RE: Extension of Lapse Date for Division of Energy Operating Funds

I understand there was some confusion regarding the Department's intended use of requested reappropriation of Division of Energy transition funding. Please allow me this opportunity to revisit the issue and present clearly our position on reappropriation request.

1. The Department strongly supports an extension of the lapse date to June 30, 1995 for the unexpended and unobligated balance of the appropriation made in sec. 6, ch. 19, SLA 1993, page 4, line 22.
2. Reappropriated funds will be directed to remaining transition costs related the transfer of the Alaska Energy Authority to the department. These costs would include resolution of outstanding personnel matters as well as remaining logistical transition obligations.
3. The remainder of the reappropriation, clearly the bulk of the funds, will be committed to fulfilling our duties under AS 42.45 and AS 44.47.050(19) and (20) as **intended in the originating statute**. I would expect our emphasis will be directed to the following programs in an effort to reduce demands on the Power Cost Equalization Fund:

**Electrical Systems Improvements Program  
Alternative & Applied Energy Technical Development  
Rural Utilities Regionalization Program**

Thank you for this opportunity to clarify our position. I appreciate you support.

Alaska State Senate  
State Capitol Building  
Room 125  
Juneau, Alaska 99801-1182

May 5, 1994

Dear Senator Jacko:

I am requesting a language change for the \$90,000 Bristol Bay Campus, UAF, building addition appropriation to meet the changing needs brought about by the budget crises. The roappropriation language needs to include the Campus' ability to take action in the event a building becomes available for purchase, which may, at least partially, satisfy the critical need for academic and vocational space. Therefore, the language of "appraisal, purchase and remodeling" should be added to read: Bristol Bay Campus Building Addition/Appraisal/Purchase/Remodel.

Thank you for your assistance.

Sincerely,

A handwritten signature in dark ink, appearing to read "Margaret K. Wood", with a long horizontal flourish extending to the right.

30 \* Sec. 65. The unexpended and unobligated balance of the appropriation made in sec. 152,  
31 ch. 5, FSSLA 1992, page 33, line 15 (regional boarding school feasibility study - \$200,000)

1 is reappropriated to the Department of Education for payment as a grant under AS 37.05.316  
 2 to the Galena School District for planning and analysis for a regional boarding school in  
 3 Galena.

4 \* Sec. 66. The unexpended and unobligated balance of the appropriation made in sec. 152,  
 5 ch. 5, FSSLA 1992, page 43, line 17, that is allocated on page 45, line 4 (Fireweed Lane,  
 6 Seward Highway to Spenard safety upgrades - \$1,584,000) is repealed.

7 \* Sec. 67. (a) Legislative Findings and Purpose. The legislature finds that

8 (1) as a result of the judgment entered by the United States District Court in  
 9 the criminal case United States of America v. Exxon Shipping Company and Exxon  
 10 Corporation, No. A90-015 CR, the state received \$50,000,000 in restitution "to be used by the  
 11 State of Alaska . . . exclusively for restoration projects, within the State of Alaska, relating  
 12 to the 'Exxon Valdez' oil spill";

13 (2) the judgment defines restoration as including "restoration, replacement, and  
 14 enhancement of affected resources; acquisition of equivalent resources and services, and long-  
 15 term environmental monitoring and research programs directed to the prevention, containment,  
 16 cleanup, and amelioration of oil spills";

17 (3) the money received by the state in restitution is held in the Exxon Valdez  
 18 oil spill restoration fund, established by the Department of Revenue, to implement the form  
 19 of the judgment;

20 (4) the appropriation in (b) of this section is made in order to achieve the  
 21 purposes in the court's restitution order.

22 (b) The sum of \$550,000 of interest accrued during the fiscal year that ends June 30,  
 23 1995, on the restitution payment described in (a) of this section is appropriated from the  
 24 Exxon Valdez oil spill restoration fund described in (a) of this section to the Department of  
 25 Transportation and Public Facilities for the maintenance and repair of the oil spill response  
 26 equipment storage facilities and docks at Tatitlik and Chenega.

## Copper Valley electrical load forecast

In millions of kilowatt hours

RON ENGSTROM / Anchorage Daily News

# Intertie not only option, study finds

By PETER S. GOODMAN  
Daily News reporter

Copper Valley Electric Association wants to use \$46 million of state money to build a power line that taps into the energy supply of the Anchorage Bowl.

But a state study released in draft form last week suggests there may be cheaper ways for Copper Valley to get added power. It all depends on the demand for power at the Petro Star Valdez refinery, Copper Valley's largest customer.

Last spring, the legislature gave Copper Valley a \$35 million no-interest

loan for the line and authorized the sale of up to \$20 million in state bonds for the rest. But lawmakers required a study of the project, including costs and possible alternatives.

In addition to the power line, or intertie, the feasibility study looks at two hydroelectric projects, a coal-fired generating plant, and the possibility of adding new diesel generators.

According to the study draft, a proposed \$32 million hydroelectric project at Allison Lake, near V.I.

Continued from Page C-1

Valdez, would cost slightly less than the intertie over the long haul, unless Petro Star expands dramatically.

Very dramatically: Petro Star's thirst for electricity would have to more than triple for the intertie to become cheaper than Allison Lake, the study says.

Petro Star officials have been vague and sometimes contradictory about their plans.

Walt Schlotfeldt, Petro Star's president, said that the company had relatively firm plans to expand during the next two years and would need about 40 percent more electricity when it did. Beyond that, Schlotfeldt said, he wasn't sure what the company would do, though he expects continued growth.

That's a much less dramatic picture than the one painted by Petro Star engineer Randy Maag. In a Nov. 2 letter to the consulting firm that is producing the study — R.W. Beck and Co. of Seattle — Maag said that Petro Star's needs would double within three years and would swell to more than three times present levels within a decade.

Maag later told the Daily News that he was unsure of the accuracy of his numbers. The letter was "only something for the study," he said.

Nonetheless, his projections were included as part of the study draft. Factor in the highest of Maag's numbers and Copper Valley will need to produce at least twice as much power in the

year 2013 as it does now.

Such details matter because the intertie looks like a better deal the more power Copper Valley sells.

The utility now gets its power from a handful of aging diesel generators and a hydroelectric plant at Solomon Gulch, near Valdez. Utility officials want to retire the diesels, which are increasingly in need of repair, and rely on the intertie instead. The line would cost a lot to build, but the energy would be cheaper than diesel-generated power.

Allison Lake wouldn't put out enough power to retire the diesels, regardless of what happens. So if Petro Star really needs all the electricity that Maag suggests, and the intertie isn't built to provide it, a lot of the added power would have to be generated by diesel. That would make the Allison Lake option more expensive than the intertie.

Still, the study draft shows that even a doubling of Petro Star's power needs wouldn't be enough to make the intertie the cheaper of the pair. Only the boldest of Maag's projections — that Petro Star's load will more than triple — tips the scales.

Dick Emerman, who is overseeing the study for the state, said that a more detailed look at Petro Star's needs is in the works. He said he has to spend up to \$10,000 on an independent study of Petro Star's prospects for expansion. The results will be attached to the final version.

Clayton Hurless, Copper Valley's general manager,

disputes the notion that the Petro Star projections need a closer look. "I'm convinced those numbers are accurate," he said. "They've been very straightforward and very honest."

Furthermore, said Hurless, the fate of the intertie shouldn't hinge on Petro Star's needs. He said he counts on selling lots of power to the HAARP project, which the Air Force plans to build near Glennallen to study the upper atmosphere. Hurless figures he will sell the Air Force enough power to make the intertie necessary, regardless of what else happens.

John Heckscher, the Air Force physicist who is overseeing the HAARP project, said that's pretty speculative. The Air Force has yet to decide whether to buy power from Copper Valley or generate its own electricity with diesel. And the Air Force is only thinking about small amounts of current for now — enough to turn on the lights, run computers, and so on.

That's because they have no money to think about more, said Heckscher. Congress has given the project about \$50 million. That's enough to build a demonstration transmitter to beam signals into the upper atmosphere. But it's a long way from the \$175 million the project needs to build a large antenna field as envisioned. Heckscher says that's what would have to happen before the project needed the serious quantities of power Hurless has in mind.

R.W. Beck doesn't think HAARP can be counted on to buy enough power to run a light bulb: The draft of the feasibility study makes no mention of the project.

All this comes as good news to the many residents of the Matanuska River Valley who oppose the intertie, fearing it would mar the area's scenic beauty and open up the land to more use. Many have called the project a boondoggle. They now point to the study draft as confirmation.

"Any scenarios that begin to make the intertie look cost-effective are based on pie-in-the-sky assumptions," said Chris Rose, an attorney who lives in Sutton. He's co-chair of Alaska Consumers for Responsible Energy Development, a group formed to fight the line. "To choose to build the intertie after seeing this feasibility study, the state would be wasting... money in a time of fiscal crisis."

A 30-day public comment period follows the release of the draft. The state has scheduled a series of hearings for early February in Matanuska Valley communities and in Glennallen and Valdez. Testimony gathered will be attached to the final version of the study.

That final version will then be sent to the commissioner of Community and Regional Affairs, Edgar Blatchford. He must declare it satisfactory for Copper Valley to get the money.

Blatchford said Tuesday he had not yet had a chance to look at the draft.

Representative Ron Larson, Co-chair  
House Finance Committee

FROM: Representative Kay Brown

DATE: April 10, 1994 

SUBJECT: \$35 million Intertie

---

Attached you will find information replying to the most common arguments advanced in support of the Sutton-G'annallen Intertie project.

In my opinion, the proposed \$35 million, 50-year no-interest loan lacks a positive economic rationale. At a time when we are considering dramatic adjustments to the operating budget to respond to a declining revenue stream, we must question the wisdom of this type of expenditure.

## CVFA Sutton-Glennallen Intertie

- "The intertie will lower and stabilize electric utility rates."

If the highly optimistic demand projections do not materialize, the rates could very well be higher with the intertie than without it.

• "The intertie is needed because CVFA has the highest rates in Alaska due to their inclusion in the Four Dam Pool."

The Four Dam Pool is an example of state power generation projects. Why should another state project, not subject to market tests, be any more effective?

- "The intertie is the least cost option for more scenarios."

The intertie appears competitive only if you accept unrealistic load growth forecasts, low construction and maintenance costs and unreasonably high estimates of diesel costs.

- "We need to see the intertie as an investment for the future."

Without very high demand growth (such as that during the Exxon Valdez clean up), including a quadrupling of Petro Star demand, the intertie fails the "least cost" test as a sound investment.

• "Economic benefits like power sales revenues to railbelt utilities and reduced financing costs to CVFA should be considered."

These are not new economic benefits to Alaska citizens, but simply transfer payments from one group of Alaskans to another. For this reason, Beck did not consider them in the study.

- "Energy costs will double by the year 2000 if this intertie is not built."

According to CVEA's own projections, utility rates are likely to decline between now and the year 2000 (with or without the intertie). Over the longer term, rates will likely increase less than the inflation rate.

- "The R.W. Beck study does not accurately project increase in demand for each customer class."

In addition to Petro Star, the Beck study projected growth for seafood processors, marine services and residential and small commercial consumers. In fact, the projections were based in part on growth rates experienced during the Exxon Valdez clean up.

- "The Beck study predicts load growth with Petro Star as lower even than CVEA's original forecast."

The report prepared for the Division of Energy estimates Petro Star load growth as being in Beck's "low" to "medium low" range forecast. The least cost alternatives in this load range are new efficient diesel generators and enhancements to the Soloman Gulch hydro project (like Allison Lake).

- "The HAARP project is not included in the R.W. Beck study."

Beck found the HAARP project too speculative to include in power demand projections. The study questioned the power requirements of the project and whether HAARP could even be integrated into CVEA's system.

- "The intertie will enhance economic development potential."

Build it and they will come? If the goal is to lower rates to CVEA customers (freeing up money to circulate in the local economy), the \$35 million

Rep. Kay Brown

50 year no-interest loan could more effectively be invested in a power cost fund to subsidize utility consumers. A conservative return on investment would return over a million dollars a year to the utility *after* the annual loan repayment.

Representative Ron Larson, Co-Chair  
House Finance Committee  
Alaska State Legislature

Dear Representative Larson:

Introduction of HB441 has caused considerable concern at the University of Alaska. We have been reviewing spending patterns to ascertain what we would have to do to absorb such a reduction at this point in the fiscal year. It is difficult to even know how to begin to reduce our spending patterns by over \$1,400.0 in the time remaining to us before June 30th. I felt it important that I outline some of the problems we face.

1). We are well into our spring semester at all campuses. Of our general fund budget of \$171,728.8, approximately 32% is budgeted for direct instruction expenses (\$55,516.4). All tuition revenues are already budgeted in instruction and tuition revenues are running at or below projections for FY94. The semester will be completed in May of 1994, with summer school beginning in June. Summer school is budgeted on a self-support basis, so no reductions are possible in the summer school program to save general fund dollars.

2). The University's physical plant budget consists of \$27,565.2 general funds or 16% of the total university general fund budget. While some reductions are possible in the physical plant, the consequences of such reductions would be to eliminate the spring maintenance program. The Board of Regents has placed a very high

priority on maintaining and building up the annual operating funds for building maintenance. The University of Alaska presently has an accrued backlog of maintenance deferred from prior years of over \$150 million. Our existing operating funds are insufficient to adequately maintain all facilities on annual basis to prevent the additional deferral of maintenance. Eliminating the spring maintenance program will further exacerbate this problem.

3). \$12,905.3 general funds is budgeted for university research. These funds leverage federal research dollars at a ratio of approximately 1 general fund dollar to 5 federal/private dollars. The majority of these funds are committed as matching dollars to the proposals made to federal/private entities. Reduction of dollars required for match of grant proposals would be a breach of contract with the granting organizations, jeopardize university credibility in consideration of future grant proposals, and result in a reduction of total dollars much more significant than the proposed .083%.

4). The University budgets \$1,654.5 in general funds to cover debt service on existing obligations, primarily for student housing at the Fairbanks campus. Rental receipts from student housing are insufficient to fully cover operating and maintenance expenses of the housing as well as debt service. These funds cannot be reduced.

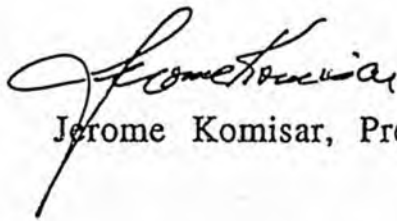

5). \$9,431.1 general funds is budgeted for library services. These funds are for the operations and maintenance of library systems throughout the state. Maintenance of an adequate library to support university activities is required under the Northwest Accreditation standards. The University has already been put on notice that the library at UAA, Anchorage campus is insufficient. Periodical and book prices have greatly exceeded normal inflation for the past several years eroding the materials acquisitions budget for all libraries. Further reduction in this area could potentially jeopardize the University's continued accreditation.

6). The remaining general fund budget of \$64,656.3 is used for a variety of purposes including academic support for instruction, student services (including the financial aid, registration and student records administration, counseling services, and admissions), public service (which consists primarily of the cooperative extension service, small business development programs and other community service programs produced in cooperation with community organizations and local governments), and institutional support of the

university. Assessing the proposed .083% reduction against these areas of the budget results in over a 5% reduction for the remaining five months. Because the university budget in these areas is primarily personal services, we would have to immediately terminate all temporary (primarily student) employees, and issue layoff notices to several hundred other university staff. We do not feel that this can be accomplished and still maintain necessary university functions.

I certainly appreciate the difficult decisions facing the Alaska State Legislature in putting together a financial plan for FY94 and FY95. The magnitude of the problems must seem overwhelming at times. However, I ask you to give serious consideration to exempting the University of Alaska from a reduction of current year appropriations.

Sincerely,

Jerome Komisar, President

REDUCTION IN FUNDING FOR MENTAL HEALTH/SOCIAL SERVICES WILL DRAMATICALLY IMPACT QUALITY OF LIFE FOR THE SEWARD COMMUNITY. SPEAKING AS AN INMATE SUBSTANCE ABUSE COUNSELOR - LEVEL II, NATIONAL CERTIFIED ADDICTIONS COUNSELOR - LEVEL II. SUBSTANCE ABUSE IS DIRECTLY RELATED TO VIOLENCE & INCARCERATION. SERVICES FOR SUBSTANCE ABUSE ARE A VITAL LINK TO IMPROVING QUALITY OF LIFE INSIDE PRISON, INCREASING EDUCATION REGARDING SUBSTANCE ABUSE AND SUPPORTING ABSTINENCE FROM DRUGS OF ABUSE AND HELPING REDUCE RECIDIVISM. THIS BILL MAY JEOPARDIZE THE SAFETY & WELL-BEING OF INMATES AND STAFF INSIDE PRISON IF IMPLEMENTED. AT THE VERY LEAST, FUNDING SHOULD REMAIN THE SAME AND STEPS TAKEN TO INCREASE MONIES SPENT FOR SUBSTANCE ABUSE TREATMENT. IT is interesting THAT AT THE SAME TIME  
 I received a Bridges Campaign Brochure, I understand  
 THAT the committee is looking AT CUTTING MH/SUBSTANCE  
 Abuse Funds and making IT RETROACTIVE. Child Abuse has  
 increased 12% per year, 37,000 Alaskans are afflicted  
 by Alcohol or Drug Abuse, and 1,300 children a year  
 are now in foster or residential care at any given time.

OF THE population I see as clients, (around  
 42 per month) 80% are in prison due to alcohol or drug related  
 charges, 80% come from Alcoholic or drug related abuse, and 60% have  
 been physically and mentally abused.  
 IT is expensive to incarcerate people - RELEASE,

I understand that our state is experiencing a tremendous fiscal loss; however, reducing human services to individuals in need is not the answer.

Our community is realizing a continuous increase in direct service delivery. Our agencies require additional funds to meet the existing problems. already.

Alaska leads the way in a number of areas - unfortunately, alcohol/drug <sup>suicide</sup> abuse, <sup>and</sup> sexual assault ~~and~~ <sup>some</sup> are ~~two~~ of those areas.

Programs less vital to human resources could be tapped with less ~~cost~~ devastation to our state's peoples.
