February 01, 2004

House Labor and Commerce Committee
House Finance Committee
Senate Leadership Conference/ Concurrence Committee
State Capitol Building
Juneau, AK 99801

Honorable Chairman and Members,

As we follow the progress of SB 102, moved from the House Finance Committee to the House Labor and Commerce Committee on January 28, 2004, we realize that the language that prohibits all municipal taxation finds the opposition particularly from those municipalities that currently impose sales tax or other forms of local taxation.

As beneficiaries and administrators of a gaming operation in Juneau, we would like to propose a rather simple but effective compromise that will create a universal taxation platform that is sustainable and easily adjusted if necessary.

- **Establish a Single, Realistic, and Universal Statewide Tax. 15% of the ideal net.**
- **Change the Statutes to require reporting gaming activity by location.**
- **Include Local Municipalities Proportionately in the Revenue Stream.** This universal statewide tax will be collected by the distributors and split equally between the state and the municipalities based on where the funds are generated. (See Chart 1)

WHO WINS AND WHO LOOSES

- **The State is a Winner.** This tax increase will represent over \$3,000,000 of new revenue for the State as well as an opportunity to strengthen accountability in this industry. The State would virtually guarantee collection, force administrative excess out of the current system, and insure that every municipality retains some of the proceeds raised within its jurisdiction to cover the indirect costs of gambling in its community.
- **Local Municipalities Not Currently Taxing Gaming Are Winners.** The majority of municipalities in the State that do not have a local sales tax or other form of local taxation on gaming will receive a proportional share from this tax and will not only benefit financially, but also this will encourage more gaming proceeds to be put to use locally.

➤ **Permit Holders are Winners.**

This may seem contradictory considering the increased taxation. However, as we can demonstrate with our financial records, this taxation will flow from excessive administrative costs, rather than from proceeds non-profit organizations receive since the statutory minimum returns will remain the same at 30%.

With a stable taxation platform, permit holders will be able to start planning for their futures without constantly worrying about the possibility of unexpected new taxes or tax increases.

❖ **Local Municipalities Currently Taxing are Partial Losers.**

The eleven municipalities that currently impose sales tax or other form of local taxation on gaming will see a reduction on their revenue flow. However, it would be unrealistic for any gaming operation to be able to pay over 28% of the ideal net in combined state and local taxes, return the minimum 30% to the charities and remain in business. Without a compromise, these communities would face a total loss of revenue from gaming. A partial loss of revenue as our compromise suggests makes sense and it is fiscally sound statewide. These municipalities would receive their proportional share of revenue and will ensure that their communities will continue receiving the services provided by those non-profit organizations that depend on gaming funding.

❖ **Operators, Gaming Managers, and Gaming Administrators are Losers.**

It is well known the administrative excess existing in this industry. We cannot condone abuse of a state granted privilege. Operators, gaming managers and administrators will have to tighten their belts, increase their performance, and make their operations more efficient.

We encourage each of you to carefully study the objective numbers surrounding this issue and patiently tolerate the many hostile voices you are certain to encounter along the way. We are certain that with thorough examination of the facts, our proposed compromise will grow in merit. We believe our goals are not different than yours. While improving the accountability in this industry and thus adding more credibility to this type of fundraising, we can create a sustainable future for the countless non-profits diligently serving many Alaskan communities. And, with a stable revenue structure in this industry, participant municipalities will benefit financially while new revenue is added to the State funds.

The following pages are a detailed overview, including financial projections of our proposed compromise.

Sincerely,

Lupita Alvarez

2002 Gaming Industry Facts and Trends

The Division presents data in this report based upon permittee and operator annual reports filed as of July 30, 2003. The reader should note the following:

- Gross receipts include the dollar value of play-backs (winning pull-tabs which the player has returned to the seller in exchange for additional pull-tabs in lieu of receiving the prize in cash).
- Adjusted gross income means gross receipts less prizes awarded and federal and municipal taxes paid on gross receipts. Adjusted gross income is the amount available to pay gaming expenses and make distributions of net proceeds.
- Net proceeds means adjusted gross income less gaming expenses. Gaming expenses include the 3% pull-tab tax, permit fees, and the 1% additional fee on permittee gaming profits.
- The Division based the 2002 calendar year permittee data on 1,171 annual financial statements filed as of July 30, 2003. There are 77 annual reports outstanding and the Division excluded two erroneous or incomplete reports.
- The division issued 14 MBP permits in 2001 and 2002. All MBPs filed their reports.
- The division issued 26 operator licenses in 2001 and 27 in 2002. All Operators filed their reports.

• Fees and taxes collected by the division:	<u>FY-03</u>	<u>FY-02</u>
3% Tax on Pull-Tabs:	\$ 2,115,146	\$ 2,045,124
1% Additional Fee on Permittees' Gaming Profits:	341,561	325,218
Permit and License Fees:	128,800	141,863
	<u>\$ 2,585,507</u>	<u>\$ 2,512,205</u>

- Distributors reported \$2,007,000 of pull-tab tax paid for calendar year 2002.

ANALYSIS: (Attach a separate page if necessary)

This legislation would increase the state's charitable gaming tax rate from 3 percent of net on pull-tabs (actual gross less prizes) to 15 percent of ideal net for pull-tabs (the amount that would be left after prizes assuming all of the pull-tabs in a series are sold). This marks the first change in tax rates since 1988. This legislation would not change the state tax rate on raffles, bingo and other charitable gaming.

The Department estimates the increase could generate \$10 million in additional state revenue for a full fiscal year, with approximately \$6.5 million in FY04, assuming the state would receive the higher revenues for eight months in the fiscal year. Taxes are paid one month after sales by distributors of pull-tab games, and the Department's estimate for FY04 assumes the new tax rate would take effect 90 days after the measure is signed into law. The Department's estimate also assumes that charitable gaming permit holders would either adjust prize payouts or expenses or use their own proceeds to cover the cost of the higher tax. See attached page for more information on program costs.

Page 2 of 2

Operating Expenditures

The Department of Revenue is requesting general fund program receipts to cover the cost of one Revenue Auditor III position and an Investigator III position. With such a large increase in taxes due the state (an estimated \$10 million per year), the department anticipates the need to strenuously verify the ideal net that the tax increase is based upon. A lack of sufficient staff to verify, audit and enforce the state's higher charitable gaming tax rate would exacerbate an already serious shortage in the state's enforcement effort.

The projected annual salary cost for these new positions totals \$125,000.

The department is also requesting one-time Fiscal 2004 funding of \$15,000 for equipment and \$10,000 for start-up contractual costs.

ANALYSIS: (Attach a separate page if necessary)

This legislation would increase the state's charitable gaming tax rate from 3 percent of ideal net on pull-tabs to 5 percent of ideal gross receipts for pull-tabs. This marks the first change in tax rates since 1988. This legislation the state tax rate on raffles, bingo and other charitable gaming.

The tax increase would take effect July 1, 2003. The Department of Revenue estimates the increase will generate \$12.5 million in additional state revenue for a full fiscal year, with approximately \$11.5 million in Fiscal 2004 because the state would receive the higher revenues for 11 months in the fiscal year. (Taxes are paid one month after sales for distributors on pull-tab games.)

See attached page for more information on the revenue and program costs.

**Department of Revenue
Charitable Gaming Tax**

SB 102 FN #1 Page 2 of 2

Operating Expenditures

The Department of Revenue is requesting general fund program receipts to cover the cost of one Revenue Auditor III position and an Investigator III position. With such a large increase in taxes due the state (an estimated \$12.5 million per year), the department anticipates the need to strenuously verify the gross receipts that the new tax increase is based upon. A lack of sufficient staff to verify, audit and enforce the state's higher charitable gaming tax rate would exacerbate an already serious shortage in the state's enforcement effort.

The incidence of taxation under this legislation would be focused on gross receipts, an area that is possible for manipulation in an industry that is very cash oriented. These two new positions would focus on distributor-reporting practices and audits for the sale of pull-tab games. The projected annual salary cost for these new positions totals \$125,000.

The department is also requesting one-time Fiscal 2004 funding of \$15,000 for equipment and \$10,000 for start-up contractual costs.

Comparison to other states

The National Association of Fundraising Ticket Manufactures 2001 Annual Report on the Charity Gaming in North America lists 34 states that tax pull-tabs and/or bingo. Four states have rates equal to or greater than 5% of gross receipts on pull-tabs, the two highest being Massachusetts and Oklahoma, both with a 10% tax on gross receipts.

ANALYSIS: (Attach a separate page if necessary)

This legislation would increase the state's charitable gaming tax rate from 3 percent of net on pull-tabs (actual gross less prizes) to 15 percent of ideal net for pull-tabs (the amount that would be left after prizes assuming all of the pull-tabs in a series are sold). This marks the first change in tax rates since 1988. This legislation would not change the state tax rate on raffles, bingo and other charitable gaming.

The tax increase would take effect July 1, 2003. The Department of Revenue estimates the increase will generate \$10 million in additional state revenue for a full fiscal year, with approximately \$9 million in Fiscal 2004 because the state would receive the higher revenues for 11 months in the fiscal year. (Taxes are paid one month after sales for distributors on pull-tab games.)

See attached page for more information on the revenue and program costs.

March 5, 2003..

The Honorable Gene Therriault
President of the Senate
Alaska State Legislature
State Capitol, Room 107
Juneau, AK 99801-1182

Dear President Therriault:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill designed to increase the amount of state revenue received from charitable gaming fees and taxes.

Large amounts of money are spent on bingo, pull-tabs, and other charitable gaming activities in Alaska. Gross receipts for calendar year 2001 alone exceeded \$351 million. Only \$2.4 million of this amount was paid to the state in taxes and fees. Charities only received \$30.6 million. The rest, over \$318 million went for prizes, rent, operator fees, and other expenses of gaming.

Because of the large sums involved in charitable gaming, state government must devote significant resources to monitoring gaming activity. Despite the state's best efforts, it is not enough. The state continues to find gaming enterprises where so much of the gaming receipts are used up paying rent and other expenses that charities receive less than the minimum amount required by law. This bill would reduce the strain on the state by increasing revenue. Additionally, the bill would assure the public that its money is going toward its intended purpose, through provisions requiring professional gaming operators and vendors to shoulder the burden of the enhanced tax imposed for their activities.

The tax on pull-tab sales has not been raised since 1988. This bill would increase the tax to five percent of the gross receipts of the games. The current rate is only three percent of the ideal net of the games. Ideal net is the amount left over after all prizes are paid, assuming that every pull-tab game is sold. The State of Alaska's current pull-tab tax rate is significantly lower than the rates imposed by many other states. Oklahoma and Massachusetts collect a tax of 10 percent of the gross pull-tab receipts. Michigan collects a tax equal to 40 percent of the net pull-tab profit.

GOVERNOR'S TRANSMITTAL LETTER

The Honorable Gene Derrault

March 5, 2003

Page 2

The bill would also discourage the professional gaming operators from passing on the cost of the tax increase to charity by reducing the expense cap on costs they can pass along to the charitable gaming permittees for whom they sell pull-tab games. The bill would place similar restrictions on vendors that sell pull-tabs in their liquor establishments for charitable gaming permittees.

It is estimated that in fiscal year 2004, the bill would raise an additional \$11.5 million in revenue. The bill would raise an additional \$12.5 million in each subsequent fiscal year.

I urge your prompt and favorable action on this measure.

Sincerely,

A handwritten signature in cursive script, appearing to read "Frank H. Murkowski".

Frank H. Murkowski
Governor

VOTE YES ON SB102

05/16/03

House Finance Committee

Honorable Members of the Committee,

We urge you to support SB102 in its current form with the prohibition of local taxation. Please review the extensive process and difficult decisions your colleagues in the Senate went through to bring this legislation before your committee. Also please note that Senator Seekins will be the chairman of a Senate Labor and Commerce interim subcommittee whose purpose is to closely examine other aspects of this industry.

Vote for SB102 in its current form now! Then let the Senate Labor and Commerce interim subcommittee do its job and examine other aspects of this industry over the summer from a solid starting point and direction with the passage of SB102 in its current form. For starters I would encourage them over the interim to consider the following this summer after SB102 is in effect.

1. Use an adequate percentage of the additional revenue the state will be receiving to step up enforcement of gaming regulation.
2. License all management (not just operators) involved in gaming and revoke those licenses if the permits they manage do not return the state mandated minimums.
3. Prevent "ghost charities" those charities that only exist on paper from being allowed gaming permits by strengthening the requirements for qualification.
4. Increase the state mandated returns to the nonprofits.
5. Consider a revenue sharing scheme with the local municipalities based on where the funds are generated.

From the very start of the process on SB102 we have pointed out the administrative excesses and need for reform in this industry. There is without question room for increased taxation if you take this industry as a whole and view it from a statewide perspective.

However, there is literally no room for more than one tax collector. Juneau has been forcing us to absorb a 5% sales tax, which is equivalent to 25% of our ideal net for many years now. Granted they are pleased to receive these funds but they have a very poor record of collecting it. The City of Juneau is currently owed approximately one quarter of a million dollars in back taxes from this industry. This alone has always frustrated our organizations as we have always faithfully followed the letter and spirit of both state and local law.

We are currently paying 28% of our ideal net in taxes. 25% to our municipality and 3% to the state. Without the local sales tax prohibition in this legislation we would be under a 40% tax burden. You do the math under a 40% tax burden we will simply be literally taxed into bankruptcy. We would like to note here that in our original testimony through both the Senate and House Labor and Commerce Committees we brought forth a revenue sharing strategy between the state and all local municipalities based on where the proceeds were raised.

This is your opportunity to set some precedence statewide concerning the taxation of gaming as we move towards our future. We urge you to support this legislation in its current form.

I am certain you are hearing many voices of concern regarding this legislation. We would like to address some questions you might have of us as follows:

Q: Why don't you pass the sales tax along to the customer?

A: This was tried with disastrous results, as the pace and process of pull tab gaming was frustrated and as a result gross revenues dropped 60%. We had no choice but to absorb the tax.

Imagine if you will every time someone exchanges a playback the oil that runs all gaming (the small winning tickets \$ 1, \$2, \$5, \$10 winners) they had to reach for small change in their pocket or receive small change. These transactions currently take place in seconds. This logistical scenario of passing along a tax to the consumer is frankly impossible.

Believe me if we could pass the sales tax along we would have been doing so since its inception. The City and Borough of Juneau has long since realized this as well; however, they have also been stubbornly aware of the room for taxation in this industry. We can pay a justifiable tax but we cannot pay a combined local and state tax burden of 40%. There can only be one hand in the taxation of this revenue stream. That hand in this case should be the state. The state can then decide whether and on what proportion these tax proceeds should be spent between local and state interests.

Please note, that the City and Borough of Juneau does not seem willing to back down on its rhetoric either. Please do not put us at their mercy for they might by default simply choose to tax local gaming out of existence with out a vote of the local electorate.

Q: Are your expenses higher than other types of business?

A: No in fact I challenge you to find another business in the State that that returns 30.5% profit while absorbing our current 28% tax burden. (25% sales tax 3% state ideal net tax)

Q: How can we create an equitable tax structure on gaming statewide, while making sure we have proper regulation and no profiteering? Thus insuring the permit holders receive the maximum possible return.

A: Vote for SB102 in its current form now! Then let the Senate Labor and Commerce interim subcommittee do its job and examine other aspects of this industry over the summer from a solid starting point and direction with the passage of SB102 in its current form.

I would like to extend a detailed inspection of our books to you or your staff. Please feel free to talk with the current regulators, members of our community, or anyone else you may think has input regarding our past performance and ethics in the endeavor of charitable gaming. SB102 in its current form with local tax prohibition is sound legislation. Without local sales tax prohibition there is no question that the organizations I represent before you today will be taxed into bankruptcy. This will force them out on the streets or to the public trough to make up for that lost revenue. I am certain this was not the Governor's intention when he proposed this legislation.

Please vote yes on SB102 in its current form. Thank you.

Sincerely,

Bellow is our **current situation** for each pull-tab we sell:

\$ 1.00 = one pull tab
\$.80 = our prize paid out (the winning pull tabs)
= \$.20 = our adjusted gross income

Revenue taken from that \$.20 (our adjusted gross income)

30.5% = \$.061 = charitable proceeds*
25% = \$.05 = our sales tax liability to the local municipality
3% = \$.006 = our current 3% state ideal net tax
18.5 % = \$.037 = our payroll cost (2 positions full time, 2 positions ¾ time)
13% = \$.026 = our cost for that single pull tab
10% = \$.02 = our fixed costs rent utilities permit fees etc.
= 100% = \$.20 = our total adjusted gross income

*Note: Current state law requires that at least 30 % of the adjusted gross income be used for charitable proceeds and no more than 70% of the adjusted gross income be used for gaming expenses including taxes.

TELEPHONE: (907) 465-2300
FACSIMILE: (907) 465-2389

March 17, 2003

The Honorable Con Bunde
Chair, Senate Labor and Commerce Committee
Alaska State Legislature
State Capitol, Room 506
Juneau, AK 9981

Dear Senator Bunde:

As legislators and the public discuss Senate Bill 102, and its effect on charitable gaming proceeds, it is important to understand how the often-mentioned total of \$351 million in charitable gaming gross receipts in calendar 2001 is divided.

First, of that \$351 million total for all charitable gaming statewide, \$267 million went out as prizes and almost \$31 million went to the charitable organizations. Of the \$51.5 million in expenses, about \$2 million went to the state from the pull-tab tax and \$23.4 million went to rent, utilities, wages and payroll taxes. More than \$9 million was paid to buy the pull-tabs and bingo cards, leaving \$17 million for all other gaming expenses.

Looking just at pull-tabs, the gross was \$274 million, with \$214 million in prizes, about \$23 million to charities (of which the charities paid \$2 million in taxes to the state), and \$36 million in expenses for the cost of pull-tabs, rent, wages, operator fees, etc.

Although operators may get most of the news media attention when it comes to expenses, half of the gaming in the state is run by individual charities, with no commercial operators involved. An additional 20% of the gaming is run by charity cooperatives, leaving just 30% managed by commercial operators and contract vendors (as explained below).

Getting back to the \$351 million total for pull-tabs, bingo, raffles, ice classics, salmon classics and such, it is important to keep in mind that not all of that \$351 million was new money. For example, a pull-tab player may plunk down a dollar and win \$2, or two more chances. That shows up on the books as \$3 in gaming, when it represents just \$1 in actual cash from the player's pocket. Some certainly may argue that such winnings should not be counted as "new money," but the player has the option of walking away and spending the winnings elsewhere.

Next, looking at how the \$351 million is distributed among the four types of gaming operations:

- 1) **Self-directed gaming by the permittees (the qualified charitable organizations are called permittees).** This is when the Elks or Moose or Little League run their own games, either on their own property (such as at the lodge) or at rented property. The charity pays its own expenses. There is no operator involved.
- 2) **Vendors.** This is when a permittee sells its pull-tabs to a bar, which then sells the game to its patrons. The charities get paid up-front for the "profit" from the box of pull-tabs. The bar deals with the risk of not selling all of the pull-tabs.
- 3) **Operators.** This is when a permittee (charity) contracts with a for-profit business to sell its pull-tabs, such as at a pull-tab parlor. The operator has to pay a minimum of 30% of the total after prizes and taxes to the charity.
- 4) **MBPs, or multiple-beneficiary permittees.** This is when several charities get together to form a cooperative to run a gaming site. The MBP hires a manager and pays its expenses.

Breaking down the \$351 million between the four gaming types:

- 1) **Self-directed gaming:** Of \$169 million in gross receipts, \$128 million went out in prizes, the charities paid \$23 million in their own expenses, with \$18 million in net proceeds to the charities.
- 2) **Vendors:** Of the \$35.5 million in gross receipts, almost \$28 million went out in prizes, with the vendors reporting \$3.6 million in expenses, and with \$4.1 million going to charities.
- 3) **Operators:** Of the \$69 million in gross receipts, \$53.3 million went out as prizes, the operators charged almost \$13 million in expenses, and charities received \$4.3 million.
- 4) **MBPs (charity co-op):** Of \$77 million in gross receipts, prizes consumed \$59 million, with \$12 million to expenses and almost \$6 million to charities.

To elaborate further, operators, for example, reported \$2 million in rent and utilities, \$3 million in wages and payroll taxes, and \$4.7 million in operator fees. I suppose some might question the operator fees, but we need to keep it in perspective — that \$4.7 million is about 7% of the gross receipts of operated-run games. I'm not necessarily defending the fees, but there isn't enough there to dump the entire tax burden of this legislation (5% of the entire gross) on the operators.

As for self-directed games (run by the individual charity), of their \$23 million in expenses, almost \$10 million went out in wages and payroll taxes, with \$2 million for rent and utilities, and \$3.5 million to buy the pull-tab games. Truthfully, in some small communities, the games are a jobs program and a way for the community to "tax" its residents for needed community services.

The point being, after you deduct for prizes, deduct for what the charities and others pay in rent and wages (which is good for the local economy), and deduct for what does go back to the charities, there is no way to get \$12.5 million per year in increased tax revenue to the state without taking at least some of it out of the pockets of the players.

To summarize, the legislation (SB102, as amended) makes three significant changes in the state's charitable gaming laws:

- 1) It limits the prize pay-out in pull-tabs to no more than 72% of the total value of the box of pull-tabs (called ideal gross). That's the retail value of the pull-tabs, assuming all are sold. Expenses have nothing to do with this number. We believe the current average prize pay-out is around 78%. By limiting the pay-out to 72%, the charities will get more money from which to pay the higher taxes (the "hold-harmless" provision).
- 2) The bill reduces the amount of money that vendors (bars that sell the pull-tabs for a charity) may keep. Currently, a vendor can keep up to 30% of ideal net. Ideal net is what is left after all of the pull-tabs are sold and the prizes paid. For example, a box of 1,000 pull-tabs at \$1 each has an ideal gross of \$1,000. If the prize pay-out is 78%, that means \$780 would go out as prizes after all the tabs are sold, leaving \$220 as the ideal net. The vendor gets no more than 30% of that, with the rest (70%) for the charity (the charity gets paid up-front in these deals, and the charity has to pay for the pull-tabs out of its share of the money). The legislation would reduce the vendor's take to 25%. Even with the higher tax under this legislation, we believe the charities would come out ahead over the current formula. And because the ideal net would be higher — because of the lower prize pay-out — the vendor also would end up with a small increase in revenue from this legislation.
- 3) The bill reduces the amount of money operators may claim by increasing the percentage of adjusted gross (gross minus prizes and taxes) they must pay to the charities. Currently, an operator may pay the charity at least 30% of adjusted gross. For example, if the pull-tabs are worth \$1,000, and the prizes total 78%, or \$780, then the adjusted gross is \$220, with 30%, or \$66 to the charity. Under this bill, operators would have to pay the charities 35% of adjusted gross. From this higher number, the charities could pay the higher tax and still come out ahead over the current formula.

- 4) The bill, with the pay-out limit, also would ensure that self-directed charities (that operate their own games) and charity cooperatives would get more than enough additional money to cover the higher tax bill and still be ahead of the game.

I hope this information helps you and your colleagues as you discuss and review SB102. I realize charitable gaming is a complex area, with a lot of details, and we are always willing to meet with you at any time to help with this legislation.

Sincerely,

Larry Persily

Re: Senate Bill 102

Dear Mr. Chairman and Members of the Committee:

I am writing to follow-up the testimony of Mr. Roger Franke, President of the National Association of Fundraising Ticket Manufacturers, as presented to the committee on Thursday, April 24, 2003. Mr. Franke testified by telephone in opposition to S.B. 102.

The bill, as originally written, would impose a tax of 5% on the gross receipts from the sale of pull-tabs and would impose a cap on prizes of 72%. It is my understanding that the committee has agreed to a substitute bill that would eliminate the prize cap, but would impose a tax of 25% of the "ideal net".

Elimination of the prize cap is a positive step. Of the 38 states in the country that authorize the sale of pull-tabs, only the state of Nebraska has a cap on the amount of money that may be returned to the players in the form of prizes. In Nebraska, the prize cap is 30%, far above that proposed for the State of Alaska.

In our experience in dealing with charity gaming around the country, we have learned that states do not impose prize limits for very good reasons. First, there is a general understanding that pay-out limits depress receipts and hence, the taxes that states hope to collect off of the activity. Therefore, the imposition of a prize-cap is counter-productive if the intent of the cap is to raise money in the form of taxes.

States also do not limit the pay-out because it stifles the ability of the charity to be flexible in the games that are played. While a charity may not be able to offer all games with high pay-out percentages, a charity needs to have a few of those games in play to keep players interested. As a general rule, pay-out limits suppress play, reduce receipts and negatively affect the profits that are available for charity.

High taxes on pull-tab activity also limit receipts. An example of this rule can be found in the State of North Dakota. Like Alaska, North Dakota allows pull-tabs to be sold in taverns and has no significant gaming competition (a lottery was approved during the last election, but it has yet to be implemented). In 1993, the excise tax on pull-tabs was 2% of the gross receipts. During the 1993 legislative session, the tax was increased to 4.5% of gross receipts. The tax went into effect later that year. In 1994, gross receipts from pull-tabs were \$202,612,503. The average prize pay-out was about 80% and the taxes collected were \$12,945,936 (this was total taxes on all charity gaming activity, but pull-tabs constituted the greater portion of the receipts).

Each successive year thereafter, gross receipts on pull-tabs decreased, pay-out percentages decreased to compensate and tax collections fell. By 1998, gross receipts for pull-tabs were \$176,480,000 and tax collections fell to \$10,817,764. In 2001, gross receipts were even lower at \$160,634,211. Taxes, on the other hand, increased somewhat to \$12,359,653 (less than in 1994, but higher than in the previous years). The Attorney General's Office, which regulates charity gaming in North Dakota, attributes the increased tax amount to the fact that the tax rate forced the smaller charities out of business leaving only the large charities in operation, which pay a higher percentage of the tax.

Oklahoma is another example of how excessive taxation has depressed pull-tab sales. Since the legalization of pull-tabs, Oklahoma has imposed a tax of 10% on the gross receipts of each game. Gross receipts for pull-tabs in 2001 were only \$4,594,693, despite nearly \$100 million dollars in bingo activity. Pull-tabs are not played in Oklahoma because the charities cannot afford to pay the tax. Despite the tax rate, the state collects minimal amounts of money on pull-tab activity because the tax rate has virtually eliminated the sale of the tickets.

Our association issues an annual report detailing charity gaming activity throughout the United States and Canada. Besides Oklahoma, Massachusetts imposes a 10% tax rate, but Massachusetts limits the sale of pull-tabs in a manner that is far different than Alaska. The State of Illinois has a 5% tax on the gross receipts of pull-tabs, but that tax has spawned a staggering amount of "raffle" games. In other words, due to a loophole in the law, charities are playing unregulated and untaxed "raffles" in lieu of pull-tabs. Washington also imposes a 5% tax on the commercial (for-profit) pull-tab activity, but only a tax of 10% on the net for the same activity sponsored by charity. I mention these details because I know that our annual report on charity gaming has been used

to justify increasing the tax in Alaska. I hope you understand that without taking into consideration the manner in which pull-tabs are sold in the various states, bare comparisons are basically useless.

With the exception of the above mentioned states, no other state imposes taxes on pull-tabs at such a high rate. The vast majority of states that tax charity gaming activity limit the tax rates to about 2% of gross receipts or less than 10% of net receipts. In our experience, a tax rate of 5% of gross receipts or 25% of "ideal net" receipts will depress the sale of pull-tabs, force many charities out of business, particularly smaller charities, limit the money available for charity, and overall, reduce the dollars available to collect in the form of taxes. In short, we do not believe that the \$12 million anticipated to be collected will be realized.

Thank you for your consideration of Mr. Franke's testimony and for your consideration of this additional material. Should you have any questions, please feel free to contact me.

Very truly yours,

Mary B. Magnuson

March 21, 2003

Dear ~~Senator Stevens~~ 

In response to the governor's proposed legislation (SB.102 and HB 169) regarding the taxing of charitable gaming on gross sales, this informational packet was prepared by the following charities:

Midnight Suns Softball
Juneau High School Baseball
Juneau High School Softball
Rebounders Basketball Club
Alaska Native Brotherhood Camp #2 Fraternal
Alaska Native Brotherhood Grand Camp
Alaska Native Brotherhood Camp #2 Inc.
Ninilchik Senior Center
Alaska Softball Association
POW Ketchikan Baseball
Juneau Ski Club
Gastineau Little League
Anchorage Boxing
Spennard Community Patrol
Fairbanks Racing Lions
Anchorage Ski Club
Shomrei Ohr Congregation
Salamtoff Tribal Council
Alaska All-star Hockey
Juneau Boxing Club
Greater Fairbanks Racing Association
Motorcycle Racing Lions
Alaska Laborers Training School
Congregational Christian Church
Alaska Shrine Temple
Juneau Archery Club
Fairbanks Snowmobile Fun Lions
Fairbanks Historical Preservation Foundation
AJ Dimond High School
Alaskan Bowhunters Association
Midnight Suns Lions Club
Juneau Tlingit & Haida Community Council

Enclosed is a list of "definitions of common gaming terms" along with the following graphs: "Where Gaming Money Now Goes", "Where Gaming Money Will Go" (Governor's Proposal) and "Probable Actual Effect of Proposed Tax on Pull-tab Receipts Distribution).

**PROBABLE ACTUAL EFFECT OF PROPOSED
TAX ON PULL-TAB RECEIPTS
DISTRIBUTION
(PROJECTED 70% REDUCTION IN PULL-TAB SALES)**

WHERE GAMING MONEY NOW GOES

Re: Proposal to tax Gross Sales of Pull Tabs at 5%

Dear Gov. Murkowski, Senators and Representatives,

I have analyzed the effect of the proposed 5% tax on gross sales of pull tabs, and I believe that the attached examples show that there are serious errors in the administration's representations about how the tax would effect the Charities in Alaska that conduct charitable gaming. Likewise, the taxes ultimately raised by this proposal will be lower than the \$14 million currently estimated by the Administration.

The most significant error the Administration has made in their analysis is that they have ignored the phenomenon of the Playback. In the Pulltab business, a Playback is a prize that a player has won that is turned in for additional ticket sales. Small playbacks occur on the spot when a player wins \$2, \$10, \$20 or more with a winning ticket, and they use those winnings to purchase more pulltabs. Larger winnings of \$50 to \$250 ultimately become playbacks in the future as a pulltab player has a certain amount of money that is available as disposable income. A very small percentage of the prizes paid out to pulltab players is really kept out and not eventually re-invested back into buying more pulltabs.

I have prepared 3 examples, which are attached to this letter. I have also attached the letter dated March 24, 2003 that the Governor's office recently sent out to all charities that participate in charitable gaming.

Example #1 assumes that there is an initial pot of money that is currently being spent on pulltabs by the public of about \$64,471,902. The average prize payout has historically been about 78% according to the March 23 letter. Accordingly, if you had \$64,471,902 to purchase pulltabs, you would receive \$50,288,084 in prizes assuming a 78% prize payout. Applying the playback phenomenon, players then use their prize winnings to purchase more pulltabs. This time, the \$50,288,084 of pulltab purchases generates \$39,224,705 of prizes paid out to the players. Following this example through until sales reach \$274,000,000, my example shows that of the starting pot of \$64,471,902, only \$4,471,902 is retained by the players, leaving the \$60,000,000 of adjusted gross income. The adjusted gross income is what the charities use to pay for the expenses of gaming and the taxes to the State of Alaska. The Charities get what is left over, which historically has been \$23,000,000.

April 21, 2003

Page 2

Example #2 shows what happens when the State imposes a maximum prize payout of 72% (compared to the current industry average of 78%) and imposes a 5% tax on the gross sales (in lieu of the current 3% state tax on adjusted gross). Example #2, assumes that prizes would be turned over approximately 11 times, as is currently the case as shown in Example #1. Starting with the same pot of money to spend on pulltabs of \$64,471,902, this example shows that the total sales would be only about \$224,000,000 instead of \$274,000,000, a decrease of about \$50,000,000. This makes sense, because the prize payout is lower, and therefore the players have less prize winnings to use as playbacks to purchase additional tickets. The State raises only about \$11,000,000 in taxes because the gross sales are lower. Because sales are lower, the cost of pulltabs will decline by about 18%, which I have estimated to be \$750,000. The decrease in funds available to the charities is about \$4,700,000.

Example #3 assumes the same changes proposed by the State, except it assumes the players retain about the same amount of winnings as they historically have. With this set of circumstances, the playbacks only turn over 8 times instead of 11 times. Because the sales are lower, the cost of the pulltabs is lower and the sales taxes generated by the state is lower. Under this example, the decrease in funds available to the charities is about \$7,000,000. I believe Example #3 is the more likely result of the proposed changes.

There will be other fall out from the proposed 5% gross tax and lower mandated prize payouts that are not reflected in these examples. Players will not want to risk as much of their disposable income because their chances of winning are significantly reduced. Operators will not be able to meet the mandatory higher payouts to charities, so they will go out of business. Those charities that rely on operators to raise funds for them will get nothing! The sales taxes the state will raise will be even lower as sales decline as a result of this. The overall result will be a dramatic change to the charitable gaming industry as it currently exists, with significantly fewer dollars going to the charities.

Charitable organizations in Alaska should not be asked to pay for our government. We should pay them for existing and carrying on programs that otherwise would cost the State money, or that make Alaska a better place to live. This proposal to raise taxes on the gaming industry has not been well thought out and should not be put into law. Let's leave well enough alone and find another way to pay for the cost of our government.

I would be happy to meet with the Administration or any of the Senators or Representatives to explain any portions of this letter or the attached examples.

Sincerely,

Gerald A. Richards, C.P.A.

Summary Information re: Pulltabs

Summary of Pulltabs as portrayed by Gov. Murkowski in letter dated March 24, 2003

1.	Annual Pull Tab Sales	274,000,000	100%
2.	Annual Prizes Paid Out	<u>(214,000,000)</u>	<u>78%</u>
3.	Adjusted Gross Income	60,000,000	<u>22%</u>
4.	Expenses and Operations	(34,000,000)	
5.	Paid to State for Taxes	<u>(3,000,000)</u>	
6.	Net proceeds for Charities	<u>23,000,000</u>	

Example 1 - Summary of Pulltabs Recognizing Playbacks of Prizes Payout at 78%

A.	Starting pot of money spent on pulltabs	64,471,902
B.	Prizes paid out at 78% average rate line A above	50,288,084
C.	Prizes paid out at 78% average rate line B above	39,224,705
D.	Prizes paid out at 78% average rate line C above	30,595,270 -
E.	Prizes paid out at 78% average rate line D above	23,864,311
F.	Prizes paid out at 78% average rate line E above	18,614,162
G.	Prizes paid out at 78% average rate line F above	14,519,047
H.	Prizes paid out at 78% average rate line G above	11,324,856
I.	Prizes paid out at 78% average rate line H above	8,833,388
J.	Prizes paid out at 78% average rate line I above	6,890,043
K.	Prizes paid out at 78% average rate line J above	<u>5,374,233</u>
	Total sales assuming prizes are played back 100%	<u>274,000,000</u>
	Starting Pot of Money Spent on Pulltabs	64,471,902
	Estimated prizes retained by Players	(4,471,902)
	Expenses of Operations	(34,000,000)
	State of Alaska Taxes	(3,000,000)
	Net Proceeds for Charities	<u>23,000,000</u>

Example 2 - Effect of 5% Gross Tax and Prizes Payout at 72%

		<u>5% Tax</u>
L.	Starting pot of money spent on pulltaus	64,471,902
		<u>3,223,596</u>

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

March 24, 2003 --

Optimist Club of Fairbanks, Inc.
1100 West Barnette, Suite 102
Fairbanks, AK 99701

Dear Friends:

Many individuals from charitable and nonprofit organizations such as yours have contacted me expressing concern regarding House Bill 169 and Senate Bill 102, the charitable gaming revenue bills. I appreciate their comments and would like to take this opportunity to clarify our proposal.

Last fall, the majority of Alaska voters sent a strong message that they were ready for a change in the way state dollars are spent. My budget proposal for the coming year, which concentrates on aggressively growing the state's economy through long-term resource development and reducing state spending, is consistent with the voters' message. In addition, I clearly committed to a budget plan that would not include a Statewide Income Tax or a raid on the Permanent Fund. Our proposal upholds that promise.

Charitable Gaming is a major industry in Alaska, generating in excess of \$351 million a year. That's how much money people wager on pull-tabs, bingo, raffles, ice classics, salmon classics, and so forth. About \$274 million of the total is wagered on pull-tabs. Currently:

- About three-fourths, or \$214 million, of the \$274 million is returned to the players as prizes;
- \$34 million goes for expenses of the pull-tab operations;
- \$23 million goes to charities; and
- less than \$3 million goes to the state for taxes.

The administration's proposal, amended after hearing the concerns of state charities, will change the current formula. Using the same \$274 million figure:

- \$197 million, or 72 percent, would be returned to players as prizes;
- \$35 million would go for expenses;
- \$28 million would go to charities (a \$5 million increase); and
- almost \$14 million would go to the state.

Optimist Club of Fairbanks, Inc.
March 24, 2003
Page 2

Currently Alaska State law allows for a maximum payoff for a pull-tab of \$500 per tab. In most states average payout for lottery prizes is approximately 50 percent of proceeds collected. After deducting the expenses associated with running their lotteries, the revenue to those states averages between 25 percent and 45 percent. Our approach not only protects the current share of revenues that go to the charities but increases it and provides a reasonable return (5 percent) to the state.

As a family of Alaskans, we have tough decisions to make at this time. Our oil revenues are seriously reduced and our other resource generators, such as mining, timber, agriculture, and fishing, do not yet bring in sufficient revenues to make up for the loss in oil revenues. Together, we must decide on a safe, secure, and sustainable course for Alaska's future.

By reducing state spending now and slightly increasing user fees and other revenue sources for the state, we can protect Alaska's future from disastrous consequences. This will require the reorganization of many state programs, the elimination of others, and the implementation of user fees.

We are working hard to open ANWR, to build a gas pipeline, and to open other areas of the state for a wide variety of resource development projects. I am committed to growing and strengthening our economy and creating an Alaska that provides good-paying jobs for all Alaskans, while keeping us economically and environmentally safe. With your help, we can do this together.

Sincerely yours,

Frank H. Murkowski
Governor

We are regularly updating budget information on the Internet. To access this information, go to the State of Alaska's Home Page and click on the link for the budget. This will take you to the WebPages for the Office of Management and Budget. From there, you have several options to locate detailed information for our FY 2004 budget proposal.

04/03/03

Senator Bunde.

I will try in this document to put forth a solution that gets the Governor's office much of what it wants, creates a sustainable gaming tax structure, and strengthens accountability in the industry.

Stake Holders

Operators

An "Operator" is a private citizen who puts forth a bond of \$10,000.00 for each permit he/she represents up to \$100,000.00 after which they can represent an unlimited quantity of permits.

An "Operator" is involved in the gaming industry to make a profit for themselves just like any other private business interest. He/She is required to return at least 30% of the adjusted gross income from their pull tab gaming activity to the permit holders they represent. An Operator is free to pick and choose who they will represent and is only accountable to their permit holders "charities" in the sense that they are obligated to return the 30% state mandated minimums. If there is a conflict between the operator and a permit holder the operator is free to find a replacement regardless of the merits of any conflict

Self Directed Permit

A Self Directed Permit is a gaming enterprise run directly by the permit holder.

They are also required by law to return at least 30% of their adjusted gross income to actual charitable use. They are also required by law to use any proceeds in excess of the 30% for charitable uses as well. They or any anyone they put in management capacity are directly responsible to their cause.

MBP; Multiple Beneficiary Permit

A MBP is up to six self-directed permit holders who form a co-operative.

A MBP is also required to return at least 30% of adjusted gross income to charitable use any proceeds in excess of that 30% also must go to charitable use. A MBP's management is directly responsible to the organizations that make up the permit.

Vendor

A Vendor is the owner of a licensed establishment typically a bar.

The Vendor or bar owner purchases a percentage of the "ideal net" of pull tab game from a permit holder (either a self directed permit holder or a MBP permit holder) for no less than 70% of the Ideal net of that pull tab game. This purchase is made at the time of delivery by state law. The vendor then sells the game and retains 30% of the ideal net for his/her profit. The permit holder pays for the cost of the physical pull tab game as well as any taxes associated with that game like the current 3% ideal net tax.

Ideal Gross vs. Ideal Net Taxation.

Ideal Net = the total dollars left after a pull tab game is sold and all winners paid if each ticket was sold at face value.

Ideal Gross = the total number of tickets in a pull tab game.

These two concepts are both "Ideal" concepts, however, "ideal net" is in fact the only realistic yardstick to measure the actual dollars generated in gaming. By basing a tax on the percentage of "ideal net" (as is currently done with the 3% ideal net tax) you are in fact taxing true gross receipts of gaming activity as well as taxing each pull tab game equally based on its profit. There is a reason the tax is currently structured this way.

"Ideal gross" is relative in gaming due to the nature of paid outs and the different paid out percentage of each pull tab game. In other words under "ideal gross" taxation you are taxing each pull tab game differently without concern for its profit.

I am not sure what the logic was under this concept of Ideal Gross taxation proposed by the Governor's Office. Perhaps, it was an attempt to make the tax seem smaller than it actually is in terms of perception. A new 5% tax sounds may sound less threatening than raising an existing tax from 3% to 20%, however the only realistic and sustainable way to tax any gaming activity is by percentage of the "ideal net".

72% cap on Paid Outs Concept:

As you know the Governor's Office quickly realized that they needed a "patch" in their initial bill in order to make it work on paper as in theory. Thus, the first amendment to SB102 and the 72% cap on paid outs. In "Theory" this seems like a good idea. After all lower the current percentage paid out of pull tab games in play to 72% and there is more money to go around.

This 72% concept is being sold as a reasonable limit on pay out percentage based on other states lumped activities (keep in mind most if not all of these states started at inception with a cap) as well as an assumption that the gaming as a vice will show some elasticity as with the cigarette tax hike. It is also being sold as "fair" based on the fact that it will put all gaming venues in the same market position cap.

If pull tabs were rolled out at inception with a paid out cap years ago I think this would be a mute point; however, the state is currently averaging near 80% paid out and has for countless years. This radical shift in the market place as it exists today would have enormous unknown negative effect on gross sales as well as the survivability and attractiveness of pull tabs themselves. In Essence there would be few if any pull tab games put in play with less than a 72% cap everything would start looking the same. There are currently precious few options in the display and structure of pull tab games based on state law like the \$500.00 prize cap etc. As is true and is the current mantra of

the State if you want more revenue you have to grow the economy. The same holds true for pull tabs

If you want more revenue sell more pull tabs. How does one do that? With diversity and variety in the marketplace.

Make no mistake everyone in this industry is doing its best to maximize its profit potential from the operators who benefit directly in their own pockets to the self-direct and MBP permit holders who benefit their programs. There already is a slow but steady market shift to lower prize paid outs in order to stay profitable. An arbitrary and across the board cap would make any free market economist die of heart failure in his/ her sleep.

Can The Governor's Office get the 12.5 Million in new revenue from gaming and keep the permit holders solvent? I think the Governor can get most of what he wants and here is how:

Stick with reality what is proven and works. Currently all pull tab operations in the state are near an average of 80% paid out percentage for all pull tab games in play. Some games are at 75% some are at 83% etc but when all is said and done the state currently and rightfully taxes the profit at 3% of the ideal net of each game in play regardless of its percentage.

I argue that the Governor's Office proposal is not far from the mark in the fact that there is room for taxation in gaming. For example the MBP I manage is currently paying the Governor's Office new tax by way of an absorbed 5% city sales tax (make no mistake about it we tried to pass this sales tax along to the consumer with catastrophic results due to the nature of the gaming process) and we are still making our state mandated minimums but only by the slimmest of margins and paying the city near \$150,000.00 a year. However, there are also examples in Juneau of activities that owe the city in excess of \$250,000.00 in unpaid sales tax revenue. There are also countless Operators, MBP's, Self-Directed, and Vendor activities state wide (in fact the super majority) that are not subject to a sales tax and are returning no more than the mandated minimums as well.

What gives you may ask? I too have been asking this question for years. I think the answer is two fold. First overhead and administrative costs are out of proportion and any new tax will see that these costs get reigned in. Second is not all activities have efficient, honest and productive management. This is sadly the fault of the permit holders themselves for not educating themselves and holding their management accountable this will also change with any new taxation, as they will have to start paying very close attention or else go bankrupt.

So what will work to create more revenue for the state as well as remove some of the administrative, management, and expense excesses that exist in the industry?

Create a sustainable tax that that by no means makes everyone happy but is reasonable, gives the state as well as local municipalities a stake, while allowing the free market place to work.

Sustainable Taxation

First, create one tax and one tax only on gaming statewide by outlawing local sales taxation.

Second, increase the current tax "3% of the ideal net" to 20%. Everyone will claim the sky is falling but in fact this is reasonable and will force the excesses currently in the industry to become more efficient. This will also leave some room for future market downturns by not putting everyone right on edge of barely being compliant with state mandated minimums. This gives the Governor's Office 95% of what they are asking for based on the state average ideal net.

Third, do not put a cap on percentage paid outs of pull tab games. Give the market flexibility to maximize its returns as the conditions of the market dictate.

Fourth, require all activity to be reported by location and split the 20% ideal net tax with local municipalities 50%/ 50%. This is not currently state law. This will prevent the following situations. Currently; for example, a permit holder who's charitable activities only take place in Juneau is free to raise money through Gaming in Anchorage and take 100% of the profits from Anchorage and spend them in Juneau and not leave a dime in Anchorage and vice versa, as well as prevents the current sales taxed activities to be laundered through non taxed municipal locations. This 50%/50% will decrease the states share figuratively; however, I am certain it is a good idea to give the local municipalities a stake in this state wide activity. This new found windfall for the super majority of municipalities not currently taxing gaming will also offset many of the decreased revenue options that flow from the state to the municipalities that are currently on the table. The local municipalities that are currently taxing gaming will no doubt be disappointed but at least they will get something for they realize that with any new state tax on gaming they will be put in a position of bankrupting their local gaming interests or relaxing or eliminating their taxation all together. So, in a nut shell this still gives The Governor's Office 95 % of what it is asking for, if that office is flexible enough to realize that by increasing current local municipalities revenue stream in one arena it has options to trim in others. Same amount of tax just different pots of decision making on how it is spent. I am personally neutral of the concept of the 50%/ 50% split however; I think it would leverage more incentive for the passage of this legislation.

Fifth, collect the 20% ideal net tax in the same manner it is currently being collected through the distributors. Currently the distributors are liable for the tax regardless of whether they get paid by the permit holders. This new tax will make that situation very dangerous for them so; create a mechanism for them that does not put them in a bankrupt situation if their payables go uncollected. Do this by simply making it illegal for any distributor to sell a pull tab game to any permit holder or operator that has not paid their

outstanding tax bill to the distributor within 30 days. The distributors will report these non-paid accounts to the gaming unit within the department of revenue when they submit their monthly check and reports to the state. The gaming unit will then post those non-paid accounts on their web site on the 7th business day after the reports and payments from the distributors are due. The distributors shall then be responsible for checking this site on that 7th day (only accessed by the distributors through a password; the public will not be able to see this information) they will not be permitted to sell any pull tabs to any of the listed permits until they have made their tax payments. To keep the distributors honest instill harsh penalties for any sales to a listed non-tax compliant permit, as well as any false reporting of failure to pay tax by a permit holder.

Sixth, license all persons involved in the management or supervision of gaming activities and revoke those permits if they continually put permit holders in jeopardy. Currently, only Operators are licensed and management can simply walk down the street to another permit holder after putting a former permit holder in jeopardy with state or local law.

Seventh, strengthen who what is actually a charitable cause and thus eligible for a gaming permit. This will prevent the current long list of "ghost charities" that exist only on paper from abusing the integrity of gaming.

There are never any easy answers; however I do think the above plan will accomplish three things that are long over due in this industry. It will force the permit holders to become more responsive to their cause and eliminate current excesses and create a sustainable state/local tax on an industry that should be taxed and held to a higher standard.

The Governor's Office, Legislature, and the Permit Holders will all have to sacrifice something. However, with humble integrity I am with confidence that this plan I put forth is a good start in the ever-difficult process of making Alaska a better and more accountable State.

Sincerely,

Senator Gary Wilken
1851 Fox Avenue
Fairbanks, Alaska 99701

Via E-mail

Re: SB 102 / HB 169

Dear Honorable Senator,

In response to your recent e-mail I offer you my thoughts and observations on these bills. Through the required annual gaming reports to the Department of Revenue, it can be determined which permittees and licensees are within so many percentage points of being out of compliance. Once you have identified how many percentage points the proposed tax amount will add to the existing expenses of a pull-tab gaming operation, non-profits with compliance issues can be determined. These same operations would then have to be closed according to statute if the tax was initiated. The tax in effect is an increase in expenses and may push the gaming operation over its statutory 70 % of Adjusted Gross Income expense limitation. (The ideal net minus federal and city taxes equals the adjusted gross income.) I.e. If XYZ permittee's expenses are 65% of the Adjusted Gross Income and a tax that equates to 6% of the Adjusted Gross Income is added, XYZ is now over the statutory limit on expenses by one percent.

Gaming operations that compensate to stay in compliance by a reduction of prizes will further complicate any analysis on this matter. Letters from Mary Magnuson, lead counsel for the National Association of Ticket Manufacturers, states that as prizes are reduced to compensate for a tax, games have less incentive to play and Gross Receipts from the activity will decline. (These letters were given to Senator Bunde and the Interior Delegation.) In a nut shell the tax base disappears whether the additional new tax is a percentage of Gross Receipts or a percentage of the Adjusted Gross Income. The erosion of the Gross Receipts or taxable base that pays expenses (Adjusted Gross Income) will also cause further compliance issues for the permittees. Pull-tabs, which are a paper slot machine, paid prize payouts of 78% in 2001. Correspondingly, Electronic Gaming Machines, (Slot Machines) in casinos pay out prizes of 85 to 96% to stimulate play. No stimulation, no play, non-compliance, no tax base, the economic ruin of this industry and its benefits to Alaskan communities.

I suggest a legislative audit be done on charitable gaming before anyone supports a tax being levied. It is imperative to quantify the economic impact of any proposed tax before passing such a bill. By knowing which charities are affected you will know: how many dollars in goods & services may leave the community, how many jobs may be lost, and how much real estate may go vacant. It may be that the tax benefits gained are less than the qualitative and quantitative damages to our communities. Or, it may indicate that there are opportunities for a tax and which gaming operations can support the extra burden.

Please give this matter further study before passing these bills. I have enclosed a spreadsheet to identify the impact of taxes for quick reference.

Thank you, for the opportunity to give more comment on this matter.

Respectfully,

John Lopez
President
Denali Gaming Supply, Inc.

CHARITABLE GAMING COMPLIANCE TAX COMPARISON/WORKSHEET

	2001 based on current tax 3% of Ideal Net	2001 based on proposed tax 5% of Gross Receipts
Gross Receipts	\$273,800,000.00	\$273,800,000.00
Less Prizes	\$213,600,000.00	\$213,600,000.00
Less Federal & City Sales Taxes	\$1,000,000.00	\$1,000,000.00
Adjusted Gross Income	\$59,200,000.00	\$59,200,000.00
Less 2001 Reported Expenses	\$34,100,000.00	\$34,100,000.00
Less Tax (3% of Ideal Net)	\$1,806,000.00	\$0.00
Less Tax (5% of Adjusted Gross)	\$0.00	\$13,690,000.00
Amount Available for Net Proceeds*	\$23,294,000.00	\$11,410,000.00
Less Statutory Requirement for Compliance (30% of adjusted gross)	\$17,760,000.00	\$17,760,000.00
Surplus/Difference	\$5,534,000.00	(\$6,350,000.00)

* According to the 2001 Annual Report \$23,276,643.00 was the actual amount returned to the permittees.

Propose your own tax within the following spreadsheet to see the outcome on the Net Proceeds. Enter below, in the highlighted portion of the equation the percentage of tax "proposed" to see the outcome on the permittees Net Proceeds. This formula may also be used to determine whether or not specific permittees and/or licensees would remain in compliance with your "proposed tax". Simply enter the specific information as labeled.

	Propose a Tax based on the Ideal Net*	Propose a Tax based on the Gross Receipts**
Gross Receipts	\$273,800,000.00	\$273,800,000.00
Less Prizes	\$213,600,000.00	\$213,600,000.00
Less Federal & City Sales Taxes	\$1,000,000.00	\$1,000,000.00
Adjusted Gross Income	\$59,200,000.00	\$59,200,000.00
Less 2001 Reported Expenses	\$34,100,000.00	\$34,100,000.00
<i>Place your proposed tax here (use a percentage)</i>	0%	0%
LESS TAX	\$0.00	\$0.00
Amount Available for Net Proceeds	\$25,100,000.00	\$25,100,000.00
Less Statutory Requirement for Compliance (30% of adjusted gross)	\$17,760,000.00	\$17,760,000.00
Surplus/Difference	\$7,340,000.00	\$7,340,000.00

*Tax based on the Ideal Net is calculated as follows: Gross Receipts minus Prizes multiplied by the tax.

**Tax based on the Gross Receipts is calculated as follows: Gross Receipts multiplied by the tax.

Alaska BINGO supply

PHONE: 907.243.7003 FAX: 907.248.0895

To: Senator Con Bunde

Date: 4-25-03

Thank you for taking a moment to read my comments.

I am righting you first to voice my opposition to SB102/HB169 but more importantly, I would like to offer a partial solution that I believe everyone in the industry can agree with.

The industry does not currently allow the play of a "High Tier" game (a game with an individual payout over \$500.00). I suggest that such games be allowed, but at a higher tax rate.

- Games with payouts \$500 or lower remain at the 3% of the adjusted gross.
- Games with payouts between \$501 and \$750 are taxed at a rate of 6% of the adjusted gross.
- Games with payouts between \$751 and \$1000 are taxed at a rate of 9% of the adjusted gross.
- Games with payouts over \$1001 are taxed at a rate of 15% of the adjusted gross.

It would be up to the user to determine if they wanted to pay the tax and play the higher payout games (a user fee).

This would be a win win for everyone.

- The State of Alaska would collect more tax.
- The Operator, Vendor, or MBP would have the opportunity to attract more players and different players that were not playing because the payouts were not high enough.
- The Charities would benefit by the increased play.

I do not believe that you can find the solution to the fiscal shortfall in one fell swoop or in a short period of time. I do however believe that there are some very smart people in this industry and as an industry, given time we could come up with solutions that would be a win win for the industry and the State of Alaska.

In closing I would recommend all the gaming bills be tabled and a task force be formed to evaluate this and many other possible solutions to determine the answer.

Thank you for taking the time, I am available for further comment if you are interested.

Jerry Lewis

March 12, 2003

To : Members of the Labor and Commerce Committee of the House and Senate

Re: Teleconference on March 13, 2003 re: Senate Bill No. 102

My name is Gerald Richards. I am the managing partner of Richards, Johnson & Granberry, C.P.A.'s of Fairbanks, Alaska. Our firm has numerous clients involved in various aspects of gaming, including permittees, vendors and operators. I have personally been involved with gaming for the last 12 years, and have served on two different gaming committees and task forces appointed by previous administrations.

I believe the proposed tax increase and accompanying changes in the minimum amounts paid to permittees by operators would have a crippling effect on the gaming industry and the amount of money that is given to nonprofit organizations to fund their various activities.

In support of that statement, I have prepared the attached summary which shows the potential impact of the proposed changes. The following are my concerns:

AS Sec 05.15.184 - Proposal is to increase the tax from 3% of ideal net to 5% of ideal gross. This is a 733% tax increase as I have shown in my example for a typical Operator. An Operator is an individual who is licensed to sell taxes on behalf of licensed charitable organizations, otherwise referred to as Permittees. In this example, the tax increase of \$220,000 would fall primarily on the operator. A typical operator would not make that much profit from the operation of his business, and no individual is going to run a business at a loss. The direct result of this proposed tax would be that many operators would be forced out of business. The Charitable organizations would have reduced funding to carry out their programs and the State has no tax collected because there are no sales. So as strange as it may sound, this level of tax could result in a net tax decrease to the State of Alaska if it pushed the operators out of business.

AS Sec 05.15.128(a)(2) - Proposal is to increase the minimum amount paid by an operator to a Permittee from 30% to 35%. Although this may not seem like as big of an issue, it really is because the 5% less that the operator will have to operate on is really 7.14% of the operator's 70 % of the adjusted gross (ideal net). Most operators have multiple locations, and some of those locations tend to be marginal, just so they can warehouse employees and they operate at close to a break even. This increase will have the effect of closure of numerous operator locations that are marginal right now, but still do return 30% to a permittee. There will be lower sales and lower taxes and a lower amount ultimately paid to Permittees if this proposal is adopted.

Many of the current problems in the gaming industry are with the way that the statutes are written and the resulting manner in which the Division of Charitable Gaming has been forced to write regulations to try to enforce the Statutes. If you feel you must make a change to the existing gaming Statutes, then I propose you consider the following changes for Operators:

1. The State tax on pulltabs under AS05.15.184 should be based on the ideal net, not the ideal gross. Likewise, local community sales taxes should be limited to taxing ideal net, not ideal gross.
2. If it is the State's desire to increase the amount that goes to a Permittee from 30% to 35%, then the Statute should be written to specify it as a required percentage rather than a minimum. No one ever pays more than the minimum anyway. This eliminates numerous regulations and enforcement issues for the State and will result in a significantly reduced workload on its enforcing officers. There are thousands of dollars spent each year on reams of reports documenting sales, prizes, and expenses. You could eliminate all of this needless and costly reporting and paperwork by simply requiring the operator to pay the distributor up front for the permittee's 30% or 35% required share of the ideal net. That way, the shrinkage is solely the responsibility of the Operator and the State doesn't have to spend hundreds of thousands of dollars monitoring the situation and making determinations whether expenses are reasonable or not.
3. Under my proposal, the distributor would collect both the state taxes as it currently does, and also the permittee's 30% or 35% whatever you decide on. Then once a month, the distributor would cut a check to the respective permittees. If you cut out all the paperwork, the operator could probably afford to pay the extra 5% to the permittees.
4. Another change that would be welcomed is the current interpretation of the law as it relates to operators. Currently, operators are being restricted from selling pulltabs in a liquor establishment unless they supply their own separate employees. In other words, they are being required to hire separate employees instead of contracting with the liquor establishment to share labor. This is a waste of resources, as in some locations the establishment is not very busy and the bartender can handle the sale of both pull tabs and liquor. I would like to see that point clarified to allow operators to sell pull tabs from any location and to contract with an establishment to share labor, if you intend to make any changes to the statutes.

I believe my opening comments are very much supported by the economics of the industry, and if these bills are passed in their current form, it would be devastating to numerous Charitable Organizations throughout the State of Alaska. I would be glad to meet with any of the members of the committee and provide further comments or recommendations or to answer specific questions.

Sincerely,

Gerald A. Richards

Sample effect of Proposed Increase in Taxes on Pulltabs

		<u>Taxes</u>	
Gross sales (ideal gross)	5,000,000	250,000	5% proposed tax on ideal gross
Prizes paid out	<u>4,000,000</u>		
Adjusted gross (ideal net)	<u>1,000,000</u>	<u>30,000</u>	3% existing tax on ideal net
		<u>220,000</u>	Increase in tax

This is a 733% increase in the taxes that were previously imposed on the gaming industry. That seems a bit excessive. I wonder if the person proposing this increase really understands the gaming industry. I doubt it!

If you taxed 25% of the ideal net it would give you the same result as a tax of 5% of the ideal gross. So in effect, the current bill proposes to increase the current tax from 3% of ideal net to 25% of ideal net. Just another way of looking at it, but clearly this is excessive!

All operators are required by Alaska Statutes to be individuals. In the case of an operator who handles gaming for numerous charitable gaming organizations, an ideal gross could easily be \$5,000,000 or more per year. A tax of 5% of the gross would be about \$220,000 higher than the current tax of 3% on the ideal net. The charities would get less and the operator would bear the brunt of the tax. That is an awful lot to ask one individual to pay in the form of a tax increase.

Please keep in mind that the proposed tax and % increases are coming right behind major increases in minimum wages. I think you should let the industry settle in from the wage price increase before you try to rock the boat any further. If this is passed, the State will gain very little in perspective, and the Charitable organizations who do so much to make Alaska a special place to live will be the ones who suffer.

The following is an example of what permittees who contract with an operator can expect under the proposed new tax:

	<u>Existing 30%</u>	<u>New 35%</u>	
Gross	5,000,000	5,000,000	
Tax on gross		(250,000)	
Prizes	<u>(4,000,000)</u>	<u>(4,000,000)</u>	
Adjusted gross	<u>1,000,000</u>	<u>750,000</u>	
Paid to permittee	<u>300,000</u>	<u>262,500</u>	
		<u>(37,500)</u>	Decrease in net proceeds to permittee

SB102

05/09/03

Senate Finance Committee

Members of the Committee,

The proposed tax in SB102 if adopted in its current form without the prohibition of local taxation will force the operations of the organizations I represent before you today into bankruptcy. Mind you this is not a bluff our records are on the table. From the very start of the process on SB102 we have pointed out the excesses in this industry and acknowledged the possibility of increased taxation. This is your opportunity to set some precedence statewide concerning the taxation of gaming. We can pay a justifiable tax on our activities but we cannot pay a combined state and local taxation burden of 40%.

Bellow is or our **current situation** for each pull-tab we sell:

\$ 1.00 = one pull tab
\$.80 = our prize paid out (the winning pull tabs)
= \$.20 = our adjusted gross income

Revenue taken from that \$.20 (our adjusted gross income)

30.5% = \$.061 = charitable proceeds*
25% = \$.05 = our sales tax liability to the local municipality
3% = \$.006 = our current 3% state ideal net tax
18.5% = \$.037 = our payroll cost (2 positions full time, 2 positions ¾ time)
13% = \$.026 = our cost for that single pull tab
10% = \$.02 = our fixed costs rent utilities permit fees etc.
= 100% = \$.20 = our total adjusted gross income

***Note:** Current state law requires that at least 30 % of the adjusted gross income be used for charitable proceeds and no more than 70% of the adjusted gross income be used for gaming expenses. **In an ideal world we would like to see no tax increase at all but an increase in the mandated return to the non-profits from 30% to 55%.**

Bellow is our **situation if SB102 is passed without prohibition of local taxation**

\$ 1.00 = one pull tab
\$.80 = our prize paid out (the winning pull tabs)
= \$.20 = our adjusted gross income

Revenue taken from that \$.20 (our adjusted gross income)

18.5% = \$.037 = charitable proceeds*
25% = \$.05 = our sales tax liability to the local municipality
15% = \$.03 = **proposed 3% state ideal net tax under SB102**

18.5 % = \$.037 = our payroll cost (2 positions full time, 2 positions ¾ time)
 13% = \$.026 = our cost for that single pull tab
 10% = \$.02 = our fixed costs rent utilities permit fees etc.
 = 100% = \$.20 = our total adjusted gross income

***This scenario will put us out of compliance with state law**

You may ask yourselves several questions;

Q: Why don't you pass the sales tax along to the customer?

A: This was tried with disastrous results, as the pace and process of pull tab gaming was frustrated and as a result gross revenues dropped 60%. We had no choice but to absorb the tax. Imagine if you will every time someone exchanges a playback the oil that runs all gaming (the small winning tickets \$ 1, \$2, \$5, \$10 winners) they had to reach for small change in their pocket or receive change. These transactions currently take place in seconds. This logistical senero of passing along a tax to the consumer is frankly impossible. Believe me if we could pass the sales tax along we would have been doing so since its inception. The City and Borough of Juneau has long since realized this as well; however, they have also been arrogantly aware of the room for taxation in this industry. We can pay a justifiable tax but we cannot pay a combined local and state tax burden of 40%. There can only be one hand in the taxation of this revenue stream. That hand in this case should be the state. The state should then decide on what proportion these tax proceeds should be spent between local and state interests.

Please note, that the City and Borough of Juneau does not seem willing to back down on its rhetoric either. Please do not put us at their mercy for they might by default simply choose to tax local gaming out of existence with out a vote of the local electorate.

Q: Are your expenses higher than other types of business?

A: No in fact I challenge you to find another business in the State that that returns 30.5% profit while absorbing our current 28% tax burden. (25% sales tax 3% state ideal net tax)

Q: How can we create an equitable tax structure on gaming State wide, while making sure we have proper regulation and no profiteering? Thus insuring the permit holders receive the maximum possible return.

A: 1. Outlaw local sales taxation on charitable gaming. (**This plan will only work with the passage of legislation that would outlaw local taxation**)

2. Increase the current 3% state ideal net tax to 20% on pull-tabs.

3. Split that revenue generated with the local municipalities on a proportional basis that you find just.

4. Use an adequate percentage of the additional revenue the state will be receiving to step

up enforcement of gaming regulations. Deposit the rest not split with the local municipalities in the general fund.

5. License all management (not just operators) involved in gaming and revoke those licenses if the permits they manage do not return the state mandated minimums.
6. Prevent "ghost charities" those charities that only exist on paper from being allowed gaming permits by strengthening the requirements for qualification.

I would like to extend a detailed inspection of our books to you or your staff. Please also feel free to talk with the current regulators, members of our community, or anyone else you may think has input regarding our past performance and ethics in the endeavor of charitable gaming. SB102 in its current form without local tax prohibition will without question bankrupt the gaming operations of the organizations I represent. This will force them out on the streets or to the public trough to make up for that lost revenue. I am certain this is not the Governor's intention with this proposed legislation.

To: Senator_Con_Bunde@legis.state.ak.us

Senators, Bunde, Seekins, Stevens, French, and Davis; I just wanted to tell you that I think your ideas of an interim subcommittee on the entire gaming issue is outstanding and long over due. However, I urge you to put forth and pass an amendment tomorrow that puts in place a justifiable tax this year. Then this summer your subcommittee can finishing up with its house cleaning. Do not be mislead by those that are still beating the drums of doom for this industry under any tax. There has been gross excess in this industry for far too long. May your swords be sharp and keenly focused in you decision making powers.

This weekend I dropped by our bank statements and daily sales records covering the quater ending 03/31/03 with your committee staff Jane Alberts for her review of what actually happens on the ground. Included in those records were all of our canceled checks for that period (payct nts, etc.) This information goes far beyond our consolidate state reports and I hope they were usef pleased to share this information with any of you personally before the Labor and Commerce meeti' I will stop by all of your offices this afternoon with the box-of-records in hand to confirm or try and set up ie to meet with each of you if your schedules allow it.

I urge your committee to bring forth an amendment that brings forth the following ideas this year and still maintains the focus of the subcommittee this interim

No local sales taxation

16%-25% ideal net tax (or increase the mandated return to the non-profits from 30% to 50%)

Split that tax with local municipalities based on where the funds are raised at a proportion you and your fellow Senators find most just.

No paid out percentage caps

Finish house cleaning this interim. If many in this industry cannot find the courage to do this on their own, do it for them this interim!

May your committee find good speed, judgment, and courage on SB102 and all the other endeavors you face.

Sincerely,
David Sanden
Primary Member in Charge of Gaming
Juneau Montessori Center
Southeast Alaska Friends of the Montessori
Juneau Dance Unlimited

I can be reached immediately on my pager today @463-7654, or feel free to leave me a message at 364-2890 I will make time at your convince if any of you wish to further discuss this matter I can be in your office within 30 minutes.

Pulltabs to the rescue

Gaming helps senior center offset rising costs

By AMY HARTLEY

Senior Voice

When insurance rates for the Soldotna Senior Center skyrocketed 117 percent after the terrorist attacks in September 2001, Jan Fena knew she had to do something – and fast. Fena, Soldotna Senior Center's executive director, says the center used to pay \$11,700 a year for liability, auto and workman's compensation insurances. Now the center is paying more than \$25,000 a year.

But Soldotna Senior Citizens, Inc., the non-profit organization that operates the center, found a way to raise enough money to cover the costs in just two and a half months. It wasn't a grant or cash donation from some anonymous benefactor. The relief came in the form of a "riptide."

With the opening of Pot of Gold Pull Tabs, a store located off the Sterling Highway, the organization is confident they can meet Soldotna Senior Center's financial challenges and perhaps be lucky enough to improve services with the additional money generated.

Innovation at work

Typically when an operation has to pay more in expenses, the clients feel the additional cost, as the price for services increases, but Fena says that's not how a senior center should operate.

"You cannot pass those costs onto the clients because the age bracket of citizens we're working with, most of them, are on a fixed income. You can't pass it on," Fena said. "You have to absorb them, therefore, we had to get more innovative on how to meet those costs."

Fena says it took about three months' worth of planning before Pot of Gold opened. The hardest part was pinpointing an affordable yet optimal site for the business, she said. Staff eventually settled on a rental in the Eureka Mall, which sits on the Sterling Highway, a busy thoroughfare that runs right through the town of Soldotna.

Gaming eases senior center's financial crunch

continued from page 1

Once the location was secured, the interior of Pot of Gold had to be transformed. Volunteers built cabinets and countertops and installed light fixtures. Equipment was arranged and walls were decorated with artwork, created by senior center members. A gaming license was soon issued and the store celebrated its grand

She says that fact is posted inside the store, but she also spreads the word, as there are multiple pull-tab stores in Soldotna where customers can spend their money.

There's five of us right here in town—there's a lot (of pull-tab stores). But we're doing pretty good. I'm pleased and my boss is pleased," Bertoglio said. "It's been a success so far. We've done a lot better than

The Pot of Gold pulltab parlor opened in February and has exceeded expectations as a source of income for the Soldotna Senior Center.

ing and therefore the demand for services grows with it. Even though we request donations for meals and rides a lot of times, seniors aren't able to pay, but we still need to provide those services.

'Even though we request donations for meals and rides, a lot of times, seniors aren't able to pay, but we still need to provide those services.'

--Jan Fena

opening February 14. The community was ready for games of luck and chance and kept the store's staff of two running throughout the event.

"We gave away 7,500 Alaska Airlines miles and we were just busy, selling lots of pull-tabs," said Ginger Bertoglio, Pot of Gold's pull-tab manager.

Pulltabs pay well

Pot of Gold offers 15 different games and customers can cash in rippies for as much as \$500. Bertoglio says customers are aware that the money they spend is used to fund the local senior center.

anticipated.

Fena said she had hoped Pot of Gold would generate enough money in 90 days to pay back the initial investment Soldotna Senior Citizens, Inc. made. But business has been very good, and that goal was met within 45 days.

"We're very hopeful the business continues to grow. If so, it will ensure our clients that services will continue to be provided," Fena said.

Staying ahead of the curve

Fena says insurance rates aren't expected to decline. In fact, she was told they would continue to grow over the next four to five years, by about 15 percent each year. With that information in mind, she says her staff has to stay ahead of the curve. She hopes other business ventures will prove just as fruitful.

"We're very excited about (Pot of Gold) and we're continuing to look at ways to raise funds," she said. "The senior population is grow-
