To: Members of the House Community and Regional
Affairs Committee

From: Rep. Eileen Panigeo MacLean

Re: HB 522, "An Act making appropriations for payment
as grants to municipalities and unincorporated
communities for water, sewer, and solid water
projects; and providing for an effective date."

Date: March 15, 1990

In many villages, water is delivered from a community well by truck. Sewage disposal is accomplished by honeybuckets which are also picked up by truck.

In many villages, Hepatitis A is a perennial problem that is attributed to current, inadequate water and sewer systems. A piped system would eliminate public contact with honeybucket containers and would dramatically reduce the risk of contracting Hepatitis.

The projects contained in HB 522 respond to the need for improving health conditions in rural Alaska by improving current water and sewer systems.

I urge your support for HB 522.
