ANALYSIS: (Attach a separate page if necessary)

SCS CSHB 251 (TRA) exempts foreign pleasure craft of 65 feet or less in overall length from the mandatory pilotage requirement. New funds are not required to implement this bill.

However, the bill is anticipated to generate new revenue as a result of civil lines imposed and the application fee for waiver from the pilotage requirement. Based on the fee proposed in the bill and estimates from the industry, the revenue is based on: 1) 6 pleasure crafts at 66' = 6 x \$300 = \$1,800; 2) 12 pleasure crafts at 120' = 12 x \$3,000 = \$36,000; 3) 6 pleasure crafts at 160' = 6 x \$5,000 = \$30,000. The revenue estimate is repeated in subsequent years however, the actual revenue will be based on the number of foreign registered pleasure crafts entering State waters.

SCS CSHB 251 (TRA)

insert page 4

Add the following transitional provision:

line 11

⁵
"Sec. . The requirement in AS 08.62.180(b), enacted in Section 4 of this Act, that an application for exemption be filed at least 30 days before the vessel enters the state does not apply to a vessel entering the state less than 30 days after the effective date of this Act."

Discussion: This will not change any other requirement of the law. Thus, applicants would still have to apply early enough to allow the board 10 working days to respond, meaning applications would still have to be submitted 14 days in advance of entry. Also, if the board needs additional information before granting an exemption, the vessel still could be left unable to enter without a pilot. However, for those vessels that clearly qualify for an exemption and have plans to enter the state this June, this transitional language will allow them to do so. This language will only apply for the initial 30-day period after the effective date of the Act.

Sponsor Statement

SCSCSHB 251(TRA)

“An Act relating to exemption of certain foreign pleasure craft from the mandatory pilotage requirement; and to fines imposed on the owner or operator of a pleasure craft of foreign registry.”

HB 251 authorizes access to Alaskan waters by foreign registered pleasure craft when granted a waiver of pilotage for vessels that are 65ft. in length, but less than 175ft. To travel in Alaskan waters, these pleasure craft must comply with certain state requirements including filing for a waiver.

For foreign pleasure craft of 125ft to 175ft. in length to enter Alaskan waters, a Marine Pilot must join and travel with the vessel to its first port of call. Vessels that are 65ft in length but less 125ft when using an Alaskan agent do not require a pilot for initial entry. In Alaskan waters, the vessel will be required to travel with a Marine Pilot on board while navigating certain waterways. The vessel will adhere to regulations established by the Board of Marine Pilots and is subject to civil penalties for violations.

A recent Legislative Budget and Audit Committee audit report supports these changes. This legislative audit (#08-20015-02 November 1, 2002) states under Recommendation No. 4, “The Board of Marine Pilots should seek statutory authority to allow the board the discretion to grant waivers of pilotage requirements to large pleasure craft.”

The intent of HB 251 is to accomplish recommendations identified in the Audit and provide Alaskan Maritime communities with increased tourism opportunities while preserving our precious waterways.

SCSCSHB 251(TRA) Sectional Analysis

“An Act relating to exemption of certain foreign pleasure craft from the mandatory pilotage requirement; and to fines imposed on the owner or operator of a pleasure craft of foreign registry.”

Sec. 1. Imposes \$10,000 civil fine for violation of pilotage laws.

The statute currently includes penalties upon conviction of a misdemeanor for failing to use a marine pilot when required, unless a pilot is unavailable. As was noted in the Legislative Budget and Audit report of November 2002, this statute has been difficult to enforce. The addition of a civil fine will assist the Board of Marine Pilots investigator with enforcement duties and will more easily facilitate the collection of fines from vessels not in compliance with this statute.

Sec. 2. Outlines fee structure for application for a waiver from marine pilotage.

To receive a waiver, an application process with a graduated fee structure has been created to raise new revenue from these visitors. All foreign flagged pleasure craft of between 65' and 175' that apply for a waiver from marine pilotage will pay an application fee based on their size. For example, a 66' yacht will pay \$300, a 100' yacht \$2000, and a 175' yacht \$5750 with the application.

Sec. 3. Exempts foreign flagged pleasure craft of 60' or less from pilotage laws.

Currently, all foreign flagged pleasure craft of over 300 tons must employ a marine pilot while in Alaska. This change will add small yachts of 65' or less to the list of vessels exempted from marine pilot statutes.

Sec. 4. (b) Adds application and fee process for waivers of vessels between 65'-175'.

This new subsection adds language pertaining to a written application for an exemption from pilotage. The yacht owner or operator will apply for an exemption to the Board of Marine Pilots, or the Marine Pilot Coordinator who must approve or deny any waiver within 10 working days after the application is received. The exemption is good for one year and must be carried onboard at all times when in AK waters. The waiver may be revoked subject to such conditions as the board considers appropriate to protect human life, property and the marine environment.

Mandatory pilotage areas are created for Wrangell Narrows and between Sitka and Chatham Strait for all foreign flagged vessels of over 66'.

(c) Adds the use of a licensed AK agent for yachts between 66'-125'.

An AK agent must be used to dispense navigational and safety information to yachts upon arrival into their first port of call.

(d) Mandates use of pilot for yachts between 126'-175' on initial trip into Alaska pilotage waters.

If an exemption is granted, these yachts must hire a pilot from the first pilot station into the first port of call. This must take place in each new pilotage region entered by the vessel.

(e) Adds the definition of "for hire" and "pleasure craft".

These definitions, patterned after US Coast Guard language, will assure that only a privately owned vessel will be eligible to apply for a waiver from pilotage. It is not the intent to allow any vessel used commercially an exemption from pilotage.

Sec. 5. The act becomes law upon signature of the governor.

MAR 5 2003

The Honorable Gene Tharrault
State Capitol Building
Juneau, AK 99801

Dear Mr. Tharrault:

I wanted to take the opportunity to applaud your efforts to permit an orderly process for exempting Canadian warships and Coast Guard vessels home-ported in British Columbia from state pilotage requirements. We support this reciprocal agreement and believe it will only serve to improve the important relationships we share with our Canadian neighbors.

I also would like to take this opportunity to respond to requests for my comments on state legislative discussions of easing pilotage requirements for foreign pleasure vessels. The current statute requires a pilot for vessels 300 gross tons and over. Proposals have been made to increase that tonnage exemption, effectively allowing larger vessels the opportunity to transit Alaskan waters without a pilot. These are matters of state interest over which the Coast Guard has no authority but about which I do have concerns. Vessels greater than 300 gross tons are large and can pose serious risks to the safety of navigation and the environment. Removing pilots from these vessels could dramatically impact vessel safety since local knowledge and experience are a key component of safe navigation. Having a pilot onboard helps prevent groundings and subsequent environmental damage. Their presence facilitates communications during vessel passages in the narrow waters of Southeast as well. By their presence onboard during vessel operations, the pilots are also in a unique position to alert the proper authorities if there are indications the vessel or crew may present law enforcement or homeland security concerns. Finally, the pilot's local knowledge helps with sensitive property and territorial concerns; distinguishing between local, federal and tribal areas. This type of overall awareness prevents accidents in the first place and helps mitigate them when they do happen. It cannot be replaced by a foreign crew, a transponder, or a float plan. We appreciate the service and performance of your state pilots and recommend their continued presence on foreign pleasure vessels 300 gross tons and over.

Again, I recognize these are state interests and appreciate the opportunity to present my concerns as part of our cooperative relationship. I trust all will go well with the remainder of your session. Please contact myself or LT Matt Jones of my staff at 907-463-2809 if we may be of further assistance on these matters.

Sincerely,

J. W. UNDERWOOD

Representative Nancy Dahlstrom
State Capitol
Juneau, AK 99801-1082

RE: HB 251-exemptions from marine pilotage for certain yachts

Dear Representative Dahlstrom:

The City of Whittier would like to add its support for HB 251, legislation that could help strengthen our economy by encouraging large yachts to come to Alaska. I am referring to the law that currently dissuades private pleasure craft from cruising in our waters by mandating that they employ a marine pilot while they are in Alaska.

Whittier has a large harbor and facilities to accommodate these desirable visitors. We are hoping to become a tourism destination in the future and would like to do all we can to persuade yachts of all sizes to visit our community. The state should also be doing all it can to attract this new money to our coastal ports, especially during these times of financial uncertainty. The city and small businesses can both benefit from the revenue brought to Whittier by these desirable independent tourists.

The City of Whittier is open for business and is always exploring new ways to draw people to our community. If passed, HB 251 will help greatly in that effort.

Sincerely,

Re: Private Foreign-Flagged Yachts

Dear Senator Therriault:

On behalf of the newly-formed Haines Borough, I would like to add my support to a proposal to change a state law that could help the economy of our small community. I am referring to the current attempt to put a waiver system in place to allow private foreign-flagged yachts to cruise in Alaskan waters without a marine pilot aboard.

Haines has felt the devastating effects of a general downturn in our economy for many years. With the loss of the timber industry and the low return for our fisheries resources, we have turned to tourism as one way to help rebuild our community. The impact of the spending by guests and crew on these large yachts in a small coastal community such as Haines cannot be overstated.

Haines is open for business and we welcome any changes in state law that will help bring new customers here. Thank you for your consideration of these changes. They could have a very positive impact on the economy of our community.

Sincerely,

Jerry Lapp
Deputy Mayor

Sally.Smith@ci.juneau.ak.us

February 10, 2003

The Honorable Gene Tharrault
President of the Alaska State Senate
State Capitol
Juneau, AK 99801-1182

Dear Mr. President:

Over the past few years Juneau has invested heavily to upgrade our docks and harbors. Part of that effort has included the development of a more hospitable welcome to private yachts. As a longtime tourist destination, we understand the economic opportunity derived from these vessels. Benefits accrue both to the city, through docking fees, and to many small businesses that offer goods and services to the owners, passengers, and crewmembers.

It is my understanding that there is currently a proposal to change state law to allow large, foreign flagged private yachts to travel in Alaska without marine pilots. Juneau endorses that change, believing it will encourage more yacht traffic.

Given the current situation, we are losing a portion of potential business from this affluent group, all because of a basically unenforceable state law. We just cannot afford to lose such lucrative business to other coastal states.

Your consideration of this issue will be greatly appreciated. The commerce is important to all coastal communities.

Sincerely,

Sally Smith
Mayor

February 12, 2003

The Honorable
Senator Gene Therriault
Senate President
State Capitol, Room 111
Juneau, Alaska 99801-1182

Re: Changes in marine pilotage laws re: foreign flagged yachts

Dear Senator Therriault:

The City and Borough of Sitka would like to join other SE communities in supporting a statutory change that would allow certain pleasure yachts to travel in Alaska without marine pilots. Facilitating a boost to our economy while maintaining safety and environmental standards is what I feel most residents of Sitka could support.

As you know, Sitka is still in the process of redefining itself after many decades with a primarily resource-based economy. Fortunately for us, as the timber industry was receding in our area, the tourism industry in Alaska was developing. Although we are taking a very deliberate look at how this industry should progress in our community and how any changes may affect our citizens and their way of life, it is generally agreed that many opportunities for local businesses and residents may be tied to the tourism industry.

As a port community, we realize the positive financial impact visitors aboard these large yachts can have in Sitka. Some yachts currently use our port as their home base during their summers in Alaska. It makes sense to allow these vessels, and their foreign flagged counterparts, to travel freely in Alaska without another marine pilot aboard, as long as competent and experienced masters are in charge. As this pilotage law has never been enforced, it only makes common sense to change the law to reflect the actual reality of today's yacht cruising public.

I would appreciate your support for legislation that removes this barrier to commerce in Sitka and other coastal communities of Southeast. Thank you for your consideration of this issue.

Sincerely,

Fred Reeder
Mayor

Re: Statutory change regarding requirement for marine pilots on large yachts

Dear Senator Therriault:

I am writing regarding the above-referenced subject. I am generally in support of a statutory change, which would allow large noncommercial private yachts to travel in Alaska without marine pilots to the extent that safety and other issues are not compromised. I would, however, want to see specific legislative language prior to endorsing a particular concept.

As you know, Ketchikan's economy has been hard hit by the decline in the timber industry, as well as by the challenges currently facing the fishing industry. Fortunately, on the other hand, our tourism industry is continuing to provide economic opportunities for local businesses and residents.

Ketchikan is in the process of completing a comprehensive development plan for our port and harbor facilities. I believe that this will result in a number of improvements in our infrastructure to better accommodate various classes of vessels, particularly including large yachts, and thereby enhance our economy. I also believe that, in addition to the goods and services that yacht passengers and crew might typically spend while visiting a community, we will be in a unique position to perform routine vessel maintenance/repair as the capacity of our shipyard increases.

In closing, I would appreciate your support for legislation that removes barriers to vessel traffic through an appropriate mechanism which can be supported by concerned parties, including marine pilots and yacht owners.

Thank you for your consideration of this issue.

Sincerely,

Bob Weinstein
Mayor

Southeast Conference

P.O. Box 21989 Juneau Alaska 99802-1989 Tel. (907) 463-3445 Fax (907) 463-5670

February 7, 2003

Senator Gene Therriault
Senate President
State Capitol, Room 107
Juneau, AK 99801-1082

Re: exemptions from marine pilotage statutes for large yachts

Dear Senator Therriault:

On behalf of the Southeast Conference we would like to voice out support for changes to state pilotage laws to allow private foreign flagged yachts up to 200 feet in length, to cruise in Alaskan waters without a marine pilot aboard. Current law requires foreign vessels over 300 tons to employ a state licensed marine pilot from one of the pilot associations. These associations are quite busy in the typical summer season, servicing the large contingent of cruise ships that deploy in Alaska. It is appropriate for these ships to have state licensed pilots aboard, as they are quite large, operate largely at night, and have much greater potential for significant damage to other shipping, and the environment. We believe that the language in the current law reached too far down in size to a ship type for which the perceived protection to state waters is out of scale related to its costs and inconvenience to the vessels. Adding the pilotage requirement on a 300 ton motor yacht in the same fashion as on a 100,000 ton cruise ship, adds about \$1800 per day in fees, plus the costs to carry an extra, unfamiliar person on what is usually a pleasure charter. On these yachts, a pilot is typically underutilized, as these vessels operate with a much more relaxed itinerary, daytime cruising, and with longer stays on anchor and in port calls. Because of the added costs, and especially the burden of eliminating a berth in very limited capacity vessels, charterers are motivated to cruise elsewhere around the world, to the detriment of our port communities and businesses who could benefit from this traffic. The State of Washington currently allows waivers to State pilotage requirements for this type of vessel, so they are getting some of the business that would otherwise come to our state.

Southeast Conference members include representatives from most Southeast community governments and Chambers of Commerce, visitor's bureaus, non-profits, utilities, businesses, and concerned citizens. (We currently have over 100 members, including 28 communities, 9 Chambers of Commerce, 9 Native Organizations, 18 non-profits and community organizations, and 9 transportation organizations.) Our goals include developing strong economies, improving the region as a good place to live and work, and encouraging and assisting in responsible development in the tourism sector.

Senator Therriault

February 6, 2002

Page 1 of 2

Southeast Conference

P.O. Box 21989 Juneau Alaska 99802-1989 Tel. (907) 463-3443 Fax (907) 463-5670

We would appreciate it if you could review the language in the Alaska Marine Pilotage Act, passed in 1995, with a mind to possible changes that could resolve what we think was an unintended consequence. We believe it is in the best interests of our member communities, and for commerce in our state, with minimal impact on the level of protection to our waters. We are hopeful you can initiate legislation to either change this law, or allow the relevant agencies to grant waivers. We stand ready to support these changes in whatever manner you consider appropriate.

Sincerely,

Loren Gerhard
Projects & Policy Director

Juneau Economic Development Council

February 12, 2003

Senator Gene Therriault
Senate President
State Capitol
Juneau, AK 99801-1082

Re: exemptions from marine pilotage statutes for large yachts

Dear Senator:

I am writing on behalf of the Juneau Economic Development Council (JEDC) to voice our support for changes to state pilotage laws to allow large, private foreign flagged private yachts to cruise in Alaska waters without a marine pilot aboard.

The JEDC works to enhance quality of life by actively promoting economic diversity and sustainable development in all of Southeast Alaska. We assist businesses in creating family-wage jobs with our business counseling and loan programs, as well as serving as the Overall Economic Development Planning agency for the City and Borough of Juneau.

It is a goal of JEDC to work with residents of Juneau and Southeast Alaska to help utilize our natural, cultural and intellectual resources wisely in order for our economy to be competitive in a national and international market place. The challenge is to help create family-wage jobs in a sustainable economy while at the same time maintaining our unique quality of life.

Tourism has now become one of the main economic engines in SE Alaska for communities that had previously relied only on resource development. It is my understanding that many coastal communities are missing out on the economic opportunity brought about by the visitation of independent visitors aboard these yachts. If a change in state law can help stimulate these areas towards an improved economy, we are committed to supporting this effort.

Thank you for addressing this important economic issue.

Sincerely,

Lance Miller
Executive Director

February 20, 2003

Senator Gene Therriault
Senate President
State Capitol
Juneau, Alaska 99801-1082

Dear Senator Therriault,

I would like to add the support of the Greater Ketchikan Chamber of Commerce for the current efforts to change Alaska law to allow private yachts registered outside of the US, to travel into Alaskan waters without a marine pilot onboard.

In Ketchikan, the tourism and maritime support industries are important economic sectors. Although cruise ship passengers provide the main economic engine for our visitor industry, our member businesses understand the value of attracting the independent tourists arriving in our city by yacht. Ketchikan's maritime industries are prepared to support the sophisticated vessels that comprise this unique fleet of privately owned ships. The impact of spending in our community by this growing sector of the yacht industry cannot be overstated.

The Chamber supports the efforts by yacht owners, communities and other small businesses to change this state law, whose only effect has been to stifle commerce. It is our hope that the groups working on this issue, including our local marine pilots, will be able to reach a compromise allowing all yachts to safely travel in Alaska.

Please consider this change that will help stimulate the economy for many small businesses in Ketchikan, as well as throughout Southeast Alaska.

Thank you for your timely consideration of this matter.

Sincerely,

Doug Ward
President

Greater Ketchikan Chamber of Commerce

3100 Channel Drive, Suite 300 • Juneau AK 99801
(907) 463-3488 • Fax (907) 463-3489

February 12, 2003

Senator Gene Therriault
Senate President
State Capitol
Juneau, AK 99801-1082

Dear Senator Therriault:

As the Executive Director of the Juneau Chamber of Commerce, I would like to add the support of our organization for a change in Alaska statutes that will allow additional private yachts to travel into Alaskan waters without a marine pilot aboard.

Although Juneau is enjoying a stable economy at this time based on a combination of government and private employment and summer tourism positions, other areas of Southeast are not as lucky. In communities where timber and fish were once the mainstays, the tourism industry is becoming an important partner. In Juneau, a community which hosts nearly one million visitors a year, we have long understood the value of these independent travelers to our economy.

As you may know, a private sector group in Juneau is in the permitting stage for construction of a new dock to provide additional moorage space for yachts, small cruise ships and lightering vessels. There is no better way to gauge business opportunities than by those who are willing to invest in the infrastructure of our community.

The Chamber supports the efforts by Alaska Yacht Services and Provisioning to change this state law which significantly discourages yacht visitation. Without an amendment to the current marine pilot regulation that states that "all pleasure craft foreign flagged must hire a state marine pilot onboard," Southeast Alaska is missing out on a wonderful economic opportunity. Please consider this change in direction that will help stimulate the economy for many small businesses in Juneau, as well as throughout Southeast and coastal Alaska.

I thank you for your consideration of this issue.

Sincerely,

A handwritten signature in black ink, appearing to read "Jamie Parsons", written over a horizontal line.

Juneau, AK 99801-1182

Dear Senator Theriault:

I am writing in support of the proposed change to the marine pilotage law concerning foreign flagged yachts. As manager of the Seadrome Marine Complex a docking facility owned by Goldbelt in downtown Juneau, I have observed vessels that become very frustrated with the current regulations and head for friendlier ports. Our customer base is made up of small cruise vessels, day boats and yachts. This past year, approximately 25% of our moorage business came from yachts and transient vessels. Most of these vessels travel from the east coast specifically to visit Alaska while others are on their maiden voyage after leaving one of the boat builders in the Puget Sound area.

We have noticed a steady increase of yachts visiting Alaska over the past five years and hear about many more that decide not to make the trip because of the costly pilotage requirements. Although I have no way of knowing the potential market that is discouraged from visiting Alaska because of the current regulations, my feeling is that it is considerable. The limited availability of pilots is also problematic for vessels such as yachts with an ever-changing schedule.

The independent yacht visitor has a comparably greater positive economic impact by spending days if not weeks in Alaska and spreading their purchasing power over numerous businesses and communities. This positively impacts a wide variety of businesses from groceries to carpet cleaners and flower shops and fuel companies.

I urge you to consider an exemption or similar action to allow this market to reach its potential in Alaska. Many businesses and communities throughout the region will realize the benefits.

Best regards,

Jeff White

Senator Gene Therriault
Senate President
State Capital
Juneau, AK 99811-3100

Dear Senator Therriault:

As the long time owner of a small hotel and restaurant in downtown Juneau, I am supporting a change in Alaska's Marine pilotage laws to allow large pleasure yachts to operate without additional marine pilots while in Alaska. I cannot stress strongly enough the impact the private yacht traffic has on my business.

The Summit Restaurant and the Inn at the Waterfront is one of the few businesses on the South end of Franklin Street that stays open throughout the winter months to better help serve our visitors and legislative friends from all over the state. Many companies in the downtown area enjoy business brought from all sectors of our cruise ship industry. As you may know when passage is booked on one of the larger cruise ships, all meals are included. (As are the midnight buffets the ships are so famous for!). For this reason, the independent visitor traffic is of the utmost importance to my economic viability.

The amount of money that is spent these yachts in a community can be staggering. I have witnessed this first hand on numerous occasions. It would seem that the legislature should do all it can to attract these desirable tourist to Alaska; ones that spend freely and leave no negative impacts behind.

Thank you for your consideration to these charges that will have a very positive impact on my small business.

Sincerely,

Ann B. House
Owner

Miss Scarlett's Greenery

124 Seward Street Juneau, Alaska 99801 907-586-1766 Fax: 907-586-6545 800-586-1767

February 10, 2003

Senator Gene Therriault
Senate President
State Capitol
Juneau, AK 99801-1082

Dear Senator Therriault:

As the co-owner of a local, family owned business that depends on Juneau's summer visitors for our economic viability, I would like to add my voice of support to a change in Alaska's marine pilotage laws to allow large pleasure yachts to operate without additional pilots aboard while in our waters.

Although Miss Scarlett's Greenery enjoys a steady local business during most of the year, I can truthfully state that the income we derive from independent yacht traffic is crucial to our bottom line. It makes the difference between having a great season and having one in which we wonder how we'll make it through the very slow fall and winter until the legislature arrives.

We are one of many small businesses in Southeast that wouldn't typically come to mind when you think of these affluent visitors. But we supply a product that can only be enjoyed while fresh, not unlike produce, dairy and meat, which must be purchased while in port.

Please bear in mind the impact your decision will have on our livelihood. Alaska is the destination of a lifetime for many of the customers we come in contact with each summer. The government should be doing all it can to attract these desirable visitors to our state, especially during these times of economic uncertainty.

Thank you for your consideration of this issue. Please let me know if you would like any further information regarding our reliance on this important sector of the tourism industry-but please call after Valentine's Day.

Sincerely,

Samra Green
Co-owner
Miss Scarlett's Greenery

February 10, 2003

Dear Senator Therriault:

As the Executive Director of the Douglas Island Pink and Chum Corporation (DIPAC) in Juneau, I am writing to support a change in Alaska law that will allow large private yachts to travel into Alaskan waters without an additional marine pilot aboard.

As the main producer of enhanced salmon for the communities of northern Southeast, we are very aware of and concerned about issues affecting sport fishing in the inside waters. We produce salmon for sport and commercial fishermen, as well as the expanding local salmon charter business. Although most of our operating funds are earned in a traditional manner through cost recovery of our fish, a percentage of our expenses are covered each year by money brought in through the tourism attraction attached to our hatchery. We host over 100,000 visitors at our facility each summer, with a growing number originating from non-cruise ship travel.

We in Juneau understand the economic opportunity associated with independent travelers to Alaska. The cruiseships provide the majority of our client base, but locals, their relatives and other tourists visiting Juneau have a significant impact. The money spent in our community by developing the private yacht industry is welcome and needed. I am in total support of any changes in statute which will increase the traffic to our area by these desirable tourists. It is my understanding that the current law has never been enforced, and this is all the more reason to investigate changes at this time.

Thank you for your consideration of these changes in statute which benefit all the coastal communities in Southeast Alaska

Sincerely,

A handwritten signature in black ink that reads "Don Carter". The signature is written in a cursive, flowing style.

Juneau, AK 99801-1182

Senator Con Bunde, Chair
Senate Labor & Commerce
State Capital
Juneau, AK 99801-1182

RE: Senate Bill 20 – Alaska Board of Marine Pilots

Dear Senators Therriault and Bunde:

The Sitka Economic Development Association would like to encourage your amendment of Senate Bill 20 to allow an exemption of private boats up to 500 tons from requiring a pilot be aboard the boat.

Over the last 10 years, Sitka has made a concerted effort to build the number of visits of private yachts to Sitka. This is good economic development and has provided needed dollars to Sitka's economy. Without the exclusion, these boats have made it quite clear they won't travel Southeast Alaska waters if they have the heavy expense of having a pilot aboard for the voyage. In addition, many boats of this size don't have the space for a pilot.

Placing a pilot on a private pleasure yacht for safety reasons would be duplicating what insurance companies are already doing to assure the safe operation of a boat. Insurance companies require the owner of a large yacht to name the captain of the vessel and then evaluate the experience and/or skills this person has to operate such a boat. Once the insurance company has sufficient confidence the named captain can indeed operate the boat, the policy will then name that person as the only master of the boat.

The importance of the private yacht industry to Sitka can't be overstated. Please give serious consideration to the exemption being requested.

Sincerely,

Jonathan D. Krebs, CEcD
Executive Director

Motor Yacht Mi Gaea

20 February 2003

Senator Gene Therriault
Senate President
State Capitol
Juneau, AK 99801-1082

Dear Senator,

As the Master of the Motor Yacht Mi Gaea, I had the opportunity to operate the yacht for her owners in the beautiful waters of Southeast Alaska during the summer of 2002. This is my second voyage in Alaskan waters, and by far, the most extensive. During this second trip, I became aware of the little known regulation regarding the compulsory use of a marine pilot aboard yachts while cruising Alaskan waters. Further, I understand that there is currently an effort underway to modify the regulations by providing for an exemption to the pilotage requirements for qualified yachts and captains. It is this subject I wish to address.

The Motor Yacht Mi Gaea is a Cayman Islands registered private yacht, 158 feet in length and 476 Gross Registered Tons displacement. We carry as many as 12 guests in the owner's party and a full time crew of 12. The past summer we spent approximately 50 days underway with owners and their guests, and all of the fuel, provisions, supplies, and equipment required to supply the vessel for that period were purchased in Alaska. In addition, we hired aircraft, fishing guides, buses, rental cars, and frequented many restaurants.

Also associated with many of the larger private yachts are the private aircraft that bring the guests to the vessels. This generates revenue in aircraft fuel, landing fees, and fees charged by Fixed Base Operators at airports.

I conservatively estimate that this yacht and her guests spent in excess of \$200,000.00 in the 3 months we were in Alaska. In my experience, this revenue and the activities that generated it are of low impact to an area. We certainly don't generate the revenues the cruise ships do, but neither do we bring the hordes of people that inundate some of your port cities at times.

I would like to plan more visits to Alaska, and encourage my fellow captains to do so as well. However, the pilotage requirement for yachts as currently written, will prevent me and many of my colleagues from doing so.

MI GAEA LTD.

Email: Captain@MiGaea.com

Page 2

The nature of the operation of yachts is simply not compatible with the pilotage system. Our owners and guests make or change plans with very short notice, sometimes only hours. I don't believe that the pilotage system of any area can respond that quickly. I might add that with the exception of the Panama Canal, yachts are generally not required to carry pilots.

My suggestion is to pattern an exemption for yachts similar to what the State of Washington has done. Prior to entry into the pilotage area, a yacht captain is required to identify his experience in the waters of the Puget Sound, identify communications and navigation equipment aboard, and identify crew members and their experience. This, in addition to the required Alaska State Water Pollution insurance coverage, which has its own equipment requirements, should provide for safe navigation and the continuation of this valuable commerce.

Most Sincerely,

A handwritten signature in cursive script that reads "Mark A. Howard". The signature is written in dark ink and is positioned above the typed name.

Lloyd Harris, Engineer

February 6, 2003

Senator Gene Therriault
Senate President
State Capitol
Juneau, AK 99801-1082

Dear Senator Therriault:

I am writing to you in my position as the captain of the M/Y Alliance, a 135ft American flagged private yacht homeported in Seattle. Although my vessel is exempted from the current Alaska marine pilotage laws, I would like to add my support to the effort underway to expand this exemption to allow larger foreign flagged yachts into Alaska waters without an additional marine pilot.

I have two years of experience cruising in Alaska, and have sailed in nearly every body of water in the world. With a crew of four and eight guests, the economic impact of a visit from our yacht is a significant one. We regularly take on 12,500 gallons of fuel during a typical season. Our crew and guest eat in local restaurants on an average of 5 nights during a 3 week trip and shop heavily whenever we are in port. I would estimate our spending during a normal cruising season to be in excess of \$100,000. In the communities visited by our vessel.

I have recently had contact with other captains and owners who are in the process of making alternative cruising plans because of the restrictive pilotage regulations in Alaska. It is unreasonable to expect them to accommodate an additional and unknown crewperson for the length of time they generally spend on a cruise in Southeast. Owners typically keep their yacht and crew on 24 hour standby, as to be available to ship out within a period of a few days or less. This also contributes to the impracticality of hiring a marine pilot. It is my understanding that the pilot organization in Southeast prefers to schedule their trips many weeks, if not months, in advance. It must be very hard to accommodate our yachts that are required to notify them only 48 hours in advance of entering a pilotage region.

As this law has never been enforced, it is serving only to impede commerce in Alaska. Thank you for your consideration of these changes. I look forward to visiting your beautiful state again in the near future.

Sincerely,

A handwritten signature in black ink, appearing to read "Skip Sethmann".

Captain Skip Sethmann

February 5, 2003

Senator Gene Therrault
Senate President
State Capitol
Juneau, AK 99801-1182

Dear Senator,

Delta Marine, located in Seattle, Washington is a manufacturer of custom luxury yachts with a complete refit & repair division. Our operation builds and services yachts of up to 225-feet and 1300 gross tons for a global clientele.

Many of our customers look forward to cruising Alaska when departing from Delta. However, several recent customers have decided to cancel their Alaska trips due to the stringent pilotage requirements of the State of Alaska. This affects Delta and our community as well as the waterfront communities of Alaska.

The following are three cases in particular that I wanted to bring to your attention:

- The 151' *Sally Ann* (498 gross international tonnage), after completing a five-year circumnavigation in 2001, returned to Delta for some routine maintenance work. The last leg of their amazing journey was to take them to Alaska. However, due to the rigorous pilotage requirements of the State of Alaska they canceled their trip and headed south instead.
- The 165' *Georgia* (381 gross international tonnage), is yet another a foreign flagged yacht that had plans to cruise Alaska. This story is unique, as this yacht sailed from the Mediterranean for a complete re-paint at Delta in 2002, as well as the opportunity to cruise the beautiful waters of the North Pacific. Once here, they were made aware of the strict pilotage requirements and too, canceled their plans to cruise to Alaska.
- Finally, the 126' *Andrea* (456 gross international tonnage), is a tough, seaworthy expedition yacht due to be delivered by Delta late this spring. Delta has quickly become known around the world for building these types of yachts and this client has come from Europe to Seattle to build. Although they would like to spend the summer cruising Alaska, taking this yacht to the far places it was built to see, they are planning to cancel their cruise to Alaska, again due to the strict Alaska pilotage requirements.

This is an issue that will continue to affect Delta, our customers, and the coastal communities of Alaska. We believe that changes to the law should be addressed as part

DELTA MARINE INDUSTRIES
1608 SOUTH 96TH STREET
SEATTLE, WASHINGTON 98108 USA
T: 206.763.2383 F: 206.762.2627

of your current work on SB 20, the Board of Marine Pilots extension legislation. The requirement for pilotage of yachts should be thoroughly reviewed, with a goal of eliminating or narrowing this requirement.

The large yachts Delta builds and services are well maintained and well run. As a group, these yachts have an outstanding safety record. Removal of the pilotage requirement for these private pleasure craft is consistent with both maintaining environmental protection and encouraging economic opportunity, as well as standardizing marine pilotage law along the entire coastline from Washington to Alaska.

Your attention and efforts are appreciated. If I can be of any further assistance or answer any questions please let me know.

Sincerely,

Michelle Jones

JUNEAU

June 14, 2002

The Honorable Tony Knowles
State Capitol
P. O. Box 110001
Juneau, AK 99811-0001

Dear Governor Knowles:

I would like to bring to your attention a situation which I believe may have been caused inadvertently; however, it has the potential to significantly impact the economy of several southeastern communities in Alaska.

Several years ago I had the privilege of being a guest on a private motor yacht that cruised the waterways of southeastern Alaska, primarily in the areas between Ketchikan, Sitka and Juneau. I, and the other seven guests, had a wonderful time shopping in Sitka and Juneau, fishing and sightseeing in some of America's most beautiful waterways. Following on this experience, two years ago I had the opportunity to purchase my own boat and it was our intention to spend this summer in southeastern Alaska. Unfortunately, when my captain was preparing the cruise this spring he came across *Alaska Statute 08.62.180* which deals with marine pilotage requirements in Alaska. While we are familiar with typical pilotage requirements in other states and countries, this law is unique, in our understanding, in that it essentially requires full time pilotage not just in and out of harbors, but also throughout the waterways. Further, there are no qualification exemptions for demonstrated captain proficiency.

As such, pursuant to this statute we must essentially hire a pilot from one of the two companies providing this service for the entirety of our cruise. I contacted both of these firms in Ketchikan and was informed that the cost would be \$1,400.00 to \$2,200.00 per day depending on our schedule. This would equate to approximately \$72,000.00 for our summer cruise. Because of this requirement we have altered our plans and we are going to spend the summer in British Columbia. This is obviously a severe disappointment given that I am an American citizen.

I do fully understand the need for appropriate pilotage requirements under certain circumstances; however I believe that this statute's lack of flexibility is unreasonable. By way of example, our boat is approximately 135 feet in length and we have three licensed captains as part of our seven-person crew. Our captain is fully licensed to 1600 gross

RECEIVED
JUN 19 2002
DIVISION OF
OCCUPATIONAL LICENSING
JUNEAU

Page Two
Governor Tony Knowles
June 14, 2002

tons and is intimately familiar with the Alaskan waterways. Under AK 08.62.180 those qualifications are irrelevant; however, in British Columbia we received a pilotage exemption in less than two weeks.

We would recommend to you a change in AK 08.62.180 to either allow an exemption process for qualified captains or to place a reasonable length limitation (possibly 200 feet or less) exemption for pleasure craft with properly licensed captains. While the statute currently has gross tonnage limitations, I believe you will find such measurements inconsistent and difficult to administer due to the many tonnage conventions utilized in the United States and Internationally.

The real damage caused by making these pilotage requirements unreasonable is to the small towns of southeast Alaska. I have become aware of eleven vessels that have chosen to not cruise in Alaskan waters this summer. I am certain there are others as well. In our own case we would have had 48 guests (6 cruises with 8 guests) over the summer, seven crew living with the boat all summer, fuel, food, fishing licenses, tackle, airline traffic, souvenir shopping, restaurants, cabs, etc. Just our boat alone would have generated over \$250,000 in economic activity in Ketchikan, Sitka and Juneau. If we assume 20 boats avoid Alaska because of unnecessary pilotage requirements, \$5,000,000 of economic activity will be lost.

Please understand, we are fully in favor of proper safety and environmental standards, and we wish for Alaskan waterways to be kept clean and safe for all future generations. Providing reasonable exemptions, as is done throughout the rest of the United States and around the world, will not require these standards to be lessened.

I recognize that since this will require a legislative solution, you cannot resolve this situation for this summer. I hope that something can be done before next spring. Please call me if I can provide additional information, or if I can help you in dealing with this situation.

Sincerely,

David L. Sokol

C Staying the Course

Despite wavering economies and the threat of global terrorism, 2002 luxury yacht order book is up 18.4% • Italy tops country listings • 11.4 miles of yachts under construction • Benetti tops builder list • Big gains by Germany, New Zealand, Australia, Denmark • 507 yachts over 80' under construction

THE LUXURY YACHT INDUSTRY IS DEMONSTRATING extraordinary resiliency in the face of threats from a sagging U.S. economy and global terrorism.

While the industry backed off from its red-hot 31% rate of growth in last year's order book, it still turned in a surprisingly robust 18.4% increase in total business. While gains were posted in nearly every quarter, the strongest corporate and national performers were tried-and-true companies and countries.

In terms of overall product categories, sailing yachts were up 12.5% and motor yachts 19.5%. In both motor and sailing yacht categories; however, the strongest segments were the upper and lower ranges. Sailing yacht orders between 90 and 99 feet were up 100%, while the 150-foot-plus sail segment jumped five orders or 50%. In the motor yacht sector, the 80- to 89-foot range leaped 38 orders, or 36.9%, while the 150-foot-plus range rose 11 orders to a total of 73, a jump of 17.7%.

The only drop in any segment was among 100- to 119-foot sailing yachts, which decreased by three orders, or 17.6 percent.

Reinforcing the industry trend toward ever-larger yachts, this year's order book reflects a two-foot increase in the average size of luxury yachts now under construction to 119.4

feet. This is due in no small measure to the 160-meter project started and stopped under a veil of secrecy by Lürssen and Blohm & Voss for a Brunei owner. Now code named *Platinum*, the structurally complete 525 footer has a new owner and will be finished in the Middle East.

In The Wake Of September 11th

In trying to gain perspective on the underlying strength of

the luxury yacht industry, numerous builders interviewed for this report said the majority of clients with whom they were working prior to the terrorist attacks of September 11th are moving forward with their projects. Feadship, for example, reported two new orders in the second week following the World Trade Center and Pentagon attacks. Paolo Vitelli, chairman of the Azimut-Benetti Group, reported that none of the negotiations underway at the time were broken off after the attacks, and that none of his clients had asked for a deposit to be returned.

"The strategy of the terrorists has not shown any effect," he said, adding his clients have openly expressed their support for a business-as-usual climate. "Things must move forward," Vitelli said, "or otherwise we're simply playing their game."

Henk deVries III, managing director of Feadship's DeVries Shipyard, draws a similar analysis. Following the attacks, deVries said he informally checked in with all his

• = New Addition to Global Order Book Builders

existing and prospective clients. "All of our clients we're working with are going ahead," he said. "Even with this horrible situation, the outlook at Feadship is good."

Lürssen's sales manager, Michael Bremen, said inquiries remain at a high level. "I refuse to be a pessimist," Bremen said. Despite the recent attacks, the outlook remains good for his company. "The recession was going to happen anyway," Bremen said, adding that U.S. Dollar/Euro currency exchanges remain favorable for U.S. buyers, a condition that is likely to continue. "Saber-rattling tends to strengthen the dollar," he said.

On the production side, several builders reported their chief concern was the backlog of orders in their dealer networks and inventory. The unwillingness to start new orders on speculation is reflected in the performance of companies such as England's Sunseeker, which this year slipped five notches to 15th place in the builder standings.

On the positive side of the production scale is the rise into the top-20 list of such companies as Lazzara Yachts and Destiny Yachts. The increased performance of these companies is due in large measure to their aggressive investment in recent years in new product development. "The time to move, the time to grow is on the downturn," said Dick Lazzara, CEO of Lazzara Yachts, which is introducing two new models, 80- and 106-footers, at the Fort Lauderdale International Boat Show. "It's time to pin our ears back and try to grow market share. We're just fortunate we started developing new products eighteen months ago. Now, every month that goes by will make us a stronger company."

Vitelli also remains bullish on the production side of his group. The Cannes Boat Show (just prior to the September 11th attacks) was excellent he said, and dealers both in Europe and the U.S. remain optimistic. For Azimut/Benetti's part, Vitelli said he is prepared to move forward with a planned Euro\$28 million investment in new construction capacity at the company's new Lusben yard in Viareggio.

10. France	15	1,566'	104'	9

Gauging Brokerage/Charter Impact

While the order book reflects continued resiliency in the existing new-construction sector, weakness in both chartering and brokerage sales does not bode well for the short-term prospects of those sectors. Several brokers interviewed in the aftermath of September 11 reported that the only phone calls they received were those canceling pending deals. Charter agents and fleet managers reported charter cancellations for next summer's Mediterranean season.

But yacht broker Merle Wood of Merle Wood & Associates, said he's seen the market fluctuate wildly in the past and recover quickly. The issue is not one of not enough people of means to support the market. "Tons of people have tons more money than they had five years ago," he said. What will make the telephone start ringing again, Wood said, is when people begin to appreciate the safety and security large yachts represent. He noted that private airplane leasing and sales are already red-hot. The question many people will begin asking themselves is, "Do I want to check my family into a public resort somewhere, or do I want them to be on our own private, secure yacht?"

Others, such as Bob Saxon of Bob Saxon Associates, sees opportunities in the current upheaval. For one, he said, such periods of crisis always end up "winnowing out" the industry, ultimately leaving strong and responsive companies in a better position. His company is working quickly to "reshape the charter product" to make it more attractive to a wider audience. Noting the bankruptcy of Renaissance Cruise Lines, he is developing an all-inclusive charter package, including private air transportation, to make chartering more appealing to traditional high-end cruise line customers. "There are hundreds of thousands of stranded cruise ship passengers who are capable of purchasing a yacht charter vacation," Saxon said. Noting that the time is ripe for industry unity, Saxon said, "Everybody fears change. But the best way to cope with change is to create it yourself."

Who's On Top

Azimut/Benetti, with an astounding 64.7% jump in new orders, consolidated its position at the top of the overall builder category. A distant second is Lürssen, which increased its orders 10% to move up from fourth. Feadship, despite its 18% increase dropped to fourth behind Ferretti, which dropped from second to third in the rankings on a 3% dip in orders. When considering only custom builders, Feadship is third.

GMDSS (Global Marine Distress Signaling System) as a Maritime Security Tool

Published in Pacific Maritime September 2002

Fortunately, there are already easy, low cost and timely options in place that can help provide Maritime Domain Awareness now. Vessels equipped with GMDSS (Global Marine Distress Signaling System) are capable of automatically sending their vessel's position on a regular or modified schedule to a centralized tracking system for dissemination to the Coast Guard and other federal, state and private entities charged with addressing maritime security. The International Maritime Organization (IMO) has prescribed all vessels over 300 gross tons engaged in international trade be equipped with GMDSS to aid notification of maritime emergencies. Polling of vessels' positions can be initiated when a vessel provides its 96 hour Advance Notice of Arrival, which for many vessels is 2,000 miles offshore. The position information on participating vessels can be compared to other data sources, such as satellite imagery, to identify vessels that have no correlating advance notice of arrival or vessel tracking information. These few vessels, the needles in the haystack, become the focus of interest and become subject to additional control measures exercised by the Coast Guard, such as prior boarding, interception at sea, etc. The fastest and least expensive way to bring this Maritime Domain Awareness tool on line is to tap the maritime community who has a "shared commitment" to aid homeland security. The non-profit Maritime Information Service of North America's (MISNA) network of marine exchanges can use available secure chart display software such as Secure Asset Reporting System (SARS) to process and disseminate the GMDSS generated vessel position reports to the Coast Guard and other agencies to aid Maritime Domain Awareness. As the equipment, organizational infrastructure and software are all in place, this vessel tracking system can be in place in a matter of months. The cost to the marine industry would be minimal, averaging less than \$30 per month/ per vessel for the satellite communication fees incurred in sending position reports. MISNA refers to this vessel locating system as the "Automated Secure Vessel Tracking System".

When implemented it will complement the existing and developing VTS and AIS systems, providing the long range strategic input needed for Maritime Domain Awareness. Example of ASVTS Tracking.

The satellite component uses the IMO approved Inmarsat worldwide satellite communications network to send and receive messages. Once the owner/operator authorizes access, a vessel tracking entity such as MISNA can remotely, through a satellite transmission, download a program into the transceiver directing it to periodically transmit the vessel's position to a satellite. The information is then relayed from the satellite to a Land User Terminal to the end user, i.e. marine exchange, via e-mail for display on a chart or database and further dissemination to authorized entities. As the proposed legislation also addresses the tracking of domestic vessels, there are a number of other satellite or other communications equipment vessel tracking options available for a reasonable fee.

Ed Page is the Executive Director of the Marine Exchange of Alaska, and was previously the Captain of the Port of Los Angeles/Long Beach

Reporting Service have been testing this system for the last year on CG vessels, the Alaska Marine Highway System ferries, tug boats, fishing vessels and a cruise ship. It works!

Coast Guard personnel are already fully tapped assigning their limited and stretched work force to operate their vessels and aircraft, conduct security boardings, inspect ships, and patrol our ports. They are not in the position to now stand up a nationwide vessel tracking system. The added information/data management workload can quickly and adequately be done by the Maritime Information Service of North America and member marine exchanges that can serve as the "trusted agents".

As President Bush has stated, we must push our borders further out. Requiring vessels to operate transponders only when operating in U.S. navigable waters, extending 12 miles off our shores is not providing adequate Maritime Domain Awareness. International maritime law and Freedom of Navigation issues may lead the U.S. to hesitate to require the operation of transponders out to our territorial sea limit of 200 miles, or a vessel's position some 2,000 miles offshore when it provides its 96 hour advance notice of arrival. Security processing incentives can lead vessel owners and operators to keep their transponders on at all times, even when they are in foreign ports and waters. A vessel cooperating with the U.S. ASVTS program can receive "express lane" privileges, and receive a lower security threat risk rating. The old adage "Time is Money" applies. A majority of vessels will voluntarily cooperate.

The above provides a straightforward and easy way to implement Maritime Domain Awareness option. While this is not the panacea and many other maritime security issues remain to be addressed, the proposed Maritime Information Service of North America's ASVTS can address one of the more vexing aspects of our homeland defense issues today.

Vessel Tracking: Introduction

 Automated Secure
 Vessel Tracking
 System

Marine Exchange of Alaska's Automated Secure Vessel Tracking System (ASVTS) provides an effective and low cost option for tracking the location of vessels and providing e-mail communications. The varied and extensive maritime activity in remote areas of Alaska under extreme weather conditions makes maritime operations in this region more dangerous than anywhere else in the nation. The use of ASVTS will aid responses to maritime incidents to help prevent the loss of life and property, prevent and respond to oil spills, aid maritime security initiatives and improve the efficiency of maritime operations.

ASVTS serves a valuable role in the following areas:

II Coast Guard Search and Rescue Operations: The Coast Guard has an enviable search and rescue record in Alaska. Oftentimes, the Coast Guard calls on mariners nearest the area of distress to provide immediate assistance to other mariners in distress as the Coast Guard travels over long distances to remote regions of Alaska to respond. By accessing ASVTS internet posted information on vessels the Coast Guard can quickly locate vessels that can immediately render assistance to stricken vessels and their crews until the Coast Guard arrives on scene.

A large number of false emergency reports leads to the Coast Guard spending more of its operating funds and resources responding to false alarms than actual rescues. Responses to false alerts can be reduced through the wide use of vessel transponders that allow immediate verification of the location and status of vessels, information that can help rule out accidental and non-emergent alarms.

II Homeland Security: The fastest and least expensive way to bring this Maritime Domain Awareness tool on line is to tap the maritime community who has a "shared commitment" to aid homeland security. The non-profit Maritime Information Service of North America's (MISNA) network of marine exchanges can use available secure chart display software such as Secure

...reporting system (ASVTS) to process and disseminate the GPS generated vessel position reports to the Coast Guard and other agencies to aid Maritime Domain Awareness. As the equipment, organizational infrastructure and software are all in place, this vessel tracking system can be in place in a matter of months. The cost to the marine industry would be minimal, averaging less than \$30 per month/ per vessel for the satellite communication fees incurred in sending position reports. MISNA refers to this vessel locating system as the "Automated Secure Vessel Tracking System".

Transportation Efficiency: Alaska's harsh weather and sea conditions often lead to delays in vessels' schedules. Through the use of ASVTS, information on vessels' updated arrivals can be communicated to those dependent on the arrival of goods. ASVTS essentially serves as an Intelligent Transportation System (ITS) for the Alaska maritime industry by posting information on the location of vessels and their updated ETAs (estimated time of arrival) through the Marine Exchange's internet web site.

Improved Communications: The safety of vessels, emergency response and shipping information are all challenged in Alaska by the marginal communications due to the mountainous terrain and long distances. These factors lead to sparse coverage by VHF radios and tenuous high frequency communications. The use of transponders that send data and information as well as e-mail to a network of satellites will dramatically improve communications in Alaska. ASVTS is designed as an open architecture system that can receive, process and display vessel positions and data from a variety of satellite and VHF/HF communications transponders that prove to operate effectively in Alaska.

Environmental Protection and Response: ASVTS can track the location of hundreds of standby fishing and oil spill response vessels and tugs to assist response coordinators efficiently deploy oil spill response equipment or take a stricken vessel in tow to prevent a grounding and release of oil. ASVTS will also aid the positioning of spill response vessels and skimmers to the heaviest oil concentrations and the most environmentally sensitive areas to minimize the impacts of oil spills.

Fisheries Monitoring: With National Marine Fisheries Service and Alaska Fish and Game approval, ASVTS can meet fishing vessel tracking requirements to verify compliance with fisheries regulations and avoidance of environmentally protected areas.

Maritime Education: The information on the location of ships and the e-mail communications provided by ASVTS will be an element of the Marine Exchange's Maritime Pride and Education Program. ASVTS will allow Alaska students to vicariously participate in the voyage of vessels to develop an appreciation for the maritime industry and to learn about the job opportunities available in this field.

Weather Reporting: ASVTS can be used by vessels to query Alaska weather stations (buoys and shore stations) to determine real time weather reports. This system can also transmit weather information collected by vessels to the

As ASVTS develops, the carriage of transponders on hundreds of vessels operating in Alaska will, in addition to developing a "safety net", will improve maritime communications, aid maritime security, and help ensure efficient and environmentally sound maritime operations

Washington State

RCW 88.16.070

Vessels exempted and included under chapter -- Fee -- Penalty.

A United States vessel on a voyage in which it is operating exclusively on its coastwise endorsement, its fishery endorsement (including catching and processing its own catch outside United States waters and economic zone for delivery in the United States), and/or its recreational (or pleasure) endorsement, and all United States and Canadian vessels engaged exclusively in the coasting trade on the west coast of the continental United States (including Alaska) and/or British Columbia shall be exempt from the provisions of this chapter unless a pilot licensed under this chapter be actually employed, in which case the pilotage rates provided for in this chapter shall apply. However, the board shall, upon the written petition of any interested party, and upon notice and opportunity for hearing, grant an exemption from the provisions of this chapter to any vessel that the board finds is a small passenger vessel or yacht which is not more than five hundred gross tons (international), does not exceed two hundred feet in length, and is operated exclusively in the waters of the Puget Sound pilotage district and lower British Columbia. Such an exemption shall not be detrimental to the public interest in regard to safe operation preventing loss of human lives, loss of property, and protecting the marine environment of the state of Washington. Such petition shall set out the general description of the vessel, the contemplated use of same, the proposed area of operation, and the name and address of the vessel's owner. The board shall annually, or at any other time when in the public interest, review any exemptions granted to this specified class of small vessels to insure that each exempted vessel remains in compliance with the original exemption. The board shall have the authority to revoke such exemption where there is not continued compliance with the requirements for exemption. The board shall maintain a file which shall include all petitions for exemption, a roster of vessels granted exemption, and the board's written decisions which shall set forth the findings for grants of exemption. Each applicant for exemption or annual renewal shall pay a fee, payable to the pilotage account. Fees for initial applications and for renewals shall be established by rule, and shall not exceed one thousand five hundred dollars. The board shall report annually to the legislature on such exemptions. Every vessel not so exempt, shall while navigating the Puget Sound and Grays Harbor and Willapa Bay pilotage districts, employ a pilot licensed under the provisions of this chapter and shall be liable for and pay pilotage rates in accordance with the pilotage rates herein established or which may hereafter be established under the provisions of this chapter: PROVIDED, That any vessel inbound to or outbound from Canadian ports is exempt from the provisions of this section, if said vessel actually employs a pilot licensed by the Pacific pilotage authority (the pilot licensing authority for the western district of Canada), and if it is communicating with the vessel traffic system and has appropriate navigational charts, and if said vessel uses only those waters east of the international boundary line which are west of a line which begins at the southwestern edge of Point Roberts then to Alden Point (Patos Island), then to Skipjack Island light, then to Turn Point (Stuart Island), then to Kellet Bluff (Henry Island), then to Lime Kiln (San Juan Island) then to the intersection of one hundred twenty-three degrees seven minutes west longitude and forty-eight degrees twenty-five minutes north latitude then to the international boundary. The board shall correspond with the Pacific pilotage authority from time to time to ensure the provisions of this section are enforced. If any exempted vessel does not comply with these provisions it shall be deemed to be in violation of this section and subject to the penalties provided in RCW 88.16.150 as now or hereafter amended and liable to pilotage fees as determined by the board. The board shall investigate any accident on the waters covered by this chapter involving a Canadian pilot and shall include the results in its annual report.

[1996 c 144 § 1; 1995 c 174 § 1; 1987 c 194 § 2; 1977 ex.s. c 337 § 6; 1971 ex.s. c 297 § 3; 1967 c 15 § 3; 1935 c 18 § 4; RRS § 9871-4.]

NOTES:

Intent -- 1987 c 194: "The legislature intends to provide a limited exemption from the provisions of this chapter for a specified class of small vessels registered as passenger vessels or yachts. It is not the intent of the legislature that such an exemption shall be a precedent for future exemptions of vessels from the provisions of this chapter." [1987 c 194 § 1.7]

Severability – 1977 ex.s. c 337: See note following RCW 88.16.005.

WAC 363-116-360 Exempt vessels. (1) Under the authority of RCW 88.16.070, application may be made to the board of pilotage commissioners to seek exemption from the pilotage requirements for the operation of a limited class of small passenger vessels or yachts, which are not more than five hundred gross tons (international), do not exceed two hundred feet in length, and are operated exclusively in the waters of the Puget Sound pilotage district and lower British Columbia. For purposes of this section, any vessel carrying passengers for a fee, including yachts under charter where both the vessel and crew are provided for a fee, shall be considered a passenger vessel.

The owners or operators of the vessel for which exemption is sought must:

(a) Complete and file with the board a petition requesting an exemption at least sixty days prior to planned vessel operations in the Puget Sound pilotage district where possible. Petitions filed with less than sixty days notice may be considered by the chair at the chair's discretion.

(b) The petition requesting exemption shall be on a board-approved form which shall include a description of the vessel, the contemplated use of vessel, the proposed area of operation, the names and addresses of the vessel's owner and operator, the dates of planned operations, and such other information as the board shall require on its petition form.

(c) Pay the appropriate initial application or renewal fee with the submission of the petition, which is listed in subsection (5) of this section.

(2) All petitions for exemption filed with the board shall be reviewed by the chair, who shall make a recommendation to the board to be considered at its next regularly or specially scheduled meeting. Consistent with the public interest, the chair may grant an interim exemption to a petitioner subject to final approval at the next board meeting, where special time or other conditions exist. Any grant of an interim exemption may contain such conditions as the chair deems necessary to protect the public interest in order to prevent loss of human life and property and to protect the marine environment of the state of Washington.

Such conditions may include a requirement that the vessel employ the services of a pilot on its initial voyage into Puget Sound waters or that the master of the vessel at all times hold as a minimum, a United States government license as a master of ocean or near coastal steam or motor vessels of not more than sixteen hundred gross tons or as a master of inland steam or motor vessels of not more than five hundred gross tons, such license to include a current radar endorsement.

(3) The recommendation of the chair shall be considered at the next regular or specially scheduled meeting of the board. Interested parties shall receive notice and opportunity for hearing at that time, provided that the party notifies the board at least five days in advance of the meeting of its desire for hearing.

(4) The board shall annually, or at any other time when in the public interest, review any exemptions granted to the specified class of small vessels to ensure that each exempted vessel remains in compliance with the original exemption and any conditions to the exemption. The board shall have the authority to revoke such exemption when there is not continued compliance with the requirements for exemption.

(5) Fee Schedule for Petitioners for Exemption

	3 Months or Less	1 Year or Less	Annual Renewal
A. Yachts			
Up to 100 feet LOA	\$ 300	\$ 500	\$ 200
Up to 200 feet LOA	500	750	300
B. Passenger Vessels			
Up to 100 feet LOA	750	1000	400
Up to 200 feet LOA	1250	1500	500

RCW 88.16.005

Legislative declaration of policy and intent.

The legislature finds and declares that it is the policy of the state of Washington to prevent the loss of human lives, loss of property and vessels, and to protect the marine environment of the state of Washington through the sound application of compulsory pilotage provisions in certain of the state waters.

The legislature further finds and declares that it is a policy of the state of Washington to have pilots experienced in the handling of vessels aboard vessels in certain of the state waters with prescribed qualifications and licenses issued by the state.

It is the intent of the legislature to ensure against the loss of lives, loss or damage to property and vessels, and to protect the marine environment through the establishment of a board of pilotage commissioners representing the interests of the people of the state of Washington.

It is the further intent of the legislature not to place in jeopardy Washington's position as an able competitor for waterborne commerce from other ports and nations of the world, but rather to continue to develop and encourage such commerce.

[1977 ex.s. c 337 § 1.]

NOTES:

Severability -- 1977 ex.s. c 337: "If any provision of this 1977 amendatory act, or its application to any person or circumstance is held invalid, the remainder of the act, or the application of the provision to other persons or circumstances is not affected." [1977 ex.s. c 337 § 18.]

RCW 88.16.150**General penalty -- Civil penalty -- Jurisdiction -- Disposition of fines -- Failure to inform of special directions, gross misdemeanor.**

(1) In all cases where no other penalty is prescribed in this chapter, any violation of this chapter or of any rule or regulation of the board shall be punished as a gross misdemeanor, and all violations may be prosecuted in any court of competent jurisdiction in any county where the offense or any part thereof was committed. In any case where the offense was committed upon a ship, boat or vessel, and there is doubt as to the proper county, the same may be prosecuted in any county through any part of which the ship, boat or vessel passed, during the trip upon which the offense was committed. All fines collected for any violation of this chapter or any rule or regulation of the board shall within thirty days be paid by the official collecting the same to the state treasurer and shall be credited to the pilotage account: PROVIDED, That all fees, fines, forfeitures and penalties collected or assessed by a district court because of the violation of a state law shall be remitted as provided in chapter 3.62 RCW as now exists or is later amended.

(2) Notwithstanding any other penalty imposed by this section, any person who shall violate the provisions of this chapter, shall be liable to a maximum civil penalty of ten thousand dollars for each violation. The board may request the attorney general or the prosecuting attorney of the county in which any violation of this chapter occurs to bring an action for imposing the civil penalties provided for in this subsection.

Moneys collected from civil penalties shall be deposited in the pilotage account.

(3) Any master of a vessel who shall knowingly fail to inform the pilot dispatched to said vessel or any agent, owner, or operator, who shall knowingly fail to inform the pilot dispatcher, or any dispatcher who shall knowingly fail to inform the pilot actually dispatched to said vessel of any special directions mandated by the coast guard captain of the port under authority of the Ports and Waterways Safety Act of 1972, as amended, for the handling of such vessel shall be guilty of a gross misdemeanor.

[1995 c 174 § 2. Prior: 1987 c 485 § 5; 1987 c 202 § 247; 1977 ex.s. c 337 § 8; 1969 ex.s. c 199 § 41; 1967 c 15 § 7; 1935 c 18 § 10; RRS § 9871-10; prior: 1888 p 179 § 27.]

NOTES:

Intent -- 1987 c 202: See note following RCW 2.04.190.

Severability -- 1977 ex.s. c 337: See note following RCW 88.16.005.
