SUBJECT: Sponsor Statement - Senate Bill 321

Senate Bill 321 relates to the taking of fingerprints and the uniform reporting of homicides to the Federal Bureau of Investigations and the Violent Crimes Apprehension Program (VICAP).

Today, fingerprints are used to identify and apprehend suspected criminals. However, in some instances criminals who either post bail immediately or are summoned to appear in court may never be officially fingerprinted. SB 321 specifies when and how fingerprints are taken in order to enhance the criminal records in our state.

The Violent Crimes Apprehension Programs (VICAP) was created in 1985 at the request of law enforcement agencies attempting to share information across the country. VICAP is a national computer data information center located in the Behavioral Sciences Unit at the Federal Bureau of Investigations in Quantico, VA. The program deals with solved or unsolved homicides, missing persons who are suspected homicide victims and unidentified bodies suspected to be victims of foul play. VICAP provides the tool which enables law enforcement agencies nationwide to close-in on and arrest the 4000 people who get away with murder each year -- literally. To date there have been 457 known serial murderers across the United States.

This legislation will increase the efficiency and effectiveness of the criminal justice system. I encourage all members of the committee to give Senate Bill 321 your favorable consideration.

MEMORANDUM

SUBJECT: Sectional Summary of SB 321. (Work Order No. 8-LS1649K)

TO: Senator Rick Halford
Attn: Kelly

FROM: Jerry Luckhaupt *JEL*
Legislative Counsel

You have requested a sectional summary of the above-described bill. As a preliminary matter, please note that a sectional summary of a bill should not be considered an authoritative interpretation of the bill - the bill itself is the best statement of its contents.

Section 1 of the bill amends AS 12.55 to add a new section that provides that whenever a person is arrested for an offense, and is not issued a citation under AS 12.25.180 and released, the person shall be fingerprinted at a correctional facility and the fingerprints shall be forwarded within five days to the Department of Public Safety.

Section 2 of the bill repeals and reenacts AS 12.55.147 and requires that whenever a defendant is convicted of an offense the court shall order the defendant's fingerprints to be taken if they have not already been taken. The fingerprints shall be forwarded by the agency or facility taking the fingerprints within five days to the Department of Public Safety.

Section 3 of the bill amends AS 12.80 by adding a new section to require that whenever a person appears before a court for an initial appearance or arraignment for an offense the court shall order the person's fingerprints to be taken if they have not already been taken. The fingerprints shall be forwarded within five days to the Department of Public Safety.

Section 4 of the bill amends AS 33.30.011 by adding a new paragraph (7) that requires the commissioner of public safety to provide for the fingerprinting of all persons charged with, or convicted of an offense, who are received at an correctional

facility. The fingerprints shall be forwarded to the Department of Public Safety within five days.

Section 5 of the bill requires the Department of Public Safety to develop standard forms and procedures for the taking of fingerprints; also requires the department to make a reasonable effort to confirm the identity of a person whose fingerprints are received by the department and if the person has criminal record information under a different name the department shall promptly notify the appropriate agency or officer.

Section 6 of the bill requires all law enforcement agencies to report homicides and suspected homicides to the Department of Public Safety within 25 days of the discovery of the homicide; the report shall contain information considered relevant by the Commissioner of Public Safety and shall be on a form similar to and consistent with the forms used by the Federal Bureau of Investigation's Violent Crimes Apprehension Program; requires the department to compile the information received and compare that information to other homicides to discover similarities and in crimes and suspects - if similarities are found the department shall notify the reporting agencies; requires law enforcement agencies that terminate the investigation of a homicide to notify the department of the termination and the reason for the termination; requires the department to participate in the Federal Bureau of Investigation's Violent Crimes Apprehension Program and transmit the information received under this section to the FBI at least on a quarterly basis.

Section 7 of the bill provides a transitional section to cover the initial reporting of homicides and suspected homicides under AS 44.41.150.

VICAP

Crime Analysis Report

HOW TO COMPLETE THE VICAP CRIME ANALYSIS REPORT FORM

VICAP SUBMISSION CRITERIA

The VICAP Crime Analysis Report form has been designed to collect information regarding the following types of crimes whether or not the offender has been arrested or identified:

- (1) Solved or unsolved homicides or attempts, especially those that involve an abduction; are apparently random, motiveless, or sexually oriented; or are known or suspected to be part of a series.
- (2) Missing person, where the circumstances indicate a strong possibility of foul play and the victim is still missing.
- (3) Unidentified dead bodies, where the manner of death is known or suspected to be homicide.

Cases where the offender has been arrested or identified should be submitted so unsolved cases in the VICAP system can be linked to known offenders.

INSTRUCTIONS

- Use black ink or pencil. Legibly print all written responses.
- Unless stated otherwise, check as many boxes as apply for each item.
- If in doubt about how to respond to a given item, be guided by your experience and good judgment. Proof beyond a reasonable doubt is not required, but do not guess either.
- If there are details of the case that you feel are important but that do not fit well into the items provided in the VICAP Crime Analysis Report, describe them in the narrative.
- If you wish to supplement or correct information previously reported to VICAP, submit a new VICAP Crime Analysis Report but complete only Items 1 through 18, 27 and 36 plus the Item(s) you wish to supplement or correct. You need not resubmit unchanged items.
- For advice or assistance regarding this report or its completion, call VICAP at (703) 640-6131.
- If you are submitting this VICAP Crime Analysis Report in conjunction with a request for a criminal personality profile evaluation, you *must* contact the **CRIMINAL PROFILE COORDINATOR** assigned to the FBI Field Division in your area. The **CRIMINAL PROFILE COORDINATOR** is charged with the responsibility of assisting you with your request for a criminal personality profile and will advise you of additional materials that must be submitted in order to evaluate your case properly. He/she will review the materials and will submit the entire profile package to the National Center for the Analysis of Violent Crime on your behalf. *Do not submit Criminal Personality Profiling case materials directly to VICAP.* Only the VICAP Crime Analysis Report should be submitted directly to VICAP.
- Multiple victims & multiple offenders

If your incident has **MULTIPLE VICTIMS**, you must complete a separate VICAP Crime Analysis Report form for each victim. Offender information need not be duplicated.

If your incident has **MULTIPLE OFFENDERS**, submit only one complete VICAP Crime Analysis Report per victim; xerox and attach additional offender page(s) (Items 55 through 84) to each Report as needed.

Examples:

- 1) For two (2) victims and one (1) offender, you must complete two (2) VICAP Crime Analysis Report forms (one for each victim). Do not duplicate the Offender information (Items 55 through 84) in the second Report.
- 2) For two (2) victims and two (2) offenders, you must complete two (2) VICAP Crime Analysis Report forms. Victim #1 and offender #1 would go on the first Report form and victim #2 and offender #2 would go on the second Report form.
- 3) For one (1) victim and two (2) offenders, you must complete one (1) VICAP Crime Analysis Report form. The victim and offender #1 would be reported in the body of the VICAP Crime Analysis Report form, and offender #2 would be reported by copying an additional offender page (Items 55 through 84), completing it, and attaching it to the VICAP Crime Analysis Report.

- Before submitting the VICAP Crime Analysis Report, make a copy for your records.
- Mail all VICAP Crime Analysis Reports, Supplements, and/or Corrections to:
VICAP
National Center for the Analysis of Violent Crime
FBI Academy
Quantico, VA 22135.
- Enclosing Crime Scene Photographs with the VICAP Crime Analysis Report will assist the VICAP staff in the evaluation of the case.
- A VICAP Case Number will be assigned to your case when it is processed and will be provided to you as soon as possible. The VICAP Case Number should be referenced in any subsequent correspondence or telephone communications with VICAP regarding the case.
- The Narrative Summary is intended to provide VICAP Analysts with a general overview of the case. Minute details of the investigation need not be provided here; the VICAP Crime Analysis Report will capture most of the detail necessary to complete the analysis. A person unfamiliar with your case, however, should have at least a general idea of what happened after reading your brief narrative.

Examples:

- 1) The partially decomposed body of an adult female was discovered in a wooded area of a state park, one-quarter mile from a major state highway. There are indications of sexual assault. Victim died of gunshot wounds. It appears that the victim was not killed at the body recovery site. The victim's whereabouts prior to her death have not been established.
- 2) Female juvenile was last seen at school. Investigation indicates that she was possibly abducted at or near the school while en route home. The victim has not returned nor has her body been recovered. Investigation indicates that it is unlikely that the victim is a runaway or that she disappeared of her own accord. This case is strikingly similar to one that occurred approximately 8 months ago in the same vicinity.
- 3) The reported offender entered a locked single-family residence occupied by a man, his wife, and 2 infant children. While the offender was gathering property in the residence, the husband confronted the offender. The husband was shot immediately and died. The wife responded after hearing the gunshot and was physically restrained by the offender. The offender hit her repeatedly with his fists, forced her to commit oral sex, and raped her repeatedly. The wife survived the attack. The children were not assaulted. The offender left the residence, and a vehicle was heard to leave the area. Offender arrested during the commission of a burglary in the same neighborhood one week later.

Re: Senate Bill 321

Dear Senator Halford,

As statewide president of the Alaska Peace Officers Association, I speak for over 1,100 law enforcement men and women who have dedicated their careers to the betterment of our Alaskan way of life. This is a task which grows increasingly difficult in an era of rising crime, especially murders.

We have supported legislation such as the Juvenile Waiver Bill, the Conspiracy Bill, and others because we feel such tools will help us identify and prosecute society's most dangerous offenders. We can thereby return our community to the semblance of law and order which is but a memory to Alaskans such as you and me who have lived here most of our lives.

It is for these reasons that the Alaska Peace Officers Association offers its support and endorsement of your Senate Bill 321 providing for fingerprinting of suspects and the uniform reporting of homicides in cooperation with the Federal Bureau of Investigations (FBI), and Violent Crimes Apprehension Program (VICAP).

The VICAP program grew out of the experiences of state and local homicide investigators with suspects who they felt had killed before. When it was realized that no national resources on this subject existed, a task force was organized that resulted

in the formation of the National Center for the Analysis of Violent Crime (NCAVC). VICAP was created as part of the NCAVC in 1985.

VICAP is essentially a national computer data information center which is located in the Behavioral Sciences Unit at the FBI training academy in Quantico, VA. Its mission is to collect and analyze reports of violent crime -- specifically murder. The program receives reports from all 50 states and several foreign countries. The types of homicides VICAP deals with fall into three categories:

- solved or unsolved homicides or attempts that are apparently random, sexually oriented, without motive or are suspected of being part of a series;
- missing persons who are suspected of being victims of foul play;
- unidentified dead bodies suspected of being victims of homicide.

An investigator with a murder that fits one of these criteria will complete a VICAP form which consists of several pages of questions dealing with all phases of the crime, from victimology to physical evidence. When the form arrives at VICAP headquarters, it is reviewed for accuracy and entered into a computer data base. Once a case goes into the data base it is compared continually against all other entries from other states on the basis of certain aspects of the crime such as the type of weapon, body recovery site, firearm caliber, similarity and location of injuries and many other details.

The purpose of this is to detect general patterns in homicide MO's, which will in turn allow VICAP personnel to pinpoint those crimes that may have been committed by the same offender and then notify the agencies involved. When a possible serial murderer has been identified, VICAP can assist the law enforcement agencies that may have relevant cases by coordinating a multi-agency investigation conference. This becomes especially important when the suspect or suspects have traveled throughout the country. This is often the case

in Alaska given a large military presence, a considerable number of seasonal workers and tourists, and our share of transients.

As you can imagine, the VICAP data base can only assist police officers to the extent that reliable information from all parts of the country are fed into it on a systematic basis. It is for this reason that we applaud the provisions of your uniform homicide reporting statute as proposed in AS 44.41.050. Requiring the fingerprinting of suspects will have a beneficial effect on law enforcement's ability to quickly detect and arrest those who have violated our laws. In time it will also augment the data base of Alaska's automated fingerprint computer identification system (AFIS).

Those of us who put our lives on the line every day applaud efforts such as yours that continue to provide us with the sort of tools which will help us effectively protect Alaskan citizens.

Respectfully,

Michael A. Grimes

Dear Senator Halford,

I would like to thank you for introducing Senate Bill No. 321, an act relating to the taking of fingerprints. This bill is timely and quite necessary for a number of reasons.

The traditional role of fingerprints has been to identify and apprehend criminals. The use of fingerprints coupled with modern day technology continues to be a very effective means of catching criminals. I have attached a memorandum from Kathryn Monfreda, my head Identification Technician, outlining APD's experience with fingerprints and the Automated Fingerprint Identification System. You can see that our success has been quite good.

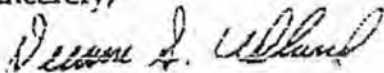

A less traditional role that public safety has been called upon to perform in recent years has been to do background checks on people for a variety of employment reasons, such as day care providers. Most recently the Brady Bill was thrust upon us, again underscoring the need for accurate fingerprint based criminal records.

Unfortunately, we are missing a significant number of fingerprints in Alaska for persons who have been arrested and convicted of crimes. Many people who are arrested never actually go to jail and get fingerprinted. We are missing out on a potential data base of prints that would lead to more crimes being solved as well as enhancing the accuracy of our criminal records system.

Your bill also specifies where and how fingerprints will be taken. That is a very important step in making sure that people don't drop through the cracks and escape detection or identification.

I also support the other aspects of your bill concerning mandatory reporting of homicides and the Violent Offenders Apprehension Program. I would be happy to assist you in any way that I can. I can be reached at 786-8552.

Sincerely,

Duane S. Udland

MEMORANDUM

DATE: February 22, 1994
TO: Deputy Chief Udland
FROM: Kathryn Monfreda, Identification Technician *km*
RE: Automated Fingerprint Identification System Statistics

As your requested, the following are some of the statistics I have compiled relating to APD's use of the State AFIS system.

| | |
|---|-------------------|
| Number of APD latents entered in system (start-up to date): | 2,551 |
| Number of APD latent "Hit" in system: | 554 (approx. 22%) |
| Number of additional latents identified/result of "hit": | 476 |
| Number of additional cases cleared/result of "hit": | 44 |

We have had a few cases of particular interest that have been solved solely due to the use of AFIS. One particular case involved a sexual assault at a place of business. The perpetrator used the telephone after completing the sexual assault of a stranger. The U.I. Officer lifted a print off the phone, which was entered into AFIS, and identified. This same suspect had also committed at least one other sexual assault (on UAA campus), and identifying him through AFIS is likely to have prevented further sexual assaults.

Shortly before Christmas, 1993, we had a string of residential burglaries. The officers were pretty sure many of them were the work of one unidentified individual. After several burglaries were investigated, a U.I. Officer lifted a print from a beer bottle on the kitchen counter of one of the burglarized homes. I was able to search this print through AFIS, and identified the print as having been made by Jason Barnum. His description fit that of an individual seen fleeing the area of other homes. The suspect was soon contacted, and was ultimately charged not only with the burglary through which he was identified, but 27 additional residential burglaries.

I hope this information is useful to you. If I can provide any further information, please let me know.
