FOR TODAY'S MEETING YOU HAVE:

-----  
A FOLDER ON HB 31 THAT INCLUDES:

- \* a copy of the Committee Substitute
- \* a letter of support from the Dept. of Public Safety Chief of Driver Services
- \* a current status report
- \* a copy of the House Committee Report form signed by House State Affairs
- \* a report on which includes
  - a copy of HB 31
  - a summary of HB 31
  - a sectional analysis
  - a fiscal note
  - a position paper from the Dept. of Public Safety
  - an excerpt from the Alaska Statutes
  - an excerpt from the regulations of the Dept. of Public Safety

A FOLDER ON HB 94 THAT INCLUDES:

- \* a copy of HB 94
- \* a current status report
- \* a bill analysis from the Dept. of Health & Social Services Division of Public Health
- ~~\* a fiscal note~~
- \* a report prepared by the U.S. Coast Guard
- \* background material from Rep. Taylor
  - a paper from House Research
  - a cost benefit analysis from the Coast Guard
  - a question/answer paper from the Coast

1 IN THE HOUSE

2 CS FOR HOUSE BILL NO. 94 ( )

3 IN THE LEGISLATURE OF THE STATE OF ALASKA

4 FIFTEENTH LEGISLATURE - FIRST SESSION

5 A BILL

6 For an Act entitled: "An Act relating to boat numbering, accidents, and  
7 safety; and providing for an effective date."

8 BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

9 \* Section 1. AS 05.25 is amended by adding new sections to read:

10 ARTICLE 1. NUMBERING AND REGISTRATION.

11 Sec. 05.25.200. CERTIFICATE OF NUMBER REQUIRED ON BOAT. (a) A  
12 person may not operate a boat on state water, and an owner of a boat  
13 may not knowingly allow another to operate the owner's boat on state  
14 water, unless

15 (1) the owner of the boat holds a current, valid certifi-  
16 cate of number issued in the owner's name as owner

17 (A) under this chapter;

18 (B) by an agency of the federal government; or

19 (C) by the state of principal use that issued the  
20 certificate of number under a federally approved numbering sys-  
21 tem; and

22 (2) the certificate of number is carried on the boat in a  
23 manner that protects the certificate from the elements, and is avail-  
24 able for inspection by a state, federal, or municipal law enforcement  
25 officer.

26 (b) A certificate of number for a boat less than 26 feet in  
27 length and leased or rented to another for the latter's noncommercial  
28 operation of fewer than seven days may be retained on shore by the  
29 boat's owner or representative at the place from which the boat

1 departs or returns to the possession of the owner or the owner's rep-  
2 resentative. If the certificate of number is retained on shore, then  
3 a copy of the lease or rental agreement must be carried on the boat.  
4 The lease or rental agreement must

5 (1) be signed by the owner of the boat or the owner's  
6 representative, and by the person leasing or renting the boat; and

7 (2) specify the period for which the boat is leased or  
8 rented.

9 Sec. 05.25.205. IDENTIFYING NUMBER ON FORWARD HALF OF BOAT. (a)  
10 A person may not operate a boat on state water unless there is painted  
11 on or permanently attached to each side of the forward half of the  
12 boat a current, valid identifying number awarded to the boat

13 (1) under this chapter;

14 (2) by an agency of the federal government; or

15 (3) subject to the provisions of AS 05.25.215, by another  
16 state that awards identifying numbers under a federally approved  
17 numbering system.

18 (b) An identifying number shall be painted on or permanently  
19 attached to each side of the forward half of the vessel in a position  
20 that provides clear legibility for identification. Each number must  
21 read from left to right and must be in plain vertical block characters  
22 of good proportion not less than three inches in height. The number  
23 must be of a color that contrasts with the color of the background and  
24 shall be maintained so that it is clearly visible and legible. Each  
25 number must have spaces or hyphens that are equal to the width of a  
26 letter other than "I" or a number other than "1" between the letter  
27 and number groupings.

28 (c) On boats so configured that a number on the hull or super-  
29 structure would not be easily visible, the number shall be painted on

1 or attached to a backing plate that is attached to the forward half of  
2 the boat so that the number is visible from each side of the boat.

3 (d) A number other than the identifying number may not appear on  
4 the forward half of the boat.

5 Sec. 05.25.210. APPLICATION FOR BOAT NUMBER. (a) The owner of  
6 a boat that is operated principally on state water, or a dealer who  
7 wishes to demonstrate one or more boats on state water, shall apply to  
8 the department for an identifying number. The application must in-  
9 clude the true name of the owner, the residence or business address of  
10 the owner, a description of the boat or boats, and other information  
11 required by the department or under Coast Guard regulations. The  
12 application shall be signed by the owner and must be accompanied by  
13 the prescribed fee.

14 (b) A certificate of number may be issued to a dealer for use on  
15 more than one boat.

16 Sec. 05.25.215. APPLICATION BY OWNER HAVING NUMBER AWARDED BY  
17 FEDERAL GOVERNMENT OR ANOTHER STATE. The owner of a boat covered by a  
18 number that is still in effect and that has been issued under federal  
19 law or a federally approved numbering system of another state shall  
20 apply to the department for an identifying number within 10 days after  
21 the expiration of the applicable reciprocity period provided in  
22 AS 05.25.240(6).

23 Sec. 05.25.220. CERTIFICATE OF NUMBER FEES. (a) The commis-  
24 sioner shall adopt regulations establishing fees for original, renew-  
25 al, and duplicate certificates of number, and for dealer demonstration  
26 certificates of number.

27 (b) The fee for a certificate of number shall be prorated ac-  
28 cording to the number of months the certificate will be in effect.

29 (c) The fees in this section are in addition to any other tax or

1 license fee for a boat.

2 Sec. 05.25.225. ISSUANCE OF CERTIFICATE OF NUMBER AND VALIDATION  
3 STICKERS; STICKERS PLACED ON BOATS. (a) If the application is in  
4 order, the department shall issue to the owner a certificate of number  
5 that shall state the identifying number awarded to the boat, the name  
6 and address of the owner, the state of principal use, the normal use  
7 of the boat, the description of the boat, the hull identification num-  
8 ber, make, year, length, type of hull material, type of propulsion and  
9 type of fuel, the issue date, and the expiration date of the certifi-  
10 cate of number. The certificate of number shall be wallet size.

11 (b) The department shall issue a set of validation stickers  
12 bearing the year through which the certificate of number is issued.  
13 The year shall be indicated by the colors blue, international orange,  
14 green, and red, in rotation beginning with red for stickers that  
15 expire in 1988. A validation sticker must be approximately three  
16 inches square. The stickers shall be placed three inches to the rear  
17 of the identifying number placed on the boat as required under AS 05.-  
18 25.205.

19 Sec. 05.25.230. EXPIRATION OF CERTIFICATE OF NUMBER; RENEWAL OF  
20 CERTIFICATE AND STICKERS. (a) A certificate of number expires three  
21 years after the last day of the month in which the certificate is  
22 issued.

23 (b) The department may require the surrender of the expired cer-  
24 tificate of number before issuing a new certificate of number.

25 (c) The identifying number awarded to a boat by the department  
26 remains the same.

27 (d) An application for renewal of a certificate of number shall  
28 be made in the same manner as provided in AS 05.25.210. The applica-  
29 tion shall be accompanied by the fee required under AS 05.25.220. The

1 department shall renew certificates of number and issue validation  
2 stickers in the same manner as provided in AS 05.25.225.

3 (e) A certificate of number is invalidated if

4 (1) the boat is subsequently documented or required to be  
5 documented;

6 (2) the boat is sold or destroyed;

7 (3) the applicant supplies false information in the appli-  
8 cation for the certificate;

9 (4) the owner, through legal process, involuntarily loses  
10 the ownership interest in the boat for which the certificate is is-  
11 sued.

12 Sec. 05.25.235. REPORT OF TRANSFER, ABANDONMENT OR DESTRUCTION  
13 OF BOAT, OR CHANGE OF ADDRESS OF OWNER. (a) Within 15 days after the  
14 transfer of all or a part of the interest of the owner in a boat, or  
15 the abandonment or destruction of a boat, for which a certificate of  
16 number has been awarded under this chapter, the owner shall notify the  
17 department of the transfer of interest, destruction, or abandonment.

18 (b) Within 15 days after a change of address, the owner of a  
19 boat for which a certificate of number has been awarded under this  
20 chapter shall report the change to the department.

21 Sec. 05.25.240. EXEMPTIONS. The following classes of boats are  
22 exempt from the provisions of AS 05.25.200 - 05.25.235:

23 (1) a boat that has a valid marine document issued by the  
24 United States Coast Guard;

25 (2) a foreign boat operated only temporarily in state  
26 water;

27 (3) a boat owned and operated by the United States or a  
28 state or by an entity or political subdivision of the United States or  
29 a state, except recreational type public vessels;

1 (4) a ship's lifeboat used solely for lifesaving purposes;

2 (5) a boat belonging to a class of boats that has been  
3 exempted from the provisions of AS 05.25.200 - 05.25.235 by the de-  
4 partment as provided in AS 05.25.910;

5 (6) a boat already covered by a number that is still in  
6 effect and that has been issued to it under

7 (A) federal law and the boat has not been in this  
8 state for more than one year; or

9 (B) a federally approved numbering system of another  
10 state and the boat has not been in this state for more than 60  
11 consecutive days; and

12 (7) a boat that is not propelled by machinery.

13 ARTICLE 2. BOATING ACCIDENTS.

14 Sec. 05.25.300. DUTIES OF OPERATORS AND WITNESSES AT ACCIDENTS.

15 (a) The operator of a boat involved in an accident that results in  
16 injury or death to a person or causes damage to property immediately  
17 shall stop the boat as close as possible to the scene of the accident  
18 and shall remain at the scene of the accident until the operator has  
19 fulfilled the requirements of (b) of this section.

20 (b) The operator of a boat involved in an accident resulting in  
21 injury or death to a person or damage to property shall

22 (1) give to the other operator, to the owner or a surviving  
23 occupant of the other boat or damaged property, or to another appro-  
24 priate person, the name, address, and identifying number of the boat  
25 that the operator is operating, and the name and address of any other  
26 occupants of the boat; and

27 (2) render reasonable assistance to every person injured in  
28 the accident, including the conveying or the making of arrangements  
29 for the conveying of the person to a physician, surgeon, or hospital

1 for medical or surgical treatment, if it is apparent that treatment is  
2 necessary or if conveyance is requested by an injured person.

3 (c) A witness to the accident shall furnish to the operator,  
4 occupant, or injured person, the name and address of the witness.

5 Sec. 05.25.305. ACCIDENT REPORT REQUIRED. (a) The operator of  
6 a boat involved in an accident shall submit a report of the accident  
7 to the department in the form and manner the department prescribes if  
8 the accident results in

9 (1) the death of a person;

10 (2) injury to a person requiring medical treatment beyond  
11 first aid;

12 (3) the disappearance from the boat of a person under  
13 circumstances indicating death or injury;

14 (4) damage to the boat or other property in an aggregate  
15 amount of more than \$200; or

16 (5) complete loss of the boat.

17 (b) The department may require a person who submits an insuffi-  
18 cient report under this section to file a supplemental report, and may  
19 require a witness to the accident to submit a report to the depart-  
20 ment.

21 (c) If the operator of a boat is incapable of submitting a  
22 required accident report, the owner of the boat, if different from the  
23 operator, or a person who was in the boat at the time of the accident  
24 who is capable of submitting a report, shall submit the report or  
25 cause the report to be submitted.

26 (d) A report required under this section shall be submitted

27 (1) within 48 hours after the accident if a person dies  
28 within 24 hours after the accident;

29 (2) within 48 hours after the accident if a person is

1 injured and requires medical treatment beyond first aid, or disappears  
2 from a boat; and

3 (3) within 10 days after the accident or death if an earli-  
4 er report is not required under this subsection.

5 Sec. 05.25.310. FORM OF REPORT; SENDING DEATH CERTIFICATE TO  
6 DEPARTMENT. (a) The department shall prepare and make available to  
7 the public forms for accident reports required under AS 05.25.305.  
8 The report form must call for the information required in casualty and  
9 accident reports under United States Coast Guard regulations and other  
10 information the department may require. The form must provide that  
11 the person who completes the form shall sign and date it upon com-  
12 pletion.

13 (b) The state registrar of vital statistics shall, on or before  
14 the 15th day of each month, forward to the department a copy of the  
15 death certificate covering each death that occurred during the second  
16 preceding calendar month and that resulted from a boat accident in  
17 state water.

18 Sec. 05.25.315. CONFIDENTIAL NATURE OF REPORT. (a) An accident  
19 report submitted to the department shall be without prejudice to the  
20 individual reporting and shall be for the confidential use of adminis-  
21 trative and enforcement agencies only.

22 (b) The department upon written request, shall, if available,  
23 disclose the following information to a party involved in the acci-  
24 dent, or, in the event of the party's death, to a member of the par-  
25 ty's family, or to the party's personal representatives:

26 (1) the identity of the owner, operator, and occupants, and  
27 the identifying number of a boat involved in an accident;

28 (2) the names of companies insuring the owner or operator;

29 and

1 (3) the identity of witnesses to the accident.

2 (c) A report under AS 05.25.300 - 05.25.315 may not be used as  
3 evidence in a civil or criminal trial arising out of the accident.  
4 The department shall furnish, upon demand of a person who has or  
5 claims to have made a report or upon demand of a court, a certificate  
6 showing that a specified accident report has or has not been made to  
7 the department, solely to prove a compliance or a failure to comply  
8 with the requirement that a report be submitted to the department.

9 (d) The department shall compile and may analyze all accident  
10 reports and shall publish annually, or at more frequent intervals,  
11 statistical information relating to boat accidents.

12 (e) In response to a request from an authorized official or  
13 agency of the United States, or in compliance with United States Coast  
14 Guard regulations or any requirement under 46 U.S.C. 6101 - 6103, the  
15 department shall transmit information compiled or otherwise available  
16 to the department from the accident reports required under AS 05.-  
17 25.305.

18 Sec. 05.25.320. NOTICE OF ACCIDENT RESULTING IN DEATH OR DISAP-  
19 PEARANCE; DUTIES OF PASSENGERS. (a) When, as a result of an occur-  
20 rence that involves a boat or its equipment, a person dies or disap-  
21 pears from a boat, the operator shall, without delay, by the quickest  
22 means available, notify the department of the

- 23 (1) date, time, and exact location of the occurrence;  
24 (2) name of each person who died or disappeared;  
25 (3) number and name of the boat; and  
26 (4) names and addresses of the owner and operator.

27 (b) When the operator of a boat cannot give the notice required  
28 under (a) of this section, each person on board the boat shall notify  
29 the department or determine that the notice has been given.

1           Sec. 05.25.325. APPLICATION OF AS 05.25.300 - 05.25.320. (a)  
2 Except as otherwise provided in this section or under AS 05.25.910,  
3 the provisions of AS 05.25.300 - 05.25.320 apply to all boats operated  
4 in state water, except when inconsistent with an applicable law or  
5 regulation of an agency of the United States, in which case the fed-  
6 eral law or regulation shall prevail.

7           (b) The provisions of AS 05.25.300 - 05.25.320 do not apply to

8           (1) a boat that has a valid document issued by the United  
9 States Coast Guard;

10           (2) foreign boats operated temporarily in state water;

11           (3) a boat owned and operated by the United States or by an  
12 entity of the United States;

13           (4) a lifeboat used solely for lifesaving purposes; or

14           (5) a boat required to have a certificate of inspection  
15 under 46 C.F.R., Chapter I.

16           Sec. 05.25.330. OWNER'S CIVIL LIABILITY. An owner of a boat is  
17 liable for injury or damage caused by the negligent operation of the  
18 boat, whether the negligence consists of a violation of a state stat-  
19 ute or failure to observe ordinary care in the operation of the boat  
20 as the rules of the common law require. The owner is not liable,  
21 however, unless the boat is used with the owner's express or implied  
22 consent. It is rebuttably presumed that the boat is being operated  
23 with the knowledge and consent of the owner if, at the time of the  
24 injury or damage, it is under the control of the owner's spouse,  
25 father, mother, brother, sister, son, daughter, or other member of the  
26 owner's immediate family. This chapter does not relieve any other  
27 person from a liability that the person would otherwise incur, and  
28 does not authorize or permit recovery in excess of injury or damage  
29 actually incurred.

ARTICLE 3. BOATING SAFETY.

Sec. 05.25.400. BOATING SAFETY EDUCATION. The department, in cooperation with the Department of Education, shall offer public education programs designed to reduce boating accidents.

Sec. 05.25.405. SAFETY EQUIPMENT. (a) A boat operated on inland water shall carry and exhibit between sunset and sunrise at least one white light to show all around the horizon.

(b) A boat operated on inland water shall carry at least one readily accessible life preserver, lifebelt, ring buoy, or other device of the type approved by the United States Coast Guard for each person on board. A boat carrying passengers for hire shall carry at least one readily accessible life preserver of the type approved by the United States Coast Guard for passenger-carrying boats for each person on board.

(c) A motor-driven boat operated for hire shall carry a fire extinguisher capable of promptly and effectively extinguishing burning gasoline.

Sec. 05.25.410. ADDITIONAL EQUIPMENT. The commissioner may require by regulation that a boat or class of boats shall carry or install additional equipment necessary for the safety of persons and property. To the extent considered by the commissioner to be consistent with the safety of persons and property, the regulations must conform to the regulations of the United States Coast Guard for inland water.

Sec. 05.25.415. DIVER'S FLAG. A person who is in the water using an underwater breathing device may display a diver's flag constructed of rigidly supported material at least 12 inches by 12 inches in area of red background with a white diagonal stripe. The diver's flag may be displayed on a boat or surface float and must extend a

1 minimum distance of three feet from the surface of the water. The  
2 diver's flag shall be placed at or near the point of submergence and  
3 constitutes a warning that a diver is submerged and may be within 100  
4 feet of the flag. A diver shall remain within 100 feet of the diver's  
5 flag while at or near the surface. A boat operator within sight of a  
6 diver's flag shall proceed with caution, steering clear of the flag by  
7 a distance of at least 100 feet. If, because of the location of the  
8 diver's flag, it is impossible to steer clear of the flag by at least  
9 100 feet, then the boat operator shall proceed at no-wake speeds or  
10 five miles per hour, whichever is necessary to maintain steerage in  
11 the seaway. A diver's flag shall be displayed only while diving  
12 operations are underway.

13 Sec. 05.25.420. WATER SKIS AND SURFBOARDS. A person may not  
14 operate a boat on the inland waters of this state for towing a person  
15 on water skis, or a surfboard, or similar devices unless

16 (1) the boat is equipped with a rearview mirror in which the  
17 person being towed can be viewed; or

18 (2) there is in the boat a person 12 years of age or older,  
19 in addition to the operator, in a position to observe the progress of  
20 the person being towed.

21 Sec. 05.25.425. PROHIBITED OPERATION. (a) A person may not  
22 operate a boat or manipulate water skis, a surfboard, or a similar  
23 device on state water in a reckless or negligent manner so as to  
24 endanger the life or property of another person.

25 (b) A person may not operate or give permission for another  
26 person to operate a boat that is not equipped as required under this  
27 chapter and regulations adopted under this chapter.

28 ARTICLE 4. GENERAL PROVISIONS.

29 Sec. 05.25.900. ACCOUNTING AND DISPOSITION OF FEES. The

1 commissioner of administration shall separately account for fees col-  
2 lected under this chapter that the department deposits in the general  
3 fund. The annual estimated balance in the account may be used by the  
4 legislature to make appropriations to the department to carry out the  
5 purposes of this chapter.

6 Sec. 05.25.910. EXEMPTIONS. Except when inconsistent with  
7 federal laws and regulations, the commissioner may exempt from a  
8 provision of this chapter a class of boats if the commissioner deter-  
9 mines that the safety of persons and property will not be materially  
10 promoted by the applicability of the provision to the class of boats.  
11 The commissioner may not exempt a class of boats from the numbering  
12 requirements of this chapter unless the commissioner determines that  
13 the numbering will not materially aid in their identification and  
14 unless the Secretary of Transportation has exempted from numbering the  
15 same boats or class of boats.

16 Sec. 05.25.920. ENFORCEMENT. A peace officer may enforce this  
17 chapter and in the exercise of enforcement may stop and board boats  
18 that the officer reasonably believes are or may be subject to this  
19 chapter.

20 Sec. 05.25.930. PENALTIES. A person who violates a provision  
21 of this chapter is guilty of a misdemeanor and is punishable by a fine  
22 of not more than \$500, or by imprisonment of not more than six months,  
23 or by both.

24 Sec. 05.25.940. REGULATIONS. The commissioner shall adopt  
25 regulations necessary for the implementation of this chapter.

26 Sec. 05.25.990. DEFINITIONS. In this chapter, unless the con-  
27 text requires otherwise,

28 (1) "boat" means every type of watercraft used or capable  
29 of being used as a means of transportation on water, but does not

1 include aircraft equipped to land on water, boathouses, or personal  
2 flotation devices;

3 (2) "commissioner" means the commissioner of the Department  
4 of Public Safety;

5 (3) "dealer" means a person who engages wholly or in part  
6 in the business of buying, selling, or exchanging boats, either out-  
7 right or on conditional sale, bailment lease, chattel mortgage, or  
8 otherwise;

9 (4) "department" means the Department of Public Safety;

10 (5) "length" means the length of a boat measured from end  
11 to end over the deck excluding sheer;

12 (6) "motorboat" means a boat propelled in whole or in part  
13 machinery, including boats temporarily equipped with detachable  
14 motors;

15 (7) "operate" means to navigate or otherwise use a boat on  
16 water;

17 (8) "owner" means a person who has a property interest  
18 other than a security interest in a boat and the right of use or  
19 possession of the boat, but does not include a lessee unless the lease  
20 is intended as security;

21 (9) "ownership" means a property interest other than a  
22 security interest;

23 (10) "passenger" means a person on board a boat who is not  
24 the master, operator, crew member, or other person engaged in a capac-  
25 ity in the business of the boat;

26 (11) "state of principal use" means the state on whose water  
27 a boat is used or is to be used during most of a calendar year;

28 (12) "state water" means water within the territorial  
29 limits of the state, the marginal sea adjacent to the state, and the

1 high seas when navigated as part of a journey or ride to or from the  
2 shore of the state.

3 \* Sec. 2. AS 05.25.010, 05.25.012, 05.25.020, 05.25.030, 05.25.040,  
4 05.25.050, 05.25.060, 05.25.070, 05.25.080, 05.25.090, and 05.25.100 are  
5 repealed.

6 \* Sec. 3. This Act takes effect January 1, 1988.

1 IN THE HOUSE

BY THE TRANSPORTATION COMMITTEE

2 CS FOR HOUSE BILL NO. 94 (Transportation)

3 IN THE LEGISLATURE OF THE STATE OF ALASKA

4 FIFTEENTH LEGISLATURE - FIRST SESSION

5 A BILL

6 For an Act entitled: "An Act relating to boat numbering, accidents, and  
7 safety; and providing for an effective date."

8 BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

9 \* Section 1. AS 05.25 is amended by adding new sections to read:

10 ARTICLE 1. NUMBERING AND REGISTRATION.

11 Sec. 05.25.200. CERTIFICATE OF NUMBER REQUIRED ON BOAT. (a) A  
12 person may not operate a boat on state water, and an owner of a boat  
13 may not knowingly allow another to operate the owner's boat on state  
14 water, unless

15 (1) the owner of the boat holds a current, valid certifi-  
16 cate of number issued in the owner's name as owner

17 (A) under this chapter;

18 (B) by an agency of the federal government; or

19 (C) by the state of principal use that issued the  
20 certificate of number under a federally approved numbering sys-  
21 tem; and

22 (2) the certificate of number is carried on the boat in a  
23 manner that protects the certificate from the elements, and is avail-  
24 able for inspection by a state, federal, or municipal law enforcement  
25 officer.

26 (b) A certificate of number for a boat less than 26 feet in  
27 length and leased or rented to another for the latter's noncommercial  
28 operation of fewer than seven days may be retained on shore by the  
29 boat's owner or representative at the place from which the boat

1 departs or returns to the possession of the owner or the owner's rep-  
2 resentative. If the certificate of number is retained on shore, then  
3 a copy of the lease or rental agreement must be carried on the boat.  
4 The lease or rental agreement must

5 (1) be signed by the owner of the boat or the owner's  
6 representative, and by the person leasing or renting the boat; and

7 (2) specify the period for which the boat is leased or  
8 rented.

9 Sec. 05.25.205. IDENTIFYING NUMBER ON FORWARD HALF OF BOAT. (a)  
10 A person may not operate a boat on state water unless there is painted  
11 on or permanently attached to each side of the forward half of the  
12 boat a current, valid identifying number awarded to the boat

13 (1) under this chapter;

14 (2) by an agency of the federal government; or

15 (3) subject to the provisions of AS 05.25.215, by another  
16 state that awards identifying numbers under a federally approved  
17 numbering system.

18 (b) An identifying number shall be painted on or permanently  
19 attached to each side of the forward half of the vessel in a position  
20 that provides clear legibility for identification. Each number must  
21 read from left to right and must be in plain vertical block characters  
22 of good proportion not less than three inches in height. The number  
23 must be of a color that contrasts with the color of the background and  
24 shall be maintained so that it is clearly visible and legible. Each  
25 number must have spaces or hyphens that are equal to the width of a  
26 letter other than "I" or a number other than "1" between the letter  
27 and number groupings.

28 (c) On boats so configured that a number on the hull or super-  
29 structure would not be easily visible, the number shall be painted on

1 or attached to a backing plate that is attached to the forward half of  
2 the boat so that the number is visible from each side of the boat.

3 (d) A number other than the identifying number may not appear on  
4 the forward half of the boat.

5 Sec. 05.25.210. APPLICATION FOR BOAT NUMBER. (a) The owner of  
6 a boat that is operated principally on state water, or a dealer who  
7 wishes to demonstrate one or more boats on state water, shall apply to  
8 the department for an identifying number. The application must in-  
9 clude the true name of the owner, the residence or business address of  
10 the owner, a description of the boat or boats, and other information  
11 required by the department or under United States Coast Guard regula-  
12 tions. The application shall be signed by the owner and must be  
13 accompanied by the prescribed fee.

14 (b) A certificate of number may be issued to a dealer for use on  
15 more than one boat.

16 Sec. 05.25.215. APPLICATION BY OWNER HAVING NUMBER AWARDED BY  
17 FEDERAL GOVERNMENT OR ANOTHER STATE. The owner of a boat covered by a  
18 number that is still in effect and that has been issued under federal  
19 law or a federally approved numbering system of another state shall  
20 apply to the department for an identifying number within 10 days after  
21 the expiration of the applicable reciprocity period provided in  
22 AS 05.25.240(6) or (7).

23 Sec. 05.25.220. CERTIFICATE OF NUMBER FEES. (a) The commis-  
24 sioner shall adopt regulations establishing fees for original, renew-  
25 al, and duplicate certificates of number, and for dealer demonstration  
26 certificates of number.

27 (b) The fee for a certificate of number shall be prorated ac-  
28 cording to the number of months the certificate will be in effect.

29 (c) The fees in this section are in addition to any other tax or

1 license fee for a boat.

2 Sec. 05.25.225. ISSUANCE OF CERTIFICATE OF NUMBER AND VALIDATION  
3 STICKERS; STICKERS PLACED ON BOATS. (a) If the application is in  
4 order, the department shall issue to the owner a certificate of number  
5 that shall state the identifying number awarded to the boat, the name  
6 and address of the owner, the state of principal use, the normal use  
7 of the boat, the description of the boat, the manufacturer's hull  
8 identification number if one exists, make, year, length, type of hull  
9 material, type of propulsion and type of fuel, the issue date, and the  
10 expiration date of the certificate of number. The certificate of  
11 number shall be wallet size.

12 (b) The department shall issue a set of validation stickers  
13 bearing the year through which the certificate of number is issued.  
14 The year shall be indicated by the colors blue, international orange,  
15 green, and red, in rotation beginning with red for stickers that  
16 expire in 1988. A validation sticker must be approximately three  
17 inches square. The stickers shall be placed three inches to the rear  
18 of the identifying number placed on the boat as required under AS 05.-  
19 25.205.

20 Sec. 05.25.230. EXPIRATION OF CERTIFICATE OF NUMBER; RENEWAL OF  
21 CERTIFICATE AND STICKERS. (a) A certificate of number expires three  
22 years after the last day of the month in which the certificate is  
23 issued.

24 (b) The department may require the surrender of the expired cer-  
25 tificate of number before issuing a new certificate of number.

26 (c) The identifying number awarded to a boat by the department  
27 remains the same.

28 (d) An application for renewal of a certificate of number shall  
29 be made in the same manner as provided in AS 05.25.210. The

1 application shall be accompanied by the fee required under AS 05.25.-  
2 220. The department shall renew certificates of number and issue  
3 validation stickers in the same manner as provided in AS 05.25.225.

4 (e) A certificate of number issued under this chapter is invali-  
5 dated if

6 (1) the boat is subsequently documented or required to be  
7 documented;

8 (2) the boat is sold, destroyed, or abandoned;

9 (3) the applicant supplies false information in the appli-  
10 cation for the certificate;

11 (4) the fees for issuance or renewal of the certificate are  
12 not paid;

13 (5) 60 days have passed since the boat ceased to be used  
14 principally in the state; or

15 (6) the owner, through legal process, involuntarily loses  
16 the ownership interest in the boat for which the certificate is is-  
17 sued.

18 Sec. 05.25.235. REPORT OF TRANSFER, ABANDONMENT OR DESTRUCTION  
19 OF BOAT, OR CHANGE OF ADDRESS OF OWNER. (a) The owner of a boat for  
20 which a certificate of number has been issued under this chapter shall  
21 notify the department of any of the following events within 15 days  
22 after the event occurs:

23 (1) the transfer of all or a part of the ownership interest  
24 in the boat;

25 (2) the theft or recovery of the boat;

26 (3) the destruction of the certificate of number; or

27 (4) an event described in AS 05.25.230(e).

28 (b) Within 15 days after a change of address, the owner of a  
29 boat for which a certificate of number has been awarded under this

1 chapter shall report the change to the department.

2 Sec. 05.25.240. EXEMPTIONS. The following classes of boats are  
3 exempt from the provisions of AS 05.25.200 - 05.25.235:

4 (1) a boat that has a valid marine document issued by the  
5 United States Coast Guard;

6 (2) a foreign boat operated only temporarily in state  
7 water;

8 (3) a boat, other than a recreational type public boat,  
9 owned and operated by the United States or an entity or political  
10 subdivision of the United States, or owned and operated for government  
11 purposes by a state or an entity or political subdivision of a state;

12 (4) a ship's lifeboat;

13 (5) a boat belonging to a class of boats that has been  
14 exempted from the provisions of AS 05.25.200 - 05.25.235 by the de-  
15 partment under AS 05.25.910;

16 (6) a boat with a certificate of number issued by the  
17 United States Coast Guard, for a period of one year after the date of  
18 issuance;

19 (7) a boat with a current, valid certificate of number  
20 issued by another state having a federally approved numbering system,  
21 for a period of 60 days after arriving in the state; and

22 (8) a boat that is not propelled by machinery.

23 ARTICLE 2. BOATING ACCIDENTS.

24 Sec. 05.25.300. DUTIES OF OPERATORS AND WITNESSES AT ACCIDENTS.

25 (a) The operator of a boat involved in an accident that results in  
26 injury or death to a person or causes damage to property immediately  
27 shall stop the boat as close as possible to the scene of the accident  
28 and shall remain at the scene of the accident until the operator has  
29 fulfilled the requirements of (b) of this section.

1 (b) The operator of a boat involved in an accident resulting in  
2 injury or death to a person or damage to property shall

3 (1) give to the other operator, to the owner or a surviving  
4 occupant of the other boat or damaged property, or to another appro-  
5 priate person, the name, address, and identifying number of the boat  
6 that the operator is operating, and the name and address of any other  
7 occupants of the boat; and

8 (2) render reasonable assistance to every person injured in  
9 the accident, including the conveying or the making of arrangements  
10 for the conveying of the person to a physician, surgeon, or hospital  
11 for medical or surgical treatment, if it is apparent that treatment is  
12 necessary or if conveyance is requested by an injured person.

13 (c) A witness to the accident shall furnish to the operator,  
14 occupant, or injured person, the name and address of the witness.

15 Sec. 05.25.305. ACCIDENT REPORT REQUIRED. (a) The operator of  
16 a boat involved in an accident shall submit a report of the accident  
17 to the department in the form and manner the department prescribes if  
18 the accident results in

19 (1) the death of a person;

20 (2) injury to a person requiring medical treatment beyond  
21 first aid;

22 (3) the disappearance from the boat of a person under  
23 circumstances indicating death or injury;

24 (4) damage to the boat or other property in an aggregate  
25 amount of more than \$200; or

26 (5) complete loss of the boat.

27 (b) The department may require a person who submits an insuffi-  
28 cient report under this section to file a supplemental report, and may  
29 require a witness to the accident to submit a report to the

1 department.

2 (c) If the operator of a boat is incapable of submitting a  
3 required accident report, the owner of the boat, if different from the  
4 operator, shall submit the report or cause the report to be submitted.

5 (d) A report required under this section shall be submitted

6 (1) within 48 hours after the accident if a person dies  
7 within 24 hours after the accident;

8 (2) within 48 hours after the accident if a person is  
9 injured and requires medical treatment beyond first aid, or disappears  
10 from a boat; and

11 (3) within 10 days after the accident or death if an earli-  
12 er report is not required under this subsection.

13 Sec. 05.25.310. FORM OF REPORT; SENDING DEATH CERTIFICATE TO  
14 DEPARTMENT. (a) The department shall prepare and make available to  
15 the public forms for accident reports required under AS 05.25.305.  
16 The report form must call for the information required in casualty and  
17 accident reports under United States Coast Guard regulations and other  
18 information the department may require. The form must provide that  
19 the person who completes the form shall sign and date it upon com-  
20 pletion.

21 (b) The state registrar of vital statistics shall, on or before  
22 the 15th day of each month, forward to the department a copy of the  
23 death certificate covering each death that occurred during the second  
24 preceding calendar month and that resulted from a boat accident in  
25 state water.

26 Sec. 05.25.315. CONFIDENTIAL NATURE OF REPORT. (a) An accident  
27 report submitted to the department shall be without prejudice to the  
28 individual reporting and shall be for the confidential use of adminis-  
29 trative and enforcement agencies only.

1 (b) The department upon written request, shall, if available,  
2 disclose the following information to a party involved in the acci-  
3 dent, or, in the event of the party's death, to a member of the par-  
4 ty's family, or to the party's personal representatives:

5 (1) the identity of the owner, operator, and occupants, and  
6 the identifying number of a boat involved in an accident;

7 (2) the names of companies insuring the owner or operator;  
8 and

9 (3) the identity of witnesses to the accident.

10 (c) A report under AS 05.25.300 - 05.25.315 may not be used as  
11 evidence in a civil or criminal trial arising out of the accident.  
12 The department shall furnish, upon demand of a person who has or  
13 claims to have made a report or upon demand of a court, a certificate  
14 showing that a specified accident report has or has not been made to  
15 the department, solely to prove a compliance or a failure to comply  
16 with the requirement that a report be submitted to the department.

17 (d) The department shall compile and may analyze all accident  
18 reports and shall publish annually, or at more frequent intervals,  
19 statistical information relating to boat accidents.

20 (e) In response to a request from an authorized official or  
21 agency of the United States, or in compliance with United States Coast  
22 Guard regulations or any requirement under 46 U.S.C. 6101 - 6103, the  
23 department shall transmit information compiled or otherwise available  
24 to the department from the accident reports required under AS 05.-  
25 25.305.

26 Sec. 05.25.320. NOTICE OF ACCIDENT RESULTING IN DEATH OR DISAP-  
27 PEARANCE; DUTIES OF PASSENGERS. (a) When, as a result of an occur-  
28 rence that involves a boat or its equipment, a person dies or disap-  
29 pears from a boat, the operator shall, without delay, by the quickest

1 means available, notify the department of the

- 2 (1) date, time, and exact location of the occurrence;  
3 (2) name of each person who died or disappeared;  
4 (3) number and name of the boat; and  
5 (4) names and addresses of the owner and operator.

6 (b) When the operator of a boat cannot give the notice required  
7 under (a) of this section, each person on board the boat shall notify  
8 the department or determine that the notice has been given.

9 Sec. 05.25.325. APPLICATION OF AS 05.25.300 - 05.25.320. (a)  
10 Except as otherwise provided in this section or under AS 05.25.910,  
11 the provisions of AS 05.25.300 - 05.25.320 apply to all boats operated  
12 in state water, except when inconsistent with an applicable law or  
13 regulation of an agency of the United States, in which case the fed-  
14 eral law or regulation shall prevail.

15 (b) The provisions of AS 05.25.300 - 05.25.320 do not apply to

16 (1) a boat that has a valid document issued by the United  
17 States Coast Guard and that is operated only for nonrecreational  
18 purposes;

19 (2) foreign boats operated temporarily in state water only  
20 for nonrecreational purposes;

21 (3) a boat owned and operated for government purposes by  
22 the United States or by an entity of the United States; or

23 (4) a ship's lifeboat.

24 ARTICLE 3. BOATING SAFETY.

25 Sec. 05.25.400. BOATING SAFETY EDUCATION. The department, in  
26 cooperation with the Department of Education, shall offer public  
27 education programs designed to reduce boating accidents.

28 Sec. 05.25.405. SAFETY EQUIPMENT. (a) A boat operated on  
29 nonnavigable water shall carry and exhibit between sunset and sunrise

1 at least one white light to show all around the horizon.

2 (b) A boat operated on inland water shall carry at least one  
3 readily accessible life preserver, lifebelt, ring buoy, or other  
4 device of the type approved by the United States Coast Guard for each  
5 person on board. A boat carrying passengers for hire shall carry at  
6 least one readily accessible life preserver of the type approved by  
7 the United States Coast Guard for passenger-carrying boats for each  
8 person on board.

9 Sec. 05.25.410. ADDITIONAL EQUIPMENT. The commissioner may  
10 require by regulation that a boat or class of boats when operated on  
11 inland water shall carry additional equipment necessary for the safety  
12 of persons and property. To the extent considered by the commissioner  
13 to be consistent with the safety of persons and property, the regula-  
14 tions must conform to the regulations of the United States Coast Guard  
15 for water subject to the jurisdiction of the United States.

16 Sec. 05.25.415. DIVER'S FLAG. (a) A person who is in the water  
17 using an underwater breathing device may display a diver's flag con-  
18 structed of rigidly supported material at least 12 inches by 12 inches  
19 in area of red background with a white diagonal stripe. The diver's  
20 flag may be displayed on a boat or surface float and must extend a  
21 minimum distance of three feet from the surface of the water. The  
22 diver's flag shall be placed at or near the point of submergence and  
23 constitutes a warning that a diver is submerged and may be within 100  
24 feet of the flag. A diver shall remain within 100 feet of the diver's  
25 flag while at or near the surface. A diver's flag shall be displayed  
26 only while diving operations are underway.

27 (b) A boat operator within sight of a diver's flag shall proceed  
28 with caution, steering clear of the flag by a distance of at least 100  
29 feet. If, because of the location of the diver's flag, it is

1 impossible to steer clear of the flag by at least 100 feet, then the  
2 boat operator shall proceed at no-wake speeds or five miles per hour,  
3 whichever is necessary to maintain steerage in the seaway.

4 (c) A diver's flag under this section may be used with, but not  
5 in place of, an International Code flag "A" if required under 33  
6 U.S.C. following 1602 (Rule 27, International Regulations for Prevent-  
7 ing Collisions at Sea, 1972).

8 Sec. 05.25.420. PROHIBITED OPERATION. (a) A person may not  
9 operate a boat or manipulate water skis, a surfboard, or a similar  
10 device on state water in a reckless or negligent manner so as to  
11 endanger the life or property of another person.

12 (b) A person may not operate or give permission for another  
13 person to operate a boat that is not equipped as required under this  
14 chapter and regulations adopted under this chapter.

15 ARTICLE 4. GENERAL PROVISIONS.

16 Sec. 05.25.900. ACCOUNTING AND DISPOSITION OF FEES. The commis-  
17 sioner of administration shall separately account for fees collected  
18 under this chapter that the department deposits in the general fund.  
19 The annual estimated balance in the account may be used by the legis-  
20 lature to make appropriations to the department to carry out the  
21 purposes of this chapter.

22 Sec. 05.25.910. EXEMPTIONS. Except when inconsistent with  
23 federal laws and regulations, the commissioner may exempt from a  
24 provision of this chapter a class of boats if the commissioner deter-  
25 mines that the safety of persons and property will not be materially  
26 promoted by the applicability of the provision to the class of boats.  
27 The commissioner may not exempt a class of boats from the numbering  
28 requirements of this chapter unless the commissioner determines that  
29 the numbering will not materially aid in their identification and

1 unless the United States Secretary of Transportation has exempted from  
2 numbering the same boats or class of boats.

3 Sec. 05.25.920. ENFORCEMENT. A peace officer may enforce this  
4 chapter and in the exercise of enforcement may stop and board boats  
5 that the officer reasonably believes are or may be subject to this  
6 chapter.

7 Sec. 05.25.930. PENALTIES. A person who violates a provision of  
8 this chapter is guilty of a misdemeanor and is punishable by a fine of  
9 not more than \$500, or by imprisonment of not more than six months, or  
10 by both.

11 Sec. 05.25.940. REGULATIONS. The commissioner shall adopt  
12 regulations necessary for the implementation of this chapter.

13 Sec. 05.25.990. DEFINITIONS. In this chapter, unless the con-  
14 text requires otherwise,

15 (1) "boat" means every type of watercraft used or capable  
16 of being used as a means of transportation on water, but does not  
17 include aircraft equipped to land on water;

18 (2) "commissioner" means the commissioner of the Department  
19 of Public Safety;

20 (3) "dealer" means a person who engages wholly or in part  
21 in the business of buying, selling, or exchanging boats, either out-  
22 right or on conditional sale, bailment lease, chattel mortgage, or  
23 otherwise;

24 (4) "department" means the Department of Public Safety;

25 (5) "inland water" means water that is inland of the terri-  
26 torial sea baseline and not subject to the jurisdiction of the United  
27 States;

28 (6) "length" means the length of a boat measured from end  
29 to end over the deck excluding sheer;

1 (7) "motorboat" means a boat propelled in whole or in part  
2 by machinery, including boats temporarily equipped with detachable  
3 motors;

4 (8) "nonnavigable water" means lakes, rivers, and other  
5 waterways in the state that are not classified under federal law or  
6 regulation as navigable water of the United States and to which  
7 33 U.S.C. 1601-1608 do not apply;

8 (9) "operate" means to navigate or otherwise use a boat on  
9 water;

10 (10) "owner" means a person who has a property interest  
11 other than a security interest in a boat and the right of use or  
12 possession of the boat, but does not include a lessee unless the lease  
13 is intended as security;

14 (11) "ownership" means a property interest other than a  
15 security interest;

16 (12) "passenger" means a person on board a boat who is not  
17 the master, operator, crew member, or other person engaged in a capac-  
18 ity in the business of the boat;

19 (13) "state of principal use" means the state on whose water  
20 a boat is used or is to be used during most of a calendar year;

21 (14) "state water" means water within the territorial limits  
22 of the state.

23 \* Sec. 2. AS 05.25.010, 05.25.012, 05.25.020, 05.25.030, 05.25.040,  
24 05.25.050, 05.25.060, 05.25.070, 05.25.080, 05.25.090, and 05.25.100 are  
25 repealed.

26 \* Sec. 3. This Act takes effect January 1, 1988.

**BACKGROUND/LEGISLATIVE INTENT**

This Act amends AS 05.25 by adding sections requiring boats to register with the Department of Public Safety, to display registration numbers on the boat, and to maintain a current registration on the boat when in operation. This bill also contains provisions for the reporting of accidents and boating safety requirements.

**ANALYSIS OF BILL/PROGRAM EFFECTS**

The Department of Health and Social Services supports the passage of HB 94 and its intent to reduce boating accidents and their associated deaths and injuries. Unintentional injuries are the leading cause of death in Alaska. Among the causes of these injuries, water transport related deaths are second only to deaths from motor vehicle accidents. In 1985 there were 94 deaths reported related to water transport accidents and 25 additional deaths due to drowning were recorded.

This bill includes the provision of boating safety education programs. DHSS has developed a water safety curriculum for children ("Cold Water Winners"). In cooperation with the Dept. of Public Safety, the University of Alaska's Marine Advisory program, and various private agencies, DHSS has also developed an extensive marine safety and survival curriculum. The continuation of these activities should be supported by the passage of this bill. Appropriations made to carry out the purposes of this bill should specifically include the provision of boating safety training as well as the administration of registration and accident reporting functions.

**AMENDMENTS PROPOSED**

N/A

HOUSE TRANSPORTATION COMMITTEE

HB 94

SAFE BOATING BILL.

CDR G. M. HARBEN, USCG

CDR D. M. WALDRON, USCG

Since the turn of the century, boating has steadily grown to become one of the nation's most popular pastimes.

Correspondingly, the boating accident statistics have also grown. As the years went by the Congress enacted several pieces of legislation to deal with the growing problem. Finally, on August 10, 1971, the Federal Boat Safety Act was signed into law establishing minimum standards which would provide the public with reasonably safe boats and equipment. At the same time the Act stressed the need for the individual states to enact equivalent legislation of their own, thus motivating the public to boating safety awareness through public education and operator and equipment requirements.

With the enactment of the Federal Boat Safety Act of 1971, the vast majority of states have recognized the inherent dangers associated with boating and during the ensuing years, 49 states have enacted boating safety legislation which squarely faced the problems head on. Their actions and subsequent programs have significantly turned the tide of rising boating accidents and deaths within their states. These programs have received national acclaim for the advancements that have been made in the field of boating safety education and public protection.

To better coordinate their activities among themselves, the National Association of State Boating Law Administrators (NASBLA) was formed to serve as a viable public forum for reviewing and improving upon the federally approved state boating programs.

In Alaska, the only state where there is no Federally approved state boating program, the Coast Guard acts as the boating law administrator for areas that fall under Federal jurisdiction. Consequently, because of this very limited Federal Boating Safety Program, Alaska's boaters are paying dearly through personal injury, loss of life and loss of property. In 1985 70 people lost their lives in recreational boating accidents, 70% of these tragedies occurred on inland Alaskan waters such as lakes, rivers and sheltered waters.

This was second only to motor vehicle fatalities as the largest category of accidental deaths. When this figure is compared with the rest of the United States, Alaska has by far the worst boating record --- over 40 times the National average. Only California (76) and Texas (72) had more fatalities and these states have 24 times the number of registered boats.

Another thing to be remembered in the case of California, is that the boating season in many areas of the state lasts year round, unlike Alaska, which has a boating season of 6 months or less.

It is evident from these statistics that Alaska has a severe boating problem when compared to the rest of the United States. What can we do to solve this problem or at least bring it under control?

The most effective and proven means for dealing with this problem

would be to legislate a comprehensive state boating safety program.

How is a state boating safety program going to change Alaska's unenviable record of boating activity?

First of all, it will identify and charge a state agency with the responsibility for implementing a coordinated boating safety program. Not just another law enforcement program of the Department of Public Safety, but more importantly a means to implement a comprehensive public education program.

Why an education program?

With a state as vast as Alaska the emphasis needs to be focused on public education. The resources and expertise of the Department of Education would be utilized to assist in the development and operation of a public education program. In addition, the Coast Guard can be called upon for assistance, training and advice for program development in order to establish effective programs.

How would public protection be handled with the new law?

In addition to the education program, incorporation of the Federal boating regulations into the state boating law would provide procedures and policies for dealing with violators, as well as provide for the minimum operator requirements for safety equipment

and boat operation. Specific sections of the act will empower state law enforcement officials with the necessary authority to carry out its provisions. Existing manpower from the Alaska State Troopers and the Fish and Wildlife Protection could be utilized for public protection purposes without the necessity of recruiting more personnel to enforce boating laws.

The Coast Guard does not have access or jurisdiction to the inland areas where most of the fatalities occur. Each year the number of complaints received by the Alaska State Troopers, the Coast Guard and other state and federal agencies concerning the negligent operation of boats continues to mount, especially along the inland rivers.

With the passage of a state boating safety act, where will the revenues come from to administer these programs?

There is a National Recreational Boating Safety Financial Assistance program, for these states with a federally approved safe boating program.

In-state revenue available would be would be moneys generated by a state operated boating registration program. At the present time this program is administered on behalf of the Federal government by the Coast Guard in Juneau, with all the revenues from this program being deposited in the U. S. Treasury. None of the revenues remain in Alaska!!

What advantages are there to numbering boats?

Most importantly, boats need to be numbered to aid in search and rescue. For example, if a boat is found adrift or capsized, in just a matter of minutes the boat owner can be identified through the numbers on the hull and a check can be made with owner, relatives or neighbors to if there was anyone on board or if the boat was just adrift.

The boat registration program also provides an added benefit for the prospective boat buyer. Financial institutions will more readily lend money for the purchase of boats if some form of previous ownership can be provided.

Boat numbers also fulfill other useful purposes. Among them law enforcement, educational contact, accident reporting and consumer defect notification. Whether used for tracing a person for the negligent operation of a boat, to provide boating safety materials, or notify a consumer of a possible product defect, it helps protect and serve the public welfare.

With the passage of a comprehensive state boating safety program won't the Coast Guard reduce its efforts in boating safety in Alaska?

Quite the contrary, the Coast Guard has a dedicated commitment to boating safety in Alaska. The presence of a state boating safety

program would lend a new dimension to the Coast Guard's role in this area. Specifically, the Coast Guard would assist the State in establishing its own program, provide training to State law enforcement officers and work hand in hand with State and local agencies.

But what if the legislature fails to enact a state boating safety law, what will the consequences be?

With no possibility of the Coast Guard expanding their boating program, the number of boating accidents and fatalities will continue to soar as the boating population grows.

Without a doubt the proposed state boating law will provide the boaters of Alaska with a program designed to meet their special needs without burdening the non-boater.

#### COAST GUARD ASSISTANCE

1. Training and assistance will be provided by the Coast Guard for initial development of educational programs.
2. Initial training of law enforcement officers to assist in the development of an effective public protection program.
3. The Coast Guard will continue its coastal boarding program for enforcement of boating safety laws.

4. The Coast Guard will continue with present educational programs --- in relation to the Coast Guard Auxiliary.

5. The Coast Guard will remain a viable support agency for state assistance.

#### ADVANTAGES TO STATE IN ESTABLISHING A BOATING SAFETY PROGRAM

1. The State will assume management, administration and control of the program.

2. Revenues will remain in Alaska, available for state usage, instead being deposited with the Federal government.

3. Offers programs and protection to the entire state, not just coastal areas.

4. The means of reducing Alaska's tragic boating fatality statistic.

MEMORANDUM

TO: Representative Robin Taylor

ATTN: Elsa Froehlich Demeksa

FROM: Mary Jennings *mq*  
Legislative Analyst

RE: State Assumption of Boat Registration and Safety Programs  
Research Request 87.090

You requested that we provide: 1) an estimate of costs and revenues that would result if the State were to begin a boat registration program; 2) a discussion of the benefits of a State boating safety program; and 3) a discussion of costs and revenues of boat registration and boating safety programs in Washington, Oregon, Texas and California.

Background

In other states, the fees generated from registration and titling of undocumented or pleasure boats are used to provide boating safety programs. These programs enforce registration of boats in both inland and coastal waters, enforce safe boating regulations, and provide education to the public on safe boating practices. Alaska is the only state that does not require statewide registration of undocumented boats and, as a result, does not have a boating safety program. According to the U.S. Coast Guard, the minimal enforcement of boating safety regulations that occurs in Alaska results in improperly equipped pleasure boats and a general lack of safe boating practices. The Coast Guard notes that Alaska has the highest boating fatality rate in the nation.

Federal law requires all boats that operate in coastal waters to be numbered. In Alaska, the Coast Guard presently registers undocumented power boats used in coastal waters. The Coast Guard charges a two dollar renewal fee, which is deposited into the U.S. treasury. The Coast Guard provides this service for an estimated annual cost of \$53,000. Registration generates approximately \$70,000 in annual revenues.

**Registration Fees.** The Coast Guard estimates that if boating registration were enforced by the State in both coastal and inland waters, approximately 50,000 boats would be registered. Fees for registration in other states range from one dollar to \$50. An annual fee of \$10 dollars

Representative Taylor  
January 27, 1987  
Page 2

(\$30 per three years) is recommended by the Coast Guard. At present, there are 1,200 vessels with Alaska numbers from Washington, Oregon, and other west coast states. The Coast Guard recommends that out-of-state boats be charged \$50 per year.

**Operating Cost and Revenues.** If Alaska were to initiate a boat registration program, the Coast Guard stated that the present boat registration computer system could be used by the State. (Software changes would be required to provide titling capability.) The Coast Guard estimates that costs to start the registration operation would be \$35,000 and that annual operating costs would be approximately \$95,000. Based upon the number of boats estimated to be eligible for registration and the suggested fees, the Coast Guard estimates that annual revenues would be \$550,000 (for a breakdown of data, see Attachment A).

**Federal Funds.** States with boating safety programs are eligible to receive federal funds to enhance their programs. One-third of a \$30 million dollar fund, which is appropriated annually by Congress, is divided equally among states and the remainder is distributed based upon the number of vessels registered in the state and the amount of money spent by the state for boating safety. The Coast Guard estimates that Alaska would receive approximately \$250,000 in federal funds if a boating safety program were initiated.

**Benefits.** A program that enforced boating regulations and provided education on safe boating practices would likely result in greater safety in Alaska's waters. In addition, the initiation of a State boat registration and a boating safety program would likely result in the creation of several jobs. Based upon the number of boats, the Coast Guard estimates that 2.2 positions would be needed to administer registration. Personnel would also be needed for enforcement and for safety education. Funding for these jobs could come from registration fees and federal funds.<sup>1</sup>

#### Washington

Boating registration and boating safety programs in Washington are administered by the Department of Parks and Recreation. The department reports that approximately 150,000 boats are registered in the state. An annual registration fee of \$6 is charged. In addition to this fee, an excise tax based on 0.5 percent of the depreciated value of a boat is charged. The title fee is \$5. Revenues are deposited into the state's general fund. Counties in Washington are allowed to charge an additional 50 cents per foot; these revenues are kept at the county level. Washington collects approximately \$5 million in annual registration fees. The state's boating safety program has an annual operating cost of approximately \$300,000, which includes the cost of registration administration, educational programs, and some limited enforcement of regulations.

-----  
<sup>1</sup>Although the State Constitution prohibits and dedication of user fees to a program's budget, the legislature has routinely appropriated program receipts to the program that generated the revenue.

Representative Taylor  
January 27, 1987  
Page 3

Robert Porterfield, of the Washington Department of Parks and Recreation, stated that revenue raised from boat registration is viewed as a means of providing money to the state's general fund in addition to providing funds to operate the boating safety program. He added that because funding is not appropriated to local governments for the enforcement of boating registration, compliance is poor. He felt that only about half of all eligible boats in the state were registered.

### Oregon

Oregon, which has 143,000 registered boats, collects approximately \$1.5 million annually in boat registration and title fees. Registration fees are based upon a sliding scale and range from \$11 for a boat less than 12 feet to \$21 for a boat over 20 feet. A \$7 fee is charged to title boats. Revenue generated from boat registration is dedicated to the Marine Board Fund, which is used for the boating safety program and construction of boating facilities. The state spends approximately \$500,000 annually to operate its boating safety program. The Oregon State Marine Board, which administers the program, stated that these operating costs include registration administration, law enforcement, and safety education.

Paul Donhuffner, of the State Marine Board, stated that because Oregon dedicates boat registration fees to a fund for boating-related functions, compliance with registration is excellent. He said that this was because Oregonians feel the fees are justified because they are used to improve aspects of boating in Oregon.

### Texas

Boating registration and safety in Texas is administered by the State Department of Parks and Wildlife. Approximately 605,000 boats are registered in Texas. Fees for registration range from \$12 for a 16-foot boat to \$30 for a boat over 40 feet. A title fee of \$5 dollars is charged for all boats over 14 feet. All revenue is deposited to the State Parks and Wildlife Fund which is used for boating safety and other related programs. The department was not able to provide operating and revenue data, but stated that 23 full-time and 12 seasonal employees are utilized to operate the registration and safety program.

Jim Ramsey, of the department, stated that the boating safety program utilizes game wardens who are specifically assigned to water safety patrol and enforcement of safety regulations. He added that state law requires that each boat registration document be accompanied by a pamphlet on boating safety when mailed to the boat owner.

Representative Taylor  
January 27, 1987  
Page 4

## California

The California Department of Boating and Waterways reports that approximately 650,000 boats are registered in the state. A \$9 fee is charged to initially register undocumented boats and thereafter a \$5 annual renewal fee is charged. The department reports that \$4.8 million is collected annually in boat registration fees. All revenues are deposited into the Harbor and Water Craft Fund, which is used for the boating safety program.

The operating cost of the boating safety program, which includes registration administration, enforcement, facility construction, and education programs, is approximately \$6.1 million. According to David Johnson, the legislative coordinator for the department, the program also receives revenue from a boat gasoline tax. Mr. Johnson stated that California has good compliance with its registration and safety laws.

I hope you find this information useful. I have requested a copy of the boat registration fee schedules in the other states from the National Association of Safe Boating Law Administrators. I will send it to you when I receive it. Please feel to contact me if you have any questions.

The Honorable Robin Taylor  
House of Representatives  
P.O. Box V  
Juneau, Alaska 99811

Dear Representative Taylor:

All States except Alaska received at least \$200,000 in federal funds for boating safety last year. Alaska's share would have been about \$250,000. The recreational (not commercial) boating accident death rate in Alaska is forty times the national average. Alaska is the only state that has the Federal Government selling boat registration to its citizens with the funds going to the U.S. Treasury.

I hope that I have sufficiently aroused your interest enough to review the attached information. One or more of your colleagues will be entering legislation this session regarding boating safety and registration for the State of Alaska. The potential benefit to the citizens of Alaska is quite evident, as well as the need for state involvement in the safety and welfare of thousands of boaters.

If you are interested in discussing this area of mutual concern, please call me at 586-7349 or feel free to stop by at 612 Willoughby Street.

Sincerely,

A handwritten signature in cursive script, appearing to read "D. M. Waldron".

D. M. WALDRON  
Commander, U. S. Coast Guard  
Marine Safety Office Juneau, Alaska  
Commanding Officer

COST/BENEFIT ANALYSIS  
BOAT REGISTRATION, STATE OF ALASKA

Background:

The Coast Guard presently registers undocumented power boats used in the coastal waters of Alaska. Estimated costs for this service is as follows:

|   |           |
|---|-----------|
| Personnel 1.1 man years                                       | \$35K     |
| Computer Generated Forms                                      | 8K        |
| Postage   | 5K        |
| Overhead (office space, computer, etc.)                       | <u>5K</u> |
| Estimated costs based on 30,000 boats, renewals every 3 years | \$53K     |

Renewal Fees at \$2 per year have averaged about \$70K to the U.S. Treasury.

Proposal: That the State of Alaska establish a boating registration program and eventually a boating safety program. All power boats in the state would be required to be registered, not just in coastal (Federal) waters. It is estimated that this would be at least 50,000 vessels. Fees for other states range from \$1 per year to over \$50 per year. An annual fee of \$10 (\$30 for 3 years) is suggested. At present there are about 1200 vessels with Alaska numbers from Washington, Oregon, and other west coast states. It is recommended that out of state boats be charged \$50 per year. The present computer system's use could be negotiated for use by the state. Software changes would be required to provide titling capability and would cost about \$25K. Costs are estimated as follows: (based on 50K boats, 3 year renewal)

Operating Costs

|                         |            |
|-------------------------|------------|
| Personnel 2.2 man years | \$60K      |
| Forms                   | 15K        |
| Postage                 | 10K        |
| Overhead                | <u>10K</u> |
|                         | 95K        |

Startup Costs

|                        |           |
|------------------------|-----------|
| Furniture, Setup Costs | \$ 5K     |
| Software Changes       | 25K       |
| Computer Terminals     | 3K        |
| Misc Expenses          | <u>2K</u> |
|                        | 35K       |

Total first year expenses \$130K.

First year estimated revenues (at \$10/boat, \$30 for 3 years)

|  |             |            |
|--|-------------|------------|
| 1/3 X present 30K boats                | 10Kx\$30 =  | 300K       |
| New Vessels (not presently registered) | 10Kx\$30 =  | 300K       |
| Out of State Vessels (\$150 for 3 yrs) | 400x\$150 = | <u>60K</u> |
|  | TOTAL       | 660K       |

Second year

|                            |            |
|----------------------------|------------|
| 1/3 present vessels (10K)  | 300K       |
| New Vessels (5K)           | 150K       |
| Out of State Vessels (.4K) | <u>60K</u> |
|                            | TOTAL      |
|                            | 510K       |

Third year

|                           |      |
|---------------------------|------|
| 1/3 present vessels (10K) | 300K |
| New Vessels (3K)          | 90K  |
| Out of State (.4K)        | 60K  |
| TOTAL                     | 450K |

Fourth year

|                         |      |
|-------------------------|------|
| Registered Vessel (20K) | 600K |
| New Vessels (2K)        | 60K  |
| Out of State (.4K)      | 60K  |
| TOTAL                   | 720K |

Revenues should tend to stabilize (at about 50K boats) at \$500-600K.

There are many other benefits that are not easily quantified as follows:

- a. Enforcement of boating safety regulations - At present, federal enforcement is minimal in most areas of Alaska resulting in pleasure vessels not properly equipped for Alaskan waters.
- b. Fee for present registration not remaining in the state.
- c. Federal funds in excess of \$250K are being lost because of lack of boating safety program.
- d. Present fatality rate for a summer month recreational boating season is 40 times the national average. An equivalent death rate in Minnesota per 100,000 boats would be 1694 deaths! The loss of 70 Alaskans last year is hard to ignore or put a price tag on.
- e. The creation of jobs for boating registration and boating safety utilizing revenue from the registration program and federal funds would benefit Alaska especially at this time.
- f. The mechanism for assessing local user fees based on the zip code of the boat owner could be implemented in the software changes. This would provide equitable, low cost collection of local user fees.
- g. Alaskans would have a vested interest in having vessels comply with safety standards and registration requirements.
- h. Harbormasters would have better control over vessels in their harbors and enforcement authority to require vessels to comply.
- i. Excess registration and federal grant funds would be available for law enforcement equipment and for hiring additional personnel.
- j. Federal enforcement would probably remain at current levels.

## SAFE BOATING BILL

### Questions and Answers

Q. Why does the Coast Guard want Alaska to pass a Boating Bill?

A. Because Alaska has the highest boating death rate in the U.S.

Because the Coast Guard does not have jurisdiction over all waters of the state and there is no law applicable to many Alaskan boats.

Because a law forms the basis from which to educate people on a local level, on how they should equip their boats for their own safety.

Because an acceptable law will allow the federal government, through the Coast Guard, to enter into a mutual agreement with the state for conducting a coordinated educational program (and enforcement when and where necessary) throughout the state.

Because the state can receive federal funds to assist in boating safety activities.

Q. How can you legislate safety on boats?

A. You can't really. People must be simultaneously educated regarding the NEED for safety. A good example is traffic laws. They don't prevent all the accidents and deaths on the road - but they do give most people a safe guideline by which to drive.

Q. Would the state law be similar to federal law?

A. Yes. It would require boats to carry the same equipment required by Federal law. At present in Alaska there is no law requiring such things as red and green lights at night, fire extinguishers on boats of appropriate size and type, Coast Guard aproved life-saving devices, etc.. In 61% of the 1985 fatalities, either there were no personal flotation devices on board or approved devices that were accessible were not used.

Q. Why would the state want to take over the job of boat registration from the Coast Guard?

A. Net revenues to the state could amount to over 300K. This is

A. If past statistics can prove a point . . . YES!. Since the passage of the Safe Boating Law of 1971, fatalities have decreased across the nation by 30% while the number of boats has increased by 50%. This statistic has to prove that a better educated public is a safer public. The Bill will provide a springboard for education and reasonable enforcement to the safety of all, and by this it will hopefully reduce our tragically high boating accident fatalities.

Q. Where can answers be obtained to questions not listed here?

A. Contact: Chief, Boating Safety Division  
Seventeenth Coast Guard District  
Box 3-5000  
Juneau, AK 99802-1217  
PH: 907 586 7072

FY 1986  
\$27992250.00

12 February 1987

The Honorable B. Cato  
Alaska House of Representatives  
P. O. Box V  
Juneau, AK 99801

Dear Representative Cato:

These statistics were obtained from various states concentrating on when they adopted their Safe Boating Law, annual fatalities, and most important the number of registered boats. In some cases, although the number of fatalities did not decrease, they remained level while the number of registered boats increased drastically.

| Year Passed | State, Reg Boats and<br>Fatalities That YR | 1985 Reg Boats and<br>Fatalities |
|-------------|--|----------------------------------|
| 1972        | Arizona<br>62,912(6)                       | 111,702(6)                       |
| 1974        | Delaware<br>27,251(7)                      | 39,875(2)                        |
| 1974        | Florida<br>248,898(82)                     | 537,086(65)                      |
| 1977        | South Carolina<br>160,336(41)              | 221,322(17)                      |

Similar statistics continue for other states. A State Education Program has a positive effect on reducing fatalities even in the face of increased boating activity.

Thank you for any support you can lend to this effort in Alaska. Enclosed are copies of this letter for all House Transportation Committee members.

Sincerely,

G. M. HARBEN  
Commander, U. S. Coast Guard  
Chief, Boating Safety Division  
Seventeenth Coast Guard District

ANALYSIS: (Attach a separate page if necessary)

This fiscal note contains a 3% inflation factor. Equipment costs on five boats are one-time costs and will not continue beyond FY 88.

FY 88 funding level in Personal Services and Travel lines assumes start-up of January 1, 1988.

CONTINUATION OF FISCAL NOTE ANALYSIS

For Bill/Resolution No. CSHB 94 (TRSP)

\* FY 88 - with program implementation effective on January 1, 1988 - budget estimates include start-up costs for equipment: 5 boats, \$125.0; 5 vehicles, \$41.4; enforcement and training position costs, \$192.2. FY 89 (and each fiscal year continuing) salary and benefit costs are summarized: Administrative Officer, Accounting Clerk, Education Specialist, Publication Specialist, 2 Data Processing Clerks, Clerk Typist; and 10 Compliance Officers (Seasonal): \$395.8. Space will come from currently available facilities; utilities, communications, travel, commodities, and office equipment needs are estimated for each position.

Costs are derived from broad-brush estimates due to short time-frame preparation. A 3% inflation rate is added.

I. Restricted

Federal funds for boat safety training may be available in the sum of \$250.0 for the first year and approximately \$290.0 for subsequent years.

II. Unrestricted Revenues (see chart pg. 3)

Notes:

1. Boat registration fee, average, is \$30 triennial.
2. According to our estimates, by the fourth year there will be approximately 50,000 boats registered.
3. Of the 30,000 boats already registered, we estimate 33 1/3% (or 10000 boats) will register during the 1st year, 10000 in the 2nd year, and the remainder (10000) in the 3rd year.
4. Register 6,600 boats currently not registered during each year for three years (Coast Guard estimates 20,000 boats not registered). Anticipate three-year period before majority of citizens would be in compliance.
5. Estimate \$17.0 in fines levied per year.

The Education Specialist would be responsible for designing a boating safety program in coordination with Federal, State, and local authorities, as well as with private organizations. This position would be responsible for traveling to many of the cities throughout the state in order to put on training classes each year.

This position will train other departmental employees on how to conduct boating safety education training. This individual will be the unit supervisor.

Page 13 of 13  
 Revised Date

FY 88

BILL NO: HB 94

DATE: February 27, 1987

TITLE: An Act relating to  
boat numbering,  
accidents, and safety;  
and providing for an  
effective date

CONTACT: James D. Vaden

DEPARTMENT OF  
PUBLIC SAFETY

This bill was drafted to allow the State of Alaska to receive federal funds for registering boats in Alaska.

This bill would require the Department of Public Safety to:

1. Develop a boating numbering system;
2. develop and maintain a record keeping system;
3. develop an accident reporting system;
4. develop and present a boating safety education program;
5. promulgate regulations.

As a result of this bill, extensive public information and education would be required prior to implementation or enforcement.

Federal funding is available until April 1, 1989. These funds are distributed to the states using the following criteria:

- a. one-third of funds are allocated equally each fiscal year among eligible states;
- b. one-third of funds based on reported number of vessels registered;
- c. one-third of funds based on state obligations and expenditures for RSB programs during the prior fiscal year.

This would give the state approximately \$250.0 for the first year, and up to \$290.0 thereafter.

In order to receive funds from the Aquatic Resource Trust Fund, the Department must provide the following:

1. There are sufficient state matching funds available from general revenues, vessel numbering and licensing fees, state marine fund tax, or from a fund established from those funds to finance a state recreational boating safety program.
2. An approved vessel numbering system.
3. Cooperative boating assistance program between the U.S. Coast Guard and the state to include:

(Continued on page 2)

- a. law enforcement,
  - b. accident investigation,
  - c. search and rescue,
  - d. marine events,
  - e. Coast Guard Auxiliary assistance on state waters.
4. Adequate patrol to insure laws are enforced to include:
- a. sufficient uniform patrol to insure compliance with all aspects of boating safety and regulations,
  - b. that the individuals have received in-service training,
  - c. procedures to selectively assign individuals to vessel traffic.
5. Adequate boating education programs:
- a. must meet or exceed minimum standards established by the National Association of State Boating Law Administrators,
  - b. classes must be offered both in classroom and through correspondence.
6. Approved system for reporting marine fatalities.

As with most federal funds which require certification that the grantee has complied, the requirements and audits become more stringent with the passage of time. In this case, boat registration and record keeping could be accomplished with one or two clerks. Analyzing accident data would initially require the collection and input of the data, the analysis, and an Annual Report. If the number of accidents reported remain constant (62 in 1985), this could be accomplished by a part-time clerk. However, this bill requires all accidents with more than \$200.00 damage be reported; there are few accidents that would not involve \$200.00 damage. If those are reported, it could result in a significant quantity of work.

The Coast Guard requires uniformed officers to patrol and enforce the state's laws and regulations concerning boating safety. This could create a tremendous responsibility if we are expected to patrol all state waters, to include the three-mile limit and virtually all streams and lakes.

Certainly we could be asked why we are not patrolling the Kenai River during peak salmon runs, or Big Lake during the summer. Neither the Troopers nor Fish and Wildlife Protection have the manpower available for these patrols. Additionally, the bill requires in-service training for officers who are assigned these enforcement responsibilities.

(Continued on page 3)

In order to fully comply with the bill and the Coast Guard's requirements, we would need some level of enforcement officer assigned to nearly every community which enjoys recreational boating activities.

The following amendments are proposed:

AS 05.25.200(a)(2). It is not feasible to keep the Certificate of Number on a boat unless it is produced in such a manner that it would be protected from the elements.

AS 05.25.220. Should be rewritten to include a fee to be paid by a dealer which would include a certificate to be displayed, if requested, when demonstrating a boat. Fees under this section should be established by regulation.

AS 05.25.225. Fees should be set by regulation.

AS 05.25.225 (c). Amended to read: "The registration fees in this section are in addition to any other tax or license fee."

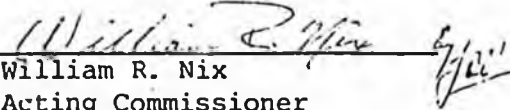

AS 05.25.230 (b). Amended to read: "The Department shall design and issue a set of validation stickers bearing the year through which the Certificate of Number is issued. The validation sticker must be three inches square and shall be placed three inches to the rear of the identifying number, when placed on the boat as required by AS 05.25.205."

AS 05.25.235. Amended to read: "The Department of Public Safety shall develop procedures for a staggered registration system."

AS 05.25.245. Seems awkward. Perhaps this could be entitled "Exceptions." AS 05.25.200, etc., do not apply.

Article 2. Sections 05.25.300, 305, 310, 315, 320 need to be rewritten. Should start with duties to others, immediately report, exchange information, file written reports, etc.; something to keep it in chronological order.

Section 05.25.330. Addresses owners civil liability. We are not accustomed to seeing this type of information in bills of this nature. Normally we address the owner's financial liability.

  
William R. Nix  
Acting Commissioner  
Department of Public Safety

# STATE OF ALASKA

DEPARTMENT OF PUBLIC SAFETY

OFFICE OF THE COMMISSIONER

STEVE COWPER, GOVERNOR

P.O. BOX N  
JUNEAU, ALASKA 99801-2200  
PHONE: 465-4322

March 9, 1987

The Honorable Robin Taylor  
Alaska State Legislature  
P.O. Box V  
Juneau, AK 99811

Dear Representative Taylor:

We have the following suggestions for CSHB94.

Section 05.25.200(a)(2) states, "The certificate of number is carried on the boat in a manner that protects the certificate from the elements, and is available for inspection by a state, federal, or municipal law enforcement officer."

If we want a certificate carried on open boats, we should design it so it could be kept on board and protected from the elements. Perhaps a card embossed on plastic like a credit card would be appropriate.

Section 05.25.210, entitled "Application for Boat Number," should probably be entitled "Application for Dealer Certificate." I do not believe it is possible to describe the boat or boats (see line 10, page 3 of the working draft dated 3/06/87). Instead, this certificate should identify the dealer and the lengths of vessels which can be operated or demonstrated under the certificate. This would also allow us to charge different dealers different fees.

Section 05.25.225 should be entitled "Issuance of certificate and validation decals."

I find 05.25.200, 05.25.205, and 05.25.225(b) confusing as written. Section 05.25.225(b) should be broken down and include display of decals, placement of numbers, and carrying and displaying certificate, under Section 05.25.200.

Section 05.25.230 should be entitled "Expiration and Renewal of Certificates." We do not need to address "stickers" in any event; they should be addressed as "decals."

March 9, 1987

If we charge an appropriate fee of \$10.00 per year for an outboard, we would collect \$30.00 for the certificate. However, if we charge \$100.00 or more for a \$100,000.00+ yacht, they may have to pay \$300.00 up front. Unless the Coast Guard's computer cannot handle it, perhaps it would be more reasonable to propose a two-year certificate, at \$15.00 per year, particularly since the certificate becomes void if the vessel is transferred.

Section 05.25.320 should be renumbered to 05.25.305.  
Section 05.25.305 should be renumbered to 05.25.310.  
Section 05.25.310 should be renumbered to 05.25.315, and  
Section 05.25.315 should be renumbered to 05.25.320.

We agree that this is an important bill. We are attempting to be very conservative in our fiscal note. The Coast Guard is attempting to sell this bill as something that will save lives. If that is true, then there must be enforcement.

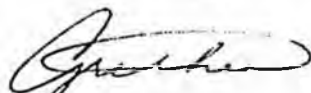

Our Fish and Wildlife Protection Troopers are attempting to protect the resources. That is their primary responsibility. There is a conflict when you think these officers can patrol effectively for both. In most cases, sport fishing enforcement will suffer the most by our present budget reductions. There will be few state enforcement officers to tackle this added responsibility. We need this modest fiscal note to provide a minimal enforcement presence.

As Deputy Commissioner Vaden said, "If you just want a registration and numbering program, let's not take the federal money. We can register the boats for about \$50,000.00 a year and collect \$300,000.00."

However, if we are going to take the federal dollars, then we must provide for a "boating safety program" which complies with federal mandates. This would be a minimal enforcement effort.

To do this job correctly and save lives would cost the State a tremendous amount of money.

Sincerely,

Gretchen A. Derr  
Special Assistant

Honorable Chair and members of the Committee. My name is Gretchen Derr, I am from the Department of Public Safety.

The Department of Public Safety is Neutral on this piece of legislation.

The purpose of this bill is to generate revenues for the State, both in fees received from a vessel numbering system, and through federal assistance funds. This bill is designed to address boating safety and boating registration while generating revenues for the State, etc.

Passage of this bill would require the Department to:

1. develop a boat numbering system;
2. develop and maintain a record-keeping system;
3. develop an accident reporting system;
4. develop and present boating safety education programs; and,
5. promulgate regulations.

Prior to implementation of this bill, extensive public education would be required to advise the public of the change in this responsibility from the federal government to the State.

Federal assistance funds from the Aquatic Resource Trust Fund are available through April 1, 1989. There is a bill in Congress to extend the Trust Fund; however, it has not passed, and is still in Committee. The State would receive approximately \$250.0 the first year and up to \$290.0 per year thereafter under the current law.

In order for the State to qualify for these funds, we must meet a number of requirements:

1. develop an approved vessel numbering system;
2. provide sufficient state matching funds -- these funds could come from fees received through vessel numbering.
3. maintain a cooperative boating assistance program with the U.S. Coast Guard;

4. provide adequate patrol to insure compliance with all laws and regulations concerning boating safety;
5. provide a boating safety program which meets the standards established by the National Association of State Boating Law Administrators; and, finally,
6. have an approved system for reporting marine fatalities.

The Department feels that, as with most federal funds which required certification that the grantee has complied, the requirements and audits become more stringent with the passage of time. There is no free lunch.

The Coast Guard requires uniformed officers to patrol and enforce the state's laws and regulations. This could create a tremendous responsibility if we are required to patrol all state waters - including the three-mile limit and all lakes and streams.

The Department could not fully meet the federal requirements with existing personnel -- that is, the reduced number of enforcement personnel we will have in FY88.

Subj: ALASKA HOUSE BILL 94

g. Section 5.25.240 discusses the report of transfer, abandonment or destruction of boat or change of address of owner. 33 CFR 174.13 incorporates the provision of 33 CFR 173.29 mandating that the owner must also provide the issuing authority with notice of the theft/recovery of the vessel or destruction of the certificate of number. These matters should be included with the required notice provisions of this section.

h. Section 5.25.245 sets forth the applicability of the numbering portion of the draft state law. Subsection 4 thereof provides that AS 5.25.200 - 5.25.240 do not apply to ship's lifeboats" used solely for lifesaving purposes". This qualification as to ships' lifeboats goes further than the requirements of 33 CFR 174.11 which incorporates the requirements of 33 CFR 173.11(d). Whereas Coast Guard regulations state that ships' lifeboats are to be exempted from state numbering requirements, the State of Alaska purports to exempt only those ships' lifeboats that are used solely for lifesaving purposes. The issue of the use of ships' lifeboats as small passenger vessels for passenger lightering has been a local bone of contention. Therefore, this provision which would exempt only those lifeboats that are properly used as such may indeed be considered a legitimate exercise of the State's authority.

i. Section 5.25.325 sets forth the applicability of AS 5.25.300 through 5.25.320, the provisions dealing with accident reporting. Subsection (b) provides exemption for certain vessels from the applicability of the section. 33 CFR 174.101 sets forth the requirements for applicability of state casualty reporting systems and incorporates 33 CFR 173.51 therein. 33 CFR 173.51 provides that all uninspected vessels which are either required to be numbered or used for recreational purposes fall under the casualty and accident reporting regulations. Insofar as draft 5.25(b)(1) and (2) would exempt a documented or foreign boat being used by its operator for recreational purposes from the casualty reporting regulations, this section conflicts with the federal law. Therefore, this section should be modified to more closely mirror the provisions of 33 CFR 173.51.

→ j. Section 5.25.330 deals with the owner's civil liability. This section includes the provision that the owner of the boat is liable for injury or damage caused by the negligent operation of the boat whether the negligence consists of a violation of a state statute or a failure to use ordinary care. Such a provision seems to create a "per se" negligence rule which arguably could create liability based merely upon

Subj: ALASKA HOUSE BILL 94

the expiration of a certificate of number notwithstanding the use of reasonable care. Insofar as the legislature intends this effect there is no objection from the standpoint of federal law. However, comment is made to insure that the ramifications of this language are fully considered prior to its inclusion in the final bill.

k. Section 5.25.405 contains provisions relating to safety equipment on recreational vessels. Subsection (a) has a requirement for a white light. It is noted that the COLREGS and the requirements therein for lights control exclusively in the navigable waters of the State of Alaska. This provision dealing with lights therefore should be modified to state its applicability to only non-navigable waters. Moreover, if the state desires to include provisions for lights and shapes, etc., the statute should make reference to the international navigation rules.

l. Section 5.25.415 requires a diver's flag. This provision likewise can have effect only insofar as it does not conflict with the COLREGS. Rule 27 of the COLREGS sets forth the requirements for the exhibition of lights and shapes for vessels engaged in diving operations. Subsection (e) requires that a vessel which cannot exhibit all the lights and shapes described must still exhibit three all around lights in a vertical line where they can best be seen, the highest and lowest of these lights being red and the middle being white and a rigid replica of the international code flag "A" not less than one meter in height in a manner providing all around visibility. This section of the Alaska bill purports to require a different flag when diving operations are underway. The application of the diving flag laws in conjunction with the COLREGS was discussed in 434 Coast Guard Law Bulletin 24, corrected by (G-LMI) letter 16672 dated 12 November 1985. In short, the ruling has been made that the "Alpha" flag signal is to be flown as a means of indicating when a small vessel engaged in diving operations is restricted in ability to maneuver. Flying a state prescribed flag may be used as a personal identifying signal and may be used either in conjunction with the "Alpha" flag signal when the vessel is restricted in the ability to maneuver or alone if the vessel is not restricted in ability to maneuver. However, a vessel is not exempt from flying the code "Alpha" flag merely because it is flying a state prescribed flag and that state prescribed flag cannot be allowed to impair the visibility of the code "Alpha" flag. I would suggest that the draft bill be modified to reflect the foregoing.

HOUSE COMMITTEE REPORT

3/11

(5)

Date referred: 1/30/87

FURTHER REFERRALS:

Judiciary  
Finance

DATE: March 9, 1987

The Transportation Committee has considered HB 94

"An Act relating to boat numbering, accidents, and safety; and providing for an effective date."

RECOMMENDS:

- replace with CS HB 94 (Transportation)  the same title
- attached amendment(s)  a new title
- do pass
- do not pass
- no recommendation
- individual recommendations
- additional referral to the \_\_\_\_\_ Committee

ADOPTS:  \_\_\_\_\_ letter of intent

ATTACHES NEW FISCAL NOTE(S):

- fiscal impact  same as previous fiscal note published \_\_\_\_\_
- zero fiscal note  same as previous zero fiscal note published \_\_\_\_\_
- zero with analysis

SIGNING DO PASS:

\_\_\_\_\_  
*Bill Hudson*  
 \_\_\_\_\_  
*Ch. A. Boush*  
 \_\_\_\_\_  
*Heinrich Springer*  
 \_\_\_\_\_  
*Bette Cato*
