Fiscal Note for HCS CSSB 289 (FIN) am
Short Title: Technical and Vocational Education
4/25/2000

SB 289 realigns oversight and planning for vocational and technical education in Alaska. Additionally, the bill establishes a new supplementary grant program funded by employee Unemployment Insurance (UI) contributions.

Specifically, section AS 23.15.835 of SB 289 identifies the Department of Labor and Workforce Development as the entity that will collect from each employee an amount equal to one-tenth of one percent of the wages as set out in AS 23.20.175, on which the employee is required to make contributions under AS 23.20.290(c). The bill's effective date is July 1, 2000. In FY2001, the first year, collections are expected to be \$3,225,000. This is due to the lag in collections where revenues come in 30 days after the end of the calendar quarter. Therefore, the collections would occur for the quarters ending in September, December, and March. In FY2002 and subsequent years, \$4,300,000 in revenues is expected on an annual basis. The program is to be administered by the Alaska Human Resource Investment Council (AHRIC).

The UI program in the Employment Security Division of the Department of Labor and Workforce Development has an existing UI tax unit which collects Unemployment Insurance tax from Alaskan employers and workers. This tax unit and the infrastructure that currently exists to collect taxes from employers will be utilized to collect the new funds under SB 289. The collection process is expected to be almost identical to the existing system required for the State Training and Employment Program (STEP). The STEP funds are collected from workers through employers in addition to those collected for UI. The STEP currently pays for their fair and reasonable share of the process costs as established by a federally negotiated shared cost agreement. This is required since the UI program operations are exclusively funded by federal dollars and cannot contribute to non-federal program activities. It is expected the same will be required for SB 289. The estimated cost related to the collection and accounting of SB 289 funds will be \$200,000.

Historically, the annual cost of collection for the STEP program has ranged from \$250,000 to \$280,000. With the implementation of SB 289, the full cost is expected to be approximately \$300,000. SB 289's portion would be approximately one-half or \$150,000, based on the prorated share of anticipated collections for both STEP and SB 289.

Attachment CS SB 289(FIN)

The current Statewide Employment Program, (STEP - AS 23.15) is funded with the inclusion of this SB 289 fiscal note.

This fiscal note for STEP matches the Governor's FY 01 amended request.

The new Alaska Technical and Vocational Education Program (ATV - AS 23.15 Article 7) is funded with the inclusion of this SB 289 fiscal note.

The fiscal note for ATV reflects a 2/10ths of one percent employee credit in a manner similar to that which is currently applied for the STEP program. It is estimated that in FY 2001, additional contributions to establish this account will total \$6,450,000. In subsequent years it is estimated that \$8,600,000 will be collected annually. This fiscal note addresses FY01. FY02-06 will be addressed by the administrative board for the new program.

The first year will be \$6,450,000 in the following percentage:

University of Alaska	76% = 4,902,000
Kotzebue Technical Center	8% = 516,000
Alaska Vocational Technical Center	16% = \$1,032,000

HOUSE CS FOR CS FOR SENATE BILL NO. 289(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-FIRST LEGISLATURE - SECOND SESSION

BY THE HOUSE FINANCE COMMITTEE

Offered:
Referred:

Sponsor(s): SENATE FINANCE COMMITTEE

A BILL

FOR AN ACT ENTITLED

1 "An Act relating to technical and vocational education and to employment
2 assistance and training; and providing for an effective date."

3 BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

4 * Section 1. The uncodified law of the State of Alaska is amended by adding a new
5 section to read:

6 LEGISLATIVE INTENT; REPORT TO THE LEGISLATURE. (a) It is the intent of
7 the legislature that the Alaska Human Resource Investment Council undergo an internal
8 reassessment and reorganization to minimize the number of members of the council and to
9 improve its ability to efficiently and effectively serve as the state's primary planning and
10 coordinating entity for vocational and technical education.

11 (b) The Alaska Human Resource Investment Council shall report to the legislature by
12 the 15th legislative day of the First Regular Session of the Twenty-Second Alaska State
13 Legislature on the

14 (1) reorganization undertaken to accomplish the goals identified in (a) of this

1 section; and

2 (2) development of regulations and guidelines for implementation of the grant
3 programs for which it is responsible.

4 * Sec. 2. AS 23.15.640 is amended by adding new subsections to read:

5 (b) A granting entity may award a grant that includes a program element listed
6 in (a)(4), (a)(5), or (a)(6) of this section only if all funds from other assistance or aid
7 programs or grants for that purpose are either not available to the granting entity or
8 have been exhausted.

9 (c) The department shall, to the extent economically feasible for the individual,
10 require an individual who participated in a program that was funded at least in part by
11 a grant under AS 23.15.651 and that included as a program element the provision of
12 necessary tools, work-related clothing, safety gear, or other necessities to obtain or
13 retain employment under (a)(6) of this section to reimburse the department for the
14 portion of the grant that was spent on an element listed in (a)(6) of this section. The
15 department shall separately account for receipts under this subsection. The annual
16 estimated receipts may be used by the legislature to make appropriations to the
17 department to the employment assistance and training program account (AS 23.15.625)
18 for grants under AS 23.15.651. The department shall implement this subsection by
19 regulation.

20 (d) In this section, a support service under (a)(4) of this section means a
21 service provided to an individual participating in a training program described in (a)(1)
22 - (3) of this section to enable the individual to participate in the training.

23 * Sec. 3. AS 23.15 is amended by adding new sections to read:

24 **Article 7. Alaska Technical and Vocational Education.**

25 **Sec. 23.15.820. Powers and duties of the Alaska Human Resource**
26 **Investment Council.** (a) The Alaska Human Resource Investment Council shall

27 (1) administer the Alaska technical and vocational education program
28 established in AS 23.15.820 - 23.15.850;

29 (2) facilitate the development of a statewide policy for a coordinated
30 and effective technical and vocational education training system in this state and, to
31 the extent authorized by federal and state law, plan and coordinate federal, state, and

1 local efforts in technical and vocational education programs;

2 (3) adopt regulations under AS 44.62 (Administrative Procedure Act)
3 to carry out the purposes of AS 23.15.820 - 23.15.850, including regulations that set
4 standards for the percentage of a grant that may be used for administrative costs; the
5 regulations must clearly identify and distinguish between expenses that may be
6 included in administrative costs and those that may not be included in administrative
7 costs; the percentage allowed for administrative costs may not exceed the lesser of five
8 percent or the amount permitted under the requirements of a federal program, if
9 applicable;

10 (4) administer the grant program under AS 23.15.840 and establish
11 grant administration requirements including accounting procedures that apply to
12 qualified entities and their grantees.

13 (b) The council may

14 (1) receive money designated for technical and vocational education
15 programs and may disburse money, including grants, to technical and vocational
16 education projects in accordance with AS 37.07 (Executive Budget Act);

17 (2) enter into partnership agreements through appropriate administrative
18 agencies with private industry training entities within the state in order to facilitate the
19 coordination of training opportunities; and

20 (3) recommend to the legislature changes to enhance the effectiveness
21 of the training programs it oversees under this section.

22 **Sec. 23.15.830. Alaska technical and vocational education program**
23 **account.** The Alaska technical and vocational education program account is
24 established in the general fund. The commissioner of administration shall separately
25 account for money collected under AS 23.15.835 that the department deposits in the
26 general fund. The legislature may appropriate the annual estimated balance in the
27 account to the council to implement AS 23.15.820 - 23.15.850. The legislature may
28 appropriate the lapsing balance of the account to the unemployment compensation fund
29 established in AS 23.20.130.

30 **Sec. 23.15.835. Special employee unemployment contributions for program.**

31 (a) In the manner provided in AS 23.20, the department shall collect from each

1 employee an amount equal to one-tenth of one percent of the wages, as set out in
2 AS 23.20.175, on which the employee is required to make contributions under
3 AS 23.20.290(d). The department shall remit to the Department of Revenue, in
4 accordance with AS 37.10.050, money collected under this subsection.

5 (b) Notwithstanding AS 23.20.290(d), the department shall credit each
6 employee with an amount equal to the amount collected from the employee under (a)
7 of this section against unemployment contributions owed by the employee under
8 AS 23.20.

9 (c) The Department of Labor and Workforce Development shall assess and
10 collect, under AS 23.20.185 - 23.20.275, interest and penalties for delinquent reports
11 and payments due under this section. Interest and penalties collected shall be handled
12 in accordance with AS 23.20.130(d).

13 **Sec. 23.15.840. Grants for technical and vocational education.** (a) The
14 council shall award grants, in accordance with the priority list adopted under (f) of this
15 section, to technical and vocational education entities. A technical and vocational
16 entity is eligible for a grant under this section if the entity meets program
17 requirements, the grant program is physically located in Alaska, and the entity can
18 demonstrate that

19 (1) the entity's accounting systems include controls adequate to check
20 the accuracy and reliability of accounting data, promote operating efficiency, and
21 assure compliance with program requirements and generally accepted accounting
22 principles;

23 (2) the entity's activities do not replace or compete in any way with a
24 federally approved, jointly administered apprenticeship program or any other existing
25 training programs; and

26 (3) the entity has secured matching funds for the program for which the
27 grant is requested.

28 (b) The council may not award a grant if the grant would displace money
29 available through existing public or private technical and vocational education
30 programs.

31 (c) Subject to the limits of its grant, an entity receiving a grant under this

1 section shall provide one or more program elements. The program elements include

2 (1) industry-specific training;

3 (2) on-the-job training; and

4 (3) institutional or classroom job-linked training.

5 (d) A technical or vocational educational institution that receives a grant from
6 the council shall give appropriate state agencies full access to accounting records
7 concerning the grant to assure compliance with program standards.

8 (e) In making a grant under this section, the council shall require that the
9 qualified entity and grantees of the qualified entity limit the amount of the grant
10 proceeds spent on administration so that the total spent on administration from the
11 proceeds of the technical and vocational education program account, including amounts
12 spent by the council itself, does not exceed five percent. A training program funded
13 by the council must

14 (1) meet the standards adopted by the council concerning the
15 percentage of a grant that may be spent on administrative costs;

16 (2) be operated by an institution that holds a valid authorization to
17 operate issued under AS 14.48 if the program is a postsecondary educational program
18 operated by a postsecondary educational institution subject to regulation under
19 AS 14.48.

20 (f) To the extent that funding is available, grants shall be awarded to entities
21 that apply for funding by the deadline established by the council by regulation. The
22 council shall give priority to grant applications from qualified entities whose purpose
23 is listed first on the list of priorities adopted under this subsection. If money remains
24 after grants for the first priority have been awarded, the council may make grants to
25 entities whose purpose is listed next on the list of priorities. The council shall proceed
26 in this fashion until it has exhausted the money available for granting for the year.
27 The council shall adopt a priority list each year based on economic, employment, and
28 other relevant data in order to maximize employment opportunities for participants.

29 **Sec. 23.15.850. Definitions.** In AS 23.15.820 - 23.15.850,

30 (1) "council" means the Alaska Human Resource Investment Council;

31 (2) "program" means the Alaska technical and vocational education

1 program established in AS 23.15.820 - 23.15.850.

2 * Sec. 4. The uncodified law of the State of Alaska is amended by adding a new section
3 to read:

4 PROVISIONS FOR FIRST-YEAR OPERATION. Notwithstanding AS 23.15.840(a),
5 enacted by sec. 3 of this Act, for the fiscal year ending June 30, 2001, the money collected
6 under AS 23.15.835, enacted by sec. 3 of this Act, or otherwise appropriated to the Alaska
7 Human Resource Investment Council shall be allocated directly in the following percentages
8 to the following institutions for programs consistent with AS 23.15.820 - 23.15.850; enacted
9 by sec. 3 of this Act, and capital improvements:

10	University of Alaska	52 percent
11	Kotzebue Technical Center	16 percent
12	Alaska Vocational Technical Center	32 percent.

13 * Sec. 5. This Act takes effect July 1, 2000.

Attachment CS SB 289(FIN)

The current Statewide Employment Program, (STEP - AS 23.15) is funded with the inclusion of this SB 289 fiscal note.

This fiscal note for STEP matches the Governor's FY 01 amended request.

The new Alaska Technical and Vocational Education Program (ATV - AS 23.15 Article 7) is funded with the inclusion of this SB 289 fiscal note.

The fiscal note for ATV reflects a 2/10ths of one percent employee credit in a manner similar to that which is currently applied for the STEP program. It is estimated that in FY 2001, additional contributions to establish this account will total \$6,450,000. In subsequent years it is estimated that \$8,600,000 will be collected annually. This fiscal note addresses FY01. FY02-06 will be addressed by the administrative board for the new program.

The first year will be \$6,450,000 in the following percentage:

University of Alaska	76% = 4,902,000
Kotzebue Technical Center	8% = 516,000
Alaska Vocational Technical Center	16% = \$1,032,000

Alaska State Senate

Senate Finance Committee

Official Business

Mail Stop 3100
State Capitol
Juneau, Alaska 99801-1182

SB 289 Questions and Answers

(4-12-00)

1. What training entities are affected by this bill?

The first year of the program, funds will go to the University of Alaska, the Kotzebue Technical Center, and the Alaska Vocational and Technical Center in Seward. The University of Alaska campuses that provide vocational and technical education are:

Anchorage Technical & Community College	Bethel
Dillingham	Ketchikan
Kenai Peninsula (Kenai/Soldotna & Homer)	Kodiak
Kotzebue ¹	Mat-Su (Palmer)
Nome	Sitka
Tanana Valley ²	Valdez

The first year revenues (about \$6.4 million) are directed to those specific entities because the AHRIC will not have had the opportunity to formulate regulations to solicit grant applications. Those funds are directed to the University of Alaska (76% = \$4.902 million), Kotzebue Technical Center (8% = \$516,000) and Alaska Vocational Technical Center (16% = \$1.032 million).

Grants after the first year will be awarded according to regulations developed by the Alaska Human Resource Investment Council (AHRIC). The revenue from this source is expected to be about \$8.6 million annually. Entities eligible to receive grants are those that are authorized by and are physically located in the State of Alaska. Recipients are not restricted to only the public education institutions.

The AHRIC may only award grants to entities that have sufficient accounting systems, that have secured private sector contribution commitments for matching purposes, and who's grant application purpose is listed first on the list of priorities adopted by the AHRIC. The AHRIC will adopt a priority list each year based on economic, employment, and other relevant data in order to maximize employment opportunities for participants.

¹ Through Kotzebue Technical Center

² In coordination with the Hutchison Career Center

2. How does the bill affect the AHRIC?

This bill affects the AHRIC (Alaska Human Resource Investment Council) in three areas. First, it makes AHRIC the responsible board for the new program. AHRIC is charged with the task of promulgating guidelines, which must be submitted to the next legislature by the 15th day of the session.

AHRIC is also charged with the task of conducting an internal reassessment and reorganization to minimize the number of members of the council and to improve its ability to efficiently and effectively serve as the state's primary planning and coordinating entity for vocational and technical education. They must also submit a report on that task to the next legislature by the 15th day of the session.

3. How does this bill affect the Statewide Employment Program (STEP)?

There are six program elements of the STEP in current statute, shown below.

- (1) industry specific training
- (2) on-the-job training
- (3) institutional or classroom job-linked training
- (4) support services, including allowances
- (5) relocation assistance
- (6) provisions of necessary tools, work related clothing, safety gear, or other necessities to obtain or retain employment.

The bill adds clarifying language on three of those program elements: (4) support services, including allowances, (5) relocation assistance and (6) provisions of necessary tools, etc.. The new language requires that grants for those purposes may be awarded only if funds from other assistance programs or grants are either not available or have been exhausted.

The bill also provides a definition for support services, now defined as a service to an individual that will enable the individual to participate in program elements (1) industry specific, (2) on-the-job, or (3) institutional or classroom job-linked training. In other words, support services can not be provided except to an individual for training under program elements (1) through (3).

Finally, when economically feasible, the individual will be required to reimburse the STEP for tools, work-related clothing, safety gear, or other similar items acquired under program element (6). The department will separately account for those reimbursements and the amounts may be used to make appropriations to the STEP account.

The intent is to have an individual, who is economically able, reimburse the program when they have obtained employment through the STEP program. Those monies can then be provided to other individuals.

Attachment #1

Current STEP & New ATV Program Funding SB 289

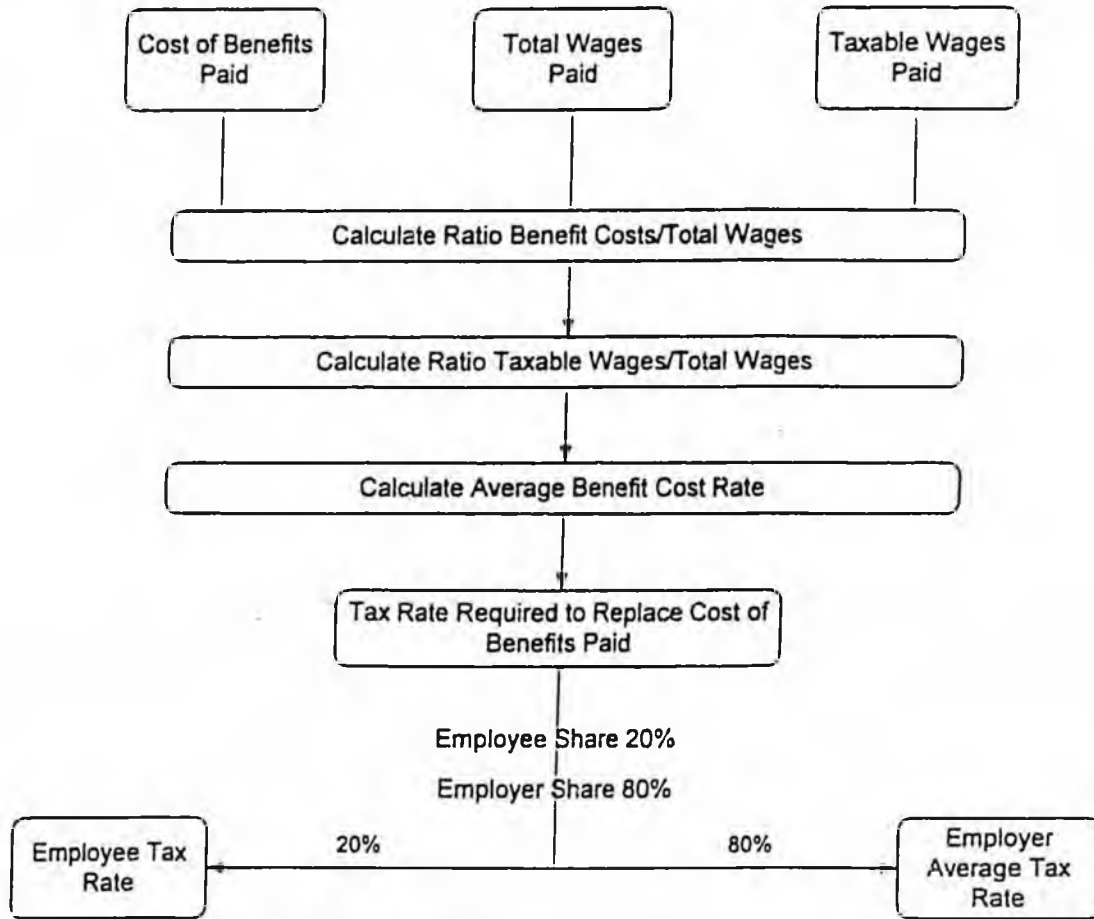

*NOTE: This structure is a diversion from the trust fund and does not affect the employee UI Tax rate. If the trust fund balance requires a solvency adjustment, employer contributions are affected - see Attachment #2.

STEP Program Funding

0.1% of Employee Tax is diverted to the STEP program

Alaska UI Tax Calculation

A step by step walk through the UI tax calculation process, with citations from the Law, and an explanation of each calculation. The calculation of the 2000 tax rates is used as the example.

UI Tax Rate Calculation Procedures, 2000

There are three major steps to the calculation of UI tax rates, with several substeps.

Step 1. Calculation of the Average 3-year Benefit Cost Rate (ABCR).

Step 2. Calculation of the Trust Fund Solvency Adjustment.

Step 3. Calculation of employer and employee tax rates.

This explanation of the tax rate calculation may be clearer if you follow the actual calculations from the Tax Rate Calculation Worksheet and the Tax Base Calculation Worksheet. The "Line" references below refer to the Rate Calculation Worksheet. We suggest that you print a copy of the worksheets, and follow along through this detailed explanation of the tax rate calculation process.

Step 1. Calculation of Average Benefit Cost Rate (ABCR)

Step 1a. (Benefit Costs)

The Law:

AS 23.20.290(e) The department shall determine the average benefit cost rate as follows:

- (1) the department shall determine the amount of benefits paid to insured workers during the last three computation years;
- (2) the department shall subtract from the amount determined in (1) of this subsection the amount of any benefits reimbursed to the fund and the amount of interest earned on the trust fund balance during those computation years;

Translation:

Calculate the amount of benefits paid to employees of taxable employers, minus interest earned on the fund balance, for the past three years. The result is benefits costs.

Calculation:

\$ 100,104,207 -- SFY 97

\$ 99,378,442 -- SFY 98

\$ 102,092,954 -- SFY 99

\$ 301,575,603 -- Line 4

Step 1b. (Total Wages & Ratio of Benefit Costs to Total Wages)

The Law:

(3) the department shall divide the amount determined in (2) of this subsection by the total wages paid by all employers required to pay contributions under this chapter during the first three of the last four computation years;

Translation:

Calculate the amount of wages paid to employees of taxable employers during the first three of the past four years, then divide the result into the benefits paid as calculated in Step 1a. The result is the ratio of benefit costs to total wages.

Calculation:

\$ 5,682,267,480 -- SFY 96

\$ 5,783,006,707 -- SFY 97

\$ 6,124,912,128 -- SFY 98

\$ 17,590,186,315 -- Line 5

\$ 301,575,603 / \$ 17,590,186,315 = 0.017145 -- Line 6

Step 1c. (Taxable Wages)

The Law:

(4) the department shall determine the amount of total wages subject to contributions under this chapter paid during the preceding computation year;

Translation:

Calculate the amount of taxable wages paid in the past year.

Calculation:

\$ 4,038,792,490 -- Line 3

Step 1d. (Total Wages of Taxable Employers)

The Law:

(5) the department shall determine the amount of all wages paid insured workers during the preceding computation year;

(6) the department shall subtract from the amount determined in (5) of this subsection the amount of wages paid during the preceding year by employers who elect to reimburse the department under AS23.30.276 and 23.20.277;

Translation:

Calculate the amount of wages paid to employees of taxable employers in the past year; this is same wage series used in the step 1.b calculation above, just a differently worded definition.

Calculation:

\$ 6,309,309,628 -- Line 2

Step 1e. (Ratio of Taxable Wages to Total Wages)

The Law:

(7) the department shall divide the amount in (4) of this subsection by the amount determined in (6) of this subsection; and

Translation:

Calculate the ratio of taxable wages (from Step 1c) to total wages (Step 1d).

Calculation:

\$ 4,038,792,490 / \$ 6,309,309,628 = 0.640132 -- Line 7

Step 1f. (Average Benefit Cost Rate)

The Law:

(8) the department shall divide the amount determined in (3) of this subsection by the amount determined in (7) of this subsection.

Translation:

Calculate the final Average Benefit Cost Rate (ABCR) by dividing the ratio of benefit costs to total wages (from Step 1b) by the ratio of taxable wages to total wages (from Step 1e).

Calculation:

0.017145 / 0.640132 = 0.026783 -- Line 8

Step 2. Calculation of the Trust Fund Solvency Adjustment

The Law:

AS 23.20.290(f):

An employer shall pay a fund solvency adjustment equal to the contribution rate set out in column B of the table in this subsection opposite the reserve rate of the fund set out in column A. However, the fund solvency adjustment rate of an employer may not increase or decrease more than three-tenths of one percent from one year to the next.

AS 23.20.310(7):

"reserve rate" means the ratio of the total amount available for benefits in the unemployment trust fund on September 30, immediately following the computation date, to the payroll of employers required to pay contributions under the provisions of AS 23.20.165 for the 12 consecutive calendar months ending on the computation date, expressed as a percentage.

Translation:

Calculate the reserve rate as the trust fund balance on September 30 divided by total wages as calculated in Step 1d above. Then compare to the TFSA table to get the TFSA. The TFSA can only increase or decrease by 0.003 each year.

Calculation:

$$\$199,789,331 / \$6,309,309,628 = 0.031666 \text{ -- Lines 9-11}$$

From TFSA table, the reserve rate is "at least 3.0% but less than 3.3%"
Therefore, the TFSA = -0.000% . (In 1999 TFSA was -0.1%.)

Step 3. Calculation of Rates for Employer Rate Classes, for Employees

The Law:

AS 23.20.290:

(c) Beginning January 1, 1997, the rate of contributions for each employer is 80 percent of the average benefit cost rate multiplied by the employer's experience factor set out in column C of the table in this subsection opposite the employer's applicable rate class set out in column A plus the fund solvency adjustment required under (f) of this section. However, the rate of contributions for an employer may not be less than one percent or more than six and one-half percent. The rate of contributions for an employer in rate class 21 may not be less than 5.4 percent. The rate of contributions for an employer must be rounded to the nearest 1/100th of one percent.

(d) Beginning January 1, 1997, and for each succeeding year thereafter, the rate of contributions payable by each employee of an employer who is subject to AS 23.20.165 is 20 percent of the average benefit cost rate as determined in (e) of this section rounded to the nearest 1/100th of one percent. However, the rate of contributions for an employee may not be less than one-half percent or more than one percent.

Translation:

Calculate the employer's share of the Average Benefit Cost Rate (ABCR) as 80%, and the employee's share as 20%. The employer's tax rate at each rate class is equal to 0.80 times the ABCR times the experience factor of the rate class plus the TFSA.

Calculation:

The employee tax is: (0.20 x 0.026783) = 0.54%

The average tax rate is: . . (0.80 x 0.026783 x 1.00) + .000 = 2.14%
(employers in rate)
(classes 10 and 11)

Notes:

1. Matrix reflects organizational type only for ACPE authorized and Alaska public institutions.
2. "Type" is listed as Vo-Tech for all programs leading to salable skills, and for all programs designed to improve job skills.
3. Accreditation is listed only if granted from an institutional accrediting agency approved by the United States Secretary of Education.
4. Information on exempt schools is the most recent on record; however, exempt schools are not required to notify this agency of changes.

MEMORANDUM

March 21, 2000

SUBJECT: Appropriation for railroad equipment for development of coal deposits in the Matanuska-Susitna Valley (Work Order No. 21-LS1571)

TO: Representative Scott Ogan

FROM: George Utermohle *GU*
Legislative Counsel

You have asked three questions regarding use of funds appropriated to the Alaska Railroad Corporation for the purchase of railroad equipment for the development of coal deposits in the Matanuska-Susitna Valley by sec. 145, ch. 208, SLA 1990, as amended by secs. 55 and 56, ch. 100, SLA 1997.

BACKGROUND. In 1990, the legislature made an appropriation of \$9,000,000 to the Alaska Railroad Corporation for the purchase of locomotives, rolling stock, and associated equipment costs. Sec. 145, ch. 208, SLA 1990. The Alaska Railroad has not expended any of the appropriation. The corporation has been holding the amount of the appropriation in an interest bearing account. In 1997, the legislature amended the purpose of the appropriation to provide that the money would be used to purchase railroad equipment for the development of coal deposits in the Matanuska-Susitna Valley. Sec. 55, ch. 100, SLA 1997. Also, in 1997 the legislature appropriated interest that the corporation had received on the original appropriation back to the corporation for the purchase of railroad equipment for the development of coal deposits in the Matanuska-Susitna Valley. Sec. 56, ch. 100, SLA 1997. A portion of the interest that was appropriated to the corporation by Sec. 56, ch. 100, SLA 1997 was reappropriated in 1999 as a grant to the Matanuska-Susitna Borough. Sec. 40(b), ch. 2, FSSLA 1999.

The appropriations made to the Alaska Railroad Corporation by sec. 145, ch. 208, SLA 1990, as amended by secs. 55 and 56, ch. 100, SLA 1997, currently state:

(a) The sum of \$9,000,000 is appropriated from the Railbelt energy fund (AS 37.05.520) in the general fund to the Alaska Railroad Corporation for the purchase of locomotives, rolling stock, and associated equipment costs for the development of coal deposits in the Matanuska-Susitna Valley.

(b) The interest and income earned since July 11, 1990, on the sum appropriated by (a) of this section is appropriated from proceeds received by the Alaska Railroad corporation from the investment or deposit of the sum

Representative Scott Ogan
March 22, 2000
Page 2

appropriated by (a) of this section to the Alaska Railroad Corporation for the purchase of locomotives, rolling stock, and associated equipment costs for the development of coal deposits in the Matanuska-Susitna Valley.

ONE: May the funds appropriated by sec. 145, ch. 208, SLA 1990, as amended, be expended?

According to the information that you provided there is only a very preliminary and speculative prospect of development of the coal deposits in the Matanuska-Susitna Valley and that, if locomotives and rolling stock were purchased with the appropriation, the equipment would be used to carry coal from Healy.

The legislature made it clear that the appropriated funds were to be used for the development of coal deposits in the Matanuska-Susitna Valley when it amended the appropriation in 1997. Prior to 1997, the appropriation under its own terms was available to purchase locomotives, rolling stock, and associated equipment for any purpose for use in any part of the state served by the railroad. By amending the original appropriation and by appropriating interest on the original appropriation to restrict the use of those funds to the purchase of certain railroad equipment for the development of coal deposits in the Matanuska-Susitna Valley, the legislature intended that the money would only be used to purchase railroad equipment for that purpose.

Unless the appropriated funds are expended for the purchase of locomotives, rolling stock, or associated equipment costs for the development of coal deposits in the Matanuska-Susitna Valley, the funds may not be expended.

If the development of coal deposits in the Matanuska-Susitna Valley is not likely in the foreseeable future, the funds, including the interest earned on the original appropriation, should either be reappropriated or returned to the Railbelt energy fund.

TWO: May the funds be expended to construct a rail spur to the Point Mackenzie Port?

The appropriations at issue here were made for the purchase of locomotives, rolling stock, and associated equipment costs. The construction of a railroad spur, regardless of whether the spur is associated with the development of coal deposits in the Matanuska-Susitna Valley, does not fit within the purpose of the appropriations. A railroad spur is an extension of the road bed and track of the railroad. A railroad spur is distinctly different from a locomotive or a piece of rolling stock. Also, the costs of constructing a railroad spur are not "associated equipment costs" under the terms of the appropriations. Associated equipment costs are those costs related to the purchase of the locomotives and rolling stock and may include equipment reasonably related to the locomotives and rolling stock that is purchased.

Without amending the purposes for which the appropriations were made, the appropriated funds may not be used to construct a railroad spur. The appropriations are for the purchase of locomotives and rolling stock and not the extension of railroad lines.

Representative Scott Ogan
March 22, 2000
Page 3

THREE: May the Alaska Railroad Corporation use the funds appropriated for the purchase of locomotives, rolling stock, and associated equipment costs to build a spur to Point Mackenzie Port, if it agrees to repay the funds if the development of coal deposits in the Matanuska-Susitna Valley does not occur within a certain period of time?

The funds appropriated by sec. 145, ch. 208, SLA 1990, as amended, were appropriated for the purchase of locomotives, rolling stock, and associated equipment costs. The money may not be expended for any other purpose. The funds may not be redirected to any other purpose, regardless of whether the corporation intends to repay the money. The funds must be reappropriated by the legislature before they may be used for any purpose other than that expressly and unequivocally stated in the appropriations -- the purchase of locomotives, rolling stock, and associated equipment costs for the development of coal deposits in the Matanuska-Susitna Valley.

If I may be of further assistance, please advise.

 27 appropriation made in sec. 21, ch. 79, SLA 1993, page 105, lines 29 - 31 (Badger flood
 28 control and drainage - \$750,000) is reappropriated to the Department of Administration for
 29 payment as a grant under AS 37.05.316 to the following recipients for the purposes and in the
 30 amounts stated:

31 RECIPIENT AND PURPOSE GRANT AMOUNT

sum of \$25,000,000 is appropriated from the Railbelt energy fund (AS 37.05.520) in the general fund to the Department of Administration and Export Authority for the design and construction of the Healy cogeneration project.

On the amount appropriated by (a) of this section, the sum of \$25,000,000 is transferred to the Alaska Industrial Development and Export Authority is appropriated from the Alaska Industrial Development and Export Authority to the Alaska Industrial Development and Export Authority for the design and construction of the Healy cogeneration project.

On the amount transferred to the Alaska Industrial Development and Export Authority under (a) of this section is appropriated from the Alaska Industrial Development and Export Authority to the Alaska Industrial Development and Export Authority for the design and construction of the Healy cogeneration project.

~~of the legislature that the Department of Administration and Export Authority on the effective date of this section to the Alaska Industrial Development and Export Authority on the effective date of this section.~~

~~of the legislature that the appropriations of funds not be expended until the Alaska Public Utilities Commission has approved power sales agreements for the Healy cogeneration project.~~

~~of the legislature that the Alaska Public Utilities Commission has approved power sales agreement for a clean coal technology under this section only if~~

~~it is not contingent in any way on legislative action, and~~

~~has been executed by the parties and approved by the parties.~~

* Sec. 144. The sum of \$9,500,000 is appropriated from the Railbelt energy fund (AS 37.05.520) in the general fund to the Department of Administration for payment as a grant under AS 37.05.315 to the City of Seward for the design and construction of the Seward transmission line from Lawing to Fort Raymond substation.

* Sec. 145. The sum of \$9,000,000 is appropriated from the Railbelt energy fund (AS 37.05.520) in the general fund to the Alaska Railroad Corporation for the purchase of locomotives, rolling stock, and associated equipment costs.

* Sec. 146. Contingent upon the execution of a long-term, no-cost lease between the Alaska Railroad Corporation and the Municipality of Anchorage that designates the Alaska Railroad Corporation's Government Hill bluff land as open space or for public use, the sum of \$2,500,000 is appropriated from the Railbelt energy fund (AS 37.05.520) in the general fund to the Department of Administration for payment as a grant under AS 37.05.315 to the Municipality of Anchorage for road and bridge improvements for the Anchorage Ship Creek Original Townsite Redevelopment Project, including extension of Warehouse Avenue, realignment of C Street, and construction of a Ship Creek pedestrian bridge.

* Sec. 147. (a) The sum of \$1,600,000 is appropriated from the Railbelt energy fund (AS 37.05.520) in the general fund to the Department of Community and Regional Affairs for weatherization and energy conservation and for the energy efficient residential housing incentive program under AS 37.05.315 of SCS CSSH 358 (Fin) am S (efd fld), enacted by the Sixteenth Alaska State Legislature.

(b) The sum of \$600,000 is appropriated from the Railbelt energy fund (AS 37.05.520) in the general fund to the Department of Community and Regional Affairs to match federal receipts for the weatherization and energy conservation program.

Alaska State Legislature

Official Business

P.O. Box 1
State Capitol
Juneau, Alaska 99811

TO: Robert Hatfield
FROM: Representative Larson and Senator Menard
SUBJ: 1990 Railbelt Energy Appropriation
DATE: May 8, 1992

It is perhaps a good time to restate some of the history surrounding an appropriation, made nearly two years ago.

Repeatedly, over the last few months, we have been asked the status of the \$9,000,000 appropriation made in SCS CSHB 463(Fin), Chapter 208, SLA 1990, Page 115, section 145, line 5-9 (attached), which states: The sum of \$9,000,000 is appropriated from the Railbelt Energy fund (AS 37.05.520) in the general fund to the Alaska Railroad Corporation for the purchase of locomotives, rolling stock, and associated equipment costs.

Because we were both quite instrumental in the crafting and approval of this appropriation, we thought we should share some of the reasons for the appropriation with you. This capital inclusion was accompanied by the following DOTPF/OMB backup. The project description states:

Capital funding to support transportation of coal from Wishbone Hill for export purposes. Expenditure details will be resolved by the department based on financial plan review and acceptable resolution of rate negotiations with the Alaska Railroad Corporation.

The project justification states:

The economic benefits from the Wishbone Hill project are considerable for the state, Mat-Su Borough, Municipality of Anchorage, and the City of Seward. This includes royalty payments, local tax receipts, and approximately 150 to 200 permanent jobs during the 15-year plus mine life.

At the time that this appropriation was done, it was extremely clear as to the purpose and definition of the line item. We remain confident that this appropriation is secure and awaiting its' allocation specific to the intent, as clarified in the above language.

Please feel free to contact us if you have any questions or information to the contrary.

1991 Alaska Railroad Annual Report

1. Organization and Operations

Congress authorized construction of the Alaska Railroad (Railroad) in 1977. The federal government operated the Railroad until its sale to the State of Alaska in January 1985. The sale of the Railroad to the State of Alaska was authorized under the Alaska Railroad Transfer Act of 1982 (ARTA), which was signed into law on January 14, 1983. The Alaska Railroad Corporation (ARRC) is a public corporation created by the State of Alaska Legislature to own and operate the Railroad and manage the Railroad's rail, industrial, port, and other properties. The ARRC commenced operations on January 6, 1985, and adopted the accounting policies of a commercial enterprise.

The ARRC operates 525 route miles, providing both freight and passenger services. The ARRC serves the Alaska cities of Anchorage and Fairbanks as well as the ports of Whittier, Seward, and Anchorage; Denali National Park; and military installations. Vessel and rail barge connections are provided from Seattle, Washington and Prince Rupert, British Columbia.

2. Significant Accounting Policies

MATERIALS AND SUPPLIES INVENTORY

Operating materials and supplies are carried at the lower of cost (average cost) or market. Road materials and supplies include rail, ties, ballast, and other track materials, and because these items are generally capitalized when placed into service, they are included in property and equipment at cost.

PROPERTY AND EQUIPMENT

Property and equipment are stated at cost. Depreciation and amortization are computed on a straight-line basis over the estimated useful lives of the related assets. Preacquisition depreciable property has been depreciated on a straight-line basis over its estimated original remaining life of five years.

CAPITALIZED INTEREST

The ARRC capitalizes interest costs as part of the cost of constructing major facilities and equipment. Interest costs of \$84,000 and \$122,000 were capitalized in 1991 and 1990, respectively.

INCOME TAXES

As a public corporation, the ARRC is exempt from federal and state income taxes.

3. Cash and Cash Equivalents

For purposes of the statements of cash flows, cash and cash equivalents include time deposits, certificates of deposit, and repurchase agreements with original maturities of three months or less. Temporary investments are carried at cost which approximates market value.

Cash and cash equivalents are summarized at December 31, 1991 as follows:

	Carrying Amount	Bank Statement Balance
	(IN THOUSANDS)	
Checking accounts and repurchase agreements	\$ 3,566	\$ 4,859
U.S. Government obligations	500	500
Time certificates of deposit	1,860	1,860
Total cash and temporary investments	\$ 5,926	\$ 7,219
Collateralized by U.S. Government obligations	\$ 4,694	\$ 4,694
Insured by FDIC	300	300
Uninsured and uncollateralized	242	2,233
Total cash and temporary investments	\$ 5,934	\$ 7,227

U.S. Government obligations, which are carried at cost, had a market value of \$128,000 at December 31, 1991.

4. Leases

The ARRC leases certain locomotives, freight cars, computer equipment, and other property under capital leases. Future minimum lease payments for capital leases as of December 31, 1991 are summarized as follows (in thousands):

Year ending December 31,	1992	\$ 1,625
	1993	1,776
	1994	871
	1995	85

During 1991, the ARRC acquired no additional equipment under capital lease agreements. The cost of equipment held under capital leases aggregated \$10,934,000 and \$20,832,000 at December 31, 1991 and 1990, respectively. Capital leases on assets with a cost of \$9,990,000 and accumulated amortization of \$1,102,000 were paid off during 1991. The related accumulated amortization was \$3,663,000 and \$6,634,000 at December 31, 1991 and 1990, respectively. Amortization expense is included in depreciation expense in the statement of income.

A lease for freight cars requires that \$220,000 be kept on deposit with a financial institution for the term of the lease agreement.

5. Land

Certain parcels of land are leased under agreements which are cancellable upon 90 days notice by the lessee. The lease terms vary from 2 to 55 years. Annual rentals on the leases were approximately \$3,979,000 in 1991 and \$4,016,000 in 1990.

6. Wishbone Hill

The ARRC received \$9 million from the State of Alaska in 1990 for the purchase of locomotives and coal hopper cars for the Wishbone Hill Coal Project. Any remaining funds, along with interest earned on the \$9 million while in the possession of the ARRC, may be used to purchase other equipment and improvements related to the project. This contribution from the State is accounted for as deferred revenue, which will be amortized over the life of the project. During 1991, the \$9 million was invested in U.S. Government securities. At December 31, 1991, these investments had a carrying value of \$9,790,000 at cost and a market value of \$10,102,000. According to the current agreement, ARRC is to refund the \$9,000,000 plus interest earned during the holding period if the Wishbone Hill Coal Project is cancelled.

7. Long-Term Debt

Long-term debt at December 31, 1991 consists of the following (in thousands):

Note payable, secured by equipment, due in semi-annual principal payments of \$201,391, plus interest, beginning October 1, 1991. Interest is accrued at 9% through September 1991 and thereafter at the two year treasury note rate.	\$ 5,085
Note payable, secured by various assets, requires maintenance of a net worth of at least \$30 million and a debt service coverage ratio of at least 1.25, due in monthly payments of \$118,659, including interest at 8%. The ARRC was in compliance with loan covenants at December 31, 1991.	4,297
Other notes payable, secured by equipment, with varying maturities through 1997 with interest from 7.82% to 8.75%.	483
	9,865
Less current portion	1,671
	\$ 8,194

Long-term debt maturities are as follows (in thousands):

Year ending December 31,	1992	\$ 1,677
	1993	1,734
	1994	1,811
	1995	1,097
	1996	449
	Thereafter	3,994
		\$ 9,865

The ARRC has arrangements for short-term operating borrowing up to \$10 million with two banks at December 31, 1991. The amount outstanding on the first line is \$3 million at December 31, 1991 with interest at 75 percent of the prime rate of a major bank. The amount outstanding at December 31, 1991 on the second line was \$3 million with interest at 74 percent of the prime rate of the bank. In addition, the ARRC has available a line of credit of up to \$10 million for the purpose of insuring self-insurance claims. There is no outstanding balance on the self-insurance line at December 31, 1991.

8. Employer Benefits

The ARRC has a defined benefit pension plan (the Plan) that covers all non-represented permanent employees who have not qualified in the Civil Service Retirement System and permanent employees who are members of collective bargaining units which have opted to be covered by this plan. Benefits

1990 appropriations from the Railbelt Energy Fund

\$25,000,000 to the Healy Cogeneration project

\$9,500,000 to Seward for the Seward transmission line from Lawing to Fort Raymond

\$9,000,000 to the Alaska Railroad for locomotives, rolling stock and associated equipment

\$2,500,000 to Anchorage for Ship Creek redevelopment

\$1,600,000 to C&RA for weatherization

\$600,000 to C&RA for weatherization to match federal money

\$600,000 to Alaska Home Craftsman Program

\$2,200,000 to C&RA for energy efficiency and retrofit program

\$1,700,000 to Mat-Su for job corps

\$23,000,000 University, Fairbanks Natural Sciences Building

\$16,500,000 University, Anchorage Classroom Building

\$2,300,000 to Anchorage to reconstruct Alyeska water and sewer

\$3,800,000 to Anchorage Economic Development for Alyeska

\$1,100,000 to Kenai for a solid waste facility

\$1,000,000 to University for a fire training facility on the Kenai Peninsula

\$3,300,000 to City of Kenai for a congregate housing facility

\$1,700,000 to Anchorage Neighborhood Housing Services

\$100,000,000 to the Railbelt intertie reserve

\$205,400,000 Total

\$26,800,000 Anchorage Total

\$10,700,000 Mat-Su Total

\$14,900,000 Kenai Total

Re: Appropriation Letter of Understanding

Dear Delegation Members:

In regards to the appropriation for development of Mat-Su coal, the Mat-Su Borough intends to use those funds for the rail spur from the Parks Highway to Port MacKenzie and other port-related improvements. The funds will be used primarily to leverage federal funds for the rail spur. The Mat-Su state legislative delegation will be consulted before the Mat-Su Borough would change the current intent of the appropriation. This is the same consultative relationship the borough and the legislative delegation have honored and respected for the past several years.

Sincerely,

Michael J. Scott
Borough Manager

Please enter into the record my testimony to the House Finance committee name
committee on SB 289, dated April 20, 2000,
bill/subject

I am opposed to this Bill for several reasons:

- Increase taxes ($\frac{1}{10}$ of 1% to $\frac{2}{10}$ of 1%)
- May cause the UI Trust Fund to become insolvent.
This will make employers' pick up the tab making more taxes
- Alaska is 38th in the Nation in Unemployment Benefits
Alaska's workforce is highly seasonal and I would not want to be the one to explain to the working men & women of Alaska that they cannot use the money that they paid in unless they want under UAA or the Technical Centers demands. Also, is it right ->

 bill/subject

U.I dollars should not be used to fund other projects. The intent of U.I is to have a bank account for the worker who is layed off because the job is finished.

Using U.I dollars to support other things will deplete the fund and employers will be charged an additional tax.

When the U.I fund was established and set into law - it was a fund for the unemployed and no provisions were made or even considered for the use of these dollars. Please vote not to pass this bill.

BILL NO: SB 289
TITLE: TECHNICAL AND VOCATIONAL EDUCATION

DATE: April 13, 2000
CONTACT: Dwight Perkins
465-2700

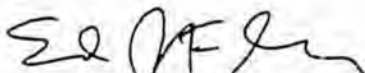

The Department of Labor and Workforce Development is opposed to SB 289 in its current form [CSSB 229(FIN)am]. While the department strongly supports the intent of the bill – to adequately fund vocational and technical education and build capacity at the post-secondary level, primarily through the University, Seward Skills Center and Kotzebue Technical Center – we are adamantly opposed to the diversion of funds from the Unemployment Insurance Trust Fund to achieve that laudable intent.

The UI Trust Fund is just that - a protected, dedicated fund comprised of employer and employee payroll taxes. It is held in trust for the state by the federal government for the sole purpose of paying unemployment benefits to Alaskan workers in times of individual and, often, community-wide economic hardship. The solvency of the trust fund is not, barring a major recession, a large concern, since the formula for determining employer and employee insurance contributions renders it "self-adjusting" over the long term. The impact on employer tax rates, however, is a major concern. Trust fund solvency adjustments are charged to employers, and the diversion of \$8.6 million from the corpus of the trust fund will result in higher employer tax rates than would have occurred without the diversion.

The result is, in effect, a vocational and technical education tax on private sector, for profit employers (approximately 25% of the state's workforce works for "reimbursable" employers who do not pay UI tax – state and federal governments, the University of Alaska, most local governments, and many non-profits.) The department is not opposed to some form of tax support for vocational and technical education. The use of UI taxes, however, is inappropriate; they should be restricted to their intended purpose.

It is true that there is currently a diversion of .1% of the employee UI contribution to the State Training and Employment Program (STEP), which was established by legislation in 1989. STEP, however, is closely tied to the Unemployment Insurance Program: eligibility for service is restricted to workers who have contributed to UI by working for a contributing employer; the statutory purpose of the program is to reduce claims against unemployment benefits and reduce unemployment costs; when not reappropriated to the STEP account, unexpended funds have always been deposited back into the corpus of the UI Trust Fund.

POSITION PAPER/Department of Labor

House CS SB 289 (FIN) Sponsor Statement

This bill establishes a new Alaska Technical and Vocational Education Program which is funded through an employee credit on the Unemployment Insurance Trust Fund. The new credit is one-tenth of one percent and is patterned after the credit currently in place for the Statewide Employment Program (STEP).

The new program will be administered by the existing Alaska Human Resource Investment Council (AHRIC), which is charged with the responsibility of determining the priorities for grant submittal and distributions on an annual basis. The revenue from this source is expected to be about \$4.3 million annually. Entities eligible to receive grants are those that are authorized by and are physically located in the State of Alaska.

The first year revenues (about \$3.2 million) are directed to specific entities because the AHRIC will not have had the opportunity to formulate regulations to solicit grant applications. Those funds are directed to the University of Alaska (52% = \$1.725 million), Kotzebue Technical Center (16% = \$516,000) and Alaska Vocational Technical Center (32% = \$1.032 million).

The bill also provides for the AHRIC to act as the lead state planning and coordinating entity for Alaska. The state will then be in position to receive funds from the federal government for technical and vocational education programs.

After the first year, grants shall be awarded to programs in Alaska run by technical and vocational entities that hold valid authorization to operate. The AHRIC will award grants to entities that have sufficient accounting systems, that have secured private sector contribution commitments for matching purposes, and whose grant application purpose is listed first on the list of priorities adopted by the AHRIC. The AHRIC will adopt a priority list each year based on economic, employment, and other relevant data in order to maximize employment opportunities for participants.

The bill sets out intent language directing the AHRIC to undergo an internal review to improve its efficiency and minimize its membership and requires a report to the 22nd Legislature on that review and also on the developed guidelines for implementing the new grant program.

Finally, the bill revises some program elements of the existing STEP by adding clarifying language on grant fund use for relocation assistance, tools and other gear, and support services, including allowances.

Juneau, Alaska 99801-1182

This bill establishes a new Alaska Technical and Vocational Education Program which is funded through an employee credit on the Unemployment Insurance Trust Fund. The new credit is two-tenths of one percent and is patterned after the credit currently in place for the Statewide Employment Program (STEP).

The new program will be administered by the existing Alaska Human Resource Investment Council (AHRIC), which is charged with the responsibility of determining the priorities for grant submittal and distributions on an annual basis. The revenue from this source is expected to be about \$8.6 million annually. Entities eligible to receive grants are those that are authorized by and are physically located in the State of Alaska.

The first year revenues (about \$6.4 million) are directed to specific entities because the AHRIC will not have had the opportunity to formulate regulations to solicit grant applications. Those funds are directed to the University of Alaska (76% = \$4.902 million), Kotzebue Technical Center (8% = \$516,000) and Alaska Vocational Technical Center (16% = \$1.032 million).

The bill also provides for the AHRIC to act as the lead state planning and coordinating entity for Alaska. The state will then be in position to receive funds from the federal government for technical and vocational education programs.

After the first year, grants shall be awarded to programs in Alaska run by technical and vocational entities that hold valid authorization to operate. The AHRIC will award grants to entities that have sufficient accounting systems, that have secured private sector contribution commitments for matching purposes, and whose grant application purpose is listed first on the list of priorities adopted by the AHRIC. The AHRIC will adopt a priority list each year based on economic, employment, and other relevant data in order to maximize employment opportunities for participants.

The bill sets out intent language directing the AHRIC to undergo an internal review to improve its efficiency and minimize its membership and requires a report to the 22nd Legislature on that review and also on the developed guidelines for implementing the new grant program.

Finally, the bill revises some program elements of the existing STEP by adding clarifying language on grant fund use for relocation assistance, tools and other gear, and support services, including allowances.

CSSB 289(FIN) am – Board of Technical and Vocational Education Sectional Analysis

Section 1 Intent language so that AHRIC minimizes its membership; develops regulations on the new grant program, and reports to the legislature on both by the 15th day of next session.

Section 2 Amends AS 23.15.640 (STEP Program) by inserting new subsections (b), (c), and (d) that add clarifying language on three of the six program elements for STEP, which are; (4) support services, including allowances, (5) relocation assistance and (6) provisions of necessary tools, etc..

(b) requires that grants for elements (a) 4, 5, and 6 may be awarded only if funds from other assistance programs or grants are either not available or have been exhausted.

(c) requires reimbursement by the individual, if economically feasible, for funds provided for items under program element (a)(6) tools, etc., and requires the department to account for the receipts and implement the subsection by regulation.

(d) Clarifies that "support service" for program element (a)(4) can be extended to an individual only when they are participating in program elements (a)(1), (a) (2), (a) (3).

Section 3 New section defining the new program – Article 7. Alaska Technical and Vocational Education.

Sec. 23.15.820 This section outlines the powers and duties of the Alaska Human Resource Investment Council as administrators of the new program.

Sec. 23.15.830 This section formally establishes the account for the new program and specifies the functions of the departments in regards to the account.

Sec. 23.15.835 This section sets out the amount and collection method for the new program – a credit of two-tenths of one percent in a manner similar to the existing Statewide Employment Program.

Sec. 23.15.840 This section identifies the process for the grants for the new program.

- (a) The AHRIC awards grants to technical and vocational education/ training entities, according to a priority list (f) they develop. The entity is eligible if its program is physically located in Alaska and they:
 - (1) have adequate accounting systems
 - (2) do not replace or compete with certain other training programs
 - (3) have secured matching funds for the program
- (b) The AHRIC can not award if it would displace money through existing programs.
- (c) An entity receiving a grant must provide at least one of:
 - (1) industry-specific training;
 - (2) on-the-job training; and
 - (3) institutional or classroom job-linked training
- (d) An educational institution that receives a grant must provide full access to records for accounting purposes.
- (e) When making a grant, AHRIC will limit the amount spent by entities on administration to not exceed five percent. A program funded must:
 - (1) meet the standards on the administrative costs percentage
 - (2) be operated by an institution authorized under AS 14.48 if the program is one operated by an institution subject to AS 14.48.
- (f) Grants are awarded based on the list of priorities adopted by the AHRIC. That list is based on economic, employment, and other data that is reviewed annually by AHRIC.

Section 4 This section specifies that the funds collected for the first year of the program will be distributed to the institutions listed.

Section 5 The effective date of the legislation.
