House Rules 2-11-92 8:00 am

HOUSE RULES COMMITTEE MEETING

FEBRUARY 11, 1992

I move that the House Rules Committee approve the solicitation and expenditure not to exceed \$13,200 from Session Expenses for the purchase of six fax machines.

M E M O R A N D U M

TO: Jim Nordlund, Legislative Assistant
House Rules Committee

FROM: Mark T. Woods, Supply Officer

SUBJECT: House Facsimile Machine Purchase

DATE: February 4, 1992

On January 29, 1992, a request for quotation was issued to acquire six plain paper laser facsimile machines for the house. Response from vendors was requested by 4:30 p.m., January 31, 1992. Five quotes were received and witnessed by Legislative Affairs employees Jan Price and myself.

The five quotes received, abstract attached, were from Financial Systems Products Corporation, Don's Business Supplies, Hitachi, Yukon Office Supply, and Pitney Bowes.

Of the five bids received, only Don's Business Supplies, Yukon Office Supply, and Pitney Bowes met all the minimum specifications.

Financial Systems was the lowest bidder at \$12,954.00 with the Canon L770, but cannot provide the security access feature.

Don's Business Supplies was the lowest responsive bidder at \$13,158.00.

Considering warranty cost and cost per copy, I recommend we accept Don's Business Supplies bid of \$13,158.00 as they meet all the specifications of the bid and are the lowest responsive bidder.

SHARP

FO-6000 G3, G2 compatible facsimile

- Laser printing on plain bond paper
- 500 sheet capacity with 2nd cassette add-on
- 30 to 100 page expandable memory
- Ultrafine resolution
- 30-page, 11" -wide automatic document feeder

The high-volume laser fax with exceptional image quality and automatic error correction.

FO-6000

G3, G2 compatible facsimile

Laser printing on plain paper

The FO-6000 prints on plain bond paper and can be marked, filed or re-transmitted without the thermal paper problems of discoloration, fading, or jamming. Using laser printing, the cost-per-copy is also substantially reduced compared to models using thermal or thermal-transfer printing.

Second cassette & legal size options

The bottom-mounted, standard cassette tray, which holds 250 letter-size sheets, can be easily interchanged with an optional legal size cassette. A second cassette, either letter or legal size, can be added to double the capacity or to provide Auto Paper Size Selection when both sheet sizes are used.

Ultrafine resolution

For copy quality that rivals the original, the FO-6000 can achieve a top resolution of 404 x 396 lines per inch. Sharp's new ultra halftone mode breaks down photos and illustrations into 64 precise levels of grey with outstanding results. An auto-contrast control is also included to maintain legibility of copies from light originals or those with dark-colored backgrounds.

9-second transmission speed

Using Sharp's special compression scheme and a top modem speed of 9,600 bps, the FO-6000 can transmit a document of average letter content in as little as 9 seconds from memory. The advanced compression schemes of Modified Read (MR) and Modified Modified Read (MMR) also minimize transmission time to non-Sharp machines.

Expandable memory with batch transmission

The standard 30-page (512KB) memory, which can be expanded to 100 pages total with an optional 1MB add-on, provides: (1) Memory Transmission for quick return of originals; (2) Broadcasting to 140 stations; (3) Substitute Reception for out-of-paper situations; (4) Confidential Reception, as well as transmission, with 10 personal mailboxes; (5) Five Timer Operations for unattended, after-hours transmission/polling; and (6) New Batch Transmission for combining several documents to the same location for later transmission on one call.

Error correction mode (ECM)

Information is automatically resent when distortions are detected, before they are printed at the receiving end—eliminating the cost and inconvenience of making another call because of a poor line connection.

Large capacity fax/voice autodialer

For quick, accurate dialing, the FO-6000 stores up to 140 numbers for fax and 40 numbers for voice calls. Up to 40 of each type can be dialed with the touch of a key, with a secondary fax number automatically called if the main line is busy. The remaining 100 fax numbers can be retrieved with 2-digit codes. Auto-redial can be set for 1 to 9 times at 1 to 5 minute intervals.

Multiple copy functions

With Multi-copy, up to 30 copies can be made with one pass of the original. Enlargement (114%) and reduction (81%) features are also available.

Automatic cover sheet with headers

The FO-6000 can automatically generate a cover sheet with each transmission. Included is the date, time, sender's and receiver's name (if set 1 and number, and total number of pages sent. One of five header messages—two of which are changeable—can also be added.

Relay broadcast & request

The FO-6000 can act as an originating or intermediate unit in a relay broadcast request, forwarding the same document to as many as 140 other machines.

Other Features

- CCITT G3, G2 compatibility
- Compact, desktop design
- 30 page automatic document feeder
- 5 group & 5 program keys
- Auto fax/phone changeover
- Batch page numbering/count check
- Department code restricted access
- Simple, turnaround & 140-station serial polling
- Talk reservation (speak & fax)
- Hold & redial keys
- On-hook dialing with monitor speaker
- Separate original & copy exit trays
- Extra-large 24 digit x 2 line LCD
- Transmit terminal imprint with on/off setting
- Remote terminal ID read-out
- Programmable transaction report
- Activity, Timer Communication, Telephone, Group, Program, Passcode, Relay Group, Confidential Reception, Department Usage & User Switch lists
- Verification stamp

Specifications

Applicable line Type	Public switched telephone network Desk top
Compression scheme	MII, MR, MMR, and Sharp's special
Memory size	512KB (30 pages) w/optional 1MB add-on (for 100 pages total)
Transmission time	9 seconds*
Transmission speed	9,600/7,200/4,800/2,400 bps with automatic fall back
Resolution	Horizontal: 404 pels/inch (15.9 pels/mm) Vertical: 396 lines/inch (15.5 lines/mm) (ULTRAFINE) Horizontal: 203 pels/inch (8 pels/mm) Vertical: 392 lines/inch (15.4 lines/mm) (SUPERFINE) 196 lines/inch (7.7 lines/mm) (FINE) 98 lines/inch (3.85 lines/mm) (STANDARD)
Max. transmitting document width	11.0" (280 mm)
Max. scanning width	10.1" (256 mm)
Max. recording width	8.2" (208 mm)
Paper size	8.5" (216 mm) (W) x 11" (280 mm) (L) 8.5" (216 mm) (W) x 14" (356 mm) (L) optional
Paper capacity	250 sheets 500 sheets w/opt. 2nd cassette
Operation temperature	50°F - 86°F (10°C - 35°C)
Operation humidity	30 - 80% RH (without condensation)
Dimensions	14.02" (W) x 15.28" (D) x 13.43" (H) (136 mm (W) x 388 mm (D) x 341 mm (H)) (Main Body only)
Weight	Approx. 44.0 lbs. (20 kg)
Power requirement	120V AC, 60Hz
Power consumption	550W (max.), 35W (standby)

*Based on CCITT test chart #1 at standard resolution in Sharp special mode from memory. Usage and specifications subject to change without notice.
