**ANALYSIS:** (Attach a separate page if necessary)

Designation of non-residential development nodes along the Dalton Highway per se will not result in an increased agency workload. However, over the long term, it may become necessary to conduct a comprehensive land use plan for haul road node development. In addition, it may become necessary to monitor and evaluate the effects increased public use of the haul road corridor may have on fish and wildlife stocks and their habitats. Such studies may include traditional population management evaluations to support recommendations to the Board of Fisheries and Game as well as cumulative assessments of potential impacts on subsistence harvests of fish and wildlife.

## Senate Bill 93 Disposal of Land Along the Dalton Highway

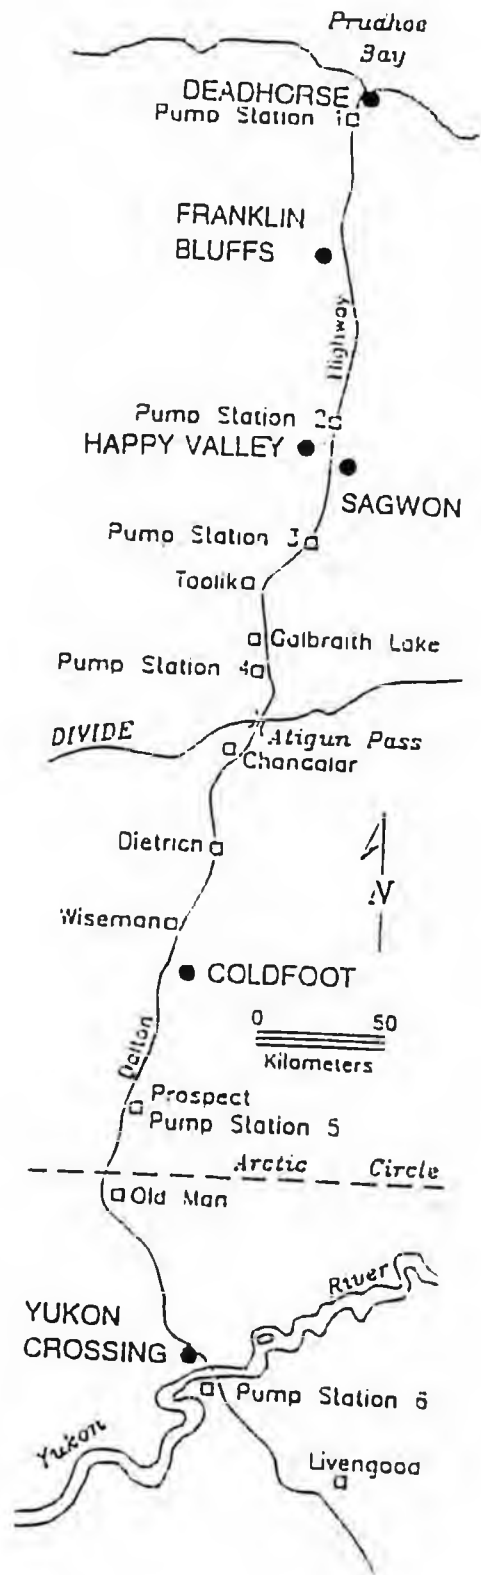

by Senator Mike Miller

Last session the Legislature passed Senate Bill 210 which provided for the reauthorization of existing leases in three development nodes along the Dalton Highway including Deadhorse, Yukon River Crossing and Coldfoot. It also allowed for future non-residential land disposals in at Deadhorse.

With the recent opening of the highway to public traffic, the need for additional services is anticipated. Senate Bill 93 will allow the state to proceed with future non-residential disposals in each of the remaining four nodes along the route for development of various public facilities. It is structured to allow disposals *only* within the identified nodes which have existing pads so that orderly development is maintained at regular intervals along the highway. The development areas affected are Yukon River Crossing, Coldfoot, Happy Valley, and Franklin Bluffs.

As with any state land disposal, all proposed sales or leases within the development nodes will require a Land Use Plan, subject to procedures set forth in law which provide for thorough public review.

I appreciate your consideration of Senate Bill 93.
