Senate Committee on Transportation

AGENDA

Wednesday, January 23, 1985

Commissioner Hesden Scougal, of the Alaska Transportation Commission

Senate Bill 38, Kenai River Bridge, Sponsor-Sen. Paul Fischer

Friday, January 25, 1985

Continuation of ATC issues

Monday, January 28, 1985

Continuation of ATC issues

Primary Transportation Committee Objectives for 1985

1. Legislative Response to Repeal of ATC

Problem: The ATC has been abolished, and the public perceives there will be safety problems left in the void. The administration will apparently propose a bill to transfer the embodiment of the ATC (including much of its economic regulatory authority) into DPS. Chairman Coghill, on the other hand, does not intend that the will of the electorate be violated, and proposes a bill to simply establish safety inspections for the trucking industry.

2. Highway maintenance and shoulder widening

Problem: General highway maintenance throughout the system is never enough; additionally, the lack of shoulders on extensive portions of highways in the Interior continues to be a leading cause of traffic accidents and fatalities. The chairman would like to examine DOT/PF highway projects now on the drawing boards, and determine with the department which could be delayed in order to free up funds for highway shoulders. This would be most successfully accomplished under the banner of highway safety upgrades.

3. Alaska Marine Highway

Problem: What place, if any, can high-speed ferries have within the marine highway system? DOT is satisfied that there is a need for economically-operated high speed ferries in Southeastern, although not necessarily jetfoils. Commissioner Knapp has isolated the biggest money loser to be the deep southeastern village runs with ferries of the Aurora class, carrying crews of about 27, and seldom fill. He would like to replace these slower ships on those runs with catamarans, surface-effect ships or other high speed, low crew alternatives.

Problem: To what extent will the Ketchikan Maintenance Facility be developed and put to use? The construction of the maintenance facility is progressing on schedule, however, DOT will be looking for funding for a ship-lift or drydocking apparatus in order to fully utilize the facility's potential. With such a devise, the maintenance facility would be capable of actually hauling-out the ferries, as well as other large commercial or coast guard vessels, if needed. Without it, the maintenance facility will not actually offer anything more than is already available in Ketchikan. Opposition to completion and use of the facility will come from Seattle interests who stand to lose business when the ferries pull their maintenance out of that port, as well as from crewmembers who prefer to spend the 2 or 3 months in Seattle, rather than Ketchikan.

Problem: Warehousing. It is DOT's intention to reduce to a minimum its warehouse space at Pier 48 in Seattle when the new maintenance facility comes on line, and thereafter warehouse most of its

spare parts in Ketchikan. Offices, waiting rooms and ferry access ways in Seattle would be renovated at that time.

Problem: Availability of ferry space during the tourist season. This problem would probably be alleviated somewhat if the LeConte and the Aurora are freed up from village runs by the inception of high speed service.

Problem: Labor. Ferry workers have taken a strike vote, and are authorized for an April 1 strike, if negotiations on their new 3-year contract break down. The State is in a position in these negotiations where the farm was given away long ago, and we are now having to recoup, and try to bring the wages and benefits in line with industry standards.

Problem: Westward expansion. Should ferry service from Southeastern to Southcentral be contemplated by the State? What problems and costs can be expected?

Problem: Haines-Juneau connection. Should Juneau become the northern terminus of the Southeast run, with the highway extended to Haines and Skagway, connected by a shuttle ferry across Lynn Canal? What costs and problems are involved, compared to continued mainline ferry service?

4. Alaska Railroad Oversight

Problem: The State has just established the Alaska Railroad Corporation, taking over ownership and control of the line on January 5. Should the committee contract to have the operation of the railroad monitored, as House Transportation is apparently going to do, or should we leave the board alone for an initial honeymoon period, simply monitoring it from here?

5. DOT/PF Capital Projects

Problem: DOT has a year-old Capital Projects Cleanup project, due to wrap up its activities this Spring. Its objective is to get under control all the CIPs with which DOT is charged, and, in the process, establish an accounting system designed to ensure that the morass is not allowed to grow again. We will need to receive the report and understand it; we will need to have a working knowledge of the new CIP tracking system in order to properly be able to put its information to use.

6. Jones Act

Problem: The Federal Merchant Marine Act has the undesirable effect in Alaska of raising the price of virtually everything shipped into the state. How active should be the committee's role in the effort to persuade Congress to repeal the Act? The Governor has been instructed by the electorate, through Ballot Measure 3, to do all he can

to get Congress to repeal it, and to report on his efforts and the effect of the Act annually until it is repealed. The committee, short of an active role itself, might at least monitor the Governor's activities in relation to the initiated law.

7. Oil export to the Far East

Problem: By Federal law, Alaskan oil cannot be exported, yet, economically, it doesn't make sense not to. Should the committee take an active lead in lobbying Congress to repeal the provision disallowing export, or should we merely monitor the situation, keeping members informed on the issue? Should oil export be viewed in context with other exportables - coal, timber, minerals, foodstuffs, etc?

8. Gas pipeline

Problem: To bring North Slope Gas south to tidewater for market to the Pacific Rim. How deeply involved should the committee become with the Hickel group promoting the pipeline? What realistic alternatives are there to it? Will the State get involved in its financing?

9. High Float Emulsion

Problem: Asphalt may not be the ideal material for roads located in nothern regions. DOT is experimenting with roadways surfaced with high float emulsion, a process developed in Yukon. Progress and conclusions regarding experimental surfaces ought to be monitored by staff to keep committee members informed. If the new materials are successful in maintaining a longer-lasting, lower cost road surface, the Legislature probably would want to use it throughout the system.

10. Overlapping road-building authorities

Problem: Road-building capabilities and authorities overlap among State agencies to the extent that ofter one agency doesn't know what the other may be doing, and proper maintenance is neglected as a result. For example, in DNR the division of parks builds trails and roads in parks, the division of forestry builds roads for timber sales and for fire-fighting, and the division of agriculture is responsible for putting roads into agricultural areas. To what standards these roads and trails are constructed apparently varies, and what may be required to upgrade them as public use demands remains a mystery, because there is no central clearing-house to keep track of them. Perhaps another category of road ought to be created, somewhere between a trail and a secondary highway; something like a "resource road". Some study ought to be given to how these roads ought to be managed, and by whom. For example, if there is a 1 mile long road connecting a village to an airstrip, perhaps the division of aviation ought to be responsible for it.

PRESENTATION OUTLINE

I. Purpose

II. Process Description

III. Products To Be Delivered

IV. Progress To Date

PURPOSE

- Develop a long-range plan for AMHS, as recommended by the Governor's Task Force
- Provide guidance for daily operations as well as for long-term system development
- Deliver a working document and specify ongoing process, not just "another study to occupy shelf space."

PRIMARY ISSUES

- General
  - Levels of service
  - Relationships between local and mainline service
  - Capital and operating funding needs & sources
- Specific
  - High speed ferry applications
    - Southern Panhandle
    - System-wide
  - Age of existing fleet
  - Private funding / contracting for services
  - Marketing

GIVENS

- Southeast Transportation Plan Recommendations
  - Implementation of high speed ferries in Southern Panhandle
  - Seattle service to be maintained
  - Definition of communities to be served in the Southeast
- Initiation of Service to Hyder
- Development of Ketchikan maintenance facility

PRESENTATION OUTLINE

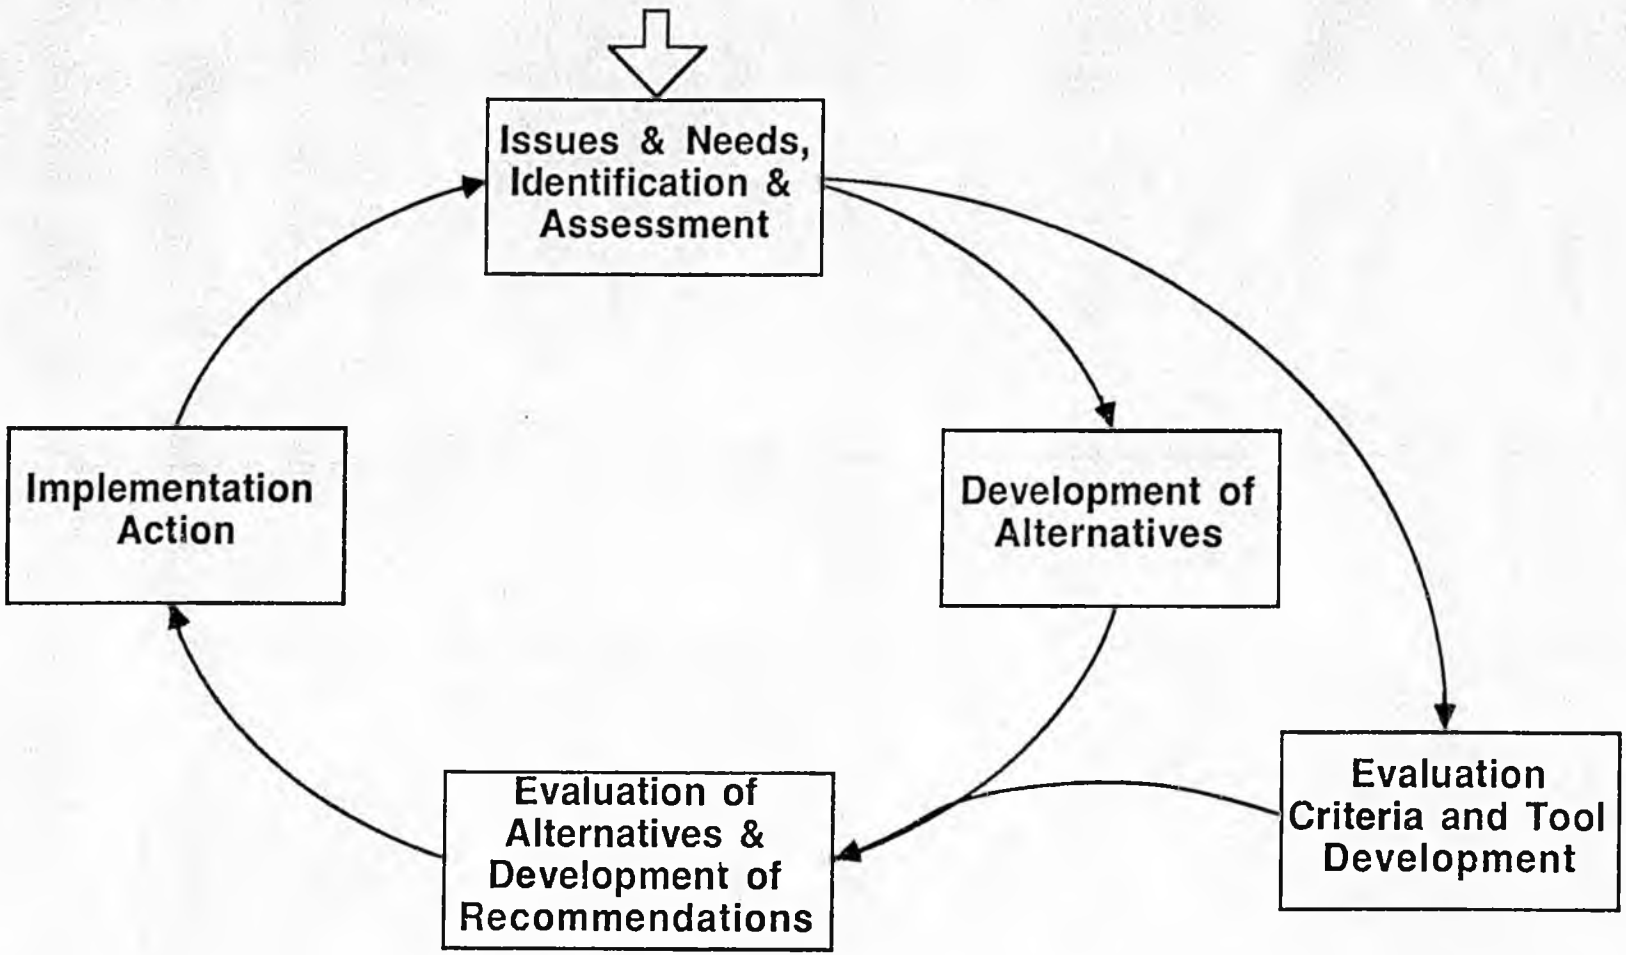
I. Purpose

→ II. Process Description

III. Products To Be Delivered

IV. Progress To Date

OVERALL PLANNING PROCESS



SPECIFIC TASKS IN THIS PROJECT

- Review Existing Plans
- Define Issues
- Collect Data
- Initiate Public Participation Program
- Develop Analytical Models
- Define Alternatives
- Analyze Alternatives

SPECIFIC TASKS IN THIS PROJECT (cont)

- Evaluate and Select System Plan
- Develop Implementation Plan
- Citizen and Agency Review
- Final Documentation and Presentations
- Training of DOT&PF Staff
  - Plan update process
  - Model Applications

PRESENTATION OUTLINE

I. Purpose

II. Process Description

→ III. Products To Be Delivered

IV. Progress To Date

GENERAL PRODUCTS TO BE DELIVERED

- Mission Statement for the System
  - Goals
  - Objectives
- Policy Summary and Evaluation Criteria / Standards
- Recommended Actions Regarding:
  - Vessels and shore facilities
  - Operations
  - Financing
- CIP
- Long-Range Operating Projections
- Implementation Plan
- Process Definition and Analytical Modeling Tools
  - To provide for ongoing analysis
  - To respond to changes in operating and/or funding environment

SPECIFIC PRODUCTS

BY JUNE 1986:

- High Speed Ferry (HSF) Evaluation and Recommendations for Southern Panhandle
- Analytical Models Operational
  - Vessel performance
  - Travel demand model prototype
  - Financial evaluation
- Financial Policy Evaluation and Recommendations
- Alternatives Defined

SPECIFIC PRODUCTS (cont.)

BY AUGUST 1986:

- System-wide Physical Alternative Evaluation and Recommendations
- 6-year CIP, 20-year Operating Projections
- Projected Funding Needs and Sources
- Analytical Models
- Follow-up Actions Defined
  - AMHS staff training in model application
  - Final documentation
  - Public and agency review

PRESENTATION OUTLINE

I. Purpose

II. Process Description

III. Products To Be Delivered

→ IV. Progress To Date

PROGRESS TO DATE

TASK	STATUS
• Review Existing Plans	• Completed March 31, 1986 (Work Memo A)
• Define Issues	• Correspondence and reports reviewed • Interviews of DOT&PF, transport industry, and others in progress

PROGRESS TO DATE (cont)

TASK	STATUS
• Collect Data	• Travel Survey Complete • Marine Data Collection Complete • Financial Data Identified • Manufacturer's Questionnaire Completed • Technical Resource Data Compiled
• Initiate Public Participation Program	• Design of Program Started
• Develop Analytical Models	• Transportation Demand Model Requirements Defined • Marine Planning, Vessel Operations Models Defined • Financial Analysis Models Defined • Routing and Scheduling Model Definition in Progress

HIGH SPEED FERRY SELECTION PROCESS

FOR

SERVICE IN THE SOUTHERN PANHANDLE

HSF SELECTION PROCESS

PRESENTATION OUTLINE

I. Purpose

II. Known Constraints

III. The Process

IV. The Product

V. Progress

HSF SELECTION PROCESS

PURPOSE

- To implement the Southeast Transportation Plan's recommendation for high speed ferry service in the Southern Panhandle region by using the emerging tools of the system planning process

- Subsequently, to apply the same planning methods to analyze establishment of high speed ferry service system-wide.

- To provide the Operation and Economic Comparison Model to the AMHS Staff for later alternative analysis using the same methods.

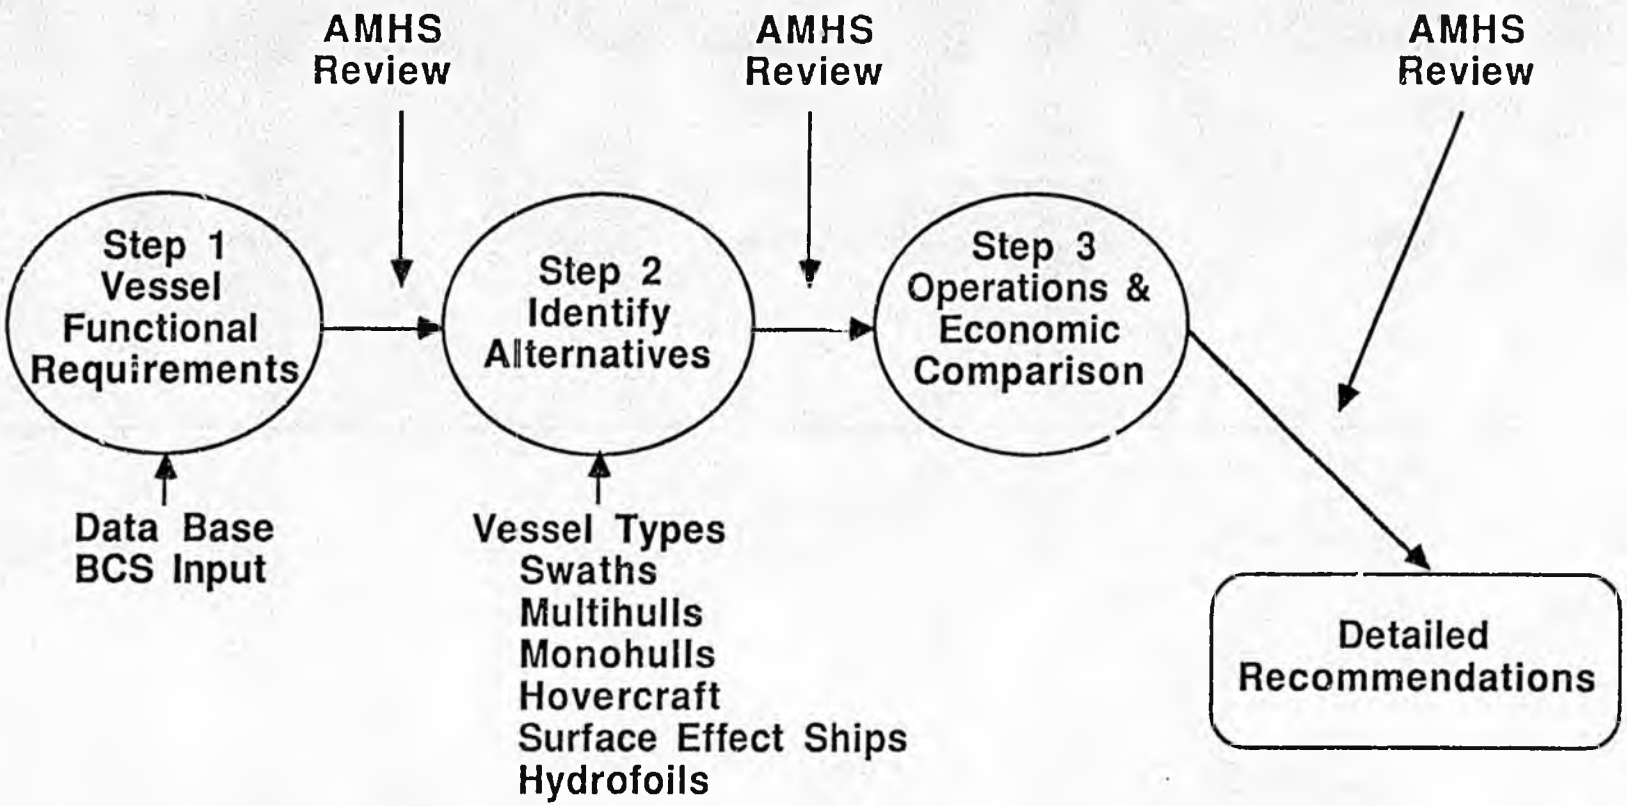
HSF SELECTION PROCESS

KNOWN CONSTRAINTS

- Few High Speed Ferries carry vehicles and/or cargo
- Ferry to be a Day Boat -— Crew to Home Port Nightly
- Maximize Crew Productivity
- Maintainable in Alaska
- Minimum or No Modifications to Existing Terminals
- Serve in the Southern Panhandle Environment
- Minimize Risk and Damage from Object Strikes
- Acceptable Ride Quality — Acceptable Availability
- "Get Home" Capability
- Acceptable Wake and Effect on Shorelines

HSF SELECTION PROCESS

THE PROCESS



HSF SELECTION PROCESS

THE PRODUCT

- **Requirements Review**
- **Review of Candidate Vessels to be Modeled**
- **Definition of Preferred Vessel(s) Characteristics:**
  - Vessel Type
  - Vehicle and Cargo Capacity
  - Passenger Capacity
  - Speed (at full load, engine at continuous rating)
  - Crew Size and Qualifications
  - Propulsion & Generator Engine Types
  - Loading & Unloading Configuration
  - Features to Accomodate Terminals
  - Features for Protection from Object Strikes
  - Vehicle & Cargo Deck Strength Requirements
  - Wake Limitations
  - Maximum G Forces on Passengers at Operating Speed in a Specified Sea State

HSF SELECTION PROCESS

PROGRESS

- **Developed Data Bases Including**

  UMTA Study
  Southeast Transportation Study
  Consultant's Files
  Questionnaire to Manufacturers

- **Preliminary Functional Requirements Definition Started**

HSF SELECTION PROCESS

PROGRESS (cont)

- Next Milestones

  By 5/15: Requirements Review

  By 6/6: Review of Candidate Vessels to be Modeled

  By 6/30: Definition of Preferred Vessel(s) Characteristics

- Subsequent Milestones

  System–Wide Evaluation of High Speed Alternatives

  Impact of High Speed Service on Other Routes, Schedules and Costs

TO: Senator Jack Coghill, Chairman
Senate Transportation Committee

FROM: Malcolm Roberts/Valerie Taliman Chavez
RS 2477 Task Force

DATE: January 17, 1986

RE: Report on RS 2477 Contract
July 1 - December 31, 1985

Enclosed herewith is our report on the 1985 RS 2477 contract. Xerox copies of the eight (8) National Park Service maps and trail descriptions are included in Section I of this report. The nine (9) U.S. Fish and Wildlife Service maps and trail descriptions can be found in Section II. Correspondence highlighting the development of this project is also included in appropriate sections, as is the draft State policy paper on this issue, press reports, and other germaine materials.

We stand ready to provide an oral report on our work to you and members of the Transportation Committee(s) or any other forum you choose.

It has been a pleasure working on this issue, which promises to have great significance for our state.

With best regards,

Malcolm B. Roberts

Valerie Taliman Chavez

RS 2477 TASK FORCE
1985 REPORT

For contract period July 1, 1985 to December 31, 1985

EXECUTIVE SUMMARY

Revised Statute 2477 was an Act passed by Congress in 1866 which provided for rights-of-way for "highways" over unreserved public lands. Under Alaska statutes, the definition of a highway is very broad and includes roads, streets, trails and walks.

The RS 2477 issue has received more attention in recent months as federal agencies prepare management plans which will govern the use of park and refuge lands created by the Alaska National Interest Lands Conservation Act (ANILCA). See Appendix for news articles.

When the Alaska National Interest Lands Conservation Act (ANILCA) was passed in 1980, it conveyed millions of acres of land into 16 national wildlife refuges and 13 national parks, which now fall under federal management.

ANILCA also required, within five years of its passage, the preparation of conservation and management plans for each national park and refuge established. In 1985, the National Park Service (NPS) was in the process of completing 13 general management plans; the U.S. Fish and Wildlife Service (FWS) has issued draft comprehensive conservation plans for 8 of its 16 plans. These plans will be presented to Congress in 1986 and 1987.

In his role as Chairman of the Senate Transportation Committee, Senator Jack Coghill saw a need to assure that Alaska's people will not be prevented from using the roads and trails that historically have connected communities throughout the state. Where these trails cross a park or refuge, the State-owned rights-of-way prevail and should not be curtailed by federal regulations restricting or prohibiting access. Some observers had expressed the fear that if State ownership is not recognized in federal planning documents prior to adoption by Congress, only an act of Congress could grant a right-of-way in the future, as was the case when NANA secured a right-of-way for Red Dog Mine this year.

On July 1, 1985, Senator Coghill formed a task force, comprised of Malcolm Roberts and Valerie Taliman Chavez, to ensure that the federal management plans adequately recognize these historic trails. Working with the Alaska Departments of Natural Resources and Transportation/Public Facilities, the task force prepared maps and a list of possible RS 2477 rights-of-way that the State wants included in these federal plans. By December 31, 1985, the task force identified 159 trails in 9 national parks and 85 trails in 11 national wildlife refuges. Maps and trail descriptions for national parks are detailed in Section I of this report. Maps and trails descriptions for national wildlife refuges are contained in Section II.

Trail information was derived from the 1974 Alaska Trails System Inventory, an atlas developed by former Commissioner of Highways Bruce Campbell to catalog the state's 1,400 known trails. The inventory was sent to the Bureau of Land Management (BLM) in 1974, before that agency had any authorization to deal with RS 2477's. However, the inventory was shelved by BLM and no formal response was made to acknowledge the State's ownership of these trails.

Only now has an inter-agency effort begun to respond to the rising interest in RS 2477. The Department of Interior (DOI) formed a RS 2477 Task Force in September, 1985, under the leadership of Ric Davidge of the U.S. Fish & Wildlife Service. The members include representatives of the Fish & Wildlife Service, National Park Service, Bureau of Land Management, U.S. Forest Service, Bureau of Indian Affairs, Alaska Federation of Natives, Alaska Native Land Managers Association, Alaska Department of Natural Resources, Alaska Department of Transportation/Public Facilities, the Office of Management & Budget/CSU Coordinator and the Senate Transportation Committee. Activities of this task force and a list of its membership are referred to in Section III, along with documentation of Interior Assistant Secretary Bill Horn's decision to include maps in the federal plans.

The State of Alaska has recently taken a positive posture by publishing draft policies and procedures governing RS 2477 trails. This well-written and well-researched document spells out the State's intent to deal with all the issues surrounding these trails in a fair manner. It includes the criteria used to determine a RS 2477, as well as issues relating to liability, maintenance and use. A copy is provided in Section IV. The deadline for public comments was January 6; a revised draft reflecting the input received will be published by March.

In the course of studying the RS 2477 question, the task force became aware of a significant issue that should be better understood by both state and federal officials. Section 103 (c) of ANILCA provides that only those lands that are "public lands" (not state) are subject to federal regulation. Pre-existing property rights of the State remain under state management. This includes R.S. 2477 roads and trails. (See page 102, memorandum by Ric Davidge and page 109, RS 2477 case law paper by Ted Bingham, Chief of Right-of-Way, Bureau of Land Management, Washington, D.C.)

This task force feels that it is essential for the State and its people to maintain their ownership rights to these trails. What's at stake is access for homesites, fishing, recreation, mineral development, forestry, agriculture and travel between villages, not only for the present, but for many generations in the future.

- -

This task force would like to thank the following individuals and agencies for their input and assistance: Assistant Secretary Bill Horn, Vern Wiggins, Ric Davidge, U.S. Department of Interior; U.S. FWS Regional Director Robert Gilmore; BLM Regional Director Mike Penfold; NPS Regional Director(s) Roger Contor and Boyd Evison; Commissioner Esther Wunnicke, Tom Hawkins, and Gary Gustafson, Alaska Department of Natural Resources; Commissioner Richard Knapp and Mark Hickey, Alaska Department of Transportation/Public Facilities; Sally Gibert, CSU Coordinator, Office of Management and Budget; Janie Leask and Lawrence Kimball, Alaska Federation of Natives; Representative Adelheid Herrman, who chaired a special AFN RS 2477 workshop; Ruth Packard of Senator Tim Kelly's staff, and the able staff of the Anchorage Legislative Information Office.

Mr. Roger Contor
Regional Director of Alaska Regional Office
National Park Service
2525 Gambell Street
Room 107
Anchorage, AK 99503

Dear Mr. Contor:

This letter is to inform you that I am in the process of preparing assertions on the RS 2477 rights-of-way that lie within and across the National Park Systems that your agency is studying at the present time. These systems include:

Cape Krusenstern National Monument
Kobuk Valley National Park
Noatak National Preserve
Bering Land Bridge National Preserve
Gates of the Arctic National Park and Preserve
Denali National Park and Preserve
Wrangell-St. Elias National Park and Preserve
Katmai National Park and Preserve
Aniakchak National Monument and Preserve

This action is pursuant to legislative action taken during the session in Senate Joint Resolution (SJR 10).

In the public interest, it is vital that all potential RS 2477 rights-of-way are included in these management plans. Specifically, I request that they be included on at least one of the maps in each plan.

As time is short, I would appreciate the cooperation of your staff in helping us prepare this information in a manner suitable to your agency.

Sincerly,

Senator John B. Coghill, Chairman
Senate Transportation Committee

cc: The Honorable Don Hodel, U.S. Secretary of the Interior
Michael Penfold, Alaska Regional Director, BLM

RE: Inclusion of the State of Alaska's R.S. 2477 assertions in the N.P.S.'s General Management Plans.

My sincere thanks for the meeting with you and your staff. So that we have a memo for our file--my understanding of the outcome of that meeting was as follows.

1. It is in the public interest to include the State of Alaska's R.S. 2477 right-of-way assertions in both list and map format in the nine General Management Plans (GMPs) currently being finalized. We understand from you that Assistant Secretary Bill Horn concurs with this decision.

2. By the middle of next week, you will inform us of any changes in the rewritten boilerplate statement on R.S. 2477's that I drafted and delivered. These paragraphs, which introduce the issue to the public will be included in all nine plans.

3. By July 29, Malcolm Roberts and Valerie Chavez of my Task Force, working with Sally Gilbert of OMB, Mark Hickey of DOT/PF and Gary Gustafson of DNR, will prepare a list of all of the state's R.S. 2477 assertions that may influence land management in the CSU's. These lists will be delivered to Linda Nebel.

4. By August 18, we will prepare one map for each GMP that indicates the location of each R.S. 2477 assertion listed.

5. We will work with you to write a clear caveat for inclusion on each map so that they are not misinterpreted by the public.

6. In time for the Alaska Land Use Council on September 18 (if possible), and certainly in time for actual final printing of the plans, we will prepare the R.S. 2477 maps in a style and quality that matches the maps in the draft publications.

After our meeting, Malcolm, Valerie and I met with Linda and her staff. As several artists, including some in Denver, were involved in production of the draft plans, Linda agreed to obtain copies of the original base maps and the mylar overlays that delineate each park or preserve. With these in hand, we can then complete the assignment of adding the R.S. 2477's in the appropriate artistic style within the tight time frame.

If it is an issue, we will be responsible for the costs of duplicating this art work and for shipping it here via rapid carrier. Please let us know as soon as possible about this matter.

If any of the points of agreement have been stated incorrectly, please let me know in Juneau at 465-4921 and send me your corrections in writing.

RE: R.S. 2477 Rights-of-way- in CSU's

As we agreed in our meeting of July, I am submitting the following list of R.S. 2477 rights-of-way which have been asserted by the State of Alaska for inclusion in nine of the General Management Plans. The list, compiled for each Conservation System Unit, provides for name of each R.S. 2477 trail with a general description of the trail's course.

The corresponding maps which detail the trails within each park system will be delivered to your office on August 18 as planned so that they may be published in the General Management Plans for each Conservation System Unit.

I appreciate your assistance in making this opportunity available for the general public to become aware of these historic rights-of-way. I will be following the progress of the GMP's after your departure from the National Park Service and I am looking forward to seeing the finished product.

Again, thanks for your help and best wishes for an enjoyable retirement.

RE: R.S. 2477's Right-of-way in CSU's

To follow up on the list of trails I submitted on July 31, I have attached a revised list of R.S. 2477 rights-of-way which have been asserted by the State of Alaska for inclusion in the General Management Plans. The list, compiled for each Conservation System Unit, provides the name of each R.S. 2477 trail with a general description of the trail's course.

The corresponding maps which detail the trails within each park system accompany this list so that they also may be published in the General Management Plans.

I appreciate your assistance in assuring that our agreement with Roger Contor is carried out and I am looking forward to seeing the finished product.

SUMMARY OF POSSIBLE RS 2477 RIGHTS-OF-WAY IN NATIONAL PARKS

Alaska's National Parks	# of trails
1. Aniakchak National Monument & Preserve	1
2. Bering Land Bridge National Preserve	13
3. Cape Krusenstern National Monument	2
4. Denali National Park & Preserve	28
5. Gates of the Arctic National Park & Preserve	7
6. Glacier Bay National Park & Preserve*	
7. Katmai National Park & Preserve	3
8. Kenai Fjords National Park*	
9. Kobuk Valley National Park	1
10. Lake Clark National Park & Preserve*	
11. Noatak National Preserve	0
12. Wrangell-St. Elias National Park & Preserve	104
13. Yukon-Charley Rivers National Preserve*	
Total trails	159

* The General Management Plans (GMP's) for these parks were completed before this task force began work.

Trail information was derived from the 1974 Alaska Existing Trails Inventory, however, it is not a complete compilation of all possible RS 2477 rights-of-way in the state.

The GMP's were scheduled to be presented to Congress in December, 1985. This deadline was postponed by NPS on November 20, 1985 and the nine draft plans listed above were released for an additional 60-day comment period which ends on February 9, 1986. The plans will be revised to include additional comments and information, including possible RS 2477 rights-of-way, before being sent to Congress in late spring.

BERING LAND BRIDGE NATIONAL PRESERVE

The following possible R.S. 2477 rights-of-way have been identified within the boundaries of the Bering Land Bridge National Preserve, according to the Alaska Existing Trails System inventory. The trails are listed by quadrangles corresponding to the U.S.G.S. 1:250,000 scale map series for Alaska.

Trail 122 Kougarok River Winter Trail (east of Taylor)

Identification - Quad 110, T5N, R30W, KRM

Description: The trail is located in T5N, R29 & 29W, KRM, also eastern 2/3 of T5N, R30W, T4N, R28W, 29, 30W, T3N, R28, 29, 30W, T2N, R28, 29, & 30W, T1N, R28, 29, 30W.

Trail 123 Noxapaga River Trail (southeast area, near Imuruk Lake)

Identification - Quad 110, T1N, R27W

Description: Boulder Noxapaga River district; trail system located in T1N, R27W, T2N, R26, 27W, T3N, R26, 27W, T4N, R26, 27W, T5N, R25, 26W, KRM.

Trail 160 Dahl Creek/Candle Trail - 140 mile trail (near Inmachuk R.)

Identification - Quad 110, Candle to Kougarok River

Description: The trail runs in a northeasterly direction from Dahl Creek to the Kougarok River, following the east slope of the divide to the head of Boulder where it crosses into Aurora Creek. It follows to the mouth of Aurora Creek, crosses the Norapaga and goes up Berry Creek, crossing the divide to the mouth of the right fork of Good Hope, then up Cottonwood to Divide Creek then up Divide Creek, crossing the divide and following ridge to the Inmachuk River. Trail goes down the Inmachuk to Arizona Creek, then easterly over the divide to Wade Creek, then crossing Wade Creek in an easterly direction to the Kugruk Flats toward the Kugruk River, then easterly over the divide to the mouth of Paterson, then down the Candle. It continues from Candle Creek Road to Candle, with spur running from Camp 19 up Candle Creek about 2 miles.

Trail 213 White Mountain/Kugruk Lagoon Trail (below Imuruk Lake)

Identification - Quad 110, White Mountain to Kugruk Lagoon

Description: The trail runs from 6 miles northwest of White Mountain on Trail 97 going up Fish River thence across Kugruk River over continental divide to Kugruk River then down same to Kugruk Lagoon.

Trail 223 Sullivan Lake (west of Deering)

Identification - Quad 110, Sullivan Lake

Description: The trail runs from Sullivan Lake on Kotzebue Sound southwest to top of ridge, then along top of hill to the head of Hannum Creek and Trail 160.

Trail 224 Kuzitrim/Shishmaref Inlet (above Noxapaga River)

Identification - Quad 110, Shishmaref

Description: The trail goes from the mouth of Kuzitrin River at Mary's Igloo upstream to Noxapaga River up the Noxapaga River to divide, thence following the divide west to Serpentine Hot Springs, Lone Butte Creek, Serpentine Creek, Snowshoe Creek, Eldorado Creek, Bonanza Creek and down to Arctic and then to Shishmaref Inlet following Arctic River.

Trail 226 Fink Creek (east corner of map)

Identification - Quad 110, Fink Creek

Description: The trail is a series of loops and off-shoots from Fink Creek up Pinnell River and along Fairhaven Ditch to Kettle Dome and Imuruk Lake area.

Trail 100 Nome/Shishmaref Coastal Winter Trail (west border of map)

Identification - Quad 111, Nome/Teller/Shishmaref

Description: The trail begins in Nome and follows coastline north across Penny River, Sinuk River around Cape Douglas cutting across peninsula south of Port Clarence, around Cape Riley to Teller. Trail proceeds northwest along coast on both sides of Brevig Lagoon across Lost River through Tin City, around Cape Prince of Wales, along coast past Lopp Lagoon, Ikpek Lagoon and Arctic Lagoon and Shishmaref Inlet to Shishmaref village.

Trail 105 Shishmaref/Teller (near Arctic River)

Identification - Quad 111, Teller Winter Trail

Description: The trail runs from the village of Shishmaref southwest across Shishmaref Inlet to Tin Creek to Kreuger Creek near Ear Mountain down Kreuger Creek to Arctic River upstream to Idaho Gulch, crossing to the north fork of the Nuluk River and down the Nuluk to junction of south fork. Proceeds down south fork crossing a divide to Arctic Creek downstream to Short Creek, thence to the Agiapuk River, crossing that river and following upstream on Dese Creek to headwaters of Bay Creek and south to Teller.

Trail 106 Shishmaref/Teller - east route winter trail (near Arctic River)

Identification - Quad 111, Shishmaref

Description: The trail runs from the village of Shishmaref east across inlet to the mouth of the Savagvich River upstream to Bonanza Creek to headwaters crossing over to Portage Creek then downstream to cross and follow upstream on the west Agiapuk River turning south near Trail 105 to Bay Creek near Teller.

Trail 124 Serpentine Hot Springs/Budd Creek (near Serpentine Hot Springs)

Identification - Quad 111, T3, 4, 5N, R29, 30, 31, 32 & 35W, KRM

Description: The trail starts from Serpentine Hot Sprins and runs west across Mukluk Creek turning southwesterly to Bryan Creek following same past McKinley Creek across to south fork of Serpentine River dividing with one spur running south up Star Creek then across continental divide to tributary of Budd Creek. The other spur runs west to Quartz Creek and along same to its head and across continental divide to east Portage then south to mouth of Eldorado Creek at confluence of Budd Creek.

Trail 107 Killeak Lake/Otz Sound (near Kotzebue Sound)

Identification - Quad 113, T11N, R24 & 25W KRM

Description: The trail runs in T11N, R24 & 25W KRM approximately 5 miles from North Killeak Lake to coast on Kotzebue Sound.

Trail 223 Kotzebue/Sullivan Lake (near Deering)

Identification - Quad 113, Sullivan Lake

Description: The trail runs from Sullivan Lake on Kotzebue Sound south to top of ridge, then along top of hill to head of Hannum Creek and Trail 160.

DENALI NATIONAL PARK AND PRESERVE

The following possible R.S. 2477 rights-of-way have been identified within the boundaries of the Denali National Park & Preserve, according to the Alaska Existing Trails System inventory. The trails are listed by quadrangles corresponding to the U.S.G.S. 1:250,000 scale map series for Alaska.

Trail 16 (no name) winter trail (southcentral end of map)

Identification - Quad 81, T29N, R10 & 9W

Description: The trail runs northwest through Dutch Hills to Bear Creek taking a turn here and running parallel to Dutch Creek almost as far as Stony Creek.

Trail 18 (no name) (southcentral end of map)

Identification - Quad 81, T26N, R12-8W

Description: The trail leaves townsite of Peters Creek via Black Creek following up to cross Spruce Creek, Fox Gulch, going by Sunset up to Granite Creek then going down through the landing strip at Treasure Creek, crossing lake, Sunflower & Camp Creeks, through Collinsville cross land to Clearwater Creek ending at Youngstown bend on the Yentna River.

Trail 90 (no name) (west border of map)

Identification - Quad 81, Telida southeast to Little Mt. Mine

Description: The trail runs from Telida southeast to Slow Fork, southeast along Slow Fork to Slow Fork Hills, thence east along north side of Slow Fork Hills, thence southerly along base of hills to approximately T20S, R27W, FM thence southeast over Giles Lake and to edge of map at T22S, R25W, FM.

Trail 6 Bull River Road (near George Parks Highway)

Identification - Quad 87, T20S, R10W, FM

Description: The trail runs from Colorado on the Alaska RR across Bull River and on the west fork of the Chulitna River to the Golden Zone Mine.

Trail 7 Dunkle Mine Road (near George Parks Highway)

Identification - Quad 87, T19S, R10W

Description: The trail runs from Bull River up to the Dunkle Mine a distance of about 3.5 miles.

Trail 8 Savage River Trail (above Sanctuary River, east part of map)

Identification - Quad 87, T14S, R9W, FM

Description: The trail runs from Savage River campground up the Savage River about 8 miles.

Trail 9 Igloo Mt. Ranger Station Trail (near McKinley Village)

Identification - Quad 87, T14S, R9W, FM

Description: The trail runs from McKinley Park Road to ranger cabin.

Trail 10 Lignite to Clearwater Fork (west of Nenana River)

Identification - Quad 87, T12S, R12W

Description: The trail runs from Lignite Station (mile 363 on RR) west across Middle, Chisana & Toklat Rivers up Crooked Creek and down Bearpaw River to Glacier City and from there up Moose Creek terminating at Kantishna P.O.

Trail 11 Windy Creek Trail (above Cantwell)

Identification - Quad 87, T17S, R7W

Description: The trail runs from Cantwell - one branch goes up Windy Creek to a cabin just outside Denali National Park boundary. The other branch goes downstream to the Alaska RR about 4 miles from Cantwell.

Trail 13 Diamond/Bearpaw (sled road) (north end of map)

Identification - Quad 88, T11S, R17W, FM

Description: The trail runs from Bearpaw up the Bearpaw River to Diamond.

Trail 84 Kantishna/Moose Creek Trail (below Kantishna River)

Identification - Quad 88, Kantishna River, T11S, R19W, FM

Description: The trail runs from Jct. with Kantishna Trail (Rex/Eureka Creek) at the Kantishna River T11S, R19W, FM, southeast to Jct. with Kantishna Trail at lower canyon on Moose Creek, T15S, R18W, FM.

Trail 84A (loop trail) (loop off 84)

Identification - Quad 88, T14S, R19W, FM

Description: The trail runs from jct. with Trail 84 near Kantishna River due south for approximately 9 miles then southeast to connect with #84 in T14S, R19W, FM (loop & spur also).

Trail 85 Jct. of Trail 84 - Glacier/Caribou Creek (below Stampede)

Identification - Quad 88, Glacier/Caribou Creek, T13S, R19W, FM

Description: The trail runs from Jct. with 84 in T13S, R19W, FM due east for six miles, thence south to Glacier, from Glacier south on the divide between Glacier Creek and Caribou Creek to the base of Glacier Peak, thence north to Caribou Creek, thence upstream on Caribou Creek to a cabin about two miles east of Crevice Creek; T15S, R16W, FM.

Trail 86 Kantishna/Glacier Creek (above Kantishna)

Identification - Quad 88, Kantishna Trail to Glacier Creek

Description: The trail runs from Jct. with Kantishna Trail near Canyon Creek northeast across Flat Creek to a cabin on Glacier Creek.

Trail 87 Fish Lake to Deep Creek (northwest corner of map)

Identification - Quad 88, T14S, R26W, FM

Description: The trail runs from a cabin on Fish Lake T16S, R26W, FM north to Deep Creek T14S, R26W, FM.

Trail 89 Toklat River/Lake Minchumina/Telida (northwest corner of map)

Identification - Quad 88, T26S, R24E, KRM

Description: The trail begins on Kantishna Trail in T10S, R15E, FM and runs northwest to Bearpaw thence southwest to Kantishna River jct. with Kantishna trail at Kantishna River westerly to village of Lake Minchumina, thence southwesterly via Thirty Eight Mile Lake to Highpower Creek, thence down Highpower Creek to north shore of Lower Telida Lake, to west of lake and thence south to Telida, westerly across north fork crossing the southwest corner of T24S, R26E, thence southwest to Berry Lake and continues to end of trail in T26E, KRM.

Trail 92 Kantishna/Slate Creek (above Wonder Lake)

Identification - Quad 88, Kantishna/Slate Creek, T16S, R18W, FM

Description: The trail runs from Kantishna southwest on Eldorado Creek and Slate Creek ending at a mine; T16S, R18W, FM.

Trail 171 Lignite/Kantishna Trail - 85 mile trail (northeast corner)

Identification - Quad 88, Part of Trail 87-10

Description: The trail runs from Lignite Station (mile 363 on RR) west across middle Chisana and Toklet River up Crooked Creek and down Bearpaw River to Glacier City; from there up Moose Creek terminating at Kantishna P.O.

Trail 172 Kantishna Trail (above Kantishna)

Identification - Quad 88, Kantishna Trail

Description: The trail runs from Rex westerly across Teklanika River and Toklat River thence southwesterly along Toklat River to Little Bear Creek then up Little Bear Creek to head; then south to Crooked Creek, then westerly up to Crooked Creek and over Kantishna Hills to Bearpaw Creek, then down Bearpaw Creek to Glacier; then south to Lower Canyon; then along Lower Canyon to Kantishna.

Trail 173 Diamond/Glacier Trail (northcentral part of map)

Identification - Quad 88, Diamond/Glacier

Description: The trail runs from Diamond up Moose Creek and down to Glacier.

Trail 174 - part of Kantishna Trail (below Stampede)

Identification - Quad 88, Mt. McKinley Nat'l Park Point/Kantishna

Description: The trail begins from the jct. of Trail 237 on the west side of the Toklat River southerly along the foothills of the Kantishna Hills and west of the Clearwater Creek to the jct. of Trail 92 near Kantishna, 33 miles.

Trail 237 Rex/Kantishna Trail (above Stampede)

Identification - Quad 88, T13S, R14W, FM

Description: The trail runs from Rex westerly paralleling Bearpaw Trail (Kantishna Trail) to Toklat River gradually curving south to the Toklat River thence up the Toklat to Jct. of Trails 171 and 257 in T13S, R14W, FM.

Trail 244 Roosevelt - Unnamed lake (north border of map)

Identification - Quad 88, T10S, R18W

Description: The trail runs from Kantishna River at a point almost due south of Bearpaw Mountain T10S, R18W, to an unnamed lake T11S, R18W, approximately 4 miles.

Trail 245 Cutoff on Kantishna Trail (north border of map)

Identification - Quad 88, T10S, R15W

Description: The trail runs from jct. 237 and 172 at the Toklat River thence southwest to about 6 miles past Nineteen Mile in T10S, R15W; then south to a point between Nineteen Mile and Bearpaw; thence southwesterly to Diamond.

Trail 252 Diamond (winter trail) (northcentral part of map)

Identification - Quad 88, T11S, R18W

Description: The trail runs from Diamond northwesterly to intersect with winter trail (89) in T11S, R18W.

Trail 253 Kantishna/Glacier/Diamond Loop (northcentral area)

Identification - Quad 88, T13 & 14S, R18N, FM

Description: The trail is a loop bypassing Glacier off of Trail 172 (Kantishna) to Trail 173 (Diamond/Glacier); T13 & 14S, R18N, FM.

Trail 256 McKinley River/Wonder Lake (near Wonder Lake)

Identification - Quad 88, McKinley River/Wonder Lake

Description: The trail is a short independent trail between McKinley River and Wonder Lake beginning at McKinley River; thence north on a curve to the west to Wonder Lake.

Trail 257 10 mile branch from Trail 171 (northeast portion of map)

Identification - Quad 88, T13S, R14W, FM

Description: The trail begins on Trail 171 on the Toklat River at T13S, R14W; thence east 10 miles crossing the Wigand Creek; T12S, R13W.

GATES OF THE ARCTIC NATIONAL PARK AND PRESERVE

The following possible R.S. 2477 rights-of-way have been identified within the boundaries of the Gates of the Arctic National Park and Preserve, according to the Alaska Existing Trails System inventory. The trails are listed by quadrangles corresponding to the U.S.G.S. 1:250,000 scale map series for Alaska.

Trail 51A (from jct. of Trail 51 Wiseman/Chandalar River Trail) (east side of map, above Wiseman)

Identification - Quad 124, T30N, R5W,FM

Description: Trail 51A runs from Jct. with Trail 51 west of confluence of north fork of Koyukok River and Hammond River northerly on west bank of Hammond River to Canyon Creek T31N, R12W.

Trail 56 Ned's Lake/Smith Creek Dome Trail (near Dalton Highway)

Identification - Quad 124, T20N, R23W, FM

Description: The trail begins at Ned's Lake and Jct. with 63 in T20N, R23W, FM, thence east and north along the Koyukuk River to Bettles, thence continuing along the Koyukuk and the middle fork of the Koyukuk on the south side through Tramway Bar and Coldfoot and onto Wiseman, thence up the Wiseman Creek to Nolan Creek and Nolan, thence up Nolan Creek to Smith Creek Dome.

Trail 56A Nolan/Mascot Creek Trail (near Wiseman)

Identification - Quad 124, T13N, R13W, FM

Description: The trail runs from Nolan westerly through Glacier Pass to Clacier River thence crossing Glacier River northwesterly to Mascot Creek, T31N, R13W.

Trail 60 Bettles/Quartz Creek (near Koyukuk River)

Identification - Quad 124, Bettles

Description: The trail begins at Bettles, thence east to Bettles field, thence south of Birch Hill, crossing the Koyukuk River and traveling north of the middle fork of the Koyukuk River; thence along the fork past 12 Mile Mountain to the fork of Porcupine and Quartz Creek.

Trail 60A Spur connecting Trails 60 & 56 (near Dalton Highway)

Identification - Quad 124, Bettles

Description: The trail begins on Trail 60 at Mailbox Creek thence south to Tramway Bar.

Trail 164 Alatna/Shungnak/Kotzebue (southwest corner of map)

Identification: Quad 116, Hughes

Description: The trail extends up Alatna River to point east of Norutak Lake, then across to Lake, across Lake thence over to Kobuk River and up Kobuk River.

Trail 289 Hickel Highway (center of map)

Identification - Quad 124, Livengood - Sagwon

Description: The trail runs from Livengood northerly via Trails 49 to Bettles Field, 59A north to Ninemile Cabin, thence easterly around Ninemile Hills to Death Valley, thence 59 to Crevice Creek, thence northerly along John River to Anaktuvuk Pass, thence northerly along Anaktuvuk River to Schrar Bluff, thence northeasterly to the Itkillik River, thence easterly across the Kupuruk River to the Tookik River, thence northerly along Tookil for approximately 4 miles thence northeasterly and southeasterly around base of ridge, thence southerly on Sagavanirktok River to Sagwon.

WRANGELL - ST. ELIAS NATIONAL PARK AND PRESERVE

The following possible R.S. 2477 rights-of-way have been identified within the boundaries of Wrangell-St. Elias National Park & Preserve according to the 1974 Alaska Trails System inventory. The trails are listed by quadrangle corresponding to the U.S.G.S. 1:250,000 scale map series for Alaska.

Trail 6 Malaspina Glacier Trail (above Yakutat Bay)

Identification - Quad 46, T24& 25S, R 30, 31, & 32E, CRM

Description: The trail runs from Grand Wash to Manby Stream.

Trail 4 Tana River Trail (above Chugach Mountains)

Identification - Quad 65, T10, 11,12S, R15E, CRM

Description: The trail connects to 87-33 at north edge of map on east side of Tana River. Ends on east side of Tana River at Tana Glacier.

Trail 1 Nugget Creek Extension (west of McCarthy)

Identification - Quad 67, T4S, R7, 8E, CRM

Description: The trail starts on Strelna-Kuskalana Road in Sec 12, T4S, R7E. CRM and ends in Sec 35, T2S, R9E, CRM.

Trail 2 Copper River/Chitina/McCarthy Jeep Trail (southeast of Chitina)

Identification - Quad 67, T4S, R5E to T5S, R14E

Description: The trail runs from town of Chitina in T4S, R5E to town of McCarthy in T5S, R14E.

Trail 3 Dan Creek (southeast of McCarthy)

Identification - Quad 67, T6S, R15, 16E, CRM

Description: The trail begins at May Creek in Sec 15 T6S, R15E and ends at Dan Creek Camp in Sec 4, T6S, R16E.

Trail 4 Rex Creek Trail (southeast of McCarthy)

Identification - Quad 67, T6S, R15, 16E, T7S, R16E, CRM

Description: The trail begins at May Creek in Sec 15, T6S, R15E and ends at 3500' elevation in Sec 27, R6S, R16E up Rex Creek.

Trail 5 Baultoff Lake Road (southeast of McCarthy)

Identification - Quad 67, T6S, R14, 15E, CRM

Description: The trail begins in McCarthy, Sec 19, T5S, R14E and ends in May Creek Sec 15, T6S, R15E. Connects to Trail 67-7 in Sec 7, T6S, R15E.

Trail 6 McCarthy/May Creek Road (south of McCarthy)

Identification - Quad 67, T5S, R14E, CRM

Description: The trail begins in McCarthy, Sec 19, T5S, R14E and ends in May Creek Sec 15, T6S, R15E. Connects to another trail 67-7.

Trail 7 Jake's Bar Trail (south of McCarthy)

Identification - Quad 67, T6S, R14, 15E, T7S, R14E, CRM

Description: The trail begins on McCarthy-May Creek Road in Sec 7, T6S, R15E, and ends at Jake's Bar landing strip in Sec 34, T7S, R14E, another trail continues southwest.

Trail 8 (no name) (south of McCarthy)

Identification - Quad 67, T7S, R14E, T8S, R12, 13, 14S, T9S, R11, 12S, (trail to mine).

Description: The trail begins at Jake's Bar landing strip in Sec 34, T7S, R14E and ends at Bremner Mine in Sec 10, T10S, R11E.

Trail 9 McCarthy/Kennicott Road (north of McCarthy)

Identification - Quad 67, T4, 5S, R14E, CRM

Description: The trail begins in McCarthy Sec 16, T5S, R14E and ends in Kennicott Sec 33, T4S, R14E, mine road.

Trail 10 (no name) (east of McCarthy)

Identification - Quad 67, T6S, R16, 17E, CRM

Description: The trail begins in Dan Creek Camp Sec 4, T6S, R16E, CRM and ends in SW 1/4, Sec 1M, T6S, R17E near the headwaters of Copper Creek.

Trail 11 (no name) (east of McCarthy)

Identification - Quad 67, T5, 6S, R16E, CRM

Description: The trail begins in Dan Creek Camp, Sec 4, T6S, R16E and ends up valley in Sec 34, T5S, R16E.

Trail 12 (no name) (east of McCarthy)

Identification - Quad 67, T6S, R11E, CRM

Description: The trail begins on Trail 67-3 in NW 1/4 Sec 12 and ends by cabin on Nizina River on wedge, Sec 1.

Trail 13 (no name) (east of McCarthy)

Identification - Quad 67, T6S, R14, 15E, T5S, R15E, CRM

Description: The trail begins on Trail 67-6 in wedge Sec 1, T6S, R14E, and ends by creek in Sawmill Gulch in Sec 34, T5S, R15E.

Trail 14 (no name) (southwest of McCarthy)

Identification - Quad 67, T6S, R11, 12E, CRM

Description: The trail begins on old railroad grade near west end of Long Lake in Sec 5, T6S, R12E and ends in SE 1/4 Sec 12 T6S, R11E.

Trail 15 (no name) (east of McCarthy)

Identification - Quad 67, T5S, R17E, CRM

Description: The trail begins by Glacier Creek landing area in Sec 9 and ends by mines in Sec 16 and east side of Sec 28.

Trail 16 (no name) (southeast of Kennecott)

Identification - Quad 67, T5S, R15, 15E, T4S, R14E, CRM

Description: The trail begins in McCarthy in Sec 16 T5S, R14E and ends at mine in Sec 14, T4S, R14E.

Trail 17 (no name) (east of McCarthy)

Identification - Quad 67, T5S, R15E, CRM

Description: The trail begins on Trail 67-16 in Sec 7 and ends at Nikolai Mine in Sec 2.

Trail 18 (no name) (west of McCarthy)

Identification - Quad 67, T5S, R13, 14, CRM

Description: Trail begins in McCarthy T5S, R14E and ends at cabins in northeast corner of Sec 24, T5S, R13E.

Trail 19 (no name) (west of McCarthy)

Identification - Quad 67, T5S, R13E, CRM

Description: Trail begins on Trail 67-2 in Sec 27 and ends at cabins in southwest corner of Sec 19.

Trail 20 Goat Trail (east of Kennecott)

Identification - Quad 67, T4S, R17, 18E, CRM

Description: The trail begins in Sec 13, T4S, R17E and ends on Skolai Creek in Sec 7, T3S, R19E.

Trail 21 (may be Skolai Creek Trail) (joina Trails 34 & 35)

Identification - Quad 67, T3S, R18, 19E, CRM

Description: Trail begins by landing area in Sec 5, T3S, R19E and ends at Tinplate Hill in Sec 24, T2S, R16E.

Trail 22 Mine Trail (Kennecott)

Identification - Quad 67, T4S, R14E, CRM

Description: Trail begins in Kennecott T4S, R14E and ends at mines in Sec 15, 22, and 23.

Trail 23 (no name) (east of Chitina)

Identification - Quad 67, T3S, R9E, CRM

Description: Trail begins by cabin on Kuskulena River in south 1/2 Sec 28 and ends by cabins up McDougal Creek near edge of Sec 34.

Trail 24 Geohenda Trail (See trail 84-49) (east of Chitina)

Identification - Quad 67, T1, 2N, R19, 20E, CRM

Description: Trail begins at landing area T1S, R20E and proceeds in a northwest direction ending in T2N, R19E. Trail between Chisana and headwaters of White River.

Trail 26 Hanagita Trail (See Trail 68-54) (south of Chitina River)

Identification - Quad 67, T7S, R8, 9, 10E, CRM

Description: Trail begins in Taral in Valdez Quad, McCarthy Quad - begins Hanagita River in T7S, R8E reported as far as Tana River 5 miles up from mouth.

Trail 27 Branch of Hanagita Trail (above Chitina River)

Identification - Quad 67, T7S, R9, 10E, T6S, R10 to 16E, CRM

Description: The trail begins on Hanagita Trail 67-26 near Hanagita Lake in T7S, R9E follows east bank of Nizina River in part to place called Nikolai house (may be near Dan Creek Camp T6S, R16E).

Trail 28 Kotsina Trail (See trail 68-8) (below Wrangell Mountains)

Identification - Quad 67, T1S, R8E, CRM

Description: Trail begins in Valdez Quad, follows Kotsina River and various branches to glaciers.

Trail 29 Part of Kotsina Trail (below Wrangell Mountains)

Identification - Quad 67, T3, 2S, R8E, CRM

Description: The trail begins on Trail 67-28 near Rock Creek; ties to Strelna Creek via Dixie Pass.

Trail 30 To Nikolai Mine (west of McCarthy)

Identification - Quad 67, T3S, R9E, CRM

Description: The trail begins or continues from Trail 67-11 in T3S, R9E, CRM and ends or continues on as Trail 67-19, 67-2, 67-16 and 67-17.

Trail 31 Old Trail to Nikolai Mine (near McCarthy)

Identification - Quad 67, McCarthy Quad

Description: Trail begins on 67-30 near Lakina River route via north side of Fireweed Mountain to Kennicott Glacier and down to present site of McCarthy.

Trail 32 (no name) (near McCarthy)

Identification - Quad 67, T5S, R15E, CRM

Description: Trail begins 6 miles up McCarthy River over low mountains to Nizina River.

Trail 33 Tana River Trail (See Trail 65-4) (above Chugach Mountains)

Identification - Quad 67, T8S, R14, 15E, CRM

Description: Trail begins on Chitina River, east of mouth of Tana River and continues beyond south edge of map on east side of Tana River, see 97-4.

Trail 34 Nizina/Chisana Trail (east of McCarthy)

Identification - Quad 67, T3N, R18E, CRM

Description: The trail begins in Nizina T6S, R16E through Dan Creek Camp and ends in Chisina.

Trail 35 Nizina/Chisana Trail (See Trail 67-21) (northeast of Kennecott

Identification - Quad 67, McCarthy

Description: Trail leaves Dan Creek Camp, going up Nizina Glacier through Chisana Pass, down Chisana Glacier to Chisana.

Trail 37 Nizina/Chitina River Trail (above Chugach Mountains, inside Preserve boundary)

Identification - Quad 67, T6, 7S, R15E, T8S, R15, 16, 17, 18, E, CRM

Description: The trail runs from the Nizina River approximately T6S, R15E, CRM up Chitina River near Hawkins Glacier.

Trail 38 White River Trail (along White River)

Identification - Quad 67, White River

Description: The trail leaves Trail 67-34 near Solo Creek, going west down White River to the Canadian border.

Trail 1 Copper River Bluff Trail (northeast of Tonsina)

Identification - Quad 68, T1N, R2E, CRM

Description: Trail begins on Edgerton Highway mile 3.9 in Sec 6, T1S, R2E, CRM and ends 1/2 mile northwest in Sec 31, T1N, R2E.

Trail 3 Short Lake Trail (east of Chitina)

Identification - Quad 68, T4S, R7E, CRM

Description: Trail begins at mile 9.6 Chitina/McCarthy Road in Sec 1, T4S, R7E and ends 1/4 mile south on Short Lake in Sec 18.

Trail 4 Ghost Lake Trail (east of Chitina)

Identification - Quad 68, T4S, R7E, CRM

Description: Trail begins at mile 10.2 Chitina/McCarth Road in Sec 17, T4S, R7E and ends on northwest end of Ghost Lake in Sec 17.

Trail 5 Strelna Lake Trail (east of Chitina)

Identification - Quad 68, T4S, R7E, CRM

Description: Trail begins at mile 9.7 Chitina/McCarthy Road in Sec 18, T4S, R7E and ends at southeast end Strelna Lake in Sec 18.

Trail 8 Kotsina Trail & Strelna Road (See Trail 67-28) (east of Chitina)

Identification - Quad 68, T4S, R7E, CRM

Description: Trail begins in Strelna in Sec 22, T4S, R7E; road ends. Trail begins in Sec 19, T3S, R7E trail ends at cabins in Sec 12, T2S, R7E.

Trail 9 (may be Elliot Creek Trail) (northeast of Chitina)

Identification - Quad 68, T4, 3, 2S, R7E, CRM

Description: Trai begins on Strelna/Kuskaluna Road in Sec 1, T4S, R7E and ends at cabins near Rainbow Creek Sec 34, T2S, R7E.

Trail 16 Liberty Creek Trail (north of Chitina)

Identification - Quad 68, T3S, R5E, CRM

Description: Trail begins approximately 10.4 miles north of Chitina, up north side of Liberty Creek 2 miles.

Trail 18 Chitina/McCarthy Jeep Trail (east of Chitina)

Identification - Quad 68, T4S, R5, CRM

Description: Trail begins in Chitina T4S, R5E ends on east maps edge in Sec 32, T4S, R8E, connects to 87-2.

Trail 24 Old Railroad Bed (winter river route to Taral) (south of Chitina)

Identification - Quad 68, T4S, R5E, CRM

Description: Trails runs from Chitina south on west side of Copper river in Woods Canyon to Whiting Falls.

Trail 35 Copper River Bluff Trail (south of Copper Center)

Identification - Quad 68, R1N, R1E, CRM

Description: Trail runs 3.9 miles down Edgerton cut-off from Richardson Highway along west bluff of Copper River above Lower Tonsina toward Copper Center.

Trail 49 (no name) (west of Wrangell Mountains)

Identification - Quad 68, T1N, R4E, CRM

Description: Trail begins by lake in Sec 14, T1N, R4E and ends in sec 14, T2N, R5E.

Trail 59 Hanagita Trail (See Trail 54 & 67-26) (southeast of Chitina)

Identification - Quad 68, T4S, R6E, CRM

Description: Trail begins in Taral in T4S, R5E goes off east map edge south of Hanagita in T7S, R8E, see 67-26.

Trail 56 (no name) (east of Chitina)

Identification - Quad 68, T4S, R7E, CRM

Description: Trail begins on Trail 68-8 approximately Sec 1, T4S, R7E ends on east map edge near Strelna Creek.

Trail 57 (no name) (northeast of Chitina)

Identification - Quad 68, T2S, R6E, CRM

Description: Trail begins on Trail 86-8 near Sec 28, T2S, R6E ends on 86-9 near Sec 29, T2S, R7E.

Trail 58 (no name) (north of Chitina)

Identification - Quad 68, T3S, R5E, CRM

Description: Trail begins on Copper River between Horse Creek and Kuslina Creek in T3S, R5E, ends on 86-8 near Sec 11, T3S, R6E.

Trail 59 (no name) (north of Chitina)

Identification - Quad 68, T2S, R6E, CRM

Description: Trail begins on 86-58 in Sec 31; ends on 86-8 in Sec 28.

Trail 82 Tonsina River to Taval (north of Chitina)

Identification - Quad 68, Valdez

Description: Trail runs from north bank of Copper River opposite Tonsina River mouth to Taval on Copper river and several miles south.

Trail 83 Millard Trail (See Trail 83-69) (east of Copper Center)

Identification - Quad 68, T2N, R1E, CRM

Description: Trail begins on Copper River opposite Klutina River mouth, continues off north edge of map in T3N, R1E, by Klawasi Road.

Trail 84 Trail to Elliot Pack-dog Sled (near Chitina)

Identification - Quad 68, T2S, R6E, CRM

Description: Trails begins on RR near mouth of Chitina River, ends at Elliot Creek.

Trail 87 Nugget Creek Extension (east of Chitina)

Identification - Quad 68, T4S, R7E, CRM

Description: Trail starts on Strelna/Kuskalana Road in Sec 1, T4S, R7E; ends in SEc 35, T2S, R9E.

Trail 11 Valley Overlook Jeep Trail (north border of map)

Identification - Quad 83, T11N, R6E, CRM

Description: Trail begins at milepost 52. Tok Cutoff Sec 23, T11N, R6E, CRM and ends 1/2 mile south in Sec 26 T11N, R6E, CRM.

Trail 14 (no name) (north border of map)

Identification - Quad 83, T10N, R5E, CRM

Description: Trail begins off Glenn Highway (Tok Cutoff) at milepost 40.1, Sec 17, T10N, R5E, CRM and ends approximately 1/4 mile south at or near Copper River.

Trail 29 (no name) (north border of map)

Identification - Quad 83, T10N, R4E, CRM

Description: Trail begins on Glenn Highway in east 1/2 Sec 34 and ends on Glenn Highway in north edge of Sec 25.

Trail 35 (no name) (near Glennallen)

Identification - Quad 83, T5N, R1W, CRM

Description: Trail runs from mile 120.8 on Richardson Highway to the bluff of the Copper River 2 miles.

Trail 58 (no name) (above Sanford River)

Identification - Quad 83, T8N, R3E, CRM

Description: Trail runs north from Slana to Tok to highway at milepost 21.7 parallels highway from milepost 21.7 to 24.3 3/4 mile.

Trail 64 (no name) (above Sanford River)

Identification - Quad 83, T7N, R2E, CRM

Description: Trail runs south from milepost 15.1 to mouth of Tulso Creek 3/4 mile.

Trail 66 (no name) (north border of map)

Identification - Quad 83, T11N, R7E, CRM

Description: Trail runs south from milepost 57.9 past east end of Cobb Lakes to a homestead on south side of Cobb Lake 2 miles.

Trail 69 Millard Trail (also #68-83) (near north border of map)

Identification - Quad 83, T3N, R1E, CRM

Description: The trail begins at map edge in T3N, R1E, CRM and ends eventually at Slana River in Mentasta Pass; probably leaves this map on east edge in T11N, R7E.

Trail 1 (no name) (near Nabesna River)

Identification - Quad 84, T5N, R14E

Description: Trail begins at Nabesna, Sec 21, T7N, R13E, shows continuation to Orange Hill, Sec 21, T5N, R14E.

Trail 2 Tanada Lake Trail (above Copper Lake)

Identification - Quad 84, T7N, R11E, CRM

Description: Trail begins from Nabesna Road in Sec 21, runs 15 miles and connects with Goat Creek and Pass Creek Trail south of Tanada Lake.

Trail 3 Soda Creek Trail (above Nabesna River)

Identification - Quad 84, T9N, R13E

Description: Trail begins on Platinum Creek Trail in Sec 34; ends on Tatschunda Creek in Sec 3, approximately 8 miles plotted.

Trail 4 Chalk Creek Trail (near north border)

Identification - Quad 84, T9N, R12E

Description: Trail begins at mile 31.8 Nabesna Road and ends at Platinum Creek Trail in Sec 30.

Trail 5 Platinum Creek Trail (near north border)

Identification - Quad 84, T8N, R13E

Description: Trail ties to Chalk Creek in Sec 30, continuing down Tetlin River and into T14N, R14E.

Trail 6 Lost Creek Trail (near north border)

Identification - Quad 84, T9N, R12E

Description: Trail begins identical to Chalk Creek Trail mile 31.5 Nabesna Road and ends at 5000' elevation in Sec 26.

Trail 7 Trail Creek Trail (near north border)

Identification - Quad 84, T9N, R11E, CRM

Description: Trail begins at Mile 29, Nabesna Road in Sec 31, T9N, R12E, ends above 5000' elevation in Sec 24.

Trail 8 (no name) (near north border)

Identification - Quad 84, T9N, R11E, CRM

Description: Trail begins on Nabesna Road near west edge of Sec 30 and ends at east end of Jack Lake in Sec 36.

Trail 9 Jack Lake Road (near north border)

Identification - Quad 84, T9N, R11E, CRM

Description: Trail begins on Nabesna Road at mile 26.1 in Sec 22 and ends on north shore of Jack Lake in Sec 35.

Trail 10 (no name) (near north border)

Identification - Quad 84, T9N, R10E, CRM

Description: Trail begins on unnamed trail paralleling Nabesna Road in Sec 11 and ends near 4000' elevation in Sec 25.

Trail 11 (no name) (near north border)

Identification - Quad 84, T9N, R10E, CRM

Description: Trail begins on unnamed trail paralleling Nabesna Road in Sec 11 and ends near 4000' elevation in Sec 25.

Trail 12 Suslota Creek Trail (near north border of map)

Identification - Quad 84, T11N, R10E, CRM

Description: Trail begins on Nabesna Road, Sec 26 crosses unnamed trail approximately 1 mile northeast and ends about 3100' elevation in Sec 34. May be connecting trail to Suslota Pass.

Trail 13 (no name) (near north border of map)

Identification - Quad 84, T9N, R10-11E, CRM

Description: Trail parallels Nabesna Road approximately 1 mile north in Sec 15 and ends on Nabesna Road near Rock Creek in Sec 18.

Trail 14 Copper River Trail (near Copper Lake)

Identification - Quad 84, R9N, R9E, CRM

Description: Trail accesses from Nabesna Road, Sec 17 & 21. Begins in Batzulnetas Village Sec 29 and ends in Sec 10.

Trail 22 Pass Creek Trail (near Nabesna River)

Identification - Quad 84, T6N, R11, 12, 13E, T7N, T13E, CRM

Description: The trail begins at Nabesna, Sec 21, T7N, R13E, and connects to Goat Creek Trail, Sec 34, T7N, R11E.

Trail 23 Goat Creek Trail (west of Nabesna River)

Identification - Quad 84, T5, 6, 7N, R11E, CRM

Description: The trail begins at south end of Tanada Lake, T7N, R11E, connects to Pass Creek Trail, Sec 34, T7N, R11E and ends approximately 1 mile south of Grizzly Lake, Sec 22, T5N, R11E.

Trail 24 (no name) (north of Nabesna River)

Identification - Quad 84, T5-7N, R14E, CRM

Description: Trail begins on Nabesna Road Sec 4, ties to Reeve Field, Sec 18 and ends at Orange Hill in Sec 17.

Trail 28 Platinum Creek Trail (near north border)

Identification - Quad 84, T8N, R13, 14E, T9, 10N, R13E, CRM

Description: The trail is on the floor of Platinum Creek Valley, running from the mouth of Platinum Creek on Nabesna River, northwest up Platinum Creek to trail system near Lost Lake, then north up Platinum Creek to Pass to Tetlin River Valley approximately 20 miles.

Trail 29 Twin Lakes Trail (northeast of Copper Lake)

Identification - Quad 84, T9N, R11E, CRM

Description: Trail runs from the road through campground and south 1/4 mile to Lake.

Trail 30 Big Grayling Lake Trail (near north border of map)

Identification - Quad 84, T9N, R11-13E, CRM

Description: Trail runs north of Nabesna Road, west of Devil's Mountain Range, from area near crossing of Little Jack Creek due east toward Big Grayling Lake approximately 10 miles.

Trail 33 Suslota Lake Trail (see 84-34) (near north border)

Identification - Quad 84, T11-12, R10E, CRM

Description: Trai runs north from milepost 72.8 to south corner of Suslota Lake, then up Suslota Creek north to Suslositna Creek toward Mable Creek.

Trail 36 Suslotna Pass Trail (near north border)

Identification - Quad 84 T10-12N, R9E, CRM

Description: Trail runs north of milepost 76 Nabesna Road past east side of Suslota Lake up Suslositna Creek into Little Tok drainage 15-20 miles.

Trail 38 Tanada Creek Trail (near north border)

Identification - Quad 84, T9-10N, R9E, CRM

Description: Trail runs 1/2 mile east of first bridge over Caribou Creek southwest of milepost 75.1 across Tanada Creek to connect with the Copper River Trail 3 miles.

Trail 40 (no name) (near north border)

Identification - Quad 84, T9N, R10E, CRM

Description: Trail runs north and west of milepost 81.3 Nabesna Road toward ridge of Mentasta Mountains 4-5 miles.

Trail 43 (no name) (near east border of map)

Identification - Quad 84, T3N, R23-24E, CRM

Description: Trail runs from south edge map Sec 32 from Chisana via Trail 78-45 east edge map Sec 21 into Canada.

Trail 44 (no name) (near east border of map)

Identification - Quad 84, T3N, R24E, CRM

Description: Trail leaves Trail 78-43 in Sec 8 off east edge map in Sec into Canada.

Trail 45 (no name) (near east border)

Identification - Quad 84, T3N, R20, 21E, CRM

Description: The trail runs southeast of town of Bonanza and branches off along Beaver and Carl Creeks.

Trail 46 (no name) (below Chisana River)

Identification - Quad 84, T3N, R18E, T4N, R19#, CRM

Description: The trail begins in Chisina, Sec 1, T3N, R18E. One end on trail 78, A245, in Sec 4, T3N, R19E. Second end near Big Eldorado Creek in Sec 16, T4N, R19E.

Trail 47 (no name) (below Chisana River)

Identification - Quad 84, A2, T4N, R20E, CRM

Description: The trail begins on Trail 78-A2-JK in Sec 31 and ends in Sec 22.

Trail 48 (no name) (below Chisana River)

Identification - Quad 84, T4N, R19, 20E, CRM

Description: The trail begins on Trail 78 A2-47 in Sec 29, T4N, R20E and ends in Sec 15, T4N, R19E. Spur up Bonanza Creek in Sec 25, T4N, R19E.

Trail 49 Geohenda Trail (continues as 67-24) (below Chisana River)

Identification - Quad 84, T3N, R18, 19E, CRM

Description: The trail begins in Chisina, Sec 1, T3N, R18E, ends i Sec 18, T3N, R19E and by Bow Creek in Sec 26, T3N, R18E. May proceed south up Geohenda Creek Trail between Chisana and headwaters of White River.

Trail 50 (no name) (south of Nabesna River)

Identification - Quad 84, T3-7N, R18E, CRM

Description: Trail begins in Chisana, Sec 1 and ends on south side of Nabesna River in two places.

Trail 51 Chisana/Shushanna (above Nutzotin Mountains)

Identification - Quad 84, T4N, R18E, T7N, R20E, NW to T9N, R17E, SW to R8N, R15E, CRM

Description: The trail begins on Trail 78-A3-50 in Sec 5 and Sec 17 T4N, R18E and ends at northwest end of 78-A3-50 in Sec 32, T8N, R15E.

Trail 52 (no name) (above Nutzotin Mountains)

Identificaton - Quad 84, T5N, R22, 23E, T6N, R20, 21, 22E, CRM

Description: The trail runs on south side of Chisana River, opposite King City in Sec 8, T6N, R20E and ends in Sec 14, T5N, R23E and Sec 30, T5N, R24E.

Trail 53 (no name) (near north border)

Identification - Quad 84, T8N, R18E, CRM

Description: The trail begins on Trail 78, B2-51 in Sec 7 and 17. Plot ends in Sec 4 and 13.

Trail 62 (no name) (northeast of Copper Lake)

Identification - Quad 84, T7N, R11E, CRM

Description: The trail begins on west shore of Tanada Lake and runs in a NW direction toward Copper Lake approximately 2-3 miles.

Trail 63 Copper River to the Nabesna River (north of Copper Lake)

Identification - Quad 84, T9N, R9-10E, CRM

Description: Trail begins in Batzulnetas in T10N, R9E proceeds generally southerly for 10 miles then splits into 3 routes to Nabesna River, possibly 78-2, 78-22, 78-30, 78-28

1011 East Tudor Road
Anchorage, AK 99503

Dear Mr. Gilmore:

As Chairman of the Senate Transportation Committee, I want to thank you and your staff for the outstanding support we have received in our efforts to include maps and trail lists in the National Wildlife Refuge System plans.
Valerie Chavez of my staff has been working with your planning team leaders, and she was impressed with the cooperation and assistance that they have contributed to our efforts.

I would like to take a few minutes to come by and visit with you the next time I am in Anchorage to discuss several key issues that are of importance to the people of Alaska. I will have my staff contact your office to arrange a firm date.

Again, my thanks for your help.

Sincerely,

Senator John B. Coghill

January 13, 1985

Mr. Robert Gilmore
Regional Director
U.S. Fish & Wildlife Service
1011 East Tudor Road
Anchorage, AK 99503

Dear Mr. Gilmore:

I am pleased to submit nine (9) maps depicting routes of possible RS 2477 rights-of-way for inclusion in the Comprehensive Conservation Plans that are being prepared for Congress. Enclosed please find maps and trail descriptions for Arctic, Innoko, Kanuti, Nowitna, Selawik, Tetlin, Togiak, Yukon Delta and Yukon Flats National Wildlife Refuges. In two refuges, Kodiak and Koyukuk, no possible RS 2477 rights-of-way were found within refuge boundaries according to the Alaska Existing Trails Inventory.

On October 8, 1985, my staff submitted trail descriptions for Togiak National Wildlife Refuge to Pete Jerome, Team Leader for the Togiak plan. It is my understanding that these trails were incorporated in the draft plan by your graphics section in order to meet a pressing deadline. We are now providing the same map with additional graphics in the hopes that this version can be included in your revised draft.

Please note that the maps contain appropriate disclaimer language, as agreed to, which states, "The State of Alaska has identified these routes as possible rights-of-way under the grant authority of Revised Statute 2477 (RS 2477). Any questions regarding these routes should be directed to the refuge manager."

We have been working with your staff to complete as many maps as possible before the end of 1985 in order to meet deadlines for your draft plans. I would like to commend them, especially Leslie Kerr, on the assistance they have provided us.

Because a final decision on map size and styles for Alaska Maritime National Wildlife Refuge had not yet been made, my staff did not provide a map for that refuge. We hope to complete this map in early 1986, and we will submit it upon completion.

I want to thank you for your cooperation and assistance in this project, and I hope we will have a chance to meet in the near future.

Sincerely,

Senator John B. Coghill

JC/slg

Enclosures

SUMMARY OF POSSIBLE RS 2477 RIGHTS-OF-WAY IN NATIONAL WILDLIFE REFUGES

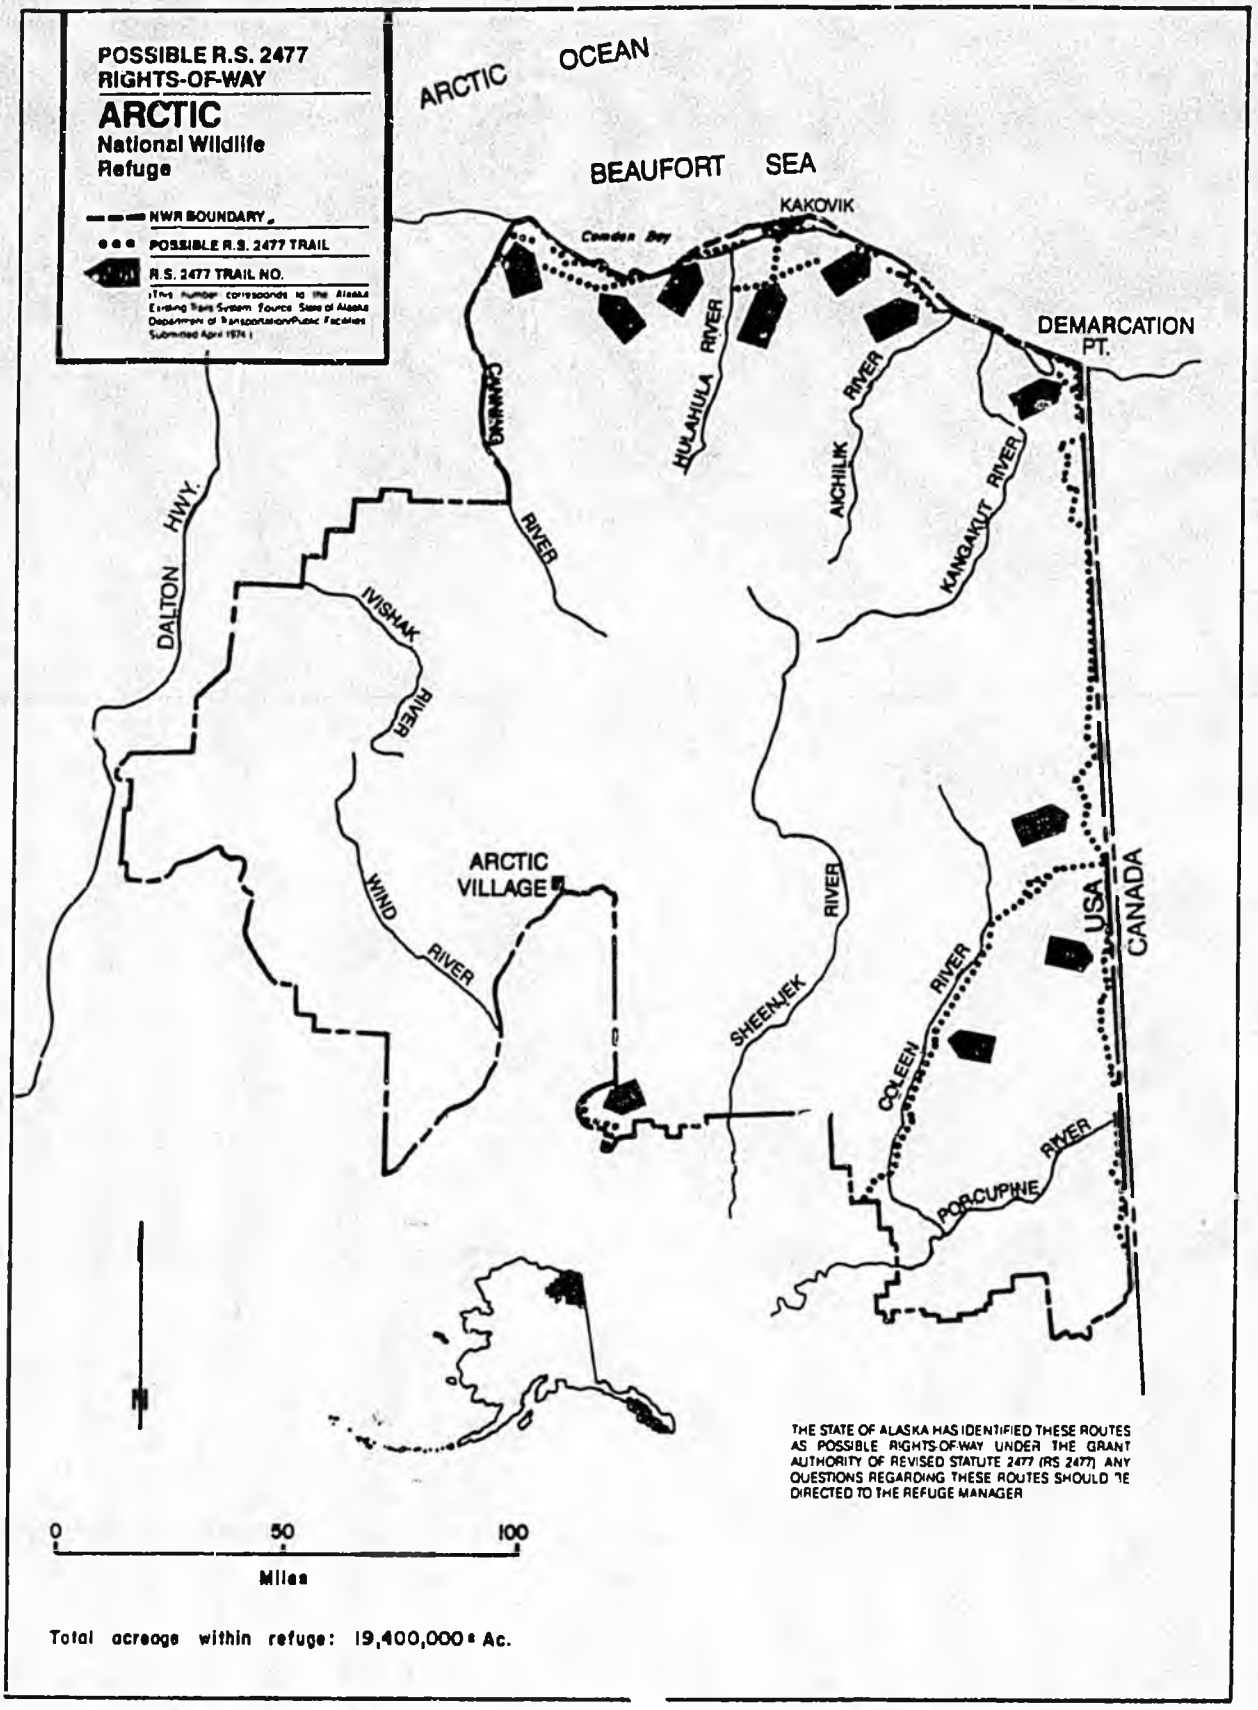
Alaska's National Wildlife Refuges	# of trails
1. Alaska Maritime National Wildlife Refuge**	
2. Alaska Peninsula National Wildlife Refuge*	
3. Arctic National Wildlife Refuge	11
4. Becharof National Wildlife Refuge*	
5. Innoko National Wildlife Refuge	12
6. Izembek National Wildlife Refuge*	
7. Kanuti National Wildlife Refuge	6
8. Kenai National Wildlife Refuge*	
9. Kodiak National Wildlife Refuge	0
10. Koyukuk National Wildlife Refuge	0
11. Nowitna National Wildlife Refuge	3
12. Selawik National Wildlife Refuge	3
13. Tetlin National Wildlife Refuge	3
14. Togiak National Wildlife Refuge	7
15. Yukon Delta National Wildlife Refuge	19
16. Yukon Flats National Wildlife Refuge	21
Total trails	85

*The Comprehensive Conservation Plans (CCP's) for these refuges were completed before this task force began work.

**Base maps for Alaska Maritime will be not available for reproduction until 1986.

Trail information was derived from the 1974 Alaska Existing Trails Inventory, however, it is not a complete compilation of all possible RS 2477 rights-of-way in the state.

CCP's will be presented to Congress in 1986 and 1987.



Total acreage within refuge: 19,400,000± Ac.

ARCTIC NATIONAL WILDLIFE REFUGE
POSSIBLE RS 2477 RIGHTS-OF-WAY

The following possible RS 2477 rights-of-way have been identified within the boundaries of Arctic National Wildlife Refuge, according to the 1974 Alaska Existing Trails System inventory. The trails are listed by quadrangles corresponding to the U.S.G.S. 1:250,000 scale map series for Alaska.

QUAD 120 - Trail 196 Nation River to Rampart House (along U.S./Canada border)

Identification - Quad 120, Black River

Description: The trail runs from the Yukon River at mouth of Nation River up Nation over to boundary, thence back and forth across boundary up to Rampart House on Porcupine River.

QUAD 121 - Trail 32 (along east bank of Coleen River)

Identification - Northeast access through Chalkyitsik to Yukon border

Description: The trail crosses Yukon/Alaska border in T14S, R48E, UPM, follows Bilwaddy Creek west approximately 10 miles southwest on the east side of the Coleen River crossing to the southwest in T28N, R22E, FM from here southwest to crossing of the Porcupine River in T25N, R20E, FM thence southwest along Porcupine approximately 25 miles turning due south through Chalkyitsik to Ohtig Lake then southwest approximately 18 miles turning due south in T18N, R17E, FM proceeds due south to Yukon River at a point approximately 10 miles north of Circle south to Trail 202.

QUAD 121 - Trail 196 Nation River to Rampart House (along U.S./Canada border)

Identification - Quad 121, Black River

Description: The trail runs from the Yukon River at mouth of Nation River up Nation over to boundary, thence back and forth across boundary up to Rampart House on Porcupine River.

QUAD 121 - Trail 211 Rampart House to Beaufort Sea (along U.S. Canada border)

Identification - Quad 121, Coleen

Description: The trail runs from Rampart House, Canada on Porcupine River north criss-crossing boundary between Alaska and Canada to Beauford Sea.

QUAD 122 - Trail 33 Christian/Willow House (on southcentral border of refuge)

Identification - Quad 122, Christian

Description: The trail runs from Christian down Christian River then up Otter Creek and up unnamed tributary of Otter Creek to its head then northerly along high ground to Willow House.

QUAD 136 - Trail 33 Christian/Willow House (same as above)

Identification - Quad 136, Arctic

Description: The trail runs from Christian down Christian River then up Otter Creek and up unnamed tributary of Otter Creek to its head then northerly along high ground to Willow House.

QUAD 138 - Trail 25A (near Demarcation Point)

Identification - Quad 138, Arctic

Description: The trail and parallel arlternates cross the Alaska Yukon border in T3N, R45E, UPM. Trail approximately 6 miles long west along coast and parallel to Demarcation Bay.

QUAD 138 - Trail 25B (along Beaufort Coast)

Identification - Quad 138, Arctic

Description: The trail begins at landing strip proceeds southeast approximately 2 miles to mouth of Kogotpak River; entirely in T6N, R39E, UPM.

QUAD 138 - Trail 25C (along Beaufort Coast)

Identification - Quad 138, Arctic

Description: The trail begins at southeast end of Poker Lagoon to approximately 5 miles southeast at cabins. Located in T8N, R38E, UPM, down to Bokok Bay.

QUAD 138 - Trail 25D (along Beaufort Coast)

Identification - Quad 138, Arctic

Des ription: The trail begins at Kaktovik landing strip and proceeds through the village along coast approximately 2 miles; also south from village on wes side of Kaktoviak Lagoon proceeding approximately 6 miles then west to bank of Hulahula River.

QUAD 138 - Trail 211 (along Beaufort Coast)

Identification - Quad 138, Arctic

Description: The trail runs from Rampart House, Canada on Porcupine River north criss-crossing boudary between Alaska and Canada to Beaufort Sea.

QUAD 139 - Trail 25F system (along Beaufort Coast)

Identification - Quad 138, Arctic

Description: The trails begin on east bank of the Tamayariak River (near Canning River) T8N, R26E, UPM and also southwest of Said Point thence southeast along the coast across Konganavik Point, southeast across Katakturok River arund Simpson Cove ending on the west bank of Marsh Creek, 1/2 mile from shoreline at Camden Bay.

QUAD 151 - Trail 25E (southeast of Camden Bay)

Identification - Quad 151, Flaxman Island

Description: The trail begins on coast between Anderson Point and mouth of the Sadlerochit River T8N, R31E, UPM, proceeds east along coast approximately 10 miles, toward Hulahula River.

QUAD 151 - Trail 25F (south of Camden Bay)

Identification - Quad 151, Flaxman Island

Description: The trail begins on east bank of the Tamayariak River T8N, R26E, UPM, and also 1 1/2 SW of Said Point thence southeast along the coast across Konganavik Point southeast on the west bank of Marsh Creek, 1/2 mile from shoreline at Camden Bay.

QUAD 151 - Trail 25G (southwest of Camden Bay)

Identification - Quad 151, Flaxman Island

Description: The trail begins at Bullen, T10N, R21E, UPM and proceeds along coast near Pt. Gordon, divides one leg along the coast through Thomson - the other approximately 3 miles inland, rejoins 2 miles east into T9N, R24E, thence 3 miles east across Staines River.

INNOKO NATIONAL WILDLIFE REFUGE
POSSIBLE RS 2477 RIGHTS-OF-WAY

The following possible RS 2477 rights-of-way have been identified within the boundaries of Innoko National Wildlife Refuge, according to the 1974 Alaska Existing Trails System inventory. The trails are listed by quadrangles corresponding to the U.S.G.S. 1:250,000 scale map series for Alaska.

QUAD 78 - Trail 7 Shageluk/Holikachuk Winter Trail (below Holikachuk)

Identification - Quad 78, Holy Cross

Description: Trail is located approximately at T33N, R54W, SM, winter trail from Shageluk to Holikachuk.

QUAD 79 - Trail 1 Hunter Trail (see also Trail 90-1) (in southeast corner of refuge)

Identification - Hunter Trail, Ophir to Iditarod

Description: Trail runs from Ophir to Iditarod, approximately 79 miles long, T34N, R41W, SM.

QUAD 79 - Trail 5 Iditarod/Dishkakat (see also Trail 90-5) (in southeast corner of refuge)

Identification - Trail is located approximately T34N, R46W, SM, runs from Iditarod to Dishkakat, joins Hunter Trail about 12 miles north of Iditarod.

QUAD 79 - Trail 37 (southeast corner of refuge, near border)

Identification - Quad 79, Iditarod

Description: The trail connects tractor trail and runs northeast direction, T32N, R45W, SM.

QUAD 79 - Trail 38 Tractor Trail (southeast corner)

Identification - Quad 79, Iditarod, tractor trail

Description: The trail begins at First Chance Creek and runs north to northwest and ends at Dikemen, T31,32,33N, R45,46W, SM.

QUAD 90 - Trail 127 Dishkakat to Dikeman (eastern side of refuge, near Innoko River)

Identification - Trail from Dishkakat to Dikeman

Description: The trail begins at Dishkakat, then runs southwest along the edge of the lowground to the east of Six Mile Lake and onto Dikeman.

QUAD 90 - Trail 140 (west of Cripple Landing)

Identification - Cripple Landing West

Description: The trail runs from Cripple Landing in T21S, R13E, KRM west southwest across Two Mile, Four Mile and Scandinaran Creeks to a point in highlands in T22S, R11E, KRM.

QUAD 90 - Trail 141 (near Rennies Landing)

Identification - Dishkakat/Lewis Landing Trail to Ophir/Cripple Landing Trail

Description: The trail runs from Rennie's Landing on Innoko River T22S, R9E, KRM, southeasterly to Four Mile Creek on Ophir/Cripple Trail (#147) in T25S, R12E, KRM with alternate routes at various points along trail.

QUAD 90 - Trail 148 Lewis Landing/Dishkakat Trail (108 mi.)

Identification - Branch from Route 17 to Dishkakat

Description: The trail runs from Sandstom Bluff on north side of Yukon River in T9S, R13E then south to Yukon River then continuing almost due south across divide down Camp Creek to Innoko River then along Innoko River to Dishkakat.

QUAD 90 - Trail 149 Cripple to Trail 148 (near Cripple Landing)

Identification - Cripple to Trail 148

Description: The trail runs from Cripple Landing northwesterly to meet Trail 148 on Innoko River in T18S, R12E, KRM.

QUAD 90 - Trail 151 Ophir to Dishkakat (south of Dishkakat)

Identification - Quad 90, Ophir

Description: The trail runs from Ophir up Innoko River to American Creek, then up American Creek crossing ridge to Hurst Creek, then down Hurst across Boob Creek and into Tolsti, then across Dishna River and over to Dishkakat.

QUAD 90 - Trail 152 Nulato/Dishkakat Trail - north of Dishkakat)

Identification - Nulato/Dishkakat Trail

Description: The trail runs from Nulato across the Yukon River, then along south bank of Yukon River to Center of T11S, R3E, KRM, then due south to west fork of Little Mud River, then along ridge between Little Mud River and Lonesome River to Innoko River, then along Innoko River easterly to Dishkakat.

QUAD 97 - Trail 152 Nulato/Dishkakat Trail (same as above)

Identification - Branch from Route 19 to Dishkakat

Description: The trail runs from Nulato across Yukon River then along south bank of Yukon River to center of T11S, R3E, KRM, then due south to west fork of Little Mud River, then along ridge between Little Mud River and Lonesome River to Innoko River, then along Innoko River, Ely to Dishkakat.

KANUTI NATIONAL WILDLIFE REFUGE
POSSIBLE RS 2477 RIGHTS-OF-WAY

The following possible RS 2477 rights-of-way have been identified within the boundaries of Kanuti National Wildlife Refuge, according to the 1974 Alaska Existing Trails System inventory. The trails are listed by quadrangles corresponding to the U.S.G.S. 1:250,000 scale map series for Alaska.

QUAD 117 - Trail 49 Winter Trail Bettles to Stevens Village (near east border of map)

Identification - Winter trail from Bettles Field to Stevens Village

Description: The trail starts in Bettles, T24N, R18W, FM and runs southeasterly across the south fork of Koyukuk River, Bonanza Creek, Fish Creek, to mouth, crosses divide to Kanuti River, crosses divide to west fork of Dall River across to Coal Creek downstream to Dall River through Dall River Flats east to Stevens Village T14N, R7W, FM, through Horseshoe Lake southeast across Yukon River via Jackson Island to Jackson Lake easterly to Ross Creek, up Ross Creek to divide into Rogers Creek south to Ely to Gatlena Gap, south to Hess Creek, southerly up south fork of Hess Creek to Hess Creek Dam, joining the highway system north out of Livengood, T9N, R4W, FM.

QUAD 117 - Trail 54 Bettles to Allakaket (below Old Bettles)

Identification - Bettles to Allakaket Trail

Description: The trail begins in T24N, R18W, FM at Bettles and runs southwesterly across Thicket Creek to head of Peavy Creek, on southwesterly across Henshaw Creek to Allakaket in T20N, R24W, FM.

QUAD 117 - Trail 55 Fort Gibbon/Koyukuk Trail (240 miles) (northwest corner of map)

Identification - Fort Gibbon/Koyukuk Trail #29 connects Fort Gibbon with Bettles in the Koyukuk Region

Description: The trail is notated in Alaska Road Commission annual reports as a 240 mile trail. It is the old mail trail from Fort Gibbon to Coldfoot Road. Distance of this trail formerly given as 100 miles, which included the trail only as far as Arctic City. Between Alatna and Bettles the trail has 3 variations.

QUAD 117 - Trail 56 (south of Old Bettles)

Identification - Trail from Ned's Lake in T20N, R23W, FM through Bettles and Coldfoot, onto Smith Creek Dome

Description: The trail begins at Ned's Lake and junction with 63, T20N, R23W, FM, thence east and north along the Koyukuk River to Bettles, thence continuing along the Koyukuk River and the middle fork of the Koyukuk on the south side through Tramway Bar and Coldfoot and onto Wiseman, thence up Wiseman Creek to Nolan Creek and Nolan, thence up Nolan Creek to Smith Creek Dome.

QUAD 117 - Trail 62 (northeast corner of map)

Identification - Bettles PO to south fork of Koyukuk River

Description: The trail runs from Bettles Post Office southeasterly to south fork of Koyukuk River, T23N, R17W.

QUAD 117 - Trail 63 (north of Kanuti River)

Identification - Winter trail from Allakaket southeast to a point 1 mile northwest of Taiholman Lake.

Description: The trail begins at Allakaket and travels southeast through Kadakina Lake to a mile northwest of Taiholman Lake.

The following possible RS 2477 rights-of-way have been identified within the boundaries of Selawik National Wildlife Refuge, according to the 1974 Alaska Existing Trails System inventory. The trails are listed by quadrangles corresponding to the U.S.G.S. 1:250,000 scale map series for Alaska.

QUAD 114 - Trail 94 Shungnak, Selawik, Kiana Trail (above Selawik)

Identification - Shungnak, Selawik, Kiana Trail

Description: The trail begins in Shungnak in T17N, R8E, KRM and runs westerly across and up Black River, south of Shaleruckik Mountain, to Kerchurak Creek to Kugarak River downstream to Selawik River to Selawik on Niglaktak Lake, T14N, R6W, KRM, thence northerly across Shogvik Lake and Oblaron Creek, across divide Howkley Hills down Portage Creek to Kobuk River.

QUAD 114 - Trail 98 Noorvik to Kiwalik Easterly Route (south of Noorvik)

Identification - Noorvik to Kiwalik Route

Description: The trail begins in T17N, R11W, KRM, and runs along Nazuruk Channel southerly to Attiunik Channel, across outlet of Selwaik Lake southeasterly and south across Baldwin Peninsula to Eschscholtz Bay, around bay crossing Buckland River, westerly around edge of bay to Elephant Point, southeasterly to Kiwalik on coast at mouth of Kiwalik River, T7N, R15W, KRM.

QUAD 114 - Trail 165 Kotzebue to Shungnak (200 mile trail) (from Okok Point through Kiana)

Identification - Kotzebue to Shungnak Trail

Description: Winter trail extending from Kotzebue across to mainland and up Kobuk River to Shungnak, ending in Trail System 95A.

QUAD 115 - Trail 94 Shungnak, Selawik, Kiana Trail (south of Kiana)

Identification - Shungnak, Selawik, Kiana Trail

Description: The trail begins in Shungnak in T17N, R8E, KRM and runs westerly across and up Black River, south of Shaleruckik Mountain, to Kerchurak Creek to Kugarak River downstream to Selawik River to Selawik on Niglaktak Lake, T14N, R6W, KRM, thence northerly across Shogvik Lake and Oblaron Creek, across divide Howkley Hills down Portage Creek to Kobuk River.

QUAD 84 - Trail 54 (near Cheslina River)

Identification - Quad 84, Nabesna

Description: The trail begins in Sec 27, T9N, R15E and ends at Nabesna village in Sec 22, T14N, R18E.

QUAD 84 - Trail 57 (see center of map, south of Northway)

Identification - Quad 84, Nabesna

Description: The trail begins in Sec 30, T10N, R18E and ends in Northway, Sec 25, T14N, R18E (beside airport).

QUAD 84 - Trail 60 (near Alaska Highway)

Identification - Quad 84, Nabesna

Description: The trail begins on Alaska Highway in N 1/2 Sec 30, T13N, R21E and ends in campground on Deadman Lake in Sec 24, T13N, R20E.

TOGIAK NATIONAL WILDLIFE REFUGE
POSSIBLE RS 2477 RIGHTS-OF-WAY

The following possible RS 2477 rights-of-way have been identified within the boundaries of Togiak National Wildlife Refuge, according to the 1974 Alaska Existing Trails System inventory. The trails are listed by quadrangles corresponding to the U.S.G.S. 1:250,000 scale map series for Alaska.

QUAD 39 - Trail 2 Togiak to Ungalikthluk (east of Togiak Bay)

Identification - Quad 39, Hagemeister Island

Description: The trail is the winter trail between Togiak and Ungalikthluk. The trail continues in Quad 53 (Goodnews) as Trail 7.

QUAD 52 - Trail 1 Manokotak to Dillingham Winter Trail (west of Dillingham)

Identification - Quad 52, Dillingham

Description: The trail is the Manokotak to Dillingham Winter Trail. It continues as Trail 6 in Quad 53 (Goodnews).

QUAD 53 - Trail 1 Bethel to Goodnews Bay Winter Trail (below Quinhagak)

Identification - Quad 53, Goodnews

Description: The trail is the Bethel to Goodnews Bay Winter Trail which runs through Quinhagak to Goodnews. The trail continues as Trail 2 in Quad 54 (Kuskokwim Bay).

QUAD 53 - Trail 2 Jacksmith Bay/Goodnews Summer Trail (below Quinhagak)

Identification - Quad 53, Goodnews

Description: The trail runs from Jacksmith Bay via Twin Mountain to Goodnews Trail.

QUAD 53 - Trail 4 Goodnews to Arolik River Mining Area
(below Quinhagak)

Identification - Quad 53, Goodnews

Description: The trail runs from Goodnews to Barnum via Wagon Road and on to Arolik River Mining Area via summer and winter trails.

QUAD 53 - Trail 6 Goodnews/Togiak/Manokotak Winter Trail
(east/west of Togiak, marked twice)

Identification - Quad 53, Goodnews

Description: The trail runs from Goodnews Bay via Togiak and Twin Hills to Dillingham with a spur to Manokotak. Trail continues as Trail 1 in Quad 52 (Dillingham).

QUAD 53 - Trail 7 Togiak to Ungalikthluk Winter Trail
(southeast of Togiak, lower part shown as Trail 2)

Identification - Quad 53, Goodnews

Description: The trail runs from Togiak to Ungalikthluk. It continues as Trail 2 in Quad 39 (Hagemeister Island).

YUKON DELTA NATIONAL WILDLIFE REFUGE
POSSIBLE RS 2477 RIGHTS-OF-WAY

The following possible RS 2477 rights-of-way have been identified within the boundaries of Yukon Delta National Wildlife Refuge, according to the 1974 Alaska Existing Trails System inventory. The trails are listed by quadrangles corresponding to the U.S.G.S. 1:250,000 scale map series for Alaska.

Note: Several of the 19 trail systems in this refuge continue through several quads, therefore they have been cross-referenced to other trail numbers of the same origin, as identified as in the trails inventory.

QUAD 54 - Trail 1 Nightmute/Bethel (see #58-3, 58-4) (shoreline of Kuskokwim Bay)

Identification - Quad 54, Kuskokwim Bay

Description: The trail travels from Nightmute via Chefornak, Kipnuk, Kwigillingok, Kongiganak and Tuntutuliak to Bethel; winter trail.

QUAD 54 - Trail 2 Bethel/Goodnews Winter Trail (see #58-6, 53-1) (shoreline of Kuskokwim Bay)

Identification - Quad 54, Kuskokwim Bay

Description: The trail travels from Bethel to Goodnews Bay.

QUAD 55 - Trail 1 (south side of Nunivak Island)

Identification - Quad 55, Cape Mendenhall, T4,5S, R98W, SM

Description: The trail runs from Two Lakes, T5S, R98W, northeast to Duchikthluk Bay mouth then southwest to Marsh.

QUAD 55 - Trail 2 (south side of Nunivak Island)

Identification - Quad 55, Cape Mendenhall, T2,3S, R96W, SM

Description: The trail runs north-south direction between unnamed lakes and rivers.

QUAD 55 - Trail 3 (east side of Nunivak Island)

Identification - Quad 55, Cape Mendenhall, T3S, R96W, SM

Description: The trail runs north-south connecting unnamed lakes.

QUAD 55 - Trail 4 (southeast side of Nunivak Island)

Identification - Quad 55, Cape Mendenhall, T3S, R95,95W, SM

Description: The trail runs southwest to northeast connecting unnamed lakes in area.

QUAD 55 - Trail 5 (southeast side of Nunivak Island)

Identification - Quad 55, Cape Mendenhall, T3S, R96W, SM

Description: The trail runs east-west connecting unnamed lakes in area just north of Nakooytoolekmint site.

QUAD 57 - Trail 1 Tanunak to Toksook Bay (below Hazen Bay)

Identification - Quad 57, Nunivak Island, T6N, R89W, SM

Description: The trail runs from the village to Tanunak to the village of Toksook Bay, all season trail.

QUAD 57 - Trail 2 Toksook Bay to Nightmute (see #58-1)(below Hazen Bay)

Identification - Quad 57, Nunivak Island, T5N, R89W, SM

Description: The trail runs from Toksook Bay to Nighmute; summer and winter trail.

QUAD 57 - Trail 3 (north side of Nunivak Island)

Identification - Quad 57, Nunivak Island, T3N, R98,99W, SM

Description: The trail leads from landing area east by northeast to Shoal Bay.

QUAD 57 - Trail 4 (northeast side of Nunivak Island)

Identification - Quad 57, Nunivak Island, T1,2S, R95,96W, SM

Description: The trail begins at Ingrimiut camp site T1S, R96W and runs south past Twin Mountains then southeast to Etolin Strait ending in T2S, R95W.

QUAD 58 - Trail 1 Toksook Bay to Nightmute (see #57-2) (southwest of Baird Inlet)

Identification - Quad 58, Baird Inlet, T5N, R89W, SM

Description: The trail runs from Toksook Bay to Nightmute; summer and winter trail.

QUAD 58 - Trail 2 Nightmute to Newtok (below Newtok)

Identification - Quad 58, Baird Inlet, T5N, R86,87W, SM

Description: The trail begins at Nightmute and runs generally in northeast to northwest direction to Newtok crossing the Ninglick River.

QUAD 58 - Trail 3 Nightmute to Bethel (see #54-1) (south of Baird Inlet)

Identification - Quad 58, Baird Inlet

Description: The trail travels from Nightmute via Chefornak, Kipnuk, Kwigillingok, Kongiganak and Tuntutuliak to Bethel; winter trail.

QUAD 58 - Trail 4 Chefornak to Tuntutuliak with spur (see 54-1) (above Kuskokwim Bay)

Identification - Quad 58, Baird Inlet

Description: The trail is a 75 mile section from Tuntutuliak to Kipnuk; from Chefornak to Tuntutuliak with a spur to Kipnuk; winter trail.

QUAD 58 - Trail 5 Kasigluk to Bethel (see# 59-2) (west of Bethel)

Identification - T9N, R74W, SM

Description: The trail runs from Kasigluk via Nunapitchuk to Bethel; winter trail.

QUAD 58 - Trail 6 Bethel/Goodnews Bay Winter Trail (see #54-2, 59-3 (south of Bethel)

Identification - Quad 58, Baird Inlet

Description: The trail runs from Bethel via Naparskak, Eek and Quinhagak to Goodnews Bay.

QUAD 59 - Trail 1 Tuntutuliak to Bethel (see #58-3) (continuation of Trail 3 south of Baird Inlet; shown as #3)

Identification - T7N, R71W, SM

Description: The trail runs from Johnson River - Kinak Trail 92 from Tuntutuliak to Bethel; winter trail.

QUAD 59 - Trail 2 Bethel to Kasigluk (see #58-5)
(continuation of Trail 5 west of Bethel; shown as #5)

Identification - Quad 59, Bethel

Description: The trail runs from Bethel to Kasigluk.

QUAD 59 - Trail 3 Bethel/Goodnews Bay Winter Trail(see 58-6)
(continuation of Trail 6 south of Bethel; shown as #6)

Identification - Quad 59, Bethel

Description: The trail runs from Bethel to Goodnews.

QUAD 59 - Trail 4 Bethel/Tuluksak (see #73-1) 44 miles
(north of Bethel)

Identification - Quad 59, Bethel

Description: The trail runs from Bethel to Tuluksak.

QUAD 59 - Trail 5 Tuluksak/Bear Creek (see #73-5) (Trail 5
nearest east border of map)

Identification - Quad 59, Bethel

Description: The trail runs 9 miles east of Tuluksak on the
Tuluksak River (at the NYAC storage building) easterly to
NYAC, 32 miles.

QUAD 59 - Trail 6 Upper Landing Bear Creek (see #73-6)
(Trail system east of Kuskokwim River)

Identification - Quad 59, Bethel

Description: The trail runs 13 miles east, southeast of
Tuluksak on the Tuluksak River, up Tuluksak River to join #5
in T10N, R62W, SM.

QUAD 59 - Trail 8 Akiak/Canyon Creek (45 miles) (southeast
of Kuskokwim River)

Identification - Quad 59, Bethel

Description: The trail runs from Akiak to Canyon Creek; 45
miles.

QUAD 59 - Trail 9 Akiakchak/Ohogamute (see #73-9) (north of
Bethel)

Identification - Quad 59, Bethel

Description: Trail runs from Akiakchak to Ohogamute.

QUAD 59 - Trail 10 Akiak/Russian Mission (see #73-8) 75 miles (north of Bethel)

Identification - Quad 59, Bethel

Description: The trail runs from Akiak on Kuskokwim River to Russian Mission on Yukon River (assumed route went from Phillips Bros. to Tundra George to approximate mileage.)

QUAD 73 - Trail 1 Bethel/Tuluksak (see #59-4) 44 miles (above Kuskokwim River)

Identification - Quad 73, Russian Mission

Description: The trail runs from Bethel to Tuluksak.

QUAD 73 - Trail 2 Aniak/Tuluksak (60 miles) (east of Kuskokwim River)

Identification - Quad 73, Russian Mission

Description: The trail runs from Aniak to Tuluksak.

QUAD 73 - Trail 3 Yukon/Kuskokwim/Portage (120 miles) (north of Kuskokwim River)

Identification - Quad 73, Russian Mission

Description: The trail runs from Aniak to Russian Mission (on Yukon).

QUAD 73 - Trail 5 Tuluksak/Bear Creek (see #59-5) (east of Kuskokwim River)

Identification - Quad 73, Russian Mission

Description: The trail runs 9 miles east of Tuluksak on the Tuluksak River (at the NYAC storage building) easterly to NYAC, 32 miles.

QUAD 73 - Trail 6 Upper Landing Bear Creek (see #59-6) (Trail system east of Kuskokwim River)

Identification - Quad 73, Russian Mission

Description: The trail runs 13 miles east, southeast of Tuluksak on the Tuluksak River, up Tuluksak River to join #5 in T10N, R62W, SM.

QUAD 73 - Trail 7 Marvel Creek (east border of map)

Identification - Quad 73, Russian Mission

Description: The trail departs #2 five miles south of Aniak southerly to Marvel Creek in T9N, R58W, SM; 60 miles.

QUAD 73 -Trail 8 Akiak/Russian Mission (75 miles - see #59-10) (northeast of Bethel)

Identification - Quad 73, Russian Mission

Description: The trail runs from Akiak on Kuskokwim River via Big Fritz, Phillips Bros, Tundra George to Russian Mission on Yukon River (assumed route went from Phillips Bros. to Tundra George to approximate mileage.)

QUAD 73 - Trail 9 Akiakchak/Ohogamute (see #59-9) (north of Bethel)

Identification - Quad 73, Russian Mission

Description: Trail runs from Akiakchak to Ohogamute.

QUAD 73 - Trail 10 Bennett's Cutoff (18 miles) (southeast of Yukon River)

Identification - Quad 73, Russian Mission

Description: The trail leaves #8 near Tundra George, runs northwest to Yukon River to Toklik, Ohogamut, Kakamut, etc.

QUAD 73 - Trail 11 Phillips Bros/Phillips/Tundra George (southeast of Yukon River)

Identification - Quad 73, Russian Mission

Description: The trail runs from Phillips Bros. via Phillips to Tundra George.

QUAD 73 - Trail 13 Tuluksak/Kalskag (near Kuskokwim River)

Identification - Quad 73, Russian Mission

Description: The trail runs from Tuluksak to Kalskag.

QUAD 73 - Trail 16 Holy Cross/Kalskag (56 miles - see #78-1) (northeast corner of map)

Identification - Quad 73, Russian Mission

Description: The trail runs from Lower Kalskag on the Kuskokwim River, north via Paimiut on the Yukon River to Holy Cross.

QUAD 73 - Trail 17 Paimiut/Portage (alternate trail) (northeast corner of map)

Identification - Quad 73, Russian Mission

Description: The trail is an alternate trail; both trails terminate on the Paimiut Portage Trail. The southern end is at the south shore of a large lake (unnamed).

QUAD 73 - Trail 18 Paimiut/Marshall (see #74-2) (northeast corner of map)

Identification - Quad 73, Russian Mission

Description: The trail runs west along the north bank of the Yukon River from Paimiut via Russian Mission. At Russian Mission the trail goes overland, westward to Marshall also on the Yukon River. The eastern terminus of this trail is at Paimiut where it joins the Holy Cross/Kalskag Trail.

QUAD 73 - Trail 19 Toklik South Trail (south of Yukon River)

Identification - Quad 73, Russian Mission

Description: Toklik on the north bank of the Yukon is the point of which the trail crosses the river and heads south for about 10 miles into low hilly country.

QUAD 74 - Trail 1 Yukon River Winter Trail (see 73-18, 77-2) (winds along Yukon River)

Identification - Quad 74, Marshall

Description: The trail runs from Pilot Station to Kotlik via north bank of Yukon River with alternate routes in area of Pilot Station to Marshall.

QUAD 74 - Trail 2 Paimiut/Marshall (see #73-18) (north of Yukon River)

Identification - Quad 74, Marshall, T21N, R70W, SM

Description: Marshall on Poltes Slough is the western terminus of this trail. At Paimiut the trail joins the Holy Cross/Kalskag Trail.

QUAD 75 - Trail 1 Scammon Bay/Hooper Bay Winter Trail (south of Scammon Bay)

Identification - T17N, R90W, SM

Description: The trail runs from Scammon Bay southwest to Hooper Bay.

QUAD 75 - Trail 2 Scammon Bay/Hamilton/St. Michaels Winter Trail (see #76-1) (east of Scammon Bay)

Identification - Quad 75, Hooper Bay

Description: The trail runs from Scammon Bay via Black River crossing Alakanuk, Hamilton, Pastpolik to St. Michael and Stebbins.

QUAD 75 - Trail 3 (no name) (south of Scammon Bay)

Identification - Quad 75, Hooper Bay

Description: The trail runs from the mouth of Nilmut River northeast toward Towak Mountains.

QUAD 76 - Trail 1 Scammon Bay/Hamilton/St. Michael Winter Trail (see #75-2, 77-1) (north of Scammon Bay)

Identification - Quad 76, Black

Description: The trail runs from Scammon Bay via Black River crossing Alakanuk, Hamilton, Pastolik to St. Michael and Stebbins.

QUAD 77 - Trail 1 Scammon Bay /Hamilton/St. Michael Winter Trail (see #76-1, 92-154) (same as above - marked only once)

Identification - Quad 77, Kwiguk

Description: The trail runs from Scammon Bay via Black River crossing Alakanuk, Hamilton, Pastolik to St. Michael and Stebbins.

QUAD 77 - Trail 2 Yukon River Winter Trail (see #74-1) (lower part shown as Trail 8)

Identification - Quad 77, Kwiguk

Description: The trail runs from Hamilton via east bank and north bank of Yukon River to Pilot Station.

QUAD 92 - Trail 154 St. Michael/Kotlik (see #77-1) (west of Pastol Bay)

Identification - Quad 92, St. Michael, T28S, R26W, KRM

Description: The trail runs approximately 30 miles, traverses lake and inlets on Bering Sea coast or the sea ice itself. From St. Michaels it follows left bank of St. Michaels canal for 8 miles, then crosses the canal to mainland, thence in southwesterly direction of Pitmatalik Village, a distance of 27 miles, thence back to Pt. Romanof to beach 7 miles, thence to Coffee Point 12 miles, then by Pastolik to Kotlik 12 miles, thence southwest off the map.

YUKON FLATS NATIONAL WILDLIFE REFUGE
POSSIBLE RS 2477 RIGHTS-OF-WAY

The following possible RS 2477 rights-of-way have been identified within the boundaries of Yukon Flats National Wildlife Refuge, according to the 1974 Alaska Existing Trails System inventory. The trails are listed by quadrangles corresponding to the U.S.G.S. 1:250,000 scale map series for Alaska.

Note: Several of the 21 trail systems in this refuge continue through several quads, therefore some trail numbers appear twice (different quad).

QUAD 104 - Trail 202 Circle to Fort Yukon (below Fort Yukon)

Identification - Winter trail from Circle to Fort Yukon

Description: The winter trail extends from Circle at end of Steese Road, parallels Yukon River on its LL to within 16 miles of Fort Yukon from which point it follows the river ice.

QUAD 104 - Trail 202A Circle/Fort Yukon, Spur #4 (above Circle)

Identification - Quad 104, Circle

Description: The trail is noted as Spur #4 which runs from Twenty-two Mile Village thence southwest to a point on Birch Creek.

QUAD 105 - Trail 49 Winter Trail Bettles to Stevens Village (west border of map, near Dalton Highway)

Identification - Winter trail from Bettles Field to Stevens Village

Description: The trail starts in Bettles, T24N, R18W, FM and runs southeasterly across the south fork of Koyukuk River, Bonanza Creek, Fish Creek, to mouth, crosses divide to Kanuti River, crosses divide to west fork of Dall River across to Coal Creek downstream to Dall River through Dall River Flats east to Stevens Village T14N, R7W, FM, through Horseshoe Lake southeast across Yukon River via Jackson Island to Jackson Lake easterly to Ross Creek, up Ross Creek to divide into Rogers Creek south to Ely to Gatlena Gap, south to Hess Creek, southerly up south fork of Hess Creek to Hess Creek Dam, joining the highway system north out of Livengood, T9N, R4W, FM.

QUAD 105 - Trail 61 (connecting Trails 49 and 57) (southwest corner of map)

Identification - Trail connecting Trails 49 and 57

Description: The trail runs from the junction with Trail 49 in T11N, R4W, FM north to Ely over highlands, north through T12-14N, R3W, FM in Livengood and Beaver quads to Trail 57.

QUAD 105 - Trail 64 (Livengood to Hamlin) (below Stevens Village)

Identification - Trail from Livengood to Fort Hamlin

Description: The trail runs north over Livengood Dome across headwaters of Lost Creek over divide to head of McHugh Creek, down creek to Hess Creek, across Hess Creek over divide to Fish Creek, across it over divide to Rogers Creek northwesterly to Fort Hamlin T12N, R8W, FM with alternate routes between Livengood and Hess Creek.

QUAD 105 - Trail 205 Chatanika/Yukon Trail (100 miles) (south of beaver)

Identification - Fairbanks to the Chandler Mining Region

Description: In 1913 the Alaska Road Commission noted the trail was referred to as the Chatanika/Beaver Trail; was used in 1922 as winter trail between Chatanika at end of branch of government railroad and town of Beaver in Yukon (120 miles.) In 1927, notation made to extend trail from Old Snowshoe Roadhouse, 14 miles from Olnes on Olnes - Livengood Trail down Wickersham and Beaver Creeks to T10N, R1W, then north to Victoria Creek then down creek to Bull Creek, then up west fork of creek across mountains to a creek in T13N, R1E, then north to Twin Lakes and intersection of Trail 57, then north across Yukon River to Beaver.

QUAD 118 Trail 37 (northcentral of Yukon River)

Identification - Beaver quad, trail from Fort Yukon along the Yukon River to Beaver

Description: The trail begins at Fort Yukon, thence westerly along the north bank of the Yukon River to Beaver.

QUAD 118 Trail 38 (south of Yukon River)

Identification - Beaver, Fort Yukon quads, trail from the Spur 202D of the Circle/Fort Yukon Trail 20 to Beaver.

Description: The trail begins at a point on the Circle/Fort Yukon spur 202D, which is 12 miles southwest of Fort Yukon, thence westerly along the south bank of the Yukon River to Beaver.

QUAD 118 - Trail 43 Beaver to Horse Creek (south of Hadweenzic River)

Identification - Beaver to Horse Creek Trail

Description: The trail runs from Beaver northwesterly along the ridge between Hadweenzic Creek and Hodzana Creek to Trout Creek, along Trout Creek over the divide into Trail Creek along Trail Creek to west fork of Chandalar River, thence northerly to north fork of Chandalar River, along the north fork to Horse Creek.

QUAD 118 - Trail 49 Winter Trail Bettles to Stevens Village (near Dalton Highway, above Stevens Village)

Identification - Winter trail from Bettles Field to Stevens Village

Description: The trail starts in Bettles, T24N, R18W, FM and runs southeasterly across the south fork of Koyukuk River, Bonanza Creek, Fish Creek, to mouth, crosses divide to Kanuti River, crosses divide to west fork of Dall River across to Coal Creek downstream to Dall River through Dall River Flats east to Stevens Village T14N, R7W, FM, through Horseshoe Lake southeast across Yukon River via Jackson Island to Jackson Lake easterly to Ross Creek, up Ross Creek to divide into Rogers Creek south to Ely to Gatlena Gap, south to Hess Creek, southerly up south fork of Hess Creek to Hess Creek Dam, joining the highway system north out of Livengood, T9N, R4W, FM.

QUAD 118 - Trail 49A (near Stevens Village)

Identification - Trail 49A is spur from Trail 49 to landing area at Stevens Village

Description: The trail starts from point on Trail 49 about 1 mile south & 1 1/2 miles east of T14N, R7W, FM running westerly to Island Lake thence turning and running southeasterly to landing area northwest of Stevens Village.

QUAD 118 - Trail 57 (southwest of Beaver)

Identification - Trail from Ross Creek and Jackson Lake to Beaver

Description: The trail begins in T14N, R6W, FM and runs approximately 6 miles east of Stevens Village, south of Yukon River northeasterly to Rogers Creek and Jacobs Point easterly to New Lake, Tincan Lake, Beaverdam Lake, Twin Lakes northerly on Chatanika/Beaver Trail, T16N, R1E.

QUAD 118 - Trail 61 (southwest part of map)

Identification - Connecting Trails 49 and 57

Description: Trail runs from junction with Trail 49 in T11N, R4W, FM Livengood quad northeasterly over highlands, north through T12,13,14, R3W, FM in Livengood and Beaver quads to Trail 57.

QUAD 118 - Trail 205 Chatanika/Yukon Trail (south of Beaver)

Identification - Trail from Fairbanks to the Chandler Mining Region, 100 mile trail

Description: In 1913 the Alaska Road Commission noted the trail was referred to as the Chatanika/Beaver Trail; was used in 1922 as winter trail between Chatanika at end of branch of government railroad and town of Beaver in Yukon (120 miles.) In 1927, notation made to extend trail from Old Snowshoe Roadhouse, 14 miles from Olnes on Olnes - Livengood Trail down Wickersham and Beaver Creeks to T10N, R1W, then north to Victoria Creek then down creek to Bull Creek, then up west fork of creek across mountains to a creek in T13N, R1E, then north to Twin Lakes and intersection of Trail 57, then north across Yukon River to Beaver.

QUAD 118 - Trail 208 Yukon/Chandalar Sled Road (75 miles) (north of Beaver)

Identification - Connects Chandalar mining region with Yukon River and by a circuit route with Fairbanks

Description: The trail was referenced in the Alaska Road Commission 1913 annual report as Beaver/Chandalar Sled Road, 75 mile sled road connecting Beaver and Caro, from Beaver northeasterly past George Lake, Nine Mile Lake, Twelve Mile Lake, Fourteen Mile Lake to cabin in T20N, R3E, FM then northwest with 2 loops to 56 mile cabin in T25N, R1W, FM then northerly to 61 Mountain and Schilling Creek and junction with Trail 41 then northwesterly to Caro.

QUAD 119 - Trail 32 (above Chalkyitsik)

Identification - Northeast access through Chalkyitsik to Yukon Border

Description: The trail crosses Yukon/Alaska border in T14S, R48E, UPM, follows Bilwaddy Creek west approximately 10 miles southwest on the east side of the Coleen River crossing to the southwest in T28N, R22E, FM from here southwest to crossing of the Porcupine River in T25N, R20E, FM thence southwest along Porcupine approximately 25 miles turning due south through Chalkyitsik to Ohtig Lake then southwest approximately 18 miles turning due south in T18N, R17E, FM proceeds due south to Yukon River at a point approximately 10 miles north of Circle south to Trail 202.

QUAD 119 - Trail 34 Fort Yukon to Christian (north of Fort Yukon)

Identification - Fort Yukon to Christian

Description: The trail runs from Fort Yukon northwest to Alexander's Village, thence northeast via Joint Lake to a point approximately three miles east of Christian thence due east to Christian.

QUAD 119 - Trail 34A (north of Fort Yukon)

Identification - Alexander's Village to Veh-Tenjerlow Lakes

Description: The trail runs from Alexander's Village westerly across Christian River, thence west-northwest to Tsukon, thence northwest to Veh-Tenjerlow Lakes area T25N, R8E, FM.

QUAD 119 - Trail 34B (system around Fort Yukon)

Identification - Trail system of Trail 34 extending out from Fort Yukon in T23N, R12E, FM

Description: The trail runs from trail system 34 easterly from Fort Yukon in T23N, R12E, FM.

QUAD 119 - Trail 37 (northcentral, above Yukon River)

Identification - Trail from Fort Yukon along the Yukon River to Beaver

Description: The trail begins at Fort Yukon thence runs westerly along the north bank of the Yukon River to Beaver.

QUAD 119 - Trail 38 (south of Yukon River)

Identification - Trail from the Spur 202D of the Circle/Fort Yukon Trail 202 to Beaver

Description: The trail begins at a point on the Circle/Fort Yukon spur 202D which is 12 miles southwest of Fort Yukon, thence westerly along the south bank of the Yukon River to Beaver.

QUAD 119 - Trail 202 Circle to Fort Yukon (near Ft. Yukon)

Identification - Circle to Fort Yukon Trail

Description: The winter trail extends from Circle at end of Steese Road parallel Yukon River on its LL to within 16 miles of Fort Yukon from which it follows the river ice.

QUAD 119 - Trail 202A Circle to Fort Yukon Spur #4 (above Circle)

Identification - Trail from Twenty-two Mile Village to Birch Creek

Description: The trail begins at Twenty-two Mile Village, thence southwest to a point on Birch Creek.

QUAD 119 - Trail 202B Circle to Fort Yukon Spur #3 (above Circle)

Identification - Trail from halfway whirlpool to Birch Creek

Description: The trail begins at halfway whirlpool on the Yukon River, thence southeast to a point on Birch Creek.

QUAD 119 - Trail 202C Circle/Fort Yukon Spur#2(above Circle)

Identification - Trail running from Birch Creek in T16N, R12E, FM to a cabin south of the Circle/Fort Yukon Trail.

Description: The trail begins at a point on Birch Creek in T16N, R12E, FM thence northeast to a cabin just south of the Circle/Fort Yukon Trail #202.

QUAD 119 - Trail 202D (south of Fort Yukon)

Identification - Spur of Circle/Fort Yukon Trail traveling southwest to Birch Creek

Description: The trail begins at a point on the Fort Yukon - Circle Trail 3 miles southeast of Fort Yukon, thence southwest through Twelve Mile Lake to the town of Birch Creek.

QUAD 119 - Trail 212 (northwest of Fort Yukon)

Identification - Trail from Fort Yukon to cabins cutoff

Description: The trail runs from Fort Yukon northwest to cabins cutoff on Chandalar River in T21N, R8E, FM.

QUAD 120 - Trail 32 (north of Chalkyitsik)

Identification - Northeast access through Chalkyitsik to Yukon border

Description: The trail crosses Yukon/Alaska border in T14S, R48E, UPM, follows Bilwaddy Creek west approximately 10 miles southwest on the east side of the Coleen River crossing to the southwest in T28N, R22E, FM from here southwest to crossing of the Porcupine River in T25N, R20E, FM thence southwest along Porcupine approximately 25 miles turning due south through Chalkyitsik to Ohtig Lake then southwest approximately 18 miles turning due south in T18N, R17E, FM proceeds due south to Yukon River at a point approximately 10 miles north of Circle south to Trail 202.

QUAD 121 - Trail 32 (braided) (same as above)

Identification - Northeast access through Chalkyitsik to Yukon border

Description: The trail crosses Yukon/Alaska border in T14S, R48E, UPM, follows Bilwaddy Creek west approximately 10 miles southwest on the east side of the Coleen River crossing to the southwest in T28N, R22E, FM from here southwest to crossing of the Porcupine River in T25N, R20E, FM thence southwest along Porcupine approximately 25 miles turning due south through Chalkyitsik to Ohtig Lake then southwest approximately 18 miles turning due south in T18N, R17E, FM proceeds due south to Yukon River at a point approximately 10 miles north of Circle south to Trail 202.

QUAD 122 - Trail 34 Fort Yukon to Christian (above Ft.Yukon)

Identification - Fort Yukon to Christian

Description: The trail runs from Fort Yukon northwest to Alexander's Village, thence northeast via Joint Lake to a point approximately three miles east of Christian thence due east to Christian.

QUAD 122 - Trail 41 Coldfoot to Venetie (near Venetie)

Identification - Coldfoot to Venetie Trail

Description: The trail runs from Coldfoot easterly along Slate Creek to Boulder Creek thence southeasterly through Boatman Pass to west fork of Chandalar River, along the west fork to a crossing of the middle fork near Mary Lake then south of Mary Lake and Kobuk Lake to Caro, thence on the Beaver Caro Trail to Schilling Creek along the south bank of the Chandalar River to Chuttoh Bluffs and Venetie.

QUAD 123 - Trail 41 Coldfoot to Venetie (same as above)

Identification - Coldfoot to Venetie Trail

Description: The trail runs from Coldfoot easterly along Slate Creek to Boulder Creek thence southeasterly through Boatman Pass to west fork of Chandalar River, along the west fork to a crossing of the middle fork near Mary Lake then south of Mary Lake and Kobuk Lake to Caro, thence on the Beaver Caro Trail to Schilling Creek along the south bank of the Chandalar River to Chuttoh Bluffs and Venetie.

QUAD 123 - Trail 208 Yukon/Chandalar Sled Road (75 miles) (along Hadweenzic River)

Identification - Connects Chandalar mining region with Yukon River and by a circuit route with Fairbanks

Description: The trail was referenced in the Alaska Road Commission 1913 annual report as Beaver/Chandalar Sled Road, 75 mile sled road connecting Beaver and Caro, from Beaver northeasterly past George Lake, Nine Mile Lake, Twelve Mile Lake, Fourteen Mile Lake to cabin in T20N, R3E, FM then northwest with 2 loops to 56 mile cabin in T25N, R1W, FM then northerly to 61 Mountain and Schilling Creek and junction with Trail 41 then northwesterly to Caro.

SECTION III - DEPARTMENT OF INTERIOR

United States Department of the Interior

OFFICE OF THE SECRETARY
WASHINGTON, D.C. 20240

October 23, 1985

Honorable John B. Coghill
Alaska State Senate
P.O. Box 268
Nenana, Alaska 99760

Dear Mr. Coghill:

As you know I recently visited Alaska and among other items of business I discussed the references to possible R.S. 2477 historic trails in the National Park Service general management plans with Regional Director Evison and Deputy Regional Director Peterson, as well as with the Citizens Advisory Commission on Federal Areas.

The National Park Service will include the R.S. 2477 identification maps supplied by the State of Alaska in the general management plans. Since these possible right-of-ways have, as yet, not been formally asserted or recognized, the National Park Service will include language on the maps to identify them as being included for informational purposes.

Recently, I requested Department of the Interior bureaus in Alaska, under the chairmanship of Ric Davidge, to work together as a task force in drafting guidelines for the receipt and processing of R.S. 2477 claim assertions in Alaska. This effort is in process now.

A copy of this letter will be forwarded to the Alaska Regional Directors; however, based on our August discussions in Anchorage, I am confident that those materials provided by the State will be included in the appropriate management plans.

Sincerely,

Bill Horn

Assistant Secretary for
Fish and Wildlife and Parks

United States Department of the Interior

OFFICE OF THE SECRETARY
WASHINGTON, D.C. 20240

JUL 12 1985

Memorandum

To: Director, Fish and Wildlife Service
Director, National Park Service

From: Assistant Secretary for Fish and Wildlife and Parks /s/ William P. Horn

Subject: Identification and Assertion of Rights-of-Way by the State of Alaska or Other Claimants Under RS2477 Grant

As you know, the State of Alaska has begun a program of identifying possible rights-of-ways within the Alaska units of the National Park Service and the Fish and Wildlife Service. Since my last visit to Alaska I have given this program some thought and requested my Special Assistant in Alaska to chair a task force on the matter.

Of immediate concern is how we respond to the efforts of the State, or any other party, in receiving claim assertions or maps that identify possible rights-of-ways. While in Alaska I made the decision that it was in the public interest to include the maps provided by the Chairman of the Alaska State Senate Transportation Committee as an appendix in the Park Service General Management Plans. The inclusion of these maps in the GMP's provides the public general notice that the State believes there are potential pre-existing rights-of-ways in the park units. I am informed that normally the claim assertion process does not afford public notice and therefore have insisted that we include these maps in the plans.

It is important to recognize the difference between the "identification" of possible rights-of-ways and the formal assertion of a right-of-way claim under the RS2477 grant. The inclusion of these "identification maps" in no way establishes or recognizes a right-of-way or relinquishes rights-of-ways not identified. The map simply alerts the public and unit managers that these rights-of-ways may exist within the park or refuge under the RS2477 grant. I believe the inclusion of the maps in our plans to be in the public interest.

The State is also providing "identification" maps for each of the refuges in Alaska. It is my decision that each Comprehensive Conservation Plan for the refuges include these maps at the earliest practicable opportunity.

Although I recognize that some of the CCP's are finished and others are close to being completed, I ask you to include the maps in the proper

areas of the plans. It would be most effective to have these maps available in the DRAFT CCP's presented for public review. Each of the maps must be properly titled to assist plan reviewers in understanding that the maps only "identify" "possible" rights-of-ways within the refuge.

My staff in Alaska is in the process of providing, for our review, DRAFT guidelines on the receipt and processing of formal RS2477 claim assertions. The Bureau of Land Management in Alaska and in Washington, D.C. has been most helpful in this effort and we are building on their experience in this area. It is my intent to have you review the DRAFT Guideline for the receipt and processing of RS2477 claim assertions by the Fish and Wildlife Service and the National Park Service in Alaska soon.

At present neither agency has guidelines in this area although BLM does. Given the very complex legal and land management questions involved, guidelines applicable to NPS and FWS lands will be needed. It is also my intention to formally publish these guidelines in the Federal Register

Please advise if you have any specific concerns regarding our approach to this problem. The principal contact in my office for the RS2477 issue is Ric Davidge (907) 786-3435.

United States Department of the Interior

OFFICE OF THE SECRETARY
WASHINGTON, D.C. 20240

MEMORANDUM

NOV 7 1985

TO: RS 2477 Task Force

FROM: Ric Davidge, Chairman
Office of Assistant Secretary
Fish, Wildife and Parks

Enclosed for your review and consideration are a host of materials regarding the issue we have been charged to address. Please carefully review these comments and provide back to me any questions or comments that you have. Please, I am not asking for official agency responses, only words-on-paper.

Following the panel at the AFN convention, which many of you attended (Thanks), a great deal of mis-information was left up in the air and has unfortunately fostered controversy that is not factually based. I have discussed my concerns with most of you and the senior agency officials of both Federal and State governments as well as AFN and have concluded that prior to issuing DRAFT RS 2477 Claim Asserting and Recognition Guidelines we must directly and publicly address some of the key fact/fiction questions now making the rumor circuit.

It is therefore my recommendation that during the second week of December, 1985 (Dec 8-14) we hold a one-day public workshop on RS 2477's - The Facts not Fictions. I have approached AFN and the Native Land Managers' Association as well as State and Federal agencies to seek co-sponsorship of the workshop. The response has been favorable. I have also requested that the top RS 2477 solicitors from the Washington DOI office participate in this workshop along with other experts from the ROW section of BLM in Washington, D.C.

In preparing for this workshop we need to decide the specific date, location, format and hand out materials.

I recommend the 11th of December (Wednesday) starting at 9 a.m. with a panel of experts presenting the FACTS. A break for lunch from 12:00-1:00, and the afternoon dedicated to question, answer and discussion.

To prepare for the presentations and following discussions I recommend you assimilate all appropriate factual materials and organize them in a presentable form. In as much as BLM has been directly responsible for the RS 2477 program for many years I am asking that they facilitate the workshop and be the receivers/organizers of your handouts or information.

The development of a 3-ring binder on RS 2477 ROW's Facts, not Fictions that is organized along subject lines should assist in our efforts initially and allow up dating at a later time if necessary.

One of the most important components of this workshop and its' "papers" is the Question and Answer presentation following lunch. In order to assist all those participating, I am asking that each agency or participant prepare a Question and Answer handout that identifies, asks, and answers every reasonable question you may anticipate. If you identify questions for which you have no answers they should be placed on seperate pages and will serve as a basis for discussion.

I do not anticipate we will be able to identify, ask or answer all the questions that may arise, but at least we can put FACT forward and establish a solid basis for proceeding on the guidelines.

If you have any questions please call 786-3374 or 786-3435.

NOV 2 2 1985

TO: RS2477 Task Force

FROM: Ric Davidge, Chairman

SUBJECT: Federal Regulation/Permitting of Uses on RS2477 Rights-of-Ways

In a recent meeting with senior regional officials of the National Park Service (NPS), a question of that agency's authority to regulate, via permit, the activities and/or uses of RS2477 Rights-of-Way (ROW) was discussed. Although no agreements were reached at that point, I think it important to keep you advised of significant concerns or issues in this area as they develop.

Basically, the NPS is arguing that RS2477 ROW's fall under their (36 CFR 13.14) regulations (copy enclosed); NPS and their Solicitor cite a recent statement from Federal Judge Fitzgerald as the basis for this contention.

As you recall at our meeting, prior to my last trip to Washington, D.C., I took the position that ROW granted by RS2477 were subject to reasonable Federal regulation. After meetings with the ROW office of the Bureau of Land Management (clearly the experts in the RS2477 area) and with other Department of Interior officials, I was convinced, without qualification, that ROW's granted by RS2477 are State highways and are not subject to Federal regulation. This conclusion evolved from two points of law that were discussed with the Assistant Secretary.

1. The nature of the 1866 grant by Congress, via enactment of RS2477, was unqualified. The grants' acceptance (claim) must have occurred, in Alaska, before 1968 (Secretary Udalls' withdrawl). Both events predate the creation of the Conservation System Units in the Alaska National Interest Lands Conservation Act (ANILCA) in 1981. The ROW's granted and accepted, regardless of whether federal agencies have noted them on the status plats, are pre-existing property rights given/granted/conveyed to the Territory/State of Alaska.

It is my interpretation of 36 CFR 13.14 that it applies only to the use of off-road vehicles on lands owned by the NPS. To find otherwise would be to claim that a ROW or other interests in property owned by governments (other than NPS) or individuals/corporations are subject to NPS regulations and management. Even if the Park Service has the authority to require a permit for use of the RS2477 Right of Way - what would the permit require? The NPS has no authority, according to my researched analysis, to limit a otherwise constrain public uses of the ROW so long as those uses are consistent with the ROW grant purpose which was transportation and applicalbe state law. In addition if NPS interpretation were correct (and I do not believe it is), the passage of ANILCA (section 103[c]) in 1981 directly addresses that issue.

2. Section 103(c) of ANILCA states clearly that only those lands (or interests therein) that are "public lands" (owned by the NPS) are subject to Federal regulation. A ROW granted and claimed under RS2477 is a (less-than-fee) property right/easement that belongs to the State and not to the NPS, and therefore, is not subject to NPS regulation or management. Clearly, where appropriate, NPS continues to own the land, subject to the ROW granted by Congress for transportation purposes. NPS management and regulation of the land can in no way impede the Congressionally granted ROW, so long as its use is consistent with the purposes of the grant.

Let's explore Section 103(c) of ANILCA further in light of some questions raised on the definition of some terms within that section of ANILCA.

Section 103(c)

Only those lands within the boundaries of any conservation system unit which are public lands (as such term is defined in this Act) shall be deemed to be included as a portion of such unit. No lands conveyed to the State, to any Native Corporation, or to any private party shall be subject to the regulations applicable solely to public lands within such units. If the State, a Native Corporation, or other owner desires to convey any such lands, the Secretary may acquire such lands in accordance with applicable law (including this Act), and any such lands shall become part of the unit, and be administered accordingly.

Reference is made by Section 103(c) to the definition of the term "public lands." Section 102(3)(A) states:

(3) The term "public lands" means land situated in Alaska, which after the date of enactment of this Act, are Federal lands, except-

(A) land selections of the State of Alaska which have been tentatively approved or validly selected under the Alaska Statehood Act and lands which have been confirmed to, validly selected by, or granted to the Territory of Alaska or the State under any other provision of Federal law.

Following my review of these sections of ANILCA, it is clear to me that ROW's granted by RS2477 in 1866 and claimed by the State/Territory of Alaska by various acts are not subject to NPS management and/or regulation. I would appreciate your analysis of this interpretation and any comments you may wish to offer regarding any application of these concepts on your agencies' land management programs.

I have attached for your review a copy of the Judge's statement in which he presents his reasoning for granting the NPS a preliminary restraining order in the Vogler case. His granting the order has been appealed, I am informed, and the court may or may not agree with his stated reasoning.

According to some Federal officials who observed the Vogler case in court, the judge did not directly address the RS2477 issue but rather addressed the question of immediate harm and in "deference to administrative interpretation," granted the order.

Further, in my review of 36 CFR 13.14 (copy attached), I conclude that the application of the term "established roads and parking areas" addresses those roads and parking areas "established" by the NPS for specific uses and not private roads/State highways or ROW's granted by Congress prior to the creation of the park unit and prior to even the promulgation of 36 CFR 13.14.

I hope this discussion has stimulated some thinking regarding any implications to your agency or interest area. If so, it has served its purpose. Clearly, 36 CFR 13.14 applies only to the NPS but there are some general concepts/issues that come to mind in discussing this point and it is for that purpose that this memorandum has been provided. It has not been my intent to argue for or against a particular position but to academically explore the contention of NPS and its Solicitor on this important issue.

If you have any questions or comments, please forward them to me quickly.

Remember, the workshop is scheduled for the 11th of December and so far I have verbal agreements from the State (DNR/DOT) and the Alaska Federation of Natives, along with the Alaska Native Land Managers Association and appropriate Federal agencies to co-sponsor the workshop. I await your written questions and answers for consolidation and presentation PRIOR to our next meeting of the task force. I also need your FACT papers too.

Attachments

FOR THE MINING SECTION, IT PROBABLY ALSO AFFECTS THE TYPE OF SHOWING OF TYPES OF HARM. THE TREMENDOUS LANGUAGE CONGRESS USED DEALING WITH ACCESS FOR ECONOMIC OR OTHER PURPOSES STRANGELY IS DEVOID OF ANY TYPE OF INDICATION OF WHAT INTERESTS WERE TO PREVAIL OVER THESE INTERESTS. IT IS CLEARLY A UNIQUE SITUATION. I THINK IT COULD PROBABLY GO TO THE TYPE OF RELIEF, BECAUSE IF WE ARE STOPPED WITH THE INJUNCTION, THERE IS JUST NO WAY THAT ONE COULD AVAIL HIMSELF OF THAT PRESUMPTION OR THAT GRANT LANGUAGE.

THE COURT: I THINK YOU HAVE COVERED YOUR POSITION VERY WELL, MR. STEMP.

MR. STEMP: THANK YOU, YOUR HONOR.

THE COURT: I AM GOING TO HAVE TO GRANT THE PRELIMINARY INJUNCTION. I WILL STATE MY REASONS.

THERE IS NOT ANY QUESTION AT ALL ABOUT THE FACT THAT MR. VOGLER OR ANY OTHER MINER WITH HOLDINGS IN A NATIONAL PARK IS ENTITLED TO ACCESS, AND THAT IS ADEQUATE AND FEASIBLE ACCESS AS DEFINED BY THE SECRETARY'S REGULATION IN PART D. THAT IS BEYOND DISPUTE IN THIS CASE.

THE QUESTION HERE IS WHETHER OR NOT HIS REGULATIONS, WHICH DEFINE AND WHICH ESTABLISH THE REQUIREMENTS FOR PERMITS, ARE SUBJECT TO, AND I JUST GRANT DEFERENCE TO THE ADMINISTRATIVE INTERPRETATION, AND SINCE THE SECRETARY IS CHARGED WITH CARRYING OUT AT LEAST THIS PROVISION OF THE ACT, SO I HAVE START OFF WITH THE RECOGNITION THAT CONSIDERABLE DEFERENCE IS

AFFORDED OR MUST BE AFFORDED TO THE SECRETARY. IN LOOKING UP THE REGULATIONS, I MUST SAY THAT IT IS VERY DOUBTFUL AS TO WHETHER OR NOT THE ROAD THAT HAS BEEN DESCRIBED TO ME, AND I USE THAT TERM, WOULD FIT THE DEFINITION OF AN ESTABLISHED ROAD WITHIN THE REGULATIONS, AND THAT DOESN'T, OF COURSE, PRECLUDE THAT THERE MAY NOT BE ACCESS OVER SEVERAL OTHER RIGHTAWAYS, LESS THAN ESTABLISHED ROAD, BUT IF IT IS IT MUST BE BY PERMIT AND THE PERMIT CARRIES WITH IT A VERY IMPORTANT PURPOSE, AND THAT IS THAT EVEN THOUGH ACCESS MIGHT BE REQUIRED THE [illegible] BE USED TO MINIMIZE WHATEVER ENVIRONMENTAL INJURY MIGHT RESULT IN ORDER TO AFFORD THE REQUIRED ACCESS.

IT IS CLEAR HERE THAT THE VEHICLES WE ARE TALKING ABOUT WERE OFF-THE-ROAD VEHICLES. THE REGULATIONS ARE QUITE CLEAR THAT THE SECRETARY IS AUTHORIZED TO ISSUE PERMITS FOR THE USE OF OFF-ROAD VEHICLES ON EXISTING OFF-ROAD VEHICLE TRAILS, [illegible] BUT HE HAS TO MAKE A FINDING IN THAT CASE AND [illegible] THE ATTACHMENT OF SUCH STIPULATIONS AND CONDITIONS THAT ARE NECESSARY FOR PROTECTION OF PARKS.

I THINK IN THIS CASE THE SECRETARY WOULD HAVE TO, ONCE THE PERMIT IS APPLIED FOR, CONSIDER ANY INJURY THAT MIGHT OCCUR AND CONSIDER THAT IN CONJUNCTION WITH THE DEMONSTRATED NEED, THAT BALANCING IS SUBJECT TO CONSIDERABLE DISCRETION ON THE SECRETARY'S PART. BUT THERE IS NO DOUBT IN MY MIND THAT

HE MAY REQUIRE THE PERMIT TO ACHIEVE THE PURPOSE OF THE ACT AND MINIMIZE ANY INJURY THAT MIGHT RESULT FROM THE ACCESS, WHICH I THINK IS STANDARD AND CONCEDEDLY SO, UNDER HIS OWN REGULATIONS.

SO I AM FINDING THAT NO PERMIT WAS APPLIED FOR, AND THAT IT WAS NECESSARY THAT THE RESPONDENT APPLY FOR A PERMIT. I'D FIND THAT, ALTHOUGH SERIOUS QUESTIONS ARE RAISED, THAT THE GOVERNMENT SHOWS A STRONG LIKELIHOOD OF SUCCESS.

TURNING THEN TO THE QUESTION OF IRREPARABLE INJURY: I HAVE TO SAY THAT THE PUBLIC INTEREST IS INVOLVED IN THIS CASE, AND THERE'D BE SUBSTANTIAL INJURY TO THE PUBLIC INTEREST. A PRELIMINARY INJUNCTION WILL ISSUE PRECLUDING THE RESPONDENT AT THIS TIME FROM USING THE SO-CALLED WINTER TRAIL AS ACCESS TO THE MINING CLAIMS WITHOUT SEEKING A PERMIT.

SECOND, A PRELIMINARY INJUNCTION SHALL PRECLUDE HIM FROM THE MINING OPERATIONS ON UNPATENTED MINING CLAIMS ON WOODCHOPPER CREEK.

I SHALL MAKE THIS MATTER IMMEDIATELY APPEALABLE UPON THE ORIGINAL DOCUMENTS AND RECORDS.

I SHOULD ALSO LIKE TO, IMMEDIATELY UPON ADJOURNMENT, SEE COUNSEL IN MY CHAMBERS. SEE ME IN MY CHAMBERS, COUNSEL. WE SHALL DIRECT THE PREPARATION OF AN INJUNCTION, MAKE CERTAIN ITS LIMITATIONS, AND I ALSO WANT TO DISCUSS WITH COUNSEL WHAT SHOULD BE DONE, UNDER THE CIRCUMSTANCES, IN A VERY PRACTICAL SENSE. GOOD AFTERNOON.

[WHEREUPON COURT ADJOURNED AT 3:49 P.M.]

downed aircraft is otherwise impracticable or impossible.

(e) Salvaging, removing, posessing, or attempting to salvage, remove or possess any downed aircraft or component parts thereof is prohibited, except in accordance with a removal procedure established under paragraph (c) of this section. *Provided, however,* That the owner or an authorized representative thereof may remove valuable component parts from a downed aircraft at the time of rescue without a permit.

(f) The use of a helicopter in any park area, other than at designated landing areas (*see* Subpart C regulations for each park area) or pursuant to the terms and conditions of a permit issued by the Superintendent, is prohibited.

[46 FR 31854, June 17, 1981; 46 FR 35258, July 8, 1981]

§ 13.14 Off-road vehicles.

(a) The use of off-road vehicles in locations other than established roads and parking areas is prohibited, except on routes or in areas designated by the Superintendent or pursuant to a valid permit as prescribed in paragraph (c) of this section or in § 13.15 or § 13.16. Such designations shall be made in accordance with procedures in this section. Nothing in this section affects the use of off-road vehicles by local rural residents engaged in subsistence as authorized by § 13.46.

(b)(1) The Superintendent's determination of whether to designate a route or area for off-road vehicle use shall be governed by Executive Order 11644, as amended.

(2) Route or area designations shall be published in the "FEDERAL REGISTER."

(3) Notice of routes or areas on which off-road travel is permitted shall be in accordance with the provisions of § 13.30(f).

(4) The closure or restrictions on use of designated routes or areas to off-road vehicles use shall be in accordance with the provisions of § 13.30.

(c) The Superintendent is authorized to issue permits for the use of off-road vehicles on existing off-road vehicle trails located in park areas (other than areas designated as part of the National Wilderness Preservation System) upon a finding that such off-road vehicle use would be compatible with park purposes and values. The Superintendent shall include in any permit such stipulations and conditions as are necessary for the protection of park purposes and values.

§ 13.15 Access to inholdings.

(a) *Purpose.* A permit for access to inholdings pursuant to this section is required only where adequate and feasible access is not affirmatively provided without a permit under §§ 13.10 through 13.14 of these regulations. Thus, it is the purpose of this section to ensure adequate and feasible access across a park area for any person who has a valid property or occupancy interest in lands within or effectively surrounded by a park area or other lands listed in section 1110(b) of ANILCA.

(b) *Application and Administration.* (1) Applications for a permit designating methods and routes of access across park areas not affirmatively provided for in this part shall be submitted to the Superintendent having jurisdiction over the affected park area as specified under § 13.31.

(2) Except as provided in paragraph (c) of this section, the access permit application shall contain the name and address of the applicant, documentation of the relevant property or occupancy interest held by the applicant (including for 1872 Mining Law claimants a copy of the location notice and recordations required under the 1872 Mining Law and 43 U.S.C. 1744), a map or physical description of the relevant property or occupancy interest, a map or physical description of the desired route of access, a description of the desired method of access, and any other information necessary to determine the adequacy and feasibility of the route or method of access and its impact on the natural or other values of the park area.

(3) The Superintendent shall specify in a nontransferable permit, adequate and feasible routes and methods of access across park areas for any person who meets the criteria of paragraph (a) of this section. The Superin-

OFFICE OF THE
ASSISTANT SECRETARY

Senator Jack Coghill
Chairman
Senate Transportation Committee

Dec 30, 1985

Dear Senator,

Enclosed is what I am calling the definitive analysis of the case law and administrative law review of RS2477. You will note that it was prepared by Ted Bingham, Chief, Division of Right-of-Way, BLM. He is regarded as the expert in this area and I think you will find his paper of significance.

As you know we are still in the formation stage of the RS2477 workshop. I understand you and both the House and Senate Committee may request a presentation by the panel of experts we will have at the workshop and that you want that presentation to be in Juneau. If you make the decision to request this please do so as soon as possible allowing us the greatest lead time possible.

Best wishes on the comming legislative session.

Chairman
RS 2477 Task Force

RS 2477

Section 8 of the Act of July 26, 1866, 14 Stat. 253, Revised Statutes 2477, 43 U.S.C. 932, repealed October 31, 1976, 90 Stat. 2793, (RS 2477), provided:

> The right of way for the construction of highways over public lands, not reserved for public uses, is hereby granted.

- It was an outright grant of right-of-way by the United States if and when accepted.

Determining whether an RS 2477 highway has been validly established is a question of federal law.

The common law doctrine of adverse possession does not operate against the federal government. United States v. California, 332 U.S. 19, 39-40 (1947); Texas v. Louisiana, 410 U.S. 702, 714 (1973), rehearing denied, 411 U.S. 988 (1973); Drew v. Valentine, 18 F. 712 (5th Cir. 1883). The necessary corollary of this rule is that in order for a state or individual to gain an interest in land owned by the United States, there must be compliance with a federal statute which grants such interests.

The operative rule of construction applicable to such statutes is that grants by the federal government "must be construed favorable to the government and ... nothing passes but what is conveyed in clear and explicit language -- inferences being resolved not against but for the government." Caldwell v. United States, 250 U.S. 14, 20 (1918); Wisconsin Central R.R. Co. v. United States, 164 U.S. 190, 202 (1896); Great Northern Ry. Co. v. United States, 315 U.S. 262, 272 (1942); Andrus v. Charlestone Stone Products Co., 436 U.S. 604, 617 (1978); cf. Leo Sheep v. United States, 440 U.S. 688 (1979). This doctrine applies to grants to states as well as grants to private parties. Dubuque v. Pacific Ry. Co., 64 U.S. 66, 88 (1859).

In United States v. Gates of the Mountains Lakeshore Homes, Inc., 732 F.2d 1411 (9th Cir. 1984), the appeals court held that RS 2477 does not provide for the construction of the grant according to the law of the state in which the land subject to the grant is situated; rather, its construction is a question of Federal law. Citing Humboldt County v. United States, 68 F.2d 1276, 1280 (9th Cir. 1982), the court noted that any doubt as to the scope of the grant under RS 2477 must be resolved in favor of the Government.

To determine whether a valid RS 2477 highway exists, the several elements of the offer provided by the terms of the statute must be met. First, are the lands public lands? Second, were the public lands reserved for a public use? Third, was there actual construction? Fourth, was what was constructed a highway?

I. PUBLIC LANDS

These are the original lands ceded to the central Government by the original 13 States plus additional lands obtained by the United States through purchase (Louisiana purchase of 1803, Alaska purchase of 1867), by treaty with other Governments (with Great Britain in 1783, 1817, and 1846), etc. Lands 're-acquired' by the United States from patentees (Acquired Lands) are not public lands unless specific legislation so provided. The lands must not have been segregated from operation of the 'public land laws.'

Such lands must not have been settled upon, claimed, entered, etc., pursuant to appropriate public land or mineral laws of the United States. For example:

Entered by settlement under Homestead, Trade & Manufacturing Site, or Native Allotment laws.

Location of a mining claim under the 1872 Mining Laws.

Selected by the State under Statehood Act or other appropriate law.

Such settlement, entry, location, or selection removes such lands from public lands status.

Such entered lands may return to public lands status upon abandonment, relinquishment, invalidation, etc. prior to obtaining title from the United States. The date of returning to public lands status will vary with the individual case circumstances and whether the official land records required notation (the 'Tract Book Notation' rule).

The terms "public lands" and "public domain" are used in United States statutes and decisions to designate lands subject to sale or disposal under the general laws of the United States. Northern Pacific Ry. Co. v. Hirzel, 1916, 161 P. 854, 29 Idaho 438.

The words "public lands," if nothing be said to the contrary, relate to lands subject to disposition under the public land laws, and not those set apart and used for some special public purpose. Stearns v. United States, Minn 1907, 152 F. 900, 82 C.C.A. 48. See also United States v. Williams, C.C. Nev. 1886, 30 F. 309, affirmed 11 S.Ct. 457, 138 U.S. 514, 34 L.Ed. 1026.

"Public lands" does not include tidelands. Borax Consolidated v. City of Los Angeles, 1935, 56 S.Ct. 23, 296 U.S. 10, 80 L.Ed. 9, rehearing denied, 56 S.Ct. 304, 296 U.S. 664, 80 L.Ed. 473.

> When a valid entry has been made ... that portion of the public land covered by the entry is segregated from the public domain, ... and is not included in subsequent grants made by Congress. Atchison, etc., R. Co. v. Richter, 1815, 148 P. 478, 30 N.M. 278, L.R.A.1916F, 969.

II. NOT RESERVED FOR PUBLIC USES

RS 2477 only grants rights-of-way over public lands "not reserved for public uses."

Various actions may have been taken by the Congress, Administration, or managing agency which reserves the public lands for public uses:

> Establishment of Indian Reserves, Wildlife Refuges, National Parks, National Forests, Military Reservations, and other areas not under the jurisdiction of the BLM are clearly not open to the construction of highways.
>
> Segregation from settlement, location, disposal, etc., under the public land laws by Act of Congress or by Executive or Secretarial Order (including Public Land Orders (PLO)). The extent to which withdrawals of public lands constitute "reservations for public uses" is potential complicated -- see, e.g., Executive Order 6910 (54 I.D. 539) (1934); Wilderness Society v. Morton, 479 F.2d 842, 882, n.90 (D.C. Cir. 1973) -- however, the BLM's position is that most, if not all, reserved for public uses. Even if not reserved for public uses, such segregation may also remove the lands from the status of "public lands;" see I above.
>
> A classification under such as the Small Tract Act (repealed), the Classification and Multiple Use Act (repealed), or the Recreation and Public Purposes Act reserves for public uses.
>
> Such lands may revert to public lands, not reserved for public uses, status upon termination of the effecting Act, Order, or Classification; the specific time of return varying with the specific circumstances.

PLO 4582 of January 17, 1969, as amended, placed all public lands in Alaska in the status of public lands reserved for public uses. PLO 4582 was repealed by the Alaska Native Claims Settlement Act of December 18, 1971, (ANCSA) which also withdrew certain lands around named and unnamed towns and villages. A

series of PLOs 1/ withdrew lands in 1971 and 1972, in addition to those withdrawn by the ANCSA itself. RS 2477 was revoked by the Act of October 21, 1976, prior to any relative change in the withdrawal status of all of Alaska's public lands. Thus the offer by Congress of a right of way grant pursuant to RS 2477 effectively ceased to exist in Alaska on January 17, 1969 (a small window between December 18, 1971, and Marc 3, 1972, and some scattered areas not withdrawn by the 1971/72 series of PLOs were available for operation of RS 2477).

III. ACTUAL CONSTRUCTION

RS 2477 grants a right-of-way for the construction of highways. BLM believes that the plain meaning in RS 2477 is that there must have been actual building of a highway; without some actual construction the grant could not have been accepted.

"Construction" means the "[p]rocess or act of constructing; act of building; erection; act of devising and forming; fabrication; composition; also a thing constructed; a structure." Webster's New International Dictionary, second edition, 1941 (unabridged), p. 572.

Would an act of mapping a highway route and filing such in an appropriate office constitute construction? We think not. Construction contemplates some action such as grading, surfacing, flagging, or some other physical change or addition to the natural area as may be necessary for the customary or usual passage or use by horses, wagons, cars, tracked vehicles, or even foot traffic. A residence is not constructed simply by illustrating an architectural drawing and announcing intent to build the residence. It is constructed when the foundation is laid and the sides and roof erected.

Federal decisions (administrative and judicial) are not helpful in interpreting "construction" as most, if not all, involve roads actually constructed. For example, see Nick Dire, et al., IBLA 80-420 (June 8, 1981); Wilderness Society, supra; United States v. Dunn, C.A. Cal 1973, 478 F.2d 443.

"Construction" may possibly occur over time by the passage of vehicles, however, this may be insufficient for "construction" or may not have developed to the stage of being "constructed" while the servient estate was public lands not reserved for public uses. The BLM believes that a "road" originally created merely by the passage of vehicles could have become a highway within the meaning of RS 2477 if state or local government had subsequently improved and maintained it by taking measures which qualify as "construction," i.e., grading, paving, placing culverts, etc. 2/

1/ PLO 5150 withdrew the Transportation Corridor (the Trans Alaska Pipeline), PLO 5156 withdrew the former Native Reserves, PLOs 5169 through 5181 withdrew most of the balance of Alaska for various purposes under the ANCSA.

2/ Such subsequent improvement must have occurred while the lands were still public lands not reserved for public purposes.

Roads that simply came into existence by the passage of individuals may also meet the test of "construction" by the action of the individuals. Without "construction" by state or local governments, however, such roads are not likely to qualify as highways.

IV. HIGHWAYS

A highway is a road freely open to everyone; a main road or thoroughfare; a public road; a thoroughfare from place to place, as where the context shows an intention to distinguish it from a private way intended primarily for the use of inhabitants of a particular locality; in its general sense, however, it is used to include any way, of whatever nature, which the law makes open to the use of all who pass. See, e.g., Webster's, supra, p. 1179; Harris v. Hanson, 75 F. Supp. 481 (D. Idaho 1948); Karb v. City of Bellingham, 377 P.2d 984 (Wash. 1963). Because a private road is not a highway, no right of way for a private road could have been established under RS 2477.

Where a road is constructed and/or maintained by an appropriate public body, this highway criteria is probably met. Where this is the case, the BLM need look no further.

Where a road comes into existence through passage of vehicles over time, including "construction" by non-public entities, the question becomes whether there is sufficient "public use" to clearly indicate an intent by the public to accept dedication as a highway.

> Dedication is not an act or omission to assert a right; mere absence of objection is not sufficient *** Passive permission by a landowner is not initself evidence of intent to dedicate. *** Intention must be clearly and unequivocally manifested by acts that are decisive in character. [Footnotes omitted.] Hamerly v. Denton, 359 P.2d 121 at 125 (Alaska 1961).
>
> [T]he fact that at one time a road or trail may have been created by rolling the "big rocks out of the roadbed" does not establish any historical use. An entryman could have built the road one day and abandoned it the next. Mere existence of the road for 15 years does not necessarily establish any use of the road. Nick Dire, supra.
>
> Desultory use of dead-end road or trail running into wild, unenclosed, and uncultivated country, does not create a public highway. Evidence of public use of road during periods that land was not subject of homesteaders' claims was insufficient to justify finding that public highway was created across homestead. Party claiming that road became public highway under RS 2477 by virtue of public use had burden of proving that highway was located over public lands and that character of use was such to constitute acceptance by public of the grant under RS 2477. Hamerly, supra.

In action to establish a public highway, evidence sustained judgment for defendant on ground there were no positive acts on part of public authority clearly manifesting an intention to accept trail as a public highway as required by RS 2477, and that use of the trail by public was merely casual and was insufficient to establish the highway. Kirk v. Schultz, 1941, 119 P.2d 266, 63 Idaho 278.

Protective provisions of RS 2477 recognizing roads constructed over public lands by private persons was not applicable where defendants, who were asserting an easement for a road across public lands, had not readied claimed road for use. U.S. v. Dunn, supra.

Even though it has been held that a road may be a public highway when it provides access to only one land owner, Leah v. Manhart, 102 Colo. 129, 77 P.2d 652 (1938), courts look closely at the type of use which a road receives. Nick Dire, supra.

In summary, BLM's position is that RS 2477 was an offer by Congress that could have been accepted upon actual construction by the State, local government, or by an authorized private individual, of a highway open to and used by the public during a period when the servient lands were public lands not reserved for public uses. Insofar as highways meet this criteria, BLM will not question their validity.

State Laws Construing RS 2477

State court decisions and state statutes are in conflict with each other on the issue of how a right of way under RS 2477 is perfected. Generally, the approach of the states appears to fall into three general categories. First, some (Kansas, South Dakota, and Alaska) have held that state statutes which purport to establish such rights-of-way along all section lines are sufficient to perfect the grant upon enactment of the state statute, even if no highway had either been constructed or created by use. Tholl v. Koles, 70 P. 881 (Kan. 1902); Pederson v. Canton Twp., 34 N.W. 2d 172 (S.D. 1948); Girves v. Kenai Peninsula Borough, 536 P.2d 1221 (Alas. 1975), contra Warren v. Chouteau County, 265 P. 676 (Mont. 1928). Second, states such as Colorado, Oregon, Wyoming, New Mexico, and Utah have held that RS 2477 rights-of-way can be perfected solely by public use, without any construction or maintenance. Nicolas v. Grassle, 267 P. 196 (Colo. 1928); Montgomery v. Somers, 90 P. 674 (Ore. 1907); Hatch Bros Co. v. Black, 165 P. 518 (Wyo. 1917); Wilson v. Williams, 87 P.2d 683 (N.M. 1939); Lindsay Land & Livestock Co. v. Churnos, 285 P. 346 (Utah 1930). Third, Arizona courts have held that rights-of-way can be established only by a formal resolution of local government, after the highway has been constructed. Perfection by mere use is not recognized. Tucson Consol. Copper Co. v. Reese, 100 P. 777 (Ariz. 1900).

The term "construction" must be construed as an essential element of the grant offered by Congress; otherwise, Congress' use of the term is meaningless and superfluous. The states could accept only that which was offered by Congress

and not more. From the BLM's point of view, the Arizona interpretation is the only correct one; the positions taken by the other states do not meet the express requirements of the statute. For example, the Kansas, South Dakota, and Alaska approach based on section lines does not even require that there be a highway or access route, much less that it be constructed. The approach taken by the other states that RS 2477 rights-of-way may be perfected by access ways created by use alone, without any construction, also fails to meet the plain requirement of RS 2477 that such highways be "constructed."

Thus, rights-of-way which states purport to accept but on which highways were not actually constructed while the lands were public lands not reserved for public uses do not meet the requirements of RS 2477 and therefore no perfected right-of-way grant exists.

Assertions, Validity, Acceptance

BLM's regulations at 43 CFR 2802.5(b) provide that an entity which has constructed highways under RS 2477 may file with BLM a map showing the location of such a public highway. Further:

> The submission of such maps showing the location of RS 2477 highway(s) on public lands shall not be conclusive evidence as to their existence. Similiarly, a failure to show the location ... shall not preclude a later finding as to their existence.

A claim of an RS 2477 right-of-way is like a miner's location of a claim under the Mining Law of 1872, for which no application is required either. Like a mining claim, however, a claim to a RS 2477 right-of-way does not necessarily mean that a valid right exists. The United States has often successfully challenged the validity of mining claims because of the failure of the claimant to establish rights under that law. See, e.g., Cameron v. United States, 252 U.S. 450 (1920); United States v. Coleman, 390 U.S. 599 (1968); Hickel v. Oil Shale Corp., 400 U.S. 48 (1970). The BLM has not previously determined the validity of claimed rights under RS 2477 because it has had no land or resource management reason to do so; i.e., conflicts generally did not arise between the existence of claimed rights-of-way under RS 2477 and the management of the public lands affected by such claims. If there is a resource management reason to do so, claimed rights-of-way may be reviewed to determine their validity under RS 2477.

Under Sections 201 and 202 of the Federal Land Policy and Management Act (43 U.S.C. 1711 & 1712) (FLPMA), the BLM is required to prepare and maintain inventories of public lands and prepare land use plans.

In concert with this, the BLM has encouraged states and local governments to assert those state and local government highways they believe are RS 2477 highways. Where such asserted highways appear to meet the criteria of construction on public lands not reserved for public uses, the BLM will note the records. This is similar to the "acceptance" and noting of a mining claim notice filed pursuant to Section 314 of FLPMA (43 U.S.C. 1744).

Where the asserted RS 2477 highway involves land which is (was) not public lands not reserved for public uses, or construction does not appear to have been involved, the BLM will not note the records and should inform the asserter that the BLM does not believe the assertion is valid. The BLM will not adjudicate the validity of such assertions unless there is a conflicting land or resource management concern that cannot be resolved without determining the validity of the RS 2477 assertion.

BLM Regulation of Public Highways

A valid RS 2477 right-of-way consists of a grant of right of way from the United States. The right-of-way is for public highway use and only highway uses (see Gates of the Mountains, supra.).

If BLM is the manager of the servient estate, it may challenge the holder of the RS 2477 right-of-way whenever the holder seeks to do something beyond the rights granted. Uses other than highways within or adjacent to the RS 2477 highway may not be made except under appropriate federal law and, where required by such law, with authorization from the BLM.

Appropriate uses within the RS 2477 right-of-way generally will not be a concern of the BLM nor will the BLM seek to regulate such uses either administratively or through judicial proceedings. However, should the BLM believe that a proposed use/action within a RS 2477 right-of-way would have an adverse impact on adjacent BLM managed lands or resources, BLM will take appropriate steps to protect such lands or resources.

RS 2477 and Lands Conveyed from the United States

A RS 2477 right-of-way was a grant offered by the United States, was accepted by action of appropriate public officials, and required no approval by the administering federal agency. As such the existence of such a right-of-way is not included in the reservations or exceptions in the patent or other document conveying public lands to states, local governments, or private entities. The new owner takes the title to the land from the United States subject to any RS 2477 rights that may exist.

It is the responsibility of the entity claiming the RS 2477 right-of-way to protect its interest against the new owner, or, conversely, the responsibility of the new owner to protect his property against the assertions of others. The BLM has no role in any such disputes.

RE: R.S. 2477 Rights-of-Way

DATE: July 9, 1985

Thank you for the meeting yesterday on the R.S. 2477 issue. We were pleased to discover that, as in your words Commissioner Knapp, "We are all working for the same team," and that we share a common concern on behalf of the people of Alaska. We look forward to close cooperation during the ensuing weeks as we work together to meet a challenging deadline.

Our goal is to provide the National Park Service with the appropriate maps and documentation so that possible R.S. 2477 trails will be reflected in the draft General Management Plans that will be sent to Congress in December of this year.

I am grateful that you, Commissioner Knapp, have lent your full support and have set in motion the identification by your people of the R.S. 2477 rights-of-way that touch or cross the CSU's.

Likewise, the immediate response of your people, Commissioner Wunnicke, to help us locate the existing documentation and to help guide us in establishing priorities and how we should prepare this information is much appreciated.

I look forward to my task force meeting with Messrs. Hickey, Hawkins and Gustafsen on Friday morning, July 12th and joining us for our meeting with the National Park Service Area Director and his staff that afternoon. At that time, Mr. Contor has promised they will outline what they require in terms of receiving R.S. 2477 rights-of-way assertions.

Again, my thanks for your assistance. We look forward to accomplishing our mutual goals for Alaska's future.

BILL SHEFFIELD, GOVERNOR

November 6, 1985

Dear Reviewer:

Attached for your review and comment is a draft RS 2477 Rights-Of-Way (ROW) Policy and Procedures document cooperatively prepared by the Department of Natural Resources (DNR) and the Department of Transportation and Public Facilities (DOT/PF).

The purpose of this document is to provide comprehensive and uniform policy and procedures for addressing potential RS 2477 historical roads and trails in Alaska by the two state agencies primarily responsible for this issue. Included in this document is a brief discussion of the general background and history of RS 2477 roads and trails, followed by procedures for state decisions related to assertion, validation, disclaimer of interest, vacation and arrangements for ensuring adequate agency and public notice and review. The document also identifies the roles and responsibilities of DNR and DOT/PF during the process and outlines management responsibilities, legal considerations and other related issues.

In addition to review by the general public, we are submitting this document to numerous affected parties and interest groups for comment, including the Alaska Land Use Council, the Alaska Land Use Advisors Committee, the Alaska Miners Association, the Senate and House Transporation and Resources Committees, the Alaska Federation of Natives, the Alaska Native Land Managers Association, the Resource Development Council, the Citizens Advisory Commission on Federal Lands, and environmental groups. DNR and DOT/PF will sponsor informal meetings in Anchorage and Fairbanks to discuss this document. The Anchorage meeting is scheduled for 10:00 AM on Tuesday, December 3rd in the DNR Commissioner's Conference Room, 12th Floor, Frontier Building at 36th and C Streets. The Fairbanks meeting is scheduled for 10:00 AM, Wednesday, December 4th in the DOT/PF Conference Room, Suite D, 600 University Plaza.

The formal comment period will close on December 20, 1985. Thereafter, we expect to adopt policies and procedures and begin implementation. It may be necessary to follow this effort with formal regulations implementing portions of this proposal. If that proves necessary, every effort will be made to do so as expeditiously as possible.

DRAFT

NOVEMBER 6, 1985 DRAFT

ALASKA DEPARTMENT OF NATURAL RESOURCES
ALASKA DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES

RS 2477 RIGHTS-OF-WAY POLICY AND PROCEDURES

I. Policy

The State of Alaska, acting through the Department of Natural Resources (DNR) and Department of Transportation and Public Facilities (DOT/PF), recognizes a need to develop and implement coordinated statewide procedures that better define and establish state goals and responsibilities pertaining to the identification and establishment of historical roads and trails in Alaska under federal Revised Statute (RS) 2477.

Therefore, it is the policy of the state, as implemented by the procedures contained herein, to help promote public access opportunities, provide guidance to public and private officials with land resource and transportation management and planning decisions, ensure adequate public and agency participation in the state decision making process, respect private property rights and help resolve uncertainty over possible valid existing RS 2477 rights-of-way (ROW's) on public and private lands.

In April of 1974, the Alaska Department of Highways submitted the 1974 Existing Trail System Inventory to the Bureau of Land Management (BLM). This submission was a further documentation by the state of its intent to accept the grant for approximately 1400 possible RS 2477 ROW's statewide. However, this inventory was not intended to represent a comprehensive listing of all possible statewide RS 2477's. There may be other historical roads and trails in Alaska which qualify under the grant and which may eventually be identified and asserted by the state or another party.

On September 28, 1984, DNR, DOT/PF and the BLM entered into a Memorandum of Understanding (MOU) which specified how the federal land status plats would be noted to identify the approximate location of possible RS 2477 ROW's in the Northern Region of Alaska. The MOU outlined a process whereby BLM would plot each possible RS 2477 ROW on federal master title plats, if in accord with specific criteria included in the BLM Manual (2801.24.B.1, Rel. 2-152). However, on November 28, 1984, BLM issued an Instructional Memorandum (No. 85-72) which stated that BLM would note RS 2477 assertions on its official land records only if it

municipalities under AS 29.18 and to private individuals under various state land disposal and lease programs.

For purposes of state RS 2477 ROW decisions, DNR shall be responsible for those claims not part of the designated state or federal-aid highway system (including trails where state management is considered likely or where alternative third-party management has been arranged through mutual agreement) or claims proposed as additions to the system. All proposed RS 2477 ROW decisions by DNR shall be reviewed in advance by DOT/PF.

B. Department of Transportation and Public Facilities

DOT/PF has broad statutory responsibilities to plan, design, construct and maintain modes of transportation and transportation facilities pursuant to AS 19.05.010, 19.05.030, 19.010.010-040, 44.42.020, and 44.42.050. This includes the specific responsibility to protect and preserve the rights-of-way and land holdings for the state's existing transportation systems (includes federal-aid highways) and to plan for and acquire rights-of-way for future state transportation needs. In addition, DOT/PF is the designated state agency responsible for rep-

DRAFT

NOVEMBER 6, 1985 DRAFT

ALASKA DEPARTMENT OF NATURAL RESOURCES
ALASKA DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES

RS 2477 RIGHTS-OF-WAY POLICY AND PROCEDURES

I. Policy

The State of Alaska, acting through the Department of Natural Resources (DNR) and Department of Transportation and Public Facilities (DOT/PF), recognizes a need to develop and implement coordinated statewide procedures that better define and establish state goals and responsibilities pertaining to the identification and establishment of historical roads and trails in Alaska under federal Revised Statute (RS) 2477.

Therefore, it is the policy of the state, as implemented by the procedures contained herein, to help promote public access opportunities, provide guidance to public and private officials with land resource and transportation management and planning decisions, ensure adequate public and agency participation in the state decision making process, respect private property rights and help resolve uncertainty over possible valid existing RS 2477 rights-of-way (ROW's) on public and private lands.

II. Background

Revised Statute 2477 (43 U.S.C. 932) was a federal law in effect from 1866 to October 21, 1976. It provided that,

> "The right-of-way for the construction of highways over public lands, not reserved for public uses, is hereby granted."

The Alaska Supreme Court held in Hamerly v. Denton, 359 P. 2d 121, 123 (1961) that before a RS 2477 ROW can be accepted as valid, there must be: a) proof that the route was located on unreserved public land; and b) either a positive act on the part of the appropriate public authorities (of the state or territory) clearly manifesting an intention to accept the grant, or public use for such period of time and under such conditions as to prove that the grant was accepted.

In Girves v. Kenai Peninsula Borough, 536 P. 2d 1221 (1975) the Alaska Supreme Court held that enactment of AS 19.10.010 by the territorial legislature was a positive act manifesting the legislature's intent to accept the federal grant of right-of-way for the construction and use of highways over unreserved public lands on section lines.

In April of 1974, the Alaska Department of Highways submitted the 1974 Existing Trail System Inventory to the Bureau of Land Management (BLM). This submission was a further documentation by the state of its intent to accept the grant for approximately 1400 possible RS 2477 ROW's statewide. However, this inventory was not intended to represent a comprehensive listing of all possible statewide RS 2477's. There may be other historical roads and trails in Alaska which qualify under the grant and which may eventually be identified and asserted by the state or another party.

On September 28, 1984, DNR, DOT/PF and the BLM entered into a Memorandum of Understanding (MOU) which specified how the federal land status plats would be noted to identify the approximate location of possible RS 2477 ROW's in the Northern Region of Alaska. The MOU outlined a process whereby BLM would plot each possible RS 2477 ROW on federal master title plats, if in accord with specific criteria included in the BLM Manual (2801.24.B.1, Rel. 2-152). However, on November 28, 1984, BLM issued an Instructional Memorandum (No. 85-72) which stated that BLM would note RS 2477 assertions on its official land records only if it

adminstered the affected land. This decision significantly altered the original intent of the parties with respect to this MOU.

III. Responsibilities

DNR and DOT/PF each have specific statewide public access responsibilities, which include RS 2477 ROW's. However, DNR and DOT/PF recognize a need to more precisely articulate respective responsiblities for RS 2477 ROW identification, recognition and management.

A. Department of Natural Resources

DNR has broad public access responsibilities for state land and water pursuant to AS 38.04.050, 38.04.055, 38.05.035, 38.05.850 and 38.35.020. In addition, DNR is the designated state agency responsible for recommending public easement reservations to BLM in land conveyances to Native corporations, pursuant to Section 17(b) of ANCSA. DNR is also responsible for the reservation of public access easements on state land conveyed to boroughs and

municipalities under AS 29.18 and to private individuals under various state land disposal and lease programs.

For purposes of state RS 2477 ROW decisions, DNR shall be responsible for those claims not part of the designated state or federal-aid highway system (including trails where state management is considered likely or where alternative third-party management has been arranged through mutual agreement) or claims proposed as additions to the system. All proposed RS 2477 ROW decisions by DNR shall be reviewed in advance by DOT/PF.

B. Department of Transportation and Public Facilities

DOT/PF has broad statutory responsibilities to plan, design, construct and maintain modes of transportation and transportation facilities pursuant to AS 19.05.010, 19.05.030, 19.010.010-040, 44.42.020, and 44.42.050. This includes the specific responsibility to protect and preserve the rights-of-way and land holdings for the state's existing transportation systems (includes federal-aid highways) and to plan for and acquire rights-of-way for future state transportation needs. In addition, DOT/PF is the designated state agency responsible for rep-

resenting state interests under the transportation and utility system application and approval process in Title XI of the Alaska National Interest Lands Conservation Act (ANILCA).

For purposes of state RS 2477 ROW decisions, DOT/PF shall be responsible for all existing and proposed state or federal-aid highway system ROW's and claims associated with future state transportation system needs, including realignment of existing state facilities. All proposed RS 2477 ROW decisions by DOT/PF shall be reviewed in advance by DNR.

C. Regional Offices

DNR and DOT/PF each maintain departmental regional offices located in Anchorage, Fairbanks and Juneau. Although the geographical responsiblities of these offices are not identical, they generally correspond to the Central/Southcentral, Northern and Southeast portions of the state.

For purposes of state RS 2477 ROW decisions, it is agreed by DNR and DOT/PF that their respective regional offices shall be responsible for receiving RS 2477 ROW claims and processing such claims in accord with the process specified in Section IV.

An RS 2477 ROW claim may be accepted by any DNR or DOT/PF regional office, which in accord with this section, will be responsible for processing a claim or forwarding such claim to the regional office having jurisdictional responsibility for the geographic area encompassing the potential RS 2477 ROW. If a claim should cross regional office jurisdictional boundaries, the regional office responsible for the area traversed by the majority of the route shall assume the lead role for purposes of subsequent state decisions.

Representatives from each DNR and DOT/PF regional office agree to meet as necessary with their counterparts to review all new RS 2477 ROW claims and clarify responsiblities for further processing in accord with this section and Section IV (below).

IV. Procedures

The State of Alaska, acting through DNR or DOT/PF, will use the following procedures to guide future state assertion, disclaimer of interest or vacation decisions relative to possible RS 2477

ROW's. The state may also decide to delay or postpone a final decision if it is determined that insufficient information or evidence exists to fully document what otherwise appears to be a valid claim. The procedure involves preliminary review, written state best interest finding, public notice, comment, and final decision. Nothing in this policy statement shall affect the right of private citizens or other parties from independently asserting ROW's under RS 2477. A decision by the state to undertake an RS 2477 claim review is contingent upon the availability of sufficient funds and resources.

The RS 2477 ROW assertion process is generally depicted on the flow chart attached as Figure 1 (page 9).

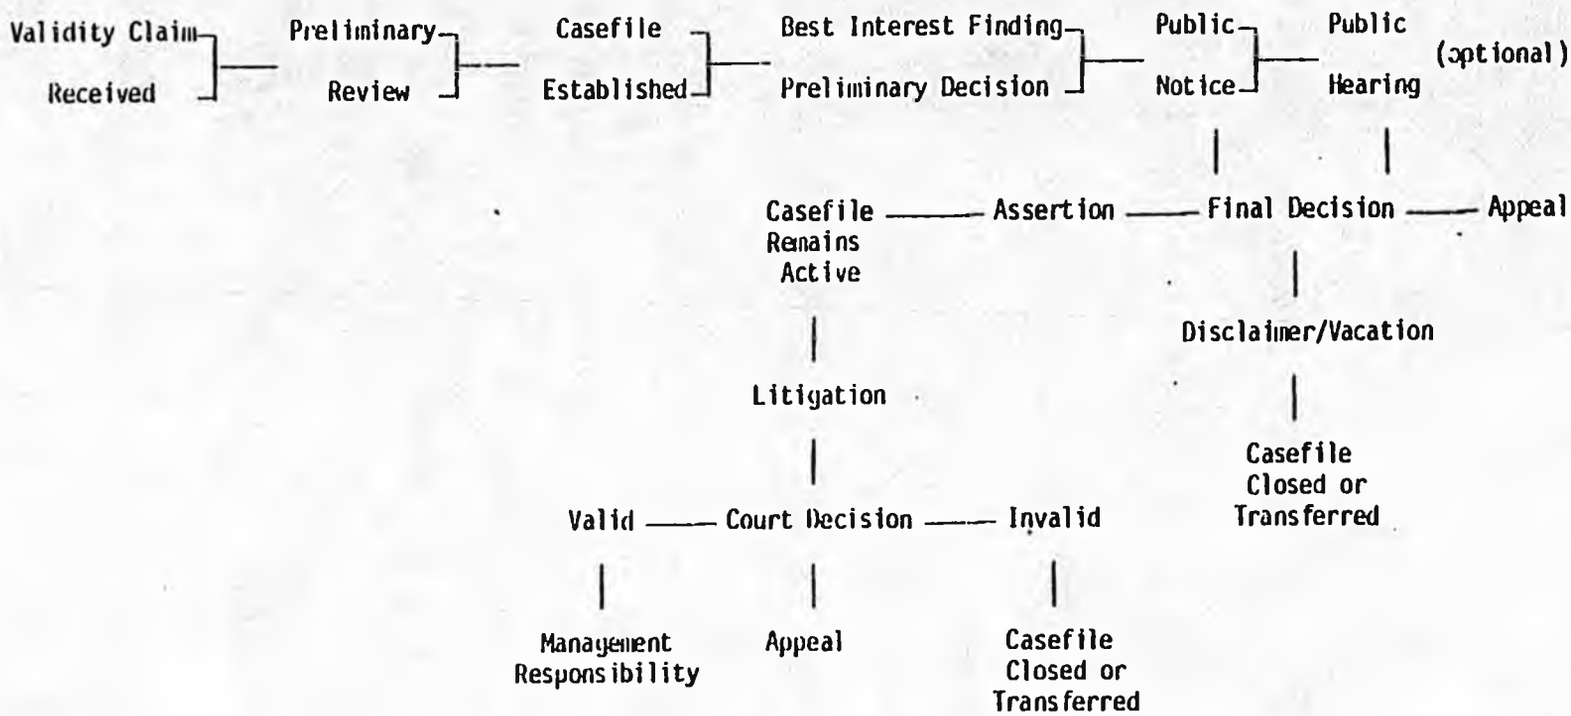
A. Preliminary Review

DNR and DOT/PF agree to comprehensively review and categorize the 1974 Existing Trail System Inventory and other available information regarding possible RS 2477 ROW's. The following steps will be used to perform this work:

FLOW CHART

STATE RS 2477 ROW ASSERTION PROCESS

(conducted by regional offices of DNR or DOT/PF)



1. Categorize all possible RS 2477 ROW's as "active" or "inactive" on the basis of historic purpose, evidence of prior public use, identification as section line easement, availability of documentation, land title conflicts, etc.

2. Assign responsibility to DNR or DOT/PF for potential RS 2477 ROW's included on the "active" list, in accord with Section III of this document.

3. Prioritize the "active" list for purposes of formal state assertion decisions, based upon documentation, public benefits and potential cost savings to the state.

A draft report will be issued and circulated by DNR and DOT/PF for public and agency review and comment. The report will then be finalized, and serve as the guide for subsequent DNR or DOT/PF actions pertaining to possible RS 2477 ROW's. DNR and DOT/PF agree to update this document as necessary, assuming the availability of sufficient funding and resources.

B. Assertions

The State of Alaska, acting through DNR or DOT/PF, may decide to formally assert the existence of RS 2477 ROW claims, using the results of the preliminary review process In Section IV.A. (above) as a guide. At least one of the following conditions must be present for the state to initiate a formal assertion review:

1. An RS 2477 ROW claim involves a portion of the designated state or federal-aid highway or trail system.

2. An RS 2477 ROW claim involves a portion of a right-of-way needed for future state transportation and access purposes, as identified in DNR's and DOT/PF's planning processes.

3. An RS 2477 ROW claim involves public access rights being curtailed or blocked by other parties.

4. A formal request has been made to pursue an RS 2477 assertion, or to vacate or disclaim an interest in a particular RS 2477 ROW claim.

5. An RS 2477 assertion is needed to preserve documentation of use and existence that might otherwise be lost.

6. An RS 2477 assertion enhances the state's legal position regarding RS 2477 ROW's.

Following a determination that one or more of the above conditions are present, and in accord with the responsibilities established in Section III (above), the DNR or DOT/PF regional office shall immediately establish a casefile for the claim. This casefile shall subsequently become the administrative record used by the state as the basis for any future decisions. The regional office, working in concert with the DNR and/or DOT/PF central offices, shall then proceed to gather all available information concerning the route and prepare a written best interest finding and preliminary decision which shall address the below referenced criteria.

1. Identification of the land involved and the periods of time when it was "unreserved public land". In addition, identification of any positive acts on the part of the appropriate public authorities clearly manifesting an intention to accept the grant, or evidence of public use for such time and conditions to prove that the grant was accepted.

2. Identification of any reasonable, practical and legal alternative access which may be available to serve the intended purpose of the RS 2477 ROW (i.e., Omnibus Act Roads, ANCSA Section 17(b) easements).

3. Suitability of the route (i.e., grade, location) for the existing or proposed road, trail or other highway use.

4. Whether an RS 2477 ROW assertion is necessary to establish or confirm state ownership of an existing or proposed state maintained highway or trail (including realignment or extension).

5. Identification of the public benefits of the potential RS 2477 ROW, including but not limited to preservation of transportation system options, enhanced public use access for economic or recreational purposes, cost savings through avoidance of condemnation, negotiated purchase, land exchange or other more costly acquisition method.

6. If the route will adversely affect the land management practices of the underlying and/or adjacent landowner, and

if so, what mitigating measures could be implemented to alleviate or eliminate any adverse impacts.

7. Identification of sufficient evidence to support a finding the the route qualifies as a valid RS 2477 ROW, such as the manner, type and frequency of public use, existence of the public records pertaining to the ROW, on-the-ground verification of the existence of the ROW and historical documentation (i.e., maps, newspaper/periodical references, Alaska Road Commission reports, treatises, etc.).

The best interest finding and preliminary decision shall then be referenced in a public notice to be issued by the regional office, consistent with the requirements of AS 38.05.945. This process entails distribution in newspapers of statewide circulation and notification of any parties known or likely to be affected by the action (including municipalities and ANCSA corporations). DNR and DOT/PF shall also compile and maintain a mailing list of interested parties which will receive notice of all RS 2477 ROW actions. The regional office also shall have the discretion to hold a public hearing on an action, if determined necessary. A written comment period of at least 30 days shall be

included in the process. Following completion of the public notice and written comment period, the regional office shall issue a final decision which may be subject to appeal. Affected parties including landowner(s) will be notified of the decision.

Once it is determined that an assertion is in the state's best interest, the route shall be identified as an RS 2477 ROW on state title plats. It is the position of the state that federal agencies should also note applicable federal title plats.

The final decision is an official state position regarding the validity of the RS 2477 ROW claim and constitutes a determination by the state that there is both sufficient evidence in the casefile to support an affirmative action on the claim by a court, and that the assertion is in the best interest of the state.

Unless otherwise included in the final decision, an assertion decision by the state does not constitute formal acceptance of management responsibility by the state or assumption of liability for the ROW over non-state land. The state contends that management responsibility over a potential RS 2477 ROW can only accrue

to the state following a validity determination by the court or if the state voluntarily accepts management authority and gives notice prior to such action. Specific state management responsibilities over valid RS 2477 ROW's are articulated in Section V.

C. Vacation/Disclaimer

In addition to a decision to assert an RS 2477 ROW, the assertion review process can result in a decision by the state to vacate or disclaim an interest in the ROW.

A decision to disclaim an interest/vacate an RS 2477 ROW claim is similiarly a determination that the claim will not be supported by the state. This decision does not preclude the right of the state or the public to again assert the claim at a later date. However, an effort to reassert a previously disclaimed/vacated RS 2477 ROW claim must be based upon significant new evidence or information which might be anticipated to influence and alter the original decision.

A vacation is appropriate where the route has already been determined by the court to be a valid RS 2477 ROW. In the case of

either a vacation or disclaimer of interest, the state casefile will be closed or remain inactive, depending upon circumstances. The state may provide another party with a copy of the casefile if such party decides to independently pursue the claim.

D. Validation

Once a decision is made to formally assert that a given RS 2477 ROW is valid, DNR or DOT/PF may also take steps to validate this interest.

A decision by the state to assert ownership of an RS 2477 ROW is also a determination that the state will defend the assertion from adverse claims, if necessary, in court and may proceed to initiate quiet title action or seek declaratory judgement from the court. In some cases, agreements may also be reached with affected landowners to address unresolved questions (such as width of the ROW).

E. Public Requests

Individual citizens may also assert and seek validation of RS 2477 ROW's. Additionally, the public may petition the state to assert, disclaim, or vacate its interest in a particular ROW. Procedures will be established providing the public single points of contact at DNR regional offices for this purpose. DNR will be responsible for coordinating the state's response with DOT/PF. Filing and processing fees may be charged to assist delivery of a timely response. All requests of the state by the public will be processed in accordance with the procedures contained in this section.

V. Management

A. State

Under Alaska Statutes, DOT/PF has management authority for RS 2477 ROW's on non-state land if recognized and accepted by the state and held to be valid by the courts. Where such recognized, accepted and valid ROW's occur on state land, DOT/PF and the state agency having management authority over the state land, usually DNR, have concurrent management authority over the ROW.

In the case where another state agency (other than DNR or DOT/PF) has management authority over the ROW, efforts may be made by DNR and/or DOT/PF to assume management responsibility.

Consistent with the responsibilities outlined in Section III, DOT/PF agrees to accept management authority for all RS 2477 ROW's asserted by the state and held to be valid, which are part of the designated state or federal-aid highway system. For those portions of the RS 2477 ROW's on the designated state highway system that occur on state land, concurrent management authority with DNR will continue, with DOT/PF as the lead agency. For all other RS 2477 ROW interests that have been held to be valid, DOT/PF agrees to transfer management responsibility to DNR. If a valid RS 2477 ROW is subsequently made part of the state or federal-aid highway system, management responsibility will be transferred from DNR to DOT/PF, consistent with this section.

B. Local Government

In the case of a preliminary decision by DNR or DOT/PF to disclaim or vacate an RS 2477 ROW, local governmental entities can petition the responsible state agency (either DNR or DOT/PF) to reverse that decision, pursue validation (if appropriate), and transfer management responsibility to the local government entity if the following conditions are met:

1. The local governmental entity agrees to pay all of the state's costs to complete the assertion and validation process;

2. The local governmental entity agrees to hold the state harmless and accept all maintenance and legal liabilities associated with management of the RS 2477 ROW;

3. The local governmental entity furnishes reasonable proof of an ability to meet these management and legal responsibilities.

VI. General Provisions

A. Highway Definition

The reference in RS 2477 to "right-of-way for the construction of highways" did not mean the construction of something akin to a modern public street. In its proper historical context, the "highways" language was used generically to include any public way, such as a path, wagon road, pack trail, street, alley, and so forth. The United States Department of the Interior, Office of the Solicitor, concurs that state law controls what constitutes a highway within each state. DNR and DOT&PF accept this view and recognize AS 19.45.001(8) as the governing definition for the term "highway." AS 19.45.001 (8) defines "highway" to include a highway (whether included in primary or secondary systems), road, street, trail, walk, bridge, tunnel, drainage structure and other similar or related structure or facility, and right-of-way thereof.

B. Use

The state takes the position that once determined valid, an RS 2477 ROW may be used for any "highway" purpose as defined in Section VI.A. above. Such use may be limited, however, by the width of the ROW (see Section VI.C.) and be subject to specific management practices as applied by the state to the ROW.

C. Width

The width of an RS 2477 ROW depends on the way it was established. If established by statute or ordinance, or other formalized public agency dedication, then the language of such will control. For example, AS 19.10.010 was amended to specify 100 foot section line rights-of-way on land owned or acquired by the state. However, if the method for establishment of the RS 2477 ROW was by construction or use, width may be determined by the nature and extent of that construction or use, depending upon the date established.

Most RS 2477 ROW's fall into the public construction or use category. Accordingly, the width for each of these types of RS 2477 ROW's should be outlined by the state during the

assertion and validation process. The width is usually set as the distance from the farthest limit of backslope to the farthest limit of backslope on the opposite side. However, in the past, some courts have established the width for an RS 2477 ROW as that commonly established for highways designed for that particular mode of transportation (i.e., pedestrian trail, secondary road, etc.).

D. ANILCA Conservation System Units

Section 1109 of ANILCA specifically provides for the protection of valid existing rights. As valid existing rights may include RS 2477 ROW's, it is essential that these routes be identified and addressed through the federal Conservation System Unit (CSU) planning process.

In 1985, progress was made by the state to better coordinate RS 2477 efforts on a statewide basis with federal agencies, other affected landowners and the general public. State Senator Jack Coghill, his staff from the Senate Transportation Committee, and staff from the U.S. National Park Service, worked to ensure that possible RS 2477 roads and

trails will be noted and identified in the National Park Service General Management Plans. Similar efforts are also being taken, working with the U.S. Fish and Wildlife Service, to include similar material in future Fish and Wildlife Service Comprehensive Conservation Plans. The purpose of this effort is to heighten awareness on the part of land managing agencies, affected landowners and the public as to the existence of possible RS 2477 ROW's. This is not meant to imply that these roads and trails are necessarily available for public use prior to formal validation of the existence of the potential RS 2477 ROW's.

The following language was developed for inclusion in each federal CSU Plan:

> RS 2477 (formally codified as 43 U.S.C. 932; enacted in 1866) provides that: "The right of way for the construction of highways over public lands, not reserved for public uses, is hereby granted." The Act was repealed by P.L. 94-579 as of October 21, 1976, subject to valid existing claims.
>
> The (name of CSU unit) is subject to valid existing rights, including rights-of-way established under RS 2477. The validity of these rights-of-way will be determined on a case by case basis. The following list identifies rights-of-way that the state contends may be valid under RS 2477:
>
> (list of potential RS 2477 ROW's)

A map illustrating the above list is found on page __. This list and map are not necessarily all inclusive. Private parties or the State of Alaska may identify and seek recognition of additional RS 2477 rights-of-way within the (CSU unit). Supporting material regarding those rights-of-way identified by the state may be obtained through the Alaska Department of Transportation and Public Facilities, or the Alaska Department of Natural Resources.

Identification of potential rights-of-way on the list and map does not establish the validity of these RS 2477 rights -of-way and does not necessarily provide the public the right to travel over them.

DNR and DOT/PF will continue to provide pertinent RS 2477 ROW information to appropriate federal agencies during the CSU plan review process. This information will include a list and description of those potential RS 2477 ROW's (as determined by the state) within the CSU plan area and a map generally depicting their location.

Any attempt by the state to assert or validate an RS 2477 ROW in a CSU will occur in accord with the procedures outlined in Section IV.

E. Legal Considerations

The policies and procedures in this document do not apply to any ROW held under Public Land Orders (PLO), the Omnibus Act

Quit Claim Deed, ROW grants under Title 23 of the United States Code, or ROW interests other than those under RS 2477.

If necessary to respond to a challenge of the state's interest in a possible RS 2477 ROW that has not yet been processed under the procedures under Section IV of this document, DNR and DOT/PF reserve the right to suspend those procedures and assert that a particular RS 2477 ROW is valid.

A map illustrating the above list is found on page __. This list and map are not necessarily all inclusive. Private parties or the State of Alaska may identify and seek recognition of additional RS 2477 rights-of-way within the (CSU unit). Supporting material regarding those rights-of-way identified by the state may be obtained through the Alaska Department of Transportation and Public Facilities, or the Alaska Department of Natural Resources.

Identification of potential rights-of-way on the list and map does not establish the validity of these RS 2477 rights -of-way and does not necessarily provide the public the right to travel over them.

DNR and DOT/PF will continue to provide pertinent RS 2477 ROW information to appropriate federal agencies during the CSU plan review process. This information will include a list and description of those potential RS 2477 ROW's (as determined by the state) within the CSU plan area and a map generally depicting their location.

Any attempt by the state to assert or validate an RS 2477 ROW in a CSU will occur in accord with the procedures outlined in Section IV.

E. Legal Considerations

The policies and procedures in this document do not apply to any ROW held under Public Land Orders (PLO), the Omnibus Act

Quit Claim Deed, ROW grants under Title 23 of the United States Code, or ROW interests other than those under RS 2477.

If necessary to respond to a challenge of the state's interest in a possible RS 2477 ROW that has not yet been processed under the procedures under Section IV of this document, DNR and DOT/PF reserve the right to suspend those procedures and assert that a particular RS 2477 ROW is valid.

The aforementioned RS 2477 ROW policy and procedures become effective upon the signature of both parties and will remain in effect unless terminated by mutual agreement.

APPENDIX

State lays claim to some park lands

by Mary Scarpinato
Times Writer

The 10-year management plans for Alaska's national parks may be changed to include the state's claim to 87 historic roads and trails scattered across the parks, a U.S. Interior Department spokesman announced Thursday.

Current draft versions of the plans are now in the public comment stage and final versions are due before Congress on Dec. 2. Alaska's nine national parks cover nearly 50 million acres.

A task force to study issues related to these historic transportation corridors has been ordered by Assistant Interior Secretary Bill Horn, according to Ric Davidge, a special assistant to Horn.

That task force, which is to prepare its report within 30 days, will be composed of representatives of federal agencies here, the Alaska Federation of Natives and state Sen. Jack Coghill, R-Nenana, who chairs the senate Transportation Committee.

Coghill has been pushing for the inclusion of this transportation network in the park plans and addressed Thursday's breakfast meeting of the Resource Development Council for Alaska Inc., on the topic.

According to Coghill, many of these transporation rights-of-way were allowed to be established under federal legislation during Alaska's territorial years. They were established by miners and other developers when no other access ways existed.

Coghill said an inventory of some 1,700 historic roads and trails was compiled by the state in the early 1970s. The state considers 87 of these corridors as potentially useful in the future.

"It is not (the state's) intention to activate any of these trails (in the near future) but we need to assert them because we may need them for resource development (at some later time)," Coghill said. "But we may not need them tomorrow."

Coghill added that if the state lays its claim for use of these corridors across federal lands it also might be required to assume any related liabilities. This is a matter the state is investigating, he said.

The Anchorage Times 8/23/85

Alaska must pursue historic trails access

Guest Opinion

By SEN. JACK COGHILL

Alaska's surface transportation system, or lack of it, is one of the most unique things about our vast state.

Add to that the fact that current events are putting any future road/highway expansion in jeopardy.

To demonstrate one "uniqueness" in our Alaskan surface transportation, consider this: Alaska has more than 225 communities, towns, and cities. Only a few of those are connected by road or highway. But, just about every community is, or has been, connected with one another by trails.

In the other 49 states, it's difficult to find *any* city, town, village or hamlet that cannot be reached by road.

These early Alaska trails were historically used by dog teams, wagons, automobiles, and people who walked. Many are still in use. Many of these trails and early roads could be the location of roads or highways we will be forced to build in the future.

Presently, we are facing the possible loss of Alaska's historic trails. The issue is surfacing as federal agencies prepare management plans which will govern the use of park lands created by the Alaska National Interest Lands Conservation Act.

Alaska has 13 national parks, 16 national wildlife refuges, 25 wild and scenic rivers, four national forests and two conservation/recreation areas, that were created by ANILCA.

The responsibilty for managing these vast areas lies with the National Park Service, U.S. Fish and Wildlife Service and the Bureau of Land Management. While I am generally in agreement with the idea that the parks and refuges need to be managed, I am always cautious when people in Washington start making decisions th ect p in A a (w trai rese hts- y th out appropriate public input). This is one of the reasons that the Senate Transportation Committee decided to focus attention on how these plans will affect Alaska's historic trails, otherwise known as RS 2477 trails.

The historic trails have been pegged as "RS 2477s" because the statute that established their existence is known as Revised Statute 2477, which was passed by an Act of Congress on July 26, 1866. The act provided for rights-of-way for "highways" over unreserved public lands. In Alaska, this established a network of public rights-of-way that were used for trade routes, homesteading, mining access and general transportation.

Along the western coast of Alaska, the 500-mile trail used by Eskimos from Kotzebue to Point Hope is classified as a RS 2477 trail. Many of the old mail trails in the Interior are probably RS 2477s that were used by dog teams—the Iditarod trail is a classic example.

In 1974, Commissioner of Highways Bruce Campbell compiled an inventory of 1,700 known historic trails. The state of Alaska asserted claim to these trails in April 1974 when documentation of the trails was delivered to the Bureau of Land Management.

Today, we use these trails for hunting, fishing, inter-village travel and for access to homesites, mineral development, forestry and agriculture. It is important for the state and its people to maintain ownership rights to these trails not only for the present but, more importantly, for the future. These may be needed in the future by our children and our grandchildren.

This issue was the focus of Senate hearings sponsored by Sen. Bettye Fahrenkamp last spring. We found that more emphasis was needed in the eyes of the public and in the federal planning processes to recognize Alaska's existing rights-of-way. As a result, the Senate Transportation Committee formed a task force to ensure that the federal management plans adequately recognizes these historic trails. This task force has been working since July 1 to prepare maps and a list of approximately 100 trails that exist within the National Parks lands.

There are two important elements to the assertions that must be understood.

First, in no way does the list of trails prevent future assertions by the state or any citizen under the provisions of RS 2477.

Second, it is important to understand that when a RS 2477 right-of-way is asserted, it must go through a validation process before it may be utilized. We are in the process of formulating such a process.

The Senate Transportation Committee is "re-asserting" because no acknowledgement by the federal government has been made for the 1974 assertions of 1,700 trails and roads which had been identified and documented by the state of Alaska. Seems that the issue may have fallen through some crack somewhere on the Potomac.

We in Alaska have to identify and create the means for a workable planning process and a validation process. Our Transportation Committee will be re-asserting these 1,700 roads and trails the state has documented years ago. We will be asking for acknowledgement of those assertions.

We're in a serious time crunch. The land plans must be submitted to Congress soon with the first (the iatic arks Dec

In the future, when we wish to activate one of these "assertions," we will go through a process of "validation." I anticipate a long, detailed procedure before we can use the road or trail as a public right-of-way. Long as it may be, it's got to be done. The alternative is a complete land lockup where only an Act of Congress could recognize our traditional historic roads and trails.

When Assistant Secretary of the Interior Bill Horn was in Alaska in mid-August, he indicated that a task force within the Depar ment of Interior will be set up to issue a report on this issue within 30 days. The group will include representatives from affected landowners.

I personally have been meeting with various interested groups on this issue to hear individual concerns relating to management, liability, weight restrictions, seasonal use, etc. I feel that we must include all the various interests in order to come up with good public policy.

The bottom line of my effort as chairman of the Senate Transportation Committee is to insure that these historic roads and trails are not forgotten. Our citizens have the right to know that these trails exist and on the basis of knowledge, all of us—environmentalists, developers, Natives, homesteaders, hikers, hunters and fishermen—can work together to determine how to provide for the needs of our people and our state.

Jack Coghill is a Republican state senator from Nenana. He is chairman of the Senate Transportation Committee.

Finding ways to protect our historic system of trails

By Sen. Jack Coghill

ALASKA'S SURFACE transportation system, or lack of it, is one of the most unique things about our vast state.

Add to that the fact that current events are putting any future road/highway expansion in jeopardy.

To demonstrate one "uniqueness" in our Alaskan surface transportation, consider this: Alaska has more than 225 communities. Only a few of those are connected by road or highway. But, just about every community is, or has been, connected with one another by trails.

In the other 49 states, it's difficult to find any city, town, village or hamlet that can not reached by road.

These early Alaska trails historically were used by dog teams, wagons, automobiles, and people who walked. Many are still in use. Many of these trails and early roads could be the location of roads or highways we will be forced to build in the future.

Presently, we are facing the possible loss of Alaska's historic trails. The issue is surfacing as federal agencies prepare management plans which will govern the use of park lands created by the Alaska National Interests Lands Conservation Act (ANILCA).

Alaska has 13 national parks, 16 national wildlife refuges, 25 wild and scenic rivers, four national forests and two conservation/recreation areas, that were created by ANILCA.

THE RESPONSIBILITY for managing these vast areas lies with the National Park Service, U.S. Fish & Wildlife and the Bureau of Land Management. While I am generally in agreement with the idea that the parks and refuges need to be managed, I am always cautious when people in Washington start making decisions that affect people in Alaska (without appropriate public input). This is one of the reasons that the Senate Transportation Committee decided to focus attention on how these plans will affect Alaska's historic trails, otherwise know as R.S. 2477 trails.

The historic trails have been pegged as "R.S. 2477's" because the statute that established their existence is known as Revised Statute 2477, which was passed by an act of Congress on July 26, 1866. The act provided for rights-of-way for "highways" over unreserved public lands. In Alaska, this established a network of public rights-of-way that were used for trade routes, homesteading, mining access and general transportation.

Along the western coast of Alaska, the 500 mile trail used by Eskimos from Kotzebue to Point Hope is classified as a R.S. 2477 trail. Many of the old mail trails in the Interior are probably R.S. 2477's that were used by dog teams — the Iditarod trail is a classic example.

In 1974, the commissioner of highways, Bruce Campbell, compiled an inventory of 1,700 known historic trails. The state of Alaska asserted claim to these trails in April 1974 when documentation of the trails was delivered to the Bureau of Land Management.

TODAY, WE use these trails for hunting, fishing, inter-village travel and for access to homesites, mineral development, forestry and agriculture. It is important for the state and its people to maintain ownership rights to these trails not only for the present but, more importantly, for the future. These trails represent rights of way that may be needed in the future by our children and our grandchildren.

This issue was the focus of Senate hearings sponsored by Sen. Bettye Fahrenkamp last spring. We found that more emphasis was needed in the eyes of the public and in the federal planning processes to recognize Alaska's existing rights of way. As a result, the Senate Transportation Committee formed a task force to ensure that the federal management plans adequately recognizes these historic trails. This task force has been working since July 1 to prepare maps and a list of approximately 100 trails that exist within the national park lands.

There are two important elements to the assertions that must be understood.

First, in no way does the list of trails prevent future assertions by the state or any citizen under the provisions of R.S. 2477.

Second, it is important to understand that when a R.S. 2477 right of way is asserted, it must go through a validation process before it may be utilized. We are in the process of formulating such a process.

The Senate Transportation Committee is "re-asserting" because no acknowledgment by the federal government has been made for the 1974 assertions of 1,700 trails and roads which had been identified and documented by the state of Alaska. Seems that the issue may have fallen through some crack somewhere back on the Potomac.

We in Alaska have to identify and create the means for a workable planning process and a validation process. Our transportation committee will be re-asserting these 1,700 roads and trails the state has documented years ago. We will be asking for acknowledgment of those assertions.

We're in a serious time crunch. The land plan must be submitted to Congress soon with the first (the national parks) due Dec. 2.

In the future, when we wish to activate one of these "assertions," we will go through a process of "validation." I anticipate a long, detailed procedure before we can use the road or trail as a public right of way. Long as it may be, it's got to be done. The alternative is a complete land lockup where only an Act of Congress could recognize our traditional historic roads and trails.

WHEN ASSISTANT Secretary of the Interior Bill Horn was in Alaska in mid-August, he indicated that a task force within the Department of Interior will be set up to issue a report on this issue within 30 days. The group will include representatives from affected landowners.

I personally have been meeting with various interested groups on this issue to hear individual concerns relating to management, liability, weight restrictions, seasonal use, etc. I feel that we must include all the various interests in order to come up with good public policy.

The bottom line of my effort as Chairman of the Senate Transportation Committee is to insure that these historic roads and trails are not forgotten. Our citizens have the right to know that these trails exist and on the basis of knowledge, all of us . . . environmentalists, developers, natives, homesteaders, hikers, hunters and fishermen . . . can work together to determine how to provide for the needs of our people and our state.

Jack Coghill, a Republican from Nenana, is chairman of the Senate Transportation Committee.

Alaska's historic roads, trails should not be forgotten

By JACK COGHILL

Alaska's surface transportation system, or lack of it, is one of the most unique things about our vast state. Consider this: Alaska has more than 225 communities, towns, and cities. Only a few of those are connected by road or highway. But just about every community is, or has been, connected with one another by trails.

These early Alaska trails were historically used by dog teams, wagons, automobiles, and people who walked. Many are still in use. Many of these trails and early roads could be the location of roads or highways we will be forced to build in the future.

Currently, we are facing the possible loss of Alaska's historic trails. The issue is surfacing as federal agencies prepare management plans which will govern the use of park lands created by the Alaska National Interest Lands Conservation Act (ANILCA).

Alaska has 13 national parks, 16 national wildlife refuges, 25 wild and scenic rivers, four national forests and two conservation/recreation areas that were created with ANILCA.

The responsibility for managing these vast areas lies with the National Park Service, U.S. Fish & Wildlife and the Bureau of Land Management. While I generally agree that the parks and refuges need to be managed, I am always cautious when people in Washington start making decisions that affect people in Alaska (without appropriate public input). This is one of the reasons that the Senate Transportation Committee decided to focus attention on how these plans will affect Alaska's historic trails, otherwise known as R.S. 2477 trails, for Revised Statute 2477,

which was passed by Congress on July 26, 1866. The Act provided for rights of way for "highways" over unreserved public lands. In Alaska, this established a network of public rights of way that were used for trade routes, mining access and general transportation.

Along the western coast of Alaska, the 500-mile trail used by Eskimos from Kotzebue to Point Hope is classified as a R.S. 2477 trail. Many of the old mail trails in the Interior are probably R.S. 2477's that were used by dog teams — the Iditarod Trail is a classic example.

In 1974, Commissioner of Highways Bruce Campbell compiled an inventory of 1,700 known historic trails. The state of Alaska asserted claim to these trails that year when documentation was delivered to the Bureau of Land Management.

Today, we use these trails for hunting, fishing, inter-village travel and for access to homesites, mineral development, forestry and agriculture. It is important for the state and its people to maintain ownership rights to these trails not only for the present but, more importantly, for the future. These trails represent rights of way that may be needed in the future by our children and our grandchildren.

This issue was the focus of Senate hearings sponsored by Sen. Bettye Fahrenkamp last spring. We found that more emphasis was needed in the eyes of the public and in the federal planning processes to recognize Alaska's existing rights of way. As a result, the Senate Transportation Committee formed a task force to ensure that the federal management plans adequately recognizes these historic trails. This task force has been working since July 1 to prepare maps and a list of approximately 100 trails that exist within the national park lands.

In no way does the list of trails prevent future assertions by the state or any citizen under the provisions of R.S. 2477. And it is important to understand that when a R.S. 2477 right of way is asserted, it must go through a validation process before it may be utilized. We are in the process of formulating such a process.

The Senate Transportation Committee is "re-asserting" because no acknowledgement by the federal government has been made for the 1974 assertions of 1,700 trails and roads which had been identified and documented by the state of Alaska. Seems that the issue may have fallen through some crack somewhere back on the Potomac.

We in Alaska have to identify and create the means for a workable planning process and a validation process. Our Transportation Committee will be re-asserting these 1,700 roads and trails the state has documented years ago.

We're in a serious time crunch. The land plans must be submitted to Congress soon with the first (the national parks) due Dec. 2.

In the future, when we wish to activate one of these "assertions," we will go through a process of "validation." I anticipate a long, detailed procedure before we can use the road or trail as a public right of way. Long as it may be, it's got to be done. The alternative is a complete land lockup where only an Act of Congress could recognize our traditional historic roads and trails.

When Assistant Secretary of the Interior Bill Horn was in Alaska in mid-August, he indicated that a task force within the Department of the Interior will be set up to issue a report on this issue within 30 days. The group will include representatives from affected landowners.

I personally have been meeting with various interested groups on this issue to hear individual concerns relating to management, liability, weight restrictions, seasonal use, etc. I feel that we must include all the various interests in order to come up with good public policy.

The bottom line of my effort as Chairman of the Senate Transportation Committee is to ensure that these historic roads and trails are not forgotten. Our citizens have the right to know that these trails exist and on the basis of knowledge, all of us — environmentalists, developers, Natives, homesteaders, hikers, hunters and fishermen — can work together to determine how to provide for the needs of our people and our state.

A Forecast and Review

Nov. 25 1985

Senate Transportation - Preserving Access Corridors

A special interim legislative work project will preserve the options to establish public access corridors across federally-managed national parks and wildlife refuges in Alaska.

Alaska trails and mining roads, many still being used, are being catalogued and included on federal National Park Service and Fish and Wildlife Service land management plans through the efforts of the Senate Transportation Committee. The committee took on the job of updating a 1974 Alaska trails inventory put together by former Highway Commissioner Bruce Campbell, and then working with the Interior Department to get trail rights-of-way noted in management plans now being prepared for parks and refuges in Alaska.

Campbell, in 1974, had located about 1700 historic trails and roads in his inventory. Not all of these will be submitted to Interior, but many rights-of-way still actively used can be preserved.

Committee staff were able to get maps and backup data to Interior in time to include the trail identification in nine of 13 National Park Service plans being finalized this year. These alone include 149 access routes. By end of this year, maps and data for trails to be included in 12 wildlife refuge plans scheduled to be done in 1986-7 will be submitted by the committee. The four park plans that were missed were completed in 1984, before the committee started its work. To retain some legal leverage in asserting rights-of-way in these areas, the committee will consider publishing the maps.

Most of the national park areas have just a handful of trails. One of them - Noatak - has none, while Wrangell-St. Elias, an area that was extensively used for mining, has over a hundred, including many still being used.

Including the trails in federal plans and maps doesn't establish a right-of-way but it does preserve the option for the state tc assert a historic public use of a trail or road at some future time. If the old trails hadn't been included in federal management plans, Alaskans would have had to go to congress for legislation to get an access corridor across a park or refuge. Nana Regional Corporation had to do this recently for road access across Cape Krustenstern National Monument to the Red Dog mine location.

"Cleanup" Needed on Air Carrier Bill

Technical amendments to HB-133 passed last year (financial responsibility for truckers and air carriers) are needed to clean up problems, air carriers told the Senate Transporcation Committee in November. Carriers' association spokesman suggested more 'teeth' in penalty provisions by increasing fines and upgrading violations to Class A misdemeanor for failure of air operators to carry insurance. Also, there are no penalties in the law for failure to actually get a state certifi- [illegible] for all practical pur- priation and Department of Commerce has been administering it with existing staff on a 'time available' basis.

VIEWPOINT

RS-2477's IN ALASKA

Article - by Senator Jack Coghill

Alaska's surface transportation system is one of the unique characteristics of our State. Consider this: Alaska has more than 225 communities, towns, and cities. Only a few of those are connected by road or highway. But just about every community is, or has been, connected to one another by trails, many of which are possible RS 2477 rights-of-ways.

Revised Statute 2477 was an Act passed by Congress in 1866 which provided for rights-of-way for "highways" over unreserved public lands. Under Alaska statutes, the definition of a highway is very broad and includes roads, streets, trails and walks.

Alaska's historic trails were used by dog teams, wagons, motorized vehicles and people who walked. Many of these trails are still in use; some could be critical links to tie our people together in the future.

The RS 2477 issue has received more attention in recent months as Federal agencies prepare management plans which will govern the use of parks and refuge lands created by the Alaska National Interest Lands Conservation Act (ANILCA).

ANILCA conveyed millions of acres of Alaska's land into 13 national parks, 16 national wildlife refuges, 25 wild and scenic rivers, 4 national forests and 2 conservation/recreation areas. The responsibility for managing these vast areas lies with the National Park Service, U.S. Fish & Wildlife and the Bureau of Land Management.

This management responsibility, through the general management plans, must not exclude the rights of the people of Alaska to continue to use our historic trails. This is one of the reasons that the Senate Transportation Committee decided to call attention to how the general management plans will affect Alaska's historic trails. The Senate Resources Committee also held hearings on this issue last spring because they, too, saw a need for more public input in the Federal planning processes.

As a result, the Senate Transportation Committee formed a task force to ensure that the Federal management plans adequately recognize these historic trails. Working with the Alaska Departments of Natural Resources and Transportation/Public Facilities, the task force prepared maps and a list of possible RS 2477 rights-of-way that the State wants included in these Federal plans.

Trail information was derived from the 1974 Alaska Trails System Inventory, an atlas developed by then-Commissioner of Highways Bruce Campbell to catalog the State's 1,400 known trails. The inventory was sent to the Bureau of Land Management in 1974, before that agency had any authorization to deal with RS 2477's. However, the inventory was shelved by BLM and no formal response was made to acknowledge the State's ownership of these trails.

Only now has an inter-agency effort begun to respond to the rising interest in RS 2477. The Department of Interior has formed an RS 2477 Task Force, under the leadership of Ric Davidge, of the U.S. Fish and Wildlife Service. The members include representatives of the Fish and Wildlife Service, National Park Service, Bureau of Land Management, U.S. Forest Service, Bureau of Indian Affairs, Alaska Federation of Natives, Alaska Native Land Managers Association, Alaska Department of Natural Resources, Alaska Department of Transportation/Public Facilities, and the Office of Management and Budget - CSU Coordinator.

The State of Alaska has recently taken a positive posture by publishing for public comment draft policies and procedures governing RS 2477 trails. This well-written and well researched document spells out the State's intent to deal with all the issues surrounding these trails in a fair manner. It includes the criteria used to determine a RS 2477, as well as issues relating to liability, maintenance and use. Copies can be obtained from the Department of Natural Resources or the Department of Transportation/Public Facilities.

This entire issue is vitally important because if the State had let these valid existing rights become forgotten, only the giant corporations or large government entities could afford to get the attention of the Federal government to responsed to their access needs.

The road to Red Dog is a classic example. It was only through a combination of NANA Corporation and Cominco with the backing of the Governor and the support of the Congressional delegation that a right-of-way was granted by Congress. I don't believe that an individual or small corporation should have to mount an expensive lobbying campaign to secure a right-of-way, especially if there are already valid rights-of-way in existence.

It is essential that the State and its people maintain their ownership rights to these trails. What's at stake is access for homesites, fishing, recreation, mineral development, forestry, agriculture and travel between villages, not only for the present but for many generations in the future.

RE: Bills in committee

DATE: January 13, 1986

HB 100--" An act relating to detention of vessels as security for oil-pollution damages; clarifying a definition relating to discharge of hazardous substances; and providing for an effective date."

Sponsor--House Rules by request of the Governor

A housekeeping measure which makes the bond posting provision in the statute on detention of vessels involved in oil spills consistent with the 1976 amendment of the statute providing for damages for oil pollution. Detention statute presently limits bond to $100,000. The 1976 amendment eliminates any reference to a maximum amount of damages; it only states that damages must not be punitive and must be remedial and compensatory in nature.

Section 2 clarifies the definition of "owner" with regard to strict liability for oil spills and other hazardous substances.

The bill is intended to correct two statutory oversights brought to light as a result of the oil spill from the M/V Cepheus in 1984.

CSHB111--"An Act relating to local service roads and trails; and providing for an effective date."

Sponsor--House Transportation

This is a housekeeping measure and has no fiscal impact on either the operating or capital budget. It revises AS 19.30 in a number of areas: 1) Allocation boundaries are reworded to coincide with DOT/PF regional boundaries to simplify the LSR&T allocation process.

2) First class cities are removed from district allocation. This returns first class cities to their former status which allows them to receive adequate funds to construct a project.

3) LSR&T projects constructed on a federal aid secondary route will require approval by the Commissioner of DOT/PF to assure that federal requirements are met.

4) LSR&T projects will be limited to low volume roads. This is a correction of an oversight of past legislation in defining specific routes of the federal aid highway system.

SB 14--"An Act making a special appropriation to the Department of Transportation and Public Facilities for highway construction and repairs in Southcentral Alaska; and providing for an effective date."
"

Sponsors--Senators Kerttula, Kelly and Faiks

Requests an appropriation of $200,000,000 from the general fund for capital projects.

SSSB 15--"An Act making a special appropriation for construction of a highway from Eklutna to the junction of the Parks Highway and the Glenn Highway; and providing for an effective date."

Sponsors--Senators Kerttula, Kelly and Faiks

Requests a $65,000,000 appropriation from the general fund to DOT/PF for construction of a four land highway from Eklutna to the junction of the Parks and Glenn Highways.

SB 141--"An Act releasing claims of the state to land within certain rights-of-way; and providing for an effective date."

Sponsor--Senator Coghill

This releases certain highway rights-of-way claimed by the state that are causing economic hardship and distress to persons who hold title under a reservation to the state by a number of federal land orders.

If the right-of-way is not physically occupied by a road, roadway, highway, tramway, trail, bridge or appurtenant structure, the commissioner of DOT/PF shall vacate and relinquish the right-of-way. This does not divest the state of any interest in a currently occupied right-of-way.

SB 175--"An Act making a special appropriation to DOT/PF for design and construction of the DeArmoun-Rabbit Creek interchange; and providing for an effective date."

Sponsor--Senator DeVries

Requests the sum of $18,500,000 be appropriated to DOT/PF. $925,000 from the general fund and $17,575,000 from federal receipts.

SB 308--"An Act providing for the issuance of general obligation bonds in the amount of $350,000,000 for the purpose of paying the cost of transportation projects; calling for a special election on the question, and providing for an effective date."

Sponsors--Senators Rodey and Ferguson

Establishes a "Transportation Projects Fund" which would be credited with the proceeds of a bond sale. The amount of $350,000,000 would be used for a multitude of state-wide transportation projects.

SB 315--" An Act making special appropriations to the principal of the permanent fund, to the dividend fund, and for various capital projects of the state; and providing for an effective date.

Sponsor--Senator Ferguson

Appropriates $400 million from the undistributed income account to the principal of the Alaska permanent fund. Appropriates $400 million from the general fund to the principal of the Alaska permanent fund. The source of these funds shall only come from litigation or settlement receipts. Appropriates $105 million from the undistributed account to the dividend fund. Approximately $348 million is appropriated from the undistributed income account to various state agencies for state-wide projects.

SB 318--" An Act making a special appropriation to the principal of the permanent fund, and for various capital projects of the state; and providing for an effective date."

Sponsors--Senators Ferguson and Josephson

Very similar to SB 315. Does not appropriate $105 million from the undistributed account to the dividend fund. Approximately $348 million is appropriated from the undistributed income account to various state agencies for capital projects.

HOUSE BILL NO. 100

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to detention of vessels as security for oil-pollution damages; clarifying a definition relating to discharge of hazardous substances; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 46.03.770 is amended to read:

Sec. 46.03.770. DETENTION OF VESSEL WITHOUT WARRANT AS SECURITY FOR DAMAGES. A vessel which is used in or in aid of a violation of AS 46.03.740 -- 46.03.750 may be detained after a valid search by the department, an agent of the department, a peace officer of the state, or an authorized protection officer of the Department of Fish and Game. Upon judgment of the court having jurisdiction that the vessel was used in or the cause of a violation of AS 46.03.740 -- 46.03.750 with knowledge of its owner or under circumstances indicating that the owner should reasonably have had this knowledge, the vessel may be held as security for payment to the state of the amount of damages assessed by the court under AS 46.03.760(b), and if the damages so assessed are not paid within 30 days after judgment or final determination of an appeal, the vessel shall be sold at public auction, or as otherwise directed by the court, and the damages paid from the proceeds. The balance, if any, shall be paid by the court to the owner of the vessel. The court shall permit the release of the vessel upon posting of a bond set by the court in an amount not to exceed the maximum amount of damages available under AS 46.03.758, 46.03.760, and

HB 100

46.03.822 [$100,000]. The damages received under this section shall be transmitted to the proper state officer for deposit in the general fund. A vessel seized under this section shall be returned or the bond exonerated if no damages are assessed under AS 46.03.758, 46.03.760, or 46.03.822 [46.03.760(b)].

* Sec. 2. AS 46.03.826(5) is amended to read:

(5) "[OWNING OR] having control over a hazardous substance" means producing, handling, storing, transporting or refining a hazardous substance for commercial purposes immediately before entry of the hazardous substance in or upon the waters, surface or subsurface lands of the state, and specifically includes bailees and carriers of a hazardous substance;

* Sec. 3. This Act takes effect immediately in accordance with AS 01.10.070(c).

CS FOR HOUSE BILL NO. 111 (Transportation) am

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to local service roads and trails; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 19.30.131(a) is amended to read:

(a) During each fiscal year the commissioner shall allocate sums appropriated or otherwise designated for expenditure upon local service roads for that fiscal year among the five allocation districts in the following manner: one-half in the ratio which the area of each allocation district bears to the total area of the state and one-half in the ratio which the population of each allocation district bears to the total population of the state as shown by the latest available federal or state census or other census approved by the Department of Community and Regional Affairs.

* Sec. 2. AS 19.30.131(b) is amended to read:

(b) The commissioner shall also further allocate the sums in each allocation district to the boroughs within each allocation district in the following manner: one-half in the ratio which the area of each organized borough (excluding salt water areas) within that district bears to the total area of the allocation district and one-half in the ratio which the population of each organized borough area within that district bears to the total population of the allocation district as shown by the latest available federal or state census or other census approved by the Department of Community and Regional Affairs.

CSHB 111

* Sec. 3. AS 19.30.131(c) is amended to read:

(c) The commissioner shall also further allocate portions of the sum allocated to any borough, either organized or unorganized, and to any home rule [OR FIRST CLASS] city within the borough in the following manner:

(1) one-half in the ratio which the area of each home rule [OR FIRST CLASS] city bears to the total area of the borough excluding salt water areas; and

(2) one-half in the ratio which the population of each home rule [OR FIRST CLASS] city bears to the total population of the borough as shown by the latest available federal or state census or other census approved by the Department of Community and Regional Affairs.

* Sec. 4. AS 19.30.141 is amended to read:

Sec. 19.30.141. ACQUISITION AND CONSTRUCTION PROGRAMS. Before October 1 of each fiscal year each local government eligible for allocation of funds under AS 19.30.131 shall submit to the commissioner for approval a five-year plan for the acquisition and construction of local service roads and trails. Before December 1 of each fiscal year the commissioner shall submit to the governor a five-year plan for the acquisition and construction of local service roads and trails, including the approved local government programs. An organized borough shall include in its five-year plan local servi road acquisition and construction programs for all cities other t' ome rule [AND FIRST CLASS] cities within the boundaries of the ugh. The commissioner shall include in the [HIS] five-year plan local service road and trail acquisition and construction with the unorganized borough.

* Sec. 5. AS 19.30.161 is amended to read:

Sec. 19.30.161. DESIGN STANDARDS, RIGHTS-OF-WAY AND WIDTHS. Design standards, rights-of-way and widths for each local service road and trail project must [SHALL] have the prior approval of the commissioner, unless the project is under the supervision of a local government that has assumed local road powers. If the project is under the supervision of a local government that has assumed road powers, and the project is not located on a federal-aid secondary route, design standards, rights-of-way and widths shall be established by the local government. If a project under the supervision of a local government that has assumed road powers is located on a federal-aid secondary route, design standards, rights-of-way, and widths must have the prior approval of the commissioner.

* Sec. 6. AS 19.30.241(3) is amended to read:

(3) "local government" means an organized borough of any class, a unified municipality organized under AS 29.68.240 - 29.68.-440, [A HOME RULE CITY,] or a city of any [THE FIRST] class;

* Sec. 7. AS 19.30.241(4) is amended to read:

(4) "local service road" means a public road that is used by an average of fewer than 750 vehicles each day and that [WHICH] is not designated as a route on the approved primary, urban, or interstate federal-aid highway system;

* Sec. 8. This Act takes effect immediately in accordance with AS 01.-10.070(c).

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. LEGISLATIVE PURPOSE AND FINDING. The purpose of this Act is to release certain highway rights-of-way claimed by the state that are causing economic hardship and physical and mental distress to persons who hold title to land under a reservation to the state by virtue of 33 Stat. 616 (Act of January 27, 1905); 47 Stat. 446 (Act of June 30, 1932); 48 U.S.C. secs. 321(a) - 327 (Act of July 24, 1947); Public Land Order 601, 14 Fed. Reg. 5048 (1949); Public Land Order 757, 16 Fed. Reg. 10, 749 (1951); Public Land Order 1613, 23 Fed. Reg. 2376, 2378 (1958); or Departmental Order 2665, 16 Fed. Reg. 10, 752 (1951).

* Sec. 2. RELINQUISHMENT OF RIGHT-OF-WAY. The commissioner of transportation and public facilities shall vacate and relinquish to the adjoining property owners any and all rights-of-way for a road, roadway, highway, tramway, trail, bridge, or appurtenant structure created, withdrawn or reserved under 33 Stat. 616 (Act of January 27, 1905); 47 Stat. 446 (Act of June 30, 1932); 48 U.S.C. secs. 321(a) - 327 (Act of July 24, 1947); Public Land Order 601, 14 Fed. Reg. 5048 (1949); Public Land Order 757, 16 Fed. Reg. 10, 749 (1951); Public Land Order 1613, 23 Fed. Reg. 2376, 2378 (1958); or Departmental Order 2665, 16 Fed. Reg. 10, 752 (1951) if the right-of-way on the effective date of this Act is not physically occupied by a road, roadway, highway, tramway, trail, bridge, or appurtenant

SB 141

structure.

* Sec. 3. TAKING OF RIGHT-OF-WAY WITHOUT JUST COMPENSATION VOID. The vacated and relinquished right-of-way under sec. 2 of this Act may not be taken, claimed, asserted, or used by the state without the payment of just compensation.

* Sec. 4. PHYSICAL OCCUPATION OF RIGHT-OF-WAY. (a) The provisions of this Act do not divest the state of its interest in a right-of-way to land or require compensation by the state for land physically occupied on the effective date of this Act by a road, roadway, highway, tramway, trail, bridge, or appurtenant structure then constructed within the right-of-way created, withdrawn, or reserved under the Acts of Congress and the orders described in sec. 2 of this Act; nor do the provisions of this Act divest the state of an interest in an easement of specific width set out in the original patent from the state or federal government.

(b) Expansion beyond an existing road, roadway, highway, tramway, trail, bridge, or appurtenant structure requires the payment of just compensation to the owner of the land and no other acts or actions by the state constitute a physical occupation within the meaning of this section. The state has the burden of proof to show by clear and convincing evidence that the physical occupation occurred before the effective date of this Act.

* Sec. 5. APPLICATION TO FEDERAL LAND. The provisions of this Act do not divest the state of its interest in a right-of-way that affects land in which fee title is, on the effective date of this Act, vested in the United States of America.

* Sec. 6. DEFINITION. As used in this Act, "physically occupied" means the construction of the actual roadway, including its shoulders and ditching, highway, tramway, trail, bridge, or appurtenant structures, before the effective date of this Act.

* Sec. 7. RETROACTIVE APPLICATION. This Act does not relieve, alter, or void a voluntary conveyance of an easement including an easement dedicated by plat.

* Sec. 8. EFFECTIVE DATE. This Act takes effect immediately in accordance with AS 01.10.070(c).

SENATE BILL NO. 308

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act providing for the issuance of general obligation bonds in the amount of $350,000,000 for the purpose of paying the cost of transportation projects; calling for a special election on the question; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. For the purpose of paying the cost of transportation projects, general obligation bonds of the state in the principal amount of not more than $350,000,000 shall be issued and sold. The full faith, credit, and resources of the state are pledged to the payment of the principal of and interest and redemption premium, if any, on these bonds. These bonds shall be issued under the provisions of AS 37.15 as those provisions read at the time of issuance.

* Sec. 2. If the issuance of these bonds is authorized by the qualified voters of the state, a special fund of the state to be known as the "1985 Transportation Projects Fund" shall be established, to which shall be credited the proceeds of the sale of the bonds described in sec. 1 of this Act except for the accrued interest and premiums.

* Sec. 3. (a) The amount of $350,000,000 is appropriated from the "1985 Transportation Projects Fund" to the Department of Transportation and Public Facilities to be allocated in accordance with the following projects and estimates:

(1) transportation projects within the Municipality of Anchorage:

SB 308

West Northern Lights	21,000,000
Eklutna Transportation Project	28,000,000
Lake Otis Drive	15,500,000
Boniface Parkway and interchanges	26,300,000
C St., Tudor to ARR	2,000,000
100th and Minnesota interchange	3,500,000
C St., - Klatt Road	2,600,000
Spenard Road	12,600,000
36th Avenue	3,100,000
Dimond Blvd	5,600,000
Arctic Blvd	5,600,000
Pedestrian improvements	1,700,000
Traffic circulation improvements	2,000,000
Anchorage road district service areas	3,500,000
Limited road service areas	2,000,000
Eagle River Hiland Road bridge	3,000,000
Chugiak-E.R.-Birchwood road improvements	1,400,000
Old and New Seward Highway Intersections improvements	5,600,000
Eagle River-Birchwood-Chugiak State Road improvements	5,000,000
Total	$150,000,000

(2) transportation projects in the following house election districts, in the respective amounts:

District 1	17,392,439
District 2	8,695,565
District 3	8,695,565
District 4	17,391,304
District 5	17,391,304

District 6		8,695,565
District 16		17,391,304
District 17		8,695,565
District 18		8,695,565
District 19		8,695,565
District 20		17,391,304
District 21		8,695,565
District 22		8,695,565
District 23		8,695,565
District 24		8,695,565
District 25		8,695,565
District 26		8,695,565
District 27		8,695,565
Total		$200,000,000

(b) The proceeds of the bond issue may be reallocated among the listed projects as provided by law.

* Sec. 4. If the issuance of these bonds is authorized by the qualified voters of the state, the amount of $1,225,000 or as much of that amount as is found necessary is appropriated from the general fund of the state to the state bond committee to carry out the provisions of this Act and to pay expenses incident to the sale and issuance of the bonds authorized in this Act. The amounts expended from the appropriation authorized by this section shall be reimbursed to the general fund from the proceeds of the sale of the bonds authorized by this Act.

* Sec. 5. The amount withdrawn from the public facility planning fund for the purpose of advance planning for the improvements financed under this Act shall be reimbursed to the fund from the proceeds of the sale of bonds authorized by this Act.

* Sec. 6. The question whether the bonds authorized in this Act are to

be issued shall be submitted to the qualified voters of the state at a special election to be held the first Tuesday in November 1985 and shall read substantially as follows:

Proposition

State General Obligation Transportation Projects

Bonds $350,000,000

Shall the State of Alaska issue its general obligation bonds in the principal amount of not more than $350,000,000 for the purpose of paying the cost of transportation projects?

Bonds Yes [ ]

Bonds No [ ]

* Sec. 7. This Act takes effect immediately in accordance with AS 01.-10.070(c).

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act making a special appropriation to the Department of Transportation and Public Facilities for construction of a Kenai River bridge; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. The sum of $6,660,000 is appropriated from the general fund to the Department of Transportation and Public Facilities for construction of a Kenai River bridge providing for access to Funny River Road.

* Sec. 2. The appropriation made by this Act is for a capital project and is subject to AS 37.25.020.

* Sec. 3. This Act takes effect immediately in accordance with AS 01.-10.070(c).

LETTER OF INTENT

To Accompany

Senate Bill 38 "An Act making a special appropriation to the Department of Transportation and Public Facilities for construction of a Kenai River Bridge; and providing for an effective date."

It is the intention of the Senate Committee on Transportation that public access for the purpose of boat launching and parking be included within the right-of-way, or adjacent to the right-of-way, of the roadway to be funded by this appropriation.

To: Transportation Committee Members
From: Chairman Coghill
Date: Wednesday, January 23, 1985
Re: SB 38 "Kenai River Bridge"

Senate Bill 38 proposes to fund the construction of a highway bridge across the Kenai River near Sterling. Construction would include upgrading a portion of the existing Scout Lake Road, to be used as access on the north side of the river, and connection with Funny River Road on the south.

This project would have the desired effect of relieving sport fishing pressure on the north side of the Kenai, as well as allowing easier access to the Sterling Highway by residents living along the Funny River Road.

The bridge has been proposed for a number of years, and has been identified as a priority of both the Kenai Borough and DOT/PF. It's legislative history is varied over the past several years.

In their analysis, the sport fish division, ADF&G, has given its support to the project, and has asked for additional language to insure vehicle access to the river along the road's right-of-way. This particular spot at the end of Scout Lake Road is currently used as a boat-launching area, and with statutorily guaranteed access, federal funds may be available for construction of boat ramps near the bridge. Because this is an appropriation bill, this request has been addressed in the letter of intent.

The proposed CS reflects the higher capital cost as indicated on the DOT/PF fiscal note. In addition to the DOT/PF and ADF&G analyses, the letter of intent and the CS, we have included a memorandum from Sen. Paul Fischer, the prime sponsor; a clipping from the Peninsula Clarion; and a map showing the project's location.

Memorandum: Senate Bill 38

To: Jack Coghill
Chairman, Senate Transportation Committee

From: Senator Paul Fischer

The Kenai River Bridge project is one that has been identified by local and state authorities for over 20 years. It has been documented by community need and economic factors in attached pages from the Kenai River Transportation Study, published by DOT/PF and jointly prepared by DOT/PF, Kenai Peninsula Borough and the Cities of Soldotna, Kenai, Homer, Seward, and Seldovia,

Salient features are as follows:

1. This project is the keystone to solving the problems of overcrowding and congestion experienced by South Central Alaskan sport fishermen and other recreational users on the Kenai River. Completion will, for the first time, give equal access to the south side of the Kenai River. In addition, Alaskans will have their round trip driving time shortened by approximately 2 hours allowing more leisure time to enjoy the area.

2. Provides access to a large area on the southeast side of the Kenai River. Borough tax records show approximately 200 families with 576 persons in the area. Access is currently in the 17-mile Funny River Road following the Kenai River from Soldotna.

A large portion of Funny River Road passes through federal land of the Kenai Wildlife Refuge (formerly the Kenai National Moose Range). The road was constructed many years ago to minimum access standards and poses grave safety problems due to its narrow width and current high traffic levels. Accidents are frequent (see attached Peninsula Clarion article). School buses have a treacherous time in the severe weather conditions during winter and break up. Routing keeps children on the buses far longer than necessary, time on the bus for elementary school children is often in excess of 3 hours.

3. The bridge is far more cost effective and removes much of the need for upgrade and realignment of Funny River Road. The project cost is under $6 million while DOT/PF's cost estimates of reconstructing for reconstructing the 17 miles of the road run as high as $1 million per mile ($17 million total cost).

4. Provides faster and improved ambulance, fire and public safety access to families on the south side of Kenai River by allowing emergency vehicles to use the paved Sterling Highway and cross the Kenai River toward the end of Funny River. Residential fires are frequently terminal since heavy fire equipment makes very slow progress over the 17 miles of narrow, icy and potholed road,

5. Provides access for residents of the southern side of Kenai River to:

   a. Sterling Elementary School, grades K-6.
   b. Business area of Sterling
   c. Access to paved Sterling Highway for faster, safer travel either toward Anchorage or Soldotna.

6. Provides general public access to underutilized state park lands on the southeast side of the Kenai River, including the Nilnunga State Historical Park and Funny River Recreation area.

Actions on this Bridge/Road project are as follows:

1. 1980- Appropriation for reconnaissance.
2. 1981- Appropriation for design
3. 1982- Included in bond package which was vetoed by the Governor.
4. 1983- Included in Sheffield Administrative Budget (DOT/PF which was submitted to the Legislature.
5. 1984- Passed Senate as CSSB 389 (Finance).

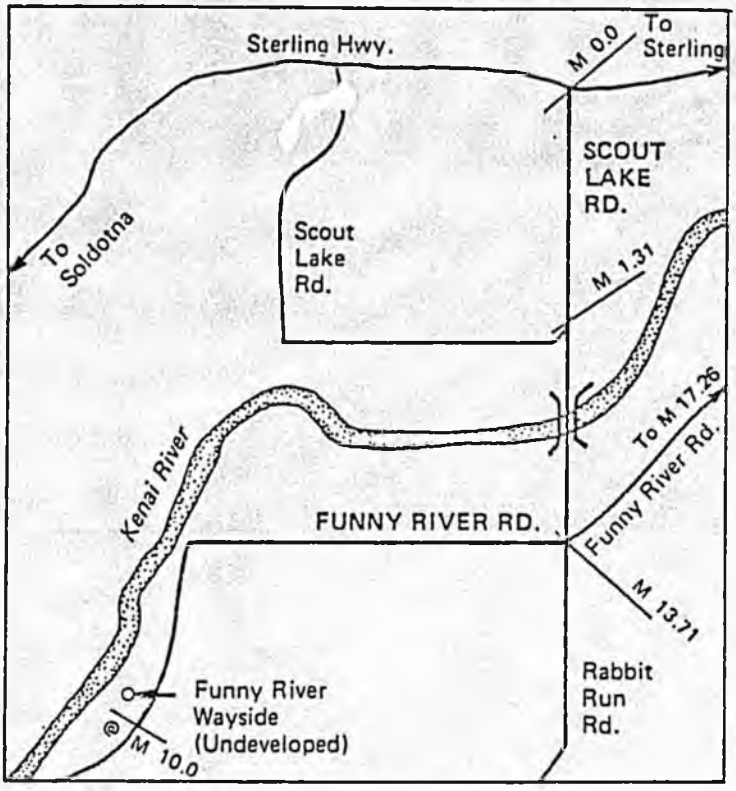
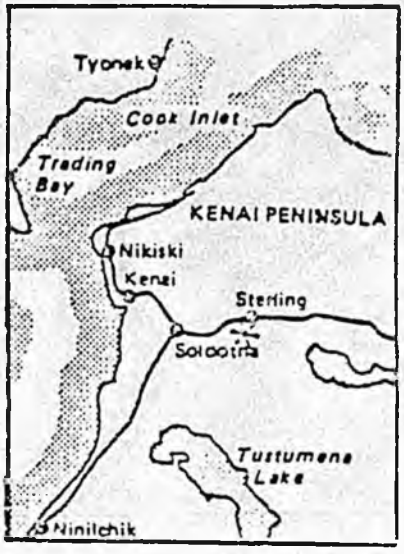
Project No. 14

FUNNY RIVER (SR 117300)/BRIDGE/SCOUT LAKE (SR 118700)





Capital Cost:

$ 8.4 million

Funny River: 1980 ADT =225

Scout Lake: 1980 ADT = 200

Existing Condition: Scout Lake Mile 0.0 (E. Jct. Sterling Hwy) to Mile 1.31 (Jct. improved road to river): Gravelled 22' surface, no shoulders. Funny River Mile 10 to Mile 17.26 (End of route): Gravelled 26' surface.

Proposed Physical Improvement: Phase I: Scout Lake (Sterling Hwy to Funny River Rd); Widen to 36', pave. Construct 26'-wide bridge, boat ramp and parking area next to bridge. Phase II: Funny River: Mile 13.71 to Mile 17.26: Widen to 36', pave. Phase III: Funny River: Mile 10 to Mile 13.71: Widen to 36', pave.

Project Alternatives: Improve Funny River Rd., Mile 0.0 (Jct. Sterling Hwy) to Mile 17.26 (End of route) to 28' rural paved standard.

Status: DOT/PF has completed Scout Lake Rd. and bridge design. Funding for project requested in DOT/PF's Central Region, FY 83 CIP.

Next Step Prior to Construction: Final design and permits for Funny River Rd., Mile 10 to Mile 17.26 and parking area.

Factors Affecting Development: Need parking area maintenance agreement with DNR-Div. of Parks

Relation to Other KRTS Projects: None

Cost - 5,672

*Projects are listed alphabitically and not order of priority

HIGH PRIORITY PROJECTS

The high priority project list consists of 1) ongoing, 2) current needs and 3) the higher ranked future projects. This list is shown in Table III-4, and detailed descriptions of each of these projects are included at the end of this chapter. In addition, the general location of each High Priority project is shown in Figure III-3.

The higher ranked projects were the subject of both quantitative and qualitative evaluations. While these evaluations provided valuable information on each project, the evaluations were not the sole criterion for placing or keeping a project on the high priority list. In fact, the Technical Advisory and Steering Committees made the final decisions on placements in the high priority group.

High Priority Project Descriptions

The following descriptions are intended to provide the information and data needed for DOT/PF's capital improvement programming (CIP) decisions. Thus, they represent a "resource" from which DOT/PF can select projects for its annual CIP submission to the Governor.

Each of the following projects are numbered to coincide with those shown earlier in Table III-4. Also the project names are those from the DOT/PF Coordinated Data System (CDS) log--when the popular name differs from the CDS designation, it is added to the CDS name and number.

Most of these roads have been recognized and scheduled for improvement by DOT/PF, by the Borough or by the cities. Thus, the traffic capacity/use analyses in the Phase II report served mainly to confirm their overloaded condition. Table II-3 identifies facilities below the minimal level of service for this project.

FUTURE NEEDS

Community Development Goals

During Phase II of the KRTS study, a large list of projects was proposed by the general public and elected and appointed officials during the initial round of public meetings. Many of these facilities are on-going or below minimal level of service facility projects which are included in Tables II-1 and II-2 above. The remaining projects included both regional and local projects on the state-maintained system. See Table II-4 for these community preferred projects which were presented in the Phase II report and repeated here. Note that Table II-4 still includes projects previously included in the On-going (Tables II-1 and II-2) and Facility Projects not meeting a minimal level of service (Table II-3).

Economic Development Requirements

Projects were identified for this category through the Phase II evaluation of regional economic development potentials. The primary criteria for inclusion on this list was a demonstrable potential for development that would warrant DOT/PF's attention at this time. See Table II-5 which was taken from the Phase II report and still includes projects listed in the On-going (Tables II-1 and II-2) and Facility Projects not meeting a minimal level of service (Table II-3).

ANALYSIS OF BILL/PROGRAM EFFECTS

Construction of a bridge across the Kenai River near Sterling to provide access to the Funny River Road should have no direct impact to the fishery resources of the Kenai River. The improved access will increase development, specifically on the south side, that will in the future impact the Kenai River resources. The degree of impact is not presently known nor can it be reasonably determined.

Depending on final bridge design and location, existing river angler and boating access may be eliminated or compromised. Loss of public access must be avoided during state capital projects.

Section 147 of the Federal-Aid Highway Act of 1976, PL 94-280 provides that funds apportioned to the states under 23 USC Section 104 may be used on application by the states for the construction of access ramps to public boat launching areas adjacent to bridges under construction, reconstruction, replacement, repair or alteration on the

(Continued)

AMENDMENTS PROPOSED

Amend Section 1 by adding at the end of line 13;

Public access will be included within the right-of-way or provided adjacent to the right-of-way for vehicle access to the river including boat launching and parking. The facility needs to be determined in cooperation with the Department of Fish and Game.

PLEASE ATTACH A SEPARATE SHEET FOR ADDITIONAL COMMENTS OR ANALYSIS.

Analysis of Bill/Program Effects (Continued)

Federal-Aid primary, secondary, and urban system highways. If this bridge does not qualify under this federal legislation, then appropriate funding should be provided in the state appropriation.

Peninsula Clarion

THURSDAY, Feb. 16, 1984 Vol. 14, Issue 99 © The Peninsula Clarion/U.S.P.S. 438-410

Former chief Wisecarver dies in crash

Frank Wisecarver, the first fire chief for the city of Kenai, died Wednesday afternoon in a head-on collision on Funny River Road.

The collision also seriously injured a 19-year-old Soldotna man.

Wisecarver, 59, was the chief of the city's volunteer fire department in the mid-1960s and served as the first chief when the department converted to a paid force. He left the department in 1975.

The accident occured at Mile 11 Funny River Road at about 1 p.m.

According to an Alaska State Troopers report, Elmer (Roy) Bird of Soldotna was driving his car toward Soldotna on Funny River Road when his car apparently crossed the center line as it was coming around a curve. It struck Wisecarver's truck head-on.

Wisecarver was pronounced dead on arrival at Central Peninsula General Hospital. An Emergency Services medic said Bird suffered rib cage injuries, broken bones and possible internal injuries. He was taken to the hospital, where he is recovering in intensive care.

Kenai Fire Department Capt. Don Morgan remembered Wisecarver as "probably the best thing to happen to the Kenai Fire Department. He was highly respected by the guys he worked with, and was a personal friend, too."

Re: SB 38 "Kenai River Bridge"

Senate Bill 38 proposes to fund the construction of a highway bridge across the Kenai River near Sterling. Construction would include upgrading a portion of the existing Scout Lake Road, to be used as access on the north side of the river, and connection with Funny River Road on the south.

This project would have the desired effect of relieving sport fishing pressure on the north side of the Kenai, as well as allowing easier access to the Sterling Highway by residents living along the Funny River Road.

The bridge has been proposed for a number of years, and has been identified as a priority of both the Kenai Borough and DOT/PF. It's legislative history is varied over the past several years.

In their analysis, the sport fish division, ADF&G, has given its support to the project, and has asked for additional language to insure vehicle access to the river along the road's right-of-way. This particular spot at the end of Scout Lake Road is currently used as a boat-launching area, and with statutorily guaranteed access, federal funds may be available for construction of boat ramps near the bridge. Because this is an appropriation bill, this request has been addressed in the letter of intent.

The proposed CS reflects the higher capital cost as indicated on the DOT/PF fiscal note. In addition to the DOT/PF and ADF&G analyses, the letter of intent and the CS, we have included a memorandum from Sen. Paul Fischer, the prime sponsor; a clipping from the Peninsula Clarion; and a map showing the project's location.

Memorandum: Senate Bill 38

To: Jack Coghill
Chairman, Senate Transportation Committee

From: Senator Paul Fischer

The Kenai River Bridge project is one that has been identified by local and state authorities for over 20 years. It has been documented by community need and economic factors in attached pages from the Kenai River Transportation Study, published by DOT/PF and jointly prepared by DOT/PF, Kenai Peninsula Borough and the Cities of Soldotna, Kenai, Homer, Seward, and Seldovia,

Salient features are as follows:

1. This project is the keystone to solving the problems of overcrowding and congestion experienced by South Central Alaskan sport fishermen and other recreational users on the Kenai River. Completion will, for the first time, give equal access to the south side of the Kenai River. In addition, Alaskans will have their round trip driving time shortened by approximately 2 hours allowing more leisure time to enjoy the area.

2. Provides access to a large area on the southeast side of the Kenai River. Borough tax records show approximately 200 families with 576 persons in the area. Access is currently in the 17-mile Funny River Road following the Kenai River from Soldotna.

A large portion of Funny River Road passes through federal land of the Kenai Wildlife Refuge (formerly the Kenai National Moose Range). The road was constructed many years ago to minimum access standards and poses grave safety problems due to its narrow width and current high traffic levels. Accidents are frequent (see attached Peninsula Clarion article). School buses have a treacherous time in the severe weather conditions during winter and break up. Routing keeps children on the buses far longer than necessary, time on the bus for elementary school children is often in excess of 3 hours.

3. The bridge is far more cost effective and removes much of the need for upgrade and realignment of Funny River Road. The project cost is under $6 million while DOT/PF's cost estimates of reconstructing for reconstructing the 17 miles of the road run as high as $1 million per mile ($17 million total cost).

4. Provides faster and improved ambulance, fire and public safety access to families on the south side of Kenai River by allowing emergency vehicles to use the paved Sterling Highway and cross the Kenai River toward the end of Funny River. Residential fires are frequently terminal since heavy fire equipment makes very slow progress over the 17 miles of narrow, icy and potholed road,

5. Provides access for residents of the southern side of Kenai River to:

   a. Sterling Elementary School, grades K-6.
   b. Business area of Sterling
   c. Access to paved Sterling Highway for faster, safer travel either toward Anchorage or Soldotna.

6. Provides general public access to underutilized state park lands on the southeast side of the Kenai River, including the Nilnunga State Historical Park and Funny River Recreation area.

Actions on this Bridge/Road project are as follows:

1. 1980- Appropriation for reconnaissance.
2. 1981- Appropriation for design
3. 1982- Included in bond package which was vetoed by the Governor.
4. 1983- Included in Sheffield Administrative Budget (DOT/PF which was submitted to the Legislature.
5. 1984- Passed Senate as CSSB 389 (Finance).

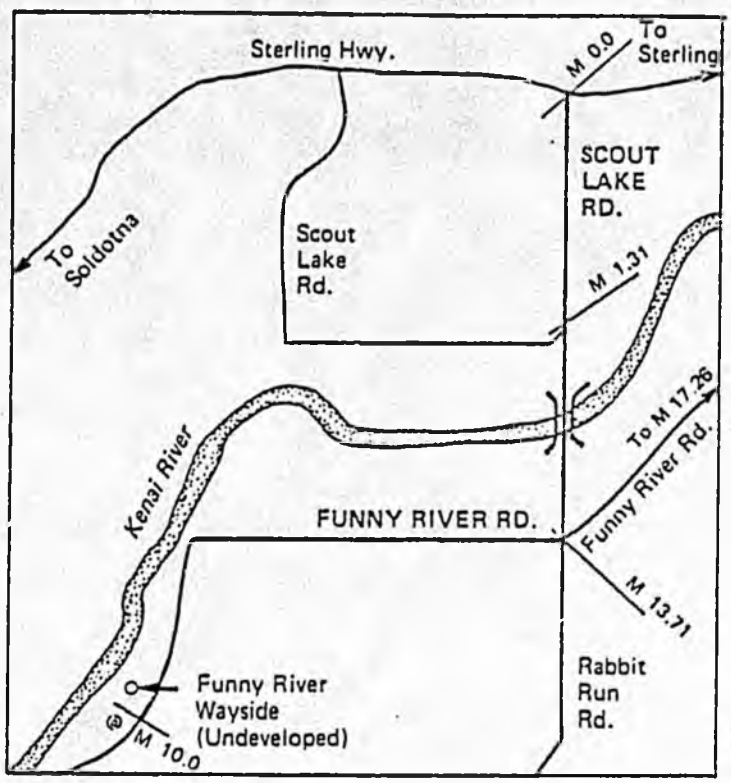
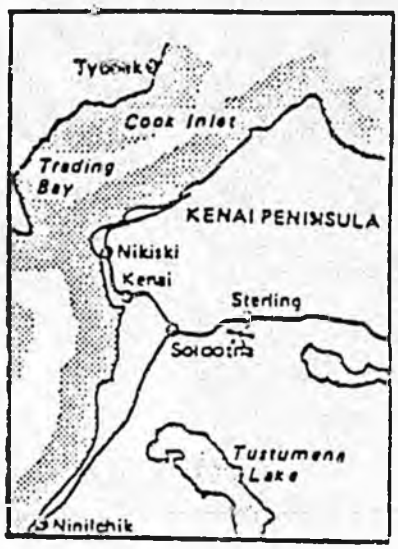
Project No. 14

FUNNY RIVER (SR 117300)/BRIDGE/SCOUT LAKE (SR 118700)





Capital Cost:

$ 8.4 million

Funny River: 1980 ADT =225

Scout Lake: 1980 ADT = 200

Existing Condition: Scout Lake Mile 0.0 (E. Jct. Sterling Hwy) to Mile 1.31 (Jct. improved road to river): Gravelled 22' surface, no shoulders. Funny River Mile 10 to Mile 17.26 (End of route): Gravelled 26' surface.

Proposed Physical Improvement: Phase I: Scout Lake (Sterling Hwy to Funny River Rd); Widen to 36', pave. Construct 26'-wide bridge, boat ramp and parking area next to bridge. Phase II: Funny River: Mile 13.71 to Mile 17.26: Widen to 36', pave. Phase III: Funny River: Mile 10 to Mile 13.71: Widen to 36', pave.

Project Alternatives: Improve Funny River Rd., Mile 0.0 (Jct. Sterling Hwy) to Mile 17.26 (End of route) to 28' rural paved standard.

Status: DOT/PF has completed Scout Lake Rd. and bridge design. Funding for project requested in DOT/PF's Central Region, FY 83 CIP.

Next Step Prior to Construction: Final design and permits for Funny River Rd., Mile 10 to Mile 17.26 and parking area.

Factors Affecting Development: Need parking area maintenance agreement with DNR-Div. of Parks

Relation to Other KRTS Projects: None

Cost - 5,672

*Projects are listed alphabitically and not order of priority

HIGH PRIORITY PROJECTS

The high priority project list consists of 1) ongoing, 2) current needs and 3) the higher ranked future projects. This list is shown in Table III-4, and detailed descriptions of each of these projects are included at the end of this chapter. In addition, the general location of each High Priority project is shown in Figure III-3.

The higher ranked projects were the subject of both quantitative and qualitative evaluations. While these evaluations provided valuable information on each project, the evaluations were not the sole criterion for placing or keeping a project on the high priority list. In fact, the Technical Advisory and Steering Committees made the final decisions on placements in the high priority group.

High Priority Project Descriptions

The following descriptions are intended to provide the information and data needed for DOT/PF's capital improvement programming (CIP) decisions. Thus, they represent a "resource" from which DOT/PF can select projects for its annual CIP submission to the Governor.

Each of the following projects are numbered to coincide with those shown earlier in Table III-4. Also the project names are those from the DOT/PF Coordinated Data System (CDS) log--when the popular name differs from the CDS designation, it is added to the CDS name and number.

Most of these roads have been recognized and scheduled for improvement by DOT/PF, by the Borough or by the cities. Thus, the traffic capacity/use analyses in the Phase II report served mainly to confirm their overloaded condition. Table II-3 identifies facilities below the minimal level of service for this project.

FUTURE NEEDS

Community Development Goals

During Phase II of the KRTS study, a large list of projects was proposed by the general public and elected and appointed officials during the initial round of public meetings. Many of these facilities are on-going or below minimal level of service facility projects which are included in Tables II-1 and II-2 above. The remaining projects included both regional and local projects on the state-maintained system. See Table II-4 for these community preferred projects which were presented in the Phase II report and repeated here. Note that Table II-4 still includes projects previously included in the On-going (Tables II-1 and II-2) and Facility Projects not meeting a minimal level of service (Table II-3).

Economic Development Requirements

Projects were identified for this category through the Phase II evaluation of regional economic development potentials. The primary criteria for inclusion on this list was a demonstrable potential for development that would warrant DOT/PF's attention at this time. See Table II-5 which was taken from the Phase II report and still includes projects listed in the On-going (Tables II-1 and II-2) and Facility Projects not meeting a minimal level of service (Table II-3).

Peninsula Clarion

Former chief Wisecarver dies in crash

Frank Wisecarver, the first fire chief for the city of Kenai, died Wednesday afternoon in a head-on collision on Funny River Road.

The collision also seriously injured a 19-year-old Soldotna man.

Wisecarver, 59, was the chief of the city's volunteer fire department in the mid-1960s and served as the first chief when the department converted to a paid force. He left the department in 1975.

The accident occured at Mile 11 Funny River Road at about 1 p.m.

According to an Alaska State Troopers report, Elmer (Roy) Bird of Soldotna was driving his car toward Soldotna on Funny River Road when his car apparently crossed the center line as it was coming around a curve. It struck Wisecarver's truck head-on.

Wisecarver was pronounced dead on arrival at Central Peninsula General Hospital. An Emergency Services medic said Bird suffered rib cage injuries, broken bones and possible internal injuries. He was taken to the hospital, where he is recovering in intensive care.

Kenai Fire Department Capt. Don Morgan remembered Wisecarver as "probably the best thing to happen to the Kenai Fire Department. He was highly respected by the guys he worked with, and was a personal friend, too."

BACKGROUND/LEGISLATIVE INTENT

ANALYSIS OF BILL/PROGRAM EFFECTS

Construction of a bridge across the Kenai River near Sterling to provide access to the Funny River Road should have no direct impact to the fishery resources of the Kenai River. The improved access will increase development, specifically on the south side, that will in the future impact the Kenai River resources. The degree of impact is not presently known nor can it be reasonably determined.

Depending on final bridge design and location, existing river angler and boating access may be eliminated or compromised. Loss of public access must be avoided during state capital projects.

Section 147 of the Federal-Aid Highway Act of 1976, PL 94-280 provides that funds apportioned to the states under 23 USC Section 104 may be used on application by the states for the construction of access ramps to public boat launching areas adjacent to bridges under construction, reconstruction, replacement, repair or alteration on the

(Continued)

AMENDMENTS PROPOSED

Amend Section 1 by adding at the end of line 13;

Public access will be included within the right-of-way or provided adjacent to the right-of-way for vehicle access to the river including boat launching and parking. The facility needs to be determined in cooperation with the Department of Fish and Game.

PLEASE ATTACH A SEPARATE SHEET FOR ADDITIONAL COMMENTS OR ANALYSIS.

Analysis of Bill/Program Effects (Continued)

Federal-Aid primary, secondary, and urban system highways. If this bridge does not qualify under this federal legislation, then appropriate funding should be provided in the state appropriation.

SENATE BILL NO. 39

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act making a special appropriation to the Department of Transportation and Public Facilities for various construction projects in the Totchaket resource area; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. The sum of $5,630,000 is appropriated from the general fund to the Department of Transportation and Public Facilities for the following construction projects in the Totchaket resource area:

Nenana River Bridge	$3,000,000
East Middle River, West Middle River, and Little Nenana River Bridges	1,600,000
Road construction	1,030,000

* Sec. 2. The appropriation made by this Act is for capital projects and is subject to AS 35.15.080, 35.15.090, and AS 37.25.020.

* Sec. 3. This Act takes effect July 1, 1985.

Re: Updated Cost and Schedule for Nenana River Bridge

Dear Steve:

Per your request we have reviewed our 1981 cost estimates and have revised our costs accordingly.

There has been no major increases in construction costs as we had projected in 1981, consequently we feel you can still build the bridge and approaches for $4.8 million using standard linear contracting techniques. This estimate includes all construction costs, engineering and administration and assumes construction beginning in September, 1985 and ending by July, 1987.

However, by using the same techniques that were so successfully utilized in constructing the Tanana River Bulkhead, wherein we participated jointly with the City of Nenana in the construction management of the project, we feel the bridge can be constructed for $3,000,000.

Sincerely,

PERATROVICH, NOTTINGHAM & DRAGE, INC.

Roy Peratrovich, Jr., P.E.
Vice President

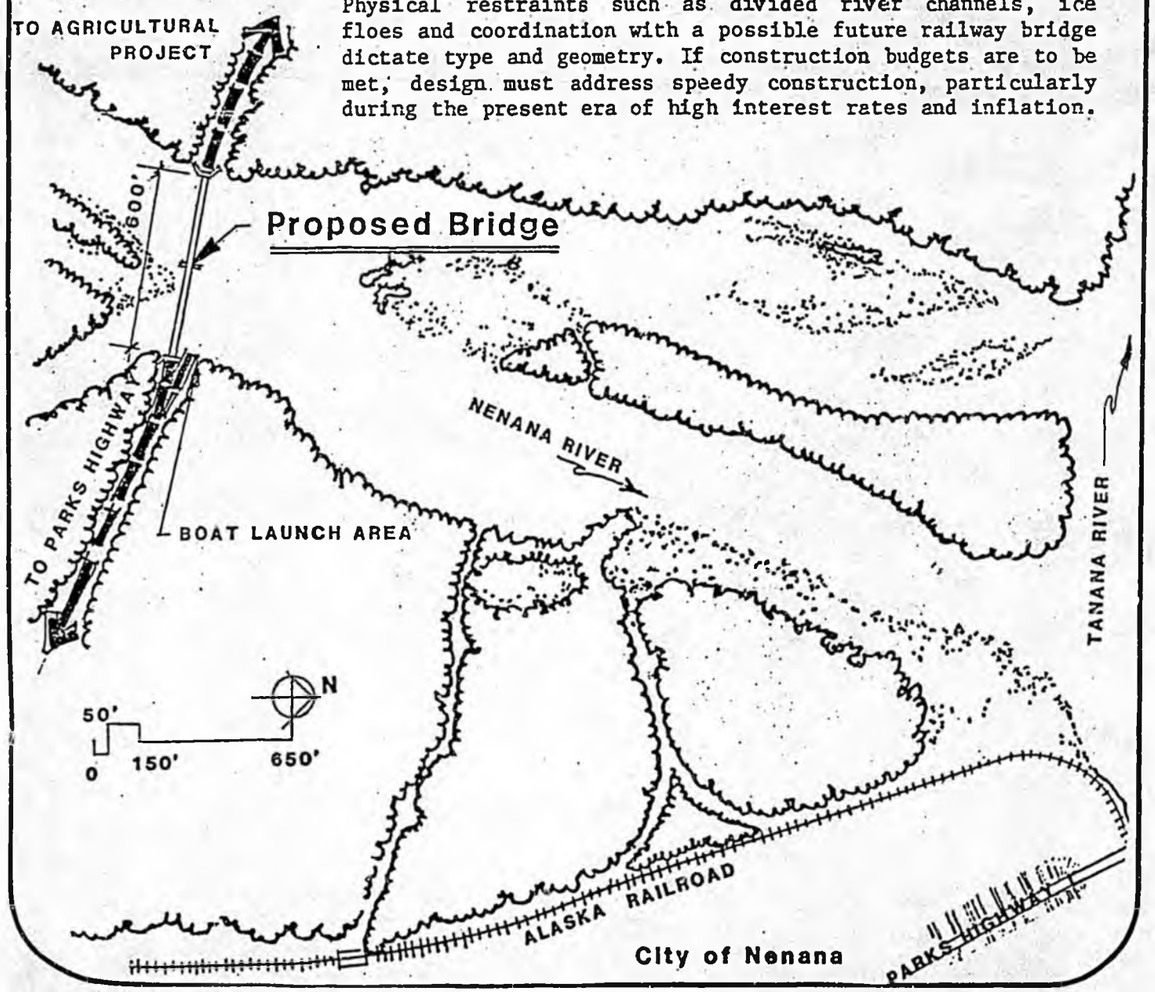
Enclosure

Funding Request: Nenana River Bridge Crossing

CITY OF NENANA RESOURCE DEVELOPMENT PROJECT

INTRODUCTION

Present access to Nenana Agricultural Development is limited by a bridge crossing required over the Nenana River near Nenana. The Nenana River is over 500 ft. wide at its narrowest point, posing a significant obstacle requiring a coordinated effort to economically bridge. It is at this point that the proposed bridge is to be located. Physical restraints such as divided river channels, ice floes and coordination with a possible future railway bridge dictate type and geometry. If construction budgets are to be met, design must address speedy construction, particularly during the present era of high interest rates and inflation.



CITY OF NENANA

JOHN COGHILL, MAYOR — STEVE BAINBRIDGE, CITY ENGINEER

prepared by:

Peratrovich, Nottingham & Drage, Inc.

Engineering Consultants

Telex 090 26436
Int. Telex 200 26436

1506 West 36th Avenue • Suite 101 • Anchorage, Alaska 99503 • 907-561-1011

JANUARY 1985

In order to achieve this goal a bridge type was chosen that allows the piers and abutments to be located out of the main river channels. Substructure design also allows the use of readily available materials which will further expedite the project and allow early construction during the winter when the river flow is low and over ice access to piers and abutments is more convenient.

The more expensive superstructure steel must be erected before spring breakup as shown on the construction schedule. If this deadline is to be met and construction costs minimized, the superstructure steel must be ordered as soon as possible.

COST ESTIMATE AND TIMING

Once started, construction should be completed quickly so that capital outlay time is minimized. Using standard contracting techiques the estimated mid-1986 cost for this project would be $4,800,000. However by using the same techniques that were utilized in constructing the Tanana River Bulkhead wherein the designer participated jointly with the City of Nenana in the construction management of the project, the project can be completed for $3,000,000.

Nenana, Alaska 99706

Re: East Middle River Crossing,
West Middle River Crossing,
Little Nenana River Crossing

Dear Mr. Bainbridge:

The structures for the subject streams were designed several years ago and have been shelved pending funding. At the time I was a principal of Alaska Transportation Consultants, Inc. and was involved in the original design.

All of the subject bridges are similar in construction type, dimensions and foundation conditions. They are single span, concrete and steel bridges sitting on steel piling and will have a total of approximately 12,800 ft^2 of deck area. I have included attachments showing important details for theses bridges.

I have compared recent bridge construction costs as experienced by the DOTPF with the proposed budget of 1.6 million dollars for the subject bridges. Current DOTPF bridge costs range between $120 and $150 per ft^2. Based upon 120 ft^2, an updated estimate is $1,540,000 for the three bridges with an additional $60,000 for approaches and contingencies.

Sincerely,

Bob C. Thomas

INTRODUCTION

Area Description

The Nenana-Totchaket Management Plan spans over 346,000 acres of land west of the Parks Highway approximately 60 miles southwest of Fairbanks (see Figure 1). Nearly 87% of the land is under state management authority with an additional 11,000 acres currently selected. The planning area encompasses a large glacial outwash plain bounded by several major rivers, including the Kantishna, Teklanika and Tanana Rivers. The dominant soils are characterized as silt loams ranging from 19 to 28 inches deep overlying sand with moderate permeability. Surface topography ranges from nearly level to hilly. In the southern one-third of the area the sand substrate is exposed to the surface in the sand dunes around Dune Lake.

The predominant vegetation is a mixed forest of aspen, birch and spruce. The proposed agricultural development area contains almost no timber of pole or sawlog size. A recent fire burned over 172,000 acres of land, severely effecting the forest resource in the southern half of the management area.

Activities such as trapping, hunting, and recreating have traditionally concentrated in the productive river corridors edging the region. At present no settlement has occurred in the subject area. The closest community is Nenana, located immediately east of the management unit at the confluence of the Nenana and Tanana River.

CS FOR SENATE BILL NO. 222 (Transportation)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act making a special appropriation to the Department of Transportation and Public Facilities for engineering and design of bridges and roads in the Nenana agricultural area; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. The sum of $500,000 is appropriated from the general fund to the Department of Transportation and Public Facilities for engineering and design of bridges and roads in the Nenana agricultural area.

* Sec. 2. The appropriation made by this Act shall be disbursed in accordance with AS 35.15.080 and 35.15.090.

* Sec. 3. This Act takes effect immediately in accordance with AS 01.10.-070(c).

ADL No. 409501

RIGHT-OF-WAY PERMIT

THIS AGREEMENT made and entered into this 26th day of October, 1984, by and between the STATE OF ALASKA, acting by and through the Department of Natural Resources, Division of Lands, hereinafter referred to as the grantor and City of Nenana hereinafter referred to as the permittee.

WITNESSETH, that in accordance with the provisions of Sec. 38.05.330, A.S. and the rules and regulations promulgated thereunder, the permittee having filed an application for a right-of-way for: Nenana-Totchaket Primary Public Access Road/Utility Corridor with the Division of Lands together with a map showing the definite location thereon of the line of right-of-way which the permittee has adopted and agrees to be the specific and definite location of the aforesaid right-of-way, and

WHEREAS, it is understood and agreed by the permittee herein that, as a condition to the granting of the right-of-way applied for, the land covered by said right-of-way shall be used for no purpose other than the location, construction, operation and maintenance of the said right-of-way over and across the following described State lands, to wit:

(see Attachment A)

The said right-of-way shall extend 27.51 miles in length and 500 feet in width, containing approx. 1719.01 acres, more or less.

TO HAVE AND TO HOLD the same until the above described land shall no longer be used for the above-mentioned purpose and subject to conditions and reservations elsewhere set forth herein and any "Special Conditions" attached hereto.

The sketch map revealing the right-of-way granted herein shall be attached hereto and made a part hereof.

In the event that the right-of-way herein granted shall in any manner conflict with or overlap a previously granted right-of-way the permittee herein shall use this right-of-way in such a manner as not to interfere with the peaceful use and enjoyment of the previously issued right-of-way and no improvements shall be constructed by the permittee herein upon the overlapping area unless the consent therefore has first been obtained from the permittee under the pre-existing right-of-way.

The permittee in the exercise of the rights and privileges granted by this indenture shall comply with all regulations now in effect or as hereafter established by the Division of Lands and all other Federal, State or municipal laws, regulations or ordinances applicable to the area herein granted.

Upon abandonment, termination, revocation or cancellation of this indenture, the permittee shall within 90 days remove all structures and improvements from the area herein granted, except those owned by the grantor, and shall restore the area to the same or similar condition as the same was upon the issuance of this permit. Should the permittee fail or refuse to remove said structures or improvements, within the time allotted, they shall revert to and become the property of the grantor. However, the permittee shall not be relieved of the cost of the removal of the structures, improvements and/or the cost of restoring the area. Provided further, however, that the grantor, in his discretion, may alter or modify the requirements contained in this provision if it is to the best interest of Alaska to do so.

The permittee shall utilize the lands herein granted consistent with the purposes of the proposed use, as revealed by the application therefore, and shall maintain the premises in a neat and orderly manner and shall adopt and apply such safety measures as shall be necessary, proper and prudent with respect to the use to which the land is subjected.

The permittee shall take all reasonable precaution to prevent and suppress brush and forest fires. No material shall be disposed of by burning in open fire during the closed season unless a permit therefor has first been obtained from the agency empowered by law to issue such permits.

Prior to any construction or development that will use, divert, obstruct, pollute or utilize any of the waters of the State, the permittee shall first obtain approval therefor from the Commissioner of the Department of Fish and Game and file an image copy thereof with the grantor.

Any lands included in this permit which are sold under a contract to purchase shall be subject to this permit. Upon issuance of title to the purchaser, this permit shall remain in effect until its date of expiration.

In case the necessity for the right-of-way shall no longer exist, or the permittee should abandon or fail to use the same, then this permit shall terminate.

The State of Alaska shall be forever wholly absolved from any liability for damages which might result to the permittee herein on account of this permit having been cancelled, forfeited, or terminated prior to the expiration of the full time for which it was issued.

NOW THEREFORE, in accordance with the provisions of Sec. 38.05.330, A.S. and the rules and regulations promulgated thereunder and in accordance with the conditions heretofore set forth or attached hereto and made a part hereof, the permittee herein is hereby authorized to locate, construct, operate and maintain said right-of-way over and across the lands herein described.

BOOK 33 PAGE 441

ATTACHMENT A

Legal Description of the Nenana - Totchaket
Primary Public Access Road/Utility Corridor

NOTE: Right-of-Way Permit ADL 409501, as illustrated on the attached survey, does not include the proposed Nenana River Bridge, the private property located along the Access Road alignment between Mile 0.00 and Mile 0.29, or two University parcels (E1/2 Section 10, Township 4 South, Range 9 West, Fairbanks Meridian and E1/2 Section 9, Township 4 South, Range 9 West, Fairbanks Meridian) located between Mile 6.80 and Mile 7.30 and between Mile 7.80 and Mile 8.30, respectively. The entire alignment extends from the west bank of the Nenana River (not including the Nenana River Bridge) to the east boundary of Township 4 South, Range 12 West near the Kantishna River. The City of Nenana will be responsible for acquiring a separate Right-of-Way from the University across its two parcels. The City has already acquired the necessary private property through purchase.

The legal description of Right-of-Way ADL 409501, which is shown on the attached survey plat and which is located entirely within the Fairbanks Meridian, can generally be described as follows:

The Right-of-Way ADL 409501 traverses Sections 15-22 of Township 4 South, Range 8 West; Sections 7-13 and 15-18 of Township 4 South, Range 9 West; Sections 7-18, Township 4 South, Range 10 West; ~~and~~ Sections 7-18 of Township 4 South, Range 11 West; and Sections 7-18 of Township 4 South, Range 12 West.

MEMORANDUM

TO: Members of the Transportation Committee

FROM: Chairman Coghill

DATE: January 30, 1985

RE: SB 39-Road and Bridges in the Totchaket resource area

S.B. 39 appropriates $5,630,000 for construction of the following:

1. Nenana River Bridge, a three span concrete and steel bridge 440 feet in length.

2. Little Nenana River Bridge, a one span concrete and steel bridge 140 feet in length.

3. East Middle Fork of the Nenana River Bridge, a one span concrete and steel bridge 105 feet in length.

4. West Middle Fork of the Nenana River Bridge, a one span concrete and steel bridge 144 feet in length.

5. Construction of 22.8 miles of roadway.

The purpose of the construction is to open an area of approximately 346,000 acres of land west of the Parks Highway approximately 60 miles southwest of Fairbanks to economic development. The residents of Nenana have been interested in this development area for many years and instigated the studies enclosed in the packet.

Enclosed you will find a copy of the bill, a January, 1981 report on agricultural development, a DOT/PF bill analysis, a packet compiled by Steve Bainbridge of the City of Nenana entitled Backup Material for SB 39, and a copy of Alaska Statute Supplements Sec. 35.15.080 and Sec. 35.15.090.

Senator Jan Faiks
Co-Chairman, Senate Committee on Finance
Alaska State Legislature
Pouch V
State Capitol
Juneau, Alaska 99811

Dear Senator Faiks:

We are requesting your favorable consideration of Senate Bill No. 39 which would provide funds for construction of a highway access road to the farming lands in the Tatchaket area.

We understand the State's limited resources may cause postponement of many worthy projects, and are concerned that this project may not be funded for the same reason.

The Tatchaket Highway Access Road has long range statewide significance in that it will open new lands for development and provide additional future income to the State as well as a useful product for Alaskans. The farming products would utilize our newly acquired railroad and thereby provide another source of revenue to the Alaska Railroad. More people would be employed and other related industries developed. Through our recent involvement as the design engineer for the City of Nenana's Tanana River Bulkhead, we have been very impressed with the efficient manner in which they have managed their capital improvement projects. On that particular project, our engineering company assisted the City in preparing their budget request for the new dock and assisted them in the design and construction management. The City of Nenana, acting as their own contractor, constructed the 1100 ft. of dock for $1.5 million or about $1 million less than conventional State contracting procedures. The City of Nenana used the money wisely and I feel confident they would do the same for this worthy project.

Your support would be appreciated.

Sincerely,

PERATROVICH, NOTTINGHAM & DRAGE, INC.

March 20, 1985

Edna B. De Vries, Senator
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Ms. De Vries:

RE: SB 39 Road and Bridges to Totchaket area

Enclosed is a copy of a resolution in opposition to SB 39 that was passed recently by the Toghotthele Corporation Board of Directors. This resolution supports the position of the Nenana Native Council against the road and bridges proposed under SB 39.

SB 39 would provide $4,600,000.00 for the construction of three bridges and $1,030,000.00 for a road. The bridges to be built would cross the Nenana River, the East Middle River and the West Middle River.

It is important to note that the total distance between the three bridges is approximately three miles. Given the cost of constructing roads in Alaska, $1,030,000.00 for the road will be sufficient to build little more then enough to connect the bridges. This will not connect with another road, any existing facility, or any existing State land disposal.

Our main objection is that the access provided by the proposed road and bridges will open the door for haphazard and piecemeal development of the Totchaket area. There is particular concern about the effect agriculture will have on subsistence hunting and fishing. If bridges are to be built that should take place only after there is a clear plan for the development of the Totchaket area and there is evidence that subsistence resources will be protected.

Sincerely,

Winnie B. Atwood
Chief Executive Officer

TOGHOTTHELE CORPORATION

Resolution 85-2

In Support of Nenana Native Council

on SB 39

WHEREAS; the Nenana Native Council has taken a position of opposition to the bridges and road proposed for construction by SB 39, currently being considered by the 14th Alaska Legislature, and;

WHEREAS; in objecting to the proposed road and bridges the Nenana Native Council cites concerns over the loss of subsistance hunting areas, and;

WHEREAS; further concerns of the Nenana Native Council include the effect of road access on wildlife in the area on the fringe of the Agricultural development and the effect of agricultural on the quality of water in local rivers, and;

WHEREAS; the Nenana Native Council is in opposition to SB 39 specifically because of the adverse effects of agricultural development on traditional lifestyles and because no plan for how the Totchaket is to be developed has been presented to and approved by the residents of Nenana, and;

WHEREAS; the Toghotthele Corporation Board of Directors respects the concerns and objections of the Nenana Native Council, and;

NOW THEREFORE BE IT RESOLVED; the Toghotthele Corporation Board of Directors supports the Nenana Native Council in its opposition to the road and bridges proposed in SB 39.

ADOPTED and DATED this 8 day of March, 1985, in Nenana, Alaska.

January 28, 1985

Re: SB 39; Road & Bridge Construction in the Totchaket Resource Area

The funds requested for the bridges in SB 39 appear to be adequate. The funds for road construction would provide 2.3 to 5.15 miles of road, depending on the type of road constructed. It is our understanding that the project would include 22.8 miles of road. Perhaps the additional road could be included in subsequent appropriations.

Our costs to construct an 18 ft. wide road to minimum "pioneer" access road standards is $200,000 per mile or about $4,500,000 for 22.8 miles. However, given the type of traffic that would be expected to use this road (farm combines, logging trucks, dump trucks, etc.), we recommend a 28 ft. wide road built to secondary standards. This would cost approximately $440,000 per mile or $10,000,000 for 22.8 miles.

The long-term maintenance costs that might have to be borne by the State for this project could be substantial. The average maintenance costs for a two lane, secondary gravel road open 12 months are $5,400 per mile or $123,120 per year for 22.8 miles. A road constructed to lesser standards may require higher annual maintenance costs.

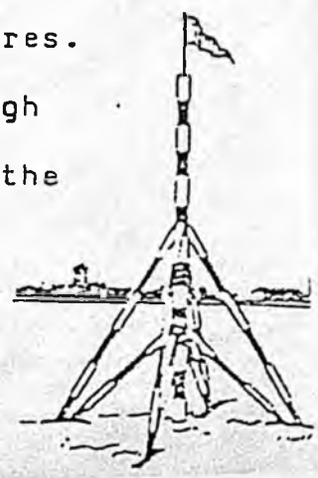
OVERVIEW OF THE NENANA-TOTCHAKET PROJECT

Date: March 2, 1981
From: John B. Coghill, Mayor

In 1968, during route survey and soil testing work associated with the North Commission west of Nenana, Alaska, field crews found relatively deep top soil covering a broad plateau lying between the Tanana and Nenana rivers to the east and the Kantishna river on the west. More extensive analysis of these soils showed that they possessed excellent agricultural potential. A more extensive and detailed soil survey conducted between 1975 and 1977 by the Soil Conservation Service of the U.S. Department of Agriculture defined the extent of the agricultural soils in what SCS has called the "Totchaket Area", at least 175,000 acres of Class II and Class III soils...soils which, for Alaska, show the highest potential for agricultural productivity. Thousands of acres of Class IV soils with lesser potential are also extensive on the plateau, and preliminary reconnaisance of areas west of the Kantishna show lands with agricultural potential numbering in the millions of acres.

That these lands are capable of producing both High quantity and high quality yields has been accepted by the



State's agricultural community for several years. The more important discussion in recent years has not been whether Totchaket should be developed for agriculture, but what kind of agricultural development would better satisfy the multiple and diverse needs of individual Alaskans and Alaskan families on the one hand, and on the other, what kind of agriculture can best meet the State's urgent need to invest its' short term oil wealth in long term renewable resource industries which can sustain themselves economically far into the future.

Even in view of these urgent concerns, however, planning for eventual development of Totchaket by City, State, University and Federal agricultural interests proceeded slowly during the 1970s as Native Claims in the area were resolved according to the provisions of the Alaska Native Claims Settlement Act of 1971. With final conveyance of land title to Native corporations in the area in late 1979 the last of the major concerns affecting the future of Totchaket were resolved, and the City of Nenana initiated the necessary financing and studies required for the design and long term development of what we are now calling Nenana-Totchaket.

With the support of our delegation to the legislature and the encouragement and assistance of many people around the State, these reports are now either complete or nearly complete and are being presented to the legislature for consideration. It

is important to emphasize again that these studies were not designed by the City to figure out whether or not to develop agriculture. They were designed to determine what kind of agriculture will respond to the real needs of Alaska's people for food, access to land, and increased self-sufficiency; what kind of agriculture can be developed in Nenana-Totchaket which will help the State's new agricultural industry become economically self-sustaining in a reasonably short period of time; and, finally, what will it all cost.

We are pleased with the reports, and we believe they offer a well thought out and detailed plan for initial development of Nenana-Totchaket. The transportation proposal includes both the initial design, and cost estimates for overland access from Nenana to the first two townships which the City and the Department of Natural Resources have scheduled for disposal in February 1982...less than one year from today. The livestock report lays out a detailed and comprehensive plan for the development of a red meat industry that will involve all the State's farming regions. The composite Planning, Development, and Production Schedule from 1980 through 1990 shows our best estimates of the annual financing required and the annual production and employment associated with development in the area. Clearly the amounts of money involved are not insignificant even when compared with the multi-billion annual revenues of the State of Alaska. More importantly, financing decisions this

year will be followed by financing decisions as large, or larger, in subsequent years throughout the decade.

The transportation system should fall into our highest priority for without that access, the proposed clearing, wood fiber harvest, and land disposal programs are meaningless.

Re: Background material for SB 39

The last time the committee heard SB 39, the major question the members could not seem to reconcile was how the City of Nenana could construct the proposed road at considerably less cost than the State DOT/PF estimate.

Included along with the bill in today's packet are background materials as follows:

- A letter from Steve Bainbridge, Nenana city engineer, explaining how the city should be able to build the road for less than ½ the DOT/PF estimate

- A cover letter and computation sheets from David Truax, DOT/PF planner, showing how the department figured their estimate of $200,000 per mile for the pioneer road. They say they have to meet AASHTO standards: AASHTO is the American Association of State Highway and Transportation Officials.

- Resolution number 83-02, passed by the City of Nenana in April 1983, assuming maintenance obligations for Totchaket ag roads

- Information regarding proposed agricultural land disposals in the Totchaket area

Introduced: 1/14/85

SENATE BILL NO. 49

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act making a special appropriation to the Department of Transportation and Public Facilities to determine the feasibility of building Kantishna Road; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. The sum of $500,000 is appropriated from the general fund to the Department of Transportation and Public Facilities to determine the feasibility of building Kantishna Road.

* Sec. 2. The unexpended and unobligated portion of the appropriation made by this Act lapses into the general fund June 30, 1986.

* Sec. 3. The appropriation made by this Act is subject to AS 35.15.080 and 35.15.090.

* Sec. 4. This Act takes effect July 1, 1985.

Senator John B. Coghill
Alaska State Legislature
Pouch V (MS 3100)
Juneau, Alaska 99811

Dear Senator Coghill,

Ref: SB39 - Totchaket Resource Area Roads

Attached you will find a copy of correspondence from David Truax, DOT/PF , Division of Planning, Northern Region that serves to expand on the assumptions made to arrive at a cost per mile of $200,000.

In his letter, Dave comments that ---- "our costs to construct a road would likely be higher than yours. This is because the State DOT/PF must adhere to AASHTO standards ---". In addition, I would add the following comments as to why the City of Nenana is likely to be able to construct roads for lower per mile costs than those indicated by DOT/PF:

FIRST - The City's method of approach to a project would be the "force account" method. This allows the City to act as the "contractor", whereby the City assumes any "risk" associated with the performance on a job. Also the City, by acting as it's own contractor, eliminates the "profit" factor which any private sector contractor would normally include in its contract unit bid prices and in any "change orders" to the contract.

SECOND - The City of Nenana,again as its own contractor, can schedule the work on a project so as to take advantage of competitive bidding climates and slack seasons. For example, for building roads to the Two Mile Lake Agricultural Project, construction was scheduled for the winter months when typically construction equipment is idle. By doing this we achieved the benefit of low equipment rental rates during the off season.

From experience on the Two Mile Lake Ag road construction project where we are building a typical "pioneer" road for approx. $70,000 per mile, it is evident that the above two items allow for a drastic reduction in per mile construction costs.

In addition, and specific to, the proposed Totchaket road project,

THE FOLLOWING ITEMS ARE COMPLETE:

1. Surveying and Design of the roads and bridges was accomplished with funds received during First Session of the Twelfth Legislature (CSSB222)

2. Right-of-way acquisition complete
   Right-of-way Plats filed and recorded

3. Right-of-way partially cleared

IN CONSLUSION, all the above factors should allow the City of Nenana, acting under a "T.O.R.A." with DOT/PF, to accomplish the first seven miles of road construction at $90,000 per mile (TOTAL $630,000) The other $400,000 in the line item appropriation of $1,030,000 for Road Construction was to allow for the upgrading of an additional 20 miles of road to the west at $20,000 per mile. (Note: This 20 miles is already cleared and driveable!)

IT SHOULD BE EMPASIZED that the main thrust of this project is the first seven miles of road and the bridges. The money requested is sufficient to accomplish this.

Please call me at 832-5501 should you require additional informatiom.

Sincerely,

Steve Bainbridge, P.E.

Re: Totchaket Resource Area Roads

Steve Bainbridge
City Engineer
City of Nenana
P.O. Box 70
Nenana, Alaska 99760

Dear Steve:

Enclosed is a copy of the typical section and computations we used to arrive at our construction cost estimate for an 18' wide access road in the Totchaket resource area. As you know this cost estimate was provided to Senator Coghill by letter on Janaury 25, 1985.

As I mentioned to you during our February 5, 1985, telephone conversation, wherein you requested the enclosed materials, our costs to construct a road would likely be higher than yours. This is because the State DOT&PF must adhere to AASHTO standards, which may not necessarily be true for road construction done by the City of Nenana.

If you have any questions regarding the computations or the typical section please contact Dan Sterley at our Design Section. He can be reached at 452-1911.

Sincerely,

David W. Truax
Southern/Interior Planner

KANTISHNA ACCESS

Warrants

A highway to the Kantishna area can be justified on the following basis:

Tourism is Alaska's second largest industry and Mt. McKinley is the State's number one tourist attraction. The park road is inadequate to serve this industry for the following reasons:

a. Geometrics, the road is substandard in width, alignment and grade. The road is hazardous as demonstrated by the rash of serious bus accidents that have occurred during the past few years.

b. Access is too restrictive, visitors must travel by bus (shuttle school buses or buses operated by park concessionaires). This ride can last up to six hours and is a source of discomfort, especially to senior citizens and young children.

c. Capacity, the demand has increased dramatically during the past decade as has the growth of tourism. The Interior Alaska Transportation Study estimated nearly 5000 vehicles by the year 2005.

d. Because time at vantage viewpoints is extremely limited, over 50% of those seeking a view of Mt. McKinley are disappointed.

e. The increase of traffic on this road has degraded the wildlife viewing aspect of this route.

Mining is also an important industry in Alaska and the Kantishna area is an important mining area. Recent assessments conducted by governmental officials documented the existance of commercial ore deposits. The existing road is inadequate to serve this industry because of slow moving tour bus traffic, and it is substandard.

FBKS. CHAMBER OF COMMERCE

Enhance the State's ability to assure our visitors and residents a quality experience. Mt McKinley is Alaska's crown jewel. Access and vantage viewing are at the sole discretion of the U.S. Park Service. However Alaska's entire tourist industry and the State's reputation suffer when visitors ride an uncomfortable bus for six hours and still do not get to see the main attraction.

Give opportunity for the private sector to provide tourist facilities that are now being provided by the government sector or not being provided at all. Mining claims in the Kantishna area are patented and can be used by the private developer to locate hotels, lodges, camping parks, hostels and other visitors facilities. The area provides an unsurpassed view of Mt. McKinley and visitors would have the opportunity to remain in the area for longer periods increasing their chances of seeing the mountain. (note, the cyclic type weather that occurs during the dry interior summer virtually assures all visitors a view of the mountain if they can remain there for a day or so.

The private sector is more sensitive to visitor satisfaction thus when this sector caters to our visitors the results are happier, longer and more return visits.

An alternate access to the Kantishna area would make it possible for the park service to redirect the park road traffic toward wildlife viewing. This is more compatable to that portion of the park's classification, (wilderness). It also provides a more focused and quality wildlife viewing concession.

A northern access, currently economically viable as far as the Kantishna area, can be extended toward the McGrath area to serve that area as the need warrants.

A northern access would tie into the existing park road, making it

possible to provide a loop system, a limited loop system or limited to wildlife tours. Note this would be a popular concession and with some imagination could be worked in two directions.

There is less precipitation on the north side of the Alaska Range than on the south. This can be documented through weather records but is clearly evident by the lack of glaciers on the north side when compared with the south side. Since viewing of the mountain is of paramount importance, this aspect cannot be overlooked when establishing park facilities, nor should the North or South facilities be exclusive, both offer differing experiences making improvements not an either/or decision but rather one of establishing priorities.

It should also be recognizied that the Park is such a major attraction that constructing additional facilities will not provide a proportional increase in capacity as visitors will elect to extend their stay to experience all that is offered.

Issues and Strategy

Establishing a northern access will require careful planning and is subject to stipulations established in the National Interest Lands Act as well as the National Environmental Protection Act of 1969. It will be subject to critical review, organzied environmental and philosophical opposition.

Provision has been made in the National Interest Lands Act to mandate access deccision on a timely basis. When the environmental document is officially started a time frame also starts. This is an advantage, if the State has the project well in order. However, it can be a detriment if the State is unprepared to deal with all the issues that may surface, resulting in a decision that may not be in the best interest of the State. If that should occur, the ability to appeal is limited and the State may be required to began the process all over. Because of this, it is important that the DOTPF ensure that

all interested enities are involved, all issues identified and all decision making agencies be as much in accord as possible prior to starting the clock.

This can be accomplished by adding a preliminary phase to the normal location phase of a project. Generally the location report and environmental document are prepared at the same time. In this case it is recomended that the DOTPF prepare a draft location report and in so doing identify and resolve all issues with decision making agencies to gain as much of a consensus as possible, then begin the environmental document. The location report would be finalized concurrent with developing the environmental document.

Project description

Access to Kantishna via the north has three major alternatives, they are:

1. Via the Stampede trail to Stampede then through foot hills to Kantishna.

2. Via the old sled trail leaving the Parks Highway near Rex.

3. Via the proposed Nenana Agriculture access road to the Kantishna River then upriver to Kantishna (note, the route to the Kantishna River is already designed).

It is premature to speculate on which alternate is the most attractive. All have attractive aspects. Some have already been investigated to some degree and some aerial photographs are available. It is conceivable that the final routing will be a combination of these.

The road itself will be a major highway and probably have to be widen to four lanes by the year 2020. Initially it should be paved with two 12' lanes and 8' shoulders. Alignment and grade should be designed for 55 mph and should take advantage of the scenic opportunties. The road should be designed and classified as a State

Scenic Route.

Funding

Immediate funding needs are for the location phase. During that phase the merits of the project will be documented, standards adopted, an alignment chosen and preliminary costs developed. The project will have location approval with authority to design and construct or it will be determine to be in the best interest of the State or Nation not to proceed.

Because of the sensitive nature of the project the DOTPF should allow ample lead time and funding to ensure that location documents will stand up to close scrutinity. At this time the cost to accomplish this is estimated at $500,000 with a time frame of three years.

This work entails field surveys aerial photography, research, conceptal design, economic analysis, comparsion of alternatives, indepth agency coordination and public involvememt. The completed product will include:

-approved environmental impact statement with 4(f) determination

-approved location study report

-certified location public hearing documents

-draft soils report

-location approval.

Westours

Senator Jack Coghill, Chairman
Senate Transportation Committee
ALASKA STATE LEGISLATURE
Pouch V
Juneau, AK 99811

Dear Senator Coghill:

I have read your Senate Bill #49 and agree wholeheartedly that now is the time to agressively pursue the development of a road to Kantishna. Mt. McKinley is one of Alaska's greatest assets, however, many people have a disappointing experience in the Park because of inadequate facilities and limited viewing opportunities. Although we will never be able to guarantee a view of the mountain, increased access and facilities would provide us with an increased opportunity to satisfy the Alaska visitors.

We greatly appreciate your interest in this vital segment and fully support the efforts to begin this project.

If we can be of any further assistance please let me know.

Sincerely,

Thomas C. Tougas
Vice President

March 4, 1985

MAR 4 1985

The Honorable Jack Coghill
Chairman
Senate Transportation Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Coghill:

The Office of Mineral Development has reviewed SB 49 calling for a feasibility study on building the Kantishna access highway.

The Kantishna area has long been recognized for its substantial gold resource. Numerous mining claims have been patented. In addition to gold, significant deposits of strategic metals such as tungsten and antimony have been discovered in the area. With access, the region has much enhanced potential to become once again a significant productive mining region.

Currently, traffic on the Denali Park road is restricted by the National Park Service which severely limits mining activity at Kantishna. This restriction also limits Alaska's rapidly growing visitor industry. Access would allow entry to Denali National Park to many more people now unable to visit because of the severe travel restrictions in effect on the Denali Highway. The Kantishna access would enable firms in the travel industry to construct additional hotels and visitor facilities on privately held land at Kantishna. Additionally, it would greatly facilitate the expanded used of the Stampede Mine as a training property for mining students from the University of Alaska.

Of the three alternative routes being considered, this office supports the Old Stampede Road route. This is the shortest of the options being considered. It makes use of a long established trail to Stampede and requires a relatively short extension through the foothills connecting Stampede to Kantishna.

Sincerely,

John F. M. Sims

OFFICE OF THE COMMISSIONER

January 28, 1985

Re: SB 49; Feasibility of Building a Road to Kantishna

A road to Kantishna would have two major economic advantages. First, it would provide a northern access for tourists into Denali Park. The Interior Transportation Study estimates that within twenty years such an access could generate 5,000 vehicles a day in the summer months. Secondly, the road would provide access for mining in the Kantishna area, and possible future extension to the Kuskokwim Valley.

The possible benefits to be derived from this project compare favorably with other major system extensions, such as extension of Chena Hot Springs Road to Twin Mountain, construction of a road to the Slate Creek asbestos deposit or a major rail extension.

Provided we receive the cooperation of the National Park Service, the feasibility study through location approval is expected to take about 27 months to complete. Because of this timeframe, we recommend that the lapse date be extended to June 30, 1987.

The amount of $500,000 for the study is adequate.

The Honorable Frank Murkowski, Stevens Young
317 Hart Building
Washington, D.C. 20510

Dear Frank:

During this legislative session, the Senate Transportation Committee, of which I am chairman, has considered a proposal to construct a Kantishna access road north of the Alaska Range to connect the Kantishna area with the Parks Highway.

Our State's most popular tourist attraction, the viewing of Mt. McKinley, has disappointed many tourists because inclement weather conditions prevent adequate viewing of the mountain. Summer tourists plan well in advance to visit our great state and the continent's highest mountain. According to Denali Park officials over 50% of the visitors do not even get a glimpse of Mt. McKinley because crowded conditions on the park road and at park facilities do not allow them to stay until the weather clears.

The proposed highway will help solve this problem by providing access to many excellent viewpoints of the mountain. The road will also allow access to private property in the area which can be used by individuals for the construction of new hotels and tourist facilities. Tourists can then be assured of a more satisfying visit to the park, and therefore, a more pleasurable trip to Alaska.

I have received correspondence from a variety of interested groups, including private tour groups and the Alaska State Division of Tourism recognizing the need to develop this project.

Tourism is Alaska's second largest industry. In light of the State's declining oil revenues, it seems prudent to me that we invest in this growing sector.

The proposed road to Kantishna would not only have positive effects on the Denali National Park and Alaska's tourist industry, it would also benefit the mining industry.

The Alaska Miners Association and its 2000 members have extended their support. Many rich mineral deposits are being worked - or have been identified - in the Kantishna area, and the existing access road is limited for miners to certain nighttime hours in the summer.

Presently, mining trucks cannot compete with tour buses which use the road all day long. A new highway will solve this problem and should enable further mining development.

The agriculture industry will also share the benefits of construction of a highway. Rich agricultural land exists in the area. Easy access to these lands will be of value.

The Department of Transportation and Public Facilities is in the process of adopting a five-year plan to answer our highway problems. Construction of the Kantishna Highway is part of that answer; particularly when we consider the growing pressure of visitors on Denali and the pivotal role such a road would play. Federal funding will be necessary to study and implement this project. I urge you to consider the construction of the Kantishna Access Highway and look forward to your reply.

Enclosed with this letter is a synopsis of the Kantishna Access Highway and various correspondence in support of this proposal.

Sincerely,

Jack

IN REPLY REFER TO:

A22(ARO-SA)

February 13, 1985

FEB 19 1985

Honorable Jack Coghill
Alaska State Senate
Pouch V
Anchorage, Alasks 99811

Dear Senator Coghill:

We appreciate your request for our review and comments on Senate Bill 49 and the accompanying report and route map.

As you recognize, Denali National Park and Preserve is a major resource and asset to both the State of Alaska and the nation. I believe it is incumbent upon all of us at the state and federal levels to work together to assure that the experience for the visitor is enjoyable and that the wildlife and other resources of the park are preserved.

We agree with and support the goal of improving the visitor's experience. However, it would be inappropriate for the National Park Service to take a position on the proposed bill to appropriate $500,000 for a state feasibility study of a northern access route. As your study recognizes, the Alaska National Interest Lands Conservation Act (ANILCA) and the National Environmental Policy Act set forth procedures for analysis and consideration which must be followed before any decision to allow access across a national park. Title XI of ANILCA sets forth the process for reviewing and permitting construction of a new access route.

The quality of the visitor's experience in Denali National Park has been a major concern within our organization. As you know, we are currently in the process of designing a new visitor access center near the park headquarters and we will soon be contracting with another local firm for the design of the reconstruction of Denali Park Hotel. Recommended budgeting for these two projects totals $14.2 million. In addition approximately $15 million is programmed for improvements on the Denali Park Road.

A draft general management plan for Denali National Park will be released in March for public review and comment. This plan invites public comment on alternattive ways of improving the visitor's experience while preserving the wildlife and natural features which they come to see. As soon as it is available we will send copies of this draft plan to you and members of the Senate and House Resources Committees. We would very much appreciate your thoughts and recommendations.

This summer we will also be working with the State Department of Natural Resources and the Department of Transportation and Public Facilities under a cooperative agreement to investigate the possibilities for developing visitor access and facilities on the south side of the Alaska Range. We were pleased to note that your report recognizes that development on the north and south sides is not an either or situation, and that the south side development would offer visitors a different experience in a landscape which is much in contrast to that of the north. Further, it is important to distribute the points of access to the natural resources of the Mt. McKinley massif so that they are readily accessible from both Anchorage and Fairbanks. We will keep you informed of the results of this cooperative study and look forward to your comments.

Sincerely,

Regional Director
Alaska Region

February 25, 1985

The Honorable Jack Coghill
Chairman
Senate Transportation Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Coghill:

Since statehood, Denali National Park and majestic Mt. McKinley have been one of Alaska's major travel attractions. A recent research report released by our Division of Tourism and compiled by the Department of Labor entitled "Alaska Traveler Survey and Visitor Industry Analysis 1983" shows that more than 70 percent of summer highway pleasure visitors indicated they had visited Anchorage and Fairbanks and 60 percent of these visitors reported they had visited Mt. McKinley/Denali.

Certainly a growing need for access into and through the park suggests that alternative access be explored. The legislation you have proposed in SB 49 calling for a feasibility study of building the Kantishna Access Highway would be a step in this direction.

Because traffic to the park continues to grow and considering the time needed to conduct a feasibility study, the sooner the necessary engineering and cost information is compiled, the sooner our State can move to have some control over the traffic flow to this unique vacation destination. The more visitors who can view the mountain and enjoy our wildlife, the more who will return home with an unequalled vacation experience.

Best regards,

Don Dickey
Director

DEPARTMENT OF FISH AND GAME

OFFICE OF THE COMMISSIONER

P.O. BOX 3-2000
JUNEAU, ALASKA 99802
PHONE: 907 / 465-4100

February 26, 1985

Mr. John Manly
Committee Aide
Senate Transportation
Committee
c/o Senator Coghill
Alaska State Senate
Pouch V
Juneau, AK 99811

Dear Mr. Manly:

This letter is in response to your request dated February 9, 1985, that the department prepare a brief statement on the fish and wildlife values and potential impacts associated with an extension of the state highway system to Kantishna via three alternative routes from the Parks Highway. It is our understanding that the three alternatives under consideration include access:

1. Via the Stampede Trail to Stampede then through the foothills to Kantishna;

2. Via the Rex Trail to the Kantishna River then upriver to Kantishna;

3. Via the proposed Nenana-Totchaket Agriculture access road to the Kantishna River then upriver to Kantishna.

Our Habitat Division has performed a review of the alternatives. An abbreviated summary of the fish and wildlife values and the department's recommendations relative to the three alternative routes follows.

Alternative #1 - Stampede Trail: Wildlife values adjacent to this route are moderate to high in importance. Black bear, grizzly bear, moose, caribou, and a variety of furbearers are present. Dall sheep are present along the north flank of the Alaska Range to the immediate south. The McKinley Caribou Herd historically utilized this area as prime overwintering and limited calving habitat. Although population abundance is currently low, an expansion of the herd size will necessitate use of this historic range. The

proposed route also transects important moose fall and winter concentration areas. Recreational and subsistence use is moderate and occurs predominately along the Stampede Trail. Trapping intensity is moderate to heavy.

Alternative #2 - Rex Trail: Fish and wildlife values adjacent to this route are moderate to high in importance. Black bear, grizzly bear, moose and a variety of furbearers are present in moderate numbers throughout most of the area. Significant populations of these species, however, are present within the Nenana, Teklanika, Toklat, and Kantishna River riparian corridors. Recreational and subsistence use is moderate to heavy within these river corridors. Human use outside of these corridors is limited.

The portions of the upper Kantishna River and Bearpaw River drainages affected by this route are considered critical waterfowl habitat areas, providing nesting and molting habitat for high concentrations of several species of waterfowl and stopover sites for cranes and other species that utilize the western Interior.

The Toklat River Springs located at the confluence of the Toklat and Sushana Rivers supports the largest known population of fall chum salmon in Alaska and is estimated to contribute 27% of the commercial and subsistence fall chum salmon harvest in the Yukon and Tanana River fisheries downstream from the mouth of the Kantishna River. The spring's area also supports a small population (500-600) of overwintering mallards which is believed to be the northern-most freshwater waterfowl wintering area in North America. The Toklat River Springs' fall chum salmon spawning area is considered critical habitat and has been nominated for legislative designation.

Alternative #3 - Totchaket Agriculture Access Road and Extension: Based upon the limited data presently available, most of the area adjacent to this route appears to have moderate to low fish and wildlife habitat value. Recreational hunting, subsistence use and trapping also appear to very light in the area. There are no critical habitat areas yet identified. From the standpoint of potential impacts, the department's primary concerns are related to those portions of the route which are (1) adjacent to the Kantishna River (which is a designated anadromous fish stream) or (2) require crossings of resident fish streams. Rather than influencing route selection, these concerns are normally addressed by the department, via its AS 16 authorities, through the provision of adequate mitigating measures as a component of route design and construction.

Recommendations: From the sole standpoint of minimizing impacts to fish and wildlife or their habitats, the department prefers that any extension of the state highway system to Kantishna be aligned along the Alternative #3 - Nenana-Totchaket Agriculture Access Road and Extension route.

The department appreciates the Senate Transportation Committee's solicitation of our concerns and recommendations. We remain available to provide additional information as may be needed.

Sincerely,

James Ayers
Special Assistant to
the Commissioner

PART II: INTERIOR SYSTEM EXTENSIONS

Kantishna Extension

The Kantishna Extension could be a highway located along the north flank of the Alaska Range connecting the Kantishna area with the Parks Highway in the area of Anderson or Nenana.

The Kantishna extension should be on the drawing board and ready to be developed into a linkage loop road. A great deal of thought should be given to having this linkage road take-off from the proposed Nenana Agriculture roads. This road can serve at least three industries in the State and give people of our State more access to our lands.

Tourism

Mt. McKinley is Alaska's number one tourist attraction. The demand to see Mt. McKinley has grown dramatically in the past ten years going from less then 100,000 annual visitors to over 300,000, all of which are accommodated during the tourist season. The existing road that goes through Denali National Park back to Wonder Lake, which is in the Kantishna area, is inadequate to accommodate the traffic demands. As a result, users are severely restricted. This restriction stems not only from safety considerations but also to retain the wildlife viewing opportunities that are available along this route. There have been a number of bus accidents on this road which testifies to its inadequacy from a safety standpoint. Because of the imposed restrictions, those wishing to see McKinley must ride a tour bus or shuttle bus back to the more spectacular viewing points--a ride that often takes as much as five hours. Throughout this ride they are treated to magnificent scenery and excellent wildlife viewing opportunities. Too often visitors are unable to view the mountain itself because of the weather conditions at the time they are there. Park officials estimate that the mountain is obscured by clouds more than 50 percent of the time.

No doubt there are many disappointed visitors as well as uncomfortable ones who have endured the round trip. Those older visitors and younger ones with small children can find this exceedingly difficult.

The dilemma that is presented to the Park Service is how can all the visitors be transported back to a viewing vantage point in a comfortable manner and still retain the wildlife viewing opportunities that now exist. There are basically three options. One is to upgrade the existing road within the park. This option would be extremely expensive because of the mountainous terrian that the road traverses, notably that area through Polychrome Pass. An upgraded roadway would also tend to reduce the wildlife viewing opportunities. A second alternative would be to add more shuttle and tour buses, but even this alternative would call for some upgrading to the existing road and would adversely effect wildlife viewing as well. For these reasons, the Park Service is concerned about adding more buses to accommodate the anticipated visitor growth. A third alternative would be to create another viewing vantage point for the mountain. The Park Service has considered this as well. Their concept would be to provide another viewing area on the south flank of the Alaska Range. They have not considered one on the north flank. The Interior Transportation Study (ITS) suggested that the north flank has high potential. The south flank concept would essentially be single purpose. Visitors would drive in and return, probably from the Parks Highway south of Cantwell. There would still be a demand for wildlife viewing and those wishing this service would have to take the tour on the existing park road and return, perhaps a ten hour round trip or longer.

A vantage point on the north side in the vicinity of the Kantishna area and served by a well designed highway, leaving the Parks Highway somewhere between Nenana and Healy, would have some apparent advantages over a southern concept. The weather on the north side of the range is better than on the

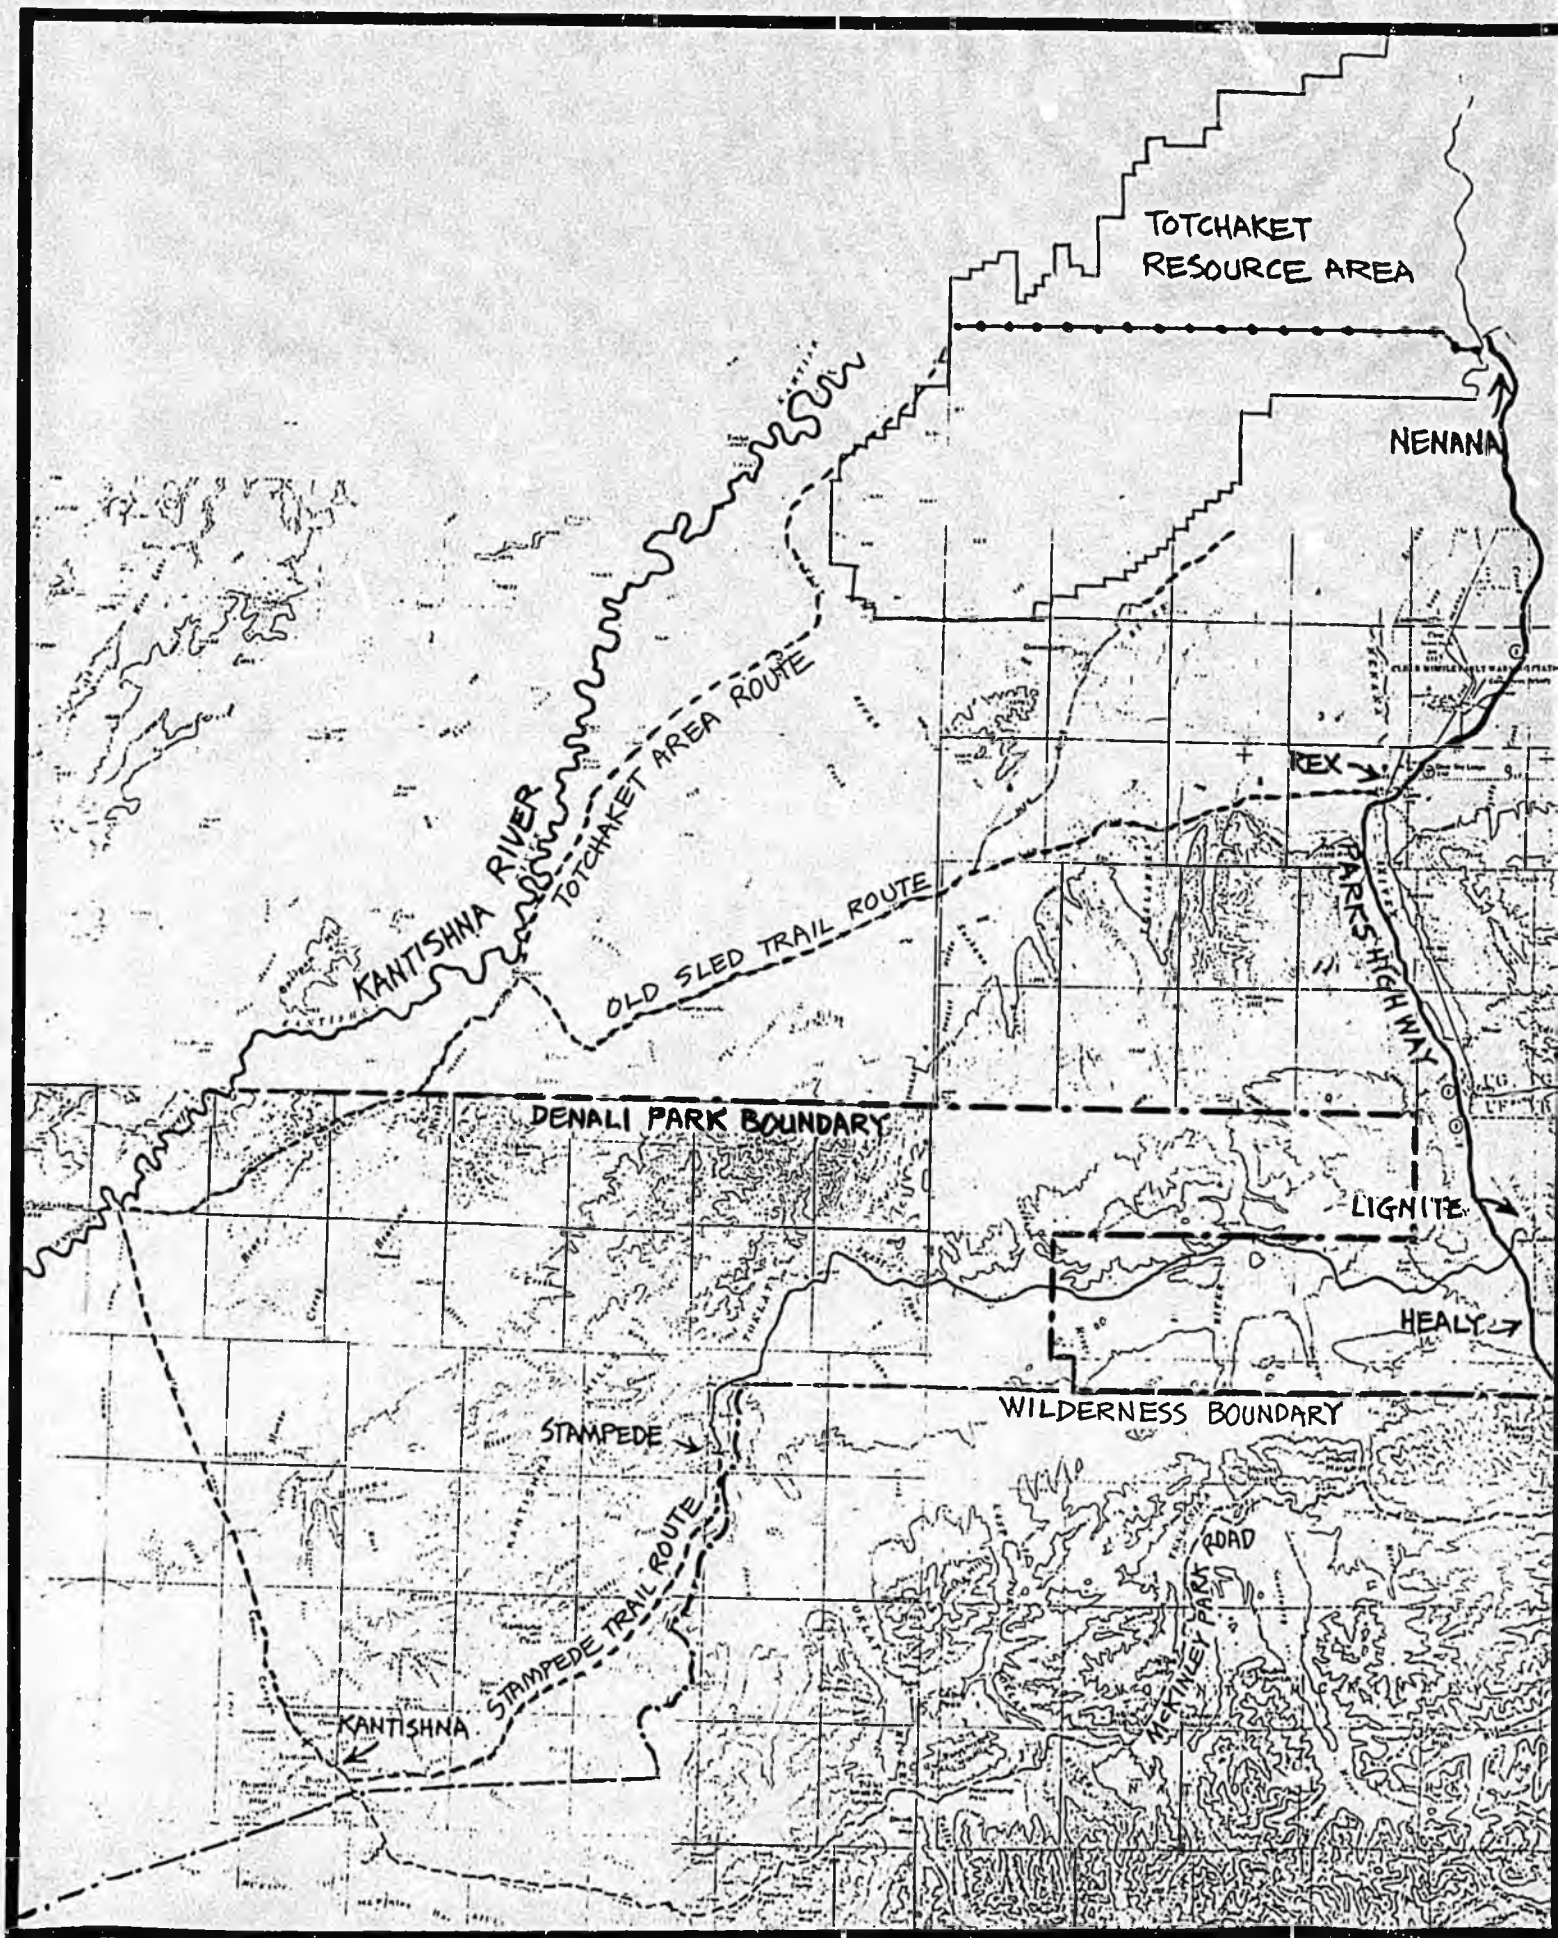
south side. It would seem prudent that a vantage point would recognize the number of clear days before making a decision. The Kantishna area has numerous patented mining claims which would be available for private entrepreneurs to construct hotels and other visitor accommodations. Tourists would then have a greater opportunity to view the mountain in all its awesome splendor because they would be based at the viewing vantage point rather than being transported to one for only a few hours. Under this concept the existing park road could be closed to all but wildlife tours and tour buses; thus creating an opportunity for taking different groups each direction.

Mining

In addition to tourism and recreational travel, a highway into the Kantishna area would serve the mining industry. Currently there are ten active gold mines in the area and significant known reserves of antimony as well as deposits of lead, silver, zinc and tungsten. The importance of this area as a mineral district has been recognized in the Alaska National Interest Lands Act which mandated a study of the impact of mineral development on other resources in the Denali National Park and Preserve. A highway would serve the existing miners as well as encouraging new ventures into this mineral rich area. Presently miners must travel the existing park road by permission of the Parks Service and are restricted to certain hours of operation. This would be unnecessary under the proposed extension.

In addition to the above, this proposed highway extension could be further extended into the McGrath area, also known for mining. The corridor has also been recognized as one which will be needed in Alaska's future. An additional linkage possibility would be to connect the McGrath extension to the road between Ruby and Poorman. Such a connection would provide additional road access to the Yukon River.

SB 49 - STUDY ROUTES



ALASKA MINERS ASSOCIATION, INC.

509 W. Third Ave., Suite 17, Anchorage, Alaska 99501 (907) 276-0347

March 8, 1985

MAR 11 1985

The Honorable John B. Coghill
ALASKA STATE LEGISLATURE
Pouch V (MS 3100)
Juneau, Alaska 99811

Dear Senator Coghill:

On behalf of the Alaska Miners Association and its 2000 members, I wish to extend our support for SB 49 and SJR 10 which you have sponsored.

Access to the resources of the public lands in Alaska is essential if we are to achieve the economic and social benefits of living here. It is essential that the State assert its right to access those resources and RS 2477 is the vehicle by which that can be achieved. AMA wholeheartedly supports you in your efforts to cause that to happen.

We also support your efforts on the Kantishna Road. As you may know, a recent cursory mineral inventory of that area showed much greater mineralization than had been previously known to exist.

We recently contacted the Park Service for information on inholder and commercial traffic through the Park which might be alleviated by the Kantishna Road. According to their records, there are currently 322 permits for personal use by inholders and an additional 300 permits for oversized vehicles. This is a significant amount of traffic through the Park that could be reduced by the Kantishna Road. Of course there are the additional benefits of access to the other values of the Park by others users via the Kantishna.

The Alaska Miners Association appreciates your efforts on these two matters and supports them.

Sincerely,

ALASKA MINERS ASSOCIATION

James R. Jinks
Executive Director

DESCRIPTION OF THE ALTERNATIVES

INTRODUCTION

The Kantishna Hills study area encompasses approximately 196,500 acres and is located near Wonder Lake north of the former Mount McKinley National Park boundary in a group of rugged low lying hills known as the Kantishna Hills.

Currently, in the Kantishna Hills study area there are 179 unpatented placer claims, 92 unpatented lode claims, 2 patented placer claims, and 37 patented lode claims recorded with the Bureau of Land Management (see Recorded Claims - Kantishna Hills Study Area map). These 310 claims cover approximately 6,960 acres, the majority of which are located in the southern half of the study area.

Additionally, there are 20 unpatented placer claims covering approximately 400 acres located on Moose Creek that are actually located outside the study area boundary; they comprise a portion of a contiguous claim group on Moose Creek recorded with BLM, the remainder of which lies within the study area. For purposes of this DEIS, they are included in the analysis.

Of the total, 14 claims including 2 unpatented placer claims, 7 unpatented lode claims, 2 patented placer claims, and 3 patented lode claims, are located in the northeastern portion of the study area and comprise the Stampede Mill and mines complex. These claims are currently being managed for educational purposes under the 1979 memorandum of understanding between the University of Alaska and the National Park Service. The memorandum provides that the Stampede area be used for educational rather than commercial purposes.

In summary, the total area covered by recorded claims associated with the Kantishna Hills study area is 7,360 acres or 3.7 percent of the study area.

The Dunkle Mine study area, which includes the historic coal mine complex, encompasses approximately 22,400 acres and is located south of the Alaska Range and east of the West Fork of the Chulitna River near Broad Pass. Currently, there are 142 unpatented lode claims recorded with BLM that are located in the Dunkle Mine study area, covering approximately 2,840 acres. There are 8 recorded unpatented placer claims located partially within the study area and 1 recorded unpatented placer claim (part of the same claim group) located outside the study area boundary. These claims cover approximately 180 acres. For purposes of this DEIS, the single claim located outside the study area boundary is included in the analysis. There are no patented claims in this study area. The total area covered by recorded claims associated with the Dunkle Mine study area is 3,020 acres or 13.5 percent of the study area (see Recorded Claims- Dunkle Mine Study Area map).

Kantishna Hills

Refer to the Alternative 2 map for the Kantishna Hills study area for the location of claims affected under this alternative.

Claims Affected Under Alternative 2:

185 unpatented placer claims	-	4,460 acres
5 unpatented lode claims	-	100 acres
34 patented lode claims	-	680 acres
224 total claims		5,240 acres

Assumptions for Alternative Formulation and Analysis:

The 5 recorded unpatented lode claims and 185 unpatented placer claims assumed valid would pass validity examination and be acquired.

The 2 placer claims on Slate Creek, 10 placer claims on Spruce Creek, and the 80 unpatented lode claims assumed invalid would not be acquired.

Stampede claims would be developed under NPS/University of Alaska memorandum of understanding--claims would not be acquired.

Placer mining effects in alternative 1 would not occur in alternative 2.

Lode mining effects in alternative 1 would not occur in alternative 2.

Dunkle Mine

Refer to the Alternative 2 map for the Dunkle Mine study area for the location of claims affected under this alternative.

Claims Affected Under Alternative 2:

9 unpatented placer claims - 180 acres

Assumptions for Alternative Formulation and Analysis:

Placer Mining Effects Assumptions

Placer mining effects in alternative 1 would not occur in alternative 2.

Alaska Environmental Lobby, Inc.

204 N. Franklin St. Suite 3

Position Paper on Kantishna Road Feasibility Study SB 49

SB 49 provides for a $500,000 appropriation for a feasibility study of building the Kantishna Road. All of the proposed routes would cross through Denali National Park whose boundaries were expanded by the Alaska National Interests Lands Conservation Act of 1980. Mt. McKinley National Park was established in 1917 to preserve one of the most spectacular populations of large mammals in North America. The boundaries were expanded in 1980 to afford protection of those populations that were dependent on an ecosystem that extended beyond the original boundaries.

The construction of a four lane highway over any of the proposed routes of SB 49 would be extremely destructive to park wildlife populations. In the Environmental Impact Statement done for the Kantishna Hills-Dunkle Mine Study it was concluded that the development of the Stampede/Kantishna Road would cause excessive disturbance and reduction of large mammal populations and result in reduced wildlife viewing in other sections of the park. The study also found that:

* * One of the largest populations of moose use the Clearwater Creek drainage and such development of the Kantishna Road would cross that drainage causing damaging disturbance
* * The road would cross the Toklat River wolf range, reducing wolf activity and bringing disturbance closer to denning and activity sites. Wolves are very intolerant of human disturbance. The mysterious disappearance of the Toklat wolf pack in 1983 was attributed to the probability that they traveled up to the Stampede Road where they were trapped.
* * Caribou use the Kantishna Hills and Moose Creek for rutting and prerutting activity while the Stampede area is one of the major calving areas of an already unstable herd. Further disturbance of the herd especially during calving time would be detrimental to their survival.
* * Development of the Kantishna area could lead to both black and brown bears being attracted to the area if facilities do not have adequate garbage disposal. This in turn would lead to the relocation or destruction of problem bears, thus removing one of the most popular animals viewed by visitors to Denali National Park.

Because of the potential damage the construction of a major highway over any of the proposed routes would do to Denali wildlife populations, the Alaska Environmental Lobby opposes any appropriation for a feasibility study for the construction of Kantishna Road.

February 6, 1985

Senator Jack Coghill
Chairman of the Senate Transportation Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Coghill:

I appreciated the opportunity to present the Kantishna highway project to the Senate Transportation Committee. I am writing this letter in response to some of the questions that arose during my presentation.

1. Could federal highway funds be used to fund this reconnaissance effort, essentially reducing the State monies to that required to match federal highway monies? The answer is yes. The funding amount would be approximately five percent (5%) or $25,000.
2. What is the mechanism whereby the State may construct roads through National Interest Lands? I have included that information as an attachment to this letter.
3. Should not the National Park Service and other interested agencies be approached prior to this project in order to get their approval? The National Park Service has been approached a number of times regarding this project. I believe their position at this time is one that neither approves nor disapproves. In their analysis of the mining potential in the Kantishna area (which they confirmed as substantial) this access scenario was described as one way to serve the mining industry. No position was taken. At this time, it is premature to expect a writeoff of this concept. This does not mean that these agencies are categorically opposed to the concept. There are many questions that need to be answered before any sort of concensus can be had. The location phase of a project is the time these issues are resolved. As an example, of the three basic routes, only one may be acceptable from an environmental standpoint. It takes the location phase analysis to make this determination.

The important considerations from the State's viewpoint at this time are that this proposed project will require the National Park Service to address current, critical access problems. It also gives the State a strong voice in resolving these problems. The process established by the D-2 legislation assures that these problems will be addressed within a short time frame.

I would like to add a bit of personal philosophy to this letter. At one time I enjoyed making the trip on the Park Road to Wonder Lake. I have not done this in the past 15 years. The reason for this is that it is no longer very attractive to me. In order for me to travel the Park Road I must make reservations well in advance and my summers are not that well planned. In addition, it may be heavily overcast and raining during that time. The heavy commercial traffic along the existing Park Road, coupled with the poor condition of that road, make the drive a frustrating one at any rate. As a result, I--and I'm sure many other railbelt residents--do not take advantage of living in close proximity to Denali because of the inconvenience. This project would be very attractive and result in more spontaneous use by Alaskan residents. I believe this extra use would be significant.

It disturbs me at great deal when officials are reluctant to address a serious problem because the Park Service is perceived as a formidable opponent particularly when a logical solution to a serious problem exists.

It is important to keep in mind that tourism is our second largest industry and oil revenues are declining as a result of both lower prices and declining resources. Investment in our second largest industry that is growing and renewable seems prudent.

Sincerely,

Bob C. Thomas

Bob C. Thomas, P.E.

To the maximum [e]xtent practicable, the Secre[tary] shall consult [and] exchange inf[orma]tion with the State of Alaska [re]garding the re[s]ponsibilities of [the] Secretary under this section [a] similar pro[g]rams undertaken by the State. In order to carry ou[t] mineral asse[ss]ments authorized under this or any other law, incl[u]ding but no[t] limited t[o] the National Uranium Resource Evaluation [P]rogram, t[he] Secretary shall allow for access by air for assessment act[ivi]ties per[mi]tted in this subsection to all public lands involved in such study. [He] shall consult with the Secretary of Energy and heads of o[th]er Federal agencies carrying out such programs, to determine such re[a]sonable requirements as may be necessary to protect the resources of [the] land, including fish and wildlife. Such requirements may prov[ide] that access will not occur during nesting, calving, spawning or [at] other times as fish and wildlife in the specific area may be [e]specially vulnerable to such activities. The Secretary is authori[zed] to enter into contracts with public or private entities to carry o[ut] [a] portion of the mineral assessment program. This sect[ion] sha[ll] not apply to the lands described in section 1001 of this [Act].

(b) REGULATIONS.—Activiti[es] carried [out] in conservation system units under subsection (a) s[hall] be subject [to] regulations promulgated by the Secretary. Such r[egu]lations shall [en]sure that such activities are carried out in an en[vi]ronmentally so[und] manner—

(1) which does [not] result in last[ing] environmental impacts which appreci[ably] alter the natur[al] character of the units or biological or ecological systems in th[e] units; and

(2) which [are] compatible with the p[ur]poses for which such units are estab[lis]hed.

EFFECT OF TITLE

SEC. 1103. Except as specifically provided for in this title, applicable law shall apply with respect to the authorization and administration of transportation or utility systems. 16 USC 3163.

PROCEDURAL REQUIREMENTS

SEC. 1104. (a) IN GENERAL.—Notwithstanding any provision of applicable law, no action by any Federal agency under applicable law with respect to the approval or disapproval of the authorization, in whole or in part, of any transportation or utility system shall have any force or effect unless the provisions of this section are complied with. 16 USC 3164.

(b)(1) CONSOLIDATED APPLICATIONS.—Within one hundred and eighty days after the date of enactment of this Act, the Secretary, the Secretary of Agriculture, and the Secretary of Transportation, in consultation with the heads of other appropriate Federal agencies, shall jointly prescribe and publish a consolidated application form to be used for applying for the approval of each type of transportation or utility system. Each such application form shall be designed to elicit such information as may be necessary to meet the requirements of this title and the applicable law with respect to the type of system concerned.

(2) For purposes of this section, the heads of all appropriate Federal agencies, including the Secretary of Transportation, shall share decisionmaking responsibility in the case of any transportation or utility system described in section 1102(4)(B) (ii), (iii), or (vii); but with respect to any such system for which he does not have programmatic responsibility, the Secretary of Transportation shall provide to the other Federal agencies concerned such planning and other assistance as may be appropriate.

(c) FILING.—Each applicant for the approval of any transportation or utility system shall file on the same day an application with each appropriate Federal agency. The applicant shall utilize the consolidated form prescribed under subsection (b) for the type of transportation or utility system concerned.

(d) AGENCY NOTICE.—(1) Within sixty days after the receipt of an application filed pursuant to subsection (c), the head of each Federal agency with whom the application was filed shall inform the applicant in writing that, on its face—

(A) the application appears to contain the information required by this title and applicable law insofar as that agency is concerned; or

(B) the application does not contain such information.

(2) Any notice provided under paragraph (1)(B) shall specify what additional information the applicant must provide. If the applicant provides additional information, the head of the Federal agency must inform the applicant in writing, within thirty days after receipt of such information, whether the information is sufficient.

(e) ENVIRONMENTAL IMPACT STATEMENT.—The draft of any environmental impact statement required under the National Environmental Policy Act of 1969 in connection with any application filed under this section shall be completed, within nine months from the date of filing, by the head of the Federal agency assigned lead responsibility for the statement. Any such statement shall be jointly prepared by all Federal agencies with which the application was filed under subsection (c). The final environmental impact statement shall be com- 42 USC 4321 note.

continuous decisionmaking process involving the State and Federal Governments and the public;

(b) the existing authorities to approve or disapprove applications for transportation and utility systems through public lands in Alaska are diverse, dissimilar, and, in some cases, absent; and

(c) to minimize the adverse impacts of siting transportation and utility systems within units established or expanded by this Act and to insure the effectiveness of the decisionmaking process, a single comprehensive statutory authority for the approval or disapproval of applications for such systems must be provided in this Act.

DEFINITIONS

16 USC 3162.

SEC. 1102. For purposes of this title—

(1) The term "applicable law" means any law of general applicability (other than this title) under which any Federal department or agency has jurisdiction to grant any authorization (including but not limited to, any right-of-way, permit, license, lease, or certificate) without which a transportation or utility system cannot, in whole or in part, be established or operated.

(2) The term "applicant" means any public or private person, including, but not limited to, any Federal department or agency.

(3) The term "Federal agency" means any Federal department or agency that has any function or duty under applicable law.

(4)(A) The term "transportation or utility system" means any type of system described in subparagraph (B) if any portion of the route of the system will be within any conservation system unit, national recreation area, or national conservation area in the State (and the system is not one that the department or agency having jurisdiction over the unit or area is establishing incident to its management of the unit or area).

(B) The types of systems to which subparagraph (A) applies are as follows:

(i) Canals, ditches, flumes, laterals, pipes, pipelines, tunnels, and other systems for the transportation of water.

(ii) Pipelines and other systems for the transportation of liquids other than water, including oil, natural gas, synthetic liquid and gaseous fuels, and any refined product produced therefrom.

(iii) Pipelines, slurry and emulsion systems and conveyor belts for the transportation of solid materials.

(iv) Systems for the transmission and distribution of electric energy.

(v) Systems for transmission or reception of radio, television, telephone, telegraph, and other electronic signals, and other means of communication.

(vi) Improved rights-of-way for snow machines, air cushion vehicles, and other all-terrain vehicles.

(vii) Roads, highways, railroads, tunnels, tramways, airports, landing strips, docks, and other systems of general transportation.

Any system described in this subparagraph includes such related structures and facilities (both temporary and permanent) along the route of the system as may be minimally necessary for the construction, operation, and maintenance of the system. Such related structures and facilities shall be described in the application required by section 1104, and shall be approved or disapproved in accordance with the procedures set forth in this title.

pleted within one year from the date of such filing. Such nine-month and one-year periods may be extended for good cause by the Federal agency head assigned lead responsibility for the preparation of such statement if he determines that additional time is necessary for such preparation, notifies the applicant in writing of such determination, and publishes notice of such determination, together with the reasons therefor, in the Federal Register. The provisions of section 304 of the Federal Land Policy and Management Act of 1976 shall apply to each environmental impact statement under this subsection in the same manner as such provisions apply to applications relating to the public lands referred to in such section 304. The Federal agency assigned lead responsibility shall, in conjunction with such other Federal agencies before which the application is pending, hold public hearings in the District of Columbia and an appropriate location in the State on each draft joint environmental impact statement and the views expressed therein shall be considered by all Federal agencies concerned before publication of the final joint environmental impact statement.

43 USC 1734.

(f) OTHER VIEWS.—During both the nine-month period, and the succeeding three-month period plus any extension thereof provided for in subsection (e), the heads of the Federal agencies concerned shall solicit and consider the views of other Federal departments and agencies, the Alaska Land Use Council, the State, affected units of local government in the State, and affected corporations formed pursuant to the Alaska Native Claims Settlement Act, and, after public notice, shall receive and consider statements and recommendations regarding the application submitted by interested individuals and organizations.

(g) AGENCY DECISION.—(1) Within four months after the final environmental impact statement is published in accordance with subsection (e) with respect to any transportation or utility system, each Federal agency shall make a decision to approve or disapprove, in accordance with applicable law, each authorization that applies with respect to the system and that is within the jurisdiction of that agency.

(2) The head of each Federal agency, in making a decision referred to in paragraph (1), shall consider, and make detailed findings supported by substantial evidence, with respect to—

(A) the need for, and economic feasibility of, the transportation or utility system;

(B) alternative routes and modes of access, including a determination with respect to whether there is any economically feasible and prudent alternative to the routing of the system through or within a conservation system unit, national recreation area, or national conservation area and, if not, whether there are alternative routes or modes which would result in fewer or less severe adverse impacts upon the conservation system unit;

(C) the feasibility and impacts of including different transportation or utility systems in the same area;

(D) short- and long-term social, economic, and environmental impacts of national, State, or local significance, including impacts on fish and wildlife and their habitat, and on rural, traditional lifestyles;

(E) the impacts, if any, on the national security interests of the United States, that may result from approval or denial of the application for a transportation or utility system;

(F) any impacts that would affect the purposes for which the Federal unit or area concerned was established;

(G) measures which shou[illegible] b
egative impacts; and

(H) the short- and lo[illegible]g-ter
versely affected by a[illegible]provs
stem versus the sho[illegible] and

(H) the short- and long-term public values which may be adversely affected by approval of the transportation or utility system versus the short- and long-term public benefits which may accrue from such approval.

STANDARDS FOR GRANTING CERTAIN AUTHORIZATIONS

SEC. 1105. In any case in which there is no applicable law with respect to a transportation or utility system, the head of the Federal agency concerned shall, within four months after the date of filing of any final Environmental Impact Statement, make recommendations, for purposes of section 1106(b), to grant such authorizations as may be necessary to establish such system, in whole or in part, within the conservation system unit concerned if he determines that— 16 USC 3165.

(1) such system would be compatible with the purposes for which the unit was established; and

(2) there is no economically feasible and prudent alternative route for the system.

AGENCY, PRESIDENTIAL, AND CONGRESSIONAL ACTIONS

SEC. 1106. (a)(1) AGENCY ACTION IN CASES OTHER THAN THOSE INVOLVING SECTION 1105 OR WILDERNESS AREAS.—In the case of any application for the approval of any transportation or utility system to which section 1105 does not apply or that does not occupy, use, or traverse any area within the National Wilderness Preservation System, if, in compliance with section 1104— 16 USC 3166.

(A) each Federal agency concerned decides to approve each authorization within its jurisdiction with respect to that system, then the system shall be deemed to be approved and each such agency shall promptly issue, in accordance with applicable law, such rights-of-way, permits, licenses, leases, certificates, or other authorizations as are necessary with respect to the establishment of the system; or

(B) one or more Federal agencies decide to disapprove any authorization within its jurisdiction with respect, to that system, then the system shall be deemed to be disapproved and the applicant for the system may appeal the disapproval to the President.

(2) If an applicant appeals under paragraph (1)(B), the President, within four months after receiving the appeal, shall decide whether to approve or deny the application. The President shall approve the application if he finds, after consideration of the factors set forth in section 1104(g)(2), that such approval would be in the public interest and that (1) such system would be compatible with the purposes for which the unit was established; and (2) there is no economically feasible and prudent alternative route for the system. In making a decision, the President shall consider any environmental impact statement prepared pursuant to section 1104(e), comments of the public and Federal agencies received during the preparation of such statement, and the findings and recommendations, if any, of each Federal agency that rendered a decision with respect to the application. The President's decision to approve or deny the application shall be published in the Federal Register, together with a statement of the reasons for his determination. Appeals, Presidential review. Publication in Federal Register.

(3) If the President approves an application under paragraph (2), each Federal agency concerned shall promptly issue, in accordance with applicable law, such rights-of-way, permits, licenses, leases, certificates, or other authorizations as are necessary with respect to the establishment of the system.

Judicial review.

(4) If the President denies an application under paragraph (2), the applicant shall be deemed to have exhausted his administrative remedies and may file suit in any appropriate Federal court to challenge such decision.

Presidential notification.

(b) AGENCY ACTION IN CASES INVOLVING SECTION 1105 OR WILDERNESS AREAS.—(1) In the case of any application for the approval of a transportation or utility system to which section 1105 applies or that proposes to occupy, use, or traverse any area within the National Wilderness Preservation System, each Federal agency concerned shall promptly submit to the President notification whether the agency tentatively approved or disapproved each authorization within its jurisdiction that applies with respect to the system. Such notification shall be accompanied by a statement of the reasons and findings supporting the agency position.

Presidential determination and recommendation to Congress.

(2) Within four months after receiving all notification referred to in paragraph (1) and after considering such notifications, any environmental impact statement prepared pursuant to section 1104(e), and the comments of the public and Federal agencies received during the preparation of such statement, the President shall decide whether or not the application for the system concerned should be approved. If the President denies an application the applicant shall be deemed to have exhausted his administrative remedies, and may file suit in any appropriate Federal court to challenge such decision. If the President approves the application, he shall submit to Congress his recommendation for approval of the transportation or utility system covered, whereupon the Congress shall consider the application as provided in subsection (c). The President shall include with his recommendation to Congress—

(A) the application which is the subject of his recommendation;

(B) a report setting forth in detail the relevant factual background and the reasons for his findings and recommendation;

(C) the joint environmental impact statement;

(D) a statement of the conditions and stipulations which would govern the use of the system if approved by the Congress.

(c) CONGRESSIONAL APPROVAL.—(1) No application for any transportation or utility system with respect to which the President makes a recommendation for approval under subsection (b) shall be approved unless the Senate and House of Representatives approve a resolution described in paragraph (4) within the first period of one hundred and twenty calendar days of continuous session of the Congress beginning on the date after the date of receipt by the Senate and House of Representatives of such recommendation.

(2) For purposes of this subsection—

(A) continuity of session of the Congress is broken only by an adjournment sine die; and

(B) the days on which either House is not in session because of an adjournment of more than three days to a day certain are excluded in the computation of the one-hundred-and-twenty-day calendar period.

(3) This subsection is enacted by the Congress—

described by paragraph (6) of this subsection; and it supersedes other rules only to the extent that it is inconsistent therewith; and

(B) with full recognition of the constitutional right of either House to change the rules (so far as those relate to the procedure of that House) at any time, in the same manner and to the same extent as in the case of any other rule of such House.

(4) For the purposes of this subsection, the term "resolution" means a joint resolution, the resolving clause of which is as follows: "That the House of Representatives and Senate approve the application for under title XI of the Alaska National Interest Lands Conservation Act submitted by the President to the Congress on , 19."; the first blank space therein to be filled in with the appropriate transportation or utility system and the second blank therein to be filled with the date on which the President submits the application to the House of Representatives and the Senate. "Resolution."

(5) Except as otherwise provided in this subsection, the provisions of section 8(d) of the Alaska Natural Gas Transportation Act shall apply to the consideration of the resolution. 15 USC 719f.

(6) After an application for a transportation or utility system has been approved under subsection 1106(a), the appropriate Federal agencies shall issue appropriate authorizations in accordance with applicable law. In any case in which an application for a transportation or utility system has been approved pursuant to section 1106(b), the appropriate Federal agencies shall issue appropriate authorizations in accordance with title V of the Federal Lands Policy Management Act or other applicable law. After issuance pursuant to this subsection, the appropriate land managing agency shall administer the right-of-way in accordance with relevant management authorities of the land managing agency and title V of the Federal Lands Policy Management Act. 43 USC 1761.

RIGHTS-OF-WAY TERMS AND CONDITIONS

SEC. 1107. (a) TERMS AND CONDITIONS.—The Secretary, or the Secretary of Agriculture where national forest wilderness is involved, shall include in any right-of-way issued pursuant to an application under this title, terms and conditions which shall include, but not be limited to— 16 USC 3167.

(1) requirements to insure that, to the maximum extent feasible, the right-of-way is used in a manner compatible with the purposes for which the affected conservation system unit, national recreation area, or national conservation area was established or is managed;

(2) requirements for restoration, revegatation, and curtailment of erosion of the surface of the land;

(3) requirements to insure that activities in connection with the right-of-way will not violate applicable air and water quality standards and related facility siting standards established pursuant to law;

(4) requirements, including the minimum necessary width, designed to control or prevent—

(A) damage to the environment (including damage to fish and wildlife habitat),

(B) damage to public or private property, and

(C) hazards to public health and safety;

(5) requirements to protect the interests of individuals living in the general area of the right-of-way who rely on the fish, wildlife, and biotic resources of the area for subsistence purposes; and

(6) requirements to employ measures to avoid or minimize adverse environmental, social or economic impacts.

(b) WILD AND SCENIC RIVERS SYSTEM.—Any transportation or utility system approved pursuant to this title which occupies, uses, or traverses any area within the boundaries of a unit of the National Wild and Scenic Rivers System shall be subject to such conditions as may be necessary to assure that the stream flow of, and transportation on, such river are not interfered with or impeded, and that the transportation or utility system is located and constructed in an environmentally sound manner.

(c) PIPELINE RIGHTS-OF-WAYS.—In the case of a pipeline described in section 28(a) of the Mineral Leasing Act of 1920, a right-of-way issued pursuant to this title shall be issued in the same manner as a right-of-way is granted under section 28, and the provisions of subsections (c) through (j), (l) through (q), and (u) through (y) of such section 28 shall apply to rights-of-way issued pursuant to this title.

30 USC 185.

EXPEDITED JUDICIAL REVIEW

16 USC 3168.

SEC. 1108. (a) It is the intent of Congress that any judicial review of any administrative actions, including compliance with the National Environmental Policy Act of 1969, pursuant to this title shall be expedited to the maximum extent possible.

42 USC 4321 note.

(b) Any proceeding before a Federal court in which an administrative action, including compliance with the National Environmental Policy Act of 1969, pursuant to this title is challenged shall be assigned for hearing and completed at the earliest possible date, and shall be expedited in every way by such court, and such court shall render its final decision relative to any challenge within one hundred and twenty days from the date such challenge is brought unless such court determines that a longer period of time is required to satisfy the requirements of the United States Constitution.

(c) No court shall have jurisdiction to grant any injunctive relief lasting longer than ninety days against any action pursuant to this title except in conjunction with a final judgment entered in a case involving an action pursuant to this title.

VALID EXISTING RIGHTS

16 USC 3169.

SEC. 1109. Nothing in this title shall be construed to adversely affect any valid existing right of access.

SPECIAL ACCESS AND ACCESS TO INHOLDINGS

16 USC 3170.

SEC. 1110. (a) Notwithstanding any other provision of this Act or other law, the Secretary shall permit, on conservation system units, national recreation areas, and national conservation areas, and those public lands designated as wilderness study, the use of snowmachines (during periods of adequate snow cover, or frozen river conditions in the case of wild and scenic rivers), motorboats, airplanes, and nonmotorized surface transportation methods for traditional activities (where such activities are permitted by this Act or other law) and for travel to and from villages and homesites. Such use shall be subject to reasonable regulations by the Secretary to protect the natural and other values of the conservation system units, national recreation

RIGHTS

all be construed to adversely

SS TO INHOLDINGS

other provision of this Act or
on conservation system units,
l conservation areas, and those
study, the use of snowmachines
r, or frozen river conditions in
orboats, airplanes, and nonmo-
ods for traditional activities
y this Act or other law) and for
tes. Such use shall be subject to
ary to protect the natural and
tem units, national recreation

areas, and national conservation areas, and shall not be prohibited unless, after notice and hearing in the vicinity of the affected unit or area, the Secretary finds that such use would be detrimental to the resource values of the unit or area. Nothing in this section shall be construed as prohibiting the use of other methods of transportation for such travel and activities on conservation system lands where such use is permitted by this Act or other law.

(b) Notwithstanding any other provisions of this Act or other law, in any case in which State owned or privately owned land, including subsurface rights of such owners underlying public lands, or a valid mining claim or other valid occupancy is within or is effectively surrounded by one or more conservation system units, national recreation areas, national conservation areas, or those public lands designated as wilderness study, the State or private owner or occupier shall be given by the Secretary such rights as may be necessary to assure adequate and feasible access for economic and other purposes to the concerned land by such State or private owner or occupier and their successors in interest. Such rights shall be subject to reasonable regulations issued by the Secretary to protect the natural and other values of such lands.

TEMPORARY ACCESS

SEC. 1111. (a) IN GENERAL.—Notwithstanding any other provision of this Act or other law the Secretary shall authorize and permit temporary access by the State or a private landowner to or across any conservation system unit, national recreation area, national conservation area, the National Petroleum Reserve—Alaska or those public lands designated as wilderness study or managed to maintain the wilderness character or potential thereof, in order to permit the State or private landowner access to its land for purposes of survey, geophysical, exploratory, or other temporary uses thereof whenever he determines such access will not result in permanent harm to the resources of such unit, area, Reserve or lands. 16 USC 3171.

(b) STIPULATIONS AND CONDITIONS.—In providing temporary access pursuant to subsection (a), the Secretary may include such stipulations and conditions he deems necessary to insure that the private use of public lands is accomplished in a manner that is not inconsistent with the purposes for which the public lands are reserved and which insures that no permanent harm will result to the resources of the unit, area, Reserve or lands.

NORTH SLOPE HAUL ROAD

SEC. 1112. (a) IN GENERAL.—So long as that section of the North Slope Haul Road referred to in subsection (c) is closed to public use, but not including regulated local traffic north of the Yukon River, regulated industrial traffic and regulated high occupancy buses, such regulation to occur under State law, except that the Secretary, after consultation with the Secretary of Transportation, and the Governor of Alaska shall agree on the number of vehicles and seasonality of use, such section shall be free from any and all restrictions contained in title 23, United States Code, as amended or supplemented, or in any regulations thereunder. Prior to executing an agreement pursuant to this subsection, the Secretary and the Governor of Alaska shall consult with the head of any unit of local government which encompasses lands located adjacent to the route of the North Slope Haul Road. The State of Alaska shall have the authority to limit access, 16 USC 3172.

impose restrictions and impose tolls, notwithstanding any provision of Federal law.

(b) RELEASE.—The removal of restrictions shall not be conditioned upon repayment by the State of Alaska to the Treasurer of the United States of any Federal-aid highway funds paid on account of the section of highway described in subsection (c), and the obligation of the State of Alaska to repay these amounts is hereby released so long as the road remains closed as set forth in subsection (a).

(c) APPLICATION OF SECTION.—The provisions of this section shall apply to that section of the North Slope Haul Road, which extends from the southern terminus of the Yukon River Bridge to the northern terminus of the Road at Prudhoe Bay.

STIKINE RIVER REGION

Consultation with Canadian Government and report to Congress.
16 USC 3173.

SEC. 1113. Congress finds that there is a need to study the effect of this Act upon the ability of the Government of Canada to obtain access in the Stikine River region of southeast Alaska. Accordingly, within five years from the date of enactment of this Act, the President shall consult with the Government of Canada and shall submit a report to the Congress containing his findings and recommendations concerning the need, if any, to provide for such access. Such report shall include, among other things, an analysis of the need for access and the social, environmental and economic impacts which may result from various forms of access including, but not limited to, a road along the Stikine and Iskut Rivers, or other alternative routes, should such access be permitted.

TITLE XII--FEDERAL-STATE COOPERATION

ALASKA LAND USE COUNCIL

16 USC 3181.

SEC. 1201. (a) ESTABLISHMENT.—There is hereby established the Alaska Land Use Council (hereinafter in this title referred to as the "Council").

1-2 3. GUIDELINES FILE

Applicant states that the proposed subsidiary would engage in the activities of operating an industrial bank in a manner authorized by Colorado law, and engaging in the sale as agent of credit life, credit disability, credit accident and health, loan redemption and loan cancellation insurance in connection with extensions of credit by bank and nonbank subsidiaries of Maryland National Corporation. These activities would be performed from offices of Applicant's subsidiary in Colorado Springs, Colorado, and the geographic areas to be served are entire United States. Such activities have been specified by the Board in section 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of section 225.4(b).

Interested persons may express their views on the question whether consummation of this proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Richmond.

Any person wishing to comment on the application should submit views in writing to the Reserve Bank to be received not later than June 28, 1981.

Board of Governors of the Federal Reserve System, May 28, 1981.

D. Michael Manies,

Assistant Secretary of the Board.

[FR Doc. 81-16524 Filed 6-2-81; 8:45 am]

BILLING CODE 6210-01-M

First York Bancorp.; Proposed Acquisition of First Trust Company of York

First York Bancorp., York, Nebraska, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and section 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to acquire voting shares of First Trust Company of York, York, Nebraska.

Applicant states that the proposed subsidiary would engage in the activities of a trust company as described in § 225.4(a) of the Board's Regulation Y. These activities would be performed from offices of Applicant's subsidiary in York, Nebraska, and the geographic areas to be served are York County and counties contiguous thereto. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas City.

Any person wishing to comment on the application should submit views in writing to the Reserve Bank to be received not later than June 28, 1981.

Board of Governors of the Federal Reserve System, May 28, 1981.

D. Michael Manies,

Assistant Secretary of the Board.

BILLING CODE 6210-01-M

GENERAL SERVICES ADMINISTRATION

[E-81-6]

Delegation of Authority to the Secretary of Defense

1. *Purpose.* This delegation authorizes the Secretary of Defense to represent, in conjunction with the Administrator of General Services, the consumer interests of the executive agencies of the Federal Government in proceedings before the Public Utility Commission of Texas involving electric utility rates.

2. *Effective date.* This delegation is effective immediately.

3. *Delegation.*

a. Pursuant to the authority vested in me by the Federal Property and Administrative Services Act of 1949, 63 Stat. 277, as amended, particularly sections 201(a)(4) and 205(d) (40 U.S.C. 481(a)(4), and 486(d)), authority is delegated to the Secretary of Defense to represent the consumer interests of the executive agencies of the Federal Government before the Public Utility Commission of Texas involving the application of the Texas Power and Light Company for an increase in its electric rates. The authority delegated to the Secretary of Defense shall be exercised concurrently with the Administrator of General Services.

b. The Secretary of Defense may redelegate this authority to any officer, official, or employee of the Department of Defense.

c. This authority shall be exercised in accordance with the policies, procedures, and controls prescribed by the General Services Administration, and shall be exercised in cooperation with the responsible officers, officials, and employees thereof.

d. The Department of Defense shall forward to the General Services Administration copies of its testimony and briefs within 60 days of formal submission.

Dated: May 22, 1981.

Ray Kline,

Acting Administrator of General Services.

DEPARTMENT OF TRANSPORTATION

Offices of the Secretary

Notice of Uniform Federal Transportation and Utility System Application for Use on Conservation System Unit Lands in Alaska

AGENCY: Department of the Interior.

ACTION: Notice of Uniform Federal Transportation and Utility System Application for use on Conservation System Unit lands in Alaska.

SUMMARY: This notice publishes a consolidated application form for use in applying for Federal approval of transportation or utility systems in the

1st T. Mar 6/28
please return!

State of Alaska if any portion of the proposed system is within a Federal conservation system unit, national recreation area or national conservation area. This form is not required to be used until each affected Federal agency has secured the necessary clearance from the Office of Management and Budget as required by the Paperwork Reduction Act (44 U.S.C. 3501 et seq.) for information collection requirements.

EFFECTIVE DATE: May 30, 1981.

ADDRESS: Any questions or suggestions should be sent to: Director (330), Bureau of Land Management, 1800 C Street, NW., Washington, D.C. 202040.

FOR FURTHER INFORMATION CONTACT: Robert E. Mollohan, 202–343–5537 or the above address.

SUPPLEMENTARY INFORMATION: Title XI of the Alaska National Interest Lands Conservation Act, Pub. L. 96–487, 94 Stat. 2371, ("the Act"), specifically Section 1104(b)(1), directs the Secretary of the Interior, the Secretary of Agriculture, and the Secretary of Transportation, in consultation with the heads of other appropriate Federal agencies, jointly to prescribe and publish, within 180 days of enactment (December 2, 1980), a consolidated application form. Such form is to be used for applying for the approval of all proposed transportation or utility systems in Alaska in any portion of the system is proposed to be within any Federal conservation system unit, national recreation area or national conservation area. The form is to be used by all Federal agencies which have jurisdiction to grant any authorization, including any right-of-way, permit, license, lease, or certificate, without which a transportation or utility system cannot, in whole or in part, be established. A "conservation system unit" is any unit in Alaska of the National Park System, National Wildlife Refuge System, National Wild and Scenic Rivers Systems, National Trails System, National Wilderness Preservation System, or a National Forest Monument.

The consolidated application is required to be used for the following types of systems:

1. Canals, ditches, flumes, laterals, pipes, pipelines tunnels, and other systems for the transportation of water.

2. Pipelines and other systems for the transportation of liquids other than water, including oil, natural gas, synthetic liquid and gaseous fuels, and any refined product produced therefrom.

3. Pipelines, slurry and emulsion systems and conveyor belts for the transportation of solid materials.

4. Systems for the transmission and distribution of electric energy.

5. Systems for transmission or reception of radio, television, telephone, telegraph, and other electronic signals, and other means of communication.

6. Improved rights-of-way for snow machines, air cushion vehicles, and all-terrain vehicles.

7. Roads, highways, railroads, tunnels, tramways, airports, landing strips, docks, and other systems of general transportation.

All of the systems listed above include those minimally necessary related structures and facilities, temporary and permanent, along the routes of such system.

Once the consolidated application form is approved by the Office of Management and Budget for use, no action by any Federal agency under applicable law with respect to the approval or disapproval of the authorization of any of the listed transportation or utility systems shall have any force or effect unless this consolidated application form is used.

The applicant will be required to file the consolidated application form simultaneously with each Federal agency having jurisdiction to grant the authorizations neded for the proposed system. Title XI of the Act provides a special procedure, including time limitations for the review and approval or disapproval of these systems. Other applicable law, including existing agency regulations, applies with respect to the authorization and administration of the transportation and utility systems in the same way it applies to non-Title XI applications.

Both regulatory and land managing Federal agencies are included in the consolidated application procedure. After consultation with many affected agencies, the Departments of Interior, Transportation and Agriculture developed the Uniform Federal Transportation and Utility System Application. Departments and independent agencies that participated are as follows: The Departments of Defense, Energy, Commerce and State, the Interstate Commerce Commission, the National Aeronautics and Space Administration, the Federal Communications Commission and the Environmental Protection Agency.

An attempt has been made to solicit only basic information which is required under current applicable law in determining whether to authorize a proposed system. The scope of response to the questions will vary for each applicant, depending on the simplicity or complexity of the project. In many instances, if the proposed form is completed properly, little or no further information will be required in order for the agency to approve or disapprove the system.

However, because of the highly specialized nature of most regulatory agency responsibilities, in some instances, these agencies may require additional information from the applicant. Applicants will also be urged to contact all relevant agencies prior to an application submission to learn of any additional or unique submission requirements which have not been incorporated into the consolidated form.

Comments on the consolidated form were requested in the Federal Register of March 12, 1981 (46 FR 16 342). Comments were received from 23 sources.

General Comments

Overall the comments received on the draft application form expressed the opinion that the form was clear, concise, and met the intent of Title XI of the Act. Out of 23 respondents, only one opposed the form in its entirety. By and large, the comments were of an editorial nature, i.e., word or phrase changes which provide for a clearer understanding of what information is being requested. Most of these suggestions have been incorporated into the form.

Specific Comments

One respondent suggested that an additional item entitled "resident of Alaska" be added to the citizenship requirement. The suggestion was not adopted in that there is no requirement of law for this information.

Several respondents made various suggestions relating to the "Project Description" section of the form. Most wanted additional items listed. We did not feel that it was necessary to add these requests to the Project Description section of the form. Most of these suggestions were, however, included in the instructions that accompany the form.

Two respondents asked that the word "exact" be removed from the section of the form pertaining to map requirements. This has been done.

Several respondents requested that an additional statement be included in the section on State or local government approval. An additional statement indicating that the applicant has applied for State or local government approval has been included.

Several respondents commented on item 13 of the form. In line with these comments we have replaced the word "chosen" with the word "rejected."

Also, we have broken this item into three parts for clarity.

Four respondents commented on item 15. These comments ranged from eliminating the item to minor word changes. We have removed the phrase "net revenue" and have reworded the instructions for completing this item which are in line with the comments received.

The largest number of comments were directed at items 16 through 18 on the form. Again, these comments ranged from total elimination of the items to minor word changes. Most of the suggested word changes were made and have been incorporated into the form. Other suggestions for clarity were incorporated into the instructions for completing each one of these items. The suggestions for eliminating these items have not been accommodated.

John R. Block,
Secretary of Agriculture.
June 1, 1981.

Andrew L. Lewis,
Secretary of Transportation.
May 29, 1981.

James G. Watt,
Secretary of the Interior.
May 29, 1981.

General Information to Applicant

The Uniform Federal Transportation and Utility System Application form contained in this package is provided for your convenience in applying for a right-of-way, permit, license, lease, or certificate for the use of Federal lands that lie within conservation system units and National Recreation or Conservation Areas as defined in the Alaska National Interest Lands Conservation Act. Conservation system units include the National Park System, National Wildlife Refuge System, National Wild and Scenic Rivers System, National Trails System, National Wilderness Preservation System, National Forest Monuments. Any individual, business, or governmental entity desiring to establish and operate a transportation system over, upon, under, or through any one of these units must apply for this use by completing the application form contained in this package.

Transportation system uses for which this application is to be used are as follows:

1. Canals, ditches, flumes, laterals, pipes, pipelines, tunnels, and other systems for the transportation of water.

2. Pipelines and other systems for the transportation of liquids other than water, including oil, natural gas, synthetic liquid and gaseous fuels, and any refined product produced therefrom.

3. Pipelines, slurry and emulsion systems and conveyor belts for the transportation of solid materials.

4. Systems for the transmission and distribution of electric energy.

5. Systems for transmission or reception of radio, television, telephone, telegraph, and other electronic signals, and other means of communication.

6. Improved rights-of-way for snow machines, air cushion vehicles, and all-terrain vehicles.

7. Roads, highways, railroads, tunnels, tramways, airports, landing strips, docks, and other systems of general transportation.

When filing for any of the above types of transportation systems within any conservation system unit, the applicant is required to file the application contained in this package with each Federal agency on the same day. Federal agencies with whom you must file an application include any agency that must issue a right-of-way, permit, license, lease, or certificate without which the proposed transportation system cannot, in whole or part, be established or operated. For example, if you are filing an application for an airport, you must file with the agency responsible for administering the land and with the Federal Aviation Administration. If you need assistance in determining with which Federal agency(ies) you must file, you should contact any local office of the Bureau of Land Management, Fish and Wildlife Service, Forest Service, or National Park Service.

After you have completed your application, please check to be sure the information you have provided is complete and correct, sign it and return it to all appropriate Federal agencies on the same day.

Thank you for your cooperation.

Steps for Completing the Application Form

We have set up the instructions in this package using 4 steps:

(1) Pre-Application Meeting; (2) General Application Instructions; (3) General Instructions for Supplemental and (4) Filing Instructions. If you follow each step in the order that they are set out and read the line-by-line instructions, your application will generally be found to be complete by the Federal agency(ies) with which you have filed. However, in some instances, the Federal agencies may find it necessary to request additional information from you before application processing can proceed. By carefully following the instructions set out below, requests for additional information can be held to a minimum with the net result being a reduced timeframe for processing an application and issuing the appropriate authorization(s).

[Step 1]—Pre-Application Meeting

You are encouraged to contact any Federal agency office with which you will be required to file an application to establish or operate the proposed project, prior to completing and filing the application. For your convenience, we have provided a listing of agencies and their locations under STEP 4 of these instructions. This early contact, for the purposes of these instructions, is identified as the *Pre-Application Meeting*. The *Pre-Application Meeting* has been integrated into this process primarily for your benefit. The purpose of the meeting is to afford you the opportunity to explain your proposed project to the affected Federal agency(ies). In return, the agency(ies) will provide you with assistance and information in completing the attached application form. In view of the fact that the Federal agencies with which you may end up filing an application with have no way of knowing what your plans are, it becomes your responsibility to request a *Pre-Application Meeting* with the agency(ies).

It is at this *Pre-Application Meeting* with the Federal agency(ies) that you can acquire specific information to complete each requirement of the application contained in this package. The importance of a *Pre-Application Meeting* cannot be overemphasized. In many instances, you will find it necessary to file the application for the proposed use with two or more Federal agencies. To assist you in determining which Federal agencies you should contact for *Pre-Application Meetings*, the following guidelines are provided:

1. As a minimum you should contact either the Bureau of Land Management, Fish and Wildlife Service, National Park Service, or the U.S. Forest Service, If your proposal crosses land under the administration of only one of these land managing agencies, then only that land managing agency needs to be contacted. However, if your proposal crosses lands under the jurisdiction of two or more of the above mentioned land managing agencies, then you should contact each affected agency.

2. If your proposed project contemplates construction of any kind in navigable waters of the United States or putting structures of any description into or adjacent to these waters, then as a minimum you should contact the land managing agency and either the Coast

Guard or the Corps of Engineers or both. In some instances, and depending upon your project, it will be advisable to contact a representative of the Environmental Protection Agency.

3. Proposed projects involving the installation of air or water navigation aids, you should in addition to contacting the land managing agency, contact the Coast Guard and Federal Aviation Agency. If the navigation aid emits an electronic signal, then the Federal Communications Commission should be contacted along with the other agencies noted above.

4. In the establishment or alteration of any airport runway or taxiway, the Federal Aviation Administration should be contacted in addition to the land managing agency. The Federal Aviation Administration should also be contacted if any construction of a new structure is within a 5 mile radius of an existing airport or if the proposed structure is 200 feet or higher regardless of its proximity to the existing airport.

5. Generally, any project that contemplates transporting water by canals, ditches, flumes, pipeline or tunnels will require you to contact only the land managing agency. However, in some instances involving a water transportation system of if the water system serves the purpose of discharging waste water, then the Environment Protection Agency, Corps of Engineers, or Coast Guard should be contacted.

6. If the proposed project involves a pipeline for transporting substances other than water including any slurry or emulsion, the land managing agency(ies) should be contacted, and in instances where the pipeline will be a common carrier, the Federal Energy Regulatory Commission and the Department of Transportation should be contacted.

7. In the establishment of any type of communication facility, the land managing agency(ies) on whose land the facility will be situated should be contacted along with the Federal Communications Commission.

8. Any improvement or new construction contemplated for general transportation purposes will require you to contact the land managing agency(ies) across whose land the system affects. Depending on the proposed project, its location, and various other factors, you may need to contact other agencies such as the Corps of the Engineers Coast Guard, Federal Aviation Administration, Interstate Commerce Commission, Federal Highway Administration, Environmental Protection Agency, etc.

9. Any system for the transmission and distribution of electrical energy will require contact with the land managing agency(ies) whose land is crossed by the system. In instances where a powerline interconnects an electric utility and a qualifying cogenerator or small power producer, or where powerlines qualify as primary transmission lines leading from hydroelectric facilities to an interconnection point on the Alaskan distribution grid, you should contact the Federal Energy Regulatory Commission.

10. If the proposed project involves a facility that will emit pollutants into the air, water or land, the land managing agency should be contacted along with the Environmental Protection Agency.

11. If the proposed project involves disturbance to marine life or marine mammals or to their habitat you should check with the National Marine Fisheries Service.

[Step 2]—General Application Instructions

In this step, we have listed *Line-by-Line Instruction* for completing the application form contained in this package. At this point, we caution you that if you have not taken the time to thoroughly read the General Instructions and the instructions set out in STEP 1, you should, before proceeding any further, go back and read those instructions. If you need additional space to complete any line in the application, please put the information on a separate sheet of paper and identify it as follows: "Continuation of Line ——, Project Description."

Line-by-Line Instructions

[Line 1]—Give your complete name and address. Some agencies require the names, addresses, and telephone numbers of property owners located adjacent to the proposed project. If you must include this information in your application, identify this information as follows: "Continuation of Line 1, Identification of Adjacent Property Owners."

[Line 2]—If you plan to designate an authorized agent, you must complete this line with the name and address of your designated agent.

[Line 3]—Provide the appropriate telephone number(s).

[Line 4]—You must check at least one block. If you checked "Individual or Federal Agency" you do not have to complete the "Supplemental." If you check any block other than "Individual or Federal Agency," you must complete the entire form including the "Supplemental."

[Line 5]—You must check at least one block. If you checked the block Existing use for which no authorization received," you must provide information relating to the date use began, type of use, structures or facilities constructed, and vegetative or mineral materials removed or used along or within the area of use. This information should be put on a separate sheet of paper and identified as "Continuation of Line 5, Unauthorized Use Information." If you checked the block for "Other," please explain. This information should be put on a separate sheet of paper and identified as "Continuation of Line 5, Other."

[Line 6]—There are some laws which require the applicant to be a citizen of the United States before a Federal agency can permit the use of Federal lands or issue an authorization, thus the reason for this requirement. Check the appropriate block.

[Line 7]—Before you complete this line, we caution you that if you have not discussed your proposed project with the appropriate Federal agency or agencies are suggested under Step 1 of these instructions, you should do so at this time. Many of the affected agencies have very specific and/or unique requirements, particularly the regulatory agencies such as the Environmental Protection Agency, Interstate Commerce Commission, Federal Energy Regulatory Commission, etc. To list each of these, agency-by-agency, on the form or in these instructions, would not lend assistance to you. Therefore, after you have completed your *Pre-Application* consultation with the various agencies, give as a complete description of the proposed project as possible. If additional space is needed, the information should be put on a separate sheet of paper and identified as "Continuation of Line 7, Project Description." Examples of the type of information to be included are type of use—power transmission, transport oil or gas, vehicular transportation, etc.; units or volume of product to be transported—kilowatts, megawatts generated, cubic feet, barrels, gallons, thousands of board feet of timber, acre feet or water, etc.; the interrelationship of the proposed project with similar existing facilities; physical description of proposed facility—diameter of pipeline, all-weather surfaced road and width of running surface, and generating and transmission capacity of power projects; approximate date use will be terminated or construction completed; if the project involves dredging or filling in bodies of water, the volume and type of material is to be noted along with the name of the body of water. In addition, you may be required to furnish cost estimates of the project to some

agencies, and periods of use if the use will be on an interrupted basis. The above examples are not meant to be all-inclusive for a complete project description, but are only examples. Again, you are cautioned that the pre-application meeting described in STEP 1 will assist you in completing this important part of your application.

[Line 8]—Depending upon the proposed project, the mapping requirement may be satisfied with a relatively simply map or plan, or you may be required to submit a map or plan which shows the project in great detail. Generally, as a minimum, you must show the section, township and range within which the project is to be located and indicate the location of the project on the map as accurately as possible. These requirements are to be considered the minimum. Some agencies, depending upon the project, may require additional data; therefore, prior to preparing your map or plan, please check with the appropriate agencies for their specific mapping requirements. In addition, and depending on the type of use and associated structures to be constructed you may have to provide special maps and/or detailed structural or construction drawings. You should also provide, if required, technical data for specific navigational aids for both water and air travel. Again, you are cautioned to check with any affected agency to see if they require any type of special map or drawing for the type of project and facilities you propose.

[Line 9]—You are to check the appropriate box on this line if your proposed project requires State or local government approval. The various Federal agencies may only require you to furnish proof of application with the State or local government, while others may need the final approval document. For example, some Federal agencies require you to file a copy of the application you have filed with the State for water rights before they will process your application for a water pipeline. There are many variations for this requirement among the Federal agencies, therefore, please check with the agency or agencies with which you are filing this application.

[Line 10]—Some agencies require a nonreturnable application fee at the time of filing, while others do not. The amount or method of computing fees are not uniform among the agencies that do require a fee. Therefore, please check with each agency with which you must file this application for a determination of the fee that must accompany the application.

[Line 11]—If your project crosses the Canadian Boundary, the crossing must be shown on the map prepared to comply with Line 8. If your project affects any international waterway, the waterway must be identified on the map with a complete project description to be included in Line 7.

[Line 12]—Depending upon which law your proposed use will be authorized under, you may have to submit data on your technical and/or financial capability to construct, operate, maintain, and terminate the proposed project. Therefore, you should check with the affected agencies, to see if they require information of this type.

[Line 13]—Providing the requested information on alternate routes and modes in as much detail as you can and discussing in your analysis why certain routes or modes were rejected and why it is necessary to cross a conservation system unit, will in many cases assist the agency(ies) in processing your application and reaching a final decision within a shorter timeframe than normal. Your analysis should consider only reasonable alternative routes and modes as they relate to current technology and economics. For example, if your project is for a high voltage electric transmission line, you need not analyze the underground modes as an alternative.

[Line 14]—If you have applied for and received authorizations for similar projects in Alaska, please list these authorizations by their identifying number, date, code, or name. Information contained in these files may be useful in analyzing and processing the application you have just filed.

[Line 15]—The objective of this item is to provide information needed to evaluate the benefits, both tangible economic benefits and intangible public interest benefits, of a proposed transportation system for comparison with the magnitude of its detrimental effects on conservation units. The amount of specific information needed will depend on the nature and size of the transportation system. This item should always begin with a simple statement of the purpose of the system, including indications of the quantities of materials to be transported. In many cases, this will be sufficient, since the importance of the purpose would be obvious. However, this is only an abbreviated approximation of a full analysis of the total public and private costs of the proposed system and its next best alternative system. Major systems will require a full analysis for which additional specific information is needed. For transportation systems which will serve a new commercial enterprise, the expected net revenue of the enterprise will be a measure of the benefits of the transportation system. If there are public benefits in excess of expected revenues, these should be identified. For improved transportation systems to existing enterprises, the saving in transportation cost would be a measure of the economic benefits as well as the public benefits.

[Lines 16 through 18]—Recognizing the fact that some applicants will not have either the expertise or financial resources or both to provide all of the detailed information requested in these lines, you are requested to complete each line to the best of your ability and knowledge. The advantage to you to provide as much of the requested information as possible is that any useful information supplied will assist the Federal agency(ies) in reaching a decision and in all probability speed up the decisionmaking process on your application. In addition, and when providing information requested in these lines, you should use sound judgment in deciding whether certain specifics needs to be addressed depending on what your proposed project is. For example, if your project does not encroach into a stream or other body of water, you need not address this item or simply state that it is not applicable.

[Line 19]—Please check the box with the corresponding initials of the agencies with which you are filing this application. By providing this information the affected Federal agencies will be able to begin their coordinating role shortly after you have filed your application. To identify the initials with the appropriate agency, please go to Step 4 of these instructions.

Upon completing Lines 1 through 19 and prior to submitting your application, be sure you have signed and dated it in the space provided.

[Step 3]—General Instructions for Supplemental

The instructions under this Step apply only to the "Supplemental." Only business or governmental entities excpet for Federal agencies must complete the Supplemental, and then only the appropriate section pertaining to that entity. Regardless of the type of business or governmental entity and if you have any of the required information on file with the agencies and it is still up to date and accurate, check the block entitled "Filed" and note the case number, name, or the appropriate identification code. If any of the required information is not on file with the agency, check the block entitled "Attached" and submit a copy of the required document or information.

Under items "f" and "g" "Private Corporations" a block has been included to mark if you are not filing for an oil and gas pipeline. If, however, you are filing for an oil and gas pipeline, check either the "Attached" or "Filed" and follow the instructions noted in the first paragraph of this Step. The instructions of this paragraph also apply to items "e" under "Public Corporations" and "d" of "Partnership or Other Unincorporated Entity."

[Step 4]—Filing Instructions

Upon completing the application, you must file it with each affected Federal agency from whom you need a right-of-way, permit, license, lease, or certificate to establish and operate your proposed project. For your convenience, we are providing a listing of the participating agencies and their addresses with which you should file you application. In parenthesis following the name of the Federal agency we have included an initial which corresponds to the initials in Line 19 of the application form. Please use these identifying initials for your reference in completing Line 19.

Department of Agriculture

Regional Forester, Forest Service (USFS), Federal Office Building, P.O. Box 1628, Juneau, Alaska 99802; Telephone: (907) 586–7247 (or the appropriate Forest Service office)

BILLING CODE 4310–10–M

UNIFORM FEDERAL TRANSPORTATION AND UTILITY SYSTEM APPLICATION

FORM APPROVED
BUDGET BUREAU NO.

FOR AGENCY USE ONLY

Application Number

Date filed

1. Name and address of applicant *(include zip code)*	2. Name, title, and address of authorized agent if different from item 1 *(include zip code)*	3. TELEPHONE *(area code)* Applicant Authorized agent

4. As applicant are you?

- ☐ Individual
- ☐ Corporation
- ☐ Partnership
- ☐ State Government /State Agency
- ☐ Local Government
- ☐ Federal Agency

5. Specify what application is for:

- ☐ New authorization
- ☐ Renew existing authorization No.
- ☐ Amend existing authorization No.
- ☐ Assign existing authorization No.
- ☐ Existing use for which no authorization received
- ☐ Other *(describe)*

6. If an individual are you a citizen of the United States? ☐ Yes ☐ No

7. Project description *(describe in detail)*: (a) Type of transportation system *(i.e. canal, pipeline, road)*, (b) related structures and facilities, (c) physical specifications *(length, width, grading, etc.)*; (d) term of years needed, (e) time of year of use or operation; (f) volume or amount of product to be transported, (g) duration and timing of construction, and (h) temporary work areas needed for construction. *(Attach additional sheets, if additional space is needed.)*

8. Attach map covering project area and show approximate location on map.

9. State or local government approval: ☐ Attached ☐ Pending/Applied for ☐ Not required

10. Nonreturnable application fee: ☐ Attached ☐ Not required

11. Does project cross International Boundary or affect international waterways? ☐ Yes ☐ No

12. Give statement of your technical and financial capability to construct, operate, and maintain the system for which authorization is being requested.

13a. Describe in detail alternative routes and modes considered.

b. If routes or modes rejected, explain why.

c. Give explanation as to why it is necessary to cross Federal lands.

14. List your previous applications for similar projects which may provide additional information to authorizing agency.

15. Provide statement of need for project, including the economic feasibility. Statement should include items such as: (a) cost of proposed transportation/utility system *(construction, operation, and maintenance)*, (b) estimated cost of next best alternative system; and (c) expected public benefits provided by the system.

16. Describe probable effects on the population in the area, including socioeconomics effects, and statement of effect on rural traditional lifestyles.

17. Describe likely environmental effects that the proposed project will have on: (a) air quality; (b) visual impact on the conservation unit, (c) surface and ground water quality and quantity; (d) the control or structural change on any stream or other body of water; (e) altering existing noise levels, and (f) altering the surface of the land, including vegetation, permafrost, soil, and effects on soil stability.

18. Describe the probable effects that the proposed project will have on: (a) populations of fish, plant, wildlife, and marine life, including endangered and threatened species; and (b) marine mammals, including hunting, capturing, collecting, or killing of these animals.

19. Check appropriate box to indicate agency(ies) with which you are filing. *(For agency identification refer to Step 4 of the instructions.)*

☐ USFS ☐ USAF ☐ COE ☐ USN ☐ NMFS ☐ FERC ☐ NOAA ☐ BIA ☐ BLM ☐ NPS ☐ FWS ☐ STATE
☐ EPA ☐ FCC ☐ ICC ☐ NASA ☐ FAA ☐ USCG ☐ FHWA ☐ FRA ☐ Other *(Specify)*

I HEREBY CERTIFY, That I am of legal age and authorized to do business in the State and that I have personally examined the information contained in the application and believe that the information submitted is correct to the best of my knowledge.

To: Don Dickey, Director
Division of Tourism

From: Senator Jack Coghill, Chairman
Senate Transportation Committee

Date: February 7, 1985

Re: SB 49 - Kantishna Road Feasibility Study

As your division is charged with the development and promotion of the tourist industry in Alaska, we thought it appropriate to ask for your views on the attached legislation.

It is our intention with this bill to study three alternate routes from the Parks Highway into the Wonder Lake area, with the express purpose of relieving the steadily-growing pressure on the McKinley Park Road. Included in the study, along with the determination of the actual physical viability of each route, will be discussions with public officials in effected federal agencies to determine the reality of putting a road in through the park.

Attached you will find a copy of the bill, a map showing the alternate routes, and a proposal for the study from a Fairbanks engineering firm. The extension into Kantishna has been identified by the Fairbanks Chamber of Commerce as a transportation priority, and has been listed by DOT/PF as a highly viable Interior road extension.

Although we realize you cannot endorse appropriations outside the Governor's proposed budget, we would appreciate your analysis of the value such a road extension would have to the tourist industry in Alaska.

Thank you for your prompt attention to this request. If you need further information, please contact John Manly at the above number.

A SYNOPSIS OF THE

KANTISHNA ACCESS HIGHWAY

prepared for the

SENATE TRANSPORTATION COMMITTEE

by

Thomas & Associates
P.O. Box 80783
Fairbanks, Alaska 99708
(907)479-4972

January 1985

PROJECT DESCRIPTION

The Kantishna access consists of a road north of the Alaska Range that connects the Parks Highway with the Kantishna area and the western end of the Denali National Park Road. There are any number of possible alignments but all can be categorized into three basic routes this road could take:

1. along the old Stampede Road then through the foothills to Kantishna;
2. along the old Sled Road to Kantishna;
3. through the Nenana Agricultural Area to the Kantishna River then up the Kantishna River to Kantishna.

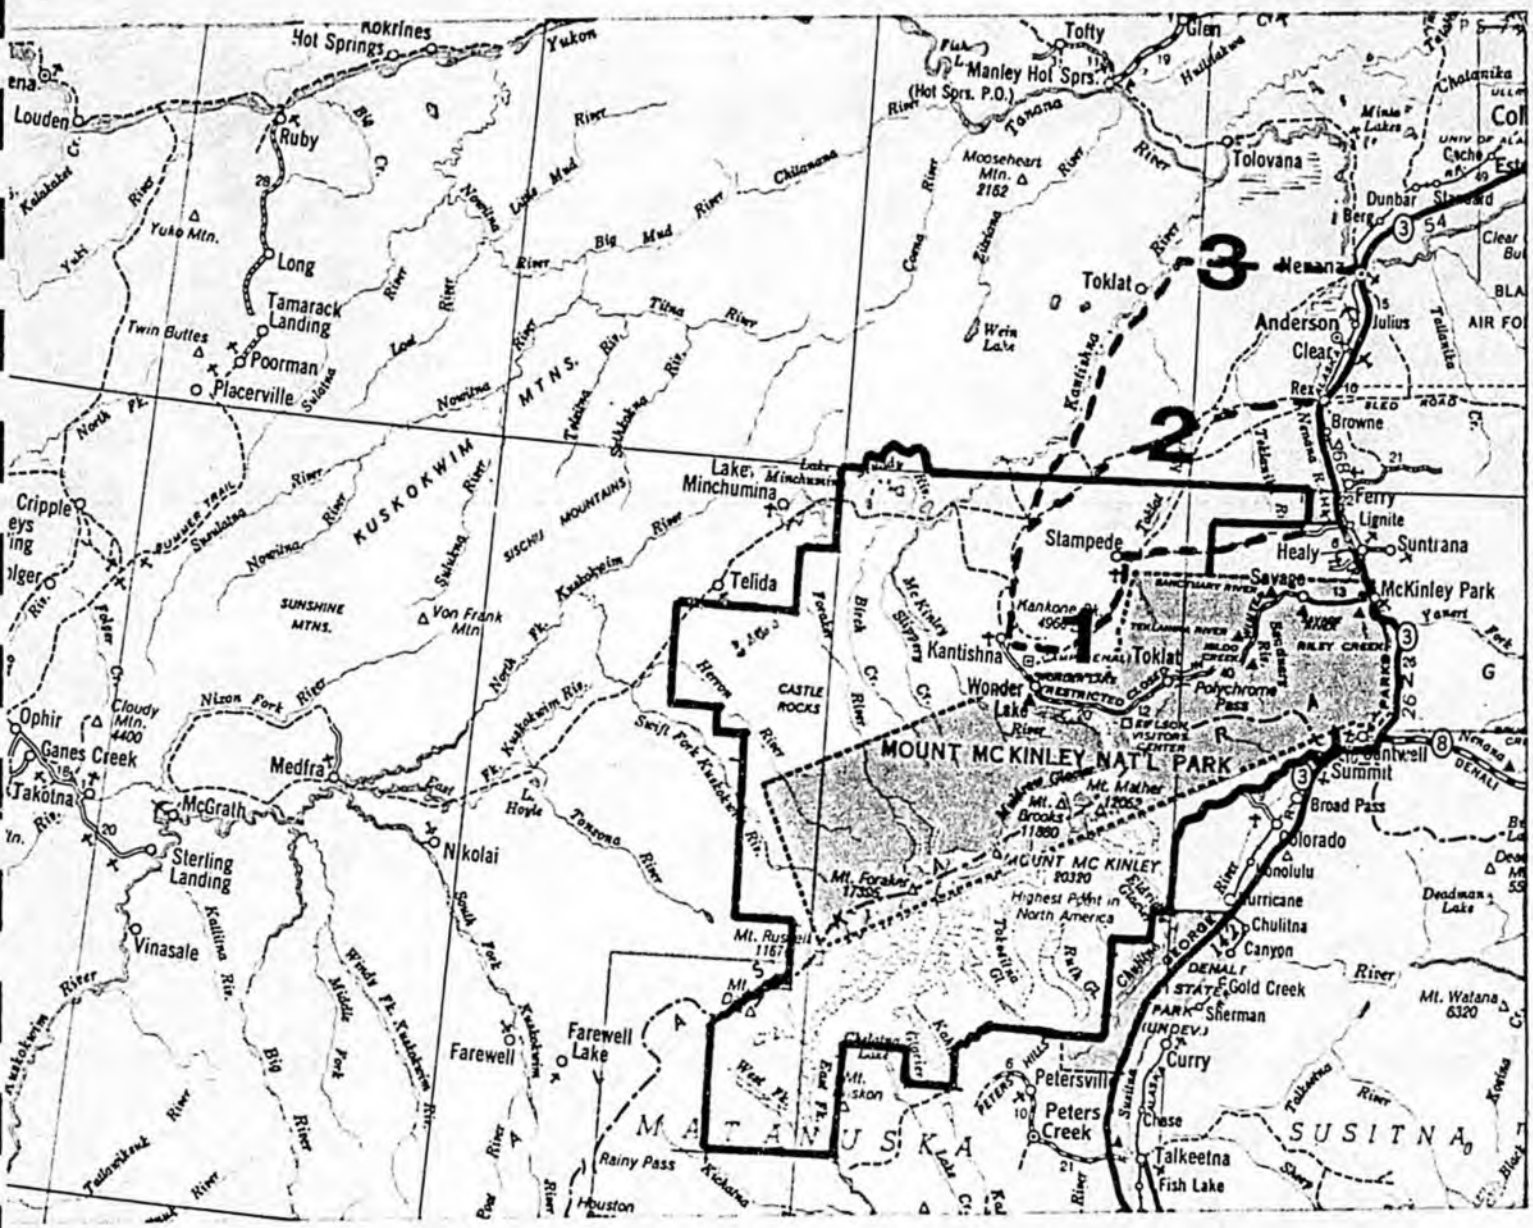
Traffic projections for this road are estimated at 5,000 vehicles per day during the summer months. This suggests a high standard, paved highway consisting of a 40 foot top with curves of five degrees (5^{o}) or less. The highway should be considered for a scenic highway classification.

The map on the following page shows the Denali National Park and the location of the three basic routes.

PROJECT JUSTIFICATION

Tourism

Mt. McKinley is Alaska's number one tourist attraction, and tourism is Alaska's second largest industry and growing at ten percent (10%) annually. Even though Mt. McKinley is Alaska's most popular attraction, many tourists have disappointing viewing experiences using the existing National Park Service shuttle bus system. Park officials estimate that over fifty percent (50%) of visitors fail to get a glimpse of the mountain. This is because of the poor weather that is often encountered near the mountain coupled with only a limited viewing time. The shuttle bus requires a minimum three hour ride to the



BASIC ROUTES

1. Stampede Trail
2. Sled Route
3. Agricultural Area Route

premium viewing area and a similar ride back to the Park hotel. It has been necessary to severely restrict traffic on the existing Park road for safety reasons and to retain at least some wildlife viewing opportunities.

It should be recognized that Alaska's tourist industry receives the brunt of criticism from disappointed visitors in spite of the fact that the State of Alaska has absolutely no control over National Park activities and policies. With tourism growing, the problem will get much worse very quickly.

The subject project will resolve all these issues as well as provide the catalyst and opportunity for the private sector to meet the growing need for more hotel space and tourist facilities. The Kantishna Highway would provide good access to the historical Kantishna mining area where a number of patented mining claims exist. These claims are private property in every sense of the word and can be used by the private sector for locating hotels and other tourist facilities--many with excellent views of Mt. McKinley. Tourists staying at these facilities would have a much better chance of observing the mountain since their time at these facilities would be nearly unlimited. In addition, the existing Park road could be restricted for use as a wildlife tour road enhancing this aspect of Denali National Park.

Mining

Mining is an important industry in the Kantishna area. This is true now as well as historically, and it is documented by the fact that there are numerous federally patented mining claims in the Kantishna area. Along with gold, tungsten occurs in commercial size deposits. Prospecting under the direction of the National Park Service in 1983 and 1984 confirmed the importance of this mineralized area to mining.

At the present time, surface access to the Kantishna area is limited

to the National Park Service Road to Wonder Lake. Because of the overuse this road receives from tour buses, shuttle buses and a limited number of private vehicles, the Park Service has found it necessary to restrict mining traffic to the times of day when other traffic is the lightest. This situation will not improve until there is a major improvement of the existing Park road or until an alternative access is constructed. The Interior Alaska Transportation Study projected 50 vehicles per day would be generated by the mining industry. Most of these vehicles would be trucks hauling ore or supplies. Current restrictions imposed by the Park Service are severe enough to discourage major mining efforts. The proposed highway would not only resolve this conflict in traffic but would access the area with a modern highway which would further encourage mining development.

As noted before, these mining claims could be used for siting hotels and other visitor facilities creating an opportunity for the private sector in the tourism industry.

Mt. McKinley

Mt. McKinley is Alaska's crown jewel and our birthright. Since statehood, access has been under the direct control of the federal government. Congressional action has increased this control through National Interest Lands. In spite of the importance of Mt. McKinley to our tourist industry, the federal government has made little, if any, effort to make that attraction more accessible or convenient. This a serious indictment when one considers the historical and projected growth and importance of our tourist industry.

The proposed highway would allow our State to share in this natural resource. It would also allow the federal government to enhance wildlife viewing along the existing Park road thus emphasizing the original Park mandate, that of perserving wildlife. This could occur by confining development to the mining areas which have already

experienced the touch of man and reserve the existing Park road for wildlife viewing.

Agricultural

The furtherest north of the basic routes shown on the attached map would benefit the agricultural industry as well as tourism and mining. This route provides access to the Nenana-Totchaket Agricultural Area already identified as prime agricultural land. It should be noted that access into this area has been planned and designed.

Access Extension

Both the Tanana Valley Development Plan and the Interior Alaska Transportation Study document that access into the Kantishna area is economically justified. In the future, the access needs of the McGrath area may result in extending this highway in that direction. All long range transportation plans for Alaska have shown the Parks Highway - McGrath as a service transportation corridor. While the construction of a highway to Kantishna will not guarantee such an extension, it does provide for the possibility when and if the need is there.

ALTERNATIVES

The alternatives to a northern access into the Kantishna area are limited to:

1. do nothing;
2. upgrade the existing Park road;
3. provide tourist facilities on the south flank of the Alaska Range.

All are discussed briefly in the following paragraphs.

Do Nothing

This is not a viable alternative. It is mentioned to show that it has been considered. The Park Service cannot accommodate the existing visitor demand, and this demand is growing by ten percent (10%) per

year. Alaska has a vital interest in assuring that this growing demand is met because it effects the reputation of our tourist industry.

Upgrading the Existing Park Road

Upgrading the existing Park road to Wonder Lake has several significant disadvantages. First, the existing road traverese through rugged mountainous terrain, and it would be expensive to achieve reasonable standards to accommodate increased traffic. Second, the existing road bisects the most restrictive Park use lands, so designated to protect the wilderness environment. An upgraded road would compromise this situation and further degrade the wildlife experience now enjoyed by visitors. Third, unless travel restrictions were relaxed, the visitors' experience would be much the same as it is now. There would be only limited opportunity to remain at vantage points to see the mountain. There would be no opportunity to create loop routes or enhance wildlife viewing. Fourth, mining activities would likely remain restrictive. There would be little opportunity or incentive for the private entrepreneur to develop visitor facilities.

Provide Tourist Facilities on the South Flank of the Alaska Range

Such a facility has some obvious drawbacks. First, it would be an additional tourist facility and not a substitute of the existing road. Alaskan visitors are making a major vacation. In many instances, it will be the major vacation of their life time. If there are two different tourist's experiences to be had, they will want to experience both of them. Thus, a south flanked visitor facility will not significantly reduce the demand on the existing Park road; however, it may make the Park Service feel less obligated to meet thoses demands. Second, the climate on the south side of the Alaska Range is wetter than that on the north. Consequently, the viewing opportunities are reduced on that side of the range. A northern facility has a distinct advantage in this regard. Third, a facility on the south side could not be linked with the existing Park road thus precluding any

opportunity for looping or restiction of the existing road for wildlife viewing. Fourth, because of the more rugged terrain on the south side, both capital and maintenance costs would be increased. Fifth, there would be no opportunity for the private entrepreneur to develop tourist facilities except as concessionnaire.

In contrast, the northern access provides for all of these things and creates a roadway system that best serves the public and is the most economical to achieve.

NECESSARY ACTION

Both the Interior Alaska Transportation Study and the Tanana Valley Development Plan, both State funded planning studies, recognized the value and feasbility of the Kantishna access highway. The next step is the location phase which consists of a location study report, environmental impact statement and a public involvement plan. Upon completion of this phase, the State would have an approved alignment for this highway and would be ready to enter the next project phase, that of project design. The cost of this phase is estimated at $500,000.

PROJECT SCHEDULING

There is some urgency to fund this project this session. This urgency stems from the fact that the tourist demand is exceeding the capacity of the Park road resulting in unsafe operations and dissatisfied visitors. The Park Service is obligated to do something. If it adopts a short term solution, the Kantishna access option may be foreclosed. Both the State of Alaska and our tourist industry would be greatly compromised if that were to happen. The current federal administration is more attuned to improved access than has been past administrations. There is no way of knowing the position of future administrations. The Alaskan Congressional Delegation is very concerned over the situation created by the existing Park road. All are looking for

a solution to this problem.

Funds available for capital improvements within the State are shrinking. If the federal government can agree that the nothern access route provides the best solution to these problems, there should be opportunity for significant federal funding participation without effecting our regular federal highway resources.

If access is not provided into the Kantishna area, mining may not develop, resulting in the Park Service eventually buying these patented claims up and forever foreclosing on the possibility of the State and the private sector to share the benefits brought on by the highest mountain in North America.

82

Sec. 12.25.160. Arrest defined. Arrest is the taking of a person into custody in order that the person may be held to answer for the commission of a crime. (§ 2.01 ch 34 SLA 1962)

NOTES TO DECISIONS

Arrest for speedy trial purposes. — "Arrest," as used in Crim. R. 45(c)(1), which provides for a 120-day speedy trial period, must be defined in conformity with the statutory definition of an arrest. G.D. v. State, Ct. App. Op. No. 374 (File No. 7724), P.2d (1984).

Defendant was not arrested on the date of the child-in-need-of-aid hearing, and the 120-day speedy trial period did not begin to run until he was served with a copy of the information charging him with sexual assault in the first degree and contributing to the delinquency of a minor. G.D. v. State, Ct. App. Op. No. 374 (File No. 7724), P.2d (1984).

Drawn guns and handcuffing do not necessarily turn stop into arrest. Howard v. State, Ct. App. Op. No. 260 (File Nos. 6027, 6123), 664 P.2d 603 (1983).

Lawful stops and custodial arrest distinguished. — See Howard v. State, Ct. App. Op. No. 260 (File Nos. 6027, 6123), 664 P.2d 603 (1983).

Applied in Goss v. State, Sup. Ct. Op. No. 193 (File No. 235), 390 P.2d 220, cert. denied, 379 U.S. 859, 85 S. Ct. 118, 13 L.Ed.2d 62 (1964); Aldridge v. State, Sup. Ct. Op. No. 1971 (File No. 3413), 602 P.2d 798 (1979); Maynard v. State, Ct. App. Op. No. 136 (File No. 5501), 652 P.2d 489 (1982).

Sec. 12.25.180. When peace officer may issue citation or take person before the court. (a) When a person is stopped or contacted by a peace officer for the commission of a misdemeanor or the violation of a municipal ordinance, the person may, in the discretion of the contacting peace officer, be issued a citation instead of being taken before a judge or magistrate under AS 12.25.150, unless

(1) the person does not furnish satisfactory evidence of identity;

(2) the contacting officer has reasonable and probable cause to believe the person is a danger to self or others;

(3) the crime for which the person is contacted is one involving violence or harm to another person or to property; or

(4) the person asks to be taken before a judge or magistrate under AS 12.25.150.

(b) When a person is stopped or contacted by a peace officer for the commission of an infraction or a violation, the person shall be issued a citation instead of being taken before a judge or magistrate under AS 12.25.150, unless

(1) the person does not furnish satisfactory evidence of identity; or

(2) the person refuses to accept the citation or to give a written promise to appear as provided for under AS 12.25.190(c). (§ 1 ch 31 SLA 1973; am § 19 ch 127 SLA 1974; am § 3 ch 144 SLA 1977; am § 34 ch 102 SLA 1980)

Effect of amendments. — The 1980 amendment designated the provisions of this section as subsection (a), deleted "or an infraction" following "of a misdemeanor" near the beginning of subsection (a), and added subsection (b).

Legislative history reports. — For report on ch. 31, SLA 1973 (SB 25), see 1973 Senate Journal Supplement No. 7, p. 2.

Alaska Court System
State of Alaska

OFFICE OF ADMINISTRATIVE DIRECTOR

303 K Street
Anchorage, Alaska 99501

February 7, 1985

The Honorable Jack Coghill
Chairman
Senate Transportation Committee
Pouch V
Juneau, AK 99811

Dear Senator Coghill:

I am writing to bring to your attention some court system concerns arising from Senate Bill 82, an act relating to weights and measures, which is presently before the Senate Transportation Committee.

A major concern is the legislative intent about how violations under this act will be handled in court. Under Section 13 of the bill, an authorized employee may issue citations for size, weight, or load limitations and for violations of an overweight or oversize permit. Proposed paragraph 45.75.130(d) (page 7, lines 16-23) provides that a citation may be disposed of only by trial. These offenses will be classified as violations rather than misdemeanors (A.S. 45.75.380(a); page 13, lines 6-8) with an additional fine of five cents per pound for each overweight pound.

When these offenses were enforced by the Department of Public Safety they were included on the traffic and motor vehicle bail forfeiture schedule adopted by supreme court order under the authority of A.S. 28.05.151. These offenses were handled like traffic tickets. A person cited who wished to plead guilty could do so by waiving the person's right to trial and mailing a bail forfeiture amount to the court. The amount was set by the supreme court based upon recommendations from the Department of Public Safety and was standard for each offense. Persons who wished to plead not guilty were scheduled for a non-jury trial, and if found guilty could be required to pay a fine no greater than the bail forfeiture amount.

Under the scheme proposed in SB 82, all persons cited would be required to come to court to plead guilty. Because this results in additional judicial time handling court appearances rather than additional clerical time handling bail forfeiture payments, the court system suggests

COURT SYSTEM REQUEST

that the committee consider whether a bail forfeiture procedure would be appropriate for these offenses. I have attached a copy of language which could be incorporated into the bill if the committee wishes to consider this approach.

The bill raises an additional question about legislative intent. The Alaska Supreme Court has held that a defendant is entitled to a jury trial and, if indigent, to court-appointed counsel at public expense if a direct penalty of the offense will be incarceration, loss of a valuable license, or offenses which, even if incarceration is not possible, still connote criminal content.

A heavy enough fine might also indicate criminality. Baker v. City of Fairbanks, 471 P.2d 386 (1970). Additionally, A.S. 11.81.700(b)(56) defines a violation as a non-criminal offense punishable only by a fine and provides that a person charged with a violation is not entitled to a jury trial or counsel at public expense. Although offenses under this bill are classified as violations (Section 26), an additional fine of 5¢ per pound is required for overweight violations (see page 15, lines 7-12). If a defendant's vehicle is substantially overweight, the additional fine could increase the total fine to such an extent that it denotes criminality. Thus, jury trials and counsel at public expense may be constitutionally required, although the bill classifies these offenses as violations. Since cases requiring jury trials must be processed as misdemeanors before a district court judge, whereas cases which do not require a jury trial can be processed similarly to traffic infractions, it would be helpful if the intent regarding the availability of jury trials and counsel for these offenses could be clarified.

Thank you for this opportunity to submit comments. If I can provide further information to the committee, please let me know.

Sincerely,

Karla L. Forsythe

PROPOSED LANGUAGE

SENATE BILL 82

Form and issuance of citation. (a) When an authorized employee stops or contacts a person concerning a violation, the employee may issue a citation to the person as provided in A.S. 12.25.180.

(b) The supreme court shall specify by rule or order those violations that are appropriate for disposition without court appearance, and shall establish a schedule of bail amounts. The maximum bail forfeiture amount for an offense may not exceed the maximum fine specified by law for that offense. If the violation for which the citation is issued may be disposed of without court appearance, the issuing employee shall write on the citation the amount of bail forfeiture applicable to the violation.

(c) A person cited for a violation for which a bail forfeiture amount has been established under (b) of this section may, within 15 days after the date of the citation, mail or personally deliver to the clerk of the court in which the citation is filed by the employee

(1) the amount of bail indicated on the citation for that offense; and

(2) a copy of the citation indicating that the right to an appearance is waived, a plea of no contest is entered and the bail is forfeited.

(d) When bail has been forfeited under (c) of this section, a judgment of conviction shall be entered. Forfeiture of bail is a complete satisfaction for the violation. The clerk of the court accepting the bail forfeiture shall provide the offender with a receipt stating that fact.

(e) If the person cited fails to pay the bail forfeiture amount established under (b) of this section or to appear in court as required, the citation is considered a summons for a misdemeanor.

(f) Notwithstanding other provisions of law, if a person cited for a violation for which a bail forfeiture amount has been established under (b) of this section appears in court and is found guilty, the penalty that is imposed for the offense may not exceed the bail forfeiture amount for that offense established under (b) of this section.

OVERSIZE PERMIT VIOLATIONS - AT SCALE HOUSES

CSSB 82 (Trans)

OUTLINE FOR FLOOR STATEMENT

- Most of the bill is housekeeping, making gender and grammatical changes, and replacing "director" with "commissioner" in a multitude of occurrences.

- Substantive change in Section 14, which in the original and in the CS allows the department to issue citations for oversize and overweight violations. This is to close a loophole that has existed since 1982, when the scale houses were transferred to Commerce from Public Safety. Currently, department personnel can stop a violator, but cannot issue a citation.

Additionally, in the CS, a provision has been made, at the request of the Court System, to allow for them to establish a bail forfeiture schedule, so that not all of these violations will have to come to court.

- 2nd substantive change is in section 27, where it is a violation to hinder or obstruct certain department personnel in their performance of duties, to violate an oversize or overweight permit, or regulation.

- Additionally, the original bill would have set the fine for overweight violations at $300 plus 5 cents a pound, and the cs puts it back to the current rate of 5 cents a pound. Testimony indicated that with the heavier fine, the violation could be propelled into a higher class of crime by the constitution.

- Repealers:

AS 28.40.050(e) is the current 5 cents a pound fine, which is placed elsewhere in the statutes by the CS.

AS 45.75.360 is current prohibition of hindering or obstructing an officer, which is recodified elsewhere by the CS.

REQUESTED PROCEDURE TO MOVE COMMITTEE SUBSTITUTE FOR SB 82

- AFTER THE SENATE SECRETARY BRINGS UP THE SB 82 AS THE "NEXT ORDER OF BUSINESS", AND SAYS SHE HAS ONE COMMITTEE SUBSTITUTE ON HER DESK,

- MOVE AND ASK UNANIMOUS CONSENT THAT THE TRANSPORTATION COMMITTEE SUBSTITUTE BE ADOPTED.

IN THE SENATE BY THE TRANSPORTATION COMMITTEE

CS FOR SENATE BILL NO. 82 (Transportation)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to weights and measures; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 45.75.030 is amended to read:

Sec. 45.75.030. STATE DIRECTOR AND INSPECTORS OF WEIGHTS AND MEASURES. The commissioner of commerce and economic development is ex officio state director of weights and measures. The commissioner may delegate this authority, and [DIRECTOR] may appoint state inspectors.

* Sec. 2. AS 45.75.040 is amended to read:

Sec. 45.75.040. GENERAL POWERS AND DUTIES OF COMMISSIONER [DIRECTOR]. The commissioner [DIRECTOR] is the custodian of the state standards of weight and measure and of the other standards and equipment provided for by this chapter, and [. THE DIRECTOR] shall keep accurate records of the standards and equipment. The commissioner [DIRECTOR] shall enforce this chapter, implement AS 44.33.020(25), and [. HE SHALL] supervise the weights and measures offered for sale, sold, or in use in the state.

* Sec. 3. AS 45.75.050(a) is amended to read:

(a) The commissioner [DIRECTOR] shall adopt [ISSUE] regulations necessary for the enforcement of this chapter in accordance with the Administrative Procedure Act (AS 44.62). These have the effect of law.

* Sec. 4. AS 45.75.050(b) is amended to read:

(b) The regulations may include

TRANSPORTATION C.S.

(1) standards of net weight, measure, or count, and reasonable standards of fill, for a [ANY] commodity in package form;

(2) rules governing the technical and reporting procedures to be followed, and the report and record forms and marks of approval and rejection to be used by inspectors of weights and measures in the discharge of their official duties;

(3) exemptions from the sealing or marking requirements of AS 45.75.120 for [WITH RESPECT TO] weights and measures of a character or size that sealing or marking would be inappropriate, impracticable, or damaging to the apparatus in question; [AND]

(4) for [WITH RESPECT TO] classes of weights and measures of a character that annual retesting is unnecessary to continued accuracy, exemptions from the requirements of AS 45.75.070 and 45.75.080 for annual testing, and schedules fixing the frequency of required retests for classes of devices exempted;

(5) in the implementation of AS 44.33.020(25), provisions governing the enforcement of the size, weight, and load limitations established under AS 19.10.060; the issuance of, and the enforcement of the terms of, permits for overweight and oversize vehicles; and the operation of weigh stations.

* Sec. 5. AS 45.75.050(d) is amended to read:

(d) The specifications, tolerances, and regulations for commercial weighing and measuring devices, together with amendments to them, as recommended by the National Bureau of Standards and published in National Bureau of Standards Handbook 44 and supplements to it, or in any publication revising or superseding Handbook 44, are the specifications, tolerances, and regulations for commercial weighing and measuring devices of the state, except as specifically modified, amended, or rejected by a regulation adopted [ISSUED] by the

commissioner [DIRECTOR].

* Sec. 6. AS 45.75.060 is amended to read:

Sec. 45.75.060. OFFICE AND FIELD [WORKING] STANDARDS AND EQUIPMENT. The commissioner [STATE] shall maintain [SUPPLY THE DIVISION OF WEIGHTS AND MEASURES WITH] a duplicate set of state standards of weight and measure, referred to in this chapter as office standards. The commissioner [STATE] shall also supply field standards and the equipment that [WHICH] is necessary to carry out this chapter. The commissioner shall verify the office standards and field standards on [SHALL BE VERIFIED UPON] their initial receipt and at least once each year afterward. The commissioner shall verify the office standards [SHALL BE VERIFIED] by direct comparison with the state standards. The commissioner shall verify the [THE] field standards [SHALL BE VERIFIED] by comparison with the office standards.

* Sec. 7. AS 45.75.070 is amended to read:

Sec. 45.75.070. TESTING AND INSPECTION OF LOCAL STANDARDS AND WEIGHTS AND MEASURES AT STATE-SUPPORTED INSTITUTIONS. (a) At least once every five years, the commissioner [DIRECTOR] shall test the standards of weight and measure obtained by a city that [WHICH] has appointed a sealer of weights and measures, and shall approve them if they are correct. The commissioner [DIRECTOR] shall inspect the standards at least once every two years.

(b) The commissioner [DIRECTOR] shall from time to time test all weights and measures used in checking the receipt or disbursement of supplies in every institution maintained by money appropriated by the legislature, and shall report the commissioner's [HIS] findings, in writing, to the supervisory board and to the executive officer of the institution concerned.

* Sec. 8. AS 45.75.080(a) is amended to read:

(a) The commissioner [DIRECTOR] may inspect and test, to ascertain if they are correct, all weights and measures kept, offered, or exposed for sale. The commissioner [DIRECTOR] shall, at least annually [SEMIANNUALLY AND MORE OFTEN AS HE CONSIDERS NECESSARY], inspect and test, to ascertain if they are correct, all weights and measures commercially used

(1) in determining the weight, measurement, or count of commodities or things sold, or offered or exposed for sale, on the basis of weight or of measure;

(2) in computing the basic charge or payment for services rendered on the basis of weight or of measure or count; or

(3) in determining weight or measurement when a charge is made for this determination.

* Sec. 9. AS 45.75.090 is amended to read:

Sec. 45.75.090. INVESTIGATIONS. The commissioner [DIRECTOR] shall investigate complaints of violations of this chapter, and shall [, UPON HIS OWN INITIATIVE,] conduct other [THE] investigations that the commissioner [WHICH HE] considers appropriate and advisable to develop information on prevailing procedures in commercial quantity determination, [AND] on possible violations of this chapter, and to promote the general objective of accuracy in the determination and representation of quantity in commercial transactions.

* Sec. 10. AS 45.75.100 is amended to read:

Sec. 45.75.100. INSPECTION OF PACKAGES. (a) The commissioner [DIRECTOR] shall, from time to time, weigh or measure and inspect packages or amounts of commodities kept, offered, or exposed for sale to determine whether they contain the amounts represented and whether they are kept, offered, or exposed for sale in accordance with law. When packages or amounts of commodities do not contain the amounts

represented, or are kept, offered, or exposed for sale in violation of law, the commissioner [DIRECTOR] may order them off sale and may mark or tag them to show they are illegal. The commissioner [DIRECTOR] may use recognized sampling procedures. The commissioner shall determine the compliance [COMPLIANCE] of a given lot of packages [SHALL BE DETERMINED] on the basis of the result obtained on a sample selected from and representative of the lot.

(b) A [NO] person may not

(1) sell, or keep, offer, or expose for sale in intrastate commerce a package or amount of commodity that has been ordered off sale or marked or tagged as provided in this section until the package or amount of commodity has been brought into full compliance with all legal requirements; or

(2) dispose of a package or amount of commodity that is ordered off sale or marked or tagged as provided in this section and that does not meet legal requirements, except with the specific approval of the commissioner [DIRECTOR].

* Sec. 11. AS 45.75.110(a) is amended to read:

(a) The commissioner [DIRECTOR] may issue stop-use orders, stop-removal orders, and removal orders for weights and measures used or capable of being used commercially. The commissioner [DIRECTOR] may issue stop-removal orders and removal orders for packages or amounts of commodities kept, offered, or exposed for sale whenever the commissioner [HE] considers it necessary or expedient in enforcing this chapter.

* Sec. 12. AS 45.75.120 is amended to read:

Sec. 45.75.120. DISPOSITION OF CORRECT AND INCORRECT APPARATUS. (a) The commissioner [DIRECTOR] shall approve for use and seal or mark with appropriate devices the weights and measures that the

commissioner [WHICH HE] finds on [UPON] inspection and test to be correct as provided in AS 45.75.050, and shall reject and mark or tag as "rejected" the weights and measures that are found [WHICH HE FINDS], upon inspections or testing [TEST], to be incorrect as provided in AS 45.75.050 but which in the commissioner's [HIS] best judgment may be satisfactorily repaired [ARE SUSCEPTIBLE OF SATISFACTORY REPAIR]. This sealing or marking is not required for weights and measures exempted by regulation [OF THE DIRECTOR].

(b) The commissioner [DIRECTOR] shall condemn, and may seize and destroy weights and measures found to be incorrect that [WHICH], in the commissioner's [HIS] best judgment, cannot be satisfactorily repaired [ARE NOT SUSCEPTIBLE OF SATISFACTORY REPAIR]. Weights and measures that [WHICH] are rejected under (a) of this section may be confiscated and destroyed by the commissioner [DIRECTOR] if not corrected as required by AS 45.75.180 or if used or disposed of contrary to the requirements of AS 45.75.180.

* Sec. 13. AS 45.75.130 is amended to read:

Sec. 45.75.130. POLICE POWERS AND RIGHT OF ENTRY AND STOPPAGE. In the enforcement of this chapter and [ANY] other laws [LAW] dealing with weights and measures, the commissioner [DIRECTOR] has special police powers. The commissioner [HE] may arrest, without formal warrant, a [ANY] person violating the law, and seize for use as evidence, without formal warrant, incorrect or unsealed weights and measures or amounts or packages of commodity, used, retained, offered, or exposed for sale, or sold in violation of law. In performing these [HIS] duties, the commissioner [DIRECTOR] may enter, without formal warrant, a [ANY] structure or premises, and stop any person and require the person [HIM] to proceed to a specified place.

* Sec. 14. AS 45.75 is amended by adding new sections to article 2 to

read:

Sec. 45.75.131. ISSUANCE OF CITATIONS. An employee of the Department of Commerce and Economic Development who is authorized by the commissioner to enforce the size, weight, and load limitations adopted by the Department of Transportation and Public Facilities under AS 19.10.060 may issue a citation to a person who violates

(1) a load limitation;

(2) the terms of an overweight or oversize vehicle permit issued under AS 44.33.020(25) and AS 45.75.040; or

(3) the provisions of a regulation adopted under AS 44.33.-020(25) and AS 45.75.050(b)(5).

Sec. 45.75.132. FORM AND ISSUANCE OF CITATION. (a) A citation issued under this section must be in writing. A person receiving the citation is not required to sign a promise to appear in court.

(b) The time specified in the notice to appear on a citation issued under this section must be at least 15 days after the issuance of the citation, unless the person cited requests an earlier hearing.

(c) The commissioner is responsible for the issuance of books containing appropriate citations and shall maintain a record of each book and each citation contained in it. The commissioner shall require and retain a receipt for every book issued to an employee of the department designated by the commissioner to provide investigative service to enforce provisions of this chapter.

(d) An employee who issues a citation under this section shall deposit the original or a copy of the citation with a court having jurisdiction over the alleged offense. Upon its deposit with the court, the citation may be disposed of only by trial in the court or other official action taken by the magistrate, judge, or prosecutor. The employee who issued the citation may not dispose of it or copies

of it or of the record of its issuance except as required under this subsection and (e) of this section.

(e) The commissioner shall require the return of a copy of every citation issued under this section and of all copies of every citation that has been spoiled or on which an entry has been made and not issued to an alleged violator. The commissioner shall also maintain in connection with every citation issued a record of the disposition of the charge by the court in which the original or copy of the citation was deposited.

(f) If the form of citation issued under this section includes the essential facts constituting the offense charged and is sworn to as required under the laws of this state for a complaint charging commission of the offense alleged in the citation, the citation when filed with a court having jurisdiction, is considered to be a lawful complaint for the purpose of prosecution.

(g) Unless the citation has been voided or otherwise dismissed by the magistrate, judge, or prosecutor, or bail has been forfeited under AS 45.75.133, a person who fails to appear in court to answer a citation issued under this section, regardless of the disposition of the charge for which the citation was issued, is guilty of a class B misdemeanor.

Sec. 45.75.133. BAIL FORFEITURE. (a) The supreme court shall specify by rule or order those violations that are appropriate for disposition without court appearance, and shall establish a schedule of bail amounts. The maximum bail forfeiture amount for an offense may not exceed the maximum fine specified by law for that offense. If the person who has been cited can dispose of the violation without court appearance, the issuing employee shall write on the citation the amount of bail forfeiture applicable to the violation.

(b) A person cited for a violation for which a bail forfeiture amount has been established under (a) of this section may, within 15 days after the date of the citation, mail or personally deliver to the clerk of the court in which the citation is filed by the employee

(1) the amount of bail indicated on the citation for that offense; and

(2) a copy of the citation indicating that the right to an appearance is waived, a plea of no contest is entered and the bail is forfeited.

(c) When the cited person has forfeited bail under (b) of this section, the court shall enter a judgment of conviction. Forfeiture of bail is a complete satisfaction for the violation. The clerk of the court accepting the bail forfeiture shall provide the offender with a receipt stating that fact.

(d) A cited person who fails to pay the bail forfeiture amount established under (a) of this section or to appear in court as required, is guilty of a class B misdemeanor.

(e) Notwithstanding other provisions of law, if a person cited for a violation for which a bail forfeiture amount has been established under (a) of this section appears in court and is found guilty, the court may not impose a penalty that exceeds the bail forfeiture amount for that offense established under (a) of this section.

* Sec. 15. AS 45.75.140 is amended to read:

Sec. 45.75.140. POWERS AND DUTIES OF <u>INSPECTORS</u> [DEPUTY DIRECTOR AND INSPECTOR]. The powers and duties of the <u>commissioner</u> [DIRECTOR] specified in <u>AS 45.75.070 - 45.75.100, 45.75.120,</u> [AS 45.75.070,] 45.75.130, <u>and</u> 45.75.170 <u>may</u> [, AND 45.75.380 SHALL] also be exercised by [THE DEPUTY DIRECTOR AND] inspectors, when acting under the instructions and at the direction of the <u>commissioner</u> [DIRECTOR].

* Sec. 16. AS 45.75.150 is amended to read:

Sec. 45.75.150. APPOINTMENT OF CITY SEALERS AND DEPUTY SEALERS OF WEIGHTS AND MEASURES. (a) A city may appoint a sealer of weights and measures, and the deputy sealers of weights and measures it needs. If the city appoints a sealer, the city [IT] shall obtain at its expense the standards of weight and measure [WEIGHTS AND MEASURES] and the additional equipment, for use in the enforcement of this chapter in the city, which the commissioner [DIRECTOR] prescribes.

(b) When the standards of weight and measure provided by a city are examined and approved by the commissioner [DIRECTOR], they are the official standards for the city. At least every five years, the sealer shall make or arrange to have made comparisons between the sealer's [HIS] field standards and appropriate standards of a higher order belonging to the sealer's [HIS] city or to the state, in order to maintain the field standards in accurate condition.

* Sec. 17. AS 45.75.160 is amended to read:

Sec. 45.75.160. CITY SEALERS AND DEPUTY SEALERS. The sealer of a city, and the sealer's [HIS] deputy [SEALER] when acting under the sealer's [HIS] instructions and [AT HIS] direction, have the same powers and shall perform the same duties within the city as those granted to and imposed upon the commissioner [DIRECTOR] by AS 45.75.-080 - 45.75.130 and 45.75.380.

* Sec. 18. AS 45.75.170 is amended to read:

Sec. 45.75.170. CONCURRENT JURISDICTION. In each city having a sealer of weights and measures, the commissioner [DIRECTOR] has concurrent authority to enforce this chapter.

* Sec. 19. AS 45.75.180 is amended to read:

Sec. 45.75.180. DUTY OF OWNERS OF INCORRECT APPARATUS. Weights and measures rejected by the commissioner [DIRECTOR] or a sealer

remain subject to the control of the rejecting authority until suitable repair or disposition of them is made as required by this section. The owner of a rejected weight and measure shall correct it within 30 days or a longer period authorized by the rejecting authority, [;] or [,] may dispose of it in the manner authorized by the rejecting authority. The owner of rejected [REJECTED] weights and measures may not use them again [BE USED] commercially until the rejected weights and measures are officially reexamined [RE-EXAMINED] and found to be correct or until specific written permission for their use is issued by the rejecting authority.

* Sec. 20. AS 45.75.190(c) is amended to read:

(c) The commissioner [DIRECTOR] may adopt [ISSUE] reasonable regulations necessary to assure that a seller determines the amounts of commodity sold [ARE DETERMINED] in accordance with good commercial practice and in an accurate and informative manner [AND ARE SO DETERMINED AND REPRESENTED AS TO BE ACCURATE AND INFORMATIVE].

* Sec. 21. AS 45.75.200(c) is amended to read:

(c) Under (a)(1) of this section the commissioner [DIRECTOR] shall, by regulation, establish

(1) reasonable variations or tolerances to be allowed, that [WHICH] may include variations below the declared weight or measure caused by ordinary and customary exposure, only after the commodity is introduced into intrastate commerce, to conditions that normally occur in good distribution practice and that unavoidably result in decreased weight or measure,

(2) exemptions for [EXEMPTION AS TO] small packages, and

(3) exemptions for [AS TO] commodities put up in variable weights or sizes for sale to the consumer intact and either customarily not sold as individual units or customarily weighed or measured at

the time of sale to the consumer.

* Sec. 22. AS 45.75.220 is amended to read:

Sec. 45.75.220. MISLEADING PACKAGES. A [NO] commodity in package form may not be so wrapped, or put in a container so made, formed, or filled as to mislead the purchaser about [AS TO] the quantity of the contents of the package, and the contents of a container may not fall below the reasonable standard of fill that [WHICH] the commissioner [DIRECTOR] prescribes for the commodity.

* Sec. 23. AS 45.75.282(b) is amended to read:

(b) The vendor shall retain one [ONE] of the tickets provided for in (a) of this section [SHALL BE RETAINED BY THE VENDOR,] and shall deliver the other [SHALL BE DELIVERED] to the purchaser at the time of delivery of the commodity, or surrender the other [SURRENDERED], on demand, to the commissioner [DIRECTOR, OR THE DEPUTY DIRECTOR,] or an inspector, or a sealer[,] or a deputy sealer, who may [, IF HE WANTS TO] retain it as evidence and, if it is retained, the commissioner or deputy sealer [,] shall issue a weight slip in place of it.

* Sec. 24. AS 45.75.290(b) is amended to read:

(b) The vendor shall retain one [ONE] of the tickets provided for under (a) of this section [SHALL BE RETAINED BY THE VENDOR] and shall deliver the other [SHALL BE DELIVERED] to the purchaser at the time of delivery of the fuel, or shall surrender it, [BE SURRENDERED,] on demand, to the commissioner [DIRECTOR, OR THE DEPUTY DIRECTOR] or an inspector, or a sealer or deputy sealer, who may [, IF HE DESIRES TO] retain it as evidence and [, SHALL] issue a weight slip in place of it for delivery to the purchaser. If the purchaser carries away the [HIS] purchase, the vendor is required only to give to the purchaser at the time of sale a delivery ticket stating the number of

pounds of fuel delivered to the purchaser [HIM].

* Sec. 25. AS 45.75.300 is amended to read:

Sec. 45.75.300. TEXTILE PRODUCTS. It is unlawful for a person to keep for the purpose of sale, offer or expose for sale, or sell textile yard goods put up or packaged in advance of sale in a bolt or roll, or another [ANY OTHER] textile product put up or packaged in advance of sale in another [ANY OTHER] unit, for wholesale or retail sale, unless the person definitely, plainly and conspicuously marks the bolt or roll, or other unit [, IS DEFINITELY, PLAINLY, AND CONSPICUOUSLY MARKED] to show its net measure in terms of yards or its net weight, in terms of avoirdupois pounds or ounces, subject to the following limitations and requirements:

(1) a unit of twine or cordage may be marked to show its net measure in terms of feet; readywound bobbins not sold separately are not required to be individually marked, but the package containing the bobbins shall be marked to show the number of bobbins contained in it and the net weight or measure of the thread on each bobbin; a unit of sewing, basting, mending, darning, crocheting, tatting, hand-knitting, or embroidery thread or yarn, except nylon hand-knitting yarn, that is not composed in whole or in part of wool, the net weight of which is less than two ounces avoirdupois, shall be marked to show its net measure in terms of yards as unwound from the ball or from the spool or other holder; a retail unit of a textile product sold only for household use consisting of a package containing two or more similar individual units that are not sold separately shall be marked to show the number of individual units in the package and the net weight or net measure of the product in each individual unit, but this does not apply where the individual units are separately marked; a unit of yarn, composed in whole or in part of wool, sold to consumers

for handiwork, shall be marked to show the net weight of the yarn, except that a [ANY SUCH] un[illegible] tapestry, mending, or embroidery yarn that [THE NET MEASURE OF WHICH] does not exceed 50 yards in net measure, may be marked to show its linear measure only;

(2) the marking required by this section shall in all cases be in combination with the name and place of business of the manufacturer, packer, or distributor of the product, or a trademark, symbol, brand, or other mark that identifies the manufacturer, packer, or distributor;

(3) reasonable tolerances shall be permitted, and the commissioner shall include reasonable tolerances [THESE SHALL BE INCLUDED] in regulations adopted for the enforcement of this section [THAT ARE ISSUED BY THE DIRECTOR];

(4) this section does not apply to the following textile products when sold at wholesale in bulk by net weight: cordage, agricultural bag sewing threads, twines, yarns that are to be processed, and yarns that are to be industrially converted into end-use products.

* Sec. 26. AS 45.75.330 is amended to read:

Sec. 45.75.330. INJUNCTION. The commissioner [DIRECTOR] may apply to a court for a temporary or permanent injunction restraining a person from violating a provision of this chapter.

* Sec. 27. AS 45.75.380 is amended to read:

Sec. 45.75.380. OFFENSES AND PENALTIES. (a) A person commits a violation subject to the penalty specified in AS 12.55.035(b)(5) if the person does one or more of the following acts [A PERSON WHO, BY HIMSELF OR BY HIS SERVANT, OR AGENT, OR AS THE SERVANT OR AGENT OF ANOTHER, PERFORMS ANY ONE OF THE FOLLOWING ACTS IS GUILTY OF A MISDEMEANOR AND UPON A FIRST CONVICTION OF THE VIOLATION IS PUNISHABLE BY A FINE OF NOT LESS THAN $20 NOR MORE THAN $200, OR BY IMPRISONMENT FOR

NOT MORE THAN THREE MONTHS, OR BY BOTH. UPON A SECOND OR SUBSEQUENT CONVICTION, THE PERSON IS PUNISHABLE BY A FINE OF NOT LESS THAN $50 NOR MORE THAN $500, OR BY IMPRISONMENT FOR NOT MORE THAN ONE YEAR, OR BY BOTH]:

(1) uses or has in possession for the purpose of using for a [ANY] commercial purpose specified in AS 45.75.080, sells, offers, or exposes for sale, or hire, or has in possession for the purpose of selling or hiring, an incorrect weight or measure or a device or instrument used to or calculated to falsify a weight or measure;

(2) uses or has in possession for current use, in buying or selling a commodity or thing, or for hire or award, or in the computation of a basic charge or payment for services rendered on the basis of weight or measurement, or in the determination of weight or measurement when a charge is made for determination, a weight or measure that has not been tested and sealed by the appropriate authority within one year, (A) unless the person gives written notice [IS GIVEN] to the appropriate authority to the effect that the weight or measure is available for examination, or is due for reexamination [RE-EXAMINATION], as the case may be, (B) unless the person receives specific written permission to use the weight or measure [IS RECEIVED] from the appropriate authority, or (C) unless the weight or measure is exempt from sealing or annual testing requirements by AS 45.75.080 or by a regulation adopted [OF THE DIRECTOR ISSUED] under AS 45.75.050;

(3) disposes of a rejected or condemned weight or measure in a manner contrary to law or regulation;

(4) removes from a weight or measure, contrary to law or regulation, a tag, seal, or mark placed on it by the appropriate authority;

(5) sells or[,] offers [OR EXPOSES] for sale less than the

quantity the person [HE] represents of a commodity, thing, or service;

(6) takes more than the quantity the person [HE] represents of a commodity, thing, or service when, as buyer, the person [HE] furnished the weight or measure that the seller used to determine [BY MEANS OF WHICH] the amount of the commodity, thing, or service [IS DETERMINED];

(7) keeps for the purpose of sale, advertises, or offers [OR EXPOSES] for sale, or sells a commodity, thing, or service in a condition or manner contrary to law or regulation;

(8) uses in retail trade, except in the preparation of packages put up in advance of sale and of medical prescriptions, a weight or measure that is not so positioned that a customer may accurately read, from a position that may reasonably be assumed by a customer, its indications [MAY BE ACCURATELY READ] and observe the weighing or measuring operation [OBSERVED FROM SOME POSITION WHICH MAY REASONABLY BE ASSUMED BY A CUSTOMER];

(9) hinders or obstructs the commissioner, an inspector, a sealer, or a deputy sealer in the performance of official duties under this chapter;

(10) violates a provision of an overweight or oversize vehicle permit issued under AS 44.33.020(25);

(11) violates a weight, load, or size limitation established under AS 19.10.060 or a regulation adopted under AS 19.05.020, AS 44.33.020(25), or AS 45.75.050(b)(5);

(12) violates a provision of this chapter or of a regulation adopted under this chapter for which a specific penalty is not prescribed.

(b) Notwithstanding the maximum fine for a violation provided under (a) of this section, the commissioner shall impose on a person

who violates a regulation or special permit governing the weight limit of a motor vehicle a maximum penalty of $.05 for each pound of weight over the authorized weight limit for the vehicle.

* Sec. 28. AS 45.75.390(4) is repealed and reenacted to read:

(4) "commissioner" means the commissioner of commerce and economic development or the commissioner's designee;

* Sec. 29. AS 28.40.050(e) and AS 45.75.360 are repealed.

* Sec. 30. This Act takes effect immediately in accordance with AS 01.-10.070(c).

RE: SB 82

In addition to cleaning up language in statutes dealing with weights and measures SB 82 proposes to complete the transfer of weights and measures from Department of Public Safety to the Department of Commerce and Economic Development by giving DCED personnel the authority to write citations. Included is the authority to arrest violators of regulations adopted under provision of the bill, to seize any commodity offered for sale in violation of weight and measurement standards, and to provide for deposition of citations by trial or other official action. The committee staff expects a position paper by the General Council of the Alaska Court System regarding the disposition of citations included in the bill.

Section 26 revises the penalty clause for certain offenses to conform with the new criminal code by making them "violations" with the penalty prescribed by AS 12.55.035(b)(5) a maximum $300 fine. Subsection (b) provides for a five cents per pound fine in addition to the $300 fine for each pound over legal weight restrictions. Section 26 then makes it a violation to hinder or obstruct officials doing their duties; to violate the provision of an oversize or overweight permit; or to violate size, weight or load regulations.

Section 27 repeals definition of "director" and re-enacts it as "commissioner" for consistency with the rest of the bill.

Section 28 Repeals AS 28.40.050(e)-overweight penalty clause levying five cents per pound fine, and AS 45.75.300-hindering or obstructing an officer, taken care of in Sec. 26

The remaining sections and of the bill are simply housekeeping/updating of outdated language, those are: Sections 1, 3, 5 through 7, 9 through 12, and 14 through 25.

Re: Proposed amendments to SB 82

Attached you will find two amendments to SB 82 proposed for consideration by the committee this afternoon. The first would re-write language regarding violations to allow the court system to process citations through a bail forfeiture schedule. Attached to the amendment are copies of three occurrences of bail forfeiture mechanisms for similar violations. This amendment should answer the first concern expressed by Karla Forsythe of the Alaska Court System - that without a bail forfeiture provision the court system would be overloaded. This was detailed in the letter you should have received earlier today from this staff.

The second proposed amendment would reduce the fine for overweight violations from "up to $300 plus 5 cents per pound" to " 5 cents per pound over the authorized weight." This amendment reverts the penalty back to what it now reads in statute, as well as to answer the court system's second concern - that higher fines constitutionally propel the violation into a criminal offense status.

Both of these amendments have been approved in concept by the director of the division of measurement standards.

Re: Proposed CS for SB 82

As per the discussion of SB 82, making changes to weights and measures statutes, that took place at the committee meeting of February 8, we have had the attached committee substitute drawn up.

Aside from the two substantial changes the members asked for, which are found in sections 14 and 27 of the proposed cs, the bill remains nearly identical to the original (a number of minor gender and grammatical changes were incorporated by legal services).

The change in section 14 (originally part of section 13) adds language to integrate the court system's request for a mechanism to allow for a bail forfeiture schedule.

The change in section 27 deletes the imposition of a $300 fine on top of $.05 per pound for overweight violations, and sets the entire fine at $.05 per pound over the authorized weight.

BILL SHEFFIELD
GOVERNOR

SB 382

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

January 22, 1985

The Honorable Don Bennett
President of the Senate
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Senator Bennett:

Attached is a bill amending the Weights and Measures Act, AS 45.75.

In 1982, the overweight and oversize motor vehicle program was transferred from the Department of Public Safety to the Department of Commerce and Economic Development. This transfer included the duties of operating vehicle weighing stations, issuing permits for overweight and oversize vehicles, and enforcing the vehicle size, weight, and load limits established by the Department of Transportation and Public Facilities (DOTPF). (Ch. 77, SLA 1982)

The 1982 transfer of duties was accomplished only by repealing AS 28.05.011(8) and adding a paragraph (25) to the general duties of the Department of Commerce and Economic Development listed in AS 44.33.020. This bill completes the transfer by also adding those duties to the Weights and Measures Act (secs. 2 and 4 of the bill). The bill also decreases the frequency of required inspections and tests of all weights and measures from semiannual to annual (sec. 8 of the bill). More frequent inspections and tests can still be made in problem areas, however.

Section 13 of the bill clarifies that the commissioner of commerce and economic development may authorize department employees to arrest or issue citations to persons who violate the DOTPF vehicle size, weight, and load limits, the provisions of an overweight or oversize vehicle permit, or department regulations. It also specifies procedures and rules governing those citations. This eliminates an ambiguity and possible loophole left after the 1982 transfer of enforcement authority to the department.

Section 26 of the bill amends AS 45.75.380 to increase the current maximum fine for all weights and measures offenses

GOVERNOR'S TRANSMITTAL LETTER

from $200 (or five cents a pound for overweight vehicle offenses) to a $300 fine (plus five cents a pound for overweight vehicle offenses). By making these offenses subject to the violation penalty set out in AS 12.55.035(b)(5), they are like AS 28.40.050(c)'s "infractions," and the possibility of imprisonment would be dropped, as would the increase in penalties for subsequent convictions. This change conforms to the new Criminal Code (AS 11) and the Code of Criminal Procedure (AS 12) and will provide a more effective deterrent to weights and measures violations. Severe penalties and certainty of conviction are two deterrents to unlawful conduct. It is felt that there is a greater probability of conviction under the "infraction" approach and that it would be the more effective deterrent to the various weights and measures offenses -- both statutory and regulatory. Also, under AS 45.75.130(g) (in sec. 13 of the bill), failure to respond to a citation for one of these violations would be a class B misdemeanor; cf. AS 12.25.230.

Most of the bill, including secs. 1 -- 3 and 5 -- 26, clarifies a confusing approach taken by the 1961 legislature which passed the Weights and Measures Act. For reasons which are not now clear, and which, to the extent that we can guess what they were, no longer apply, AS 47.75.030 states that the commissioner of commerce and economic development is the director of weights and measures, and throughout the chapter many references are made to the director. To avoid confusion with the director of the division of measurement standards, who is currently assigned to administer the Act, this bill changes all of those references to the director to be references to the commissioner.

The bill also makes "housekeeping" amendments to clean up outdated language and to correct several citations.

All of these changes in the Weights and Measures Act will increase the effectiveness and efficiency of implementation of the Act, especially the overweight and oversize vehicle program.

Sincerely,

Bill Sheffield
Governor

Re: Proposed amendments to SB 82

Attached you will find two amendments to SB 82 proposed for consideration by the committee this afternoon. The first would re-write language regarding violations to allow the court system to process citations through a bail forfeiture schedule. Attached to the amendment are copies of three occurrences of bail forfeiture mechanisms for similar violations. This amendment should answer the first concern expressed by Karla Forsythe of the Alaska Court System - that without a bail forfeiture provision the court system would be overloaded. This was detailed in the letter you should have received earlier today from this staff.

The second proposed amendment would reduce the fine for overweight violations from "up to $300 plus 5 cents per pound" to " 5 cents per pound over the authorized weight." This amendment reverts the penalty back to what it now reads in statute, as well as to answer the court system's second concern - that higher fines constitutionally propel the violation into a criminal offense status.

Both of these amendments have been approved in concept by the director of the division of measurement standards.

AMENDMENT NO 1

PROPOSED AMENDMENT

TO

SB 82 - Weights and measures cleanup bill

On Page 7, line 4, Delete

Line 4 beginning with "A citation issued..."

and Lines 5 through 9 in their entireties;

On Page 7, line 16, Delete

Subsection (d) in its entirety;

On Page 8, line 2, Delete

Subsections (f) and (g) in their entireties.
Renumber remaining subsections of Section 13 as appropriate

On Page 8, line 13, add a new Section 14 to read:

"* Sec. 14. AS 45.75 is amended by adding a new subsection to read:

Sec. 45.75.135. FORM AND ISSUANCE OF CITATION. (a) When an authorized employee stops or contacts a person concerning a violation, the employee may issue a citation to the person. The person receiving the citation may not be required to endorse the citation.

(b) The supreme court shall specify by rule or order those violations that are appropriate for disposition without court

appearance, and shall establish a schedule of bail amounts. The maximum bail forfeiture amount for an offense may not exceed the maximum fine specified by law for that offense. If the violation for which the citation is issued may be disposed of without court appearance, the issuing employee shall write on the citation the amount of bail forfeiture applicable to the violation.

(c) A person cited for a violation for which a bail forfeiture amount has been established under (b) of this section may, within 15 days after the date of the citation, mail or personally deliver to the clerk of the court in which the offense is filed by the employee

(1) the amount of bail indicated on the citation for that offense; and

(2) a copy of the citation indicating that the right to an appearance is waived, a plea of no contest is entered and the bail is forfeited

(d) When bail has been forfeited under (c) of this section, a judgment of conviction shall be entered. Forfeiture of bail is a complete satisfaction for the violation. The clerk of the court accepting the bail forfeiture shall provide the offender with a receipt stating that fact.

(e) If the person cited fails to pay the bail forfeiture amount established under (b) of this section or to appear in court as required, the citation is considered a summons for a misdemeanor.

(f) Notwithstanding other provisions of law, if a person cited for a violation for which a bail forfeiture amount has been established under (b) of this section appears in court and is found guilty, the penalty that is imposed for the offense may not exceed the bail forfeiture amount for that offense established under (b) of this section."

And renumber the remaining sections accordingly

Article 4. Disposition of Certain Vehicle and Traffic Offenses.

Section
151. Form and issuance of citation

Sec. 28.05.151. Form and issuance of citation. (a) When a person is arrested or cited for the commission of a vehicle or traffic offense which is a misdemeanor or an infraction, the arresting or citing officer shall, except when otherwise required by law or the immediate circumstances, issue a citation to the person arrested or cited. The person receiving the citation may not be required to endorse the citation.

(b) The state supreme court shall determine by rule or order those vehicle and traffic offenses that are amenable to disposition without court appearance and shall establish a schedule of bail amounts, not to exceed fines prescribed by law, for each offense. If the offense for which the citation is issued is one which may be disposed of without court appearance, the citing officer shall write on the citation the amount of bail applicable to the cited offense.

(c) A person cited for a motor vehicle or traffic offense for which a bail amount has been established under (b) of this section may, within five days from the date of the citation, mail or personally deliver to the clerk of the court having jurisdiction over the place where the offense occurred

(1) the amount of bail indicated on the citation for that offense; and

(2) a copy of the citation signed by the person on an appropriate blank on the citation indicating the person's waiver of appearance, plea of no contest, and direction to forfeit the bail.

(d) When bail has been forfeited under this section, a judgment of conviction shall be entered. Bail forfeited under this section is a complete satisfaction for the offense, and the offender shall be given a receipt stating that fact.

(e) If the person cited fails to pay the bail amount or appear in court as required, the citation shall be considered a summons as for a charge of a misdemeanor and the person shall be proceeded against in the manner prescribed by law. However, the maximum penalty which may be imposed for the original offense may not exceed the bail amount for that offense set out in the schedule of bail amounts as determined by the supreme court under (b) of this section.

(f) A municipality shall adopt a citation form which complies with the requirements of this section and is at least equivalent to that adopted by the commissioner under AS 28.05.041. (§ 6 ch 178 SLA 1978)

VEHICLE & TRAFFIC OFFENSES

Sec. 16.05.160. Duty to arrest. Each peace officer designated in AS 16.05.150 shall arrest a person violating a provision of this title except AS 16.51 and AS 16.52, or any regulation adopted under this title except AS 16.51 and AS 16.52, in the peace officer's presence or view, and shall take the person for examination or trial before an officer or court of competent jurisdiction unless in the judgment of the peace officer it would be in the state's best interest to issue a warning or a citation under AS 16.05.165. (§ 21 art I ch 94 SLA 1959; am § 5 ch 132 SLA 1984)

Effect of amendments. — The 1984 amendment, effective July 3, 1984, substituted "a provision of this title except AS 16.51 and AS 16.52, or any regulation adopted under this title except AS 16.51 and AS 16.52" for "this chapter, or any regulation made under this chapter," deleted "immediately" preceding "for examination or trial," and added the language beginning "unless in the judgment of the peace officer" at the end of the section.

Sec. 16.05.165. Form and issuance of citation. (a) When a peace officer stops or contacts a person concerning a violation of this title except AS 16.51 and AS 16.52 or of a regulation adopted under this title except AS 16.51 and AS 16.52 that is a misdemeanor, the peace officer may, in the officer's discretion, issue a citation to the person as provided in AS 12.25.180.

(b) The supreme court shall specify by rule or order those misdemeanors that are appropriate for disposition without court appearance, and shall establish a schedule of bail amounts. Before establishing or amending the schedule of bail amounts required by this subsection, the supreme court shall appoint and consult with an advisory committee consisting of two officers of the division of fish and wildlife protection of the Department of Public Safety, two representatives of the Department of Fish and Game, two district court judges, and the chairpersons of the House and Senate Judiciary Committees of the legislature. The maximum bail amount for an offense may not exceed the maximum fine specified by law for that offense. If the misdemeanor for which the citation is issued may be disposed of without court appearance, the issuing peace officer shall write on the citation the amount of bail applicable to the violation.

(c) A person cited for a misdemeanor for which a bail amount has been established under (b) of this section may, within 15 days after the date of the citation, mail or personally deliver to the clerk of the court in which the citation is filed by the peace officer

(1) the amount of bail indicated on the citation for that offense; and

(2) a copy of the citation indicating that the right to an appearance is waived, a plea of no contest is entered and the bail is forfeited.

(d) When bail has been forfeited under (c) of this section, a judgment of conviction shall be entered. Forfeiture of bail and all seized items is a complete satisfaction for the misdemeanor. The clerk of the court accepting the bail shall provide the offender with a receipt stating that fact.

FISH & GAME CITATIONS

(e) If the person cited fails to pay the bail amount established under (b) of this section or to appear in court as required, the citation is considered a summons for a misdemeanor.

(f) Notwithstanding other provisions of law, if a person cited for a misdemeanor for which a bail amount has been established under (b) of this section appears in court and is found guilty, the penalty that is imposed for the offense may not exceed the bail amount for that offense established under (b) of this section. (§ 6 ch 132 SLA 1984)

Effective dates. — Section 30, ch. 132, SLA 1984, makes this section effective July 3, 1984, in accordance with AS 01.10.070(c).

Sec. 16.05.170. Power to execute warrant. Each peace officer designated in AS 16.05.150 may execute a warrant or other process issued by an officer or court of competent jurisdiction for the enforcement of this title except AS 16.51 and AS 16.52, and may, with a search warrant, search any place at any time. The judge of a court having jurisdiction may, upon proper oath or affirmation showing probable cause, issue a warrant in all cases. (§ 21 art I ch 94 SLA 1959; am § 7 ch 132 SLA 1984)

Effect of amendments. — The 1984 amendment, effective July 3, 1984, substituted "this title except AS 16.51 and AS 16.52" for "this chapter" in the first sentence.

Sec. 16.05.180. Power to search without warrant.

NOTES TO DECISIONS

Applied in Gudjonnson v. State, Ct. App. Op. No. 275 (File Nos. 7291, 7292), 667 P.2d 1254 (1983).

Sec. 16.05.190. Seizure and disposition of equipment.

NOTES TO DECISIONS

Applied in Jordan v. State, Ct. App. Op. No. 360 (File No. 7782), P.2d (1984).

Sec. 16.05.195. Forfeiture of equipment.

NOTES TO DECISIONS

Due process requirements.

Where the seizure of a fishing vessel is authorized by a judicially approved warrant issued upon probable cause and

(1) an employee of the department authorized by the commissioner;

(2) a police officer in the state;

(3) any other person authorized by the commissioner.

(b) Each person designated in (a) of this section may, when enforcing the provisions of this chapter or a regulation adopted under this chapter,

(1) execute a warrant or other process issued by an officer or court of competent jurisdiction;

(2) administer or take an oath, affirmation or affidavit; and

(3) arrest or issue a citation to a person who violates a provision of this chapter or a regulation adopted under this chapter. (§ 1 ch 161 SLA 1970; am § 2 ch 102 SLA 1984)

Effect of amendments. — The 1984 amendment, effective June 15, 1984, inserted "or issue a citation to" in paragraph (3) of subsection (b).

Sec. 41.21.960. Form and issuance of citation. (a) When a peace officer stops or contacts a person concerning the commission of a misdemeanor offense committed within a park or recreational facility subject to the department's supervision, the officer may issue a citation to the person, subject to the provisions of AS 12.25.180 — 12.25.230. The person receiving the citation may not be required to endorse the citation.

(b) The state supreme court shall identify those offenses that are amenable to disposition without court appearance and shall establish by rule or order a schedule of bail amounts, not to exceed fines prescribed by law, for those offenses. Before establishing or amending the schedule of bail amounts required by this subsection, the supreme court shall appoint and consult with an advisory committee consisting of two persons from the Department of Natural Resources, two district court judges, one member of the House Resources Committee, and one member of the Senate Resources Committee of the legislature. If the offense for which the citation is issued is one that may be disposed of without court appearance, the citing officer shall write on the citation the amount of bail applicable to the cited offense.

(c) A person cited for an offense for which a bail amount has been established under (b) of this section may, within 15 days from the date of the citation, mail or personally deliver to the clerk of the court having jurisdiction over the place where the offense occurred

(1) the amount of bail indicated on the citation for that offense; and

(2) a copy of the citation indicating the offender's waiver of appearance, plea of no contest, and direction to forfeit the bail and any items seized from the offender.

(d) When bail has been forfeited under this section, a judgment of conviction shall be entered. Bail forfeited under this section and the forfeiture of items seized from the offender is a complete satisfaction for

PARKS VIOLATIONS

the offense, and the clerk of the court shall provide the offender with a receipt stating that fact.

(e) If the person cited fails to pay the bail amount or appear in court as required, the citation shall be considered a summons for a misdemeanor charge and the offender shall be proceeded against in the manner prescribed by law.

(f) Notwithstanding other provisions of law, if a person cited for a misdemeanor for which a bail amount has been established under (b) of this section appears in court and is found guilty, the penalty that is imposed for the offense may not exceed the bail amount for that offense established under (b) of this section. (§ 3 ch 102 SLA 1984)

Effective dates. — Section 4, ch. 102, SLA 1984, makes this section effective June 15, 1984, in accordance with AS 01.10.070(c).

Chapter 30. Area Redevelopment.

Section

20. Powers of the board of directors

Sec. 41.30.020. Powers of the board of directors. The board of directors may, in making loans under AS 41.30.040:

(1) cooperate with political subdivisions, communities, and area development organizations, industries, enterprises, and persons in their efforts to promote the expansion of industrial and commercial activities in a redevelopment area;

(2) in the manner most advantageous to the state, dispose of an evidence of debt, a contract, a claim, personal property, or a security assigned to or held by it in connection with a loan made or an evidence of indebtedness purchased by it;

(3) collect or compromise obligations assigned to or held by it, or refer them to the Department of Law for suit or collection;

(4) manage, improve, or sell real property acquired by it. (§ 1 ch 83 SLA 1964)

Editor's notes. — This section is set out above to correct a minor error in the main pamphlet.

Chapter 35. Alaska Historic Preservation Act.

Section

45. Fees for guided tours through historical sites

Sec. 41.35.045. Fees for guided tours through historical sites. (a) The department may establish and collect fees for guided tours through historical sites.

AMENDMENT NO 2

PROPOSED AMENDMENT

TO

SB 82 - Weights and measures cleanup bill

On Page 15, line 7,

Delete subsection (b) in its entirety, and insert in its place:

(b) Notwithstanding the maximum fine provided for infractions under (a) of this section, for the violation of regulations or special permits issued governing vehicle weight limits, overweight penalties shall be imposed at the rate of five cents for each pound of weight over the authorized weight limit for that vehicle.

COMMITTEE SUBSTITUTE FOR SB 491 (L & C) IS A BILL WHICH AMENDS THE WEIGHTS AND MEASURES ACT, AS 45.75.

IN 1982, THE OVERWEIGHT AND OVERSIZE MOTOR VEHICLE PROGRAM WAS TRANSFERRED FROM THE DEPARTMENT OF PUBLIC SAFETY TO THE DEPARTMENT OF COMMERCE AND ECONOMIC DEVELOPMENT. THIS TRANSFER INCLUDED THE DUTIES OF OPERATING VEHICLE WEIGHING STATIONS, ISSUING PERMITS FOR OVERWEIGHT AND OVERSIZE VEHICLES, AND ENFORCING THE VEHICLE SIZE, WEIGHT , AND LOAD LIMITS.

THE 1982 TRANSFER OF DUTIES WAS ACCOMPLISHED ONLY BY ADDING A PARAGRAPH TO THE GENERAL DUTIES TO THE DEPARTMENT OF COMMERCE. CSSB 491 COMPLETES THE TRANSFER BY ALSO ADDING THOSE DUTIES TO THE WEIGHTS AND MEASURES ACT.

SECTION 13 OF THIS LEGISLATION CLARIFIES THAT THE COMMISSIONER OF COMMERCE MAY AUTHORIZE DEPARTMENT EMPLOYEES TO ISSUE CITATIONS TO PERSONS WHO VIOLATE THE DOT/PF VEHICLE SIZE, WEIGHT, AND LOAD LIMITS, THE PROVISIONS OF AN OVERWEIGHT OR OVERSIZE VEHICLE PERMIT, OR DEPARTMENT REGULATIONS. THIS ELIMINATES AN AMBIGUITY AND LOOPHOLE LEFT AFTER THE 1982 TRANSFER OF ENFORCEMENT AUTHORITY TO THE DEPARTMENT.

SECTIONS 26 AND 27 OF CSSB 491 STATES THE PENALTY FOR ALL WEIGHTS AND MEASURES OFFENSES IS A CLASS B MISDEMEANOR PLUS

FIVE CENTS A POUND FOR OVERWEIGHT VEHICLE OFFENSES. THIS CHANGE CONFORMS TO THE NEW CRIMINAL CODE AND WILL PROVIDE A MORE EFFECTIVE DETERRENT TO WEIGHTS AND MEASURES VIOLATIONS. CURRENTLY, MANY PEOPLE ARE TOO WILLING TO RISK CITATION FOR VIOLATIONS BECAUSE OF THE LOW MAXIMUM PENALTIES.

ALL OF THESE CHANGES IN THE WEIGHTS AND MEASURES ACT WILL INCREASE THE EFFECTIVENESS AND EFFICIENCY OF IMPLEMENTATION OF THE ACT, ESPECIALLY THE OVERWEIGHT AND OVERSIZE VEHICLE PROGRAM. THEREFORE, I URGE YOUR PASSAGE OF CSSB 491.

Support By Dept. of Commerce
Albert Thackeray

ADDITIONAL INFORMATION

1) THE CHANGES MADE IN THE COMMITTEE SUBSTITUTE INCLUDE

A) PG 6, LINE 29 - DELETED "ARREST OR" SO THE DEPT REPRESENTATIVE CAN GIVE A CITATION FOR A VIOLATION, BUT CANNOT ARREST THE INDIVIDUAL

B) PG 12, LINE 1 - MADE THE PENALTY A CLASS B MISDEMEANOR INSTEAD OF THE ORIGINAL CLASS A MISDEMEANOR

C) PG 14, LINES 3-8 - ADDED SECTION 27 WHICH STATES THAT FIVE CENTS A POUND CAN BE ASSESSED FOR OVERWEIGHT VEHICLE OFFENSE IN ADDITION TO THE FINE ESTABLISHED AS A CLASS B MISDEMEANOR

2) CSSB 491 DECREASES THE FREQUENCY OF REQUIRED INSPECTIONS AND TESTS OF ALL WEIGHTS NAD MEASURES FROM SEMI-ANNUAL TO ANNUAL. MORE FREQUENT INSPECTIONS AND TESTS CAN STILL BE MADE IN PROBLEM AREAS, HOWEVER.

3) SECTIONS 1 - 3 AND 5 - 26 CLARIFIES A CONFUSING APPROACH TAKEN BY THE 1961 LEGISLATION WHICH FIRST ENACTED THE WEIGHTS AND MEASURES ACT. FOR REASONS WHICH ARE NOT NOW CLEAR, THE COMMISSIONER OF COMMERCE

IS THE DIRECTOR OF WEIGHTS AND MEASURES AND THROUGHOUT THE CHAPTER MANY REFERENCES ARE MADE TO THE DIRECTOR. TO AVOID CONFUSION, CSSB 491 CHANGES ALL OF THOSE REFERENCES TO THE DIRECTOR TO BE REFERENCES TO THE COMMISSIONER.

CS FOR SENATE BILL NO. 491 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to weights and measures; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 45.75.030 is amended to read:

Sec. 45.75.030. STATE DIRECTOR AND INSPECTORS OF WEIGHTS AND MEASURES. The commissioner of commerce and economic development is ex officio state director of weights and measures. The commissioner may delegate this authority, and [DIRECTOR] may appoint state inspectors.

* Sec. 2. AS 45.75.040 is amended to read:

Sec. 45.75.040. GENERAL POWERS AND DUTIES OF COMMISSIONER [DIRECTOR]. The commissioner [DIRECTOR] is the custodian of the state standards of weight and measure and of the other standards and equipment provided for by this chapter, and [. THE DIRECTOR] shall keep accurate records of the standards and equipment. The commissioner [DIRECTOR] shall operate motor vehicle weigh stations; establish fees for and issue overweight and oversize vehicle permits; enforce this chapter; implement AS 44.33.020(25); and [. HE SHALL] supervise the weights and measures offered for sale, sold, or in use in the state.

* Sec. 3. AS 45.75.050(a) is amended to read:

(a) The commissioner [DIRECTOR] shall adopt [ISSUE] regulations for the enforcement of this chapter in accordance with the Administrative Procedure Act (AS 44.62). These have the effect of law.

* Sec. 4. AS 45.75.050(b) is amended to read:

(b) The regulations may include

(1) standards of net weight, measure, or count, and reasonable standards of fill, for any commodity in package form;

(2) rules governing the technical and reporting procedures to be followed, and the report and record forms and marks of approval and rejection to be used by inspectors of weights and measures in the discharge of their official duties;

(3) exemptions from the sealing or marking requirements of AS 45.75.120 with respect to weights and measures of a character or size that sealing or marking would be inappropriate, impracticable, or damaging to the apparatus in question; [AND]

(4) with respect to classes of weights and measures of a character that annual retesting is unnecessary to continued accuracy, exemptions from the requirements of AS 45.75.070 and 45.75.080 for annual testing, and schedules fixing the frequency of required retests for classes of devices exempted; and

(5) provisions governing the enforcement of the size, weight, and load limitations established under AS 19.10.060; the issuance of, and the enforcement of the terms of, permits for overweight and oversize vehicles; and the operation of weigh stations.

* Sec. 5. AS 45.75.050(d) is amended to read:

(d) The specifications, tolerances, and regulations for commercial weighing and measuring devices, together with amendments to them, as recommended by the National Bureau of Standards and published in National Bureau of Standards Handbook 44 and supplements to it, or in any publication revising or superseding Handbook 44, are the specifications, tolerances, and regulations for commercial weighing and measuring devices of the state except as specifically modified, amended, or rejected by a regulation adopted [ISSUED] by the commissioner [DIRECTOR].

* Sec. 6. AS 45.75.060 is amended to read:

Sec. 45.75.060. OFFICE AND FIELD [WORKING] STANDARDS AND EQUIPMENT. The commissioner [STATE] shall maintain [SUPPLY THE DIVISION OF WEIGHTS AND MEASURES WITH] a duplicate set of state standards of weight and measure, referred to in this chapter as office standards. The commissioner [STATE] shall also supply field standards and the equipment that [WHICH] is necessary to carry out this chapter. The office standards and field standards shall be verified upon their initial receipt and at least once each year afterward. The office standards shall be verified by direct comparison with the state standards. The field standards shall be verified by comparison with the office standards.

* Sec. 7. AS 45.75.070 is amended to read:

Sec. 45.75.070. TESTING AND INSPECTION OF LOCAL STANDARDS AND WEIGHTS AND MEASURES AT STATE-SUPPORTED INSTITUTIONS. (a) At least once every five years, the commissioner [DIRECTOR] shall test the standards of weight and measure obtained by a city that [WHICH] has appointed a sealer of weights and measures, and shall approve them if they are correct. The commissioner [DIRECTOR] shall inspect the standards at least once every two years.

(b) The commissioner [DIRECTOR] shall from time to time test all weights and measures used in checking the receipt or disbursement of supplies in every institution maintained by money appropriated by the legislature, and shall report the commissioner's [HIS] findings, in writing, to the supervisory board and to the executive officer of the institution concerned.

* Sec. 8. AS 45.75.080(a) is amended to read:

(a) The commissioner [DIRECTOR] may inspect and test, to ascertain if they are correct, all weights and measures kept, offered, or

exposed for sale. The commissioner [DIRECTOR] shall, at least annually [SEMIANNUALLY AND MORE OFTEN AS HE CONSIDERS NECESSARY], inspect and test, to ascertain if they are correct, all weights and measures commercially used

(1) in determining the weight, measurement, or count of commodities or things sold, or offered or exposed for sale, on the basis of weight or of measure;

(2) in computing the basic charge or payment for services rendered on the basis of weight or of measure or count; or

(3) in determining weight or measurement when a charge is made for this determination.

* Sec. 9. AS 45.75.090 is amended to read:

Sec. 45.75.090. INVESTIGATIONS. The commissioner [DIRECTOR] shall investigate complaints of violations of this chapter, and shall [, UPON HIS OWN INITIATIVE,] conduct other [THE] investigations that the commissioner [WHICH HE] considers appropriate and advisable to develop information on prevailing procedures in commercial quantity determination, [AND] on possible violations of this chapter and to promote the general objective of accuracy in the determination and representation of quantity in commercial transactions.

* Sec. 10. AS 45.75.100 is amended to read:

Sec. 45.75.100. INSPECTION OF PACKAGES. (a) The commissioner [DIRECTOR] shall, from time to time, weigh or measure and inspect packages or amounts of commodities kept, offered, or exposed for sale to determine whether they contain the amounts represented and whether they are kept, offered, or exposed for sale in accordance with law. When packages or amounts of commodities do not contain the amounts represented, or are kept, offered, or exposed for sale in violation of law, the commissioner [DIRECTOR] may order them off sale and may mark

or tag them to show they are illegal. The commissioner [DIRECTOR] may use recognized sampling procedures. Compliance of a given lot of packages shall be determined on the basis of the result obtained on a sample selected from and representative of the lot.

(b) A [NO] person may not

(1) sell, or keep, offer, or expose for sale in intrastate commerce a package or amount of commodity that has been ordered off sale or marked or tagged as provided in this section until the package or amount of commodity has been brought into full compliance with all legal requirements; or

(2) dispose of a package or amount of commodity that is ordered off sale or marked or tagged as provided in this section and that does not meet legal requirements, except with the specific approval of the commissioner [DIRECTOR].

* Sec. 11. AS 45.75.110(a) is amended to read:

(a) The commissioner [DIRECTOR] may issue stop-use orders, stop-removal orders, and removal orders for weights and measures used or capable of being used commercially. The commissioner [DIRECTOR] may issue stop-removal orders and removal orders for packages or amounts of commodities kept, offered, or exposed for sale whenever the commissioner [HE] considers it necessary or expedient in enforcing this chapter.

* Sec. 12. AS 45.75.120 is amended to read:

Sec. 45.75.120. DISPOSITION OF CORRECT AND INCORRECT APPARATUS. (a) The commissioner [DIRECTOR] shall approve for use and seal or mark with appropriate devices the weights and measures that the commissioner [WHICH HE] finds upon inspection and test to be correct as provided in AS 45.75.050, and shall reject and mark or tag as "rejected" the weights and measures that are found [WHICH HE FINDS], upon

inspection or testing [TEST], to be incorrect as provided in AS 45.-75.050 but that [WHICH] in the commissioner's [HIS] best judgment may be satisfactorily repaired [ARE SUSCEPTIBLE OF SATISFACTORY REPAIR]. Sealing [THIS SEALING] or marking is not required for weights and measures exempted by regulation [OF THE DIRECTOR].

(b) The commissioner [DIRECTOR] shall condemn, and may seize and destroy weights and measures found to be incor RY REPAIR]. Weights and the commissioner's [HIS] best judgment, canno of this section may be repaired [ARE NOT SUSCEPTIBLE OF SATISFACTORY r [DIRECTOR] if not cor- measures that [WHICH] are rejected under (a) of d or disposed of contrary confiscated and destroyed by the commissioner [I rected as required by AS 45.75.180 or if used or to the requirements of AS 45.75.180. T OF ENTRY AND STOPPAGE.

* Sec. 13. AS 45.75.130 is amended to read: ny other law dealing with

Sec. 45.75.130. POLICE POWERS AND RIGHT O CTOR] has special police (a) In the enforcement of this chapter and any o thout formal warrant, any weights and measures, the commissioner [DIRECTOR se as evidence, without powers. The commissioner [HE] may arrest, withou and measures or amounts person violating the law, and seize for use offered, or exposed for formal warrant, incorrect or unsealed weights an rming the commissioner's or packages of commodity, used, retained, offe ay enter, without formal sale, or sold in violation of law. In performi any person and require [HIS] duties, the commissioner [DIRECTOR] may e ace. warrant, any structure or premises, and stop an f Commerce and Economic the pe son [HIM] to proceed to a specified place. oner to enforce the size,

(b) An emplo yee of the Department of C epartment of Transporta- Development who is authorized by the commissioner issue a citation to weight, and load limitations adopted by the Department of Transporta- tion and Public Facilities under AS 19.10.060 may issue a citation to

a person who violates (1) any of those limitations, (2) the terms of an overweight or oversize vehicle permit issued under AS 44.33.020(25) and AS 45.75.040, or (3) the provisions of regulations adopted under AS 44.33.020(25) and AS 45.75.050(b)(5). Citations issued under this subsection shall be treated as specified by AS 12.25.180 - 12.25.230 for citations issued by a peace officer.

* Sec. 14. AS 45.75.140 is amended to read:

Sec. 45.75.140. POWERS AND DUTIES OF INSPECTORS [DEPUTY DIRECTOR AND INSPECTOR]. The powers and duties of the commissioner [DIRECTOR] specified in AS 45.75.070, 45.75.080, 45.75.090, 45.75.100, 45.75.120, 45.75.130, and 45.75.170 may [, AND 45.75.380 SHALL] also be exercised by [THE DEPUTY DIRECTOR AND] inspectors, when acting under the instructions and at the direction of the commissioner [DIRECTOR].

* Sec. 15. AS 45.75.150 is amended to read:

Sec. 45.75.150. APPOINTMENT OF CITY SEALERS AND DEPUTY SEALERS OF WEIGHTS AND MEASURES. (a) A city may appoint a sealer of weights and measures, and the deputy sealers of weights and measures it needs. If the city appoints a sealer, the city [IT] shall obtain at its expense the standards of weight and measure [WEIGHTS AND MEASURES] and the additional equipment, for use in the enforcement of this chapter in the city, that [WHICH] the commissioner [DIRECTOR] prescribes.

(b) When the standards of weight and measure provided by a city are examined and approved by the commissioner [DIRECTOR], they are the official standards for the city. At least every five years, the sealer shall make or arrange to have made comparisons between the sealer's [HIS] field standards and appropriate standards of a higher order belonging to the sealer's [HIS] city or to the state in order to maintain the field standards in accurate condition.

* Sec. 16. AS 45.75.160 is amended to read:

Sec. 45.75.160. CITY SEALERS AND DEPUTY SEALERS. The sealer of a city, and the sealer's [HIS] deputy [SEALER] when acting under the sealer's [HIS] instructions and [AT HIS] direction, have the same powers and shall perform the same duties within the city as those granted to [AND IMPOSED UPON] the commissioner [DIRECTOR] by AS 45.75.080 - 45.75.130 and 45.75.380.

* Sec. 17. AS 45.75.170 is amended to read:

Sec. 45.75.170. CONCURRENT JURISDICTION. In each city having a sealer of weights and measures, the commissioner [DIRECTOR] has concurrent authority to enforce this chapter.

* Sec. 18. AS 45.75.180 is amended to read:

Sec. 45.75.180. DUTY OF OWNERS OF INCORRECT APPARATUS. Weights and measures rejected by the commissioner [DIRECTOR] or a sealer remain subject to the control of the rejecting authority until suitable repair or disposition of them is made as required by this section. The owner of a rejected weight and measure shall correct it within 30 days or a longer period authorized by the rejecting authority, [;] or [,] may dispose of it in the manner authorized by the rejecting authority. Rejected weights and measures may not again be used commercially until officially reexamined [RE-EXAMINED] and found to be correct or until specific written permission for their use is issued by the rejecting authority.

* Sec. 19. AS 45.75.190(c) is amended to read:

(c) The commissioner [DIRECTOR] may adopt [ISSUE] reasonable regulations necessary to assure that amounts of commodity sold are determined in accordance with good commercial practice and are so determined and represented as to be accurate and informative.

* Sec. 20. AS 45.75.200(c) is amended to read:

(c) Under (a)(1) of this section the commissioner [DIRECTOR]

shall, by regulation, establish

(1) reasonable variations or tolerances to be allowed, that [WHICH] may include variations below the declared weight or measure caused by ordinary and customary exposure, only after the commodity is introduced into intrastate commerce, to conditions that normally occur in good distribution practice and that unavoidably result in decreased weight or measure,

(2) exemptions [EXEMPTION] as to small packages, and

(3) exemptions as to commodities put up in variable weights or sizes for sale to the consumer intact and either customarily not sold as individual units or customarily weighed or measured at the time of sale to the consumer.

* Sec. 21. AS 45.75.220 is amended to read:

Sec. 45.75.220. MISLEADING PACKAGES. A [NO] commodity in package form may not be so wrapped, or put in a container so made, formed, or filled as to mislead the purchaser as to the quantity of the contents of the package, and the contents of a container may not fall below the reasonable standard of fill that [WHICH] the commissioner [DIRECTOR] prescribes for the commodity.

* Sec. 22. AS 45.75.282(b) is amended to read:

(b) One of the tickets provided for in (a) of this section shall be retained by the vendor, and the other shall be delivered to the purchaser at the time of delivery of the commodity, or surrendered, on demand, to the commissioner [DIRECTOR, OR THE DEPUTY DIRECTOR,] or an inspector, or a sealer [,] or a deputy sealer, who may [,IF HE WANTS TO] retain it as evidence and, if it is retained, shall issue a weight slip in place of it.

* Sec. 23. AS 45.75.290(b) is amended to read:

(b) One of the tickets provided for under (a) of this section

shall be retained by the vendor and the other shall be delivered to the purchaser at the time of delivery of the fuel, or shall be surrendered, on demand, to the commissioner [DIRECTOR, OR THE DEPUTY DIRECTOR] or an inspector, or a sealer or deputy sealer, who may [, IF HE DESIRES TO] retain it as evidence and [, SHALL] issue a weight slip in place of it for delivery to the purchaser. If the purchaser carries away the [HIS] purchase, the vendor is required only to give to the purchaser at the time of sale a delivery ticket stating the number of pounds of fuel delivered to the purchaser [HIM].

* Sec. 24. AS 45.75.300 is amended to read:

Sec. 45.75.300. TEXTILE PRODUCTS. (a) It is unlawful to keep for the purpose of sale, offer or expose for sale, or sell textile yard goods put up or packaged in advance of sale in a bolt or roll, or any other textile product put up or packaged in advance of sale in any other unit, for wholesale or retail sale, unless the bolt or roll, or other unit is definitely, plainly, and conspicuously marked to show its net measure in terms of yards or its net weight, in terms of avoirdupois pounds or ounces, subject to the following limitations and requirements:

(1) a unit of twine or cordage may be marked to show its net measure in terms of feet; readywound bobbins not sold separately are not required to be individually marked, but the package containing the bobbins shall be marked to show the number of bobbins contained in it and the net weight or measure of the thread on each bobbin; a unit of sewing, basting, mending, darning, crocheting, tatting, hand-knitting, or embroidery thread or yarn, except nylon hand-knitting yarn, that is not composed in whole or in part of wool, the net weight of which is less than two ounces avoirdupois, shall be marked to show its net measure in terms of yards as unwound from the ball or from the

spool or other holder; a retail unit of a textile product sold only for household use consisting of a package containing two or more similar individual units that are not sold separately shall be marked to show the number of individual units in the package and the net weight or net measure of the product in each individual unit, but this does not apply where the individual units are separately marked; a unit of yarn, composed in whole or in part of wool, sold to consumers for handiwork, shall be marked to show the net weight of the yarn, except that any such unit of tapestry, mending, or embroidery yarn, the net measure of which does not exceed 50 years, may be marked to show its linear measure only;

(2) the marking required by this section shall in all cases be in combination with the name and place of business of the manufacturer, packer, or distributor of the product, or a trademark, symbol, brand, or other mark that identifies the manufacturer, packer, or distributor;

(3) reasonable tolerances shall be permitted, and these shall be included in regulations <u>adopted</u> for the enforcement of this section.

<u>(b) This</u> [THAT ARE ISSUED BY THE DIRECTOR; (4) THIS] section does not apply to the following textile products when sold at wholesale in bulk by net weight: cordage, agricultural bag sewing threads, twines, yarns that are to be processed, and yarns that are to be industrially converted into end-use products.

* Sec. 25. AS 45.75.330 is amended to read:

Sec. 45.75.330. INJUNCTION. The <u>commissioner</u> [DIRECTOR] may apply to a court for a temporary or permanent injunction restraining a person from violating a provision of this chapter.

* Sec. 26. AS 45.75.380 is amended to read:

Sec. 45.75.380. OFFENSES AND PENALTIES. It is a class B misdemeanor for a person to perform any of the following acts [A PERSON WHO, BY HIMSELF OR BY HIS SERVANT, OR AGENT, OR AS THE SERVANT OR AGENT OF ANOTHER, PERFORMS ANY ONE OF THE FOLLOWING ACTS IS GUILTY OF A MISDEMEANOR AND UPON A FIRST CONVICTION OF THE VIOLATION IS PUNISHABLE BY A FINE OF NOT LESS THAN $20 NOR MORE THAN $200, OR BY IMPRISONMENT FOR NOT MORE THAN THREE MONTHS, OR BY BOTH. UPON A SECOND OR SUBSEQUENT CONVICTION, THE PERSON IS PUNISHABLE BY A FINE OF NOT LESS THAN $50 NOR MORE THAN $500, OR BY IMPRISONMENT FOR NOT MORE THAN ONE YEAR, OR BY BOTH]:

(1) uses or has in possession for the purpose of using for any commercial purpose specified in AS 45.75.080, sells, offers, or exposes for sale, or hire, or has in possession for the purpose of selling or hiring, an incorrect weight or measure or a device or instrument used to or calculated to falsify a weight or measure;

(2) uses or has in possession for current use, in buying or selling a commodity or thing, or for hire or award, or in the computation of a basic charge or payment for services rendered on the basis of weight or measurement, or in the determination of weight or measurement when a charge is made for determination, a weight or measure that has not been tested and sealed by the appropriate authority within one year, (A) unless written notice is given to the appropriate authority to the effect that the weight or measure is available for examination, or is due for reexamination [RE-EXAMINATION], as the case may be, (B) unless specific written permission to use the weight or measure is received from the appropriate authority, or (C) unless the weight or measure is exempt from sealing or annual testing requirements by AS 45.75.080 or by a regulation adopted [OF THE DIRECTOR ISSUED] under AS 45.75.050;

(3) disposes of a rejected [OR CONDEMNED] weight or measure in a manner contrary to law or regulation;

(4) removes from a weight or measure, contrary to law or regulation, a tag, seal, or mark placed on it by the appropriate authority;

(5) sells or [,] offers [OR EXPOSES] for sale less than the quantity the person [HE] represents of a commodity, thing, or service;

(6) takes more than the quantity the person [HE] represents of a commodity, thing, or service when, as buyer, the person [HE] furnished the weight or measure by means of which the amount of the commodity, thing, or service is determined;

(7) keeps for the purpose of sale, advertises, or offers [OR EXPOSES] for sale, or sells a commodity, thing, or service in a condition or manner contrary to law or regulation;

(8) uses in retail trade, except in the preparation of packages put up in advance of sale and of medical prescriptions, a weight or measure that is not so positioned that its indications may be accurately read and the weighing or measuring operation observed from some position that [WHICH] may reasonably be assumed by a customer;

(9) hinders or obstructs the commissioner, an inspector, a sealer, or a deputy sealer in the performance of official duties under this chapter;

(10) violates a provision of an overweight or oversize permit;

(11) violates a weight, load, or size limitation established under AS 19.10.060 or regulations adopted under AS 19.05.020 or AS 45.75.050(b)(5);

(12) violates a provision of this chapter or of a regulation

adopted under this chapter for which a specific penalty is not prescribed.

* Sec. 27. AS 45.75.380 is amended by adding a new subsection to read:

(b) In addition to the penalty provided for in (a) of this section, a fine of five cents a pound shall be imposed for each pound of weight by which a vehicle exceeds an allowable gross weight limitation established under AS 19.10.060 or regulations adopted by the Department of Transportation and Public Facilities under AS 19.05.020.

* Sec. 28. AS 45.75.390(4) is repealed and reenacted to read:

(4) "commissioner" means the commissioner of commerce and economic development or a designee;

* Sec. 29. AS 28.35.230(e) and AS 45.75.360 are repealed.

* Sec. 30. This Act takes effect immediately in accordance with AS 01.-10.070(c).

DEPARTMENT OF LAW CS FOR SEC. 14 OF SB 82

Sec. 14. AS 45.75 is amended by adding new sections to Article 2 to read:

Sec. 45.75.131. ISSUANCE OF CITATIONS.

(b) An employee of the Department of Commerce and Economic Development who is authorized by the commissioner to enforce the size, weight, and load limitations adopted by the Department of Transportation and Public Facilities under AS 19.10.060 may issue a citation to a person who violates (1) any of those limitations, (2) the terms of an overweight or oversize vehicle permit issued under AS 44.33.020(25) and AS 45.75.040, or (3) the provisions of a regulation adopted under AS 44.33.020(25) and AS 45.75.050(b)(5).

Sec. 45.75.132. FORM AND ISSUANCE OF CITATION. (a) A citation issued under this section must be in writing. A person receiving the citation may not be required to sign a promise to appear in court [ENDORSE IT].

(b) The time specified in the notice to appear on a citation issued under this section must be at least fifteen days [AT LEAST FIVE DAYS, NOT INCLUDING WEEKENDS AND HOLIDAYS,] after the issuance of the citation, unless the person cited requests an earlier hearing.

(c) The commissioner is responsible for the issuance of books containing appropriate citations and shall maintain a record of each book and each citation contained in

it. The commissioner shall require and retain a receipt for every book issued to an employee of the department designated by the commissioner to provide investigative service to enforce provisions of this chapter.

(d) An employee who issues a citation under this section shall deposit the original or a copy of the citation with a court having jurisdiction over the alleged offense. Upon its deposit with the court, the citation may be disposed of only by trial in the court or other official action taken by the magistrate, judge, or prosecutor. The employee who issued the citation may not dispose of it or copies of it or of the record of its issuance except as required under this subsection and (e) of this section.

(e) The commissioner shall require the return of a copy of every citation issued under this section and of all copies of every citation that has been spoiled or upon which an entry has been made and not issued to an alleged violator. The commissioner shall also maintain in connection with every citation issued a record of the disposition of the charge by the court in which the original or copy of the citation was deposited.

(f) If the form of citation issued under this section includes information and is sworn to as required under the laws of this state in respect to a complaint charging commission of the offense alleged in the

citation, then the citation when filed with a court having jurisdiction, is considered to be a lawful complaint for the purpose of prosecution.

(g) Unless the citation has been voided or otherwise dismissed by the magistrate, judge, or prosecutor, or bail has been forfeited under AS 45.75.133, a person who fails to appear in court to answer a citation issued under this section, regardless of the disposition of the charge for which the citation was issued, is guilty of a class B misdemeanor.

Sec. 45.75.133. BAIL FORFEITURE. (a) [(B)] The supreme court shall specify by rule or order those violations that are appropriate for disposition without court appearance, and shall establish a schedule of bail amounts. The maximum bail forfeiture amount for an offense may not exceed the maximum fine specified by law for that offense. If the violation for which the citation is issued may be disposed of without court appearance, the issuing employee shall write on the citation the amount of bail forfeiture applicable to the violation.

(b) [(C)] A person cited for a violation for which a bail forfeiture amount has been established under (b) of this section may, within 15 days after the date of the citation, mail or personally deliver to the clerk of the court in which the citation is filed by the employee

(1) the amount of bail indicated on the citation for that offense; and

(2) a copy of the citation indicating that the right to an appearance is waived, a plea of no contest is entered and the bail is forfeited.

(c) [(D)] When bail has been forfeited under (b) [(C)] of this section, a judgment of conviction shall be entered. Forfeiture of bail is a complete satisfaction for the violation. The clerk of the court accepting the bail forfeiture shall provide the offender with a receipt stating that fact.

(d) [(E)] A [IF THE] person cited who fails to pay the bail forfeiture amount established under (b) of this section or to appear in court as required, is guilty of a class B misdemeanor [THE CITATION IS CONSIDERED A SUMMONS FOR A MISDEMEANOR].

(e) [(F)] Notwithstanding other provisions of law, if a person cited for a violation for which a bail forfeiture amount has been established under (b) of this section appears in court and is found guilty, the penalty that is imposed for the offense may not exceed the bail forfeiture amount for that offense established under (b) of this section.

Adoption of Necessary Regulation

Sec. 19.10.060. Regulation of weight and load of vehicles and use of highways during certain seasons. The department, with respect to highways under its jurisdiction, may

(1) establish limitations on weight, size, and load of vehicles;

(2) *[Repealed, § 25 ch 144 SLA 1977.]*

(3) prohibit the operation or impose restrictions on vehicular use of highways during certain seasons of the year. (§ 5 art III title II ch 152 SLA 1957; am § 1 ch 55 SLA 1963; am § 25 ch 144 SLA 1977; am § 2 ch 77 SLA 1982)

Cross references. For the duties of the Department of Commerce and Economic Development to operate weighing stations and enforce weight and load limitations based upon directions of the Department of Transportation and Public Facilities, see AS 44.33.020(25).

Effect of amendments. — The 1982 amendment inserted "size" in paragraph (1).

Sec. 19.05.020. Regulations. The department shall adopt regulations necessary to carry out the purpose of chs. 5 — 25 of this title. (§ 1 art III title I ch 152 SLA 1957)

Opinions of attorney general. — The department has authority to require contractors to set up a system of prequalification of contractors as a prerequisite for bidding on state construction projects, and under such system to require contractors to furnish periodic and financial statements. —

1959 Op. Att'y Gen., No. 27.

The department would not be required to follow the Administrative Procedure Act (AS 44.62.010 — 44.62.650) in adopting regulations to implement a program of prequalification of contractors. 1959 Op. Att'y Gen., No. 27.

A policy of publishing regulations concerning bidding and letting of contracts in the Administrative Code is consistent with the Alaska Administrative Procedure Act (AS 44.62.010 — 44.62.650), since these regulations are regulations in which an important portion of the public has a vital interest and since they are of great use to the portion of the public interested in dealing and contracting with the state. 1959 Op. Att'y Gen., No. 27.

PENALTIES FOR A VIOLATIC

...subsection (g) the court may not impose a concurrent sentence. However, if the defendant's conduct falls within paragraphs (1), (2) or (3) of subsection (g) the court is authorized to impose concurrent sentences. (Griffith v. State, Ct. App. Op. No. 331 (File No. A-47), 675 P.2d 662 (1984).

Where defendant's various check forgery cases violated similar societal interests, he could therefore receive concurrent sentences. Winfree v. State, Ct. App. Op. No. 378 (File No. A-156), P.2d (1984).

Sec. 12.55.030. Discharge of indigents imprisoned for nonpayment of fine. [Repealed, § 16 ch 53 SLA 1973.]

Sec. 12.55.035. Fines. (a) Upon conviction of an offense, a defendant may be sentenced to pay a fine as authorized in this section or as otherwise authorized by law. In determining the amount and method of payment of a fine, the court shall take into account the financial resources of the defendant and the nature of the burden its payment will impose. No defendant may be imprisoned solely because of inability to pay a fine.

(b) Upon conviction of an offense, a defendant who is not an organization may be sentenced to pay, unless otherwise specified in the provision of law defining the offense, a fine of no more than

(1) $75,000 for murder in the first or second degree, sexual assault in the first degree, kidnapping, or misconduct involving a controlled substance in the first degree;

(2) $50,000 for a class A, B, or C felony;

(3) $5,000 for a class A misdemeanor;

(4) $1,000 for a class B misdemeanor;

(5) $300 for a violation.

(c) Upon conviction of an offense, a defendant that is an organization may be sentenced to pay a fine not exceeding the greater of

(1) $100,000; or

(2) an amount which is three times the pecuniary gain realized by the defendant as a result of the offense.

(d) If a defendant is sentenced to pay a fine, the court may grant permission for the payment to be made within a specified period of time or in specified installments. (§ 12 ch 166 SLA 1978; am § 17 ch 45 SLA 1982; am § 26 ch 143 SLA 1982)

Cross references. — For classification of offenses, see AS 11.81.250; for sentences of imprisonment for felonies, see AS 12.55.125; for sentences of imprisonment for misdemeanors, see AS 12.55.135; for sentences for violations, see AS 12.55.140.

Effect of amendments. — The first 1982 amendment, in subsection (b)(1), deleted "or" preceding "kidnapping" and added "or misconduct involving a controlled substance in the first degree."

The second 1982 amendment inserted "sexual assault in the first degree" in paragraph (1) of subsection (b).

While neither 1982 amendment gave effect to the other, both have been given effect in paragraph (b)(1), set out above.

Sec. 44.33.010. Commissioner of commerce and economic development. The principal executive officer of the Department of Commerce and Economic Development is the commissioner of commerce and economic development. (§ 14 ch 64 SLA 1959; am § 6 ch 186 SLA 1960; am § 95 ch 218 SLA 1976)

Collateral references. — 15A Am. Jur. 2d, Commerce, § 1 et seq.; 1 and 2 Am. Jur. 2d, Administrative Law, § 1 et seq.; 63 Am. Jur. 2d, Public Funds, § 1 et seq.; 63 Am. Jur. 2d, Public Officers and Employees, § 22.

15 C.J.S., Commerce, § 1 et seq.; 73 C.J.S. Public Administrative Law, § 1 et seq.

Sec. 44.33.020. Duties of department. The Department of Commerce and Economic Development shall

(1) administer the state programs relating to commerce, enforce the laws relating to these programs, and adopt regulations under these laws;

(2) register corporations;

(3) collect corporation franchise taxes;

(4) enforce state laws regulating public utilities and other public service enterprises, banking and securities, insurance, and other businesses and enterprises touched with a public interest;

(5) make veterans' loans;

(6) inspect weights and measures;

(7) promote and develop civil aviation;

(8) furnish the budgeting, clerical and administrative services for regulatory agencies and professional and occupational licensing boards not otherwise provided for;

(9) *[Repealed, E.O. No. 39 § 13 (1977).]*

(10) *[Repealed, E.O. No. 33 (1968).]*

(11) before the commencement of each calendar quarter, furnish lending institutions, title insurance companies, mortgage companies and clerks of the respective superior courts with the 12th Federal Reserve District discount rate that is to be used during that calendar quarter for computing the maximum rate of interest under AS 45.45.010(b);

(12) conduct studies, enter into contracts and agreements, and make surveys relating to the economic development of the state and, when appropriate, assemble, analyze, and disseminate the findings obtained;

(13) provide factual information and technical assistance for potential industrial and commercial investors;

(14) receive gifts, grants, and other aid that facilitate the powers and duties of the department from agencies and instrumentalities of the United States or other public or private sources;

(15) establish and activate programs to achieve balanced economic development in the state and advise the governor on economic development policy matters;

(16) formulate a continuing program for basic economic development and for the necessary promotion, planning and research that will advance the economic development of the state;

(17) cooperate with private, governmental and other public institutions and agencies in the execution of economic development programs;

(18) review the programs and annual reports of other departments and agencies as they are related to economic development and prepare an annual report on the economic growth of the state;

(19) administer the economic development programs of the state;

(20) perform all other duties and powers necessary or proper in relation to economic development and planning for the state;

(21) request tourism-related businesses in the state to provide data regarding occupancy levels, traffic flow and gross receipts and to participate in visitor surveys conducted by the department; data collected under this paragraph which discloses the particulars of an individual business is not a matter of public record and shall be kept confidential; however, this restriction does not prevent the department from using the data to formulate tourism economic impact information including expenditure patterns, tax receipts and fees, employment and income attributable to tourism, and other information considered relevant to the planning, evaluation and policy direction of tourism in the state.

(22) *[Repealed, E.O. No. 47, § 6 (1980).]*

(23) administer the program of state assistance for the construction and development of cultural facilities in accordance with AS 44.33.401 — 44.33.417;

(24) provide administrative and budgetary services to the Real Estate Commission (AS 08.88) as requested by the commission;

(25) operate motor vehicle weighing stations, issue special written permits authorizing the operation of overweight and oversize vehicles, establish fees for the overweight and oversize vehicle special permits, enforce the size, weight, and load limitations adopted by the Department of Transportation and Public Facilities under AS 19.10.060, and establish regulations relating to pilot car services and the enforcement of the size, weight, and load limitations adopted under AS 19.10.060;

(26) administer the Alaska Foreign Offices established by AS 44.33.530. (§ 14 ch 64 SLA 1959; am § 6 ch 186 SLA 1960; am § 2 ch 1 SLA 1961; am § 2 ch 55 SLA 1963; am § 2 ch 70 SLA 1965; am E.O. No. 33 (1968); am § 4 ch 94 SLA 1969; am § 6 ch 207 SLA 1975; am § 1 ch 116 SLA 1976; am § 96 ch 218 SLA 1976; am E.O. No. 39, § 13 (1977); am E.O. No. 40, § 2 (1979); am § 4 ch 62 SLA 1979; am E.O. No. 47, § 6 (1980); am § 33 ch 167 SLA 1980; am § 1 ch 77 SLA 1982; am E.O. No. 57, § 2 (1984); am § 1 ch 120 SLA 1984)

Cross references. — As to establishing limitations on weight and load of vehicles, see AS 19.10.060(1).

Effect of amendments. — Section 6, E.O. No. 47 (1980) repealed paragraph (22).

Section 33, ch. 167, SLA 1980, added paragraph (24).

The 1982 amendment added paragraph (25).

The first 1984 amendment added paragraph (26).

The second 1984 amendment substituted "Offices" for "Office" in paragraph (26).

Editor's notes. — The duties, powers, and responsibilities in respect to the accumulation, analysis, and reporting of commercial and industrial statistics, the promotion of the economic and tourist development of the state, the granting of industrial tax incentives, the tourist attraction development program, and the tourism advisory board were transferred from the Department of Commerce to the Department of Economic Development and Planning by ch. 159 SLA 1962 (AS 44.45), that was repealed by § 1 ch. 207 SLA 1975.

Legislative history reports. — For report on ch. 116, SLA 1976 (SCSHB 730), see 1976 House Journal, p. 696.

Sec. 44.33.025. Recording. [Repealed, E.O. No. 47, § 6 (1980).]

Sec. 44.33.110. Civil Air Patrol. [Repealed, E.O. No. 33 (1968). For current provisions, see AS 26.05.345.]

IN THE SENATE

BY THE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

SENATE BILL NO. 491

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to weights and measures; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 45.75.030 is amended to read:

Same

Sec. 45.75.030. STATE DIRECTOR AND INSPECTORS OF WEIGHTS AND MEASURES. The commissioner of commerce and economic development is ex officio state director of weights and measures. The commissioner may delegate this authority, and [DIRECTOR] may appoint state inspectors.

* Sec. 2. AS 45.75.040 is amended to read:

Same

Sec. 45.75.040. GENERAL POWERS AND DUTIES OF COMMISSIONER [DIRECTOR]. The commissioner [DIRECTOR] is the custodian of the state standards of weight and measure and of the other standards and equipment provided for by this chapter, and [. THE DIRECTOR] shall keep accurate records of the standards and equipment. The commissioner [DIRECTOR] shall [operate motor vehicle weigh stations; establish fees for and issue overweight and oversize vehicle permits; enforce this chapter; implement AS 44.33.020(25); and [. HE SHALL] supervise the weights and measures offered for sale, sold, or in use in the state.

Deleted

* Sec. 3. AS 45.75.050(a) is amended to read:

Same

(a) The commissioner [DIRECTOR] shall adopt [ISSUE] regulations for the enforcement of this chapter in accordance with the Administrative Procedure Act (AS 44.62). These have the effect of law.

* Sec. 4. AS 45.75.050(b) is amended by adding a new paragraph to read:

(5) provisions governing the enforcement of the size,

weight, and load limitations established under AS 19.10.060; the issuance of, and the enforcement of the terms of, permits for overweight and oversize vehicles; and the operation of weigh stations.

* Sec. 5. AS 45.75.050(d) is amended to read:

(d) The specifications, tolerances, and regulations for commercial weighing and measuring devices, together with amendments to them, as recommended by the National Bureau of Standards and published in National Bureau of Standards Handbook 44 and supplements to it, or in any publication revising or superseding Handbook 44, are the specifications, tolerances, and regulations for commercial weighing and measuring devices of the state, except as specifically modified, amended, or rejected by a regulation adopted [ISSUED] by the commissioner [DIRECTOR].

* Sec. 6. AS 45.75.060 is amended to read:

Sec. 45.75.060. OFFICE AND FIELD [WORKING] STANDARDS AND EQUIPMENT. The commissioner [STATE] shall maintain [SUPPLY THE DIVISION OF WEIGHTS AND MEASURES WITH] a duplicate set of state standards of weight and measure, referred to in this chapter as office standards. The commissioner [STATE] shall also supply field standards and the equipment [which] is necessary to carry out this chapter. The office standards and field standards must [SHALL] be verified upon their initial receipt and at least once each year afterward. The office standards must [SHALL] be verified by direct comparison with the state standards. The field standards must [SHALL] be verified by comparison with the office standards.

* Sec. 7. AS 45.75.070 is amended to read:

Sec. 45.75.070. TESTING AND INSPECTION OF LOCAL STANDARDS AND WEIGHTS AND MEASURES AT STATE-SUPPORTED INSTITUTIONS. (a) At least once every five years, the commissioner [DIRECTOR] shall test the

standards of weight and measure obtained by a city which has appointed a sealer of weights and measures, and shall approve them if they are correct. The commissioner [DIRECTOR] shall inspect the standards at least once every two years.

(b) The commissioner [DIRECTOR] shall from time to time test all weights and measures used in checking the receipt or disbursement of supplies in every institution maintained by money appropriated by the legislature, and shall report the commissioner's [HIS] findings, in writing, to the supervisory board and to the executive officer of the institution concerned.

* Sec. 8. AS 45.75.080(a) is amended to read:

(a) The commissioner [DIRECTOR] may inspect and test, to ascertain if they are correct, all weights and measures kept, offered, or exposed for sale. The commissioner [DIRECTOR] shall, at least annually [SEMIANNUALLY AND MORE OFTEN AS HE CONSIDERS NECESSARY], inspect and test, to ascertain if they are correct, all weights and measures commercially used

(1) in determining the weight, measurement, or count of commodities or things sold, or offered or exposed for sale, on the basis of weight or of measure;

(2) in computing the basic charge or payment for services rendered on the basis of weight or of measure or count; or

(3) in determining weight or measurement when a charge is made for this determination.

* Sec. 9. AS 45.75.090 is amended to read:

Sec. 45.75.090. INVESTIGATIONS. The commissioner [DIRECTOR] shall investigate complaints of violations of this chapter, and shall [, UPON HIS OWN INITIATIVE,] conduct other [THE] investigations that the commissioner [HE] considers appropriate and advisable to develop

information on prevailing procedures in commercial quantity determination [AND] on possible violations of this chapter; and to promote the general objective of accuracy in the determination and representation of quantity in commercial transactions.

* Sec. 10. AS 45.75.100 is amended to read:

Sec. 45.75.100. INSPECTION OF PACKAGES. (a) The commissioner [DIRECTOR] shall, from time to time, weigh or measure and inspect packages or amounts of commodities kept, offered, or exposed for sale to determine whether they contain the amounts represented and whether they are kept, offered, or exposed for sale in accordance with law. When packages or amounts of commodities do not contain the amounts represented, or are kept, offered, or exposed for sale in violation of law, the commissioner [DIRECTOR] may order them off sale and may mark or tag them to show they are illegal. The commissioner [DIRECTOR] may use recognized sampling procedures. Compliance of a given lot of packages must [SHALL] be determined on the basis of the result obtained on a sample selected from and representative of the lot.

(b) [NO] person may not

(1) sell, or keep, offer, or expose for sale in intrastate commerce a package or amount of commodity that has been ordered off sale or marked or tagged as provided in this section until the package or amount of commodity has been brought into full compliance with all legal requirements; or

(2) dispose of a package or amount of commodity that is ordered off sale or marked or tagged as provided in this section and that does not meet legal requirements, except with the specific approval of the commissioner [DIRECTOR].

* Sec. 11. AS 45.75.110(a) is amended to read:

(a) The commissioner [DIRECTOR] may issue stop-use orders,

stop-removal orders, and removal orders for weights and measures used or capable of being used commercially. The commissioner [DIRECTOR] may issue stop-removal orders and removal orders for packages or amounts of commodities kept, offered, or exposed for sale whenever the commissioner [HE] considers it necessary or expedient in enforcing this chapter.

* Sec. 12. AS 45.75.120 is amended to read:

Sec. 45.75.120. DISPOSITION OF CORRECT AND INCORRECT APPARATUS. (a) The commissioner [DIRECTOR] shall approve for use and seal or mark with appropriate devices the weights and measures that [which] the commissioner [HE] finds upon inspection and test to be correct as provided in AS 45.75.050, and shall reject and mark or tag as "rejected" the weights and measures that [which] are found [HE FINDS], upon inspections or testing [TEST], to be incorrect as provided in AS 45.75.050 but which in the commissioner's [HIS] best judgment may be satisfactorily repaired [ARE SUSCEPTIBLE OF SATISFACTORY REPAIR]. This sealing or marking is not required for weights and measures exempted by regulation [OF THE DIRECTOR].

(b) The commissioner [DIRECTOR] shall condemn, and may seize and destroy weights and measures found to be incorrect that [which], in the commissioner's [HIS] best judgment, cannot be satisfactorily repaired [ARE NOT SUSCEPTIBLE OF SATISFACTORY REPAIR]. Weights and measures which are rejected under (a) of this section may be confiscated and destroyed by the commissioner [DIRECTOR] if not corrected as required by AS 45.75.180 or if used or disposed of contrary to the requirements of AS 45.75.180.

* Sec. 13. AS 45.75.130 is amended to read:

Sec. 45.75.130. POLICE POWERS AND RIGHT OF ENTRY AND STOPPAGE. (a) In the enforcement of this chapter and any other law dealing with

weights and measures, the commissioner [DIRECTOR] has special police powers. The commissioner [HE] may arrest, without formal warrant, any person violating the law, and seize for use as evidence, without formal warrant, incorrect or unsealed weights and measures or amounts or packages of commodity, used, retained, offered, or exposed for sale, or sold in violation of law. In performing [his] duties, the commissioner [DIRECTOR] may enter, without formal warrant, any structure or premises, and stop any person and require the person [him] to proceed to a specified place.

(b) An employee of the Department of Commerce and Economic Development who is authorized by the commissioner to enforce the size, weight, and load limitations adopted by the Department of Transportation and Public Facilities under AS 19.10.060 may arrest or issue a citation to a person who violates (1) any of those limitations, (2) the terms of an overweight or oversize vehicle permit issued under AS 44.33.020(25) and AS 45.75.040, or (3) the provisions of regulations adopted under AS 44.33.020(25) and AS 45.75.050(b)(5). [Citations issued under this subsection must be treated as specified by AS 12.25.180 -- 12.25.230 for citations issued by a peace officer.]

* Sec. 14. AS 45.75.140 is amended to read:

Sec. 45.75.140. POWERS AND DUTIES OF INSPECTORS [DEPUTY DIRECTOR AND INSPECTOR]. The powers and duties of the commissioner [DIRECTOR] specified in AS 45.75.070, 45.75.080, 45.75.090, 45.75.100, 45.75.120, 45.75.130, and 45.75.170 may [, AND 45.75.380 SHALL] also be exercised by [THE DEPUTY DIRECTOR AND] inspectors, when acting under the instructions and at the direction of the commissioner [DIRECTOR].

* Sec. 15. AS 45.75.150 is amended to read:

Sec. 45.75.150. APPOINTMENT OF CITY SEALERS AND DEPUTY SEALERS OF WEIGHTS AND MEASURES. (a) A city may appoint a sealer of weights

and measures, and the deputy sealers of weights and measures it needs. If the city appoints a sealer, it shall obtain at its expense the standards of weight and measure [WEIGHTS AND MEASURES] and the additional equipment, for use in the enforcement of this chapter in the city, which the commissioner [DIRECTOR] prescribes.

(b) When the standards of weight and measure provided by a city are examined and approved by the commissioner [DIRECTOR], they are the official standards for the city. At least every five years, the sealer shall make or arrange to have made comparisons between the sealer's [HIS] field standards and appropriate standards of a higher order belonging to the sealer's [HIS] city or to the state, in order to maintain the field standards in accurate condition.

* Sec. 16. AS 45.75.160 is amended to read:

Sec. 45.75.160. CITY SEALERS AND DEPUTY SEALERS. The sealer of a city, and the sealer's deputy [SEALER] when acting under the sealer's [HIS] instructions and [AT HIS] direction, have the same powers and shall perform the same duties within the city as those granted to and imposed upon the commissioner [DIRECTOR] by AS 45.75.080 -- 45.75.130 and 45.75.380.

* Sec. 17. AS 45.75.170 is amended to read:

Sec. 45.75.170. CONCURRENT JURISDICTION. In each city having a sealer of weights and measures, the commissioner [DIRECTOR] has concurrent authority to enforce this chapter.

* Sec. 18. AS 45.75.180 is amended to read:

Sec. 45.75.180. DUTY OF OWNERS OF INCORRECT APPARATUS. Weights and measures rejected by the commissioner [DIRECTOR] or a sealer remain subject to the control of the rejecting authority until suitable repair or disposition of them is made as required by this section. The owner of a rejected weight and measure shall correct it

within 30 days or a longer period authorized by th. rejecting authority, [;] or [,] may dispose of it in the manner authorized by the rejecting authority. Rejected weights and measures may not again be used commercially until officially re-examined and found to be correct or until specific written permission for their use is issued by the rejecting authority.

* Sec. 19. AS 45.75.190(c) is amended to read:

(c) The commissioner [DIRECTOR] may adopt [ISSUE] reasonable regulations necessary to assure that amounts of commodity sold are determined in accordance with good commercial practice and are so determined and represented as to be accurate and informative.

* Sec. 20. AS 45.75.200(c) is amended to read:

(c) Under (a)(1) of this section the commissioner [DIRECTOR] shall, by regulation, establish

(1) reasonable variations or tolerances to be allowed, which may include variations below the declared weight or measure caused by ordinary and customary exposure, only after the commodity is introduced into intrastate commerce, to conditions that normally occur in good distribution practice and that unavoidably result in decreased weight or measure,

(2) exemption as to small packages, and

(3) exemptions as to commodities put up in variable weights or sizes for sale to the consumer intact and either customarily not sold as individual units or customarily weighed or measured at the time of sale to the consumer.

* Sec. 21. AS 45.75.220 is amended to read:

Sec. 45.75.220. MISLEADING PACKAGES. [NO] commodity in package form may be ~~so~~ not wrapped, or put in a container so made, formed, or filled as to mislead the purchaser as to the quantity of the contents

of the package, and the contents of a container may not fall below the reasonable standard of fill [which] That the commissioner [DIRECTOR] prescribes for the commodity.

* Sec. 22. AS 45.75.282(b) is amended to read:

(b) One of the tickets provided for in (a) of this section shall be retained by the vendor, and the other shall be delivered to the purchaser at the time of delivery of the commodity, or surrendered, on demand, to the commissioner [DIRECTOR, OR THE DEPUTY DIRECTOR,] or an inspector, or a sealer [,] or a deputy sealer, who may [,IF HE WANTS TO] retain it as evidence and, if it is retained, shall issue a weight slip in place of it.

* Sec. 23. AS 45.75.290(b) is amended to read:

(b) One of the tickets provided for under (a) of this section shall be retained by the vendor and the other shall be delivered to the purchaser at the time of delivery of the fuel, or shall be surrendered, on demand, to the commissioner [DIRECTOR, OR THE DEPUTY DIRECTOR] or an inspector, or a sealer or deputy sealer, who may [, IF HE DESIRES TO] retain it as evidence and [, SHALL] issue a weight slip in place of it for delivery to the purchaser. If the purchaser carries away the [HIS] purchase, the vendor is required only to give to the purchaser at the time of sale a delivery ticket stating the number of pounds of fuel delivered to the purchaser [HIM].

* Sec. 24. AS 45.75.300(3) is amended to read:

(3) reasonable tolerances shall be permitted, and these must [SHALL] be included in regulations adopted for the enforcement of this section [THAT ARE ISSUED BY THE DIRECTOR];

* Sec. 25. AS 45.75.330 is amended to read:

Sec. 45.75.330. INJUNCTION. The commissioner [DIRECTOR] may apply to a court for a temporary or permanent injunction restraining a

person from violating a provision of this chapter.

* Sec. 26. AS 45.75.380 is amended to read:

Sec. 45.75.380. OFFENSES AND PENALTIES. It is a class A misdemeanor for a person to perform any of the following acts or otherwise to violate a provision of this chapter [A PERSON WHO, BY HIMSELF OR BY HIS SERVANT, OR AGENT, OR AS THE SERVANT OR AGENT OF ANOTHER, PERFORMS ANY ONE OF THE FOLLOWING ACTS IS GUILTY OF A MISDEMEANOR AND UPON A FIRST CONVICTION OF THE VIOLATION IS PUNISHABLE BY A FINE OF NOT LESS THAN $20 NOR MORE THAN $200, OR BY IMPRISONMENT FOR NOT MORE THAN THREE MONTHS, OR BY BOTH. UPON A SECOND OR SUBSEQUENT CONVICTION, THE PERSON IS PUNISHABLE BY A FINE OF NOT LESS THAN $50 NOR MORE THAN $500, OR BY IMPRISONMENT FOR NOT MORE THAN ONE YEAR, OR BY BOTH]:

(1) uses or has in possession for the purpose of using for any commercial purpose specified in AS 45.75.080, sells, offers, or exposes for sale, or hire, or has in possession for the purpose of selling or hiring, an incorrect weight or measure or a device or instrument used to or calculated to falsify a weight or measure;

(2) uses or has in possession for current use, in buying or selling a commodity or thing, or for hire or award, or in the computation of a basic charge or payment for services rendered on the basis of weight or measurement, or in the determination of weight or measurement when a charge is made for determination, a weight or measure that has not been tested and sealed by the appropriate authority within one year, (A) unless written notice is given to the appropriate authority to the effect that the weight or measure is available for examination, or is due for re-examination, as the case may be, (B) unless specific written permission to use the weight or measure is received from the appropriate authority, or (C) unless the weight or measure is exempt from sealing or annual testing requirements by

AS 45.75.080 or by a regulation adopted [OF THE DIRECTOR ISSUED] under AS 45.75.050;

(3) disposes of a rejected weight or measure in a manner contrary to law or regulation;

(4) removes from a weight or measure, contrary to law or regulation, a tag, seal, or mark placed on it by the appropriate authority;

(5) sells, offers or exposes for sale less than the quantity he represents of a commodity, thing, or service;

(6) takes more than the quantity [he] represents of a commodity, thing, or service when, as buyer, [he] furnished the weight or measure by means of which the amount of the commodity, thing, or service is determined;

(7) keeps for the purpose of sale, advertises, or offers [or exposes] for sale, or sells a commodity, thing, or service in a condition or manner contrary to law or regulation;

(8) uses in retail trade, except in the preparation of packages put up in advance of sale and of medical prescriptions, a weight or measure that is not so positioned that its indications may be accurately read and the weighing or measuring operation observed from some position which may reasonably be assumed by a customer;

[(9)] (9) violates a provision of this chapter or of a regulation adopted under this chapter for which a specific penalty is not prescribed;

(10) hinders or obstructs the commissioner, an inspector, a sealer, or a deputy sealer in the performance of official duties under this chapter;

(11) violates a provision of an overweight or oversize permit;

(12) violates a weight, load, or size limitation established under AS 19.10.060 or regulations adopted under AS 19.05.020 or 45.-75.050(b)(5).

* Sec. 27. AS 45.75.390(4) is repealed and reenacted to read:

(4) "commissioner" means the commissioner of commerce and economic development or a designee;

* Sec. 28. [AS 28.35.230(e)] and AS 45.75.360 are repealed.

* Sec. 29. This Act takes effect immediately in accordance with AS 01.-10.070(c).

and of the other standards and equipment provided for by this chapter. The director shall keep accurate records of the standards and equipment. The director shall enforce this chapter. He shall supervise the weights and measures offered for sale, sold, or in use in the state. (§ 8 ch 101 SLA 1961)

Sec. 45.75.050. Adoption of regulations. (a) The director shall issue regulations for the enforcement of this chapter in accordance with the Administrative Procedure Act (AS 44.62). These have the effect of law.

(b) The regulations may include

(1) standards of net weight, measure, or count, and reasonable standards of fill, for any commodity in package form;

(2) rules governing the technical and reporting procedures to be followed, and the report and record forms and marks of approval and rejection to be used by inspectors of weights and measures in the discharge of their official duties;

(3) exemptions from the sealing or marking requirements of AS 45.75.120 with respect to weights and measures of a character or size that sealing or marking would be inappropriate, impracticable, or damaging to the apparatus in question; and

(4) with respect to classes of weights and measures of a character that annual retesting is unnecessary to continued accuracy, exemptions from the requirements of AS 45.75.070 and 45.75.080 for annual testing, and schedules fixing the frequency of required retests for classes of devices exempted.

(c) The regulations shall include specifications, tolerance, and regulations for weights and measures of the character of those specified in AS 45.75.030, designed to eliminate from use, without prejudice to apparatus that conforms as closely as practicable to the official standards, those (1) that are not accurate, (2) that are of such construction that they are not reasonably permanent in their adjustment or will not repeat their indications correctly, or (3) that facilitate the perpetration of fraud.

(d) The specifications, tolerances, and regulations for commercial weighing and measuring devices, together with amendments to them, as recommended by the National Bureau of Standards and published in National Bureau of Standards Handbook 44 and supplements to it, or in any publication revising or superseding Handbook 44, are the specifications, tolerances, and regulations for commercial weighing and measuring devices of the state, except as specifically modified, amended, or rejected by a regulation issued by the director.

(e) For the purposes of this chapter, apparatus is correct when it conforms to the requirements adopted in accordance with this section; other apparatus is considered incorrect. (§ 9 ch 101 SLA 1961)

IN THE SENATE BY THE TRANSPORTATION COMMITTEE

CS FOR SENATE BILL NO. 82 (Transportation)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to weights and measures; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 45.75.030 is amended to read:

Sec. 45.75.030. STATE DIRECTOR AND INSPECTORS OF WEIGHTS AND MEASURES. The commissioner of commerce and economic development is ex officio state director of weights and measures. The commissioner may delegate this authority, and [DIRECTOR] may appoint state inspectors.

* Sec. 2. AS 45.75.040 is amended to read:

Sec. 45.75.040. GENERAL POWERS AND DUTIES OF COMMISSIONER [DIRECTOR]. The commissioner [DIRECTOR] is the custodian of the state standards of weight and measure and of the other standards and equipment provided for by this chapter, and [. THE DIRECTOR] shall keep accurate records of the standards and equipment. The commissioner [DIRECTOR] shall enforce this chapter, implement AS 44.33.020(25), and [. HE SHALL] supervise the weights and measures offered for sale, sold, or in use in the state.

* Sec. 3. AS 45.75.050(a) is amended to read:

(a) The commissioner [DIRECTOR] shall adopt [ISSUE] regulations necessary for the enforcement of this chapter in accordance with the Administrative Procedure Act (AS 44.62). These have the effect of law.

* Sec. 4. AS 45.75.050(b) is amended to read:

(b) The regulations may include

(1) standards of net weight, measure, or count, and reasonable standards of fill, for a [ANY] commodity in package form;

(2) rules governing the technical and reporting procedures to be followed, and the report and record forms and marks of approval and rejection to be used by inspectors of weights and measures in the discharge of their official duties;

(3) exemptions from the sealing or marking requirements of AS 45.75.120 for [WITH RESPECT TO] weights and measures of a character or size that sealing or marking would be inappropriate, impracticable, or damaging to the apparatus in question; [AND]

(4) for [WITH RESPECT TO] classes of weights and measures of a character that annual retesting is unnecessary to continued accuracy, exemptions from the requirements of AS 45.75.070 and 45.75.080 for annual testing, and schedules fixing the frequency of required retests for classes of devices exempted;

(5) in the implementation of AS 44.33.020(25), provisions governing the enforcement of the size, weight, and load limitations established under AS 19.10.060; the issuance of, and the enforcement of the terms of, permits for overweight and oversize vehicles; and the operation of weigh stations.

* Sec. 5. AS 45.75.050(d) is amended to read:

(d) The specifications, tolerances, and regulations for commercial weighing and measuring devices, together with amendments to them, as recommended by the National Bureau of Standards and published in National Bureau of Standards Handbook 44 and supplements to it, or in any publication revising or superseding Handbook 44, are the specifications, tolerances, and regulations for commercial weighing and measuring devices of the state, except as specifically modified, amended, or rejected by a regulation adopted [ISSUED] by the

commissioner [DIRECTOR].

* Sec. 6. AS 45.75.060 is amended to read:

Sec. 45.75.060. OFFICE AND FIELD [WORKING] STANDARDS AND EQUIPMENT. The commissioner [STATE] shall maintain [SUPPLY THE DIVISION OF WEIGHTS AND MEASURES WITH] a duplicate set of state standards of weight and measure, referred to in this chapter as office standards. The commissioner [STATE] shall also supply field standards and the equipment that [WHICH] is necessary to carry out this chapter. The commissioner shall verify the office standards and field standards on [SHALL BE VERIFIED UPON] their initial receipt and at least once each year afterward. The commissioner shall verify the office standards [SHALL BE VERIFIED] by direct comparison with the state standards. The commissioner shall verify the [THE] field standards [SHALL BE VERIFIED] by comparison with the office standards.

* Sec. 7. AS 45.75.070 is amended to read:

Sec. 45.75.070. TESTING AND INSPECTION OF LOCAL STANDARDS AND WEIGHTS AND MEASURES AT STATE-SUPPORTED INSTITUTIONS. (a) At least once every five years, the commissioner [DIRECTOR] shall test the standards of weight and measure obtained by a city that [WHICH] has appointed a sealer of weights and measures, and shall approve them if they are correct. The commissioner [DIRECTOR] shall inspect the standards at least once every two years.

(b) The commissioner [DIRECTOR] shall from time to time test all weights and measures used in checking the receipt or disbursement of supplies in every institution maintained by money appropriated by the legislature, and shall report the commissioner's [HIS] findings, in writing, to the supervisory board and to the executive officer of the institution concerned.

* Sec. 8. AS 45.75.080(a) is amended to read:

(a) The commissioner [DIRECTOR] may inspect and test, to ascertain if they are correct, all weights and measures kept, offered, or exposed for sale. The commissioner [DIRECTOR] shall, at least annually [SEMIANNUALLY AND MORE OFTEN AS HE CONSIDERS NECESSARY], inspect and test, to ascertain if they are correct, all weights and measures commercially used

(1) in determining the weight, measurement, or count of commodities or things sold, or offered or exposed for sale, on the basis of weight or of measure;

(2) in computing the basic charge or payment for services rendered on the basis of weight or of measure or count; or

(3) in determining weight or measurement when a charge is made for this determination.

* Sec. 9. AS 45.75.090 is amended to read:

Sec. 45.75.090. INVESTIGATIONS. The commissioner [DIRECTOR] shall investigate complaints of violations of this chapter, and shall [, UPON HIS OWN INITIATIVE,] conduct other [THE] investigations that the commissioner [WHICH HE] considers appropriate and advisable to develop information on prevailing procedures in commercial quantity determination, [AND] on possible violations of this chapter, and to promote the general objective of accuracy in the determination and representation of quantity in commercial transactions.

* Sec. 10. AS 45.75.100 is amended to read:

Sec. 45.75.100. INSPECTION OF PACKAGES. (a) The commissioner [DIRECTOR] shall, from time to time, weigh or measure and inspect packages or amounts of commodities kept, offered, or exposed for sale to determine whether they contain the amounts represented and whether they are kept, offered, or exposed for sale in accordance with law. When packages or amounts of commodities do not contain the amounts

represented, or are kept, offered, or exposed for sale in violation of law, the commissioner [DIRECTOR] may order them off sale and may mark or tag them to show they are illegal. The commissioner [DIRECTOR] may use recognized sampling procedures. The commissioner shall determine the compliance [COMPLIANCE] of a given lot of packages [SHALL BE DETERMINED] on the basis of the result obtained on a sample selected from and representative of the lot.

(b) A [NO] person may not

(1) sell, or keep, offer, or expose for sale in intrastate commerce a package or amount of commodity that has been ordered off sale or marked or tagged as provided in this section until the package or amount of commodity has been brought into full compliance with all legal requirements; or

(2) dispose of a package or amount of commodity that is ordered off sale or marked or tagged as provided in this section and that does not meet legal requirements, except with the specific approval of the commissioner [DIRECTOR].

* Sec. 11. AS 45.75.110(a) is amended to read:

(a) The commissioner [DIRECTOR] may issue stop-use orders, stop-removal orders, and removal orders for weights and measures used or capable of being used commercially. The commissioner [DIRECTOR] may issue stop-removal orders and removal orders for packages or amounts of commodities kept, offered, or exposed for sale whenever the commissioner [HE] considers it necessary or expedient in enforcing this chapter.

* Sec. 12. AS 45.75.120 is amended to read:

Sec. 45.75.120. DISPOSITION OF CORRECT AND INCORRECT APPARATUS. (a) The commissioner [DIRECTOR] shall approve for use and seal or mark with appropriate devices the weights and measures that the

commissioner [WHICH HE] finds on [UPON] inspection and test to be correct as provided in AS 45.75.050, and shall reject and mark or tag as "rejected" the weights and measures that are found [WHICH HE FINDS], upon inspections or testing [TEST], to be incorrect as provided in AS 45.75.050 but which in the commissioner's [HIS] best judgment may be satisfactorily repaired [ARE SUSCEPTIBLE OF SATISFACTORY REPAIR]. This sealing or marking is not required for weights and measures exempted by regulation [OF THE DIRECTOR].

(b) The commissioner [DIRECTOR] shall condemn, and may seize and destroy weights and measures found to be incorrect that [WHICH], in the commissioner's [HIS] best judgment, cannot be satisfactorily repaired [ARE NOT SUSCEPTIBLE OF SATISFACTORY REPAIR]. Weights and measures that [WHICH] are rejected under (a) of this section may be confiscated and destroyed by the commissioner [DIRECTOR] if not corrected as required by AS 45.75.180 or if used or disposed of contrary to the requirements of AS 45.75.180.

* Sec. 13. AS 45.75.130 is amended to read:

Sec. 45.75.130. POLICE POWERS AND RIGHT OF ENTRY AND STOPPAGE. In the enforcement of this chapter and [ANY] other laws [LAW] dealing with weights and measures, the commissioner [DIRECTOR] has special police powers. The commissioner [HE] may arrest, without formal warrant, a [ANY] person violating the law, and seize for use as evidence, without formal warrant, incorrect or unsealed weights and measures or amounts or packages of commodity, used, retained, offered, or exposed for sale, or sold in violation of law. In performing these [HIS] duties, the commissioner [DIRECTOR] may enter, without formal warrant, a [ANY] structure or premises, and stop any person and require the person [HIM] to proceed to a specified place.

* Sec. 14. AS 45.75 is amended by adding new sections to article 2 to

read:

Sec. 45.75.131. ISSUANCE OF CITATIONS. An employee of the Department of Commerce and Economic Development who is authorized by the commissioner to enforce the size, weight, and load limitations adopted by the Department of Transportation and Public Facilities under AS 19.10.060 may issue a citation to a person who violates

(1) a load limitation;

(2) the terms of an overweight or oversize vehicle permit issued under AS 44.33.020(25) and AS 45.75.040; or

(3) the provisions of a regulation adopted under AS 44.33.-020(25) and AS 45.75.050(b)(5).

Sec. 45.75.132. FORM AND ISSUANCE OF CITATION. (a) A citation issued under this section must be in writing. A person receiving the citation is not required to sign a promise to appear in court.

(b) The time specified in the notice to appear on a citation issued under this section must be at least 15 days after the issuance of the citation, unless the person cited requests an earlier hearing.

(c) The commissioner is responsible for the issuance of books containing appropriate citations and shall maintain a record of each book and each citation contained in it. The commissioner shall require and retain a receipt for every book issued to an employee of the department designated by the commissioner to provide investigative service to enforce provisions of this chapter.

(d) An employee who issues a citation under this section shall deposit the original or a copy of the citation with a court having jurisdiction over the alleged offense. Upon its deposit with the court, the citation may be disposed of only by trial in the court or other official action taken by the magistrate, judge, or prosecutor. The employee who issued the citation may not dispose of it or copies

of it or of the record of its issuance except as required under this subsection and (e) of this section.

(e) The commissioner shall require the return of a copy of every citation issued under this section and of all copies of every citation that has been spoiled or on which an entry has been made and not issued to an alleged violator. The commissioner shall also maintain in connection with every citation issued a record of the disposition of the charge by the court in which the original or copy of the citation was deposited.

(f) If the form of citation issued under this section includes the essential facts constituting the offense charged and is sworn to as required under the laws of this state for a complaint charging commission of the offense alleged in the citation, the citation when filed with a court having jurisdiction, is considered to be a lawful complaint for the purpose of prosecution.

(g) Unless the citation has been voided or otherwise dismissed by the magistrate, judge, or prosecutor, or bail has been forfeited under AS 45.75.133, a person who fails to appear in court to answer a citation issued under this section, regardless of the disposition of the charge for which the citation was issued, is guilty of a class B misdemeanor.

Sec. 45.75.133. BAIL FORFEITURE. (a) The supreme court shall specify by rule or order those violations that are appropriate for disposition without court appearance, and shall establish a schedule of bail amounts. The maximum bail forfeiture amount for an offense may not exceed the maximum fine specified by law for that offense. If the person who has been cited can dispose of the violation without court appearance, the issuing employee shall write on the citation the amount of bail forfeiture applicable to the violation.

(b) A person cited for a violation for which a bail forfeiture amount has been established under (a) of this section may, within 15 days after the date of the citation, mail or personally deliver to the clerk of the court in which the citation is filed by the employee

(1) the amount of bail indicated on the citation for that offense; and

(2) a copy of the citation indicating that the right to an appearance is waived, a plea of no contest is entered and the bail is forfeited.

(c) When the cited person has forfeited bail under (b) of this section, the court shall enter a judgment of conviction. Forfeiture of bail is a complete satisfaction for the violation. The clerk of the court accepting the bail forfeiture shall provide the offender with a receipt stating that fact.

(d) A cited person who fails to pay the bail forfeiture amount established under (a) of this section or to appear in court as required, is guilty of a class B misdemeanor.

(e) Notwithstanding other provisions of law, if a person cited for a violation for which a bail forfeiture amount has been established under (a) of this section appears in court and is found guilty, the court may not impose a penalty that exceeds the bail forfeiture amount for that offense established under (a) of this section.

* Sec. 15. AS 45.75.140 is amended to read:

Sec. 45.75.140. POWERS AND DUTIES OF INSPECTORS [DEPUTY DIRECTOR AND INSPECTOR]. The powers and duties of the commissioner [DIRECTOR] specified in AS 45.75.070 - 45.75.100, 45.75.120, [AS 45.75.070,] 45.75.130, and 45.75.170 may [, AND 45.75.380 SHALL] also be exercised by [THE DEPUTY DIRECTOR AND] inspectors, when acting under the instructions and at the direction of the commissioner [DIRECTOR].

* Sec. 16. AS 45.75.150 is amended to read:

Sec. 45.75.150. APPOINTMENT OF CITY SEALERS AND DEPUTY SEALERS OF WEIGHTS AND MEASURES. (a) A city may appoint a sealer of weights and measures, and the deputy sealers of weights and measures it needs. If the city appoints a sealer, the city [IT] shall obtain at its expense the standards of weight and measure [WEIGHTS AND MEASURES] and the additional equipment, for use in the enforcement of this chapter in the city, which the commissioner [DIRECTOR] prescribes.

(b) When the standards of weight and measure provided by a city are examined and approved by the commissioner [DIRECTOR], they are the official standards for the city. At least every five years, the sealer shall make or arrange to have made comparisons between the sealer's [HIS] field standards and appropriate standards of a higher order belonging to the sealer's [HIS] city or to the state, in order to maintain the field standards in accurate condition.

* Sec. 17. AS 45.75.160 is amended to read:

Sec. 45.75.160. CITY SEALERS AND DEPUTY SEALERS. The sealer of a city, and the sealer's [HIS] deputy [SEALER] when acting under the sealer's [HIS] instructions and [AT HIS] direction, have the same powers and shall perform the same duties within the city as those granted to and imposed upon the commissioner [DIRECTOR] by AS 45.75.-080 - 45.75.130 and 45.75.380.

* Sec. 18. AS 45.75.170 is amended to read:

Sec. 45.75.170. CONCURRENT JURISDICTION. In each city having a sealer of weights and measures, the commissioner [DIRECTOR] has concurrent authority to enforce this chapter.

* Sec. 19. AS 45.75.180 is amended to read:

Sec. 45.75.180. DUTY OF OWNERS OF INCORRECT APPARATUS. Weights and measures rejected by the commissioner [DIRECTOR] or a sealer

remain subject to the control of the rejecting authority until suitable repair or disposition of them is made as required by this section. The owner of a rejected weight and measure shall correct it within 30 days or a longer period authorized by the rejecting authority, [;] or [,] may dispose of it in the manner authorized by the rejecting authority. The owner of rejected [REJECTED] weights and measures may not use them again [BE USED] commercially until the rejected weights and measures are officially reexamined [RE-EXAMINED] and found to be correct or until specific written permission for their use is issued by the rejecting authority.

* Sec. 20. AS 45.75.190(c) is amended to read:

(c) The commissioner [DIRECTOR] may adopt [ISSUE] reasonable regulations necessary to assure that a seller determines the amounts of commodity sold [ARE DETERMINED] in accordance with good commercial practice and in an accurate and informative manner [AND ARE SO DETERMINED AND REPRESENTED AS TO BE ACCURATE AND INFORMATIVE].

* Sec. 21. AS 45.75.200(c) is amended to read:

(c) Under (a)(1) of this section the commissioner [DIRECTOR] shall, by regulation, establish

(1) reasonable variations or tolerances to be allowed, that [WHICH] may include variations below the declared weight or measure caused by ordinary and customary exposure, only after the commodity is introduced into intrastate commerce, to conditions that normally occur in good distribution practice and that unavoidably result in decreased weight or measure,

(2) exemptions for [EXEMPTION AS TO] small packages, and

(3) exemptions for [AS TO] commodities put up in variable weights or sizes for sale to the consumer intact and either customarily not sold as individual units or customarily weighed or measured at

the time of sale to the consumer.

* Sec. 22. AS 45.75.220 is amended to read:

Sec. 45.75.220. MISLEADING PACKAGES. A [NO] commodity in package form may not be so wrapped, or put in a container so made, formed, or filled as to mislead the purchaser about [AS TO] the quantity of the contents of the package, and the contents of a container may not fall below the reasonable standard of fill that [WHICH] the commissioner [DIRECTOR] prescribes for the commodity.

* Sec. 23. AS 45.75.282(b) is amended to read:

(b) The vendor shall retain one [ONE] of the tickets provided for in (a) of this section [SHALL BE RETAINED BY THE VENDOR,] and shall deliver the other [SHALL BE DELIVERED] to the purchaser at the time of delivery of the commodity, or surrender the other [SURRENDERED], on demand, to the commissioner [DIRECTOR, OR THE DEPUTY DIRECTOR,] or an inspector, or a sealer[,] or a deputy sealer, who may [, IF HE WANTS TO] retain it as evidence and, if it is retained, the commissioner or deputy sealer [,] shall issue a weight slip in place of it.

* Sec. 24. AS 45.75.290(b) is amended to read:

(b) The vendor shall retain one [ONE] of the tickets provided for under (a) of this section [SHALL BE RETAINED BY THE VENDOR] and shall deliver the other [SHALL BE DELIVERED] to the purchaser at the time of delivery of the fuel, or shall surrender it, [BE SURRENDERED,] on demand, to the commissioner [DIRECTOR, OR THE DEPUTY DIRECTOR] or an inspector, or a sealer or deputy sealer, who may [, IF HE DESIRES TO] retain it as evidence and [, SHALL] issue a weight slip in place of it for delivery to the purchaser. If the purchaser carries away the [HIS] purchase, the vendor is required only to give to the purchaser at the time of sale a delivery ticket stating the number of

pounds of fuel delivered to the purchaser [HIM].

* Sec. 25. AS 45.75.300 is amended to read:

Sec. 45.75.300. TEXTILE PRODUCTS. It is unlawful for a person to keep for the purpose of sale, offer or expose for sale, or sell textile yard goods put up or packaged in advance of sale in a bolt or roll, or another [ANY OTHER] textile product put up or packaged in advance of sale in another [ANY OTHER] unit, for wholesale or retail sale, unless the person definitely, plainly and conspicuously marks the bolt or roll, or other unit [, IS DEFINITELY, PLAINLY, AND CONSPICUOUSLY MARKED] to show its net measure in terms of yards or its net weight, in terms of avoirdupois pounds or ounces, subject to the following limitations and requirements:

(1) a unit of twine or cordage may be marked to show its net measure in terms of feet; readywound bobbins not sold separately are not required to be individually marked, but the package containing the bobbins shall be marked to show the number of bobbins contained in it and the net weight or measure of the thread on each bobbin; a unit of sewing, basting, mending, darning, crocheting, tatting, hand-knitting, or embroidery thread or yarn, except nylon hand-knitting yarn, that is not composed in whole or in part of wool, the net weight of which is less than two ounces avoirdupois, shall be marked to show its net measure in terms of yards as unwound from the ball or from the spool or other holder; a retail unit of a textile product sold only for household use consisting of a package containing two or more similar individual units that are not sold separately shall be marked to show the number of individual units in the package and the net weight or net measure of the product in each individual unit, but this does not apply where the individual units are separately marked; a unit of yarn, composed in whole or in part of wool, sold to consumers

for handiwork, shall be marked to show the net weight of the yarn, except that a [ANY SUCH] unit of tapestry, mending, or embroidery yarn that [THE NET MEASURE OF WHICH] does not exceed 50 yards in net measure, may be marked to show its linear measure only;

(2) the marking required by this section shall in all cases be in combination with the name and place of business of the manufacturer, packer, or distributor of the product, or a trademark, symbol, brand, or other mark that identifies the manufacturer, packer, or distributor;

(3) reasonable tolerances shall be permitted, and the commissioner shall include reasonable tolerances [THESE SHALL BE INCLUDED] in regulations adopted for the enforcement of this section [THAT ARE ISSUED BY THE DIRECTOR];

(4) this section does not apply to the following textile products when sold at wholesale in bulk by net weight: cordage, agricultural bag sewing threads, twines, yarns that are to be processed, and yarns that are to be industrially converted into end-use products.

* Sec. 26. AS 45.75.330 is amended to read:

Sec. 45.75.330. INJUNCTION. The commissioner [DIRECTOR] may apply to a court for a temporary or permanent injunction restraining a person from violating a provision of this chapter.

* Sec. 27. AS 45.75.380 is amended to read:

Sec. 45.75.380. OFFENSES AND PENALTIES. (a) A person commits a violation subject to the penalty specified in AS 12.55.035(b)(5) if the person does one or more of the following acts [A PERSON WHO, BY HIMSELF OR BY HIS SERVANT, OR AGENT, OR AS THE SERVANT OR AGENT OF ANOTHER, PERFORMS ANY ONE OF THE FOLLOWING ACTS IS GUILTY OF A MISDEMEANOR AND UPON A FIRST CONVICTION OF THE VIOLATION IS PUNISHABLE BY A FINE OF NOT LESS THAN $20 NOR MORE THAN $200, OR BY IMPRISONMENT FOR

NOT MORE THAN THREE MONTHS, OR BY BOTH. UPON A SECOND OR SUBSEQUENT CONVICTION, THE PERSON IS PUNISHABLE BY A FINE OF NOT LESS THAN $50 NOR MORE THAN $500, OR BY IMPRISONMENT FOR NOT MORE THAN ONE YEAR, OR BY BOTH]:

(1) uses or has in possession for the purpose of using for a [ANY] commercial purpose specified in AS 45.75.080, sells, offers, or exposes for sale, or hire, or has in possession for the purpose of selling or hiring, an incorrect weight or measure or a device or instrument used to or calculated to falsify a weight or measure;

(2) uses or has in possession for current use, in buying or selling a commodity or thing, or for hire or award, or in the computation of a basic charge or payment for services rendered on the basis of weight or measurement, or in the determination of weight or measurement when a charge is made for determination, a weight or measure that has not been tested and sealed by the appropriate authority within one year, (A) unless the person gives written notice [IS GIVEN] to the appropriate authority to the effect that the weight or measure is available for examination, or is due for reexamination [RE-EXAMINATION], as the case may be, (B) unless the person receives specific written permission to use the weight or measure [IS RECEIVED] from the appropriate authority, or (C) unless the weight or measure is exempt from sealing or annual testing requirements by AS 45.75.080 or by a regulation adopted [OF THE DIRECTOR ISSUED] under AS 45.75.050;

(3) disposes of a rejected or condemned weight or measure in a manner contrary to law or regulation;

(4) removes from a weight or measure, contrary to law or regulation, a tag, seal, or mark placed on it by the appropriate authority;

(5) sells or[,] offers [OR EXPOSES] for sale less than the

quantity the person [HE] represents of a commodity, thing, or service;

(6) takes more than the quantity the person [HE] represents of a commodity, thing, or service when, as buyer, the person [HE] furnished the weight or measure that the seller used to determine [BY MEANS OF WHICH] the amount of the commodity, thing, or service [IS DETERMINED];

(7) keeps for the purpose of sale, advertises, or offers [OR EXPOSES] for sale, or sells a commodity, thing, or service in a condition or manner contrary to law or regulation;

(8) uses in retail trade, except in the preparation of packages put up in advance of sale and of medical prescriptions, a weight or measure that is not so positioned that a customer may accurately read, from a position that may reasonably be assumed by a customer, its indications [MAY BE ACCURATELY READ] and observe the weighing or measuring operation [OBSERVED FROM SOME POSITION WHICH MAY REASONABLY BE ASSUMED BY A CUSTOMER];

(9) hinders or obstructs the commissioner, an inspector, a sealer, or a deputy sealer in the performance of official duties under this chapter;

(10) violates a provision of an overweight or oversize vehicle permit issued under AS 44.33.020(25);

(11) violates a weight, load, or size limitation established under AS 19.10.060 or a regulation adopted under AS 19.05.020, AS 44.33.020(25), or AS 45.75.050(b)(5);

(12) violates a provision of this chapter or of a regulation adopted under this chapter for which a specific penalty is not prescribed.

(b) Notwithstanding the maximum fine for a violation provided under (a) of this section, the commissioner shall impose on a person

who violates a regulation or special permit governing the weight limit of a motor vehicle a maximum penalty of $.05 for each pound of weight over the authorized weight limit for the vehicle.

* Sec. 28. AS 45.75.390(4) is repealed and reenacted to read:

(4) "commissioner" means the commissioner of commerce and economic development or the commissioner's designee;

* Sec. 29. AS 28.40.050(e) and AS 45.75.360 are repealed.

* Sec. 30. This Act takes effect immediately in accordance with AS 01.-10.070(c).

REPEALED

§ 28.40.050 § 28.40.050

(e) Notwithstanding the maximum fine provided for infractions under (c) of this section, for the violation of regulations or special permits issued governing vehicle weight limits, overweight penalties shall be imposed at the rate of five cents for each pound of weight over the authorized weight limit for that vehicle. (§ 50-1-8 ACLA 1949; am § 12 ch 241 SLA 1976; am §§ 22, 23 ch 144 SLA 1977)

Revisor's notes. — Formerly AS 28.35.230. Renumbered in 1984.

Sec. 45.75.360. Hindering or obstructing officer and penalty. A person who hinders or obstructs the director, the deputy director, or an inspector, or a sealer or deputy sealer, in the performance of his official duties, is guilty of a misdemeanor and upon conviction is punishable by a fine of not less than $20 nor more than $200, or by imprisonment for not more than three months, or by both. (§ 37 ch 101 SLA 1961)

MEMORANDUM January 31, 1985

SUBJECT: Senate Bill 103 as amending initiative 83-02

TO: Senator Jack Coghill

FROM: George W. Edwards GWE
Legislative Counsel

This is in response to your research request concerning the constitutional implications of Senate Bill 103 as an amendment to initiative 83-02 regarding the termination of the Alaska Transportation Commission.

Article XI, section 6 of the Alaska Constitution states that an initiative passed into law may not be repealed by the legislature for two years. It further states that such an initiative may be amended at any time.

This legislative power to amend has been broadly defined by the Alaska supreme court as a check or balance against the initiative process lest the process otherwise result in the frustration of sound government (see Warren v. Boucher 543 P2d 731 (Alaska, 1975) and Warren v. Thomas 568 P2d 400 (Alaska, 1977). While the amendment process may not be employed by the legislature to so emasculate an initiative as to effectively repeal it, it may legitimately be used to clarify the law or to effectuate the intent of the electorate.

In order to determine the appropriateness of an amendment to an initiative the language and intent of the initiative and the language and effect of the amendment must be considered. If the amendatory language may be interpreted not to vitiate the intent of the initiative, the court is likely to approve the legislature's right to adopt the language.

Initiative 83-02 was concerned with, among other things, abolishing the ATC for the purpose of eliminating legalized price-fixing and tariffs. It proposed that other government

agencies could insure transportation safety standards and that financial responsibility of commercial carriers should be overseen by the Department of Public Safety. Senate bill 103 does not appear to incorporate any price support or tariff provisions which would conflict with the intent of the initiative. It contains provisions concerning financial responsibility and safety which are consistent with the terms of the initiative. It goes beyond the literal terms of the initiative in requiring both bonds to protect shippers and equipment registration, but these provisions serve a rational purpose and are not in conflict with the apparent intent of the initiative.

In summary, Senate Bill 103 does not appear to violate the constitutional provision concerning the amendment of initiatives.

BILL SHEFFIELD
GOVERNOR

dl103

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

January 25, 1985

The Honorable Don Bennett
President of the Senate
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Senator Bennett:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill authorizing the Department of Public Safety (DPS) to regulate the safety of motor carrier and air carrier operations. This bill amends AS 42.30.200, enacted by the Alaska Transportation Commission (ATC) initiative in the last general election, and creates several new sections in AS 42.30.

The intent of this legislation is to allow DPS to maintain an adequate level of safety requirements for commercial air and motor vehicle operations after the ATC's authority to do so is abolished. This is consistent with the portion of the initiative's statement of purpose that acknowledges that "other government agencies can insure safety standards while allowing persons to contract freely for services." The initiative has already authorized DPS to establish financial responsibility requirements and to enforce them. AS 42.30.200. This bill goes further by adding other sections to AS 42.30 to require registration of air and certain motor carriers and compliance with motor vehicle safety regulations or federal aircraft safety rules for those carriers.

The bill forbids certain motor carriers and air carriers to operate in Alaska without complying with its provisions. Proposed AS 42.30.195. The definitions for motor and air carriers, motor vehicles, aircraft, etc. are found in proposed AS 42.30.270, and were adapted from the definitions in the Motor Freight Carrier Act (AS 42.10.420) and the Air Commerce Act of 1960 (AS 02.05.250). The definitions differ from their predecessors in two ways: the four categories of motor carriers formerly recognized have been deleted and the term "motor carrier" now includes buses. Proposed AS 42.30.197 incorporates the provisions of AS 42.10.020 exempting certain vehicles from

coverage, and adds exemptions for school buses and for buses with a seating capacity of fewer than 16 persons.

The financial responsibility statute enacted by the initiative is clarified by a few amendments. AS 42.30.200. To conform the statute's terminology to other sections of the bill, the phrase "a person who carries passengers or freight for hire intrastate" is changed to "a person operating as a motor carrier or a person engaged in air commerce." A provision from AS 02.05.136 has been added, requiring 30 days' notice to DPS before insurance or surety bonds may be cancelled. The requirement that regulations be adopted under AS 42.30.200 was also added.

Proposed AS 42.30.205 gives the department the discretionary power to adopt regulations requiring carriers to obtain bonding. This provision is modeled after AS 42.10.100 and is intended to protect the public that uses the carrier's services. In keeping with the practice set up by AS 42.10.113, motor carriers are required to place their identification on their motor vehicles. Proposed AS 42.30.210.

The bill creates a new system of carrier registration. Unlike the ATC's system of issuing permits or certificates based on public convenience and necessity, this registration plan does not economically regulate entry into air or motor commerce. An intrastate motor carrier that is required to register will be registered if three simple conditions are met: the carrier shows proof of financial responsibility (which AS 42.30.200 already requires) and bonding (if required by regulation), and provides proof of compliance with safety regulations. Proposed AS 42.30.215. This latter element will be met by having all vehicles inspected by the department, or an authorized representative, once every six months, as provided in proposed AS 42.30.230(b). The inspections would be performed free of charge by a nonuniformed DPS employee. An interstate motor carrier will register its Interstate Commerce Commission (ICC) authority under proposed AS 42.30.220 just as it did under AS 42.10.135. Interstate carriers will be required to comply with Alaska's safety regulations and obtain bonding, if directed by regulation, but they will not be subject to this bill's insurance or inspection rules because those matters are governed by federal authority. An air carrier registers by providing proof of insurance, bonding, and compliance with federal safety laws. Proposed AS 42.30.225. As was set out in AS 02.05.090, air carriers must also register each aircraft used and pay an annual aircraft registration fee.

Proposed AS 42.30.225(e) and (f).

Proposed AS 42.30.235 gives DPS the abilit[illegible] adopt regulations, under the Administrative Procedure Act, to carry out the bill's provisions. Other than the definitions portion, the remainder of the bill deals with enforcement and penalties for operating in violation of the provisions of this bill. If any carrier operates without the necessary insurance or bonding, or if an air carrier fails to register its aircraft, the carrier's registration can be summarily suspended, with an administrative hearing provided within 10 days. Proposed AS 42.30.240(a). This is similar to the ATC's stop-order authority in AS 42.07.181. There are three other bases for revocation, although they are not grounds for pre-hearing suspension: intentional misrepresentation of a material fact in obtaining registration; intentional failure to comply with the provisions of this bill or regulations adopted under them; and failure to pay applicable fees. Proposed AS 42.30.240(b). Carriers with a suspended registration may cure the defect any time before the hearing, or after a hearing and before registration is revoked. Proposed AS 42.30.240(c). However, if registration is revoked for any reason, the carrier must pay fees and reapply to become registered again. Revocations are appealable to the superior court. Proposed AS 42.30.240(d).

In addition to the ability to administratively handle violations by lifting a carrier's registration, DPS may also pursue enforcement actions in court. Under proposed AS 42.30.245(a)(4), designated representatives of the department may issue citations for violation of the commercial motor vehicle safety regulations. The department may pursue an action in superior court to enforce its statutes and regulations (proposed AS 42.30.245(b)) and seek a misdemeanor conviction or payment of civil penalties where applicable. Proposed AS 42.30.250 and 42.30.255. A knowing act or omission in violation of any of this bill's provisions is a misdemeanor punishable by a fine of not more than $500, and payment of the costs of prosecution. Proposed AS 42.30.250 (modeled after AS 42.10.393 and AS 02.05.230). Carriers who operate without the necessary insurance or bonding while their registration is suspended, or who operate without obtaining registration or while registration is revoked, are subject to a civil penalty equal to the amount of revenue earned as a result of their operation, or up to $1,000, whichever is greater. Proposed AS 42.30.255 (comparable to AS 42.10.394 and AS 02.05.231). Aircraft or motor vehicles used in commerce before registration is obtained, or after regis-

tration is revoked, may be seized by DPS. The court may order the aircraft or vehicle forfeited to the state, or may release it to the offending carrier upon payment of civil or criminal penalties. Proposed AS 42.30.245(c).

The initiative's action in abolishing the ATC and in effecting the economic deregulation of the transportation industry in Alaska creates a new era for both Alaska's residents and its industry. I believe that it is important that the legislative and executive branches of government cooperate to the fullest extent to establish a program that achieves the intent of the initiative and provides an adequate level of safety to protect the general public. I am willing to explore with the legislature other approaches to accomplishing this objective.

I urge prompt consideration of this measure before February 28, 1985 so that the roads and skies will remain safe for business and the public.

Sincerely,

Bill Sheffield
Governor

COST ANALYSIS

The following costs are for administration of permitting, certification, bonding and insurance. These costs are in addition to the positions and funding included in the Governor's budget which are for vehicle safety inspections.

Personal Services		$250.0
1 Administrative Support Center Supervisor	Range 14	
4 Administrative Support Technicians	Range 12	
1 Accounting Technician II	Range 14	

It is anticipated that the positions, located in Anchorage, will be transferred from the ATC component, along with needed office equipment (desks, chairs, etc.). Minimal overtime and negotiated one-time compensatory payments are included.

Travel		3.0
Contractual Services		66.0
Telephone, postage, etc.	$25.0	
Printing of applications, forms, advertisements, etc.	8.0	
Space Lease	15.0	
Maintenance on data/word processing equipment	1.3	
Copier costs	3.0	
Professional fees (Dept. of Law)	12.0	
Risk Management	1.7	
Supplies and Materials		7.0
Office and library supplies		
Equipment		30.0
Data/word processors		
TOTAL		$356.0

For FY 87, space lease costs are transferred to the Department of Administration. A five percent annual inflation adjustment is applied beginning in FY 87.

Testimony prepared for the
Senate Transportation Commitee
regarding Senate Bill 103 by
the Alaska Air Carriers Association

February 28, 1985

Mr. Chairman and members of the Senate Transportation Committee, my name is Bob Jacobsen and I am here today on behalf of the Alaska Air Carriers - an association comprised of 115 member air service companies throughout Alaska.

I would like to begin by commending the Committee for its early review of this matter both because it is of great concern to our association and because of the February 28 deadline after which the Alaska Transportation Commission will no longer be in existence.

On Friday, I was present for the testimony of Representative Marrou regarding the intent of people who voted for the initiative which abolished A.T.C. We appreciate Representative Marrou's efforts to remove unnecessary regulatory constraints which impede free competition among air carriers. But it is also important for the Committee to recognize that among the people I know who voted in favor of the initiative, including some members of our organization, did so to express opposition to an overemphasis by A.T.C. on economic regulation and underemphasis on safety and fitness which are and should continue to be a primary concern of government. The only safe conclusion to draw when trying to figure out the intent of the initiative's supporters is that they believe in greater freedom of competition in the transportation industry and what they hope will be lower freight and passenger cost. That is the only common thread which ties the motor carriers, air carriers, and Jones Act (water) carriers together in the initiative.

We feel that it would be a mistake to conclude that Alaskans are no longer concerned with safety or that the initiative standing alone will assure that the transportation industry is as safe as possible. For this reason, we appreciate the efforts of Governor Sheffield in introducing legislation which we feel is necessary to protect public safety.

While we agree with the intent of Senate Bill 103, we do have some suggestions which we think will simplify and improve it.

First, the registration, insurance provisions, and proof of FAA certification, as they apply to the air carriers are similar to the occupational licensing function of the Department of Commerce. We believe the registration of air carriers would be handled by that Department more efficiently and at lower cost than by the Department of Public Safety.

Second, the minimum liability insurance which is currently required by A.T.C. for air carriers is $100.000 per seat (non-certificated carriers). The minimum liability insurance which must be carried by certificated carriers is $300,000 per seat. I have been advised by an attorney in Anchorage knowledgeable in this jurisdiction that the average death settlement in 1982 was approximately $250,000. Rather than allow the minimum liability insurance requirement to be set by regulation, we suggest you consider this and recommend that you establish it by statute.

When the federal government recently deregulated the airline industry, the same issues were addressed as those now before the committee. In the decision to sunset the Civil Aeronautics Board (C.A.B.), it was decided by Congress that the economic regulatory function of the agency would be discontinued, but that oversight of fitness and financial responsibility for certificated carriers be transferred to the federal Department of Transportation. The certification process requires an application, an operations and business plan, and a declaration of previous accidents, consumer complaints, and judgements awarded against the applicant. The application is reviewed and awarded based on fitness to operate, not upon the competitive effects of the business.

Because we recognize that the line between economic regulation and public safety - one key aspect of which is financial responsibility and fitness to operate - is not easy to define with precision; and because we also feel strongly that legislation should be in place February 28 to protect public safety, we do not believe it is possible to tackle this issue without risk of delay beyond that date. Therefore, we strongly urge the Committee to consider an amendment which would require the administration to undertake an interim study which would:

1. Examine the federal certification process for scheduled carriers to determine which aspects are desirable to incorporate in the state registration process in the interest of public safety.
2. Examine the impact of deregulation on rural air service to determine whether measures designed to insure reliability of service are necessary.

The results of this study would be reported back to the next session of the legislature with recommendations.

We also recommend to you that because of some fundamental differences between the air and trucking industries, that you divide the Governor's bill into two separate bills.

Last, Mr. Chairman, we sympathize with your task in reducing state expenditures this year to bring them in line with available revenues. In FY 85, A.T.C. was budgeted at $1.4 million. We feel that the Governor's bill with the amendments we have suggested could be administered by the Department of Commerce for a much smaller budget.

Part 103—Ultralight Vehicles

Subpart A—General

§ 103.1 Applicability.

This Part prescribes rules governing the operation of ultralight vehicles in the United States. For the purposes of this Part, an ultralight vehicle is a vehicle that:

(a) Is used or intended to be used for manned operation in the air by a single occupant;

(b) Is used or intended to be used for recreation or sport purposes only;

(c) Does not have any U.S. or foreign airworthiness certificate; and,

(d) If unpowered, weighs less than 155 pounds; or

(e) If powered:

(1) Weighs less than 254 pounds empty weight, excluding floats and safety devices which are intended for deployment in a potentially catastrophic situation;

(2) Has a fuel capacity not exceeding 5 U.S. gallons;

(3) Is not capable of more than 55 knots calibrated airspeed at full power in level flight; and

(4) Has a power-off stall speed which does not exceed 24 knots calibrated airspeed.

§ 103.3 Inspection requirements.

(a) Any person operating an ultralight vehicle under this Part shall, upon request, allow the Administrator, or his designee, to inspect the vehicle to determine the applicability of this Part.

(b) The pilot or operator of an ultralight vehicle must, upon request of the Administrator, furnish satisfactory evidence that the vehicle is subject only to the provisions of this Part.

§ 103.5 Waivers.

No person may conduct operations that require a deviation from this Part except under a written waiver issued by the Administrator.

§ 103.7 Certification and registration.

(a) Notwithstanding any other section pertaining to certification of aircraft or their parts or equipment, ultralight vehicles and their component parts and equipment are not required to meet the airworthiness certification standards specified for aircraft or to have certificates of airworthiness.

(b) Notwithstanding any other section pertaining to airman certification, operators of ultralight vehicles are not required to meet any aeronautical knowledge, age, or experience requirements to operate those vehicles or to have airman or medical certificates.

(c) Notwithstanding any other section pertaining to registration and marking of aircraft, ultralight vehicles are not required to be registered or to bear markings of any type.

Subpart B—Operating Rules

§ 103.9 Hazardous operations.

(a) No person may operate any ultralight vehicle in a manner that creates a hazard to other persons or property.

(b) No person may allow an object to be dropped from an ultralight vehicle if such action creates a hazard to other persons or property.

§ 103.11 Daylight operations.

(a) No person may operate an ultralight vehicle except between the hours of sunrise and sunset.

(b) Notwithstanding paragraph (a) of this section, ultralight vehicles may be operated during the twilight periods 30 minutes before official

sunrise and 30 minutes after official sunset or, in Alaska, during the period of civil twilight as defined in the Air Almanac, if:

(1) The vehicle is equipped with an operating anticollision light visible for at least 3 statute miles; and

(2) All operations are conducted in uncontrolled airspace.

§ 103.13 Operation near aircraft; Right-of-way rules.

(a) Each person operating an ultralight vehicle shall maintain vigilance so as to see and avoid aircraft and shall yield the right-of-way to all aircraft.

(b) No person may operate an ultralight vehicle in a manner that creates a collision hazard with respect to any aircraft.

(c) Powered ultralights shall yield the right-of-way to unpowered ultralights.

§ 103.15 Operations over congested areas.

No person may operate an ultralight vehicle over any congested area of a city, town, or settlement, or over any open air assembly of persons.

§ 103.17 Operations in certain airspace.

No person may operate an ultralight vehicle within an airport traffic area, control zone, terminal control area, or positive control area unless that person has prior authorization from the air traffic control facility having jurisdiction over that airspace.

§ 103.19 Operations in prohibited or restricted areas.

No person may operate an ultralight vehicle in prohibited or restricted areas unless that person has permission from the using or controlling agency, as appropriate.

§ 103.21 Visual reference with the surface.

No person may operate an ultralight vehicle except by visual reference with the surface.

§ 103.23 Flight visibility and cloud clearance requirements.

No person may operate an ultralight vehicle when the flight visibility or distance from clouds is less than that in the following table, as appropriate:

Flight Altitudes	*Minimum Flight Visibility*	*Minimum Distance from Clouds*
1,200 feet or less above the surface regardless of MSL altitude:		
(1) Within controlled airspace—	3 statute miles	500 feet below 1,000 feet above 2,000 feet horizontal.
(2) Outside controlled airspace:	1 statute mile	Clear of clouds.
More than 1,200 feet above the surface but less than 10,000 feet MSL:		
(1) Within controlled airspace—	3 statute miles	500 feet below 1,000 feet above 2,000 feet horizontal.
(2) Outside controlled airspace—	1 statute mile	500 feet below 1,000 feet above 2,000 feet horizontal.
More than 1,200 feet above the surface and at or above 10,000 feet MSL:	5 statute miles	1,000 feet below 1,000 feet above 1 statute mile horizontal.

Drew - for 401 Application

IN ADDITION TO THE INFORMATION ASKED FOR IN PART 204.5, PLEASE INCLUDE THE FOLLOWING INFORMATION WITH YOUR PART 204 FITNESS DATA:

1) A brief description of each accident or incident involving the carrier seven (7) years prior to filing date of application.

   A) Date of accident or incident.

   B) Location of accident or incident.

   C) Aircraft registration number (N#).

   D) FAA and/or NTSB file number if known.

   E) Name of pilot or other employees involved.

   F) Finding of FAA/NTSB if applicable.

   G) Positive actions taken by carrier as result of accident or incident.

ALSO, PLEASE INCLUDE THE FOLLOWING INFORMATION SO THAT THE BOARD MAY MAKE A RELIABILITY FINDING IN ADDITION TO A FITNESS DETERMINATION:

1) Carrier's systemwide on-time and completion record for the preceding year.

2) Availability of back-up aircraft. (If the aircraft used in your proposed scheduled service are down, does your fleet contain back-up aircraft, or would you be able to charter like aircraft to perform the scheduled service).

3) Fuel availability. (A brief description of carrier's contracts with fuel suppliers).

File 2

"An Act relating to transportation safety and financial responsibility; and providing for an effective date."

* Sec. 1. AS 42.30.200 is amended to read:

Sec. 42.30.200. FINANCIAL RESPONSIBILITY. (a) A person who carries passengers or freight for hire intrastate shall procure and maintain security in an amount determined by the Department of Commerce and Economic Development (PUBLIC SAFETY) as necessary for the reasonable protection of the public against damages or injury caused by the person.

(b) Evidence of security required under (a) of this section shall be filed with the department and must be

(1) a policy or certificate of insurance issued by an insurer acceptable to the department; or

(2) a bond of a surety company licensed to write surety bonds in the state; or

(3) evidence accepted by the department, showing ability to self-insure; or

(4) other security approved by the department.

(c) A policy of insurance, surety bond, or other form of security is not cancellable on less than 30 days' written notice to the department. This requirement must be clearly stated in the policy or endorsement. The 30-day notice period is measured from the date upon which the department receives notice.

(d) The department may authorize enforcement officers to enforce this section and shall adopt regulations necessary to implement this section.

(e) A person who violates this section is guilty of a class B misdemeanor.

(f) This section does not apply to persons who carry passengers for hire in motor vehicles weighing 5000 pounds or less.

* Sec. 2. AS 42.30 is amended by adding a new section to read:

Section 42.30.225. CERTIFICATION OF COMPLIANCE OF AIR CARRIERS. (a) A person may not engage in air commerce without obtaining a certificate of compliance from the Department of Commerce and Economic Development. The department shall issue a certificate of compliance upon application and presentation of

(1) proof of financial responsibility required under AS 42.30.200;

(2) proof of compliance with Federal Aviation Administration requirements, and, where applicable, federal certification for scheduled airline service.

(b) The certificate of compliance under (a) of this section shall be renewed annually.

(c) Each aircraft owned or leased by a person subject to the provisions of this section must have a certificate of compliance issued by the department before the aircraft is used in air commerce. These certificates are valid for a period of 12 months following the date of certification. The certificate must be displayed on the aircraft so that it is visible to boarding passengers.

(d) Federally-certificated interstate carriers that provide intrastate service between points in the state on their interstate or foreign routes, and who use, for that intrastate service, aircraft based

primarily outside the state, must also obtain a certificate of compliance for each aircraft used in intrastate service.

(e) Use of an aircraft in air commerce prior to obtaining a certificate of compliance required under (a) of this section may be cause for suspension or revocation of the certificate.

(f) An air carrier, who before the effective date of this Act, obtained a certificate to operate from the Alaska Transportation Commission, is not required to obtain a certificate of compliance under (a) of this section until the date on which the insurance policy on each aircraft must be renewed.

(g) The department may authorize enforcement officers to enforce this section and shall adopt regulations necessary to implement this section.

Sec. 42.30.270. DEFINITIONS. For the purposes of AS 42.30.200 - 42.30.270,

(1) "air carrier" means a person undertaking to engage in air commerce, whether directly or indirectly, or by lease, contract, or any other arrangement, and whether over regular or irregular routes;

(2) "air commerce" means carriage by aircraft of persons or property, for compensation or hire, in intrastate commerce, including the carriage by aircraft of persons or property which move partly by aircraft and partly by other forms of transportation.

(3) "aircraft" means a device used or designed for flight in the air;

(4) "department" means the Department of Commerce and Economic Development;

(5) "freight" has the same meaning as "property";

(6) "property" means all commodities, articles, and cargo, of whatever nature or value, excluding garbage, refuse, trash, or other waste material;

* Sec. 3. This Act takes effect immediately in accordance with AS 01.10.070(c).

Senate Committee on Transportation

MEMORANDUM

To: Committee members
From: Chairman Coghill
Date: Wednesday, February 6, 1985
Re: Draft CS for SB 103

The attached draft is considerably different from the last draft the committee discussed in that the new one considers certification of air carriers, as well as motor vehicle safety, and takes a different approach to vehicle inspections. The proposed CS can be broken down into three components: a revision of the financial reponsibility language enacted by the initiative; a simple certification process for air carriers; and a mechanism providing state certification of motor vehicle safety inspection stations and mechanics.

In section 1, the initiative language is amended by moving oversight responsibility to Commerce, rather than Public Safety, and authorizing the department to adopt regulations implementing the section. Section 2 then adds language to require that the insuring company give the department 30-days notice before cancelling a policy; it sets out a violation of the financial responsibility requirement as a class B misdemeanor; and it specifies that the section apply only to persons carrying freight or passengers for hire in certain vehicles and aircraft. The intention of this last provision is to exempt taxicabs, hot air balloons, ultralights, etc.

Section 3 establishes a certificate of compliance under DCED for air carriers. This annual certificate would be issued for each aircraft used in air commerce, and would be issued upon application and showing proof of financial responsibility and proof of compliance with FAA requirements. The certificate would have to be displayed for boarding passengers to read, and interstate carriers would be required to obtain the certificates for the aircraft they use intrastate. The certificate could be revoked if it was shown that the aircraft had been used in commerce before the certificate was obtained; however, current ATC-authorized carriers would not have to certify their aircraft until the renewal dates on their insurance policies. This is to avoid an annual crush of renewals on the department.

The cs then defines "air carrier", "air commerce", "aircraft", "department", "freight", and "property".

Section 4 adds to the duties of the commissioner of Commerce and Economic Development the duty to implement the financial responsibility requirements of the initiative.

Section 5 of the current draft provides an immediate effective date.

The third component of the issue, truck safety inspections, is currently being written into the cs by legal services, so a rough draft of the proposal is included.

The essence of this approach, noticeably divergent from the previous truck inspection program as proposed by the division of measurement standards, is to place the responsibility and mechanism for inspection into the private sector.

The proposal would require trucks and trailers to be inspected once a year, and would exempt government vehicles.

A program of certification for official inspection stations and qualified mechanics would be established, with the authority in DCED to revoke or suspend the permits of station operators and inspectors who were not conducting their permitted functions as required. A hearing board would be established to hear appeals of permit-holders whose permits had been revoked or suspended.

The draft further describes how the certificate would be issued, and that records of inspections would be kept and could be audited by the state.

Sanctions are provided for falsely representing to be an inspection station, use of counterfeit certificates of inspection and misuse of certificates. Violation of the section would be a misdemeanor.

A final section defines "motor vehicle".

IN THE SENATE BY COGHILL

SENATE BILL NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to transportation safety and financial responsibility; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 42.30.200 is amended to read:

Sec. 42.30.200. FINANCIAL RESPONSIBILITY. (a) A person who carries passengers or freight for hire intrastate shall procure and maintain security in an amount determined by the Department of Commerce and Economic Development [PUBLIC SAFETY] as necessary for the reasonable protection of the public against damages or injury caused by the person.

(b) Evidence of security required under (a) of this section shall be filed with the department and must be

(1) a policy or certificate of insurance issued by an insurer acceptable to the department; or

(2) a bond of a surety company licensed to write surety bonds in the state; or

(3) evidence accepted by the department, showing ability to self-insure; or

(4) other security approved by the department.

(c) The department may authorize enforcement officers to enforce this section and ~~shall~~ may adopt procedural regulations necessary to implement this section.

* Sec. 2. AS 42.30.200 is amended by adding new subsections to read:

provides intrastate service between points in the state on an interstate or foreign route, and who uses, for that intrastate service, aircraft based primarily outside the state, must also obtain a certificate of compliance for each aircraft used in intrastate service.

(e) Use of an aircraft in air commerce prior to obtaining a certificate of compliance required under (a) of this section may be cause for suspension or revocation of the certificate.

(f) An air carrier, who before the effective date of this Act, obtained a certificate to operate from the Alaska Transportation Commission, is not required to obtain a certificate of compliance under (a) of this section until the date on which the insurance policy on each aircraft must be renewed.

(g) The department may authorize enforcement officers to enforce this section and ~~shall~~ may adopt procedural regulations necessary to implement this section.

Sec. 42.30.270. DEFINITIONS. In AS 42.30.200 - 42.30.270,

(1) "air carrier" means a person undertaking to engage in air commerce, whether directly or indirectly, or by lease, contract, or any other arrangement, and whether over regular or irregular routes;

(2) "air commerce" means carriage by aircraft of persons or property, for compensation or hire, in intrastate commerce, including the carriage by aircraft of persons or property that move partly by aircraft and partly by other forms of transportation;

(3) "aircraft" means a device used or designed for flight in the air;

(4) "department" means the Department of Commerce and Economic Development;

(5) "freight" has the same meaning as "property";

(6) "property" means all commodities, articles, and cargo, of whatever nature or value, excluding garbage, refuse, trash, or other waste material.

* Sec. 4. AS 44.33.020 is amended by adding a new paragraph to read:

(27) implement the financial responsibility requirements for motor vehicles and air carriers under AS 42.30.200 - 43.30.270.

* Sec. 5. This Act takes effect immediately in accordance with AS 01.-10.070(c).

DRAFT

* Sec.___. AS 42.30 is amended by adding new sections to read:

ARTICLE 6. MOTOR VEHICLE SAFETY INSPECTIONS

Sec. 42.30.300. MOTOR VEHICLE SAFETY INSPECTIONS. (a) The Department of Commerce and Economic Development shall require that every motor vehicle in this state be inspected at least once a year and that an official certificate of inspection and approval be obtained for each vehicle passing inspection.

(b) The commissioner of the Department of Commerce and Economic Development may adopt procedural regulations necessary to implement this section.

Sec. 42.30.310. EXEMPTIONS. A motor vehicle is exempt from the requirements of AS 42.30.300 if it is owned and operated by the United States, the state, or a borough, city, town or municipality in the state or by a department of any of them.

Sec. 42.30.320. OFFICIAL INSPECTION STATIONS. (a) The department shall issue permits and furnish instructions and all necessary forms to official stations for the inspection of motor vehicles as requested and the issuance of official certificates of inspection and approval.

(b) Application for permit shall be made upon an official form and shall be granted only when the department is satisfied that the station is properly equipped and has competent personnel to make inspections and adjustments. No official inspection station permit shall be issued or renewed unless a certified official inspection mechanic is employed at that station. The department before issuing a permit may require the applicant to file a bond conditioned that it will make compensation for any damage to a vehicle occurring during an inspection or adjustment due to negligence on the part of an applicant or its employees.

(c) No permit for an official inspection station shall be assigned or transferred or used at any location other than the location

designated and an official inspection station permit shall be posted in a conspicuous place at the designated location.

(d) The department shall supervise and inspect official inspection stations and shall suspend or revoke any permit issued to a station which it finds not properly equipped, staffed or conducted.

(e) Upon notice of suspension or revocation of a license the operator shall immediately terminate all inspection activities, and on demand by the department return all inspection stickers, license and supplies. The department shall issue a receipt for all unused inspection stickers.

(f) An operator of an official inspection station whose permit has been suspended or revoked under this section shall be given a hearing, provided a written request is filed with the department within ten days after suspension or revocation.

Sec. 42.30.330. CERTIFICATION OF MECHANICS. (a) No mechanic shall conduct motor vehicle inspections at an official inspection station unless certified as to training, qualifications and competence by the department.

(b) The department shall supervise mechanics certified under this section and may suspend the certification issued to a mechanic if it finds that the mechanic has improperly conducted inspections or has violated or failed to comply with any of the provisions of this section or regulations adopted under it.

(c) Any mechanic whose certificate has been denied or suspended under this section shall be given a hearing, provided a written request is filed with the commissioner within ten days after denial or suspension.

Sec. 42.30.340. HEARING BOARD. (a) There is hereby created the Safety Inspection Station and Mechanic's Hearing Board, consisting of the commissioner of the Department of Commerce and Economic Development,

the commissioner of the Department of Transportation and Public Facilities, and the Attorney General, or their designees.

(b) The hearing board shall be convened at the request of the commissioner of the Department of Commerce and Economic Development and shall hear all evidence and information regarding the suspension and revocation of an official inspection station license. The hearing board shall make written findings and conclusions pursuant to which an order shall be issued affirming, denying or modifying the action taken by the department.

(c) The order of the hearing board shall be subject to judicial review in the manner provided by law.

Sec. 42.30.350. ISSUANCE OF CERTIFICATE OF INSPECTION. (a) The person operating an official inspection station shall issue a certificate of inspection and approval upon an official form to the owner of a motor vehicle only upon inspecting the motor vehicle and determining that its equipment is in good condition and proper adjustment and that it is mechanically sound.

(b) The person operating an official inspection station shall make a record of each inspection performed at the station and the department may audit the records of an official inspection station at any time.

Sec. 42.30.360. FALSELY REPRESENTING TO BE AN OFFICIAL STATION. (a) No person shall in any manner represent any place as an official inspection station unless the station is operating under a valid permit issued by the department.

(b) No person shall issue a certificate of inspection and approval unless holding a valid permit to do so.

Sec. 42.30.370. COUNTERFEIT CERTIFICATES OF INSPECTION. (a) No person shall make, issue, or knowingly use any imitation or counterfeit of an official certificate of inspection.

(b) No person shall display or cause or permit to be displayed upon any vehicle any certificate of inspection and approval knowing the certificate is fictitious or issued for another vehicle or issued without an inspection having been made.

Sec. 42.30.380. VIOLATION A MISDEMEANOR. A person who violates this section is guilty of a class B misdemeanor.

Sec. 42.30.390. DEFINITIONS. In AS 42.30.300 - 42.30.380 "motor vehicle" means

(1) a truck of more than 10,000 pounds unladen gross vehicle weight used upon any public highway of this state; and

(2) a trailer of more than 5,000 pounds unladen gross vehicle weight used upon any public highway of this state.

MEMORANDUM

TO: Committee Members

FROM: Senator Coghill

DATE: February 13, 1985

RE: CS SB 103

Sectional Analysis of 2/13 Draft of CS for SB 103

Section 1

Amends th language of the initiative to set the required insurance amounts by statute at $200,000 for property damage, $500,000 bodily injury for motor vehicles and $300,000 per seat bodily injury for aircraft.

Subsection (c) changes "enforcement officers" to "department personnel", and allows the department to adopt necessary regulations.

Section 2

Adds three new subsections to the financial responsibility section to:(d) disallow cancellation of insurance without 30 day notice to the department; (e) make a violation of the requirement to have insurance a class B misdemeanor with a minimum $500 fine; and (f) applies the section only to certain types of vehicles and aircraft.

Section 3

Establishes a certification of compliance for air carriers. This establishes a certificate of compliance under DCED for air carriers. This annual certificate would be issued for each aircraft used in air commerce, and would be issued upon application and showing proof of financial responsibility and proof of compliance with FAA requirements. The certificate

would have to be displayed for boarding passengers to read, and interstate carriers would be required to obtain the certificates for the aircraft they use intrastate. The certificate could be revoked it it was shown that the aircraft had been used in commerce before the certificate was obtained; however, current ATC-authorized carriers would not have to certify their aircraft until the renewal dates on their insurance policies. This is to avoid an annual crush of renewal on the department.

Article 6 is added to AS 42.30 establishing a program of motor vehicle inspections.
.300 requires all motor vehicles to be inspected once a year, with an annually renewable certificate of inspection. The certificate would be carried in the vehicle, and stickers placed on the outside. The commissioner could adopt regulations to implement the program.
.310 exempts US government vehicles
.320 describes the process for permitting inspection stations, allows the department to monitor a station's work, and suspend or revoke the permit if necessary. A process is then established by which a suspension or revocation may be appealed.
.330 Describes the process for certifying a vehicle inspectors.
.340 Establishes a hearing board within DCED to mitigate disputed revocations and suspensions.
.350 Describes how certificates of inspection will be issued, and that a station operator will keep records, audible by the department.
.360 prohibits falsely representing to be an official inspection station.
.370 prohibits the manufacture, issuance or use of counterfeit certificates of inspection.
.380 makes it a class B misdemeanor to violate the section.
.390 Defines "air commerce", "aircraft", "department", "freight", and "motor vehicle".

Section 4

Adds implementation of the financial responsibility requirements to the duties of the commissioner of DCED.

Section 5

Provides an immediate effective date.

Senate Committee on Transportation

MEMORANDUM

To: Committee members
From: Committee staff
Date: February 20, 1985
Re: Proposed amendments for CSSB 103

Attached are a group of amendments which will be discussed at this afternoon's meeting on SB 103, along with pertinent background materials and statements. The chairman would like to move as expeditiously as possible on these proposed changes, many of which were discussed in concept at last week's meeting on SB 103. As you will recall, the committee adopted the draft cs last week as our working document, so these amendments are keyed to that draft (also attached).

There may be an additional amendment or two coming, specifically one which will define "for commercial purposes" as used in amendment number xx1.

Additionally, we have included a copy of the proposed letter of intent, which now also covers an inquiry into the Essential Air Service problem.

Finally, we have included a copy of the fiscal note for the cs as we received it yesterday from the department of commerce and economic development. It includes all of their back-up material.

PROPOSED

LETTER OF INTENT

To Accompany SB 103

It is the intent of the Legislature that a study be undertaken by legislative staff to determine 1.) the effects of deregulation on air transportation service to the bush, and what measures, if any, the Legislature ought to address to ensure a minimally acceptable level of service to those areas of the state; 2.) the effects of early phase-out of the 406 Essential Air Service subsidies by the federal government on air service to rural Alaska; 3.) what federal safety regulations are applicable to Alaska intrastate air commerce, and which, if any, ought to be incorporated into the State's certification of compliance program; and 4.) the efficiency and effectiveness with which the Department of Commerce and Economic Development has established a motor vehicle safety inspection program. The results of this study shall be reported to the Second Session of the Fourteenth Alaska Legislature not later than the tenth day after it convenes.

SB 103
ANALYSIS

ASSUMPTIONS

This analysis was prepared with the understanding that the intent of the bill was to establish regulations and procedures to:

1. Administer the financial responsibility provisions of AS 42.30.200 - 42.30.225.

2. Administer the motor vehicle safety inspection program to be performed by private industry.

PROGRAM SUMMARY

1. Positions

New Positions:	1 Administrative Officer I 2 Administrative Assistants I 3 Clerk Typists III
Existing Positions:	Convert 5 existing seasonal weigh station operators to permanent full-time employees.

2. Other expenditures

Travel:	Funds were included to provide for travel for remote locations to verify adherence to the provisions of AS 42.30 and to participate in the annual Commercial Vehicle Safety Alliance (CVSA) conference.
Contractual Services:	The listed funds are required to cover the costs for communications, printing forms, certificates of compliance, certificates of inspection, permits to operate, inspection certifications, and regulations and procedures; maintenance of agency equipment, vehicle costs, and equipment rental.
Commodities:	Specified costs are for operating supplies.
Equipment:	Costs are for the acquisition of computer terminals and replacement of existing equipment.

3. The funding projections were based upon the assumption that the following equipment be transferred from the Alaska Transportation Commission:

   - Wang word/data processing system with associated work sations and printer.
   - telex/telecopier equipment
   - typewriters
   - file cabinets
   - book cases
   - vehicles
   - desks and chairs
   - copy machine

   It is essential that this equipment be transferred in order for the program to function effectively for the above stated costs.

JUSTIFICATION

This position will be responsible for supervising the administrative center of the division which will include the new statewide financial responsibility and safety programs and incorporate the existing permit program for cross-utilization of personnel.

The responsibilities will include drafting recommended procedures, monitories program activities, analyzing results, developing corrective procedures, and reporting results to the agency head.

The position will be required to assist in the development of the regulations drafted to administer the programs and will supervise their implementation. The implementation will entail establishing and maintaining cooperative working relationship with the regulated industries, other governmental agencies, and our department. The position will also be responsible for developing and maintaining the information necessary to evaluate the results of the programs.

JUSTIFICATION

These two positions will function as the working supervisors of the financial responsibility and motor vehicle safety programs. As such, they will ensure adherence to established procedures and will be responsible for monitoring the results produced and collect data and prepare reports for management's use. They will be required to be aware of industry reeds and recommend improved procedures to achieve the stated goals and objectives in an efficient and cost effective manner. As the working supervisors, they will be the initial contact person for the regulated industries when problems arise. A great deal of judgment and tact will have to be exercised to achieve the desired results with minimum disruption of the effected agencies.

JUSTIFICATION

This proposal entails changing the status of five existing positions from permanent part-time (seasonal) to permanent full-time.

These seasonal positions are presently authorized for an average of four months each to operate the fixed weigh stations during the spring and summer peak truck traffic periods.

We recommend changing the status of the positions to PFT in FY '85, but not funding the positions until FY '86. This will allow an appropriate amount of time to establish the safety program and initiate the procedures that will generate the workload for these positions.

The inspectors will be located as follows:

PCN	LOCATION
085074	Fairbanks
085078	Fairbanks
085079	Sterling
085080	Anchorage
08-5088	Anchorage

The inspectors will continue to operate the fixed weigh stations during peak traffic periods and will be used to monitor the motor vehicle safety program through field verification of inspection stations and inspection personnel.

JUSTIFICATION

This proposal entails changing the status of five existing positions from permanent part-time (seasonal) to permanent full-time.

These seasonal positions are presently authorized for an average of four months each to operate the fixed weigh stations during the spring and summer peak truck traffic periods.

We recommend changing the status of the positions to PFT in FY '85, but not funding the positions until FY '86. This will allow an appropriate amount of time to establish the safety program and initiate the procedures that will generate the workload for these positions.

The inspectors will be located as follows:

PCN	LOCATION
085074	Fairbanks
085078	Fairbanks
085079	Sterling
085080	Anchorage
08-5088	Anchorage

The inspectors will continue to operate the fixed weigh stations during peak traffic periods and will be used to monitor the motor vehicle safety program through field verification of inspection stations and inspection personnel.

FY 86

I-11351/821-13

amend sb 103 xx0

PROPOSED AMENDMENT

TO CSSB 103 (Draft)

On page 1, line 13, between the words "following" and "amounts",

Insert the word "minimum"

This amendment was suggested by legal services, and should have been included in the draft in the first place. It would have the effect of allowing a person to have more insurance than is required by the section.

amend sb 103 xx1

PROPOSED AMENDMENT

TO CSSB 103 (Draft)

On page 1, line 12, following the word "intrastate",

Insert the following language:

"or a person who carries freight in a motor vehicle for commercial purposes"

This amendment was suggested by the representative of the trucking association, and would have the effect of requiring the higher insurance or financial responsibility requirements for all trucks engaged in commerce, not just those for hire. Currently "private carriers" are not effected by ATC insurance requirements, and without this amendment trucking activities outside the "for hire" realm would continue to not be required to carry as high a level of insurance as this bill sets. They would, in fact, have only an insurance requirement at the same minimum as automobiles under the recently passed mandatory liability insurance law.

amend sb 103 xx2

PROPOSED AMENDMENT

TO CSSB 103 (Draft)

On page 2, line 8, delete the word "This",

and insert in its place:

"For insurance policies submitted as proof of responsibility required under AS 42.30.225(a)(1) this"

This amendment was suggested by the air carriers' representative, and would have the effect of allowing current insurance policies, which do not have the 30-day notice language stated in them, to remain in effect until their renewal date. Without this change, a policy-holder would be in violation unless he renewed all policies on the effective date of the Act.

amend sb 103 xx3

PROPOSED AMENDMENT

TO CSSB 103 (Draft)

On Page 2, line 11, and

On Page 7, line 1, delete both occurrences of the word "knowingly".

This amendment has been suggested in conversations with the administration, and would have the effect of making it possible to prosecute the violations to which the two sections refer. Without the change, the commissioner of public safety says, it would be nearly impossible to prove the violation was knowingly done.

amend sb 103 xx4

PROPOSED AMENDMENT

TO CSSB 103 (Draft)

On page 2, line 19, delete the word "engage"

and insert in its place: "use an aircraft"

This amendment has been suggested by staff, and would have the effect of focussing the requirement for a certificate of compliance on the aircraft, rather than on the air service operation. This would help to clear up any further confusion as to whether the certificates are for individual aircraft or for an entire business.

amend sb 103 xx5

PROPOSED AMENDMENT

TO CSSB 103 (Draft)

On page 2, line 28, following the period (.), insert:

"The annual fee for a certificate of compliance shall be $50."

This amendment was suggested by the A.G.'s staff, and would have the effect of recapturing some of the revenue which would be lost to the State with the repeal of AS 02.05.090(f). These fees currently range from $25 to $600, depending on the size of the aircraft.

amend sb 103 xx6

PROPOSED AMENDMENT

TO CSSB 103 (Draft)

On page 3, line 24, delete the word "in", and insert in its place:

"on the public highways of"

This amendment has been suggested by staff, and would have the effect of clarifying that the vehicle inspection program is intended to cover only vehicles operating on the state's roads.

amend sb 103 xx7

PROPOSED AMENDMENT

TO CSSB 103 (Draft)

On page 3, line 25, following the period (.), insert a new sentence:

"A certificate of vehicle registration may not be issued to a motor vehicle under AS 28.10.041(a)(4) without a current certificate of inspection if the motor vehicle is required to obtain a certificate of inspection under this section."

This amendment has been suggested by staff, and would have the effect of requiring the truck to pass an inspection before the State would either issue or renew the vehicle registration. AS 28.10.041 (a)(4), a copy of which is attached, allows DMV to deny the issuance of a vehicle registration for vehicles it determines to be unsafe. This would provide one more check to ensure the inspections were being done.

(b) At the time of application for registration or renewal of registration, the department shall provide the applicant written information explaining the state's financial responsibility law, the mandatory automobile insurance requirement, and potential penalties for failure to comply with the law. (§ 7 ch 178 SLA 1978; am §§ 4, 17 ch 70 SLA 1984)

Effect of amendments. — The 1984 amendment, effective January 1, 1985, added subsection (b).

Postponed amendments. — Section 17, ch. 70, SLA 1984, effective January 1, 1989, repeals subsection (b).

Collateral references. — 7A Am. Jur. 2d, Automobiles and Highway Traffic, §§ 51 to 54.

60 C.J.S., Motor Vehicles, § 101.

Sec. 28.10.030. Unregistered vehicles. [Repealed, § 7 ch 178 SLA 1978.]

Sec. 28.10.031. Temporary permits. (a) When application, accompanied by the proper fee and tax, has been made for the registration of a vehicle, the vehicle may be driven pending the issuance of a certificate of registration by displaying a temporary permit issued by the department.

(b) A licensed vehicle dealer may issue to the purchaser of a vehicle sold by the dealer a temporary permit to drive the vehicle. A permit is effective for a period not to exceed 30 days. The commissioner shall adopt regulations governing the issuance of permits under this section.

(c) A person may not operate a vehicle under an expired permit issued under this section. (§ 7 ch 178 SLA 1978)

Sec. 28.10.040. Registration. [Repealed, § 7 ch 178 SLA 1978.]

Sec. 28.10.041. Grounds for refusing registration. (a) The department may refuse to register a vehicle if

(1) the application contains a false or fraudulent statement;

(2) the applicant fails to furnish information required by the department;

(3) the applicant is not entitled to the issuance of a certificate of title or registration under this chapter;

(4) the vehicle is determined to be mechanically unsafe to be driven or moved on a highway, vehicular way or area, or other public property in this state;

(5) the department has reasonable grounds to believe that the vehicle was stolen or fraudulently acquired or that the granting of registration would be a fraud against the rightful owner or other person having a valid lien upon the vehicle;

(6) the registration of the vehicle has been suspended or revoked for any reason under the laws of this state;

(7) the required fees, taxes, motor freight carrier fees or bus transportation fees have not been paid;

amend sb 103 xx8

PROPOSED AMENDMENT

TO CSSB 103 (Draft)

On page 3, line 26, delete the word "once" and insert in its place:

"twice"

This amendment has been suggested by the administration and by the trucking association and would have the effect of requiring every truck to be inspected at least twice each year. These groups feel that the safety inspection program would be more effective with this change.

amend sb 103 xx9

PROPOSED AMENDMENT

TO CSSB 103 (Draft)

On page 3, line 27, delete the sentence which reads:

"A certificate of inspection must be carried in the vehicle for which the certificate of inspection is issued."

This amendment has been suggested by staff and was adopted by the House Transportation Committee and would have the effect of removing an apparent redundancy. The division of measurement standards has indicated that they can get all the information needed on a sticker, and there is no need for a paper certificate to be carried in the cab of the truck.

amend sb 103 xx10

PROPOSED AMENDMENT

TO CSSB 103 (Draft)

On page 5, line 26, through page 6, line 9, delete:

Section 42.30.340 in its entirety.

This amendment was adopted by the House Transportation Committee in its cs, and would have the effect of eliminating the hearing board for appeals to administrative revocations or denials of permits for inspectors and inspection stations. There are less cumbersome ways of dealing with appeals, and the administration has indicated they would prefer to simply appoint a hearing officer - their commissioners are too busy hustling from one board or commission meeting as it is.

amend sb 103 xx11

PROPOSED AMENDMENT

TO CSSB 103 (Draft)

On page 7, line 25, add a new section 4 to read:

"* Sec. 4. Notwithstanding AS 42.30.200(a)(3) enacted by sec. 1 of this Act, until July 1, 1985, a person to whom AS 42.30.200 applies may maintain a minimum security in the amount of $100,000 per seat for bodily injury or death in a single occurrence if a person operates an aircraft."

And renumber remaining sections accordingly.

This amendment was suggested at the last committee meeting to cover those ATC-authorized air carriers now operating and who are required to have only the $100,000 per seat minimum. Without a change such as this, on the effective date of the Act, all those air taxi operators would be required to upgrade to $300,000. An additional concern is that if current charter operators are allowed to continue at the $100,000 level until their insurance policy must be renewed, new entrants into the market would be at a disadvantage by having to maintain the new, higher level of protection.

amend sb 103 xx13

PROPOSED AMENDMENT

TO CSSB 103 (Draft)

On page 4, line 23, between the words "may" and "enter",

Insert "inspect a motor vehicle or"

This amendment has been suggested by the administration and would have the effect of allowing the department to inspect the work of a State-certified vehicle inspector to determine if the vehicle was indeed safe.

amend sb 103 xx14

PROPOSED AMENDMENT

TO CSSB 103 (Draft)

On page 4, line 3, between the words "regulations" and "necessary",

Insert: "appropriate to achieve reciprocity with other western states and"

The concept of this amendment has been suggested by the administration, and would have the effect of giving the department some guideline as to inspection standards to adopt. They have suggested that the bill direct the department to adopt current ATC regulations, but it may be a better idea to tie the standards to the Commercial Vehicle Safety Alliance, which many of the western states are adopting, without actually naming the CVSA in the statute.

amend sb 103 xx15

PROPOSED AMENDMENT

TO CSSB 103 (Draft)

On page 7, line 17, add a new subsection (5) to read:

"(5) "for commercial purposes" means for which the person receives direct monetary compensation, ~~or for which the person receives no direct monetary compensation but are incidental to and done in the furtherance of the person's primary business activity;~~"

Amend Suggested by Faiks → Moved by Abood

And renumber remaining subsections accordingly.

This amendment is a definition made necessary by amendment number 1 which creates the phrase "for commercial purposes" to include in the financial responsibility section those persons who are now considered "private carriers" by the ATC.

IN THE SENATE BY THE TRANSPORTATION COMMITTEE

CS FOR SENATE BILL NO. 103 (Transportation)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to transportation safety and financial responsibility; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 42.30.200 is amended to read:

Sec. 42.30.200. FINANCIAL RESPONSIBILITY. (a) A person who carries passengers or freight for hire intrastate XX) shall procure and maintain security in XXO the following amounts:

(1) $200,000 for property damage in a single occurrence;

(2) $500,000 for bodily injury or death in a single occurrence if a person operates a motor vehicle; and

(3) $300,000 per seat for bodily injury or death in a single occurrence if a person operates an aircraft [AN AMOUNT DETERMINED BY THE DEPARTMENT OF PUBLIC SAFETY AS NECESSARY FOR THE REASONABLE PROTECTION OF THE PUBLIC AGAINST DAMAGES OR INJURY CAUSED BY THE PERSON].

(b) Evidence of security required under (a) of this section shall be filed with the department and must be

(1) a policy or certificate of insurance issued by an insurer acceptable to the department; or

(2) a bond of a surety company licensed to write surety bonds in the state; or

(3) evidence accepted by the department, showing ability to self-insure; or

(4) other security approved by the department.

(c) The department may authorize department personnel [ENFORCEMENT OFFICERS] to enforce this section and may adopt procedural regulations necessary to implement this section.

* Sec. 2. AS 42.30.200 is amended by adding new subsections to read:

(d) A policy of insurance, surety bond, or other form of security may not be cancelled on less than 30 days' written notice to the department. XX2 This requirement must be clearly stated in the policy or endorsement. The 30-day notice period is measured from the date on which the department receives notice.

(e) A person who XX3 [knowingly] violates (a) of this section is guilty of a class B misdemeanor and is punishable by a fine of not less than $500 or more than $1,000.

(f) This section applies only to a person who carries passengers or freight for hire in a motor vehicle weighing 10,000 pounds or more, or a propeller or jet-powered aircraft.

* Sec. 3. AS 42.30 is amended by adding new sections to read:

Sec. 42.30.225. CERTIFICATION OF COMPLIANCE OF AIR CARRIERS. (a) A person may not XX4 [engage] in air commerce without obtaining a certificate of compliance from the department. The department shall issue a certificate of compliance upon application and presentation of

(1) proof of financial responsibility required under AS 42.30.200;

(2) proof of compliance with Federal Aviation Administration requirements, and, where applicable, federal certification for scheduled airline service.

(b) A person who receives a certificate of compliance under (a) of this section shall renew the certificate annually. XX5

(c) Each aircraft owned or leased by a person subject to the

provisions of this section must have a certificate of compliance issued by the department before the aircraft is used in air commerce. The certificate is valid for a period of 12 months following the date of certification. The certificate must be displayed on the aircraft so that is is visible to boarding passengers.

(d) A federally-certificated interstate air carrier that provides intrastate service between points in the state on an interstate or foreign route, and who uses, for that intrastate service, aircraft based primarily outside the state, must also obtain a certificate of compliance for each aircraft used in intrastate service.

(e) Use of an aircraft in air commerce before obtaining a certificate of compliance required under (a) of this section may be cause for suspension or revocation of the certificate.

(f) An air carrier, who before the effective date of this Act, obtained a certificate to operate from the Alaska Transportation Commission, is not required to obtain a certificate of compliance under (a) of this section until the date on which the insurance policy on each aircraft must be renewed.

(g) The department may authorize department personnel to enforce this section and may adopt procedural regulations necessary to implement this section.

ARTICLE 6. MOTOR VEHICLE SAFETY INSPECTIONS.

Sec. 42.30.300. MOTOR VEHICLE SAFETY INSPECTIONS. (a) A motor vehicle may not be operated [in] this state without a certificate of inspection. An owner of a motor vehicle shall renew a certificate of inspection at least [once] a year at an official inspection station under AS 42.30.320. A certificate of inspection must be carried in the vehicle for which the certificate of inspection is issued. An owner of a motor vehicle shall display a sticker of inspection visible

from outside the vehicle in a location determined by the department.

(b) The commissioner of commerce and economic development may adopt procedural regulations necessary to implement this section.

Sec. 42.30.310. EXEMPTIONS. A motor vehicle is exempt from the requirements of AS 42.30.300 if it is owned by the government of the United States of America.

Sec. 42.30.320. OFFICIAL INSPECTION STATIONS. (a) A person may not operate an inspection station without a permit from the department. The department shall approve an application for permit to operate an inspection station if

(1) the department determines the inspection station has proper equipment and competent personnel; and

(2) a certified vehicle inspector under AS 42.30.330 is employed at the inspection station.

(b) After the department approves an application for permit to operate an official inspection station under (a) of this section, it shall provide the applicant with a permit, certificates of inspection, and inspection stickers.

(c) Upon receipt of a permit from the department under (c) of this section, the operator of an official inspection station shall post the permit in a conspicuous place at the location designated by the department.

(d) The department may enter the premises of the operator of an official inspection station at any time to inspect the work of the certified vehicle inspectors under AS 42.30.330 or to determine if the operator continues to meet the requirements of this section.

(e) The department shall suspend or revoke a permit of an operator of an official inspection station if the operator fails to meet the requirements of this section.

(f) Upon notice of suspension or revocation of a permit under (e) of this section, the operator of an official inspection station shall immediately terminate all inspection activities, and on demand by the department, return the permit and all certificates of inspection. The department shall issue a receipt for all unused certificates of inspection.

(g) If a permit is suspended or revoked under (e) of this section, the department shall give an operator of an official inspection station a hearing, upon written request filed with the department within 10 days after suspension or revocation.

(h) A permit to operate an official inspection station may not be assigned, transferred, or used at a location other than the location designated by the department.

Sec. 42.30.330. CERTIFICATION OF VEHICLE INSPECTORS. (a) A person may not conduct a motor vehicle inspection at an official inspection station under AS 42.30.320 unless certified as a vehicle inspector by the department.

(b) The department may suspend the certification issued to a vehicle inspector under (a) of this section if the vehicle inspector improperly conducted inspections or failed to comply with a provision of this section or regulations adopted under it.

(c) If a certificate is denied or suspended under (b) of this section the department shall give a vehicle inspector a hearing upon written request filed with the commissioner within 10 days after denial or suspension.

XX10

Sec. 42.30.340. HEARING BOARD. (a) There is created in the department the Vehicle Safety Hearing Board. The members of the hearing board are the commissioner of commerce and economic development, the commissioner of transportation and public facilities, and

the attorney general, or their designees.

(b) At the request of the commissioner of the department the hearing board shall convene and hear the evidence and information relevant to the suspension and revocation of an official inspection station permit. The hearing board shall make written findings and conclusions to support its order affirming, denying or modifying the action taken by the department.

(c) The order of the hearing board is subject to judicial review in the manner provided by law.

Sec. 42.30.350. ISSUANCE OF CERTIFICATE OF INSPECTION. (a) A person operating an official inspection station shall issue a certificate of inspection to the owner of a motor vehicle after determining the motor vehicle is in a safe and mechanically sound condition.

(b) A person operating an official inspection station shall keep a record of each inspection performed at the station and the department may audit the records of an official inspection station at any time.

Sec. 42.30.360. FALSELY REPRESENTING TO BE AN OFFICIAL STATION. (a) A person may not represent a place as an official inspection station unless the station is operating under a valid permit issued by the department under AS 42.30.320.

(b) A person may not issue a certificate of inspection unless holding a valid permit under AS 42.30.320.

Sec. 42.30.370. COUNTERFEIT CERTIFICATES OF INSPECTION. (a) A person may not make, issue, or knowingly use an imitation or counterfeit of an official certificate of inspection.

(b) A person may not knowingly display or issue a certificate of inspection on a motor vehicle unless the motor vehicle has met the requirements of AS 42.30.350.

Sec. 42.30.380. VIOLATION A MISDEMEANOR. A person who [knowingly] violates a provision of AS 42.30.300 - 42.30.370 is guilty of a class B misdemeanor.

Sec. 42.30.390. DEFINITIONS. In AS 42.30.200 - 42.30.390,

(1) "air carrier" means a person undertaking to engage in air commerce, whether directly or indirectly, or by lease, contract, or any other arrangement, and whether over regular or irregular routes;

(2) "air commerce" means carriage by aircraft of persons or freight, for compensation or hire, in intrastate commerce, including the carriage by aircraft of persons or freight that move partly by aircraft and partly by other forms of transportation;

(3) "aircraft" means a device used or designed for flight in the air;

(4) "department" means the Department of Commerce and Economic Development;

(5) "freight" means all commodities, articles, and cargo, of whatever nature or value, excluding garbage and trash;

(6) "motor vehicle" means

(A) a truck of more than 10,000 pounds unladen gross vehicle weight used upon a public highway of this state; and

(B) a trailer registered in this state of more than 5,000 pounds unladen gross vehicle weight and used upon a public highway of this state.

* Sec. 5. AS 44.33.020 is amended by adding a new paragraph to read:

(27) implement the financial responsibility requirements for motor vehicles and air carriers under AS 42.30.200 - 43.30.270.

* Sec. 6. This Act takes effect immediately in accordance with AS 01.-10.070(c).

Re: Inappropriate referral

The attached bill, SB 112 - "An Act relating to criminal trespass", may have been referred to our committee in error. As you see, it deals with trespassing in a vehicle with the intent to commit a crime. You may want to speak with Senator Rodey, chairman of the judiciary committee about this bill, but it seems inappropriate for our committee.

MEMORANDUM

To: Committee members

From: Committee staff

Date: March 18, 1985

Re: SB 114

SB 114 is scheduled to be heard by the committee this afternoon. This bill proposes to amend AS 28.10.021 (motor vehicle registration) by requiring the Department of Public Safety to verify that federal heavy vehicle use taxes have been paid, for those vehicles required to do so, before the department can issue a regisration for the vehicle. As the Governor's transmittal letter points out, if this change to the State's law is not made, the federal government may withhold 25% of federal funds for highway construction.

In your folder you have a copy of the bill, a copy of the federal statute making the bill necessary, a DPS fiscal note and analysis, and position papers from DPS and DOT/PF. Also included is a proposed amendment suggested by Jim Fischer of the Attorney General's office, which would delete references to requirements of the now defunct Alaska Transportation Commission.

Chairman

Do Pass

Chairman recommendation

Outline about SB 114

1. This legislation is required by passage of Federal legislation in 1982. That enactment was the Surface Transportation Assistance Act of 1982.

2. When Congress passed the 1982 statute it included a provision which could penalize a state for up to 25% of its federal highway aid money. To avoid such a penalty the state must check to see if the federal heavy vehicle use taxes have been paid. If the federal taxes have not been paid, then the state must refuse to register those heavy vehicles on which no use taxes have been paid.

3. Alaska statutes presently lack any provision which permits the Division of Motor Vehicles to refuse registration for failure to show evidence of payment of federal heavy use taxes. To grant such authority to the Division of Motor Vehicles is the reason SB 114 is now before the legislature. This authority should be in place not later than October 1, 1985 the deadline set by the federal government.

Other questions:

(a) Doesn't the proposed enactment place Alaska in the position of collecting federal taxes?

Answer: No. IRS must continue to collect but if a truck owner, for example, doesn't show a receipt (Form 2290), demonstrating the tax has been paid to it, then the truck cannot be registered in Alaska. The state does not have to handle any money for the federal government.

(b) Doesn't this measure require Alaska to be an indirect tax collector?

Answer: It can be argued that that is what occurs. However, it is mandatory under the federal law.

(c) Will the proposed measure place additional demands on the staff of the Division of Motor Vehicles (DMV)?

Answer: Yes, it is an extra step for registration of a heavy vehicle truck (GVW 55,000 pounds). DMV employees will probably have to answer questions which should logically be directed to the IRS. However, if an Alaskan doesn't understand the heavy vehicle tax law when applying to DMV, then state officials should be ready to respond to inquiries which should really be answered by federal employees.

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the registration of heavy vehicles; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 28.10.021(a) is amended to read:

(a) The owner of a vehicle subject to registration shall apply for registration under this chapter by properly completing the form prescribed by the commissioner under AS 28.05.041. Before the issuance of a certificate of registration by the department, the owner shall pay all registration fees and taxes required under this chapter, [AND] Alaska motor freight carrier [AND BUS TRANSPORTATION] fees required under AS 42, and federal heavy vehicle use taxes required under sec. 4481 of the Internal Revenue Code of 1954 (26 U.S.C.), and shall comply with any other applicable statutes and regulations.

* Sec. 2. AS 28.10.041 is amended by adding a new subsection to read:

(c) The department shall refuse to register a vehicle subject to the federal heavy vehicle use tax required by sec. 4481 of the Internal Revenue Code of 1954 (26 U.S.C.) if the applicant fails to furnish proof of payment, in the form prescribed by the U.S. Secretary of the Treasury, that the tax has been paid.

* Sec. 3. This Act takes effect immediately in accordance with AS 01.-10.070(c).

BILL SHEFFIELD
GOVERNOR

SB 114

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

January 30, 1985

The Honorable Don Bennett
President of the Senate
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Senator Bennett:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill that will authorize the division of motor vehicles (DMV), Department of Public Safety, to refuse to register heavy trucks and trailers if the owner of the heavy vehicle does not furnish proof that applicable federal heavy use taxes have been paid. This authorization is necessary to protect Alaska's full apportionment of federal highway funds.

In 1982 the U.S. Congress adopted the Surface Transportation Assistance Act of 1982. The Act increases, as of July 1, 1984, the heavy vehicle use tax which heavy trucks and trailers must pay under sec. 4481 of the Internal Revenue Code of 1954. Section 143 of the Act (23 U.S.C. sec. 141(d)) authorizes the federal government to withhold up to 25 percent of a state's apportionment of federal highway funds during any year in which heavy vehicles subject to such taxation may be registered in the state without presenting proof of payment of these taxes. The present federal law requires that this proof-of-payment requirement must be effective no later than January 1, 1985.

In order to prevent the loss of these federal highway funds, this bill authorizes DMV to refuse to register a heavy vehicle unless the owner provides proof that the required federal tax has been paid. If an applicant fails to provide the required proof of payment, the applicant's vehicle will not be registered. The State of Alaska is not required to enforce or collect the federal tax.

At line 15, the bill also makes an incidental amendment (deletion of "and bus transportation") to recognize the 1980 repeal of AS 42.15, the chapter on bus transportation to which this provision refers.

GOVERNOR'S LETTER OF TRANSMITTAL

ch 114

I anticipate that Department of Public Safety personnel will be working with legislative committees on possible amendments to the bill, which may be necessitated by pending federal procedural instructions.

In order to avoid the loss of federal funding needed for Alaska's highway system, I urge your passage of this bill.

Sincerely,

Bill Sheffield
Governor

Dept. of Transportation & Public Facilities

Position Paper

BILL NO: Senate Bill 114

APPROVED: R. J. Knapp
Commissioner

TITLE: An act relating to the registration of heavy vehicles; and providing for an effective date.

DATE: March 1, 1985

The Alaska Department of Transportation and Public Facilities urges speedy passage of Senate Bill (SB) 114. SB 114 enables the Division of Motor Vehicles in the Department of Public Safety to require proof-of-payment of the federal heavy vehicle use tax before registering heavy vehicles in the State of Alaska. The heavy vehicle use tax is one of a number of user fees that fund highway improvements through the federal Highway Trust Fund. The State of Alaska receives a very favorable distribution from the Highway Trust Fund; this distribution is over nine times the amount collected through federal taxes on highway use in Alaska.

If SB 144 is not enacted, Alaska will be subject to a reduction in our Interstate apportionments from the highway trust fund. This reduction in funds will hurt the Department's efforts to improve Alaska's Interstate System, consisting of the Parks, Alaska, Glenn and Tok Cut-off highways and portions of the Richardson, Seward, and Sterling highways. The Department estimates that withholding, when applied, will cost the state over $10 million a year in Interstate apportionments. In a time of declining oil revenues and pressing road improvement needs, the state can ill afford any loss of federal-aid highway funds.

For further information call Susan Fleischhauer at 465-3900.

DOT/PF POSITION PAPER

DEPARTMENT OF PUBLIC SAFETY

POSITION PAPER - SB 114

SUPPORT

February 6, 1985

SB 114, An Act relating to the registration of heavy vehicles and providing for an effective date.

The United State Congress has amended the United States Code to reflect the Secretary of Transportation shall reduce the state's apportionment for federal-aid highway funds in any fiscal year beginning after October 1, 1985, if a vehicle subject to the use tax may be lawfully registered in the state without having presented proof of payment of the use tax.

Enforcement of a federal law by state registration processes is not a desirable use of state resources. However, the alternative, a loss of 25 percent of federal highway funds, leaves the state little choice. The state is not required to enforce or collect the federal tax but only to verify it has been paid before the vehicle is registered.

Therefore, it is felt this bill should be passed this session to bring Alaska in compliance with the federal requirement and avoid loss of the federal-aid highway funds.

ROBERT J. SUNDBERG
Commissioner

ANALYSIS: Attach a separate page if necessary

Will require proof of IRS filing or payment of the Federal Heavy Truck Use Tax prior to registration for all motor vehicles with a gross vehicle weight (GVW) of 33,000 lbs or over. Alaska vehicle classifications are based on unladen weight rather than GVW, so it is not possible to determine exactly how many vehicles are affected, but an estimate based on unladen weight would be 2,500 to 3,500 vehicles.

DPS FISCAL NOTE

HEAVY VEHICLE USE TAX

ANALYSIS (Continued)

Notification to vehicle owners and collection of the proper forms would require a special mailing, and individual handling. Most of these vehicles are commer ial vehicles registered during December, so one position working four months, October through January, would be able to accomplish most of the work and the rest would be absorbed by existing positions.

Cost detail for the program is as follows:

100	Motor Vehicle Representative I, Range 8, 4 months		8.8
300	Mailing Cost	1.4	
	Forms	1.0	
	Data Processing Programming	2.0	
	Data Processing Maintenance	3.0	
		7.4	7.4
			16.2

An inflation factor of 6% has been applied to costs beyond FY86.

TITLE OF INCREMENT/DECREMENT:
FN - Heavy Vehicle Registration

AGENCY CONTACT/PHONE NUMBER:
John H. Lucking/269-5551

DESCRIBE WHY THIS INCREMENT/DECREMENT IS NEEDED AND WHAT IT PURCHASES:

Proposed legislation would amend AS 28.10.021 dealing with vehicle registration to ensure that the vehicle owner has complied with federal regulations requiring that a heavy vehicle use tax be paid if applicable prior to State registration.

Notification to vehicle owners and collection of the proper forms would require a special mailing and individual handling. Most of the affected vehicles are commercial vehicles registered during December, so one seasonal position working four months (October-January) would be able to accomplish most of the additional workload involved in administering the change in Statute.

Costs are projected as follows:

100	One seasonal Motor Vehicle Rep I, Range 8, 4 months		8.8
300	Mailing Cost	1.4	
	Forms	1.0	
	Data Processing Programming	2.0

Southern Illinois Builders Ass'n v. Ogilvie, C.A. Ill.1972, 471 F.2d 680.

2. Power of states

State officials were authorized to prescribe number of minority trainees to be employed by contractor in connection with highway construction projects. Schlafly v. Volpe, C.A.Ill.1974, 495 F.2d 273.

§ 141. Enforcement of requirements

(a) Each State shall certify to the Secretary before January 1 of each year that it is enforcing all speed limits on public highways in accordance with section 154 of this title. The Secretary shall not approve any project under section 106 of this title in any State which has failed to certify in accordance with this subsection.

(b) Each State shall certify to the Secretary before January 1 of each year that it is enforcing all State laws respecting maximum vehicle size and weights permitted on the Federal-aid primary system, the Federal-aid urban system, and the Federal-aid secondary system, including the Interstate System in accordance with section 127 of this title.

(c) (1) Each State shall submit to the Secretary such information as the Secretary shall, by regulation, require as necessary, in his opinion, to verify the certification of such State under subsection (b) of this section.

(2) If a State fails to certify as required by subsection (b) of this section or if the Secretary determines that a State is not adequately enforcing all State laws respecting such maximum vehicle size and weights, notwithstanding such a certification, then Federal-aid highway funds apportioned to such State for such fiscal year shall be reduced by amounts equal to 10 per centum of the amount which would otherwise be apportioned to such State under section 104 of this title.

(3) If within one year from the date that the apportionment for any State is reduced in accordance with paragraph (2) of this subsection the Secretary determines that such State is enforcing all State laws respecting maximum size and weights, the apportionment of such State shall be increased by an amount equal to such reduction. If the Secretary does not make such a determination within such one-year period, the amounts so withheld shall be reapportioned to all other eligible States.

(d) The Secretary shall reduce the State's apportionment of Federal-aid highway funds under section 104(b)(5) of this title in an amount up to 25 per centum of the amount to be apportioned in any fiscal year beginning after September 30, 1984, during which heavy vehicles, subject to the use tax imposed by section 4481 of the Internal Revenue Code of 1954, may be lawfully registered in the State without having presented proof of payment, in such form as may be prescribed by the Secretary of the Treasury, of the use tax imposed by section 4481 of such Code. Amounts withheld from apportionment to a State under this subsection shall be apportioned to the other States pursuant to the formulas of section 104(b)(5) of this title and shall be available in the same manner and to the same extent as other Interstate funds apportioned at the same time to other States.

(Added Pub.L. 93-643, § 107(a), Jan. 4, 1975, 88 Stat. 2284, and amended Pub.L. 95-599, Title I, § 123(d), Nov. 6, 1978, 92 Stat. 2702; Pub.L. 97-424, Title I, § 143, Jan. 6, 1983, 96 Stat. 2129.)

References In Text. Section 4481 of the Internal Revenue Code of 1954, referred to in subsec. (d), is section 4481 of Title 26, Internal Revenue Code.

Prior Provisions. A prior section 141, Pub.L. 90-495, § 35(a), Aug. 23, 1968, 82 Stat. 836, providing for real property acquisition policies, was repealed by Pub.L. 91-646, Title III, § 306, Jan. 2, 1971, 84 Stat. 1907, and is now covered by sections 4651(1), (3), and (5) and 4655(1) of Title 42, The Public Health and Welfare.

1983 Amendment. Subsec. (b). Pub.L. 97-424, § 143, added subsec. (d).

1978 Amendment. Pub.L. 95-599 redesignated existing provisions as subsecs. (a) and (b) and added subsec. (c).

Effective Date of 1978 Amendment. Section 123(e) of Pub.L. 95-599, formerly set out as a note under this section, providing that subsec. (c)(2) and (3) of this section be applicable to certifications required by this section to be filed on or after Jan. 1, 1980, was repealed by Pub.L. 96-106, § 12, Nov. 9, 1979, 93 Stat. 798.

Enforcement of Vehicle Weight Limitations. Section 123(a) to (c) of Pub.L. 95-599 provided that:

"(a) Not later than the one-hundred-eightieth day after the date of enactment of this section [Nov. 6, 1978], the Secretary of Transportation, hereunder referred to as the 'Secretary', in consultation with each State shall inventory the existing system of penalties for violations of vehicle weight

FEDERAL STATUTE

laws, rules, and regulations on any portion of any Federal-aid system in such State. Each State shall annually thereafter report to the Secretary its current inventory.

"(b)(1) Not later than the one-hundred-eightieth day after the date of enactment of this section [Nov. 6, 1978], the Secretary, in consultation with each State, shall inventory the existing system in such State for the issuance of special permits. Each State shall annually thereafter report to the Secretary its current inventory.

"(2) For purposes of this subsection, the term "special permit" means a license or permit issued pursuant to State law, rule, or regulation which authorizes a vehicle to exceed the weight limitation for such vehicle established under State law, rule, or regulation.

"(c) Not later than January 1 of the second calendar year which begins after the date of enactment of this section [Nov. 6, 1978] and each calendar year thereafter the Secretary shall submit to Congress an annual report together with such recommendations as the Secretary deems necessary on (1) the latest annual inventory of State systems of penalties required by subsection (a) of this section; (2) the latest annual inventory of State systems for the issuance of special permits required by subsection (b) of this section; (3) the annual certification submitted by each State required by section 141(b) of title 23, United States Code [subsec. (b) of this section]."

Code of Federal Regulations

Size and weight, see 23 CFR 657.1.
Speed limits, see 23 CFR 659.1.

§ 142. Public transportation

(a)(1) To encourage the development, improvement, and use of public mass transportation systems operating motor vehicles (other than on rail) on Federal-aid highways for the transportation of passengers (hereafter in this section referred to as "buses"), so as to increase the traffic capacity of the Federal-aid systems for the movement of persons, the Secretary may approve as a project on any Federal-aid system the construction of exclusive or preferential high occupancy vehicle lanes, highway traffic control devices, bus passenger loading areas and facilities (including shelters), and fringe and transportation corridor parking facilities to serve high occupancy vehicle and public mass transportation passengers, and sums apportioned under section 104(b) of this title shall be available to finance the cost of projects under this paragraph. If fees are charged for the use of any parking facility constructed under this section, the rate thereof shall not be in excess of that required for maintenance and operation of the facility and the cost of providing shuttle service to and from the facility (including compensation to any person for operating the facility and for providing such shuttle service).

(2) In addition to the projects under paragraph (1), the Secretary may, beginning with the fiscal year ending June 30, 1975, approve as a project on the Federal-aid urban system, for payment from sums apportioned under section 104(b)(6) of this title, the purchase of buses, and, beginning with the fiscal year ending June 30, 1976, approve as a project on the Federal-aid urban system, for payment from sums apportioned under section 104(b)(6) of this title, the construction, reconstruction, and improvement of fixed rail facilities, including the purchase of rolling stock for fixed rail, except that not more than $200,000,000 of all sums apportioned for the fiscal year ending June 30, 1975, under section 104(b)(6) shall be available for the payment of the Federal share of projects for the purchase of buses.

(b) Sums apportioned in accordance with paragraph (5) of subsection (b) of section 104 of this title shall be available to finance the Federal share of projects for exclusive or preferential high occupancy vehicle, truck, and emergency vehicle routes or lanes. Routes constructed under this subsection shall not be subject to the third sentence of section 109(b) of this title.

(c) Whenever responsible local officials of an urbanized area notify the State highway department that, in lieu of a highway project the Federal share of which is to be paid from funds apportioned under section 104(b)(6) of this title for the fiscal years ending June 30, 1974, and June 30, 1975, their needs require a nonhighway public mass transit project involving the construction of fixed rail facilities, or the purchase of passenger equipment, including rolling stock for any mode of mass transit, or both, and the State highway department determines that such public mass transit project is in accordance with the planning process under section 134 of this title and is entitled to priority under such planning process, such public mass transit project shall be submitted for approval to the Secretary. Approval of the plans, specifications, and estimates for such project by the Secretary shall be deemed a

PROPOSED AMENDMENT

SB

115

Offered: 2/11/85
Referred: Transportation

Original sponsor: Resources Committee

IN THE SENATE BY THE RESOURCES COMMITTEE

CS FOR SENATE BILL NO. 115 (Resources)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to land use and disposal near a highway right-of-way; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 19.40.200 is amended by adding new subsections to read:

(b) The prohibition on disposal of state land under (a) of this section does not apply to a

(1) disposal necessary for an oil and gas lease under AS 38.05.180;

(2) a state lease or materials sale necessary for exploration, development, production, or transportation of oil and gas north of 68 degrees north latitude or reconstruction or maintenance of the highway.

(c) Before the sale of materials under (b)(2)of this section to a private entity or person or to a state agency the state shall give due consideration to the availability of materials from private sources in the area where the materials are needed.

* Sec. 2. AS 19.40.210 is amended to read:

Sec. 19.40.210. PROHIBITION OF OFF-ROAD VEHICLES. Off-road vehicles are prohibited on land within five miles of the right-of-way of the highway. However, this prohibition does not apply <u>to off-road vehicles necessary for oil and gas exploration, development, production, or transportation or</u> to a person who holds a mining claim in the vicinity of the highway and who must use land within five miles of the right-of-way of the highway to gain access to <u>the</u> [HIS] mining claim.

AMENDMENT TO CSSB 115 (Res)

line 16,page 1: After "oil and gas" insert:"north of 68 degrees north latitude,"

JUSTIFICATION:

This amendment would limit the changes in the law to the region containing lease sale 47 which is the lease sale that prompted the Department of Natural Resources to request this statutory change.

Reconstruction or maintenance would be allowed along the whole of the highway under this provision, and thereby allow for sales of gravel.

Senate
Committee on Resources

M E M O R A N D U M

February 7, 1985

TO: All Members
Senate Resources Committee

FROM: Staff, Senate Resources Committee

RE: Proposed CS for SB 115 (Resources) "An Act relating to oil and gas exploration along highway rights-of-ways"

In 1980 the legislature passed AS 19.40.200 and .210. These sections prohibit the disposal of state land within five miles of the Dalton Highway and also prohibit the use of off-road vehicles in this same area.

Oil and gas lease sale 47 (Kuparuk Uplands) is currently scheduled to be given final notice March 22, 1985 and to take place May 21, 1985. This sale contains approximately 611,840 acres. Approximately 230,000 acres or 52 of the 113 tracts that will make up this sale are within this five mile border of the highway. If the existing statutes are not modified, these tracts could not be included in the lease sale.

The Senate Resources Committee at the request of the Department of Natural Resources, Division of Oil and Gas, introduced SB 115 to remedy this problem. A proposed committee substitute for that bill is included in this packet. The purpose of the committee substitute is the same as the original bill, it avoids, however, the words "land disposal" and confusion which had occurred over the meaning of those words.

The CS also adds an effective date clause and a sentence which deals with the state purchase and sale of materials (gravel).

The wording of the proposed committee substitute has been developed by working with representatives of the Division of Oil and Gas, the House Special Committee on Oil and Gas, Senator Ferguson's office, the Alaska Environmental Lobby and representatives of several oil companies.

BACKGROUND ON SB 115
DEPARTMENT OF NATURAL RESOURCES
February 8, 1985
Senate Resources Committee

DISPOSALS UNDER AS 38 NECESSARY FOR OIL AND GAS DEVELOPMENT:

- Oil and gas leases under AS 38.05.180 convey exploratory drilling rights and production rights for any oil and gas discovered.

- Material (sand and gravel) sales are made to private entities under AS 38.05.110-120 for roads, drill pads, offshore artificial drilling islands, causeways, and other facilities. "Sales" are also made to the Department of Transportation and Public Facilities for highway reconstruction and maintenance under AS 38.05.810 (public and charitable use).

- Oil and gas pipeline right-of-way leases under AS 38.35 are the required authorization to construct an oil or gas pipeline on or across state land.

- Leases under AS 38.05.070 are held by private service companies and contractors in the Prudhoe Bay Industrial Tract Subdivision. These companies and contractors sell, rent, and repair equipment and provide services to oil and gas lessees. Alyeska Pipeline Service Co. also holds leases (for example, construction camp site).

ACTIVITIES IMMEDIATELY AFFECTED BY THE PROPOSED LEGISLATION

- Oil and Gas Lease Sale 47 (Kuparuk Uplands) is tentatively scheduled for May 21, 1985,and contains approximately 611,840 acres. Of that total, about 230,000 acres (52 of the 113 tracts) are within five miles of the highway and would have to be deleted from the sale without the proposed clarification of existing statute. Final notice of Sale 47 is scheduled to be given March 22, 1985.

- Seismic exploration using off-road vehicles is currently prohibited within the 10-mile corridor.

- Several existing material sales to the Department of Transportation and Public Facilities, and current pending applications for continued materials requirements of Alyeska will be in jeopardy.

Supplemental Information on SB 115

The following two issues were raised after packets had been distributed to committee members yesterday after noon.

1) Oil and Gas Lease Sale 31 (Prudhoe Bay Uplands) was held September 16, 1980. AS 19.40.200 has an effective date of October 5, 1980. All except one of the lease award notices were sent to successful bidders on September 23, 1980. One award notice was issued October 7, 1980.

In order to remove any possible legal cloud regarding the leases, the Department of Natural resources, upon the advice of the Attorney General's Office, recommends that SB 115 be made retroactive to October 5, 1980.

If the committee does wish to include the retroactive effective date in the committee substitute, appropriate draft language is attached to this memo.

2) A representative of the Yukon Pacific Pipeline Company telephoned committee staff with a concern about whether communications equipment associated with the project could be installed within the right-of-way under the language of SB 115. The Department of Law has given a verbel opinion that the language of the proposed committee substitute would allow communications equipment related to oil and gas activities. It was suggested by the representative of Yukon-Pacific that the committee might wish to include a broader exemption for communication activities in the pipeline corrider within the committee substitute. If the committee wishes to do this, appropriate language is attached to this memo.

Senate Resources Committee

FROM: Staff, Senate Resources

RE: SB 115 "An Act relating to oil and gas exploration along highway rights-of-way."

Supplemental Information on SB 115

The following two issues were raised after packets had been distributed to committee members yesterday afternoon.

1) Oil and Gas Lease Sale 31 (Prudhoe Bay Uplands) was held September 16, 1980. AS 19.40.200 has an effective date of October 5, 1980. All except one of the lease award notices were sent to successful bidders on September 23, 1980. One award notice was issued October 7, 1980.

In order to remove any possible legal cloud regarding the leases, the Department of Natural Resources, upon the advice of the Attorney General's Office, recommends that SB 115 be made retroactive to October 5, 1980.

If the committee does wish to include the retroactive effective date in the committee substitute, appropriate draft language is attached to this memo.

2) A representative of the Yukon Pacific Pipeline Company telephoned committee staff with a concern about whether communications equipment associated with the project could be installed within the right-of-way under the language of SB 115. The Department of Law has given a verbal opinion that the language of the proposed committee substitute would allow communications equipment related to oil and gas activities. The Department of Law advised that to make certain there was no question on this issue, a letter of intent should be adopted specifying that communication facilities related to oil and gas projects are among the allowed uses. Such a letter of intent is attached.

It was suggested by the representative of Yukon-Pacific that the committee might wish to include a broader exemption for communication activities in the pipeline corridor within the committee substitute. If the committee wishes to do this, appropriate language is available and the letter of intent would not be needed. This type of broadening, however, may jeopardize the support of some of the parties with whom the committee substitute has been developed.

CS FOR SENATE BILL NO. 115 (Resources)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to land use and disposal near a highway right-of-way; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 19.40.200 is amended by adding new subsections to read:

(b) The prohibition on disposal of state land under (a) of this section does not apply to a

(1) disposal necessary for an oil and gas lease under AS 38.05.180;

(2) a state lease or materials sale necessary for exploration, development, production, or transportation of oil and gas or reconstruction or maintenance of the highway.

(c) Before the sale of materials under (b)(2)of this section to a private entity or person or to a state agency the state shall give due consideration to the availability of materials from private sources in the area where the materials are needed.

* Sec. 2. AS 19.40.210 is amended to read:

Sec. 19.40.210. PROHIBITION OF OFF-ROAD VEHICLES. Off-road vehicles are prohibited on land within five miles of the right-of-way of the highway. However, this prohibition does not apply <u>to off-road vehicles necessary for oil and gas exploration, development, production, or transportation or</u> to a person who holds a mining claim in the vicinity of the highway and who must use land within five miles of the right-of-way of the highway to gain access to <u>the</u> [HIS] mining claim.

* Sec. 3. This Act is retroactive to October 5, 1980.

* Sec. 4. This Act takes effect immediately in accordance with AS 01.-10.070(c).

DEPARTMENT OF LAW

OFFICE OF THE ATTORNEY GENERAL

February 12, 1985

The Honorable Arliss Sturgulewski, Chairman
Senate Resources Committee
Alaska State Senate
Pouch V
Juneau, Alaska 99811

FEB 14 1985

Re: CSSB 115 (Res)

Dear Senator Sturgulewski:

Kay Brown, director of the division of oil and gas, has asked us to respond to your inquiry whether there would be any negative legal implications from the retroactive application of the proposed amendments to AS 19.40.200 - 19.40.210 contained in the referenced bill. 1/ We believe that there would not.

Although retrospective laws are generally not favored, curative legislation is encouraged. Here, the legislation is in part being proposed to validate certain existing AS 38.05 disposals and off-road vehicle activities which might otherwise be void for failure to conform with the existing proscriptions of

---

1/ You will recall that the inquiry was made at your meeting of February 8, at which time Ms. Brown proposed that the provisions of CSSB 115 (Res) be made retroactive. We had earlier advised Ms. Brown that any question regarding the validity of existing uses of state land along the Dalton Highway could be resolved in the context of an attorney general's opinion. However, on February 4, it was brought to our attention that at least one existing oil and gas lease would be void unless made valid by retroactive application of the proposed amendments contained in the bill.

AS 19.40.200 - 19.40.210. These disposals and activities were authorized by state officials under the mistaken belief that the provisions of AS 19.40.200 - 19.40.210 were limited in scope to certain circumstances of primary concern to the legislature when the original Act was passed, namely, the prohibition of cabin site and other land surface disposals under AS 38.05 and of hunting with ORVs along the Haul Road corridor. The plain language of the statute, however, exceeds this narrow application, even though a broad interpretation reportedly was not the legislature's original intent.

Nevertheless, even curative legislation must comply with certain legal requirements. Among these is the requirement of AS 01.10.090 for an express statement of retroactivity. The legislative drafting manual suggests that language providing for retroactive application of a bill be set out in a separate section immediately preceding the effective date section, and that the retroactive section and the sections of the bill that are to be retroactive have immediate effective dates. Thus, CSSB 115 (Res) should contain an additional section to read:

* Sec. 3. Sections 1 - 2 of this Act are retroactive to October 5, 1980. 2/

From a constitutional standpoint, a curative Act may not impair the obligation of contracts, take property without due process of law, or interfere with purely judicial matters. We are not aware of any potential problems arising in these three areas of concern if the presently proposed amendments to AS 19.40.200 - 19.40.210 are made retroactive to the effective date of the original Act. To the contrary, retroactive application will avoid the possibility of finding invalid existing uses of state land previously authorized by state officials.

In sum, we are of the opinion that CSSB 115 (Res), which grants new rights rather than takes away existing rights,

---

2/ The present Section 3, providing for an immediate effective date, would be renumbered Section 4.

will present no negative legal implications if its provisions are applied retroactively. To the contrary, because of the uncertain validity of some existing uses of state land, we strongly encourage inclusion in the bill of a retrospective clause such as the one we have suggested.

Very truly yours,

NORMAN GORSUCH
ATTORNEY GENERAL

STATE OF ALASKA

BILL SHEFFIELD, GOVERNOR

DEPARTMENT OF NATURAL RESOURCES

POUCH M
JUNEAU, ALASKA 99811
PHONE: 907-465-2400

OFFICE OF THE COMMISSIONER

January 31, 1985

The Honorable Arliss Sturgulewski
Chairman, Senate Resources Committee
Pouch V
Juneau, AK 99811

Dear Senator Sturgulewski:

The Department of Natural Resources is requesting amendment of AS 19.40.200 and AS 19.40.210 to allow oil and gas exploration and development within five miles of the right-of-way of the Dalton Highway (North Slope Haul Road).

The statute presently prohibits the disposal of state land under AS 38 and use of off-road vehicles within five miles of the highway. "State land" under AS 38 includes oil and gas leases for exploration and production rights.

Although the department does not believe it was the intent of the 1980 Legislature to prohibit oil and gas activities along the highway, the statute as presently written may be interpreted to have that effect. Oil and Gas Lease Sale 47 (Kuparuk Uplands) is tentatively scheduled for May 21, 1985 and contains approximately 611,840 acres. Of that total, some 230,000 acres (52 of the 113 tracts) are within the five-mile corridor and will have to be deleted from the sale without clarification of the statutes cited above. Final notice of Sale 47 is scheduled to be given March 22, 1985.

I appreciate the willingness of your Committee to introduce SB 115, which would rectify the apparent oversight. Thank you in advance for your consideration and timely action on the bill.

Sincerely,

Esther C. Wunnicke
Commissioner

10-J9LH

Section 3, ch. 41, SLA 1971, provides: "This Act is retroactive to January 2, 1971."

Chapter 40. James Dalton Highway.

Section
10. Declaration of policy
15. Highway named
20. Contractual authority
30. Undertakings of contractors
40. Exemption
50. Highway width
60. Conditions to be met
65. Regulations and penalties
70. Conflict with other laws
80. Definitions
100. Use of the highway by industrial or commercial traffic
110. Public use of a portion of the highway
120. Closure of the highway to traffic
200. Prohibition on disposal of land within five miles of the highway
210. Prohibition of off road vehicles

Sec. 19.40.010. Declaration of policy. (a) The legislature finds and declares that there is an immediate need for a public highway from the Yukon River to the Arctic Ocean and that this public highway should be constructed by the State of Alaska at this time because

(1) it will assist in the fulfillment of the Constitution of the State of Alaska, art. VIII, § 1, in which it is provided that it is the policy of the state to encourage the settlement of its land and the development of its resources by making them available for maximum use consistent with the public interest;

(2) it will provide the first year-round, overland route from north of the Yukon River to the Arctic Ocean, and will consequently result in the completion of a highway from the Pacific Ocean to the Arctic Ocean;

(3) it is in conformity with the policy of the Federal-Aid Highway Act of 1956, 23 U.S.C. 101(b), in which it is declared to be in the national interest to accelerate the construction of certain highways which are of primary importance to the national defense;

(4) it will benefit local and interstate commerce because the area north of the Yukon River is rich in natural resources but is inaccessible at the present time because of the lack of roads and this inaccessibility prohibits the successful use of the natural resources of this area;

(5) it is consonant with the Constitution of the State of Alaska, art. VIII, § 2, in which it is provided that the legislature shall provide for the utilization, development, and conservation of all natural resources belonging to the state, including land and waters, for the maximum benefit of its people, because the highway will benefit not only local and interstate commerce but will also augment the revenues of the state and result in conservation of natural resources, for example, by facilitating a system of forest fire suppression.

(b) It is the sense of the legislature that the construction of the highway will not impair the natural wilderness adjacent to the highway and will not unreasonably interfere with subsistence hunting, fishing, trapping and gathering.

(c) It is the intent of the legislature that the state shall be reimbursed for the cost plus interest of constructing the public highway from the Yukon River to the Arctic Ocean.

(d) It is the intent of the legislature that employment of Alaska residents be encouraged and that the provisions of AS 36.10.010 — 36.10.110 be complied with. (§ 1 ch 231 SLA 1970)

Editor's notes. — AS 36.10.110, referred to in subsection (d), was repealed by § 17, ch. 142, SLA 1972.

Sec. 19.40.015. Highway named. The highway is named the James Dalton Highway. (§ 2 ch 10 SLA 1981)

Editor's notes. — Section 1, ch. 10, SLA 1981 provides: "FINDINGS AND INTENT. The legislature finds that James Dalton's exploration of the North Slope and his report on petroleum possibilities there contributed greatly to the subsequent development of the area, including the construction of the North Slope haul road. Therefore the legislature finds it appropriate that James Dalton be remembered by naming the North Slope haul road after him."

Sec. 19.40.020. Contractual authority. (a) Subject to (b) of this section, the department may contract for the construction of a secondary highway from the Yukon River to the Arctic Ocean. The department may request bids and award contracts for the construction of the highway, or it may elect to directly negotiate contracts for the construction of the highway if it appears to be in the best interests of the state. The provisions of AS 36.10 govern in employment practices on all work authorized by this chapter.

(b) The authority granted under (a) of this section may not be exercised until the state enters into a contract with the participants in the Trans Alaska Pipeline System or other organization formed for the purpose of transporting oil by pipeline from the North Slope (that area of Alaska lying north of 68° latitude). The contract shall provide for reimbursement to the state by the participants, jointly and severally, in the Trans Alaska Pipeline System or other organization formed for

see 3rd page for affected statutes

transporting oil by pipeline, of the full amount of the of construction plus interest on the state's expenditures f seven and one-half per cent per year. Complete t together with interest must be made within five years f the contract. The state may, with the agreement of the lect to construct an oil pipeline from the North Slope. In provisions of this subsection requiring reimbursement

ract with the participants shall include such additional litions as appear to be in the best interests of the state. ayments made under such a contract shall be deposited ccount which will be used for disbursements to the ed with construction of the highway. Disbursements to hall be made on order of the commissioner of transpor- lic facilities on presentation of a proper voucher or the a voucher by an employee of the department authorized ertify as to such payment. (§ 1 ch 231 SLA 1970; am r No. 39, § 11 (1977))

ndments. The 1977 cuted a reference to the nsportation and public facilities for a reference to the commissioner of highways in the third sentence of subsection (c).

30. **Undertakings of contractors.** The department, in ds or individual sureties required by AS 36.25.010, may e undertakings which include the same essential provi- ds or individual sureties required by AS 36.25.010 and factory to the department. (§ 1 ch 231 SLA 1970)

40. **Exemption.** The Alaska Net Income Tax Act and ness License Act do not apply to any money received contractor from the state under a highway construction ized under this chapter if the money is to be paid to a r work performed under the construction contract. The by the subcontractors is subject to the Alaska Net t, the Alaska Business License Act and any other taxes. (§ 1 ch 231 SLA 1970)

50. **Highway width.** In accordance with AS 19.10.015, s highway is designated as 200 feet. (§ 1 ch 231 SLA

60. **Conditions to be met.** Construction authorized 020 — 19.40.050 may not be undertaken until all of the tions are met:
on by the commissioners of the Department of Natural the Department of Fish and Game that adequate pre- een taken to protect and preserve the total ecology of sed;

(2) certification by the commissioner of the Department of Transportation and Public Facilities that the road design and construction methods will cause minimal landscape defacement or environmental degradation by erosion or waste disposal;

(3) certification by the commissioner of the Department of Health and Social Services that adequate and reasonable precautions have been taken for the prevention of pollution during construction and subsequent public use;

(4) all certifications, as well as the rules, regulations, contract provisions, specifications, inspection procedures and programs necessary to implement and accomplish AS 19.40.020 — 19.40.050 shall be filed with the governor's office and published;

(5) the governor has approved all certifications and supporting material submitted to him under (4) of this section as being in the best public interest, and has certified that the contract required by AS 19.40.020 has been executed. (§ 1 ch 231 SLA 1970; am § 6 ch 104 SLA 1971; am Executive Order No. 39, § 11 (1977))

Effect of amendments. — The 1977 amendment substituted a reference to the Department of Transportation and Public Facilities for a reference to the Department of Highways in paragraph (2).

Sec. 19.40.065. Regulations and penalties. All departments and agencies of the state are given the specific authority to adopt under the Administrative Procedure Act (AS 44.62) emergency, temporary and permanent regulations necessary to accomplish the purposes of AS 19.40.020 — 19.40.050. The violation of any regulation adopted under AS 19.40.020 — 19.40.050 is a misdemeanor and upon conviction the person is punishable by a fine of not more than $10,000 for each offense. (§ 1 ch 231 SLA 1970)

Sec. 19.40.070. Conflict with other laws. In the event of a conflict between this chapter and any other law of this state, the provisions of this chapter govern and supersede any such other law. (§ 1 ch 231 SLA 1970)

Sec. 19.40.080. Definitions. In this chapter

(1) "department" means the Department of Transportation and Public Facilities;

(2) "highway" means the secondary highway from the Yukon River to the Arctic Ocean. (§ 1 ch 231 SLA 1970; am Executive Order No. 39, § 11 (1977))

Effect of amendments. — The 1977 amendment substituted a reference to the Department of Transportation and Public Facilities for a reference to the Department of Highways in paragraph (1).

. **Use of the highway by industrial or commer-**
he department shall maintain the highway and keep
ial or commercial traffic throughout the year.

Relevant Statutes

Chapter 45. Miscellaneous Provisions.

Section
01. Definitions
02. Penalties
15. Highway construction near airports

Sec. 19.45.001. Definitions. In AS 19.05 — 19.40

(1) "commissioner" means the commissioner of transportation and public facilities;

(2) "construction" or any derivation means construction, reconstruction, alteration, improvement or major repair;

(3) "controlled-access facility" means a highway especially designed for through traffic, and over, from, or to which owners or occupants of abutting land or other persons have either no right or easement or only a controlled right or easement of access, light, air, or view;

(4) "cost of change, relocation, or removal" means the entire cost incurred by the utility properly attributed to the change, relocation, or removal of a facility, less any costs for improvements or upgrading over and above the cost of a functionally equal facility; if a facility is to be relocated and replaced with new equipment, there shall also be subtracted from the entire cost any salvage value derived from the old facility;

(5) "department" means the Department of Transportation and Public Facilities;

(6) "excess lands" means land acquired by the state in excess of land required for a highway, when the remaining portion of a parcel of land so acquired is left in such shape or condition as to be of little or no value to its owner, or to give rise to claims or litigation concerning severance or other damage;

(7) "federal-aid primary, federal-aid secondary, and interstate system" include any highway which is a part of the federal-aid systems as provided in the Federal-Aid Highway Act of 1956, and any laws amending or supplementing it;

(8) "highway" includes a highway (whether included in primary or secondary systems), road, street, trail, walk, bridge, tunnel, drainage structure and other similar or related structure or facility, and right-of-way thereof, and further includes a ferry system, whether operated solely inside the state or to connect with a Canadian highway, and any such related facility;

(9) "maintenance" means the preservation of each type of highway, roadside structure and facility as nearly as possible in its original condition as constructed, or as subsequently improved, and the operation of highway facilities and services to provide satisfactory and safe highways;

(10) "municipality" means an incorporated city or political subdivision which has jurisdiction over highways in its incorporated area;

Title 19: Highways and Ferries

(11) Repealed by § 6 ch 233 SLA 1968.

(12) "utility" includes railroads and all publicly, privately, or cooperatively owned lines, facilities and systems for producing, transmitting or distributing communications, telecommunications, power, electricity, light, heat, gas, oil, crude products, water, steam, waste, storm water not connected with highway drainage, and other similar commodities, including publicly owned fire and police signal systems and street lighting systems;

(13) "encroachment" means and includes a tower, pole, pole line, pipe, pipeline, driveway, private road, fence, billboard, stand or building, or a structure or object of any kind which is or has been placed in, on, under or over a portion of a highway or road. (§ 1 ch 57 SLA 1961; § 3 art I title I ch 152 SLA 1957: am § 3 ch 124 SLA 1959: am § 1 ch 122 SLA 1960; § 1 art V title II ch 152 SLA 1957; § 3 (14) art I title I ch 152 SLA 1957: added by § 2 ch 122 SLA 1960; § 2 ch 59 SLA 1949; am § 1 ch 86 SLA 1953; am §§ 4, 5 ch 49 SLA 1963; am § 6 ch 233 SLA 1968; am § 29 ch 32 SLA 1971; am § 1 ch 64 SLA 1971; am §§ 1, 2 ch 106 SLA 1977; am Executive Order No. 39, § 11 (1977); AS 19.05.130)

Revisor's notes. — This section derives from AS 19.05.130 and was renumbered by the revisor of statutes pursuant to AS 01.05.031.

Effect of amendments. — The first 1977 amendment substituted the language beginning "facility, less any costs for improvements" and ending "subtracted from the entire cost" for "utility after deducting any increase in the value of the new facility and" in paragraph (4) and rewrote paragraph (12).

The second 1977 amendment substituted references to the commissioner of transportation and public facilities and to the Department of Transportation and Public Facilities for references to the commissioner of highways and to the Department of Highways in paragraphs (1) and (5), respectively.

Legislative history reports. — For report on ch. 32, SLA 1971 (HB 111 am), see 1971 House Journal, p. 138.

Re: SB 141, Relinquishment of rights-of-way

As the attached background information will show, SB 141 is intended to release the State's claim to certain portions of highway rights-of-way which were not clearly identified in land patents. This has given rise to the problem faced by many landowners who live or hold land adjacent to highways the State now wishes to upgrade, straighten or expand and who have been or could be abruptly and without compensation deprived of land they assumed was theirs, and which their legal documents have not identified as belonging to the government.

These rights-of-way were withdrawn by the federal government through public land orders or as a result of various Acts of Congress during territorial days, and did not necessarily make their way either to the homesteaders' patents or the district recorders' offices. This has subsequently caused heavy liabilities for the state's title insurance companies, who traditionally insure property based upon what has been recorded at the recorder's office, not upon what has been published in the Federal Register.

As this problem has evolved, the State Supreme Court has ruled that the State's claims to the rights-of-way are valid, and therefore, title insurers are liable for any claims by the insured for takings for which the State has declined to compensate the property-owner. Of course, this presumes that the property-owner has title insurance. In the many instances where the property-owner does not, he or she is simply out of luck, and has no recourse to gain compensation.

The background material will more completely go into the history of the problem, however, a brief explanation of the enormous fiscal note may be in order. We are not sure how DOT/PF generated this much fiscal impact, but assume they have figured the repurchase price at top market value, and of the entire width of right-of-way (in other words, the entire 300 or 500 feet, not just the portion they will actually need to expand a road).

COMMITTEE STAFF SYNOPSIS

MEMORANDUM RE HOUSE BILL

TO RELINQUISH RIGHTS-OF-WAY

Alaska achieved statehood twenty-five years ago. Before stathood the Department of Interior, through certain Pulic Land Orders, took rights-of-way for roads from landowners without compensating the landowners. Since statehood the Department of Transportation and Public Facilities (DOTPF), acting for the State of Alaska, is still taking private property without compensating the landowners.

In 1966, the Alaska State Legislature enacted Ch. 92 (HB 415 am) which prohibited such takings by the State. The purpose of the law was to "alleviate economic hardship and physical and mental distress occasioned by the taking of land by the State of Alaska [for] which no compensation is paid to the person holding title to the land." The Legislature prohibited any further utilization of rights-of-way pursuant to various Public Land Orders and federal acts.

At the time of Statehood the State received a quit claim deed from the federal government conveying to the State certain roads built by the United States. DOTPF claims that the quit claim deed also conveyed certain easements or rights-of-way that were not described therein but included in Public Land Orders that were not even recorded in the various Recorders Offices throughout the state. DOTPF presently claims a right to highway rights-of-way varying in width from 100 to 300 feet surrounding

PROPONENT'S SUMMARY

every major highway in the state and a smaller easement for most of the local roads throughout the state. When DOTPF determines that it needs to expand or modify an existing roadway where it claims a right-of-way exists by virtue of the federal government, it does so without paying compensation to the landowner for the value of the property taken.

The reservations for rights-of-way and easements were made by the federal government between 1947 and 1956. They were set forth in a series of Public Land Orders (namely PLO 601, 757, and 1613) and a Department of Interior Order (DO 2665) which were not recorded in District Recorders Offices in Alaska but were published in the Federal Register, which was a publication utilized by federal agencies.

The rights-of-way and reservations were not specifically included in the patents issued to homesteaders in Alaska. Homesteaders in Alaska were not informed of the existence of the easements and rights-of-way at the time they were issued patents and did not know the federal government was claiming a portion of their property for highway purposes. Now DOTPF is claiming right-of-way easements in the same way by virtue of the quit claim deed mentioned above.

No landowner or member of the public can know where DOTPF claims a right-of-way easement because those easements are not recorded and are not shown on plats available in the Recorder's Offices.

The Supreme Court of Alaska, in State v. A.L.T.A., has held that the easements are valid. The decision is wrong and must be reversed through the enactment of a law that will relinquish these easements and require DOTPF to pay just compensation for lands taken by them.

TAKING OF RIGHTS-OF-WAY WITHOUT COMPENSATION

In recent years there has been a tremendous amount of road construction by the State of Alaska to serve the needs of the State's growing population and economic development. An important part of building new roads and expanding old ones is establishing the right-of-way upon which the road can be constructed. In the Lower 48 and, to some extent in Alaska, when a state wishes to construct a road it purchases the right-of-way across private land either by direct negotiation or by condemnation. Thus, a private land owner whose property is effected by a highway is compensated for the loss of the use of his property.

This is not so for a large number of land owners in Alaska. The State of Alaska has determined that it can take rights-of-way and expand existing roads over private property without compensation to the land owners based upon some obscure federal regulations and statutes, despite the fact the Alaska State Legislature has already made one attempt to prohibit such takings.

In order to understand how the State can claim an easement or right-of-way for highway purposes across private land without paying compensation one must look at the history of road development in Alaska. Prior to 1947, there were two primary ways by which roads could be established. The first was by appropriation. Under the doctrine of appropriation, if the federal government wished to build a road, it could do so on public lands simply by expending money for the construction of the road. As a matter of custom the width of such roads was generally 33 feet either side of the center line.

Roads were also established prior to 1947 under a special federal statute (48 U.S.C. §932) which granted the right to the public to construct highways across vacant and unappropriated federal public lands. Several territorial enactments established a right-of-way along all section lines in the state four rods (66 feet) wide.

Following World War II numerous veterans found Alaska an appealing place to live and migrated to our state, These Homesteaders soon had identified parcels for entry and proceeded to lawfully obtain title to these lands. The Department of Interior which was responsible for the construction of most roads in Alaska through the Alaska Road Commission soon discovered that

its road construction could not keep up with the pace of settlement. Homesteaders would often enter the property before the Alaska Road Commission could build a road by appropriation. Once the homesteader entered the property the right to build a road by appropriation was lost since the property was no longer considered public lands.

To remedy this problem, Congress passed a law in 1947 requiring a general reservation for highway rights-of-way be placed in all patents where the homesteader entered after July 24, 1947. It was envisioned that as the Alaska road network developed in the territory, the Alaska Road Commission could then construct a road across the patented property even though it was no longer in the hands of the federal government.

Unfortunately, the 1947 law did not establish where the roads were or their width. This placed the homesteader at risk, that, at any time in the future, a road could be constructed across his property. In 1949 the Department of Interior attempted to clarify this problem by publishing Public Land Order No. 601 which established the width for various types of roads in Alaska. The Public Land Order withdrew from the public domain strips of land along all highways in Alaska. By withdrawing the strips of land the federal government actually made those portions of federal public lands unavailable for homesteading.

PLO 601 established several classifications of roads. For through roads such as the Alaska Highway, Richardson Highway, Glenn Highway, Haines Highway, and Tok Cutoff, the right-of-way was 150 feet either side of center line or 300 feet total. For feeder roads such as the Steese Highway, Elliott Highway, McKinley Park Road, Anchorage-Porter-Indian Road, etc. the rights-of-way was 100 feet either side of center line or 200 feet total. The last classification was entitled local roads and represented a withdrawal of 50 feet either side of center line or 100 feet total. However, unlike the through roads and feeder roads, local roads were not specifically identified by name.

The problem with PLO 601 was that homesteaders who entered their property after August of 1949 were often not told that their property might be effected by PLO 601.

The BLM was required, because of the withdrawal by PLO 601, to survey those withdrawals and to post them to their plats. Additionally they were required to tell a homesteader who entered the property and who claimed land under his application which was effected by the PLO 601 that his homestead could not include those lands which PLO 601 effected. The BLM did neither. The

cost and manpower involved in identifying and surveying the property effected by the Public Land Orders and posting it to the plats was beyond the physical and fiscal capability of the BLM in the late 40's and early 50's.

As a result of local BLM protest to Washington the Department of Interior recognized the difficulties inherent in the withdrawals under PLO 601. In 1951 therefore they published PLO 757 which ended the withdrawals as to local and feeder roads and simultaneously published Department Order 2665 which converted those withdrawals to easements. Therefore, a homesteader who entered the property after D. O. 2665 could claim up to the center line of a local or feeder road but would take subject to an easement in favor of the federal government. But, as had happened when PLO 601 was in effect, many homesteaders were not informed of the full nature of the federal government's interest in their property. Some homesteaders had the existence of the local or feeder road easement noted in their prepatented documents but many did not. The easement was never noted in the patent that was issued to them.

The last difficulty associated with these rights-of-way was that the withdrawal that had remained in effect as to through roads. Congress in the late 1950's decided to sell the withdrawn land to the adjoining land owners and convert the remaining through road withdrawals to easements. The Department of Interior published Public Land Order 1613 which converted the withdrawals to easements and the underlying fee was to be sold to the then current adjoining land owner.

The Department of Interior did not immediately institute the program because of Statehood in 1959. During the transition phase much of the federal responsibility for highways and highway rights-of-way passed to the State of Alaska. The State claims its interest to the rights-of-way pursuant to a quitclaim deed issued by the Federal Government in 1959. The State did not bother to record the quitclaim deed until 1969. Thus, there was no document of record in a recording district by which the State claimed any title. The United States government had also never placed the easements of record in the territorial commissioner's office (the predecessor to recorders office).

In the mid 1960's the Bureau of Land Management once again rediscovered its obligations under PLO 1613 to convey the land to the adjoining land owner. It sent out to many of the adjoining land owners notices that they had the right to purchase the underlying fee to the highway along their property. Some of the adjoining land owners paid the purchase price. However, because

of the general freeze on the conveyancing of federal lands in Alaska the federal government failed to issue patents to those individuals.

In the last two years the BLM has once again discovered its obligations under PLO 1613 and have now made the property available to the adjoining land owners, but at today's prices. Further, where the 1965 adjoining land owner had filed an application to purchase and paid his purchase price in 1965, the BLM will now issue the patent to him and not the current adjacent land owner. This causes a great concern among current land owners who believed that they owned the property in front of their homes and businesses. It is conceivable that not only will they have an interloper between themselves and the highway but perhaps even a loss of access to their property.

In 1966, the Alaska legislature became aware that the State was building certain roads along these federally created highway rights-of-way without paying compensation. The only land owners which were effected by this unfair taking were those who entered the property after July of 1947 and before statehood. All other Alaskans were entitled to compensation if such a taking occurred on their property.

Representative Hillstrand bought the issue before the Alaska legislature and they virtually unanimously agreed that such a taking was unfair and unjust to the land owners. The legislature in 1966 therefore passed the Right-of-Way Act of 1966 which barred the state from taking any further land under the grants by the federal government. Between 1966 and 1970 the State therefore paid citizens in Alaska for highway construction and expansion on their lands. Indeed, in 1970 the commissioner for the Department of Transportation testified before the United States Congress that the State had paid several million dollars to land owners in compensation for the federal rights-of-way which had been created in the 1940's and 50's.

In the early 1970's however the problem re-emerged. The rapid increase in the population of Alaska and development of its economy required the State to build additional roads and to expand existing roads to accommodate the growth. In the mid 1970's the State once again began to take property under the 1947 Act. When confronted with the 1966 Act which barred the State from taking property without compensation, the State came up with a legal theory circumventing the Act. In the late 1970's and early 1980's several cases went to the Alaska Supreme Court concerning whether the State had a highway right-of-way across private land which it could take without compensation. In each

of those cases the trial court after having heard the evidence and arguments by the State and land owners ruled in favor of the land owners. In each case the Alaska Supreme Court reversed.

The Alaska Supreme Court's reversal rests on two weak premises. First, that the Alaska legislature in 1966 intended only to end those easements under the 1947 act. The Court's second premise was that the 1947 Act was an independent statute and did not modify the prior act authorizing the Secretary of Interior to build roads in Alaska. The Court found that that prior legislation which authorized the Secretary of Interior to build highways in Alaska permitted him to also create easements independent of the fact that Congress in 1947 modified the law to require that those easements be placed in the patent. Since Department Order 2665 states that it is promulgated under the Department of Interior's responsibility to construct roads in Alaska Department Order 2665 survives the 1966 Act and is not affected by it.

The position of the Alaska Supreme Court seems incredible. It is difficult to believe that in 1966 the Alaska Legislature was only doing away with the right of the State to take an easement under the 1947 Act, which was at least identified to the land owner in his patent, and not prohibit the taking of a concurrent easement which was not identified in the land owners patent. Indeed the premise of the Alaska Supreme Court is refuted by the BLM's own memorandum discussing these rights-of-way.

The most burdensome aspect of the highway right-of-way problem lies in the fact that the federal government mishandled the implementation of the programs. The only notice was published in the Federal Register. The Federal Register is a relatively obscure document to most people. Indeed in the late 1940's and 1950's the existence of the Federal Register, let alone the potential impact on their lives was not realized by most people. The rights-of-way were not placed of record against specific parcels and in cases where the statute or land order required that a map be made of the highway and placed of record with the BLM that was often not done. Further, over the years the State of Alaska in upgrading and improving highways has moved the location of the highway. Now it is difficult to know exactly where the highway was in the 1950's to determine how much property could be taken from the land owner without compensation.

Recently the State has aggravated the problem by permitting other activities to take place on the rights-of-way such as bike paths, horse trails, and utility lines but forced the entity

constructing this nonhighway use to place it on the far edge of the easement thus long before the road might have to actually be expanded, if at all, the easement is being utilized and the homeowner suffers from the loss of trees, shrubs, and use of his land as well as any improvements thereon.

It is this combination of factors which makes the taking by the State of Alaska unfair and inequitable. Lack of adequate notice to the original patentee, lack of notice contained in the patent, lack of notice to the general public except as published in the Federal Register, no recording of the easements in the recording district of the territory or State of Alaska, failure of the State of Alaska to record its quitclaim deed until 1969, and the belief that the 1966 Act by the Legislature ended once and for all the controversy, all contribute to make this taking without compensation extremely unfair.

It is clear that the legislative relief is required to close the loopholes created by the Alaska Supreme Court in the 1966 Act. It was unjust and inequitable then and it is unjust and inequitable now.

Position Paper

BILL NO: Senate Bill No. 141

TITLE: An Act releasing claims of the State to land within certain rights of way

APPROVED: R. J. Knapp
Commissioner

DATE: 2-15-85

The Department of Transportation and Public Facilities opposes Senate Bill 141. This bill would have a major negative impact on the State of Alaska. It could restrict our ability to serve the public effectively and create a heavy financial burden for the State. In addition, there is a concern that, if this bill is enacted into law, it will jeopardize present or future federal-aid participation in highway rights of way.

The validity of these easements has been reviewed by the U.S. Supreme Court and the passage of this bill would reverse any legal grounds already established through the judicial system.

For further information call Susan Fleischhauer at 465-3900.

ANALYSIS OF FISCAL NOTE FOR SENATE BILL 141

This bill would relinquish highway easements created by the federal government under several laws and land orders. Most of the highway rights of way in the State would be affected. This bill would relinquish or vacate all those rights of way except those portions which are physically occupied on the effective date of the Act. Under this Act, the adjacent landowners would immediately become owners of the affected rights of way except those portions between slopes and ditches.

The enactment of this bill would put the Department in the position of having to purchase any rights of way needed for planned expansion, maintenance (brush cutting and snow storage), protection of utility permit areas, permitted encroachments, etc.

The cost of almost all future upgrading or widening of existing highways and the building of planned highways would be increased drastically because of the expense of acquiring additional right of way. This bill would also affect federal funding on federal-aid projects. It is the Federal Highway Administration's position that there can be no federal reimbursement for funds expended by the State of Alaska for the acquisition of right of way from lands subject to the reservation contained in the 1947 Act.

This fiscal note is based on the following assumptions:

1. Primary highways normally control 300-foot rights of way in general but physically occupy 100 feet for the actual roadway.

2. Secondary highways normally control 200-foot rights of way but physically occupy 60 feet for the actual roadway.

3. The State would have to reacquire approximately one half the relinquished rights of way for planned expansion, maintenance, clear zones, utility permits, etc. This would have to be done as expeditiously as possible to satisfy maintenance agreement obligations with the federal government on federal-aid highways.

R. J. Knapp, Commissioner
Alaska Department of Transportation
and Public Facilities
Juneau, Alaska

Dear Commissioner Knapp:

Senate Bill 141

We have reviewed Senate Bill #141 introducted in the State Senate February 8, 1985. This Bill is similar to previously introduced legislation and we still have the following concerns:

1. If the right-of-way remaining will only include the road shoulders and the ditching, several problems are envisioned. There may not be sufficient sight distance to provide for the safety of the traveling public, as you would be unable to clear vegetation on the inside of curves. You would be unable to clean ditches and maintain structures without encroaching on other properties. There would be no mechanism to prevent construction of facilities next to the traveled way.

2. It was the intent of the Federal Government in estabishing Public Land Orders to provide land for highway construction at no additional expense to the states or the United States. If the State of Alaska should choose to abandon this right, and later find that this right-of-way is necessary for the construction or operation of the highway, there can be no Federal reimbursement for funds expended by the State of Alaska for reacquisition.

Sincerely yours,

Barry F. Morehead

Re: Request for Opinion on SB 141
Our File: 366-380-85

Dear Mr. Call:

This letter is in response to your request for our analysis of SB 141 which has as its subject matter Public Land Orders 601, 757, 1613 and Department Order 2665.

Public Land Orders 601, 757, 1613 and Department Order 2665 are responsible for the creation of 80 percent of the public road rights-of-way in Alaska. Moreover, the legal validity of the rights-of-way and easements created by these land orders was upheld by the Alaska Supreme Court against numerous legal challenges raised by the Alaska Land Title Association in a case that went all the way up to the U.S. Supreme Court. See Alaska Land Title Association v. State of Alaska, 667 P.2d 714 (Alaska 1983), cert. denied, 104 S.Ct. 704 (1984).

The effect of SB 141 would be to require the state to vacate and relinquish to certain private landowners significant portions of public highway rights-of-way that were created by PLO 601, PLO 757, PLO 1613 and D.O. 2665. Specifically, those portions of the rights-of-way not physically occupied on the effective date of the bill would have to be relinquished by the state.

There are at least two major legal concerns raised by this bill. The first involves article IX, section 6, of the Alaska Constitution. This provision reads as follows:

> Section 6. PUBLIC PURPOSE. No tax shall be levied, or appropriation of public money made, or

ATTORNEY GENERAL'S OPINION

public property transferred, nor shall the public credit be used, except for a public purpose.

The easement rights created by PLO 601, PLO 757, PLO 1613, and D.O. 2665 are held in common by the general public. These rights, therefore, are a form of public property. The clear effect of Senate Bill 141 is to transfer this public property to certain private individuals. This is so because the bill, while relinquishing public road easements held in common by the general public, bestows the right to the fair market value of these easements upon those private landowners whose property was previously subject to them. See sections 2 and 3 of SB 141. The bill, in effect, transfers public property to private individuals who would not pay anything to the state for the value of the rights transferred to them. Such a transfer, on its face, would appear to violate the public purpose provision of the state Constitution. This is underscored by the fact that the public, if it requires the vacated road easement area for future road improvement, must purchase it back from private ownership. Only these private individuals would benefit from this arrangement and the repurchase costs would probably be significant. Thus, it is difficult to understand how this bill would not violate the public purpose requirement of article IX, section 6, of the Alaska Constitution that must be met whenever public property is transferred. 1/

A second legal difficulty concerns article 1, section 1, of the Alaska Constitution. This provision provides that all persons are entitled to equal rights under the law and, conversely, prohibits unfair distinctions between classes of persons.

1/ Because this bill would eliminate significant portions of public road easements, it would most likely have a negative effect on public access to various areas of the state. As a result, SB 141 appears to be inconsistent with article VIII, sections 1 and 2 of the Alaska Constitution. Article VIII, Section 1 states that it is the policy of the state "to encourage the settlement of its lands and development of its resources by making them available for maximum use consistent with the public interest." Article VIII, section 2 requires the legislature to "provide for the utilization, development, and conservation of all natural resources belonging to the state . . . for the maximum benefit of its people."

See Ale v. State, 484 P.2d 677 (Alaska 1971); Leege v. Martin, 379 P.2d 447 (Alaska 1963) .

The effect of this bill is to divest the general public of its right to utilize significant portions of the public road easements created by public land orders. Since the effect of this divestment would be to eliminate the public's right to claim these public road easements, only those private individuals owning land fronting on the public roads created by these land orders would benefit from this divestment. That is to say, after the effective date of this bill, the public, acting through the state, would have to purchase from this class of individuals the right to use the same public road easements that were previously owned by the public.

In sum, as matters stand now, the public road rights granted by these land orders are owned by all members of the public in common. Should this bill become law, it would mean that the cash value of these rights, rights which were formerly held by all, would be granted to a class of property owners, i.e., those individual property owners fortunate enough to own land fronting on the very roadways created by these public land orders. Thus the practical effect of this bill is to take away potentially valuable property rights owned by the general public as a whole and bestow the right to the fair market value of these rights upon a class of private individuals. Since article I, section 1 of the Alaska Constitution adopts the principle that "all persons are equal and entitled to equal rights, opportunities, and protection under the law," the granting of special privileges by this bill to a particular class at the expense of the public may very well violate this provision.

At present, only one class of persons exists relative to the public road easements created by these public land orders. This class is made up of members of the general public who own these public road easements in common. Should this bill become law, these easement rights would, in effect, be taken from the general public. 2/ The right to the cash value of these public road easement rights would then be bestowed, not on the general

---

2/ This "taking" from each member of the public by itself may violate article XIII, section 16 of the Alaska Constitution which provides that "no person shall be involuntarily divested of . . . his interests in lands . . ." unless the divestment is for a public purpose and he is paid just compensation.

public as a whole, but on a special class of property owners. This bill, in effect, would create two classes of persons: the class of all those members of the general public who do not own real property fronting on the roadways created by the public land orders and the class of those property owners who do own property fronting on the roadways created by these public land orders. This latter class would then be given the right to the fair market value of the easements previously owned by the entire public. It is likely that such discriminatory treatment is barred by article I, section 1, of the Alaska Constitution.

Sincerely,

NORMAN C. GORSUCH
ATTORNEY GENERAL

IN THE SENATE BY COGHILL

SENATE BILL NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act releasing claims of the state to land within certain rights-of-way; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. LEGISLATIVE PURPOSE AND FINDING. The purpose of this Act is to release certain highway rights-of-way claimed by the state that are causing economic hardship and physical and mental distress to persons who hold title to land under a reservation to the state by virtue of 33 Stat. 616 (Act of January 27, 1905); 47 Stat. 446 (Act of June 30, 1932); 48 U.S.C. secs. 321(a) - 327 (Act of July 24, 1947); Public Land Order 601, 14 Fed. Reg. 5048 (1949); Public Land Order 757, 16 Fed. Reg. 10, 749 (1951); Public Land Order 1613, 23 Fed. Reg. 2376, 2378 (1958); or Departmental Order 2665, 16 Fed. Reg. 10, 752 (1951).

* Sec. 2. RELINQUISHMENT OF RIGHT-OF-WAY. The commissioner of transportation and public facilities shall vacate and relinquish to the adjoining property owners any and all rights-of-way for a road, roadway, highway, tramway, trail, bridge, or appurtenant structure created, withdrawn or reserved under 33 Stat. 616 (Act of January 27, 1905); 47 Stat. 446 (Act of June 30, 1932); 48 U.S.C. secs. 321(a) - 327 (Act of July 24, 1947); Public Land Order 601, 14 Fed. Reg. 5048 (1949); Public Land Order 757, 16 Fed. Reg. 10, 749 (1951); Public Land Order 1613, 23 Fed. Reg. 2376, 2378 (1958); or Departmental Order 2665, 16 Fed. Reg. 10, 752 (1951) if the right-of-way on the effective date of this Act is not physically occupied by a road, roadway, highway, tramway, trail, bridge, or appurtenant

structure.

* Sec. 3. TAKING OF RIGHT-OF-WAY WITHOUT JUST COMPENSATION VOID. The vacated and relinquished right-of-way under sec. 2 of this Act may not be taken, claimed, asserted, or used by the state without the payment of just compensation.

* Sec. 4. PHYSICAL OCCUPATION OF RIGHT-OF-WAY. (a) The provisions of this Act do not divest the state of its interest in a right-of-way to land or require compensation by the state for land physically occupied on the effective date of this Act by a road, roadway, highway, tramway, trail, bridge, or appurtenant structure then constructed within the right-of-way created, withdrawn, or reserved under the Acts of Congress and the orders described in sec. 2 of this Act; nor do the provisions of this Act divest the state of an interest in an easement of specific width set out in the original patent from the state or federal government.

(b) Expansion beyond an existing road, roadway, highway, tramway, trail, bridge, or appurtenant structure requires the payment of just compensation to the owner of the land and no other acts or actions by the state constitute a physical occupation within the meaning of this section. The state has the burden of proof to show by clear and convincing evidence that the physical occupation occurred before the effective date of this Act.

* Sec. 5. APPLICATION TO FEDERAL LAND. The provisions of this Act do not divest the state of its interest in a right-of-way that affects land in which fee title is, on the effective date of this Act, vested in the United States of America.

* Sec. 6. DEFINITION. As used in this Act, "physically occupied" means the construction of the actual roadway, including its shoulders and ditching, highway, tramway, trail, bridge, or appurtenant structures, before the effective date of this Act.

* Sec. 7. RETROACTIVE APPLICATION. This Act does not relieve, alter, or void a voluntary conveyance of an easement including an easement dedicated by plat.

* Sec. 8. EFFECTIVE DATE. This Act takes effect immediately in accordance with AS 01.10.070(c).

TAKING OF RIGHTS-OF-WAY WITHOUT COMPENSATION

In recent years there has been a tremendous amount of road construction by the State of Alaska to serve the needs of the State's growing population and economic development. An important part of building new roads and expanding old ones is establishing the right-of-way upon which the road can be constructed. In the Lower 48 and, to some extent in Alaska, when a state wishes to construct a road it purchases the right-of-way across private land either by direct negotiation or by condemnation. Thus, a private land owner whose property is effected by a highway is compensated for the loss of the use of his property.

This is not so for a large number of land owners in Alaska. The State of Alaska has determined that it can take rights-of-way and expand existing roads over private property without compensation to the land owners based upon some obscure federal regulations and statutes, despite the fact the Alaska State Legislature has already made one attempt to prohibit such takings.

In order to understand how the State can claim an easement or right-of-way for highway purposes across private land without paying compensation one must look at the history of road development in Alaska. Prior to 1947, there were two primary ways by which roads could be established. The first was by appropriation. Under the doctrine of appropriation, if the federal government wished to build a road, it could do so on public lands simply by expending money for the construction of the road. As a matter of custom the width of such roads was generally 33 feet either side of the center line.

Roads were also established prior to 1947 under a special federal statute (48 U.S.C. §932) which granted the right to the public to construct highways across vacant and unappropriated federal public lands. Several territorial enactments established a right-of-way along all section lines in the state four rods (66 feet) wide.

Following World War II numerous veterans found Alaska an appealing place to live and migrated to our state, These Homesteaders soon had identified parcels for entry and proceeded to lawfully obtain title to these lands. The Department of Interior which was responsible for the construction of most roads in Alaska through the Alaska Road Commission soon discovered that

its road construction could not keep up with the pace of settlement. Homesteaders would often enter the property before the Alaska Road Commission could build a road by appropriation. Once the homesteader entered the property the right to build a road by appropriation was lost since the property was no longer considered public lands.

To remedy this problem, Congress passed a law in 1947 requiring a general reservation for highway rights-of-way be placed in all patents where the homesteader entered after July 24, 1947. It was envisioned that as the Alaska road network developed in the territory, the Alaska Road Commission could then construct a road across the patented property even though it was no longer in the hands of the federal government.

Unfortunately, the 1947 law did not establish where the roads were or their width. This placed the homesteader at risk, that, at any time in the future, a road could be constructed across his property. In 1949 the Department of Interior attempted to clarify this problem by publishing Public Land Order No. 601 which established the width for various types of roads in Alaska. The Public Land Order withdrew from the public domain strips of land along all highways in Alaska. By withdrawing the strips of land the federal government actually made those portions of federal public lands unavailable for homesteading.

PLO 601 established several classifications of roads. For through roads such as the Alaska Highway, Richardson Highway, Glenn Highway, Haines Highway, and Tok Cutoff, the right-of-way was 150 feet either side of center line or 300 feet total. For feeder roads such as the Steese Highway, Elliott Highway, McKinley Park Road, Anchorage-Porter-Indian Road, etc. the rights-of-way was 100 feet either side of center line or 200 feet total. The last classification was entitled local roads and represented a withdrawal of 50 feet either side of center line or 100 feet total. However, unlike the through roads and feeder roads, local roads were not specifically identified by name.

The problem with PLO 601 was that homesteaders who entered their property after August of 1949 were often not told that their property might be effected by PLO 601.

The BLM was required, because of the withdrawal by PLO 601, to survey those withdrawals and to post them to their plats. Additionally they were required to tell a homesteader who entered the property and who claimed land under his application which was effected by the PLO 601 that his homestead could not include those lands which PLO 601 effected. The BLM did neither. The

cost and manpower involved in identifying and surveying the property effected by the Public Land Orders and posting it to the plats was beyond the physical and fiscal capability of the BLM in the late 40's and early 50's.

As a result of local BLM protest to Washington the Department of Interior recognized the difficulties inherent in the withdrawals under PLO 601. In 1951 therefore they published PLO 757 which ended the withdrawals as to local and feeder roads and simultaneously published Department Order 2665 which converted those withdrawals to easements. Therefore, a homesteader who entered the property after D. O. 2665 could claim up to the center line of a local or feeder road but would take subject to an easement in favor of the federal government. But, as had happened when PLO 601 was in effect, many homesteaders were not informed of the full nature of the federal government's interest in their property. Some homesteaders had the existence of the local or feeder road easement noted in their prepatented documents but many did not. The easement was never noted in the patent that was issued to them.

The last difficulty associated with these rights-of-way was that the withdrawal that had remained in effect as to through roads. Congress in the late 1950's decided to sell the withdrawn land to the adjoining land owners and convert the remaining through road withdrawals to easements. The Department of Interior published Public Land Order 1613 which converted the withdrawals to easements and the underlying fee was to be sold to the then current adjoining land owner.

The Department of Interior did not immediately institute the program because of Statehood in 1959. During the transition phase much of the federal responsibility for highways and highway rights-of-way passed to the State of Alaska. The State claims its interest to the rights-of-way pursuant to a quitclaim deed issued by the Federal Government in 1959. The State did not bother to record the quitclaim deed until 1969. Thus, there was no document of record in a recording district by which the State claimed any title. The United States government had also never placed the easements of record in the territorial commissioner's office (the predecessor to recorders office).

In the mid 1[illegible] the Bureau of Land Management once again rediscovered its obligations under PLO 1613 to convey the land to the adjoining land owner. It sent out to many of the adjoining land owners notices that they had the right to purchase the underlying fee to the highway along their property. Some of the adjoining land owners paid the purchase price. However, because

of the general freeze on the conveyancing of federal lands in Alaska the federal government failed to issue patents to those individuals.

In the last two years the BLM has once again discovered its obligations under PLO 1613 and have now made the property available to the adjoining land owners, but at today's prices. Further, where the 1965 adjoining land owner had filed an application to purchase and paid his purchase price in 1965, the BLM will now issue the patent to him and not the current adjacent land owner. This causes a great concern among current land owners who believed that they owned the property in front of their homes and businesses. It is conceivable that not only will they have an interloper between themselves and the highway but perhaps even a loss of access to their property.

In 1966, the Alaska legislature became aware that the State was building certain roads along these federally created highway rights-of-way without paying compensation. The only land owners which were effected by this unfair taking were those who entered the property after July of 1947 and before statehood. All other Alaskans were entitled to compensation if such a taking occurred on their property.

Representative Hillstrand bought the issue before the Alaska legislature and they virtually unanimously agreed that such a taking was unfair and unjust to the land owners. The legislature in 1966 therefore passed the Right-of-Way Act of 1966 which barred the state from taking any further land under the grants by the federal government. Between 1966 and 1970 the State therefore paid citizens in Alaska for highway construction and expansion on their lands. Indeed, in 1970 the commissioner for the Department of Transportation testified before the United States Congress that the State had paid several million dollars to land owners in compensation for the federal rights-of-way which had been created in the 1940's and 50's.

In the early 1970's however the problem re-emerged. The rapid increase in the population of Alaska and development of its economy required the State to build additional roads and to expand existing roads to accommodate the growth. In the mid 1970's the State once again began to take property under the 1947 Act. When confronted with the 1966 Act which barred the State from taking property without compensation, the State came up with a legal theory circumventing the Act. In the late 1970's and early 1980's several cases went to the Alaska Supreme Court concerning whether the State had a highway right-of-way across private land which it could take without compensation. In each

of those cases the trial court after having heard the evidence and arguments by the State and land owners ruled in favor of the land owners. In each case the Alaska Supreme Court reversed.

The Alaska Supreme Court's reversal rests on two weak premises. First, that the Alaska legislature in 1966 intended only to end those easements under the 1947 act. The Court's second premise was that the 1947 Act was an independent statute and did not modify the prior act authorizing the Secretary of Interior to build roads in Alaska. The Court found that that prior legislation which authorized the Secretary of Interior to build highways in Alaska permitted him to also create easements independent of the fact that Congress in 1947 modified the law to require that those easements be placed in the patent. Since Department Order 2665 states that it is promulgated under the Department of Interior's responsibility to construct roads in Alaska Department Order 2665 survives the 1966 Act and is not affected by it.

The position of the Alaska Supreme Court seems incredible. It is difficult to believe that in 1966 the Alaska Legislature was only doing away with the right of the State to take an easement under the 1947 Act, which was at least identified to the land owner in his patent, and not prohibit the taking of a concurrent easement which was not identified in the land owners patent. Indeed the premise of the Alaska Supreme Court is refuted by the BLM's own memorandum discussing these rights-of-way.

The most burdensome aspect of the highway right-of-way problem lies in the fact that the federal government mishandled the implementation of the programs. The only notice was published in the Federal Register. The Federal Register is a relatively obscure document to most people. Indeed in the late 1940's and 1950's the existence of the Federal Register, let alone the potential impact on their lives was not realized by most people. The rights-of-way were not placed of record against specific parcels and in cases where the statute or land order required that a map be made of the highway and placed of record with the BLM that was often not done. Further, over the years the State of Alaska in upgrading and improving highways has moved the location of the highway. Now it is difficult to know exactly where the highway was in the 1950's to determine how much property could be taken from the land owner without compensation.

Recently the State has aggravated the problem by permitting other activities to take place on the rights-of-way such as bike paths, horse trails, and utility lines but forced the entity

constructing this nonhighway use to place it on the far edge of the easement thus long before the road might have to actually be expanded, if at all, the easement is being utilized and the homeowner suffers from the loss of trees, shrubs, and use of his land as well as any improvements thereon.

It is this combination of factors which makes the taking by the State of Alaska unfair and inequitable. Lack of adequate notice to the original patentee, lack of notice contained in the patent, lack of notice to the general public except as published in the Federal Register, no recording of the easements in the recording district of the territory or State of Alaska, failure of the State of Alaska to record its quitclaim deed until 1969, and the belief that the 1966 Act by the Legislature ended once and for all the controversy, all contribute to make this taking without compensation extremely unfair.

It is clear that the legislative relief is required to close the loopholes created by the Alaska Supreme Court in the 1966 Act. It was unjust and inequitable then and it is unjust and inequitable now.

R. J. Knapp, Commissioner
Alaska Department of Transportation
and Public Facilities
Juneau, Alaska

Dear Commissioner Knapp:

Senate Bill 141

The enclosed is a paper Gary Wilson did for me explaining the differences in 1947 Act easements and Public Land Order (PLO) easements. Since the 1947 Act easements in essence no longer exist I think it would be helpful to all of us if discussions, including examples, only referred to PLO easements.

Our office would certainly be willing to work with you in resolving this issue. The resolution would seem to tie in with your plan to develop an immediate, intermediate, and long term program of proposed improvement projects. Once this is done you could determine which of the proposed improvements involve PLO easements. We could then agree to the number of lanes needed, and a typical section, including shoulders and ditches; plus any additional areas needed to maintain your roadway. Lands beyond what we agree are needed could then be unencumbered by PLO easements.

The mechanics of how this could be recorded needs to be explored. For instance, could the right-of-way lines be established from areial photography and mathematical calculations? Would something like this be recordable? If so, this could be done rather quickly. However, if a physical survey is needed I can see this resolution would be quite costly and time consuming.

If at some later date it was determined lands outside our agreed to right-of-way limits were needed for a roadway improvement, we would participate in the acquisition even though it may be lands previously included in Public Land Orders.

Sincerely yours,

Barry F. Morehead

FHWA PLO ANALYSIS

U.S. Department of Transportation
Federal Highway Administration

Memorandum

Subject: Senate Bill 141

Date: March 7, 1985

From: Division Right-of-Way Officer
Juneau, Alaska

Reply to Attn. of: HRW-AK
013

To: Mr. Barry F. Morehead
Division Administrator
Federal Highway Admininstration
Alaska Division
Juneau, Alaska

The testimony and material presented at the Senate Committee hearing on March 6, 1985 confused Public Land Order (PLO) right-of-way with "47 Act" right-of-way. The pertinent differences that were not explained are:

"47 Act":

1. Was established by an Act of Congress effective 7/24/47 and codified into 48 USC, Section 321.d. It reserved from subsequent lands patented, a right-of-way. The right-of-way was available to the United States or any state created out of the Territory of Alaska.

2. It was repealed by Public Law 86-70, the Alaska Omnibus Act, effective July 1, 1959, however, the reservation contained in patents issued between 1947 and 1959 remained valid.

3. It was specifically noted in patents issued between 1947 and 1959.

4. Specific areas or locations were not identified in the patents.

5. The State of Alaska relinquished their right to any unutilized reservations by the Alaska Right-of-Way Act of 1966.

6. The Federal Government relinquished their right to any unutilized reservations by Section 138 of the Federal-aid Highway Act of 1970.

PLO: 1. Established a withdrawal from Public domain which was subsequently changed to an easement and established and/ or revised corridor widths by:

Executive Order 9145 dated 4/23/42.
PLO 12 dated 7/20/42
PLO 84 dated 1/28/43
PLO 270 dated 4/5/45
PLO 386 dated 7/31/47
PLO 601 dated 8/10/49
PLO 757 dated 10/16/51
Secretarial Order 2665 dated 10/16/51
Amendment #1 to 2665 dated 7/17/52
Amendment #2 to 2665 dated 9/15/56
PLO 1613 dated 4/7/58

The above were issued by the Executive Branch rather than the Congress.

2. They established the original corridor for the Alaska and Glenn Highways. They withdrew from Public Domain a specific width corridor along existing highways. They changed the withdrawals to easements.

3. The withdrawals or easements were not identified in patents issued by the Federal Government nor were they recorded.

4. The withdrawals or easements were not affected by the Alaska Right-of-Way Act of 1966 or Section 138 of the Federal-Aid Highway Act of 1970. The hearings and introductory remarks pertaining to these pieces of legislation always referred to 48 USC, Section 321d or the "47 Act" with no mention of Public Lands Orders.

In summary, the "47 Act" reserved an area from the land patented but did not identify where it was. The PLO's created an easement over the land and located it by designating the highway name and corridor width.

The question of payments and reimbursement was raised but not sufficiently answered.

Prior to 1966:

the State of Alaska did not pay for land utilized under provisions of the "47 Act" or within the PLO corridors. Since there was no expense, there was no federal-aid reimbursement.

From 1966 to 1970:

the State of Alaska paid fair market value for right-of-way covered by the "47 Act" but there was no federal-aid reimbursement for these expenses (see attached listing of parcels and amounts expended prior to 5/1/67).

The State of Alaska did not pay for land within the PLO corridors.

From 1970 to the present

the State of Alaska has paid fair market value for right-of-way covered by "47 Act" and federal-aid funds have participated in the expense.

The State of Alaska has not paid for land within the PLO corridors.

Gary E. Wilson

MEMORANDUM State of Alaska

TO: William J. Niemi
Interim Regional Administrator
Federal Highway Administration
Juneau

DATE: May 1, 1967

FILE NO: 23-2900

ATTN: Calvin Ringgenberg
Regional R/W Officer

SUBJECT: Small Tracts and Right of Way Act

FROM: Dick Chitty
Chief Right of Way Agent
Department of Highways
Juneau

~~[illegible]~~
061 - cross reference
to 062

We have enclosed a copy of our listing of parcels for which land payments have been made in accordance with the State Supreme Court Opinion No. 322 for Small Tracts as well as the Right of Way Act as passed by the 1966 Legislature. The listing as submitted is subject to change as it has been necessary to obtain additional title information on some projects and parcels.

Additional listings will be furnished on a monthly basis as requested in your memorandum of April 7, 1967.

1947 act land $54,681.17

Small Tracts $ 85,402.16

54,681.17

Total to May 1, 1967 $140,083.33

PERCENTAGE OF AREA SUBJECT TO PLO TAKINGS WITHOUT COMPENSATION.

Due to the existing Alaska Supreme Court cases indicating that land homesteaded after August 10, 1949 may have the easements taken without compensation, the following are best guess estimates of land in the following areas that would be subject to taking without compensation:

Anchorage - 60%-75%

Kenai - 90%

Fairbanks - 5%-10%

Juneau - 5%-10%

As you can see in the Anchorage and Kenai areas, this means that the majority of the land bordering these roads may be taken without any compensation whatsoever.

% EFFECTED LAND

OWNERS V. MORTGAGEE'S TITLE INSURANCE POLICY

A point was made at the Hearing 3-6-85 for Senate Bill 141 that banks required insurance policies on most of the urban transactions. However, there is a basic distinction between an owner's policy and a bank's policy known as a mortgagee's policy. The owner's policy insures title to be in the name of the fee owner of the property, e.g. John Smith. The mortgagee's policy does not insure title is held in any particular person, but only insures that the mortgage to the bank has a certain priority as to other recorded instruments. Many times an owner pays for a mortgagee's policy, but does not pay for an owner's policy whereby he is not insured and in fact if loss occurs to the lending institute, the title insurance company may sue the owner under the doctrine of subrogation to recover any losses. Often times, a mortgagee's policy is the only one acquired and that owner's go uninsured as to their property. This is especially true in more rural areas.

BILL SHEFFIELD
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

November 19, 1984

RECEIVED
MAR 7 1985
GROH, EGGERS & PRICE

The Honorable Frank Murkowski
United States Senate
317 Hart Building
Washington, DC 20510

Dear Frank:

I have been informed that representatives of the Alaska Land Title Association (ALTA) may ask you to consider introducing legislation concerning highway easements created by public land orders and department orders issued by the Department of Interior from 1943 through 1958. I am writing to let you know of our strong opposition to such legislation, for the reasons detailed below.

The central issue is whether existing State and federal statutes limit the State's right to utilize public road easements granted by particular public land orders and department orders. The Alaska Supreme Court has clearly disagreed with ALTA's view that existing laws (the Alaska Right-of-Way Act of 1966 and AS 34.15.290) prohibit the State from utilizing the powers granted in Public Land Order 601 and Department Order 2665 to expand or widen public roads. In January 1984, the U.S. Supreme Court denied ALTA's request to review the Alaska Supreme Court decision.

With statehood, the road powers originally granted by a series of Department of Interior public land orders and department orders were transferred to the State. In 1966, the Alaska Legislature limited those powers. The Alaska Legislature has recently considered legislation further limiting those powers but has not acted on it to date. We believe that federal legislation in this area would be an unwarranted intrusion into matters best addressed, if necessary, at the State level.

The Alaska Department of Transportation and Public Facilities estimates that the total monetary impact to the State's road program could ultimately reach several hundred million dollars if the ALTA proposal were enacted.

GOVERNOR'S LETTER

Property owners purchase title insurance precisely to protect themselves from the problems presented by the present situation. To enact legislation absolving the title industry of its responsibilities for this issue would simply shift the costs that the private entity has agreed to bear by contract on to the public.

The Alaska Supreme Court's decision in this matter also determined that the publication of the Department of the Interior orders in the Federal Register provided proper notice and that the title industry should have been cognizant of the effect of the orders. It should be noted that title companies now exempt these rights-of-way from their insurance policies. Consequently, they have already taken steps to limit their contractual liability.

I appreciate your consideration of our views. Please let me know if you have any questions or comments.

Sincerely,

Bill Sheffield

FEDERAL ACT OF 1947

[CHAPTER 313]

AN ACT

July 24, 1947
[H. R. 1554]
[Public Law 229]

To amend the Act entitled "An Act providing for the transfer of the duties authorized and authority conferred by law upon the board of road commissioners in the Territory of Alaska to the Department of the Interior, and for other purposes", approved June 30, 1932.

Alaska.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the act entitled "An Act providing for the transfer of the duties authorized and authority conferred by law upon the board of road commissioners in the Territory of Alaska to the Department of the Interior, and for other purposes", approved June 30, 1932 (47 Stat. 446), is hereby amended by adding at the end thereof the following new section:

48 U. S. C. §§ 321a-327.

Reservation of right-of-way for roads, etc.

"SEC. 5. In all patents for lands hereafter taken up, entered, or located in the Territory of Alaska, and in all deeds by the United States hereafter conveying any lands to which it may have reacquired title in said Territory not included within the limits of any organized municipality, there shall be expressed that there is reserved, from the lands described in said patent or deed, a right-of-way thereon for roads, roadways, highways, tramways, trails, bridges, and appurtenant structures constructed or to be constructed by or under the authority of the United States or of any State created out of the Territory of Alaska. When a right-of-way reserved under the provisions of this Act is utilized by the United States or under its authority, the head of the agency in charge of such utilization is authorized to determine and make payment for the value of the crops thereon if not harvested by the owner, and for the value of any improvements, or for the cost of removing them to another site, if less than their value."

Payment for value of crops, etc.

Approved July 24, 1947.

FEDERAL AID HIGHWAY ACT - 1970

ALASKAN ASSISTANCE

Sec. 138. (a) Subsection (b) of section 7 of the Federal Aid Highway Act of 1966 is amended to read as follows:

"(b) There is hereby authorized to be appropriated for construction of Federal-aid highways of the State of Alaska, out of the Highway Trust Fund and in addition to funds otherwise made available to the State of Alaska under title 23, United States Code, $20,-

43. 23 U.S.C.A. § 307(b). 44. 23 U.S.C.A. § 606.

000,000 for each of the fiscal years ending June 30, 1972 and June 30, 1973."

(b) Any right-of-way for roads, roadways, highways, tramways, trails, bridges, and appurtenant structures reserved by section 321 (d) of title 48, United States Code (61 Stat. 418, 1947), not utilized by the United States or by the State or territory of Alaska prior to the date of enactment hereof, shall be and hereby is vacated and relinquished by the United States to the end and intent that such reservation shall merge with the fee and be forever extinguished.

Anchorage 073311

The United States of America,

To all to whom these presents shall come, Greeting:

WHEREAS, a certificate of the Land Office at Anchorage, Alaska, is now deposited in the Bureau of Land Management, whereby it appears that pursuant to the act of Congress of June 1, 1938 (52 Stat. 609), as amended by the Act of July 14, 1945 (59 Stat. 467), the claim of Vernon Lenne Lofstedt has been established and that the requirements of law pertaining to the claim have been met, for the following-described land:

Seward Meridian, Alaska.

T. 12 N., R. 3 W.,

Sec. 33, Lot 191.

The area described contains 2.50 acres, according to the official plat of the survey of the said land, on file in the Bureau of Land Management: Dependent Resurvey officially filed April 14, 1952.

NOW KNOW YE, That the UNITED STATES OF AMERICA, in consideration of the premises, DOES HEREBY GRANT unto the said claimant and to the heirs of the said claimant the tract above described; TO HAVE AND TO HOLD the same, together with all the rights, privileges, immunities, and appurtenances, of whatsoever nature, thereunto belonging, unto the said claimant and to the heirs and assigns of the said claimant forever; subject to (1) any vested and accrued water rights for mining, agricultural, manufacturing, or other purposes, and rights to ditches and reservoirs used in connection with such water rights, as may be recognized and acknowledged by the local customs, laws, and decisions of courts; (2) the reservation of a right-of-way for ditches or canals constructed by the authority of the United States, in accordance with the act of August 30, 1890 (26 Stat., 391, 43 U. S. C. sec. 945), and (3) the reservation of a right-of-way for roads, roadways, highways, tramways, trails, bridges, and appurtenant structures constructed or to be constructed by or under authority of the United States or by any State created out of the Territory of Alaska, in accordance with the act of July 24, 1947 (61 Stat., 418, 48 U. S. C. sec. 321d). There is also reserved to the United States a right-of-way for the construction of railroads, telegraph and telephone lines, in accordance with section 1 of the act of March 12, 1914 (38 Stat., 305, 48 U. S. C. sec. 305). Excepting and reserving, also, to the United States, all oil, gas, and other mineral deposits, in the land so patented, together with the right to prospect for, mine, and remove the same according to the provisions of said Act of June 1, 1938. This patent is subject to a right-of-way not exceeding 33 feet in width, for roadway and public utilities purposes, to be located along the south and east boundaries of said land.

Reserving unto the United States, its permittees or licensees, the right to enter upon, occupy and use, any part or all of said lands for the purposes provided in the Act of June 30, 1920, (41 Stat. 1065) and subject to the conditions and limitations of Section 24 of said Act, as amended by the Act of August 26, 1935 (49 Stat. 846).

IN TESTIMONY WHEREOF, the undersigned authorized officer of the Bureau of Land Management, in accordance with the provisions of the Act of June 17, 1948 (62 Stat., 476), has, in the name of the United States, caused these letters to be made Patent, and the Seal of the Bureau to be hereunto affixed.

GIVEN under my hand, in the District of Columbia, the FOURTH day of OCTOBER in the year of our Lord one thousand nine hundred and FIFTY-FIVE and of the Independence of the United States the one hundred and EIGHTIETH.

For the Director, Bureau of Land Management.

BUREAU OF LAND MANAGEMENT

The United States of America,

To all to whom these presents shall come, Greeting:

WHEREAS, a certificate of the Land Office at Anchorage, Alaska, is now deposited in the Bureau of Land Management, whereby it appears that pursuant to the act of Congress of May 20, 1862, "To secure Homesteads to Actual Settlers on the Public Domain," and the acts supplemental thereto, the claim of Grant Henry Forsythe has been established and that the requirements of law pertaining to the claim have been met, for the following-described land

Seward Meridian, Alaska.
T. 12 N., R. 3 W.,
Sec. 14, W½NW¼,
Sec. 23, W½NE¼.

The area described contains 160 acres, according to the official plat of the survey of the said land, on file in the Bureau of Land Management:

NOW KNOW YE, That the UNITED STATES OF AMERICA, in consideration of the premises, DOES HEREBY GRANT unto the said claimant and to the heirs of the said claimant the tract above described TO HAVE AND TO HOLD the same, together with all the rights, privileges, immunities, and appurtenances of whatsoever nature, thereunto belonging, unto the said claimant and to the heirs and assigns of the said claimant forever; subject to all vested and accrued water rights for mining, agricultural, manufacturing, or other purposes, and rights to ditches and reservoirs used in connection with such water rights, as may be recognized and acknowledged by the local customs, laws, and decisions of courts; (2) the reservation of a right-of-way for ditches or canals constructed by the authority of the United States, in accordance with the act of August 30, 1890 (26 Stat., 391, 43 U. S. C. sec. 945); and (3) the reservation of a right-of-way for roads, roadways, highways, transmission lines, or dams, or appurtenant structures constructed or to be constructed by or under authority of the United States or by any State organized out of the Territory of Alaska, in accordance with the act of July 24, 1947 (61 Stat., 418, 48 U. S. C. sec. 321d). There is also reserved to the United States a right-of-way for the construction of railroads, telegraph and telephone lines, in accordance with section 1 of the act of March 12, 1914 (38 Stat., 305, 48 U. S. C. sec. 305); excepting and reserving also, to the United States, pursuant to section 2 of the act of August 1, 1946 (60 Stat., 760, 42 U. S. C. sec. 1905), all uranium, thorium, or any other material which is or may be determined to be peculiarly essential to the production of fissionable materials, whether or not of commercial value, together with the right of the United States through its authorized agents or representatives at any time to enter upon the land and prospect for, mine, and remove the same.

Re: SB 141, Relinquishment of rights-of-way

As the attached background information will show, SB 141 is intended to release the State's claim to certain portions of highway rights-of-way which were not clearly identified in land patents. This has given rise to the problem faced by many landowners who live or hold land adjacent to highways the State now wishes to upgrade, straighten or expand and who have been or could be abruptly and without compensation deprived of land they assumed was theirs, and which their legal documents have not identified as belonging to the government.

These rights-of-way were withdrawn by the federal government through public land orders or as a result of various Acts of Congress during territorial days, and did not necessarily make their way either to the homesteaders' patents or the district recorders' offices. This has subsequently caused heavy liabilities for the state's title insurance companies, who traditionally insure property based upon what has been recorded at the recorder's office, not upon what has been published in the Federal Register.

As this problem has evolved, the State Supreme Court has ruled that the State's claims to the rights-of-way are valid, and therefore, title insurers are liable for any claims by the insured for takings for which the State has declined to compensate the property-owner. Of course, this presumes that the property-owner has title insurance. In the many instances where the property-owner does not, he or she is simply out of luck, and has no recourse to gain compensation.

The background material will more completely go into the history of the problem, however, a brief explanation of the enormous fiscal note may be in order. We are not sure how DOT/PF generated this much fiscal impact, but assume they have figured the repurchase price at top market value, and of the entire width of right-of-way (in other words, the entire 300 or 500 feet, not just the portion they will actually need to expand a road).

Memo - short history

Introduced: 2/8/85
Referred: Transportation and Resources

IN THE SENATE BY COGHILL

SENATE BILL NO. 141

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act releasing claims of the state to land within certain rights-of-way; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. LEGISLATIVE PURPOSE AND FINDING. The purpose of this Act is to release certain highway rights-of-way claimed by the state that are causing economic hardship and physical and mental distress to persons who hold title to land under a reservation to the state by virtue of 33 Stat. 616 (Act of January 27, 1905); 47 Stat. 446 (Act of June 30, 1932); 48 U.S.C. secs. 321(a) - 327 (Act of July 24, 1947); Public Land Order 601, 14 Fed. Reg. 5048 (1949); Public Land Order 757, 16 Fed. Reg. 10, 749 (1951); Public Land Order 1613, 23 Fed. Reg. 2376, 2378 (1958); or Departmental Order 2665, 16 Fed. Reg. 10, 752 (1951).

* Sec. 2. RELINQUISHMENT OF RIGHT-OF-WAY. The commissioner of transportation and public facilities shall vacate and relinquish to the adjoining property owners any and all rights-of-way for a road, roadway, highway, tramway, trail, bridge, or appurtenant structure created, withdrawn or reserved under 33 Stat. 616 (Act of January 27, 1905); 47 Stat. 446 (Act of June 30, 1932); 48 U.S.C. secs. 321(a) - 327 (Act of July 24, 1947); Public Land Order 601, 14 Fed. Reg. 5048 (1949); Public Land Order 757, 16 Fed. Reg. 10, 749 (1951); Public Land Order 1613, 23 Fed. Reg. 2376, 2378 (1958); or Departmental Order 2665, 16 Fed. Reg. 10, 752 (1951) if the right-of-way on the effective date of this Act is not physically occupied by a road, roadway, highway, tramway, trail, bridge, or appurtenant

structure.

* Sec. 3. TAKING OF RIGHT-OF-WAY WITHOUT JUST COMPENSATION VOID. The vacated and relinquished right-of-way under sec. 2 of this Act may not be taken, claimed, asserted, or used by the state without the payment of just compensation.

* Sec. 4. PHYSICAL OCCUPATION OF RIGHT-OF-WAY. (a) The provisions of this Act do not divest the state of its interest in a right-of-way to land or require compensation by the state for land physically occupied on the effective date of this Act by a road, roadway, highway, tramway, trail, bridge, or appurtenant structure then constructed within the right-of-way created, withdrawn, or reserved under the Acts of Congress and the orders described in sec. 2 of this Act; nor do the provisions of this Act divest the state of an interest in an easement of specific width set out in the original patent from the state or federal government.

(b) Expansion beyond an existing road, roadway, highway, tramway, trail, bridge, or appurtenant structure requires the payment of just compensation to the owner of the land and no other acts or actions by the state constitute a physical occupation within the meaning of this section. The state has the burden of proof to show by clear and convincing evidence that the physical occupation occurred before the effective date of this Act.

* Sec. 5. APPLICATION TO FEDERAL LAND. The provisions of this Act do not divest the state of its interest in a right-of-way that affects land in which fee title is, on the effective date of this Act, vested in the United States of America.

* Sec. 6. DEFINITION. As used in this Act, "physically occupied" means the construction of the actual roadway, including its shoulders and ditching, highway, tramway, trail, bridge, or appurtenant structures, before the effective date of this Act.

* Sec. 7. RETROACTIVE APPLICATION. This Act does not relieve, alter, or void a voluntary conveyance of an easement including an easement dedicated by plat.

* Sec. 8. EFFECTIVE DATE. This Act takes effect immediately in accordance with AS 01.10.070(c).

Position Paper

BILL NO: Senate Bill No. 141

TITLE: An Act releasing claims of the State to land within certain rights of way

APPROVED: R. J. Knapp
Commissioner

DATE: 2-15-85

The Department of Transportation and Public Facilities opposes Senate Bill 141. This bill would have a major negative impact on the State of Alaska. It could restrict our ability to serve the public effectively and create a heavy financial burden for the State. In addition, there is a concern that, if this bill is enacted into law, it will jeopardize present or future federal-aid participation in highway rights of way.

The validity of these easements has been reviewed by the U.S. Supreme Court and the passage of this bill would reverse any legal grounds already established through the judicial system.

DOT Position Paper

For further information call Susan Fleischhauer at 465-3900.

ANALYSIS OF FISCAL NOTE FOR SENATE BILL 141

This bill would relinquish highway easements created by the federal government under several laws and land orders. Most of the highway rights of way in the State would be affected. This bill would relinquish or vacate all those rights of way except those portions which are physically occupied on the effective date of the Act. Under this Act, the adjacent landowners would immediately become owners of the affected rights of way except those portions between slopes and ditches.

The enactment of this bill would put the Department in the position of having to purchase any rights of way needed for planned expansion, maintenance (brush cutting and snow storage), protection of utility permit areas, permitted encroachments, etc.

The cost of almost all future upgrading or widening of existing highways and the building of planned highways would be increased drastically because of the expense of acquiring additional right of way. This bill would also affect federal funding on federal-aid projects. It is the Federal Highway Administration's position that there can be no federal reimbursement for funds expended by the State of Alaska for the acquisition of right of way from lands subject to the reservation contained in the 1947 Act.

This fiscal note is based on the following assumptions:

1. Primary highways normally control 300-foot rights of way in general but physically occupy 100 feet for the actual roadway.

2. Secondary highways normally control 200-foot rights of way but physically occupy 60 feet for the actual roadway.

3. The State would have to reacquire approximately one half the relinquished rights of way for planned expansion, maintenance, clear zones, utility permits, etc. This would have to be done as expeditiously as possible to satisfy maintenance agreement obligations with the federal government on federal-aid highways.

IN THE SENATE BY COGHILL

SENATE JOINT RESOLUTION NO. 26

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

Relating to the payment of just compensation to landowners for certain rights-of-way across land in Alaska.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

WHEREAS the Federal Government created certain rights-of-way for highway purposes across land in the state under Public Land Order 601, Public Land Order 757, Department Order 2665, and Public Land Order 1613; and

WHEREAS the rights-of-way created by the Federal Government were not identified in the patents issued to Alaska homesteaders nor were the original homesteaders informed as to the location or true width of the rights-of-way claimed for highway purposes by the Federal Government across their land; and

WHEREAS the original homesteaders and their successors in interest have had no knowledge of the claim of the Federal Government to the rights-of-way along or across their properties and have often utilized and improved the portion of the right-of-way claimed by the Federal Government; and

WHEREAS the enforcement of the rights-of-way would be unfair to homesteaders who entered their property between August 1949 and Alaska statehood in 1959; and

WHEREAS the rights-of-way created by the Federal Government were not recorded in any territorial or state recording office for the purpose of public notice; and

WHEREAS the right to utilize the rights-of-way for highway purposes

was conveyed to the state in 1959; and

WHEREAS the United States Department of Transportation has declined to pay federal highway funds to the state to allow the state to pay just compensation to the landowners whose properties are affected by the rights-of-way; and

WHEREAS U.S. Senator Ted Stevens has attempted in the Federal Aid Highway Act of 1970, sec. 138, to require the United States Department of Transportation to compensate the State of Alaska for money paid as just compensation for the taking and utilization of the rights-of-way;

BE IT RESOLVED by the Alaska State Legislature that the Alaska delegation to U.S. Congress is urged to introduce and support legislation to require reimbursement by the United States Department of Transportation to the State of Alaska for money paid by the state as just compensation for the use of any right-of-way created, established, or claimed under Public Land Order 601, Public Land Order 757, Department Order 2665, and Public Land Order 1613.

COPIES of this resolution shall be sent to the Honorable Ted Stevens and the Honorable Frank Murkowski, U.S. Senators, and the Honorable Don Young, U.S. Representative, members of the Alaska delegation in Congress.

DEPARTMENT OF THE INTERIOR

GENERAL LAND OFFICE

WASHINGTON

IN REPLY PLEASE REFER TO

☞ 1751330 "F"

JAN 20 1939

The Director,

Division of Territories and Island Possessions.

My dear Dr. Gruening:

Referring to your memorandum under date of December 17, 1938, relative to proposed reservations for the construction of roads, bridges, and trails in the Territory of Alaska, I will be glad to confer with you or your representatives at any time you may so desire.

There is apparently no authority for the issuance of an Executive order for the purpose of imposing a road reservation upon any land in the Territory which may hereafter pass into private ownership, and I am not certain that it would be necessary or advisable to recommend the enactment of legislation for such purpose.

Section 2477, U. S. R. S., provides: "The right-of-way for the construction of highways over public lands, not reserved for public uses, is hereby granted." No action on the part of the Government is deemed necessary to the operation of this statute. This grant becomes effective upon the construction or establishing of the highway in accordance with the State or Territorial laws. No reservation for rights-of-way so acquired is included in the patent when issued for the lands affected. (26 L. D. 446).

The acts of January 27, 1905 (33 Stat. 616), and May 14, 1906 (34 Stat. 192), incorporated in sections 321 to 337 inclusive, of Title 48 U. S. C., provides for the construction and maintenance of roads, trails, and bridges, by the board of road commissioners. A reservation for rights-of-way for roads constructed in pursuance of the provisions of these statutes, may be inserted in patents for the

Rec'd for files
Jan. 14-1939

JOHNSON 1939

lands affected, upon the filing of profile maps showing the location of the road in accordance with instructions of the Department of July 8, 1930.

Section 17 of the act of November 9, 1921 (42 Stat. 212), provides for the granting of public lands or reserved lands of the United States for Federal Aid Highways. Grants under this statute may be acquired by the filing of maps in accordance with the regulation thereunder and the approval of such maps by the Secretary of the Interior. A reservation for rights-of-way acquired under this statute is incorporated in the patent issued for the lands affected.

The width of the rights-of-way which may be acquired under the above-mentioned statutes is not specified. The width of rights-of-way established under section 2477 is governed by the laws of the States or Territories (22 L. D. 145). The width of rights-of-way for roads or highways established or constructed under the provisions of the acts of January 27, 1905, and May 14, 1906, or acquired under section 17 of the Federal Aid Highway Act of November 9, 1921, would seem to be a matter of discretion as to what is deemed reasonably necessary for the construction and proper maintenance of the particular road or highway and governed by the width as surveyed and shown on the profile maps, the maps being evidence of the right-of-way and the basis for insertion of the reservation in any subsequent patent for the lands affected.

With respect to the illustrations given in the correspondence accompanying your letter, it appears quite certain that neither an Executive order nor legislation could afford any relief. In other words, a right-of-way over an area which is embraced in an entry, legally initiated and maintained according to law, is either by agreement with the party having the entry or through condemnation proceedings.

The correspondence accompanying your letter indicates that you are familiar with the instructions issued by the Department on July 8, 1930, in regard to the inclusion of reservations for roads constructed by the Government in all cases where rights of persons seeking to acquire title to any of such lands were initiated subsequent to the construction of the road. In order to put into effect those regulations, this Office must be furnished with maps and field notes of all constructed roads as well as those hereafter completed, so prepared as to make it possible to have proper notes placed on the tract books and adequate reservations inserted in patents. As is

also indicated by your correspondence, this matter was called to the attention of the Secretary of War by the Department on September 3, 1930, but up to this time no maps or field notes pertaining to constructed roads or roads hereafter to be constructed have been received in this office.

We shall be glad to go into these matters more fully in the conference that you have proposed.

The enclosure accompanying your letter is returned herewith.

Very truly yours,

Commissioner.

Enclosure.

The President of the Senate,

United States Senate.

a/2.10,1940

Sir:

I enclose a draft of a bill "To amend an act entitled 'An Act providing for the transfer of the duties authorized and authority conferred by law upon the board of road commissioners in the Territory of Alaska to the Department of the Interior, and for other purposes', approved June 30, 1932".

The purpose of the proposed legislation is to protect the interests of the United States in constructing roads in the Territory of Alaska by providing a right-of-way on lands, now public domain, to which patents may in the future be issued.

The Alaska Road Commission, operating under the Department of the Interior by virtue of the Act approved June 30, 1932 (47 Stat. 446), and financed by Federal appropriations, is engaged in the construction and maintenance of roads, roadways, highways, tramways, trails, bridges, and other similar works in that portion of Alaska outside the national forests. The greater part of the area on which the operations of the Alaska Road Commission are conducted is public domain, and the location of rights-of-way on such lands presents no problem growing out of private ownership. For the proper location of the road and in the interest of public service it is necessary in some cases, however, to cross lands to which title has passed from the United States. These instances are becoming more numerous as the population of the Territory increases. Obtaining rights-of-way across privately owned lands has in a number of cases presented difficulties calling for court action and requiring the expenditure of Federal funds.

It is proposed, therefore, that in all patents for lands hereafter taken up in the Territory there shall be inserted a provision reserving to the Government a right-of-way for roads, roadways, highways, tramways, trails, bridges and appurtenant works or structures constructed or to be constructed by the authority of the United States. A provision accomplishing this may, it is thought, be inserted as an amendment to Section 2 of the Act approved June 30, 1932, supra., and the draft of the bill which I transmit has been written

ICKES 1940

accordingly. The proposed amendment is similar to the provision of the Act of August 30, 1890 (26 Stat. 391), which reserved rights-of-way for canals on lands west of the one hundredth meridian and is also similar to the provisions of the Act of March 12, 1914 (38 Stat. 305), in which rights-of-way for railroads were reserved to the United States in all patents for lands thereafter taken up in the Territory of Alaska.

The Director of the Bureau of the Budget has informed me that there is no objection to the presentation of the proposed legislation to the Congress.

Very truly yours,

(Sgd.) Harold L. Ickes

Secretary of the Interior.

PWG:abc.

Enclosure 1446881.

UNITED STATES
DEPARTMENT OF THE INTERIOR
OFFICE OF THE SECRETARY
DIVISION OF TERRITORIES AND ISLAND POSSESSIONS
WASHINGTON

February 4, 1943.

MEMORANDUM for Mr. Thoron:

The following is an outline of the background in this matter:

The purpose of the proposed legislation is to protect the interests of the United States in constructing roads in the Territory of Alaska by reserving a right-of-way on lands, now public domain, to which patents may in the future be issued.

The Alaska Road Commission, operating under the Department of the Interior by virtue of the Act approved June 30, 1932 (47 Stat. 446), and financed by Federal appropriations, is engaged in the construction and maintenance of roads, roadways, highways, tramways, trails, bridges, and other similar works in that portion of Alaska outside the national forests. The greater part of the area on which the operations of the Alaska Road Commission are conducted is public domain, and the location of rights-of-way on such lands presents no problem growing out of private ownership. For the proper location of the road, and in the interest of public service, it is necessary in some cases, however, to cross lands to which title has passed from the United States. These instances are becoming more numerous as the population of the Territory increases. Obtaining rights-of-way across privately-owned lands has in a number of cases presented difficulties, calling for court action and requiring the expenditure of Federal funds.

A case of this kind occurred two or three years ago in connection with the construction of a bridge across a stream adjoining a certain privately-owned mining claim. The owner of the land claimed that his property was very valuable because of a placer gold mine, and asked an exorbitant price for the right-of-way necessary in connection with the construction of the bridge. This resulted in considerable delay and expense. As a consequence of this and other like instances, the Alaska Road Commission, the Governor of Alaska, and Mr. Parks, the Cadastral Engineer of the Land Office, became convinced that legislation to reserve rights-of-way in future patents of land taken from the public domain, is desirable.

In response to a request from the Road Commission, the proposed legislation was drafted in this Division and submitted to the Department for consideration. It was discussed at a meeting of the Department Legislative Committee, which did not approve favorable action on the bill, presumably because of questions raised in the meeting as to whether legislation of this kind would not have a tendency to retard settlement in Alaska. Suggestion was also made that the bill should provide for payment of damages to crops and improvements on rights-of-way when

HAMPTON 1943

utilized by the United States. Such a provision is included in the most recent draft of the bill. As stated in Mr. Page's memorandum of September 18, apparently it was the opinion of the Legislative Committee that the bill was not of sufficient importance to justify its submission to Congress at that time, as such action might have resulted in deferring more urgent Alaska legislation which the Department proposed to submit.

In view of the foregoing, the bill was not submitted to the last session of Congress, and apparently it is again up for consideration in connection with the legislative program of the Department for the present session.

Ruth Hampton,
Assistant Director.

Juneau, Alaska

September 19, 1949

Colonel John Noyes
Commissioner of Roads
Alaska Road Commission
Juneau, Alaska

Col. N
AFG OFC
GMT
WHD

Dear Colonel Noyes:

Reference is made to the letter from Mr. Ike P. Taylor, Chief Engineer, Alaska Road Commission, dated July 28, 1948, in which he states in reference to our memorandum of July 25, that:

> "One print each of the plans of all the new roads we have located in the past few years have been forwarded to your Office. Please advise if it is now necessary for the Alaska Road Commission to submit three additional prints of these maps to the District Land Offices concerned with the written application, as outlined in your memorandum.
>
> "For your information, the plan maps of our road locations are on a scale of 400 feet to the inch and one print to cover a road location such as that, for instance, from the Forest Boundary to Homer on the Kenai Peninsula, 129 miles, would require approximately 320 square feet of blueprinting. The three sets required in your memorandum would total approximately 1,000 square feet."

24/226

An examination has been made of the more recent maps of highways filed by the Alaska Road Commission, namely, those of the Fairbanks-Chena Hot Springs, Paxson-McKinley Park, and the Forty Mile roads. These maps are excellent for general information, but they do not show the width or the lateral limits of the right-of-way with relation to the legal subdivisions of the public lands where surveyed. The maps are therefore incomplete for the purpose of notation of the tract book records under departmental instructions of January 13, 1916 (44 L.D. 513), as contemplated by our memorandum of July 25, 1949. Unless the lateral limits are shown, where the lands are surveyed, it cannot be definitely determined, for the purpose of posting, what subdivisions are affected.

As stated by Mr. Taylor, the maps in question are prepared on a scale of 400 feet to the inch. For your purposes these are excellent work scale maps, but for use in district land offices they pose a difficult problem of filing and handling, and the general scale as provided in the Department's rights-of-way

PUCKETT 1949

regulations (43 CFR, Parts 244 and 245) is 1000 and 2000 feet to the inch. If this scale is adopted by the Alaska Road Commission, it would reduce the length and size of the maps and effect a considerable saving in filing space.

We greatly appreciate your sending some of your work maps which have been used in connection with land classification work. These, we believe, are not in the form that can be efficiently used for filing in the District Land Offices.

In connection herewith, attention is called to the act of June 30, 1932 (47 Stat. 446, 48 U.S.C. Sec. 321a, seq.), under which the Alaska Road Commission is authorized to construct roads and highways over public lands in Alaska. This act contemplates that maps of definite location of roads so constructed shall be filed with the Bureau of Land Management. Obviously, the authority to construct roads as provided by the act, necessarily, by implication if not otherwise, authorizes the right to appropriate the rights-of-way for such roads. It is therefore believed that if the maps of the rights-of-way for the roads and highways constructed or established under authority of the 1932 act, showing the width of the rights-of-way appropriated, were filed and recorded in the District Land Office, in accordance with instructions of January 13, 1916 (44 L.D. 513), that the Government's rights in and to the roads and rights-of-way would be amply protected under the act as well as R.S. 2477 (43 U.S.C. Sec. 932), without the necessity of any withdrawals.

Very truly yours,

Lowell M. Puckett

Lowell M. Puckett
Regional Administrator

AB/fp

UNITED STATES
DEPARTMENT OF THE INTERIOR
ALASKA ROAD COMMISSION
JUNEAU, ALASKA

December 1, 1949

Mr. James P. Davis, Director
Division of Territories and Island Possessions
Department of the Interior
Washington 25, D. C.

My dear Mr. Davis:

At a recent meeting with Mr. Lowell Puckett, Regional Administrator, Bureau of Land Management, the method of handling withdrawals or reservations for roads rights-of-way was fully discussed.

The immediate problem is our deficiency in accurate maps of old roads which are required by the District Land Offices in connection with locating entrymen and in issuance of patents.

It was brought out by Mr. Puckett that because of the language of Public Land Order 601, all entries in surveyed areas affected by a road must be limited to one side only of the existing road. This is because the order used the word "withdrawn" and the Bureau of Land Management has ruled that no new entry can be made covering noncontiguous areas. One solution of the problem has been proposed by Mr. Puckett to his Washington office. Under Land Decisions Volume 43, page 551, it was held that a right-of-way withdrawal did not render the tracts lying on opposite sides of the withdrawn strip non-contiguous, and an entry embracing both sides of such strip should be allowed. I desire to strongly support Mr. Puckett's request and urge favorable consideration. Application of this decision would avoid much present confusion. By the time entrymen apply for patents in future, it is planned to have available in the District Land Offices accurate maps of our roads.

We believe the best solution of this problem would be a revision of Public Land Order 601 to change the language to read "are hereby reserved from all forms of appropriation". This language would be in accordance with the act of July 24, 1947 (Pub. Law 229, 80th Cong., 1st Session, 48 U.S.C., 1946 Ed., Supp. 1, 321D). It is our contention that this law was intended to avoid the difficulty of determining for each entry or patent the exact location of the road. The act provides in part:

"In all patents for lands hereafter taken up, entered, or located in the Territory of Alaska, and in all deeds by the United States hereafter conveying any lands to which it may have

NOYES 1949

reacquired title in said Territory not included within the limits of any organized municipality, there shall be expressed that there is reserved, from the lands described in said patent or deed, a right-of-way thereon for roads, roadways, highways, tramways, trails, bridges and appurtenant structures constructed or to be constructed by or under the authority of the United States or of any State created out of the Territory of Alaska."

It will be noted the act provides for a blanket reservation for rights-of-way for roads constructed or to be constructed. It is our contention that determination of the exact location of a road now existing through an entry made after the date of approval of the act is not necessary. The history of the bill indicates this was one of the specific difficulties to be corrected. The other was to avoid the necessity of obtaining easements for future roads which obviously could not be described in the patent.

The actual width of right-of-way to be reserved is determined by the class of road. It is believed Public Land Order 601 was primarily intended to establish these widths. With this information in the District Land Offices, entrymen or applicants for patent can be informed of the width of right-of-way in each case. It is probable certain roads will be reclassified in the future, in which case the right-of-way width would be changed. It is recommended favorable consideration be given to a revision of Public Land Order 601 to permit the Alaska Road Commission full latitude of operation under Public Law 229.

Sincerely yours,

John R. Noyes
Commissioner of
Roads for Alaska

cc: Mr. Puckett

UNITED STATES
DEPARTMENT OF THE INTERIOR
BUREAU OF LAND MANAGEMENT
Anchorage, Alaska

April 3, 1952

Mr. Evander C. Smith
Box 2068
Anchorage, Alaska

Dear Mr. Smith:

By letter of March 29, you asked me to define the maximum legal right-of-way to which the Alaska Road Commission is entitled in those instances where entry was made and residence established prior to the construction of the road, and where subsequent patent contains no provision for road right-of-way.

We are unable to determine that there was a definition of the widths of rights-of-way by regulation or statute prior to Public Land Order 601 of August 10, 1949. Any legal settlement upon the land or filing made upon the land prior to August 10, 1949, in which legal occupancy and filing was carried through to consummation, rendered Public Land Order 601 inoperative, and no claim to a width of right-of-way as defined in Public Land Order 601 can be valid, in our opinion.

The act of July 24, 1947, 61 Stat. 418, 48 U.S.C., Sec. 321d, provided for the reservation of right-of-way for roads in patents and deeds on lands, the rights to which were inaugurated after the effective date of the act. This act did not, however, specify the widths of the rights-of-way.

It would appear that the acquiring of road rights-of-way before July 24, 1947, had been done by amicable agreement or condemnation.

Chapter 19, Session Laws of Alaska 1923, Section 1721, reserved a strip between sections 4 rods wide for public highways with the section line being the center of such highway. However, the 1923 law is listed as invalid in the new Alaska Code and we have been advised by the Attorney General that it is considered that this act is in fact invalid. I know of no test case that has been brought to test the validity of the law.

PUCKETT 1952

I understand that the legislature, at its last session, passed a law designating certain section lines on lands owned by the Territory as highway right-of-way. Perhaps you are more familiar with this act than I.

I am uncertain as to the origin of the adoption of 66 feet as the standard width of right-of-way in Alaska prior to the promulgation of Public Land Order 601. Public Land Order 601, which together with Order No. 2665, enclosed, have established widths of rights-of-way for highways in Alaska.

Very truly yours,

Lowell M. Puckett

Re: 1947 Act Lands
00-302

Mr. Francis C. Turner
Federal Highway Administrator
Federal Highway Administration
Nassif Building
400 7th Street, S.W.
Washington, D.C. 20591

THROUGH: Mr. H. G. Tipton
Division Engineer

Dear Mr. Turner:

Reference is made to Mr. Tipton's memorandum of February 12, 1971, concerning participation of federal funds in the 1947 Act lands acquired prior to December 31, 1970. Mr. Tipton's memorandum is in response to our appeal of January 23, 1968, appealing your previous decision of June 30, 1967.

Perhaps a brief history of the 1947 Act reservation and how the reservation was exercised by the State of Alaska would help put our position into perspective.

Prior to the years of World War II, the Territory of Alaska experienced little road construction work. Much of the activity of the Alaska Road Commission and its predecessors was conducted across the public domain and required minimal right of way acquisition. A marked increase in population in the years following the war and a related increase in activities designated to reduce public lands to private ownership increased the frequency with which right of way was necessitated over lands to which title had passed from the United States.

In recognition of this trend and in an attept to reduce the expenditure of governmental funds, Congress passed the 1947 Act effective July 24, 1947.

The effect of this Act was to reserve to the United States or to any State created out of the Territory of Alaska a right of way across lands subsequently passing into private ownership and to thus avoid the necessity of re-acquiring lands for future road construction.

CAMPBELL 1971

The 1947 Act was repealed by Congress effective July 1, 1959. Thus, lands entered or patented after that date are not subject to the act. Title of lands entered or patented from July 24, 1947, to July 1, 1959, continued to remain clouded with the prospect of future road construction causing arbitrary transfers of unspecified portions of said land to the government, without due process or compensation, until April 14, 1966.

It is our position that the 1947 Act did in fact entitle the State of Alaska to utilize the right of way reserved by the act. Specific conveyance to the State at the time of statehood was not necessary because Congress specifically prescribed in the act that the reservation was to be extended to the newly created State of Alaska. The rights of the Federal Government in the 1947 Act rights of way passed to the State at the time of statehood.

The fourth session of the Alaska State Legislature, recognizing the inequalities of the 1947 Act, passed legislation effective April 14, 1966, commonly called the Alaska Right of Way Act of 1966, providing that no agency of the State may take privately owned property by the exercise of the 1947 Act reservation. The legislature's stated purpose was as follows, and I quote:

> 'This Act is intended to alleviate the economic hardship and physical and mental distress occasioned by the taking of land, by the State of Alaska, for which no compensation is paid to the person holding title to the land. This practice has resulted in financial difficulties and the deprivation of peace of mind regarding the security of one's possessions to many citizens of the State of Alaska, and which, if not curtailed by law, will continue to adversely affect citizens of this state. Those persons who hold title to land under a deed or patent which contains a reservation to the state by virtue of the Act of June 30, 1932, ch 320, sec. 5, as added July 24, 1947, ch. 313, 61 Stat. 418, are subject to the hazard of having the State of Alaska take their property without compensation because all patents or deeds containing the reservation required by that federal act reserve to the United States, or the state created out of the Territory of Alaska, a right of way for roads, roadways, tramways, trails, bridges, and appurtenant structures either constructed or to be constructed. Except for this reservation the State of Alaska, under the Alaska constitution and the constitution of the United State, would be required to pay just compensation for any land taken for a right of way. It is declared to be the purpose of this act to place persons with land so encumbered on a basis of equality with all other property holders in the State of Alaska, thereby preventing the taking of property without payment of just compensation as provided by law, and in the manner provided by law."

Subsequent to the enactment of the Alaska Right of Way Act of 1966 the Bureau of Public Roads advised us "that there can be no federal reimbursement for funds expended by the State of Alaska for the acquisition of right of way from land subject to the reservation contained in the 1947 Act." They also stated it would take federal legislation to effectively repeal the reservation.

In response to that statement the late Senator E. L. Bartlett introduced, (for himself and Senator Gruening) Senate Bill 2483 on September 28, 1967. Senator Bartlett's introductory remarks outlined the position of Alaskans affected by the 1947 Act and I quote his remarks from the Congressional Record of the Senate for September 28, 1967:

> "In 1947 Congress enacted a law -- 48, United States Code 321d -- which reserved an undefined highway right of way in all patents for federal public lands in Alaska. This law, commonly referred to as the 1947 Act, has become notorious in Alaska. While seemingly innocuous, the 1947 Act has worked inequities beyond belief as homesteads and other patented lands fall in the paths of urban development and highway improvement projects.
>
> Although the 1947 act was repealed in 1959, all of those persons who received patent to federal lands between 1947 and 1959 still live under the threat that a portion of their land might be taken for highway right of way purposes at any time without compensation. As a matter of fact, a substantial number of rights of way have already been acquired under the 1947 act without compensation to the landowners and many rights of way over such lands will undoubtedly be acquired in the foreseeable future.
>
> The State of Alaska has found a way to compensate patentees for takings under the right of way provision but the Federal Highway Administration refuses on legal grounds to pay the federal share of such compensation.
>
> Mr. President, it is my firm belief that no one could have foreseen the inequities inherent in passage of the 1947 Act. It is also my belief that corrective action is overdue. Therefore, I introduce today for appropriate reference a bill which would vacate and relinquish the reservation of rights of way authorized by the 1947 Act."

Hearings scheduled on Senator Bartlett's bill were cancelled first because of the assassination of Dr. Martin Luther King, Jr., and second because of the assassination of Senator Robert F. Kennedy.

Senator Bartlett's untimely death and Senator Gruening's unsuccessful bid for re-election made it necessary to reintroduce S. 2483. Senator Stevens graciously did this on February 7, 1969.

Alaska's Right of Way Act of 1966 voided the State's rights to utilize right of way over lands subject to the 1947 Act. Section 138(b) of the Federal Aid Highway Act of 1970 vacated and relinquished reserved rights of way not utilized and provided that the reservation merged with the fee and was forever extinguished. We believe it was the intent of Congress to "clear the federal books" by the "housekeeping" Section 138(b) of the Federal Aid Highway Act of 1970 with their full realization that the State of Alaska had extinguished the 1947 Act reservation on April 14, 1966, as it had every right to do.

Unforeseen tragedies delayed Federal action several years causing State expenditures to climb past a million dollars. It was clearly Senator Bartlett's intent in introducing S. 2483 to allow Federal participation in the acquisition of "47 Act" right of way from the April 14, 1966, date.

Acquisition of right of way by the State of Alaska over lands subject to the 1947 Act subsequent to April 14, 1966, was made in accordance with all of the policies and procedures of the Bureau of Public Roads and subsequently the Federal Highway Administration. The rights of way so acquired were incorporated in federal-aid highway projects and therefore should be eligible for federal participation in their acquisition costs.

We respectfully request your further review of your June 30, 1967, and February 12, 1971, decisions and reversal of those decisions to allow federal participation in the acquisition costs of the lands in question.

Very truly yours,

for B. A. Campbell
Commissioner of Highways

Re: Federal Highway Rights-of-Way

Dear Don:

Enclosed you will find copies of correspondence which I have sent to Senators Stevens and Murkowski concerning an extremely serious problem in Alaska. I believe the informational letter to Senator Murkowski and its attachments are self-explanatory.

Once you have had an opportunity to review this, I will be contacting you to ask your support in stopping the State from harming not only our clients, the title insurance industry, but the thousands of Alaskans Statewide who do not have title insurance, many of whom are the original patentees.

Sincerely,

GROH, EGGERS & PRICE

Re: Federal Highway Easements in Alaska

Dear John:

Thank you for meeting with us during your visit last week in Alaska. It was a pleasure having the opportunity to meet you and we look forward to our future contact. As we discussed, we are presently embroiled in an extremely serious controversy for which we are seeking the aid of the Alaska Congressional Delegation. This letter and its enclosures will assist you in your preliminary investigation into this matter. At your earliest convenience, we would like to discuss the possibility of the introduction and passage of our proposed federal legislation with you, and the other members of the Alaska Congressional Delegation.

As you may recall from our meeting, the difficulty lies in the interpretation of a series of public land orders (PLOs) and department orders (DOs) which were issued by the Department of Interior in the late 1940's and early 1950's. Up through 1947 there existed two methods by which the Federal Government could create highway rights-of-way in Alaska. The first was a 1932 Act which was codified at 48 U.S.C. §321a through §322.1/ Pursuant to that Act the Department of Interior had the right to build and construct roadways in Alaska. Additionally, under 44 L.D. 513 the Department of Interior determined that the Federal Government had the right to establish a roadway by appropriation. That is,

---

1/ A copy of this legislation is attached and identified as Exhibit A. Also attached are the other relevant materials identified as discussed in this letter.

a combination of identifying a potential highway plus the allocation of specific funds from Congress was sufficient to reserve the right in the Federal Government to build the road.

In 1947, Congress, at the urging of the Department of Interior passed an amendment to the 1932 Act which was codified at 48 U.S.C. §321d. (Exhibit B.) Under 48 U.S.C. §321d the Department of Interior was required to place in every patent for land in Alaska taken up thereafter a reservation for a road right-of-way for the Federal Government. It is our opinion that the amendment in 1947 was designed to protect the Federal Government's interest in maintaining the right to build roads into those portions of Alaska which were being taken up by homesteaders and which were not yet subject to a 43 U.S.C. §932 section line dedication or a roadway established by appropriation under 44 L.D. 513. It also served the function of consolidating the power of the Department of Interior under the Act of 1932 by specifically requiring that the reservation be put in the patent so that settlers would be on notice.

In August of 1949, the Department of Interior under PLO 601 withdrew from all forms of appropriation certain rights-of-way for highways in Alaska. (Exhibit C.) Under PLO 601 highway widths of varying amounts were established for through, feeder and local roads. The "local" roads were never identified by name which causes particular problems.

Considerable controversy arose over the fact that PLO 601 was a withdrawal rather than the establishment of an easement or right-of-way. Consequently the Department of Interior published modifications of PLO 601 which culminated in the publication of DO 2665. (Exhibit D.) DO 2665 established easements in lieu of rights-of-way.

In the introductory language of DO 2665 the Secretary of the Interior indicated that he was publishing the order pursuant to 48 U.S.C. §321a. It is our belief that the authority cited by the Secretary deals with only the construction powers under the 1932 Act and must be viewed in the light of the 1947 Amendment which required that such easements and rights-of-way be reserved in the patents. However, it is this one "authority section" which has allowed the Alaska Supreme Court to circumvent both the Alaska and Congressional bills designed to eliminate these easements.

None of the withdrawals and easements created by PLO 601 and its successors including DO 2665 were noted in the patents of homesteaders in Alaska, although, all of the patents which were issued for lands taken up after 1947 contain the reservation required by the 1947 Act and 48 U.S.C. §321d. (Exhibit E, for example.) Further, at least in regard to local roads, there was no identification of the roads or of any record by which a homesteader or other interested individual could determine if his property was effected by such a right-of-way.

In 1959 the United States government quitclaimed its interest in the roads in Alaska to the State. The quitclaim deed does not specifically address the question of whether the Federal Government intended to pass its rights-of-way and reservations under the PLOs and DO 2665. The State of Alaska did not record its quitclaim deed until 1969 and it is impossible by referencing the quitclaim deed to determine whether any given parcel of land in Alaska was affected by the withdrawals or easements for roads.

In the mid 1960's concern over the possibility of the State taking land under the federal easements and rights-of-way surfaced and the State Legislature passed the Right-of-Way Act of 1966 (Exhibit F.) The 1966 Act states that "no agency of the state may take privately-owned property by the election or exercise of a reservation to the state acquired under the Act of June 30, 1932, ch. 320 §5, as added July 24, 1947, ch. 313, 61 Stat 418, and taking of property after the effective date of this Act by the election or exercise of a reservation to the state under that federal act is void."

The Federal Government also attempted to alleviate the unfairness of the federal reservations and easements for rights-of-way in patents issued to Alaskans between 1947 (the date of the Amendment of the 1932 Act) and 1959 (Alaska Statehood). Section 138(b) of the Federal-Aid Highway Act of 1970 states:

> Any right-of-way for roads, roadways, highways, tramways, trails, bridges and appurtenant structures reserved by section 321(d) of Title 48, United States Code (61 Stat. 418, 1949), not utilized by the United States or by the State or Territory of Alaska prior to the date of enactment hereof, shall be and hereby is vacated and relinquished by the United States to the end and intent that such reser-

vation shall merge with the fee and be forever extinguished.

Unlike the State Right-of-Way Act, the federal legislation does not specifically indicate that it includes all reservations and easements created under the 1932 Act as Amended by the 1947 Act. However, we believe that that proposition is clear, that the 1947 Act was an Amendment to the 1932 Act which created an obligation on the part of the Federal Government to place in the patent a reservation for highway purposes. We have enclosed testimony by both Senator Stevens and State officials which clearly indicate that the State would not be taking the rights-of-way in the future. (Exhibit G.)

The State of Alaska however decided that since the PLOs state they were promulgated under the general authority of the Secretary of Interior and the DO 2665 was "apparently" promulgated under 48 U.S.C. §321a (the 1932 Act) they would attempt to take property despite both the State and Federal Acts designed to end the uncertainty and unfairness which had resulted from the creation of such easements and rights-of-way.

In a case which ultimately reached the Alaska Supreme Court entitled State v. Alaska Land Title Association, 667 P.2d 714 (Alaska 1983) (Exhibit H), the Alaska Supreme Court determined that the original withdrawals by PLO 601 culminated in the rights-of-way described in DO 2665. The Court further found that DO 2665 was published pursuant to 48 U.S.C. §321a. The Court determined that 48 U.S.C. §321a was a separate source of power for the Secretary of Interior to create easements from that identified in 48 U.S.C. §321d. That is, the court refused to recognize that the 1947 Act's purpose was to amend the 1932 Act to require that any easement created by the Secretary of Interior under the 1932 Act be placed on the patent.

The court went further to find that the Right-of-Way Act of 1966 passed by the Alaska Legislature applied only to the 1947 Act. This is in contradiction to the clear language of the 1966 Act. As noted earlier the Federal-Aid Highway Act of 1970 §138(b) can be on its face interpreted as applying only to the 1947 Act. Therefore, since the Alaska Supreme Court had already interpreted the 1947 Act as being separate from the 1932 Act the Federal-Aid Highway Legislation was ineffective.

It is interesting to note that the court did allow the one homeowner who is not protected by title insurance to prevail. In

that instance the court found that if the homesteader had entered the property prior to the date of the promulgation of PLO 601 (August 10, 1949) then PLO 601 would not be effective against him. The State has challenged this proposition and believes that a homesteader would not prevail against PLO 601 until the date he received his final certificate, usually significantly later in time from entry. There are currently two cases pending before the Alaska Supreme Court which will address this issue.

The State of Alaska has taken the position that it inherited the Federal Government's rights to the easements and rights-of-way under the PLOs pursuant to the quitclaim deed of 1959. They are further taking the position that even if a road had not been constructed at the time of the PLOs or had been subsequently moved, the State has the right to take the property without payment. The greatest difficulty with defending against this form of arbitrary action is that the PLOs and DOs do not specifically identify where a road is located on an entryman's property.

Additionally, the average landowner has no warning of the existence of a road. Since a significant number of individual homeowners do not have title insurance on their property, they are completely unprotected against the actions of the State. The State has further shown itself to be callous to the rights of such landowners by simply taking their land even in cases where their property would not be subject to the PLO due to entry prior to the effective date of PLO 601. Also, because the State does this on an as needed basis, there is no opportunity for homeowners to be appraised of the problem in advance. Only at the time the State finally determines that it will expand the highway does the homeowner learn that his property is to be taken and even then the only outcry is among a few owners along the proposed road expansion. Thus, the problem goes on without the property owners in Alaska having an opportunity to face the issue all at once.

The problem also extends to title insurance companies. Although contrary to prior decisions in other jurisdictions and the language of Alaska statutes, the Alaska Supreme Court has determined that publication of PLOs in the Federal Register, although not recorded in the recording district, and not describing specific parcels of land are to be considered "public records" for the purposes of determining the meaning of such language in title insurance policies. Title insurance companies have suddenly found themselves to be exposed to a tremendous liability without having initially included such risks in the setting of their premiums.

All sides of the issue agree that potential liability for the cost of all the property which could be seized under the PLOs is in excess of one billion dollars over a long period of time. This is a staggering amount for title insurance companies to incur without having already built the risk factor into their rate setting. Thus, there is a potential threat to the viability of the title insurance industry in Alaska to provide homeowners, businesses and banks with title insurance on an on-going basis.

It is our opinion that federal legislation can be proposed which will provide for adequate protection for Alaskan landowners. We have enclosed a working draft of language for such federal legislation based upon Congress declaring that the utilization of such easements without compensation is a violation of due process under the Fifth Amendment as applied to the State by the Fourteenth Amendment. Our research indicates such an approach would withstand judicial scrutiny. See Fitzpatrick v. Bitzer, 427 U.S. 445 (1976); Katzenbach v. Morgan, 384 U.S. 641 (1965); Ramirez v. Puerto Rico Fire Service, 715 F.2d 694 (1st Cir. 1983) Equal Employment Opportunity Commission v. Elrod, 674 F.2d 601 (7th Cir. 1982).

I want to thank you very much for your assistance in this matter and, as we noted in our meeting, it is not a problem which apparently is going to go away. Hopefully, after your office has had the chance to review the documentary materials you, Senator Stevens and Congressman Young will assist us in this endeavor. Mr. Greg Chapados is working on the problem in Senator Steven's office and I am transmitting a copy of this letter to Congressman Young.

Please let me know if you have any questions and we look forward to hearing from you in the near future.

Sincerely,

GROH, EGGERS & PRICE

March 14, 1985

Mr. John Manly
Transportation Committee Aide
Senate Transportation Committee
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Mr. Manly:

As you know, our office, at the request of Blake Call, Secretary of the Senate Transportation Committee, reviewed SB 141. A copy of that review dated March 5, 1985 is attached. Senator Faiks of the Transportation Committee has now asked us to review the attached proposed Committee Substitute for Senate Bill 141. This letter is in response to that request.

The issue of the state's right to use public road easements created by certain public road land orders appears to have arisen as the result of the federal government's failure to note these public road easements in federal patents. The State of Alaska, of course, had nothing to do with the issuance of federal patents and even though it appears that the State of Alaska is without fault in this regard, legislation has been proposed that would bar the state from utilizing these public road easements. CSSB 141 is just such a bill; it would prohibit the state from utilizing significant portions of any public road right-of-way created by 48 U.S.C. §§ 321(a) -- 327, Public Land Order 601, Public Land Order 757, Public Land Order 1613 and Department Order 2665. See sec. 2 of CSSB 141. As noted in our review letter dated March 5, 1985, these public land orders are responsible for the creation of 80 percent of the public road rights-of-way in Alaska.

The practical effect of CSSB 141 is identical to that of SB 141. That is, the bill operates to relinquish to private landowners significant portions of publically owned rights-of-way created by the above land orders. The bill provides that those portions of these rights-of-way that were not physically occupied

by a road on the effective date of the bill would have to be purchased back by the state should they subsequently be needed by the state for road improvement. See sec. 3(b) of CSSB 141.

Because CSSB 141 operates to transfer, at no cost, significant portions of publically owned rights-of-way to a particular class of private landowners. CSSB 141 is substantively no different from its predecessor, SB 141. Accordingly, the same legal problems raised in our March 5 review are also raised by CSSB 141. In brief, these difficulties involve, among others, the public purpose provision of article IX, section 6 of the Alaska Constitution as well as the equal rights provision of article 1, section 1 of the Alaska Constitution.

Our conclusion, then, is that CSSB 141, because it would transfer public property at no cost to private owners, would likely violate the public purpose provision of article IX, section 6 of the Alaska Constitution. 1/

—In addition, because CSSB 141 would take away potentially valuable property rights owned by the general public and bestow the right to the fair market value of these rights upon an identifiable class of private individuals, CSSB 141 results in the creation of special privileges for a particular class of individuals. 2/ As a result, CSSB 141 most likely violates the

---

1/ The fact that the state had no responsibility for the issuance of the patents that gave rise to this issue (many of which were issued before statehood) underscores the public purpose objection.

2/ It should also be noted that title companies will also stand to gain certain advantages from this bill. As matters stand now, title companies are contractually obligated to pay damages to title policy holders whose title policies fail to note the existence of public land order rights-of-way. See Alaska Land Title Association v. State, 667 P.2d 714, 725 (Alaska 1983); Hahn v. Alaska Title Guaranty Co., 557 P.2d 143, 146 (Alaska 1976). Should this bill become law, title companies will be relieved of this contractual duty because the state will no longer be able to claim these public land order easements.

discriminatory treatment prohibition of article 1, section 1 of the Alaska Constitution.

Sincerely,

NORMAN C. GORSUCH
ATTORNEY GENERAL

IN THE SENATE BY THE TRANSPORTATION COMMITTEE

CS FOR SENATE BILL NO. 141 (Transportation)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act requiring just compensation for the utilization of certain rights-of-way; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. LEGISLATIVE PURPOSE AND FINDING. The purpose of this Act is to provide just compensation to landowners in the state who are suffering economic hardship and physical and mental distress by virtue of the state utilizing certain rights-of-way created, withdrawn, or reserved under 33 Stat. 616 (Act of January 27, 1905); 47 Stat. 446 (Act of June 30, 1932); 48 U.S.C. secs. 321(a) - 327 (Act of July 24, 1947); Public Land Order 601, 14 Fed. Reg. 5048 (1949); Public Land Order 757, 16 Fed. Reg. 10, 749 (1951); Public Land Order 1613, 23 Fed. Reg. 2376, 2378 (1958); or Departmental Order 2665, 16 Fed. Reg. 10, 752 (1951).

* Sec. 2. TAKING OF PROPERTY WITHOUT COMPENSATION IS BARRED. The state may not take, utilize, or occupy a right-of-way for a road, roadway, highway, tramway, trail, bridge, or appurtenant structure created, withdrawn or reserved under 33 Stat. 616 (Act of January 27, 1905); 47 Stat. 446 (Act of June 30, 1932); 48 U.S.C. secs. 321(a) - 327 (Act of July 24, 1947); Public Land Order 601, 14 Fed. Reg. 5048 (1949); Public Land Order 757, 16 Fed. Reg. 10, 749 (1951); Public Land Order 1613, 23 Fed. Reg. 2376, 2378 (1958); or Departmental Order 2665, 16 Fed. Reg. 10, 752 (1951) without payment of just compensation if the right-of-way on the effective date of this Act is not physically occupied by a road, roadway, highway, tramway, trail, bridge, or appurtenant structure.

* Sec. 3. PHYSICAL OCCUPATION OF RIGHT-OF-WAY. (a) The provisions of this Act do not require compensation by the state for land physically occupied on the effective date of this Act by a road, roadway, highway, tramway, trail, bridge, or appurtenant structure then constructed within the right-of-way created, withdrawn, or reserved under the Acts of Congress and the orders described in sec. 2 of this Act; nor do the provisions of this Act require compensation by the state for taking, utilizing, or occupying an interest in an easement of specific width set out in the original patent from the state or federal government whether or not physically occupied on the effective date of this Act.

(b) Expansion beyond an existing road, roadway, highway, tramway, trail, bridge, or appurtenant structure requires the payment of just compensation to the owner of the land only to the extent that the state actually takes, utilizes, or occupies beyond the physical occupation within the meaning of this section. The state has the burden of proof to show by clear and convincing evidence that the physical occupation occurred before the effective date of this Act.

* Sec. 4. APPLICATION TO FEDERAL LAND. The provisions of this Act do not require the state to pay compensation for taking, utilizing, or occupying a right-of-way that affects land in which fee title is, on the date of the taking, utilization or occupation, vested in the United States of America.

* Sec. 5. DEFINITION. As used in this Act, "physically occupied" means the construction of the actual roadway, including its shoulders and ditching, highway, tramway, trail, bridge, or appurtenant structures, before the effective date of this Act.

* Sec. 6. RETROACTIVE APPLICATION. This Act does not relieve, alter, or void a voluntary conveyance of an easement including an easement dedicated by plat.

* Sec. 7. EFFECTIVE DATE. This Act takes effect immediately in accordance with AS 01.10.070(c).

Re: Request for Opinion on SB 141
Our File: 366-380-85

Dear Mr. Call:

This letter is in response to your request for our analysis of SB 141 which has as its subject matter Public Land Orders 601, 757, 1613 and Department Order 2665.

Public Land Orders 601, 757, 1613 and Department Order 2665 are responsible for the creation of 80 percent of the public road rights-of-way in Alaska. Moreover, the legal validity of the rights-of-way and easements created by these land orders was upheld by the Alaska Supreme Court against numerous legal challenges raised by the Alaska Land Title Association in a case that went all the way up to the U.S. Supreme Court. See Alaska Land Title Association v. State of Alaska, 667 P.2d 714 (Alaska 1983), cert. denied, 104 S.Ct. 704 (1984).

The effect of SB 141 would be to require the state to vacate and relinquish to certain private landowners significant portions of public highway rights-of-way that were created by PLO 601, PLO 757, PLO 1613 and D.O. 2665. Specifically, those portions of the rights-of-way not physically occupied on the effective date of the bill would have to be relinquished by the state.

There are at least two major legal concerns raised by this bill. The first involves article IX, section 6, of the Alaska Constitution. This provision reads as follows:

> Section 6. PUBLIC PURPOSE. No tax shall be levied, or appropriation of public money made, or

public property transferred, nor shall the public credit be used, except for a public purpose.

The easement rights created by PLO 601, PLO 757, PLO 1613, and D.O. 2665 are held in common by the general public. These rights, therefore, are a form of public property. The clear effect of Senate Bill 141 is to transfer this public property to certain private individuals. This is so because the bill, while relinquishing public road easements held in common by the general public, bestows the right to the fair market value of these easements upon those private landowners whose property was previously subject to them. See sections 2 and 3 of SB 141. The bill, in effect, transfers public property to private individuals who would not pay anything to the state for the value of the rights transferred to them. Such a transfer, on its face, would appear to violate the public purpose provision of the state Constitution. This is underscored by the fact that the public, if it requires the vacated road easement area for future road improvement, must purchase it back from private ownership. Only these private individuals would benefit from this arrangement and the repurchase costs would probably be significant. Thus, it is difficult to understand how this bill would not violate the public purpose requirement of article IX, section 6, of the Alaska Constitution that must be met whenever public property is transferred. 1/

A second legal difficulty concerns article 1, section 1, of the Alaska Constitution. This provision provides that all persons are entitled to equal rights under the law and, conversely, prohibits unfair distinctions between classes of persons.

1/ Because this bill would eliminate significant portions of public road easements, it would most likely have a negative effect on public access to various areas of the state. As a result, SB 141 appears to be inconsistent with article VIII, sections 1 and 2 of the Alaska Constitution. Article VIII, Section 1 states that it is the policy of the state "to encourage the settlement of its lands and development of its resources by making them available for maximum use consistent with the public interest." Article VIII, section 2 requires the legislature to "provide for the utilization, development, and conservation of all natural resources belonging to the state . . . for the maximum benefit of its people."

See Ale v. State, 484 P.2d 677 (Alaska 1971); Leege v. Martin, 379 P.2d 447 (Alaska 1963) .

The effect of this bill is to divest the general public of its right to utilize significant portions of the public road easements created by public land orders. Since the effect of this divestment would be to eliminate the public's right to claim these public road easements, only those private individuals owning land fronting on the public roads created by these land orders would benefit from this divestment. That is to say, after the effective date of this bill, the public, acting through the state, would have to purchase from this class of individuals the right to use the same public road easements that were previously owned by the public.

In sum, as matters stand now, the public road rights granted by these land orders are owned by all members of the public in common. Should this bill become law, it would mean that the cash value of these rights, rights which were formerly held by all, would be granted to a class of property owners, i.e., those individual property owners fortunate enough to own land fronting on the very roadways created by these public land orders. Thus the practical effect of this bill is to take away potentially valuable property rights owned by the general public as a whole and bestow the right to the fair market value of these rights upon a class of private individuals. Since article I, section 1 of the Alaska Constitution adopts the principle that "all persons are equal and entitled to equal rights, opportunities, and protection under the law," the granting of special privileges by this bill to a particular class at the expense of the public may very well violate this provision.

At present, only one class of persons exists relative to the public road easements created by these public land orders. This class is made up of members of the general public who own these public road easements in common. Should this bill become law, these easement rights would, in effect, be taken from the general public. 2/ The right to the cash value of these public road easement rights would then be bestowed, not on the general

---

2/ This "taking" from each member of the public by itself may violate article XIII, section 16 of the Alaska Constitution which provides that "no person shall be involuntarily divested of . . . his interests in lands . . ." unless the divestment is for a public purpose and he is paid just compensation.

public as a whole, but on a special class of property owners. This bill, in effect, would create two classes of persons: the class of all those members of the general public who do not own real property fronting on the roadways created by the public land orders and the class of those property owners who do own property fronting on the roadways created by these public land orders. This latter class would then be given the right to the fair market value of the easements previously owned by the entire public. It is likely that such discriminatory treatment is barred by article I, section 1, of the Alaska Constitution.

Sincerely,

NORMAN C. GORSUCH
ATTORNEY GENERAL

Re: Federal Highway Easements in Alaska

Dear John:

Thank you for meeting with us during your visit last week in Alaska. It was a pleasure having the opportunity to meet you and we look forward to our future contact. As we discussed, we are presently embroiled in an extremely serious controversy for which we are seeking the aid of the Alaska Congressional Delegation. This letter and its enclosures will assist you in your preliminary investigation into this matter. At your earliest convenience, we would like to discuss the possibility of the introduction and passage of our proposed federal legislation with you, and the other members of the Alaska Congressional Delegation.

As you may recall from our meeting, the difficulty lies in the interpretation of a series of public land orders (PLOs) and department orders (DOs) which were issued by the Department of Interior in the late 1940's and early 1950's. Up through 1947 there existed two methods by which the Federal Government could create highway rights-of-way in Alaska. The first was a 1932 Act which was codified at 48 U.S.C. §321a through §322.1/ Pursuant to that Act the Department of Interior had the right to build and construct roadways in Alaska. Additionally, under 44 L.D. 513 the Department of Interior determined that the Federal Government had the right to establish a roadway by appropriation. That is,

---

1/ A copy of this legislation is attached and identified as Exhibit A. Also attached are the other relevant materials identified as discussed in this letter.

a combination of identifying a potential highway plus the allocation of specific funds from Congress was sufficient to reserve the right in the Federal Government to build the road.

In 1947, Congress, at the urging of the Department of Interior passed an amendment to the 1932 Act which was codified at 48 U.S.C. §321d. (Exhibit B.) Under 48 U.S.C. §321d the Department of Interior was required to place in every patent for land in Alaska taken up thereafter a reservation for a road right-of-way for the Federal Government. It is our opinion that the amendment in 1947 was designed to protect the Federal Government's interest in maintaining the right to build roads into those portions of Alaska which were being taken up by homesteaders and which were not yet subject to a 43 U.S.C. §932 section line dedication or a roadway established by appropriation under 44 L.D. 513. It also served the function of consolidating the power of the Department of Interior under the Act of 1932 by specifically requiring that the reservation be put in the patent so that settlers would be on notice.

In August of 1949, the Department of Interior under PLO 601 withdrew from all forms of appropriation certain rights-of-way for highways in Alaska. (Exhibit C.) Under PLO 601 highway widths of varying amounts were established for through, feeder and local roads. The "local" roads were never identified by name which causes particular problems.

Considerable controversy arose over the fact that PLO 601 was a withdrawal rather than the establishment of an easement or right-of-way. Consequently the Department of Interior published modifications of PLO 601 which culminated in the publication of DO 2665. (Exhibit D.) DO 2665 established easements in lieu of rights-of-way.

In the introductory language of DO 2665 the Secretary of the Interior indicated that he was publishing the order pursuant to 48 U.S.C. §321a. It is our belief that the authority cited by the Secretary deals with only the construction powers under the 1932 Act and must be viewed in the light of the 1947 Amendment which required that such easements and rights-of-way be reserved in the patents. However, it is this one "authority section" which has allowed the Alaska Supreme Court to circumvent both the Alaska and Congressional bills designed to eliminate these easements.

None of the withdrawals and easements created by PLO 601 and its successors including DO 2665 were noted in the patents of homesteaders in Alaska, although, all of the patents which were issued for lands taken up after 1947 contain the reservation required by the 1947 Act and 48 U.S.C. §321d. (Exhibit E, for example.) Further, at least in regard to local roads, there was no identification of the roads or of any record by which a homesteader or other interested individual could determine if his property was effected by such a right-of-way.

In 1959 the United States government quitclaimed its interest in the roads in Alaska to the State. The quitclaim deed does not specifically address the question of whether the Federal Government intended to pass its rights-of-way and reservations under the PLOs and DO 2665. The State of Alaska did not record its quitclaim deed until 1969 and it is impossible by referencing the quitclaim deed to determine whether any given parcel of land in Alaska was affected by the withdrawals or easements for roads.

In the mid 1960's concern over the possibility of the State taking land under the federal easements and rights-of-way surfaced and the State Legislature passed the Right-of-Way Act of 1966 (Exhibit F.) The 1966 Act states that "no agency of the State may take privately-owned property by the election or exercise of a reservation to the state acquired under the Act of June 30, 1932, ch. 320 §5, as added July 24, 1947, ch. 313, 61 Stat 418, and taking of property after the effective date of this Act by the election or exercise of a reservation to the state under that federal act is void."

The Federal Government also attempted to alleviate the unfairness of the federal reservations and easements for rights-of-way in patents issued to Alaskans between 1947 (the date of the Amendment of the 1932 Act) and 1959 (Alaska Statehood). Section 138(b) of the Federal-Aid Highway Act of 1970 states:

> Any right-of-way for roads, roadways, highways, tramways, trails, bridges and appurtenant structures reserved by section 321(d) of Title 48, United States Code (61 Stat. 418, 1949), not utilized by the United States or by the State or Territory of Alaska prior to the date of enactment hereof, shall be and hereby is vacated and relinquished by the United States to the end and intent that such reser-

> vation shall merge with the fee and be forever extinguished.

Unlike the State Right-of-Way Act, the federal legislation does not specifically indicate that it includes all reservations and easements created under the 1932 Act as Amended by the 1947 Act. However, we believe that that proposition is clear, that the 1947 Act was an Amendment to the 1932 Act which created an obligation on the part of the Federal Government to place in the patent a reservation for highway purposes. We have enclosed testimony by both Senator Stevens and State officials which clearly indicate that the State would not be taking the rights-of-way in the future. (Exhibit G.)

The State of Alaska however decided that since the PLOs state they were promulgated under the general authority of the Secretary of Interior and the DO 2665 was "apparently" promulgated under 48 U.S.C. §321a (the 1932 Act) they would attempt to take property despite both the State and Federal Acts designed to end the uncertainty and unfairness which had resulted from the creation of such easements and rights-of-way.

In a case which ultimately reached the Alaska Supreme Court entitled State v. Alaska Land Title Association, 667 P.2d 714 (Alaska 1983) (Exhibit H), the Alaska Supreme Court determined that the original withdrawals by PLO 601 culminated in the rights-of-way described in DO 2665. The Court further found that DO 2665 was published pursuant to 48 U.S.C. §321a. The Court determined that 48 U.S.C. §321a was a separate source of power for the Secretary of Interior to create easements from that identified in 48 U.S.C. §321d. That is, the court refused to recognize that the 1947 Act's purpose was to amend the 1932 Act to require that any easement created by the Secretary of Interior under the 1932 Act be placed on the patent.

The court went further to find that the Right-of-Way Act of 1966 passed by the Alaska Legislature applied only to the 1947 Act. This is in contradiction to the clear language of the 1966 Act. As noted earlier the Federal-Aid Highway Act of 1970 §138(b) can be on its face interpreted as applying only to the 1947 Act. Therefore, since the Alaska Supreme Court had already interpreted the 1947 Act as being separate from the 1932 Act the Federal-Aid Highway Legislation was ineffective.

It is interesting to note that the court did allow the one homeowner who is not protected by title insurance to prevail. In

All sides of the issue agree that potential liability for the cost of all the property which could be seized under the PLOs is in excess of one billion dollars over a long period of time. This is a staggering amount for title insurance companies to incur without having already built the risk factor into their rate setting. Thus, there is a potential threat to the viability of the title insurance industry in Alaska to provide homeowners, businesses and banks with title insurance on an on-going basis.

It is our opinion that federal legislation can be proposed which will provide for adequate protection for Alaskan landowners. We have enclosed a working draft of language for such federal legislation based upon Congress declaring that the utilization of such easements without compensation is a violation of due process under the Fifth Amendment as applied to the State by the Fourteenth Amendment. Our research indicates such an approach would withstand judicial scrutiny. See Fitzpatrick v. Bitzer, 427 U.S. 445 (1976); Katzenbach v. Morgan, 384 U.S. 641 (1965); Ramirez v. Puerto Rico Fire Service, 715 F.2d 694 (1st Cir. 1983) Equal Employment Opportunity Commission v. Elrod, 674 F.2d 601 (7th Cir. 1982).

I want to thank you very much for your assistance in this matter and, as we noted in our meeting, it is not a problem which apparently is going to go away. Hopefully, after your office has had the chance to review the documentary materials you, Senator Stevens and Congressman Young will assist us in this endeavor. Mr. Greg Chapados is working on the problem in Senator Steven's office and I am transmitting a copy of this letter to Congressman Young.

Please let me know if you have any questions and we look forward to hearing from you in the near future.

Sincerely,

GROH, EGGERS & PRICE

TAKING OF RIGHTS-OF-WAY
WITHOUT COMPENSATION

In recent years there has been a tremendous amount of road construction by the State of Alaska to serve the needs of the State's growing population and economic development. An important part of building new roads and expanding old ones is establishing the right-of-way upon which the road can be constructed. In the Lower 48 and, to some extent in Alaska, when a state wishes to construct a road it purchases the right-of-way across private land either by direct negotiation or by condemnation. Thus, a private land owner whose property is effected by a highway is compensated for the loss of the use of his property.

This is not so for a large number of land owners in Alaska. The State of Alaska has determined that it can take rights-of-way and expand existing roads over private property without compensation to the land owners based upon some obscure federal regulations and statutes, despite the fact the Alaska State Legislature has already made one attempt to prohibit such takings.

In order to understand how the State can claim an easement or right-of-way for highway purposes across private land without paying compensation one must look at the history of road development in Alaska. Prior to 1947, there were two primary ways by which roads could be established. The first was by appropriation. Under the doctrine of appropriation, if the federal government wished to build a road, it could do so on public lands simply by expending money for the construction of the road. As a matter of custom the width of such roads was generally 33 feet either side of the center line.

Roads were also established prior to 1947 under a special federal statute (48 U.S.C. §932) which granted the right to the public to construct highways across vacant and unappropriated federal public lands. Several territorial enactments established a right-of-way along all section lines in the state four rods (66 feet) wide.

Following World War II numerous veterans found Alaska an appealing place to live and migrated to our state, These Homesteaders soon had identified parcels for entry and proceeded to lawfully obtain title to these lands. The Department of Interior which was responsible for the construction of most roads in Alaska through the Alaska Road Commission soon discovered that

Historical Road Over View

its road construction could not keep up with the pace of settlement. Homesteaders would often enter the property before the Alaska Road Commission could build a road by appropriation. Once the homesteader entered the property the right to build a road by appropriation was lost since the property was no longer considered public lands.

To remedy this problem, Congress passed a law in 1947 requiring a general reservation for highway rights-of-way be placed in all patents where the homesteader entered after July 24, 1947. It was envisioned that as the Alaska road network developed in the territory, the Alaska Road Commission could then construct a road across the patented property even though it was no longer in the hands of the federal government.

Unfortunately, the 1947 law did not establish where the roads were or their width. This placed the homesteader at risk, that, at any time in the future, a road could be constructed across his property. In 1949 the Department of Interior attempted to clarify this problem by publishing Public Land Order No. 601 which established the width for various types of roads in Alaska. The Public Land Order withdrew from the public domain strips of land along all highways in Alaska. By withdrawing the strips of land the federal government actually made those portions of federal public lands unavailable for homesteading.

PLO 601 established several classifications of roads. For through roads such as the Alaska Highway, Richardson Highway, Glenn Highway, Haines Highway, and Tok Cutoff, the right-of-way was 150 feet either side of center line or 300 feet total. For feeder roads such as the Steese Highway, Elliott Highway, McKinley Park Road, Anchorage-Porter-Indian Road, etc. the rights-of-way was 100 feet either side of center line or 200 feet total. The last classification was entitled local roads and represented a withdrawal of 50 feet either side of center line or 100 feet total. However, unlike the through roads and feeder roads, local roads were not specifically identified by name.

The problem with PLO 601 was that homesteaders who entered their property after August of 1949 were often not told that their property might be effected by PLO 601.

The BLM was required, because of the withdrawal by PLO 601, to survey those withdrawals and to post them to their plats. Additionally they were required to tell a homesteader who entered the property and who claimed land under his application which was effected by the PLO 601 that his homestead could not include those lands which PLO 601 effected. The BLM did neither. The

cost and manpower involved in identifying and surveying the property effected by the Public Land Orders and posting it to the plats was beyond the physical and fiscal capability of the BLM in the late 40's and early 50's.

As a result of local BLM protest to Washington the Department of Interior recognized the difficulties inherent in the withdrawals under PLO 601. In 1951 therefore they published PLO 757 which ended the withdrawals as to local and feeder roads and simultaneously published Department Order 2665 which converted those withdrawals to easements. Therefore, a homesteader who entered the property after D. O. 2665 could claim up to the center line of a local or feeder road but would take subject to an easement in favor of the federal government. But, as had happened when PLO 601 was in effect, many homesteaders were not informed of the full nature of the federal government's interest in their property. Some homesteaders had the existence of the local or feeder road easement noted in their prepatented documents but many did not. The easement was never noted in the patent that was issued to them.

The last difficulty associated with these rights-of-way was that the withdrawal that had remained in effect as to through roads. Congress in the late 1950's decided to sell the withdrawn land to the adjoining land owners and convert the remaining through road withdrawals to easements. The Department of Interior published Public Land Order 1613 which converted the withdrawals to easements and the underlying fee was to be sold to the then current adjoining land owner.

The Department of Interior did not immediately institute the program because of Statehood in 1959. During the transition phase much of the federal responsibility for highways and highway rights-of-way passed to the State of Alaska. The State claims its interest to the rights-of-way pursuant to a quitclaim deed issued by the Federal Government in 1959. The State did not bother to record the quitclaim deed until 1969. Thus, there was no document of record in a recording district by which the State claimed any title. The United States government had also never placed the easements of record in the territorial commissioner's office (the predecessor to recorders office).

In the mid 1960's the Bureau of Land Management once again rediscovered its obligations under PLO 1613 to convey the land to the adjoining land owner. It sent out to many of the adjoining land owners notices that they had the right to purchase the underlying fee to the highway along their property. Some of the adjoining land owners paid the purchase price. However, because

of the general freeze on the conveyancing of federal lands in Alaska the federal government failed to issue patents to those individuals.

In the last two years the BLM has once again discovered its obligations under PLO 1613 and have now made the property available to the adjoining land owners, but at today's prices. Further, where the 1965 adjoining land owner has filed an application to purchase and paid his purchase price in 1965, the BLM will now issue the patent to him and not the current adjacent land owner. This causes a great concern among current land owners who believed that they owned the property in front of their homes and businesses. It is conceivable that not only will they have an interloper between themselves and the highway but perhaps even a loss of access to their property.

In 1966, the Alaska legislature became aware that the State was building certain roads along these federally created highway rights-of-way without paying compensation. The only land owners which were effected by this unfair taking were those who entered the property after July of 1947 and before statehood. All other Alaskans were entitled to compensation if such a taking occurred on their property.

Representative Hillstrand bought the issue before the Alaska legislature and they virtually unanimously agreed that such a taking was unfair and unjust to the land owners. The legislature in 1966 therefore passed the Right-of-Way Act of 1966 which barred the state from taking any further land under the grants by the federal government. Between 1966 and 1970 the State therefore paid citizens in Alaska for highway construction and expansion on their lands. Indeed, in 1970 the commissioner for the Department of Transportation testified before the United States Congress that the State had paid several million dollars to land owners in compensation for the federal rights-of-way which had been created in the 1940's and 50's.

In the early 1970's however the problem re-emerged. The rapid increase in the population of Alaska and development of its economy required the State to build additional roads and to expand existing roads to accommodate the growth. In the mid 1970's the State once again began to take property under the 1947 Act. When confronted with the 1966 Act which barred the State from taking property without compensation, the State came up with a legal theory circumventing the Act. In the late 1970's and early 1980's several cases went to the Alaska Supreme Court concerning whether the State had a highway right-of-way across private land which it could take without compensation. In each

M-L 70's State Ignores 1966 Act

of those cases the trial court after having heard the evidence and arguments by the State and land owners ruled in favor of the land owners. In each case the Alaska Supreme Court reversed.

The Alaska Supreme Court's reversal rests on two weak premises. First, that the Alaska legislature in 1966 intended only to end those easements under the 1947 act. The Court's second premise was that the 1947 Act was an independent statute and did not modify the prior act authorizing the Secretary of Interior to build roads in Alaska. The Court found that that prior legislation which authorized the Secretary of Interior to build highways in Alaska permitted him to also create easements independent of the fact that Congress in 1947 modified the law to require that those easements be placed in the patent. Since Department Order 2665 states that it is promulgated under the Department of Interior's responsibility to construct roads in Alaska Department Order 2665 survives the 1966 Act and is not affected by it.

The position of the Alaska Supreme Court seems incredible. It is difficult to believe that in 1966 the Alaska Legislature was only doing away with the right of the State to take an easement under the 1947 Act, which was at least identified to the land owner in his patent, and not prohibit the taking of a concurrent easement which was not identified in the land owners patent. Indeed the premise of the Alaska Supreme Court is refuted by the BLM's own memorandum discussing these rights-of-way.

The most burdensome aspect of the highway right-of-way problem lies in the fact that the federal government mishandled the implementation of the programs. The only notice was published in the Federal Register. The Federal Register is a relatively obscure document to most people. Indeed in the late 1940's and 1950's the existence of the Federal Register, let alone the potential impact on their lives was not realized by most people. The rights-of-way were not placed of record against specific parcels and in cases where the statute or land order required that a map be made of the highway and placed of record with the BLM that was often not done. Further, over the years the State of Alaska in upgrading and improving highways has moved the location of the highway. Now it is difficult to know exactly where the highway was in the 1950's to determine how much property could be taken from the land owner without compensation.

Recently the State has aggravated the problem by permitting other activities to take place on the rights-of-way such as bike paths, horse trails, and utility lines but forced the entity

constructing this nonhighway use to place it on the far edge of the easement thus long before the road might have to actually be expanded, if at all, the easement is being utilized and the homeowner suffers from the loss of trees, shrubs, and use of his land as well as any improvements thereon.

It is this combination of factors which makes the taking by the State of Alaska unfair and inequitable. Lack of adequate notice to the original patentee, lack of notice contained in the patent, lack of notice to the general public except as published in the Federal Register, no recording of the easements in the recording district of the territory or State of Alaska, failure of the State of Alaska to record its quitclaim deed until 1969, and the belief that the 1966 Act by the Legislature ended once and for all the controversy, all contribute to make this taking without compensation extremely unfair.

It is clear that the legislative relief is required to close the loopholes created by the Alaska Supreme Court in the 1966 Act. It was unjust and inequitable then and it is unjust and inequitable now.

MEMORANDUM RE HOUSE BILL

TO RELINQUISH RIGHTS-OF-WAY

Alaska achieved statehood twenty-five years ago. Before stathood the Department of Interior, through certain Pulic Land Orders, took rights-of-way for roads from landowners without compensating the landowners. Since statehood the Department of Transportation and Public Facilities (DOTPF), acting for the State of Alaska, is still taking private property without compensating the landowners.

In 1966, the Alaska State Legislature enacted Ch. 92 (HB 415 am) which prohibited such takings by the State. The purpose of the law was to "alleviate economic hardship and physical and mental distress occasioned by the taking of land by the State of Alaska [for] which no compensation is paid to the person holding title to the land." The Legislature prohibited any further utilization of rights-of-way pursuant to various Public Land Orders and federal acts.

At the time of Statehood the State received a quit claim deed from the federal government conveying to the State certain roads built by the United States. DOTPF claims that the quit claim deed also conveyed certain easements or rights-of-way that were not described therein but included in Public Land Orders that were not even recorded in the various Recorders Offices throughout the state. DOTPF presently claims a right to highway rights-of-way varying in width from 100 to 300 feet surrounding

every major highway in the state and a smaller easement for most of the local roads throughout the state. When DOTPF determines that it needs to expand or modify an existing roadway where it claims a right-of-way exists by virtue of the federal government, it does so without paying compensation to the landowner for the value of the property taken.

The reservations for rights-of-way and easements were made by the federal government between 1947 and 1956. They were set forth in a series of Public Land Orders (namely PLO 601, 757, and 1613) and a Department of Interior Order (DO 2665) which were not recorded in District Recorders Offices in Alaska but were published in the Federal Register, which was a publication utilized by federal agencies.

The rights-of-way and reservations were not specifically included in the patents issued to homesteaders in Alaska. Homesteaders in Alaska were not informed of the existence of the easements and rights-of-way at the time they were issued patents and did not know the federal government was claiming a portion of their property for highway purposes. Now DOTPF is claiming right-of-way easements in the same way by virtue of the quit claim deed mentioned above.

No landowner or member of the public can know where DOTPF claims a right-of-way easement because those easements are not recorded and are not shown on plats available in the Recorder's Offices.

The Supreme Court of Alaska, in State v. A.L.T.A., has held that the easements are valid. The decision is wrong and must be reversed through the enactment of a law that will relinquish these easements and require DOTPF to pay just compensation for lands taken by them.

M E M O R A N D U M

To: Committee Members
From: Committee Staff
Date: March 6, 1985
Re: Background material for SB 141

This afternoon at 3:30 the committee will consider SB 141, relinquishing certain rights-of-way of the State. As you will recall, this bill was scheduled for a hearing two weeks ago, and was removed from the committee's calendar at the request of its proponents.

Included with SB 141 in today's packet are the following materials, some of which are duplicative of information you received last time:

- A proposed committee substitute, which takes the approach of, rather than relinquishing all the rights-of-way, requiring instead that the State compensate for the portions of right-of-way they use, as if they had been relinquished.

- The proponents' summary of the issue, and committee staff synopsis of the problem.

- Relevant Federal Acts of 1947 and 1970.

- Two federal patents, dated 1952 and 1955, and a subdivision plat of land patented by the 1952 patent.

- A list of the identified highways effected by this issue.

- DOT/PF fiscal note and bill analysis that the cost to the State would be $227 million annually, and that DOT/PF would rather settle the cases on an individual basis.

- Federal Highway Administration bill analysis that the federal government could not participate in repurchasing the relinquished rights of way.

- Attorney General's opinion that the bill would violate several provisions of the Alaska Constitution.

Re: Federal Highway Rights-of-Way

Dear Don:

Enclosed you will find copies of correspondence which I have sent to Senators Stevens and Murkowski concerning an extremely serious problem in Alaska. I believe the informational letter to Senator Murkowski and its attachments are self-explanatory.

Once you have had an opportunity to review this, I will be contacting you to ask your support in stopping the State from harming not only our clients, the title insurance industry, but the thousands of Alaskans Statewide who do not have title insurance, many of whom are the original patentees.

Sincerely,

GROH, EGGERS & PRICE

Re: Federal Highway Easements in Alaska

Dear John:

Thank you for meeting with us during your visit last week in Alaska. It was a pleasure having the opportunity to meet you and we look forward to our future contact. As we discussed, we are presently embroiled in an extremely serious controversy for which we are seeking the aid of the Alaska Congressional Delegation. This letter and its enclosures will assist you in your preliminary investigation into this matter. At your earliest convenience, we would like to discuss the possibility of the introduction and passage of our proposed federal legislation with you, and the other members of the Alaska Congressional Delegation.

As you may recall from our meeting, the difficulty lies in the interpretation of a series of public land orders (PLOs) and department orders (DOs) which were issued by the Department of Interior in the late 1940's and early 1950's. Up through 1947 there existed two methods by which the Federal Government could create highway rights-of-way in Alaska. The first was a 1932 Act which was codified at 48 U.S.C. §321a through §322.1/ Pursuant to that Act the Department of Interior had the right to build and construct roadways in Alaska. Additionally, under 44 L.D. 513 the Department of Interior determined that the Federal Government had the right to establish a roadway by appropriation. That is,

---

1/ A copy of this legislation is attached and identified as Exhibit A. Also attached are the other relevant materials identified as discussed in this letter.

a combination of identifying a potential highway plus the allocation of specific funds from Congress was sufficient to reserve the right in the Federal Government to build the road.

In 1947, Congress, at the urging of the Department of Interior passed an amendment to the 1932 Act which was codified at 48 U.S.C. §321d. (Exhibit B.) Under 48 U.S.C. §321d the Department of Interior was required to place in every patent for land in Alaska taken up thereafter a reservation for a road right-of-way for the Federal Government. It is our opinion that the amendment in 1947 was designed to protect the Federal Government's interest in maintaining the right to build roads into those portions of Alaska which were being taken up by homesteaders and which were not yet subject to a 43 U.S.C. §932 section line dedication or a roadway established by appropriation under 44 L.D. 513. It also served the function of consolidating the power of the Department of Interior under the Act of 1932 by specifically requiring that the reservation be put in the patent so that settlers would be on notice.

In August of 1949, the Department of Interior under PLO 601 withdrew from all forms of appropriation certain rights-of-way for highways in Alaska. (Exhibit C.) Under PLO 601 highway widths of varying amounts were established for through, feeder and local roads. The "local" roads were never identified by name which causes particular problems.

Considerable controversy arose over the fact that PLO 601 was a withdrawal rather than the establishment of an easement or right-of-way. Consequently the Department of Interior published modifications of PLO 601 which culminated in the publication of DO 2665. (Exhibit D.) DO 2665 established easements in lieu of rights-of-way.

In the introductory language of DO 2665 the Secretary of the Interior indicated that he was publishing the order pursuant to 48 U.S.C. §321a. It is our belief that the authority cited by the Secretary deals with only the construction powers under the 1932 Act and must be viewed in the light of the 1947 Amendment which required that such easements and rights-of-way be reserved in the patents. However, it is this one "authority section" which has allowed the Alaska Supreme Court to circumvent both the Alaska and Congressional bills designed to eliminate these easements.

None of the withdrawals and easements created by PLO 601 and its successors including DO 2665 were noted in the patents of homesteaders in Alaska, although, all of the patents which were issued for lands taken up after 1947 contain the reservation required by the 1947 Act and 48 U.S.C. §321d. (Exhibit E, for example.) Further, at least in regard to local roads, there was no identification of the roads or of any record by which a homesteader or other interested individual could determine if his property was effected by such a right-of-way.

In 1959 the United States government quitclaimed its interest in the roads in Alaska to the State. The quitclaim deed does not specifically address the question of whether the Federal Government intended to pass its rights-of-way and reservations under the PLOs and DO 2665. The State of Alaska did not record its quitclaim deed until 1969 and it is impossible by referencing the quitclaim deed to determine whether any given parcel of land in Alaska was affected by the withdrawals or easements for roads.

In the mid 1960's concern over the possibility of the State taking land under the federal easements and rights-of-way surfaced and the State Legislature passed the Right-of-Way Act of 1966 (Exhibit F.) The 1966 Act states that "no agency of the state may take privately-owned property by the election or exercise of a reservation to the state acquired under the Act of June 30, 1932, ch. 320 §5, as added July 24, 1947, ch. 313, 61 Stat 418, and taking of property after the effective date of this Act by the election or exercise of a reservation to the state under that federal act is void."

The Federal Government also attempted to alleviate the unfairness of the federal reservations and easements for rights-of-way in patents issued to Alaskans between 1947 (the date of the Amendment of the 1932 Act) and 1959 (Alaska Statehood). Section 138(b) of the Federal-Aid Highway Act of 1970 states:

> Any right-of-way for roads, roadways, highways, tramways, trails, bridges and appurtenant structures reserved by section 321(d) of Title 48, United States Code (61 Stat. 418, 1949), not utilized by the United States or by the State or Territory of Alaska prior to the date of enactment hereof, shall be and hereby is vacated and relinquished by the United States to the end and intent that such reser-

> vati[illegible]n shall merge with the fee and be forever extinguished.

Unlike the State Right-of-Way Act, the federal legislation does not specifically indicate that it includes all reservations and easements created under the 1932 Act as Amended by the 1947 Act. However, we believe that that proposition is clear, that the 1947 Act was an Amendment to the 1932 Act which created an obligation on the part of the Federal Government to place in the patent a reservation for highway purposes. We have enclosed testimony by both Senator Stevens and State officials which clearly indicate that the State would not be taking the rights-of-way in the future. (Exhibit G.)

The State of Alaska however decided that since the PLOs state they were promulgated under the general authority of the Secretary of Interior and the DO 2665 was "apparently" promulgated under 48 U.S.C. §321a (the 1932 Act) they would attempt to take property despite both the State and Federal Acts designed to end the uncertainty and unfairness which had resulted from the creation of such easements and rights-of-way.

In a case which ultimately reached the Alaska Supreme Court entitled State v. Alaska Land Title Association, 667 P.2d 714 (Alaska 1983) (Exhibit H), the Alaska Supreme Court determined that the original withdrawals by PLO 601 culminated in the rights-of-way described in DO 2665. The Court further found that DO 2665 was published pursuant to 48 U.S.C. §321a. The Court determined that 48 U.S.C. §321a was a separate source of power for the Secretary of Interior to create easements from that identified in 48 U.S.C. §321d. That is, the court refused to recognize that the 1947 Act's purpose was to amend the 1932 Act to require that any easement created by the Secretary of Interior under the 1932 Act be placed on the patent.

The court went further to find that the Right-of-Way Act of 1966 passed by the Alaska Legislature applied only to the 1947 Act. This is in contradiction to the clear language of the 1966 Act. As noted earlier the Federal-Aid Highway Act of 1970 §138(b) can be on its face interpreted as applying only to the 1947 Act. Therefore, since the Alaska Supreme Court had already interpreted the 1947 Act as being separate from the 1932 Act the Federal-Aid Highway Legislation was ineffective.

It is interesting to note that the court did allow the one homeowner who is not protected by title insurance to prevail. In

that instance the court found that if the homesteader had entered the property prior to the date of the promulgation of PLO 601 (August 10, 1949) then PLO 601 would not be effective against him. The State has challenged this proposition and believes that a homesteader would not prevail against PLO 601 until the date he received his final certificate, usually significantly later in time from entry. There are currently two cases pending before the Alaska Supreme Court which will address this issue.

The State of Alaska has taken the position that it inherited the Federal Government's rights to the easements and rights-of-way under the PLOs pursuant to the quitclaim deed of 1959. They are further taking the position that even if a road had not been constructed at the time of the PLOs or had been subsequently moved, the State has the right to take the property without payment. The greatest difficulty with defending against this form of arbitrary action is that the PLOs and DOs do not specifically identify where a road is located on an entryman's property.

Additionally, the average landowner has no warning of the existence of a road. Since a significant number of individual homeowners do not have title insurance on their property, they are completely unprotected against the actions of the State. The State has further shown itself to be callous to the rights of such landowners by simply taking their land even in cases where their property would not be subject to the PLO due to entry prior to the effective date of PLO 601. Also, because the State does this on an as needed basis, there is no opportunity for homeowners to be appraised of the problem in advance. Only at the time the State finally determines that it will expand the highway does the homeowner learn that his property is to be taken and even then the only outcry is among a few owners along the proposed road expansion. Thus, the problem goes on without the property owners in Alaska having an opportunity to face the issue all at once.

The problem also extends to title insurance companies. Although contrary to prior decisions in other jurisdictions and the language of Alaska statutes, the Alaska Supreme Court has determined that publication of PLOs in the Federal Register, although not recorded in the recording district, and not describing specific parcels of land are to be considered "public records" for the purposes of determining the meaning of such language in title insurance policies. Title insurance companies have suddenly found themselves to be exposed to a tremendous liability without having initially included such risks in the setting of their premiums.

All sides of the issue agree that potential liability for the cost of all the property which could be seized under the PLOs is in excess of one billion dollars over a long period of time. This is a staggering amount for title insurance companies to incur without having already built the risk factor into their rate setting. Thus, there is a potential threat to the viability of the title insurance industry in Alaska to provide homeowners, businesses and banks with title insurance on an on-going basis.

It is our opinion that federal legislation can be proposed which will provide for adequate protection for Alaskan landowners. We have enclosed a working draft of language for such federal legislation based upon Congress declaring that the utilization of such easements without compensation is a violation of due process under the Fifth Amendment as applied to the State by the Fourteenth Amendment. Our research indicates such an approach would withstand judicial scrutiny. See Fitzpatrick v. Bitzer, 427 U.S. 445 (1976); Katzenbach v. Morgan, 384 U.S. 641 (1965); Ramirez v. Puerto Rico Fire Service, 715 F.2d 694 (1st Cir. 1983) Equal Employment Opportunity Commission v. Elrod, 674 F.2d 601 (7th Cir. 1982).

I want to thank you very much for your assistance in this matter and, as we noted in our meeting, it is not a problem which apparently is going to go away. Hopefully, after your office has had the chance to review the documentary materials you, Senator Stevens and Congressman Young will assist us in this endeavor. Mr. Greg Chapados is working on the problem in Senator Steven's office and I am transmitting a copy of this letter to Congressman Young.

Please let me know if you have any questions and we look forward to hearing from you in the near future.

Sincerely,

GROH, EGGERS & PRICE

SB-141

TAKING OF RIGHTS-OF-WAY WITHOUT COMPENSATION

In recent years there has been a tremendous amount of road construction by the State of Alaska to serve the needs of the State's growing population and economic development. An important part of building new roads and expanding old ones is establishing the right-of-way upon which the road can be constructed. In the Lower 48 and, to some extent in Alaska, when a state wishes to construct a road it purchases the right-of-way across private land either by direct negotiation or by condemnation. Thus, a private land owner whose property is effected by a highway is compensated for the loss of the use of his property.

This is not so for a large number of land owners in Alaska. The State of Alaska has determined that it can take rights-of-way and expand existing roads over private property without compensation to the land owners based upon some obscure federal regulations and statutes, despite the fact the Alaska State Legislature has already made one attempt to prohibit such takings.

In order to understand how the State can claim an easement or right-of-way for highway purposes across private land without paying compensation one must look at the history of road development in Alaska. Prior to 1947, there were two primary ways by which roads could be established. The first was by appropriation. Under the doctrine of appropriation, if the federal government wished to build a road, it could do so on public lands simply by expending money for the construction of the road. As a matter of custom the width of such roads was generally 33 feet either side of the center line.

Roads were also established prior to 1947 under a special federal statute (48 U.S.C. §932) which granted the right to the public to construct highways across vacant and unappropriated federal public lands. Several territorial enactments established a right-of-way along all section lines in the state four rods (66 feet) wide.

Following World War II numerous veterans found Alaska an appealing place to live and migrated to our state, These Homesteaders soon had identified parcels for entry and proceeded to lawfully obtain title to these lands. The Department of Interior which was responsible for the construction of most roads in Alaska through the Alaska Road Commission soon discovered that

its road construction could not keep up with the pace of settlement. Homesteaders would often enter the property before the Alaska Road Commission could build a road by appropriation. Once the homesteader entered the property the right to build a road by appropriation was lost since the property was no longer considered public lands.

To remedy this problem, Congress passed a law in 1947 requiring a general reservation for highway rights-of-way be placed in all patents where the homesteader entered after July 24, 1947. It was envisioned that as the Alaska road network developed in the territory, the Alaska Road Commission could then construct a road across the patented property even though it was no longer in the hands of the federal government.

Unfortunately, the 1947 law did not establish where the roads were or their width. This placed the homesteader at risk, that, at any time in the future, a road could be constructed across his property. In 1949 the Department of Interior attempted to clarify this problem by publishing Public Land Order No. 601 which established the width for various types of roads in Alaska. The Public Land Order withdrew from the public domain strips of land along all highways in Alaska. By withdrawing the strips of land the federal government actually made those portions of federal public lands unavailable for homesteading.

PLO 601 established several classifications of roads. For through roads such as the Alaska Highway, Richardson Highway, Glenn Highway, Haines Highway, and Tok Cutoff, the right-of-way was 150 feet either side of center line or 300 feet total. For feeder roads such as the Steese Highway, Elliott Highway, McKinley Park Road, Anchorage-Porter-Indian Road, etc. the rights-of-way was 100 feet either side of center line or 200 feet total. The last classification was entitled local roads and represented a withdrawal of 50 feet either side of center line or 100 feet total. However, unlike the through roads and feeder roads, local roads were not specifically identified by name.

The problem with PLO 601 was that homesteaders who entered their property after August of 1949 were often not told that their property might be effected by PLO 601.

The BLM was required, because of the withdrawal by PLO 601, to survey those withdrawals and to post them to their plats. Additionally they were required to tell a homesteader who entered the property and who claimed land under his application which was effected by the PLO 601 that his homestead could not include those lands which PLO 601 effected. The BLM did neither. The

cost and manpower involved in identifying and surveying the property effected by the Public Land Orders and posting it to the plats was beyond the physical and fiscal capability of the BLM in the late 40's and early 50's.

As a result of local BLM protest to Washington the Department of Interior recognized the difficulties inherent in the withdrawals under PLO 601. In 1951 therefore they published PLO 757 which ended the withdrawals as to local and feeder roads and simultaneously published Department Order 2665 which converted those withdrawals to easements. Therefore, a homesteader who entered the property after D. O. 2665 could claim up to the center line of a local or feeder road but would take subject to an easement in favor of the federal government. But, as had happened when PLO 601 was in effect, many homesteaders were not informed of the full nature of the federal government's interest in their property. Some homesteaders had the existence of the local or feeder road easement noted in their prepatented documents but many did not. The easement was never noted in the patent that was issued to them.

The last difficulty associated with these rights-of-way was that the withdrawal that had remained in effect as to through roads. Congress in the late 1950's decided to sell the withdrawn land to the adjoining land owners and convert the remaining through road withdrawals to easements. The Department of Interior published Public Land Order 1613 which converted the withdrawals to easements and the underlying fee was to be sold to the then current adjoining land owner.

The Department of Interior did not immediately institute the program because of Statehood in 1959. During the transition phase much of the federal responsibility for highways and highway rights-of-way passed to the State of Alaska. The State claims its interest to the rights-of-way pursuant to a quitclaim deed issued by the Federal Government in 1959. The State did not bother to record the quitclaim deed until 1969. Thus, there was no document of record in a recording district by which the State claimed any title. The United States government had also never placed the easements of record in the territorial commissioner's office (the predecessor to recorders office).

In the mid 1960's the Bureau of Land Management once again rediscovered its obligations under PLO 1613 to convey the land to the adjoining land owner. It sent out to many of the adjoining land owners notices that they had the right to purchase the underlying fee to the highway along their property. Some of the adjoining land owners paid the purchase price. However, because

of the general freeze on the conveyancing of federal lands in Alaska the federal government failed to issue patents to those individuals.

In the last two years the BLM has once again discovered its obligations under PLO 1613 and have now made the property available to the adjoining land owners, but at today's prices. Further, where the 1965 adjoining land owner had filed an application to purchase and paid his purchase price in 1965, the BLM will now issue the patent to him and not the current adjacent land owner. This causes a great concern among current land owners who believed that they owned the property in front of their homes and businesses. It is conceivable that not only will they have an interloper between themselves and the highway but perhaps even a loss of access to their property.

In 1966, the Alaska legislature became aware that the State was building certain roads along these federally created highway rights-of-way without paying compensation. The only land owners which were effected by this unfair taking were those who entered the property after July of 1947 and before statehood. All other Alaskans were entitled to compensation if such a taking occurred on their property.

Representative Hillstrand bought the issue before the Alaska legislature and they virtually unanimously agreed that such a taking was unfair and unjust to the land owners. The legislature in 1966 therefore passed the Right-of-Way Act of 1966 which barred the state from taking any further land under the grants by the federal government. Between 1966 and 1970 the State therefore paid citizens in Alaska for highway construction and expansion on their lands. Indeed, in 1970 the commissioner for the Department of Transportation testified before the United States Congress that the State had paid several million dollars to land owners in compensation for the federal rights-of-way which had been created in the 1940's and 50's.

In the early 1970's however the problem re-emerged. The rapid increase in the population of Alaska and development of its economy required the State to build additional roads and to expand existing roads to accommodate the growth. In the mid 1970's the State once again began to take property under the 1947 Act. When confronted with the 1966 Act which barred the State from taking property without compensation, the State came up with a legal theory circumventing the Act. In the late 1970's and early 1980's several cases went to the Alaska Supreme Court concerning whether the State had a highway right-of-way across private land which it could take without compensation. In each

of those cases the trial court after having heard the evidence and arguments by the State and land owners ruled in favor of the land owners. In each case the Alaska Supreme Court reversed.

The Alaska Supreme Court's reversal rests on two weak premises. First, that the Alaska legislature in 1966 intended only to end those easements under the 1947 act. The Court's second premise was that the 1947 Act was an independent statute and did not modify the prior act authorizing the Secretary of Interior to build roads in Alaska. The Court found that that prior legislation which authorized the Secretary of Interior to build highways in Alaska permitted him to also create easements independent of the fact that Congress in 1947 modified the law to require that those easements be placed in the patent. Since Department Order 2665 states that it is promulgated under the Department of Interior's responsibility to construct roads in Alaska Department Order 2665 survives the 1966 Act and is not affected by it.

The position of the Alaska Supreme Court seems incredible. It is difficult to believe that in 1966 the Alaska Legislature was only doing away with the right of the State to take an easement under the 1947 Act, which was at least identified to the land owner in his patent, and not prohibit the taking of a concurrent easement which was not identified in the land owners patent. Indeed the premise of the Alaska Supreme Court is refuted by the BLM's own memorandum discussing these rights-of-way.

The most burdensome aspect of the highway right-of-way problem lies in the fact that the federal government mishandled the implementation of the programs. The only notice was published in the Federal Register. The Federal Register is a relatively obscure document to most people. Indeed in the late 1940's and 1950's the existence of the Federal Register, let alone the potential impact on their lives was not realized by most people. The rights-of-way were not placed of record against specific parcels and in cases where the statute or land order required that a map be made of the highway and placed of record with the BLM that was often not done. Further, over the years the State of Alaska in upgrading and improving highways has moved the location of the highway. Now it is difficult to know exactly where the highway was in the 1950's to determine how much property could be taken from the land owner without compensation.

Recently the State has aggravated the problem by permitting other activities to take place on the rights-of-way such as bike paths, horse trails, and utility lines but forced the entity

constructing this nonhighway use to place it on the far edge of the easement thus long before the road might have to actually be expanded, if at all, the easement is being utilized and the homeowner suffers from the loss of trees, shrubs, and use of his land as well as any improvements thereon.

It is this combination of factors which makes the taking by the State of Alaska unfair and inequitable. Lack of adequate notice to the original patentee, lack of notice contained in the patent, lack of notice to the general public except as published in the Federal Register, no recording of the easements in the recording district of the territory or State of Alaska, failure of the State of Alaska to record its quitclaim deed until 1969, and the belief that the 1966 Act by the Legislature ended once and for all the controversy, all contribute to make this taking without compensation extremely unfair.

It is clear that the legislative relief is required to close the loopholes created by the Alaska Supreme Court in the 1966 Act. It was unjust and inequitable then and it is unjust and inequitable now.

FEDERAL ACT OF 1947

[CHAPTER 313]

AN ACT

July 24, 1947
[H. R. 1574]
[Public Law 220]

To amend the Act entitled "An Act providing for the transfer of the duties authorized and authority conferred by law upon the board of road commissioners in the Territory of Alaska to the Department of the Interior, and for other purposes", approved June 30, 1932.

Alaska.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the act entitled "An Act providing for the transfer of the duties authorized and authority conferred by law upon the board of road commissioners in the Territory of Alaska to the Department of the Interior, and for other purposes", approved June 30, 1932 (47 Stat. 446), is hereby amended by adding at the end thereof the following new section:

48 U. S. C. §§ 321a-327.

Reservation of right-of-way for roads, etc.

"SEC. 5. In all patents for lands hereafter taken up, entered, or located in the Territory of Alaska, and in all deeds by the United States hereafter conveying any lands to which it may have reacquired title in said Territory not included within the limits of any organized municipality, there shall be expressed that there is reserved, from the lands described in said patent or deed, a right-of-way thereon for roads, roadways, highways, tramways, trails, bridges, and appurtenant structures constructed or to be constructed by or under the authority of the United States or of any State created out of the Territory of Alaska. When a right-of-way reserved under the provisions of this Act is utilized by the United States or under its authority, the head of the agency in charge of such utilization is authorized to determine and make payment for the value of the crops thereon if not harvested by the owner, and for the value of any improvements, or for the cost of removing them to another site, if less than their value."

Payment for value of crops, etc.

Approved July 24, 1947.

FEDERAL AID HIGHWAY ACT - 1970

ALASKAN ASSISTANCE

Sec. 138. (a) Subsection (b) of section 7 of the Federal Aid Highway Act of 1966 is amended to read as follows:

"(b) There is hereby authorized to be appropriated for construction of Federal-aid highways of the State of Alaska, out of the Highway Trust Fund and in addition to funds otherwise made available to the State of Alaska under title 23, United States Code, $20,-

43. 23 U.S.C.A. § 307(b). 44. 23 U.S.C.A. § 506.

000,000 for each of the fiscal years ending June 30, 1972 and June 30, 1973."

(b) Any right-of-way for roads, roadways, highways, tramways, trails, bridges, and appurtenant structures reserved by section 321 (d) of title 48, United States Code (61 Stat. 418, 1947), not utilized by the United States or by the State or territory of Alaska prior to the date of enactment hereof, shall be and hereby is vacated and relinquished by the United States to the end and intent that such reservation shall merge with the fee and be forever extinguished.

FEDERAL ACTS OF 1947 & 1970

STATE of Alaska,
Appellant/Cross-Appellee,

v.

ALASKA LAND TITLE ASSOCIATION; Security Title and Trust Company of Alaska; Alaska Title Guaranty Company; Brokers Title Company; Lawyers Title Insurance Agency, Inc.; Safeco Title Agency, Inc.; Fairbanks Title Agency; Valley Title and Escrow Company; First American Title Insurance Company; Transamerica Title Insurance Company; Hansen Associates, an Alaska Limited Partnership; Richard L. Boysen; and Jack White Company, Appellees/Cross-Appellants,

and

Theodore M. Pease, Jr., and Claire V. Pease, Appellees.

TRANSAMERICA TITLE INSURANCE COMPANY, Appellant,

v.

Theodore M. PEASE, Jr., and Claire V. Pease, Appellees.

Nos. 5407, 5408.

Supreme Court of Alaska.

May 27, 1983.

Appellees and Cross-Appellants Petition for Rehearing Denied July 8, 1983.

Appellants and Cross-Appellees Petition for Rehearing Granted July 8, 1983.

As Amended July 8, 1983.

Action was brought for declaratory judgment by association representing various title insurance companies, individual title insurance companies, and several landowners against State, municipality, and others. The Superior Court, Third Judicial District, Anchorage, Victor D. Carlson, J., entered judgment against State and title insurance company, and appeal was taken. The Supreme Court, Matthews, J., held that: (1) trial court erred in declaring that State could not take or utilize any portion of property owner's land for local road which was in excess of 33 foot easement; (2) trial court erred in declaring that neither State nor municipality could take any portion of landowner's property for through road which was in excess of easement widths specified in their respective patents without just compensation; and (3) publication in Federal Register imparted constructive notice and served to preclude subsequent innocent purchaser status.

Affirmed in part, reversed in part, and remanded.

Rabinowitz, C.J., dissented in part and filed opinion.

1. Public Lands ⇐135(1)

Right-of-Way Act of 1966, which precludes State from taking privately owned property by election or exercise of reservation to State and that Act shall not be construed to divest State of any right-of-way or other interest in real property which was taken by State, before effective date of Act, by election or exercise of its right to take property through a reservation, was not applicable to State's claim of 50 foot road easement along south boundary of landowner's property, in that easement in question was established by departmental order under authority of statute to which Right-Of-Way Act was inapplicable. 48 U.S.C. (1958 Ed.) §§ 321a, 321d.

2. Public Lands ⇐135(1)

Staking requirement of subsection of department of interior order providing that reservation and rights of way or easements will attach as to all new construction involving public roads in Alaska when survey stakes have been set on ground and notices have been posted at appropriate points along route of new construction specifying type and width of roads was not applicable to road affecting landowner's property, in that road was an existing road when order was promulgated, while subsection by its express terms only applies to new construction.

3. Public Lands ⇐64

Before highway may be created, there must be either some positive act on part of appropriate public authorities of state, clearly manifesting an intention to accept a grant, or there must be public user for such a period of time and under such conditions as to prove that the grant has been accepted.

4. Public Lands ⇐135(1)

Staking requirement of department of interior order was inapplicable to certain highway, in that highway was in existence by time of homestead entry of landowners' predecessor. 48 U.S.C. (1958 Ed.) § 321d.

5. Public Lands ⇐135(1)

Trial court erred in declaring that neither State nor municipality could take any portion of landowner's property for through road which was in excess of easement which was specified in their respective patents without just compensation.

6. Public Lands ⇐135(1)

Trial court properly determined that certain landowners were entitled to declaration against State and municipality that neither State nor municipality could take any portion of their properties for through road which was in excess of easement which was specified in their respective patents without just compensation, where landowner's property was entered in 1945, so that it was not hereafter entered for purposes of statute under which mandatory reservation was limited to patents for land hereafter taken up, or located in territory of Alaska. Pickett Act, §§ 1, 2, 43 U.S.C. (1970 Ed.) §§ 141, 142; 48 U.S.C. (1958 Ed.) § 321d.

7. Insurance ⇐426.1

Title insurance company was liable to property owners under policy for value of 17 foot strip taken pursuant to interior department order, in that publication of public land order in Federal Register imparted constructive notice of order as to land it affected.

8. Public Lands ⇐138

Public land orders, which appeared in Federal Register, imparted constructive notice of conflicting deed or encumbrance, thereby preventing property owner from claiming innocent purchaser status.

9. Estoppel ⇐62.2(2)

Because publication of land orders in Federal Register imparted constructive notice of easements which they created, that notice made reliance unreasonable, and thus State was not estopped from claiming any easements under orders here involved.

10. Public Lands ⇐135(1)

By operation of law, land conveyed by the United States is taken subject to previously established rights of way where instruments of conveyance are silent as to the existence of such rights of way.

11. Public Lands ⇐135(1)

No suit to vacate or annul a patent in order to establish a previously existing right-of-way is necessary because patent contains an implied bylaw condition that it is subject to such a right-of-way, and thus statute of limitations expressed by statute providing that suits by the United States to vacate and annul any patent shall only be brought within six years after the date of the issuance of such patents did not apply. 43 U.S.C.A. § 1166.

Jack McGee, Asst. Atty. Gen., Wilson Condon, Atty. Gen., Juneau, for appellant/cross-appellee.

David A. Devine and Michael W. Price, Groh, Eggers, Robinson, Price & Johnson, Anchorage, for appellees/cross-appellants.

Before RABINOWITZ, C.J., and BURKE, MATTHEWS and COMPTON, JJ.

OPINION

MATTHEWS, Justice.

This is an action for a declaratory judgment brought by an association representing various title insurance companies, individual title insurance companies, and several landowners against the State of Alaska, the Municipality of Anchorage, and Theo-

dore and Clair Pease. Nine claims for relief were presented.

The first claim sought a determination that a title insurance policy issued by Transamerica Title Insurance Company to the Peases excluded from coverage any rights-of-way created pursuant to certain Interior Department Orders, namely, Public Land Orders 601, 757, 1613, and Departmental Order 2665.

The second claim for relief sought a declaration that claimed easements for "local roads" as defined in DO 2665 could not be used by the State or municipal governments because of the Alaska Right of Way Act of 1966.

The third related to "feeder roads" as defined in PLO 601 and DO 2665, seeking a declaration that rights-of-way for such roads could not be utilized because of the Alaska Right of Way Act of 1966.

The fourth claim for relief concerned property owned by plaintiff Hansen Associates along the Seward Highway. It alleged that the original patentee had made a homestead entry prior to the effective date of the first order involved, PLO 601, and sought a declaration that no through road easement under PLO 601 or any of its successors could be claimed.

The fifth claim for relief referred to a quitclaim deed given on or about April 7, 1959, conveying the United States' interests in the highways in Alaska to the State. The deed was recorded October 2, 1969. This claim sought a declaration that the quitclaim deed would have no effect on bona fide purchasers for value who purchased and recorded prior to the State's recording of the quitclaim deed.

The sixth claim for relief alleged that the failure of the United States or the State to record PLOs 601, 757, and 1613 and DO 2665 in a State recording office rendered any easements that might otherwise have been created by those orders void as against subsequent innocent purchasers for value who first duly recorded their interests.

The seventh claim alleged a theory of estoppel against the State and Municipality, claiming that for twenty years they had allowed property owners to develop property on which they now claim an easement pursuant to PLOs 601, 757, and 1613 and DO 2665, that no notice of such claims had been given, and that individual property owners would be prejudiced if the State and the Municipality were now permitted to utilize such easements.

The eighth claim sought a declaration that no easement could be taken by the State or the Municipality for a local, feeder, or through road under the authority of PLOs 601, 757, and 1613 or DO 2665 because of the Right of Way Act of 1966.

The ninth claim alleged that prior to the quit-claim deed from the United States to the State of April 7, 1959, the United States had patented to private landowners property which included rights-of-way now claimed by the State. A declaration was sought that these patents were conclusive as against the State and that the patents could not be vacated or annulled because of the six year statute of limitations set forth in 43 U.S.C. § 1166.

The Peases cross-claimed against the State, alleging that the State unlawfully claimed a 50 foot road easement along the south boundary of their property whereas only a 33 foot easement was described in the patent from the United States to their predecessor-in-interest. They sought just compensation for the 17 foot difference in the approximate sum of $3,000.00 plus interest from the date of taking. The Peases also counterclaimed against Transamerica, alleging that if the State was entitled to a full 50 foot right-of-way Transamerica would be obliged under the title policy to compensate them for the value of the 17 foot strip.

Before answering, the State filed a motion for a more definite statement requesting legal descriptions of property across which the complaint alleged that the State was claiming rights-of-way. In response, the plaintiffs described the property owned by Hansen Associates along the Seward Highway, with respect to the fourth claim for relief, and property owned by plaintiff

Richard L. Boysen which also lay along the Seward Highway, with respect to the seventh claim. The State then answered the complaint, placing in controversy all the legal theories of the plaintiffs.

The State, all plaintiffs, and the Peases moved for summary judgment as to all claims. The court denied the State's motion, granted the plaintiffs' motion as to the second, third, and eighth claims, and granted the Peases' motion as to their cross-claim and counterclaim. Following entry of a memorandum of decision reflecting these actions the court entered a declaratory judgment containing four numbered paragraphs, which proceed from the abstract to the particular. They are:

1. The State of Alaska and the Municipality of Anchorage are claiming highway easements for local, feeder, and through roads in excess of easement widths specified in patents issued to Alaska property owners. Said easements are claimed by the State or the Municipality pursuant to authority derived from Public Land Orders 601, 757, 1613 and Department Order 2665. For the reasons set forth in the Memorandum of Decision dated May 7, 1980, the court hereby awards Plaintiffs a summary judgment against the State of Alaska and the Municipality of Anchorage declaring that the State and the Municipality may not take or utilize property for local, feeder, or through roads in excess of the widths set forth in the patents to the affected properties without just compensation to the owners of the affected properties unless such local, feeder, or through roads were occupied and staked by the State of Alaska or the Municipality of Anchorage prior to April 14, 1966, or were specifically designated in the patents to the affected real properties.

2. The Plaintiffs Hanson [sic] Associates and Richard L. Boysen are hereby awarded a summary judgment against the State of Alaska and the Municipality of Anchorage declaring that neither the State nor the Municipality can take any portion of their properties for the through road presently known as the Old Seward Highway which is in excess of the easement widths specified in their respective patents without just compensation.

3. The Defendants Pease are hereby awarded a summary judgment on their cross-claim against the State of Alaska declaring that the State may not take or utilize any portion of the Peases' land for the local road presently known as Rabbit Creek Road which is in excess of the 33-foot easement width specified in the patent to the Peases' property without just compensation. The Peases' property is described as Lot 191, Section 33, Township 12 North, Range 3 West, Seward Meridian, Anchorage Recording District, Third Judicial District, State of Alaska.

4. The Defendants Pease are hereby awarded a summary judgment on their counterclaim against Transamerica Title Insurance Company declaring that Transamerica is liable under its title insurance policy issued to the Peases for the taking by the State of Alaska of a 17-foot strip of land for the local road known as Rabbit Creek Road, which 17-foot strip of land was in excess of a 33-foot easement specified in the Peases' patent. However, since the State of Alaska must compensate the Peases for the taking or utilization of said additional 17-foot easement, the Peases shall collect just compensation from the State of Alaska, and upon receipt of said just compensation the Peases shall not be entitled to recover damages from Transamerica Title Insurance Company for said taking of the additional 17-foot strip of property.

The State has appealed from this judgment. The plaintiffs have cross-appealed, claiming that the superior court should have granted them judgment on their fourth, fifth, sixth, seventh, and ninth claims for relief. In addition, Transamerica Title has appealed from the judgment against it in favor of the Peases.

I

THE STATE'S APPEAL AS TO THE PEASES' PROPERTY

We turn first to the appeal of the State as it relates to the Peases' property.

The patent to the 2.5 acre Pease parcel was issued on October 4, 1955, pursuant to the Small Tract Act of 1938, 43 U.S.C. §§ 682a–682e (1938), *repealed by* Pub.L. No. 94–579, Title VII, § 702 (1976). The lot was leased to the Peases' predecessor-in-interest on May 1, 1953. The patent contains two relevant reservations. One is a blanket reservation for roads "constructed or to be constructed by or under authority of the United States or by any State created out of the Territory of Alaska, . . ." This reservation was made pursuant to 48 U.S.C. § 321d, ch. 313, 61 Stat. 418 (1947), *repealed by* Pub.L. No. 86–70, § 21(d)(7), 73 Stat. 146 (1959), which provides in part:

> In all patents for lands hereafter taken up, entered, or located in the Territory of Alaska, and in all deeds by the United States hereafter conveying any lands to which it may have reacquired title in said Territory not included within the limits of any organized municipality, there shall be expressed that there is reserved, from the lands described in said patent or deed, a right-of-way thereon for roads, roadways, highways, tramways, trails, bridges, and appurtenant structures constructed or to be constructed by or under the authority of the United States or of any State created out of the Territory of Alaska. . . .

The other relevant reservation in the patent reserves a 33 foot right-of-way for roadway purposes along the south and east boundaries of the tract. Rabbit Creek Road lies on the south boundary of the Peases' property. As this case has been presented all parties have assumed that Rabbit Creek Road was in existence as a local road at all times relevant to the various orders hereafter discussed. We make the same assumption.

In 1978 the State widened Rabbit Creek Road from 66 feet to 100 feet. The road occupied a 33 foot strip on the Peases' property before widening and a 50 foot strip after widening. The State claimed a 50 foot easement on each side of the center line of Rabbit Creek Road, citing PLOs 601 [1] and 757,[2] and DO 2665 [3] as authority for widening the road without compensating the Peases for taking the extra 17 feet.

PLO 601, effective August 10, 1949, withdrew "the public lands in Alaska lying within . . . 150 feet on each side of the center line of all . . . through roads, 100 feet on each side of the center line of all feeder roads, and 50 feet on each side of the center line of all local roads, . . . from all forms of appropriation under the public land laws, . . ." and reserved them "for highway purposes." [4]

The Secretary of the Interior promulgated PLO 757 and DO 2665 on October 19, 1951. 16 Fed.Reg. 10,749, 10,752 (1951). DO 2665 was filed first. *Id.* at 10,752. It established, among other things, easements, rather than withdrawals, of 50 feet on each

1. 14 Fed.Reg. 5048 (1949).

2. 16 Fed.Reg. 10,749 (1951).

3. 16 Fed.Reg. 10,752 (1951).

4. 14 Fed.Reg. 5048 (1949). The quoted language is from the sixth paragraph of PLO 601. The sixth paragraph in full states:

> Subject to valid existing rights and to existing surveys and withdrawals for other than highway purposes, the public lands in Alaska lying within 300 feet on each side of the center line of the Alaska Highway, 150 feet on each side of the center line of all other through roads, 100 feet on each side of the center line of all feeder roads, and 50 feet on each side of the center line of all local roads, in accordance with the following classifications, are hereby withdrawn from all forms of appropriation under the public land laws, including the mining and mineral-leasing laws, and reserved for highway purposes:
>
> Through Roads
>
> Alaska Highway, Richardson Highway, Glenn Highway, Haines Highway, Tok Cut-Off.
>
> Feeder Roads
>
> Steese Highway, Elliott Highway, McKinley Park Road, Anchorage-Potter-Indian Road, Edgerton Cut-Off, Tok Eagle Road, Ruby-Long-Poorman Road, Nome-Solomon Road, Kenai Lake-Homer Road, Fairbanks-College Road, Anchorage-Lake Spenard Road, Circle Hot Springs Road.
>
> Local Roads
>
> All roads not classified above as Through Roads or Feeder Roads, established or maintained under the jurisdiction of the Secretary of the Interior.

Id. at 5048–49 (1949).

side of the center line of each local road and of 100 feet as to each feeder road.[5] PLO 757 amended the sixth paragraph of PLO 601, *see* note 4 *supra*, increasing the withdrawal for the Seward Highway [the Anchorage-Potter-Indian Road in PLO 601] from 100 feet to 150 feet on each side of the center line. 16 Fed.Reg. 10,749, 10,750 (1951). PLO 757 repealed the general withdrawal for local and feeder roads contained in the sixth paragraph of PLO 601, thus effecting a revocation of the 601 withdrawals as to them. However, PLO 757 acknowledged that DO 2665 had already established easements as to feeder and local roads and did not purport to revoke them. The final paragraph of PLO 757 states:

> Easements having been established on the lands released by this order, such lands are not open to appropriation under the public land laws. . . .[6]

5. 16 Fed.Reg. 10,752 (1951). DO 2665 provides:

Rights-of-Way for Highways in Alaska

Section 1. *Purpose.* (a) The purpose of this order is to (1) fix the width of all public highways in Alaska established or maintained under the jurisdiction of the Secretary of the Interior and (2) prescribe a uniform procedure for the establishment of rights-of-way or easements over or across the public lands for such highways. Authority for these actions is contained in section 2 of the act of June 30, 1932 (47 Stat. 446, 48 U.S.C. 321a).

Section 2. *Width of public highways.* (a) The width of the public highways in Alaska shall be as follows:

(1) For through roads: The Alaska Highway shall extend 300 feet on each side of the center line thereof. The Richardson Highway, Glenn Highway, Haines Highway, Seward-Anchorage Highway, Anchorage-Lake Spenard Highway and Fairbanks-College Highway shall extend 150 feet on each side of the center line thereof.

(2) For feeder roads: Abbott Road (Kodiak Island), Edgerton Cutoff, Elliott Highway, Seward Peninsula Tram road, Steese Highway, Sterling Highway, Taylor Highway, Northway Junction to Airport Road, Palmer to Matanuska to Wasilla Junction Road, Palmer to Finger Lake to Wasilla Road, Glenn Highway Junction to Fishhook Junction to Wasilla to Knik Road, Slana to Nabesna Road, Kenai Junction to Kenai Road, University to Ester Road, Central to Circle Hot Springs to Portage Creek Road, Manley Hot Springs to Eureka Road, North Park Boundary to Kantishna Road, Paxson to McKinley Park Road, Sterling Landing to Ophir Road, Iditarod to Flat Road, Dillingham to Wood River Road, Ruby to Long to Poorman Road, Nome to Council Road and Nome to Bessie Road shall each extend 100 feet on each side of the center line thereof.

(3) For local roads: All public roads not classified as through roads or feeder roads shall extend 50 feet on each side of the center line thereof.

Section 3. *Establishment of rights-of-way or easements.* (a) A reservation for highway purposes covering the lands embraced in the through roads mentioned in section 2 of this order was made by Public Land Order No. 601 of August 10, 1949, as amended by Public Land Order No. 757 of October 16, 1951. That order operates as a complete segregation of the land from all forms of appropriation under the public-land laws, including the mining and the mineral leasing laws.

(b) A right-of-way or easement for highway purposes covering the lands embraced in the feeder roads and the local roads equal in extent to the width of such roads as established in section 2 of this order, is hereby established for such roads over and across the public lands.

(c) The reservation mentioned in paragraph (a) and the rights-of-way or easements mentioned in paragraph (b) will attach as to all new construction involving public roads in Alaska when the survey stakes have been set on the ground and notices have been posted at appropriate points along the route of the new construction specifying the type and width of the roads.

Section 4. *Road maps to be filed in proper Land Office.* Maps of all public roads in Alaska heretofore or hereafter constructed showing the location of the roads, together with appropriate plans and specifications, will be filed by the Alaska Road Commission in the proper Land Office at the earliest possible date for the information of the public. *Id.*

6. 16 Fed.Reg. 10,749, 10,750 (1951). The text of PLO 757 so far as it is relevant here states:

> The sixth paragraph of Public Land Order No. 601 of August 10, 1949, reserving public lands for highway purposes, commencing with the words "Subject to valid existing rights", is hereby amended to read as follows:
>
> Subject to valid existing rights and to existing surveys and withdrawals for other than highway purposes and public lands in Alaska lying within . . . 150 feet on each side of the center line of the . . . Seward-Anchorage Highway . . . are hereby withdrawn from all forms of appropriation under the public-land laws including the mining and mineral-leasing laws, and reserved for highway purposes.
>
> Easements having been established on the lands released by this order, such lands are

Thus one effect of PLO 757 and DO 2665 was to substitute easements for the withdrawals made in PLO 601 as to local and feeder roads.

The State's claim to the full 50 feet, from the center line, of Rabbit Creek Road is in all relevant respects identical to the claim that it successfully asserted in *State, Department of Highways v. Green*, 586 P.2d 595 (Alaska 1978). In *Green*, as in the Peases' claim, the patents were issued by the United States under the Small Tract Act and contained blanket roadway easements under 48 U.S.C. § 321d as well as specific 33 foot easements. The local road in question in both cases was built before DO 2665 was promulgated, and the lease as well as the patent was issued after promulgation of DO 2665. We held in *Green* that DO 2665 was issued pursuant to 48 U.S.C. § 321a, as distinct from 48 U.S.C. § 321d; that DO 2665 was applicable to patents issued under the Small Tract Act; and that the 50 foot right-of-way established by DO 2665 was effective even though only a 33 foot right-of-way was expressed in the patent. 586 P.2d at 600–03.

The superior court reasoned that *Green* was not controlling because of the provisions of the Right-of-Way Act of 1966, ch. 92 S.L.A. 1966.[7] Sections 2 and 3 contain the operative provisions of the Right-of-Way Act of 1966. Section 2 precludes the State from taking "privately owned property by the election or exercise of a reservation to the state acquired under [48 U.S.C. § 321d]," and section 3 provides that the Act shall not be construed to divest the State of "any right-of-way or other interest in real property which was taken by the state, before the effective date of this Act, by the election or exercise of its right to take property through a reservation acquired under [48 U.S.C. § 321d]." The effective date of the Right-of-Way Act of 1966 was April 14, 1966.

not open to appropriation under the public-land laws except as a part of a legal subdivision, if surveyed, or an adjacent area, if unsurveyed, and subject to the pertinent easement.

Id. at 10,749–50.

7. The Right-of-Way Act of 1966 states:

Section 1. PURPOSE. This Act is intended to alleviate the economic hardship and physical and mental distress occasioned by the taking of land, by the State of Alaska, for which no compensation is paid to the persons holding title to the land. This practice has resulted in financial difficulties and the deprivation of peace of mind regarding the security of one's possessions to many citizens of the State of Alaska, and which, if not curtailed by law, will continue to adversely affect citizens of this state. Those persons who hold title to land under a deed or patent which contains a reservation to the state by virtue of the Act of June 30, 1932, ch. 320, sec. 5, as added July 24, 1947, ch. 313, 61 Stat. 418, are subject to the hazard of having the State of Alaska take their property without compensation because all patents or deeds containing the reservation required by that federal Act reserve to the United States, or the state created out of the Territory of Alaska, a right-of-way for roads, roadways, tramways, trails, bridges, and appurtenant structures either constructed or to be constructed. Except for this reservation the State of Alaska, under the Alaska constitution and the constitution of the United States, would be required to pay just compensation for any land taken for a right-of-way. It is declared to be the purpose of this Act to place persons with land so encumbered on a basis of equality with all other property holders in the State of Alaska, thereby preventing the taking of property without payment of just compensation as provided by law, and in the manner provided by law.

Section 2. TAKING OF PROPERTY UNDER RESERVATION VOID. After the effective date of this Act, no agency of the state may take privately-owned property by the election or exercise of a reservation to the state acquired under the Act of June 30, 1932, ch. 320, sec. 5, as added July 24, 1947, ch. 313, 61 Stat. 418, and taking of property after the effective date of this Act by the election or exercise of a reservation to the state under that federal Act is void.

Section 3. PROSPECTIVE APPLICATION. This Act shall not be construed to divest the state of, or to require compensation by the state for, any right-of-way or other interest in real property which was taken by the state, before the effective date of this Act, by the election or exercise of its right to take property through a reservation acquired under the Act of June 30, 1932, ch. 320, sec. 5, as added July 24, 1947, ch. 313, 61 Stat. 418.

Section 4. SHORT TITLE. This Act may be cited as the Right-Of-Way Act of 1966.

Section 5. EFFECTIVE DATE. This Act takes effect on the day after its passage and approval or on the day it becomes law without such approval.

[1] The court erred in applying the Right-of-Way Act of 1966 to the Pease case. It is applicable only to interests taken by the State under a blanket reservation created pursuant to 48 U.S.C. § 321d. We held in *Green* that easements established by DO 2665 were established under the authority of section 321a, not section 321d.[8] *Green*, 586 P.2d at 600 n. 17. Further, we held in *State, Department of Highways v. Crosby*, 410 P.2d 724 (Alaska 1966) that § 321d did not apply at all to patents issued under the Small Tract Act. *Id.* at 728.

[2] The superior court also concluded in its Memorandum of Decision that the easement which otherwise would have been created under DO 2665 on Rabbit Creek Road did not come into being "until the right-of-way was staked by the terms of DO 2665." This statement refers to subsection 3(c) of DO 2665, which provides:

> The reservation mentioned in paragraph (a) and the rights-of-way or easements mentioned in paragraph (b) will attach as to all new construction involving public roads in Alaska when the survey stakes have been set on the ground and notices have been posted at appropriate points along the route of the new construction specifying the type and width of the roads.[9]

The superior court's conclusion that the staking requirement of section 3(c) was applicable to Rabbit Creek Road is erroneous. Section 3(c) by its express terms only applies to new construction. Rabbit Creek Road was an existing road when the order was promulgated. As to existing roads, subsection 3(b) of the order establishes a 50 foot easement in the present, rather than the future, tense and contains no call for additional action in order to fix the easement. It states:

> A right-of-way or easement for highway purposes covering the lands embraced in the . . . local roads equal in extent to the width of such roads as established in section 2 of this order, *is hereby established* for such roads over and across the public lands.

16 Fed.Reg. 10,752 (1951) (emphasis added). Subsection (3) of section 2 of DO 2665 set the width of local roads at 50 feet on each side of the center line. Thus, these two sections of DO 2665 established a 50 foot easement for Rabbit Creek Road.

8. A memorandum from the Chief Counsel of the Bureau of Land Management to the Director of the Bureau, dated February 7, 1951, explains well the extent of the authority granted to the Secretary of the Interior under § 321a. The memorandum states in part:

> Prior to the issuance of Public Land Order No. 601 . . ., nearly all public roads in Alaska were protected only by easements. Right-of-way easements were acquired under section 2477 of the Revised Statutes (43 U.S.C. sec. 932) by the construction of roads. This section granted a right-of-way for the construction of highways over public lands not reserved for public uses.
>
> Section 2 of the Act of January 27, 1905 (33 Stat. 616), incorporated with amendments into 48 U.S.C. secs. 321–323, established a Board of Road Commissioners in the then Territory of Alaska to function under the jurisdiction of the Secretary of War. This section provided:
>
> "Sec. 2. * * * The said board shall have the power, and it shall be their duty, upon their own motion or upon petition, to locate, lay out, construct, and maintain wagon roads and pack trails * * *. The said board shall prepare maps, plans, and specifications of every road or trail they may locate and lay out, * * *."
>
> Section 3 of the Act of August 24, 1912 (37 Stat. 512, 48 U.S.C. secs. 23 and 24), under which Alaska was organized as a Territory, provided that the authority of the legislature of the Territory should not extend to certain statutes of the United States including the Act of January 27, 1905, *supra*, and the several acts amendatory thereof.
>
> Section 2 of the Act of June 30, 1932 (47 Stat. 446, 48 U.S.C. sec. 321a), provides:
>
> "Sec. 2. The Secretary of the Interior shall execute or cause to be executed all laws pertaining to the construction and maintenance of roads and trails and other works in Alaska heretofore administered by said board of road commissioners under the direction of the Secretary of War; * * *."
>
> The authority of the Secretary of the Interior conferred by the above-cited acts to "locate, lay out, construct and maintain" public roads in Alaska clearly implies the right to fix the width of the roads. This width is not fixed by any statute.

9. 16 Fed.Reg. 10,752 (1951). For the full text of DO 2665, *see* note 5 *supra*.

[3] The history of the promulgation of DO 2665 also demonstrates that the staking requirement applies only to new construction, not existing roads. In territorial days road easements were created across public land under 43 U.S.C. § 932, *repealed by* Pub.L. No. 94-579, Title VII, § 706(a) (1976), a statute remarkable for its brevity, which provided:

> The right-of-way for the construction of highways over public lands, not reserved for public uses, is hereby granted.

This blanket grant had to be accepted. A common method of acceptance was the building of a road by a public authority.[10] But other methods of acceptance were also recognized. As we stated in *Hamerly v. Denton*, 359 P.2d 121 (Alaska 1961) with respect to 43 U.S.C. § 932:

> [B]efore a highway may be created, there must be either some positive act on the part of the appropriate public authorities of the state, clearly manifesting an intention to accept a grant, or there must be public user for such a period of time and under such conditions as to prove that the grant has been accepted.

Id. at 123 (footnote omitted). In *Girves v. Kenai Peninsula Borough*, 536 P.2d 1221 (Alaska 1975), we held that enactment by the territorial legislature of a law dedicating a four rod strip along all section lines for roadway purposes was a positive act of acceptance of the section 932 grant. *Id.* at 1225–26.

When acceptance of the section 932 grant occurred by construction of a road by an appropriate public authority, a question remained regarding the width of the right-of-way thereby created. It was held that the width was not confined necessarily to the traveled portion of the roadway, but that "local laws, customs and usages" would control. *City of Butte v. Mikosowitz*, 39 Mont. 350, 102 P. 593, 595–96 (1909); *see also Ball v. Stephens*, 68 Cal.App.2d 843, 158 P.2d 207, 209 (1945).

One purpose of DO 2665 was to define as a matter of local law or usage the width of roadway easements which had been created by the construction of roads and which would be created in the future by the construction of new roads. The memorandum of February 7, 1951, from the chief counsel of the Bureau of Land Management to the Bureau's director[11] makes this clear:

> Notwithstanding that section 2477 of the Revised Statutes (43 U.S.C. § 932) does not fix the width of the rights-of-way granted by it, the width when fixed by a positive act of the proper State or Territorial authorities has been held valid. *Costain v. Turner* (1949) [72 S.D. 427], 36 N.W.2d 382; *Butte v. Mikosowitz* (1909) [39 Mont. 350], 102 P. 593. In both cases, the width fixed included an area in excess of the beaten path or track. The reasons which sustain the conclusion reached in those cases support the conclusion that in the case of public highways in Alaska constructed or maintained under the jurisdiction of the Secretary of the Interior, the width of the highways may be fixed by that official.

The memo goes on to suggest the publication of an order, which was to become DO 2665, in terms which make it clear that the staking requirement only applies to new construction and not to existing roads:

> The following procedure is suggested for the establishment of highway easements of prescribed widths in Alaska:
>
> (1) The issuance of an order by the Secretary of the Interior to be published in the Federal Register fixing the width for existing roads and the width for new construction, including changes in the location of existing roads, and extensions of such roads. *In the case of new construction, the order can only be effective when the survey stakes have been set on the ground.*

(Emphasis added).

Further, the Superior Court's conclusion that the staking requirement applies to ex-

10. *See Clark v. Taylor*, 9 Alaska 298, 303 (D.Alaska 1938); *Ball v. Stephens*, 68 Cal. App.2d 843, 158 P.2d 207, 209 (1945); *Moulton v. Irish*, 67 Mont. 504, 218 P. 1053, 1054 (1923).

11. An excerpt from this memorandum is quoted at note 8 *supra*.

isting roads as well as to roads to be constructed in the future is in conflict with our holding in *Green, supra*. The local road in question there was constructed before the promulgation of DO 2665. As to the Green parcel, we held that the 50 foot right-of-way was fixed as of the promulgation of the order. *Green*, 586 P.2d at 604.

For these reasons we conclude that the State's appeal with respect to the adverse judgment on the cross-claim of the Peases is well-founded. The third paragraph of the declaratory judgment is therefore reversed. Since the first paragraph of the judgment includes the situation presented in the Pease case, it too must be reversed.

II

THE STATE'S APPEAL AS TO BOYSEN'S PROPERTY

The discussion in this section concerns the plaintiff's eighth claim for relief, which is reflected in the second and third paragraphs of the judgment. This discussion is also relevant to the second claim for relief relating to feeder roads. Because specific facts concerning the Hansen parcel require that it be treated differently, we exclude it from this discussion and focus instead on the Boysen property.

This aspect of the case involves an additional public land order that was not involved in the discussion of the Pease case. This order, PLO 1613, was promulgated April 7, 1958. 23 Fed.Reg. 2376, 2378 (1958). PLO 1613 revoked PLO 601 which, as modified by PLO 757, had withdrawn and reserved for highway purposes 150 feet on each side of the Seward Highway. *Id.* at 2376. PLO 1613 converted the 150 foot Seward Highway right-of-way to an easement of the same width.[12]

The Boysen parcel consists of some 80 acres joining the Seward Highway. The patent was issued to Boysen's predecessor on May 15, 1952, under the Homestead Act. The homestead entry was made January 2, 1951. The patent contains a blanket reservation for road rights-of-way as required by 48 U.S.C. § 321d. *See* page 718 *supra*.

Setting aside the possible effect of the section 321d reservation, the homestead entry of Boysen's predecessor in January 1951 fixes the date from which the property rights of the owners of the parcel are to be measured.[13] As of that date, PLO 601 had withdrawn 100 feet of land from each side of the center line of the Seward Highway. 14 Fed.Reg. 5048 (1949).

The superior court was apparently of the view that unless the State had fully occupied or staked this 100 feet before the effective date of the Right-of-Way Act of 1966, that act eliminated the withdrawal. We disagree.

[4] The Seward Highway was in existence by the time of the homestead entry. The superior court apparently imposed the staking requirement because of section 3 of DO 2665.[14] For the reasons we have expressed with respect to the Peases' property, the superior court's conclusion concerning the applicability of the staking require-

12. 23 Fed.Reg. 2376, 2377 (1958). PLO 1613 provides in pertinent part:

> 1. Public Land Order No. 601 of August 10, 1949, as modified by Public Land Order 757 of October 16, 1951, reserving for highway purposes the public lands of Alaska lying ... within 150 feet on each side of the center line of the ... Seward-Anchorage Highway ... is hereby revoked.
>
> ....
>
> 3. An easement for highway purposes, including appurtenant protective, scenic and service areas, over and across the lands described in paragraph 1 of this order, extending 150 feet on each side of the center line of the highways mentioned therein, is hereby established.
>
> ....
>
> 5. The easements established under paragraphs 3 and 4 of this order shall extend across both surveyed and unsurveyed public lands described in paragraphs 1 and 2 of this order for the specified distance on each side of the center line of the highways ... as those center lines are definitely located as of the date of this order.

Id. at 2376–77.

13. *See* part III *infra*.

14. Subsection (a)(1) of section 1 of DO 2665 recognizes expressly the 150 foot withdrawal for the Seward Highway expressed in PLO 757. *See* note 5 *supra*.

ment to the Seward Highway is erroneous. The Seward Highway was not new construction in 1949, when PLO 601 was promulgated, or in 1951, when DO 2665 was promulgated. It had a fixed location and the boundaries of its right-of-way were ascertainable by referring to the applicable PLO and measuring from its center line.

In addition, the 100 foot right-of-way first created by PLO 601 does not depend for its existence on the reservation placed in the patent under section 321d. PLO 601 was issued pursuant to Executive Order 9337, 8 Fed.Reg. 5516 (1943), under which the President of the United States delegated his authority to the Secretary of the Interior under 43 U.S.C. § 141, ch. 421, § 1, 36 Stat. 847 (1910), *repealed by* Pub.L. No. 94–579, Title VII, § 704(a) (1976), authorizing withdrawal of public lands in Alaska for specified public purposes.[15] As previously noted, the Right-of-Way Act of 1966 applies only to rights-of-way acquired under section 321d reservations.

[5] For the above reasons the second paragraph of the judgment as it relates to the Boysen property must be reversed. The preceding discussion also requires, as did our discussion in part I concerning the Peases' property, reversal of the first paragraph of the judgment. We do not reach the question whether a full 150 foot easement became fixed across the Boysen property by operation of the section 321d patent reservation and promulgation of PLO 757, and thus may be unaffected by the Right-of-Way Act of 1966. This question was not specifically addressed by the superior court nor is it presented in the briefs before us.

III

THE CROSS–APPEAL AS TO THE HANSEN PROPERTY

The patent for the Hansen parcel was issued to Hansen's predecessor-in-interest on June 1, 1950, under the Homestead Act. The homestead entry was made on January 23, 1945, before the promulgation of any of the land orders previously discussed, and before passage of 48 U.S.C. § [illegible]. The patent to the Hansen proper[illegible] does not contain a section 321d reservation.

The PLO 601 withdrawal was expressly subject to "valid existing rights." 14 Fed. Reg. 5048 (1949). Homestead entries have been held to give rise to valid existing rights,[16] although those rights may not in all cases take priority over intervening government acts.[17] Here, however, there is no doubt of the intention to except prior homestead entries from PLO 601. As we have noted, PLO 601 was promulgated pursuant to 43 U.S.C. § 141. 43 U.S.C. § 142 states that "there shall be excepted from the force and effect of any withdrawal made under the provisions of ... section 141 ... all lands which are, on the date of such withdrawal, embraced in any lawful homestead ... entry ...." Since entry was in 1945, and the first withdrawal occurred in 1949, Hansen's predecessor-in-interest, as an entryman, had rights superior to the withdrawals.

[6] Section 321d has no effect on the Hansen property. The mandatory reservation required by this statute was limited to "patents for lands *hereafter* taken up, entered, or located in the Territory of Alaska, ..." (emphasis added). Since the Hansen land was entered in 1945, it was not "hereafter" entered and thus was excluded from the operation of that statute. This is consistent with the absence of the section 321d reservation in the Hansen patent, and also consistent with its presence in the patents to the other two parcels of land involved in this appeal where entry occurred after July

15. The State and the plaintiffs have agreed that PLO 601 is based on Executive Order 9337 which, "in turn, rests on" 43 U.S.C. § 141. We thus have no occasion to consider whether Executive Order 9337 delegated authority to make withdrawals in addition to those authorized by 43 U.S.C. § 141.

16. *Stockley v. United States*, 260 U.S. 532, 540, 43 S.Ct. 186, 188, 67 L.Ed. 390, 394 (1923); *Korf v. Itten*, 64 Colo. 3, 169 P. 148, 150–51 (1917).

17. *Wilbur v. United States ex rel. Stuart*, 53 F.2d 717, 720 (D.C.Cir.1931).

24, 1947, the date on which section 321d was adopted.

Thus, for reasons different from those articulated by the superior court, the second paragraph of the declaratory judgment is affirmed as to the Hansen parcel.

IV

TRANSAMERICA'S LIABILITY

[7] In count I of the complaint, Transamerica sought a declaration absolving it of liability to the Peases under its title insurance policy. The superior court, following *Hahn v. Alaska Title Guaranty Co.*, 557 P.2d 143 (Alaska 1976), found Transamerica conditionally liable to the Peases for the value of the 17 foot strip arising from DO 2665. In *Hahn* we held that the publication of a public land order, there PLO 601, in the Federal Register imparted constructive notice of the order as to the land it effected. Under the terms of the title policy there involved, the title insurance company was found to be liable. *Id.* at 146. We agree that *Hahn* is squarely controlling.

Transamerica, however, contends that *Hahn* should be overruled. We have considered Transamerica's arguments in support of this position and we are not persuaded that *Hahn* is unsound in any respect. We therefore decline to overrule it. Thus, Transamerica is liable under its policy to the Peases. Paragraph 4 of the declaratory judgment so far as it relates to Transamerica's liability to the Peases is affirmed.

V

CROSS–APPEAL AS TO FIFTH, SIXTH, SEVENTH AND NINTH CLAIMS FOR RELIEF

The plaintiffs claim that the superior court should have granted summary judgment in their favor on their fifth, sixth, seventh and ninth claims for relief. The court made no ruling as to these claims. We review them in accordance with the principle that any ground may be urged on appeal to support a judgment even if it was not accepted by the court in rendering judgment. *Moore v. State*, 553 P.2d 8, 21 (Alaska 1976); *Ransom v. Haner*, 362 P.2d 282, 285 (Alaska 1961).

The fifth and sixth claims are similar because to prevail, a property owner [18] must establish status as a "subsequent innocent purchaser ... in good faith for a valuable consideration" as that term is used in AS 34.15.290. An innocent purchaser must lack "actual or constructive knowledge" of the conflicting deed or encumbrance that the purchaser seeks to avoid. *Sabo v. Horvath*, 559 P.2d 1038, 1043 (Alaska 1976). *Sabo* held that as between two grantees, a prepatent grantee's deed that was recorded before the patent was issued is a "wild deed" and does not give constructive notice to a post-patent grantee who duly records. *Id.* at 1044.

The question here is whether public land orders, which appear in the Federal Register, impart constructive notice, thus preventing the property owner from claiming innocent purchaser status. We have in part IV of this opinion re-affirmed the holding of *Hahn v. Alaska Title Guarantee Co.*, 557 P.2d 143 (Alaska 1976) that publication of a land order in the Federal Register is constructive notice of the order as that term is used in a title insurance policy. That holding is controlling here.

[8] The distinction between *Sabo* and this appeal is that *Sabo* concerns private deeds and this appeal involves a conflict between a government regulation and a patent. Regulations published in the Federal Register take on the character of law. *Farmer v. Philadelphia Electric Co.*, 329 F.2d 3, 7 (3d Cir.1964); *United States v. Messer Oil Corp.*, 391 F.Supp. 557, 561–62 (W.D.Pa.1975). All persons are presumed to know the contents of the law. *See Ferrell v. Baxter*, 484 P.2d 250, 265 (Alaska 1971). In *United States v. Messer Oil Corp.*, the district court indicated that regu-

18. In this somewhat abstract context the term "property owner" should be considered to be a property owner situated as is the plaintiff Boysen, for Hansen has prevailed on other grounds.

lations published in the Federal Register were sufficient notice to allow conviction of a criminal violation. 391 F.Supp. at 562. If Federal Register notice is sufficient for this purpose, it is sufficient notice to a landowner regarding easements that the federal government has reserved across his land. Thus, the publication of the land orders in the Federal Register imparted constructive notice and served to preclude subsequent innocent purchaser status.

In the seventh claim, plaintiffs contend that the State is estopped from claiming any easements under the orders here involved. The State responds that constructive notice defeats the estoppel claim.

[9] Estoppel requires "the assertion of a position by conduct or word, reasonable reliance thereon by another party, and resulting prejudice." *Jamison v. Consolidated Utilities, Inc.*, 576 P.2d 97, 102 (Alaska 1978) (footnote omitted). Plaintiffs claim that the State has asserted by conduct that it claims no easements by allowing the owners to develop their property inconsistently with the easements, and by not recording the land orders. They assert that reasonable reliance on that assertion has taken place. Because we have already found that publication of the land orders imparts constructive notice of the easements which they create, that notice makes plaintiffs' reliance unreasonable. Thus, the estoppel claim lacks merit.

The ninth claim of plaintiffs is based on the fact that the property owners' patents involved here did not expressly refer to any land order easements. Because of this the plaintiffs contend that the property conveyed was conveyed free from such easements. They argue further that as a result suit was required to be brought against the property owners to vacate the patents, and that the time for such a suit is, in all cases now before us, barred by the six year statute of limitations contained in 43 U.S.C. § 1166.[19]

The premise of this argument is that a patent which does not say that it is issued subject to a public easement operates to transfer the property free from the easement. We rejected this premise in *Green*. We held there that an unexpressed DO 2665 easement was effective. *Green*, 586 P.2d at 603.

Similarly, in *Girves v. Kenai Peninsula Borough*, 536 P.2d 1221 (Alaska 1975), we affirmed a trial court ruling that a right-of-way not expressed in a patent was effective:

> At the outset Girves notes that neither her "Notice of Allowance", nor her patent contained any express reservation of rights-of-way in favor of any public body. However, the absence of an express reservation of easement does not preclude the borough from showing that a right-of-way was established prior to the issuance of these documents.

Id. at 1224 (footnote omitted). We cited as authority for that statement *State v. Crawford*, 7 Ariz.App. 551, 441 P.2d 586 (1968). That case aptly states:

> [I]t is also clear from cases decided under 43 U.S.C. § 932 that a subsequent patentee takes subject to previous right-of-ways [sic] established under the grant contained in that federal statute [Citations omitted.] No contrary authority has come to our attention.... The silence of the patents does not preclude the State from showing the full extent of its right-of-way established prior to the time when the patents were issued to plaintiff's predecessors.

Id. at 590.

[10, 11] The above and other authorities[20] establish that, by operation of law,

19. 43 U.S.C. § 1166 provides:

> Suits by the United States to vacate and annul any patent shall only be brought within six years after the date of the issuance of such patents.

20. *Bird Bear v. McLean County*, 513 F.2d 190, 192–93 (8th Cir.1975); *Ball v. Stephens*, 68 Cal.App.2d 843, 158 P.2d 207, 210 (1945); *Nicolas v. Grassle*, 83 Colo. 536, 267 P. 196, 197 (1928); *Flint & P.M. Ry. v. Gordon*, 41 Mich. 420, 2 N.W. 648, 655 (1879); *Lovelace v. Hightower*, 50 N.M. 50, 168 P.2d 864, 874 (1946); *Verdier v. Port Royal R.R.*, 15 S.C. 476, 481 (1881); *Costain v. Turner County*, 72 S.D. 427,

land conveyed by the United States is taken subject to previously established rights-of-way where the instrument of conveyance is silent as to the existence of such rights-of-way. No suit to vacate or annul a patent in order to establish a previously existing right-of-way is necessary because the patent contains an implied-by-law condition that it is subject to such a right-of-way.[21] Thus the statute of limitations expressed by 43 U.S.C. § 1166 does not apply.

VI

CONCLUSION

The first paragraph of the judgment is REVERSED. The second paragraph of the judgment is AFFIRMED as to Hansen and REVERSED as to Boysen. The third paragraph of the judgment is REVERSED. The fourth paragraph of the judgment is AFFIRMED as to the Peases' claim against Transamerica. The case is REMANDED for further proceedings consistent with the foregoing.

RABINOWITZ, Chief Justice, dissenting in part.

I find that I am unable to agree with the court's conclusion that the State of Alaska or the Municipality of Anchorage is entitled to claim highway easements in excess of those reserved when the parcels in question were conveyed by patent from the federal government. Before discussing the grounds for my disagreement with the court's ruling, however, I believe that it will be useful to set forth what I consider to be the significant facts.

The principal question in this appeal is whether the state[1] must compensate three landowners for portions of their parcels taken to widen existing roads. The landowners—Theodore and Claire Pease, Richard Boysen, and a limited partnership called Hansen Associates—are the successors in interest to persons who originally acquired the parcels by patent from the federal government. The federal government expressly reserved highway easements or rights-of-way in the Pease and Boysen patents; there were no easements or rights-of-way reserved in the Hansen patent. In each case the state claims a highway easement greater than that reserved in the patent, resting its claims on various now-repealed federal directives which provided arguably that the easements claimed by the state should have been expressly reserved when the parcels were conveyed by patent.[2]

36 N.W.2d 382, 383 (1949); *Wells v. Pennington County*, 2 S.D. 1, 48 N.W. 305, 308 (1891); *Sullivan v. Condas*, 76 Utah 585, 290 P. 954, 957 (1930).

21. Indeed, when the Secretary of the Interior declared these rights-of-way, they vested in the public and there is authority that thereafter the Secretary could not revoke them. In *Walcott Township v. Skauge*, 6 N.D. 382, 71 N.W. 544 (1897), the court, in discussing 43 U.S.C. § 932, stated:

> Highways once established over the public domain under and by virtue of this act, the public at once became vested with an absolute right to the use thereof, *which could not be revoked by the general government*, and whoever thereafter took the title from the general government took it burdened with the highway so established.

Id. at 546 (emphasis added); *accord Bird Bear v. McLean County*, 513 F.2d 190, 192 (8th Cir. 1975); *Wenberg v. Gibbs Township*, 31 N.D. 46, 153 N.W. 440, 441 (1915); *Gustafson v. Gem Township*, 58 S.D. 308, 235 N.W. 712, 713 (1913). *Cf. City of Butte v. Mikosowitz*, 39 Mont. 350, 102 P. 593, 596 (1909) (grant of a roadway under 43 U.S.C. § 932 is to the public, and governmental entities have "supervision and control thereof as trustee for the public, . . ."). That the rights-of-way were established by administrative action rather than public user does not put them on a different footing. *See United States v. Rogge*, 10 Alaska 130, 152–53 (D.Alaska 1941), *aff'd* 128 F.2d 800 (9th Cir.1942).

1. Although the right of the Municipality of Anchorage to claim undisclosed easements is also at issue, I will refer only to the state's rights, for convenience's sake, as the legal issues are the same as to both the state and the municipality.

2. The Pease patent reserved a right-of-way of unspecified location and width under the authority of 48 U.S.C. § 321d, and also reserved a separate 33-foot right-of-way along the south and east boundaries of the parcel. The Peases concede that the state is entitled to the 33-foot right-of-way, and the Alaska Right-of-Way Act of 1966, ch. 92, 1966 Temporary and Special Acts and Resolutions, requires the state to

In my view, the state's reliance upon undisclosed easements, decades after the lands were patented,[3] is foreclosed by both federal and state statutes of limitations governing suits to set aside patents.[4] In addition, I think the landowners are entitled to the protection of Alaska's recording act.[5] Thus, I do not agree with the court's ruling that the state need not compensate the landowners for taking easements which were not expressly reserved in the patents.[6]

In my view, the dispositive legal issue in this appeal should be framed as follows: if the federal government mistakenly issues a patent which purports to convey clear title to lands which should have been withheld for highway easements, is there a time after which the patent may not be challenged notwithstanding the mistake? Because Congress has supplied the answer to this dispositive question in the form of a statute of limitations applicable to suits challenging the validity of patents, I think it is unnecessary to address the array of statutes, Public Land Orders, and Departmental Orders marshalled by the state in defense of the easements that it claims.

Forty-three U.S.C. § 1166 provides that "[s]uits by the United States to vacate and annul any patent shall only be brought within six years after the date of the issuance of such patents."[7] This statute of

compensate the Peases if it uses a section 321d right-of-way notwithstanding the fact that the right-of-way was expressly reserved in the patent. In addition, section 138(b) of the Federal Aid Highway Act of 1970 provides an independent basis for concluding that the state may not claim a section 321d easement. That provision states:

> Any right-of-way for roads, roadways, highways, tramways, trails, bridges, and appurtenant structures reserved by section 321(d) [sic] of title 48, United States Code (61 Stat. 418, 1947), not utilized by the United States or by the State or territory of Alaska prior to the date of enactment hereof, shall be and hereby is vacated and relinquished by the United States to the end and intent that such reservation shall merge with the fee and be forever extinguished.

Pub.L. No. 91-605, § 138(b), 1970 U.S.Code Cong. & Ad.News 2001, 2029 (uncodified). The state, however, claims yet another easement of fifty feet on the Pease parcel, which is seventeen feet greater than the easement to which the Peases agree the state is entitled. The state claims this fifty-foot easement pursuant to Public Land Orders 601 and 757 and Department Order 2665.

The Boysen patent reserved only a section 321d right-of-way; once again, the state must compensate Boysen if it uses a section 321d right-of-way. The state, however, claims a separate 150-foot easement on the Boysen parcel under the authority of Public Land Order 1613 and Department Order 2665.

As to the Hansen parcel, which is subject to no reserved highway easements or rights-of-way, the state also claims a 150-foot easement under the authority of Public Land Order 1613 and Department Order 2665.

3. The Hansen patent was issued on June 1, 1950; the Boysen patent, on May 15, 1952; the Pease patent, on October 4, 1955. The state did not claim the easements that it now seeks until the mid to late 1970's.

4. 43 U.S.C. § 1166; AS 09.10.230. I do not find it necessary to distinguish or consider the many Alaska cases dealing with the effect of various federal directives, because none of those cases have addressed the statutes of limitations issues.

5. AS 34.15.290.

6. The only federal directive upon which the state relies which was in effect when the Hansen parcel was patented is Public Land Order 601; the remaining directives were not promulgated until after the Hansen patent was issued and cannot, in my view, be applied to alter vested property interests without abridging rights secured by the federal and state constitutions. The withdrawals made by Public Land Order 601 were, however, subject to "valid existing rights," and an entryman's claim is a "valid existing right" which could not be adversely affected by Public Land Order 601. Since the Hansen parcel was entered prior to the promulgation of Public Land Order 601, that parcel is not subject to the withdrawal made by that directive.

7. Admittedly the United States is not a party to this litigation, but this observation does not answer the question of the applicability of the federal statute of limitations. The state, which acquired its interests in federally-created highway easements from the federal government by quitclaim deed, could not have acquired greater rights than its grantor had; the state's rights are merely derivative. A claim that would have been time-barred as to the United States was not revived, nor did the federal statute of limitations cease to run as to viable claims, when the United States transferred its rights to

limitations was enacted because of "the insecurity and loss of confidence of the public in the integrity and value of patent title to public lands, which had been occasioned by conflicting claims . . . which had resulted in many suits being commenced to cancel patents." *United States v. Whited & Wheless, Ltd.*, 246 U.S. 552, 562, 38 S.Ct. 367, 368, 62 L.Ed. 879, 882 (1918). The statute presupposes that the federal government might err and issue a patent to previously reserved lands. As the Supreme Court has explained, "[i]f the act were confined to valid patents it would be almost or quite without use." *United States v. Chandler-Dunbar Water Power Co.*, 209 U.S. 447, 450, 28 S.Ct. 575, 580, 52 L.Ed. 881, 887 (1908). The well-settled rule is that the running of the statute of limitations "makes the title of the patentee good as against the grantor, the United States." *United States v. Eaton Shale Co.*, 433 F.Supp. 1256, 1269 (D.Colo. 1977). If the landowners' patent titles are good as against the original grantor, the United States, then their titles are good as against the state, which acquired its interests, if any, in the patented lands in 1959 by quitclaim deed from the federal government. In my view the effect of the six-year statute of limitations is to validate a mistakenly issued patent after the limitations period has expired.[8] Thus, I would

the state. Stated differently, a time-barred claim is not revived by assigning it to someone to whom the relevant statute of limitations is not applicable. *See, e.g., Stanczyk v. Keefe*, 384 F.2d 707, 708 (7th Cir.1967) (parents could not revive time-barred claim by assigning it to minor child, against whom statute of limitations did not run); *Smith v. Copian County*, 232 Miss. 838, 100 So.2d 614, 616 (1958) (assignee's claim is barred if assignor's rights are barred).

Inherent in my conclusion that 43 U.S.C. § 1166 is applicable is the view that a judicial ruling which declares that a portion of the landowners' patented parcels must be conveyed without compensation to the state, in derogation of the patents themselves, is the functional equivalent of a ruling that portions of the patents be "vacated" or "annulled."

8. *See United States v. Winona & St. Peter R.R. Co.*, 165 U.S. 463, 17 S.Ct. 368, 41 L.Ed. 789 (1897); *United States v. Chandler-Dunbar Water Power Co.*, 209 U.S. 447, 28 S.Ct. 579, 52 L.Ed. 881 (1908). In *Winona* the Court explained:

> Congress evidently recognized the fact that notwithstanding any error in certification or patent there might be rights which equitably deserved protection, and that it would not be fitting for the government to insist upon the letter of the law in disregard of such equitable rights. In the first place, it has distinctly recognized the fact that when there are no adverse individual rights, and only the claims of the government and of the present holder of the title to be considered, it is fitting that a time should come when no mere errors or irregularities on the part of the officers of the land department should be open for consideration. In other words, it has recognized that, as against itself in respect to these land transactions, it is right that there should be a statute of limitations; that when its proper officers, acting in the ordinary course of their duties, have conveyed away lands which belonged to the government, *such conveyance should, after the lapse of a prescribed time, be conclusive against the government, and this notwithstanding any errors, irregularities, or improper action of its officers therein.*

165 U.S. at 475–76, 17 S.Ct. at 370–71, 41 L.Ed. at 795 (emphasis added).

Indeed, so strong is the federal policy of ensuring that federal patents convey unassailable title that the validity of even fraudulently-procured patents may not be challenged after the six-year statute of limitations has run. *See, e.g., United States v. Whited & Wheless, Ltd.*, 246 U.S. 552, 38 S.Ct. 367, 62 L.Ed. 879 (1918). A patentee who procures a patent by fraud has good title after the six-year period has expired, although the statute of limitations does not begin to run until the fraud is discovered. *Exploration Co. v. United States*, 247 U.S. 435, 38 S.Ct. 571, 62 L.Ed. 1200 (1918).

In addition, the federal bona fide purchaser doctrine provides that the validity of an erroneously granted patent may not be challenged once the original patentee conveys the parcel to a bona fide purchaser. *See, e.g., United States v. California & Oregon Land Co.*, 148 U.S. 31, 40–41, 13 S.Ct. 458, 461–462, 37 L.Ed. 354, 359–60 (1893); *Colorado Coal & Iron Co. v. United States*, 123 U.S. 307, 313, 8 S.Ct. 131, 133, 31 L.Ed. 182, 185 (1887). Bona fide purchase from a patentee is a perfect defense to a suit to set aside a patent. *See, e.g., Wright-Blodgett Co. v. United States*, 236 U.S. 397, 35 S.Ct. 339, 59 L.Ed. 637 (1915), which involved a patent obtained by fraud:

> [T]he respect due a patent, the presumption that all the preceding steps required by the law had been observed before its issue, and the immense importance of stability of titles dependent upon these instruments, demand that suit to cancel them should be sustained only by proof which produces conviction. . . . And, *despite satisfactory proof of fraud in*

hold that the federal statute of limitations, 43 U.S.C. § 1166, bars the state's claim to undisclosed easements.[9]

As an independent basis for ruling that the landowners' parcels are free of the easements claimed by the state, I would hold further that the state's claims are barred by AS 09.10.230, which provides in pertinent part:

> No person may bring an action to set aside, cancel, annul, or otherwise affect a patent to lands issued by this state or the United States, or to compel a person claiming or holding under a patent to convey the lands described in the patent or a portion of them to the plaintiff in the action, or to hold the lands in trust for or to the use and benefit of the plaintiff, or on account of any matter, thing, or transaction which was had, done, suffered, or transpired before the date of the patent unless commenced within 10 years from the date of the patent.[10]

This statute, which clearly evinces the legislature's intent that patents be considered conclusive evidence of the title they purport to convey after ten years from the date of issuance, has been the law of the territory and State of Alaska for the better part of a century. In my view it is appropriate to give effect to this long-standing state policy of promoting public confidence in the stability and marketability of patent titles.[11]

obtaining the patent, as the legal title has passed, bona fide purchase for value is a perfect defense.

Id. at 403, 35 S.Ct. at 341, 59 L.Ed. at 640 (citations omitted) (emphasis added).

9. I find the authorities relied upon by the court, *see ante* n. 19, inapposite for two reasons. First, those authorities simply do not address the statute of limitations issue.

Second, many of those authorities involve situations in which, at the time the patent in question was issued, the patented lands had previously been conveyed to or reserved for some third party, such as a railroad or a state. In such situations courts have sometimes concluded that the prepatent interests prevailed over the patentees' claims. In the case at hand, however, the state is not claiming, and cannot claim, that it acquired the easements or rights-of-way prior to the issuance of the patents in question and that the patents were therefore issued in derogation of the state's rights. The claim is not that the federal government had conveyed away parts of the patented parcels to anyone prior to issuing the patents; rather, the gist of the claim is that the federal government mistakenly conveyed by patent, lands that it intended to keep for itself.

In *Cramer v. United States*, 261 U.S. 219, 67 L.Ed. 622, 43 S.Ct. 342, (1923), the Court made precisely this distinction. *Cramer* involved a suit brought by the United States to set aside a patent granted to a railroad covering lands occupied by Indians. The Court distinguished between suits brought by the government to cancel patents and revest title in itself and suits brought so that the parcels could be vested in third parties whose rights had accrued prior to patent. The Court noted that the six-year statute of limitations applies to the former kind of case, but not to the latter:

> The suit is not barred by [now 43 U.S.C. § 1166], limiting the time within which suits may be brought by the United States to annul patents.
>
> The object of that statute is to extinguish any right the *government* may have in the land which is the subject of the patent, not to foreclose claims of third parties. Here the purpose of the annulment was not to establish the right of the United States to the lands, but to remove a cloud upon the possessory rights of its wards. As stated by this court in *United States v. Winona & St. Peter R.R. Co.*, 165 U.S. 463, 475 [17 S.Ct. 368, 370], 41 L.Ed. 789, 795, ... the statute was passed in recognition of "the fact that when there are no adverse individual rights, and only the claims of the government and of the present holder of the title to be considered, it is fitting that a time should come when no mere errors or irregularities on the part of the officers of the Land Department should be open for consideration." After the lapse of the statutory period, the patent becomes conclusive against the government, but not as against claims and rights of others ....

Id. at 233-34, 43 S.Ct. at 346, 67 L.Ed. at 628 (emphasis in original). *See also United States v. Krause*, 92 F.Supp. 756, 766 (W.D.La.1950); *Capron v. Van Horn*, 258 P. 77 (Cal.1927).

10. *See Monroe v. California Yearly Meeting of Friends Church*, 564 F.2d 304, 306 n. 2 (9th Cir.1977).

11. Although the question of the applicability of AS 09.10.230 was not raised below, we have repeatedly stated that "[u]pon appeal, a correct decision of the superior court will be affirmed regardless of whether we agree with the reasons advanced." *Fireman's Fund Am. Ins. Cos. v. Gomes*, 544 P.2d 1013, 1017 n. 12 (Alaska 1978); *Carlson v. State*, 598 P.2d 969, 973 (Alaska 1979); *A & G Constr. Co. v. Reid Bros. Logging Co.*, 547 P.2d 1207, 1211 n. 1 (Alaska 1976).

Finally, I do not agree with the court's holding that Boysen and the Peases are charged with constructive notice of federal directives published in the Federal Register and thus are unable to claim bona fide purchaser status under Alaska's recording act, AS 34.15.290.

Forty-four U.S.C. § 1507 provides that persons are charged with notice of documents filed for publication in the Federal Register "except in cases where notice by publication is insufficient in law." Thus, the pertinent question is whether published notice of federal directives such as Public Land Orders is "insufficient in law" to bind Boysen and the Peases, who did not have actual knowledge of the published directives when they purchased their parcels.[12]

The answer to this question is supplied by federal law,[13] and, as the court notes, there are a number of situations in which notice in the Federal Register is sufficient to bind persons who did not know of the publication. In my view, however, this appeal involves a situation in which notice by publication is "insufficient in law" within the meaning of 44 U.S.C. § 1507.

Our task is to determine whether Congress intended that the sufficiency of published notice of federal directives affecting Alaska real property is to be tested by looking to state law[14] or by applying an independent body of federal common law designed to supplant the state's conveyancing rules.[15] Congress did not address this question when enacting the predecessor to 44 U.S.C. § 1507, but, in my view, had it done so it would not have concluded that lands whose private title began with a patent from the federal government should be subject to different conveyancing standards than neighboring parcels whose title originated elsewhere. I find it difficult to believe that that Congress could have intended to displace established conveyancing law in every state in the union and create a chaotic system in which each state is required to apply different standards to patented parcels than to parcels whose chain of title did not begin with a federal patent. In short, I think that the sufficiency of notice for purposes of 44 U.S.C. § 1507 should be determined by applying state law standards. Since the law of this state does not charge a grantee with notice of prepatent transactions and documents[16] or of instruments not recorded in the chain of title,[17] I would conclude that Boysen and the Peases did not have constructive notice of the easements claimed by the state and thus are protected by AS 34.15.290.

12. Under AS 34.15.290 Boysen and the Peases must prevail as bona fide purchasers unless they are charged with constructive notice of the existence of easements which were not recorded in their chains of title.

Our ruling in *Hahn v. Alaska Title Guaranty Co.*, 557 P.2d 143 (Alaska 1976) does not dispose of this issue because the parties in *Hahn* did not argue, and we did not consider, whether a notice published in the Federal Register might be "insufficient in law."

13. *See, e.g., Ritter v. Morton*, 513 F.2d 942, 946 (9th Cir.1975) (per curiam), *cert. denied*, 423 U.S. 947, 96 S.Ct. 362, 46 L.Ed.2d 281 (1975); *United States v. Boyd*, 458 F.2d 1252, 1254 (6th Cir.1972).

14. *See, e.g., Reconstruction Finance Corp. v. Beaver County*, 328 U.S. 204, 66 S.Ct. 992, 90 L.Ed. 1172 (1946). Congress is, of course, free to adopt state rules as federal law. *See generally* P. Bator, P. Mishkin, D. Shapiro, & H. Wechsler, Hart and Wechsler's The Federal Courts and the Federal System 470-71, 491-94 (2d ed. 1973). The classic example of such an incorporation of states' legal doctrine into federal law is the Federal Tort Claims Act, under which the liability of the United States—a federal question—is determined by applying state substantive law. *See* 28 U.S.C. § 2674; *see also, e.g., Otteson v. United States*, 622 F.2d 516 (10th Cir.1980).

15. *See, e.g., Clearfield Trust Co. v. United States*, 318 U.S. 363, 63 S.Ct. 573, 87 L.Ed. 838 (1943).

16. *See File v. State*, 593 P.2d 268, 270 (Alaska 1979) ("patent is the highest evidence of title").

17. *See Sabo v. Horvath*, 559 P.2d 1038 (Alaska 1976).

IN THE

Supreme Court of the United States

OCTOBER TERM, 1983

ALASKA LAND TITLE ASSOCIATION, SECURITY TITLE AND TRUST COMPANY OF ALASKA, ALASKA TITLE GUARANTY COMPANY, BROKERS TITLE COMPANY, LAWYERS TITLE INSURANCE AGENCY, INC., SAFECO TITLE AGENCY, INC., FAIRBANKS TITLE AGENCY, VALLEY TITLE AND ESCROW COMPANY, FIRST AMERICAN TITLE INSURANCE COMPANY, TRANSAMERICA TITLE INSURANCE COMPANY, RICHARD L. BOYSEN and JACK WHITE COMPANY,

Petitioners,

v.

STATE OF ALASKA, THEODORE M. PEASE, JR. and CLAIRE V. PEASE,

Respondents.

PETITION FOR A WRIT OF CERTIORARI TO THE SUPREME COURT OF THE STATE OF ALASKA

MICHAEL W. PRICE
550 West Seventh Avenue, Suite 1250
Anchorage, Alaska 99501
(907) 272-6474

Counsel for Petitioners

Of Counsel:

MICHAEL P. CONDON
GROH, EGGERS & PRICE
550 West Seventh Avenue, Suite 1250
Anchorage, Alaska 99501

QUESTIONS PRESENTED

The most fundamental principle of real property law in the United States is found in the Fifth Amendment to the United States Constitution:

> "No person . . . shall be deprived of . . . property, without due process of law; nor shall private property be taken for public use, without just compensation."

In this case, Petitioners or their predecessors[1] received patent to lands in Alaska which were either silent as to road reservations or, for lands entered after 1947, contained only reservations for roads as authorized by the "act of July 24, 1947 (61 Stat. 418, 48 U.S.C. §321d)."

The court below however found there existed other reservations not reserved in the patents which permit the State Highway Department to take without compensation strips of land as wide as 600 feet.[2]

The Alaska Supreme Court held by interpretation of 48 U.S.C. §321, that such taking was not barred by either the United States Constitution, nor a federal or state statute[3] prohibiting further taking under 48 U.S.C. §321d, by finding a separate easement under 48 U.S.C. §321a.

The properties affected by this decision by the State's own calculation are valued at One Billion Eight Hundred Million Dollars. ($1,800,000,000.00).

Under the circumstances, it is this conflict between federal

---

[1] A number of the Petitioners are title insurance companies who, as subrogee on claims, joined this action.

[2] Assuming sixteen-foot lanes, this could result in a highway thirty lanes wide. The minimum right-of-way was one hundred feet wide.

[3] Federal-Aid Highway Act of 1970 §138(b) Pub. L. No. 91-605, 84 Stat. 1713 (1970) and Right-of-Way Act of 1966 ch 2, 92 S.L.A. 1966. Petitioners note that this Court has found the Fifth Amendment to the United States Constitution applicable to the State through the Fourteenth Amendment.

guarantees and the lower court's ruling which raises the following questions:*

1. Did Congress intend to create two separate authorities for easements under the Act of June 30, 1932, Pub. L. No. 218 §§1 and 2, (47 Stat. 446), as amended July 24, 1947, Pub. L. No. 229 §5, 61 Stat. 418 (codified as amended at 48 U.S.C. §§321a-321d), so that State and Congressional acts expressly designed to prohibit further taking of property without compensation were inapplicable?

2. Whether the statute of limitation provision of 43 U.S.C. §1166 is applicable to bar the State of Alaska from taking easements or reservations beyond those provided in the actual patents?

3. Whether Congress intended the limitation unless otherwise "insufficient in law" contained in the Federal Register Act, 44 U.S.C. §1507 to apply to preclude documents published in the Federal Register from being constructive notice to real property transactions absent appropriate recording under the state recording statute?

* In the Alaska Supreme Court the case included an additional Plaintiff, Hansen Associates, an Alaska limited partnership. Hansen Associates not appealing the decision of the Court below.

STATE OF ALASKA, THEODORE M. PEASE, JR. and CLAIRE V. PEASE,

Respondents.

PETITION FOR A WRIT OF CERTIORARI TO THE SUPREME COURT OF THE STATE OF ALASKA

Petitioners respectfully pray that a Writ of Certiorari issue to review the judgment and opinion of the Supreme Court of the State of Alaska entered in this proceeding.

OPINIONS BELOW

The Memorandum of Decision of the State trial court, entered on May 7, 1980 and the judgment entered on May 27,

1980, are unreported. The opinion of the Alaska Supreme Court (and dissent), affirming in part and reversing in part, is published at 667 P.2d 714 (Alaska 1983). Petitions for rehearing were filed by both the Petitioners and Respondents. The Alaska Supreme Court denied the Petition of the Petitioners and granted the petition of the Respondent State of Alaska in an order issued July 8, 1983. The order of the court issued in response to the Petition for Rehearing has not yet been published in the official report. All of the unreported opinions and orders are reproduced in the Appendix A-1 to A-3.

JURISDICTION

The opinion of the Alaska Supreme Court was entered on May 27, 1983. Timely Petitions for Rehearing were filed by both parties. The Alaska Supreme Court denied the petitioners' Petition for Rehearing and granted Respondent's Petition for Rehearing and an Order issued on July 8, 1983 modified its opinion. This Court's jurisdiction is invoked under 28 U.S.C. §1257(3).

U.S. Const. amend. V

U.S. Const. amend. XIV §1

B. Federal Statutory Provisions

43 U.S.C. §932 repealed by Pub. L. No. 94-579, Title VII §706(a), 90 Stat. 2793 (1976)

43 U.S.C. §1166 (1976)

44 U.S.C. §1507 (1976)

The Act of January 27, 1905, Pub. L. No. 26 §2, 33 Stat. 616 (codified at 48 U.S.C. §322), repealed by Pub. L. No. 86-70 §21(d) (6), 73 Stat. 146 (1959).

The Act of June 30, 1932, Pub. L. No. 218 §§1 &

2, 47 Stat. 446, as amended July 24, 1947, Pub. L. No. 229 §5, 61 Stat. 418 (codified as amended at 48 U.S.C. §§321a-321d) repealed by Pub. L. No. 86-70 §21(d) (7), 73 Stat. 146 (1959)

Federal-Aid Highway Act of 1970 §138(b), Pub. L. No. 91-605, 84 Stat. 1713 (1970)

C. Federal Regulations and Administrative Orders

43 C.F.R. §101.3 (1949)

PLO 601, 14 Fed. Reg. 5048 (1949)

PLO 757, 16 Fed. Reg. 10,749 (1951)

PLO 1613, 23 Fed. Reg. 2376 (1958)

DO 2665, 16 Fed. Reg. 10,752 (1951)

D. State Acts

Right-of-Way Act of 1966, ch. 2, 92 S.L.A. 1966

The full text of these constitutional, statutory and regulatory provisions are included in Appendix B.

STATEMENT

This case presents fundamental issues concerning conflicting claims to property between the State of Alaska and the Petitioners to land conveyed by the United States to the Petitioners or Petitioners' predecessors. Immediately following World War II, numerous individuals, particularly World War II veterans, came to Alaska to avail themselves of the offer by the federal government to establish fee simple ownership in public land. Patents were subsequently issued by the federal government to those individual entrymen who qualified. In the patents the federal government set forth exceptions and reservations to the entrymens' interest, including in most instances, reservations for highways. It is other alleged reservations not set forth in the patents which are the subject of this appeal.

Upon Alaska's entry into the Union in 1959, the federal government executed a quitclaim deed to the State of Alaska conveying all of its interest, if any, in highways and roads contained within the State. For unknown reasons, ten years passed before the quitclaim deed was recorded in 1969. In conjunc-

tion with the development boom in Alaska during the 1970s, the State of Alaska began increasingly to take private property without compensation for expansion of numerous highways throughout the State. The State's claim to take property without compensation was based upon certain land orders and a departmental order issued by the Department of Interior prior to Statehood. In particular, the State relied on Public Land Orders (PLO) 601, 757, 1613 and Departmental Order (DO) 2665[5] published between 1949 and 1958.

Patents issued prior to 1947 were silent as to any reference to withdrawals or easements. Patents after 1947 contained only the general reservation for highways as authorized by "the act of July 24, 1947 (61 Stat. 418, 48 U.S.C. §321d)," but did not identify any width for such reservations. Such were to be established at a later date by the Department of Interior. Petitioners assert the Secretary did this in 1951 by DO 2665.

When the State of Alaska began accelerating its claim in the 1970s based on these withdrawals and easements, numerous land owners found themselves deprived of significant portions of their property without compensation. These property rights which will continue to be taken without compensation are valued by the State of Alaska to be in excess of one billion eight hundred million dollars. Additionally, title insurance companies who had insured some, though not all, of the land sales found themselves burdened with claims which could jeopardize their continued solvency. It is in this context this Petition is filed.

The difficulty with the land order withdrawals and easements is that they were not noted on the patents. Thus, property owners never knew that their land might be subject

[5] Promulgated August, 1949 to withdraw land from any form of homestead entry, PLO 601 established corridors for future highways. These withdrawals extended from six hundred feet for the Alaska Highway to one hundred feet for all "local" roads. In October, 1951, PLO 757 removed the withdrawal for "local" roads, but there was simultaneously established "easements" of the same width under DO 2665. Special legislation was passed in 1956 to authorize PLO 1613 which conceded the remaining withdrawals were unnecessarily wide and created a repurchase program for adjoining landowners, subject to the easements identified in DO 2665.

to a highway easement significantly in excess of that noted in their patents or the official government surveys. Further, the PLO easements and withdrawals were never recorded, surveyed or posted to plats. In fact, it is not even possible to find a list of all "local" roads for which a PLO withdrawal or easement may be claimed. The State itself does not prepare a map showing the location of the withdrawals or easements until it has first decided to expand or improve that particular highway.

For years the State, and the federal government before it, has known that the failure to record, survey, map or note on plats these rights-of-way created serious title problems.[6] However, despite this knowledge, the State has acquiesced in the successive sale and improvement of properties which the State now claims to be subject to the highway reservations.

The decision of the Court below clouds the title to the vast majority of properties adjacent to every road (excluding subdivision roads) within the State of Alaska. The Alaska Supreme Court has taken the position that 48 U.S.C. §321a is a separate grant of authority by Congress to the Secretary of Interior to create an easement independent of the express authority granted under 48 U.S.C. §321d. By this erroneous interpretation of federal law finding an independent easement in 48 U.S.C. §321a, the court below precluded the protection afforded by both federal and State statutes designed to prevent the further exercise of highway reservations without compensation.[7] The ruling of the Court below is unquestionably contrary to the legislative history and language contained within U.S.C. §321a-321d.

Additionally, the Alaska Supreme Court failed to follow numerous decisions of the U.S. Supreme Court that the United States (in this case Alaska since it is the successor to the United States' interest) may not bring a suit to challenge a patent

[6] The State of Alaska has taken the position that despite its failure to record its quitclaim deed for ten years and despite the fact none of the land orders are recorded in the state recording districts pursuant to the State's recording statutes, it may seize the land.

[7] See footnote 3, *supra*.

more than six years after the patent has been issued and is thus barred from making a collateral attack upon the patent.

PROCEEDINGS BELOW, PARTIES AND JURISDICTIONAL MATTERS

This action was commenced in the Anchorage Superior Court in February of 1979, when the Petitioners filed a complaint for declaratory relief. Named as defendants were the State of Alaska, Theodore M. Pease and Claire V. Pease. Petitioners in their complaint identified eight claims for relief. On June 4, 1979, Petitioners filed an amended complaint for declaratory judgment which added an additional claim for relief. The Petitioners' amended complaint sets forth several state and federal claims.

Motions for summary judgment were brought by both the Petitioners and Respondent in the trial court. The court denied the Respondent State of Alaska's motion for summary judgment and granted Petitioners' motion as to its second, third and eighth claims for relief. The trial court denied the first claim for relief which reflected petitioner Transamerica's claim that it was not liable under its title insurance policy to Theodore and Claire Pease as to the additional right-of-way taken by the State. The trial court found that the prior Alaska Supreme Court case, *Hahn v. Alaska Title Guaranty Co.*, 557 P.2d 143 (Alaska 1976) was controlling. However, the trial court in its decision found that Petitioner Transamerica's argument was persuasive and asked the Alaska Supreme Court to review the *Hahn* decision.

The decision of the trial court rested predominantly on its determination that a State statute, the Alaska Right-of-Way Act of 1966, was applicable to prevent any further taking without compensation. The trial court determined that, unless the State had occupied or staked a highway in excess of the width set forth in the patents prior to April 14, 1966, then it would only be entitled to the roadway actually occupied or that set forth in the patent, whichever was greater. Any additional land needed by the State could be taken only by paying just compensation.

The State filed its points on appeal on June 24, 1980. The Petitioners filed their notice of cross-appeal on June 30, 1980. Upon appeal, the judgment was affirmed only as to one plaintiff and reversed as to all other Petitioners. One Justice filed a dissent from the three-person majority opinion.

FEDERAL QUESTIONS RAISED AND DECIDED BELOW

The decision of the Alaska Supreme Court is based on the determination of a number of controlling questions of federal law. The first question is whether there existed under 48 U.S.C. §321a power to create an easement in the Secretary of Interior on public lands in Alaska separate from that set forth in 48 U.S.C. §321d. The Alaska Supreme Court's misinterpretation of the power of the federal government under 48 U.S.C. §321a results in a taking of private property without compensation. Further, the Alaska State Legislature has attempted to insure that the State not avail itself of rights-of-way under 48 U.S.C. §321a-321d, when it passed the Right-of-Way Act of 1966. The court below determined that the Right-of-Way Act and the protections thereunder were not applicable since that act applied only to easements under 48 U.S.C. §321d and the easements asserted by the State were created under 48 U.S.C. §321a and DO 2665. The court below ignored the intent of a similar federal act to bar such takings. Federal-Aid Highway Act of 1970, §138(b) Pub. L. 91-605, 84 Stat. 1713 (1970). This interpretation of federal law, if allowed to stand, will permit the State to seize private property belonging to Petitioners without compensation.

The assertion that the Right-of-Way Act of 1966 and section 138(b) of the Federal-Aid Highway Act of 1970 were applicable to protect the Petitioners in these circumstances was raised at the trial court during summary judgment proceedings and again during the appeal to the Alaska Supreme Court. The question was specifically addressed by the Alaska Supreme Court in its decision.

Second, the Alaska Supreme Court rejected Petitioners' contention that the easements claimed by the State of Alaska

were not set forth in the patents and therefore eliminated by failure to annul the patents within the six-year statute of limitation period of 43 U.S.C. §1166. This is clearly a federal question. The Alaska Supreme Court, in addressing this issue on appeal, interpreted federal law in a manner such as to preclude the application of the statute to protect Petitioners' rights in this case. Petitioners raised these claims of a federal right in their complaint at the trial court and maintained their position throughout the appeal.

Third, Alaska Supreme Court misinterpreted 44 U.S.C. §1507 in requiring that public land orders and the departmental order, upon publication in the Federal Register, be considered constructive notice for real property transactions independent of compliance with State or territorial recording statutes. By interpreting the Federal Register Act as constituting constructive notice for purposes of determining ownership of land, Petitioners were precluded from availing themselves of the protection offered by the State recording statutes. Petitioners raised these claims in their memorandum in support of motion for summary judgment in the trial court and maintained their position throughout the appeal.

REASONS FOR GRANTING THE WRIT

(a) Impact of the Decision Below.

The decision of the Alaska Supreme Court below has a devastating impact on landholders within the State of Alaska. During the late 1940s when Alaska was still a territory, the federal government held open to individuals the opportunity to settle in the territory and obtain fee simple ownership of land therein. After properly complying with the applicable statutes and regulations concerning homesteads, these individuals were issued patents reflecting their ownership rights. These patents set forth the reservations and exceptions which the federal government stated it was maintaining.

In the approximately thirty years that have passed since this initial transfer of property from the federal government to individuals following World War II, the individual owners and their successors in interest have subdivided and developed

the property pursuant to the natural growth of the State. Thus this lawsuit greatly affects the current property rights of thousands of landowners within the State of Alaska, many of whom have developed valuable improvements within the claimed easements unaware the State claims the right to take their property.

The decision of the court below results in confusion to titles to thousands of parcels held within the State of Alaska. The State admits that the potential value of the land which it can seize without compensation to be valued in excess of $1.8 billion dollars. Already several other cases have been initiated involving issues related to this decision.

Therefore, the Petitioners believe that their Petition for Writ of Certiorari should be accepted by the Court to review the tremendous impact of the decision of the court below upon title to thousands of parcels of land within the State as well as the combined total economic loss to individuals residing in the State.

(b) Important and Novel Questions of Federal Law.

The decision below also involves important questions of federal law never interpreted by this or any other federal court. The Alaska Supreme Court in reaching its decision interpreted several federal statutes and orders regarding public lands within Alaska. In particular, the court below interpreted 48 U.S.C. §321a as creating in the Secretary of Interior a right to establish an easement on public lands separate from that of 48 U.S.C. §321d. By interpreting the federal statute in this manner, the court below voided the specific protection offered to private landholders by the Alaska Legislature by the Right-of-Way Act of 1966 and Congress by section 138(b) of the Federal-Aid Highway Act of 1970.[*]

---

[*] The intent of the Alaska Legislature is clear. The Act states in part:

Section 1. Purpose. This Act is intended to alleviate the economic hardship and physical and mental distress occasioned by the taking of land, by the State of Alaska, for which no compensation is paid to the persons holding title to the land. This practice has resulted in financial difficulties and the deprivation of peace of mind regarding the security of one's possessions to many citizens of the

were not set forth in the patents and therefore eliminated by failure to annul the patents within the six-year statute of limitation period of 43 U.S.C. §1166. This is clearly a federal question. The Alaska Supreme Court, in addressing this issue on appeal, interpreted federal law in a manner such as to preclude the application of the statute to protect Petitioners' rights in this case. Petitioners raised these claims of a federal right in their complaint at the trial court and maintained their position throughout the appeal.

Third, Alaska Supreme Court misinterpreted 44 U.S.C. §1507 in requiring that public land orders and the departmental order, upon publication in the Federal Register, be considered constructive notice for real property transactions independent of compliance with State or territorial recording statutes. By interpreting the Federal Register Act as constituting constructive notice for purposes of determining ownership of land, Petitioners were precluded from availing themselves of the protection offered by the State recording statutes. Petitioners raised these claims in their memorandum in support of motion for summary judgment in the trial court and maintained their position throughout the appeal.

REASONS FOR GRANTING THE WRIT

(a) Impact of the Decision Below.

The decision of the Alaska Supreme Court below has a devastating impact on landholders within the State of Alaska. During the late 1940s when Alaska was still a territory, the federal government held open to individuals the opportunity to settle in the territory and obtain fee simple ownership of land therein. After properly complying with the applicable statutes and regulations concerning homesteads, these individuals were issued patents reflecting their ownership rights. These patents set forth the reservations and exceptions which the federal government stated it was maintaining.

In the approximately thirty years that have passed since this initial transfer of property from the federal government to individuals following World War II, the individual owners and their successors in interest have subdivided and developed

the property pursuant to the natural growth of the State. Thus this lawsuit greatly affects the current property rights of thousands of landowners within the State of Alaska, many of whom have developed valuable improvements within the claimed easements unaware the State claims the right to take their property.

The decision of the court below results in confusion to titles to thousands of parcels held within the State of Alaska. The State admits that the potential value of the land which it can seize without compensation to be valued in excess of $1.8 billion dollars. Already several other cases have been initiated involving issues related to this decision.

Therefore, the Petitioners believe that their Petition for Writ of Certiorari should be accepted by the Court to review the tremendous impact of the decision of the court below upon title to thousands of parcels of land within the State as well as the combined total economic loss to individuals residing in the State.

(b) Important and Novel Questions of Federal Law.

The decision below also involves important questions of federal law never interpreted by this or any other federal court. The Alaska Supreme Court in reaching its decision interpreted several federal statutes and orders regarding public lands within Alaska. In particular, the court below interpreted 48 U.S.C. §321a as creating in the Secretary of Interior a right to establish an easement on public lands separate from that of 48 U.S.C. §321d. By interpreting the federal statute in this manner, the court below voided the specific protection offered to private landholders by the Alaska Legislature by the Right-of-Way Act of 1966 and Congress by section 138(b) of the Federal-Aid Highway Act of 1970.[8]

---

[8] The intent of the Alaska Legislature is clear. The Act states in part:

Section 1. Purpose. This Act is intended to alleviate the economic hardship and physical and mental distress occasioned by the taking of land, by the State of Alaska, for which no compensation is paid to the persons holding title to the land. This practice has resulted in financial difficulties and the deprivation of peace of mind regarding the security of one's possessions to many citizens of the

A second question of first impression was raised by the Alaska Supreme Court in its decision regarding the Federal Register Act, 44 U.S.C. §1507. No previous court has addressed the precise question here. In this case the question rests on whether the Federal Register is constructive notice as to landholders in Alaska or whether such notice is "insufficient in law" within the meaning of 44 U.S.C. §1507. Congress did not clearly identify under what circumstances notice under the Federal Register would be "insufficient in law." However, the interpretation of the court below that the Federal Register must be notice under State land laws has not been addressed. Therefore, this presents an important question of federal law which has applicability beyond the State of Alaska. Other states, particularly in the western United States, have large tracts of federal public land which is subject to thousands of federal public land orders and department orders of the Department of Interior and other federal agencies. Thus, applicability of a decision which indicates that Congress intended the federal register to be constructive notice under State land laws has tremendous impact upon title in other states as well as Alaska. Therefore, the Court should accept Petitioners' Writ for Certiorari to address this issue.

(Footnote Continued)

State of Alaska, and which, if not curtailed by law, will continue to adversely affect the citizens of this state. Those persons who hold title to land under a deed or patent which contains a reservation to the state by virtue of the Act of June 30, 1932, ch. 320, sec. 5, as added July 24, 1947, ch. 313, 61 Stat. 418, are subject to the hazard of having the State of Alaska take their property without compensation because all patents or deeds containing the reservation required by that federal Act reserve to the United States, or the state created out of the Territory of Alaska, a right-of-way for roads, roadways, tramways, trails, bridges, and appurtenant structures either constructed or to be constructed. Except for this reservation the State of Alaska, under the Alaska Constitution and the Constitution of the United States, would be required to pay just compensation for any land taken for a right-of-way. It is declared to be the purpose of this Act to place persons with land so encumbered on a basis of equality with all other property holders in the State of Alaska, thereby preventing the taking of property without payment of just compensation as provided by law, and in the manner provided by law.

(c) The Decision of the Court Below Conflicts with Prior Decisions of the Court

The Alaska Supreme Court determined that the six-year statute of limitations applicable to suits by the United States to vacate and annul a patent under 44 U.S.C. §1166 did not apply to prevent the State Highway Department from seizing private property in which the patents from the federal government did not reserve any of the easements or withdrawals sought to be taken by the State. The court found that despite the failure of the federal government to set forth in the patent any limitations arising under the public land orders and the departmental order identified in this case,[9] it would permit a collateral attack on the patent by reducing the amount of land transferred to the patentee by the federal government and by imposing on that patent restrictions not contained herein. This Court has long held that once the six-year statute of limitations has run the United States may not attack the validity of a patent. *United States v. Chandler—Dunbar Water Power Co.*, 209 U.S. 447 (1908); *Brook v. So. Pac. R. Co.*, 234 U.S. 669 (1914); *U.S. v. Oregon Lumber Co.*, 260 U.S. 290 (1922). Although the statute on its face is applicable to the United States it is equally binding on the State. The State has claimed to possess the interest of the United States under the respective statutes and orders pursuant to the quitclaim deed issued upon statehood in 1959. Therefore, unlike cases cited to by the majority opinion in the court below, the State of Alaska has no more than what the United States possessed in 1959. A failure to assert that interest within six years of the issuance of patent precludes the United States (and the State of Alaska, its successor in interest) from attacking the patents. Therefore, the court below has rendered a decision in conflict with prior holdings of this Court.[10]

I. NO SEPARATE AUTHORITY EXISTS TO ESTABLISH AN EASEMENT UNDER 48 U.S.C. §321a.

[9] PLO 601, PLO 757, PLO 1613, and DO 2665.

[10] A succinct discussion of this misinterpretation of 43 U.S.C §1166 appears in the dissenting opinion by Justice Rabinowitz in the court below.

A review of the legislative history of 48 U.S.C. §§321a-321d reveals, contrary to the decision of the court below, no authority for the Secretary of Interior to establish easements under 48 U.S.C. §321a. Originally, under the Act of January 27, 1905, 33 Stat. 616, Congress established a Board of Road Commissioners for Alaska. This Commission was given the power to "locate, layout, construct, and maintain wagon trails and pack trails . . ." within Alaska. Sec. 2 Act of June 27, 1905, 33 Stat. 616. In 1932, Congress transferred the power of the Commission to the Department of Interior. Sec. 1 and 2 Act of June 30, 1932, 47 Stat. 446.

However, neither of these two statutes granted the power to the Secretary of Interior or the Commission to grant easements across the land but rather only the power to construct roads. In fact, the language contained in sec. 2 Act of June 30, 1932, 47 Stat. 446, codified as 48 U.S.C. §321a, was recognized by the Department of Interior as only granting authority to the Secretary to fix the width of *public domain* roads which were "located, laid out, constructed and maintained" pursuant to sec. 2 Act of June 27, 1905, codified as 48 U.S.C. §322.

Because of the Department of Interior's concern over the pending patenting of public lands in Alaska where a 43 U.S.C. §932 easement did not apply, the Department requested in 1947 that Congress amend the Act of June 30, 1932. H.R. Rep. No. 673, 80th Cong. 1st Sess., *reprinted in* 1947 U.S. Cong. & Ad. News 1352, 1353. In the Department's letter requesting legislation, the Secretary of Interior indicated that his Department was seeking authority for the reservation of easements for the first time. Since 48 U.S.C. §321a already existed at the time that the Department of Interior made this request to amend the Act of 1932, it is evident that the Department of Interior recognized that no easement authority existed under §321a. To hold otherwise negates the 1947 Amendment."

---

[11] The Language of 48 U.S.C. §321d provides for only one easement. It states that "(i)n all patents for lands hereafter taken up, entered or located in the Territory of Alaska . . . there shall be expressed that there is reserved, from the lands . . . in such patent . . . *a right-of-way.*" (Emphasis added.)

This position is further supported by a Department of Interior memo on October 10, 1950, which in discussing PLO 601 noted that the Department of Interior discussed changing the withdrawals to easements so that rights-of-way under the Act of July 1947 would still be valid.[12] This once again indicates the Department of Interior looked to sec. 321d (the 1947 act) for its authority, not some strained interpretation of sec. 321a.

48 U.S.C. §321d requires that all lands entered after the date of the Act (June 23, 1947) have reserved in the patents an easement. The Department of Interior pursuant to this Congressional mandate began issuing patents which clearly stated that an easement was being reserved pursuant to 48 U.S.C. §321d. It is clear that the Department of Interior did not consider §321a to be authority to impose an easement, or it could have just as easily put this reservation in the patents too.

The court below held that sec. 321a easements exist not from statutory language or legislative intent, but solely from the fact that paragraph 1 of DO 2665 states that the authority for the Secretary to promulgate DO 2665 is 48 U.S.C. §321a. Petitioners do not dispute that section 321a grants the Secretary of Interior the authority over Alaska roads and thus authority to issue the departmental order.[13] Petitioners

---

(Footnote Continued)
The statute goes on to state that "(w)hen a right-of-way easement under this Act . . ." once again indicating that a single authority for creating a right-of-way existed under 48 U.S.C. §321. The Act of 1947 was an amendment to the Act of June 30, 1932 (47 Stat. 448) and therefore the language "this Act" must refer to the Act of 1932.

[12] The Department of Interior in October of 1950 revealed concern that the PLO withdrawals were insufficient to protect the rights-of-way desired by the federal government. It was proposed by Department of Interior memo that the withdrawals be changed to easements under the 1947 Act (48 U.S.C. §321d) to set forth the width of the proposed easements. This concern resulted in the publication of DO 2665 in October of 1951 establishing easements under 48 U.S.C. §321d. See Department of Interior memo October 10, 1950 at Appendix C.

[13] The Alaska Supreme Court previously authorized the taking of property without compensation based on this erroneous interpretation in *State, Department of Highways v. Green*, 586 P.2d 595 (Alaska 1978)

however assert that such authority to issue the order does not equate with a separate authority to create an easement. The unmistakable intent of the 1947 amendment, codified at 48 U.S.C. §321d, was to create, for the first time, easements."

The court below in its misinterpretation that 48 U.S.C. §321a is a separate authority for the Department of Interior to establish easements nullifies the attempt by the State of Alaska in the Right-of-Way Act of 1966 to protect private landowners from State exercise of such easements. The Right-of-Way Act of 1966 has been interpreted by the Alaska Supreme Court as applying only to easements established under 48 U.S.C. §321d. Under the terms of the Act, the State is barred from taking without compensation any additional land pursuant to a sec. 321d easement if it has not done so prior to the date of the Act. Further, by its interpretation of federal law, the court below has deprived Petitioners' rights afforded by sec. 138(b) of the Federal-Aid Highway Act of 1970.

II. THE STATUTE OF LIMITATIONS OF 43 U.S.C. §1166 BARS THE RESPONDENT FROM CHALLENGING PATENTS AFTER SIX YEARS.

The United States issued patents to Petitioners and Petitioners' predecessors in interest which contained a description of the reservations and exceptions which the United States intended to retain. The State of Alaska maintains that the various PLOs and the Departmental Order grant it a right-of-way even though not identified in the patents. Had the property at the time of patent still been encumbered by the withdrawals or easements, but patent nevertheless issued, the government would have only six years to annul the patent. *United States v. Chandler—Dunbar Water Power Co.*, 209 U.S.

" The trial court agreed with petitioners and stated that:

It should be noted that DO 2665 is issued under authority of 48 U.S.C. §321a; however, sec. 321a is only the general grant of authority by Congress to the Secretary of Interior to administer the road. In Alaska sec. 321d is the specific authority for the Secretary to reserve easements for roads and therefore, DO 2665 by implication is based on authority of sec. 321d, Pub. L. 229 ch. 313 approved July 24, 1947.

447 (1908). The withdrawals or easements could not have been deemed to have been an implied exception to the patent. *Leo Sheep Co. v. United States*, 440 U.S. 668 (1979); *Hardin v. Jordan*, 140 U.S. 371 (1891); *Stewart v. Lamm*, 132 Colo. 484, 289 P. 2d 916 (Colo. 1955).

The quitclaim deed could not, as the State asserts, pass greater rights than that the United States had to transfer. It is well established that a patent is in the nature of a quitclaim deed. *Wilson Cyprus Co. v. Del Pozo y Marcos*, 236 U.S. 635 (1915); *Sampeyreac v. United States*, 7 Pet. (U.S.) 222 (1833). Consequently, the United States passed by patent its estate *except* that which was actually reserved in the patent, i.e. the 1947 highway reservations, 48 U.S.C. §321d.

Additionally, it is clear that once a patent is issued, even if it contains a mistake, the Executive Department lacks power to set the transfer aside. The annulment must be done judicially. *West v. Standard Oil Co.*, 278 U.S. 200 (1929); *Stone v. United States*, 69 U.S. 525 (1875). In the case at bar, the United States has never sought to set aside the patents issued without the alleged reservation for the easements cited by the Respondent (48 U.S.C. §321a) and therefore those patents would still be binding on the United States. Under the 1959 quitclaim deed, the State recieved no greater right to the land than the United States had and since the patents were conclusive against the United States then they are likewise conclusive against the State of Alaska.

This court in *United States v. Whited & Wheless, Ltd.*, 246 U.S. 552 (1918) noted that the purpose of the statute of limitations contained in 43 U.S.C. §1166 was to restore, in the public, confidence in the integrity and value of patent title to public lands which had been challenged under numerous suits seeking to cancel such patents. The statute itself presupposes that the government will make an error. *United States v. Chandler—Dunbar Water Power Co., supra* at 450. Indeed,the protection afforded patents under 43 U.S.C. §1166 has been strong enough that this Court has determined that even in the cases of fraud, the patent itself may not be set aside. *United States v. Diamond Coal and Coke Co.*, 255 U.S. 323 (1921). In

United States. v. Whited & Wheless, Ltd., supra, this court has also determined that even in the cases of fraud, if the title to the property has passed to a bonafide purchaser, the government may not challenge the patent. *Wright-Blodgett Co. v. United States,* 236 U.S. 397 (1915); *United States v. California & The Oregon Land Co.,* 148 U.S. 31 (1893).

Courts have also noted that in determining what land is conveyed under a patent, the number of acres specified in the patent is very important. *Ritter v. Morton,* 513 F.2d 942 (9th Cir. 1975). Other courts have also made it clear that the boundaries of land cited in a patent, even if incorrect, would be binding on the United States and its successors. *Grainger v. United States,* 197 Ct. Cl. 1018 (1972). Even though the State claims the withdrawals from homestead entry of PLO 601 and 757 still apply, none of the patents contained any commensurate reduction in total acreage. The United States under 43 C.F.R. §101.3 (1949) was required to put on notice all persons making an entry on public land which could be affected by a right-of-way.[15] The failure to include such an easement on the entry papers or on the final patent is conclusive against the United States.

Therefore, Respondent's claim was barred by the statute of limitations contained in 43 U.S.C. §1166. The Respondent has no greater interest in the land than that held by the United States. The United States was barred from challenging the patents after six years for failure of the patents to contain easements set forth in the PLOs and the departmental order. Assuming *arguendo* that the State's position has merit, any interest which the United States had was extinguished by the

[15] The provisions of 43 C.F.R. §101.3 (1949) set forth the notations which were required to be made on entry papers and notices of allowance in 1949.

> In order that all persons making entry of public lands which are affected by rights-of-way may have actual notice thereof, the register is directed to note upon the original entry papers and upon the notice of allowance of the application . . . issued to the entrymen, a reference to such rights-of-way . . . he will place the same notation as to right-of-way upon the final entry papers so that the reservation of the right-of-way will be made in the patent when issued.

running of the statute of limitations in 43 U.S.C. §1166. The United States did, pursuant to 48 U.S.C. §321d, maintain road reservations which were subsequently relinquished by State and federal acts.

III. THE FEDERAL REGISTER ACT IS NOT CONSTRUCTIVE NOTICE AS TO PRIVATE LANDOWNERS IN THE STATE OF ALASKA

Provisions of 44 U.S.C. §1507 provide that persons will be charged with notice of documents filed for publication in the Federal Register "except in cases where notice by publication is insufficient in law." The question in this case is whether, absent actual notice, does publication in the Federal Register constitute notice insufficient in law for real property transactions. A review of the legislative history does not reveal a clear answer as to whether Congress intended the Federal Register to be constructive notice as a matter of law or whether such notice would be insufficient in law as applied to state land titles. The federal case law cited to by the majority of the court below does not contain a case in which the court addressed the question of what was "insufficient in law." There is no reason to believe that Congress intended to displace established conveyancing and recording laws in every state of the Union with a chaotic system in which landowners must be charged with constructive notice of pre-patent federal orders not noted as reservations in the patents.[16]

Therefore, the court below erred in interpreting federal cases cited for the proposition as to what constitutes constructive notice where that determination is being made as to title under state law. Acts of Congress which affect conveyancing and recording statutes of the fifty states should be considered "insufficient in law" to be constructive notice.

[16] This position was adopted by the Dissenting Opinion in the lower court.

CONCLUSION

For all of the foregoing reasons, a Writ of Certiorari should issue to review the judgment and opinion of the Alaska Supreme Court.

Respectfully submitted,

MICHAEL W. PRICE

Defendants.

No. 3AN 79-951 Civil

MEMORANDUM OF DECISION

This case is a suit for declaratory relief and the plaintiffs, the State of Alaska and the Peases have moved for summary judgment. The facts are that in 1978 the State of Alaska widened Rabbit Creek Road, a local road off the Seward Highway approximately nine miles south of Anchorage, from a road having a bed of less than 66 feet to a road having a bed of 100 feet in width. Mr. and Mrs. Pease are adjoining landowners to Rabbit Creek Road and own the underlying fee to the centerline. They seek compensation from the State of Alaska or the title insurance company which insured their title for the taking of a strip 17 feet in width from their property for the widening of Rabbit Creek Road.

The Peases acquired by warranty deed Lot 191, Section 33, T 12N, R3W, Seward Meridian, Anchorage Recording District on August 18, 1960 which parcel was separated from the public domain on October 4, 1955 by patent number 115 1722 which provides a "reservation of a right-of-way for roads . . . constructed or to be constructed by or under the authority of the United States or by any State created out of the Territory of Alaska, in accordance with the act of July 21, 1947 (61 Stat. 418, 48 U.S.C. sec. 321d)" and "This patent is subject to a right-of-way not exceeding 33 feet in width, for roadway and public utilities purposes, to be located along the south and east boundaries of said land."

There are no facts in dispute. The other parties, Mr. Boysen, Hansen Associates and Jack White Company own property which may be affected by easements for through and feeder roads. In this memorandum of decision the case concerning the Peases will be considered first, a decision reached on the ownership of the 17 foot wide strip along Rabbit Creek Road and will be used for illustrative purposes in deciding questions relating to other parcels.

The relevant history of statutes, public land orders (P.L.O.) and department orders (D.O.) affecting rights-of-way for roads like Rabbit Creek includes:

1. P.L.O. 601 dated August 10, 1949 under the authority of *Executive Order No. 9337* (43 U.S.C. §141) withdrew from entry certain lands and reserved those lands for highway rights-of-way as follows:

a. the public lands lying within 300 feet on each side of the center line of the Alaska Highway, 150 feet on each side of the center line of all other through roads, 100 feet on each side of the center line of all feeder roads, and 50 feet on each side of the center line of all local roads.

b. through roads are the Alaska Highway, Richardson Highway, Glenn Highway, Haines Highway, and Tok Cut-off.

c. feeder roads are Steese Highway, Elliott Highway, McKinley Park Road, Anchorage-Potter-

Indian Road, Edgerton Cut-off, Tok-Eagle Road, Ruby-Long-Poorman Road, Nome-Solomon Road, Kenai Lake-Homer Road, Fairbanks-College Road, Anchorage-Lake Spenard Road, Circle Hot Spring Road.

d. local roads are all roads not classified as through or feeder roads established or maintained under the jurisdiction of the Secretary of the Interior.

e. Paragraph 6 reads:

Subject to valid existing rights and to existing surveys and withdrawals for other than highway purposes, the public lands in Alaska lying within 300 feet on each side of the center line of the Alaska Highway, 150 feet on each side of the center line of all other through roads, 100 feet on each side of the center line of all feeder roads, and 50 feet on each side of the center line of all local roads, in accordance with the following classifications, are hereby withdrawn from all forms of appropriation under the public land laws, including the mining and mineral-leasing laws and reserved for highway purposes.

2. P.L.O. 757 dated October 16, 1951 provides:

The sixth paragraph of Public Land Order No. 601 of August 10, 1949, reserving public lands for highway purposes, commencing with the words "Subject to valid existing rights", is hereby amended to read as follows:

Subject to valid existing rights and to existing surveys and withdrawals for other than highway purposes, the public lands in Alaska lying within 300 feet on each side of the Alaska Highway and within 150 feet on each side of the center line of the Richardson Highway, Glenn Highway, Haines Highway, the Seward-Anchorage Highway (exclusive of that part thereof within the boundaries of the Chugach National Forest), the Anchorage-Lake Spenard Highway, and the Fairbanks-College Highway are hereby withdrawn from all forms of appropriation under the public land laws, including

the mining and mineral-leasing laws, and reserved for highway purposes.

Easements having been established on the lands released by this order, such lands are not open to appropriation under the public land laws except as a part of a legal subdivision, if surveyed, or an adjacent area, if unsurveyed, and subject to the pertinent easement.

3. D.O. 2665 dated October 16, 1951 under the authority of section 2 of the act of June 30, 1932 (47 Stat. 446, 48 U.S.C. 321a) established the width of the public highways in Alaska established or maintained under the jurisdiction of the Secretary of Interior as follows:

a. through roads: The Alaska Highway shall extend 300 feet on each side of the center line thereof. The Richardson Highway, Glenn Highway, Haines Highway, Seward-Anchorage Highway, Anchorage-Lake Spenard Highway and Fairbanks-College Highway shall extend 150 feet on each side of the center line thereof.

b. feeder roads (with an extensive listing) shall extend 100 feet on each side of the center line thereof.

c. local roads not classified as through roads or feeder roads shall extend 50 feet on each side of the center line thereof.

d. the order provided specifically:

Sec. 3. Establishment of rights-of-way or easements. (a) A reservation for highway purposes covering the lands embraced in the through roads mentioned in section 2 of this order was made by Public Land Order No. 601 of August 10, 1949, as amended by Public Land Order No. 757 of October 16, 1951. That order operates as a complete segregation of the land from all forms of appropriation under the public land laws, including the mining and mineral laws.

(b) A right-of-way or easement for highway purposes covering the lands embraced in the feeder roads and the local roads equal in extent to the width of such roads

as established in section 2 of this order, is hereby established for such roads and across the public lands.

(c) The reservation mentioned in paragraph (a) and the rights-of-way or easements mentioned in paragraph (b) will attach as to all new construction involving public roads in Alaska when the survey stakes have been set on the ground and notices have been posted at appropriate points along the route of the new construction specifying the type and width of the roads.

Sec. 4. Road maps to be filed in proper Land Office. Maps of all public roads in Alaska heretofore or hereafter constructed showing the location of the roads, together with appropriate plans and specifications, will be filed by the Alaska Road Commission in the proper Land Office at the earliest possible date for the information of the public.

It should be noted that D.O. 2665 is issued under the authority of 48 U.S.C. 321a; however, section 321a is only the general grant of authority by Congress to the Secretary for the Interior to administer the roads in Alaska. Section 321d is the specific authority for the Secretary to reserve easements for roads and, therefore, D.O. 2665 by implication is based upon the authority of 321d, Public Law 229, ch. 313 approved July 24, 1947.

4. The effect of P.L.O. 757 and D.O. 2665 was to return to the public domain and make available for entry all land within 100 feet of the center line of feeder roads and 50 feet of the center line of local roads reserving an easement for feeder and local roads of 100 feet and 50 feet on each side of the center line respectively.

5. P.L.O. 1613 dated April 7, 1958 revoked P.L.O. 601 as amended by P.L.O. 757. Therefore, the withdrawal for through roads was no longer in effect; however, an easement for through roads was created extending 150 feet on each side of the center line for through roads designated in P.L.O. 757 and section one of P.L.O. 1613.

6. On June 30, 1959 the United States conveyed by quitclaim deed its interest in highways to the State of Alaska

the mining and mineral-leasing laws, and reserved for highway purposes.

Easements having been established on the lands released by this order, such lands are not open to appropriation under the public land laws except as a part of a legal subdivision, if surveyed, or an adjacent area, if unsurveyed, and subject to the pertinent easement.

3. D.O. 2665 dated October 16, 1951 under the authority of section 2 of the act of June 30, 1932 (47 Stat. 446, 48 U.S.C. 321a) established the width of the public highways in Alaska established or maintained under the jurisdiction of the Secretary of Interior as follows:

a. through roads: The Alaska Highway shall extend 300 feet on each side of the center line thereof. The Richardson Highway, Glenn Highway, Haines Highway, Seward-Anchorage Highway, Anchorage-Lake Spenard Highway and Fairbanks-College Highway shall extend 150 feet on each side of the center line thereof.

b. feeder roads (with an extensive listing) shall extend 100 feet on each side of the center line thereof.

c. local roads not classified as through roads or feeder roads shall extend 50 feet on each side of the center line thereof.

d. the order provided specifically:

Sec. 3. Establishment of rights-of-way or easements. (a) A reservation for highway purposes covering the lands embraced in the through roads mentioned in section 2 of this order was made by Public Land Order No. 601 of August 10, 1949, as amended by Public Land Order No. 757 of October 16, 1951. That order operates as a complete segregation of the land from all forms of appropriation under the public land laws, including the mining and mineral laws.

(b) A right-of-way or easement for highway purposes covering the lands embraced in the feeder roads and the local roads equal in extent to the width of such roads

as established in section 2 of this order, is hereby established for such roads and across the public lands.

(c) The reservation mentioned in paragraph (a) and the rights-of-way or easements mentioned in paragraph (b) will attach as to all new construction involving public roads in Alaska when the survey stakes have been set on the ground and notices have been posted at appropriate points along the route of the new construction specifying the type and width of the roads.

Sec. 4. Road maps to be filed in proper Land Office. Maps of all public roads in Alaska heretofore or hereafter constructed showing the location of the roads, together with appropriate plans and specifications, will be filed by the Alaska Road Commission in the proper Land Office at the earliest possible date for the information of the public.

It should be noted that D.O. 2665 is issued under the authority of 48 U.S.C. 321a; however, section 321a is only the general grant of authority by Congress to the Secretary for the Interior to administer the roads in Alaska. Section 321d is the specific authority for the Secretary to reserve easements for roads and, therefore, D.O. 2665 by implication is based upon the authority of 321d, Public Law 229, ch. 313 approved July 24, 1947.

4. The effect of P.L.O. 757 and D.O. 2665 was to return to the public domain and make available for entry all land within 100 feet of the center line of feeder roads and 50 feet of the center line of local roads reserving an easement for feeder and local roads of 100 feet and 50 feet on each side of the center line respectively.

5. P.L.O. 1613 dated April 7, 1958 revoked P.L.O. 601 as amended by P.L.O. 757. Therefore, the withdrawal for through roads was no longer in effect; however, an easement for through roads was created extending 150 feet on each side of the center line for through roads designated in P.L.O. 757 and section one of P.L.O. 1613.

6. On June 30, 1959 the United States conveyed by quitclaim deed its interest in highways to the State of Alaska

which deed was recorded October 2, 1969.

7. Sec. 2, Ch. 92, SLA 1966, Right-of-Way Act of 1966 provides:

> Taking of Property Under Reservation Void. After the effective date of this Act [April 14,1968], no agency of the state may take privately-owned property by the election or exercise of a reservation to the state acquired under the Act of June 30, 1932, ch. 320, sec. 5, as added July 24, 1947, ch. 313, 61 Stat. 418, and taking of property after the effective date of this Act by the election or exercise of a reservation to the state under the federal Act is void.

8. Public Law 229, ch. 313, approved July 24, 1947 provides:

> The act entitled "An Act providing for the transfer of the duties authorized and authority conferred by law upon the board of road commissioners in the Territory of Alaska to the Department of the Interior, and for other purposes, approved June 30, 1932 (47 Stat. 446) [footnote: 5 U.S.C.A §§123, 485; 48 U.S.C.A. §§321a-321e, 322-327] is hereby amended by adding at the end thereof the following new section:
>
> "Sec. 5. In all patents for lands hereafter taken up, entered, or located in the Territory of Alaska, and in all deeds by the United States hereafter conveying any lands to which it may have reacquired title in said Territory not included within the limits of any organized municipality, there shall be expressed that there is reserved, from the lands described in said patent or deed, a right-of-way thereon for roads, roadways, highways, tramways, trails, bridges, appurtenant structures constructed or to be constructed by or under the authority of the United States or any State created out of the Territory of Alaska. When a right-of-way reserved under the provisions of this Act is utilized by the United States or under its authority, the head of the agency in charge of such utilization is authorized to determine and make payment for the value of the crops thereon if not harvested by the owner, and for the value of any improvements, or for the cost of removing them to another site, if less than their value."

The Alaska Supreme Court cases which directly relate to the questions in this case are: *Hahn v. Alaska Title Guaranty Co.* 557 P.2d 143 (Alaska 1976) which holds that the federal register is a public record within the meaning of the language of a title insurance policy; and *State, Dept. of Highways v. Green,* 586 P.2d 595 (Alaska 1978) which gives an exhaustive history of the subject before the court without mentioning the Alaska Right-of-Way Act of 1966.

The Peases have moved for summary judgment on their cross-claim against the State of Alaska and on their counterclaim against Transamerica Title Insurance Company. The Peases are entitled to summary judgment against Transamerica Title Insurance Company under the authority of *Hahn v. Alaska Title Guaranty Co.*, 557 P.2d 143 (Alaska 1976) and they are granted such summary judgment establishing the liability of their insurer subject to the provision that if the State must pay for the strip, then the Peases shall collect from the State and not their title insurer.

The plaintiffs have moved for summary judgment against the State of Alaska on the grounds that the State is without authority to exercise jurisdiction over easements allegedly reserved to the State by P.L.O. 601 as amended by P.L.O. 757 and P.L.O. 1613 and D.O. 2665. The title insurance companies and the other plaintiffs have standing to bring this case and are real parties in interest; there is a justiciable controversy and the plaintiffs' pecuniary interest is affected. See *Jefferson v. Asplund,* 458 P.2d 995 (Alaska 1969).

There is no statute of limitations problem; the land is not taken until staked. D.O. 2665(c).

The State asserts that the withdrawals and easements established by the various P.L.O.'s and D.O.'s are dedications of property to the public which cannot be transferred to private ownership until abandoned. There is no evidence of fact or law to support the State's contention. The withdrawals and

easements will be treated as designations by a land owner setting aside certain portions of its property.

It is necessary to view this case in its historical perspective. Pursuant to P.L.O. 601 land was withdrawn for through, feeder, and local roads in strips ranging from 300 feet to 50 feet on each side of the center line. These strips were never surveyed, the Bureau of Land Management did not know what land was withdrawn and patents were issued conveying land which allegedly had been withdrawn. The record is replete with letters explaining the problems created and the hardships which resulted.

In response to the problems created by withdrawals, the Secretary of the Interior revoked P.L.O. 601 in stages: first, P.L.O. 757 in 1951, and then P.L.O. 1613 in 1958 and substituted easements. D.O. 2665 and P.L.O. 1613. The establishment of easements did not solve all of the problems; however, entrymen and the government could determine the boundaries of parcels by measuring from the center line of the existing roads even though the roads were not surveyed.

The predecessor in interest to Mr. and Mrs. Pease was granted a two and one-half acre parcel subject to a 33-foot easement for Rabbit Creek Road and a blanket reservation for easements created pursuant to 61 Stat. 418, 48 U.S.C. sec. 321d, the authority for D.O. 2665. The Right-of-Way Act of 1966 precludes the State from taking without compensation any land pursuant to the Act of June 30, 1932, ch. 320, sec. 5, as added July 24, 1947, ch. 313, 61 Stat. 418.

The State argues that it already had the easement reserved by 61 Stat. 418, 48 U.S.C. sec. 321d before the effective date of the Right-of-Way Act of 1966 and, therefore, the Act does not apply. The State is wrong; it did not secure the easement until the right-of-way was staked by the terms of D.O. 2665.

It is realized that *State, Dept. of Highways v. Green*, 586 P.2d 595 (Alaska 1978) does not discuss the Right-of-Way Act of 1966; nevertheless, the Act does apply to the case at bar and would apparently be applicable in the *Green* case; the State should have brought it to the court's attention even if the appellees failed to do so.

Therefore, the plaintiffs and Mr. and Mrs. Pease are entitled to summary judgment establishing the fact that the State or anyone claiming through the State, including the Municipality of Anchorage, may not occupy land reserved for highway or other purposes pursuant to 61 Stat. 418, 48 U.S.C. sec. 321d without compensation which the State was not occupying on April 14, 1966.

This ruling means that unless the easement was specifically reserved in the patent or was occupied by the State or Municipality or staked by the State before April 14, 1966, the underlying fee holder is entitled to just compensation when the State or Municipality asserts its right to utilize the strip between the previously occupied, staked, or specifically designated in the patent distance from the center line and 50, 100 or 150 feet from the center line depending upon the type of road. The State's argument that the plaintiffs by this lawsuit are seeking to divest the State of its interest in all the roads of the state is not understood and is clearly not the fact.

The plaintiff Hansen Associates is not correct in asserting that its property is free from the easement designated in D.O. 2665 because its predecessor in interest entered the property before D.O. 2665 was issued. The Hansen property had not been patented as of October 16, 1951 and between a mere entryman and the government, the entryman may not be heard to complain when the government reserves an easement. *Shiver v. United States*, 159 U.S. 491, 16 S.Ct. 54 (1895); *Wilber v. United States*, 53 F.2d 717 (C.A.D.C. 1931).

It is unnecessary to decide the effect of the quitclaim deed, its later recordation and the status of land whose owners recorded their deeds or patents earlier than the recordation of the quitclaim deed in light of the above determinations. In addition, it is unnecessary to deal with the doctrine of estoppel as it may apply in this case.

And in order to fully adjudicate the issues presented in this case, it is necessary to comment on the plaintiffs' contentions that *Hahn v. Alaska Title Guaranty Co.*, 557 P.2d 143 (Alaska 1976) was incorrectly decided. The authorities and argument cited by the plaintiffs are persuasive and the Alaska

Supreme Court is requested to review its decision.

The attorneys for the plaintiffs shall prepare, serve and submit a judgment consistent with this decision.

DATED at Anchorage, Alaska, this 7th day of May, 1980.

APPENDIX A-2

IN THE SUPERIOR COURT
FOR THE STATE OF ALASKA

THIRD JUDICIAL DISTRICT

ALASKA LAND TITLE ASSOCIATION, SECURITY TITLE AND TRUST COMPANY OF ALASKA, ALASKA TITLE GUARANTY COMPANY, BROKERS TITLE COMPANY, LAWYERS TITLE INSURANCE AGENCY, INC., SAFECO TITLE AGENCY, INC., FAIRBANKS TITLE AGENCY, KACHEMAK BAY TITLE AGENCY, VALLEY TITLE AND ESCROW COMPANY, FIRST AMERICAN TITLE INSURANCE COMPANY, TRANSAMERICA TITLE INSURANCE CO., HANSEN ASSOCIATES, an Alaska Limited Partnership, RICHARD L. BOYSEN and JACK WHITE COMPANY,

Plaintiffs,

vs.

STATE OF ALASKA, Department of Transportation and Public Facilities, THEODORE M. PEASE, JR., and CLAIRE V. PEASE, and MUNICIPALITY OF ANCHORAGE,

Defendants.

No. 3AN-79-951 CIV.

JUDGMENT

For the reasons set forth in the Memorandum of Decision prepared and executed by this court on the 7th day of May, 1980, the court hereby awards summary judgment declaring the rights and liabilities of the parties to this lawsuit as follows:

1. The State of Alaska and the Municipality of Anchorage are claiming highway easements for local, feeder, and through roads in excess of easement widths specified in patents issued to Alaska property owners. Said easements are claimed by the State or the Municipality pursuant to authority derived from

Public Land Orders 601, 757, 1613 and Department Order 2665. For the reasons set forth in the Memorandum of Decision dated May 7, 1980, the court hereby awards Plaintiffs a summary judgment against the State of Alaska and the Municipality of Anchorage declaring that the State and the Municipality may not take or utilize property for local, feeder, or through roads in excess of the widths set forth in the patents to the affected properties without just compensation to the owners of the affected properties unless such local, feeder, or through roads were occupied and staked by the State of Alaska or the Municipality of Anchorage prior to April 14, 1966 or were specifically designated in the patents to the affected real properties.

2. The Plaintiffs Hanson Associates and Richard L. Boysen are hereby awarded a summary judgment against the State of Alaska and the Municipality of Anchorage declaring that neither the State nor the Municipality can take any portion of their properties for the through road presently known as the Old Seward Highway which is in excess of the easement widths specified in their respective patents without just compensation.

3. The Defendants Pease are hereby awarded a summary judgment on their cross-claim against the State of Alaska declaring that the State may not take or utilize any portion of the Peases' land for the local road presently known as Rabbit Creek Road which is in excess of the 33-foot easement width specified in the patent to the Peases' property without just compensation. The Peases' property is described as Lot 191, Section 33, Township 12 North, Range 3 West, Seward Meridian, Anchorage Recording District, Third Judicial District, State of Alaska.

4. The Defendants Pease are hereby awarded a summary judgment on their counterclaim against Transamerica Title Insurance Company declaring that Transamerica is liable under its title insurance policy issued to the Peases for the taking by the State of Alaska of a 17-foot strip of land for the local road known as Rabbit Creek Road, which 17-foot strip of land was in excess of 33-foot easement specified in the Peases' patent. However, since the State of Alaska must compensate the Peases for the taking or utilization of said additional 17-foot easement, the Peases shall collect just compensation from the State of Alaska, and upon receipt of said just compensation the Peases shall not be entitled to recover damages from Transamerica Title Insurance Company for said taking of the additional 17-foot strip of property.

5. Plaintiffs are hereby awarded the sum of $_____ for costs and $_____ for a reasonable attorney's fee, for a total judgment of $_____ against the State of Alaska and the Municipality of Anchorage, jointly and severally.

6. The Defendants Pease are hereby awarded the sum of $_____ for costs and $_____ for a reasonable attorney's fee for a total judgment of $_____ against the State of Alaska and the Municipality of Anchorage, jointly and severally.

DONE, at Anchorage, Alaska this 27th day of May, 1980.

APPENDIX A-3

IN THE SUPREME COURT OF THE STATE OF ALASKA

STATE OF ALASKA

Appellant and Cross-Appellee.

vs.

ALASKA LAND TITLE ASSOCIATION, et al.,

Appellees and Cross-Appellants.

Supreme Court Numbers 5407/5408

O R D E R

Superior Court No. 3AN 79-951 Civil

Before: Burke, Chief Justice, Rabinowitz, Matthews and Compton, Justices.

On consideration of the petition for rehearing filed June 6, 1983 by the Alaska Land Title Association, et al., and the [second] petition for rehearing by the State, lodged June 14, 1983 and filed June 23, 1983,

IT IS ORDERED:

1. The petition for rehearing filed by the Alaska Land Title Association is denied.

2. The petition for rehearing filed by the State is granted, and Opinion No. 2681 filed on May 27, 1983, is amended by adding a new footnote 15, referenced to the word "purposes" on page 27, line 19. The new footnote shall read as follows:

> The State and the plaintiffs have agreed that PLO 601 is based on Executive Order 9337 which, "in turn, rests on" 43 U.S.C. §141. We thus have no occasion to consider whether Executive Order 9337 delegated authority to make withdrawals in addition to those authorized by 43 U.S.C. §141.

Succeeding footnotes shall be renumbered.

Entered by direction of the court at Anchorage, Alaska on July 8, 1983.

APPENDIX B

CONSTITUTIONAL, STATUTORY AND REGULATORY PROVISIONS INVOLVED

U.S. Const. amend. V.

No person shall be held to answer for a capital, or otherwise infamous crime, unless on a presentment or indictment of a Grand Jury, except in cases arising in the land or naval forces, or in the Militia, when in actual service in time of War or public danger; nor shall any person be subject for the same offense to be twice put in jeopardy of life or limb; nor shall be compelled in any criminal case to be a witness against himself, nor be deprived of life, liberty, or property, without due process of law; nor shall private property be taken for public use, without just compensation.

U.S. Const. amend. XIV, §1

All persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the State wherein they reside. No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any State deprive any person of life, liberty, or property, without due process of law; nor deny to any person within its jurisdiction the equal protection of the laws.

43 U.S.C. §932

The right of way for the construction of highways over public lands, not reserved for public uses, is hereby granted. R.S. §2477.

43 U.S.C. §1166

Suits by the United States to vacate and annul any patent shall only be brought within six years after the date of the issuance of such patents. Mar. 3, 1891, c. 559, §1, 26 Stat. 1093; Mar. 3, 1891, c. 561, §8, 26 Stat. 1099.

44 U.S.C. §1507

A document required by section 1505(a) of this title to be published in the Federal Register is not valid as against a per-

son who has not had actual knowledge of it until the duplicate originals or certified copies of the document have been filed with the Office of the Federal Register and a copy made available for public inspection as provided by section 1503 of the title. Unless otherwise specifically provided by statute, filing of a document, required or authorized to be published by section 1505 of this title, except in cases where notice by publication is insufficent in law, is sufficient to give notice of the contents of the document to a person subject to or affected by it. the publication in the Federal Register of a document creates a rebuttable presumption—

(1) that it was duly issued, prescribed, or promulgated;

(2) that it was filed with the Office of the Federal Register and made available for public inspection at the day and hour stated in the printed notation;

(3) that the copy contained in the Federal Register is a true copy of the original; and

(4) that all requirements of this chapter and the regulations prescribed under it relative to the document have been complied with.

The contents of the Federal Register shall be judicially noticed and without prejudice to any other mode of citation, may be cited by volume and page number.

Pub. L. 90-620, Oct. 22, 1968, 82 Stat. 1276.

The Act of January 27, 1905, Pub. L. No. 26 §2, 33 Stat. 616

Sec. 2. That there shall be a board of road commissioners in said district, to be composed of an engineer officer of the United States Army to be detailed and appointed by the Secretary of War, and two other officers of that part of the Army stationed in said district and to be designated by the Secretary of War. The said engineer officer shall, during the term of his said detail and appointment, abide in said district. The said board shall have the power, and it shall be their duty, upon their own motion or upon petition, to locate, layout, construct, and maintain wagon roads and pack trails from any point on the navigable waters of said district to any town, mining or other industrial camp or settlement [illegible] between any

such town, camps, or settlements therein, if in their judgment such roads or trails are needed and will be of permanent value for the development of the district; but no such road or trail shall be constructed to any town, camp, or settlement which is wholly transitory or of no substantial value or importance for mining trade, agricultural, or manufacturing purposes. The said board shall prepare maps, plans, and specifications of every road or trail they may locate and lay out, and whenever more than five thousand dollars in the aggregate shall have to be expended on the construction of any road or trail, contract for the work shall be let by them to the lowest responsible bidder, upon sealed bids, after due notice, under rules and regulations to be prescribed by the Secretary of War. The board may reject any bid if they deem the same unreasonably high or if they find that there is a combination among bidders. In case no responsible and reasonable bid can be secured, then the work may be carried on with material and men procured and hired by the board. The engineer officer of the board shall in all cases supervise the work of construction and see that the same is properly performed. As soon as any road or trail laid out by the board has been constructed and completed they shall examine the same and make a full and detailed report of the work done on the same to the Secretary of War, and in such report they shall state whether the road or trail has been completed conformable to the maps, plans, and specifications of the same. It shall be the duty of said board, as far as practicable, to keep in proper repair all roads and trails constructed under their supervision, and the same rules as to the manner in which the work of repair shall be done, whether by contract or otherwise, shall govern as in the case of the original construction of the road or trail. The cost and expenses of laying out, constructing, and repairing such roads and trails shall be paid by the Secretary of the Treasury out of the road and trail portion of said "Alaska fund" upon vouchers approved and certified by said board. The Secretary of the Treasury shall, at the end of each month, send by mail to each of the members of said board a statement of the amount available of said "Alaska fund" for the construction and repair of roads, and trails, and no greater liability for construction or repair shall

at any time be incurred by said board than the money available therefor at that time in said fund. The members of said board shall, in addition to their salaries, be entitled to receive their actual traveling expenses paid or incurred by them in the performance of their duties as members of the board.

48 U.S.C. §322 (1958)

The Secretary of the Interior, or such officer, or officers as may be designated by him, shall upon his own motion or upon petition, locate, lay out, construct, and maintain roads, trails and bridges from any point on the navigable waters of Alaska to and through any town, mining or other industrial camp or settlement, or between and through any such town, camps, or settlements therein, if in his judgment such roads, trails, or bridges are needed and will be of permanent value for the development of Alaska: *Provided,* That within incorporated towns only roads and bridges which are designated by the Secretary of the Interior as part of the through highway system of the Territory of Alaska may be constructed under this section; *Provided further,* That no roads or bridges within incorporated towns shall be maintained under this section. (Jan. 27, 1905, ch. 277, §2, 33 Stat. 616; May 14, 1906, ch. 2458, §2, 34 Stat. 192; June 30, 1932, ch. 320, §1, 47 Stat. 446; July 14, 1955, ch. 359, 69 Stat. 321.)

The Act of June 30, 1932, Pub. L. No. 218 §§1 & 2, 47 Stat. 446

Providing for the transfer of the duties authorized and authority conferred by law upon the board of road commissioners in the Territory of Alaska to the Department of the Interior, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That from and after the passage of this Act the duties authorized and authority conferred by law upon the board of road commissioners in the Territory of Alska, and upon the Secretary of War, as provided for in the Act of January 27, 1905 (ch. 277, sec. 2, 33 Stat. 616), as amended by the Act of May 14, 1906 (ch. 2458, sec. 2, 34 Stat. 192), and Acts supplemental thereto, and amendatory thereof, are hereby transferred to

the Department of the Interior, and shall hereafter be administered by the Secretary of the Interior, or under his direction by such officer, or officers, as may be designated by him.

Sec. 2. The Secretary of the Interior shall execute or cause to be executed all laws pertaining to the construction and maintenance of roads and trails and other works in Alaska, heretofore administered by said board of road commissioners under the direction of the Secretary of War; and all appropriations heretofore made, and now available, or that hereafter may be made, for expenditure by said board for meeting the cost of such work in the Territory of Alaska, are hereby transferred to the Secretary of the Interior, to be thereafter administered in accordance with the provisions of this Act; and the said board is directed to turn over to the Secretary of the Interior all equipment, materials, supplies, papers, maps, and documents, or other property utilized in the exercise of such powers, for the use of the said Secretary in the administration of the construction and maintenance of roads, tramways, ferries, bridges, and trails, and other works in the Territory of Alaska heretofore administered by said board.

The Act of July 24, 1947, Pub. L. No. 229 §5 61 Stat. 418 (amending the Act of June 30, 1932, Publ. L. No. 218, 47 Stat. 446)

To amend the Act entitled "An Act providing for the transfer of the duties authorized and authority conferred by law upon the board of road commissioners in the Territory of Alaska to the Department of the Interior, and for other purposes", approved June 30, 1932.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the act entitled "An Act providing for the transfer of the duties authorized and authority conferred by law upon the board of road commissioners in the Territory of Alaska to the Department of the Interior, and for other purposes", approved June 30, 1932 (47 Stat. 446), is hereby amended by adding at the end thereof the following new section:

"Sec. 5. In all patents for lands hereafter taken up, entered, or located in the Territory of Alaska, and in all deeds

by the United States herefter conveying any lands to which it may have reacquired title in said Territory not included within the limits of any organized municipality, there shall be expressed that there is reserved, from the lands described in said patent or deed, a right-of-way thereon for roads, roadways, highways, tramways, trails, bridges, and appurtenant structures constructed or to be constructed by or under the authority of the United States or any State created out of the Territory of Alaska. When a right-of-way reserved under the provisions of this Act is utilized by the United States or under its authority, the head of the agency in charge of such utilization is authorized to determine and make payment for the value of the crops thereon if not harvested by the owner, and for the value of any improvements, or for the cost of removing the s to another site, if less than their value."

Approved July 24, 1947.

48 U.S.C. §321a (1958)

The Secretary of the Interior shall execute or cause to be executed all laws pertaining to the construction and maintenance of roads and trails and other works in Alaska, heretofore administered by said board of road commissioners under the direction of the Secretary of War; and all appropriations heretofore made, and now available, or that hereafter may be made, for expenditure by said board for meeting the cost of such work in the Territory of Alaska, are transferred to the Secretary of Interior, to be thereafter administered in accordance with the provisions of sections 321a-321d of this title; and the said board is directed to turn over to the Secretary of the Interior all equipment, materials, supplies, papers, maps, and documents, or other property utilized in the exercise of such powers, for the use of the said Secretary in the administration of the construction and maintenance of roads, tramways, ferries, bridges, and trails, and other works in the Territory of Alaska, heretofore administered by said board. (June 30, 1932, ch. 320, §2, 47 Stat. 446)

48 U.S.C. §321d (1958)

In all patents for lands hereafter taken up, entered, or located in the Territory of Alaska, and in all deeds by the United States hereafter conveying any lands to which it

have reacquired title in said Territory not included within the limits of any organized municipality, there shall be expressed that there is reserved, from the lands described in said patent or deed, a right-of-way thereon for roads, roadways, highways, tramways, trails, bridges, and appurtenant structures constructed or to be constructed by or under the authority of the United States or of any State created out of the Territory of Alaska. When a right-of-way reserved under the provisions of sections 321a-321d of this title is utilized by the United States or under its authority, the head of the agency in charge of such utilization is authorized to determine and make payment for the value of the crops thereon if not harvested by the owner, and for the value of any improvements, or for the costs of removing them to another site, if less than their value. (June 30, 1932, ch. 320, §5, as added July 24, 1947, ch. 313, 61 Stat. 418.)

Federal-Aid Highway Act of 1970 §138(b) Pub. L. No. 91-605, 64 Stat. 1713 (1970)

(b) Any right-of-way for roads, roadways, highways, tramways, trails, bridges, and appurtenant structures reserved by section 321(d) of title 48, United States Code (61 Stat. 418, 1947), not utilized by the United States or by the State or Territory of Alaska prior to the date of enactment hereof, shall be and hereby is vacated and relinquished by the United States to the end and intent that such reservations shall merge with the fee and be forever extinguished.

43 C.F.R. §101.3 (1949)

Notation of Rights-of-Way

§101.3 *Notations to be made on entry papers and notice of allowance.* (a) In order that all persons making entry of public lands which are affected by rights-of-way may have actual notice thereof, the manager is directed to note upon the original entry papers and upon the notice of allowance of the application (Form 4-279) issued to the entryman, a reference to such right-of-way.

(b) He will make no such notation upon the final entry papers unless the right-of-way has been granted under an act of Congress which does not in terms protect the grantee

against subsequent adverse rights, in which case he will place the same notation as to right-of-way upon the final entry papers, so that the reservation of the right-of-way will be made in the patent, when issued (23 L.D. 67).

[Reg. Nov. 3, 1909, as amended by Reg. Jan 19, 1910]

Public Land Order 601

By virtue of the authority vested in the President and pursuant to Executive Order No. 9337 of April 24, 1943, it is ordered as follows:

Executive Order No. 9145 of April 23, 1942, reserving public lands for the use of the Alaska Road Commission in connection with the construction, operation, and maintenance of the Palmer-Richardson Highway (now known as the Glenn Highway), is hereby revoked.

Public Land Order No. 386 of July 31, 1947, is hereby revoked so far as it relates to the withdrawal, for highway purposes, of the following-described lands:

(a) A strip of land 600 feet wide, 300 feet on each side of the centerline of the Alaska Highway (formerly the Canadian Alaskan Military Highway) as constructed from the Alaska-Yukon Territory boundary to its junction with the Richardson Highway near Big Delta, Alaska.

(b) A strip of land 600 feet wide, 300 feet on each side of the center line of the Gulkana-Slana-Tok Road as constructed from Tok Junction at about Mile 1319 on the Alaska Highway to the junction with the Richardson Highway near Gulkana, Alaska.

Subject to valid existing rights and to existing surveys and withdrawals for other than highway purposes, the public lands in Alaska lying within 300 feet on each side of the center line of all other through roads, 100 feet on each side of the center line on all feeder roads, and 50 feet on each side of the center line of all local roads, in accordance with the following classifications, are hereby withdrawn from all forms of appropriation under the public land laws, including the mining and mineral-leasing laws, and reserved for highway purposes:

Through Roads

Alaska Highway, Richardson Highway, Glenn Highway, Haines Highway, Tok Cut-Off.

Feeder Roads

Steese Highway, Elliott Highway, McKinley Park Road, Anchorage-Potter-Indian Road, Edgerton Cut-Off, Tok Eagle Road, Ruby-Long-Poorman Road, Nome-Solomon Road, Kenai Lake-Homer Road, Fairbanks-College Road, Anchorage-Lake Spenard Road, Circle Hot Springs Road.

Local Roads

All roads not classified above as Through Roads or Feeder Roads, established or maintained under the jurisdiction of the Secretary of the Interior.

With respect to the lands released by the revocations made by this order and not rewithdrawn by it, this order shall become effective at 10:00 a.m. on the 35th day after the date hereof. At that time, such released lands, all of which are unsurveyed, shall, subject to valid existing rights, be opened to settlement under the homestead laws and the homesite act of May 26, 1934, 48 Stat. 809 (48 U.S.C. 461), only, and to that form of appropriation only by qualified veterans of World War II and other qualified persons entitled to preference under the act of September 27, 1944, 58 Stat. 747, as amended (43 U.S.C. 279-284). Commencing at 10:00 a.m. on the 126th day after the date of this order, any of such lands not settled upon by veterans shall become subject to settlement and other forms of appropriations by the public generally in accordance with appropriate laws and regulations.

Public Land Order 757

Amendment of Public Land Order No. 601 of August 10, 1949, reserving public lands for highway purposes.

By virtue of the authority vested in the President and pursuant to Executive Order 9337 of April 24, 1943, it is ordered as follows:

The sixth paragraph of Public Land Order No. 601 of August 10, 1949, reserving public lands for highway purposes,

commencing with the words, "Subject to valid existing rights", is hereby amended to read as follows:

Subject to valid existing rights and to existing surveys and withdrawals for other than highway purposes, the public lands in Alaska lying within 300 feet on each side of the center line of the Alaska Highway and within 150 feet on each side of the center line of the Richardson Highway, Glenn Highway, Haines Highway, the Seward-Anchorage Highway (exclusive of that part thereof within the boundaries of the Chugach National Forest), the Anchorage-Lake Spenard Highway, and the Fairbanks-College Highway are hereby withdrawn from all forms of appropriation under the public land laws, including the mining and mineral-leasing laws, and reserved for highway purposes.

Easements having been established on the lands released by this order, such lands are not open to appropriation under the public land laws except as a part of a legal subdivision, if surveyed, or an adjacent area, if unsurveyed, and subject to the pertinent easement.

Public Land Order 1613

Revoking Public Land Order No. 601 of August 10, 1949 which reserved public lands for highway purposes, and partially revoking Public Land Order No. 386 of July 31, 1947.

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952, and the act of August 1, 1956 (70 Stat. 898) it is ordered as follows:

1. Public Land Order No. 601 of August 10, 1949, as modified by Public Land Order No. 757 of October 16, 1951, reserving for highway purposes the public lands in Alaska lying within 300 feet on each side of the center line of the Alaska Highway and within 150 feet on each side of the center line of the Richardson Highway, Glenn Highway, Haines Highway, the Seward-Anchorage Highway (exclusive of that part thereof, within the boundaries of the Chugach National Forest), the Anchorage-Lake Spenard Highway, and the Fairbanks-College Highway, is hereby revoked.

2. Public Land Order No. 386 of July 31, 1947, so far as it withdrew the following-described lands, [illegible] items

(a) and (b) in said order, under the jurisdiction of the Secretary of War for right-of-way purposes for a telephone line and an oil pipeline with appurtenances, is hereby revoked:

(a) A strip of land 50 feet wide, 25 feet on each side of a telephone line as located and constructed generally parallel to the Alaska Highway from the Alaska-Yukon Territory boundary to the junction of the Alaska Highway with the Richardson highway near Big Delta, Alaska.

(b) A strip of land 20 feet wide, 10 feet on each side of a pipeline as located and constructed generally parallel to the Alaska Highway from the Alaska-Yukon Territory boundary to the junction of the Alaska Highway with the Richardson Highway near Big Delta, Alaska.

3. An easement for highway purposes, including appurtenant protective, scenic, and service areas, over and across the lands described in paragraph 1 of this order, extending 150 feet on each side of the center line of the highways mentioned therein, is hereby established.

4. An easement for telephone line purposes in, over, and across the lands described in paragraph 2(a) of this order, extending 25 feet on each side of the telephone line referred to in that paragraph, and an easement for pipeline purposes in, under, over, and across the lands described in paragraph 2(b) of this order, extending 10 feet on each side of the pipeline referred to in that paragraph, are hereby established, together with the right of ingress and egress to all sections of the above easements on and across the lands hereby released from withdrawal.

5. The easements established under paragraphs 3 and 4 of this order shall extend across both surveyed and unsurveyed public lands described in paragraphs 1 and 2 of this order for the specified distance on each side of the center line of the highways, telephone line and pipeline, as those center lines are definitely located as of the date of this order.

6. The lands within the easements established by paragraphs 3 and 4 of this order shall not be occupied or used for other than the highways, telegraph line and pipeline referred to in paragraphs 1 and 2 of this order except with the

permission of the Secretary of the Interior or his delegate as provided by section 3 of the act of August 1, 1956 (70 Stat. 898), provided: that if the lands crossed by such easements are under the jurisdiction of a Federal department or agency, other than the Department of the Interior, or of a Territory, State or other Government subdivision or agency, such permission may be granted only with the consent of such department, agency, or other governmental unit.

7. The lands released from withdrawal by paragraphs 1 and 2 of this order, which at the date of this order, adjoin lands in private ownership, shall be offered for sale at not less than their appraised value, as determined by the authorized officer of the Bureau of Land Management, and pursuant to section 2 of the act of August 1, 1956, supra. Owners of such private lands shall have a preference right to purchase at the appraised value so much of the released lands adjoining their private property as the authorized officer of the Bureau of Land Management deems equitable, provided, that ordinarily, owners of private lands adjoining the lands described in paragraph 1 of this order will have a preference right to purchase released lands adjoining their property, only up to the center line of the highways located therein. Preference right claimants may make application for purchase of released lands at any time after the date of this order by giving notice to the appropriate land office of the Bureau of Land Management. Lands described in this paragraph not claimed by and sold to preference claimants may be sold at public auction at not less than their appraised value by an authorized officer of the Bureau of Land Management, provided that preference claimants are first given notice of their privilege to exercise their preference rights by a notice addressed to their last address of record in the office in the Territory in which their title to their private lands is recorded. Such notice shall give the preference claimant at least 60 days in which to make application to exercise his preference right; and if the application is not filed within the time specified, the preference right will be lost. Preference right claimants will also lose their preference rights if they fail to pay for the lands within the time period specified by

the authorized officer of the Bureau of Land Management, which time period shall not be less than 60 days.

8. The lands released from withdrawal by paragraphs 1 and 2 of this order, which at the date of this order, adjoin lands in valid unperfected entries, locations, or settlement claims, shall be subject to inclusion in such entries, locations and claims, notwithstanding any statutory limitations upon the area which may be included therein. For the purposes of this paragraph, entries, locations, and claims include, but are not limited to, certificates of purchase under the Alaska Public Sales Act (63 Stat. 679; 48 U.S.C. 364a-e) and leases with option to purchase under the Small Tract Act (52 Stat. 609; 43 U.S.C. 682a) as amended. Holders of such entries, locations and claims to the lands, if they have not gone to patent, shall have a preference right to amend them to include so much of the released lands adjoining their property as the authorized officer deems equitable, provided, that ordinarily such holders of property adjoining the lands described in paragraph 1 of this order will have the right to include released lands adjoining such property only up to the center line of the highways located therein. Allowances of such amendments will be conditional upon the payment of such fees and commissions as may be provided for in the regulations governing such entries, locations, and claims together with the payment of any purchase price and cost of survey of the land which may be established by the law or regulations governing such entries, locations and claims, or which may be consistent with the terms of the sale under which the adjoining land is held. Preference right claimants may make application to amend their entries, locations, and claims at any time after the date of this order by giving notice to the appropriate land office of the Bureau of Land Management. Lands described in this paragraph, not claimed by and awarded to preference claimants, may be sold at public auction at not less than their appraised value by the authorized officer of the Bureau of Land Management, provided that preference claimants are first given notice of their privilege to exercise their preference rights by a notice addressed to their last address of record in the appropriate land office, or if the land is patented, in the Territory in which ti-

tle to their private land is recorded. Such notice shall give the claimant at least 60 days in which to make application to exercise his preference right, and if the application is not filed within the time specified the preference right will be lost. Preference right claimants will also lose their preference rights if they fail to make any required payments within the time period specified by the authorized officer of the Bureau of Land Management, which time period shall not be less than 60 days.

9(a) Any tract released by Paragraph 1 or 2 of this order from the withdrawals made by Public Land Orders Nos. 601, as modified, and 386, which remains unsold after being offered for sale under Paragraph 7 or 8 of this order, shall remain open to offers to purchase under Section 2 of the act of August 1, 1956, supra, at the appraised value, but it shall be within the discretion of the Secretary of the Interior or his delegate as to whether such an offer shall be accepted.

(b) Any tract released by Paragraph 1 and 2 of this order from the withdrawals made by Public Land Orders Nos. 601, as modified, and 386, which on the date hereof does not adjoin privately-owned land or land covered by an unpatented claim or entry is hereby opened, subject to the provisions of Paragraph 6 hereof, if the tract is not otherwise withdrawn, to settlement claim, application, selection or location under any applicable public land law. Such a tract shall not be disposed of as a tract or unit separate and distinct from adjoining public lands outside of the area released by this order, but for disposal purposes, and without losing its identity, if it is already surveyed, it shall be treated as having merged into the mass of adjoining public lands, subject, however, to the easement so far as it applies to such lands.

(c) Because the act of August 1, 1956 (70 Stat. 896; 48 U.S.C. 420-420c) is an act of special application, which authorizes the Secretary of the Interior to make disposals of lands included in revocations such as made by this order, under such laws as may be specified by him, the preference-right provisions of the Veterans Preference Act of 1944 (58 Stat. 747; 43 U.S.C. 279-284) as amended, and of the Alaska Mental

Health Enabling Act of July 28, 1956 (70 Stat. 709; 48 U.S.C. 46-3b) will not apply to this order.

10. All disposals of lands included in the revocations made by this order which are under the jurisdiction of a Federal department or agency other than the Department of the Interior may be made only with the consent of such department or agency. All lands disposed of under the provisions of this order shall be subject to the easements established by this order.

11. The boundaries of all withdrawals and restorations which on the date of this order adjoin the highway easements created by this order are hereby extended to the center line of the highway easements which they adjoin. The withdrawal made by this paragraph shall include, but not be limited to the withdrawals made for Air Navigation Site No. 7 of July 13, 1964, and by Public Land Orders No. 386 of July 31, 1947, No. 622 of December 15, 1949, No. 803 of February 27, 1952, No. 975 of June 18, 1954, No. 1037 of December 16, 1954, No. 1059 of January 21, 1955, No. 1129 of April 15, 1955, No. 1179 of June 29, 1955, and No. 1181 of June 20, 1955.

Department Order 2665

Rights-of-Way for Highways in Alaska

Section 1. Purpose. (a) The purpose of this order is to (1) fix the width of all public highways in Alaska established or maintained under the jurisdiction of the Secretary of the Interior and (2) prescribe a uniform procedure for the establishment of rights-of-way or easements over or across the public lands for such highways. Authority for these actions is contained in section 2 of the act of June 30, 1932 (47 Stat. 446, 48 U.S.C. 321a).

Section 2. Width of public highways. (a) The width of the public highways in Alaska shall be as follows:

(1) For through roads: The Alaska Highway shall extend 300 feet on each side of the center line thereof. The Richardson Highway, Glenn Highway, Haines Highway, Seward-Anchorage Highway, Anchorage-Lake Spenard Highway and

Fairbanks-College Highway shall extend 150 feet on each side of the center line thereof.

(2) For feeder roads: Abbert Road (Kodiak Island), Edgerton Cutoff, Elliott Highway, Seward Peninsula Tram Road, Steese Highway, Sterling Highway, Taylor Highway, Northway Junction to Airport Road, Palmer to Matanuska to Wasilla Junction Road, Palmer to Finger Lake to Wasilla Road, Glenn Highway Junction to Fishhook Junction to Wasilla to Knik Road, Slana to Nebesna Road, Kenai Junction to Kenai Road, University to Ester Road, Central to Circle Hot Springs to Portage Creek Road, Manley Hot Springs to Eureka Road, North Park Boundary to Kantishna Road, Paxson to McKinley Park Road, Sterling Landing to Ophir Road, Iditarod to Flat Road, Dillingham to Wood River Road, Ruby to Long to Poorman Road, Nome to Council Road and Nome to Bessie Road shall each extend 100 feet on each side of the center line thereof.

(3) For local roads: All public roads not classified as through roads or feeder roads shall extend 50 feet on each side of the center line thereof.

Section 3. Establishment of rights-of-way or easements. (a) A reservation for highway purposes covering the lands embraced in the through roads mentioned in section 2 of this order was made by Public Land Order No. 601, of August 10, 1949, as amended by Public Land Order No. 757 of October 16, 1951. That order operates as a complete segregation of the land from all forms of appropriation under the public land laws, including the mining and the mineral leasing laws.

(b) A right-of-way or easement for highway purposes covering the lands embraced in the feeder roads and the local roads equal in extent to the width of such roads as established in section 2 of this order, is hereby established for such roads over and across the public lands.

(c) The reservation mentioned in paragraph (a) and the rights-of-way or easements mentioned in paragraph (b) will attach as to all new construction involving public roads in Alaska when the survey stakes have been set on the ground and notices have been posted at appropriate points along the

route of the new construction specifying the type and width of the roads.

Section 4. Road maps to be filed in proper Land Office. Maps of all public roads in Alaska heretofore or hereafter constructed showing the location of the roads, together with appropriate plans and specifications, will be filed by the Alaska Road Commission in the proper Land Office at the earliest possible date for the information of the public.

Right-of-Way Act of 1966

Section 1. Purpose. This Act is intended to alleviate the economic hardship and physical and mental distress occasioned by the taking of land, by the State of Alaska, for which no compensation is paid to the persons holding title to the land. This practice has resulted in financial difficulties and the deprivation of peace of mind regarding the security of one's possessions to many citizens of the State of Alaska, and which, if not curtailed by law, will continue to adversely affect citizens of this state. Those persons who hold title to land under a deed or patent which contains a reservation to the state by virtue of the Act of June 30, 1932, ch. 320, sec. 5, as added July 24, 1947, ch. 313, 61 Stat. 418, are subject to the hazard of having the State of Alaska take their property without compensation because all patents or deeds containing the reservation required by that federal Act reserve to the United States, or the state created out of the Territory of Alaska, a right-of-way for roads, roadways, tramways, trails, bridges, and appurtenant structures either constructed or to be constructed. Except for this reservation the State of Alaska, under the Alaska constitution and the constitution of the United States, would be required to pay just compensation for any land taken for a right-of-way. It is declared to be the purpose of this Act to place persons with land so encumbered on a basis of equality with all other property holders in the State of Alaska, thereby preventing the taking of property without payment of just compensation as provided by law, and in the manner provided by law.

Section 2. Taking of Property Under Reservation Void. After the effective date of this Act, no agency of the state may

take privately-owned property by the election or exercise of a reservation to the state acquired under the Act of June 30, 1932, ch. 320 sec. 5, as added July 24, 1947, ch. 313, 61 Stat. 418, and taking of property after the effective date of this Act by an election or exercise of a reservation to the state under that federal Act is void.

Section 3. Prospective Application. This Act shall not be construed to divest the state of, or to require compensation by the state for, any right-of-way or other interest in real property which was taken by the state, before the effective date of this Act, by the election or exercise of its right to take property through a reservation acquired under the Act of June 30, 1932, ch. 320, sec. 5, as added July 24, 1947, ch. 313 61 Stat. 418.

Section 4. Short Title. This Act may be cited as the Right-of-Way Act of 1966.

Section 5. Effective Date. This Act takes effect on the day after its passage and approval or on the day it becomes law without such approval.

APPENDIX C

UNITED STATES
DEPARTMENT OF THE INTERIOR
BUREAU OF LAND MANAGEMENT
Anchorage, Alaska

October 10, 1950

Executive Order 601, August 10, 1949

Executive Order 601 of August 10, 1949, established rights of way along highways in the Territory of Alaska by means of withdrawing from all forms of entry strips a specified width on each side of each road.

The width of the right of way along the Alaska Highway is 600 feet. On all other through roads in Alaska it is 300 feet, on feeder roads 200 feet, and on local roads 100 feet.

Although Region VII, Bureau of Land Management, had attempted to have easements created rather than withdrawals, before the actual withdrawal order was issued, we had not even then begun to comprehend to what extent the Executive Order would complicate the functions of the Bureau of Land Management. The Bureau of Land Management gradually had begun to pick up momentum in the processing of various types of applications following the delegation of authority to the field. Depending upon our not being completely hamstrung by lack of funds, we could foresee the time when we could become reasonably current. And then it happened. Executive Order 601 was promulgated.

First, let me point out to you, there are no withdrawals along the railroad track of the Alaska Railroad. That is to say that the right-of-way itself is an easement rather than a strip of withdrawn land. Patents are issued to homesteaders which do not interfere with the operations of the Alaska Railroad but yet include the land upon which the tracks are built. If, in the future, a portion of the track is abandoned or the railroad decides to adopt another course, the land upon which the track was first located automatically becomes the property of the individual in whose patent or deed it was described. There are

no complications about a strip of land running up through the country owned by nobody.

Because of the existence of the withdrawal along roads, it has ben ruled that no entry filed or initiated after August 10, 1949, may go across the road, unless it is in the category of a local road with a right-of-way 100 feet wide. It has not been possible for the Alaska Road Commission to officially survey all of their roads and tie them in exactly with the existing corners of the rectangular net of surveys. Until these roads are surveyed, it will not be possible in some cases to determine whether or not the road crosses a given homestead entry.

Before any patent or final certificate can be issued to homesteaders who are restricted to only one side of the road, it will be necessary to survey many roads and all of the homesteads affected by roads running through surveyed land. This adds a tremendous job and workload to our Division of Engineering. In addition, it adds a tremendous expense to the taxpayers.

There is accumulating in the Land Offices files of applications by veterans who have complied with the regulations and who now want to obtain patent. These veterans are required to live on the land seven months and are not required to cultivate. Therefore, they may make application to obtain patent or, technically, to make final proof at the end of their seven months residence period. But these papers cannot be processed because withdrawal strips run through the land. The veteran must await a survey, which may be forthcoming this field season and may be forthcoming next field season.

After the survey has been made on the ground, it is necessary for the field notes to be processed, the plats to be produced from the drafting boards, the completed plat to be sent to Washington, the plat to be approved in the Washington office, and then returned to the proper Land Office for official filing. It is optimistic to assume that the plat will be finally filed in the proper Land Office within one year of the survey on the ground. During all of this time, the veteran has been unable to publish his final proof because his land cannot be

adequately described in the notice of publication.

The Sterling Highway, going down through the Kenai Peninsula gives us a specific project to discuss. The exact location of that road was not known to the Anchorage Land Office and therefore many entries were allowed which subsequently proved to straddle the road. In the meantime the entrymen have cultivated land on one side of the road, and have built their improvements on the other side of the road. Under the present rules and regulations, each entryman must elect which side of the road he is to take, and must relinquish or give up the land on the other side of the road. We have specific cases in which the road has cut across, leaving five, six or ten acres on one side of the road, and it is here that the entryman has built his house. He has cultivated and placed his fields on the other side of the road. As the saying goes, he is between the devil and the deep blue sea, and we can be of no assistance.

Then assuming that the entryman selects the portion of his entry which includes only ten acres or less. Under the provision of an act of 1947, the Alaska Road Commission still has the right to build a road through any homestead entry and therefore, technically, the Commission could put a road through the small acreage that has been left to the entryman.

Here are some specific cases:

Anchorage 014800, Richard Teller. There are 54 acres in the whole application, which comprises two lots, one north of the other. The Sterling Highway goes through the two lots, from north to south, but not through the middle, rather toward the eastern edge, about two-thirds of the way across. Teller has built a small road and has planned to build his house on the side of the road which would force him to choose the narrow strip. Originally his entry extended to Cook Inlet, and therefore he had water frontage. Under the new regulations he must relinquish either the area where he planned to build his house, and construct a small road, and give up the portion fronting the water, or he must select the portion fronting the water and give up the area where he planned to build his house and which evidently has the best house site.

There is nothing in the regulations which require us to investigate every homestead. We have an example of a case where the homesteader had appeared to be complying with the regulations in good order. He was a veteran, and therefore was not required to cultivate. His name is Clarence E. Herman, Anchorage 014574. There is nothing in the records to indicate we should make an investigation of his homestead, therefore we went through the procedures which is called "clear listing." That is, the Division of Land Planning indicated to the Land Office that a final certificate could be issued without further investigation or negotiating of any type. However, during a recent trip to that vicinity, a field examiner was making routine investigations of other homesteads, and was incidentally checking the location of the road as he went along. He discovered that the road goes through the homestead entry of Clarence E. Herman, therefore, we must backtrack in about everything that we have done. The Notice of Allowance of Herman must be vacated. Then we will have to have the road surveyed, and then await preparation of a supplemental plat. When the supplemental plat has been processed and finally filed in the Land Office, we must require this homesteader to publish again, as he already has published at the time he submitted his final proof. This homesteader had also bumped up against the regulation which affected Department of Interior employees as he was an employee of the Alaska Road Commission, but happily that restriction has now been removed through action of the Secretary of Interior.

You will recall that the homestead regulations state that each qualified individual may obtain land under the homestead laws up to a total of 160 acres. He may take that in one entry or several entries. If he homesteads in one part of Alaska and goes to another part of Alaska, he may homestead again, so long as he has not taken up an area exceeding 160 acres. If a homesteader has less than 160 acres and some available land becomes public domain adjacent to his original holdings, under the regulations he can acquire this additional land if it does not run his total over 160 acres. He is not required to live on the additional land if it is contiguous to his original entry. As a withdrawal along a highway causes a piece of land on one

side of the road to be not contiguous to a piece of land on the other side of the road, an entryman who had 40 acres would have to make proof and complete his requirements on one side of the road, then go across the road and build a house on that side, or move his house across in order to take land only 200 feet away from his original entry. As the regulations do not prevent a person from taking lands on both sides of the road under two entries, it merely complicates the matter by providing additional filings that must be placed on record by an entryman in order to get across the road if the land is still available.

The regulations provide that an entryman may obtain 160 acres, so if the land is available, the entryman may stretch his entry far along one side of the road until he has obtained 160 acres. There is a serious question as to whether it is more undesirable to have one entry straddle the road than it is to have one entry string along one side of the road for a mile and a half or two miles.

Then another complication enters into a different phase of the work. It appears that the withdrawals are in effect through the Matanuska Valley as they are elsewhere. We have on file several applications to purchase land. Two of them, Anchorage 016216 and 016304, filed by Gerald Brunner and Floyd Rock respectively, cover only five acres each. We are assuming that in this case the proposed sale may go on both sides of the road, but in order to know exactly how many acres are in the tract after the right of way has been deducted, it is necessary to survey the road to know just where it enters and leaves each tract, and then compute the acreage. In the meantime, the sales are not consummated.

We have many thousands of acres of unsurveyed lands through which roads are now built or will be built. There are claims which were staked out and are legally filed in the U.S. Commissioners' offices before August 10, 1949, the date on which 601 was promulgated. These settlement claims, therefore, have precedence over the order. However, our surveying crews are not investigators, and as they survey down through the country, they are not aware of which claims

antedate Executive Order 601 and which do not. Therefore, to be on the safe side, they must prepare their plats with two rights of way, that which was in effect before Executive Order 601 and that which was in effect after Executive Order 601 was promulgated. It may be that there was a legal claim on the land before August 10, 1949, but the claimant decides to go back to the states and give it up. The next person who settles there must stay on one side or the other of the road, and the wider right of way becomes effective. Let us assume that the claimant who was there before August 10, 1949, decides voluntarily that he wants to be on only on side of the road, and extend his claim further back to obtain other desirable lands. In effect, therefore, he gives up his claim to the other side of the road, and immediately the wide right of way becomes effective on that side, but the narrow right of way stays in effect on the side which the claimant retains. In no one given spot will anybody be able to determine what width the right of way is without referring to official plans in the Land Offices.

Let us assume another situation. A claimant was situated within 50 feet of the center line of a through road before Executive Order 601 was promulgated. For some reason he built his house within 50 feet of the road. Then he decides that he will have to go back to the states, and sells his house and gives up his claim to another individual. This sale we will assume was made after August 10, 1949. Immediately the house is in trespass, as it is located within the right of way, and the second claimant must move it back in order to get it on his homestead claim, which starts 100 feet from the center line of the road, if the road is a feeder road, and 150 feet from the center line of the road if it is a through highway. If this situation should develop along the Alaska Highway, of course, the man would have to move the house back 300 feet from the center line of the road.

Of course the Road Commission will straighten out many of the kinks in its highway system. Whenever it does that, it leaves strips of no man's land, which are withdrawn from entry. If these strips are restored to entry, the adjoining land owner does not have preference, but veterans of World War

II have preference to obtain these strips of land. We have been advised that the withdrawal becomes effective when the Road Commission sets its survey stakes through the public domain. In some cases I would imagine that the Alaska Road Commission officials change their minds and locate the road elsewhere than where it was first surveyed. Then we may have a very real difference of opinion as to where withdrawals actually do exist.

Previously in this memorandum, I mentioned that additional expense results from the requirement that we survey the roads. Each session it would be necessary to hire two draftsmen to keep up with the work of a field crew and to do a little extra work otherwise. It would take this one survey crew working indefinitely as we do not know how many roads are located within the rectangular surveys at present, or do we know how many roads are to be built by the Alaska Road Commission in the future. We are unable to estimate how many survey crews it actually would take to keep current with this work, but it is conservatively estimated that it would cost at least $31,000 per crew each season.

If the road rights of way were easements instead of withdrawals, it would not be necessary for us to delay processing of the applications for final proof by veterans or others. It would not again cause us to build up a backlog which will extend for 2, 3 and sometime 5 years before the surveys are all completed. The Alaska Road Commission could change their rights of way under the act of July 1947, without there being any question as to the ownership of the land. The entryman would still own the land, and the Alaska Road Commission would have an easement across it. There would not be additional expense to the taxpayers of hiring additional survey crews, and there would not be the delay in the survey program that will result in our putting experienced men on the road survey work instead of on other work that requires attention.

The situation is very grave. The results of the promulgation of Executive Order 601 were not foreseen, but now that we are operating with it in effect, we can see it's failing, and we should act accordingly.

Readers are requested to bring typographical or other formal errors to the attention of the Clerk of the Appellate Courts, 303 K Street, Anchorage, Alaska 99501, in order that corrections may be made prior to permanent publication.

THE SUPREME COURT OF THE STATE OF ALASKA

RESOURCE INVESTMENTS, a joint venture composed of HAROLD J. MOENING, DAVID G. FRITZ, BRUCE G. PURCELL, ALBERT A. KELLY and HARVEY P. PITTELKO,	)	
Appellants,	)	File No. 7229
v.	)	OPINION
STATE OF ALASKA, DEPARTMENT OF TRANSPORTATION & PUBLIC FACILITIES,	)	
Appellee.	)	[No. 2853 - July 27, 1984]

Appeal from the Superior Court of the State of Alaska, Third Judicial District, Anchorage, Karl S. Johnstone, Judge.

Appearances: Mary K. Hughes and Steven S. Tervooren, Hughes, Thorsness, Gantz, Powell & Brundin, Anchorage, for Appellant. Bruce Tennant, Assistant Attorney General, Anchorage, Norman C. Gorsuch, Attorney General, Juneau, and Eugene F. Wiles and Marc D. Bond, Delaney, Wiles, Hayes, Reitman & Brubaker, Inc., Anchorage, for Appellee.

Before: Burke, Chief Justice, Rabinowitz, Matthews, and Compton, Justices, [Moore, Justice, not participating.]

MATTHEWS, Justice.

This appeal follows the trial of an eminent domain action in which the State acquired a thirty acre parcel in Anchorage owned by Resource Investments. The land is situated next to the Old Seward Highway. Prior to trial the superior court granted the State's motion for summary judgment, holding that the State already had a 100 foot wide right-of-way along Old Seward Highway. This removed approximately two acres from the parcel. Resource Investments appeals this decision, contending that the State only had a thirty-three foot right-of-way.

Following a jury trial on the issue of just compensation, the superior court entered judgment on the verdict for $5,061,040, an amount more than 10% larger than the total amount deposited by the State, thus entitling Resource Investments to an award of attorney's fees under Civil Rule 72(k). The court awarded Resource Investments $115,000 for attorney's fees and $76,877.13 for costs. Resource Investments has appealed these amounts claiming that the superior court erred in not awarding actual costs of $149,918.49 and attorney's fees of $357,720.14.

I. THE RIGHT-OF-WAY ISSUE

The property in question was acquired by Resource Investments in 1966 from John Schandelmeier, the original patentee. Schandelmeier filed his application for homestead entry on March 27, 1946 and continuously lived on the property thereafter. He received the patent to his land on June 6, 1951

285

from the Bureau of Land Management of the United States Department of the Interior. On August 10, 1949 the Secretary of the Interior issued Public Land Order (PLO) 601, which, among other things, withdrew for highway purposes 100 feet on each side of the center line of the Old Seward Highway. The withdrawal was, however, subject to "valid existing rights." The question presented is whether Schandelmeier's pre-patent homestead entry was a valid existing right under the terms of PLO 601. If it was then PLO 601 did not effect a withdrawal from the property.

The landowner's situation in the present case is virtually identical to that of Hansen Associates in State v. Alaska Land Title Association, 667 P.2d 714 (Alaska 1983) (ALTA). There the original patentee had made his homestead entry prior to the issuance of PLO 601 but did not receive his patent until after PLO 601 became effective. We rejected the State's contention that it owned a 100 foot right-of-way, holding that a homestead entry was a "valid existing right" that was expressly excepted from withdrawal by PLO 601's own terms. Id. at 724. The State asks us to reconsider this decision.

In ALTA all parties, including the State, agreed that PLO 601 was based on Executive Order 9337[1] which in turn was

---

1. Executive Order 9337 provides in relevant part:

(Footnote Continued)

995

based on the Pickett Act, 43 U.S.C. § 141 et seq. Id. at 724. In the present case, the State agrees that PLO 601 is based on Executive Order 9337, but argues that the Executive Order is based in part on the Pickett Act and in part on the inherent authority of the President of the United States to withdraw public lands for public purposes. The significance of this distinction is that while the Pickett Act withdrawals may not include lands embraced in any lawful homestead entry, no such limitation applies to withdrawals made under the inherent authority of the President.

Although the State may well be correct that Executive Order 9337 is based on the President's inherent authority as well

---

(Footnote Continued)

> AUTHORIZING THE SECRETARY OF THE INTERIOR TO WITHDRAW AND RESERVE LANDS OF THE PUBLIC DOMAIN AND OTHER LANDS OWNED BY OR CONTROLLED BY THE UNITED STATES.
>
> By virtue of the authority vested in me by the Act of June 25, 1910, ch. 421, 36 Stat. 847 [Pickett Act], and as President of the United States, it is ordered as follows:
>
> Sec. 1. The Secretary of the Interior is hereby authorized to withdraw or reserve lands of the public domain and other lands owned or controlled by the United States to the same extent that such lands might be withdrawn or reserved by the President, and also, to the same extent, to modify or revoke withdrawals or reservations of such lands. . . .

(Emphasis added).

as on the Pickett Act, that fact is not determinative of the meaning of the phrase "valid existing rights" in PLO 601. In Stockley v. United States, 260 U.S. 532, 544, 67 L.Ed. 390, 395 (1923), the United States Supreme Court recognized that an unperfected homestead entry was within an excepted category of "existing valid claims" excluded from the terms of a government withdrawal order. The court stated:

> [T]here is excepted from the operation of the order "existing valid claims." Obviously this means something less than a vested right, such as would follow from a complete final entry, since such a right would require no exception to insure its preservation. The purpose of the exception, evidently, was to save from the operation of the order claims which had been lawfully initiated, and which, upon full compliance with the Land Laws, would ripen into a title.

For the same reason, it seems apparent that the Secretary of the Interior intended to except pre-patent homestead entries from the operation of PLO 601.

We conclude that Schandelmeier's entry was a valid existing right, therefore no part of his homestead was affected by PLO 601. Accordingly, we REVERSE the trial court's grant of summary judgment which held that the State owned a 100 foot right-of-way along the Old Seward Highway and REMAND for a determination of just compensation as to the seventy-seven foot strip of land extending beyond the thirty-three foot right-of-way conceded by Resource Investments.

II. COSTS AND ATTORNEY'S FEES

The award of costs and attorney's fees in eminent domain cases is governed by Civil Rule 72(k).[2] Resource Investments is entitled to an award of costs and attorney's fees under Rule 72(k)(3) because the award it obtained was more than ten percent larger than the amount deposited by the State.[3] Full attorney's fees are the norm under Civil Rule 72(k), but those

---

2. Rule 72(k) provides:

> Costs and attorney's fees incurred by the defendant shall not be assessed against the plaintiff, unless:
>
> (1) the taking of the property is denied; or
> (2) the plaintiff appeals from the allowance of the master and the defendant does not appeal; or
> (3) the award of the court was at least ten (10) percent larger than the amount deposited by the condemning authority or the allowance of the master from which an appeal was taken by the defendant; or
> (4) the action was dismissed under the provisions of paragraph (i) of this rule; or
> (5) allowance of costs and attorney's fees appears necessary to achieve a just and adequate compensation of the owner.
>
> Attorney's fees allowed under this paragraph shall be commensurate with the time committed by the attorney to the case throughout the entire proceedings.

3. The jury awarded $5,061,040.00. The State had deposited $3,510,000.00.

fees must be both reasonable and necessarily incurred to achieve just and adequate compensation for the owner. Triangle, Inc. v. State, 632 P.2d 965, 970 (Alaska 1981). We will not disturb a trial court's decision to award less than the property owner's actual costs or fees unless it appears that the court's decision is an abuse of discretion. Badger Construction v. State, 628 P.2d 921, 924 (Alaska 1981). When a trial court decides not to award full attorney's fees and costs it must state its reasons. Triangle, 632 P.2d at 970.

A. Attorney's Fees.

In the present case, Resource Investments claimed actual attorney's fees of $357,720.14. The superior court determined that $115,000.00 were reasonable and necessarily incurred. In making this determination the trial judge issued a five page written order which explained why he did not accept the full fees requested. The full text of the order is set forth in the Appendix. The most important of the trial judge's reasons, as we view his order, are as follows: (1) there was an unnecessary utilization of two and sometimes three attorneys at trial and pre-trial proceedings at which the presence of one attorney would have sufficed; (2) the time spent by the property owner's attorneys in preparing for trial was excessive in view of the straightforward nature of the issues to be tried; (3) the time spent in resolving the question concerning the taking of the easement was excessive and not reasonably related to the

complexity of the issue; (4) the claim of $17,887.65 in attorney's fees for preparing motions for costs and attorney's fees was not only excessive in itself but suggested excessiveness as to all of the fees requested; and (5) attorney Richards' billings for travel time to and from Alaska were unreasonable and his hourly rate of $175.00 was also unreasonable.

We regard these reasons as an adequate explanation for the court's determination and we are unable to say that the determination was an abuse of discretion. We suggest, however, that the trial court review its award on remand in connection with the third reason listed above, namely that excessive time was spent concerning the question of the taking of the easement. In light of the determination on the merits on that question reflected in today's opinion, the trial court may find that additional fees are warranted.

B. Costs

Resource Investments claimed costs of $149,908.49. The clerk taxed costs of $19,846.00. The clerk did not consider costs for expert witnesses, but deferred to the court concerning that subject. The court allowed costs of $76,877.13 including the costs taxed by the clerk.

On appeal Resource Investments claims that the court erred in failing to award costs in thirteen categories:[4]

(1)	Airfares:		
	6/18/82	Tervooren air fare for Tollefson deposition	$ 426.00
	7/21-30/82	Richards air fare for trial	714.94
		Subtotal	$1,140.94
(2)	Actual expenses for attending depositions and trial:		$3,308.75
	The clerk allowed $80.00 per diem in lieu of actual expense amounting to:		1,509.78
		Subtotal	$1,798.97
(3)	Meeting expenses, travel of attorneys, clients and witnesses to attend periodic meetings. Appellants do not state in their briefs the total amount of this claim but refer us to Appendix A of their brief which contains eight items totaling:		$11,182.14
	Some of these items are plainly duplications of items in other categories. We exclude the expert expenses for 9/2-3/80 and 8/21-25/80 and the attorney expenses relating to 6/17-18/82, 6/18/82 and 7/21-30/82 as those categories are substantially duplicated by other categories. The excluded categories total:		3,234.60
	Thus, for purposes of determining what the appellants claim is, we consider this category to amount to a claim of		$ 7,947.54

---

4. Resource Investments claims that the court erred in failing to award its actual costs of $149,908.49. It then discusses in general fashion numerous costs that were reduced or not mentioned by the superior court. We have itemized its claim into thirteen categories for ease of discussion. Cost items not discussed in its brief were deemed abandoned.

(4)	Actual copying costs	$4,277.40
	Amount allowed by clerk	3,638.82
	Amount of claim	$ 638.58
(5)	Lexis search costs	$ 44.00
(6)	Telecopy, mileage and parking fees:	$ 108.75
(7)	DOWL Engineering surveying and drafting work to verify the size of the takings	
	3/13/81	$1,528.75
	5/26/81	385.26
	Subtotal	$1,914.01
(8)	Soils drilling and testing:	$2,345.00
(9)	Appraisal consultations	
	Norene Realty	$ 75.00
	Alaska Valuation Services	960.00
	Subtotal	$1,035.00
(10)	Disallowance of out of $7,050.00 claimed in costs attributable to Dr. Twelker - soils expert	$3,020.00
(11)	Disallowance of costs with respect to Clifford Moles - architect	$10,795.50
(12)	Reduction in fees and costs of John Day - appraiser.	
	Claimed:	$21,660.63
	Allowed:	14,850.63
	Amount claimed on appeal	$ 6,810.00
(13)	Ronald Hoefer - appraiser.	
	Total claimed:	$61,008.17
	Allowed:	35,782.92
	Balance claimed on appeal	$25,225.25
	TOTAL COSTS CLAIMED ON APPEAL	$62,823.54

The court gave no reason for disallowing items 1, 3, and 5 through 9 and for reducing items 2 and 4. As to these

items we remand so that the court may express its reasons for its action.[5]

The court failed to allow costs for the June 16, 1982 trip to Anchorage of Resource Investments' soils expert, Dr. Twelker. This trip was for the purpose of on-site field work and appears to have been reasonably necessary. On remand, costs should be allowed for this trip.

The court disallowed all costs of Clifford Moles, the defendants' expert architect, stating he did not testify at trial. The court subsequently corrected this factual misstatement, but failed to award any of Mr. Moles' costs to defendants. This omission must be corrected as Mr. Moles' testimony was found by the court to have been necessary.

The trial court disallowed a trip to Anchorage of Resource Investments' appraiser, John Day, begun on November 9, 1981. This trip was taken for appraisal field work and appears to have been reasonably necessary. On remand, the court should award costs for this trip.

The trial court disallowed eleven of the fourteen trips taken by Resource Investments' appraiser Roland Hoefer. The court did not abuse its discretion in concluding that not all of the trips were necessary. However, we believe that the court

---

5. The court is also authorized to award any of these items if it finds that they were improperly omitted or reduced.

should more fully explain why the following trips taken by Mr. Hoefer should not be allowed: 9/2/80, trip to Anchorage to inspect property; 4/10/81, trip to Anchorage to attend Master's hearing; 3/9/82, trip to Anchorage to continue deposition; and 3/26/82, trip to Anchorage to continue deposition. The court is authorized to award costs for these trips if it determines on remand that the trips meet the reasonable and necessary standard.

REVERSED and REMANDED for action consistent with this opinion.

Clerk of the Trial Courts
By _____ Deputy

STATE OF ALASKA, DEPARTMENT OF TRANSPORTATION & PUBLIC FACILITIES, Plaintiff, vs. 29.513 Acres, more or less; RESOURCE INVESTMENTS, a joint venture, et al., Defendants.	Case No. 3AN-80-7419 Civil Minnesota Drive Extension Project No. OF-031-2(47) Parcel Nos. A-104 and A-104B

ORDER (ATTORNEYS' FEES)

The defendant landowner moved for attorneys' fees in the amount of $339,832.25 through August 31, 1982. Since that date, the landowner has requested additional attorneys' fees for work apparently rendered by Hughes, Thorsness, Gantz, Powell & Brundin in the amount of $17,887.65. The total requested through January 5, 1982, is presently $357,720.14.

Of the total, defendant asserts a breakdown as follows:

Richard Richards (non-resident counsel who participated in trial)	$155,629.00
Mary K. Hughes, Steve Tervooren, and other attorneys in the firm	202,091.14

The landowner asserts that the amounts requested were reasonably and necessarily incurred to obtain just compensation for the landowner.

Even though the sums involved in the trial were large, this case involved a relatively simple question of just compensation for a taking of approximately 40 acres at the intersection of the Old and New Seward Highways and O'Malley Road. Initially, there was a partial taking by the state which matured into a total-taking substantially reducing the complexity of the litigation.[1]

[1] A full taking made it unnecessary for landowner to fully prepare for and prove damages to the remainder, which, according to landowner's counsel, reduced the complexity of the case significantly.

According to the landowner, Mr. Richards was associated for the purpose of his trial expertise in the field. His rate charged to the landowner was $175 per hour, while the rates charged by Anchorage counsel were approximately one-half the hourly rate charged by Mr. Richards.

Counsel for landowner argues that they are entitled to actual attorneys' fees if the court concludes that the professional services were necessarily incurred to achieve just compensation by the landowner. The State of Alaska argues that the fees charged were excessive and unreasonable and not necessarily incurred to achieve just compensation.

This court has carefully reviewed the itemized billings from respective counsel to the landowners, together with the affidavits in support of the motion for attorneys' fees. In addition, the court has given due regard to the length of this trial (approximately two weeks), the pretrial motions and work which necessarily accompanied them, the overall complexity or lack of complexity of the issues involved, the amount in controversy, the time spent in court and during pretrial hearings and conferences, and is otherwise fully informed of the circumstances of this case.

During the course of the trial, Mr. Richards and Ms. Hughes were present almost all of the time. Ms. Hughes participated in the examination and cross-examination of non-expert witnesses for the most part, while Mr. Richards participated in the examination and cross-examination of expert witnesses. Mr. Tervooren, additional counsel for the landowner, was present a portion of the time in court, sitting in the back of the room, but took no active role in the trial itself. Pretrial matters generally involved both Ms. Hughes and Mr. Tervooren. Both counsel appeared for practically all hearings and pretrial conferences. On the other hand, Mr. Richards did not appear before the court until immediately before trial.

The landowner contends that it is entitled to full compensation for attorneys' fees, asserting that all fees were necessarily incurred to achieve just compensation. The court agrees that the landowner is entitled to just compensation, including attorneys' fees, provided such attorneys' fees are reasonable, given all the circumstances of the case. To hold otherwise would essentially be giving the landowner a blank check which would be contrary to law and public policy.

The court finds that to award the fees requested by landowner would be unreasonable under the circumstances. The charges by attorney Richards were not reasonably necessary to achieve just compensation. Mr. Richards' statements show significant charges for his professional time in route to and from Alaska. His hourly charges are significantly higher than what the court believes to be a reasonable rate charged by skilled Anchorage, Alaska lawyers. The case did not involve any unusual complexity nor did it take a protracted length of time to try. The issues were straight forward, and while the court recognizes a need for preparation, the time spent in preparing for this trial appears excessive and not reasonably related to the issues presented.

Time spent in resolving the question of the taking of a road easement which was finally resolved by the trial court against the landowner appears grossly excessive and not reasonably related to the complexity of the issue which had been previously argued before this court on at least two other occasions and was pending on appeal at the time this court resolved the issue in the instant case.

Similarly, it was not reasonably necessary to secure just compensation for two and sometimes three attorneys to be present on behalf of the landowner at most all stages of the litigation.

The landowner argues that the request for fees is reasonable as it is less than what C.R. 82(a)(1) would permit.

1011 2853

The landowner argues that a Rule 82 fee calculation would lead to a presumed partial fee reimbursement in excess of $500,000.00, thus justifying at least the $357,000.00 requested.

This argument assumes, however, that the full amount awarded by the jury was in dispute. In reality, if a Rule 82 calculation was made, it would have been made on not more than the difference between what had been deposited and what was eventually achieved through a jury verdict. The amount deposited was not disputed, had been already paid to the landowner, and would not have been utilized as a basis for calculation of Rule 82 fees by this court. In fact, a good argument can be made to limit the Rule 82 calculation to the difference between the amount of the appraisal by the state and the verdict finally arrived at by the jury. In either case, the attorneys' fees under C.R. 82 would be somewhere between $80,000.00 and $150,000.00.[2]

Finally, the court has reviewed the filings since August 31, 1982, in support of the landowner's claim to an additional $17,887.65 in attorneys' fees. The claim is somewhat unsupported but it is reasonably apparent that these fees were incurred in the landowner's attempt to recover their costs and attorneys' fees. A certain pyramiding of attorneys' fees is reasonably necessary to protect the landowner's rights in obtaining just compensation. However, the amount claimed suggests another "blank check" approach to these fees as was done in the application for fees incurred prior to August 31, 1982.

Provided that the records were maintained in an orderly fashion (which I would expect to have been accomplished), application for costs and attorneys' fees would not appear to involve any complexity or significant time. A compilation of the statements for services rendered together with an itemization of the costs incurred, with a short brief, would appear to be all that

---

[2]C.R. 82 is not the controlling rule. It is used simply as an analogy and was not considered by the court in its determination of attorneys' fees in this case.

101 2853

was necessary to present the landowner's claims. In addition, an appearance before the clerk at the cost bill hearing and an appearance before the court on the application for costs and attorneys' fees was required.

This court finds that almost $18,000.00 is not reasonable and is unnecessary to the presentation of the landowner's application for costs and attorneys' fees.

Having given consideration to the factors hereinabove, this court awards the sum of $110,000.00 as attorneys' fees which were reasonably and necessarily incurred to acquire just compensation through August 31, 1982. Additionally, this court finds that the sum of $5,000.00 was reasonably and necessarily incurred by the landowner to process its application for costs and attorneys' fees from August 31, 1982 through the present date. The sum of $115,000.00 shall be inserted as attorneys' fees awarded to the landowner in the approved form of judgment.

DATED at Anchorage, Alaska, this 25 day of January, 1983.

Karl S. Johnstone

9-1-55 Alaska Road Com.

Memorandum

To: Mr. Flakne

From: Mr. Silverman

Subject: Authority of Alaska Road Commission to construct a bridge within the corporate limits of a town.

Reference is made to your memorandum of April 26, asking whether the Alaska Road Commission has authority to construct a bridge within the corporate limits of a town.

The authority of the Alaska Road Commission to construct and locate roads in Alaska is derived from section 2 of the Act of January 27, 1905, as amended by the Act of May 14, 1906 (34 Stat. 192; 48 U.S.C.A. sec. 322), which provides: "The said Board (Secretary) shall have the power . . . to locate, lay out, construct, and maintain wagon roads and pack trails from any point on the navigable waters of Alaska to any town, mining or other industrial camp or settlement, or between any such town, camps, or settlements therein, if in their judgment such roads or trails are needed and will be of permanent value for the development of Alaska . . . " (Emphasis supplied.)

I believe it is apparent from the foregoing that the Alaska Road Commission is without authority to construct a bridge within the corporate limits of a town.

FEDERAL HIGHWAY ACT OF 1970 AND MISCELLANEOUS BILLS

WEDNESDAY, MAY 20, 1970

U.S. SENATE, SUBCOMMITTEE ON ROADS OF THE
COMMITTEE ON PUBLIC WORKS,
Washington, D.C.

The subcommittee met at 10 a.m., pursuant to call, in room 4200, New Senate Office Building, Senator Mike Gravel, (Member of the subcommittee) presiding.

Present: Senators Gravel, Jordan, and Baker.

Also present: Barry Meyer, counsel, Tom Jorling, minority counsel, and Adrien Waller, professional staff member.

Senator GRAVEL. The hearing will come to order.

It is my pleasure to have my senior colleague from the State of Alaska, Senator Ted Stevens, to present testimony on S. 933, a copy of which is included in the record at this point.

91ST CONGRESS
1ST SESSION

S. 933

IN THE SENATE OF THE UNITED STATES

FEBRUARY 7, 1969

Mr. STEVENS introduced the following bill: which was read twice and referred to the Committee on Public Works

A BILL

To vacate and relinquish the reservation of rights-of-way for certain purposes made pursuant to section 321 (d) of title 48, United States Code.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That any right-of-way for roads, roadways, highways, tramways, trails, bridges, and appurtenant structures reserved by section 321 (d) of title 48, United States Code (61 Stat. 418, 1947), not utilized by the United States or by the State or territory of Alaska prior to the date of enactment hereof, shall be and hereby is vacated and relinquished by the United States to the end and intent that such reservation shall merge with the fee and be forever extinguished.

II

Senator GRAVEL. Senator Stevens, you have the floor.

STATEMENT OF HON. TED STEVENS, A U.S. SENATOR FROM THE STATE OF ALASKA

Senator STEVENS. Thank you, Mr. Chairman.

I would like to introduce to the members of the committee our Commissioner of the Department of Highways of the State of

Alaska, Robert L. Beardsley. He is accompanied by the Director of the Right-of-Way Division, Mr. Dick Chitty. I am here with my legislative assistant, Rod Rickett.

Mr. Chairman, thank you for this opportunity to appear before you on behalf of legislation which has long been needed to correct a glaring inequity among property owners in my State.

In 1947 Congress enacted a law which automatically reserved, in all Federal patents issued thereafter, rights-of-way for highways built either by the Federal Government or by the territorial government of Alaska. This act was terminated shortly after statehood, but unfortunately the reservations are still a valid cloud on all patents issued between 1947 and statehood.

In simple terms, this means that the Federal Government can build a road across property subject to the reservation without paying any compensation, without any condemnation proceedings—in short, without any concern whatever for the property rights of the owner. This condition does not exist on any land patented by the Federal Government either prior to July 24, 1947, the effective date of the act, or since its repeal July 1, 1959. Those persons holding property subject to this reservation have found difficulty in obtaining financing for development because of the possible entry on to the property by the appropriate road-building authority and subsequent uncompensated devaluation of the property.

So acute are the inequities involved in this reservation that the State of Alaska, by act of the State legislature in 1966, renounced its rights under this reservation and now pays compensation and follows due process for all rights-of-way across private lands, whether subject to the 1947 act or not. My bill, S. 933, would eliminate the reservations altogether.

This bill will cost the Federal Government very little. There are few rights-of-way not already taken that will be acquired for Federal road-building purposes in the future. The State has renounced its rights under the act and the Federal Government has no intention at present of undertaking any major road-building activities of its own in Alaska. But, as long as the reservations remain in effect, the Bureau of Public Roads, the Post Office Department or the Forest Service could expropriate land without compensation. It is this possibility that a right-of-way could be taken, and not the likelihood that it will, which creates the cloud on the title and the resulting hardship to the owner.

A second important inequity which results from this reservation is the inability of the Federal Highway Administration to provide participating Federal Funds for the acquisition by the State of rights-of-way that could have been acquired at no cost to the State if it chose to exercise its rights under the reservation. To date, this has cost the State an additional $1.2 million in lost matching funds.

Alaska therefore finds itself in the paradoxical situation of having acted to correct an inequity to some of its citizens only to create an even greater inequity for the State as a whole.

The late Senator Bartlett and former Senator Gruening introduced a measure in the 90th Congress to eliminate this reservation. An unfortunate series of events, including two assassinations, prevented consideration of their measures by this committee. Because of the importance of this measure to the orderly development of my State, I am continuing their efforts to get this legislation passed.

Mr. Chairman, S. 933 will do no more than place my State in the same position as the other 49 States. It will place my State's highway department in the same position as those of the other States regarding the obtaining of rights-of-way. It will place Federal aid for rights-of-way on the same basis as in other States.

I hope the committee will consider the equities of the property owners and of the State carefully, and will act favorably on S. 933.

Thank you.

Senator STEVENS. Mr. Chairman, this is a bill that has been before the subcommittee before. I am informed that there were incidents that occurred that compelled the cancellation of hearings that were scheduled in prior Congresses. I have mentioned those already.

This is a bill which really is designed to bring about equity for the State of Alaska by eliminating a very harsh provision of the law that existed during territorial days. It is a very simple matter, really. It was an easement in gross, you might say, across all homesteads for any rights-of-way without compensation.

As I pointed out, the State of Alaska determined that it would not take rights-of-way without paying compensation. So, in effect, what we are asking the Congress to do is to recognize the policy that has been set by the State of Alaska to compensate private landowners for the rights-of-way that are taken for public purposes.

I might suggest, Mr. Chairman, before Mr. Beardsley and Mr. Chitty testify, that they have suggested to me that, on line 7, in place of the words "the date of enactment hereof," if the committee would substitute "April 14, 1966," it would in effect recognize the policy of the State of Alaska established on that date by the enactment of legislation which required compensation for the taking of these rights-of-way.

I believe Mr. Beardsley and Mr. Chitty will be able to answer any technical questions. I would be pleased to answer any questions the subcommittee might have of me.

Senator GRAVEL. I have none.

Senator Jordan?

Senator JORDAN. Thank you, Senator.

Would backdating affect the retroactive payment feature of this legislation?

Senator STEVENS. I am informed that the Federal Department of Highways has, in fact, reserved matching funds from the State's allocation for payment of the Federal portion of the rights-of-way that had been compensated by the State.

So, it would have the effect of freeing this money that has been reserved by the Federal Department of Highways for this purpose. It would cause no additional appropriations, or expenditure of money since these funds are part of the State's entitlement of

highway funds. And these funds have, as I understand it, already been set aside. Mr. Beardsley can tell you about that. It would have the effect of recognizing that the rights-of-way that had been acquired and paid for by the State since that date are eligible for the allocation of Federal matching funds, and it would release these funds.

Senator JORDAN. In other words, this would reimburse the State of Alaska for money that they have already paid out? Is it correct that Alaska paid the whole cost of the acquisition of this right-of-way?

Senator STEVENS. That is correct.

Senator JORDAN. And you are entitled to 50 percent of its cost from Federal highway funds?

Mr. BEARDSLEY. These are actually ABC funds and the matching ratio that has been established for the State of Alaska would prevail.

Senator JORDAN. What is that rate?

Mr. BEARDSLEY. 92.75 percent Federal, the balance State.

This would, Senator Jordan, place the State on a comparable basis with the other States where they do not have this special reservation clouding titles of land to Federal ownership.

Senator JORDAN. Do any other States have that?

Mr. BEARDSLEY. Not to my knowledge, sir.

Senator JORDAN. Thank you. I am just curious about that retroactive section in that bill.

Senator STEVENS. As I understand it, Senator, it would not increase the allocation. The entitlement is there, and we have not used up our entitlement: so it would mean that it would come out of the funds that have been reserved for the State anyway.

Senator JORDAN. I have no objection to that.

Senator GRAVEL. Senator Baker?

Senator BAKER. Mr. Chairman, I have no questions.

I would simply say that I commend the witness and command the chairman for dedication and devotion to this program.

Senator STEVENS. If I may be excused, the gentlemen can continue.

Thank You.

Senator GRAVEL. Mr. Beardsley, would you have a statement you would care to make?

STATEMENT OF ROBERT L. BEARDSLEY, COMMISSIONER, ALASKA DEPARTMENT OF HIGHWAYS; ACCOMPANIED BY DICK CHITTY, DIRECTOR, RIGHT-OF-WAY DIVISION

Mr. BEARDSLEY. Yes, Mr. Chairman I am Robert L. Beardsley, commissioner of the Alaska State Highway Department. I consider it a privilege to appear before you today and testify in behalf of Senator Stevens' bill S. 933, which will vacate and relinquish the reservation of rights-of-way pursuant to section 321(d) of title 48, United States Code, or more commonly referred to as the 1947 Act Reservation.

I will preface my remarks with a brief history of the 1947 Act Reservation, and how the reservation was exercised by the State of Alaska.

Prior to the years of World War II, the Territory of Alaska experienced little road construction work. Much of the activity of the Alaska Road Commission and its predecessors was conducted across the public domain and required minimal right-of-way acquisition. A marked increase in population in the years following the war and a related increase in activities designed to reduce public lands to private ownership increased the frequency with which right-of-way was necessitated over lands to which title had passed from the United States.

In recognition of this trend and in an attempt to reduce the expenditure of governmental funds, Congress passed the 1947 act effective July 24, 1947.

The effect of this act was to reserve to the Government a right-of-way across lands subsequently passing into private ownership and to thus avoid the necessity of reacquiring lands for future road construction.

The 1947 act was prospective in application only. It applied only to lands which were taken up, entered, or located, or otherwise passed into private ownership after the effective date. Lands entered or patented before July 24, 1947, could not be subjected to the 1947 act unless, perhaps, they were returned to Government ownership during the time it was in effect.

The 1947 act was repealed by Congress effective July 1, 1959. Thus, lands entered or patented after that date are not subject to the act. Title of lands entered or patented from July 24, 1947, to July 1, 1959, continued to remain clouded with the prospect of future road construction causing arbitrary transfers of unspecified portions of said land to the government, without due process or compensation, until April 14, 1966.

In recognition of the continued inequities, the fourth session of the Alaska State Legislature passed legislation, effective April 14, 1966, which provided that no State agency could take land for public purposes without payment of just compensation. While the State of Alaska thus removed the inequities for owners of said land, the State has itself continued to receive inequitable treatment with respect to Federal participation in the acquisition of portions of said lands for highway purposes because of the remaining legal deficiency which Senator Steven's bill, S. 933, seeks to correct.

The repeal of the 1947 act merely eliminated the statutory directive that such a reservation be inserted into the patents of lands thereafter taken up. Lands which were patented subject to the 1947 act before its repeal were in no way affected. The act created an interest in real property which would remain in the Government when the remaining interests constituting the fee title conveyed away. Repeal merely prevented further similar interests from being created, leaving existing interests unchanged.

A reservation is an interest in real property. It is created by the grantor retaining to himself some element of the fee when the

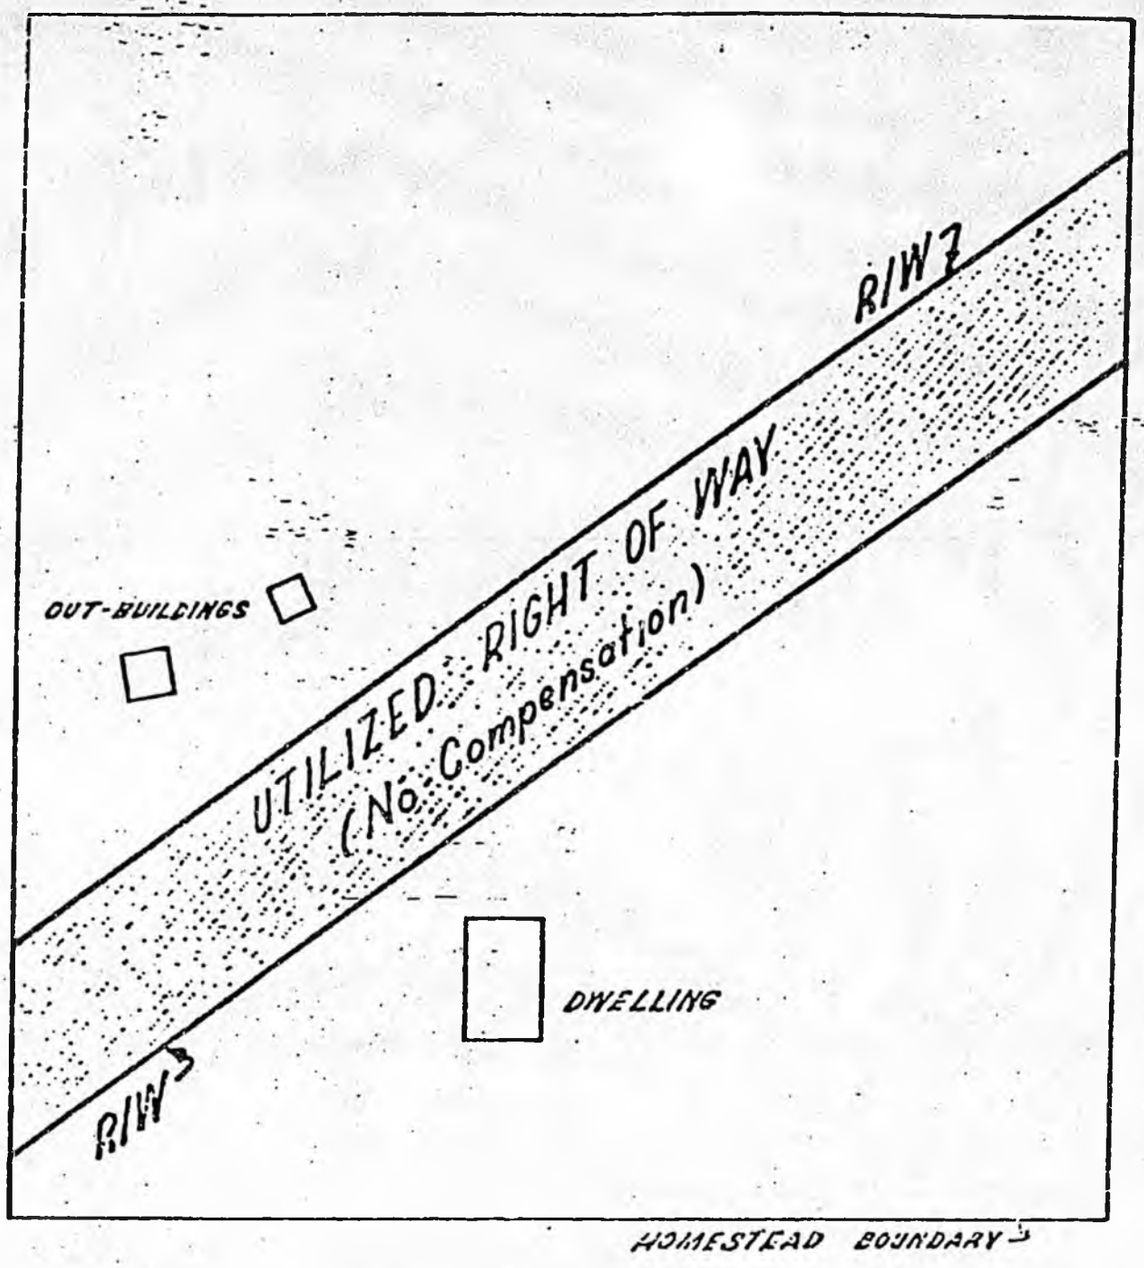
remaining elements are conveyed away. Since this interest never passed to the patentee and was never owned by him it follows that at the time of utilization of the reservation nothing is taken from him for which payment becomes due under the constitutional requirement of compensation for the taking of property.

The precise location and extent of the right-of-way reservation is not indicated in the 1947 act or in the patents issued thereunder. By utilization of the 1947 act reservation, the Government describes and locates on the ground the right-of-way created by the authority of the act. Since the interest utilized has at all times remained in the Government, no real property is taken from the patentee—or his grantee—which necessitates payment of compensation under the law.

The fact that the ownership of the right-of-way has remained in the Government leads to the further conclusion that no compensation is due the patentee by way of severance damages or proximity damages. If, after utilization of the right-of-way, the patentee holds two parcels which are separated by the roadway, he is viewed as having held two separate parcels from the time the patent issued as illustrated in exhibit I.

(Exhibit I follows:)

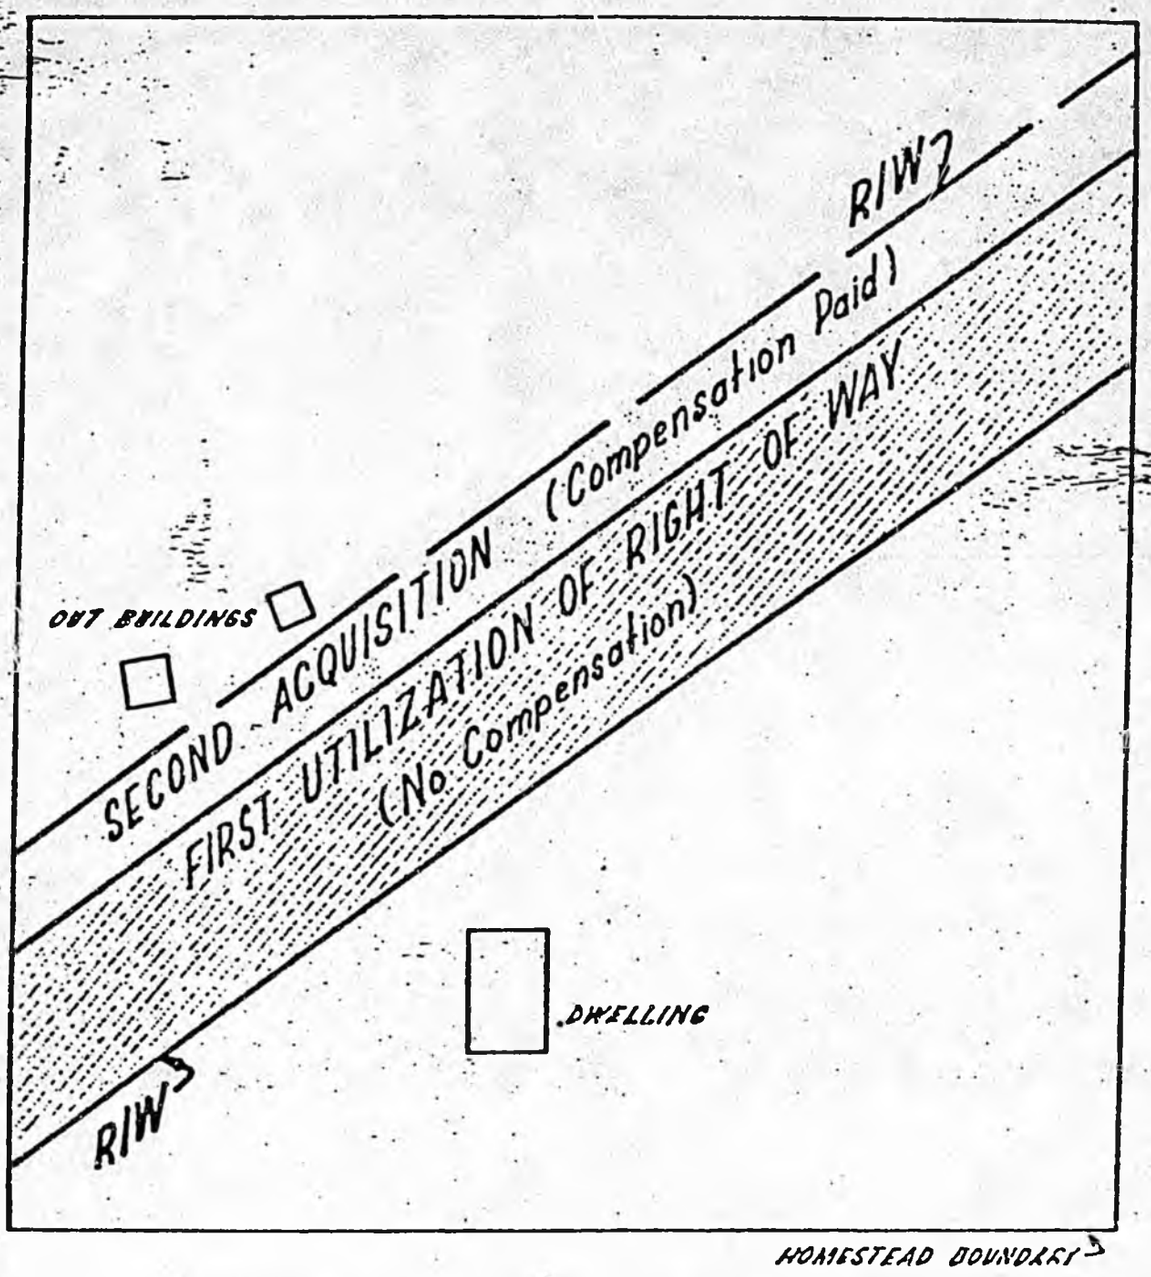
EXHIBIT I



The 1947 act has been interpreted to grant authorization only for the "first utilization." Once the reservation has been utilized in respect to any given patent, the right of way becomes established and located and the State must compensate the owner for any subsequent taking for change of road location, widening of the original right-of-way width, etc., as shown in exhibit II.

(Exhibit II follows:)

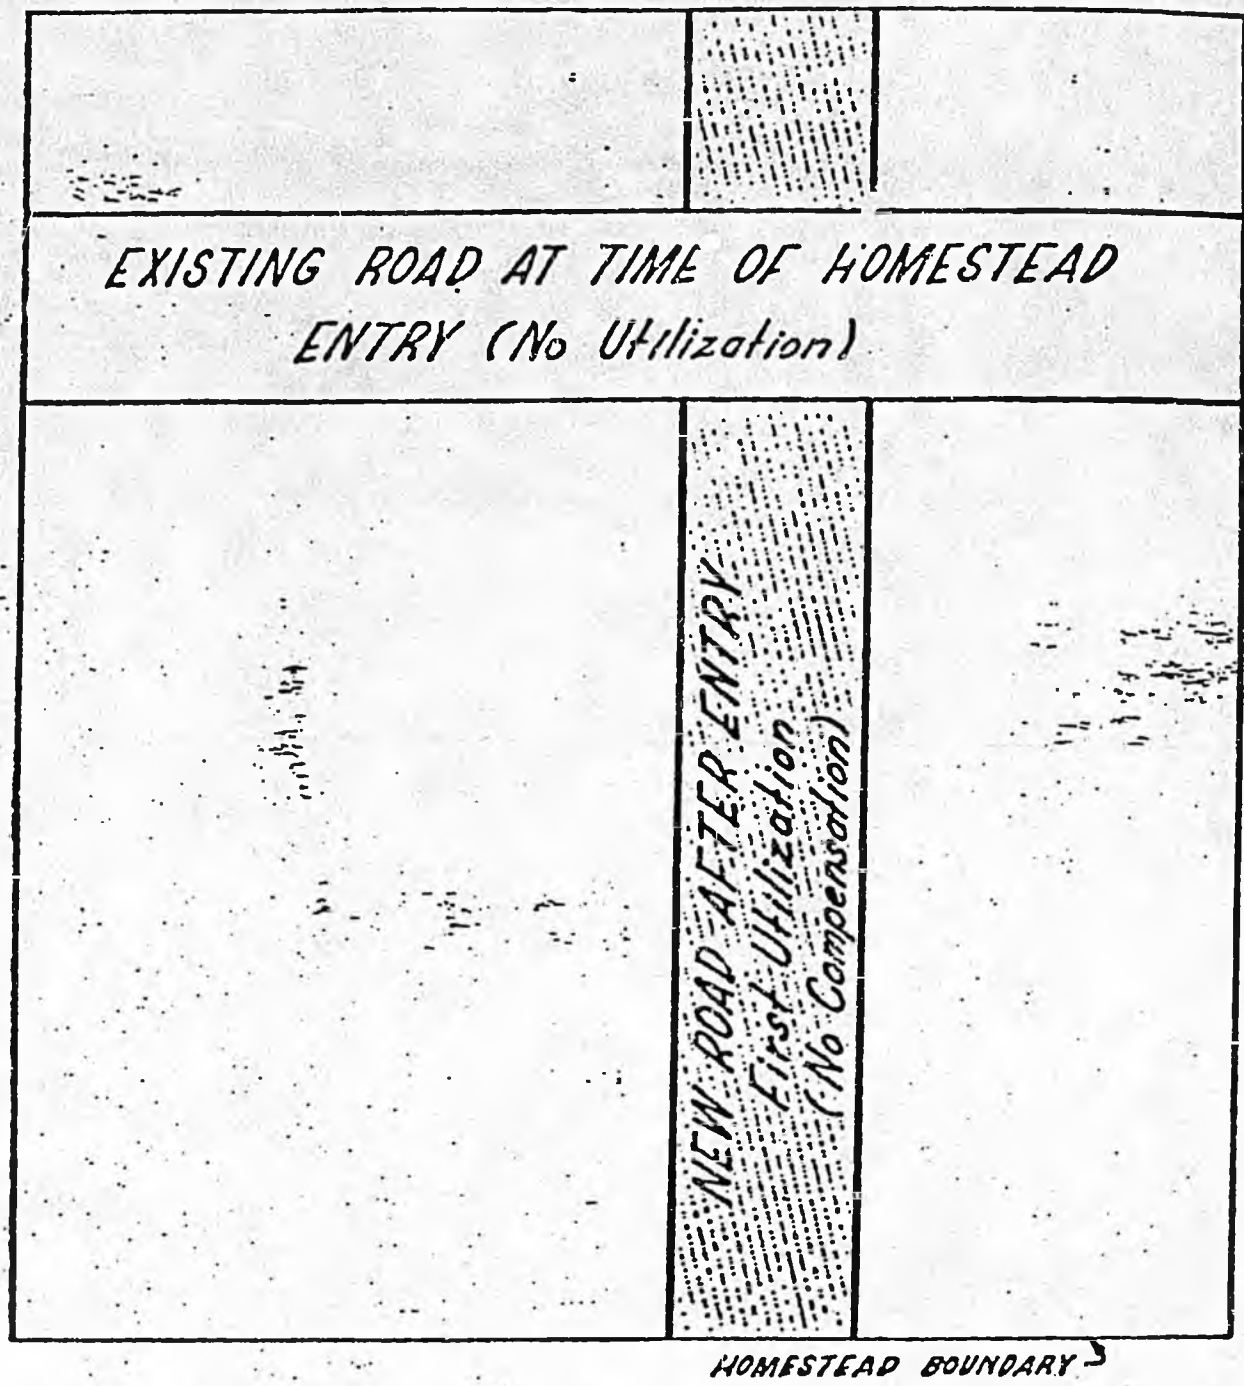
EXHIBIT II



The existence of a road over a parcel prior to entry and patent was not considered a utilization of the reservation. The patentee is considered as having acquired the property subject to the existing road and the reservation of the 1947 act survives. The construction of a road across a parcel subsequent to issuance of patent would constitute a utilization even if no notice of utilization was served. Exhibit III outlines this possibility.

(Exhibit III follows:)

EXHIBIT III



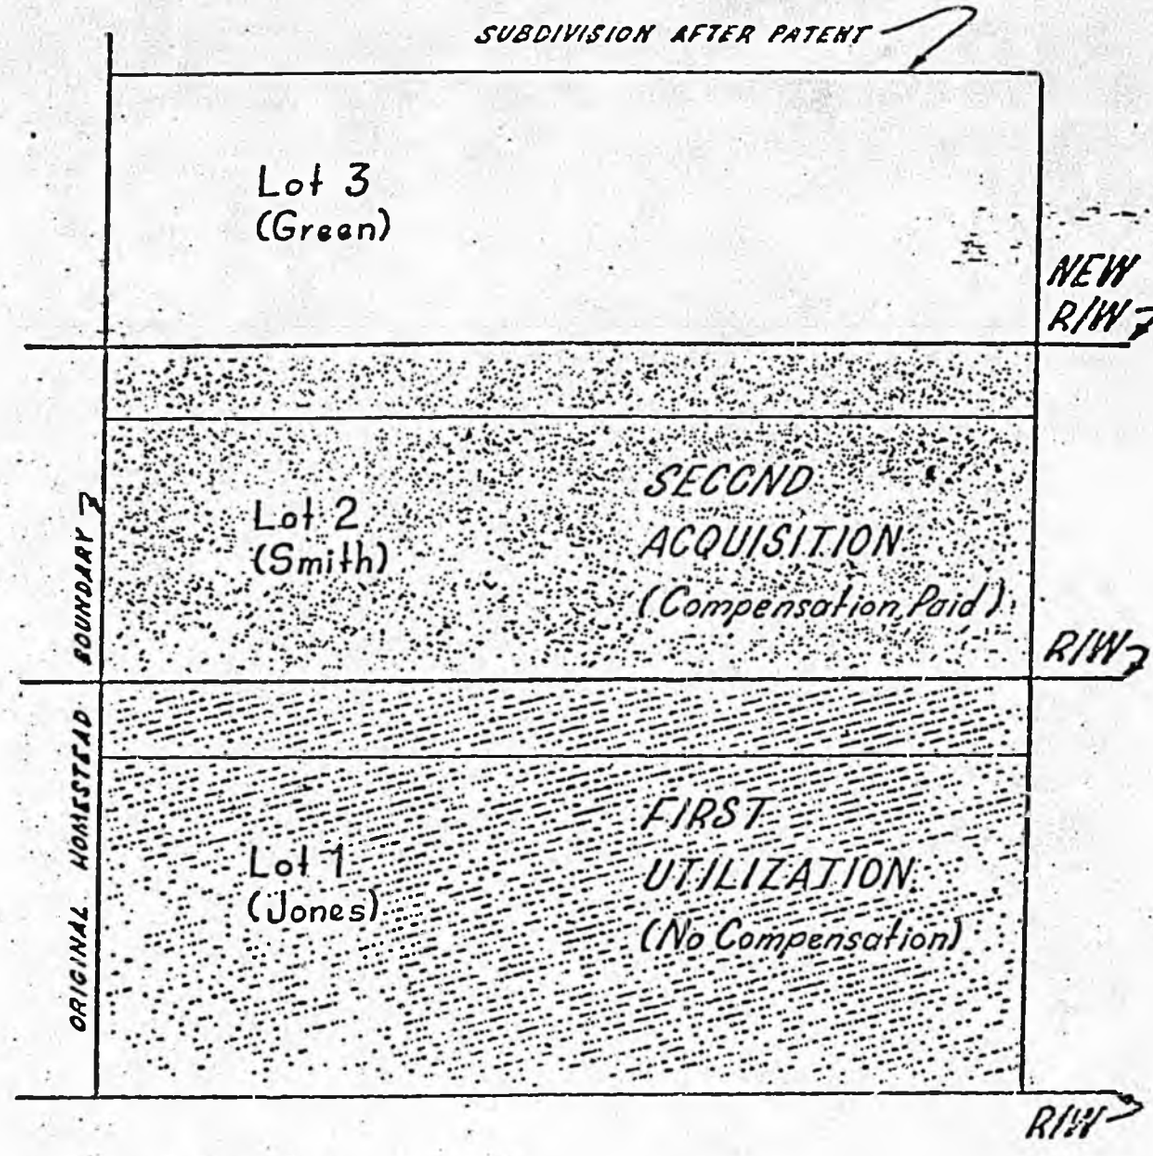
The presence of a utilization may negatived in any case where some agreed consideration was given to the owner at the time a right-of-way was acquired. That is, if the owner accepted any cash or other valuable compensation in return for granting a right-of-way to the Government, the transaction is viewed as a purchase and sale and not as an exercise of the reservation. The 1947 act reservation may be utilized later.

An additional "first utilization" problem is encountered where a tract conveyed by a single patent has since been subdivided and is now held by two or more owners. In this situation, the reservation remains in effect and may be utilized over any portion of the area subject to the original patent even though it may affect two or more of the present lot owners. Location of a right-of-way over one or more of the subdivided tracts constitutes a "first utiliza-

tion" as to the entire area of the original patent. The 1947 act authorized a single free utilization. This reservation is utilized and expended if a right-of-way is located over any part of the land conveyed by a given patent. Such a utilization may be from several owners if the land has been subdivided, but it also may be from only one of the subdivided tracts. Once the reservation has been utilized, the entire tract issued under a given patent is free from the 1947 act reservation. Exhibit IV illustrates this situation.

(Exhibit IV follows:)

EXHIBIT IV



FIRST UTILIZATION - JONES & SMITH RECEIVE NO COMPENSATION
SECOND ACQUISITION - SMITH & GREEN RECEIVE COMPENSATION

The fourth session of the Alaska State Legislature, recognizing the inequities of the 1947 act, passed legislation effective April 14, 1966, commonly called the Alaska Right of Way Act of 1966, providing that no agency of the State may take privately owned

property by the exercise of the 1947 act reservation. The legislature's stated purpose was as follows, and I quote:

> This act is intended to alleviate the economic hardship and physical and mental distress occasioned by the taking of land, by the State of Alaska, for which no compensation is paid to the person holding title to the land. This practice has resulted in financial difficulties and the deprivation of peace of mind regarding the security of one's possessions to many citizens of the State of Alaska, and which, if not curtailed by law, will continue to adversely affect citizens of this State. Those persons who hold title to land under a deed or patent which contains a reservation to the State by virtue of the act of June 30, 1932, ch. 326, sec. 5, as added July 24, 1937, ch. 313, 61 Stat. 418, are subject to the hazard of having the State of Alaska take their property without compensation because all patents or deeds containing the reservation required by that federal act reserve to the United States, or the State created out of the Territory of Alaska, a right-of-way for roads, roadways, tramways, trails, bridges, and appurtenant structures either constructed or to be constructed. Except for this reservation the State of Alaska, under he Alaska constitution and the Constitution of the United States, would be required to pay just compensation for any land taken for a right of way. It is declared to be the purpose of this act to place persons with land so encumbered on a basis of equality with all other property holders in the State of Alaska, thereby preventing the taking of property without payment of just compensation as provided by law, and in the manner provided by law.

Subsequent to the enactment of the Alaska Right-of-Way Act of 1966 the Bureau of Public Roads advised us "that there can be no Federal reimbursement for funds expended by the State of Alaska for the acquisition of right-of-way from land subject to the reservation contained in the 1947 act." They also stated it would take Federal legislation to effectively repeal the reservation.

In response to that statement, the late Senator E. L. Bartlett introduced—for himself and Senator Gruening—2483 on September 28, 1967. Senator Bartlett's introductory remarks outlined the position of Alaskans affected by the 1947 act and I quote his remarks from the Congressional Record of the Senate for September 28, 1967:

> In 1947 Congress enacted a law—48, United States Code, 321d—which reserved an undefined highway right-of-way in all patents for Federal public lands in Alaska. This law, commonly referred to as the 1947 Act, has become notorious in Alaska. While seemingly innocuous, the 1947 act has worked inequities beyond belief as homesteads and other patented lands fall in the paths of urban development and highway improvement projects.
>
> "Although the 1947 act was repealed in 1959, all of those persons who received patent to Federal lands between 1947 and 1959 still live under the threat that a portion of their land might be taken for highway right-ofway purposes at any time without compensation. As a matter of fact, a substantial number of rights-of-way have already been acquired under the 1947 act without compensation to the landowners and many rights-of-way over such lands will undoubtedly be acquired in the forseeable future.
>
> The State of Alaska has found a way to compensate patentees for takings under the right-of-way provision but the Federal Highway Administration refuses on legal grounds to pay the Federal share of such compensation.
>
> Mr. President, it is my firm belief that no one could have foreseen the inequities inherent in passage of the 1947 act. It is also my belief that corective action is overdue. Therefore, I introduce today for appropriate reference a bill which would vacate and relinquish the reservation of rights of way authorized by the 1947 act.

Hearings, scheduled on Senator Bartlett's bill were canceled first because of the assassination of Dr. Martin Luther King, Jr.,

and se_ond because of the assassina_n of Senator Robert F. Kennedy.

Senator Bartlett's untimely death and Senator Gruening's unsuccessful bid for reelection made it necessary to reintroduce S. 248. Senator Stevens graciously did this on February 7, 1959.

Between April 14, 1966, and the present time the State of Alaska has expended approximately $1.2 million of State funds for the acquisition of lands subject to the 1947 act. We are acquiring lands subject to the 1947 act daily so the total amount will continue to increase until Federal legislation is passed.

Senator Stevens' bill would distinguish this inequitable and unjust reservation forever, and the State of Alaska supports its passage. We also believe it to be only just and equitable that the effective date of the bill should relate back to April 14, 1966, so the State of Alaska will be clearly eligible for reimbursement for funds expended from that date until the effective date of this legislation.

Thank you again for this opportunity to appear before you. I will be happy to answer any questions you may have or to furnish the committee any additional information desired.

We would answer any questions, but the questions that have been asked pretty well cover it.

This is really just a minor legal technicality that as long as that particular Federal statute is on the books, the Bureau of Public Roads is not entitled to participate because of this reservation.

It applies only to those lands for which patents were granted during the period of 1947 until statehood.

Senator JORDAN. Mr. Chairman, may I ask the witness a question?

Senator GRAVEL. Yes, sir.

Senator JORDAN. Has any of this fund got anything to do with the Alaskan Highway or is any portion of this money involved in that particular highway? There is only one road that I know about, that is the road that crosses Canada and then goes on through Alaska. Is that a part of this? Is that involved in this?

Mr. BEARDSLEY. Mr. Chitty, my right-of-way director, informs me that portions of the extension of the Alaskan Highway in the State of Alaska itself that were realined were involved in this particular situation.

Senator JORDAN. That is a very difficult road. I have been told, and very expensive to build and to maintain, due to upheaval of the land caused by the heavy frost. Is that a fact?

Mr. BEARDSLEY. Sir, the portion within the State of Alaska is all reconstructed and it is paved, and our maintenance problems, aside from routine maintenance, are not that difficult on this particular section of the highway.

Senator JORDAN. It is the Canadian section that is so bad?

Mr. BEARDSLEY. Yes, sir: in the Canadian section, substantial portion of that highway is just gravel-surface highway, and I am informed that their maintenance cost exceeds $4,500 a mile.

Senator JORDAN. I have been informed that it takes about that much in tires to get across it, too.

Re: Senate Bill 141

Dear Commissioner Knapp:

As you are aware, this firm represents the Alaska Land Title Association, which is a proponent of Committee Substitute for Senate Bill 141.

Senate Bill 141 endeavors to resolve the inequities resulting from certain "floating" easements created by the Federal Government in pre-statehood days. The inequities to the landowner exist because those "floating" easements were never defined in the patents when issued to the homesteaders.

As we have testified, many landowners were allowed to plat and subdivide their properties and neither the federal, nor the State, nor the City governments asserted ownership over these easements. The landowners, since the time of their patents, have paid taxes on the land included in the easements as if they didn't exist. These same landowners were allowed to place structures and improve the land claimed by the State Government, and in some instances, have constructed multi-million dollar buildings within the easements. The landowners NEVER knew of the existence of the easements and many of them don't know today. Patents were issued to homesteaders showing a 33' easement from centerline when, in fact, there were outstanding Public Land Orders which purported to establish 50' and 100' easements from the centerline of certain roads. In the case of local roads, those roads were not even identified by name.

We appreciate the fact that you and this current administration did not cause the problems which are facing the land owners at the current time. As you know, the primary failure was the inability of the local BLM offices in 1949 and later to comply

with the initial withdrawals established by the Washington office of the BLM. These withdrawals were never surveyed and resultingly patentees settled the property never knowing the rights-of-way existed.

Committee Substitute

Let us take this opportunity to explain the rationale of the Committee Substitute for Senate Bill 141 and why we believe it has a minimal annual fiscal impact upon the State budget. First, the Committee Substitute does not relinquish the easements but accepts their continued existence. Consequently, any condemnation proceedings will be shortened to consider only the question of value. The Committee Substitute requires the State to pay compensation for the value of ONLY that portion of the easement which it utilizes in extensions or widenings of existing roads.

We therefore feel that the fiscal note should not be the value of the easements throughout the State, but should be limited to the actual acquisition cost for only those roads which will be expanded in 1986 through 1990.

As you have been advised, the Supreme Court in ALTA v. State, 667 P.2d 714 (Alaska 1983) decided that if the homesteader entered the property before August, 1949, the State must pay compensation for any taking because the PLO right-of-way does not exist as to that land. Therefore, the acquisition cost of that land must be excluded from the fiscal note. Under the circumstances, since Juneau and Fairbanks were settled long before 1949, the State will already be required to pay compensation for most of the highway expansion in those locations. Under present Court decisions, we estimate that one-half of the entries in Kenai and Anchorage occurred before 1949. It is our belief, under the circumstances, that the fiscal note for the Committee Substitute for Senate Bill 141 will be extremely small.

There has been some discussion that the Committee Substitute for Senate Bill 141 will assist only the title companies. That allegation is not true because many landowners do not even have title insurance. Additionally, where there is title insurance the title policy issued on a piece of property goes back a number of years and the value of the policy was calculated at the time of issuance. The properties have substantially appreciated in value and the amount of a claim is directly proportional between the amount of land covered by the policy. Consequently, the bulk of the losses suffered will probably be by individual landowners.

Once again, we wish to reiterate our desire to work with the Administration in its concern to seek some equitable solution to this problem. It does not seem to be in anyone's best interest to publicize the fact that the State will take property without compensation. It does seem, however, in everyones' best interest to come to some solution of this matter legislatively to avoid case-by-case hardship such as that suffered in the early 60's by Otto Schnieder. The time has come for this type of solution. We would be more than willing to meet with you to discuss whatever equitable solution can be devised.

With the reduced fiscal note of Senate Bill 141 it is possible that the distance between our positions is now surprisingly narrowed. Of course, we have already been in contact with Senator Stevens and the entire Congressional Delegation who assure us of their cooperation in attempting either administratively or legislatively to require federal matching funds to acquire the properties under Committee Substitute SB 141.

We are more than willing to meet with you at your earliest convenience in Anchorage or Juneau, to reach any settlement for the citizens of the State of Alaska. We will call you on Monday, March 11, to arrange a meeting.

Sincerely,

GROH, EGGERS & PRICE

SENATE JOINT RESOLUTION NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

Relating to the payment of just compensation to landowners for certain rights-of-way across land in Alaska.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

WHEREAS the Federal Government created certain rights-of-way for highway purposes across land in the state under Public Land Order 601, Public Land Order 757, Department Order 2665, and Public Land Order 1613; and

WHEREAS the rights-of-way created by the Federal Government were not identified in the patents issued to Alaska homesteaders nor were the original homesteaders informed as to the location or true width of the rights-of-way claimed for highway purposes by the Federal Government across their land; and

WHEREAS the original homesteaders and their successors in interest have had no knowledge of the claim of the Federal Government to the rights-of-way along or across their properties and have often utilized and improved the portion of the right-of-way claimed by the Federal Government; and

WHEREAS the enforcement of the rights-of-way would be unfair to homesteaders who entered their property between August 1949 and Alaska statehood in 1959; and

WHEREAS the rights-of-way created by the Federal Government were not recorded in any territorial or state recording office for the purpose of public notice; and

WHEREAS the right to utilize the rights-of-way for highway purposes

was conveyed to the state in 1959; and

WHEREAS the United States Department of Transportation has declined to pay federal highway funds to the state to allow the state to pay just compensation to the landowners whose properties are affected by the rights-of-way; and

WHEREAS U.S. Senator Ted Stevens has attempted in the Federal Aid Highway Act of 1970, sec. 138, to require the United States Department of Transportation to compensate the State of Alaska for money paid as just compensation for the taking and utilization of the rights-of-way;

BE IT RESOLVED by the Alaska State Legislature that the Alaska delegation to U.S. Congress is urged to introduce and support legislation to require reimbursement by the United States Department of Transportation to the State of Alaska for money paid by the state as just compensation for the use of any right-of-way created, established, or claimed under Public Land Order 601, Public Land Order 757, Department Order 2665, and Public Land Order 1613.

COPIES of this resolution shall be sent to the Honorable Ted Stevens and the Honorable Frank Murkowski, U.S. Senators, and the Honorable Don Young, U.S. Representative, members of the Alaska delegation in Congress.

SB 141 memo

History on 1966 act

M E M O R A N D U M

To: Committee members
From: Chairman Coghill
Date: February 19, 1985
Re: SB 141, Relinquishment of rights-of-way

As the attached background information will show, SB 141 is intended to release the State's claim to certain portions of highway rights-of-way which were not clearly identified in land patents. This has given rise to the problem faced by many landowners who live or hold land adjacent to highways the State now wishes to upgrade, straighten or expand and who have been or could be abruptly and without compensation deprived of land they assumed was theirs, and which their legal documents have not identified as belonging to the government.

These rights-of-way were withdrawn by the federal government through public land orders or as a result of various Acts of Congress during territorial days, and did not necessarily make their way either to the homesteaders' patents or the district recorders' offices. This has subsequently caused heavy liabilities for the state's title insurance companies, who traditionally insure property based upon what has been recorded at the recorder's office, not upon what has been published in the Federal Register.

As this problem has evolved, the State Supreme Court has ruled that the State's claims to the rights-of-way are valid, and ~~the~~ title insurers, ~~rather than the State~~, are liable for any claims by the insured for takings for which the State has declined to compensate the property-owner. therefore In the many instances where ~~the~~ property owner has no title insurance, of course, he or she is simply out of luck ~~or will be~~ sometime in the future, if ~~the state decides to expand its road, and no legislative action has been taken~~ and loses the land with no recourse to compensation.

The background material will more completely explain the history of this problem. However, A brief caviat regarding the enormous ~~DOT/PF~~ fiscal note may be in order. We are not sure how DOT/PF generated this much fiscal impact, but assume they ~~expect to~~ have figured the repurchase price, at top market value, of an entire right-of-way width (the whole 300 feet, for example, not just the portion they actually will need).

Referred: Transportation and Resources

IN THE SENATE BY COGHILL

SENATE BILL NO. 141

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act releasing claims of the state to land within certain rights-of-way; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. LEGISLATIVE PURPOSE AND FINDING. The purpose of this Act is to release certain highway rights-of-way claimed by the state that are causing economic hardship and physical and mental distress to persons who hold title to land under a reservation to the state by virtue of 33 Stat. 616 (Act of January 27, 1905); 47 Stat. 446 (Act of June 30, 1932); 48 U.S.C. secs. 321(a) - 327 (Act of July 24, 1947); Public Land Order 601, 14 Fed. Reg. 5048 (1949); Public Land Order 757, 16 Fed. Reg. 10, 749 (1951); Public Land Order 1613, 23 Fed. Reg. 2376, 2378 (1958); or Departmental Order 2665, 16 Fed. Reg. 10, 752 (1951).

* Sec. 2. RELINQUISHMENT OF RIGHT-OF-WAY. The commissioner of transportation and public facilities shall vacate and relinquish to the adjoining property owners any and all rights-of-way for a road, roadway, highway, tramway, trail, bridge, or appurtenant structure created, withdrawn or reserved under 33 Stat. 616 (Act of January 27, 1905); 47 Stat. 446 (Act of June 30, 1932); 48 U.S.C. secs. 321(a) - 327 (Act of July 24, 1947); Public Land Order 601, 14 Fed. Reg. 5048 (1949); Public Land Order 757, 16 Fed. Reg. 10, 749 (1951); Public Land Order 1613, 23 Fed. Reg. 2376, 2378 (1958); or Departmental Order 2665, 16 Fed. Reg. 10, 752 (1951) if the right-of-way on the effective date of this Act is not physically occupied by a road, roadway, highway, tramway, trail, bridge, or appurtenant

structure.

* Sec. 3. TAKING OF RIGHT-OF-WAY WITHOUT JUST COMPENSATION VOID. The vacated and relinquished right-of-way under sec. 2 of this Act may not be taken, claimed, asserted, or used by the state without the payment of just compensation.

* Sec. 4. PHYSICAL OCCUPATION OF RIGHT-OF-WAY. (a) The provisions of this Act do not divest the state of its interest in a right-of-way to land or require compensation by the state for land physically occupied on the effective date of this Act by a road, roadway, highway, tramway, trail, bridge, or appurtenant structure then constructed within the right-of-way created, withdrawn, or reserved under the Acts of Congress and the orders described in sec. 2 of this Act; nor do the provisions of this Act divest the state of an interest in an easement of specific width set out in the original patent from the state or federal government.

(b) Expansion beyond an existing road, roadway, highway, tramway, trail, bridge, or appurtenant structure requires the payment of just compensation to the owner of the land and no other acts or actions by the state constitute a physical occupation within the meaning of this section. The state has the burden of proof to show by clear and convincing evidence that the physical occupation occurred before the effective date of this Act.

* Sec. 5. APPLICATION TO FEDERAL LAND. The provisions of this Act do not divest the state of its interest in a right-of-way that affects land in which fee title is, on the effective date of this Act, vested in the United States of America.

* Sec. 6. DEFINITION. As used in this Act, "physically occupied" means the construction of the actual roadway, including its shoulders and ditching, highway, tramway, trail, bridge, or appurtenant structures, before the effective date of this Act.

* Sec. 7. RETROACTIVE APPLICATION. This Act does not relieve, alter, or void a voluntary conveyance of an easement including an easement dedicated by plat.

* Sec. 8. EFFECTIVE DATE. This Act takes effect immediately in accordance with AS 01.10.070(c).

STATE OF ALASKA

LEGISLATIVE AFFAIRS AGENCY

POUCH Y STATE CAPITOL
JUNEAU, ALASKA 99811
907 465-3800

M E M O R A N D U M April 17, 1984

SUBJECT: An Act releasing claims of the state within certain rights-of-way (Work Order No. 13-2222)

TO: Representative Charlie Bussell
Chairman
House Judiciary Committee

FROM: Richard A. Bradley
Legislative Counsel

You have requested the enclosed bill in final; because the draft does not address certain aspects that seem naturally raised by the bill, I have prepared the bill in draft for your consideration.

The bill seems to be a response to State v. Alaska Land Title Ass'n. 667 P.2d 714 (Alaska 1983), cert. den. 52 U.S.L.W. 3509 (January 9, 1984). While I have reviewed the case briefly preparatory to putting the bill into form for your introduction, I confess I have not sought to become altogether familiar with the law of that case.

But certain observations may be made regarding the bill.

(1) The bill deals exclusively with the use by the state of the benefits of the cited Acts of Congress and orders of the Department of the Interior.

However, as the Alaska Supreme Court's opinion indicates in passing, municipalities of the state may avail themselves of the benefits of the Acts and orders. I have not sought to extinguish the ability of these municipalities to use the Acts and orders.

(2) The rights-of-way are presently used by the state (or municipalities) to straighten the right-of-way or to widen or improve the roadbed. Those benefits will cease if the bill passes.

But the rights-of-way are also used by utilities (of both a public and private nature) for sewer and water lines, natural gas lines, electric power lines, and so forth. The bill does not indicate whether these rights continue though it seems clear that they are put in some jeopardy by the extinguishment of the estate on which they rely. Do you wish to deal with these issues? See, for example, AS 19.25.010 which provides:

> Sec. 19.25.010. USE OF RIGHTS-OF-WAY FOR UTILITIES. A utility facility may be constructed, placed, or maintained across, along, over, under or within a state right-of-way only in accordance with regulations prescribed by the department and if authorized by a written permit issued by the department.

(3) While I do not have an answer to suggest, I think it is patently clear that the outer edge of the ditching, if any, along the roadway is not clean demarcation on which to base title to land; whether the existing property line reflects good public policy, or not, at least the line is clearly established. I make this point only because the provisions of the Acts of Congress, orders of the Interior Department, and the efforts of the highway department have already been a goldmine for lawyers and a source of anxiety to property owners, title insurance companies and a newly added uncertainty seems undesireable. In this connection, you may wish to consider the concepts implied in AS 19.25.070.

(4) Finally, note that I have followed the draft provided to us in drafting this bill. But subsecs. (b) - (e) are altogether contained within (a) of the bill and are unnecessary.

If I may be of further assistance, please advise.

STATE OF ALASKA
THE LEGISLATURE

LEGISLATIVE AFFAIRS AGENCY

POUCH Y STATE CAPITOL
JUNEAU, ALASKA 99811
907 465 3800

M E M O R A N D U M April 26, 1984

SUBJECT: Release of claims of the state
(Work Order No. 13-2222)

TO: Representative Charlie Bussell
Chairman, House Judiciary Committee

FROM: Richard A. Bradley
Legislative Counsel

The above described bill was provided to you earlier today at Joe Brewer's request. At that time I advised Mr. Brewer that I would be providing the committee with comments on the bill.

(1) In my memorandum of April 17, I noted that not only the state but also certain municipalities of the state may avail themselves of the benefits of the Acts of Congress and public land orders in question. I stated that the rights of the municipalities were not extinguished by the bill. I think that I was wrong in part but I believe that if the typical phrase "by the state" is deleted (for example, in the title and at line 28, page 1 of the bill), this possible ambiguity is removed. I believe that it is also desireable to acknowledge that neither the state nor municipalities may avail themselves of the benefits of the easements and subsections (c) and (d) should be conformed to that effect.

(2) The committee asked that the phrase "the subservient estate" be deleted from subsection (b) and that it be replaced with "the adjoining property owners on the effective date of this Act". I have included the phrase as requested.

But I note that it is possible that the substituted phrase has a different substantive meaning from that suggested by "the subservient estate".

If I am correct that the bill is a response to State v. Alaska Land Title Ass'n., 667 P.2d 714 (Alaska 1983), cert.

den., 52 U.S.L.W. 3509 (January 9, 1984), the bill addresses the exercise by the state and municipalities of the state of rights determined by the Alaska Supreme Court to have been created by easements established under certain Acts of Congress and certain public land orders of the U.S. Department of the Interior.

In an easement, two estates (separate ownership interests) in the same land are created. In an easement, a right of use is created in the property of another. As Black's Law Dictionary indicates, a "servient estate" (or a "subservient estate") is one that is burdened with a servitude (benefit) in favor of someone else. And the dominant estate is the right to a particular use that results from the easement.

In the situations described in the bill, the state or the municipality of the state is the owner of the dominant estate in the easement; the owner of the land adjoining the easement who also owns the land under and subject to the easement is the owner of the servient (subservient) estate.

It is the person who owns the servient estate who should receive the released and relinquished easement; that person will usually be the person whose property "adjoins" the land subject to the dominant easement but the bill confuses this distinction because there will frequently, perhaps typically be two property owners whose land "adjoins" the easement.

If I may be of further assistance, please advise.

Introduced: 4/26/84
Referred: Judiciary

IN THE HOUSE BY THE JUDICIARY COMMITTEE

HOUSE BILL NO. 718

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act releasing claims of the state to land within certain rights-of-way; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. LEGISLATIVE PURPOSE AND FINDING. (a) The purpose of sec. 2 of this Act is to release and relinquish certain rights-of-way claimed by the Alaska Department of Transportation and Public Facilities.

(b) The legislature finds that sec. 2 of this Act is needed to alleviate economic hardship and physical and mental distress caused by the taking of land by the state without just compensation.

* Sec. 2. AS 19.25 is amended by adding a new section to read:

Sec. 19.25.260. RELINQUISHMENT OF RIGHT-OF-WAY. (a) The right-of-way for a road, roadway, highway, tramway, trail, bridge, or appurtenant structure created, withdrawn, or reserved under the Act of January 27, 1905, 33 Stat. 616, the Act of June 30, 1932, 47 Stat. 446, the Act of July 24, 1947, 61 Stat. 418, Public Land Orders 601, 757, and 1613, and Department of the Interior Order 2665, as amended, that is not on the effective date of this Act physically occupied by the roadway, shoulder, or ditching of a road, roadway, highway, tramway, trail, bridge, or appurtenant structure is vacated and relinquished and the vacated and relinquished right-of-way may not be taken, claimed, asserted, or used by the state without the payment of just compensation.

(b) The provisions of (a) of this section relinquish and release

to the adjoining property owners on the effective date of this Act that portion of the right-of-way claimed, asserted, or used by the state that is not physically occupied by the roadway, shoulder, or ditching of the roadway before the effective date of this Act.

(c) The provisions of (a) of this section do not divest the state of title to land or require compensation by the state for land physically occupied on the effective date of this Act by the roadway, shoulder, or ditching of a road, roadway, highway, tramway, trail, bridge, or appurtenant structure then constructed within the right-of-way created, withdrawn, or reserved under the Acts of Congress and the orders described in (a) of this section.

(d) Any expansion beyond the existing roadway, shoulders, or ditching of a road, roadway, highway, tramway, trail, bridge, or appurtenant structure requires the payment of just compensation to the owner of the land and no other acts or actions by the state constitute a physical occupation by a roadway, shoulder, or ditching within the meaning of this section. The state has the burden of proof to show by clear and convincing evidence that the physical occupation by a roadway, shoulders, or ditching occurred before the effective date of this Act.

(e) As used in this section, "physically occupied by the roadway, shoulder, or ditching" means the construction of the actual roadway, shoulders, or ditching before the effective date of this Act.

(f) This section does not relieve a person from an act for which the person may be responsible regarding a past transfer of a right-of-way or an interest in a right-of-way.

* Sec. 3. This Act takes effect immediately in accordance with AS 01.-10.070(c).

LAWS OF ALASKA

1966

Source: HB 415 am

Chapter No: 92

AN ACT

Relating to the disposition of certain legal interests in land by the State of Alaska; and providing for an effective date.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. PURPOSE. This Act is intended to alleviate the economic hardship and physical and mental distress occasioned by the taking of land, by the State of Alaska, for which no compensation is paid to the persons holding title to the land. This practice has resulted in financial difficulties and the deprivation of peace of mind regarding the security of one's possessions to many citizens of the State of Alaska, and which, if not curtailed by law, will continue to adversely affect citizens of this state. Those persons who hold title to land under a deed or patent which contains a reservation to the state by virtue of the Act of June 30, 1932, ch. 320, sec. 5, as added July 24, 1947, ch. 313, 61 Stat. 418, are subject to the hazard of having the State of Alaska take their property without compensation because all patents or deeds containing the reservation required by that federal Act reserve to the United States, or the state created out of the Territory of Alaska, a right-of-way for

roads, roadways, tramways, trails, bridges, and appurtenant structures either constructed or to be constructed. Except for this reservation the State of Alaska, under the Alaska constitution and the constitution of the United States, would be required to pay just compensation for any land taken for a right-of-way. It is declared to be the purpose of this Act to place persons with land so encumbered on a basis of equality with all other property holders in the State of Alaska, thereby preventing the taking of property without payment of just compensation as provided by law, and in the manner provided by law.

* Sec. 2. TAKING OF PROPERTY UNDER RESERVATION VOID. After the effective date of this Act, no agency of the state may take privately-owned property by the election or exercise of a reservation to the state acquired under the Act of June 30, 1932, ch. 320, sec. 5, as added July 24, 1947, ch. 313, 61 Stat. 418, and taking of property after the effective date of this Act by the election or exercise of a reservation to the state under that federal Act is void.

* Sec. 3. PROSPECTIVE APPLICATION. This Act shall not be construed to divest the state of, or to require compensation by the state for, any right-of-way or other interest in real property which was taken by the state, before the effective date of this Act, by the election or exercise of its right to take property through a reservation acquired under the Act of June 30, 1932, ch. 320, sec. 5, as added July 24, 1947, ch. 313, 61 Stat. 418.

* Sec. 4. SHORT TITLE. This Act may be cited as the Right-of-Way Act of 1966.

Sec. 2. EFFECTIVE DATE. This Act takes effect on the day after its passage and approval or on the day it becomes law without such approval.

Approved by Governor April 13, 1966
Actual effective date: April 14, 1966

1. Prospective vs. retroactive application.
2. State v.s. private interests
3. Description of extent of easement
4. 1966 act - same provisions
5. Effect of Sup Ct case on 1966 act

Sup Ct interpreted 66 act to apply only to 1947 Fed act -- P&O orders apply to the 1932 Act.

→ add'l provisions of Proposed Bill would be sure that these included.

Validity of quitclaim deed — being challenged in remand of case.

State law cannot affect if not a valid.

AG may hold 1966 act as unconstitutional.

Utility easements in r-of-way.

IN THE SENATE

SENATE BILL NO. ____

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act releasing claims of the state to certain rights-of-way; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*Section 1. LEGISLATIVE PURPOSE AND FINDINGS.

(a) The purpose of this Act is to release and relinquish certain highway rights-of-way claimed by the Alaska Department of Transportation and Public Facilities.

(b) The legislature finds that section 2 of this Act is needed to alleviate economic hardship and physical and mental distress occasioned by the taking of the land by the State of Alaska without just compensation being paid to the person holding title to the land.

*Sec. 2. AS 19.25 is amended by adding a new section to read:

Sec. 19.25.260 RELINQUISHMENT OF RIGHTS-OF-WAY.

(a) Any right-of-way for roads, roadways, highways, tramways, trails, bridges and appurtenant structures created, withdrawn, or reserved by the United States Government under the Act of January 27, 1905, 33 Stat. 616, the Act of June 30, 1932, 47 Stat. 446, the Act of

July 24, 1947, 61 Stat. 418, Public Land Orders 601, 757 and 1613, and Department of Interior Order 2665, as amended, which the State may now or in the future claim or assert and which is not claimed, asserted or utilized by occupation with physical improvements shall be and hereby are vacated, released and relinquished and shall not be taken, claimed, asserted or utilized by the State or its successors in interest without payment of just compensation.

(b) The provisions of (a) of this section relinquish and release to the adjoining property owner, on the effective date of this Act, the balance of the right-of-way claimed, asserted or utilized by the State which is not physically occupied by roadway, shoulder or ditching actually constructed prior to the effective date of this section.

(c) The provisions of (a) of this section do not divest the State of its interest in the right-of-way or require compensation by the State for land physically occupied on the effective date of this Act by the roadway, shoulder, or ditches of a road, highway, trail, bridges or appurtenant structure constructed with the right-of-way created, withdrawn, or reserved under the Acts of Congress and the orders described in subsection (a) of this section.

(d) The provisions of (a) of this section do not divest the State of its interest in a right-of-way which effects land in which fee title is, on the effective date of this Act, vested in the United States of America.

(e) As used in this section, occupation with physical improvements shall mean the actual construction of the roadway, shoulders and ditching prior to the effective date of this Act.

(f) Roadway, shoulders and ditching which is constructed after the effective date of this section or any expansion of existing roadway, shoulders and ditching which requires additional property to construct shall require the payment of just compensation to the landowner. No other acts or actions by the State shall constitute an occupation with physical improvements within the meaning of this section. The State shall have the burden of proof to show by clear and convincing evidence that the occupation by physical improvements by the construction of roadway, shoulders and ditching occurred prior to the effective date of this section.

(g) Nothing in (a) of this section alters or voids any voluntary prior conveyance of the rights-of-way or an interest in the rights-of-way described in (a) of this section to the state or any other individual or organization.

*Sec. 3. This Act takes effect immediately in accordance with AS 01.10.070(c).

PROPOSED
COMMITTEE SUBSTITUTE FOR

SENATE BILL NO. 141

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act requiring just compensation for the ulilization of certain rights-of-way and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. LEGISLATIVE PURPOSE AND FINDING. The purpose of this Act is to provide just compensation to land owners in Alaska who are suffering economic hardship and physical and mental distress by virtue of the state utilizing certain rights-of-way created, withdrawn or reserved under 33 Stat. 616 (Act of January 27, 1905); 47 Stat. 446 (Act of June 30, 1932); 48 U.S.C. sec. 321(d) (Act of July 24, 1947); Public Land Order 601, 14 Fed. Reg. 5048 (1949); Public Land Order 757, 16 Fed. Reg. 10, 749 (1951); Public Land Order 1613, 23 Fed. Reg. 2376, 2378 (1958); or Departmental Order 2665, 16 Fed. Reg. 10, 752 (1951).

* Sec. 2. TAKING OF PROPERTY WITHOUT COMPENSATION IS BARRED. After the effective date of this Act, no agency of the State may take, utilize, or occupy any right-of-way for a road, roadway, highway, tramway, trail, bridge, or appurtenant struc-

ture created, withdrawn or reserved under 33 Stat. 616 (Act of January 27, 1905); 47 Stat. 446 (Act of June 30, 1932); 48 U.S.C. secs. 321(d) (Act of July 24, 1947); Public Land Order 601, 14 Fed. Reg. 5048 (1949); Public Land Order 757, 16 Fed. Reg. 10, 749 (1951); Public Land Order 1613, 23 Fed. Reg. 2376, 2378 (1958); or Departmental Order 2665, 16 Fed. Reg. 10, 752 (1951) beyond that portion physically occupied by a road, roadway, highway, tramway, trail, bridge, or appurtenant structure on the effective date of this Act, without payment of just compensation.

* Sec. 3. PHYSICAL OCCUPATION OF RIGHT-OF-WAY. (a) The provisions of this Act do not require the State to pay compensation for land physically occupied on the effective date of this act by a road, roadway, highway, tramway, trail, bridge, or appurtenant structure constructed within the right-of-way created, withdrawn, or reserved under the Acts of Congress and the orders described in sec. 2 of this Act; nor do the provisions of this Act require the payment of compensation by the state for taking, utilizing or occupying an interest in an easement of specific width set out in the original patent from the state or federal government, whether or not physically occupied on the effective date of this Act.

(b) Expansion beyond an existing road, roadway, highway, tramway, trail, bridge, or appurtenant structure requires the payment of just compensation to the owner of the land only to the extent that the state actually takes, utilizes or occupies beyond

the physical occupation as of the effective date of this Act. The state has the burden of proof to show by clear and convincing evidence the extent of the physical occupation which occurred before the effective date of this act.

* Sec. 4. APPLICATION TO FEDERAL LAND. The provisions of this Act do not require that the state pay compensation for taking, utilizing or occupying a right-of-way that affects land in which fee title is, on the date of the taking, utilization or occupation, vested in the United States of America.

* Sec. 5. DEFINITION. As used in this Act, "physically occupied" means the construction of the actual roadway, including its shoulders and ditching, highway, tramway, trail, bridge, or appurtenant structures, before the effective date of this Act.

* Sec. 6. RETROACTIVE APPLICATION. This Act does not relieve, alter, or void a voluntary conveyance of an easement including an easement dedicated by plat.

* Sec. 7. EFFECTIVE DATE. This Act takes effect immediately in accordance with AS 01.10.070(c).

CERTIFICATE OF OWNERSHIP AND DEDICATION

WE HEREBY CERTIFY THAT WE ARE THE OWNERS OF THE PROPERTY SHOWN AND DESCRIBED HEREON. WE HEREBY REQUEST APPROVAL OF THIS PLAT, SHOWING SUCH EASEMENTS FOR PUBLIC UTILITIES, HIGHWAYS AND ALLEYS DEDICATED BY US FOR PUBLIC USE. THERE SHALL BE RESERVED ADJACENT TO THE DEDICATED RIGHTS-OF-WAY SHOWN HEREON, A SLOPE RESERVATION SUFFICIENT TO CONTAIN CUT AND FILL SLOPES OF 1 1/2 FEET HORIZONTALLY FOR EACH FOOT VERTICALLY (1 1/2 TO 1) OF CUT OR FILL, FOR THE PURPOSE OF PROVIDING AND MAINTAINING LATERAL SUPPORT OF THE CONSTRUCTED STREET. AND THERE IS RESERVED TO THE GRANTORS, THEIR HEIRS, SUCCESSORS AND ASSIGNS, THE RIGHT TO REMOVE SAID SLOPES AT ANY TIME UPON PROVIDING AND MAINTAINING OTHER ADEQUATE LATERAL SUPPORT, AS APPROVED BY THE CITY OR BOROUGH.

Form 4-1199
(Sept. 1964)

Anchorage 023311

The United States of America,

To all to whom these presents shall come, Greeting:

WHEREAS, a certificate of the Land Office at Anchorage, Alaska, is now deposited in the Bureau of Land Management, whereby it appears that pursuant to the act of Congress of June 1, 1938 (52 Stat. 609), as amended by the Act of July 14, 1945 (59 Stat. 467), the claim of Vernon Lenne Lofstedt has been established and that the requirements of law pertaining to the claim have been met, for the following-described land:

Seward Meridian, Alaska,

T. 12 N., R. 3 W.,

Sec. 33, Lot 191.

The area described contains 2.50 acres, according to the official plat of the survey of the said land, on file in the Bureau of Land Management: Dependent Resurvey officially filed April 14, 1952.

NOW KNOW YE, That the UNITED STATES OF AMERICA, in consideration of the premises, DOES HEREBY GRANT unto the said claimant and to the heirs of the said claimant the tract above described; TO HAVE AND TO HOLD the same, together with all the rights, privileges, immunities, and appurtenances, of whatsoever nature, thereunto belonging, unto the said claimant and to the heirs and assigns of the said claimant forever; subject to (1) any vested and accrued water rights for mining, agricultural, manufacturing, or other purposes, and rights to ditches and reservoirs used in connection with such water rights, as may be recognized and acknowledged by the local customs, laws, and decisions of courts; (2) the reservation of a right-of-way for ditches or canals constructed by the authority of the United States, in accordance with the act of August 30, 1890 (26 Stat., 391, 43 U. S. C. sec. [illegible]); and (3) the reservation of a right-of-way for roads, roadways, highways, tramways, trails, bridges, and appurtenant structures constructed or to be constructed by or under authority of the United States or by any State created out of the Territory of Alaska, in accordance with the act of July 24, 1947 (61 Stat., 418, 48 U. S. C. sec. 321d). There is also reserved to the United States a right-of-way for the construction of railroads, telegraph and telephone lines, in accordance with section 3 of the act of March 12, 1914 (38 Stat., 305, 48 U. S. C. sec. 305). Excepting and reserving, also, to the United States, all oil, gas, and other mineral deposits, in the land so patented, together with the right to prospect for, mine, and remove the same according to the provisions of said Act of June 1, 1938. This patent is subject to a right-of-way not exceeding 33 feet in width, for roadway and public utilities purposes, to be located along the south and east boundaries of said land.

Reserving unto the United States, its permittee or licensee, the right to enter upon, occupy and use any part or all of said lands for the purposes provided in the Act of June 10, 1920, (41 Stat. 1065) and subject to the conditions and limitations of Section 24 of said Act, as amended by the Act of August 26, 1935 (49 Stat. 896).

IN TESTIMONY WHEREOF, the undersigned authorized officer of the Bureau of Land Management, in accordance with the provisions of the Act of June 17, 1948 (62 Stat., 476), has, in the name of the United States, caused these letters to be made Patent, and the Seal of the Bureau to be hereunto affixed.

GIVEN under my hand, in the District of Columbia, the FOURTH day of OCTOBER in the year of our Lord one thousand nine hundred and FIFTY-FIVE and of the Independence of the United States the one hundred and EIGHTIETH.

For the Director, Bureau of Land Management.

RECEIVED
BUREAU OF LAND MANAGEMENT

The United States of America,

1952 10 45 AM

To all to whom these presents shall come, Greeting:

WHEREAS, a certificate of the Land Office at Anchorage, Alaska, is now deposited in the Bureau of Land Management, whereby it appears that pursuant to the act of Congress of May 20, 1862, "To Secure Homesteads to Actual Settlers on the Public Domain," and the acts supplemental thereto, the claim of Grant Henry Forsythe has been established and that the requirements of law pertaining to the claim have been met, for the following-described land

Seward Meridian, Alaska,
T. 12 N., R. 3 W.,
Sec. 14, W½SW¼,
Sec. 23, W½NE¼.

The area described contains 160 acres, according to the official plat of the survey of the said land, on file in the Bureau of Land Management:

NOW KNOW YE, That the UNITED STATES OF AMERICA, in consideration of the premises, DOES HEREBY GRANT unto the said claimant and to the heirs of the said claimant the tract above described; TO HAVE AND TO HOLD the same, together with all the rights, privileges, immunities, and appurtenances of whatsoever nature, thereunto belonging, unto the said claimant and to the heirs and assigns of the said claimant forever; subject to: (1) any vested and accrued water rights for mining, agricultural, manufacturing, or other purposes, and rights to ditches and reservoirs used in connection with such water rights, as may be recognized and acknowledged by the local customs, laws, and decisions of courts; (2) the reservation of a right-of-way for ditches or canals constructed by the authority of the United States, in accordance with the act of August 30, 1890 (26 Stat., 391, 43 U. S. C. sec. 945), and (3) the reservation of a right-of-way for roads, roadways, highways, trails, railways, trails, bridges, and appurtenant structures constructed or to be constructed by or under authority of the United States or by any State organized out of the Territory of Alaska, in accordance with the act of July 24, 1947 (61 Stat., 418, 48 U. S. C. sec. 321d). There is also reserved to the United States a right-of-way for the construction of railroads, telegraph and telephone lines, in accordance with section 1 of the act of March 12, 1914 (38 Stat., 305, 48 U. S. C. sec. 305); excepting and reserving also, to the United States, pursuant to section 9 of the act of August 1, 1946 (60 Stat., 760, 42 U. S. C. sec. 1805), all uranium, thorium, or any other material which is or may be determined to be peculiarly essential to the production of fissionable materials, whether or not of commercial value, together with the right of the United States through its authorized agents or representatives at any time to enter upon the land and prospect for, mine, and remove the same.

Re: Request for Opinion on SB 141
Our File: 366-380-85

Dear Mr. Call:

This letter is in response to your request for our analysis of SB 141 which has as its subject matter Public Land Orders 601, 757, 1613 and Department Order 2665.

Public Land Orders 601, 757, 1613 and Department Order 2665 are responsible for the creation of 80 percent of the public road rights-of-way in Alaska. Moreover, the legal validity of the rights-of-way and easements created by these land orders was upheld by the Alaska Supreme Court against numerous legal challenges raised by the Alaska Land Title Association in a case that went all the way up to the U.S. Supreme Court. See Alaska Land Title Association v. State of Alaska, 667 P.2d 714 (Alaska 1983), cert. denied, 104 S.Ct. 704 (1984).

The effect of SB 141 would be to require the state to vacate and relinquish to certain private landowners significant portions of public highway rights-of-way that were created by PLO 601, PLO 757, PLO 1613 and D.O. 2665. Specifically, those portions of the rights-of-way not physically occupied on the effective date of the bill would have to be relinquished by the state.

There are at least two major legal concerns raised by this bill. The first involves article IX, section 6, of the Alaska Constitution. This provision reads as follows:

> Section 6. PUBLIC PURPOSE. No tax shall be levied, or appropriation of public money made, or

ATTORNEY GENERAL'S OPINION

public property transferred, nor shall the public credit be used, except for a public purpose.

The easement rights created by PLO 601, PLO 757, PLO 1613, and D.O. 2665 are held in common by the general public. These rights, therefore, are a form of public property. The clear effect of Senate Bill 141 is to transfer this public property to certain private individuals. This is so because the bill, while relinquishing public road easements held in common by the general public, bestows the right to the fair market value of these easements upon those private landowners whose property was previously subject to them. See sections 2 and 3 of SB 141. The bill, in effect, transfers public property to private individuals who would not pay anything to the state for the value of the rights transferred to them. Such a transfer, on its face, would appear to violate the public purpose provision of the state Constitution. This is underscored by the fact that the public, if it requires the vacated road easement area for future road improvement, must purchase it back from private ownership. Only these private individuals would benefit from this arrangement and the repurchase costs would probably be significant. Thus, it is difficult to understand how this bill would not violate the public purpose requirement of article IX, section 6, of the Alaska Constitution that must be met whenever public property is transferred. 1/

A second legal difficulty concerns article 1, section 1, of the Alaska Constitution. This provision provides that all persons are entitled to equal rights under the law and, conversely, prohibits unfair distinctions between classes of persons.

1/ Because this bill would eliminate significant portions of public road easements, it would most likely have a negative effect on public access to various areas of the state. As a result, SB 141 appears to be inconsistent with article VIII, sections 1 and 2 of the Alaska Constitution. Article VIII, Section 1 states that it is the policy of the state "to encourage the settlement of its lands and development of its resources by making them available for maximum use consistent with the public interest." Article VIII, section 2 requires the legislature to "provide for the utilization, development, and conservation of all natural resources belonging to the state . . . for the maximum benefit of its people."

See Ale v. State, 484 P.2d 677 (Alaska 1971); Leege v. Martin, 379 P.2d 447 (Alaska 1963) .

The effect of this bill is to divest the general public of its right to utilize significant portions of the public road easements created by public land orders. Since the effect of this divestment would be to eliminate the public's right to claim these public road easements, only those private individuals owning land fronting on the public roads created by these land orders would benefit from this divestment. That is to say, after the effective date of this bill, the public, acting through the state, would have to purchase from this class of individuals the right to use the same public road easements that were previously owned by the public.

In sum, as matters stand now, the public road rights granted by these land orders are owned by all members of the public in common. Should this bill become law, it would mean that the cash value of these rights, rights which were formerly held by all, would be granted to a class of property owners, i.e., those individual property owners fortunate enough to own land fronting on the very roadways created by these public land orders. Thus the practical effect of this bill is to take away potentially valuable property rights owned by the general public as a whole and bestow the right to the fair market value of these rights upon a class of private individuals. Since article I, section 1 of the Alaska Constitution adopts the principle that "all persons are equal and entitled to equal rights, opportunities, and protection under the law," the granting of special privileges by this bill to a particular class at the expense of the public may very well violate this provision.

At present, only one class of persons exists relative to the public road easements created by these public land orders. This class is made up of members of the general public who own these public road easements in common. Should this bill become law, these easement rights would, in effect, be taken from the general public. 2/ The right to the cash value of these public road easement rights would then be bestowed, not on the general

---

2/ This "taking" from each member of the public by itself may violate article XIII, section 16 of the Alaska Constitution which provides that "no person shall be involuntarily divested of . . . his interests in lands . . ." unless the divestment is for a public purpose and he is paid just compensation.

public as a whole, but on a special class of property owners. This bill, in effect, would create two classes of persons: the class of all those members of the general public who do not own real property fronting on the roadways created by the public land orders and the class of those property owners who do own property fronting on the roadways created by these public land orders. This latter class would then be given the right to the fair market value of the easements previously owned by the entire public. It is likely that such discriminatory treatment is barred by article I, section 1, of the Alaska Constitution.

Sincerely,

NORMAN C. GORSUCH
ATTORNEY GENERAL

IN THE SENATE BY THE TRANSPORTATION COMMITTEE

CS FOR SENATE BILL NO. 141 (Transportation)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act requiring just compensation for the utilization of certain rights-of-way; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. LEGISLATIVE PURPOSE AND FINDING. The purpose of this Act is to provide just compensation to landowners in the state who are suffering economic hardship and physical and mental distress by virtue of the state utilizing certain rights-of-way created, withdrawn, or reserved under 33 Stat. 616 (Act of January 27, 1905); 47 Stat. 446 (Act of June 30, 1932); 48 U.S.C. secs. 321(a) - 327 (Act of July 24, 1947); Public Land Order 601, 14 Fed. Reg. 5048 (1949); Public Land Order 757, 16 Fed. Reg. 10, 749 (1951); Public Land Order 1613, 23 Fed. Reg. 2376, 2378 (1958); or Departmental Order 2665, 16 Fed. Reg. 10, 752 (1951).

* Sec. 2. TAKING OF PROPERTY WITHOUT COMPENSATION IS BARRED. The state may not take, utilize, or occupy a right-of-way for a road, roadway, highway, tramway, trail, bridge, or appurtenant structure created, withdrawn or reserved under 33 Stat. 616 (Act of January 27, 1905); 47 Stat. 446 (Act of June 30, 1932); 48 U.S.C. secs. 321(a) - 327 (Act of July 24, 1947); Public Land Order 601, 14 Fed. Reg. 5048 (1949); Public Land Order 757, 16 Fed. Reg. 10, 749 (1951); Public Land Order 1613, 23 Fed. Reg. 2376, 2378 (1958); or Departmental Order 2665, 16 Fed. Reg. 10, 752 (1951) without payment of just compensation if the right-of-way on the effective date of this Act is not physically occupied by a road, roadway, highway, tramway, trail, bridge, or appurtenant structure.

* Sec. 3. PHYSICAL OCCUPATION OF RIGHT-OF-WAY. (a) The provisions of this Act do not require compensation by the state for land physically occupied on the effective date of this Act by a road, roadway, highway, tramway, trail, bridge, or appurtenant structure then constructed within the right-of-way created, withdrawn, or reserved under the Acts of Congress and the orders described in sec. 2 of this Act; nor do the provisions of this Act require compensation by the state for taking, utilizing, or occupying an interest in an easement of specific width set out in the original patent from the state or federal government whether or not physically occupied on the effective date of this Act.

(b) Expansion beyond an existing road, roadway, highway, tramway, trail, bridge, or appurtenant structure requires the payment of just compensation to the owner of the land only to the extent that the state actually takes, utilizes, or occupies beyond the physical occupation within the meaning of this section. The state has the burden of proof to show by clear and convincing evidence that the physical occupation occurred before the effective date of this Act.

* Sec. 4. APPLICATION TO FEDERAL LAND. The provisions of this Act do not require the state to pay compensation for taking, utilizing, or occupying a right-of-way that affects land in which fee title is, on the date of the taking, utilization or occupation, vested in the United States of America.

* Sec. 5. DEFINITION. As used in this Act, "physically occupied" means the construction of the actual roadway, including its shoulders and ditching, highway, tramway, trail, bridge, or appurtenant structures, before the effective date of this Act.

* Sec. 6. RETROACTIVE APPLICATION. This Act does not relieve, alter, or void a voluntary conveyance of an easement including an easement dedicated by plat.

* Sec. 7. EFFECTIVE DATE. This Act takes effect immediately in accordance with AS 01.10.070(c).

SENATE BILL NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act releasing claims of the state to land within certain rights-of-way; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. LEGISLATIVE PURPOSE AND FINDING. The purpose of this Act is to release certain highway rights-of-way claimed by the state that are causing economic hardship and physical and mental distress to persons who hold title to land under a reservation to the state by virtue of 33 Stat. 616 (Act of January 27, 1905); 47 Stat. 446 (Act of June 30, 1932); 48 U.S.C. secs. 321(a) - 327 (Act of July 24, 1947); Public Land Order 601, 14 Fed. Reg. 5048 (1949); Public Land Order 757, 16 Fed. Reg. 10, 749 (1951); Public Land Order 1613, 23 Fed. Reg. 2376, 2378 (1958); or Departmental Order 2665, 16 Fed. Reg. 10, 752 (1951).

* Sec. 2. RELINQUISHMENT OF RIGHT-OF-WAY. The commissioner of transportation and public facilities shall vacate and relinquish to the adjoining property owners any and all rights-of-way for a road, roadway, highway, tramway, trail, bridge, or appurtenant structure created, withdrawn or reserved under 33 Stat. 616 (Act of January 27, 1905); 47 Stat. 446 (Act of June 30, 1932); 48 U.S.C. secs. 321(a) - 327 (Act of July 24, 1947); Public Land Order 601, 14 Fed. Reg. 5048 (1949); Public Land Order 757, 16 Fed. Reg. 10, 749 (1951); Public Land Order 1613, 23 Fed. Reg. 2376, 2378 (1958); or Departmental Order 2665, 16 Fed. Reg. 10, 752 (1951) if the right-of-way on the effective date of this Act is not physically occupied by a road, roadway, highway, tramway, trail, bridge, or appurtenant

* Sec. 7. RETROACTIVE APPLICATION. This ~~section~~ Act does not relieve, alter, or void a voluntary conveyance of an easement including an easement dedicated by plat.

* Sec. 8. EFFECTIVE DATE. This Act takes effect immediately in accordance with AS 01.10.070(c).

SENATE BILL NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act releasing claims of the state to land within certain rights-of-way; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. LEGISLATIVE PURPOSE AND FINDING. The purpose of this Act is to release certain highway rights-of-way claimed by the state that are causing economic hardship and physical and mental distress to persons who hold title to land under a patent containing a reservation to the state by virtue of 33 Stat. 616 (Act of January 27, 1905); 47 Stat. 446 (Act of June 30, 1932); 48 U.S.C. secs. 321(a) - 327 (Act of July 24, 1947); Public Land Order 601, 14 Fed. Reg. 5048 (1949); Public Land Order 757, 16 Fed. Reg. 10, 749 (1951); Public Land Order 1613, 23 Fed. Reg. 2376, 2378 (1958); and Departmental Order 2665, 16 Fed. Reg. 10, 752 (1951).

* Sec. 2. RELINQUISHMENT OF RIGHT-OF-WAY. ~~(a)~~ The commissioner of the Department of Transportation and Public Facilities shall, vacate and relinquish ~~the~~ any and all right-of-way for ~~a~~ road, roadway, highway, tramway, trail, bridge, or appurtenant structure created, withdrawn or reserved under 33 Stat. 616 (Act of January 27, 1905); 47 Stat. 446 (Act of June 30, 1932); 48 U.S.C. secs. 321(a) - 327 (Act of July 24, 1947); Public Land Order 601, 14 Fed. Reg. 5048 (1949); Public Land Order 757, 16 Fed. Reg. 10, 749 (1951); Public Land Order 1613, 23 Fed. Reg. 2376, 2378 (1958); ~~and~~ or Departmental Order 2665, 16 Fed. Reg. 10, 752 (1951) if the right-of-way on the effective date of this Act is not physically occupied by, ~~the roadway, shoulder, or ditching of a road~~, roadway, highway, tramway, trail, bridge,

or appurtenant structure.

(b) ~~The provisions of (a) of this section relinquish and release to~~ the adjoining property owners on the effective date of this Act ~~that portion of the right-of-way claimed, asserted or used by the state that is not physically occupied by the roadway, shoulder, or ditching of the roadway before the effective date of this Act.~~

* Sec. 3. TAKING OF RIGHT-OF-WAY WITHOUT JUST COMPENSATION VOID. The vacated and relinquished right-of-way under sec. 2 of this Act may not be taken, claimed, asserted, or used by the state without the payment of just compensation.

* Sec. 4. PHYSICAL OCCUPATION OF RIGHT-OF-WAY. (a) The provisions of this Act do not divest the state of ~~title~~ its interest in a right-of-way to land or require compensation by the state for land physically occupied on the effective date of this Act ~~by the roadway, shoulder, or ditching of~~ a road, roadway, highway, tramway, trail, bridge, or appurtenant structure then constructed within the right-of-way created, withdrawn, or reserved under the Acts of Congress and the orders described in sec. 2 of this Act. Nor do the provisions of this Act divest the state of any interest in an easement of specific width set forth in the original patent from the state or federal government

(b) Expansion beyond the existing ~~roadway, shoulders, or ditching of~~ a road, roadway, highway, tramway, trail, bridge, or appurtenant structure requires the payment of just compensation to the owner of the land and no other acts or actions by the state constitute a physical occupation by a roadway, shoulder, or ditching within the meaning of this section. The state has the burden of proof to show by clear and convincing evidence that the physical occupation by a roadway, shoulders, or ditching occurred before the effective date of this Act.

* Sec. 5. DEFINITION. As used in this Act, "physically occupied" ~~by the roadway, shoulder, or ditching~~ means the construction of the actual roadway, (including its shoulders and ditching), highway, tramway, trail, bridge, or appurtenant structure ~~shoulders, or ditching~~ before the effective date of this Act.

* Sec. 6. RETROACTIVE APPLICATION. This section does not relieve ~~a~~

alter or void any voluntary conveyance of any easement including easements dedicated by plat

person from an act for which the person may be responsible regarding a past transfer of a right-of-way or an interest in a right-of-way.

* Sec. 7. EFFECTIVE DATE. This Act takes effect immediately in accordance with AS 01.10.070(c).

SB 141 witnesses

M E M O R A N D U M

To: Senator Coghill
From: John Manly
Date: February 20, 1985
Re: People for today's hearing

For the hearing this afternoon on SB 141, relenquishing certain State highway rights-of-way, we are expecting participation by the following individuals:

Clif Groh, Counsel for the Alaska Land Title Association
Commissioner Dick Knapp, DOT/PF
Barry Moorehead, Federal Highway Administration
~~Oscar Beasley, Counsel for First American Title~~
Eric Everbach, Counsel for Tycor
Michael Condon, an associate of Clif Groh
Michael Price, an associate of Clif Groh
Jack McGee, of the Attorney General's office
Ned Fahrquar, Department of Natural Resources
Ted Moore, Security Title in Anchorage
Tom Leighow, Alaska Title Guaranty in Anchorage

sb 141 draft

(a) Notwithstanding any other provision of law, a person who holds title to land conveyed in a patent issued by the United States which is or may be effected by a right-of-way or easement authorized by

[INSERT PLOs, etc]

may, before January ', 1990, apply to the department of transportation and public facilities for relinquishment of all or a portion of the right-of-way or easement.

(b) A person who applies for relinquishment of a right-of-way or easement or a portion of a right-of-way or easement under (a) of this section shall apply on a form approved by the department, and shall submit a copy of the patent that conveyed the land ~~adjacent to the~~ effected by the right-of-way or easement, and a plat of the land showing the right-of-way or easement and indicating that portion of the right-of-way or easement the person is requesting the State to relinquish.

(c) ~~Upon~~ Within 120 days of receipt of an application for relinquishment of a right-of-way under (a) of this section, or easement, the commissioner of transportation and public facilities shall decide ~~within 120 days~~ whether or not the right-of-way or easement or a portion of it shall be relinquished. The commissioner shall consider the provisions of the patent; the federal laws, public land orders and departmental orders effecting the patent; the existence of improvements within the right-of-way or easement before the effective date of this Act; projected or anticipated public use of the right-of-way or easement; and any other information pertinent to the public or private usage of the land.

(d) If the commissioner determines that a public need does not exist, he shall convey the right-of-way or easement or a portion thereof to the applicant if the applicant is the rightful holder of title to the adjoining property.

(e) If the commissioner determines that a public need for the right-of-way or easement continues to exist and that the State will therefore not relinquish its rights, the commissioner shall notify the applicant of the decision by mail and shall state the reasons supporting the denial. A person whose application has been denied under this section may reapply after a period of two years has elapsed after the date of denial.

(f) If the commissioner fails to make a determination on an application under (a) of this section before 120 days has elapsed, the applicant may record a claim of _____ at the ~~appropriate~~ recorder's office serving the district in which the patented land is located.

MEMORANDUM

To: Committee Members
From: Committee Staff JM
Date: March 6, 1985
Re: Background material for SB 141

This afternoon at 3:30 the committee will consider SB 141, relinquishing certain rights-of-way of the State. As you will recall, this bill was scheduled for a hearing two weeks ago, and was removed from the committee's calendar at the request of its proponents.

Included with SB 141 in today's packet are the following materials, some of which are duplicative of information you received last time:

- A proposed committee substitute, which takes the approach of, rather than relinquishing all the rights-of-way, requiring instead that the State compensate for the portions of right-of-way they use, as if they had been relinquished.

- The proponents' summary of the issue, and committee staff synopsis of the problem.

- Relevant Federal Acts of 1947 and 1970.

- Two federal patents, dated 1952 and 1955, and a subdivision plat of land patented by the 1952 patent.

- A list of the identified highways effected by this issue.

- DOT/PF fiscal note and bill analysis that the cost to the State would be $227 million annually, and that DOT/PF would rather settle the cases on an individual basis.

- Federal Highway Administration bill analysis that the federal government could not participate in repurchasing the relinquished rights of way.

- Attorney General's opinion that the bill would violate several provisions of the Alaska Constitution.

MEMORANDUM RE HOUSE BILL

TO RELINQUISH RIGHTS-OF-WAY

Alaska achieved statehood twenty-five years ago. Before stathood the Department of Interior, through certain Pulic Land Orders, took rights-of-way for roads from landowners without compensating the landowners. Since statehood the Department of Transportation and Public Facilities (DOTPF), acting for the State of Alaska, is still taking private property without compensating the landowners.

In 1966, the Alaska State Legislature enacted Ch. 92 (HB 415 am) which prohibited such takings by the State. The purpose of the law was to "alleviate economic hardship and physical and mental distress occasioned by the taking of land by the State of Alaska [for] which no compensation is paid to the person holding title to the land." The Legislature prohibited any further utilization of rights-of-way pursuant to various Public Land Orders and federal acts.

At the time of Statehood the State received a quit claim deed from the federal government conveying to the State certain roads built by the United States. DOTPF claims that the quit claim deed also conveyed certain easements or rights-of-way that were not described therein but included in Public Land Orders that were not even recorded in the various Recorders Offices throughout the state. DOTPF presently claims a right to highway rights-of-way varying in width from 100 to 300 feet surrounding

PROPONENT'S SUMMARY

every major highway in the state and a smaller easement for most of the local roads throughout the state. When DOTPF determines that it needs to expand or modify an existing roadway where it claims a right-of-way exists by virtue of the federal government, it does so without paying compensation to the landowner for the value of the property taken.

The reservations for rights-of-way and easements were made by the federal government between 1947 and 1956. They were set forth in a series of Public Land Orders (namely PLO 601, 757, and 1613) and a Department of Interior Order (DO 2665) which were not recorded in District Recorders Offices in Alaska but were published in the Federal Register, which was a publication utilized by federal agencies.

The rights-of-way and reservations were not specifically included in the patents issued to homesteaders in Alaska. Homesteaders in Alaska were not informed of the existence of the easements and rights-of-way at the time they were issued patents and did not know the federal government was claiming a portion of their property for highway purposes. Now DOTPF is claiming right-of-way easements in the same way by virtue of the quit claim deed mentioned above.

No landowner or member of the public can know where DOTPF claims a right-of-way easement because those easements are not recorded and are not shown on plats available in the Recorder's Offices.

The Supreme Court of Alaska, in State v. A.L.T.A., has held that the easements are valid. The decision is wrong and must be reversed through the enactment of a law that will relinquish these easements and require DOTPF to pay just compensation for lands taken by them.

M E M O R A N D U M

To: Committee members
From: Chairman Coghill
Date: February 19, 1985
Re: SB 141, Relinquishment of rights-of-way

As the attached background information will show, SB 141 is intended to release the State's claim to certain portions of highway rights-of-way which were not clearly identified in land patents. This has given rise to the problem faced by many landowners who live or hold land adjacent to highways the State now wishes to upgrade, straighten or expand and who have been or could be abruptly and without compensation deprived of land they assumed was theirs, and which their legal documents have not identified as belonging to the government.

These rights-of-way were withdrawn by the federal government through public land orders or as a result of various Acts of Congress during territorial days, and did not necessarily make their way either to the homesteaders' patents or the district recorders' offices. This has subsequently caused heavy liabilities for the state's title insurance companies, who traditionally insure property based upon what has been recorded at the recorder's office, not upon what has been published in the Federal Register.

As this problem has evolved, the State Supreme Court has ruled that the State's claims to the rights-of-way are valid, and therefore, title insurers are liable for any claims by the insured for takings for which the State has declined to compensate the property-owner. Of course, this presumes that the property-owner has title insurance. In the many instances where the property-owner does not, he or she is simply out of luck, and has no recourse to gain compensation.

The background material will more completely go into the history of the problem, however, a brief explanation of the enormous fiscal note may be in order. We are not sure how DOT/PF generated this much fiscal impact, but assume they have figured the repurchase price at top market value, and of the entire width of right-of-way (in other words, the entire 300 or 500 feet, not just the portion they will actually need to expand a road).

COMMITTEE STAFF SYNOPSIS

U.S. Department

R. J. Knapp, Commissioner
Alaska Department of Transportation
and Public Facilities
Juneau, Alaska

Dear Commissioner Knapp:

Senate Bill 141

We have reviewed Senate Bill #141 introducted in the State Senate February 8, 1985. This Bill is similar to previously introduced legislation and we sill have the following concerns:

1. If the right-of-way remaining will only include the road shoulders and the ditching, several problems are envisioned. There may not be sufficient sight distance to provide for the safety of the traveling public, as you would be unable to clear vegetation on the inside of curves. You would be unable to clean ditches and maintain structures without encroaching on other properties. There would be no mechanism to prevent construction of facilities next to the traveled way.

2. It was the intent of the Federal Government in estabishing Public Land Orders to provide land for highway construction at no additional expense to the states or the United States. If the State of Alaska should choose to abandon this right, and later find that this right-of-way is necessary for the construction or operation of the highway, there can be no Federal reimbursement for funds expended by the State of Alaska for reacquisition.

Sincerely yours,

Barry F. Morehead

Dept. of Transportation & Public Facilities

Position Paper

BILL NO: Senate Bill No. 141

TITLE: An Act releasing claims of the State to land within certain rights of way

APPROVED: R. J. Knapp
Commissioner

DATE: 2-15-85

The Department of Transportation and Public Facilities opposes Senate Bill 141. This bill would have a major negative impact on the State of Alaska. It could restrict our ability to serve the public effectively and create a heavy financial burden for the State. In addition, there is a concern that, if this bill is enacted into law, it will jeopardize present or future federal-aid participation in highway rights of way.

The validity of these easements has been reviewed by the U.S. Supreme Court and the passage of this bill would reverse any legal grounds already established through the judicial system.

For further information call Susan Fleischhauer at 465-3900.

ANALYSIS OF FISCAL NOTE FOR SENATE BILL 141

This bill would relinquish highway easements created by the federal government under several laws and land orders. Most of the highway rights of way in the State would be affected. This bill would relinquish or vacate all those rights of way except those portions which are physically occupied on the effective date of the Act. Under this Act, the adjacent landowners would immediately become owners of the affected rights of way except those portions between slopes and ditches.

The enactment of this bill would put the Department in the position of having to purchase any rights of way needed for planned expansion, maintenance (brush cutting and snow storage), protection of utility permit areas, permitted encroachments, etc.

The cost of almost all future upgrading or widening of existing highways and the building of planned highways would be increased drastically because of the expense of acquiring additional right of way. This bill would also affect federal funding on federal-aid projects. It is the Federal Highway Administration's position that there can be no federal reimbursement for funds expended by the State of Alaska for the acquisition of right of way from lands subject to the reservation contained in the 1947 Act.

This fiscal note is based on the following assumptions:

1. Primary highways normally control 300-foot rights of way in general but physically occupy 100 feet for the actual roadway.

2. Secondary highways normally control 200-foot rights of way but physically occupy 60 feet for the actual roadway.

3. The State would have to reacquire approximately one half the relinquished rights of way for planned expansion, maintenance, clear zones, utility permits, etc. This would have to be done as expeditiously as possible to satisfy maintenance agreement obligations with the federal government on federal-aid highways.

~ 197 - 376

11.0005

Anchorage 073311

The United States of America,

To all to whom these presents shall come, Greeting:

WHEREAS, a certificate of the Land Office at Anchorage, Alaska, is now deposited in the Bureau of Land Management, whereby it appears that pursuant to the act of Congress of June 1, 1938 (52 Stat. 609), as amended by the Act of July 14, 1945 (59 Stat. 467), the claim of Vernon Lenne Lofstedt has been established and that the requirements of law pertaining to the claim have been met, for the following-described land:

Seward Meridian, Alaska.

T. 12 N., R. 3 W.,

Sec. 33, Lot 191.

The area described contains 2.50 acres, according to the official plat of the survey of the said land, on file in the Bureau of Land Management: Dependent Resurvey officially filed April 14, 1952.

NOW KNOW YE, That the UNITED STATES OF AMERICA, in consideration of the premises, DOES HEREBY GRANT unto the said claimant and to the heirs of the said claimant the tract above described; TO HAVE AND TO HOLD the same, together with all the rights, privileges, immunities, and appurtenances, of whatsoever nature, thereunto belonging, unto the said claimant and to the heirs and assigns of the said claimant forever; subject to (1) any vested and accrued water rights for mining, agricultural, manufacturing, or other purposes, and rights to ditches and reservoirs used in connection with such water rights, as may be recognized and acknowledged by the local customs, laws, and decisions of courts; (2) the reservation of a right-of-way for ditches or canals constructed by the authority of the United States, in accordance with the act of August 30, 1890 (26 Stat., 391, 43 U. S. C. sec. 945), and (3) the reservation of a right-of-way for roads, roadways, highways, tramways, trails, bridges, and appurtenant structures constructed or to be constructed by or under authority of the United States or by any State created out of the Territory of Alaska, in accordance with the act of July 24, 1947 (61 Stat., 418, 48 U. S. C. sec. 321d). There is also reserved to the United States a right-of-way for the construction of railroads, telegraph and telephone lines, in accordance with section 1 of the act of March 12, 1914 (38 Stat., 305, 48 U. S. C. sec. 305). Excepting and reserving, also, to the United States, all oil, gas, and other mineral deposits, in the land so patented, together with the right to prospect for, mine, and remove the same according to the provisions of said Act of June 1, 1938. This patent is subject to a right-of-way not exceeding 33 feet in width, for roadway and public utilities purposes, to be located along the south and east boundaries of said land.

Reserving unto the United States, its permittee or licensee, the right to enter upon, occupy and use, any part or all of said lands for the purposes provided in the Act of June 10, 1920, (41 Stat. 1063) and subject to the conditions and limitations of Section 24 of said Act, as amended by the Act of August 26, 1935 (49 Stat. 846).

IN TESTIMONY WHEREOF, the undersigned authorized officer of the Bureau of Land Management, in accordance with the provisions of the Act of June 17, 1948 (62 Stat., 476), has, in the name of the United States, caused these letters to be made Patent, and the Seal of the Bureau to be hereunto affixed.

GIVEN under my hand, in the District of Columbia, the FOURTH day of OCTOBER in the year of our Lord one thousand nine hundred and FIFTY-FIVE and of the Independence of the United States the one hundred and EIGHTIETH.

For the Director, Bureau of Land Management.

BUREAU OF LAND MANAGEMENT

The United States of America,

To all to whom these presents shall come, Greeting:

WHEREAS, a certificate of the Land Office at Anchorage, Alaska, is now deposited in the Bureau of Land Management, whereby it appears that pursuant to the act of Congress of May 20, 1862, "To secure Homesteads to Actual Settlers on the Public Domain," and the acts supplemental thereto, the claim of Grant Henry Forsythe has been established and that the requirements of law pertaining to the claim have been met, for the following-described land

Seward Meridian, Alaska.
T. 12 N., R. 3 W.,
Sec. 11, W½NW¼.
Sec. 23, W½NE¼.

The area described contains 160 acres, according to the official plat of the survey of the said land, on file in the Bureau of Land Management:

NOW KNOW YE, That the UNITED STATES OF AMERICA, in consideration of the premises, DOES HEREBY GRANT unto the said claimant and to the heirs of the said claimant the tract above described TO HAVE AND TO HOLD the same, together with all the rights, privileges, immunities, and appurtenances of whatsoever nature, thereunto belonging, unto the said claimant and to the heirs and assigns of the said claimant forever; subject to all vested and accrued water rights for mining, agricultural, manufacturing, or other purposes, and rights to ditches and reservoirs used in connection with such water rights, as may be recognized and acknowledged by the local customs, laws, and decisions of courts; (2) the reservation of a right-of-way for ditches or canals constructed by the authority of the United States, in accordance with the act of August 30, 1890 (26 Stat., 391, 43 U. S. C. sec. 945), and (3) the reservation of a right-of-way for roads, roadways, highways, tramways, trails, bridges, and appurtenant structures constructed or to be constructed by or under authority of the United States or by any State created out of the Territory of Alaska, in accordance with the act of July 24, 1947 (61 Stat., 418, 48 U. S. C. sec. 321d). There is also reserved to the United States a right-of-way for the construction of railroads, telegraph and telephone lines, in accordance with section 1 of the act of March 12, 1914 (38 Stat., 305, 48 U. S. C. sec. 305); excepting and reserving also, to the United States, pursuant to section 2 of the act of August 1, 1944 (58 Stat., 748, 42 U. S. C. sec. 1995), all uranium, thorium, or any other material which is or may be determined to be peculiarly essential to the production of fissionable materials, whether or not of commercial value, together with the right of the United States through its authorized agents or representatives at any time to enter upon the land and prospect for, mine, and remove the same.

FEDERAL ACT OF 1947

[CHAPTER 313]

AN ACT

July 24, 1947
[H. R. 1554]
[Public Law 229]

To amend the Act entitled "An Act providing for the transfer of the duties authorized and authority conferred by law upon the board of road commissioners in the Territory of Alaska to the Department of the Interior, and for other purposes", approved June 30, 1932.

Alaska.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the act entitled "An Act providing for the transfer of the duties authorized and authority conferred by law upon the board of road commissioners in the Territory of Alaska to the Department of the Interior, and for other purposes", approved June 30, 1932 (47 Stat. 446), is hereby amended by adding at the end thereof the following new section:

48 U. S. C. §§ 321a-327.

Reservation of right-of-way for roads, etc.

"SEC. 5. In all patents for lands hereafter taken up, entered, or located in the Territory of Alaska, and in all deeds by the United States hereafter conveying any lands to which it may have reacquired title in said Territory not included within the limits of any organized municipality, there shall be expressed that there is reserved, from the lands described in said patent or deed, a right-of-way thereon for roads, roadways, highways, tramways, trails, bridges, and appurtenant structures constructed or to be constructed by or under the authority of the United States or of any State created out of the Territory of Alaska. When a right-of-way reserved under the provisions of this Act is utilized by the United States or under its authority, the head of the agency in charge of such utilization is authorized to determine and make payment for the value of the crops thereon if not harvested by the owner, and for the value of any improvements, or for the cost of removing them to another site, if less than their value."

Payment for value of crops, etc.

Approved July 24, 1947.

FEDERAL AID HIGHWAY ACT - 1970

ALASKAN ASSISTANCE

Sec. 138. (a) Subsection (b) of section 7 of the Federal Aid Highway Act of 1966 is amended to read as follows:

"(b) There is hereby authorized to be appropriated for construction of Federal-aid highways of the State of Alaska, out of the Highway Trust Fund and in addition to funds otherwise made available to the State of Alaska under title 23, United States Code, $20,-

43. 23 U.S.C.A. § 307(b). 44. 23 U.S.C.A. § 606.

000,000 for each of the fiscal years ending June 30, 1972 and June 30, 1973."

(b) Any right-of-way for roads, roadways, highways, tramways, trails, bridges, and appurtenant structures reserved by section 321 (d) of title 48, United States Code (61 Stat. 418, 1947), not utilized by the United States or by the State or territory of Alaska prior to the date of enactment hereof, shall be and hereby is vacated and relinquished by the United States to the end and intent that such reservation shall merge with the fee and be forever extinguished.

Re: Request for Opinion on SB 141
Our File: 366-380-85

Dear Mr. Call:

This letter is in response to your request for our analysis of SB 141 which has as its subject matter Public Land Orders 601, 757, 1613 and Department Order 2665.

Public Land Orders 601, 757, 1613 and Department Order 2665 are responsible for the creation of 80 percent of the public road rights-of-way in Alaska. Moreover, the legal validity of the rights-of-way and easements created by these land orders was upheld by the Alaska Supreme Court against numerous legal challenges raised by the Alaska Land Title Association in a case that went all the way up to the U.S. Supreme Court. See Alaska Land Title Association v. State of Alaska, 667 P.2d 714 (Alaska 1983), cert. denied, 104 S.Ct. 704 (1984).

The effect of SB 141 would be to require the state to vacate and relinquish to certain private landowners significant portions of public highway rights-of-way that were created by PLO 601, PLO 757, PLO 1613 and D.O. 2665. Specifically, those portions of the rights-of-way not physically occupied on the effective date of the bill would have to be relinquished by the state.

There are at least two major legal concerns raised by this bill. The first involves article IX, section 6, of the Alaska Constitution. This provision reads as follows:

> Section 6. PUBLIC PURPOSE. No tax shall be levied, or appropriation of public money made, or

ATTORNEY GENERAL'S OPINION

03-C5LH

public property transferred, nor shall the public credit be used, except for a public purpose.

The easement rights created by PLO 601, PLO 757, PLO 1613, and D.O. 2665 are held in common by the general public. These rights, therefore, are a form of public property. The clear effect of Senate Bill 141 is to transfer this public property to certain private individuals. This is so because the bill, while relinquishing public road easements held in common by the general public, bestows the right to the fair market value of these easements upon those private landowners whose property was previously subject to them. See sections 2 and 3 of SB 141. The bill, in effect, transfers public property to private individuals who would not pay anything to the state for the value of the rights transferred to them. Such a transfer, on its face, would appear to violate the public purpose provision of the state Constitution. This is underscored by the fact that the public, if it requires the vacated road easement area for future road improvement, must purchase it back from private ownership. Only these private individuals would benefit from this arrangement and the repurchase costs would probably be significant. Thus, it is difficult to understand how this bill would not violate the public purpose requirement of article IX, section 6, of the Alaska Constitution that must be met whenever public property is transferred. 1/

A second legal difficulty concerns article 1, section 1, of the Alaska Constitution. This provision provides that all persons are entitled to equal rights under the law and, conversely, prohibits unfair distinctions between classes of persons.

1/ Because this bill would eliminate significant portions of public road easements, it would most likely have a negative effect on public access to various areas of the state. As a result, SB 141 appears to be inconsistent with article VIII, sections 1 and 2 of the Alaska Constitution. Article VIII, Section 1 states that it is the policy of the state "to encourage the settlement of its lands and development of its resources by making them available for maximum use consistent with the public interest." Article VIII, section 2 requires the legislature to "provide for the utilization, development, and conservation of all natural resources belonging to the state . . . for the maximum benefit of its people."

See Ale v. State, 484 P.2d 677 (Alaska 1971); Leege v. Martin, 379 P.2d 447 (Alaska 1963) .

The effect of this bill is to divest the general public of its right to utilize significant portions of the public road easements created by public land orders. Since the effect of this divestment would be to eliminate the public's right to claim these public road easements, only those private individuals owning land fronting on the public roads created by these land orders would benefit from this divestment. That is to say, after the effective date of this bill, the public, acting through the state, would have to purchase from this class of individuals the right to use the same public road easements that were previously owned by the public.

In sum, as matters stand now, the public road rights granted by these land orders are owned by all members of the public in common. Should this bill become law, it would mean that the cash value of these rights, rights which were formerly held by all, would be granted to a class of property owners, i.e., those individual property owners fortunate enough to own land fronting on the very roadways created by these public land orders. Thus the practical effect of this bill is to take away potentially valuable property rights owned by the general public as a whole and bestow the right to the fair market value of these rights upon a class of private individuals. Since article I, section 1 of the Alaska Constitution adopts the principle that "all persons are equal and entitled to equal rights, opportunities, and protection under the law," the granting of special privileges by this bill to a particular class at the expense of the public may very well violate this provision.

At present, only one class of persons exists relative to the public road easements created by these public land orders. This class is made up of members of the general public who own these public road easements in common. Should this bill become law, these easement rights would, in effect, be taken from the general public. 2/ The right to the cash value of these public road easement rights would then be bestowed, not on the general

---

2/ This "taking" from each member of the public by itself may violate article XIII, section 16 of the Alaska Constitution which provides that "no person shall be involuntarily divested of . . . his interests in lands . . ." unless the divestment is for a public purpose and he is paid just compensation.

public as a whole, but on a special class of property owners. This bill, in effect, would create two classes of persons: the class of all those members of the general public who do not own real property fronting on the roadways created by the public land orders and the class of those property owners who do own property fronting on the roadways created by these public land orders. This latter class would then be given the right to the fair market value of the easements previously owned by the entire public. It is likely that such discriminatory treatment is barred by article I, section 1, of the Alaska Constitution.

Sincerely,

NORMAN C. GORSUCH
ATTORNEY GENERAL

Jack B. McGee
Assistant Attorney General

JBM:ebc:prm

PERCENTAGE OF AREA SUBJECT TO PLO TAKINGS WITHOUT COMPENSATION.

Due to the existing Alaska Supreme Court cases indicating that land homesteaded after August 10, 1949 may have the easements taken without compensation, the following are best guess estimates of land in the following areas that would be subject to taking without compensation:

Anchorage - 60%-75%

Kenai - 90%

Fairbanks - 5%-10%

Juneau - 5%-10%

As you can see in the Anchorage and Kenai areas, this means that the majority of the land bordering these roads may be taken without any compensation whatsoever.

OWNERS V. MORTGAGEE'S TITLE INSURANCE POLICY

A point was made at the Hearing 3-6-85 for Senate Bill 141 that banks required insurance policies on most of the urban transactions. However, there is a basic distinction between an owner's policy and a bank's policy known as a mortgagee's policy. The owner's policy insures title to be in the name of the fee owner of the property, e.g. John Smith. The mortgagee's policy does not insure title is held in any particular person, but only insures that the mortgage to the bank has a certain priority as to other recorded instruments. Many times an owner pays for a mortgagee's policy, but does not pay for an owner's policy whereby he is not insured and in fact if loss occurs to the lending institute, the title insurance company may sue the owner under the doctrine of subrogation to recover any losses. Often times, a mortgagee's policy is the only one acquired and that owner's go uninsured as to their property. This is especially true in more rural areas.

ALTA / [illegible]

November 19, 1984

RECEIVED
MAR 7 1985
GROH, EGGERS & PRICE

The Honorable Frank Murkowski
United States Senate
317 Hart Building
Washington, DC 20510

Dear Frank:

I have been informed that representatives of the Alaska Land Title Association (ALTA) may ask you to consider introducing legislation concerning highway easements created by public land orders and department orders issued by the Department of Interior from 1943 through 1958. I am writing to let you know of our strong opposition to such legislation, for the reasons detailed below.

The central issue is whether existing State and federal statutes limit the State's right to utilize public road easements granted by particular public land orders and department orders. The Alaska Supreme Court has clearly disagreed with ALTA's view that existing laws (the Alaska Right-of-Way Act of 1966 and AS 34.15.290) prohibit the State from utilizing the powers granted in Public Land Order 601 and Department Order 2665 to expand or widen public roads. In January 1984, the U.S. Supreme Court denied ALTA's request to review the Alaska Supreme Court decision.

With statehood, the road powers originally granted by a series of Department of Interior public land orders and department orders were transferred to the State. In 1966, the Alaska Legislature limited those powers. The Alaska Legislature has recently considered legislation further limiting those powers but has not acted on it to date. We believe that federal legislation in this area would be an unwarranted intrusion into matters best addressed, if necessary, at the State level.

The Alaska Department of Transportation and Public Facilities estimates that the total monetary impact to the State's road program could ultimately reach several hundred million dollars if the ALTA proposal were enacted.

Property owners purchase title insurance precisely to protect themselves from the problems presented by the present situation. To enact legislation absolving the title industry of its responsibilities for this issue would simply shift the costs that the private entity has agreed to bear by contract on to the public.

The Alaska Supreme Court's decision in this matter also determined that the publication of the Department of the Interior orders in the Federal Register provided proper notice and that the title industry should have been cognizant of the effect of the orders. It should be noted that title companies now exempt these rights-of-way from their insurance policies. Consequently, they have already taken steps to limit their contractual liability.

I appreciate your consideration of our views. Please let me know if you have any questions or comments.

Sincerely,

Bill Sheffield

R. J. Knapp, Commissioner
Alaska Department of Transportation
and Public Facilities
Juneau, Alaska

Dear Commissioner Knapp:

Senate Bill 141

The enclosed is a paper Gary Wilson did for me explaining the differences in 1947 Act easements and Public Land Order (PLO) easements. Since the 1947 Act easements in essence no longer exist I think it would be helpful to all of us if discussions, including examples, only referred to PLO easements.

Our office would certainly be willing to work with you in resolving this issue. The resolution would seem to tie in with your plan to develop an immediate, intermediate, and long term program of proposed improvement projects. Once this is done you could determine which of the proposed improvements involve PLO easements. We could then agree to the number of lanes needed, and a typical section, including shoulders and ditches; plus any additional areas needed to maintain your roadway. Lands beyond what we agree are needed could then be unencumbered by PLO easements.

The mechanics of how this could be recorded needs to be explored. For instance, could the right-of-way lines be established from areial photography and mathematical calculations? Would something like this be recordable? If so, this could be done rather quickly. However, if a physical survey is needed I can see this resolution would be quite costly and time consuming.

If at some later date it was determined lands outside our agreed to right-of-way limits were needed for a roadway improvement, we would participate in the acquisition even though it may be lands previously included in Public Land Orders.

Sincerely yours,

Barry F. Morehead

Alaska Division
Juneau, Alaska

The testimony and material presented at the Senate Committee hearing on March 6, 1985 confused Public Land Order (PLO) right-of-way with "47 Act" right-of-way. The pertinent differences that were not explained are:

"47 Act":

1. Was established by an Act of Congress effective 7/24/47 and codified into 48 USC, Section 321.d. It reserved from subsequent lands patented, a right-of-way. The right-of-way was available to the United States or any state created out of the Territory of Alaska.

2. It was repealed by Public Law 86-70, the Alaska Omnibus Act, effective July 1, 1959, however, the reservation contained in patents issued between 1947 and 1959 remained valid.

3. It was specifically noted in patents issued between 1947 and 1959.

4. Specific areas or locations were not identified in the patents.

5. The State of Alaska relinquished their right to any unutilized reservations by the Alaska Right-of-Way Act of 1966.

6. The Federal Government relinquished their right to any unutilized reservations by Section 138 of the Federal-aid Highway Act of 1970.

PLO: 1. Established a withdrawal from Public domain which was subsequently changed to an easement and established and/or revised corridor widths by:

Executive Order 9145 dated 4/23/42.
PLO 12 dated 7/20/42
PLO 84 dated 1/28/43
PLO 270 dated 4/5/45
PLO 386 dated 7/31/47
PLO 601 dated 8/10/49
PLO 757 dated 10/16/51
Secretarial Order 2665 dated 10/16/51
Amendment #1 to 2665 dated 7/17/52
Amendment #2 to 2665 dated 9/15/56
PLO 1613 dated 4/7/58

The above were issued by the Executive Branch rather than the Congress.

2. They established the original corridor for the Alaska and Glenn Highways. They withdrew from Public Domain a specific width corridor along existing highways. They changed the withdrawals to easements.

3. The withdrawals or easements were not identified in patents issued by the Federal Government nor were they recorded.

4. The withdrawals or easements were not affected by the Alaska Right-of-Way Act of 1966 or Section 138 of the Federal-Aid Highway Act of 1970. The hearings and introductory remarks pertaining to these pieces of legislation always referred to 48 USC, Section 321d or the "47 Act" with no mention of Public Lands Orders.

In summary, the "47 Act" reserved an area from the land patented but did not identify where it was. The PLO's created an easement over the land and located it by designating the highway name and corridor width.

The question of payments and reimbursement was raised but not sufficiently answered.

Prior to 1966:

the State of Alaska did not pay for land utilized under provisions of the "47 Act" or within the PLO corridors. Since there was no expense, there was no federal-aid reimbursement.

From 1966 to 1970:

the State of Alaska paid fair market value for right-of-way covered by the "47 Act" but there was no federal-aid reimbursement for these expenses (see attached listing of parcels and amounts expended prior to 5/1/67).

The State of Alaska did not pay for land within the PLO corridors.

From 1970 to the present

the State of Alaska has paid fair market value for right-of-way covered by "47 Act" and federal-aid funds have participated in the expense.

The State of Alaska has not paid for land within the PLO corridors.

Gary E. Wilson

MEMORANDUM State of Alaska

TO: William J. Niemi
Interim Regional Administrator
Federal Highway Administration
Juneau

DATE: May 1, 1967

FILE NO: 23-2900

SUBJECT: Small Tracts and Right of Way Act

ATTN: Calvin Ringgenberg
Regional R/W Officer

FROM: Dick Chitty
Chief Right of Way Agent
Department of Highways
Juneau

~~#1005~~
061 - cross reference
to 062

We have enclosed a copy of our listing of parcels for which land payments have been made in accordance with the State Supreme Court Opinion No. 322 for Small Tracts as well as the Right of Way Act as passed by the 1966 Legislature. The listing as submitted is subject to change as it has been necessary to obtain additional title information on some projects and parcels.

Additional listings will be furnished on a monthly basis as requested in your memorandum of April 7, 1967.

MEMORANDUM

To: Senator Coghill

From; John Manly

Re: Conversation with Clif Groh

I spoke with Clif Groh this afternoon regarding SB 141, as you requested and with the following result: He said that they are apparently not going to get much out of the Congressional delegation, as they have "bigger fish to fry". Their next move is to prepare a proposed resolution for introduction by you that would ask two things of the federal government. First, that the federal government recognize the PLO easements as having been created as a result of the 1947 Act, and then that the Federal Highway Administration be directed to participate in compensating for the easements, as passed by the 1970 Act.

Clif said Mike Price and Mike Condon are working on the resolution and he would have the draft in the mail to us by Friday. I told him you would be out of town until Wednesday, but that I would get the draft in the works and out of Legal Services by the time you got back, so it could be introduced next week.

Re: PLO 601 and 1613

Gentlemen:

I am addressing this joint letter to you to update our attempts to pass State legislation solving the public land order highway easement issue which has been the subject of both previous correspondence and personal meetings. We have introduced State legislation and met on several occasions, with both the Governor and his Commissioner of Transportation, Richard Knapp, in an effort to solve this problem for the people of the State of Alaska. Unfortunately, I cannot report any significant progress between the State Administration and us to eliminate the unfairness of these undisclosed, federally-created easements.

As you are aware, Governor Sheffield has asked the Alaska Congressional Delegation to refrain from introducing federal legislation and contending that this is a State problem that is to be solved intrastate. However, the Administration's efforts so far have been limited to a preliminary agreement that the State might pay for improvements constructed within the rights-of-way if accompanied by federal agreements to allow federal matching to reimburse the State for those expenses.

Senator Jack Coghill introduced Senate Bill 141, a Committee Substitute of which is enclosed for your reference. This bill calls for the State of Alaska to not give up the easements, but

only pay compensation for that portion taken beyond the recorded and recognized easements in any given year for widening projects. We believe, with federal matching funds at approximately 95%, this would result in minimal fiscal impact to the State on an annualized basis. However, in an attempt to simply kill the bill, the Administration has furnished to the Legislation a $227 million per year fiscal note which totals over one billion dollars over a five year period. I respectfully suggest that Governor Sheffield's letter stating that the matter should be handled in-state was an attempt to place the issue in a forum that he more readily controls and one where he could easily kill the substantive aspects of the bill.

The Administration tentatively has agreed to support a compromise that would call for the State of Alaska to pay (with federal matching funds available as a condition) for "improvements." This would not compensate such people as Otto Schneider who purchased from the federal government a five acre tract north of Homer and subsequently had the Sterling Highway take 1.82 acres of it without compensation. Mr. Schneider's patent was silent as to any PLO easements.

As Commissioner Knapp explained to us, even if the federal government were to contribute 100 cents on the dollar for takings of these highway rights-of-way under the federal matching fund program, he would not support our Senate Bill 141 because his total contribution per year is limited to $150 million and that every federal dollar he spends for highway right-of-way acquisition is one less dollar he can spend on highway construction. We feel this attitude is somewhat harsh in light of his testimony before the Alaska Senate Transportation Committee where he admitted that the easements were not shown in the patents, that homeowners are not aware of their existence, and in organized boroughs or municipalities, the owners have been paying taxes on the property as if no easement existed. This is not to mention the fact that the various people in the State paid for the property when they purchased the property as if no easement existed.

The only time we get any significant reaction from the Administration is when we mention the possibility that the Congressional Delegation will attempt to pass a bill to declare that taking of these easements are void as violative of the United States Constitution. The only other alternative which might succeed would be a combination of pressure from the Congressional Delegation on the Administration in combination

with a special appropriation to the State of Alaska of either 100 cents on the dollar for these particular highway acquisition costs or a one time appropriation to the State in recognition of the fact that the errors were originally created by the federal government. These bills could be combined in the same effort to solve the PLO 1613 repurchase program which I am sure all of your staffs are working on for disgruntled constituents.

Quite frankly, the bottom line is our client, and the people of the State of Alaska, need the Congressional Delegation's help either through introduction of the bill or pressure on the Administration to be more reasonable than they have so far demonstrated. The only other item which might be of some help would be if U.S. Department of Transportation were to give an opinion that PLO 601, 757, 1613 and Department Order 2665 were issued pursuant to the authority of and were to be interpreted as 1947 Act Reservations (48 USC 321(d)). With such an opinion we could attempt to convince either the Legislature, Alaska Department of Transportation and Public Facilities or the Courts of the State that the Right-of-Way Act of 1966 and Senator Steven's bill of 1970 have already taken care of the problem.

Unfortunately, we need to know what the Congressional Delegation can do, if anything, to help us. Because of the time constraints of the Alaska Legislature, we need to know that as soon as possible.

Gentlemen, would you please consider the potential solutions and advise us as soon as practicable. Of course, we will be more than willing to meet with you either in Anchorage or Washington, D.C. to discuss this complicated situation in more detail if you think that necessary.

Sincerely,

GROH, EGGERS & PRICE

Clifford J. Groh

Michael W. Price

IN THE SENATE BY COGHILL

SPONSOR SUBSTITUTE FOR

SENATE BILL NO. 141

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act requiring just compensation for the ulilization of certain rights-of-way and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. LEGISLATIVE PURPOSE AND FINDING. The purpose of this Act is to provide just compensation to land owners in Alaska who are suffering economic hardship and physical and mental distress by virtue of the state utilizing certain rights-of-way created, withdrawn or reserved under 33 Stat. 616 (Act of January 27, 1905); 47 Stat. 446 (Act of June 30, 1932); 48 U.S.C. sec. 321(d) (Act of July 24, 1947); Public Land Order 601, 14 Fed. Reg. 5048 (1949); Public Land Order 757, 16 Fed. Reg. 10, 749 (1951); Public Land Order 1613, 23 Fed. Reg. 2376, 2378 (1958); or Departmental Order 2665, 16 Fed. Reg. 10, 752 (1951).

* Sec. 2. TAKING OF PROPERTY WITHOUT COMPENSATION IS BARRED. After the effective date of this Act, no agency of the State may take, utilize, or occupy any right-of-way for a road, roadway, highway, tramway, trail, bridge, or appurtenant struc-

ture created, withdrawn or reserved under 33 Stat. 616 (Act of January 27, 1905); 47 Stat. 446 (Act of June 30, 1932); 48 U.S.C. secs. 321(d) (Act of July 24, 1947); Public Land Order 601, 14 Fed. Reg. 5048 (1949); Public Land Order 757, 16 Fed. Reg. 10, 749 (1951); Public Land Order 1613, 23 Fed. Reg. 2376, 2378 (1958); or Departmental Order 2665, 16 Fed. Reg. 10, 752 (1951) beyond that portion physically occupied by a road, roadway, highway, tramway, trail, bridge, or appurtenant structure on the effective date of this Act, without payment of just compensation.

* Sec. 3. PHYSICAL OCCUPATION OF RIGHT-OF-WAY. (a) The provisions of this Act do not require the State to pay compensation for land physically occupied on the effective date of this act by a road, roadway, highway, tramway, trail, bridge, or appurtenant structure constructed within the right-of-way created, withdrawn, or reserved under the Acts of Congress and the orders described in sec. 2 of this Act; nor do the provisions of this Act require the payment of compensation by the state for taking, utilizing or occupying an interest in an easement of specific width set out in the original patent from the state or federal government, whether or not physically occupied on the effective date of this Act.

(b) Expansion beyond an existing road, roadway, highway, tramway, trail, bridge, or appurtenant structure requires the payment of just compensation to the owner of the land only to the extent that the state actually takes, utilizes or occupies beyond

the physical occupation as of the effective date of this Act. The state has the burden of proof to show by clear and convincing evidence the extent of the physical occupation which occurred before the effective date of this act.

* Sec. 4. APPLICATION TO FEDERAL LAND. The provisions of this Act do not require that the state pay compensation for taking, utilizing or occupying a right-of-way that affects land in which fee title is, on the date of the taking, utilization or occupation, vested in the United States of America.

* Sec. 5. DEFINITION. As used in this Act, "physically occupied" means the construction of the actual roadway, including its shoulders and ditching, highway, tramway, trail, bridge, or appurtenant structures, before the effective date of this Act.

* Sec. 6. RETROACTIVE APPLICATION. This Act does not relieve, alter, or void a voluntary conveyance of an easement including an easement dedicated by plat.

* Sec. 7. EFFECTIVE DATE. This Act takes effect immediately in accordance with AS 01.10.070(c).

IN THE SENATE BY COGHILL

SENATE JOINT RESOLUTION NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

Relating to the payment of just compensation to landowners for certain rights-of-way across land in Alaska.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

WHEREAS the Federal Government created certain rights-of-way for highway purposes across land in the state under Public Land Order 601, Public Land Order 757, Department Order 2665, and Public Land Order 1613; and

WHEREAS the rights-of-way created by the Federal Government were not identified in the patents issued to Alaska homesteaders nor were the original homesteaders informed as to the location or true width of the rights-of-way claimed for highway purposes by the Federal Government across their land; and

WHEREAS the original homesteaders and their successors in interest have had no knowledge of the claim of the Federal Government to the rights-of-way along or across their properties and have often utilized and improved the portion of the right-of-way claimed by the Federal Government; and

WHEREAS the enforcement of the rights-of-way would be unfair to homesteaders who entered their property between August 1949 and Alaska statehood in 1959; and

WHEREAS the rights-of-way created by the Federal Government were not recorded in any territorial or state recording office for the purpose of public notice; and

WHEREAS the right to utilize the rights-of-way for highway purposes

was conveyed to the state in 1959; and

WHEREAS the United States Department of Transportation has declined to pay federal highway funds to the state to allow the state to pay just compensation to the landowners whose properties are affected by the rights-of-way; and

WHEREAS U.S. Senator Ted Stevens has attempted in the Federal Aid Highway Act of 1970, sec. 138, to require the United States Department of Transportation to compensate the State of Alaska for money paid as just compensation for the taking and utilization of the rights-of-way;

BE IT RESOLVED by the Alaska State Legislature that the Alaska delegation to U.S. Congress introduce and support legislation to require reimbursement by the United States Department of Transportation of the State of Alaska for money paid by the state as just compensation for the use of any right-of-way created, established, or claimed under Public Land Order 601, Public Land Order 757, Department Order 2665, and Public Land Order 1613; and be it

FURTHER RESOLVED by the Alaska State Legislature that the Alaska delegation requests that Congress enact legislation preventing the Federal Government or any successor-in-interest from utilizing the rights-of-way without paying just compensation to the landowner.

COPIES of this resolution shall be sent to the Honorable Ted Stevens and the Honorable Frank Murkowski, U.S. Senators, and the Honorable Don Young, U.S. Representative, members of the Alaska delegation in Congress.

Re: SB 175

SB 175 proposes to appropriate $18.5 million (of which less than $1 million would be from the general fund) to design and construct the DeArmoun-Rabbit Creek Interchange in south Anchorage.

This project has had a substantial amount of work done on it in the past several years, including required public hearings, environmental impact statement and preliminary engineering. The State has chosen Alternative 'C' as its preferred alternative, has received FHWA approval for it, and is proceeding with that design. DOT/PF is also acquiring right-of-way necessary for the project.

SB 175 was introduced to fund Alternative 'C', although it was also included in the Governor's FY 86 budget request. However, Senator DeVries has indicated she would now prefer to fund Alternative 'A', and has proposed an amendment to do so. She has based this decision, she said, on input from effected landowners and on the alternative's lower cost.

DOT/PF has indicated that, in view of the work done on Alternative 'C' to date, to change to Alternative 'A' at this point would probably set the project back 2 to 3 years, and would likely effect federal funding.

	TOTAL:	$ 24 258, 215

Sheet 1 of ____

of the existing development.

The five alternatives under consideration present a number of interchange configurations. Traffic projections for each of these configurations have been included in Appendix A.

All of the alternatives would construct an at-grade intersection serving the driveway of the Rabbit Creek Rifle Range and the road which provides access to the property east of the highway. A median opening and left-turn storage lanes would be provided at this location. There is a possibility that an increase in traffic volumes will make it desirable to close this median opening at some time in the future.

ALTERNATIVE A

This proposal calls for the construction of a full diamond interchange at the DeArmoun Road intersection and the elimination of the Old Seward Highway intersection. The Old Seward Highway west of the New Seward Highway would be dead-ended and provided with a cul-de-sac. Rabbit Creek road will be connected with the two-way frontage road east of the New Seward Highway. This frontage road will be realigned so that its proposed intersection with DeArmoun Road will be farther east than its existing intersection. This was done in order to provide better spacing between this intersection and the ramp intersection. This alternative would make it necessary for area residents wishing to travel from the Old Seward Highway to Rabbit Creek Road to do so by way of DeArmoun Road.

Dear Governor Sheffield;

This letter is to express the Valdez Chamber of Commerce's support for the City of Valdez REQUEST FOR FUNDING of the following CAPITAL PROJECTS:

1. Commercial Boat Harbor
2. Prince William Sound Community College
3. Museum Addition
4. Ice Skating Rink
5. National Guard Armory
6. New Jail Addition
7. Upgrading Richardson Highway
8. Small Boat Harbor Slips
9. Valdez Industrial Park
10. Small Boat Harbor Grid
11. Handicap Curbs
12. Dayville Road Boat Ramp

Thank you for your positive considerations to these projects.

Respectfully,

William J. Simpson
President

CHAMBER OF COMMERCE PRIORITIES

Small Boat Harbor Expansion

This project is the development of the final phase of the existing Valdez Small Boat Harbor. At the time of the original Corps of Engineers Valdez boat harbor construction, the general area to the east of the original boat harbor was left undeveloped for future harbor expansion. The area of the proposed expansion site is presently at elevation to a depth of -13 feet (MLLW) which will be consistent with the bottom of the existing small boat harbor area. The excavation consists of the removal of approximately 298,000 cubic yards of soil in the harbor area.

Material removed from the harbor expansion area would be located on the Port of Valdez side of the existing spit that now separates the boat harbor from the port. This area was used as a site for disposing of the dredge material from the original boat harbor.

The widening of the spit area, at a City owned location, would facilitate the creation of a waterfront area for uses compatible with the City's Coastal Zone Management plan. These intended uses include the storage and dry docking of recreational and commercial boats; the storage of commercial fishing gear; and a parking and staging area. The limited amount of land available near the small boat harbor doesn't assure a place for parking boat trailers or pulling boats out of the water for minor repairs. This site is also designated as a potential long range planning site for expanded fin fish and shellfish processing facilities.

The intended use for the expanded boat harbor area would be to provide additional moorage capacity for private and small commercial boats. The facility would be owned and operated by the City of Valdez as it is the final phase of the small boat harbor project. A conceptual drawing of the expanded small boat harbor is shown in 'Figure 1'

The Valdez Small Boat Harbor expansion project is a positive development activity for the continued planned growth of the City of Valdez. The additional facilities support the commercial and recreational fishing populace and are expected to be beneficial to the local economy.

SMALL BOAT HARBOR

The existing small boat harbor currently has the following number of berths available:

Length (ft)	Number
50	33
42	34
32	84
24	108
20	98

On these berths, the occupancy rate on a year round basis is relatively high particularily in the larger boat lengths:

Length (ft)	Occupancy Percentage
50	100
42	90
32	65
24	40
20	30

In addition, there is over 350 feet of transient dock, however, no individual transient berths exist. Six berths are being utilized for either permanent or scenic-permanent residence. At least seven vessels, making Valdez their home port, are 50 feet or more in length:

Name	Length	Type
Capt. Sonny	80'	Fishing
El Centrol	76'	Fishing
Bering	65'	Pilot
Margaret M.	60'	Tug
Vince Pee Dee	56'	Charter
Libra	55'	Fishing
Lady Fair	50'	Pleasure

During peak fishing periods, it is estimated that over 100 additional boats utilize the harbor. Valdez currently has two growing fish processors and a third processor expressing interest in locating in Valdez. This could lead to a substantial increase in necessary berths.

The secondary benefit to the City of Valdez with the expanded harbor will be increased use of local lodging, food services, marine repairs and fuel sales.

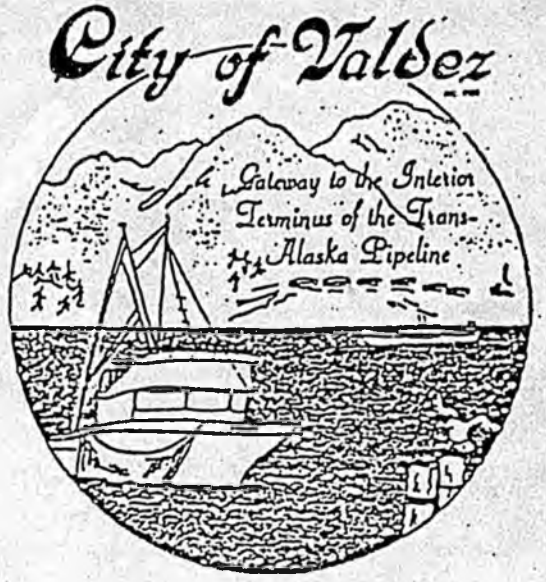
FUNDING REQUEST FOR VALDEZ COMMERCIAL BOAT HARBOR IMPROVEMENTS



Commercial fishing and fish processing are developing into significant renewable industries in the City of Valdez. Advances in aquaculture, fisheries management, bottom fishing and fish processing offer even greater potential for the future.

According to a recent study commissioned by the City, commercial fishing can and should develop at a steady rate consistent with the resource and the ability of fishermen, processors and the market to efficiently utilize resources.

Economics of fish processing, marketing and fisheries related business are sensitive to initial capitalization such as good harbors, adequate uplands, handling facilities and docks. Jointly used facilities which lower annual costs of capitalization are an attraction to business and with availability there is more chance of business growth and success.

The City of Valdez has established general annual capital improvement priorities specifically directed toward improving commercial fishing and other harbor use activities. The City is also reviewing long range harbor expansion goals, which will be consistent and mesh with development as it happens.

The program for 1985 - 1986 is limited to the priority items discussed on the following pages.

FUNDING REQUEST

SUMMARY

Proposed Project: Expansion of the Valdez Small Boat Harbor

Need: Increasing requirements for recreational and commercial boat space.

Permits: Alaska D.E.C. Permit: Granted.
Federal C.O.E. Permit: Granted.

Environmental Impact Statement: Completed.

Budget Total: $ 2,083,450.00

Total Grant Request: $ 2,083,450.00

VALDEZ COMMERCIAL BOAT HARBOR

The City of Valdez desires to construct and operate a Commercial Boat Harbor (CBH) primarily to serve a commercial fishing fleet with vessel lengths of 65 to 150 feet. The proposed site is south of the Mineral Creek Islands and eastward of the proposed Small Boat Harbor (SBH) expansion area (see Figure 1, 2, and 3). The site is bounded on the north by Dock Point and on the west by Harbor Point and the site of the proposed SBH expansion (Kennicott Avenue). The project. would involve dredging the site to a depth of -25 feet mean low low water (MLLW). The general layout of the proposed CBH is shown on Figure 3.

The City wishes to develop the CBH in phases. Phase I would consist of the initial geotechnical investigation, engineering design and dredging of the harbor. Future work would include completion of sheet piling, breakwaters, mooring facilities, roads, etc.

The area under consideration for construction of the CBH was studied to some extend from 1977 to 1979 as a part of the on-going geotechnical and environmental evaluation for the City's port expansion study. Some of the area was also included in work related to the preparation of the Alpetco DEIS and FEIS. Additional biological reconnaissance of the area was made in the spring of 1981 as a adjunct to some limited biological investigations related to the proposed SBH expansion. The Port of Valdez itself has been the subject of numerous other investigations in the past decade relative to construction and operation of the Alyeska marine terminal and the environmental and permitting phase of the Alpetco project. Climatic and tidal conditions are well known as is the general nature of the circulation and sedimentation patterns. The wildlife resources of the area of interest have been described, in part, by an 'Environmental Assessment' previously prepared for the City in conjunction with the permitting of the City's container dock and marshalling yard which was recently completed. This ecological overview draws heavily on the previous work performed for the 1979 assessment, as well as work performed by the University of Alaska and others during the planning, design and construction of the Alyeska marine terminal.

Cost estimated for this first phase effort. $ 4,500,000.00

1983 LEGISLATIVE PROGRAM

TRANSPORTATION:

A. Highways;
with the advent of Alaska becoming a member of the interstate program, accelerate existing 5 year capital improvement plan to within 2 years, and accelerate the 5 to 10 year planning phase to within 5 years with emphasis on reconstruction of the following:

Richardson - Mile 129-265
(Gakona Jct. to Delta Jct.)

Tok - Mile 30-75
(Gakona Jct. to Tok)

Alaska - Mile 1314-1221

Copper River - Million Dollar Bridge to Richardson Highway

Glenn - Mile 50 to 135

B. Marine Highways;
support increase in scheduling to Prince William Sound terminals, and urge the acquisition of a larger vessel to serve Valdez-Cordova-Whittier, and urge the appropriation of the necessary money required for improvements to the state ferry terminal in Valdez.

C. All-Alaska Gas-Line;
urge the state support for construction of an all-Alaskan gas pipeline from the North Slope to tidewater, when deamed feasible

D. Seward Coal Terminal;
support the necessary actions to convert the Seward grain terminal to a coal mineral terminal

E. Valdez Air Terminal;
urge state acquisition and maintenance of the existing terminal building

VALDEZ CHAMBER OF COMMERCE

COMMERCIAL BOAT HARBOR:

urge the appropriation of $21 million for the construction of a commercial boat harbor in Valdez, and urge the funding associated with the Vladez Fisheries Development Association

ENERGY:

A. Silver Lake Hydroelectric;

urge the appropriation of necessary monies required to construct the Silver Lake hydroelectric plant and transmission inter-ties to Cordova and to the Solomon Gulch hydroelectric plant

B. Susitna Hydroelectric;

support the Phase I construction of the Susitna hydroelectric and inter-tie project

NATURAL RESOURCES:

support the acceleration of the develoment of Alaska's natural resources

AGRICULTURE:

support the increase of programing and appropriations for the Delta agriculture program, specifically marketing and planting

ADMINISTRATIVE:

A. State Boroughs;

support the freedom of choice by the local residents as to the formation of local government

B. Tax Reform;

favors application of an investment tax credit at 10% of qualified investment in Alaska each year, not limited to 18% of federal tax credits; favors revision of the state corporate income tax rate to 1% of the first $250,000 and a reduction of the maximum rate of 9.4%

C. Regulation Reform;

Ref. 1982 SB 84, relaxation of stipulations

D. Insurance Reform;

support manditory bodily injury and property damage liability insurance, and support M.A.D.D.

E. Land Disposal Program;

urge the requirement of access power and communication construction to and within the State Land Disposal Subdivisions, both now in existence and future disposals

JUDICIAL:

A. support the assignment of a District Attorney and a Superior Court judge, in that order, to the Valdez, Glennallen, Cordova area of the Third Judicial District

B. urge the appointment and necessary appropriations of and for a Judicial Probation Officier in the Valdez, Glennallen, Cordova area of the Third Judicial District

RECREATION:

A. support the Prince William Sound Development Legislation, and specifically the necessary funding for land acquisition and development of a harbor camper park in Valdez

B. support the trails and campsite development legislation

COMMUNICATION:

support the passage of Alaska Public Broadcasting Commission's FY'84 budget, which includes a Terminal Radio, Inc. (Valdez) funding request

EDUCATION:

A. Prince William Sound Community College;
support the continued programming and urge the necessary appropriations for the upgrading of the existing plant facility

SENATE BILL NO. 180

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act making a special appropriation for payment as a grant to the City of Valdez for phase II construction of the commercial boat harbor and for improvements to the small boat harbor; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. The sum of $4,500,000 is appropriated from the general fund for payment as a grant to the City of Valdez for phase II construction of the commercial boat harbor and for improvements to the small boat harbor.

* Sec. 2. The appropriation made by this Act shall be disbursed in accordance with AS 37.05.315.

* Sec. 3. This Act takes effect immediately in accordance with AS 01.-10.070(c).

Small Boat Harbor Expansion

This project is the development of the final phase of the existing Valdez Small Boat Harbor. At the time of the original Corps of Engineers Valdez boat harbor construction, the general area to the east of the original boat harbor was left undeveloped for future harbor expansion. The area of the proposed expansion site is presently at elevation to a depth of -13 feet (MLLW) which will be consistent with the bottom of the existing small boat harbor area. The excavation consists of the removal of approximately 298,000 cubic yards of soil in the harbor area.

Material removed from the harbor expansion area would be located on the Port of Valdez side of the existing spit that now separates the boat harbor from the port. This area was used as a site for disposing of the dredge material from the original boat harbor.

The widening of the spit area, at a City owned location, would facilitate the creation of a waterfront area for uses compatible with the City's Coastal Zone Management plan. These intended uses include the storage and dry docking of recreational and commercial boats; the storage of commercial fishing gear; and a parking and staging area. The limited amount of land available near the small boat harbor doesn't assure a place for parking boat trailers or pulling boats out of the water for minor repairs. This site is also designated as a potential long range planning site for expanded fin fish and shellfish processing facilities.

The intended use for the expanded boat harbor area would be to provide additional moorage capacity for private and small commercial boats. The facility would be owned and operated by the City of Valdez as it is the final phase of the small boat harbor project. A conceptual drawing of the expanded small boat harbor is shown in 'Figure 1'.

The Valdez Small Boat Harbor expansion project is a positive development activity for the continued planned growth of the City of Valdez. The additional facilities support the commercial and recreational fishing populace and are expected to be beneficial to the local economy.

SMALL BOAT HARBOR

The existing small boat harbor currently has the following number of berths available:

Length (ft)	Number
50	33
42	34
32	84
24	108
20	98

On these berths, the occupancy rate on a year round basis is relatively high particularily in the larger boat lengths:

Length (ft)	Occupancy Percentage
50	100
42	90
32	65
24	40
20	30

In addition, there is over 350 feet of transient dock, however, no individual transient berths exist. Six berths are being utilized for either permanent or scenic-permanent residence. At least seven vessels, making Valdez their home port, are 50 feet or more in length:

Name	Length	Type
Capt. Sonny	80'	Fishing
El Centrol	76'	Fishing
Bering	65'	Pilot
Margaret M.	60'	Tug
Vince Pee Dee	56'	Charter
Libra	55'	Fishing
Lady Fair	50'	Pleasure

During peak fishing periods, it is estimated that over 100 additional boats utilize the harbor. Valdez currently has two growing fish processors and a third processor expressing interest in locating in Valdez. This could lead to a substantial increase in necessary berths.

The secondary benefit to the City of Valdez with the expanded harbor will be increased use of local lodging, food services, marine repairs and fuel sales.

BUDGET

Description	Estimated Qty.	Unit Price	Amount
Excavation	298,000 Cu.Yd.	400/cu.yd.	$1,195,200.00
Containment Dike	Lump Sum	225,000	225,000.00

VALDEZ COMMERCIAL BOAT HARBOR

The City of Valdez desires to construct and operate a Commercial Boat Harbor (CBH) primarily to serve a commercial fishing fleet with vessel lengths of 65 to 150 feet. The proposed site is south of the Mineral Creek Islands and eastward of the proposed Small Boat Harbor (SBH) expansion area (see Figure 1, 2, and 3). The site is bounded on the north by Dock Point and on the west by Harbor Point and the site of the proposed SBH expansion (Kennicott Avenue). The project. would involve dredging the site to a depth of -25 feet mean low low water (MLLW). The general layout of the proposed CBH is shown on Figure 3.

The City wishes to develop the CBH in phases. Phase I would consist of the initial geotechnical investigation, engineering design and dredging of the harbor. Future work would include completion of sheet piling, breakwaters, mooring facilities, roads, etc.

The area under consideration for construction of the CBH was studied to some extend from 1977 to 1979 as a part of the on-going geotechnical and environmental evaluation for the City's port expansion study. Some of the area was also included in work related to the preparation of the Alpetco DEIS and FEIS. Additional biological reconnaissance of the area was made in the spring of 1981 as a adjunct to some limited biological investigations related to the proposed SBH expansion. The Port of Valdez itself has been the subject of numerous other investigations in the past decade relative to construction and operation of the Alyeska marine terminal and the environmental and permitting phase of the Alpetco project. Climatic and tidal conditions are well known as is the general nature of the circulation and sedimentation patterns. The wildlife resources of the area of interest have been described, in part, by an 'Environmental Assessment' previously prepared for the City in conjunction with the permitting of the City's container dock and marshalling yard which was recently completed. This ecological overview draws heavily on the previous work performed for the 1979 assessment, as well as work performed by the University of Alaska and others during the planning, design and construction of the Alyeska marine terminal.

Cost estimated for this first phase effort. $ 4,500,000.00

1983 LEGISLATIVE PROGRAM

TRANSPORTATION:

A. Highways;
with the advent of Alaska becoming a member of the interstate program, accelerate existing 5 year capital improvement plan to within 2 years, and accelerate the 5 to 10 year planning phase to within 5 years with emphasis on reconstruction of the following:

Richardson - Mile 129-265
(Gakona Jct. to Delta Jct.)

Tok - Mile 30-75
(Gakona Jct. to Tok)

Alaska - Mile 1314-1221

Copper River - Million Dollar Bridge to Richardson Highway

Glenn - Mile 50 to 135

B. Marine Highways;
support increase in scheduling to Prince William Sound terminals, and urge the acquisition of a larger vessel to serve Valdez-Cordova-Whittier, and urge the appropriation of the necessary money required for improvements to the state ferry terminal in Valdez.

C. All-Alaska Gas-Line;
urge the state support for construction of an all-Alaskan gas pipeline from the North Slope to tidewater, when deamed feasible

D. Seward Coal Terminal;
support the necessary actions to convert the Seward grain terminal to a coal mineral terminal

E. Valdez Air Terminal;
urge state acquisition and maintenance of the existing terminal building

VALDEZ CHAMBER OF COMMERCE

COMMERCIAL BOAT HARBOR:

urge the appropriation of $21 million for the construction of a commercial boat harbor in Valdez, and urge the funding associated with the Vladez Fisheries Development Association

ENERGY:

A. Silver Lake Hydroelectric;

urge the appropriation of necessary monies required to construct the Silver Lake hydroelectric plant and transmission inter-ties to Cordova and to the Solomon Gulch hydroelectric plant

B. Susitna Hydroelectric;

support the Phase I construction of the Susitna hydroelectric and inter-tie project

NATURAL RESOURCES:

support the acceleration of the develoment of Alaska's natural resources

AGRICULTURE:

support the increase of programing and appropriations for the Delta agriculture program, specifically marketing and planting

ADMINISTRATIVE:

A. State Boroughs;

support the freedom of choice by the local residents as to the formation of local government

B. Tax Reform;

favors application of an investment tax credit at 10% of qualified investment in Alaska each year, not limited to 18% of federal tax credits; favors revision of the state corporate income tax rate to 1% of the first $250,000 and a reduction of the maximum rate of 9.4%

C. Regulation Reform;

Ref. 1982 SB 84, relaxation of stipulations

D. Insurance Reform;

support manditory bodily injury and property damage liability insurance, and support M.A.D.D.

E. Land Disposal Program;

urge the requirement of access power and communication construction to and within the State Land Disposal Subdivisions, both now in existence and future disposals

JUDICIAL:

A. support the assignment of a District Attorney and a Superior Court judge, in that order, to the Valdez, Glennallen, Cordova area of the Third Judicial District

B. urge the appointment and necessary appropriations of and for a Judicial Probation Officier in the Valdez, Glennallen, Cordova area of the Third Judicial District

RECREATION:

A. support the Prince William Sound Development Legislation, and specifically the necessary funding for land acquisition and development of a harbor camper park in Valdez

B. support the trails and campsite development legislation

COMMUNICATION:

support the passage of Alaska Public Broadcasting Commission's FY'84 budget, which includes a Terminal Radio, Inc. (Valdez) funding request

EDUCATION:

A. Prince William Sound Community College;
support the continued programming and urge the necessary appropriations for the upgrading of the existing plant facility

Recreational Vehicle Park

The natural scenic beauty of Valdez, fine recreational boating facilities and excellent fishing attract many tourists world wide. These attractions currently cause an influx of approximately 1500 recreational vehicles from May 23rd through Labor Day. With the opening of the Wrangel - St. Elias National Park and the advertising of Valdez as the 'Gateway' to the park, the number of tourists is expected to show a dramatic increase. Presently, adequate facilities do not exist to handle current levels of the Valdez tourists industry.

The longest single attraction for these recreational vehicles is the Valdez Small Boat Harbor. A site located near the harbor presents the best location as a recreational vehicle park. This would also give users a location that is within walking distance of the City's commercial area. (see attached map).

This property is owned by the University of Alaska with whom the City has entered into a use agreement for the facility location.

Proposed Facilities:

A. 76 parking spaces, each space to be 30'x50'.

B. Two picnic shelters.

C. Six fire pits.

D. Picnic tables.

E. Two water faucets.

F. A dump station to service recreational vehicles.

G. Two litter receptacles.

Proposed Budget:

A lump sum grant is proposed for the total project cost:
$ 250,000.00

Total Annual Expenditure (Capital Cost)	424	381.6	42.4	---	---	---	---

Project Justification

DISCUSSION OF THE NEED FOR THE PROJECT

Valdez is currently served by only a repeater of a commercial station in Anchorage. Little or no access is available for the community to generate programs and information of its own. The Valdez area is certainly of sufficient size to justify a public radio station since it compares favorably with the size and characteristics of communities like Petersburg, Wrangel, Haines and Homer, who already are served by public radio stations.

The ability of a public radio station to provide in-depth coverage of governmental activity and encourage citizen participation in that activity is reason enough to establish a station in the Valdez population center. In addition, public safety requirements will certainly be served by having a station which can broadcast local weather and sea conditions in that highly sensitive area.

DOCUMENTATION OF ESTIMATED CAPITAL COST

Construction of a public radio station in Valdez falls at the low end of the capital cost scale due to the relatively mild climate in the Valdez area and the lack of tundra or permafrost conditions for the construction of a tower. The cost is based on APBC engineer estimates and list prices of required equipment.

ANALYSIS OF ESTIMATE OF OPERATIONAL EXPENSE

The operational expense estimates are based on current APBC portions of the operating budgets of existing public stations of a similar size to the Valdez operation.

Project Justification

IDENTIFICATION OF ALTERNATIVES CONSIDERED

There is no public station near enough to Valdez to provide an acceptable signal for a translator operation. The size of the community and its need for self-sufficiency argue for a full service station capable of generating its own programming, rather than attempting to operate a repeater station, which would repeat the broadcasts of a public radio station from another part of the state.

PROJECT DESCRIPTION

This Project will provide for a new public radio station to serve the Valdez area. This station has been in the planning stages at the APBC for the last two years. The station will be of the "full service" variety, and will provide 18 hours per day of news, information, cultural enrichment and entertainment programming.

1983 LEGISLATIVE PRIORITIES

(Not Listed in Priority)

Draft

TRANSPORTATION:

A. Highways;
accelerate existing 5 year capitol improvement plan to within 2 years, and accelerate the 5 to 10 year planning phase to within 5 years with emphasis on reconstruction of the following:

Richardson - Mile 129-265
(Gakona Jct. to Delta Jct.)

Tok - Mile 30-75
(Gakona Jct. to Tok)

Alaska - Mile 1314-1221

Copper River - Million Dollar Bridge to Richardson Highway

Glenn - Mile 50 to 135

B. Marine Highway;
support increase in scheduling to Prince William Sound terminals, and urge the acquisition of a larger vessel to serve Valdez-Cordova-Whittier, and urge the appropriation of the necessary money required for improvements to the state ferry terminal in Valdez

C. All-Alaska Gas-Line;
urge the state support for construction of an all-Alaskan gas pipeline from the North Slope to tidewater

D. Seward Coal Terminal;
support the necessary actions to convert the Seward grain terminal to a coal mineral terminal

E. Valdez Air Terminal;
urge state acquisition and maintenance of the existing terminal building

COMMERCIAL BOAT HARBOR:
urge the appropriation of $21 million for the construction of a commercial boat harbor in Valdez, and urge the funding associated with the Valdez Fisheries Development Association

ENERGY:

A. Silver Lake Hydroelectric;
urge the appropriation of necessary monies required to construct the Silver Lake hydroelectric plant and transmission inter-ties to Cordova and to the Solomon Gulch hydroelectric plant

B. Susitna Hydroelectric;
support the Phase I construction of the Susitna hydroelectric and inter-tie project

NATURAL RESOURCES:
support the acceleration of the development of Alaska's natural resources

ADMINISTRATIVE:

A. State Boroughs;
support the freedom of choice by the local residents as to the formation of local government

B. Tax Reform;
favors application of an investment tax credit at 10% of qualified investment in Alaska each year, not limited to 18% of federal tax credits; favors revision of the state corporate income tax rate to 1% of the first $250,000 and a reduction of the maximum rate of 9.4%

C. Regulation Reform;
Ref. 1982 SB 84
relaxation of stipulations

D. Insurance Reform;
support manditory bodily injury and property damage liability insurance, and support the M.A.D.D. movement -

JUDICIAL:

A. support the assignment of a District Attorney and a Superior Court Judge, in that order, to the Valdez, Glennallen, Cordova area of the Third Judicial District

B. urge the appointment and necessary appropriations of and for a Judicial Probation Officier in the Valdez, Glennallen, Cordova area of the Third Judicial District

AGRICULTURE:
support the increase of progrmaing and appropriations for the Delta agriculture program, specifically marketing and planting

RECREATION:

A. support the Prince William Sound Development Legislation, and specifically the necessary funding for land acquisition and development of a harbor camper park in Valdez

B. support the trails and campsite development legislation

COMMUNICATION:
support the passage of Alaska Public Broadcasting Commission's FY'84 budget, which includes a Terminal Radio, Inc. (Valdez) funding request

North Harbor Dr. & Kennicott Street Construction

This project would upgrade to urban standards both North Harbor Drive and Kennicott Street, including sewer and water utility extensions. Development will be necessary this year due to the proposed hotel construction at the south end of Kennicott Street (see Attachment B). $ 1,300,000.00

Small Boat Harbor Extension/Float Design

Design of mooring floats for the small boat harbor expansion area. $ 50,000.00

Subdivision Design - Lands West of Mineral Creek

An extreme shortage of land for residential development encourages the subdivision of this area lying adjacent to the west edge of the City as soon as possible. Access to the area via the new Egan Street bridge over Mineral Creek will be completed in the summer of 1983. $ 150,000.00

Loop Road Water Distribution System

This project extends municiple water services to those residents in Zook Subdivision and along Mineral Creek Loop Road from a recently completed well and reservoir (see Attachment C). $ 550,000.00

Pacific and Lowe Streets

This project would upgrade to standard urban design an area now troubled with surface runoff and flooding problems (see Attachment D). $ 380,000.00

Valdez Baseline Survey Monumentation

This effort would correct errors in the survey baseline used for layout of 'New Town' Valdez and would provide monumentation at critical points. $ 50,000.00

Marshalling Yard Warehouse

This project provides the necessary enclosed space at the new City Container Terminal facilities to house Stevedore equipment and miscellenouse small amounts of freight requiring weather protection. $ 240,000.00

SB-15

Blueberry Hill Access Road Utility Extension

This work would provide water and sewer utility extensions from Egan Street south to the property line of the Blueberry Hill Subdivision (see Attachment E) $ 700,000.00

Library Development

This work would provide needed expansion for library services. The recent consortium with Prince William Sound Community College markedly increases the space needs. $ 400,000.00

Fire Stations: Plumbing and Roof Repairs

Both outlying City fire stations require interior plumbing development and repairs to the roof. $ 65,000.00

Valdez Clinic Relocation

The State of Alaska has asked the City to relocate the medical clinic so the State may use the space for other purposes. $ 100,000.00

Hertiage Center Building

This building would house both the Archives Alive and the Museum facilities under one roof and would eliminate the present separate rental quarters and duplication of services. $ 1,500,000.00

Commercial Boat Harbor

This project would provide the first phase development of a harbor to serve commercial vessels in the range of 65 to 150 feet in length. This first phase would include; geotechnical and soils investigation, engineering design and dredging. Now that two fish processing plants are successfully operating in Valdez, development of the commercial harbor has become a priority need (see Attachment F) $ 4,500,000.00

ATTACHMENT E

of the existing development.

The five alternatives under consideration present a number of interchange configurations. Traffic projections for each of these configurations have been included in Appendix A.

All of the alternatives would construct an at-grade intersection serving the driveway of the Rabbit Creek Rifle Range and the road which provides access to the property east of the highway. A median opening and left-turn storage lanes would be provided at this location. There is a possiblity that an increase in traffic volumes will make it desirable to close this median opening at some time in the future.

ALTERNATIVE A

This proposal calls for the construction of a full diamond interchange at the DeArmoun Road intersection and the elimination of the Old Seward Highway intersection. The Old Seward Highway west of the New Seward Highway would be dead-ended and provided with a cul-de-sac. Rabbit Creek road will be connected with the two-way frontage road east of the New Seward Highway. This frontage road will be realigned so that its proposed intersection with DeArmoun Road will be farther east than its existing intersection. This was done in order to provide better spacing between this intersection and the ramp intersection. This alternative would make it necessary for area residents wishing to travel from the Old Seward Highway to Rabbit Creek Road to do so by way of DeArmoun Road.

Anchorage, Alaska 99515

February 25, 1985

Senator Edna DeVries:
Pouch V
Juneau, Alaska 99811

Dear Senator DeVries:

Ref. Senate Bill 175

I will appreciate it if you will take a hard look at S.B. 175 before letting it out of committee. Many of us who live in the area involved are very much concerned about the impact on our residential neighborhood, and at the cost of the project.

In local public hearing here, property owners favored an alternate which would cost some six million less, and which would do less violence to the area and would require less land. Reference made in data distributed at the meeting indicating that most of the alternate plans would find a saturation traffic condition at an early date, a point of view which I think needs re-examination when viewed in the context of all the other intersections on the New Seward Highway - Tudor, Dowling, Dimond, O'Malley, and Huffman. Most of these seem to already be at saturation traffic levels, a rather general condition in the Anchorage bowl and one which will not be improved until there is construction of more roadways such as a foothill boulevard and a tidewater freeway.

The widening of Old Seward Highway creates steeper driveways for residents on the south side of the road, and will probably sooner or later call for land to create a frontage road there, with need to take land. The whole project is designed to put more traffic through what is now prime residential property.

It has been said that the project will not cost as much as recent newspaper item indicated, as there will be Federal funds to take care of much of the cost. I am even more concerned about the Federal spending than I am about the Alaskan portion, for in the case of the Federal aide, it will be just one more addition to the annual 200 billion deficit. It would seem that weighted consideration should be given to the most economic alternate which has been proposed.

It is difficult to listen and read all that is said about

LETTERS SUPPORTING ALTERNATIVE 'A'

"quality of life", "pollution control (noise)" "protecting the neighborhoods", "public input" and "impact statements", and then see a project of this magnitude pushed, without regard to the preference of the local residents. One can't help but wonder if it all isn't just window dressing with no substance, when invited to attend the public hearings.

Respectfully,

W.E. Hancock

March 12, 1985

Dear Senator,

I'm not one to use the legislative process for road issues but I feel you should be aware.

I live next to Fred ~~Schiet~~ Chiei on the Old Seward Highway in Anchorage, (District 7, House) and I agree with him.

I don't think anyone in our area agrees with the highway configuration selected by the State and it is the most expensive alternate selected.

Call if I can help.

Mark Kortingy

ALTERNATIVE C

This proposal would provide a full movement interchange at the Old Seward Highway intersection that would utilize a combination of direct and loop ramps. A partial diamond interchange having ramps on the north would be constructed at the DeArmoun Road intersection. The DeArmoun Road interchange would serve the predominant traffic flow to and from the CBD but would eliminate direct access with the New Seward Highway on the south. Travellers from the south destined for DeArmoun Road and vice versa would use the Old Seward Highway interchange.

Due to the need to control access at the Old Seward Highway interchange, it would be necessary to construct several lengths of road to provide access to property in the area. In the southwest and northwest quadrants, additional right-of-way would need to be acquired in order to construct access roads. In the northeast quadrant several lengths of road would be constructed in dedicated easements and purchased right-of-way in order to provide access through the use of the existing subdivision road network. The existing east frontage road would be realigned so that its intersection with DeArmoun Road would be opposite Lake Otis Parkway.

Re: DeArmoun/Rabbit Creek
Interchange

The Honorable Jan Faiks
Alaska State Legislature
P.O. Box V
Juneau, Alaska 99811

Dear Senator Faiks:

Attached for your review are copies of the preliminary design proposals and estimated costs for the five alternatives which were proposed in the 1982 DeArmoun/Rabbit Creek Interchange Design Study Report.

Alternative "C" was selected in 1983 after public hearings and completion of an Environmental Impact Statement. The Federal Highway Administration (FHWA) approved Alternative "C" and the Department is proceeding with the design. Some right of way has been acquired. Additional funding for utilities and right of way purchase is being requested in the Governor's FY 86 Capital Budget.

The current contruction estimate is $25.6 million as opposed to the 1982 estimate of $14.38 million. Total project costs are estimated at $44.4 million. The breakdown follows:

	1982	1985	Difference
Construction	14.38	25.6	11.2
Constr. Admin.	1.7	3.8	2.1
Quantity Imprecision	1.15	3.0	2.0
PE/Design	.86	1.3	.5
Right of Way	5.3	6.5	1.1
Utilities	.77	4.2	3.5
TOTAL	24.11	44.4	20.4

Additional legislative authority to receive Federal construction funds will be requested in the FY 87 Capital Budget.

DOT/PF FIGURES ON ALT. "C"

Please call me if you have other questions regarding this project.

Sincerely,

John B. Olson

John B. Olson, P.E.

RIGHT-OF-WAY

The existing right-of-way width of the New Seward Highway varies. Basically, the average corridor width is 350-feet to the south of DeArmoun Road, narrowing to 300 feet to the north. A "joint-use" line separates the highway from the Alaska Railroad at the beginning of the project.

The right-of-way for the different alternatives varies depending on the interchange ramp configurations, the provision of frontage or access roads and the required width for the crossroads. The right-of-way needs for Alternatives A and B are relatively minor, consisting of narrow strips required for the widening of DeArmoun Road and for the construction of frontage roads. Alternatives C, D and E involve more extensive acquisition, particularly in the northeast quadrant of the Old Seward Highway intersection. Retaining walls were proposed to contain slopes in some areas in order to limit right-of-way acquisitions and to reduce costs.

The total estimated costs of right-of-way acquisition and the areas required for the different alternatives is summarized as follows:

	COST (1981 Dollars)	AREA (Acres)
Alternative A:	$1,204,000	5.0±
Alternative B:	1,005,000	4.2±
Alternative C:	5,365,000	9.0±
Alternative D:	3,643,000	6.0±
Alternative E:	5,000,000	8.3±

See Appendix F for copies of preliminary cost estimates.

Acquistion of right-of-way for Alternatives C, D and E will necessitate the relocation of families and businesses. Alternative C would relocate 9 families, with Alternatives D and E relocating 6 families each. Each of these three alternatives would relocate 2 businesses. A copy of the Conceptual Stage Relocation Study has been included in Appendix G.

Alternative E was developed as a result of comments made during a public meeting held on January 19, 1982. This alternative borrows heavily from features found in Alternative C.

Due to these similarities, a separate right-of-way estimate and conceptual stage relocation study were not prepared. The costs and impacts of right-of-way acquisition required by these alternatives should be identical. For this reason, there is no mention made of Alternative E in the appendices that were mentioned above.

Depending upon whether or not noise abatement barriers are constructed, there may be a need for additional right-of-way acquisition in the northeast quadrant of the DeArmoun interchange. The different alternative designs for noise barriers, which show the additional right-of-way required, have been included in Appendix Q.

UTILITIES

Most of the utility conflicts on this proposed project are found in the area of the DeArmoun Road and Old Seward Highway intersections. This will involve relocating power poles, telephone cables and gas lines.

A copy of the cost estimate for each of the design alternatives is found in Appendix H. The total estimated costs are summarized below:

	COST (1983 Dollars)
Alternative A:	429,000
Alternative B:	493,000
Alternative C:	769,000
Alternative D:	696,000
Alternative E:	769,000

The MOA has contracted a consultant to assist them in their design of a waste water force main and pump house within the project area. The construction of this facility may precede the construction of these interchanges. At the public hearing of this project, a letter was submitted for inclusion in the written record by Louis J. Bonito, of the Anchorage Water and Wastewater Utility (AWWU). In this letter, Mr. Bonito outlined the AWWU's plans of the time and requested co-operation during the final design of both projects. The plans for the AWWU's waste water pipeline have been changed from what was described in this letter. The most current plan, as of October, 1983, would locate the pump

SENATE BILL NO. 180

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act making a special appropriation for payment as a grant to the City of Valdez for phase II construction of the commercial boat harbor and for improvements to the small boat harbor; and providing for an effective date."

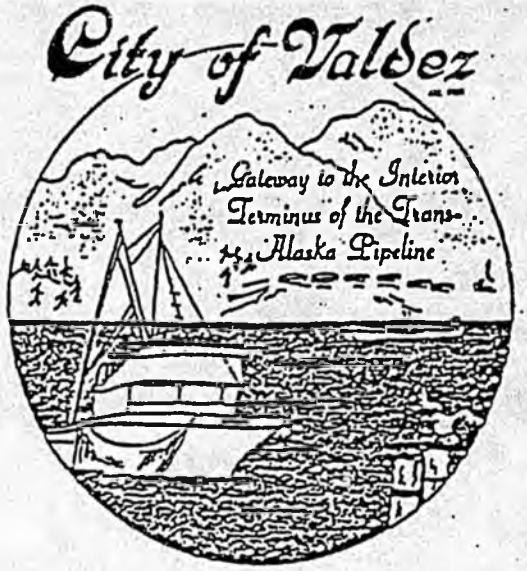
BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. The sum of $4,500,000 is appropriated from the general fund for payment as a grant to the City of Valdez for phase II construction of the commercial boat harbor and for improvements to the small boat harbor.

* Sec. 2. The appropriation made by this Act shall be disbursed in accordance with AS 37.05.315.

* Sec. 3. This Act takes effect immediately in accordance with AS 01.-10.070(c).

FUNDING REQUEST FOR VALDEZ COMMERCIAL BOAT HARBOR IMPROVEMENTS



Commercial fishing and fish processing are developing into significant renewable industries in the City of Valdez. Advances in aquaculture, fisheries management, bottom fishing and fish processing offer even greater potential for the future.

According to a recent study commissioned by the City, commercial fishing can and should develop at a steady rate consistent with the resource and the ability of fishermen, processors and the market to efficiently utilize resources.

Economics of fish processing, marketing and fisheries related business are sensitive to initial capitalization such as good harbors, adequate uplands, handling facilities and docks. Jointly used facilities which lower annual costs of capitalization are an attraction to business and with availability there is more chance of business growth and success.

The City of Valdez has established general annual capital improvement priorities specifically directed toward improving commercial fishing and other harbor use activities. The City is also reviewing long range harbor expansion goals, which will be consistent and mesh with development as it happens.

The program for 1985 - 1986 is limited to the priority items discussed on the following pages.

FOR CAPITAL PROJECTS AND GRANTS

FY 86

CITY PRIORITY	PROPOSED PROJECT	DISTRICT 6 APPROPRIATION	PROJECTS SUPPORTED BY THE CITY OF VALDEZ AND AGENCY REQUESTING FUNDS
1	Commercial Boat Harbor - Phase II/Small Boat Harbor Improvements	4,500,000	- -
2	Prince William Sound Community College Classroom/ Office Building	2,000,000*	9,834,000 University of Alaska
3	Valdez Heritage Center Expansion	2,500,000	- -
4	Ice Skating Arena	2,500,000	- -
5	National Guard Armory	- -	1,300.000 Department of Military Affairs
6	New Jail Addition	- -	675,000 Department of Corrections
7	Richardson Highway Improvements	- -	23,100,000 Department of Transportation
8	Subdivision of the Valdez Industrial Park	288,000	- -
9	Small Boat Harbor Grid	- -	750,000 Department of Transportation
10	Handicap Curbs	-40,000	- -
11	Dayville Road Boat Ramp	150,000	
	Total project funding requested by the City of Valdez	$ 9,978,000	
	Total project funding supported by the City of Valdez		$ 35,659,000

* Note: First priority is that funding come from University funding. However, if not appropriated from University, then City requests $2,000,000 as a direct appropriation to funding Phase I of Prince William Sound Community College.

PROJECT DESCRIPTION AND JUSTIFICATION Estimated Starting Date June 1985

Completion Jan. 1986 (Explain physical product and operational activities, if this project is one phase or multi-phase. Briefly describe the entire project, attach any backup materials, maps, surveys, etc.)

Commercial fishing and fish processing are developing into significant renewable industries in the City of Valdez. According to a recent study commissioned by the City, commercial fishing can and should develop at a steady rate consistent with the resource and the ability of fishermen, processors and the market to efficiently utilize resources.

Economics of fish processing, marketing and fisheries related business are sensitive to initial capitalization such as good harbors, adequate uplands, handling facilities and docks. Jointly used facilities which lower annual costs of capitalization are an attraction to business and with availability there is more chance of business growth and success.

In order to meet the immediate demands of the growing commercial fishing industry in the City of Valdez, we have had to utilize a portion of our small boat harbor which is referred to as Valdez Commercial Boat Harbor, Phase I and approved by the state in 1984.

As a part of the Commercial Boat Harbor, Phase I, it is necessary to provide small vessel slips as identified on the attached drawing and labelled Number 6.

The program for 1985 - 1986 is limited to the priority items discussed on the following pages.

1985 - 1986 PROJECT BUDGET

Harbor Dredging and Land Fill	$ 1,500,000
Float Modifications	300,000
Drain System	200,000
Bilge and Waste Oil Disposal Systems	100,000
Slip Improvements	2,400,000
Total Project Budget	$ 4,500,000

PRIMARY COMPONENTS OF T
PROPOSED DEVELOPMENT INC

1. Two approach structures a access gangways
2. Five main harbor floats with access float
3. Finger floats varying in leng to 50 feet
4. Boat ramp access float
5. Boat ramp and various im including wash down and boat apron
6. Float utilities

Small Boat Harbor Expansion

This project is the development of the final phase of the existing Valdez Small Boat Harbor. At the time of the original Corps of Engineers Valdez boat harbor construction, the general area to the east of the original boat harbor was left undeveloped for future harbor expansion. The area of the proposed expansion site is presently at elevation to a depth of -13 feet (MLLW) which will be consistent with the bottom of the existing small boat harbor area. The excavation consists of the removal of approximately 298,000 cubic yards of soil in the harbor area.

Material removed from the harbor expansion area would be located on the Port of Valdez side of the existing spit that now separates the boat harbor from the port. This area was used as a site for disposing of the dredge material from the original boat harbor.

The widening of the spit area, at a City owned location, would facilitate the creation of a waterfront area for uses compatible with the City's Coastal Zone Management plan. These intended uses include the storage and dry docking of recreational and commercial boats; the storage of commercial fishing gear; and a parking and staging area. The limited amount of land available near the small boat harbor doesn't assure a place for parking boat trailers or pulling boats out of the water for minor repairs. This site is also designated as a potential long range planning site for expanded fin fish and shellfish processing facilities.

The intended use for the expanded boat harbor area would be to provide additional moorage capacity for private and small commercial boats. The facility would be owned and operated by the City of Valdez as it is the final phase of the small boat harbor project. A conceptual drawing of the expanded small boat harbor is shown in 'Figure 1'

The Valdez Small Boat Harbor expansion project is a positive development activity for the continued planned growth of the City of Valdez. The additional facilities support the commercial and recreational fishing populace and are expected to be beneficial to the local economy.

SMALL BOAT HARBOR

The existing small boat harbor currently has the following number of berths available:

Length (ft)	Number
50	33
42	34
32	84
24	108
20	98

On these berths, the occupancy rate on a year round basis is relatively high particularily in the larger boat lengths:

Length (ft)	Occupancy Percentage
50	100
42	90
32	65
24	40
20	30

In addition, there is over 350 feet of transient dock, however, no individual transient berths exist. Six berths are being utilized for either permanent or scenic-permanent residence. At least seven vessels, making Valdez their home port, are 50 feet or more in length:

Name	Length	Type
Capt. Sonny	80'	Fishing
El Centrol	76'	Fishing
Bering	65'	Pilot
Margaret M.	60'	Tug
Vince Pee Dee	56'	Charter
Libra	55'	Fishing
Lady Fair	50'	Pleasure

During peak fishing periods, it is estimated that over 100 additional boats utilize the harbor. Valdez currently has two growing fish processors and a third processor expressing interest in locating in Valdez. This could lead to a substantial increase in necessary berths.

The secondary benefit to the City of Valdez with the expanded harbor will be increased use of local lodging, food services, marine repairs and fuel sales.

Re: SB 193 Backup materials

On Friday, March 15, the committee is scheduled to consider SB 193, the Governor's bill making changes in the State's eminent domain procedures. These changes are needed, according to the Governor, to codify recent court rulings on eminent domain takings.

The back-up material explains the intent behind the bill fairly well, and the Governor's transmittal letter, in particular, is detailed in its discussion of the court cases behind the bill. The referenced statutes, rules of court, and subsection of the State constitution should provide sufficient background to the issue. In addition, we are expecting to hear from the Court system, and hope to have that response by our meeting time.

The power of eminent domain is a particularly controversial, and sometimes abused power of government, and the changes proposed in SB 193 may, on the one hand, expedite the public's business, but may not, on the other hand, all be good for property-owners.

The members may want to consider, for example: Is it appropriate to place the onus on the property-owner to prove "by clear and convincing evidence" that the taking is "arbitrary, capricious, or an abuse of discretion" in order to keep his property? (Sec. 7). Is it appropriate to change the law so that, in the Governor's words, "our eminent domain code accurately reflects the law" (letter, p.5), or should the code be induced to change?

STAFF ANALYSIS

Introduced: 2/26/85
Referred: Transportation, Judiciary and Finance

IN THE SENATE

BY THE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

SENATE BILL NO. 193

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the power of eminent domain; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 09.55.270 is amended by adding a new subsection to read:

(b) If the property is to be taken by a declaration of taking filed under AS 09.55.440, the state or the municipality shall prepare a decisional document that (1) states that the property is taken in a manner compatible with the greatest public good and least private injury, (2) summarizes the major facts supporting that decision, and (3) identifies any reports, studies, or statements relied upon for the decision.

* Sec. 2. AS 09.55.300(a) is amended to read:

(a) The court has power

(1) to regulate and determine the place and manner of making the connections and crossings or of enjoying the common uses mentioned in AS 09.55.260(5), and of the occupying of canyons, passes, and defiles for railroad purposes, as permitted and regulated by law;

(2) to limit the amount of property sought to be condemned if, in its opinion, the quantity sought to be condemned is not necessary;

(3) to determine whether the property is taken by necessity for a public use or purpose in a manner compatible with the greatest public good and least private injury, based upon the decisional

PROPOSED CHANGES

document required by AS 09.55.270 and the evidence allowed by AS 09.-55.460(d), if the taking is accomplished by a declaration of taking filed by the state or a municipality under the provisions of AS 09.-55.440.

* Sec. 3. AS 09.55.410 is amended to read:

Sec. 09.55.410. WITHDRAWAL OF FUNDS BY PARTY IN INTEREST. The money deposited in the court, or a part of it, may be withdrawn by a party in interest in the manner provided in AS 09.55.440. The[, AND THE] court may [SHALL HAVE THE POWER TO] direct the payment of delinquent taxes and special assessments out of the amount determined to be just compensation and to make orders with respect to encumbrances, liens, rents, insurance, and other charges as are just and equitable. ~~[The withdrawal of any part of the deposit by a party in interest is a waiver of all issues concerning the taking of the property, except the amount of just compensation.]~~

(1)

* Sec. 4. AS 09.55.430 is amended to read:

Sec. 09.55.430. CONTENTS OF DECLARATION OF TAKING. The declaration of taking must [SHALL] contain

(1) a statement of the authority under which the property or an interest in it is taken;

(2) a statement of the public use for which the property or an interest in it is taken;

(3) a description of the property sufficient for the identification of it;

(4) a statement of the estate or interest in the property;

(5) a map or plat showing the location of the property;

(6) a statement of the amount of money estimated by the plaintiff to be just compensation for the property or the interest in it;

(7) a statement that the property is taken by necessity for a project located in a manner which is most compatible with the greatest public good and the least private injury;

(8) a decisional document as described in AS 09.55.270(b).

* Sec. 5. AS 09.55.440(a) is amended to read:

(a) Upon the filing of the declaration of taking, and the deposit with the court of the amount of the estimated compensation stated in the declaration, title to the estate as specified in the declaration vests in the plaintiff, and that property is condemned and taken (2) for ~~[from]~~ the use of the plaintiff, and the right to just compensation for it vests in the persons entitled to it. The compensation must [SHALL] be ascertained and awarded in the proceeding and established by judgment. The judgment must [SHALL] include interest at the lawful interest rate set out in AS 45.45.010(a) [THE RATE OF SIX PER CENT PER YEAR] on the amount finally awarded which exceeds the amount paid into court under the declaration of taking. The interest runs from the date title vests to the date of payment of the judgment.

* Sec. 6. AS 09.55.450(a) is amended to read:

(a) Upon the filing of the declaration of taking and the deposit of the estimated compensation, the court may, upon motion, fix the time during which and the terms upon which the parties in possession are required to surrender possession to the petitioner. However, the right of entry may [SHALL] not be granted the plaintiff until after the running of the time for the defendant to file an objection to the declaration of taking or until after the hearing on any objection to the declaration of taking if the objection is filed [MADE] in the time allowed by Rule 72, Rules of Civil Procedure [LAW]. If an objection to the declaration of taking is filed in the time allowed, a hearing (3) for the review of the taking must be held ~~[within 10 days after the~~

as soon as the court calendar allows

~~filing, or as soon after that as possible,~~ to establish the validity of any objections. If no objection to the declaration of taking is filed in the time allowed, the defendant has waived all defenses and objections, and the plaintiff has a right of entry onto the property without further action by the court. If [WHERE] the party in possession withdraws any part of the award and remains in possession, the court may fix a reasonable rental for the premises to be paid by that party to the plaintiff during the [SUCH] possession.

* Sec. 7. AS 09.55.460 is amended by adding new subsections to read:

~~[(c) The taking of property is necessary for a public use or purpose in a manner compatible with the greatest public good or least private injury unless the defendant establishes by clear and convincing evidence that the plaintiff's decision to condemn is arbitrary, capricious, or an abuse of discretion.]~~

(4)

(c) The court, when making its finding under this section, shall consider the decisional document prepared by the plaintiff; supporting reports, studies, or statements; affidavits submitted by the parties, their officers, or employees; and depositions taken by the parties. The court, in the exercise of its discretion, may allow the parties to submit additional necessary evidence.

(5)

* Sec. 8. This Act takes effect immediately in accordance with AS 01.-10.070(c).

amend sb 193 xx2

PROPOSED AMENDMENT NUMBER 1

TO

SB 193

On page 2, line 13, delete all material on lines 13, 14, and 15.

Currently, once the condemning authority has filed its declaration of taking, and escrowed the estimated amount of compensation, the right to the property being taken vests with the government, and the property owner no longer has a right to it. But the property owner can have access to the value of the property, by withdrawing from the escrowed funds. The proposed change would have the withdrawal of funds act as a waiver to all of the dispute except the amount of compensation. The question to answer is whether this is fair to the property owner who contests the taking, and would not have either the full use of the property or the value of the property to enjoy while the appeal is in process.

AMENDMENTS & RATIONALE

amend sb 193 xx1

PROPOSED AMENDMENT NUMBER 2

TO

SB 193

On pg 3, line 10, delete the word "from", and insert in its place:

the word "for"

This proposed change would clarify a poorly written statute dating from 1962.

amend sb 193 xx3

PROPOSED AMENDMENT NUMBER 3

TO

SB 193

On page 3, line 29, following the phrase "must be held",

delete the remainder of line 29, and

On page 4, line 1, delete everything up to but not including the phrase,

"to establish" and insert in its place:

as soon as the court calendar allows

This amendment would have the effect of diminishing the urgency of calendaring eminent domain appeals for court action. With court schedules as crowded as they now are, eminent domain proceedings, important though they may be, should not necessarily be afforded a statutory 30-day limit.

amend sb 193 xx4

PROPOSED AMENDMENT NUMBER 4

TO

SB 193

On page 4, line 10, delete subsection (c) and renumber remaining subsection accordingly

The effect of this amendment would be to take the burden off the owner of the property being taken, and place it back with the condemning authority to show that the taking was compatible with the greatest public good or least private injury. As the subsection is now written, the property owner (defendant) must show by clear and convincing evidence that the condemning authority's decision was arbitrary, capricious or an abuse of discretion. This is a policy question well within the purview of the Legislature, to determine upon whose shoulders the burden of proof will fall.

amend sb 193 xx5

PROPOSED AMENDMENT NUMBER 5

TO

SB 193

On page 4, line 17, between the words "statements;" and "affidavits",

insert the word "sworn"

The effect of this amendment would be to ensure that the affidavits the court is considering are authentic, and not hearsay.

Introduced: 2/26/85
Referred: Transportation, Judiciary and Finance

IN THE SENATE

BY THE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

SENATE BILL NO. 193

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the power of eminent domain; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 09.55.270 is amended by adding a new subsection to read:

(b) If the property is to be taken by a declaration of taking filed under AS 09.55.440, the state or the municipality shall prepare a decisional document that (1) states that the property is taken in a manner compatible with the greatest public good and least private injury, (2) summarizes the major facts supporting that decision, and (3) identifies any reports, studies, or statements relied upon for the decision.

* Sec. 2. AS 09.55.300(a) is amended to read:

(a) The court has power

(1) to regulate and determine the place and manner of making the connections and crossings or of enjoying the common uses mentioned in AS 09.55.260(5), and of the occupying of canyons, passes, and defiles for railroad purposes, as permitted and regulated by law;

(2) to limit the amount of property sought to be condemned if, in its opinion, the quantity sought to be condemned is not necessary;

(3) to determine whether the property is taken by necessity for a public use or purpose in a manner compatible with the greatest public good and least private injury, based upon the decisional

S

COMMITTEE COPY

document required by AS 09.55.270 and the evidence allowed by AS 09.-55.460(d), if the taking is accomplished by a declaration of taking filed by the state or a municipality under the provisions of AS 09.-55.440.

* Sec. 3. AS 09.55.410 is amended to read:

Sec. 09.55.410. WITHDRAWAL OF FUNDS BY PARTY IN INTEREST. The money deposited in the court, or a part of it, may be withdrawn by a party in interest in the manner provided in AS 09.55.440. The[, AND THE] court may [SHALL HAVE THE POWER TO] direct the payment of delinquent taxes and special assessments out of the amount determined to be just compensation and to make orders with respect to encumbrances, liens, rents, insurance, and other charges as are just and equitable. The withdrawal of any part of the deposit by a party in interest is a waiver of all issues concerning the taking of the property, except the amount of just compensation.

* Sec. 4. AS 09.55.430 is amended to read:

Sec. 09.55.430. CONTENTS OF DECLARATION OF TAKING. The declaration of taking must [SHALL] contain

(1) a statement of the authority under which the property or an interest in it is taken;

(2) a statement of the public use for which the property or an interest in it is taken;

(3) a description of the property sufficient for the identification of it;

(4) a statement of the estate or interest in the property;

(5) a map or plat showing the location of the property;

(6) a statement of the amount of money estimated by the plaintiff to be just compensation for the property or the interest in it;

(7) a statement that the property is taken by necessity for a project located in a manner which is most compatible with the greatest public good and the least private injury;

(8) a decisional document as described in AS 09.55.270(b).

* Sec. 5. AS 09.55.440(a) is amended to read:

(a) Upon the filing of the declaration of taking, and the deposit with the court of the amount of the estimated compensation stated in the declaration, title to the estate as specified in the declaration vests in the plaintiff, and that property is condemned and taken from the use of the plaintiff, and the right to just compensation for it vests in the persons entitled to it. The compensation must [SHALL] be ascertained and awarded in the proceeding and established by judgment. The judgment must [SHALL] include interest at the lawful interest rate set out in AS 45.45.010(a) [THE RATE OF SIX PER CENT PER YEAR] on the amount finally awarded which exceeds the amount paid into court under the declaration of taking. The interest runs from the date title vests to the date of payment of the judgment.

* Sec. 6. AS 09.55.450(a) is amended to read:

(a) Upon the filing of the declaration of taking and the deposit of the estimated compensation, the court may, upon motion, fix the time during which and the terms upon which the parties in possession are required to surrender possession to the petitioner. However, the right of entry may [SHALL] not be granted the plaintiff until after the running of the time for the defendant to file an objection to the declaration of taking or until after the hearing on any objection to the declaration of taking if the objection is filed [MADE] in the time allowed by Rule 72, Rules of Civil Procedure [LAW]. If an objection to the declaration of taking is filed in the time allowed, a hearing for the review of the taking must be held within 30 days after the

filing, or as soon after that as possible, to establish the validity of any objections. If no objection to the declaration of taking is filed in the time allowed, the defendant has waived all defenses and objections, and the plaintiff has a right of entry onto the property without further action by the court. If [WHERE] the party in possession withdraws any part of the award and remains in possession, the court may fix a reasonable rental for the premises to be paid by that party to the plaintiff during the [SUCH] possession.

* Sec. 7. AS 09.55.460 is amended by adding new subsections to read:

(c) The taking of property is necessary for a public use or purpose in a manner compatible with the greatest public good or least private injury unless the defendant establishes by clear and convincing evidence that the plaintiff's decision to condemn is arbitrary, capricious, or an abuse of discretion.

(d) The court, when making its finding under this section, shall consider the decisional document prepared by the plaintiff; supporting reports, studies, or statements; affidavits submitted by the parties, their officers, or employees; and depositions taken by the parties. The court, in the exercise of its discretion, may allow the parties to submit additional necessary evidence.

* Sec. 8. This Act takes effect immediately in accordance with AS 01.-10.070(c).

ANALYSIS OF FISCAL NOTE

"An Act relating to the power of eminent domain; and providing for an effective date"

This bill recognizes recent development in the law and contains provisions that should streamline eminent domain procedures without prejudicing property owner's rights.

First, this would require the court to schedule a hearing for the review of the taking within 30 days after the filing of any objections to the declaration of taking or as soon after that as possible. This particular amendment does not create a priority over other matters on the court's calendar, but does place a requirement upon the Superior Court to deal expeditiously with hearings on objections to the authority and necessity for the taking.

This bill would amend AS 09-55-410 by clearly stating that, if any money on deposit is withdrawn by a party in interest, the withdrawal operates as a waiver of all issues except the amount of just compensation. This would require the property owner early on to make a choice between attempting to stop the project or only litigating the issue of compensation. This bill would also raise the statutory interest allowed under the declaration of taking procedure to the lawful interest rate.

This bill would clearly state that if a defendant does not make his objections in a timely manner, he has waived his objection and defense to the taking.

It is concluded that legislation that leaves a property owner's substantive rights intact, but that changes the procedural aspects of the litigation to a more effective and timely manner so that capital projects are not delayed is in the best interest of the public.

Although a dollar amount cannot be identified, this bill should provide a savings to the State, since it will alleviate problems that have developed in regard to eminent domain procedure which have the potential to seriously delay badly needed public work project.

BILL SHEFFIELD
GOVERNOR

ch 193

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

The Honorable Don Bennett
President of the Senate
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Senator Bennett:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill making several changes in the exercise of the power of eminent domain under AS 09.55.240 -- 09.55.460. This bill recognizes recent developments in the law and contains provisions that should streamline eminent domain procedures without prejudicing landowners' rights. The result will alleviate delays that public works projects can experience. The public is well served by the amendments because it will get the use of its public works projects sooner and at lower public expense.

Section 1 of the bill amends AS 09.55.270 by requiring the condemning authority, before the taking of real property by a "declaration of taking," to prepare a decisional document summarizing the decision. Section 4 amends AS 09.55.430 by requiring that the decisional document be part of the declaration of taking. These two amendments codify and implement the holding in Ship Creek Hydraulic Syndicate v. State, 685 P.2d 715 (Alaska 1984).

Section 2 amends AS 09.55.300(a) by clearly specifying the power of the superior court when considering the requirement that a taking be made in a manner compatible with the greatest public good and least private injury. The court is to make its analysis based upon a review of the decisional document required by sec. 1 and on appropriate evidence as set out in sec. 7 of the bill.

Section 3 amends AS 09.55.410 by clearly stating the proposition that, if any money on deposit is withdrawn by a party in interest, the withdrawal operates as a waiver of all issues, except the amount of just compensation. This amendment codifies existing practice. We believe that it is reasonable because it requires the property owner early

on to make a choice between attempting to stop the project or only litigating the issue of compensation.

Section 5 amends AS 09.55.440(a) by raising the statutory interest allowed under the declaration-of-taking procedure to the lawful interest rate. Under AS 45.45.010, that interest rate is currently 10.5 percent. Under the existing language of AS 09.55.440(a), a property owner is entitled to interest at the rate of six percent on the amount finally awarded that is in excess of the initial deposit. This interest rate was found unconstitutional in City of Valdez v. 18.99 Acres, 686 P.2d 682 (Alaska 1984), where the court held that condemning authorities are required to pay lawful interest.

Section 6 provides a number of amendments to AS 09.55.450(a) that will streamline the procedure in the superior court. First, the court is required to schedule a hearing for the review of the taking within 30 days after the filing of any objections to the declaration of taking or as soon after that as possible. This particular amendment does not create a priority over other matters on the court's calendar, but does place a requirement upon the superior court to deal expeditiously with hearings on objections to the authority and necessity for the taking. When combined with the changed nature of that hearing under the amendments contained in sec. 7, the scheduling of a hearing on any objections to the declaration of taking should be greatly expedited.

Section 6 also contains amendments that clearly state that if a defendant does not make his objections in a timely fashion, he has waived his objections and defenses to the taking. This amendment parallels the existing law found in Civil Rule 72(e)(4). We believe that the amendment is necessary to avoid situations such as those that arose in Stewart v. State, Op. No. 2895 (Alaska, December 28, 1984).

In that case, the state filed its declaration of taking, and the property owners filed no objection to the taking. The project went out to bid and the contract was awarded. Six months after the action was filed and two months after the award of the contract, the property owners entered an objection to the taking and the superior court allowed the objections. Rather than litigate the propriety of the taking, the state dismissed its declaration of taking and redesigned its project. This resulted in higher construction costs. Section 6's amendment, absent extraordinary circumstances that the superior court may in the interest

of justice address, is not prejudicial to a defendant's rights; it places him in no worse position than any other civil litigant; i.e., objections or defenses that are not made are waived.

Section 7 contains amendments that are a departure from the existing law and practice. Existing AS 09.55.460 requires an analysis by the superior court to determine whether the taking was accomplished in a manner compatible with the greatest public good and least private injury. If the court finds that the taking was not made in that manner, the state is divested of the title it has acquired with its declaration of taking. The difficulty with the current statute is that no procedural standards are given for the analysis, and no burden of proof is assigned to the parties. The result, in practice, of this lack of clarity in the statute has been generally to assign to the defendant the burden of proof that the taking was not made in a manner compatible with the greatest public good and least private injury, and a "mini-trial" was necessary for the taking of the parties' evidence.

Court calendars are quite crowded and, when coupled with the "mini-trial" practice, the effect has been to delay the hearing until a significant block of the court's calendar can be set aside. One recent Supreme Court case, Ship Creek Hydraulic Syndicate v. State, cited above, produced a hearing in the trial court which lasted nearly five days, during which expert testimony was presented by both sides. While the trial court did ultimately confirm the taking, time that could have been devoted to the project was lost. It should also be noted that the requirement for a decisional document, which is set out in sec. 1, is a product of this case.

The language proposed in AS 09.55.460(c) assigns the burden to the defendant to prove by clear and convincing evidence that the decision to condemn was arbitrary, capricious, or an abuse of discretion. We believe that this language is a codification of the holdings in State v. 0.644 Acres, 613 P.2d 829 (Alaska 1980) and State v. 2.072 Acres, 652 P.2d 465 (Alaska 1982), and only represents a departure from existing statutory language in that the appropriate review standards are clearly and succinctly stated.

The language proposed in AS 09.55.450(d) is a departure from existing practice, but, when combined with the amendments regarding decisional documents, should streamline the procedure in the superior court without prejudicing

the property owners' rights. Under this language, the superior court will consider the decisional document, any supporting reports, studies, or statements relied upon in reaching the decision to condemn, and any affidavits the parties might submit, as well as depositions taken by the parties. There is no provision for the taking of evidence by the court except in situations in which the court allows the presentation of additional evidence. This proposed language provides for a review process by the superior court which is analogous to the function it serves when reviewing decisions of the district court and administrative agencies under AS 22.15.240 and Appellate Rule 609.

Under the cited statute and rule, the superior court reviews cases involving significant liberty and property interests that have been adjudicated by the district court and a variety of administrative agencies. These appeals are all upon the record without the taking of additional evidence, except as provided by statute and rule in extraordinary circumstances.

There are significant differences between the record in an appeal from the district court or an administrative agency and the decisional document envisioned in sec. 1 of this bill. The most important is that the aggrieved party will have presented his case before the matter is in the superior court. We believe that allowing the parties to submit affidavits and depositions in response to, or to support objections to, the taking is a reasonable substitute. We reach this conclusion because of the extensive nature of the background analysis that is performed in the course of developing a public works project. Typically, location and design studies and, in many instances, environmental impact studies are prepared. An additional component of the planning and design of a public works project is a public hearing process during which comments are solicited from the public. Furthermore, AS 35.30.010 requires approval by local planning and zoning commissions. An analogous approval is required under AS 09.55.275 for any replatting which is necessary to accommodate the project. By the time an eminent domain action is filed, the project is a well-known entity and well defined, and has been the subject of local political decisions and adjudication procedures under AS 35.30.010 and AS 09.55.275.

With this extensive administrative background, we believe that augmenting the evidence before the court with depositions and affidavits provides the superior court an adequate basis to review the appropriateness of the taking.

Under the amendments in this bill, the superior court has the discretion to allow the presentation of additional evidence as it does in its appellate jurisdiction.

I urge your favorable action on this measure, so that our eminent domain code accurately reflects the law, and so that the public's business is handled in an expeditious and fair manner for all concerned.

Sincerely,

Bill Sheffield
Governor

amend sb 193 xx7

PROPOSED AMENDMENT Nº 6

TO

SB 193

moved by Abood
adopted w/o objection

On page 4, line 12, delete the phrase "clear and convincing", and

insert in its place: "a preponderance of the"

While this amendment would not reverse the intent of the subsection, and the burden would still lie with the property-owner to prove his case, the change would have the net effect of reducing the degree of evidence required of the defendant.

Preponderance of evidence. Evidence which is of greater weight or more convincing than the evidence which is offered in opposition to it; that is, evidence which as a whole shows that the fact sought to be proved is more probable than not. Braud v. Kinchen, La.App., 310 So.2d 657, 659. With respect to burden of proof in civil actions, means greater weight of evidence, or evidence which is more credible and convincing to the mind. That which best accords with reason and probability. The word "preponderance" means something more than "weight"; it denotes a superiority of weight, or outweighing. The words are not synonymous, but substantially different. There is generally a "weight" of evidence on each side in case of contested facts. But juries cannot properly act upon the weight of evidence, in favor of the one having the *onus*, unless it overbear, in some degree, the weight upon the other side.

That amount of evidence necessary for the plaintiff to win in a civil case. It is that degree of proof which is more probable than not.

Preponderance of evidence may not be determined by the number of witnesses, but by the greater weight of all evidence, which does not necessarily mean the greater number of witnesses, but opportunity for knowledge, information possessed, and manner of testifying determines the weight of testimony.

Clear and convincing proof. Generally, this phrase and its numerous variations mean proof beyond a reasonable, *i.e.*, a well-founded doubt. Some cases give a less rigorous, but somewhat uncertain, meaning, *viz.*, more than a preponderance but less than is required in a criminal case.

Proof which should leave no reasonable doubt in the mind of the trier of the facts concerning the truth of the matters in issue. In Interest of Jones, 34 Ill.App.3d 603, 340 N.E.2d 269, 274.

That measure or degree of proof which will produce in mind of trier of facts a firm belief or conviction as to allegations sought to be established; it is intermediate, being more than mere preponderance, but not to extent of such certainty as is required beyond reasonable doubt as in criminal cases. Fred C. Walker Agency, Inc. v. Lucas, 215 Va. 535, 211 S.E.2d 88, 92.

See also Beyond a reasonable doubt; Burden of proof; Clear evidence or proof.

SENATE ADVISORY COUNCIL

MEMORANDUM

TO: Senator Jack Coghill
Attention: John Manley

FROM: Rob Nauheim Rob Nauheim

DATE: March 26, 1985

RE: Eminent domain proceedings

There does not appear to be any jurisdiction in which the burden of proof remains with the condemning authority after an initial decision has been made in an eminent domain proceeding. This is consistent with the notion that once a decision has been rendered it is up to those parties which do not agree with the decision to demonstrate how and why the decision was inappropriate. It also seems consistent with certain principles of public policy and the powers of eminent domain. The condemnation of private property is ultimately the result of a legislative decision to carry out public policy.

The alternative to which you alluded in the research request and which would give greater weight to the individual, would also have the effect of rendering any decision in an eminent domain case ineffective until the the condemning authority had proved its case.

If I can be of additional assistance in this matter, please give me a call.

RCN

ADVISORY COUNCIL MEMO

Alaska Court System
State of Alaska

OFFICE OF ADMINISTRATIVE DIRECTOR

303 K Street
Anchorage, Alaska 99501

March 22, 1985

Senator Coghill, Chair
Senate Transportation Committee
Pouch V
Juneau AK 99811

Dear Senator Coghill:

I am writing with regard to SB 193, an act relating to the power of eminent domain. I have discussed this measure with several of the presiding judges, who offer the following comments. First, the measure provides that a hearing for review of a taking must be held within 30 days after the filing, or as soon after that as is possible, to establish the validity of any objections (Section 6, pages 3-4). Calendaring of matters before the court is an inherently procedural task, properly within the purview of the courts. The Court System therefore opposes inclusion of language which appears to require placement on the calendar within a set time period. However, the courts are mindful of the concerns expressed in the governor's transmittal letter. Judge Serdahely in particular is exploring ways to expedite hearings before the superior court in Anchorage.

A second concern relates to section 7, paragraph (d), which limits live testimony at a hearing to object to a taking. Since supporting statements, reports and similar documents generally contain hearsay evidence, due process would be enhanced if these materials were sworn in a manner similar to affidavits.

Although this legislation represents a change in the way in which eminent domain proceedings would be handled, the other provisions of the bill involve substantive policy decisions appropriately addressed to the legislature.

Thank you for the opportunity to comment upon this legislation.

Sincerely,

Karla L. Forsythe

From: John Manly, A.A.

Date: March 22, 1985

Re: Eminent Domain proceedings

The Transportation Committee is presently considering SB 193, a Governor's bill proposing changes to statutes pertaining to eminent domain and the power of taking. One of these changes, under section 7 of the bill, would clarify what is meant by the phrase "in a manner compatible with the greatest public good or least private injury", by requiring the appellant (defendant) to establish by clear and convincing evidence that the condemning authority's decision to condemn was "arbitrary, capricious, or an abuse of discretion."

The proposed change is purported to merely codify existing law in Alaska as it has evolved through case law. In other words, it is currently the practice in this state that if a property-owner's property is condemned through eminent domain proceedings, and the property-owner contests the taking, the property-owner becomes the appellant, and the burden is then on the his shoulders to prove his case.

What we would like to know, before we go further with this bill, is if there are jurisdictions elsewhere in the country in which the burden is on the condemning authority to prove its case, if the property-owner appeals the taking. This would be opposite to present practice in Alaska, and apparently on the federal level, but would give greater weight to the individual in this area of law.

March 26, 1985

The Honorable John B. Coghill
Chairman, Senate Transportation Committee
Alaska State Senate
Pouch V
Juneau, AK 99811

Re: SB 193 relating to the power of eminent domain

Dear Senator Coghill:

During the Senate Transportation Committee meeting on March 20, 1985, inquiry was made regarding the approach of other jurisdictions on the issue of which party has the burden of proof that a particular taking is not necessary for a public purpose. My research indicates that it is routinely assigned to the property owner. In section 7 of SB 193, we proposed language codifying this legal principal which presently exists in Alaska law. The committee's amendment to the bill which deleted that language will not have much of an impact upon eminent domain practice in Alaska. However, if the committee further amends the bill by assigning to the condemning authority the burden to prove that its decision to condemn was not arbitrary, capricious, nor an abuse of discretion; the contrary is true. Statutory language of that sort would make Alaska unique among American jurisdictions, i.e. in effect the taking could be presumed invalid unless proven otherwise by the condemning authority.

The necessity for the taking of private property enjoys a presumption of validity for very sound public policy reasons. An executive agency undertakes a particular public works project by the direction of the legislature through the appropriation process. That public works project is brought to fruition by that executive agency under a grant of power conferred upon it by the legislature, which includes the grant of the power of eminent domain. Consequently, when, in the course of constructing a public works project, it becomes necessary to acquire interests in land necessary for its construction by the use of the power of eminent domain, the executive agency is fulfilling the will of the legislature, the elected representatives of the people. (It

ATTORNEY GENERAL'S LETTER

is not fulfilling an agenda of its own.) It is for these reasons that the burden is assigned to the property owner to prove that the taking is not necessary for a public purpose. To assign the burden to the condemning authority is in our opinion contrary to sound public policy. Consequently, the administration is opposed to the amendment of SB 193 which would shift the burden of proof on the issue of necessity to the condemning authority.

If I may be of any further assistance in this matter, please contact me.

Sincerely yours,

NORMAN C. GORSUCH
ATTORNEY GENERAL

Rule 72. Eminent Domain.

(a) **Applicability of Other Rules.** The procedure for the condemnation of property under the power of eminent domain shall be governed by these rules, except as otherwise provided in this rule.

(b) **Joinder of Properties.** The plaintiff may join in the same action one or more separate pieces of property, whether in the same or different ownership and whether or not sought for the same use.

(c) **Complaint.**

(1) *Caption.* The complaint shall contain a caption as provided in Rule 10(a), except that the plaintiff shall name as defendants the property, designated generally by kind, quantity, and location, and at least one of the owners of some part of or interest in the property.

(2) *Contents.* The complaint shall contain a short and plain statement of the authority and necessity for the taking, the use for which the property is to be taken, a description of the property sufficient for its identification accompanied by a map or plat thereof, the interests to be acquired, and as to each separate piece of property a designation of the defendants who have been joined as owners thereof or of some interest therein. If an easement or right-of-way is sought to be condemned, the complaint and the attached map or plat must show the location, route and termini.

Upon the commencement of the action, the plaintiff need join as defendants only the persons having or claiming an interest in the property whose names are then known, but prior to any hearing involving the compensation to be paid for a piece of property, the plaintiff shall add as defendants all persons having or claiming an interest in that property whose names can be ascertained by a reasonably diligent search of the records, considering the character and value of the property involved and the interests to be acquired, and also those whose names have otherwise been learned. All others may be made defendants under the designation "Unknown Owners".

Process shall be served as provided in subdivision (d) of

this rule upon all defendants, whether named as defendants at the time of the commencement of the action or subsequently added, and the defendant may answer as provided in subdivision (e) of this rule. The court meanwhile may order such distribution of a deposit as the facts warrant.

(3) *Filing.* In addition to filing the complaint with the court, the plaintiff shall furnish to the clerk at least one copy thereof for the use of the defendants and additional copies at the request of the clerk or of a defendant.

(d) **Process.**

(1) *Notice—Delivery.* Upon the filing of the complaint the plaintiff shall forthwith deliver to the clerk joint or several notices directed to the defendants named or designated in the complaint. Additional notices directed to defendants subsequently added shall be so delivered. The delivery of the notice and its service have the same effect as the delivery and service of the summons under Rule 4.

(2) *Form.* Each notice shall state the court, the title of the action, the name of the defendant to whom it is directed, that the action is to condemn property, a description of his property sufficient for its identification, the interest to be taken, the authority and necessity for the taking, and the use for which the property is to be taken. The notice must show the location, route and termini of any easement or right-of-way sought to be condemned.

The notice shall also state that the defendant may serve upon the plaintiff's attorney an answer within twenty (20) days after service of the notice, that a failure to serve an answer constitutes a consent to the taking and to the authority of the court to proceed to hear the action and to fix the compensation, and that at a designated time and place the court will conduct a hearing to determine the authority and necessity for the taking.

The notice shall further state that the defendant, without filing an answer, may serve on plaintiff's attorney a notice of appearance designating the property in which he claims to be interested; that thereafter he will receive notice of all proceedings affecting it; that regardless of whether the defendant ap-

pears or answers, he may present evidence as to the amount of compensation to be paid for his property at the hearing or trial of the issue of just compensation; that regardless of whether he appears or answers he may share in the distribution of the award; that if neither an appearance nor an answer is filed the court will proceed to hear the action and to fix the compensation without further notice; and that if neither an appearance nor an answer is filed before ten (10) days after the jury's verdict is returned or the master's report is filed, judgment by default will be taken against the defendant for the relief demanded in the complaint.

(3) *Service of Notice.*

[a] *Personal Service.* Personal service of the notice shall be made in accordance with Civil Rule 4.

[b] *Unknown Owners.* Service of the notice upon unknown owners shall be made in accordance with Civil Rule 4(e).

(4) *Return—Amendment.* Proof of service of the notice shall be made, and amendment of the notice or proof of its service allowed, in the manner provided for the return and amendment of the summons under Rule 4(f) and (g).

(c) **Appearance or Answer.**

(1) *No Objection or Defense.* If a defendant has no objection or defense to the taking of his property, he may serve a notice of appearance designating the property in which he claims to be interested. Thereafter he shall receive notice of all proceedings affecting it.

(2) *Objection or Defense—Answer.* If a defendant has any objection or defense to the taking of his property, he shall serve his answer within twenty (20) days after the service of notice upon him. The answer shall identify the property in which he claims to have an interest, state the nature and extent of the interest claimed, and state all his objections and defenses to the taking of his property.

(3) *Declaration of Taking—Objection.* Any motion questioning the validity of a declaration of taking shall be served on or before the time provided in the notice for answering, or within twenty (20) days after the filing of the declaration of

taking, whichever is later. For good cause shown, the court may permit a later filing of the motion.

(4) *Waiver of Defenses and Objections.* A defendant waives all defenses and objections not presented as provided in this subdivision (c), but at the hearing or trial of the issue of just compensation, whether or not he has previously appeared or answered, and even though a default judgment may have been entered against him, he may present evidence as to the amount of compensation to be paid for his property, and he also may share in the distribution of the award if his claim

for compensation is filed before the award is ordered distributed by the court.

(5) *Other Pleading or Motion Precluded.* No other pleading or motion asserting any additional defense or objection shall be allowed.

(f) **Amendment of Pleadings.** Without leave of court, the plaintiff may amend the complaint at any time before the trial of the issue of compensation and as many times as desired, but no amendment shall be made which will result in a dismissal forbidden by subdivison (i) of this rule. The plaintiff need not serve a copy of an amendment, but shall serve notice of the filing, as provided in Rule 5(b), upon any party affected thereby who has appeared and, in the manner provided in subdivison (d) of this rule, upon any party affected thereby who has not appeared. The plaintiff shall furnish to the clerk of the court for the use of the defendants at least one copy of each amendment, and he shall furnish additional copies on the request of the clerk or of a defendant. Within the time allowed by subdivision (e) of this rule a defendant may serve his answer to the amended pleading, in the form and manner and with the same effect as there provided.

(g) **Substitution of Parties.** If a defendant dies or becomes incompetent or transfers his interest after his joinder, the court may order substitution of the proper party upon motion and notice of hearing. If the motion and notice of hearing are to be served upon a person not already a party, service shall be made as provided in subdivision (d) (3) of this rule.

(h) **Hearing and Trial.**

(1) *Procedure.* The hearing of the allegations and evidence of persons interested, whether before the court, jury, or a master, shall be conducted in the manner prescribed by these rules.

(2) *Hearing Before Master.* A master appointed by the court to ascertain the amount to be paid by the plaintiff to each owner or other person interested in the property shall report to the court pursuant to Rule 53(d) (1). If all parties object to the appointment of a master, they may have a trial by jury or, if the

jury is waived by all parties to the action, a trial without a jury, by filing a demand for it within the time allowed for answer or within the additional time which the court may set.

(3) *Notice of Report.* Upon the filing of a report by the master, the clerk shall forthwith mail notice of the filing to all parties who have appeared or answered.

(4) *Appeal and Trial De Novo.* The plaintiff may appeal within ten (10) days after being served with notice of the filing of the master's report. Any defendant who has appeared or answered before the filing of a master's report may appeal within fifteen (15) days after being served with notice of the filing of the master's report. Any other interested person desiring to appeal from a master's report must take his appeal within fifteen (15) days after the filing of such report.

(5) *Notice of Appeal.* A party or other interested person may appeal from the master's report by filing with the clerk a notice of appeal in duplicate, with sufficient additional copies for all parties who have appeared or answered. The notice of appeal shall contain the following:

[a] The title of the action.

[b] The names of the parties taking the appeal.

[c] The master's report or part thereof appealed from and the date of its filing.

[d] The name of the court to which the appeal is taken.

[e] A concise statement of the grounds of appeal.

Notification of the filing of the notice shall be given by the clerk by mailing copies thereof to all parties who have appeared or answered other than the party or parties taking the appeal, but his failure to do so does not affect the validity of the appeal. The notification to a party shall be given by mailing a copy of the notice of appeal to his attorney of record, or if the party is not represented by an attorney, then to the party at his last known address.

(i) **Dismissal of Action.**

(1) *As of Right.* If no hearing has begun to determine the compensation to be paid for a piece of property and the plaintiff has not acquired the title or a lesser interest in or taken possession, the plaintiff may dismiss the action as to that

property, without an order of the court, by filing a notice of dismissal setting forth a brief description of the property as to which the action is dismissed.

(2) *By Stipulation.* Before the entry of any judgment vesting the plaintiff with the title or a lesser interest in or possession of property, the action may be dismissed in whole or in part, without an order of the court, as to any property by filing a stipulation of dismissal by the plaintiff and the defendant affected thereby; and, if the parties so stipulate, the court may vacate any judgment that has been entered.

(3) *By Order of the Court.* At any time before compensation for a piece of property has been determined and paid and after motion and hearing, the court may dismiss the action as to that property, except that it shall not dismiss the action as to any part of the property of which the plaintiff has taken possession or in which the plaintiff has taken title or a lesser interest, but shall award just compensation for the possession, title or lesser interest so taken. The court at any time may drop a defendant unnecessarily or improperly joined.

(4) *Effect.* Except as otherwise provided in the notice, or stipulation of dismissal, or order of the court, any dismissal is without prejudice.

(j) **Deposit and Its Distribution.** The plaintiff shall deposit with the court any money required by law as a condition to the exercise of the power of eminent domain, and although not so required, may make such deposit. In such case the court and attorneys shall expedite the proceedings for the distribution of the money so deposited and for the ascertainment and payment of just compensation. If the compensation finally awarded to any defendant exceeds the amount which has been paid to him on distribution of the deposit, the court shall enter judgment against the plaintiff and in favor of that defendant for the deficiency. If the compensation finally awarded to any defendant is less than the amount which has been paid to him, the court shall enter judgment against him and in favor of the plaintiff for the over-payment.

(k) **Costs.** Costs and attorney's fees incurred by the defendant shall not be assessed against the plaintiff, unless:

(1) the taking of the property is denied; or

(2) the plaintiff appeals from the allowance of the master and the defendant does not appeal; or

(3) the award of the court was at least ten (10) percent larger than the amount deposited by the condemning authority or the allowance of the master from which an appeal was taken by the defendant; or

(4) the action was dismissed under the provisions of paragraph (i) of this rule; or

(5) allowance of costs and attorney's fees appears necessary to achieve a just and adequate compensation of the owner.

Attorney's fees allowed under this paragraph shall be commensurate with the time committed by the attorney to the case throughout the entire proceedings. (Amended by Supreme Court Order 414 effective August 1, 1980; and by Supreme Court Order 465 effective June 1, 1981)

BILL SHEFFIELD
GOVERNOR

ol 193

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

The Honorable Don Bennett
President of the Senate
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Senator Bennett:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill making several changes in the exercise of the power of eminent domain under AS 09.55.240 -- 09.55.460. This bill recognizes recent developments in the law and contains provisions that should streamline eminent domain procedures without prejudicing landowners' rights. The result will alleviate delays that public works projects can experience. The public is well served by the amendments because it will get the use of its public works projects sooner and at lower public expense.

Section 1 of the bill amends AS 09.55.270 by requiring the condemning authority, before the taking of real property by a "declaration of taking," to prepare a decisional document summarizing the decision. Section 4 amends AS 09.55.430 by requiring that the decisional document be part of the declaration of taking. These two amendments codify and implement the holding in Ship Creek Hydraulic Syndicate v. State, 685 P.2d 715 (Alaska 1984).

Section 2 amends AS 09.55.300(a) by clearly specifying the power of the superior court when considering the requirement that a taking be made in a manner compatible with the greatest public good and least private injury. The court is to make its analysis based upon a review of the decisional document required by sec. 1 and on appropriate evidence as set out in sec. 7 of the bill.

Section 3 amends AS 09.55.410 by clearly stating the proposition that, if any money on deposit is withdrawn by a party in interest, the withdrawal operates as a waiver of all issues, except the amount of just compensation. This amendment codifies existing practice. We believe that it is reasonable because it requires the property owner early

GOVERNOR'S LETTER OF TRANSMITTAL

on to make a choice between attempting to stop the project or only litigating the issue of compensation.

Section 5 amends AS 09.55.440(a) by raising the statutory interest allowed under the declaration-of-taking procedure to the lawful interest rate. Under AS 45.45.010, that interest rate is currently 10.5 percent. Under the existing language of AS 09.55.440(a), a property owner is entitled to interest at the rate of six percent on the amount finally awarded that is in excess of the initial deposit. This interest rate was found unconstitutional in City of Valdez v. 18.99 Acres, 686 P.2d 682 (Alaska 1984), where the court held that condemning authorities are required to pay lawful interest.

Section 6 provides a number of amendments to AS 09.55.450(a) that will streamline the procedure in the superior court. First, the court is required to schedule a hearing for the review of the taking within 30 days after the filing of any objections to the declaration of taking or as soon after that as possible. This particular amendment does not create a priority over other matters on the court's calendar, but does place a requirement upon the superior court to deal expeditiously with hearings on objections to the authority and necessity for the taking. When combined with the changed nature of that hearing under the amendments contained in sec. 7, the scheduling of a hearing on any objections to the declaration of taking should be greatly expedited.

Section 6 also contains amendments that clearly state that if a defendant does not make his objections in a timely fashion, he has waived his objections and defenses to the taking. This amendment parallels the existing law found in Civil Rule 72(e)(4). We believe that the amendment is necessary to avoid situations such as those that arose in Stewart v. State, Op. No. 2895 (Alaska, December 28, 1984).

In that case, the state filed its declaration of taking, and the property owners filed no objection to the taking. The project went out to bid and the contract was awarded. Six months after the action was filed and two months after the award of the contract, the property owners entered an objection to the taking and the superior court allowed the objections. Rather than litigate the propriety of the taking, the state dismissed its declaration of taking and redesigned its project. This resulted in higher construction costs. Section 6's amendment, absent extraordinary circumstances that the superior court may in the interest

of justice address, is not prejudicial to a defendant's rights; it places him in no worse position than any other civil litigant; i.e., objections or defenses that are not made are waived.

Section 7 contains amendments that are a departure from the existing law and practice. Existing AS 09.55.460 requires an analysis by the superior court to determine whether the taking was accomplished in a manner compatible with the greatest public good and least private injury. If the court finds that the taking was not made in that manner, the state is divested of the title it has acquired with its declaration of taking. The difficulty with the current statute is that no procedural standards are given for the analysis, and no burden of proof is assigned to the parties. The result, in practice, of this lack of clarity in the statute has been generally to assign to the defendant the burden of proof that the taking was not made in a manner compatible with the greatest public good and least private injury, and a "mini-trial" was necessary for the taking of the parties' evidence.

Court calendars are quite crowded and, when coupled with the "mini-trial" practice, the effect has been to delay the hearing until a significant block of the court's calendar can be set aside. One recent Supreme Court case, Ship Creek Hydraulic Syndicate v. State, cited above, produced a hearing in the trial court which lasted nearly five days, during which expert testimony was presented by both sides. While the trial court did ultimately confirm the taking, time that could have been devoted to the project was lost. It should also be noted that the requirement for a decisional document, which is set out in sec. 1, is a product of this case.

The language proposed in AS 09.55.460(c) assigns the burden to the defendant to prove by clear and convincing evidence that the decision to condemn was arbitrary, capricious, or an abuse of discretion. We believe that this language is a codification of the holdings in State v. 0.644 Acres, 613 P.2d 829 (Alaska 1980) and State v. 2.072 Acres, 652 P.2d 465 (Alaska 1982), and only represents a departure from existing statutory language in that the appropriate review standards are clearly and succinctly stated.

The language proposed in AS 09.55.450(d) is a departure from existing practice, but, when combined with the amendments regarding decisional documents, should streamline the procedure in the superior court without prejudicing

the property owners' rights. Under this language, the superior court will consider the decisional document, any supporting reports, studies, or statements relied upon in reaching the decision to condemn, and any affidavits the parties might submit, as well as depositions taken by the parties. There is no provision for the taking of evidence by the court except in situations in which the court allows the presentation of additional evidence. This proposed language provides for a review process by the superior court which is analogous to the function it serves when reviewing decisions of the district court and administrative agencies under AS 22.15.240 and Appellate Rule 609.

Under the cited statute and rule, the superior court reviews cases involving significant liberty and property interests that have been adjudicated by the district court and a variety of administrative agencies. These appeals are all upon the record without the taking of additional evidence, except as provided by statute and rule in extraordinary circumstances.

There are significant differences between the record in an appeal from the district court or an administrative agency and the decisional document envisioned in sec. 1 of this bill. The most important is that the aggrieved party will have presented his case before the matter is in the superior court. We believe that allowing the parties to submit affidavits and depositions in response to, or to support objections to, the taking is a reasonable substitute. We reach this conclusion because of the extensive nature of the background analysis that is performed in the course of developing a public works project. Typically, location and design studies and, in many instances, environmental impact studies are prepared. An additional component of the planning and design of a public works project is a public hearing process during which comments are solicited from the public. Furthermore, AS 35.30.010 requires approval by local planning and zoning commissions. An analogous approval is required under AS 09.55.275 for any replatting which is necessary to accommodate the project. By the time an eminent domain action is filed, the project is a well-known entity and well defined, and has been the subject of local political decisions and adjudication procedures under AS 35.30.010 and AS 09.55.275.

With this extensive administrative background, we believe that augmenting the evidence before the court with depositions and affidavits provides the superior court an adequate basis to review the appropriateness of the taking.

Rb 193

Under the amendments in this bill, the superior court has the discretion to allow the presentation of additional evidence as it does in its appellate jurisdiction.

I urge your favorable action on this measure, so that our eminent domain code accurately reflects the law, and so that the public's business is handled in an expeditious and fair manner for all concerned.

Sincerely,

Bill Sheffield
Governor

ZERO FISCAL NOTE & ANALYSIS

ANALYSIS OF FISCAL NOTE

"An Act relating to the power of eminent domain; and providing for an effective date"

This bill recognizes recent development in the law and contains provisions that should streamline eminent domain procedures without prejudicing property owner's rights.

First, this would require the court to schedule a hearing for the review of the taking within 30 days after the filing of any objections to the declaration of taking or as soon after that as possible. This particular amendment does not create a priority over other matters on the court's calendar, but does place a requirement upon the Superior Court to deal expeditiously with hearings on objections to the authority and necessity for the taking.

This bill would amend AS 09-55-410 by clearly stating that, if any money on deposit is withdrawn by a party in interest, the withdrawal operates as a waiver of all issues except the amount of just compensation. This would require the property owner early on to make a choice between attempting to stop the project or only litigating the issue of compensation. This bill would also raise the statutory interest allowed under the declaration of taking procedure to the lawful interest rate.

This bill would clearly state that if a defendant does not make his objections in a timely manner, he has waived his objection and defense to the taking.

It is concluded that legislation that leaves a property owner's substantive rights intact, but that changes the procedural aspects of the litigation to a more effective and timely manner so that capital projects are not delayed is in the best interest of the public.

Although a dollar amount cannot be identified, this bill should provide a savings to the State, since it will alleviate problems that have developed in regard to eminent domain procedure which have the potential to seriously delay badly needed public work project.

Article 1. Interest.

Section
10. Legal rate of interest

Sec. 45.45.010. Legal rate of interest. (a) The rate of interest in the state is 10.5 percent a year and no more on money after it is due except as provided in (b) of this section.

(b) No interest may be charged by express agreement of the parties in a contract or loan commitment which is more than five percentage points above the annual rate charged member banks for advances by the 12th Federal Reserve District on the day on which the contract or loan commitment is made. A contract or loan commitment in which the principal amount exceeds $25,000 is exempt from the limitation of this subsection.

(c) *[Repealed, § 3 ch 84 SLA 1973.]*

(d) *[Repealed, § 2 ch 94 SLA 1981.]*

(e) *[Repealed, § 4 ch 146 SLA 1974.]*

(f) No bank, credit union, savings and loan institution, pension fund, insurance company or mortgage company may require or accept any percent of ownership or profits above its interest rate. This subsection does not apply to a loan if the principal amount of the loan is $1,000,000 or more and the term of the loan is five years or more.

(g) Loan contracts and commitments covering one- to four-family dwellings may be prepaid without penalty, except federally insured loans that require a prepayment penalty.

(h) If the limitations on interest rates provided for in this section are inconsistent with the provisions of any other statute covering maximum interest, service charges or discount rates then the provisions of the other statute prevail. (§ 25-1-1 ACLA 1949; am § 20 ch 143 SLA 1968; am § 2 ch 69 SLA 1969; am §§ 1, 2 ch 94 SLA 1969; am §§ 1, 2 ch 239 SLA 1970; am §§ 1 — 3 ch 84 SLA 1973; am §§ 1 — 4 ch 146 SLA 1974; am § 1 ch 110 SLA 1976; am § 1 ch 159 SLA 1976; am § 2 ch 107 SLA 1980; am §§ 1, 2 ch 94 SLA 1981; am § 1 ch 56 SLA 1982)

NOTES TO DECISIONS

Editor's note. — All notes from Montana decisions appearing under this section are constructions of the Montana statute from which this section derives.

Judicial review of necessity. — Alaska is among the minority of jurisdictions which statutorily calls for judicial inquiry into the question of necessity in eminent domain proceedings. Arco Pipeline Co. v. 3.60 Acres, More or Less, Sup. Ct. Op. No. 1177 (File No. 2419), 539 P.2d 64 (1975).

Such review is inappropriate to proceedings under declaration of taking. — The concept of judicial review embodied in Alaska's general eminent domain statutes is inconsistent with, and inappropriate to, proceedings under a declaration of taking. Arco Pipeline Co. v. 3.60 Acres, More or Less, Sup. Ct. Op. No. 1177 (File No. 2419), 539 P.2d 64 (1975).

The question of necessity under a declaration of taking is not one for initial judicial consideration as in the case of other condemnation proceedings. Arco Pipeline Co. v. 3.60 Acres, More or Less, Sup. Ct. Op. No. 1177 (File No. 2419), 539 P.2d 64 (1975).

For distinction between proceedings in condemnation under a declaration of taking and those under a complaint seeking condemnation and an order for possession, see Arco Pipeline Co. v. 3.60 Acres, More or Less, Sup. Ct. Op. No. 1177 (File No. 2419), 539 P.2d 64 (1975).

Pleading must plainly show authority and necessity for taking. — The right of eminent domain can only be exercised in behalf of a public use authorized by law, and in the taking of property necessary to such public use the complaint or petition in such proceedings must show plainly and affirmatively the existence of the statutory authority for the public use, and the necessity of the property for such use. Miocene Ditch Co. v. Lyng, 138 F. 544 (9th Cir. 1905).

An inference is not sufficient in eminent domain proceedings. There must be a clear, positive statement that the property sought to be condemned is necessary for a public use authorized by law, and supported by a statement of facts from which the court can see that the property is intended to be used for that purpose. Miocene Ditch Co. v. Lyng, 138 F. 544 (9th Cir. 1905).

The complaint should allege both that the use to which the property is to be applied is a use authorized by law and that the taking is necessary to such use. City of Helena v. Harvey, 9 P. 903 (Mont. 1886).

Which must be found by court before condemnation. — This section has been construed as requiring the court to find the use is authorized by law and the taking is

AS 09.55.270

necessary "before condemnation." Bridges v. Alaska Hous. Auth., Sup. Ct. Op. No. 1 (File No. 16), 349 P.2d 149 (1960).

Necessity of findings. — It is upon findings made in accordance with this section that there is established a basis for further proceedings. The findings constitute the decision of the court upon the vital question of whether or not the property sought to be taken can be condemned at all. Van Dyke v. Midnight Sun Mining & Ditch Co., 177 F. 85 (9th Cir. 1910).

Questions to be considered by court. — Ordinarily the only questions to be considered by the courts in condemnation proceedings are: First, whether the petitioner has the power to exercise the right of eminent domain; second, whether the property itself is of a nature subject to condemnation; third, whether the property is being taken for a public or a private use; and fourth, whether the power is being used for taking an excessive amount of property. Town of Seward v. Margules, 9 Alaska 354 (1938).

Taking for use authorized by law is not conclusive that taking is necessary. — By providing that the right to take property for public use is founded upon a use authorized by law and that the use for such purpose is necessary, the law itself recognizes the fact that a mere taking for a use authorized by law is not conclusive that the taking is necessary for such use. City of Helena v. Harvey, 9 P. 903 (Mont. 1886).

The rule of necessity must be determinative of the right to take in each instance. Northern Pac. Ry. v. McAdow, 121 P. 473 (Mont. 1912).

But absolute necessity is not required. — An absolute necessity is not a prerequisite to the exercise of the law of eminent domain. Butte A. & Pac. Ry. v. Montana U. Ry., 41 P. 232 (Mont. 1895).

Although the condemnor may have the burden of making a prima facie showing of necessity, the language of this section ought to be construed to require no more than that the particular taking be shown to be "reasonably requisite and proper for the accomplishment of the purpose for which it is sought." City of Fairbanks v. Metro Co., Sup. Ct. Op. No. 1192 (File No. 2504), 540 P.2d 1056 (1975).

Question of necessity is one of fact. — In an action to condemn private property for a public use, the question of necessity is one of fact, to be determined as other questions of fact, in view of all the evidence in the case. State ex rel. Livingston v. District Court, 300 P. 916 (Mont. 1931).

And involves both public and private considerations. — The question of necessity in a given case involves a consideration of facts which relate to the public and also to the private citizen whose property may be injured. State ex rel. Livingston v. District Court, 300 P. 916 (Mont. 1931).

Particular questions left to discretion of condemning authority. — In general condemnation proceedings under this article, once the condemnor has presented sufficient evidence to support a finding that a particular taking is "reasonably requisite" for the effectuation of the authorized public purpose for which it is sought, particular questions as to the route, location or amount of property to be taken are to be left to the sound discretion of the condemning authority absent a showing by clear and convincing evidence that such determinations are the product of fraud, caprice or arbitrariness. City of Fairbanks v. Metro Co., Sup. Ct. Op. No. 1192 (File No. 2504), 540 P.2d 1056 (1975).

Evidence should show that the land is reasonably required for the purpose of effecting the object of its condemnation. State ex rel. Livingston v. District Court, 300 P. 916 (Mont. 1931).

Burden of proof. — One seeking to show that a particular taking is excessive or arbitrary has a heavy burden of proof in the attempt to persuade the court to substitute its judgment for that of the condemnor. City of Fairbanks v. Metro Co., Sup. Ct. Op. No. 1192 (File No. 2504), 540 P.2d 1056 (1975).

Proof of unnecessary injury. — When an attempt is made to show that the location proposed is unnecessarily injurious, the proof should be clear and convincing; otherwise no location could ever be made. State ex rel. Livingston v. District Court, 300 P. 916 (Mont. 1931).

Relative private injury. — That certain property owners suffer relatively greater injury than others, or are less directly benefited by the project, does not establish that the taking of their property is unnecessarily injurious or unwarranted. City of Fairbanks v. Metro Co., Sup. Ct. Op. No. 1192 (File No. 2504), 540 P.2d 1056 (1975).

While it is true that the inability of a particular condemnee to obtain immediate beneficial use from the project may be considered as a factor in weighing the project's impact in terms of the degree of private injury involved in a proposed route or location, the interest in minimizing private

injury is not absolute and must always be weighed in relation to the goals and efficacy of the project in its entirety at the time such determinations are made. City of Fairbanks v. Metro Co., Sup. Ct. Op. No. 1192 (File No. 2504), 540 P.2d 1056 (1975).

City clearly met its initial burden of demonstrating that its taking certain parcels of land for purposes of the construction of a sewer line was reasonably necessary under the circumstances. City of Fairbanks v. Metro Co., Sup. Ct. Op. No. 1192 (File No. 2504), 540 P.2d 1056 (1975).

Complaint held sufficient. — Where a complaint used the words "imperatively required" for a public use and alleged facts supporting the same, this was sufficient to show necessity under this section. Town of Seward v. Marcules, 9 Alaska 354 (1938).

Appeal from interlocutory order finding use authorized and taking necessary. — See Van Dyke v. Midnight Sun Mining & Ditch Co., 177 F. 85 (9th Cir. 1910); Northern Mining & Trading Co. v. Alaska Gold Recovery Co., 20 F.2d 5 (9th Cir. 1927).

Convenience and enhanced profits are insufficient to permit appropriation. — That the appropriation of a particular piece of property would promote convenience of operation and enhance the profits of the business of a railroad company is not alone a sufficient reason for permitting it. Northern Pac. Ry. v. McAdow, 121 P. 473 (Mont. 1912).

Collateral references. — Sufficiency of condemnor's negotiations required as preliminary to taking in eminent domain, 21 ALR4th 765.

Sec. 09.55.275. Replat approval. No agency of the state or municipality may acquire property located within a municipality exercising the powers conferred by AS 29.33.150 — 29.33.245 which results in a boundary change unless the agency or municipality first obtains from the municipal platting authority preliminary approval of a replat showing clearly the location of the proposed public streets, easements, rights-of-way, and other taking of private property. Final approval of replat shall be similarly obtained. However, if a state agency clearly demonstrates an overriding state interest, a waiver to the approval requirements of this section may be granted by the governor. The platting authority shall treat applications for replat made by state or local governmental agencies in the same manner as replat petitions originated by private landowners. (§ 2 ch 96 SLA 1975)

Sec. 09.55.280. Entry upon land. In all cases where land is required for public use, the state, the public entity, or persons having the authority to condemn, or its agents in charge of the use may enter upon the land and make examination, surveys, and maps and locate the boundaries; but it shall be located in the manner which will be most compatible with the greatest public good and the least private injury, and subject to the provisions of AS 09.55.300. The entry shall constitute no cause of action in favor of the owners of the land except for injuries resulting from negligence, wantonness, or malice. (§ 13.05 ch 101 SLA 1962)

and the deposit of the estimated compensation. Russian Orthodox Greek Catholic Church of N. Am. v. Alaska State Hous. Auth., Sup. Ct. Op. No. 809 (File No. 1600), 498 P.2d 737 (1972).

It is the objection which calls for the hearing. A motion for hearing with supporting affidavits is not required. State, Dep't of Transp. & Pub. Facilities v. 0.644 Acres, Sup. Ct. Op. No. 2118 (File No. 4861), 613 P.2d 829 (1980).

As to showings necessary where owner contests validity of taking, see Arco Pipeline Co. v. 3.60 Acres, More or Less, Sup. Ct. Op. No. 1177 (File No. 2419), 539 P.2d 64 (1975).

For distinction between proceedings in condemnation under declaration of taking and those under complaint seeking condemnation and order for possession, see Arco Pipeline Co. v. 3.60 Acres, More or Less, Sup. Ct. Op. No. 1177 (File No. 2419), 539 P.2d 64 (1975).

Collateral references. — Condemnor's acquisition of, or right to, minerals under land taken in eminent domain, 36 ALR2d 1424.

Charging landowner with rent or use value of land where he remains in possession after condemnation. 20 ALR3d 1164.

Sec. 09.55.460. Effect of appeal. (a) No appeal or a bond or undertaking given operates to prevent or delay the vesting of title to real property or the right to possession of it.

(b) The plaintiff may not be divested of a title or possession acquired except where the court finds that the property was not taken by necessity for a public use or purpose in a manner compatible with the greatest public good and the least private injury. In the event of that finding, the court shall enter the judgment necessary to (1) compensate the persons entitled to it for the period during which the property was in the possession of the plaintiff, (2) recover for the plaintiff any award paid to any person, and (3) order the plaintiff to restore the property to the condition in which it existed at the time of the filing of the declaration of taking unless such restoration is impossible, in which case the court shall award damages to the proper persons as compensation for any diminution in the value of the property caused by the plaintiff's wrongful possession. (§ 13.23 ch 101 SLA 1962; am § 3 ch 149 SLA 1976)

Legislative history reports. — For report on ch. 149, SLA 1976 (HCSSB 546), see 1976 House Journal, p. 945.

NOTES TO DECISIONS

Presumption that taking is reasonably requisite to realization of public use. — Once an authorized public use for the taking is established by the condemnor, and statutory and procedural requirements are otherwise satisfied, that the particular taking is reasonably requisite to the realization of that use shall be presumed. Arco Pipeline Co. v. 3.60 Acres, More or Less, Sup. Ct. Op. No. 1177 (File No. 2419), 539 P.2d 64 (1975).

The question of necessity under a declaration of taking is not one for initial judicial consideration as in the case of other condemnation proceedings. Arco Pipeline Co. v. 3.60 Acres, More or Less, Sup. Ct. Op. No. 1177 (File No. 2419), 539 P.2d 64 (1975).

The concept of judicial review embodied in Alaska's general eminent domain stat-

AS 09.55.460

utes is inconsistent with, and inappropriate to, proceedings under a declaration of taking. Arco Pipeline Co. v. 3.60 Acres, More or Less, Sup. Ct. Op. No. 1177 (File No. 2419), 539 P.2d 64 (1975).

Absent clear showing of fraud, etc. — In proceedings in eminent domain by way of a declaration of taking under AS 09.55.420 — 09.55.450, the court is without authority, either by virtue of the express mandate of subsection (b) of this section or by implication from the legislative history and policy evidenced in AS 09.55.440, to review the question of the necessity of a particular taking absent a clear showing of fraud, bad faith, arbitrariness or an abuse of discretion in exercise of the power of condemnation by the condemning authority. Arco Pipeline Co. v. 3.60 Acres, More or Less, Sup. Ct. Op. No. 1177 (File No. 2419), 539 P.2d 64 (1975).

Notwithstanding such provisions as AS 09.55.270(2), judicial inquiry into such necessity or the condemnor's determinations with respect thereto is not appropriate unless and until the condemnee has presented clear and convincing evidence that the condemnor has acted in bad faith or so capriciously and arbitrarily as to indicate the absence of any reasonable determining principle. Arco Pipeline Co. v. 3.60 Acres, More or Less, Sup. Ct. Op. No. 1177 (File No. 2419), 539 P.2d 64 (1975).

Only specific allegations of fraud, bad faith or some gross abuse of discretion in locating the pipeline could raise issues sufficient to permit judicial review of the necessity of the taking. Arco Pipeline Co. v. 3.60 Acres, More or Less, Sup. Ct. Op. No. 1177 (File No. 2419), 539 P.2d 64 (1975).

Failure of condemnor to make showing was not abuse of discretion. — Where it is clear that the use intended is public and statutorily authorized, and condemnor has presented unrebutted evidence to the effect that the design and construction criteria for the pipeline are most feasibly satisfied by the route across the property of the owner, it cannot be said that condemnor is under any duty to initially submit evidence that it has considered such alternate routing; nor can the failure to make such showing under the circumstances justify a finding of arbitrariness or an abuse of discretion. Arco Pipeline Co. v. 3.60 Acres, More or Less, Sup. Ct. Op. No. 1177 (File No. 2419), 539 P.2d 64 (1975).

No implied waiver. — Subsection (b) of this section, which provides in part, that when the court finds that the property was not taken by necessity for a public use or purpose in a manner compatible with the greatest public good and least private injury; the court shall enter the judgment necessary to "recover for the plaintiff any award paid to any person," militates against a finding of implied waiver from the respondents' withdrawal of money deposited in the registry of the court by the state in conjunction with its filing of a declaration of taking against respondents' property. State, Dep't of Transp. & Pub. Facilities v. 0.644 Acres, Sup. Ct. Op. No. 2118 (File No. 4861), 613 P.2d 829 (1980).

Injury should be minimized. — This section, which mandates in subsection (b) that "private injury" be considered with reference to the particular properties involved, contemplates that the injury suffered by each individual should be minimized to the extent that it is reasonably possible to do so without impairing the integrity and function of the project and without adding unreasonable costs to the project. State, Dep't of Transp. & Pub. Facilities v. 0.644 Acres, Sup. Ct. Op. No. 2118 (File No. 4861), 613 P.2d 829 (1980).

State's failure to consider several important, relevant factors made it impossible to rationally determine whether intended taking was compatible with the greatest public good and the least private injury, and rendered its action arbitrary, thus taking of subject land could not be upheld. State, Dep't of Transp. & Pub. Facilities v. 2.072 Acres, More or Less, Sup. Ct. Op. No. 2575 (File No. 6159), 652 P.2d 465 (1982).

Collateral references. — Appeal relating to amount of condemnation award, 50 ALR2d 1386.

Reviewability, on appeal from final judgment in eminent domain proceeding, of interlocutory order, as affected by fact that order was separately appealable, 79 ALR2d 1400.

Running of interest on judgment where both parties appeal, 11 ALR4th 1099.

the basic distinction arises between a question of fact and a question of law. Taylor v. Interior Enterprises, Inc., Sup. Ct. Op. No. 621 (File No. 1113), 471 P.2d 405 (1970).

Questions of fact may not be re-examined by court. — Where there is a trial by jury, questions of fact must be decided by the jury and may not be re-examined by the court. Taylor v. Interior Enterprises, Inc., Sup. Ct. Op. No. 621 (File No. 1113), 471 P.2d 405 (1970).

Criterion for determining sufficency of evidence for jury. — In deciding whether the evidence is sufficient to raise a question of fact to be presented to the jury, the court applies a criterion. In Alaska's courts the criterion is whether there is room for a difference of opinion among reasonable men as to the factual issue in controversy. If there is, the issue is submitted to the jury for its determination. If not, the court decides the issue without reference to the jury. Taylor v. Interior Enterprises, Inc., Sup. Ct. Op. No. 621 (File No. 1113), 471 P.2d 405 (1970).

Power of removing factual issues from jury. — The courts have exercised the power of removing from consideration by a jury factual issues in a case where the court decides there is insufficient evidence to raise a question of fact to be presented to the jury. Taylor v. Interior Enterprises, Inc., Sup. Ct. Op. No. 621 (File No. 1113), 471 P.2d 405 (1970).

Section does not preclude review of rulings on motions to set aside awards. — Nothing in this section precludes appellate review of the trial judges' rulings on motions to set aside awards. Fruit v. Schreiner, Sup. Ct. Op. No. 838 (File Nos. 1526, 1546), 502 P.2d 133 (1972).

Applicability of fair cross-section standard to civil jury selections. — See Malvo v. J.C. Penney Co., Sup. Ct. Op. No. 901 (File No. 1630), 512 P.2d 575 (1973).

Applied in State v. Kaatz, Sup. Ct. Op. No. 1536 (File No. 3080), 572 P.2d 775 (1977).

Quoted in Knudsen v. City of Anchorage, Sup. Ct. Op. No. 21 (File No. 58), 358 P.2d 375 (1960); Patrick v. Sedwick, Sup. Ct. Op. No. 206 (File No. 314), 391 P.2d 453 (1964); Pennington v. Snow, Sup. Ct. Op. No. 625 (File No. 1101), 471 P.2d 370 (1970); Martinez v. Bullock, Sup. Ct. Op. No. 1152 (File No. 2209), 535 P.2d 1200 (1975); Jeffries v. Glacier State Tel. Co., Sup. Ct. Op. No. 1985 (File No. 4298), 604 P.2d 4 (1979).

Cited in Lee v. State, Sup. Ct. Op. No. 749 (File No. 1395), 490 P.2d 1206 (1971).

Section 17. Imprisonment for Debt. There shall be no imprisonment for debt. This section does not prohibit civil arrest of absconding debtors.

The gist of the offense under AS 28.35.026 is failure to return an automobile with a conscious purpose to injure the owner and not mere failure to pay the rental price. Hence, the constitutional prohibition against imprisonment for debt has not been violated. Speidel v. State, Sup. Ct. Op. No. 584 (File No. 1014), 460 P.2d 77 (1969).

Section 18. Eminent Domain. Private property shall not be taken or damaged for public use without just compensation.

Cross reference. — As to compensation and damages awarded for property taken by eminent domain, see AS 09.55.330.

I. General Consideration.
II. Damage.
III. Taking.
IV. Just Compensation.

I. GENERAL CONSIDERATION.

Construction. — The supreme court has liberally construed this section in favor of the private property owner. Alsop v. State, Sup. Ct. Op. No. 1764 (File No. 3023), 586 P.2d 1236 (1978).

ALASKA CONSTITUTION ART. 1 § 18

Compensation for personal property. — Reading Alaska Const., art. I, § 18, and Alaska Const., art. I, § 1, in paria materia, and the generally recognized principle that the constitution and legislative enactments in implementation thereof are to be liberally construed, the supreme court found no clear legislative intent to have been manifested that personal property taken or damaged by public use should not be justly compensated. Stroh v. Alaska State Hous. Auth., Sup. Ct. Op. No. 496 (File No. 924), 459 P.2d 480 (1969).

There is no clear legislative intent manifested that personal property taken or damaged by public use should not be justly compensated. Stroh v. State Hous. Auth., Superior Court, 3rd Jud. Dist., No. 65-1222, 459 P.2d 484 (1969).

See note under catchline "Personal property used on land not considered in determining compensation" under analysis line IV, "Just Compensation."

Chattel as real estate. — The rule is that for a chattel to become a fixture and be considered as real estate, three prerequisites must unite: There must be an annexation to the realty of something appurtenant thereto; the chattel must have adaptability or application as affixed to the use for which the real estate is appropriated; and there must be an intention of the party to make the chattel a permanent accession to the freehold. Intention, the third of the three factors said to comprise the general test for determining whether an object has become a fixture, refers to the intent of the parties that the object being introduced onto the realty become a permanent accession thereto. Stroh v. State Hous. Auth., Superior Court, 3rd Jud. Dist., No. 65-1222, 459 P.2d 484 (1969).

Carpeting constituted personalty at the time of the taking, and party was entitled to recover the actual market value thereof at the time of the taking. Stroh v. Alaska State Hous. Auth., Sup. Ct. Op. No. 496 (File No. 924), 459 P.2d 480 (1969); Stroh v. State Hous. Auth., Superior Court, 3rd Jud. Dist., No. 65-1222, 459 P.2d 484 (1969).

Expectation of renewal of a lease is not a compensable interest. State, Dep't of Hwys. v. Salzwedel, Sup. Ct. Op. No. 1861 (File No. 3976), 596 P.2d 17 (1979).

Proceedings distinguished from ordinary civil actions. — This constitutional guarantee, together with the peculiar in rem nonadversary pleadings characteristic of condemnation proceedings, distinguish these proceedings from ordinary civil actions. State v. 45,621 square feet of land, Sup. Ct. Op. No. 641 (File No. 1115), 475 P.2d 553 (1970).

Alaska's procedural rules pertaining to condemnation actions do not provide a burden of pleading which could be looked to as determinative of the companionate burden of persuasion. State v. 45,621 square feet of land, Sup. Ct. Op. No. 641 (File No. 1115), 475 P.2d 553 (1970).

Procedural rules involving the concept of risk of failure to persuade are inapposite in a condemnation proceeding where the sole issue is determination of just compensation. State v. 45,621 square feet of land, Sup. Ct. Op. No. 641 (File No. 1115), 475 P.2d 553 (1970).

The separate questions of order of proof and order of final arguments of counsel in condemnation proceedings should be left to the discretion of the trial judge. State v. 45,621 square feet of land, Sup. Ct. Op. No. 641 (File No. 1115), 475 P.2d 553 (1970).

The burden of production facet of burden of proof, rather than the risk of non-persuasion aspect, is the more meaningful concept in the trial of a condemnation proceeding. State v. 45,621 square feet of land, Sup. Ct. Op. No. 641 (File No. 1115), 475 P.2d 553 (1970).

Competent evidence of fair market value. — As to the issue of fair market value, both the condemning agency and the property may produce competent evidence of the fair market value of the condemned property. State v. 45,621 square feet of land, Sup. Ct. Op. No. 641 (File No. 1115), 475 P.2d 553 (1970).

For additional notes concerning evidence, see notes under analysis line IV, "Just Compensation."

Role of expert witness in eminent domain proceedings. — See Dash v. State, Sup. Ct. Op. No. 756 (File No. 1405), 491 P.2d 1069 (1971).

Absent the production of evidence by either party, the triers of fact will determine fair market value solely from the other party's evidence. State v. 45,621 square feet of land, Sup. Ct. Op. No. 641 (File No. 1115), 475 P.2d 553 (1970).

Testimony. — It is not necessary, in order to give credence to a witness' opinion

of fair market value, to also require him to show that the property and market value are such that the entire purchase price could be expected to be paid at the time of sale. State v. 7.026 Acres, more or less, Sup. Ct. Op. No. 601 (File No. 1106), 466 P.2d 364 (1970).

Sale 15 months after date of taking. — As to admission into evidence of a sale taking place 15 months after the date of the taking by the state, see Dash v. State, Sup. Ct. Op. No. 756 (File No. 1405), 491 P.2d 1069 (1971).

The focal point of the trier of fact's inquiry is the ascertainment of just compensation. Thus, regardless of whether the condemning agency or the property owner meets a given burden of persuasion, Alaska's constitutional mandate requires that the owner be awarded just compensation for the property he has lost. State v. 45,621 square feet of land, Sup. Ct. Op. No. 641 (File No. 1115), 475 P.2d 553 (1970).

Jury confronted with conflicting opinions as to value. — In the usual condemnation case, the jury is confronted with conflicting opinions as to value. The jury is not faced with the necessity of finding a particular value or no value at all. State v. 45,621 square feet of land, Sup. Ct. Op. No. 641 (File No. 1115), 475 P.2d 553 (1970).

Instructions on burden of proof, in the sense of allocating the risk of failure to persuade the jury, are inappropriate in condemnation actions. State v. 45,621 square feet of land, Sup. Ct. Op. No. 641 (File No. 1115), 475 P.2d 553 (1970).

In a condemnation proceeding, the trial court did not err in refusing to instruct the jury on the subject of burden of proof, where the jury was informed that the exercise of the power of eminent domain is subject to the constitutional requirement of payment of just compensation, and was further instructed that their only concern was the determination of the just compensation to be awarded. State v. 45,621 square feet of land, Sup. Ct. Op. No. 641 (File No. 1115), 475 P.2d 553 (1970).

Quoted in Stroh v. Alaska State Hous. Auth., Sup. Ct. Op. No. 496 (File No. 924), 459 P.2d 480 (1968).

II. DAMAGE.

Section expressly requires compensation for damage, while 5th amendment does not. — See State v. Hammer, Sup. Ct. Op. No. 1268 (File Nos. 2500, 2660), 550 P.2d 820 (1976).

Temporary loss of profits during relocation incurred because of the state's exercise of its eminent domain power in taking the property on which the business was conducted is a damaging of property within this section and must be compensated for. State v. Hammer, Sup. Ct. Op. No. 1268 (File Nos. 2500, 2660), 550 P.2d 820 (1976).

III. TAKING.

When taking occurs. — It is the general rule that a taking does not occur until: (1) Legal title vests in the state, (2) the state enters into actual possession, or (3) the state takes constructive possession either by causing damage to property or by depriving the owner of full beneficial use of his land. Stewart & Grindle, Inc. v. State, Sup. Ct. Op. No. 1052 (File Nos. 1941, 1982, 1986), 524 P.2d 1242 (1974).

Once an owner is deprived of the economic advantages of legal ownership, a taking has occurred. Grant v. State, Sup. Ct. Op. No. 1385 (File No. 2855), 560 P.2d 36 (1977).

Although the state is clearly not bound to abide by its construction plans and specifications, it is reasonable for parties negotiating for the sale of the land involved to assume that those plans will be implemented, and where the plans are not implemented, any further economic interference constitutes a second taking for which the state must pay just compensation. Grant v. State, Sup. Ct. Op. No. 1385 (File No. 2855), 560 P.2d 36 (1977).

Limiting access to vessels able to pass through a culvert six feet in diameter was in effect a taking of such access. Wernberg v. State, Sup. Ct. Op. No. 972 (File No. 1797), 519 P.2d 801 (1974).

Loss of access due to closure of intersection. — Where owners received compensation for the taking of their property for construction of a highway, a second taking occurred, separate from the first, when the state decided to redesign the highway, the second taking consisting of a loss of access due to closure of an intersection and due to the limitation of travel on the frontage road to one-way traffic, if the settlement or the receipt of the intersection award had been in reliance upon unrestricted access to be closed. Alsop v. State, Sup. Ct. Op. No. 1764 (File No. 3023), 586 P.2d 1236 (1978).

Where owners contended that a second taking of their property occurred when the state redesigned the highway for the construction of which their property had

been originally taken, closing off an intersection and limiting travel on the frontage road to one-way traffic, in order to recover damages, each of the owners must demonstrate that he or a predecessor in interest had a portion of his property taken for the original construction project, that he or his predecessor relied on construction of the intersection or the two-way frontage road, or both, in settling or receiving an award for their condemnation claims, and that his remaining property had decreased in value as a result of the highway modifications. Alsop v. State, Sup. Ct. Op. No. 1764 (File No. 3023), 586 P.2d 1236 (1978).

Nonabutting owners, whose property has not been taken, cannot claim damages because a more circuitous access route is imposed upon them. Alsop v. State, Sup. Ct. Op. No. 1764 (File No. 3023), 586 P.2d 1236 (1978).

Changing a frontage road from a two-way street to a one-way street is not by itself a taking. B & G Meats, Inc. v. State, Sup. Ct. Op. No. 1950 (File No. 3940), 601 P.2d 252 (1979).

A distinction must be made between loss of access and loss of traffic flow. The latter is not a part of the owner's interest in his property. Restrictions which merely result in a diversion of traffic away from the property are thus not compensable. B & G Meats, Inc. v. State, Sup. Ct. Op. No. 1950 (File No. 3940), 601 P.2d 252 (1979).

Principles which control when claim of taking caused by loss of access is raised. — See B & G Meats, Inc. v. State, Sup. Ct. Op. No. 1950 (File No. 3940), 601 P.2d 252 (1979).

Compensation required for taking littoral access right. — The state must justly compensate the property owner when it takes by inverse condemnation, a littoral access right. Grant v. State, Sup. Ct. Op. No. 1385 (File No. 2855), 560 P.2d 36 (1977).

Institution of condemnation proceedings constitutes a compensable appropriation of vacant and unimproved land, and the property owner is constitutionally entitled to interest dating from the institution of such proceedings. Stewart & Grindle, Inc. v. State, Sup. Ct. Op. No. 1052 (File Nos. 1941, 1982, 1986), 524 P.2d 1242 (1974).

Under the Alaska statutory scheme, an owner of unimproved or untenanted property is deprived of both investment potential and the possibility of future development the moment a condemnation action commences. Meanwhile, the owner remains liable for property taxes, mortgage payments, and any other expenses incidental to legal ownership. Stewart & Grindle, Inc. v. State, Sup. Ct. Op. No. 1052 (File Nos. 1941, 1982, 1986), 524 P.2d 1242 (1974).

Appropriation deemed exercise of power of eminent domain. — Neither the failure of the state to institute a condemnation action nor the owners' assertion of a claim based on the theory of trespass changed the essential nature of the state's action in appropriating the owners' property from one of the exercise of the power of eminent domain. State v. Crosby, Sup. Ct. Op. No. 322 (File No. 584), 410 P.2d 724 (1966).

IV. JUST COMPENSATION.

Measure of just compensation. — Just compensation is measured by the value of the property taken. State v. 7.026 Acres, more or less, Sup. Ct. Op. No. 601 (File No. 1106), 466 P.2d 364 (1970).

Fair market value is an appropriate measure of the just compensation guaranteed by this section. Dash v. State, Sup. Ct. Op. No. 756 (File No. 1405), 491 P.2d 1069 (1971).

"Fair market value". — Fair market value is the price in money that the property could be sold for on the open market under fair conditions between an owner willing to sell and a purchaser willing to buy, with reasonable time allowed to find a purchaser. State v. 7.026 Acres, more or less, Sup. Ct. Op. No. 601 (File No. 1106), 466 P.2d 364 (1970).

One criterion for determining value is what the property is worth on the market — its fair market value, and this is to be determined by a just consideration of all the uses for which the property is suitable. State v. 7.026 Acres, more or less, Sup. Ct. Op. No. 601 (File No. 1106), 466 P.2d 364 (1970); Dash v. State, Sup. Ct. Op. No. 756 (File No. 1405), 491 P.2d 1069 (1971).

The highest and most profitable use for which the property is adaptable is to be considered, to the extent that the prospect of demand for such use affects the market value while the property is privately held. State v. 7.026 Acres, more or less, Sup. Ct. Op. No. 601 (File No. 1106), 466 P.2d 364 (1970).

The essential difference between market price and market value lies in the premises of intelligence, knowledge and willingness, all of which are contemplated in market value but not in market price. Stated differently, at any given moment of time, market value

connotes what a property is actually worth and market price what it may be sold for. Dash v. State, Sup. Ct. Op. No. 756 (File No. 1405), 491 P.2d 1069 (1971).

Use of property must be reasonably probable. — It must be shown that the use for which the property is claimed to be adaptable is reasonably probable. If this cannot be shown, evidence of prospective use must be excluded because it would allow mere conjecture and speculation to become a guide for ascertainment of value, and this is not a permissible method for the judicial ascertainment of truth. State v. 7.026 Acres, more or less, Sup. Ct. Op. No. 601 (File No. 1106), 466 P.2d 364 (1970).

"Best use" evidence. — See Dash v. State, Sup. Ct. Op. No. 756 (File No. 1405), 491 P.2d 1069 (1971).

In determining just compensation, usually measured by the "market value" of the property, the highest and most profitable use for which the land is adaptable may be considered to the extent that the prospective demand for such use affects the property's present market value. Thus, many courts, including Alaska's, have allowed evidence of a reasonably probable subdivision to be admitted to prove the adaptability of the land for subdivision use. Dash v. State, Sup. Ct. Op. No. 756 (File No. 1405), 491 P.2d 1069 (1971).

Admissibility of subdivision plat. — Where the adaptability of the land for subdivision use is shown to be reasonably probable, and not too remote or speculative, then a subdivision plat is admissible as illustrating the potential and reasonably probable use. State v. 7.026 Acres, more or less, Sup. Ct. Op. No. 601 (File No. 1106), 466 P.2d 364 (1970).

A truly speculative or imagined use should not be considered. Dash v. State, Sup. Ct. Op. No. 756 (File No. 1405), 491 P.2d 1069 (1971).

Evidence of use as subdivision. — The majority of courts allow evidence of a potential subdivision only for the limited purpose of showing the adaptability of the land for subdivision purposes. Dash v. State, Sup. Ct. Op. No. 756 (File No. 1405), 491 P.2d 1069 (1971).

The courts are much more liberal in admitting evidence of a potential subdivision when some preliminary steps have been taken to develop the land. Dash v. State, Sup. Ct. Op. No. 756 (File No. 1405), 491 P.2d 1069 (1971).

Where there is testimony that the highest and best use of the property is as an industrial subdivision, and evidence that other property in the immediate area was subdivided for industrial purposes, the proposed subdivision is not purely conjectual or speculative. Dash v. State, Sup. Ct. Op. No. 756 (File No. 1405), 491 P.2d 1069 (1971).

If the land were adaptable for subdivision purposes, it would seem that the potential income to be derived from sales of the subdivided lots would be highly relevant to a determination of the "market value," especially to the extent that sophisticated investors who make decisions on the basis of income capitalization take part in market transactions. Dash v. State, Sup. Ct. Op. No. 756 (File No. 1405), 491 P.2d 1069 (1971).

Capitalization of income, in contexts other than proposed subdivisions, has been recognized as an accepted method of valuation by a number of jurisdictions. Although capitalization of anticipated proceeds from a proposed subdivision necessarily has a speculative element, it still has a direct impact on the property's market value since it will influence investment decisions and thereby affect supply and demand. Dash v. State, Sup. Ct. Op. No. 756 (File No. 1405), 491 P.2d 1069 (1971).

To the extent that the "just compensation" guarantee in this section comprises a notion of fair market value rather than merely the price the property will bring in an imperfect market, income capitalization must be considered particularly apposite. Dash v. State, Sup. Ct. Op. No. 756 (File No. 1405), 491 P.2d 1069 (1971).

Even in a market where a parcel's price is unaffected by its income potential, income capitalization must be considered to have a bearing on "market value." The danger that market price will not closely reflect market value is enhanced when the property is not currently generating income. Dash v. State, Sup. Ct. Op. No. 756 (File No. 1405), 491 P.2d 1069 (1971).

Income capitalization in general and the anticipated use or development method in particular are standard appraisal practices. Dash v. State, Sup. Ct. Op. No. 756 (File No. 1405), 491 P.2d 1069 (1971).

An expert's testimony which capitalized the anticipated rentals from a proposed recreational subdivision to arrive at an estimate of fair market value was properly admitted. Dash v. State, Sup. Ct. Op. No. 756 (File No. 1405), 491 P.2d 1069 (1971).

As to admission of expert testimony on market value based on the development costs and income capitalization of a potential subdivision, see Dash v. State, Sup. Ct. Op. No. 756 (File No. 1405), 491 P.2d 1069 (1971).

Rule as to special benefits. — The rule in Alaska is that special benefits to the remainder can only be used to offset severance damages to the remainder. In the event that special benefits exceed severance damages, the landowner is still entitled to receive the full market value of the portion actually taken. Dash v. State, Sup. Ct. Op. No. 756 (File No. 1405), 491 P.2d 1069 (1971).

Just compensation is not conditioned upon receipt of commensurate value by the state. Stewart & Grindle, Inc. v. State, Sup. Ct. Op. No. 1052 (File Nos. 1941, 1982, 1986), 524 P.2d 1242 (1974).

Personal property used on land not considered in determining compensation. — The general rule is to the effect that personal property which is used on land taken by eminent domain cannot be considered in the determination of the compensation. State v. Ness, Sup. Ct. Op. No. 977 (File No. 1914), 516 P.2d 1212 (1973).

The majority rule excludes property tax assessments from evidence in condemnation cases on the rationale that such an assessment is res inter alios acta, notoriously unreliable as a criteria of true value or the opinion of persons not called as witnesses and subject to cross-examination. State v. 45,621 square feet of land, Sup. Ct. Op. No. 641 (File No. 1115), 475 P.2d 553 (1970).

It is almost everywhere the law that the value placed upon a parcel of land for the purposes of taxation by the assessors of the town in which it is situated is no evidence of its value for other than tax purposes. State v. 45,621 square feet of land, Sup. Ct. Op. No. 641 (File No. 1115), 475 P.2d 553 (1970).

AS 29.53.080 does not furnish the basis for the admissibility of tax assessments as evidence in condemnation proceedings. Given the limited purpose of the act, there is no indication that the legislature intended to make tax assessments prima facie evidence of value in condemnation proceedings. State v. 45,621 square feet of land, Sup. Ct. Op. No. 641 (File No. 1115), 475 P.2d 553 (1970).

In view of the special purposes for which tax assessments are made, the fact that there is little likelihood that an owner would contest an under-assessment or an assessment which did not reflect the property's full value, the potential unreliability of such assessments due to the varied qualifications of assessors, and the fact that such assessments standing alone embody the opinions of persons not called as witnesses and not subject to cross-examination, the admission of property tax assessments as evidence of fair market value in condemnation actions is prohibited. State v. 45,621 square feet of land, Sup. Ct. Op. No. 641 (File No. 1115), 475 P.2d 553 (1970).

Payment of interest may be necessary component of just compensation. — The payment of interest is, in appropriate circumstances, a necessary component of constitutionally guaranteed "just compensation." Stewart & Grindle, Inc. v. State, Sup. Ct. Op. No. 1052 (File Nos. 1941, 1982, 1986), 524 P.2d 1242 (1974).

Before interest can accrue, there must be a "taking." Stewart & Grindle, Inc. v. State, Sup. Ct. Op. No. 1052 (File Nos. 1941, 1982, 1986), 524 P.2d 1242 (1974).

Owner is entitled to interest from date of taking to date of payment. — This section necessitates that a property owner be compensated for delays incurred between the dates of the government's taking of property and making payment. If an award were paid immediately upon the taking of the land by the state, no damages to the property owner would ensue. But where, due to the necessity of legal proceedings to ascertain fair market value of property, delays ensue, the property owner is entitled to an adequate sum to reimburse him for the loss of use of the money during the period of such delay. To hold otherwise would constitute a taking of the property without just compensation. Therefore, it is well established that the owner of property is entitled to interest from the date of taking to the date of payment. Russian Orthodox Greek Catholic Church of North America v. Alaska State Hous. Auth., Sup. Ct. Op. No. 809 (File No. 1600), 498 P.2d 737 (1972).

Since compensation for delays required. — The 5th amendment to the United States Constitution and this section require that a property owner be compensated for delays incurred between the dates of the government's taking of property and making payment. Stewart & Grindle, Inc. v. State, Sup. Ct. Op. No. 1052 (File Nos. 1941, 1982, 1986), 524 P.2d 1242 (1974).

If an award were paid immediately upon the taking of the land by the state, no damages to the property owner would ensue. But where, due to the necessity of legal proceedings to ascertain fair market value of property, delays ensue, the property owner is entitled to an adequate sum to reimburse him for the loss of use of the money during the period of such delay. To hold otherwise would constitute a taking of the property without just compensation. Stewart & Grindle, Inc. v. State, Sup. Ct. Op. No. 1052 (File Nos. 1941, 1982, 1986), 524 P.2d 1242 (1974).

Interest from date owner loses economic advantages but not liabilities. — If as a matter of constitutional law the property owner is entitled to interest from the moment the state takes legal possession, he should, a fortiori, receive interest where he has been deprived of all the economic advantages of legal ownership but is relieved of none of the liabilities. Stewart & Grindle, Inc. v. State, Sup. Ct. Op. No. 1052 (File Nos. 1941, 1982, 1986), 524 P.2d 1242 (1974).

Although no statute so provides. — There is no statutory provision for payment of interest from the date a condemnation action is instituted where the property owner remains in possession, and it has long been recognized that unless interest is specifically authorized by legislative enactment, it may not ordinarily be assessed against the state in any action. Stewart & Grindle, Inc. v. State, Sup. Ct. Op. No. 1052 (File Nos. 1941, 1982, 1986), 524 P.2d 1242 (1974).

Compensation to include expenses necessarily incurred. — Civil R. 72(k)(4), when construed in the framework of the "just compensation" clauses of the United States and Alaska constitutions, entitles the property owner to be made whole for expenses necessarily incurred in connection with the condemnation of his property. Stewart & Grindle, Inc. v. State, Sup. Ct. Op. No. 1052 (File Nos. 1941, 1982, 1986), 524 P.2d 1242 (1974).

This section and the 5th amendment entitle the property owner to be made whole for expenses necessarily incurred in connection with the condemnation of his property. City of Anchorage v. Scavenius, Sup. Ct. Op. No. 1183 (File Nos. 2214, 2222), 539 P.2d 1169 (1975).

Without such a rule, the state forces a property owner to pay a greater portion of the costs of a public project than any other taxpayer must pay by afflicting him with unavoidable expenses of condemnation. Placing such a burden on the property owner is no more just than assessing a levy against him but no others. City of Anchorage v. Scavenius, Sup. Ct. Op. No. 1183 (File Nos. 2214, 2222), 539 P.2d 1169 (1975).

Construction of holding in Stewart & Grindle, Inc. v. State. — The holding in Stewart & Grindle, Inc. v. State, Sup. Ct. Op. No. 1052 (File Nos. 1941, 1982, 1986), 524 P.2d 1242 (1974), that Civil R. 72(k)(4) when construed in the framework of the "just compensation" clauses of the United States and Alaska constitutions entitles the property owner to be made whole for expenses necessarily incurred in connection with the condemnation of his property, does not mean that the state must become the guarantor of costs incurred in advancing every possible legal theory an owner may have in an eminent domain proceeding. State, Dep't of Hwys. v. Salzwedel, Sup. Ct. Op. No. 1861 (File No. 3976), 596 P.2d 17 (1979).

Any rule which purports to shift the costs of the initial determination of the compensation award upon the owner would be unconstitutional. City of Anchorage v. Scavenius, Sup. Ct. Op. No. 1183 (File Nos. 2214, 2222), 539 P.2d 1169 (1975).

Appraisers' and attorney's fees held "necessarily" incurred. Stewart & Grindle, Inc. v. State, Sup. Ct. Op. No. 1052 (File Nos. 1941, 1982, 1986), 524 P.2d 1242 (1974).

Where the property to be taken has a readily ascertainable market value, or is worth too little to warrant a professional appraisal, an appraiser's fee could not be said to be "necessary," and the property owner would not be entitled to compensation for such an expense. Stewart & Grindle, Inc. v. State, Sup. Ct. Op. No. 1052 (File Nos. 1941, 1982, 1986), 524 P.2d 1242 (1974).

Where the property to be taken has a readily ascertainable market value, or is worth too little to warrant a professional appraisal, an appraiser's fee could not be said to be "necessary," and the property owner would not be entitled to compensation for such an expense. Stewart & Grindle, Inc. v. State, Sup. Ct. Op. No. 1052 (File Nos. 1941, 1982, 1986), 524 P.2d 1242 (1974).

Where the property has a readily ascertainable market value and the state has offered at least that amount, any attorney's fees subsequently incurred would not be necessary in order to obtain just compensation, and would accordingly be disallowed. Stewart & Grindle, Inc. v.

State, Sup. Ct. Op. No. 1052 (File Nos. 1941, 1982, 1986), 524 P.2d 1242 (1974).

No award of expenses in situations not specified in Civ. R. 72(k). — In the absence of an amendment, the supreme court is not justified in awarding costs and attorney's fees in situations not specified in Civ. R. 72(k), which specifies when costs and attorney's fees incurred by the property owner are to be assessed against the condemnor. City of Anchorage v. Scavenius, Sup. Ct. Op. No. 1183 (File Nos. 2214, 2222), 539 P.2d 1169 (1975).

Award of fees incurred in unsuccessfully seeking compensation for the expectancy of renewal of a lease was error since the expenses in developing this claim were not "necessarily incurred" within the meaning of Civ. R. 72(k)(4). State, Dep't of Hwys. v. Salzwedel, Sup. Ct. Op. No. 1861 (File No. 3976), 596 P.2d 17 (1979).

Where property owner unsuccessfully appeals master's award. — A condemnor is not entitled to an award of costs and attorney's fees when the property owner has unsuccessfully appealed a master's award. City of Anchorage v. Scavenius, Sup. Ct. Op. No. 1183 (File Nos. 2214, 2222), 539 P.2d 1169 (1975).

Just compensation within range of testimony precludes new trial. — The trial court did not commit an abuse of discretion in denying the state's motion for new trial, where the jury's determination of just compensation was within the range of the testimony. State v. 45,621 square feet of land, Sup. Ct. Op. No. 641 (File No. 1115), 475 P.2d 553 (1970).

Jury's award of $0.00 as just compensation to a property owner for the taking of an easement was not patently inadequate or violative of constitutional provisions pertaining to eminent domain. Scavenius v. City of Anchorage, Sup. Ct. Op. No. 1182 (File No. 2193), 539 P.2d 1161 (1975).

The taking of an easement does constitute an appropriation of the owner's property regardless of its minuscule effect. But where the property owner failed to object to instructions expressly permitting the entry of an award of no compensation and the difference between an award of $0.00 compensation and a nominal sum to which the property owner would have been entitled is de minimus, the failure to award compensation per se did not require reversal. Scavenius v. City of Anchorage, Sup. Ct. Op. No. 1182 (File No. 2193), 539 P.2d 1161 (1975).

Section 19. Right to Bear Arms. A well-regulated militia being necessary to the security of a free state, the right of the people to keep and bear arms shall not be infringed.

Section 20. Quartering Soldiers. No member of the armed forces shall in time of peace be quartered in any house without the consent of the owner or occupant, or in time of war except as prescribed by law. The military shall be in strict subordination to the civil power.

Section 21. Construction. The enumeration of rights in this constitution shall not impair or deny others retained by the people.

Right of self-representation has been so retained by the people. — See McCracken v. State, Sup. Ct. Op. No. 986 (File No. 1791), 518 P.2d 85 (1974).

A prisoner has a right to represent himself in post-conviction relief proceedings. McCracken v. State, Sup. Ct. Op. No. 986 (File No. 1791), 518 P.2d 85 (1974).

The right to counsel should not be used to bar self-representation. McCracken v. State, Sup. Ct. Op. No. 986 (File No. 1791), 518 P.2d 85 (1974).

The right to self-representation is not absolute. McCracken v. State, Sup. Ct. Op. No. 986 (File No. 1791), 518 P.2d 85 (1974).

Qualifications on right of self-representation in post-conviction proceedings. — See McCracken v. State, Sup. Ct. Op. No. 986 (File No. 1791), 518 P.2d 85 (1974).

Criminal R. 39(b) construed in light of this section. — See McCracken v. State, Sup. Ct. Op. No. 986 (File No. 1791), 518 P.2d 85 (1974).

RE: SB 202

SB 202, as you can see from the packet, asks for a special appropriation to the DOT/PF of $23,555,100 for the construction of a bridge over the Eagle River.

Enclosed in your packet you will find a copy of the bill, a copy of HB 248 from the Thirteenth Legislature dealing with the bridge, a site plan, a resolution from the City of Anchorage supporting the building of the bridge, an article from the Anchorage Times about SB 202 and the municipalities objections to the bill, and finally a portion of a plan commissioned by the City of Anchorage to look into ways to solve the traffic problems in the Eagle River area.

In conversation with Chip Dennerlein, director of intergovernmental affairs for the Municipality of Anchorage, it has come to the attention of the staff that the municipality is working with DOT/PF to make sure that the bridge can qualify for federal highway funds. If this happens the cost to the general fund would be far less than that requested. Mr. Dennerlein has said that a representative of the municipality will be testifying at the meeting.

RE: HB 248, construction of a bridge in Eagle River

DATE: May 10, 1983

After careful study of the ongoing problems of traffic congestion in the downtown Eagle River area, I have concluded that there are two projects that can be undertaken at this time to alleviate some of the traffic hazards.

The first and immediate project, for which I have requested funding, is engineering and physical correction of the intersection of Eagle River Road and the Old Glenn Highway.

The second, more long-range project, which I feel should be started as soon as possible, is a bridge over Eagle River to funnel the traffic out of Eagle River Valley over to Hiland Road and out the Hiland Road overpass onto the four lanes to Anchorage.

This bridge seems to be the only feasible solution to the long-range problem of getting the existing traffic out of Eagle River Valley, without going into downtown Eagle River. I feel the sooner we fund and build this bridge, the more money we will save the State. As first designed and considered in 1982, the fiscal note was $12,995,000 and in 1983 it is $15,723,950; each year we wait, the price will be higher.

In conclusion, I strongly recommend your support for HB 248.

Request for Eagle River bridge funds stirs debate

By ANDY RYAN
United Press International

JUNEAU — A bill seeking $23.5 million to build a second bridge across Eagle River, linking Eagle River and Hiland roads, was introduced in the Senate Thursday but an Anchorage official says the money isn't needed this year.

State Sen. Tim Kelly, R-Eagle River, said he introduced the bill because the bridge, which would open up a second interchange into Eagle River from the Glenn Highway, is one of his community's highest priorities.

But Chip Dennerlein, director of intergovernmental affairs for Anchorage Mayor Tony Knowles, said about $500,000 for engineering work on the bridge already is contained in Gov. Bill Sheffield's proposed 1986 budget.

Money to actually build the bridge won't be needed until the 1987 budget, at the earliest, Dennerlein said.

"If you put construction money for the bridge in the budget it would just sit in the bank," said Dennerlein, explaining why the bridge construction funds aren't on the city's list of projects for legislative funding this year.

"We're not going to ask for money we're not going to use," Dennerlein said.

Kelly, a member of the Senate Majority coalition and chairman of the Senate Rules Committee, said the bridge is essential to clear up the bottleneck at Eagle River's sole interchange onto the Glenn Highway.

"It's one of the three priorities that we have in our area," Kelly said. "We have Chugiak High School, and the bridge and the expansion of the Glenn Highway.

"It's just absolutely necessary that we find another outlet-inlet onto the Glenn Highway, because the traffic problems out there with our one little entrance and exit are just insurmountable; and we simply have to find another way to access Eagle River."

At present, all traffic entering the community of Eagle River from the Glenn Highway goes through a single interchange. The new bridge, which would cross Eagle River several miles upstream of the existing bridge, would allow the present Hiland Road interchange to handle traffic bound for Eagle River.

Asked why he introduced the funding request for the bridge as a separate bill rather than incorporate it into the main construction budget, Kelly said it is a matter of legislative tactics.

"A lot of times you simply want to call attention to the fact that you need this, and by introducing a bill it becomes part of the process. If you can put in the budget, fine; if you can't then you might want to push a bill through. It's just another option that we're leaving ourselves with," the senator said.

The planned bridge, which was included Thursday in the U.S. highway system, and which thus will be eligible for federal as well as state funding, will be either two or four lanes wide, depending on how much money is available.

Dennerlein said other construction funds aimed at alleviating the problem of traffic congestion between Eagle River and Anchorage are contained in the governor's proposed budget. One project planned for this year, he said, is the widening of the Glenn Highway between Hiland Road and Muldoon Road, in Anchorage, from four to six lanes.

The city's main push for construction money for the bridge probably will come next year, Dennerlein said.

"It's a fair bet that the bridge will be very high on the 1987 (city) requests," he said.

Passion man's driving force

Continued from Page B-1

Jefferson Starship came to town and Bob was supposed to pick up Grace Slick at the airport. "But she ducked out one of the bottom doors and took a cab."

"I even put on a suit," he says with mock injury. "I had one of those little roses in my lapel. I was going to chauffeur GRACE SLICK!"

The Joneses say they do it all for the fun of it. They certainly seem to be having a good time. Last year they put 2,000 miles on Passion, driving to Settler's Bay for brunch and to Portage for picnics.

Back when Passion was black — with Cadillac silver crushed velour upolstery — Bob rolled her in a ditch at the curve where Dowling Road meets Lake Otis Drive. His father was a passenger in the car. No one was hurt but the car.

"My father thought it was just funnier than hell." The damage tab? Twelve grand.

"If you wanna play, you gotta pay," says Mike (1930 Chevy) Hunsberger, who has been listening to Bob talk about Passion.

Bob is stopped by a request to explain why he is willing to spend so much time and money on a car. "That's hard," he says. Hunsberger helps out:

"It's like having your own parade. People in front of you slow down. People behind speed up just to take a look."

Sometimes the cost of a passion is more than money. About five years ago, Patty left Bob, divorced him. He says it was because of his obsession with cars. She says there was more to it than that, but car madness was certainly way up there.

"I used to feel left out, neglected," she says.

The divorce only lasted seven months. "Our friends say he really grew up after I left him. He decided his family was important."

So the Joneses remarried and Bob bought Patty a 1948 Willys Jeep convertible and now they work on cars together.

Prepared by: Intergovernmental Affairs
Office of Internal Affairs at the request of the Chair
For Reading: March 12, 1985

MAR 27 1985

ANCHORAGE, ALASKA
AR NO. 85-62

A RESOLUTION SUPPORTING IMPROVEMENT AND UPGRADE OF THE GLENN AND PARKS HIGHWAYS

WHEREAS, the Municipality of Anchorage and the Mat-Su Borough have both experienced dramatic increases in population during the past few years, and

WHEREAS, a great percentage of this growth has occurred in Eagle River and in the Wasilla area, and

WHEREAS, many of the people travel to and from the Anchorage Bowl for employment on a daily basis, including 40% of the working population of the Mat-Su Borough, and

WHEREAS, this has severely impacted the ability of the existing highway corridor to meet even the existing demand, and

WHEREAS, much of Southcentral Alaska's future growth and develoment will continue to occur along this primary corridor.

NOW, THEREFORE, be it Resolved that:

The Anchorage Assembly joins with the Mat-Su Borough in supporting an overall planning and improvement program for the entire Glenn and Parks Highway Corridor from Anchorage to Wasilla to include:

1. expansion of the Glenn from Muldoon to Eagle River to six lanes;

2. construction of a new Hiland Road bridge across Eagle River;

3. expansion of the Glenn Highway across the Elkutna Flats to Mile 35, including bridges, to four lanes;

4. expansion of the Parks Highway to Wasilla; and

5. obtaining of a right-of-way for Wasilla Bypass.

6. encourage the exploration with the Alaska Railroad of the feasibility and implementation of commuter rail transit between Wasilla, Eagle River and Anchorage.

This resolution shall take effect immediately upon passage and approval, and copies distributed to the Governor and members of the State Legislature.

PASSED AND APPROVED by the Anchorage Assembly this 12th day of March, 1985.

Jane Angvik
Chairman

ATTEST:

Barbara E. Smith
Municipal Clerk

Anchorage Resolution Supporting the Project

Through previous analysis, it has been shown that the bridge over Eagle River would be the best alternative for improving access to the Glenn Highway from Eagle River. The cost of this alternative also compares very favorably with the other alternatives. It is the only one of the various alternatives which would both lessen the congestion at the South Eagle River Interchange and eliminate the need for the Glenn Highway to be widened to a six lane facility north of the Hiland Road Interchange. Although the ADT on the Glenn Highway south of the Hiland Road Interchange is projected to be 55,000 by the year 2001, the ADT north of this interchange is projected to be only 38,000. This latter traffic volume is within the capacity of the existing facility.

Recommendations

Based on the results of this study, both interim and longer range improvements will be required to improve the access to the Glenn Highway from Eagle River. Interim solutions are needed since the traffic congestion currently in existence at the South Eagle River Interchange must be relieved as soon as practicable. However, long-range solutions are also needed since these interim solutions will not be sufficient to accommodate the projected traffic demand for the year 2001.

In order to relieve the existing congestion problems at the South Eagle River Interchange at Artillery Road, the following interim actions are recommended:

1. Construct an additional right-turn-only lane on the northbound off-ramp of the interchange;

2. Add an additional right-turn-only lane to eastbound Artillery Road from the interchange off-ramp to Eagle River Road;

3. Channelize the intersection of Eagle River Road by adding a right-turn-only lane from Eagle River Road to the New Eagle River Urban; and

4. Install a traffic signal at the intersection of Eagle River Road and the New Eagle River Urban.

In order to accommodate the projected growth in traffic demand throughout Eagle River, the following additional actions are recommended for implementation:

1. Program the preliminary engineering phase for the North Eagle River Access Road Interchange for FY 1984-86;

2. Construct the North Eagle River Access Road Interchange in FY 1987;

3. Program preliminary engineering monies for the bridge over Eagle River and the necessary Hiland Road improvements for FY1984-86;

4. Construct the Eagle River Bridge and upgrade Hiland Road in FY 1987; and

5. Prepare a long-range transportation plan for Eagle River and the surrounding area which will identify necessary internal circulation improvements.

The total estimated cost of these various improvements would be $41,575 million over the 1984-1987 time period. These costs are itemized in Table 3, with the specific projects displayed on Figure 13.

TABLE 3

ESTIMATED COST OF RECOMMENDED IMPROVEMENTS*
($000)

PROJECT	FISCAL YEAR 1984	1985	1986	1987	TOTAL
1. Eagle River Bridge-Hiland Road Improvements	300.0 PE	350.0 PE	400.0 PE	23,450.0 R, U, C	24,500.0
2. North Eagle River Interchange	200.0 PE	200.0 PE	500.0 PE	15,700.0 R, U, C	16,600.0
3. South Eagle River Interchange Improvements

TOTAL	975.0	550.0	900.0	39,150.0	41,575.0

* Inflation is assumed at 7% per year.

er/ml

Environmental/Physical Impacts

The construction of a bridge across Eagle River from the extension of Eagle River Loop Road south to Hiland Road would have a greater impact on the environment than would the other alternatives. Moderate to steep slopes are present, while the site has a rating of moderately low to moderate susceptibility for seismically-induced ground failure. This area is within a coastal management zone, contains wetlands, and is also considered an important wildlife habitat. Extensive engineering and biological studies would be needed prior to constructing a bridge at this location.

The approach road north of the bridge would follow a section line which has been cleared and is currently in use accommodating a power transmission line. However, additional right-of-way would need to be acquired for the bridge structure and the road south of the Eagle River. The surrounding land is presently owned by the State Park System, the Eklutna Corporation, the Municipality, and private individuals.

No structures would need to be taken at this time. However, the roads leading to the bridge would need to be properly buffered to reduce noise and visual impacts to abutting land uses, which currently include a park and developing residential uses. An area on the northeast end of the approach road is currently designated as commercial in the Eagle River Master Plan. The new Gruening Junior High School is located south of the proposed alternative.

Traffic Impacts

At the present time, the existing Hiland Road Interchange is very underutilized. Average traffic volumes are only 1000 per day. However, with the construction of this alternative, this interchange would become a principal access point to the Glenn Highway from Eagle River. Access to and from the Hiland Road area to Eagle River would also be improved. School, shopping, and commercial interests would all be more accessible.

The construction of this bridge would greatly alleviate the existing and forecast traffic volumes at the South Eagle River Interchange, as traffic presently forced to access Eagle River from this location would now have the Hiland Road Interchange as another option. Based on the model projections, the traffic demand for the Hiland Road Interchange would be 17,000 by the year 2001. Of these total trips, 14,000 would cross the new bridge. The majority of this traffic would be diverted from the South Eagle River Interchange. Trips originating in the Eagle River Valley east of Eagle River Loop Road would also have a better access to the Glenn Highway. Figure 12 displays the impact of this alternative on the projected traffic volumes for the area.

Cost

In 1982 dollars, the cost of this facility has been estimated to be approximately $17.5 million. This cost figure also includes improvements to portions of Hiland Road.

The third alternative consists of reconstructing the existing South Eagle River Interchange as a diamond interchange. Higher speeds on the ramps leading to the New Glenn Highway would increase the capacity of the interchange. This alternative would also require the addition of another west-bound traffic lane from the Eagle River Road intersection to the on/off ramps west of the freeway. Traffic from the west side of the highway would be channelized to merge with the on-ramp and be controlled by a yield sign at this point.

Eagle River Valley Bridge - Hiland Road Improvements

The construction of a new road and bridge south from the extension of Eagle River Loop Road, over Eagle River to Hiland Road, could also potentially ease the congestion currently being experienced in Eagle River. This alternative would provide a direct link from the areas of new growth, located primarily in the Eagle River Valley, to Hiland Road and to the existing Hiland Road Interchange. Portions of Hiland Road would also be upgraded as a part of this alternative. These improvements are displayed on Figure 6.

ALTERNATIVES ANALYSIS

Each of the four principal alternatives under study would improve access to the Glenn Highway from Eagle River. However, there are varying impacts associated with each alternative. A brief description of the environmental, physical, and traffic impacts, and the associated cost, of each alternative appears in the ensuing section of this report. For purposes of this analysis, a "no-build" alternative has been included in order to depict the future situation if no improvements at all are made. Because of the State's ongoing program to upgrade the Glenn Highway to a full access controlled facility, it was assumed that the North Eagle River Interchange would be constructed by the year 2001. All future traffic modeling includes this facility except for the "no-build" alternative.

No-Build

If no efforts are undertaken to improve access to the Glenn Highway, the traffic situation in Eagle River can be expected to steadily worsen. Congestion at the South Eagle River Interchange, and in the immediate vicinity, would be far worse by the year 2001 than at present. Model projections indicate that by that time the ADT at this location would be 32,000.

At the only other access point to Eagle River, the North Eagle River Access Road, the ADT would approach 13,000.

MEMORANDUM

TO: Committee Members

FROM: Committee Staff BL

DATE: April 19, 1985

RE: SB 240 A Grant to the Kenai Peninsula Borough

The committee will be hearing SB 240 on Monday, April 22, 1985. This bill appropriates $17,000,000 to the Kenai Peninsula Borough for seven different road projects.

The Department of Transportation has no position on this bill because of its grant provision.

Enclosed in this packet you will find a copy of the bill and a publication from the Kenia Borough on each of the road projects, their status, the steps needed to get to the construction phase and the existing condition.

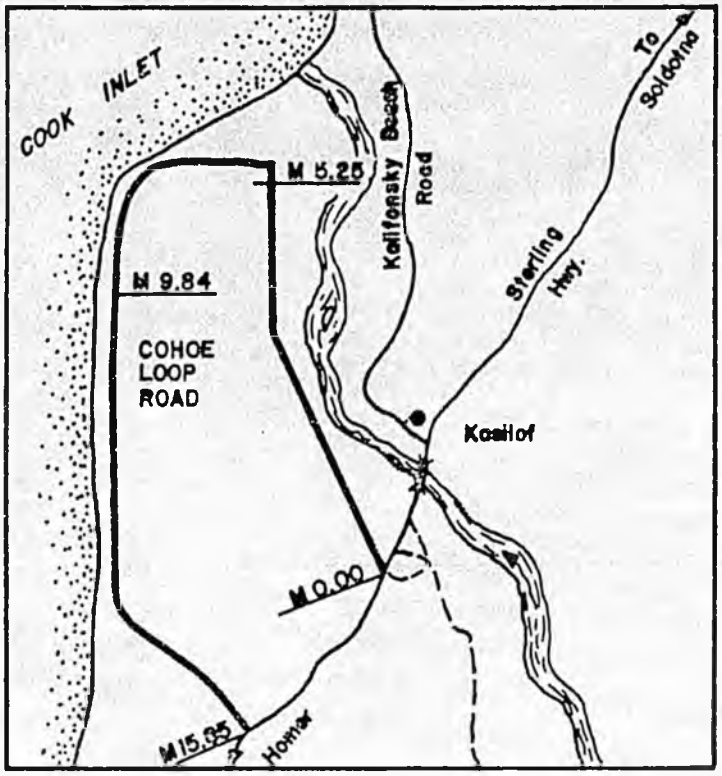
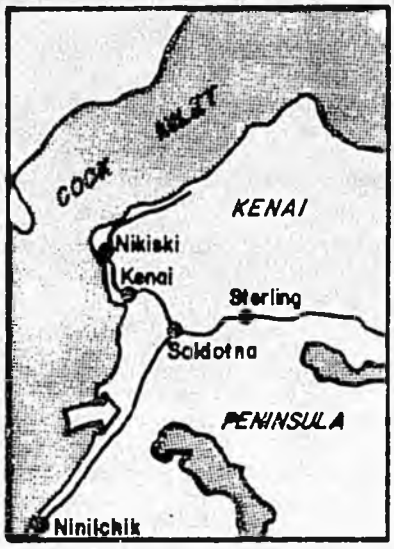
Revised 2/5/85

COHOE LOOP ROAD (SR 114300)





Cohoe Loop Road
Capital Cost:

$2.0 million

1983 ADT = 325

Existing Condition: Mile 0.0 (N. Jct Sterling Hwy) to Mile 5.25: Gravelled 32' surface, no shoulders. Mile 5.25 to Mile 9.84: Gravelled 18' surface. Mile 9.84 tc Mile 15.85 (end of route - S. Jct Sterling Hwy): Gravelled 24' - 26' surface, 4' - 5' shoulders, recently upgraded.

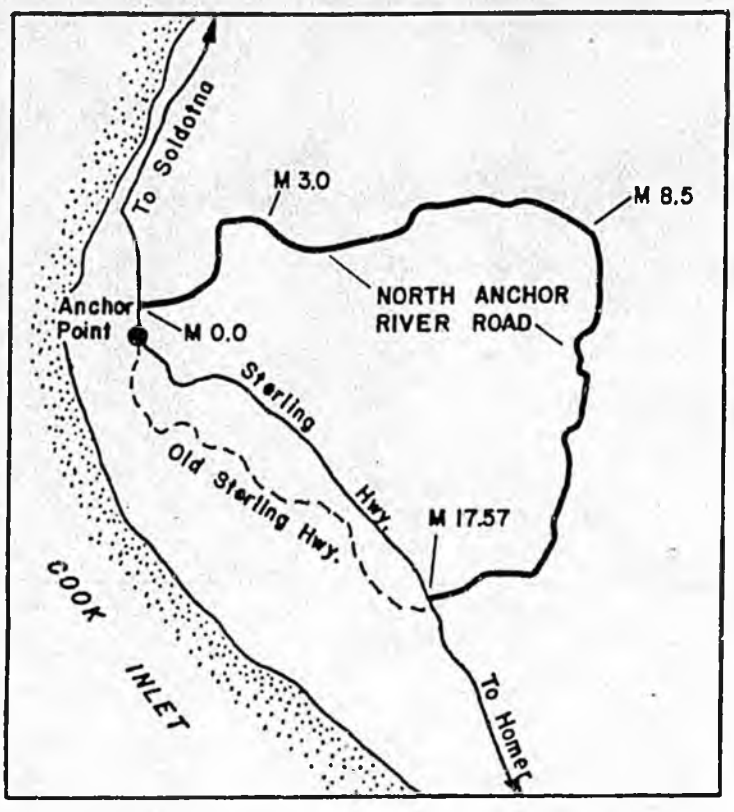
Proposed Physical Improvement: Mile 0.0 to Mile 5.25: Pave to 32'. Mile 9.84 to Mile 15.85: Mile 5.25 to Mile 9.84 - Reconstruct and pave to 32'.

Status: New proposal.

Next Step Prior to Construction: Funding of paving from Mile 0.0 to 5.25 and design from Mile 9.84 and Mile 15.85.

COHOE LOOP ROAD

NORTH ANCHOR RIVER ROAD (SR 111800)



N. Anchor River Road
Capital Cost:

$4.5 million

1983 ADT = 700

Existing Condition: Mile 0.0 (N. Jct Sterling Hwy) to Mile 8.5 (S. Jct Sterling Hwy): Gravelled 20' surface, no shoulders. Overall condition: poor to fair.

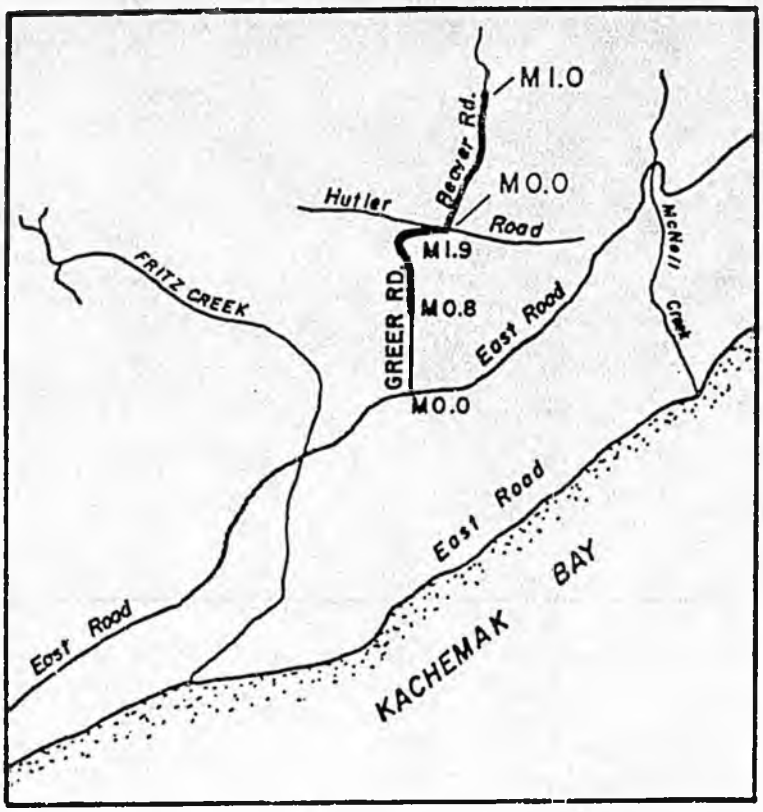
Proposed Physical Improvement: Mile 0.0 to Mile 8.5: Widen, realign, and pave to 32' rural standard. Replace wooden bridge over Anchor River with a steel bridge.

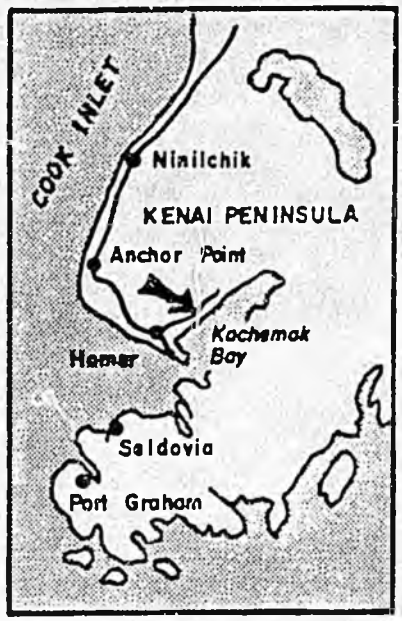
Status: The KPB has funded a $410,000 design in three phases: Phase I, Mile 0.0 to 3.0; Phase II, Mile 3.0 to 8.5; Phase III, Mile 8.5 to 17.0. The construction of Phase I is underway. The design of Phase II is nearing completion.

Next Step Prior to Construction: Construction funding in the amount of $800,000 to complete the paving of Phase I. The amount of $3.7 million for the acquisition of R.O.W. and construction of Phase II.

NORTH ANCHOR RIVER ROAD

GREER ROAD / BEAVER CREEK ROAD (G-11230)





Creer Road
Capital Cost:

$1.8 Million

1983 ADT = 85

Existing Condition: Mile 0.0 to Mile 0.8, 24 wide gravel road in overall good condition. Isolated problem areas. Mile 0.8 to Mile 1.9 - heavy timbered hillside. No existing road. Beaver Creek Road is a single lane mud road approx. 1.0 Mile long, impassible most of the year.

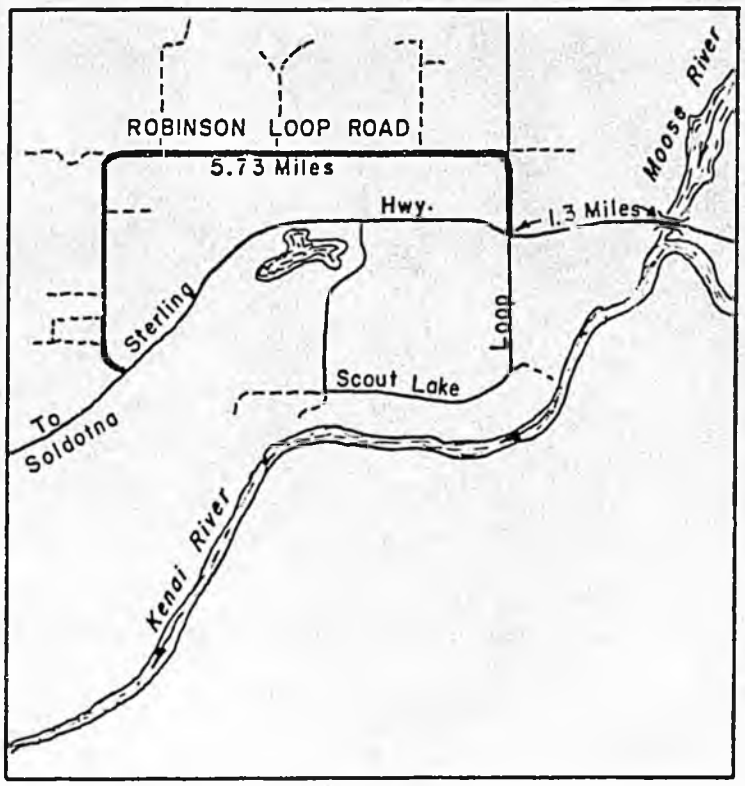
Proposed Physical Improvement: Mile 0.0 to Mile 0.8: Minor improvements and repairs. Mile 0.8 to Mile 1.9 construct new 24' wide gravel road to provide access to Hutler and Beaver Roads. Construct Beaver Creek Road Mile 0.0 to Mile 1.0 to 24' wide gravel road.

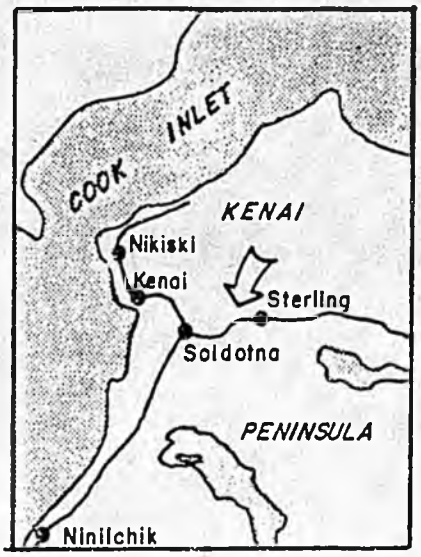
Status: The design is complete and the right-of-way has been secured. The utilities have been relocated.

Next Step Prior to Construction: Construction funding. Design funding for Beaver Creek Road.

GREER ROAD / BEAVER CREEK RD.

ROBINSON LOOP ROAD (SR 118500)





Robinson Loop Road
Capital Cost:

$2.5 million

1983 ADT = 600

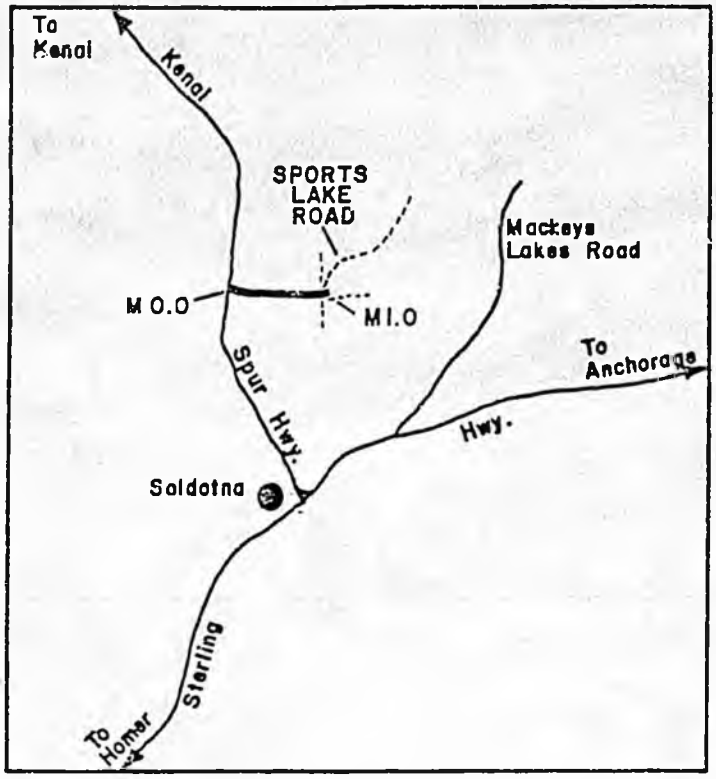
Existing Condition: Mile 0.0 to Mile 5.73: Gravelled 24' surface, no shoulders. Overall condition: Fair with isolated drainage problems.

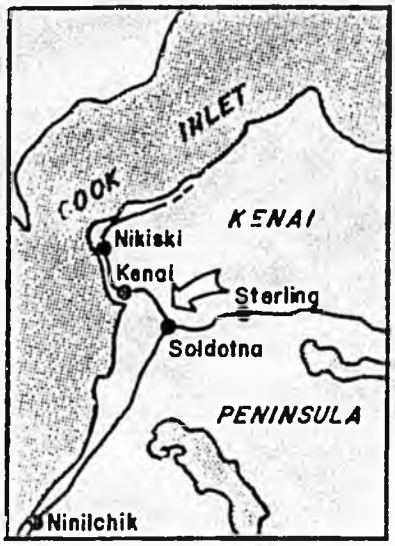
Proposed Physical Improvement: Paved to 32' wide rural standard between Mile 0.0 and Mile 5.73.

Status: The construction of Mile 0.0 to Mile 3.2 is actively underway. The design of Mile 3.2 to Mile 5.73 is nearing completion.

Next Step Prior to Construction: Funding of construction of Mile 3.2 to Mile 5.73.

SPORTS LAKE ROAD (SR 117612)





Sports Lake Road
Capital Cost:

$2.2 million

1983 ADT = 730

Existing Condition: Mile 0.0 (Jct Kenai Spur) to approx. Mile 1.0, known as "Five Corners": Gravelled 24' surface, no shoulders. Overall condition: fair to poor.

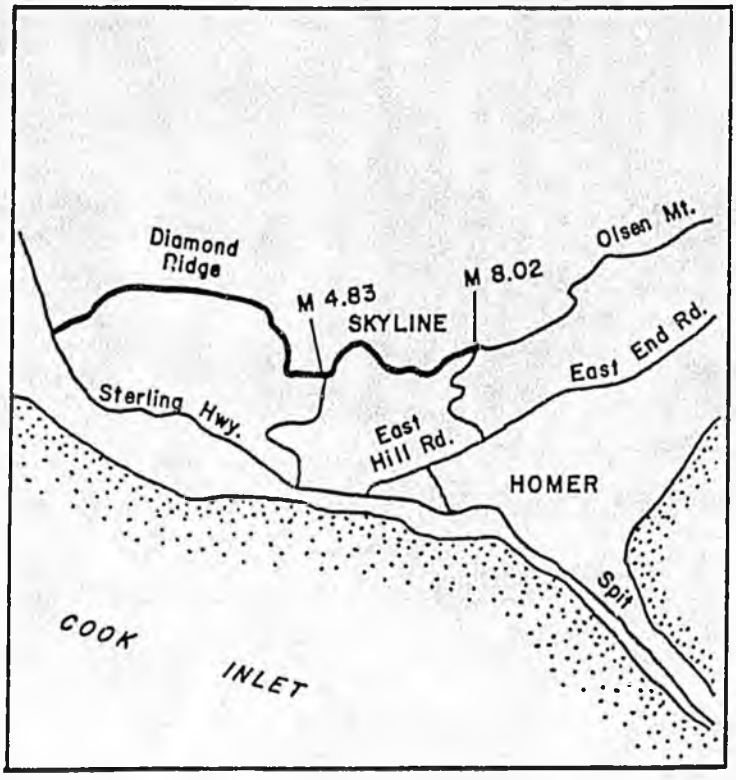
Proposed Physical Improvement: Mile 0.0 to approx. Mile 1.0: Widen and pave to 32' rural standard.

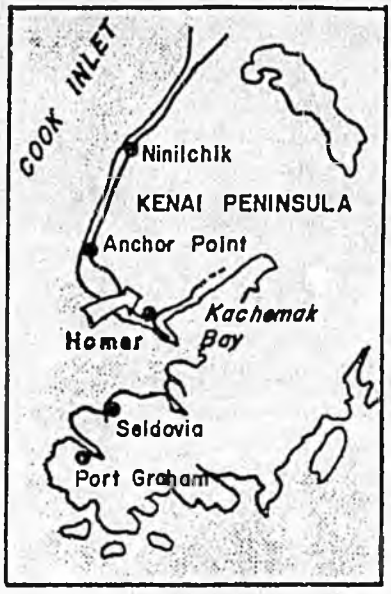
Status: The design is complete, permits have been acquired, right-of-way acquisition is underway.

Next Step Prior to Construction: Construction funding.

SPORTS LAKE ROAD

DIAMOND RIDGE (SKYLINE) / OLSEN MT. ROAD (SR 111300)





Diamond Ridge
Capital Cost:

$2.0 million

1983 ADT = 145

Existing Condition: Mile 0.0 (Jct Sterling Hwy) to Mile 15.81 (end of route): Gravelled 20' surface, no shoulders. Overall condition: poor to fair.

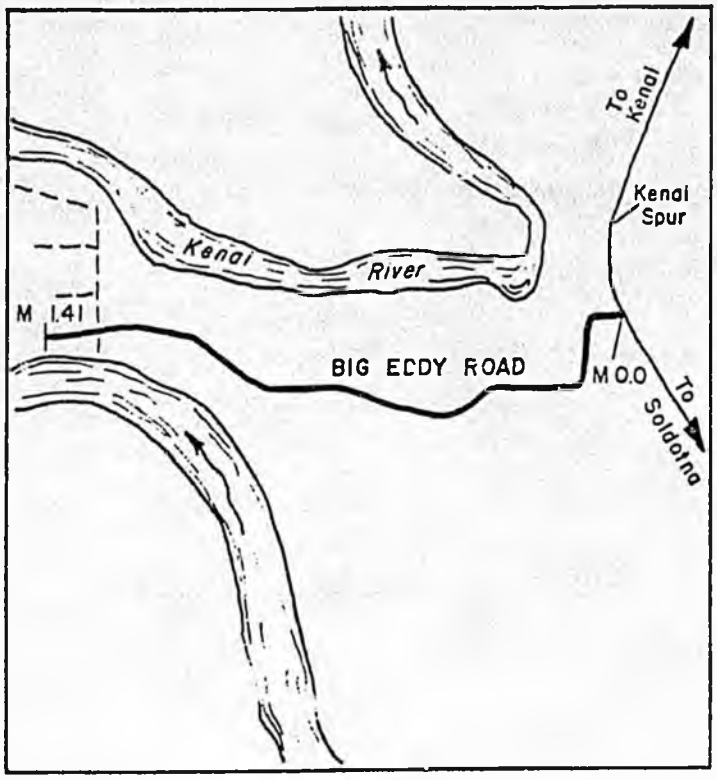
Proposed Physical Improvement: Diamond Ridge (Skyline Drive) Mile 4.83 (Jct West Hill Road) to Mile 8.02 (Jct East Hill Road): Widen and gravel to 28' rural standard. Install guardrails.

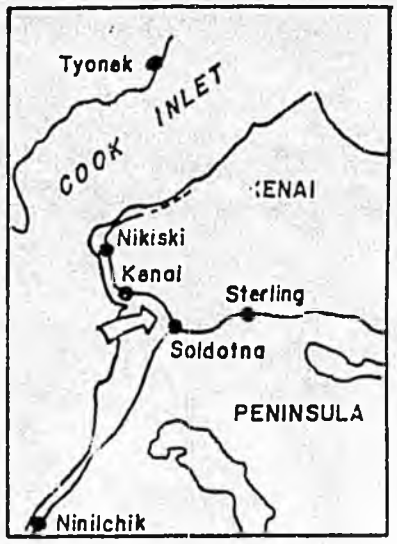
Status: The KPB has funded $68,000 for the design of Skyline Drive between East Hill Road and West Hill Road. The design is complete and right-of-way acquisition is underway.

Next Step Prior to Construction: Construction funding and right-of-way acquisition.

DIAMOND RIDGE (SKYLINE)/OLSEN MT. RD.

BIG EDDY ROAD (SR 117607)





Bid Eddy Road
Phase I
Capital Cost:

$1.5 million

1983 ADT = 400

Existing Condition: Mile 0.0 (Jct Kenai Spur) to mile 1.41 (end of route): Gravelled 18' - 20' surface, minimal shoulders.

Proposed Physical Improvement: Mile 0.0 to 1.4: Pave to 40' rural standard, improve drainage.

Status: The KPB has appropriated $30,000 for design and right-of-way acquisition. The design is actively under way.

Next Step Prior to Construction: Final design, right-of-way acquisition and construction funding.

ALASKA RAILROAD CORPORATION

Pouch 7-2111 • Anchorage, Alaska 99510-7069

April 30, 1985

The Honorable John B. "Jack" Coghill
Alaska State Legislature
Pouch V
Juneau, AK 99811

Subject: SB 303

Dear Senator Coghill:

Thank you for inviting our response to Senate Bill 303, which proposes repeal of A.S. 42.40.355.

As you know, A.S. 42.40.355 provides that the Corporation may not apply for a right-of-way across, or exercise eminent domain in, the western unit of the Gates of the Arctic National Preserve.

Among the many powers assigned to it, the Corporation is authorized to plan for and undertake expansion of the railroad and railroad activities, including extension of the rail system. We support Senate Bill 303, because it creates a flexibility to plan for extensions in an important part of our State.

The Legislature has previously found that the Corporation must function as a viable economic entity, which will also provide a level of transportation service that best satisfies the needs of the people of the State. Although any proposed extension of the rail system calls for careful scrutiny consistent with such Legislative purposes, by promoting flexibility, SB 303 meshes well with our desire to responsibly plan for the future.

Sincerely,

F. G. Turpin
President and Chief Executive Officer

IDENTIFICATION

"An Act removing a limitation on the power of the Alaska Railroad to apply for a right-of-way or exercise eminent domain".

LIST OF WITNESSES

SUGGESTED AMENDMENTS/CS DRAFTED

STATEMENT BY: SENATOR FERGUSON

to the Senate Transportation Committee

May 1, 1985

I am introducing this amendment to better allow the Alaska Railroad Corporation to extend a line into the Kantishna mining area. The Kantishna area is located in the Denali Park Preserve next to Mt. McKinley. The Alaska Land Use Council studied the Kantishna area pursuant to 16 USC 410 HH-1(b). There findings were that substantial and valuable minerals are present there and extractive activities should be allowed.

I believe that extending the railroad into Kantishna via the Stampede Road route would have many benefits. First it would be a vital asset to mining development of the Kantishna. Secondly, railroad access provides the least environmental damage. Thirdly, the railroad could double the number of tourists that would visit McKinley Park and Denali Park. Since McKinley is operated on a controlled access basis, the presence of the railroad would allow the interchange of bus passengers from one direction with the railroad passengers from the other direction, hence doubling the opportunities to visit the two parks.

While the amendment only pertains to state lands, I believe it will provide the railroad with less obstacle on starting across state land at the beginning of the Stampede route.

My amendment would be parody to the main bill which opens up the gates to the Arctic.

(c) The corporation may lease, subject to AS 42.40.285 and (d) of this section, grant easements in or permits for, or otherwise authorize use of portions of rail land. However, the corporation may not convey its entire interest in rail land except as provided in AS 42.40.285, 42.40.370(d) and 42.40.400.

(d) A lease or disposal of land approved by the legislature under AS 42.40.285 by the corporation to a party other than the state shall be made at fair market value as determined by a qualified appraiser or by competitive bid. (§ 2 ch 153 SLA 1984)

Sec. 42.40.355. Prohibition. Notwithstanding any other provision in AS 42.40, the state-owned railroad as defined under 45 U.S.C. 1202(14) may not apply for a right-of-way across, or exercise eminent domain in, the western (Kobuk River) unit of the Gates of the Arctic National Preserve under 16 U.S.C. 410hh(4)(b)-(e). (§ 2 ch 153 SLA 1984)

Sec. 42.40.360. Request for land. (a) The board may nominate federal land it determines may be useful for present or future railroad purposes for selection under the Alaska Statehood Act (P.L. 85 — 508, 72 Stat. 339), as amended, and request the commissioner of natural resources to select the land for the state through the federal land selection process.

(b) The board may identify and request the commissioner of natural resources to convey land necessary or useful for present or future railroad purposes owned by or tentatively approved for transfer to the state, including land not contiguous with a railroad utility corridor or rail land. The request must include a statement of and justification for the present or future railroad use. Upon receipt of a request, the commissioner shall temporarily reserve the land identified in the request for railroad purposes and defer disposal or lease of that land under other laws to a party other than the corporation. The temporary reservation of land is subject to valid existing rights and remains in effect for 180 days. (§ 2 ch 153 SLA 1984)

Sec. 42.40.370. Conveyance of land. (a) Within 90 days after receiving a request under AS 42.40.360(b) the commissioner of natural resources shall by written decision

(1) designate the identified land for railroad purposes and, subject to valid existing rights, convey the state's interests in the land to the corporation;

(2) notify the corporation of reasons for refusal to designate the identified land for railroad purposes; or

(3) approve the request in part and deny it in part and convey as appropriate.

(b) A conveyance of land under this section may be for less than its appraised value as determined by the commissioner of natural resources.

(c) In the absence of a reservation to the contrary, a conveyance of land under this section vests in the corporation ownership, control of the surface, material and mineral estate, including the right to extract or use timber and other construction materials, sand, gravel, rock, and the right to tunnel, ditch, recontour, excavate, or otherwise use the land for railroad, transportation, transmission, communication, and related purposes.

(d) The corporation may reconvey to the state land received under this section that the corporation and the commissioner of natural resources jointly identify as unnecessary or unsuitable for the corporation's purposes. (§ 2 ch 153 SLA 1984)

Sec. 42.40.380. Use of state land. When emergency conditions require that track or other right-of-way fixtures of the corporation be moved from the existing location and relocated on state land adjacent to or in the vicinity of the existing right-of-way and the chief executive officer determines that relocation is necessary to maintain safe and adequate rail operations, the corporation may effect the relocation and notify the Department of Natural Resources. The relocation must affect only the amount of state land necessary to adequately restore or continue safe rail operations at a normal level. (§ 2 ch 153 SLA 1984)

Sec. 42.40.385. Eminent domain. (a) The corporation may exercise the power of eminent domain under AS 09.55.240 — 09.55.460 to acquire land for railroad transportation purposes consistent with this chapter. Notwithstanding AS 09.55.250, the corporation may acquire a fee simple title whenever, in the judgment of the board, ownership of a fee simple title is necessary to carry out the purposes of this chapter.

(b) The corporation may file a declaration of taking in the manner provided for the state under AS 09.55.420.

(c) The power of eminent domain conferred under this section includes the power to obtain clay, gravel, sand, timber, rock or other material for the operation of the railroad, the land necessary to obtain the material, and access to the land and material.

(d) The exercise of the power of eminent domain requires the prior approval of the governor. (§ 2 ch 153 SLA 1984)

Sec. 42.40.390. Land use rules. The board may adopt exclusive rules governing land use by parties having interests in or permits for land owned or managed by the corporation. The power conferred by this section is exercised for the common health, safety, and welfare of the public and to the extent constitutionally permissible, may not be limited by the terms and conditions of leases, contracts, or other transactions. (§ 2 ch 153 SLA 1984)

Sec. 42.40.400. Vacation of easements. The corporation may vacate an easement acquired under this chapter by executing and filing a deed in the appropriate recording district. If the easement was

MEMORANDUM

TO: Committee Members

FROM: Committee Staff

DATE: 4-30-85

RE: SB 303

SB 303 repeals Section 42.40.355 of the Alaska Statutes. This sub-section prohibits the Alaska Railroad from applying for rights-of-way in the western unit of the Gates of the Arctic National Preserve under 16 U.S.C. 410hh(4)(b)-(e). 16 U.S., etc. refers to chapter 11 of the ANILCA act. Chapter 11 allows the State of Alaska to apply for access across or into national parks and preserves if the appropriate requirements are met.

Senator Ferguson, the sponsor of this provision of the Alaska Railroad Enabling Act, has agreed to this change.

STAFF MEMO

ALASKA RAILROAD CORPORATION

Pouch 7-2111 ◦ Anchorage, Alaska 99510-7069

April 30, 1985

The Honorable John B. "Jack" Coghill
Alaska State Legislature
Pouch V
Juneau, AK 99811

Subject: SB 303

Dear Senator Coghill:

Thank you for inviting our response to Senate Bill 303, which proposes repeal of A.S. 42.40.355.

As you know, A.S. 42.40.355 provides that the Corporation may not apply for a right-of-way across, or exercise eminent domain in, the western unit of the Gates of the Arctic National Preserve.

Among the many powers assigned to it, the Corporation is authorized to plan for and undertake expansion of the railroad and railroad activities, including extension of the rail system. We support Senate Bill 303, because it creates a flexibility to plan for extensions in an important part of our State.

The Legislature has previously found that the Corporation must function as a viable economic entity, which will also provide a level of transportation service that best satisfies the needs of the people of the State. Although any proposed extension of the rail system calls for careful scrutiny consistent with such Legislative purposes, by promoting flexibility, SB 303 meshes well with our desire to responsibly plan for the future.

Sincerely,

F. G. Turpin
President and Chief Executive Officer

ALASKA RR RESPONSE

(c) The corporation may lease, subject to AS 42.40.285 and (d) of this section, grant easements in or permits for, or otherwise authorize use of portions of rail land. However, the corporation may not convey its entire interest in rail land except as provided in AS 42.40.285, 42.40.370(d) and 42.40.400.

(d) A lease or disposal of land approved by the legislature under AS 42.40.285 by the corporation to a party other than the state shall be made at fair market value as determined by a qualified appraiser or by competitive bid. (§ 2 ch 153 SLA 1984)

Sec. 42.40.355. Prohibition. Notwithstanding any other provision in AS 42.40, the state-owned railroad as defined under 45 U.S.C. 1202(14) may not apply for a right-of-way across, or exercise eminent domain in, the western (Kobuk River) unit of the Gates of the Arctic National Preserve under 16 U.S.C. 410hh(4)(b)-(e). (§ 2 ch 153 SLA 1984)

Sec. 42.40.360. Request for land. (a) The board may nominate federal land it determines may be useful for present or future railroad purposes for selection under the Alaska Statehood Act (P.L. 85 — 508, 72 Stat. 339), as amended, and request the commissioner of natural resources to select the land for the state through the federal land selection process.

(b) The board may identify and request the commissioner of natural resources to convey land necessary or useful for present or future railroad purposes owned by or tentatively approved for transfer to the state, including land not contiguous with a railroad utility corridor or rail land. The request must include a statement of and justification for the present or future railroad use. Upon receipt of a request, the commissioner shall temporarily reserve the land identified in the request for railroad purposes and defer disposal or lease of that land under other laws to a party other than the corporation. The temporary reservation of land is subject to valid existing rights and remains in effect for 180 days. (§ 2 ch 153 SLA 1984)

Sec. 42.40.370. Conveyance of land. (a) Within 90 days after receiving a request under AS 42.40.360(b) the commissioner of natural resources shall by written decision

(1) designate the identified land for railroad purposes and, subject to valid existing rights, convey the state's interests in the land to the corporation;

(2) notify the corporation of reasons for refusal to designate the identified land for railroad purposes; or

(3) approve the request in part and deny it in part and convey as appropriate.

(b) A conveyance of land under this section may be for less than its appraised value as determined by the commissioner of natural resources.

AS 42.40.355 !

and scenic beauty of the mountains, forelands, rivers, lakes, and other natural features; to provide continued opportunities, including reasonable access, for mountain climbing, mountaineering, and other wilderness recreational activities; and to protect habitat for and the populations of, fish and wildlife, including, but not limited to, caribou, grizzly bears, Dall sheep, moose, wolves, and raptorial birds. Subsistence uses by local residents shall be permitted in the park, where such uses are traditional, in accordance with the provisions of title VIII.

Post, p. 2422.

(b) Congress finds that there is a need for access for surface transportation purposes across the Western (Kobuk River) unit of the Gates of the Arctic National Preserve (from the Ambler Mining District to the Alaska Pipeline Haul Road) and the Secretary shall permit such access in accordance with the provisions of this subsection.

Publication in Federal Register.

(c) Upon the filing of an application pursuant to section 1104 (b), and (c) of this Act for a right-of-way across the Western (Kobuk River) unit of the preserve, including the Kobuk Wild and Scenic River, the Secretary shall give notice in the Federal Register of a thirty-day period for other applicants to apply for access.

Environmental and economic analysis.

(d) The Secretary and the Secretary of Transportation shall jointly prepare an environmental and economic analysis solely for the purpose of determining the most desirable route for the right-of-way and terms and conditions which may be required for the issuance of that right-of-way. This analysis shall be completed within one year and the draft thereof within nine months of the receipt of the application and shall be prepared in lieu of an environmental impact statement which would otherwise be required under section 102(2)(C) of the National Environmental Policy Act. Such analysis shall be deemed to satisfy all requirements of that Act and shall not be subject to judicial review. Such environmental and economic analysis shall be prepared in accordance with the procedural requirements of section 1104(e). The Secretaries in preparing the analysis shall consider the following—

42 USC 4332.

Post, p. 2459.

(i) Alternative routes including the consideration of economically feasible and prudent alternative routes across the preserve which would result in fewer or less severe adverse impacts upon the preserve.

(ii) The environmental and social and economic impact of the right-of-way including impact upon wildlife, fish, and their habitat, and rural and traditional lifestyles including subsistence activities, and measures which should be instituted to avoid or minimize negative impacts and enhance positive impacts.

(e) Within 60 days of the completion of the environmental and economic analysis, the Secretaries shall jointly agree upon a route for issuance of the right-of-way across the preserve. Such right-of-way shall be issued in accordance with the provisions of section 1107 of this Act.

Kenai Fjords National Park.

(5) Kenai Fjords National Park, containing approximately five hundred and sixty-seven thousand acres of public lands, as generally depicted on map numbered KEFJ-90,007, and dated October 1978. The park shall be managed for the following purposes, among others: To maintain unimpaired the scenic and environmental integrity of the Harding Icefield, its outflowing glaciers, and coastal fjords and islands in their natural state; and

SENATE BILL NO. 308

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act providing for the issuance of general obligation bonds in the amount of $350,000,000 for the purpose of paying the cost of transportation projects; calling for a special election on the question; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. For the purpose of paying the cost of transportation projects, general obligation bonds of the state in the principal amount of not more than $350,000,000 shall be issued and sold. The full faith, credit, and resources of the state are pledged to the payment of the principal of and interest and redemption premium, if any, on these bonds. These bonds shall be issued under the provisions of AS 37.15 as those provisions read at the time of issuance.

* Sec. 2. If the issuance of these bonds is authorized by the qualified voters of the state, a special fund of the state to be known as the "1985 Transportation Projects Fund" shall be established, to which shall be credited the proceeds of the sale of the bonds described in sec. 1 of this Act except for the accrued interest and premiums.

* Sec. 3. (a) The amount of $350,000,000 is appropriated from the "1985 Transportation Projects Fund" to the Department of Transportation and Public Facilities to be allocated in accordance with the following projects and estimates:

(1) transportation projects within the Municipality of Anchorage:

West Northern Lights	21,000,000
Eklutna Transportation Project	28,000,000
Lake Otis Drive	15,500,000
Boniface Parkway and interchanges	26,300,000
C St., Tudor to ARR	2,000,000
100th and Minnesota interchange	3,500,000
C St., - Klatt Road	2,600,000
Spenard Road	12,600,000
36th Avenue	3,100,000
Dimond Blvd	5,600,000
Arctic Blvd	5,600,000
Pedestrian improvements	1,700,000
Traffic circulation improvements	2,000,000
Anchorage road district service areas	3,500,000
Limited road service areas	2,000,000
Eagle River Hiland Road bridge	3,000,000
Chugiak-E.R.-Birchwood road improvements	1,400,000
Old and New Seward Highway Intersections improvements	5,600,000
Eagle River-Birchwood-Chugiak State Road improvements	5,000,000
Total	$150,000,000

(2) transportation projects in the following house election districts, in the respective amounts:

District 1	17,392,439
District 2	8,695,565
District 3	8,695,565
District 4	17,391,304
District 5	17,391,304

District 6	8,695,565
District 16	17,391,304
District 17	8,695,565
District 18	8,695,565

(b) The proceeds of the bond issue may be reallocated among the listed projects as provided by law.

* Sec. 4. If the issuance of these bonds is authorized by the qualified voters of the state, the amount of $1,225,000 or as much of that amount as is found necessary is appropriated from the general fund of the state to the state bond committee to carry out the provisions of this Act and to pay expenses incident to the sale and issuance of the bonds authorized in this Act. The amounts expended from the appropriation authorized by this section shall be reimbursed to the general fund from the proceeds of the sale of the bonds authorized by this Act.

* Sec. 5. The amount withdrawn from the public facility planning fund for the purpose of advance planning for the improvements financed under this Act shall be reimbursed to the fund from the proceeds of the sale of bonds authorized by this Act.

* Sec. 6. The question whether the bonds authorized in this Act are to

be issued shall be submitted to the qualified voters of the state at a special election to be held the first Tuesday in November 1985 and shall read substantially as follows:

Proposition

State General Obligation Transportation Projects

Bonds $350,000,000

Shall the State of Alaska issue its general obligation bonds in the principal amount of not more than $350,000,000 for the purpose of paying the cost of transportation projects?

Bonds Yes [ ]

Bonds No [ ]

* Sec. 7. This Act takes effect immediately in accordance with AS 01.-10.070(c).

Bond issue proposed in House

by Bruce Scandling 5-2-85
Associated Press

Juneau — Legislation to put a $350 million bond issue before Alaska voters was introduced in the House Wednesday, but opponents said the measure is a disguised attempt to give Anchorage more money to spend on roads.

The proposal — sponsored by Reps. H.A. "Red" Boucher of Anchorage and Sam Cotten of Eagle River — would set up a special election in November.

If the bond issue was approved, Anchorage would get $150 million for road and highway projects.

The remaining $200 million would be portioned out by election district for transportation projects in the rest of Alaska.

"This bill might be less than perfect, but it's the first step in realizing that Mother Alaska can't do everything for everyone," Boucher said.

He said the bond vote would let Alaska's citizens — not its lawmakers — decide whether more money should be spent on roads and highways as state revenues plummet.

"At the moment, I'm not sure if I would vote yes or no in the ballot box on these projects," Boucher said.

The bond sale is backed strongly by Anchorage Mayor Tony Knowles and the Anchorage Assembly.

Knowles and a cadre of bond experts were expected to arrive in Juneau Wednesday, trying to rally support by lawmakers.

"Our accelerated road (construction) program is on track today, and we need to find a way to keep it on track," said Chip Dennerlein, a Knowles aide.

"We're suggesting a vote of the people to resolve the issue," he said. "We must have a solution to our basic transportation problems."

Boucher said Wednesday he and Cotten have support from about 25 members of the 40-member House.

Some lawmakers, however, took little time to come out against the idea.

"This is being put on the table because Anchorage wants another $150 million in capital projects," said Rep. Mike Navarre, D-Kenai.

He said every Alaska town would like more money to spend on construction projects, but state government must cut back its spending.

Navarre said the bonding proposal promotes "fiscal irresponsibility."

With the value of North Slope crude oil on the decline, lawmakers this year have been wrestling to reduce state spending. The legislature earmarked $1.2 billion for public construction in the current fiscal year.

By all accounts, however, the fiscal 1986 capital budget now being built will total no more than $500 million, with half of that destined for development of hydroelectric power.

Knowles and the assembly have drafted a priority list of raod and highway projects totaling $160 million.

Rep. Steve Rieger, R-Anchorage, said the bonding proposal is a bad idea because it commits the state to pay off bond debts when economists

See Bond, page B-7

Lawmakers, Knowles call for bond proposal testimony

by Larry Persily
Times Juneau Bureau

Juneau — It's become a battle of bond market and government debt experts as legislators consider a proposal to place a $350 million statewide bond issue before the voters this fall.

Mayor Tony Knowles is in Juneau today with his national bond market experts, lobbying for support for his proposal to fund transportation and utility projects with a statewide bond issue.

The Senate Finance Committee countered with an announcement Wednesday that it has invited state and municipal debt consultants from Princeton, N.J., to come to Juneau next week to discuss the bond sale proposal with lawmakers.

Senate Finance Co-Chair Jan Faiks, R-Anchorage, said she and Co-Chair John Sackett, R-Ruby "have invited them (the consultants) to come and present firsthand their analysis of the finances of Alaska."

The Senate committee has invited representatives of Government Finance Associates, of Princeton, N.J., to address a joint

See $350 million, page B-7

session sometime next week of the House and Senate finance committees, Faiks said.

Until they meet with the consultants, Faiks said, Senate finance "will leave the option of the bond proposal open."

Legislators are divided on the bond proposal, with many supporting the issue but others opposing it as being fiscally irresponsible at a time of declining oil revenues.

Government Finance Associates specializes in advising state and local governments on bond issues, said Milt Barker, deputy commissioner for the Alaska Department of Revenue. The company has served as financial adviser to the state bond committee since last fall, Barker said.

Faiks reported the consultants will address lawmakers on:

-The possibility of selling $350 million in state general obligation bonds, to be paid off by future general fund revenues.

-The effects the bond sale could have on state and municipal bond ratings, including any effects it might have on school district bond sales.

-The cost of "back-loading," a proposal to lower bond payments by paying only interest in the early years and then paying the principal in later years, stretching the debt over a longer period of time.

The advisers will be asked to explain how Alaska earned its high bond rating, what must be done to maintain that rating, and how much a drop in the rating could cost the state, Faiks said.

A bill authorizing a $350 million bond issue special election this fall was introduced Wednesday in the House. The bill allocates $150 million for priority road projects in Anchorage, with the remaining $200 million divided between other areas of the state.

Knowles has been pushing for a statewide bond issue to fund Anchorage road projects left out of this session's state capital projects budget.

The mayor said his group of bond market experts, scheduled to come to Juneau today from Seattle, San Francisco and New York, will explain to lawmakers how the bonds can be sold without harming Alaska's financial rating and without putting unreasonable burdens on the state treasury.

Bond issue given

Continued from page B-1

aren't yet sure how low the price of oil will sink in the future.

In the wake of declining oil wealth, Rieger said, legislators this year have talked about statesmanship in tackling tough budget problems.

"And the statesmanship in the this case is not to cave in," he said.

According to the Boucher-Cotten plan, Anchorage would get $150 million for 19 specific road and highway projects — if the bond issue was approved by voters.

Each election district outside of Anchorage would get $8.7 million for tranportation projects, according to the plan.

With 11 days to go in what's supposed to be a 120-day legislative session, the proposal will have to speed through the committee process in time to be approved by both house of the legislature.

One veteran senator said Wednesday there's probably not enough time for that to happen, especially since the Boucher-Cotten bill has generated little enthusiasm in the Senate.

"There's no open support for it," said Sen. Bill Ray, D-Juneau.

"It would be the pork-barrel of all pork-barrels, when you're going to kill the pig now and be paying for it over the next 10 years with money you don't even know you're going to have," Ray said.

Sen. Jan Faiks, an Anchorage Republican who co-chairs the Senate Finance Committee, has said a bond issue would be irresponsible when falling revenues leave the state's future financial picture in doubt.

Meanwhile, Senate President Don Bennett, R-Fairbanks, has called the idea "ridiculous."

State officials said Wednesday it would cost between $800,000 and $1 million to hold a special

Maria Hendrix, 7, plays with her dog while her mother, Carla, an Alaska Cab driver, takes part in an attempted citywide taxi strike on Third Avenue Tuesday.

Citywide taxi strike falls through

23 drivers assemble to discuss fare regulation

by Chriss Swaney
Times Business Writer

Alaska Cab drivers Tuesday were unsuccessful in a bid to foster a citywide taxi strike.

About 17 Alaska Cab drivers — far fewer than organizers expected — gathered at a vacant Third Avenue parking lot near the Holiday Inn in Anchorage Tuesday evening to debate the hotly contested cab fares. They were later joined by four Checker Cab drivers and two Yellow Cab drivers.

The drivers mingled around the parking lot for about an hour talking with other drivers and the press.

Peter Kautsky, an Alaska Cab driver, said he came to protest the disparity in cab fares. "I think they should all be regulated," he said. "We can't make a living out here the way it is now."

Alaska Cab driver Alex Olah, who helped organize the protest, said the meeting was organized to draft opinions from all cab drivers. "We want to know where everyone stands on the issue," Olah said.

Most of the Alaska Cab drivers who supported the protest said they favored the $1.50 a mile rate and a $1.50 flag drop used by Checker Cab. At present, Alaska Cab charges $1.20 a mile and $1.40 for a flag drop. Yellow Cab recently cut its fares to $1 a mile and 80 cents for a flag drop.

Yellow Cab officials said business is booming because of the lower fares. "Cab calls have jumped from 1,200 a day to 2,000 a day," said Hugh Brown, Yellow Cab manager. "Our cabbies are busy all day.

Because Yellow Cab is monopolizing most of the business, drivers with other companies say they can't make a decent living now.

Marci Denison, a Checker Cab driver, said she also agrees with a blanket fare of $1.50. "We need some order in this business," she said.

But John Carlson, a Yellow Cab driver, said Alaska Cab is simply experiencing the pressures of competition. "I sympathize with their problems but we were hurt last year when Alaska Cab refused to raise its prices," he said. "They were the low fares and our business hurt; now the shoe is on the other foot."

Officials at Alaska Cab said drivers never tried to negotiate with them about their problems. "I think we can solve the problems internaly without bringing the public into it," said Karen Johnson, a manager at Alaska Cab.

She said Alaska Cab owners are scheduling a meeting later this week between management and drivers.

check the ice and, right along the bank, it's starting to get a little slushy," Ekstedt said Tuesday.

Panel kills pay raises

by Larry Persily
Times Juneau Bureau

Juneau — The Senate Finance Committee this morning deleted about $39 million for state employee pay raises from the fiscal year 1986 budget, setting the table for a heated family argument with the House.

The House Finance Committee last week passed its version of the $1.9 billion state general fund operating budget, sending the bill to the Senate with the employee pay raise money included in the total.

The Senate majority caucus met last week and pledged to delete the pay raise funding from the budget, and this morning Senate finance by unanimous vote sliced about $39 million from the House budget.

After deletion of the pay raise funding and half a dozen other minor amendments, the finance

Lawmakers plan state $350 million bond bill

by Larry Persily
Times Juneau Bureau

Juneau — Legislation to set a special election this fall for approval of a $350 million statewide bond issue was to be introduced today on the House floor.

The bill, sponsored by Anchorage Democratic Reps. Red Boucher and Sam Cotten, would allocate $150 million of the bond funds for Anchorage road projects, with the remaining $200 million divided equally between other areas of the state.

Governor hints at low capital budget — page B-7

The $200 million would be divided with $8.7 million going to each of the 13 single-member House districts outside Anchorage, and $17.4 million for each of the five two-member districts.

Boucher said he's optimistic of the bill's chances in the final two weeks of the legislative session. As of Tuesday, he said, he had "25 people (out of 40 House members) who have given me their yes vote."

He said of the $350 million total, "It's been allocated on a fair basis," and he hopes for statewide support for placing the bond issue on a special election ballot this fall.

The bill, as drafted by Boucher, would limit the bond sale to only transportation projects.

Previous discussions had listed school and utility projects for possible inclusion in the bond issue, and Boucher said he would have no objection to adding those categories.

"There'll be no fluff in it, in other words only the basics," the legislator said, pledging to prevent the bond issue from becoming a dumping ground for frivolous projects.

Mayor Tony Knowles, who a couple of weeks ago started the push for a state bond sale to fund community priority projects, will arrive in Juneau tonight to renew his lobbying effort for the legislation.

He plans to meet with House and Senate leaders, the governor, Department of Revenue commissioner and the Anchorage caucus during his stay in the capital, calling this week's visit, "Probably the most important trip" of his bond issue campaign.

Bond market experts from Seattle, San Francisco and New York City will join the mayor in Juneau this week to offer their opinions as to how the state can sell the bonds without harming its financial rating or causing unreasonable strains on its already tight budget.

Gov. Bill Sheffield "would prefer not to see a special electio. this year," said Molly McCammon, deputy press secretary. "He still believes there is adequate funding for a capital budget."

This year's capital projects budget appears likely to fall within the range of

See Bonding, page B-3

Chamber throws support behind bond issue

Times Business Staff

The second business group in as many days today endorsed Mayor Tony Knowles' proposal for a $350 million statewide bond issue ballot that would include about $150 million for 19 Anchorage projects.

The Anchorage Chamber of Commerce board of directors this morning voted 11-2, with two abstentions, in support of the ballot bond issue. The Downtown Development Corp. on Tuesday endorsed the proposal.

"It was a significant move by the chamber and shows that they are concerned about continued real growth in Anchorage," Knowles said.

In a message to legislators, chamber president-elect Elaine Atwood said the bond issue was endorsed "if that is the only way for the Municipality of Anchorage to obtain funding for its essential tansportation projects."

"After extensive discussion," she said in a telegram to lawmakers, "the chamber board voted for the bonds as a last resort to meet our critical needs. The board strongly urges the legislature to appropriate the needed monies from available revenues — but if that is not possible, a bond issue is the alternative."

Without the bond money, Knowles said, Anchorage would be unable to keep its accelerated road program on schedule because this year's state capital projects' budget is expected to fall far short of meeting the community's $145 million priority list. Anchorage foresees only $50 million in state grants.

Besides road improvements, money raised through the bond issue and designated for Anchorage would be go towards the Eklutna Water Project and the Fifth Avenue and C Street parking garage.

The bond sale proposal, first advanced by the mayor a couple of weeks ago, has been endorsed by the Anchorage Assembly, the Associated General Contractors of Alaska, Anchorage Parking Authority, Fairbanks mayor Bebe Allen, Kenai mayor Stan Thompson and Matanuska-Susitna Valley mayor Dorothy Jones and 23 community council presidents.

The blotter

Three paintings stolen

A Downtown art gallery lost three paintings with a total value of $600 early Monday, when an unidentified man broke into the business' hotel lobby showroom.

Anchorage police said a white man in his 20s broke a sliding-glass door lock to enter The Art Gallery, a private art firm located in the Sheraton Anchorage Hotel, shortly after 1 a.m. Monday.

The suspect, who reportedly sported shoulder-length brown hair, grabbed a gold-framed painting of polar bears by Annette Hartzell, a metal-framed painting of swans, and a John Van Zyle painting of Mount Susitna before fleeing the scene in a small red sedan, police said.

A hotel employee spotted the suspect fleeing, police added.

Police are still investigating the incident.

Vandal rams van

City police were seeking a 22-year-old local man today in connection with his alleged attack on an acquaintance's parked van Monday.

Police said the man allegedly steered his car into a driveway in the 3400 block of Arcturus Circle about 5:45 p.m. Monday, then spun his tires until they had carved holes in the driveway's asphalt surface.

Police said the home's 25-year-old owner told investigators the man — whom his wife had met while undergoing treatment at the Alaska Psychiatric Institute — then used the car to ram a van parked in the driveway, causing an estimated $1,200 in damage to the vehicle.

When the owner ran out to stop the visitor, the man fled.

said. After that, guards will remain posted on the river's banks until the ice goes out.

Ekstedt said he is keeping his eye on the still-frozen Nenana River, which runs south of town. He said the Nenana typically breaks up five days before the Tanana.

Half of the 190,644 entries in this year's contest will have been eliminated by noon Thursday, Ekstedt said. He said many people mistakenly submitted the $2 tickets for a non-existent April 31 date.

Bonding

Continued from page B-1

$200 million to $250 million in state general fund money, in addition to $250 million for the Susitna and Bradley Lake hydro power projects.

Referring to the drop from last year's $1.25 billion capital projects budget, Boucher said, "We jumped out of the plane without a parachute."

He supports offering the bond issue to the voters as a means of funding essential road projects that otherwise would be delayed until state funds become available.

Capital projects bond issue divides legislature

by Larry Persily
Times Juneau Bureau

Juneau — Mayor Tony Knowles has gathered much support in the past week for a statewide capital projects bond issue, but he has failed to convince the Senate President or House Speaker to join his side of the debate.

Knowles wants the legislature to put a $350 million bond issue on a special election ballot this fall, with Anchorage to receive $140 million of the money for road work and the Eklutna water project.

The remaining $210 million in state bond funds would go for projects in other communities.

"I think it's ridiculous," said Senate President Don Bennett, R-Fairbanks, adding, "It's fiscally irresponsible."

House Speaker Ben Grussendorf, D-Sitka, said it would be premature to put together a bond issue this year.

Without the bond money, according to Knowles, Anchorage would be unable to keep its accelerated road program on schedule since this year's state capital projects budget is expected to fall far short of meeting the community's $160 million priority list.

The mayor does have his backers, however, with one of them — Rep. Red Boucher, D-Anchorage — very close to signing up a majority of the House behind the bond issue proposal.

Boucher worked over the weekend to gather support for legislation he hopes to introduce this week. "The minute I've got 21 or 22 votes, I intend to introduce bond issue legislation," Boucher said.

As of Sunday, he had 20 representatives committed in support of a bill, he said.

Boucher claims strong support in the Railbelt area, but, "In the rural areas, it's less than warm."

House Finance Committee Chairman Al Adams, D-Kotzebue, said Sunday, "I have no comment at this time until I have had a chance to look at the whole picture."

House Minority Leader Terry Martin, R-Anchorage, opposes a bond issue this year.

"I really don't believe in it," he said of the need to sell bonds. Martin said issuing loans from the Alaska Permanent Fund's undistributed income account, or from the Permanent Fund itself, would be preferable to selling bonds. The state's savings account should be invested in Alaska, the Anchorage Republican said.

Grussendorf said time is working against Knowles — the session is scheduled to end May 13 — though he would be inclined to support a bond issue next year.

"Small communities are not prepared to move that rapidly," the House speaker said of putting together a list of local projects in two weeks. "If we're going to go to a bond issue," he said, "it should be developed for next year," giving communities more time to select and plan their projects.

Senate Finance Committee co-chairman John Sackett, R-Ruby, is leaning toward supporting a bond issue this year.

"Generally, my feelings would be positive toward it," he said, depending on two conditions: If it's proven the additional debt would not lower the state's bond rating, and depending on what projects are proposed for bond funding.

Sen. Jan Faiks, R-Anchorage, the other co-chair of the committee, is perhaps the strongest voice in the Anchorage delegation against a bond issue. "We're in a very precarious financial position right now, with 85 percent of our income based on the price of oil," she said.

"People have accused the legislature for the past seven years of living only for today," Faiks said. "We have to look to tomorrow." She said she is convinced bonding would be irresponsible at a time of falling oil prices.

Bennett's opposition also is based on the reality of declining oil revenues. "We are in the midst of declining revenues, and to bond and to get further into debt is ridiculous."

Knowles battles for bond issue

Times staff

Juneau — Anchorage is taking its bond issue fight down to the wire in the last two weeks of the legislative session, and to improve his odds Mayor Tony Knowles has sent 500 telegrams to community and business leaders statewide, asking for their support.

Knowles will return to Juneau this week for more meetings with lawmakers as he tries to enlist support for a special election this fall to vote on $350 million in statewide capital improvement bonds.

He is also taking his plea directly to the people of Anchorage. Today and later this week, Knowles is scheduled to plant himself at busy intersections, where he will hand out letters asking the people of Anchorage to rally behind the bond issue and call their legislators urging its support.

Knowles warns that without bonding, there will not be enough money in the state's capital budget to fund the city's top priority projects.

"Our accelerated road plan and Eklutna water project are hanging in the balance. Your help will make the difference," his letter states. "Nineteen projects including West Northern Lights, Lake Otis, Boniface, Eagle River Hiland Road Bridge, Spenard Road and the Eklutna Water Project — all will only be partially funded or entirely left out unless we let our legislators and governor know that these needs are now."

"It's time for us to stand up for Anchorage. Send your message to Juneau today — or by Wednesday at the latest — expressing your support for our back-to-basics bond package to be voted on this fall. Legislative Information Office, 278-3668, will send your message free."

The telegrams ask community leaders "to join in the effort to get the bond issue," said Chip

See Bond, page B-4

Bond issue battle

Continued from page B-1

Dennerlein, intergovernmental affairs director for Anchorage.

Dennerlein said the mayor will join forces in Juneau this week with bond market experts from Alaska and the Lower 48, invited to the Capitol by the city, and will attempt to prove to lawmakers that the state can afford to sell more bonds without harming Alaska's bond rating or its future economy.

Rep. Red Boucher, D-Anchorage, a leading booster for a special bond issue election this fall, said he believes holding the vote in a non-election year would "raise the level of debate" above politics.

Boucher believes a vote this fall would provide legislators with an indication of public opinion on future financial management of the state.

"Let those who want to break open the Permanent Fund (instead of selling bonds) bring it to the people," Boucher said.

RE: SB 373

This bill adds a new section to AS 19.15. This section requires that a policy committee be established for cities in the state with a population of 200,000 or more which must have a metropolitan planning organization in order to receive federal capital or operating assistance under 23 U.S.C. 134 or 49 U.S.C. 1607.

Subsection (b) outlines how many members will be on the committee and what groups will be represented. Two members shall be elected municipal officials; two members, representing the house and senate, who are members of either their respective transportation or finance committees; the commissioner of the Department of Transportation and Public Facilities; and one member of the citizen transportation advisory committee.

Subsection (c) states that the policy committee set up in (a) and (b) shall appoint a citizen transportation advisory committee. This committee shall be made up of persons residing in the urbanized area subject to the metropolitan planning organization. These members are to reflect the communities' opinion on transportation issues.

Subsection (d) states that the committee shall set internal procedures relating to public and the citizen transportation advisory committee input on all issues, policies, plans and programs addressed, prepared or endorsed by the municipal planning organization.

MEMORANDUM

TO: Members of the Senate Transportation Committee

FROM: Senator Jan Faiks

SUBJECT: Background on Senate Bill 373, an Act Relating to Metropolitan Planning Organizations

As a condition of receiving Federal highway funds, urban areas with populations of 200,000 or more are required to establish a metropolitan planning organization. The purpose of this organization is to ensure that highway funds are spent according to a continuing, cooperative, and comprehensive transportation planning process.

Transportation in the Anchorage area is the responsibility of the Anchorage Metropolitan Area Transportation Study, or "AMATS". The AMATS consists of a policy committee which is comprised of the Mayor, the Commissioner of the Department of Transportation and Public Services, and one Assembly member. Although there is an advisory component through a subcommittee of the Planning and Zoning Commission, it appears that its ability to effectively represent public opinion before the policy committee is limited.

In the planning process, it is important that members of the planning organization represent a wide cross section of community interests. In addition, the organization should seek and be guided by public input. The planning of new road construction and improvement is too important to be delegated to a few administrators who may be insulated from the public's priorities.

Senate Bill 373 will require that the planning organization establish a policy committee and that this committee

OUT OF SESSION
1024 WEST SIXTH AVENUE, SUITE 302 ANCHORAGE, ALASKA 99501 907-274-6611

appoint a local citizen's advisory group. The six member committee will be composed of two representatives of local government, two local state legislators who are members of their respective finance or transportation committees, the Commissioner of Transportation and Public Facilities, and a member of the citizen's advisory group.

Finally, the bill requires that the policy committee adopt internal procedures which will insure that it solicits and considers public opinion when making policy or planning decisions.

Simply stated, Senate Bill 373 will insure that our transportation planning process responds to the people that it serves.

Thank you.

FROM: Committee Staff

RE: SB 373

Today the committee will take up two committee substitutes on SB 373.

The following is an analysis that outlines the differences between the committee substitutes, labeled versions 1 and 2, and the original bill.

Sec. 1 (a) of the original bill established a metropolitan planning organization in an urbanized area having a population of 200,000 or more. Presently, Anchorage under federal census figures does not have a population of 200,000.

Version 1 lowers this figure to 50,000. Version 2 lowers this to 100,000.

Subsection (b) in the original bill required the policy committee to have six members, one being a member selected by the citizen transportation advisory committee.

Both Version 1 and 2 delete this provision, but do require a membership comprised of two members who are principal elected officials of municipalities, two members representing the house and senate and one member representing the Department of Transportation and Public Facilities as in the original bill.

Subsections (c) and (d) remain unchanged.

RECEIVED FEB 2 5 1986

Sen. Jan Faiks
Pouch V
Juneau, Alaska 99811

Re: SB373, Metropolitan Planning Organizations

Dear Sen. Faiks:

This letter is a follow-up to our discussions regarding SB373 and my testimony on the bill in the Senate Transportation Committee. I have discussed with the Mayor the practical and policy implications of the legislation. As I said before the Committee, the legislation was reviewed from the perspective of constructive criticism, setting forth any problems perceived with the proposed approach, while recognizing that there is also benefit in the proposal. This is the spirit in which I offer the following comments:

. The need for the legislation. There are two important points here. First, I want to stress again that AMATS is working in its present form. While there is always room for improvement in any process, the proof is in the pavement. The systemwide approach which we have taken in AMATS over the past several years has resulted in an unprecedented transportation improvement program for the Anchorage area. Not only has this helped federal aid road construction. The process has helped us determine which roads should be more properly constructed with state and local dollars and where the local government should have project management authority. For the first time that I can recall, the Transportation Improvement Program for AMATS matches the Anchorage Assembly capital budget request, which also matches the Governor's proposed capital budget. This is the kind of consistency that results in effective transportation improvements and which can be understood by the public. The second point is that we do see merit in codifying metropolitan planning organizations in state law. Many other states have taken this step, and it would be appropriate for Alaska to do the same.

. Public Participation. This is one of the most important elements of the transportation planning process, and one which we have sought to improve over the past several years. Our major step in this regard has been to establish the AMATS Citizen Advisory Committee as a subcommittee of the Planning and Zoning Commission. This has proven to be a very effective step for several reasons. There is a strong relationship between transportation and land use. People

view transportation improvement in terms of where a road will take them, and how that road may affect their own neighborhood. Citizens are used to discussing land and neighborhood issues in the Planning and Zoning Commission forum, and do not relate as well to a separate citizen committee. Citizen input to AMATS through the Planning and Zoning Commission model has been a more accurate and effective reflection of neighborhood concerns. In addition, the Urban Design Commission has recently been invited to participate in the AMATS Technical Committee forum. We feel strongly that these are the proper forums for direct citizen participation. Each of the members of the Policy Committee as presently constituted is an elected official or directly accountable to an elected official. Your bill proposes legislative representation on the Policy Committee. A legislator would also be directly accountable to the public at large as an elected official. An appointed citizen member would carry equal weight in the Policy Committee decisions, but not equal accountability. This is an imbalance. A separate appointed citizen should not be a member of the Policy Committee.

. Legislative Participation. This is a sensitive area, and there are pros and cons. Legislative participation varies among jurisdictions throughout the country. On the negative side, each of the members of the existing Policy Committee has the ability to plan and program federal funds, but does not participate in the appropriation process. The Legislature appropriates federal receipts. While this may appear awkward at times, it also represents an effective check-and-balance. If a legislator or legislators were to serve on the Policy Committee, that member or members would have the unique ability to operate in both worlds, participating in both the planning and appropriation decisions. In essence, they would have greater standing in the transportation program than other members of the Policy Committee. On the positive side, it could be helpful to have a member or members of the Legislature with detailed knowledge of the AMATS process and the decisions which led to the budgets ultimately proposed to the Legislature. This is a judgment call. While we feel AMATS works, we can accept some legislative participation. However, participation should be limited to one member of the Legislature. Membership should alternate between House and Senate. The legislator should be a member of the Transportation Committee of either the House or Senate. Under this arrangement, the Policy Committee would be constituted of four officials - one member of the local assembly, one member of the legislative delegation from the local planning area, the mayor, and the Governor's designee (Commissioner of the Department of Transportation). This would appear to represent a balance. Even numbers are not a problem. Tie votes would lose. One other point is significant. Many AMATS decisions are made in the spring while the Legislature is in session. It is essential that a legislative member of the Policy Committee be present personally, and not a substitute in the person of a staffer. Many of the major transportation decisions we face are sensitive. Rather than improving the public process in confidence, we would leave ourselves wide open for criticism if major policy votes were made in absentia.

. Effect Upon Various Municipalities. As stated above, there is merit in codifying in state law the state/local planning process. There is legitimate debate concerning any change to the make-up of the present committees. However, it would be a serious mistake to codify the planning process in a way which separates Anchorage from the rest of the State. Any change in the make-up of local planning organization policy committees should at least apply to the major urban areas in the three transportation regions of the State (southern, central and north). On this point, we are firm. The federal government may have "cut-off numbers" which distinguish Anchorage or only Anchorage and Fairbanks as urban areas. This argument does not hold water in Alaska. As we often note, Alaska is unique. Alaska, in fact, has exemptions in federal highway law. Any legislation we craft should fit Alaska's situation, not be based on a cookie cutter from the Potomac, even though that's the source of the dough. Juneau, for example, receives FAUS funds, has a public transit system, and has an air quality plan. The State should not mandate a planning organization for its capital city differing from that mandated for other urban areas. In summary, while AMATS is working, we can support SB373 with certain amendments as recommended above.

Thank you for the opportunity to comment. I look forward to working with you. If you have any further questions, please call on me.

Sincerely,

Chip Dennerlein

§ 134. Transportation planning in certain urban areas

It is declared to be in the national interest to encourage and promote the development of transportation systems, embracing various modes of transport in a manner that will serve the States and local communities efficiently and effectively. To accomplish this objective the Secretary shall cooperate with the States, as authorized in this title, in the development of long-range highway plans and programs which are properly coordinated with plans for improvements in other affected forms of transportation and which are formulated with due consideration to their probable effect on th future development of urban areas of more than fifty thousand population. After July 1, 1965, the Secretary shall not approve under section 105 of this title any program for projects in any urban area of more than fifty thousand population unless he finds that such projects are based on a continuing comprehensive transportation planning process carried on cooperatively by States and local communities in conformance with the objectives stated in this section. Added Pub.L. 87-866, § 9(a), Oct. 23, 1962, 76 Stat. 1148.

Historical Note

Legislative History: For legislative history and purpose of Pub.L. 87-866, see 1962 U.S.Code Cong. and Adm.News, p. 3933.

(1) In the case of transfers under paragraph (1), the total of all transfers during any fiscal year to any apportionment shall not increase the original amount of such apportionment for such fiscal year by more than 50 per centum. Not more than 50 per centum of the original amount of an apportionment for any fiscal year shall be transferred to other apportionments.

(2) In the case of transfers under paragraph (2), the total of all transfers during any fiscal year to any apportionment shall not increase the original amount of such apportionment for such fiscal year by more than 50 per centum. Not more than 50 per centum of the original amount of an apportionment for any fiscal year shall be transferred to other apportionments.

(3) No transfer shall be made from an apportionment during any fiscal year if during such fiscal year a transfer has been made to such apportionment.

(4) No transfer shall be made to an apportionment during any fiscal year if during such fiscal year a transfer has been made from such apportionment.

(e) On October 1 of each fiscal year the Secretary shall certify to each of the State highway departments the sums which he has apportioned hereunder (other than under subsection (b)(5) of this section) to each State for such fiscal year, and also the sums which he has deducted for administration and research pursuant to subsection (a) of this section. On October 1 of the year preceding the fiscal year for which authorized, the Secretary shall certify to each of the State highway departments the sums which he has apportioned under subsection (b)(5) of this section to each State for such fiscal year, and also the sums which he has deducted for administration and research pursuant to subsection (a) of this section. To permit the States to develop adequate plans for the utilization of apportioned sums, the Secretary shall advise each State of the amount that will be apportioned each year under this section not later than ninety days before the beginning of the fiscal year for which the sums to be apportioned are authorized, except that in the case of the Interstate System the Secretary shall advise each State ninety days prior to the apportionment of such funds.

(f)(1) On October 1 of each fiscal year, the Secretary, after making the deductions authorized by subsection (a) of this section, shall set aside not to exceed one-half per centum of the remaining funds authorized to be appropriated for expenditure upon the Federal-aid systems, for the purpose of carrying out the requirements of section 134 of this title, except that in the case of funds authorized for apportionment on the Interstate System, the Secretary shall set aside that portion of such funds (subject to the overall limitation of one-half of 1 per centum) on October 1 of the year next preceding the fiscal year for which such funds are authorized for such System.

(2) These funds shall be apportioned to the States in the ratio which the population in urbanized areas or parts thereof, in each State bears to the total population in such urbanized areas in all the States as shown by the latest available census, except that no State shall receive less than one-half per centum of the amount apportioned.

(3) The funds apportioned to any State under paragraph (2) of this subsection shall be made available by the State to the metropolitan planning organizations designated by the State as being responsible for carrying out the provisions of section 134 of this title, except that States receiving the minimum apportionment under paragraph (2) may, in addition, subject to the approval of the Secretary, use the funds apportioned to finance transportation planning outside of urbanized areas. These funds shall be matched in accordance with section 120 of this title unless the Secretary determines that the interests of the Federal-aid highway program would be best served without such matching.

(4) The distribution within any State of the planning funds made available to agencies under paragraphs (3) of this subsection shall be in accordance with a formula developed by each State and approved by the Secretary which shall consider, but not necessarily be limited to, population, status of planning, and metropolitan area transportation needs.

(g) Not more than 40 per centum of the amount apportioned in any fiscal year to each State in accordance with sections 144, 152, and 153 of this title, or section 203(d) of the Highway Safety Act of 1973, may be transferred from the apportionment under one section to the apportionment under any other of such sections if such a transfer is requested by the State highway department and is approved by the Secretary as being in the public interest. The Secretary may approve the transfer of 100 per centum of the apportionment under one such section to the apportionment

IN THE SENATE BY THE TRANSPORTATION COMMITTEE

CS FOR SENATE BILL NO. 373 (Transportation)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to metropolitan planning organizations."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 19.15 is amended by adding a new section to read:

Sec. 19.15.025. METROPOLITAN TRANSPORTATION PLANNING ORGANIZATIONS. (a) A metropolitan planning organization established in an urbanized area with a population of 50,000 or more shall include a policy committee.

(b) The policy committee consists of two members who are principal elected officials of municipalities in the urbanized area; a legislator representing a district within the urbanized area who is a member of the house transportation committee or house finance committee appointed by the speaker of the house of representatives; a legislator representing a district within the urbanized area who is a member of the senate transportation committee or senate finance committee appointed by the president of the senate; and the commissioner of the Department of Transportation and Public Facilities or the commissioner's designee.

(c) The policy committee shall appoint a citizen transportation advisory committee of persons residing in the urbanized area subject to the metropolitan planning organization. The membership of the citizen transportation advisory committee shall represent the breadth of community opinion on issues of urban transportation planning and development.

(d) The policy committee shall adopt internal procedures to govern the conduct of business by the municipal planning organization, including the procedure to solicit, receive, and consider comments from the public and the citizen transportation advisory committee on all issues, policies, plans, and programs addressed, prepared, or endorsed by the municipal planning organization.

Historical Note

Legislative History: For legislative history and purpose of Pub.L. 87-866, see 1962 U.S.Code Cong. and Adm.News, p. 3938.

(1) In the case of transfers under paragraph (1), the total of all transfers during any fiscal year to any apportionment shall not increase the original amount of such apportionment for such fiscal year by more than 50 per centum. Not more than 50 per centum of the original amount of an apportionment for any fiscal year shall be transferred to other apportionments.

(2) In the case of transfers under paragraph (2), the total of all transfers during any fiscal year to any apportionment shall not increase the original amount of such apportionment for such fiscal year by more than 50 per centum. Not more than 50 per centum of the original amount of an apportionment for any fiscal year shall be transferred to other apportionments.

(3) No transfer shall be made from an apportionment during any fiscal year if during such fiscal year a transfer has been made to such apportionment.

(4) No transfer shall be made to an apportionment during any fiscal year if during such fiscal year a transfer has been made from such apportionment.

(e) On October 1 of each fiscal year the Secretary shall certify to each of the State highway departments the sums which he has apportioned hereunder (other than under subsection (b)(5) of this section) to each State for such fiscal year, and also the sums which he has deducted for administration and research pursuant to subsection (a) of this section. On October 1 of the year preceding the fiscal year for which authorized, the Secretary shall certify to each of the State highway departments the sums which he has apportioned under subsection (b)(5) of this section to each State for such fiscal year, and also the sums which he has deducted for administration and research pursuant to subsection (a) of this section. To permit the States to develop adequate plans for the utilization of apportioned sums, the Secretary shall advise each State of the amount that will be apportioned each year under this section not later than ninety days before the beginning of the fiscal year for which the sums to be apportioned are authorized, except that in the case of the Interstate System the Secretary shall advise each State ninety days prior to the apportionment of such funds.

(f)(1) On October 1 of each fiscal year, the Secretary, after making the deduction authorized by subsection (a) of this section, shall set aside not to exceed one-half per centum of the remaining funds authorized to be appropriated for expenditure upon the Federal-aid systems, for the purpose of carrying out the requirements of section 134 of this title, except that in the case of funds authorized for apportionment on the Interstate System, the Secretary shall set aside that portion of such funds (subject to the overall limitation of one-half of 1 per centum) on October 1 of the year next preceding the fiscal year for which such funds are authorized for such System.

(2) These funds shall be apportioned to the States in the ratio which the population in urbanized areas or parts thereof, in each State bears to the total population in such urbanized areas in all the States as shown by the latest available census, except that no State shall receive less than one-half per centum of the amount apportioned.

(3) The funds apportioned to any State under paragraph (2) of this subsection shall be made available by the State to the metropolitan planning organizations designated by the State as being responsible for carrying out the provisions of section 134 of this title, except that States receiving the minimum apportionment under paragraph (2) may, in addition, subject to the approval of the Secretary, use the funds apportioned to finance transportation planning outside of urbanized areas. These funds shall be matched in accordance with section 120 of this title unless the Secretary determines that the interests of the Federal-aid highway program would be best served without such matching.

(4) The distribution within any State of the planning funds made available to agencies under paragraphs (3) of this subsection shall be in accordance with a formula developed by each State and approved by the Secretary which shall consider, but not necessarily be limited to, population, status of planning, and metropolitan area transportation needs.

(g) Not more than 40 per centum of the amount apportioned in any fiscal year to each State in accordance with sections 144, 152, and 153 of this title, or section 203(d) of the Highway Safety Act of 1973, may be transferred from the apportionment under one section to the apportionment under any other of such sections if such a transfer is requested by the State highway department and is approved by the Secretary as being in the public interest. The Secretary may approve the transfer of 100 per centum of the apportionment under one such section to the apportionmen

al of federal bureau of roads. Singletary v. Heathman, Tex.Civ.App.1927, 300 S.W. 242.

6. Change of location of highway

To secure federal aid, highway commission could change location of highway not of higher type so as to miss towns through which statute specified highway should run. Logan v. Matthews, 1932, 52 S.W.2d 989, 330 Mo. 1213.

7. Removal and substitution

Former section 6 of this title did not prohibit agreement between federal and state officials to remove a highway from federal aid system, when only small segments thereof were constructed or reconstructed with federal funds, and the substitution of some other approved public improvement in lieu thereof by mutual agreement. Bogart v. Westchester County, 1945, 57 N.Y.S.2d 506, 185 Misc. 561, affirmed 59 N.Y.S.2d 77, 270 App.Div. 274, appeal denied 68 N.E.2d 36, 295 N.Y. 934, appeal dismissed 70 N.E.2d 531, 296 N.Y. 701.

8. Modification of contract

The approval and consent to application of appropriated federal funds to the construction of a given highway, and agreement of state, in turn, to pay maintenance costs of that highway, constitutes a contract between federal and state governments which may be modified by mutual agreement. Bogart v. Westchester County, 1945, 57 N.Y.S.2d 506, 185 Misc. 561, affirmed 59 N.Y.S.2d 77, 270 App.Div. 274, appeal denied 68 N.E.2d 36, 295 N.Y. 934, appeal dismissed 70 N.E.2d 531, 296 N.Y. 701.

9. Review

Action by State Superintendent of Public Works designating site of portion of federal aid highway system was legislative in character and could not be reviewed under statute, Civil Practice Act, § 1283 et seq., authorizing review of determinations of administrative bodies. Brown v. McMorran, 1903, 241 N.Y.S.2d 483, 39 Misc.2d 716.

Inasmuch as it was not asserted that petitioners seeking review of designation of site of portion of federal aid highway system had any interest not common to all residents of county or to all owners of property in portion of county through which proposed highway would pass, petitioners did not have sufficient standing to bring proceeding. Id.

Private citizens were not entitled to decision on constitutional questions relating to validity of designation of site of portion of federal aid highway system by State Superintendent of Public Works, in absence of special injury or damage to their personal or property rights. Id.

§ 104. Apportionment

(a) Whenever an apportionment is made of the sums authorized to be appropriated for expenditure upon the Federal-aid systems, the Secretary shall deduct a sum, in such amount not to exceed 3¾ per centum of all sums so authorized, as the Secretary may deem necessary for administering the provisions of law to be financed from appropriations for the Federal-aid systems and for carrying on the research authorized by subsections (a) and (b) of section 307 of this title. In making such determination, the Secretary shall take into account the unexpended balance of any sums deducted for such purposes in prior years. The sum so deducted shall be available for expenditure from the unexpended balance of any appropriation made at any time for expenditure upon the Federal-aid systems, until such sum has been expended.

(b) On or before January 1 next preceding the commencement of each fiscal year, except as provided in paragraphs (4) and (5) of this subsection, the Secretary, after making the deduction authorized

by subsection (a) of this section, shall apportion the remainder of the sums authorized to be appropriated for expenditure upon the Federal-aid systems for that fiscal year, among the several States in the following manner:

(1) For the Federal-aid primary system:

One-third in the ratio which the area of each State bears to the total area of all the States; one-third in the ratio which the population of each State bears to the total population of all the States as shown by the latest available Federal census; one-third in the ratio which the mileage of rural delivery routes and star routes in each State bears to the total mileage of rural delivery and star routes in all the States at the close of the next preceding calendar year, as shown by a certificate of the Postmaster General, which he is directed to make and furnish annually to the Secretary. No State shall receive less than one-half of 1 per centum of each year's apportionment.

(2) For the Federal-aid secondary system:

One-third in the ratio which the area of each State bears to the total area of all the States; one-third in the ratio which the rural population of each State bears to the total rural population of all the States as shown by the latest available Federal census; and one-third in the ratio which the mileage of rural delivery and star routes, certified as above provided, in each State bears to the total mileage of rural delivery and star routes in all the States. No State shall receive less than one-half of 1 per centum of each year's apportionment.

(3) For extensions of the Federal-aid primary and Federal-aid secondary systems within urban areas:

In the ratio which the population in municipalities and other urban places of five thousand or more in each State bears to the total population in municipalities and other urban places of five thousand or more in all the States as shown by the latest available Federal census.

(4) For the Interstate System, for the fiscal years ending June 30, 1957, June 30, 1958, and June 30, 1959:

One-half in the ratio which the population of each State bears to the total population of all the States as shown by the latest available Federal census, except that no State shall receive less than three-fourths of 1 per centum of the funds so apportioned; and one-half in the manner provided in paragraph (1) of this subsection. The sums authorized by section 108(b) of the Federal-Aid Highway Act of 1956 for the fiscal years ending June 30, 1958, and June 30, 1959, shall be apportioned on a date not

less than six months and not more than twelve months in advance of the beginning of the fiscal year for which authorized.

(5) For the Interstate System for the fiscal years 1960 through 1971:

For the fiscal years 1960 through 1966, in the ratio which the estimated cost of completing the Interstate System in such State, as determined and approved in the manner provided in this paragraph, bears to the sum of the estimated cost of completing the Interstate System in all of the States. For the fiscal years 1967 through 1971, in the ratio which the Federal share of the estimated cost of completing the Interstate System in such State, as determined and approved in the manner provided in this paragraph, bears to the sum of the estimated cost of the Federal share of completing the Interstate System in all of the States. Each apportionment herein authorized for the fiscal years 1960 through 1971, inclusive, shall be made on a date as far in advance of the beginning of the fiscal year for which authorized as practicable but in no case more than eighteen months prior to the beginning of the fiscal year for which authorized. As soon as the standards provided for in subsection (b) of section 109 of this title have been adopted, the Secretary, in cooperation with the State highway departments, shall make a detailed estimate of the cost of completing the Interstate System as then designated, after taking into account all previous apportionments made under this section, based upon such standards and in accordance with rules and regulations adopted by him and applied uniformly to all of the States. The Secretary shall transmit such estimates to the Senate and the House of Representatives within ten days subsequent to January 2, 1958. Upon approval of such estimate by the Congress by concurrent resolution, the Secretary shall use such approved estimate in making apportionments for the fiscal years ending June 30, 1960, June 30, 1961, and June 30, 1962. The Secretary shall make a revised estimate of the cost of completing the then designated Interstate System, after taking into account all previous apportionments made under this section, in the same manner as stated above, and transmit the same to the Senate and the House of Representatives within ten days subsequent to January 2, 1961. Upon approval of such estimate by the Congress by concurrent resolution, the Secretary shall use such approved estimate in making apportionments for the fiscal years ending June 30, 1963, June 30, 1964, June 30, 1965, and June 30, 1966. The Secretary shall make a revised estimate of the cost of completing the then designated Interstate System, after taking into account all previous apportionments made under this

section, in the same manner as stated above, and transmit the same to the Senate and the House of Representatives within ten days subsequent to January 2, 1965. Upon the approval of such estimate by the Congress, the Secretary shall use the Federal share of such approved estimate in making apportionments for the fiscal years ending June 30, 1967; June 30, 1968; and June 30, 1969. The Secretary shall make a revised estimate of the cost of completing the then designated Interstate System after taking into account all previous apportionments made under this section, in the same manner as stated above, and transmit the same to the Senate and the House of Representatives within ten days subsequent to January 2, 1968. Upon the approval by the Congress, the Secretary shall use the Federal share of such approved estimate in making apportionments for the fiscal year ending June 30, 1970. The Secretary shall make a final revised estimate of the cost of completing the then designated Interstate System after taking into account all previous apportionments made under this section, in the same manner as stated above, and transmit the same to the Senate and the House of Representatives within ten days subsequent to January 2, 1969. Upon the approval by the Congress, the Secretary shall use the Federal share of such approved estimate in making apportionments for the fiscal year ending June 30, 1971. Whenever the Secretary, pursuant to this subsection, requests and receives estimates of cost from the State highway departments, he shall furnish copies of such estimates at the same time to the Senate and the House of Representatives.

(c) Not more than 20 per centum of the amount apportioned in any fiscal year, commencing with the apportionment of funds authorized to be appropriated under subsection (a) of section 102 of the Federal-Aid Highway Act of 1956 (70 Stat. 374), to each State in accordance with paragraphs (1), (2), or (3) of subsection (b) of this section may be transferred from the apportionment under one paragraph to the apportionment under any other of such paragraphs if such a transfer is requested by the State highway department and is approved by the Governor of such State and the Secretary as being in the public interest. The total of such transfers shall not increase the original apportionment under any of such paragraphs by more than 20 per centum. Nothing contained in this subsection shall alter or impair the authority contained in subsection (d) of this section.

(d) Any funds which are apportioned under paragraph (2) of subsection (b) of this section for the Federal-aid secondary system to a State in which all public roads and highways are under the control and supervision of the State highway department may, if the State highway department and the Secretary jointly agree that such funds

ot needed for the Federal-aid secondary system, be expended for cts on another Federal-aid system.

On or before January 1 preceding the commencement of each l year, the Secretary shall certify to each of the State highway tments the sums which he has apportioned hereunder to each for such fiscal year, and also the sums which he has deducted dministration and research pursuant to subsection (a) of this n. Pub.L. 85–767, Aug. 27, 1958, 72 Stat. 889; Pub.L. 86–70, e) (2), June 25, 1959, 73 Stat. 146; Pub.L. 86–657, § 8(g), July 960, 74 Stat. 525; Pub.L. 87–866, § 10(a), Oct. 23, 1962, 76 Stat. Pub.L. 88–157, §§ 2, 3, Oct. 24, 1963, 77 Stat. 276; Pub.L. 88– 4(a), Aug. 13, 1964, 78 Stat. 397.

Historical Note

ences in Text. Section 108(b) of leral-Aid Highway Act of 1956, re- to in subsec. (b) (4), is set out ote under section 101 of this title.

ction (a) of section 102 of the l-Aid Highway Act of 1956 (70 71), referred to in subsec. (c), is as a note under this section.

Amendment. Subsec. (b) (5). 88–423 substituted "January 2. r "January 2, 1962."

Amendment. Subsec. (b) (3). 88–157, § 2, eliminated provision considered Connecticut and Ver- owns as municipalities for the pur- f par. (3) regardless of their in- ted status.

e. (b) (5). Pub.L. 88-157, § 3, ted "1971" for "1969" in the in- ory phrase and the third sen- inserted the phrase "For the fis- s 1969 through 1966," and substi- such State" for "each State" in t sentence; inserted the second respecting apportionment for ears 1967 through 1971; substi- the ninth sentence "January 2, r "January 2, 1966, and annually er through and including January ; substituted in the tenth sen- pon the approval of such estimate Congress" for "Upon approval of h estimate by the Congress by nt resolution" and "fiscal years June 30, 1967; June 30, 1968; and . 1969" for "fiscal year which be- xt following the fiscal year in uch report is transmitted to the nd the House of Representatives" erted "the Federal share of" pre- ceding "such approved estimate"; and inserted the eleventh through fourteenth sentences, respecting revised cost estimate for completion of the Interstate System and its submission to Congress within ten days after Jan. 2, 1968, apportionment for fiscal year ending June 30, 1970, final revised cost estimate for completion of the Interstate System and its submission to Congress within ten days after Jan. 2, 1969, and apportionment for fiscal year ending June 30, 1971, respectively.

1962 Amendment. Subsec. (b) (1). Pub. L. 87-866 substituted "preceding calendar year" for "preceding fiscal yea ."

1960 Amendment. Subsec. (b). Pub.L. 86–657 eliminated provisions from par. (5) which required, in making the estimates of cost for completing the Interstate System, exclusion of the cost of completing any mileage designated from the one thousand additional miles authorized by section 108(1) of the Federal-Aid Highway Act of 1956.

1959 Amendment. Subsec. (b). Pub.L. 86-70 eliminated words ", except that only one-third of the area of Alaska shall be included" following "total area of all the States" in pars. (1) and (2).

Effective Date of 1962 Amendment. Section 10(b) of Pub.L. 87-866 provided that: "The amendment made by subsection (a) of this section [to subsec. (b) (1) of this section] shall be applicable only with respect to apportionments made after the date of enactment of this Act [Oct. 23, 1962]."

Effective Date of 1959 Amendment. Amendment of subsec. (b) of this section

by Pub.L. 86-70 effective July 1, 1959, see note set out under section 101 of this title.

Short Title of 1963 Amendment. Section 1 of Pub.L. 88-157 provided: "That this Act [amending sections 104(b) (3), (5), 106(c), 109(b), 121(d), 131(c) and 307 (c) (1) of this title] may be cited as the 'Federal-Aid Highway Amendments Act of 1963'."

Short Title. Section 1 of Pub.L. 86-657 provided that Pub.L. 86-657, which is classified in part to this section and to sections 114, 120, 129, 132, 203, 205, 210 and 305 of this title, may be cited as the "Federal Highway Act of 1960."

Section 102(a) of the Federal-Aid Highway Act of 1956. Subsection (a) of section 102 of Act June 29, 1956, c. 462, Title I, 70 Stat. 374, provided that:

"(a) (1) For the purpose of carrying out the provisions of the Federal-Aid Road Act approved July 11, 1916, and all Acts amendatory thereof and supplementary thereto, there is authorized to be appropriated for the fiscal year ending June 30, 1957, $125,000,000 in addition to any sums heretofore authorized for such fiscal year; the sum of $850,000,000 for the fiscal year ending June 30, 1958; and the sum of $875,000,000 for the fiscal year ending June 30, 1959. The sums herein authorized for each fiscal year shall be available for expenditure as follows:

"(A) 45 per centum for projects on the Federal-aid primary highway system.

"(B) 30 per centum for projects on the Federal-aid secondary highway system.

"(C) 25 per centum for projects on extensions of these systems within urban areas.

"(2) The sums authorized by this section shall be apportioned among the several States in the manner now provided by law and in accordance with the formulas set forth in section 4 of the Federal-Aid Highway Act of 1944, approved December 20, 1944: Provided, That the additional amount herein authorized for the fiscal year ending June 30, 1957, shall be apportioned immediately upon enactment of this Act [June 29, 1956]."

Approval of Estimate of Cost of Completing the Interstate System as Basis for Apportionment of Funds for Fiscal Years 1963–1966. Section 102 of Pub.L. 87-61, Title I, June 29, 1961, 75 Stat. 122, provided that: "The estimate of cost of completing the Interstate System in each State, transmitted to the Congress on January 11, 1961, by the Secretary of Commerce pursuant to the provisions of section 104(b) (5) of title 23, United States Code [subsec. (b) (5) of this section], and published as House Document Numbered 49, Eighty-seventh Congress, first session, is hereby approved as the basis for making the apportionment of the funds authorized for the Interstate System for the fiscal years ending June 30, 1963, 1964, 1965, and 1966."

Approval of Estimate of Cost of Completing the Interstate System as Basis for Apportionment of Funds for Fiscal Years 1960–1962. Section 8 of Pub.L. 85-381, Apr. 16, 1958, 72 Stat. 94, as amended by Pub.L. 85-699, § 1, Sept. 2, 1958, 72 Stat. 1725; Pub.L. 86-342, Title I, § 103, Sept. 21, 1959, 73 Stat. 611, provided that: "The estimate of cost of completing the Interstate System in each State, transmitted to the Congress on January 7, 1958, by the Secretary of Commerce pursuant to the provisions of section 105(d) of the Act approved June 29, 1956 (70 Stat. 374), and published as House Document Numbered 300, Eighty-fifth Congress, second session, is hereby approved as the basis for making the apportionment of the funds authorized for the Interstate System for the fiscal years ending June 30, 1960, 1961, and 1962".

Apportionment Factors for Expenditures on National System of Interstate and Defense Highways for Fiscal Year 1967. Pub.L. 89-139, § 2, Aug. 28, 1965, 79 Stat. 578, provided that: "The Secretary of Commerce is authorized to make the apportionment for the fiscal year ending June 30, 1967, of the sum authorized to be appropriated for such year for expenditures on the National System of Interstate and Defense Highways, using the apportionment factors contained in table 5 of House Document Numbered 42, Eighty-ninth Congress, but the Congress reserves the right to disapprove the cost estimate for completion of such National System submitted by the Secretary on January 11, 1965, and contained in such document."

Apportionments for Subsequent Years Based on Revised Estimates of Cost. Section 108(d) of Act June 29, 1956, c. 462, Title I, 70 Stat. 378, as amended by Pub. L. 85-699, § 2, Sept. 2, 1958, 72 Stat. 1725, provided that: "All sums authorized by this section to be appropriated for the fiscal years 1960 through 1969, inclusive,

shall be apportioned among the several States in the ratio which the estimated cost of completing the Interstate System in each State, as determined and approved in the manner provided in this subsection, bears to the sum of the estimated cost of completing the Interstate System in all of the States. Each apportionment herein authorized for the fiscal years 1960 through 1969, inclusive, shall be made on a date as far in advance of the beginning of the fiscal year for which authorized as practicable but in no case more than eighteen months prior to the beginning of the fiscal year for which authorized. As soon as the standards provided for in subsection (i) have been adopted, the Secretary of Commerce, in cooperation with the State highway departments, shall make a detailed estimate of the cost of completing the Interstate System as then designated, after taking into account all previous apportionments made under this section, based upon such standards and in accordance with rules and regulations adopted by him and applied uniformly to all of the States. The Secretary of Commerce shall transmit such estimate to the Senate and the House of Representatives within ten days subsequent to January 2, 1958. Upon approval of such estimate by the Congress by concurrent resolution, the Secretary of Commerce shall use such approved estimate in making apportionments for the fiscal years ending June 30, 1960, June 30, 1961, and June 30, 1962. The Secretary of Commerce shall make a revised estimate of cost of completing the then designated Interstate System, after taking into account all previous apportionments made under this section, in the same manner as stated above, and transmit the same to the Senate and the House of Representatives within ten days subsequent to January 2, 1961. Upon approval of such estimate by the Congress by concurrent resolution, the Secretary of Commerce shall use such approved estimate in making apportionments for the fiscal years ending June 30, 1963, June 30, 1964, June 30, 1965, and June 30, 1966. The Secretary of Commerce shall make a revised estimate of the cost of completing the then designated Interstate System, after taking into account all previous apportionments made under this section, in the same manner as stated above, and transmit the same to the Senate and the House of Representatives within ten days subsequent to January 2, 1966, and annually thereafter through and including January 2, 1968. Upon approval of any such estimate by the Congress by concurrent resolution, the Secretary of Commerce shall use such approved estimate in making apportionments for the fiscal year which begins next following the fiscal year in which such report is transmitted to the Senate and the House of Representatives. Whenever the Secretary of Commerce, pursuant to this subsection, requests and receives estimates of cost from the State highway departments, he shall furnish copies of such estimates at the same time to the Senate and the House of Representatives."

Legislative History: For legislative history and purpose of Pub.L. 86-70, see 1959 U.S.Code Cong. and Adm.News, p. 1575. See, also, Pub.L. 86-657, 1960 U.S. Code Cong. and Adm.News, p. 3159; Pub. L. 87-866, 1962 U.S.Code Cong. and Adm. News, p. 3068; Pub.L. 88-157, 1963 U.S. Code Cong. and Adm.News, p. 1027; Pub. L. 88-423, 1964 U.S.Code Cong. and Adm. News, p. 2708.

§ 105. Programs

(a) As soon as practicable after the apportionments for the Federal-aid systems have been made for any fiscal year, the State highway department of any State desiring to avail itself of the benefits of this chapter shall submit to the Secretary for his approval a program or programs of proposed projects for the utilization of the funds apportioned. The Secretary shall act upon programs submitted to him as soon as practicable after the same have been submitted. The Secretary may approve a program in whole or in part, but he shall not approve any project in a proposed program which is not located upon an approved Federal-aid system.

Position Paper

BILL NO: SB 373
HB 528

TITLE: An Act Relating to Metropolitan Planning Organizations

APPROVED: R. J. Knapp
Commissioner

DATE: February 11, 1986

In reviewing this bill, three key issues must be kept in mind: 1) the appropriateness of legislation to modify Policy Committee membership, 2) the desirability of including legislative and citizen representation on the committee and, 3) the technical aspects of the bill itself. This paper addresses these concerns.

Need for Legislation to Modify Committee Membership

The first issue to examine is the need for the legislation. The Code of Federal Regulation (CFR) 23 450.106(a) states "MPOs shall be made by agreement among the units of general purpose local government and the Governor." The current Governor's designation dated April 8, 1976 (copy attached) establishes a "three-person Policy Committee with two elected representatives - the Mayor and a Municipal Councilman, and the third member is the Commissioner of Highways." Based on the CFR and the language in the Governor's designation, it appears legislation is not required to amend membership in the AMATS Policy Committee. An amended Governor's designation could be used to change the policy committee composition and would provide a more flexible mechanism for future modifications than specific enacted legislation.

A question has also been raised by CFR references which indicate local governments shall agree to MPO representation. This could be interpreted to mean the local government must be agreeable to any proposed changes. However, FHWA has verbally indicated that "agreement" in this context means that the views of the local government have been considered in any decision making.

Desirability of Legislative/Citizen Representation

The second issue raised is the desirability of legislative and citizen representation. CFR 23 450.106(b) states "principal elected officials of general purpose local governments shall be represented on the MPO to the extent agreed to pursuant to paragraph (a) above". The intent of Congress when establishing MPO's was to provide local (city) governments a greater voice in the planning and programming of federal aid receipts. The addition of two legislators may be perceived by the local government as tipping the balance in the State's favor and outweighing local voices. However, proponents of legislative representation may argue legislators represent local interests as they are elected by a local constituency. The CFR only requires local government have a voice; voting control is not stipulated. Proponents may also argue state representation should be increased considering the number of state transportation facilities and the magnitude of State dollars appropriated to the Municipality. At present, only the State is authorized to construct facilities with federal aid dollars.

For further information call Susan Fleischhauer at 465-3900.

Other distinct advantages and disadvantages of legislative membership on the Policy Committee are as follows.

Advantages

1. Current regulations require both the local government and the Legislature to ultimately approve the expenditure of federal funds within the urbanized area. The local government must approve the expenditure of federal dollars, however, the Legislature must also authorize the State to receive and expend federal funds. Therefore, mutual cooperation between the local government and Legislature is necessary. Legislative representation on the Policy Committee could facilitate legislative approval of transportation capital budgets by:

   a. inducing closer legislative/local government cooperation
   b. increasing legislative familiarity and support of projects and their priorities.

2. The current MPO designation by the Governor is dated 1976. Since then Anchorage has grown immensely in size and complexity. Increased membership may be more representative of the complexities of the community. Legislative participation would increase the membership and provide a different community perspective.

Disadvantages

1. The Legislature has existing power to approve/disapprove the capital budget request as discussed above. Therefore, representation on the Policy Committee would be a duplication of legislative effort and involvement. Additionally, the branches of government should be kept separate to provide a check and balance system. Legislators on the Policy Committee would have the dual roles of both approving the planning document at the local level and then acting on funding decisions at the legislative level.

2. Coordination/attendance of meetings, particularly when the Legislature is in session could be difficult. The MPO is required to produce specific planning documents. Policy Committee meetings in April through June are critical to the timely submission of the annual Transportation Improvement Program (TIP) and the Unified Work Program (UWP).

3. In light of reduced funding, the expenses incurred and who pays for legislative travel to attend meetings while the Legislature is in session must be addressed. If the MPO is expected to pay travel costs and/or per diem, it will decrease monies available for planning.

4. Partisan politics may be difficult to avoid, particularly during election years. Officials currently on the Policy Committee are elected in a non-partisan manner. Given the existing political structure, legislative representation could create decision making delays.

A representative of the citizen Transportation Advisory Committee is also proposed for Policy Committee membership. This proposal varies significantly from the rest of the committee representation in that a citizen member would not be accountable to an elective body or a government agency. The existing members and the proposed legislative members by mandate represent a broad perspective. CFR 23 450.106(b) requires "principal officials of general purpose governments shall be represented on the MPO..." Elected officials are chosen by the public to represent the general citizenry and are accountable to their constituencies. The existing Policy Committee may wish to evaluate the role of public involvement in the AMATS process. However, legislation is not required to achieve this end and the existing Policy Committee could direct increased public involvement efforts. Other MPO's generally do not have citizen representatives on their policy committees.

Technical Problems with the Bill as Proposed

The last issue this paper addresses is the technical problems with the bill itself. They are as follows:

Page 1, line 12: Population of 200,000 or more - should read population of 50,000 or more which is consistent with the federal definition of an "urbanized" area. The 200,000 population is an important distinction in the distribution and reporting requirements of Urban Mass Transportation Act (UMTA) funds utilized by the Municipal Department of Transit. The population figure is determined by the decennial census.

Page 1, lines 15-26: This section establishes a six-member policy committee. Six voting members will not allow resolution of a split vote.

Page 2, lines 4, 5: Committee shall adopt internal procedures to govern the conduct of business - should read shall amend the Transportation Planning Operating Agreement which will govern the conduct of business...

Conclusions

In summary, and in consideration of the foregoing we have two overriding reservations:

1. Inclusion of State Legislators on a Municipal planning organization puts them in the positions of both proposal and disposal.

2. Inclusion of a private citizen, accountable to no particular group of organization, could be counter-productive.

However should the Legislature elect to proceed, such action could, with the approval of the Governor, be accomplished administratively.

April 8, 1976

Mr. Bruce Cannon, Chairman
Intermodal Planning Group
Department of Transportation
Federal Highway Administration
222 S. W. Morrison Street
Portland, Oregon 97204

Dear Mr. Cannon:

As a result of the unification election in September 1975 the City of Anchorage and the Greater Anchorage Area Borough combined into one governing entity, the Municipality of Anchorage. The approved boundaries of the urbanized area fall within the new boundaries. At this time, the State would like to designate the new Municipality of Anchorage as the Metropolitan Planning Organization (MPO), not only to reflect the political changes but to promote a planning process as responsive to the desires of local residents as possible.

The previous designation letter, sent to Mr. Butterfield by former Governor Egan on June 25, 1974, designated a representative membership of local government as the MPO. The designation will not affect the make-up of the bodies which establish the direction of transportation planning in the Anchorage area. The three-person Policy Committee has two elected representatives - the Mayor and a Municipal Councilman - and the third member is the Commissioner of Highways. The Technical Committee also has three voting members - the Municipal Planning Director, the Municipal Director of Transportation, and the State Department of Highways' District Engineer. As required by current regulations, this process will enable transportation planning to be carried out by the MPO in cooperation with the highway agency and the transit operator. The Highway Department has representation on both committees. Since the transit operation is a division of the Municipal Department of Transportation, it too, implicitly, has representation on these committees, though only implicitly. Also, the transit operator is an associate member of the Technical Committee.

RECEIVED
APR 12 1976
Commissioner's Office
Juneau, Alaska

As Anchorage has been designated an urbanized area for only two years, its transportation planning activities are still evolving, but it is felt that transferring the responsibility to the Municipality will hasten further development and improvement.

Sincerely,

Jay S. Hammond
Governor

Honorable Jay S. Hammond
Governor of Alaska
Juneau, Alaska 99801

Dear Governor Hammond:

Anchorage Urban Area, Designation of
Metropolitan Planning Organization

We acknowledge your April 8, 1976 designation of the Municipality of Anchorage as the Metropolitan Planning Organization (MPO) for the Anchorage urban area.

With this designation, the Municipality is the established eligible recipient of Department of Transportation planning funds for comprehensive urban transportation planning. Also the organization, together with the State, is responsible for conducting the metropolitan transportation planning program. The policy and technical committees structured by you and the Municipality are the means to fulfill this responsibility.

The U.S. Department of Transportation administrations in this region are looking forward to continuing their working relationship with the Municipality of Anchorage and the State on the Anchorage transportation/land use planning process.

Sincerely yours,

Bruce Cannon

DeVries introduces bill to pave way for new tunnel to Whittier

JUNEAU (AP) — A Whittier Toll Road Authority would be created under legislation introduced in the state Senate — potentially clearing the way for a $100-million tunnel to that Prince William Sound community.

The measure was introduced Sen. Edna DeVries, R-Palmer, who said it would amend Alaska law giving the proposed Knik Arm Crossing in Anchorage top billing for toll road money.

Under the bill, either or both projects would be funded depending upon the communities' ability to pay and meet legal criteria.

Building a new tunnel through Mount Maynard and paying for it with toll-road receipts would be a realistic alternative to public financing, DeVries said.

"Without such an alternative, facilities such as the Whittier road will fall victim to revenue declines," DeVries said Wednesday.

"Whittier is an ice-free port," she said. "Right now, only the Alaska Railroad tunnel provides land access to Whittier. Access is an important thing for economic development."

The resulting benefits from new tourism, transportation and fishing-related businesses would send economic ripples through the entire state, she said.

MEMORANDUM

TO: Committee Members

From: Committee Staff BL

Re: SB 374

The Senate Transportation Committee will be hearing SB 374 today, February 12. The purpose of the bill is to allow the Department of Transportation to set up toll facilities as part of its duties, to amend the Alaska Statutes dealing with toll facilities to include tunnels, and to amend the Statute dealing with the Knik Arm Crossing to include the Whittier Toll Road.

The City of Whittier contends that they are waiting for passage of this legislation before they can go ahead with plans to sell bonds to finance the Whittier Toll Road.

Section 1 of the bill amends the Powers of the Department Section of the Title 19 by adding the word "tunnels" to subsection 11, dealing with toll facilities.

Section 2 amends Title 37 (Public Finance) by adding the word "tunnel" to 37.15.720. This Subsection was added to allow for financing of the Knik Arm Crossing.

Section 3 amends Title 37 by including the Whittier Toll Road in the Section dealing with the order in which state toll facilities would be constructed. 37.15.730 currently states that the Knik Arm Crossing will be the first toll facility to be constructed by the Department of Transportation. SB 374 amends this Section by allowing the Whittier Toll Road to be one of the first <u>two</u> toll facilities.

Section 4 adds a new Subsection, the intent of the Subsection is to allow for one of the facilities to be built without the concurrence of the other project. The Section is mis-numbered in relation to the Statute and proposed amendment #1 is in your packet.

Section 5 is similar to Section 1, in that it adds the word tunnel to a Statute dealing with toll facilities. This Section is also mis-numbered and you will find proposed amendment #2 deals with that problem.

Unique — even in Alaska!

There was not enough time to get more info off to you today. Have to go to Anchorage Today on the train. If you cant get the information from other sources I will try to get it together next week if it is not too late.

Could we please have a membership list of the committee that you mentioned on the phone the other day

Thanks Dave,

PRESS RELEASE (January 29, 1986): SB 374

Senator Edna DeVries (R-District E) today submitted legislation that would amend Alaska State Statutes to allow for the establishing of the Whittier Toll Road authority and the construction of a new tunnel through Mt. Maynard. At this time, only the Alaska Railroad tunnel provides land access to Whittier.

The Statutes presently give the Knik Arm Crossing priority as the first State Toll Facility to be funded. DeVries' amendment stipulates that either or both project(s) may be funded depending upon the communities' abilities to meet the legal criteria for a comprehensive feasibility study and a financial plan for repaying the bonds with which the facility is funded.

DeVries feels that the Toll Authority may represent an alternative to direct funding of capital projects. Without such an alternative, she said, facilities such as the Whittier Road will fall victim to the revenue decline. DeVries urged that proposals such as this one be seriously entertained by the Legislature.

This project, according to DeVries, is the essential key to the development of Prince William Sound infrastructure. She feels that the resulting tourism, recreation opportunity, transportation and commercial fishing industries would not only provide a strong financial base for the Whittier-Prince William Sound area but would benefit the rest of the State as well.

A very strong statement of support for the project has come from various professional and administrative groups and individuals that serve the Chugach area, State of Alaska and interstate commerce as well as the local residents. DeVries received a petition signed by 108 of the 338 residents of Whittier asking that she sponsor this legislation.

Juneau, Alaska 99811

Dear Bob

I have read with interest about the introduction of SB 374, by Senator DeVries, to create a Toll Road Authority for a tunnel to Whittier.

I have long been an advocate, along with others, of the creation oa a Toll Road Authority to build bridges to Pennock and Cravina Islands, to connect Ketchikan with our Cravina Island airport. Unfortunately, in the past, our local legislative delegations have never shown much enthusiasm for such a project. I would hope that now you might be able, with the support of our newer House members, to stimulate to work for such interest, and either amend SB 374 to include our bridges, or introduce a similar bill for the same purpose.

Sincerely

Paul J. Wingren

February 5, 1986

The Honorable Robert H. Ziegler, Senator
Alaska State Senate
Pouch V
Juneau, AK 99811

Dear Senator Ziegler:

With reference to the letter from Paul Wingren relating Senator DeVries proposal for a Toll Road Authority for a Whittier tunnel to our need for a hard link to Ketchikan Int'l Airport, he may be right in assuming that there is no other way to finance those construction costs.

I have been against a toll as I have been assuming that the annual employee costs would eat up the income until such a time as Pennock and Gravina are developed by residential and commercial growth. My feelings have been that the state has provided highway connections to all other state airports, and that we should expect that our hard link would also be provided. With the state income going down, it is probable that I would not live long enough to see construction of the project in the time I have left, especially if the state funds are mostly routed to the Susitna project each year.

I have attached the past two years passenger and vehicle totals for our airport ferry operation that could help in any discussions that you may have on this proposal. You are aware that the figures shown are only for airport travel, and that the vehicle number would increase substantially if they could be driven to the airport, whereas most people today do not take their cars across to the airport.

The lack of a hard link is a leading cause of our failure to attract the air tour industry as they can't load tour buses at the airport for delivery to hotels or for visitor tours. This in turn, keeps us from being able to support the hotel industry and contributes to our failure to be able to handle the convention circuit. Any of our industrial or commercial proposals at the airport also fail as the first question we get is how do we get our trucks or employees back and forth.

Our future residential growth would probably be on Pennock and Gravina Islands if the hard link is ever contructed. As you know, we have approximately 4,000 acres of Borough land on those islands, and it is of little value if future owners have no wheeled access.

Thanks for keeping this project active.

Sincerely,

Ralph M. Bartholomew

PRINCE WILLIAM SOUND REGION

A. Introduction

The Department of Natural Resources is currently preparing the Prince William Sound Area Plan for this region . The plan will be finished in 1987 and develop the policy the department will follow for offering land in this area. Until this plan is completed, the department will follow the policy outlined below.

B. Supply and and Demand for Settlement Land

The state owns or has selected approximately 850,000 acres in the Prince William Sound Area. Approximately 70,000 acres of this state owned land is accessible and suitable for settlement. Almost all this accessible and suitable land is located on the water in the area's many attractive bays and fjords. Most of the land with potential for settlement is also valuable for either recreation, fish and wildlife and/or mining.

Although the great majority of land in the Prince William Sound region is federally owned, Native corporations own several large blocks of land in the region that also are suitable for settlement. The Native corporations own almost all the land between Valdez and Cordova, and much of the land near Chenega and Latouche Islands.

To date, the state has offered only the Blying Sound remote parcel area. Despite difficult access, this disposal was one of the most popular in the state's history. Any additional waterfront land the state offers in this region will be extremely popular.

C. State Land Offerings

1. Total Land Designated for Disposal

The total amount of land that is likely to be identified for offering over the next twenty years as a result of the Prince William Sound area planning process is between 1,500 and 15,000 acres. Through the Prince William Sound Area Plan, the Commissioner of DNR will determine the amount

and location of state settlement areas, establish the land disposal policies that will guide the department's actions in the area and help determine the pacing of annual land offerings.

2. Average Amount of Land for Disposal Each Year

The average amount of land sold each year for settlement over the next twenty years will be identified by the Commissioner through the Prince William Sound area planning process. Until the plan is completed, land sales will proceed at a moderate rate in Prince William Sound.

3. State Land Offerings - FY86 through FY88

Table 1 below shows the preliminary list of disposal projects the department currently intends to offer in FY86, 87 and 88. These projects are now in various stages of DNR's Land Availability Determination System (LADS) process. LADS is the detailed three year process DNR uses to evaluate, design and offer all planned state land offerings. The process includes an evaluation of building conditions, title to the land, access, regulations of other agencies affecting the planned disposal, public opinion, etc. Because the projects have not completed this assessment process and also because not all projects are funded, the disposal project timing, design and acreages are all subject to change.

TABLE 1

PRINCE WILLIAM SOUND REGION
PLANNED LAND DISPOSAL OFFERINGS, FY86 - FY88

FISCAL YEAR	PROJECT NAME/ TYPE	ACREAGE		ACCESS IMPROVEMENTS REQUESTED	LOCATION
		GROSS	NET		
FY86	Heiden View Sub	171	100	Yes-fill or barricade wash out in existing road	North of Valdez
	Eccles Creek Odd Lot	1.3	1.3	None needed	Near Cordova
	Jack Bay Hstd.	755	400	None needed	On coast west of Valdez
FY87	Poe Bay Sub	750	140	None needed	Passage canal near Whittier
FY88	Logging Camp Bay	280	160	None Needed	Passage canal near Whittier

4. State Land Offerings—After FY88

Currently, there are no specific projects identified for sale after 1988. The planning team for the Prince William Sound Area Plan will identify projects that will be offered after FY88. One project will be identified in this region this fiscal year to start through the three year LADS process.

Attention: Margaret

Dear Margaret:

Enclosed is some material which Councilmember, Fred Joiner has asked me to forward to you.

I am also enclosing information which the City Clerk compiled and attempted to fax to you on Wednesday. This is all the information he could locate at that time. I believe that he intends to forward additional information at a later date.

In the meantime, if you think of any other information that would be helpful to you, please let us know.

Sincerely,

Betty L. McClain

July 26, 1985

Mr. Fred Joiner, Jr.
Whittier, AK 99693

Dear Fred:

In response to your request, a copy of the economic and traffic flow study conducted for the new Portage Visitor Center was obtained from the Chugach National Forest. I've enclosed a copy of Scenario I, Alternative A for your information.

As a caution, do not take the average expenditure column at face value. This was calculated on the dollar turn over in the local economy. It is therefore an indicator of value in an economic system and is not true dollar income.

The increase in use was projected on the basis of per cent of past increase. There may be some hazard in use of this concept since it could well be affected by the recent economic down turn. The study was completed in 1981. Also, I would doubt that the Resident-Visitor projection will increase at the rate shown. The population growth curve for south central Alaska has leveled out faster than expected.

I think we can safely assume that the capacity figures shown in year 13 will be reached; however, it may be further in the future than projected. The expected use in Portage Valley will ultimately reach 2,183,800 plus residents and 608,200 visits or a total of 2,792,000 visits per year. As a general rule an average of three people per vehicle cn be expected. This would mean about 930,666 vehicles will enter Portage Valley when use reaches the capacity of the area.

Some questions that can be asked then are (1) How many of these vehicles will come into Whittier if there is an access or transportation capacity? and (2) If Portage Valley is receiving use to capacity, how much of the future growth will come through to Whittier for an alternative recreation recreation experience or maybe even select this area for a primary experience? Regardless, there will be an exciting future for Whittier if things are

are encouraged to proceed, as planned, in an orderly manner.

If I can provide additional information, please let me know.

Sincerely,

B. Lynn Mitchell
Harbor Master

Dept. of Transportation & Public Facilities

Position Paper

BILL NO: SSSB 374

APPROVED: R. J. Knapp
Commissioner

TITLE: An Act Relating to State Toll Facilities

DATE: 2/11/86

The Department of Transportation and Public Facilities supports expanding the current toll facility authority to include tunnels. In addition, we support the addition of the Whittier Toll Road facility to AS 37.15.730. This legislation reinforces the desire to ensure that projects such as this are financially feasible and able to produce revenues to cover their costs whenever possible.

The Department is currently conducting an economic analysis and financial plan for transportation access to Whittier. A key part of this financial plan, which will be available in mid-March, will be to look at funding the project through the use of revenue bonds generated from tolls.

For further information call Susan Fleischhauer at 465-3900.

THE CITY OF WHITTIER

January 27, 1986

The Honorable Edna DeVries
Pouch V
Juneau, AK 99811
Mail Stop 3100

Dear Senator DeVries,

Thank you for your inquiry of January 27, 1986, regarding information on the request from the City of Whittier for a Highway Toll Authority. Before considering this, perhaps some of the City's goals can be discussed. Overall, the City plans an orderly development program to encourage and support tourism, recreation, transportation and commercial fishing. (including fish processing)

To facilitate this program an overall goal has been established to improve access from Portage Valley to Shotgun Cove. Admittedly, this is an expensive undertaking, but it is supported by a willingness to require users to pay associated costs over an extended time period. Hence, our inquiry into the establishment of a toll authority to cover the entire length of the Access route. This will be discussed further in this letter.

Before the City can accommodate much of an increase in vehicular traffic, space must be developed for them. This has led to development of a proposal to divide access improvements into segments, with supporting facilities being developed simultaneously.

LANDS

A major factor which could influence growth in Whittier stems from the recent aquisition by the State of about 4800 acres of what was previously federal land. Of this land grant, 600 acres has already been designated as an entitlement to the city of Whittier. Another 418 acres has been designated as settlement to the Chugach Native Corporation. Out of the remaining lands, several areas in the Whittier vicinity have been designated by the State for potential disposal into private hands.

These areas are, Pigot Bay, 295 acres; Poe Bay 440 acres; Logging Camp, 325 acres and Billings Creek for a yet unknown amount of acreage. These areas will eventually require service from Whittier and will support user funded access when it is realized.

SHOTGUN COVE - WHITTIER SUBDIVISION

According to the Shotgun Cove Steering Committee, a joint organization of Whittier and the Chugach Native Corporation, the first stage of development in support of improved access should be the Shotgun Cove Road. Total cost of this will be 19.5 million dollars, based on the existing engineering design. This project may be broken into two parts with a requirement of approximately 10 million dollars needed to build the road from Whittier to trinity point beginning in 1986.

If the road can be started this year, the City will advertise a request for proposals to develop 200 acres of Municipal Entitlement Land known as the Whittier Subdivision. This could be by a private developer with the lands being furnished by the City of Whittier. Application for these lands has been filed with the Alaska Department of Natural Resources and a letter of entry is expected before the coming spring.

A preliminary site plan indicates approximately 197 residential lots can be developed. In addition, the Chugach Alaska Corporation owns approximately 318 acres adjacent to the proposed subdivision. This is proposed for residential and commercial development through private capital. At a density of about 2 people per acre this combined development could support up to 1030 people depending on the actual form development may take.

Before the summer of 1986, the City of Whittier and Chugach Alaska Corporation will, through a joint venture, select an additional 400 acres of Municipal Entitlement Land and 100 acres of Corporation Land in Shotgun Cove. The Shotgun Cove Steering Committee has recommended that a request for proposals for private development should be advertised soon after the land selection has been finalized. While the ultimate form of development is unknown, it has been agreed that the RFP will include some high density residential development, harbor facilities, commercial enterprises and improved marine freight handling and passenger facilities as standards for the project. If future population density were to reach 4 people per acre, not an exceptionally high figure, the combined development could support about 2000 residents.

Again, this aspect of future development could easily be accomplished with private capital, with a long range benefit to the City being a stable tax base. The Chugach Alaska Corporation has mentioned on occasion the potential for winter recreation facilities they could develop. If followed through, this would result in a year round influx of recreational enthusiasts. Access to the area would cost another 9.5 million dollars in road construction as it is currently engineered.

Once the Whittier Subdivision and Shotgun Cove projects are under way, access improvement from Portage Valley to Whittier, via a toll road, ~~could easily be supported~~ by the increased traffic generated by the developments.

We understand that a report is forthcoming to this legislature from the Alaska Department of Transportation evaluating the feasibility of financing alternatives for Whittier access based on various studies completed in the past. This study is apparently due about February 15, 1986. We have deep concerns that this study will reflect only traffic projections to Whittier at it's existing level of development and not what the potential will be with development as proposed above. However, we believe that access from Portage to Whittier should be user paid. The best way to provide for this would be to charge those who derive the most benefit from the development. In order to establish this as a possibile alternative however, will require ammendment of the toll authority established for the proposed Knik Arm Crossing.

Obviously the above proposals are quite ambitious. However, we are certain they are reasonable. We have collected some informmation which supports our position. The following will show some of the diverse considerations that are operative in our area which may not have been adequately adressed elsewhere.

HARBOR FACILITIES

Harbor facilities, or the lack thereof, is a major concern. The existing harbor was constructed in 1972. It was full the following year. In 1980 the size was doubled. It was again immediately over subscribed.

At present, there are 332 slips in the harbor. Of these, 279 are permanently assigned. 53 are held open for transient vessels.

Presently, 86 transient vessels are spending the Winter

moored in the harbor. This is a 29% increase over the same period last year. The only problem is, They are large vessels which occupy most of the slips for the larger size classes. It is getting more difficult to accomodate winter use primarily from fishing vessels.

In the summer, from April 15, through September 15, the situation becomes chaotic. There was an approximate increase of 15% use in the harbor. With July 1985 being an example, there was 279 assigned berths with an average of 227 transient boats in the harbor for and average of 506 boats in the harbor designed for 332 boats. On five occasions in 1985, the Harbormaster broadcasted to all boats entering the harbor that there was no more space available. Up to 105 boats were on the priority list awaiting permission to enter the harbor. Some were anchored up for three days before space could be make available. The need for additional harbor space is desparate. Shotgun Cove can provide it.

In the analysis of the reason for this demand the following facts can be verified.

1. 87% of the vessels using the harbor are from Anchorage and Eagle River.
2. 3% are from the Mat-Su Borough.
3. 1% are from Whittier.
4. 7% are from either Seward, Homer, Cordova or Valdez.
5. 2% are from other areas including out of state.

Arthur Young and Associates has prepared a summary of various studies conducted between 1979 and 1983 to prepare a demand analysis of boating requirements for Anchorage and the Kenai Penninsula. It was concluded that 1 in every 13 people in that area require boating facilities.

If the population of Anchorage is approximately 244,000, as mentioned in the 1985 Municipal Officials directory, then there is a demand for 18,769 slips to satisfy Anchorage alone. Less than a third of these are available in the Anchorage/Kenai Penninsula area.

Whittier is only 60 miles from this demand; compared to over twice that distance to Seward and over four times that

distance to Homer. In addition Whittier is a major gateway to prince William Sound, which contains some of the best recreational waters in the state. All that prevents it from being used to its potential is access and facilities.

The U.S. Army Corps of Engineers is nearing completion of the feasibility study for a harbor in Shotgun Cove. This report is due for completion by the Spring of 1986. The Preliminary draft shows definite feasibility. There are two viable alternatives for construction. One alternative is for approximately 832 slips. The other, approximately 790 slips for a total of 1622 spaces which could ultimately be developed. While this does not meet all of the Anchorage needs, it would certainly help.

If the State is unable to help in construction of a new harbor in Shotgun Cove, then perhaps a private corporation could develop it. For example part of the slips could be sold into private ownership on a condo arrangement to recover a large part of the investment.

MARITIME ACTIVITIES

In 1986 there are 34 Cruise Ship dockings scheduled into the Port of Whittier. Each of these ships carry about 800 passengers to and from Alaska. This adds up to a total of 27,200 people entering and 27,200 departing for a total of 54,000 passengers that will pass through Whittier and Anchorage next season. In addition each ship carries approximately 200 crew members for a total of 6800 crew person visits to the city. This is a considerable contribution to the economy of Alaska. It constitutes a tremendous impact on the City however, which provides EMS, Fire and Police support, in addition to water and sanitation services.

In addition to the above, 18,066 passengers were accomodated by private cruise ship between Whittier and Valdez. This number will increase significantly in 1986 with the addition of two more vessels of about ninety foot in length, catering to the demand. It is concievable that this number will triple in the next two years.

This is in large part due to lack of capacity on the Marine Highway System (M.V. Bartlett) which operates at over capacity during the summer months. This vessel in 1984 transported about 22,000 walk on passengers between Whittier and Valdez and about 5000 automobiles and recreational vehicles. It can accomodate no more. Perhaps it is only proper that additional demand be met by the private sector. However, moorage must be provided for the private vessels.

The City port facilities are already over taxed. Added harbor facilities in Whittier and Shotgun Cove will help provide the necessary moorage facilities and passenger services which are now totally lacking.

Another form of maritime activity is the amount of rail barge freight which passes through Whittier every year. An estimate from the largest of the rail barge companies serving Whittier, Alaska Hydro Train, places a figure of over 500,000 tons on the amount of freight which is shipped northbound alone through Whittier. The Alaska Railroad has plans to expand their capabilities to handle rail barge traffic by upgrading their second slip, which is now used only for staging. This project has been slated to begin in the Spring of 1986.

ALASKA RAILROAD

The Alaska Railroad and the other transportation companies plan on moving more freight through Whittier to Anchorage than ever before. Present summer passenger and vehicle shuttles are increasingly coming into conflict with the movement of freight. Additionally it is well documented that rail passenger service does not pay for itself when the tourist season and the off season are averaged together. More passengers are showing up each year than the Alaska Railroad cares to handle between Portage and Whittier in the summer.

According to Alaska Railroad conductor estimates, about 160,000 people rode the shuttle in 1985. In addition, 22,000 vehicles, including buses, motor homes, van trucks and personal vehicles were transported. When considered on the basis of train days, or the number of day per year that the train makes at least one regularly scheduled shuttle run, it appears that an average of 615 passengers were served each day. Since the train runs every day for the four months of summer, that equals 120 train days. In the 8 winter months the train runs three days a week or 15 days a month also equal to 120 train days.

Obviously the people moved in 1984 were not all Whittier residents of Whittier. In 1985 Whittier had only 338 residents, based on revenue sharing information filed with the state. If the projection for the 1986 cruise ship schedule and the actual number of people served by public and private ferry service in 1985, are subtracted from the 1985 railroad figures, the average daily figure for activity on the train would still nearly equal the population of Whittier or about 334 passengers a day.

U.S. ARMY PETROLEUM TANK FARM

While there is not a lot of information available, the U. S. Army Petroleum Tank Farm is continuing its program to expand and upgrade facilities. This is bound to have an effect on Whittier. They will complete three new tanks in summer of 1986 and this may require either more rail tank service or more tanker ship service to be brought to the area.

CONCLUSION

We of the City of Whittier visualize a great future for our community. The potential is here. To realize it, your support and assistance is badly needed. The demand exists for what we can offer. If we do not guide our growth, it will happen in a manner which will not reflect well on our city or the state. The major key is providing access and facilities on a timely basis.

We are asking for help from the legislature and administration in making it happen.

Best Regards,

Duane Dvorak

January 17, 1986

JAN 2 8 RECD

The Honorable Edna DeVries
P.O. Box 321
Palmer, AK 99645

Dear Senator DeVries,

The enclosures of this letter are the result of a project that was undertaken by our city council and other community members at the close of last summer. Through administrative oversight, these documents were not distributed in a timely fashion; however, the Whittier City Council felt it would be a shame to lose the efforts of so many people. Therefore, the City of Whittier humbly submits a petition, a resolution, and a state information guide that was used as a basis for our discussions of a toll authority for the Whittier area.

We hope that you may find time to share our information and our concerns with your colleagues in Juneau. We realize the economics of funding access is not very favorable at present. Yet, we feel strongly that a toll would, in the long run, provide a large measure of revenue toward amortizing a project of the type proposed to link Whittier with the greater Anchorage area.

To live and work in Whittier is to know just what this location can mean to the rest of the state. With our physical proximity to the largest economic and population center in the state, Anchorage, we are aware almost daily of the potential for increased freight handling and recreation opportunities for the entire region.

If there is any further information that you require, please call our city office at 472-2327, or FAX 472-2404. Thank you for your attention.

Sincerely,

Duane Dvorak

Duane Dvorak
City Clerk, Whittier

P.O. Box 608 Whittier, Alaska 99693 (907) 472-2327

RESOLUTION NO. 11-05-85B

A RESOLUTION SETTING FORTH THE LEGISLATIVE PRIORITIES FOR THE CITY OF WHITTIER, ALASKA, FOR CONSIDERATION DURING THE 1985-86 STATE LEGISLATIVE SESSION.

WHEREAS, the City of Whittier is in need of funding to continue the growth and improvement of the community, and;

WHEREAS, funding is available from the Alaska State Legislature for development projects within small communities, and;

WHEREAS, the City Council, realizing that the Legislature has limited funds available, has met and carefully considered and determined their priorities for funding,

NOW, THEREFORE, THE WHITTIER CITY COUNCIL RESOLVES:

That, the City Council of the City of Whittier requests funding from the Legislature for the following projects, which are presented as a statement of needs assessment.

"Our priority is to support development of improved access from Bear Valley (Portage Galacier Visitors Center), situated in the southeastern corner of the Anchorage borough, to Shotgun Cove, located on Passage Canal in beautiful Prince William Sound. This corridor encompasses access from Bear Valley to the Whittier core, from the core area to Whittier subdivision, and from the subdivision to Shotgun Cove."

PASSED AND APPROVED THIS 5th day of November, 1985 by a duly constituted quorum of the City Council of Whittier, Alaska.

Rawson E. Knight, Mayor

Mel Wopten, Councilmember

Sue Rains, Councilmember

Kent Barker, Councilmember

Amanda Hale, Vice-Mayor

Georgia Buck, Councilmember

Fred Joiner, Councilmember

ATTEST: Duane Dvorak
Duane Dvorak,
City Clerk, Whittier

A RESOLUTION OF THE CITY OF WHITTIER, ALASKA, CALLING FOR THE AMENDMENT OF AS 37.15, AS 19.05, TO INCLUDE THE FINANCING AND CONSTRUCTION OF TUNNELS AS PROPER ACTIVITIES SUBJECT TO THE INTENT AND AUTHORITY OF THE ACTS.

WHEREAS, the current ferry, barge and rail lines linking Whittier and Anchorage constitute an important, established supply link for the State of Alaska and its citizens; and,

WHEREAS, increased demand for supplies by a growing economy has resulted in a stricture on the growth potential of Whittier and the State of Alaska because of the lack of adequate access by road; and,

WHEREAS, increasing economic activity has been shown to increase employment as well as revenue for state and local government; and,

WHEREAS, the cost-effective and timely movement of goods to the major economic and population centers of the state would result in lower cost to consumers and improved distribution to remote communities; and,

WHEREAS, the City of Whittier expects to one day benefit from a road which would connect the community, via a tunnel, to the major ecomonic and population centers of the state; and,

WHEREAS, the City Council wishes to express that which would be beneficial to the state and the general public whenever possible;

NOW, THEREORE, THE WHITTIER CITY COUNCIL RESOLVES:

FIRST: That legislation which pertains to the financing and construction of toll road facilities be amended to allow for the consideration of a tunnel and concomitant road to connect Portage, Alaska with Whittier, Alaska; specifically, Alaska Statute 37.15.730 to be amended to read that a Portage to Whittier access road with tunnel to be the first state toll facility.

SECOND: In addition, Alaska Statutes 37.15.720, 37.15.760, and 19.05.040, in refering to those activities of potential toll authority be amended to include the term tunnel as part of the definition.

PASSED AND APPROVED this 3rd day of September, 1985 by a duly-constituted quorum of the city council of Whittier, Alaska.

Rawson E. Knight, Mayor

Amanda L. Hale, Vice-Mayor

T. Kent Barker, Councilmember

Don Hatmaker, Councilmember

Fred L. Joiner, Councilmember

Don Shofner, Councilmember

Clyde M. Wooten, Councilmember

BY THE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

CS FOR SENATE BILL NO. 411 (C&RA)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to road maintenance service areas."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 19.30.260 is amended to read:

Sec. 19.30.260. PURPOSE. The purpose of AS 19.30.260 - 19.30.320 is to facilitate funding for the upgrading, reconstruction, rehabilitation, or paving of existing subdivision roads within a road maintenance service area established under AS 29.35.450 or under a home rule charter. Grants to road maintenance service areas under AS 19.30.260 - 19.30.320 are limited to those road maintenance service areas in which road improvement was not financed through the issuance of municipal debt during the three previous fiscal years.

* Sec. 2. AS 19.30.280 is amended to read:

Sec. 19.30.280. ELIGIBILITY. (a) After establishing a road maintenance service area under AS 29.35.450, or under a home rule charter, a municipality may apply to the department for a grant as money is available for road improvements, subject to regulations adopted by the department to carry out the provisions of AS 19.30.260 - 19.30.320. The department shall require a municipality to submit a five-year plan for the upgrading, reconstructing, rehabilitating, or paving of maintenance service area roads for approval before October 1 of each fiscal year and to show the source of funds used for road improvement within each road maintenance service area during the prior three fiscal years.

(b) A municipality shall establish design standards for

MEMORANDUM

TO: Senator DeVries, Chairman
Senate Community and Regional Affairs Committee

FROM: Senator Jan Faiks

SUBJECT: Request for Committee Substitute and Background on Senate Bill 411

Alaska Statutes 19.30.260 through 19.30.320 contain legislation which I introduced during the Thirteenth Legislature. This legislation was intended to facilitate the funding of road improvements to outlying areas through the establishment of road maintenance service areas - "RMSA's".

This bill will make changes to the RMSA program in order to bring it into line with the original intent of this legislation and to help the Department of Transportation and Public Facilities implement this program.

The original intent of the program was to provide road improvement funds to those outlying districts which do not have access to such funds. Since the program came into being, however, some RMSA's have been established within road service areas which already have improvement funds available to them. These funds are based upon the the issuance of municipal debt, i.e., the selling of general obligation bonds.

Those RMSA's within the Anchorage Roads and Drainage Service Area (ARDSA) are an example. In FY 1985, ARDSA sold approximately $15 million worth of general obligation bonds for road improvements within its boundaries. In the same year, at least $317,357 was granted by the RMSA program for road improvements to service areas within its boundaries. This represents about 10% of the total $3,000,000 distributed by the RMSA program that year.

OUT OF SESSION
1024 WEST SIXTH AVENUE, SUITE 302 ANCHORAGE, ALASKA 99501 907-274-6611

In other words, about 1/10th of the money under this state program was given to service areas which already had improvement funds available to them, instead of being reserved for those areas which have no other funding sources. This was certainly not the intent of my legislation two years ago.

Sections 1 and 2 of this bill will solve this problem by excluding from the RMSA program any service area whose road improvements have been financed by the issuance of municipal debt during the preceding three years.

The remaining sections of the bill contain amendments which were proposed by the Department of Transportation and Public Facilities. These are offered to help the Department administer the RMSA program.

Section 3 makes it clear that road improvements may be performed by municipal forces as well as private contractors. Section 4 changes the reporting date to October 1st so that it is consistent with the reporting date for the 5-year plan in AS 19.30.280 and the Local Service Roads and Trails program. This will simplify the administration of both programs by the municipalities.

Section 5 clarifies that financing costs are excluded, but that costs to realign and widen existing roads are included for program funding. Finally, Section 6 expands the definition of municipality to make it consistent with more common terminology in our statutes.

Since this bill was introduced, I have discovered several changes which are needed to further accomplish these goals. I offer them to you as a possible committee substitute for this bill. These changes are:

1. On page 1, line 15, the word "maintenance" should be changed to "improvement". "Maintenance" is not proper here because I have been advised that road maintenance can never be funded through municipal debt.

2. On page 2, line 29, replace the word "or" with the word "and" since some municipalities possess maintenance powers but not construction powers.

Thank you.

AMENDMENT NUMBER ONE

On Page 1, Line 15:

DELETE "maintenance"

ADD "improvement"

AMENDMENT NUMBER TWO

On Page 2, line 29

DELETE "or"

ADD "and"

Fiscal Note

CONTINUATION of FISCAL NOTE ANALYSIS

For Bill/Resolution No. SB411

ANALYSIS

The proposed bill is strictly a housekeeping measure and has no fiscal impact on either the operating or capital budget. No additional positions are required.

The proposed bill revised AS 19.30 in five areas:

1) AS 19.30.260 and 19.30.280 prohibit funding in those road improvement areas that are financed through the issuance of municipal debt. For clarity, the addition to 19.30.260 should read as follows: Grants to road maintenance service areas under AS 19.30.260 - 19.30.320 are limited to those road maintenance service areas in which road improvement was not financed through the issuance of municipal debt during the three previous fiscal years.

2) AS 19.30.290(b) clarifies the fact that road construction can be performed by the municipality.

3) AS 19.30.310 changes the due date for reports. This change does not adversely affect the departments capability to submit a combined annual report to the Governor by December 1.

4) As 19.30.320(1) clarifies exceptable expenditures related to road improvements by expanding the definition.

5) AS 19.30.320(3) clarifies the definition and requirements of a municipality and should be revised as follows to reflect the powers necessary to qualify for a road improvement grant:

(3) "municipality" means an organized borough of any class, a unified municipality, or a city of any class, that has road construction and [OR] maintenance powers.

COMMITTEE REPORT

SENATE

FURTHER: TRSP
FINANCE

2/14/86

Date 3/20/86

Mr. President

The Committee on C&RA considered SB 411
relating to road maintenance service areas.

and (a majority of the committee) (the committee) reports it back with the following recommendations:

[ ] do pass

[ ] do pass with attached amendment(s)

[X] replace with/or adopt CS for SB 411 (C+RA)
[ ] new title
[ ] same title and recommends

[ ] and attached a "LETTER OF INTENT"

[✓] ~~NEW~~ 2nd FISCAL NOTE

[ ] reports it back without recommendation

[ ] recommends referral to _____ Committee

Article 4. Road Maintenance Service Areas.

Section
260. Purpose
270. Allocation of money
280. Eligibility
290. Administration
300. Maintenance
310. Report
320. Definitions

Effective date of article. — Section 2, ch. 56, SLA 1984, provides "This Act takes effect July 1, 1984."

Sec. 19.30.260. Purpose [Effective January 1, 1986]. The purpose of AS 19.30.260 — 19.30.320 is to facilitate funding for the upgrading, reconstruction, rehabilitation, or paving of existing subdivision roads within a road maintenance service area established under AS 29.35.450 or under a home rule charter. (§ 1 ch 56 SLA 1984; am § 47 ch 74 SLA 1985)

Effect of amendments. — The 1985 amendment, effective January 1, 1986, substituted "AS 29.35.450" for "AS 29.63."

Sec. 19.30.270. Allocation of money. (a) During each fiscal year each municipality shall receive money from the department that has been appropriated or otherwise designated for expenditure for road improvements within the municipality, based on the total road mileage in each road maintenance service area in the municipality. The amounts that are available shall be distributed pro rata among eligible municipalities.

(b) Money allocated to a municipality under this section shall be disbursed by the municipality for road maintenance service areas based on a first come, first served priority of road maintenance service area applications, subject to a 50 percent match by each road maintenance service area.

(c) Money allocated under this section shall be available for expenditure in the road maintenance service area for which the funds are authorized for a period of five years after the end of the fiscal year for which the funds are authorized. Money allocated for a road maintenance service area that is unexpended and unobligated at the end of the five-year period shall be used for other road maintenance service areas in the same municipality in accordance with AS 19.30.260 — 19.30.320. If there are no other road maintenance service areas in the municipality for which the money can be used, the municipality shall remit the unexpended and unobligated money to the department and it shall lapse into the general fund.

(d) Fifty percent of the cost of construction in a road maintenance service area shall be paid by the road maintenance service area through road improvement district assessments, grants, or other appropriate financing means. (§ 1 ch 56 SLA 1984)

Sec. 19.30.280. Eligibility. (a) [Effective January 1, 1986] After establishing a road maintenance service area under AS 29.35.450, or under a home rule charter, a municipality may apply to the department for a grant as money is available for road improvements, subject to regulations adopted by the department to carry out the provisions of AS 19.30.260 — 19.30.320. The department shall require a municipality to submit a five-year plan for the upgrading, reconstructing, rehabilitating, or paving of maintenance service area roads for approval before October 1 of each fiscal year.

(b) A municipality shall establish design standards for construction in a road maintenance service area. An application for a grant for improving an existing road under this section which is constructed after July 1, 1984 may not be granted by the department until the existing road meets the minimum design standards of the municipality. (§ 1 ch 56 SLA 1984; am § 48 ch 74 SLA 1985)

Effect of amendments. — The 1985 amendment, effective January 1, 1986, substituted "AS 29.35.450" for "AS 29.63" in the first sentence of subsection (a).

Sec. 19.30.290. Administration. (a) A contract entered into by a municipality for road construction within a road maintenance service area for which funds allocated to the municipality under AS 19.30.260 — 19.30.320 are used shall be awarded only on the basis of the lowest responsible bid by a bidder meeting established criteria of responsibility.

(b) Construction under AS 19.30.260 — 19.30.320 shall be administered by the municipality in which the road maintenance service area is located. (§ 1 ch 56 SLA 1984)

Sec. 19.30.300. Maintenance. The road maintenance service area shall be responsible for maintaining roads constructed under AS 19.30.260 — 19.30.320. The road maintenance service area may contract with a municipality for maintenance of the roads. (§ 1 ch 56 SLA 1984)

Sec. 19.30.310. Report. No later than August 1 of each year, a municipality that has received money under AS 19.30.270 shall submit a report to the department showing the use of the money by the municipality during the preceding fiscal year. No later than December 1 of each year, the department shall prepare and submit to the governor a report showing the use of the money allocated under AS 19.30.270 during the preceding fiscal year. (§ 1 ch 56 SLA 1984)

Sec. 19.30.320. Definitions. In AS 19.30.260 — 19.30.320

(1) "construction" or "road improvement" has the meaning given in AS 19.45.001 and includes utility and drainage costs but excludes financial costs, right-of-way costs, and new road construction;

(2) "department" means the Department of Transportation and Public Facilities;

(3) "municipality" means a municipality that has road construction or maintenance powers;

(4) "subdivision" has the meaning given in AS 40.15.190(2). (§ 1 ch 56 SLA 1984)
