Alaska Court System
Fiscal Analysis

On the assumption that the advisory vote is approved by the voters and that the Legislature passes legislation which authorizes use of the death penalty, the court system has estimated the cost of processing 10 death penalty cases annually.

Personal Services

<u>Position</u>	<u>Salary</u>	<u>Benefits</u>	<u>Total</u>
Pro Tem Judge, Anchorage Trial Courts, PPT, 12 months	\$58,500	\$35,602	\$94,102
Pro Tem Judge, Anchorage Trial Courts, PPT, 12 months	58,500	35,602	94,102

Law Clerk I, Anchorage Trial Courts, range 13D, PFT, 12 months	33,480	14,181	47,661
Law Clerk I, Anchorage Trial Courts, range 13D, PFT, 12 months	33,480	14,181	47,661
Law Clerk I, Fairbanks Trial Courts, range 13D, PFT, 12 months	33,592	15,498	54,090
Law Clerk I, Anchorage Appellate Courts, range 15D, PFT, 12 months	33,592	15,498	54,090
Bailiff, Statewide, range 6A, NPP, 24 months	40,178	3,985	44,161
			<u>482,918</u>

Offset cost of existing caseload -

Under present law, first degree murder cases experience a 50% trial rate and last approximately one month. Thus, the court expects five trials which last a total of 5 months. The proposed legislation will result in approximately 39 months of trial activity (see the time calculations under Jury Fees in the Contractual section below). Therefore, the cost offset is computed at 5/39 of the expected personnel costs.

	(61,800)
Net personal services	<u>421,018</u>

Based on the fiscal note submitted by the Department of Law, the court system anticipates needing additional judicial staff to carry the workload of active judges assigned to capital offense cases. The court will use pro tem judges, which are among the least-costly judicial positions available. Additional law clerks are required for extensive legal research of motions and other legal questions. Funding is requested for two non-permanent bailiffs, which will be hired at the designated trial site.

Travel

Jury sequestration costs - transportation, meals and lodging	126,000
10 Innocence/guilt trials with 18 jurors, 7 days in deliberation each, @ \$100 a day	

Offset cost of existing caseload -

See offset note in personal services.

	(16,200)
Net travel	<u>142,200</u>

Death penalty cases are often subject to intense media exposure, which may initiate changes in venue. High jury sequestration costs are anticipated due to lengthy deliberations.

Contractual

Jury fees - 10 innocence/guilt trial @ 88 days each (3 months), 18 jurors @ \$25 a day and 9 sentencing trials @ 22 day each (1 month), 18 jurors @ \$25 a day	388,100
Contractual security guard to staff metal detectors	10,000
Transcription fees - 10 transcripts, 5,000 pages each at \$2.00 a page	190,000
Freight for high security equipment kit	1,000
Total contractual services	<u>589,100</u>

Offset cost of existing caseload -

See offset note in personal services.

	(175,300)
Net contractual services	<u>413,800</u>

See additional note on contractual costs on the next page.

Alaska Court System
Fiscal Analysis (continued)

The Department of Law expects to prosecute 10 capital offences each year. Capital offense trials will be split into 2 separate trials with each lasting 2 to 6 months. The court anticipates extraordinary jury costs from calling additional jurors, extended juror selection questioning, the need for alternate jurors and lengthy trials. The court anticipates high transcription costs resulting from preparation of the voluminous record for capital offense trials.

Supplies

Office and courtroom supplies for new positions and trials. 7,000

Equipment (one-time cost)

Standard office equipment and reference materials for law clerks 6,720

Portable high security equipment kit, consisting of a walk-through metal detector, temporary building card key system and video monitoring system. Will be shipped to trial site.

28,000

31,720**Total annual estimated costs**

51,113,738

FISCAL NOTE

STATE OF ALASKA
1997 LEGISLATIVE SESSION

BILL NO. SB 60

ANALYSIS: (continued)

Introduction

HB 131 would place an advisory vote before the voters at the next general election asking whether the legislature should enact a law providing for capital punishment for murder in the first degree. In the event that the voters respond in the affirmative, and the legislature enacts capital punishment legislation, there will be significant costs for the Public Defender Agency.

A subsequent legislative bill that would authorize capital punishment, would classify murder in the first degree as a capital felony, and establish sentencing procedures for capital felonies. In general, if the procedures are similar to those suggested in previous capital punishment bills, a death sentence would not be imposed unless at least one of several specified aggravating factors was found to exist and the aggravating factor, or factors, was not outweighed by mitigating factors. (See, for example, SB 52, introduced in the 19th Legislature.)

The capital caseload of the Public Defender Agency will be a direct function of the number of murder cases prosecuted in the state combined with prosecutorial decisions to seek the death penalty. As such the Public Defender Agency's fiscal analysis is premised on projections made by the Department of Law in its fiscal analysis of HB 131. The Department of Law indicated it prosecuted 17 murder cases in 1994 where the death penalty could have been sought in that the requisite statutory aggravators were present. Of those 17, ten would likely result in death penalty trials. The Department of Law concluded that they would gain nine convictions from which the death penalty would be imposed in six cases.

Of the ten cases which are projected to go to trial as capital cases, The Public Defender anticipates being assigned to seven, with the other three either involving private lawyers or attorneys secured through the Office of Public Advocacy (where the PD is unable to undertake representation because of legal conflict of interest).

Because the number of murders can vary significantly from year to year predicting actual numbers of cases is difficult. It is not difficult, however, to predict a profound fiscal impact for the PD once the death penalty becomes law. The concept of "super due process", established by the U.S. Supreme Court as the required standard of practice for defending death penalty cases, necessitates that highly capable lawyers and support staff (in sufficient numbers) be in place to handle any and all cases of this nature.

Fiscal Impact

Passage of death penalty legislation will have an undeniably significant impact on the entire criminal justice system, including the courts, corrections, prosecution, public counsel services and other related entities. Death penalty cases require greater due process safeguards than do non-capital cases. This is obviously a consequence of the severity and finality of a death sentence as well as the potential for killing an innocent person by mistake. It must be understood that the criminal justice system is an imperfect process based on the combination of law and human judgment. Some percentage of error is a consequence of the American jury system. In non-death cases the system stands ready to correct those mistakes when and where they become known. An execution following a death penalty case can never be corrected. It is for these reasons so much care must be taken to defend individuals accused in capital cases. Providing "super due process" translates into adequate attorney resources, support resources, expert and consultation monies, funds for appealing death penalty convictions and other attendant expenses. A commonly accepted estimate for expert witness fees alone in a death penalty case is \$60,000.

Capital felony trials are bifurcated, that is, two separate trials are actually held. The first determines guilt or innocence; the second determines whether aggravating factors exist to justify execution; whether mitigating factors exist that outweigh the aggravating factors, and whether to impose a period of imprisonment or death. The experiences of other states is that these trials require far more defense resources than first degree murder cases that do not involve

FISCAL NOTE

STATE OF ALASKA
1997 LEGISLATIVE SESSION

BILL NO SB 60

the potential for execution.

Many states that have a death penalty provide a minimum of two defense attorneys to each capital defendant to insure that the required heightened procedural safeguards are met. The American Bar Association Standards for Criminal Justice: Providing Defense Services (3d. Ed.) note the following:

Workload in capital cases creates extraordinary difficulties in every jurisdiction in which the death penalty can be imposed. Time requirements in such cases vastly exceed those of non-capital felony cases. In some states where death row populations are high, the situation has reached crisis proportions. After conducting a national survey, for example, attorneys in Florida arrived at an annual caseload standard of five cases per attorney when the defendant was not under a warrant of death, and three cases per attorney when a warrant for execution had been issued. In California, where the Office of the State Public Defender handled capital appeals in the California Supreme Court, one study concluded that the attorneys handling such cases should be responsible for only two to three briefs per year in such cases.

(at p. 73; footnotes omitted).

During the investigation and preparation phase of the case, crime scene evidence will have to be examined and the forensic examinations performed by the state will have to be scrutinized. Psychiatric experts are essential to deal with competency, insanity or diminished capacity issues. Motion practice in death penalty cases has been estimated to be five times more labor and cost-intensive than in non-capital homicide trials. Trial itself in capital cases is an extremely time consuming process, lasting in excess of six months in some cases. Serious scheduling conflicts will arise in staff resources to provide simultaneous representation in a number of cases.

A sentencing, or penalty phase trial is categorically different in breadth and procedure from any comparable proceeding in a non-capital trial. Heightened due process requirements continue. In addition to the expert witnesses employed during the trial phase, such expertise will be necessary when mental health issues do not rise to the level of perfect defenses but are important in establishing mitigators. Additionally, extensive investigation and presentation of the defendant's family friends, co-workers, neighbors, and school and social workers is minimally required. The analysis of defendants' entire life and the gathering of historical detail is absolutely mandated. In a recent California case 240 such witnesses were located and interviewed, and 120 of those were called as actual witnesses in a single penalty phase.

It is not unusual for a death penalty case to remain in the court system, litigated by the parties, for a period of up to ten years. There is also extensive appellate work which is routinely done in each death penalty case following conviction. Following are the procedures which are typically utilized after a trial and sentencing:

1. Motion to modify the death sentence/reconsider before state trial judge;
2. Mandatory appeal of conviction and sentence to Alaska Supreme Court;
3. Writ of certiorari to the United States Supreme Court;
4. Post-conviction relief proceedings in state court;
5. Appeal of unsuccessful post-conviction relief proceedings to the Court of Appeals;
6. Petition for hearing of post-conviction relief proceeding denial to the Alaska Supreme Court;
7. Petition for writ of habeas corpus in Federal District Court;
8. Appeal to the United States Court of Appeals if writ unsuccessful;
9. Rehearing in the United States Court of Appeals;
10. Writ of certiorari to the United States Supreme Court.
11. Request for clemency/commutation to Executive Branch of government;

FISCAL NOTE

STATE OF ALASKA
1997 LEGISLATIVE SESSION

BILL NO. SB 60

12. Emergency stays to the United States Supreme Court prior to execution.

While precise numbers may be difficult to predict, the conclusion is inescapable: to meet the extraordinary workload difficulties of capital cases extraordinary resources must be allocated.

Breakdown of Fiscal Impact

1. Personal Services. Given the complexity and intensity of effort involved in each death penalty trial and penalty hearing, many states require by statute that a minimum of two defense attorneys take up representation of the accused in death penalty matters. Both the state District Attorney and the Office of Public Advocacy contemplate such a policy for their respective agencies. The Public Defender will follow this prudent course, whether established by statute or internal policy.

Assuming that the Public Defender Agency is appointed to seven capital cases per year, death penalty units will be established in its two largest offices; Anchorage and Fairbanks. A trial team in each of these offices will be established the first year. Even if only 4 cases proceed to trial in that year, preparation must begin immediately. The second year an appellate team will be placed in Anchorage. (Please note that unlike the Department of Law, the Public Defender Agency has no equivalent to the Office of Special Prosecutions and Appeals). The appellate team will not be needed until the second year following enactment of the death penalty because it is not expected that an appeal would be "ripe" until that time. Obviously adequate support staff, to include legal interns (designated as "Associate Attorneys" under state personnel classification) paralegals, investigators and secretaries, will be necessary. A second appellate team will be established in Fairbanks in the third year following enactment of capital punishment.

2. Travel and Contractual. Travel expenses will be necessarily high given the broad geographic area served by these teams. These teams will have to travel to locations where the crime occurred and where trial is being held. Travel expenses are higher in Alaska because of the geography of the state, the lack of surface roads and the high cost of air travel and lodging. Costs will be even higher for the considerable out-of-state travel associated with these cases. Once an individual is convicted of a capital offense, preparation begins for the penalty phase (sentencing hearing). Defense investigators will travel to locations where the defendant lived, went to school, etc., to interview people and develop facts for the purpose of vitiating a sentence of execution. If favorable witnesses are located, they will then have to be subpoenaed for travel to Alaska for the hearing.

Contractual expenditures for expert witnesses will be significant. As the Department of Law pointed out in its fiscal note recent cost studies of capital trials in other states indicate that expert witnesses for both the trial and sentencing proceedings cost about \$60,000 on the average. This estimate is consistent with the research by the Public Defender Agency on this issue. In addition there will be expert witness costs for the appellate work done following trial, conviction and sentence to death. These costs can be as high as the expert witness fees incurred during trial.

3. Supplies and Equipment. These expenses naturally accrue when additional staff are required. Estimates which follow are very conservative projections without consideration of inflationary factors.

4. Training. Attorneys will most likely need to be recruited from outside as there are few or no "death-qualified" attorneys available locally, and none currently employed by the Public Defender Agency. Training in Alaska law will be required. Additionally, training for lawyers engaged in death penalty work is a critical component for any death penalty defense unit. Both the prosecution and the defense will avail themselves of national training programs which are conducted on a yearly basis related to these kinds of cases on an on-going basis.

Conclusion

Due to the accrual of cases from year to year, once implementation of the death penalty occurs expenses could greatly exceed that anticipated in this fiscal analysis. This agency has no control over the trend of homicide crimes nor the discretion which will be exercised by the prosecution in seeking the death penalty. Continued additional staff will have

FISCAL NOTE

STATE OF ALASKA
1997 LEGISLATIVE SESSION

BILL NO. SB 60

to be added to this agency beyond the fourth year of implementation of the capital crime law. Despite our best predictive efforts, this cost estimate very well might understate staff/contractual needs. Only several years of experience with the death penalty will permit adjustment of projections and fiscal analysis.

ANALYSIS: (Attach a separate page if necessary.) Should legislation subsequently be enacted, the following fiscal analysis applies. Passage of death penalty legislation would have a dramatic fiscal impact on the Office of Public Advocacy (OPA). The OPA, as a purely reactive agency, must provide legal representation when appointed by the court. OPA is responsible for providing representation to indigent criminal defendants in cases where the Alaska Public Defender Agency has a conflict of interest.

The Department of Law has estimated it would seek the death penalty in approximately ten trials annually. Therefore, OPA anticipates it would be responsible for three capital cases in FY 00 and three more in each of the following years. Because almost no one in Alaska could afford the cost of defending capital cases, it is assumed the Public Defender Agency and OPA would represent all capital defendants. (See attached)

1997 LEGISLATIVE SESSION

BILL NO. SB 60

ANALYSIS: (continued)

The agency would assign at least two experienced attorneys to each capital case in accordance with the policy -- and legal requirement -- of most states in which the death penalty has become law. Each case will necessitate an exhaustive pre-trial investigation, contracts with numerous expert witnesses, and extensive litigation of legal issues during pre-trial proceedings, trial and the many appellate stages.

The New York Defender Association has estimated expert witness fees as \$60,000 per case. Further, travel costs would be extraordinarily high because this Anchorage-based death penalty team must provide statewide representation.

It is anticipated that OPA would have to contract for representation of at least one death penalty case per year. Such a case would arise where OPA has a conflict of interest. The New York Defender Association has estimated the cost of defense services in each case to be \$350,000 in 1988. The cost in Alaska would probably be significantly higher.

Death penalty cases will accumulate in the agency each year. It is highly likely that each case that comes into the office will remain its responsibility for at least 8-10 years.

In FY 01, the first year in which actual death penalty trials will probably occur, OPA costs rise because of the addition of an appellate attorney, and support personnel including an associate attorney (nonlawyer) position, a paralegal, and a legal secretary. In FY 02, an additional trial attorney position would be needed to support the initial three-trial positions created in FY 00 and FY 01.

In FY 03, the death penalty defense staff would need to be enlarged by at least one attorney, to complete the formation of two larger teams, together with a paralegal and legal secretary.

OPA assumes that it will have only one or less conflict case per year. For this reason, the accumulating appellate costs are conservatively estimated at an additional \$100.0 per year.

Finally, even though OPA assumes the addition of only three cases per year, the costs associated with the accumulation of cases can be expected to more than double at least every three years. There is little doubt that, within ten years of the adoption of the death penalty in Alaska, OPA costs for the defense of these relatively few cases would surpass its FY 97 budget of \$7,439.6 for over 10,000 cases.

ANALYSIS: (Attach a separate page if necessary)

HB 131 would place an advisory vote before the voters at the next general election asking whether the legislature should enact a law providing for capital punishment for murder in the first degree. In the event that the voters respond in the affirmative, and the legislature enacts capital punishment legislation, there will be significant costs for the Department of Law.

A subsequent legislative bill that would authorize capital punishment, would classify murder in the first degree as a capital felony, and establish sentencing procedures for capital felonies. In general, if the procedures are similar to those suggested in previous capital punishment bills, a death sentence would not be imposed unless at least one of several specified aggravating factors was found to exist and the aggravating factor, or factors, was not outweighed by mitigating factors. (See, for example, SB 52, introduced in the 19th Alaska Legislature.)

FISCAL NOTE

STATE OF ALASKA
1997 LEGISLATIVE SESSION

BILL NO. SB 60

ANALYSIS CONTINUATION:

In 1994, the department's criminal division had 17 first degree murder cases in which aggravating factors were present that would justify the death penalty, had a similar provision been the law. The number of murders committed in Alaska varies somewhat from year-to-year and, therefore, the assumptions made in this fiscal note are as conservative as possible.

Overview

Capital felony trials would be bifurcated, that is, held in two parts. The first part would determine innocence or guilt; the second part would determine whether aggravating factors exist sufficient to justify the death penalty, whether mitigating factors exist that outweigh the aggravating factors, and whether the defendant should be sentenced to a term of imprisonment or to death. Based on 1994's data, where 17 murders having death penalty aggravators occurred, the department would probably seek the death penalty in ten cases, all of which would require trials. In the remaining seven cases, prosecutors would elect to try the cases as noncapital first degree murders for discretionary reasons, primarily due to the difficulty of obtaining a conviction if the death penalty was included. The department expects that nine capital offense convictions will occur each year. Of this latter number, we believe that the death penalty will be imposed six times each year.

Thus, the department must be prepared to prosecute capital felonies on ten occasions each year, and it must also be prepared to handle a multi-year appellate review process that will grow at an accumulating rate of six cases per year. The experience in other states is that capital trials require far more in the way of prosecution and investigative resources than first degree murder cases that do not include the death penalty.

In its several reviews of capital penalty laws, the United States Supreme Court has taken the position that "death is different." Consequently, the Supreme Court has required that states accord capital defendants procedural and substantive protections that go far beyond those required for noncapital defendants. The Court has, in effect, mandated that capital defendants be accorded "super" due process. The federal courts have consistently held that capital cases demand special consideration, both at trial and on appellate review, because of the exceptional and irrevocable nature of the penalty involved.

In order to meet this heightened level of due process, it will be necessary for the state to employ far greater prosecution resources. Many of the thirty-eight states having a death penalty, for instance, provide two defense attorneys to capital defendants to insure that the due process safeguards required by the courts are met. Likewise, the state's prosecution case must also be properly represented. During and prior to the trial phase, crime scene evidence will have to be examined and presented by highly qualified forensic experts. Psychiatric experts will also be required during the trial phase and during sentencing proceedings, to rebut and overcome competency and psychiatric defenses to both the substantive-charge and the capital sentence. Recent cost studies of capital trials in other states indicate that expert witness expenses for both the trial and sentencing proceedings cost about \$60,000 on the average.

A sentencing proceeding, or the penalty phase of a capital trial, is categorically different in character, procedure, and magnitude from any counterpart in a noncapital trial, and it accounts for a large part of the increase in costs. The heightened due process requirements, and the right to effective assistance of counsel, apply equally to the sentencing phase as they do to the trial phase. At this stage of the proceeding,

FISCAL NOTE

STATE OF ALASKA
1997 LEGISLATIVE SESSION

BILL NO. SB 60

ANALYSIS CONTINUATION:

the defense may be expected to use many of the socio-psychiatric witnesses employed during the trial phase. Additionally, the defense may also use the defendant's family, friends, neighbors, co-workers, school personnel, and social workers as witnesses. The defense's sentencing phase investigations will involve a complete retrospective analysis of every positive aspect of the defendant's life from the day of birth to the date of sentence. The prosecution, on the other hand, must interview each of the defendant's witnesses to rebut mitigation evidence, and present its own witnesses to prove its aggravating factors. For example, in a California case, 240 persons were investigated and interviewed as potential witnesses and 120 were eventually called as witnesses in a single sentencing proceeding. In addition, a five-fold increase in pretrial motion practice, often involving a state's supreme court, has occurred in other states between capital and noncapital first degree murder cases. In view of the foregoing, it appears likely that the same level of state resources, needed for the state's most expensive criminal trials, will also be needed for capital murder trials.

Last, post-conviction appellate reviews of death sentences will also require a substantial expenditure of state resources. Initially, challenges to the law itself can be expected to be taken to the Alaska Supreme Court on the basis of both state and federal constitutional due process, equal protection, and cruel and unusual punishment doctrines. Such challenges should be expected during the first two or three years after the provisions of the bill go into effect. Otherwise, the bill provides for a straightforward appeals process to the Alaska Supreme Court, but death sentences will nonetheless result in lengthy and complicated appellate litigation. This is because of the substantial appellate avenues available to capital defendants in the federal court system, primarily on claims of due process, competency, and newly discovered evidence. Typically, these cases move up and down throughout the state and federal court systems, and involve the state superior and supreme courts, the U.S. Supreme Court, and the U.S. Circuit Court of Appeals, and the U.S. District Court. As a result, as has been the experience in every other capital punishment state, it should be expected that many years will pass before a death sentence can be carried out. Current information indicates that nationally an average of 9.6 years elapses from the time a death penalty sentence is imposed to the time the sentence is carried out.

Implementation

The Department of Law anticipates that the time from when an offense is committed until a capital felony trial takes place will be between one and two years after the bill takes effect, although the first phase of a bifurcated trial may begin during the first year. Likewise, the post-conviction appellate review process will not commence until sometime during the second year. For these reasons, the department has developed a multi-year implementation plan for this fiscal note.

During the first year, it will be necessary to add three attorneys, three paraprofessionals, and two legal secretaries to handle capital felony prosecutions. Although perhaps as few as four bifurcated trials may actually get underway during the first year, substantial time will be required preparing for trial. This includes advising police investigators, examining evidence, interviewing witnesses, consulting with psychiatric and forensic experts, and initiating, responding to, and arguing pretrial motions. Also, preparation work on all 17 potential capital felonies expected to occur during the first year must begin as soon as possible after an offense is committed.

FISCAL NOTE

STATE OF ALASKA
1997 LEGISLATIVE SESSION

BILL NO. SB 60

ANALYSIS CONTINUATION:

The "super" due process required by the courts in death penalty cases, and the requirement for a separate sentencing proceeding, will more than triple the work of the department's staff who handle these cases, compared with noncapital first degree murder cases. Extraordinary amounts of attorney and paraprofessional time will be needed to satisfy these minimum, mandatory requirements. As a consequence, capital felony prosecutions could not readily be undertaken in any of the department's offices, except for Anchorage and Fairbanks, without providing special prosecution staff on a case-by-case basis. And, even for Anchorage and Fairbanks, the existing staff would have to be substantially augmented each time a capital felony is handled. All of the positions to be added to handle capital trials and post-conviction death sentence appeals would be located in the department's Office of Special Prosecutions and Appeals, in Anchorage.

During the second year, eight or more additional capital felonies are expected to go to trial, and 17 new potential capital felony offenses will occur. At this point, it will be necessary to add one attorney, one paraprofessional, and one legal secretary to handle the increasing capital felony trial caseload. It will also be necessary to establish a capital felony appeals staff during the second year, when appeals from the first four trials are expected to begin the appellate review process. Initially, one attorney, one paraprofessional, and one legal secretary will be needed to handle capital felony appeals.

During the third year, the number of bifurcated capital murder trials (10) should equal the number of new capital offenses charged, although some compression and overlapping of the caseload will likely occur. Consequently, it will be necessary to increase the trial staff during the third year, in order to handle the total annual workload, and to insure against speedy trial problems. The trial staff would be increased by one attorney, one paraprofessional, and one legal secretary. Post-conviction capital felony appeals will have reached eight by year three, and they will continue to increase at the rate of six new cases each year, thereafter. It will, therefore, be necessary to increase the appeals staff in the third year by adding two attorneys, one paraprofessional, and one legal secretary.

It is not possible to accurately predict the eventual annual costs of a capital felony law beyond its first three or four years. There are simply too many unknowns. However, the costs that have been predicted are conservative. The following factors have been considered in arriving at these costs.

- (1) Capital felony due process and bifurcated trial requirements will more than triple the cost and time spent in prosecuting first degree murder offenses, at a minimum.
- (2) The time required for a bifurcated trial will probably vary between two months and six months, although time lines are completely uncertain, and extremes will most likely be the rule. Serious overlapping and scheduling conflicts between investigations, trials, and available staff time will undoubtedly occur.
- (3) Pretrial motion practice will increase dramatically, resulting in additional scheduling problems.
- (4) Logistics problems will occur at most locations, except Anchorage and Fairbanks, and these problems will become more severe the smaller and more remote the location.
- (5) Witness travel and per diem will be expensive because of the large number of witnesses that will be required for both the trial and the sentencing phases of capital felony prosecutions, and in many cases this includes out-of state travel.

FISCAL NOTE

STATE OF ALASKA
1997 LEGISLATIVE SESSION

BILL NO. SB 60

ANALYSIS CONTINUATION:

(6) Staff travel and per diem will likewise be expensive for trials held outside of Anchorage. Extensive staff travel expense will also be necessary, for trials held at all locations, to interview both prosecution and defense witnesses who will appear at sentencing proceedings.

(7) One of the most complex murder prosecutions ever held in Alaska was the John Kenneth Peel trial. Because this case involved extraordinary evidence problems, it probably represents costs that are outside the norm. Due to this and other complications, the total Peel case costs included two grand jury proceedings and two trials. But there can be no question that the state will have to provide a nearly comparable effort if it is to prevail in death penalty cases. By comparison, capital felony trials will be held in two parts, necessitate considerable expert testimony and depositions, involve two separate sets of witnesses, and require extensive staff travel. For this reason, the average prosecution costs (both personal and non-personal services) of a bifurcated capital felony case has been projected to be nearly \$240,000 or considerably less than one-half of the \$597,000 cost for the first Peel trial.

(8) The cost for appeals is shown only through the fourth year; however, this cost will ultimately grow enormously. The average length of time between a death sentence conviction and an execution in the United States is nearly ten years. Consequently, the state will have to provide enough resources to respond to the appeals of 10 or more capital felony defendants annually, within 10 years. The eventual costs for this extended timeframe are not within the scope of this fiscal note analysis.

(9) Therefore, the following per trial expense estimates have been used to calculate the costs of this fiscal note.

Capital Felony Trials

- Witness travel and subsistence, \$50,000 per case.
- Staff travel and per diem, \$7,500 per attorney, \$5,000 per paraprofessional, \$3,000 per secretary, per annum.
- Expert witness fees, \$60,000 per case.
- Standard witness fees paid to others, \$2,500 per case.
- Deposition/court reporter charges, \$20,000 per case.

Death Sentence Appellate Review

- Staff travel, \$3,500 per attorney, \$2,500 per paraprofessional, per annum.
- Fees for outside counsel for years two and three only, \$50,000, each year.
- Transcription/court reporter costs, \$30,000 per case.

Assumptions

1. This fiscal note is based on the assumption the proposed advisory vote is approved by the residents of Alaska during the next general election. It further contemplates that the Alaska Legislature would enact a capital punishment law following such an advisory vote.
2. The Dept. of Law estimates that six individuals per year would be prosecuted and sentenced to death for first degree murder. Other states who have instituted the death penalty statute indicate that an individual convicted of a capital felony remains on death row for approximately ten years before execution. Using this estimate the Department of Corrections (DOC) would be required to construct a death row facility capable of housing 60 inmates. The death row facility would require construction that is of the highest security standards. The cost of this type of facility is estimated at \$180,000.00 per bed. The DOC does not expect to house prisoners until the year FY02. Engineering and design (E&D) would begin in FY00. The costs for E&D would be transferred to DOT & PF via an RSA. These costs are estimated to be 15% of the total cost of construction.
4. The DOC would be required to construct an execution facility for administration of the penalty. Special technology and hardware would be required for this portion of the construction. The cost of this facility is estimated to be in excess of \$300,000.00 assuming it would be built in conjunction with the death row facility.
5. The DOC would not house death row inmates until FY02. A Facilities Manager I position is required to manage the DOC responsibilities in the planning and design phase. This position would begin in FY00 and remain in place until completion of the project in FY02. The cost of this position is \$68.4 per year.
6. Actual operation of the death row facility would begin in FY02, with staff hiring and training to begin in FY01. This cost is estimated to be \$350,000.00. Staffing of the new facility would require twenty-five correctional officers, and five administrative support staff. The average daily cost of housing an inmate is \$105.27 and is shown in the miscellaneous line.

Construction Costs

60 bed death row X \$180,000 per bed + \$300,000 execution facility = \$11,100,000.00

.15 X \$11,100,000 = \$1,665,000 for E&D in FY00

\$11,100,000 total cost - \$1,665,000 E&D = \$9,435,000 for facility completion in FY01

Operating Costs

60 beds X \$105.27 per day X 365 days = \$2,305,413 in FY02 and continuing into the future.

ANALYSIS: (Attach a separate page if necessary)

This figure includes the cost of providing information about this issue in the Official Election Pamphlet as required by AS 15.58, and the programming costs for counting votes cast on the measure. However, only four measures can be printed on a single ballot card. If this measure requires printing an additional ballot card, the costs will increase by \$56.0.

INSERT:

"An Act directing an advisory vote on whether the Alaska State Legislature should provide by law for life imprisonment without possibility of parole for the crime of murder in the first degree or provide by law for the death penalty for the crime of murder in the first degree or retain the existing penalty for the crime of murder in the first degree."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*Section 1. ADVISORY VOTE AUTHORIZED. The lieutenant governor shall place before the qualified voters of the state at the next statewide general election the question advisory to the legislature of whether the legislature should provide by law for life imprisonment without the possibility of parole for the crime of murder in the first degree, whether the legislature should provide by law for the death penalty for the crime of murder in the first degree, or whether the legislature should retain the existing penalty for the crime of murder in the first degree. The question shall appear on the ballot in substantially the following form:

QUESTION

Which one of the following alternatives should the legislature provide by law for the crime of murder in the first degree?

- [] Life imprisonment without possibility of parole
- [] Death penalty
- [] Retain the 20-99 year sentence in current law

I oppose Senate Bill 60, which calls for an advisory vote on the death penalty because I can think of no public issue for which an advisory vote is less appropriate, unless your concern is purely about the politics of the matter. I oppose the bill also because I believe it to be a strategic move, designed to move Alaska closer to reinstatement of the death penalty. I have had more than forty years experience in the criminal justice field, and quite a lot of personal contact with extremely brutal murderers. My advice to you is 'don't do it; don't move our state any closer to reinstating the death penalty.' Base my objection on eight primary factors.

(1.) The death penalty may make our community less safe from brutal crime: In 1969 Glenn Pierce and William Bowers, both of them criminologists at Northeastern University, published a report on their comprehensive study of the death penalty in New York State from 1907 to 1964. 692 executions were carried out during this 57 year period. During these 57 years, each of the months in which one or more executions were carried out, was followed by an average increase of two additional homicides. As a result of these numbers and other disturbing particulars arising from their study, Dr. Pierce and Dr. Bowers had no choice other than postulate that publicized executions, rather than having a deterrent effect, are inclined to incite persons who are predisposed to violent crime. My own experience, especially with pathologically violent individuals, causes me to suspect that this phenomenon might be true.

(2.) Capriciousness: It is highly unlikely that the one person executed out of each 200 convicted of murder is the one who committed the most heinous, brutal murder. (Actually, one execution for every 1,600 murders committed.) Decisions to proceed with death penalty prosecution depend on other considerations. Those who argue that the death penalty is needed in order to exact "retribution" should be reminded that retribution does not necessarily fall on those who deserve it most. They should also be reminded of what the Bible has to say about *vengeance*.

And while we are speaking of the Bible those who would like to justify the death penalty on the basis on Holy Scripture, need to ask themselves why it is that the Alaska Christian Conference, the National Council of Churches, every major Protestant denomination save one, the Roman Catholic Bishops, the Quakers, the Mennonites, the American Jewish Committee, all condemn the death penalty.

(3.) Destructive effect of the death penalty on the families of victims: In states where the death penalty is imposed, the offender will remain on death row anywhere from five to twenty years (an average of 11 yrs. 2 mos. in 1996.) Like it or not, the requirements of *Gregg v. Georgia* make such delays inevitable. The families of victims, therefore, must undergo a cruel, embittering, oftentimes destructive experience, lasting many years. This is one of the reasons why *Murder Victim's Families for Reconciliation* is such a powerful and useful organization. In Alaska persons convicted of aggravated first-degree murder are typically given sentences that are the equivalent of life without parole. The appeal process that follows such a sentence is not protracted. Therefore, in Alaska, as in other non-death penalty states, the families of the victims can begin putting closure to their grief not long after the conviction.

(4.) Mistaken conviction (execution of the innocent): Who would deny this statement? Not every person executed in the U.S. during the life time of most of us was guilty of the crime for which he was convicted. Furthermore, even ardent proponents of the death penalty do not deny the probability- or certainly the possibility- that innocent persons are among the 3500 on death row across the country. Between 1973 and 1996 5900 persons were sentenced to death; 358 were executed during that period. About 3500 remain on death row, which means that about 2000 death penalty sentences have been commuted or set aside. If you wish, I can provide you with specific information on 58 inmates freed

from death row since 1976 because of strong evidence of innocence. The fact of the matter is that we simply do not know how many innocent people may have been executed, or are on death row today.

(5.) Bias against poor people and people of color: An offender is four times more likely to be executed for murder of a white person than for murder of an African-American. Of the 45 executions carried out in 1996 only 4 involved murder of an African-American victim. The U.S. population consists of 12% African-American, but African-American people are 41% of death row. Sophisticated proponents of the death penalty do a pretty good job of obfuscating these numbers, but persistent racial bias was one of the four principal reasons the American Bar Association's house of delegates, in February of this year, passed a resolution calling for a moratorium on the use of capital punishment. Bad legal representation was another problem cited by the ABA. An alarming proportion of the persons who are executed are poor people who cannot afford and do not have good legal representation during the initial trial phase. A team of good lawyers can make it very difficult to convict on a first degree murder charge, therefore rich people are rarely executed.

(6.) Deterrence: Especially since the Furman decision in 1973 there was an almost frantic effort to prove, empirically, that the prospect of the death penalty has a greater deterrent effect on potential murderers than the threat of long-term imprisonment. The overwhelming consensus among criminologists and other social scholars is that no such finding has been offered. Knowledgeable proponents of capital punishment no longer attempt to argue on the basis of a proven deterrent value. What they say is that the death penalty should be used, in the event it *does* have an, as yet unproven, deterrent effect. The problem with that idea is that perhaps the single most comprehensive study of the question of deterrence (referred to above) strongly suggests that the prospect of execution is more likely to *incite* than deter persons who are predisposed to violent crime.

(7.) The death penalty hampers effective prosecution and law enforcement: The excessive burden placed on law enforcement and on prosecutors' offices by death penalty prosecutions, prevent the best use of their resources. On the basis of what you will be told by experienced prosecutors in death penalty states, you will have to reach the conclusion that a certain number of guilty criminals are not apprehended or go free as a result of the death penalty?

(8.) Costs: The cost of the death penalty is from two to seven times more expensive than life imprisonment without parole. Efforts to deny this fact, on the part of the more ardent members of the pro-death penalty community, are not supported by cost analysts in those jurisdictions that have made significant use of the death penalty.

Reinstatement of the death penalty option would be a troublesome, expensive alteration to criminal justice policy in Alaska, unwanted by those who would be called on to use it. It would unnecessarily saddle us with problems we do not now have. It would serve no purpose, meet no needs, solve no problem, right no wrong, and would certainly not make our state any safer or the citizens of our state less inclined to violence.

BARBARA HOOD & DIRK SISSON
2413 Lord Baranof Drive
Anchorage, AK 99517

April 8, 1997

Senator Bert Sharp
Alaska State Senate
FAX 465-2070

Dear Senator:

Please vote against any effort to reinstate the death penalty in Alaska, including Senator Robin Taylor's current efforts to place an advisory ballot measure on next year's ballot. Senator Taylor has consistently minimized the true cost of a death penalty and has worked against current efforts in the House to inform the public of the costs. This is reprehensible in this day of budget-tightening. We are business people, and from a fiscal standpoint alone the death penalty is an expensive punishment that Alaska cannot afford. Is it really worth spending an additional \$50 million (at a minimum, according to the fiscal notes) on a practice that won't make us any safer, and will make all of us complicit in killing—the very conduct we condemn?

Thank you.

Sincerely,

Barbara J. Hood

Dirk A. Sisson *my 8/1*

Alaska State Legislature

Please enter into the record my testimony to the Senate Finance
 committee name
 committee on SB 60, dated 4/9/97
 bill/subject

- I oppose SB 60.

I do not want the Lt. Governor to put this question on the next election ballots because I deeply believe the Death Penalty is wrong. I definitely urge you to stay away from any further action dealing with Capital Punishment and I do not want to see any money spent to write the question and then print it on the ballots.

- When we see other countries torturing and executing people we cry "How Barbaric!" "How Uncivilized!" What gives us the right to judge or criticize these other countries or cultures when we remain so very barbaric ourselves in supporting capital punishment. The Death Penalty is wrong - it is killing - it does not deter violence. And my question for you is why do we kill people who kill people to show people that killing people is wrong? my plea for you is to not pass this bill.

Dear Editor,

At this time, a bill is on the floor in the State of Alaska House of Representatives to cut Medicaid, and completely eliminate medicaid benefits for Substance Abuse Treatment. This is a smoke screen, said to be saving us money, but in the long run, the costs greatly outweigh any savings we will ever realize.

Several years ago, the State of Alaska invested in auxiliary benefits so that treatment for alcohol and drug abuse could be obtained for those with low incomes. This allows folks to get treatment before they require inpatient treatment or hospitalization. This investment will be forfeited when the pending cuts are made, and the costs associated with treating these problems will far outweigh the savings the proposed cuts would provide.

For example, according to the California Department of Alcohol and Drug Programs (1994), for every dollar spent on substance abuse treatment, we save seven dollars elsewhere in the social system. Considering the medical consequences of alcoholism and drug abuse, this just plain makes sense. If we invest \$1000.00 in treatment for an individual, we save \$7000.00 in hospital costs, education costs, public assistance payments, etc., elsewhere in the system. Take our education system for example:

The State of Alaska has one of the highest fetal alcohol syndrome (FAS) and Fetal Alcohol Effect (FAE) rates in the world, two times the national average. Left untreated, drug and alcohol problems lead to lead to FAS/FAE and other postnatal drug effects. These are preventable through drug and alcohol treatment. We call the untreated results "million dollar babies", treated at a hospital level throughout life, requiring special learning programs, attention, and care in the educational system. The postnatal effects are covered by the current social system, as are the medical complications that result from addiction. I am advocating for reducing the need to pay for these services by providing treatment.

What about the effect on public assistance, you say? Our local Department of Public Assistance estimates that as many as 40% of those collecting welfare benefits have "drugs or alcohol" as a barrier to getting back to work. If we eliminate the treatment option for these folks, we are setting them up for failure when welfare reforms take effect July 1st of this year. We have become a nation of enabler's, paying people to remain addicted and not requiring and facilitating recovery. I would like to see the welfare reforms work, but I fear that without treatment the 40% mentioned above will sabotage the reform efforts, costing us more tax dollars.

Finally, the amount of money we are talking about here is about 1.5 million dollars. (To draw a comparison, the amount collected from permanent fund checks to pay medicaid for the month that Alaskans on public assistance get their permanent fund checks is 22.5 million.) The substance abuse treatment amount is a very small price to pay for safer streets, better schools, and a more functional community!

Treatment works, and it makes sense. Please contact your local representative and let them know that you would like to see the prevention measures remain in place through Medicaid treatment provisions.

Re: Senate Bill 60 -- Advisory Vote on Capital Punishment

Dear Senator Taylor:

This is in response to questions you posed during my testimony in the Senate Judiciary Committee on Senate Bill 60, providing for an advisory vote to return capital punishment to Alaska after an absence of some 40 years. In particular, you questioned my statement that the death penalty has a disproportionate impact on minorities, and you referred me to an article that you had just received, published in *Texas Lawyer* magazine. The article was dated March 10, 1997, the date of my testimony.

The article in *Texas Lawyer* pointed out that blacks have constituted 38% of those executed in the last 20 years, or more than three times their percentage in the United States population. This is an obvious over-representation of minorities on death row, although you pointed out during the hearing that you believed this disproportionate impact may be explainable by other statistics.

You asked whether I had any data showing what percentage of murders are committed by blacks, because by knowing that percentage one might better attempt to understand why so many blacks are on death row. You again cited the article in *Texas Lawyer*, indicating that blacks commit a disproportionately high percentage of murders.

I have seen other research indicating that blacks do indeed commit a much higher percentage of murders than the percentage they represent in the general population. Assuming these figures are accurate, it suggests that a black who commits murder is no more likely to receive a death sentence than a white who commits murder. But that, in my opinion, is not the end of the analysis and does not permit us to say there is not a disproportionate impact on minorities.

I do not believe that any of us understand precisely *why* blacks commit such a high percentage of murders. But perhaps we can narrow it down to two primary choices. Either:

(1) blacks are racially, genetically or somehow inherently prone to commit murder -- a proposition so preposterous that it is painful to even articulate;
or

(2) murders often result from a complex interaction of factors affecting many minority populations in the United States, such as poverty, lack of education, lack of employment opportunities, ease of access to drugs, breakdown of family and community structures, lack of self-esteem and hopelessness.

I believe the same social factors affecting blacks in the rest of the United States also contribute to the over-representation of Native Alaskans in the Alaska prison system and could easily lead to their over-representation on death row in our state.

I do not mean to suggest that persons who commit crimes should not be punished. I believe they should be punished, regardless of social factors that may have disposed a particular individual to commit his or her crime, and I support the tough sentencing structure in Alaska. I am suggesting, however, that no matter what statistics are analyzed, certain minorities are condemned to death at a far greater rate than their percentage in the population. Because I believe that factors within our society contribute to that disparity, until that disparity disappears we cannot claim the moral right to inflict the ultimate punishment that society can impose.

A second, more subtle, form of discrimination is the difference in the way death penalty defendants are treated depending on the race of the *victim*. The

Texas Lawyer article acknowledged that, although whites and blacks comprise an equal percentage of all murder victims, in cases in which the death penalty is imposed the victim is almost always white.

The author of the article explained this significant racial disparity by the rather simplistic argument that "[a] crucial point is that capital murders and non-capital murders are two very distinct categories." The author noted that capital murder cases are more aggravated than other murder cases, and the perpetrator usually has a longer criminal record, and concluded that the race of the victim was therefore irrelevant.

The fact that the victims in death penalty cases are almost always white, however, leads me to one of two possible conclusions. Either:

(1) whites belong to the unluckiest of races to be so often subject to aggravated murders by persons with long criminal records; or

(2) prosecutors, jurors, and judges in other states are more likely to view the murder of a white person as an aggravated offense, compared to the murder of a black person.

If the race of the victim were indeed irrelevant, as the author of the article claims, then whites who murder blacks, and blacks who murder whites, should receive the death penalty at about the same rate. That is not the case, however. A comprehensive study in Georgia in 1991 found that blacks who kill whites are four times more likely to be sentenced to death than whites who kill blacks. This disparity held, even when over 250 other variables were factored in. A study of sentencing patterns in Texas showed that when an African-American or a Mexican-American killed a white, 65% of the defendants faced the death penalty, whereas whites who killed African or Mexican-Americans faced the death penalty only 25% of the time. These data also show that a black who kills a white person is more likely to face the death penalty than a black who kills a black.

As indicated in previous testimony, there is little or no evidence to believe that the threat of the death penalty deters people from committing murders and protects the public. If one believes such a deterrent effect exists, then one could

also reach the conclusion that it only deters those who might murder white victims, and does little to deter those who murder blacks. In other words, assuming the death penalty protects the public, it is not the minority population being protected.

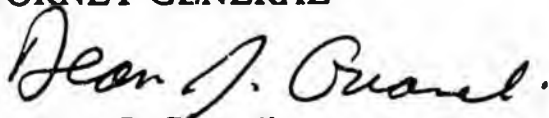

Based on the foregoing, I continue to stand by my testimony that the way in which capital punishment is administered has a disproportionate impact toward minorities -- both defendants and victims. As I indicated during my testimony, however, among the other reasons for opposing capital punishment are that our system is not perfect, thus running the risk of executing innocent people; that capital punishment tends to skew the case law that affects other criminal cases; and that the legal process leading to an execution is a lengthy and expensive one, that does not allow the families of victims to bring the matter to closure for many years. I believe that the present sentencing practices in Alaska, whereby first degree murderers routinely receive lengthy sentences averaging over 70 years, adequately protects the public.

As a final matter, you requested a citation to an article in the Stanford Law Review relating to innocent persons being executed. Charles Campbell tells me that the article is Badeau and Radelet, *Miscarriage of Justice in Potentially Capital Cases*, 40 Stanford Law Review 21 (1987),

Thank you for the opportunity to respond to your questions. As usual, I appreciated your courtesy during the committee hearing.

Very truly yours,

BRUCE M. BOTELHO
ATTORNEY GENERAL
