EXISTING FEDERAL-AID PROGRAM

January 1990

1. Authorities and Regulations

- A. Highway Acts usually cover two to four year periods.
 - 1. The Acts contain both program requirements and funding amounts.
 - 2. The 1987 Act expires in October 1, 1991.
- B. Highway Acts are organized by subject in the U.S. Codes (USC).
 - 1. Highways is under Title 23 USC.
- C. Implementing regulations of the USC are in the Code of Federal Regulations (CFR).
 - 1. Highways is under 23 CFR and includes the policies and procedures for administering the Federal-Aid Program nationwide.
- D. The FHWA Division Office in each state applies the policies and procedures to individual situations as they occur.
 - 1. For Alaska, the Division Office is located in Juneau, the Region Office in Portland, and the Headquarters Office in Washington, D.C.
 - 2. The 16 person Division Office includes 11 professionals, primarily engineers, who are responsible for all Federal-aid actions including planning, design, right-of-way, construction and maintenance.
 - 3. Three major roles of FHWA.
 - a. Approve funding.
 - b. Provide technical assistance.
 - c. Assure a uniform nationwide highway system.

2. Funding Process

- A. The Highway Trust Fund is the source of funds and obtains income from user fees.
 - 1. It was established in 1956 to fund the Interstate Program.

2. Funds are collected by IRS from producers who collect from retailers, who collect from consumers.

B. Apportionments/Obligations

1. Based on the Highway Act, the funding amounts are distributed to States by established formulas. (Attachment #1)
 - a. FY 90 = \$150.6 million for Alaska.
 - b. The 5 year average in Alaska is \$157.9 million.
2. The total amount is reduced by an obligation limit set by Congress based on national budget concerns.
 - a. FY 90 = \$145.2 million for Alaska.
 - b. The 5 year average in Alaska is \$148.5 million.
 - c. The accumulated excess apportionments is \$63.4 million
3. Non-interstate funds are available for four years (Attachment #2), i.e. unused amount must be less than four year total. Interstate is available for two years.
 - a. Alaska has never lapsed any funds.
4. Actual money is not reimbursed to the State until costs have been incurred and a bill is submitted. (Attachment #3)
 - a. Most other Federal Program are grant programs. We are a reimbursement program.

C. Alaska is Unique

1. In all States, limited transfers can be made between funding categories.
 - a. In Alaska, system funds are interchangeable after the appropriate category is completely obligated.
 - b. Category fund switches are limited. (Attachment #4)
2. Interstate category is for funding purposes only. For design/operations, primary system rules apply.
3. Matching ratios are increased because of large Federal Land ownership.
 - a. Interstate = 93.42% Federal
 - b. Other systems = 88.68% Federal

4. Federal-Aid Program includes the State Ferry System as part of the highway network.

a. No additional funds are provided.

3. Programming Procedures

A. State develops Capital Improvement Program and determines Federal-aid projects.

B. Legislature approves the Capital Improvement Program.

C. In October each year Headquarters submits the list of Federal-aid projects (105 Program) for which Federal funds will be requested.

1. FHWA reviews 105 submittal for the following items:

a. Total project funding does not substantially exceed available funds.

b. All funding categories are represented to prevent lapsing.

c. Projects are eligible for a Federal-aid system

d. Identified statewide needs are addressed.

2. During the year, changes in the list may be requested.

D. Regions submit Project Development Authorizations (PDA's) to Headquarters for approval of funds to begin work on individual projects.

1. Headquarters Programming prepares request for Authorization To Proceed (ATP's) and transmits to FHWA.

2. FHWA reviews for eligibility, approves and returns to Headquarters Programming.

3. Any work done before approval date of ATP is not eligible for reimbursement with no exceptions.

Apportionment Formulas

Formulas for apportioning authorized sums for certain classes of Federal-aid highways are specified by statute. These are shown below.

<u>Program</u>	<u>Factors</u>	<u>Weight</u>	<u>Statute*</u>	<u>Minimum Apportionment</u>
Interstate System (for completion only)	Relative Federal Share of Cost to Complete the System**	1	104(b)(5)(A)	1/2 percent (including Alaska)
Interstate Resurfacing, Restoration, Rehabilitation, and Reconstruction	Interstate System Lane Miles	55%	104(b)(5)(B)	1/2 percent
	Vehicle Miles Traveled on Interstate System	45%		
Interstate Highway Substitution (3/4 apportioned, 1/4 discretionary allocation)	Relative Federal Share of Cost to Complete Substitute Projects	1	103(e)(4)	-----
Primary System	<u>Formula A</u>		104(b)(1)	
	Area	2/9		
	Rural Population	2/9		
	Rural Delivery Route Mileage and Intercity Mail Route Mileage	2/9		
	Urban Population*** (1/2 percent minimum (except D.C.))	1/3		

<u>Program</u>	<u>Factors</u>	<u>Weight</u>	<u>Statute*</u>	<u>Minimum Apportionment</u>
	<u>Formula B</u>		Sec. 108, P.L. 97-424,	
	Rural Population	1/2	Extended by	
	Urban Population***	1/2	P.L. 100-17	
	For each State, determine greater of A or B, then: Each State's apportionment equals: A or B x $\frac{\text{Total Primary Authorization}}{\text{Sum of all States' A or B}}$ Except that: the apportionment is not less than smaller of A or B			1/2 percent (including territories as a whole)
Secondary System	Area	1/3	104(b)(2)	1/2 percent (except for D.C.)
	Rural Population	1/3		
	Rural Delivery	1/3		
	Route Mileage and Intercity Mail Route Mileage			
Urban System	Urban Area*** Population	1	104(b)(6)	1/2 percent
Urban Transportation Planning	Urbanized Area**** Population	1	104(f)(2)	1/2 percent
Bridge Replacement & Rehabilitation	Relative share of total cost of deficient bridges	1	144(e)	1/4 percent (10 percent maximum)
Hazard Elimination	Total Population	3/4	152(e)	1/2 percent
	Public Road Mileage	1/4		
Highway Safety Programs	Total Population	3/4	402(c)	
	Public Road Mileage	1/4	1/2 percent	
Rail-Highway Crossing	Area	1/12	130(f)	
	Rural Population	1/12		
	Rural Delivery Route Mileage and Intercity Mail Route Mileage	1/12		1/2 percent
	Urban Population	1/4		1/2 percent
	Number of Rail-Highway Crossings	1/2		none

Availability and Limitation on Obligations

ATTACHMENT 2

During a limitation on obligations for FY 1990 (October 1, 1989-September 30, 1990), States could be obligating funds from five different fiscal years.

Figure 7

Reimbursement

Figure 6

Transferability

FEDERAL AID HIGHWAY PROGRAM

FY 1985

SINCE 1956

Federal Aid Highway Program Gift Why Important To Alaska. The chart on the upper left indicates the trends in the amounts of federal funds:

1) apportioned to Alaska, and 2) made available after budget limitations were applied by lawmakers and actually used (obligated for subsequent spending on Alaska road and bridge improvements). Federal aid highway funds are restricted by federal mandate for highway, ferry and ferry terminal improvements as well as planning, research and safety activities. Federal funds cannot be directed to highway maintenance activities.

1987 A Record. The upper right chart tracks actual payments to Alaska from 1977 to 1987 (federal fiscal years). Note that 1987 was Alaska's record-high year for Federal Aid Highway Program receipts. The federal funds stem largely from a nine cents per gallon tax on gasoline, a three cents per gallon tax on gasohol, a 18 cents per gallon tax on diesel and other special motor fuels, as well as a 12 percent sales tax on heavy truck and truck trailer purchases, a tax on truck tire sales and an annual use tax on heavy trucks. The federal highway user taxes are accounted for in the U.S. Treasury in a Highway Trust Fund and apportioned to each state for the modernization of major highway systems and bridges.

Federal Budget Controls Limit Spending. For the October 1, 1985 to September 30, 1986 federal fiscal year, Alaska was apportioned \$165 million of authorized funds, but due to federal obligational control limitations only \$151 million of the apportioned funds were actually available to Alaska. In other words \$14 (\$9 federal and \$5 state) million worth of highway improvement projects could not be started because the obligation ceiling restricted the use of authorized and available Highway Trust Fund money.

Slowdown In Highway Improvements. The situation is far worse for fiscal year 1988 because it is controlled by the authorization levels mandated by the Surface Transportation and Uniform Relocation Assistance Act of 1987. This act reduced annual authorization levels over the 1988 to 1991 period.

Furthermore, obligational control further limits fiscal year 1988 funds to about \$130 million. Unless obligational controls are lifted, Alaska's highway improvement program will be sharply lower than the 1983 to 1987 experience.

Federal Incentives For Road And Bridge Modernization. The portion of the cost borne by federal highway user taxes, depends on the Federal Aid Highway System - Interstate, Primary, Secondary, Urban classification of the road to be improved. Federal funds will participate in 94.7 percent of the cost of Interstate Highway System original construction or rehabilitation, 91.4 percent of the cost of improving the other systems and 80 percent of bridge replacement or rehabilitation costs. Overall, every dollar of Alaska funds that are made available for highway and bridge improvements is matched by nine dollars of Federal Highway Program funds - up to the limit of federal obligation authority. This is a great incentive for Alaska highway and bridge modernization.

Alaska Benefits The Most From The Federal Aid Highway Program. The bottom left chart indicates the amount of Federal Aid Highway Program funds apportioned to Alaska in 1985, as well as the amount of federal highway user taxes paid by Alaskans in that year. The bottom right chart summarizes both Alaska's apportionment of Federal Aid Highway Program funds and Alaskans payment of federal highway user taxes over the 1958 to 1985 period. At five and one half to one for FY 1985 and nine to one overall, Alaska leads all other states in the ratio of apportionments to taxes paid. This is due primarily to the fact that state apportionments of federal funds are related to the extent of land area in each state. Alaska, having the largest proportion of land of any state in the nation, receives disproportionately large shares of Federal Aid Highway Program funds.

Non-monetary Benefits. Besides financial assistance, there are other benefits that come with a strong Federal Aid Highway Program. First, it is required that national design standards be used and this promotes national uniformity as well as the safest possible highway environment. Second, federal officials on the scene in Alaska (the Juneau office of the Federal Highway Administration has a 12-person professional staff) provide both an oversight function as well as technical assistance to ADOT&PF officials. Lastly, the long standing spirit of cooperation that has prevailed between federal and ADOT&PF officials has been a stabilizing influence in Alaska's program of highway improvement.

CAPITAL IMPROVEMENT PROGRAM, 1988-1993

DISTRIBUTION

\$ SOURCE

TOTAL: \$2.0 BILLION

Note: "Statewide" includes state matching \$ for Federal Aid Highway Program Improvements and \$ for state equipment fleet replacements.

Important Control Mechanism Annually the AODT&PF updates and publishes a six year capital improvement program. It is the source document for the scheduling of improvement projects' preconstruction engineering activities. Only those projects that are listed in the six year program can be let to contract. And only those listed projects can be advanced to the design stage. Annually the proposed improvement projects are studied and revisions made as project priorities change and year-to-year scheduling shifts are found necessary.

Stabilizing Influence. This master document of long range planning has been important in stabilizing the work activities of the Department. No longer is it justifiable for Region or Division officials to insert unlisted projects into their surveying, preliminary engineering or design work programs, without prior official application for a change in the capital improvement program.

Sources Of \$2.0 Billion Program. The total dollar value of the projects listed in the 1988-1993 (including a seventh year, 1997, which was added due to the late date in receiving 1987 Federal A&D Highway Program funds) is \$1.96 billion. The Program anticipates that 69 percent of the funds will come from federal sources, 12 percent from the State General Fund, 9 percent from the International Airport Revenue Fund and 10 percent from other sources. The other sources include equipment lease fees accruing to the Highway Working Capital Fund for State Equipment Fleet replacements. Also in the other category are funds that will be reimbursed to the Department by other other agencies for both plan preparation and construction. Lastly the other source of funds includes International Airport Revenue bonds for Anchorage and Fairbanks airport improvements that are beyond that which can be financed by International Airport revenues.

Planned Distribution Of Funds It is estimated that \$1.2 billion or almost 60 percent of the total program of expenditure is for improvements in the Central and Northern Regions. However it should be noted that the \$310 million (15.7 percent) that is listed for statewide expenditures includes all the state matches of federal funds (regardless of improvement project location), as well as planned expenses for State Equipment Fleet replacements, the funds for research and the funds for transportation planning.

1986 ADOT&PF EXPENDITURES

FUND SOURCES

EXPENDITURE OBJECTS

TOTAL: \$525.4 MILLION

ADOT&PF Spent \$525.4 Million in 1986. The charts above and at right are five perspectives on Alaska Department of Transportation and Public Facilities expenditures in fiscal year 1986. The ADOT&PF is not only responsible for State Highway System administration, operations, maintenance and improvement, but also owns, operates and maintains the nine-ship Marine Highway System, two International Airports, 215 other airports, 45 seaplane boats, harbor facilities, the state equipment fleet and almost 400 state owned buildings.

Highlights:

- o Payments for construction in progress, mostly highway and airport improvements, represented almost half of all expenses, \$247.5 million.
- o Spending in the Northern Region, which has the most miles of state highway, led the three ADOT&PF regions.
- o Not included as ADOT&PF income is the \$33.8 million in passenger and vehicle fees for Marine Highway System passage, which accrue directly to the Alaska Treasury.
- o About three fourths of the federal funds are reimbursements from the Federal Highway Trust Fund for state highway improvements. The other one fourth is from the Federal Airport Trust Fund for airport improvements.
- o Some of the "other" income is from concessions and fees from Anchorage and Fairbanks International Airport usage. These funds are deposited in the International Airport Enterprise Fund.
- o Two thirds (66.8 percent) of all expenditures were directed to private enterprise for construction in progress, supplies and other costs of business operation. One third (33.2 percent) was for ADOT&PF salaries and benefits.
- o 57.2 percent of all expenditures were for design (consulting or in house), right of way purchase and construction progress payments for improvements to highways, airports, ferries, harbors and other public facilities.

More Information Needed On Finance Trends. The information shown is the result of a special analysis made for this Review by the ADOT&PF. However it has been Highway Users Federation experience in other state highway program reviews that such information is readily available in the annual reports of the state highway and transportation departments. The information is important for the following reasons:

- 1) to place the Program in perspective with the programs of other state highway and transportation departments in order to detect possible inconsistencies,
- 2) to place modal components in perspective,
- 3) to analyze trends, and
- 4) to provide legislators, administrators, other officials and constituent organizations with information necessary to make informed decisions regarding Program direction and support.

MAJOR BUDGET ELEMENTS

TOTAL: \$525.4 MILLION

BUDGET CATEGORIES

1986 CONTRACT AWARDS

MODE

REGION

SOURCE OF FUNDS

\$160.9 MILLION

In calendar year 1986 the ADOT&PF awarded \$160.9 million in improvement contracts. Almost half (46.1 percent) were for highway and bridge improvements. The Central Region awarded 45.5 percent of the total projects, very close to the highway target (45.8 percent) for that Region.

Federal Participation. Six out of every ten dollars of the funds necessary to accomplish the improvements were federal dollars. In that the federal government does not ordinarily participate in building and harbor improvements, the federal participation was 87.2 percent of the \$110.5 million in highway (and bridge), aviation and Marine Highway System improvements. \$50.4 million of state funds were directed to buildings and harbor projects and \$14.1 million directed to federal participation projects.

New Analytical Process Being Examined. With over \$100 million of improvement projects being awarded to private contractors each year, it is important to closely monitor the contract prices being bid to both guard against possible fraud and collusion and to assist the designers in finding the most cost-effective of alternative designs. To aid the bid analysis process, the ADOT&PF is now examining a new computer-assisted procedure, sanctioned by the American Association of State Highway and Transportation Officials, that will provide faster review of construction project bids. Other states have found that the procedure has been helpful in speeding the bid analysis process and in detecting inconsistencies in the bids.

Decentralized Program Control Part Of The Problem. Alaska's decision to decentralize the management of the ADOT&PF Program in 1982 may be an inhibiting factor in gaining centralized information about many aspects of ADOT&PF Program - such as the construction contract bidding process. Without an ADOT&PF, department-wide model, each Region and Division has developed and employs their own set of processes. Analysis of all the various management techniques used by the decentralized management team is beyond the scope of this Review.

Need To Standardize Management Systems. Decentralized control of the ADOT&PF Program appears to be absolutely essential for a state as large as Alaska and with so much of its Program in remote areas. However, in order to facilitate the aggregation of essential information on how the Program is being carried out, it is recommended that the ADOT&PF's management systems be standardized. The progress being made in improving the accounting for capital expenditures (see Chapter IV) is an example of this suggested approach to improved management of the ADOT&PF Program.

Need To Augment The Headquarters Staff. In order to develop a standard bid review process, as well as highway and airport maintenance management procedures, accounting procedures, construction practices, design standards, preconstruction and construction scheduling procedures, right of way purchase procedures, training procedures, career guidance practices, construction quality control procedures, improvement program goals and all the other systems and policies needed to effectively manage and monitor the ADOT&PF Program, it will be necessary to augment the ADOT&PF headquarters staff. The added staff should be employed to find the appropriate systems from the various techniques in use by the Regions and Divisions - or in other states, to document and test the systems and then to assist in their promulgation and application.

FUTURE FEDERAL-AID PROGRAM

January 1990

The Administration's Highway Bill is still in preliminary draft form as final development is waiting completion of the National Transportation Policy which is scheduled for release by March 1. Major components of the currently proposed draft include the following major changes which would directly affect Alaska.

1. Preservation of the Major Federal-Aid System.
 - a. Includes the interstate and major arterial portions of the primary and urban systems.
 - b. Maintains the current 90% match rate (93.4% in Alaska).
 - c. Allows participation in toll road construction.
 - d. The major system funding in Alaska could be reduced from \$141 million to \$73 million as the \$68 million difference would become eligible for the local roads program.
2. Provides for a Flexible Local Roads Program.
 - a. A grant program with minimum Federal requirements for the minor arterial portion of the primary system, the secondary system, and urban streets.
 - b. Requires a 50% State match instead of current 88/12 split.
 - c. Each State receives only what they contribute to the Trust Fund which would reduce the eligible amount of \$68 million to the contributed amount of \$26 million in Alaska.
3. Includes a Rural Development Program to Provide Additional Funding to the Public Land States.
 - a. Will be allocated on a discretionary basis using rural population densities.
 - b. Uses a 50/50 match ratio.
 - c. Amount of funds not yet determined, but would probably not be a windfall for Alaska.
4. Funding Provisions.
 - a. No changes in Federal taxes.
 - b. No obligation ceilings.

- c. The first year would only authorize the unobligated balances (in Alaska \$63.4 million). A "Hold Harmless" clause would be invoked for this transition year.
- d. The national authorization limit would be raised from the current \$13 billion to \$20 billion to spend down the Trust Fund balance.
- e. Under the most optimistic proposal, if the apportionment formulas do not change, the increased spending level and decreased apportionments would result in no net change in Alaska's Federal share but would require an additional State match of \$15-\$20 million over the existing \$15 million.

All of this information is very preliminary and will not become more than speculation until Congress begins deliberations on the various proposals in late 1990 or early 1991.

MEMORANDUM

TO: Representative Niilo Koponen

ATTN: Lisa McLaren

FROM: Gretchen Keiser *G. Keiser*
Legislative Analyst

RE: Federal Transportation Funds for Alaska
Research Request 87-015

You asked us to investigate sources of federal transportation funds for Alaska to determine whether we were obtaining all available funding. In addition, you wanted to know if federal transportation funds for construction, maintenance and mass transit were administered separately.

We contacted the U.S. Department of Transportation for information on federal highway and mass transit funds for Alaska. The Alaska Department of Transportation and Public Facilities (DOT/PF) provided information about the administrative procedures involved in spending the federal funds. This memorandum first discusses federal highway funds administered by the Federal Highway Administration (FHWA) and then considers federal mass transit funds administered separately by the Urban Mass Transit Administration (UMTA).

Federal Highway Funds for Alaska

Annual revenues from the federal excise tax on gasoline are allocated nationwide on the basis of a state's miles of interstate highway, population and size. Alaska receives the minimum allocation of 0.5 percent, which represents about two to three times the amount of gasoline tax revenues collected in this state. General federal highway funds originally allocated to Alaska totalled \$165.4 million in the current federal fiscal year 1986--a one percent decline from the FY 85 funding level of \$167.6 million--following Gramm-Rudman budget adjustments. In mid-August, Alaska was notified that it will receive a supplemental allocation of \$3.2 million, which represents a share of unexpended FY 86 highway funds redistributed nationwide. The state also received \$5.2 million in FY 86 funding for special highway projects on federal public lands (e.g. the Craig-Klawock road on Prince of Wales Island).

Representative Koponen

August 22, 1986

Page 2

During the past few years, Congress has placed limitations on the amount of allocated funds each state is authorized to spend during the fiscal year. In FY 85, for example, Alaska was limited to 95 percent (\$158.6 million) of its allocation. During FY 86, Alaska may obligate \$151.1 million in general federal highway funds--about 90 percent of its revised \$168.6 million allocation. The previously mentioned special highway project funding is not subject to the Congressional limitation.

Federal highway funds may not be used for highway maintenance, except for major renovations of interstate highways. Table 1 summarizes the federal highway fund categories and provides examples of Alaska highways which fall into the various categories. The funds which have been obligated in Alaska during the current fiscal year are also presented in Table 1. As of July 31, 1986, about \$104 million had been obligated in all fund categories; Alaska could spend an additional \$43.6 million in FY 86 funds. If we take into account the \$3.2 million in supplemental funds which the state recently received and obligations through August 21, 1986, the state has a balance of \$39 million--or 26 percent of the revised \$151.1 million FY 86 limitation.

According to the Federal Highway Administration, Alaska receives all federal highway funds to which it is entitled and routinely spends those funds up to its annual limitation. The Department of Transportation and Public Facilities (DOT/PF) must submit project-specific information in order to obligate federal funds and receive the authority to proceed on a highway project. Once federal funds are obligated, the DOT/PF contracts for design, engineering or construction work. According to Ron Lind (Director, Division of Plans, Programs and Budget in the DOT/PF), the above-mentioned balance of \$39 million with only six weeks remaining in federal FY 86 is somewhat large but represents primarily a \$25 million Glenn Highway project to be obligated shortly. The DOT/PF has submitted to the FHWA a preliminary list of about \$50 million in projects to be authorized under the remaining FY 86 obligations.

The DOT/PF pays expenses as work proceeds on a highway project and then submits a monthly bill, which consolidates expenditures for all qualified projects, to the FHWA for reimbursement. In the past, there has been a 100 to 180-day delay before the DOT/PF submitted bills for reimbursement. According to Doug Goldbach of the Division of Management and Finance in the DOT/PF, the lag now averages about 60 days under the Alaska State Accounting System (AKSAS). Much of this lag occurs because expenditure data in AKSAS must be converted into a form acceptable by the FHWA. Mr. Goldbach indicated that they are supplementing AKSAS with new accounting software which will speed the data conversion and reduce this lag. In addition, DOT/PF is developing an "on demand" billing system, which would allow more frequent billing (up to the FHWA's once-a-week limit) during the peak construction season.

Page 3

Federal Mass Transit Funds for Alaska

According to Pat LeVine, Alaska Regional Administrator for the Urban Mass Transit Administration (UMTA), Alaska has done quite well over the past few years with respect to mass transit funding. In FY 86, the State has received about \$370,000 for rural (entire state outside of Anchorage) and elderly/handicapped programs. The Municipality of Anchorage has also received about \$1 million in UMTA "Section 9" funds this year. Additional sources of mass transit funds to Alaska include Federal Highway Administration funds which can be shifted from the urban system category to the UMTA. Anchorage and Juneau are sharing about \$1 million in FY 86 FHWA funds for mass transit programs. Finally, the UMTA has "Section 3" discretionary funds available for special projects. According to Ms. LeVine, the Municipality of Anchorage has received about \$20 million in Section 3 funds over the past several years for construction of its vehicle maintenance facility.

TABLE 1
 FEDERAL HIGHWAY FUNDS FOR ALASKA
 Fiscal Year 1986
 (millions of dollars)

<u>Fund Category</u>	<u>Applicable Alaska Examples</u>	<u>Statewide Obligations 7/31/86</u>
<u>Interstate</u>		
Construction	Parks Highways	\$ 4.8
Renovation (4R monies)	Richardson Highway	19.9
<u>Non-Interstate</u>		
Primary systems (major regional roads)	Sitka-Juneau ferry route Egan Drive in Juneau	44.9
Secondary systems (major rural connectors)	Ballaine Rd in Fairbanks Southwest AK ferry route	25.5
Urban systems (local roads)	Minnesota Drive in Anchorage	1.4
Safety	Hazard elimination at railroad crossings	5.9
Other	Planning	0.3
	Bridge replacement	<u>1.5</u>
TOTAL FY86 OBLIGATIONS AS OF 7/31/86:		\$ 104.2
REMAINING FY86 BALANCE AS OF 7/31/86:		\$ <u>43.6</u>
CONGRESSIONAL FY86 LIMITATION AS OF 7/31/86:		\$ 147.8

NOTE: The Congressional limitation was increased to \$151.1 million in August 1986, with receipt of \$3.2 million in supplemental funds. As of 8/21/86, Alaska has obligated \$112.1 million; \$39 million is the FY 86 balance.

MEMORANDUM

TO: Representative Niilo Koponen

ATTN: Lisa McLaren

FROM: Gretchen Keiser *G. Keiser*
Legislative Analyst

RE: Federal Transportation Funds for Alaska
Research Request 87.015 (Supplemental Information)

You requested us to provide additional information about the Federal Highway Administration (FHWA) FY 86 funds which were transferred to the Urban Mass Transit Administration (UMTA) and subsequently disbursed as mass transit grants to Alaska cities. Specifically, you were interested in: 1) how these funds are administered; and 2) why Fairbanks did not receive any of these FY 86 funds.

We contacted Pat LeVine, Alaska Regional Administrator for the Urban Mass Transit Administration, who clarified the use of FHWA funds for mass transit projects. During federal FY 86, about \$1.2 million was transferred from the FHWA to the UMTA for mass transit projects in Alaska. These so called Federal Aid Urban System (FAUS) FY 86 funds were disbursed by the UMTA to the Municipality of Anchorage. Anchorage has an ongoing metropolitan transportation planning process, with an advisory team of municipal, State and private transportation/mass transit people. The team identifies local mass transit projects, which are subject to approval by the municipality. The municipality then seeks FAUS funding for these capital improvement projects by submitting a grant application directly to the UMTA.

The FAUS funds are available through the UMTA for mass transit projects in other Alaska cities and towns in addition to Anchorage. We previously reported incorrectly that the City and Borough of Juneau had received some FY 86 FAUS funds; Juneau has received FAUS funds in the past but did not apply for these funds during FY 86. According to Ms. LeVine, the Fairbanks North Star Borough has not applied for FAUS funds in the past but has instead sought and obtained federal mass transit capital funding through UMTA's Section 3 discretionary funds program. Ms. LeVine suggested that Section 3 funds are less plentiful than in the past and that applications for FY 87 funds would likely be more successful through the FAUS funding route.

Representative Koponen
September 22, 1986
Page 2

We also contacted Ron Moore, Director of Mass Transit for the Fairbanks North Star Borough (FNSB), who was able to provide a historical overview of federal mass transit funding to the Borough. According to Mr. Moore, the FNSB received UMTA Section 3 discretionary funds during the early 1980s for capital improvements (i.e., the purchase of new buses and the rehabilitation of old buses). In recent years, however, the borough has sought and received UMTA Section 18 funds for operations. In FY 86, for example, the FNSB received about \$55,000 in Section 18 funds--its share of UMTA operating funds allocated to Alaska.

According to Mr. Moore, the FNSB is now completing a grant application for approximately \$40,000 - 60,000 in UMTA Section 8 FY 87 planning funds. These funds would be used to update the Borough's Transit Development Plan. An update must be prepared in order for the borough to be eligible for Section 3 or FAUS mass transit capital improvement funds. The borough will be submitting its Section 8 application to the State, which receives the federal planning funds and allocates them among approved applicants throughout the state. According to Mr. Moore, the State should know the amount of FY 87 Section 8 funds which will be available from the UMTA by the end of 1986. Mr. Moore indicated that the Fairbanks North Star Borough would likely seek FAUS and/or Section 3 capital funds in federal FY 88, provided the transit plan update is completed during FY 87.

MEMORANDUM

TO: Representative Lyman Hoffman

ATTN: Lori Nottingham

FROM: Mary Jennings *MJ*
Legislative Analyst

RE: Federal-Aid Highway Fund Distribution
Research Request 87.151

You requested that we determine: 1) the amount of federal-aid highway funds that have been appropriated to each community and election district during the past four years; 2) the criteria for transferring federal-aid highway funds among system funds; 3) the Department of Transportation and Public Facilities (DOT/PF) level of compliance with the transferability guidelines; and 4) how compliance could be improved.

Background

The "Federal-aid Highway program" is an umbrella term generally referring to all activities funded through the Federal Highway Administration (FHWA) and administered by the states' highway or transportation agencies. The term "program" is used to refer to the many components that make up the overall federal-aid highway program. Each program is separately funded. For example, within the federal-aid highway program, there is specific funding for bridge replacement and rehabilitation, primary systems, urban systems and interstates, etc.

Federal-aid highway acts have traditionally been the vehicle for providing funds, termed "authorizations," for the federal-aid highway program. It is these authorizations that spell out the amount and purpose for which federal-aid highway funds are to be expended and lead directly to the financing procedures of the program.

The authorizations contained in highway acts are the amounts of funds that the Secretary of Transportation, acting through the FHWA, can obligate on behalf of the federal government. The license to proceed with federal programs is generally called budget authority. Through what is termed "contract authority," which is another type of budget authority, sums authorized in the federal-aid highway acts are available for obligation without an appropriation action. The use of contract authority gives the states advance notice of the size of the federal-aid program.

The federal-aid highway program is a reimbursable program; the federal government reimburses states for costs they have incurred. The authorization amounts allocated to the states represent a line of credit upon which states may draw as Federal projects advance. The states generally start federal projects using their own money, i.e., they provide front-end financing for projects and receive cash for the federal share of the project's cost as the work is completed.

After deductions for administration and research, the FHWA allocates the remaining portion of the sums authorized for the various funding categories to the states. The apportionments are based on several formulas prescribed by law. For example, urban system funds are apportioned to each state according to its percentage of the nation's urban area population (places of 5,000 or more persons), interstate system apportionments are based on the relative share of the cost to complete the system, etc. Attachment A contains a list of the apportionment formulas.

Transferability of Funds.

The levels of authorization reflect Congress's relative priority among the federal-aid funding categories, and the apportionment formulas are intended to reflect the relative needs of the states for each authorization. To provide for flexibility in the use of specific sums, federal law permits transfers to be made among certain funds. Funds apportioned to the federal-aid primary system may be transferred for use on the federal-aid secondary system and vice-versa. Primary system and urban system apportionments may be transferred from one category to the other in the same manner. However, the amount transferred may not increase or decrease the original apportionment for such systems by more than 50 percent. This effectively limits the amount which can be transferred to 50 percent of the smaller of the two apportionments. The law does not provide for direct transfer from the urban system fund to the secondary system fund or vice versa and also prevents any indirect transfer between the two funds during a year. Transfers may also be made among some safety funds and a state may transfer an amount equivalent to the cost to complete open-to-traffic interstate segments from its interstate construction funds to its Interstate 4R funds.

Title 23 Section 118 paragraph (f) of the United States Codes specifically addresses Alaska's transferability of funds. The paragraph states, "Funds made available to the State of Alaska under this title [23 USCS § 101 et seq.] may be expended for construction of access and development roads on a federal-aid system that will serve resource development, recreational, residential, commercial, industrial, or other like purposes." The DOT/PF has interpreted this paragraph to mean that the State has greater flexibility in the transferability of federal-aid system monies than what is allowed under federal guidelines. According to Ron Lind, Legislative Liaison for DOT/PF, the department follows the federal guidelines for transferability, except for primary, urban, and secondary system funds. Mr. Lind stated that the department has allowed transfers between primary and secondary system funds and primary and urban system funds that have decreased the original apportionment to the primary system fund by more than 50 percent.

In order to gain an idea of the extent to which Alaska transfers primary system funds to other system funds, I requested Mr. Lind to provide federal-aid apportionments to Alaska by system fund for the last four years and a break down of how these funds were actually obligated. Mr. Lind stated that provisions of the data will require a review of individual projects. He estimated that with other workload considerations, it will take his department two weeks to provide the information. I will forward this to you upon receipt.

In order to determine ways DOT/PF could achieve a greater level of compliance with federal transferability guidelines concerning primary, secondary and urban system funds, I contacted Barry Moorhead, Alaska Division Administrator of Federal Highways. Mr. Moorhead suggested that DOT/PF should formulate a comprehensive six-year plan and follow this plan without reprioritizing projects each year. He felt that if the department adhered to a long-term plan, all types of projects, both urban and primary (i.e., rural) projects, would be funded. He felt that DOT/PF is not currently able to plan well because the legislature continuously passes resolutions that place a high priority on certain projects. Mr. Moorhead felt that DOT/PF and the legislature could work together in order to allow the department to develop a nonpolitical highway project plan that could be carried out from year to year without emphasis continuously being shifted from one project to another.

Federal-aid Distribution

Attachment B, prepared by the Office of Management and Budget (OMB) provides appropriations of State and federal funds by election district, affected community, and road. The attachment also cites the Session Law authorizing the funding for a particular project. Pages 32 through 35 of the attachment provide data for projects that could not be attributed to a

Representative Hoffman
March 1987
Page 4

particular election district--projects that were regional or statewide. It should be noted that the data do not contain legislative repeals of appropriations and/or reappropriations.

Table 1 compiles the data contained in Attachment B into election district format. The table provides the amount and percent of federal-aid monies by each election district for the years 1984-1987. The table indicates that the Anchorage Election District received the highest percentage of federal-aid monies for the fiscal years 1984, 1986 and 1987. During FY 85, Election District 17--Interior Highways--received the highest percentage. Election Districts 3, 24, 25, 26, and 27 received virtually no federal-aid monies during the period.

I hope you find this information useful. I have attached maps detailing federal-aid highway systems in Alaska. The DOT/PF is currently working on a project which will identify the number of highway miles of each type of federal highway system by census area. I will contact you when the project is completed. Please contact me if you have any questions.

APPENDIX C-1

Apportionment Formulas

Formulas for apportioning authorized sums for certain classes of Federal-aid highways are specified by statute. These are shown below.

<u>Fund</u>	<u>Factors</u>	<u>Weight</u>	<u>Statute*</u>	<u>Minimum Apportionment</u>	
Interstate System (for completion only)	Relative Federal Share of Cost to Complete the System**	1	104(b)(5)(A)	1/2 percent (including Alaska)	
Interstate Resurfacing, Restoration, Rehabilitation, and Reconstruction	Interstate System Lane Miles	55%	104(b)(5)(B)	1/2 percent	
	Vehicle Miles Traveled on Interstate System	45%			
Interstate Highway Substitution (3/4 apportioned, 1/4 discretionary allocation)	Relative Federal Share of Cost to Complete Substitute Projects	1	103(e)(4)	-----	
Primary System	<u>Formula A</u>		104(b)(1)		
	Area	2/9			
	Rural Population	2/9			
	Rural Delivery Route Mileage and Intercity Mail Route Mileage	2/9			
	Urban Population*** (1/2 percent minimum (except D.C.))	1/3			
	<u>Formula B</u>				
	Rural Population	1/2			
	Urban Population***	1/2			
	For each State, determine greater of A or B, then: Each State's apportionment equals: $A \text{ or } B \times \frac{\text{Total Primary Authorization}}{\text{Sum of all States' A or B}}$				
	Except that: the apportionment is not less than smaller of A or B				
Secondary System	Area	1/3	104(b)(2)	1/2 percent (except for D.C.)	
	Rural Population	1/3			
	Rural Delivery Route Mileage and Intercity Mail Route Mileage	1/3			
	Urban Area***	1			
Urban System	Urban Area*** Population	1	104(b)(6)	1/2 percent	
Urban Transportation Planning	Urbanized Area**** Population	1	104(f)(2)	1/2 percent	
Bridge Replacement & Rehabilitation	Relative share of total cost of deficient bridges	1	104(a)	1/4 percent (10 percent maximum)	

<u>Fund</u>	<u>Factors</u>	<u>Weight</u>	<u>Statute #</u>	<u>Minimum Apportionment</u>
Hazard Elimination	Total Population	3/4	152(e)	1/2 percent
	Public Road Mileage	1/4		
Highway Safety Programs	Total Population	3/4	402(c)	1/2 percent
	Public Road Mileage	1/4		
Rail-Highway Crossing	Area	1/12	Sec. 203(d) of the 1973 Highway Act. as amended	1/2 percent
	Rural Population	1/12		
	Rural Delivery Route Mileage and Intercity Mail Route Mileage	1/12		
	Urban Population	1/4		1/2 percent
	Number of Rail-Highway Crossings	1/2		none

Minimum Allocation

For fiscal years 1983-86, each State is guaranteed an amount so that its percentage of total apportionments in each fiscal year of Interstate, Interstate 4R, Interstate highway substitutes, primary, secondary, urban, bridge replacement and rehabilitation, hazard elimination and rail-highway crossings shall not be less than 85 percent of the percentage of estimated contributions to the Highway Trust Fund, not including the Mass Transit Account (23 U.S.C. 157).

-
- * Denotes appropriate section in Title 23, U.S.C., unless otherwise indicated.
 - ** Apportionment factors are contained in the periodic reports, "A Revised Estimate of the Cost of Completing the National System of Interstate and Defense Highways," submitted to Congress as required in 23 U.S.C. 104(b)(5)(A).
 - *** Places of 5,000 or more persons.
 - **** Usually places of 50,000 or more persons--definition contained in 23 U.S.C. 101(a).
