MEMORANDUM

To: Members of the Senate Resources Committee

From: Committee Staff

Re: SCR 4, "Relating to the management of state sand and gravel resources."

This concurrent resolution is a counterpart to SB 71, previously heard in the resources committee and passed out last week.

It asks the governor to direct the Department of Natural Resources to carry out a program to identify, inventory and set aside long-term reserves of sand and gravel and set up a management system for the utilization of the reserves.

As already addressed by the sponsor, there is no intent to tie up the reserves in perpetuity, but to plan for its usage.

The use of the state's sand and gravel resources has been a continuing problem around the state. Since there has not been a systematic approach to its inventory or identification, conflicts have arisen between private users and the state. For example, some pits have been closed to private sale because the state does not know how much is there and is reluctant to sell because the Department of Transportation may need gravel in the future.

This problem could be corrected by a management plan which investigates anticipated needs of the state and the private sector.

POSITIONS:

FULL-TIME						
PART-TIME						
TEMPORARY						

ANALYSIS : (Attach a separate page if necessary)

The Fiscal Note for SB 71, which relates to a sand and gravel inventory project, would fund the program described in this resolution.

In addition, a FY 88 budget amendment for \$132.0, if approved by the Legislature, would fund this program.
