ANALYSIS: (Attach a separate page if necessary)

This legislation will allow the Department of Education & Early Development to establish a school performance incentive program. This program will provide an incentive payment of up to \$5,500 for certified personnel and up to \$2,500 for noncertified personnel if the students in their school demonstrate substantial growth in achievement on state assessments from one year to the next. Incentive payments will be based on four achievement levels. The cost of the incentive program will vary from one year to the next based on the number of schools that qualify and at which level. Because it is not known how many schools will qualify for the incentive payments in FY2007, the department will seek an extended lapse date for this appropriation through June 30, 2008.

The following page outlines the amount of the bonus for each of the achievement levels. There is also an estimate of the range of costs for the program. If 5% of Alaska's school staff qualified for the incentive at the highest level, the cost would be approximately \$3 million and up to \$15 million if 25% qualify.

STATE OF ALASKA
2006 LEGISLATIVE SESSION

BILL NO. SB 235

ANALYSIS CONTINUATION

Staffing: The department will utilize existing staff, to the extent possible, to calculate the schools that qualify for the bonus at which level, the staff to be awarded the bonus and to make the actual grant payments and provide the accounting support. Depending upon the volume of payments, it may be necessary to hire staff. If so, funds would be transferred from the grant line to cover personnel costs.

The School Performance Incentive Program will have four levels: Strong; High; Excellent; Outstanding. All school staff, certified and non-certified will be eligible for the incentive payment if the students in the school meet the achievement targets. The table below outlines the levels and the amount of the incentive payment for each level:

Achievement Level	Bonus Amount for Certified Staff	Bonus Amount for Non-Certified Staff
Strong	\$2,500	\$1,000
High	\$3,500	\$1,500
Excellent	\$4,500	\$2,000
Outstanding	\$5,500	\$2,500
Approximate # of Employees Statewide	9,000	3,700

The following chart illustrates a range of costs based on estimates of the percentage of school staff that would qualify for the incentive at the highest level or \$5,500 per certified staff and \$2,500 for non-certified staff:

Achievement Level = Outstanding

Range of Cost - Assumptions

Assumption % of staff that qualify for bonus	Estimate of Certified Staff that qualify (of approx. 9,000)	Estimate of Non-Certified Staff that qualify (of approx 3,700)	Range of Certified Cost Based on % of staff	Range of Non- Certified Cost Based on % of staff	Central Office Staff may receive up to 5% of the total paid to all employees at all schools	Total
5%	450	185	\$2,475,000	\$462,500	\$146,875	\$3,084,375

ANALYSIS: (Attach a separate page if necessary)

This legislation will allow the Department of Education & Early Development to establish a school performance incentive program. This program will provide an incentive payment of up to \$5,500 for certified personnel and up to \$2,500 for noncertified personnel if the students in their school demonstrate substantial growth in achievement on state assessments from one year to the next. Incentive payments will be based on four achievement levels. The cost of the incentive program will not exceed \$5.8 million annually because the program is limited to 850 certified staff and approximately 340 non-certified staff. The program will sunset June 30, 2009. This bill also requires LB&A to review the program by December 31, 2008 and recommend whether it should be continued or not.

It is not expected that all 850 certified staff will qualify for the maximum bonus. EED prepared this fiscal note to show the legislature the maximum entitlement under this pilot program. The following page outlines the amount of the bonus for each of the achievement levels.

Senate Finance 3/17/06

School Performance Incentive Program

Goal: To accelerate growth in student achievement.

Overview of benefits to Alaska

1. Accountability: The money is directly linked to high levels of student learning.
2. Promotes effective instruction, staff collaboration, and shared responsibility.
3. Enhances Alaska's teacher recruitment efforts.
4. No-risk program: If there is no performance, there is no cost.

Why is this program different from other bonus programs?

- Focuses on how the same students performed this year compared to last year – student growth.
- Provides clear targets for meeting success.
- Provides an incentive for **ALL** school staff to work together, be creative, and design and implement systems to improve student performance.
- Provides a system for policy makers to recognize school performance.
- Focuses on improving each student's performance from where he or she currently is to proficiency and beyond.

Why have other models failed?

- Not based on individual student growth related to achievement standards.
- Unrealistic or unclear targets for success.
- Competition among staff – some must lose for others to win.
- Excluded building administrators and other school staff.
- The instrument/criteria used to measure success was not reliable and consistent.
- Compensation was not large enough to change behavior.

What will be the outcomes from this program?

- Instruction directly linked to outcomes.
- Incentive to work differently and create partnerships that will result in more than a year's growth in learning for students.
- Cause creative and effective use of instructional time in schools – scheduling the school day and year with a focus on higher levels of student learning.

- Accountability and incentive to cause students to reach proficiency and higher levels of advanced achievement.
- Responsibility for student learning and achievements is expanded to all staff.

The bottom line: The program will award bonuses to a school's administrators, teachers and support staff each year that its students show more than a year's academic growth. In some cases, school district central office staff will receive bonuses as well.

How growth is measured:

1. Each student's score on state standards-based assessments will be placed in one of six achievement categories: advanced, proficient, below proficient plus, below proficient minus, far below proficient plus, and far below proficient minus.
2. Each student's performance will be compared with his or her performance the previous year. Schools will earn various points based on whether a student moves up or down in the categories or remains in the same one.
3. The points will be totaled, and then divided by the number of students in the school to produce a school score. That score will be applied to an index that has several levels.
4. The higher the points, the larger the bonus, up to the maximum set in law. Schools that do not show progress will not earn a bonus.

Cost:

1. Bonuses will range from \$2,500 to \$5,500 for certificated staff (administrators and teachers) and \$1,000 to \$2,500 for noncertificated staff (support staff such as aides and custodians). School district central office staff, except for superintendents, who play a significant role in a school's growth will be eligible for bonuses of up to \$5,500.
2. The cost will depend on how many people earn bonuses, and on details of the point system and the index, which will be set in regulation by the State Board of Education & Early Development.
3. A fiscal note prepared by the department estimates the range of what the program could cost. For example, if 5 percent of the state's school staff members received the highest level of bonus, it would cost nearly \$3.1 million. If 25 percent of the state's school staff members received the highest level of bonus, it would cost about \$15.4 million.

Alaska School Performance Incentive Program

Measuring Individual Student Achievement

February 17, 2006

1

What is the Program?

School Performance Incentive Program

- Performance incentive pay for improved student achievement beyond a year's growth
- Entire staff in a school receive incentive (all or none) includes administrators, teachers, classified
- Target based on individual student growth
- Compares the same student from previous year to current year
- All schools qualify if they meet growth target
- Measurement tool is the Standards Based Assessments (SBA) given annually in April

February 17, 2006

2

Benefits

School Performance Incentive Program

- No risk program: no performance = no cost
- Create a strong workforce for Alaska
- Enhance teacher recruitment efforts
- Accountability: directly linked to high levels of achievement
- Promote collaboration, effective instruction and spread responsibility across grade levels and content areas
- Requires focused instruction aligned to Alaska standards

February 17, 2006

3

Expected Outcomes

School Performance Incentive Program

- All staff have ownership of instruction and share responsibility for results
- Incentive to work differently, embrace innovation and create partnerships to improve student achievement
- Accountability and incentive to cause all students to reach proficiency and higher levels of advanced achievement
- Expand responsibility for the three Rs to all staff
- Instruction designed and delivered to meet student needs

February 17, 2006

4

Why Other Models Fail

School Performance Incentive Program

- Not based on student growth
- Unrealistic targets
- Conflict among staff: Some must lose for others to win
- Exclude building administrators
- Instrument used to measure is not reliable and consistent
- Compensation not large enough to provide incentive for change
- Weak commitment to the program

SB235 – School Performance Incentive Program

April 19, 2006

What the bill does –

- Increases student achievement
- Creates the environment for every school employee to work together and focus on greatly increasing student achievement in reading, writing and mathematics
- Rewards school staff for exceeding expectations and accelerating student learning
- Implements proven private sector practice into public education
- Links student academic performance to the bonus
- If we don't see significant increases in student achievement then there is no financial liability
- When schools and kids achieve exceed expectations and more than a years worth of academic growth – Alaska benefits!

Finance CS

- Limits participation to 850 certified staff.
- Requires LB&A review and recommendations to continue beyond June 30, 2009.
- Reduces fiscal note from estimated \$15 million to \$5.8 million.

More details:

The School Performance Incentive Program -

- Awards bonuses to a school's teachers, administrators and support staff each year that its students show more than a year of academic growth
- Certified Staff may receive bonuses of up to \$5,500
- Non-certified staff may receive bonuses of up to \$2,500

The program is based on -

- Each student's scores on the state's standards based assessments are compared to his or her performance in the previous year.
- Schools earn points based on how each student does compared to last year. The points are totaled and divided by the number of students in the school to produce a school score.
- The school score is applied to an index that has several levels. There are four bonus levels: the higher the school score, the larger the bonuses.
- If no progress is shown, no bonus is earned.
- The procedures for calculating and awarding the bonus will be established by department regulation.

The benefits to Alaska are -

- Accountability: The money is directly linked to high levels of student learning.
- Effective instruction, staff collaboration, and shared responsibility.
- Enhanced Alaska teacher recruitment efforts.
- Targeting results: no progress, no financial liability to the state.

The expected results of the program are -

- Increases in student achievement.
- Instruction directly linked to outcomes.
- Incentives to work differently and create partnerships that will result in more than a year's growth in learning for students.
- Creative and effective use of instructional time in schools.
- Leveling the playing field for all schools; large or small, high or low – performing.

The changes made in the Senate Finance Committee Substitute -

- Limits the participation in the program to 850 certified staff.
- Requires a sunset review by Legislative Budget & Audit by December 31, 2008, to recommend whether or not the program should be continued beyond July 1, 2009.
- Reduced the fiscal note from estimated \$15 million to \$5.8 million.

NEA-ALASKA

Affiliated with the National Education Association

TESTIMONY ON SB 235 TOM HARVEY, EXECUTIVE DIRECTOR NEA-ALASKA

Chairman Neuman, members of the House Special Committee on Education, thank you for the opportunity to testify. My name is Tom Harvey and I serve as the Executive Director of NEA-Alaska. NEA-Alaska believes it is essential that the State of Alaska focus its education resources on student achievement. That focus should emphasize programs and initiatives that are proven avenues to improved student growth and achievement.

- ✓ A qualified teacher in every classroom supported by qualified administrators and classified personnel. Research tells us this is the #1 factor in student achievement.
- ✓ Early childhood reading readiness programs, which provide the foundation skills for years of student achievement.
- ✓ Small class sizes, which provide the opportunity for one-on-one attention.
- ✓ Mentoring programs for new hires, which provide the employees access to a skilled colleague, who can demonstrate winning strategies.
- ✓ Professional development for all staff, which includes teaching strategies to motivate students with varying learning styles.
- ✓ Planning time, which allows for collaboration by staff to plan implementation of innovative strategies.
- ✓ Intervention programs, which provide remediation opportunities that lead to student successes and provide encouragement.

To focus on proven programs school districts need to be adequately funded. Thus, NEA-Alaska believes that before the state considers new programs, it should adequately fund our schools.

Commissioner Sampson should be commended for his efforts in avoiding the pitfalls of past failed performance incentive programs. In regards to the specific proposal outlined in SB 235, please consider the following:

- School climate is one of the six factors of an effective school. The Commissioner's inclusion of the entire school staff in the incentive program is acknowledgement that everyone in the school helps set the learning climate.
- Faculty collaboration and collegiality is another factor of effective schools. The issuance of the incentive to a school and not to individuals avoids competition, which inhibits sharing of ideas.

- High student expectations is another of the factors of effective schools. The proposed program focuses on student growth and the expectation that students can exceed the expected annual growth.

However, the reality is that trying to fashion an objective performance incentive program in the public schools is like being a tomb raider; there are too many traps to avoid. The greatest obstacle is the changing environment of the student. The school cannot control the home life of the child. The school cannot control the happenings outside the school that impact the student. The school cannot control the emotional and physiological changes in the student. Yet the growth of the student will be measured by a single test on a certain day. US Senator Lisa Murkowski acknowledged the shortcomings of such a measurement in determining "adequately yearly progress" when she addressed the legislature earlier in the session. We must avoid such a measurement in rewarding our school employees.

Commissioner Sampson came to the annual NEA-Alaska Delegate Assembly in January to present his proposal to the 350 delegates from every school district in Alaska. He received a lot of critical and valuable feedback. These delegates, who are the #1 factor in student achievement, must be confident in the tools they are provided. They are skeptical of the success of the performance incentive program as a tool to actually impact student achievement. **The bottom line was the resources should be used in proven programs that get to every school not to certain schools.**

Some of the concerns voiced included:

- ❖ The program implies that teachers and other education personnel are not presently inspired and empowered to use their expertise and innovative instructional practices to improve student achievement. School personnel are doing their best with the resources provided. They need more time to collaborate and more time to teach.
- ❖ The program is not an effective recruitment tool when compared to competitive compensation and a pension plan that provides a retirement with dignity.
- ❖ The program provides an incentive for good teachers and administrators to transfer to schools that receive the incentive. Veteran educators, who have a proven record, presently transfer out of Title I schools. It is natural for an employee to want to be on a "championship" team.
- ❖ The program competes for scarce resources.

The Commissioner has testified that this program is a no risk/no cost effort for the state. If the schools do not reach the incentives then the funds are not spent. If the funds are spent it means the schools are achieving. First, when schools achieve the goal and receive the incentive, there is no evidence that the school's students would not have achieved the growth without the incentive. I suggest that the program be back tested using the data from the past three years to see if schools would earn the incentive and to compare the schools "earning" the incentive from year-to-year. Oh, I do note that the testing would not be accurate because the test used then needed to be revised. Thus, we do not know if the new test is a reliable tool for measuring student achievement.

Second, the fact that the money is left with the state if schools do not earn the incentive is not a good thing. What that really means is funds that the schools could use for proven programs does not make it to the classroom and impact student achievement.

In closing, I urge the committee to consider the return on investments in proven programs such as, the teacher mentoring program, the attracting and retaining of quality educators, the reading readiness programs and early childhood programs. Invest in these proven programs for all schools before you invest in this program, which brings no guarantee of success and is limited to a few schools.

Thank you for your time and consideration.

**Governor Proposes Incentives for School Staff to Raise
Student Achievement**

(Juneau) -- Governor Frank H. Murkowski will introduce bills in the House and Senate to establish monetary incentives for staff at public schools to significantly improve student academic performance.

"The Alaska School Performance Incentive Program is intended to encourage everyone on a school's staff to collaborate and take shared responsibility for all students, use instructional time effectively, and use the results of standards-based assessments to target students' academic needs," said Education Commissioner Roger Sampson.

The program will award bonuses to a school's administrators, teachers and support staff if a substantial number of students show more than a year's academic growth as measured by scores on the state's standards-based assessments. Some school district central office staff may receive a bonus as well.

The bonuses, which are not part of an employee's base pay, will range from \$2,500 to \$5,500 for certificated staff and \$1,000 to \$2,500 for non-certificated staff. There will be several levels of bonuses, based on how much growth students have shown.

"The performance incentive program will inspire and empower Alaska's outstanding educators to use their expertise and innovative instructional practices to improve student growth and achievement," Murkowski said. "This program will enhance Alaska's teacher recruitment efforts, raise accountability by linking the incentive payments directly to increased levels of student achievement, and promote effective instruction."

To determine whether a school's staff is eligible for bonuses, each student's test score will be placed in one of six categories: advanced, proficient, below proficient plus, below proficient minus, far below proficient plus, and far below proficient minus.

At the end of every school year, the state will compare each student's performance with his or her performance the year before, as shown by the six categories. Schools will receive various points for students based on whether a student moved up or down in the categories or stayed in the same one.

-- more --

The points for a school's students will be totaled and then divided by the number of students to produce a school score. The score will be applied to an index that has several levels. The higher the score, the larger the bonus. Schools that show only a year's growth or less will not receive bonuses.

"The program meets a need in Alaska schools for accountability," Commissioner Sampson said. "The money is directly linked to increasingly high levels of student learning. The program provides an incentive for a school's staff to work differently and creatively."

The proposed program differs from merit pay, an idea that has had a mixed reception in other states. Merit pay programs often pitted staff against one another; thus, in order for one to win, others must lose. Such programs hindered cooperation and collaboration.

- Alaska's incentive plan awards bonuses for student growth, even if students aren't yet proficient. Therefore, every school has an equal opportunity to win a bonus.
- Alaska's plan applies to all school staff.
- The targets for school achievement are clear and objective.

The cost will depend on how many people earn bonuses, and on details of the point system and the index, which will be set in regulation by the State Board of Education & Early Development.

A fiscal note prepared by the Department of Education & Early Development estimates the range of what the program could cost. For example, if 5 percent of the state's school staff members won the highest level of bonus, it would cost nearly \$3.1 million. If 25 percent of the state's school staff members won the highest level of bonus, it would cost about \$15.4 million.
