MEMORANDUM

February 2, 1996

SUBJECT: CSHB 211 (STA), amending laws relating to voter registration and state election administration laws -- sectional analysis
(Work Order No. 9-LS0616K)

TO: Representative Con Bunde
ATTN: Patti Swenson

FROM: Jack Chenoweth
Legislative Court

The House State Affairs Committee Substitute, a First Session bill, modifies and makes additions to the State Election Code, AS 15, applicable to voter registration and the administration of state elections.

Bill section 1: The amendment proposed in this bill section revises the form of the voter's certificate that is used in conjunction with the voting of a questioned ballot. It directs the Elections Division Director to modify that certificate to require that the certificate contain space on which to set out all information required for voter registration. If the questioned ballot voter completes the certificate, then on the basis of the information obtained on the certificate, the director shall add the voter's name to the official voter registration list.

Bill section 2: The changes proposed to AS 15.07.125 go to the matter of "inactive" registered voters. There are several places where, with respect to names on the master registration list, the term "inactive" seems to take on several meanings depending on the context in which it appears. Registrations, if I understand correctly, may be "active," or "inactive," or the voters' names may be purged. This bill section substantively rewrites AS 15.07.125 to impose the additional requirement that the names of voters that are inactivated are to be maintained on the state's official registration list.

Bill section 3: There is no statute that specifically authorizes purchase of voter registration lists. The Elections Division relies on some combination of administrative regulations to make the lists available for a fee. Proposed AS 15.07.127 would authorize the preparation and distribution of those lists, including all information required to be maintained on the official voter registration list.

Representative Con Bunde
February 2, 1996
Page 2

Bill section 4 directs the Elections Division Director to purge the registration list of the names of deceased voters at least monthly.

Substantively, **bill section 5** directs revision of that registration list based on receipt of information about convicted felons "promptly."

Bill section 6 removes from AS 15.20.203(d) the responsibility imposed on the regional election supervisors to tell voters why the count of the voter's absentee vote was challenged, while, at the same time, **bill section 7** shifts that burden to the election division director and allows the director 60 days following certification to provide a more comprehensive explanation about the disposition of that absentee vote.

In like fashion, **bill section 8** removes from AS 15.20.207(d) the responsibility imposed on the regional election supervisors to tell voters why the count of the voter's questioned vote was challenged and, in line with that change, **bill section 9** shifts that burden to the director and allows the director a period of days following certification to provide a more comprehensive explanation about the disposition of that questioned ballot.

Similarly, **bill section 10** requires the director to prepare and provide the same kind of explanation in the event a ballot is only partially counted under the statute authorizing partial counting of cross-district ballots and counting of names of write-in candidates on certain ballots provided to the voter in error.

Bill section 11: For purposes of oversight of punch-card voting and other aspects of computerized elections operations, state law requires the director to appoint a data processing review board. The change made in this section would preclude the director from appointing state employees--especially persons who are subordinates of the director--to that board.

Sponsor Statement
CSHB 211

The goal of CSHB 211 is to decrease the need for questioned ballots in the primary and general elections by assuring the accuracy of the official voters registration list. This legislation accomplishes the goal in three ways. First, CSHB 211 changes the composition of the official registration list. Second, it provides for more frequent purging of convicted felons and deceased voters. Third, this bill increases communication from the Division of Elections, to absentee voters, and to questioned ballot voters.

Section one of CSHB 211 will aid voters that may need to re-register. The second and third sections of HB 211 call for the addition of inactive "active" voters to the list kept at each polling place. An inactive "active" voter is a person who has not voted for the past two years, is registered, and whose name does not appear on the official registration list. When a voter with this status arrives at the poll to vote, a questioned ballot must be cast. If a list of the inactive "active" voters is available at the polling place a voters name and ID can be checked. This will eliminate the need for a questioned ballot. Recently, the Division of Elections estimated the addition of this list would decrease questioned ballot need by approximately 1500-2000 votes statewide.

The fourth and fifth sections of this bill direct the Division of Elections to purge deceased voters monthly, and convicted felons promptly. There is a gap of time between conviction and sentencing of a felon. If the division of elections does not obtain the necessary information from the Dept. of Corrections regarding felony convictions the names are not purged from the official voter list. Potentially, a convicted felon could vote before his/her name is purged.

Sections six through ten of CSHB 211 will increase communications from the Division of Elections, to absentee voters and to questioned ballot voters, after the primary. This bill directs the Division of Elections to notify a voter of the status of a vote challenge no later than 10 days after the certification of the primary when a questioned or absentee ballot is totally rejected or partially rejected in the primary.

During the 1994 primary there were 6,990 questioned ballots statewide. That number does not include totally rejected ballots, because ballots that are totally rejected are not counted as a vote on the official registration list. Of the 6,990 primary questioned ballot voters 1,640 also voted a questioned ballot in the general election. If the voters knew the status of their votes soon after the primary, many might have taken corrective action before the general election. The result: less questioned ballots in the general. However, that was not the case. There were 14,144 questioned ballots statewide during the 1994 general election, of these 5,131 questioned ballots were totally counted, 7,883 questioned ballots were partially rejected, and 1,129 questioned ballots were totally rejected. Many people who voted questioned ballots in the primary had to do so again in the general because not all the problems were rectified between the primary and general elections. These people were not made aware that their votes for district representative and senator did not count until well after the general election was certified.

The final section of CSHB 211, section eleven, prohibits the appointment of any state employees to the data processing review board. This provision will keep the data processing review board objective and impartial. Our States last data review board was largely made up of state employees.

CSHB 211 provides a means of decreasing the number of questioned ballots cast in our state. The many voters who were not aware of the status of their vote were disenfranchised. That does not have to happen. We all know one vote can change the outcome of an election. Give all the voters in our state the opportunity to have their vote counted, and give our Division of Elections the opportunity to help that process change more effectively. I urge your positive consideration of this legislation.

Fran Ulmer, Lieutenant Governor
State of Alaska
PO Box 110015

Dear Ms. Ulmer:

Congratulations on your election win. I am aware that you have been investigating Division of Election problems. Since we perform work for almost all of the campaigns, we received an ear-full during the '94 elections.

Some of the candidates and party organizations have urged me to document these problems.

For 20 years we have worked closely with Elections personnel. From 1986 thru 1990, I was chairman of the Anchorage Elections Data Processing Review Board. Even though there has always been a high turnover in Elections staff, I have always found them to be hard working and conscientious. Much of the following is critical of Elections actions. I am not putting the blame on any staff members. Many of them became swamped with work, and worked far beyond the requirements of a normal job. Place any blame squarely on director Joe Swanson.

Attached are several problems we had or are still having. I have grouped them by:

1. Purged voters who voted without reregistering.
2. Voters assigned to the wrong district/precinct.
3. Unprocessed address changes.
4. Invalid residence addresses.
5. Data errors.
6. Data Processing Review Board Problems.

Thank you for your time. Let me know if I can be of assistance.

Sincerely,

Robert L Motznik

LIST OF ATTACHMENTS

- A. Description of 1994 election problems
- B. Computer listing of 1543 people that were not on the final (10/17/94) public file of everyone eligible to vote in the 94 general but are on the 1/5/95 voters and are flagged as having voted in the general and would have had their vote counted.
- C. Computer listing of 339 voters that were moved to a different district from the September to the October public files. Then matched to the January file to pick up current voter history.
- D. Computer listing of 88 voters that were moved to a different district from the October to the January public files.
- E. Computer listing of 25 registered that have residence addresses at private box facilities.
- F. Computer listing of 320 registered voters that have no residence address other than town name or that have a PO Box as a resident address in districts 7 thru 33. There are over 14,000 such registered voters statewide.

ATTACHMENT A

1. PURGED VOTERS WHO VOTED WITHOUT REREGISTERING.

Once a month the Division of Elections makes a new public version of the voters registration file available. Anyone can obtain a copy for \$165. We purchase each monthly tape. Included (since 1986) is an assension number (record number) which we use to match voters from one file to another.

By matching the state 10/17/94 public voters registration file to the 01/05/95 file on assension number, we can derive the following: The 10/17/94 file contained 339,871 registered voters which we were told included everyone that registered prior to the 10/09/94 deadline. Of those on the 10/17/94 file, 920 were not on the 1/5/95 file and 4496 voters were added. Of those that were added, 1543 had registration dates prior to 10/09/94 and also were flagged as having voted in the '94 general and with further research we found that their votes were counted. The explanation from Elections is that this occurred because of a change in the procedure for handling purged voters.

Elections is required to purge voters from the registration file if they have not voted in 2 years. The old procedure was that they had to reregister subject to a 30 day waiting period before they could vote. In this election any purged voter that showed up and voted was automatically reactivated and their vote was counted. In other words, purged voters were really still registered but were not on the public version of the voters registration file.

If this policy is going to continue, I feel you need to include these purged voters on the public voters registration file so that candidates are aware of these "unregistered" registered voters. I'm told that the 920 voters deleted from the public file are deceased people and felons that Elections is required to inactivate. It seems that most of these people should have been deleted earlier so they would not appear on the precinct lists that were printed from the 10/17/94 file. Once they show up and vote at a precinct their ballot would go into the box and there would be no way to remove it.

2. VOTERS ASSIGNED TO THE WRONG DISTRICT.

For 1994 there were minor changes in district boundaries. Elections had to reassign some voters to new district/precincts. They made some errors as can be expected since this is a tedious task. Candidates would find these errors when using our walking lists for their door-to-door campaigning. One of the larger errors had the Anchorage Pioneer home in the wrong district. Some candidates got very frustrated when it took multiple calls over a couple months to get Elections to make the corrections. There were 339 such voters including the Pioneer's home who were assigned to new districts between the September and October public files. Another 88 were redistricted after the October file was released. Any of those 443 that voted in the primary were voting for the wrong State House candidates and possibly the wrong State Senate candidates. The same may have been true for the general election for the 88 that were redistricted after October 17. Most of these problems affected Senate District J, where the final vote difference was only 26 votes. The 339 and 88 registered voters are listed in attachments C and D.

3. UNPROCESSED ADDRESS CHANGES.

One of our employees moved to a new district in November 1993. When he went to vote in the April '94 local he had not made an address change so he voted a questioned ballot and requested an address change. When he went back to vote for the primary, his address change had not been made so he again voted a questioned ballot and requested another address change. His State House and State Senate votes were not counted because he was voting where he lived rather than at his old address where the State still had him registered. When he went back in November his address change had still not been made. He again had to vote a questioned ballot and his State House and State Senate votes were again not counted. After some complaining phone calls they finally had his address changed on the November public file. My impression is that by October, the Elections office was buried in work and let some of their work load slide. During October Elections staff that normally return my phone calls in minutes would take days to get back to me. Not making timely address changes may disenfranchise a voter.

4. INVALID RESIDENCE ADDRESSES.

One of the products we produce for candidates is walking lists for their door-to-door campaigning. It has been my impression that elections is not suppose to accept a registration without a physical residence address. But the walking lists always show up with people registered at post office boxes, private box offices, state office buildings, the federal building, business addresses, vacant lots, non-existent addresses, etc. Some of these conditions Elections could check for easily, others would take a lot of work. Is there any requirement that a registered voter actually resides where they indicate? It seems unfair to a candidate that people who do not live in his district can pick an address to register at and vote in his district. A candidate should be able to notify Elections and have the voter inactivated. Another residence problem group are those that live out of state but are allowed to vote in Alaska as long as they say that they intend to return some day. They get to pick a resident address and they can pick a different address for each election. Again this seems contrary to the notion of having a elected official represent the people that live in his district.

5. DATA ERRORS.

One of the most common complaints that candidates have about the voters file is the inaccuracy of the addresses. Some candidates have us maintain private files for them with corrected addresses. They will do an address correction requested mailing to their constituents. It is normal to have 25% or more of the addresses come back, especially in a military district. I know that many years ago, Elections did an address corrected mailing and then updated mailing addresses from the post office returns. Would it be legal to update a voters residence address and possibly assign him to a new district based on a post office forwarding notice? One solution might be to send an address correction request form to a voter when the post office or a candidate indicates that the voter no longer lives at the old residence address.

6. DATA PROCESSING REVIEW BOARD PROBLEMS.

I was chairman of the Anchorage Data Processing Review Board for the '86, '88, and '90 elections. I agreed to perform that thankless job with miniscule compensation because I wanted to convince myself that the ballot counting process was accurate. And I became convinced that the procedures established were sound. The purpose of the Data Processing Review Board is to be a group of citizens who are knowledgeable about computer processing from different political parties to oversee the computer ballot counting. A major task was to punch every possible ballot configuration and verify that the ballot counting program was accurate.

I have been told some disturbing things about the '94 Data Processing Review Boards that I have not been able to verify. I repeat them to you so you can at least be aware of them.

- a. I was told that director Swanson assigned the elections supervisor in each area to their board. In 1986 we would not let the wife of one of the state programmers serve on the board because we felt it was too much of a conflict. The purpose of the board is to audit the actions of the elections supervisor. How can the elections supervisor audit herself?
- b. I was told that the board did not make up their own test decks.
- c. I was told that director Swanson rejected ballots where multiple punches were made in the same rectangular area on the governor/lieutenant governor race. It takes two punch positions on the ballot to list the governor/lieutenant governor names and party. One of the tests required of the Data Processing Review Board was to verify that if a voter punched either or both of the positions his vote would count. It is my understanding that director Swanson rejected any ballots where both positions were punched in the '94 general.

MEMORANDUM

February 3, 1996

SUBJECT: CSHB 211(STA), amending laws relating to voter registration and state election administration laws (Work Order No. 9-LS0616\K)

TO: Representative Con Bunde
ATTN: Patti Swenson

FROM: Jack Chenoweth
Legislative Counsel 

You're correct. In CSHB 211(STA), references to "the deadline set in AS 15.20.220(b) for completion of the review of ballots . . . for a primary election" that appear in AS 15.20.207(i)(1) (added by bill section 9) and in AS 15.20.211(d)(1) (added by bill section 10) are inaccurate. AS 15.20.220(b) sets no deadline.

I'd suggest trying to get a committee to adopt an amendment that does the following:

page 3, lines 30 - 31, and page 4, lines 20 - 21:
Delete "the deadline set by AS 15.20.220(b) for"

So that the respective provisions are left to read:

(1) 10 days after completion of the review of the ballots set by
the state review board for a primary election;

The objective, of course, is to require the director to advise questioned ballot voters and partial count voters relatively soon after the wrap-up of the primary so that the voter may act to correct the omission or other cause of rejection of the ballot cast at the primary election in time to avoid recurrence of the same problem at the following general election.
