* * * * * Total Budget * * * * *		$143,017,300

(SECTION 3 OF THIS ACT BEGINS ON THE NEXT PAGE)

*** Sec. 3.** FINDINGS. The legislature finds that the State of Alaska has realized savings in the amount of $106,261,000 during the fiscal year ending June 30, 2010, through the federal medical assistance percentage provisions of P.L. 111-5 (American Recovery and Reinvestment Act of 2009) that are being used to finance appropriations made from the general fund in this Act.

*** Sec. 4.** DEPARTMENT OF COMMERCE, COMMUNITY, AND ECONOMIC DEVELOPMENT. The sum of $250,000 is appropriated from the general fund to the Department of Commerce, Community, and Economic Development for payment as a grant under AS 37.05.316 to World Trade Center Alaska for the 2010 world expo for the fiscal years ending June 30, 2010, and June 30, 2011.

*** Sec. 5.** DEPARTMENT OF CORRECTIONS. (a) The sum of $10,462,600 is appropriated to the Department of Corrections to implement the interest arbitration decision dated March 19, 2009, establishing monetary terms of the collective bargaining agreement with the Alaska Correctional Officers Association, for the fiscal years ending June 30, 2010, and June 30, 2011, from the following sources:

General fund	$10,348,500
Federal receipts	114,100

(b) For (a) of this section, it is the intent of the legislature that

(1) the Department of Corrections and the Department of Administration take all responsible actions necessary, including shift modification, to mitigate financial and other exposure as a result of the provisions for a 50 percent increase in personal leave accrual in the interest arbitration decision, dated March 19, 2009;

(2) the Department of Administration, in the conduct of current and future collective bargaining negotiations, refrain from considering the implementation of the Department of Corrections' interest arbitration decision, dated March 19, 2009, as suggestive or indicative of legislative endorsement of the arbitration award provisions for personal leave accrual rates for the Department of Corrections or any other bargained agreements.

*** Sec. 6.** DEPARTMENT OF HEALTH AND SOCIAL SERVICES. The sum of $242.72 is appropriated from the general fund to the Department of Health and Social Services, division of juvenile justice, for payment of unpaid bills for services received in 2003 and 2004, for fiscal year ending June 30, 2010.

*** Sec. 7.** DEPARTMENT OF LABOR AND WORKFORCE DEVELOPMENT. Section 9(d), ch. 14, SLA 2009, is amended to read:

(d) The unexpended and unobligated balance, not to exceed $85,000, of the appropriation made in sec. 1, ch. 27, SLA 2008, **page 17, lines 4 - 5 (Office of the Governor, branch-wide oil and gas development - $7,290,800)** [PAGE 28, LINE 22, AND ALLOCATED ON LINE 27 (DEPARTMENT OF LABOR AND WORKFORCE DEVELOPMENT, WORKFORCE DEVELOPMENT, ALASKA WORKFORCE INVESTMENT BOARD - $543,600)] is reappropriated to the Department of Labor and Workforce Development, Alaska Workforce Investment Board, for gas pipeline activities for the fiscal year ending June 30, 2010.

*** Sec. 8.** DEPARTMENT OF LAW. (a) The sum of $1,459,717.44 is appropriated from the general fund to the Department of Law, civil division, deputy attorney general's office, for the purpose of paying judgments and settlements against the state for the fiscal year ending June 30, 2010.

(b) The amount necessary, after application of the amount appropriated in (a) of this section, to pay judgments awarded against the state on or before June 30, 2010, is appropriated from the general fund to the Department of Law, civil division, deputy attorney general's office, for the purpose of paying judgments against the state for the fiscal year ending June 30, 2010.

*** Sec. 9.** DEPARTMENT OF NATURAL RESOURCES. (a) The sum of $40,000 is appropriated from the general fund to the Department of Natural Resources, claims, permits, and leases allocation, for providing trash and sanitation services at Kasilof Beach for the fiscal years ending June 30, 2010, and June 30, 2011.

(b) The interest earned during the fiscal year ending June 30, 2010, on the reclamation bond posted by Cook Inlet Energy for operation of an oil production platform in Cook Inlet under lease with the Department of Natural Resources, estimated to be $175,000, is appropriated to the Department of Natural Resources for the purposes of the bond.

*** Sec. 10.** DEPARTMENT OF PUBLIC SAFETY. The sum of $97,000 is appropriated from federal economic stimulus funds received by the state under P.L. 111-5 (American Recovery and Reinvestment Act of 2009) to the Department of Public Safety for combating Internet crimes for the fiscal years ending June 30, 2010, and June 30, 2011.

*** Sec. 11.** DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES. (a) The unexpended and unobligated balances, not to exceed $650,000, of the appropriations made in sec. 17(a), ch. 12, SLA 2009, and allocated in sec. 17(e)(1), ch. 12, SLA 2009 (Department of Transportation and Public Facilities, offset the effects of higher fuel and utility costs) and sec. 17(b), ch. 12, SLA 2009, and allocated in sec. 17(e)(1), ch. 12, SLA 2009 (Department of Transportation and Public Facilities, offset the effects of higher fuel and utility costs) are reappropriated to the Department of Transportation and Public Facilities for marine vessel operations to provide additional service to Unalaska and other communities along the Aleutian Island chain for the fiscal year ending June 30, 2010.

(b) The unexpended and unobligated balances, not to exceed $3,600,000, remaining after the appropriation made in (a) of this section, of the appropriations made in sec. 17(a), ch. 12, SLA 2009, and allocated in sec. 17(e)(1), ch. 12, SLA 2009 (Department of Transportation and Public Facilities, offset the effects of higher fuel and utility costs) and sec. 17(b), ch. 12, SLA 2009, and allocated in sec. 17(e)(1), ch. 12, SLA 2009 (Department of Transportation and Public Facilities, offset the effects of higher fuel and utility costs) are reappropriated to the Department of Transportation and Public Facilities for marine vessel operations to provide additional service to Unalaska and other communities along the Aleutian Island chain for the fiscal year ending June 30, 2011.

(c) The unexpended and unobligated balances, estimated to be $1,250,000, after the appropriations made in (a) and (b) of this section, of the appropriations made in sec. 17(a), ch. 12, SLA 2009, and allocated in sec. 17(e)(1), ch. 12, SLA 2009 (Department of Transportation and Public Facilities, offset the effects of higher fuel and utility costs) and sec. 17(b), ch. 12, SLA 2009, and allocated in sec. 17(e)(1), ch. 12, SLA 2009 (Department of Transportation and Public Facilities, offset the effects of higher fuel and utility costs) are reappropriated to the Alaska marine highway system fund (AS 19.65.060(a)).

*** Sec. 12.** FUND CAPITALIZATION. The sum of $5,000,000 is appropriated from the general fund to the disaster relief fund (AS 26.23.300(a)).

*** Sec. 13.** FUND TRANSFERS. (a) The sum of $1,116,986,600 is appropriated from the general fund to the public education fund (AS 14.17.300).

(b) The sum of $79,000 is appropriated from the Alaska Industrial Development and Export Authority revolving fund (AS 44.88.060) to the small business economic development

revolving loan fund (AS 44.88.400).

(c) The unexpended and unobligated balance of the appropriation made in sec. 18(b), ch. 30, SLA 2007 (Department of Natural Resources, assistance to the Creamery Corporation, dba Matanuska Maid Dairy - $600,000) is reappropriated to the agricultural revolving loan fund (AS 03.10.040).

*** Sec. 14.** RATIFICATIONS OF CERTAIN EXPENDITURES. (a) The expenditures by the Department of Natural Resources for fire suppression for the fiscal year ending June 30, 2009 (AR 37313-09 Fire General Fund), are ratified in the amount of $10,297,678.22.

(b) The following departmental expenditures made in fiscal years 2003, 2005, 2006, 2007, 2008, and 2009 are ratified to reverse the negative account balances in the Alaska state accounting system in the amount listed for the AR number. The appropriations from which those expenditures were actually paid are amended by increasing those appropriations by the amount listed, as follows:

Department of Commerce, Community, and Economic Development	
(1) AR 29605-08 Alaska Energy Authority Owned Facilities	$ 12.95
Department of Education and Early Development

(26) AR 62656-10 Cooperative Reimbursable Projects	.01

*** Sec. 15.** RETAINED FEES AND BANKCARD SERVICES. Section 22(b), ch. 12, SLA 2009, is amended to read:

(b) The amount retained to compensate the provider of bankcard or credit card services to the state during the fiscal year ending June 30, 2010, is appropriated for that purpose to each agency of the executive, legislative, and judicial branches that accepts payment by bankcard or credit card for licenses, permits, goods, and services provided by that agency on behalf of the state, and to the Department of Law for accepting payment of restitution in accordance with AS 12.55.051 **and AS 47.12.170** by bankcard or credit card, from the funds and accounts in which the payments received by the state are deposited.

*** Sec. 16.** STATE DEBT AND OTHER OBLIGATIONS. Section 26(i), ch. 12, SLA 2009, is amended to read:

(i) The sum of $50,028,700 is appropriated to the state bond committee for payment of debt service and trustee fees on outstanding international airports revenue bonds for the fiscal year ending June 30, 2010, from the following sources in the amounts stated:

SOURCE	AMOUNT
International Airports Revenue Fund	**$36,828,700**
(AS 37.15.430)	[$46,828,700]
Passenger facility charge	3,200,000
International Airports Construction Fund (AS 37.15.420)	**10,000,000**

*** Sec. 17.** BUDGET RESERVE FUND. The amount available in the general fund at the end of the fiscal year ending June 30, 2010, after all other appropriations have been made, is appropriated from the general fund to the budget reserve fund (AS 37.05.540).

*** Sec. 18.** REVENUE AND APPROPRIATION BALANCE; CONSTITUTIONAL BUDGET RESERVE. (a) The amount necessary for full repayment of the amounts owed the budget reserve fund (art. IX, sec. 17, Constitution of the State of Alaska), as of June 30, 2010, estimated to be $401,617,000, is appropriated from the general fund to the budget reserve fund (art. IX, sec. 17, Constitution of the State of Alaska).

(b) If the unrestricted state revenue available for appropriation in fiscal year 2010 is insufficient to cover general fund appropriations made for fiscal year 2010, the amount necessary to balance revenue and general fund appropriations is appropriated from the budget reserve fund (AS 37.05.540) to the general fund.

(c) Section 27(c), ch. 12, SLA 2009, is amended to read:

(c) The sum of $1,673,000 is appropriated from the **general fund** [BUDGET RESERVE FUND (ART. IX, SEC. 17, CONSTITUTION OF THE STATE OF ALASKA)] to the Department of Revenue, treasury division, for operating costs related to management of the budget reserve fund for the fiscal year ending June 30, 2010.

(d) Section 27(d), ch. 12, SLA 2009, is amended to read:

(d) The **appropriation** [APPROPRIATIONS] made by (a) [AND (c)] of this section **is** [ARE] made under art. IX, sec. 17(c), Constitution of the State of Alaska.

* **Sec. 19.** Section 43(c), ch. 15, SLA 2009, is repealed.

* **Sec. 20.** LAPSE OF APPROPRIATIONS. (a) The appropriations made by secs. 11(c), 12, 13, and 17 of this Act are for the capitalization of funds and do not lapse.

(b) The appropriation made in sec. 9(b) of this Act lapses June 30, 2014.

* **Sec. 21.** RETROACTIVITY. Section 7 of this Act is retroactive to June 30, 2009.

* **Sec. 22.** This Act takes effect April 18, 2010.

(SECTION 3 OF THIS ACT BEGINS ON THE NEXT PAGE)

*** Sec. 3.** FINDINGS. The legislature finds that the State of Alaska has realized savings in the amount of $106,261,000 during the fiscal year ending June 30, 2010, through the federal medical assistance percentage provisions of P.L. 111-5 (American Recovery and Reinvestment Act of 2009) that are being used to finance appropriations made from the general fund in this Act.

*** Sec. 4.** DEPARTMENT OF COMMERCE, COMMUNITY, AND ECONOMIC DEVELOPMENT. The sum of $250,000 is appropriated from the general fund to the Department of Commerce, Community, and Economic Development for payment as a grant under AS 37.05.316 to World Trade Center Alaska for the 2010 world expo for the fiscal years ending June 30, 2010, and June 30, 2011.

*** Sec. 5.** DEPARTMENT OF CORRECTIONS. The sum of $10,462,600 is appropriated to the Department of Corrections to implement the interest arbitration decision dated March 19, 2009, establishing monetary terms of the collective bargaining agreement with the Alaska Correctional Officers Association, for the fiscal years ending June 30, 2010, and June 30, 2011, from the following sources:

General fund	$10,348,500
Federal receipts	114,100

*** Sec. 6.** DEPARTMENT OF HEALTH AND SOCIAL SERVICES. The sum of $242.72 is appropriated from the general fund to the Department of Health and Social Services, division of juvenile justice, for payment of unpaid bills for services received in 2003 and 2004, for fiscal year ending June 30, 2010.

*** Sec. 7.** DEPARTMENT OF LABOR AND WORKFORCE DEVELOPMENT. Section 9(d), ch. 14, SLA 2009, is amended to read:

(d) The unexpended and unobligated balance, not to exceed $85,000, of the appropriation made in sec. 1, ch. 27, SLA 2008, **page 17, lines 4 - 5 (Office of the Governor, branch-wide oil and gas development - $7,290,800)** [PAGE 28, LINE 22, AND ALLOCATED ON LINE 27 (DEPARTMENT OF LABOR AND WORKFORCE DEVELOPMENT, WORKFORCE DEVELOPMENT, ALASKA WORKFORCE INVESTMENT BOARD - $543,600)] is reappropriated to the Department of Labor and Workforce Development, Alaska Workforce Investment Board, for gas pipeline activities for the fiscal year ending June 30, 2010.

*** Sec. 8.** DEPARTMENT OF LAW. (a) The sum of $1,424,600 is appropriated from the general fund to the Department of Law, civil division, deputy attorney general's office, for the purpose of paying judgments and settlements against the state for the fiscal year ending June 30, 2010.

(b) The amount necessary, after application of the amount appropriated in (a) of this section, to pay judgments awarded against the state on or before June 30, 2010, is appropriated from the general fund to the Department of Law, civil division, deputy attorney general's office, for the purpose of paying judgments against the state for the fiscal year ending June 30, 2010.

*** Sec. 9.** DEPARTMENT OF NATURAL RESOURCES. The sum of $40,000 is appropriated from the general fund to the Department of Natural Resources, claims, permits, and leases allocation, for providing trash and sanitation services at Kasilof Beach for the fiscal years ending June 30, 2010, and June 30, 2011.

*** Sec. 10.** DEPARTMENT OF PUBLIC SAFETY. The sum of $97,000 is appropriated from federal economic stimulus funds received by the state under P.L. 111-5 (American Recovery and Reinvestment Act of 2009) to the Department of Public Safety for combating Internet crimes for the fiscal years ending June 30, 2010, and June 30, 2011.

*** Sec. 11.** FUND CAPITALIZATION. The sum of $5,000,000 is appropriated from the general fund to the disaster relief fund (AS 26.23.300(a)).

*** Sec. 12.** FUND TRANSFERS. (a) The sum of $1,116,986,600 is appropriated from the general fund to the public education fund (AS 14.17.300).

(b) The sum of $79,000 is appropriated from the Alaska Industrial Development and Export Authority revolving fund (AS 44.88.060) to the small business economic development revolving loan fund (AS 44.88.400).

(c) The unexpended and unobligated balance of the appropriation made in sec. 18(b), ch. 30, SLA 2007 (Department of Natural Resources, assistance to the Creamery Corporation, dba Matanuska Maid Dairy - $600,000) is reappropriated to the agricultural revolving loan fund (AS 03.10.040).

*** Sec. 13.** RATIFICATIONS OF CERTAIN EXPENDITURES. (a) The expenditures by the Department of Natural Resources for fire suppression for the fiscal year ending June 30, 2009 (AR 37313-09 Fire General Fund), are ratified in the amount of $10,297,678.22.

(b) The following departmental expenditures made in fiscal years 2003, 2005, 2006, 2007, 2008, and 2009 are ratified to reverse the negative account balances in the Alaska state accounting system in the amount listed for the AR number. The appropriations from which those expenditures were actually paid are amended by increasing those appropriations by the amount listed, as follows:

Department of Commerce, Community, and Economic Development	
(1) AR 29605-08 Alaska Energy Authority Owned Facilities	$ 12.95
Department of Education and Early Development	
(2) AR 17722-07 Student and School Achievement	293.08
Department of Health and Social Services	
(3) AR 22708-03 DAS DMA Unbudgeted RSA for DAS Staff Support	140.40

(26) AR 62656-10 Cooperative Reimbursable Projects	.01

*** Sec. 14.** RETAINED FEES AND BANKCARD SERVICES. Section 22(b), ch. 12, SLA 2009, is amended to read:

(b) The amount retained to compensate the provider of bankcard or credit card services to the state during the fiscal year ending June 30, 2010, is appropriated for that purpose to each agency of the executive, legislative, and judicial branches that accepts payment by bankcard or credit card for licenses, permits, goods, and services provided by that agency on behalf of the state, and to the Department of Law for accepting payment of restitution in accordance with AS 12.55.051 **and AS 47.12.170** by bankcard or credit card, from the funds and accounts in which the payments received by the state are deposited.

*** Sec. 15.** STATE DEBT AND OTHER OBLIGATIONS. Section 26(i), ch. 12, SLA 2009, is amended to read:

(i) The sum of $50,028,700 is appropriated to the state bond committee for payment of debt service and trustee fees on outstanding international airports revenue bonds for the fiscal year ending June 30, 2010, from the following sources in the amounts stated:

SOURCE	AMOUNT
International Airports Revenue Fund	**$36,828,700**
(AS 37.15.430)	[$46,828,700]
Passenger facility charge	3,200,000

International Airports Construction Fund **10,000,000**
(AS 37.15.420)

*** Sec. 16.** BUDGET RESERVE FUND. The amount available in the general fund at the end of the fiscal year ending June 30, 2010, after all other appropriations have been made, is appropriated from the general fund to the budget reserve fund (AS 37.05.540).

*** Sec. 17.** REVENUE AND APPROPRIATION BALANCE; CONSTITUTIONAL BUDGET RESERVE. (a) The amount necessary for full repayment of the amounts owed the budget reserve fund (art. IX, sec. 17, Constitution of the State of Alaska), as of June 30, 2010, estimated to be $401,617,000, is appropriated from the general fund to the budget reserve fund (art. IX, sec. 17, Constitution of the State of Alaska).

(b) If the unrestricted state revenue available for appropriation in fiscal year 2010 is insufficient to cover general fund appropriations made for fiscal year 2010, the amount necessary to balance revenue and general fund appropriations is appropriated from the budget reserve fund (AS 37.05.540) to the general fund.

(c) Section 27(c), ch. 12, SLA 2009, is amended to read:

(c) The sum of $1,673,000 is appropriated from the **general fund** [BUDGET RESERVE FUND (ART. IX, SEC. 17, CONSTITUTION OF THE STATE OF ALASKA)] to the Department of Revenue, treasury division, for operating costs related to management of the budget reserve fund for the fiscal year ending June 30, 2010.

(d) Section 27(d), ch. 12, SLA 2009, is amended to read:

(d) The **appropriation** [APPROPRIATIONS] made by (a) [AND (c)] of this section **is** [ARE] made under art. IX, sec. 17(c), Constitution of the State of Alaska.

*** Sec. 18.** LAPSE OF APPROPRIATIONS. The appropriations made by secs. 11, 12, and 16 of this Act are for the capitalization of funds and do not lapse.

*** Sec. 19.** Section 43(c), ch. 15, SLA 2009, is repealed.

*** Sec. 20.** RETROACTIVITY. Section 7 of this Act is retroactive to June 30, 2009.

*** Sec. 21.** This Act takes effect April 18, 2010.

Senator Linda Menard

Senate District G

February 16, 2010

Honorable Sen. Lyman Hoffman
Alaska State Capitol Room 518
Juneau, Alaska 99801

Dear Lyman,

While I know you're supportive of the $250,000 funding grant in the **supplemental budget** for the World Trade Center Alaska, I wanted to write you formally about the request.

As you know from our fabulous travels in China this December, the state of Alaska and China have a special relationship in terms of trade.

This appropriation will be used to enable Alaska to participate in the 2010 World Expo in Shanghai, China. The expo runs from May 1 to October 31 with 192 countries involved at their respective pavilions. The organizers of the expo expect upwards of 70 million visitors at the event, making for an extraordinary platform to raise Alaska's visibility among the Chinese and international visitors.

I've spoken to Sen. Joe Thomas, the chair of the Commerce, Community and Economic Development Finance Subcommittee, and he's expressed his support for the supplemental appropriation. I'm very excited about Alaska having a presence in China during the expo, and I feel the appropriation to the World Trade Center Alaska is important.

Please let me know what I can do from here to make sure **Alaska has its rightful place at the 2010 World Expo this year.**

Sincerely,

Sen. Linda Menard

Senator_Linda_Menard@legis.state.ak.us

Official Business

February 26, 2010

Senator Lyman Hoffman
Alaska State Capitol, Room 518
Juneau, Alaska 99801

Senator Hoffman,

I am writing to express my support for the $250,000 appropriation in the supplemental budget for the World Trade Center Alaska. As you know from our December trip to China, Alaska and China are important trade partners. World Trade Center Alaska is instrumental in facilitating this economic partnership.

The funding requested in the supplemental budget for World Trade Center Alaska will be used to enable Alaska to participate in the 2010 World Expo in Shanghai, China. The Expo runs from May 1 to October 31 and involves 192 countries. Expo organizers expect more than 70 million visitors at the event, making it an extraordinary platform to raise Alaska's visibility among the Chinese and international visitors.

A vital organization working tirelessly to promote Alaska's economic ties with China, I believe the World Trade Center Alaska is worth funding. Please accept my formal support for the World Trade Center Alaska and its involvement in the 2010 World Expo.

Sincerely,

Representative Kurt Olson

Email: Representative_Kurt_Olson@legis.state.ak.us

FY '11 Special Appropriation Request

Alaska Participation in 2010 World Expo Shanghai, China

Requestor: World Trade Center Alaska (WTCAK)

Grant Amount: $250,000

Funding Source(s): General Fund

Background:

Alaska is one of America's most trade-oriented states. While most states have significant domestic markets for their manufactured goods, technologies, or agricultural products, Alaska is heavily dependent on overseas markets for it natural resource and service sector exports. In total exports, Alaska's ranks 44th among the states, however, on a per-capita basis, Alaska ranks 4th; and considering exports as a percentage of Gross State Product (the sum of all goods and services produced in a state in a given year), Alaska ranks 8th among states. Alaska's export industries play an important role in the state's economy (jobs, revenue, etc) and are vital to the state's overall economic well-being.

Alaska's exports reached a record of $4 billion in 2006, and have remained at historically high levels since then. In 2008, the state's commodity exports to overseas markets totaled $3.6 billion.

China is currently Alaska's second largest, and fastest growing, trading partner. In 2008, exports for Alaska to China reached $733 million, a new record. Seafood is the state's largest export category to China, followed by minerals, energy, fishmeal, and forest products. There are also a number of Alaskan companies exporting various services to China, including tourism, aviation technology, and architecture.

With each passing day, China becomes more important to the Alaskan economy, not only as an increasingly important buyer of Alaskan exports, but as a potential investor in the state's natural resource development projects, and as a source of new visitors for the state's tourism industry. At least three Alaskan industry organizations have active marketing programs in China, and plan to participate, if funding for Alaska sponsorship of the USA Pavilion is secured: The World Trade Center Alaska (WTCAK), the Alaska Seafood Marketing Institute (ASMI) and the Alaska Travel Industry Association (ATIA).

Grant Purpose:

The purpose of the appropriation is to enable Alaska to participate in the upcoming **2010 World Expo in Shanghai, China**. The Expo commences on May 1, 2010 and concludes on October 31, 2010. The Expo organizers expect nearly 70 million visitors to the event made up of approximately 60 million Chinese visitors and 10 million international visitors. This will be an extraordinary platform to raise Alaska's visibility among the millions of the Chinese and international visitors to the event. The message that participation will convey, on a cost-effective basis, is that Alaska is a great place to do business and invest, that Alaska offers the world's finest seafood, and that Alaska is a world-class tourism destination. It also offers the opportunity to highlight Alaska's unique Native culture and heritage to a global audience.

The appropriation would fund three aspects of Alaska's participation:

1) **State of Alaska Sponsorship of the USA Pavilion at the Expo.** The cost of state sponsorship is $150,000 and includes a package of benefits as noted below:

   Benefits:

   Recognition in all USA Pavilion collateral materials
   Recognition on the USA Pavilion web site
   Limited distribution of materials at the USA Pavilion site
   Exhibiting within the USA Pavilion "Discover the USA" section
   Access to the Pavilion VIP facilities for TBD number of senior executives
   VIP access to the USA Pavilion for TBD number of people
   VIP access to the other Expo Pavilions
   Expo tickets of employees, clients, and others (TBD)
   One special social event for up to 200 people at the VIP Center

2) **Marketing and travel-related funds for participating industry organizations.** An amount of $87,500 would be equally divided ($43,750 each) between the following organizations: World Trade Center Alaska and the Alaska Travel Industry Association. The funds would be used by these organizations to produce special collateral materials reflecting sponsorship of the USA Pavilion at the Expo, to conduct special events in conjunction with the Expo, and to make possible staff travel and other expenditures as needed to facilitate participation at the event.

3) **Project administration and management funding for World Trade Center Alaska.** An amount of $12,500 would be used by World Trade Center Alaska to cover costs associated with administration and management of the project.

About WTCAK:

Established in 1987, WTCAK is a private, non-profit 501c (6) organization. WTCAK is part of the global network of more than 300 World Trade Centers. An 18-member board of directors governs it. In accordance with an agreement with the University of Alaska relating to the long-term use of the WTC license, the University of Alaska president currently appoints half of the WTCAK board members from among nominees put forward by WTCAK; the other half is elected by the membership. WTCAK receives funding from three primary sources: annual membership dues, grants and contracts, and profits from enterprise activities such as trade missions, trade shows, and publications.

The membership of WTCAK consists of approximately 100 companies, individual and organizations from across the state. Many of Alaska's most important exporters are members, however, the bulk of WTCAK's members are small and medium-sized Alaskan companies seeking to grow their business through international trade.

SPONSOR STATEMENT
House Bill 329

"An act relating to the transportation infrastructure fund, to local public transportation, to motor fuel taxes, and to the motor vehicle registration fee; and providing for an effective date."

HB 329 will define the Alaska Transportation Infrastructure Fund (ATIF), how it will be funded and where the funds will be spent.

In FY10, 87% of our transportation budget came from the federal government. The current federal reauthorization legislation has already expired and is being extended month to month until new legislation can be passed. The new reauthorization bill is unfavorable for states with small populations due to an emphasis on mass transit and green transportation. It favors toll roads and bridges and other transportation that pays for itself.

The roads, bridges, airports, ferries and other transit systems that make up our state's transportation system are essential to mobility, commerce and economic development. These systems increase safety, enhance economic competitiveness, and lead to a better quality of life. To ensure Alaska has the infrastructure necessary to develop our resources as well as improve the living conditions for our citizens we must commit to funding transportation. Having an amount that is guaranteed from year to year will allow Alaska to manage current congestion and maintenance projects as well as develop access to needed resources and energy.

Additionally the use of state funds for construction means we will have greater control and funding will go towards completing projects as opposed to an expensive and lengthy federal process. Anchorage has benefited from the use of state funds and has seen projects such as the Bragraw Intersection and Dowling Street Extension. These projects cost less and were completed earlier than they would have had they been done using the federal process.

HJR 42 will put a constitutional amendment before voters to change the Alaska constitution to allow a dedicated fund for Capital Transportation Projects. With

REPRESENTATIVE PEGGY WILSON
HOUSE DISTRICT 2

passage, HB 329 will define the fund. It will outline how the fund will be managed, how the earnings will be spent and who will decide which projects will be funded each year.

The ATIF will be seeded with a $1B endowment. In addition to the endowment ATIF will receive the revenue generated from fuel taxes and vehicle registrations. The Department of Revenue will be charged with administering the fund. Six percent of the market value (POMV) of the fund will be available for appropriation each year. ATIF is estimated to generate $65-70M the first year and then grow by $5-7M per year after that.

HB 329 will create a panel to evaluate the project submissions. The panel is comprised of eight members, including 4 legislators, 2 from each house that represent a rural and an urban district. The other 4 members of the panel will be the regional directors from DOT/PF and the commissioner or a designee.

Alaska DOT/PF will be required to create a set of criteria to rank the projects. The panel will use these criteria to give each project a numeric score to be used in prioritizing the projects.

The bill defines how the funds shall be appropriated. Not more than

1. 60% of the funds may be used for roads and surface transportation,
2. 13 % may be used for aviation,
3. 12% may be used for the Alaska Marine Highway,
4. 8 % may be used for harbor facilities, state owned marine facilities and for deposit into the municipal harbor facility grant fund,
5. 5% may be used for local community transportation and transit.
6. 2% may be used for trails and bike-paths.

Alaska is geographically the largest state in the country, and the future of the economic and social well being of its citizens is critically dependent on a reliable transportation system. This fund is one of the tools needed to create a modern reliable transportation system.

HOUSE DISTRICT 2

CSHB 329 (TRA) Alaska Transportation Infrastructure Fund: Major Changes

- The legislative intent was removed. An appropriation bill has been introduced, HB 356, to appropriate the 1 billion dollar endowment to the fund.
- ATIF Advisory council: There was move from heavy legislative involvement to limited involvement due to separation of powers issues. Also language was added to allow a public voice in the selection process. The public members will be appointed by the Governor.
- Originally all of the available vehicle registration fees and the motor fuel taxes were deposited in the ATIF and only a 6% POMV was appropriated each year. Ver. O deposits all of the revenue into the account and then allows for up to 50% of the revenues to be appropriated each year along with the 6% POMV.
- Originally the percentages of the modes allowable for appropriations added up to 100% of the available funds for appropriation. There were recommendations to provide more flexibility when defining how the appropriations may be distributed between the different modes of transportation. Now the allocations are larger than the 100% to allow for large expenditures on a particular mode if necessary. This will give the Advisory council the flexibility to put larger amounts in different areas and reduce others as needs dictate.
- Tighter definitions of the modes of transportation were added.

ANALYSIS: *(Attach a separate page if necessary)*

Currently, almost all funding for DMV, both operating and capital, is through Receipt Supported Services. If all revenues listed in HB 329 are transferred into the Transportation Fund, there would be insufficient fees left to fund the entire DMV operating appropriation after FY2010, and none of the capital appropriation. DMV would require general fund revenues to cover the shortfall.

Estimated additional needed for operating: FY2013-$669.5; FY2014-$1845.9; FY2015-$3101.7; FY2016-$4441.9
Estimated additional needed for capital = $500.0 annually

DOT will develop project evaluation criteria to be used by the Transportation Infrastructure Fund Advisory Council for prioritizing, ranking and selecting projects. DOT&PF proposes creating at least six sets of criteria for the separate modal categories.

The development of criteria will be done by a consultant and then codified into state Administrative Code. The department's cost estimate for these two activities is $150.0 in contractual for the consultant effort and $50.0 for the regulation development (contractual, Dept. of Law) and to conduct regulation hearings.

STATE OF ALASKA **BILL NO.** HB 329
2010 LEGISLATIVE SESSION

ANALYSIS CONTINUATION

2) One FTE (Transportation Planner III) will be responsible for developing the ranking criteria and overseeing the regulation development process, conducting annual project nomination cycles, organizing meetings and information to be used by the Advisory Council in conducting the evaluations, staffing the ranking meetings and being responsible for all necessary record keeping and information analysis and distribution. The staff person will develop handout materials and presentations for legislators and DOT&PF as necessary. This position will assist with project nominations and will prepare the annual report.

Travel costs are identified below and include travel for the 10 advisory council members and a staff person to attend 4 meetings in the 1st year - to develop criteria, regulations and then prioritize projects. Travel in the out years will be for 2 meetings /year for project prioritization. Additional costs (supplies, contractual) are included to cover expenses such as legal notices and outreach to communities and travel to meetings such as Alaska Municipal League or Tribal Transportation forums. Equipment is estimated at $10.0 in the first year for office furniture and one laptop computer for the new position.

Travel for the Advisory Council and staff was determined as follows:

Year 1	**# Trips**	**Cost**	**Total**
Travel by Planner III to 4 Meetings,	4	$920	$3,680
2 Outreach trips per year by staff	2	$920	$1,840
Travel for 12 advisory council members to 4 Meetings	48	$36,800	$45,600
		Total All:	$51,120
Years 2 and Thereafter			
Staff travel to 2 meetings	2	$920	$1,840
2 Outreach trips for staff/year	2	$920	$1,840
Travel for 12 advisory council members 2 Meetings	24	$18,400	$22,080
		Total All:	$25,760

Back up for determining travel costs

Airfare	$500	Average in-state RT
Lodging	$200	2 nights
Per Diem	$120	2 full days
Ground Trans	$100	
Total	$920

ANALYSIS: *(Attach a separate page if necessary)*

House Bill 329 provides for a separate endowment fund to be set up in the amount of $1 billion initially to be managed by the Commissioner of Revenue. It is anticipated the fund will grow by fuel tax receipts of approximately $40 million per year. The fund would be managed with an the asset allocation of 55% Fixed Income, 45% Equity with asset allocations to be determined annually in order to achieve a six percent annual real rate of return over time. The costs include investment management fees, audit, accounting and custody fees. These costs are projected based on median market returns based on Callan and Associates capital market assumptions.

The balance of the fund does not reflect appropriations that would reduce the amount of the fund.

April 6, 2010

Representative Bill Stoltze
State Capitol Room 515
Juneau AK, 99801

Dear Representative Stoltze:

I am writing you regarding HB 329 – Transportation Infrastructure Fund (TIF) – sponsored by Representative Peggy Wilson, which has been scheduled for a hearing in House Finance on Saturday, April 10. Conceptually, the Division of Motor Vehicles (DMV) does not have an objection to this bill, however, it does have serious concerns with vehicle registration fees being utilized for the Fund and its impact on DMV operations.

Currently, almost all DMV appropriations, including capital, are funded via Receipt Supported Services. The division generates approximately $64.4 million in revenue annually of which $37.4 million would be transferred to the TIF under HB 329 and $12 million is collected on behalf of other entities. This leaves approximately $14.9 million in remaining fees available for DMV operations. If, in addition to the $14.9 million in DMV fees, only 3% of TIF appropriation is available to assist in funding DMV operations as is specified in the bill, there would be insufficient revenues to fund the entire DMV operating appropriation (see table below), and none for any capital appropriations. The DMV would likely be put in the position of requesting supplemental funding for known costs from the Legislature.

	DMV Funding from TIF					
FY	Estimated TIF Appropriation [2]	3% available for DMV	DMV fees available to fund operations [1]	Total Available for DMV operations	Estimated DMV Operating Costs [3]	Excess / (Shortfall)
2012	$ 92,957.0	$ 2,788.7	$ 14,907.1	$ 17,695.8	$ 17,263.2	$ 432.7
2013	94,198.6	2,826.0	14,907.1	17,733.1	18,402.5	(669.5)
2014	95,468.9	2,864.1	14,907.1	17,771.2	19,617.1	(1,845.9)
2015	96,768.7	2,903.1	14,907.1	17,810.2	20,911.8	(3,101.7)
2016	98,099.0	2,943.0	14,907.1	17,850.1	22,292.0	(4,441.9)
2017	113,313.8	3,399.4	14,907.1	18,306.5	23,763.3	(5,456.8)

[1] $64,356 less $12,000 collected for other agencies less $37,416 collected for TIF
[2] From the schedule provided by Rep. Peggy Wilson
[3] Assuming 3% growth, based on estimates in DMV's 10-year plan

Please note that this concern was brought to the attention of Representative Wilson as well as the House Transportation committee. In an effort to not hold the bill up, it was decided that this specific concern would be forwarded to the House Finance committee for possible resolution.

The DMV does not want to jeopardize its ability to collect the revenue that is being contemplated for the TIF, nor its ability to carry out its statutory obligations. I suggest that the cost of funding the DMV be completely paid out of the revenue it collects, with the remainder of the funds going to the TIF. The bill language in section 4 could be modified to read:

> (g) The Department of Administration shall separately account for and deposit into the special transportation fund registration fees collected under this section in excess of those required for DMV operating and capital appropriations.

If you have any questions or would like to discuss this issue in greater depth, please feel free to contact me at 269-5574.

Sincerely,

Whitney H Brewster

Reference: House Bill No. 329

Dear Representative Wilson:

As a life long Alaskan whose exposure to Alaska's transportation system began as I accompanied my father on visits to Alaska Road Commission maintenance camps in the 1950's, I am a strong supporter of Alaska's transportation system. Today I am writing to you in support of House Bill No. 329.

To date Alaska has depended almost entirely on the generosity of the Federal government for its transportation infrastructure. The current Federal deficit and Alaska's surpluses demand that Alaskan's begin to assume a larger role in paying for their transportation system. House Bill No. 329 provides a funding mechanism that allows us to assume our responsibilities. This reliable funding stream enables the Department of Transportation and Public Facilities (DOT) to develop the long range plans necessary to plan, design and construct multi-year projects.

I do have two concerns with this legislation. The first concerns the distribution of the revenue. I believe that this money should be spent where the revenue is generated. Highway tax dollars should be spent on surface transportation. Aviation tax dollars spent on aviation and marine tax dollars spent on port and harbors. I realize that this leaves nothing for the Marine Highway System; however, this system already receives a generous level of funding in the operating budget. My second concern is with the make up of the Transportation Infrastructure Fund Advisory Council. The proposed council provides no continuity between elections. With one election all of these individuals could be replaced. I believe that a council of community leaders and transportation professionals whose appointment process and terms of service were similar to the University of Alaska Board of Regents could better serve the needs of the State.

Thank you very much for recognizing the need for this legislation and more importantly for acting to create the Transportation Infrastructure Fund. I applaud your efforts.

Sincerely,

Anton K. Johansen

Subject: HB329

Representative Wilson,

I am emailing to offer input on the HB329 Transportation Infrastructure Fund. I am a believer in such funds as an additional source of revenue for our transportation infrastructure needs. This bill seems to be occurring at the same time questions arise about what to do with the state portion of our fuel taxes. I like the idea of keeping this relatively minor portion of our overall fuel cost and pointing these funds toward infrastructure. It seems to be a way to offset projected state revenue reductions from oil and expected reductions from national transportation funds. I think we should take care of ourselves to a higher extent (save a little face in the national arena) and a program of doing so should alleviate the annual challenges legislature faces - both in terms of funding and allocation and in terms of the workload you bear in a short 90 days. A dedicated fund would seem easier than the competition for general funds.

On another note, we have some major infrastructure shortcomings that cannot be met when the majority of funds of late go to a few mammoth projects. There are many areas statewide falling short when it comes to transportation needs and in Anchorage projects intended to solve multiple problems are being rescoped to answer only a part of the overall problem because of a lack of funding. As an engineer working primarily in the transportation field, I see projects dropped, rescoped, and deferred while a disproportionate amount of money goes to projects that baffle me.

Thank you for 'listening' to my opinion...and thanks for your service.

Transportation Committee Representatives:

Please support HB 329 ! !

- Alaska has become masters at spending someone else's money. Someone else (Congress) is waking up to that fact.
- Safety –LU expired last September 30th
- The Highway Trust Fund is down to Zero and with increased fuel economy, the price of fuel people everywhere are driving less, therefore paying fewer taxes into the Highway Trust Fund.
- The Permanent Fund looms large in Congress's thoughts. Our Donee status will be lost with the next Federal Transportation Bill

This bill will provide jobs to perform the work and pay economic dividends for years after.

Dear Representative Wilson,

My name is Colleen Soberay. My district is 26, M.

Though I don't reside in your district, I am writing to you as part of the legislative body that works on behalf of all of Alaska, to request support of HB 329. As you know, this Bill will allow for a new funding mechanism for statewide transportation needs. I believe HB 329 will augment funding needs while allowing the State better control of projects. Federal funds are needed, but also come with stringent requirements that significantly delay completion of projects.

Times have changed. Funding has changed. Needs and funding gaps continue to increase. Alaska prides itself on being doers and being an owner state. It is time Alaska gets creative and proactive with government funding initiatives. HB 329 represents proactive government.

I trust that the legislature will finalize this bill that provides details of the fund, control of the fund, and appropriations of the fund.

It is time to be forward thinking, providing for current needs while preparing for future needs. Alaska cannot continue on a path of not providing for its transportation infrastructure needs. A dedicated transportation fund would allow Alaskans to continue enjoying a tax free state, while allowing alternative and creative mechanisms to fund transportation infrastructure. Everyone knows federal transportation dollars for Alaska are on a path to decline.

Transportation investment has been studied and proven to be an economic driver. Consider that 81 percent of daily traffic in Alaska occurs on 37 percent of lane miles (source: FHWA, 2008 Highway Statistics). This 37 percent of roadway is made up of state roads—not just in Anchorage, but our highways—built by and maintained by Alaska DOT. This also represents significant economic flurry—workers traveling, deliveries made, products moved to and from local businesses. Studies have shown that transportation systems can hinder or help local economies. A transportation fund is not about DOT. It is about the big picture. It is about all of Alaska and its economy. It is about jobs and productivity well beyond DOT. DOT has 3,400 employees compared to 71,759 transportation industry jobs across Alaska.

Supporting HB 329 shows support well beyond an individual district. Please continue to support this Bill and work with your legislative team to gain broad support of an Alaska Transportation Infrastructure Fund.

I respectfully request that you support HB 329.

Sincerely,

Rebecca Rooney

Subject: Please support HB 329 creating the Alaska Transportation Infrastructure Fund

Honorable Members of the House Transportation Committee:

I encourage your support of this bill. I believe that it is imprudent for Alaska to continue relying heavily on the federal government for transportation infrastructure funding. Improving the infrastructure of this great state is critical to our continued development and the ability of private businesses like USKH Inc. to provide attractive, well-paying, highly technical jobs that will keep young Alaskans enthused about our future. Regards,

D. Lance Mearig, P.E.

Re: Department of Transportation and Public Facilities

Subject: Create a Transportation Commission to manage DOT/PF

Dear Representative Peggy Wilson:
I compliment you on your service to Alaskans. It was my honor to speak to you and other members of the House Transportation Committee as Regional Materials Engineer during lunch break when you toured the Central Region Material Lab, thank you for the card of thanks you sent to us, it was appreciated.

However at this time, I must offer my thoughts as an Alaskan after being informed of recent newspaper articles (Juneau Empire & Anchorage Daily News) that cite "lack of understanding", "lack of transparency", "least responsive", and "sovereign Nation of DOT" in regard to the DOT/PF's relationship of the Legislature.

I request as an Alaskan that you create **legislation that establishes a Transportation Commission** to govern DOT/PF and not by just the Governor's appointees. This as has been done with the Alaska Railroad and has worked very well. The Commission would be comprised of representatives of the Legislature, Governor's office, AGC, Truckers Association, etc. This would offer the following;

- **Stability of mission** of the department can maintained noting the Knowles administration was trying to condemn private property in Anchorage for bike trails and pave gravel roads, the Murkowski administration focused on fast ferries, 3 "bridges to no where" and a road out of Juneau, the Palin / Parnell administration is looking at using a hover craft for an airport shuttle at Akutan, fix the ruts, highway to highway bypass in Anchorage. The point is it seems that the Department's mission rapidly changes and it may or may not comply with the wishes of the Legislature. These changes ineffective use monies previously spent. A Transportation Commission with accomplish efficiency, legislative involvement, and provide the transparency desired.
- The **internal management** can be greatly improved within DOT/PF as exampled by the Alaskan Railroad. The General Manager is a railroad professional answerable to the Board, the Alaska Railroad has not requested annual funding of the Legislature to the best of my knowledge. The internal management within DOT/PF was regionalized under Gov.

Hickel where each region accomplished their mission with minimal oversight from Juneau. Then Gov. Knowles centralized the Department's management it where all decisions were made in Juneau by Headquarters and all personnel functions were transferred to Dept of Admin. Then Gov. Murkowski changed DOT/PF management to be partial Headquarters and partial Regional. During the current administration, management has remained thus, but it is not how a viable business can operate efficiently.

- Then a **management team** could be built whereby authority could be delegated and accountability would be required of every supervisor in DOT/PF as in any business. I use myself, a Regional Materials Engineer as an example; under Gov. Hickel I could authorize travel for my staff to work on projects in our region, since the Knowles Administration centralized authority and up to the present, I cannot approve travel. Procurement authority is another example, the State Lab that I supervise has expenses are about $1million annually, my purchasing authority level is $2000, for a $2001purchase I have to apply this for approval from the Admin Clerk of the Regional Preconstruction Engineer, the Preconstruction Engineer has authority for approval for procurement amounts higher than this. All functions at my level would be best managed by approval of annual or project budgets as the Legislature and business does. I worked 30 years in private industry as a project manager for construction companies and for Anchorage Sand & Gravel as operations manager, served in the Army during the Viet Nam war, and from this perspective I sadly state that I would never "run" DOT/PF as it currently operates. For this reason I am writing this letter to you requesting legislated organizational changes.
- A Transportation Commission could better address and interact with the **federal government on issues and regulations** such as;
  a. DEC assessed environmental penalties to DOT projects and subsequent agreements that will be ongoing, the impact on project due to environmental rules which seem to interpreted differently within the DOT/PF and other agencies.
  b. An integrated management structure could be accomplished of the required functions: Government Accounting Standards Board (GASB34) / Asset Management / Pavement Management / Maintenance Management (I recommend that you contact Kate Girad, Commissioner of RCA, 263-2110, kate.giard@alaska.gov, she handled the GASB34 effort for Anchorage very well). I have attached information on GASB34 for your information.
  c. FHWA and FAA agency interaction and funding would be given a stable response from the DOT/PF as decisions would have continuum through successive administrations.
  d. Would more effective interact with Alaska's Congressional delegation on transportation issues.

- A Transportation Commission would be more likely to be given dedicated revenues to manage such as the related taxes and other assets noted in GASB34.
- An **integrated information systems and technology system** could be implemented quickly under a transportation commission as opposed to the current dysfunctional interaction that exists within the Department i.e. Statewide and regional factions especially as Geographical Information Systems (GIS), Global Positioning Systems (GPS), and electronic document management systems. Gov. Parnell's budget has money for Information Systems and Technology for DOT/PF but it will not accomplish the above. Will Alaskans be better informed by this component of the Department's budget?

As an Alaskan, I would support dedicating funds to a Transportation Commission. I support responsible, transparent, efficient government.

Again thank you for your service and leadership,
Sincerely,
Newton Bingham

Subject: HB 329 Dedicated Transportation Fund - Support

Dear Representative Wilson:

I am writing as a strong supporter of HB 329 that would create a dedicated State Transportation Fund. I wrote the below article in the Fall of 2008 as AGC of Alaska outlining why I felt a dedicated State Transportation Fund was important to the State of Alaska. Please let me know if I can provide any further information.

Thank you,
Sam Robert Brice
Fairbanks, AK
907.978.3000

Our responsibility

By Sam Robert Brice

Investment in construction projects is a major driver of the Alaska economy. According to the 2008 Construction Spending Forecast compiled by the Institute of Social and Economic Research at the University of Alaska Anchorage, "Construction is the third largest industry in the state, pays the state's second highest wages, employs nearly 22,000 workers with a payroll over $1 billion, accounts for 20 percent of Alaska's economy and currently contributes more than $7 billion to the state's economy." These investments boost the economy while the construction is going on and provide economic benefits for years after.

But the majority of our highway, airport, harbor and rural infrastructure projects in Alaska rely solely on year-to-year budgets of federal funding programs and / or earmarks. We all know the black eye Alaska has received over the past few years for "the bridge to nowhere" and other infamous earmarks that led Congress to earmark reform. Alaska has one of the lowest state gas taxes in the nation and in the recent past has received more than $6 for every $1 paid into the highway trust fund from federal gas tax. We are one of a handful of states that does not have our own state funded transportation program. Combine this with our permanent fund savings account and the fact that residents are paid to live here, you can start to feel the ill-will headed our direction, spelling out reduced federal transportation funding for our state. We have a backlog of nearly $400 million worth of infrastructure projects that have been designed and are sitting on the "shelf" awaiting funding.

Additionally, there are more than $1 billion worth of projects along the Alaska, Richardson and Dalton Highway corridors alone in order to be prepared for the gas pipeline construction traffic loads. A recent article in the Anchorage Daily News titled "Infrastructure delays threaten pipeline, coordinator says...one thing that could kill the project is under the state's control – needed infrastructure upgrades, said Drue Pearce, who heads the Office of the Federal Coordinator for Alaska Natural Gas Transportation Projects."

It is precisely because of these facts that the top legislative priority for the AGC of Alaska is a State-Funded Transportation Program. Gov. Sarah Palin proposed a $1 billion appropriation for a sustained transportation funding program that did not move forward last year, but she is still strongly in support of a State Transportation Program as per the Fall 2008 article in this magazine in which she wrote:

"My administration's proposal for a sustained transportation fund is the right idea at the right time. It would add a new, certain source of funding for needs we know will continue long into the future."

This fall, voters showed their support for Alaska transportation projects by overwhelmingly passing the $315 million statewide general obligation bond issue. This is a step in the right direction.

Outside of Alaska, people don't understand the commitment the federal government made 50 years ago when Alaska was granted statehood. Alaska came into the Union without a transportation infrastructure system, but with great promise of natural resources and a strategic location. It was understood at that time the magnitude of investment that would be required to connect our great state. What better way for Alaska to show how important these continuing needs are than by paying a defined yearly portion of our way forward.

If indeed our infrastructure needs might be "the straw that breaks the camel's back" for the proposed gas pipeline, wouldn't a dedicated state-funded transportation program that could spur additional matching funds be worth the cost? The Obama administration's planned infrastructure investment package could be part of this opportunity and is an example of why time is of the essence for a state funding initiative.

Alaska is at a critical juncture in its history. We have the opportunity in front of us to by-pass the economic hardship much of our nation is feeling today and possibly help to lead our nation's recovery with the continued environmentally sound development of our vast resources. Our state slogan "North to the Future" has never been more appropriate than it is today after 50 years of statehood. It is up to us to ensure it remains so. A state funded transportation plan is a small initiative in the right direction for our future.

Re: Support for HB 329

Dear Representative Wilson:

Please inform the House Transportation Committee of my support for HB 329, Alaska Transportation Infrastructure Fund, during today's hearing. In light of the diminishing level of funding we anticipate receiving from the Federal Highway Trust Fund, through this bill the Alaska Legislature can proactively develop a long-term transportation financing program.

The economic future of Alaska and its communities is highly dependent upon a quality, cost effective transportation system. Alaska's transportation system has fallen far behind the needs of Alaska for cost effective transportation which allows economic growth and the safe cost effective movement of people, goods and services.

Transportation investment has been studied and proven to be an economic driver. HB 329 is about jobs and productivity. This bill includes all modes of transportation thereby serving all of Alaska, including impact to transportation related industries. Additionally, local governments may apply for dollars through this Transportation Infrastructure Fund which will encourage local economic development and local participation in funding transportation projects.

I encourage the House Transportation Committee to act favorably on HB 329 to provide this important long-term financing tool for transportation infrastructure improvements to the state and all of its communities.

Best regards,

B.B. Allen

City Of Palmer

ILLINOIS GENERAL ASSEMBLY

LEGISLATIVE RESEARCH UNIT

PATRICK D. O'GRADY, EXECUTIVE DIRECTOR

April 20, 2009

ROAD FUNDS FOR NON-ROAD USES

asked us on your behalf about other states that use some motor fuel tax revenues to fund non-road transportation, such as public transit. He said that Maryland has a "transportation fund" that supports public transit as well as roads, and asked whether other states have similar funds. He also asked whether any other state has a fund called "Transportation Fund" rather than "Road Fund." Most of the states listed below call their main fund supported by motor fuel tax revenues and vehicle license fees a "Transportation Trust Fund" or a similar name.

We contacted the Maryland Department of Transportation to ask about funds of other states that are similar to its Transportation Trust Fund. Its chief financial officer provided a report done in 2004 by the Maryland Department of Legislative Services that identifies nine states with transportation funds similar to Maryland's: Connecticut, Delaware, Florida, Louisiana, Pennsylvania, Tennessee, Vermont, Virginia, and Wisconsin. The report said those states and Maryland had "multi-modal transportation funds"—defined as funds supporting multiple transportation modes, including highways, mass transit facilities, ports, airports, and/or state police departments. The report also identified California and New Jersey as states funding public transit from motor fuel tax revenues. Alaska prohibits dedicated-purpose funds. The other 37 states have transportation funds primarily for roads—although some provide public transit funding at lower levels than in the states with multi-modal transportation funds.[1]

We describe below multi-modal transportation funds in the 10 states identified in the Maryland report. We also used a Federal Highway Administration publication[2] to find five other states that appear to provide significant public transit funding from motor fuel tax revenues. Some other states provide funds for public transit, but generally in small amounts.

States With Multi-Modal Transportation Funds

Connecticut

The Special Transportation Fund was established in 1984 as a dedicated fund for the state's transportation system and its Department of Transportation operating costs. Its primary revenue source is the motor fuel tax, but it also receives proceeds of motor vehicle fees and miscellaneous income. In fiscal year 2002 (the last year for which the Department of Transportation published a report on the Fund) some revenues from the Fund were used to operate two passenger rail services, 15 urban bus services, and five rural bus services, and to support Dial-A-Ride services. The Fund provided over $1.7 billion for transit projects in fiscal years 1985 through 2002.[3]

Delaware

The Transportation Trust Fund is used to finance roads, highways, and other transportation facilities[4]—including airports, turnpikes, ports, bridges, tunnels, subways, or parking facilities, and all equipment, machinery, buildings, and land needed to provide transportation services.[5]

Florida

At least 15% of all state revenues to the State Transportation Trust Fund must be used for public transportation projects, including seaports, airports, and public transit systems.[6] At least 10% of fuel sales tax receipts deposited into the Fund must be used for public transit and rail capital projects unless otherwise provided by law.[7]

Louisiana

The state Constitution says that funds in the Transportation Trust Fund are to be used first for debt service and then for roads and bridges, the Statewide Flood Control Program, ports, airports, transit, traffic control purposes of the state police, and the Parish Transportation Fund. At least 1¢ per gallon of the state tax on gasoline and diesel fuels must be appropriated to the Parish Transportation Fund[8] and distributed to parishes (similar to counties) for costs of public transit, including transit operating expenses and buying rolling stock.[9]

Maryland

Maryland's Transportation Trust Fund receives revenues from motor fuel taxes; motor vehicle registration, title, license, and other fees; some corporate income tax revenues; some transit operating revenues, such as fares and airport fees; bond proceeds; and federal aid. Most such revenues are distributed to the Department of Transportation to go to counties and municipalities.[10] All of those entities may use the funds to finance "transportation facilities"[11]—defined as airports, highways, ports, railroads, bridges, tunnels, subways, rolling stock, stations, terminals, parking areas, equipment, buildings, and other property or services related to rendering transit service.[12] The Department of Transportation provides funds to various state transportation agencies, including the Highway Administration, Transit Administration, Port Administration, Aviation Administration, and Motor Vehicle Administration.[13]

Pennsylvania

The state's Motor License Fund, supported mainly by fuel tax revenues and vehicle fees, provides most state transportation funding. It funds highway and bridge improvements, airports, Department of Transportation administrative expenses, State Police highway patrol operations, and aid to local governments for transportation projects. General Fund appropriations subsidize mass transit and rail freight transport.[14]

Tennessee

Most motor vehicle fees and fuel taxes go to the Highway Fund.[15] About 10% of its revenues are used for waterways, airports, railroads, public transit, and bicycle and pedestrian areas.[16] Each year $3 million is appropriated from the Fund for mass transit projects.[17]

Vermont

The Transportation Fund receives motor fuel tax proceeds, vehicle fees, revenues from the sales tax on aviation jet fuel, receipts from pilot and aircraft license fees, and miscellaneous sources.[18] Money appropriated from the Fund to the Vermont Agency of Transportation must be used for building and maintaining state highways, railroads, and airports; aid to municipalities for highways and bridges; general administration of the Agency; debt service on highway bonds; operating the public transit system, railroads, and airports; and Department of Motor Vehicles operations.[19] Three-eighths of 1¢ per gallon of the gasoline tax is used for conservation and maintenance of natural resources.[20]

Virginia

There are two main transportation funds: the Highway Maintenance Operating Fund (HMOF) and the Transportation Trust Fund (TTF). Both receive some proceeds of the state gasoline tax, vehicle sales and use tax, and vehicle registration fee. The TTF also receives 0.5% of state sales tax proceeds.[21]

The HMOF is the primary source of state funding for road maintenance and operations. The TTF is the primary source of state and federal funds for highway construction, mass transit, airports, and seaports. Funds in the TTF are used for highways (78.7%), mass transit (14.7%), ports (4.2%), and aviation (2.4%).[22]

Wisconsin

The Transportation Fund may be appropriated for purposes including planning, construction, maintenance, and operation of highway, airport, harbor, ferry, railroad, bicycle, or pedestrian facilities or services; aid to local governments for transportation purposes; state enforcement of traffic laws; Department of Transportation administrative costs; and tourism marketing services.[23]

Almost half of the Fund goes for highway construction and maintenance. About one-third is distributed to local governments to help with maintaining and improving roads, public transit systems, railways, harbors, airports, and bicycle and pedestrian facilities. The remainder helps finance operations of the Department of Transportation, Department of Motor Vehicles, and State Police.[24]

Other Funds for Transportation in Five States

California

The Public Transportation Account (a part of the State Transportation Fund) is available only by appropriation for transportation planning and mass transportation purposes.[25] The Account receives a portion of revenues from the state sales tax on motor fuel.[26] Funds are used for bus and passenger rail services; funding public transit capital improvement projects in the state transportation improvement program; public transportation research; and support of some state agencies and local transportation planning agencies.[27]

All state funds that are available for capital improvement transportation projects must be divided between projects administered by the state (25%) and those administered by regional authorities (75%). Of the state-administered funds, 60% must be dedicated to highways outside urban areas and to

intercity rail improvements; at least 15% of that 60% (9% of the state-administered funds) must go to intercity rail. The state-administered funds must be used for transportation projects for moving people and goods, including state highways, intercity passenger rail, mass transit projects, and grade separation projects. Locally administered funds are allocated among counties, and may be used for state highways, local roads, public transit, intercity rail, pedestrian and bicycle roads, and other projects to improve transportation in a region.[28]

Michigan

The Michigan Transportation Fund receives most motor fuel and vehicle taxes. One-tenth of the Fund's income each year (plus some general sales tax receipts[29]) goes to the Comprehensive Transportation Fund.[30] The Comprehensive Transportation Fund must be used, after payments for debt service and administrative costs, for grants to local governments or transportation authorities for public transportation projects.[31] Each year, at least 10% of these funds must be distributed for intercity passenger and freight transportation purposes.[32]

New Jersey

The state Constitution says the Transportation Trust Fund is to be used for costs of planning, acquisition, engineering, construction, repair, and rehabilitation of the state's "transportation system."[33] The Fund receives revenues from motor fuel taxes, vehicle registration fees, and part of the state sales tax. Funds for capital projects are allocated among the Department of Transportation; NJ Transit (the state's public transportation corporation); and local governments.[34]

New York

New York finances public transit mainly from two funds dedicated for that purpose:

The Dedicated Mass Transportation Trust Fund is to be appropriated for mass transit facilities, vehicles, and rolling stock; debt service or operating expenses for mass transit operating agencies; rail projects; and helping small and minority- or women-owned businesses in transportation construction projects.[35] It is funded mainly by a portion of the petroleum business tax.[36]

The Mass Transportation Operating Assistance Fund provides funding for transit system operations. It is supported mainly by a portion of the petroleum business tax, and a corporation tax and sales tax imposed in the Metropolitan Transportation Authority region.[37]

Rhode Island

All motor fuel tax proceeds go to the Intermodal Surface Transportation Fund. The Rhode Island Public Transit Authority receives 7.25¢ (about 25%) of the tax on every gallon of motor fuel sold in the state, and the Department of Transportation gets 20.75¢.[38] The law does not specify the uses for these funds. But another law charges the Department of Transportation with preparing plans and implementation programs for transportation; for port and waterway facilities if the principal purpose is transportation and management of port properties, warehouses, and state piers used primarily as transportation facilities; and for maintaining an adequate level of rail passenger and freight service.[39] In 2007, the Department of Transportation provided funds for commuter rail services and bicycle and pedestrian areas.[40]

We hope this information is helpful. Please let us know if you need anything further.

Sincerely,

Sarah E. Franklin

The Honorable Peggy Wilson
Alaska State Legislature
State Capitol, Room 406
Juneau, AK 99801-1182

Dear Representative Wilson:

The Marine Transportation Advisory Board (MTAB) would like to lend support to HB 329. This legislation would help improve the transportation infrastructure throughout the State of Alaska.

The MTAB is a citizen advisory board established by executive order in 2002 and put into statute in 2008. The board advises the administration on marine transportation issues, particularly those related to the Alaska Marine Highway.

HB 329, which establishes a transportation infrastructure fund for the State of Alaska, will help us move forward in developing our transportation needs in the face of shrinking federal dollars. We must continue to develop our transportation infrastructure if we want Alaska to grow and prosper. It is also important that the state maintains the infrastructure in place. We would encourage this legislation to include language that allows us to sustain our current infrastructure.

The MTAB is encouraged by the recent changes made to the legislation that allows for members of the public who represent various modes of transportation to be part of the fund advisory council. We hope that consideration will be given to an MTAB board member being a part of this advisory group to lend advice on marine transportation infrastructure.

SWAMC RESOLUTION 09-02

A RESOLUTION OF THE SOUTHWEST ALASKA MUNICIPAL CONFERENCE URGING THE GOVERNOR AND THE ALASKA LEGISLATURE TO CAPITALIZE STABLE LONG-TERM TRANSPORTATION FUNDING FOR ALASKA

WHEREAS, Alaska's transportation system has fallen far behind the needs of Alaska for cost effective transportation which allows economic growth and the safe cost effective movement of people, goods, and services; and

WHEREAS, the Alaska Highway System, the Alaska Marine Highway System, Alaska Airports, Alaska ports and harbors, and Alaska's local roads all need several years of significant funding for infrastructure improvement, upgrade and expansion; and

WHEREAS, the general appropriation process has resulted in significant underfunding of transportation infrastructure; and

WHEREAS, the Federal Highway Trust Fund is experiencing significant shortfalls, further contributing to a decrease in transportation funding for Alaska; and

WHEREAS, the economic future of Alaska is highly dependent upon a quality, cost effective transportation system; and

WHEREAS, the development of Alaska transportation infrastructure is dependent upon a steady and reliable stream of revenue; and

WHEREAS, the development of an energy policy that works for Alaska requires a quality transportation system in order to be successful; and

WHEREAS, estimates of annual funding needs for transportation infrastructure improvements, upgrades, and expansions exceed $300 million per year; and

WHEREAS, the State of Alaska is in a position to proactively develop a long-term transportation financing program.

-MORE-

NOW, THEREFORE BE IT RESOLVED that the Southwest Alaska Municipal Conference urges the Governor and the Alaska Legislature to establish a Transportation Trust Fund for Alaska or other suitable and sustainable funding mechanisms that generate at least $300 million annually to accomplish the following purposes:

- Generate investment earnings to develop transportation infrastructure in Alaska.
- Improve, upgrade and expand State of Alaska roads and highways.
- Improve, upgrade and expand the Alaska Marine Highway System.
- Improve, upgrade and expand the airports in Alaska.
- Improve and expand Alaska's ports and harbors.
- Provide regular funding to Alaska's communities to improve, upgrade and expand local roads built to local road standards.

AND, BE IT FURTHER RESOLVED that not less than 15-percent of the total funding will be allocated to each of the five programs each year (roads and highways; Alaska Marine Highway System; airports; ports and harbors; public transit and local roads).

PASSED AND ADOPTED by a duly constituted quorum of the Southwest Alaska Municipal Conference Membership this Thirtieth day of January, 2009.

REPRESENTATIVE CATHY MUÑOZ

House Bill 331

Youth Court Funding

For the past twenty years the Alaska Youth Court has emerged as one of Alaska's most effective crime prevention programs. It has provided youth offenders and volunteers a better understanding of our legal system with an emphasis on accountability. Youth Courts strategically operate in Alaska communities from Ketchikan to Nome. It is the only diversion program available in District Court to enable individuals to have their cases dismissed without resulting in a criminal record. For many this brief involvement in the justice system is a turning point.

Funding for this program comprises a mix of state funds, the private sector, municipal grants, and federal funds. To help ensure continuation of Alaska's Youth Court program **HB 331** directs a source of funding from a portion of criminal fines. This bill will require the state to account separately for these fines which currently are spent on the general administration of state government. Consequently it will allow the legislature to appropriate up to 25% of criminal fines to support youth courts.

Each youth court is adapted to fit the needs of the individual community. Youth volunteers participate in various roles while youth offenders receive an alternative sanction from the formal justice system. In 2002 the Urban Institute, a non-partisan, policy research non-profit, studied teen courts in four states. The study compared recidivism outcomes for youth courts with youth handled by our regular juvenile justice systems. The results indicated only 6% of offenders in the Anchorage program were back in court within a six month period compared to 18% by the regular juvenile justice system.

Using criminal fines to pay for crime prevention makes sense for Alaska's future. **HB 331** will provide a means for the legislature to allocate funds annually and support this effective, worthwhile, and cost efficient program.

ALASKA STATE LEGISLATURE

CSHB 331

Explanation of Changes made in (H) JUD Committee

There was one amendment adopted.

The words **'up to'** were added on page 1, sec 3.

"The legislature may appropriate **'up to'** 25% of fines imposed under AS 12.55.035...."

This change allows for the legislature to cap the percentage of fines collected for funding purposes rather than mandate the amount. In turn it will provide more flexibility with budget recommendations from the Juvenile Justice Division to the legislature during the budget process each year. It will allow more flexibility for the legislature during the budget process as well.

ANALYSIS: *(Attach a separate page if nece*

HB 331 allows the legislature to appropriate 25 percent of the fines imposed under AS 12.55.035, collected and separately accounted for by the state under AS 37.05.142, to the Department of Health and Social Services for distribution to youth courts established under AS 47.12.400. The bill would provide an alternate source of funding for youth courts, which have been supported since FY2006 with a Congressional appropriation that will be exhausted by early FY2011. Youth courts are typically operated as nonprofit organizations or within municipalities. The Division of Juvenile Justice relies upon these courts as a community-based diversion response for low-risk juvenile offenders. In FY09, 13% of all delinquency referrals made to the division were referred to youth courts and other community-based diversion panels.

The division is submitting a zero fiscal note because no new authorization is necessarily invoked by passage of this bill.

Alaska Statutes.
Title 12. Code of Criminal Procedure
Chapter 55. Sentencing and Probation
Section 35. Fines.

previous: Section 30. Discharge of Indigents Imprisoned For Nonpayment of Fine. [Repealed, Sec. 16 Ch 53 SLA 1973].
next: Section 36. Day Fines.

AS 12.55.035. Fines.

(a) Except as provided in AS 12.55.036 , upon conviction of an offense, a defendant may be sentenced to pay a fine as authorized in this section or as otherwise authorized by law.

(b) Except as provided in AS 12.55.036 , upon conviction of an offense, a defendant who is not an organization may be sentenced to pay, unless otherwise specified in the provision of law defining the offense, a fine of no more than

(1) $500,000 for murder in the first or second degree, attempted murder in the first degree, murder of an unborn child, sexual assault in the first degree, sexual abuse of a minor in the first degree, kidnapping, promoting prostitution in the first degree under AS 11.66.110 (a)(2), or misconduct involving a controlled substance in the first degree;

(2) $250,000 for a class A felony;

(3) $100,000 for a class B felony;

(4) $50,000 for a class C felony;

(5) $10,000 for a class A misdemeanor;

(6) $2,000 for a class B misdemeanor;

(7) $500 for a violation.

(c) Except as provided in AS 12.55.036 , upon conviction of an offense, a defendant that is an organization may be sentenced to pay a fine not exceeding the greater of

(1) an amount that is

(A) $1,000,000 for a felony offense or for a misdemeanor offense that results in death;

(B) $200,000 for a class A misdemeanor offense that does not result in death;

(C) $25,000 for a class B misdemeanor offense that does not result in death;

(D) $10,000 for a violation;

(2) three times the pecuniary gain realized by the defendant as a result of the offense; or

(3) three times the pecuniary damage or loss caused by the defendant to another, or to the property of another, as a result of the offense.

(d) If a defendant is sentenced to pay a fine, the court may grant permission for the payment to be made within a specified period of time or in specified installments.

(e) In imposing a fine under (c) of this section, in addition to any other relevant factors, the court shall consider

(1) measures taken by the organization to discipline an officer, director, employee, or agent of the organization;

(2) measures taken by the organization to prevent a recurrence of the offense;

(3) the organization's obligation to make restitution to a victim of the offense, and the extent to which imposition of a fine will impair the ability of the organization to make restitution; and

(4) the extent to which the organization will pass on to consumers the expense of the fine.

(f) In imposing a fine, the court may not reduce the fine by the amount of a surcharge or otherwise consider the applicability of a surcharge to the offense.

Juneau Youth Court/JDHS
10014 Crazy Horse Drive
Juneau, AK 99801
Attn: Beth Leban-Coordinator

Tuesday, January 26, 2010

Dear Beth:

I am writing to express my appreciation for the work done by the Juneau Youth Court. The Youth Court is an integral sentencing option for students under the age of 18 who are charged with consuming or possessing alcohol for the first time.

As you know, students who choose the Youth Court option are given the opportunity to have their District Court case dismissed if they successfully complete the Youth Court requirements. For some, this brief involvement in the criminal justice system is a turning point. Those who choose Youth Court and succeed are far less likely to return to District Court on other criminal charges. The students benefit because they end up with no conviction on their record. And the community benefits because the Youth Court graduates are contributing to the community rather than causing harm to themselves and others.

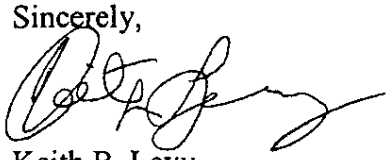
The Youth Court is the only diversion program available in District Court to enable individuals to have their cases dismissed without resulting in a criminal record. The trust the program has earned from both the District Court and the prosecution is a testament to the value and integrity of the program.

I appreciate that you or another representative of the Youth Court always attends the arraignment hearings for minor consuming. The information you provide to the students about Youth Court is invaluable and helps them understand their options in the justice system.

Finally, the Youth Court program provides an opportunity for students to be judged by their peers. I believe this is valuable because the students in the program have far more information about the defendants than is provided to me in formal sentencing proceedings. The Youth Court is able to impose consequences that are more meaningful than the limited options I have when sentencing.

Thanks again for the important service the Youth Court provides to the community.

Sincerely,



Keith B. Levy

KETCHIKAN DISTRICT COURT

TO: WHOM IT MAY CONCERN

FROM: KEVIN G. MILLER, JUDGE

SUBJECT: KETCHIKAN YOUTH COURT

DATE: 2/11/2010

CC:

Thank you for the opportunity to provide a letter supporting the Ketchikan Youth Court's efforts in Ketchikan.

I am a District Court Judge and have referred many cases to the Youth Court since its inception. The majority of the cases referred relate to minors consuming alcohol or tobacco.

Alcohol related crime and crimes committed by persons that are alcohol dependant make up the majority of criminal cases that come before the District Court in Ketchikan. Thus a coordinated approach between the Court System, treatment monitors and providers is the only practical response to assure public safety, rehabilitation and meaningful consequences for offenders.

The Ketchikan Youth Court is a vital tool in a coordinated approach to youth offenders. I am impressed with the dedication of the Youth Court members as well as the results. Youth that complete the Youth Court Program are much less likely to reoffend than those youth offenders that do not enter or complete the program.

Thank you again for the opportunity to provide this support letter, if you need any further information, please let me know.

Mary P. Treiber
MAGISTRATE

Alaska Court System

415 Main Street
Ketchikan, AK 99901
(907) 225-3195; FAX (907) 225-7849

February 5, 2010

Margaret McCloy
Executive Director
Ketchikan Youth Court
2417 Tongass Avenue, Suite 215
Ketchikan, AK 99901

Dear Ms. McCloy:

As the Magistrate for the Ketchikan Trial Courts, I am the judicial officer who most frequently deals with school age teenagers charged by the State of Alaska and the City of Ketchikan with violations of laws or ordinances prohibiting possession or consumption of alcohol by minors, establishing curfews, and prohibiting possession or use of tobacco products by minors. The existence of and the programs offered by the Ketchikan Youth Court provide me with a meaningful sentencing alternative in dealing with these cases.

The KYC process teaches teens referred by the court to KYC about the court process itself, and provides a group of same-age and same-interests teens for these youthful defendants to work with. The resolution of cases through KYC requires engagement of both the defendant and that teen's parents, ultimately strengthening the family abilities to deal with problems a defendant is having as expressed through these quasi-criminal charges. The Court System sees fewer recidivists among those teens who are referred to and who successfully complete the KYC program.

KYC has added the Prime for Life alcohol information classes, and has agreed to make the class available to teens other than those actively participating in the full KYC program. This is a good program, and adds significantly to the resources available within Ketchikan.

I fully support Ketchikan Youth Court.

Sincerely,

Mary P. Treiber
Magistrate

STATE OF ALASKA

February 16, 2010

Kodiak Teen Court
Darlene Turner, Program Manager
610 Mill Bay Road
Kodiak, AK 99615

Letter in support of the Kodiak Teen Court,

I am writing to express my strong support for the Kodiak Teen Court and its ongoing efforts to enhance the court's sustainability.

As we all know, Juveniles are highly influenced by their peers. The Kodiak Teen Court takes advantage of this by having juveniles stand in judgment by their peers. Kodiak students make up the membership of the court and act as both attorneys and judges. In doing so, they learn valuable lessons about the legal process while have an opportunity to help their community. In addition, low-level, first-time offenders are given opportunity to have their case diverted from the juvenile justice system. This is a win-win situation.

Over the years, my office has referred a number of cases to the Kodiak Teen Court. The feedback I have received from the juveniles and their parents has been very positive. Few of these juveniles ever return to the system. This has allowed me to focus my attention on those juveniles who pose a more serious risk to the community.

I look forward to continuing the relationship between my office and the Kodiak Teen Court and strongly support your efforts to ensure its long-term sustainability.

Respectfully,

Paul Caldentey
Juvenile Probation Officer II

STATE OF ALASKA

FAX (907) 463-4933

April 4, 2009

To whom it may concern:

The Juneau Youth Court is a pertinent and vital resource used by the Juneau Probation Office. The referral's that we send the youth court help free up time for Probation Officer's to deal with more serious and needy client's that frequent our large caseloads. The youth court also serves as the entry level in the continuum of services offered by probation and in many cases, helps divert juvenile's from committing further criminal acts. Client's that are non-compliant with the youth court process are showing probation that they need a more restrictive intervention and in that respect, the youth court acts as a litmus test. Please continue funding for this important piece of the juvenile justice system as it both important and necessary.

Sincerely,
Joe Adelmeyer

Chief Probation Officer, Southeast Alaska

FAX (907) 465-6984

April 7, 2009

To Whom It May Concern:

The Alaska Highway Safety Office supports the Juneau Youth Court as an alternative to the juvenile justice system and an opportunity for young people who are accused of breaking the law to be judged by their peers. The court consists of students who fill various roles from judge to juror to address juvenile crime in their community. Nationally, Youth Courts have found that sentences imposed by teen peers have a tremendous impact and effectively defer them from becoming repeat offenders.

The Alaska Highway Safety Office mission is to enhance the health and well being of Alaska's people through programs aimed at saving lives and preventing injuries on Alaska's highways. Federal funding is administered to data driven projects which focus on public outreach, education, enforcement, promotion of new safety technology, and the integration of public health strategies.

Priorities of the Alaska Highway Safety Office include impaired driving and teen driving. A recent study compared Alaska's 1995-1999 minor consuming cases with 1995-2006 DUI court cases and found that 24.4 percent of youth with minor consuming arrests go on to have DUI offenses before their 31st birthday. Although teens represent approximately 12 percent of Alaska's motor vehicle drivers, they are responsible for over 20 percent of the traffic fatalities and major injuries in Alaska. Nearly half of these deaths can usually be prevented by simply buckling-up or not drinking and driving. The Alaska Highway Safety Office supports the Juneau Youth Court because it is a data-driven, peer-led program that effectively addresses minor consuming.

Sincerely,

Cindy Cashen

Re: Legislation in Support of Alaska Youth Court Programs
(i.e., HB 331; SB 257)

Dear Legislators:

This letter is in support of legislation for the financing of Alaska Youth Courts. Currently, HB 331 and SB 257 address this issue, authorizing 25% of fines imposed under AS 12.55.035 to be used for establishing and operations of Youth Courts. There has also been discussion of including in the budget for the Department of Health and Social Services operational monies for Youth Court.

I have witnessed the success of Alaska Youth Courts over the years, serving as a legal advisor or providing pro bono legal service while working for the Municipal Attorney's Offices in Sitka and Anchorage, and serving as outside municipal counsel for various municipalities while in private practice. Youth Courts provide a justice system in which youth offenders are prosecuted, defended, and judged by their peers for certain misdemeanors, violations, and school disciplinary matters, which can range from marijuana use/possession, curfew, theft, vandalism, truancy to violating school behavioral rules. Sentences are imposed, which can include community work service, fines, essays and/or apology letters, drug and alcohol treatment, other treatment programs (shoplifting, anger management, cigarette cessation). More importantly, Youth Courts provide an holistic approach to sentencing, working not only with the offender, but with the family, teachers, school, police, and/or treatment programs.

Currently as Municipal Attorney for the City and Borough of Sitka, I prosecute certain crimes and violations. I prefer diversion programs for youths, such as Sitka Youth Court and the Sitka Tribal Youth Diversion Effort (TYDE – for first time offenders involving alcohol consumption and/or possession). The success of such programs is not only measured in financial savings to the judicial and legal systems, but also in the low recidivist rate of those who complete such programs. These types of programs divert youths from entering and reentering the criminal justice system, involving cost savings to the court system (judges and clerks), prosecutors, public defense, and police. These types

of programs have proven low recidivist rates in comparison to the recidivist rates of those youths entering the revolving door that often occurs when prosecuted through the judicial system. The success rate of Youth Courts statewide is impressive, with estimated recidivist rate as low as approximately 10% reported by programs such as Anchorage Youth Court.

Additionally, Youth Courts throughout Alaska educate all youths, not just offenders, about the legal and criminal justice systems. Youths are trained and actively participate in legal proceedings. They learn about the criminal laws and infractions, and the consequences of violating such provisions, not only on the offender, but on the family, classmates, school, and community of which they are a part. Youth Court members provide a reality check on youthful offenders, and are often not as forgiving or compromising about offenders as adults, knowledgeable of the enticements and excuses, but recognizing appropriate choices. Youth Court members provide an invaluable community service, while being shaped into formidable citizens for which we can all be proud.

Your support of legislation financing existing or new Youth Court programs throughout Alaska is requested and needed. Thank you for your consideration of these types of legislative proposals.

Sincerely,

Theresa Hillhouse
Municipal Attorney
City and Borough of Sitka

Juneau, AK 99801-1182

Dear Representative Munoz,

The Kodiak Chamber of Commerce fully supports HB 331 "An Act relating to funding for youth courts; and relating to accounting for criminal fines"

The United Youth Courts of Alaska provide an extremely important function in the communities they serve. Their handling of approximately 900 cases per year reduces recidivism and crime rates in our State. In addition, savings to the State of Alaska is estimated at $10,145 per defendant. Youth courts in Alaska generate over $100,000 worth of Community Work Service product annually, at no cost to the communities or the State.

The juvenile population of our State is expected to increase by 27% by 2015. With this dramatic increase in the juvenile population, juvenile crimes will likely also increase, and thus the sustainability of youth courts is even more critical.

Thank you for the support of House Bill 331.

Sincerely,

Debora King
Executive Director

Dedicated to Kodiak's Economic Future

City of Kodiak
KODIAK POLICE DEPARTMENT
Office of the Chief of Police

Regional Affairs, Co-Chair
State Capitol, Room 409
Juneau, AK 99801-1182

Re: Youth Court Program

Dear Representative Munoz:

Our department supports legislative funding by money obtained from court fees to support the twelve Youth Court programs in the state of Alaska. These programs offer an option for youth who have had their first experience breaking the law – by having their cases removed from the traditional juvenile justice system by referral from juvenile probation officers and district court judges and diverted to a court of their peers.

The mission of the youth court programs in Alaska is to work in partnership with Alaskan communities and the formal juvenile justice system to develop and sustain innovative youth courts programs. Services offered by the programs in which youth are sentenced by their peers for minor delinquent status offenses and other problem behaviors frees state employees in the court system and the Juvenile Justice division.

The funding of the Youth Court program will serve the needs of Alaska citizens, state agencies, and law enforcement. Thank you for your consideration of this important matter.

Sincerely,

Charles "TC" Kamai
Chief of Police

juneauyouthcourt@jsd.k12.ak.us

February 12, 2010

The Juneau Youth Court Community Advisory Board supports House Bill 331 and Senate Bill 257, *"an Act relating to funding for youth courts; and relating to accounting for criminal fines"*. This legislation would appropriate 25 percent of the court fines imposed under AS 12.55.035 to established and operating youth courts. Federal funding will not be available after this year and the future of the Alaska Youth courts depend upon state and local ownership.

A recent study shows Alaska Youth Courts to be among the most effective in the nation. According to the Urban Institute's Evaluation of Teen Courts Project, which was based on four teen court programs studied in four different states (Alaska, Maryland, Arizona, and Missouri), the six-month recidivism figures among the programs ranged from 6 percent to 9 percent. Alaska's recidivism rate was the lowest of these four states, and compared to the recidivism rate of 18 percent for the regular juvenile justice system, shows that youth who go through youth courts are significantly less inclined to re-offend within the following year.

The primary function of youth court programs is to determine a fair and restorative sentence for young offenders. Youth courts are programs in which youth sentence their peers for minor delinquent and status offenses and other problem behaviors. According to the National Youth Court Database, in 1994 there were only 78 youth court programs in operation; as of October, 2006, there were over 1127 youth court programs in operation in 49 states and the District of Columbia.

The Alaska Youth Courts is a vital form of community justice and reweaves the fabric of community by forging a partnership between local governmental entities, the private sector, and community groups to facilitate the performance by private citizens of the functions that were once performed by the extended family, neighborhood, and school.

Sincerely,

Cindy L. Cashen
President
Juneau Youth Court Community Advisory Board

Wrangell, Alaska. 99929

To Whom It May Concern: Date: January 8, 2010

Re: Wrangell Youth Court

The purpose of this letter is to express the continued support of the Wrangell Trial Courts for the Wrangell Youth Court program.

Since its inception ten years ago, the Wrangell Youth Court has been widely accepted and respected in the local community. Having youthful offenders appear before a group of their peers has had a very positive effect in this community. Most individuals appearing before the Youth Court successfully complete their requirements and never return to the court.

The youth court provides the added bonus of "hands on" knowledge of the justice system and public service opportunities for its members. They graduate with solid ethical standards and a commitment to public service and the administration of justice.

Although the success of a program is frequently measured by the number of cases or clients handled, that is not really an adequate standard in looking at a youth court program, particularly in a small town. If this court never heard another case, it would be a successful program based on the dedication and commitment of its members.

Thank you for your continued support of the Wrangell Youth Court program. We are looking forward to continuing to work with this program for the next ten years.

Chris Ellis
Magistrate

JUNEAU SCHOOL DISTRICT
CITY AND BOROUGH OF JUNEAU

Office of the Assistant Superintendent • 10014 Crazy Horse Drive • Juneau, Alaska 99801 • (907) 523-1704

To whom it may concern:

I am writing in support of legislation that would provide sustainable funding for youth court programs in Juneau and other communities in Alaska. For over a decade Juneau Youth Court has provided a vital and important service to the City and Borough of Juneau.

Juneau Youth Court is a diversion program that removes young people who are first time offenders from the traditional juvenile justice system and handles the case in a court of peers. The program works with families to ensure that teens are held accountable for their actions and that consequences are constructive and tailored to the individual youth thereby benefiting both the young person and the community at large. Last year Juneau Youth Court ordered over 600 hours of community work service that were completed at Zach Gordon Youth Center, the American Red Cross, Meals on Wheels, the Glory Hole, the Salvation Army, and at schools throughout Juneau School District.

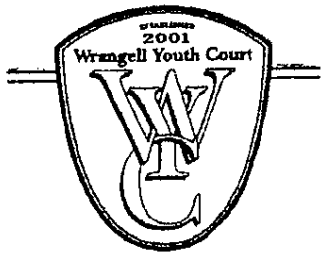
On average Juneau Youth Court serves 50 youth each year handling referrals from both District Court and Juvenile Justice Probation Officers. This frees up the court and probation officers to handle more serious offenders and helps to reduce their large caseloads. Youth Courts have the additional advantage of educating the youth who volunteer for the program. Youth Court advocates reap the benefits of learning about the legal system, performing meaningful community service, and gaining the opportunity to help their peers.

Juneau Youth Court operates on a very small budget of $35,000 per year with one part time paid staff person, two dozen volunteer student advocates, a community advisory board including representatives from the Police Department, the Division of Juvenile Justice, the legal community, and community partners. The program offers an important service to the community at a very low cost.

Juneau Youth Court is just one example of a successful diversion program known as youth court. Around the state Youth Courts are doing important work for Alaska by addressing juvenile crime in its earliest stage. I strongly urge you to support legislation that would provide sustainable funding to support these community-based programs.

Sincerely,

Laury Scandling



January 7, 2010

To whom it may Concern:

Wrangell Youth court is an innovative alternate traditional justice system and is empowered by the Alaska Statute 47.12.400 to make a positive difference in Alaskan communities.

Youth Court programs are rapidly advancing in goals of Restorative Justice, by developing programs that are not only cost effective but promote youth accountability by involving youth in obligations of taking an active role in their community. Youth are encouraged to connect in our community and in our State, where youth partner together, encourage and share information that enable youth with critical decisions making skills.

The purpose of the program is to decrease juvenile crime and the recidivism amongst juvenile offenders as well as to involve students in implementing restorative justice. Youth Court members learn valuable experiences in assuming the role and responsibility of a judge, prosecute or defend first-time juvenile offenders in a court of their peers.

The Wrangell Youth Court program eases the caseload of the district and superior courts, juvenile probation offices and schools district. We have found that this program is cost effective when you compare to the cost of one incarceration of a juvenile offender. Cost can be greater than $40,000 for a first time offense. If Wrangell Youth Court prevents one student from attending a youth detention facility it has paid for the entire year of the Wrangell Youth Court program.

In the year of 2000 the community of Wrangell, Alaska had a high juvenile crime rate and an even higher rate of minors consuming alcohol. In fact our community was 30% higher than another community similar in size and location. Since Wrangell Youth Court was established in 2001 the crime rate and rate of minors consuming alcohol has decreased greatly.

This program is a community base form of restorative justice that builds ties between youth, victims and other members of the community, offering youth the option to learn from their mistakes. Youth volunteers that participate, explore a variety of short and long term consequences of substance abuse, including cost to the individual and the community and its relation to other types of crime.

The Wrangell Youth Court has been nothing less than a success and has provided our youth with the opportunity to be involved and vision other career paths that they may had never seen. The training provided in the areas of legal and court procedures have offered a better opportunity to understand our Constitution and Bill of Rights and to actively give them a voice and feel valued, while at the same time engaging and bringing about social change.

Wrangell Youth Court not only mentors peers, has developed a positive relationship with the community, schools, business and other local communities.

Sincerely,

Dorthea Rooney
Wrangell Youth Court Coordinator

Wendy Leach
North Star Youth Court
800 Cushman St., Suite 101
Fairbanks, AK 99701

Dear Wendy,

I am writing to compliment you and the rest of the North Star Youth Court on the great job you are doing with Minor Consuming and Minor Operating After Consuming cases that are referred to the Youth Court by our court. It is important for our society to have a variety of options for the administration of criminal justice in order to promote rehabilitation and public safety, and to decrease recidivism. Youth courts are one such option. As you know, our referrals to your court are good for both the offender and for the public. I have seen that the confidentiality of your program is a real benefit to young offenders. Similarly, the public benefits in many ways, including through a reduced financial cost to the court system and law enforcement, through the Youth Court's focus on service to our community, and through the high rate of successful rehabilitation for offenders who complete the youth court program. It is my experience that offenders who are referred to your court are unlikely to return to ours.

Thank you very much for the work done by the young people and the adults of the North Star Youth Court. I would be happy to continue to work with the Youth Court to provide training for your judges, so please let me know when there is a Youth Court Judge who would like to shadow a Magistrate in the Fairbanks District Court or when you would like me to speak at a Youth Court Judge's training session.

Cordially,

Bethany Harbison
Magistrate

February 9, 2010

Bill Stolze,
State Representative
600 E. Railroad Av
Wasilla, AK 99654

Dear Mr. Stoltze,

I would like to express my support of HB331 and SB257 which would provide continued funding of State wide Youth Court Programs.

I fully support youth courts as statewide diversion programs that address first time juvenile offenses. These programs operate in twelve communities around the state. My current experience with youth courts is with the Mat-Su Youth Court (MSYC) program, which falls under the umbrella of the Wasilla Police Department and is funded wholly through grants. The Wasilla Police Department supports the MSYC with in-kind donations by providing office space and some supplies.

It is my firm belief that without MSYC operating in the Mat-Su Valley the police department would continue to see increased juvenile crime. Young offenders who do not suffer consequences as first time offenders will continue to commit crimes according to recent statistics.

Wasilla Police officers know that when they complete a report on a juvenile first time offender who has committed a low-level offense, that juvenile will not simply be given a letter from the State or a verbal warning from a Juvenile Probation Officer. Virtually every first time offense that is referred to the Division of Juvenile Justice office in the Mat-Su Valley gets referred to MSYC. MSYC takes action to insure the juvenile offender is made aware of what he/she did, who it affected in the community, and what to do to avoid repeating their conduct.

I support these bills to allow youth courts around the state to work on sustainability of their programs and to insure that they continue to address juvenile crime in the State of Alaska.

Greg Wood
Deputy Chief of Police

Hi, my name is Fred Becker V, I am the loss prevention manager for the Abbott Road Fred Meyers in Anchorage, and a active board member for the
Anchorage Youth Court.

I have worked in the Loss Prevention Profession for over 26 years in the Anchorage Area. I became concerned with the consequences the youth were receiving very early on in my career as I was apprehending the same individuals over and over again. After discussing with those that I did apprehend a second and third time what had happen to them after the first and second time I found that many had not had any contact with anyone in the judicial system. Most stated they received a letter from McLaughlin Youth Center advising them to stay out of trouble, and some said then did not hear from anyone.

Since the inception of the Youth Court in Anchorage I rarely apprehend a juvenile a second time. I strongly believe that Anchorage Youth Court has provided the consequences necessary to deter individuals from re-offending, and prevented many young adults from having a adult criminal recorded. Because without the Anchorage Youth Court most juveniles would continue with their criminal behavior into their young adult life.

I believe in the successes of AYC as a highly-effective juvenile alternative justice program and that we do transform the lives of over 600 anchorage youths per year. The 300 plus youth volunteers are trained and receive extraordinary experiences in real live judicial matters. The 300-350 juvenile offenders referred to Anchorage Youth Court each year are given an opportunity to make amends to the community and are held personally accountable for their actions. This is why I am honored to be a AYC board member.

As a member of the retail industry I am happy to be part of a program that is also a benefit to our ability to continue to employ

about 300 employees per location with a total of about 3,300 employees in the state of Alaska. The Youth Courts around the state provided a restitution program that did not exist and by providing a deterrent program for juvenile offenders results in less individuals using the five finger discount at our locations. My board membership has also resulted in the financial backing of Fred Meyers to help support our community.

As a board member I feel that some times we are not afforded the opportunity to address some issues because we spend a lot of our productive time finding ways to raise funds to support the financial requirements of AYC. With a stable source of funding I feel the board could focus more of our efforts on making Anchorage Youth Court as beneficial to the community, members, and offenders as possible.

Thank you for your time and I would be happy to discuss further my personnel or business involvement with AYC to you.

Darlene Turner February 15, 2010

Kodiak Teen Court
610 Mill Bay Road
Kodiak, Ak. 99615

Dear Darlene:

I am writing to you today to express my heartfelt thanks and continued support for Kodiak Teen Court. Since the program started in 1995, it has enjoyed tremendous success in our community, giving hundreds of youthful offenders over the years an opportunity to have their cases taken out of the traditional juvenile court system and instead dealt with in a more informal, less intimidating and more meaningful atmosphere, as the teen defendants are literally tried by their own peers serving as teen prosecutors, represented by their own peers as teen defense attorneys and sentenced by their own peers serving as teen judges. Besides being dealt with in a courtroom where everyone else is their same age (who they can relate to more than adult judges and attorneys), the teen defendants are given an opportunity to come out of Teen Court with a clean record if they comply with the sentence given them by the teen judges. It is no wonder, then, that the rate of re-offending in youth courts in Kodiak and in other parts of the State is significantly lower than with those teens who stay in regular juvenile court. Additional benefits to our community include an emphasis on restorative justice, making the victim feel "whole" again, and the imposition of a meaningful amount of community work service that many non-profits organizations in Kodiak find very helpful. Finally, I have been told by all the juvenile probation officers throughout the last 15 years, past and present, that they appreciate Teen Court because it allows them to divert less troublesome teens from the regular juvenile justice system into Teen Court, thus giving them more time to devote to the more serious teen offenders on their heavy caseload that *really* need their help in the formal, structured setting of the traditional juvenile court system.

The Kodiak Teen Court is an asset to our community in another, very big way. As the program celebrates its 15th year in existence this year, I have had the distinct pleasure over these years to work with hundreds of fine outstanding teens at Kodiak High and in our middle schools who have served as teen judges, prosecutors and defense attorneys. These students are given a unique perspective on how our justice system works, they are tremendous ambassadors of the program and great role models to teens who have gotten themselves into trouble and come into the program. Many of these former Teen Court judges and attorneys have kept in contact with me, and are already doing well in their chosen field, whether it's teaching in graduate school at Notre Dame, working as a detective in Portland, serving as a soldier in Iraq or attending good law schools and medical schools across the United States, many of whom intend to someday return to Alaska and work.

Again, I thank you for the wonderful program!

Sincerely yours,

STEVE COLE
Superior Court Judge, Kodiak

PO Box 1841
Nome, AK 99762
February 15, 2010

To Whom It May Concern:

I am writing to express my support of the Youth Court program in Alaska. I moved to Nome, Alaska from South Royalton, Vermont to work as a clerk and deputy magistrate at the Superior and District Court and had no idea I would also be involved with the Youth Court program. When I found out that I was to serve as Youth Court Legal Advisor I was ecstatic. Youth Court excited me because, as a former social studies teacher, I saw a program that raises students' knowledge of the law, legal process and their civic rights and duties and excites a new generation of responsible, active and thoughtful citizens.

Youth Court gives students many unique opportunities and learning experiences. Just the personal responsibility required by participants makes this program invaluable. Students between the ages of twelve and eighteen literally participate in the court process representing clients and handing down legally binding sentences. In doing so they acquire many social skills and thinking strategies. Students learn empathy and professionalism when dealing with clients. They learn public speaking and writing. They learn how to separate facts from belief and emotion, how to see all sides of an issue, and how to logically and carefully present these issues. Through zealous representation of clients students grow as citizens, people and community members.

Perhaps the most important part of Youth Court is the clients themselves. Youth Court is a diversionary program targeting at risk youth, who, if thrown into the court system at such an early age, hazard becoming the repeat offenders I often see at my job. Youth Court gives these young men and women a second chance. Anybody who has worked with teenagers knows how much weight is placed on the opinion of their peers. In the Youth Court process, defendants are tried and sentenced by their peers, not a mysterious adult. This reinforces lessons learned and allows defendants to feel that they have been fairly judged.

Most importantly, Youth Court is not about punishing these young offenders. Sentences are not handed out in retribution. Instead, sentencing is designed to show the defendant the error of their ways, to intervene and work with the defendant's specific personality so they may see the connection between their actions and the effects of those actions, and finally to benefit the community. As the saying goes, an ounce of prevention is worth a pound of cure. The Youth Court program is many ounces of prevention.

The Alaska Youth Court program is one of the best and most innovative programs in the entire United States. Creating future active, intelligent, informed and free-thinking citizens cannot be measured by dollars or statistics. It would be a shame to see such a program falter for lack of funding. I fully support keeping this wonderful program alive and active.

Thank you for your time and support.

Sincerely,

Jeffrey Davis, Esq.

Patty Burley
PO Box 2715
Bethel AK 99559-2715
(907) 543-3098

January 6, 2010

Dear Representative Cathy Munoz:

I am writing to you to request your support in ensuring that Youth Courts remain a part of Alaska's legal system. They are invaluable and give so much more than initially may be seen.

Here in Bethel we have a very small youth court still struggling to get squarely off the ground. We have graduated only a handful of youth but I can tell you first-hand the impact such a small project has had on the youth in this area.

While to date we have only graduated a few students, each of those has at one point or another been enrolled at the Bethel Alternative Boarding School (BABS). Each of those youngsters has a unique learning style that makes it difficult for them to fit in or do well in mainstream schools. One of the youngsters was actually a drop-out. Despite those hurdles these teenagers came week after week to the 2 hour-long classes. They studied hard and took both a written final exam and an oral exam. These teenagers who fight so hard just to finish or stay in school actually excelled. They worked incredibly hard and it showed. Each of those teens gained confidence and a sense of accomplishment. A few were on the road to trouble with the law. They were bored, felt they had nothing to offer, and nowhere to go. Youth court changed that for them. It gave them a sense of purpose, a moral compass and a sense of belonging. These individuals will go further than they would have if youth court had not become a part of their lives.

Today I note that there appears to be a strong correlation between underage drinking and crime(s). There is also a strong correlation between underage drinking and trouble at school. Right now we do the best we can for these students via the Community Diversion Panel (CDP). While that is an amazing program that has provided a considerable amount to the community, it is only catching the tip of the iceberg. For many kids, by the time they come to the CDP their problems with alcohol have spiraled out of control. For others, alcohol comes much later in the process – they instead start with truancy and behavior problems at the school. These are the early cries for help. An active youth court would be able to intercede early enough to stem the upcoming tide. It would give minors an opportunity to start anew with the help and support of those whose input they seek the most: their peers.

There are some wonderful youth courts in other areas of Alaska which are at jeopardy as well: Anchorage, Kenai, and Fairbanks just to name a few. These programs have been around a while longer than Bethel's and have made even bigger impacts on the lives of minors. They have also reached out to lend support to those smaller youth courts still working to get established and on more solid ground. These programs are too valuable to lose.

February 5, 2010

To Whom It May Concern:

I am writing to emphasize the importance of the Mat-Su Youth Court to the welfare of the Mat-Su community and to express my support for that organization.

In my almost 20 years on the bench, mostly as a magistrate and superior court master, recently as a district court judge, I have presided over literally thousands of cases involving teenagers. As the Mat-Su Valley population grew, the ability of the juvenile probation office (JPO) to handle all the cases involving teenagers was greatly diminished. Rightfully so, the JPO has to concentrate on the more serious crimes, such as burglaries and felony level assaults, that were committed by teenagers. As a result, many teens who committed lower level crimes, particularly shoplifting, either merely got a warning letter or their crimes were ignored all together.

Participation in lower level crimes leads to a disrespect of the law, of other people's rights in their person and their property, costs local storekeepers significant amounts of money, and often leads to greater criminal behavior if left undressed. Into this gap stepped the Mat-Su Youth Court. Many crimes that would not have been addressed because of the caseload of JPO are being handled by the Youth Court. The imposition of sanctions including restitution, community work service and letters accepting responsibility and apologizing for committing the crime all serve both the victim and the community as well as the defendant, who is more likely to grow to be a responsible citizen from the experience.

Over the years the Mat-Su Youth Court has added a program for first time offenders under the age of 18 convicted of Minor Consuming Alcohol. Not only is the program educational, but being run by a peer group, it sets the example that being clean and sober is an acceptable lifestyle that is respected by one's peers. Given that not only locally but nationally roughly 80% of adult crimes are somehow related to alcohol abuse, getting the message to an offender earlier in life may keep them from becoming part of that statistic as they grow older.

I wholeheartedly support and recommend the Mat-Su Youth Court program and urge others to do so, also.

Sincerely,

David L. Zwink
District Court Judge, Palmer, Alaska

United Youth Courts of Alaska
Fact Summary

Youth Courts in Alaska...

1. Handle an average of **1,000** cases per year.
2. Produce an average **reoffense rate of 10.6%**, compared to 23% under the regular court system.
3. **Save** the State of Alaska an estimated **$10,686 per defendant.**
4. **Generate $98,930** worth of Community Work Service work product every single year – at no cost to our communities or the State.
5. **Reduce crime rates by 11.1%** overall.
6. Offer a wide range of **classes and mediation services** to offenders.
7. Provide real-world career and criminal justice **training to 2,300 Alaskan youth** volunteers each year.

Did you know?

8. Alaska has already entrusted youth courts with the most comprehensive legislation in the nation (AS 47.12.400, AS 4.16.050).
9. There are 12 youth courts in Alaska: Anchorage, Bethel, Juneau, Kenai, Ketchikan, Kodiak, Mat-Su, Nome, North Star/Fairbanks, Sitka, Valdez, and Wrangell.
10. Nationally, there are 1200 youth courts in 49 states and Washington, D.C.

United Youth Courts of Alaska
Fact Detail

1. 1,000 Cases Per Year

Based on FY2007-2009 statistics, 12 youth courts in Alaska hear over 1,000 criminal cases each year, around 65% referred by Juvenile Probation and 35% by District Court. Additionally, other agencies such as schools send referrals to youth court, but they have not been tracked before FY10. While programs throughout the state differ slightly, all of the youth courts in Alaska hear first time or non-habitual juvenile offenders for misdemeanors, violations, and infractions per State and Municipal laws.

2. 10.6% Reoffense Rate

Based on the national Urban Institute study titled "The Impact of Teen Court on Young Offenders" by Jeffrey A. Butts, Janeen Buck, and Mark B. Coggeshall, the short-term (6 month) reoffense rate for juvenile offenders in the traditional court system is 23%.

For the 65% of cases referred by DJJ, youth courts in our state have an average reoffense rate of 10.6%, meaning that **89.4% of juvenile offenders served by youth court do not commit further crimes within six months.** Some youth courts track reoffense for District Court and other agency referrals as well, but there is no statewide average for this.

Additionally, youth courts in Alaska have a lower reoffense rate compared to those in other states, which may be due to our unique court structure that allows teens to be judged—literally—by their peers, not by adults. According to the study done by the Urban Institute, there are seven principles that make youth court effective:

1. "Peer justice,
2. Procedural justice,
3. Deterrence,
4. Labeling
5. Restorative justice and repentance,

6. Law-related education, and
7. Skill building."

3. Savings Per Defendant

In the report, "Criminal Justice Economics" by the Oregon Criminal Justice Commission, October 2009, Teen Courts were identified as an "effective program." Youth Courts **save the state $11,683 per defendant** based on the cost of crime on victims and taxpayers. The average **cost of teen courts per defendant was $997, for a net benefit/savings of $10,686 per offender.**

4. Volunteer Work Product

Statewide, youth courts sentence Community Work Service as part of sanctions to repair the harm for the crime that has been committed. The type of work done for CWS might be cleaning up litter and debris on roadways or public parks, helping at soup kitchens, repairing damages caused by the crime, working at animal shelters, or helping elders in nursing homes. Based on statistics from the Division of Juvenile Justice, juvenile offenders successfully completed 19,786 hours of CWS in FY2009. The State of Alaska values CWS at $5.00 per hour, which means that the value of **CWS completed through youth court last year was $98,930 at no cost to our communities or the State.**

The work products of other sanctions are not taken into consideration for these figures, but are also valuable contributions to the health of the community. Examples of other sanctions include: restitution to victims, essays, behavior modification classes, apology letters, alcohol or drug classes and counseling, and mediation programs (see "6. Classes and Mediation Services").

5. Reducing Crime Rates

In 2006, the Washington State Institute for Public Policy completed an exhaustive study of many adult and juvenile prevention and intervention programs. In the report, youth courts were identified as an effective program. Citing five evidence-based studies, the Institute found that **youth courts reduce crime rates by 11.1%.** This reduction in crime rates contributes to overall taxpayer savings (see "3. Savings Per Defendant").

Youth courts have been proven to reduce crime and reduce reoffense, and they do it by linking the crime to swift, efficient consequences and offering **"a continuum of community-based services"** to address the issues underlying the crime (DJJ Annual Report, FY2004).

By providing diversion services for District and Superior Court Judges as well as Juvenile Probation Officers, youth courts allow these officials to focus on the more serious offenses or repeat offenders. Because of this and other reasons, judges, clerks, attorneys and Juvenile Probation staff across the state show their support for youth court by instructing classes, volunteering time, serving on Boards of Directors, and offering legal advice on cases.

While youth court programs benefit the juvenile justice system and juvenile offenders, it is important to note youth courts contribute to the social and economic well-being of our communities.

6. Classes and Mediation Services

The 3 main principles of **Restorative Justice** are **Accountability, Community Protection, and Competency Development**—principles which have long been used in the field of juvenile justice to address the root causes of juvenile crime. Across the state, youth courts offer evidence-based and creative ways for offenders to educate themselves and end the cycle of crime. The following youth courts directly provide these classes and mediation services; other youth courts utilize a network of community-based services.

- North Star Youth Court, located in Fairbanks, offers a comprehensive and year-round **Mediation Program**; the three types of mediation offered are victim-offender, parent-teen, and peer-to-peer. Mediation is based on the philosophy of Restorative Justice, the purposes of which are to put key decisions into the hands of those most affected by crime, to reduce the likelihood of further offenses and to provide closure for all parties and a strengthened community. North Star Youth Court also offers an **Alcohol Awareness Class**, as well as a **Parent Information Class on MCAs**.
- Mat-Su Youth Court offers a **Juvenile Anti-Shoplifting class** as part of sanctions for offenses involving theft and concealment of merchandise. MSYC also provides a peer-led **Minor Consuming/Risk Factors class** for youth defendants charged with alcohol and drug crimes. The class covers risk factors youth face every day that influence their future behavior.
- Ketchikan Youth Court provides a certified **PRIME for Life® alcohol and drug prevention/intervention class** for offenses involving alcohol or controlled substances. KYC

also offers a **Money Education Class** for offenses involving theft, concealment of merchandise, or destruction of property; the goal is to provide an overview of community economics and discuss how each person's actions (spending, saving, stealing, etc.) affect other people financially.

- Anchorage Youth Court utilizes a variety of classes to address different issues within their client community. AYC classes include: **Anti-Theft Class, Thinking Patterns, Victim Impact, Drug & Alcohol Assessment and Follow-up, Fire Stoppers, and Weapon Safety.**
- Sitka Youth Court offers classes on **Victim Impact** and **Anti-Theft**.
- Nome Youth Court, in partnership with the court system, offers a certified **PRIME for Life® alcohol and drug prevention/intervention class.**

7. Training 2,300 Alaskan Youth Annually

Youth volunteers who are directly involved in the youth court process receive a minimum of 10 hours of legal training before they can begin working on cases. Throughout the time they volunteer for youth court, volunteers are required to attend workshops, CLEs (continuing legal education), and other trainings to enhance their skills. Most youth courts have a Bar Association that helps to facilitate these trainings and enforce court policies.

Some courts also require juvenile offenders to take these trainings, so that they can better understand the process of justice and perhaps become a part of youth court. Those individuals who start out as offenders are often the most effective and compassionate judges, jurors, and attorneys.

8. Youth Court Legislation in Alaska

Alaska was identified in another recent national study as the one state with the most comprehensive Youth Court legislation, in that our statute **AS 47.12.400** specifically entrusts Youth Courts with adjudicatory as well as dispositional authority. (See "The Organization and Operation of Teen Courts in the United States, A Comparative Analysis of Legislation", Michele Heward, JD, Juvenile and Family Court Journal, Winter 2002.) The legislature has also entrusted Youth Courts with the authority to handle first time minor consuming alcohol violations under **AS 4.16.050**.

In 2003 and again in 2005, youth courts from around the state mobilized to introduce a bill into the state legislature. The Alaska State Legislature considered **HB 303**, a bill to secure sustainable funding for youth courts for the first time: "An Act relating to youth courts and to the recommended use of criminal fines to fund the activities of

youth courts; and relating to accounting for criminal fines." HB 303 passed through the House Judiciary Committee, and every member of that committee added their name as co-sponsors. HB 303 made it to the House Finance Committee, but the session ended before it could be heard. During the 24th Legislative Session, **HB 155, the second "Youth Court Bill"**, was approved through several committees and passed the Alaska House of Representatives in March 2005. The Senate version of that bill was handed over to the Finance Committee but never came up for a hearing.

9. Youth Courts in Alaska

There are 12 community-based youth courts in Alaska: **Anchorage, Bethel, Juneau, Kenai, Ketchikan, Kodiak, Mat-Su, Nome, North Star/Fairbanks, Sitka, Valdez, and Wrangell.** Many of these courts have been in operation over 10 years; Anchorage has the longest-standing youth court in the state, having been incorporated in 1989.

Communities throughout Alaska who hear about the benefits of youth court continually express interest in beginning their own, and it is a goal of UYCA to facilitate emerging youth courts through mentoring and providing technical assistance.

United Youth Courts of Alaska is a statewide organization which seeks to work in partnership with Alaskan communities and the formal juvenile justice system to develop and sustain innovative youth courts. All of the above named courts are members of UYCA, and use it as a platform to network and support each other's programs through conferences and technical assistance. For more information on UYCA and its members, visit www.alaskayouthcourt.org.

10. Youth Courts in the United States

There is only one state, Connecticut, that does not have youth courts due to their juvenile justice system. In 2006 more than 120,000 youths volunteered to hear more than 130,000 cases, and more than 20,000 adults volunteered to facilitate peer justice in youth court programs.

The National Association of Youth Courts (NAYC) was started with support from four federal agencies: Office of Juvenile Justice & Delinquency Prevention, U.S. Department of Education and the Corporation for National and Community Service, and the National Highway & Traffic Safety Administration. This effort was started in

2003 when OJJDP recognized the huge movement of youth court programs springing up all over the country due to studies showing their effectiveness.

NAYC became a 501(c)3 association in 2007. Some current objectives are:

- Encourage the development and expansion of youth courts and state associations of youth courts;
- Provide a forum for training youth and adult volunteers, sharing ideas, and providing 'best practices' and other critical resources for the operation of youth courts;
- Enhance connections to and relations with government agencies and community-based programs or organizations; and
- Educate public and private agencies, businesses and individuals on the benefits of youth courts.

Many youth courts choose to have membership in NAYC to stay abreast of national program trends and to attend conferences. Mat-Su Youth Court Co-Director Lisa Albert-Konecky is Alaska's representative on the NAYC Board of Trustees. Visit www.youthcourt.net for more information.

To: Terry Harvey
Subject: HB331 Youth courts

Per your request, I am confirming that the Alaska Court System collected the following for fines and forfeitures for the past two fiscal years:

FY09 $5,678,900
FY08 $5,684,000

These totals include *bail forfeitures*, which may or may not be applied as a fine. The court system's collections are fairly consistent from year-to-year so a good ballpark estimate excluding the forfeitures would be $5.3 million. Please let me know if you require any additional information.

FAQs: Frequently Asked Questions

1. Why do we need youth courts? Click here for the answer
2. What are youth courts? Click here for the answer
3. Why do we need a state association? Click here for the answer
4. How many youth courts are there? Click here for the answer

Email us with any additional questions you have.

1. Why do we need youth courts? It is impossible for the Department of Health and Social Services, Division of Juvenile Justice (DJJ), to respond fully to all delinquent acts committed by juveniles. Instead, incidents are prioritized and division resources are devoted to the most serious cases. Low-priority cases, such as first time shoplifting, may result either in no personal contact (a warning letter) or a referral for outside services. Youth who commit these offenses are left with the impression that their criminal actions are deemed acceptable, if there has been no consequence for the crime they committed. Studies indicate, however, that early intervention in lower-priority cases can be very effective in preventing more serious problems from developing in the future. There is an urgent need for communities to complement DJJ's services by providing responses to lower-priority cases. The community suffers each time a crime is committed. Youth courts are a method for the community to respond to delinquency. This voluntary alternative to the juvenile justice system is a form of early intervention designed to foster a sense of well being in the community. Back to the top

2. What are youth courts? Youth courts are innovative alternatives to the juvenile justice system. Youth volunteers participate in various roles (attorney, judge, bailiff, juror) while youth offenders are offered an alternative sanction from the formal juvenile justice system. Youth courts are implemented in response to the need or concerns of each community. Although the model may vary in style, substance and procedure, the recurring themes among youth court programs are:

Accountability
Youth courts ensure an offender is held accountable for their behavior, requiring them to make amends for the damage they have caused to the community. Offenders are called by peers, family, friends, school staff and/or other caring adults to answer for their crimes.

Significant Peer Influence
Youth volunteers send the message that they don't condone law-breaking behaviors. Positive peer influence!

Competency Skills
Youth court programs teach competency and leadership skills: listening, problem solving, communication, cooperation and conflict resolution. Youth courts also provide real-world career and criminal justice skills to youth volunteers who participate in the court process. Youth courts provide youth offenders and volunteers with a better understanding of the legal system, and also promote more positive attitudes towards law enforcement.

Empowering and Involving
Youth courts allow youth to assume leadership roles and address the issues of crime in their communities.

Back to the top

3. Why do we need a state association? United Youth Courts of Alaska was incorporated in 1998 as a non profit corporation based on the fundamental principal that youth courts need to have the operational flexibility to accommodate the diverse communities throughout Alaska. While engaging the community in partnership with the juvenile justice system, UYCA works with Alaskan communities to increase awareness of youth court programs and to reduce juvenile crime in Alaska. The association provides education and training materials to established and emergent youth courts throughout Alaska. Youth court members will receive technical assistance and training. UYCA reduces the need to 'reinvent the wheel' by networking to create a united voice for Alaskan youth courts. Back to the top

4. How many youth courts are there? There are currently 12 established and emerging youth courts in Alaska, and others that are developing their programs! Nationally, there are around 1,200 youth courts in 49 states and the District of Columbia. Back to the top

You can join the mailing list to receive updates about UYCA. Just fill in your name and email in the form below. Don't worry, this won't be shared with anyone.

Governor Sean Parnell
STATE OF ALASKA

February 9, 2010

The Honorable Mike Chenault
Speaker of the House
Alaska State Legislature
State Capitol, Room 208
Juneau, AK 99801-1182

Dear Speaker Chenault,

Under the authority of Art. III, Sec. 18, of the Alaska Constitution, I am transmitting a bill relating to the Alaska Housing Finance Corporation.

The bill would permit the Alaska Housing Finance Corporation to modify the transfer plan to accommodate changes in the generally accepted accounting principles.

The primary objective of this change would be to accommodate changes in the generally accepted accounting principles and to enable the transfer plan to continue as intended by the original legislation.

I urge your prompt and favorable action on this bill.

Sincerely,

Sean Parnell
Governor

Enclosure

ANALYSIS: *(Attach a separate page if necessary)*

The passage of this bill will not have an impact on AHFC's operating budget.

This bill will amend 18.56.089(d)(1) to change the definition of "adjusted change in net assets" to mean the change in net assets from the base fiscal year, adjusted for capital expenditures incurred during the base fiscal year and adding "**and temporary market value adjustments to assets and liabilities made during the base fiscal year.**"
This will update the statute so that it will reflect changes in federal accounting principles regarding interest rate swaps.
This will allow for a more accurate representation of AHFC's net income for the determining of the yearly dividend.

House Bill 339
AHFC Transfer Plan
Sponsor Statement

House Bill 339 will modify the Alaska Housing Finance Corporation's transfer plan statutes to reflect federal changes in generally accepted accounting principles.

House Bill 256 passed in 2003 that set in statute a transfer plan for AHFC to pay an annual dividend to the state of Alaska. The yearly dividend would be lesser of $103 million or 75 percent of the Corporation's net income for the previously completed fiscal year minus bond repayments for state capital projects.

In 2006, Senate Bill 236 passed that made the first adjustments to the transfer plan. This bill changed the definition of "net income" to "adjusted change in net assets", which reflected federal changes to generally accepted accounting principles.

HB 339 will make another modification due to federal changes in generally accepted accounting principles. It will add to the definition of "adjusted change in net assets" to include "temporary market value adjustments to assets and liabilities made during the base fiscal year". This change will allow for a true dollar figure for the Corporation's dividend to be calculated from rather than inaccurately high or low numbers based on how interest rate swaps are now considered.

HB 342 extends the Board of Real Estate Appraisers to June 30, 2014. In accordance with AS 08.03.020 funding extends one year following the termination date allowing the Board to conclude its affairs. The FY2011 funding is included in the Operating Budget request and costs shown are an average of direct costs for a biennial licensing period.

Travel expenses represent transportation and per diem for the 5 member board and 1 staff to meet at least 2 times each year in accordance with AS 08.01.070.

The program is required to cover costs with licensing fees under AS 08.01.065, and revenue generated by board fees are anticipated to cover its full operating costs. New funds are not required to implement this bill.

ANALYSIS: *(Attach a separate page if necessary)*

HB 342 extends the Board of Real Estate Appraisers to June 30, 2014. In accordance with AS 08.03.020 funding extends one year following the termination date allowing the Board to conclude its affairs. The FY2011 funding is included in the Operating Budget request and costs shown are an average of direct costs for a biennial licensing period.

Travel expenses represent transportation and per diem for the 5 member board and 1 staff to meet at least 2 times each year in accordance with AS 08.01.070.

The program is required to cover costs with licensing fees under AS 08.01.065, and revenue generated by board fees are anticipated to cover its full operating costs. New funds are not required to implement this bill.

SUMMARY OF: A Sunset Review on the Department of Commerce, Community, and Economic Development (DCCED), Board of Certified Real Estate Appraisers (BCREA), October 30, 2009

PURPOSE OF THE REPORT

In accordance with Title 24 and Title 44 of the Alaska Statutes (sunset legislation), we have reviewed the activities of BCREA. The purpose of this audit was to determine if there is a demonstrated public need for its continued existence and if the board has been operating in an effective manner. As required by AS 44.66.050(a), this report shall be considered by the committee of reference during the legislative oversight process in determining whether BCREA's termination date should be extended. Currently, under AS 08.03.010(c)(20), BCREA will terminate on June 30, 2010. If the legislature does not extend the termination date for the board, BCREA will have one year from that date to conclude its administrative operations.

REPORT CONCLUSIONS

The use of state certified real estate appraisers will be a continuing requirement for Alaska's financial institutions to qualify for federal deposit insurance and to participate in selling mortgage loans to federal government-sponsored enterprises. Failure to maintain a real estate appraiser certification program that meets federal requirements could cause the financial institutions – and by extension, the citizens of the State – to lose the opportunity to participate in a number of federally sponsored real estate loan programs and the ability to obtain federal deposit insurance. In this context, we recommend that the legislature extend BCREA's termination date to June 30, 2014.

The recommended termination date is half of the 8 year maximum allowed in statute to recognize that DCCED and the board failed to address findings issued by the Appraisal Subcommittee (ASC). ASC identified two deficiencies that needed to be addressed in order to come into substantial compliance with Title XI of the 1989 Financial Institutions Reform, Recovery, and Enforcement Act. DCCED and BCREA have satisfactorily addressed only one of the two deficiencies.

FINDINGS AND RECOMMENDATIONS

1. BCREA and DCCED should take timely corrective action in response to ASC findings.

2. The division's professional licensing administrative officer should take steps to improve administrative support.

3. BCREA and staff within the Office of the Governor should work together to increase the pool of qualified applicants available for board appointments to ensure full representation.

Re: Preliminary Audit, Board of Certified Real Estate Appraisers

Dear Ms. Davidson:

Thank you for the opportunity to comment on your Preliminary Audit findings concerning the Board of Certified Real Estate Appraisers.

Recommendation No. 1

The Board of Certified Real Estate Appraisers (BCREA) and the Department of Commerce, Community, and Economic Development (DCCED) should take timely corrective action in response to Appraisal Subcommittee (ASC) findings.

The department concurs with your recommendation. Although the authority to take appropriate action against a licensee resides with the board, the department concurs that it lacked in assertiveness to stay on top of the findings of the ASC; and to constantly remind the board of the need to take appropriate action. The department will discuss the ASC findings with the board and help to seek immediate resolution of the issues.

Recommendation No. 2

The division's professional licensing administrative officer should take steps to improve administrative support.

As we have stated on many occasions, we could not agree more. The division has undergone a number of changes in key management positions and is now optimistic about improvements being made to its internal cost-accounting system and documentation of procedures.

Unfortunately, the current incumbents are also faced with clean up of the accounting inaccuracies created by former employees in recent past years. We are confident that progress is being made to clean up the inaccuracies and to reestablish credibility of the division's cost-accounting system. Procedures for accounting for revenues and expenditures and preparation of financial reports did exist before it went awry. Correcting past errors has been a priority since current and future financial analysis is dependent on using correct data.

Sponsor Statement
House Bill 342

An Act extending the termination date of the Board of Certified Real Estate Appraisers; and providing for an effective date.

HB 342 extends the termination date of the Board of Certified Real Estate Appraisers (BCREA). Per AS 08.03.010(c)(20), the board will sunset on June 30, 2010. HB 342 extends this date by four years, to June 30, 2014.

The BCREA is comprised of a five member board to establish: (1) examination specifications for certification as a real estate appraiser; (2) rules of professional conduct to establish and maintain a high standard of integrity in the real estate appraisal profession; and (3) regulations necessary to carry out the purposes of the statutes.

The conclusion of the Legislative Audit is a recommendation to extend the BCREA's termination date by four years. (Report Digest #08-20064-10)

I would appreciate your support for this bill.

Dear Ms. Dolquist,

This letter is in response to your October 30, 2009 "CONFIDENTIAL" preliminary audit report on the Board of Certified Real Estate Appraisers (BCREA).

The Office of the Governor concurs with recommendation number three which states, "BCREA and staff within the Office of the Governor should work together to increase the pool of qualified applicants available for board appointments to ensure full representation." A board functions most effectively with full representation. Currently, the board is operating with full membership, and we are currently recruiting applicants for consideration for terms beginning March 1, 2010. I am committed to assisting the Governor in making a timely appointment to allow the board to function productively.

If you need additional information, please contact me at 907-465-3934.

Sincerely,

Jason Hooley

December 7, 2009

Members of the Legislative Budget
and Audit Committee:

In accordance with the provisions of Title 24 and Title 44 of the Alaska Statutes (sunset legislation), we have reviewed the activities of the Board of Certified Real Estate Appraisers (BCREA) and the attached report is submitted for your review.

DEPARTMENT OF COMMERCE, COMMUNITY
AND ECOMONIC DEVELOPMENT
BOARD OF CERTIFIED REAL ESTATE APPRAISERS

October 30, 2009

08-20064-10

This audit was conducted as required by AS 44.66.050 and under the authority of AS 24.20.271(1). If not extended by the legislature, BCREA is required to terminate on June 30, 2010. Under AS 08.03.020, the board will have a one-year period to administratively conclude its affairs.

In our opinion, BCREA should continue to regulate the appraiser profession. The board is serving the public interest by promoting the competence and integrity of those who provide services to the public as certified general and residential appraisers. We recommend BCREA's termination date be extended to June 30, 2014.

The audit was conducted in accordance with generally accepted government auditing standards. Those standards require that we plan and perform the audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides a reasonable basis for our findings and conclusions based on our audit objectives. Fieldwork procedures utilized in the course of developing the findings and recommendations presented in this report are discussed in the Objectives, Scope, and Methodology.

OBJECTIVES, SCOPE, AND METHODOLOGY

In accordance with Titles 24 and 44 of the Alaska Statutes, we have reviewed the activities of the Board of Certified Real Estate Appraisers (BCREA) to determine if the termination date for the board should be extended. As required by AS 44.66.050(a), the legislative committee of reference shall consider this report as part of the oversight process in determining if BCREA should be reestablished. Currently, AS 08.03.010(c)(20) specifies that BCREA will terminate on June 30, 2010. If legislature does not extend the termination date for the board, BCREA will have one year from that date to conclude its administrative operations.

Objectives

The three central, interrelated objectives of our report are:

1. To determine if the board's termination date should be extended.
2. To determine if the board is operating in the public interest.
3. To determine if the board has exercised appropriate regulatory oversight of real estate appraisers.

The assessment of BCREA's operations and performance was based on criteria set out in AS 44.66.050(c). Criteria set out in this statute relate to the determination of a demonstrated public need for the board.

Scope and Methodology

The major areas of our review were board proceedings, licensing, complaint investigations, and duplication of efforts. During the course of our examination we reviewed and evaluated the following:

- Applicable statutes and regulations to identify board duties and responsibilities and board member composition and qualifications. We also identified additions, deletions and changes to BCREA statutes and regulations.

- Files and documentation related to individuals certified as appraisers, including those who have been issued a courtesy license to practice within Alaska, to ensure appraisers were certified in accordance with regulatory requirements. We also reviewed documentation to evaluate compliance with continuing education requirements.

- Board meeting minutes, budget documents, and annual reports related to or issued by BCREA to gain an understanding of board proceedings and activities.

- Public notice documentation to ascertain whether public notice for BCREA meetings and proposed regulation changes were published as required by statute.

- Complaints related to certified appraisers or appraiser applicants to gain an understanding of the nature of complaints and timeliness of the investigative process. Complaints filed with the following organizations were reviewed: the Department of Commerce, Community and Economic Development's Division of Corporations, Business and Professional Licensing; the Human Rights Commission; the Office of the Ombudsman; the Office of Victims' Rights; and the Federal Equal Employment Opportunity Commission.

- Correspondence with the Appraisal Subcommittee, a national organization that monitors the regulation and oversight of real estate appraisers, to better understand BCREA's compliance with federal law and to determine the current status of prior findings.

- Newspaper articles pertinent to the appraiser industry to understand industry challenges.

Additionally, we conducted interviews with staff within the Division of Corporations, Business and Professional Licensing; BCREA board members and Appraisal Subcommittee staff.

ORGANIZATION AND FUNCTION

Board of Certified Real Estate Appraisers (BCREA)

Alaska Statute 08.87.010 establishes BCREA as a five member board with four of the five members made up of the following: a certified general real estate appraiser, a certified residential real estate appraiser, a mortgage banking executive, and a person from the general public. The fifth board position is undesignated in statute and is commonly referred to as the "at large" position.

Alaska Statute 08.87.020 defines the board's authority, purpose, and scope of work. Under this statute BCREA establishes the following: (1) examination specifications for certification as a real estate appraiser; (2) rules of professional conduct to establish and maintain a high standard of integrity in the real estate appraisal profession; and (3) regulations necessary to carry out the purposes of the statutes.

BCREA certifies general real estate appraisers, residential real estate appraisers, and institutional appraisers.[1] The board also registers appraiser trainees and issues courtesy licenses to real estate appraisers who are certified or licensed in other states but are temporarily practicing in Alaska.

BOARD OF CERTIFIED REAL ESTATE APPRAISERS
(As of June 30, 2009)

Steve MacSwain, General Real Estate Appraiser
— Chair

Gene Shaffer, Residential Real Estate Appraiser
—Vice Chair

William Larick, General Real Estate Appraiser

April Moore, Public Member

Richard Olmstead, Mortgage Banking Executive

Qualifications for certification as a general and residential real estate appraiser include education related to real estate appraisal, experience in real property appraisal, and passing an examination endorsed by the board. The qualifications for receiving an institutional appraisal certificate specify that the applicant be a full-time employee of a financial institution with offices in Alaska, and that the applicant meets education and testing requirements. The requirement to become a registered trainee includes 75 hours of instruction in courses related to real estate appraisal theory or practices from an organization approved by the board.

[1]While BCREA has the authority to certify institutional appraisers, as of the date of this report, no individuals have applied for this certification.

Real estate appraisal certificates are renewed in the odd numbered fiscal years. In order to renew their certification, certified appraisers must complete a renewal application, provide evidence of continuing education, and remit a license fee. Individuals certified or licensed as appraisers in other jurisdictions can obtain a courtesy license to conduct appraisals in Alaska. Such licenses are issued for a single appraisal assignment, and individuals are limited to only one courtesy license every twelve months.

The Department of Commerce, Community and Economic Development (DCCED)

Alaska Statute 08.01.065 mandates that DCCED adopt regulations to establish the amount and manner of payment of application fees, examination fees, license fees, registration fees, permit fees, investigation fees, and all other fees as appropriate for the occupations covered by the statute.

DCCED's Division of Corporations, Business, and Professional Licensing provides administrative and investigative assistance to BCREA. This includes functions such as collecting fees, maintaining files, receiving and issuing application forms, and publishing notices of examinations and meetings.

Alaska Statute 08.01.087 empowers DCCED with the authority to act on its own initiative or in response to a complaint. The division may:

1. Conduct an investigation if it appears a person is engaged in, or is about to engage in, a prohibited professional practice.
2. Bring an action in superior court to enjoin the act.
3. Examine the books and records of an individual.
4. Issue subpoenas for the attendance of witnesses and records.

BACKGROUND INFORMATION

An appraisal is a decision-making tool used to facilitate a real estate transaction. The primary role of appraisals in the loan underwriting process is to provide evidence that the collateral value of the property is sufficient to avoid losses on loans if the borrower was unable to repay the loan. Consumers often mistakenly assume that appraisals are intended to validate the purchase price of the property in question. In a loan transaction, the lender rather than the borrower engages the appraiser. This process usually occurs after the borrower has agreed to purchase the property. The primary intent of federal statutory appraisal reforms was to protect the federal deposit insurance funds – and by extension, mortgage lenders – from avoidable losses.

In 1986, the House Committee on Government Operations issued a report concluding that faulty and fraudulent appraisals contributed significantly to the losses that the federal government incurred during the savings and loan "*crisis.*"[2] In response to the *crisis*, Congress passed the 1989 Financial Institutions Reform, Recovery, and Enforcement Act (FIRREA). Congress set out provisions in Title XI of FIRREA that were intended to ensure federally related transactions had appraisals that were (1) performed by real estate appraisers who met minimum qualification criteria, and (2) conducted in compliance with uniform standards.[3]

Title XI established a complex oversight structure for real estate appraisals and appraisers. The oversight structure involves private, federal, and state entities (shown in the table below).

TITLE XI REGULATORY OVERSIGHT STRUCTURE AND ENTITIES

PRIVATE	FEDERAL	STATE OF ALASKA
Appraisal Foundation ▸ Appraisal Standards Board ▸ Appraisal Qualifications Board	**Appraisal Subcommittee**	**Board of Certified Real Estate Appraisers**
	Federal Financial Regulators ▸ Federal Reserve System ▸ Federal Deposit Insurance Corporation ▸ Office of the Comptroller of the Currency ▸ Office of Thrift Supervision ▸ National Credit Union Administration	

[2] *Impact of Appraisal Problems on Real Estate Lending, Mortgage Insurance, and Investment in the Secondary Market*, H.Rep. 99–891 at 4–6 (Sept. 25, 1986), House Committee on Government Operations, 99th Congress, 2nd session.

[3] U.S. Code 3331 - 3351, Title XI, Financial Institutions Reform, Recovery, and Enforcement Act of 1989.

The Appraisal Foundation

The Appraisal Foundation, a nonprofit educational organization composed of groups from the real estate industry, provides the organizational framework for the Appraisal Standards Board (ASB) and the Appraiser Qualifications Board (AQB) to carry out their responsibilities related to Title XI. The Appraisal Foundation was founded in 1987 by eight leading professional appraisal organizations in the United States to foster professionalism in real estate appraising. ASB and AQB establish minimum standards for developing and reporting an appraisal and the minimum criteria for certifying appraisers in connection with federally related transactions.

ASB is responsible for setting appraisal standards and is composed of six appraisers who are appointed for three-year terms by the Appraisal Foundation's board of trustees. ASB's minimum standards for appraisals are contained in the Uniform Standards of Professional Appraisal Practice. Under Title XI, these minimum standards apply to all federally related transactions. The standards cover the steps appraisers must take in developing appraisals and information the appraisal report must contain.

AQB is composed of five appraisers who are appointed for three-year terms by the Appraisal Foundation's board of trustees and establishes the minimum education, experience, and examination requirements for state certified real estate. Additionally, AQB performs a number of ancillary duties related to real property and personal property appraiser qualifications. The AQB's criteria covers four categories of appraisers: certified general, certified residential, licensed, and trainee. Each appraiser category contains specific education, experience, examination, and continuing education requirements.

The Appraisal Subcommittee

The Appraisal Subcommittee (ASC) was established by U.S. law as the principal federal agency responsible for monitoring the activities of the real estate appraisal industry oversight structure. ASC is responsible for:

- Monitoring and reviewing the practices, procedures, activities, and organizational structure of the Appraisal Foundation – including making grants in amounts that it deems appropriate to the Appraisal Foundation to help defray costs associated with its Title XI activities;

- Monitoring the requirements established by the states, territories, and the District of Columbia as well as monitoring their appraiser regulatory agencies for the certification and licensing of appraisers;

- Monitoring the requirements established by the federal financial institution regulators regarding appraisal standards for federally related transactions and determinations of

which federally related transactions will require the services of state licensed or state certified appraisers;

- Maintaining a national registry of state licensed and state certified appraisers who may perform appraisals in connection with federally related transactions; and

- Transmitting an annual report to Congress regarding the activities of ASC during the preceding year.

ASC has six board members and nine staff members. The respective board members are composed of the head of the Department of Housing and Urban Development's Federal Housing Administration and the heads of the following five financial institution regulatory agencies:

1. Board of Governors of the Federal Reserve System;
2. Federal Deposit Insurance Corporation;
3. Office of the Comptroller of the Currency;
4. Office of Thrift Supervision; and
5. National Credit Union Administration.

State Oversight – the Board of Certified Real Estate Appraisers (BCREA)

Under Title XI, states may establish their own agencies to certify and license appraisers. In 1990, the Alaska State Legislature created BCREA in response to the 1989 FIRREA. Although BCREA is responsible for the certification of appraisers, ASC has a role in ensuring Alaska's qualifications satisfy Title XI objectives. Federal agencies and federal financial institutions may not accept appraisals from BCREA certified appraisers if the subcommittee issues a written finding that:

- BCREA has failed to recognize and enforce the standards, requirements, and procedures of Title XI;
- BCREA does not have enough authority to carry out its functions under Title XI; or
- BCREA does not make decisions on appraisal standards and qualifications or supervise appraiser practices in a method that carries out the purposes of Title XI.[4]

Additionally, BCREA is required to provide ASC with the names of those appraisers who become certified or licensed in accordance with Title XI.

[4]12 USC § 3347(a), (b) (2000).

REPORT CONCLUSIONS

The Board of Certified Real Estate Appraisers (BCREA) has been given the responsibility in AS 08.87.020 to:

> *(1) Establish the examination specifications for certification as a general real estate appraiser, as a residential real estate appraiser, and as an institution appraiser; (2) adopt rules of professional conduct to establish and maintain a high standard of integrity in the profession; and, (3) adopt regulations necessary to carry out the purpose of [the appraiser statutes]...*

The use of state certified real estate appraisers will be a continuing requirement for Alaska's financial institutions to qualify for federal deposit insurance and to participate in selling mortgage loans to federal government-sponsored enterprises.[5] Failure to maintain a real estate appraiser certification program that meets federal requirements could cause the financial institutions – and by extension, the citizens of the State – to lose the opportunity to participate in a number of federally sponsored real estate loan programs and lose the ability to obtain federal deposit insurance. In this context, we recommend that the legislature extend BCREA's termination date to June 30, 2014.

In accordance with AS 08.03.010(c)(20), BCREA is scheduled for termination on June 30, 2010. If no action is taken by the legislature, the board will have one year in which to administratively conclude its affairs. We recommend the board's termination date be extended for four years, to June 30, 2014. The recommended termination date is half of the eight-year maximum allowed in statute to recognize that the Department of Commerce, Community, and Economic Development (DCCED) and the board failed to address findings issued by the Appraisal Subcommittee[6] (ASC). Except for this deficiency, the board is operating effectively and should continue to regulate the appraiser profession.

The ASC review of BCREA and DCCED concluded that improvements were needed.

In August 2007, BCREA was the subject of an ASC review. ASC identified two concerns that needed to be addressed in order to come into substantial compliance with Title XI of the 1989 Financial Institutions Reform, Recovery, and Enforcement Act. DCCED and BCREA have satisfactorily addressed the concerns except for the following:

---

[5]Government-sponsored enterprises include such entities as the Federal Home Loan Mortgage Corporation (generally referred to as "Freddie Mac") and the Federal National Mortgage Association (generally referred to as "Fannie Mae").

[6]ASC was established by U.S. law as the principal federal agency responsible for monitoring the activities of the other components of the real estate appraisal industry oversight structure including state appraiser certifying/licensing boards.

DCCED and the board failed to ensure that applicants for appraiser credentials met Appraiser Qualifications Board's[7] (AQB) experience and education criteria. Specifically, DCCED and BCREA

1. Failed to ensure that two of 42 certified applicants met AQB's minimum time period requirements during which experience must be earned.

2. Failed to ensure that one of 42 applicants for certification met AQB's minimum experience hour requirements.

This deficiency is discussed in Recommendation No. 1.

[7]AQB establishes the minimum education, experience, and examination requirements for state certified real estate appraisers

FINDINGS AND RECOMMENDATIONS

Recommendation No. 1

The Board of Certified Real Estate Appraisers (BCREA) and the Department of Commerce, Community, and Economic Development (DCCED) should take timely corrective action in response to Appraisal Subcommittee (ASC) findings.

ASC conducted a monitoring inspection of Alaska's real estate appraiser regulatory program in 2007. As part of the assessment, ASC reviewed 42 applications for certification. Of the 42 applications reviewed, three certificates (seven percent) were issued to applicants that failed to meet Appraiser Qualifications Board's (AQB) experience or education criteria. The inspection cited an inadequate application review process as the reason for the deficiencies. ASC directed DCCED and the board to contact the improperly certified appraisers and request further documentation. If the appraisers continue to fail to meet requirements, DCCED and the board were directed to downgrade the certification credentials within 90 days. DCCED and BCREA must resolve the finding in order to come into compliance with the Title XI of the 1989 Financial Institutions Reform, Recovery, and Enforcement Act, as amended.

DCCED's Division of Corporations, Business and Professional Licensing sent out letters to the three applicants notifying them of the deficiency detected through the ASC review. The division requested each appraiser submit additional documentation showing the appraisers met certification requirements. Only one of the three appraisers responded. BCREA failed to downgrade certification credentials for the two appraisers still out of compliance. Until proper documentation is submitted, the two appraisers affected are not qualified to practice as certified appraisers in accordance with federal law.

As discussed under the Background Information section of this audit, ASC is the entity responsible for monitoring the State certification process for compliance with federal law. Federal agencies and federal financial institutions may not accept appraisals from BCREA certified appraisers if ASC finds that:

- BCREA has failed to recognize and enforce the standards, requirements, and procedures of Title XI;
- BCREA does not have enough authority to carry out its functions under Title XI; or
- BCREA does not make decisions on appraisal standards and qualifications or supervise appraiser practices in a method that carries out the purposes of Title XI.

We recommend that the board and DCCED take timely corrective action in response to ASC findings – including the downgrade of certificates that do not meet AQB experience or education criteria.

Recommendation No. 2

The division's professional licensing administrative officer should take steps to improve administrative support.

Unqualified staff and a lack of documented procedures led to several deficiencies in division administrative support. Specifically:

- Seven of 11 BCREA meetings were not posted on the State's online public notice system. One meeting was not posted in either the online public notice system or the *Anchorage Daily News*.
- Support for the FY 05 and FY 06 fee analyses was not maintained.
- FY 06 and FY 07 annual reports contained errors in license statistics.
- Allocation rates for indirect costs were inaccurate for FY 05 through FY 08.
- Fines of $3,000 in FY 03 and $2,500 in FY 07 were inappropriately recorded as BCREA revenue.
- Indirect costs for the division were treated inconsistently between fiscal periods.

The division's professional licensing section is responsible for performing various administrative tasks to support board activities. Per AS 08.01.050, duties include collecting and recording fees; maintaining records and files; compiling and maintaining a current register of licensees; arranging for printing and advertising; and providing inspection, enforcement, and investigative services to occupational boards. The division is also responsible for annually reviewing fee levels of the occupational boards to determine whether the regulatory costs of an occupation are approximately equal to fee collections for that occupation. Alaska Statute 08.01.070 requires BCREA to submit an annual performance report to DCCED stating the board's accomplishments, activities, and needs. Professional licensing's policy is to produce a single annual report incorporating both board and division information requirements.

The deficiencies in administrative support were caused by a key administrative staff member that was unqualified and untrained for the position. This was further exacerbated by a lack of accounting and reporting procedures. Staff turnover caused the oversight in posting public notices.

Inadequate administrative support hampers BCREA's ability to fulfill its responsibilities and may provide policymakers with misleading information. Failure to publish notice of public meetings violates statute and may keep interested persons from providing valuable input into

the regulation process. We recommend professional licensing's administrative officer take steps to improve administrative support.

Recommendation No. 3

BCREA and staff within the Office of the Governor should work together to increase the pool of qualified applicants available for board appointments to ensure full representation.

In FY 05 and FY 06, the board position of mortgage banker was vacant for over nine months. In FY 08, the board position of residential appraiser was vacant for over seven months. Vacancies were due to a lack of applicants.

Alaska Statute 08.87.010 requires BCREA be composed of five members. Four of the five members must consist of the following: a certified general real estate appraiser; a certified residential real estate appraiser; an executive in a mortgage banking entity, and a member of the general public. BCREA cannot fully serve its purpose or the public interest with extended vacancies in board positions. Full representation provides balance and prevents undue bias toward the profession being regulated.

We recommend that BCREA and staff within the Office of the Governor work together to increase the number of qualified applicants available for appointments to the board to ensure full representation.

ANALYSIS OF PUBLIC NEED

The following analyses of board activities relate to the public need factors defined in AS 44.66.050(c). These analyses are not intended to be comprehensive but to address those areas we were able to cover within the scope of our review.

Determine the extent to which the board, commission, or program has operated in the public interest.

As reflected in the Background Information section of this report, the impetus for establishing the Board of Certified Real Estate Appraisers (BCREA) was the federal law passed by Congress responding to the savings and loan crisis of the 1980s. Accordingly, most of the regulatory and statutory requirements that BCREA responds to is set by organizations and entities established by, or affiliated with, the federal government. As part of that federal oversight, the board's regulations and activities are periodically reviewed by the federal Appraisal Subcommittee (ASC).

ASC reported two findings in their 2007 review of BCREA's activities. To date, BCREA and the Department of Commerce, Community, and Economic Development (DCCED) have adequately addressed only one of the two findings (discussed in Recommendation No. 1). Except for this deficiency, the board adequately served the public by certifying applicants that comply with requirements; amending regulations to improve regulation of the profession; maintaining on its website a list of approved, denied, and expired initial certification courses; and enforcing certification statutes and regulations.

Determine the extent to which the operation of the board, commission, or agency program has been impeded or enhanced by existing statutes, procedures, and practices that it has adopted, and any other matter, including budgetary, resource, and personnel matters.

The board's revenue is from certification, licensing, and renewal fees. Renewals are conducted on a biennial basis with fees due during odd-numbered fiscal years. This creates a two-year cycle in the board's revenues, with the board receiving most of it revenues during odd-numbered fiscal years. We reviewed the internal records of DCCED's Division of Corporations, Business and Professional Licensing and compiled a summary schedule of BCREA revenues and expenditures. We did not audit this information, but present the summary schedule on the following page for general information purposes.

Alaska Statute 08.01.065(c) requires *"...that the total amount of fees collected for an occupation approximately equals the actual regulatory costs for the occupation."* As shown in the summary schedule, BCREA operated at a deficit in FY 06 due to the costs associated with two investigations and related legal proceedings. BCREA fees were increased in FY 07 from $550 to $1,050 to ensure revenues covered the cost of the investigations. This led to a

large surplus of $85,500 at the end of FY 08. Fees were again dramatically reduced from $1,050 to $300 in FY 09 to reduce the surplus.

State of Alaska
Board of Certified Real Estate Appraisers
Schedule of Revenues and Expenditures
FY 03 - FY 09
(Unaudited)

	FY 03	FY 04	FY 05	FY 06	FY 07	FY 08	FY 09
Revenue	$119,200	$40,400	$116,500	$24,100	$200,000	$98,300	$85,200
Direct Expenses:

Travel	1,000	1,400	1,800	5,700	3,800	5,100	7,000
Contractual	7,100	5,300	25,600	70,700	12,100	71,500	29,600
Supplies	200	0	100	100	400	1,000	100
Total Direct Expenses	28,300	32,800	60,800	122,600	58,900	109,700	86,400
Indirect Expenses	8,600	10,500	10,300	7,200	15,000	13,900	15,700
Total Expenses	36,900	43,300	71,100	129,800	73,900	123,600	102,100
Annual Surplus (Deficit)	82,300	(2,900)	45,400	(105,700)	126,100	(25,300)	(16,900)
Beginning Cumulative:							
Surplus (Deficit)	(34,400)	47,900	45,000	90,400	(15,300)	110,800	85,500
Ending Cumulative:							
Surplus (Deficit)	$47,900	$45,000	$90,400	($15,300)	$110,800	$85,500	$68,600

Determine the extent to which the board, commission, or agency has recommended statutory changes that are generally of benefit to the public interest.

The board continues to promote changes to statutes and regulations as deemed necessary to better regulate the profession. The most significant change during FY 03 through FY 09 was the amendment to 12 AAC 70.115 – Education Requirements for Real Estate Appraiser Certification. This amendment was promulgated by the Appraiser Qualifications Board (AQB). The effect of the change is to significantly raise the education requirements for certification beginning January 1, 2008.

Determine the extent to which the board, commission, or agency has encouraged interested persons to report to it concerning the effect of its regulations and decisions on the effectiveness of service, economy of service, and availability of service that it has provided.

Board meeting dates, times and locations are required by statute to be posted on the State's online public notice system. The board also publishes meeting dates in the *Anchorage Daily News*. Public notice was not posted to the online notification system for seven of the 11 BCREA board meetings from FY 03 through FY 09 (discussed in Recommendation No. 2). Public participation was encouraged by the board and a public comment period was set aside in the agenda for every regular board meeting. During FY 04 through FY 09, interested persons offered comments at five board meetings.

Determine the extent to which the board, commission, or agency has encouraged public participation in the making of its regulations and decisions.

Notice of proposed regulation changes were posted on the State's online public notice system and in the *Anchorage Daily News*. Detailed instructions for submitting public comment were included in the posting. The board reviewed and considered public comment before adopting new regulations.

Determine the efficiency with which public inquiries or complaints regarding the activities of the board, commission, or agency filed with it, with the department to which a board or commission is administratively assigned, or with the office of victims' rights or the office of the ombudsman have been processed and resolved.

During the period FY 04 through February of FY 09, the division's investigative unit investigated 22 complaints and 51 cases related to appraisers or appraiser applicants. Of the 22 complaints, nine were not in violation; five were resolved through the licensing application process; seven were re-opened as cases; and one complaint was incomplete.

Of the 51 cases opened, six remained open as of February FY 09. Of the closed cases, twenty-two resulted in licensing action, 13 resulted in no action, four were closed with an advisement letter, and the remaining six cases were closed for other reasons such as compliance or referral to another agency. In general, we found the complaints and cases were investigated appropriately and in a reasonable amount of time.

There were no BCREA complaints filed with the Office of Victim's Rights, Human Rights Commission or the State's Office of the Ombudsman.

Determine the extent to which a board or commission that regulates entry into an occupation or profession has presented qualified applicants to serve the public.

From FY 03 through FY 09, the board approved and certified 195 new appraisers and issued 170 courtesy licenses. We found no instances where the board issued a certificate or license to an unqualified candidate, nor did we find an instance where a qualified candidate was denied certification or licensure. The 2007 ASC review found three instances where appraisers were certified but had not met AQB's experience and education criteria (discussed in Recommendation No. 1).

The table below summarizes the number of new certificates issued each year for the period FY 03 through FY 09.

Types of Certificates	Newly Issued Certificates (Exclusive of Renewals) FY 03	FY 04	FY 05	FY 06	FY 07	FY 08	FY 09	Total Certificates as of June 30, 2009
General	5	7	7	11	11	13	5	97
Residential	4	10	8	10	15	26	4	117
Trainee	13	6	7	20	6	3	4	7
Courtesy	16	18	26	24	31	33	22	22

Determine the extent to which state personnel practices, including affirmative action requirements, have been complied with by the board, commission, or agency to its own activities and the area of activity or interest.

We found no evidence that the board did not comply with state personnel practices, including affirmative action.

Determine the extent to which statutory, regulatory, budgeting, or other changes are necessary to enable the agency, board, or commission to better serve the interests of the public and to comply with the factors enumerated in this subsection.

Compliance with federal regulations is critical to the board's success in serving the public interest. ASC identified instances of noncompliance that have not been adequately addressed by division staff or BCREA (discussed in Recommendation No. 1).

As discussed in Recommendation No. 2, administrative support provided by the division's professional licensing section was not accurate, comprehensive or consistent. The administrative staff should provide the necessary and required information so that the board can perform its functions and serve the interest of the public effectively and efficiently.

As discussed in Recommendation No. 3, BCREA and staff within the Office of the Governor should work to increase the pool of qualified applicants available for board appointments to ensure full representation.

Determine the extent to which the board, commission, or agency has effectively attained its objectives and purposes and the efficiency with which the board, commission, or agency has operated.

Except for deficiencies already discussed, BCREA successfully met its goals and objectives in an efficient manner.

Determine the extent to which the board, commission, or agency duplicates the activities of another governmental agency or the private sector.

National appraiser organizations work in positive conjunction with the board. The most prominent organization is the Appraisal Institute (AI). AI awards appraisers with professional designations which require adherence to AI's code of ethics, continuing education, and work experience requirements. AI is also the main provider of education courses. We found AI enhances rather than duplicates BCREA efforts. We also found that BCREA's activities are not duplicated by another government agency or the private sector.

Sponsor Statement
HB 344

An Act Relating to the Salmon Product Development Tax Credit

House Bill 344 extends the deadline for salmon processors in Alaska to receive a salmon product development tax credit. The program allows applicants to claim a credit on their annual fisheries business tax for 50% of the purchase costs of eligible equipment. Credits received may not exceed 50% of a taxpayer's annual tax liability. Under current law, processors can claim the credit for the property first placed into service by December 31, 2011. This bill would extend the program's sunset date to December 31, 2015, allowing processors ample time to continue their long-range investment planning.

The salmon product development tax credit was a key recommendation of the Joint Legislative Salmon Industry Task Force. First enacted in 2003, the credit was part of an effort by Alaska's elected leaders and the fishing industry to develop innovative value-added salmon products. Since then it has stimulated some important changes in Alaska's commercial fishing industry. New processing equipment eligible for the tax credit enables businesses to offer a more diverse complement of Alaska salmon products which helps increase overall customer acceptance. Modern equipment also helps increase efficiency of processing operations and improves output, meaning that quality has improved. This tax credit also encourages in-state processing of our salmon resource which is critical to job creation and retention in fishing communities.

Although Alaska's salmon industry is beginning to recover from years of low values caused by factors such as competition from fish farming, the industry continues to be challenged by the recent economic depression, changes in the marketplace, and increasing labor and energy costs. Extending the tax credit beyond its current sunset date of December 31, 2011 will allow the industry to continue the progress that is being made in developing and producing salmon products that will keep Alaska's fisheries competitive in world markets. The state should continue to support one of our most important basic industries by extending the salmon product development tax credit thought passage of HB 344.

FISCAL NOTE

STATE OF ALASKA
2010 LEGISLATIVE SESSION

BILL NO. CS HB 344

ANALYSIS CONTINUATION

Bill Language:

This bill extends the existing Salmon Product Development (SPD) tax credit for investment in processing equipment used to produce value-added salmon products by four years through 2015. This bill also adds ice making machines to the list of qualified investments eligible for an SPD tax credit.. The SPD tax credit provisions under AS 43.75.035 authorize taxpayers to claim a credit against their fisheries business tax liability for 50% of qualified investment in new value-added salmon processing equipment and ice making machines. Credits may be applied up to 50% of the Fisheries Business Tax liability on salmon processed in Alaska in the year generated and the three subsequent years.

Revenues:

Although it is difficult to determine the number of taxpayers who would take advantage of this tax credit, the DOR would expect reduced Fisheries Business Tax collections in the years added. The department would expect the Fisheries Business Tax to decrease by $2.4 million for each additional year the credit is extended.

Expenditures:

The provisions of this bill could be implemented with existing state resources. No additional personnel or resources would be needed, since the DOR is already performing these duties.

A BILL

FOR AN ACT ENTITLED

"An Act relating to the salmon product development tax credit; and providing for an effective date by amending an effective date in sec. 7, ch. 57, SLA 2003, as amended by sec. 4, ch. 3, SLA 2006, and by sec. 4, ch. 8, SLA 2008."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 43.75.035(b) is amended to read:

(b) The amount of the tax credit applied against taxes under this section may not

(1) exceed 50 percent of the taxpayer's tax liability incurred under this chapter for processing of salmon during the tax year; or

(2) be claimed for property first placed into service after December 31, **2015** [2011].

*** Sec. 2.** AS 43.75.035(j)(3) is amended to read:

(3) "qualified investment" means the investment cost in depreciable tangible personal property with a useful life of three years or more to be used

New Text Underlined [DELETED TEXT BRACKETED]

1377

predominantly to perform **an ice making,** [A] processing, packaging, or product finishing function that is a significant component in producing value-added salmon products beyond gutting of the salmon; in this paragraph, "property"

(A) includes

(i) filleting, skinning, portioning, mincing, forming, extruding, stuffing, injecting, mixing, marinating, preserving, drying, smoking, brining, packaging, blast freezing, or pin bone removal equipment;

(ii) new parts to convert an existing can seamer to pop-top can production; [AND]

(iii) conveyors used specifically in the act of producing a value-added salmon product; **and**

(iv) ice making machines;

(B) does not include

(i) vehicles, forklifts, conveyors not used specifically in the act of producing a value-added salmon product, cranes, pumps, or other equipment used to transport salmon or salmon products, knives, gloves, tools, supplies and materials, equipment**, other than ice making machines,** that is not processing, packaging, or product finishing equipment, or other equipment the use of which is incidental to the production, packaging, or finishing of value-added salmon products; or

(ii) the overhaul, retooling, or modification of new or existing property, except for new parts to convert an existing can seamer to pop-top can production;

*** Sec. 3.** Section 7, ch. 57, SLA 2003, as amended by sec. 4, ch. 3, SLA 2006, and by sec. 4, ch. 8, SLA 2008, is amended to read:

Sec. 7. Section 3**, ch. 57, SLA 2003,** [OF THIS ACT] takes effect on the earlier of the following:

(1) January 1, **2019** [2015]; or

(2) the date of the attorney general's notification to the lieutenant

governor and to the revisor of statutes that

(A) a court has entered final judgment that AS 43.75.035 or 43.75.036, added by sec. 1, ch. 57, SLA 2003, violates the commerce clause contained in art. I, sec. 8, United States Constitution; and

(B) the time for an appeal of that judgment has expired, or, if an appeal was taken, a final order on the appeal has been entered that AS 43.75.035 or 43.75.036, added by sec. 1, ch. 57, SLA 2003, violates the commerce clause contained in the United States Constitution.

ICICLE

February 17, 2010

Rep. Bryce Edgmon, Chair
House Special Committee on Fisheries
Alaska State Legislature
Juneau, Alaska 99801

Dear Chairman Edgmon and Committee Members,

I wish to express our support for HB 344, an act to extend the salmon product development tax credit program through the year 2015.

Icicle Seafoods, Inc. purchases and processes salmon in Southeast, Prince William Sound, Kodiak, Cook Inlet and Bristol Bay. We have utilized the salmon product development tax credit program on a number of occasions to purchase equipment to further diversify our product line, improve quality and prolong product viability. This has resulted in higher customer acceptance of our products.

The salmon product development tax credit program has been beneficial to the Alaska salmon industry. It has enabled the industry to re-tool and modernize equipment thereby putting Alaska salmon in a better competitive position in the global market place with other types of seafood and protein sources. The program has served as the catalyst that can make needed capital improvements a rational choice during economically challenging times.

We urge you to support HB 344 and thank you for your consideration.

Sincerely,
ICICLE SEAFOODS, INC.

Kris Norosz
Government Affairs

OPERATION FAX 206.441.9090
SALES FAX 206.728.1855

February 16, 2010

Representative Bryce Edgmon, Chair
House Special Committee on Fisheries
State Capitol
Juneau, Alaska 99801-1182

Dear Representative Edgmon and Members of the House Fisheries Committee:

It is my pleasure to introduce Peter Pan Seafoods, Inc. We were incorporated in 1950 as the successor to P.E. Harris Co., which began canning salmon in Alaska in 1912. Peter Pan Seafoods processes and sells various types of Alaskan seafood products. All of our raw seafood is purchased from independent fishermen participating in fisheries throughout Alaska. Our production facilities include: King Cove, Port Moller, Dillingham, and Valdez. Salmon products account for the largest portion of our sales; other major product lines include crab, halibut, cod, Pollock and black cod. Our products are sold primarily to wholesalers and distributors throughout the world.

Peter Pan Seafoods is writing to express strong support for **Bill HB344, Extension of the Salmon Product Development Tax Credit** and to request that this important legislation be moved from the House Fisheries Committee as soon as possible. This bill simply extends for 3 more years an existing program that is proving very successful for the Alaskan salmon industry. We hope to continue the momentum and progress this program has afforded us in keeping our Alaskan salmon products competitive in the domestic and world markets.

We have been able to utilize the salmon tax credit at each of our Alaska production facilities. Both King Cove and Dillingham have added value added salmon fillet and ikura roe lines. In Port Moller, we expanded our value added salmon fillet operation; and in Valdez we added value added salmon fillet production, skinless boneless canned salmon and ikura roe. The progress we have achieved by adding and developing the value added salmon products in such a relatively short time is due to the Salmon Tax Credit.

The ever increasing costs of energy, labor, packaging and insurance are diverting the funds that could otherwise be invested into these sorts of improvements. It is imperative to our industry and Peter Pan Seafoods in particular that the salmon tax credit continue for another 3 years. There is more to be achieved in the development of the salmon value added program to ensure Alaska salmon products keep pace with evolving world markets. We urge the committee to take quick action in support of **HB344, Extension of the Salmon Product Development Tax Credit**.

Thank you and the Committee for your timely consideration of this issue.

Respectfully,

Barry D. Collier
President and CEO

State Capitol
Juneau, AK 99811-1182.

RE: HB 344, Salmon Tax Credit

Dear Chairman Edgmon and Members of the House Fisheries Committee:

North Pacific Seafoods would like to express our support for the passage of HB 344, renewing the Salmon Product Development Tax Credit. The current program has allowed the industry to keep pace on Alaska salmon products in the quickly changing domestic and world markets. The extension of this program will continue the momentum and success Alaska salmon products have enjoyed in the global markets.

North Pacific Seafoods started in Alaska in the canned salmon processing business. Today we own and operate four (4) shore based seafood processing plants that the largest portion is Salmon, though we also process crab, halibut, black cod, Pollock, Pacific cod, flat fish, rockfish and dive products. Our facilities are located in the coastal areas of Sitka, Kodiak, Pederson Point (Naknek) and Togiak. With the changing market demands, North Pacific Seafoods has converted from salmon canning to a 100% fresh and frozen processor of Alaska salmon and other seafood items.

North Pacific Seafoods continues to invest in our facilities each year. With the briskly increasing costs of energy, freight, labor and insurance, an increasing amount of our capital improvement funds have been diverted to address these issues that would normally be invested into product improvements. We have been utilizing the Salmon Tax Credit each year to improve our product development in salmon fillets and salmon caviar. We plan to continue to invest in salmon product development and the Salmon Tax Credit will allow us to invest at an accelerated level as long as this program continues.

We thank you for the continued support through the passage of the extension to the Salmon Product Development Tax Credit program.

Sincerely,

Jeffrey Backlund
Vice President

RE: Support for HB 344
Extension of the Salmon Product Development Tax Credit

Dear Representative Edgmon and Members of the House Fisheries Committee:

On behalf of the Pacific Seafood Processors Association, a trade association of seafood processing companies with operations in many communities throughout Alaska, I am writing to express strong support for HB 344, and to request that this important legislation be moved from the House Fisheries Committee as soon as possible.

The legislature constructed the existing Salmon Product Development Tax Credit program tightly to accomplish very specific goals. It is proving to be very successful in accomplishing its intended purpose of encouraging and enabling Alaska salmon processors to develop and produce value-added salmon products in Alaska. This, in turn, is helping Alaska's salmon industry keep pace with evolving consumer demands and keep Alaska salmon competitive on world markets. It is a program that essentially pays for itself by increasing the value and marketability of Alaska salmon.

The attached 1-page document briefly describes some of the improvements that have been made with the help of this program. Many of the new product forms developed and improvements and expansions made in recent years would not have happened, or would have been significantly delayed, without the incentive and assistance provided by the tax credit program. The attached page also describes ways our member companies anticipate utilizing the tax credit program in upcoming years if it is extended.

Alaska's seafood industry, operating in remote areas of Alaska, is dealing with extremely high energy costs, the worldwide economic downturn, and other enormous challenges. Yet, the industry's future, and the future economic benefits Alaska's fisheries provide to fishermen, communities, and the state, depend on continued progress in developing and expanding value-added product forms and capacity. Extension of the Salmon Product Development Tax Credit Program will play an important role in maintaining the continued development and competitiveness of the Alaska salmon industry.

Extending this very effective program makes good sense for Alaska. We urge quick scheduling and passage of HB344.

Thank you very much for your consideration.

Sincerely,

Mary McDowell

Mary McDowell, Vice President

Past use of the Salmon Product Development Tax Credit

The Salmon Product Development Tax Credit Program has been very effective in advancing the goal of increasing in-state value-added processing. The credit has enabled and encouraged seafood companies to make investments in equipment that they would otherwise have had to delay or forego. In many cases, the credit has enabled companies to begin producing value-added product forms they had not previously produced.

Since enactment of the program, PSPA member companies have purchased and put into production a wide variety of value-adding equipment, such as:

- skinless/boneless fillet equipment
- roe separating equipment
- smoking equipment
- equipment to produce boneless/skinless salmon in pop-top ("easy-open") cans
- equipment to produce sockeye ikura
- equipment for packaging ikura in vacuumed sealed packages

The credit has enabled companies to increase capacity of pounds purchased from fisherman and improve quality by adding fillet lines and investing in coolers, blast freezers, and upgrading and increasing freezer capacity.

Anticipated future use of the tax credit

Continuation of the Salmon Product Development Tax Credit would be extremely helpful in maintaining the momentum of the expansion of in-state, value-added processing, and allow companies to plan for future capital investment in their salmon operations around the state and keep Alaska salmon competitive in evolving world markets.

Customers continually want more user-friendly products. The salmon fillet market, for example, has grown tremendously in the last few years and the market has not shown any signs of over supply. It takes some risk and a few years for companies to assess how their investments in value-added processing are paying off and then additional time to gear up and gather financial resources to make additional investments. A tax credit that makes such investments feasible in a shorter timeframe benefits Alaska harvesters, processors, communities, and the state.

If this tax credit program remains available, our member companies anticipate utilizing it in upcoming years for such things as additional filleting equipment; salmon sausage equipment; salmon oil refining equipment; equipment for producing skinless/boneless products; freezing capacity upgrades and increases, portioning equipment, vacuum packing equipment, and salmon roe processing equipment.

Sponsor Statement
Committee Substitute for House Bill 346 (L&C)

"An Act establishing the Workers' Compensation Advisory Council; abolishing the Medical Services Review Committee; and providing for an effective date."

Since the mid-1980's an informal workers' compensation advisory committee has operated in Alaska. This "Ad-Hoc" committee was comprised of representatives from organized labor and from the Workers' Compensation Committee of Alaska – an industry group organized to lobby for changes to Alaska's Workers' Compensation Act. The Ad-Hoc Committee was instrumental in effecting the huge changes made to the Act in 1988. However, since then, the committee has been unable to achieve any success in large part due to their lack of any statutory legitimacy.

In 2005 the legislature amended AS 23.30.095 to create a Medical Services Review Committee to advise the commissioner of the Department of Labor and Workforce Development in the area of medical costs and related services in workers' compensation. In November 2009, the Committee issued its final report and recommendations. One of the recommendations was the establishment by statute of a Workers' Compensation Advisory Council to advise the commissioner and legislature in the area of workers' compensation.

Similar councils have been created and operate quite effectively in other states. These councils are charged with recommending statutory changes to the legislature as well as regulations to departments in the area of workers' compensation. The purpose of the council is to improve workers' compensation systems by drawing together representatives from all workers' compensation stakeholders who gather and analyze data and information, discuss and debate options and make recommendations regarding problems facing the effectiveness of workers' compensation systems.

This bill creates a council similar to that found in many other western and mid-western states. The council is comprised of 11 voting and 5 non-voting members: four voting members drawn from organized labor, four voting members drawn from various employer groups and three voting members from the various medical societies. Non-voting members provide expertise and are drawn from the insurance industry (2 members), the legislature (one from each legislative body) and the commissioner or his designee.

I urge your support of this bill.

Sectional Analysis

Committee Substitute for House Bill 346 (L&C)

"An Act establishing the Workers' Compensation Advisory Council; and providing for an effective date."

Section 1. **Adds a new section** to AS 23.30 creating a Workers' Compensation Advisory Council to advise the department on all matters pertaining to workers' compensation.

Section 2. **Repeals** the Medical Services Review Committee

Section 3. **Repeals AS 23.30.275** on June 30, 2015. Sun setting the council.

Section 4. **Repeals** cross reference to the Medical Services Review Committee

Section 5. **Transitional Provision** to stagger the terms of the members of the council.

Section 6. **Provides for** an immediate effective date.

Email: Representative_Kurt_Olson@legis.state.ak.us

HB 346
Summary of Changes
Version \R to Version \E (L&C)

During a hearing in House Labor & Commerce HB 346 was amended.

Amendment \R.1 was adopted without objection.

Amendment \R.1 deleted the word "board" in every instance and replaced it with the word "council". Because of this, the title was changed.
This change was mad to help avoid the confusion of having two workers' compensation boards.

Two sections were added to the bill repealing the Medical Services Review Committee which will no longer be needed.

ANALYSIS: *(Attach a separate page if necessary)*

Please see attached analysis - includes breakdown for RSA to all agencies.

Prepared by: Linda Perez, Director
Phone 465-3876
Division Administrative Services
Date/Time 3/23/10 8:30 AM
Approved by: Bob Swenson, Project Manager
Date 3/23/2010
Office of the Governor

(Revised 11/6/2009 OMB)

Office of Governor FY11: 8,053.7 plus 2,599.6 additional contractual for RSA needs for a total request of 10,653.3.

To ensure that an in-state natural gas pipeline plan is delivered to the legislature by July 1, 2011 as set out in HB 369 (FIN), the in-state gas line project team has identified general work products, materials, and a minimum staffing level needed to direct the work for the project team. The cost associated with contractual services to perform environmental work and support of permitting, cost of service analysis, continued refinement of pipeline engineering, and development and management of development plan in FY11 will be approximately $6.5 million. A cost of transportation estimate to provide pipeline and facility costs are scheduled to be completed by July 1, 2010, which will provide partial data for cost of service models. These costs will help determine commercial viability of a pipeline. The additional $2.6 million is for RSA monies to agencies duties outlined below.

OFFICE OF THE GOVERNOR:

PERSONAL SERVICES: 1,095.2 - increased to include 7 staff for first year as follows:
Project Manager Rg 26
Engineering Manager Rg 26
Commercial Manager Rg 26
Legislative Liaison/Public Outreach Officer Rg 23
Finance/budget analyst Rg 22
Schedule Coordinator Rg 21
Technical Writer Rg 19 (first year only)

Current 6500.0 operating budget request includes 322.2 for personal services. Fiscal note increases total personal services to 1,095.2 for 7 staff in first year. Following years reduce staff to 6 and include scheduled merit increases for all but professional staff.

TRAVEL: 36.0 – reflects original travel request in FY2011 Governor's budget request.

CONTRACTUAL: 6,809.2 + 2,599.6 (Total 9,408.8)
Current 6500.0 operating budget request includes 6,130.0 for contractual. Fiscal note increases contractual to include commercial analysis of downstream industrial opportunities, public outreach and information dissemination, and annual lease space for 7 staff during the first year. Second and subsequent fiscal year contractual costs are indeterminate.

500.00 for FY2011, 2012 and 2013 for commercial analysis of downstream industrial opportunities; reduced to 200.0 for 2014 thru 2016.

Contractual (continued)

100.0 for public outreach, information dissemination, printing, advertising, postage.

79.2 first year office lease space – reduces to 75.3 for second and subsequent years

2599.6 RSA funding requirements – see below

SUPPLIES: 29.0 increases FY2011 operating budget request to 29.0 for increased staff and fast-track activities, reducing to 25.0 for second and subsequent years.

EQUIPMENT: 84.3 one-time office set-up.

Office of Governor FY12 & Beyond: Contractual; Indeterminate
Fiscal responsibility for FY12 and beyond is indeterminate at this time. These costs may include preconstruction engineering, procurement of natural gas, purchase of ENSTAR Bullet Line data package, potential application for extension of LNG export license, and other engineering and commercial activities that provide for a gasline that is operational by December 31, 2015. The State's ability to transfer the project to private investors is likewise unknown. If unsuccessful, the State may assume liability for a portion, or all of the construction costs. These costs will depend on what is determined and approved from the development plan, if anything, and could range from tens of millions to over 5 billion dollars, depending on the level of participation by the State.

Breakdown of RSAs to state agencies: 2599.6 as follows:

AHFC FY11: 500.0

This fiscal note is an estimate of what funds would be necessary for the Alaska Housing Finance Corporation should House Bill 369 become law. The preparation of a comprehensive financing plan would be completed once cost estimates for the project are available.
Contractual services will consist of Financial Advisors and legal counsel.
FY12: 0

DEC FY11: 121.1

The Department of Environmental Conservation (DEC) fiscal note reflects a project coordinator to be located in the Office of the Commissioner to coordinate with the joint in-state pipeline development team in evaluation of necessary environmental permitting, environmental impact statement review, Alaska Coastal Management

DEC (continued)

Program coordination, as well as compliance and enforcement activities for an in-state natural gas pipeline.

FY12+: Indeterminate

The costs of the environmental permitting for pipeline construction is indeterminate at this time, this fiscal note does not account for any permitting activities that may occur after the in-state pipeline plan is submitted to the legislature by July 1, 2011.

DOR FY11: 1000.0

Travel **50.0**
Contractual **950.0**
Department of Revenue working as part of the development team with experienced contractors and contractor firms to execute major elements of the assigned tasks.

1. Identify opportunities for delivering North Slope gas to rural & maritime Alaska
2. Identify and negotiate with potential gas suppliers and potential gas consumers
3. Develop pro-forma financials for the project
4. Develop a partnering agreement with a pipeline company
5. Provide a design, construction schedule, and cost estimate for an LNG plant
6. Develop and execute a public information and outreach plan

DOT FY11: 610.8 plus 367.7 for DNR State Pipeline Coordinators Office

The Department is a member of the joint pipeline development team and is the applicant for the right-of-way (ROW). A Engineer V will serve as the technical expert for the commissioner and as the technical lead for the Department's responsibilities. As the applicant for the ROW, a ROW agent will coordinate the ROW portions of the plan, providing the technical expertise to assist in determining the intricacies associated with potential routes, and will start initial coordination with utilities that are currently in the ROW. An environmental impact analysis manager will oversee and provide technical expertise for the environmental impacts and permits needed for activities in the department's ROW. Additional, costs are for

Personnel Services **418.7**
Travel **45.0**
Contractual **87.1**
Supplies **60.0**

ADDITONAL CONTRACTUAL FOR DOT: 367.7 needed for interagency funding to DNR State Pipeline Coordinators Office to be used by DNR as detailed below.

DOT FY12 +: Indeterminate
The costs for activities after the plan is submitted on July 1, 2011 are undetermined at this time.

(DNR FY11): 367.7

All State Pipeline Coordinator Office (SPCO) costs associated with the right-of-way permitting process, preparation of the Commissioner's Analysis, Proposed Decision and Action, construction oversight, and operational oversight are reimbursable pursuant to AS 38.35.140(b). Costs reflected in this fiscal note are reimbursable under AS38.35.140(b). Positions and efforts identified for SPCO work will utilize existing positions to the greatest extent possible. If additional SPCO or MLW positions are necessary they will be established as Long Term Non-Perm positions.

In the preparation of this fiscal note certain assumptions have been made:
State Pipeline Coordinators Office (SPCO)
1) Participating state agencies (ADF&G, ADEC, etc.) will provide separate fiscal notes, although their costs associated with permitting the right-of-way may be reimbursable by the applicant through the SPCO.

DNR (continued)

2) The right-of-way lease applicant, pursuant to AS 38.35. 140(b), will reimburse DNR's (and other participating state agencies as well) work associated with delivery of a right-of-way lease.
3) DLMW has completed a separate fiscal note, however portions of their costs may be reimbursable by the applicant through the SPCO.
4) Existing Program Receipt Authority will be used for the project.
5) DGGS cost estimate assumes that the state needs to understand the geohazards to ensure the applicant has identified and considered all geologic hazards along the route.
6) Construction and operational oversight begins in FY2012 and FY2014, respectively. The cost estimate for these activities is for DNR only and does not include estimates for other state agencies (ADF&G, ADEC, etc.), although their costs may be reimbursable by the applicant through the SPCO.
7) Assume SPCO will administer material sites after initial sale.
8) Assume a two-year construction schedule segregated into four geographic areas.

FY2011 costs to DNR/SPCO would include expenses to support the duties of the development team in preparing the project plan and the Analyses necessary to prepare project applications, supporting documentation, and the preparation for an expedited state review of the proposed actions. Costs for FY2011 do not include any expenses towards processing a right-of-way lease applications. Expenses associated with the right-of-way permitting process are projected to start in FY2012.

FY2011 PERSONAL SERVICES COST - $ 200.3 total (for 12 months)

BREAKDOWN of DNR FY11 costs

1- STATE PIPELINE COORDINATOR'S OFFICE
Positions in Anchorage; for preparing the project plan and analyses.
- one State Pipeline Coordinator (SPC) (range 26) - total 1 month at $9.7/month = $9.7
- one Natural Resource Specialist (NRS) III (range 18)- total 3 months/yr at 7.31/month = $21.93
-one Natural Resource Manager (NRM) II (range 20) - total 1 month at $9.41/month = $9.41
-one Engineer IV (range 27) - total 3 months at 13.70/month = $41.1
- Administrative Support - total = $8.20
$90.34 for **FY 11 Total**

2- OFFICE OF PROJECT MANAGEMENT AND PERMITTING
Position in Anchorage; for coordination of a project Health Impact Assessment.
- Natural Resource Specialist (NRS) III (range 18) - total = $10.0
$10.0 for **FY 11 Total**

DNR (continued)

3 - DIVISION OF COASTAL AND OCEAN MANAGEMENT
One position in Anchorage; for conducting the project Alaska Coastal Management Program process.
-one Natural Resource Specialist (NRS) III (range 18)-
total 1 month at 7.31/month = $7.31
$7.31 for FY 11 Total

3- STATE HISTORIC PRESERVATION OFFICE
Position in Anchorage; for review and monitoring the cultural resource project program. - one Archeologist = $20.0
$20.0 for **FY 11 Total**

4- DIVISION OF GEOLOGICAL AND GEOPHYSICAL SURVEYS
Positions in Fairbanks; for management of geohazards project related studies and review of existing information.
- one Geologist IV (range 21) - total 4 months = $35.80
- one LTNP Geologist III (range 19) - total 4 months = $25.52
- one Graduate Intern - total 4 months = $11.32
$72.64 for **FY 11 Total**

TRAVEL, CONTRACTUAL, SUPPLIES - $70.0 total for FY11
Travel, contractual, and supplies to support the duties of the development team in preparing the project plan and the Analyses necessary to prepare project applications, supporting documentation, and the preparation for an expedited state review of the proposed actions.
Other miscellaneous, contractual and supply costs include office space, telephones, core service charges and related expenses.

5- DIVISION OF MINING LAND & WATER
Assumptions
1) that DNR/DMLW will be required to prepare a title report regarding state owned lands in the pipeline ROW,
2) that DNR will not be required to transfer title to any state lands to DOT/PF,
3) that DOT/PF will be responsible for all title or ROW acquisitions from entities other that DNR managed state lands including lands owned by private persons, boroughs, ANCSA corporations, native allotments, and the federal government,
4) that DNR/DMLW will review and approve all land surveys associated with granting an in-state gasline ROW and developing an in-state gasline across state land,

DNR (continued)

5) DNR DMLW will participate in the ROW planning effort to some degree across state land, the review of the
AS 38.35 R/W lease to be prepared by SPCO for issuance to DOT/PF, and the ACMP review of the ROW, and
6) SPCO will issue AS 38.35 ROW accross state lands to DOT/PF.
The costs to DMLW would include expenses during FY 11 for providing assistance during the development teams planning efforts and preapplication meetings

PERSONAL SERVICES COST - $86.4 total (for 12 months in FY11)
One Natural Resource Specialist (NRS) III (range 18) - total 12 months at $86.4/year for assistance with the planning effort and preparation for the authorization work in FY12.
TRAVEL, CONTRACTUAL, SUPPLIES - $2.0 total
Travel would be for planning and public meetings. $2.0 in FY11
Other contractual costs include $5.2 for office space, telephones, core service charges and related
expenses for the new positions in FY11.
Supplies are budgeted at $3.8 for FY11, and includes one-time start-up costs for new computers and office equipment .

DNR FY12 & Beyond

The FY2012 costs to DNR/SPCO would include expenses to coordinate the participation of state agencies in the right-of-way permitting process, prepare the Commissioner's Analysis, Proposed Decision and Action, develop the draft lease and, if necessary, hold public hearings. In addition the costs include right-of-way permitting expenses for the participation of the State Historic Preservation Office (SHPO), Division of Coastal and Ocean Management (DCOM), Office of Project Management and Permitting (OPMP) and the Division of Geological and Geophysical and Surveys (DGGS). It should be noted that the proposed schedule is aggressive and in order to meet the specified timeline the right-of-way permitting process will need to be conducted independent of the federal NEPA process. The FY2012 and 13 costs reflect construction oversight activities by DNR. Operational oversight costs begin in FY2014 and continue forward.
FY2012 PERSONAL SERVICES COST - $ 522.42 total (for 12 months)

CSHB 369(FIN) fiscal analysis (continued):

DNR (continued)

Breakdown of DNR FY12 and beyond.

STATE PIPELINE COORDINATOR'S OFFICE

Positions in Anchorage; for completing the right-of-way leasing process.
-one Natural Resource Specialist (NRS) IV (range 21) - total 10 months at $9.95/month= $99.50
-one Natural Resource Manager (NRM) II (range 20) - total 1 month at $9.41/month = $9.41
-one Natural Resource Specialist (NRS) III (range 18)- total 6 months at 7.31/month = $43.86
-one Engineer IV (range 27) - total 3 months at 13.70/month = $41.1
-Administrative Support - total = $38.77
$232.64 for **FY 12 Total**
Positions in Anchorage; for construction oversight.
- two Natural Resource Specialist (NRS) III (range 18)- total 6 months/yr at 7.31/month = $87.72
- one Natural Resource Manager (NRM) II (range 20) - total 1 month at $9.41/month = $9.41
- one Engineer IV (range 27) - total 2 months at 13.70/month = $27.4
- Administrative Support - total = $24.9
$149.43 for **FY 13 and 14**
Positions in Anchorage; for operational oversight.
- one Natural Resource Specialist (NRS) III (range 18)- total 4 months/yr at 7.31/month = $29.24
- one Natural Resource Manager (NRM) II (range 20) - total 1 month at $9.41/month = $9.41
-one Engineer IV (range 27) - total 1 months at 13.70/month = $13.70
- Administrative Support - total = $10.47
$62.82 for **FY15 Forward**

STATE HISTORIC PRESERVATION OFFICE
Position in Anchorage; for review and monitoring the cultural resource project program.
- one Archeologist = $20.0
$20.0 for **FY 12 Total**
Positions in Anchorage; for construction oversight.
- one Archeologist = $20.0
$20.0 for **FY 13 and 14 Totals**

DIVISION OF GEOLOGICAL AND GEOPHYSICAL SURVEYS
Positions in Fairbanks; for management of geohazards project related studies and review of existing information.
- one Geologist IV (range 21) - total 12 months = $107.4
- one LTNP Geologist III (range 19) - total 12 months = $76.45
- one Graduate Intern - total 12 months = $34.0
$217.85 for **FY 12 Total**

CSHB 369(FIN) fiscal analysis (continued):

DNR (continued)

OFFICE OF PROJECT MANAGEMENT AND PERMITTING
Position in Anchorage; for coordination of a project Health Impact Assessment.
- Natural Resource Specialist (NRS) III (range 18) - total = $30.0
$30.0 for **FY 12 Total**

DIVISION OF COASTAL AND OCEAN MANAGEMENT
One position in Anchorage; for conducting the project Alaska Coastal Management Program process.
-one Natural Resource Specialist (NRS) III (range 18)- total 3 months at 7.31/month = $21.93
$21.93 for **FY 12 Total**

TRAVEL, CONTRACTUAL, SUPPLIES - $322.2 total for FY 12
Travel would be for public meeting, public hearings, agency coordination and monitoring of contractors performing field work. In addition, DGGS will require travel to complete field studies. **$30.0 in FY12**
Contractual costs include helicopter support for DGGS studies, office space, telephones, core service charges and related
Miscellaneous costs include aerial photos, satellite imagery, field supplies a and maps.
Other miscellaneous, contractual and supply costs include office space, telephones, core service charges and related expenses.
TRAVEL, CONTRACTUAL, SUPPLIES - $70.0 total for FY 13 and 14
TRAVEL, CONTRACTUAL, SUPPLIES - $10.0 total for FY 15 Forward

DIVISION OF MINING LAND& WATER, FY12
PERSONAL SERVICES COST - $465.7 total (for 12 months in FY12)
LAND TITLE ACTIONS
Four positions Anchorage; for land title review and report preparation and document review and processing.
-three Natural Resource Specialist (NRS) III (range 18) - total 6 months each at $7.24/month= $130.32
-one Natural Resource Specialist (NRS) II (range 16) - - total 6 months each at $6.40/month = $38.4
$168.72 for **FY 12 Total**
LAND SURVEY REVIEW
Two positions Anchorage; for reviewing land and project surveys .
-Two land surveyor II (LS) III (range 22) - 1 year each at $109.1/year
$218.2 for **FY 12 Total**

CSHB 369(FIN) fiscal analysis (continued):

DNR (continued)

MATERIAL SALES
Two positions; for preparing and executing material sales for use in pipeline R/W.
- One Natural Resource Specialist (NRS) III (range 18) - total 12 months at $89.2/year for Northern Region Office Fairbanks = $89.2
- OneNatural Resource Specialist (NRS) III (range 18) - total 12 months at $86.4/year for SouthCentral Region Office Anchorage = $86.4
$175.6 for **FY 12 Total**

PROJECT REVIEWS
One position; to participate in the R/W planning effort, the review of the AS 38.35 ROW lease , and the ACMP review of the R/W.
- One Natural Resource Specialist (NRS) III (range 18) - total 8 months each at $86.4/year for SouthCentral Region Office Anchorage = $57.6
$86.4 for **FY 12 Total**

TRAVEL, CONTRACTUAL, SUPPLIES - $143.0 total (for 12 positions)
Travel would be for land survey review purposes, preparation of material sales, and planning, ROW and ACMP review. $35.0 in FY12
Other contractual costs include $52.0 for office space, telephones, core service charges and related
expenses for the new positions in FY12 at a rate of $5.2 per new position.
Supplies are budgeted at $38.0 per year FY12, and includes one-time start-up costs for new computers and office equipment of $3.8 per each new position.

Workers' Compensation Committee of Alaska

PO BOX 200361 ANCHORAGE, ALASKA 99520

February 19, 2010

The Honorable Kurt Olson
State Capitol, Room 24A
Juneau, AK 99801-1182

RE: HB 346

Dear Representative Olson:

I am writing on behalf of the Workers' Compensation Committee of Alaska to share our concerns about HB 346 ("An Act establishing the Workers' Compensation Advisory Board..."). The Workers' Compensation Committee of Alaska (WCCA) is an employer education and advocacy group working since the 1980's as a voice for Alaskan employers in the workers' compensation system. Its membership includes public and private employers both large and small.

HB 346 would establish an advisory board consisting of the major stakeholders in the workers' compensation process, charged with advising the Department of Labor on all matters pertaining to the application, revision, and operation of the Alaska Workers' Compensation Act. It appears this legislation evolved from the recommendations of the Medical Services Review Committee (MSRC) issued in November 2009. According to the MSRC report, this statutory advisory board would replace the informal ad hoc process by which labor and management have negotiated Alaska workers' compensation reforms over the past 25 years. The legislation proposes that the board would consist of representatives from organized labor, employers, medical care providers, insurers, the department, and the legislature. Under the bill language, labor, employer, and medical provider representatives would have voting rights at board meetings.

Although insurers, medical providers, and others may have a financial stake in the workers' compensation process, the WCCA believes that only the parties to the employment contract—employees and employers—should be voting members of the advisory board should. Employees and employers have the ultimate interest in establishing a fair and equitable workers' compensation benefit structure. For this reason, WCCA also recommends that potential employer members be selected by an established business organization such as the Alaska State Chamber of Commerce or WCCA to ensure that members have the necessary background and expertise in workers' compensation.

Historically, labor and management selected their own representatives in the ad hoc process. This minimized political agendas, and the stakeholders selected those they thought best represented their interests. WCCA opposes the current recommendations in HB 346 as outlined

PATRICIA WILSON, PRESIDENT; DENNIS MELLINGER, VICE PRESIDENT;
TERRY SHURTLEFF, TREASURER; DAISY SAFFIR, SECRETARY

in AS 23.30.275((b) and recommends that the proposed statute be amended to require the commissioner to look to organized labor and employer organizations such as WCCA or State Chamber of Commerce for their appointments of their respective representatives as outlined in (a)(1)-(a)-(2).

Further, we have concerns that the Advisory committee is being charged with making recommendations and evaluations of all aspects of workers' compensation and is therefore too broad-reaching. It is unreasonable to incorporate the duties of the MSRC into a new committee that is also charged with making recommendations on regulations and all other areas of worker's compensation law.

The Workers' Compensation Committee of Alaska believes the appointment of experienced members is essential to the success of a group such as the proposed board, and respectfully requests your consideration of the amendments we've outlined above.

Sincerely,

Patricia Wilson
President

The Honorable Kurt Olson
State Capitol, Room 24A
Juneau, AK 99801-1182

RE: HB 346

Dear Representative Olson:

We are attorneys who represent employers in workers' compensation defense. We are writing to share our concerns about HB 346 ("An Act establishing the Workers' Compensation Advisory Board...").

HB 346 would establish an advisory board consisting of the major stakeholders in the workers' compensation process, charged with advising the Department of Labor on all matters pertaining to the application, revision, and operation of the Alaska Workers' Compensation Act. It appears this legislation evolved from the recommendations of the Medical Services Review Committee (MSRC) issued in November 2009. According to the MSRC report, this statutory advisory board would replace the informal ad hoc process by which labor and management have negotiated Alaska workers' compensation reforms over the past 25 years. The legislation proposes that the board would consist of representatives from organized labor, employers, medical care providers, insurers, the department, and the legislature. Under the bill language, the labor, employer, and medical provider representatives would have voting rights at board meetings.

We believe that medical providers should not have voting rights and the voting members of the advisory board should represent only the parties to the employment contract--employees and employers. Employees and employers have the ultimate interest in establishing a fair and equitable workers' compensation benefit structure. While the input of medical providers is important to the process, medical providers do not have the knowledge and necessary experience to vote on changes to the workers' compensation law dealing with nonmedical issues. For this reason, we strongly recommend that potential employer members be selected by an established business organization such as the Alaska State Chamber of Commerce or WCCA to ensure that members have the necessary background and expertise in workers' compensation. This is particularly concerning because often times Labor representatives are trained negotiators. If any person who simply owns a business or works in management of a business without any experience in negotiations or knowledge of workers' compensation law is appointed to sit on this committee, Alaska employers would be at a serious disadvantage.

Further, we have concerns that the Advisory committee is being charged with making recommendations and evaluations of all aspects of workers' compensation and is, therefore, too broad-reaching. It is unreasonable to incorporate the duties of the MSRC into

a new committee that is also charged with making recommendations on regulations and all other areas of workers' compensation law.

We also have concerns that only organized labor representatives are being considered to sit on this committee. Organized labor makes up only a small percentage of the workforce. Other aspects of the workforce should be considered and given a voice.

Historically, labor and management selected their own representatives in the ad hoc process. This minimized political agendas and the stakeholders selected those they thought best represented their interests. Appointment of these members by the Commissioner of Labor, who changes from administration to administration, only reintroduces the political agenda back into the process. WCCA opposes the current recommendations in HB 346 as outlined in AS 23.30.275((b) and recommends that the proposed statute be amended to require the commissioner to look to organized labor and employer organizations such as WCCA or State Chamber of Commerce for their appointments of their respective representatives as outlined in (a)(1)-(a)-(2).

We believe that appointment of members who are very knowledgeable in workers' compensation law and the effects of those laws are essential to the success of a group such as the proposed board, and respectfully request your consideration of the amendments we've outlined above.

RE: HB 346 – Workers Compensation Advisory Board

Dear Representative Olson:

The Alaska State Medical Association (ASMA) represents physicians statewide and is primarily concerned with the health of all Alaskans.

ASMA opposes HB346 as it is currently written. ASMA feels it is critical to have a greater presence on this advisory board. This is particularly true if the rumored "sunset" of the Medical Services Review Committee (MSRC) takes place. At a minimum, the physician community should have an equal number of voting representatives as does organized labor and employers. Additionally, ASMA recommends that those physician representatives be evenly split between proceduralists (eg. surgeons) and generalists (eg. general internists).

Testimony provided on HB314 indicated that the percentage of total Workers Compensation that relates to medical care cost is up to 72% based on the latest data for 2008. This was termed an increase in "medical severity", a term used in the Workers Compensation technical world that encompasses a number of complex and related factors. The amount paid to a particular medical care provider is but one of the components. Other more complex components such as the trend in the injury severity, the frequency which a certain service is provided, and the trends in the change of treatment type mix (eg. a movement from a "watchful waiting" course of treatment to more complex surgical treatment) have a material effect on the total cost.(ie, the "medical severity").

These other factors may be influenced by such elements such as treatment guidelines and the comparative effectiveness of the various treatment algorithms. The development of the comparative effectiveness for each of the numerous treatments algorithms for the possible injuries or diseases is in its infancy.

The expertise of the physician community is necessary to provide the meaningful input necessary for the Workers Compensation Board to make informed decisions. The Legislature realized this when it created the MSRC for the purpose of providing advice on the appropriateness, necessity, and cost of medical and other related services.

ASMA stands ready to assist you in these complex issues.

Sincerely,

Brion Beerle

March 19, 2010

Honorable Bill Stoltze
Honorable Mike Hawker
Co-Chair, House Finance Committee
Room 519, 505 State of Alaska
House of Representatives
Juneau, Alaska

RE: CS for HB346 (26-LS1447\E) –Workers Compensation Advisory Council

Dear Representatives Stoltze and Hawker:

The Alaska State Medical Association (ASMA) represents physicians statewide and is primarily concerned with the health of all Alaskans.

CS HB346 would eliminate the existing Medical Services Review Committee (MSRC). Because of this, ASMA supports the formation of the Workers Compensation Advisory Council but strongly recommends that the physician community have parity in representation with organized labor and employers. Additionally that representation should be split evenly between physicians that are proceduralists and generalists. The representatives of organized labor and employers do not actually treat injured workers but yet will have the potential for significant effect on the process of proper medical care.

Bruce Kiessling, MD was the first representative and sole physician on the MSRC who resigned in 2009 due to a family illness. Dr. Kiessling stated it best in his resignation letter to Trena Heikes, Director of the Division of Workers Compensation. He in part stated:

> "...As a member of the committee since its formation it has been curious to see some of the progress and all of the stumbles as members and leaders have worked, with good intentions, toward "reform".
>
> To a physician, and which is why it is so important that physicians be at the table, with any reform discussion, "reform has to include measurement of patient care as well as a structure of accountability that will improve that care.
>
> "Reform" to the committee has moved sluggishly in the first years and now with more urgency toward fee controls. It has been my strong assertion, based on 40 years in the community, that this will ultimately compromise care, or at least the best care that otherwise would be available. I have reviewed on several occasions why this will occur.

Fundamental to any of the committee discussions has to be the core issue of quality of care. Next it has to be accountability and improvement of that care. Only after that will the also hugely important issue of how will it be paid for come to the front and be discussed with integrity…"

Physicians need to be an integral part of reform to the Alaska Workers Compensation system. Indeed, outside expert medical consultants could be engaged. However, without meaningful local medical participation you will forgo local participation in the process resulting in difficulty with "buy in" to any meaningful reform, and potential serious problems with access to care for injured workers.

ASMA and I stand ready to help in the reform efforts.

Sincerely,

Brion J Beerle

Juneau, AK 99801

RE: HB346 – Workers Compensation Advisory Board; Proposed Amendment (26-LS1447\R.1,Bailey, 2/15/10)

Dear Representative Olson:

The Alaska State Medical Association (ASMA) represents physicians statewide and is primarily concerned with the health of all Alaskans.

When ASMA's written testimony dated February 22, 2010 was provided, the "sunset" of the Medical Services Review Committee was rumored, now, with the above identified amendment, it is no longer rumored. Sec. 2 repeals the MSRC by repealing AS23.30.095(j). ASMA expects that this amendment will be adopted.

Given the above expectation, ASMA strongly recommends that the physician community have parity in representation with organized labor and employers. Additionally that representation should be split evenly between physicians that are proceduralists and generalists. The representatives of organized labor and employers do not actually treat injured workers but yet will have the potential for significant effect on the process of proper medical care.

Bruce Kiessling, MD was the first representative and sole physician on the MSRC who resigned in 2009 due to a family illness. Dr. Kiessling stated it best in his resignation letter to Trena Heikes, Director of the Division of Workers Compensation. He in part stated:

> "... As a member of the committee since its formation it has been curious to see some of the progress and all of the stumbles as members and leaders have worked, with good intentions, toward "reform".
>
> To a physician, and which is why it is so important that physicians be at the table, with any reform discussion, "reform has to include measurement of patient care as well as a structure of accountability that will improve that care.
>
> "Reform" to the committee has moved sluggishly in the first years and now with more urgency toward fee controls. It has been my strong assertion, based on 40 years in the community, that this will ultimately compromise care, or at least the best care that otherwise would be available. I have reviewed on several occasions why this will occur.

Fundamental to any of the committee discussions has to be the core issue of quality of care. Next it has to be accountability and improvement of that care. Only after that will the also hugely important issue of how will it be paid for come to the front and be discussed with integrity…."

Physicians need to be an integral part of reform to the Alaska Workers Compensation system. Indeed, outside expert medical consultants could be engaged. However, without meaningful local medical participation you will forgo local participation in the process resulting in difficulty with "buy in" to any meaningful reform, and potential serious problems with access to care for injured workers.

ASMA and I stand ready to help in the reform efforts.

Sincerely,

Brion J Beerle

Ms. Trena Heikes
Alaska Division of Workers' Compensation
PO Box 115512
Juneau, AK 99811-5512

Dear Ms. Trena Heikes:

As a fellow administrator of a state workers' compensation agency, I can feel some of the pain you must be experiencing dealing with the interest group pressure and legislative concerns over high workers' compensation costs. When any state's insurance rates stand out among its peer states, it attracts stakeholder attention, and especially by employers.

Your legislature's interest in establishing a strong labor-management advisory council to help steer the course of reform of benefits and costs is an excellent approach. My state of Wisconsin is extremely proud of the track record of our advisory council in maintaining a stable and moderate cost workers' compensation system. Legislative preemption of council legislative suggestion is unheard of in Wisconsin. There are several other states with good advisory council models.

As President of the International Association of Industrial Accident Boards and Commissions, I would be pleased to offer the assistance of the association staff in assisting you in evaluating the structure, organization, and scope of duties of successful councils. If you are interested in assistance, please contact our Executive Director, Gregory Krohm. You may have met Greg at the Minneapolis Convention. I am sure he will be glad to help research questions of particular interest to you, and seek out insights from our member states.

Sincerely,

Frances Huntley-Cooper

RE: House Bill 346

Dear Representative Olson:

On behalf of the National Federation of Independent Business/Alaska, I wish to respectfully share our support for House Bill 346. The National Federation of Independent Business is the largest small-business advocacy group in Alaska.

House Bill 346 creates a Workers' Compensation Advisory Board to advise the Department of Labor and Workforce Development on workers compensation issues. It is important to have those affected by policies that will be adopted relative to workers' compensation.

We would request that you consider requiring that one employer member be from a small business as our concerns are different from those of larger, perhaps multi-state employers, found in the oil industry and self insured employers.

Sincerely yours,

Dennis L. DeWitt
Alaska State Director

SPONSOR STATEMENT AND BILL ANALYSIS
HB 355 – CRIMINAL FINES FOR ORGANIZATIONS

"An Act relating to criminal fines for organizations."

HB 355 closes a loophole. An organization may not be imprisoned for its criminal acts; only a fine may be levied as punishment. Under current law, the court may impose the greater of (1) the maximum fines set out in the schedule under AS 12.55.035(c)(1), (2) three times the pecuniary gain realized by the defendant, or (3) three times the pecuniary damage or loss caused by the defendant to another. Under the particular factual situations of some crimes, the treble penalties are not applicable. One instance would be if a corporation bribes legislators to stop a piece of legislation (such as tax legislation), but the legislation passes anyway. In this case, there is neither a loss to the government nor a gain to the corporation. HB 355 would allow the court to issue fines in the amount of three times the pecuniary gain *sought* by the defendant or three times the pecuniary damage or loss to another *sought* by the defendant. These would provide alternatives to statutorily set fines.

ANALYSIS: *(Attach a separate page if necessary)*

HB 355 raises the potential fine for conviction of a crime by an organization. It does so by providing that the fine may be three times the pecuniary gain that was sought by the defendant or others by the crime, or three times the potential loss that the defendant sought by the commission of the offense. There is no anticipated fiscal impact to Department of Law.

EXPLANATION OF CHANGES

Changes between HB 355 and CSHB 355(JUD) (26-LS1385\P):

- On page 1, line 7, the fine for a felony offense or a misdemeanor that results in death was raised from $1,000,000 to $2,500,000.

- On page 1, line 9, the fine for a class A misdemeanor offense was raised from $200,000 to $500,000.

- On page 1, line 11, the fine for a class B misdemeanor offense was raised from $25,000 to $75,000.

- On page 1, line 13, the fine for a violation was raised from $10,000 to $25,000.

*175 POLICING THE CORPORATE CITIZEN: ARGUMENTS FOR PROSECUTING ORGANIZATIONS

Daniel L. Cheyette[FNa1]

Copyright (c) 2008 Alaska Law Review; Daniel L. Cheyette

Abstract

Alaska's corporate criminal liability statute exposes organizations to criminal liability for the actions of their agents, as long as agents intended the organization to benefit from their actions. Organizations cannot disclaim liability through codes of conduct or corporate policies, and their liability extends beyond any merger, consolidation, or dissolution. This Article argues that criminally prosecuting an organization is advantageous because it allows greater criminal fines and carries collateral consequences. In addition, criminally prosecuting an organization may be easier than criminally prosecuting an individual because Fifth Amendment privileges and hearsay obstacles do not apply. Corporations accrue the knowledge of their agents, so proving specific intent may also be less difficult. Finally, this Article describes considerations that should be weighed when deciding whether to prosecute a particular organization. The author argues that Alaska's corporate criminal liability statute is a powerful tool that, where appropriate, should be used more often.

Conclusion 210

Introduction

When charging cases, Alaska prosecutors too often overlook crucial potential defendants: the organizations [FN1]--corporations, companies, partnerships, and other entities--on whose behalf individual wrongdoers act. Alaska law casts a wide net for liability by making organizations liable for the criminal conduct of their agents, [FN2] and by authorizing larger criminal fines against convicted organizations than *177 against convicted individuals. [FN3] These considerations beg the obvious question: why are organizations not investigated and prosecuted more frequently? The most likely explanation is that few prosecutors are aware of how far-reaching an organization's criminal liability extends. In addition, correctly or incorrectly, some prosecutors likely view the prosecution of an organization as an unwanted hassle--the prosecution would be different than their typical cases and may well involve high-paid corporate counsel unfamiliar with criminal practice. [FN4] Finally, some prosecutors might mistakenly believe that organizational prosecutions punish innocent shareholders rather than actual wrongdoers. [FN5] Thus, it has not been common practice in state prosecutor offices to charge organizations. [FN6]

The Author hopes this Article will change these views and encourage prosecutors to examine their caseloads for potential organizational defendants. There are significant benefits to be gained by charging organizations rather than individuals: courts will likely impose larger fines against organizations, prosecution of an organization may effect change within the organization, and negative publicity and other collateral consequences will pressure the organization to settle. Furthermore, should the case go to trial, the defense will not be able to protect organizations' records or utilize certain other evidentiary tools to hamstring the prosecution's presentation of evidence.

The aftermath of the 1989 Exxon Valdez oil spill provides a good illustration of why prosecuting an organization is often superior to prosecuting an individual wrongdoer. The 1989 grounding of the tanker Exxon Valdez spilled approximately eleven million gallons of crude oil into Prince William Sound. [FN7] Following the grounding, the State of Alaska prosecuted Joseph Hazelwood, the captain of the ill-fated vessel. [FN8] Hazelwood was convicted by a jury of negligent discharge of oil [FN9] but *178 received only a conditionally suspended sentence. [FN10] Conversely, the United States prosecuted Exxon, ultimately resulting in a negotiated plea agreement and a combined criminal fine of one hundred million dollars. [FN11] The latter was a better use of prosecutorial resources and obtained a better result. [FN12]

It is particularly common for organizations to be defendants in several niche areas of Alaska criminal law. For example, Title 4 criminalizes various aspects of alcohol-related behavior. [FN13] Bush pilots who knowingly or negligently allow passengers to carry alcohol aboard their flights can expose their air carrier to criminal liability. [FN14] Titles 8 and 16 criminalize violations of the state's hunting and fishing laws and regulations. [FN15] Fishing guides who assist their clients by knowingly or negligently violating state fishing regulations expose their employers, such as lodges or guiding outfits, to criminal liability. [FN16]

These principles also apply to the more "traditional" crimes defined in Title 11 of the Alaska Criminal Code. One well-publicized example of such a prosecution was that of Whitewater Engineering Corporation. [FN17] Gary Stone, a Whitewater employee, was killed in an *179 avalanche at a Whitewater jobsite near Cordova. [FN18] Prosecutors charged the corporation and its president, Thom A. Fischer, with manslaughter because key employees failed to heed avalanche warnings and failed to observe necessary safety precautions. [FN19] Although charges against Fischer were ultimately dismissed, the company pled no contest to a charge of criminally negligent homicide. [FN20]

This Article examines criminal liability of organizations under Alaska law. Part I begins with the historical development of organizational criminal liability in the United States and Alaska. Part II covers the current contours of organizational criminal liability, as codified in the Alaska Statutes and interpreted by Alaska courts. Part III discusses the various consequences typically flowing from a conviction. Additionally, Part IV explores practical considerations for prosecutors, and Part V explores

© 2010 Thomson Reuters. No Claim to Orig. US Gov. Works.

charging considerations for prosecutors who decide to file charges against an organization. Within these sections and in the Conclusion, this Article explains why it is advantageous to prosecute organizations as opposed to solely prosecuting the individual wrongdoers.

I. Historical Underpinnings

Courts were the first to recognize corporations as legal entities capable of suing and being sued. [FN21] Early decisions established that corporations could be sued in tort. In Philadelphia, Wilmington and Baltimore R.R. Co. v. Quigley, [FN22] the United States Supreme Court explained in detail the policy considerations that mandated this result. [FN23] Quigley sued the railroad for libel due to the conduct of one of its *180 employees. The company argued that a corporation could only act within the limits of its charter and therefore could not be held liable for any acts of its agents that exceeded those limits. The Court rejected this argument because it would allow corporations to do business and interact with the public while escaping liability when corporate agents, conducting corporate business, injure members of the public. [FN24] By the latter part of the nineteenth century, corporate tort liability was no longer in dispute and lawsuits against corporations were commonplace. [FN25] The law imputed tortious intent from the agent to the corporation, making the corporation liable for actual damages. The courts would not, however, impute the intent necessary to award punitive damages for any injuries absent a showing of wrongdoing by the corporation itself. [FN26]

Corporate criminal liability grew from these civil liability roots. Courts slowly acknowledged that corporations could be criminally liable for the conduct of their agents. For example, in Commonwealth v. Proprietors of New Bedford Bridge, [FN27] the Massachusetts Supreme Court upheld the indictment of a corporation for a public nuisance. [FN28] In 1899, the same court affirmed that corporations could be guilty of criminal contempt in Telegram Newspaper Co. v. Commonwealth. [FN29] Regarding corporate criminal liability, the court stated:

> *181 We think that a corporation may be liable criminally for certain offenses, of which specific intent may be a necessary element. There is no more difficulty in imputing to a corporation specific intent in criminal proceedings than in civil. A corporation cannot be arrested and imprisoned in either civil or criminal proceedings; but its property may be taken, either as compensation for a private wrong or as punishment for a public wrong. [FN30]

The United States Supreme Court affirmed the general principle of corporate criminal liability in New York Central & Hudson River Railroad Co. v. United States, [FN31] in which it upheld convictions of the railroad corporation for paying illegal rebates. [FN32] The Court applied the principles governing civil liability and held that the acts of agents are imputed to their employers, who may be penalized when the employees act within the scope of their employment. [FN33] Without expressly mentioning the legal concept of respondeat superior, the Court was using it to impute criminal liability to the corporation from the acts of its agents. Numerous Ninth Circuit cases have endorsed this principle. [FN34]

Courts in Alaska slowly recognized organizational criminal liability. The Alaska federal district court first addressed corporate criminal liability in United States v. Alaska Packers' Ass'n. [FN35] There, the court considered the defendant corporation's indictment for fishing violations. The corporation took the position that it could not be indicted for a felony because corporations cannot be imprisoned, a punishment for a felony. [FN36] The court disagreed, pointing out that a corporation may be fined just like an individual, [FN37] that such a penalty may be levied for *182 acts which would result in imprisonment for individuals, [FN38] and that there was no reason a corporation should escape such punishment. [FN39] Essentially, the district court came to the same conclusion that the Massachusetts Supreme Court reached fifty years earlier in Proprietors of New Bedford Bridge [FN40]-- criminal conduct and criminal intent can be imputed to an organization from its agents. [FN41]

The Alaska legislature codified organizational criminal liability in 1978 when it revised the state criminal code according to the recommendations of the Alaska Criminal Code Revision Commission. [FN42] The first version of section 11.16.130 of the Alaska Statutes proposed by the Commission was very limited. [FN43] The Commission extended criminal liability only to corporations and only in instances when the alleged offense was a violation, a misdemeanor, or otherwise defined so as to clearly indicate a legislative intent to impose criminal liability on a corporation. [FN44] The statute also applied to a company if the conduct was "engaged in, authorized, solicited, requested, commanded or knowingly tolerated by" the corporation's board of directors or a "high managerial agent." [FN45]

© 2010 Thomson Reuters. No Claim to Orig. US Gov. Works.

The Commission greatly expanded the scope of the preliminary draft in the course of its deliberations. Significantly, the Commission extended criminal liability to "organizations," [FN46] and the definition of the *183 term was nearly identical to the current definition of the term. [FN47] The Commission also changed the requirements for imposing liability under the first subparagraph to the disjunctive, thus imposing liability if the act was committed by the employee in the scope of his employment or to benefit the organization. [FN48] The legislature ultimately rejected this construction, however, and required that the act be committed both in the scope of the employment and to benefit the organization. The version of the statute ultimately passed by the legislature mirrors the current version of the statute. [FN49]

II. Current Contours of Organizational Liability

An organization, once constituted, has a legal identity distinct from its owners, officers and directors. [FN50] It is, by statute, an artificial, legal "person." [FN51] As such, an organization may commit crimes and may be charged as a defendant in criminal cases. [FN52] The criminal liability of organizations is defined in section 11.16.130 of the Alaska Statutes:

> (a) Except as otherwise expressly provided, an organization is legally accountable for conduct constituting an offense if the conduct
>
> (1) is the conduct of its agent, and
>
> (A) within the scope of the agent's employment and in behalf of the organization; or
>
> (B) is solicited, subsequently ratified, or subsequently adopted by the organization; or
>
> (2) consists of an omission to discharge a specific duty of affirmative performance imposed on organizations by law.
>
> *184 (b) In this section "agent" means a director, officer, or employee of an organization or any other person who is authorized to act in behalf of the organization.

The Alaska Court of Appeals described the essence of this liability in State v. ABC Towing. [FN53] The decision contrasts the theories of organizational criminal liability, set forth in section 11.16.130 of the Alaska Statutes, with the better known theories of accomplice criminal liability, set forth in section 11.16.110 of the Alaska Statutes. [FN54] In drawing this comparison, the court of appeals noted organizations face broader criminal liability than individuals because organizations are liable for conduct of their agents that owners, members, officers or directors do not know about until after the fact. [FN55]

The kinds of entities subject to such liability are also defined by statute: "'[O]rganization' means a legal entity, including a corporation, company, association, firm, partnership, joint stock company, foundation, institution, government, society, union, club, church, or any other group of persons organized for any purpose." [FN56] As such, organizations are broadly exposed to criminal liability for the acts of their agents. This poses an obvious problem for organizations, whose main purpose is to pool resources, maximize profit potential, and limit the liability of those individuals involved. [FN57] At cross purposes with this last principle, Alaska law imposes criminal liability in cases where individual conduct, when appropriately construed as corporate conduct, runs afoul of state criminal law.

Many critics question whether organizations should be prosecuted at all and argue that such prosecutions punish innocent shareholders rather than the actual wrongdoer. The Ninth Circuit provided a succinct rebuttal to that suggestion in United States v. Hilton Hotels Corp:

> Legal commentators have argued forcefully that it is inappropriate and ineffective to impose criminal liability upon *185 a corporation, as distinguished from the human agents who actually perform the unlawful acts . . . particularly if the acts of the agents are unauthorized. . . . But it is the legislative judgment that controls, and "the great mass of legislation calling for corporate criminal liability suggests a widespread belief on the part of legislators that such liability is necessary to effectuate a regulatory policy." [FN58]

The crux of the argument is that organizational criminal liability prompts organizations to more rigorously police their agents. Regardless of whether this is true, the existence of corporate and, more generally, organizational criminal liability is beyond debate. [FN59]

© 2010 Thomson Reuters. No Claim to Orig. US Gov. Works.

A. Alaska Jurisprudence

Most examples of organizational criminal liability in Alaska occur under section 11.16.130(a)(1)(A) of the Alaska Statutes--conduct of an agent that is done in the scope of the agent's employment and on behalf of the organization. [FN60]

The Alaska appellate courts have discussed the substance of organizational criminal liability only twice. [FN61] In State v. ABC Towing, [FN62] the court of appeals was called on to determine whether a towing company, formed as a sole proprietorship, could be prosecuted for violating a state pollution law, based on an employee's illegal discharge of gasoline. The issue for the court was whether a sole proprietorship is an "organization" as defined in section 11.81.900 of the Alaska Statutes. [FN63] The court held that it was not, because a sole proprietorship is the mere alter ego of the sole proprietor. [FN64] In other words, there is no legal *186 distinction between the sole proprietor and the proprietorship; to prosecute the proprietorship, the state must charge the proprietor. [FN65]

The court of appeals provided more recent guidance in State v. Greenpeace, Inc. [FN66] The State prosecuted and convicted Greenpeace, Inc. for bringing a Greenpeace ship, the M/V Arctic Sunrise, into state waters without a state-approved oil spill contingency plan or a certificate of financial responsibility. [FN67] Following the jury's guilty verdicts against the corporation, the district court granted a defense motion for acquittal and set the convictions aside. [FN68] The court of appeals affirmed the district court based on findings that Greenpeace, Inc., a United States corporation, was not in charge of the ship and did not control its operators. [FN69] According to the court, the prosecution charged the wrong parties. [FN70] The case involved Stichting Phoenix, [FN71] a Dutch foundation that owned the Arctic Sunrise, and Stichting Marine Services (SMS), a second Dutch foundation that operated it. [FN72] SMS chartered the ship to Greenpeace International, a third Dutch entity, that owns the name "Greenpeace." [FN73] Greenpeace International licenses this name to independent environmental organizations around the world including Greenpeace, Inc. in the United States. [FN74] In 2004, Greenpeace International agreed to let Greenpeace, Inc. use the Arctic Sunrise for an anti-logging campaign. [FN75] SMS supplied the crew and was also responsible for making sure the ship complied with all local regulatory requirements. [FN76] The prosecution argued that SMS and the Arctic Sunrise *187 captain were agents of Greenpeace, Inc. and, therefore, Greenpeace, Inc. was liable for the criminal conduct. [FN77] The court of appeals disagreed:

> A person or organization does not qualify as the authorized agent of a principal unless the principal controls or has the right to control the purported agent. The State offered no evidence that Greenpeace, Inc., controlled how (or if) SMS or [the captain] operated the Arctic Sunrise or complied with Alaska's requirements for nontank vessels. [FN78]

The prosecution also argued that Greenpeace, Inc. ratified or adopted the criminal conduct of SMS and the Arctic Sunrise and was therefore liable for their conduct. [FN79] Again, the court of appeals disagreed. The court held that adoption or ratification requires the principal's "awareness of the misconduct and some action to ratify or adopt the misconduct." [FN80] It found that the prosecution had not produced any evidence Greenpeace, Inc. knew of the illegal conduct or took any actions to ratify or adopt that conduct. [FN81]

Though the court does not explicitly say, its decision suggests that SMS, or arguably Greenpeace International, was the proper defendant. [FN82] This holding nevertheless begs the question of whether Alaska could effectively prosecute either of these foreign entities in state court. Service of process on these entities would be problematic, [FN83] and even if service were achieved, the entities would likely argue that the Alaska state *188 courts lack personal jurisdiction over them. [FN84] Finally, it is difficult to imagine how the state could effectively enforce any sentence ultimately imposed by its courts.

Collectively, ABC Towing and Greenpeace, Inc. confirm the existence of organizational criminal liability under state law. These decisions do little, however, to define the contours and limitations of that liability and, in fact, highlight problems with the existing laws. ABC Towing carves out an exemption for sole proprietorships. [FN85] Greenpeace is also problematic in that it illustrates the ease with which organizations might compartmentalize their operations or duplicate themselves and thereby thwart criminal prosecution. [FN86] These are shortcomings legislators need to address if the prosecution of organizations is to be effectively and consistently utilized.

© 2010 Thomson Reuters. No Claim to Orig. US Gov. Works.

Given the paucity of pertinent Alaska jurisprudence regarding organizational criminal liability, Alaska courts would likely rely on relevant federal authority. [FN87] Federal cases frequently acknowledge that a *189 corporation can act only through its officers, agents, and employees. [FN88] Courts therefore hold that a corporation may be liable for the acts of its officers, employees, and other agents even though the questioned act may be illegal, contrary to specific company policy, or not expressly authorized beforehand by the corporation. [FN89]

B. Existence of Organization Policies Prohibiting the Criminal Conduct and the Requisite Quantum of Benefit

Federal cases hold that an organization may be found guilty of a criminal offense as long as the employee was motivated, at least in part, to benefit the organization. [FN90] It follows that organizations often attempt to absolve themselves of liability by relying on corporate policies that preclude criminal conduct. These attempts have generally been unsuccessful. The Ninth Circuit addressed such an effort in the context of Sherman Act prosecutions. [FN91] In Hilton Hotels Corp., [FN92] charges were premised on proof that the hotel's purchasing agent threatened a supplier with the loss of the hotel's business unless the supplier paid an assessment to a trade association of which the hotel was a member. [FN93] Hotel personnel testified that company policy required purchasing *190 supplies solely on the basis of price, quality, and service, and they had specifically instructed the purchasing agent not to boycott suppliers. [FN94] The Ninth Circuit held that the hotel could not insulate itself from criminal liability by adopting general instructions not to participate in a boycott if it did not take sufficient actions to enforce those instructions. [FN95] The fact remained that the hotel authorized a purchasing agent to act on its behalf and the agent exercised complete authority as to those responsibilities and, pursuant to that authority, added the hotel's buying power to the force of the boycott. [FN96] Other circuits have taken a similar position when employees act contrary to company policy. [FN97]

An important corollary is that courts generally permit defendants to admit evidence of corporate policies or instructions that forbid the conduct at issue to support an argument that an agent was acting outside the scope of employment or to the principal's detriment. The Ninth Circuit summarized this view:

> [A] corporation may be liable for acts of its employees done contrary to express instructions and policies, but that the *191 existence of such instructions and policies may be considered in determining whether the employee in fact acted to benefit the corporation. Merely stating or publishing such instructions and policies without diligently enforcing them is not enough to place the acts of an employee who violates them outside the scope of his employment. It is a question of fact whether measures taken to enforce corporate policy in this area will adequately insulate the corporation against such acts . . . [FN98]

Other courts have reached similar rulings. [FN99]

It is not necessary that the organization actually accrue a benefit from the agent's actions for criminal liability to attach. In Beusch, [FN100] the Ninth Circuit rejected a corporation's argument that it could not be liable if the criminal conduct did not in fact benefit the corporation. [FN101] The Fourth Circuit's decision in United States v. Automated Medical Laboratories, Inc. [FN102] is frequently cited on this point--the court affirmed a jury's conviction of American Medical Laboratories for falsifying logbooks and records required to be maintained by the Federal Drug Administration. [FN103] In Automated Medical Laboratories, the court held that benefit was an evidential fact, stating:

> [W]hether the agent's actions ultimately redounded to the benefit of the corporation is less significant than whether the agent acted with the intent to benefit the corporation. The basic purpose of requiring that an agent have acted with the intent to benefit the corporation, however, is to insulate the corporation from criminal liability for actions of its agents which be inimical to the interests of the corporation or which may have been undertaken solely to advance the interests of that agent or of a party other than the corporation. [FN104]*192 These cases collectively illustrate that whether the agent's conduct benefits the organization is a question of fact for the jury. The cases also demonstrate that appellate courts will let convictions stand so long as there is some evidence that the organization gained some benefit. In comparison, criminal conduct by an agent falling outside the scope of employment will not be imputed to the organization

© 2010 Thomson Reuters. No Claim to Orig. US Gov. Works.

where the conduct solely benefits the agent. Such was the case in Standard Oil Co. of Texas v. United States, [FN105] in which the Fifth Circuit reversed convictions against two corporate defendants because the criminal acts by the employees, while benefiting themselves, actually injured the corporation. [FN106]

Alaska cases contemplating the application of respondeat superior liability in the context of tort claims have echoed the holding of Standard Oil. Notable among these are Taranto v. North Slope Borough, [FN107] Northern Fabrication Co., Inc. v. Arco, Inc., [FN108] and Ondrusek v. Murphy. [FN109] All three cases apply the Restatement (Second) of Agency section 228 criteria to determine whether an agent acted in the scope of his employment. Pursuant to section 228, conduct is only in the scope of employment if--among other requirements--it is done at least in part to serve the employer. Thus, in Northern Fabrication Co., Inc., the Alaska Supreme Court reversed the trial court's grant of summary judgment in favor of the defendant corporations and held that the corporations could only negate the plaintiff's claim of vicarious liability for the theft of equipment by the defendants' employees if the corporations could prove they did not control the employees' actions and the employees acted solely in furtherance of their own personal motives. [FN110]

These cases demonstrate that an organization cannot insulate itself from liability with general policies or guidance that forbid the conduct at issue. However, an organization can use policies or guidance in an effort to convince a jury that the organization took sufficient action to prevent the wrongful conduct and should not be liable for the actions of an agent. Moreover, the organization will not be liable for conduct that an agent takes solely for his or her own benefit, or that is inimical to the organization's interests.

*193 C. Collective Corporate Knowledge

For a time, specific intent crimes that require proof of knowing or intentional conduct were difficult to apply against large or diverse organizations. Organizations tend to compartmentalize their operations and decision-making between different units or divisions. Therefore the requisite mens rea or conduct is often not present in any one individual, making imputing mens rea to the organization difficult. Many courts have resolved this problem through the collective corporate knowledge theory best described by the First Circuit in United States v. Bank of New England. [FN111]

> The acts of a corporation are, after all, simply the acts of all of its employees operating within the scope of their employment. The law on corporate criminal liability reflects this. . . . Similarly, the knowledge obtained by corporate employees acting within the scope of their employment is imputed to the corporation. Corporations compartmentalize knowledge, subdividing the elements of specific duties and operations into smaller components. The aggregate of those components constitutes the corporation's knowledge of a particular operation. It is irrelevant whether employees administering one component of an operation know the specific activities of employees administering another aspect of the operation . . . [FN112]

This line of reasoning enables prosecutors to impute the summed knowledge of various employees to the organization as a whole. [FN113]

*194 D. Effect of Merger, Consolidation, and Dissolution

Any liability imputed to an organization will generally survive the organization's merger, consolidation, or dissolution. The common law analogized the dissolution of an organization (either directly, or by merger or consolidation) to the death of a natural person, [FN114] meaning that dissolved, merged, or consolidated organizations could not be prosecuted. [FN115]

State statutes that continue the legal existence of these entities have eroded this common law principle. It is now generally true that organizations can be prosecuted (or sued civilly) following their dissolution, merger or consolidation. In Melrose Distillers, Inc. v. United States, [FN116] the United States Supreme Court discussed this abrogation of the common law. Prosecutors indicted three related corporations for violations of the Sherman Act. [FN117] While the indictments were pending, the corporations dissolved and became new divisions in a single, separate corporation. [FN118] The district court and court of appeals held that the dissolution of the original corporations did not abate the indictments. [FN119] The Supreme Court affirmed, looking to both Maryland and Delaware law and finding that the states had statutes "saving" claims against dissolved

© 2010 Thomson Reuters. No Claim to Orig. US Gov. Works.

corporations. [FN120] The Court interpreted these statutes to include criminal charges under the Sherman Act. [FN121] Other courts have come to the same conclusion respecting corporations and partnerships organized under the laws of other states. [FN122]

*195 There is no analogous holding in Alaska case law. The closest case on point, Gossman v. Greatland Directional Drilling, Inc., [FN123] discusses the viability of civil claims brought against a dissolved corporation for negligent conduct during the corporation's existence. [FN124] Greatland dissolved in 1993 following the purchase of its assets by Anadrill, a distinct corporation. [FN125] In 1995, plaintiff Gossman was injured while working for Anadrill at one of the facilities Anadrill purchased from Greatland. [FN126] The injury was caused by a piece of equipment that had been negligently modified by a Greatland employee years before the corporation's dissolution. [FN127] In 1996, Gossman filed negligence claims against Greatland. [FN128] The Alaska Supreme Court looked to section 10.06.678 of the Alaska Statutes--a survival statute for claims against corporations--to determine whether any provision abrogated the common law abatement theory. [FN129] At the time (and currently), section 10.06.678, in pertinent part, provided:

> (a) A corporation that is dissolved voluntarily or involuntarily continues to exist for the purpose of winding up its affairs, defending actions against it, and enabling it to collect and discharge obligations, dispose of and convey its property, and collect and divide its assets. A dissolved corporation does not continue to exist for the purpose of continuing business except so far as necessary for winding up the business.
>
> (b) An action or proceeding to which a corporation is a party does not abate by the dissolution of the corporation or by reason of proceedings for winding up and dissolution of the *196 corporation. A corporation that is dissolved voluntarily or involuntarily may not commence a court action, except for a court action under [section] 10.06.675. [FN130]

The court reviewed the legislative history of section 10.06.678 and examined treatment of similar statutes in other jurisdictions before deciding claims do not abate against a dissolved corporation. [FN131]

Gossman does not address criminal prosecutions. However, the court's analysis in this civil case mirrors the analysis the Supreme Court used in Melrose Distillers in a criminal context. [FN132] There is no reason to believe an Alaska court would analyze the issue any differently in the context of a criminal case. Moreover, Alaska courts routinely rely on federal authorities when interpreting Alaska law that has no case precedent and is similar to federal laws. [FN133] A number of jurisdictions have adopted Melrose Distillers, [FN134] and Alaska courts have cited Melrose Distillers for other propositions. [FN135]

Further, as is discussed above, the Alaska Supreme Court in Gossman interpreted section 10.06.678 of the Alaska Statutes liberally to include claims that accrued after the dissolution of the corporation. [FN136] This suggests that the court would likewise liberally interpret the statute if faced with the question of whether the statute is inclusive of criminal charges. In short, dissolution, merger, and consolidation of a corporation should not foreclose the State's ability to prosecute the corporation, although it might make it more difficult to collect fines that are ultimately imposed. [FN137]

*197 Alaska has similar survival statutes that are applicable to other organizations. However, some of the survival statutes--such as those that apply to non-profit corporations [FN138] or limited liability companies [FN139]--carry time limitations which may affect potential claims or charges.

III. Prosecutorial Consequences

A. Penalty Provisions

Organizations are not subject to the same penalties as individual defendants. While organizations can only act through their agents, organizations cannot be punished in the same way as their agents. [FN140]

Special penalty provisions exist for organizations based on the severity of the underlying crime. [FN141] In assessing a fine under these provisions the sentencing court considers:

© 2010 Thomson Reuters. No Claim to Orig. US Gov. Works.

(1) measures taken by the organization to discipline an officer, director, employee, or agent of the organization;

(2) measures taken by the organization to prevent a recurrence of the offense;

(3) the organization's obligation to make restitution to a victim of the offense, and the extent to which imposition of a fine will impair the ability of the organization to make restitution; and

(4) the extent to which the organization will pass on to consumers the expense of the fine. [FN142]*198 These considerations are in addition to statutory and common law factors Alaska courts consider in deciding any criminal sentence. [FN143] Generally, it is not difficult to frame these factors in a way to justify substantial fines under any of the penalty matrices available for use against organizations. If the organization is large, a substantial fine would be justified so that it has an appreciable penalty or deterrent impact on the organization's operations. The fine would likewise need to be large to cause other similarly situated organizations to take notice and action to ensure they do not commit similar errors.

Consider two examples. First, if a fishing lodge allows its clients to commit hunting and fishing violations to ensure they catch a lot of fish and have a good time, a small fine would not act as a sufficient deterrent. Because these lodges often have significant revenues, fines at the top of the penalty range set forth in section 12.55.035(c) of the Alaska Statutes would be necessary and justified. These are common sense arguments that are likely to have traction with the sentencing court. Second, imagine a service station operating as an LLC that knowingly functions with leaking underground fuel tanks. The situation comes to light when diesel range organics are discovered in a nearby creek. Investigation traces the fuel back to the service station and additional investigation produces evidence that the manager had been aware of the leak for several months. The Alaska Department of Environmental Conservation (DEC) hires a private environmental services firm to design and implement a clean-up and remediation plan for the polluted land and water and to monitor the water quality of the creek for five years. The total cost for these services exceeds a million dollars. Under section 12.55.035(c)(3) of the Alaska Statutes, the potential fine against the LLC could exceed three million dollars. This fine could be in addition to the restitution owed to the state for the cost of the clean-up and remediation work itself. Admittedly, the sentencing court, in imposing the fine, would have to consider how section 12.55.035(e)(3) of the Alaska Statutes would affect the company's ability to pay restitution to the DEC. However, if the company is large enough, it is easy to picture the court imposing the full fine. Penalties of this magnitude can *199 provide a strong incentive for organizations to resolve potential criminal liability quickly. [FN144]

Because criminal conduct exposes the organization to potentially substantial criminal penalties and negative publicity, an organization will often terminate or discipline the responsible employees, cooperate with investigating agencies, and may hire consultants for the design of new protocols to avoid similar mistakes in the future. These are all constructive steps moving forward from the misconduct and are factors a sentencing court is to consider in assessing a fine against an organization pursuant to section 12.55.035(e) of the Alaska Statutes.

B. Collateral Consequences

Collateral consequences triggered by a conviction will also be a powerful force shaping the course of many prosecutions. Organizations are generally required to report all pending liabilities in their annual financial statements. This typically includes pending criminal cases as well as any completed cases for which the organization is on probation. [FN145] Disclosure of a pending criminal case or conviction can be damaging to an organization's public image or reputation. The publicity from prosecution would likely tarnish the image of a company and undo any marketing efforts that the company previously undertook. Further, the prosecution would likely damage the company's image amongst stockholders, creditors and Wall Street analysts, causing significant financial repercussions.

Debarment is another significant collateral consequence. Both federal and state law allows the respective sovereigns to refuse to do business with organizations that have been convicted of or otherwise suspected of crimes or dishonest business practices. [FN146] At the federal level, the Environmental Protection Agency (EPA) is particularly vigilant in debarring organizations that are convicted or suspected of *200 environmental crimes. [FN147] Debarment is damaging because a large percentage of Alaska companies are the recipients of federal or state contracts. [FN148] The loss of these contracts can be financially crippling to companies. The State of Alaska also has legislative authority to debar companies but, unfortunately, rarely uses that power. [FN149]

© 2010 Thomson Reuters. No Claim to Orig. US Gov. Works.

By way of an example, consider a small bush air service that transports mail year round and a steady number of government biologists as passengers during the summer. If the company knowingly allows passengers to transport alcohol to local option dry communities [FN150] on its flights, it could be prosecuted for violations of Alaska's alcohol importation laws. [FN151] A conviction could potentially trigger federal or state debarment and thereby jeopardize the air service's ability to retain the mail or biologist travel contracts. This could constitute another financial blow to the company in addition to the fines or consequences that flow from the prosecution. [FN152]

*201 IV. Practical Considerations for Prosecutors

A. No Fifth Amendment Privilege

Prosecutors gain several practical advantages by filing charges against organizations as opposed to individuals. The first, and perhaps most significant, is that an organization does not have a Fifth Amendment right against self-incrimination. A prosecutor can use organizational agents as witnesses to testify about corporate practices or records. [FN153] In Amato v. United States, [FN154] the First Circuit, relying largely on the Supreme Court's decision in Braswell v. United States, [FN155] explained why the Fifth Amendment's protection against self-incrimination does not protect corporate records. [FN156]

The Alaska Supreme Court subscribed to the collective-entity doctrine in Pratt v. Kirkpatrick. [FN157] Citing many of the same cases relied upon in Amato, the court held that a records custodian for the financial records of a limited partnership could not rely upon the Fifth Amendment or Article I, section 9 of the Alaska Constitution to resist a subpoena for the partnership's financial records. [FN158] Importantly, the court found the self-incrimination protections provided by the Alaska Constitution were no broader than protections provided by the Fifth Amendment to the United States Constitution. [FN159]

Because of these principles, defense attorneys will be hard-pressed to successfully preclude the production of an organization's documents sought pursuant to a subpoena or search warrant. Organizations are prolific producers of documents, reports, memoranda, and email that evidence their decisions and actions. In the event of criminal conduct, *202 any such documents would be invaluable to the prosecution, as they may demonstrate the organization's knowledge or intent. At the very least, the documents can confirm the individual agent's intent or knowledge.

B. Avoiding Hearsay

Common hearsay problems can also be avoided if an organization rather than an individual is charged. Employee or agent statements regarding the conduct of the organization will be admissible against the organization should the declarant invoke a personal Fifth Amendment right not to testify or otherwise make him or herself unavailable for trial. The admissions of these agents are not hearsay if offered against the organization because the law imputes them to the organization itself; under Alaska Rule of Evidence 801(d)(2), the admissions are considered admissions of the party opponent. [FN160] This subsection excludes as non-hearsay statements that are made by an agent or servant concerning matters within the scope of that individual's agency or employment and made during the existence of the agency or employment relationship. This is a broadly interpreted exclusion [FN161] that encompasses a wide range of employee statements regarding employer practices, work conditions, and decision-making that frequently provide invaluable evidence for the prosecution.

C. Corporations Can Be Tried In Absentia

Corporations cannot ignore a summons to appear for arraignment. Pursuant to Rule 4(a)(3) of the Alaska Rules of Criminal Procedure, corporations that fail to appear may be tried in absentia. [FN162] The trial of an absent corporation would be a slam-dunk for the state. The prosecutor could admit evidence to the jury without objection. The *203 prosecutor could then ask the jury to convict a business which was perfectly happy to injure Alaska or Alaskans in some way but was unwilling to show up when invited to an Alaskan courtroom for its own trial. Assuming the prosecutor has presented sufficient evidence of the charged offenses, it is likely juries will feel little compunction in returning guilty verdicts. Upon conviction, the prosecutor could ask the judge to issue a judgment against the corporation and that judgment could be sent to the Attorney General's

© 2010 Thomson Reuters. No Claim to Orig. US Gov. Works.

Collection Section for collection.

D. Organizations Engender Less Sympathy

The criminal jury instructions commonly employed in Alaska state courts invariably include an instruction that directs the jury to disregard any sympathy for the defendant during its deliberations. [FN163] Nevertheless, any prosecutor will tell you that jurors rarely dispatch their obligations without sympathizing to some degree with the defendant. If an employee engages in improper conduct to primarily benefit his or her employer (as opposed to directly benefiting him or herself) or if the employee engages in conduct at the behest of his or her employer, jurors may be loathe to find the individual guilty of the offense. This problem is largely eliminated if the company is tried. Regardless of the factual scenario involved, juries are far less prone to feel sympathy for an organization. [FN164] Most often, the organization is a for-profit company, and juries realize their decision, like the organization's decision to engage in the criminal conduct, is a decision about money. Juries seem to struggle far less with the question of whether an organization should pay a fine than the question of whether an individual should go to jail.

*204 V. Charging Considerations

A. Factors to Weigh

The foregoing discussion is meant to illustrate that organizational criminal liability is very broad and has potential application to many situations. Nevertheless, these prosecutions can be complex and time intensive, and the outcome of any such prosecution is seldom, if ever, certain. It follows that a prosecution may not be warranted or be the best use of limited resources in every instance. A number of practical considerations should inform any decision to prosecute or not prosecute an organization.

Assuming the prosecutor believes he or she can prove all the elements of the potential charges, the foremost consideration is the prosecution's objective in pursuing the criminal charges against this organization. Key to this concern is the question of punishment. Is the goal to punish the organization? Is the goal to achieve restitution? Or is the goal to ensure future compliance by this organization or similarly-situated organizations? Most often the answer is a mixture of all three, but that is not always the case. If the organization is one that has few assets or no longer exists, the prosecution may yield a conviction and a fine or restitution order that cannot be collected. Alternatively, if the organization continues to operate and the conduct at issue could reoccur, or involves an activity that has not been monitored or heavily regulated in the past, a better result may be achieved through less adversarial means. Instead of a criminal prosecution, perhaps there is an administrative or civil remedy. [FN165]

In answering these questions, the prosecutor should consider the following factors. [FN166] The first and foremost consideration is whether the prosecution is deserved. Multiple factors will weigh on this determination, including whether the injury was caused by egregious or intentional conduct or a rogue employee, and the degree to which management was complicit in causing the injury. It will also be important to determine whether the conduct was an isolated violation or part of a series of violations, and if the organization knew the conduct was prohibited.

*205 These factors beg the question: is a prosecution warranted? A corollary to this question is the recognition that a criminal prosecution carries a significant stigma and is not warranted or necessary in every circumstance. With respect to considerations of practicality, the following factors should be evaluated and go to the central question of what can and will be achieved by prosecuting the organization:

First, will prosecution deter this organization? Answering this question will require analyzing the likelihood of significant penalties such as fines or probation. It will also mean determining if any illegal gains will be returned, and if the conduct gave the organization an advantage over its competitors. [FN167]

Second, will prosecution deter other similarly-situated organizations? Determining this means researching whether similarly-situated organizations exist and if the potential penalties would deter them. The penalties may also impact the industry as

© 2010 Thomson Reuters. No Claim to Orig. US Gov. Works.

a whole.

Third, will prosecution promote future compliance? Prosecutors must consider whether including a compliance program in the penalty would address the conduct at issue.

Fourth, is restitution owed to a broad range of entities or individuals? Considerations will include the necessity of prosecution to obtain restitution, the effectiveness of individual claims, and the ability of the organization to pay damages.

Finally, will a prosecution play well in the public's view? Prosecutors should determine whether the public will support legal action, an enforcement program more generally, and participate in such a program by reporting violations.

Depending on the answers to these questions, a prosecutor may determine that prosecution is not the best alternative. The best practice is to make this determination early and not to pursue prosecutions in situations not warranting the effort or resources.

To illustrate these points, consider as an example the potential prosecution of a bartender for selling alcohol to an underage patron. Faced with an underage "furnishing" crime, police officers will typically *206 cite the individual bartender for a Title 4 "furnishing" offense. [FN168] If convicted, and if a first-time offender, the bartender will likely receive a suspended imposition of sentence, a year's probation, and a small fine, assuming the prosecutor can convince a jury not to nullify the verdict. On the other hand, if there is a good reason to charge the bartender's employer--perhaps a large bar or restaurant--with the same Title 4 violation, that employer will face a much larger potential fine. If the employer has committed similar offenses through other employees, each of those incidents may be brought to the sentencing judge's attention and would powerfully bolster the prosecutor's sentencing case. Fines could be conditioned on the employer ensuring that its employees commit no further violations. The employer could also be affirmatively required to notify law enforcement officers of any and all future violations. [FN169] In addition, the court may require the employer to provide enhanced training for employees at their own expense. Prosecuting the employer is a better use of prosecutorial resources. Importantly, the prosecution of the employer provides a mechanism to prevent future, similar infractions by other employees. The employer will likely be more proactive in policing its employees and will be under an affirmative duty to report all future violations. Further, it is likely that other similar establishments or employers will take notice of the sentence and will likewise do a better job of policing their operations and employees. These would all be positive outcomes.

B. Case Study: Strategica Import-Export Financial Group, LLC

A four-defendant case recently prosecuted by the Office of Special Prosecutions, State v. Jeremy Oliver, [FN170] further illustrates why prosecutors should consider charging organizations and how they can use those prosecutions to achieve better case outcomes.

The case arose from a failed salmon processing facility in Ekuk, Alaska in 2004. [FN171] The failure was an economic disaster for the local economy. [FN172] None of the fishermen who had delivered fish to the facility *207 were paid for their catches and none of the workers who had worked at the facility were paid for their labor. [FN173] Jeremy Oliver, a young man with limited fishing and processing experience, had formed Wild Alaskan Seafood Company, LLC ("Wild Alaskan Seafood Company") for the purpose of the Ekuk processing venture. [FN174] Oliver was able to lease and open the Ekuk facility using financing brokered by Jay Enis, a Florida merchant banker. [FN175] Enis formed Strategica Import-Export Financial Group, LLC ("Strategica") for the purpose of financing the Ekuk salmon processing venture. [FN176] Oliver and Wild Alaskan Seafood Company hired dozens of workers to run the facility and accepted more than a million pounds of fish from the fishermen. [FN177] The venture failed before the fish could be processed, and very little of the fish was ever delivered to a purchaser. [FN178] The vast majority of the fish spoiled and ultimately had to be destroyed. [FN179] As a result, the fishermen and Ekuk processors were never paid. [FN180]

Alaska statutes criminalize the processing of adulterated seafood. [FN181] The offense is a class A misdemeanor. [FN182]

© 2010 Thomson Reuters. No Claim to Orig. US Gov. Works.

The state prosecuted all four defendants--Oliver, Wild Alaska Seafood Company, Enis, and Strategica--for this offense, as well as several additional, related offenses. [FN183] Ultimately, Oliver, Wild Alaskan Seafood Company and Strategica each pled guilty to a charge. [FN184] The court sentenced Oliver to serve 180 days in jail (with 140 days suspended) and to pay, along with Wild Alaskan Seafood Company, more than $56,000 in restitution to the fishermen and workers. [FN185] Because Oliver and Wild Alaskan Seafood *208 Company have few assets, [FN186] it is unlikely that much of this restitution will ever be paid. Oliver and Wild Alaskan Seafood Company were prosecuted to punish them for their misdeeds rather than to make the injured fishermen and workers whole. [FN187] The court ordered Strategica to pay more than $180,000 in restitution. [FN188] The state agreed to dismiss the charges against Enis in exchange for Strategica's plea and payment. [FN189] The case against Strategica was meant to prosecute that company for its misconduct, as well as to provide at least some restitution to the fishermen and workers.

Oliver was clearly the primary culprit of this scheme. Oliver came up with the plan to operate the Ekuk facility and was in charge when it failed. Nevertheless, once the scheme failed, Oliver and Wild Alaskan Seafood Company lacked assets and would never be able to pay much in restitution. Enis and Strategica had assets but were not as directly involved in the management and operation of the Ekuk facility. Thus, the question for the Office of Special Prosecutions was whether it could prove Enis and Strategica were criminally liable for the Ekuk failure and, if so, whether they warranted criminal prosecution. The answer to both questions was "yes." [FN190]

Strategica's conduct was egregious. Enis and Strategica had no experience in the Alaska seafood industry. Nevertheless, with little due diligence and equally little oversight, Strategica provided Wild Alaskan *209 Seafood Company with $650,000 in financing for a risky venture [FN191] that would operate in a remote locale more than five thousand miles from Strategica's location in Miami. [FN192] Strategica enabled Oliver and Wild Alaskan Seafood Company by providing the financial means for them to launch the Ekuk facility. Thereafter, Strategica did little to oversee their operations or to ensure their success. This conduct was careless, it was intentional, and it had a devastating impact on the Ekuk fishery and the local economy.

Practical considerations also supported the decision to prosecute Strategica. Most importantly, the State believed prosecution would be the most effective way to collect restitution for the fishermen and workers. More than a hundred, perhaps more than two hundred, people were financially injured due to the Ekuk failure. [FN193] While some of these people filed civil actions against the defendants, those suits made little progress and, even if successful, stood to benefit a small number of individuals. In contrast, a criminal prosecution could recover restitution for all those who did not get paid. Of the potential defendants, only Enis and Strategica had any real financial resources. [FN194] Therefore, it was important that Strategica be prosecuted.

Additionally, the prosecution of Strategica would play well in the realm of public opinion. Strategica was a company that recklessly entered the state fishing industry to make a profit for out-of-state investors and ended up causing significant financial injuries to many Alaskans. In addition to the direct financial losses inflicted on the Ekuk fishermen and workers, Strategica's actions could have inflicted significant harm to the reputation of Alaskan salmon. The Alaska seafood industry relies on the high reputation of "wild Alaskan salmon" to market its product and has spent years and millions of public relations dollars to build up that reputation. [FN195] If some of the damaged Ekuk salmon had actually made it into the marketplace and sickened unsuspecting consumers, the reputation and marketability of Alaskan salmon would have been dealt a significant blow. Considering the *210 reckless manner in which Strategica acted to enable and finance Oliver and Wild Alaskan Seafood Company, the State believed the Alaskans would overwhelmingly support Strategica's prosecution and the Department of Environmental Conservation's continued efforts to regulate seafood processing facilities.

Finally, the State believed prosecuting Strategica would serve as a deterrent to future reckless investment in the Alaska seafood industry by outside entities. The prosecution resulted in significant financial penalties-- the restitution payment--and would receive significant publicity. This result would certainly deter Strategica from future similar conduct and, it is hoped, would deter other similarly situated entities from doing anything similar.

Conclusion

© 2010 Thomson Reuters. No Claim to Orig. US Gov. Works.

The ability to file criminal charges against an organization in addition to, or in lieu of, charges against individual agents is a powerful tool available to prosecutors. The prosecution of organizations must be considered, whenever feasible, to deter future wrongdoing. Furthermore, it is far more efficient to prosecute the organization that controls a large number of agents engaging in prohibited conduct rather than prosecuting each agent individually.

Prosecuting the organization makes sense for a variety of additional reasons. First, significant criminal fines can be imposed against organizations. Second, organizations--rational entities with a bottom line and a strong preference against negative publicity--tend to be prosecution averse. This fact is good news for the prosecution because it means a trial can be avoided and constructive changes can be implemented as part of any resolution. [FN196] Third, organizations enjoy fewer constitutional protections than do individual defendants and, as such, can make use of fewer evidentiary rules to limit the prosecution's evidence. Lastly, the prosecution of an organization as well as individual defendants could strengthen the prosecution's hand during plea negotiations. The organization may be persuaded to accept a plea in ***211** return for dismissal against certain individual officers, or vice-versa. By charging both, the prosecution increases its options for a successful and beneficial resolution.

Several potential explanations for why Alaska prosecutors rarely charge organizations for the criminal conduct of their agents are proffered in the introduction. None satisfactorily explain this phenomenon. Yes, such prosecutions will likely differ in some respects from the prosecution of individual defendants. Yes, organizational defendants may hire experienced defense counsel. And yes, such prosecutions might, in some cases, penalize stockholders who did not know about the wrongdoing. But these drawbacks, to the extent they are legitimate at all, are insignificant compared to the potential benefits that such prosecutions can realize. Quite simply, prosecutors should file charges against organizations more frequently. Such change may not happen quickly; nonetheless, it is time to adjust course and to start looking more closely at organizational targets. Successful criminal prosecutions of organizations can be a significant deterrent that causes organizations to take significant steps to better monitor the behavior of their agents and to prevent criminal conduct in the course of their operations.

[FN40]. 68 Mass. (2 Gray) 339, 345-46 (1854) (holding that a corporation could be prosecuted for misfeasance and nonfeasance crimes committed by its agents if committed in the scope of the agent's employment and to benefit the corporation).

[FN41]. Interestingly, a Ninth Circuit court hearing an appeal on an Alaska case expressed some reservations about applying the theory of respondeat superior to impute criminal intent to a corporation. In Empire Printing Co. v. Roden, 247 F.2d 8 (9th Cir. 1957), a case concerning libel claims brought by the former territorial governor, treasurer and highway engineer against a Juneau newspaper, the court provided dicta on point. The court of appeals stated that the doctrine of respondeat superior does not generally apply to impose criminal liability because the requisite mens rea cannot be inferred through agency relationships. Id. at 17.

[FN42]. Alaska Crim. Code Rev. Introduction at 11-14 (Preliminary Report 1976). The Commission was made up of legislators, lawyers, judges, law enforcement officers, and correctional agency personnel. Id. at 11.

[FN43]. See id. at 115-16. The original version of the statute considered by the Criminal Code Revision Commission was based on Or. Rev. Stat. § 161.170 (1971) and was similar to N.Y. Penal Law § 20.20 (1965) and Model Penal Code § 2.07 (1962). Id., Commentary at 1116 (Preliminary Report 1976).

[FN44]. See id.

[FN45]. See id.

[FN46]. Alaska Crim. Code Rev., Part 2 at 27-28 (Tentative Draft 1977). The Commentary explains this change: "[T]he considerations which support holding corporations liable for crimes apply equally to organizations which happen to be unincorporated. This conclusion is embodied in the Proposed Federal Criminal Code § 402 and the Revised Arkansas Criminal Code § 41-402." Id. at 37.

[FN47]. Id. at 36. The definition did not include "government" in the list of included entities; the legislature added that term in 1982. H.C.S. C.S.S.B. 535, 12th Leg., 2d Sess. (Alaska 1982).

[FN48]. See id. (emphasis in original) (explaining the Commission's intent in making this change was to "expand the principle of respondeat superior on an organization" under either scenario).

[FN49]. S.C.S. C.S.H.B. 661, 10th Leg., 2d Sess. (Alaska 1978).

[FN50]. See State v. ABC Towing, 954 P.2d 575, 577 (Alaska Ct. App. 1998).

© 2010 Thomson Reuters. No Claim to Orig. US Gov. Works.

[FN51]. Alaska Stat. §01.10.060(a)(8) (2006) ("'[P]erson' includes a corporation, company, partnership, firm, association, organization, business trust, or society, as well as a natural person.").

[FN52]. Alaska Stat. § 11.16.130 (2006).

[FN53]. 954 P.2d 575 (Alaska Ct. App. 1998).

[FN54]. See id. at 576-77.

[FN55]. See id.

[FN56]. Alaska Stat. § 11.81.900(b)(43) (2006). The definition does not include "sole proprietorship." The court of appeals interprets this omission to mean the legislature did not intend to expose such entities to criminal liability in their own right. To the contrary, a sole proprietorship is the alter ego of the sole proprietor and therefore any charges must be alleged against the sole proprietor in his or her individual capacity. ABC Towing, 954 P.2d at 577-78.

[FN57]. 1 William Mead Fletcher et al., Fletcher Cyclopedia of the Law of Private Corporations §§ 1-5 (rev. vol. 2006). The common law fostered this purpose; it did not expose organizations to criminal liability. N.Y. Cent. & Hudson River R.R. Co. v. United States, 212 U.S. 481, 492-93 (1909).

[FN58]. 467 F.2d 1000, 1006 (9th Cir. 1972) (internal citations omitted), cert. denied, 409 U.S. 1125 (1973). The court continued: "Moreover, the strenuous efforts of corporate defendants to avoid conviction, particularly under the Sherman Act, strongly suggests that Congress is justified in its judgment that exposure of the corporate entity to potential conviction may provide a substantial spur to corporate action to prevent violations by employees." Id.

[FN59]. See Steere Tank Lines, Inc. v. United States, 330 F.2d 719, 721 (5th Cir. 1963) ("It is now beyond doubt that a corporation may be held criminally liable.").

[FN60]. That this is the most typical mode of organizational criminal liability is not surprising. Most organizations, do not typically solicit, ratify, adopt criminal conduct, or fail to do something required by law. Alaska Stat. § 11.16.130(a)(1)(B)-(a)(2) (2006).

[FN61]. It was briefly commented on in a third case, Stock v. State, 526 P.2d 3 (Alaska 1974).

[FN62]. 954 P.2d 575 (Alaska Ct. App. 1998).

[FN63]. Id. at 579.

[FN64]. Id. at 577-78.

[FN65]. Further discussion regarding this holding is beyond the scope of this article. However, the author takes issue with the court's reasoning because it needlessly insulates sole proprietorships from criminal liability where one of its agents commits a wrong in furtherance of a business enterprise. The legislature should fix this omission by amending the "organization" definition to specifically include sole proprietorships. See supra note 60 and accompanying text.

[FN66]. 187 P.3d 499 (Alaska Ct. App. 2008).

[FN67]. Id. at 500.

[FN68]. Id.

[FN69]. Id. at 503-11. The district court also granted a motion for acquittal propounded by the captain of the Arctic Sunrise who had also been convicted. Id. The court of appeals affirmed as to the first count but reversed as to the second. Id.

[FN70]. Id. at 505.

[FN71]. "Stichting" is the Dutch word for "foundation." Id. at 500.

[FN72]. Id. at 501.

[FN73]. Id. at 504.

[FN74]. Id.

[FN75]. Id.

[FN76]. Id. at 505.

[FN77]. See id. at 504. The State further argued that Greenpeace, Inc., Greenpeace International, and SMS were all the same organization but were constructed as separate entities as part of a "shell game" to avoid liability. The court disagreed with this argument as well. Id.

[FN78]. Id. at 505.

[FN79]. See id. at 505-06; see also Alaska Stat. § 11.16.130(a)(1)(B) (2006).

[FN80]. Id. at 506.

[FN81]. Id. This was a somewhat curious conclusion considering the fact that Greenpeace, Inc.'s chief financial officer was on board the Arctic Sunrise at the time of the infractions.

[FN82]. See id. ("It was SMS, not Greenpeace, Inc., that hired and paid for the ship's agent in Portland.... [I]t was SMS's obligation to comply with regulatory requirements for the vessel.").

[FN83]. See Alaska Crim. R. 4(c)(2) (making service difficult by limiting the service of a summons to places "within the jurisdiction of the State of Alaska"); see also Alaska Stat. § 10.06.763 (2006) (service on foreign corporations); Alaska Stat. §10.20.046 (2006) (service on not-for-profit corporations); Alaska Stat. §10.40.130 (2006) (service on religious corporations); and Alaska Stat. §10.50.065 (2006) (service on limited liability companies). But see Alaska Stat. §§10.06.175(b), 06.765 (2006) (allowing the Alaska Commissioner of Commerce, Community and Economic Development to be served if a corporation fails to appoint or maintain a registered agent in the state).

[FN84]. In fact, Alaska's jurisdiction is quite broad. Under section 44.03.010 of the Alaska Statutes, state territorial jurisdiction extends to waters offshore and encompasses the "high seas" to the extent the United States exercises its jurisdiction. The Alaska Supreme Court has interpreted this provision broadly to include all ocean waters seaward of the Alaska coast. See State v. Jack, 125 P.3d 311, 315-16 (Alaska 2005) (allowing defendant to be prosecuted in Alaska for sexual assault that took place onboard

© 2010 Thomson Reuters. No Claim to Orig. US Gov. Works.

an Alaska Marine Highway ferry while in Canadian waters during a voyage between Alaska and Washington). Arguably, both entities would have sufficient contacts with the State of Alaska, based on the sailing and operation of the Arctic Sunrise in Alaska waters, to make them subject to the personal jurisdiction of a state court. See Int'l Shoe Co. v. Wash., 326 U.S. 310, 317-19 (1945) (holding contacts exist when the in-state activities of the corporation give rise to the liabilities at issue, or the corporation fails to satisfy obligations that exist due to its in-state activities); Kuk v. Nalley, 166 P.3d 47, 51 (Alaska 2007) (explaining that International Shoe and its progeny significantly broadened the understanding of personal jurisdiction).

[FN85]. See 954 P.2d 575, 577-79 (Alaska Ct. App. 1998). The ABC Towing decision is unsatisfying. Id. The court of appeals favorably compared sole proprietorships and partnerships--both are the alter egos of the proprietor or partners, both exist solely to carry out the business purpose for which they were created, and both are not common law "legal entities." Id. Nevertheless, the court interprets the definition of "organization" in a way that treats the two entities differently, i.e., partnerships can be prosecuted, sole proprietorships cannot. Id. The ruling is defensible from a statutory construction standpoint, but it is unsatisfactory from a public policy standpoint. The same policy arguments that support the prosecution of partnerships for criminal offenses apply to sole proprietorships. See id. There is no reason these entities should be treated differently.

[FN86]. See supra notes 63-81 and accompanying text.

[FN87]. See State v. Lee, 999 P.2d 755, 761 (Alaska 2000) (noting Alaska courts use federal Sherman Act cases to construe Alaska antitrust law); State v. Abbott, 498 P.2d 712, 717 (Alaska 1972) (holding where no Alaska cases are on point, court may rely on federal cases that discuss a similarly worded federal statute); Langfeldt-Haaland v. Saupe Enter., Inc., 768 P.2d 1144, 1147 (Alaska 1989) (Moore, J., dissenting) (noting Alaska courts rely on interpretations of federal rules when interpreting a similarly worded Alaska rule).

[FN88]. See, e.g., Braswell v. United States, 487 U.S. 99, 110 (1988) (citing Bellis v. United States, 417 U.S. 85, 90 (1974)).

[FN89]. Meyer v. Holley, 537 U.S. 280, 285 (2003); Burlington Indus., Inc. v. Ellerth, 524 U.S. 742, 756 (1998); see also N.Y. Cent. & Hudson R.R. v. United States, 212 U.S. 481, 494 (1909) ("[A] corporation is held responsible for acts not within the agent's corporate powers strictly construed, but which the agent has assumed to perform for the corporation when employing the corporate powers actually authorized, and in such cases there need be no written authority under seal or vote of the corporation in order to constitute the agency or to authorize the act.").

[FN90]. United States v. Philip Morris USA, Inc., 449 F. Supp. 2d 1, 892-93 (D.D.C. 2006) ("[I]f a corporate agent exercises the authority conferred upon him and performs an act within the course of his employment, the corporation is liable--even if the act was unlawful or was done contrary to instructions or policies, as long as the agent acted with an intent to benefit the corporation."); United States v. Cincotta, 689 F.2d 238, 241-42 (1st Cir. 1982) ('[C]riminal liability may be imposed on the corporation only where the agent is acting within the scope of his employment. That, in turn, requires that the agent be performing acts of the kind which he is authorized to perform, and those acts must be motivated--at least in part--by an intent to benefit the corporation.').

[FN91]. United States v. Hilton Hotels Corp., 467 F.2d 1000 (9th Cir. 1972); see also Bank of U.S. v. Deveaux, 9 U.S. (5 Cranch) 61 (1809); Louisville, Cincinnati & Charleston R.R. Co. v. Leston, 43 U.S. (2 How.) 497 (1844).

[FN92]. 467 F.2d 1000 (9th Cir. 1972).

[FN93]. Id. at 1002.

[FN94]. Id. at 1005.

[FN95]. Id. at 1007 (affirming trial court's ruling excluding a jury instruction that precluded criminal liability where the employee's acts were unauthorized by the corporation).

© 2010 Thomson Reuters. No Claim to Orig. US Gov. Works.

[FN96]. Id. ("The purchasing agent was authorized to buy all of appellant's supplies. Purchases were made on the basis of specifications, but the purchasing agent exercised complete authority as to the source. He was in a unique position to add the corporation's buying power to the force of the boycott. Appellant could not gain exculpation by issuing general instructions without undertaking to enforce those instructions by means commensurate with the obvious risks.").

[FN97]. In United States v. Potter, 463 F.3d 9 (1st Cir. 2006), the First Circuit squarely rejected an argument that a corporation might fend off liability by adopting abstract rules that no agent can make an unlawful price-fixing contract or that no driver may exceed the speed limit. Id. at 25-26 (citing United States v. Automated Med. Labs., Inc., 770 F.2d 399, 406 & n. 5 (4th Cir. 1985)). Thus, a corporation may be charged and convicted, even if there is a specific company directive forbidding the questioned acts. The court explained that this is simply an extension of familiar agency law principles: the principal is held liable for acts done on its account by an agent which are customarily actions the agent is authorized to perform. Potter, 463 F.3d at 26 (citing H. Reuschlein & Gregory, The Law of Agency and Partnership 167 (1990) (footnote omitted)).

The Fourth Circuit adopted very similar reasoning in United States v. Basic Constr. Co., wherein it rejected a corporation's attempt to insulate itself from liability using evidence that the corporation had expressly forbidden the conduct at issue. 711 F.2d 570, 573 (4th Cir. 1983), cert. denied, 464 U.S. 956 (1983).

The Restatement (Second) of Agency explains the general rule these decisions expound by way of an illustration: P directs the salesman in selling guns, never to insert a cartridge while exhibiting a gun. A, a salesman, does so, and negligently harms a bystander. Notwithstanding P's instructions otherwise, the salesman's act is within the scope of employment. Restatement (Second) of Agency § 230, illus. 1 (1958) (forbidden acts).

[FN129]. See id. at 95 n.4. (citing Hood Bros. Partners, L.P. v. USCO Distrib. Servs. Inc., 140 F.3d 1386, 1387-88 (11th Cir. 1998) (finding that a survival statute extended the life of a corporation for litigation purposes)).

[FN130]. Alaska Stat. § 10.06.678(a)-(b) (2006).

[FN131]. Gossman, 973 P.2d at 95-99. If Gossman were to obtain a judgment against Greatland, he could seek to recover the damages from Anadrill because Anadrill purchased all of Greatland's liabilities. Id. at 99.

[FN132]. 359 U.S. 271 (1959).

[FN133]. See Odom v. Lee, 999 P.2d 755, 761 (Alaska 2000) (Alaska courts use federal Sherman Act cases to construe Alaska antitrust law); see also State v. Abbott, 498 P.2d 712, 717 (Alaska 1972) (where no Alaska cases on point, court may rely on federal cases discussing similarly worded federal statute).

[FN134]. See United States v. Polizzi, 500 F.2d 856, 908 (9th Cir. 1974) (Duniway, J. concurring); People v. Boyce, 509 N.E.2d 776, 778 (Ill. App. 2d Dist. 1987); People v. Pymm Thermometer Corp., 591 N.Y.S.2d 459, 460 (N.Y. App. Div. 1992).

[FN135]. See Univ. of Alaska v. Thomas Architectural Products, Inc., 907 P.2d 448, 450 (Alaska 1995) (recognizing that Washington survival statutes supplant the common law rule of abatement and prolong the life of a corporation so that it can be sued); Hartwell v. State, 423 P.2d 282, 283 (Alaska 1967).

[FN136]. Gossman, 973 P.2d 95-99.

[FN137]. See id. Under Alaska law, corporations, prior to dissolution, must provide for their outstanding liabilities by purchasing liability insurance, setting aside assets, or having a successor assume its liabilities. Id. at 99 (citing §§Alaska Stat. 10.06.620(2), 06.668(1)). Anadrill had assumed all of Greatland's liabilities and this would include any judgment plaintiff Gossman obtained from his lawsuit. Id. The State would face a similar situation if it successfully prosecuted a dissolved corporation. Depending on how the corporation provided for its post-dissolution liabilities, the State may try to collect the penalties imposed against an insurance policy, against a successor corporation, or against a finite pool of assets set aside prior to the corporation's dissolution. In that final scenario, the assets might be insufficient, particularly if the corporation left numerous creditors, and the State could get stuck with a judgment it cannot collect (or not easily collect without some veil-piercing litigation).

[FN138]. Alaska Stat. §10.20.450 (2006).

[FN139]. Alaska Stat. §10.50.440 (2006).

© 2010 Thomson Reuters. No Claim to Orig. US Gov. Works.

[FN140]. Melrose Distillers, Inc. v. United States, 359 U.S. 271, 274 (1959) (holding that corporations cannot be sent to jail, they can only be fined).

[FN141]. Under section 12.55.035(c)(1) of the Alaska Statutes, an organization can be fined up to a million dollars for felony offenses or misdemeanor offenses that result in death, up to two hundred thousand dollars for Class A misdemeanor offenses, up to twenty five thousand dollars for Class B misdemeanor offenses, and up to ten thousand dollars for violations. Alternatively, greater fines can be imposed under sections 12.55.035(c)(2) or (3) of the Alaska Statutes, which allow for fines up to three times the pecuniary gain realized, or three times the damages caused by the offense.

[FN142]. Alaska Stat. §12.55.035(e) (2006).

[FN143]. The court considers a defendant's prospects for rehabilitation, the need to confine or isolate the defendant to prevent further public harm, the extent to which the sentence to be imposed will deter the defendant as well as other members of the community from future criminal conduct, and the extent to which the sentence will reaffirm societal norms or the community's condemnation of the conduct. See Alaska Stat. § 12.55.005; State v. Chaney, 477 P.2d 441, 443 (Alaska 1970).

[FN144]. Defense attorneys commonly argue that the State should not seek the full measure of fines authorized by section 12.35.055 of Alaska Statutes because doing so would preclude the organization from devoting resources to correct the problem that led to the violation, or to pay restitution. This is a fair argument in many instances.

[FN145]. Probation is imposed by the sentencing court and can be up to ten years. Alaska Stat. § 12.55.090(c) (2006).

[FN146]. In response to Congressional oversight hearings regarding the mismanagement of federal contracts, the Office of Management and Budget developed a government-wide debarment and suspension system in the early 1980s. See Brief History of EPA's Debarment Program, http:// www.epa.gov/ogdunix1/sdd/history.htm (last visited Oct. 9, 2008).

[FN147]. The EPA is statutorily required to debar companies convicted of violations of section 508 of the Clean Water Act or section 306 of the Clean Air Act. The EPA also has the discretionary authority to suspend or debar companies based on indictments, information or adequate evidence involving environmental crimes, contract fraud, embezzlement, theft, forgery, bribery, poor performance, non-performance, or false statements. See Suspension and Debarment Program, http://www.epa.gov/ogdunix1/sdd/debarment.htm (last visited Oct. 10, 2008.) Other executive branch agencies also have the authority to suspend and debar.

[FN148]. Based on the Author's anecdotal observations that the federal government is very active in Alaska and therefore contracts with many Alaskan companies for services and products.

[FN149]. While the state has legislative authority to debar entities, it rarely does so. State debarment is controlled by sections 36.30.635-36.30.685 of the Alaska Statutes. The grounds for debarment are set out in section 36.30.640 of the Alaska Statutes and include a broad range of unethical or fraudulent conduct. Nevertheless, these consequences are rarely, if ever, invoked. In response to an inquiry to the Alaska Department of Law, the Department told the Author of only one state suspension or debarment matter. In the Author's view, the State, by failing to more proactively utilize its debarment authority, forgoes a powerful deterrence tool.

[FN150]. Communities can elect to ban the sale or possession of alcohol. Alaska Stat. § 4.11.491 (2006).

[FN151]. The Alaska Statutes criminalize such conduct. Alaska Stat. §§ 4.11.499, 16.200(e) (2006).

[FN152]. Significantly, the plane used to illegally transport the alcohol could be subject to forfeiture. Alaska Stat. §

© 2010 Thomson Reuters. No Claim to Orig. US Gov. Works.

4.16.220(a)(3) (2006).

[FN153]. This presumes the agent does not have a personal Fifth Amendment right to assert.

[FN154]. 450 F.3d 46 (1st Cir. 2006).

[FN155]. 487 U.S. 99 (1988).

[FN156]. 450 F.3d at 49-50 (holding that the Fifth Amendment privilege is a personal privilege enjoyed only by individuals). The Fifth Amendment's privilege "'is designed to prevent the use of legal process to force from the lips of the accused individual the evidence necessary to convict him or to force him to produce and authenticate any personal documents or effects that might incriminate him.'" Id. (quoting United States v. White, 322 U.S. 694, 698 (1944)). This is true even if the records incriminate the custodian personally. Id. (citing Bellis v. United States, 417 U.S. 85, 88 (1974)).

[FN157]. 718 P.2d 962, 967-68 (Alaska 1986).

[FN158]. See id. at 968.

[FN159]. Id. ("While we are not limited by the federal courts in interpreting our own constitution, in this instance we are not persuaded by [the appellant's] arguments to interpret the Alaska self-incrimination provision more broadly than the federal courts have construed the fifth amendment.").

[FN160]. See also United States v. Petraia Mar., Ltd., 489 F. Supp. 2d 90, 94-99 (D. Me. 2007) (discussing the analogous provision under the federal rules).

[FN161]. See Klawock Heenya Corp. v. Dawson Constr., 778 P.2d 219, 220 (Alaska 1989) (the exclusion covers statements that "merely 'concern' the employee's duties" (citations omitted)).

[FN162]. The rule provides, "[i]f a defendant corporation fails to appear after being duly summoned, a plea of not guilty shall be entered by the court if the court is empowered to try the offense for which the summons was issued and the court may proceed to trial and judgment without further process." Alaska R. Crim. Proc. 4(a)(3). The rule does not define "corporation" and the author is not aware of any case that interprets this rule. Admittedly, a court could interpret "corporation" to be narrower than the term "organization" as it is used in section 11.16.130 (2006) of the Alaska Statutes. It is therefore unclear whether other types of organizations could be tried in absentia.

[FN163]. Alaska Pattern Jury Instruction 1.07, "Evaluation of Evidence," is one such example. It instructs jurors "not be influenced by sentiment, prejudice, passion or public opinion" in evaluating the evidence. Criminal Pattern Jury Instruction Committee, Pattern Jury Instruction 1.07, available at http://www.state.ak.us/courts/ins/1.07.doc.

[FN164]. This is true notwithstanding Alaska Pattern Jury Instruction 1.48, "Corporate Defendant," which instructs juries not to treat a corporate defendant any differently than it would an individual defendant. Criminal Pattern Jury Instruction Committee, Pattern Jury Instruction 1.48, available at http://www.state.ak.us/courts/ins/1.48.doc.

[FN165]. To be sure, if such options exist, defense counsel will suggest it to the prosecution.

[FN166]. This list is not exhaustive or universally applicable. Depending on the circumstances, other factors not listed may be relevant and some listed factors may be irrelevant.

[FN167]. A sentencing court may suspend criminal fines for the period of probation. Alaska Stat. §§12.55.080, 12.55.090

© 2010 Thomson Reuters. No Claim to Orig. US Gov. Works.

(2006). Such "suspended fines" are used as a "hammer" to force a defendant to comply with the conditions of probation the court imposes. If, during the probation period, the defendant does not comply with these conditions, the prosecution can petition the sentencing court to revisit the sentence and impose all or a portion of the sentence that was suspended. Those determinations are made by the trial judge pursuant to a preponderance of the evidence standard. See Wallace v. State, 829 P.2d 1208, 1210 (Alaska Ct. App. 1992); Andrew v. State, 835 P.2d 1251, 1254 (Alaska Ct. App. 1992).

[FN168]. Alaska Stat. §4.16.051 (2006).

[FN169]. As explained supra Part IV.A, organizations do not have Fifth Amendment protection and may be compelled to make statements against their interest.

[FN170]. These defendants were prosecuted as codefendants under case numbers 3DI-07-016CR, 3DI-07-017CR, 3DI-07-018CR, 3DI-07-019CR, respectively (Alaska Dist. Ct. information filed Jan. 5, 2007).

[FN186]. Information at 8-11, State v. Strategica Imp.-Exp. Fin. Group, LLC, 3DI-07-018CR (Nov. 26, 2007).

© 2010 Thomson Reuters. No Claim to Orig. US Gov. Works.

[FN187]. Though Oliver had few assets, there was a financial interest that the Author suspects prompted Oliver to plea the case on his behalf and on behalf of Wild Alaskan Seafood Company. When Oliver formed that company, he included his father Michael, a real estate agent in California, as a member. Information at 7, State v. Strategica Imp.-Exp. Fin. Group, LLC, 3DI-07-018CR (Nov. 26, 2007). Oliver's father had assets and was troubled about his potential financial exposure for the company's liabilities. The father signed off on the plea agreement for Wild Alaskan Seafood Company on the understanding that he would not be a prosecution target and would most likely not have to personally satisfy the restitution judgment entered against Wild Alaskan Seafood Company. Michael Oliver Aff., State v. Wild Alaska Seafood, LLC, 3DI-07-016CR.

[FN188]. State v. Strategica Imp.-Exp. Fin. Group, LLC, 3DI-07-018CR (Alaska Dist. Ct. judgment entered Nov. 26, 2007). Strategica's restitution was paid up-front. The plea agreement required Strategica to pay the total restitution amount prior to the company's change of plea and sentencing. Id.

[FN189]. State v. Enis, 3DI-07-019CR (Alaska Dist. Ct. dismissal signed Nov. 23, 2007).

[FN190]. Both Enis and Strategica warranted prosecution for the same reasons. The discussion herein is limited to Strategica because of the focus of this article on organizational criminal liability.

[FN191]. Salmon processing is by its very nature a risky undertaking. Catches, and the market, vary from year to year and can always be impacted by factors--fish counts, weather events, economic uncertainties--that are beyond anyone's control.

[FN192]. Information at 6-8, 11, State v. Strategica Imp.-Exp. Fin. Group, LLC, 3DI-07-018CR (Nov. 26, 2007).

[FN193]. Id. at 18.

[FN194]. Id. at 8.

[FN195]. See, e.g., Press Release, Sarah Palin, Governor, State of Alaska, Palin Asks for Changes to Fish Farm Proposal (Apr. 4, 2007), available at http://gov.state.ak.us/archive-51004.html.

[FN196]. For example, in pollution cases, resolutions often require defendant companies to implement environmental compliance management systems-- detailed plans that dictate the specific procedures and safety measures the company is required to implement for a period of time. These compliance agreements are typically more stringent than any planning or contingency plan requirements imposed by statute or regulation. In other words, to resolve the criminal charges, organizations will agree to be far more proactive in guarding against future infractions. Such agreements are not only helpful, but also provide good publicity for both the organization and the prosecution.

REPRESENTATIVE PEGGY WILSON
HOUSE DISTRICT 2

SPONSOR STATEMENT
House Bill 356
"An Act making a special appropriation to the transportation infrastructure fund; and providing for an effective date."

HB 356 will appropriate $1,000,000,000 to the Alaska Transportation Infrastructure Fund (ATIF). In addition it will receive the revenue generated from fuel tax and vehicle registration. There are a number of issues that are affecting our statewide transportation systems adversely and justify the existence of this fund. A large seed amount is necessary because Alaska currently has a $16,000,000,000 backlog in transportation projects and $763,000,000 in deferred maintenance according to DOT.

The fund will provide 6% POMV on June 30th every year as well as 50% of the revenue earned from fuel and vehicle registration taxes for appropriation. It will be the responsibility of Department of Revenue to invest the fund consistent with using 6% POMV per year.

In FY10 87% of our transportation budget came from the federal government. The current federal reauthorization legislation has already expired and is being extended month to month until new legislation can be passed. The new federal reauthorization bill is unfavorable for states with small populations by emphasizing mass transit and green transportation. There aren't enough cars on the road, people on the ferries or residents landing at our airports to generate the economy of scale that is needed under the proposed new reauthorization.

The roads, bridges, airports, ferries and transit systems that make up our state's transportation system are essential to mobility, commerce and economic development. This system enhances economic competitiveness, increases safety and enhances quality of life. To ensure Alaska has the infrastructure necessary to develop our resources as well as provide a quality of life for its citizens we must commit to funding transportation.

Prepared: 8/20/09

Note: The projections in the FY 2011 10-year plan are intended to be a planning tool and do not represent a commitment by the Administration to propose spending at a particular level in FY2010, FY2011 or any future year.

Department of Transportation & Public Facilities Ten Year Expenditure Plan

Mission: ***Provide for the safe movement of people and goods and the delivery of State services.***

Department priority programs define the three operational aspects of meeting our mission and cross all programs within the department.

Maintenance & Operations of State Transportation Systems is important to the safety of public use of the state's transportation systems; supports economic development in terms of travel industry, general public, and commercial vehicle transportation, etc.

Measurement Standards/Commercial Vehicle Enforcement reduces the risk of accidents or road damage from unsafe commercial vehicles and/or loads.

Transportation & Facilities Construction Program provides the planning and management of construction projects across the department. This includes major repair and rehabilitation of all transportation modes, and state owned facilities, operated and maintained by the State of Alaska.

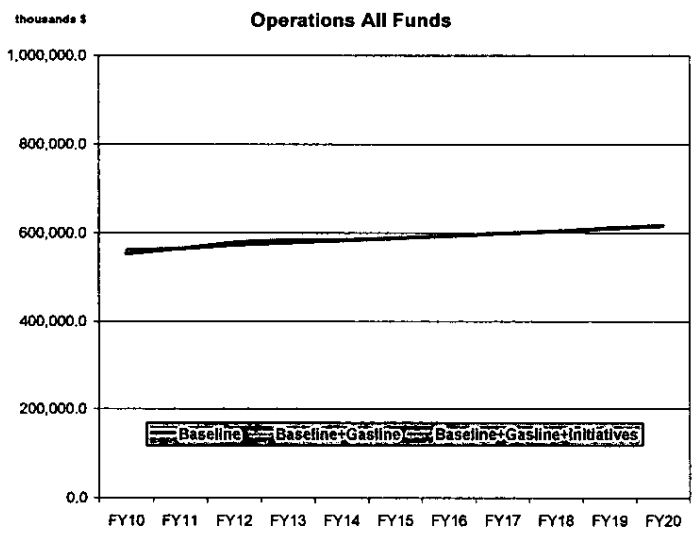
Transportation systems include Airports, Alaska Marine Highway System, Highways, Ports and Harbors, State Equipment Fleet, and related Public Facilities.

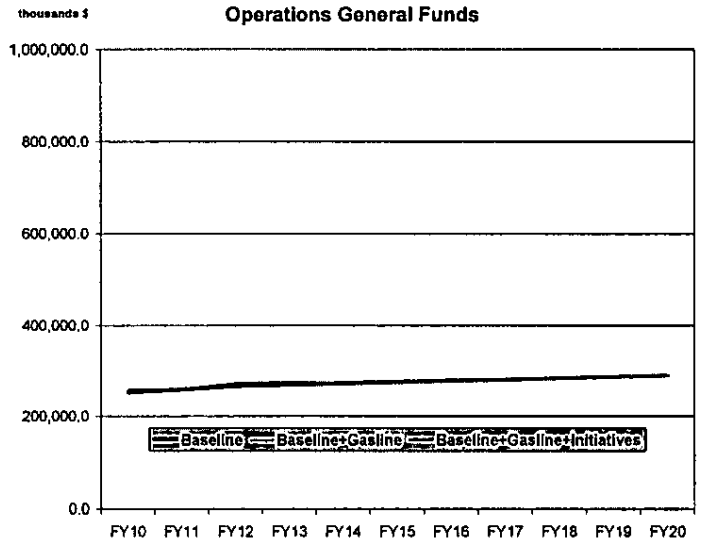
The following document provides an estimate of the Department's anticipated budget changes over the next ten years. These estimates are based on information known at the time and many variables can impact current and out-year projections. For instance, the uncertainty involved in projecting federal project funding streams for major capital programs is still unknown at this time. This is a major area of capital funding for the department and can make a significant difference in how a ten-year view will look. As a result, the assumptions and numbers that make up the following plan will continue to change as new information becomes available.

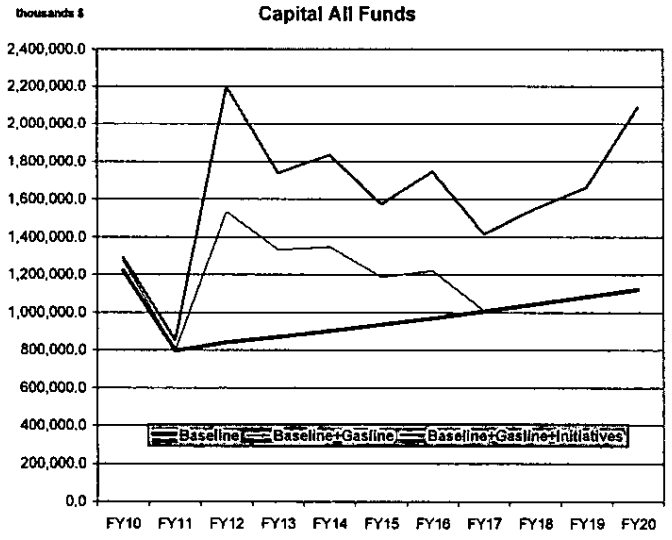
Information on assumptions that were used in developing this plan is included in this packet following the ten year projection.

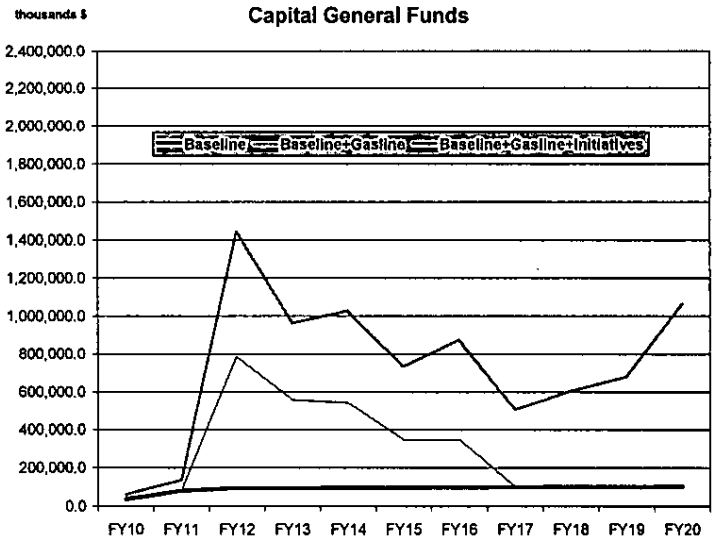
Note: The projections in the FY 2011 10-year plan are intended to be a planning tool and do not represent a commitment by the Administration to propose spending at a particular level in FY2010, FY2011 or any future year.

Transportation and Public Facilities



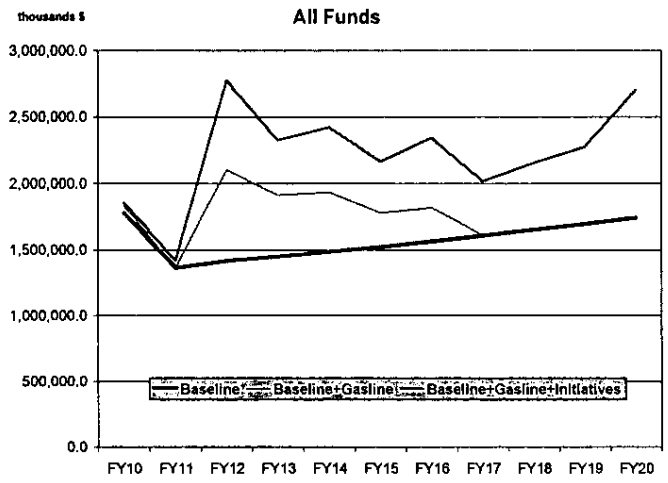


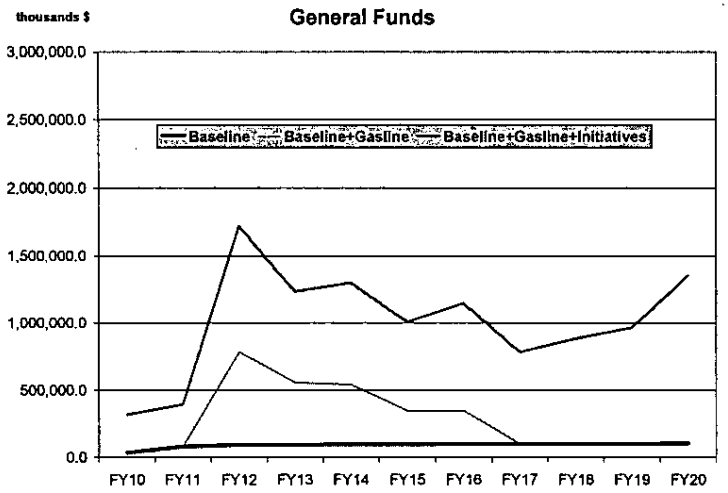




Note: The projections in the FY 2011 10-year plan are intended to be a planning tool and do not represent a commitment by the Administration to propose spending at a particular level in FY2010, FY2011 or any future year.

Transportation and Public Facilities





Note: The projections in the FY 2011 10-year plan are intended to be a planning tool and do not represent a commitment by the Administration to propose spending at a particular level in FY2010, FY2011 or any future year.

HB 357

Alaska Railroad Non-Essential Land Sale

"An Act relating to the sale of land owned by the Alaska Railroad that is not needed for railroad purposes."

To spur economic development throughout the state, House Bill 357 adds a fourth clause to the existing language governing how the Alaska Railroad Corporation may dispose of land. House Bill 357 will enable the railroad to sell land that is not needed for essential railroad purposes. This bill does not ask for any irresponsible disposal of land, as the sale must be initiated by the board of directors on two conditions. The first condition is that the land is not essential to railroad operations, and the second condition is that the sale is in the best interest of the state of Alaska.

As support has shown, current leaseholders are very unhappy with the inability to purchase their leased properties from the railroad. In general real estate dealings, private purchases are made in mutually beneficial sales. House Bill 357 encourages these sales after determination by the board of directors of the railroad looks at each sale with the overall benefit to the state of Alaska as the key driver. Not only will the private sector benefit from this addition to state law, the railroad will also have increased ability to make decisions regarding their overall real estate portfolio.

The sale and relationship of private and public lands are vital to the economic growth of the state of Alaska. I ask for your consideration and support of House Bill 357 to promote Alaskan growth through the diversification of land ownership, increasing the tax base of the state, and encouraging responsible development of Alaskan land.

ANALYSIS: *(Attach a separate page if necessary)*

The fiscal impact of this legislation to the Alaska Railroad Corporation is indeterminate.

HB 357 would authorize the Alaska Railroad to sell land that is not needed for railroad purposes, subject to legislative approval, if the ARRC Board finds that the sale of the land is in the best interest of the state. Current law already allows the railroad to propose the sale of rail land subject to legislative approval. The incremental cost to sell rail land including appraisals, staff time, and other professional fees would likely be passed on to the buyer.

STATE OF ALASKA
2010 LEGISLATIVE SESSION

BILL NO. CSHB 357(TRA)

ANALYSIS CONTINUATION

Current lease revenue streams average an 8% annual return on the fair market value of ARRC land. If ARRC were to sell this land, it would be hard-pressed to find a comparable investment that would provide such a return with a similar risk profile. As an extreme hypothetical, if ARRC were to sell its holdings in the Ship Creek area of Anchorage, roughly $6 million of annual lease revenues would be immediately removed from the corporation's budgets. If the corresponding funds received for the sales were used to purchase investments with a similar risk profile, at today's investment returns, ARRC could stand to lose over $4 million annually when compared to the foregone lease revenues. This could have a material impact on the corporation as it tries to maintain infrastructure, fully fund benefit plans, and provide the required match for federal grant funds, among other items.

ARRC believes the real fiscal impact of selling the non-operating land we currently lease to third parties would result in the loss of a consistent, predictable annual revenue stream to ARRC.

Another potential fiscal impact relates to ARRC's ability to use financial leverage to accomplish its capital plans. Currently, ARRC has approximately $11 million in outstanding loans secured by lease revenues from corporation lands. Material changes to the lease streams could concern existing lenders, violate covenants, and/or most certainly impact ARRC's future ability to use debt .

Because the potential volume of lands to be sold and the timing thereof is unknown at this point, the fiscal note is indeterminate.

A BILL

FOR AN ACT ENTITLED

"An Act relating to the sale of land owned by the Alaska Railroad that is not necessary for railroad purposes."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 42.40.350(c) is amended to read:

(c) The corporation may lease, subject to AS 42.40.285 and (d) of this section, grant easements in or permits for, or otherwise authorize use of portions of rail land. However, the corporation may not convey its entire interest in rail land except as provided in AS 42.40.285, **42.40.352,** 42.40.370(d), and 42.40.400.

*** Sec. 2.** AS 42.40 is amended by adding a new section to read:

Sec. 42.40.352. Sale of land not necessary for railroad purposes. (a) The corporation may sell land if the board finds (1) the land is not necessary for railroad purposes, and (2) the sale of the land is in the best interest of the state. The sale of land is subject to the terms and conditions of AS 42.40.285, 42.40.350(d), and this section.

(b) Before offering land for sale under this section, the railroad shall

New Text Underlined [DELETED TEXT BRACKETED]

(1) publish public notice of the proposed sale that includes the finding by the board that the land is not necessary for railroad purposes and that the sale is in the best interest of the state;

(2) provide notice to persons having a leasehold interest in the land proposed to be sold and offer the leaseholders the right of first refusal; and

(3) receive legislative approval under AS 42.40.285.

(c) The corporation shall separately account for the proceeds from the sale of land under this section and shall report the earnings and balance in the account in the annual report required by AS 42.40.260. Money in the account may be appropriated in accordance with 45 U.S.C. 1207(a)(5) (Alaska Railroad Transfer Act of 1982).

MEMORANDUM March 24, 2010

SUBJECT: Use of money without an appropriation (CSHB 357(TRA))
(Work Order No. 26-LS1356\E)

TO: Representative Peggy Wilson
Chair of the House Transportation Committee
Attn: Becky Rooney

FROM: Donald M. Bullock Jr.
Legislative Counsel

Enclosed is CSHB 357(TRA) that includes the changes you requested.

With regard to the deletion of the word "appropriated" on page 2, line 10, and the insertion of the word "used" in its place, is it the committee's intent that the money may be spent without an appropriation?

Under terms of the federal Alaska Railroad Transfer Act (P.L. 97-469, Title IV), the "revenues generated by the State-owned railroad shall be *retained and managed* by the State-owned railroad for railroad and related purposes." 45 U.S.C. 1207(a)(5); emphasis added. According to a section-by-section analysis of the Alaska Railroad Transfer Act that was prepared at the time Congress passed the Act, this provision was intended to allow the railroad to "retain and manage it's [sic] own revenues" and to "avoid the need for annual appropriations by the State for the railroad." Congressional Record, December 23, 1982, S16080. The apparent intent of Congress was that the revenues of the railroad be dedicated for railroad and related purposes and that the railroad have the discretion to determine how to use its revenues without having the legislature approve the use and expenditure of those revenues by an appropriation. This provision constitutes a federally mandated dedicated fund requiring that railroad revenues be retained by the railroad and used only for railroad and related purposes. 1984 Inf. Alaska Att'y Gen. Op., May 26 (366-575-84). However, this provision does not prevent the legislature from appropriating railroad revenue for railroad purposes or mandating that the railroad expend its revenue for a legislatively prescribed railroad or related purpose. *Id.*

Although there have been unsuccessful efforts to amend the Executive Budget Act to make it applicable to the Alaska Railroad Corporation, art. IX, sec. 13, Constitution of the State of Alaska prohibits the withdrawal of money from the treasury except in accordance with appropriations made by law. Thus, although the money from the land sales contemplated in CSHB 357(TRA) may be dedicated under 45 U.S.C. 1207(a)(5),

whether it may be spent without an appropriation is a question that has not been answered by the courts.

Enclosure

April 1, 2010

The Honorable Bill Stoltze
Representative, State House
State Capitol, Room 24
Juneau, AK 99801

Dear ~~Representative~~ BILL Stoltze:

Thank you for the opportunity to testify today before your committee on House Bill 357. The Alaska Railroad's real estate business is a vital component of our operation's strength. Real estate lease revenues act as a flywheel for the Railroad providing a predictable and stable source of income often balancing out years when our operating revenues are less secure.

Given the very important role real estate plays in the Alaska Railroad's success it is imperative we foster a productive working relationship with our real estate tenants. As a result of your legislation, the Alaska Railroad Board of Directors has been provided the opportunity to better understand some of the frustrations that exist with our customers and we plan to take action to address the concerns.

The Board has instructed railroad staff to prepare revisions to Board Rule 11 (the railroad's "Long Term Lease Policy") that should be a benefit to tenants. One involves the current requirement that when rent is revised every five years, the new rent is subject to a 35% maximum increase but can never be decreased. We propose to make this work in both directions - in other words, allow the rent to be decreased up to a maximum of 35% if that is what the appraisal process determines to be fair market value.

Second, we will propose to change the required public notices of leases to an electronic format rather than print. New and renewing tenants are currently charged $300 to cover the cost of public notice. This action will eliminate that cost. Additionally, we will enhance communication through the use of periodic leaseholder meetings to provide a public forum for our customers to bring forward their concerns and suggestions. We will also continue to use our leaseholder newsletters to further our communication efforts.

Our next regular board meeting will be on May 20th when the board rules can be changed to implement the above suggestions. We will continue to look for ways to add value to our leaseholders while protecting the financial health of the railroad on behalf of Alaska shareholders. Thank you again for allowing us time during your House Finance Committee hearing to testify and for the valuable information that has been brought to light as a result of your actions.

Sincerely,

John Binkley
Chairman, Alaska Railroad Board of Directors

State Capitol, 5th Floor
Juneau, AK 99801

April 2, 2010

Re: House Bill 357

Dear Representative Stoltze,

On behalf of the City of Whittier, I am writing to express our support for House Bill 357 which would allow the Alaska Railroad to dispose of land that they own which is not essential to the operations of the railroad. From our perspective, we believe that private ownership over public ownership is best for economic development within the City of Whittier and throughout Alaska.

As you are probably aware, the Alaska Railroad is a major landholder within the City of Whittier and we are familiar with the complaints associated with the railroad's leasing practices. Likewise, we are aware of the constraints that businesses and individuals find in obtaining loans on leased property.

Given that HB 357 is permissive and does not require the railroad to dispose of land, we find it difficult to understand how or why anyone could oppose this measure. In closing, we would like to take this opportunity to thank the legislature in recognizing the need to get more public lands into private ownership and urge the passage of this bill.

Thank you for your time and consideration.

Sincerely,

Lester Lunceford,
Mayor

Honorable Peggy Wilson, Chair
House Transportation Committee
State Capitol, 4th Floor
Juneau, AK 99801
Fax:: 907-465-3175

Dear Chair Wilson,

I am writing in opposition of House Bill 357, which is currently in your committee. As a Real Estate professional I can see why business owners may wish to own rather than lease. As a resident of the State of Alaska I don't see the "*giving the railroad the authority to dispose of non-strategic land within their real estate portfolio creates the logical first step of putting more government-owned lands in the private sector*," is in Mine or the States best interest.

I am closely aware that the Real Estate department of the Alaska Railroad, operates for profit, and strives to get the highest rate of return, on value, for their owned real estate. Well managed long term leases will, and do provide a greater rate of return to me and the State than selling off performing asset, not to mention, selling those assets in a depressed real estate environment.

Any favorable vote on this bill will only serve the interests of a few business owners rather than the majority of residents of the State of Alaska.

This legislation does not represent good financial stewardship of mine and the States performing real estate assets.

Respectfully,

Mark S. Kulstad

State Capitol, Room 406
Juneau, AK 99801

RE: HOUSE BILL 357

Dear Chair Wilson,

I would like to urge your support of HB 357, which is currently under review by your committee. This legislation is important to Alaska businesses and would help diversify and strengthen the private sector.
As you know, the vast majority of land in Alaska is held by various public entities, which limits opportunities for the private sector. HB 357 is a reasonable vehicle for current land users to have the ability to purchase the property that they currently lease from the ARRC. The ability to own both the land and the improvements on these properties vastly increases the bottom line health of business and opens lines of credit that can be utilized to expand and grow. This legislation is a win/ win opportunity for the ARRC to continue to generate revenue from the proceeds of the proposed land sale while Alaskan businesses gain the financial leverage to continue to create jobs.

Respectfully,

Mark Stearns

RE: HOUSE BILL 357

Dear Chair Wilson,

I am writing in support of House Bill 357. This bill is long overdue and if passed will have a positive impact on commerce, our economy and our local community's tax base(s). For the communities surrounding the rail belt, this legislation will probably be the largest positive impact on the economy and creation of jobs.

Alaska's economy is restricted because of the amount of land under government ownership and control. This legislation is a positive step in getting land from under government ownership into the hands of the private sector. With that will come greater investment and more jobs.
On a separate note, I saw on the news a legislative proposal that would charge the Alaska Railroad with the responsibility of developing a small diameter gas pipeline, often referred to by Alaskans as a bullet line. From my perspective, this is a terrible and short-sighted proposal that does not contemplate the railroad's ability to waste money. Their direct managerial involvement will almost certainly insure a tariff that would be unaffordable to most Alaskans.

In conclusion, I want to take this opportunity to extend my thanks and appreciation to Representative Stoltze who authored this bill. Without his business sense and leadership, we would most likely continue operating under the existing arcane structure of governmental ownership. Please support passage of HB 357.

Respectfully,

Mark Stearns

RE: HB 357

Dear Representative Wilson.

I recently learned about House Bill 357, and I am writing in support of this measure.

I work for a Fairbanks based company, that has been in business, since 1974, which Is located on railroad-leased land. In fact, all the businesses around us, are located on Railroad-leased land. The land we are based on, is not used for railroad operations and Never will be.

This legislation would allow for the sale of these properties. In AT&S case and the others around us. This would be an asset, to the companies, to own the land there business is located on.

With your help, lets do the right thing and pass this bill.

Thank you.

RE: HB 357

Dear Chairwoman,

As a former leaseholder with the ARRC, I support this bill. My understanding is that when these lands were transferred to the State, the intention was that such lands would be sold to private parties. Under that belief, at least some former leaseholders that I have known expanded their facilities. Several years ago, a commission formed to research long-term plans for the State also recommended that these lands be sold.

Besides original intent, it is my belief that these lands are not developed to their potential because there is always the threat of ARRC takeover at the end of the lease. I realize this is standard leasehold practice, but the ARRC is statutorily prohibited from selling its land. This was enough incentive for me not to further improve my property.

The ability and flexibility to maximize these properties will be of benefit to the communities as well in expanding the revenue capacity of the lands and value of tax base.

Sincerely,

Mary W. Silvey

Re: House Bill 357

Dear Representative Wilson,

I am writing to you in support of House Bill 357. As an Alaska Railroad Leaseholder myself, I know first hand the difficulties and restraints associated with dealing with the railroad. While my lease, primarily because of its location, will probably not be one of the parcels of land ever put up for sale or disposition; nonetheless, as a businessman I know of many parcels that are not strategic to the railroad and where the community's commerce would likely improve substantially if these parcels were sold and in private hands. One of Alaska's biggest problems is that too much land is owned by the government, both federal and state.

Putting railroad lands that are not necessary to their operation or strategic purpose in the hands of the private sector would increase business Capital investment, thus creating more jobs and a stronger local tax base. I know of many leaseholders unwilling to further invest in their businesses because of the uncertainty of their leases and the perceived difficulties in dealing with the railroad and their real estate office.

Again, in the strongest terms possible, I urge swift passage of house bill 357. Furthermore, I would like to compliment Representative Bill Stoltze for having the business acumen and determination to address an important issue to the rail belt region and its commerce.

Sincerely,

Paul L. Reid

State Capitol, Room 406
Juneau, AK 99801

Dear Representative Wilson:

Your committee is in charge of reviewing House Bill 357, which deals with allowing the Alaska Railroad Corporation to dispose/sell non-essential real estate. This legislation warrants the body's attention and passage.

HB 357 is an astutely crafted vehicle that will allow the Railroad to sell land that is not essential to their transportation system. By doing so, the private sector will be able to more easily attract needed capital, and be insured that they have the freedom to direct, expand, and upgrade their businesses as they wish and receive full benefit of any capital improvements.

Passing this legislation is a commitment to economic development and belief in the private sector. Please support HB 357.

Sincerely,

Robert Carlson Jr
President

3/2/2010

Honorable Peggy Wilson
Chairperson, Transportation Committee
Alaska House of Representatives

Dear Representative Wilson,

My name is Mike Hammer. I am the owner of Statewide Door & Glass. I do commercial glass service and new installations for projects throughout Alaska. I currently employ 25 – employees year round. I purchased my current building in 1999. It sits on Railroad leased land, located on Ship Creek Avenue. This street was originally named Warehouse Avenue until about 10 years ago. The name of the street was changed by the Railroad Corporation to make it appear that the area was not used for industrial, manufacturing, or storage purposes. There are currently at least 10 – businesses on this street that that still do this kind of work to make a living. They have all been here longer than me.

Over the past 10 – years, some businesses have had their leases expire. When this happens, the Railroad has refused to renew them. As a result, the owner is currently required to demolish the building and have the debris hauled off to the landfill at the owner's expense unless the Railroad wants the building. Then, they will waive the demo requirement and take over the building. I have been told that my lease will not be renewed if I continue to operate as a glass shop. By doing this, the Railroad will eventually own all of the buildings or get rid of them. The goal is to turn this area into a tourist shopping and retail area.

The Railroad Corporation has allowed 3 – new buildings to be built since I have been here. The Comfort Inn Hotel, The Ulu Factory, and The Bridge Restaurant. They were allowed to be built because they fit into the future model of what the Railroad would like to see happen in this area. The problem is that this area is not attracting any investment as the Railroad Corporation expected.
The Bridge Restaurant went out of business two years ago. The building has been for sale ever since and is still empty. There is an empty lot next to mine that has been advertized as a great location for a new Condominium project. There has been no interest. The Ulu factory had to invest in a shuttle bus to get people from downtown to come see their store. There are many other empty lots for sale.

As I see it, the Alaska Railroad Corporation has become a real estate holding company who still likes to play with trains! The federal government GAVE this land to Alaska so it could be used for transportation and building infrastructure, not to build shopping malls and coffee stands for tourists that will sit empty eight months of the year.

I would like to be able to purchase the land that my building sits on. I would like to continue to employ people who live and work in Alaska all year long. Having to start over again in another building because my lease will not be renewed may put me out of business. Please do what you can to help myself and others in my position so that we can stay where we are and continue to employ Alaskans. Please support House Bill #357.

Sincerely, Mike Hamm

RE: HOUSE BILL 357

Dear Chair Wilson,

I would like to ask for your support of HB 357 that is currently under consideration in your committee. I have been employed by a company for the last sixteen years that leases property from the ARRC. My employer faces numerous uncertainties and challenges as do most small businessmen. As an example the ARRC has increased the land lease payment cost from $780.00 per month in 2001 to $2,990.00 per month currently. The current rate approaches an almost four fold increase in just 9 years. These dramatic increases place strain on already stretched finances and reduce the available funds to expand the business and increase wages.
From my reading of this legislation it seems like and excellent opportunity to place privately used property into the ownership of those entities that use and occupy these properties. The ARRC will still receive an income stream from the investment income from the proceeds of the sale and the users will reap the benefits and predictability of land ownership. This appears to be a situation that benefits both the private sector as well as the public interest.

Thank you for your consideration,

Thomas Tonkin

Re: House Bill 357

Dear Representative Wilson,

I am writing to you in support of House Bill 357. As an Alaska Railroad Leaseholder myself, I know first hand the difficulties and restraints associated with dealing with the railroad. While my lease, primarily because of its location, will probably not be one of the parcels of land ever put up for sale or disposition; nonetheless, as a businessman I know of many parcels that are not strategic to the railroad and where the community's commerce would likely improve substantially if these parcels were sold and in private hands. One of Alaska's biggest problems is that too much land is owned by the government, both federal and state.

Putting railroad lands that are not necessary to their operation or strategic purpose in the hands of the private sector would increase business Capital investment, thus creating more jobs and a stronger local tax base. I know of many leaseholders unwilling to further invest in their businesses because of the uncertainty of their leases and the perceived difficulties in dealing with the railroad and their real estate office.

Again, in the strongest terms possible, I urge swift passage of house bill 357. Furthermore, I would like to compliment Representative Bill Stoltze for having the business acumen and determination to address an important issue to the rail belt region and its commerce.

Honorable Peggy Wilson, Chairwoman
House Transportation Committee
Alaska State House of Representatives
Juneau, AK 99801

Dear Chairwoman Wilson,

I am writing to ask you to give HB 357 your committee's fullest deliberation. It is a bill that will right a major inequity for my business and for many other businesses in Alaska's Rail Belt.

Currently we have to make and pay for many capital and property improvements, ourselves. (We were required to pay for a new water line on property we did not own.) We "inherited "our lease when we bought this business, over 25 years ago. The lease has proved to be the only regret I have about owning this business. It is a bitter pill to know that while you are improving your business to the highest standards, that those improvements may end up belonging to another owner.

Alaska depends on private enterprise to keep building new jobs more than any other segment of our economy. This is especially important during these tough economic times. A business that could have the opportunity of owning its land would also have the confidence to make additional capital improvements and expansions. This will provide huge benefits to local communities.

Rather than continuing to lock up more land from private ownership, let a crack of light and hope shine down on the many businesses who struggle daily to be competitive. After all, it was set out in the original Federal transfer of lands as a fair and equitable procedure. The Alaska Railroad Corp. has done nothing but drag its heels on this process, and I think HB 357 will give everyone the green light to proceed with a process that should have started 20 years ago. I really believe HB 357 is a fair and equal way to start this important adjustment.

Sincerely,

Janet Faulkner

February 25, 2010

Honorable Peggy Wilson, Chairwoman
House Transportation Committee
Alaska State House of Representatives
Juneau, AK 99801

Dear Representative Wilson,

Here's the key to the simplicity of HB 357: it just starts the process that was set-up over 25 years ago when the Federal government transferred ownership to Alaska. Part of that Federal transfer specified that state-owned, non-operational railroad lands could be purchased at fair market value after 10 years. HB 357 just specifies that it's alright to begin the process.

HB 357 will allow business owners like me, who has leased state land through the Alaska Railroad Corporation, the opportunity to purchase land that I have improved upon for over 25 years (I have made over $8 million in capital improvements to my business site). I have paid taxes on this land, too, even though I do not own the land. I have done this in order to build my steel fabricating business to be the top steel fabricator in Alaska, with the largest capacity and capabilities in the state. The reason? I want to make sure that other Alaska industries can get their steel needs met in Alaska, without going outside the state.

Under current lease conditions, if I would close or move my business, all the capital improvements would belong to the ARRC. Frankly, I have always found this very bothersome. I look around me, at other leaseholders, and I am sure that if they were able to own the land they are sitting on that they would make major improvements, which would equate to higher property values, greater civic pride and beautification, and a stronger tax base for Rail Belt communities.

Help us eliminate serfdom from the Rail Belt. Please give HB 357 your most earnest consideration, Representative Wilson. HB 357 is a simple bill crafted to treat leaseholders who desire to buy their property as equally as those who wish to continue to lease. Private property owners in Alaska are a rare breed: only 2 percent of Alaska land is in private ownership. Please give us a chance to help remedy this inequality.

Sincerely,

Richard Faulkner
President

RE: HB 357

Dear Representative Wilson,

We recently learned about House Bill 357 and we are writing in support of this measure.

We have leased our property from the Alaska Railroad since 1965. We would not even consider doing any improvements due to the uncertainties of our lease. There has only been one new business on our street within the last 10 years and it failed. There are many lots available but no one wants to develop them because of the lease agreement. The railroad does not use or need these lots for railroad purposes. It is a shame to have properties sitting vacant and leased land buildings needing repair. The lands have become an eyesore to the community.

House Bill 357 would allow the sale of these properties. This would allow development of the lands which would be beneficial to everyone.

We would appreciate your support of this bill. If you have any questions, please email me at kjperham@gci.net.

Thank you,

3/2/2010

Honorable Peggy Wilson, Chairwoman

Alaska State House of Representatives

Transportation Committee

Juneau, AK 99801

Dear Chairwoman Wilson,

I sincerely request the support and endorsement of HB 357. This bill deals with the sale and the redistribution of ownership of unessential railroad land.

This legislation, if passed, would allow the railroad to sell lands that are in surplus to their transportation operations. This in turn would allow the businesses and other interested parties to procure the land that they already have financial interests and investments in. By doing so, the Railroad would not be infringing upon the directives of their board, or the welfare of the public. If the private entrepreneurs/corporations are allowed to own the land that they have established their respective enterprises on, they are thus more likely to further invest in said enterprises and strengthen our local community by remaining where they are. Investments will then lead to more jobs and revenue for the community/state as well.

Nearly all the land in the state of Alaska is government owned (just about 98%). By allowing the railroad to sell the extra land to these business owners, it would grant the private business sector more strength and revenue.

Please consider this bill and all that I have stated as it is crucial for the development and prosperity of the private business sector as well as the continuing stability of our local communities.

Sincerely,

Brandon Wallace

RE: HOUSE BILL 357

Dear Chair Wilson,

I am writing to ask your support of HB 357 currently under consideration in your committee. This bill, if enacted, will have a positive impact on Alaska's economic future by securing the economic future of current ARRC leaseholders.
This legislation will give the railroad the authority to sell their non-strategic land within their real estate portfolio and puts public lands into private ownership. This will significantly increase economic climate for more investment, create new jobs and ensure existing ones, and expand the local tax base all along the rail belt.
This legislation does all this and is revenue neutral. The railroad will continue the revenue stream that it currently enjoys while businesses can secure their future through land ownership. This legislation is pro business, pro jobs and pro private sector business and it allows the ARRC to concentrate on their primary mission of operating our railroad.

Respectively,
Bohuslav Fiala

RE: HOUSE BILL 357

Dear Chair Wilson,

House Bill 357 that has been introduced by Rep. Stoltze, would support private sector businesses that are currently lease holders with the ARRC. As you are aware a large proportion of land in Alaska is held by the public including those lands that are leased by the Railroad to businesses along the rail belt region. Most railroad leased land has no direct impact on the day to day operational activities of the Railroad. The Railroad by virtue of these leases exerts control and creates uncertainty for the long term health of the leaseholders. This legislation if enacted, would provide the leaseholders a secure future and give them the flexibility to invest for the future. It also allows the Railroad continued revenue for their train operations and lets them focus on their primary reason for existence.

Respectfully, Erik Brubaker

RE: HOUSE BILL 357

Dear Chair Wilson,

Please actively support HB 357 as this will be tangible and visible support of small business interests in Alaska. This legislation will help put public lands into private ownership and will lead to increased investment and job growth. This will allow the ARRC to concentrate on their primary activity and still maintain the revenue stream that they currently have from their real estate operations. It also is revenue neutral which is probably a rare situation in these economic times. This seems like a situation where both parties benefit and I strongly urge you to give it the attention that it deserves.

Thank you,

Ken McCarty

RE: HOUSE BILL 357

Dear Chair Wilson,

Please support HB 357 currently in your committee. This legislation will help Alaskan businesses by placing public lands into private use. Alaska has more public lands than any other state and this legislation will allow these lands to generate tax revenue and strengthen the bottom line of the private sector. This legislation is the type of real and tangible support that the State can provide to help diversify the economy. This legislation is one that provides benefits without harming the ARRC. The Rail Road will continue to receive revenue from the invested proceeds of these land sales and it puts the land into private hands for the benefit of Alaskans.

Thank you for your consideration,

Marguerite C Kremer

State Capitol, 4th Floor

Juneau, AK 99801

Dear Chair Wilson,

I am writing in support of House Bill 357, which is currently in your committee. I believe this legislation deserves the attention and support of the legislature because of its positive implications for the economy of our state.

First and foremost, giving the railroad the authority to dispose of non-strategic land within their real estate portfolio creates the logical first step of putting more government-owned lands in the private sector. By doing so, you will significantly increase the economic climate for more investment, create new and more jobs, and expand the local tax base of our communities along the railbelt.

A move like this will allow the RR to make sound and rationale decisions about their real estate portfolio for the betterment of their operations as well as for their communities and leaseholders.

This legislation is pro-business, pro-jobs, pro-private sector and deserves the attention and passage of

the Alaska State Legislature. Thank you for your consideration.

Dear Chairwoman Wilson:

I urge your endorsement and support of HB 357, Our family has leased a small parcel of railroad land since the late 60's. On many occasions over the years we have tried unsuccessfully to purchase this parcel. We operate a small business and could never justify the improvements we need as we do not own the land.

More recently the Municipality of Anchorage in conjunction with railroad officials has forced the railroad lease holders to pay property taxes on land that they do not own. We are in full support of this legislation and hope it will pass during the current session.

Thank you for your support,

Brad Cherrier

Hon. Peggy Wilson
Chair, House Transportation Committee
State Capital, Room 406
Juneau, Alaska 99801

Dear Representative Wilson;

I am writing in support of House Bill 357, which would allow the sale or disposition of non essential railroad lands. I give these reasons for this solution:

There is a lot of land controlled by the Alaska Railroad. The State land on Commercial Drive was sold to tenants years ago.

It would probably lead to larger operations being located in the Railroad area.

I have leased from the Alaska Railroad since the end of 1975. In the last few years, the City of Anchorage has been charging taxes on the value of the Alaska Railroad leases. Nobody seems to know if the lease value is reduced as the years left on the lease are reduced. As my lease has left time remaining, the taxes have gone up considerably.

I think if the property was owned by companies or individuals, tenants would be in a better position to expand, get loans, etc. The Railroad has a lot of fine people working there, and I don't have anything against anyone.

Thanks for your efforts,

Sincerely,

Harvey Dougherty

HB

361

<target><bill>HB 361</bill><subject>HB 361</subject><comm>HFIN26</comm></target>

Alaska State Legislature

Representative Anna Fairclough – House District 17

House Bill 361

"An Act requiring 911 dispatchers to be trained in cardiopulmonary resuscitation; and providing for an effective date"

Currently in Alaska State Statute there is no provision requiring 911 dispatchers to be certified in cardiopulmonary resuscitation (CPR). Most people are told that during an emergency you should call 911 immediately and someone will be able to help you. In the event that the caller does not know how to perform CPR, is unsure or panicking during the 911 call the operator should be able to not only calm the person down, but also be able to walk the caller through the process while help is on the way.

Most of the 911 dispatchers in the state are certified as Emergency Medical Dispatchers (EMD) which covers CPR. But for those remote regions in the state that don't have certified EMDs or dispatchers trained in CPR the passage of this bill may ultimately save lives.

Thank you for your consideration and I urge your support on the passage of legislation.

911 Claims Operators Don't Need to Know CPR

A Shocking Revelation by the *Today Show* Reveals 18 State Behind the Curve

By **Ryan Christopher DeVault**

The 911 system in this country is broken, and the *Today Show* showed us just how broken it is. In a *Today Show* investigation of the 911 system, it was revealed that 18 states around the country do not require that their operators know CPR to be on the job. It seems that one of the reasons that the story was being done in the first place was that a city manager in Murphy, Texas said that his operators didn't know CPR because they weren't required to know it. Does this sound like a good excuse? Or does it sound like laziness where the city could be putting its residents at risk by not actually taking on training that could save lives?

Let's all just agree that knowing CPR is an important tool and that when someone takes the initiative to actually learn CPR that they are working towards the greater good. The fact is that nobody does CPR to help themselves out because obviously CPR is a tool you use to help out someone else in need. Those who go through the training to help save the lives of other people are commendable, and it creates more and more people that are capable of helping people with a medical emergency. With that in mind shouldn't anyone that could be placed in a position to use CPR go through the training simply because they can?

If you haven't learned CPR, and your child is suddenly having trouble breathing, who do you call? We are all told that you should call 911 immediately, but what are you expecting when you call 911? As a parent I would hope for immediate help with the situation, but there are 18 states (listed on page 2) around the country that don't care enough to make sure that the callers can receive help from their operators. I am of the opinion that it is important for parents to learn CPR, but if they haven't had the money to pay for the training, what are their options in those 18 states where you can't rely on 911 to help you out? I wish I had the answer to that question.

The reason that the city of Murphy, Texas is being brought up in this article is that they had a woman whose child had stopped breathing call into their 911 dispatch to receive help with CPR. The operator couldn't help, and the excuse that the city is giving is that they aren't required to know how to do CPR in Texas, and that they did nothing wrong. Maybe they learned their lesson in Murphy though, because the claim by the city manager of Murphy (to the *Today Show*) is they are now going to train their operators. It won't bring back the child that died in the sad case, but maybe it can be a warning sign for residents to take up the cause in their states for 911 operators to be required to know CPR. Unless you can answer for me the following question, "who do I call for help with CPR while in the middle of trying to save a life?"

States that DON'T require CPR Training for 911 Operators

Idaho
Nevada
Colorado
South Dakota
Nebraska
Kansas
Oklahoma
Wisconsin
Michigan
Indiana
Arkansas
Mississippi
Alabama
Florida
New York
West Virginia
Alaska
Hawaii

Brookline 911 dispatcher praised for helping to save a life

E-mail|Link|Comments (0) Posted December 18, 2009 12:01 PM

By Brock Parker, Globe Correspondent

Authorities in Brookline are praising the work of a rookie 911 dispatcher who helped a local man perform CPR on his wife last month until emergency medical technicians arrived.

The woman survived, and now Emergency Dispatcher Siobhan McIntyre, who has been on the job since May, has received a commendation from police for her efforts.

"There's nothing like it," McIntyre said. "I saved a life. I had a hand in this."

David Connolly, the chief emergency dispatcher for Brookline, said McIntyre was working on Nov. 13 at 5:22 a.m. when a Brookline man called 911 because he'd found his wife unresponsive in their home.

The woman, who asked to remain anonymous, was in cardiac arrest and her husband did not know how to perform CPR, Connolly said.

"He asked me numerous times: "What do I do? What do I do?" McIntyre said. "I was just trying to calm him down. It was frightening to say the least."

McIntyre began walking the man through the steps to perform CPR. She instructed him about how to breathe into his wife and how to perform chest compressions, which he did. At that point, emergency responders arrived and used a defibrillator to revive the woman, Connolly said.

Connolly said McIntyre gets the credit for helping to save the woman's life because she was able to stay calm, get emergency responders in route and help talk the man through performing CPR all at the same time.

"And she's only been on the job since May," Connolly said.

McIntyre, 26, said that while she started in May, she had been training with a partner until she began working on her own in October.

While she is happy to have helped save a life, McIntyre said she's hoping the situation won't arise again any time soon.

"I hope it's a while," she said. "You never want to be in that position again."

Carson City 911 dispatcher gives instructions to save baby

BY F.T. NORTON

A Carson City dispatcher likely saved a newborn's life Wednesday morning.

When a call came in to emergency dispatch at 8:22 a.m., communications supervisor Cindy Merrell heard a distraught mother, barking dogs and a crying toddler. But what anyone else would have missed in the cacophony was what the woman said between screams — "My baby's not breathing!" Merrell heard it right away.

"The baby's not breathing," the veteran emergency dispatcher can be heard repeating on the 911 call recording.

Merrell said she turned to coworker Liz Hertz and relayed the information. Hertz called out medics. Then Merrell, herself a mother of four and grandmother of six, went to work. She opened flip cards and tried to get the woman's attention.

"I'm going to help you," Merrell shouted over the din. "I need you to calm down so we can help your baby. OK!"
When the mother responded that she understood, Merrell began giving her directions. "I need you to put your baby on a flat surface," said Merrell. "Tilt the head back and see if he's breathing."

The woman wailed as a toddler could be heard in the background crying.
"I want you to breathe two puffs of air into the baby's lungs, just enough to make the chest rise," said Merrell.
The line became silent as the mother did as she was told. Then the woman can be heard crying, "Oh my God. My son's dead, my son's dead."

"Don't give up," said Merrell. "I need you to help the baby." She instructed the mother to do chest compressions. Through the line Merrell could hear the thumping as the woman did as she was told.

Everyone in the dispatch center became fixated on what was unfolding, including John Mason, a system technician with AT&T, who hours later was still in awe of what he'd witnessed. "It was just so amazing," he said.

Merrell worried the mother was going to stop because she kept repeating her son was dead.
"Don't give up. Just keep going until the medics get there. Keep going. Keep going," Merrell said. "I need you to help the baby. Don't give up."

For six minutes, Merrell remained calm while the frantic mother wailed, the dogs barked and a toddler cried.
And then, Merrell heard a weak cry.
"Oh, he just started crying," the mother yelled.
When paramedics arrived, Merrell hung up.

The baby's family declined to comment. According to Renown Regional Medical Center in Reno, the 3-week-old infant is in good condition.

"It's absolutely amazing — Cindy staying on the phone, calming the lady down and talking her through it, probably saved the baby's life," said Sheriff Ken Furlong. "Cindy doesn't get rattled. She's an amazing woman."

Merrell said normally after an emotional call, she will get up from her desk and go into another room to cry.
"But John Mason was in the room," she said with a laugh. "I turn around and he's got these tears, and Liz has got these tears, so I had to be like, 'Oh, it's just a job.'"

For Mason, however, the experience was unforgettable.
"I got to just sit there and listen to this dispatcher and the way she took control of the situation and actually saved the baby's life," said Mason, a former Marine. "I've seen a lot of stuff that didn't affect me. This actually touched me. When that baby coughed we were (cheering).

"We were just overwhelmed with joy that one life was saved by the training and composure of this particular dispatcher," Mason said. "I think she's a hero." Merrell was more humble about her actions.

"I was just glad that the baby was alive and I could help the mom," said Merrell.

INTRODUCTION TO CPR

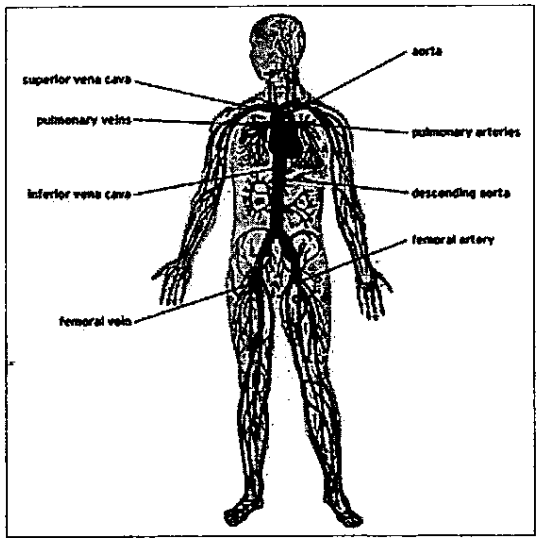
IMPORTANT ANNOUNCEMENT: In March 2008 the American Heart Association published an advisory statement outlining "hands-only" or "compression-only" CPR. This statement is a clarification addendum to the 2005 AHA Guidelines for CPR and ECC which dictates that lay persons who are unable or unwilling to provide rescue breaths may perform hands-only CPR. This updated recommendation does not apply to first responders and/or medical personnel with access to CPR barrier or a mechanical respirator; unwitnessed cardiac arrest, cardiac arrest in children and infants, or cardiac arrest presumed to be of non-cardiac origin (drowning, trauma, airway obstruction, acute respiratory diseases, drug overdose, etc). AHA study concedes that when performed correctly, conventional CPR continues to prove a more effective rescue method for victims of cardiac arrest and as such we will continue to educate our students in ventilation as well as compressions.

Recent statistics suggest that sudden cardiac arrest is rapidly becoming the leading cause of death in America. Once the heart ceases to function, a healthy human brain may survive without oxygen for up to 4 minutes without suffering any permanent damage. Unfortunately, a typical EMS response may take 6, 8 or even 10 minutes.

It is during those critical minutes that Cardio Pulmonary Resuscitation can provide oxygenated blood to the victim's brain and the heart, dramatically increasing his chance of survival. And if properly instructed, almost anyone can learn and perform CPR.

HOW CPR WORKS

The air we breathe in travels to our lungs where oxygen is picked up by our blood and then pumped by the heart to our tissue and organs. When a person experiences cardiac arrest - whether due to heart failure in adults and the elderly or an injury such as near drowning, electrocution or severe trauma in a child - the heart goes from a normal beat to an arrhythmic pattern called ventricular fibrillation, and eventually ceases to beat altogether. This prevents oxygen from circulating throughout the body, rapidly killing cells and tissue. In essence, Cardio (heart) Pulmonary (lung) Resuscitation (revive, revitalize) serves as an artificial heartbeat and an artificial respirator.



CPR may not save the victim even when performed properly, but if started within 4 minutes of cardiac arrest and defibrillation is provided within 10 minutes, a person has a 40% chance of survival.

CPRToday! Inc. © All Rights Reserved

Invented in 1960, CPR is a simple but effective procedure that allows almost anyone to sustain life in the first critical minutes of cardiac arrest. CPR provides oxygenated blood to the brain and the heart long enough to keep vital organs alive until emergency equipment arrives. To make learning CPR easier, a system was devised that makes remembering it as simple as "ABC":

- Airway
- Breathing
- Circulation

WHEN TO DIAL 9-1-1

It is critical to remember that dialing 9-1-1 may be the most important step you can take to save a life. If someone besides you is present, they should dial 9-1-1 immediately. If you're alone with the victim, try to call for help prior to starting CPR on an adult and after a minute on a child. Before we learn what to do in an emergency, we must first emphasize what NOT to do:

- DO NOT leave the victim alone.
- DO NOT try to make the victim drink water.
- DO NOT throw water on the victim's face.
- DO NOT prompt the victim into a sitting position.
- DO NOT try to revive the victim by slapping his face.

Always remember to exercise solid common sense. When faced with an emergency situation we may act impulsively and place ourselves in harm's way. Although time should not be wasted, only approach the victim after determining that the scene is safe: always check for cars, fire, gas, downed electrical lines, and any other potential hazards before attempting to perform CPR.

ADULT CPR

Definition
Because there is no single anatomic or physiologic characteristic that distinguishes a "child" victim from an "adult" victim and no scientific evidence that identifies a precise age to initiate Adult rather than Child CPR techniques, the ECC scientists made a consensus decision for age delineation that is based largely on practical criteria and ease of teaching. However, American Heart Association's guidelines dictate that Adult CPR is performed on any person over the age of approximately 10 to 14 years (or post-adolescence, as defined by the presence of secondary sex characteristics).

Assessing the situation
If you suspect that the victim has sustained spinal or neck injury, do not move or shake him.

1 person CPR

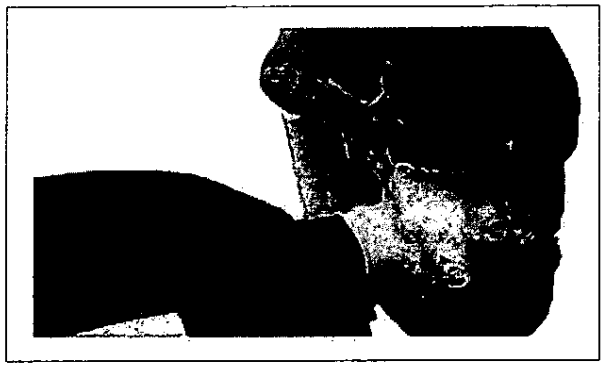
- Verify that the victim is unresponsive by shaking the victim gently and shouting "Are you okay?"
- If there is no response, dial 9-1-1
- Retrieve an AED if one is available
- Begin CPR and use the AED as appropriate

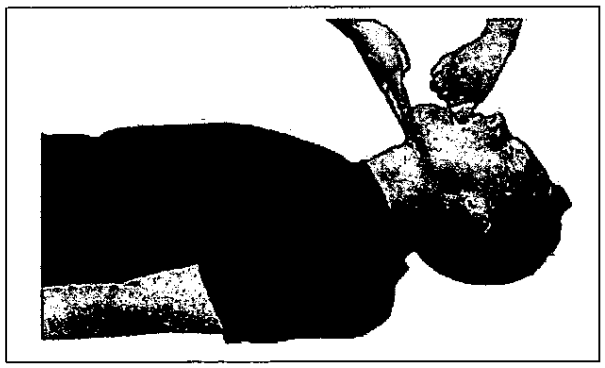
2 person CPR

- Verify that the victim is unresponsive by shaking the victim gently and shouting "Are you okay?"
- A trained rescuer should remain with the victim to begin CPR
- Second rescuer telephones 9-1-1 and, if available, retrieves an AED
- Continue CPR and use the AED as appropriate

A-B-C of CPR

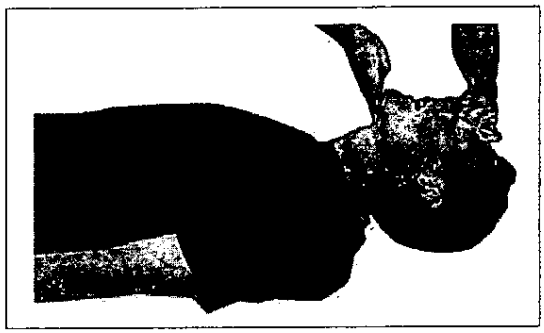
"A" is for AIRWAY. If the victim is unconscious and is unresponsive, you need to make sure that his airway is clear of any obstructions. The breaths may be faint and shallow - look, listen and feel for any signs of breathing. If you determine that the victim is not breathing, then something may be blocking his air passage. The tongue is the most common airway obstruction in an unconscious person and it may be necessary to perform a finger sweep in order to move the tongue or any other foreign object away from the air passage. With the victim lying flat on his back, firmly hold his chin with one hand while using the finger of your other hand in a sweeping motion. Once the airway is unblocked, place your hand on victim's forehead and your other hand under the tip of the chin and gently tilt his head backward. In this position the weight of the tongue will force it to shift away from the back of the throat, opening the airway. If the person is still not breathing on his own after the airway has been cleared, you will have to assist him breathing.

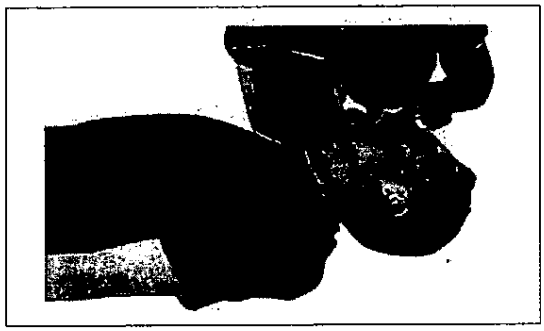


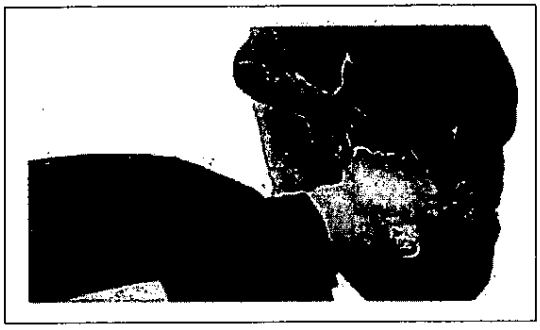


CPRToday! Inc. © All Rights Reserved

"B" is for BREATHING. With the victim's airway clear of any obstructions, gently support his chin so as to keep it lifted up and the head tilted back. Pinch his nose to prevent air from escaping once you begin to ventilate. Take a full breath, place your mouth tightly over the victim's (use a shield barrier if one is available) and blow until the victim's chest rises. Maintain a tight seal around his mouth and be careful not to over-inflate his lungs as this may force air into the stomach, causing him to vomit. If this happens, turn the victim's head to the side and sweep any obstructions out of the mouth before proceeding. Between each breath allow the victim's lungs to relax - place your ear near his mouth and listen for air to escape and watch the chest fall as he exhales. If the victim remains unresponsive (no breathing, coughing or moving), check his circulation.







"C" is for CIRCULATION. In order to determine if the victim's heart is beating, place two fingertips on his carotid artery, located in the depression between the windpipe and the neck muscles, and apply slight pressure for several seconds. If there is no pulse then the victim's heart is not beating, and you will have to perform chest compressions.

Chest compressions

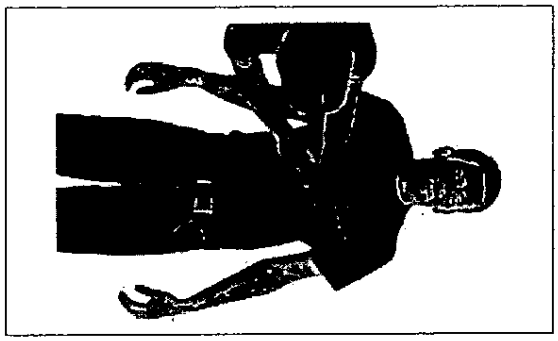
When performing chest compressions, proper hand placement is very important. Place two fingers on the victim's sternum and then put the heel of your other hand next to your fingers. Now you need to place your hand on top of that hand and interlace the fingers. Lock your elbows and using your body's weight, compress the victim's chest. The depth of compressions should be approximately 1½ to 2 inches - remember: 2 hands, 2 inches at a rate of 100 compressions per minute. If you feel or hear slight

CPRToday! Inc. © All Rights Reserved

cracking sound, you may be pressing too hard. Do not become alarmed and do not stop your rescue efforts! Damaged cartilage or cracked ribs are far less serious then a lost life. Simply apply less pressure as you continue compressions.

1 person CPR

Count aloud as you compress 30 times at the rate of about 3 compressions for every 2 seconds. Finish the cycle by giving the victim 2 breaths. This process should be performed 5 times - 30 compressions and 2 breaths - after which remember to check the victim's carotid artery for pulse (for no longer than 10 seconds) and other signs of consciousness. If you definitely not feel a pulse within 10 seconds, you should begin cycles of chest compressions and ventilations. Continue until an advanced airway is in place or victim regains consciousness.



2 person CPR

Count aloud as you compress 30 times at the rate of about 3 compressions for every 2 seconds. Finish the cycle by giving the victim 2 breaths. To prevent fatigue and deterioration in quality and rate of chest compressions the rescuers should change compressor and ventilator roles every 2 minutes - the switch should be accomplished as quickly as possible to minimize interruptions in compressions. Continue until an advanced airway is in place or victim regains consciousness.

DAVID R. CAREY
BOROUGH MAYOR

March 8, 2010

The Honorable Bob Herron
House of Representatives
Alaska State Capitol
Juneau, Alaska 99801-1182

Dear Representative Herron:

On behalf of the Soldotna Public Safety Communications Center and the Kenai Peninsula Borough, I would like to convey my professional opinion regarding HB 361, an Act mandating emergency dispatchers to attain and maintain CPR certification.

Public safety dispatchers fulfill a vital role in the public safety system. They are expected to make decisions regarding critical incidents on a regular and routine basis; decisions which may be a matter of life and death. In Alaska, public safety dispatchers make these decisions without the benefit of mandatory minimum training standards.

CPR training and certification is essential, although this does not sufficiently prepare a public safety dispatcher to provide CPR instructions over the phone. Guiding a caller through a medical procedure requires that an approved Emergency Medical Dispatch (EMD) program be in place.

In a public safety arena where most service providers---police, fire service, and EMS—are required to obtain and maintain minimum training standards; public safety dispatchers have been largely ignored or overlooked. Currently, there is no Alaskan governmental body or agency that prescribes, provides or regulates training of public safety dispatchers in the basic functions of their jobs. Instead, individual departments must establish their own training standards. The amount or type of training is left to the subjective decision of management.

Regardless of the level of training received, well-trained dispatchers and their poorly-trained counter-parts answer the same types of emergency calls. They must each make the same decisions and judgment calls that eventually determine the level and type of service a caller will receive. The establishment of state-wide minimum training standards would facilitate uniformity of basic training across all regions of our State.

Mandated CPR certification does not address the root cause of the problems we face in public safety dispatch.

Sincerely,

David R. Carey

David R. Carey, Kenai Peninsula Borough Mayor

CS FOR HOUSE BILL NO. 361( )

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SIXTH LEGISLATURE - SECOND SESSION

BY

Offered:
Referred:

Sponsor(s): REPRESENTATIVES FAIRCLOUGH, Dahlstrom

A BILL

FOR AN ACT ENTITLED

"An Act moving the statewide 911 coordinator position to the Department of Public Safety; requiring 911 dispatchers to be trained in cardiopulmonary resuscitation; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 18.60 is amended by adding a new section to read:

Article 13. Statewide 911 Coordinator.

Sec. 18.60.870. Statewide 911 Coordinator. A statewide 911 coordinator is established in the Department of Public Safety to coordinate and facilitate the implementation of 911 systems throughout the state. The 911 coordinator shall

(1) participate in efforts to set uniform statewide standards for automatic number identification and automatic location identification data transmission for telecommunications systems;

(2) make recommendations as necessary for implementation of basic and enhanced 911 service;

(3) facilitate and monitor the training of emergency dispatchers in cardiopulmonary resuscitation; in this paragraph, "dispatcher" has the meaning given in AS 29.35.132.

* **Sec. 2.** AS 29.35 is amended by adding a new section to read:

Sec. 29.35.132. Training of emergency dispatcher. A municipality shall require that emergency dispatchers on the 911 system be trained and currently certified in cardiopulmonary resuscitation. In this section, "dispatcher" has the meaning given the term "call taker" in AS 29.35.131(k).

* **Sec. 3.** AS 26.23.170(b) is repealed.

* **Sec. 4.** This Act takes effect September 1, 2010.

ANALYSIS: *(Attach a separate page if necessary)*

This legislation would amend AS 26.23.170(b) and require that all 911 dispatchers be trained in cardiopulmonary resuscitation (CPR). Thirty eight (38) department employees would be effected by this legislation. The estimated personnel and training costs are $2185.00 in FY11, and approximately $1092.00 each year thereafter. FY11 (38) need training X $20 avg. fee cost = $760.00, assuming that ½ would be in overtime status x (3) hrs avg. @ $25 avg. OT rate = $1425.00, or total FY11 cost of $2185.00.The department has several contracts across the state for dispatch services and this legislation may increase those costs in the future.

This bill changes the AIDEA board membership from the Commissioner of Revenue and the Commissioner of Commerce Community and Economic Development and one other commissioner (currently the Commissioner of Transportation) and 2 public members to the Commissioners of Revenue and Commerce Communiity and Economic Development and five public members each of whom have with expertise in private sector business and possesses demonstrated leadership skills.

Public members of the authority receive $100 compensation for each day spent on official business of AIDEA and may be reimbursed for actual and necessary expenses at the same rate paid to members of state boards under AS 39.20.180. Two additional public members has an estimated increased costs of 10 official business days * 3 members * (100) = 3,000 for compensation ; (600 + 60) * 10 *3 for travel and per diem = $19,800.

Sponsor Statement

CS House Bill 363 (L&C), AIDEA BOARD MEMBERSHIP

The Alaska Industrial Development and Export Authority (AIDEA) is a public corporation established by the Legislature with the purpose of promoting, developing, and advancing the general prosperity and economic welfare of the people of Alaska. It is a billion dollar corporation, with assets split in thirds between investments, loans, and development projects.

Currently state law mandates the five-member board consist of the Commissioner of Revenue, the Commissioner of Commerce, Community, and Economic Development, another department head appointed by the Governor (currently the ADOT commissioner), and two public members also appointed by the Governor.

CS HB 363 (L&C) changes the makeup of the board of directors of AIDEA to:

- Commissioner of Revenue
- Commissioner of Commerce, Community, and Economic Development
- Five private sector members with expertise in private sector business and demonstrated leadership skills

The goal of the restructure is to put private-sector strategic leadership at the helm of the state's development financing corporation. This will enable AIDEA to engage proactively in the development projects that should occur in the state of Alaska. In addition, the expansion to a 7-member board will allow AIDEA to form subcommittees and to represent a broader spectrum of industries and regions of Alaska.

MEMORANDUM

Date: April 5, 2010

To: Representative Bill Stoltze, Co-Chair
Representative Mike Hawker, Co-Chair
House Finance Committee

From: Rep. Bob Herron, Co-Chair
Rep. Cathy Muñoz, Co-Chair

RE: CS House Bill 363 (L&C), AIDEA MEMBERSHIP

I respectfully request a hearing for CSHB 363 (L&C), *"An Act relating to the membership of the Alaska Industrial Development and Export Authority."*

HB 363 puts five public members with expertise in private sector business and demonstrated leadership skills on the AIDEA board. This will enable AIDEA to engage proactively in the development projects in the state of Alaska.

List of Expected Witnesses (Amended 4.5.10):

- Rob Earl (staff to Rep. Herron) and Erin Harrington (staff to Rep. Austerman) – Presenting together in Person
- Ted Leonard – AIDEA Executive Director – In Person
- Wayne Stevens – State Chamber of Commerce – In Person
- Sara Fisher-Goad – AIDEA/AEA (Available for questions on the fiscal note)

If you have any questions or need additional information, please call Rob Earl at 465-5141.

Requirements: Financial Disclosure

Prohibitions: None

Term: 2 years

Description: 5 members - 3 appointed by Governor: 2 public members, and 1 head of a principal department of the Executive Branch or designee; plus the commissioners of the Department of Revenue and the Department of Commerce, Community, and Economic Development or their respective designees; members elect chair.

Function: To promote, develop, and advance the general prosperity and economic welfare of the people of Alaska; to relieve problems of unemployment, and to create additional employment, by providing various means of financing and by facilitating the financing of industrial, manufacturing, power transmission intertie, export and business enterprises and other facilities within the state through loan participation and loan guarantee programs, as well as owning specific facilities that create basic sector employment and enhance economic development in the state.

Chair: Members select.

Special facts: Public corporation; has ability to own and operate public use facilities which advance goals of Authority; quorum-majority; minutes of each meeting to Governor/Legislative Budget and Audit.

Compensation: Standard Travel and Per Diem. Public members receive $100 per day plus travel and lodging.

Meetings: 12 meetings per year.

AIDEA 2010 Board Meeting Schedule

Wed. March 17, 2010

*meetings will be held on Wednesdays at 10:30 a.m. unless otherwise indicated**

Wed. April 28, 2010
Wed. May 26, 2010
Wed. June 23, 2010
Wed. August 11, 2010
Wed. September 22, 2010
Wed. October 20, 2010
**Friday December 3, 2010*

NOTE: These dates and times are subject to change or cancellation. Please check back frequently for updated information. Meetings are held at the Authority's offices at 813 West Northern Lights Blvd. unless otherwise stated. If you have any questions, please contact Brenda Fuglestad at (907) 771-3008.

AIDEA Board Meeting Minutes Archive

AIDEA and AEA share a five-member Board.

Mr. Patrick Galvin
Commissioner
Department of Revenue
Appointed: 12/4/2006
Elected Chair: 11/10/2008

Member. Chair.
Commissioner, Alaska Department of Revenue. was appointed Commissioner of the Department of Revenue by Governor Sarah Palin effective December 4, 2006. Before his appointment he served as a Petroleum Land Manager for the Alaska Department of Natural Resources, Division of Oil and Gas. His responsibilities included managing the oil and gas leasing and licensing programs, lease administration, and oil and gas permitting for the division. His education background includes a Bachelor's degree in Visual Arts and Quantitative Economics from the University of California, San Diego, a Law Degree from the University of San Diego, and an MBA from San Diego State University. Prior to his position at DNR, Mr. Galvin served as Director of the Division of Governmental Coordination, overseeing the Alaska Coastal Management Program. Previously, Mr. Galvin was a private practice attorney focusing on municipal, corporate, and tribal law.

Designee for Commissioner Galvin is
Deputy Commissioner for Treasury Jerry Burnett

Mr. Michael T. Felix
(Public Member)
Appointed: 06/25/2009
Expires: 06/30/2010

Member.
Mr. Felix was appointed to the Board on May 29, 2009. Since February 2002, Mike Felix has served as president of AT&T Alascom, a wholly-owned subsidiary of AT&T, Inc. He has almost 35 years experience in various areas of the telecom and high-tech industries, having held several senior management and board positions in public and private companies. He began his career in 1975 at Tampa Electric Company, where he served in various management and engineering roles. In 1982, he was one of the founding employees at what is today Sprint -- where he held several technical and management leadership positions. From 1992 to 2001, Mr. Felix served as CEO or COO of several venture capital-backed startups in the telecom and software space. From 1989 to 2001, he also served on the boards of four start-up companies, and three private schools.

Mike is a graduate of the University of South Florida with a B.S. in Electrical Engineering. He and his wife, Bethany, currently reside in Anchorage, Alaska and have three adult children. Mr. Felix currently serves on the University of Alaska Foundation Board, the board of Commonwealth North, the Foraker Group Governing Board, and as an Honorary Commander for the 3rd Wing of the US Air Force at Elmendorf AFB

Mr. Emil Notti
Commissioner
Department of Commerce, Community and Economic Development
Appointed: 12/13/2006

Member.
Commissioner, Department of Commerce, Community and Economic Development, Governor Palin appointed Emil Notti as Commissioner on December 13, 2006. Mr. Notti is an engineer, prominent Alaska Native leader and Alaska public servant.

He graduated from Northrop University with a dual degree in aeronautical and electrical engineering. His extensive background includes first president of the Alaska Federation of Natives during which he was an instrumental player in establishing the state's Native corporations; past president of Doyon Limited; former Commissioner of the Department of Community and Regional Affairs under Governor Sheffield; 30-year board member with the National Bank of Alaska; and Veteran of the United States Navy.

Born in Koyukuk, Notti holds an Honorary Doctorate degree from Alaska Methodist University

Mr. Leo von Scheben, P.E., L.S., M.B.A.
Commissioner
Department of

Member.
Commissioner, Leo von Scheben, 65, is a registered professional engineer and land surveyor who has lived in Alaska since 1963. He received his B.S. degree in Industrial Engineering from the University of Florida in Gainesville, a B.S. degree in Civil Engineering from Bradley University in Peoria, Illinois, and a MBA from the University of Alaska Anchorage. He was one of the four founding partners of an architectural, engineering, land surveying and planning firm with offices in Alaska and the Pacific Northwest.

He has represented the Society of American Military Engineers on the Anchorage Post Industrial Liaison Committee, member of the 2006 S.A.M.E. Executive Group and Commissioner to the Alaska Private Industry Council. He was voted Alumni of the Year by Bradley University.

Transportation and Public Facilities
Appointed: 01/12/2007
Reappointed: 05/29/2009
Expires: 06/30/2011

He belongs to the American Society of Civil Engineers and the Alaska Society of Professional Land Surveyors.

Von Scheben was featured in "How to Form a Successful Design/Build Alliance" in the January 2006 edition of the Professional Services Management Journal PSMJ).

Mr. John R. Winther
(Public Member)
Appointed: 07/01/2003
Appointed Vice-Chair 8/23/2007
Reappointed: 09/21/2007
Expires: 06/30/2009
Reappointed: 05/29/2009
Expires: 06/30/2011

Member. Vice-Chair.
Mr. Winther was appointed to the Board of Directors on July 1, 2003. He was born in Fairbanks and raised in both Fairbanks and Juneau. He is a lifelong Alaskan who graduated from Lathrop High School and has resided in Petersburg since 1972. John has been in the commercial fishing business for 39 years, owning his own business for 35 of those years. He is currently the managing partner of Prowler Fisheries, based in Petersburg, Alaska, and also owns a crab vessel that fishes the Bering Sea. He is the founder and chairman of Winstar Petroleum; an Alaskan owned independent oil company with acreage on the North Slope. John served as director of Icicle Seafoods from 1980-1992 and also served on the North Pacific Fisheries Management Council from 1983-1989.

executive summary

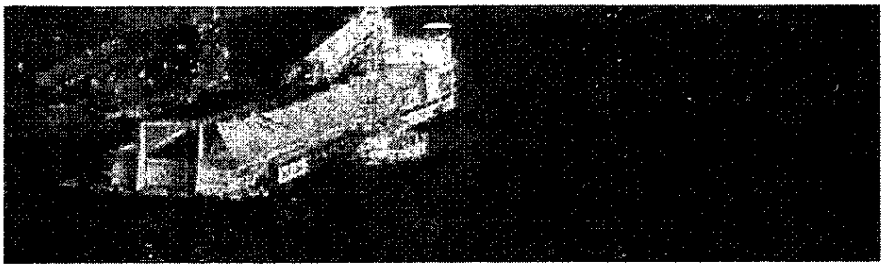
Background

AIDEA began a process in late 2008 to develop a strategic plan to establish how best to support the purpose of the Authority in assisting with economic development, job growth and job diversification in the state. Western Financial Group, along with Northern Economics and Gordon Davis, were engaged to work with AIDEA's management and staff to assist in the development of this strategic plan for AIDEA as well as to establish tools for an ongoing strategic planning process for the Authority. The process for developing the plan included all AIDEA staff, the Board and many outside stakeholders – both public and private.

In support of the development of the plan, the following activities were completed.

- An "environmental scan" was conducted to determine AIDEA's current role, perceived needs and roles, etc.
- A "SWOT" ("Strengths-Weaknesses-Opportunities-Threats") analysis was developed for both AIDEA and the Alaska economy
- A review of economic development finance "best practices" both nationally and internationally was compiled
- A series of potential strategies, financing tool menus and analyses were drafted
- A vision plan and a set of supporting objectives were developed
- Feedback and input from AIDEA's board, management team, AIDEA staff, and outside stakeholders including banks and other economic development agencies was obtained

It is anticipated that with the Board's consensus, AIDEA and the Western Financial Group will establish a permanent strategic planning function as well as implement certain immediate initiatives during the 2010 calendar year.



Summary of AIDEA's Mission & Strategic Vision

AIDEA's Mission

Early findings of the environmental scan provided some useful guidance on AIDEA's mission. While it has been recognized that AIDEA's strengths lie in its ability to bring financing to important projects in Alaska, the Authority is often criticized for being too reactive while many parties believe it should take a more proactive approach to economic development in the state.

At its March 13, 2009 meeting, AIDEA's Board modified the Authority's mission statement to place a more direct emphasis on economic development:

> **The mission of the Alaska Industrial Development and Export Authority is to promote, develop and advance economic growth and diversification in Alaska by providing various means of financing and investment.**

AIDEA's Strategic Vision

Even though AIDEA is a semi-independent authority from state government, its most effective role as an instrument for economic development will be realized if it partners with the state assuming the role as the primary financing arm for the state's comprehensive long term strategy for economic growth and stabilization.

To maintain its standing in the financial community, AIDEA will remain semi-independent from state government but through intergovernmental agreements and a central coordinating role, it will seek out and create if necessary, a full range of funding and financing options to implement economic development initiatives.

AIDEA will bring to the development and implementation of statewide economic growth strategies, a rigor of feasibility analysis that will ensure the greatest chance of success.

Consistent with the new mission statement as well as with the feedback from our stakeholders, **AIDEA's strategic vision is to actively partner with Alaskans as a dynamic resource in statewide economic development.** In order to fulfill this vision AIDEA will implement the following initiatives:

- **Diversify and grow AIDEA's assets to support economic development**
- **Improve AIDEA's existing programs and add targeted new economic development financing tools**
- **Expand the deployment and impact of AIDEA's economic development financing**

Further development of these initiatives, along with a series of 2-3 year objectives for each element are detailed in the body of this report.

executive summary

Summary of the SWOT Analysis

In order to provide a context for the development of the AIDEA Strategic Plan, a "Strengths–Weaknesses–Opportunities – Threats" ("SWOT") analysis was conducted both for the Alaska economy and for AIDEA itself. Although the purview of the Plan is limited to AIDEA's role in economic development finance, an understanding of how Alaska fits in the national and world economy, as well as how outside economic trends will affect Alaska, is necessary background for an understanding of AIDEA's role going forward.

Highlights of the SWOT for the Alaska economy include:

- While the Alaska economy continues to out-perform the U.S. overall, the global recession in all sectors does present potential risks for Alaska. The last year has seen 25-35% reductions in wealth, trade, industrial production, as well as very high volatility in commodities prices, including the key Alaska sectors of oil and minerals.

- It is too early to determine whether these global factors will result in secular (long term) restructuring of certain sectors and markets or will have only short-term effects, and to what degree those effects will influence the Alaskan economy. So far in this recession, credit market conditions and access to capital in Alaska remain considerably more favorable than in the rest of the country.

- The "1/3 Oil, 1/3 Federal, 1/3 Other (mostly resource-based)" structure of the Alaskan economy provides both positive and negative potential for future growth. Because both oil production and federal programs tend to remain fairly stable, they can be a continuing foundation for the Alaskan economy. Continued relatively high projected levels of construction, for example, indicate that the oil and federal sectors are providing that foundation despite the global recession. Volatility of oil prices, rapidly declining oil production and declining Congressional influence could, however, undermine the future support of that foundation. Commodities price volatility also makes the other resource-based segments of the Alaskan economy less certain.

1549

- Regional and urban/rural differences are exacerbated in Alaska. Because of the distances, topography and climate, the geography of the Alaska economy is challenging. Layered on top of the geographic challenges is the relatively recent introduction of a functioning cash economy to many of the more remote parts of the state. The multiple major differences among Alaska regions result in an even greater challenge to economic development than the "normal" urban/rural and state regional differences present in most Lower 48 states.

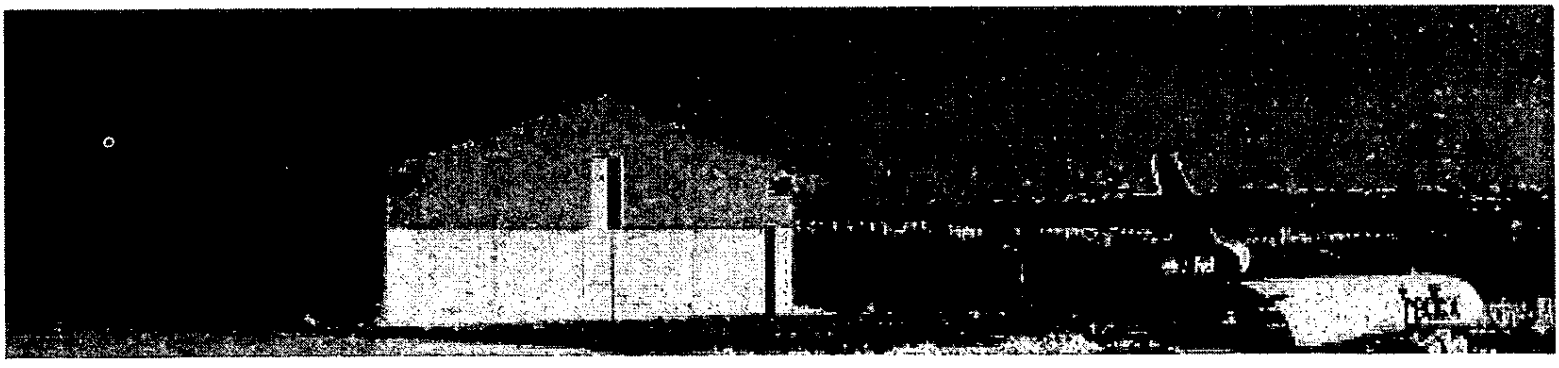
Highlights of the SWOT for AIDEA include:

- AIDEA's financial reserves and access to capital provide considerable capacity to support economic development financing for the state.

- AIDEA's institutional capacity (finance, project development, commercial lending) also provide potential for an expanded role, particularly in an environment where alternative funding / financing sources are under stress from the global financial markets upheaval.

- AIDEA's relatively limited statutory scope prevents (or hampers) participation in certain types of economic development finance activities pursued by similar agencies in other states.

- The lack of an overall strategic plan for Alaska economic development, and AIDEA's relatively passive stance in recent years, along with potential overall state budget constraints are barriers to expanded AIDEA participation in major projects.



Themes from the Environmental Scan

executive summary

The environmental scan, which gathered information regarding AIDEA from both inside and outside AIDEA and from both public and private sector sources, identified some themes about perceptions of AIDEA, ideas for AIDEA's future role and opinions about AIDEA programs.

In summary:

- AIDEA is perceived as competent and is a respected participant in the Alaska economy, although there remain significant, particularly private sector, economic actors that are unaware of AIDEA's mission, role and programs.

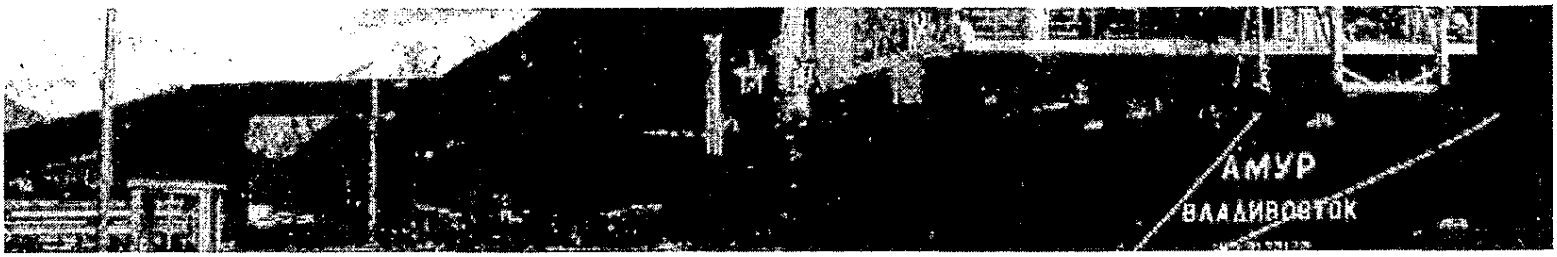
- AIDEA is viewed by certain economic development parties as reactive or passive, and by some as subject to potential political interference, or not sufficiently coordinated with other state agencies.

- Ideas about AIDEA's future role in the state's economic development activities were, for the most part, consistent with AIDEA's current program priorities – project financing and commercial lending support. Some respondents promoted the notion of a more active role for AIDEA in overall state economic development leadership.

- When asked about AIDEA's programs, there was a consensus from scan participants that AIDEA should take a more active approach to project development – particularly in developing infrastructure supporting minerals, gas, fisheries and other marine activities. There was also interest in expanding AIDEA's role as a lender alongside the banks, and potentially in providing capital for early stage companies.

- Multiple responders also favored an approach with AIDEA developing new programs for rural economic development.

1551



Highlights from Best Practices Review

The consulting team's review of best practices in economic development finance identified consistent patterns in structural approaches to economic development, in strategies, and in financing "tool kits".

While many different structural approaches, some common elements of successful economic development strategies include:

- Large stakeholder organizations, engaging key players from both the public and private sector
- Organized, long-term strategic planning efforts
- Designated lead agencies with both authority and responsibility for meeting economic development objectives

A number of common strategic approaches also dominate, including:

- Identification of key "traded-sector" (exporting) industry sectors and formation of "clusters" aimed at fostering growth in each individual sector.
- Development of, and management to, "theme" based vision, mission, goals & strategies, often through selection of target industries or categories of industries, for example "sustainable" or "creative". In some cases, these strategies also involve initiatives to "brand" a state or region's products in order to improve export market share.
- Finally, some of the most successful strategies have developed sophisticated metrics to measure the effectiveness of strategy elements and to provide goals and targets for the overall economic development effort. These measurement systems often include environmental, social, cultural and other benchmarks as well as the traditional measures of investment, jobs and income.

Similarly, the most successful economic development programs draw from a comprehensive toolbox of economic development financing tools, with particular emphasis on:

Grants, tax abatements, tax credits / rebates
Loan guarantees / participation
Public/Private partnerships
Infrastructure financing
Special condition lending / credit support
Venture capital & seed equity funds

While it should be emphasized that no state exemplifies all of the best practices in structure, strategy and financing, many states are working toward adopting best practices in all of these areas.

AIDEA's strategic plan team has evaluated the best practices overall with the intent of adopting only those elements most applicable to AIDEA's mission and roles and to the Alaska economic development environment.

AIDEA's Mission

AIDEA mission & strategies

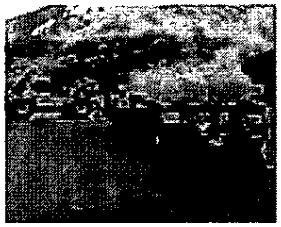
For the last several years, AIDEA's mission statement was:

The mission of the Alaska Industrial Development and Export Authority is to provide various means of financing to promote economic growth and diversification in Alaska.

As a key element of the current AIDEA planning process, an "environmental scan" was conducted to gather information on outside perceptions of AIDEA's role, performance and direction. Early findings of that scan provided some useful guidance on AIDEA's mission.

While it has been recognized that AIDEA's strengths lie in its ability to bring financing to important projects in Alaska, it is often criticized for being too reactive when it is clear from the statutory foundation that it was intended that the Authority would take a more proactive approach to economic development in the state. At its March 13, 2009 meeting, AIDEA's Board modified the Authority's mission statement to place a more direct emphasis on economic development:

The mission of the Alaska Industrial Development and Export Authority is to promote, develop and advance economic growth and diversification in Alaska by providing various means of financing and investment.



While this re-emphasis on the underlying objective – economic development – appropriately steers overall planning, the changed emphasis also involves some risk. The Authority prides itself on the strength of its balance sheet; on the performance of its investments and on its credit rating and standing within the credit markets. By moving beyond its current role, AIDEA risks that some of its efforts to promote economic growth and development in the state might fail, potentially jeopardizing its high standing in the financial communities. Any strategy that takes AIDEA into new ventures must be done in a way that continues to protect its standing in the financial community since that standing is as critical to its overall success as an arm of the state for economic growth, development and stabilization.

AIDEA's Strategic Vision

Even though AIDEA is a semi-independent authority from state government, its most effective role as an instrument for economic development will be realized if it partners with the state assuming the role as the primary financing arm for the state's comprehensive long term strategy for economic growth and stabilization.

To maintain its standing in the financial community, AIDEA will remain semi-independent from state government but through intergovernmental agreements and a central coordinating role, it will seek out and create if necessary, a full range of funding and financing options to implement economic development initiatives.

AIDEA will bring to the development and implementation of statewide economic growth strategies, a rigor of feasibility analysis that will ensure the greatest chance of success.

Consistent with the new mission statement as well as with the feedback from our stakeholders; **AIDEA's strategic vision is to actively partner with Alaskans as a dynamic resource in statewide economic development.** In order to fulfill this vision AIDEA will implement the following initiatives:

1. **Diversify and grow AIDEA's assets to support economic development**

2. **Improve AIDEA's existing programs and add targeted new economic development financing tools**

3. **Expand the deployment and impact of AIDEA's economic development financing**

Further development of these initiatives, along with a series of 2-3 year objectives for each element are detailed in the following sections of this report.

1 Diversify & Grow

diversify & grow AIDEA's assets to support economic development

In order to maintain AIDEA's capacity to support existing programs and expand economic development financing opportunities, AIDEA will be required to utilize its balance sheet capacity at a higher level. Additionally, AIDEA's "asset allocation" within the balance sheet will need to be modified. AIDEA may also seek to enable "off-balance-sheet" financing tools for large projects or projects outside the criteria for AIDEA's "normal" portfolio. Finally, AIDEA's new strategic vision and balance sheet strategies will need to be communicated to and vetted by key market participants, including rating agencies and potential investors.

1.1 1-3 Year Objectives – Diversify & Grow Assets

Update policies for balance sheet capacities and limitations

- **Asset/liability management**
- **Cash reserves**
- **Dividends**
- **Bond financing**

Utilize $150-200 million in overall additional portfolio capacity over the next three years

Allocate portions of the balance sheet by economic development potential and risk profile

Expand balance sheet capacity through some combination of:

- **Increased borrowing capacity (with moral obligation, or revised indenture, or acceptance of lower rating)**
- **Improved analyst perception of portfolio capacity**
- **Establish capacity to leverage AIDEA's balance sheet (or finance off-balance sheet) for very large projects**

1.2 Balance Sheet Analysis & Proposals

In order to determine AIDEA's intermediate to long-term capacity to finance economic development, WFG and AIDEA's finance team analyzed the components of the balance sheet and made a series of projections to determine impact of alternative financing scenarios.

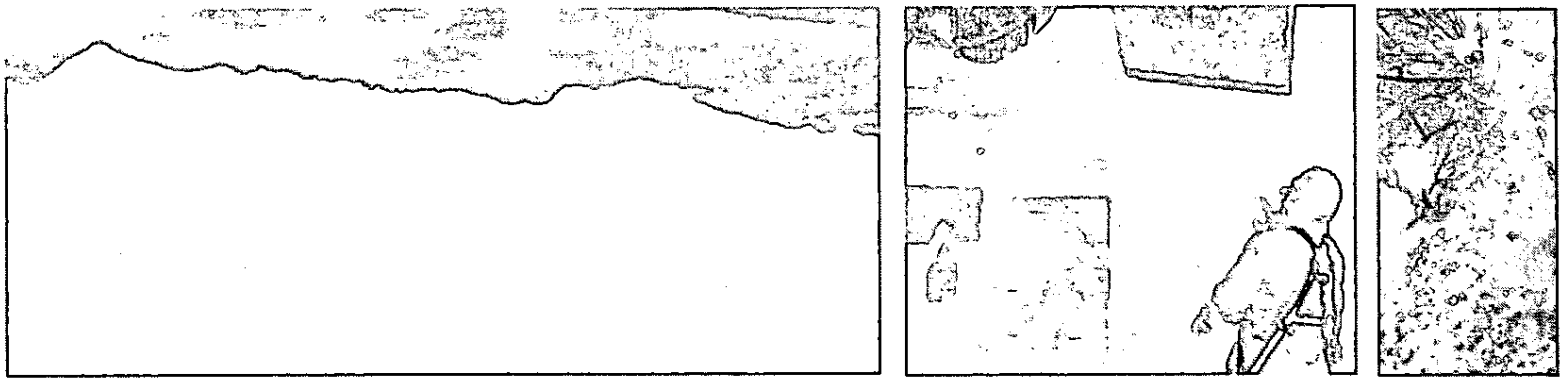
A series of four alternative future scenarios for AIDEA's balance sheet were run:

Scenario A
Base case - $50 million new loans, no new projects

Scenario B
Base case - $70 million new loans, no new projects

Scenario C
Base case - $50mm new loans
$20 million additional new projects financed from cash
Payback on development projects = 7% over 20 years

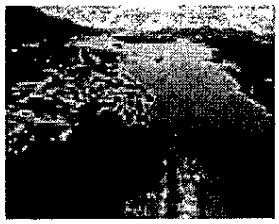
Scenario D
Base case - $50 million new loans
$20 million additional new projects financed from cash
Payback on development projects = 7% over 20 years
$100 million project – tax-exempt bonds in 5 years
Adjust cash to maintain .75 cash/debt, cash at 2x



diversify & grow AIDEA's assets to support economic development

The graphs on following pages provide visual depictions of the scenarios. To summarize the highlights of this element of the analysis:

- **AIDEA's balance sheet provides significant portfolio flexibility while retaining financing capacity.**
- **Under the updated assumptions incorporated in this analysis for loan portfolio behavior, AIDEA has considerable extra capacity (estimated at $150-200 million) to fund either expanded loan programs or additional projects.**
- **The impact of investing in loan participations or development projects is neutral to the Authority's balance sheet, depending on interest rate and default assumptions.**
- **Reducing investment balances to purchase loan participations and invest in development projects reduce funds available for debt payments.**
- **Reducing the dollar amount of loan participation purchases and not participating in economic development asset ownership, in the near term, increases bond capacity.**
- **Increase in AIDEA's net assets is slowed, but not stopped, if no more loans are made. However, the composition of the balance sheet changes, with investment balances increasing tremendously.**



While additional modeling of the AIDEA balance sheet during FY09-10 is intended to further refine the assumptions and scenarios, some policy and strategy issues emerge from this first level of analysis, and are caveats to the increased capacity indicated above:

- **The strategy proposed involves both growing and diversifying the AIDEA balance sheet and making internal dedications within the balance sheet to reflect the varying risk/return profiles of different types of projects. Under this approach, which includes some investments with higher risk profiles, the revolving fund should continue to grow and provide a dividend; however there may be times when part of the dividend is retained to fund portions of the programs with higher risk profiles.**

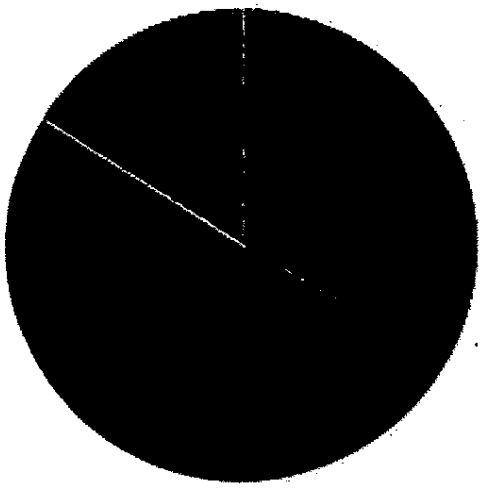
- **Although AIDEA does not have a covenant specifying a cash-to-debt ratio, staff and financial advisors believe AIDEA's relatively high cash balances compared to outstanding debt sustain current debt ratings. Investing in longer-term assets reduces access to liquid assets, possibly impacting future debt ratings.**

- **A major change to managing AIDEA's balance sheet risks impacting the fund's credit rating, conceivably resulting in higher interest rates on future AIDEA bond financing. Although maintaining the highest rating possible has been one of AIDEA's primary financial indicators, it is possible a trade-off would be worthwhile if, for example, a one-half notch rating reduction caused a 0.50% higher interest cost, but AIDEA gained $100 million additional capacity for economic development financing.**

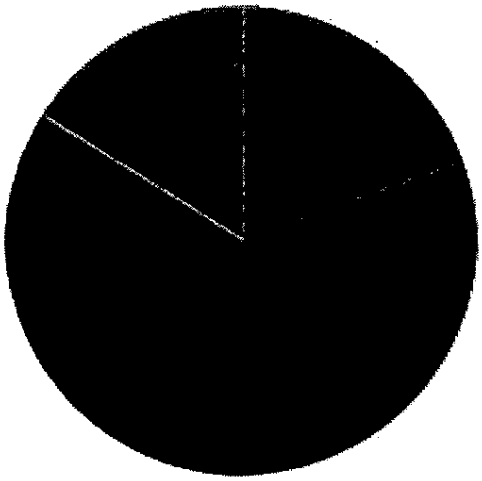
- **More detailed modeling during 2010 should focus on some additional assumptions and considerations:**

- **Higher default rates for loans and development projects should be modeled to provide some cushion against impacts of global economic changes and the potential to undertake more risky projects.**

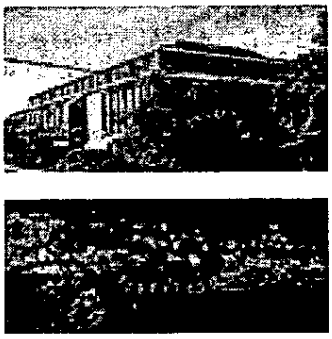
- **The historical rate-setting process for development projects has been tilted more toward economic development return to the state (such as jobs) than financial return to AIDEA (such as return on investment). Modeling should be done on the impact of alternative approaches to project funding pricing. The potential impact of the final resolution of business dealings related to the Healy Clean Coal project will need to be incorporated.**

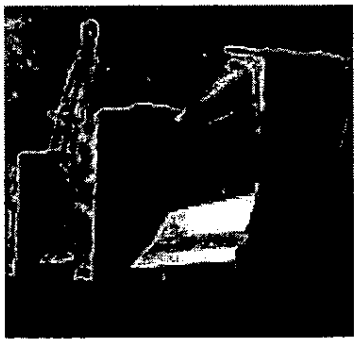


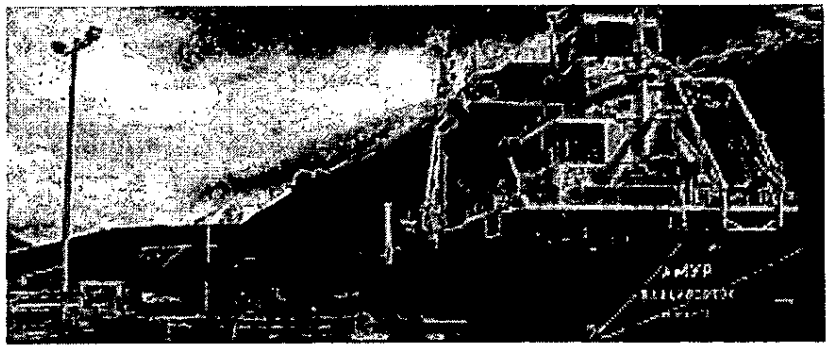
Balance Sheet Scenario A

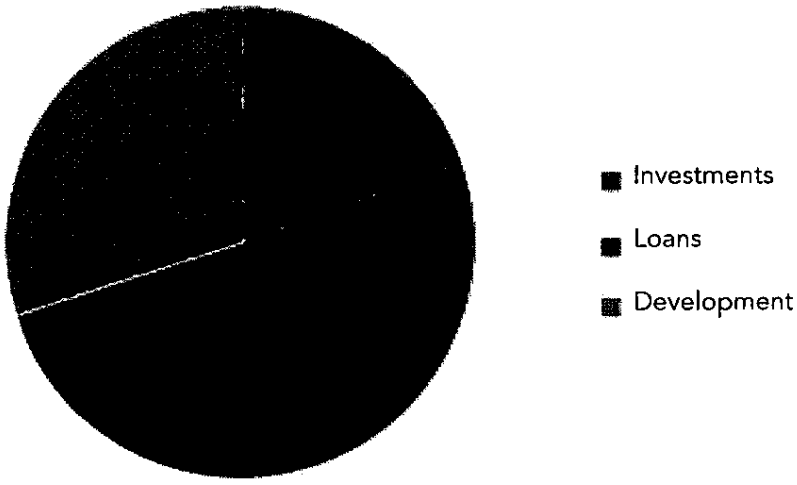


Balance Sheet Scenario B

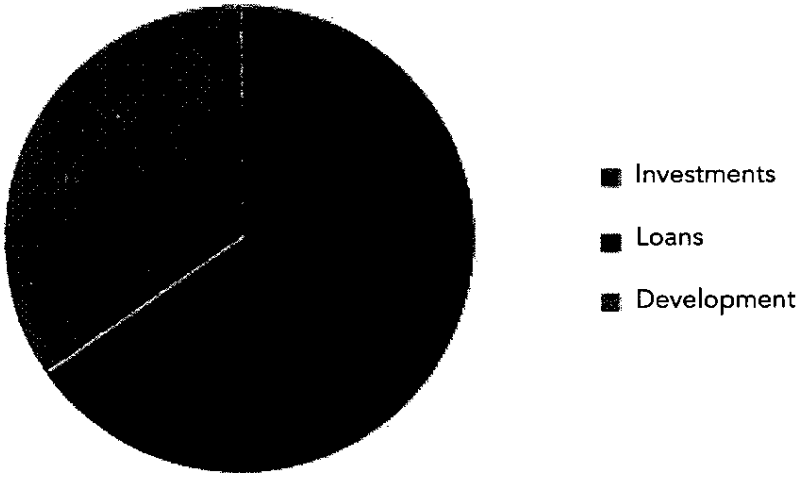




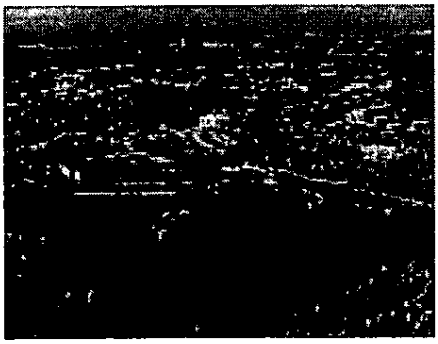


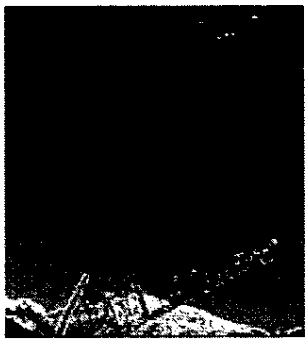


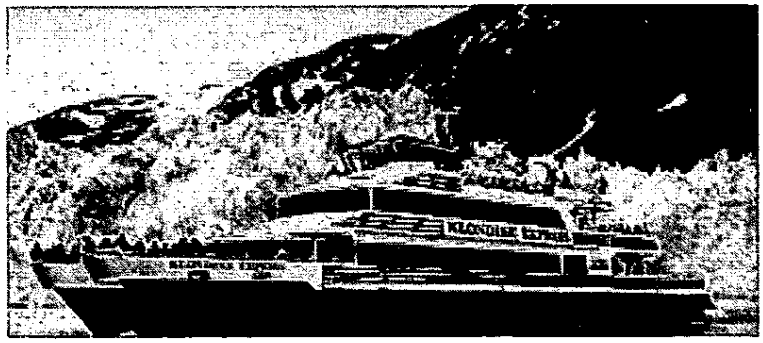
Balance Sheet Scenario C



Balance Sheet Scenario D







1560

2 Improve AIDEA's Existing Programs and Add Targeted New Economic Development Financing Tools

improve AIDEA's existing programs and add targeted new economic development financing tools

AIDEA's "marquee" Development Finance and Commercial Loan Participation programs have suffered reductions in demand from their peaks. While Development Finance has always been somewhat "event-driven", the recent reduction in Loan Participation Program demand resulted, at least to some extent, from structural impediments that could be changed. The strategic vision for AIDEA anticipates actions to make these programs more viable. The global economic environment and specific local economic conditions in Alaska also provide potential opportunity for implementation by AIDEA of new financing tools

2.1 1-3 Year Objectives – Improve & Add Programs – Commercial Finance

Expand both the perception and the reality of the commercial lending program from "credit" to "Commercial Finance"

Regain recent historic levels of the loan participation program for real estate and equipment

Investigate the potential for a sector-targeted operating line loan participation program representing up to a $25 million addition to AIDEA's portfolio

Match rates to economic development objectives

- **"Market" rates where appropriate**
- **Consider risk-adjusted, incentive rates**

Support business growth by providing terms that would not otherwise be available in the commercial financing market

- **Support market values / liquidity**
- **Support small banks / regions**

Link Commercial Finance programs to financial and economic development metrics.

1561

2.2 1-3 Year Objectives – Improve & Add Programs – Development Finance

Ramp up development project sponsorship to 1-3 projects per year and a total of $150-200 million addition to AIDEA portfolio over three years

Develop capacity for "equity" ownership in entities / assets beyond "projects" and consistent with the mission with a target of up to $50 million addition to the AIDEA portfolio over three years

Set aside "risk capital" to fund R&D and other "seed" activities that could drive larger economic development opportunities

Develop structures for "pooled" development project and/or business financing segments of the portfolio in order to expand financing availability while maintaining portfolio creditworthiness

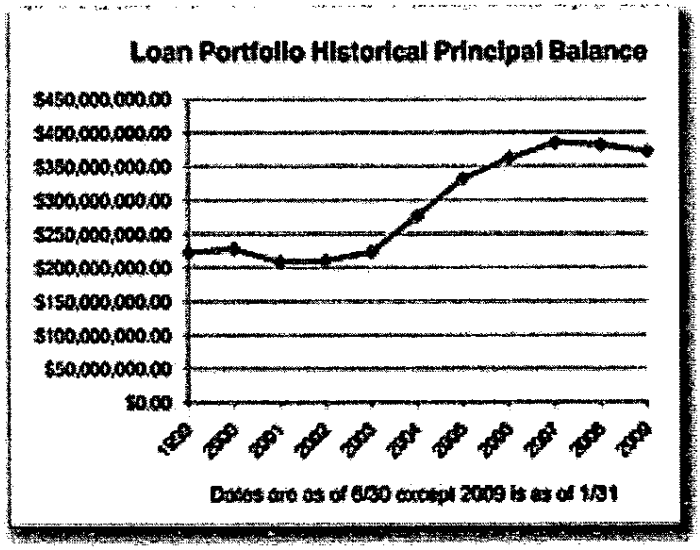
2.3 Analysis & Proposals – Commercial Finance Programs

2.3.1 Mission & Role of AIDEA's Commercial Finance Programs

AIDEA's commercial loan programs serve the Authority's mission of providing economic development financing by playing a number of roles in the Alaska economy

- **Supporting growth of business in Alaska by providing terms that would not otherwise be available in the commercial financing market.**
- **Supporting market values and liquidity in Alaska's economy.**
- **Supporting small banks and more remote regions of the state.**

Additionally, the Commercial Finance programs play an important role in AIDEA's financial operations – providing a reliable and consistent source of revenue to AIDEA's balance sheet.



2.3.2 Current Status of AIDEA Commercial Loan Participation Programs

improve AIDEA's existing programs and add targeted new economic development financing tool

Most AIDEA program borrowers have customarily been issued long-term, fixed-rate loans, with an average maturity of just over 20 years. Actual experience for the AIDEA portfolio is that loans are paid off substantially before when they are due – averaging between 6 and 7 years.

The Commercial Loan Participation program has grown to represent a significant portion of AIDEA's assets. As of June 30, 2009, AIDEA's outstanding commercial loan participation portfolio consisted of 253 outstanding loans with a principal balance of $368,209,000. The tables below (all derived from the Credit Division's report as of June 30, 2009) provide a snapshot of the composition of the AIDEA loan portfolio.

SUMMARY COMPOSITION OF AIDEA LOAN PORTFOLIO

LOAN PROGRAM TYPE	#	$ AMOUNT (000'S)
APPROPRIATED	7	$95
DIRECT LOAN(AEL&P)	1	$3,277
LOAN PARTICIPATION:		
BONDS OUTSTANDING	0	$0
BONDS RETIRED	1	$859
INTERNALLY FUNDED	235	$339,487
OREO SALE FINANCING	9	$24,491
OTHER	0	$0

2.3.3 Future Profile of AIDEA Commercial Finance Programs

improve AIDEA's existing programs and add targeted new economic development financing tool

While AIDEA has statutory authority for programs for rural financing and a loan guarantee program, the vast majority of direct activity is in the loan participation program, with the smaller financing programs run for AIDEA by Commerce and the guarantee program effectively inactive.

Within the loan participation program all recent activity has been in the form of real estate loans, with no activity in operating lines or other business lending. With the turmoil in the global financial markets starting late in 2007, and the nature of the AIDEA loan rate-setting procedure, there has been limited activity even in real estate loans. Recent trends have re-aligned AIDEA's rates with market levels, but the recession has reduced overall loan demand, so activity remains at low ebb.

Looking to the future, however, the analysis leads to several proposals for improvements / additions to AIDEA's commercial financing programs:

- Establish metrics for economic development objectives related to commercial finance tools and structure, track and adjust loans relative to those metrics.
- More directly guide the small loan programs managed by Commerce to make sure they optimize AIDEA's overall program targeting and to ensure they have adequate capital to meet the identified need.
- Ensure that AIDEA's commercial loan rates are consistent with market trends and balance the need for financial prudence with the programs' objective to serve as an economic development financing tool for Alaska.
- Establish structure and authority to go beyond direct loan participation (to activate guarantee programs, for example) and beyond real estate lending, should a need for these types of commercial financing arise in the future.

2.3.4 AIDEA Commercial Loan Program Rates and Terms

There has been considerable attention in the last year to the process for setting loan interest rates for AIDEA's commercial loan participation program. Current statutes require rates to be based on cost of funds; the Authority has implemented a rate-setting process by which a third-party provides a proxy for AIDEA's cost of capital based on hypothetical bond rates, augmented with a spread to reflect AIDEA's cost and return. While this process has advantages (semi-independence, insulation from influence), it also has problems (lack of transparency). The principal issue that has arisen, however, is that the current system resulted in AIDEA's loan rates being "above market" for a considerable period.

As the financing programs were examined, and a new approach to managing AIDEA's balance sheet proposed, a different approach to setting rates for AIDEA loan programs was considered:

Rather than using a closed process to develop a "synthetic" cost of capital based on issuing bonds (which AIDEA has NOT done to fund loans for many years), tie AIDEA's loan rates to:

- **Comparable market rates based on published indices, and**
- **Economic development potential of the business or facility to be financed**

By using published indices, the independence (and freedom from influence) of the current system can be maintained with the added element of transparency.

AIDEA's commercial finance team evaluated potential market proxies for the proposed structure and identified two candidate published indices (from the Federal Home Loan Bank and the Federal Farm Credit Bank) for consideration. During 2010, a more thorough evaluation of the potential drivers for the proposed rate-setting structure will be completed and a final proposal for an approach that meets all of the AIDEA policy and program objectives will be recommended.

2.3.5 AIDEA Commercial Finance Metrics and Incentive Rates

improve AIDEA's existing programs and add targeted new economic development financing tool

In addition to the external rate-setting mechanism, the potential for enabling "incentive" pricing for AIDEA loan participations and other commercial lending programs were evaluated. In the most basic terms, this would involve providing reduced borrowing costs for business and facility financings that achieve high levels of job creation, and allow AIDEA's funds to be leveraged more effectively.

As an example of how this system might be structured (details to be developed during 2010), a draft a set of Incentive Rate Program Elements is included below:

Basic Rate (no incentives)

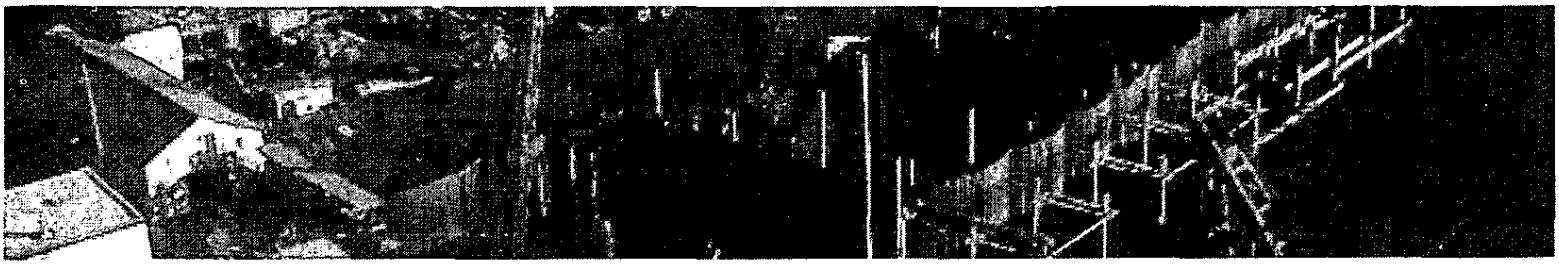
- **Typical investor-held real estate purchase**
- **Real estate re-finance**
- **Construction with no long-term job creation**

Eligible for Incentive Rate

- **Funds used by companies to purchase property and/or equipment for business expansion**
- **Start-up companies that employ a threshold number of people**
- **Refinancing of existing debt that frees up working capital used for business expansion and increased employment**
- **Business financing in rural/remote areas of the state**
- **Business financing in targeted sectors of the economy**

Nature of Incentives

- **Interest rate rebates (as opposed to up-front rate reductions)**
- **Annual reporting by borrower on economic development metrics (in arrears)**
- **Interest rate rebate direct to borrower – may be used to pay down AIDEA debt without prepayment penalty**
- **Tiered rebates**
  - **x% reduction for 3 years for companies that employ y number of individuals**
  - **x+0.5% reduction for 5 years for start-up companies that employ y number of individuals**
  - **x+1.0% reduction for 5 years for start-up companies that employ y individuals AND build new facilities.**



As previously noted, the above structure is intended just as an example of the potential incentive rate system and will be refined for presentation to and approval by the Board (and for any statutory, regulation changes required). It is likely that, in order to protect AIDEA's creditworthiness, a limit would be established for either the total dollar amount of loans with incentive rates or for a percentage of the total loan portfolio.

Alongside the implementation of a new approach to commercial lending, AIDEA's Strategic Plan proposes that overall economic development metrics be applied for the first time to these programs. Some concepts for those metrics are included in Section 3.5.2 of this report. Similarly, it is expected that the commercial loan programs will be directed by a common set of targets by sector and region as detailed in the "Outreach" portion of this report below.

2.4 Analysis & Proposals – Development Finance

2.4.1 Mission and Role of AIDEA's Development Finance Programs

AIDEA's development finance program is directed at financing large projects with potential for significant private investment and job growth. Due to the unique nature of AIDEA's authorities, the most common structure for these projects is AIDEA financing and owning a facility that serves as infrastructure for a large private development (Delong Mountain Transportation System, FedEx Maintenance Facility), or for a specific regional industry (Ketchikan Shipyard). These projects fit the accepted definition of "public-private partnerships" and tend to involve complex financial relationships, long-term commitments from both parties, and relatively high levels of risk.

Not surprisingly, given the risk profile of development projects of this nature, AIDEA has had notable failures to go along with the successes. While losses should be expected for a major economic development finance program, the larger challenge to programs of this nature is what the private sector refers to as "deal flow". Because investment-worthy large public-private projects of size are difficult to develop, they are also infrequent – particularly in a relatively small (economically) state like Alaska.

This relative paucity of potential "deals" has combined with a passive policy approach to AIDEA's development finance programs to result in a very low level of activity of this program for the past few years. However, based on the analysis of the Alaska economy, the environmental scan, and the best practices review, the analysis indicates a need for an enhanced and expanded program in the future. AIDEA's strong balance sheet provides the platform for the development finance program to support AIDEA's mission by returning to the role of "project finance" investment bank for the state's major economic development opportunities.

2.4.2 Structure & Potential for AIDEA's Development Finance Programs

improve AIDEA's existing programs and add targeted new economic development financing tool

Having identified a continued need for project development finance, an in-depth analysis of the current structure of the program was conducted and the current program compared with potential approaches and tools identified in the best practices review..

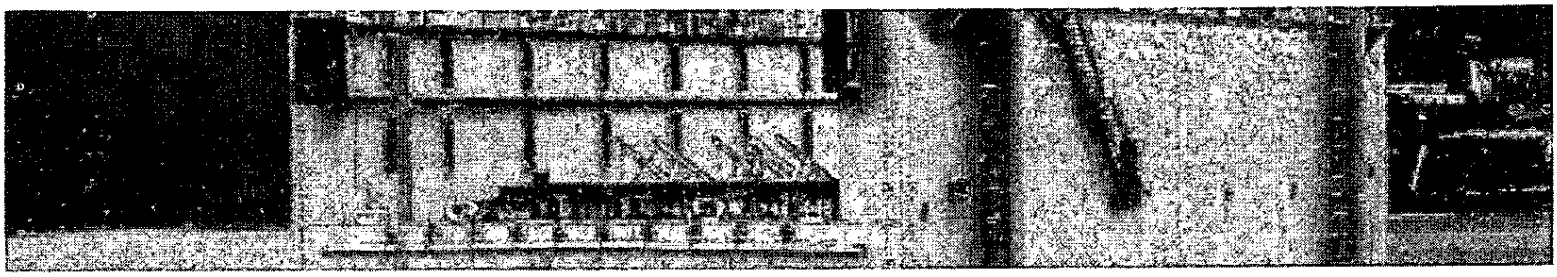
During the review process, the following opportunities to improve or expand AIDEA's development finance programs were suggested.

- **Project Finance (investment banking)**
- **Equity (beyond "projects")**
- **Feasibility funding**
- **R&D**
- **RFPs for target projects**

Each of these topics was evaluated for applicability to AIDEA's future program needs and a summary produced as follows:

Direct Project Financing – Investment banking

- **AIDEA's statutes define its authority to own and operate a project.**
- **The interpretation of this language is that AIDEA must "own" all or a portion of financed facilities, rather than being simply a lender.**
- **AIDEA should explore structures (or statutory changes) that facilitate a "project financing" role for AIDEA in order to open up opportunities where it is not necessary or advantageous for AIDEA to take an ownership interest.**



Further exploring this topic, AIDEA's potential project financing role was analyzed in the context of the following statement:

Project finance involves the creation of a legally independent project company financed with nonrecourse debt (and equity from one or more corporations known as sponsoring firms) for the purpose of financing investment in a single-purpose capital asset, usually with a limited life. (Harvard Business School, An Overview of Project Finance and Infrastructure Finance – 2006 Update. October 2007).

Additionally Project Financing (Investment Banking) was compared and contrasted with Corporate or conventional financing (AIDEA Loan Participation). See the table below:

FACTOR	PROJECT FINANCE	LOAN PARTICIPATION
BANK TYPE	INVESTMENT BANK	COMMERCIAL BANK
ROLE	SPONSOR, ACTIVE	PASSIVE
INTEREST	PROJECT MANAGER	OBSERVER
ACTIVITY	ADVOCATE, SPONSOR	DISPASSIONATE
OWNED	+/- OWNED	NOT OWNED
SENSITIVE	COULD BE POLITICAL	LESS POLITICAL
SIZE	GENERALLY LARGER	SMALLER
ENTITY	PUBLIC OR PRIVATE	PRIVATE

improve AIDEA's existing programs and add targeted new economic development financing tool

Development Finance Project Ownership

- **AIDEA's development finance program allows AIDEA to own "development projects" as a method of financing, but not to obtain stock in a company or to finance intangible assets.**

- **Review of other economic development agencies and authorities nationwide would indicate that there is a need for additional tools in Alaska for the Development Finance program that would allow for different aspects of ownership including venture capital, ownership of stock in companies, financing early development projects (for example through funding initial design/permitting, etc.) and investing in intangible assets such as intellectual property or engineering designs.**

Further analyzing this issue, "projects" vs. other potential financing structures were explored starting with the relevant portions of the current AIDEA statute. The conclusions based on review of the statutes (and interpretations of same) are consistent with the above summaries:

- **AIDEA has the authority to do project financing but only if it takes an ownership interest.**

- **AIDEA can finance plant (facility) projects only but not plants, facilities or commercial activities by a business enterprise.**

- **AIDEA can finance a project with both debt and "cash".**

- **At this time AIDEA, as a Development Finance Project, cannot invest in a company even if it meets the definition of project.**

- **Additional work needs to be done to investigate the difference between tangible projects (infrastructure, ports) and intangible projects (corporations, intellectual property) to determine how best to use the development finance program.**

If changes in statute and regulation were made, regarding these aspects of project development finance and ownership, then:

- **AIDEA can spur economic development (and increase deal flow) by making a modest investment in:**
  - **Funding in development definition**
  - **Front end engineering design**
  - **Development of a project concept through to business plan**
  - **Through early financing AIDEA could assure that Alaska universities are conducting research with the potential to leverage near-term technology in Alaska.**
  - **A seed-fund for targeted support of technology-transfer oriented R&D at Alaska's higher-education institutions and then invest in businesses flowing out of that research.**

Further implementation strategies related to the above opportunities will be explored during 2010 as part of the Implementation Plan along with potential statute/regulation changes to support improved and expanded Development Finance programs.

3 Expand the Deployment & Impact of AIDEA's Economic Development Financing

expand the deployment & impact of AIDEA's economic development financing

AIDEA's reputation as a major financier of economic development in the state is well established, but the Authority is perceived as a "passive" player. This perception is based on the reality that AIDEA has not been organized or oriented to promoting the availability of AIDEA's financing programs, nor has the Authority recruited projects to be financed in any organized fashion. To achieve AIDEA's mission and the strategic objectives, AIDEA will establish an outreach and deployment function to increase awareness of specific AIDEA financing capacities and to establish the Authority's role as "coordinator" or "arranger" of the whole range of state economic development financing tools.

AIDEA's deployment activities should be targeted to industry sectors, regions, project / asset types and even specific companies in some cases to ensure consistency with the state's and AIDEA's economic development strategies and goals.

While building consensus on statewide economic development goals and strategies is the responsibility of the state, AIDEA envisions its economic development agenda focused on initiatives that capitalize on the unique attributes of Alaska and that add value to existing industries and existing employment as well as future-oriented sectors and businesses.

Expanding programs and assuming a more active role in overall state economic development will require that AIDEA's efficiency and effectiveness be enhanced. Detailed analysis and concepts for resource, organization and process changes are provided in this section of the report.

3.1 1-3 Year Objectives – Expand AIDEA's Economic Development Deployment & Impact

Determine short/intermediate term economic sector targets (in coordination with statewide planning efforts) and tailor AIDEA strategies and programs to those target sectors

Establish AIDEA strategies for the sector targets meeting economic development criteria:

- **Consistent with strategic initiatives**
- **Future-oriented**
- **Based on reality / market-driven**
- **Meeting identified needs:**
  - **Rural**
  - **Industries / sectors**
- **Leveraging known projects / existing projects**

Target AIDEA investments to major economic development "themes":

- **General**
  - **Strategic Location**
  - **Comparative Advantage**
  - **Import Substitution**
  - **Traded Sector**
  - **Value added**
- **Alaska-specific**
  - **Alternative energy, in-state energy**
  - **New rural technology**
  - **Arctic transport**
  - **Multi-purpose hubs**

Develop capacity for outreach to all relevant private and public sector participants in Alaska economic development to increase awareness of AIDEA programs and capabilities

Establish systems for outreach, intake, analysis and sponsorship of target economic development financing alternatives

Recruit targeted projects into AIDEA's economic development finance "funnel" with the objective of increasing both the Development Finance and Commercial Finance portfolios significantly in three years

Establish AIDEA's role in the context of overall state economic development efforts.

- "Board member" input to overall state economic development strategy
- "CFO" – providing the state's resources for financial and business feasibility analysis
- Principal public " investment banker" for state economic development programs and projects
- Current and expanded AIDEA finance tools
- "One-stop" portal to all state economic development finance tools

Develop a single point of contact financing capability to support targeted private sector development and leverage state, federal and private capital by assembling multi-source project funding packages

- Major Project Sponsorship / Ownership
- Medium to major projects with public-private imperative
- Loan participation or guarantees
- Leverage other state programs and funding

Develop internal systems and processes for rapid and efficient "intake" and assignment of economic development financing opportunities

Re-engineer internal AIDEA organizational structure, systems, decision-making processes consistent with the mission and program objectives

Aggressively manage existing projects for maximum economic development benefit, while maintaining financial prudence

3.2 Target Sectors for AIDEA Investment Development

The following target sectors have been identified for potential project investment. It is anticipated that these sectors or clusters will form the basis of future economic development finance project.

3.3 Integration of AIDEA Programs & Activities with Overall State Economic Development Strategies

expand the deployment & impact of AIDEA's economic development financing

Multiple state agencies and authorities participate to some degree in economic development activities.

AIDEA's mission, statutory authorities and strategic direction promote the establishment of a more active and central role for the Authority in overall state economic development efforts. This strategic vision anticipates that AIDEA will be an active participant in the state economic development efforts.

Further, the strategy anticipates that AIDEA would serve as the central financial resource for the state's ongoing economic development activities, advising other state agencies on business and financial feasibility of initiatives, identifying barriers to implementation of financing and providing options to overcome those barriers.

AIDEA will be the principal architect for the state for financing statewide economic development efforts by implementing a "one-stop" process for financing economic development initiatives.

This process will include coordinating efforts by the state, boroughs and municipalities with regard to implementation and financing of statewide initiatives, pursuing public/private partnerships to achieve statewide initiatives, and working with the legislature to create new financing and funding mechanisms.

In this role, AIDEA will take the lead on project financing, management, and ownership when it is the most appropriate organization to do so, particularly on major projects where well-developed skills in project assessment, financing and management are essential.

3.4 Analysis & Proposals – AIDEA Outreach

3.4.1 Outreach Concept / Objectives

The Environmental Scan and the overall low level of loan and project activity in recent years both indicate that AIDEA's "passive" approach to business development is not sufficient to ensure continued success in meeting economic development finance objectives for the state. A more active "outreach" program by AIDEA aimed at significantly increasing the volume of loan and project prospects and at translating those prospects efficiently into loans and development projects will be taken. In summary, the AIDEA outreach concept includes the following elements:

- **Add a "Business Development" function at AIDEA dedicated to developing and implementing a broad-based outreach program to both the public and private sectors.**
- **Develop outreach initiatives and targets based on the sectors and regions identified in the SWOT, environmental scan and state economic development strategies**
- **Add a "Single-Point-of-Contact" or "One-Stop-Shopping" function at AIDEA dedicated to managing new processes for intake, evaluation and disposition of economic development finance prospects and opportunities.**
- **Establish business and technical advisory committees to leverage AIDEA's internal resources in outreach, evaluation and implementation of the expanded AIDEA programs.**

3.4.2 Outreach Resources & Organization

To assist in identifying new economic development opportunities AIDEA will add three, primarily outward-looking, resources to assist in filling the business development "funnel":

- **AIDEA Business Development Officer**
- **AIDEA Business Advisory Committee**
- **AIDEA Technical Advisory Committee**

These resources would manage and implement the outreach initiatives aimed at raising AIDEA's profile in both public and private sector economic development circles and at seeking specific economic development opportunities.

Additionally, the Team recommends adding one, primarily internally-oriented resource:

- **AIDEA Economic Development Officer**

This position would be responsible for designing and implementing the "one-stop" center for economic development finance. This function would, although directed mostly at making AIDEA more efficient and effective, also serve as a resource for all of the state's economic development functions. This latter function would be accomplished by being very knowledgeable about all economic development finance mechanisms (whether AIDEA or not) and having the appropriate contact to "triage" opportunities and outsource those opportunities that, for whatever reason, don't fit AIDEA's programs.

The best practices review indicates that there is value in having an intake mechanism for the private sector that is quick and efficient and who can take a more proactive approach to dealing with inquiries. Most business people do not have the patience and/or time to figure out how to sort through the myriad agencies and programs to determine which mechanisms are appropriate for their need.

3.4.3 Outreach Initiatives

In order to accomplish the goal to "fill the funnel", a number of outreach initiatives are being considered, to be finalized by the new resources during 2010. It is expected that the Business Advisory and Technical Advisory committees would be active "multipliers" in these efforts. Future outreach initiatives include:

- **Annual Economic Development Finance "Summit"**
- **R&D "seed" programs**
- **RFP/RFI's for potential projects**
- **Industry sector-specific financing "workshops"**

These initiatives, of course, would be supplementary to a well-designed and implemented "traditional" marketing program aimed at specific industry sectors, related parties and potential partners.

3.4.4 Outreach Targets

Based on the Environmental Scan and the Best Practices Review, initial target categories for the outreach effort have been compiled, including:

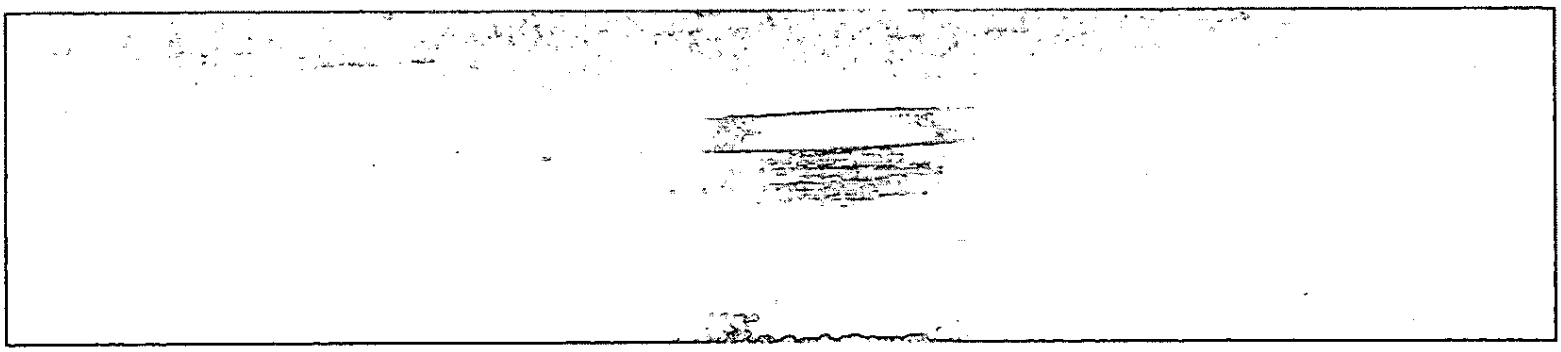
Public Sector

- **State agencies involved in economic development**
- **Federal agencies involved in economic & community development**
- **Federal agencies with major operations in Alaska**
- **Boroughs and local governments**
- **ARDORS**
- **Universities, colleges**

Private Sector

- **Target industry sectors (see Preliminary Sectors section above)**
- **ANCSA corporations**
- **Commercial banks**
- **Investment banks**
- **Institutional investors**
  - **Pension funds**
  - **Endowments**
  - **Insurers**
- **Business professionals**
  - **Legal**
  - **Real estate**
  - **Engineering & design**
  - **Construction**
  - **Accounting & tax consulting**
- **Labor unions**

Specific targets and communications strategies will be developed by the Team during 2010.



3.5 Analysis & Proposals – AIDEA Structure & Processess

expand the deployment & impact of AIDEA's economic development financing

AIDEA's structure, staffing, processes and systems were reviewed and several areas for potential improvement were identified. In summary, the key elements of these proposed improvements involve:

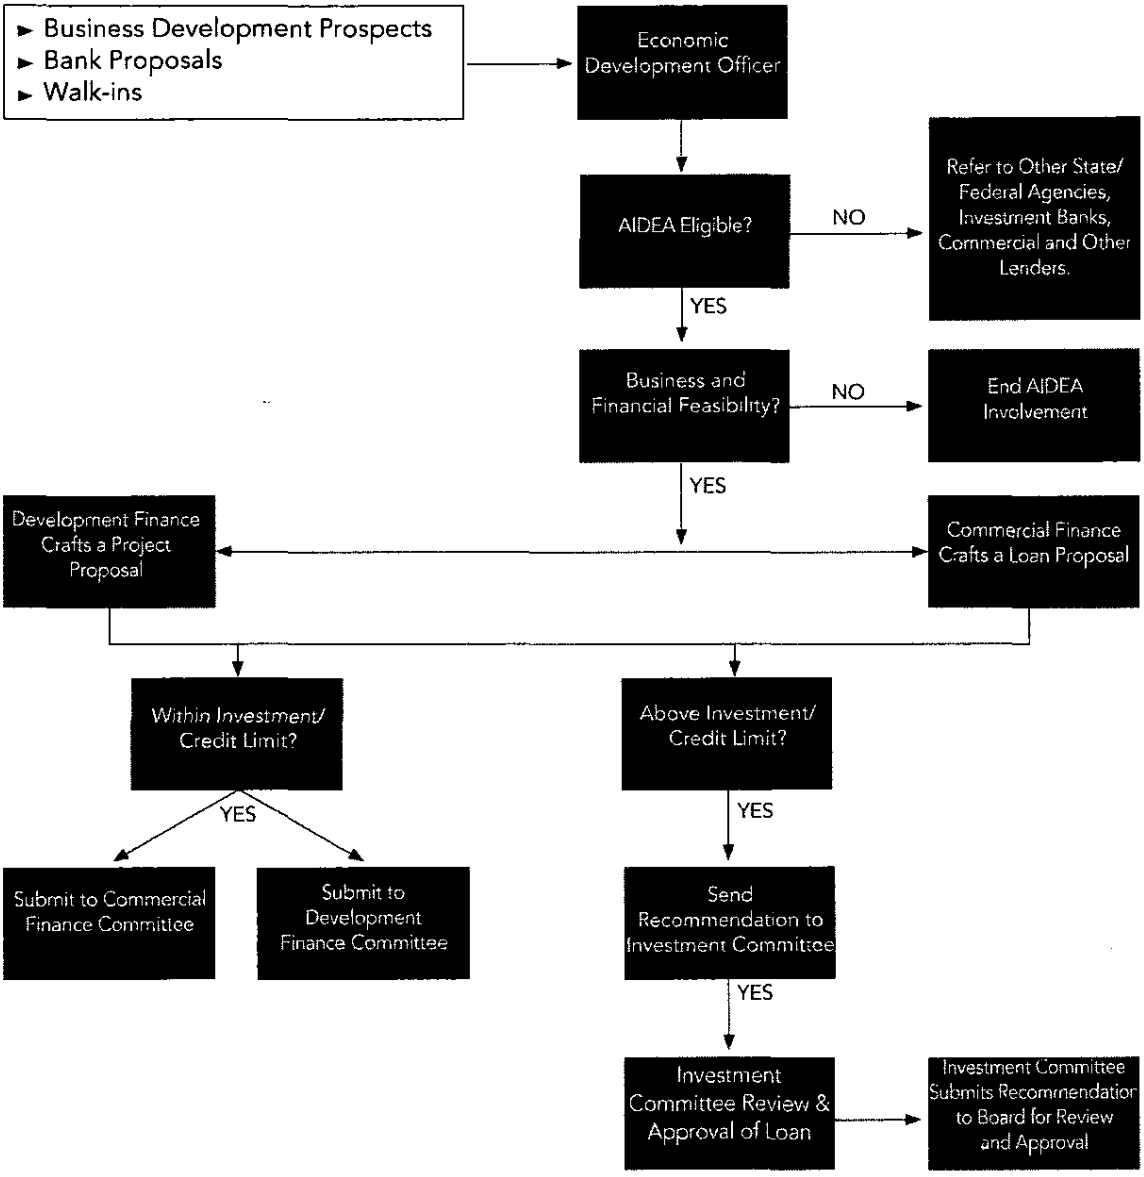
- Intake, analysis, approval processes and structure
- Metrics & performance measures
- Asset Management

3.5.1 Intake, Analysis & Approval Processes & Structure

Based on the review of best practices and on feedback received through the AIDEA environmental scan, the Strategic Plan Team derived the concept of a "One-Stop-Shop" or single-point-of-contact resource and process to improve handling of economic development financing opportunities. This concept would involve both the addition of a dedicated resource for this purpose and the modification of AIDEA's internal procedures to take advantage of this resource. The previous section of this report detailed the "outreach" components of the one-stop-shop concept. This section deals specifically with the internal role for that resource.

Central to this concept is that addition of an Economic Development Officer charged with being fully informed about AIDEA's programs, processes and criteria for involvement and with being the single point of contact for intake and review of potential economic development financing prospects.

Once the resource is in place, AIDEA's processes would be re-engineered to include the following steps (with parallel tracks for "projects" and "loans"):



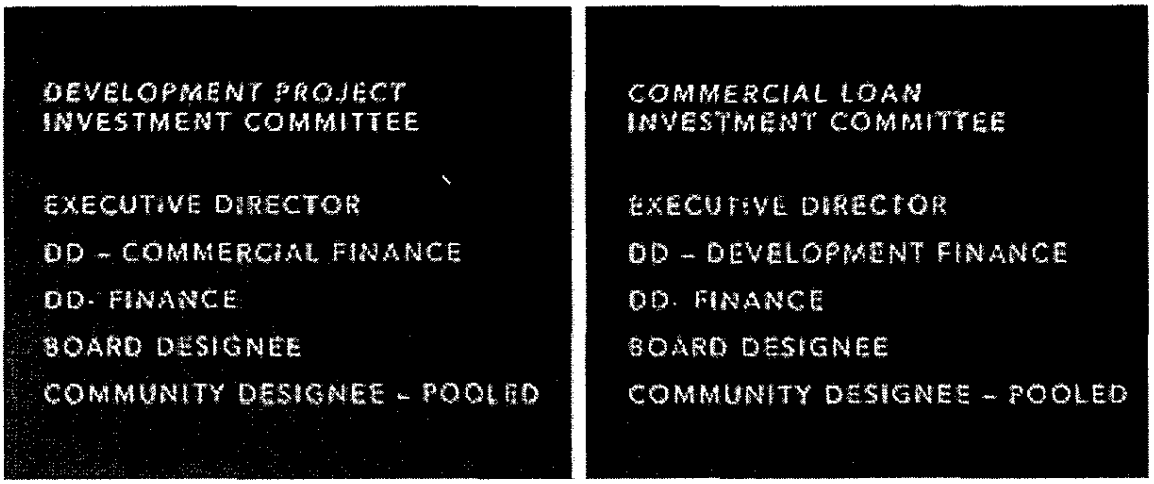
Embedded in the process diagram above are a number of meaningful changes intended to improve AIDEA efficiency and effectiveness:

- **Centralized intake analysis for AIDEA eligibility / program fit, with formal process for both approval and pass-on to relevant AIDEA division OR for "out-placing" to the opportunity to potential 3rd party assistance.**

- **A formal, coordinated process for AIDEA review of business and financial feasibility of the project/loan – prior to full credit or investment due diligence and review.**

- **Assignment of credit/investment limits to the Commercial Finance and Development Finance divisions, similar to the concept of "officer limits" at banks. If a project or loan meets the appropriate criteria (AIDEA-eligible, business and financial feasibility), and is under the delegated investment/lending limit, the commitment could be made without Investment Committee or Board involvement or approval.**

In addition to the process changes noted above, this Strategic Plan also proposes to change the structure and membership of the "credit" committee, and to have parallel, but different membership for either a commercial loan credit approval and for a development project investment approval. The Investment Committee, as envisioned in this proposal, would be structured as follows:

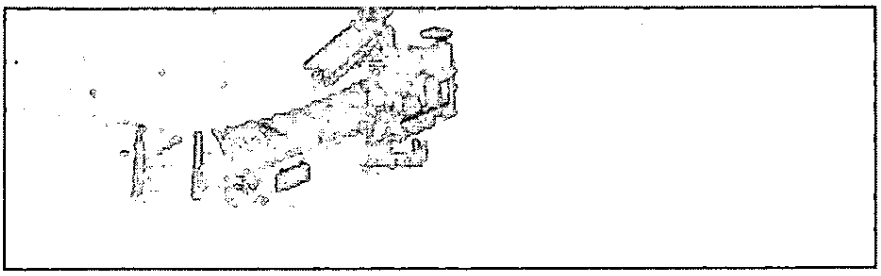


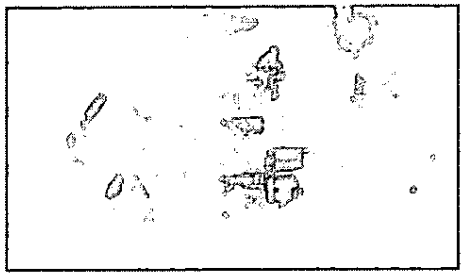
Although there is some benefit to the proposed Board and "Community" participation, there are some logistical and potentially legal challenges to implementing that part of the proposal which will have to be addressed as part of an implementation plan.

Exact changes to structure, resources and processes will be explored in more detail during 2010 and approved and implemented through appropriate procedures.

3.5.2 Metrics and Performance Measures

In order to track AIDEA's progress versus mission, goals and strategic initiatives, metrics and performance measures relevant to economic development should be established. Based on the Best Practices review, a preliminary set of metrics were developed. It should be noted, that for at least 2010, these metrics, when fully developed, will be supplementary to performance measures integrated in the State's budget processes. Part of the Strategic Plan implementation process during the 10-11 fiscal years will be to finalize and plan for implementation of any additional metrics adopted by AIDEA.





[illegible]	[illegible]
[illegible]	[illegible]
[illegible]	[illegible]
[illegible]	[illegible]

3.5.3 Enhanced Asset Management

expand the deployment & impact of AIDEA's economic development financing

As AIDEA reviews its role, assets and challenges, the fixed asset portion of the balance sheet is also being evaluated.

AIDEA has considerable investment in assets through the Development Finance program, and continues to own and operate major facilities in diverse regions of the state.

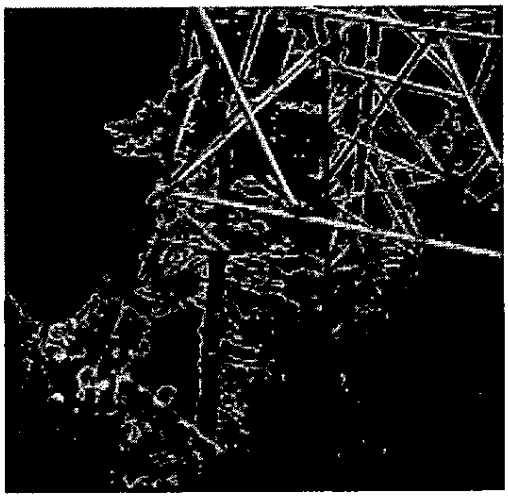
DeLong Mt. Transportation System
FedEx Maintenance Facility
Snettisham Hydroelectric Project
Ketchikan Shipyard
Skagway Ore Terminal
Healy Clean Coal Project

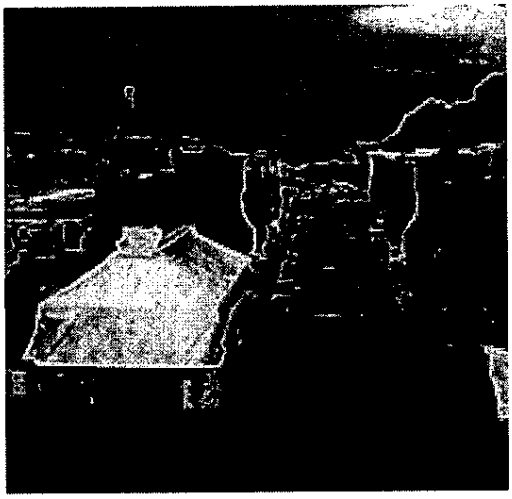
In order to ensure AIDEA's financial stability, and to promote the achievement of AIDEA's economic development objectives, the policies, structure and procedures for maintaining and optimizing value from those assets should be updated.

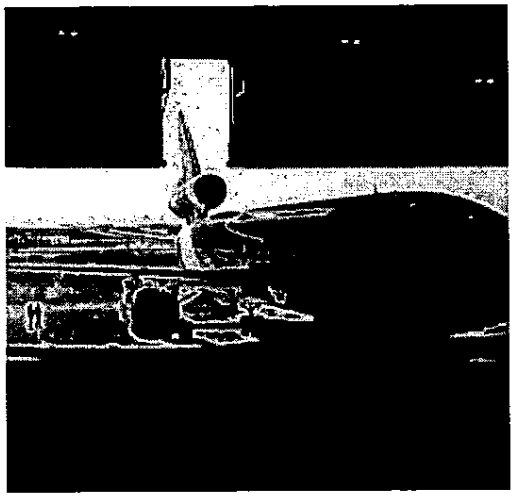
During FY09-10, AIDEA's project development management team will be reviewing and developing policies and procedures to:

- **Manage owned assets to optimize current revenue and/or long-term return to AIDEA**
- **Assess potential for expansion of or addition to existing assets:**
  - Evaluate new and expanded markets for private "partners" / tenants
  - Increased private investment in complementary Facilities
  - Improved economic development opportunities through re-purposing facilities

In addition to consideration of and planning for enhanced operation of owned-assets, AIDEA is, and will continue to, exploring alternative approaches, including selling portions of assets to partners and re-deployment of funds through sale of assets.







Alaska Economy SWOT (Strengths-Weaknesses-Opportunities-Threats)

alaska economy analysis

In order to provide a context for the development of the AIDEA Strategic Plan, a "Strengths–Weaknesses–Opportunities –Threats" ("SWOT") analysis was conducted both for the Alaskan economy and for AIDEA itself. Although the purview of the Plan is limited to AIDEA's role in economic development finance, an understanding of how Alaska fits in the national and world economy, as well as how outside economic trends will affect Alaska, is necessary background for an understanding of AIDEA's role going forward.

The table below provides a graphical summary of the SWOT for the Alaska economy.

STRENGTHS	WEAKNESSES
Oil reserves	Geographic isolation
Minerals resources	Small market size
Natural gas reserves	Limited economic diversity
Natural attractions	Concentrated / out-of-state economic power
Marine resources	Limited rural infrastructure
Strategic location (Asia, NW passage)	Limited rural eco/devo opportunity
Marine facilities	Lack of early stage capital
Air transport facilities	Inelastic state revenue structure
Public ownership of natural resources	Seasonality of employment
Alaska Permanent Fund	Severe weather
Constitutional Budget Reserve	High labor force turnover
ANCSA Corporations	High cost environment
No statewide personal taxes	
OPPORTUNITIES	**THREATS**
Global climate change - Arctic transport	Locked-up credit markets
Natural gas, liquid coal demand expansion	Low & volatile minerals, gas, oil prices
New mineral tech (viscous oil, etc.)	Global economic slowdown
Import substitution	Overall loss of Federal govt. clout
Alaska "brand" development	Federal military spending priorities
Federal economic stimulus packages	Global climate change - enviro restrictions
Value-added in resource industries	Global climate change - lost tourism
Retirement demographics	Declining oil reserves / capacity
Global Warming, Food, Fiber, Tourism	Threats to SBA 8a ANC contracting

- While the Alaska economy continues to out-perform the U.S. overall, the global recession in all sectors does present potential risks for Alaska. The last year has seen 25-35% reductions in wealth, trade, industrial production, as well as very high volatility in commodities prices, including the key Alaska sectors of oil and minerals.

- It is too early to determine whether these global factors will result in secular (long term) restructuring of certain sectors and markets or will have only short-term effects, and to what degree those effects will influence the Alaska economy. So far in this recession, credit market conditions and access to capital in Alaska remain considerably more favorable than in the rest of the country.

In evaluating potential strengths and weaknesses of Alaska's key economic sectors, projected short, medium and long term trends may provide some guidance for future strategies. The table below postulates some of those potential trends.

Sector	Short	Medium	Long
Oil	Reduced revenues due to low prices	Slow growth in prices Potential major growth with gas pipeline	Oil reserves decline Gas potential growth Environmental pressure
Federal - civilian	Potential losses mitigated by stimulus	Gradual reduction due to lost influence	Potential effects of responses to global climate change
Federal - military	Stabilizing effect on economy	Potential reductions due to overall budget pressure	Future mission changes?
Minerals	Reduced economic activity due to low prices	Slow growth as prices rise	Potential growth due to technology, transport
Fisheries	Reduced prices and revenues	Moderate increases	Potential effects of global climate change
Transport	Substantial reductions due to global economy	Slow growth	Potential major activity with Arctic marine transport
Tourism	Slow due to global economy	Slow growth	Potential effects of global climate change
Commercial	State factors better than national	Reactive to driving sectors	Reactive to driving sectors

alaska economy analysis

- The "1/3 Oil, 1/3 Federal, 1/3 Other (mostly resource-based)" structure of the Alaska economy provides both positive and negative potential for future growth. Because both oil production and federal programs tend to remain fairly stable, they can be a continuing foundation for the Alaska economy.

- Continued high projected levels of construction, for example, indicate that the oil and federal sectors are providing that foundation despite the global recession. The table below of projected 2009 construction expenditures demonstrates the foundational role oil and gas and federal construction have in the Alaska economy.

	Employment		Personal Income		Direct $ Inflows	
	000	%	Billion	%	Billion	%
Seafood	37.71	10.4%	$ 1.481	6.1%	$ 0.746	5.2%

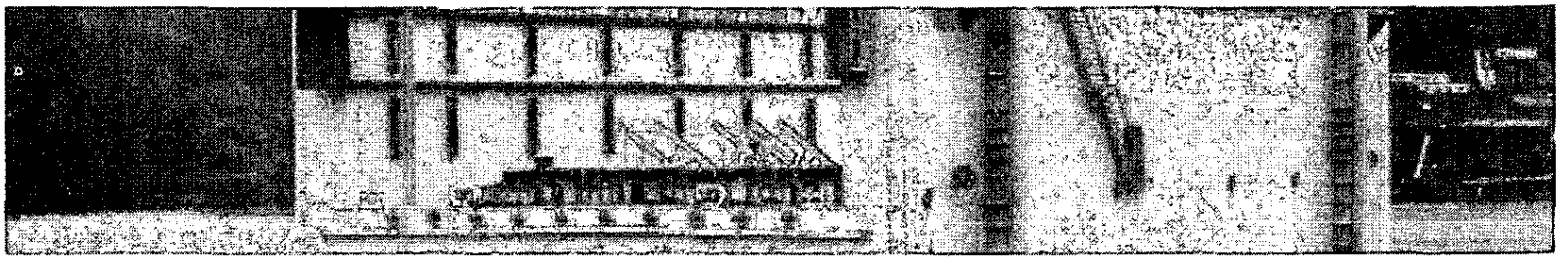
Structural Analysis of the Alaska Economy, What are the Drivers? Scott Goldsmith/ISER 10/08



- Volatility of oil prices, rapidly declining oil production and declining Congressional influence could, however, undermine the future support of that foundation. Commodities price volatility also make the other resource-based segments of the Alaska economy less certain.

- The economic & fiscal effects of economic development in Alaska are somewhat unique:

- External control and/or ownership of much of the economic base mean that a high proportion of "profits" from resource-based industries are "repatriated" out of Alaska.

- Due to the tax structure, state capture of the benefits of economic development of non-petroleum resources is limited.

- Alaska state revenue structure is not responsive to economic growth & yet is volatile due to oil prices

- Regional and urban/rural differences are exacerbated in Alaska. Because of the distances, topography and climate, the geography of the Alaska economy is challenging. Layered on top of the geographic challenges is the relatively recent introduction of a functioning cash economy to many of the more remote parts of the state. The multiple major differences among Alaska regions result in an even greater challenge to economic development than the "normal" urban/rural and state regional differences present in most Lower 48 states.

AIDEA SWOT

AIDEA environmental scan, results and analysis

Highlights of the SWOT for AIDEA itself include:

- AIDEA's financial reserves and access to capital provide considerable capacity to support economic development financing for the state.
- AIDEA's institutional capacity (finance, project development, commercial lending) also provide potential for an expanded role, particularly in an environment where alternative funding / financing sources are under stress from the global financial markets upheaval.
- AIDEA's relatively limited statutory scope prevents (or hampers) participation in certain types of economic development finance activities pursued by similar agencies in other states.
- The lack of an overall strategic plan for Alaska economic development, and AIDEA's relatively passive stance in recent years, along with potential overall state budget constraints are barriers to expanded AIDEA participation in major projects.

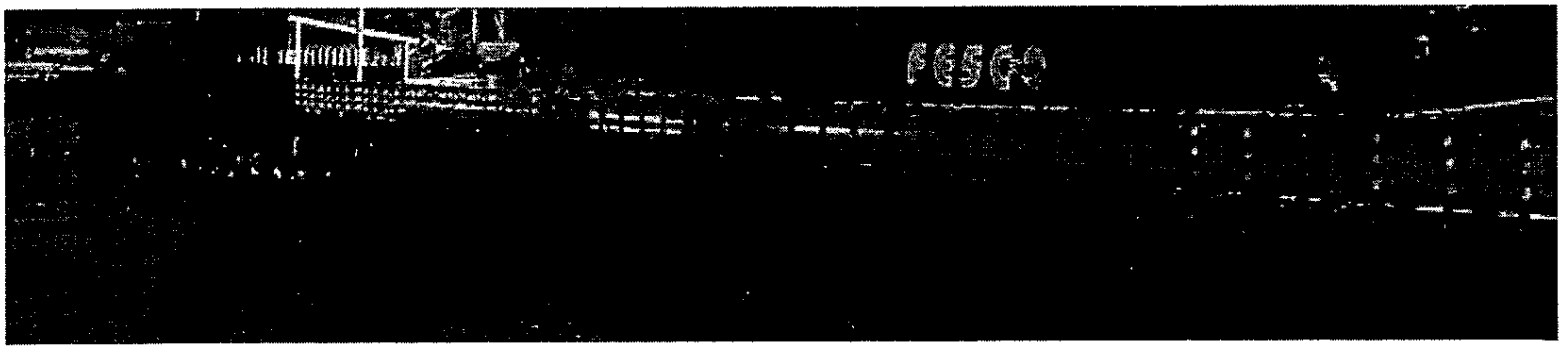
STRENGTHS	WEAKNESSES
Financial reserves	Unclear State goals for eco/devo
Access to capital / strong bond ratings	Project analysis systems
Institutional capacity - projects	Lack of tools for rural development
Institutional capacity - lending	Lack of coordination with agencies
Financial management capacity	Non-market restrictions on lending
Quasi-independence	Limited grant-giving capacity
Long operational history	Reactive lender / developer
Ability to partner with public/private	Lack of public awareness
Institutional capacity - feasibility analysis	Perceived project problems: HCCP etc
Engaged stakeholders	Management / executive turnover
OPPORTUNITIES	**THREATS**
Potential new projects	Locked-up credit markets
Perceived need for greater AIDEA role	Legislative dividend expectations
Need: early stage funding	Global economic slowdown
Need: rural eco/devo financing	Politically driven projects
Need: project financing	Overall State budget stress
ADEPT planning process	Perceived inaction / irrelevance
Commercial & investment bank turmoil	

Environmental Scan Introduction

The Alaska Industrial and Export Authority (AIDEA) contracted with Western Financial Group (WFG), based in Portland, Oregon, to assist the Authority (a public corporation) with a strategic planning effort.

Several groups contributed responses to surveys, including the following:

- **A general workshop, open to the public, was held at the BP Energy Center. The audience separated into four groups and contributed answers and suggestions as noted in the first set of responses following this synthesis.**
- **AIDEA's Board of Directors provided answers through an interview process managed by Northern Economics, based in Anchorage. This is the second group of comments attached to this document.**
- **AIDEA's staff contributed a series of answers and comments to the workshop; these are the third group of comments attached to this introduction.**
- **Finally, commercial lenders provided answers to the same questions presented to the prior groups. Their input comprises the fourth set of comments attached to this document.**



Environmental Scan Introduction

AIDEA environmental scan, results and analysis

Highlights of the SWOT for AIDEA itself include:

Mission

From AIDEA's 2008 Financial Statements:

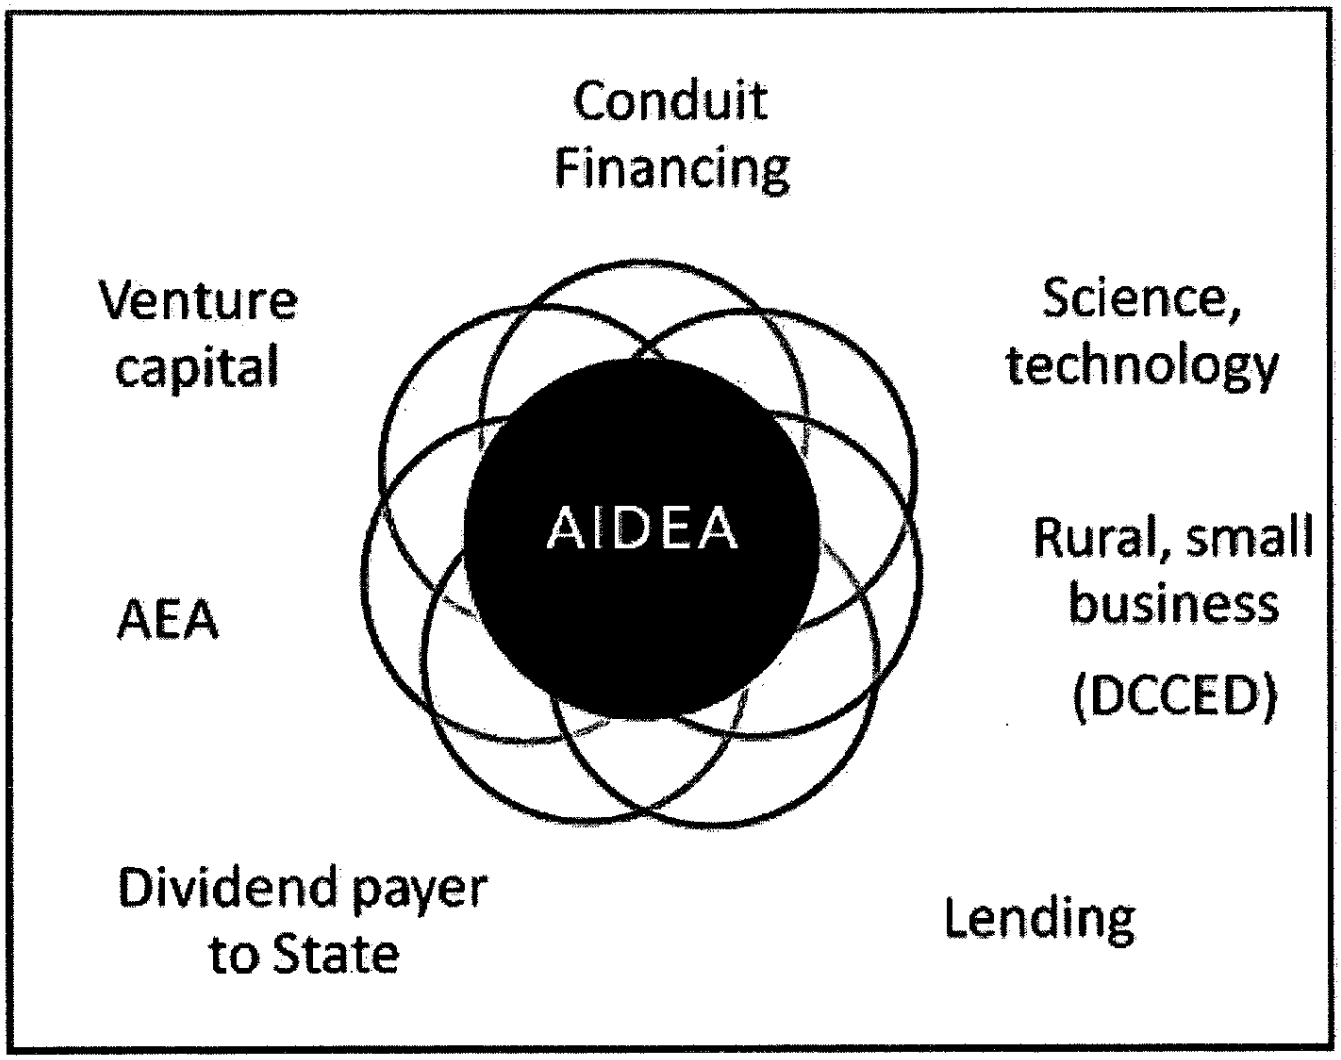
AIDEA's mission is to promote, develop, and advance the general prosperity of the people of Alaska, to relieve problems of unemployment and to create additional employment by providing various means of financing and facilitating the financing of industrial, manufacturing, export and business enterprises, and other facilities within the State.

History

AIDEA evolved from its 1967 enabling legislation into a $1.165 billion (assets) public corporation as of June 30, 2008. It has a number of roles and there is some confusion about them, as stated in the attached workshop and interview summaries.

Figure 1 illustrates some of the actual and perceived roles that AIDEA may assume, depending on the project, the audience, or the expectation of a potential developer (or borrower). As shown, AIDEA's roles encompass a wide swath of perception and expectation, from creating jobs, lending funds, and paying a dividend to the State of Alaska. The roles shown are not always real, but they exist in the eyes of certain citizens; there are others, as well, that are not shown in an effort to simplify the display. The diagram illustrates AIDEA's difficulty in determining what its strategies should be as the organization is pulled, pushed or tugged in any one of several directions.

Figure 1. Current and Potential Roles, Alaska Industrial Development and Export Authority.



Source: Northern Economics Inc.

AIDEA environmental scan, results and analysis

Public Workshop

The following sections summarize comments from the four groups, in the same order as the attached comments.

Those attending the public workshop emphasized jobs: retention, creation, and diversification (by industry and geography). Other suggestions were as varied as the participants, with opinions that ranged all across Alaska's diverse population.

Attendees generally acknowledged the need for AIDEA and its programs, though many who attended did not fully understand what the Authority can (and cannot) do.

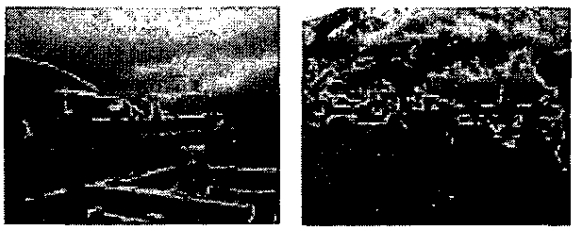
AIDEA operates in a political environment and most understood how this could affect the Authority's operations, from tax-exempt status to required dividend payments to the state and from pure equity investment (venture capital) to commercial-bank type operations.

Suggested financing opportunities also ranged from small business to very large, capital-intensive projects. Attendees suggested a wide array of possible investments, from new infrastructure to rural village businesses, and from collaboration with private firms to full grant programs.

Finally, attendees were asked to submit candidates for current federal stimulus funding and over 20 suggestions came forward, for both short-term and long-term development (investment).

Board of Directors

Directors offered many of the same thoughts as those at the public workshop. AIDEA's role in economic growth means jobs and diversification for all Alaskans. Several noted the difficulties in job growth and retention in rural areas with declining village populations and limited markets.



AIDEA's potential role in shaping Alaska's economy ran the full gamut of options, from no big projects to shedding its current (perceived) passive investment approach.

When asked who was responsible for setting statewide economic policy, answers again reflected a wide diversity of opinion, from the governor to private businesses.

Directors expressed interest in learning more about new or different economic development strategies, especially those that succeeded in other states.

Resource development and energy projects generally led the Directors' list of potential projects.

AIDEA Staff

AIDEA's staff provided more detailed and lengthy answers to strategic questions. Energy and resource development dominated the list of most-mentioned industry segments while others included health care and retail opportunities, along with increased tourism.

Two groups seemed to emerge during the staff workshop. One group reflected the lending (or credit) nature of AIDEA's investment programs. Bond ratings and reputation within the credit market were concerns of this group.

The second group was more risk tolerant and likely reflects AIDEA's large project experience, both with those projects considered successful and those that were less so. This group suggested more investment in infrastructure and resource development, with minerals and the energy sectors most often mentioned.

The daily operations of a public Authority such as AIDEA can generate strong "pulls" from the private (banking and credit) sector as well as the government (pay an annual dividend) sector. Staff expressed their opinions on these stresses and offered suggestions on reducing or resolving issues raised by these seemingly opposing forces. Staff who identified these concerns generally suggested education and awareness as the preferred solution, offering these as solutions to Directors, managers, and especially the Authority's borrowers and developers.

Lenders

Bankers offered candid opinions on the state's economy and how AIDEA can assist with its development. Resource development in oil, mining, and fishing led bankers' candidates as most likely to expand in the future.

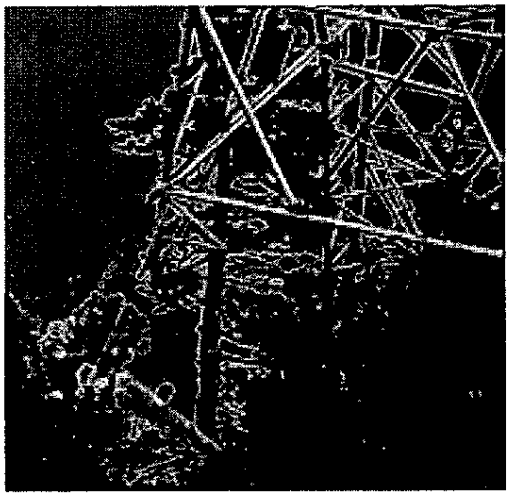
Infrastructure development for resource development seemed to be a good "fit" with AIDEA's mission, according to commercial bankers.

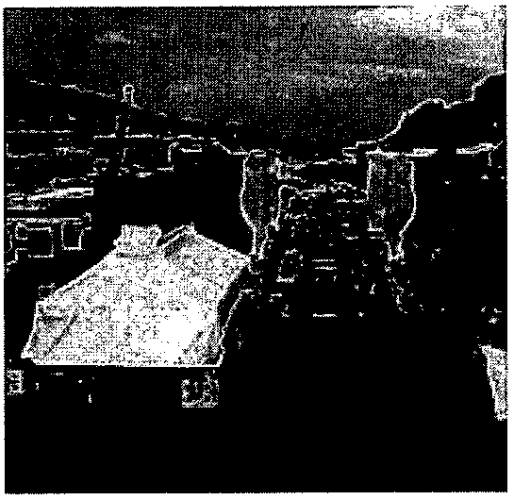
Economic development fit better with the private sector, not government, in the minds of those interviewed. A common theme mentioned by interviewees was globalization, with markets and development driven more and more by out-of-state forces.

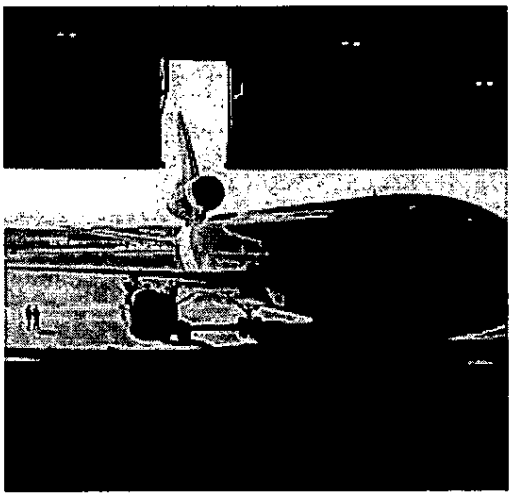
One of those interviewed suggest that job growth, while a worthy endeavor, was more of a head count than a true measure of economic development. Job growth numbers tended to ignore wages, skills, or contribution to state gross domestic product.

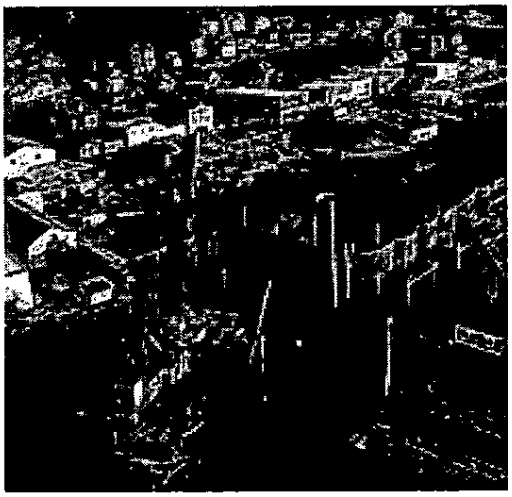
In summary:

- **AIDEA is perceived as competent and is a respected participant in the Alaska economy, although there remain significant, particularly private sector, economic actors that are unaware of AIDEA's mission, role and programs.**
- **AIDEA is viewed by certain economic development parties as reactive or passive, and by some as subject to potential political interference, or not sufficiently coordinated with other state agencies.**
- **Ideas about AIDEA's future role in the state's economic development activities were, for the most part, consistent with AIDEA's current program priorities – project financing and commercial lending support. Some respondents promoted the notion of a more active role for AIDEA in overall state economic development leadership.**
- **When asked about AIDEA's programs, there was a consensus from scan participants that AIDEA should take a more active approach to project development – particularly in developing infrastructure supporting minerals, gas, fisheries and other marine activities. There was also interest in expanding AIDEA's role as a lender alongside the banks, and potentially in providing capital for early stage companies.**
- **Multiple responders also favored an approach with AIDEA developing new programs for rural economic development.**









best practices review - economic development programs

Summary of Best Practices Review

While many different structural approaches, some common elements of successful economic development strategies include:

- **Large stakeholder organizations, engaging key players from both the public and private sector**
- **Organized, long-term strategic planning efforts**
- **Designated lead agencies with both authority and responsibility for meeting economic development objectives**

A number of common strategic approaches also dominate, including:

- **Identification of key "traded-sector" (exporting) industry sectors and formation of "clusters" aimed at fostering growth in each individual sector.**
- **Development of, and management to, "theme" based vision, mission, goals & strategies, often through selection of target industries or categories of industries, for example "sustainable" or "creative". In some cases, these strategies also involve initiatives to "brand" a state or region's products in order to improve**
- **Finally, some of the most successful strategies have developed sophisticated metrics to measure the effectiveness of strategy elements and to provide goals and targets for the overall economic development effort. These measurement systems often include environmental, social, cultural and other benchmarks as well as the traditional measures of investment, jobs and income.**

Similarly, the most successful economic development programs draw from a comprehensive toolbox of economic development financing tools, with particular emphasis on:

- **Grants, tax abatements, tax credits / rebates**
- **Infrastructure financing**
- **Loan guarantees / participation**
- **Special condition lending / credit support**
- **Public/Private partnerships**
- **Venture capital & seed equity funds**

While it should be emphasized that no state exemplifies all of the best practices in structure, strategy and financing, many states are working toward adopting best practices in all of these areas.

AIDEA's strategic plan team has evaluated the best practices overall with the intent of adopting only those elements most applicable to AIDEA's mission and roles and to the Alaska economic development environment.

Main Themes from Best Practices Review Approaches to Organizing for Economic Development

best practices review - economic development programs

Different areas organize in different ways depending on the thrust of their goals for economic development.

Big, stakeholder organizations
Example: Puget Sound Regional Council, Four County Prosperity Partnership

- **These organizations start without an organizational framework (they are not an existing organization but are normally created by some level of government).**
- **With these types of efforts, a great deal of energy is spent getting participation and buy-in from a broad coalition of "stakeholders."**
- **The focus of the collective effort tends to be on broad ideas of vision, goals, and strategies.**
- **Normally such efforts are designed to use existing state, local government & special purpose organizations as the implementing agents.**

Special purpose organizations
Example: Northern New Mexico Regional Development Corporation Greater Phoenix Economic Council

- **These are organizations which often emerge from unique circumstances/situations within a community or area. They have a narrower focus than the big stakeholder approaches and broad state-wide or regional efforts. The Northern New Mexico RDC is focused on technology transfer from the Los Alamos National Laboratory to the growth of small businesses within the area.**
- **They coordinate/communicate with specific stakeholders whose interests fit within specific economic development goals.**
- **If they have implementing tools (funding), they tend to target specific activities. (Northern NM RDC)**
- **If they don't have dedicated funding, they tend to focus on marketing, technical assistance and reactive strategies (Greater Phoenix Economic Council)**

Designated "lead" agency – usually a state

Example: State of Oregon Business Plan, Kentucky Cabinet for Economic Development

- States typically have an overall thrust for state-wide economic development. Often such efforts use a big stakeholder approach to pull a broad coalition of stakeholders into a process of defining state-wide vision, goals and strategies.
- Alternative approaches at the state level focus on coordinating the efforts of other agencies and organizations without necessarily setting a state-wide vision or goals.
- The state's economic development work is housed within a designated "lead agency" to at least implement the process and sometimes to actually be the program implementation agency.
- Implementation approaches depend on the source and level of funding

Narrow or Single Purpose Organizations

Example: Silver City, New Mexico, Main Street Historic Preservation Project

- These are organizations that have very narrowly focused economic development goals.
- With Silver City, the focus for economic development is tourism and the strategy is designed around the City's history and the re-creation of the imagery and character of the old historic city. In this case, the focus for implementation is on design controls and theme continuity

Common "Tools" of Economic Development

Industry Clusters

A very common tool used for regional and state-wide economic development planning is to target goals and strategies around industry or economic clusters. This becomes a convenient and identifiable way to create industry/economic groupings for the purpose of setting goals, strategies and programs and providing marketing, support services, synergy, and channeling governmental priorities

"Theme" based vision, mission, goals, and strategies

These are tools used to try to carve out a market "niche."

- "Green" industries
- "Solar" industries
- "Sustainable" industries
- "Historic Preservation"
- "New Economy"

Benchmarks, measurements of success

If implementation is a weakness of many economic development efforts, monitoring the success of such efforts is even weaker. Long term strategies and implementation programs need to be monitored to understand how and which strategies and programs are successful and what impact the overall effort has toward meeting goals. The State of Oregon has had a benchmarking program for over 20 years with 91 specific factors to be measured annually. The New Economy Index uses a specific set of measurements to determine the movement of states from an Old Economy to a New Economy.

Funding the process; funding implementation

There are two types of funding important to successful economic development efforts. One is the funding of the process of preparing and maintaining economic development strategies and plans; the second is funding the plan's implementation measures. Funding implementation is the more critical to the ultimate success of the programs and is one of the reasons that many programs struggle to succeed.

Often funding the process and its implementation are done through the general funds of government. Such efforts generally find it difficult to sustain effective long term strategies when the funding is subject to annual renewals and political priorities.

Some organizations rely heavily on volunteer contributions from "members" or stakeholders. Again, such sources of funding are dependent on the sustained willingness of volunteer contributions so as with governmental general funding, undertaking long term strategies is often difficult.

Dedicated funding from a tax source, bonding capacity, or other earmarked funding is critical to developing and implementing long term strategies. The most successful programs are wrapped around such sources of funding.

Most Potentially Relevant Economic Development Program

With regard to programs that are most relevant to AIDEA, given AIDEA's mission as an implementing authority within the State of Alaska, the focus was more on how programs implement strategies rather than on how they develop and reach agreement on strategies. Of those programs researched the following seem to have the greatest potential to offer alternative implementing approaches within AIDEA's strategic plan.

- Kentucky Cabinet for Economic Development
- Kentucky Economic Development Finance Authority
- Kentucky Strategic Plan for Economic Development

Kentucky's is a "lead agency" approach to economic development where the state used its own agency to take the lead for the state's economic development efforts. This is one of the more complex yet complete organizational structures found from those that were investigated in this Best Practices assessment.

The state's program has a heavy emphasis on implementation and it is clear that the state legislature has provided a broad range of authorities from which the agency has developed a variety of targeted funding and assistance programs to achieve its economic development goals.

The agency has a strategic plan with 4 broad goals, each with a series of objectives. The connection from the strategic plan to the agency's organization and its specific programs is not clear from the material obtained. It is presumed that the plan provides targets that the various divisions, departments and other parts of the organization use to take a proactive approach to achieving their mission. Again, the linkage from the plan to the organization is not immediately evident from the materials.

The Cabinet for Economic Development is the primary state agency in Kentucky responsible for creating new jobs and investment in the state. Programs administered by the Cabinet are designed to support and promote economic development within the state, primarily by attracting new industries to the state, assisting in the development of existing industries, and assisting communities in preparing for economic development opportunities.

By statute, the Cabinet is governed by the Kentucky Economic Development Partnership. The Partnership Board is responsible for directing and overseeing the Cabinet and adopting a Strategic Plan. The Kentucky Economic Development Finance Authority (KEDFA) is a statutorily created organization under the authority of the Partnership Board. KEDFA is responsible for awarding most of the financial incentives offered by the Cabinet. Looking at the titles of the various departments, divisions and then programs within the Cabinet gives a good idea of the breadth and scope of the agency's focus and many of their implementation tools.

Department of Commercialization and Innovation

- **High-Tech Investment Pool**
- **Kentucky New Energy Ventures Fund (KNEV)**
- **Commonwealth Seed Capital, LLC (CSC)**
- **SBIR-STTR Matching Funds**
- **Innovation and Commercialization Center Network**

Department for New Business Development

Department for Existing Business Development

- **Regional Economic Development Divisions**
- **Division of International Trade**
- **Division of Small Business Services**
  - **Kentucky Procurement Assistance Branch**
  - **Small and Minority Business Branch**
- **Commission on Small Business Advocacy**

Department of Financial Incentives

- **Programs Management Division**
- **Programs Servicing Division**
- **Bluegrass State Skills Corporation (BSSC)**
- **Industrial Revenue Bond Issue Program (IRB)**

Kentucky Economic Development Finance Authority

Kentucky Economic Development Finance Authority (KEDFA) Small Business Loan Program

Kentucky Economic Opportunity Zone Program (KEOZ)

Kentucky Enterprise Initiative Act (KEIA)

Kentucky Environmental Stewardship Act (KESA)

Kentucky Industrial Development Act (KIDA)

Kentucky Industrial Revitalization Act (KIRA)

Kentucky Investment Fund Act (KIFA)

Kentucky Jobs Development Act (KJDA)

Kentucky Rural Economic Development Act (KREDA)

Incentives for Energy Independence Act (IEIA)

Tax Increment Financing (TIF)

Various Funding Options for Economic Development

In the several economic development programs investigated, there are a variety of ways agencies fund their own efforts and then provide funding to implement economic development projects.

Kentucky	
High Tech Investment Pool	"forgivable loans"
New Energy Ventures Fund	Grants as well as equity investments
Commonwealth Seed Capital	"Seed" capital directly to companies but also invests in Seed and Venture funds that make investments in targeted companies in Kentucky
Federal SBIR-STTR Matching Funds	$100K and $500K matching of federal funds
Innovation & Commercialization Center Network	Funds these centers (staffing and organization support) which link scientists and entrepreneurs to other sources of funding
Bluegrass State Skills Corporation	An independent corporation – awards grants and tax credits to support its mission of increasing worker skills
Industrial Revenue Bond Program	Traditional municipal revenue bonds
Economic Development Finance Authority	Loans
EDFA Small Business Loan Program	Loans
Economic Opportunity Zone Program	Tax Credits
Enterprise Initiative Act	Refunds sales and use taxes paid on targeted construction and equipment purchases
Environmental Stewardship Act	Tax incentives
Industrial Development Act	Tax incentives
Industrial Revitalization Act	Tax incentives
Investment Fund Act	Tax credits
Jobs Development Act	Tax incentives
Rural Economic Development Act	Tax incentives
Incentives for Energy Independence	Tax incentives including: □ Sales and use tax reimbursement □ Tax credits on income and LLC entity taxes □ Wage assessment incentives
Tax Increment Financing	Diversion of property taxes to fund redevelopment efforts
Ravalli County (Montana) Economic Development Authority	
	Revolving Loan Fund
Regional Development Corporation (New Mexico)	
Venture Acceleration Fund	Direct investments in companies
NM Small Business Assistance	Gross tax receipts credits

Alaska Industrial Development and Export Authority

AIDEA's Response to Representative Herron's Office Inquiries Regarding HB 363

1. Comment on advantages and disadvantages of the proposed board make-up:

The advantage of the board composition set out in HB 363 is that AIDEA would have more private sector and industry input into its decision making processes. Moreover, new public members can bring their expertise and business and industry experience to bear when asked to approve a particular loan, authorize the expenditure of funds, or approve the issuance of a bond to finance development. This input makes for better decision making. AIDEA's own solution to gaining more business and industry input as set forth in its Strategic Plan is to setup two new committees of business and industry experts (Business and Technical) to advise the board and management on policy and project investment decisions. An alternative to the advisory board concept would be to add more public members to the Board and then have the full board to appoint subcommittees to explore new policies and work with management on issues and then report back to the board. Either alternative would create a vehicle for creating better public-private partnerships which is the goal set forth in AIDEA's Strategic Plan.

The disadvantage of the board composition as set forth in HB 363 is that its one commissioner configuration would mean that board would lose needed expertise in state economic and infrastructure development. While AIDEA agrees that it is important to the board to have the expertise and experience of the Commissioner of Revenue on the board for his or her experience in finance and investment, AIDEA's mission is broader than these two areas. AIDEA is an economic development finance authority and needs to have a cabinet level officer with knowledge of state economic development policies and directions such as the Commissioner of Commerce, Community and Economic Development.

2. What are the advantages of private sector membership on a board of this nature:

As noted above, the advantage of having private board members on a public economic development finance authority's board is to bring private sector expertise and experience to AIDEA's decision making process. AIDEA makes loans, serves as a conduit for revenue bonds, and finances large scale development projects. It, therefore, can benefit in making its investment and development decisions by utilizing the expertise of knowledgeable business people and industry experts who have a broad base of experience.

It is also important that state sponsored economic development be, in essence, a public/private partnership. Best practices of economic development agencies throughout the United States are to include both public and private persons into the economic development decision process. Some of the best known models for economic development agencies make use of this public/private partnership concept, such as Kentucky's Economic Development Cabinet and the Indiana Development Corporation.

3. What kinds of private sector member qualifications best serve the board:

The best private sector members on an economic development finance corporation, such as AIDEA, are ones that have a broad range of business experience and who understand the role of state funded economic development. This usually will mean persons who have worked with commercial and business development financing, bank financing, commercial real estate development, and local or state sponsored economic development programs in their business careers. An understanding of the various methods of financing projects, as well as a knowledge of Alaska local government and boroughs is also desirable. Board members who have a wide range of experience in natural resource extraction, logistics, energy, tourism and other targeted sectors listed in AIDEA's strategic plan would provide guidance and sound decision making to support AIDEA's missions and measures.

4. Talk about what kinds of decisions the Board makes:

The board is responsible for the governance of the corporation and must approve of and vote on all major loans in which AIDEA participates, as well as approve of all investments in projects financed directly or by the use of bonds. Equally important is that the board is responsible for deciding when and how to divest of currently owned projects and at what price and terms. The board also makes the decisions on how large a reserve AIDEA should have and has to approve all litigation and court settlements.

In corporate governance terms, the AIDEA board hires the executive director to run the day-to-day operations of the Authority, but any organic decisions (i.e. those that could affect the financial position of the corporation or affect its future performance) must have board approval.

As noted above, the AIDEA board runs the agency. While management may make recommendations on these matters, it is the board which must vote to approve them and who has the right to modify or deny proposals put forward by management. The board also establishes all major policies such as AIDEA's recent Strategic Plan. The Board is responsible for adopting regulations used in the operation of all the major programs of the authority.

5. Right now the fishing and high tech/communications industries are represented through the private sector members of the AIDEA board. How would you like to see the board diversified if there were two more private members:

AIDEA currently has two very knowledgeable well-rounded private sector board members with a broad range of business experience and management skills. If more such members were added, AIDEA would suggest that persons be chosen who have financial management experience, commercial and investment banking experience, commercial development experience, financial analyst experience, legal experience, economic development experience or infrastructure experience.

Additionally, board members should probably have experience with local governments, regional development organizations, chambers of commerce and other local economic development stakeholders. It would be desirable to have board members who have experience in natural resource extraction, logistics, energy, tourism and other targeted sectors listed in the Strategic Plan.

6a. Why is there a joint AIDEA/AEA board:

AEA and AIDEA have a shared board because this is mandated by statute.

6b. Any advantages or disadvantages of this:

There is value in having members shared between the AEA and AIDEA boards. AIDEA has bonding authority, which can be utilized to provide financing for large-scale AEA initiatives. AEA alternatively can analyze for AIDEA whether an energy-related development project is feasible. Another example of fruitful agency coordination is that recently AIDEA and AEA submitted a joint application to the Federal Department of Energy which makes use of each authority's expertise.

The main challenge is in finding board members that have the experience and working knowledge in both economic development and energy related fields. Additionally, the AEA board needs to be conversant with AEA's grant programs, as well as with federal Department of Energy funding programs.

BRIEFING PAPER:
ECONOMIC DEVELOPMENT
IN STATE GOVERNMENT

A review of economic development configuration in Alaska's agencies, models from other states, and potential changes to Alaska's economic development system

---

Alaska's Department of Commerce, Community and Economic Development includes both **Economic Development** and **Community Development** functions. The department's mission is to "promote a healthy economy, strong communities, and protect consumers in Alaska."

The difference between economic development and community development is not always well-understood. To establish a shared understanding of these terms, the following definition is presented:

> Community development is capacity building; economic development is wealth creation.
>
> --Robert Shively, *Economic Development for Small Communities*

To go further, community development often refers to projects that create infrastructure and community capacity. Public works projects, schools, bridges, libraries, community centers and parks… these are community development projects. Economic development projects, on the other hand, would be the construction of a new clinic by a group of private physicians, or the expansion of a metal fabrication shop by a business owner. Community development and economic development are deeply intertwined, because economic development—and the private investors, owners, and entrepreneurs who lead the way—also requires community infrastructure, either to support their businesses or to enable a lifestyle that makes them want to live and stay in a community. At their cores, both community development and economic development are about resilience, the ability of a community or economy to respond to both opportunities and threats, to adapt to change. But the two functions are quite different, *and the appropriate activities and roles for government in economic development are much different than in community development.*

The purpose of this paper is to examine ***economic development*** activities in state government. While we recognize the interconnectedness of the two functions, the focus of this work is on resources within state government that support private sector investment in Alaska's economy.

Current Resources within State Government and the University System

Alaska's Office of Economic Development (OED), within DCCED

- The mission of OED, as described in the FY10 Governor's Operating budget, is to "Advance successful tourism, film, fisheries, forest products, minerals, and small business assistance programs in order to increase economic activity in Alaska and create new employment opportunities for Alaska."

- Alaska's OED currently has a division head, plus 11 employees in five sub-programs, many of which can be tied to one or more functions in Alaska Statute.
    - The Alaska Film Office (3 employees, one of whom is shared with Tourism) (AS 44.33.231, Film Office)
    - Business Development (2 employees, one of whom is a forest products specialist) (AS 44.33.900 Alaska Forest Products Research and Marketing Program)
    - Office of Fisheries (1) (AS 44.33.065, Regional Seafood Development Associations)
    - Office of Mineral Development (2) (AS 44.33.431, Alaska Minerals Commission)
    - Tourism Program (4, one of whom is shared with Film) (AS 44.33.119, Alaska Division of Tourism)

Alaska Industrial Development and Export Authority (AIDEA), within DCCED

- The mission of AIDEA, as described in the FY10 Governor's Operating budget, is "to provide means of financing to promote economic growth and diversification in Alaska."
- AIDEA's board of directors consists of five individuals
    - The Commissioner of Revenue
    - The Commissioner of Commerce, Community, and Economic Development
    - One other person appointed by the executive branch
    - Two public members appointed by the governor
- AIDEA's economic development programs have approximately 30 staff assigned to it, with 30 who are professional staff (estimate from AIDEA staff, October 2009)
    - AIDEA is a "public corporation of the state and a body corporate and politic constituting a political subdivision within the Department of Commerce, Community and Economic Development, but with separate and independent legal existence," under AS 44.88.010—44.88.159
    - AIDEA has a number of loan participation, revolving loan, and bond programs
    - AIDEA has ownership stakes in several major projects
- AIDEA also is home to another agency, Alaska Energy Authority (AEA) which currently has a community development mission
    - Though the agencies are separate, they share employees and resources

Alaska Division of Investments (DOI), within DCCED

- DOI's "primary responsibility is to administer and service twelve state loan programs under the Department of Commerce, Community, and Economic Development. These programs were primarily designed to promote economic development through direct state lending in industries that are not adequately serviced by the private sector."
- DOI typically interfaces with individual lenders and small businesses (in contrast to AIDEA, which handles significant industrial investments)
- DOI has 44 FTE employees (FY2010 budget)
- Loan programs authorized in statute are not comprehensive across range of Alaska industry

Non-Governmental Economic Development Organizations in Alaska

ARDORs

- Alaska Regional Development Organizations (ARDORs) are established under 44.33.895 (Alaska regional economic assistance program) and is subject to regulations at 3 AAC 57.010-900.
    - Under the statute the department can provide grants of up to $100,000 annually to match funds from non-state sources.

- The state's contributions to the ARDOR under this program are $50,000 annually. With the addition of an ARDOR in the last two years, the state's total contribution has increased, but organizations still receive the same amount. (Annual funding since 1992 is flat at $620,000; except for increase of $57,000 starting in FY09 with addition of twelfth ARDOR)
- According to the website of OED, ARDORs are intended to
  - *enable communities to pool their limited resources, and work together on economic development issues;*
  - *develop partnerships among public, private and other organizations,*
  - *offer a technical, nonpartisan capacity to develop and implement an economic development strategy,*
  - *often have extensive experience with federal/State programs, and*
  - *provide needed technical assistance via direct links with local citizens.*
- With large service regions and limited funding, some ARDORs have very difficult times attracting experienced staff to run economic development programs
  - Some conversations have been had to establish system-wide capacity-building fund for the ARDORs so that staff of the ARDORs can take advantage of professional development opportunities despite limited budgets

Additional Regional Economic Development Groups

- Regional/local groups also exist, such as Juneau Economic Development Council, Fairbanks Economic Development Corporation, Alaska Village Initiatives.
  - These have more local focus

University Economic Development Resources and Coordination with State Resources

The University of Alaska has several economic development programs doing technical assistance, training, etc.

- **Center for Economic Development, at the Institute of Social and Economic Research, UAA**
  - One of 52 university centers nationally designated by Economic Development Administration
  - Works at level of *municipalities, large non-profits, service-providing for profits (such as Alaska Native Corporations)*
    - 2008 Annual Report includes list of clients: http://ced.uaa.alaska.edu/publications/2008AnnualReport.pdf
  - According to their website, CED "leverages the resources of the university system to support economic development in Alaska, providing technical assistance in the form of information, data, and know-how in evaluating, shaping and implementing specific projects and programs that promote economic development across the state." (http://ced.uaa.alaska.edu)
  - Supported by fee for service in most cases, in order to support program delivery costs; some budget also from State
  - CED helps with local and regional planning, feasibility analysis, strategic planning (organizational and community) financial analysis, market and economic research
  - Recently, CED began coordinating accredited certification courses for the International Economic Development Council, to certify IECD economic development professionals
    - NB: Currently, there is not a single certified economic development professional working in Alaska

- **Small Business Development Centers**
  - Works at level of small, individual entrepreneurs
  - Provide free- and low-cost consulting to small business and micro-enterprise
  - Funded by US Small Business Administration with matching funds from state.
  - Provides consulting services and low-cost educational programs to entrepreneurs
  - Program's "business advisors" are certified through the Alaska SBDC's professional Certification program
  - Has a rural outreach program

How are Other State Governments Doing Economic Development?

Several states are recognized for their innovation in economic development within state government. Some of these are profiled below.

The states profiled below were selected because of their recognition as successful models, or commonalities with Alaska (rural Western). This report profiles North Dakota, Wyoming, Indiana, and Kentucky, which are all recognized for their economic development programs, as well as Oregon, which shares some similarities with Alaska as a Western state with large rural areas. All of these states have advisory and/or policy bodies that primarily comprise private sector leaders.

NB: Descriptions below reference "primary" or "basic" industries. These are industries that bring new dollars into a state's economy. Oftentimes these are because the business outputs are produced for markets outside the state. In some cases federal government programs, which bring dollars into state economies, can also be seen as contributing to the primary/basic sectors. This differs from support sector businesses, which provide services within the state. Primary/basic businesses are the economic pumps for an economy.

North Dakota www.business.nd.gov

- Economic Development & Finance is a division within a department that also houses Tourism and Community Development
  - Tourism is separate because development approach differs significantly from standard "primary/basic" sector activities.
- North Dakota has an Economic Development Foundation, a private foundation established by the Legislature, to provide guidance and private-sector oversight of state economic development efforts. It maintains a strategic plan for economic development.
  - 23 "business leaders," meet quarterly
  - has the ability to raise private funding to support state efforts
- Division heads are professional positions, not appointed
- Majority of staff at Economic Development and Finance Division are certified economic development professionals through the IEDC
- Primary function of division is to work with businesses to identify the state programs and resources that will help them establish, grow, or retain in North Dakota; deal structuring (not technical assistance, which is pointed to university, SBDCs, etc.)
- North Dakota has a development bank, the Bank of North Dakota, which manages nearly all of the state's loan and investment programs, with very few exceptions
- Department ***only works on inquiries/investments that are in the Basic sector of the economy*** (Basic industries bring new money into the economy from out of state, while secondary industries provide services to support the basic industries)

- Web presence: North Dakota has http://www.business.nd.gov/, which is a user-friendly portal to information necessary to do business in North Dakota
- 17 staff for ED&F, including 2 finance people to run loan programs outside the Bank of North Dakota

Wyoming www.wyomingbusiness.org

- Wyoming Business Council is the economic development group in state government
    - It has a corporate structure, incorporates private business practices, regional offices
    - Has a Board of Directors and CEO, though it is within state government
        - Board members are successful business owners from Wyoming
        - Board members appointed by Governor; CEO hired by Board
        - Employees of agency are at-will
        - Board does "business plan" for department
    - Staff of 53 for WBC, plus 19 for Tourism
        - 7-8 administrative staff, all other work on economic development and management of community grant programs
    - History of the WBC: http://www.wyomingbusiness.org/about/history.aspx
    - Enabling Legislation: Wyoming Statutes 9-12-101 through 9-12-804 (http://legisweb.state.wy.us/statutes/statutes.aspx?file=titles/Title9/T9CH12.htm)
    - WBC focuses on basic industries, with few exceptions in rural areas where basic service infrastructure (grocery stores) do not exist
        - Industries have to produce something sold outside the region to get WBC attention.
    - WBC works closely with university programs, including SBDCs, Intellectual property, incubators, etc.

Kentucky www.thinkkentucky.com

- Primary state agency for economic development is the Cabinet for Economic Development, which is governed by the Kentucky Economic Development Partnership Board
- Kentucky Economic Development Partnership Board
    - Enabled in 1992 by HB 89.
        - Thirteen members representing each of eight congressional districts and different industries, plus secretaries from four cabinets (Econ. Development, Finance and Administration, Environmental and Public Protection, and Tourism), plus Governor
        - Cabinet includes
            - Office of Secretary
            - Department for Business Development
                - "Responsible for coordinating the recruitment and attraction of new companies that will enhance the overall viability of the state's economy, as well as assisting and encouraging job retention and creation by working with existing Kentucky business. The Department partners with outside agencies and communities to conduct workshops, community assessments, and business surveys to support local development efforts"
            - Department of Financial Incentives
            - Department of Commercialization and Innovation

- "Responsible for developing and implementing a strategy to create, attract, and assist knowledge-based companies to Kentucky."

Indiana www.in.gov/iedc

- Primary state group for economic development is the Indiana Economic Development Corporation
  - Created in February 2005 to replace the former Department of Commerce
  - Has a board of 12, including governor and 11 private industry participants
  - According to IEDC website, "The IEDC is focused exclusively on economic development and has incorporated all state entities with economic development responsibilities into its organizational structure."

Oregon www.oregon4biz.com

- Economic development is a division within the Oregon Business Development Department, which also houses community development functions
  - About 25% of department budget goes to economic development
- Economic development overseen by the Oregon Business Development Commission, which is statutorily authorized, and consists of seven private sector individuals (not agency) appointed by the Governor
  - Entity sets policy direction for agency activity
- Department head is appointed, but division heads are professional staff
- 13 people working in field around Oregon, plus five people specializing in international development
- No certification/training requirements specific to department; some perhaps specific to positions, particularly for international development people
- Primary role of business development division is deal structuring, pulling state resources together to support creation or retention of jobs
- Staff only work on primary (basic) sector industries, refer others to university, SBDCs, other partners

Points to Consider about Alaska's Current System

- State government's oversight and/or policy direction from private sector is currently limited to two of five seats on the board of AIDEA.
  - There is no private sector input built into OED or DOI
  - Without private sector input it may be difficult to align state programs across divisions with real needs in Alaska economy
- Incentive programs in Alaska Statute are limited
  - New Business Incentive Program (DCCED), established under 45.81.010, is not funded
  - Film Incentive office supported by two staff at OED (DCCED)
  - Exploration Incentive Credits (DNR)
  - AGIA (DNR)
  - Various AIDEA Programs
- Economic Development functions are distributed between several divisions and/or offices, including:
  - Division on Investments (Greg Winegar, Division Director)
  - Office of Economic Development (Joe Austerman, Director)
  - Alaska Industrial Development and Export Authority (Ted Leonard, Executive Director)

- Economic development staffing in these offices are about 15% of total DCCED personnel
  - Viewed alone they are 8%, 2%, and 6% respectively
  - May have difficulty getting strategic focus within larger mission of department
- No certified economic developers currently working in state (compares to other states where professional certification is common among economic development staffers)
  - University's Center for Economic Development has started offering training modules several times per year (the standard for these courses is multi-day intensives) for certification through the International Economic Development Council
    - This is a relatively new service
    - Department estimates cost in training to reach certification goals, before travel and lost work time, is $3,400 per person
  - Currently there are no practicing certified economic development professionals working in Alaska (in state government or out of state government)
- State government's interaction with University resources may be inefficient; economic development resources may be "siloed"
  - Do OED and AIDEA have regular practice of directing inquiries to existing University resources?
  - Do agencies and universities work closely to avoid duplicating tools and services?
  - What gaps should agencies fill that are not natural to the University?
- State government, through OED, is currently focused on a small set of industries
  - Focus may be broadened to allow room for additional industries/ideas
- Alaska state government does not maintain a web presence focused on attracting or retaining business
  - For contrast, see Oregon, http://www.oregon4biz.com/, found in two clicks from the State of OR homepage); North Dakota, http://www.business.nd.gov; Kentucky http://www.thinkkentucky.com/

Possible Areas of Discussion for Legislature

1. Restructuring economic development functions within state government under alternate models such as public/private partnerships, corporate structures, strengthened divisions, or others.
2. Consideration of creation of a non-governmental (private sector) policy group at head of state economic development. Depending on departmental structure the advisory entity could be modeled on corporate, foundation, policy, or other board structures
3. Establishment or reestablishment of incentive programs to support economic development programs
4. Budgeting for ARDOR programs
5. Budgeting for University programs that support small business development
6. Oversight hearings prior to and within the budget process to assess focus and resources of state offices with economic development missions
7. Establishment of additional loan programs to support small business economic development

Additional Resources

- Alaska Economic Development Programs, prepared by Office of Economic Development
  - Document attached to this transmission
  - Note: This matrix does not differentiate between Economic Development and Community Development programs (see definition on Page 1). True "economic development" programs are fewer than one dozen.
- Department and subunit missions: Office of Management and Budget
  - See http://gov.state.ak.us/omb/results/agencies.php#10 for missions related to DCCED and its divisions
- Alaska SourceLink www.aksourcelink.com. A web portal hosted by the university that provides information on all economic development support resources in the state

Representative Kurt Olson, Chair
House Labor & Commerce Committee

Re: Support of HB 363

Dear Representative Olson,

Please accept this letter of support for House Bill 363, which would rearrange the composition of the AIDEA/AEA board membership. Most successful economic development initiatives occur because of strong public/private partnerships, and one of the keys to this success lies in valuable private sector input.

Passage of HB 363 would increase the number of AIDEA's public board members from two to four, with the possibility of a fifth public member currently in the bill's amendment. Raising this level of private sector involvement would lead to more fruitful and informed discussions about current economic conditions and desires among the business community.

AIDEA is meant to promote and advance economic growth and diversification in the state of Alaska. True economic development is best served by private investment and public knowledge and innovation. By changing the board composition to more accurately reflect this sentiment, the state's economic development organization can have a more direct line to industry needs and private sector capacity.

I would urge you to consider the value of HB 363 and what it could mean for the State of Alaska's role in economic development.

Regards,
SOUTHWEST ALASKA MUNICIPAL CONFERENCE

Andy Varner
Executive Director

Southeast Conference

March 16, 2010

Representative Kurt Olson, Chair
House Labor & Commerce Committee
Alaska State Capitol Building
Juneau, Alaska 99801

RE: HB363 "An Act relation to the membership of the Alaska Industrial Development and Export Authority.

Southeast Conference strongly supports House Bill 363. The private sector is the backbone of Alaska's economy. The State economic development process has historically had little private sector input. This legislation will allow flexibility within the makeup of AIDEA to incorporate more private sector participation in State economic development decisions.

Southeast Conference is a private membership organization that works to advance the collective interests of the people, communities, and businesses of Southeast Alaska. It is the Alaska Regional Development Organization (ARDOR), Federal Economic Development District (EDD), and USDA Resource Conservation and Development (RC&D) Council for the region. The Conference's Mission is to help develop strong economies, healthy communities, and a quality environment in Southeast Alaska.

Please adopt HB363 for the future of our communities and our state.

On Behalf of the Board of Directors,

Shelly Wright

Re: House Bill 363 AIDEA Board

Representative Kurt Olson, Chair
House Labor & Commerce Committee
Juneau, Alaska

Dear Representative Olson,

Please accept this letter of support for HB 363. I believe that AIDEA needs to become more proactive in evaluating and implementing new programs to nurture innovation and entrepreneurship in Alaska. We are the only state that doesn't have an organized Angel Investor network. We are one of only a few states that doesn't have a Small Business Investment Corporation, a business incubator or a business accelerator. Including more private sector experts with been-there-done-that experience will significantly enhance AIDEA's opportunity in identifying our financial infrastructure problems and addressing our needs.

If the Milken Risk Capital and Entrepreneurial Infrastructure Composite Index were considered a reasonable proxy of our Aspiration Index, which I believe that it does, then Alaskans are in last place nationally in dreaming dreams for our own destiny. AIDEA should be a more important and relevant player in addressing this problem. If we do not see our last place standing as a problem then there is no solution. I believe a more private sector oriented AIDEA Board would be more effective in diversifying the Alaska economy and empowering innovative entrepreneurs.

Respectfully,

Allan R. Johnston

BRIEFING PAPER:
ECONOMIC DEVELOPMENT
IN STATE GOVERNMENT

A review of economic development configuration in Alaska's agencies, models from other states, and potential changes to Alaska's economic development system

---

Alaska's Department of Commerce, Community and Economic Development includes both **Economic Development** and **Community Development** functions. The department's mission is to "promote a healthy economy, strong communities, and protect consumers in Alaska."

The difference between economic development and community development is not always well-understood. To establish a shared understanding of these terms, the following definition is presented:

> Community development is capacity building; economic development is wealth creation.
>
> --Robert Shively, *Economic Development for Small Communities*

To go further, community development often refers to projects that create infrastructure and community capacity. Public works projects, schools, bridges, libraries, community centers and parks… these are community development projects. Economic development projects, on the other hand, would be the construction of a new clinic by a group of private physicians, or the expansion of a metal fabrication shop by a business owner. Community development and economic development are deeply intertwined, because economic development—and the private investors, owners, and entrepreneurs who lead the way—also requires community infrastructure, either to support their businesses or to enable a lifestyle that makes them want to live and stay in a community. At their cores, both community development and economic development are about resilience, the ability of a community or economy to respond to both opportunities and threats, to adapt to change. But the two functions are quite different, *and the appropriate activities and roles for government in economic development are much different than in community development.*

The purpose of this paper is to examine ***economic development*** activities in state government. While we recognize the interconnectedness of the two functions, the focus of this work is on resources within state government that support private sector investment in Alaska's economy.

Current Resources within State Government and the University System

Alaska's Office of Economic Development (OED), within DCCED

- The mission of OED, as described in the FY10 Governor's Operating budget, is to "Advance successful tourism, film, fisheries, forest products, minerals, and small business assistance programs in order to increase economic activity in Alaska and create new employment opportunities for Alaska."

- Alaska's OED currently has a division head, plus 11 employees in five sub-programs, many of which can be tied to one or more functions in Alaska Statute.
    - The Alaska Film Office (3 employees, one of whom is shared with Tourism) (AS 44.33.231, Film Office)
    - Business Development (2 employees, one of whom is a forest products specialist) (AS 44.33.900-Alaska Forest Products Research and Marketing Program)
    - Office of Fisheries (1) (AS 44.33.065, Regional Seafood Development Associations)
    - Office of Mineral Development (2) (AS 44.33.431, Alaska Minerals Commission)
    - Tourism Program (4, one of whom is shared with Film) (AS 44.33.119, Alaska Division of Tourism)

Alaska Industrial Development and Export Authority (AIDEA), within DCCED

- The mission of AIDEA, as described in the FY10 Governor's Operating budget, is "to provide means of financing to promote economic growth and diversification in Alaska."
- AIDEA's board of directors consists of five individuals
    - The Commissioner of Revenue
    - The Commissioner of Commerce, Community, and Economic Development
    - One other person appointed by the executive branch
    - Two public members appointed by the governor
- AIDEA's economic development programs have approximately 30 staff assigned to it, with 30 who are professional staff (estimate from AIDEA staff, October 2009)
    - AIDEA is a "public corporation of the state and a body corporate and politic constituting a political subdivision within the Department of Commerce, Community and Economic Development, but with separate and independent legal existence," under AS 44.88.010—44.88.159
    - AIDEA has a number of loan participation, revolving loan, and bond programs
    - AIDEA has ownership stakes in several major projects
- AIDEA also is home to another agency, Alaska Energy Authority (AEA) which currently has a community development mission
    - Though the agencies are separate, they share employees and resources

Alaska Division of Investments (DOI), within DCCED

- DOI's "primary responsibility is to administer and service twelve state loan programs under the Department of Commerce, Community, and Economic Development. These programs were primarily designed to promote economic development through direct state lending in industries that are not adequately serviced by the private sector."
- DOI typically interfaces with individual lenders and small businesses (in contrast to AIDEA, which handles significant industrial investments)
- DOI has 44 FTE employees (FY2010 budget)
- Loan programs authorized in statute are not comprehensive across range of Alaska industry

Non-Governmental Economic Development Organizations in Alaska

ARDORs

- Alaska Regional Development Organizations (ARDORs) are established under 44.33.895 (Alaska regional economic assistance program) and is subject to regulations at 3 AAC 57.010-900.
    - Under the statute the department can provide grants of up to $100,000 annually to match funds from non-state sources.

- The state's contributions to the ARDOR under this program are $50,000 annually. With the addition of an ARDOR in the last two years, the state's total contribution has increased, but organizations still receive the same amount. (Annual funding since 1992 is flat at $620,000; except for increase of $57,000 starting in FY09 with addition of twelfth ARDOR)
- According to the website of OED, ARDORs are intended to
  - *enable communities to pool their limited resources, and work together on economic development issues;*
  - *develop partnerships among public, private and other organizations,*
  - *offer a technical, nonpartisan capacity to develop and implement an economic development strategy,*
  - *often have extensive experience with federal/State programs, and*
  - *provide needed technical assistance via direct links with local citizens.*
- With large service regions and limited funding, some ARDORs have very difficult times attracting experienced staff to run economic development programs
  - Some conversations have been had to establish system-wide capacity-building fund for the ARDORs so that staff of the ARDORs can take advantage of professional development opportunities despite limited budgets

Additional Regional Economic Development Groups

- Regional/local groups also exist, such as Juneau Economic Development Council, Fairbanks Economic Development Corporation, Alaska Village Initiatives.
  - These have more local focus

University Economic Development Resources and Coordination with State Resources

The University of Alaska has several economic development programs doing technical assistance, training, etc.

- **Center for Economic Development, at the Institute of Social and Economic Research, UAA**
  - One of 52 university centers nationally designated by Economic Development Administration
  - Works at level of *municipalities, large non-profits, service-providing for profits (such as Alaska Native Corporations)*
    - 2008 Annual Report includes list of clients: http://ced.uaa.alaska.edu/publications/2008AnnualReport.pdf
  - According to their website, CED "leverages the resources of the university system to support economic development in Alaska, providing technical assistance in the form of information, data, and know-how in evaluating, shaping and implementing specific projects and programs that promote economic development across the state." (http://ced.uaa.alaska.edu)
  - Supported by fee for service in most cases, in order to support program delivery costs; some budget also from State
  - CED helps with local and regional planning, feasibility analysis, strategic planning (organizational and community) financial analysis, market and economic research
  - Recently, CED began coordinating accredited certification courses for the International Economic Development Council, to certify IECD economic development professionals
    - NB: Currently, there is not a single certified economic development professional working in Alaska

- **Small Business Development Centers**
  - Works at level of small, individual entrepreneurs
  - Provide free- and low-cost consulting to small business and micro-enterprise
  - Funded by US Small Business Administration with matching funds from state.
  - Provides consulting services and low-cost educational programs to entrepreneurs
  - Program's "business advisors" are certified through the Alaska SBDC's professional Certification program
  - Has a rural outreach program

How are Other State Governments Doing Economic Development?

Several states are recognized for their innovation in economic development within state government. Some of these are profiled below.

The states profiled below were selected because of their recognition as successful models, or commonalities with Alaska (rural Western). This report profiles North Dakota, Wyoming, Indiana, and Kentucky, which are all recognized for their economic development programs, as well as Oregon, which shares some similarities with Alaska as a Western state with large rural areas. All of these states have advisory and/or policy bodies that primarily comprise private sector leaders.

NB: Descriptions below reference "primary" or "basic" industries. These are industries that bring new dollars into a state's economy. Oftentimes these are because the business outputs are produced for markets outside the state. In some cases federal government programs, which bring dollars into state economies, can also be seen as contributing to the primary/basic sectors. This differs from support sector businesses, which provide services within the state. Primary/basic businesses are the economic pumps for an economy.

North Dakota www.business.nd.gov

- Economic Development & Finance is a division within a department that also houses Tourism and Community Development
  - Tourism is separate because development approach differs significantly from standard "primary/basic" sector activities.
- North Dakota has an Economic Development Foundation, a private foundation established by the Legislature, to provide guidance and private-sector oversight of state economic development efforts. It maintains a strategic plan for economic development.
  - 23 "business leaders," meet quarterly
  - has the ability to raise private funding to support state efforts
- Division heads are professional positions, not appointed
- Majority of staff at Economic Development and Finance Division are certified economic development professionals through the IEDC
- Primary function of division is to work with businesses to identify the state programs and resources that will help them establish, grow, or retain in North Dakota; deal structuring (not technical assistance, which is pointed to university, SBDCs, etc.)
- North Dakota has a development bank, the Bank of North Dakota, which manages nearly all of the state's loan and investment programs, with very few exceptions
- Department ***only works on inquiries/investments that are in the Basic sector of the economy*** (Basic industries bring new money into the economy from out of state, while secondary industries provide services to support the basic industries)

- Web presence: North Dakota has http://www.business.nd.gov/, which is a user-friendly portal to information necessary to do business in North Dakota
- 17 staff for ED&F, including 2 finance people to run loan programs outside the Bank of North Dakota

Wyoming www.wyomingbusiness.org

- Wyoming Business Council is the economic development group in state government
    - It has a corporate structure, incorporates private business practices, regional offices
    - Has a Board of Directors and CEO, though it is within state government
        - Board members are successful business owners from Wyoming
        - Board members appointed by Governor; CEO hired by Board
        - Employees of agency are at-will
        - Board does "business plan" for department
    - Staff of 53 for WBC, plus 19 for Tourism
        - 7-8 administrative staff, all other work on economic development and management of community grant programs
    - History of the WBC: http://www.wyomingbusiness.org/about/history.aspx
    - Enabling Legislation: Wyoming Statutes 9-12-101 through 9-12-804 (http://legisweb.state.wy.us/statutes/statutes.aspx?file=titles/Title9/T9CH12.htm)
    - WBC focuses on basic industries, with few exceptions in rural areas where basic service infrastructure (grocery stores) do not exist
        - Industries have to produce something sold outside the region to get WBC attention.
    - WBC works closely with university programs, including SBDCs, Intellectual property, incubators, etc.

Kentucky www.thinkkentucky.com

- Primary state agency for economic development is the Cabinet for Economic Development, which is governed by the Kentucky Economic Development Partnership Board
- Kentucky Economic Development Partnership Board
    - Enabled in 1992 by HB 89.
        - Thirteen members representing each of eight congressional districts and different industries, plus secretaries from four cabinets (Econ. Development, Finance and Administration, Environmental and Public Protection, and Tourism), plus Governor
        - Cabinet includes
            - Office of Secretary
            - Department for Business Development
                - "Responsible for coordinating the recruitment and attraction of new companies that will enhance the overall viability of the state's economy, as well as assisting and encouraging job retention and creation by working with existing Kentucky business. The Department partners with outside agencies and communities to conduct workshops, community assessments, and business surveys to support local development efforts"
            - Department of Financial Incentives
            - Department of Commercialization and Innovation

- "Responsible for developing and implementing a strategy to create, attract, and assist knowledge-based companies to Kentucky."

Indiana www.in.gov/iedc

- Primary state group for economic development is the Indiana Economic Development Corporation
  - Created in February 2005 to replace the former Department of Commerce
  - Has a board of 12, including governor and 11 private industry participants
  - According to IEDC website, "The IEDC is focused exclusively on economic development and has incorporated all state entities with economic development responsibilities into its organizational structure."

Oregon www.oregon4biz.com

- Economic development is a division within the Oregon Business Development Department, which also houses community development functions
  - About 25% of department budget goes to economic development
- Economic development overseen by the Oregon Business Development Commission, which is statutorily authorized, and consists of seven private sector individuals (not agency) appointed by the Governor
  - Entity sets policy direction for agency activity
- Department head is appointed, but division heads are professional staff
- 13 people working in field around Oregon, plus five people specializing in international development
- No certification/training requirements specific to department; some perhaps specific to positions, particularly for international development people
- Primary role of business development division is deal structuring, pulling state resources together to support creation or retention of jobs
- Staff only work on primary (basic) sector industries, refer others to university, SBDCs, other partners

Points to Consider about Alaska's Current System

- State government's oversight and/or policy direction from private sector is currently limited to two of five seats on the board of AIDEA.
  - There is no private sector input built into OED or DOI
  - Without private sector input it may be difficult to align state programs across divisions with real needs in Alaska economy
- Incentive programs in Alaska Statute are limited
  - New Business Incentive Program (DCCED), established under 45.81.010, is not funded
  - Film Incentive office supported by two staff at OED (DCCED)
  - Exploration Incentive Credits (DNR)
  - AGIA (DNR)
  - Various AIDEA Programs
- Economic Development functions are distributed between several divisions and/or offices, including:
  - Division on Investments (Greg Winegar, Division Director)
  - Office of Economic Development (Joe Austerman, Director)
  - Alaska Industrial Development and Export Authority (Ted Leonard, Executive Director)

- Economic development staffing in these offices are about 15% of total DCCED personnel
  - Viewed alone they are 8%, 2%, and 6% respectively
  - May have difficulty getting strategic focus within larger mission of department
- No certified economic developers currently working in state (compares to other states where professional certification is common among economic development staffers)
  - University's Center for Economic Development has started offering training modules several times per year (the standard for these courses is multi-day intensives) for certification through the International Economic Development Council
    - This is a relatively new service
    - Department estimates cost in training to reach certification goals, before travel and lost work time, is $3,400 per person
  - Currently there are no practicing certified economic development professionals working in Alaska (in state government or out of state government)
- State government's interaction with University resources may be inefficient; economic development resources may be "siloed"
  - Do OED and AIDEA have regular practice of directing inquiries to existing University resources?
  - Do agencies and universities work closely to avoid duplicating tools and services?
  - What gaps should agencies fill that are not natural to the University?
- State government, through OED, is currently focused on a small set of industries
  - Focus may be broadened to allow room for additional industries/ideas
- Alaska state government does not maintain a web presence focused on attracting or retaining business
  - For contrast, see Oregon, http://www.oregon4biz.com/, found in two clicks from the State of OR homepage); North Dakota, http://www.business.nd.gov; Kentucky http://www.thinkkentucky.com/

Possible Areas of Discussion for Legislature

1. Restructuring economic development functions within state government under alternate models such as public/private partnerships, corporate structures, strengthened divisions, or others.
2. Consideration of creation of a non-governmental (private sector) policy group at head of state economic development. Depending on departmental structure the advisory entity could be modeled on corporate, foundation, policy, or other board structures
3. Establishment or reestablishment of incentive programs to support economic development programs
4. Budgeting for ARDOR programs
5. Budgeting for University programs that support small business development
6. Oversight hearings prior to and within the budget process to assess focus and resources of state offices with economic development missions
7. Establishment of additional loan programs to support small business economic development

    - Economic development staffing in these offices are about 15% of total DCCED personnel
        - Viewed alone they are 8%, 2%, and 6% respectively
        - May have difficulty getting strategic focus within larger mission of department
- No certified economic developers currently working in state (compares to other states where professional certification is common among economic development staffers)
    - University's Center for Economic Development has started offering training modules several times per year (the standard for these courses is multi-day intensives) for certification through the International Economic Development Council
        - This is a relatively new service
        - Department estimates cost in training to reach certification goals, before travel and lost work time, is $3,400 per person
    - Currently there are no practicing certified economic development professionals working in Alaska (in state government or out of state government)
- State government's interaction with University resources may be inefficient; economic development resources may be "siloed"
    - Do OED and AIDEA have regular practice of directing inquiries to existing University resources?

Robert Shively

2 Community Development or Economic Development?

Love and marriage, love and marriage...
You can't have one without the other.
—Sammy Cahn

SO GOES THE refrain from an old song. The same holds true for community development and economic development. *You can't have one without the other.* The two activities are complementary, not competitive. They are different sides of the same coin.

I had a professor in college who used to tell his students, "The line of demarcation between a genius and a maniac is very hard to draw." Similarly, one could easily say, "The line of demarcation between community development and economic development is very hard to draw." For example, suppose a new four-lane highway is built around a small city and serves a 160-acre industrial site. Is that economic development or community development? Who knows? Who cares?

Community development is capacity building; economic development is wealth creation.

Community development involves public facilities—schools, libraries, parks, hospitals, cultural attractions, recreational facilities. These are quality of life factors, and companies look closely at them when considering an investment in a town.

Economic development represents the creation of wealth, primarily through the attraction of investment. Economic development and its concomitant wealth creation provide the financial resources and tax base that make community development possible.

You can't have one without the other.

The Relationship between Community and Economic Development

Stanford Research Institute alludes to the relationship of community and economic development in its definition of economic development: "The process by which your community will improve its *capacity* to grow and develop—economically, educationally, socially, and culturally" (Kotler, Haider, and Rein 1993, p. 75, emphasis added).

Community development is not only about physical structures and their contents, but also involves leadership training and development. It includes building the social structures for governance and community involvement while facilitating citizen participation and input. Capacity building includes creating a critical mass of an involved, informed, and enthusiastic citizenry, giving a community the capacity to solve its problems and create a better quality of life.

While many community leaders are frequently involved in both community and development activities, there are distinct differences in the management, supervision, and funding of the

638

two. Community development activities are primarily the province of governmental bodies—the city council, board of education, or county commissioners, for example. These governing bodies are elected by the people and allocate public funds to capacity-building projects. Private entities may provide funds for a community facility such as a library, hospital, or museum, but the management of the facility is usually the responsibility of the appropriate governmental body.

Economic development, on the other hand, has historically been a project of the private sector, usually the local chamber of commerce and/or a local development corporation. Because of the close relationship between community and economic development and state and federal grant programs available only to political subdivisions, the current trend is to create a public-private partnership in which the financing and the governance of the economic development program are shared by the private and public sectors. This is more thoroughly discussed in chapter 4, "Organizing the Economic Development Program," and chapter 10, "Funding the Economic Development Program."

Defining Economic Development

Though accurate, it is not sufficient to define economic development simply as wealth creation. It deserves a more comprehensive definition.

A generation ago, the American Economic Development Council (which recently merged with the Council on Urban Economic Development to form the International Economic Development Council) adopted the following definition:

> Economic development—the process of creating wealth through the mobilization of human, financial, capital, physical, and natural resources to generate marketable goods and services.

Although not universally accepted by the profession, this definition established two important concepts:

1. It established that economic development is a process, a continuum, a game that never ends. A specific event such as the groundbreaking for a new industry is an event, the result of the continuing process.
2. It identified wealth creation as the goal and result of the process of economic development.

Other organizations and individuals have developed other definitions. MDC, an economic development think tank primarily serving the Southern states, uses this definition:

> Economic development—the process by which a community creates, retains and reinvests wealth. The goal of economic development should be to raise people's standard of living (MDC 1999).

This definition reasserts wealth creation as the result of economic development and introduces two very important functions—the retention and reinvestment of wealth. Retention of wealth-creating enterprises is an important part of any economic development program; it is usually referred to as retention and expansion, or R and E. (See chapter 8, "Building a Manufacturing Base.")

The reinvestment of wealth in a community is a key part of community and economic development, especially in small towns. The location of a new industry from outside the community is an important event, but how often does it occur? For a community to prosper, it is essential that people of means reinvest their wealth in the community even though it may not attract the publicity that a new industry does. Reinvesting in a community involves expanding existing businesses; real es-

tate acquisition and development; and investing in entrepreneurial ventures, housing development, and similar activities.

The Aspen Institute developed this definition:

> Economic development is essentially the process by which individuals and organizations make decisions to invest in an area. Through innovations and adaptations these investors increase their capacity to create wealth.

This definition reinforces the concepts of process, wealth creation, and investment. More importantly, it recognizes the role of individuals and organizations in the economic development process.

M. Ross Boyle, president of Growth Strategies Organization, Inc., a long-time leader in the field and past chairman of the American Economic Development Council, used this definition in his many presentations at the Economic Development Institute, University of Oklahoma: "Economic development is investment for the purpose of creating wealth: the use of people, money, and materials to produce profits." Boyle's definition stresses the importance of investment in creating wealth. His reference to profits, although not stated specifically, implies that investors produce profits for themselves and also increase profit potential for all businesses in a community.

The Economic Development Council of Colorado states that economic development is "creating and retaining community wealth which results in jobs, payroll, tax revenues, and a higher per capita income."

These definitions are all consistent in identifying process, wealth creation, investment, reinvestment, and retention of wealth as the driving forces of economic development. To bring these essential concepts together, I offer the following definition:

> **Economic development is the process of creating wealth through investment and reinvestment in a community resulting in more jobs, higher incomes, an expanded tax base, a more diversified economy, business improvement, and a better quality of life.**

[This page intentionally left blank]

Legislation, Executive Orders and Policy from Other States

1. North Dakota
2. Wyoming
3. Oregon
4. Indiana
5. Washington

54-60-04. North Dakota economic development foundation - Executive committee - Duties. The North Dakota economic development foundation is created.

1. The foundation is composed of a minimum of fifteen and a maximum of thirty members appointed by the governor for two-year terms, except the governor shall appoint approximately one-half of the initial foundation members to one-year terms in order to initiate a cycle of staggered terms. Appointment of the foundation members must ensure a cross section of business, tourism, and economic development representation, and must ensure that at least one member represents rural concerns.

2. The foundation members shall elect an executive committee with a minimum of five and a maximum of seven foundation members, which shall include a chairman, vice chairman, secretary, treasurer, and up to three members at large.

3. The foundation shall seek funding for administrative expenses from private sector sources and shall seek and distribute private sector funds for use in commerce-related activities in the state.

4. The foundation shall:
   a. Provide the governor advice and counsel in selecting the commissioner.
   b. Serve in an advisory role to the commissioner.
   c. Develop a strategic plan for economic development in the state and set accountability standards, measurements, and benchmarks to evaluate the effectiveness of the department in implementing the strategic plan.
   d. Develop a strategic plan for the development of value-added agriculture in the state.
   e. Monitor tourism and economic development activities and initiatives of the department.
   f. Recommend state and federal legislation relating to strengthening the state's economy and increasing the state's population.
   g. Monitor state and federal legislation and initiatives that may impact the state's economy and population.
   h. Serve as a source of expertise for developing public and private initiatives to strengthen the state's economy and increase the state's population.

54-60-05. Compensation and reimbursement of foundation members. The foundation may establish the level of compensation to which a foundation member is entitled. A foundation member is entitled to reimbursement for mileage and expenses as provided for state officers.

Sixty-first
Legislative Assembly
of North Dakota

SENATE BILL NO. 2110

Introduced by

Industry, Business and Labor Committee

(At the request of the Department of Commerce)

A BILL for an Act to create and enact two new sections to chapter 54-60 of the North Dakota Century Code, relating to the rural development office and the North Dakota rural development council; to amend and reenact sections 10-30.5-04, 54-34.3-01, 54-34.3-03, and 54-34.3-04, subsection 2 of section 54-34.3-13, sections 54-34.3-15, 54-34.4-01, and 54-34.4-02, subsection 1 of section 54-34.4-03, subsection 3 of section 54-60-04, and sections 54-60-06 and 54-60-17 of the North Dakota Century Code, relating to the powers of the North Dakota Development Fund, Incorporated, the department of commerce division of economic development and finance, the department of commerce division of tourism, the state tourism policy, the North Dakota economic development foundation, the North Dakota commerce cabinet, and the department of commerce division of workforce development; and to repeal sections 54-34.3-05, 54-34.4-04, and 54-60-11 of the North Dakota Century Code, relating to the finance office, the motion picture development office, and target industries.

BE IT ENACTED BY THE LEGISLATIVE ASSEMBLY OF NORTH DAKOTA:

SECTION 1. AMENDMENT. Section 10-30.5-04 of the North Dakota Century Code is amended and reenacted as follows:

10-30.5-04. ~~(Effective through July 31, 2009)~~ Powers. The corporation must be organized as a nonprofit corporation. In addition to the powers in chapter 10-33, the corporation may:

1. Cooperate and contract with any private or public entity.
2. Receive appropriations from the legislative assembly and other public moneys as well as contributions from other private or public contributors.
3. ~~Borrow funds not to exceed ten million dollars from the Bank of North Dakota for the purpose of investing in North Dakota alternative and venture capital investments and early-stage capital funds. The corporation may provide~~ Provide

management services for the Bank's alternative and venture capital investments and early-stage capital funds.

~~**(Effective after July 31, 2009) Powers.** The corporation must be organized as a nonprofit corporation. In addition to the powers in chapter 10-33, the corporation may:~~

~~1. Cooperate and contract with any private or public entity.~~

~~2. Receive appropriations from the legislative assembly and other public moneys as well as contributions from other private or public contributors.~~

SECTION 2. AMENDMENT. Section 54-34.3-01 of the North Dakota Century Code is amended and reenacted as follows:

54-34.3-01. Department of commerce division of economic development and finance established - Mission. The department of commerce division of economic development and finance is established to assume the functions, powers, and duties of the department of economic development and finance with respect to programs and other efforts intended to enhance the economic development of the state. The mission of the division is to develop strategies and programs to:

1. Facilitate the growth, diversification, and expansion of existing enterprises and the attraction and creation of new wealth-generating enterprises in the state;
2. Promote economic diversification and innovation within the basic industries and economic sectors of this state, including strategies and programs designed to specialize and focus the state's economy on ~~advanced agriculture and food processing, energy byproduct development, export services and tourism, and advanced manufacturing~~ identified target industries;
3. Promote increased productivity and value-added products, processes, and services in the state, and the export of those goods and services by North Dakota enterprises to the nation and to the world;
4. Maintain and revitalize economically depressed rural areas by working in close collaboration with local communities and by encouraging communities to enter into cooperative relationships for more efficient and effective education, health care, government service, and infrastructure maintenance;
5. Forge a supportive partnership with the Bank of North Dakota, the board of higher education and the state's institutions of higher education, regional planning

councils, local development organizations and authorities, the ~~Myron G. Nelson Fund, Incorporated, the~~ state's nonprofit development corporations, and other appropriate private and public sector organizations in achieving the economic goals of the state; and

6. Identify those statutes, administrative rules, and policies that impede the attraction, creation, and expansion of businesses and job creation in this state.

SECTION 3. AMENDMENT. Section 54-34.3-03 of the North Dakota Century Code is amended and reenacted as follows:

54-34.3-03. Division structure. The division consists of:

1. ~~A finance office;~~
2. ~~An international business and trade office;~~
3. ~~Offices established by statute; and~~
4. 2. Offices the director organizes and establishes as necessary to carry out most efficiently and effectively the mission and duties of the division.

SECTION 4. AMENDMENT. Section 54-34.3-04 of the North Dakota Century Code is amended and reenacted as follows:

54-34.3-04. Director - Compensation - Duties. A director shall supervise and control the division. The director shall:

1. Manage the internal operations of the division and establish policies that promote the orderly and efficient administration of the division;
2. Appoint personnel as may be determined necessary to carry out this chapter and fix their compensation within the limits of legislative appropriations;
3. Assume central responsibility to develop, implement, and coordinate within state government a comprehensive program of economic development consistent with the mission of the division;
4. Coordinate that program of economic development with all other appropriate state and local government departments, agencies, institutions, and organizations that perform research, develop and administer programs, gather statistics, or perform other functions relating to economic development, and those government entities shall advise, cooperate, and provide reasonable assistance to the director in carrying out this chapter;

5. Advise, and cooperate with, departments and agencies of the federal government and of other states, private business and agricultural organizations and associations, research institutions, and any individual or other private or public entity, and call upon those entities or individuals for consultation and assistance in their respective fields of endeavor or interest in order that the division and the state may benefit from up-to-date technical advice, information, and assistance;
6. Cooperate with individuals and both public and private entities, including the state's congressional delegation, in identifying and pursuing potential sources of funding and to receive those funds to be expended for purposes consistent with this chapter;
7. Have authority to enter into contracts upon terms and conditions as determined by the director to be reasonable and to effectuate the purposes of this chapter; ~~and~~
8. Identify and coordinate sources of capital and financial assistance, including lending programs of the Bank of North Dakota, and administer programs of financial assistance placed under the administration of the division, to business and industry, local governments, and other entities and individuals in the state consistent with the mission of the division; and
9. Have authority to do any and all other things necessary and proper to carry out this chapter.

SECTION 5. AMENDMENT. Subsection 2 of section 54-34.3-13 of the North Dakota Century Code is amended and reenacted as follows:

2. The department shall designate an applicant city as a rural growth incentive city eligible for a loan if the city raises funds in the amount of a dollar-for-dollar match for the amount requested in the loan~~, prepares an economic development strategic plan,~~ and meets any additional program requirements provided by rule. The source of city funds used for loan matching funds may be any combination of public and private funds. If the department designates a city as a rural growth incentive city eligible for a loan under this section, subject to the availability of funds, the state shall make a loan to the city in an amount not less than twenty-five thousand dollars and not more than seventy-five thousand dollars. The department shall establish the amount of the interest rate for loans provided to a

city under this subsection. The funding source of the state loan is the North Dakota development fund. The city shall distribute the city and state funds to qualifying new or expanded primary sector businesses in the city. A qualifying business in the city includes a business that provides essential services to the city. For purposes of this subsection, a business that provides essential services does not include a public utility. The governing body of the city determines whether a new or expanded primary sector business qualifies for funding, and the director of the department determines whether a business that provides essential services to the city qualifies for funding. The state shall distribute a loan to a rural growth incentive city once the city establishes the city has chosen a specified qualified business to receive funding.

SECTION 6. AMENDMENT. Section 54-34.3-15 of the North Dakota Century Code is amended and reenacted as follows:

54-34.3-15. Local economic developer ~~certification~~ education program. The director shall implement ~~a certification~~ an education program through which the division provides training to assist local economic developers and community leaders in meeting the needs of businesses. The director may contract with a third-party service provider to assist in implementing the program. The director may set and charge a fee for the receipt of services under this program.

SECTION 7. AMENDMENT. Section 54-34.4-01 of the North Dakota Century Code is amended and reenacted as follows:

54-34.4-01. Division of tourism - Director. The division of tourism is established to foster and promote tourism to, and within, the state and the full development of the state's tourism resources and to serve as a planning and coordinating agency for tourism-related programs of the state and the state's ~~political subdivisions~~ tourism partners. The director shall supervise and control the division of tourism.

SECTION 8. AMENDMENT. Section 54-34.4-02 of the North Dakota Century Code is amended and reenacted as follows:

54-34.4-02. Duties of director. The director of the department of commerce division of tourism, within the limits of legislative appropriations, shall:

1. Implement the state's tourism policy;

2. Prepare and update annually a tourism ~~master~~ marketing plan for the ~~development~~ promotion and expansion of tourism in the state which identifies the state's tourism resources, estimates the impact of tourism on the state's economy, and proposes a ~~five-year plan~~ marketing strategy for activities of the division;

3. Work with industry groups to prepare a long-term strategic plan each biennium.

4. Measure and forecast visitor volume, receipts, and related social and economic impacts;

~~4.~~ 5. Work with the private sector and local, state, and federal agencies to develop the state's tourism-related infrastructure, facilities, services, and attractions, including the state's highways ~~and~~, parks, and historic sites;

~~5.~~ 6. Organize and coordinate programs designed to promote tourism to, and within, the state through various means. Those means may include:

a. ~~Display~~ Print advertising in magazines ~~and~~, newspapers, and direct mail;

b. Advertising on radio ~~and~~, on television, online, in displays, or using other advertising media;

c. Publishing pamphlets, brochures, and other graphic and pictorial materials; ~~and~~

d. Designing the tourism side of the state highway map;

e. Aiding and assisting representatives of the media to ensure greater coverage of the state's visitor attractions, events, and recreational opportunities; and

f. Other marketing activities and events aimed at increasing visitor volume.

~~6. Participate in travel shows;~~

7. ~~Supervise and administer visitor information centers that receive funding from the state~~ Work with the department of transportation to improve visitor services along highways in the state and in state rest areas;

8. Develop opportunities for professional and technical education and training in the visitor industry;

9. Foster an understanding among the state's residents of the economic importance to the state of hospitality and tourism;

10. ~~Cooperate with local, state, and federal agencies and organizations and the private sector for the promotion and development of tourism to, and within, the state;~~

~~11.~~ Provide advice and technical assistance to local, public, and private tourism organizations in promoting and developing tourism; and

~~12.~~ 11. Monitor the policies and programs of state agencies that significantly affect the visitor industry, notify those agencies of the effects of their actions on travel to, and within the state, and if necessary recommend programs or policy changes to those agencies.

SECTION 9. AMENDMENT. Subsection 1 of section 54-34.4-03 of the North Dakota Century Code is amended and reenacted as follows:

1. The legislative assembly declares that:
   a. This state is endowed with scenic beauty, historical sites, cultural resources, local festivals, attractions, recreational facilities, and a population whose ethnic diversity and traditions are attractive to visitors;
   b. These human and physical resources should be preserved and nurtured, not only because they are appreciated by other Americans and by visitors from other lands, but because they are valued by the state's residents;
   c. Tourism contributes to economic well-being by creating job opportunities, generating revenues for local businesses, and creating new wealth in the economy;
   d. Tourism is an educational and informational medium for personal growth which informs residents about their state's geography and history, their political institutions, their cultural resources, their environment, and about each other;
   e. Tourism instills state pride and a sense of common interest among the state's residents;
   f. Tourism enhances the quality of life and well-being of the state's residents by affording opportunities for recreation, new experiences, and relief from job stress;
   g. Tourism advertising and marketing improves the image of North Dakota;
   h. Tourism promotes international understanding and good will, and contributes to intercultural appreciation;

~~h.~~ i. Tourism engenders appreciation of the state's cultural, architectural, technological, agricultural, and industrial achievements and is helpful in attracting new residents;

~~i.~~ j. The development and promotion of tourism to and within the state is in the interest of the people of this state;

~~j.~~ k. Tourism should develop in an orderly manner in order to provide the maximum benefit to the state and its residents;

~~k.~~ l. The development of a strong and competitive state visitor industry depends upon the availability of trained personnel, necessary infrastructure, and a receptive climate for tourism investment; and

~~l.~~ m. A comprehensive tourism policy is essential if tourism in the state is to grow in an orderly manner.

SECTION 10. AMENDMENT. Subsection 3 of section 54-60-04 of the North Dakota Century Code is amended and reenacted as follows:

3. The foundation shall seek funding for administrative expenses from private sector sources and shall seek and distribute private sector funds for use in commerce-related activities ~~in~~ of the state.

SECTION 11. AMENDMENT. Section 54-60-06 of the North Dakota Century Code is amended and reenacted as follows:

54-60-06. Commerce cabinet. The North Dakota commerce cabinet is created. The cabinet is composed of the directors of each of the department divisions and of the executive heads, or other authorized representatives, of the state board for career and technical education, the state board of higher education, the Bank of North Dakota, the department of agriculture, workforce safety and insurance, the department of transportation, job service North Dakota, the game and fish department, and of any other state agency appointed by the commissioner. The commissioner is the chairman of the cabinet and shall determine which agencies are members of the cabinet. The cabinet shall:

1. Coordinate and communicate economic development and tourism efforts of the agencies represented.
2. Meet at times determined by the commissioner.

~~3. Develop and make available before each regular session of the legislative assembly a list that identifies economic development moneys included in budget requests of cabinet agencies.~~

SECTION 12. AMENDMENT. Section 54-60-17 of the North Dakota Century Code is amended and reenacted as follows:

54-60-17. Division of workforce development - ~~Higher education internships~~ Internships, apprenticeships, and work experience opportunities. The division of workforce development shall administer a program to increase use of ~~higher education~~ internships, apprenticeships, and work experience opportunities for higher education students and high school students enrolled in grade eleven or twelve. The primary focus of this program must be higher education internships in target industries. This program shall provide services to employers, communities, and business organizations to increase ~~higher education~~ internship, apprenticeship, and work experience opportunities.

SECTION 13. A new section to chapter 54-60 of the North Dakota Century Code is created and enacted as follows:

Rural development office.

1. The commissioner shall administer the rural development office. The purpose of the office is to assist in the development of rural North Dakota communities.
2. The commissioner may contract with a third party for the provision of services for the rural development office. If the commissioner contracts with a third party under this subsection, all data and databases collected and created by the third party in performing services for the office are the property of the department and the third party.
3. The department may seek and accept any gift, grant, or donation of funds, property, services, or other assistance from public or private sources for the purpose of furthering the objectives of the rural development office.

SECTION 14. A new section to chapter 54-60 of the North Dakota Century Code is created and enacted as follows:

North Dakota rural development council - Composition. The North Dakota rural development council is created.

1. The North Dakota rural development council is composed of a minimum of nine and a maximum of seventeen members. The commissioner is an ex officio voting member of the council. The governor shall appoint council members for two-year terms, except the governor shall appoint approximately one-half of the initial council members to one-year terms in order to initiate a cycle of staggered terms. Appointment of the council members must ensure representation from eight regions designated by the commissioner. Members of the council serve at the pleasure of the governor.
2. The council shall select its own officers who shall serve for a term of two years commencing on October first of each year.
3. The council shall have at least two meetings each year and such additional meetings as the chairman determines necessary at a time and place to be fixed by the chairman. Special meetings must be called by the chairman on written request of any four members. A simple majority of the council constitutes a quorum and may act upon any matter coming before the council. Members of the council are entitled to reimbursement in the same manner and at the same rate provided by law for other state officials.
4. The council, in cooperation with the rural development office, shall:
   a. Facilitate collaboration among federal, state, local, and tribal governments and the private and nonprofit sectors in the planning and implementation of programs and policies that have an impact on rural areas of the state;
   b. Monitor, report, and comment on policies and programs that address, or fail to address, the needs of the rural areas of the state; and
   c. Facilitate the development of strategies to reduce or eliminate conflicting or duplicative administrative or regulatory requirements of federal, state, local, and tribal governments.

SECTION 15. REPEAL. Sections 54-34.3-05, 54-34.4-04, and 54-60-11 of the North Dakota Century Code are repealed.

Wyoming Statutes 9-12-101 through 9-12-804

CHAPTER 12 - WYOMING ECONOMIC DEVELOPMENT ACT

ARTICLE 1 - IN GENERAL

9-12-101. Short title.

This chapter shall be known and may be cited as the "Wyoming Economic Development Act."

9-12-102. Definitions.

(a) As used in this act, the following terms have the following meanings, except where the context clearly indicates otherwise:

(i) "Board" means the board of directors of the council;

(ii) "Council" means the Wyoming business council, the body corporate created by this article;

(iii) "Federal agency" means the United States, the President of the United States, and any department, corporation, agency, or instrumentality heretofore or hereafter created, designated, or established by the United States;

(iv) "Financial aid" means:

(A) The infusion of risk capital to persons by making investments for use in the development and exploitation of specific products;

(B) The purchase of securities;

(C) Royalty agreements;

(D) Loans and loan guarantees;

(E) Any contractual arrangement in which the council provides technological services to any person involving the development and exploitation of a specific product.

(v) "Person" means natural persons, firms, foundations, associations, corporations, business trusts, partnerships, joint ventures, and public bodies, including but not limited to the state of Wyoming, any state, and any agency, department, institution, political subdivision or instrumentality of Wyoming or any state;

(vi) "Product" means any product, device, technique or process, which is or may be exploitable commercially and includes products, devices, techniques or processes which have advanced

beyond the theoretic stage and are readily capable of being, or have been, reduced to practice but excludes pure research;

(vii) "Venture" means any contractual arrangement with any person whereby the council obtains rights from or in a product or proceeds therefrom in exchange for the granting of financial aid to the person;

(viii) "This act" means W.S. 9-12-101 through 9-12-1203.

9-12-103. Wyoming business council; creation; composition; compensation; termination; meetings; surety bonds; fiscal control.

(a) There is created the Wyoming business council. The council is a body corporate operating as a state instrumentality operated solely for the public benefit. As such it shall have, and is hereby vested with, the powers and duties conferred in this chapter. It shall be governed by a board of directors consisting of fifteen (15) voting directors, appointed by the governor with the advice and consent of the senate. The governor shall be a member and cochairman of the board, but shall not vote. The appointed directors shall have demonstrated leadership and business expertise. An equal number of directors shall be appointed to initial terms of one (1), two (2) and three (3) years. Thereafter, directors shall serve for terms of three (3) years. No appointed director shall serve more than two (2) successive three (3) year terms. If a vacancy occurs, the governor shall appoint a successor in accordance with W.S. 28-12-101. The governor may remove any board member he appoints for cause and shall remove any director who fails to attend three (3) consecutive regular meetings of the council. No appointed council member shall send a designee to attend a council meeting nor vote by proxy. The board shall select one (1) of its members to act as cochairman of the board. The board shall retain a chief executive officer. The chief executive officer serves at the pleasure of the board. All of the appointed directors shall be appointed at large and at least twelve (12) of the appointed directors shall be residents of Wyoming.

(b) The appointed directors shall receive per diem for attending board meetings in the same amount as state legislators and shall receive no other compensation for serving on the board. The board shall fix the salary of the chief executive officer. Subject to the approval of the directors, the chief executive officer shall determine the terms of employment, tenure, duties, working conditions, promotion and termination of all other employees which the chief executive officer determines are necessary to carry out the purposes and functions of the council. Employees of the council shall be covered by the Wyoming Retirement Act, the State Employees and Officials Group Insurance Act and the Wyoming Deferred Compensation Act.

(c) Upon termination of the council, all its rights and properties shall pass to and be vested in the state.

(d) The council shall determine the date, time, place and method of notice for all regular meetings of the council. A majority of the voting directors of the council constitutes a quorum for the transaction of any business or the exercise of any power or function of the council. Matters shall be decided by a majority vote of the voting members of the council. As unanimously determined by the council members, the council may take action by conference telephone or similar communications equipment whereby all persons participating in the meeting can hear each other at the same time.

(e) The council may execute and maintain at its expense a blanket surety bond covering each director, the chief executive officer and the employees or other officers of the council in the penal sum of two hundred fifty thousand dollars ($250,000.00).

(f) The council may also form committees and advisory councils, which may include representatives who are not members of the board, to undertake more extensive study and discussion of the issues before the board.

(g) Except as specifically provided in this act, the following provisions do not apply to the council:

(i) W.S. 9-2-1001 through 9-2-1026.1;

(ii) W.S. 9-3-101 through 9-3-105;

(iii) The Wyoming Administrative Procedure Act.

(h) Except as specifically provided in this act, the provisions of W.S. 16-4-201 through 16-4-205 and 16-4-401 through 16-4-408 shall apply to the council.

9-12-104. General powers and duties of the council.

(a) Except as otherwise limited by this act, the council may:

(i) Sue and be sued and procure necessary liability insurance;

(ii) Have a seal;

(iii) Make and execute contracts and other instruments;

(iv) Adopt rules and regulations to implement the programs and functions assigned to the council by this act. Any rule adopted by the council shall be submitted to the management council of the legislature in accordance with W.S. 28-9-101 through 28-9-108, approved by the governor as provided in W.S. 16-3-103(d) and filed with the secretary of state;

(v) Acquire or contract to acquire by grant, purchase, option or otherwise, real, personal or mixed property or any interest in property, including patents, copyrights, trademarks or any other evidence of protection or exclusivity as to products;

(vi) Own, hold, clear, improve and rehabilitate, and sell, assign, exchange, transfer, convey, lease and mortgage real, personal or mixed property or otherwise dispose of, or encumber the same;

(vii) Grant options to purchase any interest in or asset arising out of an agreement;

(viii) Provide advisory, consultative or educational services, technical assistance and advice to any person in order to carry out the purposes of the council;

(ix) Mortgage or pledge any or all of its revenue, income, or interest in or asset arising out of a venture agreement;

(x) Except as otherwise provided in this act, deposit any funds of the council in any financial institutions located within the state;

(xi) Procure insurance against any loss in connection with its property and other assets and operations in amounts and from insurers it deems desirable;

(xii) Engage the services of consultants on a contract basis for rendering professional, financial and technical assistance and advice, including for studies and investigation likely to lead to business development;

(xiii) Contract for and accept any gifts or grants or loans of funds or property or financial or other aid in any form from the federal government or any agency or instrumentality thereof, or from any other source and pass through or otherwise comply, subject to the provisions of this chapter, with the terms and conditions thereof;

(xiv) Enter into agreements with persons doing business or who will do business in this state for the advancement of financial assistance to those persons for research and the development of specific products, procedures and techniques to be developed and produced in this state conditioned upon contractual assurances that the benefits of increasing or maintaining employment and tax revenues shall remain in and accrue to this state;

(xv) Consent to the modification of the terms of any mortgage, loan or contract to which the council is a party;

(xvi) Organize, conduct, sponsor or cooperate in and assist the conduct of special institutes, conferences and demonstrations relating to the stimulation and formulation of business development;

(xvii) Make investments in projects that have potential to stimulate economic development in the state;

(xviii) Render advice and assistance and to provide services to state agencies, local and regional economic development entities, private firms and other persons providing services or facilities for economic development in Wyoming;

(xix) Do all acts and things necessary or convenient to carry out the powers granted to it by this act or any other act;

(xx) Provide a program for severance pay and other transitional employment services to employees of the department of commerce who lost their employment with the state of Wyoming due to this act and who are not reemployed with the council within sixty (60) days of having their employment terminated with the department of commerce;

(xxi) Repealed by Laws 2008, Ch. 6, 2.

(b) The board, consistent with this act, shall develop guidelines for each of the areas specified in subsection (a) of this section relative to definitions, types of grants or loans, level of funding and repayment requirements.

9-12-105. Economic development services.

(a) It shall be the duty of the council to encourage, stimulate and support the development and expansion of the economy of the state. The council is charged with the following duties and responsibilities:

(i) To see that there are prepared and carried out effective economic development marketing and promotional programs;

(ii) To make available, in conjunction and cooperation with localities, chambers of commerce, industrial authorities and other public and private groups, to prospective new businesses basic information and pertinent factors of interest and concern to such businesses;

(iii) To formulate, promulgate and advance programs throughout the state for encouraging the location of new businesses in the state and the retention and growth of existing businesses;

(iv) To encourage and solicit private sector involvement, support and funding for economic development in the state;

(v) To encourage the coordination of the economic development efforts of public institutions, regions, communities and private industry and collect and maintain data on the development and utilization of economic development capabilities;

(vi) To establish such offices within and without the state that are necessary to the expansion and development of industries and trade. The council shall establish economic development regions and offices within the state based upon socioeconomic and geographic similarities;

(vii) To encourage the export of products and services from the state to national and international markets; and

(viii) To advise the University of Wyoming and the Wyoming community college commission in designating technical training and other educational programs in Wyoming's community colleges and the University of Wyoming beneficial to economic development activities in this state.

9-12-106. Planning and research.

(a) It shall also be the duty of the council to:

(i) Develop a comprehensive economic development strategy for the state, starting the first year of each new gubernatorial administration, consistent with the provisions of this act; and

(ii) Conduct such studies and research, in collaboration with state agencies, university and community colleges, local and regional industrial authorities and organizations, and other persons within

and without the state, as the council may deem necessary, to assist in the development of the comprehensive economic strategy and the development of recommendations and advice on the improvement of economic development and related programs and strategies across the state.

(b) The council may establish a Wyoming market research center to conduct regional, national and international market research for Wyoming manufacturers and to conduct market feasibility studies for value added projects across all economic sectors, including agriculture. If a center is formed:

(i) The council and center shall develop a plan to phase-in fees for services and a formula for commissions payable by manufacturers for sales which are directly attributable to the center's research. The plan shall be directed to make the center self-sufficient by July 1, 2003;

(ii) The center may utilize the services of student interns from the University of Wyoming and community colleges to provide those students with practical marketing experience.

9-12-107. Tourism promotion and development.

(a) Repealed By Laws 2007, Ch. 5, 2.

(b) Repealed By Laws 2003, Ch. 8, 2.

9-12-108. Coordination of business permits.

(a) The council shall:

(i) Compile information on the federal, state and local requirements necessary to begin and operate a business in Wyoming and make this information available to the public on request;

(ii) Develop application procedures to expedite the state licensing and permitting process;

(iii) Assist prospective businesses in obtaining the necessary federal, state and local permits and licenses;

(iv) Encourage and facilitate the participation of federal, state and local government agencies in permit and license coordination;

(v) Review permit requirements and the value to the state of these permits and prepare recommendations for changes for submission to the appropriate agency, the governor and the legislature.

(b) The council may request assistance from any state agency to carry out its duties under this section. State agencies shall cooperate with the request for assistance.

9-12-109. Promotion of agriculture.

The council shall encourage and promote the development of agriculture in the state including horticulture, apiculture, livestock, poultry, dairying and the kindred industries and including the development of new value-added agribusiness and product uses and markets for Wyoming agricultural products.

9-12-110. Exemptions from taxation; exceptions.

The exercise of the powers granted by this act constitutes the performance of an essential governmental function. The council shall not be required to pay any taxes levied by any municipality or political subdivision of the state, other than to comply with the Wyoming employment security law and for assessments for local improvements, upon its property or monies. Except as provided herein, the council's monies and the income therefrom, shall be free from taxation of every kind by the state, municipalities and political subdivisions of the state.

9-12-111. Investment and management of funds; audit.

(a) Except as otherwise provided in this act, the council may invest funds not required for immediate disbursement in securities in which state funds may be invested as provided by law, sell securities it has purchased and deposit securities in any financial institution. Funds deposited in financial institutions shall be secured by obligations authorized as permissible security for state investments. In investing and managing its funds, the council shall exercise the judgment and care which persons of prudence, discretion and intelligence would exercise under similar circumstances in managing the permanent disposition of their funds, considering the probable income and the probable safety of their capital.

(b) The director of the department of audit or his designee shall conduct an audit of the books and accounts of the council. The examination shall include a financial and compliance audit of the council's operations as the examiner deems appropriate. The audit shall be conducted at least once in each year and copies of the audit report shall be filed with the secretary of state, the joint minerals, business and economic development committee and the legislative service office.

9-12-112. Annual report and budget.

(a) The council shall submit an annual report in the manner provided by W.S. 9-2-1014 and using the benchmarks prescribed in this act. In addition to the requirements of W.S. 9-2-1014, included within the annual report shall be:

(i) The status of the implementation of the comprehensive economic development strategy and recommended legislative and executive actions related to the implementation of the comprehensive economic development strategy;

(ii) A summary of the total investments made by the council under the Wyoming partnership challenge loan program, article 3 of this chapter, including:

(A) The name of each borrower and the amount of each loan;

(B) An evaluation of the loan success in economic development using appropriate performance indicators as identified by the council;

(C) The cost of the loan program to the people of Wyoming in terms of:

(I) Forgone interest that could have been obtained if the funds had been invested by the state treasurer with the permanent funds of the state;

(II) Administrative and other costs associated with the program.

(D) Revenues and any other benefits obtained from the program.

(iii) Repealed By Laws 2003, Ch. 8, 2.

(iv) Progress concerning the development of the research marketing center and its self-sufficiency under W.S. 9-12-106(b);

(v) A report of the film industry financial incentive program as provided in W.S. 9-12-406;

(vi) A summary of the total investments made by the council under the workforce housing infrastructure program under W.S. 9-12-901 through 9-12-905, including:

(A) The name of each borrower and the amount of each loan;

(B) An evaluation of the loan success in providing workforce housing infrastructure;

(C) The cost of the program to the people of Wyoming in terms of administrative and other costs associated with the program.

(b) The council shall submit its budget for review as provided by W.S. 9-2-1010 through 9-2-1014.

9-12-113. Conflicts of interest.

Council members shall be subject to the provisions of W.S. 16-6-118 and shall abstain from voting in accordance with that section.

ARTICLE 2 - SCIENCE, TECHNOLOGY AND ENERGY FINANCIAL AID

9-12-201. Assumption of science technology and energy authority functions.

In assuming the functions of the science energy and technology authority the council shall administer the program in accordance with the provisions of this act generally and the specific provisions of this article.

9-12-202. Applications for financial aid from the council.

(a) All applications for financial aid shall be submitted to the council who shall investigate and prepare a report concerning the advisability of approving the proposed financial aid for the applicant and concerning any other factors deemed relevant by the council.

(b) The investigation and report shall include such facts about the applicant under consideration as its history, wage standards, job opportunities, stability of employment, past and present financial condition

and structure, pro-forma income statements, present and future markets and prospects, integrity of management as well as the feasibility of the proposed product to be granted financial aid, including the state of development of the product as well as the likelihood of its commercial feasibility.

(c) After consideration of the report, the council shall approve or deny the application. The applicant shall be promptly notified of the decision. In making the decision as to approval or denial of an application, the council shall give priority to those applicants whereby:

(i) The proceeds of the seed capital aid will only be used to cover the initial capitalization needs of the enterprise within Wyoming except as otherwise authorized in this article;

(ii) The enterprise has a reasonable chance of success;

(iii) Participation by the council is necessary to the success of the enterprise because funding for the enterprise is unavailable in the traditional capital markets, or because funding has been offered on terms that would substantially hinder the success of the enterprise;

(iv) The enterprise seed capital has the reasonable potential to create a substantial amount of primary employment within the state;

(v) The entrepreneur and other founders of the enterprise have already made or are contractually committed to make a substantial financial and time commitment to the enterprise;

(vi) There is a reasonable possibility that the council will recoup at least its initial investment from seed capital contracts; and

(vii) Binding commitments have been made to the council by the applicant for adequate reporting of financial data to the council including a requirement for an annual or other periodic audit of the books of the enterprise, and for control by the council over the management of the enterprise, so as to protect the investment including the right of access to financial and other records of the enterprise.

(d) In determining the level of financial support to be advanced, the council shall limit its proportion of financial aid consistent with the existence of a market failure in product development financing but shall not provide more than twenty percent (20%) of the funds of the council for any one (1) project. Any financial aid toward product development financing granted pursuant to this section shall be equally matched or exceeded by the applicant. No financial aid granted pursuant to this section shall in any manner be pledged as collateral by the applicant.

(e) Before granting any seed capital financial aid, the council shall enter into an agreement with the applicant providing for a return to the council which is commensurate with the level of risk and amount of the financial aid.

ARTICLE 3 - WYOMING PARTNERSHIP CHALLENGE LOAN PROGRAM

9-12-301. Definitions.

(a) As used in this article:

(i) "Business" means any proposed or existing enterprise which employs people within the state, provides services within the state, uses resources within the state or otherwise adds economic value to goods, services or resources within the state, and includes farm and ranch operations;

(ii) "Community development organization" means a group of private citizens organized as a business entity authorized to do business in this state for the purpose of providing financing for new, existing, or expanding businesses and other economic or community development purposes throughout its community or county, and which may take equity positions and shall take security positions in its borrowers' businesses and appropriate personal guarantees from the owners thereof;

(iii) "Economic development account" means the economic development enterprise account within the revolving investment fund created under article XVI, section 12 of the Wyoming constitution. The account shall consist of funds from payments as provided in W.S. 9-12-305 and other funds as provided by law;

(iv) "State development organization" means a corporation organized under W.S. 17-11-101 through 17-11-120 with the authority to provide financing for new, existing or expanding businesses and to fulfill other economic or community development purposes throughout the state of Wyoming, and which may take equity positions and shall take security positions in its borrowers' businesses and appropriate personal guarantees from the owners thereof;

(v) "Economic disaster" means an event occurring in Wyoming that has an economic impact with total lost revenues to impacted businesses in a twelve (12) calendar month period of at least four million dollars ($4,000,000.00) or an economic impact with total lost revenues to impacted businesses in four (4) or less counties in a twelve (12) calendar month period of at least one million dollars ($1,000,000.00). The business council may use good faith estimates of lost revenues to businesses in determining whether an event qualifies as an economic disaster. Calculation of lost revenues shall only include actual losses incurred and shall not include any future losses;

(vi) "Bridge financing" means the provision of financing for that portion of the total project cost which is calculated by subtracting from total project cost the sum of ownership debt and equity. The council shall not consider a proposal in which the bridge financing component exceeds thirty-five percent (35%) of total project cost or five hundred thousand dollars ($500,000.00), whichever is less, and the business does not contribute more than fifteen percent (15%) of the total project cost;

(vii) "Guarantee loan participation" means a provision of financing by the council in which the council participates with a lender that has secured a federal guaranteed loan to guarantee repayment of a loan made to a business. The maximum participation by the council shall be fifty percent (50%) of the loan or one million dollars ($1,000,000.00), whichever is less;

(viii) "Loan guarantee" means a provision of financing by the council in which the council guarantees a portion of a bank loan made to a business;

(ix) "Wyoming main street loan participation" means a provision of financing by the council in which the council participates with a lender that has made a loan to a business for building improvements

to maintain the structure's historical character. The maximum participation by the council shall be seventy-five percent (75%) of the loan or one hundred thousand dollars ($100,000.00), whichever is less.

9-12-302. Wyoming partnership challenge loan program; creation; rulemaking; administration account.

(a) The council shall establish and administer a partnership challenge loan program under this article and may contract for necessary professional services. Loans authorized under the program shall be limited, except as otherwise provided under W.S. 9-12-304(c) through (g), to community development organizations and state development organizations and made in accordance with the provisions of W.S. 9-12-304. Any community development organization or state development organization may submit an application to the council to participate in the program on forms prescribed by and subject to rules promulgated by the council.

(b) The council, shall establish all fees and interest rates to be charged for each loan as it is underwritten for this program. The interest rate for loans made under this program shall be not less than four percent (4%) per annum. Fees on loans under the program shall be paid monthly and deposited into a program administration account which is continuously appropriated to the council to be expended solely for the purpose of administering this article and loans authorized under it.

9-12-303. Council duties; actions on loan applications.

All complete applications to participate in the loan program established under this article which conform with the criteria established by law and rules promulgated under this article which are submitted to the council shall be considered by the council. The council shall review the application and may communicate directly with the applicant and other lenders or potential lenders of the applicant. The council shall approve or disapprove each application it considers in accordance with this article and rules promulgated under it. In making its determination under this section, the council shall consider whether approval of the application would cause unfair competition with any existing business in the area. The council shall establish loan amortization schedules, terms and conditions for each loan approved.

9-12-304. Criteria for loans.

(a) Except as otherwise provided under subsections (c) through (g) of this section, loans under this article may only be made by the council to community development organizations and state development organizations which meet the following eligibility criteria:

(i) The community development organization or state development organization will contribute an amount of cash or cash equivalent at least equal to the loan it receives under this article to a program of investment in its area of local economic development;

(ii) The community development organization or state development organization will consolidate the loan it receives under this article and its required contribution under paragraph (i) of this subsection and make loans to Wyoming businesses and investments in support of Wyoming businesses, such as infrastructure construction loans and occupational training loans;

(iii) The community development organization has been endorsed by a resolution of the legislative body of its municipality or county or, in the case of a state development organization, has been endorsed by a resolution of the council; and

(iv) As part of any agreement under this article and to ensure funds loaned or committed under this section are invested by the community development organization or the state development organization in local economic development in a reasonable period of time, the council shall reserve the right to terminate the agreement.

(b) Loans, loan commitments or loan guarantees or any combination thereof shall be made under this article only:

(i) If the total amount to a single community development organization, or to a business for an economic disaster loan as provided under subsection (c) of this section or to a business for bridge financing as provided under subsection (d) of this section, does not exceed five hundred thousand dollars ($500,000.00), if the total amount to state development organizations does not exceed three million five hundred thousand dollars ($3,500,000.00), if the amount to a business for a federally guaranteed loan as provided under subsection (e) of this section does not exceed one million dollars ($1,000,000.00), if the amount to a business for a loan guarantee does not exceed one hundred thousand dollars ($100,000.00) per loan guaranteed or eighty percent (80%) of any net loan loss by the bank, whichever is less or if the amount to a business for a Wyoming main street loan participation as provided under subsection (g) of this section does not exceed one hundred thousand dollars ($100,000.00);

(ii) If there are sufficient funds in the economic development enterprise account to fully fund it and all other outstanding commitments, loans, loan guarantees and guarantee loan participations;

(iii) If funds provided by the state are adequately collateralized. The adequacy of the collateral shall be determined by the council;

(iv) If the application for the loan or loan commitment is submitted on or after September 1, 1996.

(c) Any business or group of businesses may apply to the council for designation of an area of this state as an area in which an economic disaster as defined in W.S. 9-12-301(a)(v) has occurred. The council shall prescribe the form and contents of such applications. The council shall review each application and make a determination as soon as practicable as to whether an economic disaster area designation shall be made. The council may make loans to any business located within the designated economic disaster area that has lost revenue as a result of the economic disaster. Subsection (a) of this section does not apply to economic disaster loans under this subsection.

(d) Any business may apply to the council for bridge financing as defined in W.S. 9-12-301(a)(vi). The council shall prescribe the form and contents of such application. The council shall review each application and make a determination as soon as practicable. In the event of a default for any loan made under this subsection, liability shall be shared proportionately between the state and the lending institution in the same percentage as the source of the loan. The interest of the state and the lending institution shall have priority over any claim of the business receiving the bridge financing or any other third party.

(e) Any business may apply to the council for a guarantee loan participation as defined in W.S. 9-12-301(a)(vii). The council shall prescribe the form and contents of the application. The council shall review each application and make a determination as soon as practicable. The council shall structure any guarantee loan participation so that in the event of default of any loan which is participated in under this subsection:

(i) Liability shall be shared proportionally between the state and the lending institution in the same percentage as the source of the funding for the loan; and

(ii) The interest of the state and the lending institution shall have priority over any claim of the business receiving the financing or any other third party.

(f) Any business may apply to the council for a loan guarantee as defined in W.S. 9-12-301(a)(viii). The council shall prescribe the form and contents of the application. The council shall review each application and make a determination as soon as practicable. The council shall structure any loan guarantee so that in the event of default of any loan that is guaranteed under this subsection:

(i) Liability to the state under the guarantee shall not exceed one hundred thousand dollars ($100,000.00) per loan guaranteed or eighty percent (80%) of any net loan loss by the bank, whichever is less; and

(ii) The interest of the state and the lending institution shall have priority over any claim of the business receiving the financing or other third party.

(g) Any business may apply to the council for a Wyoming main street loan participation as defined in W.S. 9-12-301(a)(ix). The council shall prescribe the form and contents of the application. The council shall review each application and make a determination as soon as practicable. In the event of a default for any loan made under this subsection, liability shall be shared proportionately between the state and the lender in the same percentage as the source of the loan. The interest of the state and the lender shall have priority over any claim of the business receiving the main street loan participation or any other third party.

9-12-305. Economic development enterprise fund account; deposits; continuous appropriation; loans.

Except for fees deposited in accordance with W.S. 9-12-302(b), all repayments of principal and interest to the state in connection with loans made under this article and other funds as appropriated by the legislature for the challenge loan program shall be deposited into the economic development enterprise account within the revolving investment fund. All funds in the account may be used for and are continuously appropriated for loans authorized to be made under this article. The total principal balance of outstanding loans shall not exceed the amounts appropriated by the legislature plus interest accrued and collected less any losses of loan principal or interest.

9-12-306. Audit; report.

(a) The director of the state department of audit or his designee shall annually examine the loan program created under this article and submit his report of examination to the governor, the legislature and the council. This examination shall include a financial and compliance audit of the council's operations, and

such financial audit of borrowers under this article as the examiner deems appropriate. As a condition of any loan under this article, the borrower shall agree to allow the examiner to examine its books and records. The examiner shall treat all proprietary information received in the course of the examination or audit as confidential.

(b) On or before July 15 of each year, the council shall submit a written report to the joint minerals, business and economic development interim committee reviewing rules adopted by the council during the reporting period, presenting a portfolio of loans made under the program and presenting a risk analysis of the portfolio of loans prepared by the state banking commissioner. The report, portfolio of loans and risk analysis required under this subsection shall be public records. The risk analysis prepared by the state banking commissioner shall not be subject to the limitations of W.S. 9-1-512.

9-12-307. Penalty.

Any person who knowingly makes a false statement to the council in connection with an application under this article or article 9 of this chapter is guilty of a felony punishable by imprisonment for not more than two (2) years, a fine of not more than two thousand dollars ($2,000.00), or both.

ARTICLE 4 - FILM AND VIDEO PROMOTION

9-12-401. Repealed By Laws 2003, Ch. 8, 2.

9-12-402. Film industry financial incentive program; creation.

There is created the film industry financial incentive program to encourage the use of this state as a site for filming and providing production services for filmed entertainment. The program shall be administered by the Wyoming tourism board.

9-12-403. Film industry financial incentive program; definitions.

(a) As used in this article:

(i) "Filmed entertainment" means any one (1) motion picture, television production, commercial or music video to be sold or displayed in electronic medium or film motion pictures;

(ii) "Production costs" means the total cost of producing filmed entertainment;

(iii) "Program" means the film industry financial incentive program created under this article;

(iv) "Qualified expenditures" mean expenditures for goods purchased or leased or services purchased, leased or employed from a vendor or supplier who is located and doing business in this state if the expenditure was made in this state and was made for a qualified production. Qualified expenditures for which reimbursement may be made are limited to:

(A) Salaries and employment benefits for services rendered in and to residents of this state;

(B) Rents for real and personal property located in this state used in the production;

(C) Payments for preproduction, production, post-production and digital media effects services provided in this state;

(D) Costs of set construction provided in this state.

(v) "Qualified production" means filmed entertainment totally or partially produced and filmed in this state that would have widespread public appeal and would likely encourage members of the public to visit the state of Wyoming;

(vi) "Board" means the Wyoming tourism board.

9-12-404. Film industry financial incentive program; reimbursement eligibility; submission of required documentation; payment.

(a) The board may contract with the makers of a qualified production to provide a reimbursement of up to fifteen percent (15%) of the production's qualified expenditures if a minimum of two hundred thousand dollars ($200,000.00) in total qualified expenditures are made.

(b) The sum of all contractual obligations under this section shall not exceed the total appropriation available for the program for any fiscal biennium.

(c) A qualified production applying for a payment under this section shall submit documentation for claimed qualified expenditures to the board.

9-12-405. Film industry financial incentive program; contract required; procedure; approval process.

(a) The board may contract with any entity engaged in this state in producing filmed entertainment for reimbursement of qualified expenditures as provided in this article. The board shall be provided information required to determine if the production is a qualified production and to determine the qualified expenditures, production costs and other information necessary for the council to determine both eligibility for and the appropriate level of reimbursement. No reimbursement shall be made unless the board has entered into an agreement which provides for adequate consideration to the state in exchange for the reimbursement provided. No reimbursement of qualified expenditures shall be made by the board until the qualified production is complete and substantially all contractual commitments made to the board have been fulfilled. If a qualified production is not completed according to a reasonable schedule, the contract shall be terminated and funds reallocated to other qualified productions.

(b) The board shall establish a process by which a contract under this article is formulated and executed and reimbursement amounts are determined. The board shall require information including, but not limited to:

(i) Production related employment;

(ii) Proposed total production budgets;

(iii) Planned expenditures in this state which are intended for use exclusively as an integral part of preproduction, production or post-production activities engaged in primarily in this state; and

(iv) A signed affidavit by a person authorized to commit the entity that the information provided to the board has been verified and is correct.

(d) The board shall not contract with any qualified production for reimbursement of qualified expenditures under this article unless the board determines that adequate consideration to the state in exchange for the reimbursement will be provided under the contract. The reimbursement shall not exceed the amount of measurable benefit gained by the state resulting from the qualified production expenditures. The consideration may include but is not limited to:

(i) Providing a storyline that is set in Wyoming;

(ii) Providing additional Wyoming behind the scenes footage;

(iii) Using Wyoming props and product placement; and

(iv) Providing a clear statement in the credits that the product was filmed in Wyoming.

9-12-406. Film industry financial incentive program; rules and regulations; fraudulent claims; reporting.

(a) The board may adopt rules and regulations to implement this article, including, but not limited to, requirements for the contract process, requirements for substantial completion of contractual commitments, records required for submission for substantiation of reimbursement and determination of and qualification for reimbursement.

(b) An entity that obtains payment under this article through a claim that is fraudulent is liable for reimbursement of the amount paid plus an amount double the payment plus reimbursement of reasonable costs. The amounts under this subsection are in addition to any criminal penalty for which the entity is liable for the same acts. The entity shall also be liable for costs and fees incurred by the state in investigating and prosecuting the fraudulent claim.

(c) The board shall report to the joint travel, recreation, wildlife and cultural resources interim committee and the joint appropriations interim committee by October 1 each year, expenditures under this article and the return to the state on funds expended pursuant to this article.

9-12-407. Sunset provision.

W.S. 9-12-402 through 9-12-406 are repealed effective June 30, 2011.

ARTICLE 5 - WYOMING COUNCIL FOR WOMEN'S ISSUES

9-12-501. Creation; areas of attention.

(a) The Wyoming council for women's issues is created within the Wyoming business council. The council for women's issues shall focus attention on the status of women in Wyoming with emphasis on the following areas:

(i) Employment practices;

(ii) Educational opportunities;

(iii) Home and community;

(iv) Legal rights and responsibilities.

(b) As used in this article, unless otherwise specified, "council" means the Wyoming council for women's issues.

9-12-502. Membership; term; appointments; vacancies; removal; officers; acceptance of gifts and donations; expenses.

(a) The council shall be composed of fourteen (14) members, each of whom shall serve for a term of six (6) years. The governor shall make the appointments and fill any vacancies for unexpired terms. The governor may remove any member as provided in W.S. 9-1-202. The council shall be composed of one (1) woman from each of the judicial districts in the state, four (4) persons chosen at large and the chief executive officer of the Wyoming business council or his designee who shall be an ex officio member. Not more than nine (9) members shall be from the same political party. Of the initial members appointed from each of the judicial districts, three (3) members shall be appointed for terms of two (2) years, three (3) members shall be appointed for terms of four (4) years and three (3) members shall be appointed for terms of six (6) years.

(b) The council shall elect a chairman and vice-chairman from its members. The Wyoming business council may employ a secretary on a part-time basis to assist the council. The council may accept gifts and donations.

(c) Members of the council shall receive no compensation but shall be reimbursed under W.S. 9-3-102 and 9-3-103 for per diem and travel expenses incurred in the performance of their duties.

ARTICLE 6 - COMMUNITY INFRASTRUCTURE PROGRAM

9-12-601. Wyoming business ready community program; purpose; creation; rulemaking.

(a) It is the purpose of this article to promote economic development at the city, town and county level in order to create additional economic health and a stronger state economy.

(b) The council shall establish and administer a Wyoming business ready community program as provided by this article. Any city, town or county may submit an application to the council for a grant or loan under the program on forms prescribed by and subject to rules promulgated by the council. Grants or loans

may be applied for by a joint powers board with the approval of all participating agencies to the joint powers agreement. Grants and loans may be made by the council for economic or educational development infrastructure projects, including the purchase of land, buildings, facilities, telecommunications infrastructure, rights of way, airports, sewer and water projects, roads, landscaping, recreational and convention facilities or other infrastructure determined by the council to be consistent with the purposes of this article. In adopting rules and making grants and loans under this article the council shall require all projects to be related to economic or educational development infrastructure, which shall not include rehabilitation or expansion of existing infrastructure unless the council determines the rehabilitation or expansion is necessary to meet the purposes of this article. All grants, loans or cooperative agreements made under this article shall be referred by the council to the state loan and investment board for final approval or disapproval. The state loan and investment board may adopt rules as necessary to implement its duties under this article.

(c) Grants shall be matching grants as determined by the council. Loans shall be made at no or low interest rates.

(d) Grants or loans shall be made under this article, only if the applicant demonstrates that upon receipt of the grant or loan, all projected project costs will be funded. Grants or loans for one (1) project may not exceed a maximum annual amount established by rule of the council. Multi-year projects may be awarded up to the maximum annual amount each year, for a period not to exceed three (3) years, as approved by the state loan and investment board. The application shall identify the source of all funds to be used for the project.

(e) Grants or loans may be used to fund project costs in accordance with approved applications and rules of the council. Grant or loan funds may be used to contract with community development organizations and state development organizations in accordance with the purposes of this article and approved applications.

(f) Loans provided under this article shall be adequately collateralized as determined by the council. No loans shall be made without the written opinion of the attorney general certifying the legality of the transaction and all documents connected therewith. An election approving the project and borrowing for the project by the qualified electors of the borrowing entity shall be required only if the attorney general determines such an election is otherwise required by law.

(g) Repayments of loans under this section shall be credited to the business ready community account.

(h) The council may also enter into cooperative agreements with the Eastern Shoshone Tribe and the Northern Arapaho Tribe in order to promote the purposes of this article.

(j) Grants may be made by the council for projects, in accordance with rules of the council, which:

(i) Improve the development of businesses that will provide data generation and information technology storage capabilities statewide or in municipalities of the state;

(ii) Encourage and provide for the expansion of existing businesses providing information technology storage enterprises in the state, including those developed through the University of Wyoming business technology center;

(iii) Provide a reduction of the costs of electrical power or bandwidth, or both, to businesses meeting the provisions of paragraph (j)(i) or (ii) of this section. In exchange for providing these reductions in costs, the political subdivision receiving the grant and providing the reduction in costs shall contract with the business to receive direct benefits and indirect economic development benefits including:

(A) A specific amount of capital investment by the business;

(B) A specific minimum payroll created by the business;

(C) The provision of information technology storage services to the state or the political subdivision at a price discounted from the fair market value of the services; and

(D) An agreement to repay with a reasonable rate of return any funds received to reduce costs if the business relocates from the political subdivision prior to the expiration of five (5) years from the date of first receiving funds.

(k) As used in this article:

(i) "Community development organization" means as defined by W.S. 9-12-301(a)(ii);

(ii) "State development organization" means as defined by W.S. 9-12-301(a)(iv).

9-12-602. Wyoming business ready community program account.

There is created the business ready community account. Funds shall be credited to the account as provided by law. Funds in the account are continuously appropriated to the council to be used only for cooperative agreements, grants or loans authorized to be made under this article.

9-12-603. Council duties; actions on grant and loan applications.

All complete applications to participate in the grant and loan program established under this article which conform with the criteria established by law and rules promulgated under this article which are submitted to the council shall be considered by the council. The council shall approve or disapprove each application it considers in accordance with this article and rules of the council.

ARTICLE 7 - AIR SERVICES FINANCIAL AID

9-12-701. Amended and Renumbered as W.S. 10-3-601 by Laws 2005, ch. 13, 1.

9-12-702. Amended and Renumbered as W.S. 10-3-602 By Laws 2005, ch. 13, 1.

ARTICLE 8 - WYOMING COMMUNITY FACILITIES PROGRAM

9-12-801. Wyoming community facilities program; purpose; creation; administration by council; rulemaking authority; eligible projects.

(a) It is the purpose of this article to assist communities to preserve former school and government facilities that have existing or future community uses.

(b) The council shall administer a Wyoming community facilities program as provided by this article, subject to the approval of grants and loans by the state loan and investment board as provided by this article.

(c) Any qualifying community with a demonstrated need for a community facility, including a city, town, county, joint powers board or other local governmental entity, may submit an application to the council for a grant or loan under this program on forms prescribed by and subject to rules promulgated by the council. Application by a joint powers board shall require the approval of all participating agencies to the joint powers agreement.

(d) Grants or loans may be recommended by the council and awarded by the state loan and investment board for economic development community facilities projects which provide:

(i) Space for community gatherings and functions;

(ii) Appropriate recreational, swimming and athletic facilities for community members, particularly youth;

(iii) Other functions or uses determined by the council to be consistent with the purposes of this article.

(e) In adopting rules and recommending grants and loans under this article, the council shall require all projects to be related to economic development or enhancement of quality of life in a community. Projects may consist of:

(i) The expansion, renovation or remodeling of existing surplus government facilities;

(ii) The purchase of an interest in or cooperative agreements for the expansion, renovation or conversion of school facilities to the extent the facilities exceed statewide school building and facility adequacy standards established by the school facilities commission under W.S. 21-15-115. No ownership interest to the project or facility under a project shall remain with the school district upon expenditure of any funds under this program for any project.

(f) All grants, loans or cooperative agreements recommended by the council shall be referred by the council to the state loan and investment board for final approval or disapproval in accordance with this article.

9-12-802. Community facility qualifications; demonstration of need.

(a) To qualify for a grant or loan under this article, an applicant shall demonstrate:

(i) A commitment by the applicant community to adequately maintain the project facility for which the grant or loan is requested during a reasonable period of time;

(ii) A partnership or other working arrangement or agreement with other local governmental entities to ensure the viability of the project facility over a reasonable period of time;

(iii) The project facility is not otherwise provided in the community or that such a facility exists except that the financing of that facility has not been paid in full;

(iv) The project will not compete with existing governmental organizations or businesses;

(v) The relationship of the project facility to a community economic development plan or to the enhancement of quality of life in the community;

(vi) That all project costs will be funded at the time of receipt of a grant or loan under this article, with funding sources specified within the project application;

(vii) The availability of funds sufficient to maintain the project facility. The project application shall clearly identify maintenance funding sources sufficient to cover maintenance costs for a period of not less than four (4) years;

(viii) Any other criteria developed by the council consistent with the purposes of this article.

9-12-803. Community facility grant and loan; approval by state loan and investment board.

(a) Grants shall be awarded on a matching basis at match proportions recommended by the council and approved by the board.

(b) Grants or loans may be used to fund project costs in accordance with approved applications and rules and regulations established by the council. Grant or loan funds may be used to contract with community development organizations and state development organizations in accordance with this article and approved project applications. For purposes of this subsection, "community development organizations" shall be as defined under W.S. 9-12-301(a)(ii) and "state development organizations" shall be as defined under W.S. 9-12-301(a)(iv).

(c) Loans provided under this article shall be adequately collateralized as determined by the council. No loans shall be made without the written opinion of the attorney general certifying the legality of the transaction and all documents connected therewith. An election approving the project and borrowing for the project by the qualified electors of the borrowing entity shall be required only if the attorney general determines such an election is otherwise required by law.

(d) Repayments of loans under this article shall be credited to the community facilities program account.

(e) The council shall prioritize proposed cooperative agreements, grants and loans it recommends to the state loan and investment board in accordance with rules it adopts under this article.

(f) The state loan and investment board shall adopt rules as necessary to implement its duties under this article governing the approval or disapproval of projects recommended by the council.

9-12-804. Wyoming community facilities program account.

The community facilities program account is created within the special revenue fund and shall consist of funds credited to the account as provided by law. Funds in the account are continuously appropriated to the council to be used only for cooperative agreements, grants or loans authorized by the state loan and investment board under this article.

9-12-805. Tribal participation in community facilities program.

The council may enter into cooperative agreements with the business council of the Eastern Shoshone Indian Tribe, the business council of the Northern Arapaho Indian Tribe or the joint business council of the Eastern Shoshone and Northern Arapaho Indian Tribes to promote the purposes of the community facilities program and to allow those entities to participate in the program.

ARTICLE 9 - COMMUNITY WORKFORCE HOUSING PROGRAM

9-12-901. Wyoming workforce housing infrastructure program; purpose; definitions.

(a) The legislature finds and declares that:

(i) There is in this state by reason of the location and expansion of mineral extractive industries and other economic developments, a critical shortage of adequate housing;

(ii) It is in the public interest of the citizens of this state to facilitate the provision of adequate housing in order to promote the economic welfare of the state and its residents by increasing employment, stimulating economic activity, augmenting sources of tax revenue, fostering economic stability, furthering health care and improving the balance of the state's economy;

(iii) It is the purpose of this article to promote and continue economic development by providing adequate housing necessary to create additional economic health and a stronger state economy;

(iv) This article constitutes a valid public purpose, of primary benefit to all citizens of the state of Wyoming.

(b) As used in this article:

(i) "Community development organization" means as defined by W.S. 9-12-301(a)(ii);

(ii) "Community land trust" means land held in trust as a public investment for the long-term benefit of a community to provide secure, affordable access to land and workforce housing for community residents;

(iii) "State development organization" means as defined by W.S. 9-12-301(a)(iv);

(iv) "Workforce housing" means owner-occupied, residential dwellings;

(v) "Workforce housing infrastructure" means publicly owned infrastructure to a workforce housing subdivision or development, and if determined by the council to be consistent with the purposes of this article, through a workforce housing subdivision or development. To be considered "workforce housing infrastructure" under this article, the infrastructure shall be for a workforce housing subdivision or development for which the political subdivision making application under this article has required, through zoning or otherwise, the inclusion of a specified percentage or number of housing units at specified maximum initial sale prices or to have a specified initially finished, maximum square footage. In addition, the following shall apply:

(A) "Workforce housing infrastructure" includes:

(I) Rights of way;

(II) Sewer and water distribution projects;

(III) Storm water control and drainage facilities;

(IV) Streets, roads and bridges;

(V) Curbs, gutters and sidewalks;

(VI) Lift stations;

(VII) Traffic signals;

(VIII) Street lighting;

(IX) Payment for the additional costs of over-sizing water and sewer distribution lines through or to a subdivision to accommodate future expansion;

(X) The purchase of land as necessary to accommodate infrastructure projects;

(XI) Other infrastructure determined by the council to be consistent with the purposes of this article.

(B) "Workforce housing infrastructure" shall not include:

(I) Projects, the primary purpose of which is to bring public infrastructure to existing housing which is supplied by a well or uses a septic system. Nothing in this subdivision prohibits the use of funding under this article to provide such infrastructure as incidental to an approved project;

(II) Refinancing of existing projects that have been financed previously with other resources;

(III) Financing any project under the Wyoming water development program established by W.S. 41-2-112 through 41-2-124;

(IV) Financing any project that does not provide for the construction of additional housing units or that involves rehabilitation or expansion of existing infrastructure unless the council determines the rehabilitation or expansion is necessary to meet the purposes of this article;

(V) Financing any infrastructure project which is not under public ownership.

9-12-902. Wyoming workforce housing infrastructure program; creation; rulemaking.

(a) The council shall establish and administer a Wyoming workforce housing infrastructure program as provided by this article. Any city, town, county or special improvement district may submit an application to the council for a loan under the program on forms prescribed by and subject to rules promulgated by the council. Loans may be applied for by a joint powers board with the approval of all participating agencies to the joint powers agreement. Loans may be made by the council for workforce housing infrastructure projects and community land trust projects. In adopting rules and making loans under this article the council shall require all projects to be related to workforce housing infrastructure or community land trusts.

(b) Loans may be made at zero interest rate, up to an annual interest rate equal to the average prime interest rate as determined in accordance with subsection (e) of this section. The council shall establish criteria for determining the maximum loan amounts subject to final approval by the state loan and investment board.

(c) Loans shall be made under this article, only if the applicant demonstrates that upon receipt of the loan, all projected project costs will be funded. Loans for one (1) project may not exceed a maximum annual amount established by rule of the council. Multi-year projects may be awarded up to the maximum annual amount each year, for a period not to exceed three (3) years, as approved by the state loan and investment board. The application shall identify the source of all funds to be used for the project.

(d) Loans may be used to fund project costs in accordance with approved applications and rules of the council. Loan funds may be used to contract with community development organizations, state development organizations and nonprofit organizations in accordance with the purposes of this article and approved applications.

(e) Loans provided under this article shall be adequately collateralized as determined by the council. The council shall establish interest rates to be charged for loans under the program, but the interest rate shall not exceed an annual interest rate equal to the average prime interest rate as determined by the state treasurer. To determine the average prime interest rate, the state treasurer shall average the prime interest rate for at least seventy-five percent (75%) of the thirty (30) largest banks in the United States. The interest rate shall be adjusted on January 1 of each year. Interest rates shall be established in recognition of the repayment abilities and needs of the local governmental entity eligible for loans under the program. The council shall establish loan amortization schedules, terms and conditions for each loan approved.

(f) No loans shall be made without the written opinion of the attorney general certifying the legality of the transaction and all documents connected therewith. An election approving the project and borrowing for the project by the qualified electors of the borrowing entity shall be required only if the attorney general determines such an election is otherwise required by law.

(g) Loans and loan commitments or any combination thereof shall be made under this article only:

(i) If there are sufficient funds in the workforce housing infrastructure program account to fully fund it and all other outstanding commitments and loans;

(ii) If repayment of any loan provided by the state is adequately collateralized. The adequacy of the collateral shall be determined by the council, subject to final approval by the state loan and investment board.

(h) Repayments of loans under this section shall be credited to the Wyoming workforce housing infrastructure program account.

(j) The council may also enter into cooperative agreements with the Eastern Shoshone Tribe and the Northern Arapaho Tribe in order to promote the purposes of this article.

(k) After approval of loans, the applicants shall report to the council, as required by the approved application. The report shall include:

(i) The progress of the project until the project is completed;

(ii) Any additional information required by the council to ensure compliance with loan requirements or compliance with this article.

9-12-903. Council duties; actions on loan applications.

(a) All complete applications to participate in the program established under this article, which conform with the criteria established by law and rules promulgated under this article and which are submitted to the council, shall be considered by the council. The council shall approve or disapprove each application considered in accordance with this article and rules promulgated by the council. All loans or cooperative agreements made under this article shall be referred by the council to the state loan and investment board for final approval or disapproval. The state loan and investment board may adopt rules as necessary to implement its duties under this article.

(b) In adopting rules and making funds available under this article, the council shall provide a competitive application and scoring system adequate to measure the benefits of each application. The application scoring system shall target the projects based on ranking criteria which address:

(i) The need for the proposed housing;

(ii) The affordability of the proposed housing;

(iii) The number of additional housing units to be developed, with consideration of the percentage of critical workforce housing needs in the community to be served;

(iv) The extent to which the project is part of an overall community and economic development plan;

(v) The extent to which the project demonstrates readiness;

(vi) Any other criteria determined by the council to be consistent with the purposes of this article.

(c) The council may negotiate and enter into appropriate contracts or memoranda of understanding with Wyoming state agencies, authorities or instrumentalities as necessary or convenient to facilitate the council's duties under this article.

9-12-904. Community land trusts; eligibility; requirements.

(a) Loans made under this article for community land trusts, in addition to meeting other requirements of this article, shall require that:

(i) The land subject of the trust be owned or leased by a political subdivision of the state, including a city, town, county, special improvement district or a housing authority authorized under W.S. 15-10-116;

(ii) The land be used for workforce housing with lots for housing leased and with the political subdivision remaining the owner of the land or the primary lessee;

(iii) The leases of lots be upon such terms as to allow commercial lenders to lend funds for housing construction on terms comparable to housing built on fee owned lands;

(iv) The housing development on lands subject to the trust include a specified percentage or number of housing units at specified maximum initial sale prices or be required to have a specified initially finished, maximum square footage as required by the political subdivision making application under this article, through zoning or otherwise;

(v) The lease terms for housing constructed on the land subject to the trust provide for continuation of the initial long term community benefit through subsequent sales of the housing.

(b) The political subdivision owning or leasing the land subject to the community land trust may fulfill the requirements of this section directly, through a housing authority created pursuant to W.S. 15-10-116, or by agreement with private nonprofit entities.

9-12-905. Wyoming workforce housing infrastructure program account.

(a) There is created the workforce housing infrastructure program account. Funds shall be credited to the account as provided by law. Funds in the account shall be used only upon legislative appropriation for cooperative agreements and loans authorized to be made under this article. All funds including any

earned interest and repayments of principal on loans under this article remaining in the workforce housing infrastructure program account at the end of a biennium shall not lapse and shall not revert as provided in W.S. 9-4-207 but shall remain in the account to implement the purposes of this section.

(b) Interest and repayments of principal on loans under this article shall be redeposited into the workforce housing infrastructure program account.

(c) Accrued interest and other earnings on unexpended funds within the account shall be credited to the workforce housing infrastructure program account.

ARTICLE 10 - WYOMING TOURISM BOARD

9-12-1001. Wyoming tourism board; creation; composition; appointment; terms; compensation.

(a) There is created the Wyoming tourism board. The board shall serve as the leading proponent of Wyoming's tourism and hospitality industry and shall provide governance and oversight for the division of travel and tourism.

(b) The board shall be comprised of nine (9) members who shall be employed in or associated closely with the travel industry. The board shall be appointed by the governor, and approved with the advice and consent of the senate, in accordance with W.S. 28-12-101 through 28-12-103, as follows:

(i) One (1) member shall be from tourism appointment district 1, consisting of Albany, Carbon and Laramie counties;

(ii) One (1) member shall be from tourism appointment district 2, consisting of Converse, Goshen, Natrona, Niobrara and Platte counties;

(iii) One (1) member shall be from tourism appointment district 3, consisting of Campbell, Crook, Johnson, Sheridan and Weston counties;

(iv) One (1) member shall be from tourism appointment district 4, consisting of Lincoln, Sweetwater and Uinta counties;

(v) One (1) member shall be from tourism appointment district 5, consisting of Big Horn, Hot Springs, Park and Washakie counties;

(vi) One (1) member shall be from tourism appointment district 6, consisting of Fremont, Sublette and Teton counties;

(vii) Three (3) members shall be at-large members appointed to provide geographic and tourism industry balance.

(c) Each appointed member shall serve for three (3) years, except that the initial appointments of the members shall be:

(i) One (1) year for one (1) of the at-large members and the members appointed from tourism appointment district 2 and tourism appointment district 5;

(ii) Two (2) years for one (1) of the at-large members and the members appointed from tourism appointment district 1 and tourism appointment district 3; and

(iii) Three (3) years for one (1) of the at-large members and the members appointed from tourism appointment district 4 and tourism appointment district 6.

(d) No appointed member shall serve more than two (2) consecutive three (3) year terms.

(e) The board shall select a chairman and a vice-chairman from among its members.

(f) The governor may remove any member as provided by W.S. 9-1-202.

(g) Members of the board shall receive mileage and per diem for attending board meetings or other meetings as assigned by the board, in the same amount as state legislators and shall receive no other compensation for serving on the board.

(h) For purposes of this article, "board" means the Wyoming tourism board.

9-12-1002. General powers and duties of the board; rulemaking authority.

(a) The board shall be responsible for implementing the tourism program and functions assigned to the Wyoming business council under the Wyoming Economic Development Act, including the expenditure of all funds appropriated for the tourism program and shall:

(i) Assemble and distribute information concerning the scenic and recreational opportunities and resources of Wyoming;

(ii) Encourage close cooperation between public and private agencies engaged in stimulating recognition of Wyoming recreational resources;

(iii) Implement programs to promote tourism in Wyoming; and

(iv) Administer the film industry financial incentive program as provided in W.S. 9-12-402 through 9-12-406.

(b) The board shall assign a member to attend all regularly scheduled meetings of the Wyoming business council.

(c) The board shall promulgate rules and regulations necessary to implement this article.

ARTICLE 11 - MAINSTREET PROGRAM

9-12-1101. Definitions.

(a) As used in this article:

(i) "Board" means the Wyoming main street advisory board;

(ii) "Business area" means a commercial area existing at the time services under the Wyoming main street program are requested by a municipality;

(iii) "Municipality" means a city, town, county or district;

(iv) "Revitalization" means the process of engaging in activities to increase economic activity while preserving and building upon a location's historically significant characteristics.

9-12-1102. Wyoming main street advisory board.

(a) There is created a Wyoming main street advisory board. The board shall consist of seven (7) members appointed by the governor, not more than four (4) of whom shall be from the same political party. Board members shall elect from their membership a chairman, vice-chairman and secretary.

(b) The governor may remove any member of the board as provided by W.S. 9-1-202.

(c) Board members shall serve a three (3) year term provided that of the initial board, two (2) members shall be appointed for a one (1) year term, two (2) members for two (2) year terms and three (3) members for three (3) year terms. Vacancies on the board shall be filled by appointment of the governor for the unexpired term.

(d) Members of the board shall receive the same per diem, expenses and travel allowance as members of the legislature while in actual attendance at meetings of the board and the performance of their duties relative thereto.

(e) The department shall provide staff services as required by the board to carry out the board's duties.

(f) The board shall meet as often as necessary to conduct business, but not less than three (3) times each year. Meetings shall be called by the chairman. A majority of members of the board shall constitute a quorum.

9-12-1103. Duties of the board.

(a) The board shall:

(i) Assist the council in developing a plan to operate the Wyoming main street program;

(ii) Annually review the program and report findings and recommendations, including recommendations for future legislation, to the governor;

(iii) Provide a comprehensive evaluation of the Wyoming main street program annually to the joint minerals, business and economic development interim committee no later than September 1 of

each year. The report shall include findings and recommendations, including recommendations for future legislation.

9-12-1104. Duties of the council.

(a) The council shall establish and administer a Wyoming main street program to coordinate state and local participation in programs offered by the national main street center, created by the national trust for historic preservation, to assist municipalities in planning, managing and implementing programs for the revitalization of business areas.

(b) In carrying out subsection (a) of this section, the council shall:

(i) Enter into contracts to obtain business area revitalization services;

(ii) Subject to legislative authorization, employ any staff necessary to operate the Wyoming main street program;

(iii) With advice from the board, develop a plan describing the objectives of the Wyoming main street program and methods by which the council shall:

(A) Coordinate the activities of that program with private and public sector revitalizations of business areas;

(B) Solicit and use private sector funding for revitalization of business areas;

(C) Assist municipalities engaged in the revitalization of their business areas.

(iv) Coordinate with other state and local public and private entities that provide services to municipalities undertaking projects for the revitalization of business areas;

(v) Provide training, technical assistance and information on the revitalization of business areas to municipalities which do not participate in the Wyoming main street program;

(vi) Repealed By Laws 2009, Ch. 8, 2.

(c) The council shall promulgate rules necessary to carry out the provisions of this article.

9-12-1105. Main street program.

(a) The council with advice from the board shall determine the number of municipalities to participate in the Wyoming main street program. The council shall select program participants that represent different geographical regions or populations. The council shall hold at least one (1) public hearing before making selections under this subsection.

(b) In making its selection pursuant to subsection (a) of this section, the council, with the assistance of the board, shall develop criteria for use in selecting program participants which relate to at least the following issues:

(i) Private and public sector interest in and commitment to revitalization of a business area selected by the municipality;

(ii) Potential private sector investment in a business area selected by the municipality;

(iii) Local organizational and financial commitment to employ a program manager for not less than three (3) years;

(iv) Local assistance in paying for the services of a design consultant recommended by the advisory board;

(v) Local commitment to assist in training programs to direct activities related to business areas in municipalities that do not participate in the Wyoming main street program.

ARTICLE 12 - WYOMING ENERGY PERFORMANCE PROGRAM

9-12-1201. Definitions.

(a) As used in this article:

(i) "Agency" means a branch, agency, department, board, instrumentality or institution of the state of Wyoming, a county, a municipal corporation, a school district, a community college district, the University of Wyoming, the joint business council of the Eastern Shoshone and Northern Arapaho Indian tribes, the business council of the Eastern Shoshone Indian tribe, the business council of the Northern Arapaho Indian tribe, a joint powers board formed pursuant to this act or a special district specifically involved in providing facilities or functions enumerated in W.S. 16-1-104(c);

(ii) "Energy conservation measure" means an energy study, audit, improvement or equipment that is designed to provide energy, water and operational cost savings at least equivalent to the amount expended by a facility owner for such energy study, audit, improvement or equipment over a period of not more than twenty (20) years after the date such improvement or equipment is installed or becomes operational;

(iii) "Energy performance contract" means the contract that allows a facility owner to accomplish energy or water efficiency projects without upfront capital costs or capital appropriations. An energy performance contract shall not be considered to be a contract for public improvement pursuant to W.S. 15-1-113;

(iv) "Energy services company" means the contractor not organized under the auspices of a utility regulated by the public service commission with demonstrated technical, operational, financial and managerial capabilities to design and implement energy conservation measures and the ability to secure necessary financial measures to ensure related guarantees for operational cost savings and who is responsible for the audit, design, implementation, measurement, verification and guarantee of savings for individual projects;

(v) "Facility owner" means an agency or group of agencies, a public hospital or other public entity responsible for an individual facility or group of facilities;

(vi) "Investment grade energy audit" means the detailed engineering investigation and report of a facility's current energy and water consuming equipment inventory, condition, operation, maintenance and performance, energy baseline, potential energy and water efficiency upgrades, life cycle costs and risks for future performance that provides the justification for the energy performance contract project;

(vii) "Wyoming energy conservation improvement program" means the Wyoming business council state energy office program designed to enable and support development and implementation of energy performance contract projects.

9-12-1202. Energy performance contracting.

The council shall establish a Wyoming energy conservation improvement program which provides support development and implementation of energy performance contract projects to facility owners voluntarily participating in the program. In order to participate in the program, facility owners and energy services companies shall be subject to the provisions of this article and rules adopted pursuant to this article.

9-12-1203. Energy performance contracting.

(a) Upon receipt of a request from a facility owner, the Wyoming business council shall provide the facility owner with a list of energy service companies interested in providing services to the facility owner and qualified by the Wyoming business council to participate in the Wyoming energy conservation improvement program.

(b) The energy services company participating in the Wyoming energy conservation improvement program shall provide an investment grade audit showing the estimated energy and operational cost savings that would result from the proposed energy conservation measures. Before executing any contract or lease purchase agreement under subsection (c) of this section, the energy services company shall provide the facility owner with plans for the proposed energy conservation measures prepared by an engineer licensed to practice in Wyoming.

(c) Notwithstanding W.S. 15-1-113 and subject to the provisions of subsection (e) of this section, a facility owner may enter into an installment payment contract or lease purchase agreement for an energy or water conservation measure which meets the criteria of this section. Any documents related to negotiations entered into pursuant to this section with individual energy services companies by an agency or facility owner shall be considered trade secrets pursuant to the provisions of the Wyoming Public Records Act, W.S. 16-4-201 through 16-4-205. After a contract has been executed by an agency, the contract and all proposals from energy service companies shall be open records available for public inspection in accordance with the Wyoming Public Records Act.

(d) Energy performance contracts entered into pursuant to the Wyoming energy conservation improvement program shall require the energy services company to provide to the facility owner an annual reconciliation of the guaranteed energy savings. If the reconciliation reveals a shortfall in annual energy savings, the energy services company shall be liable for compensation to the facility owner for such

shortfall under the provisions of the energy performance contract. If the reconciliation reveals an excess in annual energy savings, the excess savings shall be retained by the facility owner and shall not be used to cover potential energy savings shortages in subsequent contract years.

(e) An energy performance contract entered into pursuant to the Wyoming energy conservation improvement program may provide for financing, including tax exempt financing, by a third party. The contract for third party financing may be separate from the energy performance contract. A separate contract for third party financing shall include a provision that the third party financier shall not be granted rights or privileges that exceed the rights and privileges available to the energy services company.

(f) The Wyoming business council may provide support under the Wyoming energy conservation improvement program as requested by facility owners for purposes of this section. The Wyoming business council state energy office may fix, charge and collect reasonable fees for any administrative support and resources or other services provided by the Wyoming business council pursuant to this subsection.

(g) If the facility owner fails to appropriate or receive an appropriation of money for a periodic payment due for improvements made through an energy performance contract, any security interest in any property created pursuant to the energy performance contract, may be enforced by the holder of such a security interest against the property.

(h) The term of an energy performance contract shall not exceed twenty (20) years after the date on which the work required by the energy performance contract to implement all energy conservation measures is completed.

(j) The Wyoming business council shall submit to the joint minerals, business and economic development interim committee by October 1, an annual report on the energy performance contracting performed under the Wyoming energy conservation improvement program. The report shall include the number of applications submitted, the number of facility owners, the number of energy performance contracts, the results of the investment grade energy audits and the results of the energy performance contracts.

Office of the Governor
State of Oregon

EXECUTIVE ORDER NO. 08-11

RESTRUCTURING OREGON ECONOMIC AND COMMUNITY DEVELOPMENT DEPARTMENT

The continued vitality of Oregon's complex economic landscape requires thriving communities, a strong and well-educated workforce, a healthy environment and the establishment of diversified, progressive industries. Oregon must manage its assets and position itself today for continued economic success into the 21st Century.

Oregon faces the unprecedented challenges of population growth, aging community infrastructure and pressing climate change concerns. While there are opportunities in the global marketplace for Oregon companies, there is also intense competition from other states and nations. By aggressively taking advantage of economic development opportunities, particularly those presented by promoting industries fighting global warming with innovation and new technologies, Oregon can stimulate new businesses and jobs.

The Oregon Economic and Community Development Department (OECDD) is the state agency primarily responsible for job creation in Oregon. The OECDD's broad scope of work has created disparate expectations of OECDD's mission. Two of OECDD's three program divisions are focused on job retention, creation and recruitment. The primary focus of OECDD's third division, the Community Development Division, is to help Oregon communities meet their infrastructure goals, particularly in the areas of safe drinking water and water and wastewater systems. The absence of a clear and focused agency-wide mission has hindered OECDD's ability to successfully partner with stakeholder groups around the state to promote economic development.

OECDD's realignment will provide an essential, strategic framework to address the challenges facing Oregon and position the state for long-term success into the 21st Century and provide clarity, accountability and viability for the department's distinct missions. To this end, OECDD's community and business development functions will be separated.

OECDD's business development divisions should form a stand-alone department with the mission of serving as a catalyst of sustainable economic growth. This department will focus on the retention and expansion of Oregon companies, leveraging Oregon's innovation and strategic partnerships in the global economy, recruitment of new businesses to the state, creation of jobs by transferring innovative knowledge into the marketplace and raising real wages.

OECDD's community development programs are best served in an agency with a complementary structure and focus as the division's core functions. Community-based resources will be realigned to ensure the most efficient and effective delivery of services. At the same time, infrastructure-based activities will be focused to ensure a sustainable relationship between the natural and built environments, with an asset management model serving as its structural framework.

NOW THEREFORE, IT IS HEREBY DIRECTED AND ORDERED:

1. OECDD's Community Development Division shall be considered separate and distinct from all other activities and functions of OECDD's Business and Trade Development Division and Innovation and Economic Strategies Division within OECDD.

2. The OECDD Director shall work with the OECD Commission to ensure that Community Development policies and programs be pursued, and oversight administered, in a manner that is separate and distinct from the oversight and administration of all other Business Development programs, activities and functions within OECDD.

3. The OECDD Director shall work with the OECD Commission to establish a framework that enables Community Development to more effectively focus its activities on infrastructure-related projects and other community-based resource programs.

4. The OECDD Director shall work with the OECD Commission to ensure that staff from the Central Operations Division is assigned appropriately to provide direct support separately for Community Development activities and functions and for Business Development activities and functions.

5. The OECDD Director shall seek and consider input from stakeholders and legislators throughout the state, particularly regarding policy and structural details to ensure the effective design and implementation of a strategic redesign of the department.

6. OECDD and other appropriate state agencies shall identify areas of overlapping authority and coordinate activities and resources to facilitate the structural reorganization.

EXECUTIVE ORDER NO. 08-11
PAGE THREE

7. OECDD and other appropriate state agencies shall begin necessary planning to implement a proposed reorganization if legislation to restructure the agency is adopted by the Legislative Assembly.

Done at Salem, Oregon, this 12th day of May, 2008.

Theodore R. Kulongoski
GOVERNOR

ATTEST:

Bill Bradbury
SECRETARY OF STATE

Enrolled
House Bill 2152

Ordered printed by the Speaker pursuant to House Rule 12.00A (5). Presession filed (at the request of Governor Theodore R. Kulongoski for Economic and Community Development Department)

CHAPTER .....

AN ACT

Relating to economic development; creating new provisions; amending ORS 183.635, 200.025, 200.045, 200.055, 200.057, 200.065, 200.110, 200.120, 200.170, 285A.010, 285A.020, 285A.040, 285A.045, 285A.050, 285A.055, 285A.060, 285A.070, 285A.075, 285A.080, 285A.116, 285A.152, 285A.185, 285A.188, 285A.190, 285A.192, 285A.200, 285A.206, 285A.213, 285A.224, 285A.227, 285A.306, 285A.346, 285A.349, 285A.600, 285A.615, 285A.627, 285A.654, 285A.657, 285A.660, 285A.669, 285A.672, 285A.678, 285A.681, 285A.684, 285A.687, 285A.690, 285A.693, 285A.696, 285A.702, 285A.705, 285A.708, 285B.050, 285B.053, 285B.056, 285B.059, 285B.062, 285B.065, 285B.068, 285B.080, 285B.081, 285B.086, 285B.089, 285B.092, 285B.093, 285B.126, 285B.132, 285B.135, 285B.138, 285B.141, 285B.147, 285B.168, 285B.178, 285B.179, 285B.200, 285B.206, 285B.209, 285B.215, 285B.218, 285B.230, 285B.233, 285B.236, 285B.260, 285B.266, 285B.283, 285B.286, 285B.290, 285B.323, 285B.326, 285B.329, 285B.335, 285B.338, 285B.341, 285B.344, 285B.362, 285B.371, 285B.410, 285B.413, 285B.419, 285B.422, 285B.428, 285B.437, 285B.440, 285B.449, 285B.455, 285B.460, 285B.462, 285B.465, 285B.467, 285B.470, 285B.473, 285B.482, 285B.503, 285B.506, 285B.512, 285B.515, 285B.533, 285B.551, 285B.560, 285B.563, 285B.572, 285B.575, 285B.581, 285B.584, 285B.590, 285B.593, 285B.599, 285B.740, 285B.743, 285B.746, 285B.749, 285B.758, 285C.612, 468B.415, 657.665, 777.267, 777.277, 777.282, 777.284 and section 32, chapter 773, Oregon Laws 2003, sections 2, 3 and 4, chapter 756, Oregon Laws 2005, and sections 7 and 9, chapter 746, Oregon Laws 2007; repealing ORS 285A.483, 285A.486, 285A.489, 285A.495, 285B.239, 285B.242, 285B.245, 285B.248, 285B.263, 285B.264 and 285B.269; appropriating money; and declaring an emergency.

Be It Enacted by the People of the State of Oregon:

OREGON INFRASTRUCTURE FINANCE AUTHORITY CREATION AND ADMINISTRATIVE PROVISIONS

SECTION 1. Sections 1a to 7 of this 2009 Act are added to and made a part of ORS chapter 285A.

SECTION 1a. (1) The Oregon Infrastructure Finance Authority Board is created as a policy-making and advisory body within the Oregon Business Development Department. The board consists of nine members as follows:

(a) One nonvoting member appointed from members of the Senate by the President of the Senate;

(b) One nonvoting member appointed from members of the House of Representatives by the Speaker of the House of Representatives;

(c) One member appointed by the State Treasurer; and

(d) Six members appointed by the Governor.

(2) Persons appointed members of the board must be Oregon residents, well qualified by experience to make policy and recommendations in areas of concern to the Oregon Infrastructure Finance Authority and to perform the duties of office. Members shall be appointed with consideration given to knowledge and experience:

(a) In the field of state and municipal finance;

(b) Of the infrastructure and public works needs in Oregon cities;

(c) Of the infrastructure and public works needs in Oregon counties;

(d) Of issues related to ports that affect the state;

(e) Of issues related to special service district services furnished across the state; and

(f) Of infrastructure and public works necessary to further Oregon's long term economic growth.

(3) The office of the State Treasurer may recommend persons with expertise in the field of state and municipal finance for membership on the board.

(4) The term of a member of the board appointed by the Governor, the State Treasurer or the President of the Senate is four years. The term of a member appointed by the Speaker of the House of Representatives is two years.

(5) In case of a vacancy on the board for any cause, the appointing authority shall appoint a successor to serve for the unexpired term.

(6) A member of the board may be appointed to serve two consecutive terms. A member who serves two consecutive terms is not eligible for reappointment within one year following the expiration of the second term.

(7) The board shall select one of its members to chair the board for such term and with duties and powers necessary to perform the functions of the office as the board determines.

(8) A majority of the voting members of the board constitutes a quorum for the transaction of business.

SECTION 2. The Oregon Infrastructure Finance Authority Board shall:

(1) Serve as a body to advise municipalities, state agencies and private persons on the development and implementation of state policies and programs relating to the infrastructure needs of this state and its communities.

(2) Advise the Governor, the Director of the Oregon Business Development Department and the Oregon Business Development Department on all matters relating to infrastructure and public works programs and activities administered by the Oregon Infrastructure Finance Authority.

(3) Develop a recommended biennial budget for the operation of the authority and submit the budget to the director and the Governor.

(4) Seek and receive the views of all levels of government and the private sector with respect to state policies and programs to address the infrastructure needs of this state.

(5) Prepare and submit to the Director of the Oregon Business Development Department suggested administrative rules that the board determines are necessary for the operation of the programs under the direction of the authority.

(6) Establish policies and procedures for loan and grant programs administered by the authority.

SECTION 3. (1) The Oregon Infrastructure Finance Authority is established as an administrative section within the Oregon Business Development Department, subject to the supervision of the administrator of the authority. The authority consists of the administrator and all personnel employed by the authority.

(2) The authority shall develop and administer programs and funds of the department that address the infrastructure needs of this state pursuant to the policies of, and as may be recommended by, the Oregon Infrastructure Finance Authority Board.

(3) The authority shall provide the Oregon Infrastructure Finance Authority Board with staff and other assistance as necessary for the board to perform its duties.

(4) The authority shall employ, in accordance with the State Personnel Relations Law, the staff necessary to allow the authority to carry out its responsibilities.

SECTION 3a. (1) The Oregon Infrastructure Finance Authority may:

(a) Conduct hearings and conferences to develop facts, explain programs and activities, and obtain advice;

(b) Enter into agreements with other public bodies, as defined in ORS 174.109, or associations or private persons for services to assist the authority and the Oregon Infrastructure Finance Authority Board;

(c) Enter into agreements with other public bodies, as defined in ORS 174.109, the federal government, associations or private persons for cooperative endeavors that further programs administered by the authority;

(d) Subject to applicable policies and procedures, enter into agreements for loans, grants or other assistance, including, but not limited to, direct purchase of goods or services, with local governments, as defined in ORS 174.116, special government bodies, as defined in ORS 174.117, or other eligible applicants for infrastructure development;

(e) Appoint committees, consultants or other persons with expertise in infrastructure-related matters to advise the Oregon Infrastructure Finance Authority Board or the authority;

(f) Obtain assistance or data from any state agency; or

(g) Perform any other act necessary to carry out the duties of the authority.

(2) The authority shall administer the state's participation in the federal Community Development Block Grant funding program authorized by 42 U.S.C. 5301 et seq.

SECTION 4. (1) The Director of the Oregon Business Development Department, upon consultation with and the approval of the Oregon Infrastructure Finance Authority Board, shall appoint an administrator of the Oregon Infrastructure Finance Authority who shall serve at the pleasure of the director.

(2) The administrator shall receive such salary as may be provided by law or as fixed by the director.

(3) The administrator shall be the administrative head of the authority.

(4) The administrator may suggest rules to the director for the government of the authority, the conduct of its employees, the assignment and performance of its business and the custody, use and preservation of its records, papers and property.

(5) The administrator shall hire the staff necessary to allow the authority to carry out its duties. In accordance with the State Personnel Relations Law, the administrator and any manager hired by the administrator shall be in the unclassified service.

SECTION 5. (1) The Oregon Infrastructure Finance Fund is established in the State Treasury, separate and distinct from the General Fund. Interest earned by the Oregon Infrastructure Finance Fund shall be credited to the fund. The Oregon Infrastructure Finance Fund consists of all moneys credited to the fund, including moneys from the Administrative Services Economic Development Fund, federal funds collected or received and fees, moneys or other revenues, including miscellaneous receipts, collected or received by the Oregon Infrastructure Finance Authority. The moneys in the Oregon Infrastructure Finance Fund are continuously appropriated to the Oregon Business Development Department for the authority for the purposes of sections 1a to 7 of this 2009 Act.

(2) The authority may finance programs and projects determined to further infrastructure development within this state by making grants or loans using moneys in the fund.

(3) The Oregon Infrastructure Finance Authority Board may suggest to the Director of the Oregon Business Development Department administrative rules for establishing standards, objectives and criteria for use of moneys in the fund. The department shall adopt rules to establish standards, objectives and criteria for use of moneys in the fund.

SECTION 6. The Oregon Infrastructure Finance Authority may not direct, supervise or control the policy, programs, personnel or administration of any program or entity unless specifically authorized by statute.

SECTION 7. The Director of the Oregon Business Development Department, in accordance with ORS chapter 183, may adopt rules for the operation of the Oregon Infrastructure Finance Authority as the director determines necessary or convenient for the authority to perform its duties and functions and as are consistent with and necessary to carry out the policies established by the Oregon Infrastructure Finance Authority Board.

OREGON BUSINESS DEVELOPMENT COMMISSION ADMINISTRATIVE PROVISIONS

SECTION 8. ORS 285A.010 is amended to read:

285A.010. As used in ORS 284.101 to 284.146 and ORS chapters 285A, 285B and 285C, unless the context requires otherwise:

(1) "Administrator" means the administrator of the Oregon Infrastructure Finance Authority.

(2) "Association" means a nonprofit, private, incorporated or unincorporated institution, foundation, organization, entity or group, whether local, state, regional or national, that is operating or doing business in Oregon.

(3) "Authority" means the Oregon Infrastructure Finance Authority.

(4) "Board" means the Oregon Infrastructure Finance Authority Board.

[*(1)*] **(5)** "Commission" means the [*Oregon Economic and Community Development Commission*] **Oregon Business Development Commission**.

[*(2)*] **(6)** "Community" means an area or locality in which the body of inhabitants has common economic or employment interests. The term is not limited to a city, county or other political subdivision and need not, but may be, limited by political boundaries.

[*(3)*] **(7)** "Department" means the [*Economic and Community Development Department*] **Oregon Business Development Department**.

[*(4)*] **(8)** "Director" means the Director of the [*Economic and Community Development Department*] **Oregon Business Development Department**.

[*(5)*] **(9)** "Distressed area" means a county, city, community or other geographic area that is designated as a distressed area by the department, based on indicators of economic distress or dislocation, including but not limited to unemployment, poverty and job loss.

[*(6)*] **(10)** "International trade" means the export and import of products and services and the movement of capital for the purpose of investment.

(11) "Local government" has the meaning given that term in ORS 174.116.

(12) "Municipality" means an Oregon city or county, the Port of Portland created by ORS 778.010, a county service district organized under ORS chapter 451, a district as defined in ORS 198.010, a tribal council of a federally recognized Indian tribe in this state or an airport district organized under ORS chapter 838.

(13) "Public body" has the meaning given that term in ORS 174.109.

[*(7)*] **(14)** "Rural area" means an area located entirely outside of the acknowledged Portland Metropolitan Area Regional Urban Growth Boundary and the acknowledged urban growth boundaries of cities with populations of 30,000 or more.

[*(8) "Traded sector" means industries in which member firms sell their goods or services into markets for which national or international competition exists.*]

[*(9)*] **(15)** "Small business" means a business having 100 or fewer employees.

(16) "State agency" includes state officers, departments, boards and commissions.

(17) "Traded sector" means industries in which member firms sell their goods or services into markets for which national or international competition exists.

SECTION 9. ORS 285A.020 is amended to read:

285A.020. (1) The Legislative Assembly finds that:

(a) Oregon possesses [*many*] unique and sustaining virtues that will guide and assist in maintaining the state's economic health, including but not limited to Oregon's:

(A) Special heritage;

(B) Respect for and cultivation of the environment; and

(C) Attention to quality of life issues that are important to the state's economic development, including but not limited to access to quality, affordable child care for all children in Oregon.

(b) Oregon is strategically placed to compete and succeed in the global [*community.*] **marketplace.**

(c) All regions of the state should share in Oregon's economic recovery.

(d) Creating and retaining quality jobs [*is*] **are** vital to the state's [*continued economic development.*] **economic health.**

(e) Oregon's agriculture and natural resource industries provide opportunities for beneficial economic enterprise, including sustainable [*economic*] **business** development activities.

(f) A well educated and trained workforce is necessary to [*advance in today's global economy.*] **support business and industry needs throughout the state.**

(g) The ability of existing businesses to grow [*and prosper*] is critical to Oregon's [*economy.*] **prosperity.**

(h) [*Utilizing the state's*] **The state must utilize its** competitive advantages [*is essential*] to retain existing businesses and attract new companies and investment into the state.

(i) Continued [*economic*] development **in Oregon** depends on strengthening traded sector industries.

(j) International trade **and** development [*and promotion is invaluable*] **of international trade are essential** for future [*economic*] **business** development opportunities.

(k) Small businesses remain a critical element of the state's [*economic development, comprising more than 90 percent of Oregon's businesses.*] **economy.**

(L) Capacity building **to support business development** in rural and distressed areas is a key component of economic development and revitalization efforts.

(m) Oregon's ports are important partners in the state's economic development efforts and are key components of local and state economic development strategies.

(n) Improving and enhancing infrastructure is necessary to the state's future economic development.

(o) Federal, state and local agencies working together will continue to enhance industrial site development and other economic development activities.

[*(p) The Economic and Community Development Department should be encouraged to convene community development partners to explore the prospect of making loans to private industrial landowners from the Brownfields Redevelopment Fund for future development opportunities.*]

(2) It is the purpose of ORS 284.101 to 284.146 and ORS chapters 285A, 285B and 285C [*to advance Oregon's economy.*] **to enable the creation, retention, expansion and attraction of businesses that provide sustainable, living wage jobs for Oregonians through public-private partnerships and leveraged funding and to support economic opportunities for Oregon companies and entrepreneurs.**

(3) The Legislative Assembly declares that it is the immediate economic strategy of the state to:

(a) Promote a favorable investment climate to strengthen businesses, create jobs and raise real wages;

(b) Improve the national and global competitiveness of Oregon companies; and

(c) Assist [*Oregon communities in building capacity*] **and further efforts** to retain, expand and attract businesses.

(4) To promote the advancement of the Oregon economy and implement the immediate economic strategy of the state, the [*Economic and Community*] **Oregon Business** Development Department shall invest resources in accordance with the following principles:

(a) Processes for making public investments and working with local and regional issues must be designed for flexibility so that actions can adapt to the constantly changing conditions and demands under which communities and businesses operate.

(b) Partnerships among local, state and federal governments and public and private organizations and entities should be strengthened to further the economic strategy of the state.

(c) The expected impact of public investment and assistance shall be identified, in terms of measurable outcomes, whenever possible.

(d) State, federal and community goals, constraints and obligations should be identified at the beginning of the planning process, and the state should work actively with community partners, regions and state and local agencies to address and accomplish their mutual objectives.

(5) When the department provides funds or assistance for projects, programs, technical support or other authorized activities pursuant to ORS 284.101 to 284.146 and ORS chapters 285A, 285B and 285C, the department shall give priority to projects, programs and activities that:

(a) Retain and create jobs and raise real wages;

[*(b) Promote capacity building, emphasizing rural and distressed areas;*]

(b) Promote capacity building, emphasizing rural and distressed areas to further economic development initiatives;

(c) Assist small business creation and expansion;

(d) Invest and engage in training a skilled workforce;

(e) Retain and expand existing companies and recruit new investment to Oregon;

(f) Capitalize on Oregon's competitive advantages and strategically invest resources to offset competitive disadvantages;

(g) Support innovation and research;

(h) Assist industry clusters to succeed;

(i) Market Oregon's advantages;

(j) Promote international trade and attract foreign direct investment;

(k) Support the development of industrial and commercial lands;

(L) Advance the efforts of ports to promote economic development activities; and

(m) Build capacity in Oregon's arts and cultural organizations, creative businesses and individual artists.

SECTION 10. ORS 285A.040 is amended to read:

285A.040. (1) There is established the Oregon [*Economic and Community*] **Business** Development Commission consisting of nine members appointed as follows:

(a) One nonvoting[, *ex officio*] member appointed from among the members of the Senate by the President of the Senate;

(b) One nonvoting[, *ex officio*] member appointed from among the members of the House of Representatives by the Speaker of the House of Representatives; and

(c) Seven members appointed by the Governor, subject to confirmation by the Senate in the manner prescribed in ORS 171.562 and 171.565. The Governor shall appoint members of the commission in compliance with all of the following:

(A) Members shall be appointed with consideration given to representation of the different geographic regions of the state, and at least one member shall be a resident of the area east of the Cascade Range.

(B) Not more than five members may belong to one political party. Party affiliation shall be determined by the appropriate entry on official election registration cards.

(C) Members shall be appointed with consideration given to representation of the following areas of expertise or training:

(i) International trade;

(ii) Traded sector business development;

[*(ii)*] **(iii)** Small business [*needs and issues;*] **development;**

[*(iii)*] **(iv)** Local [*government needs and issues;*] **economic development;**

[*(iv) Marketing and branding;*]

[*(v) Arts and culture;*]

[*(vi)*] **(v)** Finance **and business investment;**

[*(vii)*] **(vi)** Innovation; **or**

[*(viii) Telecommunications; or*]

[*(ix)*] **(vii)** Other areas of training or expertise identified by the [*commission.*] **Governor.**

(2)(a) The term of office of each member appointed by the Governor is four years, but a member serves at the pleasure of the Governor. Before the expiration of the term of a member appointed by the Governor, the Governor shall appoint a successor whose term begins on July 1 of the following year. A member appointed by the Governor is eligible for reappointment. In case of a vacancy among the members appointed by the Governor for any cause, the Governor shall appoint a person to fill the office for the unexpired term.

(b) The term of office of the member appointed by the President of the Senate is four years. In case of a vacancy for any cause, the President of the Senate shall appoint a Senator to fill the office for the unexpired term.

(c) The term of office of the member appointed by the Speaker of the House of Representatives is two years. In case of a vacancy for any cause, the Speaker of the House of Representatives shall appoint a Representative to fill the office for the unexpired term.

(3) A member of the commission who is appointed by the Governor is entitled to compensation and expenses as provided by ORS 292.495. [*Ex officio*] **Legislative** members of the commission are prohibited from receiving compensation and reimbursement for expenses.

(4) Subject to confirmation by the Senate, the Governor shall appoint one of the voting commissioners as presiding officer of the commission. The presiding officer shall have duties and powers as the commission determines are necessary for the office.

(5) Five voting members of the commission constitute a quorum for the transaction of business.

(6) The commission shall meet at least quarterly at a time and place determined by the commission. The commission shall also meet at other times and places as are specified by the call of the presiding officer or by the call of a majority of the voting members of the commission.

(7) A vacancy among the voting members of the commission does not impair the right of the remaining voting commissioners to exercise all the powers of the commission. If the remaining voting commissioners are unable to agree, the Governor shall have the right to vote as a member of the commission.

(8) A member of the commission appointed due to expertise or training in local economic development described in subsection (1)(c)(C)(iv) of this section shall also be an elected local government official with experience in economic development matters.

SECTION 11. ORS 285A.045 is amended to read:

285A.045. (1) As its primary duty, the Oregon [*Economic and Community*] **Business** Development Commission shall develop and maintain [*an*] **the** economic [*and community*] development policy **and strategy** for this state [*that implements the strategy declared*] **outlined** in ORS 285A.020 [*(3)*].

(2) The commission shall provide oversight and direction to the [*Economic and Community*] **Oregon Business** Development Department in carrying out the [*duties and creating*] **economic development** policies [*to further the economic*] **and** strategy [*set forth in ORS 285A.020.*] **established by the commission.** In addition, the commission may perform any other duty vested in the commission by law.

(3) The commission shall keep complete and accurate records of all the meetings, transactions and business of the commission at the office of the [*Economic and Community Development*] department.

(4) When a power, duty or function is vested in the commission, the commission may designate department officers, agents, employees or committee members to exercise the power, duty or function of the commission. When the commission designates a person in writing to exercise a power, duty or function of the commission, the person may exercise the power, duty or function.

(5) In carrying out its duties under subsection (1) of this section, the commission shall coordinate its activities with federal, state and local agencies, community partners and regions, when appropriate.

(6) The commission may prepare and submit suggested administrative rules to the Director of the Oregon Business Development Department that the commission determines are necessary for the objectives and programs of the department.

SECTION 12. ORS 285A.050 is amended to read:

285A.050. (1) The Oregon [*Economic and Community*] **Business** Development Commission shall report biennially to the Governor and the Legislative Assembly on the success of economic development efforts. The report shall include the progress toward achievement of performance measures for the [*Economic and Community*] **Oregon Business** Development Department as adopted by the Legislative Assembly. At a minimum, the report shall include the following:

(a) For the overall [*Economic and Community Development*] department and for [*each*] identifiable [*program*] **programs** and funding [*source*] **sources**:

(A) The number of jobs created and retained;

(B) The average wage levels of jobs created and retained; and

(C) Other measures identified by the commission.

(b) The status of the Oregon economy as it relates to the economic strategy outlined in ORS 285A.020.

(c) Other issues identified by the commission.

(2) Reports to the Legislative Assembly required under this section shall be made in accordance with ORS 192.245.

SECTION 13. ORS 285A.055 is amended to read:

285A.055. Prior to the approval of bond financing of economic development projects under ORS 285B.320 to 285B.371[,] **or** the making of [*a loan*] **loans** [*under ORS 285A.666 to 285A.732 or the making of any loan*] or the granting of any moneys from any source, the Oregon [*Economic and Community*] **Business** Development Commission[, *or the Economic and Community Development Department as the designee of the commission*], **or the Oregon Business Development Department as the designee of the commission,** shall:

(1) Determine that the action is cost effective, considering both major public expenses and major public benefits;

(2) Find that the project will produce goods or services which are sold in markets for which national or international competition exists or, if the project is to be constructed and operated by a nonprofit organization, that the project will not compete with local for-profit businesses;

(3) Determine that the action is the best use of the moneys involved, considering other pending applications for those moneys;

(4) Find that the project involved is consistent with the [*Economic and Community*] **Oregon Business** Development Department's comprehensive policy and programs; and

(5) Find that the project involved is consistent with applicable adopted local economic development plans.

SECTION 14. ORS 285A.060 is amended to read:

285A.060. (1) To aid and advise the Oregon [*Economic and Community*] **Business** Development Commission in the performance of its duties, the commission may establish such advisory and technical committees as it considers necessary. Such committees may be continuing or temporary. The presiding officer of the commission shall determine the representation, membership, terms and organization of the committees and shall appoint their members. Members shall be appointed with due consideration given to the geographic representation described in ORS 285A.040 (1). The Director

of the [*Economic and Community*] **Oregon Business** Development Department, or designee, shall be an ex officio member of each committee.

(2) Members of the committees appointed pursuant to this section shall receive no compensation, but may receive payment for their actual and necessary travel and other expenses while engaged in the performance of their official duties.

OREGON BUSINESS DEVELOPMENT DEPARTMENT ADMINISTRATIVE PROVISIONS

SECTION 15. ORS 285A.070 is amended to read:

285A.070. (1) The [*Economic and Community*] **Oregon Business** Development Department is established.

(2) The department shall be under the supervision of the Director of the [*Economic and Community*] **Oregon Business** Development Department, who shall be appointed by and shall hold office at the pleasure of the Governor.

(3) The appointment of the director shall be subject to confirmation by the Senate in the manner provided by ORS 171.562 and 171.565.

(4) Subject to policy direction by the Oregon [*Economic and Community*] **Business** Development Commission, the director shall:

(a) Be the administrative head of the department;

(b) Administer the laws of the state relating to economic development; and

(c) Intervene, as authorized by the commission, pursuant to the rules of practice and procedure, in the proceedings of state and federal agencies that may substantially affect economic development within Oregon.

(5) In addition to duties otherwise required by law, and subject to policy direction by the commission, the director shall prescribe rules for the government of the department, the conduct of its employees, the assignment and performance of its business and the custody, use and preservation of its records, papers and property, based on best managerial practices as determined by the director and in a manner consistent with applicable law.

(6) The director shall organize the department in whatever manner the director considers necessary to conduct the work of the department efficiently and effectively, subject to approval by the commission.

(7) The director may appoint all subordinate officers and employees of the department and may prescribe their duties, assignments and reassignments and fix their compensation, subject to any applicable provisions of the State Personnel Relations Law. Subject to any other applicable law regulating travel expenses, the officers and employees of the department shall be allowed such reasonable and necessary travel and other expenses as may be incurred in the performance of their duties.

(8) The director may delegate the exercise or discharge of any power, duty or function that is vested in or imposed by law upon the director to any department employee for the purpose of conducting an official act in the name of the director. The official act of any person acting in the name of the director by the authority of the director is an official act of the director.

(9) The director may require a fidelity bond of any officer or employee of the department who has charge of, handles or has access to any state money or property, and who is not otherwise required by law to give a bond. The director shall fix the amount of the bond, except as otherwise provided by law, and approve the sureties. The department shall pay the premiums on the bond.

(10) The [*Oregon Economic and Community Development*] commission shall report periodically to the Governor on the director's performance and make appropriate recommendations.

SECTION 16. ORS 285A.075 is amended to read:

285A.075. (1) The [*Economic and Community*] **Oregon Business** Development Department shall:

(a) Implement programs and adopt rules in accordance with applicable provisions of ORS chapter 183 that are consistent and necessary to carry out the policies established by the Oregon [*Eco-*

nomic and Community] **Business** Development Commission and the duties, functions and powers vested by law in the department.

(b) Act as the official state liaison agency for persons interested in locating industrial or business firms in the state and for state and local groups seeking new industry or business, and maintain the confidentiality of negotiations conducted pursuant to this paragraph, if requested.

(c) Coordinate state and federal economic and community development programs.

[*(d) Administer the state's participation in the federal Community Development Block Grant funding program authorized by 42 U.S.C. 5301 et seq.*]

[*(e)*] **(d)** Actively recruit domestic and international business firms to those communities desiring business recruitment.

(e) Work with existing Oregon companies to assist in their expansion or help them retain jobs in the state.

(f) Consult with local governments to establish regions for the purpose of job development [*and community assistance*] to facilitate economic activities in the region. Regions established for this purpose need not be of the same size in geographic area or population.

(g) Establish and operate foreign trade offices in foreign countries in which the department considers a foreign trade office necessary. The department shall use department employees, contracts with public or private persons or a combination of employees and contractors to establish and operate foreign trade offices. Department employees, including managers, who are assigned to work in a foreign trade office shall be in the unclassified service, and the director shall set the salaries of such employees. ORS 276.428, 279A.120, 279A.140, 279A.155, 279A.275, 279B.025, 279B.235, 279B.270, 279B.280, 279C.370, 279C.500 to 279C.530, 279C.540, 279C.545, 279C.800 to 279C.870, 282.020, 282.050, 282.210, 282.220, 282.230, 283.140, 459A.475, 459A.490, 653.268 and 653.269 do not apply to the department's operation of foreign trade offices outside the state.

(h) Consult with other state agencies and with local agencies and officials prior to defining or designating distressed areas for purposes of ORS 285A.020.

(i) Budget moneys for travel and various other expenses of industrial or commercial site location agents, film or video production location agents, business journal writers, elected state officials or other state personnel to accomplish the purposes of ORS 284.101 to 284.146 and ORS chapters 285A, 285B and 285C. The department may expend moneys duly budgeted to pay the travel and other expenses of such persons if the director determines the expense may promote the purposes of this subsection.

(j) Promulgate rules to govern contracts.

(k) Develop strategies to address issues that are necessary and appropriate to Oregon's future and adopt goals that include measurable indicators of success (Oregon benchmarks) that show the extent to which each goal is being achieved.

(L) Use practices and procedures that the department determines are the best practices for carrying out the duties of the department.

(2) The department shall have no regulatory power over the activities of private persons. Its functions shall be solely advisory, coordinative and promotional.

(3) Notwithstanding ORS 279A.140, the department may award grants or enter into contracts as necessary or appropriate to carry out the duties, functions and powers vested in the department by law.

SECTION 17. ORS 285A.080 is amended to read:

285A.080. The Director of the [*Economic and Community*] **Oregon Business** Development Department and all unclassified personnel shall receive such salary as may be provided by law or be fixed by the Oregon [*Economic and Community*] **Business** Development Commission. In addition to salaries, the director and all unclassified personnel, subject to the limitations otherwise provided by law, shall be reimbursed for all reasonable expenses necessarily incurred in the performance of official duties.

SECTION 18. ORS 285A.116 is amended to read:

285A.116. (1) The Oregon [*Economic and Community*] **Business** Development [*Commission*] **Department** shall establish regions for the purpose of job development [*and community assistance by the Economic and Community Development Department*]. When establishing the regions, the [*commission must*] **department shall** consider the optimal size for each region that will most effectively facilitate economic development activities in the region. Regions established by the [*commission*] **department** do not have to be of the same size or population.

(2) The Director of the [*Economic and Community*] **Oregon Business** Development Department shall provide for economic innovation coordination in the central office, which shall assist the field representatives in establishing contacts between local businesses and universities and community colleges in Oregon to promote the use of the research capacities of these institutions for development of new products.

SECTION 19. ORS 285A.152 is amended to read:

285A.152. (1) The Fujian Sister State Committee established under ORS 285A.148 may:

(a) Organize activities for and host visiting delegations from Fujian Province;

(b) Organize activities for and participate in delegations visiting Fujian Province and China;

(c) Provide for the exchange of information between the State of Oregon and Fujian Province;

(d) Work with representatives of Fujian Province on joint projects; and

(e) Take all actions necessary to facilitate and promote relations between the State of Oregon and Fujian Province.

(2) The Fujian Sister State Committee [*shall*] **may** visit Fujian Province at least biennially for the purpose of fulfilling the objectives described in subsection (1) of this section.

DIVISION OF DUTIES AMONG OREGON BUSINESS DEVELOPMENT COMMISSION, OREGON BUSINESS DEVELOPMENT DEPARTMENT AND OREGON INFRASTRUCTURE FINANCE AUTHORITY

Note: there are 67 additional pages of legislation in HB 2152

SECTION 20. ORS 285A.185 is amended to read:

285A.185. (1) As used in this section, "brownfield" means real property wh development is complicated by actual or perceived environmental contamination.

(2) The [*Economic and Community*] **Oregon Business** Development Department shall assist private persons and local governments to redevelop brownfields.

(3) The [*Economic and Community Development*] department shall:

(a) Act as the primary point of contact for information regarding public and private funding options available to a person interested in redeveloping a brownfield;

(b) Facilitate the funding process involving landowners or prospective purchasers, lending institutions, other state agencies, local jurisdictions, consultants and interested citizens;

(c) Serve as a key advocate for the redevelopment of brownfields in Oregon;

(d) Provide information to private persons and local governments on brownfield redevelopment funding;

(e) Enhance the availability of funding resources through program development, grant proposals and other appropriate opportunities; and

(f) Adopt rules necessary to carry out this section.

SECTION 21. ORS 285A.188 is amended to read:

285A.188. (1) As used in this section:

(a) "Environmental action" means activities undertaken to:

(A) Determine if a release has occurred or may occur, if the release or potential release poses a significant threat to human health or the environment or if additional remedial actions may be required at the site;

(B) Conduct a remedial investigation and a feasibility study;

(C) Plan for remedial action or removal action; or

(D) Conduct a remedial action or removal action at a site.

OREGON

ECONOMIC & COMMUNITY
DEVELOPMENT DEPARTMENT

2007–09
STRATEGIC PLAN

OUR MISSION: TO ADVANCE OREGON'S ECONOMY

Bob Repine, Director

econ.oregon.gov

www.oregon4biz.com

2007 MISSION & OBJECTIVES

OREGON
ECONOMIC & COMMUNITY
DEVELOPMENT DEPARTMENT

MISSION:

TO ADVANCE OREGON'S ECONOMY

GOALS:

Promote a favorable investment climate to strengthen businesses, create jobs and raise real wages.

- Invest and engage in training a skilled workforce
- Retain and expand existing companies and recruit new investment
- Capitalize on competitive advantages and strategically invest resources to offset disadvantages

Assist Oregon communities to build capacity to retain, expand and attract businesses.

- Support the development of industrial and commercial lands
- Advance ports' efforts to promote economic development activities
- Promote capacity building, emphasizing rural and distressed areas
- Build capacity in Oregon's arts and cultural organizations, creative businesses and individual artists

Improve national and global competitiveness of Oregon companies.

- Support innovation and research
- Assist industry clusters to succeed
- Market Oregon's advantages
- Promote international trade and attract foreign direct investment

When we began the process to set the new direction for the Oregon Economic & Community Development Department, it was understood that this wasn't simply an exercise for the sake of going through the motions. We weren't creating a plan that sits on a bookshelf never to be looked at again. This was about setting our objectives, and defining a clear, measurable path for success that creates hope and opportunity for all Oregonians.

We identified the three core objectives of the department:

- Promote favorable investment climate to strengthen businesses, create jobs and raise real wages.
- Assist Oregon communities to build capacity to retain, expand and attract businesses.
- Improve national and global competitiveness of Oregon companies.

With a clear direction, we identified the strategies, resources and people to take us there. These are summarized in this document, but there are many specific tactics that have been produced to achieve each strategy. For information on our specific programs and services, please contact our offices to see how we can assist your business or community.

We believe the three objectives listed above best serve our mission to expand Oregon's economy. Fulfilling our mission means our work will enhance both rural and urban communities; expand both existing and emerging industries; and assist both small and large businesses. We look forward to paving the way for continued sustainable economic development in Oregon, and working with Governor Kulongoski, private industry and other state agency partners to ensure opportunity for Oregonians in 2007 and beyond.

Bob Repine,
Director

SUSTAINABLE ECONOMIC DEVELOPMENT

EXPAND GLOBAL COMPETITIVENESS

CREATE JOBS

ASSIST COMMUNITIES

STRENGTHEN BUSINESSES

"We're looking at having our best year ever. Partly as a result of good planning, but most of the credit belongs to the superior workforce we've found here in Oregon."

Matt Conable, President
William Henry Knives

GOAL

Promote a favorable investment climate to strengthen businesses, create jobs and raise real wages.

Oregon is strategically located to engage in the global economy and must continue to ensure that existing businesses are able to prosper and grow through global trade. Being competitive globally means Oregon must have a well-educated and trained workforce. Oregon recognizes that continuous investment in workforce training is essential for all businesses to remain competitive in the new global market.

Oregon will **invest in programs that provide training opportunities for the existing workforce**, strengthening the capacity of the individual worker and enabling companies to be more productive. Oregon also will develop strategies to identify common skill and training needs within clusters of industries throughout the state. Oregon will use leveraged resources to strengthen industry cluster consortia as a way to take advantage of common opportunities and strategies.

Oregon will **concentrate on strengthening "traded-sector" industries**, those trading outside the local economies, as a way of ensuring our place in the global economy. This approach will be comprehensive and will integrate all available resources and techniques to retain, strengthen and expand traded-sector businesses in the state. Financing, tax incentives, workforce training and technical assistance will be marketed to local partners.

Oregon will **capitalize on competitive advantages and strategically invest resources to offset disadvantages.** Industrial land availability is one of several investment areas the Oregon Economic & Community Development Department (OECDD) will focus on. Existing Oregon businesses that are expanding, as well as new startups and businesses being recruited to the state, need properly prepared "project-ready" industrial land in a predictable, timely manner. Oregon will continue to work on a comprehensive approach to expanding the development of properties with high potential and in demand through the industrial site certification process. This includes enhancing the site certification program and marketing sites to potential developers.

GOAL

Assist Oregon communities to build capacity to retain, expand and attract businesses.

As Oregon improves its global competitiveness, it's important that all Oregonians reap the benefits. By **facilitating local capacity building, especially in rural and distressed areas,** OECDD will help ensure that communities have the expertise and infrastructure needed to retain and expand existing companies and attract new businesses.

In coordination with other state and local agencies and partners, the department can help reduce barriers and **support the development of industrial and commercial lands.** This will allow communities in rural as well as urban areas to improve local opportunities for sound economic growth. A consolidated development fund will make it easier to fund important water and sewer projects, build essential community facilities and plan for the future.

Oregon's 23 ports are important partners in the state's economic development efforts. The leadership and expertise of port officials are critical to the alignment of local and state economic development strategies. Port infrastructure is a key component of local business expansion and retention plans. By **advancing ports' efforts to promote economic development activities** the department can leverage these critical assets.

The Arts Commission and Cultural Trust will **build capacity in Oregon's arts and cultural organizations, creative businesses, and individual artists** by developing and awarding strategic infrastructure funding and organizational technical assistance to Oregon's cultural and creative sector. This will attract artists and creative workers to Oregon, as well as businesses that realize the benefits of locating within a vibrant arts sector. The Arts Commission also recognizes the advantages of incorporating art and culture in rural and community development plans and will provide resources to help these plans succeed.

LOWE'S GROUNDBREAKING

After an extensive search and evaluation process, Lowe's, the world's second-largest home improvement retailer, selected Lebanon, Oregon, as the location for its new west coast regional distribution center. The facility, located on an Oregon Certified Site, will be the state's third largest building at 1.4 million square feet—roughly the size of 31 football fields under one roof.

The Port of Newport recently began the first phase of rebuilding it's international terminal facility. "Project funding is vital to maintain our ability to provide commercial shipping which contributes significantly to economic benefit through wages, products, services and marine transportation."

Don Mann, General Manager
Port of Newport

WHY INNOVATION?

Simply put, innovation helps firms compete, communities prosper and people thrive.

Competitive firms that rely on innovation offer good jobs at nearly twice the average wage, cultivate ingenious people who apply their skills at work and in the communities, and anchor key industries by attracting competitors and suppliers seeking proximity.

Most important, these firms inspire their customers, their employees and their neighbors.

GOAL

Improve national and global competitiveness of Oregon companies.

Future economic growth in our state depends on Oregon's ability to compete on a global scale. Developing and enhancing competitive advantages for Oregon businesses keeps existing businesses thriving and attracts new companies into the state.

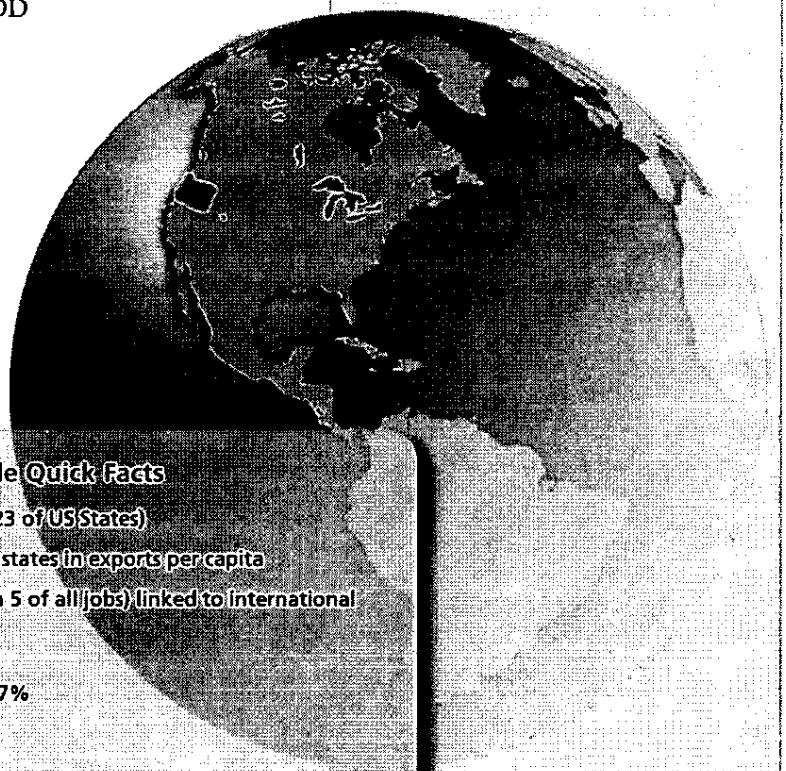
To enhance competitiveness, OECDD will leverage public funds with private investments to **support innovation and research** through the Oregon Innovation Council (Oregon InC). Working with OECDD, Oregon InC has recommended 11 high-return projects that will help existing businesses achieve growth through innovation, and help new industries emerge.

Established industries also bring opportunity for economic growth. There is an inherent competitive advantage to multiple companies that operate in the same industry in the same geographic area, making an "industry cluster." Talented workforce, established vendors and existing distribution channels are all benefits of doing business within a cluster. Recognizing this, OECDD will **assist industry clusters to succeed** by identifying clusters and investing resources to support their growth and competitiveness.

In both emerging and existing industries, Oregon is a great place to do business. OECDD will **market Oregon's advantages** to the world, communicating the compelling reasons why businesses should expand to Oregon. This will contribute to enhancing the overall brand image of Oregon including its people, products and places. OECDD will work through Brand Oregon partners such as the Department of Agriculture, Tourism Commission and private industry to identify and communicate all the competitive advantages that make Oregon attractive to business.

BRAND OREGON

Marketing Oregon products and services overseas and establishing new opportunities in foreign markets will help Oregon's economy to grow. OECDD will **promote international trade and attract foreign direct investment** to increase the global competitiveness of Oregon companies.



World Trade Quick Facts

- Total 2005 exports: $12.38 billion (#23 of US States)
- Consistently ranks among top 15 US states in exports per capita
- One in four manufacturing jobs (1 in 5 of all jobs) linked to international trade
- Top 2005 export sectors (% of total)
  - Computer & electronic products 37%
  - Transportation equipment 13%
  - Crops 12%
  - Machinery manufacturing 11%
  - Chemical manufacturing 4%
  - Primary metal manufacturing 3%
  - Paper products 2%
  - Wood products 2%
- Canada, South Korea and Japan continue to be Oregon's largest export markets but China and Mexico are becoming strong export partners

REPORT OF THE COMMISSION

Introduction

The 2007 Legislature, through a budget note, directed the Oregon Economic and Community and Community Development Commission (the "Commission") to develop a plan for the future of the Regional Investment Boards (the "Boards" or "RIBs").

During the period from August through December 2007, the Commission met with representatives of all thirteen Boards to discuss the role of the boards, what each Board saw as strengths and weaknesses of the current structure, and whether there were ways to improve that structure. The Commission also met separately with the Oregon Economic and Community Development Department ("OECDD") management team on a number of occasions to discuss the same issues.

This report sets forth the Commission's report to the Legislature in response to the directive the Commission received.

Summary of Conclusions

The following is a summary of the Commission's conclusions concerning the roles and responsibilities of the Boards:

- The original purpose for creating and funding the Boards was to create a system for deploying state funds at the local level for both economic and community development. The Commission believes the Boards have played, and continue to play, an important role in that respect, at least outside the urban areas of the State.

- The current system works most effectively in more rural parts of the State, where the population is too small to fund the kinds development activities that larger counties and cities can fund independently of the state. The Boards are less important in urban areas of the state.

- The Commission believes it is important for the Boards to maintain a regional perspective as the economic health and growth of areas within a region are interdependent and communities should not be viewed in isolation.

- In recent years, at the direction of the Commission, the Boards have been required to tie all expenditures of state funds to job creation. The Commission believes this has caused the Boards to either discount important needs on the community development side or to create strained connections between expenditures and job creation.

- The Commission believes the Boards should be permitted to direct funds to community development projects regardless of whether there is a direct link to job creation. However, the Commission and OECDD need to develop criteria to determine which community development projects should be funded with state money. The Commission and OECDD also need to develop metrics to measure the outcomes of such expenditures.

- A separate question is what role the Boards should have in setting the agenda for major infrastructure investments. This report does not address that issue, which would require input from cities, counties and other public and private stakeholders to reach an informed recommendation. The Commission does believe, however, that the Boards play a valuable role in economic and community development that is distinct from whatever role they may play with respect to investment in major infrastructure.

- The Commission believes there may be a need to modify the ways in which the Boards are structured to ensure both appropriate representation from various stakeholders and sufficient rotation of membership so as to ensure new perspectives over time.

History

The Regional Investment Program was established by the Legislature in 1987 as the Regional Strategies Program. Recognizing that economic opportunities and challenges often cross jurisdictional boundaries, counties joined together to form regions, self-selecting their partners based on shared economic interests. Volunteer boards were created and the board members, chosen from both public and private sectors, developed strategies to diversify and strengthen Oregon's regional economies. Each Board also was required to identify one industry that was key to the region's economic growth and a plan for developing that industry.

The 1993 Legislature modified the process by expanding the number of key industries for each region from one to three and moving the decision-making for strategy implementation to the local level.

Recognizing that many rural areas were severely impacted by federal forest and salmon policies and not keeping pace with the state's urban economic diversification and growth, the 1995 Legislature created the Rural Investment Fund. This flexible funding source was designed to help Boards meet the economic and community development priorities of small, rural communities. The same volunteer regional Boards added rural action plans to their existing strategies and then funded projects to implement their plans.

As the state's economy grew and the unemployment rate dropped, the focus of both programs was modified in 1999 to give the regional Boards the flexibility to fund community development and capacity building projects and to allow the regional Boards to fund various business development activities regardless of industry.

When the state's economy fell into a recession in 2001, immediate job creation and retention, along with leveraging short- and long-term investments became the emphasis of the two programs. These remain the current program priorities.

The Current Role of the Boards

The Boards currently seek to develop strategies for economic development in each region of the state, focusing on investments that contribute to the creation/retention of jobs and the leverage of short- and long-term investments. This planning involves an assessment of the region's economy, including barriers to economic development and opportunities on which the Board can capitalize. OECDD staff works with the Boards in developing their strategies and staff coordinates those strategies with OECDD's work in the region.

OECDD staff considers the Boards to be a critical part of the delivery system for economic and community development in the State. The Commission has been advised by the staff, and the Commission agrees, that the Boards add value in the following categories:

- **The Boards help OECDD at a strategic level by developing regional strategies for economic and community development.**

  The Boards provide a vehicle for elected and non-elected individuals to meet as a group to coordinate and address issues that cross-jurisdictional boundaries. Rather than individual localities working independently of each other, the Boards assist OECDD by developing regional strategies that are consistent with OECDD's statewide mission.

- **The Boards are able to target funds for economic and community development on a local and regional basis.**

  By directing grants and loans at the regional and local level, the Boards are able provide financial support for economic and community development needs that cannot be administered as effectively at the agency level. OECDD staff advises that these grants and loans form an important part of OECDD's economic development strategy. Decision-making on grants and loans is improved by the involvement of individuals who live and work in the affected communities.

- **The Boards have created an economic development delivery system that would not otherwise exist.**

  The Boards use some of the state funding they receive to fund economic and community development professionals in regions where cities and counties lack the resources to do so themselves. These individuals provide project development assistance to businesses and communities, package and coordinate funding for projects, prepare grant and loan applications for other programs, help communities with complex land-use planning regulations, and manage funded projects on behalf of communities.

The Future Role of the Boards

The Commission believes the Boards play an important role in the delivery of economic and community development services across the State. At the same time, the Commission also believes that lack of clarity in defining and measuring goals, as well as changes in direction over time, have created a climate of uncertainty and disagreement over the role of the Boards.

Part of the challenge lies in the level of unmet needs in many parts of the state. As the Oregon economy has evolved over the past two decades, and as parts of the resource-based economy eroded, the rural parts of the state have lost significant numbers of jobs. Not only have lost jobs been a hardship for families in those areas, but the reduction in employment has reduced revenues for local government. Essentially, the kinds of businesses and organizations that are necessary for communities to thrive have also eroded in those parts of the State.

The Regional Investment Boards have attempted to address these issues by investing in projects that not only are designed to create jobs, but also are designed to maintain or rebuild communities. Such investments inevitably give rise to questions about the advisability of using state funds to support private or government activities where outcomes are difficult to measure.

While the Commission believes the Boards play an important role in the delivery of economic and community development services, we also believe changes need to occur in order to provide better direction to the Boards and accountability for how state funds are expended through the program. The specific changes we would recommend will require additional discussion with interested parties. Therefore, the Commission recommends that we work with OECDD, the Governor's Office, the Legislature, and the Boards to develop further details and legislation for consideration in the 2009 Legislative Session.

Among the issues we need to address are the following:

- **Better define the strategies for the Boards**

The focus of the Boards has changed over time from job creation to community development and back to job creation. In recent years, at the direction of the Commission, the Boards have been required to tie all expenditures of state funds to job creation. The Commission believes this has caused the Boards to either discount important needs on the community development side or to create strained connections between expenditures and job creation.

The Commission recommends that the Boards be permitted to develop strategies that include community development aspects, recognizing that a singular focus on job creation may not be practical in communities that cannot afford some of the basic infrastructure and capacity that is an essential prerequisite to job creation. At the same time, consideration needs to be given to how far the state should go in funding community development through the Boards, particularly given the difficulties involved in measuring the outcomes of these expenditure.

- **Develop better metrics to measure outcomes of expenditures.**

The Boards currently attempt to measure the outcomes of their expenditures by the number of jobs created and retained. Based on the expanded focus of the program described above, the Commission and OECDD need to develop metrics to measure the outcomes of investments in infrastructure and capacity.

- **Focus on opportunities to leverage additional private and public investments**

The Commission has been advised that a regional investment can be an important piece in assembling larger investments. A relatively small grant or loan can demonstrate to a business that it is an important part of the local economy and that the Board, which represents the entire region, supports the growth and development of the business.

Similarly, a number of government and non-governmental organization programs require a demonstration of local support for a community's project before a grant or loan is awarded. Regional Investment Funds are often the only source available to demonstrate this local support.

- **Reserve a portion of the funding for the Regional Investment Program to address cross-regional needs and opportunities**

The Commission believes an important role for the Commission and OECDD is to coordinate issues and opportunities from a statewide perspective. As needs and opportunities are identified at the regional levels, the Commission and OECDD need to consider whether there are needs or

opportunities that cross regional lines. If so, OECDD needs to work with the affected Boards to assist in the funding.

- **Increase interaction between the Commission and the Boards.**

Communication between the Boards and the Commission has been infrequent. The Commission recommends establishing regular meetings with one or more Board representatives to discuss regional strategies and what kinds of assistance the State can and should provide.

- **Evaluate the structure of the Boards**

Based on its review to date, the Commission believes the governance structures of the Boards may need modification to ensure the Boards include appropriate representation from various stakeholders and that there is a sufficient rotation of membership to ensure new perspectives over time. Certain governance changes may also improve communication among the Boards, OECDD, the Commission, and the Legislature.

- **Evaluate the roles of the Boards in setting priorities for infrastructure and other capital improvement needs**

Major infrastructure investments in transportation, water, sewer, and the like are not made directly by the Boards, but some Boards have had a role in setting priorities for these investments. In some regions, the Boards have played a significant role, while participation in other regions has been relatively minor.

The Commission believes the Boards can play a significant role in setting priorities for infrastructure and other capital improvement needs in regions where county and city governments lack the resources to perform these functions themselves or in regions where priorities need to be established regionally, rather than by county or city jurisdiction. If Boards are to play this role effectively, however, they need to be given the resources to do so.

Conclusion

The Boards and their members exemplify the kind of volunteerism and collaboration that help Oregon remain competitive with larger states that invest more in economic and community development than we do.

The Legislature has declared the economic strategy of the State to be to: "(a) promote a favorable investment climate to strengthen businesses, create jobs and raise real wages; (b) improve the national and global competitiveness of Oregon companies; and (c) assist Oregon communities in building capacity to retain, expand and attract businesses." The Commission finds that the Regional Investment Boards are an important part in how we as a state pursue this strategy.

The more difficult question is how much funding to provide the Boards and what kinds of direction should be provided to the Boards with respect to how that funding should be applied. Some would argue that the Boards, which are comprised of both elected officials and community leaders, know their community needs best and therefore should have broad discretion to apply state funds as they see fit. Others would argue that whenever state funds are spent, the state has a responsibility to the taxpayers to establish concrete goals and measure progress toward meeting those goals.

The Commission believes that goals and metrics for the Regional Investment Boards can and should be established. Such goals and metrics have existed in the past, but we believe they can be improved upon. We propose to bring a more complete set of recommendations on this subject to the Legislature for its 2009 session.

Separate issues for consideration include the role of the Boards in urban parts of the state, where their functions may overlap more with local government than is the case in rural parts of the state, and what role the Boards should play in establishing priorities for major infrastructure investment. Again, we propose to bring a more complete set of recommendation to the Legislature for its 2009 session.

Finally, we would observe that the directive given the Commission by the Legislature caused us to undertake a process that we believe has already had value in itself. By discussing these issues with Boards around the state, we have learned more about the opportunities and challenges we collectively face. We look forward to learning more as the discussion continues.

business oregon

Business Financing Resources

Business Oregon has a team of professionals to assist businesses with their financing needs by packaging loan programs or by matching a partner service provider with a business.

Oregon Finance Programs

Business Oregon manages the following financing programs to assist businesses:

- Oregon Business Development Fund
- Oregon Capital Access Program
- Oregon Credit Enhancement Fund
- Oregon Industrial Development Bonds
- Entrepreneurial Development Loan Fund
- Business Retention Program
- Brownfields Redevelopment Fund

Learn more >>

Business Resources and Services

There are several assistance and financing programs available from local and federal resources that may be used to meet business needs. These resources are:

- United States Department of Agriculture (USDA)
- Farm Service Agency (FSA)
- Small Business Administration (SBA)
- Oregon Small Business Development Centers
- SCORE—Counselors to America's Small Business
- Other Small Business Service Providers

STATE OF INDIANA

EXECUTIVE DEPARTMENT
INDIANAPOLIS

EXECUTIVE ORDER 05-01

FOR: CREATION OF THE OFFICE OF SECRETARY OF COMMERCE AND COORDINATION OF THE STATE'S ECONOMIC DEVELOPMENT AND JOB TRAINING EFFORTS

TO ALL WHOM THESE PRESENTS MAY COME, GREETINGS.

WHEREAS, in recent years, Indiana has experienced significant job losses, resulting in diminished hope and opportunity for Hoosiers and a decline in revenues available to address the problems faced by our State;

WHEREAS, fostering opportunities for business growth and job creation is vital to restoring Indiana's economic health and helping Indiana realize its true potential;

WHEREAS, business growth and job creation depend upon the availability of a skilled workforce, resulting in the need for coordination between our State's economic development efforts and its job training and labor programs;

WHEREAS, consistent with the foregoing identification of need, the General Government Subcommittee of the Government Efficiency Commission has recommended the establishment of an office of economic development, headed by a chief economic development officer reporting directly to the Governor with complete responsibility, accountability, and authority for all functions related to economic development and job creation and retention within the State;

WHEREAS, it is in the best interests of the citizens of Indiana to establish the position of Secretary of Commerce to lead Indiana's economic development efforts and to coordinate those efforts with its job training and labor programs;

WHEREAS, the Governor has proposed legislation to the General Assembly that would abolish the Department of Commerce and expedite the transfer of its business development powers and duties to the Indiana Economic Development Corporation (IEDC); and

WHEREAS, it is appropriate and necessary to give immediate effect to actions designed to address the needs and implement the reforms described in this Executive Order;

NOW, THEREFORE, I, Mitchell E. Daniels, Jr., by virtue of the authority vested in me as Governor of the State of Indiana, do hereby order that:

1. The position of Secretary of Commerce is hereby created.

2. The Secretary of Commerce shall be appointed by, report directly to, and serve at the pleasure of the Governor.

3. The Secretary of Commerce, shall, among other things, oversee and coordinate the State's efforts to foster business growth, industry modernization, economic diversification, and job creation and retention.

4. The Secretary of Commerce shall be the chief executive officer of the Department of Commerce and, upon the elimination of such department, of the IEDC, and shall have such powers, duties and responsibilities in such capacity as may be set forth by statute upon enactment of legislation or as may be designated by the Governor from time to time consistent with the exercise of executive authority under the Constitution and laws of the State.

7. Upon the enactment of the legislation by the General Assembly to codify the measures described in paragraphs 1 through 5 of this Executive Order, this Executive Order shall expire as to those measures; provided, however, that this Executive Order shall continue in effect as to the measures described in paragraph 6 hereof.

IN TESTIMONY WHEREOF, I, Mitchell E. Daniels, Jr., have hereunto set my hand and caused to be affixed the Great Seal of the State of Indiana on this 10th day of January, 2005.

Mitchell E. Daniels, Jr.
Governor of Indiana

ATTEST: Todd Rokita
Secretary of State

SOURCE: IC 5-28; (05)HE1003.1.34. --> SECTION 34. IC 5-28 IS ADDED TO THE INDIANA CODE AS A NEW ARTICLE TO READ AS FOLLOWS [EFFECTIVE UPON PASSAGE]:

ARTICLE 28. INDIANA ECONOMIC DEVELOPMENT CORPORATION

Chapter 1. Purpose

Sec. 1. (a) It is the intent of the general assembly to improve the quality of life for the citizens of Indiana by encouraging the:

(1) diversification of Indiana's economy and the orderly economic development and growth of Indiana;

(2) creation of new jobs;

(3) retention of existing jobs;

(4) growth and modernization of existing industry; and

(5) promotion of Indiana.

(b) The general assembly finds the following:

(1) Certain activities associated with the functions listed in subsection (a) may not work properly with the traditional responsibilities and activities of state agencies.

(2) The functions listed in subsection (a) can be achieved most efficiently by a body politic and corporate that:

(A) serves the interests of the state by carrying out the programs set forth in this article;

(B) is free from certain administrative restrictions that would hinder its performance; and

(C) possesses broad powers designed to maximize the state's economic development efforts.

(3) The corporation established by this article will:

(A) lead the state's economic development efforts;

(B) carry out the programs under this article, including the providing of grants and loans; and

(C) perform other essential public services for the state.

(4) In return for the corporation's economic development efforts to carry out the functions listed in subsection (a), the general assembly should appropriate state funds to the corporation.

Chapter 2. Definitions

Sec. 1. The definitions in this chapter apply throughout this article.

Sec. 2. "Board" refers to the board of the corporation established under IC 5-28-4.

Sec. 3. Except as otherwise provided, "corporation" refers to the Indiana economic development corporation established by IC 5-28-3-1.

Sec. 4. "Economic development" refers to the purposes described in IC 5-28-1-1.

Sec. 5. "Secretary of commerce" refers to the secretary of commerce appointed under IC 5-28-3-4(a).

Chapter 3. Indiana Economic Development Corporation

Sec. 1. The Indiana economic development corporation is established.

Sec. 2. (a) The corporation is a body politic and corporate, not a state agency but an independent instrumentality exercising essential public functions.

(b) The corporation and the corporation's funds, accounts, and financial affairs shall be

examined biennially by the state board of accounts under IC 5-11.

Sec. 3. Employees of the corporation are not employees of the state.

Sec. 4. (a) The governor shall appoint the secretary of commerce, who shall serve at the pleasure of the governor. The secretary of commerce is the chief executive officer of the corporation.

(b) The governor shall appoint the president of the corporation, who shall serve at the pleasure of the governor. The president shall report to the secretary of commerce.

Chapter 4. Corporation Board

Sec. 1. The corporation shall be governed by a board.

Sec. 2. (a) The board is composed of the following twelve (12) members, none of whom may be members of the general assembly:

---

(1) The governor.

(2) Eleven (11) individuals appointed by the governor.

The individuals appointed under subdivision (2) must be employed in or retired from the private or nonprofit sector or academia.

(b) When making appointments under subsection (a)(2), the governor shall appoint the following:

(1) At least five (5) members belonging to the same political party as the governor.

(2) At least three (3) members who belong to a major political party (as defined in IC 3-5-2-30) other than the party of which the governor is a member.

Sec. 3. (a) The term of office of an appointed member of the board is four (4) years.

(b) Each member holds office for the term of appointment and continues to serve after expiration of the appointment until a successor is appointed and qualified. A member is eligible for reappointment.

(c) Members of the board appointed under section 2(a)(2) of this chapter serve at the pleasure of the governor.

Sec. 4. The governor shall serve as chairperson of the board.

Sec. 5. The members of the board are entitled to a salary per diem for attending meetings equal to the per diem provided by law for members of the general assembly. The members of the board are also entitled to receive reimbursement for traveling expenses as provided under IC 4-13-1-4 and other expenses actually incurred in connection with the members' duties as approved by the budget agency.

Sec. 6. Seven (7) members constitute a quorum for the transaction of business. The affirmative vote of at least seven (7) members is necessary for action to be taken by the board. Members may not vote by proxy.

Sec. 7. Meetings of the board shall be held at the call of the chairperson or whenever any six (6) voting members request a meeting. The members shall meet at least once every three (3) months to attend to the business of the board.

Chapter 5. General Powers

Sec. 1. The corporation shall carry out the economic development functions of the state in conformity with the laws enacted by the general assembly.

Sec. 2. The corporation is granted all powers necessary or appropriate to carry out the corporation's public and corporate purposes under this chapter.

Sec. 3. (a) Subject to approval by the budget agency, the corporation may, without the approval of the attorney general, employ legal counsel, technical experts, and other officers, agents, and employees, permanent or temporary, the corporation considers necessary to carry out the efficient operation of the corporation.

(b) Subject to approval by the budget agency, the corporation may enter into contracts without the approval of the attorney general.

Sec. 4. (a) The corporation shall determine qualifications, duties, compensation, and terms of service for persons employed by the corporation as employees or as independent contractors.

(b) The board may adopt a resolution providing that the corporation's employees who are eligible to participate in the public employees' retirement fund under the eligibility requirements set forth in IC 5-10.2 and IC 5-10.3 shall participate in the fund.

(c) The board may adopt a resolution to allow the corporation's employees to participate in group insurance and other benefit plans, including the state employees' deferred compensation plan, that are available to state employees.

Sec. 5. The board and the employees of the corporation are:

(1) under the jurisdiction of and rules adopted by the state ethics commission; and

(2) subject to ethics rules and requirements that apply to the executive branch of state government.

However, the board may adopt additional ethics rules and requirements that are more stringent than those adopted by the state ethics commission.

Sec. 6. The board shall establish an advisory committee to advise the board and the corporation on issues determined by the board. The advisory committee must:

(1) have members that represent diverse geographic areas and economic sectors of Indiana; and

(2) include members or representatives of local economic development organizations.

Sec. 7. For purposes of IC 34-13-2, IC 34-13-3, and IC 34-13-4, the board and the employees of the corporation are public employees (as defined in IC 34-6-2-38).

Sec. 8. The corporation shall adopt rules under IC 4-22-2 to carry out its duties under this article. The board may also adopt emergency rules under IC 4-22-2-37.1 to carry out its duties under

this article.

Sec. 9. Except as specifically provided by law, the corporation and the board are subject to IC 5-14-1.5 and IC 5-14-3.

Sec. 10. An employee of the corporation is entitled to reimbursement for traveling expenses as provided under IC 4-13-1-4 and other expenses actually incurred in connection with the employee's duties as approved by the budget agency.

Sec. 11. The corporation may request appropriations from the general assembly to:

(1) carry out the corporation's duties under this article; and

(2) fund economic development and job creation programs.

Sec. 12. (a) The Indiana promotion fund is established within the state treasury.

(b) Except as provided in section 13 of this chapter, the corporation shall deposit the following in the fund:

(1) All funding received from the private sector under IC 5-28-6-1(6).

(2) All other gifts, donations, bequests, devises, and contributions received by the

corporation.

(c) The corporation shall administer the fund. The treasurer of state shall invest the money in the fund not currently needed to meet the obligations of the fund in the same manner as public money may be invested. Interest that accrues from these investments shall be deposited in the fund.

(d) Money in the fund at the end of a state fiscal year does not revert to the state general fund.

(e) Except as provided in the terms of a gift, a donation, a contribution, a bequest, a devise, or other private sector funding, money in the fund may be used at the discretion of the board to carry out in any manner the corporation's purposes under this article.

(f) Money in the fund may be transferred to any fund administered by the corporation.

(g) Money in the fund is continuously appropriated to the corporation for the purposes of this article.

Sec. 13. (a) Notwithstanding section 12 of this chapter, the board may establish a nonprofit subsidiary corporation to solicit and accept private sector funding, gifts, donations, bequests, devises, and contributions.

(b) A subsidiary corporation established under this section:

(1) must use money received under subsection (a) to carry out in any manner the purposes and programs under this article;

---

(2) must report to the budget committee each year concerning:

(A) the use of money received under subsection (a); and

(B) the balances in any accounts or funds established by the subsidiary corporation; and

(3) may deposit money received under subsection (a) in an account or fund that is:

(A) administered by the subsidiary corporation; and

(B) not part of the state treasury.

(c) The state board of accounts shall annually audit a subsidiary corporation established under this section.

Chapter 6. Duties

Sec. 1. The corporation shall do the following:

(1) Create and regularly update a strategic economic development plan.

(2) Establish strategic benchmarks and performance measures.

(3) Monitor and report on Indiana's economic performance.

(4) Market Indiana to businesses worldwide.

(5) Assist Indiana businesses that want to grow.

(6) Solicit funding from the private sector for selected initiatives.

(7) Provide for the orderly economic development and growth of Indiana.

(8) Establish and coordinate the operation of programs commonly available to all citizens of Indiana to implement a strategic plan for the state's economic development and enhance the general welfare.

(9) Evaluate and analyze the state's economy to determine the direction of future public and private actions, and report and make recommendations to the general assembly in an electronic format under IC 5-14-6 with respect to the state's economy.

Sec. 2. (a) The corporation shall develop and promote programs designed to make the

best use of Indiana resources to ensure a balanced economy and continuing economic growth for Indiana, and, for those purposes, may do the following:

(1) Cooperate with federal, state, and local governments and agencies in the coordination of programs to make the best use of Indiana resources.

(2) Receive and expend funds, grants, gifts, and contributions of money, property, labor, interest accrued from loans made

by the corporation, and other things of value from public and private sources, including grants from agencies and instrumentalities of the state and the federal government. The corporation:

(A) may accept federal grants for providing planning assistance, making grants, or providing other services or functions necessary to political subdivisions, planning commissions, or other public or private organizations;

(B) shall administer these grants in accordance with the terms of the grants; and

(C) may contract with political subdivisions, planning commissions, or other public or private organizations to carry out the purposes for which the grants were made.

(3) Direct that assistance, information, and advice regarding the duties and functions of the corporation be given to the corporation by an officer, agent, or employee of the executive branch of the state. The head of any other state department or agency may assign one (1) or more of the department's or agency's employees to the corporation on a temporary basis or may direct a division or an agency under the department's or agency's supervision and control to make a special study or survey requested by the corporation.

(b) The corporation shall perform the following duties:

(1) Develop and implement industrial development programs to encourage expansion of existing industrial, commercial, and business facilities in Indiana and to encourage new industrial, commercial, and business locations in Indiana.

(2) Assist businesses and industries in acquiring, improving, and developing overseas markets and encourage international plant locations in Indiana. The corporation, with the approval of the governor, may establish foreign offices to assist in this function.

(3) Promote the growth of minority business enterprises by doing the following:

(A) Mobilizing and coordinating the activities, resources, and efforts of governmental and private agencies, businesses, trade associations, institutions, and individuals.

(B) Assisting minority businesses in obtaining governmental or commercial financing for expansion or establishment of new businesses or individual development projects.

(C) Aiding minority businesses in procuring contracts

from governmental or private sources, or both.

(D) Providing technical, managerial, and counseling assistance to minority business enterprises.

(4) Assist the office of the lieutenant governor in:

(A) community economic development planning;

(B) implementation of programs designed to further community economic development; and

(C) the development and promotion of Indiana's tourist resources.

(5) Assist the commissioner of agriculture in promoting and marketing of Indiana's agricultural products and provide assistance to the commissioner of agriculture.

(6) With the approval of the governor, implement federal programs delegated to the state to carry out the purposes of this article.

(7) Promote the growth of small businesses by doing the following:

(A) Assisting small businesses in obtaining and preparing the permits required to conduct business in Indiana.

(B) Serving as a liaison between small businesses and state agencies.

(C) Providing information concerning business assistance programs available through government agencies and private sources.

(8) Assist the Indiana commission for agriculture and rural development in performing its functions under IC 4-4-22.

(9) Establish a public information page on its current Internet site on the world wide web. The page must provide the following:

(A) By program, cumulative information on the total amount of incentives awarded, the total number of companies that received the incentives and were assisted in a year, and the names and addresses of those companies.

(B) A mechanism on the page whereby the public may request further information online about specific programs or incentives awarded.

(C) A mechanism for the public to receive an electronic response.

(c) The corporation may do the following:

(1) Disseminate information concerning the industrial, commercial, governmental, educational, cultural, recreational, agricultural, and other advantages of Indiana.

---

(2) Plan, direct, and conduct research activities.

(3) Assist in community economic development planning and the implementation of programs designed to further community economic development.

Chapter 7. Training 2000 Program and Fund

Sec. 1. As used in this chapter, "business" includes an entity that has the objective of supplying a service or an article of trade or commerce.

Sec. 2. The corporation shall do the following:

(1) Establish policies to carry out a training assistance program, the purpose of which is to provide assistance to the following:

(A) New or expanding businesses, for the training of potential employees and the retraining and upgrading of the skills of potential employees.

(B) Businesses in Indiana, for the retraining and upgrading of employees' skills required to support new capital investment.

(C) Businesses in Indiana, for the development of basic workforce skills of employees, including the following:

(i) Literacy.

(ii) Communication skills.

(iii) Computational skills.

(iv) Other transferable workforce skills approved by the corporation.

(2) Provide promotional materials regarding the training program.

(3) Determine the eligibility of an industry for the training program.

(4) Require a commitment by a business receiving training assistance under this chapter to continue operations at a site on which the training assistance is used for at least five (5) years after the date the training assistance expires. If a business fails to comply with this commitment, the corporation shall require the business to repay the training assistance provided to the business under this chapter.

Sec. 3. The corporation may do the following:

(1) Adopt policies and guidelines necessary to carry out this chapter.

(2) Accept money and other things of value from all sources to carry out the purposes of the training program.

(3) Provide services and materials in order to carry out the

purposes of the training program.

(4) Develop or assist in the development of training plans.

(5) Evaluate the training program with respect to the program's impact on the improvement of workforce skills, job creation, and job retention.

(6) Involve other entities, by contract or otherwise, in carrying out the purposes of the training program.

Sec. 4. Participation in the training program is limited to businesses that:

(1) meet the eligibility requirements of the corporation; and

(2) comply with this chapter.

Sec. 5. (a) The training 2000 fund is established within the state treasury to be used exclusively for the purposes of this chapter.

(b) The fund consists of appropriations from the general assembly.

(c) The corporation shall administer the fund. The following may be paid from money in the fund:

(1) Expenses of administering the fund.

(2) Nonrecurring administrative expenses incurred to carry out the purposes of this chapter.

(d) The treasurer of state shall invest the money in the fund not currently needed to meet the obligations of the fund in the same manner as other public funds may be invested. Interest that accrues from these investments shall be deposited in the fund.

Chapter 8. Economic Development Fund

Sec. 1. As used in this chapter, "federal agency" means the Economic Development Administration of the United States Department of Commerce.

Sec. 2. As used in this chapter, "federal program" means a federal loan or grant program that promotes economic development.

Sec. 3. As used in this chapter, "fund" refers to the economic development fund established by section 5 of this chapter.

Sec. 4. As used in this chapter, "qualified entity" means the state, a political subdivision of the state, an agency of the state or a political subdivision of the state, a nonprofit corporation, or the Indiana development finance authority established under IC 4-4-10.9 and IC 4-4-11.

Sec. 5. (a) The economic development fund is established within the state treasury. The fund is a revolving fund to provide grants and loans for economic development activities in Indiana for the purposes of this chapter.

(b) The fund consists of appropriations from the general assembly and loan repayments.

(c) The corporation shall administer the fund. The following may be paid from money in the fund:

(1) Expenses of administering the fund.

(2) Nonrecurring administrative expenses incurred to carry out the purposes of this chapter.

(d) Earnings from loans made under this chapter shall be deposited in the fund.

(e) The money in the fund at the end of a state fiscal year does not revert to the state general fund but remains in the fund.

Sec. 6. (a) The treasurer of state shall invest the money in the fund not currently needed to meet the obligations of the fund in the same manner as other public funds may be invested. Interest that accrues from these investments shall be deposited in the fund.

(b) The treasurer of state shall also:

(1) receive cash receipts belonging to the fund, deposit these amounts in the fund, and submit a monthly report to the corporation of these transactions; and

(2) make payments on vouchers authorized by the corporation.

Sec. 7. The auditor of state shall draw warrants on the treasurer of state in payment of properly prepared vouchers signed by the president of the corporation or the president's designee.

Sec. 8. (a) The corporation shall receive grants allocated by a federal program for the purposes specified in section 9(c) of this chapter. Guidelines shall be prepared by the corporation enumerating the qualification procedures for receipt of grants and loans from the fund. These guidelines must be consistent with Indiana law and federal program requirements.

(b) The board, with the approval of the budget agency and the governor, shall allocate parts of the fund for the purposes specified in section 9(c) of this chapter. The corporation shall make allocations on the basis of the need of the qualified entity.

(c) The corporation shall keep complete sets of records showing all transactions by the fund in a manner that enables the corporation to prepare at the end of each fiscal year a complete report for the general assembly. The information in the report must be sufficient to permit a complete review and understanding of the operation and financial condition of the fund. The report must be submitted in electronic format under IC 5-14-6.

Sec. 9. (a) If federal money will not be used in conjunction with

fund money, a qualified entity that wants a grant from the fund must submit an application for the grant to the corporation. The corporation shall review the application and may approve the application if the activities for which the grant money is to be used are activities:

(1) that the qualified entity has statutory authority to perform; and

(2) for which this chapter permits fund money to be used.

(b) When fund money is to be used to match federal money, a qualified entity that wants a grant must submit to the corporation an application for a grant under the federal program. The corporation shall review the application and shall submit the application to the federal agency if the corporation finds that the activities for which the grant money is to be used are activities:

(1) that the qualified entity has statutory authority to perform; and

(2) for which the federal program permits money to be used.

Before submitting an application to the federal agency, the corporation must also approve the completeness and technical accuracy of the qualified entity's application.

(c) Money from the fund and money from a federal program may be used for the following projects:

(1) Public works.

(2) Technical assistance.

(3) Economic adjustment assistance.

(4) Other economic development programs.

(d) If the qualified entity proposes to use its money for a loan program, the application from the qualified entity must contain the conditions under which loans will be made and the interest rate that will be charged.

Sec. 10. (a) A qualified entity may apply to the corporation for a loan from the fund to be used for economic development programs.

(b) An amount loaned to a qualified entity is an obligation of the qualified entity and shall be repaid to the corporation within a time to be fixed by the corporation, not to exceed three (3) years.

(c) The corporation shall determine interest rates for the loans to be made under this section.

(d) Final disbursements of money under this section must be made with the approval of the state board of finance.

(e) If a qualified entity fails to make repayment of money loaned under this section, the amount payable may be:

---

(1) withheld by the auditor of state from money payable to the qualified entity and transferred to the fund; or

(2) recovered in an action by the state on relation of the corporation, prosecuted by the attorney general, in the circuit or superior court of the county in which the qualified entity is located.

21st Century Research and Technology Fund

The Indiana 21st Century Research and Technology Fund was created to stimulate the process of diversifying the State's economy by developing and commercializing advanced technologies in Indiana. The Board, representing most of the academic and commercial sectors of the State, approves awards.

Industrial Development Grant Fund (IDGF)

This grant provides money to local governments for off-site infrastructure projects associated with an expansion of an existing Indiana company or the location of a new facility in Indiana. State funding through the IDGF program must be matched by a combination of local government and company financial support.

Small Business Innovation Research Initiative (SBIR/STTR)

The Small Business Innovation Research (SBIR) — along with its sister program, the Small Business Technology Transfer program (STTR) — are highly competitive and encourage small businesses to explore their technological potential. SBIR/STTR funding is available from 11 participating agencies throughout the United States and focuses on various technological areas.

Tax-exempt Bonds

Private Activity Bonds are often called Industrial Revenue Bonds (IRBs) or Industrial Development Bonds (IDBs) and are issued by state or local governmental entities for the benefit of a private company, usually manufacturers. Interest on the bonds is generally exempt from federal income taxes for investors, which typically results in lower long-term interest rates to the borrower.

Loan Guaranty Program

IEDC can provide a loan guaranty to a lender for the benefit of a high-growth/high-skilled company, manufacturer, rural development project, value-added agricultural enterprise or another type of business that creates or retains a significant number of Hoosier jobs.

Capital Access Program (CAP)

The Capital Access Program (CAP) is a small business credit enhancement program that creates a specific cash reserve fund for the lender to use as additional collateral for loans enrolled in the Program. CAP allows lenders to consider loans that might not meet conventional lending requirements.

Economic Development for a Growing Economy (EDGE) Tax Credit

The Economic Development for a Growing Economy (EDGE) is a refundable tax credit program that rewards companies creating jobs and contributing to the growth of Indiana's economy. EDGE credits are calculated as a percentage of payroll tax withholding for net new Indiana jobs. EDGE credits may be awarded for a period of up to 10 years.

Headquarters Relocation Tax Credit

When a business relocates its corporate headquarters (defined as the location of the principal office of the principal executives) to Indiana, it is entitled to a credit against its state tax liability equal to half of the costs incurred in relocating the headquarters. A company must have a worldwide annual revenue of at least $100 million to qualify.

Hoosier Business Investment Tax Credit (HBITC)

This program encourages capital investment in Indiana by providing a credit against a company's Indiana tax liability. The credit amount is based on a company's qualified capital investment with the final credit amount determined by the Indiana Economic Development Corporation, based on an analysis of the economic benefits of the proposed investment.

Industrial Recovery Tax Credit

The Industrial Recovery tax credit provides an incentive for companies to invest in facilities requiring significant rehabilitation or remodeling expense. After a building has been designated as an industrial recovery site, companies may be eligible for a tax credit calculated as a percentage of qualified rehabilitation expense.

Venture Capital Investment Tax Credit

The Venture Capital Investment Tax Credit was established to improve access to capital to fast growing Indiana companies by providing individual and corporate investors an additional incentive to invest in early stage firms. Investors who provide qualified debt or equity capital to Indiana companies receive a credit against their Indiana income tax liability.

Media Production Sales Tax Exemption

The Media Production Expenditure Tax Credit (MPETC) was established to further grow the Indiana production industry by providing individuals and companies a refundable tax credit of up to 15 percent of the amount spent in Indiana for qualified production expenditures.

Patent Tax Exemption

The Patent Tax Exemption allows certain income derived from qualified patents to be exempt from taxation. The Tax Exemption for Patent-Derived Income defines qualified patents to include only utility patents and plant patents. The total amount of exemptions claimed by a taxpayer in a taxable year may not exceed $5 million.

Certified Tech Parks

The Certified Technology Parks program supports the attraction and growth of high-technology business in Indiana and promotes technology transfer opportunities. Designation as a Certified Tech Park allows for the local recapture of certain state and local tax revenue which can be invested in the development of the park.

Regional Economic Development Partnership Programs

In order to spur further regional economic development initiatives, this program was created to encourage communities to think, plan and act regionally, and to provide additional resource support for regional initiatives. The objective is to build on the work already done to define regional economies, develop regional growth strategies, accelerate effective regional economic development.

• click for more information

Regulatory Ombudsman

The Indiana Economic Development Corporation's regulatory ombudsman assists in the process of obtaining the permits and approvals necessary for a business operation. The ombudsman serves as a liaison between companies, communities, local economic development organizations and regulatory agencies.

Shovel Ready

The Shovel Ready Program is a new state program created to help communities certify sites as "ready for development." Shovel Ready is designed to ultimately help companies locate and develop a property site quickly. This provides a competitive advantage for Indiana and gets Hoosier jobs here faster.

Department of Commerce
Innovation is in our nature.

Appendix A: Commerce Legislation Excerpt

This appendix includes relevant language from EHB2242 (Chapter 565, Laws of 2009), the legislation that directs Commerce to develop this report

Appendix A: Legislation related to the Department of Commerce.

EHB 2242 was passed during the 2009 legislative session.

The bill was originally sponsored by:
Representatives Kenney, Probst, Maxwell, Hunt, Liias, Ormsby, Kelley, Sullivan, Hasegawa, Quall, White and Chase; by request of Governor Gregoire.

Votes on Final Passage:
House 96-1
Senate 47-0 (Senate amended)
House 93-1 (House concurred)

Effective: July 26, 2009

Partial Veto Summary: The Governor vetoed the section that de-codified the State Energy Program statute.

The following information is from the final bill report produced by legislative staff:

Background: The Department of Community, Trade and Economic Development (DCTED) is an executive branch agency that was created in 1994 through the consolidation of the Department of Community Development and the Department of Trade and Economic Development. The DCTED is responsible for promoting community and economic development statewide by (1) assisting communities to increase economic vitality and the quality of citizen's lives, and (2) assisting the state's businesses to maintain and increase economic competitiveness while maintaining a healthy environment.

Summary:
A Department of Commerce (Department) is created. By November 1, 2009, its director must develop a report for the Governor and appropriate legislative committees. This report must include analyses and recommendations for statutory changes that ensure the Department will have: a concise core mission; be aligned with the state's comprehensive economic development plan; be accountable and transparent; leverage state private and federal resources; maximize partnerships and use intermediaries; be focused and flexible in response to changing conditions; and increase local capacity building to respond to opportunities and needs. The report must include recommendations for creating or consolidating programs important to meeting the Department's core mission, as well as recommendations for terminating or transferring programs that are inconsistent with the core mission.

The Director of the Department must collaborate with the Governor's Office, the Office of Financial Management, the Economic Development Commission, and

ten legislative committee chairs and ranking minority members, as well as soliciting input from businesses, employees, economic development practitioners, local governments, planning professionals, community and housing organizations, and other key community and economic development stakeholders. A number of statutory references to the "Department of Community, Trade and Economic Development" are changed to the "Department of Commerce."

Excerpted important sections of the bill codified in Chapter 43.330 RCW:

RCW 43.330.007 Management responsibility. The purpose of this chapter is to establish the broad outline of the structure of the department of commerce, leaving specific details of its internal organization and management to those charged with its administration. This chapter identifies the broad functions and responsibilities of the department and is intended to provide flexibility to the director to reorganize these functions and to make recommendations for changes.

[2009 c 565 § 1; 1993 c 280 § 2.]

RCW 43.330.010 Definitions.

Unless the context clearly requires otherwise, the definitions in this section apply throughout this chapter.

(1) "Associate development organization" means a local economic development nonprofit corporation that is broadly representative of community interests.

(2) "Department" means the department of commerce.

(3) "Director" means the director of the department of commerce.

(4) "Financial institution" means a bank, trust company, mutual savings bank, savings and loan association, or credit union authorized to do business in this state under state or federal law.

(5) "Microenterprise development organization" means a community development corporation, a nonprofit development organization, a nonprofit social services organization or other locally operated nonprofit entity that provides services to low-income entrepreneurs.

(6) "Statewide microenterprise association" means a nonprofit entity with microenterprise development organizations as members that serves as an

intermediary between the department of commerce and local microenterprise development organizations.

[2009 c 565 § 2; 2007 c 322 § 2; 1993 c 280 § 3.]

RCW 43.330.020 Department created. A department of commerce is created. The department shall be vested with all powers and duties established or transferred to it under this chapter and such other powers and duties as may be authorized by law. Unless otherwise specifically provided, the existing responsibilities and functions of the agency programs will continue to be administered in accordance with their implementing legislation.

[2009 c 565 § 3; 1993 c 280 § 4.]

Because Section 4 is temporary it will not be codified into the RCW; here it is reproduced in bill format, as it reads in the final version of EHB 2242:

Sec. 4. A new section is added to chapter 43.330 RCW to read as follows:

(1) The director shall, in collaboration with the office of the governor, the office of financial management, the Washington economic development commission, the chairs and ranking minority members of the community and economic development and trade committee of the house of representatives and the economic development, trade and innovation committee of the senate, and the chairs and ranking members, or their designees, of the ways and means committees of the house of representatives and the senate and the house of representatives capital budget committee, develop a report with analysis and recommendations on statutory changes that would ensure that the department's efforts are efficient, effective, and:

(a) Are organized around a concise core mission and aligned with the state's comprehensive plan for economic development;

(b) Are capable of providing focused and flexible responses to changing economic conditions;

(c) Generate greater local capacity to respond to local opportunities and needs;

(d) Face no administrative barriers to leveraging state resources or procuring private and federal resources;

(e) Maximize results through partnerships and the use of intermediaries; and

(f) Provide transparency and increased accountability to the public, the governor, and the legislature.

(2) The report shall include recommendations for creating or consolidating programs deemed important to meeting the department's core mission and recommendations for terminating or transferring specific programs if they are not consistent with the department's core mission.

(3) In developing the recommendations, the director shall solicit the input of businesses, employees, economic development practitioners, local governments, planning professionals, community and housing organizations, and other key economic and community development stakeholders.

(4) The recommendations must be delivered to the governor and the appropriate legislative committees by November 1, 2009.

Economic Incentive Summaries

In addition to the program responses summarized in the previous section, Washington state has a number of economic programs that provide tax credits, rebates or deferrals. Thirty eight of those incentive programs are summarized below.

Each of these programs is managed by the Washington Department of Revenue. For more information about any of these programs, visit the website at:

http://dor.wa.gov/Content/FindTaxesAndRates/TaxIncentives/IncentivePrograms.aspx

or contact:

Mr. Gary Grossman

The programs are outlined in Table 11 below. For easier access, the incentive programs have been categorized according to the major industry or group benefiting.

Table 11: Economic Incentive Programs

Aerospace

- Reduced B&O Tax Rate for Aerospace Businesses
- Sales & Use Tax Exemption for Aerospace Manufacturers for Computer Hardware/Software/Peripherals
- Aerospace Reduced B&O Rate for FAR Part 145 Repair Stations
- Aerospace B&O Credit for Preproduction Development Expenditures
- B&O Credit for Property/Leasehold Taxes paid on Aerospace Manufacturing Facilities

Aluminum Smelters

- Power & Gas Tax Exemption for Aluminum Smelters
- B&O Tax Credit for Property Tax on Aluminum Smelter
- B&O Tax Credit For State Portion of Sales Tax on Materials Used in Aluminum Smelter
- Reduced B&O Tax Rate for Aluminum Smelting

Anaerobic Digesters

- Sales/Use Tax Exemption for Anaerobic Digesters

Table 11: Economic Incentive Programs (continued)

Biofuels

B&O Tax Deduction for Retail Sales of Biofuels/Alcohol Fuels
Property/Leasehold Tax Exemption for Manufacturers of Biodiesel/Alcohol Fuel, etc
Reduced B&O Tax Rate for Manufacturing Biodiesel/Alcohol Fuel, etc.

Electrolytic Processing

Public Utility Tax Exemption for Power for Electrolytic Processing

Energy Systems and Facilities

Sales/Use Tax Exemption for Energy Generating Facilities
Reduced B&O Tax Rate for Solar Energy System Manufacturers & Wholesalers

Farm and Livestock Uses

Sales/Use Tax Exemption for Farm Fuel Users
Sales/Use Tax Exemption for Livestock Nutrient Management Equipment & Facilities

Food Manufacturing

Sales Tax Deferral/Waiver on Construction of Cold Storage & Certain Food Manufacturing/Processing Facilities
B&O Tax Exemption for Manufacturers of Dairy and Seafood Products
B&O Tax Exemption for Manufacturers of Fresh Fruit & Vegetables

Help Desk Operations

B&O Credit for Third Party Help Desk Services in Rural Counties

International Business

B&O Tax Credit for New Employment in International Services

Machinery and Equipment

Sales/Use Tax Exemption for Replacement Parts for Farm Machinery & Equipment
Sales/Use Tax Exemption for Machinery/Equipment, Delivery Vehicles & Construction of Facilities for Retail Sales of Biofuels

Manufacturing

B&O Credit for New Employees in Manufacturing and Research & Development in Rural County
Rural County Sales & Use Tax Deferral/Waiver for Manufacturing Facilities
Sales and Use Tax Exemption for Manufacturing Machinery & Equipment

Public Utilities

Main Street Tax Credit – B&O Tax/Public Utility Tax Credit

Semiconductors

Sales/Use Tax Exemption for Purchases of Semiconductor Gasses & Chemicals
Reduced B&O Tax Rate for Manufacturers of Semiconductor Materials

COMMITTEE SUBSTITUTE FOR HOUSE BILL 369 (RES)

"An Act relating to an in-state natural gas pipeline, the office of in-state gasline project manager, the Joint In-State Gasline Development Team; and providing for an effective date."

Committee Substitute for House Bill 369(RES) was introduced as an effort to expedite the process for an in-state natural gas pipeline. The in-state gasline has been a topic of discussion in the Legislature and the Administration for a number of years. Currently, there are two separate state entities, the Alaska Natural Gas Development Authority and the in-state gasline coordinator, working on a project. House Bill 369 combines these two entities along with the Department of Transportation and Public Facilities and the Alaska Railroad Corporation to create a Joint In-state Gasline Development Team within the Office of the Governor. The Development Team is to ensure the in-state gasline is construction ready by July 1, 2011 with gas flowing by 2015. It is my hope the Development Team will be able to focus the state's efforts in putting a construction plan together and leverage the best ideas and data to get a gasline built.

The Department of Transportation and Public Facilities and the Alaska Railroad Corporation were included as members of the team due primarily to their having existing rights of way which could speed up any permitting process that may need to be undertaken. The Alaska Railroad Corporation also has bonding ability which could be an answer in financing a gasline.

The Development Team will cover all aspects of the line's development and are to select the most economically sound route that will deliver gas to Alaskans, plan permitting and construction by using existing rights of way and take any action necessary to get the project underway as soon as possible. Additional duties of the Joint Development Gasline Development Team are also spelled out within the legislation.

The bill provides for an expedited review and action process and the sharing of information that may already have been accumulated or completed. The bill also requires that state agencies or entities cooperate with and give priority to requests for information from the Development Team.

SECTIONAL ANALYSIS

COMMITTEE SUBSTITUTE FOR HOUSE BILL 369 (FIN) version LS1527\C

*"An Act relating to an in-state natural gas pipeline, the office of in-state gasline project manager, the Joint In-State Gasline Development Team; **requiring the development of an in-state natural gas pipeline plan, to be delivered to the legislature by July 1, 2011, that provides for a gasline that is operational by December 31, 2015; directing the Joint In-State Gasline Development Team to assume responsibilities under sec. 19, ch. 14, SLA 2009; requiring expedited review and action by state agencies or entities relating to the in-state natural gas pipeline project;** and providing for an effective date."*

(Changes in the House Finance version from the Resources Committee Substitute are highlighted and underlined.)

Section 1: Adds a new chapter, Chapter 34: In-State natural Gas Pipeline, to AS 38, Public Land.

Sec. 38.34.010. In-state gasline project manager. (a) Creates the position of in-state gasline project manager within the governor's Office. This position will continue until one year after commercial operation of the in-state natural gas pipeline begins. (b) The Governor appoints an individual to the position of an in-state gasline manager and may be removed at the Governor's discretion. (c) Describes the duties of the in-state gasline project manager.

Sec. 38.34.020. Expedited review and action by state agencies or entities. (a) States that any state agency **or entity** conducting and taking action relating to the in-state gasline shall be expedited. (b) A state agency **or entity** may not include in any project certificate, right of way, permit or other authorization issued to a licensee a term or condition that is not required by law if the in-state project manager determines the term or condition would prevent or impair the expeditious construction and operation or expansion of the in-state gasline. (c) A state agency **or entity** may not, unless required by law, amend or abrogate any certificate, right of way, permit or other authorization issued to a licensee if the project manager determines the action would prevent or impair the expeditious construction and operation or expansion of the in-state gasline.

Sec. 38.34.030. Joint In-state Gasline Development Team. (a) Establishes the Joint In-State Gasline Development Team in the Governor's Office. The team consists of the commissioner of the Department of Transportation and Public Facilities or designee, the chief executive officer of

Representative_Mike_Chenault@legis.state.ak.us

Copy on file

the Alaska Railroad Corporation **or designee**, the chief executive officer of the Alaska Natural Gas Development Authority, the in-state gasline project manager **and the chief executive officer of the Alaska Housing Finance Corporation**. (b) Names the **Alaska Housing Finance Corporation's chief executive officer** as chair. (c) Allows the development team to hire staff, enter into contracts and exercise other powers to carry out its functions.

Sec. 38.34.040. Duties of the Development Team. (a) Ensure **a project plan for the development** of an in-state gasline is **completed and delivered** to the legislature by July 1, 2011. **The project plan must specify and document how an in-state gasline can be designed, financed, constructed and made operational by December 31, 2015. (b) The Joint In-State Gasline Development Team is to assume all executive authority over and managerial responsibility for all activities enumerated under sec. 19, ch. 14, SLA 2009, including work previously completed, work in process, and work for which money has been encumbered but that is not completed on the effective date of this subsection. (c) Describes specific plans that are to be included within the project plan for an in-state gasline that will serve Fairbanks, the southcentral region of the state, and other communities whenever practicable, connecting with or enhancing the existing gas pipeline system, and reaching to tidewater. (d) The development team's work product is to include an analysis of alternative possible routes and select a route that is consistent with the following requirements:** (1) is the most economical, (2) will provide gas to residents at a reasonable cost, **(3) allows for connecting lines to serve industrial, residential and utility customers along the entire route and in other regions of the state that can be served at commercially feasible rates,** (4) uses state land and existing state highway and railroad rights of way to the maximum extent **feasible**, (5) uses existing highway and railroad bridges, gravel pits equipment yards and maintenance facilities and other existing facilities and resources to the maximum extent feasible. **(e) With the intent that any project-related assets acquired or developed be available for transfer or sale to the entity best able to complete the project, the development team is to:** (1) prepare plans and designs necessary for the construction of the in-state gasline; **(2) coordinate with entities qualified to build, own and operate the gasline; (3) identify, apply for and obtain rights-of-way and other permits for the project route; (4) work with other entities to promote gas supply and purchase contracts required for the project to be commercially viable; (5) prepare cost estimates for project design, construction and operation to determine the project's feasibility and the projected cost of natural gas to consumers; (6) coordinate with and use, to the fullest extent, possible existing work by other state agencies and entities before contracting for new reports and research and analysis; (7) determine regulatory authority over the pipeline project and perform any necessary compliance requirements; (8) identify and apply for, or support extension of, existing permits for export of Alaska natural gas if that export improves project economics and will reduce the price of natural gas to in-state consumers. (f) Any rights to a gasline corridor obtained by a state agency under eminent domain may be transferred to a private entity.** (g) Describes the various aspects of the in-state gasline project the development team may consider.

Sec. 38.34.050. Cooperation and access to information. (a) States the development team may have access to a state entity's information to include confidential information that may relate to the in-state gasline or prove useful in planning, design, construction or operation of the gasline.

Confidential information received by the Development Team shall be kept confidential. (b) All state agencies are to cooperate and give priority to requests for information from the Development Team. The Development Team is to avoid duplicating studies, plans, and designs that have already been produced or otherwise obtained by state entities.

Sec. 38.34.060. Conflicts of interest. (a) If a member of the Development Team acquires, owns or controls a direct or indirect interest in property, an organization or business that might be affected by the in-state gasline project or other matters under consideration by the Development Team shall immediately disclose the interest to the Development Team. This disclosure is part of the public record and shall be included in the minutes of the first meeting of the Development Team held after the disclosure. **(b) Members of the development team are subject to AS 39.50 (Public Official Disclosure) and AS 39.52 (Alaska Executive Branch Ethics Act).**

Sec. 38.34.099. Definitions. Defines the in-state natural gas pipeline and the North Slope.

Section 2: Amends AS 39.25.110, Exempt service. Adds the in-state gasline project manager to the exempt service list.

Section 3: Immediate effective date.

ANALYSIS: *(Attach a separate page if necessary)*

The fiscal impact of CSHB 369 (RES) is indeterminate at this time. Please see attached analysis.

Prepared by: Linda Perez, Director — Phone 465-3876
Division Administrative Services — Date/Time 3/12/10 4:25 PM
Approved by: Bob Swenson, Project Manager — Date 3/12/2010
Office of the Governor

(Revised 11/6/2009 OMB)

copy on file

1744

To ensure that construction may begin on the in-state natural gas pipeline by July 1, 2011 as set out in HB 369 (RES), the in-state gas line project team has identified general work products, materials, and a minimum staffing level needed to direct the work for the project team. The cost associated with contractual services to perform the detailed pipeline engineering will be approximately $350 million; field work, and permitting needed to get the project ready to begin construction by July 1, 2011 is more than $30 million. Costs associated with preconstruction readiness and pipeline materials outlined below is indeterminate at this time. A cost of transportation estimate to provide this information is scheduled to be completed by July 1, 2010. The State's ability to transfer the project to private investors by the construction date is likewise unknown. If unsuccessful, the State may assume liability for costs associated with all construction costs.

PERSONAL SERVICES: 1001.7 - increased to include 6 staff as follows:

Project Manager Rg 26
Engineering Manager Rg 26
Commercial Manager Rg 26
Legislative Liaison/Public Outreach Officer Rg 23
Finance/budget analyst Rg 22
Schedule Coordinator Rg 21

Current 6500.0 operating budget request includes 322.2 for personal services, fiscal note increases total personal services to 1,001.7. Following years include scheduled merit increases for all but professional staff.

TRAVEL: 36.0 – reflects original travel request in FY2011 Governor's budget request.

CONTRACTUAL: Indeterminate
Fiscal Implications of 7/2011 Start of Construction:

During the first construction summer, ROW construction activities would include

- Establishment of construction centerline survey benchmark grid
- Development of material sites and preparation of civil material
- Preparation of laydown areas to accept pipe delivery
- Construction camp : site prep, pad construction and camp module installation
- Note that startup is at the flow of 250 MMscfd –(no intermediate compressor stations are required at this start up flow)

Contractual - continued

To enable this construction start date the fiscal implications to the state in FY 2011:

- Let bid for Design Engineering for Pipeline and Facilities 7/2010 - a commitment of $350 million
- Accelerate additional permits for notice to proceed - a commitment of $30 million
- Ensure completion of major permits by 12/2010. An "Air Quality Permit to Construct" will be required from the ADEC for facilities at either end of the pipeline (EPA allows the ADEC to issue permits because ADEC agrees to adhere to EPA standards). Unknown is whether ADEC would, or could, issue construction permits for the pipeline before "Air Quality Permit to Construct" have been issued for necessary attendant facilities. The data acquisition of 12 months of continuous site specific meteorological data is required to support the air quality application. Even pursuing an aggressive "Fast track" process, it may already be too late to get them by summer of 2011. Unknown
- Line pipe order and facilities material order- minimum is "default" funds commitment. This required commitment could be significant especially if state proceeds without all permits in place. Vendors/suppliers may require a significant "default" commitment considering the scale of the project, that they will have to reserve fabrication infrastructure thereby turning down other clients, and that the project execution approach reasonably be considered high risk. Unknown
- Order construction camps - fabrication and delivery for 2011. Unknown

500.00 for FY2011, 2012 and 2013 for commercial analysis of downstream industrial opportunities; reduced to 200.0 for 2014 thru 2016.

100.0 for public outreach, information dissemination, printing, advertising, postage.

75.3 annual office lease space

SUPPLIES: 25.0 increases FY2011 request to 25.0 for increased staff and fast-track activities.

EQUIPMENT: 77.0 one-time office set-up

Alaska In-State Gas Pipeline Project.
February 24, 2010 - House Finance hearing on gas line funding requests
Robert Swenson, Project Manager

1. **What agencies have done with the money they spent in FY2010?**

Work that is completed to date:

- Route Alternative Analysis – Parks and Richardson Highway routes: Associated comparative pipeline cost estimates; Environmental Surveys
- Initial Project Description (for permitting)
- Commercial Group Scoping
- Initial Review of ENSTAR Capital Cost Estimate – Pipeline
- Major permits applied for: U.S. Army Corps of Engineers Section 404/10, State of Alaska Title 38 Right-of-Way, Bureau of Land Management Right-of-Way

Work currently underway:

- Updating pipeline cost estimates
- Developing cost of facilities
- Cost of transport analysis
- Preparing detailed project description
- Continued engineering support for EIS and ROW process
- Developing data package for economic analysis
- Facilities scenarios identified
- Commercial group market analysis
- Cost of transport analysis

2. **How much additional they have encumbered and for what?** $3,904,496

SECTIONAL ANALYSIS

COMMITTEE SUBSTITUTE FOR HOUSE BILL 369 (RES)

"An Act relating to an in-state natural gas pipeline, the office of in-state gasline project manager, the Joint In-State Gasline Development Team; and providing for an effective date."

Section 1: Adds a new chapter, Chapter 34: In-State natural Gas Pipeline, to AS 38, Public Land.

Sec. 38.34.010. In-state gasline project manager. (a) Creates the position of in-state gasline project manager within the governor's Office. This position will continue until one year after commercial operation of the in-state natural gas pipeline begins. (b) The Governor appoints an individual to the position of an in-state gasline manager and may be removed at the Governor's discretion. (c) Describes the duties of the in-state gasline project manager.

Sec. 38.34.020. Expedited review and action by state agencies. (a) States that any state agency conducting and taking action relating to the in-state gasline shall be expedited. (b) A state agency may not include in any project certificate, right of way, permit or other authorization issued to a licensee a term or condition that is not required by law if the in-state project manager determines the term or condition would prevent or impair the expeditious construction and operation or expansion of the in-state gasline. (c) A state agency may not, unless required by law, amend or abrogate any certificate, right of way, permit or other authorization issued to a licensee if the project manager determines the action would prevent or impair the expeditious construction and operation or expansion of the in-state gasline.

Sec. 38.34.030. Joint In-state Gasline Development Team. (a) Establishes the Joint In-state Gasline Development Team in the Governor's Office. The team consists of the commissioner of the Department of Transportation and Public Facilities or designee, the chief executive officer of the Alaska Railroad Corporation, the chief executive officer of the Alaska Natural Gas Development Authority and the in-state gasline project manager. (b) Names the Alaska Railroad's chief executive officer as chair. (c) Allows the Development Team to hire staff, enter into contracts and exercise other powers to carry out its functions.

Sec. 38.34.040. Duties of the Development Team. (a) Describes the various aspects of the in-state gasline project the Development Team will consider. (b) Ensure construction for an in-state gasline is ready to commence by July 1, 2011 and to take any necessary actions to enable the flow of natural gas down the gasline by 2015. (c) (1) Shall select a route that runs from the

Representative_Mike_Chenault@legis.state.ak.us

North Slope to tidewater that is the most economical, will provide gas to the greatest number of residents at a reasonable cost, uses state land and existing state highway and railroad rights of way to the maximum extent, use existing highway and railroad bridges, gravel pits equipment yards and maintenance facilities and other existing facilities and resources to the maximum extent possible; (2) identify land or rights of way that must be obtained for construction and operation of the in-state gasline and take necessary action to enable DOT/PF to acquire those interests; (3) prepare plans and designs necessary for the construction of the in-state gasline; (4) identify all permits and applications needed to construct the in-state gasline and proceed with applications for those permits and licenses; (5) prepare and update estimates of construction and other costs of construction; and (6) take any necessary action so that construction of the in-state gasline may begin by July 1, 2011, and report to the legislature by that date.

Sec. 38.34.050. Cooperation and access to information. (a) States the Development Team may have access to a state entity's information to include confidential information that may relate to the in-state gasline or prove useful in planning, design, construction or operation of the gasline. Confidential information received by the Development Team shall be kept confidential. (b) All state agencies are to cooperate and give priority to requests for information from the Development Team. The Development Team is to avoid duplicating studies, plans, and designs that have already been produced or otherwise obtained by state entities.

Sec. 38.34.060. Conflicts of interest. If a member of the Development Team acquires, owns or controls a direct or indirect interest in property, an organization or business that might be affected by the in-state gasline project or other matters under consideration by the Development Team shall immediately disclose the interest to the Development Team. This disclosure is part of the public record and shall be included in the minutes of the first meeting of the Development Team held after the disclosure.

Sec. 38.34.099. Definitions. Defines the in-state natural gas pipeline and the North Slope.

Section 2: Amends AS 39.25.110, Exempt service. Adds the in-state gasline project manager to the exempt service list.

Section 3: Immediate effective date.

ANALYSIS: *(Attach a separate page if necessa*

The bill establishes a joint in-state Gasline Development Committee consisting of the commissioner of DOTPF, the CEO of the Alaska Railroad Corporation, the CEO of the Alaska Natural Gas Development Authority, and the in-state gasline project manager (also created in this bill). The legislation provides this committee the authority to manage and develop an in-state gasline, mandates construction to begin by July 1, 2011, and authorizes any action that would enable gas to flow down the pipeline by 2015. While the joint in-state Gasline Development Committee is granted broad powers and authorities under the bill certain basic functions must still be performed by MLW.

FISCAL NOTE

STATE OF ALASKA **BILL NO.** CSHB 369 (RES)
2010 LEGISLATIVE SESSION

ANALYSIS CONTINUATION

In the preparation of this fiscal note certain assumptions have been made:

1) that DNR/DMLW will be required to prepare a title report regarding state owned lands in the pipeline ROW,
2) that DNR will not be required to transfer title to any state lands to DOT/PF,
3) that DOT/PF will be responsible for all title or ROW acquisitions from entities other that DNR managed state lands including lands owned by private persons, boroughs, ANCSA corporations, native allotments, and the federal government,
4) that DNR/DMLW will review and approve all land surveys associated with granting an in-state gasline ROW and developing an in-state gasline across state land,
5) DNR DMLW will participate in the ROW planning effort to some degree across state land, the review of the AS 38.35 R/W lease to be prepared.by SPCO for issuance to DOT/PF, and the ACMP review of the ROW, and
6) SPCO will issue AS 38.35 ROW accross state lands to DOT/PF.

The costs to DMLW would include expenses related to preparation of the land title report and preparing and reviewing land transfer documents, executing material sales and reviewing land and project surveys in an expedited manner by July 1, 2011. It should also be noted that focusing DNR's time and resources on such a high priority, short deadline project as conceived in this legislation would significantly impact and curtail DLWM's abilities to perform its other statutorily required functions. These costs are high in part due to the extremely tight time frames set out in the bill.

PERSONAL SERVICES COST - $465.7 total (for 12 months)

LAND TITLE ACTIONS
Four positions Anchorage; for land title review and report preparation and document review and processing.
-three Natural Resource Specialist (NRS) III (range 18) - total 6 months each at $7.24/month= $130.32
-one Natural Resource Specialist (NRS) II (range 16) - - total 6 months each at $6.40/month = $38.4

$168.72 for FY 11 Total

LAND SURVEY REVIEW
Two positions Anchorage; for reviewing land and project surveys .
-Two land surveyor II (LS) III (range 22) - 1 year each at $109.1/year

$218.2 for FY 11 Total

MATERIAL SALES
Two positions; for preparing and executing material sales for use in pipeline R/W.
- One Natural Resource Specialist (NRS) III (range 18) - total 12 months at $89.2/year for Northern Region Office Fairbanks = $89.2
- OneNatural Resource Specialist (NRS) III (range 18) - total 12 months at $86.4/year for SouthCentral Region Office Anchorage = $86.4

$175.6 for FY 11 Total

Cont.

FISCAL NOTE

STATE OF ALASKA **BILL NO.** CSHB 369 (RES)
2010 LEGISLATIVE SESSION

ANALYSIS CONTINUATION

PROJECT REVIEWS
One position; to participate in the R/W planning effort, the review of the AS 38.35 ROW lease , and the ACMP review of the R/W.
- One Natural Resource Specialist (NRS) III (range 18) - total 8 months each at $86.4/year for SouthCentral Region Office Anchorage = $57.6

$86.4 for FY 11 Total

TRAVEL, CONTRACTUAL, SUPPLIES - $143.0 total (for 12 positions)
Travel would be for land survey review purposes, preparation of material sales, and planning, ROW and ACMP review. $35.0 in FY11

Other contractual costs include $52.0 for office space, telephones, core service charges and related expenses for the new positions in FY11 at a rate of $5.2 per new position.

Supplies are budgeted at $38.0 per year FY11, and includes one-time start-up costs for new computers and office equipment of $3.8 per each new position.

(Revised 11/6/2009 OMB)

Office of Governor FY11: 8,053.7 plus 2,599.6 additional contractual for RSA needs for a total request of 10,653.3.

To ensure that an in-state natural gas pipeline plan is delivered to the legislature by July 1, 2011 as set out in HB 369 (FIN), the in-state gas line project team has identified general work products, materials, and a minimum staffing level needed to direct the work for the project team. The cost associated with contractual services to perform environmental work and support of permitting, cost of service analysis, continued refinement of pipeline engineering, and development and management of development plan in FY11 will be approximately $6.5 million. A cost of transportation estimate to provide pipeline and facility costs are scheduled to be completed by July 1, 2010, which will provide partial data for cost of service models. These costs will help determine commercial viability of a pipeline. The additional $2.6 million is for RSA monies to agencies duties outlined below.

OFFICE OF THE GOVERNOR:

PERSONAL SERVICES: 1,095.2 - increased to include 7 staff for first year as follows:
Project Manager Rg 26
Engineering Manager Rg 26
Commercial Manager Rg 26
Legislative Liaison/Public Outreach Officer Rg 23
Finance/budget analyst Rg 22
Schedule Coordinator Rg 21
Technical Writer Rg 19 (first year only)

Current 6500.0 operating budget request includes 322.2 for personal services. Fiscal note increases total personal services to 1,095.2 for 7 staff in first year. Following years reduce staff to 6 and include scheduled merit increases for all but professional staff.

TRAVEL: 36.0 – reflects original travel request in FY2011 Governor's budget request.

CONTRACTUAL: 6,809.2 + 2,599.6 (Total 9,408.8)
Current 6500.0 operating budget request includes 6,130.0 for contractual. Fiscal note increases contractual to include commercial analysis of downstream industrial opportunities, public outreach and information dissemination, and annual lease space for 7 staff during the first year. Second and subsequent fiscal year contractual costs are indeterminate.

500.00 for FY2011, 2012 and 2013 for commercial analysis of downstream industrial opportunities; reduced to 200.0 for 2014 thru 2016.

Contractual (continued)

100.0 for public outreach, information dissemination, printing, advertising, postage.

79.2 first year office lease space – reduces to 75.3 for second and subsequent years

2599.6 RSA funding requirements – see below

SUPPLIES: 29.0 increases FY2011 operating budget request to 29.0 for increased staff and fast-track activities, reducing to 25.0 for second and subsequent years.

EQUIPMENT: 84.3 one-time office set-up.

Office of Governor FY12 & Beyond: Contractual; Indeterminate
Fiscal responsibility for FY12 and beyond is indeterminate at this time. These costs may include preconstruction engineering, procurement of natural gas, purchase of ENSTAR Bullet Line data package, potential application for extension of LNG export license, and other engineering and commercial activities that provide for a gasline that is operational by December 31, 2015. The State's ability to transfer the project to private investors is likewise unknown. If unsuccessful, the State may assume liability for a portion, or all of the construction costs. These costs will depend on what is determined and approved from the development plan, if anything, and could range from tens of millions to over 5 billion dollars, depending on the level of participation by the State.

Breakdown of RSAs to state agencies: 2599.6 as follows:

AHFC FY11: 500.0

This fiscal note is an estimate of what funds would be necessary for the Alaska Housing Finance Corporation should House Bill 369 become law. The preparation of a comprehensive financing plan would be completed once cost estimates for the project are available.
Contractual services will consist of Financial Advisors and legal counsel.
FY12: 0

DEC FY11: 121.1

The Department of Environmental Conservation (DEC) fiscal note reflects a project coordinator to be located in the Office of the Commissioner to coordinate with the joint in-state pipeline development team in evaluation of necessary environmental permitting, environmental impact statement review, Alaska Coastal Management

DEC (continued)

Program coordination, as well as compliance and enforcement activities for an in-state natural gas pipeline.

FY12+: Indeterminate

The costs of the environmental permitting for pipeline construction is indeterminate at this time, this fiscal note does not account for any permitting activities that may occur after the in-state pipeline plan is submitted to the legislature by July 1, 2011.

DOR FY11: 1000.0

Travel **50.0**
Contractual **950.0**
Department of Revenue working as part of the development team with experienced contractors and contractor firms to execute major elements of the assigned tasks.

1. Identify opportunities for delivering North Slope gas to rural & maritime Alaska
2. Identify and negotiate with potential gas suppliers and potential gas consumers
3. Develop pro-forma financials for the project
4. Develop a partnering agreement with a pipeline company
5. Provide a design, construction schedule, and cost estimate for an LNG plant
6. Develop and execute a public information and outreach plan

DOT FY11: 610.8 plus 367.7 for DNR State Pipeline Coordinators Office

The Department is a member of the joint pipeline development team and is the applicant for the right-of-way (ROW). A Engineer V will serve as the technical expert for the commissioner and as the technical lead for the Department's responsibilities. As the applicant for the ROW, a ROW agent will coordinate the ROW portions of the plan, providing the technical expertise to assist in determining the intricacies associated with potential routes, and will start initial coordination with utilities that are currently in the ROW. An environmental impact analysis manager will oversee and provide technical expertise for the environmental impacts and permits needed for activities in the department's ROW. Additional, costs are for

Personnel Services **418.7**
Travel **45.0**
Contractual **87.1**
Supplies **60.0**

ADDITONAL CONTRACTUAL FOR DOT: 367.7 needed for interagency funding to DNR State Pipeline Coordinators Office to be used by DNR as detailed below.

DOT FY12 +: Indeterminate
The costs for activities after the plan is submitted on July 1, 2011 are undetermined at this time.

(DNR FY11): 367.7

All State Pipeline Coordinator Office (SPCO) costs associated with the right-of-way permitting process, preparation of the Commissioner's Analysis, Proposed Decision and Action, construction oversight, and operational oversight are reimbursable pursuant to AS 38.35.140(b). Costs reflected in this fiscal note are reimbursable under AS38.35.140(b). Positions and efforts identified for SPCO work will utilize existing positions to the greatest extent possible. If additional SPCO or MLW positions are necessary they will be established as Long Term Non-Perm positions.

In the preparation of this fiscal note certain assumptions have been made:
State Pipeline Coordinators Office (SPCO)
1) Participating state agencies (ADF&G, ADEC, etc.) will provide separate fiscal notes, although their costs associated with permitting the right-of-way may be reimbursable by the applicant through the SPCO.

DNR (continued)

2) The right-of-way lease applicant, pursuant to AS 38.35. 140(b), will reimburse DNR's (and other participating state agencies as well) work associated with delivery of a right-of-way lease.
3) DLMW has completed a separate fiscal note, however portions of their costs may be reimbursable by the applicant through the SPCO.
4) Existing Program Receipt Authority will be used for the project.
5) DGGS cost estimate assumes that the state needs to understand the geohazards to ensure the applicant has identified and considered all geologic hazards along the route.
6) Construction and operational oversight begins in FY2012 and FY2014, respectively. The cost estimate for these activities is for DNR only and does not include estimates for other state agencies (ADF&G, ADEC, etc.), although their costs may be reimbursable by the applicant through the SPCO.
7) Assume SPCO will administer material sites after initial sale.
8) Assume a two-year construction schedule segregated into four geographic areas.

FY2011 costs to DNR/SPCO would include expenses to support the duties of the development team in preparing the project plan and the Analyses necessary to prepare project applications, supporting documentation, and the preparation for an expedited state review of the proposed actions. Costs for FY2011 do not include any expenses towards processing a right-of-way lease applications. Expenses associated with the right-of-way permitting process are projected to start in FY2012.

FY2011 PERSONAL SERVICES COST - $ 200.3 total (for 12 months)

BREAKDOWN of DNR FY11 costs

1- STATE PIPELINE COORDINATOR'S OFFICE
Positions in Anchorage; for preparing the project plan and analyses.
- one State Pipeline Coordinator (SPC) (range 26) - total 1 month at $9.7/month = $9.7
- one Natural Resource Specialist (NRS) III (range 18)- total 3 months/yr at 7.31/month = $21.93
-one Natural Resource Manager (NRM) II (range 20) - total 1 month at $9.41/month = $9.41
-one Engineer IV (range 27) - total 3 months at 13.70/month = $41.1
- Administrative Support - total = $8.20
$90.34 for **FY 11 Total**

2- OFFICE OF PROJECT MANAGEMENT AND PERMITTING
Position in Anchorage; for coordination of a project Health Impact Assessment.
- Natural Resource Specialist (NRS) III (range 18) - total = $10.0
$10.0 for **FY 11 Total**

DNR (continued)

3 - DIVISION OF COASTAL AND OCEAN MANAGEMENT
One position in Anchorage; for conducting the project Alaska Coastal Management Program process.
-one Natural Resource Specialist (NRS) III (range 18)-
total 1 month at 7.31/month = $7.31
$7.31 for FY 11 Total

3- STATE HISTORIC PRESERVATION OFFICE
Position in Anchorage; for review and monitoring the cultural resource project program. - one Archeologist = $20.0
$20.0 for **FY 11 Total**

4- DIVISION OF GEOLOGICAL AND GEOPHYSICAL SURVEYS
Positions in Fairbanks; for management of geohazards project related studies and review of existing information.
- one Geologist IV (range 21) - total 4 months = $35.80
- one LTNP Geologist III (range 19) - total 4 months = $25.52
- one Graduate Intern - total 4 months = $11.32
$72.64 for **FY 11 Total**

TRAVEL, CONTRACTUAL, SUPPLIES - $70.0 total for FY11
Travel, contractual, and supplies to support the duties of the development team in preparing the project plan and the Analyses necessary to prepare project applications, supporting documentation, and the preparation for an expedited state review of the proposed actions.
Other miscellaneous, contractual and supply costs include office space, telephones, core service charges and related expenses.

5- DIVISION OF MINING LAND & WATER
Assumptions
1) that DNR/DMLW will be required to prepare a title report regarding state owned lands in the pipeline ROW,
2) that DNR will not be required to transfer title to any state lands to DOT/PF,
3) that DOT/PF will be responsible for all title or ROW acquisitions from entities other that DNR managed state lands including lands owned by private persons, boroughs, ANCSA corporations, native allotments, and the federal government,
4) that DNR/DMLW will review and approve all land surveys associated with granting an in-state gasline ROW and developing an in-state gasline across state land,

DNR (continued)

5) DNR DMLW will participate in the ROW planning effort to some degree across state land, the review of the
AS 38.35 R/W lease to be prepared by SPCO for issuance to DOT/PF, and the ACMP review of the ROW, and
6) SPCO will issue AS 38.35 ROW accross state lands to DOT/PF.
The costs to DMLW would include expenses during FY 11 for providing assistance during the development teams planning efforts and preapplication meetings

PERSONAL SERVICES COST - $86.4 total (for 12 months in FY11)
One Natural Resource Specialist (NRS) III (range 18) - total 12 months at $86.4/year for assistance with the planning effort and preparation for the authorization work in FY12.
TRAVEL, CONTRACTUAL, SUPPLIES - $2.0 total
Travel would be for planning and public meetings. $2.0 in FY11
Other contractual costs include $5.2 for office space, telephones, core service charges and related
expenses for the new positions in FY11.
Supplies are budgeted at $3.8 for FY11, and includes one-time start-up costs for new computers and office equipment .

DNR FY12 & Beyond

The FY2012 costs to DNR/SPCO would include expenses to coordinate the participation of state agencies in the right-of-way permitting process, prepare the Commissioner's Analysis, Proposed Decision and Action, develop the draft lease and, if necessary, hold public hearings. In addition the costs include right-of-way permitting expenses for the participation of the State Historic Preservation Office (SHPO), Division of Coastal and Ocean Management (DCOM), Office of Project Management and Permitting (OPMP) and the Division of Geological and Geophysical and Surveys (DGGS). It should be noted that the proposed schedule is aggressive and in order to meet the specified timeline the right-of-way permitting process will need to be conducted independent of the federal NEPA process. The FY2012 and 13 costs reflect construction oversight activities by DNR. Operational oversight costs begin in FY2014 and continue forward.

FY2012 PERSONAL SERVICES COST - $ 522.42 total (for 12 months)

DNR (continued)

Breakdown of DNR FY12 and beyond.

STATE PIPELINE COORDINATOR'S OFFICE

Positions in Anchorage; for completing the right-of-way leasing process.
-one Natural Resource Specialist (NRS) IV (range 21) - total 10 months at $9.95/month= $99.50
-one Natural Resource Manager (NRM) II (range 20) - total 1 month at $9.41/month = $9.41
-one Natural Resource Specialist (NRS) III (range 18)- total 6 months at 7.31/month = $43.86
-one Engineer IV (range 27) - total 3 months at 13.70/month = $41.1
-Administrative Support - total = $38.77
$232.64 for **FY 12 Total**
Positions in Anchorage; for construction oversight.
- two Natural Resource Specialist (NRS) III (range 18)- total 6 months/yr at 7.31/month = $87.72
- one Natural Resource Manager (NRM) II (range 20) - total 1 month at $9.41/month = $9.41
- one Engineer IV (range 27) - total 2 months at 13.70/month = $27.4
- Administrative Support - total = $24.9
$149.43 for **FY 13 and 14**
Positions in Anchorage; for operational oversight.
- one Natural Resource Specialist (NRS) III (range 18)- total 4 months/yr at 7.31/month = $29.24
- one Natural Resource Manager (NRM) II (range 20) - total 1 month at $9.41/month = $9.41
-one Engineer IV (range 27) - total 1 months at 13.70/month = $13.70
- Administrative Support - total = $10.47
$62.82 for **FY15 Forward**

STATE HISTORIC PRESERVATION OFFICE
Position in Anchorage; for review and monitoring the cultural resource project program.
- one Archeologist = $20.0
$20.0 for **FY 12 Total**
Positions in Anchorage; for construction oversight.
- one Archeologist = $20.0
$20.0 for **FY 13 and 14 Totals**

DIVISION OF GEOLOGICAL AND GEOPHYSICAL SURVEYS
Positions in Fairbanks; for management of geohazards project related studies and review of existing information.
- one Geologist IV (range 21) - total 12 months = $107.4
- one LTNP Geologist III (range 19) - total 12 months = $76.45
- one Graduate Intern - total 12 months = $34.0
$217.85 for **FY 12 Total**

DNR (continued)

OFFICE OF PROJECT MANAGEMENT AND PERMITTING
Position in Anchorage; for coordination of a project Health Impact Assessment.
- Natural Resource Specialist (NRS) III (range 18) - total = $30.0
$30.0 for **FY 12 Total**

DIVISION OF COASTAL AND OCEAN MANAGEMENT
One position in Anchorage; for conducting the project Alaska Coastal Management Program process.
-one Natural Resource Specialist (NRS) III (range 18)- total 3 months at 7.31/month = $21.93
$21.93 for **FY 12 Total**

TRAVEL, CONTRACTUAL, SUPPLIES - $322.2 total for FY 12
Travel would be for public meeting, public hearings, agency coordination and monitoring of contractors performing field work. In addition, DGGS will require travel to complete field studies. **$30.0 in FY12**
Contractual costs include helicopter support for DGGS studies, office space, telephones, core service charges and related
Miscellaneous costs include aerial photos, satellite imagery, field supplies a and maps.
Other miscellaneous, contractual and supply costs include office space, telephones, core service charges and related expenses.
TRAVEL, CONTRACTUAL, SUPPLIES - $70.0 total for FY 13 and 14
TRAVEL, CONTRACTUAL, SUPPLIES - $10.0 total for FY 15 Forward

DIVISION OF MINING LAND& WATER, FY12
PERSONAL SERVICES COST - $465.7 total (for 12 months in FY12)
LAND TITLE ACTIONS
Four positions Anchorage; for land title review and report preparation and document review and processing.
-three Natural Resource Specialist (NRS) III (range 18) - total 6 months each at $7.24/month= $130.32
-one Natural Resource Specialist (NRS) II (range 16) - - total 6 months each at $6.40/month = $38.4
$168.72 for **FY 12 Total**
LAND SURVEY REVIEW
Two positions Anchorage; for reviewing land and project surveys .
-Two land surveyor II (LS) III (range 22) - 1 year each at $109.1/year
$218.2 for **FY 12 Total**

DNR (continued)

MATERIAL SALES
Two positions; for preparing and executing material sales for use in pipeline R/W.
- One Natural Resource Specialist (NRS) III (range 18) - total 12 months at $89.2/year for Northern Region Office Fairbanks = $89.2
- OneNatural Resource Specialist (NRS) III (range 18) - total 12 months at $86.4/year for SouthCentral Region Office Anchorage = $86.4
$175.6 for **FY 12 Total**

PROJECT REVIEWS
One position; to participate in the R/W planning effort, the review of the AS 38.35 ROW lease , and the ACMP review of the R/W.
- One Natural Resource Specialist (NRS) III (range 18) - total 8 months each at $86.4/year for SouthCentral Region Office Anchorage = $57.6
$86.4 for **FY 12 Total**

TRAVEL, CONTRACTUAL, SUPPLIES - $143.0 total (for 12 positions)
Travel would be for land survey review purposes, preparation of material sales, and planning, ROW and ACMP review. $35.0 in FY12
Other contractual costs include $52.0 for office space, telephones, core service charges and related
expenses for the new positions in FY12 at a rate of $5.2 per new position.
Supplies are budgeted at $38.0 per year FY12, and includes one-time start-up costs for new computers and office equipment of $3.8 per each new position.

HOUSE BILL 369 CHANGES ADOPTED BY THE HOUSE RESOURCES COMMITTEE

Page 1, Line 13: Places the in-state gasline project manager under exempt service (AS 39.25.110) rather than partially exempt service (AS 39.25.120). Most of the Governor's Office personnel are covered under exempt service.

Page 2, line 9: Further defined the reporting duties of the in-state gasline project manager.

Page 3, line 11: Added duties that were originally to be carried out by the In-State Gasline Steering Committee to the list of duties to be considered by the Joint In-state Gasline Development Team. (Under subsection a).

Page 3, line 30: Deleted "to the greatest number of residents". This deletion was adopted to allow the Joint In-state Gasline Development Team to pick the route upon which they determined was the most economical along with other criteria outlined in subsection (b). The Parks Highway route would probably serve the greatest number of residents but it was decided that the team should be able to consider all route options without the legislation directing them to choose the Parks Highway route.

Page 4, line 24: Added "except for requests from the Alaska Gasline Inducement Act coordinator". This was adopted so that neither the AGIA project nor the Joint In-state Gasline Development Team project was given priority over the other when requesting information from state agencies and/or state entities.

The sections establishing the In-state Gasline Steering Committee, duties of the steering committee, and conflicts of interest and ethics for members of the In-state Gasline Steering Committee were deleted.

Page 5, line 9: The in-state gasline project manager is placed under the exempt service statutes (AS 39.25.110) instead of the partially exempt service statutes (AS 39.25.120).

Submitted by Representative Chenault's Office 3/12/10

MEMORANDUM

State of Alaska

Mike Ford, Legislative Liaison, LAW

CONFIDENTIAL: Attorney/Client Privilege
March 3, 2010

HB 369
Version 26-LS1527\R

An Act relating to an in-state natural gas pipeline, the office of in-state gasline project manager, the Joint In-State Gasline Development Team, and the In-State Gasline Steering Committee, and providing for an effective date.

The bill adds to Title 38, a new Chapter 34 titled "In-State Natural Gas Pipeline."

Section 1.

Sec. 38.34.010. Creates the exempt position of in-state gasline project manager in the Office of the Governor. The manager is appointed by the governor and may be removed at the discretion of the governor. The manager shall collaborate with other state agencies to plan and work on the in-state gas pipeline project under this chapter and coordinate with government agencies and the private sector. The manager shall submit written monthly progress reports to the legislature.

> Comment: Proposed AS 38.34.010(c)(3) should set a date for the submission of monthly reports to the legislature. Proposed AS 38.34.010(c)(3) could also provide further guidance on the form, format, and contents of the monthly reports.
>
> On page 1, line 7 change "manger" to "manager."

Sec. 38.34.020(a). State agencies are required to expedite their reviews and actions relating to the in-state pipeline project "consistent with the timely completion of the project."

> Comment: "Timely completion" is not defined. "Timely completion" could be re-written to match proposed AS 38.34.040, which states that construction on an in-state gas pipeline should begin by July 1, 2011 and that natural gas should flow by 2015.

Sec. 38.34.020(b), (c). Requires that state agencies not include in any authorization any term or condition not required by law that the in-state gasline project manager determines would significantly prevent or impair the expeditious construction and operation or expansion of the in-state natural gas pipeline project.

> Comment: Proposed AS 38.34.020(b) and (c) include references to "the licensee," which is not defined in this legislation; the language in proposed AS 38.34.020(b) and (c) is almost the same as the language used in AS 43.90.260 (AGIA).
>
> The language in proposed AS 38.34.020(b) and (c) may limit the commissioner of natural resource's ability to include terms and conditions in an AS 38.35 right-of-way lease that would protect the environment and the public interest. *See* AS

1767

38.35.120(c), (d). The language in proposed AS 38.34.020(b) and (c) may limit the Regulatory Commission of Alaska's ability to place terms and conditions in a certificate of public conveyance and necessity that would protect the environment and the public interest. *See* AS 42.06.240(d).

Sec. 38.34.030. Establishes in the office of the governor, the Joint In-state Gasline Development Team, consisting of the department of transportation and public facilities commissioner, the Alaska Railroad CEO, the ANGDA CEO and the in-state gasline project manager.

Comment: AS 41.41.070 states that the ANGDA board "may" employ a CEO. Because it is possible that the ANGDA may not employ a CEO, the language of proposed AS 38.34.030(a)(3) should state "a designee of the Alaska Natural Gas Development Authority." AS 42.40.110 states that the ARR board appoints and sets the compensation for the ARR CEO. Because the department of transportation and public facilities commissioner is a statutory member of the ARR board, a conflict between the ARR CEO and the department of transportation and public facilities commissioner may exist.

Sec. 38.34.040(a). Duties of the development team include ensuring that construction is ready to begin on an in-state natural gas pipeline by July 1, 2011, and take action necessary to enable gas flow down the pipeline by 2015.

Comment: Because some permitting statutes set out specific timelines for public notice and hearings, a July 1, 2011 construction start date may not be feasible. *See e.g.*, AS 38.35.080.

Sec. 38.34.040(b). The team is charged with selecting the pipeline route, identifying lands or rights-of-way that need to be obtained, and take the action necessary to enable the department of transportation and public facilities to acquire those interests. The team is also charged with identifying and applying for all permits and licenses needed to construct the project.

Comment: This requirement puts the state in the position of both sovereign and applicant, including having a team member that is the commissioner of an agency that may be reviewing permits. Proposed AS 38.34.040(b)(2) states that the team shall select a route that is the most "economical." The term "economical" should be further defined: economical to operate versus economical to construct.

Sec. 38.34.040(b)(6). The team shall take "any action" necessary so that construction may begin on the instate pipeline by July 1, 2011. Proposed AS 38.34.040(b)(6) also requires a report to the legislature by July 1, 2011.

Comment: What does it mean that this team can take "any action?" Because the introduction to proposed AS 38.34.040(b)(6) does not state "notwithstanding any other provision of law," any actions taken by the team must be consistent with all

other laws. Taking action consistent with other laws may make the July 1, 2011 construction start date unrealistic. Is the report intended to be in addition to the report required under proposed AS 38.34.010(c)(3)?

Sec. 38.34.050. Gives the development team access to information of a state entity, including confidential information related to the pipeline. Confidential information received by the team shall be kept confidential.

Comment: This provision likely violates Article 1, sec. 1 of the Alaska Constitution (right to rewards of industry) and Article 1, sec. 15 of the Alaska Constitution ("No law impairing the obligation of contracts . . .. shall be passed"). Art. 1, sec. 1 would likely be held by a court to be violated if the development team used confidential information to its benefit without compensating the owner of the confidential information. Art. 1, sec. 15 would likely be held by a court to be violated if the development team gains access to information that a state agency has a contractual obligation to keep confidential. Because proposed AS 38.34.050(b) states "the development team shall avoid duplicating studies, plans, and designs that have already been produced or otherwise obtained by state entities," the possibility of a constitutional violation is more than hypothetical. A policy consideration: By simply submitting proprietary information to a state agency, should the submitter face (absent a compelling reason) the loss of the information's commercial value or be subject to a competitive disadvantage?

Sec. 38.34.060. Requires that a member of the development team disclose any interest that might be affected by the pipeline project or other matter under consideration by the team.

Comment: Sec. 38.34.060 is similar to AS 41.41.090(b) (ANGDA conflicts of interest). But, unlike AS 41.41.090, Sec. 38.34.060 does not explicitly state that AS 39.50 (Public Official Financial Disclosure) applies to the team. Policy consideration: should this section explicitly state that AS 39.50 and AS 39.52 (Alaska Executive Branch Ethics Act) apply to the team?

Sec. 38.34.070. Establishes the "In-state Gasline Steering Committee" in the office of the governor.

Comment: Because this provision requires the president of the senate and the speaker of the house to serve on the steering committee, this provision may violate the separation of powers doctrine and Article II, sec. 5 of the Alaska Constitution ("No legislator may hold any other office or position of profit under the United States or the state."). The purpose of Artcle II, sec. 5 is "to guard against conflicts of interest, self aggrandizement, concentration of power, and dilution of separation of powers." *Begich v. Jefferson*, 441 P.2d 27, 35 (Alaska 1968). Whether a legislator can serve on the committee depends upon whether the service may occasion the prohibited result: "conflicts of interest, self aggrandizement, concentration of power, and dilution of separation of powers."

Proposed AS 38.34.070(b) states that the steering committee members listed in AS 38.34.070(a)(9) shall not receive compensation. Is the intent to compensate the members listed in AS 38.34.070(a)(1) - (8)?

Sec. 38.34.080. Duties of the steering committee include consideration of all aspects of the in-state natural gas pipeline project and reporting its conclusions and recommendations to the gasline development team.

Sec. 38.34.090. Requires that a member of the steering committee disclose any interest that might be affected by the pipeline project or other matter under consideration by the team. Exempts certain individuals on the committee from the executive branch ethics act.

Comment: The blanket exemption from the Alaska Executive Branch Ethic Act may be problematic. Is the exemption for all work as a public servant? The language needs further definition.

Sec. 38.34.100. Defines "in-state natural gas pipeline," and "North Slope."

Section 2. Adds the in-state gasline project manager to the list of partially exempt service positions in AS 39.25.120(c).

Section 3. Immediate effective date.

MEMORANDUM

State of Alaska

Department of Law

TO: Pat Galvin
Commissioner
Dept. of Natural Resources

DATE: April 7, 2009

FILE NO.: 661-09-0121

TEL. NO.: 269-5211

SUBJECT: Review of Authority to Seek Professional Services forms submitted by ANGDA

FROM: Lisa Weissler
Larry Ostrovsky
Assistant Attorneys General
Oil, Gas & Mining

You asked us to review several proposed contracts that ANGDA submitted to the Department of Revenue for approval. In particular, you asked whether those contracts are consistent with ANGDA's statutory framework.

Short answer

Our review of the "Authority to Seek Professional Services" forms supplied by your administrative director, as well as a cost recovery agreement between ANGDA and the BLM concludes that these agreements are within the scope of ANGDA's authority.

Background

ANGDA was created in 2002 by voter initiative and codified in Title 41.

Title 41 sets out a broad list of purposes for the Authority, but appears to contain some internal inconsistencies, or at least ambiguities.

AS 41.41.010 sets out the overarching purpose of ANGDA - to bring natural gas from the North Slope to market. Subsumed within that broader purpose are the specific services and functions provided by ANGDA, such as acquiring North Slope natural gas; designing and constructing a pipeline system; designing, constructing and operating other facilities necessary for delivering "the gas" – presumably this article refers to North Slope gas -- to market and to Southcentral Alaska; and acquiring a natural gas share sufficient to ensure the long-term feasibility of the pipeline system.

By comparison, AS 41.41.200 (7) gives the Authority the power to issue bonds or incur indebtedness to pay for the costs of a "project." "Project," in turn, is defined somewhat more narrowly than the purpose described above:

> "[P]roject" means the gas transmission pipeline, together with all related property and facilities, to extend from the Prudhoe Bay area on the North Slope of Alaska either to tidewater at a point on Prince William Sound and the spur line from Glennallen to the Southcentral gas distribution grid or to tidewater at a point on Cook Inlet, and includes planning, design, and construction of the pipeline and facilities as described in AS 41.41.010 (a)(1) - (5). AS 41.41.990 (3).

AS 41.41.070(d) provides broad authority to ANGDA to "contract for and engage the services of bond counsel, consultants, experts, and financial advisors the authority considered necessary for the purpose of developing information, furnishing advice, or conducting studies, investigations, hearings, or other proceedings."

Finally, ANGDA is given the power "in furtherance of its corporate purpose" to "make and execute contracts and other instruments" without any limiting language as to the project. AS 41.41.200(4).

"It is a basic rule of statutory construction that courts must attempt to harmonize the specific provisions of an act with the legislature's expression of its intent." *Commercial Fisheries Entry Com'n v. Apokedak,* 680 P.2d 486, 490 (Alaska 1984). Because ANGDA's authority to make and execute contracts is broad and not specifically limited to the defined "project," in our view the Authority's power to make and execute such contracts applies to the broader purposes expressed in AS 41.41.010.

With that in mind, we have reviewed the "Authority to Seek Professional Services" forms provided by your director of Administrative Services to determine whether they are consistent with the broad purposes of ANGDA, as expressed in AS 41.41.010.

Analysis

1. **Authority to Seek Professional Services for Pipeline Alignment and Construction Engineer. Agency reference number: Asps 09-0030 RFP 2009-0400-8336.**

This contract involves hiring a contractor to refine alignment of a high pressure gas spur line connecting Delta Junction to Beluga. The form states that this contact is sought "[i]n conjunction with ANGDA's "on-going work to bring natural gas to market."

Entering into a contract related to delivering natural gas to the Alaska market clearly fits within the broad authority of ANGDA if the gas is North Slope natural gas, as

specified in AS 41.41.010. If the gas is not North Slope gas, the connection is more problematic and the Department of Revenue may want to request additional information from ANGDA to determine whether work under this contract will ultimately relate to delivering North Slope natural gas.

2. Authority to Seek Professional Services for Enterprise Coordinator. Agency reference number: Asps 09-0031 RFP 2009-0400-8363.

This contract involves hiring a contractor to develop a business and financial management framework to deliver natural gas to the Alaskan market. This includes management of a financial plan to include a combination of utility rates, bonding and legislative funding to finance the project.

We understand ANGDA's general plan is to tap into a main line to Canada with a spur line that would bring some of the North Slope gas to markets in Southcentral Alaska. The contract's purpose appears consistent with both the broad purposes of ANGDA, set out in AS 41.41.010, as well as the definition of project in AS 41.41.900(4).

3. Authority to Seek Professional Services for Permitting Coordinator. Agency reference number: Asps 09-0029 RFP 2009-0400-8335.

This contract involves hiring a permitting coordinator to execute a pipeline permitting plan to "bring North Slope natural gas to market in Alaska." This purpose appears consistent with both the broad purposes of ANGDA, set out in AS 41.41.010, as well as the definition of project in AS 41.41.900(3).

4. Standard Agreement Form for Professional Services. Agency Encumbrance Number 491017

This is an agreement with EJG Enterprises, awaiting signature of the DOR director of administrative services.

This contract for EJG Enterprises is to revise and update a business plan for ANGDA programs. This contract, under which EJG is to assist ANGDA in, among other things, work with a financial advisor in pursuit of project financing, is within the scope of ANGDA's authority to acquire gas, and design and build a pipeline.

5. Cost Recovery Agreement between ANGDA and the BLM.

Your administrative director also provided us with a copy of a cost recovery agreement between ANGDA and BLM for payment of costs for processing an ANGDA

right-of-way application for a natural gas pipeline between Palmer, Glennallen and Delta Junction and Fairbanks.

We understand that ANGDA's plan is to tap into a main line to Canada with a spur line that would bring some of the North Slope gas to markets in Southcentral Alaska, and, in this case, Fairbanks. This purpose appears consistent with both the broad purposes of ANGDA, set out in AS 41.41.010, as well as the definition of project in AS 41.41.900(4), though not necessarily consistent with the definition of "project" in AS 41.41.990(3). Accordingly, if ANGDA gets to a point where it may issue bonds "in order to pay for costs of the project" we recommend that the definition of project in AS 41.41.990(3) be amended to remove any ambiguity as to whether bonds can be issued for purposes of a line to interior Alaska.

We hope this answers your questions. If you have any questions, or if there are additional authorizations that you would like us to review, please let us know.

cc Harold Heinze

ASRC Energy Services
a subsidiary of Arctic Slope Regional Corporation

Memorandum

Date: February 25, 2010
To: Bob Swenson, Executive Director
Alaska In-State Gas Pipeline Project
From: Mike Sotak, Senior Project Manager
Subject: Rough Order of Magnitude Cost Estimate for In-State Gas Pipeline Environmental and Permitting Tasks

---

ASRC Energy Services (AES), contractor to the Alaska Department of Natural Resources (ADNR) for the In-State Gas Pipeline Project, has prepared the following rough order of magnitude (ROM) cost estimate for completing the necessary environmental and permitting tasks so that construction of the pipeline can begin eighteen (18) months from now. The ROM breaks down costs by task below:

Task Name	ROM Cost Estimate	
	Pipeline (includes Compressor Stations)	Gas Treatment Plant
• State of Alaska Right-of-Way Lease and Bureau of Land management Right-of-Way Grant Applications • U.S. Army Corps of Engineers Section 404 permit (wetlands)	$1M	$500K
• Pre-Construction Permits (priority) o ADNR Permits to appropriate water, temporary water use o EPA NPDES o USCG Section 9 Bridge Permit o USACE Section 10 Navigable Waters o ADFG Fish Habitat Protection Permits o Section 106 National Historic Preservation Act o Local Land Use Permits and Authorizations o Essential Fish Habitat Consultation o Alaska Coastal Management Plan Consistency Determination (NSB, MSB)	$2.5M	$400K
• Notice to Proceed Permits and Plans o Plans of Operation o Solid Waste, wastewater disposal management o Encroachment authorizations and easements o Reclamation plans o Hazardous waste management o Oil discharge prevention plans o Letter of Authorization (polar bear)	$2.5M	$500K
• Environmental Impact Statement (expedited)	$1M	$1M
• Environmental Field Programs to support EIS and Permits	$10M	$2.5M
• Stakeholder Engagement and Environmental Justice	$1.8M	$200K
• Monitoring and Mitigation	$2.5M	$500K
• Air Quality permits to operate	$1M	$1.5M
• BLM reimbursable	$1.25M	$250K
Total Estimate	$23.55M	$7.35M

In-State Stand Alone Pipeline - FY11 Budget Narrative

1. Completion of environmental and permitting for USACE and State and Federal right-of-way approvals.

Total Estimated Expenditures **$ 2,000,000**

- Project Management - AES will continue to support the State of Alaska's project team and be involved with State of Alaska and the U.S. Army Corps of Engineers (USACE) in supporting the third-party EIS consultant with the NEPA review.
- Permitting - AES continue with the development and coordination with the USACE, BLM and State Pipeline Coordinator on the three major permits filed in 2009 and will begin working on ten other key permits for submission in late 2010 so that processing and the negotiations for permit approvals and mitigation measures may be completed in time for sale of the In-State pipeline asset to a future pipeline company.
- Stakeholder Engagement - Prepare and implement a stakeholder engagement program to support project development. Includes stakeholder contact database, and issues information. Engagement with the local boroughs, their communities and residents, tribal governments, the USACE, USFWS, BLM, State of Alaska, Native Corporations are critical.
- Wetlands - Conduct wetlands field program in the northern and southern sections of the proposed In-State Pipeline Project corridor to complete verification of wetlands pre-mapped to prepare for submission of the Preliminary Jurisdictional Determination to the USACE for their approval of the Section 404 Jurisdictional Determination; complete vegetation and habitat analysis. Provide assistance to the EIS contractor as required.
- Stream Crossings - compile the fish and wildlife resource data necessary for permit applications and assessing potential project impacts under the NEPA process. All data collection needs will be adjusted as necessary in accordance with the outcome of the draft EIS and provide information for engineering design and routing.
- Cultural - Phase one cultural resource studies will examine a potential corridor sufficiently large so that a right-of-way can be refined to the best possible alignment to avoid or minimize impacts to cultural resources.
- Lake Studies – Lake studies and surveys will be conducted primarily on the North Slope to assess the potential for water availability for use during winter construction.
- Wildlife and Bird Surveys – As needed to support the EIS process, wildlife and bird (raptor) studies will be conducted during the 2010 field season.
- Air and Noise Analysis – Evaluate compressor station locations for air emission issues and determine the need for air monitoring and weather stations to develop information for ADEC permitting.

- Pre-mapping - Prepare the wetlands pre-mapping information for route changes or alignments that have not been assessed such as the Gubik route, the Denali reroute, some of Minto Flats rerouted alignment, and so forth.

2. Engineering data acquisition for detailed engineering design of the project.

Total Estimated Expenditures: **$3,500,000**

- Gather detailed geotechnical data on major river crossings. The preferred river crossing method is assumed to be HDD (Horizontal Directional Drill). The assessment of the applicability of crossing rivers with HDD requires site specific geotechnical information. Additional field information on river approaches and total crossing length needs to be collected to verify use of HDD. This activity includes mapping and the drilling of geotechnical site investigation boreholes.

- Gather engineering field data. Pinch points such as Atigun Pass, Yukon River, and Denali Park require additional field verification of soils, available construction space and detailed routing to avoid conflicts with other facilities and to develop and verify conceptual design. Engineering field data is required to investigate and verify route geotechnical conditions and includes information on seasonal ground temperatures, geohazards and foundation conditions at project facilities (Gas Conditioning, Compressor Stations and NGL separation and storage). This information will be used to verify locations and develop conceptual designs to be included in final project documentation. This activity includes field mapping and the drilling of geotechnical site investigation boreholes with installation and monitoring of ground temperatures. Results will be analyzed and will be reported in a engineering report.

- Refine pipeline routing. The current pipeline routing is within a 2000 foot wide corridor. The actual centerline of the corridor has not been vetted and verified as the optimum route. Final route identification will be optimized for pipeline constructability, avoidance of environmentally sensitive areas, minimized TAPS, Highway and Railroad crossings, facilities location and optimized river crossings locations. These route adjustments will be made, if possible, within the 2000 foot wide corridor currently identified. Results of the engineering evaluation will be used to update the project GIS (Geographical Information System) and will be reported in a engineering report.

3. Refinement of Cost of Service estimates and Tariff modeling

Total Estimated Expenditures: **$750,000**

- Peer review engineering cost assessment of railbelt natural gas alternatives, and commercial assessment of options . There are a number of different project alternatives that have been proposed to alleviate the need for augmented for railbelt energy supply. They include two bullet line alternatives, two spur line alternatives, provision of propane from Prudhoe Bay to Fairbanks and other interior communities, LNG manufacturing on the North Slope to provide gas supply to Fairbanks and possibly other railbelt communities, and facilities to import LNG. Most of the analyses developed do not compare alternatives using similar assumptions for

input costs (e.g. steel prices, labor rates). Just as importantly, they do not make similar or consistent commercial assumptions. Peer review will assure that assumptions made by the various project proposals are consistent.

- Analyze the cost of Capital for in-state gas supply options, and Cost of Service Modeling. The commercial viability of all in-state gasline options depends on the cost of transportation. Because the contemplated scope of these projects would entail expenditures of several billion dollars, the transportation cost will be determined by the cost of capital – both the relative mix of debt and equity, and the cost of each. Assessment, for planning purposes, of the cost of capital for these small diameter pipelines is problematic and will be reviewed

- The cost-of-capital inputs need to be developed through scenario analysis. With the requested funds we will hire a financial advisor to help develop several realistic financing scenarios. Potential risks to the state's credit-rating, were the state to be called upon to take a major position in the project, will also be assessed. Some of the funds will be used for pipeline commercial expertise to develop realistic transportation contract scenarios and tariff modeling.

4. Prepare complete project documentation of In-State pipeline asset for consideration by private pipeline developer

Total Estimated Expenditures: **Budget Estimate; $250,000**

- Coordinate project team to include all, cost and design data, environmental, stakeholder, and permitting information for a 'data room' for prospective purchasers to review and evaluate. Be available to participate in presentations to the prospective purchasers and respond to technical questions that may be raised with regard to specific issues.

Alaska In-State Gas Pipeline Project.
February 24, 2010 - House Finance hearing on gas line funding requests
Robert Swenson, Project Manager

1. **What agencies have done with the money they spent in FY2010?**

Work that is completed to date:

- Route Alternative Analysis – Parks and Richardson Highway routes: Associated comparative pipeline cost estimates; Environmental Surveys
- Initial Project Description (for permitting)
- Commercial Group Scoping
- Initial Review of ENSTAR Capital Cost Estimate – Pipeline
- Major permits applied for: U.S. Army Corps of Engineers Section 404/10, State of Alaska Title 38 Right-of-Way, Bureau of Land Management Right-of-Way

Work currently underway:

- Updating pipeline cost estimates
- Developing cost of facilities
- Cost of transport analysis
- Preparing detailed project description
- Continued engineering support for EIS and ROW process
- Developing data package for economic analysis
- Facilities scenarios identified
- Commercial group market analysis
- Cost of transport analysis

2. **How much additional they have encumbered and for what?** $3,904,496

	Payroll & Expenditures 1/15/2010	Contract Commitments (Encumbrances)	Estimated Budget Jan-10	Estimated Budget Feb-10	Estimated Budget Mar-10	Estimated Budget Apr-10	Estimated Budget May-10	Estimated Budget Jun-10

3. **How much they need for FY2011? and what they propose doing with the money?** $6,500,000

	Per month FY2011	Total FY2011
Personal Services	26,830	321,960
Travel	3,000	36,000
Services	511,000	6,130,040
Commodities	1,000	12,000
Total expended	541,830	**6,500,000**

- Completion of environmental and permitting for USACE and State and Federal right-of-way approvals.
- Engineering data acquisition for detailed engineering design of the project.
- Refinement of Cost of Service estimates and Tariff modeling
- Prepare complete project documentation of In-State pipeline asset for transfer private pipeline developer

Sec. 39.20.180. Transportation and per diem expenses for members of boards, commissions, etc. Except as otherwise provided by law, the provisions in this section relating to per diem and transportation govern exclusively with respect to a member of a state board, commission, committee, judicial council, or other similar body of persons of the state organized or established under the authority of law, but excluding any other state employee other than a legislator, who is otherwise entitled by law to receive from the state payments for expenses of transportation, and for reimbursement or for per diem in lieu of reimbursement for other expenses incident to duties as such member:

(1) for transportation, the member is entitled either to the use of state transportation requests, or to be reimbursed for expenses of transportation to the same extent, in the same manner, and under the same conditions as provided for state officials and employees by the provisions of AS 39.20.110 - 39.20.170;

(2) for reimbursement for other expenses, the member is entitled to a per diem allowance prescribed by the commissioner of administration under the regulatory authority set out in AS 39.20.160 for each day or portion of a day spent in actual meeting or on authorized official business incident to duties as a member.

History -

(Sec. 1 ch 130 SLA 1953; am Sec. 1 ch 34 SLA 1960; am Sec. 1 ch 37 SLA 1962; am Sec. 5 ch 136 SLA 1967; am Sec. 12 ch 47 SLA 1974; am Sec. 31 ch 85 SLA 1988)

Cross References -

For coverage of state board and commission members under the Worker's Compensation Act, see AS 23.30.242.

AG Opinions -

In order to recover an allowance for nonmeeting activity, an occupational licensing board member must be engaged in an activity within the scope of the applicable board's powers. November 6, 1984 Op. Att'y Gen.

An occupational licensing board member cannot receive a per diem allowance for conducting an activity that should be performed by division personnel; any activity approved must be specifically defined by statute as a board duty and should be an activity that cannot be accomplished within the confines of a board meeting. If the task can be performed during a meeting, then per diem should not be paid for time unnecessarily spent by a board member outside a board meeting. It is important, of course, for budgetary reasons, that board activity for which per diem compensation is sought be kept to a minimum. November 6, 1984 Op. Att'y Gen.

The Alaska Power Authority may reimburse a member only for (1) time spent in actual meeting or (2) time spent on authorized official business incident to his duties as a member. April 19, 1984 Op. Att'y Gen.

Decisions -

Cited in Laborers & Hod Carriers Union, Local 341 v. Groothuis, 494 P.2d 808 (Alaska 1972).

Submitted by the office of Representative Mike Chenault

Sec. 39.25.110. Exempt service.

Unless otherwise provided by law, the following positions in the state service constitute the exempt service and are exempt from the provisions of this chapter and the rules adopted under it:

(1) persons elected to public office by popular vote or appointed to fill vacancies in elected offices;

(2) justices, judges, magistrates, and employees of the judicial branch including employees of the judicial council;

(3) employees of the state legislature and its agencies;

(4) the head of each principal department in the executive branch;

(5) officers and employees of the University of Alaska;

(6) certificated teachers and noncertificated employees employed by a regional educational attendance area established and organized under AS 14.08.031 - 14.08.041 to teach in, administer, or operate schools under the control of a regional educational attendance area school board;

(7) certificated teachers employed by the Department of Education and Early Development as correspondence teachers, teachers in skill centers operated by the Department of Education and Early Development or by the Department of Labor and Workforce Development, or in Mt. Edgecumbe School;

(8) patients and inmates employed in state institutions;

(9) persons employed in a professional capacity to make a temporary or special inquiry, study or examination as authorized by the governor;

(10) members of boards, commissions, or authorities;

(11) the officers and employees of the following boards, commissions, and authorities:

(A) [Repealed, Sec. 13 ch 43 SLA 1994].

(B) Alaska Permanent Fund Corporation;

(C) Alaska Industrial Development and Export Authority;

(D) Alaska Commercial Fisheries Entry Commission;

(E) Alaska Commission on Postsecondary Education;

(F) Alaska Aerospace Corporation;

(G) Alaska Natural Gas Development Authority;

(12) the executive secretary and legal counsel of the Alaska Municipal Bond Bank Authority;

(13) the state medical examiner, deputy medical examiner, and assistant medical examiners appointed under AS 12.65.015 and pharmacists and physicians licensed to practice in this state and employed by the Department of Health and Social Services or by the Department of Corrections;

(14) petroleum engineers and petroleum geologists employed in a professional capacity by the Department of Natural Resources and by the Alaska Oil and Gas Conservation Commission, except for those employed in the division of geological and geophysical surveys in the Department of Natural Resources;

(15) [Repealed, Sec. 1 ch 32 SLA 1999].

(16) persons employed by the division of marine transportation as masters and members of the crews of vessels who operate the state ferry system and who are covered by a collective bargaining agreement provided in AS 23.40.040;

(17) officers and employees of the state who reside in foreign countries;

(18) employees of the Alaska Seafood Marketing Institute;

(19) emergency fire-fighting personnel employed by the Department of Natural Resources for a fire emergency or for fire prevention and related activities conducted under AS 41.15.030;

(20) employees of the Office of the Governor and the office of the lieutenant governor, including the staff of the governor's mansion;

(21) [Repealed, Sec. 47 ch 99 SLA 2004].

(22) youth employed by the Department of Natural Resources under the Youth Employment and Student Intern programs;

(23) [Repealed, Sec. 6 ch 28 SLA 2003].

(24) students employed by the state institutions in which the students are enrolled;

(25) [Repealed, Sec. 8 ch 2 SLA 2004].

(26) investment officers in the Department of Revenue;

(27) [Repealed, Sec. 10 ch 29 SLA 1999].

(28) persons engaged in employment or pre-employment training programs operated by the Department of Military and Veterans' Affairs;

(29) [Repealed, Sec. 9 ch 115 SLA 1989].

(30) a person employed as an actuary or assistant actuary by the division of insurance in the Department of Commerce, Community, and Economic Development;

(31) [Repealed, Sec. 91 ch 163 SLA 2004].

(32) a participant in the Alaska temporary assistance program under AS 47.27 who holds a temporary position with the state in order to obtain job training or experience;

(33) a person employed as a convener under AS 44.62.730 or as a facilitator under AS 44.62.760 related to a negotiated regulation making process under AS 44.62.710 - 44.62.800;

(34) the chief executive officer and employees of the Alaska Mental Health Trust Authority employed under AS 47.30.026(b);

(35) the assistant adjutant general for space and missile defense appointed under AS 26.05.185;

(36) the victims' advocate established under AS 24.65.010 and the advocate's staff;

(37) employees of the Alaska mental health trust land unit established under AS 44.37.050;

(38) the executive director of the Council on Domestic Violence and Sexual Assault established under AS 18.66.010;

(39) the executive director and employees of the Knik Arm Bridge and Toll Authority under AS 19.75.051 and 19.75.061;

(40) the chair of the Workers' Compensation Appeals Commission (AS 23.30.007);

(41) the Alaska Gasline Inducement Act coordinator appointed under AS 43.90.250;

(42) oil and gas audit masters employed in a professional capacity by the Department of Revenue and the Department of Natural Resources to collect oil and gas revenue by developing policy, conducting studies, drafting proposed regulations, enforcing regulations, and directing audits by oil and gas revenue auditors.

Revisors Notes -

Former paragraph (29) was enacted as (28). Renumbered in 1989. Paragraph (32) was enacted as (31); renumbered in 1996. Paragraphs (35) and (36) were enacted as (34); renumbered in 2001.

In 1999, "Department of Commerce and Economic Development" was changed to "Department of Community and Economic Development" in paragraph (30) in accordance with Sec. 88, ch. 58, SLA 1999, and "Department of Education" was changed to "Department of Education and Early Development" in paragraph (7) in accordance with Sec. 89, ch. 58, SLA 1999.

Paragraph (38) was enacted as paragraph (37) and renumbered in 2002.

In 2003, in paragraph (39), "AS 19.75.051 and 19.75.061" was substituted for "AS 44.90.051 and 44.90.061" to reflect the 2003 renumbering of AS 44.90.051 and 44.90.061.

In 2004, in paragraph (30) of this section, "Department of Community and Economic Development" was changed to "Department of Commerce, Community, and Economic Development", in accordance with Sec. 3, ch. 47, SLA 2004.

In 2009, under Sec. 2, ch. 60, SLA 2009, in paragraph (11) of this section "Alaska Aerospace Corporation" was substituted for "Alaska Aerospace Development Corporation".

Cross References -

For statement of legislative intent regarding the oil and gas revenue audit master positions authorized by paragraph (42) of this section, see Sec. 69, ch. 1, SSSLA 2007.

Amendment Notes -

The first 2001 amendment, effective April 28, 2001, added paragraph (34).

The second 2001 amendment, effective May 25, 2001, added paragraph (35).

The third 2001 amendment, effective July 1, 2002, added paragraph (36).

The first 2002 amendment, effective August 16, 2002, added paragraph (37).

The second 2002 amendment, effective June 28, 2002, added paragraph (38).

The third 2002 amendment, effective February 25, 2003, added subparagraph (11)(G).

The first 2003 amendment, effective July 1, 2003, repealed paragraph (23).

The second 2003 amendment, effective July 1, 2003, inserted "or by the Department of Labor and Workforce Development" in paragraph (7).

The third 2003 amendment, effective September 10, 2003, added paragraph (39).

The first 2004 amendment, effective May 16, 2004, repealed paragraph (25), relating to the executive director and staff of the Alaska Science and Technology Foundation.

The second 2004 amendment, effective June 26, 2004, repealed paragraph (21), relating to employees of the Citizens' Advisory Commission on Federal Areas in Alaska.

The third 2004 amendment, effective July 1, 2005, repealed paragraph (31), relating to administrative law judges appointed to the office of tax appeals.

The 2005 amendment, effective November 7, 2005, added paragraph (40).

The 2006 amendment, effective August 30, 2006, inserted "and pharmacists" in paragraph (13), and deleted "the Division of Mental Health and Developmental Disabilities in" preceding "the Department of Health" in that paragraph.

The first 2007 amendment, effective June 8, 2007, added paragraph (41).

The second 2007 amendment, effective December 20, 2007, added paragraph (42).

The first 2009 amendment, effective June 21, 2009, in (14), added "Alaska" preceding "Oil and Gas Conservation Commission".

The second 2009 amendment, effective July 1, 2009, in (38), deleted "and staff" following "the executive director".

Editors Notes -

Section 7, ch. 117, SLA 1998, which was to repeal paragraph (33) of this section effective July 1, 2003, was repealed by Sec. 2, ch. 44, SLA 2003.

History Reports -

For governor's transmittal letter for ch. 1, SSSLA 2007 (HB 2001), presenting, among other matter, a proposal relating to classification of petroleum revenue auditors under the State Personnel Act, see 2007 House Journal 1547 - 1550.

AG Opinions -

Staff administering the Alaska Military Youth Academy are members of the classified service, and are not in the exempt service, because they are not "persons engaged" in the employment training program, as required by subsection (28). Oct. 13, 2000, Op. Att'y Gen.

Decisions -

The thrust of the exemptions in this chapter, the Public Employees Retirement System, former AS 39.35.680(5)(c), and the statutory leave provisions for state employees, AS 39.20.310, is to provide for those public employees who are not susceptible to ordinary recruiting and examining procedures. Hafling v. Inlandboatmen's Union, 585 P.2d 870 (Alaska 1978).

No inconsistency between ferry crew exemption of this section and inclusion of such personnel with Public Employment Relations Act, AS 23.40.070 et seq. - See Hafling v. Inlandboatmen's Union, 585 P.2d 870 (Alaska 1978).

National Guard exempt from Personnel Act. - Because of the state's adoption of federal personnel rules and regulation regarding promotion and separation in the Alaska National Guard, it has "otherwise provided by law" that members of the National Guard are exempt from the Alaska Personnel Act. State, Dep't of Military & Veterans Affairs v. Bowen, 953 P.2d 888 (Alaska 1998).

Effect of being in exempt service. - The "exempt service" is a category of jobs which, for whatever reason, the Legislature wanted to exclude from the state personnel system. Not every person

in the exempt service is a confidential employee. The fact that plaintiff was in the exempt service did not mean that the Alaska Energy Center lacked the power to give him a three-year contract. Zerbetz v. Alaska Energy Ctr., 708 P.2d 1270 (Alaska 1985).

Cited in State v. Haley, 687 P.2d 305 (Alaska 1984); McGrath v. University of Alaska, 813 P.2d 1370 (Alaska 1991).

Chinese seen as potential Alaska natural gas customer

By BECKY BOHRER
The Associated Press
(02/14/10 18:29:57)

JUNEAU -- Alaska officials are looking to China and what some believe will be that country's strong demand for natural gas to help the state advance its long-held pipeline dreams. Gov. Sean Parnell has invited an official with China's National Energy Administration and others to visit Alaska, following up on a trade mission Lt. Gov. Craig Campbell helped lead to China in December. Campbell returned from that trip believing the rapidly developing communist nation, already a leading export market for such Alaska products as seafood, zinc and lead, could also become a major investor in or export market for Alaska natural gas or its byproducts.

The potential for Alaska is huge, said Harold Heinze, chief executive of the Alaska Natural Gas Development Authority, who was with Campbell on the trip. He sees several possibilities for the Chinese, from building a plant to convert ethane to pellets that would be used in manufacturing to signing on with a major natural gas pipeline project. Ethane is a component of North Slope natural gas that can be used for plastics.

"One thing you look for in a partner is, do they have money and do they have more money than you. And these guys have money," he said, adding: "They're major players in the world." Heinze's state agency was set up seven years ago to pursue a North Slope gas-export project.

In theory, if the interest and money are there, that could also spur progress on a pipeline that many Alaskans have long looked to for new jobs, reliable energy and as a source for more state revenue amid projections of slumping oil production.

But there are plenty of uncertainties, from permitting and pricing -- how gas holds up against other energy sources -- to what China's true long-term demands for gas will be over alternatives like coal, and the level of competition Alaska would face from other producers to meet the gas demand.

And there are the various pipeline options and plans -- including routing a pipe from the North Slope into Canada rather than to Valdez -- each with diehard constituencies and questions about their viability.

Estimates released last month by the companies working with the state to advance a major line put the project costs at $20 billion to $41 billion, depending on the route

One route, the cheaper option, estimated at $20 billion to $26 billion, would run from the harsh North Slope to Valdez, where gas would be superchilled into a liquid in a plant built for an additional cost, and then shipped elsewhere, possibly overseas.

The costlier option envisions a pipeline going from the North Slope to Canada, where gas could move on existing systems to North American markets.

But there have been numerous other proposals through the years to move North Slope gas, even a

bullet line to move some gas to Fairbanks and Southcentral Alaska for local use.

"The Chinese may, because they're interested in resources, they may be able to do things and invest in things that don't look economic in market terms," said James Jensen, a consultant in natural gas economics.

"In fact, if the Chinese said, 'Gee, if we could get this thing going and we could tie up a certain amount of American gas for our own use,' they might do something that I wouldn't think would be economic," he said. "But they might do it."

Officials with TransCanada Corp. of Calgary, Alberta, and Texas-based Exxon Mobil Corp., say the project is economically viable and hope to move by May toward an "open season," when they can court gas producers and try to secure commitments for shipping deals.

The companies, in a recent filing with federal regulators, estimated 35 trillion cubic feet of proven gas reserves on the North Slope.

A TransCanada spokeswoman declined comment on whether there'd been interest from China on the project, saying: "All discussions with individual customers are confidential."

A rival project by Britain's BP and Houston-based Conoco Phillips is also moving ahead.

Campbell said he's not advocating any specific project, but he'd like the Chinese officials to visit "earlier, rather than later." They've indicated a "huge demand," for natural gas, he said, and Alaska wants a market.

CS FOR HOUSE BILL NO. 369(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SIXTH LEGISLATURE - SECOND SESSION

BY THE HOUSE FINANCE COMMITTEE

Offered:
Referred:

Sponsor(s): REPRESENTATIVES CHENAULT, Ramras, Olson, Johnson, Austerman

A BILL

FOR AN ACT ENTITLED

"An Act relating to an in-state natural gas pipeline, the office of in-state gasline project manager, and the Joint In-State Gasline Development Team; requiring the development of an in-state natural gas pipeline plan, to be delivered to the legislature by July 1, 2011, that provides for a gasline that is operational by December 31, 2015; directing the Joint In-State Gasline Development Team to assume responsibilities under sec. 19, ch. 14, SLA 2009; requiring expedited review and action by state agencies or entities relating to the in-state natural gas pipeline project; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 38 is amended by adding new sections to read:

Chapter 34. In-State Natural Gas Pipeline.

Sec. 38.34.010. In-state gasline project manager. (a) The position of in-state gasline project manager is created in the Office of the Governor. The Office of the Governor shall provide administrative support for the position. The position shall

New Text Underlined *[DELETED TEXT BRACKETED]*

L
1789

continue until one year after commencement of commercial operation of the in-state natural gas pipeline.

(b) The governor shall appoint an individual to the position of in-state gasline project manager. The manager is in the exempt service under AS 39.25.110. The person serving as the in-state gasline project manager may be removed from the position at the discretion of the governor, who shall appoint another person to the position.

(c) The in-state gasline project manager shall

(1) collaborate with other state agencies to perform planning and other work on the in-state natural gas pipeline project under this chapter;

(2) coordinate with government agencies and the private sector on issues involving construction, ownership, and operation of the in-state natural gas pipeline;

(3) submit to all legislators written monthly reports detailing progress to the date of the report on development of the project plan under AS 38.34.040 for an in-state natural gas pipeline and identifying all work performed, including

(A) each current and anticipated contract, together with the scope of work and contract amount;

(B) a cumulative and monthly accounting for all funds spent or encumbered; and

(C) a projected schedule of work anticipated to complete the in-state gasline project plan.

Sec. 38.34.020. Expedited review and action by state agencies or entities. (a) A state agency or entity conducting a review or taking action relating to the in-state natural gas pipeline project under this chapter shall expedite the review or action in a manner consistent with the timely completion of the project.

(b) Notwithstanding any contrary provision of law, a state agency or entity may not include in any project certificate, right-of-way, permit, or other authorization a term or condition that is not required by law if the in-state gasline project manager determines that the term or condition would prevent or impair, in any significant respect, the expeditious construction and operation or expansion of the in-state natural

gas pipeline project.

(c) Unless required by law, a state agency or entity may not add to, amend, or abrogate any certificate, right-of-way, permit, or other authorization if the in-state gasline project manager determines that the action would prevent or impair, in any significant respect, the expeditious construction, operation, or expansion of the in-state natural gas pipeline project.

Sec. 38.34.030. Joint In-state Gasline Development Team. (a) The Joint In-state Gasline Development Team is established in the Office of the Governor. The development team consists of five members as follows:

(1) the commissioner of transportation and public facilities, or the commissioner's designee;

(2) the chief executive officer of the Alaska Railroad Corporation or the chief executive officer's designee;

(3) the chief executive officer of the Alaska Natural Gas Development Authority;

(4) the in-state gasline project manager; and

(5) the chief executive officer of the Alaska Housing Finance Corporation.

(b) The chief executive officer of the Alaska Housing Finance Corporation is the chair of the development team.

(c) The development team may hire staff, enter into contracts, and exercise other powers necessary to carry out its functions.

Sec. 38.34.040. Duties of the development team. (a) The Joint In-State Gasline Development Team shall ensure that a project plan for the development of an in-state natural gas pipeline is completed and delivered to the legislature by July 1, 2011. The project plan must specify and document how an in-state natural gas pipeline can be designed, financed, constructed, and made operational by December 31, 2015.

(b) The Joint In-State Gasline Development Team shall assume executive authority over and managerial responsibility for all activities enumerated under sec. 19, ch. 14, SLA 2009, including work previously completed, work in process, and work for which money has been encumbered but that is not completed on the effective

date of this subsection.

(c) The project plan must include specific plans to coordinate and facilitate construction, ownership, operation, and management of a natural gas pipeline serving Fairbanks, the southcentral region of the state, and other communities whenever practicable, connecting with or enhancing the existing gas pipeline system, and reaching to tidewater in the state.

(d) The development team's work product shall include an analysis of alternative possible routes and the selection of a route that, consistent with the other requirements of this section,

(1) is economically feasible;

(2) makes natural gas available to residents at the lowest possible cost;

(3) allows for connecting lines to serve industrial, residential, and utility customers along the entire route, and in other regions of the state that can be served at commercially feasible rates;

(4) uses state land and existing state highway and railroad rights-of-way to the maximum extent feasible;

(5) uses existing highway and railroad bridges, gravel sources, equipment yards, maintenance facilities, and other existing facilities and resources to the maximum extent feasible.

(e) With the intent that any project-related assets acquired or developed be available for transfer or sale to the entity best able to complete the project, the development team shall

(1) prepare preliminary plans and designs necessary for construction of the in-state natural gas pipeline project;

(2) coordinate with entities qualified to build, own, and operate the gasline;

(3) identify, apply for, ing ~~and obtain rights-of-way and~~ other permits for the project route;

(4) work with other entities to promote gas supply and purchase contracts required for the project to be commercially viable;

(5) prepare cost estimates for the project design, construction, and

operation to determine the project's economic feasibility and the projected cost of natural gas to consumers;

(6) coordinate with and, to the fullest extent possible, use existing work by other state agencies and entities before contracting for new reports and research and analysis;

(7) determine regulatory authority over the pipeline project and perform any necessary compliance requirements;

(8) identify and apply for, or support extension of, existing permits for export of Alaska natural gas if that export improves project economics and will reduce the price of natural gas to in-state consumers.

(f) Notwithstanding any other provision of law, any rights to a gasline corridor obtained by a state agency under eminent domain may be transferred to a private entity.

(g) In preparing the project plan required in this section, the development team may consider all aspects of the in-state natural gas pipeline project, including public, private, or joint construction alternatives, marketing of natural gas, financing alternatives for pipeline construction, procurement of natural gas from producers, maximization of local hire, opportunities for promoting value added industries, gas-to-liquids manufacturing opportunities, production and delivery of liquefied natural gas or propane to Yukon river, interior, and coastal communities, alternatives for transporting natural gas to other locations in the state, the acquisition of natural gas commitments sufficient to ensure the long-term feasibility of the in-state natural gas pipeline project, and the development of a global natural gas trading hub in the state.

(h) The Joint In-State Gasline Development Team shall take all action necessary to complete its responsibilities under this section.

Sec. 38.34.050. Cooperation and access to information. (a) Notwithstanding other laws, the Joint In-state Gasline Development Team may have access to information of all state agencies or entities, including confidential information, that may relate to the in-state natural gas pipeline or prove useful in planning, design, construction, or operation of the pipeline. Confidential information received by the development team shall be kept confidential.

(b) All state agencies or entities shall cooperate with and, except for requests from the Alaska Gasline Inducement Act coordinator (AS 43.90.250), give priority to requests for information from the Joint In-state Gasline Development Team. The development team shall avoid duplicating studies, plans, and designs that have already been produced or otherwise obtained by other state entities.

Sec. 38.34.060. Conflicts of interest. (a) If a member of the Joint In-state Gasline Development Team acquires, owns, or controls an interest, direct or indirect, in property, an organization, or a business that might be affected by the in-state natural gas pipeline project or other matter under consideration by the development team, the member shall immediately disclose the interest to the development team. The disclosure is a matter of public record and shall be included in the minutes of the first meeting of the development team held after the disclosure.

(b) The members of the development team are subject to AS 39.50 and AS 39.52.

Sec. 38.34.099. Definitions. In this chapter,

(1) "in-state natural gas pipeline" means a pipeline for transporting natural gas that runs from the North Slope to tidewater in the state;

(2) "North Slope" means that area of Alaska lying north of 68 degrees North latitude.

*** Sec. 2.** AS 39.25.110 is amended by adding a new paragraph to read:

(43) the in-state gasline project manager appointed under AS 38.34.010.

*** Sec. 3.** This Act takes effect immediately under AS 01.10.070(c).

ANALYSIS: *(Attach a separate page if necessa*

The bill establishes a joint in-state Gasline Development Committee consisting of the commissioner of DOTPF, the CEO of the Alaska Railroad Corporation, the CEO of the Alaska Natural Gas Development Authority, and the in-state gasline project manager(also created in this bill). The legislation provides this committee the authority to manage and develop an in-state gasline, mandates construction to begin by July 1, 2011, and authorizes any action that would enable gas to flow down the pipeline by 2015. While the joint in-state Gasline Development Committee is granted broad powers and authorities under the bill certain basic functions must still be performed by MLW.

FISCAL NOTE

STATE OF ALASKA **BILL NO.** CSHB 369 (RES)
2010 LEGISLATIVE SESSION

ANALYSIS CONTINUATION

In the preparation of this fiscal note certain assumptions have been made:

1) Participating state agencies (ADF&G, ADEC, etc.) will provide separate fiscal notes, although their costs associated with permitting the right-of-way may be reimbursable by the applicant through the SPCO.
2) The right-of-way lease applicant, pursuant to AS 38.35. 140(b), will reimburse DNR's (and other participating state agencies as well) work associated with delivery of a right-of-way lease.
3) DLMW has completed a separate fiscal note, however portions of their costs may be reimbursable by the applicant through the SPCO.
4) Existing Program Receipt Authority will be used for the project.
5) DGGS cost estimate assumes that the state needs to understand the geohazards to ensure the applicant has identified and considered all geologic hazrads along the route.
6) Construction and operational oversight begins in FY2012 and FY2014, respectively. The cost estimate for these activities is for DNR only and does not include estimates for other state agencies (ADF&G, ADEC, etc.), although their costs may be reimbursable by the applicant through the SPCO.
7) Assume SPCO will administer material sites after initial sale.
8) Assume a two-year construction schedule segregated into four geographic areas.

The FY2011 costs to DNR/SPCO would include expenses to coordinate the participation of state agencies in the right-of-way permitting process, prepare the Commissioner's Analysis, Proposed Decision and Action, develop the draft lease and, if necessary, hold public hearings. In addition the costs include right-of-way permitting expenses for the participation of the State Historic Preservation Office (SHPO), Division of Coastal and Ocean Management (DCOM), Office of Project Management and Permitting (OPMP) and the Division of Geological and Geophysical and Surveys (DGGS). It should be noted that the proposed schedule is agressive and in order to meet the specified timeline the right-of-way permitting process will need to be conducted indepent of the federal NEPA process. The FY2012 and 13 costs reflect construction oversight activities by DNR. Operational oversight costs begin in FY2014 and continue forward.

PERSONAL SERVICES COST - $ 521.65 total (for 12 months)

STATE PIPELINE COORDINATOR'S OFFICE
Positions in Anchorage; for completing the right-of-way leasing process.
-one Natural Resource Specialist (NRS) IV (range 21) - total 10 months at $9.95/month= $99.50
-one Natural Resource Manager (NRM) II (range 20) - total 1 months at $9.41/month = $9.41
-one Natural Resource Specialist (NRS) III (range 18)- total 6 months at 7.31/month = $43.86
-one Engineer IV (range 27) - total 3 months at 13.70/month = $41.1
-Administrative Support - total = $38.0

$231.87 for FY 11 Total

Positions in Anchorage; for construction oversight.
- two Natural Resource Specialist (NRS) III (range 18)- total 6 months/yr at 7.31/month = $87.72

ANALYSIS: *(Attach a separate page if necessary)*

House Bill 369 establishes the Joint In-state Gasline Development Team, of which the President/CEO of the Alaska Railroad Corporation is the chair. At this point, it appears that the only incremental costs ARRC would incur to support this team would be minor travel costs related to its CEO attending team meetings. As the prevailing assumption is that the meetings would be held predominately in Anchorage, the duty station of the CEO, no material fiscal impact is noted at this time. However, as it is still unclear as to whether additional ARRC staff may be necessary to support the CEO in his role, ARRC may revise this analysis at a later date as greater clarity is provided.

ANALYSIS: *(Attach a separate page if necessary)*

DOT&PF is a member of the Joint In-state Gasline Development Team and is tasked with determining status of current right-of way (ROW), expediting permits for use of the ROW and overseeing construction to insure compliance with federal and state permit requirements. It is anticipated DOT&PF will assist in determing the needs for and acquisition of additional ROW. An Engineer V position will serve as the technical expert for the Commissioner of DOT&PF, manage consultant activities and oversee regional staff who will be issuing permits and authorizations. An Environmental Impact Analysis Manager will oversee work done in the ROW to insure compliance with federal and state requirements, insure our processes provide for rapid permitting decisions and no delays in construction. An administrative assistant will assist with the day to day activities of the two professionals.

STATE OF ALASKA
2010 LEGISLATIVE SESSION

BILL NO. CSHB 369(RES)

ANALYSIS CONTINUATION

DOT&PF estimates 30% of the pipeline may not be economically or efficiently located within the designated state ROW. Of that 30% it is estimated that 30% must be acquired by acquisitions with appraisals, surveys, condemnation authority, etc resulting in between 60 to 125 miles of ROW to be identified, appraised, negotiated, etc. For this fiscal note DOT&PF assumed, as a ROW owner, it makes sense for the DOT&PF to coordinate the contracts for these services and estimates a cost of $2,000.0. This does not include acquisition costs. DOT&PF has assumed that DNR will require surveys and applications for use of material sites estimates consulting services to be $1,000.0. The department anticipates the ROW and material site aquistiation costs are capital costs and will not be needed in the final year of construction.

Additional contractual costs are for annual cores service costs ($5.0) and annual lease space costs ($42.1) for these staff as our Anchorage offices are already overcrowded. In FY2012, contractual costs increase by $2.5 for annual maintenance costs for copier, printer, fax machines.

Supplies costs in FY2011 include the office start up expenses and supplies. Ongoing costs are $10.0 annually.

DOT&PF will budget the leased office space in a separate RDU (Administration and Support), Component (Leased Facilities - 2892) for centralized lease payments to DOA.

HB 376 extends the Board of Psychologist and Psychological Associate Examineers to June 30, 2018. In accordance with AS 08.03.020 funding extends one year following the termination date allowing the Board to conclude its affairs. The FY2011 funding is included in the Operating Budget request and costs shown are an average of direct costs for a biennial licensing period.

Travel expenses represent transportation and per diem for the 5 member board and 1 staff to meet at least 3 times each year in accordance with AS 08.86.030.

The program is required to cover costs with licensing fees under AS 08.01.065, and revenue generated by board fees are anticipated to cover its full operating costs. New funds are not required to implement this bill.

House Bill 376

"An Act extending the termination date of the Board of Psychologist and Psychological Associate Examiners; and providing for an effective date."

HB 376 is a simple sunset extension bill for the State of Alaska's Board of Psychologist and Psychological Associate Examiners, currently set to expire June 30, 2010.

Alaska's Board of Psychologist and Psychological Associate Examiners is composed of five members who regulate licensed psychologists and psychological associates in the State. Major Board duties include examining and issuing licenses to qualified applicants, adopting regulations to enforce governing statutes, holding hearings and imposing disciplinary sanctions as necessary on individuals who violate associated statutes and regulations.

A 2009 Division of Legislative Audit review found no substantive problems, and recommends extending the Board for an additional eight years. HB 376 does just that, carrying it forward through June 30, 2018.

As House Health and Social Services Committee Chairmen, we ask your support of this legislation. Please contact Liz Clement, aide to Representative Herron, at 465-6576 or Liz.Clement@legis.state.ak.us, with any questions or concerns.

National Organizations

The Board of Psychologist and Psychological Associate Examiners is staffed by the Division of Corporations, Business and Professional Licensing. The Board consists of three psychologists, one psychological associate, and one public member. Board members are appointed by the governor and confirmed by the legislature.

The Board adopts regulations to carry out laws governing the practice of psychology in Alaska. It makes final licensing decisions and takes disciplinary actions against people who violate licensing laws. The Board meets three times a year and offers a public comment period at each meeting. Meeting agendas are available from the licensing examiner.

Members of the Legislative Budget
and Audit Committee:

In accordance with the provisions of Title 24 and Title 44 of the Alaska Statutes (sunset legislation), we have reviewed the activities of the Board of Psychologist and Psychological Associate Examiners (BPPA) and the attached report is submitted for your review.

DEPARTMENT OF COMMERCE, COMMUNITY
AND ECONOMIC DEVELOPMENT
BOARD OF PSYCHOLOGIST AND PSYCHOLOGICAL
ASSOCIATE EXAMINERS

October 28, 2009

Audit Control Number
08-20066-10

This audit was conducted as required by AS 44.66.050 and under the authority of AS 24.20.271(1). If not extended by the legislature, BPPA is required to terminate on June 30, 2010. Under AS 08.03.020, the board will have a one-year period to administratively conclude its affairs. In our opinion, BPPA should continue to regulate the psychology profession. We recommend the board be extended to June 30, 2018, the maximum extension allowed in statute.

The audit was conducted in accordance with generally accepted government auditing standards. Those standards require that we plan and perform the audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides a reasonable basis for our findings and conclusions based on our audit objectives. Fieldwork procedures utilized in the course of developing the findings and recommendations presented in this report are discussed in the Objectives, Scope, and Methodology.

Office of the Governor	15
Department of Commerce, Community, and Economic Development	17
Board	19

OBJECTIVES, SCOPE, AND METHODOLOGY

In accordance with Titles 24 and 44 of the Alaska Statutes, we have reviewed the activities of the Board of Psychologist and Psychological Associate Examiners (BPPA) to determine if there is a demonstrated public need for its continued existence and if it has been operating in an efficient and effective manner.

As required by AS 44.66.050(a), this report shall be considered by the committee of reference during the legislative oversight process in determining whether BPPA should be reestablished. Currently under AS 08.03.010(c)(18), the board will terminate on June 30, 2010. If the legislature does not extend the termination date for the board, BPPA will have one year to conclude its administrative operations.

Objectives

The three central, interrelated objectives of our report were:

1. To determine if the board's termination date should be extended.
2. To determine if the board is operating in the public interest.
3. To determine if the board has exercised appropriate regulatory oversight of licensed psychologists and psychological associates.

The assessment of the operations and performance of the board was based on criteria set out in AS 44.66.050(c). Criteria set out in this statute relates to the determination of a demonstrated public need for the board.

Scope and Methodology

The major areas of our review were licensing, investigations, board proceedings, and duplication of efforts. We reviewed and evaluated the following:

- Statutes and regulations for the psychology profession. Statutes and regulations were reviewed to identify board duties and responsibilities, and board member composition and qualifications. We also identified additions, deletions and changes to BPPA statutes and regulations.

- BPPA license files and documentation. Licensing documentation was reviewed to determine if individuals were licensed in accordance with regulations. We also evaluated compliance with continuing education requirements.

- Board meeting minutes, budget documents, and annual reports related to or issued by BPPA to gain an understanding of board proceedings and activities.

- Public notice documentation to ascertain whether public notice for BPPA meetings and proposed regulation changes were published as required by statute.

- Financial records related to BPPA revenues and expenditures to identify the surplus or deficit for each fiscal year.

- Complaints related to individuals licensed by BPPA to gain an understanding of the nature of complaints and timeliness of the investigative process. Complaints filed with the following organizations were reviewed: the Department of Commerce, Community, and Economic Development, Division of Corporations, Business and Professional Licensing; the Human Rights Commission; the Office of the Ombudsman; the Office of Victims' Rights; and the Federal Equal Employment Opportunity Commission.

Additionally, we conducted interviews with staff within the Division of Corporations, Business and Professional Licensing.

ORGANIZATION AND FUNCTION

The Board of Psychologist and Psychological Associate Examiners (BPPA) was established for the purpose of controlling and regulating the practice of psychology in the State.

Board Membership

BPPA is composed of five members. Alaska Statute 08.86.010 requires board positions to consist of three licensed psychologists, one licensed psychological associate, and one individual from the general public. Statute prohibits the public member from having a direct financial interest in the health care industry.

Board Duties

The board regulates licensed psychologists and psychological associates in the State. It sets education, training, and work experience standards necessary for an individual to be licensed as a psychologist or psychological associate.

A psychologist is licensed to use psychological principles, methods, and procedures for the treatment of emotional and mental disorders. A psychological associate is licensed to practice under the supervision of a licensed psychologist.

Board of Psychologist and Psychological Associate Examiners
(As of June 30, 2009)

Licensed Psychologists
John DeRuyter, Ph.D.
Lorin Bradbury, Ph.D.
Kristi Fuller, Ph.D.

Psychological Associate Examiner
Lisa Turner, M.S.

Public Member
Camille Carlson

The board's duties include:

1. Examining and issuing licenses to qualified applicants.

2. Holding hearings in order to impose disciplinary sanctions on persons who violate the statutes or regulations related to the licensure of psychologists and psychological associates.

3. Adopting regulations necessary to enforce BPPA statutes.

An applicant may be licensed either by passing an examination given by the board or by "credentials." In order to be licensed by credentials, an applicant must provide proof of licensure by another authority, such as a state, that has equal or more stringent licensing requirements than the State of Alaska.

In order to become licensed as a psychologist by examination, an applicant must have a doctorate degree; one year of post doctoral experience approved by the board; and pass a written examination.

To qualify for licensure by examination, a psychological associate must have at least two years of supervised experience after having obtained a masters degree in a board-recognized field of psychology. An applicant for licensure must also have passed the professional examination, the state's jurisprudence test, and obtained the required letters of recommendation.

The Department of Commerce, Community, and Economic Development (DCCED), Division of Corporations, Business and Professional Licensing

The Division of Corporations, Business and Professional Licensing provides administrative and investigative assistance to BPPA. Administrative assistance includes budgetary services and functions such as collecting fees, maintaining files, receiving and issuing application forms, and publishing notices of examinations and meetings.

Alaska Statute 08.01.087 empowers DCCED with the authority to act on its own initiative or in response to a complaint. The division may:

1. Conduct an investigation if it appears a person is engaged or is about to engage in a prohibited professional practice;
2. Bring an action in Superior Court to enjoin the act;
3. Examine the books and records of an individual; and
4. Issue subpoenas for the attendance of witnesses and records.

REPORT CONCLUSIONS

The Board of Psychologist and Psychological Associate Examiners (BPPA) is operating in an efficient and effective manner and should continue to regulate the psychology profession. We believe the board is safeguarding the public interest by ensuring the competence and integrity of those who present themselves to the public as psychologists and psychological associate examiners.

Alaska Statue 08.03.010(c)(18) requires BPPA be terminated on June 30, 2010. If the legislature does not extend the board's termination date, under AS 08.03.020, BPPA will have a one-year period to administratively conclude its affairs. We recommend the legislature extend the board's termination date to June 30, 2018, the maximum extension allowed in statute.

(Intentionally left blank)

FINDINGS AND RECOMMENDATIONS

Recommendation No. 1

The Department of Commerce, Community, and Economic Development (DCCED), Division of Corporations, Business and Professional Licensing's administrative officer should take steps to ensure courtesy licensees comply with reporting requirements.

State regulation 12 AAC 60.035(a) authorizes a courtesy licensee to practice psychology for no more than 30 days in a 12-month period. The regulation requires the licensee to submit a report to the board each month during the period of courtesy licensure indicating the number of days practiced during the month.

The licensing examiner that provides administrative support to the Board of Psychology and Psychological Associate Examiners (BPPA) did not monitor or report compliance with monthly reporting requirement. From FY 05 through FY 09, 11 courtesy licenses were issued by the board. We examined three of the 11 courtesy license files. Each had varying degrees of incomplete reporting. One licensee failed to submit any monthly reports; another submitted a report that covered a nine month period; and the third submitted late reports. There was no follow-up by division staff or the board. Without adequate reporting, it is unclear whether courtesy licensees are complying with regulatory requirements.

We recommend that the division's professional licensing administrative officer develop procedures to monitor reporting requirements and report compliance to BPPA.

Recommendation No. 2

The division's professional licensing administrative officer should take steps to improve administrative support.

Unqualified staff and a lack of documented procedures led to several deficiencies in division administrative support. Specifically:

- FY 05, FY 07, and FY 08 annual reports contained errors in license statistics.
- Nine of 16 board meetings were not published on the State's online public notice system.
- Fee analyses were not performed for the licensing periods FY 05 and FY 06.
- Indirect costs for the division were treated inconsistently between fiscal years.
- Fines of $1,000, recorded in FY 07, were incorrectly reported as BPPA revenue.

The division is responsible for performing various administrative tasks to support board activities. Per AS 08.01.050, duties include collecting and recording fees; maintaining records and files; compiling and maintaining a current register of licensees; arranging for printing and advertising; and providing inspection, enforcement, and investigative services to occupational boards. DCCED is also responsible for annually reviewing fee levels of the occupational boards to determine whether the regulatory costs of the occupation are approximately equal to fee collections related to that occupation. BPPA is required by AS 08.01.070 to submit, before the end of each fiscal year, an annual performance report to the department stating the board's accomplishments, activities, and needs. The division's policy is to produce a single annual report incorporating both board and division information requirements.

Most of the deficiencies in administrative support were caused by a key administrative staff member that was unqualified and untrained for the position. This was further exacerbated by a lack of accounting and reporting procedures. Turnover in staff positions caused the oversight in posting public notices.

Inadequate administrative support hampers BPPA's ability to fulfill its responsibilities and may provide policymakers with misleading information. We recommend the division's administrative officer responsible for professional licensing take steps to improve administrative support.

Recommendation No. 3

BPPA and staff within the Office of the Governor should work together to increase the pool of qualified applicants available for board appointments to ensure full representation.

BPPA appointments did not fully comply with state law. A psychological associate member position was vacant for 32 months beginning in FY 04. A public member position was vacant for eight months of FY 04. A licensed psychologist member position was vacant for 15 months beginning in FY 08.

Alaska Statute 08.86.010 requires the board to consist of three licensed psychologists, a licensed psychological associate, and one person with no direct financial interest in the health care industry. A lack of qualified applicants caused the board vacancies.

The board cannot function effectively with extended vacancies in board positions. Technical expertise is provided by professional members. Public members provide a consumer prospective. Full representation provides the board with balance to prevent undue bias toward the profession being regulated.

We recommend BPPA and staff within the Office of the Governor work together to increase the pool of qualified applicants available for board appointments to ensure full representation.

ANALYSIS OF PUBLIC NEED

The following analyses of board activities relate to the public need factors defined in AS 44.66.050(c). These analyses are not intended to be comprehensive but to address those areas we were able to cover within the scope of our review.

Determine the extent to which the board, commission, or program has operated in the public interest.

The Board of Psychologist and Psychological Associate Examiners (BPPA) has served the public through licensing qualified applicants, drafting new regulations, taking appropriate disciplinary action, and informing the public of upcoming meetings and regulatory changes. The board keeps abreast of national regulatory concerns by annually sending a representative to the Association of State and Provincial Psychology Boards' conference.

The board expanded the pool of people allowed to practice psychology by creating a courtesy license. A courtesy license allows certain qualified persons to practice psychology for no more than 30 days over a twelve month period. Only one courtesy license may be issued during a person's lifetime. Expert witnesses are common applicants for courtesy licenses.

Determine the extent to which the operation of the board, commission, or agency program has been impeded or enhanced by existing statutes, procedures, and practices that it has adopted, and any other matter, including budgetary, resource, and personnel matters.

Under 08.01.065(c), the Department of Commerce, Community and Economic Development (DCCED) must *"establish fee levels... that the total amount of fees collected for an occupation approximately equals the actual regulatory costs for the occupation."* BPPA reviews and provides feedback on changes to fees proposed by the division.

BPPA revenues come from licensing and renewal fees. Renewals are conducted on a biennial basis. This creates a two-year cycle in board revenues, with BPPA receiving most of its revenues during the odd-numbered fiscal years. We reviewed the division's internal records to identify BPPA revenues and expenditures. The table on the following page presents the board's revenues and expenditures for FY 05 through FY 09.

State of Alaska
Board of Psychologist and Psychological Associate Examiners
Schedule of Revenues and Expenditures
FY 05 through FY 09
(Unaudited)

	FY 05	FY 06	FY 07	FY 08	FY 09
Revenue	$185,700	$20,900	$123,300	$40,000	$166,600
Direct Expenses					
Personal Services	37,400	29,900	28,500	41,500	49,300
Travel	8,700	12,300	17,300	13,200	16,100
Contractual	17,500	18,100	10,900	45,500	3,500
Supplies	-0-	100	100	-0-	100
Equipment	-0-	-0-	-0-	100	-0-
Total Direct Expenses	63,600	60,400	56,800	100,300	69,000
Indirect Expenses	11,400	8,900	13,100	13,200	12,200
Total Expenses	75,000	69,300	69,900	113,500	81,200
Annual Surplus (Deficit)	110,700	(48,400)	53,400	(73,500)	85,400
Beginning Cumulative Surplus (Deficit)	(75,400)	35,300	(13,100)	40,300	(33,200)
Ending Cumulative Surplus (Deficit)	$35,300	($13,100)	$40,300	($33,200)	$52,200

Determine the extent to which the board, commission, or agency has recommended statutory changes that are generally of benefit to the public interest.

The only change to BPPA statutes from FY 05 through FY 09 was the passage of Senate Bill 177 in 2005. A board member testified in support of the bill which eliminated the prohibition on the use by certain licensed professionals of titles or descriptions of services that incorporate the terms *psychoanalysis, psychoanalyst, psychotherapy, psychotherapeutic,* or *psychotherapist.* The purpose of the bill was to change statute to reflect changes to the mental health profession and expand access to services.

Determine the extent to which the board, commission, or agency has encouraged interested persons to report to it concerning the effect of its regulations and decisions on the effectiveness of service, economy of service, and availability of service that it has provided.

Notices of upcoming board meetings were published consistently in the *Anchorage Daily News*. However, nine of 16 board meetings, held from FY 05 through FY 09, were not posted on the State's online public notice system (discussed in Recommendation No. 2). Time for public comment was set aside at each board meeting.

Determine the extent to which the board, commission, or agency has encouraged public participation in the making of its regulations and decisions.

The board encouraged public participation in regulation changes by posting notices of proposed changes in the State's online public notice system and in the *Anchorage Daily News*. Public notices include instructions for submitting comments for consideration. BPPA reviewed and considered public comment before adopting new regulations.

Determine the efficiency with which public inquiries or complaints regarding the activities of the board, commission, or agency filed with it, with the department to which a board or commission is administratively assigned, or with the office of victims' rights or the office of the ombudsman have been processed and resolved.

During May 2004 through February 2009, there were 20 complaints and 20 cases opened related to psychologists or psychological associate examiner licensees or applicants. Three of the complaints were closed and re-opened as cases; six were determined not in violation; four lacked jurisdiction, were unfounded, or were resolved; two were closed for other reasons; and five remained open as of February 2009. Of the twenty cases, twelve had been closed during our audit period. Seven of those resulted in licensing action; two were sent advisement letters; and three were not in violation.

We reviewed two of the complaints and three of the cases to evaluate the reasonableness and timeliness of the investigative effort. One of the two complaints was not investigated in a timely manner. The complaint was assigned a low priority and still open after a year. According to investigative staff, other higher priority complaints/cases took precedence. Additionally, one of three cases reviewed was open for an unreasonable amount of time – approximately four and a half years. The delay was partially due to staff turnover and partially caused by procedural delays between investigative staff, the board, and the Department of Law. Except for these deficiencies, investigations were conducted in an effective and efficient manner.

There were no BPPA complaints filed with the Office of Victim's Rights, Human Rights Commission or the Office of the Ombudsman.

Determine the extent to which a board or commission that regulates entry into an occupation or profession has presented qualified applicants to serve the public.

BPPA is adequately regulating entry into the profession by licensing qualified applicants to serve the public. Continuing education is required and monitored by the board to promote a high level of quality and ensure the integrity of the profession. Board meeting minutes reflect that BPPA considers each applicant and verifies licensing requirements prior to issuing a license.

During FY 06, BPPA began to issue courtesy licenses.[1] The table below summarizes licensing activity for the past five fiscal years.

	Newly Issued Licenses (Exclusive of Renewals)					
Type of License	FY 05	FY 06	FY 07	FY 08	FY 09	Total Licensees as of June 30, 2009
Psychologist	11	6	9	11	11	59
Temporary Psychologist	4	3	3	7	2	22
Psychological Associate	3	1	1	0	1	7
Temporary Psychological Associate	0	1	2	0	0	5
Courtesy License	0	4	3	0	4	11

Determine the extent to which state personnel practices, including affirmative action requirements, have been complied with by the board, commission, or agency to its own activities and the area of activity or interest.

We found no evidence that the board has not complied with state personnel practices, including affirmative action, in the qualifying process of applicants.

Determine the extent to which statutory, regulatory, budgeting, or other changes are necessary to enable the agency, board, or commission to better serve the interests of the public and to comply with the factors enumerated in this subsection.

As noted previously, improvements are needed in the enforcement and monitoring of monthly reporting requirements for courtesy licenses (discussed in Recommendation No. 1).

The administrative support provided by the division's professional licensing section was not accurate, comprehensive, or consistent. The administrative staff should provide the necessary and required information so that the board can perform its functions and serve the interest of the public effectively and efficiently (discussed in Recommendation No. 2).

[1]If certain criteria are met, regulations provide that a qualified person may be awarded a courtesy license. A courtesy license allows a licensee to practice psychology for no more than 30 days over a twelve month period.

BPPA and staff within the Office of the Governor should work to expand the pool of qualified applicants available for board appointments to ensure full representation (discussed in Recommendation No. 3).

Determine the extent to which the board, commission, or agency has effectively attained its objectives and purposes and the efficiency with which the board, commission, or agency has operated.

Except for the deficiencies already discussed, BPPA successfully met its goals and objectives in an efficient manner.

Determine the extent to which the board, commission, or agency duplicates the activities of another governmental agency or the private sector.

There are several national and state psychology related organizations that work in positive conjunction with BPPA. The efforts of these organizations enhance rather than duplicate BPPA efforts.

We compared various elements of the psychology profession to several other mental health licenses (marital and family therapists, social workers, and professional counselors). We noted similarities in the issues treated, intervention techniques, and client populations. There are common issues for groups, such as professional accessibility for supervised experience, license portability, distance counseling, and background checks.

Though similarities exist, there are still distinctions between the license types and professional philosophies. Though there are parallels, and some possible duplication of efforts between these license types, there are sufficient practical and philosophical distinctions that it is reasonable that these professions be licensed separately.

LEGISLATIVE AUDIT

December 30, 2009

Ms. Kristin Dolquist, CPA
Audit Manager
Division of Legislative Audit
P.O. Box 113300
Juneau, AK 99811-3300

Dear Ms. Dolquist,

This letter is in response to your October 28, 2009 "CONFIDENTIAL" preliminary audit report on the Board of Psychologist and Psychological Associate Examiners (BPPA).

The Office of the Governor concurs with recommendation number three which states, "BPPA and staff within the Office of the Governor should work together to increase the pool of qualified applicants available for board appointments to ensure full representation." A board functions most effectively with full representation. Currently, the board is operating with full membership, and we are currently recruiting applicants for consideration for a seat with a term beginning March 1, 2010. I am committed to assisting the Governor in making a timely appointment to allow the board to function productively.

If you need additional information, please contact me at 907-465-3934.

Sincerely,

Jason Hooley
Director
Boards and Commissions

Re: Preliminary Audit, Board of Psychologist and Psychological Associate Examiners

Dear Ms. Davidson:

Thank you for the opportunity to comment on your Preliminary Audit findings concerning the Board of Psychologist and Psychological Associate Examiners (BPPA).

Recommendation No. 1

The Department of Commerce, Community, and Economic Development (DCCED), Division of Corporations, Business and Professional Licensing's administrative officer should take steps to ensure courtesy licensees comply with reporting requirements.

The department agrees that procedural oversight of courtesy licensees should and will be made a priority. Regulatory reporting requirements are somewhat cumbersome to administer. It is not the role of the division's administrative officer to ensure statutory compliance of BPPA licensees however, the department will ensure licensing staff work with the Board to review its reporting requirements and ease unnecessary requirements or to establish more efficient options for licensees to comply.

Recommendation No. 2

The division's professional licensing administrative officer should take steps to improve administrative support.

As we have stated on many occasions, we could not agree more. The division has undergone a number of changes in key management positions and is now optimistic about improvements being made to its internal cost-accounting system and documentation of procedures.

P.O. Box 110800, Juneau, Alaska 99811-0800
Telephone: (907) 465-2500 Fax: (907) 465-5442 Text Telephone: (907) 465-5437
Email: questions@commerce.state.ak.us Website: http://www.commerce.state.ak.us/

Unfortunately, the current incumbents are also faced with clean up of the accounting inaccuracies created by former employees in recent past years. We are confident that progress is being made to clean up the inaccuracies and to reestablish credibility of the division's cost-accounting system. Procedures for accounting for revenues and expenditures and preparation of financial reports did exist before it went awry. Correcting past errors has been a priority since current and future financial analysis is dependent on using correct data.

Recommendation No. 3

BPPA and staff within the Office of the Governor should work together to increase the pool of qualified applicants available for board appointments to ensure full representation.

The department agrees with the recommendation.

The department concurs with the extension of the BPPA to June 30, 2018. Thank you for the opportunity to comment on your recommendations.

Sincerely,

for Emil Notti
Commissioner

LEGISLATIVE AUDIT

Pat Davidson
Legislative Auditor
Alaska State Legislature
Legislative Budget and Audit Committee
Division of Legislative Audit
P.O. Box 113300
Juneau, AK 99559

Dear Mr. Davidson:

I have reviewed the Preliminary Audit Report of the Board of Psychologist and Psychological Associate Examiners (BPPA). I appreciate your thorough work and agree with the recommendations. Below I have noted the steps we either will take, or have already taken, to implement the recommendations.

Recommendation No. 1
Beginning with the next meeting (February 25-26, 2009) of the BPPA a report of the hours of use of each courtesy license will become a standard agenda item.

Recommendation No. 2
This is an administrative issue that the BPPA has little or no control over.

Recommendation No. 3
A representative of the Alaska Psychological Association (AK-PA) meets with the Board at each regularly scheduled meeting of the BPPA. The Board will continue to inform the AK-PA of vacancies or anticipated vacancies so that the membership can contact the Office of the Governor of an interest in serving on the Board. Please be aware that during the lengthy vacancies on the Board noted in the audit, the BPPA took the above steps and were informed that individuals had submitted letters of interest, but no appointments were made.

Sincerely,

Lorin L. Bradbury, Ph.D.

Report Digest #08-20066-10

Audit Report PDF Format *

* Requires Acrobat Reader Get Acrobat Reader

SUMMARY OF: A Sunset Review on the Department of Commerce, Community, and Economic Development (DCCED), Board of Psychologist and Psychological Associate Examiners (BPPA), October 28, 2009

PURPOSE OF THE REPORT

In accordance with Title 24 and Title 44 of the Alaska Statutes (sunset legislation), we have reviewed the activities of BPPA. The purpose of this audit was to determine if there is a demonstrated public need for its continued existence and if it has been operating in an effective manner. As required by AS 44.66.050(a), this report shall be considered by the committee of reference during the legislative oversight process in determining whether BPPA should be reestablished. Currently under AS 08.03.010(c)(18), BPPA will terminate on June 30, 2010. If the legislature does not extend the termination date for the board, BPPA will have one year from that date to conclude its administrative operations.

REPORT CONCLUSIONS

BPPA is operating in an efficient and effective manner and should continue to regulate the psychology profession. The board is safeguarding the public interest by ensuring the competence and integrity of those who present themselves to the public as psychologists and psychological associate examiners. We recommend the legislature extend the board's termination date to June 30, 2018, the maximum extension allowed in statute.

FINDINGS AND RECOMMENDATIONS

1. DCCED Division of Corporations, Business and Professional Licensing's administrative officer should take steps to ensure courtesy licensees comply with reporting requirements.

2. The division's professional licensing administrative officer should take steps to improve administrative support.

3. BPPA and staff within the Office of the Governor should work together to increase the pool of qualified applicants available for board appointments to ensure full representation.

Dear Representative Olson;

I am legislative Chairman of the Alaska Psychological Association (AK-PA) and I am writing to inform you of our associations support of the passage of HB376, the extension of the sunset date of the Board of Psychologists and Psychological Associate Examiners to 2018. The legislative Audit Department recommended the longest sunset extension allowed, eight years (8). This action speaks to the effectiveness of the Psychological Licensing Board.

The Alaska Psychological Association (AK-PA) feels that the Board is meeting its obligations to properly license the professionals in our field and is protecting the public by ensuring the proper education and competency of licensed psychologists in the Alaska. Please pass HB376 and allow this board to continue doing its work.

I will be teleconferencing with you on this bill as it is heard in the House HESS committee and Labor and Commerce Committee.

Sincerely,
Phillip Baker Ed.D.

CSHB 381 (JUD)
SELF DEFENSE

The House Judiciary CS for HB 381 recognizes that Alaskan residents have right to use deadly force to protect their families, persons and property whether they are at home, work, or in any place they have a right to be present. It does this by expanding your right to stand your ground to where they have a right to be.

By expanding the rights of Alaskans to stand their ground to any place they are legally present we tell our residents that their decision to use deadly force to defend themselves and their families will not be second judged, and makes it clear that it is ***criminals*** who have a duty to retreat.

I believe that HB 381 strengthens the legal recognition of the basic human right of self defense and ask for your support.

This bill amends AS 11.81.335 (justification for the use of deadly force) by adding areas (exceptions) a person is not required to leave prior to the application of deadly force. This bill also adds a new section that provides prima facie evidence for the justification for the use of deadly force. Finally, this bill prohibits a law enforcement agency from arresting a person for using force permitted under AS 11.81.355.

Passage of this legislation will have no fiscal impact on the department.

CS FOR HOUSE BILL NO. 381(JUD)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SIXTH LEGISLATURE - SECOND SESSION

BY THE HOUSE JUDICIARY COMMITTEE

Offered: 3/29/10
Referred: Finance

Sponsor(s): REPRESENTATIVES NEUMAN, Stoltze, Peggy Wilson, Keller, Ramras, Tammie Wilson, Olson, Kelly

A BILL

FOR AN ACT ENTITLED

"An Act relating to self defense in any place where a person has a right to be."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 11.81.335(b) is amended to read:

(b) A person may not use deadly force under this section if the person knows that, with complete personal safety and with complete safety as to others being defended, the person can avoid the necessity of using deadly force by leaving the area of the encounter, except there is no duty to leave the area if the person is

(1) on premises

(A) that the person owns or leases;

(B) where the person resides, temporarily or permanently; or

(C) as a guest or express or implied agent of the owner, lessor, or resident;

(2) a peace officer acting within the scope and authority of the officer's employment or a person assisting a peace officer under AS 11.81.380;

(3) in a building where the person works in the ordinary course of the

person's employment; [OR]

(4) protecting a child or a member of the person's household**; or**

(5) in any place where the person has a right to be.

ANALYSIS: *(Attach a separate page if necessary)*

House Bill 381 expands the places from which a person need not retreat before using deadly force in self-defense to any place the person has a right to be. Thus, even though a person knows that with complete safety to oneself and others the person can leave the area of the encounter, the person is justified in using deadly force if the person is in a place the person has a right to be.

This bill will make prosecution of homicide cases more difficult for the prosecution, and it will probably result in more jury trials. The Criminal Division anticipates it would need 2 new FTE attorney positions to handle the increased cases, to both screen referrals and prosecute those that are accepted.

Re: House Bill 381

Dear Chairman Ramras:

I am writing to express my serious concern over the current language in House Bill 381. Every experienced prosecutor with whom I have spoken about this bill uniformly agrees that it would promote violence and be a bad idea for our state. We believe that as drafted this bill will ***encourage*** unnecessary violence in our state. Whatever source one thinks our laws should be drawn from – the ten commandments which say "thou shall not kill," simple morality, utilitarianism principles of the greater good, or simply the concept that life is sacred –this bill would encourage the needless taking of human life.

AS 11.81.335(b) as currently written sets forth the duty to retreat before resorting to deadly force. It requires that if "with complete personal safety and with complete safety to others being defended, the person can avoid the necessity of using deadly force by leaving the area" then the person must do so. This avoids the ***unnecessary*** loss of life and encourages our citizens to seek ways other than violence to resolve disputes. The addition of subsections 5 and 6 to this statute eradicates the duty to retreat - in fact should they be enacted, there would no longer be a duty to retreat in Alaska. That is to say if person A could avoid killing person B by walking away, he/she would no longer be required to do so, but instead would be authorized ***by law*** to kill person B. This does not promote the protection of our citizens or suggest that Alaska as a state places a high value on life itself. While this is highly unlikely to have been the goal of the bill's sponsors, it is nevertheless the result of what has been proposed. This is best explained by closely examing the language of the proposed changes and additions.

Section 1 of the bill proposes amending AS 11.81.335(b) by adding a subsection (5) that would say there would be no duty to retreat when the person is "in a vehicle" owned, leased, used, or even just occupied with the owner's consent. Here are but just three examples of how this would encourage violence:

First example:

A person picks up a hitchhiker, or offers a ride to someone, and, for whatever reason, a confrontation arises while in the vehicle such that deadly force could be used, but for the duty to retreat. Under the current law the hitchhiker must leave your vehicle if he knows he can do so safely. Under the proposed amendment, that hitchhiker would be authorized to kill the driver instead -- even if he could have simply walked away. These facts are similar of a recent murder trial in Anchorage, but they are close. The defendant was convicted of and sentenced for second-degree murder. The case is now on appeal. Why would we want to say killing another person is okay when it could be avoided? Why would we want to authorize the taking of a life when one could walk away in complete safety?

Second Example:

Joe Smith drives to a party. At the party he gets into an altercation and is thrown out of the party. He goes to his car and gets inside to leave. Before leaving, Mr. Smith sees the person with whom he got into the altercation. Though Mr. Smith is in his car, behind the wheel and ready to leave, he fears the other guy may come after him. Instead of driving off – which he could do with complete personal safety, he gets out of his car and grabs a shotgun from the trunk and kills the other man. Again, these are facts similar to a recent murder trial in Anchorage. The defendant was convicted of and sentenced for manslaughter. The case is now on appeal. This is yet another situation in which our current law requires our citizens to walk away if they can do so with safety, but this proposed change in the law would authorize killing another human being instead.

Third Example:

An occupant in car A points a gun at the occupant in car B. If the occupant in car B can drive away with complete safety, then under the current law he must do so. Under the proposed change, the driver in car B would be authorized by this bill to open fire instead of driving away. The law of self-defense in Alaska requires the state to prove beyond a reasonable doubt a defendant's claim of self-defense is not true. It is difficult to prove a negative. If the state cannot prove the negative beyond a reasonable doubt, then at least the state can try to prove that the driver of car B had a duty to retreat and could have done so. This law would eliminate that duty. That is a recipe for inviting gang violence on our streets. These facts are in fact very similar to another case prosecuted by our department. In 2006 there was a shooting at Reka and Bragaw in Anchorage. Two vehicles with young men exchanging gunfire. One young man was killed and the two men in the other vehicle were convicted of murder. One of those cases is on appeal. This loss of life occurred for one of the participants. What about the innocent bystander? For example, there was the election day shooting in Anchorage when a campaign worker for former Gov. Murkowski was hit by a stray bullet at campaign HQ in Anchorage across from the Sears mall. That case involved two vehicles with young men – not in gangs, but still rivals – who opened fire on one another. While we did prosecute the shooters in that case, do so would have been impossible under this law.

This bill would unintentionally encourage such conduct by making it legal or at least offering a defense – which even if not true – could not be disproved. In each of the four examples the defendants were convicted, but this proposed change would make such prosecutions much harder, if even possible.

The proposed subsection (6) in AS 11.81.330(b) would almost completely eliminate the duty to retreat. That subsection says there is no such duty when a person is "in any place where the person has a right to be." That means in the Diamond Mall, Sears Mall, McDonalds, or any other public location a person is no longer required to walk away from a confrontation, but instead may kill another citizen even if they could have walked away with complete safety. This does not express a value for human life. This does not encourage finding a resolution for disputes other than violence. The only time there would be a duty to retreat is if the person is some place they have no right to be – they must be trespassing, or committing a burglary in order to have such a duty. With this change you might as well simply eliminate the duty to retreat completely from our statutes.

The bill also proposes adding a new section that whittles away some of the other protections put in place to prevent unnecessary taking of human life. Our current self- defense law is set up with both a subjective and objective test to determine when deadly force is authorized. The subjective test means the person using the force believes he/she needs to do so. The objective tests means the "reasonable person" would have concluded the same thing. The added section proposes to eliminate the objective test in several circumstances: burglary, carjacking, and kidnapping. That is it takes away from the jury the question of whether a reasonable person would view a particular event as unlawful force against a person that required a response of deadly force. At first blush this seems reasonable. However, when you examine what is proposed more closely, it becomes very disturbing. To understand why, you must first understand each of the three crimes it references.

Burglary is found in AS 11.46 and not AS 11.41 because it is a crime against property, not a person. Burglary requires a person to enter a building with the intent to commit a crime – theft, vandalism, and assault are all examples. What must be noted though is that no person needs to be in the building in order for this to be a crime. If a person breaks into a home or business to steal something, this is a burglary. If a student breaks into a school to vandalize it, this is a burglary. If a person breaks into a home to assault another person – even if no one is home, this is still a burglary because burglary only addresses the entry of premises with the intent to commit a crime (called a target crime) whether that (target) crime is committed or not. This is why burglary is classified as a crime against property and not against a person.

Under current law ***non***-deadly force may be used to protect property, and deadly force is ***only*** authorized when terminating an arson or attempted arson on a dwelling or occupied building (*See* AS 11.81.350(b)), or when terminating a burglary upon an occupied building or dwelling if the person using the force is in possession or control of that premises, or is a guest. *See* AS 11.81.350(c)).

The current bill would now authorize deadly force against a person who burgles a dwelling whether anyone was home or not. Thus deadly force may be used even when no human life is at risk.

The proposed bill would also authorize ***any*** person to use deadly force as compared to only a person who is in possession or control of or is an invited guest in the dwelling. This means the guy driving down the street may kill a person he thinks is breaking into a home. The state must disprove defense of property, so the state must disprove that a victim was committing burglary. While this new section is fraught with the potential for misunderstandings to lead to the unnecessary loss of human life, there is another more serious problem with this section. This new section authorizes deadly force against a person who is currently committing or ***had committed*** a burglary. This language authorizes vigilantism. It authorizes deadly force against any person whom the person using the force "had reason to believe" ***had*** – past tense – had committed a burglary. This new section says such force ***is*** reasonable. The only question left is if the person using the force also thought it was "reasonable."

The section on carjacking does the same thing. It authorizes the use of deadly force against someone who ***had*** -- past tense -- taken a car by force. Even if no human life was at risk in the taking, this law would say it is okay to kill to keep your car from being taken from you or afterwards. That sounds like retaliation and vigilantism, not like a legislature enacting laws to protect our citizens and improve our lives.

The kidnapping subsection has the same issue with past tense. In each and every section this bill would legalize and authorize vigilantism.

Finally the bill also says no arrest may be made "unless the agency" determines that there is probable cause that the force that used was unlawful. This puts the police in a difficult position especially when confronting gang related violence. It is also unclear to whom "the agency" refers. This could potentially require magistrates and grand juries to start deciding if self-defense has been disproven. This in turn would require the state to act as defense counsel for the defendant to present such a defense only to have to then disprove it. This may sound confusing, and that is because this bill could cause serious problems in the criminal justice system with regard to self-defense law.

Thank you for your consideration of this letter.

Sincerely,

DANIEL S. SULLIVAN
ATTORNEY GENERAL

MEMORANDUM February 26, 2010

SUBJECT: Sectional Summary - HB 381 (Work Order No. 26-LS1534\R)

TO: Representative Mark Neuman
Attn: Jim Ellis

FROM: Gerald P. Luckhaupt
Legislative Counsel

You have requested a sectional summary of the above-described bill. As a preliminary matter, please note that a sectional summary of a bill should not be considered an authoritative interpretation of the bill -- the bill itself is the best statement of its contents.

Section 1 of the bill amends AS 11.81.335(b) by adding to the places or locations where a person can use deadly force in self-defense without having to first leave the area.

Section 2 of the bill amends AS 11.81 by adding a new section that establishes that certain situations constitute prima facie evidence that a person's belief that the use of deadly force was reasonable; and requires law enforcement to make a probable cause determination that the force used by a person was unlawful before the person may be arrested.

Summary of Changes

CH for HB 381 (JUD)
Self Defense

The current form of HB 381 has a narrowed focus that only addresses the requirement to retreat when threatened with specific crimes.

The Judiciary CS removed all sections except for two lines that stated there was no duty to leave the area of a threat if a person had a right to be there.

This change was made to make the bill narrow in its effect and scope allowing for adequate discussion during the remaining legislative session.

Specific changes to the original bill text are as follows:

Page 2, lines 3-4, deleted.

Section 2, deleted.

Section 1, subsection 6, renumbered as section 1, subsection 5.

For version 26-LS1534\S

AS 11.81.335 – 11.81.350

Sec. 11.81.335. Justification: Use of deadly force in defense of self.

(a) Except as provided in (b) of this section, a person who is justified in using nondeadly force in self-defense under AS 11.81.330 may use deadly force in self-defense upon another person when and to the extent the person reasonably believes the use of deadly force is necessary for self-defense against

(1) death;

(2) serious physical injury;

(3) kidnapping, except for what is described as custodial interference in the first degree in AS 11.41.320 ;

(4) sexual assault in the first degree;

(5) sexual assault in the second degree;

(6) sexual abuse of a minor in the first degree; or

(7) robbery in any degree.

(b) A person may not use deadly force under this section if the person knows that, with complete personal safety and with complete safety as to others being defended, the person can avoid the necessity of using deadly force by leaving the area of the encounter, except there is no duty to leave the area if the person is

(1) on premises

(A) that the person owns or leases;

(B) where the person resides, temporarily or permanently; or

(C) as a guest or express or implied agent of the owner, lessor, or resident;

(2) a peace officer acting within the scope and authority of the officer's employment or a person assisting a peace officer under AS 11.81.380;

(3) in a building where the person works in the ordinary course of the person's employment; or

(4) protecting a child or a member of the person's household.

Sec. 11.81.340. Justification: Use of force in defense of a third person.

A person is justified in using force upon another when and to the extent the person reasonably believes it is necessary to defend a third person when, under the circumstances as the person claiming defense of another reasonably believes them to be, the third person would be justified under AS 11.81.330 or 11.81.335 in using that degree of force for self-defense.

Sec. 11.81.350. Justification: Use of force in defense of property and premises.

(a) A person may use nondeadly force upon another when and to the extent the person reasonably believes it is necessary to terminate what the person reasonably believes to be the commission or attempted commission by the other of an unlawful taking or damaging of property or services.

(b) A person may use deadly force upon another when and to the extent the person reasonably believes it necessary to terminate what the person reasonably believes to be the commission or attempted commission of arson upon a dwelling or occupied building.

(c) A person in possession or control of any premises, or a guest or an express or implied agent of that person, may use

(1) nondeadly force upon another when and to the extent the person reasonably believes it is necessary to terminate what the person reasonably believes to be the commission or attempted commission by the other of criminal trespass in any degree upon the premises;

(2) deadly force upon another when and to the extent the person reasonably believes it is necessary to terminate what the person reasonably believes to be a burglary in any degree occurring in an occupied dwelling or building.

(d) *[Repealed, Sec. 7 ch 68 SLA 2006].*

(e) A person

(1) in a vehicle, or forcibly removed from a vehicle, may use deadly force upon another when and to the extent the person reasonably believes it is necessary to terminate what the person reasonably believes to be a carjacking of that vehicle at or about the time the vehicle is carjacked;

(2) outside of a vehicle may use deadly force upon another when and to the extent the person reasonably believes it is necessary to terminate what the person reasonably believes to be the theft of that vehicle when another person, other than the perceived offender, is inside of the vehicle; this paragraph does not apply to a person outside of a vehicle who is involved in a dispute with a person inside of the vehicle who is a household member of that person; in this paragraph, "household member" has the meaning given in AS 18.66.990 .

(f) A person justified in using force under this section does not have a duty to leave or attempt to leave the area of the encounter before using force.

(g) In (e) of this section,

(1) "carjacking" means a robbery involving the taking or attempted taking of a vehicle from a person in possession of the vehicle;

(2) "vehicle" means a "motor vehicle" as defined in AS 28.40.100 , an aircraft, or a watercraft.

776.031 Use of force in defense of others.--A person is justified in the use of force, except deadly force, against another when and to the extent that the person reasonably believes that such conduct is necessary to prevent or terminate the other's trespass on, or other tortious or criminal interference with, either real property other than a dwelling or personal property, lawfully in his or her possession or in the possession of another who is a member of his or her immediate family or household or of a person whose property he or she has a legal duty to protect. However, the person is justified in the use of deadly force only if he or she reasonably believes that such force is necessary to prevent the imminent commission of a forcible felony. A person does not have a duty to retreat if the person is in a place where he or she has a right to be.

History.--s. 13, ch. 74-383; s. 1189, ch. 97-102; s. 3, ch. 2005-27.

Utah Code
Title 76 Utah Criminal Code
Chapter 2 Principles of Criminal Responsibility
Section 402 Force in defense of person -- Forcible felony defined.

76-2-402. Force in defense of person -- Forcible felony defined.

(1) A person is justified in threatening or using force against another when and to the extent that he or she reasonably believes that force is necessary to defend himself or a third person against such other's imminent use of unlawful force. However, that person is justified in using force intended or likely to cause death or serious bodily injury only if he or she reasonably believes that force is necessary to prevent death or serious bodily injury to himself or a third person as a result of the other's imminent use of unlawful force, or to prevent the commission of a forcible felony.

(2) A person is not justified in using force under the circumstances specified in Subsection (1) if he or she:

(a) initially provokes the use of force against himself with the intent to use force as an excuse to inflict bodily harm upon the assailant;

(b) is attempting to commit, committing, or fleeing after the commission or attempted commission of a felony; or

(c) (i) was the aggressor or was engaged in a combat by agreement, unless he withdraws from the encounter and effectively communicates to the other person his intent to do so and, notwithstanding, the other person continues or threatens to continue the use of unlawful force; and

(ii) for purposes of Subsection (i) the following do not, by themselves, constitute "combat by agreement":

(A) voluntarily entering into or remaining in an ongoing relationship; or

(B) entering or remaining in a place where one has a legal right to be.

(3) A person does not have a duty to retreat from the force or threatened force described in Subsection (1) in a place where that person has lawfully entered or remained, except as provided in Subsection (2)(c).

House Bill 386
Sponsor Statement

"An Act establishing a uniform format and procedure for citations for certain violations of state law; relating to the form, issuance, and disposition of citations for certain violations; relating to certain crimes and penalties for noncompliance with citations; and providing for an effective date."

House Bill 386 gives the Department of Public Safety necessary authority to prescribe a uniform citation format and process. Standardizing the citation process will improve efficiency and interdepartmental communications, facilitating electronic sharing of citation data between law enforcement, prosecution, courts and state and municipal collection departments.

By standardizing deadlines for payments, responses and paperwork filing by the citation issuer, HB 386 will also reduce confusion for citizens receiving citations and allow more fines to be paid through the courts' online e-payment system. A standard process is also an integral step in preparing for a statewide database and digital interoperability.

House Bill 386
Summary of Changes

The House Judiciary Committee made the following changes:

- Added sections of existing statute pertaining to citations that were inadvertently overlooked in the original draft (sections 32 and 57).
- Removed language stating that a citation is considered a summons for failure to obey a citation and the court may issue a bench warrant wherever it appeared in the bill (sections 2, 6, 33, 36, 42, and 55).
- Amended section 22 to clarify that the commissioner of the Department of Public Safety shall adopt regulations in order to implement the standard citation format. This language makes section 22 consistent with section 48 of the bill.

This bill provides for statutory amendments and would require all citations issued in Alaska to be in the form designated by the Department of Public Safety. According to the new section, AS 12.25.175(b), DPS will either "provide or prescribe citation forms for use by...persons who are authorized by law to issue citations." The Department of Law does not anticipate a fiscal impact from this bill.

HB 386
Uniform Citations - Overview
Prepared by Representative Mike Hawker's Office

HB 386 establishes and requires the use of a uniform format, process and standard deadlines for citations issued in the state. The process is contained in sections 21 – 31 of the bill. The rest of the bill adopts the standard process for various citations.

Uniform Citation Process and Format contained in AS 12.25.175 – 12.25.230:

- 12.25.175 (new section of law) sets out requirements for the standard citation format, requires the commissioner of the Department of Public Safety to provide or prescribe the standard citation formats, and enables the commissioner to adopt regulations. Uniform citations must adhere to a statewide numbering system and contain specific information described in AS 12.25.200 (b). The citation issuer is also required to make an oath or affirmation, if authorized to do so, or make a statement under penalty of perjury that the citation was true and personally served on the person charged.

- 12.25.180 (existing law) clarifies when an officer can issue a citation instead of making an arrest. Most of the changes reword existing law for clarity and have no substantive effect.
  - In (a)(2), the requirement that the officer have "reasonable and probable cause to believe" that a person is a danger to self or others is replaced with "reasonably believes." Probable cause indicates there are certain elements that must be met, whereas a reasonable belief can be articulated more easily. Because it is within the officer's discretion to arrest or issue a citation, that determination should be based on a reasonable belief, rather than probable cause.
  - In (b)(2), the requirement that the person receiving the citation provide a written promise to appear in court is removed to facilitate electronic transmission of the citation. The required issuer's oath or statement that a copy of the citation was correctly served (required by AS 12.25.175) satisfies the intent of this statute.

- 12.25.190 (existing law) clarifies when a person shall be given a five-day notice to appear in court. Most of the changes are language repeals to accommodate the standard process adopted in this legislation and rewording for clarity.
  - The provision allowing a person to request a hearing earlier than five days after the citation is issued is repealed. Officers in the field cannot always forward a citation to the court for a hearing in fewer than five days.

- 12.25.195 (existing law) outlines the disposition of "scheduled offenses" – violations that have an established bail or fine amount. If a person doesn't contest the citation, there is a standard 30 day deadline for paying the bail or fine, regardless of the type of citation.

- 12.25.200 (existing law) specifies a format for citations. The changes to this section expand its applicability to all citations, instead of just those issued by law enforcement.

- 12.25.210 (existing law) outlines recordkeeping requirements for citation issuers. The changes to this section expand its applicability to all citations, instead of just those issued by law enforcement. This section also sets a 10 working day deadline for citations to be filed with the court and clarifies that missing the filing deadline does not negate the citation.

- 12.25.230 (existing law) outlines the penalties for failure to pay a fine or appear in court, as required by a citation. The current language is confusing. While having two sections implies

that that each offense should have a different penalty, because the type of misdemeanor is not defined, they can be interpreted to apply the same penalty to both types of citation. Under HB 386, there would be a bright line between offenses that require a court appearance and "scheduled offenses" which carry a particular fine and can be paid by mail.

- 12.25.230 (a) states that the penalty for failing to appear to answer a citation that requires a court appearance would be a class A misdemeanor (see penalties above).
- 12.25.230 (b) states that the penalty for failing to appear or pay the bail or fine for a citation for a "scheduled offense" is a class B misdemeanor, which is punishable by up to a $2,000 fine and/or imprisonment of up to 90 days.

Statutory changes to implement the Uniform Citation Process and Format for various violations:

- Sections 1, 4, 7, 9, 14, 17, 32, 35, 38, 39, 40, 41, 45, 46, 50, 57 and 59 are statutory references changed or added to reference the standard citation process and format:

- Sections 2, 5, 33, 36, 42, 55, and 57 reflect the standard deadline of 30 days for payment for a "scheduled offense" citation (see AS 12.25.195). These sections also add language specifying that this deadline is for violators who plead "no contest," since a person contesting the citation wouldn't be sending in a payment.

- Sections 3, 6, 34, 37, 43, 54, 56 and 58 are individual penalty sections that are amended or repealed and reenacted to adopt the uniform penalties in AS 12.25.230.

- Sections 10, 14, 18, 46 and 50 remove the condition that a citation be "in writing" (see notes for AS 12.25.180 (b)(2)).

- Sections 11, 15, 19, 47, and 51 reflect the five day notice and repeal language allowing a person to request an earlier hearing (see notes for AS 12.25.190).

- Sections 12 and 52 reflect the 10 day deadline for a citation to be filed with the court by the citation issuer (see AS 12.25.210).

- Sections 13, 16, 20, 48, and 53 repeal language specifying what needs to be in particular citations and instead state that a citation that complies with the uniform format is considered to be a lawful complaint for the purposes of prosecution.

Miscellaneous Sections:

- Sections 8 and 24 ensure that the law is consistent after other previously enacted bills sunset. The language mirrors language found in sections 7 and 23, respectively.

- Section 44 allows citations to be given for violations in the Knik River Public Use Area.

- Section 49 allows DPS to establish regulations to implement standardized citations.

- Section 60 repeals statutes regarding citation formats that are made moot by adoption of the standardized format in this bill.

- Sections 61-65 provide applicability instructions, transitional provisions and effective dates.

CS FOR HOUSE BILL NO. 386(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SIXTH LEGISLATURE - SECOND SESSION

BY THE HOUSE FINANCE COMMITTEE

Offered:
Referred:

Sponsor(s): REPRESENTATIVE HAWKER

A BILL

FOR AN ACT ENTITLED

"An Act establishing a uniform format and procedure for citations for certain violations of state law; relating to the form, issuance, and disposition of citations for certain violations; relating to certain crimes and penalties for noncompliance with citations; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 04.16.205(a) is amended to read:

(a) A person who possesses alcoholic beverages in a municipality or established village in violation of AS 04.11.501 or an ordinance adopted under AS 04.11.501 may, upon conviction, be punished by a fine not to exceed $1,000 and shall forfeit the seized alcoholic beverages. When a peace officer stops or contacts a person concerning a violation of AS 04.11.501 or an ordinance adopted under AS 04.11.501, the peace officer shall seize the alcoholic beverages and may issue a citation to the person as provided in **AS 12.25.175 - 12.25.230** [AS 12.25.180].

*** Sec. 2.** AS 04.16.205(b) is amended to read:

(b) **If a** [A] person cited for a violation of AS 04.11.501 or an ordinance adopted under AS 04.11.501 for which a bail amount has been established under (c) of this section **does not contest the citation, the person** may, within 30 days after the date the citation is issued,

(1) mail or personally deliver to the clerk of the court in which the citation is filed by the peace officer the amount of bail indicated on the citation and a copy of the citation indicating that the right to an appearance is waived, a plea of no contest is entered, and the bail and all alcoholic beverages seized are forfeited; or

(2) perform community work in lieu of payment of the fine or a portion of the fine as provided in (d) of this section.

*** Sec. 3.** AS 04.16.205(f) is repealed and reenacted to read:

(f) A person cited under this section is guilty of failure to obey a citation under AS 12.25.230 if the person fails to pay the fine, appear in court as required, or provide proof of performance to the court as specified in (d)(1) of this section.

*** Sec. 4.** AS 04.21.065(d) is amended to read:

(d) A peace officer may issue a citation for a violation of this section. The provisions of **AS 12.25.175 - 12.25.230** [AS 12.25.180(b) AND 12.25.190 - 12.25.230] apply to the issuance of a citation under this subsection.

*** Sec. 5.** AS 04.21.065(h) is amended to read:

(h) **If a** [A] person cited for a violation under this section **does not contest the citation, the person** may, **on or before the 30th day** [WITHIN 15 DAYS] after the date of the citation, mail or personally deliver to the clerk of the court in which the citation is filed

(1) the amount of bail indicated on the citation for the violation; and

(2) a copy of the citation indicating that the right to an appearance is waived, a plea of no contest is entered, and the bail is forfeited.

*** Sec. 6.** AS 04.21.065(j) is repealed and reenacted to read:

(j) A person cited under this section is guilty of failure to obey a citation under AS 12.25.230 if the person fails to pay the bail amount established under (g) of this section or to appear in court as required.

*** Sec. 7.** AS 05.25.080(b) is amended to read:

(b) A peace officer may enforce this chapter and regulations adopted under this chapter and, in the exercise of enforcement, may stop and, if the peace officer has probable cause to believe a violation of this chapter has occurred, may board a boat subject to this chapter. A peace officer may issue a citation as provided in **AS 12.25.175 - 12.25.230** [AS 12.25.180] to a person who violates a provision of this chapter.

*** Sec. 8.** AS 05.25.080, as repealed and reenacted by sec. 18, ch. 28, SLA 2000, is amended to read:

Sec. 05.25.080. Enforcement. A peace officer may enforce this chapter and, in the exercise of enforcement, may stop and**, if the peace officer has probable cause to believe a violation of this chapter has occurred,** board watercraft subject to this chapter. **A peace officer may issue a citation as provided in AS 12.25.175 - 12.25.230 to a person who violates a provision of this chapter.**

*** Sec. 9.** AS 08.01.102 is amended to read:

Sec. 08.01.102. Citation for unlicensed practice or activity. The department may issue a citation for a violation of a license requirement under this chapter, except a requirement to have a license under AS 43.70, if there is probable cause to believe a person has practiced a profession or engaged in business for which a license is required without holding the license. Each day a violation continues after a citation for the violation has been issued constitutes a separate violation. **A citation issued under this section must comply with the standards adopted under AS 12.25.175 - 12.25.230.**

*** Sec. 10.** AS 08.01.103(a) is amended to read:

(a) [A CITATION ISSUED UNDER AS 08.01.102 MUST BE IN WRITING.] A person receiving the citation **issued under AS 08.01.102** is not required to sign a notice to appear in court.

*** Sec. 11.** AS 08.01.103(b) is amended to read:

(b) The time specified in the notice to appear on a citation issued under AS 08.01.102 shall be at least five **working** days [, NOT INCLUDING WEEKENDS AND HOLIDAYS,] after the issuance of the citation [, UNLESS THE PERSON CITED REQUESTS AN EARLIER HEARING].

*** Sec. 12.** AS 08.01.103(d) is amended to read:

(d) **On or before the 10th working day after the issuance of a citation, the** [THE] department shall deposit the original or a copy of the citation with a court having jurisdiction over the alleged offense. Upon its deposit with the court, the citation may be disposed of only by trial in the court or other official action taken by the magistrate, judge, or prosecutor. The department may not dispose of a citation, copies of it, or [OF] the record of its issuance except as required under this subsection and (e) of this section.

*** Sec. 13.** AS 08.01.103(f) is repealed and reenacted to read:

(f) A citation issued under AS 08.01.102 is considered to be a lawful complaint for the purpose of prosecution.

*** Sec. 14.** AS 08.18.118(a) is amended to read:

(a) A citation issued under this chapter must **comply with AS 12.25.175 - 12.25.230** [BE IN WRITING]. A person receiving the citation is not required to sign a notice to appear in court.

*** Sec. 15.** AS 08.18.118(b) is amended to read:

(b) The time specified in the notice to appear on a citation issued under this chapter must be at least five **working** days [, NOT INCLUDING WEEKENDS AND HOLIDAYS,] after the issuance of the citation [, UNLESS THE PERSON CITED REQUESTS AN EARLIER HEARING].

*** Sec. 16.** AS 08.18.118(f) is repealed and reenacted to read:

(f) A citation issued under this chapter is considered to be a lawful complaint for the purpose of prosecution.

*** Sec. 17.** AS 08.40.340 is amended to read:

Sec. 08.40.340. Issuance of citations. The department may issue a citation **that complies with AS 12.25.175 - 12.25.230** for a violation if there is probable cause to believe a person has violated AS 08.40.210 - 08.40.490. Each day a violation continues after a citation for the violation has been issued constitutes a separate violation.

*** Sec. 18.** AS 08.40.350(a) is amended to read:

(a) [A CITATION ISSUED UNDER AS 08.40.340 MUST BE IN

WRITING.] A person receiving the citation **under AS 08.40.340** is not required to sign a notice to appear in court.

*** Sec. 19.** AS 08.40.350(b) is amended to read:

(b) The time specified in the notice to appear on a citation issued under AS 08.40.340 must be at least five **working** days [, NOT INCLUDING WEEKENDS AND HOLIDAYS,] after the issuance of the citation [, UNLESS THE PERSON CITED REQUESTS AN EARLIER HEARING].

*** Sec. 20.** AS 08.40.350(f) is repealed and reenacted to read:

(f) A citation issued under AS 08.40.340 is considered to be a lawful complaint for the purpose of prosecution.

*** Sec. 21.** AS 12.25 is amended by adding a new section to article 2 to read:

Sec. 12.25.175. Uniform citation format and procedure. (a) Notwithstanding any contrary provision of law, a citation issued by a peace officer and by another person who is authorized by law to issue a citation in the state must comply with standards concerning uniform citation format and procedure adopted by the Department of Public Safety. The standards must include

(1) a statewide numbering system for citations;

(2) a requirement that a citation be made upon oath or affirmation before a person authorized by law to administer oaths or affirmations or signed with a certification under penalty of perjury that the citation is true and was personally served on the person charged;

(3) a requirement that the citation contain information required by AS 12.25.200(b).

(b) The commissioner of public safety shall provide or prescribe citation forms for use by peace officers and other persons who are authorized by law to issue citations.

(c) The commissioner of public safety shall adopt regulations under AS 44.62 to implement this section.

*** Sec. 22.** AS 12.25.180 is amended to read:

Sec. 12.25.180. When peace officer may issue citation or take person before the court. (a) When a **peace officer stops or contacts a** person [IS STOPPED

OR CONTACTED BY A PEACE OFFICER] for the commission of a misdemeanor or the violation of a municipal ordinance, the **officer** [PERSON] may, in the **officer's** discretion, **issue** [OF THE CONTACTING PEACE OFFICER, BE ISSUED] a citation **to the person** instead of **taking the person** [BEING TAKEN] before a judge or magistrate under AS 12.25.150, unless

(1) the person does not furnish satisfactory evidence of identity;

(2) the contacting officer **reasonably believes** [HAS REASONABLE AND PROBABLE CAUSE TO BELIEVE] the person is a danger to self or others;

(3) the crime for which the person is contacted is one involving violence or harm to another person or to property;

(4) the person asks to be taken before a judge or magistrate under AS 12.25.150; or

(5) the peace officer has probable cause to believe the person committed a crime involving domestic violence; in this paragraph, "crime involving domestic violence" has the meaning given in AS 18.66.990.

(b) When a [PERSON IS STOPPED OR CONTACTED BY A] peace officer **stops or contacts a person** for the commission of an infraction or a violation, the **officer** [PERSON] shall **issue** [BE ISSUED] a citation instead of **taking the person** [BEING TAKEN] before a judge or magistrate under AS 12.25.150, unless

(1) the person does not furnish satisfactory evidence of identity; or

(2) the person refuses to accept **service of** the citation [OR TO GIVE A WRITTEN PROMISE TO APPEAR AS PROVIDED FOR UNDER AS 12.25.190(c)].

*** Sec. 23.** AS 12.25.190 is amended to read:

Sec. 12.25.190. When person to be given five-day notice to appear in court. (a) When a person is contacted by a peace officer and the peace officer exercises **one of** the **options** [OPTION] provided for in AS 12.25.180, the officer shall prepare a written citation and issue it to the person.

(b) The time specified in the notice to appear shall be at least five **working** days after [THE ALLEGED VIOLATION OR] the issuance of the citation [, WHICHEVER IS LATER, UNLESS THE PERSON CITED REQUESTS AN

EARLIER HEARING].

(c) The person cited [FOR THE CRIME] shall **accept** [GIVE A WRITTEN PROMISE TO APPEAR IN COURT BY SIGNING] at least one copy of the written citation prepared by the peace officer [, AND THE OFFICER SHALL DELIVER A COPY OF THE CITATION TO THE PERSON. THE WRITTEN PROMISE REQUIREMENT OF THIS SUBSECTION DOES NOT APPLY TO BOATING CITATIONS FOR WHICH A BAIL SCHEDULE HAS BEEN ESTABLISHED UNDER AS 05.25.090(c), MOTOR VEHICLE AND TRAFFIC CITATIONS FOR WHICH A BAIL OR FINE SCHEDULE HAS BEEN ESTABLISHED UNDER AS 28.05.151, FISH AND GAME CITATIONS FOR WHICH A BAIL SCHEDULE HAS BEEN ESTABLISHED UNDER AS 16.05.165, CITATIONS ISSUED UNDER AS 04.21.065, CITATIONS FOR SKIING VIOLATIONS ISSUED UNDER AS 05.45.100, CITATIONS ISSUED UNDER AS 18.35.341, CITATIONS ISSUED IN STATE PARK AND RECREATIONAL FACILITIES UNDER AS 41.21.960, OR LITTERING CITATIONS ISSUED UNDER AS 46.06.080].

*** Sec. 24.** AS 12.25.190(c), as repealed and reenacted by sec. 26, ch. 28, SLA 2000, and by sec. 41, ch. 12, SLA 2006, is amended to read:

(c) The person cited [FOR THE CRIME] shall **accept** [GIVE A WRITTEN PROMISE TO APPEAR IN COURT BY SIGNING] at least one copy of the written citation prepared by the peace officer [, AND THE OFFICER SHALL DELIVER A COPY OF THE CITATION TO THE PERSON. THE WRITTEN PROMISE REQUIREMENT OF THIS SUBSECTION DOES NOT APPLY TO MOTOR VEHICLE AND TRAFFIC CITATIONS FOR WHICH A BAIL OR FINE SCHEDULE HAS BEEN ESTABLISHED UNDER AS 28.05.151, FISH AND GAME CITATIONS FOR WHICH A BAIL SCHEDULE HAS BEEN ESTABLISHED UNDER AS 16.05.165, CITATIONS ISSUED UNDER AS 04.21.065, CITATIONS FOR SKIING VIOLATIONS ISSUED UNDER AS 05.45.100, CITATIONS ISSUED UNDER AS 18.35.341, CITATIONS ISSUED IN STATE PARK AND RECREATIONAL FACILITIES UNDER AS 41.21.960, OR LITTERING CITATIONS ISSUED UNDER AS 46.06.080].

*** Sec. 25.** AS 12.25.195(a) is amended to read:

(a) **If a** [A] person cited for an offense for which a scheduled amount of bail or a fine has been established **does not contest the citation, the person** may mail or personally deliver to the clerk of the court with appropriate jurisdiction if a bailable offense, or to the clerk of the municipality that issued the citation if a scheduled municipal fine, the amount of the bail or fine indicated on the citation for the offense together with a copy of the citation signed by the person indicating the person's waiver of court appearance, entry of plea of no contest, and forfeiture of bail or fine. **The citation with the bail or fine shall be mailed or personally delivered on or before the 30th day after the date the citation was issued** [A MOTOR VEHICLE OR TRAFFIC CITATION MAY BE MAILED OR PERSONALLY DELIVERED WITHIN FIVE DAYS OF THE DATE OF THE CITATION. A CITATION FOR A SCHEDULED OFFENSE OTHER THAN A MOTOR VEHICLE OR TRAFFIC CITATION MAY BE MAILED OR PERSONALLY DELIVERED WITHIN 15 DAYS OF THE DATE OF THE CITATION].

*** Sec. 26.** AS 12.25.200 is amended to read:

Sec. 12.25.200. Form for citations. (a) The chief administrative officer of each law enforcement agency **or other agency authorized to issue citations** in the state is responsible for the issuance of books containing appropriate citations, and shall maintain a record of each book and each citation contained in it and shall require and retain a receipt for every book issued to a peace officer **or other person authorized to issue citations**.

(b) A citation issued under AS 12.25.180 **or other law authorizing the issuance of a citation** must **be in writing and** indicate**, if applicable,**

(1) the amount of bail or fine and the surcharge applicable to the offense;

(2) the procedure a person must follow in responding to the citation;

(3) that**,** if the person fails to pay the bail or fine**,** the person must appear in court;

(4) that failure to pay the bail or fine or appear in court for an offense involving a moving motor vehicle may result in

(A) suspension of the person's driver's license, privilege to

drive, or privilege to obtain a license; or

(B) attachment of the person's permanent fund dividend to pay the fine plus court and collection costs under AS 28.05.155; and

(5) that the person has a right to

(A) a trial;

(B) engage counsel;

(C) confront and question witnesses;

(D) testify; [AND]

(E) subpoena witnesses on the person's behalf.

*** Sec. 27.** AS 12.25.210(a) is amended to read:

(a) A peace officer **or other person authorized by law to issue a citation**, upon issuing a citation to an alleged violator under AS 12.25.180 **or other law, on or before the 10th working day after issuance**, shall deposit the original or a copy of the citation with a court having jurisdiction over the alleged offense. If the citation charges an offense under a municipal ordinance for which a scheduled fine has been established, the peace officer shall deposit the original or a copy of the citation with the clerk of the municipality that issued the citation, unless otherwise provided under rule adopted by the supreme court. **Failure to file the citation within the prescribed time is not a basis for dismissal of the citation.**

*** Sec. 28.** AS 12.25.210(d) is amended to read:

(d) The chief administrative officer of each law enforcement **or other** agency shall require each officer **or other person** in the agency to **retain** [RETURN] a copy of every citation issued by the officer **or other person** to an alleged violator of a law or ordinance and all copies of every citation that has been spoiled or upon which any entry has been made and not issued to an alleged violator.

*** Sec. 29.** AS 12.25.210(e) is amended to read:

(e) The chief administrative officer of each law enforcement **or other** agency shall also maintain, in connection with every citation issued by an officer **or other person** in the agency, a record of the disposition of the charge by the court in which the original or copy of the citation was deposited.

*** Sec. 30.** AS 12.25.230(a) is amended to read:

(a) Except as provided in (b) of this section **or otherwise specifically provided by law**, a person who fails to appear in court to answer the citation, regardless of the disposition of the charge for which the citation was issued, is guilty of a **class A** misdemeanor [AND UPON CONVICTION IS PUNISHABLE BY A FINE OF NOT MORE THAN $1,000, OR BY IMPRISONMENT FOR NOT MORE THAN ONE YEAR, OR BY BOTH].

*** Sec. 31.** AS 12.25.230(b) is repealed and reenacted to read:

(b) A person who fails to pay the bail or fine or appear in court in response to a citation for which a scheduled bail or fine is established, regardless of the disposition of the charge for which the citation was issued, is guilty of a class B misdemeanor.

*** Sec. 32.** AS 16.05.165(a) is amended to read:

(a) When a peace officer stops or contacts a person concerning a violation of this title except AS 16.51 and AS 16.52 or of a regulation adopted under this title except AS 16.51 and AS 16.52 that is a misdemeanor, the peace officer may, in the officer's discretion, issue a citation to the person as provided in **AS 12.25.175 - 12.25.230** [AS 12.25.180].

*** Sec. 33.** AS 16.05.165(c) is amended to read:

(c) **If a** [A] person cited for a misdemeanor for which a bail amount has been established under (b) of this section **does not contest the citation, the person** may, **on or before the 30th day** [WITHIN 15 DAYS] after the date of the citation, mail or personally deliver to the clerk of the court in which the citation is filed by the peace officer

(1) the amount of bail indicated on the citation for that offense; and

(2) a copy of the citation indicating that the right to an appearance is waived, a plea of no contest is entered, and the bail is forfeited.

*** Sec. 34.** AS 16.05.165(e) is repealed and reenacted to read:

(e) A person cited under this section is guilty of failure to obey a citation under AS 12.25.230 if the person fails to pay the bail amount established under (b) of this section or fails to appear in court as required.

*** Sec. 35.** AS 18.35.341(a) is amended to read:

(a) A peace officer may issue a citation for a violation of AS 18.35.300 or

18.35.305 committed in the officer's presence or for a violation of AS 18.35.330. The provisions of **AS 12.25.175 - 12.25.230** [AS 12.25.180(b) AND 12.25.190 - 12.25.230] apply to the issuance of a citation under this subsection.

*** Sec. 36.** AS 18.35.341(e) is amended to read:

(e) **If a** [A] person cited for a violation under this section **does not contest the citation, the person** may, **on or before the 30th day** [WITHIN 15 DAYS] after the date of the citation, mail or personally deliver to the clerk of the court in which the citation is filed

(1) the amount of bail indicated on the citation for that violation; and

(2) a copy of the citation indicating that the right to an appearance is waived, a plea of no contest is entered, and the bail is forfeited.

*** Sec. 37.** AS 18.35.341(g) is repealed and reenacted to read:

(g) A person cited under this section is guilty of failure to obey a citation under AS 12.25.230 if the person fails to pay the bail amount established under (d) of this section or fails to appear in court as required.

*** Sec. 38.** AS 28.01.010(h) is amended to read:

(h) A municipality may issue a citation for a traffic offense only if the citation complies with the provisions of **AS 12.25.175 and 12.25.200** [AS 12.25.200].

*** Sec. 39.** AS 28.05.041(a) is amended to read:

(a) The commissioner of administration shall prescribe and provide suitable application forms, certificates of title and registration, driver's licenses, and all other forms necessary to carry out the provisions of this title and regulations adopted under this title, the administration of which is vested in the Department of Administration. The commissioner of public safety shall prescribe and provide suitable forms necessary to carry out the provisions of this title and regulations adopted under this title, the administration of which is vested in the Department of Public Safety, including a standard citation form that meets the requirements of **AS 12.25.175 and 12.25.200** [AS 12.25.200] and that is in a form necessary to identify the offender and the offense and otherwise necessary to meet the needs of the public safety and the administration of justice as required under **AS 12.25.175 and 12.25.200** [THAT SECTION].

* **Sec. 40.** AS 28.32.010(b) is amended to read:

(b) A peace officer, or an employee of the Department of Public Safety who is authorized by the commissioner of that department to enforce both hazardous materials and commercial vehicle safety regulations, may issue a citation under **AS 12.25.175 - 12.25.230** [AS 12.25.180 - 12.25.230] to a person who violates a regulation adopted under AS 28.05.011(a)(2). An employee of the Department of Public Safety who is authorized by the commissioner of public safety to enforce both hazardous materials and commercial vehicle safety regulations may not take a person into custody under AS 12.25.180(b).

* **Sec. 41.** AS 41.21.960(a) is amended to read:

(a) When a peace officer stops or contacts a person concerning the commission of a misdemeanor offense committed within a park or recreational facility subject to the department's supervision, the officer may issue a citation to the person, subject to the provisions of **AS 12.25.175 - 12.25.230** [AS 12.25.180 - 12.25.230]. The person receiving the citation may not be required to endorse the citation.

* **Sec. 42.** AS 41.21.960(c) is amended to read:

(c) **If a** [A] person cited for an offense for which a bail amount has been established under (b) of this section **does not contest the citation, the person** may, **on or before the 30th day after** [WITHIN 15 DAYS FROM] the date of the citation, mail or personally deliver to the clerk of the court having jurisdiction over the place where the offense occurred

(1) the amount of bail indicated on the citation for that offense; and

(2) a copy of the citation indicating the offender's waiver of appearance, plea of no contest, and direction to forfeit the bail and any items seized from the offender.

* **Sec. 43.** AS 41.21.960(e) is repealed and reenacted to read:

(e) A person cited under this section is guilty of failure to obey a citation under AS 12.25.230 if the person fails to pay the bail amount established under (b) of this section or fails to appear in court as required.

* **Sec. 44.** AS 41.23.210(b) is amended to read:

(b) A person designated in (a) of this section may, when enforcing the

provisions of AS 41.23.180 - 41.23.230 or a regulation adopted under AS 41.23.180 - 41.23.230,

(1) execute a warrant or other process issued by an officer or court of competent jurisdiction;

(2) administer or take an oath, affirmation, or affidavit; and

(3) **issue a citation or** arrest a person who violates a provision of AS 41.23.180 - 41.23.230 or a regulation adopted under AS 41.23.180 - 41.23.230.

*** Sec. 45.** AS 41.23.210 is amended by adding a new subsection to read:

(c) A citation issued under (b) of this section must comply with the provisions of AS 12.25.175 - 12.25.230.

*** Sec. 46.** AS 44.29.094(a) is amended to read:

(a) A citation issued under AS 44.29.092 must **comply with the standards adopted under AS 12.25.175 and 12.25.200** [BE IN WRITING] and must contain a notice to appear in court. A person receiving the citation is not required to sign the notice.

*** Sec. 47.** AS 44.29.094(b) is amended to read:

(b) The time specified in the notice to appear in court on the citation shall be at least five **working** days [, NOT INCLUDING WEEKENDS AND HOLIDAYS,] after the issuance of the citation [, UNLESS THE PERSON CITED REQUESTS AN EARLIER APPEARANCE IN COURT].

*** Sec. 48.** AS 44.29.094(f) is repealed and reenacted to read:

(f) A citation issued under AS 44.29.092 is considered to be a lawful complaint for the purpose of prosecution.

*** Sec. 49.** AS 44.41.020 is amended by adding a new subsection to read:

(f) The Department of Public Safety shall establish by regulation standardized forms for citations issued by law enforcement officers and other persons authorized by law to issue citations in the state.

*** Sec. 50.** AS 45.75.131(b) is amended to read:

(b) A citation issued under this section must **comply with the standards adopted under AS 12.25.175 - 12.25.230** [BE IN WRITING]. A person receiving the citation is not required to sign a promise to appear in court.

*** Sec. 51.** AS 45.75.131(c) is amended to read:

(c) The time specified in the notice to appear on a citation issued under this section must be at least **five working** [15] days after the issuance of the citation [, UNLESS THE PERSON CITED REQUESTS AN EARLIER HEARING].

*** Sec. 52.** AS 45.75.131(e) is amended to read:

(e) **On or before the 10th working day after issuance, a** [A] peace officer or an employee who issues a citation under this section shall deposit the original or a copy of the citation with a court having jurisdiction over the alleged offense. Upon its deposit with the court, the citation may be disposed of only by trial in the court or other official action taken by the magistrate, judge, or prosecutor. The peace officer or employee who issued the citation may not dispose of it or copies of it or of the record of its issuance except as required under this subsection and (f) of this section.

*** Sec. 53.** AS 45.75.131(g) is repealed and reenacted to read:

(g) A citation issued under this section is considered to be a lawful complaint for the purpose of prosecution.

*** Sec. 54.** AS 45.75.131(h) is amended to read:

(h) Unless the citation has been voided or otherwise dismissed by the magistrate, judge, or prosecutor, or bail has been forfeited under AS 45.75.133, a person who fails to appear in court to answer a citation issued under this section, regardless of the disposition of the charge for which the citation was issued, is guilty of **failure to obey a citation under AS 12.25.230(b)** [A CLASS B MISDEMEANOR].

*** Sec. 55.** AS 45.75.133(b) is amended to read:

(b) **If a** [A] person cited for a violation for which a bail forfeiture amount has been established under (a) of this section **does not contest the citation, the person** may, within **30** [15] days after the date of the citation, mail or personally deliver to the clerk of the court in which the citation is filed by the employee

(1) the amount of bail indicated on the citation for that offense; and

(2) a copy of the citation indicating that the right to an appearance is waived, a plea of no contest is entered, and the bail is forfeited.

*** Sec. 56.** AS 45.75.133(d) is repealed and reenacted to read:

(d) A person cited under this section is guilty of failure to obey a citation under AS 12.25.230(b) if the person fails to pay the bail amount established under (a) of this section or fails to appear in court as required.

*** Sec. 57.** AS 46.06.080(d) is amended to read:

(d) A peace officer shall issue a citation as provided in **AS 12.25.175 - 12.25.230** [AS 12.25.180] to a person who violates this section. If a citation is for a minor littering violation **and the person does not contest the charge**, [THEN] the person to whom the citation is issued may, **on or before the 30th day after the date of the citation** [WITHIN 15 DAYS], mail or personally deliver to the clerk of the court in which the citation is filed

(1) a fine of $50; and

(2) a copy of the citation indicating that the right to an appearance is waived and a plea of no contest is entered.

*** Sec. 58.** AS 46.06.080(f) is repealed and reenacted to read:

(f) A person cited under this section is guilty of failure to obey a citation under AS 12.25.230 if the person fails to pay the fine or to appear in court as required.

*** Sec. 59.** AS 46.06.110(b) is amended to read:

(b) The department shall prescribe a citation form, which shall be used by all peace officers and persons in the state who are authorized to enforce the provisions of this chapter. **The citation form must meet the requirements of AS 12.25.175 - 12.25.230.**

*** Sec. 60.** AS 04.16.205(i) and 04.16.205(j) are repealed.

*** Sec. 61.** The uncodified law of the State of Alaska is amended by adding a new section to read:

APPLICABILITY. This Act applies to all citations issued by peace officers and other persons authorized under state law to issue citations for violations occurring on or after July 1, 2010.

*** Sec. 62.** The uncodified law of the State of Alaska is amended by adding a new section to read:

TRANSITIONAL PROVISIONS: REGULATIONS. The Department of Public Safety may proceed to adopt regulations necessary to implement this Act. The regulations take effect

under AS 44.62 (Administrative Procedure Act), but not before July 1, 2010.

*** Sec. 63.** Section 62 of this Act takes effect immediately under AS 01.10.070(c).

*** Sec. 64.** Sections 8 and 24 of this Act take effect on the date that secs. 18 and 26, ch. 28, SLA 2000, take effect under sec. 30, ch. 28, SLA 2000, as amended by sec. 3, ch. 34, SLA 2004, and by sec. 1, ch. 19, SLA 2009.

*** Sec. 65.** Except as provided in secs. 63 and 64 of this Act, this Act takes effect July 1, 2010.

ANALYSIS: *(Attach a separate page if necessary)*

HB 392 creates a loan repayment program for identified health professional occupations and provides for cash incentives for eligible health professionals engaged in qualified employment. The intent of the legislation is to "address the worsening shortage of certain health care professionals in the state by increasing the number and improving the distribution of health care professionals who provide direct patient care."

Division of Health Care Services estimates that it will need a total of 1 FTE to fully administer the loan repayment and employment incentive programs.

(Revised 11/6/2009 OMB)

ANALYSIS CONTINUATION

Health Care Professions Loan Repayment & Incentive Program

The Division assumes it will need $2,715.0 for practitioner payments in FY2011. This funding will be used for either practitioner payments as cash incentives, or payments to lender institutions for loan repayments, or there can be a combination of the two types of payments. Maximum payments established for any combination of loan repayment and cash incentive are: $35.0 annually for tier I health care professionals employed in "regular" positions; $47.0 annually for tier I health care professionals employed in "very hard-to-fill" positions; $20.0 annually for tier II health care professionals employed in "regular" positions; and $27.0 annually for tier II health care professionals employed in "very hard-to-fill" positions. The need for $2,715.0 in FY2011 assumes the following:

Tier I	27 Practitioners	$1,161.0	(assumes 9 participants from each of 3 types comprising tier I at $387.0 for each type)
Tier II	63 Practitioners	$1,554.0	(assumes 9 participants from each of 7 types comprising tier II at $222.0 for each type)
Total	90 Practitioners	$2,715.0	

The Division assumes the employing entities will provide 25% of the $2,715.0 as contributing match as specified in HB392. Therefore, the expected GF match is $2,036.3 The match for the employing entities is $678.7.

Incentive payments are available to professionals for up to 3 years of qualified employment with a lifetime maximum participation of six years in the loan repayment and direct incentives aspects of the program by a tier I or tier II health care professional. The total number of participants in the program may not exceed 90 participants annually, regardless of whether the participant is a new or continuing participant.

On the fiscal note, the payments for practitioners will be paid from the contractual line:

Item	FY2011	FY2012	FY2013	FY2014	FY2015	FY2016
Practitioner Payments	$2,715.0	$2,715.0	$2,715.0	$2,715.0	$2,715.0	$2,715.0
Evaluation Contract	$ 18.0	$ 18.0	$ 18.0	$ 18.0	$ 18.0	$ 18.0
Staff Contractual Costs	$ 9.4	$ 9.4	$ 9.4	$ 9.4	$ 9.4	$ 9.4
Total:	$2,742.4	$2,742.4	$2,742.4	$2,742.4	$2,742.4	$2,742.4

Administrative Costs
1 Health Program Manager II, $89.3 (includes fringe benefits). Assumes $9.4 per FTE annually for office space, phones, and other contractual costs; $2.6 one time costs per FTE for computers and software; $5.0 one time costs per FTE for office equipment; $2.0 per FTE annually for supplies; $6.0 per year for travel; $18.0 each year for a program evaluation contract.

Health Program Manager II.
This position will serve as lead program manager for the loan repayment and employment incentive program and will: establish procedures for the commissioner's designation and prioritization of sites eligible for participation in the program, develop the application process for participation in the program for sites and professionals, develop and disseminate public information and notices pertinent to the program, lead the development of the methodology and procedures for classifying each eligible site as having either regular or very hard-to-fill positions, prepare annual reports that document the successes and challenges of the program, facilitate the creation of and ongoing work of the advisory committee, and establish procedures and manage the employer contribution portion of the program.

ACPE will facilitate the disbursement of the loan repayment benefit. It will not be the budgetary agency for requesting and receiving the funds. After HCS selects program participants, ACPE will verify the existence of their qualifying education debt, and, on a periodic basis, transmit the appropriate benefit amount to the individual's lender.

RE: HB 392 (Herron)—Support

Dear Co-Chairs Hawker and Stoltze:

On behalf of the members of AARP in Alaska, we encourage you and your colleagues on the House Finance Committee to support HB 392, authored by Representative Bob Herron.

The intent of HB 392 is to provide incentives for health care providers, especially for expertise that is in short supply in Alaska as well as to secure providers in our many underserved geographic areas.

AARP approaches HB 392 from the standpoint of the customer. Our members are the group most likely to need health care services and are often the first ones to face critical health care problems because they cannot find a provider.

You are well aware of our health care workforce shortages in Alaska. If our members cannot find a health provider, the results can be bad for them as well as for the state.

Postponing a needed health visit often results in health deterioration and, in many cases, more intense and more expensive treatment. With an increase in providers, our members are more likely to seek prevention and early treatment. The overall health status of older Alaskans will improve.

However, if our members cannot find a health care provider, Alaska will be the loser.

As you know, prior to 1990 many older Alaskans left the state after retirement because they could not count on finding medical facilities and providers to meet their needs.

This trend reversed and now Alaska has the highest percentage of older people who decide to stay in their home state after retirement. The economic value of these retirees is estimated at over $1.7 billion.

Jennie Chin Hansen, President
William D. Novelli, Chief Executive Officer

We want our citizens to stay here after retirement. The most significant determination of where retirees decide to live is the availability of quality health care. We must have an adequate health care workforce if we are going to keep older Alaskans in our state.

HB 392 will go a long way in helping us secure that workforce.

AARP recommends an "AYE" vote on HB 392.

Should you have any questions about our position, please feel free to contact me (586-3637) or Patrick Luby, AARP Advocacy Director (907-762-3314).

Thank you for your consideration.

Sincerely,

Marie Darlin

House Bill 392 – Loan Repayment and Incentives for Certain Medical Providers

Version 26-LS1528\C

SPONSOR STATEMENT

House Bill 392 establishes a loan repayment and direct incentive program in the Department of Health and Social Services (DHSS), for certain health care professionals employed in the state of Alaska. The goals of the program are to increase the quality and quantity of medical services in underserved regions using a combination of loan repayment and direct monetary incentives to recruit and retain experienced health care professionals. Loan repayment would apply only to loans made by the state for greater administrative efficiency.

Alaska has long faced a heath care provider shortage that is expected to worsen. The lack of health care providers is apparent not only in urban regions but also in rural communities where it is especially difficult to recruit health care practitioners. The intent of HB 392 is to create a competent and sustainable workforce that has the experience necessary to serve our citizens.

HB 392 is one of the only programs that would allow incentives to mid-career professionals and thus will be a powerful recruitment tool. Forty-four states have "support-for-service programs" and Alaska cannot compete with these states when attempting to recruit health care professionals. HB 392 is a much-needed solution to our shortage of health care professionals because the bill will allow for the employment of up to 90 participants in any given year.

DHSS would run the program and serve as the fiscal agent making quarterly loan payments directly to eligible lenders and incentive payments directly to practitioners from 10 different heath care occupations.

The amount of loan repayment and/or direct incentive payment would depend on the location of the position and the category of health care provided. There are two tiers of practitioners: Tier-1 includes dentists, pharmacists, physicians (MD and DO); and Tier-2 includes dental hygienists, nurse practitioners, nurses (RN), physical therapists, physician assistants, psychologists, and social workers (LCSW).

A provider in Tier-1 who serves in a designated "very hard-to-fill" position could receive up to an extra $47,000 and in a "regular" position an extra $35,000 per year for up to three years. A provider in Tier-2 who serves in a designated "very hard-to-fill" position could receive up to an extra $27,000 and in a "regular" position an extra $20,000 per year for up to three years.

To address the shortage of health care providers in rural areas 30 of the 90 slots would be reserved for "very-hard-to-fill" positions, which are designated by the Commissioner based upon a needs assessment and employment statistics for Tier-1 and Tier-2 health care professionals in that location.

Once HB 392 goes into effect, it will immediately begin to remedy the shortage of health care professionals within the state of Alaska. In combination with current programs aimed at students, e.g. WWAMI, we can greatly enhance the availability of medical services in our underserved areas, getting this important population the access to health care that they deserve.

REVIEW OF CHANGES FROM HB 392 TO CS HB 392 (HSS)

Changes prior to first committee hearing:

Sec. 18.29.025, pg. 5, lines 14 – 16

Deleted: Lines provide restrictions on what category of provider can serve at what site.

Inserted: on pg. 5, line 15 - 16

Adds "to not fewer than three participants employed in very hard-to-fill positions at an eligible site"

Change increases the number of participants for very hard-to-fill sites to 3; regular sites have 3 slots, and 3 can be allocated as the commissioner sees fit.

Changes in HSS for HB 392 = 26-LS1528\C

Sec. 14.43.430 Loan repayment; purpose.

Inserted, pg. 1 line 8: "by the state" after education loans made

Sec. 14.43.435 Eligibility.

Inserted, pg. 2, lines 9-10: "made by the state" after education loans

Changes limit loan repayment to loans only made by the state. This change was made for administrative efficiency.

MEMORANDUM March 11, 2010

SUBJECT: Sectional Summary (HB 392; Work Order No. 26-LS1528\R)

TO: Representative Bob Herron
Attn: Nikoosh Carlo

FROM: Jean M. Mischel
Legislative Counsel

You have requested a sectional summary of the above-described bill.

As a preliminary matter, note that a sectional summary of a bill should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents. If you would like an interpretation of the bill as it may apply to a particular set of circumstances, please advise.

Section 1. Requires the Alaska Commission on Postsecondary Education to repay education loans made to health care professionals, as defined, under eligibility criteria established in sec. 2. Specifies that the loan repayment obligation is not a financial obligation of the corporation. Provides for quarterly payments based on the fulfillment of qualified employment at eligible sites located in the state.

Section 2. Establishes the health care professions loan repayment and incentive program in the Department of Health and Social Services for the purpose of addressing a shortage of certain health care professionals in the state and for improving the distribution of those professionals. Requires the commissioner of health and social services to administer the program, to designate and prioritize eligible employment sites, and to monitor the program in consultation with an advisory body established under this section. Provides for maximum combined loan repayment and employment incentives based on the type of employment.

Section 3. Provides for an immediate effective date for the bill.

Subject: Support for HB 392, Incentives for Certain Medical Providers

Dear Chair Keller and Chair Herron:

The Alaska Commission on Aging (ACoA) encourages support for HB 392 by the House HSS Committee, a bill to establish a loan repayment program to build Alaska's health care workforce by increasing the recruitment and retention of targeted health care professionals in urban and rural, underserved communities. This bill is authored by Representative Bob Herron.

Alaska, as with the rest of the nation, is experiencing a shortage of health care workers as fewer students are entering the health care profession and many of those already working in health care are preparing for retirement. Alaska is one of five states that does not offer a state-sponsored loan repayment program for health care professions. As a result, our hospitals, clinics, and communities lose potential health care workers to other states that incentivize their workforce with loan repayment programs.

Access to quality health care is a priority for all Alaskans and a critical need for people age 65 years and older. Older Alaskans benefit from regular health care services which enhance their overall health and decrease the need for more expensive, intensive treatment and emergency visits.

Alaska continues to lead all states with the fastest growing senior population currently comprising about 12 percent of our state's population and is projected to increase by five to six percent each year until 2020. The graying of Alaska's population is creating substantial shifts for workforce, particularly in the health care and long-term support service sectors, as demand increases and providers are reaching retirement age. If older Alaskans are unable to find a health care provider, they may be forced to leave the state in search of access to health care professionals. As a result, Alaska could suffer from a loss of retirees, who contribute more than $1.7 billion to the state's economy in addition to their significant volunteer service, caregiving activities, and community leadership.

ACoA supports HB 392 and believes that the proposed legislation will help to build a qualified health care workforce who will be available to meet the health care needs of older Alaskans. Please feel free to contact Denise Daniello, ACoA's executive director, by phone (465-4879) or email (denise.daniello@alaska.gov) should you have questions or require additional information about our position. Thank you.

Sincerely,

Sharon Howerton-Clark
Chair, Alaska Commission on Aging

data from www.hrsa.gov March 3, 2009
http://www.hpsafind.hrsa.gov/HPSASearch.aspx

Health Professional Shortage Areas (HPSAs) are designated by HRSA as having shortages of primary medical care, dental or mental health providers and may be geographic (a county or service area), demographic (low income population) or institutional (comprehensive health center, federally qualified health center or other public facility).
Medically Underserved Areas/Populations are areas or populations designated by HRSA as having: too few primary care providers, high infant mortality, high poverty and/or high elderly population.

USDHHS HRSA: More about shortage areas Alaska Primary Care Office information: http://www.hss.state.ak.us/dph/healthplanning/primarycare/PC_Home.htm

"Yes" in HPSA columns means there is a "geographic" HPSA designatuion approved by HRSA Office of Shortage Designation, for all or part of the census area or borough.
"CHC" indicates there is at least one Community Health Center with automatice HPSA designation. Where geographic HPSAs exist, the geographic area score is generally higher than the CHC score. Most of the areas with geographic designations also have CHCs in one or more sites within the census area or borough.

Prepared by Health Planning and Systems Development Section, Health Care Services, Alaska Department of Health and Social Services 3/19/2009

How Hard Is It for Alaska's Medicare Patients to Find Family Doctors?

By Rosyland Frazier and Mark Foster

UA Research Summary No. 14 • March 2009
Institute of Social and Economic Research • University of Alaska Anchorage

In the past few years, Alaskans have been hearing reports that some primary-care doctors won't see new Medicare patients. Medicare pays these doctors only about two-thirds of what private insurance pays—and that's after a sizable increase in 2009. But most Americans 65 or older have to use Medicare as their main insurance, even if they also have private insurance. Just how widespread is the problem of Alaska's primary-care doctors turning away Medicare patients? ISER surveyed hundreds of doctors to find out—and learned that so far there's a major problem in Anchorage, a noticeable problem in the Mat-Su Borough and Fairbanks, and almost no problem in other areas.

Medicare is the federal health insurance program for older Americans and for some younger people with disabilities. At issue is what Medicare pays primary-care doctors for their services—not what it pays for other medical costs. Alaska's 50,000 Medicare enrollees are almost all in the "fee for service" plan, which pays doctors standard fees for their services.*

Why is it so worrisome if primary-care doctors won't see Medicare patients? These are the doctors who provide broad care, track patients' overall health, and coordinate care with specialists. That's very important for older people, who often have various medical problems and chronic conditions. And the number of Alaskans over 65 is growing fast—it's expected to double in the next 15 years.

To learn how hard it is for older Alaskans to find primary-care doctors, in 2008 we tried to survey all those who could see the general population of Medicare patients. We were able to interview 229 doctors or their staffs—about 85% of those we tried to reach.

But Medicare payments for Alaska doctors increased in 2009, thanks to efforts of Alaska's U.S. senators. So we recently called back the doctors who had told us they weren't taking new Medicare patients. None of them had opened their doors to significant numbers of new Medicare patients. Four said they now see a very limited number of new Medicare patients, under special circumstances. Two doctors in a joint practice who still didn't see new Medicare patients had hired a nurse practitioner who did.

It's certainly also possible that without the 2009 increase, even more doctors would have decided not to see Medicare patients. Figure 1 shows what our 2008 and 2009 surveys found.

• *It's mainly doctors in Alaska's larger urban areas who are declining to see new Medicare patients.* But that's where the majority of older Alaskans live. Most doctors (even in Anchorage) will still see established patients—that is, patients they've seen in the past.

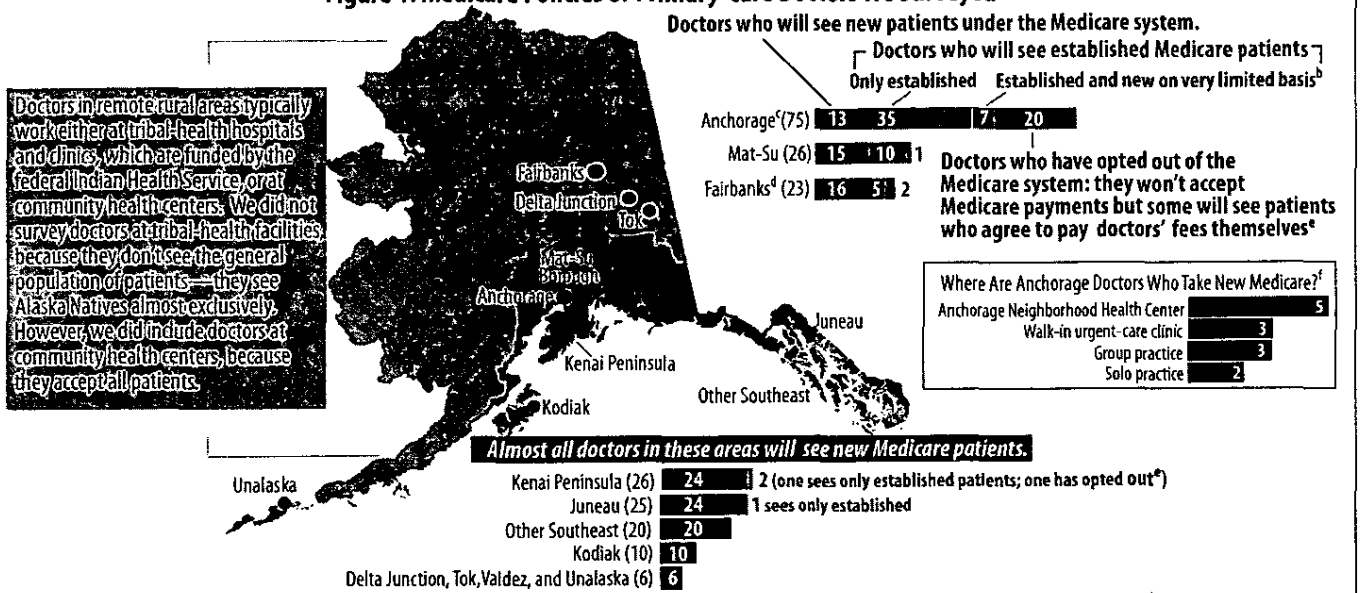
• *Almost all doctors in smaller communities take new Medicare patients.* Rural places have few doctors—so doctors probably feel more of an obligation to see all patients. For patients (Medicare or otherwise) in rural Alaska, the challenge is more likely to be recruiting and keeping doctors.

• *One in ten doctors we surveyed has opted out of the Medicare system.* Most are in Anchorage. They will not accept Medicare payments, but some will see patients who agree to pay the entire doctor's bill themselves.

• *The Anchorage Neighborhood Health Center,* which accepts all patients, saw twice as many Medicare patients in 2007 as in 2001. It has become the only choice for many of Anchorage's Medicare patients.

• *Medicare patients are not relying more on emergency rooms,* if figures for Providence Hospital's emergency room in Anchorage are typical. Numbers of Medicare patients there haven't changed much in the past several years.

Figure 1. Medicare Policies of Primary-Care Doctors We Surveyed[a]



[a]In 2008 we surveyed 229 doctors; 15 weren't taking any new patients at all; 3 had no Medicare patients. In 2009 we re-surveyed doctors who didn't take new Medicare patients in 2008. [b]Ten doctors (7 in Anchorage, 2 in Fairbanks, 1 in Mat-Su) accept a few new Medicare patients under special circumstances, but don't typically see new Medicare patients. [c]Includes Eagle River/Chugiak. [d]Includes North Pole. [e]See Figure 9. [f]See page 3.

*Nationwide, 21% of beneficiaries have enrolled in Medicare Advantage programs—which means they become members of private health plans, and Medicare then pays the plans a set monthly amount for each Medicare enrollee.

Survey of Primary-Care Doctors

We surveyed only primary-care doctors. So far there hasn't been any sign that specialists are declining to see Alaska's Medicare patients—not surprising, since Medicare tends to pay them closer to private-insurance rates.

We first had to determine how many doctors fit our survey criteria: those who currently practice general, family, or internal medicine at least 20 hours a week and who could see the average Medicare patient, if they chose to.

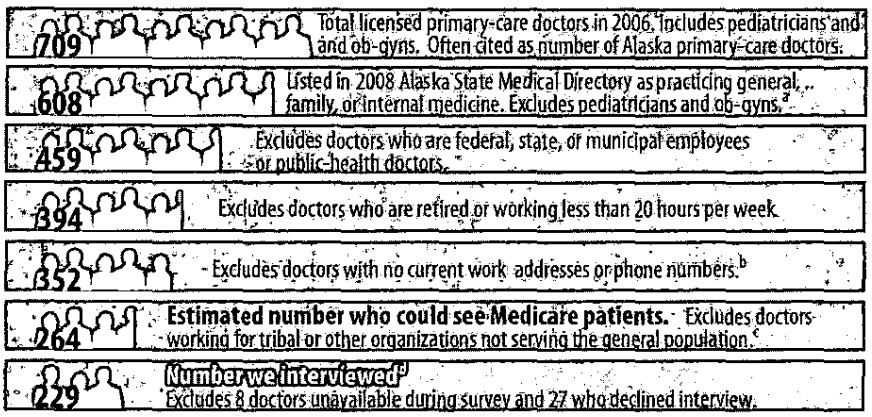
About 700 primary-care doctors are licensed in Alaska, but most aren't available to see the general population of Medicare patients. Hundreds work for government agencies, are in public health, or see only specific groups (Figure 2).

Among those who didn't fit our criteria are doctors working for tribal-health facilities that provide Indian Health Service programs for Alaska Natives. These doctors do see Alaska Native Medicare patients.

We estimated that 264 doctors were left, after we took out those who didn't fit our criteria. In 2008 we tried to reach all 264. We were able to talk with about 85%—229 doctors or their staffs. We asked them to tell us their policies for seeing Medicare patients and to rank reasons why they might be limiting or turning them away. The top reason they cited was "inadequate reimbursement"—that is, Medicare payments aren't enough to cover the costs of seeing patients.

We also followed up, in 2009, with doctors who had told us in 2008 that they weren't taking new Medicare patients. We reached all but two.

Figure 2. How Many Primary-Care Doctors Are Available to See Medicare Patients?
(Among Alaska Doctors Practicing General, Family, or Internal Medicine at Least 20 Hours per Week)



[a]We excluded pediatricians and obstetrician-gynecologists, who are often included in definitions of primary-care doctors, because they don't routinely see older patients. [b]About 42 doctors were not at the addresses and phone numbers in the medical directory. We tried but weren't able to find them, and we assume they have left the state or are not practicing [c]We excluded doctors working for tribal-health organizations, the military, the Veterans' Administration, and Planned Parenthood, because they don't see the general population of Medicare patients. Doctors who work for tribal-health facilities do see Alaska Native Medicare patients. [d]We interviewed either doctors or members of their staffs.

Medicare Versus Private Insurance

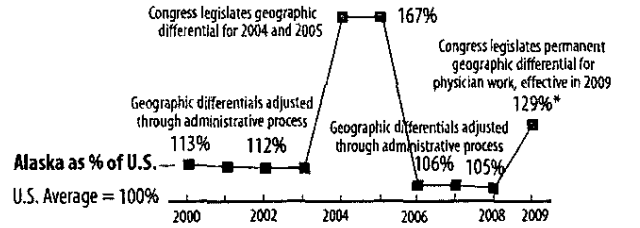
The federal Center for Medicare and Medicaid Services (CMS) calculates Medicare payments for doctors under a complex formula that takes into account geographic differences in costs around the country. Alaska's doctors have historically been paid more than the U.S. average for seeing Medicare patients.

The CMS formula actually includes three geographic differentials: one for "physician work" itself, one for doctors' costs of operating practices, and one for doctors' costs of carrying liability insurance.

In 2008, Congress set the Alaska geographic differential for "physician work" at 50% above the U.S. average, effective in 2009. Alaska's U.S. senators Lisa Murkowski and Ted Stevens were instrumental in gaining that increase for Alaska doctors. But combined with the other differentials—set by CMS—the overall Medicare geographic differential for Alaska doctors in 2009 is 29% above the U.S. average. Figure 3 shows the differential since 2000.

- *From 2000 to 2003, the geographic differential for Alaska doctors was about 12% above the U.S. average.* That differential was set entirely under CMS's administrative process.
- *In 2004 and 2005, the differential for Alaska doctors jumped to 67% above the U.S. average.* Ted Stevens, at that time Alaska's senior U.S. senator, spearheaded the legislation that led to the substantial but temporary increase. In those two years, Medicare paid Alaska doctors as much as private health insurance (Figure 4).
- *After that legislation expired, the Medicare differential dropped sharply,* to about 5% above the U.S. average from 2006 to 2008.
- *In 2009, the cost differential for Alaska doctors climbed to 29% above the U.S. average,* due to new federal legislation—as we just discussed. But Medicare still pays doctors less now than it did in 2005 (Figure 4).
- *Medicare pays about two-thirds of what private insurance pays, in Alaska and on average nationwide.* (But in the adjacent markets of Washington state, Medicare pays 68% to 75% of what private insurance pays.)
- *That nationwide gap helps explain why more Medicare patients are having trouble finding doctors.* Recent national surveys sponsored by the Medicare Payment Advisory Commission found that 17% of Medicare patients in the U.S. had "a big problem" finding family doctors in 2007, up from 13% in 2005. Alaska may be the harbinger of a national trend.

Figure 3. Medicare Geographic Cost Differential* for Alaska Doctors



*This is a weighted average of three geographic cost differentials the Center for Medicare and Medicaid Services uses in a complex formula that determines what doctors are paid. One of those is the differential for "physician work," and Congress set that at 150% of the U.S. average for Alaska doctors, effective in 2009. But the other differentials—for physicians' costs of operating their practices and for carrying liability insurance—are set by CMS and can vary from year to year.

1891

Where Are the Medicare Patients?

• *Nearly 70% of non-Natives over 65 live in Anchorage, the Mat-Su Borough, and the Fairbanks area.* Figure 5 shows only where older non-Natives live, because older Alaska Native patients have access to doctors through tribal-health care facilities. For them, the issue is not that doctors won't see them but that there may not be enough doctors, especially in rural areas.

Who Accepts Medicare Patients?

Besides the doctors who will see new or established patients, some doctors have made another choice: they've opted out of the Medicare system. They don't accept any Medicare payments (see Figure 9), but some will see Medicare patients who agree to pay the doctor's fee themselves. Patients who can do that have more choices. But for those who need Medicare to help pay the bill, the access problem is the worst in Anchorage.

• *We found only 13 primary-care doctors seeing the general population of new Medicare patients in Anchorage.* Of those, 3 were at walk-in, urgent-care clinics, which mostly just treat minor injuries and illnesses (Figure 1).

• *Five of the 13 Anchorage doctors seeing new Medicare patients in 2008 were at the Anchorage Neighborhood Health Center.* That's one of dozens of federally funded community health centers in Alaska. There are hundreds more across the U.S. These centers are open to everyone, but they are mainly for medically "under-served" groups of people—poor and uninsured, for instance—or areas of the country without adequate local medical care, like many of Alaska's rural communities.

• *The Anchorage Neighborhood Health Center is the main choice for growing numbers of Medicare patients.* Both the number of Medicare patients coming to the clinic and the percentage they make up of all patients doubled between 2001 and 2007 (Figure 6). That growth did flatten out in 2004 and 2005, when Medicare paid doctors at a level comparable to private insurance. But after that, the numbers climbed. (In Fairbanks, the community health center saw a similar percentage increase. In the Mat-Su Borough, a health center just opened in 2005, so data are limited.)

• *Until recently there was another choice for Anchorage's Medicare patients—the Alaska Family Medicine Residency Program*, where some family doctors get their final phase of training. These resident doctors see patients, and they had been accepting growing numbers of Medicare patients. But to make sure the residents see a variety of patients, the program has now capped the number of Medicare patients it accepts.

• *Anchorage's Medicare patients don't seem to be turning more to emergency rooms.* Data from Providence Hospital's emergency room show that visits by older patients have stayed mostly steady, with seasonal variations, since 2004 (Figure 7). But some health-care providers think that Medicare patients may be postponing care they need and coming in only when medical problems get much worse.

Medicare Payments to Doctors and to Health Centers

• *Medicare pays doctors and community health centers differently.* Some people believe that Medicare uniformly pays health centers more than it pays private doctors, making it more feasible for health centers to see Medicare patients. But the reality is more complex.

• *Medicare pays health centers the same fee for seeing Medicare patients for any visit, but private doctors more for longer, more complex visits.* Figure 8 compares payments for 30- and 60-minute visits with new patients, at doctors' offices and the Anchorage Neighborhood Health Center (ANHC). For a 30-minute visit, Medicare pays ANHC $119 and doctors about $95. But for a 60-minute visit, it still pays ANHC $119, but the doctors $189.

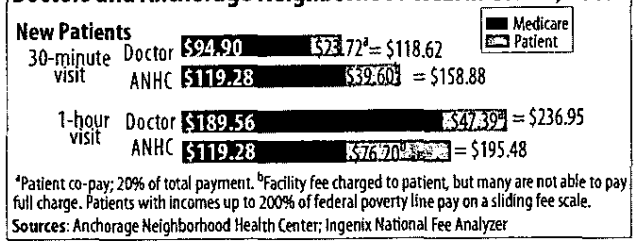
Figure 8. Medicare and Patient Payments to Private Doctors and Anchorage Neighborhood Health Center, 2009



[a]Patient co-pay; 20% of total payment. [b]Facility fee charged to patient, but many are not able to pay full charge. Patients with incomes up to 200% of federal poverty line pay on a sliding fee scale.

Sources: Anchorage Neighborhood Health Center; Ingenix National Fee Analyzer

• *What Medicare patients pay at health centers and at doctors' offices is also determined in different ways.* Essentially, Medicare allows the health centers to take their own fees into account when determining what patients are charged. But Medicare doesn't allow doctors to use their own fees; instead, Medicare sets a maximum allowable charge for specific kinds of visits, and patients pay a portion of that (see Figure 9).

• *Neither ANHC nor the doctors' offices necessarily collect the amounts shown in Figure 8 as payments from patients.* At ANHC, patients with incomes up to 200% of the federal poverty line are charged on a sliding fee scale. Likewise, private doctors may not always be able to collect the patient's share. And both private doctors and ANHC report losing money when they see Medicare patients.

1892

Doctors and the System

Primary-care doctors who see Medicare patients have three choices for getting paid. Figure 9 describes those choices among doctors we surveyed.

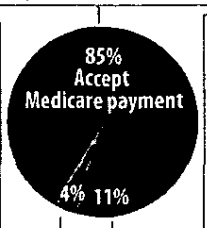
About 85% choose the standard Medicare process ("participating"). Another 4% still work with the Medicare system but charge patients somewhat more ("non-participating"). The final 11% have opted out of the Medicare system, but will still see patients who agree to foot the bill.

Patients also pay different amounts, depending on their doctors' policies. For a service with an allowable Medicare fee of $100, patients seeing doctors who accept that fee would pay $20—but only after Medicare paid the other $80. Patients seeing "non-participating" doctors would pay the doctors $109.25; Medicare would later reimburse the patients $76, so their final cost would be $33.25. Patients seeing doctors who have opted out of the Medicare system would pay a fee determined by the doctor—perhaps a negotiated fee, but still typically more than Medicare pays.

Figure 9. How Do Alaska Primary-Care Doctors Who See Medicare Patients Deal with the System?
(Among 211 Surveyed Who See New or Established Patients)

Most doctors accept standard Medicare fees and bill Medicare. They are called "participating." Medicare sets maximum allowable charges for various services. Participating doctors agree not to charge more than the allowable rate, and Medicare pays them 80% of that. The patients (and their secondary insurance, if they have any) pay the other 20%.

A few doctors (called non-participating) can charge up to 9% more than the allowable Medicare charge. But Medicare pays less and patients pay more. Here's how it works. The patient pays the entire bill, but the doctor submits a statement to Medicare so the patient is paid for the Medicare share. But instead of paying 80% of the charge, Medicare pays only 76%. The patients (and their secondary insurance, if they have any) pay the rest of the bill.



Some doctors don't accept Medicare payments for their fees. They are said to have "opted out." They will still see Medicare patients, but patients must agree to pay a fee the doctor sets. Medicare doesn't pay either doctors or patients, and patients can't bill any secondary health insurance they may have. Remember that patients pay only the fee for the doctor. They still use Medicare to help pay hospital and other medical costs. Doctors who opt out have to re-confirm their decision with Medicare every two years. They can also apply to come back into the system after two years.

Example: How Much Would Patients Pay for a Service with an Allowable Medicare Charge of $100?

	Participating Doctors Charge $100	Non-Participating Doctors Can Charge $109.25	Doctors Who Have Opted Out Can Set Their Own Fees
Medicare pays	$80	$76	$0
Patient pays	$20[a]	$33.25[a]	Entire doctor's fee[b]

[a]Patients can bill secondary insurance to help pay their share. [b]Patients can't bill secondary insurance to pay any amount.

Conclusion

With few exceptions, Americans 65 or older who are retired have to use Medicare as their primary insurance—even if they also carry private health insurance or have retirement benefits that include health-care coverage. Any other insurance they have can *only* be used to help pay *their share of the allowable Medicare charge*. They can't use private insurance to pay doctors more than Medicare allows.

As more Alaskans turn 65, the access problem will get worse, unless something changes. Growing numbers of Medicare patients around the country are also reporting access problems. And the American College of Physicians has reported that a nationwide shortage of primary-care doctors is looming—which would make the problem even worse.

This summary talks about just a very narrow slice of the multitude of issues facing Medicare. It's one of the largest and fastest-growing federal programs, and President Obama has said reforming it will be part of his plan to improve the U.S. health-care system. How potential reforms might affect Medicare patients' access to family doctors isn't clear today.

Because Medicare is a federal program, the state's options for helping improve access are limited. But Alaskans are talking about various possibilities—like recruiting more doctors and offering them bonuses to see Medicare patients, and either establishing an Anchorage clinic for Medicare patients or expanding the Anchorage Neighborhood Health Center.

In a publication later this year, we'll look at the implications of various ways of trying to improve access for Medicare patients. We'll also report what family doctors themselves told us—how they make decisions about seeing Medicare patients and what might make them willing to see more.

Back-up materials for figures in this summary are available from ISER. Call the authors at 907-786-7710 with questions. We've also developed a basic model that doctors—or anyone else—can use to estimate how changing the balance between patients paying with Medicare and with private insurance could affect doctors' revenues. To try that model, go to ISER's Web site:

www.iser.uaa.alaska.edu

The authors thank the doctors and others in health care who took the time to help us. We especially thank doctors Leslie Bryant, Richard Neubauer, and Thomas Nighswander; Joan Fisher of the Anchorage Neighborhood Health Center; James Jordan of the Alaska State Medical Association; and Providence Alaska Medical Center, Providence Health and Services - Alaska.

This research is part of ISER's Understanding Alaska Choices research initiative, funded by the University of Alaska Foundation. Karen Perdue, associate vice president for health programs, University of Alaska, provided additional funds.

Alaska Center for Rural Health – Alaska's AHEC
UNIVERSITY of ALASKA ANCHORAGE
August 2007

2007 Alaska Health Workforce Vacancy Study Research Summary

Key Findings: *Alaska is confronted by severe shortages of professional health workers, primarily in high-level primary care occupations that include* ***Family Physician, General Internist, Critical Care Nurse, Nurse Case Manager, Family Nurse Practitioner, Physician Assistant, Pharmacist, Dentist, Physical/Occupational/Speech Therapist,*** *and* ***Behavioral Health*** *occupations. Shortages in* ***RNs*** *and* ***Allied Health*** *are much less acute. Most affected are rural areas and Tribal Health Organizations, though growth-driven high vacancy rates affect the Anchorage-Matsu region as well.*

BACKGROUND

Alaska is confronted by a "perfect storm" of health professional shortages. The state has long suffered from a deficient "supply side" characterized by insufficient numbers of key health workers whose recruitment, retention and training have been impeded by Alaska's remoteness, harsh climate, rural isolation, low population density and scarce training resources. Now exacerbating this already difficult situation is a burgeoning "demand side" for increased health services for a steadily growing and aging population. The health services industry is the fastest growing sector of Alaska's economy, employing over 7% of the state workforce.

METHODOLOGIES

The key questions this study sought to answer were: What health occupations were at this time most critically affected by shortages? Exactly how many budgeted positions existed and how many of these currently remained unfilled? Where were these vacancies regionally and in what types of organizations? What did employers perceive to be the major underlying causes of their vacancies? How many new trainees/graduates could the job market actually absorb annually and how many organizations could absorb them?

Four hundred seventy-six (476) purposively sampled Alaska health service organizations of all types responded to the study survey (Figure 1). Survey data was used to generate estimates of positions and vacancies for the entire state of Alaska.

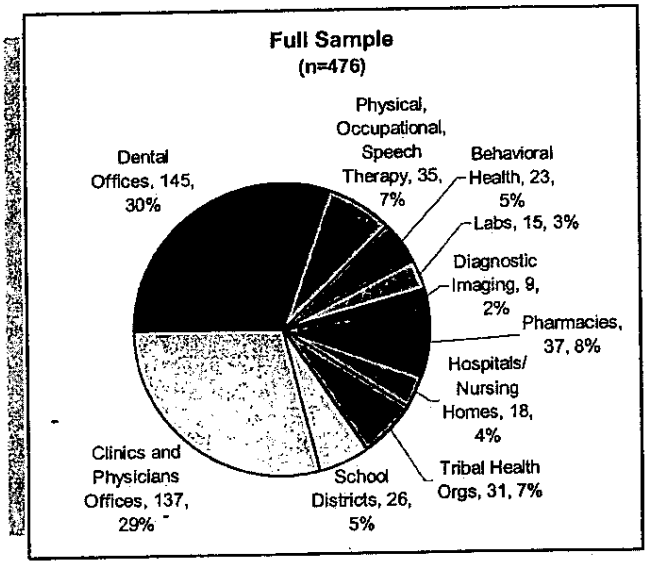

Figure 1

KEY FINDINGS

The findings confirm and quantify the trends cited in recent studies and accumulating anecdotal evidence: despite the recent progress in training and deploying health personnel, such as **Registered Nurses**, critical shortages persist (Tables 1,2).

The situation for key primary care occupations – **Family Physician, General Internist, Nurse Practitioner, and Physician Assistant** – was troubling, particularly in the rural areas, with numerous estimated vacancies and high estimated state vacancy rates between 15% and 20%.

Though vacancies for **Psychiatrists** were not numerous, they were particularly in demand (19.0% estimated vacancy rate) and difficult to recruit (mean vacancy length of 34.5 months).

This study was funded by the Office of Associate VP for Health, University of Alaska Anchorage, through Center for Disease Control and Prevention grant #5-H75S-DP024673, and by the Alaska Mental Health Trust Authority.

The national **Pharmacist** shortage has hit Alaska hard and affects every region, with high estimated vacancy numbers (98), and an estimated vacancy rate of 23.7%.

Therapists of all kinds – **Physical, Occupational, Speech, and Speech-Language Pathologists** – were in short supply, with estimated vacancy rates ranging from 15.6% to 29.3%. No part of the state escaped the shortages; vacancy rates were most acute in rural areas, but numerically high in the Anchorage Mat-Su region.

High numbers of vacancies and high vacancy rates were reported for key specialized nursing occupations, particularly for **Nurse Case Manager**, **Family Nurse Practitioner**, and **Critical Care Nurse**. These appeared to be the current areas of most critical shortage in nursing.

The estimated **Registered Nurse** vacancy rate was moderate (8.0%), but this masked 10% rates in hospitals and tribal health organizations, and an estimated rural rate of 16.1%.

While the estimated vacancy rate for **Dentist** was 10.3%, this masked a 15.3% estimated rural rate and a very high 42.0% rate for tribal health organizations, which had 39% of estimated **Dentist** vacancies.

Table 1. Occupational Groups

Occupational Groups	Study Sample (n=476)			State Estimate		
	Positions	Vacancies	Vacancy Rate	Positions	Vacancies	Vacancy Rate
All Occupations	18158	1866	10.3%	34738	3529	10.2%
Physicians	730	109	14.9%	1931	226	11.7%
Professional Nurses	4202	462	11.0%	7139	696	9.8%
Other Nursing Staff	1769	135	7.6%	1762	111	6.3%
Professions/ Therapists	1240	217	17.5%	2281	404	17.7%
Behavioral Health	2938	327	11.1%	7450	1033	13.9%
Allied Health	3209	291	9.1%	5523	434	7.9%
Public Health/Nutrition	154	18	11.7%	189	ND	ND
Other Primary Care (PA & CHAP)	759	132	17.4%	1067	198	18.5%
Managers	1337	69	5.2%	2947	160	5.4%
Health Information/ Reimbursement	1816	106	5.8%	4451	253	5.7%

In the **Behavioral Health** occupational group, the most acute shortages – with both extremely high vacancy numbers and high vacancy rates – appeared to be among **Human Services Workers**. In addition, overall estimated **Behavioral Health** occupation vacancies were extremely numerous (1033), around 29% of all estimated vacancies – more than any other occupational group.

Among **Allied Health** occupations, high vacancy rates were affecting employers of **Physical Therapy Assistants** and **Respiratory Therapists**. **Sonographer** vacancies were difficult to fill, and **Surgical Technician** vacancies, though not numerous, were averaging 3 to 4 years in length.

One hundred (100) vacancies and a vacancy rate of 18.1% were reported for **Community Health Aide/Practitioners (CHA/Ps).**

Among "front office" and "back office" occupations, **Coding Specialist** and **Certified Coder** had 11% estimated vacancy rates and very long mean vacancy lengths.

The managerial occupations for which high vacancy rates were reported were healthcare related: **Behavioral Health Supervisor, Clinical Department Manager, Health Information Manager, Medical Director, Nurse Manager, and Practice Manager.** Behavioral health organizations had the most estimated managerial vacancies.

Table 2. Key occupations

Key Occupations (high numbers of vacancies, high vacancy rates)	Study Sample (n=476)			State Estimate		
	Positions	Vacancies	Vacancy Rate	Positions	Vacancies	Vacancy Rate
Family Physician	252	48	18.3%	675	107	15.8%
General Internist	71	15	21.1%	200	40	20.0%
Psychiatrist	36	10	27.8%	93	18	19.0%
Registered Nurse	3109	299	9.6%	5489	439	8.0%
Critical Care Nurse	497	43	8.7%	629	60	9.5%
Nurse Case Manager	136	42	30.9%	209	49	23.4%
Family Nurse Practitioner	155	36	23.2%	364	71	19.5%
Physician Assistant	207	32	15.5%	515	98	19.0%
Pharmacist	302	73	24.2%	413	98	23.7%
Physical Therapist	271	29	10.7%	510	84	16.5%
Dentist	319	47	14.7%	692	71	10.3%
Human Services Worker	1568	170	10.8%	4800	697	14.5%
Behavioral Health Clinician	297	35	11.8%	555	71	12.8%
Case Manager/Care Coordinator	505	52	10.3%	1163	164	14.1%
Physical Therapy Assistant	35	11	31.4%	62	18	28.6%
Medical Assistant	367	38	10.4%	1092	102	9.3%
CHA/P	552	100	18.1%	552	100	18.1%
Certified Coder	85	6	7.1%	209	22	10.6%
Medical Director	49	6	12.2%	120	18	14.8%
Behavioral Health Supervisor	82	13	15.9%	176	22	12.5%

1895

Looking at respondent types, tribal health organizations reported the highest overall vacancy rate (16.5%). These organizations reported 87 **CHA/P** vacancies; approximately half of all estimated vacancies for **Nurse Case Manager, Pharmacist, Chemical Dependency Counselor, Dentist, Medical Lab Tech, Medical Technologist,** and **Health Educator**; and all the estimated vacancies for **Coding Specialist.** But every respondent type was a locus for acute shortages in key occupations, such as clinics/offices of physicians for **PAs**, hospitals/nursing homes for **RNs**, pharmacies for **Pharmacists**, behavioral health organizations for **Human Services Workers**, and school districts for **Speech-Language Pathologists**.

Higher vacancy rates were generally found in the rural respondents, particularly in the North/West and Southwest regions, which reported double digit vacancy rates for nearly all occupational groups, and overall vacancy rates of around 20% (Table 3, Figure 2). Occupations with much higher rural estimated vacancy rates included **RN** (6.9% urban, 16.1% rural), **Behavioral Health Clinician** (9.3% urban, 22.9% rural), **Dentist** (7.2% urban, 15.3% rural), **Physical Therapist** (13.5 urban, 31.6% rural), and **PA** (14.7% urban, 26.8% rural) (Table 4).

DISCUSSION

The "supply side" shortages apparently persist. "Inadequate Pool of Qualified Workers" was the top reason given for vacancies, cited by 54% of respondents, followed by "Transience/Moving Away" (28%), "Insufficient Compensation" (18%), and "Rural Isolation" (16%). Many tribal health organizations also reported "Insufficient/Expensive Housing" as a top reason for unfilled vacancies. The data also indicated a burgeoning "demand side," where shortages were exacerbated by population growth and an increased need and demand for health services, particularly in the high-growth Anchorage Mat-Su region.

Table 3. Regional vacancy rates

Occupational Group	Regions (Study Sample n=476)						
	North/West (n=10)	Southwest (n=17)	Interior (n=72)	Anchorage/ Mat-Su (n=252)	Gulf Coast (n=69)	Southeast (n=70)	Statewide/ Multiregional (n=6)
Physicians	26.7%	21.2%	21.6%	12.6%	10.4%	6.8%	30.3%
Professional Nurses	26.0%	21.6%	5.9%	11.1%	8.0%	5.9%	12.1%
Other Nursing Staff	18.6%	18.8%	5.8%	6.2%	4.6%	2.3%	8.8%
Dentists/Pharmacists/Therapists	32.4%	32.4%	20.7%	15.9%	16.5%	16.3%	12.4%
Behavioral Health	19.0%	22.7%	13.1%	8.3%	7.1%	11.1%	11.6%

Table 4. Urban vs. Rural vacancies and vacancy rates

Occupation	Urban		Rural	
	Estimated Vacancies	Estimated Vacancy Rate	Estimated Vacancies	Estimated Vacancy Rate
Family Physician	68	14.9%	38	17.6%
General Internist	27	18.8%	13	23.1%
RN	339	6.9%	94	16.1%
Family Nurse Practitioner	36	13.3%	34	36.4%
Pharmacist	68	22.7%	30	25.9%
Behavioral Health Clinician	36	9.3%	34	22.9%
Human Services Worker	158	8.5%	209	10.1%
Dentist	32	7.2%	38	15.3%
Dental Hygienist	14	3.6%	17	10.0%
Dental Assistant	27	4.4%	64	14.9%
Physical Therapist	59	13.5%	26	31.6%
PA	50	14.7%	47	26.8%
All Occupations	1998	8.1%	1162	13.3%

Many respondents provided commentary with their surveys and noted positions that are particularly difficult to fill:

- *We have been hiring travelers for Physical Therapy positions at $67/hr — we can't find therapists to employ. We have been looking for 2 years.* (Urban Medical Clinic)
- *Without a state Physical Therapy program it is very difficult to get PT staff. Usually this area is staffed by PTs that leave competing PT clinics.* (Urban Physical Therapy Office)
- *We really need a pharmacy school in Alaska. It took two years to fill our last pharmacist position.* (Urban Pharmacy)
- *Pharmacists are always the most difficult position to fill.* (Rural Pharmacy)

1896

The availability of military spouses has apparently alleviated some of the workforce pressure, but has exacerbated the "transience" problem. Also affecting the shortages was the absence of local training resources (such as medical, dental, pharmacy, and therapy schools) to provide a local workforce pipeline. In the qualitative data, common refrains were, "we need a pharmacy school," "we need a dental school," "we need a physical therapy school."

The acuity of workforce shortages was also reflected by the high percentage of estimated vacancies the responding employers would consider filling with new grads (Table 5). Respondents indicated that they had the capacity to hire sizeable graduating cohorts of Family Physicians, PAs, Occupational and Physical Therapists, Pharmacists, and Dentists. These may be the occupations likely to yield optimal responses to substantial investments in preparation and training programs and/or targeted recruitment and retention campaigns.

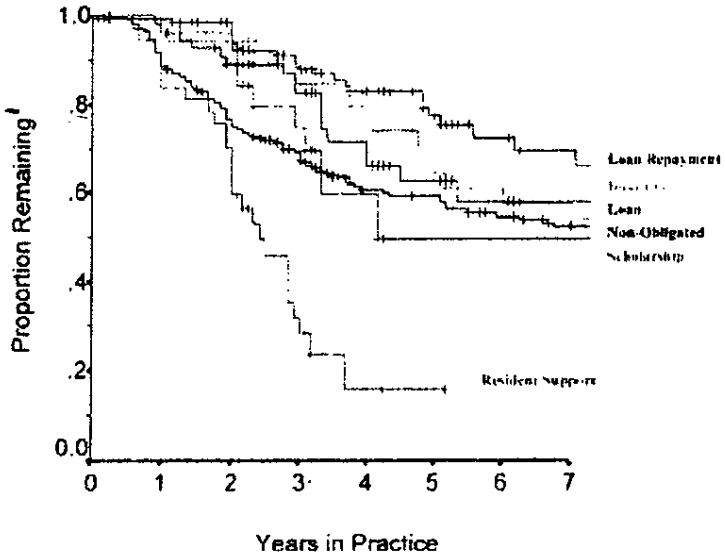

FIGURE 3. Retention of obligated physicians within their service practices: Kaplan-Meier estimations by type of program and compared with nonobligated physicians

Outcomes of States' Scholarship, Loan Repayment, and Related Programs for Physicians

Donald E. Pathman, MD, MPH,† Thomas R. Konrad, PhD,* Tonya S. King, PhD,‡ Donald H. Taylor, Jr., PhD,§ and Gary G. Koch, PhD‖*

Context: Many states attempt to entice young generalist physicians into rural and medically underserved areas with financial support-for-service programs—scholarships, service-option loans, loan repayment, direct financial incentives, and resident support programs—with little documentation of their effectiveness.

Objective: The objective of this study was to assess outcomes of states' support-for-service programs as a group and to compare outcomes of the 5 program types.

Design: We conducted a cross-sectional, primarily descriptive study.

Participants: We studied all 69 state programs operating in 1996 that provided financial support to medical students, residents, and practicing physicians in exchange for a period of service in underserved areas; federally funded initiatives were excluded. We also surveyed 434 generalist physicians who served in 29 of these state programs and a matched comparison group of 723 nonobligated young generalist physicians.

Data Collection: Information on eligible programs was collected by telephone, mail questionnaires, and from secondary sources. Obligated and nonobligated physicians were surveyed, with 80.3% and 72.8% response rates, respectively.

Main Outcome Measures: Levels of socioeconomic need of communities and patients served by physicians, programs' participant service completion and retention rates, and physicians' satisfaction levels.

Results: Compared with young nonobligated generalists, physicians serving obligations to state programs practiced in demonstrably needier areas and cared for more patients insured under Medicaid and uninsured (48.5% vs. 28.5%, $P < 0.001$). Service completion rates were uniformly high for loan repayment, direct incentive, and resident-support programs (93% combined) but lower for student-targeting service-option loan (mean, 44.7%) and scholarship (mean, 66.5%) programs. State-obligated physicians were more satisfied than nonobligated physicians, and 9 of 10 indicated that they would enroll in their programs again. Obligated physicians also remained longer in their practices than nonobligated physicians ($P = 0.03$), with respective group retention rates of 71% versus 61% at 4 years and 55% versus 52% at 8 years. Retention rates were highest for loan repayment, direct incentive, and loan programs.

Conclusions: States' support-for-service programs bring physicians to needy communities where a strong majority work happily and with at-risk patient populations; half stay over 8 years. Loan repayment and direct financial incentive programs demonstrate the broadest successes.

Key Words: physicians, health services access, rural health, primary care, student loans and scholarships, loan repayment, state health policy

■ *It is one of the happy incidents of the federal system that a single courageous State may, if its citizens choose, serve as a laboratory; and try novel social and economic experiments without risk to the rest of the country.—"Louis Brandeis*
Supreme Court of the United States
New State Ice Co. v. Liebmann, *1932; dissenting opinion*[1]

States and federal agencies frequently use service-requiring scholarships, loans, loan repayment, and related incentives to entice physicians into medically underserved settings.[2–4] As of 1996, 40 states offered 69 such physician-obligating programs, the federal National Health Service Corps (NHSC) and Indian Health Service (IHS)-sponsored scholarship and loan repayment initiatives,[5] and the NHSC and states jointly sponsored an additional 29 loan repayment programs. Service-requiring programs collectively wield a sizable workforce, estimated at 2900 physicians in 1996, half each under state and federal auspices.[5]

The 5 recognized program types—scholarships, service-option loans, loan repayment, direct financial incentives,

and resident support[5]—share fundamental goals and an approach that links financial support to periods of service; however, these program variations differ in important ways. *Scholarship programs* obligate medical students early in their training and many years before they are to serve their obligations. Participants in scholarship programs are firmly expected to provide service, and hefty penalties are used to discourage participants from buying out their obligations should their career interests change. *Service-option loan programs* also target medical students but offer participants a choice of performing service or repaying program funds at standard interest rates.

Loan repayment and *direct financial incentive programs* commit physicians much later, near the completion of residency training when their service is to begin. They typically levy no or minimal penalties on physicians who fail to complete a period of service. With loan repayment programs, physicians receive assistance repaying traditional education loans they acquired years earlier as students, whereas financial incentive programs provide unrestricted funds.

The newest programs, the *resident support* type, respond to the growing financial pressures on residents[6] with assistance in the form of scholarships, loan repayment, and direct financial incentives. Service is required and begins 1 to 2 years after a commitment is signed, at the end of residency.

Over the decades much has been said, with little supporting evidence, about the outcomes of these programs as a group and the relative strengths of the individual program types. It is generally believed, for example, that physicians in support-for-service programs are less satisfied and remain in their practices briefer than physicians without obligations. Many observers believe that stiff penalties are required to curtail otherwise high buyout rates, especially in programs that obligate individuals years in advance of service.[7] Others worry, however, that high penalties trap some participants in ill-suited commitments who are then unhappy as they serve and unlikely to be retained.[8–10] Proponents of loan repayment and direct incentive programs believe satisfaction and retention are better when physicians sign commitments after their training when they know their career interests, job options, and families' needs.[11] Scholarship defenders counter that only captive scholarship recipients can be drawn to the most desperately underserved communities because they are so unattractive.[12]

Few studies have assessed the outcomes of support-for-service programs, like the rates at which their practitioners complete their obligations with service and their practitioners' satisfaction and retention. Programs do not often undertake self-evaluations and those that do seldom have comparative data on other programs.[2,13] States and federal agencies regularly add, drop, and modify their programs without firm evidence of their effectiveness.[14–17]

This study has 2 primary goals: 1) to assess outcomes of states' support-for-service programs as a group, and 2) to compare outcomes for the 5 program types. We assess program outcomes we believe are important to underserved communities, physicians, and policymakers: the levels of socioeconomic need of communities and patients served by participating physicians, participant service completion and retention rates, and satisfaction levels of participants and their families. We also test the assumptions that 1) higher buyout penalties increase the proportion of physicians who fulfill their obligations with service but at a cost of lower physician satisfaction and poorer retention, and 2) scholarship programs bring physicians into the neediest communities.

METHODS

Identifying Eligible State Programs

We identified all state support-for-service physician programs nationally as of 1996[5] by supplementing previous lists of relevant programs[3,18,19] with information from telephone calls to key contacts in every state and from available online sources and printed materials. Eligibility criteria for programs were that they 1) provided financial support to students, residents, and/or practicing physicians in 1996; 2) had a service requirement or option in defined medically needy settings located across a given state; and 3) received no direct federal support. Of the 69 identified eligible programs, 20 offered scholarships, 24 provided loan repayment incentives, 12 offered loans with service options, 7 offered direct financial incentives, and 6 offered support to residents.

Program Data

We obtained basic descriptive information for all programs through initial and follow-up telephone contacts with program directors and from programs' web sites, brochures, reports, and copies of their enacting legislation. This information was verified and supplemented through an 8-page mailed questionnaire completed by 45 programs (65%). Forty-eight (86%) of the 56 programs old enough to have had more than 20 physicians eligible for placement in service sites provided estimates of the service completion rate for their obligated physicians over the previous 3 years. Programs were approached for survey and other data in no particular order other than we started with the few directors we knew and tended to recruit all programs within a particular state at the same time.

Identifying State-Obligated and Comparison Group Physicians

Programs were asked to provide names and basic information on each physician who signed a first contract with them and/or had been placed in a first-service site in 1991 and 1996. These 2 years were selected because individuals who

committed to student programs in 1991 and loan repayment and direct incentive programs in 1996 would have begun serving their obligations in approximately 1996. Programs created after 1991 provided names of individuals contracted in their first year of operation; very large programs provided only a randomly selected subsample of names from 1991 and 1996, and smaller programs supplemented their samples with names of physicians obligated in proximate years (eg, 1992 and 1995). We elected not to request physician names from the last 12 eligible programs as a result of project time requirements. Of the 48 programs from which we requested physician data, 29 (60%) provided all data we needed to survey their obligated physicians. Programs from which we requested and received physician-specific information, programs from which we requested but did not receive this information, and programs from which this information was not requested were similar in size, physicians' contract terms, the types of geographic locations where their obligated practitioners served, and reported service completion rates.

We surveyed all 434 family physician, general internist, and general pediatrician participants (allopaths and osteopaths) identified by programs as then serving or having served their obligations. We excluded nongeneralists and physicians who defaulted or bought out their obligations without ever serving a day of their obligations. Programs reported no international medical graduates.

We constructed a comparison group of nonobligated generalists from the American Medical Association Physician Masterfile. A sampling frame of eligible subjects was constructed of all 8742 graduates of U.S. allopathic and osteopathic medical schools in 1988 and 1992 who 4 years after graduation were in clinical practice in the United States in family practice, general internal medicine, and general pediatrics. A stratified random sample of 723 of these physicians was selected, with oversampling of strata to match the state-obligated cohort in specialty distribution and geography, and to ensure diverse racial and ethnic representation.

Physician Surveys

In 1998 and early 1999, we sent up to 4 questionnaire mailings to the state-obligated and comparison group physicians. Of the 434 obligated physicians surveyed, 23 proved to be ineligible or were never located, and there were 330 eligible respondents (80.3%). Response rates for obligated physicians were comparable across service program types, physician specialties, and racial–ethnic groups.

In the comparison sample of 723 physicians, 56 subjects proved ineligible or were never located and 468 eligible physicians responded (72.8%). Response rates for the comparison sample did not vary by subjects' rural/urban location, gender, or specialty; rates were somewhat lower for blacks (52.4%). We excluded 100 physicians from the comparison group who indicated that they had or were serving a state or federal obligation.

In the physician questionnaires, participants of state programs reported details of the first practice in which they served their obligations. On parallel questionnaire items, comparison group physicians described the first practice after residency in which they worked 9 months or longer. Both groups reported their incomes, satisfaction, their families' experiences, and their patients' insurance types. Nearly all questionnaire items had been used in earlier studies[9,20,21] and were pilot-tested again for applicability to this study with 30 obligated and nonobligated physicians in North Carolina.

We appended 1990 U.S. Census data characterizing the towns and cities where physicians worked.[22] County data on local physician-to-population numbers were appended for 1994 from the Area Resource File.[23]

Analyses

We compared obligated and nonobligated physicians on a variety of outcomes, including satisfaction and retention rates. We also compared programs of each of the 5 types individually and with the other 4 program types as a group. We used chi-squared tests, independent sample 2-tailed *t* tests, and 1-way analysis of variance (ANOVA) to compare groups on normally distributed variables. The Kruskal-Wallis test was used to compare groups on 4 nonnormally distributed variables: physician income, town population, town per capita income, and county primary care physician-to-population ratios. Bivariate comparisons were followed with linear and logistic regression models (with log transformations of nonnormally distributed variables) to adjust for key potentially confounding or explanatory variables. Life tables were used to describe proportions of physician groups remaining in their practices for specified numbers of years. Kaplan-Meier plots and Cox proportional hazards models were used to compare estimates of retention for various physician groups over time.

We also assessed relationships between programs' buyout costs and the various program outcomes with chi-squared and 2-tailed *t* tests. We further used multiple and logistic regression to test the relationships between buyout costs and the various outcomes for confounding by varying service obligation terms across programs and/or respondents' actual obligation periods. No confounding was found and we do not report these models.

Comparisons of obligated and nonobligated physicians were weighted to adjust for strata sampling fractions and response rates and run on the SUDAAN statistical software program (Research Triangle Institute, Research Triangle Park, NC). Analyses involving only obligated physicians were run on the SPSS statistical program (release 11.5.0; SPSS Inc., Chicago, IL) and not weighted. A level of statistical significance of $P \leq 0.05$ was used throughout.

RESULTS

State Programs

In 1996, the 69 eligible programs were relatively new and small, with a median age of just 6 years and median workforce of 11 physicians. Sixty-four programs were funded with state revenues, 2 had only private support, and 3 were self-supporting using buyout funds from earlier participants; 9 programs also used community matching funds. Forty-seven programs were based in state offices of rural health or other state agencies, 18 within individual medical schools, and 4 within private organizations.

Programs supported physicians with an average of $14,000 for each year of obligated service with no significant differences across the 5 types of programs ($P = 0.55$). Average minimum service obligation terms did vary across program types, from 12 months in resident support programs, 18 months in scholarship programs, 19 months in service-option loan programs, 29 months in loan repayment programs, and 36 months in direct financial incentive programs ($P = 0.003$).

Physicians and Their Practices

Physicians obligated to state programs, compared with physicians without obligations, were more often male (63% vs. 53%, $P < 0.05$), more often married (84% vs. 75%, $P < 0.05$), slightly older (33 vs. 32 years on average, $P < 0.001$), but no more or less likely to be black or Hispanic (8.5% vs. 6.2%, $P = 0.10$). Obligated physicians were much more likely than nonobligated generalist physicians to be family physicians (72% vs. 38%, $P < 0.001$) and more often owned the practices where they worked (36% vs. 27%, $P < 0.05$), but earned comparable salaries (median, $89,735 vs. $89,622, $P = 0.2$).

Comparing physicians obligated to the 5 types of programs, we found no differences in gender, marital status, ethnicity, or income. Loan program participants, however, were less likely to be family physicians than participants of other programs (54% vs. 75%, $P = 0.02$), and physicians in incentive programs more often owned their practices (49% vs. 16%, $P = 0.01$).

Although minimum service obligation durations varied across programs of the 5 types, the average number of years this study's respondents were actually obligated to their programs did not differ for those in 4 of the types (range, 3.13–3.48 years, $P = 0.31$) but was shorter for participants of resident-support programs (2.72 years, $P = 0.02$).

Service Completion Rates

The 5 types of programs differed greatly in how often their physicians completed their obligations with service rather than buying out or defaulting ($P < 0.001$) (Fig. 1). Service-option loan programs reported the lowest average service completion rates (44.7%) followed by scholarship programs (66.5%). The 30 programs of the remaining 3 types, programs that committed physicians after training or as residents, reported uniformly high service rates (entire group mean, 93%; 92% after omitting the 5 of these 30 programs without a minimum service period).

Program directors reported obligation default rates, the proportion of obligated physicians who failed to provide either service or repay program funds, of 5.2% on average for all programs combined with no significant differences across program types ($P = 0.78$). In contrast, the percentage of physicians who bought out-of-service commitments differed greatly across the 5 program types, greatest in service-option loan programs (49.2%) and scholarship programs (27.2%).

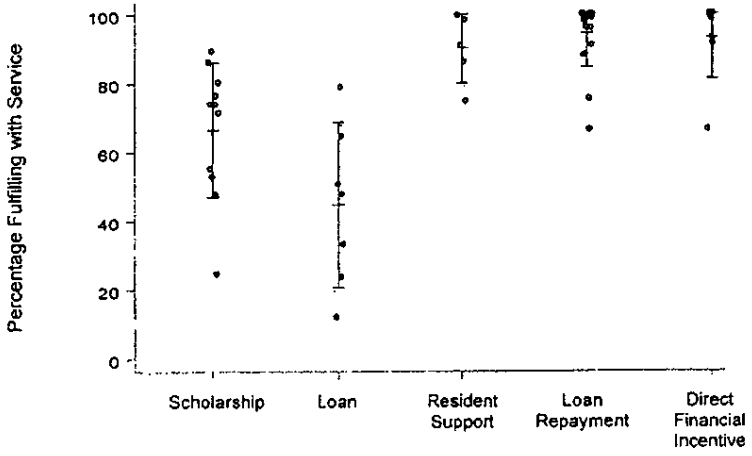

FIGURE 1. Percentage of recent physicians in each program (°) who fulfilled their obligations with service, grouped by program type.

Programs of the remaining 3 types reported comparable low buyout rates (2.3% combined). Thus, the high buyout rates of student programs account for their low service completion rates.

The costs that loan repayment, direct incentive, and resident support programs levy on physicians who buyout of obligations had no relationship with programs' service completion rates. Only among student programs, scholarships and service-option loans, were penalties and service completion rates related; specifically, rates averaged 80.3% for the 4 student programs that charged penalties of 3 times the amount of support provided compared with 48.6% for the 12 programs that charged less ($P = 0.02$).

Communities and Patients Served by Physicians

Physicians serving in state programs of all types combined, compared with the nonobligated physicians, worked in counties that were far more often rural and had lower primary care physician-to-population ratios, in cities and towns that were much smaller and poorer, and they reported more of their patients were uninsured or covered under Medicaid (Table 1). Even in analyses run separately for rural and urban-situated physicians and in multivariate models adjusting for physicians' rural versus urban location, specialty, and demographics, obligated physicians were still found to work in needier communities and with needier patients by all measures.

We explored whether county physician-to-population ratios were lower for obligated physicians simply because states with a greater need for physicians (and thus lower ratios) more often sponsored support-for-service programs.[24] We confirmed that, indeed, obligated physicians worked in counties with primary care physician-to-population ratios lower than their state's median county ratios more often than nonobligated physicians (37% vs. 11%, $P < 0.001$).

Among obligated physicians and weighing findings on all 5 measures of community need (Table 1), those serving in direct financial incentive programs worked in the neediest settings. Contrary to popular belief, the towns and counties where scholarship participants worked demonstrated no greater need than where participants of other programs worked.

Physician and Family Satisfaction

Physicians serving state obligations were more often satisfied with their work and practices and more often felt a sense of belonging to their communities than nonobligated physicians (Fig. 2). Obligated and nonobligated physicians gave comparable estimations of the satisfaction and needs-fulfillment of their spouses and children.

In virtually all ways tested, satisfaction was comparable for physicians and families participating in the 5 types of programs, the only exception being that scholarship program participants more often than others felt restricted by the practice sites available to them (36.6% vs. 19.3%; $P < 0.01$).

TABLE 1. Comparison of Community and Patient Characteristics of State-Obligated and Nonobligated Physicians; Physicians Serving in the 5 Types of Service Programs; and Physicians Obligated to Programs Using Different Types of Site-Eligibility Criteria

		Community and Patient Characteristics				
	(n Physicians/ Programs)	Rural (Nonmetropolitan) County (%)	Median Town/City Population	Median Town/City per Capita Income ($)	Median County Primary Care Physician-to-Population Ratio	Mean Patients Covered by Medicaid or Uninsured (%)

FIGURE 2. Satisfaction and needs fulfillment of physicians and their families serving in all state programs combined (n = 330) compared with nonobligated physicians (n = 368)

A remarkable 90.2% of obligated physicians indicated that they likely would enroll in their program if they had it to do all over again, including 64.2% who indicated that they definitely would do so. Differences across programs were found only for physicians in scholarship compared with loan repayment programs in which 47% versus 71% of physicians indicated that they would definitely sign up again ($P = 0.01$).

We explored the relationships between the buyout costs that programs levied and physicians' satisfaction, again finding associations only for medical student-targeted programs. When service-option loan and scholarship programs charged more than simple principal plus interest to buyout, most measures of physician satisfaction were lower, including fewer participants reporting, in retrospect, a definite willingness to commit to their programs again (36% vs. 65%, $P = 0.04$).

Retention

Obligated physicians remained longer in their service practices than nonobligated physicians remained in their first jobs after training (hazard ratio [HR] for leaving, 0.70; 95% confidence interval [CI], 0.51–0.96; $P = 0.029$) (Table 2). Respective group retention rates from life tables at 2 years were 92% versus 77%, at 4 years 71% versus 61%, at 6 years 59% versus 55%, and at 8 years 55% versus 52%. Retention tended to be better for obligated physicians than nonobligated physicians even after adjusting for group differences in physicians' specialties and demographics, although the differ-

TABLE 2. Comparison of the Retention of State-Obligated versus Nonobligated Physicians

	Hazard Ratio	*P* Value	95% Confidence Interval
Model 1 (unadjusted)			
Obligated vs. nonobligated	0.70	0.029	(0.51–0.96)
Model 2 (adjusted)			
Obligated vs. nonobligated	0.75	0.080	(0.53–1.03)
Family physician vs. internist	0.91	0.688	(0.58–1.43)
Pediatrician vs. internist	0.80	0.533	(0.40–1.61)
Male vs. female	0.76	0.190	(0.50–1.15)
Married vs. unmarried	0.75	0.270	(0.46–1.25)

ence fell under the threshold of statistical significance (P = 0.08).

Among the 5 types of service-requiring programs, the longest group retention was seen for loan repayment recipients, 66% of whom remained in their service sites 8 years after starting work there, with a hazard ratio of departure compared with all other programs = 0.46 (95% CI, 0.30–0.70; P <0.001) (Fig. 3). Retention was shortest for resident support programs (HR, 6.72; 95% CI, 4.05–11.12; P <0.002). Scholarship participants demonstrated the second shortest retention (HR relative to service-option loan, loan repayment and direct incentive programs, 1.96; 95% CI, 0.97–3.97; P = 0.061).

Programs' buyout penalties were associated with retention, but once again only in scholarship and service-option loan programs, wherein penalties above simple principal plus interest were associated with lower odds of retention at 4 years (odds ratio, 12.4; P = 0.012).

DISCUSSION

Outcomes for states' support-for-service programs as a group were generally quite positive. Programs as a whole placed physicians in small and needy rural towns and counties, where physicians estimated that almost half of their patients were covered by Medicaid or were without health insurance. Physicians who served in these state programs were generally more satisfied with their work and communities and remained in their service sites longer than nonobligated "mainstream" generalists. We do not believe that the jobs and communities where these physicians served were inherently more pleasing; rather, we suspect that the benevolence of individuals who commit to and then fulfill service requirements predisposes them to find particular satisfaction from work that they believe in.[25,26]

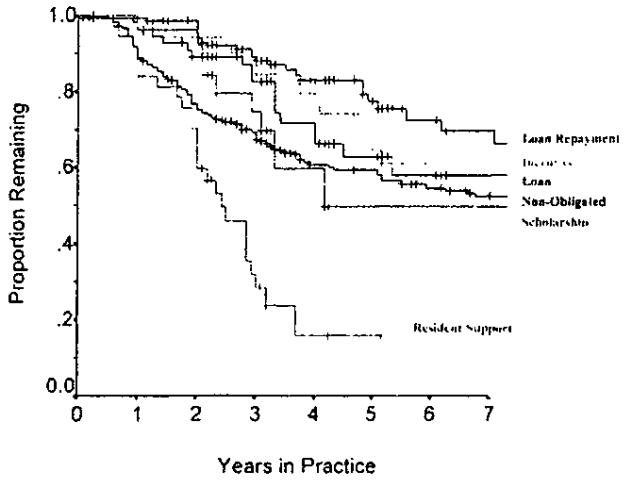

FIGURE 3. Retention of obligated physicians within their service practices: Kaplan-Meier estimations by type of program and compared with nonobligated physicians

Loan repayment and direct financial incentive programs enjoyed the greatest successes among the various program types, confirming the wisdom of recruiting physicians at the end of their training.[11] Financial buyout penalties were generally not used or needed in these programs, because their service completion rates were excellent without financial threats. Several program directors spoke of how much easier loan repayment and financial incentive programs are to administer than student-targeted programs, in which program staff must monitor participants during their training and deal with the many who buy out.[10,27] Direct financial incentive programs demonstrated an interesting niche among the program types, supporting physicians who often owned their practices, often in particularly needy settings.

Despite positive outcomes for programs overall, this study confirmed some commonly held concerns about scholarship programs. Very high penalties do seem to cut buyout rates by one third,[7] but penalties of any amount were associated with lower physician satisfaction and shorter retention. Contrary to claims,[12] state scholarship program participants did not work in demonstrably needier settings than participants of other programs. Studies of the NHSC Scholarship Program have similarly found that its participants do not serve in needier settings than those in the NHSC Loan Repayment Program.[11,27] The Congressional Government Accounting Office (GAO) and NHSC further similarly concluded that the NHSC Loan Repayment Program achieved better outcomes—higher service-completion rates, greater satisfaction, and longer retention—than the NHSC Scholarship Program, and also at a lower cost.[11,15,28]

The affordable buyout terms of student service-option loan programs allowed half of their participants to opt out of service, but the half who did serve were satisfied and long retained. Service-option loans could play an important complementary role to programs that target graduates, appealing to aspiring medical students who might otherwise choose not to pursue a medical career rather than assume the typical $100,000+ debt in traditional education loans. To embrace loan programs with service options, states must accept that it is not fatally undesirable for some participants to satisfy their loan contracts financially rather than with service. Indeed, most medical students fund their education with traditional loans, like the Health Education Assistance Loans (HEAL), where there is no option or enticement for service.[6] Concerns that too many physicians buyout of loan-for-service programs leaving too few available for shortage communities can be addressed quite readily by making more awards up front, costing programs nothing more because nearly all who opt not to serve repay their loans with interest.

Limitations and Unanswered Questions

Some of this study's data were self-reported and thus vulnerable to reporting inaccuracies. Directors provided figures on their programs' default and buyout rates and likely used a variety of methods to determine these rates. We are unaware, however, of any systematic inaccuracies likely to have biased our principal findings.

Some directors of scholarship and service-option loan programs who otherwise cooperated with our study would not provide the physician-specific information we needed to survey their participants, citing federal confidentiality protections of administrative data collected on students.[29] Given the demonstrated similarities between participating and nonparticipating programs, most importantly in the service completion rates of their participants, we do not suspect that the lower participation rates of student programs biased our outcomes. However, if less successful student programs withheld participants' names to hide their weaknesses, then loan repayment and direct incentive programs could actually be relatively even *more* successful than we judged (ie, bias, if present, was toward the null).

We had wanted to assess program costs and cost-effectiveness but program directors could not provide complete or comparable cost data. We also did not assess the experiences of physicians who signed up with these programs but chose not to serve.

We had no validated criteria on which to judge how often state-obligated physicians work in the very neediest settings, because states have not substantiated their site eligibility criteria and current federal criteria are inadequate.[30,31] Nonetheless, because some state programs use very broad site eligibility criteria, it is very likely that some obligated physicians do not work in the neediest areas.[5,32]

CONCLUSIONS AND RECOMMENDATIONS

As a whole, states' support-for-service programs bring physicians to needy communities where they find satisfying work caring for at-risk patient populations and remain for many years. Of all program types, the loan repayment and direct financial incentive forms, which target physicians after training, show the broadest successes. The successes of these state programs warrant their continued support and perhaps expansion to remedy the continuing maldistribution of physicians.

ACKNOWLEDGMENTS

The authors are grateful to the many state program directors, program staff, and participating physicians who provided data for this study. The authors thank the indispensable contributions of Kathleen Crook, MPA, to the data management aspects of this study, and the contributions of Tim Henderson, MSPH, of the National Conference of State Legislatures and James Bernstein, MHA, and Thomas Tucker of the NC Office of Rural Health and Resources Development to our understanding of these state programs and interpretation of the data. The authors also thank the fellows of UNC's National Research Service Award Primary Care Research Fellowship for their thoughtful suggestions on various drafts of this paper. This study was funded by grant R01-HS09165 from the Agency for Healthcare Research and Quality.

Health Care Professions Loan Repayment Program

Summary

Problem

Alaska is competing with other states and nations for the finite pool of available healthcare professionals. This competition will only intensify since the growth of supply is continuing to fall behind that of demand.

A common state-level response to these pressures is the use of financial inducements, collectively known as support-for-service programs (SFSP's). Good outcomes have been achieved with these. There are five types: scholarships, service-option loans, loan repayment, direct financial incentives, and residency support programs. All SFSP's have the same public goal: To improve healthcare staffing in shortage areas. National studies have determined loan repayment programs to be one of the most effective of the several support-for-service strategies - in terms of both recruitment and retention (see: *HCPLRP: Issue Paper*, 2007)

A key problem is that Alaska does not have a robust support-for-service program while most other states do, many have several, and further, some of those are growing. In sum, Alaska is at a substantive disadvantage as it necessarily competes in the national healthcare labor market.

Discussion

Alaskan health care provider agencies use many approaches to recruit and retain staff. This has proved difficult, however, and particularly so where (1) federal loan repayment programs do not apply, or, (2) there is insufficient resource available to meet need. More tools are needed to confront the problem of steadily growing vacancies in the Alaskan healthcare workforce.

Most all other states have state-sponsored programs that influence health professionals' geographic and specialty distributions. Programs that integrate a number of strategies for attracting and retaining health professionals have had a greater likelihood of success than have programs which rely on a single strategy. Substantial evidence indicates that state-level support-for-service programs typically are a fundamental part of those strategies.

Support-for-Service Programs

It is well-established that many healthcare professionals carry a heavy debt-burden as they come out of training and are attracted to serving in those locations where a share of that burden can be taken away. For instance, in 2004, young physicians' educational debt averages stood at over $109,000 and this cost was increasing at the rate of more than $4,000 per annum.

There are several types of support-for-service programs. One of the two most common types of such programs is the service-requiring scholarship program. These pay tuition and other costs for healthcare students while obligating them to a period of service that begins when they complete residency (or similar post-graduate training) years later. The other common program type is loan repayment. Loan repayment programs recruit healthcare practitioners as they complete their training and are ready to begin service in exchange for paying off the traditional education loans

they acquired years earlier. Programs of both types typically require one year of service for each year of training cost support they provide.

Considerable precedent exists for state-level offices to sponsor and manage financial support and inducement programs to thus encourage the within-state service of healthcare personnel. Overall, 81 state-level programs were identified. There were 44 states with at least one program (88% of states). Fully 21 states had two or more programs (47%), with highs found in New Mexico (at 5) and Minnesota (at 7). On average, the 44 states had nearly two programs (1.8) each.

Loan Repayment Programs

In national studies, loan repayment has been found to be a successful strategy to recruit and retain health care professionals. Twenty-five years of program evaluations have clarified many of the outcomes possible from healthcare training support-for-service programs. Furthermore, studies have demonstrated that loan repayment programs, as a whole, have better outcomes than scholarship programs. Studies have shown that there are several benefits which can accrue from loan repayment programs. Selected examples include: (a) high position-fill rates, (b) high service-completion rates, and (c) high retention rates.

These programs are successful because the benefit of loan repayment is clear to potential applicants, and programs typically only provide payments to participants after they complete each 3 or 6 months of work; therefore, if a participant leaves or otherwise fails to work in the agreed upon area or practice, payments simply stop and there is no need to enforce penalties.

In 2006, the Alaska Physician Supply Task Force recommended a number of specific strategies and action steps to assuring an adequate supply of physicians to meet Alaska's need. One of the PSTF findings was that loan repayment is a proven strategy for recruiting physicians, and the federal loan repayment programs currently available to Alaska physicians need to be stabilized financially and supplemented with Alaska-based programs.

Conclusion

Reported increasing vacancy rates, increasing costs of recruitment [SORRAS report], and comparisons with national norms [PSTF report] suggest that Alaska currently experiences a shortage of healthcare professionals, and, that shortages exist in several key occupational categories. Loan repayment programs have demonstrated substantial and longstanding success as a public strategy which has helped to rectify such shortages.

Recommendation

It is recommended that Alaska create a "Health Care Professions Loan Repayment Program".

To do this, a planning process should be established. This process should define and prepare for adoption at least the following program elements: (a.) organizational support, (b.) oversight, (c.) fiduciary agent, (d.) practitioner eligibility, (e.) site eligibility, (f) repayment details, (g.) program design & management, and (g) program evaluation.

Health Care Professions Loan Repayment Program
Issue Paper

Abstract

This paper: (1.) illustrates the current and expected healthcare workforce needs of Alaska; (2.) indicates the widespread use elsewhere of support-for-service programs, and in particular loan repayment; and (3.) recommends that Alaskans should now explore creation of a Health Care Professions Loan Repayment Program (HCPLRP).

Main Issue

Alaska is increasingly vulnerable to the competitive challenges posed by other states and nations for the finite pool of available healthcare graduates. This vulnerability will increase during coming years because of two factors. (1.) The need for health care professionals in Alaska is steadily rising, and, shortages are now evident in some categories. (2.) Further, these trends are national. These workers are part of, and often respond to, nationwide labor markets. Further, these trends are expected to accelerate. This is particularly true in those states that do not produce adequate numbers of their own health workers in the given disciplines. This puts such states at a marked disadvantage. Financial incentive programs are particularly important for those states, and Alaska is one of these. As a result, several other states have become robust competitors in recruitment of the healthcare workforce, and some are planning new and expanded loan repayment programs (Pathman, 2007).

A fundamental, and common, state-level response to these pressures is the use of financial inducements, these collectively known as support-for-service programs (SFSP's). Excellent outcomes are readily achievable from these efforts. There are five types: scholarships, service-option loans, loan repayment, direct financial incentives, and resident support programs. All support-for-service programs have the same key public goal: To improve healthcare staffing in shortage area communities.

National studies have determined loan repayment programs to be one of the most effective of the several support-for-service strategies - in terms of both recruitment and retention. As compared to the other SFSP options, here loan repayment participants sign support-for-service contracts after they complete their training, when they are older and better informed as to their career options. These professionals make commitments at the time they are ready to begin their service-obligations. They are more likely to know their own needs and those of their families at this later juncture. They know where they will serve and have a sense as to how well their chosen worksites will "fit" their needs.

Problem

This section presents evidence which indicates that:

- A healthcare workforce shortage currently exists in several occupations.
- Under current conditions these shortages will continue into the foreseeable future.
- In several occupations, these shortages will escalate.

Trends in National Workforce

Numerous, prominent sources indicate that there is a growing national shortage in the rural health care workforce. Two examples follow.

GAO Position (2001): In 2001, the General Accounting Office's (GAO's) director of health care-public health issues testified before Congress regarding growing concerns about the adequacy of the health care work force and lessons learned from the experience of the National Health Service Corps (NHSC) in addressing the maldistribution of health care professionals (Heinrich, 2001). Selected key points were:

- Recruitment and retention of adequate numbers of qualified health care workers are major concerns for many health care providers today.
- Available evidence suggests emerging shortages in some fields (e.g. nurses).
- Vacancy rates for HC workers in rural areas and inner cities are especially high.
- Although demand for most health workers will continue to grow, the increasing age of Americans, and their workforce may limit supply.
- The National Health Services Corp (NHSC) illustrates the challenges in addressing shortages of health professionals in certain locations.
- Better placement coordination with waivers for J-1 visa physicians is needed.
- Loan repayment is a better approach than service-requiring scholarships, to which individuals commit when they are still students.

NOSORH Position (2006): A representative and recent understanding can be gained from the National Organization of State Offices of Rural Health (NOSORH). In September 2006 NOSORH issued a Statement of National Priorities. Presented below are selected summaries of that document, without further comment. Interested readers should see: http://www.nosorh.org/pdf/Rural_Impact_Study_States_IT.pdf

- While most rural communities in the U.S. already experience health care workforce shortages, the demand for health care workers nationwide is projected to grow faster than the supply. This shortage of health care workers can impact health care in a variety of ways, including: decreasing quality of care, decreasing access to care, increasing stress in the workplace, increasing medical errors, increasing workforce turnover/decreasing retention rates, and increasing health care costs.

- Most rural areas ... are classified by the federal government as Health Professional Shortage Areas (HPSAs) for primary medical care. A HPSA designation is made using a formula that includes a ratio of physician to population that is greater than 1:3,500. A population is considered "adequately served" when the ratio is 1:2,000. In 1997, more than 2,200 additional physicians would have been needed in non-metropolitan areas to eliminate HPSA designations. SORH directors consider the workforce shortage to be one of the greatest issues facing rural health, in particular shortages related to physicians and nurses.

- Certain national health workforce trends that will have a profound impact on rural populations and exacerbate the current rural health workforce shortages. Examples follow:

    - If health care consumption patterns and physician productivity remain constant over time, the aging population will increase the demand for physicians per thousand population from 2.8 in 2000 to 3.1 in 2020. Demand for fulltime-equivalent RNs per thousand population would increase from 7 to 7.5 during this same period.

    - Minority and female physicians have a greater propensity than do non-minority and male physicians to practice in urban communities. Meanwhile the percentage of physicians that are minorities and women is increasing.

    - The Bureau of Health Professions projects that there will be a 33-44% increase in demand for physicians, 41 percent for RNs, and 46 percent for LPNs from 2000 to 2020.

    - According to the Bureau of Health Professions, there is an acute shortage of pharmacists in the U.S. In February 1998, there were 2,670 unfilled full and part-time positions in the U.S. as compared to 6,920 in February 2000. Adding to this, enrollment rates in U.S. schools of pharmacy declined during this period.

    - In 1970, women accounted for 13 percent of the nation's pharmacists as compared to 2000 when they were 46 percent of the nation's pharmacists. Women tend to elect part-time work as pharmacists.

    - From 1990 to 1999, there was a 46 percent increase in the number of prescriptions dispensed from hospitals.

- *NOSORH concluded the following in its 2006 statement of national priorities:* ...SORH directors around the U.S. determined that they are most concerned with issues related to rural health workforce, health care services, and the needs of special populations. Research suggests that this concern is warranted as: demand for health care workers is increasing while the supply is decreasing; rural health care facilities continue to be fragile, there are gaps in these services, and all of these rural health services are critical to the health and well-being of the U.S.; and the needs of rural populations are changing, however, the programs serving them are unable to meet their needs. While SORHs respond to a variety of rural health needs and issues, new health care policies and additional rural health programs and funding will be needed if states are to address these increasingly important rural health issues and concerns.

Growth in Alaskan Jobs

Healthcare Workforce Overall: In 2004 there were 301,300 jobs in Alaska, with 32,700 (10.9 percent) of these in health care and social assistance (HCSA). By 2014, the overall job count is projected to be 349,550, with the HCSA workforce at 43,650 (12.5 percent). Thus by 2014, the number of HCSA jobs is projected to grow by 10,950 (34 percent), accounting for 22.7 percent of overall statewide job growth for the period. By 2014, health care and social assistance is projected to be the largest single industry workforce category in Alaska with 43,650 workers. (AHCDB, 2007, Table 3.300).

Social Service Occupations: For 2004, employment in community & social service (CSS) occupations was estimated to be 6,025 jobs. By 2014, this category of jobs is forecasted to be at 7,487, a rise of 1,462 (24 percent). The highest projected growth rates from 2000-2014 are projected to include mental health & substance abuse social workers (36.2 percent), social & human service assistants (34.6 percent) and mental health counselors (32 percent). (AHCDB, 2007, Table 3.310).

Selected Occupations: Review of 42 particular healthcare occupations indicates that these held 14,083 jobs in 2000, and that these are forecasted to reach 25,009 by 2010, an overall rise of 10,026 jobs (78 percent). Registered nursing positions are expected to grow the most, from 4,439 in 2000 to 8,556 in 2010, a gain of 4,117 jobs or (93 percent). All but one of the examined occupations is expected to have more jobs available by 2010. Further, of the 42 occupations presented, employment in 8 of these will more than double (e.g. AHCDB, 2007, Table 3.330).

Shortage in Alaskan Workforce

Health Professional Shortage Areas: Alaska has a large number of federally designated "Health Professional Shortage Areas" (HPSAs), the point of these designations being to aid in health care planning and finance. Typically these are determined by the existence of: (1.) a relative lack of desired personnel, and (2.) the existence of particular socio-economic conditions. A second route to HPSA designation, which is automatic, is via the existence of a federally funded community health center (CHC). HPSAs are of three types. Statewide in 2007 the following HPSAs existed: 28 in Primary Care (with 16 scored, and 12 via CHCs), 27 in Mental Health (with 14 scored, and 13 via CHCs), and 24 in Dental Health (with 7 scored, & 17 via CHCs). (Alaska Health Care Databook, 2007, Table 3.360). However, an important caveat is that many observers feel that the federal HPSA designation process underestimates the extant need for more healthcare professionals (e.g. US GAO, 1995). Thus, these designations should be considered as a conservative method for establishing need for the healthcare workforce.

Medically Underserved Areas: Alaska also has numerous federally designated "Medically Underserved Areas" (MUA) and "Medically Underserved Populations" (MUP). These designations identify shortages of primary medical care, dental health or mental health providers. Designations may be either geographic (MUA, i.e. a county or service area), or demographic (MUP, i.e. low income, Medicaid-eligible populations, cultural and/or linguistic access barriers to primary medical care services). Each designation is assigned an Index of Medical Underservice (IMU) score, which is used to determine the eligibility of an area or population for MUA/MUP status. For 2007, there were 17 area designations and 11 population designations. (Alaska Health Care Databook, 2007, Table 3.350).

Resident Workers with Age: Two aspects of worker demographics further suggest the likelihood of a workforce shortage in the health care and social assistance (HCSA). The first of these regards "resident workers with age". In 2005 total employment in all HCSA occupations stood at 28,356. Of resident workers in all HCSA occupations statewide, 40 percent were age 45 and older; 27 percent were age 50 and older. Of resident workers who were in health care practitioner occupations per se, 47 percent were age 45 and older; and 31 percent were age 50 and older. Therefore, succession planning will be of concern over the next two decades as today's mature health care professionals retire (Alaska Health Care Databook, 2007, Table 3.320).

Non-Resident Workers: A second workforce demographic issue regards the sizeable number of "non-resident" workers. Overall, 10 percent of the workforce was non-residents in 2005, with a

high of (13 percent) among non-resident health care practitioner and technologist occupations. Expect additional pressure to build on the health care system if non-resident (itinerate) workers are not available to fill Alaska health care workforce gaps (e.g. AHCDB, 2007, Table 3.320).

Selected Occupations: Physicians

Physician Shortage – 1997: A decade ago Johnson and Norris (1997) conducted a comprehensive study to describe Alaska's geographic distribution of generalist physicians relative to population. These investigators queried all 443 generalist care physicians (family, general, general internal medicine, and pediatric) or their offices as to their specialties, employers, populations served, hours spent per week offering direct patient care, and locations. The results indicated a 30% overall shortage of generalist physicians for the state, representing roughly 141 full-time-equivalent generalists relative to national practice patterns and trends of health maintenance organizations. Of 17 primary health care areas, including the Anchorage area, 15 showed a need for additional generalist physicians. Most areas had a 20 to 40% shortage.

Physician Shortage – 2004: In 2004, a survey by the American Medical Association showed that, nationally, there were 2.38 practicing physicians per 1,000 people. Alaska's rate of practicing physicians was 2.05 per 1,000 people. Based on Alaska's 2004 population estimate of 656,834 and the national average of 2.38 physicians per 1,000 people, Alaska should have had 1,565 practicing physicians to be on par with national averages. The actual number of physicians practicing in Alaska was 1,347, indicating a shortage of 14 percent or 218 physicians. In areas outside of Anchorage, the rate of physician deficiency was 16 percent. (Alaska Health Care Databook, 2007, Table 3.370).

Physician Shortage – 2006: In 2006, the AK DHSS and the University of Alaska jointly assembled the "Alaska Physician Supply Task Force" (PSTF). This group then conducted a large inter-agency study, issuing the authoritative report, "*Securing an Adequate Number of Physicians for Alaska's Needs*". It found that Alaska had a shortage of physicians. Although not at crisis levels, the shortage was affecting access to care throughout the state, and, increasing cost to hospitals and other health care organizations. Up to 16% of rural physician positions in Alaska were vacant in 2004. Patients with Medicare were having difficulty finding a primary care physician. Several important specialties were in serious shortage in Alaska. It concluded that:

- The shortage is very likely to worsen over the next 20 years as the state's population increases and ages. Physician supply nationwide is entering a period of shortage, according to the best current predictions. Physicians in Alaska are aging and one-third may be retiring in the next 10-15 years. The new generation of physicians wants a more balanced life, meaning fewer hours on duty and more predictable schedules. These trends mean that more physicians will be required to serve the same population. Technology and scientific advances have increased the amount of medical care available, also adding to the need for physicians, as the patients expect more care than previously.

- As the supply of physicians shrinks, recruitment will become more competitive. Alaska's traditional system of recruiting physicians from federal assignment in the military and Indian Health Service is much less effective with changes in these systems. Alaska is far behind the other states in production capacity. (1-2) Long-range planning, even if it includes a four-year medical school in Alaska, will not address current physician needs in a timely fashion, so interim measures are needed. (59)

Selected Occupations: Nurses

Nursing Shortage – 2003: The nursing shortage is particularly acute, both in Alaska and nationwide. It is estimated that during this decade the need for RN's will increase by 4,117 (in 2000: 4,439; in 2010: 8,556) (Fried, N. & Keith, B. (2003). National shortages will make recruitment yet more difficult. As a result, Alaska will have a great need to recruit and retain registered nurses. Addressing the need of rural and remote areas will be yet more difficult and expensive than to do so for urban areas.

Impact on CHC's

Rosenblatt, et al. (2006) examined the status of provider workforce shortages such as these may limit CHC expansion. They noted that the federal government has continued to expand the capacity of community health centers (CHCs) to provide care to underserved populations. The researchers therefore conducted a survey of all 846 federally funded US CHCs that directly provide clinical services and are within the 50 states and the District of Columbia (May-Sept, 2004). Questionnaires were completed by the chief executive officer of each grantee. Overall response rate was 79.3%. Information was supplemented by data from the 2003 Bureau of Primary Health Care Uniform Data System and weighted to be nationally representative.

Rosenblatt, et al (2006) found that primary care physicians made up 89.4% of physicians working in the CHCs, the majority of whom are family physicians. In rural CHCs, 46% of the direct clinical providers of care were non-physician clinicians compared with 38.9% in urban CHCs. There were 428 vacant funded full-time equivalents (FTEs) for family physicians and 376 vacant FTEs for registered nurses. There were vacancies for 13.3% of family physician positions, 20.8% of obstetrician/gynecologist positions, and 22.6% of psychiatrist positions. Rural CHCs had a higher proportion of vacancies and longer-term vacancies and reported greater difficulty filling positions compared with urban CHCs. Physician recruitment in CHCs was heavily dependent on National Health Service Corps scholarships, loan repayment programs, and international medical graduates with J-1 visa waivers. The study concluded that CHCs face substantial challenges in recruitment of clinical staff, particularly in rural areas. The largest numbers of unfilled positions were for family physicians at a time of declining interest in family medicine among graduating US medical students. They stated that success of the current US national policy to expand CHCs may be challenged by these workforce issues.

Strategy

It is essential to enhance the capacity of Alaskan health care provider agencies to recruit and retain staff where: (1.) federal loan repayment programs either do not apply, or, (2.) there are insufficient resources available to meet need. More tools are needed to confront the problem of steadily growing vacancies in the Alaskan healthcare workforce.

Most other states have programs that influence health professionals' geographic and specialty distributions. Programs that integrate a number of strategies for attracting and retaining health professionals have a greater likelihood of success than do programs which rely on a single strategy. Substantial evidence indicates that state-level support-for-service programs should be, and typically are, a fundamental part of those strategies.

Debt from Health Care Training

What follows are brief summaries of recent, representative studies which suggest that:

- Health care student debt affects subsequent practitioner career choices;
- Loan repayment options support recruitment goals; and
- These programs directly help to correct practitioner maldistributions.

Factors in Recruitment & Retention: Daniels, et al. (2007) sought to identify factors associated with rural recruitment and retention of graduates from a variety of health professional programs in the southwestern United States. They conducted a longitudinal study by mailing a survey to graduates from 12 health professional programs in New Mexico. The main outcomes examined were: (1.) first rural employment, and, (2.) aspects of any rural employment, since graduation. Daniels, et al. (2007) concluded that rural background and preference for smaller sized communities are associated with both recruitment and retention. In addition, however, they stated that loan forgiveness and rural training programs appear to support recruitment. Retention efforts must focus on financial incentives, professional opportunity, and desirability of rural locations

Medical Student Debt & Career Choice: Rosenblatt & Andrilla (2005) examined the notion that medical students' rising total educational debt is one of the factors that explains the recent decline in students' interest in family medicine and primary care. They analyzed the results from questions on the Association of American Medical Colleges' 2002 Medical School Graduation Questionnaire that focused on students' debt and career choices. Students reported that higher levels of debt influenced their future career choices. An inverse relationship was observed between the level of total educational debt and the intention to enter primary care, with the most marked effect noted for students owing more than $150,000 at graduation.

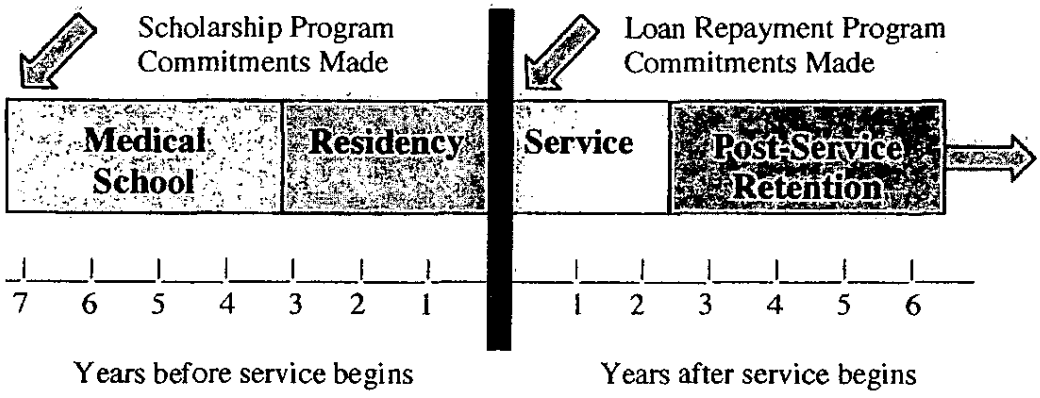
Medical Training Debt & Service Commitments: Pathman, et al (2000) assessed how student loan debt and scholarships, loan repayment and related programs with service requirements influence the incomes young physicians seek and attain, influence whether they choose to work in rural practice settings and affect the number of Medicaid-covered and uninsured patients they see. Data are from a 1999 mail survey of a national probability sample of 468 practicing family physicians, general internists and pediatricians who graduated from U.S. medical schools in 1988 and 1992. A majority of these generalist physicians recalled "moderate" or "great" concern for their financial situations before, during and after their training. Eighty percent financed all or part of their training with loans, and one-quarter received support from federal, state or community-sponsored scholarship, loan repayment and similar programs with service obligations. In their first job after residency, family physicians and pediatricians with greater debt reported caring for more patients insured under Medicaid and uninsured than did those with less debt. For no "specialty" was debt associated with physicians' income or likelihood of working in a rural area. Physicians serving commitments in exchange for training cost support, compared to those without obligations, were more likely to work in rural areas (33 vs. 7 percent, respectively, $p < 0.001$) and to provide care to more Medicaid-covered and uninsured patients (53 vs. 29 percent, $p < 0.001$), but did not differ in their incomes ($99,600 vs. $93,800, $p = 0.11$). Thus, among physicians who train as generalists, the high costs of medical education appear to promote, not harm, national physician work force goals by prompting participation in service-requiring financial support programs and perhaps through increasing student borrowing.

Support-for-Service Programs

It is well-established that a sizeable number of healthcare professionals carry a heavy debt-burden as they come out of training and are attracted to serving in those locations where a share of that burden can be taken away. For instance, training to become a physician is expensive, as 80 percent of medical students who graduate in debt will attest (e.g. Jolly, 2005). In 2004, young physicians' educational debt averages stood at over $109,000 and was this cost was increasing at the rate of more than $4,000 per annum (e.g. AAMC, 2004). Nonetheless, educational costs and students' fears of acquiring six-figure debts have created a market for government programs that link support for healthcare training costs to a period of obligated clinical work in shortage areas.

There are several types of financial "support-for-service programs" (SFSP's). These include: scholarships, service-option loans, loan repayment, direct financial incentives, and resident support programs. One of the two most common types of such programs is the service-requiring scholarship program. These pay tuition and other costs for healthcare students while obligating them to a period of service that begins when they complete residency (or similar post-graduate training) years later. The other common program type is loan repayment. Loan repayment programs recruit healthcare practitioners as they complete their training and are ready to begin service in exchange for paying off the traditional education loans they acquired years earlier. Programs of both types typically require one year of service for each year of training cost support they provide.

Figure 1 - Timeline of physicians' training years, signing of commitments with service-requiring scholarship and loan repayment programs, service periods (typically two-to-four years) and post service retention.



(After: Pathman, D.E. (2006). What Outcomes Should We Expect From Programs That Pay Physicians' Training Expenses in Exchange For Service? NCMEDJ, 67(1), pg. 77)

Support-for-service programs appear to be a natural solution to both the students' and the public's needs. They have grown in popularity over the past 25 years in tandem with rising tuition costs, with both federal and state agencies using them. In one well-known federal example, in 2005 the Bureau of Health Professions reported that the National Health Service Corps (NHSC) was providing an obligated physician workforce of about 1,700 scholars and loan re-payers. As a result of NHSC shifting most of its funding to loan repayment, more workers were immediately brought into the fold, and that census has now roughly doubled. In addition, most states also

sponsor their own support-for-service programs. In 1996 there were a total of 69 state programs with an estimated workforce of 1,300 practicing physicians. These state programs doubled in number from 1990 to 1996 and very likely have grown further since (Pathman, et al. 2000).

State Scholarship, Loan Forgiveness, and Related Programs: Pathman, Taylor, et al (2000) noted that in the mid-1980s, states expanded their initiatives of scholarships, loan repayment programs, and similar incentives to recruit primary care practitioners into underserved areas. These programs have since grown substantially during the ensuing two decades. The authors thus sought to identify and describe state programs that provide financial support to physicians and midlevel practitioners in exchange for a period of service in underserved areas, and to begin to assess the magnitude of the contributions of these programs to the US health care safety net. This cross-sectional, descriptive study established the number and types of state support-for-service programs in 1996; trends in program types and numbers since 1990; distribution of programs across states; numbers of participating physicians and other practitioners in 1996; numbers in state programs relative to federal programs; and basic features of the state programs.

The study found that in 1996 there were 82 eligible programs operating in 41 states, including 29 loan repayment programs, 29 scholarship programs, 11 loan programs, 8 direct financial incentive programs, and 5 resident support programs. Programs more than doubled in number between 1990 (n = 39) and 1996 (n = 82). In 1996, an estimated 1306 physicians and 370 midlevel practitioners were serving obligations to these state programs, a number comparable with those in federal programs. Common features of state programs were a mission to influence the distribution of the health care workforce within their states' borders, an emphasis on primary care, and reliance on annual state appropriations and other public funding mechanisms.

The authors concluded that as of 1996 the several states had fielded an obligated primary care workforce comparable in size to the better-known federal programs. Thus, these state programs constitute a major portion of the US health care safety net. The study emphasized that such state programs should be considered in plans to further improve health care access.

Experience of Other States

State-Level Support-for-Service Programs (2007): Considerable precedent exists for state-level offices to sponsor and manage financial support and inducement programs to thus encourage the within-state service of healthcare personnel. Tables 1, 2 & 3 here-present listings of those state-level support-for-service programs that were web-posted by the Association of American Medical Colleges (as of 8/10/07). These provide a selective look at state and federal loan repayment, forgiveness and scholarship programs available to allopathic medicine and other health professions students. This compilation is not exhaustive, and at present, our office is not aware of one that is. The here-derived tables shows that, overall, there were 81 programs. There were 44 listed states with at least one program (88% of US states). Fully, 21 of these states had two or more programs (47% of listing), with highs found in New Mexico (at 5) and Minnesota (at 7). On average, the 44 listed states had nearly 2 programs (1.8) each. Table 1 presents 43 listings that were designated as "state programs". Table 2 presents another 20 listings that were designated as "federal/state programs". Finally, Table 3 presents another 18 programs were not otherwise classified, though quick inspection of titles suggests that many can be readily classified. Those programs that were categorized as (strictly) "federal" (e.g. NIH, military) are not further considered. Click on any program title for more programmatic detail.

Loan Repayment Programs

In national studies, loan repayment has been found to be a successful strategy to recruit and retain physicians and nurses. Twenty-five years of program evaluations have clarified many of the outcomes possible from healthcare training support-for-service programs. Furthermore, studies have demonstrated that loan repayment programs, as a whole, have better outcomes than scholarship programs. Results of these comparisons have proved compelling. For example, studies demonstrating the strengths of loan repayment programs prompted Congress recently to allow the NHSC to make more loan repayment and fewer scholarship awards (e.g. Bureau of Health Professions, 2005) and led some states to expand their loan repayment programs (Pathman, et al. 2000).

Studies have shown that there are several benefits which can accrue from loan repayment programs. Selected examples follow:

> *High Position Fill-Rates:* Some programs, including the NHSC, have many more applicants than their funds can support and regularly fill all funded positions; other programs have many unfilled positions for lack of applicants.
>
> *High Service Completion Rates*: Very few loan repayment programs, accordingly, have found a need to set any buy-out penalties; as a group, their service completion rates average 93% without them (Pathman, et al, 2004). It is the physician-program-community fit and the financial attractiveness of the program that prompts physicians to complete their obligations with service (the "carrot"), not financial and legal threats (the "stick").
>
> *High Retention Rates:* Beyond merely completing obligations with service, there has long been the hope that obligated physicians will remain in their service communities for years afterwards ... In fact, data show that physicians participating in state-run support-for-service programs remain in their service sites as long on average as other young physicians remain in practices of all types nationwide. Physicians obligated to state-run loan repayment programs remain substantially *longer* than other young physicians (e.g. Pathman, 2004).

Effectiveness of Support-for-Service: Sempowski, I.P. (2004) attempted to evaluate the effectiveness of programs that provide financial incentives to physicians in exchange for a rural or underserviced area return-of-service (ROS) commitment. This was done via a systematic literature review using Medline and Ovid HealthSTAR databases were searched from 1966 to 2002. The initial search yielded 516 results. Bibliography review yielded additional references. Ten publications were selected as the highest level of evidence available. The main outcome measures were: (a.) initial recruitment of physicians, (b.) buyout rates, and (c.) long-term retention.

The majority of studies reported effective recruitment despite high buyout rates in some US-based programs. The one prospective cohort study on retention showed that physicians who chose voluntarily to go to a rural area were far more likely to stay long term than those who located there as an ROS commitment. Multidimensional programs appeared to be more successful than those relying on financial incentives alone. Sempowski, I.P. (2004) concluded that ROS programs to rural and underserviced areas have achieved their primary goal of short-term recruitment but have had less success with long-term retention. However, this study combined different types of support-for-service programs within its analysis thus somewhat preventing conclusions as to loan repayment programs, per se.

Loan Repayment vs. Payback Programs: Miller & Crittenden (2001) sought to determine and contrast the possible impact that two different types of support-for-service programs might have on medical school choice, and, students' intentions to return to their home states. The authors examined difference in preferences for: (a.) payback programs regarding state-subsidized medical education which are designed to increase the rate of graduates returning to those states to practice; and (b.) loan repayment programs that are designed to entice medical school graduates from rural states to return to their home states.

Miller & Crittenden (2001) surveyed 229 medical students (response rate 80 percent). The questionnaire collected background information on the students and addressed the possible

impact of payback and loan repayment policy proposals on student plans. Forty-seven percent of students reported that they would attend a different medical school if a required payback program were in place. Students who were more competitive at the time of admission to medical school were significantly more likely to say they would attend another medical school than were less competitive students. In contrast, 48 percent of students reported that they would be more likely to return to their home states if expanded loan repayment programs were available for service in areas of need. The findings suggest that payback programs may dissuade more competitive students from entering medical schools with such requirements, compromising the pool of students most likely to return to rural areas. Conversely, medical students appear willing to consider loan repayment programs upon completion of their training.

Why Do Loan Repayment Programs Work? Expert opinion was sought for insights into why loan repayment programs work. Donald Pathman, MD, MPH, (Univ. of North Carolina) was queried as to his view. Dr. Pathman stated:

> "As a whole, state-run (loan repayment) programs are successful but not because they are run well---- most are under-funded, under-staffed and can't offer individualized assistance to the health care practitioners they support. They are successful because the benefit of loan repayment is clear to potential applicants and programs typically only provide payments to participants after they complete each 3 or 6 months of work; therefore, if a participant leaves or otherwise fails to work in the agreed upon area or practice, payments simply stop and there is no need to enforce penalties." (Pathman, 2007)

Does a Loan Repayment Program Make Sense for Alaska? Expert opinion was sought for perceptions as to whether a loan repayment program makes sense for Alaska. Again, Donald Pathman, MD, MPH, (Univ. of North Carolina) was queried as to his view. Dr. Pathman stated:

> "I am glad to hear that Alaska is thinking of expanding loan repayment opportunities. I visited Alaska for the first time this past spring for the National Rural Health Association meeting, in Anchorage, with a side trip to Minto and Fairbanks. What an amazing place! I spoke with several folks working with the Native American health corporation in the state, and realize the physician shortages for the populations they serve. I was impressed that they knew little about how to attract and keep a physician. Lots of opportunities there for improvement in programs." (Pathman, personal communication, 2007)

Position of the Alaska Physician Supply Task Force (2006): The PSRF recommended a number of specific strategies and action steps to achieve four main goals related to assuring an adequate supply of physicians to meet Alaska's need. One of the PSRF findings was that Alaska's clinics and hospitals receive inquiries from physicians about the availability of loan forgiveness often. Loan repayment is a proven strategy for recruiting physicians, and the federal loan repayment programs currently available to Alaska physicians need to be stabilized financially and supplemented with Alaska-based programs. For detail, see: *"Securing an Adequate Number of Physicians for Alaska's Need"* (2006).

Precedents in Alaska: There are, and have been, other circumspect loan repayment programs for health professionals here in Alaska. These have typically been via categorical federal funding. Examples include Indian Health Service supports, and use of the National Health Service Corp. There have also been selected opportunities via the regional health corporations, and certain hospitals. Further, the Alaska Mental Health Trust has recently considered some loan repayment supports in the behavioral health field. While promising, these will collectively still fall far short of garnering the needed workforce to face projected need.

Recommendation

Recommended: Alaska should establish a Health Care Professionals Loan Repayment Program (HCPLRP). Decisions as to particular program elements must await further public process. Questions should be addressed regarding at least the following program elements:

- *Organizational Support*: What are the best ways to build legislative and public understanding and support on this issue? For instance, members of the Alaska Physician Supply Task Force supported a loan payback provision for physicians.

- Oversight: What is that governance entity most suited to provide leadership and oversight of this program? Similarly, which entity is most suited to administer the program? There is evidence that no single entity has the expertise to properly oversee and administer such a program. This might argue for a blended or interagency oversight structure. One agency might provide programmatic administration, while the other might serve as fiduciary agent.

- *Fiduciary Agent*: It may prove both workable and preferred that fiduciary mechanics and other administrative aspects be organizationally separated. If so, which agency is most to assume this fiduciary role? One approach might be to have the program work in tandem with the Alaska Commission on Postsecondary Education (ACPE). It is possible that the functions of the Alaska Commission on Postsecondary Education could be amended as these relate to repayment provisions healthcare degree program participants. It appears likely that no substantive change would be necessary for ACPE to act strictly as fiscal agent for participant payments. Further, this would not be a recommendation to change the scope of the ACPE mission to include direct workforce development. This later function would likely be accomplished by another state agency via interagency partnership.

- *Provider Eligibility*: Which healthcare occupations are to be deemed as eligible for the HCPLRP? Are all eligible occupations to benefit equally from the HCPLRP, or, will the occupations differ in terms of: (a.) maximum financial benefit, (b.) length of service required, (c.) specificity of service location, and, (d.) penalty for early-quit? There is evidence that for a loan repayment program, marked penalties are not needed, and, are actually likely harm outcomes.

- *Repayment Details*: Several policy and procedural decisions must be concluded. Examples follow. What is an adequate period of service-payback? What is the proportionality of payback when scheduled over years? What are the most useful policies with which to govern service payoff?

- *Work Processes*: Several work-process details will need to be established as regards management client relationships. Programmatically, what ways do we want to work, one-on-one, with program applicants to help them find suitable communities/positions? What types of assistance do we most want to provide to applicants, practices and communities?

- *Program Evaluation*: An ongoing evaluation should be installed and maintained as an expected part of any proposed support-for-service program (e.g. Henderson & Fox-Grage, 1997). It is in everyone's interest, and particularly in those of Alaska's medically underserved communities, that such programs: (a.) have explicit outcome objectives, (b.)

are regularly monitor as to those outcomes, (c.) openly acknowledge weaknesses, and (d.) embrace change as needed. Many different types of outcomes might be monitored. Reasonable measures might include:

- Practice in specific needy communities (e.g. HPSAs)
- Serve high-priority patient groups (e.g. Medicaid)
- Service completion of participants
- Retention rate of participants
- Satisfaction of participants
- Indictors as to the content of practice/work of program participants (e.g., proportion that provide inpatient care, that provide obstetrical care, or whatever specific services are deemed to have critical workforce shortages)

Other Support-For-Service Options to Consider:

As robust as a state-level loan repayment is likely to prove, there are other programmatic strategies. At least two other strategies should also be thoroughly examined: (a.) service-option loans, and (b.) direct incentives.

- *Strategy: Service-Option Loan Programs*

  Consider provision of educational loans to all citizens of Alaska who undertake health professions training, where the loans will be forgiven if they work within Alaska after graduation. This would provide added incentive for health care students who were raised in Alaska to return to Alaska to practice, rather than being wooed away by the states/communities where they receive their training. There is evidence that these have worked well elsewhere, given attention to key programmatic details. For Alaska, a service-option loan program should nicely complement a loan repayment program; because the former would address only Alaska residents and the latter would primarily attract those health practitioners coming from out-of-state.

- *Strategy: Direct Incentive Programs*

  Consider provision of direct incentive programs. In these, funding is provided to practitioners who agree to work in needy settings whether or not they have educational loans to be repaid. There is no reason to believe that only young practitioners-with-debt are suited to work in rural areas and/or with underserved populations.

  Loan repayment programs only target recent graduates who have weighty educational debts. For instance, as regards physicians, many recent graduates carry minimal debt (perhaps 40%). Further, a large portion of those physicians who are potentially recruit-able to Alaska are 10 or 20 years out of training and have no educational debts. It is possible, even likely, that "an Alaskan adventure" would appeal to some number of mid and late-career physicians. It may prove informative to assess the State's medical licensure files to learn the average/median/quartiles of age of physicians as to when they gain their first Alaska license. If, indeed, many are older, then this is a group that should be targeted. Direct incentive programs target those practitioners without loans, and, older practitioners.

Finally, support-for-service programs (of all types) constitute only one way to help bolster recruitment and retention of health care professionals. Alaska must develop a multi-pronged approach to confronting our growing healthcare workforce shortage.

Conclusion

Substantial evidence shows that Alaska currently experiences a shortage of healthcare professionals, and, that this shortage exists in several key occupational categories.

There are several types of support-for-service programs, and the national experience has proven loan repayment programs to be robust. These have demonstrated substantial and longstanding success as a public strategy which has helped to rectify such shortages. To quote from Pathman, et al. (2004),

> "As a whole, states' support-for-service programs bring physicians to needy communities where they find satisfying work caring for at-risk patient populations and remain for many years. Of all program types, the loan repayment and direct financial incentive forms, which target physicians after training, show the broadest successes. The successes of these state programs warrant their continued support and perhaps expansion to remedy the continuing maldistribution of physicians." (pg. 567).

Group advocates incentives to lure health care workers

SHORTAGE: Problem is especially acute in alaska's rural areas, planner says.

By ROSEMARY SHINOHARA
rshinohara@adn.com
(02/15/10 21:37:22)

Armed with reports of continued shortages of doctors and other health care workers in Alaska, a group of health care organizations is pushing for the state to begin offering doctors, dentists, nurses and others money to come practice in Alaska.

Shelley Hughes of the Alaska Primary Care Association, one of the backers of financial incentives for health care workers, led a workshop to talk about the idea Monday at the Alaska Native Tribal Health Consortium.

Her group represented 142 community health clinics -- nonprofits that offer health care on a sliding scale to anyone. Their turnover of doctors, physician assistants and nurse practitioners is about one-third every year, Hughes said.

Statewide, the number of doctors with active licenses in Alaska increased by 2 percent from 2007 to 2009 -- barely keeping up with population growth, and not keeping up with the health care needs of Alaska's growing number of senior citizens, said Alice Rarig, a planner with the state Department of Health and Social Services.

Rarig said the problem is especially acute in some rural areas and for primary care doctors. For example, in Anchorage and Mat-Su, there's a doctor for every 352 people, but in northern and Southwest Alaska, the ratio is closer to one doctor for more than 950 people.

Alaska has a pretty good supply of specialists in urban areas but not enough internists -- primary care doctors -- and psychiatrists, she said.

The Primary Care Association, Alaska State Hospital and Nursing Home Association, Alaska State Medical Association, Alaska Native Health Board, AARP-Alaska and numerous other groups are supporting SB 139, a bill in the Legislature that calls for the state to spend $7.9 million over the next three years on drawing people to work in medical professions in Alaska.

The bill, introduced by Sen. Donny Olson of Nome, has been approved by one committee and now sits in the Senate Finance Committee.

Under the bill, the state would repay student loans over a three-year period for health care professionals recently out of school. It would give direct payments to already-established health care workers in exchange for their practicing in Alaska, also over three years.

The $7.9 million would cover at least 90 positions, with payments ranging from $20,000 to $27,000 per year for those in jobs such as nurse practitioner, physician assistant and physical therapist, and $35,000 to $47,000 annually for doctors, dentists and pharmacists, said Hughes.

People who took especially hard-to-fill positions, such as in remote areas, would get the highest

payments.

Robert Sewell, a state health program manager, said repaying loans for newly trained doctors and other health workers, and offering direct payments to those with more experience, is the fastest way to make a dent in the need for more medical workers.

It yields much faster results, for example, than giving scholarships to people while they are still training for medical professions, he said.

Many states already offer some sort of financial incentive to attract doctors.

"This is not weird science," said Sewell. "The fact that Alaska is considering this now means only we are Johnny-come-latelies."

RE: HB 392 (Herron)—Support

Dear Co-Chairs Keller and Herron:

On behalf of the members of AARP in Alaska, we encourage you and your colleagues on the House Health and Social Services Committee to support HB 392, authored by Committee Co-Chair Herron.

The intent of HB 392 is to provide incentives for health care providers, especially for expertise that is in short supply in Alaska as well as to secure providers in our many underserved geographic areas.

AARP approaches HB 392 from the standpoint of the customer. Our members are the group most likely to need health care services and are often the first ones to face critical health care problems because they cannot find a provider.

You are well aware of our health care workforce shortages in Alaska. If our members cannot find a health provider, the results can be bad for them as well as for the state.

Postponing a needed health visit often results in health deterioration and, in many cases, more intense and more expensive treatment. With an increase in providers, our members are more likely to seek prevention and early treatment. The overall health status of older Alaskans will improve.

However, if our members cannot find a health care provider, Alaska will be the loser.

As you know, prior to 1990 many older Alaskans left the state after retirement because they could not count on finding medical facilities and providers to meet their needs.

This trend reversed and now Alaska has the highest percentage of older people who decide to stay in their home state after retirement. The economic value of these retirees is estimated at over $1.7 billion.

We want our citizens to stay here after retirement. The most significant determination of where retirees decide to live is the availability of quality health care. We must have an adequate health care workforce if we are going to keep older Alaskans in our state.

HB 392 will go a long way in helping us secure that workforce.

AARP recommends an "AYE" vote on HB 392.

Should you have any questions about our position, please feel free to contact me (586-3637) or Patrick Luby, AARP Advocacy Director (907-762-3314).

Thank you for your consideration.

Sincerely,

Marie Darlin

Re: Support for HB 392 Incentives for Certain Medical Providers

Dear House Members of the Alaska State Legislature:

Because the health care workforce shortage in Alaska is reducing health care access for our state's residents, the Alaska Behavioral Health Association strongly supports HB 392 to establish a loan repayment and incentive program to allow Alaska to compete with the lower 48 in recruitment of providers from a shrinking national pool.

One of our primary goals deals with Workforce Development and this bill fits well within the goal to assure that a well trained adequate workforce is available to behavioral health providers.

With alarming and rising vacancy rates, Alaska is posed for a crisis without intervention. Alaska is one of only six states without a state-sponsored support-for-service program such as a loan repayment and incentive program and is losing ground. The competition for recruitment of providers is very difficult. Currently only 2% of medical students nationally are choosing the primary care field; more than 90 pharmacists vacancies exist in Alaska; many communities have inadequate access to dentists; physician assistants, behavioral health clinicians, addiction professionals, and nurse practitioners are increasingly difficult to recruit; nurses, dental hygienists, psychologists, licensed certified social workers, and physical therapists are all in short supply in Alaska.

The Alaska Health Care Professions Loan Repayment & Incentive Program provides an important part of the solution to the workforce shortage Alaska faces. The proposal was developed after careful review of national studies of best practices for workforce recruitment and retention and input from stakeholders statewide, including consideration of factors unique to Alaska. More cost-efficient and results-producing than other methods, loan repayment and incentives have been shown to effectively help alleviate shortage problems in other states. HB 392 establishes a loan repayment and incentive program customized for Alaska and will provide much needed relief for our state.

The Alaska Behavioral Health Association supports HB 392 and urges passage of this important legislation. Your active steps to assure the establishment of the Alaska Health Care Professions Loan Repayment & Incentive Program are greatly appreciated.

In Health,

Steve Horn
Executive Director

Alaska Native Health Board

1840 Bragaw Street, Suite 220
Anchorage, Alaska 99508

Phone: (907) 562-6006
Fax: (907) 563-2001

March 12, 2010

Representative Bob Herron
State Capital Building, Room 411
Juneau, Alaska 99801-1182

Dear Representative Herron,

We write to express the Alaska Native Health Board's support for HB 392, establishing a health professions loan repayment and employment incentive program. Alaska is one of only six states without a state-sponsored health professions support-for-service program.

Overall, Alaska health workforce vacancy rates are now over 10% and growing, particularly for hard-to-fill positions in rural locations where most providers are "safety net" providers who deliver care to primarily to Medicaid and Medicare beneficiaries and the uninsured.

Among tribal providers, who are the only provider of health services in many areas of the state, health professional vacancy rates exceed the statewide rates across the board by 150-200%.

The challenges are daunting: The average time it takes for a tribal provider to fill a physician vacancy is over a year, while the average time to fill a mid-level vacancy is six months. **As of November 2009, within the Alaska tribal health system alone, there were over 80 physician vacancies.** These severe workforce shortages compound the challenge of providing good access to quality healthcare for all Alaskans, particularly in the rural areas.

HB 392, The Alaska Health Care Professions Loan Repayment & Incentive Program, is an important part of the solution to Alaska's health workforce shortage. It was developed after careful review of national studies of best practices for workforce recruitment and retention and input from stakeholders statewide, including consideration of factors unique to Alaska.

More cost-efficient and results-producing than other methods, loan repayment and incentives have been shown to effectively alleviate shortage problems in other states, and we are certain that HB 392 will work because it has been thoroughly reviewed and customized for Alaska.

Sincerely,

Evangelyn "Angel" Dotomain
President/CEO

Alaska Native
Tribal Health Consortium

POSITION PAPER

CONTACT: Valerie Davidson, Senior Director
Legal and Intergovernmental Affairs
Through Pat Jackson, State Liaison for Alaska Native Health
523-0363 – pajackson@anthc.org

DATE: March 12, 2010

RE: HB 392 – Incentives for Certain Medical Providers

POSITION: Support

ANTHC is a tribally controlled, non-profit, statewide tribal health organization formed pursuant to federal law to provide a range of medical and community health services for more than 130,000 Alaska Natives. ANTHC is part of the Alaska Tribal Health System (ATHS), which is owned and managed by the 231 federally recognized tribes in Alaska and by their respective regional health organizations.

ANTHC and Southcentral Foundation jointly manage the Alaska Native Medical Center (ANMC), the tertiary hospital of the ATHS located in Anchorage. ANMC hospital and SCF clinic facilities together employ 161 physicians, 37 dentists and 509 nurses, along with many more employees working in health-related professions. We face the same workforce challenges as our partner health organizations, competing with employers in the Lower 48 to recruit and retain a quality workforce.

Current reports prepared by the Indian Health Service on physician positions within the tribal system and by Alaska tribal facilities on nursing positions provide a good snapshot of workforce challenges.

Profession	***Positions Authorized***	***Vacancies***	***Percentage***
Physicians – statewide	305	81	26.6%
Physicians – ANTHC/SCF	161	35	21.7%
RN – statewide	775	113	15%
LPN – statewide	92	26	28%
APN – statewide	120	28	23%

Ideally we would grow our own health professionals in numbers that would meet our workforce needs, and we have made progress over the years. The tribal health system offers internships and scholarships that bring some of our best and brightest to the medical field. More Alaska Natives are choosing Medical and Dental careers; a University of Alaska Anchorage program, Recruitment and Retention of Alaska Natives into Nursing, is graduating Alaska Native nurses; many of our Community Health Aides have built on their basic training opportunities to prepare for advancing careers; and the Dental Health Aide Program is graduating students who fill a need for dental health services and patient education. We are inching forward, but more work needs to be done.

HB 392 is a strategy to attract skilled health professional to Alaska jobs. It would work in tandem with other efforts as Alaska's health provider community work to provide quality care to our residents. ANTHC urges your favorable consideration and passage of HB 392 to help us turn the corner on Alaska's health care workforce.

Alaska Pharmacists Association

RE: Support for HB 392
Alaska Health Care Professions Loan Repayment & Incentive Program

March 16, 2010

Dear Members of the Alaska State Legislature:

Because the health care workforce shortage in Alaska is reducing health care access for our state's residents, putting Alaskans in jeopardy, the Alaska Pharmacists Association strongly supports the concept of a state-sponsored loan repayment and incentive program to allow Alaska to compete with the lower 48 in recruitment of providers from a limited and shrinking national pool.

"The Mission of the Alaska Pharmacists Association is to preserve, promote and lead the profession of pharmacy in Alaska."

With alarming and rising vacancy rates, Alaska is posed for a crisis without intervention. Alaska is one of only six states without a state-sponsored support-for-service program such as a loan repayment and incentive program and is losing ground. The competition for recruitment of providers is very difficult. Currently only 2% of medical students nationally are choosing the primary care field; more than 90 pharmacists vacancies exist in Alaska; many communities have inadequate access to dentists; physician assistants and nurse practitioners are increasingly difficult to recruit; nurses, dental hygienists, psychologists, LCSWs (licensed, clinical social workers), and physical therapists are all in short supply in Alaska.

Based on statistics provided by Laura Miller, PhD, Senior Economist with the National Association of Chain Drug Stores, the national average of community pharmacists per 10,000 people is 5.36. For Alaska, the figure is 3.35. To get to the national average, Alaska would need an additional 137 pharmacists. The average number of people per community retail pharmacy is about 5,300 nationally, and in Alaska it is 8,900. Even if you add in the 15 Indian Health Service (IHS) pharmacies, Alaska's pharmacies average about 7,500 people, much higher than the national average.

The Health Care Professions Loan Repayment & Incentive Program proposal brings to the table an important part of the solution to the workforce shortage Alaska faces. The proposal was developed after careful review of national studies of best practices for workforce recruitment and retention and input from stakeholders statewide, including consideration of factors unique to Alaska. More cost-efficient and results-producing than other methods, loan repayment and incentives have been shown to effectively help alleviate shortage problems in other states. The proposed program designed for Alaska will provide much needed relief for our state.

Respectfully,

Nancy O. Davis

ALASKA
PRIMARY CARE ASSOCIATION

The Honorable Bob Herron
Alaska State House of Representatives
State Capitol, Room 411
Juneau, Alaska 99801

Re: Support for HB 392 Incentives for Certain Medical Providers

March 10, 2010

Dear Representative Herron,

The Alaska Primary Care Association (APCA) works to promote primary care access for all Alaskans. The APCA represents 26 health care organizations operating 142 Community Health Center (CHC) clinic sites, as well as other primary care safety net providers, throughout Alaska. Currently, health professional workforce shortages are impacting the ability of CHC clinics and other health entities to provide access to health care services for Alaskans. The CHCs in Alaska exist to provide care for medically underserved populations and communities; however, the CHCs are having great difficulty recruiting and retaining providers. The CHCs provided primary health care services to over 81,000 patients (1 in 9 Alaskans) last year with the following estimated vacancies: 22 physicians, 20 physician assistants, 26 nurse practitioners, 6 dentists, and 10 licensed clinical social workers – to name a few.

Not only is Alaska suffering from labor shortages in most professional health care occupations,[2] but there is a national shortage of primary care providers as well. With most areas of Alaska designated as a Health Professional Shortage Area or a Medically Underserved Area,[3] the national shortages have made recruitment and retention even more challenging for clinics here. All but six of the fifty states have addressed similar professional health provider shortages by implementing state sponsored support-for-service programs which have helped to attract and retain health care providers.[4]

The APCA hears routinely from frustrated medical directors throughout Alaska that they are "losing candidates to other states." Expensive temporary hires and repeated recruitment costs are driving up the cost of health care. The lack of continuity of providers is impacting health care access and outcomes for Alaskans. It is time for

Alaska Primary Care Association

Alaska to establish a state-sponsored loan repayment and incentive program to help mitigate the health care workforce shortage problem.

In closing, the Alaska Primary Care Association strongly supports HB 392 and the creation of a "Health Care Professions Loan Repayment and Incentive Program" in Alaska. Thank you for your efforts to expand access to health care for all Alaskans.

ASHNHA
Alaska State Hospital and Nursing Home Association

426 Main St
Juneau, Alaska 99801
(907) 586-1790
www.ashnha.org

TESTIMONY ON House Bill 392
March 17, 2010

ASHNHA represents 27 private, federal, state, and tribal health care facilities located throughout Alaska. The testimony presented here has been approved by ASHNHA's general membership (see detailed member list at bottom of testimony).

ASHNHA's membership strongly supports **HB 392.**

Health care occupation workforce shortages continue to persist throughout Alaska but are most critical in rural areas of the State.

The Alaska Legislature has been extremely responsive to addressing these shortages by providing increased funding to the University of Alaska to expand health care education programming, and by expanding the WWAMI program from 10 to 20 educational placements each year.

HB 392 complements these other initiatives by establishing a new program that will give the Department of Health & Social Services authority to attract already trained health care professionals in 10 critical occupation categories. The Department will offer either loan repayment or cash incentives commitment to willing providers in exchange for time served in health care shortage areas in Alaska. Up to 90 health care professionals could be attracted to Alaska each year through this program.

Extensive study of Alaska's health care workforce needs have been completed and those data disclose shortages that cannot be overcome by expanded educational programming or WWAMI enrollments alone. These investments, while extremely important, will take from 4 years to 10 years to produce trained clinicians depending on the health care occupation chosen for study. HB 392 will bridge the gap Alaskans face today in many rural and underserved communities throughout the State.

ASHNHA has worked with a large group of other stakeholders to help develop the program outline contained in HB 392. Passage of this measure will help Alaska become competitive with other states in attracting 'practice ready' professionals from around the country.

HB 392 has the strong support of many organizations concerned about the severe shortage of health care professionals in many rural areas of the State. The Alaska Health Care Commission recommended consideration of a loan repayment and incentive program in their report to the Governor and the Legislature.

ASHNHA respectfully urges your support for HB 392 and passage of this bill from House HSS to the next committee of referral.

Thank you for your consideration.

Re: Support for HB 392 Incentives for Certain Medical Providers

March 11, 2010

Dear Senate and House Members of the Alaska State Legislature:

Because the health care workforce shortage in Alaska is reducing health care access for our state's residents, Iliuliuk Family and Health Services, Inc. (IFHS) strongly supports HB 392 to establish a loan repayment and incentive program to allow Alaska to compete with the lower 48 in recruitment of providers from a shrinking national pool.

Our organization, IFHS, is the only comprehensive service provider for medical, dental and behavioral health services within 800 air miles of Unalaska. We are remote, and we frequently find that we are unable to compete with "lower 48" medical practices for providers, since we also cannot compete effectively with salaries. State loan repayment options for our providers would help us offer a competitive package.

With alarming and rising vacancy rates, Alaska is posed for a crisis without intervention. Alaska is one of only six states without a state-sponsored support-for-service program such as a loan repayment and incentive program and is losing ground. The competition for recruitment of providers is very difficult. Currently only 2% of medical students nationally are choosing the primary care field; more than 90 pharmacists vacancies exist in Alaska; many communities have inadequate access to dentists; physician assistants and nurse practitioners are increasingly difficult to recruit; nurses, dental hygienists, psychologists, licensed certified social workers, and physical therapists are all in short supply in Alaska.

It takes IFHS over a year to recruit a single doctor; six months to recruit a behavioral health specialist, and the last time we recruited a dentist, it took us four years to do so. We cannot recruit RNs – until July of 2009, we had two open RN positions for over two years, and currently have one RN position that has been open for over three years. A state-sponsored support-for-service program would help make our recruitment package more appealing and more competitive.

The Alaska Health Care Professions Loan Repayment & Incentive Program provides an important part of the solution to the workforce shortage Alaska faces. The proposal was developed after careful review of national studies of best practices for workforce recruitment and retention and input from stakeholders statewide, including consideration of factors unique to Alaska. More cost-efficient and results-producing than other methods, loan repayment and incentives have been shown to effectively help alleviate shortage problems in other states. HB

392 establishes a loan repayment and incentive program customized for Alaska and will provide much needed relief for our state.

IFHS supports HB 392 and urges passage of this important legislation. Your active steps to assure the establishment of the Alaska Health Care Professions Loan Repayment & Incentive Program are greatly appreciated.

Respectfully,

Re: Support for Alaska Health Care Professions Loan Repayment & Incentive Program

Dear Governor and Members of the Alaska State Legislature:

Because the health care workforce shortage in Alaska is reducing health care access for our state's residents, the National Association of Social Workers – Alaska Chapter strongly supports the concept of a state-sponsored loan repayment and incentive program to allow Alaska to compete with the Lower 48 in recruitment of providers from a shrinking national pool.

With alarming and rising vacancy rates, Alaska is posed for a crisis without intervention. Alaska is one of only six states without a state-sponsored support-for-service program such as a loan repayment and incentive program and is losing ground. The competition for recruitment of providers is very difficult. Currently only 2% of medical students nationally are choosing the primary care field; more than 90 pharmacists vacancies exist in Alaska; many communities have inadequate access to dentists; physician assistants and nurse practitioners are increasingly difficult to recruit; nurses, dental hygienists, psychologists, licensed certified social workers, and physical therapists are all in short supply in Alaska.

The Health Care Professions Loan Repayment & Incentive Program proposal – SB 139 and HB 392 – bring to the table an important part of the solution to the workforce shortage Alaska faces. The proposal was developed after careful review of national studies of best practices for workforce recruitment and retention and input from stakeholders statewide, including consideration of factors unique to Alaska. More cost-efficient and results-producing than other methods, loan repayment and incentives have been shown to effectively help alleviate shortage problems in other states. The proposed program designed for Alaska will provide much needed relief for our state.

We recommend the establishment of the Alaska Health Care Professions Loan Repayment & Incentive Program and requests that you actively take steps to create and fund the program.

Respectfully,

/s/

LaVerne Demientieff
President, NASW-AK

P.O. Box 787 (Mile 4.4 Talkeetna Spur Road) Talkeetna, AK 99676 (Ph) (907) 733-2273 (Fax) (907) 733-1735 schc@sunshineclinic.org

RE: Support for HB 392 Incentives Alaska Health Care Professions Loan Repayment & Incentive Program

March 10, 2010

Dear Senate and House Members of the Alaska State Legislature:

Because the health care workforce shortage in Alaska is reducing health care access for our state's residents, Sunshine Community Health Center (SCHC) strongly supports SB 139 to establish a loan repayment and incentive program to allow Alaska to compete with the lower 48 in recruitment of providers from a shrinking national pool.

SCHC's mission is to assist people in the upper Susitna Valley to meet their health care responsibilities by providing affordable, accessible, quality health care, including preventive aspects, to all people regardless of their ability to pay for services. We are a safety-net provider, with our primary focus on patients who are uninsured and unable to pay for basic medical care. We operate two clinics, one in Talkeetna that is open 6 days a week and one in Willow that is open 5 days a week.

The biggest obstacle to accomplishing our mission is our inability to fully staff the organization with the number of medical, dental, and mental health providers we need. As of this writing, SCHC has been recruiting unsuccessfully for a medical provider to staff our Willow clinic for 3 years. We have been recruiting for a full-time mental health professional for 2 years, a nurse for 1 year, and a dentist for 6 months. Two years ago, unsuccessful recruiting and unexpected vacancies shrank our staff of five medical providers (not including dental and mental health) to just two medical providers covering both clinics, and since then we have never been fully staffed.

Our efforts at recruitment during this period have attracted a high level of interest from providers interested in relocating to our community because of the attractive quality of life we offer. Unfortunately, once excitement gives way to realism, the following factors dissuade them from actually accepting a position and moving here:

- the high cost of student loans; medical and dental graduates average over $100,000 of student debt;
- moving expenses;
- high cost of living in Alaska;
- the escalating cost of health insurance.

SCHC's experience is not unusual. With alarming and rising vacancy rates, Alaska is poised for a crisis unless there is some new intervention. Alaska is one of only six states without a state-sponsored incentive program such as a loan repayment program. The competition for recruitment of providers is very difficult. Currently only 2% of medical students nationally are choosing the primary care field; more than 90 pharmacist vacancies exist in Alaska; many communities have inadequate access to dentists; physician assistants and nurse practitioners are increasingly difficult to recruit; nurses, dental hygienists, psychologists, licensed certified social workers, and physical therapists are all in short supply in Alaska.

The Alaska Health Care Professions Loan Repayment & Incentive Program provides an important part of the solution to the workforce shortage Alaska faces. The proposal was developed after careful review of national studies of best practices for workforce recruitment and retention and input from stakeholders statewide, including consideration of factors unique to Alaska. More cost-efficient and results-producing than other methods, loan repayment and incentives have been shown to effectively help alleviate shortage problems in other states. SB 139 establishes a loan repayment and incentive program customized for Alaska and will provide much needed relief for our state.

Sunshine Community Health Center supports SB 139 and urges passage of this important legislation. Your support and action on this matter are greatly appreciated.

Respectfully,

Mary Loeb, MD
Medical Director of Sunshine Community Health Center

Representative Herron

To have seasoned professional Medical staff able to come to Alaska and build our health community, in my opinion, is so valuable for our growing needs.
This would perhaps be a step forward to making this state competitive to lower 48 states with new ideas, that open up great incentives to better the health care areas here.
To become self sufficient in Alaska has always been our motto of looking forward has it not?
Then make it possible to help those that want to make the journey here perhaps for the first time, and stay in our great state and bring the knowledge they have as well as their wonderful medical ideas to us.
Thank you.

Representative Herron

I am writing to urge you to support this legislation for the loan repayment and incentive program in Alaska. As a physician who works 75% time in the Aleutians I am not eligible for federal loan repayment toward my $150,000.00 medical school loans. After three years in our community health center at a average salary, I am no longer financially able to sustain the cost of living, monthly loan payments without loan repayment of some sort. I am seriously considering moving out of state to obtain more flexibility in the reimbursement options. If this legislation passes, I will stay in Alaska to provide rural primary care to under served populations.

Sincerely,

Dr. Ann Nora Ehret

Subject: HB 392 Makes Sense: Please Support

Representative Herron

I live in a rural area, Glennallen, Alaska. We have one primary care center to serve the entire Copper River Valley which is the size of the entire state of Ohio. Our residents range from upper middle class and below (I believe). Cross Road Medical Center has a high turnover of providers, making it hard to have continuity of care; many people drive the approximately 400 mile round trip to get primary care. We have many seniors who simply leave our area. Please support HB 392 as it will help rural under served area's such as the one I live in, plus help our urban areas to have higher level providers (ie there is no cardiologist in all of South East Alaska. UA has a "grow our own" philosophy, but cannot grow enough of our own fast enough; some schooling isn't even available in Alaska such as dentistry and pharmacy. We truly need your help!

Sincerely,

Janie Fillman

Representative Herron

Alaska needs to establish a Loan Repayment & Incentive Program so we can recruit and retain the providers we need and to help solve the shortage problem.

Average debt for occupations - especially tier 1: range 100,000 to 400,000 (like a mortgage!)

Cost of doing nothing? Economics of no action:
- Without action, ongoing recruitment costs and high locum tenens costs due to high turnover and length of vacancies will continue to increase health care costs in Alaska
- Without action, Alaska will continue to trend toward a public health crisis in pockets of the state
- Without action, Alaska can expect increased ER use, increased Medivac use, increased Medicaid travel costs, and increased costs associated with chronic disease

Sincerely,

Heather Goecke

Representative Herron

I am writing to urge you to support and pass HB 392. I am the executive director of the community health center in Unalaska. We budget for four physicians, three mid-levels, three RNs, two counselors, one physical therapist and one dentist. Our center currently has two open RN positions, one of which has been open for three years, one open counselor position and one open physical therapy position. One of our physicians is considering leaving because, even several years out of school, she still owes over $100,000 and is not eligible for NHSC loan repayment. Our dentist gave us a three year notice six months ago because he knew it would take that long to fill the position. We must compete nationally for our health care providers. HB 392 would be enormously helpful to us in recruiting and retaining vital staff members. Please support HB392. Thank you.

Subject: Support and Testimony for HB 392

Representative Herron

I am writing you in regards to HB 392. I believe this bill to be of utmost importance to the future health of Alaska residents. I came to Alaska this past summer in hopes of acquiring loan repayment through the National Health Service Corps, a process that is arduous and drawn-out. When preparing for this move, I had spoken with several colleagues who had stated that they would be greatly interested in joining the ranks of Alaska Health Care Professionals, however, there is little incentive to do so. They spoke of the high cost of living and that their loans were minimal or already payed down. These are experienced individuals who have a great deal to give to this state. HB 392 and its incentive aspect would be a considerable draw for these people.

The National Health Service Corps does indeed bring many people to this state to fill openings in the health care system, however, as I stated previously, this can be a monstrous undertaking due to working with the Federal bureaucracy. This system also is flawed in that the required time of service is two years, then the people have a choice to stay or move on. It also pays up front, where HB 392 pays out after time has been delivered. My understanding of HB 392 is that it would help people choose to stay in the state due to these requirements.

By taking hold of this at the state level, Alaska can bring in qualified individuals to work and stay in our communities, many of whom will bring a great deal of needed experience.

Thank you considering my testimony and, Please, consider this bill's passing.

Sincerely,

James Lepich

Re: A Pharmacist Interested in Returning to and Working in Alaska Supports SB 139

Dear Co-Chairs Stedman and Hoffman and Members of the Senate Finance Committee,

I am a pharmacist in south Florida who previously interned in Alaska. I would like to share my story and subsequent support for SB 139 *Incentives for Certain Medical Providers* due to my desire to return and work in Alaska.

After putting myself through college to earn a bachelors degree in environmental science, I decided to move back into my parent's home in order to save for a place of my own and to begin aggressively repaying my nearly twenty thousand in student loans. After a year of working as a field biologist and living on a restricted budget, I was very excited to purchase a garden apartment. However, during this year had been very involved with a children's hospital and nursing home. This volunteer work inspired me to return to college in order to pursue a career that offered the daily opportunity to help alleviate suffering and improve the health of those in my community. I decided the best career would be the profession of pharmacy. As a result, I spent the following year continuing my same employment as a field biologist, completing prerequisite courses in the evening, volunteering on the weekends, living with my parents, and renting my apartment. I was accepted into two private colleges of pharmacy and one out of state college. I knew any choice would result in massive student loans accrued during the four years required for a Doctor of Pharmacy degree (tuition alone exceeded eighty thousand). Therefore, I choose a local college of pharmacy that allowed me to continue living with my parents throughout pharmacy school and rented my apartment that I sold a few years later without having the pleasure of ever living in it.

The summer after my first year in pharmacy school, I was thrilled to have the opportunity to spend a month working at the Prescription Center Pharmacy in Fairbanks and volunteering with the Fairbanks Native Bible Church. I anticipated enjoying the beauty of the Alaskan outdoors, but did not expect to fall in love with the people and culture of Alaska. One small example is the quick bond I developed with those who simply rode the same bus route. One day a co-worker generously offered to pick me up for work. I can still recall on the following morning how those on the bus shared they had been truly concerned since I had not been on the bus the previous day. My time in Alaska made a marked impression. Therefore, I was saddened to leave when the month was over and have hoped to return to Alaska ever since.

After graduation from pharmacy school, I felt a great responsibility to begin immediately paying down my student loans. As a result, I did not choose to defer my loans in order to complete a residency and subsequently enter into a more sought-after field of pharmacy. Rather, I entered the very demanding field of retail pharmacy. I have spent nearly two years working fulltime at

an independent retail pharmacy and as a relief pharmacist at another independent pharmacy. I have come to value and respect the vital role a local retail pharmacist has in counseling and advising patients, collaborating with practitioners on patients' medication therapy, seeking innovative ways to meet individual patient's needs (i.e. compounding medications), and often serving as a listening friend. It is a physically demanding and emotionally draining, but richly rewarding by the relationships built with your patients.

Currently my husband, who has a bachelors in business, and I are considering moving to Craig. We would be working at an independent retail pharmacy and are enthused to become a part of the Prince of Wales community. Additionally, I serve on the board of directors for a pharmacy organization where I oversee seventy-six student chapters nationwide and internationally. Part of my work in Craig would be encouraging pharmacy students from numerous states to come to Alaska for a summer position or complete a rotation during their final year of pharmacy school. My husband and I are confident the culture and spirit of Alaska would be of great benefit for us and we would continually seek to benefit the community through our combined diverse background in medicine, environmental science, business, accounting, and construction. However, my monthly student loan payment is significantly greater than our mortgage payment. My husband and I would like to relocate to Craig, but my more than two hundred thousand in student loans causes us to be very cautious with our choices.

From my perspective, SB139 would be a powerful incentive to draw pharmacists to the great state of Alaska. I have witnessed much legislation that is well intentioned, but often a significant portion ends up benefiting or rewarding those who have not necessarily made the hard choices. In contrast, I personally found SB139 to be distinctive and very encouraging. The reason for this is twofold. First, SB139 will attract medical professionals to Alaska and rural areas in particular, thus benefitting those who live in those areas and are often underserved. Second, SB139 will actually assist those who have made the continuous rigorous sacrifices of time, energy, and finances to enter the medical profession in an effort to give of themselves in the service of others.

Thank you for your time and consideration!

Sincerely,

Julie McDonald

Subject: HB 392 Good solution for health care workforce strategy

Representative Herron

As executive director for the Sunshine Community Health Center, I cannot tell you how valuable a loan repayment and incentive program is to recruiting potential medical and dental providers.

Sunshine has been actively recruiting for a dentist now for 14 months and while there are other obstacles (i.e. licensing for one) that hamper our efforts, loan repayment has become the number one question asked by candidates. In addition to our dental vacancy, we have been recruiting for a medical provider and the last three candidates said loan repayment was critical in their choice of employment.

While AK certainly has a lot of offer we cannot compete with clinics and centers in the lower 48 if the playing field is not level. One-way to make this happen to approve a loan and incentive program in Alaska.

I urge you to support this bill because without it there is the potential of clinics closing or scaling back hours due to no providers/staff (happened in S.E. when dentist retired and there was no replacement).

Subject: Please support loan repayment for health care professionals

Representative Herron

I have been an RN in hospital facilities for the past 31 year. I have spent 15 years in AK caring for the critically ill AK citizens and visitors to this state. Many of my new nurse colleagues come out of school with several thousands of dollars in school loans. The only facility that I am aware of that helps with loan repayment is the ANMC. It would help to keep the students educated in AK to stay in AK if they would get loan repayment assistance. I like this bill because the cost to the state is as the professional completes a certain length of time, they then receive payment.
Many states and facilities offer competitive loan repayment programs in order to get professionals to work in their state.
I urge you to look at this bill closely for securing the health care future for the state.
Thanks.

Sincerely,

House HSS Committee,

RE: HB 392 INCENTIVES FOR CERTAIN MEDICAL PROVIDERS

For several election cycles I have watched us lose more professionals who treat patients for their illnesses one-on-one and in auxiliary roles as well. Support for physicians and medical professionals to practice in Alaska is so long overdue. We have a crisis in interior Alaska!

The lack of proper care resulted in my daughter, who has very good insurance, being rushed through a quick clinic, being told that she just had a virus and to go home and treat it with fluids and rest. A week later, no better, she went back again. She went back for additional treatment, was handled quickly, and given some kind of antibiotic as she continued to cough and become more weak.

Finally, she wrangled an office visit with a physician in an outlying area through a family contact. He examined her thoroughly to find that she had been trying to function with walking pneumonia and had developed damage to one lung. She was required to have bed rest with antibiotics and inhalers, and then was restricted to only very minimal activity, as necessary to prevent the loss of her job, so that her lung could heal. She, having deteriorated from lack of early care, had more antibiotics, inhalers and months of re-exams and repeated X-rays to make sure her lung healed. This is a lady who has completed the Fairbanks Equinox Marathon at least 5 times, so it wasn't because she was a softie!

This is one reason that we must act to make physicians and other medical professionals work in Alaska. Remember that Alaska serves a large number of military dependents that add to our patient population. It is no longer only those who are on Medicare. We have a critical shortage for a conglomerate of reasons. Typically, an appointment for someone who is currently ill, not a check-up, has a 6-week wait. If you get very ill, rather than have a regular patient go into emergency for a "temporary patch job" your doctor will likely try to get you in where someone cancelled or between appointments during his lunch time.

Please pass HB 392 so that over time we will have some improvements in our situation.

Thank you,

Doris Robbins

COMMONWEALTH
NORTH

Resolution 2009-2
In support of Incentives for Certain Medical Providers as proposed in Senate Bill 139
April 14, 2009

This resolution is based on the 2005 Commonwealth North study entitled "Alaska Primary Health Care: Opportunities and Challenges."

Commonwealth North:

Encourages and promotes the establishment of incentives to bring more qualified Medical professionals to Alaska.

Requests all state legislators to approve authorizing legislation in Senate Bill 139; and

Forwards this resolution to all members of the Alaska State Legislature, Governor Sarah Palin, and Alaska's congressional delegation.

Resolved for the following reasons:

1. There are critical health manpower shortages in both our urban and rural areas
2. The State of Alaska is in competition with over forty states who already offer similar programs
3. Without this incentive, it will be difficult for Alaska to compete for medical and health professionals
4. Multiple millions of dollars are being spent annually in Alaska to have temporary health professionals from Outside fill our current needs
5. Current and potential future shortages can be identified in specific specialties including family practice physicians, internists, nurse practitioners, physician's assistants, nurses and clinical support health manpower areas such as physical therapist, x-ray and laboratory technicians

Approved by the Commonwealth North Board of Directors

Alaska Primary Care Association
Board of Directors

RESOLUTION 2009-02

Health Care Professions Loan Repayment and Incentive Program for Alaska

WHEREAS the Alaska Primary Care Association strives toward the goal of a healthy population, it recognizes that a robust health care workforce is necessary to provide adequate health care access for all Alaskans and is a key ingredient in improving the public health of all Alaskans; and

WHEREAS Alaska is competing with other states and nations for the finite pool of available health care professionals; and

WHEREAS Alaska is suffering from labor shortages in most professional health care occupations[1], and these shortages are hitting primary care "safety net" agencies particularly hard; and

WHEREAS most of the State of Alaska has been designated either a Health Professional Shortage Area or a Medically Underserved Area;[2] and

WHEREAS a common state-level response to these pressures is the use of financial inducements, collectively known as support-for-service programs (SFSPs), and good outcomes have been achieved with these;[3] and

WHEREAS national studies have determined loan repayment and incentive programs to be two of the most effective of the several SFSP strategies in terms of both recruitment and retention;[4] and

WHEREAS a key problem is that Alaska does not have a robust SFSP while most other states do, many have several, and further, some of those are growing;[5] and

WHEREAS most all other states have state-sponsored SFSPs that influence health professionals' geographic and specialty distributions;[6] and

WHEREAS it is well-established that many health care professionals carry a heavy debt-burden as they come out of training and are attracted to serving in those locations where a share of that burden can be taken away; and

Alaska Primary Care Association

"...uncompromising in the pursuit of access to primary care for all Alaskans."

WHEREAS for areas in the state where providers are required to work in professional isolation due to remote settings, direct incentives are needed to attract more experienced health care providers who do not carry debt and are considered desirable placements; and

WHEREAS considerable precedent exists for state-level offices to sponsor and manage financial support and inducement programs to thus encourage the within-state service of health care personnel; and

WHEREAS in 2006, the Alaska Physician Supply Task Force recommends a number of specific strategies and action steps to assuring an adequate supply of physicians to meet Alaska's need, including creation of a SFSP, and the 2007 Alaska Workforce Vacancy Study and the 2005-2006 Status of Recruitment Resources and Strategies (SORRAS II) point to the need for a state loan repayment and incentive program in order for Alaska to compete with the lower 48 to recruit from a limited pool of numerous types of health care providers nationwide; and

WHEREAS a concept proposal submitted to the Alaska Primary Care Council by Pat Carr, Chief Health Planning and Systems Development for the Department of Health and Human Services, concludes the following:

> Reported increasing vacancy rates, increasing costs of recruitment [SORRAS report], and comparisons with national norms [PSTF report] suggest that Alaska currently experiences a shortage of healthcare professionals, and, that shortages exist in several key occupational categories. Loan repayment programs have demonstrated substantial and longstanding success as a public strategy which has helped to rectify such shortages;[7] and

WHEREAS the above proposal recommends that "Alaska create a 'Health Care Professions Loan Repayment Program.' "[8]

THEREFORE BE IT RESOLVED that the Alaska Primary Care Association supports the creation of a state-sponsored "Health Care Professions Loan Repayment and Incentive Program" and will advocate for the necessary authorizing and fiduciary legislation.

Mat-Su Health Foundation Resolution to Support Health Care Professions Loan Repayment & Incentive Program for Alaska

WHEREAS the Mat-Su Health Foundation's mission is to enhance the health of Alaskans living in Mat-Su, where health is in part determined by access to primary, behavioral, and dental care and preventive services;

WHEREAS an adequate healthcare workforce is necessary to provide this access, and according to the *2005-2015 Mat-Su Borough Health Plan*, Mat-Su has an "inadequate number of providers to meet the demands of a growing population" in both the core area and the outlying rural areas of the borough;[i]

WHEREAS Mat-Su is designated a Medically-Underserved Area/Population by the U.S. Health Resources and Services Administration and has sub-regions designated Primary Care Health Professional Shortage Area, Mental Health Professional Shortage Area, and Dental Care Health Professional Shortage Area;[ii]

WHEREAS the Mat-Su Borough is the fastest growing area of Alaska, growing from 5,188 in 1960 to 82,515 in 2008 due to both positive birth and in-migration rates; and the AK Department of Labor projects that all Mat-Su age groups will continue to grow through 2020;[iii]

WHEREAS the Mat-Su Borough is experiencing one of the highest rates of population growth in the state among senior citizens, who use the healthcare system disproportionately more than any other age group; and the Alaska Commission on Aging reports Mat-Su's senior growth rate at 11.6%, which includes a net gain from a senior in-migration rate that is almost double its senior out-migration rate;[iv]

WHEREAS the Alaska Health Care Commission has designated Medicare-access as one of its six focus areas; and the University of Alaska Anchorage Institute of Social and Economic Research has reported that access to primary care for Medicare beneficiaries is problematic in Mat-Su, where data reveals that only 57.7% of Mat-Su primary care physicians will see new Medicare patients;[v]

WHEREAS the Mat-Su Health Foundation believes that an investment in the education of Mat-Su residents will help to build the healthcare workforce of the future and an engaged citizenship with a higher capacity to address the health-related challenges impacting Mat-Su and Alaska; and to this end has offered scholarships to help defray the cost of higher education and encourage Mat-Su residents to complete a degree or certificate program that emphasizes health and/or wellness; but also recognizes that more needs to be done to bolster the healthcare workforce in Mat-Su and Alaska;

WHEREAS Mat-Su Regional Medical Center has spent $6,238,438 on contract labor over the last five years on temporary health professionals from outside the state to fill current needs;

WHEREAS Alaska is competing with other states for the finite pool of available health care professionals; and over 40 states currently offer Support-for-Service Programs (SFSPs) that have influenced health professionals' geographic and specialty distributions;

WHEREAS national studies have determined loan repayment and incentive programs to be two of the most effective strategies in terms of both recruitment and retention;[vi]

WHEREAS without this incentive, it will be challenging for Alaska to compete for medical and health professionals, especially to work in rural areas;

BE IT THEREFORE RESOLVED that the Mat-Su Health Foundation promotes and advocates for the establishment of the Health Care Professions Loan Repayment & Employment Incentive Program to bring more qualified medical professionals to Alaska and will advocate for the necessary authorizing and fiduciary legislation.

House Finance Committee
Room 519
State Capitol
Juneau, Alaska

Re: HB392 – Recruitment Incentives for Certain Health Professionals

Dear Representatives Hawker and Stoltze:

The Alaska State Medical Association (ASMA) represents physicians statewide and is primarily concerned with the health of all Alaskans.

ASMA strongly supports HB392. It was one of the stakeholders that came together to develop the concept for loan repayment and direct incentive program proscribed in HB392. This measure will provide for an effective recruitment tool for physicians as well as other health care professionals in short supply.

Alaska competes with all other states in the recruitment of an ever shrinking pool of physicians practicing general internal medicine or family medicine. Currently only about 2% of medical school graduates are choosing general internal medicine or family medicine residencies. 44 of those states with whom Alaska competes for these physicians already have a loan repayment or direct incentive program.

HB392 will help to solve Alaska's chronic and acute (in certain practice specialties) physician workforce shortages. A study recently reported in the Journal of the American Medical Association that the shortages have been further exacerbated by a reduction in the hours that physicians are engaging in patient care. That study is "Trends in the Work Hours of Physicians in the United States", JAMA, February 24, 2010.

This study concluded that in the decade from 1996 to 2006, the hours of physician patient care decreased by 5.7%. The study concluded in part "...A 5.7% decrease in hours worked by nonresident physicians in patient care, out of a workforce of approximately 630,000 in 2007, is equivalent to a loss of approximately 36,000 physicians from the workforce, had the hours worked per physician not changed."

Massachusetts in 2006 adopted its own form of health system reform that resulted in more of its citizens having insurance coverage. The result was that not enough physicians were available to meet that increased demand for care. With the passage of health system reform at the federal level adding to those citizens with insurance coverage, if what happened in Massachusetts follows suit, the increased demand for care will outpace the number of physicians available to provide the necessary care.

HB392 is needed to help put Alaska on a more level playing field with other states trying to recruit for the same limited and shrinking supply of physicians needed to provide the care.

ASMA urges you to support HB392 and to expeditiously take action to insure enactment of this critical measure.

Sincerely,

By: James. J. Jordan, Executive Director
For: The Alaska State Medical Association.

Sponsor Statement
HB408 "An Act relating to misconduct involving weapons"

Under Alaska law, an individual who has been convicted of a felony can carry hand guns and have their right to bear arms restored by any of three occurrences: (1) a pardon, (2) the underlying conviction having been set aside under AS 12.55.085, or (3) by the passage of ten years time from an unconditional discharge.

However, the U.S. Supreme Court in the case of *Caron v. U.S.*, 524 U.S. 308 (1988), ruled that if a person who has been previously convicted of a felony is prohibited from possessing firearms, in any way, under state law, then they are prohibited from possessing firearms under federal law.

While under state law a previously convicted ex-felon's right to possession of firearms is fully restored, there are still limitations on carrying concealed weapons. Ex-felons can carry concealed on their own property, while engaged in lawful hunting, fishing, or trapping, or while engaged in other lawful activities that necessarily involves the carrying of a weapon for personal protection.

However, the ATF and the FBI are interpreting Alaska's statute to be a restriction upon possession. Due to this interpretation, Alaskans who under state law are allowed to possess firearms are being threatened with prosecution for serious Federal offenses.

This bill addresses the language in AS 11.61.200, Misconduct Involving Weapons in the Third Degree. AS 11.61.200(a)(12) bars all people convicted of felonies from caring concealed weapons, while AS 11.61.200(g) sets out exemptions to (a)(12)'s blanket ban.

The Alaska State Legislature has made its own policy decision about how to handle the gun rights of ex-felons; however the Federal Government has stripped Alaska of the right to make its own judgments, excepting an all-or-nothing decision on gun rights for ex-felons. HB408 is one of many bills that have been drafted in this legislation session to bring this issue back before the Alaska State Legislature for consideration.

HB 408 proposes amendments to the law relating to misconduct involving weapons in the third degree. It changes the affirmative defense, for example, to the crime of a felon in possession of a concealable weapon. Under current law it is an affirmative defense to this charge if the person had received a pardon, the conviction was set aside, or 10 years had elapsed from the felony conviction and the felony conviction was not a crime against a person. The bill would provide that the crime of felon in possession of a concealable weapon would not apply to these persons, rather than that the circumstances give rise to an affirmative defense. Enactment of the bill is not anticipated to fiscally impact the Department of Law.

ANALYSIS: *(Attach a separate page if necessary)*

This legislation would amend AS 11.61.200(b) and repeal (f) and (g), (misconduct involving weapons in the third degree). This bill changes language from one that currently provides an affirmative defense to prosecution, to one that states this statue "does not apply" if certain qualifiers exist.

Passage of this legislation will have no fiscal impact on the department.

West's Alaska Statutes Annotated Currentness
Title 11. Criminal Law
Chapter 61. Offenses Against Public Order
Article 2. Weapons and Explosives

→§ 11.61.200. Misconduct involving weapons in the third degree

(a) A person commits the crime of misconduct involving weapons in the third degree if the person

(1) knowingly possesses a firearm capable of being concealed on one's person after having been convicted of a felony or adjudicated a delinquent minor for conduct that would constitute a felony if committed by an adult by a court of this state, a court of the United States, or a court of another state or territory;

(2) knowingly sells or transfers a firearm capable of being concealed on one's person to a person who has been convicted of a felony by a court of this state, a court of the United States, or a court of another state or territory;

(3) manufactures, possesses, transports, sells, or transfers a prohibited weapon;

(4) knowingly sells or transfers a firearm to another whose physical or mental condition is substantially impaired as a result of the introduction of an intoxicating liquor or controlled substance into that other person's body;

(5) removes, covers, alters, or destroys the manufacturer's serial number on a firearm with intent to render the firearm untraceable;

(6) possesses a firearm on which the manufacturer's serial number has been removed, covered, altered, or destroyed, knowing that the serial number has been removed, covered, altered, or destroyed with the intent of rendering the firearm untraceable;

(7) violates AS 11.46.320 and, during the violation, possesses on the person a firearm when the person's physical or mental condition is impaired as a result of the introduction of an intoxicating liquor or controlled substance into the person's body;

(8) violates AS 11.46.320 or 11.46.330 by entering or remaining unlawfully on premises or in a propelled vehicle in violation of a provision of an order issued or filed under AS 18.66.100-18.66.180 or issued under former AS 25.35.010(b) or 25.35.020 and, during the violation, possesses on the person a defensive weapon or a deadly weapon, other than an ordinary pocketknife;

(9) communicates in person with another in violation of AS 11.56.740 and, during the communication, possesses on the person a defensive weapon or a deadly weapon, other than an ordinary pocketknife;

(10) resides in a dwelling knowing that there is a firearm capable of being concealed on one's person or a prohibited weapon in the dwelling if the person has been convicted of a felony by a court of this state, a court of the United States, or a court of another state or territory, unless the person has written authorization to live in a dwelling in which there is a concealable weapon described in this paragraph from a court of competent jurisdiction or from the head of the law enforcement agency of the community in which the dwelling is located;

(11) discharges a firearm from a propelled vehicle while the vehicle is being operated in circumstances other than described in AS 11.61.190(a)(2); or

© 2010 Thomson Reuters. No Claim to Orig. US Gov. Works.

(12) knowingly possesses a firearm that is concealed on the person after having been convicted of a felony or adjudicated a delinquent minor for conduct that would constitute a felony if committed by an adult by a court of this state, a court of the United States, or a court of another state or territory.

(b) It is an affirmative defense to a prosecution

(1) under (a)(1) of this section that

(A) the person convicted of the prior offense on which the action is based received a pardon for that conviction;

(B) the underlying conviction upon which the action is based has been set aside under AS 12.55.085 or as a result of post-conviction proceedings; or

(C) a period of 10 years or more has elapsed between the date of the person's unconditional discharge on the prior offense or adjudication of juvenile delinquency and the date of the violation of (a)(1) of this section, and the prior conviction or adjudication of juvenile delinquency did not result from a violation of AS 11.41 or of a similar law of the United States or of another state or territory;

(2) under (a)(2) or (10) of this section that

(A) the person convicted of the prior offense on which the action is based received a pardon for that conviction;

(B) the underlying conviction upon which the action is based has been set aside under AS 12.55.085 or as a result of post-conviction proceedings; or

(C) a period of 10 years or more has elapsed between the date of the person's unconditional discharge on the prior offense and the date of the violation of (a)(2) or (10) of this section, and the prior conviction did not result from a violation of AS 11.41 or of a similar law of the United States or of another state or territory.

(c) It is an affirmative defense to a prosecution under (a)(3) of this section that the manufacture, possession, transportation, sale, or transfer of the prohibited weapon was in accordance with registration under 26 U.S.C. 5801 - 5872 (National Firearms Act).

(d) It is an affirmative defense to a prosecution under (a)(11) of this section that the person was using a firearm while hunting, trapping, or fishing in a manner not prohibited by statute or regulation.

(e) The provisions of (a)(3) and (11) of this section do not apply to a peace officer acting within the scope and authority of the officer's employment.

(f) For purposes of (a)(12) of this section, a firearm on a person is concealed if it is covered or enclosed in any manner so that an observer cannot determine that it is a firearm without removing it from that which covers or encloses it or without opening, lifting, or removing that which covers or encloses it. A firearm on a person is not concealed if it is unloaded and is encased in a closed container designed for transporting firearms.

(g) It is an affirmative defense to a prosecution under (a)(12) of this section that

(1) either

(A) the defendant convicted of the prior offense on which the action is based received a pardon for that convic-

© 2010 Thomson Reuters. No Claim to Orig. US Gov. Works.

tion;

(B) the underlying conviction upon which the action is based has been set aside under AS 12.55.085 or as a result of post-conviction proceedings; or

(C) a period of 10 years or more has elapsed between the date of the defendant's unconditional discharge on the prior offense or adjudication of juvenile delinquency and the date of the violation of (a)(12) of this section, and the prior conviction or adjudication of juvenile delinquency did not result from a violation of AS 11.41 or of a similar law of the United States or of another state or territory; and

(2) at the time of possession, the defendant was

(A) in the defendant's dwelling or on land owned or leased by the defendant appurtenant to the dwelling; or

(B) actually engaged in lawful hunting, fishing, trapping, or other lawful outdoor activity that necessarily involves the carrying of a weapon for personal protection.

(h) As used in this section,

(1) "prohibited weapon" means any

(A) explosive, incendiary, or noxious gas

(i) mine or device that is designed, made, or adapted for the purpose of inflicting serious physical injury or death;

(ii) rocket, other than an emergency flare, having a propellant charge of more than four ounces;

(iii) bomb; or

(iv) grenade;

(B) device designed, made, or adapted to muffle the report of a firearm;

(C) firearm that is capable of shooting more than one shot automatically, without manual reloading, by a single function of the trigger; or

(D) rifle with a barrel length of less than 16 inches, shotgun with a barrel length of less than 18 inches, or firearm made from a rifle or shotgun which, as modified, has an overall length of less than 26 inches;

(2) "unconditional discharge" has the meaning ascribed to it in AS 12.55.185.

(i) Misconduct involving weapons in the third degree is a class C felony.

Validity 1/2
Validity of prior laws 1

1/2. Validity

Statute that prohibited a convicted felon from possessing a concealable firearm did not violate Alaska Constitution's provision guaranteeing an individual's right to keep and bear arms. Wilson v. State, 2009, 2009 WL 1424468. Weapons 3

1. Validity of prior laws

Term "gravity knife," which is included as prohibited weapon under statute making it a felony to possess such weapon, is not unconstitutionally vague; "gravity knife" is commonly understood as knife in which blade opens, falls into place, or is ejected into position by force of gravity or by centrifugal force, and "gravity knife" is included in statute in conjunction with switchblade knife, thus providing ordinary person with notice that "gravity knife" must be similar to switchblade in operating automatically or semiautomatically. AS 11.61.200(e)(1)(D). State v. Weaver, 1987, 736 P.2d 781. Weapons 3

2. In general

Legislature has considerable discretion in creating classifications denoting which former felons can possess firearm and classifications need not be perfect. AS 11.61.200(b); Const. Art. 1, § 6. McCracken v. State, 1987, 743 P.2d 382, dismissal of habeas corpus reversed 985 F.2d 573. Weapons 2

3. Equal protection

© 2010 Thomson Reuters. No Claim to Orig. US Gov. Works.

Statute defining misconduct involving weapons in the first degree, requiring passage of five years from unconditional discharge on prior felony offense before a person can possess firearm, did not violate equal protection clause of State Constitution, even though statute provided that receipt of pardon for prior conviction or having conviction set aside was affirmative defense. AS 11.61.200(b); Const. Art. 1, § 6. McCracken v. State, 1987, 743 P.2d 382, dismissal of habeas corpus reversed 985 F.2d 573. Constitutional Law 3234; Weapons 3

4. Due process

State did not deny defendant due process under Alaska Constitution by convicting him on a felon in possession charge even though his underlying conviction was reversed on constitutional grounds. AS 11.61.200(a)(1). Clark v. State, 1987, 739 P.2d 777. Constitutional Law 4509(25)

In prosecution of an ex-convict for possessing a concealable weapon, State was not required, as a matter of due process, to establish defendant's awareness of statute prohibiting such conduct. U.S.C.A. Const.Amend. 14. Afcan v. State, 1986, 711 P.2d 1198. Constitutional Law 4694

5. Double jeopardy

Conviction in the Court of the Municipal Magistrate of Anchorage, Alaska, of the crime of carrying a concealed weapon, in violation of an ordinance of that city did not bar prosecution on the same facts under Alaska statute forbidding persons convicted of a felony involving assault and like crimes from carrying firearms capable of being concealed upon the person. Act March 3, 1899, §§ 107, 143, 146, 147, 30 Stat. 1296, 1301; U.S.C.A.Const. Amend. 5; Laws Alaska 1947, c. 70. U.S. v. Farwell, 1948, 11 Alaska 507, 76 F.Supp. 35. Double Jeopardy 187

6. Right of association

Statute prohibiting felon from residing in dwelling with knowledge that concealable firearm was kept there, unless permission had been given by court or local law enforcement, did not infringe upon felon's First Amendment right of association by prohibiting felon from living with his family, absent assertion that stepson who owned gun was unwilling to keep gun elsewhere or that felon had ever applied to court or law enforcement for permission to reside in dwelling with gun. U.S.C.A. Const.Amend. 1; AS 11.61.200(a)(10). Morgan v. State (1997) Alaska App., 943 P.2d 1208, denial of habeas corpus affirmed 242 F.3d 382. Constitutional Law 1443; Weapons 3

7. Right to keep and bear arms

Statute prohibiting felon from residing in dwelling with knowledge that concealable firearm was kept there, unless permission had been given by court or local law enforcement, does not violate right to keep and bear arms, guaranteed by state constitution. Const. Art. 1, § 19; AS 11.61.200(a)(10). Morgan v. State (1997) Alaska App., 943 P.2d 1208, denial of habeas corpus affirmed 242 F.3d 382. Weapons 3

8. Right to privacy

Statute which makes possession of "gravity knife" in one's home a felony does not violate right to privacy under State Constitution; legislature may properly prohibit possession of object which interferes in serious manner with health, safety, rights, and privileges of others, or with public welfare. AS 11.61.200(a)(3); Const. Art. 1, § 22. State v. Weaver, 1987, 736 P.2d 781. Constitutional Law 1225; Weapons 3

9. Nature and elements of offense

© 2010 Thomson Reuters. No Claim to Orig. US Gov. Works.

The state forbidding persons convicted of a felony involving assault and like crimes from carrying firearms capable of being concealed upon the person did not forbid consideration of felony committed in Oregon seven years earlier, the statute being otherwise valid. Laws Alaska 1947, c. 70. U.S. v. Farwell, 1948, 11 Alaska 507, 76 F.Supp. 35. Weapons 6

A .45 caliber Colt Automatic pistol was a "firearm capable of being concealed upon the person" within statute forbidding persons convicted of felony involving assault and like crimes from carrying a "firearm capable of being concealed upon the person." Laws Alaska 1947, c. 70. U.S. v. Farwell, 1948, 11 Alaska 507, 76 F.Supp. 35. Weapons 8

Defendants who either have entered guilty plea or have been found guilty of felony at trial are "convicted of a felony" for purposes of the felon in possession of a firearm statute. AS 11.61.200(a)(1). Brant v. State (1999) Alaska App., 992 P.2d 590. Weapons 4

Felon can be convicted of violating statute prohibiting felon from residing in dwelling with knowledge that concealable firearm is kept there unless permission has been given by court or local law enforcement, even if felon was unaware of statute; it is widely known that felons are subject to variety of legal disabilities and restrictions, which thus makes it reasonable to hold felons to duty of inquiry concerning such restrictions. AS 11.61.200(a)(10), 11.81.620(a). Morgan v. State (1997) Alaska App., 943 P.2d 1208, denial of habeas corpus affirmed 242 F.3d 382. Weapons 4

Belated set aside of conviction, following completion of probation on suspended imposition of sentence, related back to date defendant was discharged from probation and, thus, previous conviction could not be used as basis for subsequent conviction of possessing weapon after having been previously convicted of felony. AS 11.61.200, 12.55.085; Rules Crim.Proc., Rules 11(h)(2), 35.2. Hansen v. State, 1992, 824 P.2d 1384. Weapons 4

Butterfly knife is not "switchblade or gravity knife" and therefore does not qualify as prohibited weapon. AS 11.61.200(a)(3), (e)(1)(D). Jacobson v. State, 1990, 786 P.2d 388. Weapons 4

"Butterfly" or "balisong knife" was not "switchblade" or "gravity knife" for purposes of statute making it felony to possess prohibited weapon which is defined to include switchblade or gravity knife. AS 11.61.200(a)(3), (e)(1)(D). State v. Strange, 1990, 785 P.2d 563. Weapons 4

Convicted felon's possession of partner's handgun for less than one-half hour for purpose of pawning it constituted "possession" within meaning of felon-in-possession statute. AS 11.61.200(a)(1). Baker v. State, 1989, 781 P.2d 1368. Weapons 4

Prosecution was not required to prove that defendant had notice or knowledge that his conduct in possessing firearm constituted crime in order to convict defendant of misconduct involving weapons in the first degree. AS 11.61.200(a)(1). McCracken v. State, 1987, 743 P.2d 382, dismissal of habeas corpus reversed 985 F.2d 573. Weapons 4

Defendant violated felon in possession law by possessing a concealable firearm while underlying conviction was on appeal, notwithstanding that underlying conviction was later reversed. AS 11.61.200(a)(1). Clark v. State, 1987, 739 P.2d 777. Weapons 4

In prosecution of an exconvict for possessing a concealable weapon, State was not required to establish defendant's awareness of statute prohibiting such conduct. AS 11.81.620(a). Afcan v. State, 1986, 711 P.2d 1198. Weapons 4

© 2010 Thomson Reuters. No Claim to Orig. US Gov. Works.

Defendant could be convicted of being a felon in possession of a concealable firearm while predicate conviction was on appeal and sentence stayed. AS 11.61.200(a)(1). Berg v. State, 1985, 711 P.2d 553. Weapons 4

Guilt of possession of gun by felon does not require actual possession and custody or control is sufficient, but knowledge is prerequisite to possession, control or custody. AS 11.55.030. Davis v. State, 1972, 499 P.2d 1025, certiorari granted 93 S.Ct. 1392, 410 U.S. 925, 35 L.Ed.2d 586, reversed 94 S.Ct. 1105, 415 U.S. 308, 39 L.Ed.2d 347. Weapons 4

Weapon is "concealed" if it is hidden from ordinary observation, and need not be absolutely invisible to other persons. AS 11.55.030. McKee v. State, 1971, 488 P.2d 1039. Weapons 10

10. Defenses

Applicant whose prior felony conviction was pardoned by governor would not have affirmative defense to unlawful possession of firearm by convicted felon, and thus, applicant was not eligible for permit to carry concealed weapon under state law, in that he would be subject to criminal liability if he carried concealed handgun in any place outside his dwelling or land appurtenant to dwelling or carried handgun while not engaged in lawful hunting, fishing or trapping, or other lawful activity. Gabrielle v. State, Dept. of Public Safety (2007) Alaska, 158 P.3d 813. Weapons 12

Defendant's alleged reliance on fact that probation officer failed to inform him of statute prohibiting felon from residing in home in which concealable firearm was kept did not present sufficient basis to assert statutory mistake-of-law defense to prosecution for violation of weapons statute. AS 11.61.200(a)(10), 11.81.420(a), (b)(1). Morgan v. State (1997) Alaska App., 943 P.2d 1208, denial of habeas corpus affirmed 242 F.3d 382. Criminal Law 32

Defendant's personal belief that he was not convicted for purposes of the felon in possession statute during the pendency of the appeal of the underlying conviction was not sufficient to establish the defense of mistake of law. AS 11.61.200(b)(1-3). Clark v. State, 1987, 739 P.2d 777. Criminal Law 32

Affirmative defenses provided under felon in possession statute arise only when the actions described therein occurred before the felon in possession offense was committed. AS 11.61.200(b)(1-3). Clark v. State, 1987, 739 P.2d 777. Weapons 4

11. Attorney discipline

Federal crime of aiding and abetting a convicted felon and mental defective in receiving ammunition is a "serious crime" within meaning of bar rule, which provides that an attorney convicted of a serious crime shall be suspended from practice pending final disposition of a disciplinary proceeding and which defines a "serious crime," in part, as including any crime that would be a felony in state, though state does not specifically prohibit furnishing ammunition to a convicted felon. State Bar Rules, rules 12, 16(c), 23, 23(d); 18 U.S.C.A. §§ 2, 922(h); AS 11.55.030, 12.15.010. Matter of Robson, 1978, 575 P.2d 771. Attorney And Client 39

12. Arrest

Police officer had probable cause for warrantless seizure and search of contents of plastic box containing crack cocaine, which was found on defendant's person during search incident to arrest for possessing firearm while intoxicated; officer's knowledge that type of glass pipe found on defendant was commonly used to smoke cocaine and that people who smoke cocaine and possess pipe usually carry cocaine, furnished probable cause for arrest of defendant for un-

© 2010 Thomson Reuters. No Claim to Orig. US Gov. Works.

lawful possession of drugs as well as probable cause for search of contents of plastic box for cocaine, and officer's observations of defendant's erratic behavior while possessing firearm, provided probable cause for officer to believe that defendant was high and thus to search defendant's person for cocaine. AS 11.61.200(a)(1), 11.71.040(a)(3)(A). Snider v. State (1998) Alaska App., 958 P.2d 1114. Arrest 71.1(6)

Where officer knew that hand guns and ammunition had been taken in recent burglary committed near where defendant was walking, he knew defendant had a criminal record, the hour was late, protrusions in defendant's coat were unusual and the position of his hand suggested that he was carrying a hand gun, officer was justified in stopping defendant and, when defendant kept his hand positioned so as to suggest that he was carrying unholstered gun, a search of defendant was also proper and gun uncovered by search should not be suppressed. AS 11.20.100, 11.55.010, 11.55.03 (Repealed); Const. Art. 1, § 14. Ozenna v. State, 1980, 619 P.2d 477. Arrest 63.5(5); Arrest 63.5(8)

13. Joint or separate trial

Trial judge did not abuse his discretion in denying defendant's motion for severance filed on morning of trial on ground that it was not timely where misconduct involving weapons in first degree was properly joined to kidnapping and other charges since all the charges were based on the same act or transaction, severance of the misconduct involving weapons charged would have resulted in essentially the same evidence being presented twice to two different juries, defendant made no showing that his failure to move for a severance was in any way related to State's misconduct in making late discovery, there was no claim that counsel obtained any new information which would justify failure to move for severance at earlier time and where it appeared that there could have been strategic reasons for the fact that defendant did not make his motion to sever at an earlier time. Rules Crim.Proc., Rules 8(a), 12(b, c, e), 16(f)(3); AS 11.41.200(a)(1, 3), 11.61.200(a). Wortham v. State, 1984, 689 P.2d 1133. Criminal Law 620(7)

Joint trial of defendant for not only crimes of burglary and larceny but also the crime of possession, by a person convicted of felony, of a firearm capable of being concealed on person was not so prejudicial as to require reversal of judgment and ordering of separate trials where jury was not told nature of prior conviction involved possession of firearm count and there was nothing inflammatory about way fact of prior conviction was presented to jury. Mead v. State, 1968, 445 P.2d 229, certiorari denied 90 S.Ct. 117, 396 U.S. 855, 24 L.Ed.2d 104. Criminal Law 1166(6)

14. Pleas

Refusing to let defendant withdraw guilty plea to charge of possessing weapon after having been convicted of felony was error given that defendant was entitled to set aside of previous conviction after completing probation on suspended imposition of sentence, and defendant was misinformed by his attorney when defendant entered his plea. AS 11.61.200; Rules Crim.Proc., Rules 11(h)(2), 35.2. Hansen v. State, 1992, 824 P.2d 1384. Criminal Law 274(4); Criminal Law 274(8)

15. Admissibility of evidence

Trial judge acted within his discretion, during prosecution for possession of altered firearm, in permitting police officer to testify as to why serial number would be removed from firearm; officer's testimony was not speculative, but was instead based on her experience and training with handguns. AS 11.61.200(a)(6). Collins v. State (1999) Alaska App., 977 P.2d 741. Criminal Law 474.5; Criminal Law 476.1

Evidence of defendant's prior conviction was admissible in prosecution for misconduct involving weapon, even though defendant had conceded existence of prior felony conviction and that his prior conviction precluded him from possessing concealable firearm, as jury had legitimate right to be informed of all elements of crime charged and of proof bearing on those elements so that jurors would not be misled to think that they were being asked to convict

© 2010 Thomson Reuters. No Claim to Orig. US Gov. Works.

defendant for mere possession of firearm. AS 11.61.200(a)(1); Rules of Evid., Rule 404(b)(1). State v. McLaughlin, 1993, 860 P.2d 1270. Criminal Law 661

Any error in trial court's failure to withhold from jury evidence of defendant's prior convictions in light of his proffered stipulation, for purposes of charge of misconduct involving weapons in first degree, that he had prior felony conviction, was harmless, given strength of state's case against defendant on robbery, murder, assault, and attempted murder charges; defendant conceded that he was guilty of robbery, was in possession of handgun, and had previously been convicted of felony, defendant was arrested at scene, his identity was not in doubt, and evidence of intent in shooting at police officers was overwhelming. Rules of Evid., Rule 403; Rules Crim.Proc., Rule 47(a); AS 11.61.200(a)(1). Weitz v. State, 1990, 794 P.2d 952. Criminal Law 1168(2)

Admission of prior felony charge in prosecution of defendant for kidnapping and misconduct involving weapons in first degree did not result in such unfair prejudice to defendant that he was entitled to new trial in spite of fact that his motion to sever was untimely, where defendant stipulated to existence of prior felony, jury was not informed of nature of conviction, evidence of prior conviction came in with minimum emphasis, and there was no emphasis on existence of prior conviction during remainder of trial, notwithstanding that court failed to give limiting instruction that prior felony was admissible only for purpose of proving misconduct involving weapons charge. AS 11.41.200(a)(1, 3), 11.61.200(a). Wortham v. State, 1984, 689 P.2d 1133. Criminal Law 1169.11

In prosecution of defendant for kidnapping, assault, robbery and misconduct involving weapons, trial judge did not abuse his discretion in refusing to admit testimony of defendant's proffered witness which was offered on narrow ground that pimp would not go to police if he had dispute with someone like defendant but that pimp and defendant would try to work things out, where defendant was able to introduce evidence through another witness' testimony that victim was a pimp, jurors could reason that pimp would prefer not to contact police and proffered witness' testimony would not have assisted jury in understanding defendant's case that victim was pimp who had disagreement with defendant and would be biased against him. AS 11.41.200(a)(1, 3), 11.41.300(a)(1), (a)(1)(E), 11.61.200(a); Rules of Evid., Rules 403, 702. Wortham v. State, 1984, 689 P.2d 1133. Witnesses 374(1)

Eyewitness' testimony, in prosecution for being a convict in possession of a prohibited weapon, that defendant took knife from his pocket, described how he had stabbed and raped his sister-in-law, mentioned he was on parole, and kissed witness was admissible to explain why defendant would be the kind of person who would carry a concealed weapon in a public building and exhibit it to a virtual stranger. McKee v. State, 1971, 488 P.2d 1039. Weapons 17(3)

16. Instructions

Ambiguity of definition of constructive possession in defendant's trial for weapons offenses after the police recovered a pistol from under the passenger seat of the vehicle in which he was riding, was harmless; the defense was that defendant did not know the pistol was under the seat, but the alleged flaw in the instruction would make a difference only if defendant conceded he was aware of the pistol; moreover, defendant was also convicted of possession of firearm in furtherance of a drug felony, so jury necessarily found that defendant knowingly possessed the pistol in aid or in furtherance of his drug offense. AS 11.61.200(a)(1). Alex v. State (2006) Alaska App., 127 P.3d 847, rehearing denied, dismissal of post-conviction relief vacated 210 P.3d 1225. Criminal Law 1172.1(3)

Defendant was not entitled to instruction on defense of necessity in trial for misconduct involving weapons in the first degree, despite defendant's testimony that he received threats from relatives of victim of defendant's former felony offense, absent showing that defendant had taken reasonable steps, other than illegally purchasing concealable firearm, in order to defend himself. AS 11.61.200(a)(1), 11.81.320. McCracken v. State, 1987, 743 P.2d 382, dismissal of habeas corpus reversed 985 F.2d 573. Weapons 17(6)

© 2010 Thomson Reuters. No Claim to Orig. US Gov. Works.

In prosecution of defendant for kidnapping and misconduct involving weapons in first degree, trial court's failure to give limiting instruction that prior felony was admissible only for purpose of proving the misconduct involving the weapons charge was not plain error where defendant never requested limiting instruction, although defendant was entitled to limiting instruction if he had requested one and better practice would have been for trial judge to have offered to give limiting instruction. AS 11.41.200(a)(1, 3), 11.61.200(a). Wortham v. State, 1984, 689 P.2d 1133. Criminal Law 1038.2

In prosecution of defendant for kidnapping, assault, robbery, and misconduct involving weapons, trial court did not err in refusing to give defendant's proposed instruction which summarized his theory of the case that victim voluntarily accompanied defendant, that victim had possessed the firearm involved and that victim was wounded as a result of his own actions in a struggle over the weapon, where instructions informed jury of elements of the crimes, law of self-defense and necessity, burden of proof, witness credibility and bias, defendant's theory of defense was adequately covered in the instructions which were given and defendant's attorney was able to argue the defense theory in closing argument. AS 11.41.200(a)(1, 3), 11.41.300(a)(1), (a)(1)(E), 11.61.200(a). Wortham v. State, 1984, 689 P.2d 1133. Criminal Law 829(4)

Where possession of concealable firearm by defendant, a convicted felon, was the only crime charged, where idea of obtaining firearm originated with defendant while he was in prison, where defendant retained exclusive control over firearm until it was later found by prison officials, and where defendant's cell mate shared no dominion and control over the gun, there was no basis from which jury could have reasonably inferred that cell mate was an accomplice, and thus trial judge did not err in refusing to give accomplice instruction to jury. AS 11.55.030; Rules of Criminal Procedure, rule 30(b)(2). Gordon v. State, 1975, 533 P.2d 25. Criminal Law 780(1)

Defendant charged with being a convict in possession of a prohibited concealed weapon was entitled to an instruction defining the term "concealed." AS 11.55.030. McKee v. State, 1971, 488 P.2d 1039. Criminal Law 800(2)

17. Sufficiency of evidence

Evidence that accused had been convicted of assault with intent to rob under the laws of Oregon and that at time of his subsequent arrest he had in his possession a .45 caliber Colt Automatic pistol justified conviction under Alaska statute forbidding persons convicted of a felony involving assault and like crimes from carrying a firearm capable of being concealed upon the person. Laws Alaska 1947, c. 70. U.S. v. Farwell, 1948, 11 Alaska 507, 76 F.Supp. 35. Weapons 17(4)

There was sufficient evidence that defendant possessed firearm knowing that its serial number had been altered with intent of rendering firearm untraceable to support his conviction for possession of altered firearm; defendant admitted that he purchased two handguns, including the altered handgun, on street from person he did not know for $50, the loaded handguns were found under mattress of bed in bedroom where defendant was found, and police officers testified that removal of serial number from weapon exhibited intent to render that firearm untraceable. AS 11.61.200(a)(6). Collins v. State (1999) Alaska App., 977 P.2d 741. Weapons 17(4)

In prosecution of an ex-convict for possessing a concealable weapon, State fully satisfied its burden of establishing defendant's culpable mental state by showing: that defendant knew he had been convicted of a felony; that he knew he had been discharged from probation for the felony within the past five years; and that he knew he was in possession of a concealable firearm. AS 11.61.200(a)(1), 11.81.610(b)(2). Afcan v. State, 1986, 711 P.2d 1198. Weapons 17(4)

Evidence sustained conviction for possession of pistol by felon, despite claim that exclusive possession was not established and although pistol did not have clip. AS 11.55.030. Davis v. State, 1972, 499 P.2d 1025, certiorari granted 93 S.Ct. 1392, 410 U.S. 925, 35 L.Ed.2d 586, reversed 94 S.Ct. 1105, 415 U.S. 308, 39 L.Ed.2d 347. Weapons 17(4)

© 2010 Thomson Reuters. No Claim to Orig. US Gov. Works.

18. Sentence and punishment--In general

Imposition of maximum sentence upon conviction for misconduct involving weapons in first degree was not clearly mistaken where state proved that defendant's prior criminal history included repeated instances of assaultive behavior and that defendant had three or more prior felony convictions. AS 11.61.200(a)(1), 12.55.125(e)(2), 12.55.155(c)(8, 15). Simmons v. State, 1995, 899 P.2d 931. Weapons 17(8)

Sentence of 11 years in prison for combination of crimes consisting of first-degree burglary, second-degree theft, first-degree weapons misconduct, and forgery was not excessive, where trial court found that defendant was third felony offender who could not be deterred or easily rehabilitated, and maximum term for defendant's single most serious offense was ten years. AS 11.46.130(b), 11.46.300(b), 11.61.200(f); AS 12.55.185(9) (1990). Wesolic v. State, 1992, 837 P.2d 130. Burglary 49; Forgery 51; Larceny 88; Weapons 17(8)

Defendant's abuse of his landlord's trust by burglarizing locked bedrooms and garage of home while landlord was absent was proper factor to consider when judging seriousness of burglary for purposes of sentencing. AS 11.46.130(b), 11.46.300(b), 11.61.200(f), 12.55.155(c)(15, 20, 21), (d)(9); AS 12.55.185(9) (1990). Wesolic v. State, 1992, 837 P.2d 130. Burglary 49

Defendant's prior sentences in Oregon for unauthorized use of motor vehicle and in Fairbanks for first-degree burglary and driving while intoxicated were sufficiently significant to support finding that defendant was danger to community, as basis for making defendant's sentence for misconduct involving weapons consecutive to defendant's sentences for first-degree burglary counts. AS 11.46.300(a)(2)(A), 11.61.200(a)(1), 12.55.125(d)(1), (e)(1), 12.55.155(c)(20). Ecklund v. State, 1986, 730 P.2d 161. Sentencing And Punishment 602

Trial court should, prior to imposing sentence, inquire of defendant and his counsel and resolve any factual questions in dispute regarding defendant's credit for time served based on conditions of presentence release, and should expressly identify those periods of time for which credit is to be allowed. AS 11.41.220(a)(2), 11.61.200(a)(1), 12.55.125(e)(1). Ackermann v. State, 1986, 716 P.2d 5. Sentencing And Punishment 354

In sentencing defendant on convictions of assault in the first degree, kidnapping, robbery in the first degree, and misconduct involving weapons in the first degree, trial judge was authorized to impose consecutive sentences and was also free to give little weight to mitigating factor that, except for misconduct involving weapons charge, defendant's former charges consisting of five prior felony offenses were less serious offenses that his current charges. AS 11.41.200(a)(1, 3), 11.41.300(a)(1), (a)(1)(E), 11.61.200(a); AS 12.55.155(d)(8)(Repealed). Wortham v. State, 1984, 689 P.2d 1133. Sentencing And Punishment 94; Sentencing And Punishment 590

Three-judge panel could legitimately conclude that conduct of defendant, who was convicted of first-degree misconduct involving weapons on basis of his possession of a handgun, was not the least serious included in the definition of the offense; furthermore, review of defendant's entire criminal record supported finding by three-judge panel and by original sentencing judge that defendant's conduct exhibited contempt for the law and law enforcement warranting a substantial sanction. AS 11.61.200(a), 12.55.155(d)(9, 13). Shaw v. State, 1983, 673 P.2d 781, modified on rehearing 677 P.2d 259, appeal after new sentencing hearing 1985 WL 1078167. Weapons 17(8)

Three-judge panel was not clearly mistaken in determining that presumptive sentence for misconduct involving weapons in the first degree was not manifestly unjust. AS 11.61.200(a)(1), (f). Shaw v. State, 1983, 673 P.2d 781, modified on rehearing 677 P.2d 259, appeal after new sentencing hearing 1985 WL 1078167. Sentencing And Punishment 77

© 2010 Thomson Reuters. No Claim to Orig. US Gov. Works.

Defendant convicted of misconduct involving weapons in the first degree, with prior convictions for assault with dangerous weapon and felon in possession of weapon, could properly be sentenced as third offender, even though a prior conviction was necessary element of both the present charge of misconduct involving weapons and the prior conviction of felon in possession of a weapon; same conviction could be used to prove element of misconduct involving weapons as well as to trigger application of presumptive sentencing. AS 11.61.200(a)(1), 12.55.125(e)(2), 12.55.155(c). Gilbreath v. State, 1983, 668 P.2d 1354. Sentencing And Punishment 1349

Even though defendant's prior felony conviction was a necessary element of the offense involving violation of statute prohibiting felons from possessing any concealable firearm, such conviction could form basis for applying presumptive sentence applicable to second felony offender. AS 11.61.200(a)(1), 12.55.125, 12.55.155, 12.55.185(7). Fry v. State, 1983, 655 P.2d 789. Sentencing And Punishment 94

In prosecution for assault in third degree and misconduct involving weapons in first degree, trial court erred in imposing sentence in excess of presumptive sentence absent finding of aggravating factors, even if excess term was suspended. AS 11.41.220, 11.61.200(a)(1), 12.55.155-12.55.175. McManners v. State, 1982, 650 P.2d 414. Assault And Battery 100; Weapons 17(8)

Fact that, with regard to process of determining sentence to be imposed for offense of being a felon in possession of a prohibited weapon, accused's prior "police contacts" not leading to convictions were discussed in ascertaining length of time he had served on a prior conviction and other matters did not prejudice accused, in view of indication that such police contacts were not a significant factor in trial court's decision to impose four-year sentence. AS 11.55.030, 11.55.040. Deveroux v. State, 1976, 548 P.2d 1296. Criminal Law 1177.3(2)

Where plea bargain entered into by accused, who pled guilty to being a felon in possession of a prohibited weapon, entailed his admitting, for purposes of sentencing, a charge of larceny in a building, such charge could be considered for sentencing purposes, though the charge was dropped. AS 11.55.030, 11.55.040. Deveroux v. State, 1976, 548 P.2d 1296. Sentencing And Punishment 98

Though some of accused's prior convictions of 11 criminal offenses and 13 traffic offenses were petty in nature, the number of such convictions warranted their consideration in determining sentence to be imposed for accused's offense of being a felon in possession of a prohibited weapon. AS 11.55.030, 11.55.040. Deveroux v. State, 1976, 548 P.2d 1296. Sentencing And Punishment 95

Trial court, in stating that "there is no question in my mind that * * * [defendant] is a danger to society" and in indicating that court had considered and rejected the possibility of rehabilitation "at least * * * unless there is a complete change of attitude by the defendant," sufficiently articulated court's reasons for and purpose to be served by imposition of four-year sentence against defendant for offense of being a felon in possession of a prohibited weapon. AS 11.55.030, 11.55.040. Deveroux v. State, 1976, 548 P.2d 1296. Sentencing And Punishment 373

19. ---- Aggravation and mitigation, sentence and punishment

Defendant's actions which formed the basis of his third-degree weapons misconduct conviction were not among the least serious forms of conduct encompassed by the crime of weapons misconduct, and thus was not a mitigating factor for sentencing purposes; court found that defendant was legally intoxicated and had concealed his loaded weapon under his clothing. AS 11.61.200(a)(1), 12.55.155(d)(9). Brockway v. State (2001) Alaska App., 37 P.3d 427. Sentencing And Punishment 66

Fact that defendant waited until owner of home was absent before burglarizing home was not mitigating factor with respect to sentencing for first-degree burglary conviction. AS 11.46.130(b), 11.46.300(b), 11.61.200(f),

© 2010 Thomson Reuters. No Claim to Orig. US Gov. Works.

12.55.155(c)(15, 20, 21), (d)(9); AS 12.55.185(9) (1990). Wesolic v. State, 1992, 837 P.2d 130. Burglary 49

Mitigating factor for cases where defendant's conduct is among least serious conduct within definition of offense may be applied to offense of felon in possession of concealable firearm. AS 11.61.200(a)(1), 12.55.155(d)(9). State v. LaPorte, 1983, 672 P.2d 466. Weapons 17(8)

Though offense of misconduct involving weapons in the first degree is defined in terms merely of knowing possession of a firearm, aggravating factor of directing the "conduct constituting the offense" at a law enforcement officer was shown by evidence that gun was pointing directly at officer when defendant first turned, that defendant refused at least three times to drop the weapon, and that defendant knew that person confronting him was a police officer. AS 11.61.200(a)(1), 12.55.155(c)(13). Gilbreath v. State, 1983, 668 P.2d 1354. Sentencing And Punishment 124

Aggravating factor of directing "conduct constituting the offense" at a law enforcement officer was applicable, despite defendant's contention that offense of misconduct involving weapons in the first degree was "complete" when police officer first saw him with the gun, before defendant was even aware of officer's presence. AS 11.61.200(a)(1), 12.55.155(c)(13). Gilbreath v. State, 1983, 668 P.2d 1354. Sentencing And Punishment 124

"Most serious conduct" aggravating factor with respect to offense of misconduct involving weapons in the first degree was shown by possession of concealable weapon by defendant, who was a felon, under circumstances indicating possible intent to use the weapon against a police officer or another. AS 11.61.200(a)(1), 12.55.155(c)(10). Gilbreath v. State, 1983, 668 P.2d 1354. Sentencing And Punishment 79

Finding of mitigating factor that harm caused by defendant's conduct was "consistently minor and inconsistent with the imposition of a substantial period of imprisonment" was not warranted, given circumstances of instant offense of misconduct involving weapon in the first degree and nature of defendant's original felony, an assault with a dangerous weapon in which victim was clearly placed in substantial fear. AS 11.61.200(a)(1), 12.55.155(d)(13). Gilbreath v. State, 1983, 668 P.2d 1354. Sentencing And Punishment 84

20. ---- Probation and related dispositions, sentence and punishment

Conviction in which person receives probation and suspended imposition of sentence is to be set aside at time defendant is discharged from probation, unless State can meet its burden of showing good cause why conviction should not be set aside. AS 11.61.200. Hansen v. State, 1992, 824 P.2d 1384. Sentencing And Punishment 1953

21. ---- Sufficiency, sentence and punishment

Composite sentence of 20 years for 12 offenses in six separate criminal cases was not excessive; defendant could have been sentenced to a term of 20 years imprisonment alone for class A felony burglary, the most serious of the crimes committed by defendant, trial judge found that defendant had not responded to five years worth of prior rehabilitative efforts and that it would be fruitless to place defendant on probation, defendant conceded to two aggravating factors during sentencing, and defendant had been under State supervision since he was 12-years-old. Smith v. State (2008) Alaska App., 187 P.3d 511. Sentencing And Punishment 645

Sentencing defendant, for convictions of two counts of first-degree burglary and one count of first-degree misconduct involving weapons, to concurrent six-year terms with two years suspended for two burglaries and consecutive two-year term for weapons misconduct, was not clearly mistaken. AS 11.46.300(a)(2)(A), 11.61.200(a)(1), 12.55.125(d)(1), (e)(1), 12.55.155(c)(20). Ecklund v. State, 1986, 730 P.2d 161. Burglary 49; Weapons 17(8)

© 2010 Thomson Reuters. No Claim to Orig. US Gov. Works.

Defendant's sentence totaling 53 years of imprisonment for convictions of assault in the first degree, misconduct involving weapons in the first degree, kidnapping, and robbery in the first degree was not excessive where trial judge could have properly given great weight to jury's finding that defendant kidnapped victim, intending to injure him and that defendant intentionally shot victim and then robbed him, defendant had record of five prior felony convictions, defendant had served sentences of greater than one year and had not been deterred by these former sentences, and defendant was on parole at time of the offenses and had just completed lengthy sentence four months before. AS 11.41.200(a)(1, 3), 11.41.300(a)(1), (a)(1)(E), 11.61.200(a). Wortham v. State, 1984, 689 P.2d 1133. Sentencing And Punishment 645

Sentence on charge of misconduct involving weapons in the first degree was illegal, since sentencing judge gave less than presumptive sentence of two years without finding any mitigating factors, and sentence therefore had to be vacated. AS 11.61.200(a)(1), 12.55.125(e)(1), (g), 12.55.165. State v. LaPorte, 1983, 672 P.2d 466. Sentencing And Punishment 995

Sentence of five years with 18 months suspended, imposed on conviction of defendant for misconduct involving weapon in the first degree, with two aggravating factors, was not excessive. AS 11.61.200(a)(1), 12.55.155(c)(10, 13), (d)(13). Gilbreath v. State, 1983, 668 P.2d 1354. Weapons 17(8)

Imposition of four-year sentence for offense of being a felon in possession of a prohibited weapon was not clearly erroneous with regard to accused who had prior convictions for 13 traffic offenses and 11 criminal offenses including burglary, and who had recently committed a larceny in a building. AS 11.55.030, 11.55.040. Deveroux v. State, 1976, 548 P.2d 1296. Weapons 17(8)

22. Review

In determining meaning of terms "switchblade" and "gravity knife" that are included in definition of prohibited weapons which it is felony to possess, Court of Appeals had to look to general usage for meaning of terms, where neither of the terms was defined in statutes. AS 01.10.040, 11.61.200(a)(3), (e)(1)(D). State v. Strange, 1990, 785 P.2d 563. Weapons 4

Trial court's failure to make factual finding as to whether knife seized from defendant was "gravity knife" within meaning of statute making possession of such weapon a felony required remand for further proceedings. AS 11.61.200(a)(3). State v. Weaver, 1987, 736 P.2d 781. Criminal Law 1181.5(3.1)

AS § 11.61.200, AK ST § 11.61.200

Current through the 2009 First Regular Session and First Special Session of the 26th Legislature

Supreme Court of Alaska.
Joseph R. GABRIELLE, Appellant,
v.
STATE of Alaska, DEPARTMENT OF PUBLIC SAFETY, Appellee.
No. S-11490.

May 18, 2007.

Background: Applicant sought judicial review of decision by Department of Public Safety to revoke permit to carry concealed handgun and to deny application to renew permit. The Superior Court, Third Judicial District, Anchorage, Sharon L. Gleason, J., affirmed, and applicant appealed.

Holdings: The Supreme Court held that:
(1) applicant was not eligible for permit to carry concealed weapon under state law, and
(2) federal statute prohibiting possession of firearm by convicted felon did not render applicant whose prior felony conviction was pardoned ineligible for permit to carry concealed weapon.

Affirmed.

OPINION

PER CURIAM.

Joseph R. Gabrielle appeals the Alaska Department of Public Safety's refusal to renew his permit to carry a concealed handgun as well as the department's decision to revoke his existing permit. The department concluded that Gabrielle was ineligible for a permit because he was convicted of a felony in 1983 and Alaska law forbids a felon to carry a concealed handgun. Gabrielle, who received a gubernatorial pardon in 1993, argues that he is entitled to a permit because the plain language of the licensing statute does not prohibit a felon from obtaining a permit, and because he has an affirmative defense to criminal liability. Because the legislature intended to bar felons from obtaining concealed handgun permits, and because it would be futile to issue Gabrielle a permit to carry a concealed handgun that would not give him the right to carry a concealed handgun beyond that which is available to all citizens, we affirm the department's decision.

*814 We have considered each of appellant's arguments and points on appeal. The record fully supports the Memorandum Decision on Appeal entered by Superior Court Judge Sharon L. Gleason, which we adopt as the opinion of this court. It is set forth below.[FN1]

FN1. We have edited the superior court's decision to conform to our technical rules.

APPENDIX

IN THE SUPERIOR COURT FOR THE STATE OF ALASKA

THIRD JUDICIAL DISTRICT AT ANCHORAGE

JOSEPH R. GABRIELLE, Appellant.

vs.

STATE OF ALASKA, DEPARTMENT OF PUBLIC SAFETY, Appellee.

Case No. 3AN-03-07244 CI

MEMORANDUM DECISION ON APPEAL

This is an appeal from a decision of the Department of Public Safety (DPS), which revoked Mr. Gabrielle's concealed handgun permit and refused to renew it. For the reasons set forth below, the decision of the Department is AFFIRMED.

Facts and Proceedings

In January 2003, the Alaska State Troopers Division of DPS revoked Mr. Gabrielle's concealed handgun permit and refused to renew the permit because Mr. Gabrielle had been convicted of two felonies in the early 1980's. The State Troopers took this action even though Mr. Gabrielle had received a pardon from Governor Hickel for the felony convictions in October 1993. Mr. Gabrielle appealed the Troopers' decision to the Commissioner of the Department of Public Safety in February 2003. On March 7, 2003, the Commissioner issued a letter denying that administrative appeal, and indicated that based on DPS's interpretation of the applicable statutes, specifically AS 11.61.200(a)(12) and (g), pardoned felons were precluded from obtaining handgun permits. The Commissioner's letter indicated that it "is a final administrative decision" and that Mr. Gabrielle could "seek judicial review of this decision under AS 44.62.560-44.62.570 within 30 days of receipt of this letter." The record reflects that Mr. Gabrielle received the letter on March 12, 2003.

On March 22, 2003, Mr. Gabrielle submitted a request for reconsideration to the Commissioner of DPS. On April 29, 2003, the Deputy Commissioner summarily denied the request, indicating that "there is no process for administrative 'reconsideration' of denial of an appeal."

On May 5, 2003, Mr. Gabrielle filed this appeal.

1. Is Mr. Gabrielle "eligible to own or possess a handgun under the laws of this state"?

© 2008 Thomson Reuters/West. No Claim to Orig. US Gov. Works.

Alaska Statute 18.65.705 lists several requirements for a person to be qualified to receive and hold a permit to carry a concealed handgun. The parties dispute whether Mr. Gabrielle meets one of those requirements-whether he "is eligible to own or possess a handgun under the laws of this state and under federal law." [FN2] The State argues that Mr. Gabrielle is not eligible under either state or federal law to possess a handgun, and this statutory subsection therefore precludes the issuance of the permit to Mr. Gabrielle.

FN2. AS 18.65.705(2).

[1] The state and federal statutes regulating possession and ownership of handguns do not involve substantial agency expertise. Accordingly, in construing these statutes in this administrative appeal, this court will apply its independent judgment in determining their meaning, adopting the rule that is most persuasive in light of precedent, reason, and policy.[FN3]

FN3. *Alyeska Pipeline Serv. Co. v. DeShong*, 77 P.3d 1227, 1231 (Alaska 2003) (citation omitted).

[2] Turning first to state law, the State argues that pursuant to AS 11.61.200(a)(12), Mr. Gabrielle is precluded from possessing a handgun. This statute provides that a person*815 commits the crime of misconduct involving weapons in the third degree if the person "knowingly possesses a firearm that is concealed on the person after having been convicted of a felony...."

The parties dispute whether AS 11.61.200(g), which establishes an affirmative defense to this statutory provision, operates to allow Mr. Gabrielle to possess a handgun. AS 11.61.200(g) provides:

> It is an affirmative defense to a prosecution under (a)(12) of this section that
>
> (1) either
>
> (A) the defendant convicted of the prior offense on which the action is based received a pardon for that conviction;
>
> (B) the underlying conviction upon which the action is based has been set aside under AS 12.55.085 or as a result of post-conviction proceedings; or
>
> (C) a period of ten years or more has elapsed between the date of the defendant's unconditional discharge on the prior offense ... and the date of the violation of (a)(12) of this section, and the prior conviction ... did not result from a violation of AS 11.41...; *and*
>
> (2) at the time of possession, the defendant was
>
> (A) in the defendant's dwelling or on land owned or leased by the defendant appurtenant to the dwelling; or
>
> (B) actually engaged in lawful hunting, fishing, trapping, or other lawful outdoor activity that necessarily involves the carrying of a weapon for personal protection.

(Emphasis added).

Mr. Gabrielle asserts that as a result of his pardon, he has an affirmative defense to a prosecution under (a)(12), and is thus eligible to possess a concealed handgun under state law. The State argues that the affirmative defense in subsection (g) requires not only that Mr. Gabrielle receive a pardon or qualify under either of the other two components of subsection (g)(1), but that he must also meet the requirements of subsection (g)(2), which limits the places where the concealed handgun may be possessed as a precondition to this affirmative defense. In response to this argument, Mr. Gabrielle asserts that subsection (2) of the statute only modifies subsection (1)(C), and is not an additional requirement for a person who has been pardoned who falls within subsection (1)(A).

The State's reading is consistent with fundamental principles of statutory construction. To be entitled to the affirmative defense under AS 11.61.200(g), a criminal defendant would need to establish at least one of the components of subsection (1) *and* one of the components of subsection (2).

© 2008 Thomson Reuters/West. No Claim to Orig. US Gov. Works.

Alaska Statute 18.65.705 lists several requirements for a person to be qualified to receive and hold a permit to carry a concealed handgun. The parties dispute whether Mr. Gabrielle meets one of those requirements-whether he "is eligible to own or possess a handgun under the laws of this state and under federal law." [FN2] The State argues that Mr. Gabrielle is not eligible under either state or federal law to possess a handgun, and this statutory subsection therefore precludes the issuance of the permit to Mr. Gabrielle.

FN2. AS 18.65.705(2).

[1] The state and federal statutes regulating possession and ownership of handguns do not involve substantial agency expertise. Accordingly, in construing these statutes in this administrative appeal, this court will apply its independent judgment in determining their meaning, adopting the rule that is most persuasive in light of precedent, reason, and policy.[FN3]

FN3. *Alyeska Pipeline Serv. Co. v. DeShong*, 77 P.3d 1227, 1231 (Alaska 2003) (citation omitted).

[2] Turning first to state law, the State argues that pursuant to AS 11.61.200(a)(12), Mr. Gabrielle is precluded from possessing a handgun. This statute provides that a person*815 commits the crime of misconduct involving weapons in the third degree if the person "knowingly possesses a firearm that is concealed on the person after having been convicted of a felony...."

The parties dispute whether AS 11.61.200(g), which establishes an affirmative defense to this statutory provision, operates to allow Mr. Gabrielle to possess a handgun. AS 11.61.200(g) provides:

> It is an affirmative defense to a prosecution under (a)(12) of this section that
>
> (1) either
>
> (A) the defendant convicted of the prior offense on which the action is based received a pardon for that conviction;
>
> (B) the underlying conviction upon which the action is based has been set aside under AS 12.55.085 or as a result of post-conviction proceedings; or
>
> (C) a period of ten years or more has elapsed between the date of the defendant's unconditional discharge on the prior offense ... and the date of the violation of (a)(12) of this section, and the prior conviction ... did not result from a violation of AS 11.41...; *and*
>
> (2) at the time of possession, the defendant was
>
> (A) in the defendant's dwelling or on land owned or leased by the defendant appurtenant to the dwelling; or
>
> (B) actually engaged in lawful hunting, fishing, trapping, or other lawful outdoor activity that necessarily involves the carrying of a weapon for personal protection.

(Emphasis added).

Mr. Gabrielle asserts that as a result of his pardon, he has an affirmative defense to a prosecution under (a)(12), and is thus eligible to possess a concealed handgun under state law. The State argues that the affirmative defense in subsection (g) requires not only that Mr. Gabrielle receive a pardon or qualify under either of the other two components of subsection (g)(1), but that he must also meet the requirements of subsection (g)(2), which limits the places where the concealed handgun may be possessed as a precondition to this affirmative defense. In response to this argument, Mr. Gabrielle asserts that subsection (2) of the statute only modifies subsection (1)(C), and is not an additional requirement for a person who has been pardoned who falls within subsection (1)(A).

The State's reading is consistent with fundamental principles of statutory construction. To be entitled to the affirmative defense under AS 11.61.200(g), a criminal defendant would need to establish at least one of the components of subsection (1) *and* one of the components of subsection (2).

© 2008 Thomson Reuters/West. No Claim to Orig. US Gov. Works.

The State then notes that AS 11.61.220(b)(1) and (2) permits all citizens to carry a concealed weapon in the same two circumstances specified in AS 11.61.200(g)(2).[FN4] Therefore, as the State correctly notes, "the net result of the statutory scheme is that a pardoned felon can only carry a concealed handgun in those situations where an ordinary citizen would be able to carry a concealed handgun without a permit."

FN4. [This reference is to a prior version of AS. 11.61.220. Following both the department's revocation and the superior court's decision, the statute was amended in ways not relevant here.]

Under the statutory scheme, a pardoned felon could be prosecuted under AS 11.61.200(a)(12) for misconduct involving weapons in the third degree if the individual possessed a concealed firearm at any place other than the two statutory exceptions set out in AS 11.61.200(g)(2)(A) and (B). And, unlike a prosecution under AS 11.61.220(a)(1) for fifth degree misconduct, it would not be a valid affirmative defense to a prosecution for violation of AS 11.61.200(a)(12) that the individual was the holder of a valid permit to carry a concealed handgun.[FN5]

FN5. *See* former AS 11.61.220(b)(3).

And yet, as a pardoned felon, Mr. Gabrielle *is* eligible to own or possess a concealed handgun in at least some locations within the state-within his dwelling and while hunting and undertaking other specified outdoor activities. Moreover, as a pardoned felon, he cannot be prosecuted for violation of *816AS 11.61.200(a)(1) for "knowingly possessing a firearm capable of being concealed."[FN6]

FN6. *See*AS 11.61.200(b)(1)(A).

Harmonizing these different statutory provisions is a somewhat tortured process from any perspective. But resolution of these provisions is best determined, in this court's view, by assessing the consequences of issuing a concealed handgun permit to Mr. Gabrielle. Under the statutory scheme, possession of such a permit would constitute an affirmative defense to one of the bases for misconduct involving weapons in the fifth degree. Under AS 11.61.220(a)(1), a person commits the crime of misconduct involving weapons in the fifth degree if the person "knowingly possesses a deadly weapon ... that is concealed on the person." Under AS 11.61.220(b)(3), it is an affirmative defense to the prosecution for that crime that the person was "the holder of a valid permit to carry a concealed handgun." However, possession of the permit would *not* constitute a valid affirmative defense to a prosecution for misconduct involving weapons in the third degree based on a pardoned felon's knowing possession of a concealed firearm under AS 11.61.200(a)(12). And, as the State correctly notes, a pardoned felon has the same affirmative defenses as any other citizen to prosecution for weapons violations if, at the time of possession, the defendant was at his dwelling or actually engaged in lawful hunting, fishing, trapping, or other lawful outdoor activity that necessarily involved the carrying of a weapon for personal protection. In effect, the fifth degree misconduct weapons charge is a lesser-included offense to the third degree charge for pardoned felons, but the affirmative defense of a permit is not available to pardoned felons in a prosecution under the third degree charge.

Accordingly, issuance of a concealed handgun permit to Mr. Gabrielle would serve no lawful purpose since such a permit could not serve as an affirmative defense to a prosecution under AS 11.61.200(a)(12). Therefore, the court finds that Mr. Gabrielle should not be considered "eligible to own or possess a handgun under the laws of this state."[FN7] Since such eligibility is one of the necessary qualifications for issuance of a concealed handgun permit,[FN8] DPS's revocation of the permit and denial of the permit renewal was appropriate. Moreover, such a result is consistent with the legislative history regarding the concealed handgun permitting laws.[FN9]

FN7. AS 18.65.705(2).

FN8. *See*AS 18.65.705.

FN9. See Sen. Green, Sponsor Statement for Senate Bill 141, 20th Leg., 1st Sess. (April 23, 1997) (noting the bill was intended to "make clear that no felon, even a non-violent felon, would ever be able to apply for a concealed carry permit").

2. Mr. Gabrielle is not precluded from owning and

© 2008 Thomson Reuters/West. No Claim to Orig. US Gov. Works.

possessing a handgun under federal law.

[3] The State also asserts that Mr. Gabrielle cannot be issued a concealed carry permit because he is ineligible to own and possess a handgun under federal law. 18 U.S.C. § 922(g)(1) provides in pertinent part:

> It shall be unlawful for any person ... who has been convicted in any court of a crime punishable by imprisonment for a term exceeding one year ... to ship or transport in interstate or foreign commerce, or possess in or affecting commerce, any firearm or ammunition; or to receive any firearm or ammunition which has been shipped or transported in interstate or foreign commerce.

However, 18 U.S.C. § 921 provides in pertinent part:

> Any conviction which has been expunged, or set aside or for which a person *has been pardoned* or has had civil rights restored shall not be considered a conviction for purposes of this chapter, unless such pardon, expungement, or restoration of civil rights expressly provides that the person may not ship, transport, possess, or receive firearms.

(Emphasis added.) Mr. Gabrielle's pardon did not expressly provide that he could not possess firearms. Therefore, federal law is not a bar to Mr. Gabrielle's permit eligibility.

The State asserts that two federal cases have held that this exception does not permit *817 the carrying of handguns if state law forbids it.[FN10] But neither Brown nor Caron were pardoned. Mr. Gabrielle references *United States v. Laskie*,[FN11] which held that Mr. Laskie's prior conviction could not be used as a predicated conviction under 18 U.S.C. § 922(g)(1) because Mr. Laskie had been honorably discharged and that discharge did not include a prohibition of firearm possession. Further, in *United States v. Gallaher*,[FN12] the Ninth Circuit held:

> Under our decisions in *Laskie* and [*United States v.*] *Herron*[45 F.3d 340 (9th Cir. 1995)], a criminal defendant cannot be charged with a federal crime after receiving a certificate restoring his civil rights that contains no express warning that he cannot possess firearms in spite of the restoration of his civil rights or that his state conviction may constitute an element of a crime if he is found in possession of a weapon.

Following this case law, Mr. Gabrielle is not subject to the prohibition under 18 U.S.C. § 922(g)(1) since he received a pardon for his convictions and his pardon did not contain an express warning that he cannot possess firearms.

3. Conclusion

Because this court concludes that Mr. Gabrielle was not "eligible to own or possess a handgun under the laws of this state," the decision of the Department of Public Safety is AFFIRMED.

SUPREME COURT OF THE UNITED STATES

No. 97—6270

GERALD R. CARON, PETITIONER v. UNITED STATES

ON WRIT OF CERTIORARI TO THE UNITED STATES COURT OF APPEALS FOR THE FIRST CIRCUIT

[June 22, 1998]

Justice Kennedy delivered the opinion of the Court.

Under federal law, a person convicted of a crime punishable by more than one year in prison may not possess any firearm. 18 U.S.C. § 922(g)(1). If he has three violent felony convictions and violates the statute, he must receive an enhanced sentence. §924(e). A previous conviction is a predicate for neither the substantive offense nor the sentence enhancement if the offender has had his civil rights restored, "unless such ... restoration of civil rights expressly provides that the person may not ... possess ... firearms." §921(a)(20). This is the so-called "unless clause" we now must interpret. As the ellipses suggest, the statute is more complex, but the phrase as quoted presents the issue for our decision.

The parties, reflecting a similar division among various Courts of Appeals, disagree over the interpretation of the unless clause in the following circumstance. What if the State restoring the offender's rights forbids possession of some firearms, say pistols, but not others, say

rifles? In one sense, he "may not ... possess ... firearms" under the unless clause because the ban on specified weapons is a ban on "firearms." In another sense, he can possess firearms under the unless clause because the state ban is not absolute. Compare, *e.g.*, *United States* v. *Estrella*, 104 F.3d 3, 8 (CA1) (adopting former reading), cert. denied, 521 U.S. ___ (1997) and *United States* v. *Driscoll*, 970 F.2d 1472, 1480–1481 (CA6 1992) (same), cert. denied, 506 U S. 1083 (1993), with *United States* v. *Qualls*, ___ F.3d ___, No. 95–50378, 1998 WL 149393, *2 (CA9, Apr. 2, 1998) (en banc) (intermediate position), and *United States* v. *Shoemaker*, 2 F.3d 53, 55–56 (CA4 1993) (same), cert. denied, 510 U.S. 1047 (1994).

The Government contends the class of criminals who "may not ... possess ... firearms" includes those forbidden to have some guns but not others. On this reading, the restoration of rights is of no effect here, the previous offenses are chargeable, and petitioner's sentence must be enhanced. On appeal, the Government's position prevailed in the Court of Appeals for the First Circuit, and we now affirm its judgment.

I

Petitioner Gerald Caron has an extensive criminal record, including felonies. In Massachusetts state court, he was convicted in 1958 of attempted breaking and entering at night and, in 1959 and 1963, of breaking and entering at night. In California state court, he was convicted in 1970 of assault with intent to commit murder and attempted murder.

In July 1993, petitioner walked into the home of Walter Miller, carrying a semiautomatic rifle. He threatened Miller, brandished the rifle in his face, and pointed it at his wife, his daughters, and his 3-year-old grandson. Police officers disarmed and arrested petitioner.

In September 1993, a federal agent called on petitioner at home to determine if he had other unlawful firearms. Petitioner said he had only flintlock or other antique weapons (not forbidden by law) and owned no conventional firearms. Federal law, the agent told him, forbade his possession of firearms and was not superseded by state law. In December 1993, agents executed a search warrant at petitioner's house, seizing six rifles and shotguns and 6,823 rounds of ammunition.

A federal jury convicted petitioner of four counts of possessing a firearm or ammunition after having been convicted of a serious offense. See 18 U.S.C. § 922(g)(1). The District Court enhanced his sentence because he was at least a three-time violent felon, based on his one California and three Massachusetts convictions. See §924(e). Petitioner claimed the Court should not have counted his Massachusetts convictions because his civil rights had been restored by operation of Massachusetts law. Massachusetts law allowed petitioner to possess rifles or shotguns, as he had the necessary firearm permit and his felony convictions were more than five years old. Mass. Gen. Laws §§140:123, 140:129B, 140:129C (1996). The law forbade him to possess handguns outside his home or business. See §§140:121, 140:131, 269:10.

At first, the District Court rejected the claim that Massachusetts had restored petitioner's civil rights. It held civil rights had to be restored by an offender-specific action rather than by operation of law. The First Circuit disagreed, vacating the sentence and remanding the case. *United States* v. *Caron*, 77 F.3d 1, 2, 6 (1996) (en banc). We denied certiorari. 518 U.S. 1027 (1996). On remand, the District Court, interpreting the unless clause of the federal statute, disregarded the Massachusetts convictions. It ruled Massachusetts law did not forbid petitioner's possession of firearms because he could possess rifles. 941 F. Supp. 238, 251–254 (Mass. 1996). Though Massachusetts restricted petitioner's right to carry a handgun, the District Court considered the restriction irrelevant because his case involved rifles and shotguns. See *ibid.* The First Circuit reversed, counting the convictions because petitioner remained subject to significant firearms restrictions. We granted certiorari. 522 U.S. ___ (1998).

II

A federal statute forbids possession of firearms by those convicted of serious offenses. An abbreviated version of the statute is as follows:

"It shall be unlawful for any person-

"(1) who has been convicted in any court of, a crime punishable by imprisonment for a term exceeding one year;

. . . . .

"to ship or transport in interstate or foreign commerce, or possess in or affecting commerce, any firearm or ammunition; or to receive any firearm or ammunition which has been shipped or transported in interstate or foreign commerce." 18 U.S.C. § 922(g).

Three-time violent felons who violate §922(g) face enhanced sentences of at least 15 years' imprisonment. §924(e)(1). "Violent felony" is defined to include burglary and other crimes creating a serious risk of physical injury. §924(e)(2)(B)(ii). This term includes petitioner's previous offenses discussed above.

Not all violent felony convictions, however, count for purposes of §922(g) or §924(e). Until 1986, federal law alone determined whether a state conviction counted, regardless of whether the State had expunged the conviction. *Dickerson* v. *New Banner Institute, Inc.*, 460 U.S. 103, 119–122 (1983). Congress modified this aspect of *Dickerson* by adopting the following language:

"What constitutes a conviction of such a crime shall be determined in accordance with the law of the jurisdiction in which the proceedings were held. Any conviction which has been expunged, or set aside or for which a person has been pardoned or has had civil rights restored shall not be considered a conviction for purposes of this chapter, unless such pardon, expungement, or restoration of civil rights expressly provides that the person may not ship, transport, possess, or receive firearms." §921(a)(20).

The first sentence and the first clause of the second sentence define convictions, pardons, expungements, and restorations of civil rights by reference to the law of the convicting jurisdiction. See *Beecham* v. *United States*, 511 U.S. 368, 371 (1994).

Aside from the unless clause, the parties agree Massachusetts law has restored petitioner's civil rights. As for the unless clause, state law permits him to possess rifles and shotguns but forbids him to possess handguns outside his home or business. The question presented is whether the handgun restriction activates the unless clause, making the convictions count under federal law.

We note these preliminary points. First, Massachusetts restored petitioner's civil rights by operation of law rather than by pardon or the like. This fact makes no difference. Nothing in the text of §921(a)(20) requires a case-by-case decision to restore civil rights to this particular offender. While the term "pardon" connotes a case-by-case determination, "restoration of civil rights" does not. Massachusetts has chosen a broad rule to govern this situation, and federal law gives effect to its rule. All Courts of Appeals to address the point agree. See *Caron*, 77 F.3d, at 2; *McGrath* v. *United States*, 60 F.3d 1005, 1008 (CA2 1995), cert. denied, 516 U.S. 1121 (1996); *United States* v. *Hall*, 20 F.3d 1066, 1068–1069 (CA10 1994); *United States* v. *Glaser*, 14 F.3d 1213, 1218 (CA7 1994); *United States* v. *Thomas*, 991 F.2d 206, 212–213 (CA5), cert. denied, 510 U.S. 1014 (1993); *United States* v. *Dahms*, 938 F.2d 131, 133–134 (CA9 1991); *United States* v. *Essick*, 935 F.2d 28, 30–31 (CA4 1991); *United States* v. *Cassidy*, 899 F.2d 543, 550, and n. 14 (CA6 1990).

Second, the District Court ruled, and petitioner urges here, that the unless clause allows an offender to possess what state law permits him to possess, and nothing more. Here, petitioner's shotguns and rifles were permitted by state law, so, under their theory, the weapons would not be covered by the unless clause. While we do not dispute the common sense of this approach, the words of the statute do not permit it. The unless clause is activated if a restoration of civil rights "expressly provides that the person may not ... possess ... firearms." 18 U.S.C. § 921(a)(20). Either the restorations forbade possession of "firearms" and the convictions count for all purposes, or they did not and the convictions count not at all. The unless clause looks to the terms of the past restorations alone and does

not refer to the weapons at issue in the present case. So if the Massachusetts convictions count for some purposes, they count for all and bar possession of all guns.

III

The phrase "may not ... possess ... firearms," then, must be interpreted under either of what the parties call the two "all-or-nothing" approaches. Either it applies when the State forbids one or more types of firearms, as the Government contends; or it does not apply if state law permits one or more types of firearms, regardless of the one possessed in the particular case.

Under the Government's approach, a state weapons limitation on an offender activates the uniform federal ban on possessing any firearms at all. This is so even if the guns the offender possessed were ones the State permitted him to have. The State has singled out the offender as more dangerous than law-abiding citizens, and federal law uses this determination to impose its own broader stricture.

Although either reading creates incongruities, petitioner's approach yields results contrary to a likely, and rational, congressional policy. If permission to possess one firearm entailed permission to possess all, then state permission to have a pistol would allow possession of an assault weapon as well. Under this view, if petitioner, in violation of state law, had possessed a handgun, the unless clause would still not apply because he could have possessed a rifle. Not only would this strange result be inconsistent with any conceivable federal policy, but it also would arise often enough to impair the working of the federal statute. Massachusetts, in this case, and some 15 other States choose to restore civil rights while restricting firearm rights in part. The permissive reading would make these partial restrictions a nullity under federal law, indeed in the egregious cases with the most dangerous weapons. Congress cannot have intended this bizarre result.

Under petitioner's all-or-nothing argument, federal law would forbid only a subset of activities already criminal under state law. This limitation would contradict the intent of Congress. In Congress' view, existing state laws "provide less than positive assurance that the person in question no longer poses an unacceptable risk of dangerousness." *Dickerson*, 460 U.S., at 120. Congress meant to keep guns away from all offenders who, the Federal Government feared, might cause harm, even if those persons were not deemed dangerous by States. See *id.*, at 119. If federal law is to provide the missing "positive assurance," it must reach primary conduct not covered by state law. The need for this caution is borne out by petitioner's rifle attack on the Miller family, in which petitioner used a gun permitted by state law. Any other result would reduce federal law to a sentence enhancement for some state-law violations, a result inconsistent with the congressional intent we recognized in *Dickerson*. Permission to possess one gun cannot mean permission to possess all.

Congress responded to our ruling in *Dickerson* by providing that the law of the State of conviction, not federal law, determines the restoration of civil rights as a rule. While state law is the source of law for restorations of other civil rights, however, it does not follow that state law also controls the unless clause. Under the Government's approach, with which we agree, the federal policy still governs the interpretation of the unless clause. We see nothing contradictory in this analysis. Restoration of the right to vote, the right to hold office, and the right to sit on a jury turns on so many complexities and nuances that state law is the most convenient source for definition. As to the possession of weapons, however, the Federal Government has an interest in a single, national, protective policy, broader than required by state law. Petitioner's approach would undermine this protective purpose.

As a final matter, petitioner says his reading is required by the rule of lenity, but his argument is unavailing. The rule of lenity is not invoked by a grammatical possibility. It does not apply if the ambiguous reading relied on is an implausible reading of the congressional purpose. See *United States* v. *Shabani*, 513 U.S. 10, 17 (1994) (requiring use of traditional tools of statutory construction to resolve ambiguities before resorting to the rule of lenity). For the reasons we have explained, petitioner's reading is not plausible enough to satisfy this condition.

2004

In sum, Massachusetts treats petitioner as too dangerous to trust with handguns, though it accords this right to law-abiding citizens. Federal law uses this state finding of dangerousness in forbidding petitioner to have any guns. The judgment of the Court of Appeals is

Dear [redacted]

Several weeks ago, I furnished you some prosed draft legislation involving possession problems under Alaska law for persons who were pardoned or received suspended imposition of sentences for felony charges I have since run our proposed changes by the NRA attorneys and they have some improvements. As a result, I am resending this to you with what we originally sent along with the suggested improvements. This, then, is an updated version of what was sent previously. Please note the highlighted portions of the last paragraph.

The laws regarding possession of firearms in Alaska—laws which were contemplated and enacted by our own state legislature—are being attacked, gutted and rewritten by bureaucrats at the ATF and FBI. Attempts to correct these errors at the federal level have been ignored. It is now incumbent upon the Alaska legislature to take action to defend the rights of Alaskans. In this letter I will explain the source of the problem, illustrate particular grievances against the federal agencies involved, and offer the proper solution—a recrafting of Alaska Statute 11.61.200(g)(2).

Under Alaska law, an individual who has been convicted of a felony can have their right to bear arms restored by any of three occurrences: a pardon, a suspended imposition of sentence, or by the passage of ten years from unconditional discharge. The Alaska legislature, recognizing both the distinctions of life in Alaska and also the profound respect that the majority of Alaskans

have for the right to bear arms, has made the decision to establish a means by which individuals who have previously been convicted of a felony may regain their right to bear arms. The bureaucrats at the ATF and FBI have subverted the goals of the Alaska legislature through the tortured and twisted application of limited U.S. Supreme Court cases to Alaska law. In doing so, these agencies have wrongfully deprived Alaskans of their rights.

In Caron v. U.S., the U.S. Supreme Court held that if a person who has previously been convicted of a felony is prohibited from possessing any type of firearm under state law, then they are prohibited from possessing all firearms under federal law.[1] Prior to this ruling, several states allowed previously convicted felons to regain the right to possess rifles and shotguns but prohibited them from possessing handguns.[2] Alaska law draws no distinctions among the types of firearms which a previously convicted felon may posses.[3] Alaska law allows an individual whose rights have been restored to possess rifles, shotguns and handguns. The only limit contained in our state law is upon the carrying of a concealed firearm by a person whose rights have been restored.[4] While the right of possession is fully restored, an individual who has previously been convicted of a felony may only carry a firearm concealed under limited circumstances - either while he is upon his own land or while he is engaged in outdoor activities that would "necessarily involve the carrying of a weapon for personal protection."[5]

An accurate reading of the Alaska statutes reveals that our state law should not be impacted by the Court's holding in Caron. Alaska law does not limit the "type" of firearms which a previously convicted felon may possess. Furthermore, the single limitation in place for previously convicted felons proscribes only their ability to carry a firearm in a concealed manner, and does not limit their right of possession in any way. The ATF and FBI are, however, interpreting the Alaska statute as a restriction upon possession. Because of this interpretation, Alaskans who have led productive lives, but who have convictions sometimes decades in their past, are being denied their right to own guns, and even being threatened with prosecution for serious Federal offenses.

[2] See U.S. v. Tomlinson, 67 F.3d 508 (4th Cir. 1995); see also U.S. v. Dahms, 938 F.2d 131 (9th Cir. 1991).

[3] See AS 11.61.200(a) and (b).

[4] AS 11.61.200(a)(12) and (g)(2).

[5] Id. The Alaska appellate courts have not established an objective test or enumerated specific criteria to consider when determining which activities Anecessarily involve the carrying of a weapon for personal protection.@

To better understand the plight of the individuals being affected by this law, I will offer some specific examples. In 1970, at the tender age of 19, R.S. made the mistake of getting caught up in recreational drug use. He was arrested for the possession of hallucinogens and convicted of a felony. As a first-time youthful offender, he was granted a suspended imposition of sentence, and given the opportunity to mend his ways. He is now a happily married 56-year-old father. He has worked, hunted and fished his entire life. He only learned recently, when he applied for the purchase of a new firearm, that he is now suddenly prohibited from owning firearms, despite having been granted a suspended imposition of sentence more than 30 years ago.

R.P. was convicted of a felony in 1992. After paying for his crime, he went straight to work helping the public. He became the director of the search and rescue organization for an Alaskan borough. Governor Murkowski granted him a full pardon, expressly for the purpose of allowing him to possess a firearm to help him fulfill his duties. He recently became aware of the fact that—despite the Governor's pardon—federal law prohibits him from possessing firearms.

The Federal law has stripped Alaska of the right to make its own decision on restoring gun rights to ex-felons. The overreaching actions of the bureaucrats at the ATF and FBI have left Alaska with a single option - to amend AS 11.61.200 to remove the disability on carrying a concealed weapon by a person convicted of a felony who has had their rights restored. By removing this disability in Alaska's law, the ATF and FBI will have no basis whatsoever to challenge Alaska's laws, and we can allow ex-felons who have proven their rehabilitation to participate in the full rights that all Alaskans enjoy.

I have included the text of two sample bills that would amend AS 11.61.200, and restore Alaska's policy of allowing rehabilitated ex-felons to own firearms. **I had the proposed legislation reviewed by the NRA and the NRA still sees problems with our proposed solutions. I've enclosed a copy of the memo I received from the NRA outlining such problems and the NRA's suggested proposal. We would urge the Legislature to adopt these changes, as suggested by the NRA,** to assure the continued support of the right of Alaskans to bear arms for the defense of themselves and others.

Sincerely,

Wayne Anthony Ross
Attorney at Law
Director, NRA

Memorandum

Re: Proposed legislation
File: *11.61.220 Project*
Date: 9 September 2008

Several of our clients have experienced problems in either being denied an Alaska Concealed Handgun Permit (CHP) or denied permission to purchase firearms during a "National Instant Criminal Background Check System" (NICS) check.

These problems stem from the language of AS 11.61.200, the Alaska Statute for Misconduct Involving Weapons in the Third Degree. AS 11.61.200(a)(12) bars all people convicted of felonies from carrying a concealed weapon, while AS 11.61.200(g) sets out the exceptions to (a)(12)'s blanket ban.

Because of the limited nature of subsection (g)'s exceptions, the Alaska Department of Public Safety takes the position, upheld by the Alaska Supreme Court in *Gabrielle v. State of Alaska*, that anyone with a felony conviction is ineligible for an Alaska CHP. Additionally, the FBI has taken the position that the limit on a felon's ability to carry a concealed weapon under AS 11.61.200(a)(12) & (g) activate the federal ban on the possession of any firearm under 18 USC §922(g), as intepreted in *Caron v. U.S.*

I shall attempt to describe how the particular provisions of Alaska and Federal law have created these twin problems, and what we can do to attempt to fix them by changing Alaska's law.

The Alaska CHP Issue

The Alaska Department of Public Safety has taken the position that anyone with a prior felony conviction, regardless of the time since the conviction or whether the conviction was set aside or pardoned, does not qualify for an Alaska CHP. They have based this determination on the limited scope of the exceptions in AS 11.61.200(g) to the total ban in 11.61.200(a)(12) of any felon carrying a concealed firearm.

AS 11.61.200(g) only allows a convicted felon to carry a concealed firearm if; (1) the conviction has been pardoned, (2) the conviction has been set aside, or (3) 10 years have elapsed since the conviction, and either (a) the person was in their home or on land immediately adjacent to their home, or (b) was engaged in an outdoor activity that necessitated carrying the weapon for personal protection. Thus, without both some evidence of rehabilitation in (1)-(3), and observing the limited conditions for carrying in (a)-(b), a person convicted of a felony is guilty of

Misconduct Involving Weapons in the Third Degree if they carry a concealed weapon.

The Alaska Department of Public Safety's interpretation of AS 11.61.200 was upheld in *Gabrielle v. State of Alaska.*[1] There, the Supreme Court of Alaska held that a person with a felony record of any description, though not prohibited from applying for an Alaska CHP under the statutes and regulations governing eligibility for the permit, nevertheless was not entitled to an Alaska CHP because of the restrictions found in AS 11.61.200. Because this issue has been appealed to the highest court capable of deciding the issue, the only way to change this outcome is through legislation.

The NICS Check / 18 USC §922(g)(1) Issue

The FBI's National Instant Criminal Background Check System implements a federal requirement that all federally licensed firearms dealers conduct a background check on all prospective firearms purchasers. The background check screens those that have been disqualified from purchasing firearms through operation of federal law. Information is entered into the NICS system by multiple state and federal agencies, but the FBI determines whether the information provided disqualifies an individual from purchasing firearms.

Many of the federal restrictions on possession of firearms are found at 18 U.S.C. §922(g). §922(g)(1) prohibits anyone who has been convicted of a felony from possessing a firearm, however §921(a)(20) contains an exception for those felons who have had their civil rights restored (through operation of law, a pardon, or any similar means). The exception in §921(a)(20) has its own exception, however, prohibiting those convicted of a felony whose civil rights have been restored from possessing a firearm if state law prohibits them from possessing a weapon of any type.

The exception to the exception found in §921(a)(20) was interpreted by the U.S. Supreme Court in *Caron v U.S.*[2] There, the Court faced a person whose civil rights had been restored under Massachusetts law, including the right to possess long guns and handguns. However, he was not allowed to carry handguns outside his home or business, though this right was afforded to non-felons. The Supreme Court found that this restriction, though not strictly a prohibition against of possession of handguns, was enough of a restriction to activate the exception to the exception found in §921(a)(20).

Applying *Caron* to Alaska law, the FBI has taken the position that the restrictions on ex-felons carrying concealed weapons found in AS 11.61.200(a)(12) & (g) are sufficient to activate the exception to the exception found in 18 U.S.C. §921(a)(20). Because of this interpretation, ex-

[1] 158 P.3d 813 (Alaska 2007).

[2] 524 U.S. 308 (1998).

felons in Alaska, even those who have had convictions set aside or pardoned, are barred from possessing any firearm by §922(g)(1).

The FBI's interpretation of the effect of AS 11.61.200 on the application of 18 U.S.C. §922(g)(1) is contrary to the Alaska Supreme Court's interpretation in *Gabrielle* (which was not binding on the FBI), and has been questioned in other federal cases such as the unpublished *U.S. v Flores*.[3] However, given the similarity between Alaska law and the Massachusetts law at question in *Caron* (both allowed possession of all types of weapons, but restricted where and how handguns could be carried), the FBI's interpretation of the law is not clearly incorrect. It would be possible to challenge the FBI in court, but it is far from certain that we could obtain a favorable result.

The Common Factor

The common factor in both of these issues is AS 11.61.200, and the restriction on ex-felons carrying concealed weapons in Alaska, except under certain narrow exceptions. While Alaska has several statutes covering the crime of "Misconduct Involving Weapons," enumerating different degrees of the offense, no other iteration of the statute implicates the carrying or possession of weapons by ex-felons, and so would not impact either eligibility for an Alaska CHP or eligibility under the FBI's NICS system.

Likewise, Alaska's statutes and regulations governing Alaska's CHP program (AS 18.65.700-790, 13 AAC 30.010-900) set out eligibility requirements, including disqualifications if an applicant has had multiple recent misdemeanor offenses or has been ordered by a court to attend a drug- or alcohol-rehabilitation clinic. However, none of the requirements for a CHP touch on the status of the applicant as an ex-felon; pardoned, conviction set aside, or otherwise. Thus, none of these statutes or regulations need to be revised in addressing either the CHP or NICS issue.

Therefore, a legislative fix to this issue need only modify the restrictions on ex-felons carrying or possessing weapons that are found in AS 11.61.200.

The Possible Solutions

Alaska is unusually *laissez-faire* in its approach to gun rights (being one of two states that allows concealed carry of firearms without a permit). However, Alaska also tends towards a tougher stance on crime issues than other states. In attempting to change the policy embodied in AS 11.61.200 towards the gun rights of ex-felons, we will be working in the cross-currents of these two conflicting political priorities.

[3] 118 Fed. Appx. 49 (C.A.6 (Mich.)).

From a strictly political perspective, we could attempt to counter some of the turbulence of a legislative proposal by noting that it is federal law that has forced us to seek a modification of our state law, in order to allow us to pursue our own policy of granting forgiveness to, and restoring the rights of, ex-felons. Federal law has stripped Alaska of its right to make its own determination of how ex-felons are to exercise their gun rights, and leaves us only a simplistic all-or-nothing choice as to whether ex-felons should regain their gun rights.

There are several different methods we could pursue to change AS 11.61.200 so as to allow for ex-felons to apply for an Alaska CHP and to bypass the federal ban on possession found in 18 U.S.C. §922(g)(1). The principal question in changing the restrictions found in AS 11.61.200, however, is how far to expand the re-enfranchisement of gun rights to ex-felons.

First, in order to permit ex-felons to apply for an Alaska CHP, or to possess a weapon under 18 U.S.C. §922(g)(1) and *Caron*, we must remove the restrictions on where an ex-felon may carry a concealed weapon found in AS 11.61.200(g)(2) (I have attached two sample proposed bills with this memo for you to review). This would allow an ex-felon to carry a concealed weapon under the same circumstances that any other citizen would be able to. This would broaden the rights of ex-felons, as it allows them to carry concealed weapons where previously they were not allowed to. However, this is the only means of restoring their right to own weapons at all, given the FBI's interpretation of 18 U.S.C. §922(g)(1).

As for how far to extend re-enfranchisement, currently AS 11.61.200(g) identifies three groups of ex-felons that it restores gun rights to; ex-felons who (1) received a pardon, (2) had their conviction set aside, or (3) had more than 10 years elapse since they finished serving their sentence and who had not committed a violent felony. There is a strong argument that all three groups should be granted full re-enfranchisement, as all three demonstrate some individualized showing of rehabilitation, rather than automatically granting an ex-felon gun rights as soon as they get out of jail.

Conclusion

Alaska has made its own policy decision about how to handle the gun rights of ex-felons, however the Federal Government has stripped Alaska of the right to make our own judgments except for an all-or-nothing decision on the gun rights of ex-felons. That message of Federal interference with Alaska's laws is the message we should emphasize in attempting to amend AS 11.61.200, in order to restore the gun rights of those denied them under the federal government's ban.

State of Alaska
Department of
Public Safety

Sarah Palin, Governor
Walt Monegan, Commissioner

May 13, 2008

[redacted]

By certified mail with return receipt

Dear Mr. [redacted]

I received your e-mail dated April 6, 2008 appealing the denial of your application to obtain an Alaska Concealed Handgun Permit, and have given careful consideration to your appeal. Your appeal is denied. An explanation of the reason for this denial is as follows.

In stating your case, you provide abundant evidence of your good character and legal standing, as well as expressing frustration with an action by this department which you feel unwarranted in your circumstances.

The original decision to deny your application was based upon your convictions for 2nd degree burglary. Sentencing for your convictions was suspended and eventually your convictions were set aside. Burglary in the second degree is a felony. A felony conviction disqualifies an applicant from obtaining an Alaska Concealed Handgun Permit. A felony conviction that has been set aside is still a disqualifier for the issuance of an Alaska Concealed Handgun Permit. State law (13 AAC 30.900(6)) defines a conviction as meaning "...that a person has entered a plea of guilty or no contest to, or has been found guilty by a court or jury of, a criminal offense, **regardless of whether the judgment was after that set aside under AS 12.55.085** or a similar procedure in another jurisdiction, or was the subject of a pardon or other executive clemency..." (emphasis added) Consequently, because of your set aside felony convictions, we are prohibited, by law, from issuing you an Alaska Concealed Handgun Permit.

Office of the Commissioner
5700 E. Tudor Road – Anchorage, AK 99507 – Voice (907) 269-5086 – Fax (907) 269-4543
Juneau Office – Voice (907) 465-4322 – Fax (907) 465-4362

[redacted] [redacted] [redacted] 09:TT 8002/ZT/90

2014

Your message also indicates that you have not been denied a firearm transfer when presenting yourself for a NICS check. Although it is logical to assume that you are eligible to possess a firearm under federal law, an Alaska Concealed handgun permit may only be granted to those who are eligible to possess a handgun under both federal and state law. Alaska law (AS 11.61.200(a)(12)) prohibits you from carrying a concealable firearm. There is no unrestricted right to carry a concealed handgun for a convicted felon under Alaska law.

As a final administrative decision, the appeal to this action is denied.

You are reminded of your right to seek judicial review of this decision under Alaska Statute 44.62.560-570 within 30 days of receipt of this letter.

Sincerely,

John D. Glass
Deputy Commissioner

To whom it my Concern,

My name is [redacted] and I'm writing this letter in regards to the denial of a concealed carry permit that I applied for in the beginning of [redacted] of 2008.I have taken the concealed carry course and paid a considerable amount of money for that course to try and be a law abiding gun owner and carrier, even though in the state of Alaska it is not necessary to do so.

I'm a 36 year old father of [redacted] and a devoted husband,and I'm currently a superintendent for a multi-million dollar [redacted] and work year round at that job.I'm a tax payer,a voter and a yearly supporter of our Alaska Peace Officers and Public Safety Employee Association and a Member of the N.R.A. I'm a law abiding citizen that does not drink or do drugs and haven't even had a traffic violation in over ten years.

I was 17 years old when I found myself on the wrong side of the law for the first and only time in my life.
I was young and dumb as we've all been, and made a bad choice in my young life, I was involved in a non-violent crime in which a felony was charged.I plead no contest because I knew what I did was wrong and there was no sense in fighting it andwaisting the courts time.I did a short jail term and was ordered to payrestitution and do 3 years probation.And because I was so young and payed my restitution in full and did my probation with no problems or violations. I was given a S.I.S (Suspended Imposition of Sentencing) my conviction was Dropped, Dismissed by a federal judge.(I'm not concidreda felon.)So why put me in that category.

I was given a second chance and have made a great life with that second chance, I'm allowed to vote,buy and posses firearms and I"m a avid hunter and sportsman.(Because I'm not concidered a felon that is all possible.)

In the State of Alaska I'm allowed to carry a concealed weapon without a permit,but yet I can't get a concealed carry permit if I want one.It doesn't make sense, why you would not want me on paper to show law enforcement that I would carry a concealed weapon.I have court documents,F.B.I and N.I.C.S background checks to prove my eligibility to own a handgun. I have talked to people at the permits and licensing unit that agree and don't understand it either.

I ask of you to grant me the right and please allow me to get my concealed carry permit and to go on paper as a permit holder and to be able to give law enforcement officers the ability to know that I have a weapon on my person and to be a law abiding and safety trained citizen.

Sincerely,

[redacted]

CERTIFIED RETURN RECEIPT

[redacted]

RE: Alaska Concealed Handgun Permit

Dear Mr. [redacted]

This is to notify you that your application for renewal of your Alaska Concealed Handgun permit is denied. Enclosed please find your cash in the amount of $25.00.

Upon receiving an application for renewal, we are obliged to review the eligibility status of the applicant. In your case we have determined that you are not eligible to hold a concealed handgun permit and that the original issue was done in error.

Effective immediately, your concealed handgun permit is revoked. You must surrender the permit to the nearest peace officer. We recommend that you surrender the permit at the nearest State Trooper office or police department.

We apologize for any inconvenience this may cause you but the law does not allow any other course of action.

Alaska statute 18.65.705 states that, in order to be eligible for a permit, an applicant "must be eligible to own or possess a handgun under the laws of this state and under federal law." We understand that your right to possess a firearm has been returned to you under federal law but Alaska law continues to bar you from unrestricted possession of a firearm. As a result, you may not be issued an Alaska concealed handgun permit.

Presidential pardon!

Under Alaska statute 11.61.200, misconduct involving weapons in the third degree, it is a class C felony for a person to knowingly possess a firearm capable of being concealed on

one's person or to knowingly possess a firearm that is concealed on the person after having been convicted of a felony by a court of this state, a court of the United States, or a court of another state or territory.

The same statute does provide for two affirmative defenses to a prosecution for these offenses but does not make it legal conduct for a convicted felon. In your case, your felony convictions will forever bar you from unrestricted possession of a firearm in Alaska even in light of the fact that the federal government has apparently restored your federal rights.

Presidential Pardon!

The person who initially reviewed your eligibility status mistakenly interpreted the restoration of your federal rights to possess a firearm as restoring your state right as well. It does not. Pardons do not create an exception. Set asides, whether court ordered or statutory, do not create an exception.

Please surrender your permit immediately to insure compliance with Alaska law.

Alaska statute 18.64.740 provides that you may appeal this revocation decision to the commissioner of the Department of Public Safety. The appeal must be received in writing within 30 days after the date of the notice of revocation, and must set out the reasons for the appeal.

Sincerely,

Terrie Satterfield
Permits and Licensing Unit

Terrie,

Here is what I had this e-mailed to me on the Pardon. Here is what I was told:

I meet the requirements of AS 18.65.705
There was "no change" on the renewal application
I meet all Federal and State laws to own and posses a handgun
Pardon granted by President not Governor of State of Alaska
Per AS a "Pardon" is the only way to restore rights lost and remove disabilities under Alaska Law
The ACHP Rules .doc was an information paper created by someone in DPS, not the State Attorney's Office

I have no idea of all the all the AS that apply and have been told that several contradict one another. In several AS it states that when a Pardon is issued it is as though the conviction never occurred. I have had CCW permits in several states (including Alaska).

If this does not clear it up to everyones satisfaction, please forward me the appeal procedures so I may address this to the Commissioner of Public Safety.

Thank you for your patience with me! I really do appreciate all your help!

Respectfully,

[redacted]

back to him. He objected. A replevin petition was filed in the Circuit Court of Phelps County on June 18, 2005, seeking return of his revolver. On October 27, 2005, the Attorney General filed his answer. The state's position was that Mr. Troyer needs a permit to acquire a pistol prior to obtaining custody of the revolver. The court held a hearing on August 21, 2006. The parties subsequently signed on October 5, 2006, a stipulation for dismissal. Mr. Troyer agreed to drop his lawsuit and the police agreed to return the revolver to Mr. Troyer without requiring that he obtain a pistol acquisition permit. The revolver was returned.

MONTANA

Van der Hule, Frank (Montana). The issue is whether Montana's restoration of rights satisfies the requirements of 18 U.S. Code section 921(a)(20), or is it insufficient based on the holding in Caron v. United States, 118 S.Ct. 2007 (1998), which held a person cannot be convicted under federal law of being a felon in possession of a firearm stemming from a state felony conviction if the state law that removed the disability allows the person to possess all firearms (rifle, shotgun, pistol). On the other hand, a person may be convicted under federal law of being a felon in possession of a firearm stemming from a state felony conviction if state law allows such a person to possess only certain firearms, e.g., rifles and shotguns, but not pistols. In this case, Mr. Van de hule was denied permission to purchase a hunting rifle following a background check. A lawsuit was filed. Plaintiff subsequently filed a motion for summary judgment. The government likewise filed a motion for summary judgment. Mr. Van der hule filed his reply on November 6, 2006. Oral argument occurred on March 23, 2007. The court held on September 21, 2007, that Montana's refusal to grant a license to carry a pistol to a person whose civil rights have been restored meant that under Caron he could not possess any firearm under federal law. However, there is a possibility that Montana law grants a licensing official discretion to grant the carrying license to such a person. Therefore, the court certified the question to the Montana Supreme Court.

NEW HAMPSHIRE

Lone Pine Hunter's Club, Inc. (New Hampshire). This is an effort to shut down a shooting range. New Hampshire has a range protection statute. The club has been operating a shooting range on the property since 1966. The case resulted in two reported decisions. Lone Pine Hunters' Club v. Town of Hollis, 149 N.H. 668, 826 A.2d 582 (2003), held that evidence was sufficient to uphold finding that the zoning board of adjustment's finding that, 34 years earlier, it merely decided that hunt club did not need a variance to build a proposed addition, rather than deciding that the club did not need a variance to use the property as a fish and game club. Consequently, under the 1999 zoning ordinance the club's use of the property could be approved as special exception. The club would have to cease and desist unless the club applied for a special exception and presented a site plan to the planning board depicting the nature of the club's entire operation. Residents Defending Their Homes v. Lone Pine Hunters' Club, Inc., 924 A.2d 366 (N.H. 2007), held that the range protection statute only protected a shooting range that was in lawful operation at its inception. The court held the club was not operating lawfully from its inception in 1966. Accordingly, the club must obtain approval from the town, in compliance with the zoning provisions allowing for a special exception as a shooting range.

Cc: Judy, Brian; Conte, Christopher
Subject: FW: Gun Rights for Ex-Felons

Dear Mr. Ross:

Chris Conte, Brian Judy and I have reviewed your memo and draft legislation.

It appears to us that we will need to go a little farther than your drafts to fix the problem entirely.

Draft #2 completely repeals the limitation under which an ex-felon can only possess a gun on his own property, or while engaged in hunting, fishing, etc. This is the exception the Alaska Supreme Court relied on in *Gabrielle*, pointing out that under Alaska law at the time, "a pardoned felon [could] only carry a concealed handgun in those situations where an ordinary citizen would be able to carry a concealed handgun without a permit." 158 P.3d at 815. The flip side is that a pardoned felon couldn't carry a handgun anywhere else. This is similar to *Caron*, where (as Justice Thomas pointed out in his dissent) the ex-felon was only prohibited "from possessing only certain firearms (handguns) in only certain places (outside his home or office)." Getting rid of this limitation for all ex-felons would largely solve the *Caron* problem.

Draft #1 would reorganize AS 11.61.200(g) so that the property and hunting limitations only apply to persons whose rights are restored by operation of law after 10 years. This would help solve the problem for those whose rights are restored by a more particularized method (i.e., a pardon or set aside). Because there would be no limitations on gun possession by those people (and no problem with eligibility for carry permits), they would no longer be prohibited from possessing guns at the federal or state level. However, because the property and hunting limitations would still apply to those whose rights are restored by the passage of time, they would still be federally prohibited under *Caron*.

However, there is a potential problem with both drafts. AS 11.61.200(g) only creates an affirmative defense to prosecution under AS 11.61.200(a)(12). It is not a total exception, and therefore BATFE could argue that all pardons, set-asides, and 10-year restorations still limit ex-felons' right to possess firearms because they create a situation where the ex-felon can be arrested and put on trial before successfully raising his affirmative defense. BATFE would argue that if the Alaska legislature wanted to create a total exception, it knew how to do that; see, e.g., AS 11.61.200(e) (bans on possessing prohibited weapons and on discharging weapons from motor vehicles "do not apply to a peace officer acting within the scope and authority of the officer's employment.)" If any limit exists on gun possession by ex-felons, those felons would still be prohibited from possessing firearms under federal law, and therefore from getting an Alaska carry permit. To avoid this problem, it would be necessary to change the affirmative defense to a full-scale exception.

As an aside on the federal interpretation of these provisions, I would not rely on the Alaska Supreme Court's holding that Gabrielle wasn't prohibited from possessing a gun under federal law because he was pardoned, rather than receiving a restoration of rights. The language in the federal statute is parallel for pardons and restorations, and I think a federal court would likely take a different view than the Alaska Supreme Court did.

Fortunately, drafting a bill that will solve these problems is not difficult. All it needs to do is change the affirmative defense in AS 11.61.200(g) to an exception, and get rid of the property and hunting/fishing limitations. See attached, and please let us know if you have any questions.

Sincerely,

John Frazer

P.S. I am attaching a copy of the Gabrielle case for Brian's reference.

Mr. Judy,

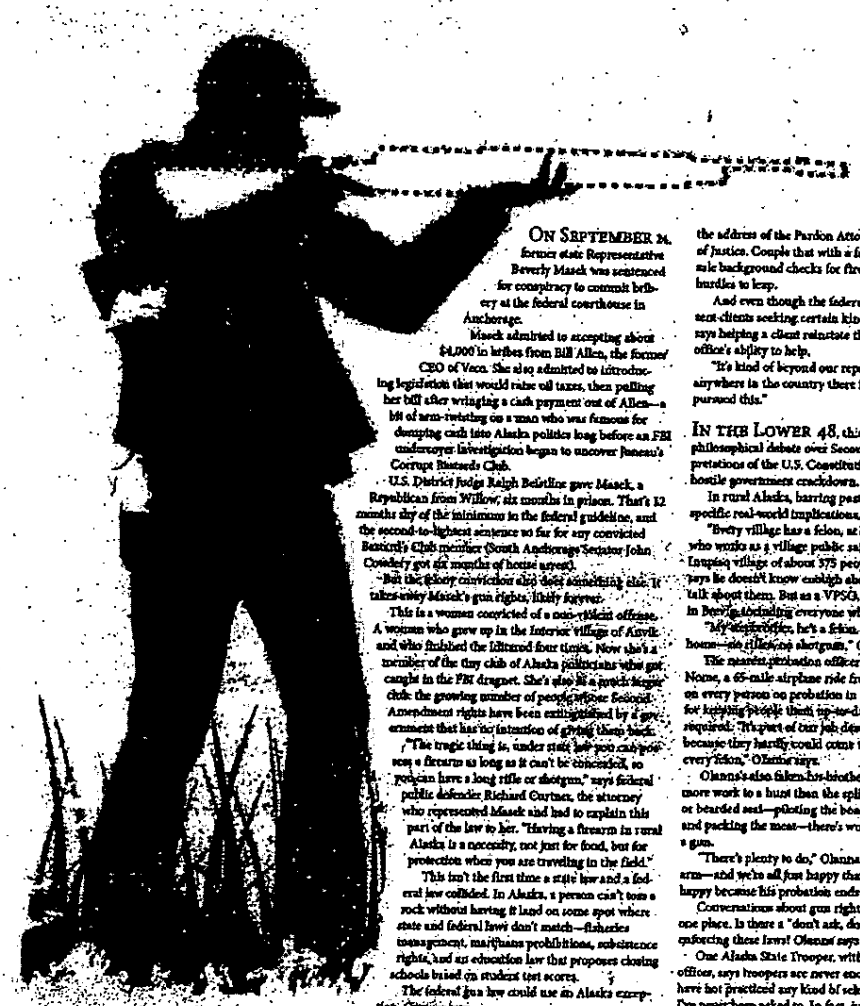
Wayne has asked me to forward the attached documents to you. I made the assumption that you do not have WordPerfect and converted the files into Word, which means they may look a bit different from the documents you have. Please let me know if there is anything else I can do.

Sincerely,

Hidden punishment

In rural Alaska, where gun rights matter most, there's no way for reformed felons—even non-violent ones—to get them back.

Story and photos by Scott Christianse



On September 26, former state Representative Beverly Masek was sentenced for conspiracy to commit bribery at the federal courthouse in Anchorage.

Masek admitted to accepting about $4,000 in bribes from Bill Allen, the former CEO of Veco. She also admitted to introducing legislation that would raise oil taxes, then pulling her bill after wringing a cash payment out of Allen—a bit of arm-twisting on a man who was famous for dumping cash into Alaska politics long before an FBI undercover investigation began to uncover Juneau's Corrupt Bastards Club.

U.S. District Judge Ralph Beistline gave Masek, a Republican from Willow, six months in prison. That's 12 months shy of the minimum in the federal guideline, and the second-to-lightest sentence so far for any convicted Bastard's Club member (South Anchorage Senator John Cowdery got six months of house arrest).

But the felony conviction also does something else. It takes away Masek's gun rights, likely forever.

This is a woman convicted of a non-violent offense. A woman who grew up in the Interior village of Anvik and who finished the fifteenth four times. Now she's a member of the tiny club of Alaska politicians who got caught in the FBI dragnet. She's also in a much larger club: the growing number of people whose Second Amendment rights have been extinguished by a government that has no intention of giving them back.

"The tragic thing is, under state law you can possess a firearm as long as it can't be concealed, so you can have a long rifle or shotgun," says federal public defender Richard Curtner, the attorney who represented Masek and had to explain this part of the law to her. "Having a firearm in rural Alaska is a necessity, not just for food, but for protection when you are traveling in the field."

This isn't the first time a state law and a federal law collided. In Alaska, a person can't toss a rock without having it land on some spot where state and federal laws don't match—fisheries management, marijuana prohibitions, subsistence rights, and an education law that proposes closing schools based on student test scores.

The federal gun law could use an Alaska exemption, Curtner says.

"But people convicted of crimes don't have any lobby. There are all kinds of exceptions written into law for banks and for corporations, but when you've done something wrong in your past, there's no lobbyist for that," he says.

The federal government has a process for reinstating civil rights. In the case of gun rights, a felon who has paid their debt to society or been exonerated by a presidential pardon, can file an application for reinstatement of rights with the Bureau of Alcohol Tobacco Firearms and Explosives. The bureau's agents process the application, performing a background check to make certain the applicant qualifies.

But ATF agents don't do those background checks anymore, and haven't for the last 17 years. That's according to a form letter ATF sends to anyone who inquires about reinstatement of rights. The letter calls Second Amendment rights "federal firearms privileges" and says that ever since 1992, Congress has used the bureau's annual budget appropriation to prohibit the ATF from spending money to "investigate or act upon" any restoration of rights application. The letter also says the convict may seek a presidential pardon, and gives the address of the Pardon Attorney's Office at the U.S. Department of Justice. Couple that with a federal law that created strict point-of-sale background checks for firearms, and you have some tall legal hurdles to leap.

And even though the federal public defenders occasionally represent clients seeking certain kinds of post-conviction relief, Curtner says helping a client reinstate their gun rights would be outside his office's ability to help.

"It's kind of beyond our representation, and I don't know that anywhere in the country there is a case where (a public defender) h pursued this."

In the Lower 48, this issue might stand out as a mostly philosophical debate over Second Amendment rights, modern interpretations of the U.S. Constitution, or the hypothetical threat of a hostile government crackdown.

In rural Alaska, barring past felons from possessing a gun has specific real-world implications, ones that aren't just theoretical.

"Every village has a felon, at least one," says Winfred Olanna, who works as a village public safety officer in Brevig Mission, an Inupiaq village of about 375 people on the Seward Peninsula. Olanna says he doesn't know enough about federal firearms prohibitions to talk about them. But as a VPSO, he's tasked with knowing everyone in Brevig, including everyone who returns from prison.

"My stepbrother, he's a felon, so he can't have any firearms in hi home—no rifles, no shotguns," Olanna says.

The nearest probation officer to Brevig Mission is based in Nome, a 65-mile airplane ride from the village. Olanna checks in on every person on probation in the village. He's even responsible for keeping people there up-to-date with drug testing, when it's required. "It's part of their job description to work with the P.O.s, because they hardly could come to every village twice a month for every felon," Olanna says.

Olanna's also taken his brother-in-law hunting. After all, there's more work to a hunt than the split-second it takes to shoot a caribo or bearded seal—piloting the boat, spotting animals, field dressing and packing the meat—there's work a hunter can do without holdi a gun.

"There's plenty to do," Olanna says. "He just can't carry a firearm—and we're all just happy that he is following his probation. H happy because his probation ends next year."

Conversations about gun rights in rural Alaska inevitably lead one place. Is there a "don't ask, don't tell" policy when it comes to enforcing these laws? Olanna says there isn't in Brevig Mission.

One Alaska State Trooper, with experience as a VPSO oversight officer, says troopers are never encouraged to let anyone slide. "I have not practiced any kind of selective enforcement like that, and I've never been asked to. In fact, just the opposite," says Trooper Terrence Shanigan.

Shanigan, who is 38, grew up in rural Alaska, in the Bristol Bay villages of Pilot Point and Ugashik. He remembers being one of the excited village kids who would run, not walk, to the airstrip when state troopers landed at Ugashik.

"I only knew him as 'trooper' but it was always exciting when he came to town," he says, adding troopers were piled with coffee and skimp. He says a successful state trooper or VPSO must insert themselves into the community, making a point to attend potlatch and community events such as planning meetings.

Troopers are charged with enforcing state laws, and that's wher their focus is. Shanigan's current patrols the Parks Highway from Talkeetna north to Cantwell. When he worked as a VPSO oversigh officer, he was sometimes assigned to villages with only on-and-off VPSO coverage, where he made frequent visits even though he couldn't be there every day. He's trained in wildlife enforcement, s he knows how to prosecute hunting and fishing violations.

Shanigan says it's possible that a trooper might come into conta with a felon on probation—someone the state law doesn't allow to

2023

03/03/2010 WED 18:08 FAX 035/035

Alaska State Trooper Terrence Shanigan: "Someone with that knowledge might say, 'Hey, that trooper let somebody go'—but that's not really what they saw," he says.

armed—without the information on-hand to charge that person with a probation violation.

"When you go down to the river, well, everybody is packing firearms," Shanigan says, but the trooper may not know who on the river has had their rights revoked until he is back at the office, running names through databases. "Now someone with that knowledge might say, 'Hey, that trooper let somebody go'—but that's not really what they saw," he says.

Cops can be suspicious for all kinds of reasons, Shanigan says, but they have to be careful to not trounce on anyone's rights. "You have to make decisions based on what you know to be true," he says.

ALL OF THE COMPETING STATE and federal regulations are further complicated by something called the National Instant Criminal background Check System. NICS, as it's informally known, is the background check licensed gun dealers use to see if federal gun control laws allow a particular customer to purchase a gun. And the NICS system has flagged people who have their rights restored in their home state.

Anchorage attorney and gun rights activist Wayne Anthony Ross has represented people attempting to earn their gun rights back. Ross says the reason NICS flags all Alaska felons is fallout from a U.S. Supreme Court ruling called Caron v. U.S. The case was decided in 1993, and requires that a person have all gun rights restored before the federal government recognizes any of their gun rights. The FBI applies this "all-or-nothing" approach to managing NICS.

Alaska law allows for restoration of most, but not all, of a felon's gun rights. A state felon cannot have a concealed weapon, Ross says, unless the felon wears the weapon on private property. (His interpretation differs slightly from that of Curtner, who tells clients they can't own a "concealable" weapon.)

A state felon is also prohibited from receiving Alaska's concealed weapons permit. The permit itself is an odd-duck. It's no longer required in order to carry a concealed weapon in Alaska. Yet the state continues to offer them because gun rights activists want the right to carry in other states where Alaska has reciprocal agreements.

"The problem is that this Supreme Court case that says if there is any state prohibition on having firearms, no mater how minimal, then you can't own a firearm at all," Ross says. "So a guy who feeds his family through subsistence, and has paid his debt to society, isn't able to do that."

Ross believes changing state law can solve the NICS problem for some felons. He's even drafted model legislation, but it hasn't been introduced despite his efforts to recruit a legislator to sponsor it. "I've got clients who have received pardons. There is one guy who has received a presidential pardon and others are people who have completed their probation. So we have multiple classes of people who are affected by this," he says.

In a letter to state Senator Charlie Huggins, Ross identified two clients by their initials and related their stories. One was convicted in 1970, becoming a felon at age 19 after being caught with hallucinogenic drugs, Ross wrote. "He has worked, hunted and fished his entire life. He only learned recently, when he applied for purchase of a new firearm, tat he is now suddenly prohibited form owning firearms, despite having been granted a suspended imposition of sentence more than 30 years ago."

Ross's second example was a man convicted of felony assault in 1992 and granted a full pardon by Governor Frank Murkowski in 2006. The man was a search and rescue pilot who wanted to carry a weapon while performing his job.

FEDERAL GUN LAWS ARE STRONGEST when applied to felons in possession of weapons, or people accused of using a gun while committing a felony crime. A drug dealer or repeat violent offender can have up to five years added to their sentence if they have a gun in their home. Newsrooms often get press releases from the U.S. Attorneys office touting new indictments and sentences related to such charges.

"We use our discretion when applying the law," Assistant U.S. Attorney Frank Russo says. "Usually we are applying the law at the request of the local community."

The implication is there won't be hordes of FBI or ATF agents flying around Alaska and rappelling into hunting camps to check IDs and round up gun owners. But defense attorneys aren't really satisfied with that.

"A client might know that it's very unlikely that they would be charged (for being a felon in possession)," Curtner says. "But I can't tell my people that, to trust the government not to charge you. I can only advise the client on the law, and the law in this case says you can't own a weapon."

So that's what Curtner told Beverly Masek, and every other nonviolent offender he's represented who was found guilty. "We talked about it, and it's one of those things that's 'what are you going to do?'" Curtner says. "There is just no getting around it." ◆

STATE & LOCAL AFFAIRS DIVISION
BRIAN JUDY, ALASKA STATE LIAISON

March 11, 2010

Background Information
House Bill 408
Restoration of Firearm Rights in Alaska

• Under Alaska State law, a person who has been convicted of a felony is NOT prohibited from possessing a rifle or shotgun. In effect, the person's right to possess such a firearm is restored by operation of law upon the person's release from incarceration.

• Under Alaska State law, a person who has been convicted of a felony IS prohibited from possessing a firearm *capable of being concealed* on one's person (Alaska Stat. § 11.61.200(a)(1)) and, separately, IS prohibited from possessing a firearm that *is actually concealed* on the person (Alaska Stat. § 11.61.200(a)(12)).

• Alaska State law also provides, however, for an "affirmative defense" to a prosecution under either the felon-in-possession-of-a-*concealable*-firearm statute or the felon-in-possession-of-a-*concealed*-firearm statute if the person's civil rights have been restored as follows:

(1) For possession of firearms *capable of being concealed*, if the person has received a pardon or if the conviction has been set aside or if a period of ten years or more has elapsed since the date of the person's unconditional discharge (Alaska Stat. § 11.61.200(b)); and

(2) For possession of firearms that *are actually concealed*, if the person has received a pardon or if the conviction has been set aside or if a period of ten years or more has elapsed since the date of the person's unconditional discharge. The restoration of the right to possess a *concealed* firearm is further limited, however, to the following circumstances: in the person's dwelling, on land owned or leased by the person appurtenant to the dwelling or while the person is actually engaged in lawful hunting, fishing, trapping or other lawful outdoor activity that necessarily involves the carrying of a weapon for personal protection (Alaska Stat. § 11.61.200(g)).

• Further, it is important to note that under Alaska State law, restoration, by operation of law after the passage of time, of the right to possess either a firearm that is *capable of being concealed* or a firearm that *actually is concealed* is limited to persons who were NOT convicted of an offense against the person (Alaska Stat § 11.41).

• It is also important to note that under Alaska State law, the rights to vote (and, as a qualified voter, to hold public office) and to serve on a jury are lost upon conviction of a felony but automatically restored, by operation of law, immediately upon the person's unconditional discharge (Alaska Stat. §§ 09.20.020; 15.05.030(a); 33.30.241).

• Under Federal law, a person who has been convicted of a "crime punishable by imprisonment for a term exceeding one year" may not possess a firearm (18 USC § 922(g)).

• Federal law also provides, however, that "any conviction which has been expunged, or set aside or for which a person has been pardoned or has had civil rights restored shall not be considered a conviction... *UNLESS* such pardon, expungement, or restoration of civil rights expressly provides that the person may not...possess firearms" (18 USC § 921(a)(20)).

• In the case of Caron v. United States (524 U.S. 308 (1998)), the Supreme Court of the United States:

(1) Found that "nothing in the text of §921(a)(20) requires a case-by-case decision to restore civil rights" so restoration of such rights by operation of law is sufficient; and

(2) Interpreted the aforementioned "unless clause" found in 18 USC § 921 (a)(20). The Court held that an "all-or-nothing" test must be applied and that "a state weapons 'limitation' activates the uniform ban on possessing any firearm at all." In other words, a state must completely restore "all" of a person's rights and treat the person whose rights have been restored in the same manner that other law-abiding citizens are treated. If a person does not have "all" rights restored by the state then, for the purpose of federal law, the person has no rights. Subsequent cases have held that complete restoration of "all" rights includes, not only ALL firearm rights, but also the rights to vote, hold public office and serve on a jury.

• Alaska State law contains two "limitations" on persons who have had their right to possess firearms otherwise restored that are not imposed on persons who have never lost their rights and which, therefore, activate the federal ban on possessing any firearm at all:

(1) A person whose right to possess firearms has been otherwise restored can not possess a firearm concealed outside their dwelling, property or while engaged in a lawful outdoor activity (Alaska Stat. § 11.61.200(g)(2); and

(2) A person whose right to possess firearms has been otherwise restored would be in the position of having to raise an affirmative defense to a charge of either possessing a concealable firearm (Alaska Stat. § 11.61.200(b)) or carrying a firearm concealed (Alaska Stat. § 11.61.200(g)), while a person who never lost his or her rights cannot be charged with such a crime whatsoever.

• Unless the Alaska State Legislature amends existing law to modify these two limitations, the existing policy of the State of Alaska to allow for the restoration of firearm rights cannot be implemented without impacted persons being subject to felony prosecution under Federal law.

STATE & LOCAL AFFAIRS DIVISION
BRIAN JUDY, ALASKA STATE LIAISON

March 11, 2010

TO: Representative Bill Stoltze
CC: Members of the House Judiciary Committee
FROM: Brian Judy, NRA-ILA Alaska State Liaison
RE: House Bill 408 – **SUPPORT**

I am writing on behalf of the National Rifle Association – Institute for Legislative Action to express **support for House Bill 408.** HB 408 would facilitate the implementation of the current Alaska state law that allows persons who have long-past felony convictions but whose rights have been restored to possess firearms in the state. Although the legislative fix necessary to solve this problem is simple, the reason it is necessary is quite a technical and complicated interaction between state law, federal law and a U.S. Supreme Court decision (attached is a detailed summary of the various issues at conflict).

While many advocates for the restoration of voting rights for persons with past felony convictions talk about dignity, with respect to the restoration of firearm rights there is not only the issue of dignity but of life and death. The nature of life in Alaska, especially in the rural areas, makes possession of firearms a necessity not only for food but for protection in the field.

Current Alaska State law provides for the restoration of roughly 95% of firearms rights to those former offenders who qualify. They can possess rifles and shotguns, they can possess handguns, they can carry handguns openly and they can carry handguns concealed in their home, on their property and while engaged in lawful outdoor activities out in public. The only thing they cannot do under state law is put on a coat and cover a handgun when they are somewhere other than those places previously listed.

The problem is that, based on the Court decision discussed in my attachment, because the State of Alaska does not restore 100% of an affected person's firearm rights, under federal law the person is considered to have NO rights whatsoever! In a Legal Services Memorandum dated April 1, 2009, Legislative Counsel Gerald Luckhaupt described the Court's conclusion as "obviously incorrect." While the NRA would completely agree with Mr. Luckhaupt, only three Supreme Court Justices shared such a view and the decision was 6-3 in this case.

As discussed in my attachment, there are two changes that must be made to State law: first, the restriction on concealed carry must be repealed and second, two affirmative defenses found in AS § 11.61.200 must be changed to exceptions. With these two changes, Alaska State law would treat persons who have had their rights restored exactly the same as those who have never lost their rights and the problem would be solved.

It is the hope of the National Rifle Association that legislators can get beyond the perceived stigma of "giving firearms to felons" and realize the legitimacy of allowing persons, who have long ago paid their debt to society, to attain the restoration of their rights already provided by the State of Alaska but extinguished by an "obviously incorrect" U.S. Supreme Court decision.

Please support House Bill 408.

Helen Phillips

From: pat@barrow.com

Thank you for your work on HB408. I stand in full support. I have earned a full unconditional pardon from Gov. Murkowski with specific firearm rights restoration listed on it. However even with this rare legal instrument of restoration with the state seal embossed and signed by the Governor I am not able to posses firearms. I can find no other state that has such a dilemma. Please continue to exercise your just wisdom to right 11.61.200. My life and those I serve depends on it.

Respectfully yours,

Pat Patterson

Governor Sean Parnell
STATE OF ALASKA

February 25, 2010

The Honorable Mike Chenault
Speaker of the House
Alaska State Legislature
State Capitol, Room 208
Juneau, AK 99801-1182

Dear Speaker Chenault,

Under the authority of Art. III, Sec. 18 of the Alaska Constitution, I am transmitting a bill relating to loan participations and development finance projects of the Alaska Industrial Development and Export Authority. The bill will also make changes to the loan program financed by the rural development initiative fund.

This bill is designed to modernize lending practices of the Alaska Industrial Development and Export Authority (Authority) so that Authority loan programs can benefit the economy, and the Authority can more easily be a participant in large scale economic development projects with other partners. First, the bill will change how the Authority determines minimum interest rates for certain loan participations. Second, the bill will permit the Authority to pay incentive rate rebates on certain loan participations that satisfy economic development criteria, such as job creation or investment in rural areas. Third, the bill will clarify that the Authority has statutory authority to finance, own, and operate a percentage of a development finance project. Finally, the bill will permit the rural development initiative fund to finance more than one loan to one or more borrowers, and with larger cumulative loan amounts.

Section 1 of this bill will amend the method by which the Authority determines the minimum interest rate that may be charged on loan participations the Authority finances with Authority assets, rather than with bond proceeds. AS 44.88.159(e) currently requires the Authority to establish the minimum interest rate, in part, by the Authority estimating the bond interest rate the Authority would have obtained had the Authority issued bonds to finance the loan participation. The proposed amendments would enable the Authority to establish minimum interest rates based upon the greater of either (1) the rates achieved by a type or category of financial security in a published, nationally recognized market index; or (2) the five year rate of return the Authority achieved on investment funds of the Authority. The Authority believes it appropriate to move to a market-based methodology for determining interest rates. The Authority has not issued bonds to finance loan participations in more than 10 years. Thus, the accuracy of how the Authority estimates bond based rates has not been tested against actual rates from bonds issued to finance loan participations. Further, the current bond based methodology can result in unusually high interest rates when bond

markets fail to function efficiently, such as happened during recent national and global economic market distresses.

Section 2 of the bill will permit the Authority to establish in regulations a new program to pay certain loan participation borrowers incentive rate rebates. Under the new program, the Authority will be able to rebate up to one percent of interest charged on a loan participation to a borrower that creates jobs, promotes rural development, or fosters other economic development criteria. An incentive rate rebate may reduce the interest rate to a rate below what would otherwise be the statutory minimum rate. The Authority may not commit to pay incentive rate rebates on a loan participation for more than five years, and the balance of loans subject to rebates would be limited to no more than five percent of the outstanding balance of all loan participations of the Authority. Finally, the Authority may establish a separate account for the incentive rate rebate program. The separate account will enable the Authority to more easily account for, and pay, rebates owed to loan participation borrowers.

Section 3 of the bill will clarify that the Authority may finance, own, and operate a percentage of a development finance project, and may provide for operation of a project by agreement with other owners. Existing statutes of the Authority do not clearly establish that the Authority may finance and own an indivisible percentage of a project. Clarifying this power will enable the Authority to jointly finance development finance projects with partners and other lenders or financiers more easily, and better promote economic development and spread project risks.

Finally, Sections 4 and 5 of the bill will revise the rural development initiative fund owned by the Alaska Industrial Development and Export Authority and administered by the Alaska Division of Investments. The purpose of the revisions is to foster the utilization of the program in the state by increasing the amount that may be borrowed from the fund. The sections will remove the restriction that a borrower may only have one loan but limits a borrower's participation in the loan program to an allowable dollar amount. The sections will reduce the minimum interest rate that may be charged from six percent to four percent.

I urge your prompt and favorable action on this measure.

Sincerely,

Sean Parnell
Governor

Enclosure

House Bill 410

An Act relating to loan participations and development finance projects of the Alaska Industrial Development and Export Authority; and relating to loans from the rural development initiative fund.

Sectional Analysis

Section	Analysis
1	AS 44.88.159(e) is amended to change the method by which AIDEA determines the minimum interest rate to be charged on loan participations that AIDEA finances with AIDEA assets rather than bond proceeds. Current method requires AIDEA to establish a minimum by estimating the true interest cost if AIDEA were to use bond proceeds. The proposed method would allow the minimum to be based on the greater of either the rates achieved by a type or category of financial security in a published nationally recognized market index or the 5-year rate of return on AIDEA's investments.
2	AS 44.88.159 is amended by adding a new subsection that allows AIDEA to establish in regulation a new program to provide incentive rate rebates to certain loan participations that create jobs, promote rural development or foster other economic development criteria. • Rate rebates are limited to no more than 1% of the interest rate charged to AIDEA's portion of the loan participation. • The balance of loans subject to rebates would be limited to no more than 5% of the outstanding balance of all loan participations. • The authority may not commit to pay an incentive rebate for more than 5 years. • Allows AIDEA to establish a separate account for this program.
3	AS 44.88.172(a) is amended to clarify that AIDEA can own or operate a percentage of a project – not the entire project
4	AS 44.88.610(a) is amended to allow borrowers to have multiple Rural Development Revolving Loan Fund loans and increases the cumulative amount a person may borrow from $100,000 to $150,000 and increases the cumulative amount two or more persons may borrow from $200,000 to $300,000.
5	AS 44.88.610(b) is amended by reducing the RDIF minimum interest rate from 6% to 4%.

Representative Kurt Olson, Chairman
House Labor & Commerce Committee
State Capitol, Room 24
Juneau, Alaska 99801—1182

Re: House Bill 410

Representative Olson:

On behalf of the Alaska Bankers Association, I wish to express our support for enactment of House Bill 410.

Enactment of House Bill 410 will facilitate AIDEA lending transactions and thereby work to the benefit of all of our members who participate in loan transactions with AIDEA.

Sincerely yours,

David A. Lawer
President

ANALYSIS: *(Attach a separate page if necessary)*

This bill proposes to 1) amend the method by which AIDEA determines minimum interest rates for certain loan participations; 2) provide AIDEA the ability to provide incentive rate rebates for loan participations that meet certain economic development criteria; 3) clarify AIDEA to ability finance, own and operate a percentage of a development finance project. The amount of potential AIDEA payments for the proposed incentive rate rebates is indeterminate until the program criteria are established and demand for the program is evaluated.

Approved by: Emil Notti, Commissioner — Date 1/6/2010
Department of Commerce, Community and Economic Development

FISCAL NOTE #1

Bill Number: HB 410

The bill limits the total amount of loans subject to incentive rate rebates to 5% of the total of the amount of the proposed loan participation which would be subject to rebate plus the combined outstanding balance of all loan participations of the Authority. As of 6/30/09, AIDEA's outstanding balance of loan participations was $340,346,000; 5% = $17,017,300.

The bill also makes changes to the Rural Development Initiative Fund (RDIF). The RDIF provides long term financing to small businesses located in communities of 5,000 population or less if not connected by road or rail to Anchorage or Fairbanks or communities of 2,000 population or less if connected by road or rail to Anchorage or Fairbanks. This legislation would increase the amount that could be borrowed from the fund and it would remove the restriction that a borrower may only have one loan. It would also reduce the interest rate that may be charged.

To date there is $4,137,900 outstanding with $1,411,400 available to lend in the RDIF. There will be no change in operating budget expenditures to facilitate the proposed changes.

The adoption of regulations will not require additonal operating funds.

ANALYSIS: *(Attach a separate page if necessary)*

This new program would provide short term, low interest loans to Alaska small businesses to be used for typical business purposes such as working capital, purchasing machinery, equipment, and inventory, and leasehold improvements. The initial capitalization would be $3.577 million from the AIDEA dividend. The fund would be set up as a revolving fund so that all earnings and loan repayments would be retained by the fund for future loans. All operating expenses would also be paid from earnings of the fund. Projected operating expenses are for personal services for a Loan/Collection Officer, two trips to rural Alaska per year, initial set-up expenses (supplies and equipment) plus projected supplies and equipment use through 2016.

Increases to revenue have been projected through FY2016. We estimate that approximately 75 loans will be made in the first year and that 100 loans would be made in the second year for a total of $3.5 million in loan demand. Repayments to the fund and earnings retained by the fund would provide cash flow to make approximately 25 additional loans each year thereafter.

(Continued on page two.)

Prepared by: Greg Winegar, Director — Phone 465-2510
Division: Division of Investments — Date/Time 2/26/10 10:59 AM
Approved by: Emil Notti, Commissioner — Date 2/26/2010
Department of Commerce, Community, and Economic Development

ANALYSIS CONTINUATION

Earnings retained by the Micro Revolving Loan Fund would be comprised of interest repayments, fees collected and earnings on the daily cash balances.

The program would promote economic development through job creation by helping new and existing Alaska small businesses succeed. This is consistent with the departments' mission and the benefits to the state would be documented through job creation performance measures.

Capitalization of the Alaska Micro Loan Program is contingent upon the passage of legislation to sell the Alaska Energy Authority's Power Project Fund (AS 42.45.010) loan portfolio. The sale of the loan portfolio is expected to provide approximately $21 million to the power project fund to be used for future loans. If the legislation passes, the capital appropriation in section 8 of the FY 2011 capital bill (page 47, line 1-3) that capitalizes the Power Project Fund with AIDEA dividend will be reduced by $3.577 million.

Projected operating expenses are for personal services for a Loan/Collection Officer, two trips to rural Alaska per year, initial set-up expenses (supplies and equipment) plus projected supplies and equipment use through 2016.

Increases to revenue have been projected through FY2016. We estimate that approximately 75 loans will be made in the first year and that 100 loans would be made in the second year for a total of $3.5 million in loan demand. Repayments to the fund and earnings retained by the fund would provide cash flow to make approximately 25 additional loans each year thereafter.

(Continued on page two.)

Prepared by: Greg Winegar, Director — Phone 465-2510
Division: Division of Investments — Date/Time 2/26/10 10:59 AM
Approved by: Emil Notti, Commissioner — Date 2/26/2010
Department of Commerce, Community, and Economic Development

(Revised 9/10/2008 OMB)

ANALYSIS CONTINUATION

Earnings retained by the Micro Revolving Loan Fund would be comprised of interest repayments, fees collected and earnings on the daily cash balances.

The program would promote economic development through job creation by helping new and existing Alaska small businesses succeed. This is consistent with the departments' mission and the benefits to the state would be documented through job creation performance measures.

Capitalization of the Alaska Micro Loan Program is contingent upon the passage of legislation to sell the Alaska Energy Authority's Power Project Fund (AS 42.45.010) loan portfolio. The sale of the loan portfolio is expected to provide approximately $21 million to the power project fund to be used for future loans. If the legislation passes, the capital appropriation in section 8 of the FY 2011 capital bill (page 47, line 1-3) that capitalizes the Power Project Fund with AIDEA dividend will be reduced by $3.577 million.

HOUSE BILL NO. 412

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SIXTH LEGISLATURE - SECOND SESSION

BY THE HOUSE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

Introduced: 2/26/10
Referred: Labor and Commerce, Finance

A BILL

FOR AN ACT ENTITLED

"An Act establishing the Alaska microloan revolving fund; making loans for commercial purposes from the fund; and relating to the fund and loans; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

Amend 4 delete

*** Section 1.** The uncodified law of the State of Alaska is modified by adding a new section to read:

FINDINGS. The legislature finds and declares that

(1) it has become essential for the ongoing economic health and well-being of the state and its citizens and families for the state to help small businesses access critically needed capital; and

(2) economic growth and self-employment in the small business sector is hampered due to lack of available capital resources.

*** Sec. 2.** AS 44.33 is amended by adding new sections to read:

Article 15. Alaska Microloan Revolving Fund.

Sec. 44.33.950. Alaska microloan revolving fund. (a) There is created within the Department of Commerce, Community, and Economic Development a revolving loan fund to be known as the Alaska microloan revolving fund to carry out the purposes of AS 44.33.950 - 44.33.990.

(b) The Alaska microloan revolving fund consists of the following:

(1) money appropriated to, transferred to, or received by gift, devise, bequest, or donation to the fund;

(2) principal and interest payments or other income earned on loans or investments of the fund;

(3) money chargeable to principal or interest that is collected through liquidation by foreclosure or other process on loans made under AS 44.33.950 - 44.33.990.

(c) Money in the fund may be used by the legislature to make appropriations for costs of administering AS 44.33.950 - 44.33.990.

Sec. 44.33.955. Powers and duties of the department. The department may

(1) make loans to eligible applicants under AS 44.33.960 to be used for working capital, equipment, construction, or other commercial purposes by a business located in the state;

(2) receive, take, hold, and administer any appropriation, gift, grant, bequest, devise, or donation of money for the fund;

(3) establish amortization plans for repayment of loans, including extensions of the terms of loans;

(4) allow an assumption of a loan if

(A) the applicant meets the requirements established under this section; and

(B) approval of the assumption would be consistent with the purposes of this section;

(5) establish the rate of interest for loans consistent with law;

(6) charge and collect fees for services provided under AS 44.33.950 - 44.33.990; and

(7) adopt regulations, under AS 44.62, necessary to carry out the

provisions of AS 44.33.950 - 44.33.990, including regulations to establish reasonable fees for services provided; and

(8) designate agents and delegate powers as necessary to the agents.

Sec. 44.33.960. Eligibility. (a) For an applicant to be eligible for a loan under AS 44.33.950 - 44.33.990, the applicant must

(1) be a resident of the state as determined under (b) of this section; and

(2) provide a reasonable amount of money from other nonstate sources for use on any project or enterprise for which money from a loan will be used.

(b) To meet the residency requirements of (a) of this section, the applicant

(1) must physically reside in this state and maintain a domicile in this state during the 12 consecutive months before the date of application for the program; and

(2) may not have

(A) declared or established residency in another state; or

(B) received residency or a benefit based on residency from another state. Amendment 2 add in the previous 12 months,

Sec. 44.33.965. Limitations on loans. (a) The department may use money from the Alaska microloan revolving fund to make loans of up to $35,000 to a person, or loans of up to $70,000 to two or more persons.

(b) A loan established under AS 44.33.950 - 44.33.990

(1) may not exceed a term of six years, except for extensions authorized under AS 44.33.955 or regulations adopted under AS 44.33.955;

(2) may not bear interest exceeding the prime rate, as defined in AS 44.88.599, plus one percentage point [~~but interest may not be less than six percent per year~~ delete #3 ~~and not more than eight percent per year;~~] delete #1 Amendment 1 Adopted Amend 3 failed

(3) must be secured by collateral acceptable to the commissioner; and

(4) may not be made to a person who has a past due child support obligation established by court order or by the child support services agency under AS 25.27.160 - 25.27.220 at the time of application.

Sec. 44.33.970. Special account established. (a) There is established as a

special account within the Alaska microloan revolving fund the foreclosure expense account.

(b) The department may expend money credited to the foreclosure expense account when necessary to protect the state's security interest in collateral on loans granted under AS 44.33.965 or to defray expenses incurred during foreclosure proceedings after a default by an obligor.

Sec. 44.33.975. Disposal of property acquired by default or foreclosure. The department shall dispose of property acquired through default or foreclosure of a loan made under AS 44.33.950 - 44.33.990. Disposal must be made in a manner that serves the best interest of the state, and may include the amortization of payments over a period of years.

Sec. 44.33.990. Definitions. In AS 44.33.950 - 44.33.990, unless the context otherwise requires,

(1) "commissioner" means the commissioner of commerce, community, and economic development;

(2) "department" means the Department of Commerce, Community, and Economic Development.

*** Sec. 3.** The uncodified law of the State if Alaska is amended by adding a new section to read:

TRANSITION: REGULATIONS. The Department of Commerce, Community, and Economic Development may immediately proceed to adopt regulations under AS 44.62 (Administrative Procedure Act) necessary to implement the changes made in sec. 2 of this Act. The regulations take effect under AS 44.62 but not before July 1, 2010.

*** Sec. 4.** Section 3 of this Act takes effect immediately under AS 01.10.070(c).

*** Sec. 5.** Except as provided in sec. 4 of this Act, this Act takes effect July 1, 2010.

MEMORANDUM April 12, 2010

SUBJECT: CSHB 412(FIN) establishing the Alaska microloan revolving fund (Work Order No. 26-GH2896\E)

TO: Representative Mike Hawker
Representative Bill Stoltze
Co-Chairs of the House Finance Committee
Attn: Christine Marie

FROM: Theresa Bannister
Legislative Counsel

This memo accompanies the bill described above.

1. Dedicated fund issue. In sec. 44.33.950(b)(1) and (2) of the bill, there appears to be a dedicated fund issue because the money described as being part of the fund by those paragraphs is not described as being appropriated to the fund. That carries through to the spending direction in sec. 44.33.970(b) because the money to be spent under that subsection may consist of money that has not been appropriated to the fund. To remove these issues, the phrase, "and appropriated to the fund," could be added at the end of sec. 44.33.950(b)(1) and at the end of sec. 44.33.950(b)(2).

2. Suggested changes. In sec. 44.33.960(b)(1), it appears that "program" should be changed to "loan." In sec. 44.33.955(4)(B), do you want "section" changed to "AS 44.33.950 - 44.33.990"?

3. Technical changes made. Several technical changes were made and can be identified on request.

Since this has passed out of your committee, you may want to pass this memo along to the next committee of referral.

If I may be of further assistance, please advise.

Wrangell, AK 99929 FAX (907)-874-3952

March 30, 2010

Representative Hawker, Co-Chair House Finance Committee
Representative Stoltze, Co-Chair House Finance Committee

Re: HB412 - Hearing March 30, 2010 at 1:30pm.

Dear Representative Hawker and Representative Stoltze and Finance Committee,

I am writing to offer support of HB412 and SB302 introduced by Governor Parnell. Small businesses statewide have been dramatically impacted by the recession, but businesses in Wrangell were impacted even before that, due to the loss of so many jobs directly or indirectly related to the disappearing timber industry.

Wrangell survives by the success of our small businesses. Many individuals in Wrangell have even turned hobbies into full time job opportunities, or into successful supplemental incomes. However, because of our declining population and the seasonal ups and downs of fishing, tourism and timber, Wrangell is considered a "high risk" community from a lending standpoint. The proposed Micro-Lending program will enable small business to access needed credit for seasonal operations, expand operations when the opportunities present themselves, and provide necessary upgrades or retooling to keep up with the rapidly changing technologies needed to be competitive.

Wrangell Economic Development Committee fully supports the passage of this legislation as a critical step to grow our communities and diversify the economy of Alaska.

Sincerely,

Carol Rushmore
Economic Development Director

Governor Sean Parnell
STATE OF ALASKA

February 25, 2010

The Honorable Mike Chenault
Speaker of the House
Alaska State Legislature
State Capitol, Room 208
Juneau, AK 99801-1182

Dear Speaker Chenault,

Under the authority of Art. III, Sec. 18 of the Alaska Constitution, I am transmitting a bill establishing the Alaska micro loan revolving fund; making loans for commercial purposes from the fund; and relating to the fund and loans.

In an effort to promote economic development in the state by helping small businesses access critically needed capital, a new loan program has been developed that is modeled after a program currently operated through the federal Small Business Administration (SBA). The SBA program, known as the micro loan program, provides small, short-term loans to small businesses. This federal program, however, is not currently available in the state because an intermediary lender is required and to date no lenders meeting the SBA's qualifications have been identified in the state.

This bill will create the Alaska micro loan revolving program in the Department of Commerce, Community, and Economic Development. The program will be set up as a revolving loan fund so that all earnings and loan payments will be retained by the fund for future loans. All operating expenses will also be paid from earnings of the fund.

An applicant for the loan must be a resident of the state of Alaska and provide a reasonable amount of money from other non-state sources for use on projects for which money from a loan will be used. Loans under this program may not exceed $35,000 to one person, or $70,000 to two or more persons. A loan under the program bears interest at the rate of prime plus one percentage point, but may not be less than six percent per year and not more than eight percent per year. The maximum term for a loan under this program will be six years; however, extensions may be granted. Finally, a loan must be secured by collateral acceptable to the commissioner of the Department of Commerce, Community, and Economic Development.

I urge your prompt and favorable action on this measure.

Sincerely,

Sean Parnell
Governor

Enclosure

Sectional Analysis of HB 412

Prepared by Greg Winegar
Alaska Division of Investments
(907) 465-2510

Alaska Microloan Revolving Fund

Summary: This bill creates the Alaska Microloan Revolving Fund (Fund) within the Department of Commerce, Community, and Economic Development (department). The purpose of the Fund is to help promote economic development in the state by helping small businesses access critically needed capital. The Fund will be set up as a revolving loan fund so that all earnings and loan payments would be retained by the Fund for future loans. All operating expenses would also be paid from earnings of the Fund.

Section 1 modifies the uncodified law of the State of Alaska to describe findings related to the Fund.

Section 2 creates a new article in AS 44.33 titled "Alaska Microloan Revolving Fund".

AS 44.33.950 establishes the Fund as a revolving fund and describes the various components of the Fund. It also authorizes the legislature to make appropriations from the Fund to pay for administrative costs.

AS 44.33.955 describes the powers and duties of the department. It allows the department to make loans for working capital, equipment, construction or other commercial purposes. Additionally, it allows the department to receive money for the Fund; establish amortization plans for repayment of loans, including extensions of the terms of loans; allow assumptions; establish interest rates, charge and collect fees; adopt regulations and designate agents.

AS 44.33.960 establishes the eligibility requirements for applicants. The applicant must be a resident of the State and provide a reasonable amount of money from other nonstate sources for use on the project for which loan funds will be used. This section also stipulates the residency requirements. It states that an applicant must physically reside in the state and maintain a domicile in the state during the twelve consecutive months before the date of application. It goes on to state that an applicant may not have declared residency in another state or to have received a benefit based on residency from another state.

AS 44.33.965 sets out limitations on the loans. Loans may be made for up to $35,000 per person or, up to $70.000 to two or more persons. The loan term may not exceed six years and may not bear an interest exceeding the prime rate plus one percentage point; however, it may not be less than six percent per year and not more than eight percent per year. The loan must be secured by collateral acceptable to the commissioner and may not be made to a person who has a past due child support obligation.

AS 44.33.970 establishes a special account within the Fund called the "foreclosure expense account." The department may expend money from this account to protect the state's security position in loan collateral or to defray expenses incurred during foreclosure proceedings.

AS 44.33.975 requires the department to dispose of property acquired through default or foreclosure in a manner that serves the best interest of the state. It also authorizes the department to finance the sale of property obtained through a foreclosure action.

AS 44.33.990 provides definitions for "commissioner" and "department."

Section 3 of the bill amends the uncodified law of the State of Alaska by adding a new section titled, "TRANSITION: REGULATIONS." This section authorizes the department to immediately proceed with the adoption of regulations necessary to implement the changes made in Section 2. It further stipulates that the regulations may not take effect before July1, 2010.

Section 4 stipulates that Section 3 of this Act takes effect immediately.

Section 5 states that except as provided in Section 4 of this Act, the Act takes effect on July 1, 2010.

Alaska Micro Loan Program **DCCED/ Division of Investments**

Summary of Bill:
In an effort to promote economic development in Alaska by helping small businesses access critically needed capital to grow their businesses, the Alaska Division of Investments (ADI) has developed the framework for a new loan program that would be modeled after a program currently operated through the federal Small Business Administration (SBA). For the purposes of this discussion we have named the program the "Alaska Micro Loan Program" (AMLP). The SBA program is currently available in 46 states, however it is not available in Alaska. The reason the program is not available in Alaska is that an intermediary lender is required and to date no lenders that meet SBA's qualifications have an interest in pursuing this type of loan in the state.

AMPL Program Specifics

Eligibility:	*Alaska resident borrowers.*
Maximum Loan:	*$35,000.*
Maximum Term:	*6 years.*
Collateral:	*Sufficient to secure the loan.*
Equity:	*Borrower must have at least a 10% equity position.*
Capitalization:	*$3.5 million. The program would be set up as a Revolving Loan Fund so that all earnings and loan repayments would be retained by the fund for future loans. All operating expenses would also be paid from earnings of the fund.*
Fees:	*$100 application fee and a 1% origination fee to be paid at loan closing.*
Interest Rate:	*Prime plus one with a floor of 6% and a ceiling of 8%*
Operating Expenses:	*Approximately $77K per year. All operating expenses would be covered by income produced by the program.*

Other Comments:
The AMLP program would complement two existing small business loan programs currently administered by ADI, the Small Business Economic Development Revolving Loan Fund (SBEDRLF) and the Rural Development Initiative Fund (RDIF).

The SBEDRLF program involves federal money from the Economic Development Administration and is targeted at specific communities that have experienced economic hardship. The program has been primarily used for long term financing and requires that numerous federal requirements be met.

The RDIF program was created with state funds and is only available to small businesses located in communities of 5,000 or less if not connected by road or rail to Anchorage or Fairbanks or communities with populations of less than 2,000 if connected by road or rail to Anchorage or Fairbanks. The RDIF program has also primarily been used for long term financing.

On the other hand, the AMLP program would provide relatively short term, low interest loans to Alaska small businesses to be used for typical business purposes such as working capital, purchasing machinery, equipment, inventory and leasehold improvements. Loans would be available in all regions of the state and the application process would be relatively streamlined.

March 11, 2010

The Honorable Sean Parnell
Office of the Governor
P.O. Box 110001
Juneau, AK 99811-0001

Dear Governor Parnell:

I am writing to thank you and urge your continued support for SB 302 and HB 412 – bills to create a microloan revolving loan fund. As you are no doubt aware from your experiences in rural Alaska, access to start up capital is a key initial component of starting new enterprises and creating jobs in Alaska. Residents of the Bristol Bay region are creative and enterprising and there is no lack of entrepreneurial spirit; however there is a huge lack of supporting capital. Our organization provides technical assistance to entrepreneurs with feasibility studies, business plans and funding searches. By far, the most challenging aspect of starting a small business in our region is a lack of capital; even when it involves a very small amount of money. Traditional sources of capital such as banks and other financial institutes are not viable sources of capital for small entrepreneurs in rural Alaska.

As with many other states, Alaska residents understand that supporting small business development is a key part of their overall economic development. However, Alaska is one of four states in the nation that does not have a microloan program and these bills would resolve that and fill an unmet need that would help small businesses and rural Alaska residents.

We urge your support and thank you in advance for your efforts.

Sincerely,

H. Robin Samuelsen

Re: SB302 and HB412 Alaska Micro Loan Program

Dear Governor Parnell:

I write to you today to offer the strong support of the Anchorage Economic Development Corporation for passage of legislation enacting the Alaska Micro Loan Program. The passage of this legislation, important to small businesses across Alaska, will provide a key source of needed capital that is vital to health and growth of our economy.

In reviewing the specifics of the legislation, it is apparent that this modest investment by the state of Alaska could yield significant benefits for communities in every region of the state. The sizes of the loans offered are quite modest, as are the corresponding fees and interest rates charged. The infusion of capital this program offers will help both existing businesses and start-up businesses to bridge short-term funding gaps, purchase new equipment, expand services and employ more Alaska citizens.

Thank you for introducing this important legislation. AEDC supports the passage of this legislation as an important step to grow and diversify the economy of Alaska.

Sincerely,

Bill Popp

Dear Governor Parnell,

We appreciate your continued interest in developing jobs and opportunity in Alaska. The recent legislation submitted by your office, Senate Bill 302 and House Bill 412, creating an Alaska microloan revolving fund is a good example of your continued efforts.

Here at the Fairbanks Economic Development Corporation we recognize the need for this legislation and offer our support as you move this legislation forward.

Thank you,

Re: Support for SB 302 and HB 412

Dear Governor Parnell,

Thank you for submitting SB 302 and HB 412, two bills aimed at creating a microloan revolving fund for the State of Alaska. By introducing this legislation, you have proven your awareness that access to startup and working capital is a key component of starting new enterprises and creating jobs in Alaska.

In Southwest Alaska, a revolving loan fund could help boat owners or smaller fish processors with equipment purchases. It could assist bed and breakfast owners with upgrades to their homes and business. Or it could provide much-needed construction capital to mechanics, day care providers, and a host of other small business startups and entrepreneurs.

Alaska is one of four states in the nation that do not have a microloan program and these bills would resolve that and fill an unmet need that would help small businesses, which is why SWAMC supports them.

Again, thank you for introducing these bills. I hope they can help add to Alaska's efforts to support our small businesses and entrepreneurs.

Sincerely,
SOUTHWEST ALASKA MUNICIPAL CONFERENCE

RE: SB302 & HB412

Dear Susan,

The Alaska Small Business Development Center (SBDC), with its 7 statewide locations, supports the governor's introduction of bills SB302 and HB412. As an organization that was initiated, nationwide, in the 80's by the U.S. Small Business Administration, we have helped Alaska businesses locate loan opportunities for almost 25 years.

Micro-lending is an opportunity for many small businesses who typically do not find the lending options with banks due to the small amount of their loan request. Many lending institutions prefer loan applications with values of $100,000 or more. The micro-lending bill that the governor has introduced will assist many small businesses move their operations to the next level.

In 2009, the Alaska SBDC assisted over 4,000 clients, by providing free and confidential one on one business counseling and low cost workshops. In addition to these services, we also have formal agreements in place to serve as Technical Assistance (TA) providers to many SBA loan recipients. This process requires loan recipients to have specific counseling and training based on their individual needs as a condition of the loan. These needs can run the gamut from business planning/development, marketing, to financial management, as well as many training opportunities.

The approval of the micro-lending bills will significantly impact and support many small businesses throughout Alaska, including the clients we assist in rural villages and communities through our Rural Outreach Program for Entrepreneurs (ROPE). We offer our support and look forward to many future business successes as a result of this initiative.

Sincerely,

Debi Fowler
Associate State Director
Alaska Small Business Development Center

King Crab Shack
JUNEAU, ALASKA

March 2, 2010

Office of the Governor
PO Box 110001
Juneau, AK 99811-0001

Dear Governor Parnell,

Thank you for introducing HB 412 & SB 302 – Microloan Revolving Fund. Please let me elaborate on what this would mean for me and my business.

I have an unusual situation that can be only be categorized as very "Alaskan". I am a small summer seasonal business. I buy strictly Alaskan king crab, Dungeness Crab & Opilio crab and try to support local vendors. I am going into my 5th year of business. I have approximately 10 employees over the course of the summer. I have finally achieved a decent net profit as of last year.

However, every year, I scramble with the banks to be able to purchase enough crab at reasonable rates, to get through my season. As with most fisheries, the Crab fishery is a cash business.

Here in lies the problem:

- I have to purchase my crab in October (during crab season) which is at the end of my season.
  - This causes hardship as I am trying to pay down my loans at the end of the season, pay sales & Federal taxes and save enough money to get through the winter.
  - I am having to pay interest and storage on crab for 6 months before I reopen

- My sales have increased each year by 60-78%. That is pretty exceptional for a down economy. However, that means my inventory needs to increase.
  - Because I can't get enough money up front to buy crab, the price of crab goes up. This can mean a difference of $7,000 - $15,000 in would be profits that just disappear.
  - This money could be used to buy down my loans with the bank & buy inventory.
  - This doesn't give the required equity position in my business because I'm on a "treadmill".

- Banks hesitate to loan on a perishable inventory. The most I have been able to get is 60% LTV ratio, (I have to provide 40%) on enough crab that only lasts me 6 weeks.
  - This makes coming up with 40% difficult because the above problems.
  - Banks want more collateral, but because I am currently banking with **FIVE** institutions, they all have 1st or 2nd position on everything I have. None of them are willing to take crab as full

collateral even though the price goes up, there is a market for it and it is the only thing I need money for.
    - If I get an unsecured loan, the interest rates are so high that once again, it negates the margin of profit.

- SBA & JEDC loans only tend to support start-up businesses. I have not been successful in applying for a line of credit for inventory, especially in the amount that I need and on a perishable product. (Approx $200,000). I have found that:
    - There is money for start ups. (Most of which fail)
    - Money for "bush" or rural areas or disadvantaged sector
    - Money for larger businesses that need $1m or more
    - Absolutely no help for businesses that only need money for inventory in the ($100-$500k range)

Even though I have proven over and over that I pay back my lines of credit or working capital loans, (to the tune of $150,000 each year) I scramble to get enough money to keep up with the increase in business.

While I also struggle with typical "Alaskan" hurdles such as the high cost of shipping, high costs of rent, and lack of cold storage, I have continued to be a staunch supporter of Alaska and Alaska products. I have chosen to take a smaller profit margin to keep my business in Alaska, but this is proving harder each year.

Granted I am a seasonal business that depends on the cruise ship sector, but I NEVER thought that being successful would present the obstacles it has. Businesses such as mine are in desperate need of way to get capital at a low cost for "unusual" situations to continue to stay in state and in business.

While I would like to see the dollar amount of the bill be higher, I support and applaud the idea of offering a low cost way for businesses to grow.

Thank you for your efforts.

Sincerely,

Tracy LaBarge, Owner

To whom it may concern;

My name is Ted Ragains and I am young entrepreneur in Anchorage. The reason I am writing this letter is to inform all who will listen of the plight of small business owners across Alaska. As everyone knows we are in a recession, which has impacts for all businesses. I believe that small businesses have especially been impacted because of the limited credit available for business operation and expansion.

As a small business owner, I depend on credit to place orders for inventory, expansion, advertising and payroll during slow times. Availability of this credit has allowed many businesses to weather economic slow downs in the past and even to emerge stronger when the economy recovers. This recession is different; all forms of available credit have dried up, especially those for small businesses.

Let me give you some details about my situation. I started my first business as a senior project while working toward my Bachelors Degree in Marketing and Finance. My first business, Solara Skin and Laser Center, does all sorts of cosmetic procedures. Our services include laser treatments, Botox, Juvederm, and medical grade facials. Our lasers can get rid of unwanted hair, tattoos, sunspots, spider veins, rosacea and can also give you a mini face lift. Solara has been a great success for the last five years because we identified a niche in the marketplace and successfully capitalized on it.

Just twelve months ago my sister and I started Off the Rack, a men's clothing store that specializes in high-end clothing at a fraction of the price of department stores. In addition to selling new men's clothing we also will take gently used clothes on consignment. We are the only store in Alaska that is oriented exclusively to men's fashion clothing. The response to our store has been amazing and I am looking forward to growing as the buzz spreads.

Our two companies and our personal credit is excellent with the exception of having too much individual revolving credit which has been necessary for business operation. Our credit cards started cutting our credit limits to the exact amount that we had on the card. This was not only happening to cards that carried a balance from month to month but also cards that we paid in full every month. Cards that we had faithfully paid in full cut our available limits from $25,000 to $500. In one month we lost nearly $60,000 in available credit. In addition, the banks cut our working lines of credit to virtually nothing and the credit cards raised their rates by approximately 15% across the board on cards with or without a balance.

This has put small businesses like mine in a difficult position with many owners laying off employees or closing their doors altogether. We have gone to banks and have been told that we have great credit scores but our credit cards and lines of credit are all maxed. We have explained that the credit card companies and banks have lowered the limits to the exact amount that we have on the card but it doesn't seem to change anything. With available credit being cut by half to three quarters of what we originally had. Interest rates are being changed without warning and banks are unwilling to extend credit to small businesses. We are left with no viable options for operating let alone expanding our businesses.

Small businesses are the backbone of the American economy providing nearly 60 percent of employment opportunities in the Country. I have spoken with many small businesses owners in Anchorage and with trade groups including the chamber of commerce and

have found that I am not alone in this difficulty. One colleague, who represents 450 small businesses in the municipality, said that she talks to business owners every day who say they are either going to have to do major layoffs, sell or go bankrupt because they can't order enough inventory to keep their doors open.

Alaska has weathered this financial crisis fairly well compared to the lower 48 but I fear that it may change if something is not done to free up a credit source for business owners. As small businesses we are people who have put everything on the line to succeed including our homes, retirement plans and land. It doesn't seem right that we are being punished for the irresponsible lending of the very banks and credit card companies who are now denying the responsible and credit worthy individuals and businesses access to the credit they need to stay afloat.

With oil being at higher than average rates Alaska is in a position that most of the other states are not. Alaska and Governor Parnell have a unique opportunity to help small business owners get access to a line of credit at a reasonable interest rate. This would keep the unemployment numbers down and keep very viable businesses afloat through the storm. The state can actually help small businesses while at the same time earning a respectful interest rate on the money lent.

I am asking the powers that be to act with urgency. Establish a fund for small businesses so that we can lock in interest rates for 3-4 years that would beat bank loans and credit cards (10%-12%). This would allow us to order the inventory that we need to operate, minimize layoffs, finish expansion efforts, and have a stable interest rate for business forecasting. In addition, the state would be making an interest rate that is enviable to most other options and certainly involves less risk than some of the other options. I can assure you that small business owners are tenacious and will fight to keep their businesses afloat. We just need to be given weapons to fight with.

Sincerely,

Ted Ragains

From: Made In Mat-Su Association
March 18, 2010
1100 E. Dan Street
Wasilla, Alaska 99654

To: The Honorable members of the 2010 Alaska State Legislature

The Made In Mat-Su Association lends the full support of its members and affillitates to SB302/HB 412. The Association supports the proposed Small Business Micro Loan program as the most important small business legislation in many years.

This bill when passed will create opportunities for Alaskan small businesses of all kinds to aquire needed funding for capital improvements, raw materials, inventory, marketing and a variety of other needs. This potential funding will allow small businesses to become more competative, more financially viable and thus allow for a greater share of the Alaska Market.

We ask for your consideration and support of this extremely important bill.

Thank You
Mike A. Borgford
Executive Director
Made In Mat-Su Association

Sponsor Statement HB 413
Funding for the Alaska Challenge Youth Academy

HB 413 restructures the funding mechanism for the Alaska Challenge Youth Academy to more accurately reflect the needs of the Academy.

The Alaska Challenge Youth Academy is a residential high school for students who have dropped out of regular school. The Academy is highly successful with a 70% graduation rate and works closely with the National Guard following a strict model that gives students structure, challenge, and discipline. The Academy is located in Anchorage and has two sessions a year where students live on campus for 5 months while going through the rigorous program. After they graduate from the program, staff continues to track their behavior through a mentorship program. Students are considered a success if a year after graduation they are enrolled in a postsecondary program, the military, or in full time employment.

Funding for the Academy is based the following formula: 7 times the Base Student Allocation (BSA) times all residential students plus .6 times the BSA times all non-residential students. When this formula was constructed in 2002 it reflected the dollars they needed to operate. However, as the BSA has grown over the years to cover retirement costs and other increases in education this has resulted in a windfall and is no longer reflective of the true cost of the program.

HB 413 would set a per child amount for state dollars in statute, $11,990 and multiply that by the number of residential and non-residential students enrolled. The Academy and the Department of Education and Early Development both agree this would give them sufficient dollars to run the program. Under HB 413 the projected total state dollars they would receive in fiscal year 2011 would be approximately $5.2 million, within $300 of the amount they would get under the current formula. Alaska Military Youth Academy also receives separate federal funds that supplement this amount ($2.7 million for FY2011).

The Academy is a valuable alternative that requires higher funding as a residential program for at-risk youth than other boarding schools. HB 413 identifies an appropriate and transparent way to fund this important educational institution.

Alaska Military Youth Academy Overview

Training schedules:

2 classes offered each year, consisting of:

- 2 week pre-challenge phase
- 20 week residential course
- 12 month non-residential tracking period

Education options:

A cadet may receive a GED or a high school diploma from the AMYA. The AMYA is an accredited high school, through the Northwest Association of Accredited Schools and offers a maximum of 7 credits during the residential phase of the program.

There are also work place certificate programs offered as well as internship opportunities for the cadets during the residential course to include:

- National Center for Construction Education and Research certificate, foundation training for any student going into vocational trades
- Carpentry proficiency certificate
- UPS store customer service certified training
- Culinary ServeSafe certification (required by the cabaret association that at least one employee on shift must have this certification)
- Emergency Trauma Tech certification
- Emergency Medical Tech certification
- Win and Work Keys, career readiness certificate (national program administered through the Department of Labor that shows baseline employee skill level)
- First aid and CPR certification

Success:
Success is determined by the ChalleNGe program national office located in Washington DC under the control of National Guard Bureau, which oversees all 33 ChalleNGe programs nationwide. A cadet is considered a successful graduate of the ChalleNGe program if at the end of the 12-month non-residential period he or she is:

- Working at least 30 hours per week
- Enrolled in college taking at least 12 semester hour credits
- Enrolled in a vocational training/ apprentice program
- A member of the United State's military

Alaska Military Youth Academy Budget details

Q: Do we expend funds on the mentorship program? If so what are they used for?
A: No funds are given to the mentors or the cadets for being mentored. Funds are used to pay staff to coordinate the mentor program. One staff member is dedicated full-time to running the mentor program and two other staff members spend about half of their time supporting the mentor program.

Q: How will doing away with the stipend affect the mentorship program?
A: There is an indication the stipends were an incentive for cadets to be more responsible in self-reporting. AMYA staff has invested twice as much time to contact Cadets for post-residential information than with previous classes that received the benefit.

Q: How do we plan to use the stipend money if it remains in the budget?
A: The funds will be used to replace educational equipment and material for the cadets. This includes outdated classroom resources, replacing 25% of computers yearly, adding software licenses with the Microsoft programs, replacing barracks furnishings, increasing the enrollment of additional students, and office supplies.

There has **not** been any DEED funding in the past three years that has gone towards capital projects. The only situation where this was possible was with the infrastructure money we received. However, we did not use any DEED funding as match against the infrastructure projects.

In the past three years there **has** been DEED funding that was used to pay for maintenance to the AMYA facilities. The info. is as follows:

SY08 – spent $441.72 in "repair parts & supplies". It was coded against FFY09 DEED allowable.
SY09 – spent $399.00 in "repair guardrail supplies". It was coded to FFY08 DEED allowable.
SY10 – nothing has been spent on maintenance so far.

60/40 maintenance dollars
SY08 - $118,959.25
SY09 - $93,199.28
SY10 - $15,137.88 so far this year

As for the stipends, they weren't clear on whether they were talking about graduation stipends or aftercare stipends so I provided both just in case. It was not possible to break stipends down by class without going through a labor intensive exercise. I summarized the total graduation and aftercare stipends by fund source for each SY, and

also broke out each fund source by FFY (if applicable) and what type of stipend it was. In the past three years we have paid the following in stipends:

SY08 – $79,000 Total graduation stipends paid ($47,400 FED/$31,600 GFM)
$168,600 Total aftercare stipends paid (DEED I/A)
$247,600 Total graduation & aftercare stipends paid in SY08

60/40
FFY07 Graduation Stipend $42,000
FFY08 Graduation Stipend $37,000
Total graduation stipends paid in SY08 $79,000 ($47,400 FED/$31,600 GFM)

I/A (DEED)
Aftercare Stipend $168,600

SY09 – $91,200 Total graduation stipends paid ($54,720 FED/$36,480 GFM)
$120,700 Total aftercare stipends paid (DEED I/A)
$211,900 Total graduation & aftercare stipends paid in SY09

60/40
FFY08 Graduation Stipend $42,900
FFY09 Graduation Stipend $48,300
Total graduation stipends paid in SY09 $91,200 ($54,720 FED/$36,480 GFM)

I/A (DEED)
Aftercare Stipend $120,700

SY10 – $81,600 Total graduation stipends paid ($48,960 FED/$32,640 GFM)
$58,900 Total aftercare stipends paid (DEED I/A)
$140,500 Total graduation & aftercare stipends paid so far in SY10

60/40
FFY09 Graduation Stipend $40,800
FFY10 Graduation Stipend (estimated) $40,800
Total graduation stipends paid so far in SY10 $81,600 ($48,960 FED/$32,640 GFM)

I/A (DEED)
Aftercare Stipend (there should be no more) $58,900

Alaska Statutes.
Title 14. Education, Libraries, and Museums
Chapter 30. Pupils and Educational Programs For Pupils
Section 740. Funding For Alaska Challenge Youth Academy Program.

previous: Section 720. Definitions.
next: Section 750. Alaska School Counseling Program Grant Fund. [Repealed, Sec. 12 Ch 42 SLA 1997].

AS 14.30.740. Funding For Alaska Challenge Youth Academy Program.

(a) Each fiscal year, the department shall allocate funding for the Alaska Challenge Youth Academy program in an amount equal to the base student allocation multiplied by seven for each residential student and the base student allocation multiplied by 6/10 for each nonresidential student, minus the amount received by the program in federal matching grant funds. The determination of the number of residential and nonresidential students shall be made by the department on October 1 of the prior year.

(b) In this section,

(1) "base student allocation" means the amount established under AS 14.17.470;

(2) "nonresidential student" means a student who receives services but does not reside at the program site;

(3) "program" means the Alaska Challenge Youth Academy program;

(4) "residential student" means a student who resides at the program site.

House Bill 416

" An Act adopting and relating to the Uniform Prudent Management of Institutional Funds Act; relating to the investment of money for charitable purposes by institutions, including governmental institutions; and relating to the University of Alaska"

House Bill 416 would allow the State of Alaska to adopt the Uniform Prudent Management of Institutional Funds Act (UPMIFA).

UPMIFA replaces obsolete rules and concepts of investment and management of endowments and charitable funds currently in use. It provides current, industry best practices guidelines, essential to proper management.

HB 416 is will help administrators fulfill their fiduciary responsibilities to the funds they manage. Clear definitions on prudent practices and applicable standards are laid out for administrators of charitable funds and endowments.

The UPMIFA will assist nonprofits and volunteer trustees to minimize exposure to disputes and legal challenges over issues related to currently unclear administrative rules and practices.

Traditional trust principles regarding the distribution of what might otherwise be considered the corpus differ from the UPMIFA. In conjunction with Financial Accounting Standards Board requirements, UPMIFA allows advances against future earnings to the extent such advances are prudent and consistent with the mission and purpose of the endowment.

At present, only 3 other states have not adopted or introduced UPMIFA legislation.

I urge your support of House Bill 416.

Honorable Kurt Olson, Chair
Labor and Commerce Committee
Alaska State Legislature
State Capitol, Room 24
Juneau, Alaska 99801-1182

Re: HB 416 -- Uniform Prudent Management of Institutional Funds Act

Dear Representative Olson:

The Alaska Uniform Law delegation met on March 8, 2010 and discussed the Uniform Prudent Management of Institutional Funds Act. HB 416 was introduced, which would enact the Uniform Prudent Management of Institutional Funds Act into state law. We believe that the bill would make important improvements to the law on management of institutional funds in this state by providing statutory guidelines for management, investment, and expenditures of endorsement funds held by charitable institutions. The bill is based on a Uniform Act that brings the law governing charitable institutions in line with modern investment and expenditure practices. About 45 states have enacted a version of the Uniform Act.

Sincerely,

DANIEL S. SULLIVAN
ATTORNEY GENERAL

MEMORANDUM March 22, 2010

SUBJECT: HB 416, a bill adopting and relating to the Uniform Prudent Management of Institutional Funds Act
(Work Order No. 26-LS1591\R)

TO: Representative Kurt Olson
Attn: Konrad Jackson

FROM: Theresa Bannister
Legislative Counsel

You have requested a sectional summary of the above-described bill. As a preliminary matter, note that a sectional summary of a bill should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents.

Section 1. Adds a new chapter adopting the Uniform Prudent Management of Institutional Funds Act.

Sec. 13.70.010. Directs an institution, when managing and investing an institutional fund, to consider the institution's charitable purposes and the fund's purposes. Directs the responsible persons to comply with the duty of loyalty and to act in good faith and with the care an ordinarily prudent person would exercise in the circumstances. Gives directions regarding cost incurrence and fact verification regarding fund investment and management. Allows an institution to pool funds. Provides management and investment rules, including the factors to consider, appropriate investment property, and diversification.

Sec. 13.70.020. Allows an institution to appropriate or accumulate as much of an endowment fund that is prudent for the fund. Makes this subject to the donor's intent. Generally characterizes fund assets as donor-restricted until appropriated. Requires an institution to act in good faith and with the care an ordinarily prudent person would exercise in similar circumstances, and to consider, when relevant, certain listed factors. Requires a gift instrument to specifically state any limitation on appropriation or accumulation. Indicates what certain terms and words, including similar words, mean for an endowment fund.

Sec. 13.70.030. Allows an institution to delegate the management and investment of an endowment fund to an external agent if prudent. Makes this subject to certain exceptions. Directs the institution to act in good faith and with the care of an ordinarily prudent person in similar circumstances when performing certain listed acts. Describes the duty

the agent owes to the institution. Removes the liability of an institution that complies with (a) for the agent's acts. States that an agent for an institution subject to this state's laws is subject to this state's jurisdiction. Allows an institution to delegate to its own persons as authorized by other law.

Sec. 13.70.040. Allows an institution, under certain conditions, to release or change gift instrument restrictions. Allows a court to modify a gift instrument's restriction if it is impractical or wasteful or impairs the fund's management or investment, or if it will further the fund's purpose. Requires the institution to notify the attorney general of the court application. Requires a modification to be made, as far as possible, in accordance with the donor's intent. Allows a court to modify a fund's purpose or a restriction if unlawful, impractical, unachievable, or wasteful. Allows an institution to release or modify a restriction on the fund's management, investment, or purpose under certain conditions. Requires notification of the attorney general.

Sec. 13.70.050. Directs that compliance with this chapter be determined in light of the facts and circumstances existing at the time.

Sec. 13.70.060. Indicates how this chapter relates to the Electronic Signatures in Global and National Commerce Act.

Sec. 13.70.070. Indicates that another law or a governing instrument of an institution governs over this chapter when there is a conflict.

Sec. 13.70.080. Provides for uniformity of the application and construction of this chapter with other states' laws.

Sec. 13.70.090. Defines terms for the chapter.

Sec. 13.70.095. Gives the chapter a short title.

Section 2. Indicates how the new chapter and AS 37.10.071 apply to the management and investment of gifts, bequests, and endowments made to the University of Alaska.

Section 3. Indicates how the new chapter and AS 37.10.071 apply to the Board of Regents of the University of Alaska as the fiduciary of the university's endowment trust fund.

Section 4. Indicates that the chapter will apply to institutions and their decisions after its effective date.

If I may be of further assistance, please advise.

UPMIFA

uniform prudent management of institutional funds act

WHY STATES SHOULD ADOPT THE ACT

This 2006 Uniform Prudent Management of Institutional Funds Act replaces and updates the 1972 Uniform Management of Institutional Funds Act. Its rules govern investment of the funds of charitable organizations and total return expenditure of those funds. It establishes a prudent management investment regime derived from the Uniform Prudent Investor Act (which applies only to trusts) and a prudent total return expenditure based upon performance of the portfolio held by a charitable institution. It also provides for delegation of authority for investment to outside agents and reformation of donor restrictions (cy pres) on funds when these are so outdated that the original objective can no longer be honored.

States should adopt the Uniform Prudent Management of Institutional Funds Act:

1. To make sure that the best investment practices govern the actual investment of institutional funds.
2. To withdraw obsolete rules governing prudent total return expenditure and provide a modern rule of prudence consistent with the rules that govern investment.
3. To eliminate differences in investment and expenditure rules that apply to different types of nonprofit organizations. The same rules govern all under UPMIFA.
4. To encourage growth of institutional funds while eliminating investment risks that threaten principal.
5. To assure that there are adequate assets in any institutional fund to meet program needs.
6. To make the law governing institutional funds uniform in every state.

UPMIFA

uniform prudent management of institutional funds act

ULC Uniform Law Commission

History of UPMIFA and UMIFA

At its annual meeting in July 2006, the National Conference of Commissioners on Uniform State Laws (NCCUSL) approved the Uniform Prudent Management of Institutional Funds Act (UPMIFA) and recommended it for enactment by the legislatures of the various states. UPMIFA is designed to replace the existing Uniform Management of Institutional Funds Act (UMIFA), which was approved by NCCUSL in 1972 and has since been enacted in 47 states. UMIFA was a pioneering statute, providing uniform and fundamental rules for the investment of funds held by charitable institutions and the expenditure of funds donated as "endowments" to those institutions. Those rules supported two general principles: 1) that assets would be invested prudently in diversified investments that sought growth as well as income, and 2) that appreciation of assets could prudently be spent for the purposes of any endowment fund held by a charitable institution. These two principles have been the twin lodestars of asset management for endowments since UMIFA became the law of the land in nearly all U.S. jurisdictions.

UPMIFA continues these fundamental principles as a needed upgrade of UMIFA. Both investment in assets and expenditure for charitable purposes have grown exponentially in the 35 years since UMIFA was drafted; asset management theory and practice have also advanced. UPMIFA, as an up-date and successor to UMIFA, establishes an even sounder and more unified basis for charitable fund management than UMIFA has done.

INVESTMENT

In 1972, UMIFA represented a revolutionary advance over prevailing practices which imposed upon endowments the limited investment opportunities available for managing trust assets – even endowments not organized as trusts. By stating the first prudent investor rule in statutory law, UMIFA allowed endowments to invest in any kind of assets, to pool endowment funds for investment purposes, and to delegate investment management to other persons (e.g., professional investment advisors), as long as the governing board of the charitable institution exercised ordinary business care and prudence in making these decisions. A range of factors guided the exercise of prudence.

UPMIFA incorporates the experience gained in the last 35 years under UMIFA by providing even stronger guidance for investment management and enumerating a more exact set of rules for investing in a prudent manner. It requires investment "in good faith and with the care an ordinarily prudent person in a like position would exercise under similar circumstances." It requires prudence in incurring investment costs, authorizing "only costs that are appropriate and reasonable." Factors to be considered in investing are expanded to include, for example, the effects of inflation. UPMIFA emphasizes that investment decisions must be made in relation to the overall resources of the institution and its charitable purposes. No investment decision may be made in isolation, but must be made in light of the fund's entire portfolio, and as a part of an investment strategy "having risk and return

objectives reasonably suited to the fund and to the institution." A charitable institution must diversify assets as an affirmative obligation unless "special circumstances" dictate otherwise. Assets must be reviewed within a reasonable time after they come into the possession of the institution in order to conform them to the investment strategy and objectives of the fund. Investment experts, whether in-house or hired for the purpose, are held to a standard of care consistent with that expertise.

UMIFA initiated the era of modern portfolio management for charitable institutions. UPMIFA provides the standards and guidelines that subsequent experience tells us are the most appropriate for the purpose. Charitable institutions will have more precise standards to guide them. Courts will have more precise standards with which to measure prudence in the event of a challenge. The result should be more money for programs supported by charitable funds, including endowments.

EXPENDITURE

UMIFA initiated the concept of total return expenditure of endowment assets for charitable program purposes, expressly permitting prudent expenditure of both appreciation and income and replacing the old trust law concept that only income (e.g., interest and dividends) could be spent. Thus, asset growth and income could be appropriated for program purposes, subject to the rule that a fund could not be spent below "historic dollar value."

UPMIFA builds upon UMIFA's rule on appreciation, but it eliminates the concept of "historic dollar value." UPMIFA, instead, provides better guidance on prudence and makes the need for a floor on spending unnecessary. UPMIFA states that the institution "may appropriate for expenditure or accumulate so much of an endowment fund as the institution determines to be prudent for the uses, benefits, purposes and duration for which the endowment fund is established." Seven criteria guide the institution in its yearly expenditure decisions: "1) duration and preservation of the endowment fund; 2) the purposes of the institution and the endowment fund; 3) general economic conditions; 4) effect of inflation or deflation; 5) the expected total return from income and the appreciation of investments; 6) other resources of the institution; and, 7) the investment policy of the institution." These standards mirror the standards that apply to investment decision-making, thus unifying both investment and expenditure decisions more concretely.

UPMIFA includes an optional provision that allows states to enact another kind of safeguard against excessive expenditure. If a state does not want to rely solely upon the rule of prudence provided in UPMIFA, the state may adopt a provision that creates a rebuttable presumption of imprudence if an institution expends an amount greater than seven percent of fair market value of a fund, calculated in an averaging formula over three years. While the seven percent rule is likely not to be necessary, it is available for those states that may be uncomfortable with the general standards.

RELEASE OR MODIFICATION OF RESTRICTIONS

UPMIFA recognizes and protects donor intent more broadly than UMIFA did, in part by providing a more comprehensive treatment of the modification of restrictions on charitable funds. Sometimes a restriction imposed by a donor becomes impracticable or wasteful or may impair the management of a fund. The donor may consent to release the restriction, if the donor is still alive and able to do so, but if the donor is not available the charity can ask

for court approval of a modification of the restriction. The trust law doctrines of cy pres (modifying a purpose restriction) and deviation (modifying a management restriction) probably already apply to charitable funds held by nonprofit corporations. UPMIFA makes this clear. Under UMIFA, the only option with respect to a restriction was release of the restriction. UPMIFA instead authorizes a modification that a court determines to be in accordance with the donor's probable intention. If the charity asks for court approval of a modification, the charity must notify the state's chief charitable regulator and the regulator may participate in the proceeding.

UPMIFA adds a new provision that allows a charity to modify a restriction on a small (less than $25,000) and old (over 20 years old) fund without going to court. If a restriction has become impracticable or wasteful, the charity may notify the state charitable regulator, wait 60 days, and then, unless the regulator objects, modify the restriction in a manner consistent with the charitable purposes expressed in any documents that were part of the original gift.

CONCLUSION

UPMIFA reflects and incorporates the 35 years of experience that has accumulated under the original UMIFA. Rather than changing institutional investment or expenditure practices, it brings them up to date and unifies them across a broad range of charitable funds. The better charitable institutions manage investments and prudently control expenditures, the more money they should have for program purposes.

March 24, 2010

The Honorable Representative Kurt Olson, Chair
House Labor and Commerce Committee
Alaska State Capitol, Room # 24
Juneau, AK 99801

Dear Representative Olson:

Please allow me to thank the House Labor and Commerce Committee for your sponsorship of House Bill 416. It is a timely piece of legislation which replaces obsolete rules, and in doing so brings Alaska trust law into this century. But the real value The Foraker Group sees in this legislation is the ability to provide solid options and realistic opportunities for Alaska nonprofit institutions and the University of Alaska in pursuing long-term sustainability.

The Foraker Group is a statewide Management Support Organization established in 2000, with a straightforward mission: Assuring the success of Alaska's nonprofit organizations by helping them build their own sustainability. Foraker does this by providing high-quality, efficient, and cost-effective assistance to staff and boards of directors in three broad areas: shared/professional services, education and training, and organizational development. And more and more, we are also speaking out on behalf of Alaska's nonprofit sector – this is what leads us to submit a letter of support for House Bill 416. Last year we wrote in support of the companion bill SB 134.

We support House Bill 134 because the legislation can have positive impacts on Alaska nonprofits, as well as the University of Alaska. Simply stated, developing an Alaska version of the Uniform Prudent Management of Institutional Funds Act (UPMIFA) provides solid guidance to managers and investors of charitable funds and endowments. As they respond to the nation's economic crisis and build their sustainability, this kind of "best practice" is essential to nonprofit organizations of all kinds.

The best possible response to economic uncertainty is rooted in long-term sustainability. Alaska organizations of all shapes and sizes are responding to threats to sustainability in many ways, all in pursuit of important missions in their communities. Building a sustainable income stream and ensuring financial resilience is essential in Alaska's nonprofit sector – sustainable organizations are better positioned to meet their important missions, are more effective, more efficient and above all more self-reliant. They form the foundation of a strong Alaska economy, and healthy, productive Alaska communities.

The current economic crisis has proven to be especially troublesome for organizations that manage or rely on charitable funds and endowments. But it would be a mistake to portray the passage of HB 416 as a response to economic uncertainty. The "fixes" in HB 416 are not made in response to economic turmoil – the changes are warranted now, regardless of economic circumstances. It is all about being "good stewards" of the donated or endowed dollars of others – a task that becomes harder and harder in the face of growing economic turmoil.

Prudent stewardship is all the more difficult in a demanding digital age using antiquated and inadequate analog tools. The proposed legislation can provide the tools to meet that donor intent while at the same time help develop long-term sustainability.

We know the economy is in turmoil, and that turmoil is hitting all Alaska organizations – government, corporate entities, education, tribal, private foundations, the nonprofit sector, and the University of Alaska. The economic situation makes this legislation timely, but it is change that should come regardless.

Please feel free to contact Foraker Vice President Dr. Michael Walsh with any questions you might have. He can be reached via email at mwalsh@forakergroup.org

Sincerely,

Dennis McMillian, President
The Foraker Group

Governor Sean Parnell
STATE OF ALASKA

March 25, 2010

The Honorable Mike Chenault
Speaker of the House
Alaska State Legislature
State Capitol, Room 208
Juneau, AK 99801-1182

Dear Speaker Chenault,

Under the authority of Art. III, Sec. 18, of the Alaska Constitution, I am transmitting a bill relating to State employees' compensation.

This bill will revise the salary schedule for State employees who are not covered by collective bargaining agreements. Specifically, the bill will provide for two percent increases in fiscal years 2011, 2012, and 2013. These increases are consistent with the State's parameters for negotiations with the labor unions that represent employees in collective bargaining units. The bill will cover employees in the executive, legislative, and judicial branches.

I urge your prompt and favorable action on this measure.

Sincerely,

Sean Parnell
Governor

The Honorable Bill Stoltze
Alaska State Legislature
State Capitol, Room 515
Juneau, AK 99801-1182

Dear Representative Stoltze:

House Bill 421 was read across the floor on March 26, 2010 and referred to the House Finance Committee for consideration. This bill addresses compensation for public employees who are not covered by collective bargaining agreements.

The Department of Administration has recently completed negotiations on five separate labor contracts with unions representing over 12,000 classified state employees. Reports of the monetary terms of these agreements have been transmitted to the President of the Senate and the Speaker of the House.

This bill would provide a similar increase to approximately 3,000 employees in the Executive (~1,700), Legislative (~500) and Judicial (~800) branches who are paid based on the statutory pay schedule found in AS 39.27.011. Specifically, the bill would increase the statutory pay schedule by 2% in each of the next three fiscal years, beginning on July 1, 2010 (FY11-12-13).

I respectfully request that HB 421 be scheduled for hearing in the House Finance Committee as early as possible.

If you have any questions or require additional information, please contact me.

Sincerely,

Annette Kreitzer

Annette Kreitzer

March 31, 2010

Sponsor Statement
HB 422 / SB 311
Tourism Enhancement

After decades of steady growth, Alaska is facing a decline of more than 140,000 cruise passengers in 2010 – the most significant drop in visitation the state has ever experienced. A loss of over $150 million in direct and indirect spending, and thousands of Alaska jobs, could result from this decline. Alaska already sustained a loss of approximately 125,000 air, highway, and ferry visitors last year. Visitor industry peak employment is approximately 40,000 when accounting for jobs directly or indirectly connected to non-resident visitation and spending. Including job losses already suffered and potential losses this year, visitor industry related employment is projected to decline by up to 5,000 jobs, or more than 10 percent.

In recognition of the visitor industry's significance, this legislation seeks to reverse these declines by making Alaska more visible through increased tourism marketing and by making Alaska more affordable through a reduction in the excise tax imposed upon cruise passengers. This legislation also proposes development of a report every three years to provide information about the needs of Alaska communities that host cruise ship passengers as well as usage of the excise tax.

Corporate Income Tax Credit: This bill creates a corporate income tax credit for contributions to the qualified trade association that plans and executes a destination tourism marketing campaign. Alaska will benefit from expanded marketing efforts by increasing visitation and spending. In turn, this activity will create jobs and strengthen the economy.

Commercial Passenger Vessel Excise Tax: Amendments to the commercial passenger vessel excise tax program will reduce the tax rate per passenger and create a periodic report to ensure the rate remains commensurate with the cost of hosting passengers in Alaska. The tax provides funding for projects in areas that are directly impacted by cruise passengers including port expansion and improvements, pedestrian pathways and sidewalks, and other visitor industry facilities.

We can position our economy for growth by attracting more visitors, lengthening visitors' stay, and encouraging visitors to explore new Alaska destinations. In short, we should make Alaska an appealing and affordable destination, while sending a clear message that we welcome visitors.

I urge your prompt and favorable action on the bill.

Sectional Analysis
HB 422 / SB 311
Tourism Enhancement

Section 1 of the bill adds a new tax credit to Alaska Net Income Tax Act for cash contributions made by corporations to a qualified trade association for use in planning and executing an Alaska tourism marketing campaign. This credit is limited to taxpayers that derive income from tourism related business in Alaska. The total amount of cash contributions by all taxpayers eligible for this credit is $20 million in 2010 and in subsequent years the cap is adjusted up or down based upon the percentage change in the amount of tax collected under the vehicle rental tax program during the two prior fiscal years. Once the total annual credit amount has been reached, taxpayers will be notified by the qualified trade association that further contributions will not be eligible for a credit. This tax credit is not refundable so taxpayers cannot reduce their tax liability below zero. Tax credits not used in the year the contribution was made cannot be applied in future years. Finally, taxpayers may not claim both a tax credit and a business expense deduction.

Section 2 amends AS 43.52.200 to codify a regulation and clarify that the commercial passenger vessel excise tax is imposed upon passengers traveling on a vessel that hosts them overnight in Alaska and stops in port(s) in Alaska where they are allowed to embark or disembark. In other words, this tax does not apply to passengers on vessels merely transiting the state's marine waters.

Section 3 amends AS 43.52.210 to reduce the tax rate from $46 a passenger per voyage to $34.50 a passenger per voyage.

Section 4 amends AS 43.52.230(a) to clarify the guidelines on how commercial passenger vessel excise tax proceeds should be appropriated to comply with federal law.

Section 5 amends AS 43.52.230(b) to clarify the guidelines on how commercial passenger vessel excise tax proceeds should be spent by municipalities to comply with federal law.

Section 6 amends AS 43.52.250 to reduce the commercial passenger vessel excise tax by the total amount of municipally-imposed passenger taxes a passenger pays when purchasing a voyage that includes a stop in municipalities imposing such taxes. This reduction, however, is limited to municipally imposed taxes that were in effect on December 17, 2006 and such municipality did not elect to receive revenue sharing of $5 per passenger under AS 43.52.230(b).

Section 7 of the bill provides for a report to the Legislature, the Governor, and the public every three years by the Department of Commerce, Community, and Economic Development that addresses the projected needs of the communities that host passengers and the extent to which, during the preceding three years, commercial vessel passenger excise tax proceeds have been utilized to defray the cost of hosting passengers in Alaska. This report may be used by the Legislature to determine if the tax rate remains commensurate with the cost of safely and efficiently hosting passengers in Alaska.

Section 8 amends AS 43.52.200 to clarify that "voyage" means spending 72 hours in the state's marine waters.

Section 9 repeals the regional cruise ship impact sub-account in the general fund. Thus, all proceeds from the commercial passenger excise tax will go into the commercial vessel passenger tax account subject to appropriation by the Legislature.

Section 10 provides an immediate effective date for the bill.

CS FOR HOUSE BILL NO. 422( )

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SIXTH LEGISLATURE - SECOND SESSION

BY

Offered:
Referred:

Sponsor(s): HOUSE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

A BILL

FOR AN ACT ENTITLED

"An Act relating to the excise tax on passengers traveling on commercial passenger vessels providing overnight accommodations in the state's marine waters; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** AS 43.52.200 is amended to read:

Sec. 43.52.200. Levy of excise tax on overnight accommodations on commercial passenger vessels. There is imposed an excise tax on **passengers traveling** [TRAVEL] on commercial passenger vessels providing overnight accommodations **that anchor or moor** in the state's marine water **with the intent to allow passengers to embark or disembark**.

* **Sec. 2.** AS 43.52.210 is amended to read:

Sec. 43.52.210. Rate of tax. The tax imposed by AS 43.52.200 - 43.52.295 is levied at a rate of **$34.50** [$46] a passenger per voyage.

* **Sec. 3.** AS 43.52.230(a) is amended to read:

(a) The proceeds from the tax **imposed under AS 43.52.200 - 43.52.295** [ON TRAVEL ON COMMERCIAL PASSENGER VESSELS PROVIDING OVERNIGHT ACCOMMODATIONS IN THE STATE'S MARINE WATER] shall be deposited in a special "commercial vessel passenger tax account" in the general fund. The legislature may appropriate money from this account for the purposes described in (b) [AND (c)] of this section, for state-owned port and harbor facilities, other services**, and infrastructure** to properly provide for **commercial passenger** vessel or **passenger** [WATERCRAFT] visits, to enhance the safety and efficiency of interstate and foreign commerce, and such other lawful purposes as determined by the legislature.

*** Sec. 4.** AS 43.52.230(b) is amended to read:

(b) For each voyage of a commercial passenger vessel providing overnight accommodations, the commissioner shall identify the first five ports of call in the state and the number of passengers on board the vessel at each port of call. Subject to appropriation by the legislature, the commissioner shall distribute to each port of call $5 per passenger of the tax revenue collected from the tax **imposed** [LEVIED] under AS 43.52.200 - 43.52.295. If the port of call is a city located within a borough not otherwise unified with the borough, the commissioner shall, subject to appropriation by the legislature, distribute $2.50 per passenger to the city and $2.50 to the borough. Each port of call receiving funds under this section shall use the funds in a manner calculated to improve port and harbor facilities and other services **and infrastructure** to properly provide for **commercial passenger** vessel or **passenger** [WATERCRAFT] visits and to enhance the safety and efficiency of interstate and foreign commerce.

*** Sec. 5.** AS 43.52.250 is amended by adding new subsections to read:

(b) The tax imposed by AS 43.52.200 - 43.52.295 shall be reduced by the total amount of a tax on a passenger traveling on commercial passenger vessels imposed on the passenger by a municipality.

(c) The tax reduction under (b) of this subsection applies only to taxes imposed by a municipality that did not elect to receive funds under AS 43.52.200 - 43.52.295 by December 17, 2007.

(d) The tax reduction under (b) of this section may not exceed 50 percent of

the tax rate levied under AS 43.52.210.

* **Sec. 6.** AS 43.52 is amended to add a new section to read:

Sec. 43.52.260. Periodic report. The Department of Commerce, Community, and Economic Development shall prepare and submit to the governor, the legislature, and the public a report every three years that

(1) addresses the projected needs of communities to safely and efficiently host passengers that pay taxes under AS 43.52.200 - 43.52.295; and

(2) summarizes the extent to which appropriations of the proceeds of the tax have been used to defray the needs described in (1) of this subsection.

* **Sec. 7.** AS 43.52.295(4) is amended to read:

(4) "voyage" means any trip or itinerary lasting more than 72 hours **in the state's marine waters**.

* **Sec. 8.** AS 43.52.230(c) is repealed.

* **Sec. 9.** This Act takes effect immediately under AS 01.10.070(c).

March 29, 2010

Gov. Sean Parnell
P.O. Box 110001
Juneau, AK 99811-0001

Dear Gov. Parnell,

I am a resident of Girdwood and a founding member of Girdwood 2020, a group of concerned citizens who advocate for responsible development. One of our priorities is the economic health of Alyeska Resort, which relies on cruise visitors during the summer to carry it through the shoulder seasons.

The hotel suffered last summer and is so nervous about this season it significantly reduced personnel costs by downsizing its work force and dropping insurance for its employees.

Girdwood 2020 has long been concerned with the negative impacts of the cruise ship initiative and has passed two resolutions supporting repeal or major changes in both its environmental and economic requirements. Here is the text of the one we passed last year:

Girdwood 2020 Board of Directors
Resolution In Support of Modifying
2006 Alaska Cruise Ship Initiative

WHEREAS, Girdwood 2020 comprises a group of citizens who want Girdwood to grow and prosper as a unique, internationally recognized mountain resort community through environmentally responsible economic development,

WHEREAS, Girdwood is one of the top destinations for cruise ship passengers in Southcentral Alaska,

WHEREAS, cruise ship passengers are important to the economic viability of Alyeska Resort, along with dozens of other area businesses, including Alaska Heritage Tours and the Alaska Wildlife Conservation Center,

WHEREAS, a 2006 Alaska Cruise Ship Initiative dramatically increased the cost of cruising to Alaska by imposing three new taxes, including a $50 passenger entry fee, and environmental standards not required by other dischargers, and

WHEREAS, cruise lines have redeployed ships and shifted itineraries in an effort to reduce costs and increase margins, and

WHEREAS, the redeployments will reduce the number of cruise passengers to Girdwood and Southcentral Alaska by one-third in 2010 and cost the region more than $150 million in lost taxes, local purchases and passenger spending, along with three to five flights per week, and

WHEREAS, no other destination imposes such a costly tax and environmental fee structure and most destinations are offering the cruise industry incentives.

NOW THEREFORE BE IT RESOLVED, the Girdwood 2020 Board of Directors urges Governor Sean Parnell and the Alaska State Legislature to create a panel to evaluate the effects of the 2006 Cruise Initiative and to review, eliminate or lower the $50 entry fee.

Approved the 12th day of September, 2009

I commend you for your brave move to significantly reduce this onerous tax and return our state's competitive advantage.

Thank you.

Sincerely,

Lana Johnson
P.O. Box 708
Girdwood, AK 99587
907-783-1140

Southeast Conference

March 29, 2010

Dear Legislator;

On behalf of the Board of Directors of Southeast Conference we strongly support Governor Parnell's efforts to reduce the amount of the Alaska cruise ship head tax from $46 to $34.50 and encourage tourism marketing tax credit legislation. We have to compete in a global market that is steadily taking away the state's cruise travel market. Bermuda just lowered its cruise ship taxes and fees, which now makes Juneau the most expensive port in North America. These efforts by the Governor will bring our taxes more in line with our competitors.

Southeast Conference is a regional, nonprofit corporation that advances the collective interest of the people, communities and businesses in Southeast Alaska. Members include municipalities, native corporations and village councils, regional and local businesses, civic organizations and individuals throughout the region. Our mission is to undertake and support activities that promote strong economies, healthy communities, and a quality environment for Southeast Alaska. We are the State-designated Alaska Regional Development Organization (ARDOR), the federally-designated Economic Development District (EDD), and the federally designated Resource Conservation and Development Council for Southeast Alaska. Each of these designations requires Southeast Conference to take an active role in regional resource management and economic development planning.

After decades of steady growth in the tourism sector, Alaska is facing a 17 percent decline in cruise visitation this summer. That will translate to 140,000 fewer passengers coming here during the four-month cruise season. Alaska businesses have come to rely on the tourism business for the stability they need to run a year round business. These projected reductions will be devastating to our small businesses in Southeast Alaska. This tax reduction is good faith toward the value we put on our most renewable economy, tourism. Support for this legislation will let the cruise companies know that we value their business.

Southeast Conference urges the legislature to support the head tax reduction.

On behalf of the Board of Directors,

Shelly Wright

Shelly Wright
Executive Director

3/29/10
Governor Sean Parnell
PO Box 110001
Juneau Alaska, 99811

Governor Parnell,

First, thank you for putting forward your hybrid tourism bill (SB422/HB311), to reform the cruise tax structure as well as help our industry market itself. It is not always popular to do the right thing, and you have shown outstanding leadership by acknowledging and battling a dangerous threat to Alaska's economy. The Tourism Industry touches every region of the state, and helps prop up every sector of our economy. As you know, the last two years have been brutal for our industry, and your proposal is the first ray of sunshine we've seen in quite a while. I'm confident that if it passes, it will help pull the Tourism Industry out of the quicksand it's been stuck in, as well as bolster the Alaskan economy in general.

Ballot Measure 2, when it passed, was one of the toughest initiatives to understand that I've ever seen. It was sold to the public as a minor fee that cruise ships needed to pay, in order to offset some of the costs that the State incurs on their behalf. This is a hard message to argue with, everyone should pay their own way and the Cruise Industry is no exception. Hindsight being what it is, we can now see the real, tangible, measurable effects of this legislation. Not only was the $50.00 tax enough to radically change the economics of the Cruise Industry in Alaska, the initiative as it turns out, was also packed with a whole host of regulations, stipulations and environmental requirements that made Alaska one of the toughest places for these companies to do business. At the time, its authors said to the Alaskan public "don't worry, cruise ships aren't going anywhere" and three years later, the proof is in the pudding. Ships have left, despite the assurances of the Ballot Measure's authors.

The second half of your proposal, the Tourism Marketing Tax Credit is equally important to our industry. When a ship leaves our state, it takes a proportional amount of marketing dollars with it. Add to that the overall in decline in marketing dollars this state has spent in the last 15 years, and you can see why Alaska just doesn't compete on a world stage. Cruising has proven very popular, and every region of the world is figuring out how much they have to gain by attracting visitors. Gone are the days where the Caribbean was our only competition. Now Alaska is just one of dozens of exotic cruise destinations, and getting our message out is twice as important as it was even 10 years ago. Luckily we have an easy pitch to make: Alaska is blessed with unmatched natural wonders, accessible wildlife and the most exciting native cultures in the world. We just need to get that message in front of the travelers, and that's going to take more funding.

1975 Discovery Drive Fairbanks, AK 99709 Phone (907) 479-6673 Fax (907) 479-4613
Website: http://www.riverboatdiscovery.com

My grandparents started this business 60 years ago and like any struggling family business, we have had ups and downs; but in all that time the last two years stand out. Last year we had an almost 30% drop in passengers, and bookings for this summer are down another 20% on top of that. In the last two years we have cut over 70, out of what was almost 200 seasonal workers we hired in 2007. We have also cut 4 of our 18 full time positions. These are real people; families who have mortgages and students who pay tuition. Besides the emotional aspect of these cutbacks, they also represent a dramatic decrease in dollars spent in the community. These Alaskans used their wages to pay bills, buy groceries and put gas in their car. This is how tourism touches the entire Alaskan Economy, and why this legislation is so vital, not just for us, but for the whole state.

Thank you for your leadership on this issue, I proudly support these two bills and hope that the Legislature passes them quickly.

Sincerely,

Ryan Binkley
President, Riverboat Discovery
Fairbanks Alaska

March 30, 2010

Governor Sean Parnell
PO BOX 110001
Juneau, AK 99811

Dear Governor Parnell:

Hello Governor, first let me say thank you for your recent introduction of House Bill 422 and Senate Bill 311. I would like to take a moment of your time to tell you about the importance of this tourism bill to myself and to countless other members of the Fairbanks community. Over the years I have been lucky enough to have the experience of growing up in a family business; it taught me invaluable skills and life lessons, and it always meant that I had a summer job that I had to show up to everyday. It also gave me the opportunity to work side by side many of my best friends and was a place where I formed lasting friendships with peers from all over Alaska.

As I have taken on a more permanent role here at the Riverboat Discovery, I have had the pleasure of hiring and managing a large portion of our full-time and summer crew. It has given me a chance to mentor outstanding young Alaskans and teach them the values and work ethic that I was taught as a young deckhand growing up on the boat. It also provides them with a steady summer income that allows them continue paying for their education, rent, living expenses, etc. This money trickles through various Fairbanks businesses and helps support all sectors of the local economy. I have seen the positive effect that this "simple summer job" has had on young Alaskans a hundred times over, and it has become one of the most rewarding aspects of my job.

Over the last two winters it has been disappointing to see how the severe drop off in Alaska tourism has had such a devastating effect on our crew size. We have been forced to cut 4 year-round positions and have seen our summer crew drop, from nearly 200 two years ago, to 120 for 2010. It is difficult having to turn away so many exceptional young people because we can no longer support such a staff.

While many of us in the industry have been battling to reverse this disturbing trend for the last two years, it has been a lonely fight. That is why I am so grateful for your recent support and leadership on this issue. HB422/SB311 is the first step in getting Alaska tourism back on track and with your continued support, coupled with the help of the legislature, Alaska can once again become a premier visitor destination.

Thank you for stepping up to the plate for all Alaskans on this issue; you have my full support in your efforts.

Sincerely,

Captain Wade Binkley
Vice President of Operations

KETCHIKAN

Our lifestyle, your reward

March 25, 2010

The Honorable Sean Parnell, Governor
State of Alaska
P.O. Box 110001
Juneau, AK 99811-0001

Dear Governor Parnell,

Thank you for your participation in the Cruise Shipping Miami conference and Sea Trade industry trade show last week. It was a great affirmation of your commitment to our industry to have you join us.

Perhaps more importantly, I wish to convey my thanks for your willingness to demonstrate your support for the tourism industry by offering a solution to two of the issues that most affect my community's viability as a visitor destination- changes to the state head tax and support for increased marketing of Alaska.

The ballot measure that was narrowly passed by voters during the primary elections in 2006 has created unwieldy and punitive measures against the cruise line industry. I appreciate that you understand by lowering the head tax, and eliminating the collection of fees that in the past have been used for somewhat questionable projects, we can move forward. Your proposal ensures that funds will continue to be available for needed infrastructure improvements and strongly signals that Alaska values its relationships with our business partners, who in turn bring visitors to our shores to see our sights, buy our tours, shop in our stores, dine in our restaurants and go home with a positive message about our amazing state.

Marketing Alaska as a visitor destination is equally important. Alaska's appeal is still there, but our message is often lost in the clutter of all of the travel advertising and promotion that exists in the media. While other destinations are ramping up their efforts to bring visitors in, Alaska's budget is flat, and dollars are stretched. The state has a role to play, and it is more important than ever that Alaska commit additional dollars to grow this industry.

While oil is indisputably a large factor in our state's economy, tourism is an important, long term resource that will continue to produce jobs, local and state government revenues and create small business opportunities, not only in Ketchikan but throughout Alaska. It often has taken a back seat as a priority for our elected officials. I can only say again, thank you for your interest in and elevation of solutions that will benefit us all for the long term.

Sincerely,

Patti Mackey

Dear Governor Parnell,

On behalf of the Greater Ketchikan Chamber of Commerce and its 324 member businesses, I would like to thank you for your introductions of proposals that we feel would greatly benefit our members and our community. As you may realize our community has undergone a huge transition from a resource extraction based economy to a community that presently predominantly tourism based economy.

We are extremely fortunate that during the waning years of the timber industry, that we were at the same time seeing the offsetting growth in the tourism industry; that growth was arguably the savior of our community. As such, over the last 15 years, Ketchikan has made significant investment into our infrastructure and into reinventing and itself to be a part of this competitive market.

Although we are continually looking at ways to diversify our economy, the fact of the matter is: our community could not survive without tourism or the tourism industry.

We are in full support of your proposed solutions, specifically;

- *Reducing state head tax from $46.00 per person to $34.50 per person*
- *Providing credit for local head taxes*
- *Requiring the state to review tax rates every three years to help insure that funds are aligned with infrastructure needs.*
- *Allowing tourism revenue to be reinvested in marketing Alaska, through a corporate tax credit.*

Sincerely,

Blaine Ashcraft

Governor

Bill # HB 422 and SB311

I'm glad you are supporting this effort to reduce the head tax and with the Alaska Tourism Marketing Tax credit. I have been involved with the Eldorado Gold Mine for 16 years and have been in a position to hire local Alaskans for our operation in the last 12 years. Last year we had a decline in passengers and with the cruise ship cancellations for 2010 we are hiring less crew members again this year.

What this results in is less college students working to help pay for their college expenses. I have seen reductions across the board in our company, full time and seasonal positions cut and not filled. This has an effect on families like my own with a son in college and my daughter going to college in the fall of 2011. With reductions in crew we have lots of college and high school students still looking for work. If they don't find work it will cost more to go to college and in fact may be the deciding factor whether they can afford to go to college at all.

We need to make Alaska more competitive in the market and this will be a huge step in achieving this. When I go to the grocery store and see parents in town here, I have had some ask about seasonal work for their kids, I hope in the future we can hire these students in the Fairbanks area with the return of the cruise passengers to the interior.

I like what you have done so far in supporting this measure it really will have an effect on jobs and the local economy in parts all across Alaska.

Sincerely

Jayson Kowalchuk
VP Eldorado Gold Mine

March 29, 2010

Governor Sean Parnell
PO Box 11001
Juneau, AK 99811-001

Dear Governor Parnell:

The decline in the visitor industry is hurting our business, our community, and our residents. The loss of revenue due to the decrease in tourism (i.e. bed taxes, sales taxes, etc.) is hurting us. The loss of three additional ships in 2010 will be felt throughout the entire State. Alaska will see a loss in revenue of $165 million in 2010 and we will lose the marketing funds that go with each ship. Fairbanks will have 33 percent fewer passengers visit our community this summer. This is a trend that we cannot afford to see continue.

In order to reverse this downward spiral, we must take action. We must reduce the cost of operating in Alaska for the cruise industry and increase the State's marketing efforts. Our great State is no longer competitive in the global market in either of these areas. As other destinations are lowering fees and increasing markets, we increased fees with ballot Measure 2 and have no money to increase our marketing efforts.

I fully support the plan you have proposed and truly believe that it is our best chance to save our tourism industry. The reduction of the head tax and the Alaska Tourism Marketing Tax Credit bills (SB 311/HB 422) are the best hope for the survival of the Alaskan-owned small businesses. The passing of these bills will create a sustainable mechanism that will support marketing Alaska and hopefully bring more visitors to Alaska. Your leadership has given strength and momentum to these bills and I greatly appreciate it.

Sincerely,

S. Fischer

Bell, Susan K (GOV)

From: Laura Cloward [director@seward.net]
Sent: Tuesday, March 30, 2010 2:18 PM
To: Parnell, Sean R (GOV)
Subject: Seward Chamber Support for Gov Parnell Tourism Marketing/Cruise Industry Efforts

March 30, 2010

The Honorable Governor Sean Parnell
Governor of Alaska
Juneau, AK 99801

Dear Governor Parnell:

The Seward Chamber of Commerce, Conference and Visitors Bureau would like to thank you for your efforts to strengthen Alaska's economy through tourism marketing and partnership with the cruise line industry. We applaud your travel to Miami and your willingness to engage with the cruise industry, and important facet of Seward's economy.

On March 15th, the Seward Chamber Board of Directors approved Resolution 2010-03 urging the Alaska State Legislature to support the passage of the Alaska Tourism Marketing Tax Credit bill (SB 138/HB 167). Since our passage of Resolution 2010-03, we were pleased to see your proposed legislation introduced into both the State Senate and House, legislation which both encourages investment into tourism marketing and sustains jobs by reducing the cost of doing business in Alaska.

It is critical in today's economy that the State take action to help our businesses remain viable and retain those jobs tied directly and indirectly to tourism. Seward is fortunate to have a diversified economy; tourism plays an important role in that balance. Beyond seasonal employment, this impact is year-round: government positions tied to Kenai Fjords National Park; a rail line that supports not only seasonal passenger travel, but year-round coal export and barge activities; cruise ship-capable berths and terminal facilities that support cargo dockings, AMHS maintenance, and visits by military vessels; and purchase of locally-processed commercial fish.

We fully support your respective bills, SB311 and HB422, which, in addition to implementing a tourism tax credit, goes a step further by reducing the fees associated with cruise visitors traveling to our great state. Thank you for your leadership on this important issue.

Sincerely,

Laura L. Cloward

Laura Cloward, Executive Director

The Honorable Sean T. Parnell
Alaska State Capitol Building, Third Floor
P.O. Box 110001
Juneau, AK 99811-0001

23 March 2010

Dear Governor Parnell:

On behalf of the American Society of Travel Agents (ASTA) and its approximately 3,500 domestic travel agency firms, I applaud and strongly support your recent proposal to reduce the state "head tax" on cruise ship passengers from $46 to $34.50.

Travel agents are responsible for over $14 billion in annual cruise sales--approximately 80% of all cruise travel sold. As part of its advocacy mission on behalf of the travel agency community and the travelling public, ASTA supports the reduction of regulatory and tax barriers that make travel more expensive.

The predictable effect of a tax reduction such as the one you have proposed will be an increase in the number of cruise passengers visiting your state—a welcome result for passengers, travel agents, and Alaska-based businesses alike. We look forward to working with you to help this measure to become law.

Thank you for your leadership on this and other issues affecting the travel industry.

Very Truly Yours,

Chris Russo

From: Alan LeMaster, President

Re: HB 422 – Tourism Tax/Tax Credit

Date: April 2, 2010

First let me thank each of you for opening your doors to the members of Alaska's travel industry earlier in the week as we campaigned for our livelihoods that are so tied to this bill, introduced by Governor Parnell.

We know there are many issues on your plate and you were extremely cordial in allowing us so much time to state our case.

As you consider your final answer to our request, please consider the following.

Two Proposed Plans:
There are at least two plans on the table for your consideration. One is the Governor's plan as expressed in HB 422 combining certain changes in the cruise ship tax system and the request of the visitor industry to allow for a corporate tax credit. The other is the plan expressed in the Senate Bills SB 311 & SB 312, whereby the issue of the Cruise Tax is separated from the Corporate Tax Credit proposed in HB 422 and giving a one year supplemental payment to the marketing program of $5,000,000.

Legislative direction:
Last year when we were in Juneau discussing the Alaska marketing program and looking for a funding mechanism, we were told to go back to the drawing boards and look for a perpetual solution that would be long term, alleviating the need to return year after year seeking funding. So we did exactly that.

We considered many options and after a lengthy effort of our industry membership developed and agreed on a system whereby Alaska corporations involved in the tourist industry would have the option to dedicate their corporate tax dollars to the Alaska state's marketing program to a maximum of $20,000,000 a year. Those dollars would then be the base for marketing Alaska to the world through their public partnership with the Alaska Travel Industry Association.

Administration Support:
After several sessions with the Administration they recognized that an additional problem was brewing with the cruise ship companies over what is commonly referred to as the "cruise ship tax". In an effort to come to resolution, the first move by the Governor was to attend the Cruise convention in Miami where he was able to sit down with the presidents of the major cruise ship companies cruising Alaska. In those meetings which were, at times a bit contentious, he was able to come to agreement that if he would reduce (not eliminate) the tax, add marketing dollars to our efforts and use the tax monies collected to enhance the port facilities where they traveled, they would drop the law suit in process, add

Gakona Junction Village, Inc. dba:

Email: gakona@gakonaank.net

additional ships to their schedules in 2012 restoring much of the over 140,000 passenger loss we have experienced over the last couple of years.

Governor Parnell saw the benefit of both the cruise ship tax issue and the corporate tax contribution issue. He thus combined them into a single bill providing for that long term solution we all are seeking. He proposed a comprehensive program and submitted it in the form of HB 422.

Legislative resistance:
For reasons that I am unable to discern, the Senate Finance Committee has not been able to bring this bill forward for hearing. In its place, we learned during our Fly-In that two new bulls were introduced splitting the Governor's bill into SB 311 and SB 312 and allowing for a one time contribution of $5,000,000 to the Marketing Program. We view this as a short range, stop gap effort and not a real solution to the problem we are seeking in HB 422.

Our recommendation:
Your choice?

A. You can choose to pass a comprehensive bill (HB 422) using corporate tax credits that allows for a long term solution with adequate funding enabling us to build a sustainable growth program of up to $20,000,000 in exchange for:
   i. The cruise industry dropping the litigation now in process
   ii. Additional ships in the 2012 schedule adding thousands more visitors to Alaska
   iii. Restoring up to 5000 jobs lost in the last two years from reducing visitation by over 140,000 guests.

B. You can choose to support a short range, stop gap solution adding $5,000,000 to our existing budget for one year. But, this proposal does not provide for sustainable marketing program, making it necessary for us to return to Juneau in 2011 to continue the fight for what you said you were seeking ~ "a perpetual, long term solution to marketing Alaska".

C. Finally, you can do nothing. That option can only exacerbate the problem of the continuing reduction of employment in our industry, fewer businesses willing or able to profitably participate in serving the visitors and a major impact on the families depending on tourism, the second largest industry in Alaska, as their primary and/or secondary income.

Of course, the loss to the city, borough and state revenues will be significant. This is already being felt through fewer dollars in taxes, fees, permits, and premiums at every level.

Summary:
So here we are at the crossroads and the journey nearing an end with only a couple of weeks left in the session. We in the industry fully support HB 422 and ask that you consider it carefully; then join us in passing this important legislation. Our very lives depend on it.

Please consider the options carefully. Ask questions. Think hard. Do the right thing. Call us if you have concerns. And finally, help us solve this urgent problem once and for all by passing HB 422 and sending it on to the Senate for their approval.

Sincerely,

L. Alan LeMaster, President

Responsible Cruising in Alaska

Governor Sean Parnell
Juneau, Alaska

March 12, 2010

Dear Governor Parnell:

RE: Cruise Ship Tourism

Responsible Cruising in Alaska supports both your travel to the Seatrade Conference in Miami and sustainable tourism, including large cruise ships, when these activities provide positive economic and revenue benefits to the state. Also, the large-ship cruise industry must meet Alaska's existing water quality standards at the point of discharge, as set out in Alaska law, in order to protect marine waters used for sport, commercial and subsistence fisheries.

Regarding pollution, the Alaska cruise industry has made enormous strides in preventing pollution since a decade ago when the industry was routinely being charged and convicted for felony dumping offenses. Installing working Advanced Wastewater Treatment systems on these vessels has put the industry on the cusp of meeting all Alaska's water quality standards (WQS's) at the point of discharge. The January issue of ***The Maritime Executive*** magazine supports this view that compliance with Alaska WQS's is now attainable. Remaining concerns are removing harmful discharge amounts of ammonia and copper, which directly affect marine growth and returning salmon. In fact, it is evident from DEC review and industry comments that the high levels of copper on some ships stem from water softeners interacting with the ship's copper plumbing; a problem easy to solve. The copper problem is the ships themselves, not local water sources.

Because tourism is a vital part of Alaska's economy, the great news is that recent financial upheavals and world-wide recession are ending. According to recent travel publications and journals like ***The Economist***, advance cruise bookings including trips to Alaska are robust. In fact, one good measure of cruise booking strength is the rising cost of Alaska tickets. The average cost of berths for the state Ocean Ranger program is up 21% in 2010 compared to last year. That is a clear and positive sign of industry rebound and recovery.

When you meet with cruise executives in Miami to encourage increased cruise tourism to Alaska, please stress the following points:

- ✓ Industry is very close to achieving Alaska WQS's for pollutants, especially heavy metals and ammonia. Keep working to reach these goals, using the rapidly improving removal technologies.

Box 21884 Juneau, Alaska 99802 (907) 586-2117 chipt@alaska.net

- ✓ The cruise lines spend $70 M a year to market cruises here. Alaska can either add to that figure or market primarily to independent air travelers.
- ✓ When cruise ticket prices are up in 2010 by hundreds of dollars, a $46 tax that pays solely for primary cruise infrastructure in Alaska is stable.
- ✓ Alaska is not 'hoarding' tax revenues collected from the passengers. Every available dollar has been appropriated for docks, sidewalks, restrooms and road projects, all used by the passengers on their visits.
- ✓ Capital projects proposed for FY 2011 from the passenger tax are for primary cruise infrastructure in many Alaska ports. These projects also mitigate the economic impact on local and state residents.
- ✓ As one of the most beautiful and desirable travel destinations, the industry and state should work together to expand other opportunities for cruise passengers when traveling in Alaska, e.g., development of a world-class lodge on the south side of Denali.

Alaska is a great place for cruising. Passengers come to Alaska from around the world to experience the vast beauty of Glacier Bay and the scenic splendor of Prince William Sound. Passengers love the sights and sounds in historic communities like Ketchikan, Skagway, Sitka and Talkeetna.

RCA urges you to continue working with the cruise industry so that Alaska remains a premier visitor destination. But Alaska cannot afford to alter the water quality standards that protect the marine waters and resources directly related to those experiences that cruise visitors seek. And at least for the next decade, the current, stable tax structure is needed to build primary infrastructure for the safe and efficient movement of passengers. These capital improvements are critical to the long-term viability of the industry.

Cruise tourism in Alaska will continue to grow in the coming decades, as it has each year for the past 25 years. Working together with port communities, the industry, and with fair and stable passenger taxes, Alaska can be the best cruise destination on Earth, sustaining a vital economic sector for many years to come. Thank you for your continuing interest and assistance,

_____

Responsible Cruising in Alaska

House Finance Committee
Juneau, Alaska

April 5, 2010

Dear Representatives,

RE: HB 422

Thank you for the opportunity to comment on HB 422. This Governor-submitted bill would severely degrade the Commercial Vessel Passenger Fund. The following bullet points regarding HB 422 are meant to critique this Governor's bill, to improve it, and make it less punitive to Alaska port communities that host cruise ships in Alaska each summer. I trust these points are considered and viewed favorably by the Finance Committee.

- HB 422 was industry-written as a punitive reaction to the voter-passed cruise initiative of 2006; it punishes cruise port towns.
- This bill is designed to lower the state fund by 59%, from $46 million per year to less than $19 million in cruise capital funding;
- The major result of passing this bill would be short-changing smaller cruise ports in Alaska; Sitka, Hoonah, and especially the westward ports of Seward, Whittier and Kodiak.
- The bill limits state ability to capitalize large cruise projects like Panamax docks which cost $20 million to build.
- As a direct critique, HB 422 is a "**Cap and Skim**" math trick that has no justification except to decimate the tax revenue fund.
- Funds will be limited, and municipalities will return on bended knee to Vancouver and Miami for partial dock funding.
- HB 422 takes Alaska 'back in time,' restoring bickering and competition between cruise ports for industry visits & funding.

Box 21884 Juneau, Alaska 99802 (907) 586-2117 chipt@alaska.net

ON A POSITIVE NOTE:

- All Alaska cruise ports have received some funding from the state head-tax fund. These primary port projects are good investments for both industry and local communities;
- Cruise tax funding has **not** been hoarded as many wrongly claim, but is appropriated each year for new capital projects and paying down the bonded debt for new cruise docks;
- FY 11 proposals for cruise funding thus far are exactly what the voters intended – thanks to AG and OMB leadership.
- In years ahead, as the economy keeps improving, more ships will cruise to Alaska and require new and improved port projects; the sole purpose of the passenger head-tax.

SUGGESTIONS FOR CRUISE TAX REFORM:

- ✓ A modest cut in the $46 state tax equal to the decline of 2010 passengers: 15%. A $39 tax is a positive message to industry **and** preserves state ability to appropriate funds.
- ✓ 2010 Alaska taxes have already been collected by industry in the cruise ticket price. An effective date of 2012 on HB 422 gives industry time to re-deploy more ships to Alaska and achieve the 1 million passenger high-mark of 2009;
- ✓ Eliminate the words Regional Fund in state cruise law, but not the funding. The Legislature has always appropriated tax revenue as a whole, not by the words Regional Fund.

In conclusion, Alaska voters want reform of cruise ship practices in our state; **Protection of Clean Water** and **Fair Taxation** of this multi-billion dollar industry. While modest changes in state cruise law will be tolerated, wholesale changes that cripple funding for cruise capital projects should be addressed by Alaska voters, not by Miami-based threats. Please conduct an objective, state review of this important issue, which may lead to modest reforms in HB 422. Thank You,

Theodore Thoma, President
Responsible Cruising in Alaska

Governor Sean Parnell
STATE OF ALASKA

March 25, 2010

The Honorable Mike Chenault
Speaker of the House
Alaska State Legislature
State Capitol, Room 208
Juneau, AK 99801-1182

Dear Speaker Chenault,

Under the authority of Art. III, Sec. 18, of the Alaska Constitution, I am transmitting a bill that provides for (1) a corporate income tax credit for contributions to the qualified trade association that plans and executes a destination tourism marketing campaign, and (2) amendments to the commercial passenger vessel excise tax program to reduce the tax rate and provide for a periodic review of the tax rate to ensure that it remains commensurate with costs of hosting passengers in Alaska.

After decades of steady growth in cruise ship passenger visits to Alaska, Alaska is facing a 17 percent decline in cruise visitation this summer. Currently, that would translate into 140,000 fewer passengers coming here during the four-month cruise season, fewer Alaska jobs, and less revenue for Alaska's small businesses. In recognition of the significant impact this decline in cruise ship travel has on Alaska, I propose legislation to increase tourism marketing through a corporate income tax credit mechanism, and a reduction of the excise tax imposed upon passengers visiting Alaska by cruise ship. I am also proposing a periodic review to assess the projected community needs and use of appropriations to safely and efficiently host visitors in Alaska.

We can grow our economy by bringing more visitors to fuel our own Alaska businesses. In short, we should make Alaska a more affordable destination and send a message that we welcome travelers.

I urge your prompt and favorable action on the bill.

Sincerely,

Sean Parnell
Governor

ANALYSIS: *(Attach a separate page if necessary)*

This bill establishes a tourism marketing tax credit, lowers the commercial passenger vessel excise tax on passengers, and requires the Department of Commerce, Community and Economic Development to conduct a periodic review of projected community needs and usage of past appropriations.

The travel component of this fiscal note represents staff outreach to communities and industry to better understand existing conditions and anticipated needs in port communities as a component of periodic review requirement in section 7 of this legislation.

The report and recommendation will be completed with existing staff resources.

FISCAL NOTE #2

STATE OF ALASKA **BILL NO.** HB 422
2010 LEGISLATIVE SESSION

ANALYSIS CONTINUATION

Bill Language:

This bill would allow corporations engaged in any type of tourism activity in the state to take a credit against the Alaska corporate income tax (CIT) for contributions made to a qualified trade association. The contribution would have to be used by the the trade association for a destination tourism marketing campaign and could not be used to directly benefit the entity that made the contribution. The credit would be allowed on 100% of corporate income tax of a corporation, but would be limited to the first $20 million in contributions made to the trade association. The $20 million limit would be adjusted each year for the change in vehicle rental tax collections under AS 43.52.010 - 43.52.099. If vehicle rental tax collections drop, the overall contribution limit would drop by the same percentage. If vehicle rental tax collections increase, the overall contribution limit would increase accordingly.

Revenues:

Corporate income tax revenues would decline by approximately $20 million due to the new tourism tax credit.

Expenditures:

The provisions of this bill can be implemented using existing resources.

STATE OF ALASKA
2010 LEGISLATIVE SESSION

BILL NO. HB 422

ANALYSIS CONTINUATION

Bill Language:

This bill will reduce the commercial passenger vessel (CPV) excise tax from $46 per passenger to $34.50 per passenger traveling on a commercial passenger vessel in state marine waters. The bill would allow a reduction in the amount of the tax for taxes paid to a municipality that levies its own passenger fee. The reduction could not exceed 50% of $34.50 regardless of the amount of passenger fees charged by other communities. All revenues collected from the CPV tax would be deposited in the commercial vessel passenger tax account in the general fund. The language which created the regional cruise ship impact fund would be repealed. Department of Revenue would continue to share $5 with the first five ports of call. This bill would not affect community revenue sharing.

Revenues:

Commercial passenger vessel tax revenues would decline by approximately $22 million in fiscal years 2011 and forward due to the reduction in the CPV tax from $46 to $34.50 per passenger and the further reduction allowed for passenger fees paid to municipalities with passenger fees in place in 2006. Again, this bill does not change the rate at which the state shares CPV tax with communities that do not levy a passenger fee. We expect passenger fee sharing to remain at approximately $10 million each year. Since the bill has an immediate effective date, we expect a reduction in fiscal year 2010 CPV tax revenues of approximately $3.2 million.

Expenditures:

The provisions of this bill can be implemented using existing resources.

Thanks for considering HB 422

NFIB

The Voice of Small Business•

ALASKA

April 7, 2010

The Honorable Bill Stoltze
Co-Chair, House Finance Committee
State Capitol Building
Juneau, Alaska 99801-1182

RE: House Bill 422

Dear Representative Stoltze:

On behalf of the National Federation of Independent Business/Alaska, I wish to respectfully share our support for House Bill 422. The National Federation of Independent Business is the largest small-business advocacy group in Alaska.

House Bill 422 will reduce the Alaska cruise ship tax from $46 to $34.50 and provides tax credits for marketing Alaska as a tourist destination. With Juneau being the most expensive port in North America, it has reduced the appeal of Alaska to cruise ships.

Many of the NFIB/AK members benefit from the tourists and their activities in Alaska, whether they are specific tour operators or suppliers to those operators or the grocery store where employees of tourism operators buy their food. The expected decline of 140,000 will dramatically affect Alaska's many small businesses and their ability to hire summertime employees.

We encourage you to pass legislation to reduce the excise tax on cruise ship passengers so that we can begin to draw passengers back to Alaska.

Sincerely yours,

Dennis L. DeWitt
Alaska State Director

The Honorable Sean Parnell
Office of the Governor
550 West Seventh Avenue, Suite 1700
Anchorage, AK 99501

Dear Governor Parnell:

I am writing this short note to express our encouragement for the many things you are doing to ensure a strong economy for the state of Alaska, and specifically your effort to reduce the state head tax on cruise ship passengers and, in turn, increase cruise traffic in Alaska.

Our business is heavily reliant on a strong economy in the state of Alaska and, as we all know, the cruise ship industry is an important driver for the state economy. Unfortunately, we anticipate a significant decline in the number of cruise passengers we will carry this year.

We believe the tax as it is currently structured is counterproductive to our collective effort to maintain and grow jobs in the state of Alaska.

Thank you for everything you are doing for Alaska, and if we can help you in any way, please let us know.

Sincerely,

Brad Tilden

Gov. Sean Parnell
P.O. Box 110001
Juneau, AK. 99811-0001

Communities across Alaska are losing thousands of jobs. The decline in visitors is hurting our businesses and our local communities. The loss of visitor spending is causing dramatic layoffs in our businesses – some may not survive. Decreased visitor spending is also causing a significant reduction in local revenue through bed taxes, sales taxes, dock fees, etc.

We must take action now to turn around this decline, get our jobs back and rebuild our economy. To bring in more visitors, it is imperative the State address **two** issues. We must reduce the cost of operations in Alaska for the cruise industry and we must increase the State's marketing effort.

Governor Parnell, I support your plan to;

- Reduce $46 head tax to $34.50
- Provide credit for local head taxes
- Require state to review tax rate every three years to help ensure funds are aligned with infrastructure needs
- Allow tourism revenue to be reinvested to marketing Alaska, through a corporate tax credit
- Adequately fund the State's travel marketing program
- Provide for a stable marketing funding model
- Make Alaska more competitive and increase the number of visitors

Alaska is no longer open for business. The high cost of taxes on the cruise industry has made Alaska no longer competitive in the global market. Ballot Measure 2 imposed $72 million a year in new taxes on the industry on top of the millions in existing local taxes. Due to the high costs to operate in Alaska and

heavily discounted fares we have seen in recent years, Alaska has become less profitable resulting in ships being deployed to other destinations.

In addition to addressing tax policies, Alaska **must** increase its marketing. Other destinations are becoming more aggressive to attract visitors. We do not have the funds to compete with these destinations causing a loss of market share. Increased marketing will drive demand for more ships and bring in more air, marine highway, and road visitors.

More visitors means more dollars into our economy, providing revenues for our businesses, jobs for Alaskans and local revenue through sales, bed and other taxes to support local services.

April 2, 2010

The Honorable Sean Parnell
Governor for the State of Alaska
PO Box 110001
Juneau, AK 99811-0001

Dear Governor Parnell:

On behalf of the Anchorage Convention & Visitors Bureau (ACVB) and our 1,150 business members, please accept our sincere appreciation for your participation and attendance at the 2010 SeaTrade, recognizing the value of Alaska's tourism industry to businesses, families and local governments across the state. It was also a pleasure to see you again as part of the Alaska Travel Industry Association delegation in Juneau earlier this week. Your words and commitment towards doing what is right to grow this economic engine is appreciated and your leadership has truly earned the respect of our industry.

Small businesses and many Alaskan communities rely on the economic benefits brought by cruise passengers each summer and we see the revenues generated by those same passengers throughout the entire state as they enjoy pre & post cruise options. Likewise, the cruise industry values the credibility, additional messaging, and lead-generation programs that the state's marketing program provides.

Passage of your "united tourism bills" - HB422 and SB311 – will assist all fronts of our industry, from those catering to truly independent visitors to those businesses that have found valuable partnerships with Alaska's cruise industry.

A healthy tourism industry is a key component to the long history of growth that we've enjoyed in Alaska. We know that to have continued growth and sustained well being of community and business investments, we need to work together to create a stable and viable business environment. Your proposal will provide a much needed long-term and sustainable funding mechanism for the state's destination marketing program as well as a needed adjustment to the cruise head tax to return Alaska to a competitive position.

I'm proud of our industry and proud of the fact that year after year tourism contributes significantly to the state's general fund and to the funding of local governments throughout Alaska. Perhaps even more satisfying are the contributions our industry makes in creating robust and lively communities that our residents and families enjoy year-round.

Your forceful support of this legislation can expand this win-win cycle for everyone's benefit. ACVB is actively encouraging legislators to pass the proposed united tourism bills. I welcome your suggestions for any adiditonal advocacy or support we can provide. Thank you for keeping the tourism industry a priority and thank you for your service to Alaska.

Sincerely,

Julie Saupe

Re: HB422 & SB311 Passenger Tax; Tourism Tax Credit Legislation

Dear Governor Parnell:

On behalf of the Anchorage Economic Development Corporation (AEDC), we write to offer our support for your efforts to promote increased tourism in Alaska through your proposal to adjust taxation related to the cruise ship industry. Your efforts to create a comprehensive approach to address the visitor decline while rebuilding and strengthening relationships with the cruise industry are important to the future health of the visitor industry in Anchorage and the Southcentral region.

Your proposed legislation, HB422 & SB 311, will strengthen Alaska's competitive position in global tourism and will help to stem the loss of visitors that now totals over 140,000 cruise ship passengers who will not visit the Southcentral region this year. Additionally, your commitment to increased support for marketing of Alaska in the global marketplace will help to put Alaska back on track towards renewed growth in visitor numbers and the resulting growth in economic benefit to our region.

AEDC supports legislation reducing the head tax to $34.50. AEDC also supports legislation that will allow tourism revenue to be reinvested to marketing Alaska, through a corporate tax credit. HB422 and SB311 accomplish these important needs for the future health of tourism in Alaska and the Southcentral region.

Sincerely,

Lon G. Wilson

Vote: Unanimous

SEWARD CHAMBER OF COMMERCE, CVB
BOARD OF DIRECTORS
RESOLUTION 2010-04

A RESOLUTION IN SUPPORT OF CREATING INCENTIVES FOR INVESTMENT AND INCREASING COMPETITIVENESS OF ALASKA.

WHEREAS, the mission of the Seward Chamber of Commerce, Conference and Visitors Bureau is to maintain a diversified economy and positive business environment; and

WHEREAS, one aspect of that mission is to support a strong and growing job base; and

WHEREAS, Alaska's seasonally adjusted unemployment rate was 8.5% in February 2010, a 37% increase from February 2008's rate of 6.2% and the highest rate for the month of February since 1992; and

WHEREAS, Alaska Department of Labor data clearly shows that Alaska employment in most every industry has dramatically fallen since the last 4 months of 2008*, including 1,500 lost oil and gas industry jobs; and

WHEREAS, Alaska's economy is built mainly on the sale of natural resources and inflows of cash from the federal government; and

WHEREAS oil & gas investment, development and production is by itself one of the three major supports of Alaska's economy; and

WHEREAS, more than one third of all working Alaskans owe their livelihood to resource exploration, development and extraction in Alaska, including not only jobs within the petroleum and mining sectors but also jobs in the State and local government, finance, infrastructure, trade, construction, small business, and service sectors; and

WHEREAS, oil production in Alaska has declined from 2.1 million barrels per day in 1988 to approximately 700,000 barrels per day today, and is expected to decline by more than five percent per year+, and more investment is needed to stem that decline; and

WHEREAS, other areas in the world encourage oil and gas investment with fiscal terms and incentives not offered by Alaska's existing policies; and

WHEREAS:

- North Slope oil development activity has declined,
- Total Alaska drilling activity has decreased 14% while Lower 48 oil drilling activity has increased,
- Exploration drilling activity is down nearly 64%, e.g. one major producer will not be drilling an exploration well for the first time in 45 years,
- Over $2.5 billion in North Slope oil and gas projects have been deferred, and
- Outer continental shelf ("OCS") permitting delays are limiting offshore oil development in Alaska; and

WHEREAS, Alaskans are in a position to positively affect our state's economic future and to reverse the current momentum of decline by creating a more competitive environment for continued investment and reinvestment by the resource extraction industries that sustain the economy and state revenues of Alaska;

*Except government, health, manufacturing (fish processing), and categories that were excluded because their growth is not closely related to the underlying strength or health of the Alaska economy.
+Alyeska Pipeline Service Company to the Alaska Department of Revenue.

NOW THEREFORE, BE IT RESOLVED

1. The Seward Chamber of Commerce urges the Alaska State Legislature to act in the 2010 regular legislative session to halt the loss of jobs for Alaskans and to reduce Alaska's unemployment rate by establishing policy and/or amending law to further incentivize investment and increase the competitiveness of Alaska relative to other oil and minerals producing areas, so that creation of jobs for Alaskans and opportunities for Alaska businesses may sustain our state's economy for generations of Alaskans to come.
2. That copies of this resolution be sent to Governor Sean Parnell, the Alaska Legislature, Seward Chamber members, and statewide media.

PASSED AND APPROVED BY THE SEWARD CHAMBER OF COMMERCE, CVB BOARD OF DIRECTORS THIS 2nd Day of April, 2010.

President

Re: Support for SB 311 "PASSENGER TAX; TOURISM TAX CREDIT"

Dear Governor Parnell,

We are writing to you today on behalf of the 700+ business and property owners in downtown Anchorage whom we represent.

The downtown Anchorage community relies upon annual visitations from travelers across the globe. Whether it's a gift shop, an art gallery or a restaurant, everyone relies upon the economic impact of our summer visitors and the visitor industry.

The recession and the decrease in visitors to Alaska has been – and will continue to be – a one-two punch to our downtown community. We are witnessing first hand the negative impact of declining numbers of both visitors and visitor spending. That is why we are supporting your efforts to reduce the head tax for cruise ship passengers in Alaska for the cruise industry and increase marketing dollars for the state.

Tourism is a huge economic engine for our community and for the state at large. Your support for the tourism industry, and, in turn, those of us who rely upon the tourism industry for our businesses, is truly appreciated

With regards,

Garret Wong

Dear Gov. Parnell:

On behalf of the Anchorage Chamber of Commerce, we would like to thank you for your efforts to create a comprehensive approach to address the visitor decline while strengthening relationships with the cruise industry. Your plan not only makes Alaska more competitive, but attracts more visitors through increased marketing – it provides our best chance of turning things around for the visitor industry, Alaska business owners, and the economic climate of the state as a whole.

Specifically, we are pleased to support:

- A reduction in head tax to $34.50
- Allow tourism revenue to be reinvested to marketing Alaska, through a corporate tax credit

Tourism is a very important economic engine not only for Anchorage, but for all of our members within Southcentral Alaska. Your support is appreciated and needed.

Please feel free to call on us if we can be of further assistance in finding support for your proposal.

March 29, 2010

Gov. Sean Parnell
State of Alaska
P.O. Box 110001
Juneau, AK 99811-0001

Dear Gov. Parnell,

I am the owner of MSI Communications, a full service advertising agency serving clients in the oil and gas, mining, transportation and tourism industries. I am very concerned about the livelihood of the cruise industry as tourism represents one third of my annual revenues and helps me sustain fulltime employment for my 22 employees.

2009 was a very difficult year for our firm and I am not much more optimistic about 2010. I laid off three full time professional staff due to slow economic conditions and complete uncertainty as a small business owner that we would be able to weather the storm. Every one of our tourism clients made dramatic cuts to their advertising budgets and our annual media purchasing was cut in half. Additional cuts were made as natural attrition occurred and we were forced to absorb the workload.

Critics of the cruise industry say that tourism jobs are seasonal and low paying. These jobs are important to our economy. In fact, more than twenty five years ago, I had one of those low paying jobs as the concierge at the local Holiday Inn. Today, I proudly serve many tourism clients and I own one of the busiest ad agencies in town.

For me, it's clear. When the cruise industry looses passengers, we all lose revenue, jobs, and livelihood. It's time to let the cruise industry know we are OPEN FOR BUSINESS and create an environment that encourages growth and sustainable development for all Alaska businesses.

I thank you for taking a stand on the needless $50 head tax and encourage you to continue efforts to revive the economic health of the tourism industry.

Regards,

Laurie Fagnani

Governor Sean Parnell
P.O. Box 110001
Juneau, AK 99811-0001

Sean,

Thank you for your leadership in the resent meetings with the cruise industry in Miami.

As one of the owners of the Glacier BrewHouse and ORSO in Anchorage we clearly see how the cruise industry is essential in the growth of the visitor industry in Alaska. At the Glacier BrewHouse and ORSO we currently employ approximately 230 full and part time employees. With the loss of the cruise ships in 2010 we will experience a substantial decline in our revenues which will also potentially impact our employees. Your administration's efforts to reverse this trend are extremely helpful in promoting a strong business community in Anchorage as well as Alaska.

Thank you for your efforts and please let me know if there is anything I can personally do to help your endeavors in supporting a clean, safe and environmentally sound growing cruise industry.

Sincerely,

James C. Anderson

March 30, 2010

Dear Governor Parnell,

Thank you for your support of Tourism Bill HB 422 & SB 311

The decline in visitors is hurting our businesses and our local communities. Decreased visitor spending is also causing a significant reduction in local revenue.
To bring in more visitors, it is imperative the State address **two** issues. We must reduce the cost of operations in Alaska for the cruise industry and we must increase the State's marketing effort. We must take action now to turn around this decline, get our jobs back and rebuild our economy.

Other destinations are becoming more aggressive to attract visitors. We do not have the funds to compete with these destinations causing a loss of market share. Increased marketing will drive demand for more ships and bring in more air, marine highway, and road visitors.

You have proposed a comprehensive approach to address the visitor decline and strengthen our communities, which will give our businesses a chance to survive. Your plan includes making Alaska more competitive and attracting more visitors through increased marketing.

Your plan is our best chance of turning things around.

I appreciate your support for Tourism Bill HB 422 & SB 311.

Sincerely,
Theresa Walden

Date: March 30th, 2010

Attention: The Governor of the State of Alaska,

I wanted to write to thank you Governor Parnell for being the kind of leader that listens and seeks to solve our State's problems through the 'art of compromise'. The need for the state to show its support for the travel industry has been a long time coming and I can't tell you how good it felt to learn that you were traveling to Miami on our behalf, and introducing legislation to mitigate the effect of an arbitrary $46 head tax. Thank you again.

I hope you will continue to support this process as it heads into the legislature. Some may be tempted or otherwise believe that we should try to do away with the head tax in its entirety. But history has recently shown us that the stalled negotiation during the Knowles administration and the industry's failure to recognize their responsibility in Alaska, has subsequently led to the ballot initiative and this pickle we are currently in. Others are steadfast in their support of the tax because they believe the industry should be penalized and deterred. But in doing so these people are hurting the people in Alaska who depend on this industry to provide for their family and well being.

The way forward lay in the middle. I just received an inquiry today from a woman interested in booking our Photo Safari tour. She asked some questions about the tour then stated how excited she was about coming (with her family) to see our beautiful state. Her comment that stuck with me was this, "We are not as thrilled about taking the cruise, but are really looking forward to seeing the state. The cruise just gets us there." This illustrates the symbiotic relationship we have with the cruise industry: A balance between the destination and the transportation. "Making the State open for business", is important, but should also include the creation of responsible environmental policy and the workings of sound fiscal policy.

Thank you again for your leadership and for your support of a sustainable tourism industry in Alaska.

Warm regards,

Jeremy Gieser

Re: HB 422 and SB 311

Dear Governor Parnell,

On behalf of the Greater Sitka Chamber of Commerce board of directors, I am writing in support of your proposal to help increase tourism in Alaska through the Tourism Marketing Tax Credit.

As you are aware, Sitka is losing 40% of the cruise ship passenger numbers that we had last year. Together with the decline we experienced in 2009, the number of cruise ship passengers that we will see this year will barely be enough to sustain our existing businesses.

At least two of our better retail business owners have each been forced to shut down one of their stores in Sitka, and are establishing shops in other Southeast communities that still have adequate cruise traffic. This is not only difficult for these families - it represents a significant loss of jobs and revenue to our community.

Sitka is an attractive destination for independent travelers, and we are working hard to increase the number of visitors who come by plane or ferry to spend quality time in our town. At the same time, we recognize that two thirds of the people who return to Alaska came here first on a large cruise ship. With the low numbers of visitors in that category, we lose the ability to 'sell' them, while they're here, on the idea of returning for longer stays.

Sitka cannot solve these problems alone. We need the help and cooperation of the State of Alaska. Those of us in Sitka very much appreciated your trip to the Sea Trade convention in Florida and your willingness to talk with the cruise lines about an adjustment in the Cruise Ship Passenger Head Tax. A reduction in those fees would go a long way towards helping to attract the larger cruise lines back to Alaska and to Sitka.

The Tourism Marketing Tax Credit can have a significant impact on Alaska's ability to reach potential visitors all over the world. We need to show travelers that we are indeed open for business. Thank you for your efforts on behalf of Alaska's business owners and residents.

Sincerely,

Sheila Finkenbinder, Executive Director

The Honorable Sean Parnell
Office of the Governor
P.O. Box 110001
Juneau, AK 99811-0001

Dear Governor Parnell,

I would like to personally thank you for your strong support of the tourism industry in our state. Last year was really tough on the small business community and with the loss of over 140,000 cruise ship passengers this season; it looks like more dark days are ahead.

The decline in visitor spending is causing drastic layoffs all across Alaska not to mention the loss of community revenue in the form of bed taxes, sale taxes and other fees. Your plan in HB-422 and SB-311 will go a long way to stabilizing the business climate in Alaska and finally provide the needed funding for the State's marketing effort.

Some businesses will not survive this economic downturn and I pray that our company is not on that list. I truly feel there is reason for hope when the Governor of the State personally takes the fight to the cruise ship executives and then backs up his words with legislation. I want you to know that I'm totally behind your actions and deeply appreciate you commitment in helping solve this problem. Thank you again for all you have done and for your continued support.

Sincerely,

PHILLIPS CRUISES & TOURS, LLC

The Honorable Sean Parnell
Governor, State of Alaska
Alaska State Capitol
P.O. Box 110001
Juneau, AK 99811-0001

Dear Governor Parnell:

The board of directors of the Juneau Convention & Visitors Bureau and I would like to thank you for taking a pro-active stance on behalf of Alaska's tourism industry. We appreciate that you attended the Seatrade Cruise Shipping Miami event on behalf of Alaska and met with cruise industry leaders. We also appreciate your efforts to address the impacts of the head tax with a reduction in the passenger fee and supporting the corporate tax credit. Regardless if the head tax or the recession or a combination of both are the reason for declining cruise traffic, the end result is the same - the ships are leaving our state.

It will become increasingly clear this summer how vital the tourism industry is to our communities and that the economic benefits of the industry go far beyond the port cities. The loss of jobs and tax revenues in 2010 is going to be significant, but we are hopeful that changes to the 2006 tax initiative and an improving economy will turn things around in 2011.

The Juneau Convention & Visitors Bureau is encouraged by and grateful for your interest, support and leadership to find solutions to the issues facing the visitor industry and taking steps to improve Alaska's economy.

Sincerely,

Lorene Palmer

KODIAK

RESOLUTION # 01-10

A RESOLUTION BY KODIAK ISLAND CONVENTION VISITORS BUREAU URGING THE ALASKA STATE LEGISLATURE TO SUPPORT THE PASSAGE OF THE "ALASKA TOURISM MARKETING TAX CREDIT" BILL (SB138 / HB 167) THAT PROVIDES ADDITIONAL TOURISM MARKETING FUNDING.

WHEREAS, the travel industry is one of the three largest private sector contributors to Alaska's economy, by generating over 1.7 billion in direct expenditures annually, and have an economical impact of over 3.4 billion dollars annually; and

WHEREAS, many local jobs and local economies are dependent upon the visitor industry; and

WHEREAS, the visitor industry contributes 200 million dollars annually to local and states taxes; and

WHEREAS, the state will see a decline for the second year in a row of summer visitors, and thereby a loss of jobs and revenue to local businesses, many of which are small, Alaskan-owned; and

WHEREAS, the national and international tourism budget for promoting Alaska has been less than twelve (12) million for the last two years; and

WHEREAS, the travel industry has stated for several years that a meaningful marketing promotion budget should exceed 20 million dollars.

NOW THEREFORE BE IT RESOLVED: that the Kodiak Island Convention and Visitors Bureau urges the State of Alaska Legislature to pass Senate Bill 138 / House Bill 167 which would allow defined travel-related business activities to receive a credit against their tax due for a cash contribution to the State of Alaska Travel Industry Marketing Program.

PASSED and APPROVED by the KODIAK ISLAND CONVENTION VISITORS BUREAU this 11 day of March, 2010.

April 2, 2010

Governor Sean Parnell
State of Alaska

Dear Mr. Parnell,

I wish to take this opportunity to voice my support for Tourism Bills HB 422 and SB 311.

I have been in the hospitality industry in Alaska since 1994 and during that time have witnessed both good times and bad. I was very disappointed to see the state eliminate the marketing effort and fall to the back of the pack with respect to tourism marketing funding. Many states, as you well know, spend MUCH more than Alaska to attract visitors. Some say that the state markets itself since it is so beautiful, abundant and unique. This is simply not true as evidenced by the decline in tourism visitation growth after the state reduced its funding for marketing. This was during a time of economic growth. Now that times are tough, it is even more important to renew the marketing effort of the State of Alaska.

Tourism is an important industry for the state. The contributions in terms of tax revenues and employment justify investment in tourism marketing. I strongly support increased tourism marketing expenditures by the State of Alaska.

The other issue, which is just as important, is the proposal to realign the head tax. This tax has had a direct impact in Haines, reducing cruise ship visitation. This segment of the tourism industry in Haines is crucial to its survival and prosperity and this effort (to reduce the tax) will have a positive effect on the community.

In summary, let me applaud your efforts to breathe a bit of life in to this long-neglected segment of the Alaska economy. I am happy to see that you are interested in helping the tourism industry survive.

Governor Sean Parnell
Sean.parnell@alaska.gov

Dear Governor Parnell,

I applaud your effort to address the serious decline in visitor traffic this summer by introducing the Tourism Bills HB 422 and SB 311.

Alaska is facing an economic crisis! With the redeployment of three cruise ships this season, our port communities including South-central Alaska and Fairbanks will experience a decline in passenger visitation that will hurt Alaskan businesses. There will be a reduction in tax receipts; decreased visitor spending and jobs will be lost! We must reduce the cost of operations in Alaska for the cruise industry and we must increase our marketing efforts.

Thanks for your support.

If I can be of any assistance in helping the passage of your bill this session please call me.

Sincerely,

Walter J. Hickel Jr.

March 30, 2010

Governor Sean Parnell
P.O. Box 110001
Juneau, AK 99811-0001

Dear Governor Parnell,

I am writing to voice my support of HB 422 and SB 311.

Sitka has already lost many jobs to the reduction in visitor numbers and 2010 will prove to be disastrous to many small businesses. Although many of those jobs may be seasonal in nature, they are important to our economy.

To bring in more visitors, it is imperative the State address **two** issues. We must reduce the cost of operations in Alaska for the cruise industry and we must increase the State's marketing effort.

Alaska needs to have our "open for business" sign back on. The high cost of taxes and other mandates on the cruise industry has made Alaska no longer competitive in the global market. While we have been busy coming up with more expenses, other areas have been courting the cruise lines with lower costs and a welcoming atmosphere.

In addition to addressing tax policies, Alaska **must** increase its marketing. Other destinations are becoming more aggressive to attract visitors. We do not have the funds to compete with these destinations causing a loss of market share. Increased marketing will drive demand for more ships and bring in more air, marine highway, and road visitors.

I wholeheartedly support this legislation. We need to stop bickering over small details and get something started before we lose another visitor season.

Thank you for the support you have shown us.

Regards,

Debbie Reeder
Executive Director

March 30, 2010

The Honorable Governor Sean Parnell
Governor of Alaska
Juneau, AK 99801

Dear Governor Parnell:

The Seward Chamber of Commerce, Conference and Visitors Bureau would like to thank you for your efforts to strengthen Alaska's economy through tourism marketing and partnership with the cruise line industry. We applaud your travel to Miami and your willingness to engage with the cruise industry, and important facet of Seward's economy.

On March 15th, the Seward Chamber Board of Directors approved Resolution 2010-03 urging the Alaska State Legislature to support the passage of the Alaska Tourism Marketing Tax Credit bill (SB 138/HB 167). Since our passage of Resolution 2010-03, we were pleased to see your proposed legislation introduced into both the State Senate and House, legislation which both encourages investment into tourism marketing and sustains jobs by reducing the cost of doing business in Alaska.

It is critical in today's economy that the State take action to help our businesses remain viable and retain those jobs tied directly and indirectly to tourism. Seward is fortunate to have a diversified economy; tourism plays an important role in that balance. Beyond seasonal employment, this impact is year-round: government positions tied to Kenai Fjords National Park; a rail line that supports not only seasonal passenger travel, but year-round coal export and barge activities; cruise ship-capable berths and terminal facilities that support cargo dockings, AMHS maintenance, and visits by military vessels; and purchase of locally-processed commercial fish.

We fully support your respective bills, SB311 and HB422, which, in addition to implementing a tourism tax credit, goes a step further by reducing the fees associated with cruise visitors traveling to our great state. Thank you for your leadership on this important issue.

Sincerely,

Laura L. Cloward

Laura Cloward, Executive Director

Subject: Tourism Bill HB 422 & SB 311-Frank Flavin Photographer

Dear Governor Parnell,

Our sincere thanks to you for visiting with the cruise industry in Florida.
One on one communication is no doubt the best way to understand everyones point of view.

Additionally we thank for your proposal to change legislation to:

Reduce the $46.00 head tax to $34.50
Provide credit for local head taxes.
Require the state to review tax rates every three years to help ensure funds are aligned with infrastructure needs.
Allow tourism revenue be reinvested to marketing Alaska, through a corporate tax credit.
Adequately fund the State's travel marketing program.
Provide for a stable marketing funding model.
Making Alaska more competitive.
Resolve legal challenges.

Competition and add on taxes is a large factor.
Here are some current competition budgets:

Hawaii	2010 Budget	71.4 Million	
Alberta,Canada	2010 Budget	71 Million	
British Columbia	2010 Budget	50 Million	
Mexico	2006 Budget	150 Million	Unable to find 2010 Budget-Tight Lipped.

Alaska's budget of 11.7 Million is not much of a comparison or a competitor.

My family has been involved with tourism in Alaska for over 25 years and since the Cruise Tax of 2006 our business, our bread & butter, has declined due to increased marketing from other tour destinations and withdrawal of marketing dollars by existing companies who must move there operations to less restrictive and more profitable locations.

We sincerely hope that the legislators will listen to your proposals to HB 422 & SB 311.

Thank you for trying to make Alaska the best it can be for all Alaskans.

Sincerely,

March 30, 2010

State of Alaska

Juneau, AK

I wish to offer my support for your proposal addressing the issue of the decline of visitor tourism. I was opposed to Measure 2 when it was on our ballot. We have witnessed the cruise line reduction of business in Alaska. Your plan would make us more competitive and help turn things back to the right direction.

Tourism is ext remely important to Alaska. Marketing is a key to tourism. Making our location attractive to the cruise lines is very important.

Push this agenda through!

Sincerely,

Ann Reddig

YOUR COMMENTS: Dear Governor Parnell,

I would like to thank you for introducing a bill to help the tourism industry by reducing the head tax. Although the economy of Alaska reaches far and wide, from Oil to Tourism, we are but one heart beat. Without every aspect of the economy, when it rings in the cash register, it is one more heart beat for Alaska. I appreciate your efforts of traveling to Florida and meeting with the cruise lines and SeaTrade. I urge you to stay strong and keep the faith, even though you may get opposition from special interest groups. Remember, those groups are people whose agenda is simply to get rid of the cruise industry altogether. My husband and I were with the group from Alaska ACT that met wit h you in January. As my husband said to you at that time, "Our little town of Haines is depending on you". So, thank you for your time that you have taken to meet with the cruise lines and we do appreciate your interest. If you can get the bill through, we will do what we do best, show them the real Alaska.

The last thing we want to hear is "Alaska is no longer open for business".

In addition to addressing tax policies, Alaska must increase its marketing. Other destinations are becoming more aggressive to attract visitors. We do not have the funds to compete with these destinations causing a loss of market share. Increased marketing will drive demand for more ships and bring in more air, marine highway, and road visitors.

Sincerely,

Karen M. Hess

YOUR COMMENTS: Govenor Parnell,

I just wanted to applaud the job that you have done in listening to the tourism industry and proposing a middle ground alternative to the head-tax initiative. I run a small family tour business in Juneau. The capacity reduction this year is going to be tough to deal with, but with you at the helm, our future looks much better.

The original inititive was written by people who want to push tourism out of Alaska. Thank you for understanding the big picture and for supporting our industry! If you ever want to go out on a fishing trip or whale watching we'd love to take you out on a complimentary trip.

May God bless you and your family,

Louis Juergens

Executive Summary

Introduction

The purpose of this study is to measure the economic impacts of Alaska's out-of-state visitors. The visitor industry is a challenging one to measure, reaching into a wide variety of economic sectors, including transportation, lodging, and retail, among others. The nationwide economic crisis of 2008-09 and accompanying drop in visitor traffic and spending added urgency to the need for up-to-date information on this critical component of Alaska's economy. The Alaska Department of Commerce, Community, and Economic Development contracted with McDowell Group to gauge the impacts of Alaska's visitor industry, including direct, indirect, and induced effects.

Visitor Volume and Spending

- An estimated 1.58 million out-of-state visitors traveled to Alaska between May and September 2009. Two-thirds of this total (1,026,600, or 65 percent) were cruise passengers. An additional 242,500 out-of-state visitors traveled to Alaska between October 2008 and April 2009.

- Visitor traffic to Alaska dropped an estimated 7.3 percent between summer 2008 and summer 2009, the largest decline since McDowell Group started tracking visitor traffic in 1985. The decrease occurred primarily in air passenger exits, which dropped an estimated 15 percent. Ferry exits fell 16 percent, and highway exits were down 8 percent.

- Declines in the air, ferry, and highway markets were moderated by flat cruise passenger volume between 2008 and 2009. However, cruise passengers traveled less within the state, more often choosing cruise-only packages (rather than cruise-plus-land tour packages).

Visitor Volume, by Exit Mode, Summers 2008 and 2009

Exit Mode	2008	2009	% change
Air	800,600	684,400	-14.5%
Cruise ship[1]	836,500	835,000	-0.2%
Highway	59,900	55,200	-7.8%
Ferry	10,400	8,700	-16.3%
Total	**1,707,400**	**1,583,300**	**-7.3%**

[1] The total number of cruise ship visitors to Alaska in summer 2009 was 1,026,600, including passengers exiting Alaska by air after completing their cruise.

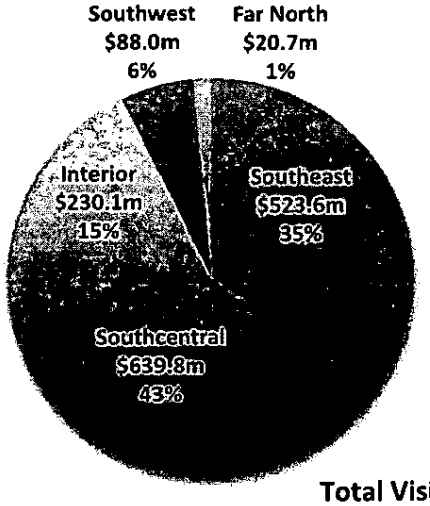
- Another impact felt by businesses throughout the state was lower spending levels. Many businesses were forced to lower their prices to compete for fewer visitors, and visitors themselves tended to spend less on everything from lodging to gifts and tours. A survey of 172 visitor industry businesses found that two-thirds of businesses experienced a decrease in gross sales to out-of-state visitors (11 percent reported an increase, 7 percent reported no change, and 14 percent didn't know). The average estimated change in gross sales among all surveyed businesses was a decline of 16 percent.

- A number of additional indicators reinforce the lower volume and spending estimates in summer 2009:
  - 13 percent decline in cruise passenger land tour volume
  - 16 percent decline in out-of-state visitors on the Alaska Marine Highway
  - Bed tax revenue declines (second and third quarter only) ranging from 10 percent in the Mat-Su, to 22 percent in Anchorage, to 30 percent in Sitka
  - 23 percent decline in Anchorage car rental tax revenues (second and third quarter only)
  - 16 percent decline in non-resident sportfishing license sales (calendar year 2008 to 2009).

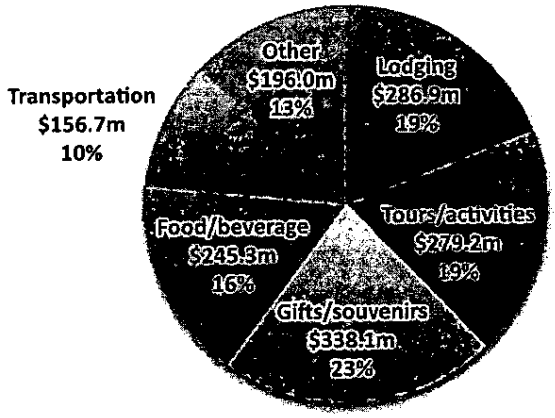
- In contrast, fall/winter visitor volume was down only 2 percent from the previous fall/winter period (2007-08). However, surveyed businesses reported slightly larger declines in gross sales, an average of 8 percent. Some decreases were reported in bed tax revenues over this period, including a 6 percent decrease in Anchorage (first and fourth quarter only).

- Out-of-state visitors spent an estimated $1.5 billion in Alaska during the study period of October 2008 through September 2009. This figure does not include spending on travel to enter and exit Alaska (such as cruise packages, ferry passage, or air tickets). Spending figures are based on visitor survey data from the 2006-07 *Alaska Visitor Statistics Program*, conducted by McDowell Group, adjusted to account for changes in overall visitor volume, volume by region, spending behavior, and inflationary factors. Spending was further adjusted to extract commissions that do not affect the Alaska economy.

Visitor Spending, Oct. 2008-Sept. 2009 By Region



Visitor Spending, Oct. 2008-Sept. 2009 By Sector



Total Visitor Spending: $1.5 Billion

- Additional visitor industry spending that must be taken into account for the purposes of economic impact analysis includes spending by cruise lines, estimated at over $300 million during the 2008-09 study period. The largest components of cruise line spending include employee payroll, payments to local and state government on taxes and fees, payments for transportation services, and payments to accommodations (on behalf of cruise/tour passengers traveling before or after their cruise, whose package price includes lodging).

- Crew members sailing on board cruise ships spent an estimated $16 million while visiting Alaska ports.
- Further, the visitor spending above excludes spending to enter and exit the state. An estimated $282 million in visitor spending on air and ferry tickets to enter and exit the state affects the Alaska economy.
- This additional $610 million in spending by cruise lines, crew members, and visitors purchasing air and ferry tickets brings total *visitor industry* spending in 2008-09 to $2.1 billion.

Visitor Industry Spending, October 2008-September 2009

	Expenditures
Visitor spending	$1,502.2 million
Cruise line spending, cruise line labor income, and crew spending	$328.4 million
Air and ferry tickets	$282.2 million
Total spending	**$2.1 billion**

Economic Impacts

- Direct visitor industry spending in Alaska of approximately $2.1 billion in the 2008-09 study period directly generated 27,100 jobs in Alaska, and $800 million in labor income.
- Indirect or secondary visitor-related spending totaled approximately $1.3 billion. The statewide employment and income effects of $1.3 billion in secondary spending are estimated at 9,100 jobs and $346 million in labor income.
- In summary, Alaska's visitor industry accounted for a total of 36,200 full and part-time jobs in 2008-09, over $1.1 billion in labor income, and $3.4 billion in total spending, including all direct, indirect and induced effects.
- The visitor industry is strongly seasonal, with the vast majority of visitation occurring between May and September. Therefore, peak employment directly or indirectly connected to the industry is estimated at over 40,000 in 2009.
- Approximately half (49 percent) of visitor industry employment occurred in the Southcentral region, and slightly less than one-third (29 percent) in Southeast. About one in six (17 percent) visitor industry-related jobs were in the Interior region.

Total Visitor Industry Employment, Labor Income and Spending in Alaska, October 2008-September 2009 (including direct, indirect and induced effects)

	Employment	Labor Income	Spending
Southcentral	17,600	$514 million	$1,751 million
Interior	6,200	205 million	519 million
Southeast	10,600	373 million	1,004 million
Southwest	1,500	41 million	115 million
Far North	300	10 million	25 million
Total	**36,200**	**$1.1 billion**	**$3.4 billion**

- Compared to other Alaska regions, visitor industry employment is most important in the Southeast economy. The region's 10,600 visitor-related jobs represented 21 percent of the total 50,000 full and part-time jobs in Southeast. Total visitor industry-related labor income of $373 million was 17 percent of total regional labor income of approximately $2.2 billion.

- In Alaska's Interior region, 6,200 visitor industry-related jobs accounted for about 9 percent of employment (regional total of 65,500 jobs) and 6 percent of all labor income (regional total of $3.4 billion).

- Visitor industry-related employment of 17,600 in Southcentral Alaska represented approximately 7 percent of total employment in the region (263,000 full and part-time jobs) and 4 percent of total labor income (approximately $13.7 billion).

- Statewide visitor industry-related employment of 36,200 accounted for 8 percent of all employment in Alaska. Total statewide visitor industry-related labor income of $1.1 billion represented 5 percent of all labor income in Alaska.

Impacts of Visitor Volume Changes

- The decline in visitor traffic between 2007-08 and 2008-09 was accompanied by an estimated $270 million decline in visitor spending, a 15 percent drop.

- As a result of the decline in visitor spending in 2009, summer season visitor industry-related employment in Alaska was about 2,000 to 2,500 jobs below the 2008 level. Businesses likely addressed the decline in visitor sales with a combination of reductions in personnel and non-personnel costs. As such, the decline in employment in 2009 was less than proportional to the decline in sales.

- Alaska is facing a loss of more than 140,000 passengers in the 2010 cruise season, accompanied by a potential loss of up to $150 million in direct and indirect spending in Alaska.

Revenues to Municipal and State Governments

- Visitor-related tax revenues to municipalities in 2008-09 totaled nearly $70 million in sales and bed tax revenues and cruise line payments. Sales tax revenues are estimated at $28.9 million, and bed tax revenues are estimated at $23.5 million. In addition, cruise lines paid over $17 million in dockage, moorage, and municipal passenger fees in 2009. Property taxes provide an additional revenue stream to municipalities.

- Visitor-related revenues to state government during the 2008-09 study period included $139 million in cruise line fees, fishing/hunting licenses, vehicle rental taxes, revenues to Alaska Marine Highway and Alaska Railroad, and corporate income taxes. Cruise lines alone paid $58 million in commercial passenger vessel fees, gambling taxes, Ocean Ranger Program fees, and Environmental Compliance Program fees.

Selected Revenues to Municipal and State Governments
October 2008-September 2009

	Revenues
Municipal Revenues	**$69.8 million**
Sales tax revenues	$28.9 million
Bed tax revenues	$23.5 million
Dockage/moorage revenues	$17.4 million
State of Alaska Revenues	**$138.8 million**
Commercial Passenger Vessel Tax	$46.4 million
Passenger Gambling Tax	$6.3 million
Ocean Ranger Program	$4.0 million
Commercial Passenger Vessel Environmental Compliance Program	$1.0 million
Non-resident fishing/hunting/trapping licenses and tags	$17.1 million
Alaska Marine Highway revenues	$17.6 million
Alaska Railroad revenues	$19.4 million
Vehicle rental tax	$5.6 million
Corporate income tax	$21.4 million
Total Selected Revenues	**$208.6 million**

Introduction and Methodology

Introduction

The most recent comprehensive assessment of the economic impact of Alaska's non-resident visitor industry was conducted in 1999 (by McDowell Group).[1] Since then, visitor volume has increased substantially, as has visitor spending and the number of visitor industry businesses, warranting re-assessment of the economic impact of one of Alaska's most important basic industries. Recent changes in Alaska's visitor industry added urgency to the need for an up-to-date economic impact measurement. The global economic recession in late 2008 and 2009 fundamentally affected Alaska visitor traffic and spending.

The Alaska Department of Commerce, Community, and Economic Development contracted with McDowell Group to measure the regional and statewide economic impact of Alaska's visitor industry in fall 2008 through summer 2009, including direct, indirect and induced effects. In addition to measuring visitor-related spending, employment, payroll and tax payments over a one-year period, the study provides objective, quantitative information on how recent events have affected Alaska's visitor industry.

Methodology

Visitor Volume

The last primary data collection on visitor volume was conducted (by McDowell Group) in 2006-07 as part of the *Alaska Visitor Statistics Program V* (AVSP). Visitor/resident ratios were collected at airports, onboard ferries, and at border stations as visitors exited Alaska. Since 2006-07, McDowell Group has estimated visitor volume by applying 2006-07 visitor/resident ratios, by month and location, to traffic statistics (ferry embarkations, highway exits, and airplane enplanements). Prior to this study being undertaken, this exercise was completed for the study periods (fall/winter 2008-09 and summer 2009). Sources for traffic data included: Cruise Line Agencies of Alaska, Alaska Marine Highway System, Yukon Department of Tourism and Culture, Alaska Airlines, and the Anchorage and Fairbanks airports.

Since the 2009 season was so different from previous years in terms of visitor volume, and because it has been three years since the original ratios were determined, the original summer 2009 visitor volume estimates were adjusted to more accurately reflect the latest visitor season.

In order to gather information on the 2009 season, and how it differed in terms of visitor volume and spending from previous seasons, a survey of visitor industry businesses was conducted in early 2010. A total of 172 businesses were interviewed by the study team. Specific businesses were targeted in order to obtain a representative cross-section of visitor businesses across business type and location, as well as businesses representing the largest amount of visitors (cruise lines, Alaska Railroad, Alaska Airlines, etc.). Most businesses

[1] The Office of Economic Development commissioned a Tourism Satellite Account in 2004 that measured the economic impact of all travel and tourism activity in the state; however, the data from that study is not comparable with this study or previous studies.

were selected from the mailing list of the Alaska Travel Industry Association. Other sources included the websites of Convention and Visitors Bureaus and *The Milepost* guidebook.

Businesses were asked about their visitor markets (cruise, air, highway/ferry), seasonality, and percentage increase or decrease from 2008 to 2009 in both visitor volume and gross sales, among other questions. Nearly all businesses contacted were willing to participate, and often offered additional perspectives on the 2009 season, and/or described factors affecting their particular business.

Additional sources considered in the volume adjustments included:

- Information provided by Alaska Airlines and Alaska Marine Highway on resident travel.
- Land tour passenger volume data provided by cruise lines.
- Bed tax revenues collected from the following municipalities and boroughs: Anchorage, Fairbanks, Denali, Juneau, Mat-Su, Sitka, and Valdez. (Other communities either did not have a bed tax or were unable to provide 2009 data.)
- Vehicle rental tax revenues collected from the Municipality of Anchorage.
- Fishing and hunting license sales data from the Alaska Department of Fish and Game.
- Previous studies conducted by McDowell Group, including economic impact studies for the Juneau Convention and Visitors Bureau, Ketchikan Visitors Bureau, and the Alaska Cruise Association.
- Employment data from the Alaska Department of Labor and Workforce Development.

Fall/winter visitor volume was not adjusted, reflecting the flat traffic trends and little change reported in the business survey.

Visitor Spending

As with visitor volume, the last primary data collection on visitor spending was conducted for AVSP V in 2006-07. The survey of visitor businesses conducted for this study provided valuable data on how visitor spending changed in 2009 compared to previous seasons. Another important source of information was shore excursion sales data provided by cruise lines, showing changes in cruise passenger spending patterns over the last several years.

All of the sources cited above (bed tax revenues, vehicle rental tax revenues, and previous economic impact studies) were taken into consideration in determining the spending adjustments. Inflation was also accounted for, by economic sector, based on the Anchorage Consumer Price Index.

Additional Visitor Industry Spending

Additional visitor industry spending includes cruise line spending, crew member spending, and spending on air and ferry tickets to enter and exit Alaska.

- Cruise line spending was derived from expenditure and payroll data provided by cruise lines for a study of the 2007 season, prepared for Alaska Cruise Association (ACA granted permission to use this data for the current study). Spending was adjusted to account for inflation as well as the drop in land tour volume between 2007 and 2009. (Overall passenger volume was flat between the two years.)

- Crew member spending was based on previous surveys of crew members conducted by McDowell Group, modified to account for changes in crew member volume by port.

- Spending on air tickets was based on average Seattle-Alaska airfares, estimated volume by location, and an assumption that roughly half of spending on air tickets to enter and exit Alaska actually stays in Alaska.

- Spending on ferry tickets was based on reported spending in AVSP V, adjusted for inflation, and estimated visitor volume entering and exiting Alaska via ferry. All spending on ferry tickets was assumed to stay in Alaska.

Economic Impact Analysis

McDowell Group maintains an Excel-based visitor industry economic impact model for assessing the effects of visitor industry-related spending in Alaska. Estimates of direct visitor industry employment and payroll are derived from visitor industry spending estimates, and verified using employment and payroll data from the Alaska Department of Labor and Workforce Development and U.S. Bureau of Economic Analysis. The model incorporates IMPLAN multipliers to estimate indirect and induced impacts. IMPLAN is a predictive input-output model of local and state economies, and is widely used to measure the economic impact of industries and industrial/commercial development. Indirect effects include those jobs and income created as a result of visitor industry businesses purchasing goods and services in support of their business operations. Induced effects include jobs and income created as a result of employees of the visitor industry spending their payroll dollars in support of their households. Together, indirect and induced impacts are often termed "multiplier effects."

Visitor Industry Tax Revenues

The report includes estimates of tax revenues to municipalities and state government from out-of-state visitors, to the extent possible.

Regional sales tax revenue estimates were calculated based on visitor industry spending and visitor volume at the community and regional level. Bed tax revenues were based on data from the business survey (where accommodations reported the percentage of their business from out-of-state visitors) as well as previous visitor volume and survey research. For both bed and sales tax estimates, tax rates and total taxes collected by community (from the *Alaska Taxable* report, 2009) were taken into account in the analysis. Total calendar year 2009 taxes were assumed as a proxy for the study period of October 2008 through September 2009. Cruise ship dockage/moorage revenues were collected from municipalities.

Cruise line payments to the State of Alaska were reported by the Departments of Revenue and Environmental Conservation. Fishing and hunting licenses and tag revenues were reported by the Department of Fish and

Game. Vehicle rental taxes were reported by the Department of Revenue, adjusted to account for out-of-state visitors (using business survey results). The Department of Revenue also reported corporate income taxes associated with the visitor industry. An Alaska Railroad official reported passenger-related revenues and the percentage attributable to out-of-state visitors.

Visitor Volume, Summer 2009

An estimated 1.58 million out-of-state visitors came to Alaska between May and September, 2009. Over half of these visitors (53 percent) exited the state via cruise ship; 43 percent exited via air; 3 percent exited via highway; and 1 percent exited via ferry.

Because some cruise ship visitors exit the state by air after completing their cruise, it is also useful to consider volume in terms of cruise and non-cruise visitors. As the chart below shows, 65 percent of all summer visitors spent at least one night on a cruise ship while in Alaska.

Chart 1
Alaska Visitor Volume, Summer 2009
By Exit Mode

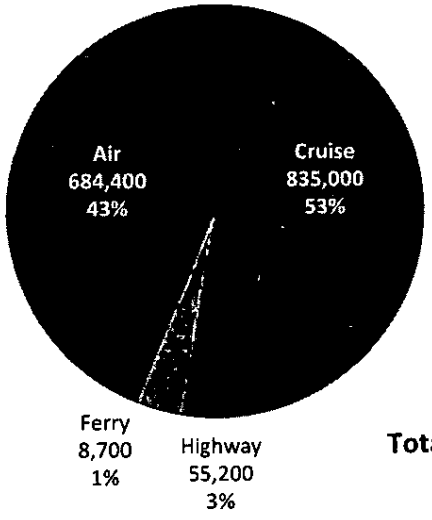


Chart 2
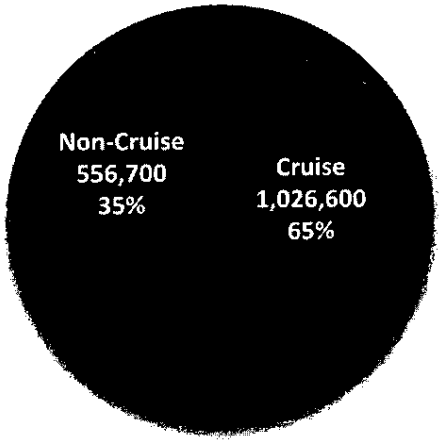
Cruise Market Share, Summer 2009



Total Visitors: 1.58 million

Visitor Volume Decline, 2008 to 2009

Visitation to Alaska dropped an estimated 7.3 percent between summer 2008 and 2009. While cruise passenger volume remained essentially the same, air visitor traffic decreased by 15 percent (from 800,600 to 684,400). Highway exits were down by 8 percent, while ferry exits decreased by 16 percent. (See table, next page.)

The visitor volume figures for air, ferry, and highway are based on visitor/resident ratios collected in summer 2006.[2] Additional information was taken into account to adjust the 2006 ratios, including: a survey of 172 visitor businesses on their 2009 season; reports from air carriers and the Alaska Marine Highway on resident travel; reports from cruise lines on in-state travel; and changes in bed tax revenues reported by municipalities.

[2] Because cruise passengers are assumed to be 100 percent visitors, and cruise passenger data is more measurable, there is less uncertainty in the cruise volume figures.

The overall decline of 7.3 percent may appear low in light of the larger decreases felt by many businesses in the state. It is important to keep several factors in mind when considering the overall decrease:

- Total cruise passenger traffic was flat; because cruise visitors represent two-thirds of overall visitation, this moderated the significant declines in the other modes.
- While total cruise passenger volume to Alaska did not change, there was a significant decrease in the number of passengers who purchased land tours, translating to less in-state travel, particularly to Fairbanks and Denali. These decreases are not reflected in total traffic volume.
- Because visitors were reportedly spending less money while in Alaska, their impact in terms of dollars spent was more dramatic than their decrease in volume.

Please see the chapter in this report on "Recent Changes" for a more detailed discussion on the summer 2009 visitor season, along with survey data and other indicators.

Table 1
Visitor Volume, by Exit Mode, Summers 2008 and 2009

Exit Mode	2008	2009	% change
Air	800,600	684,400	-14.5%
Cruise ship[1]	836,500	835,000	-0.2%
Highway	59,900	55,200	-7.8%
Ferry	10,400	8,700	-16.3%
Total	**1,707,400**	**1,583,300**	**-7.3%**

[1] The total number of cruise ship visitors to Alaska in Summer 2009 was 1,026,600, including passengers exiting Alaska by air after completing their cruise.

Visitor Volume, Fall/Winter 2008-09

An estimated 242,500 out-of-state visitors came to Alaska between October 2008 and April 2009. Nearly all of these visitors (95 percent) exited the state via airplane, while 5 percent exited via highway or ferry. Fall/winter 2008-09 saw a slight (2.0 percent) decrease in visitor volume from fall/winter 2007-08. Air visitor exits were down by 1.9 percent, and highway visitor exits were down by 4.0 percent. While ferry volume increased, it had little impact on overall volume, as ferry exits represent less than 1 percent of all fall/winter visitors.

(These estimates are unchanged from the previously published report on fall/winter visitor volume 2008-09. The survey of visitor businesses revealed no significant changes in visitation between 2007-08 and 2008-09. Please see the chapter on "Recent Changes" for more detailed survey results.)

Table 2
Visitor Volume, by Exit Mode, Fall/Winter 2008-09

Exit Mode	Number of Visitors
Air	231,300
Highway	9,700
Ferry	1,500
Total	**242,500**

Visitor Industry Spending

The spending figures presented below are based on survey data from the 2006-07 *Alaska Visitor Statistics Program V*, conducted by McDowell Group for the Alaska Department of Commerce, Community, and Economic Development. To update these spending figures to 2008-09, the study team took into account changes in the visitor market since 2006-07 in terms of visitor volume, visitor type, and spending behavior. Information sources for estimating the effects of these changes included:

- Survey of 172 visitor businesses on changes in their business in terms of both volume and sales from previous seasons. (For detailed survey results, please see the chapter on "Recent Changes.")
- Traffic data including air passenger data from airports and Alaska Airlines; ferry passenger data from the Alaska Marine Highway; cruise passenger data from Cruise Line Agencies of Alaska; and highway border traffic from the Yukon Department of Tourism and Culture and U.S. Customs.
- Data on cruise passenger spending on shore excursions provided by cruise lines.
- Land tour passenger volume data provided by cruise lines.
- Bed tax revenues collected from the following municipalities and boroughs: Anchorage, Fairbanks, Denali, Juneau, Mat-Su, Sitka, and Valdez. (Other communities either did not have a bed tax or were unable to provide 2009 data.)
- Vehicle rental tax revenues collected from the Municipality of Anchorage.
- Inflation factors, by economic sector, based on the Anchorage Consumer Price Index.
- Employment data from the Alaska Department of Labor and Workforce Development.

Visitor Spending, Summer 2009

Out-of-state visitors to Alaska spent an estimated $1.31 billion in Alaska between May and September 2009. This figure includes instate spending only, excluding the cost of transportation to and from the state, such as air tickets, cruise or cruise/tour packages, and ferry tickets.

While cruise visitor spending on cruises and cruise/tour packages is excluded in this figure, cruise line spending in Alaska is accounted for in the economic impact analysis, and is addressed further, below. This spending includes payments to hotels, motorcoach companies, the Alaska Railroad, and other components of land tours that are included in the cruise package price.

For the purposes of this study, tour commissions were extracted from passenger spending data because they accrue directly to travel agents, tour operators, and cruise lines at the time of the sale.

Spending by Region

In the 2006 AVSP survey, respondents were asked to estimate how much they spent in each community they visited. This spending was updated to reflect 2009 visitation by region and changes in spending behavior, among other factors. The chart below shows how summer visitor spending is distributed throughout the state. Southeast and Southcentral account for the bulk of visitor spending at 39 percent each, followed by the Interior at 15 percent, Southwest at 6 percent, and Far North at 1 percent.

Spending by Sector

In the 2006 AVSP survey, respondents were asked to estimate how much they spent by spending category (lodging, tours/activities/entertainment, gifts/souvenirs/clothing, food/beverage, cars/fuel/ transportation, and other). Spending estimates were updated to reflect changes in visitor volume and spending behavior in 2009. Total spending by sector is presented in the chart below.

Visitor spending is widely distributed, with no one category accounting for more than one-quarter of spending. The largest sectors were gifts/souvenirs/clothing at 23 percent, tours/activities/entertainment at 21 percent, and lodging at 17 percent. Readers are reminded that all tour commissions have been excluded from the tours/activities category. The "other" category is primarily spending on lodge packages within one community.

Chart 3
Visitor Spending, Summer 2009, by Region

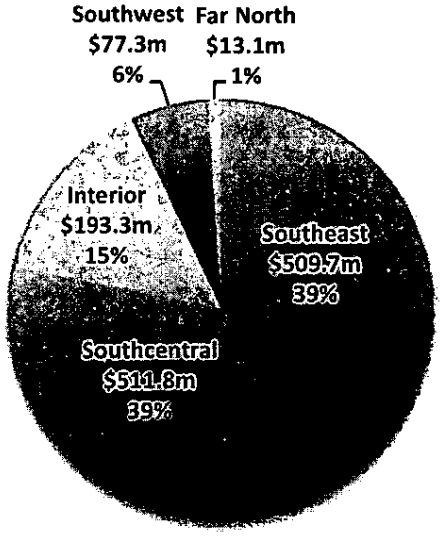


Chart 4
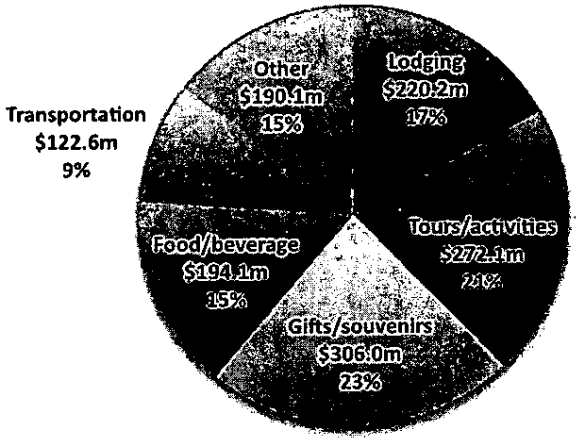
Visitor Spending, Summer 2009, by Sector



Total Summer Visitor Spending: $1.3 Billion

Visitor Spending, Fall/Winter 2008-09

Out-of-state visitors spent an estimated $197 million in Alaska between October 2008 and April 2009. This figure excludes spending on air and ferry travel to enter and exit the state. Like the summer spending figures, the basis for the fall/winter spending estimates is survey results from 2006-07. However, fewer adjustments were necessary to update these figures: volume only dropped by 2 percent between 2007-08 and 2008-09 (3 percent since 2006-07), in contrast to summer traffic. The data was updated to reflect a small decrease reported in the business survey and corroborated in other data such as bed and vehicle tax revenues. It was also adjusted to reflect the effects of inflation, by sector.

Spending by Region

In contrast to summer season spending, fall/winter visitor spending is much more focused in the Southcentral region, which accounts for two-thirds of all fall/winter spending. This reflects the much higher visitor traffic to the Southcentral region, nearly all of it to Anchorage. One-fifth of spending occurs in the Interior region, while Southeast, Southwest, and Far North each account for less than 10 percent of fall/winter spending.

Spending by Sector

Fall/winter visitor spending is more focused in the lodging and food/beverage categories when compared to the summer season, when gifts/souvenirs and tours/activities are the top two spending categories. This different spending pattern reflects the very different make-up of the fall/winter market: few visitors are shopping for vacation/pleasure purposes, and instead are much more likely to be traveling for business or to visit friends or relatives. They are therefore much less likely to participate in tours or purchase souvenirs.

Chart 5
Visitor Spending, Fall/Winter 2008-09
By Region

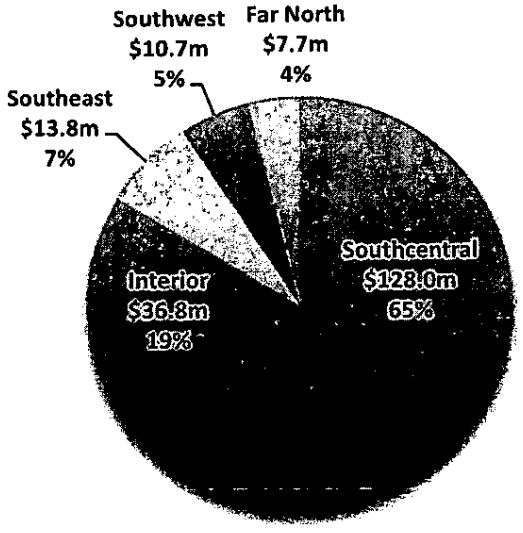


Chart 6
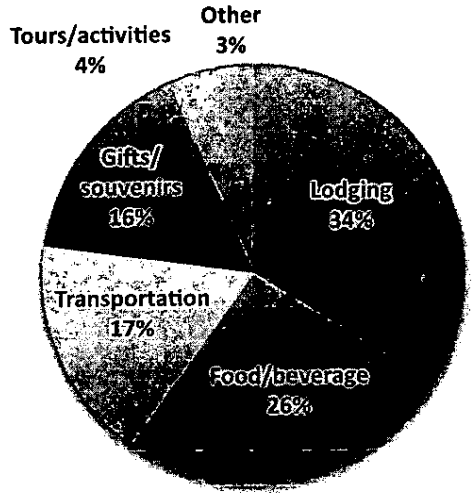
Visitor Spending, Fall/Winter 2008-09
By Sector



Total Fall/Winter Visitor Spending: $197 Million

Additional Visitor Industry Spending

Cruise Line Spending and Payroll

Cruise lines and their subsidiaries spent approximately $250 million on goods and services from Alaska businesses during the 2008-09 study period. This estimate is derived from detailed 2007 purchasing information provided by six major cruise lines for a report conducted by McDowell Group on cruise industry impacts for the Alaska Cruise Association. (Permission was granted by ACA to use the cruise line data for the purposes of this study.) The data was sorted to eliminate spending outside of Alaska, as well as payments to tour vendors accounted for under passenger spending.

To develop an estimate of 2009 cruise line spending, the 2007 spending data was adjusted to account for differences in the cruise market between 2007 and 2009, including a drop in land tour participation. (Total passenger volume was essentially the same between the two years.) The 2007 data was also adjusted to account for the effects of inflation.

One-third of all cruise line spending accrues to government in the form of taxes and fees. Transportation spending accounts for over one-fifth of all cruise line spending, while the accommodations sector receives 17 percent of all spending.

In addition to spending in Alaska on goods and services, cruise lines also paid their Alaska employees a total of approximately $62 million in payroll and benefits. Cruise lines directly employed approximately 1,800 workers in Alaska in 2009, including motorcoach drivers, hotel employees, and other shoreside personnel. This does not include any shipboard personnel.

Crew Spending

Approximately 25,000 crew members visited Alaska in 2009, each crew member generally sailing on 10 to 20 individual voyages, visiting multiple communities on each voyage. Crew members make a wide variety of purchases while in port: they visit restaurants and bars; they purchase communication-related items such as phone cards, Internet, and postage; and they visit retail outlets such as Fred Meyers, Costco, and Wal-Mart. Spending data for crew is primarily based on surveys of crew members previously conducted by McDowell Group, updated to reflect 2009 crew member visitation.

Table 3
Crew Member Spending, By Region, Summer 2009

	Total Spending
Southeast	$16.1 million
Southcentral	$0.3 million
Total	**$16.4 million**

Visitor Spending on Air and Ferry Travel

Air Travel

Although visitors did not report their spending on airplane tickets to enter and exit the state in the 2006-07 AVSP, a rough estimate is necessary to complete the picture of visitor spending in 2008-09. Visitor spending

on air travel impacts the state's economy in the form of landing fees, fuel purchases, airline employee wages, and other purchases in support of airline operations.

To estimate visitor spending on air travel, the estimated number of air visitors was multiplied by average Seattle-Alaska round-trip fares, for both summer ($600) and fall/winter ($500). One-half of the total ticket spending was assumed to stay in-state. Spending was distributed by region based on exiting air traffic. This methodology is inexact: passengers fly to and from various destinations with various pricing, and many passengers fly to or from points other than Seattle. In the absence of more specific data, this provides a reasonable and conservative estimate of impacts from visitor spending on airfare in and out of the state. (See table, below.)

Ferry Travel

Similar to airplane tickets, spending on ferry tickets to enter and exit Alaska are not included in the initial visitor spending estimates because the expenditures are not "out-of-pocket." To estimate this spending, the total number of visitors estimated to have entered or entered Alaska by ferry from fall 2008 through summer 2009 was multiplied by the average spending on ferry tickets reported in AVSP, with adjustments for inflation. This results in a total spending estimate of $11.4 million. This does not include spending on in-state ferry travel by visitors, which is captured elsewhere in the expenditure data. For the purposes of economic impact analysis, all ferry spending is attributed to Southeast because all ferries entering and exiting Alaska sail between Southeast ports and Bellingham or Prince Rupert (though visitors sailing to Southcentral and Southwest ports clearly have economic benefit to those regions).

Table 4
Visitor Spending on Air and Ferry Travel to Enter/Exit Alaska
October 2008-September 2009

	Air Travel	Ferry Travel
Southcentral	$209.0 million	n/a
Southeast	$25.5 million	$11.4 million
Interior	$36.3 million	n/a
Total	**$270.8 million**	**$11.4 million**

Full Year Visitor Industry Spending

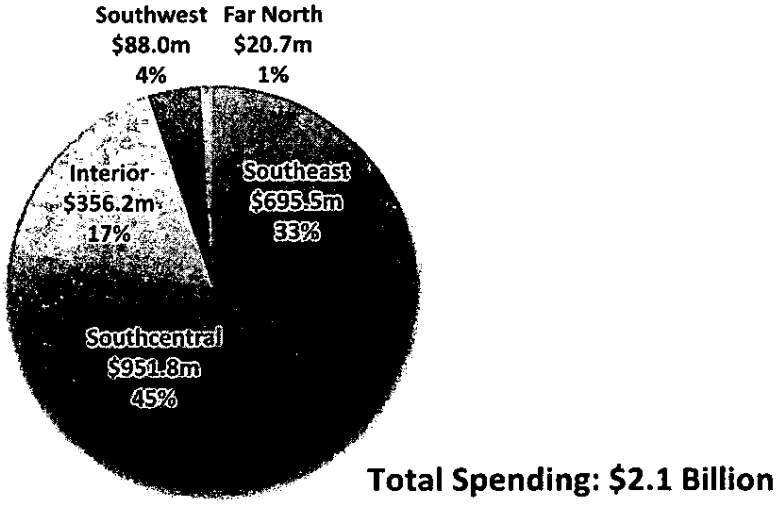
The table below shows full year (October 2008 through September 2009) visitor industry spending, combining the spending by visitors, cruise lines, and crew members, along with spending on air and ferry tickets to enter/exit Alaska. The total figure of $2.1 billion is primarily focused on visitor spending, which accounts for 71 percent of total spending.

Table 5
Visitor Industry Spending, October 2008-September 2009

	Expenditures
Visitor spending	$1,502.2 million
Cruise line spending	$250.0 million
Cruise line payroll spending	$62.0 million
Crew member spending	$16.4 million
Air tickets	$270.8 million
Ferry tickets	$11.4 million
Total spending	**$2.1 billion**

The chart below shows how visitor industry spending is distributed by region. Regionally, Southcentral captures the largest share at 45 percent, followed by Southeast at 33 percent, Interior at 17 percent, Southwest at 4 percent, and Far North at 1 percent.

Chart 7
Visitor Industry Spending, October 2008-September 2009, By Region



Economic Impact Analysis

Spending in Alaska by visitors and visitor industry businesses creates jobs, income, and business activity throughout the Alaska economy. Visitor spending creates jobs and payroll with tour companies, hotels and lodges, retail establishments, transportation providers, and a range of other business. Visitor industry businesses and their employees in turn re-spend a portion of that money with other Alaska businesses (some is spent outside Alaska).

For most industries in Alaska, it is possible to rely on government agencies to routinely report employment and payroll. However, because visitor activity directly affects a blend of numerous other industries (retail, transportation, services, and others) there are no regularly published data on visitor industry employment and payroll, either in Alaska or elsewhere in the U.S. Tourism "satellite accounts" have been developed for the purpose of isolating and measuring tourism economic activity; however, these efforts still fail to provide a true measure on tourism activity in Alaska because resident travel is included in the analysis. Therefore, for a pure analysis of the economic impact of non-resident visitor travel to Alaska, custom research and modeling is required. McDowell Group maintains an Excel-based visitor industry economic impact model for assessing the effects of visitor industry-related spending in Alaska.

All impact analysis refers to the October 2008 through September 2009 study period, abbreviated to "2009."

Direct Employment and Labor Income Effects

The visitor industry's direct economic impacts include the jobs and income created by:

- Non-resident visitor spending on all goods and services purchased while in Alaska.
- Half of visitor spending on air travel to Alaska (based on fares for travel from Seattle to Alaska destinations) and all visitor spending on Alaska Marine Highway tickets. None of the expenditures made by cruise passengers on their cruise package is included, though some of that money flows through the state in the form of cruise line purchases of goods and services.
- Spending in Alaska by cruise lines in support of their operations, including payroll for their shoreside employees in Alaska and all taxes and fees paid to state and local governments.
- Spending by cruise ship crew while in Alaska.

As described in the previous chapter, all these components of direct visitor industry spending totaled approximately $2.1 billion in the 12-month study period. This spending directly generated 27,100 full- and part-time jobs in Alaska, and $800 million in labor income, based on McDowell Group's economic impact modeling. Approximately half (46 percent) of direct visitor industry employment is in the Southcentral region, and approximately one-third (31 percent) is in Southeast.

Table 6
Visitor Industry Employment and Labor Income in Alaska, 2009
(direct effects only)

	Employment	Labor Income
Southcentral	12,600	$349 million
Interior	4,900	154 million
Southeast	8,300	256 million
Southwest	1,100	30 million
Far North	200	8 million
Total	**27,100**	**$797 million**

These employment and labor income estimates do not include multiplier effects, i.e., those jobs and income created in Alaska as the visitor dollar is re-spent by visitor industry businesses and their employees. In fact, modeling indicates that this secondary spending totaled approximately $1.3 billion. That amount, added to the initial direct spending of $2.1 billion, indicates total direct, indirect and induced spending of approximately $3.4 billion in 2009. The statewide employment and income effects of $1.3 billion in secondary spending are estimated at 9,100 jobs and $346 million in labor income. Regional direct and indirect employment and labor income totals are presented in the following tables.

Table 7
Direct, Indirect, and Total Visitor Industry Employment in Alaska, 2009

	Direct	Indirect	Total
Southcentral	12,600	5,000	17,600
Interior	4,900	1,300	6,200
Southeast	8,300	2,300	10,600
Southwest	1,100	400	1,500
Far North	200	100	300
Total	**27,100**	**9,100**	**36,200**

Table 8
Direct, Indirect, and Total Visitor Industry Labor Income in Alaska, 2009

	Direct	Indirect	Total
Southcentral	$349 million	$165 million	$514 million
Interior	154 million	51 million	205 million
Southeast	256 million	117 million	373 million
Southwest	30 million	11 million	41 million
Far North	8 million	2 million	10 million
Total	**$797 million**	**$346 million**	**$1,143 million**

In summary, Alaska's visitor industry accounted for a total of 36,200 jobs in 2009, and over $1.1 billion in labor income, including all direct, indirect and induced effects. It should be noted that this estimate of visitor industry-related employment is a tally of the total number of full and part-time jobs linked to non-resident visitor travel to Alaska in 2009. This tally includes annual average wage and salary employment, and total proprietors' employment (the total number of sole proprietorships or partnerships active at any time during the year). Though non-resident travel to Alaska occurs year-round, the visitor industry is strongly seasonal, with the vast majority of visitation occurring between May and September. Because of the seasonal nature of

the industry, estimates of annual average employment understate the total number of people directly employed in the industry during the peak of the travel season. In the accommodations sector, for example, wage and salary employment averaged about 7,700 jobs in 2009. Peak employment that year, in July, totaled 11,000 jobs. Alaska's "scenic & sightseeing transportation" sector is even more seasonal, with annual average employment of about 1,800 and peak employment of about 3,800, according to Alaska Department of Labor and Workforce Development data. Therefore, while this study measured 36,200 full and part-time jobs related to Alaska's visitor industry, the total number of workers whose jobs are directly or indirectly connected to the industry was over 40,000 in 2009.

Table 9
Total Visitor Industry Employment, Labor Income, and Spending in Alaska, 2009
(including direct, indirect, and induced effects)

	Employment	Labor Income	Spending
Southcentral	17,600	$514 million	$1,751 million
Interior	6,200	205 million	519 million
Southeast	10,600	373 million	1,004 million
Southwest	1,500	41 million	115 million
Far North	300	10 million	25 million
Total	**36,200**	**$1.1 billion**	**$3.4 billion**

Importance in Regional and Statewide Economies

Proportionately, visitor industry employment is most important in Southeast Alaska. Visitor industry-related employment of approximately 10,600 represented 21 percent of the region's 50,000 full and part-time jobs. Total visitor industry-related labor income of $373 million was 17 percent of total Southeast region labor income of approximately $2.2 billion.[3] In the Interior region the visitor industry accounted for about 9 percent of employment (out of a regional total of 65,500 jobs) and 6 percent of labor income (out of a regional total of $3.4 billion).

Total Southcentral employment of 17,600, represented approximately 7 percent of total employment in the region (about 263,000 full and part-time jobs) and 4 percent of total labor income (approximately $13.7 billion).

Statewide, visitor industry-related employment of 36,200 accounted for 8 percent of all employment. Total statewide visitor industry-related labor income of $1.1 billion represented 5 percent of all labor income in Alaska.[4]

Employment and Labor Income by Sector

Jobs created as a direct result of visitor spending are concentrated in five sectors of Alaska's economy. Visitor spending directly accounted for 4,200 accommodations jobs in 2009, 3,500 jobs with firms providing tours and other visitor activities, and 4,500 retail jobs. Visitor spending also directly generated 4,400 jobs with

[3] Based on Bureau of Economic Analysis employment and labor income data for the Southeast region in 2007.
[4] Based on BEA employment and labor income data for the Alaska in 2008.

restaurants/bars and 2,700 jobs with transportation providers. Another 2,600 jobs were scattered among a number of other sectors of the Alaska economy, as a direct result of visitor spending.

Spending by cruise lines was also broadly distributed throughout the Alaska economy, creating jobs in the same sectors as those affected by visitor spending, plus jobs in professional and business services, wholesale businesses, and construction, among others, and in the government sector as a result of tax payments to state and local governments.

Indirect and induced jobs linked with the visitor industry are the most broadly distributed throughout the Alaska economy and includes all of the sectors that provide goods and services to Alaska businesses and households – virtually the entire service and support sector.

Table 10
Visitor Industry Employment and Labor Income, with Sector Detail, 2009

	Employment	Labor Income
Direct jobs from visitor spending		
Accommodations	4,200	$101 million
Tours & Activities	3,500	140 million
Retail	4,500	102 million
Food/Drink Services	4,400	91 million
Transportation	2,700	116 million
Other	2,600	70 million
Total	**21,900**	**$620 million**
All other direct jobs	**5,200**	**$177 million**
All indirect and induced jobs	**9,100**	**$346 million**
Total visitor industry-related employment and labor income	**36,200**	**$1.1 billion**

Alaska's Visitor Industry: Recent Changes and Future Outlook

Decline in Visitor Industry, 2008 to 2009

As described in the Visitor Volume chapter of this report, Alaska's out-of-state visitor market declined considerably (by an estimated 7 percent) in summer 2009 when compared to summer 2008. In fact, the visitor market has not seen this significant a decline since McDowell Group began tracking visitor volume in 1985. While the cruise market was basically flat, the air market dropped an estimated 15 percent; the ferry market 16 percent; and the highway market 8 percent. In addition, the cruise passengers that did visit Alaska were less likely to travel within the state, making the declines in the Southcentral and Interior regions more dramatic. Following is a more detailed description of the 2008-09 visitor season, and how it differed from previous years.

Business Survey Results

A major source for this study was a survey of 172 visitor industry businesses, specifically targeted in order to obtain a representative cross-section of visitor businesses across business type and location, as well as businesses representing the largest amount of visitors (cruise lines, Alaska Railroad, Alaska Airlines, etc.). Businesses were asked about their visitor markets (cruise, air, highway/ferry), seasonality, and percentage increase or decrease in 2008-09 in both visitor volume and gross sales, among other questions.

Results from the survey should be viewed in light of the fact that responses are not weighted by size or type of business. It should also be noted that the survey sample included only a few Southeast tour operators catering exclusively to cruise ship passengers, because the study team had access to shore excursion sales data provided by cruise lines. This data was taken into consideration along with survey data when making adjustments to passenger spending data.

CHANGE IN GROSS SALES AND VISITOR VOLUME, SUMMER 2008 TO SUMMER 2009

Two-thirds of businesses surveyed said their volume and their sales decreased in summer 2009 compared to 2008. One in ten saw an increase, and about the same said there was no change year-to-year.

Businesses that saw an increase, as well as those that saw a less-than-average decrease, often explained their results. They were a growing business, for example, or they anticipated the decline by offering lower rates or special promotions. Respondents also commented that visitors were buying lower-priced tours and lodging – if a business was in the right price range, they may have had a better year than those in the higher price range.

Retail businesses were asked a follow-up question: whether per-visitor spending changed (as opposed to overall gross sales). In response, 6 percent said that per-visitor spending increased, 58 percent said decreased, 26 percent said it stayed the same, and 10 percent didn't know. These results correspond with comments that visitors were buying lower-price retail items (as well as lower-price tours and lodging).

CHANGE IN GROSS SALES AND VISITOR VOLUME, FALL/WINTER 2007-08 TO FALL/WINTER 2008-09

Businesses who reported operating in the fall/winter were asked about their last fall/winter season (October 2008-April 2009) compared to the previous season (October 2007-April 2008).

There was much less change reported in the fall/winter season compared to the summer season – not surprising, considering that fall/winter visitors tend to be traveling to visit friends and relatives or for business, and these markets were not as affected by the economic crisis. In addition, traffic data reflected only a 2 percent decrease in visitation between the two periods.

A little less than one-quarter reported an increase in visitors, a little more than one-quarter reported a decrease, but the most popular answer was "no change." There were a few more reports of decreases in terms of sales, probably reflecting lower prices. The reports of lower sales were reinforced by bed tax and vehicle rental tax declines.

Summary of Business Survey Comments

Additional comments were offered by respondents on their 2009 season, summarized below.

- Although cruise lines filled their ships, it required heavily discounting prices. According to some contacts, this led to passengers with lower incomes and higher price sensitivity.
- Although a couple of contacts reported a decrease in international visitors, most of those who commented on this market said they held steady or increased. Several noted increases in the European and Japanese markets.
- The group tour and incentive markets were reported to be down.
- The excellent weather experienced statewide in 2009 not only tempted more visitors to purchase outdoor tours, it allowed for fewer flightseeing cancellations.
- Businesses selling all-inclusive package tours that included a cruise component were especially hard hit because they were competing heavily with cruise lines, which were offering unprecedented prices.
- Businesses selling add-on packages to cruise passengers (such as two-day tours to Nome) were also affected. One contact pointed out that with cruise packages priced so low, it became hard for visitors to justify paying as much or more for add-on packages as they had paid for their cruise.
- The sportfishing market reported heavy losses in both the charter and lodge sectors. Owners cited new sportfishing regulations as a factor in the downturn, in addition to the economic recession.
- A few contacts reported more travel by Canadians.
- There were several comments on the in-state market, that Alaskans were traveling in-state as much or more than before. (This report measures impacts from out-of-state visitors only.)

- Retail vendors commented on how sales have fluctuated over the last several years. For many, the trend towards lower-priced items began in 2008 and continued in 2009.

Additional Visitor Industry Indicators

The table below presents additional indicators that help describe the 2009 season. They tend to reinforce what was reported in the survey, and were taken into account in the adjustments made to spending and volume for the 2009 season.

- Domestic air passenger traffic exiting Alaska was down in every market, ranging from 7 percent in Fairbanks to 20 percent in Sitka, for a total decline of 10 percent. While resident travel is included in these figures, resident air travel was reported to have held fairly steady in summer 2009. International air traffic was likewise down, by 8 percent.

- Cruise passenger traffic was down only 1 percent between 2008 and 2009; however, as reported previously, cruise passengers were traveling less within the state. Based on information provided by cruise lines on 2008-to-2009 shifts in the land tour market (passengers that purchase overnight tours, generally to Denali and Fairbanks, in addition to their cruise), it is estimated that land tour volume dropped 13 percent between 2008 and 2009.

- Some of the more striking declines can be seen in bed tax revenues, with declines ranging from 14 percent in Denali to 30 percent in Sitka. The increase in Valdez' bed tax revenues likely reflects their relative dependence on the in-state market. (In viewing these figures, it is important to keep in mind that these declines reflect decreases in prices as well as room nights.)

- Anchorage showed a 23 percent decrease in vehicle rental tax revenues, and a 26 percent in RV rental tax revenues. As with bed tax revenues, these figures likely reflect decreases in prices as well as rentals.

- Department of Fish and Game license sales show a 16 percent decline in non-resident fishing license sales between 2008 and 2009, reinforcing reports from lodge and charter operators. While hunting licenses were down only 2 percent, big game tags were down 18 percent.

- While sales tax revenues are not direct indicators of visitor spending as they reflect both resident and non-resident spending, it is interesting to note that sales tax revenues were down 16 percent in Sitka, 12 percent in Juneau, and 9 percent in Skagway. The Skagway figure is particularly indicative of the visitor market, as visitor spending represents the vast majority of spending on goods and services in Skagway during the 2nd and 3rd quarters.

Economic Impact of 2009 Decline

While within the scope of this project it is not possible to measure precisely the economic impact of the decline in visitor spending in 2009, available data provides an indication of the significance of the decline. Alaska Department of Labor and Workforce Development employment data indicates that statewide annual average employment in the accommodations sector (hotels, lodges and B&Bs) was down by 600 jobs in 2009. Accommodations employment in July 2009, at the peak of the visitor season, was 1,100 jobs below the July 2008 level. Other visitor-affected sectors of the Alaska economy also experienced employment declines in 2009, as illustrated in the following table. Not all of the job loss in these sectors can be attributed to a decline in visitor spending; Alaska residents account for a significant portion of spending in these sectors. Nevertheless, it is clear from the long list of declining visitor industry indicators (reported above) that lower visitor spending was a key contributing factor.

Table 15
Annual Average and Peak Month Employment Declines in Visitor-Affected Sectors, 2009 versus 2008

	Annual Average Change, 2008 to 2009	Change, July 2008 to July 2009
Retail	-600	-500
Air transportation	-300	-500
Accommodations	-600	-1,100
Food and drink	-400	-1,200

Source: Alaska Department of Labor and Workforce Development.

Detailed sector employment data for the third quarter of 2009 further illustrates job losses during the peak of the visitor season. In these selected visitor-affected categories, statewide employment during the third quarter of 2009 was about 2,300 jobs below the third quarter of 2008, a decline of about 7 percent. Payroll was down $14 million for the quarter, a decline of 6 percent. Two sectors that are most heavily affected by non-resident visitor travel, scenic/sightseeing transportation and tour companies, saw employment declines of 9 percent and 25 percent, respectively.

Table 16
Changes in 3rd Quarter Employment in Selected Visitor-Affected Sectors, 2008 to 2009

Source: Alaska Department of Labor and Workforce Development.

Based on the modeling conducted for this study, total visitor spending in Alaska declined by approximately $270 million between 2007-08 and 2008-09, a 15 percent drop. A 15 percent drop in visitor spending could translate in to loss of 5,000 direct and indirect jobs if it were to persist for several years. In the near term, however, the direct employment loss during the summer of 2009 was significantly less than that amount.

In 2009, on average, $82,000 in visitor spending created one direct job. At that rate, a spending decline of $270 million would suggest a loss of approximately 3,300 jobs. However, employers are often more inclined (at least initially) to reduce non-personnel costs and/or earn reduced profits before resorting to job cuts. As such it is likely that statewide the decline in visitor spending resulted in the loss of perhaps 2,000 to 2,500 mostly seasonal jobs.

Industry Outlook

One aspect of the 2010 visitor market that is currently measurable is a forecasted decline in cruise passenger capacity. Overall, capacity is expected to be down 14 percent from 2009, based on several changes. The following ships will be re-deployed to other markets: 1,270-passenger Ryndam (Holland America Line), 2,600-passenger Star Princess (Princess Cruises), 2,002-passenger Norwegian Sun (Norwegian Cruise Line), 2,100-passenger Serenade of the Seas (Royal Caribbean International), and 114-passenger Spirit of Oceanus (Cruise West). Holland America's Amsterdam will make 11 Alaska voyages (of 14 nights each) instead of 20 seven-night voyages. There have also been changes from cross-gulf to round trip itineraries for two ships (the 1,950-passenger Coral Princess and the 2,124-passenger Carnival Spirit), which eliminates the option for passengers to travel additionally in-state (either independently or on land tour packages).

Different ports will feel the drop to different degrees, as seen in the following table.

Table 17
Anticipated Changes in Cruise Passenger Volume, 2009 to 2010

	% Change
Juneau	-14%
Ketchikan	-12
Skagway	-12
Sitka	-36
Whittier	-40
Seward	-16
Icy Strait Point	-11
Haines	-26
Statewide	**-14%**

Source: Cruise Line Agencies of Alaska.

A decline in cruise passenger travel to Alaska of approximately 14 percent (140,000 passengers overall) in 2010 could reasonably be expected to result in a 14 percent decline in cruise passenger spending, compared to 2009. If a decline of 140,000 passengers is accompanied by a proportional decline in spending, $90 million in direct spending would be lost, and as much as $150 million in total direct and indirect spending. This spending decline, plus the decline experienced in 2009, could bring the total employment loss from the 2008 peak to near 5,000 jobs, including all the direct and indirect effects.

However, 2009 was an unusual year in the Alaska cruise market. The result of a severe national recession, deep discounting was required to fill berths on cruise ships. The discounting fulfilled its objective; cruise traffic was down only about 1 percent. However, cruise passengers that did travel to Alaska in 2009 proved to be reluctant spenders, purchasing fewer excursions and spending less on gifts and souvenirs. Early indications for the 2010 season suggest that Alaska can expect a return of the more traditional (less frugal) cruise passenger. Anecdotal information indicates discounting is not being required to fill berths, meaning the typical cruiser in 2010 will spend at a higher rate than the typical 2009 cruiser. To the extent that 2010 cruisers do spend more, the spending and employment losses potentially stemming from the decline in cruise traffic will be mitigated.

Looking ahead to 2011, Cruise Line Agencies of Alaska predicts that overall passenger volume will be about the same as in 2010, with additional losses being balanced out by new arrivals.

Further decline in the independent (non-cruise) travel market is not expected in 2010, and the outlook is for a modest rebound from 2009. Several factors point to this outcome.

- The reduction in cruise capacity – and stronger early cruise bookings despite lack of significant discounting – indicate better overall demand for Alaska and increased consumer economic capability. Cruise capacity limitations likely mean some visitors will choose a non-cruise Alaska trip.
- National retail spending and consumer confidence show some modest promise in early 2010. Since Alaska visitors tend to be well above average in income and education, they are less affected by an economic downturn.
- Past research in the Alaska market indicates that potential visitors may postpone their Alaska trip during uncertain times but not cancel their Alaska ambitions altogether. Some pent-up demand from the recent independent visitor downtum is expected.
- Most independent visitors enter and exit by air, and Alaska's dominant carrier – Alaska Airlines – is doing much better financially in 2010 than the aviation industry overall, so is likely to maintain sufficient summer frequency to service independent Alaska demand.
- Independents will be looking for value, as opposed to low price, and travel offerings throughout the state are more modestly priced as a result of the recession. The perceived (and true) value of an independent Alaska experience has improved since 2008.
- While the U.S. dollar may be strengthening somewhat in 2010, Alaska travel is still a good value for overseas visitors, and some additional independent traffic might be expected.

While all of these factors point to modest improvement in Alaska independent visitor volume and spending for 2010, the nation's recent economic troubles are indicators of much more comprehensive and long-term systemic issues with the U.S. economy that will continue to be of concern for all travel markets.

Revenues to Municipal and State Governments

The visitor industry generates significant revenues for state and local governments in Alaska. User fees, sales taxes, bed taxes, property taxes, income taxes and other payments all flow to state and local governments in Alaska directly or indirectly from the visitor industry. This chapter details, to the extent possible, state and local government revenues that can be attributed to out-of-state visitors.

Summary

Visitor-related tax revenues to municipalities in 2008-09 totaled nearly $70 million in sales and bed tax revenues and cruise line payments. Sales tax revenues are estimated at $28.9 million, and bed tax revenues are estimated at $23.5 million. In addition, cruise lines paid over $17 million in dockage, moorage, and municipal passenger fees in 2009. Property taxes provide an additional revenue stream to municipalities.

Visitor-related revenues to state government during the 2008-09 study period included $139 million in cruise line fees, fishing/hunting licenses, vehicle rental taxes, corporate income taxes, and revenues to the Alaska Marine Highway System and the Alaska Railroad. Cruise lines alone paid $58 million in commercial passenger vessel fees, gambling taxes, Ocean Ranger Program fees, and Environmental Compliance Program fees. Additional revenues to the State of Alaska from the visitor industry not included in this total are airport fees, State Parks user fees, and State Museum revenues, among others.

Please see the following pages for more details on these revenues.

Table 18
Selected Revenues to Municipal and State Governments
October 2008-September 2009

	Revenues
Municipal Revenues	**$69.8 million**
Sales tax revenues	$28.9 million
Bed tax revenues	$23.5 million
Dockage/moorage revenues	$17.4 million
State of Alaska Revenues	**$138.8 million**
Commercial Passenger Vessel Tax	$46.4 million
Passenger Gambling Tax	$6.3 million
Ocean Ranger Program	$4.0 million
Commercial Passenger Vessel Environmental Compliance Program	$1.0 million
Non-resident fishing/hunting/trapping licenses and tags	$17.1 million
Alaska Marine Highway revenues	$17.6 million
Alaska Railroad revenues	$19.4 million
Vehicle rental tax	$5.6 million
Corporate income tax	$21.4 million
Total Selected Revenues	**$208.6 million**

Municipal Tax Revenues

Sales Tax Revenues

Total sales tax revenues associated with visitor industry spending are estimated at $28.9 million for the October 2008 to September 2009 study period. Visitor-related sales tax revenues are particularly important in communities such as Juneau, Ketchikan, and Skagway, where spending by visitors provides a significant portion of total spending in each community.

Regional sales tax totals were calculated based on visitor industry spending and visitor volume at the community and regional level. Tax rates and total taxes collected by community were taken into account in the analysis (total calendar year 2009 taxes were assumed as a proxy for the study period of October 2008 through September 2009). Taxable spending rates were also considered in the analysis. Not all visitor-related spending is taxable; for example, spending on flights is exempt, and some communities have sales tax caps.

Table 19
Sales Tax Revenues from Out-of-State Visitors
By Region, October 2008-September 2009

Region	Sales Tax Revenues
Southeast	$18.3 million
Southcentral	$9.8 million
Other regions combined	$0.8 million
Total	**$28.9 million**

Sources: McDowell Group estimates based on sales tax rates and revenues from Alaska Taxable 2009 (Alaska Department of Commerce, Community and Economic Development); and AVSP visitor survey and volume data.

Bed Tax Revenues

Out-of-state visitors paid an estimated $23.5 million in bed tax revenues in the one-year study period. The bulk of the revenues accrue to Southcentral, where Anchorage has the highest bed tax rate in the state (12 percent) *and* attracts the highest number of overnight visitors. The Interior, with Fairbanks at 8 percent and Denali at 7 percent, accounted for about one-fifth of all bed tax revenues. While most Southeast communities charge bed taxes, revenues are not as high as in other regions because they have fewer overnight visitors (cruise ship visitors rarely overnight in Southeast). Both Southwest and Far North regions are estimated to receive less than $1 million each in bed tax revenues from out-of-state visitors.
