STATE OF ALASKA EMPLOYMENT APPLICATION

This application may be used to apply for one or more levels of a job class series, unless the recruitment information instructs you otherwise.

There are two important sources of recruitment information which you should check prior to application. The JOBS Book provides a description of job classes available for application on a continuous basis. Recruitment Bulletins, which are issued each month, describe the latest vacancies or job classes available for application during specific periods. You can find this information and the booklet "How to Apply for a Job with the State of Alaska" at many locations statewide, including Division of Personnel offices listed on this application, department personnel offices and Department of Labor Job Service Centers.

If you wish to update an application already on file with the Division of Personnel, you may do so provided the job class is open to recruitment. However, if the application on file is more than one year old, you must submit a new application.

Complete all parts of the application. The EEO Survey portion on the back page is voluntary, however it could increase your chances of obtaining a state position under terms of the State of Alaska's Affirmative Action Program. An application which does not contain essential information or is illegible will be returned to you. In order to receive full credit for your training and experience you must provide complete and detailed information. REPORT ANY ADDRESS AND TELEPHONE NUMBER CHANGES PROMPTLY TO ANY OFFICE LISTED BELOW. Please be sure to keep a complete copy of your application.

For applicants interested in the 35 clerical related job classes covered by the Office Skills Test, a separate "Office Skills Test Application" must be filled out prior to testing.

The Social Security Number will be used only as an identifier in our computer files. If you do not wish to give us your Social Security Number, we will assign an identification number to you. The number must be used in all correspondence or inquiries regarding applications.

I worked 2 years on the medical floor and 2½ years on surgical. I was a frequent float, most often to the ER, but also to the Recovery Room, Intensive Care, and Obstetrics.

My work on the medical floor and surgical floor was always challenging. I had been acting head nurse several times, frequent charge nurse, and staff nurse/team member. As the charge nurse it was my responsibility to supervise the staff on the unit (5-7nurses and aides), assign patients needs appropriate to the level of nursing capability, and be a resource person. In all areas of nursing to follow the policy and procedures in caring for patients.

I was also a preceptor for a new grad. RN for 5 months. This particular nurse was very bright, but needed -practical- assistance and a patient spirit, both of which I could offer her. I adapted an assessment form to document her progress for our monthly and as needed meetings.

I also created a diabetic teaching form that was taken from an inspiring workshop on diabetes. This form is still in use.

I am experienced in IV therapy and instructing others and problem solving. Also the care and management of subclavian lines, total protein nutrition and its management. Have experienced Hickman caths and Porta caths. Have given chemotherapy.

Pre and Post op care. The necessary pre-op teaching, physical and psychological assessments, medications, pain management, exercise, respiratory and so on. Documenting throughout the patient stay as to current status and reporting changes as warranted to the Dr.

In April 1987 Medical and Surgical were combined and a Short Stay Surgery area was developed. I was able to function independently and often the only nurse on the unit. In the ER, I worked as a team member (1 Dr. and another RN), in emergency (respiratory, gynecological, trauma, overdosing, and cardiac for example) and non emergent clients where the ER acts like a clinic. Quick psychophysiological assessments were necessary, to set priorities of need, keeping the Dr. informed, reacting and acting timely and efficiently to Drs. orders to keep the unit running smoothly. Also, maintain a calm and cooperative attitude to work together as a team. Amidst it all to remember the patient and family and not just seeing the disease process.

The Recovery Room: I was able to assist when needed and could function independently to cover for vacations. Care of the newly post-op patient; Immediate body assessment, pain management, documentation, and keeping the Dr. informed of any changes were the key areas.

ICU and OB, I floated less often to but was oriented and could function

as the 2nd person. In ICU/CCU I managed cardiac patients, trauma (logging, motor vehicle accidents), gastro intestinal bleed for instance.		FINAL SALARY:	
In OB as the float I cared for post partum and also was oriented to newborn nursery. In both areas I could function independently with minimal assistance.		No of Employees Supervised:	
In my nursing style I use a Holistic approach in caring for the patients and family. Assessing the needs in hospital and potential at home, planning, and implementing, and evaluating--which is an on going process. I also had good working relationships with the physicians; working for the good of the patient.		Name of Your Supervisor:
