STATE OF ALASKA

AUDIT DIVISION
P.O. BOX W
JUNEAU, ALASKA 99811-3300

THE LEGISLATURE

BUDGET AND AUDIT COMMITTEE

MEMORANDUM

TO: Representative Max Gruenberg, Chair
House Special Committee on the *Exxon Valdez*
Oil Spill Claims Settlement

Representative Kay Brown, Chair
House DEC Budget Subcommittee

FROM: Randy S. Welker *Randy*
Legislative Auditor

DATE: April 18, 1991

SUBJECT: Information Regarding Expenditures Covered by the Memorandum of Agreement between the State, the Federal Government, and Exxon.

This memorandum has been prepared in response to your request regarding information on state expenditures involved in responding to the *Exxon Valdez* oil spill. In order to respond to your questions, we reviewed the Memorandum of Agreement (MOA) between Exxon and the State and federal governments.

We were able to obtain expenditure information compiled by Peterson and Associates that appears to have been the basis for the \$72 million cost recovery amount included in the MOA. Due primarily to time constraints, we are not able to provide you with total assurance regarding the reasonableness of the MOA's cost recovery provisions.

The expenditure information used in the development of the MOA's \$72 million ceiling is comprehensive. From our cursory review of the Peterson and Associates information, and discussions with a Peterson and Associates representative and agency staff of the significantly involved departments, we believe that the \$72 million amount in the MOA appears to reasonably represent the oil spill response, assessment, and litigation costs incurred by the State through December 31, 1990.

Using the Peterson and Associates information, compiled from the State's accounting system, we have developed the following information. We also offer some observations and concerns that we have regarding cost recovery under the terms of the MOA.

COST REIMBURSEMENT

Section V. B of the MOA allows the State to receive up to \$72 million for "reimbursement of allowed expenses," incurred through December 31, 1990. The section further allows the State to receive reimbursement of "response and cleanup costs incurred after December 31, 1990."

From the detailed listing of expenditures prepared by Peterson and Associates, we developed the following table summarizing expenditures by agency through December 31, 1990.

DEPARTMENT	Estimated Recorded Expenditures (thousands)	Reimbursements from Exxon or CERCLA (thousands)	Remaining Expenditures or Costs (thousands)
Administration	3,591.0	488.0	3,103.0
Commerce and Economic Development	627.0	499.0	128.0
Community and Regional Affairs	1,429.0	40.0	1,389.0
Environmental Conservation	38,652.0	24,621.0	14,031.0
Fish and Game	23,467.0	6,440.0	17,027.0
Governor's Office	1,345.0	730.0	615.0
Health and Social Services	827.0	7.0	820.0
Labor	895.0	273.0	622.0
Law	17,342.0	0.0	17,342.0
Military and Veterans' Affairs	949.0	653.0	296.0
Natural Resources	2,989.0	1,341.0	1,648.0
Public Safety	334.0	18.0	316.0
Transportation and Public Facilities	1,131.0	1,013.0	118.0
University of Alaska	439.0	53.0	386.0
TOTALS	94,017.0	36,176.0	57,841.0
NON-CASH EXPENDITURE ADDED IN MOA TOTALS:			
Overhead (4,600.0)/Financing (3,900.0) Estimates			8,500.0
Damage Assessment Obligations (costs incurred but not paid by 12/31/90)			3,100.0
Litigation Obligations (costs incurred but not paid by 12/31/90)			2,500.0
Total Expenditures used to set MOA Cost Recovery Cap			71,941.0

The table on the following pages highlights the major, but not all, components of each department's costs and includes our observations.

DEPARTMENT (Total Expended)/ COMPONENT DESCRIPTION	COMPONENT AMOUNT (thousands)	COMMENTS
ADMINISTRATION (3,591.0): Valdez Oil Spill Commission Telecommunications	952.0 2,200.0	The Telecommunication costs may be understated. We reviewed information as of 8/15/90 that showed expenditures of 3,300.0 primarily for two projects: Prince William Sound microwave system (2,091.0) and a non-microwave system for the South Kenai/Kodiak link (1,206.0).
COMMERCE AND ECONOMIC DEVELOPMENT (627.0): Alaska Seafood Marketing Institute (ASMI) Weigh Stations	475.0 130.0	ASMI received 800.0 directly from Exxon. Actual expenditures were somewhat greater than reflected here, however it is immaterial as any costs are paid from funds already received, with a net zero effect on nonreimbursed costs.
COMMUNITY AND REGIONAL AFFAIRS (1,429.0): Community Assistance Grants	1,173.0	Grants were awarded on a competitive/needs based evaluation. Eighteen grants were awarded ranging from 2.3 to Port Lions for equipment repair to 684.0 to Kodiak for a Social/Economic Study.
ENVIRONMENTAL CONSERVATION (38,652.0): Personal Services Travel Contractual Equipment	14,000.0 2,218.0 20,000.0 1,000.0	The oil spill drastically impacted DEC. Personal services included significant overtime, project new hires, and back-fills for employees assigned to the spill. We are more confident in the accounting section at DEC than most of the impacted departments. However, we will verify that further with a detailed financial review for FY 90.
FISH AND GAME (23,476.0): Personal Services Travel Contractual	10,350.0 1,000.0 8,455.0	The majority of the department's work dealt with impact assessment studies on a wide variety of fish and wildlife species. The department fiscal staff believes the total recorded expenditures adequately cover costs incurred.
GOVERNOR'S OFFICE (1,345.0): Oil Spill Coordination Office	995.0	
HEALTH AND SOCIAL SERVICES (827.0): Substance Abuse Grants Mental Health and DD Grants	522.0 231.0	
Labor (895.0): OSHA/Inspections/Job Service Training Spill Workers in Safety Compliance	325.0 174.0	
LAW (17,342.0): Legal Expenses Experts and Consultants	11,400.0 4,682.0	According to the department, the total amount recorded plus the 2,500.0 litigation obligation will cover costs through 12/31/90. It is estimated an additional 4,000.0 will be needed for 1991 costs.
Continued on Next Page.		

(Continued) DEPARTMENT (Total Expended)/ COMPONENT DESCRIPTION	COMPONENT AMOUNT (thousands)	COMMENTS
MILITARY AND VETERANS' AFFAIRS (949.0):		Significant initial response effort from the Division of Emergency Services.
NATURAL RESOURCES (2,989.0): Personal Services Equipment	2,000.0 600.0	Most personal services costs were for temporary project hires for oil spill response. Fiscal staff is confident total covers costs incurred.
PUBLIC SAFETY (334.0): Increased Enforcement Two Enforcement Vessels	100.0 142.0	Personal services costs for overtime/sea pay for troopers and Fish and Wildlife vessel crew for increased enforcement. Little, if any, regular compensation for permanent employees is included.
TRANSPORTATION AND PUBLIC FACILITIES (1,131.0): MV Aurora MV Bartlett	488.0 46.0	MV Aurora provided floating lodging for oil spill workers.

Almost half of the State expenditures were made with 470 funds

Of the \$94 million in expenditures, it has been estimated that more than \$46.7 million has been spent out of the Oil and Hazardous Substance Response Fund (OHSRF), also known as "470 Funds." According to a draft of an internal audit report prepared by the Department of Environmental Conservation, the expenditures from the fund, broken down by agency, are:

EXPENDITURES BY DEPARTMENT FROM THE OIL AND HAZARDOUS SUBSTANCE RESPONSE FUND	Estimated Recorded Expenditures (thousands)
Administration	2,281.0
Environmental Conservation	32,889.0
Fish and Game	7,095.0
Governor's Office	275.0
Labor	272.0
Law	92.0
Military and Veterans' Affairs	60.0
Natural Resources	1,529.0
Transportation and Public Facilities	786.0
University of Alaska	59.0
Other	1,400.0
Total	46,738.0

According to the information compiled by Peterson and Associates, the Department of Fish and Game has received \$5.7 million in reimbursements from the Federal CERCLA process. As of December 31, 1990, Exxon had reimbursed \$30 million to the State's Oil and Hazardous Substance Response Fund (OHSRF). Given these reimbursements, total "out-of-pocket expenditures," broken down by "funding source," are as follows.

Expenditures by "Funding Source"	Expenditures (thousands)
General Fund	41,100.0
CERCLA Reimbursement to General Fund	5,700.0
EXXON Reimbursement to the Oil and Hazardous Substance Response Fund	30,000.0
EXXON Reimbursement to Alaska Seafood Marketing Institute	500.0
Unreimbursed Oil and Hazardous Substance Response Fund Expenditures	16,700.0
Total "Out-of-Pocket" Expenditures by State	94,000.0

OBSERVATIONS AND QUESTIONS

1. What requirements, if any, must the State meet to receive recovery? - It is our understanding that the cost recovery totals listed in the MOA are to settle all expenditure claims still pending before Exxon, in addition to reimbursing the State for expenditures not yet submitted. According to a January 4, 1991 summary, \$49.7 million in state expenditures had been submitted to Exxon. Of this amount Exxon had paid just over \$30 million, was still considering \$4.4 million, and had rejected \$14.8 million in submitted claims. As suggested by the summary of expenditures submitted to Exxon already, a significant part of the \$72 million recovery amount contemplated in the MOA has previously been rejected for reimbursement. Does the cost recovery amount allowed for in the MOA supersede earlier decisions by Exxon officials not to reimburse the State for some of the costs claimed? Does the use of the phrase "allowed expenses" in the MOA imply that the State's expenditures must meet some specific criteria or requirement prior to being eligible for reimbursement?

We have been informally advised by Legal Services Director Tam Cook that the agreement is silent about any specific criteria for "allowed" expenditures. She commented that this possibly could be an issue subject to further discussion and negotiation between the State and Exxon. However, Ms. Cook also reported that Attorney General Cole testified before the Committee that the reimbursement would be paid without further audit or scrutiny by Exxon. We suggest that the Committee get a clear understanding of any further review and approvals to which these expenditures may be subjected.

2. Ownership of assets and other personal property - From the outset of the cost reimbursement process, Exxon had told the State that any durable goods and equipment purchased by the State and reimbursed by Exxon belonged to the company after the oil spill activity was finished. The summary of expenditures that make up the MOA's \$72 million recovery cap, lists over \$4 million in equipment bought by the State. Additionally, more than \$11 million was paid by Exxon directly to vendors. This amount may also include payment for equipment used by the State.

Is Exxon going to continue to insist on the return of the numerous computers, filing cabinets, boats, and telecommunications equipment paid for by the company? If so, a significant effort will be required to inventory, centralize, and value this property, which may require future appropriations from the legislature. It may be in the State's best interest to compensate Exxon for the current diminished value of the equipment.

3. Audit Access to Restoration Funding - In a March 18, 1991 overview memorandum, the Division of Legal Services raised the issue of audit access to the expenditures of the trustees. The memorandum rhetorically asks who, if anyone, will perform audits of the trustees' expenditures? We concur that audit access should be clarified. Due to the unique relationship between the state and federal governments in administering these funds, some provision should be made that clearly gives the Legislative Auditor access, on behalf of the State, to expenditures of the trustees.

In summary, we believe that the \$72 million amount appears reasonable. Additionally, the overhead and financing amount of \$8.5 million is not based on identified expenditures, but on estimates. Therefore, we believe there may be some "cushion" in this number to cover costs not identified as of December 31, 1990.

We hope this memorandum provides some insight into the make-up of the \$72 million ceiling in the MOA. If you need further clarification or detail please contact me at 465-3830.
