HB 32

~~TEXAS~~ LEGISLATURE APPROVES PARI-MUTUEL HORSE RACING

by Anne Lang

For the first time in over 50 years, Texas lawmakers in a special session voted in favor of a racing bill for the Lone Star State, granting the long-awaited opportunity for citizens to vote on the issue in a statewide referendum.

It survived several tense rounds of voting in both the House and the Senate, where it hadn't survived since 1933.

It survived the proposal (and subsequent defeat) of numerous amendments, some similar to the amendments that managed to kill it in 1985.

It survived the threat of a filibuster, and the poised-pen, Final Hour deliberation of a governor seemingly determined to veto it.

If survival is indeed destined for the fittest, then the Texas pari-mutuel bill is one sound racehorse. This bruised, battered yet triumphant piece of legislation survived all these obstacles and more, and it wasn't even on the original agenda.

For the first time in over 50 years the Texas Legislature approved a pari-mutuel racing bill during a special budget session — finally allowing the voters a chance to say yea or nay on the issue in a statewide referendum next fall.

If the pari-mutuel bill could withstand the assault of all those barbers and still pull up sound, can't

that significant progress be viewed as an omen of success destined to continue through the final stretch and well past the wire?

Ricky Knox thinks so. The Texas Horse Racing Association's executive director is elated and relieved about the outcome of the recent legislative action, and is looking ahead with guarded optimism.

"I fell pretty good," Knox declared on September 29, several days after Governor Mark White made his decision to let the bill become law without his signature. "I'm just glad it's over with. There's more a feeling of relief than anything else; to know that you don't have to go back up to the Capitol and work 181 members of the legislature."

This is the second consecutive pari-mutuel battle for Knox. In 1985, he headed up lobbying efforts for a bill that was prematurely rejected by pro-racing and anti-racing legislators alike for being too weighted down with minority and special program provisions, the language of which was too vague to suit amendment advocates and too

binding to satisfy the others.

The disappointed racing lobbyists learned from that experience, however, reconstructing a new bill that earmarked all of the state's share of the pari-mutuel handle to go toward the general fund. This proved to be a wise move.

A brief review of recent events: Texas' ailing oil economy has been a major contributor to a state deficit that had climbed to an alarming \$3.5 billion as of late last spring, prompting Governor White to call a special session of the legislature on August 6 to deal with the crisis. Among the proposed remedies on the governor's agenda was a state income tax, and a temporary sales tax.

Pari-mutuel horse racing, which White has always staunchly opposed on moral grounds and which was not expected to be brought up due to its delayed effect on the state's economy, was ushered in via the "back door" by Rep. Hugo Berlanga when it appeared that the session was going virtually nowhere in its aim to reduce the deficit. Lt. Governor Bill Hobby and House Speaker Gib Lewis agreed to add the bill to the agenda.

Before surprised horsemen around the state even finished their double-takes at the news, the bill was promptly subjected to the legislative process and, ironically, came to be the only piece of legislation to be acted upon in the first special session.

White then had 20 days to either veto the bill, sign it into law or let it become law without his signature. On Day Twenty (September 24), he chose the latter option; the next step, according to the bill, calls for a statewide referendum, to be followed (if passed) by local-option elections in each Texas county that desires to conduct pari-mutuel horse racing.

The bad news: because pari-mutuel failed to register a two-thirds majority vote in either chamber, it was not included on the general election ballot this November, which includes the gubernatorial election. (Hence: high voter turnout.) The good news: it will be subjected to a statewide referendum vote in November 1987, giving pari-mutuel advocates an entire year to drum up support for racing and to educate the public on the

unlimited benefits the potentially enlarged horse industry will have on the state.

Knox said the lobbying team was not as surprised as the public was about the inclusion of the pari-mutuel issue during the special session, nor about the ultimate outcome.

Even horse racing opponents were helpful in pushing through the bill, Knox pointed out, because they were tired of the issue being introduced every session and taking up valuable legislative time that could, in their estimation, be better spent on the immediate budget situation, and other pressing issues. Many of those opponents urged White not to veto the bill, because they wanted to get it out to the people for a vote "once and for all" Knox said. "They're going to have major financial issues coming up in January, and no one wanted to see this issue back on the floor at that time."

In reviewing the collective factors that led to eventual passage, Knox named education and awareness as major contributors to the outcome. Extensive, continuous efforts by

horsemen, legislative proponents (such as Speaker Lewis, Lt. Gov. Hobby, Rep. Berlanga, Sen. Ike Harris, Rep. Lloyd Criss and others) and lobbyists to illustrate the benefits of horse racing as an entire new industry for the state finally paid off at the Capitol.

"A lot of people tie the passage of the bill to the state's economic condition, and I really don't think that was the case," Knox stated. "I think that if you talk to the other lobbyists — Bob Johnson, Hilary Doran and Rob Johnson — they'll agree that the economy was not the major reason it passed. A lot of it was due to the work that's been done in the past to educate the legislators about the potential industry as a whole, and that pari-mutuel goes beyond just wagering at the tracks.

White's decision to let the bill become law was highly influenced by the people of Texas, Knox said. Horsemen's letters and phone calls received by the governor's office had a major impact, and "really got his attention." Similar supportive input (during the 20-day post-passage period) from the general public all across Texas was also very strong.

Although White has declared he will actively work against the bill between now and the statewide referendum, his opponent in the upcoming gubernatorial race, former Texas Governor Bill Clements, has taken a neutral stance on the issue and will probably remain that way: elected, Knox predicts, publically speaking neither for nor against pari-mutuel. Clements' position all along has been in favor of letting the issue come to a vote of the people, he added, and a sudden change of attitude is not expected.

Not surprisingly, having to wait another year for the statewide referendum is going to result in increased expenditure of both money and man-hours, Knox said, in order to effectively promote the issue.

If pari-mutuel passes in the statewide referendum next fall, the next likely step will be the local-option elections in each of Texas' 254 counties. (Only those counties that desire to conduct pari-mutuel horse racing will be required to hold elections.) The bill limits Class I tracks (operational at least 45 days per year) to counties with populations of at least 50,000, and any adjacent counties. Smaller tracks

(Classes II and III) could be operated in other counties for shorter time periods.

A little-known fact, Knox pointed out, is that the local-option elections can conceivably be conducted before the statewide referendum takes place, if a county decides to do so. The statewide referendum is actually considered to be the final endorsement of the bill.

How soon after county elections, then, can we realistically expect completion of the first Class I track?

"That's a tough timetable to figure out," Knox said. "So much of it hinges on when the governor appoints the racing commission, and how much effort the commissioners have put into visiting other U.S. tracks, hiring their staff, establishing their ground rules for licensing procedures, and so forth. If the racing commission is appointed in, say, February of 1987, and they immediately begin the process of educating themselves on the subject of racing and establishing their rules, then ideally it would go as follows:

"November 1987, statewide referendum. February, March or April 1988, local-option election in a Class I county. Then, if the potential developers and financial planners have been doing their homework — getting an option on the proposed land, full architectural renderings, financial plans — if all those factors were put together and everyone was doing their work you might see someone make application to the racing commission in June of 1988 for a Class I license. It could be even earlier, if the local-option election is held earlier."

After the license application is submitted, Knox said, the racing commission has 120 days to act upon the application. If they haven't taken action within that time period, they can extend their review time for another 30 days, but they must take action (to either accept or reject the application) by the time those 30 days are up.

Knox said he does not expect Texas racing to be stalled by any of the problems that have plagued Oklahoma since its passage of pari-mutuel in 1981. Oklahoma's primary error was the takeout structure they established, he said: it was a 6-6-6 split (six percent of the handle to go to the state, six percent to purses, and six percent to

the track, with the remaining 82 percent to be divided among the winning tickets). Six percent was not enough to allow track owners to feasibly maintain a Class I facility, nor even to begin construction. Texas learned from Oklahoma's mistake, Knox declared.

"The Texas Senate Bill 15 calls for a 5-5-8 split on a straight wager; on a multiple wager it's a 5-5-10," Knox explained. "The financial projections we reviewed before we began constructing the bill indicated that our takeout structure is financially feasible for operating a track.

"I think we've learned from Oklahoma that you do have to have a financially workable takeout, but you also have to have a takeout structure that makes the state satisfied that it's getting enough benefit from pari-mutuel to allow it to take place," Knox said.

"So we tried to find a compromise. Originally, in the 1983 and 1985 bills, the legislation called for a 5-5-5 takeout, which was financially unworkable, so we increased the track's take to eight percent to make sure that first-class facilities can be built and maintained.

Texas will begin seeing a net profit from pari-mutuel "probably in 1988," Knox projected, which is when some of the Class II tracks will begin their pari-mutuel programs. In past reports the THRA has estimated that fully operational horse industry in Texas could be a \$1.2 billion-a-year industry and hopefully grow into a \$10 billion-a-year industry.

During the special session

debate, bill co-sponsor Ike Harris forecasted that pari-mutuel wagering alone will provide \$140 million to the state's general revenue account by the year 1991. A Texas Department of Agriculture study shows that pari-mutuel will boost the farm economy by approximately \$713 million, and will bring 25,000 new horses to the state.

"I wish there was some way to calculate the effect of all the satellite industries — tourism, horse sales, real estate purchases, construction — all those factors and more that are going to contribute to the economy, because I think it's going to end up being far more than anyone's projected," Knox said.

"The amount of money being spent in the Texas horse industry even right now is substantial.

"Twenty years from now, when we're looking at the Santa Anita of Houston, the Santa Anita of Dallas and the Santa Anita of San Antonio, and all the first-rate Class II tracks, and all those white fences and horses galloping across pastures throughout the state, it's going to be so exciting to know that EVERYBODY had a part in bringing that reality to Texas," Knox said.

"Sure, we've got the economic and climatic conditions here, but the most important thing is, we have the spirit of Texans."

Research Request 87.055

You asked for a discussion of state parimutuel wagering programs and revenues received from the programs. You were particularly interested in state fair parimutuel programs, and in the type of people who attend parimutuel wagering activities. In regard to Alaska, you were interested in the amount of revenues that could be generated by parimutuel wagering in the state, and whether or not dedicating parimutuel wagering revenue would violate Alaska's constitutional prohibition on dedicated revenues.

Parimutuel Wagering in the United States

In parimutuel wagering events, all bets on a given race are placed in a common pool, which is proportionally divided among those holding winning tickets after the race is run. Parimutuel wagering events are usually horse and dog races. Some form of horse racing is legal in 36 states, and is actually in operation in 30 states. Thoroughbred racing is legal in 36 states, harness racing in 28 states and quarter horse racing in 23 states. Greyhound racing is legal in 15 states and is operative in 14 states. Attachment A lists by state: parimutuel turnover (gross "handle"), number of racing days, number of races, and race attendance.

Parimutuel Wagering Revenues. Prior to distributing the pool among the winners, a specified percentage, or "takeout", is withheld. The takeout percentage in the western states ranges from 15 to 25 percent. The takeout percentage may be a constant percentage for all wagering pools or may depend on the type of bet, track, or type or number of horses. It may also vary according to whether the meet has a commercial or nonprofit purpose. The takeout is divided between the horse or dog owners' purses, the track, and the state in which the racing is conducted. Table 1 lists the western states and the distribution of the takeout in each state.

As shown in Table 1, the states' percentage of the takeout ranges from .5 to 7.5 percent. Takeout revenues received by state governments include revenues from track licenses, occupational licenses, parimutuel taxes, breakage (monies in excess of actual payoffs for winning tickets--calculated to the nearest nickel or dime), and admission taxes. Attachment B lists the total revenue and categorized revenue received by states from parimutuel wagering in 1982.

The states apply their percentage of takeouts from parimutuel wagering to different purposes. Table 2 lists the western states' application of their percentage of takeout. State takeout is distributed primarily to a state's general fund and to the State Racing Commission. Some states also fund their fair commissions through parimutuel revenues. Attachment C summarizes tax methods applied by states on parimutuel wagering activities.

Parimutuel Wagering Participants

According to a demographic study done by Dr. John Koza, parimutuel wagering is most likely to occur among white collar workers with one or more years of higher education and with household income of \$35,000 or more. It is less likely to occur among black or hispanic persons with household income of \$7,500 or less. According to Dr. Koza, the poor under-participate in horse racing probably because of the expense of transportation to the races and the relatively high playing expenses.

In regard to particular groups involved in parimutuel wagering, Dr. Koza found that "achievers" more frequently participate in parimutuel wagering than other groups. Achievers are defined as managers, administrators, and leaders in business, government, education, and politics. Dr. Koza estimates that 22 percent of Americans are achievers. Attachment D lists gambling groups identified by Dr. Koza and indexes the gambling activities they frequent.

The Commission on the Review of the National Policy Toward Gambling prepared information on demographic characteristics of on-track bettors in 1974. Table 3 shows that (in 1974) 14 percent of the adult population bet on horse races and four percent of the adult population bet on dog races. Proportionately more men than women bet, with betting increasing as income and educational levels increased.

The family income and horse race betting chart (the lower portion of Table 3) shows that families earning under \$5,000 a year spent a higher percentage of their income on horse races than those earning more money. However, a 1976 survey completed by the National Gambling Commission found that persons in the under \$5,000 family income category had the lowest level of participation in racetrack betting of any income category.

1 The 1985 Consumer Price Index was 52.6 percent greater than the 1974 Consumer Price Index. 1974 Family Income listed on Table 3 should be multiplied by 152.6 percent to reach equivalent 1985 income levels. For example, a family with an income level of under \$5,000, becomes a family with an income level of under \$7,630.

State Parimutuel Wagering Programs

States that allow parimutuel wagering that were surveyed include: Montana, Oregon, Arizona, California, and Washington. These states allow parimutuel wagering at their county or state fairs. In general, commercial parimutuel wagering facilities are more financially successful than state fair parimutuel wagering activities.

Montana. Fairs in Montana often offer horse racing as a fair event. Statistical information on horse racing at Montana fairs can be found as Attachment E. One of the most successful fair racing programs is held in Great Falls during the State Fair. In 1986, racing was held for ten days with an attendance of 43,000 people (approximately one-third of the people attending the fair). The total parimutuel handle (i.e. gross revenue) during this time was \$1,193,000.

The takeout for fair races in Montana is 20 percent. Of this amount, the state takes one percent, purses take between seven and nine percent, and the remainder goes to the tracks to pay track overhead. Steve Meloy, Executive Secretary with the Montana Board of Horse Racing, said that (in a good year) one percent or more remains after paying track overhead. This profit generally goes to the county operating fund.

Dog racing is not allowed in Montana, though Mr. Meloy believes it would be a more lucrative parimutuel program than horse racing. He said that start-up costs, maintenance and overhead costs for dog racing would all be considerably cheaper than horse racing. He also said that fewer dogs are required for races than horses; dogs require only a few days between races to recuperate, while horses require a resting period of ten days to two weeks between races.

Oregon. The Oregon State Fair operates a successful horse racing program during fair days. Don Hillman, Deputy Director of the Alaska State Fair, said that racing events are successful because the fair operates the events as a business and has been doing so for over a hundred years. In 1986, racing was held for 11 days with an attendance of 67,500 people (approximately nine percent of the people attending the fair). The total parimutuel handle during this time was \$2,228,659.

The takeout for fair races in Oregon is 19 percent. ^(423,445) Of this amount, the State Fair takes 11 percent, purses take 5.4 percent, .9 percent goes to the State Racing Commission, and the remainder is divided between special track improvements and people raising race horses in Oregon. Mr. Hillman said that the state usually takes five to six percent of the takeout on commercial tracks.

Dwight Butz, also with the Oregon State Fair, said that maintaining and operating horse racing facilities is very expensive. Initial start-up expenses at a minimum include: track surface--a hard base topped by four inches of a fairly loose sand and soil mixture, grandstand and backstretch construction, wagering equipment, and stables. Operating expenses include horse trainers, clockers and timers, staff to operate parimutuel equipment,

officials, judges, and concession staff as well as maintenance. Statistical information on horse racing at the Oregon State Fair in 1985 appears as Attachment F. The 1985 actual figures list horse racing revenue and expenditures for the 36 days racing occurred at the fairgrounds.

Arizona. The State Department of Racing allows horse racing at county fairs for four days a year at each fair. The state provides some of the staff necessary to conduct the races and supplies funding for capital improvements for fair racing. State aid for fair racing totals approximately \$1 million a year. According to Dawn Sinclair, Assistant Director of the Department of Racing, some county fairs make as little as \$2,000 in profit a year from racing events. Statistical information on county fair horse racing in Arizona appears as Attachment G. Ms. Sinclair said that areas surrounding fairs usually experience an increase in hotel and restaurant use, and veterinarian services.

California. Lynn Foote, Executive Secretary for the California Horse Racing Board, said that horse racing has been successful in the past, but rising costs, an increase in the number of private race tracks and the state lottery has decreased horse racing attendance. Mr. Foote said that operating fair races is costly and many county racing facilities are run down as a result of inadequate funding for repair. He also said that because racing at county fairs is not an on-going or important fair event, track staff often lack expertise needed to successfully operate parimutuel races. Mr. Foote believes that racing is more successful if handled by a private entity. Statistical information on fair races in California can be found as Attachment H.

Washington. Washington state and county fairs are authorized to operate horse racing during fair days. A percentage of state taxes on wagering is divided among the fairs. No parimutuel wagering revenue is retained by local governments. Will Bachofner, Executive Secretary of the Washington State Horse Racing Commission, said that a considerable amount of state aid is required to regulate and supervise fair racing, probably because fair racing does not generate enough revenue to support itself. Mr. Bachofner believes this is because only a limited number of the people who watch racing actually place bets. Mr. Bachofner does not believe that areas surrounding fairs are significantly affected as a result of racing events.

Mr. Bachofner said that for a fair race to make a profit in the first few years, established race horses would have to be run. He does not believe that people will bet on horses that do not have records or a history. Mr. Bachofner also said that start-up and operating costs for horse racing are more expensive than for dog racing. Limited facilities are needed for dogs, while horses require more elaborate stables and equipment.

Parimutuel Wagering in Alaska

Parimutuel wagering is currently not allowed in Alaska. There is interest by some groups in Alaska in legalizing parimutuel wagering on horse racing and dog sprint, sled, and chariot racing. Marsha Melton, Manager of the Alaska State Fair, is interested in seeing parimutuel racing as an event offered by the State Fair.

Horse Racing. According to Richard Tozier, President of the Alaska Sled Dog Racing Association, horse racing occurred at the state fair as recently as ten years ago. At that time, race horses were raised in the area, although there are currently few race horses in Alaska. Ms. Melton said that a 5/8-mile race track and stables that house 102 horses are already installed at the fairgrounds. The track requires some remodelling and additional stalls (perhaps 200) if racing were to occur again. Ms. Melton also said that some Alaskans own race horses but keep them out of state. She believes that if racing were offered at the fair, these horses would be brought up to Alaska to race. Ms. Melton believes that offering racing at the state fair would increase revenue to the local economy.

Dog Racing. Sled dog racing is an established activity in Alaska, but greyhound and chariot dog races are unfamiliar to the state. Mr. Tozier, speaking for the Alaska Sled Dog Racing Association, said that the association believes a one-mile, open-to-view track would be necessary for parimutuel wagering on sled dog and chariot dog races. Races that are not open to view could not be regulated and bettors might not want to risk money on an unregulated race. Mr. Tozier suggested Palmer, Fairbanks, and Anchorage as potential track locations.

Projected Revenues from Parimutuel Wagering. It is difficult to project revenues from parimutuel wagering in Alaska because it differs from other states with parimutuel wagering programs. Many race tracks in other states have race participants, spectators and bettors who travel to races in different states. It is not known how many horsemen would bring their horses to Alaska to race, or how many bettors will travel to Alaska to wager. It is also not known how many established race horses are stabled in Alaska or how many people in Alaska are interested in parimutuel wagering. These and other variables make it difficult to project revenues from parimutuel wagering at the Alaska State Fair.

According to Ms. Melton, 175,000 people attended the 11 days of the 1986 Alaska State Fair. In Montana, approximately one-third of the people attending the fair attended racing events. The total parimutuel handle during this time was \$1,193,000. If one-third of the Alaska State Fair attendance attended fair racing events, approximately 58,000 people may participate in parimutuel racing at an Alaska State Fair. Using the parimutuel handle figure of the Montana State Fair, a parimutuel handle of \$1,609,000 is projected for races attended by 58,000 people at the Alaska State Fair. The takeout in Montana is 20 percent. If the takeout were 20 percent in Alaska, \$321,800 would be available to pay the purses, track overhead and state or municipal taxes. In Montana, approximately eleven percent of the takeout is used for track overhead and expenses. Using the Montana figure, the Alaska State Fair could expect to receive \$35,400 gross revenue from a parimutuel wagering program during the Alaska State Fair. We have no way to project net revenues.

In Oregon, 67,500 people attended racing events at the State Fair--nine percent of the total number of people attending the fair. The total parimutuel handle during this time was \$2,228,659. Nine percent of the 175,000 people who attended the 1986 Alaska State Fair is 15,750 people.

Representative Szymanski
December 29, 1986
Page 10

Using the parimutuel handle figure from the Oregon State Fair, the parimutuel handle for 15,750 people attending the Alaska State Fair would be \$520,000. The takeout in Oregon is 19 percent, with eleven percent of the total takeout going to the State Fair. Eleven percent of the projected Alaska State Fair parimutuel handle is \$57,200. Thus, using the Oregon figures, \$57,200 could be expected as gross revenue from an Alaska State Fair parimutuel program.

We have no way to project net revenue for the Alaska State Fair because we cannot project racing expenditures. The Oregon State Fair received \$325,400 in net fair racing revenue in 1985 for 36 days of racing, as can be seen on Attachment F. The Oregon State Fair is considered to be very successful in its horse racing activities. Mr. Hillman, of the Oregon State Fair, said that the State Fair's takeout of eleven percent contributes to the fair's racing success.

Dedicating Parimutuel Wagering Revenues. According to John Rubini of the Alaska Attorney General's Office, the constitutional prohibition on dedicated revenues applies to revenues received by the State. The prohibition does not extend or apply to revenues received by municipalities. Lee Sharp, the Matanuska-Susitna Borough attorney, agreed that the constitutional restrictions on dedicated revenue does not apply to municipalities.

The Alaska State Fair is operated by the State of Alaska. If the state operated parimutuel races at the fair, the revenue would be put into the State general fund and could then be appropriated, but not dedicated, to a specific purpose. If the Matanuska-Susitna Borough operated parimutuel races at the fair, the borough could appropriate or dedicate revenues to a specified purpose.

PARI-MUTUEL BETTING *

An Analysis of the Implications
of Legalizing Pari-Mutuel Betting
in Alaska, in terms of possible
Underworld Involvement and General
Economic Considerations.

*The following is a summary of a report
prepared for Alaska State Fair, Inc. in
1974.

PARI-MUTUEL BETTING

What It Is

Pari-Mutuel betting is a system of wagering used most often by race tracks. Odds are determined according to the approximate ratio of the amount bet on all horses to the amount bet on each individual horse. Wagers are collected, held by a racing association until the race has been decided, at which time the total amount bet (called the pool), minus the percentage allowed the state and association, is divided among the winning bettors. (See footnote[#]). At the present time, thirty-one states allow pari-mutuel betting for horse racing. In eight of those thirty-one states, pari-mutuels for dog races are legal and in three states, Florida, Connecticut, and California, pari-mutuels exist for jai'alai games.

How It Works

The pari-mutuel system was invented in 1855 by a Frenchman named Pierre Oller. Under his system the odds were computed from the amount of the bet on the winning horse in relation to the amount bet on all the horses in the race, instead of allowing a bookmaker to freely determine odds on his own.² Since odds are determined by the bettors themselves, they are in effect betting against each other, hence the name pari-mutuel. (Pari is French for bet, mutuel means between us.)³ All the money in the pari-mutuel pool less a 15-20% fee for state and track, is distributed to winning bettors according to their original bets.

Since the amount of profit depends upon the number of winning bettors in a certain pool, some French bettors lost money on winning tickets when too many people won. The United States protects its bettors from such a situation by requiring a profit of at least ten to twenty cents on all winning two dollar tickets.⁴ If there is not enough money in the pool to provide this 10-20¢ profit to all winning bettors, then the racing association must make up the difference.⁵ In this situation, there is said to be a "Minus Pool".

In North America, there are three different pari-mutuel pools, Win, Place, and Show. Europe uses Win and Place but not Show. If you bet Win, you will collect if your horse wins the race. For Place, the bettor collects when his horse wins or comes in second. For Show, he wins if his horse comes in either first, second, or third. The money is distributed to winning bettors in the total pool, minus the state and racing association's fee of 15-20%. Payoffs are calculated according to the odds.

[#]The California Business and Professions Code defines pari-mutuel betting as: "a form of wagering on the outcome of horse races in which those who wager purchase tickets of various denominations on a horse and all wagers are pooled and held by the racing association for distribution. When the outcome of the race has been decided, the association distributes the total wagers comprising the pool, less the percentage allowed the State and Association, to holders of tickets on the winning horse or horses.

EXAMPLE: Taken from Oswald Jacoby's "Oswald Jacoby on Gambling"

| Post 1 | WIN POOL | PLACE | SHOW |
|-------------------|-----------|-----------|-----------|
| 1. Swizzlestick | \$ 10,000 | \$ 5,000 | \$ 6,000 |
| 2. Black Beauty | 10,000 | 8,000 | 8,000 |
| 3. Baba | 15,000 | 6,000 | 7,000 |
| 4. Cayuse | 4,000 | 2,000 | 1,800 |
| 5. Sweet Patootie | 35,000 | 16,000 | 20,000 |
| 6. Caramel | 1,500 | 800 | 700 |
| 7. Out of Work | 8,000 | 4,500 | 4,000 |
| 8. Silver | 12,500 | 5,700 | 6,500 |
| TOTALS | \$ 96,000 | \$ 48,000 | \$ 54,000 |

The total amount bet to win is \$96,000. Fifteen per cent, or \$14,400 is taken out for the state and track (this percentage may be as high as 20 per cent, and is occasionally slightly less than 15) leaving \$81,600 to be divided among the holders of tickets on Swizzlestick if that noble animal happens to get under the finish wire first. Since the total amount bet on him is \$10,000 there will be a profit of \$7.16 for each dollar bet. The machine calculates this and shows the closest simple odds, 7-1. In the event that Swizzlestick wins, the machine will flash a win price of \$16.30. It will be noted that the correct value for a \$2.00 ticket (all pari-mutuel prices are based upon the lowest priced ticket sold, the \$2.00 ticket) would be \$16.32. The difference, 2¢ in this case, between the correct value and the next lower multiple of ten cents (multiple of twenty cents at some tracks) is known as breakage and goes to the track and state. It does not seem like much but it adds up. Here is a complete list covering each possible winner that shows the approximate odds, the pay-off per \$2.00 ticket, the total pay-off, and the breakage.

| HORSE | Odds Shown on Board | \$2 payoff | Total Payoff | Breakage |
|----------------|------------------------|------------|-----------------|----------|
| Swizzlestick | 7 to 1 | \$ 16.30 | \$ 81,500 | \$100 |
| Black Beauty | 7 to 1 | 16.30 | 81,500 | 100 |
| Baba | 4 to 1 | 10.80 | 81,000 | 600 |
| Cayuse | 19 to 1 | 40.80 | 81,600 | 0 |
| Sweet Patootie | 1 to 5 | 4.60 | 80,500 | 1,100 |
| Caramel | 50 to 1 | 108.90 | 81,600 | 0 |
| Out of Work | 9 to 1 | 20.40 | 81,600 | 0 |
| Silver | 5 to 1 | 13.00 | 81,250 | 350 |

Let us assume that the race is over and Swizzlestick won, the favorite, Sweet Patootie came in second, and the long shot Cayuse came in third. The price places are calculated as follows:

The total amount bet for place was \$48,000. Fifteen per cent or \$7,200 is taken for the track and state cut leaving \$40,800. The total amount bet on these two horses to place was \$21,000 which, when subtracted from \$40,800, leaves a profit of \$19,800 to be divided equally among the two horses. The \$5,000 bet on Swizzlestick to place represents 2,500 \$2 tickets. By dividing the sum of the original amount bet, \$5,000,

and the amount won, \$9,900, by 1,500, we get the resultant value of each ticket as \$5.96. Swizzlestick, therefore pays the next lower multiple of 10 cents, or \$5.90 to place, and the breakage is \$150.00.

\$16,000 was bet on Sweet Patootie to place. \$25,900 (\$16,000 plus \$9,900=\$25,900) is therefore available to be divided among the 3000 theoretical holders of \$2 tickets. The correct amount is \$3,2375. The actual price is therefore \$3.20, and the breakage is \$300.00.

The calculation of show money is similar. First the track and state 15 per cent are set aside leaving \$45,900. to be divided ($354,800 - 308,900 = 45,900$) among the holders of tickets on the three horses. The total bet to show on the three horses was \$27,300 ($56,000 + 310,000 + 57,300 = 27,300$) making the total profit \$18,100 ($45,900 - 27,300 = 18,100$) or \$6,033.33 per horse. Computing the price as above now gives us:

Swizzlestick pays \$4.00 to show and the breakage is \$33.33

Sweet Patootie pays \$2.60 to show and the breakage is \$33.33

Cayuse pays \$8.70 to show and the breakage is \$3.33

All of these complex calculations are made and displayed by a portable assembly of especially designed electrical equipment called a totalisator.⁸ Betting Pools are usually illegal without the use of a totalisator, which consists of:

1. Standard (win, place and show), daily double and Quinella ticket issuers, which register and total each ticket as it is issued. (See Footnote⁹).
2. Adding machines which total the sales registered by the standard issuers.
3. An automatic odds computer.
4. Electric indicators which show on the display boards the approximate odds during wagering and the order of finish of the first four entries (result) by program number, entry and pool totals obtained by the adding machines, the prices paid on a \$2 winning mutual ticket, race numbers, time of day, post time, etc.

When you buy your ticket at the pari-mutuel window, the operator (seller) pushes a button and records the sale. His ticket-issuing machine prints and delivers the ticket. At the same time, it registers the amount of the bet with the totalisator, which is an adaption of the dial phone system. This electronic brain adds, sorts and transmits the totals of all bets to the infield tote board at intervals of about ninety seconds until the closing of the pari-mutuel windows.¹⁰

*"Daily Double" is when purchaser must pick winner of two races, usually the first and second races.

"Quinella operates mainly at jai alai games and dog tracks. Bettor must pick two horses, players, or dogs in the same race or game to finish either first or second".⁹

UNDERWORLD INVOLVEMENT

The totalisator makes pari-mutuel betting the cleanest form of gambling in the United States. Before the machinery was in use, race track bettors never knew whether or not the race track was juggling the number of bettors or the amount bet to fatten one's own wallet. Nowadays, however, total bets and bettors are computed and posted instantaneously by machines too closely regulated to allow for deception at any level.

According to Rufus King, former chairman of the American Bar Association, Criminal Law Section and legislative counsel to the Senate Committee on Organized Crime, pari-mutuel betting is honestly what it purports to be. Track operations are so carefully supervised, policed, and double checked that there is little reason to suspect widespread skullduggery, and there have been no major scandals in recent years involving the defrauding of the public. The bettor is, of course, vulnerable to manipulations with the races themselves, but everything pertaining to the schedules, riders, mounts, and the actual running is also rigorously policed. Except for the rare phenomena of the minus pool, the track management has no interest in the outcome of any race; and this justifies the conclusion that race track betting—besides being legal and probably necessarily to some extent because it is legal—remains the cleanest form, per se, among all categories of gambling activity currently popular on the American scene. The possibility of direct tampering with the totalisator, says King, is remote.¹¹

It was during the 1800's that American horse racing was gripped by a large criminal element that bribed jockeys, doped horses, and managed to profit financially from both the track and bookmaking. "Gate-money, concessions, and fraudulent races made tracks very profitable. They therefore attracted the protection racket, from gangsters, police and politicians. Only a very few rich tracks were rich enough, and run by men honourable and influential enough to escape this."¹² As a result, state after state banned racing during the early nineteen hundreds. The number of tracks in the United States went from 314 in 1897 to a bare 25 at one point.¹³

Finally in 1908, horse racing began to recover with the establishment of the Kentucky State Racing Commission as an effective authority over the racing associations.¹⁴ States that were willing to legalize racing again soon established their own racing commissions to supervise and control the associations and pari-mutuel betting. The possibility of bringing the mob under control by regulating racing commissions has been a major argument in favor of legalizing pari-mutuel betting.

A second major argument frequently advanced in favor of pari-mutuel betting is that it brings in additional revenue without burdening the taxpayer. John Lindsay estimated that off-track betting alone would bring in as much as \$50 million dollars annually in New York City.

The promise of easy revenue moved state after state, hard hit by the depression, to legalize pari-mutuels at the race track in 1933.¹⁵ By 1946, the horse racing industry had grown to such an extent that nearly 27 million people paid admissions to major race tracks, and

collectively, just under 47 million persons wagered a staggering 3.3 billion dollars.

The National Association of State Racing Commissioners reported that the States received \$508 million in revenue from pari-mutuel racing in 1971: \$1,300,000 from track licenses, \$1,460,000 from occupational licenses, \$461 million from pari-mutuel taxes, \$3 million from breaks, and \$5 million from miscellaneous sources including concessions.¹³ (For state revenues from pari-mutuels for 1971 see Appendix Two.)

The number of states with legal pari-mutuel betting is up to thirty-one at the present time. Forty states now tax individual income, forty-six tax corporate income, and forty-five have general sales taxes. State expenditures still exceed revenues in most states. From 1953-1968, fifty states enacted three hundred and nine separate legislative tax measures, each of which levied a new tax or increased an old one.²⁰

Pari-mutuel revenue, since it is obtained through voluntary contributions of tax payer's money, is much less painfully extracted from the tax payers than a property tax. 300,000 bookies currently receive across the country money that could be collected by the states. Illegal gambling bets are estimated to be near \$20 billion annually.

VOLUME OF BETTING

"In the era between the repeal of Prohibition in 1933 and the Kefauver investigations in 1950-51, illegal bookmaking grew right along with the spread of pari-mutuel track racing, quickly reaching proportions which made it indisputably the largest criminal monopoly of its day. Applying one authoritatively sanctioned rule of thumb, illegal bets on the pari-mutuel track races had an estimated volume of \$3.00 for every \$1.00 bet directly through the pari-mutuel windows, so that by 1948, with legal bets amounting to \$1.6 billion, a total of nearly \$5 billion was being staked each year with other forms of wagering, particularly bets on college and professional sports, has reduced substantially illegal gambling in the area of horse races. Less than 3% of current underworld gambling activity is involved with horserace betting. The illusion of massive underworld activity nevertheless persists in the minds of many. This misunderstanding has been a major barrier to the legalization of pari-mutuel betting.

In terms of numbers, "twenty-five million Americans, of whom eleven million were women, made at least a \$2 bet on races during 1966 either with their favorite bookie or at one of the country's 150 odd Thoroughbred or harness tracks-of these 11 million women, 83% are housewives and salaried employees, 10% are businesswomen, professional women, or retired, 2% are gamblers, operators of gambling ventures, hustlers, and easy money gals."²²

Even though illegal gambling is a main source of revenue for organized crime, bookies rely upon horse race bets for less than twenty-five per cent of their business. The bulk of their bookmaking consists of bets placed upon sports events. In terms of profit to the bookmaker, \$1 bet on horse racing is worth \$3.50 wagered on football, since the bookie keeps the 17% of the pari-mutuel pool normally given to the state and track.²⁴ The comparative volume of betting is so slight however, that it reduces this overwhelming

where horse races are authorized, or from specified portions of such inclosure or any known bookmaker, known tout, person who has been convicted of a violation of any provision of this chapter of any law prohibiting bookmaking or any other illegal form of wagering on horse races, or any other person whose presence in the inclosure would, in the opinion of the board, be inimical to the interests of the state, of legitimate horse racing or both. No such rule shall provide for the exclusion or ejection of any person on the ground of race, creed or sex."²⁹

All horses are given a saliva test by state veterinarians immediately before their race to detect any drugs to speed them up or slow them down. All races are filmed and reviewed for illegal behavior, such as jostling or the jockey holding his mount back. Additionally, the registry number of each race horse is tattooed on his upper lip as a safeguard against the introduction of ringers in races.³⁰

There are several federal laws operating to curtail illegal gambling activity, in addition to state regulations such as the above. These 1962 laws make it a federal crime for any person to move in interstate travel to promote or participate in a racketeering enterprise. Two other laws make it a felony to transmit bets and wagers between states by wire or telephone or to transport wagering paraphernalia to another state. As defined by Congress, this includes tickets, slips, or paper used in bookmaking, sports pools or the numbers racket.³¹

CONSIDERATIONS FOR ALASKA

The State of Alaska received almost one billion dollars from oil leases signed in 1969. Approximately 400 million remains. Without pipeline revenue, Alaska could be financially bankrupt by 1976, given its current expenditure rate of some \$300 million annually.

State income in 1973-74 amounted to 290 million dollars. Expenditures came to \$364,559,000, leaving a \$114,559,000 deficit last year. For the last four years the State has spent \$373,528,900 more than it received in revenues. Official projections show the money from the North Slope leases will be gone in 1977.

In an effort to raise revenue, Alaska has authorized \$448,927,000 in General Obligation Bonds, \$348,842,000 of which has been issued as of January 1, 1974. Remaining to be issued is \$100,085,000. \$45,424,000 has been paid. This leaves the State with a General Obligation Bond liability or debt of \$303,418,000.

To issue another \$500,000,000 in a 20-year General Obligation Bonds at 5.2% would cost each taxpayer about \$6,037.

The Alaskan pipeline could dramatically change conditions in Alaska. "Building the pipeline and a 370 mile access road would pump 1.5 billion into the state economy."³⁷

Legalized pari-mutuel betting is another way for Alaska to obtain revenue. The following statistics show amounts of revenue raised nationally through pari-mutuels;

financial advantage to the point of insignificance. One New York bookie estimated that 50% of his business is done on college and professional football, 35% on major league baseball, 12% on college basketball and 3% on horse racing, championship fights, golf tournaments and general elections.²⁵

Pari-mutuel betting will not eliminate bookies, since bookmakers offer a number of advantages: they give credit, while tracks do not; they are in every neighborhood; they take exotic wagers (parlays and the like) while state organizations are confined to official odds; and the big gamblers, whether professionals or affluent amateurs, prefer bookies, using money from tax evasion to gamble with.²⁶

Pari-mutuel betting will tend to minimize the involvement of bookies in horse racing, by offering a legitimate outlet for bets. The advantage to bettors at the window is the insurance of payment, of honest odds and state regulation. The danger of corruption can be minimized with the use of such equipment as totalisators.

INSTITUTIONAL SAFEGUARD

A copy of California code covering pari-mutuel betting is included in appendix two. As spelled out in the Code, there is a California Horse Racing Board to supervise and jurisdiction all matters dealing with horse racing in the state. The three Board members are the Governor's appointees serving terms of four years. They are disqualified from membership for;

a) Holding any financial interest in a horse race track or in the operation of any such track or in the operation of any such track within this state, or in the operation of authorized wagering on the results of horse races.

b) Accepting any pecuniary reward other than authorized salary, from any horse race track in this state or in respect to its operation of authorized wagering on the results of horse races.²⁷

The board appoints all its employees who are subject to these same disqualifications.

Licenses must be obtained from the Board to operate a race track. All licenses are subject to suspension or revocation for non-compliance with Board regulations-state racing regulations. All licensees must be residents or registered voters of the state for two years.

The number of racing days for each racing association of the state is allocated by the Board. Depending upon the size of the county the number of racing days varies, ranging from 100 for a county of one million to 14 for a county of less than 500,000 people.

The Board has the power to "compel productions of any and all books, memoranda or documents showing the receipts and disbursements of any person licensed under this chapter".²⁸ It may also subpoena any members.

As concerns bookmaking, section E 13572 states, "Board may, by rule, provide for the exclusion or ejection from any inclosure

A table showing pari-mutuel revenue by state is included in Appendix Two.

Games of chance are legal in Alaska when restricted to non-profit organizations to allow them to raise money for educational and patriotic purposes. The concept of gambling is acceptable to The Alaskan Legal Code if the intent has merit.

"Alaska maintains the smallest state population of any state in the Union. Alaskan unemployment is a high 13% and of those who are employed, nearly 50% work on military bases.³⁴ Nearly one-half of the state's people live within a fifty mile radius around Anchorage (pp46, 137)³⁵ Tourists in Alaska annually number about 100,000. "The State badly needs highways, railroads, hotels, ski areas, and more public parks-new lures for urban Americans as well as Japanese, who are relatively near."³⁶

(According to the latest statistics from the Department of Tourism, Juneau (October 7, 1974) there were 252,000 tourists visiting Alaska in 1974. Tourism was up 19% for the first six months of 1974. (M.J. Ryder)

The role of pari-mutuel betting in attracting settlers, providing entertainment and culture, employment at the tracks, and a more diverse economic base should be considered. Population distribution would seem to suggest centering Alaskan Horseracing in the Greater Anchorage area.

Alaska currently has two horse racing tracks, one in Soldotna and one in Palmer. The latter is probably the only one capable of supporting pari-mutuel horse-racing at this time. The Palmer grounds seat 1000 and accomodate over 2,500. (See newspaper article in Appendix Four).

The Pari-Mutuel Attendance and Turnover chart indicates that each bettor generates approximately \$67 worth of revenue for each racing day. Without track improvements to expand capacity, the Palmer track could theoretically generate approximately \$67,000 a day under existing conditions.

If horse racing revenues were running at the low estimate level, Alaska could operate on a percentage basis, as has been done in Wyoming.

Wyoming has a population which approximates Alaska's, and supports two to four racetracks. Jack Miller, Director of Cheyenne Frontier Days Rodeo, allowed as how totalisator equipment rental proved no problem when pari-mutuel betting was in operation. The Rodeo dropped pari-mutuel betting in 1972 to concentrate more fully on the non-racing horse events which were more central to their operation. Crowds for the Rodeo and Horse Racing averaged 16,000 at that time, 40-50% of which were in-state residents. Miller said that multiple considerations are involved in making betting profitable, but that it could be if sufficient emphasis is given to it. Cheyenne Frontier Days dealt with Lloyd Shellhammer of Montana for their equipment, which cost 4 to 5% of the total take (well below the \$100,000 fee of large operations like California's).

Central Wyoming Fair in Casper generally turns significant profits, according to one employee, whose estimate of crowd composition was as high as 75% local. As few as 30% of the horses are in-state, she reported. Central Wyoming Fair runs about ten horses in each of ten races a day during their eight day racing season. Underworld involvement was non-existent, in the opinion of the track.

One Wyoming couple was interviewed. They went to the race track on occasion, felt it was interesting entertainment. The couple, retired for some years, felt that it was a good idea to legalize pari-mutuel betting in order to keep control over it and bring money to the state. They thought the majority of the crowds were local and were not aware of any underworld involvement.

Unlike Alaska, Wyoming borders on five states with legal pari-mutuels, namely Montana, Idaho, Colorado, Nebraska and South Dakota. A significant number of horses come to Wyoming from Colorado. Alaska is approximately 1,500 miles from the closest racing state. Transportation systems are comparatively poor. The main highway to Alaska from the continental United States travels 1,523 miles between Dawson Creek, British Columbia, and Fairbanks, Alaska. All but 300 miles of it lie in Canada. Most is unpaved.

Alaska could expect to raise sufficient crowds of spectators and it is anticipated that horses, from the Lower 48 and Canada would be shipped into Alaska to assure a satisfactory racing program. In the embryonic stages of development it is estimated that three hundred horses would be required to run a racing program that would be economically sound. Money must be spent building stables, obtaining feed, employing veterinarians, jockeys, saddle and harness makers, blacksmiths, stewards, underwriters and state inspectors.

Initially, many of the amenities usually associated with horse racing tracks would be missing, but the basic plant could be provided to meet minimum standards. Similarly, a fair could work without totalisators, using modern computers not in existence at the time when totalisators were conceived. One Anchorage business equipment firm has indicated that it could provide small computers, complete with pari-mutuel program for under \$3,000 (total cost of purchasing equipment and program). Such computers might be more viable under current conditions.

Dog racing might be a more desirable form of pari-mutuel betting in Alaska. The following quote tells about the Wonderland dog racing track in Revere, Massachusetts.

"A dog track bears absolutely no resemblance to an oriental palace. It looks more like something you race kiddie-cars

on. The back area required to kennel the dogs is relatively meager, and Wonderland was paying the almost negligible Revere taxes. Unlike the horsemen, the dog owners are very reasonable people, possibly because nobody ever told them they were the heirs to the Sport of Kings. The upkeep on a Greyhound is no more than you would expect it to be; there are no jockeys to split the purse with; the owners are sometimes their own trainers; and there are only a few states in which they can race. Taken altogether, they are more willing to take what they can get. The total purses on any given night are a percentage of the handle on that day; that's right, the winning owner doesn't know what he's won until the night is over."39

There are seven states that have pari-mutuel dog races; Florida (17 tracks, 5,923,000 attendance and a pari-mutuel handle of \$303,056,000 in 1967-68), Arizona (5 tracks), Massachusetts (6), Colorado (4), Oregon (1), Arkansas (1), and South Dakota (2).

One possibility unique to Alaska would be Pari-mutuels on sled dog racing, the kind which is currently run annually by the Anchorage Fur Rendezvous.

CONCLUSION

Pari-mutuel betting is currently legal in thirty-one out of fifty states. The experience of these states has been that pari-mutuel betting is usually profitable, resulting in additional state revenue. Population does not seem to be a handicap for Alaska, as indicated by the example of Wyoming, whose population is roughly equivalent. If legalized, pari-mutuel betting should be profitable and in other ways beneficial to Alaska under normal conditions.

Fears of underworld involvement in legal pari-mutuel betting stem from past experiences which no longer hold true. Today less than three per cent of illegal bookmaking involves horseracing. With the correct equipment and legal safeguards, most experts would agree that criminal bookmaking poses no threat to horseracing in Alaska.

A variety of other considerations exist which argue for legalization: badly needed funds for state government, attracting settlers and tourists, providing recreation and amusement, creating much needed jobs and stimulating a variety of new supporting industries, to name a few. Arguments against legalizing pari-mutuel betting center largely on the unfounded fear of criminal involvement and moral objections which are not objectively verifiable.

Several questions remain: Can Alaska ultimately provide the horses for large scale pari-mutuel operations? Should Alaska simply remain at a low level of operations, using its own horses and computers? How will the myriad of special conditions unique to Alaska affect the situation as a whole?

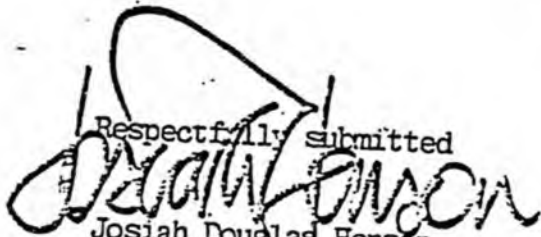

These questions in no way present obstacles to legalization and will be easily answerable on investigation once pari-mutuel betting is approved. The conclusion of this report is that neither economic considerations nor the possibility of underworld involvement stand in the way of such approval.
