ANALYSIS: (Attach a separate page if necessary)

This land exchange may result in the construction of a new hydroelectric project to serve residents of the Gustavus area. If the project is built the Gustavus Electric Company projects a reduction in the Power Cost Equalization (PCE) subsidy, projected at .125/kwh less for generation, plus additional revenue from usage fees and resources. It will also create new employment opportunities.

Since the final exchange is dependent on the Federal Energy Regulatory Commission process, cost may be deferred to a future fiscal year.

Since the notice provisions of AS 38.50 will not apply, staff time for this version of the bill has been reduced to one position for two months.

Since the final exchange is dependent on the Federal Energy Regulatory Commission process, cost may be deferred to a future fiscal year.

To complete the exchange we will need funding to cover two temporary positions for two months.
