does not hold a certificate issued under section 401 of this title, but which is providing air transportation to any eligible point without compensation pursuant to paragraph (5) of this subsection or section 406 of this title to continue to provide essential air transportation to such point

beyond the 30-day notice period after which, but for paragraph (6) of this subsection, such air carrier would be able to suspend, terminate, or reduce service to such point below essential air transportation for such point, then the Board shall compensate such air carrier for any losses that such air carrier incurs in complying with this paragraph after the last day of such 30-day period.

(9) During any period for which the Board requires any air carrier to continue providing air transportation to an eligible point which such air carrier has proposed to terminate, reduce, or suspend, the Board shall continue to make every effort to secure an air carrier to provide at least essential air transportation to such eligible point, on a continuing basis.

(10) Unless the Board has determined what is essential air transportation for any eligible point pursuant to paragraph (2) of this subsection, the Board shall, upon petition of any appropriate representative of such point, prohibit any termination, suspension, or reduction of air transportation which reasonably appears to deprive such point of essential air transportation, until the Board has completed such determination.

(11)(A) After January 1, 1983, any air carrier may file an application with the Board seeking to have any compensation provided under section 406 of this title to the air carrier then serving an eligible point terminated in order to allow the applicant air carrier to provide air transportation to that eligible point for compensation under this section. The Board shall grant such application, after notice and a hearing if requested by the air carrier receiving subsidy under section 406, taking into consideration the objectives specified in subparagraphs (A) (i) and (ii) of paragraph (5) of this subsection, if the applicant can show that termination of the compensation being paid under section 406, and that the provision of service by such applicant with compensation under this section, will result in a substantial—

(i) improvement in the air service being provided such eligible point; and

(ii) decrease in the amount of compensation that will be required to continue essential air transportation to such eligible point.

(B) After January 1, 1983, any air carrier may file an application with the Board seeking to have the compensation provided under this section to the air carrier then serving an eligible point, and which has been serving such eligible point for at least two years preceding the date on which such application is filed, terminated in order to allow the applicant air carrier to provide essential air transportation to such eligible point for compensation under this section. The Board shall grant such application, after notice and a hearing if requested by an air carrier receiving compensation under this section, taking into consideration the objectives specified in subparagraphs (A) (i) and (ii) of paragraph (4) of this subsection, if the applicant air carrier can show that termination of the compensation being provided to the air carrier then serving such eligible point, and the provision of essential air transportation for compensation under this section by the applicant air carrier will result in a substantial—

(i) improvement in the air transportation being provided such eligible point with no increase in the amount of compensation then being paid; or

(ii) decrease in the amount of compensation that will be required to continue essential air transportation to that eligible point.

(C) In disposing of each application filed under this subsection, the Board shall, in addition to considering the objectives specified in subparagraphs (A) (i) and (ii) of paragraph (4), solicit and give great weight to the opinions of the communities affected by the proposed replacement of an air carrier under this subsection.

OTHER AIR SERVICE

(b)(1) For purposes of this subsection, the term "eligible point" means—

(A) any point in the United States which has been deleted from a certificate issued under section 401 of this title between July 1, 1968, and the date of enactment of this section, both dates inclusive, and which the Board designates pursuant to paragraph 2 of this subsection; and

(B) any other point in the State of Alaska or Hawaii designated by the Board under paragraph 2 of this subsection.

(2)(A) Not later than January 1, 1980, after considering the views of State agencies and other interested parties, the Board shall, by rule, establish objective criteria for designating points as eligible points. In establishing or modifying such criteria, the Board shall consider, among other factors, the level of traffic generated by the point concerned, its future traffic generating potential, the cost to the Federal Government of providing essential air transportation to such point, the alternative means of transportation available to the residents of such point for access to the national transportation system and its principal communities of interest, and the degree of isolation of such point from the national air transportation system. The Board may, from time to time, by rule, modify the criteria established by it under this subparagraph.

(B) Not later than January 1, 1980, the Board shall begin to review each point described in paragraph (1)(A) of this subsection to determine whether such point shall be designated as an eligible point under the criteria established under subparagraph (B) of this paragraph. The review and designation of each such point shall be completed before January 1, 1982.

(C) On or after January 1, 1982, the Board, upon application by any interested party, may designate any point an eligible point under the criteria established under subparagraph (B) of this paragraph (i) if such point is in the State of Alaska or the State of Hawaii, and (ii) if such designation would not increase the total number of points receiving a subsidy under this section and section 406 of this title above the total number of points receiving a subsidy under such section 406 on July 1, 1968.

(3) The designation of any point by the Board under paragraph (2) of this subsection as an eligible point may be withdrawn if the point no longer meets the criteria for designation as an eligible point.

(4)(A) With respect to any point which the Board designates as an eligible point pursuant to paragraph (2) of this subsection, not later than the last day of the six-month period beginning on the date on which the Board makes such designation, the Board, after considering the views of any interested community and the State agency of the State in which such community is located, shall determine what is essential air transportation to such point.

(B) The Board shall periodically review the determination of what is essential air transportation to each eligible point, and may, based upon such review and consultations with any interested community and any State agency of the State in which such community is located, make appropriate adjustments as to what is essential air transportation to such point.

(5) Whenever the Board determines that essential air transportation will not be provided to any eligible point without compensation—

(A) the Board shall provide notice that applications may be submitted by any air carrier which is willing to provide essential air transportation to such point for compensation under this subsection. In selecting an applicant to provide essential air transportation to such point for compensaton, the Board shall, among other factors, specifically consider—

(i) the desirability of developing an integrated linear system of air transportation whenever such a system most adequately meets the air transportation needs of the communities involved;

(ii) the experience of the applicant in providing scheduled air service in the vicinity of the communities for which essential air transportation is proposed to be provided; and

(iii) notwithstanding the provisions of clause (ii), with respect to any eligible point in the State of Alaska, the experience of an applicant in providing scheduled air service, or significant patterns of nonscheduled air service pursuant to an exemption granted pursuant to section 416 of this title, in Alaska; and

(B) the Board shall establish, in accordance with the guidelines promulgated under subsection (d) of this section, a rate of compensation to be paid for providing such essential air transportation.

(6) The Board shall make payments of compensation under this subsection at times and in a manner determined by the Board to be appropriate. The Board shall continue to pay compensation to any air carrier to provide essential air transportation to any eligible point only for so long as the Board determines it is necessary in order to maintain essential air transportation to such eligible point.

(7) Prior to terminating, suspending, or reducing essential air transportation to any eligible point, an air carrier—

(A) if such air carrier—

(i) holds a certificate issued under section 401 of this title, or

(ii) does not hold such a certificate, but is receiving compensation pursuant to paragraph (6) of this subsection for

service to such eligible point, shall give the Board, the appropriate State agency or agencies, and the communities affected at least ninety days notice prior to such termination, suspension, or reduction; and

(B) if such air carrier does not hold such a certificate and is not receiving compensation pursuant to paragraph (6) of this subsection for service to such eligible point, shall give the Board, the appropriate State agency or agencies, and the communities affected such notice (not to exceed 30 days), as the Board shall by regulation prescribe.

(8)(A) After January 1, 1983, any air carrier may file an application with the Board seeking to have the compensation provided under this subsection to the air carrier then serving an eligible point, and which has been serving such eligible point for at least 2 years preceding the date on which such application is filed, terminated in order to allow the applicant air carrier to provide essential air transportation to such eligible point for compensation under this subsection. The Board shall grant such application, after notice and a hearing if requested by an air carrier receiving compensation under this section, taking into consideration the objectives specified in subparagraphs (A) (i) and (ii) of paragraph (5) of this subsection, if the applicant can show that termination of the compensation being provided to the air carrier then serving such eligible point, and that the provision of essential air transportation for compensation under this subsection by the applicant, will result in a substantial—

(i) improvement in the air transportation being provided such eligible point with no increase in the amount of compensation then being paid; or

(ii) decrease in the amount of compensation that will be required to continue essential air transportation to that eligible point.

(B) In disposing of each application filed under this paragraph, the Board shall, in addition to considering the objectives specified in subparagraphs (A) (i) and (ii) of paragraph (5), solicit and give great weight to the opinions of the communities affected by the proposed replacement of an air carrier under this subsection.

LEVEL OF SAFETY

(c)(1) For purposes of this subsection the term "commuter air carrier" means an air carrier exempt from any requirement of this Act under section 416(b)(3) of this title.

(2) Notwithstanding section 416(b) of this title, the Board shall not provide any compensation under this section to any commuter air carrier to provide service to any eligible point, and the Board shall prohibit any commuter air carrier from providing service to any eligible point, unless the Board determines that such commuter air carrier—

(A) is fit, willing, and able to perform such service; and

(B) that all aircraft which will be used to perform such service and all operations relating to such service will conform to the safety standards established by the Administrator under paragraph (3) of the subsection.

(3) Not later than the one-hundred-eightieth day after the date of enactment of the paragraph, the Administrator, by regulation, shall establish safety standards (A) for aircraft being used by commuter air carriers to provide any service described in paragraph (2) of this subsection, and (B) for all operations relating to such service. Such saftey standards shall become effective not later than the last day of the eighteenth month which begins after such date of enactment and shall impose requirements upon such commuter air carriers to assure that the level of safety provided to persons traveling on such commuter air carriers is, to the maximum feasible extent, equivalent to the level of safety provided to persons traveling on air carriers which provide service pursuant to certificates issued under section 401 of this title.

GUIDELINES FOR COMPENSATION

(d) The Board shall, by rule, establish guidelines to be used by the Board in computing the fair and reasonable amount of compensation required to insure the continuation of essential air transportation to any eligible point. Such guidelines shall include expense elements based upon representative costs of air carriers providing scheduled air transportation of persons, property, and mail, using aircraft of the type determined by the Board to be appropriate for providing essential air transportation to the eligible point.

INSURANCE

(e) No air carrier shall receive any compensation under this section unless such air carrier complies with regulations or orders issued by the Board governing the filing and approval of policies of insurance or plans for self-insurance in the amount prescribed by the Board which are conditioned to pay, within the amount of such insurance, amounts for which such air carrier may become liable for bodily injuries to or the death of any person, or for loss of or damage to property of others, resulting from the operation or maintenance of aircraft.

DEFINITION

(f) For purposes of this section, the term "essential air transportation" means scheduled air transportation of persons to a point provided under such criteria as the Board determines satisfies the needs of the community concerned for air transportation to one or more communities of interest and insures access to the Nation's air transportation system, at rates, fares, and charges which are not unjust, unreasonable, unjustly discriminatory, unduly preferential, or unduly prejudicial, and—

(1) with respect to air transportation to any point (other than in the State of Alaska), in no case shall essential air transportation be specified as fewer than two daily round trips, 5 days per week, or the level of service provided by air carriers to such point based on the schedules of such air carriers in effect for calendar year 1977, whichever is less; and

(2) with respect to air transportation to any point in Alaska, essential air transportation shall not be specified at a level of

service less than that which existed for such point during calendar year 1976, or two round trips per week, whichever is greater, unless otherwise specified under an agreement between the Board and the State agency of the State of Alaska, after consultation with the community affected.

DURATION OF PROGRAM

(g) This section shall cease to be in effect after the last day of the ten-year period which begins on the date of enactment of this section.

TITLE V—NATIONALITY AND OWNERSHIP OF AIRCRAFT

REGISTRATION OF AIRCRAFT NATIONALITY

REGISTRATION REQUIRED

SEC. 501. (a) It shall be unlawful for any person to operate or navigate any aircraft eligible for registration if such aircraft is not registered by its owner as provided in this section, or (except as provided in section 1108 of this Act) to operate or navigate within the United States any aircraft not eligible for registration: *Provided,* That aircraft of the national-defense forces of the United States may be operated and navigated without being so registered if such aircraft are identified, by the agency having jurisdiction over them, in a manner satisfactory to the Administrator. The Administrator may, by regulation, permit the operation and navigation of aircraft without registration by the owner for such reasonable periods after transfer of ownership thereof as the Administrator may prescribe.

ELIGIBILITY FOR REGISTRATION

(b) An aircraft shall be eligible for registration if, but only if—

(1)(A) it is—

(i) owned by a citizen of the United States or by an individual citizen of a foreign country who has lawfully been admitted for permanent residence in the United States; or

(ii) owned by a corporation (other than a corporation which is a citizen of the United States) lawfully organized and doing business under the laws of the United States or any State thereof so long as such aircraft is based and primarily used in the United States; and

(B) it is not registered under the laws of any foreign country; or

(2) it is an aircraft of the Federal Government, or of a State, territory, or possession of the United States or the District of Columbia or a political subdivision thereof.

For purposes of this subsection, the Secretary of Transportation shall, by regulation, define the term "based and primarily used in the United States".

Times 1-3-85

Rural Alaskans may lose vital air service

by Curtis Swaney
Times Business Writer

Atka and St. George residents, who have no roads and no regularly-scheduled barge or passenger marine service, will have difficulty getting off their islands if the Reagan Administration kills a federal subsidy program that now guarantees air transportation to remote and rural areas throughout the country.

The plan for ending the Essential Air Service Program will be included in the administration's proposed fiscal 1986 budget for the Department of Transportation.

If the program is halted, government and industry officials estimate that 100 of the 135 communities nationwide now being served by subsidized carriers will lose all air transportation. Of the 230 cities in Alaska eligible for the subsidy, only 37 are now receiving it.

Residents of Atka, located near the end of the Aleutian Chain, said they would be isolated without subsidized air carrier service. The community of 100 people has no barge service or privately-owned aircraft to replace the loss of its subsidized carrier — Peninsula Airways — if Congress decides to sever subsidies.

Orin Seybert, owner of Peninsula Airways, said it would be impossible to serve Atka without federal subsidies.

To serve Atka, Seybert stations a plane and pilot at Adak, about 100 miles east of Atka. The air carrier, which receives $18,000 a month in federal subsidies to fly from Adak to Atka two weeks out of every month.

"Without subsidies, a person could pay as much as $2,500 to fly from Atka to Adak," Seybert said. In Adak, passengers board Reeve Aleutian planes to the Alaska mainland.

Navy tugs used to haul people and freight to Atka until 1977, Seybert said. When the service stopped, Atka residents went four months without supplies or communication with the outside world.

"It was a frightening experience," said Julie Dirks, village council administrator. "I think the thing that saved us was the people's subsistence lifestyle."

Dirks said the village council will lobby against the proposed cut in federal transportation subsidies.

At St. George in the Pribilofs, about 351 miles northeast of Atka, islanders share a similar plight. Without service by Peninsula Airways, which receives $7,000 a month in subsidies for St. George, the island's embryonic bottomfishing industry could collapse.

Rich Wilson, St. George city manager, said air service is essential in completing a new $13 million harbor.

"The airline flies in all the technicians and engineers we need to help us complete a commercial fishing harbor," Wilson said.

Until Oct. 14, 1983, the economic mainstay of the islands was the annual harvest of fur seals. When the government pulled out two years ago, Congress gave the St. George

See Rural, page C-7

Rural residents would be left stranded by program is cut

Continued from page C-1

residents $8 million and those on St. Paul got $12 million.

"We have a commitment now to get out on our own but we need regular air service to accomplish our goals," Wilson said.

St. George Mayor Max Malavansky said the air service also is essential in helping islanders build a tourist industry. Every summer more and more tourists visit St. George's 1,872-acre bird refuge.

"When you start comparing our needs to other areas, you really get mad," Wilson said.

Because many of the areas served by the Essential Air Service Program are one-industry towns, many community leaders claim that entire economies could collapse.

Bruce Venada, city manager of Yakutat, said the Southeast community of 750 residents would be dead in the water without the air service. Yakutat, located 220 air miles from Juneau, currently is served by Alaska Airlines with two flights a day.

Ray Vecci, vice president of planning for Alaska Airlines, said it was too early to tell what the airline would do if subsidies are cut.

"We know the people need the service," he said. "We don't just haul passengers. We also carry freight to these communities."

While most carriers are waiting for official confirmation of the proposed subsidy cuts, some commuter air carriers hope they can get enough work from the the U.S. Postal Service to continue flying into remote Alaskan communities.

The postal service pays more than $30 million a year in subsidies to haul mail throughout the state. In years past, the postal service contracted with one carrier for mail deliveries to a particular town. Later, contracts were split equally among all federally-certificated carriers, which, in effect, gave the smaller commuters a chance of survival.

Teresa Foode of Chitina Air Service said she's not going to worry about the proposed cuts until next year.

Although 15 to 20 percent of the Chitina Air budget comes from federal subsidies, Foode believes the postal service will pick up where the federal government left off and keep commuters flying to rural areas. Chitina Air serves the sparsely populated communities of Boswell Bay, Cape Yakataga, Chitina and Icy Bay.

"I know the folks would miss us out there," Foode said. "I don't think some people realize how difficult travel in here in Alaska."

But officials at the Essential Air Service office in Washington, D.C., said they realize the importance of transportation subsidy to rural communities.

"Our phones have been ringing off the hooks about the issue," said John Coleman, director of the Office of Essential Air Service.

Coleman said he was just as surprised as everyone else about the proposal to dismantle his office. "We're simply waiting like everyone else to hear what's going to happen."

The Essential Air Service Program was supposed to run to 1988, Coleman said. But governmental red ink may force an early retirement for the program administered by 41 people.

Coleman was quick to say that he thinks there will be loud protest about it. "We expect a flurry of debate," he said.

Most Alaskan communities and commuter air services directly impacted by the subsidy cuts are banking on the Alaska congressional delegation to solve the problem.

As one Alaskan pilot observed: "Our congressional delegation will deal with this problem like heavyweight contenders training in seclusion. We don't have to panic yet."

Members of the Alaska congressional delegation say they will fight the cuts, but they will not take any action until the actual budget is revealed, said a spokesperson from Sen. Ted Stevens office in Washington, D.C.

Last September, Stevens introduced an amendment to assure continuation of subsidies to five Southeast Alaskan communities served by the Essential Air Service program, the spokesman said.

Air cuts would leave 37 towns grounded

by Annetta Taylor
Times Business Writer

The Airline Deregulation Act of 1978, designed to spur competition in the air, did the job in Alaska where the number of federally certificated scheduled carriers ballooned by 900 percent — from five airlines six years ago to 45 today.

As deregulation proponents elsewhere in the nation predicted, commuter air taxi services, which previously operated under the federal certificates of larger airlines, struck out on their own, vying with their former partners and new upstarts for passengers, cargo and lucrative U.S. Postal Service contracts.

But not everywhere.

As in other rural states, there are some places in Alaska — 37 to be exact — with too few potential passengers to lure regularly scheduled service without a little help.

Because of $4.5 million in federal subsidies, five airlines now fly to those towns. But the Reagan administration this week has proposed ending the nationwide $35 million subsidy program next year.

Federal subsidies for air service to rural and remote areas throughout the nation began in 1938 with the creation of the Civil Aeronautics Board.

In Alaska, 230 communities were — and still are — eligible for air service subsidies, although not all received them, said Dick Steinman, a former field representative for the now-defunct CAB and now with the U.S. Department of Transportation.

Alaska boasts 40 percent of all designated subsidized routes in the nation.

By the 1970s, three carriers in Alaska — Wien Airlines, Alaska Airlines and Kodiak Western Alaska Airlines — received more than $10 million in subsidies to regularly fly to 187 communities. The breakdown was roughly $5.6 million to Wien, $4.2 million to Alaska and $410,000 to Kodiak Western, Steinman said.

With the CAB's blessing, Wien had the monopoly on all points north and west of Anchorage, Alaska Airlines had Southeast, and Kodiak Western had Kodiak Island and the Dillingham area.

The other two certified commercial carriers, Reeves Airlines and Munz Northern Airlines, along with private charter operations and state-authorized

See Deregulation, page C-2

Federal subsidies benefit many Bush area

Times Business Staff

Airlines currently receiving annual federal subsidies for guaranteed service to 37 Alaska communities, according to the local office of the U.S. Department of Transportation, are:

- Alaska Airlines, $3.6 million, for flights to Cordova, Gustavus, Petersburg, Wrangell and Yakutat.
- Sealr, $488,737, for flights to 18 towns and villages on Kodiak Island.
- Peninsula Airways, $298,330, for flights to Atka and St. George.
- Chitina Air Service, $112,988, for flights to Chitina, Boswell Bay, Icy Bay and Cape Yakataga.
- Ellis Air Taxi, $58,333, for flights to Chisana, McCarthy and May Creek.

Harold's Air Service is receiving an interim federal subsidy on a flight-by-flight basis for service to Central and Circle. Frontier Flying Service as a similar arrangement for flights to Wiseman.

Subsidies are guaranteed for service to Farewell Flat, Takotna and Tatalina but may not be needed if Hub Air Service can earn enough money for its operations through U.S. Postal Service contracts. The maximum subsidy amount for the year is about $24,000.

Negotiations on the amount of subsidy for service to Cape Romanzof and Cape Newenham are ongoing with Sealr.

Bids for service to Seward, Council, Circle Hot Springs, Birch Creek and Barter Island are pending.

Continued from page C-1

carriers, moved people around the rest of the state.

Then came deregulation.

Deregulation struck the fancy of many of the nation's travelers, who heralded an end to the old monopoly structure and the "we don't care, because we don't have to" attitude of some airlines.

But it also struck fear in rural and remote townspeople, who envisioned themselves stuck on the ground.

To sell deregulation to Congressmen who also feared the larger airlines would fly away from constituents, a new subsidy program emerged.

The new Essential Air Service program is aimed at providing a period of transition for small towns deserted by the large airlines. The subsidies are based on an established minimum level of service in each eligible community as of July 1976 or two flights per week, whichever was greater.

Unlike the old subsidy system which was based on the carriers' systemwide operations, the new program limited federal funds to expenses of operating in the designated routes.

The program is set to expire in 1988. But President Reagan plans to ask Congress to end the program two years early to save money.

The old subsidy program was to remain in effect until 1986, but Congress stop funding the program in 1982. Alaska's air carriers then were forced to formally withdraw from the old system before getting into the new program.

But under the new program, another new carrier could step in and, if it could guarantee similar or better service without a need for federal money, the CAB withdrew the subsidy for that town. The airline that previously operated in the town with a subsidy was out of the money.

At that point, Wien warned it might pull out of the Bush. Wien president James Flood, who bought the airline a year later, said the company could not justify flying on money-losing Bush routes.

During the refiling process, "most points were picked up on a non-subsidized basis," Steinman said.

Alaska Airlines gradually pulled out of most Bush communities, concentrating its state operations in the larger communities. In 1984, Wien had withdrawn from most Bush routes. By the end of the year, the company had filed for reorganization under federal bankruptcy laws.

Steinman said he could recall only a handful of the new carriers that closed shop or merged with other airlines. Among those are Kodiak Western, which folded, and Munz, which merged with Ryan Air.

"It can't be good out there and we keep thinking the shake out will come each winter," he said. "But so far, most carriers are hanging in."

ANCHORAGE TIMES 1-3-85

the exception of hazardous materials, almost anything can be shipped via
including perishable food stuffs. Whenever possible, consumers in the Int
ship goods by parcel post rather than air freight. It is illustrated be
cost of mail service to the postal service is substantially higher t
tariffs or rates paid by consumers.

Parcels sent to hub communities such as Galena or Fort Yukon could g
mail and thus incur a higher postage rate than the air freight tariffs
destination. However, mail destined beyond the hub points is all consider
bush service rate section and shipped as priority mail. Thus, consume
bush communities pay non-priority rates while the postal service pa
subsidies to air carriers. Note that Airmail system communities in
Network fall within the same postage zone rate since Fairbanks
distribution center in the region.

Table 5.4.3-1, in addition to data already presented on consumer costs, shows cost to the postal service for air transport of the mail. Compensation received by the airlines for mail transportation can justifiably be higher than freight tariffs partly because of more stringent requirements of mail contracts. Figure 5.4.3-3 shows costs of transporting a parcel to a typical community in the Interior. The consumer has the advantage of paying non-priority mail rates to bush communities whereas the postal service must pay priority rates to the airlines. Rates paid by the postal service to air carriers in relation to freight tariffs and the consumer cost are really an implied subsidy to the airlines. If these rates were to be reduced, the airlines would have the option of requesting other forms of subsidies, either under Section 406 or under the new Section 419, Essential Air Service tariffs could also be increased.

5.4.4 SUBSIDY UNDER SECTION 406

5.4.4.1 ELIGIBILITY FOR 406 SUBSIDY

The Federal Aviation [illegible] 1958, under Section 406, compensates carriers for providing service to communities which do not generate sufficient traffic to cover costs. A reasonable return on investment, 12.35 percent was established in CAB domestic passenger fare investigation docket 21866. Wien Air Alaska currently receives $6,000,000 annually in subsidy under this section for its state-wide routes. There is no available data to show what portion of this total amount is applied to

routes in the Interior. This subsidy is in addition to rates paid by the postal service for mail delivery. Subsidies under this section are programmed to continue until Jan. 1, 1983. However, the Civil Aeronautics Board has indicated that consideration is being given to terminating this subsidy program after Jan. 1, 1982. Final determination has not yet been made in this matter.

The subsidy program is thus moving away from the concept of cross-subsidies for an entire route system. Additionally, other carriers will be eligible for subsidies under new sections of the Act. At present in the state of Alaska only Wien Air Alaska and Alaska Airlines are entitled to Section 406 payments. Funding in the future will be through Section 419, and is discussed below.

Wien Air Alaska, the only eligible Section 406 carrier serving the Interior has recently been experiencing competition from Air North, a newly CAB certificated carrier under Section 401, but which is not eligible for Section 406 subsidy. The new, unsubsidized carrier, in effect, is competing directly with Wien subcontractors in the Interior. The Civil Aeronautics Board, apparently recognizing the problems to its subsidized carrier in the Interior seems to be accelerating the phase-out of 406 subsidies and is implementing essential air service criteria.

5.4.4.2 THE WIEN AIR ALASKA SUBCONTRACT SYSTEM

Wien Air Alaska currently subcontracts portions of its certificated routes to air taxi and contract carriers in the Interior. These are: Harold's Air Service, Galena; Frontier Flying Service, Fairbanks; Alaska Central Airways, Fairbanks; and Arctic Circle Air, Fort Yukon. Contracts with these carriers are negotiated separately and often have different rates and terms. Wien Air Alaska receives subsidy payment from two sources, section 406 and mail payment directly from the postal service. However, the compensation received by Wien is not directly passed on to the subcontractors.

Wien Air Alaska has recently been modifying contract arrangements in the Interior in an attempt to upgrade service. Until recently, many bush communities experienced service level deterioration under the subcontract system. One cause of this deterioration was the lack of coordination of the entire route structure between the individual subcontractors. In Fairbanks, flights by subcontractors which in the past were handled individually by the contractor, are now centrally operated out of the terminal at Fairbanks International Airport and passengers are ticketed and checked in through the Wien counter. Also, the method of paying subcontractors has been changing

from a per ticket/per pound rate to a straight hourly rate for aircraft used on subcontracted routes. Equipment has been upgraded, and twin turbo prop aircraft are now used on routes by subcontractors.

5.4.5 SECTION 419 OF THE AIRLINE DEREGULATION ACT OF 1978-ESSENTIAL AIR SERVICE

5.4.5.1 DESCRIPTION AND ELIGIBLE POINTS

Section 419 is a method to fund essential air service to eligible Alaskan points, i.e., a subsidy. This is intended to guarantee essential air service to small communities served only by one CAB certificated carrier. There are 230 communities in the state of Alaska which are eligible for essential air service. As of the date of this report, only one point within the state is being served under Section 419--Adak Island, which is outside of the Interior Study region. There are 26 points in the Interior region eligible for essential air service subsidy.

Determination of service levels was made considering cargo, mail and passenger requirements. A maximum of two stops between an FAA hub or CAB determined regional center and the destination community is permitted. The FAA hub in the Interior is Fairbanks and regional centers have been identified as Bettles, Fort Yukon and Galena. In the determination of essential air service levels, the CAB requires that there be adequate service between the regional service centers and the FAA hubs to handle both the regional centers' needs and traffic seeking access to the national air system from other eligible points served through the regional center.

The CAB did not impose any overall minimum size for aircraft in Alaska as it did in the lower 48 states. The CAB definition of aircraft size is: small aircraft - up to 10 seats; medium aircraft - up to 30 seats; intermediate aircraft - from 30 to 60 seats; large aircraft - over 60 seats. Service with small aircraft was determined to afford the best means for meeting service requirements of many small communities. However, between the regional center of Galena and the FAA hub at Fairbanks, for example, service was required with large aircraft because of the distances and level of traffic from communities surrounding the regional center.

Frequency has been determined based on overall passenger and cargo needs of the eligible points. In Alaska, cargo is frequently transported in the passenger compartment of aircraft, thus at times precluding accommodation of passengers on a particular flight or alternatively the passenger loads may result in cargo delays. Thus, frequencies were determined based on the combined need. The CAB will review the

MEMORANDUM

To: Committee Members

From: Committee Staff

Date: March 4, 1986

RE: HJR 51 Relating to Coast Guard User Fees

Tomorrow, Wednesday the 5th, the committee will be taking up HJR 51. This resolution was sponsored by Representative John Sund.

HJR 51 calls for the Alaska Congressional Delegation to work to prevent the passage of Federal House Bill 1932. House Bill 1932 would establish user fees for Coast Guard Services. The first item in your packet, labeled "Rep. Sund's Analysis" includes a listing of the services that would be subject to a user fee.

Included in your packet, in addition to the Sund analysis, is a copy of the HJR, a zero fiscal note from Representative Hurley, and a copy of the draft bill in front of congress at this time.

Representative Sund's packet is a good source of information on the Coast Guard User Fee issue and breaks down the financing expected if HB 1932 were to pass on the federal level.

MEMORANDUM

TO: House State Affairs Committee

FROM: Rep. John Sund

RE: HJR 51 - Coast Guard user fees

.....

Enclosed in your packet is a copy of Federal House Bill 1932, schedules of proposed direct and indirect fees, and a summary of the bill's status. Should it pass, this legislation would require Alaskan commercial and sport vessels to pay user fees for the following Coast Guard services:

seaman's documents and licenses
vessel inspection
merchant marine investigations
maintenance for aids to navigation
non-emergency search and rescue

The intent of the proposal is to raise the following revenue during the ensuing three years.

FY 86 - $150 million
FY 87 - $250 million
FY 88 - $350 million

The following is a sample fee breakdown. The lower figure is that suggested by the Senate/White House and the high figure was the original OMB proposal.

Commercial vessels UNDER 5 GROSS TONS - $540 - $720 per year
(this could include skiffs, set net skiffs, handtrollers, etc.)

Commercial vessels between 5 - 99 gross tons - $810 - $1080

Recreational Boats - approximately $23 per boat average.

This information was provided by K.C. Bell of Congressman Young's office and David Dye of Senator Stevens office.

HJR 51 opposes coast guard user fees overall, and specifically opposes the proposed distribution of fees.

Rep. Sund's Analysis

February 11, 1986

Please telecopy these four pages to :

Mr. Howard Wayne
Office of Rep. John Sund
telcopy #: 465-4648

Mr. Wayne:

I am sending to you the SAMPLE fee breakdown supplied as part of H.R. 1936. As you can see, it reflects a $23 charge for recreational boaters. It should be noted that the 1987 fiscal year budget presented to Congress still assumes that revenues will be collected through a Coast Guard user fee, although it is NOT factored into the Coast Guard budegt request. The Subcommittee on Cost Guard and Navigation last year made it very clear that it continues to oppose such user fees.

I could not get a copy of S.Con.Res. 32 in time for you, however, I have enclosed a summary of the status of that legislation.

Please let me know if you require further information.

Sincerely,

K.C Bell

D R A F T B I L L

To authorize the Secretary of the department in which the Coast Guard is operating to establish fees for certain Coast Guard services and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Coast Guard User Fee Authorization Act of 1985".

Sec. 2. (a) At the end of part I of title 14, United States Code, add the following new chapter:

"CHAPTER 19 -- USER FEES

"Sec.

671. Definitions.

672. User fee authority.

673. Establishment of fees.

674. Collection of fees.

675. Treatment of receipts.

676. Annual search and rescue certification.

677. Exemptions.

678. Liability of the United States not altered.

679. Penalties.

FEDERAL BILL ON COAST GUARD USER FEES
SECTIONAL ANALYSIS

"§ 671. Definitions

"In this chapter -

"(1) "associated equipment" -

"(A) means -

"(i) a system, accessory, component, or appurtenance of a recreational boat; or

"(ii) a marine safety article intended for use on board a recreational boat; but

"(B) does not include radio equipment.

"(2) "offshore facility" means any artificial island, installation, or other device permanently or temporarily attached to the seabed of the United States Outer Continental Shelf, which is erected thereon for the purpose of exploring for, developing, or producing resources therefrom.

"(3) "operating expenses" means costs incurred by the Coast Guard as necessary expenses for its operation and maintenance.

"(4) "owner" means a person who claims lawful possession of a vessel, facility, or terminal by virtue of legal title or equitable interest therein which entitles that person to such possession.

"(5) "recreational boat" means any vessel that is operated only for pleasure use.

"(6) "recreational boat and associated equipment manufacturer" means any person engaged in

"(A) the manufacture, construction, or assembly of recreational boats or associated equipment; or

"(B) the manufacture or construction of components for recreational boats and associated equipment to be sold for subsequent assembly; or

"(C) the importation into the United States for sale of recreational boats, associated equipment or components thereof.

"(7) "terminal" -

"(A) means -

"(i) a pier, wharf, dock, similar structure, or area of land to which a vessel is or may be secured;

"(ii) an area of land, water, or land and water under and in immediate proximity to a pier, wharf, dock, similar structure, or area of land to which a vessel is or may be secured;

"(iii) any building on or contiguous to a pier, wharf, dock, similar structure, or area of land to which a vessel is or may be secured;

"(iv) any equipment and materials on a pier, wharf, dock, or similar structure, or area of land to which a vessel is or may be secured, or in a building that is on or adjacent to such a structure or land; and

"(v) a deepwater port; but

"(B) does not include facilities operated by the Department of Defense.

"§ 672. User fee authority

"(a) The Secretary, in consultation with affected Federal agencies, may establish a system of fees to recover that portion of the related operating expenses of services, which primarily benefit the users of the services and are beyond those benefits that accrue to the public at large, that are provided or made available by the Coast Guard to -

"(1) the owners, operators, or persons in charge of -

"(A) vessels,

"(B) terminals, or

"(C) offshore facilities;

"(2) individuals who are licensed, certificated, or issued merchant mariners' documents by the Coast Guard;

"(3) recreational boat and associated equipment manufacturers;

"(4) manufacturers of materials and equipment approved by the Coast Guard; and

"(5) other users of Coast Guard services.

"(b) In addition to the operating expenses relating to the services authorized to be recovered under this subsection, the Secretary may also recover reasonable administrative and enforcement costs associated with this chapter.

"(c) The operating expenses of the following Coast Guard programs may not be included in the operating expenses to be recovered -

"(1) Enforcement of Laws and Treaties.

"(2) Polar Ice Operations.

"(3) Defense Readiness.

"(4) Waterways management.

(d) The fee schedule prescribed by this section may not conflict with the international obligations of the United States.

"§ 673. Establishment of fees

"(a) The Secretary shall issue regulations to carry out this chapter, including fee schedules.

"(b) The Secretary shall consider the following factors in establishing fees for Coast Guard services -

"(1) the costs of providing the services, excluding that portion of the costs that primarily benefits the public at large rather than the actual users of the service;

"(2) the number of vessels, terminals, offshore facilities, and persons affected;

"(3) the costs of administering and enforcing the collection of fees; and

"(4) the equity and economic impact of the charges to be imposed.

"§ 674. Collection of fees

"(a) The Secretary may collect fees from:

"(1) the owner, operator, or person in charge of -

"(A) a vessel (other than a public vessel) operating in or on waters subject to the jurisdiction of the United States,

"(B) a terminal, located on or adjacent to waters subject to the jurisdiction of the United States, or

"(C) an offshore facility;

"(2) individuals who are licensed, certificated, or issued merchant mariners' documents by the Coast Guard;

"(3) recreational boat and associated equipment manufacturers;

"(4) manufacturers of materials and equipment approved by the Coast Guard; and

"(5) other users of Coast Guard services.

"(b) The Secretary may employ any federal, state, or local agency or instrumentality, or private enterprise or business, to collect fees established under this section. These fee collection services, which shall not include the institution of litigation, may be provided under such reasonable terms and conditions, including reimbursement with proper accounting to the Secretary, as the Secretary and such agency or business agree.

"§ 675. Treatment of receipts

Amounts collected pursuant to this Act shall be deposited in the general fund of the Treasury as proprietary receipts of the department in which the Coast Guard is operating, ascribed to Coast Guard activities.

"§ 676. Annual search and rescue verification

"There shall be an annual verification by the Secretary that the amounts spent on Coast Guard search and rescue activities are not less that the amounts collected annually for such purposes.

"§ 677. Exemptions

"The Secretary may grant exemptions from any provision of this chapter or any regulations issued under this chapter.

"§ 678. Liability of the United States not altered

"The collection of fees for Coast Guard services shall not alter or expand the duties and liability of the United States under existing law for the performance of functions for which fees are collected, nor shall the collection of fees constitute an express or implied undertaking by the United States to perform any service or activity in a certain manner or to provide any service at a particular time and place.

"§ 679. Penalties

"(a) The owner, operator, or person in charge of a recreational boat who fails to pay a fee prescribed under section 672 of this title is liable to the United States Government for a civil penalty of not more than $5000 for each occurrence, in addition to any fee imposed.

"(b) The owner, operator, or person in charge of a vessel (other than a recreational boat), terminal, offshore facility, any recreational boat or associated equipment manufacturer; manufacturer of materials or equipment approved by the Coast Guard; or other user of Coast Guard services who fails to pay a fee prescribed under section 672 of this title is liable to the United States Government for a civil penalty of not more than $25,000 or two times the fee, whichever is greater, for each occurrence, in addition to any fee imposed.

"(c) Any individual licensed, certificated, or issued a merchant mariners' document by the Coast Guard who fails to pay a fee prescribed under section 672 of this title is liable to the United States Government for a civil penalty of not more than $5000 for each occurrence, in addition to any fee imposed.

"(d) Any person who fails to comply with a regulation prescribed under this chapter is liable to the United States Government for a civil penalty of not more than $5000 for each violation.

"(e) The vessel of any owner, operator, or person in charge who fails to pay a fee or penalty, or who fails to comply with a regulation prescribed under this chapter, also is liable in rem for the fee and any civil penalty assessed under this

section, and may be proceeded against in the United States District Court of any district in which the recreational boat or other vessel may be found.

"(f) A certificate, license, permit, approval, or document issued by the Coast Guard is invalid until all required fees have been paid to the United States Government.

"(g) After notice and an opportunity for a hearing, a person found by the Secretary to have violated this chapter or a regulation prescribed under this chapter for which a civil penalty is provided, is liable to the United States Government for the civil penalty provided. The amount of the civil penalty shall be assessed by the Secretary by written notice. In determining the amount of the penalty, the Secretary shall consider the nature, circumstances, extent, and gravity of the prohibited acts committed and, with respect to the violator, the degree of culpability, any history of prior offenses, ability to pay, and other matters that justice requires.

"(h) The Secretary may compromise, modify, or remit, with or without consideration, a civil penalty under this chapter until the assessment is referred to the Attorney General.

"(i) If a person fails to pay an assessment of a civil penalty after it has become final, the Secretary may refer the matter to the Attorney General for collection in an appropriate district court of the United States.

"(j) The Secretary may deny entry to a port or place subject to the jurisdiction of the United States to a vessel if any required fees have not been paid.

"(k) When requested by the Secretary, the Secretary of the Treasury shall deny the clearance required by section 4197 of the Revised Statutes of the United States, as amended, (46 App. U.S.C. 91) to the vessel until the fee assessed for Coast Guard services is paid or until a bond is posted for the payment thereof.".

(b) The analysis of part I of title 14, United States Code, which is located immediately before chapter 1, is amended by adding at the end the following new item:

"19. User Fees.....671".

Sec. 3. Conforming amendments

(a) Subsection I of the Ship Mortgage Act, Sec. 30 of the Act of June 5, 1920, c. 250, 41 Stat. 1002 (46 App. U.S.C. 927), as amended by the Act of September 16, 1966 (Public Law 89-582, 80 Stat. 795) is amended by striking out the third and fourth sentences.

(b) Section 2110 of Title 46, United States Code (P.L. 98-89, August 26, 1983), is repealed.

STATEMENT OF PURPOSE AND NEED

The purpose of this bill is to amend Title 14, United States Code, to authorize the recovery of a proportion of the operating expenses incurred in providing certain Coast Guard services. The recovery of the Federal costs of providing services from those who primarily benefit from them has long been established and accepted as sound public policy.

Two major concepts underlie this cost recovery principle. One concerns fairness and equity in the distribution of the Federal tax burden. Those who obtain special services from the government above and beyond those that accrue to the public at large or who use government funded facilities should pay for them; those who do not should not be expected to share the cost. The second has to do with efficiency. For the market to operate as an efficient allocator of resources, the prices of goods and services should reflect their costs. The basic purpose of this legislation is to allocate the costs of providing certain Coast Guard services to those who primarily benefit from them.

User fees are a widely accepted, equitable means of supporting public programs and services. For many years user fees have been the principal means of supporting other transportation

programs. In the 1986 budget, President Reagan proposed to increase or institute numerous types of user fees, including those for certain Coast Guard services.

This proposal would authorize the Secretary of the department in which the Coast Guard is operating to collect from users the operating expenses proportionately allocable to the users of the following Coast Guard services:

1. Search and rescue;

2. Short range aids to navigation;

3. Radionavigation aids;

4. Domestic icebreaking;

5. Commercial vessel safety;

6. Recreational boating safety;

7. Port and environmental safety;

8. Marine environmental response; and

9. Bridge administration.

User fees would be charged only for Coast Guard services which relate to specific, identifiable persons or classes of users. Among the user groups which would be affected by user fees authorized under this legislation are persons who are issued certificates, permits, approvals, licenses, and documents by the Coast Guard and the owners, operators, and persons in charge of:

1. Commercial vessels, both U.S. and foreign flag;

2. Mobile off-shore drilling units and fixed off-shore structures;

3. Recreational boats that operate on waters subject to the jurisdiction of the United States; and

4. Terminals subject to Coast Guard inspections.

Based on a detailed analysis of the programs for which recovery would be sought, the expenses of the programs would be collected on a proportional basis from the various individual users or user groups, either as a charge for a specific service, when the user of the service is directly identifiable, or by an indirect charge in the form of an annual or biennial fee. Every reasonable effort would be made to make the fee

schedules equitable and reflective of the actual expenses incurred by the Coast Guard to provide a specific service or benefit to a particular user or class of users.

In response to concerns that have been raised about previous Coast Guard user fees proposals, the bill includes an accounting of the amounts collected and spent on search and rescue activities. This is designed to demonstrate that the amounts collected from marine users for this purpose do not exceed the costs of providing the services to those users.

Although all Coast Guard services benefit at least portions of the public at large in one way or another, there are some that clearly contribute to the general welfare, with little or no identifiable benefit to specific users. Those will not be subject to cost recovery. Activities to be excluded under this concept are as follows:

1. Enforcement of laws and treaties;

2. Polar ice operations;

3. Defense readiness;

4. Waterways management.

The Coast Guard currently collects as direct charges for Coast Guard services, or receives from user taxes, approximately $ 16.8 million, less than 1% of its operating budget, from the following sources:

Motorboat fuel tax for recreational boating safety operating expenses	$ 15.0 million
Fees for yacht documentation	1.3 million
Fees for issuing certificates of financial responsibility to vessels	.5 million
Marking wrecks and obstructions to navigation	less than .1 million
Total	16.8 million

In addition to the fees currently generated, the Coast Guard, under section 9701 of title 31, U. S. Code, and sections 3317, 3506, and 7114 of title 46, U. S. Code, is authorized to collect additional user fees for the following Coast Guard services:

1. Permits for private aids to navigation;

2. Domestic icebreaking at the specific request of a user;

3. Inspection and examination of small passenger vessels and sailing school vessels;

4. Issuance of certificates, licenses, or permits related to small passenger vessels and sailing school vessels;

5. Providing required copies of laws to passenger vessels;

6. Material and equipment approvals and factory inspections;

7. Inspection of Outer Continental Shelf facilities;

8. Facility inspections;

9. Cargo of particular hazard inspections;

10. Issuance of regatta permits; and

11. Providing regatta patrols.

The proposed legislation will incorporate the above items and will thus result in all categories of users paying for similar services.

It is the policy of the Coast Guard to encourage private commercial provision of certain services which are currently provided by the Coast Guard. To this end, the Coast Guard has sought to establish formal agreements which would delegate specific authority to discharge certain Coast Guard functions to such organizations as the American Bureau of Shipping and the National Cargo Bureau. Examples of authority which the Coast Guard has delegated or might delegate in the future are new construction plan review and inspection of vessels, vessel measurement, Outer Continental Shelf inspection, load line examinations, and other program responsibilities that would lead to the minimization of direct governmental involvement in the maritime industry. Where delegation takes the place of the authority to provide services which are subject to user fees, the Coast Guard will terminate or reduce those fees when the service is performed and financed by the private sector.

However, it is difficult to shift much of the work to the private sector when the Coast Guard is charged with providing the same service at no cost to the user as a result of the

prohibition against charging fees in section 2110 of title 46, U. S. Code. The elimination of this prohibition would permit the delegation of additional services to the private sector.

An evaluation of Coast Guard programs for which expenses may be assessed under this proposed legislation results in the following estimates:

5 YEAR PROPOSED NET RECEIPTS
BY FISCAL YEAR
(In Millions of 1986 Dollars)

	1986	1987	1988	1989	1990
NET RECEIPTS	236	476	476	476	476

Thus, the expenses for which recovery authority is sought represent approximately 13% of all Coast Guard operating expenses, and 9% of the total estimated Coast Guard budget for FY 1986.
