POSITION PAPER

RE: House Bill 576

SPONSOR: House C&RA Committee

Program Effects of the Bill

The bill amends AS 29.35.020(a) by adding language which would authorize municipalities to exercise the power of fire protection outside their boundaries. Existing AS 29.35.020(a) authorizes municipalities to provide the following services outside their boundaries: parks, playgrounds, cemeteries, emergency medical services, solid and septic waste disposal, utility services, airports, streets (including ice roads), trails, transportation facilities, wharves, harbors and other marine facilities.

Comments

Extraterritorial powers have been added to AS 29.35.020 incrementally as needed or requested by municipal governments. This bill to permit fire protection powers appears to fit within this tradition and would clear up existing ambiguities as to the power of municipalities to exercise this service on an extraterritorial basis. The provision of this service is not expected to act as a deterrent to annexation, any more than the other powers listed under this citation.

David G. Hoffman, Commissioner

DEPARTMENT OF
PUBLIC SAFETY

BILL NO:

SB 438

DATE:

February 20, 1990

TITLE:

An act relating to the provision of fire protection services by a municipality outside its boundaries.

CONTACT:

Gordon Brunton
465-4331

This bill would authorize a municipality to provide fire protection services outside its boundaries.

The bill amends AS 29.35.020(a), adding "fire protection services" to other facilities and services currently authorized, such as parks, cemeteries, emergency medical services, sewage disposal, airports, etc. The authority to provide fire protection, while permissive, will provide statutory authority for the extraterritorial service.

Unincorporated areas outside municipalities, especially in rural areas, may benefit by having fire protection not currently available.

The Department of Public Safety supports passage of SB 438.

Arthur English
Commissioner

TO: Senator Mike Szymanski, Chair, and
Committee Members
Senate Community and Regional Affairs Committee

FROM: Scott A. Burgess, Executive Director 

SUBJECT: SB 438 - Relating to provision of fire protection services by a
municipality outside its boundaries

SB 438 would add fire services to the list of facilities and services municipalities may provide outside their boundaries. It also clarifies that municipalities have the authority to regulate the use and operation of facilities and services provided to the extent that the jurisdiction in which they are located does not regulate them.

Under present law, municipalities do not have the specific authority to provide fire services outside their boundaries, which means that fire departments must justify each decision to operate outside their boundaries on the basis of life safety issues. A fire department may want to provide protection to, for instance, a residence just outside municipal boundaries to protect property within the boundaries, but questions of liability coverage as well as an unwillingness to expose the department to public criticism about operating outside the taxing district may deter such a decision.

Giving fire departments authority to provide fire services outside their boundaries would insure that liability and workers compensation insurance would cover all job-related actions of firefighters. It would also extend fire fighters' statutory immunity for job-related actions to actions outside municipal limits.

The Alaska Municipal League supports this legislation as providing greater protection for municipalities, for municipal fire fighters, including volunteers, and for the general public.

RE: Senate Bill 438
Fire Protection Service Outside Municipalities

Dear Senator Coghill,

I have read Senate Bill 438 which has been proposed by you and Senator Fischer and fully support it.

However, it could go one step further. In the Matanuska-Susitna Borough, Fire Service Areas have been established and one is the Greater Palmer Fire Service Area. The City of Palmer has its own fire department and contracts with the Matanuska-Susitna Borough to provide fire service to the areas which are a part of the Greater Palmer Fire Service Area.

The majority of the residents as well as the Fire Service Area supervisors would like to be a part of the City of Palmer Fire Department rather than under the Matanuska-Susitna Borough auspices. There are several reasons for this desire, but most importantly are the joint funding and managerial operation of the department.

In expanding your proposed Senate Bill 438 to incorporate the ability of a Fire Service Area to petition a municipality for fire protection services, this would alleviate a problem such as ours as well as other fire service areas throughout the State.

Letter from City of Palmer 2/22/90
A GROWING FRONTIER IN THE HEART OF THE MATANUSKA VALLEY

The Honorable Jack Coghill

"Site of the First Cannery in Alaska"

February 20, 1990

Senator Coghill
Fouch V
Juneau, AK 99811

Dear Senator Coghill,

The City of Klawock supports Senate Bill 438 which would include fire protection under extra territorial jurisdiction for this would provide needed fire protection for the residents residing outside of the City limits such as a trailer court where approximately One Hundred persons reside and fire protection for the Klawock Alaska Timber Saw Mill which employs approximately One Hundred persons in three shifts and lives and property of those residing on the Saw Mill site. In fact the City had submitted an application for a fire protection grant to provide needed fire protection for the residents of Klawock and those residing outside of the City limits. The grant application was rated high by one of the review board but rated low by two others because they believed that the fire department should not leave the City limits to extinguish fires.

In the past the Klawock Volunteer Fire Department has responded to fires outside the City limits. In 1989 the Klawock Volunteer Fire Department had to respond to Sanitary Landfill fires. Had those fires not been extinguished, the cities of Klawock and Craig would not have had a site to dispose of solid waste. The Klawock Volunteer Fire Department has also responded to emergency medical, police and fires in the trailer court outside the City limits and fires at the Saw Mill. Had the Saw Mill been destroyed or even partially destroyed by fire many would be unemployed until necessary repair work was completed, also lives and property were in jeopardy. Therefore it is very important to those living and working outside City limits to have fire protection. This has been discussed with the insurance company. There should not be an increase in insurance premium for the City. Currently the City does face potential liability by City limits. Passage of Senate Bill 438 would eliminate that liability and provide needed fire protection for those living and working outside the City limits.

An amendment to Senate bill 438 that should be considered is Police Protection. Currently City police jurisdiction is within City limits. Alaska State Troopers deputize City police to allow the City police to respond to police protection needs outside City limits. Does deputizing City Police Officers to allow them to respond to police protection needs outside City limits protect the City from any potential liability should the City police be unable to respond to police protection needs within the City limits because the City police was responding to police protection needs outside the City limits? It is the City tax payers that are paying the wages of the City police officers. Also the City has no documentation to justify or authorize spending City tax dollars for police protection outside the City limits, nor does the City derive any revenues other

Continued...

Senator Coghill
February 20, 1990

than for traffic violations for police protection outside the City limits.

The aforementioned are mentioned in consideration as a possible amendment to Senate Bill 438.

Respectfully,

Aaron T. Isaacs, Jr.
Mayor
