Over 30 different communities with bed taxes were considered in this analysis. Total calendar year 2009 taxes were assumed as a proxy for the study period of October 2008 through September 2009. Each community's tax revenues were assigned a different "percentage out-of-state visitors" rate, based on data from the business survey (where accommodations reported the percentage of their business from out-of-state visitors) as well as previous visitor volume and survey research.

Table 20
Bed Tax Revenues from Out-of-State Visitors
By Region, October 2008-September 2009

Region	Bed Tax Revenues
Southcentral	$15.6 million
Interior	$5.6 million
Southeast	$1.7 million
Southwest	$0.5 million
Far North	$0.1 million
Total	**$23.5 million**

Sources: McDowell Group estimates based on bed tax rates and revenues from Alaska Taxable 2009 (Alaska Department of Commerce, Community and Economic Development); AVSP visitor survey and volume data; and business survey data.

Property Tax Revenues

It is beyond the scope of this study to measure property tax revenues in each Alaska community affected by visitor traffic. The analysis would be very complex; most property tax revenues are indirect, that is, paid by businesses that provide goods and services to visitors. Many visitor-affected businesses also provide goods and services to Alaska residents. Therefore, not all of the property taxes paid by these businesses could be attributed to the visitor industry.

A previous study estimated property tax revenues associated with the cruise industry at $3.5 million for 2007. This figure was based on data provided by cruise lines on property tax payments, a review of property tax payments on cruise industry-related businesses in Ketchikan and Juneau, and previous estimates. This is only a relatively small portion of property tax revenues accruing to local governments from visitor industry-related sources. It does not include the lodging, tour operators, and other businesses serving the non-cruise market; nor does it include property taxes paid by businesses less dependent on visitor activity (but still deriving income from visitors) or taxes paid by households of employees of visitor-related businesses.

Cruise Ship Revenues

Some municipal governments in Alaska's cruise port communities receive revenues from cruise lines in the form of moorage and docking fees, primarily Juneau, Ketchikan, Sitka, and Haines. (The docks in Skagway, Whittier, and Icy Strait Point are privately owned. Seward's dock is owned by the Alaska Railroad.) Juneau has both private and public docks. Sitka does not have a deep-water dock, but charges lightering fees.

Each community has its own system of charging cruise lines for using port facilities. Dock charges are generally assessed on a per foot/per day basis. Additional charges may include tonnage fees, passenger fees, lightering fees, and water fees, depending on the community.

Total revenues for 2009 were $17.4 million, most of it collected in Southeast. Juneau and Ketchikan account for the vast majority of this figure, with $8.6 million and $8.5 million, respectively.

Table 21
Cruise Ship Dockage/Moorage Revenues to Municipalities, Summer 2009

Port	Revenues
Juneau	$8,587,000
Ketchikan	$8,478,000
Sitka	$115,000
Haines	$99,000
All other ports	$75,000
Total	**$17,354,000**

Sources: City and Borough of Juneau; City of Ketchikan; City and Borough of Sitka; City and Borough of Haines.
Note: Docks in Skagway, Whittier, and Icy Strait Point are privately owned. Seward's dock is owned by Alaska Railroad.

State of Alaska Revenues

Direct Payments from Cruise Lines

The State of Alaska receives several forms of direct payments from cruise lines: the head tax (Departments of Revenue and Environmental Conservation), the gambling tax (Department of Revenue), the Commercial Passenger Vessel Environmental Compliance Program (Department of Environmental Conservation) and state corporate income tax (Department of Revenue).

Head Tax

At the end of December 2006, a new head tax was established for passengers on large vessels. The tax is $50 per passenger, with $46 dedicated to the Department of Revenue for redistribution, and $4 dedicated to the Alaska Department of Environmental Conservation to operate the Ocean Ranger Program.

According to the Alaska Department of Revenue, the State received $46.4 million for the $46 portion of the tax in 2007. These revenues are deposited in a special "commercial vessel passenger tax account" in the General Fund. For each voyage of a commercial passenger vessel providing overnight accommodations, the Commissioner of the Department of Revenue must identify the first five ports of call and the number of passengers on board the vessel at each port of call. Subject to appropriation by the legislature, the commissioner distributes $5 per passenger of the tax revenue to each port of call. Each port of call must use the funds to improve port and harbor facilities and other services to properly provide for vessel or watercraft visits and to improve the safety and efficiency of interstate and foreign commerce.

Head tax revenue for Department of Environmental Conservation amounted to $4.0 million in 2009. This revenue is used to operate the Ocean Ranger program, which requires U.S. Coast Guard licensed marine engineers on board vessels to act as independent observers monitoring State environmental and marine discharge requirements, and to ensure that passengers and crew are protected from improper sanitation, health, and safety practices.

The large passenger vessel gambling tax was also introduced in December 2006. This tax applies to the use of playing cards, dice, roulette wheels, and coin-operated instruments or machines designed for gaming or gambling activities aboard cruise ships operating in Alaska waters. The tax is 33 percent of the adjusted gross income from these gambling activities.[5] Gambling taxes are payable to the Department of Revenue and deposited in a special "commercial vessel passenger tax account" in the General Fund. The Department of Revenue reports gambling tax revenues of $6.3 million in 2009.

Commercial Passenger Vessel Environmental Compliance Program

The Commercial Passenger Vessel Environmental Compliance (CPVEC) Program was established in July of 2001. This program requires all large passenger vessels to register and comply with quality control regulations. The program is operated with fees collected from large and small passenger vessels ($1 per berth). In 2009, $1.0 million was collected for the Commercial Passenger Vessel Environmental Compliance Program.

Corporate Income Tax

Alaska's corporate income tax rates are graduated from 1 percent to 9.4 percent in increments of $10,000 of taxable income. The 9.4 percent maximum rate applies to taxable income of $90,000 and over. Multistate corporations apportion income on a water's edge basis using the standard apportionment formula of property, payroll, and sales.

Tax payments by individual corporations are confidential; however, the Department of Revenue reports total corporate income taxes in the "tourism" category, including payments by cruise lines and other visitor industry businesses, of $21.4 million in Fiscal Year 2009.

Vehicle Rental Tax

Alaska levies a 10 percent passenger vehicle tax as well as a 3 percent recreational vehicle tax. In Fiscal Year 2009, the Department of Revenue collected a total of $8.0 million in vehicle tax revenues. Survey results indicate that approximately 70 percent of rental vehicle revenues are attributable to out-of-state visitors. Visitor-related tax revenues from vehicle rental are therefore estimated at $5.6 million.

Revenues to Alaska Marine Highway and Alaska Railroad Corporation

While not in the category of fees or taxes, out-of-state visitors account for significant revenues to two transportation providers operated by the State of Alaska: the Alaska Marine Highway and the Alaska Railroad.

The Alaska Marine Highway reports that in calendar year 2009, out-of-state residents accounted for $17.6 million in revenues to AMHS. For purposes of this report, this figure is assumed to represent the study period of October 2008 through September 2009. (This figure does not resemble the $11.4 million reported in the Visitor Spending section because it is *total* spending, rather than spending only on passage to and from Alaska.)

The Alaska Railroad Corporation reports total passenger-related revenues of $21.5 million in 2009, $19.4 million of which is attributable to out-of-state visitors.

[5] "Adjusted gross income" refers to gross income, minus prizes awarded and federal and municipal taxes paid or owed on the income.

Sponsor Statement
for
House Finance
Committee Substitute for
House Bill 424

House Bill 424 allows Alaskans to vote on a general obligation bond package for statewide education and educational research facilities.

The proposal totals $384,200,000 for major K-12 and University of Alaska educational facilities around the state and would provide additional funding for Alaska's educational system. The proposal also funds library construction and vocational education projects across the state.

House Bill 424 is similar to legislation that passed in 2002 which authorized $236,805,441 in general obligation bond authority for statewide educational facilities. That proposal was adopted by 59.6% of the voters at the November 2002 general election. This was the first general obligation bond vote for education projects since 1978. Since statehood, Alaskan voters have approved over ten general obligation bonding packages for education.

Using state general obligation bonds is the right step in addressing our educational infrastructure backlog by accelerating the completion of many statewide projects. The bonds will be sold utilizing the "Build America Bond" financing mechanism that Congress passed in the stimulus package in 2009. Under this mechanism, the federal government would cover up to 35% of the interest over the 20 year maturity of the bond.

If adopted, this proposal would be placed on the ballot at this November's general election.

HOUSE COMMITTEE REPORT

ANALYSIS: *(Attach a separate page if necessary)*

The Bill authorizes the voters of the state to consider up to a $384,200,000.00 general obligation bond issue of the State of Alaska. This bond would carry the full faith and taxing authority of the State, and thereby achieve the lowest interest rate available to the State. If the proposition were approved in November 2010 it is anticipated Bonds would be issued in early 2011 and debt service would commence in FY 2012. The current interest rate is very favorable with 20 year amortization net interest cost for credits of this type below 4% after subsidy. Interest rate acheived would depend on market conditions at the time bonds were sold. For modeling purposes the Department used an assumed rate of 4.2% and 20 year amortization for the bonds.

ANALYSIS: *(Attach a separate page if necessary)*

The bill authorizes the Issuance of $75,750,000 in Certificates of Participation (COPs) to fund a portion of the construction of a crime lab for the Department of Public Safety. The legislation provides flexibility to begin spending on construction as soon as the bill from the general fund and reimbursing from COP money. This flexibility is needed to ensure the construction season is utilized.

Assuming an interest rate of 4.2% and a 20 year term annual payments are $5.6 million. An initial interest payment would be made in Fy 2011.

HB 426

Certificates of Participation
Alaska Scientific Crime Detection Laboratory

House Bill 426 would enable the issuance of Certificates of Participation (COPs) for the construction, acquisition and equipping of the Alaska Scientific Crime Detection laboratory in Anchorage; providing that the Department of Administration would enter into a lease-purchase agreement with the Department of Public Safety. This bill authorizes the issuance by the state of $75,750,000 in Certificates of Participation at an annual estimated cost of $5.6 million.

I appreciate your support in this important legislation.

HB 426

Sectional Analysis
Certificates of Participation
Alaska Scientific Crime Detection Laboratory

Section 1: Established the findings and intent of financing the crime laboratory in Anchorage in the amount of $75,750,000.

Section 2: States that the lease-purchase payments are subject to appropriation by the legislature.

Section 3:

(a) Authorizes the Department of Public Safety to enter into a lease-purchase agreement related to the Alaska Scientific Crime Detection Laboratory.

(b) Authorizes the Department of Revenue to issue Certificates of Participation to finance the construction, acquisition and equipping of the crime laboratory in the amount of $75,750,000. This section also provides the estimated rental obligations of $5,600,000 totaling $112,000,000 for the life of the lease-purchase agreement.

(c) The State of Alaska shall own the title of the facility upon payment of all principal and interest.

(d) Authorizes the State Bond Committee to contract for services related to issuing the bonds for the crime laboratory.

Section 4: Identifies legislative approvals for the notice of the lease-purchase agreement.

EXECUTIVE SUMMARY

Summary: The state needs a new crime lab to prevent crime and protect Alaskans. The proposed lab is the right size. It is the right cost. It will benefit Alaskans now and long into the future.

This legislative brief presents general information about the Alaska Scientific Crime Laboratory Project in support of SB226/HB299, a bill to provide $75.75 million in funding for finishing lab construction. The brief explores the following topics:

- Benefit
- Scope
- Cost
- Status

The benefit: prevent crime and protect Alaskans

Alaska ranks 1st in the nation in rape and 9th in violent crime. The state clearly needs a new lab to responsibly attack its problem. A new lab does more than process evidence to convict the guilty. It actually reduces rape and other violent crime rates by preventing some of these crimes from occurring in the first place.

It prevents crime in several ways. The capacity of a new lab provides more timely analysis of evidence to move perpetrators off the street before they commit more crimes. Most significantly, for the first time it enables the state to apply DNA techniques to evidence from "gateway crimes" such as home burglaries, providing possible answers when latent fingerprints cannot. Evidence from these crimes often link criminals to more serious crimes and gets them off the street before they victimize others.

A new lab protects Alaskans in other ways. It can shield the innocent from false accusation with timely evidence processing to clear them of suspicion. And it can lead to the exoneration of the wrongly convicted.

Further, new laws virtually mandate the construction of a new lab. HB316 requires long term evidence retention. The existing lab does not have the capacity to sustain this requirement. Finally, post conviction DNA testing will increase case load and require a larger DNA suite.

The scope: a crime lab sized to meet today's need, with room for future growth

The lab is sized optimally with compatibility for future growth. Most of the new 84,000 sf lab building will be finished internally to meet today's highest priority needs. About 19% of the facility will remain unfinished ("shelled out") for completion when further funding is available to meet second priority needs. This strategy will carry the laboratory for the next 20 years. The site is large enough to permit subsequent building expansion to serve the state's forensic need beyond the next 75 years.

The cost: optimized, validated, delivered with synergy

Synergy at the local level benefits all Alaskans. The state leased the lab's 12 acre site from the Municipality of Anchorage at $1 per year for 50 years with an option to extend for 25 years. The Municipality of Anchorage's contribution benefits all Alaska as the crime lab processes evidence for all law enforcement agencies throughout the state. This will be especially beneficial for rural Alaska where over 60% of the state's violent crimes occur.

The state spent $8 million to date on design and $8.8 million on site construction. The $75 million appropriation under SB226/HB299 will fund the completion of the construction work.

The project team optimized and validated the cost of the project. It trimmed $20 million from its initial budget through value engineering and deferred build-out of some lab spaces to time of need.

The status: hammer ready

The design of the new crime lab is finished and we are now under contract with Neeser Construction, Inc. All site preparation work is finished. SB226/HB299 will fund the rest of construction from the foundation up. The project is currently on time and on budget. It will provide an immediate economic boost with over 250 new jobs, $30 million toward Alaskan wages, $30 million toward materials supplied by local vendors, and business for 15 Alaska subcontractors.

****

INTRODUCTION

The state needs a new crime lab to prevent crime and protect Alaskans. The proposed lab is the right size. It is the right cost. It will benefit Alaskans now and long into the future.

This legislative brief explores several topics of relevance to a new crime lab for the entire state of Alaska. The Governor introduced SB226/HB299 to the legislature in January, 2010. The bill requests an appropriation of $75.75 million to supplement prior appropriations amounting to $16.8 million. The new appropriation will fund the completion of work on the new lab located on Tudor Road in Anchorage, Alaska.

The brief opens with an explanation of why the state needs a new crime lab and how it benefits Alaskans. It follows with a description of the project's scope and how it meets the needs of the state, its cost, and finally the status of the project.

Services provided

The state's new crime laboratory will be the only full-service, accredited forensic lab supporting Alaska's state and municipal law enforcement agencies. Its mission is to provide forensic science support to all Alaskan law enforcement agencies and the criminal justice system. This is accomplished by:

- Examining physical evidence in a manner that is objective, reliable, and timely.
- Conveying the results of these examinations through clear and objective laboratory reports, consultations, and expert witness testimony.
- Managing the state breath alcohol testing program.
- Providing crime scene investigation support.
- Providing investigative information through the use of individual characteristic databases.
- Providing training to law enforcement and other members of the criminal justice system in the proper use and application of forensic evidence.

The lab provides expert and professional forensic examination and testimony to aid in the investigation, prosecution, and defense of criminal defendants through the analysis of physical evidence collected and submitted by law enforcement personnel.

Examination of evidence utilizes sophisticated equipment and scientific techniques. The majority of evidence submitted to the forensic laboratory establishes an association among offenders, victims, scenes, and objects (weapons, tools, etc.). The lab receives evidence for the purpose of corroborating or refuting other information gathered by investigating officers from victims, witnesses, and suspects. Evidence often helps reconstruct how a crime actually occurred. Examiners prepare written reports of examination results.

In addition to providing forensic testing services, the examiners from each laboratory section frequently provide expert witness consultation and/or testimony in criminal proceedings. The staff can be called upon to provide information relevant to chain-of-custody issues as well. Staff might also give scientific expertise to assist law enforcement personnel with crime scene review or case investigation. Forensic technicians are called to crime scenes to assist in evidence collection.

Also, the forensic laboratory provides training of in-house staff and external personnel, such as law enforcement officers, attorneys (both prosecution and defense) and students.

Laboratory sections

The existing laboratory provides 12 functions that will carry over into the new lab. The functions include:

- Laboratory Administration
- Laboratory Support
- Training/Classroom/Break Room
- Central Evidence Section
- DNA section (including CODIS)
- Bio-Screening Section
- Firearms/Tool Marks Section
- Controlled Substances Section
- Latent Prints Section / AFIS / Footwear and Tire Impressions
- Breath Alcohol Section
- Blood Alcohol Section
- Crime Scene / Vehicle Exam

The new lab will still include all of these programs, but will also include three new lab sections when funding is available to complete them.

- Trace Evidence Section
- Toxicology
- Questioned Documents / Digital Evidence Section

NEED

Alaska is ranked 1st in the country in per capita rape. It ranks 9th in the nation in violent crime, sandwiched between Florida and California. Alaska simply cannot afford to see its current state of affairs continue or deteriorate further. Without a new lab the state's problems may persist and become worse.

	AK	ND	CA	AZ	FL	MD	NM	DE
VC/100K	661	142	535	482	722	641	664	689
National Rank	9	49	14	19	6	10	8	7

The state's new crime lab is a key element of a comprehensive strategy to prevent crime and protect Alaskans.

Governor Sean Parnell ~

> "Last month, I promised Alaskans that we would take every step necessary to move this state out of our shameful first-place ranking among the states in this terrible category," Governor Parnell said. "This legislation won't solve the problem on its own, but these are important steps we must pursue, even as we take action in the executive branch and urge our civic leaders to spread the message that epidemic rates of domestic violence and sexual assault must be ended."

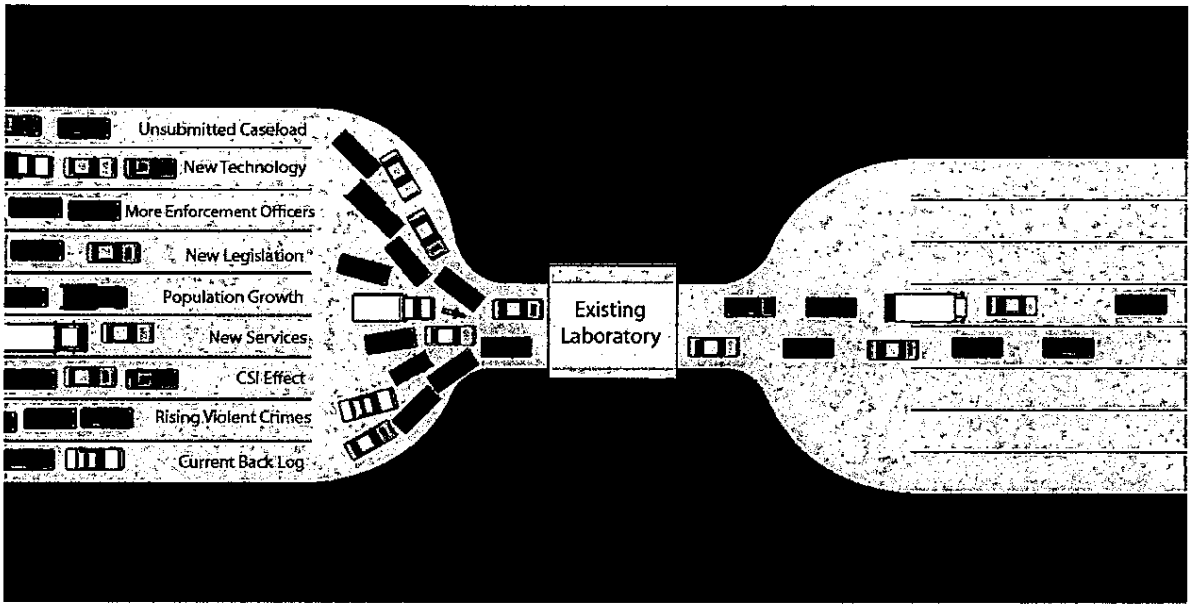
On January 18, 2010 Governor Sean Parnell announced that he will present the Legislature with four bills related to his 10-year plan to end the scourge of domestic violence and sexual assault in Alaska. The bills include:

- The Alaska Scientific Crime Detection Laboratory in Anchorage ($75.75 million)
- Specific procedures for post-conviction DNA testing
- A revision of bail laws
- Changes in crimes and sentences involving sexual assault and domestic violence

Unfortunately the state has long outgrown its existing laboratory to the extent where it can no longer keep up with the demand to process evidence from crimes. The problem has become so severe that the size of the lab, not the number of people employed there, is what restricts lab output. Placing roughly the same number of employees in a new lab sized to meet need will enable the

state to keep up with current forensic caseloads. That is what this project accomplishes.

The existing crime lab creates a traffic jam in the criminal justice system.



Major developments creating a worsening problem for the state's existing crime lab include:

- **Recent legislation increases work load.** HB90 generates an additional 7,000 samples per year. HB 316 requires long term retention of all biological evidence. The existing lab does not have the secure storage capacity to accept more evidence for retention.
- **The CSI effect.** Law enforcement agencies, judges and attorneys expect far broader arrays of analytical methods in part because they know it's available. The expectations of forensic crime laboratories by the public and juries continues to escalate, creating higher case loads for the lab.
- **New technologies.** New technologies as Low Copy DNA, YSTR, and Minifiler increase demand on the lab and the need for more building space to accommodate them.
- **Increased numbers of law enforcement officers.** More boots on the ground will lead to a significant increase of evidence requiring analysis. The state will add 150 new Village Public Safety Officers (VSPOs) to its force. Municipalities will increase their number of patrol officers as well. The old lab can't handle higher evidence submission rates. The lab's backlog will

increase and/or the law enforcement agencies may not submit evidence to the crime lab or collect it at the crime scene.

- **New crime lab services.** New services create a need for more lab space. Toxicology samples are presently sent to outside labs for analysis. However the state's crime lab can do it for less cost and more efficiently. Similarly, funding constraints of the FBI require that the state's computer forensics work occur in a certified crime lab. The new lab has space for the computer forensics section.
- **Population growth.** Evidence submissions to the lab may increase as the state's population continues to grow. Population growth projections published by the State of Alaska show a steady increase for the future.

Noteworthy signs of the traffic jam caused by the lab include:

- **DNA backlog is not eliminated**. The new lab is sized to eliminate the DNA backlog. Without it the backlog will remain. The existing laboratory has eliminated its backlog of database samples, and significantly reduced its backlog of cases awaiting biological screening. However, the backlog of cases awaiting DNA analysis remains high. Currently, 422 cases (227 violent crimes, 195 property crimes) are backlogged awaiting DNA analysis. A committee of prosecutors from the Department of Law was formed to prioritize which DNA cases will be worked each month. Officers and prosecutors must plead their case to this committee as to why their case is more important than other cases and warrants being worked ahead of another case. Likewise, sexual assault cases where there is not a readily identifiable suspect are given lower priority for investigation (due to backload of cases) than those with a more readily identifiable suspect.
- **Cannot handle evidence from burglaries**. With the backlog of violent crime cases awaiting DNA analysis, crimes related to lesser offenses are simply not being worked. The backlog DNA requests for the analysis of property crimes has remained unchanged for years, and the submissions of these cases stopped nearly completely two years ago as agencies realized their cases simply were not getting worked.
- **Evidence not submitted by law enforcement agencies**. A recent study documented that law enforcement agencies withhold a very significant body of evidence from the state's crime lab that is plugged with an evidence backlog. When evidence goes un-submitted, it goes un-worked, related crimes may go unsolved, the public loses some measure of protection, and the justice system is compromised. The phenomenon of

evidence withholding to a backlogged lab is a clear and present danger to Alaska.

Popular notions offered to enhance the existing lab's output would not solve the problem either.

- **Outsourcing to reduce lab crowding is not effective**. Outsourcing DNA analysis costs more than processing it in-house. When the costs of analysis, testimony, discovery, and case consultation are evaluated, even with the cost of the new crime laboratory amortized over the life of the building, the Alaska Scientific Crime Detection Laboratory is a more cost effective operation than outsourcing.

  In addition to being cost effective, the State must have an accredited crime laboratory and DNA section (including a CODIS administrator and Technical Manager) to participate in the DNA database. No private laboratory is permitted to have access to the database. When DNA cases are sent to private labs to be worked, the Alaska crime laboratory must "Take Ownership" of the case by performing technical and administrative reviews of the casework, site visits and proficiency testing of the private laboratory, as well as having analysts proficient in the techniques used by the private lab. This burden of case ownership places 80% of the work load of case work on the Alaska crime lab for outsourced cases.

- **24-hour shifts to improve output do not work**. To reduce the problems of overcrowding, the crime lab is currently operating 13 hours a day through flexible scheduling. While shift work can be used for short term relief, it is not a cost effective solution. If analytical space and reagents are to be shared, then the measures needed to prevent cross contamination (complete cleaning and storage of evidence at the end of a shift, set up at start of a shift) will consume 1 hour (30 minutes front and rear) of a 7.5 hour work shift.

  Also, while officers work 24 hour shifts, prosecutors, defense attorneys, and the courts (felony trials) work roughly 8-5 shifts. This creates the problem of B and C shift scientists not being available, and having to continually shift and adjust their hours to be available for court testimony. Furthermore, the requirements of technical oversight and quality assurance compliance, as well as other staff to support second and third shifts greatly increases expenses without a corresponding return in productivity.

Conclusion: Alaska needs a new crime lab sized to get the job done.

BENEFIT

Prevent crime and protect Alaskans: A new crime lab will do more than process evidence used to put criminals in jail. It will effectively prevent some crimes from occurring and it will protect Alaskans in meaningful ways, some of which appear below.

- **Convict the guilty before they commit other crimes**. The crime laboratory provides accurate and objective information that reflects the events that have occurred at a crime. On the path of justice, the crime laboratory bridges law enforcement (boots on the ground) with correct and successful prosecution of the guilty. Once removed from society, perpetrators can no longer offend.
- **Protect the innocent from false accusation**. Reliable scientific testing ensures protection of the wrongly accused and identifies the true perpetrator. In 40% of DNA cases submitted for analysis, the suspect is eliminated as the source of DNA. Once a suspect is eliminated, the investigation can continue to identify other possible suspects.
- **Reduce rape – Alaska is number 1 in the nation.** While Alaska's rape rate holds steady, it declines elsewhere around the country. A new crime lab will help Alaska follow the national trend. From USA Today 10/6/2009—
  Reported rapes hit 20-year low

  > "Reported rapes have fallen to the lowest level in 20 years as DNA evidence helps send more rapists to prison and victims are more willing to work with police and prosecutors, victims' advocates and crime researchers say. Rape prosecutions have improved dramatically over the past two decades because of advances in DNA testing to pinpoint a rapist rather than forcing prosecutors to rely solely on a victim's identification of her attacker, says Kim Gandy, past president of the National Organization for Women and a former prosecutor. Use of DNA evidence has expanded gradually over the past 15 years and can put a rapist in prison the first time he's caught, preventing him from harming other women, Berkowitz says. Many rapists are repeat offenders."
- **Reduce violent crime – Alaska is 9th in the nation.** Alaska is nearly as bad as Florida (6^{th}). Early identification of criminals prevents further criminal activity. A crime laboratory with sufficient capacity ensures timely analysis and rapid identification of the perpetrator.
- **Process evidence from home burglaries.** The new lab will enable routine evidence processing for burglary cases and reduce crime in Alaska.

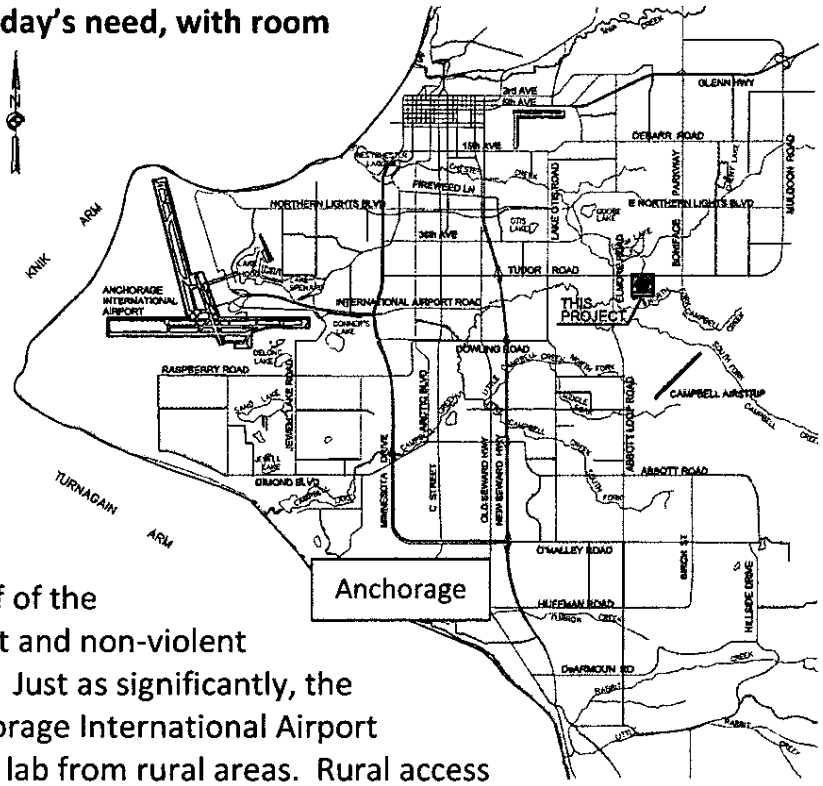
Intervention in the criminal cycle at the non violent stage affords the opportunity to affect real change in Alaska's violent crime rate. Studies show most burglars are caught by their 9th break-in. Studies also show that burglars may be involved with other more serious crimes, or go on to commit them. A study by the Urban Institute of Justice Policy Center determined that evidence from 40% of these non-violent crime scenes could contain evidence leading to a match from a previous assault, rape or murder.

In other words the lab will result in more burglars being caught before they violate the sanctity of more homes and before they move on to more serious crimes. The lab may also link about half of the burglars to other more serious crimes.

- **Solve more cases with new techniques and faster output**. A properly sized crime laboratory will allow for more efficient operations and enhanced techniques yielding greater scientific information.
- **Support rural Alaska** – 60% of Alaska's violent crimes happen outside Anchorage. Although the lab is located in Anchorage, it benefits the entire state. Anchorage yields the best access to and from rural Alaska because of Anchorage International Airport, the air hub of the state.
- **Economic boost** - over 50 new jobs within 1st month of construction, 250 jobs overall, $30 million to Alaska wages, $30 million to materials supplied by local vendors, business for 15 Alaska subcontractors

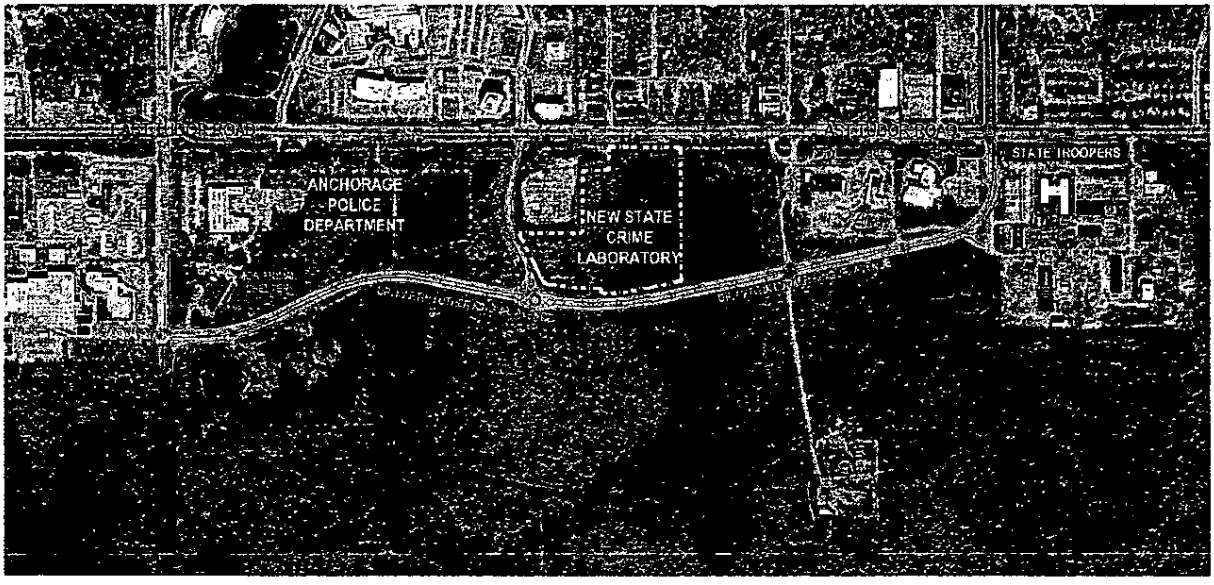
SCOPE

A crime lab sized to meet today's need, with room for future growth



Location

The new crime lab is under construction on an approximately 12 acre parcel of land in Anchorage, Alaska. It is situated conveniently near the Anchorage Police Department off Tudor Road. Being near the APD benefits Anchorage because over half of the state's total caseload (violent and non-violent crimes) comes from the city. Just as significantly, the lab's location near the Anchorage International Airport provides direct access to the lab from rural areas. Rural access to the lab is important because, while fewer crimes occur in rural areas, more of the crimes committed there tend to be violent. In fact, over 60% of the state's violent crimes happen outside of Anchorage.



East Tudor Road Vicinity Map

Synergistic Municipal Land Lease

Synergy at the local level benefits all Alaskans. The state leased the lab's 12 acre site from the Municipality of Anchorage at $1 per year for 50 years with an option to extend for 25 years.

Size

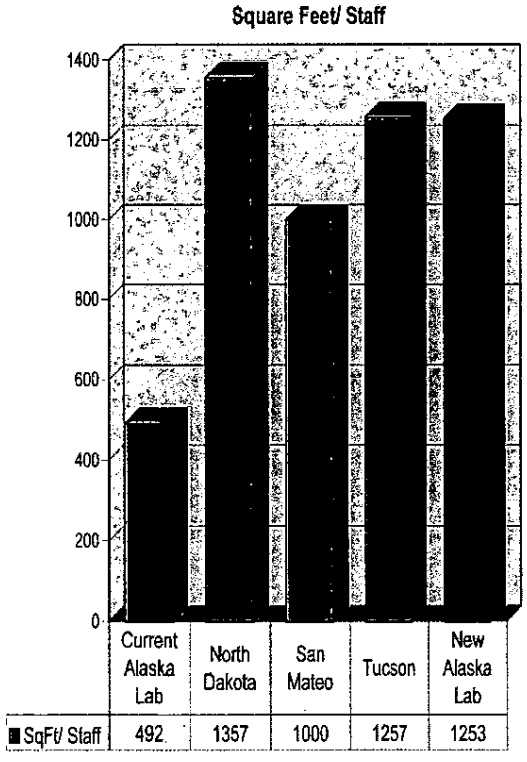
The new lab facility is approximately 84,000 gross square feet, of which 19% will be unfinished, or "shelled out" initially until time of future need. The building space is broken down as follows:

▪ Laboratory	45,000 sf
▪ Evidence storage	6,000 sf
▪ Office	10,000 sf
▪ Mechanical support*	12,000 sf
▪ Building support**	11,000 sf
TOTAL:	84,000 sf

*Boiler rooms, hvac rooms, etc.

**stairs, elevators, corridors, bathrooms, etc.

At 45,000 sf, the new lab space is slightly over double the size of the existing lab. As shown in the figure below, the size of Alaska's new lab compares well with those of other states. Its existing lab is significantly undersized.



Basis of sizing

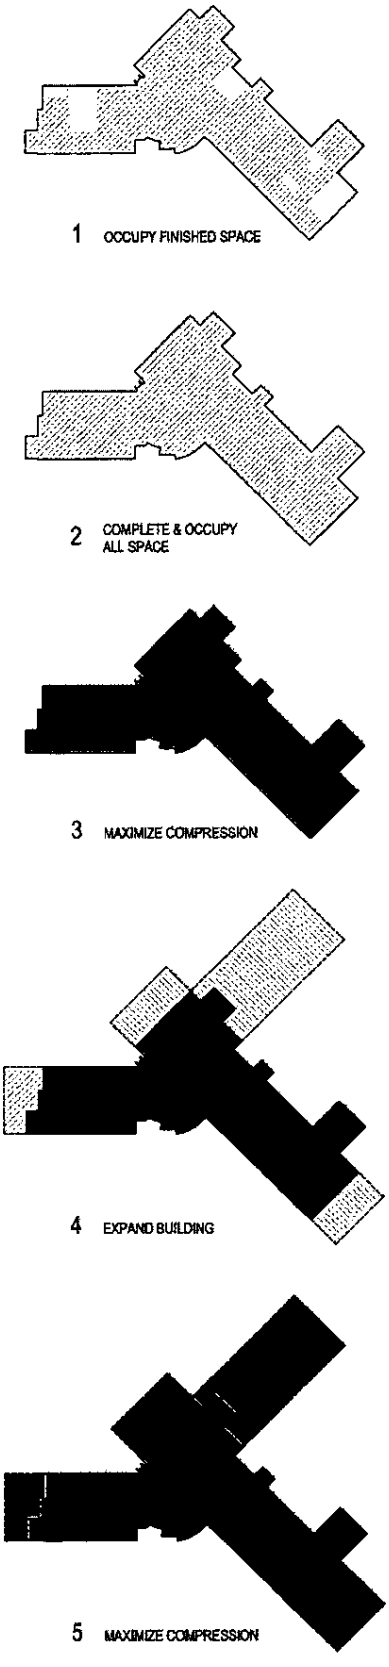
Internal Expansion,
Compression & Growth

The lab is sized optimally for today with compatibility for internal growth without an expansion of the building footprint for 20 years or more. Expansion and growth are accommodated in the design in several ways. Sufficient space has been included in the floor plan to accommodate new laboratory sections including Toxicology, Trace Evidence, Questioned Documents, and a dedicated CODIS lab. These sections can be rapidly brought online when staff, equipment, and finish funding is appropriated in the future. No expansion of the building footprint or structure will be necessary. However, once the programmed space is fully occupied and maximum compression is reached, building expansion can occur on site, attached to existing infrastructure. The orientation of the building wings will accommodate future expansion in four directions.

To meet today's highest priority needs, about 81% of the building will be finished initially and the current staff of 40 employees plus a few new positions will work within the finished space. To meet second priority needs of today, the remaining 19% of unfinished "shell space" will be built out when possible. A supplemental appropriation may be necessary for shell space build-out. Expansion within shell space is the most cost efficient way to serve today's need while planning for near- and long-term growth.

Building expandable to meet need beyond 75 years

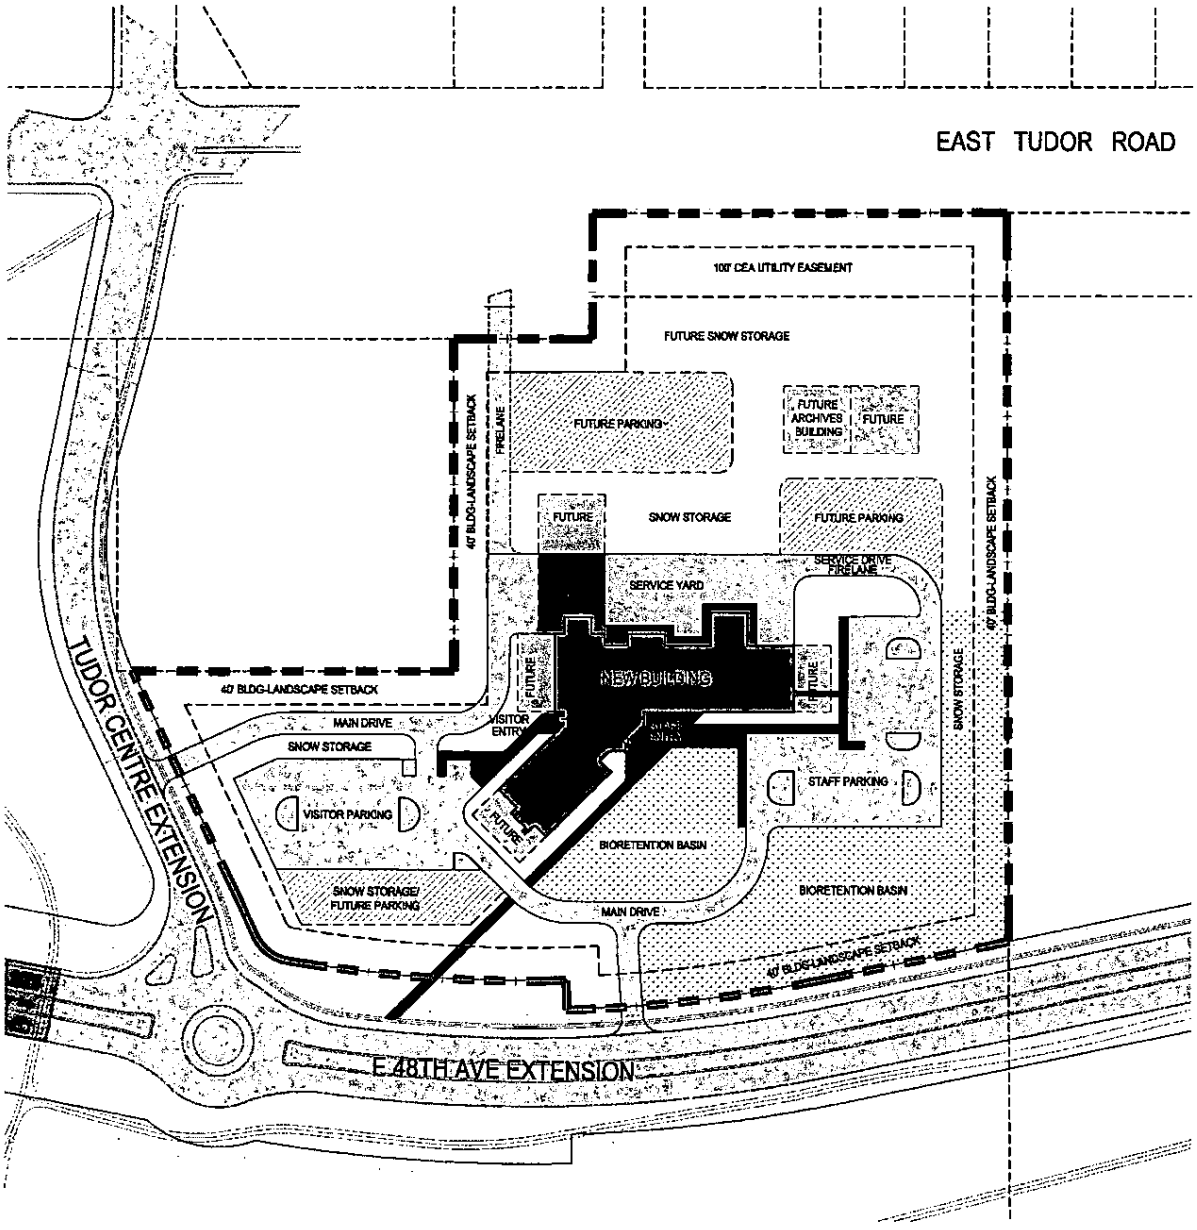
The building is designed for expansion without disruption to lab operations. As shown in the figure at right, additions to each wing of the building can accommodate future growth. This planning assures the state will not find itself in another situation like today



Expansion & Growth Plan

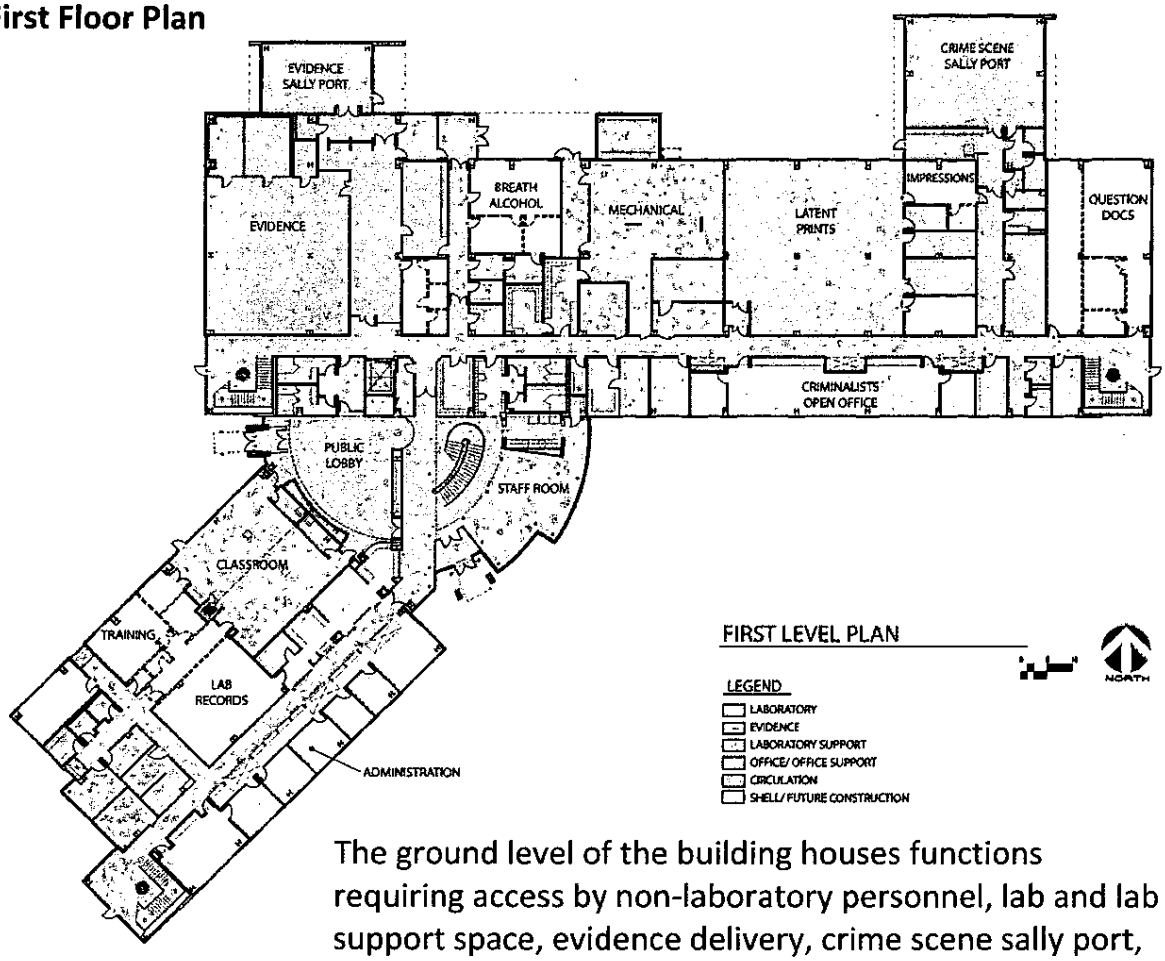
where it must relocate its laboratory. The existing lab was designed such that it cannot expand without going out of service or causing unacceptable disruption to forensic science during construction.

Site Plan



The site is located between Martin Luther King Boulevard to the south (formerly East 48th Avenue Extension), Tudor Road at the north, and Tudor Centre Drive to the West. Public and delivery access to the lab is off the Tudor Centre Drive entrance. Staff can enter off Martin Luther King Boulevard. A driveway off Tudor Road provides north access to the site for the Anchorage Fire Department.

First Floor Plan



The ground level of the building houses functions requiring access by non-laboratory personnel, lab and lab support space, evidence delivery, crime scene sally port, mechanical space, and administrative office areas.

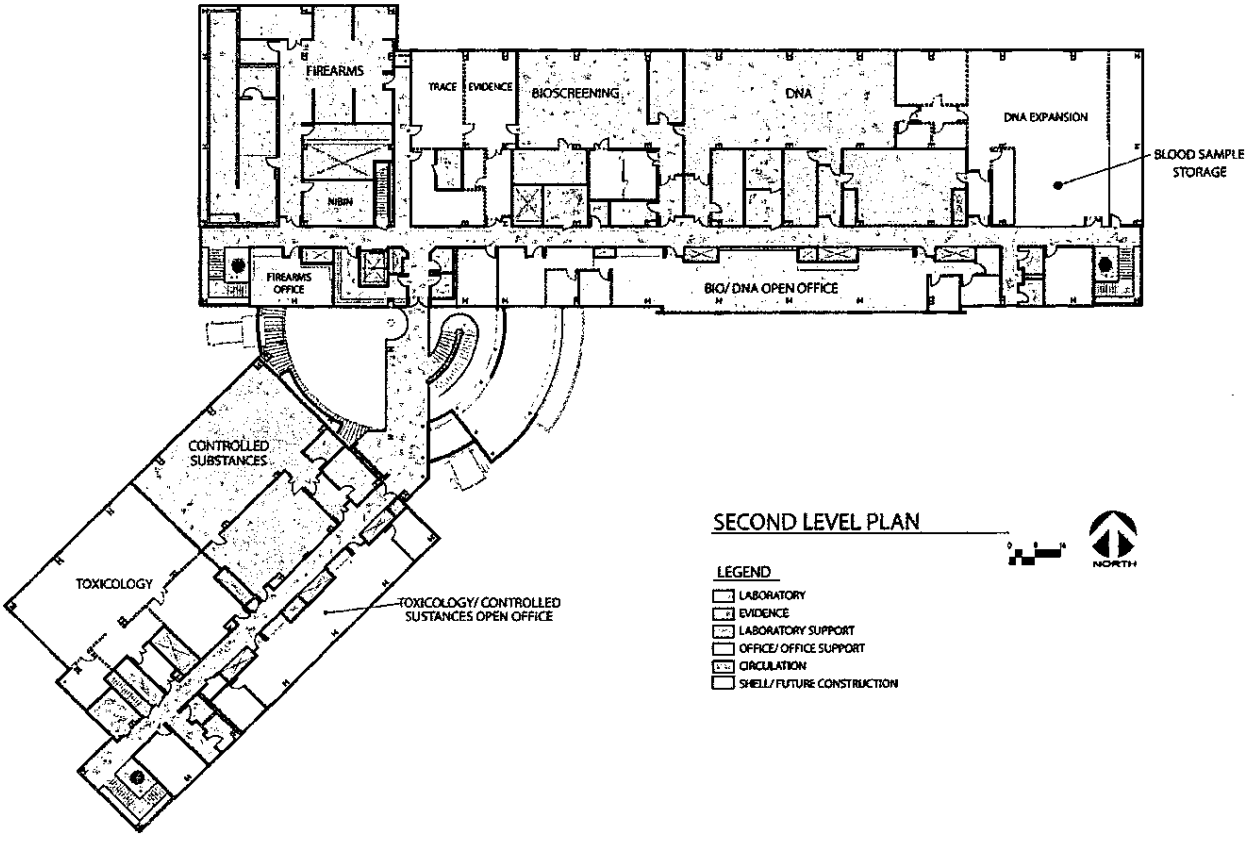
Priority functions to be finished include:

- Training Classroom
- Administrative Offices
- Public Lobby and Staff room
- Central Evidence Storage
- Evidence Receiving
- Evidence Sally Port
- Crime Scene Sally Port
- Latent Prints

Second priority spaces slated for build-out when possible include:

- Questioned Documents
- Impressions / Alternate Light Source / Latents Supervisor Office
- Breath Alcohol program
- Lab Records Storage / Library / Assistant director's office
- Training Lab & Blood Spatter
- Evidence Lab

Second Floor Plan



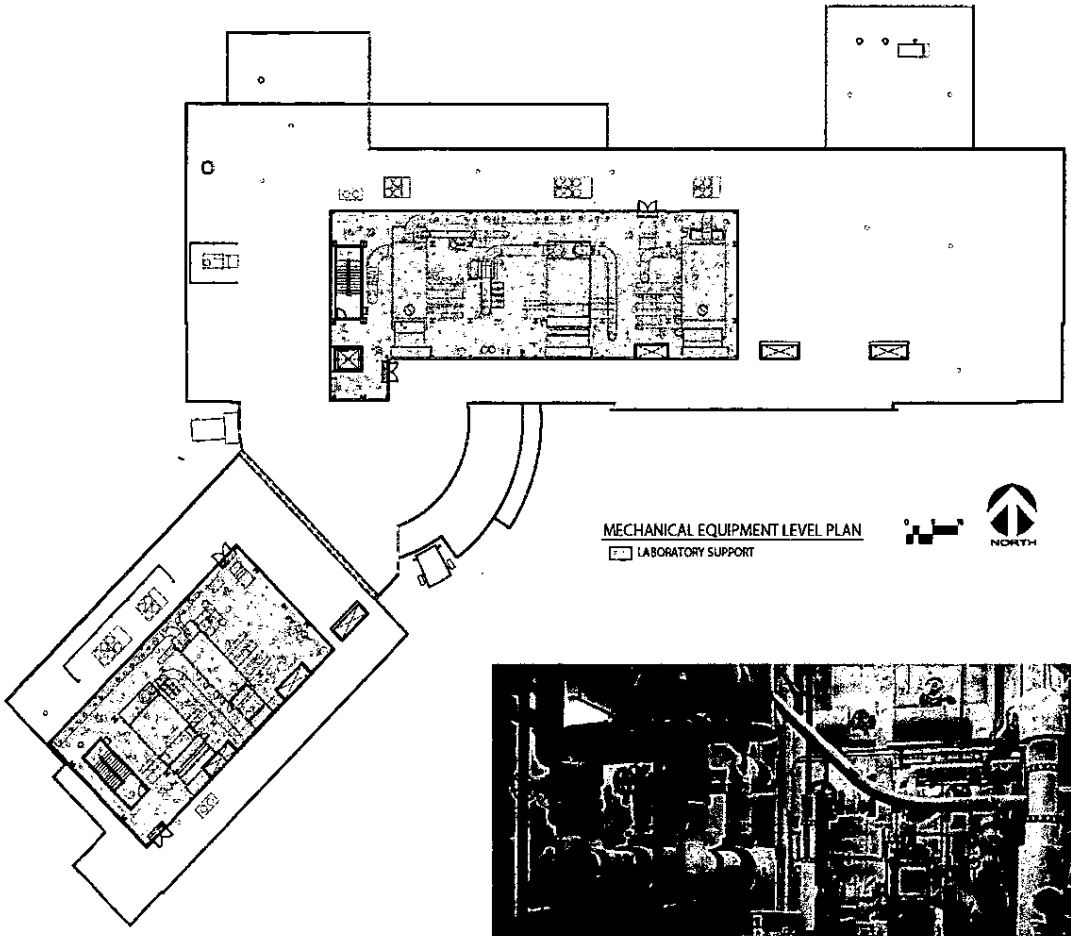
The second floor contains trace evidence, biological and chemical laboratory suites, and the forensic firearms section. Priority lab functions slated for immediate build-out include:

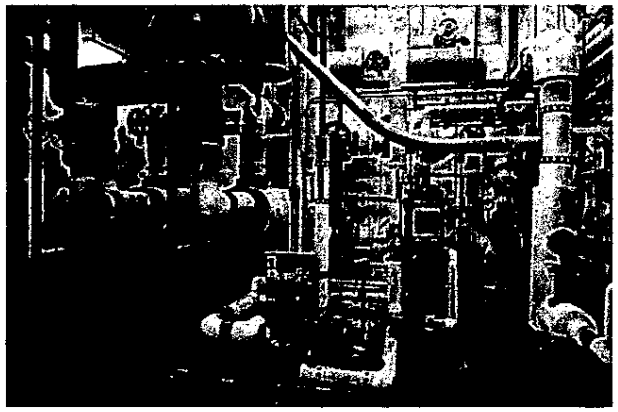
- Controlled substances
- Firearms
- Bioscreening
- DNA

Second priority lab functions slated for build-out when possible include:

- Toxicology
- Trace evidence
- DNA expansion
- Alternate light source labs

Third Floor Plan





The third level of the building houses major heating, ventilating, and air conditioning systems. Subarctic conditions in Alaska make it standard practice to house major mechanical equipment in roof-top penthouses. This feature adds cost to the project, but is necessary. Similar buildings in the lower 48 states often do not require penthouses for mechanical equipment, sometimes resulting in lower cost.

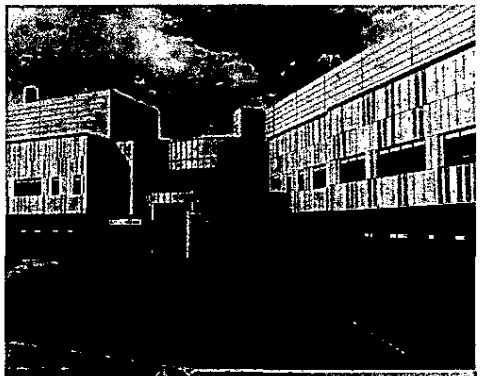
COST

Cost of the lab

The appropriation under consideration is for an amount of $75.75 million. It will fund the completion of construction work at the lab from the foundation up. Prior appropriations of $16.8million for design and site work construction were used for their intended purpose.

The construction cost is valid

The cost of the lab is in line with those of other laboratories built in the State, as shown below.



Alaska Scientific Crime Detection Laboratory
Location: Anchorage
Project Cost per Square-foot: $1,258

UAF / DHHS Virology Laboratory
Location: Fairbanks
Project Cost per Square-foot: $1,136

DEC Food Safety Laboratory
Location: Anchorage
Project Cost per Square-foot: $949

Laboratories cost more than other types of buildings primarily because they come densely packed with lab equipment, mechanical systems and casework.

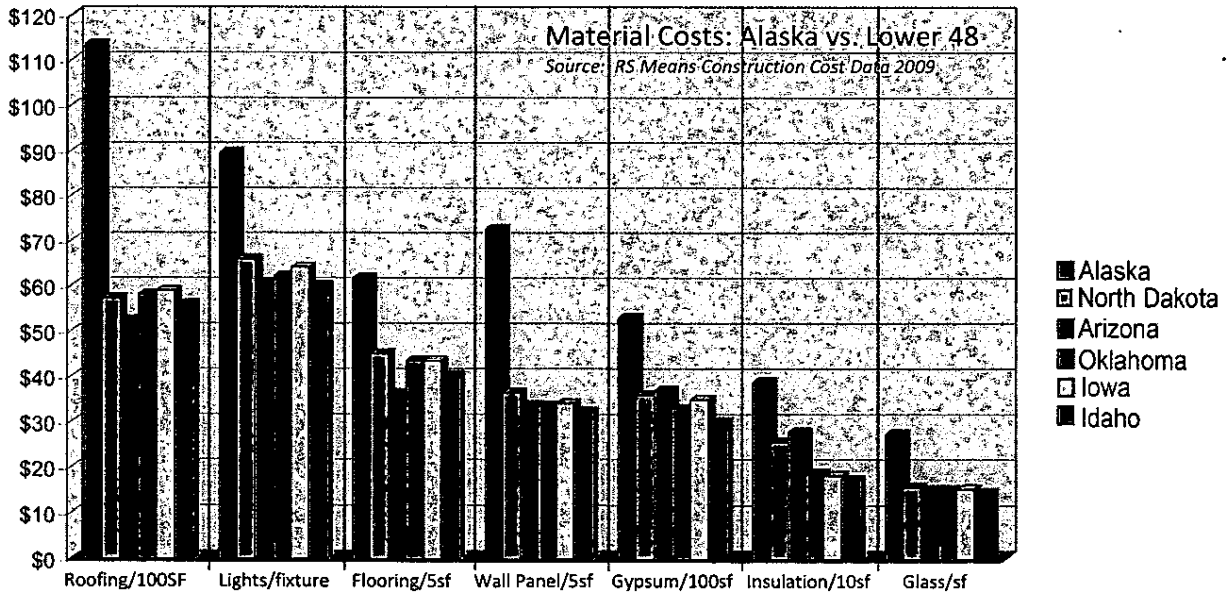
The methodology used to develop and validate the construction cost estimate is more rigorous than the industry typically applies (the project team prepared eight estimates). The process includes several elements:

- Construction Manager/General Contractor (CM/GC) delivery method - the general contractor, mechanical and electrical subcontractors bring expertise to the design team
- Independent estimates - develop and reconcile separate estimates from contractor and architect's estimator at each design phase
- Third-party opinion of cost – by an independent Alaskan estimator
- Fourth-party validation - of estimating process
- Competitive bidding – by building trades

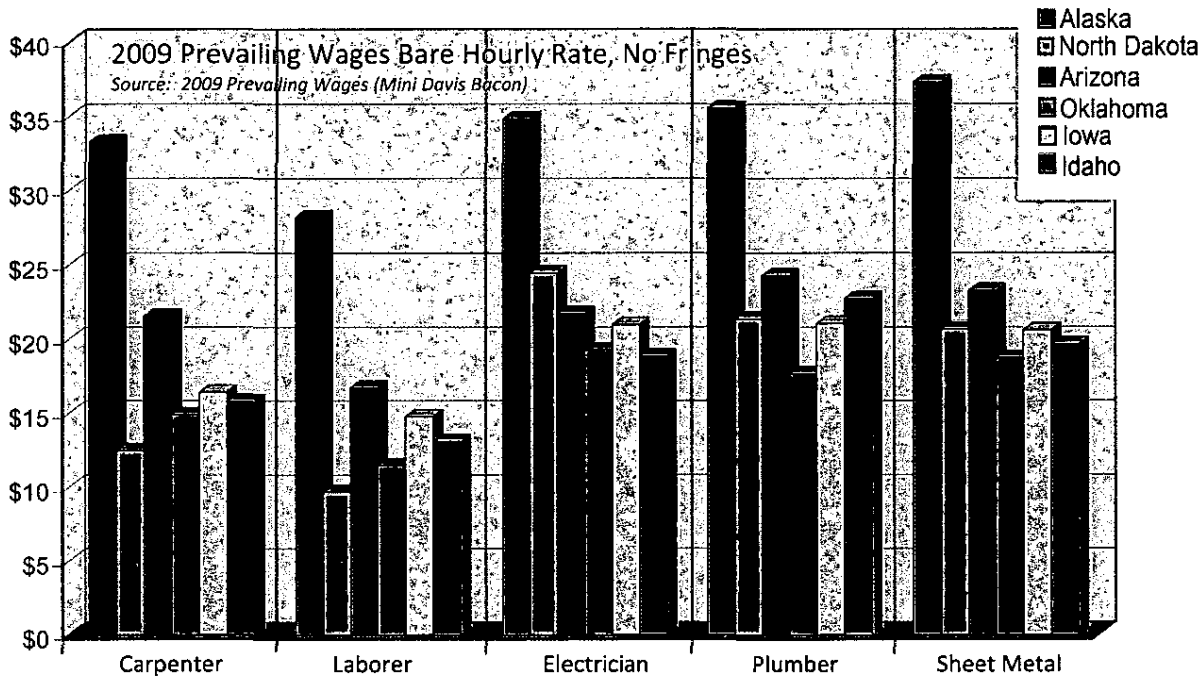
In summary, the project team used an exhaustive estimating process to arrive at the project's cost. Cost comparisons with other labs built in Alaska show conclusively that the cost of the Crime Lab is in line with what it actually costs to build labs in Alaska.

<u>Construction costs are higher in Alaska than in the lower 48 states</u>

It costs more to build in Alaska than in the lower 48 states. Many factors account for this trend. Materials in particular cost more in Alaska primarily because they must ship from the lower 48. The figure below illustrates this point.



The largest cost increase in Alaska comes from higher labor costs, because they can make up over half the cost of a building. And Alaska's labor costs greatly exceed those of the lower 48 states, as shown in the following figure.

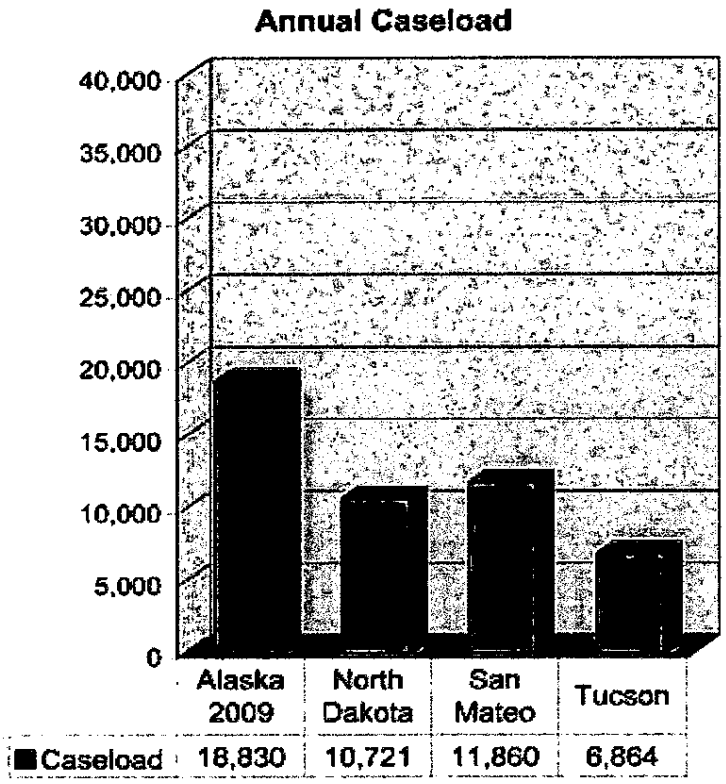


For example, Davis Bacon Prevailing Wage Rates for some labor types are as much as five times higher in Alaska than elsewhere. Even greater discrepancies occur for 18 other states that do not require contractors to pay established wage rates mandated by "Little Davis Bacon" laws for state funded projects, or the Davis Bacon Act for federally funded projects. Alaska law requires payment of "Little Davis Bacon" wage rates for state funded construction contracts like the Alaska crime lab. That is why the labor costs for the Alaska crime lab are orders of magnitude higher than those for many other states that do not require payment of higher wage rates.

<u>The cost of Alaska's crime lab is comparable to others in the Lower 48 when scope and cost adjusted</u>

A question has arisen about why Alaska's proposed crime lab appears to cost more than some other, seemingly comparable labs around the country. With regard to building materials and labor costs, this trend is valid. It is an unavoidable cost of doing business in Alaska.

The apparent difference between the Alaska crime lab's cost and that of other labs around the country more often reflects significant dissimilarities of project scope. Incorrect conclusions occur when one compares the published cost of another lab with that of the Alaska lab without first understanding, then normalizing the scope of the two projects. For example, Alaska's annual case load is higher than those of other recently completed labs in the lower 48, as shown in the figure at right.



The figure illustrates that one cannot compare the size of labs without considering differences in case load.

Another example is the North Dakota Lab. Last legislative session it was referred to by others as an outside lab that cost significantly less to build. Upon further study it was determined this conclusion was invalid because the scope of the projects were vastly dissimilar. By accounting for scope differences between the projects, the costs were actually proven similar.

One can continue indefinitely scope and cost comparisons with other labs anywhere around the world and, like the North Dakota Lab, they will validate the cost of the Alaska crime lab. This is because the Alaska lab was sized correctly by a team of experts. And its price is a phenomenon of the local construction market.

A team of experts delivers a valid project

The state's design team consists of leading experts in all related fields. The assembly of a team of experts best assures the lab is the right size, right design, and optimized to meet the current and future needs of the State of Alaska. Their product, the new Alaska Scientific Crime Detection Laboratory, has been well vetted and it has withstood the challenge of public scrutiny. The team includes:

The best crime lab expert in Alaska. The assembly of a successful project team begins with the laboratory director. A new and more expert laboratory director, Mr. Orin Dym, came into the project at the onset to infuse national crime lab experience, and to strengthen and improve local crime lab capabilities. Mr. Dym's

experience with numerous other crime labs in the lower 48, when coupled with that gained at Alaska's lab, makes him the state's premier and unmatched authority in the crime lab arena.

The most experienced crime lab architect in the United States. The keystone of the design team is the laboratory architect, Bill Lawrie, of McClaren, Wilson & Lawrie, Inc. Bill's experience and reputation is virtually unparalleled in the design industry. He has designed over 90 crime labs when his peers at best can offer the experience of only a few labs. His experience and international reputation are well deserved. Alaska can rest assured that its new crime lab design is sized optimally to meet its needs.

The most experienced lab designer in Alaska. To put crime lab concepts onto paper, a local architectural firm, Livingston Slone Inc., teamed with Bill Lawrie. LSI has successfully designed 5 large, state-of-art labs in Alaska in addition to several smaller labs. LSI's experience in Alaska lab design is virtually unchallenged in the State.

The most experienced lab project manager in Alaska. The design team is under the management of the Statewide Public Facilities Section of the Department of Transportation and Public Facilities. Project manager, Matt Tanaka P.E., has successfully delivered other laboratory projects for the state. He completed the Department of Environmental Conservation's Environmental Health Lab, and also the Department of Health and Social Service's Virology Laboratory on time and under budget. Mr. Tanaka has more recent experience managing laboratory projects than anyone in the State of Alaska and his track record is excellent.

A most experienced and reputable contractor in Alaska. Assisting the design team is one of the state's leading and most experienced contractors, Neeser Construction, Inc. They built the State's Public Health Laboratory & Medical Examiner's Facility, a building comparable in sophistication to the crime lab. Their expertise with design-assist and construction projects in the state further validates the project cost, and assures it will arrive on time and under budget.

COST SAVINGS

When the legislature considered the crime lab for funding in 2008, the design was largely complete. A significant capital investment of about $8 million went to planning and design activities. But, concern arose about the size of the $95 million capital appropriation the State would need to build the facility. To address this concern, the State considered at least three options to reduce capital and operating costs without diminishing forensic service to Alaska.

Options include:

- **On-site expansion** – expand the existing lab and renovate the existing lab
- **Split facility** - build a smaller new lab elsewhere and stay in existing lab
- **Smaller replacement lab –** build a smaller new lab and stop using existing lab
- **Full size new lab** - build the full laboratory structure but leave some space unfinished and seek a smaller capital appropriation.

On-site expansion

Several consultants have explored the concept of on-site renovation and expansion, beginning with the original 2005 Expansion Study conducted by USKH, Inc. in association with Earl Walls Associates (lab design specialists), and continuing through the site analysis and site selection process conducted independently in 2007 by DOWL/HKM in association with Livingston Slone and McClaren, Wilson & Lawrie. It is important to note that both the 2005 Expansion Study and the later site analysis process both indicated that this option, while possible, was less practical and more costly in the long term than building a new lab on a different site. Taken together, the significant disadvantages of renovation and expansion make the option simply unworkable.

Split facility

The existing lab is deficient and needs a $12 million capital appropriation to remain in service. The funding will correct failed mechanical, roofing and other building elements, and code problems. Most significantly, **the existing lab will shut down for up to 6 months** to make way for construction work.

Split facility use is also infeasible operationally. This is because forensic departments must often pass evidence between themselves to work all sides of a case. If some departments reside in different buildings, evidence must pass outside the secure perimeter of the lab. This may compromise

defensibility of forensic results and slow down lab operations, creating chain-of-custody and evidence handling issues that may compromise the evidence and the possibility of securing criminal convictions. All departments should be under one roof.

Smaller replacement lab

This option is not cost effective and will delay the project several more years. The State spent about $8 million on design for the new lab. It will lose most of this investment and spend millions more to scale back the design. Redesign costs and potential escalation during the delay will offset savings achieved by building a smaller lab. The State will spend about as much to build a smaller lab as to build the full size lab.

Build full size new lab

This option is most cost effective and offers the greatest benefit to the state. It delivers the full building structure now but leaves some areas within it unfinished, or "shelled-out". The State finishes interior space it needs most urgently and defers finishing lower priority, shelled-out space until it is possible to finish it.

Today, this option saves the State $20 million. Tomorrow it reduces operating costs by about $43,000 per year. The annual energy cost of the new laboratory with shell space is about $412,000. This figure is about 2.7 times higher than that of the existing crime lab.

STATUS

Construction

The new crime laboratory is under construction. 2009 saw the completion of site clearing, utilities construction, and building pad preparation for a cost of $8.8 million. The $75 million appropriation under SB226/HB299 will fund the continuation of building construction from the foundation up. The project is literally "hammer ready" and it awaits a final appropriation of funding.

Design

The design of the lab is finished. It began 5 years ago with the support of a series of appropriations amounting to about $8 million. A fully-vetted design process has yielded numerous planning and design deliverables, including:

Public Process

The crime laboratory project went through a rigorous public process spanning the course of over 5 years. The public process involved municipal, state, and federal arenas associated with various elements of the project. The process included:

State

The Department of Public Safety and/or the Governor's Administration introduced the crime lab to three legislative sessions to obtain funding for the project. Current Governor Sean Parnell also introduced a bill to a fourth legislative session to obtain the balance of construction funding. During each session the project received public comment and legislative scrutiny.

Municipal

- Planning and Zoning Commission - review and approval
- Urban Design Commission - review and approval
- Heritage Land Bank board - approval obtained prior to assembly approval of land lease.
- Assembly - hearing and approval obtained prior to municipal land lease
- Municipal land lease – signed by the Mayor of Anchorage and the State of Alaska
- Campbell Creek Community Council – briefing and resolution of approval
- Fire marshal - approval
- AWWU - approval of water and sewer utilities
- Chugach Electric Association - approval of power service
- Re-platting - requiring public notice period
- Enstar Natural Gas - approval of natural gas service

Federal

- Corps of Engineers wetlands permit – for construction in class B wetlands, requiring public notice periods
- NEPA storm water permit

Sponsor Statement
House Concurrent Resolution 16

Requesting the Governor to proclaim September 7, 2009, as Senator Daniel Inouye Day.

House Concurrent Resolution 16 honors United States Senator Daniel Inouye of Hawaii by respectfully asking the governor to proclaim September 7, 2009 – the senator's 85th birthday – as Senator Daniel Inouye Day.

This is to recognize him for his tireless, selfless service to the country in general and to Alaska in particular. It is aimed at showing this state's gratitude for his help on a range of issues important to our state such as opening the coastal plain of the Arctic National Wildlife Refuge to oil development, supporting a national missile defense system, opposing a plan to shut down Eielson Air Force Base, and helping to approve reparations for Aleuts who, along with Japanese-Americans, had suffered when forcibly placed in federal internment camps during World War II.

Senator Daniel Inouye stands as the largest figure in public life in the history of the State of Hawaii, having held elective office since before Hawaii attained statehood in 1959. He has received many military decorations for valor, culminating with the Congressional Medal of Honor for heroism as a member of the legendary 442nd Regimental Combat Team in World War II in which he lost his right arm

In Alaska, Senator Inouye is famous for his close friendship with former Senator Ted Stevens. Each refers to the other as his brother. When shown a copy of this resolution, Senator Stevens summarized it best why it is worth having a Senator Daniel Inouye Day in Alaska. He issued the following statement:

> "When you honor Senator Daniel Inouye, you honor a true friend of Alaska. Dan is a close friend I worked closely with for forty years. We were two new Senators serving two new off-shore states. Senator Inouye is a distinguished American who earned his Congressional Medal of Honor the hard way! It is my privilege to call him my brother – we continue to be close friends."

SPONSOR STATEMENT
HCR 19 – AIDEA REPORT ON IN-STATE FUEL STORAGE

In 2009 the House Judiciary Committee investigated the unusually high price of gasoline in the state of Alaska relative to the rest of the country. The public outrage had grown steadily as the prices in the Lower 48 sank and the prices in Alaska did not. To further annoy consumers, Alaskan crude oil had fallen from an all time high in July 2008 of $144.00 per barrel back to $40.00 a barrel a year later, yet gasoline prices at the pump lacked the same elasticity.

At the same time the House Judiciary was conducting its investigation, the Attorney General was exploring whether there was any evidence of collusion among companies in Alaska to either expressly or tacitly agree to fix petroleum prices. The Attorney General concluded there was not.

Throughout these investigations, two different approaches to address the problem emerged. On the one hand, some legislators and constituents called for government controlled pricing or "price gouging" legislation, on the other hand were those who strongly believed that price controls do more to hurt the economy and result in unintended consequences – even causing a counter-productive affect of discouraging potential competitors from entering the market; competition that might force prices down. People opposed to government price controls sought other ways to impact the market without increasing government regulation.

HCR 19 is designed to encourage public discourse on other ways to impact the market without increasing government regulation of oil refineries and gasoline distributors. HCR 19 urges the Alaska Development and Export Authority (AIDEA) to analyze whether or not a fuel storage facility in the state, financed by AIDEA and operated by an independent third party, would be economically viable and assist the state in meeting the fuel needs of Alaskans at competitive prices. With the Anchorage port's recent expansion there is room for a new fuel storage facility. New storage capacity could encourage in-state suppliers to receive bulk shipments of fuel from refiners outside of the state to supplement fuels produced by in-state refiners; and in-state refiners will be able to stock-pile fuel to meet demand surges at more stable prices for consumers.

HCR 19-AIDEA REPORT ON IN-STATE FUEL STORAGE

HB 386-CITATIONS
CS WORKDRAFT CS HB 386(FIN)
26-LS1525/E

AIDEA PORT OF ANCHORAGE
LIQUID STORAGE FACILITY

The following pages will discuss benefits of the Alaska Industrial Development and Export Authority (AIDEA) building a liquid storage facility. The concept of this terminal would be that it is constructed by AIDEA and leased to a third party operator. The storage capacity would be leased to various fuel distributors, oil companies, energy trading companies, and end users.

OVERVIEW

In the Attorney General's 2008 Alaska Gasoline Pricing Investigation it was found that the structural characteristics of Alaska's petroleum products market contributed to the unusually high gasoline prices relative to other parts of the country. Indeed, Alaska is very geographically isolated, even more so when it comes to energy. In other parts of the country refined petroleum products can easily move from market to market via thousands of miles of pipelines or coastwise using marine transportation. A great example of this would be putting gasoline into a pipeline in Houston, TX and receiving it in New York Harbor. In this example storage facilities in Houston and New York, as well as the pipeline between those two cities, are fairly open to parties that wish to participate in this trade. These markets would be considered to have ample liquidity. This is a stark contrast from Alaska. To ship petroleum products from Seattle to Anchorage is a difficult task. While products are fairly available in Seattle and other parts of the world, and transportation can be found, storage in Anchorage to receive the product does not exist. This forces us to be reliant upon instate refiners. And there is only one refiner that produces significant quantities of low-sulfur diesel and gasoline. The basic structural characteristic of Alaska's Petroleum Market is very different from the rest of the country.

- There is a lack of liquidity in the Alaska petroleum market.
- There is a lack of available storage and distribution infrastructure to support alternative supply.
- Changes in the maximum sulfur specification for fuels has had a significant impact on product supply.

A large bulk liquid storage facility in Anchorage would help resolve these issues.

HISTORY

Alaskans use three primary sources of liquid fuels: jet fuel, diesel fuel, and gasoline. The product that has the most demand in the state is jet fuel or Jet-A. Jet-A is used for aviation, heating oil, and power generation. The majority of the jet fuel consumed in the state is done so at the Anchorage International Airport. Diesel fuel is used in vehicles, marine applications, power generation, and heating fuel. Gasoline is primarily used in cars, boats, snowmachines, and recreational vehicles.

Demand for gasoline, diesel and jet from the 1990's to the early 2000's was fairly stable in the State of Alaska. The approximate demand (not including the Alaska North Slope) for these products was as follows (Barrels per Day (BPD)):

In-State Demand

Type of Fuel	*2000's BPD*	*1990's BPD*
Gas	16,000	15,500
Jet	67,000	65,000
Diesel	17,000	16,000

During the 1990's the State of Alaska was a net importer of Jet fuel and a net exporter of gasoline. During the early 2000's refining capacity was increased by all three in state refineries. This led to an in-state balance for jet fuel and additional gasoline for export. In-state production for these time periods was as follows:

In-State Production

Type of Fuel	*2000's BPD*	*1990's BPD*
Gas	20,000	18,300
Jet	67,000	46,300
Diesel	18,000	16,900

During the 1990's Anchorage International Airport used about 50,000 barrels of jet fuel per day. (The recent peak demand at the airport was over 60,000 BPD.) The balance of the state demand for jet fuel was for military jet fuel, power generation, heating oil, and vehicle use in the winter months.

During the 1990's prices in Alaska remained fairly consistent with the Pacific Northwest. Specifically, a comparison of OPIS (Oil Pricing Information Service) rack prices in Seattle versus OPIS rack prices in Anchorage would indicate a difference in cents per gallon (CPG) as follows:

Anchorage OPIS Rack Prices – 1990's

Type of Fuel	*CPG Difference to Seattle OPIS Rack*
Gas	16.5
Jet	11.3
Diesel	5.7

In addition, the price differential for jet fuel at the airport was about 5 CPG above Los Angeles in the early 1990's. After the refiner expansions that lead to an increase for in-state production of jet fuel, these differentials dropped closer to 3 CPG.

FAST FORWARD TO TODAY

What has changed?

In June of 2006 the EPA mandated a shift to lower sulfur fuels. This change effected how refiners produce gasoline and diesel fuel. To produce these new fuels most refiners needed to make significant investments in their facilities. Only one Alaska refinery received such an investment to produce the lower sulfur fuels. The changes EPA mandated in the sulfur level (parts per million (ppm)) for diesel fuel and gasoline in Alaska were as follows:

Change in Maximum Sulfur Content

1990's	*Max Sulfur (ppm)*	*Versus:*	*Today*	*Max Sulfur(ppm)*
Gas	1,000		Gas	30
Diesel	5,000		Diesel	15

These new fuels are called Ultra-Low Sulfur (ULS) fuels. This large reduction in sulfur has also created a large reduction in available in-state production. One example of lost production is that the Prudhoe Bay and Kuparuk facilities on Alaska's North Slope no longer operate at capacity. This requirement is sourced from elsewhere in the state. Presently, only one in-state refiner produces ULS diesel (ULSD). Gasoline produced in-state has also been reduced because of the sulfur mandate by about 3,000 BPD. Additionally, one refiner has discontinued production for its largest crude unit. This means a reduction of about 17,000 BPD of jet fuel produced here in the state.

The impact of lower in-state production on price differentials has been an increase in Anchorage OPIS rack prices versus Seattle OPIS rack prices. Current differentials are as follows:

Current Anchorage OPIS Rack Prices

Type of Fuel	*CPG Difference to Seattle OPIS Racks*
Gas	105
Jet	38
ULSD	110

LACK OF LIQUIDITY

In petroleum markets that have sufficient liquidity, differentials are pegged at the transportation cost to move product from one market to another. In Alaska's case, the ability to bring product in from another market is not there as storage is unavailable to bring in a typical parcel (approximately 80 - 300,000 barrels). Storage is not available; thus, no liquidity exists. Current storage for ULSD and gasoline is owned and operated by in-state refiners. Sixty to seventy percent of the storage at the Port of Anchorage is controlled by two of Alaska's in-state refiners. The balance is used by the Airport Fueling Consortium and the United States Military.

The key to ensuring that Alaskans have sufficient energy at prices that change relative to the rest of the world is ensuring there is ample supply available. Current environment regulation mandates that imports are available to meet the demand requirements. Realistically those imports can only be facilitated by the two in-state refiners that control the storage facilities. To attract third-party imports, storage needs to be available for product to be brought in by barges or tank ships.

SOLUTION TO CREATE LIQUIDITY

AIDEA works with a bulk liquids terminal operator to develop construction costs and operating costs for a bulk liquids storage facility. Once construction and operating costs are identified AIDEA can go to potential users with an "Open Season" format in which to sell commitments for the facility. Once firm commitments are received AIDEA builds the facility at the Port of Anchorage. This facility would be able to receive marine or rail shipments. It would be capable of loading ships, barges, rail cars, and trucks. The facility would be leased and operated by a terminal operator for all companies willing to lease storage space. Potential candidates would include major ANS exploration companies, refiners, distributors, energy trading companies, utilities, and various other end users. Candidates would commit to storage space and sign long-term leases prior to construction. It is anticipated that the facility would have storage capacity between 500,000 barrels and 1,000,000 barrels and cost between $50 - $100 million. The facility would be able to handle other products like bio-diesel, methanol, and ethanol as well.

IMPACT ON EXISTING INDUSTRY

The AIDEA facility would allow existing refiners, distributors, end users, and others the ability to bring bulk liquids into south central for redistribution to other areas of the state. It provides access for out of state products to enter the Alaska market.

Industries that rely on diesel and gasoline for their business activities have limited options to manage their fuel costs. For the most part these companies rely on one source for their needs, as does the state. The AIDEA facility would allow for some options to meet these requirements.

SUMMARY

An AIDEA supported bulk liquid storage facility would change the basic structural characteristic of Alaska's Petroleum Market to be more in line with the rest of the country. This additional storage in Anchorage will facilitate a re-balancing of supply and demand as was the case in the early 2000's. The project as a whole will also increase the liquidity in the Alaskan petroleum products market and lead to Seattle - Alaska rack pricing being more in line with the historical averages

Alaska Industrial Development and Export Authority

Investing in Alaskans

A Presentation to the House Finance Committee on HCR 19

James Hemsath
Deputy Director – Business Development

29 March 2010

HCR 19 – Fuel Storage Business Case

Urging the Alaska Industrial Development and Export Authority to ***present a business case*** to the Alaska State Legislature that includes a method for financing, a plan to solicit proposals for a public and private venture, and an objective ***analysis of the economic and business feasibility*** of a state-built and privately operated fuel storage facility that would serve the public interest.

22281

AIDEA's Role

- Provide an objective analysis examining both the economic development impact and feasibility of a storage facility as well as the long term viability of the project
- As part of the analysis identify potential private and public sector users of the facility
- In conjunction with EconOne, look all aspects of the fuel supply system in the State and the impact additional storage would have for the different regions
- Examine possible ways of financing this project which could include AIDEA financing through ownership as a Development Finance Project (AS 44..88)
- As a possible owner of the storage facility, act as a consolidator for multiple users and demands assuring open access to storage

Action Plan

- Market Analysis
  - Continuation of last years efforts by EconOne
  - Military
  - Long term Air Cargo
  - Fuel supply reliability
- Engineering Layout and Cost Estimate
  - Space constraints
  - Multiple tanks, vapor recovery, additives, labs
  - Schedule
- Establish Basic Business Case Model
  - Competition
  - Market risks
  - Economic impact

AIDEA Business Case

- Open access
- AIDEA owned – contracted operator
- Generate revenue
- Market and market risk
- Competition
- Economic development
  - Job creation/diversification
- Open Season

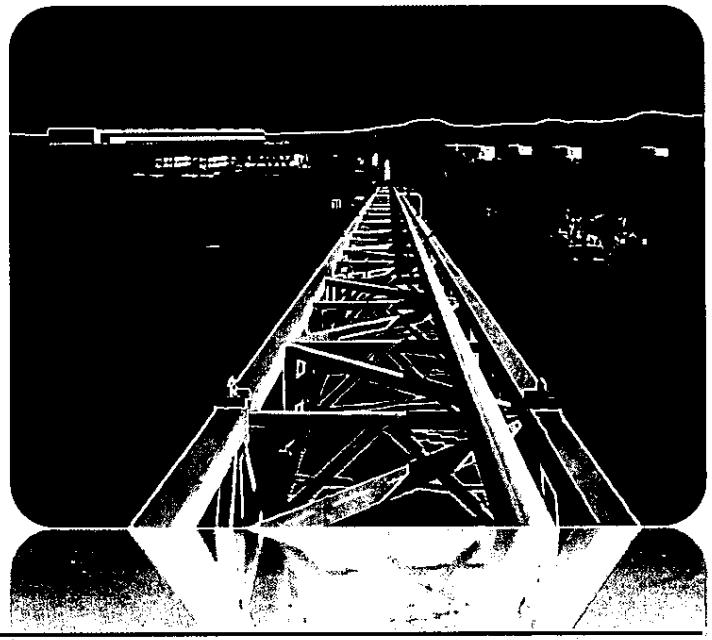
Moving Forward

The mission of the Alaska Industrial Development and Export Authority is to promote, develop and advance economic growth and diversification in Alaska by providing various means of financing and investment



AIDEA

Development Finance Program

Has the ability to acquire:

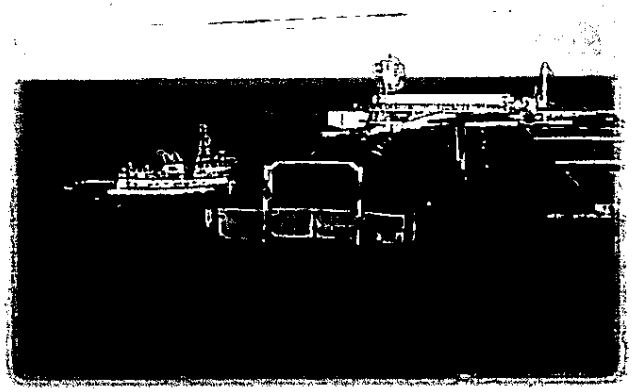
- An interest in a project as necessary or appropriate to provide financing for the project
- Manage and operate projects as the authority considers necessary or appropriate to serve a public purpose
- Equip, operate, maintain, construct, or install facilities that will enhance the competitiveness of the international airports (AS 44.88.080)

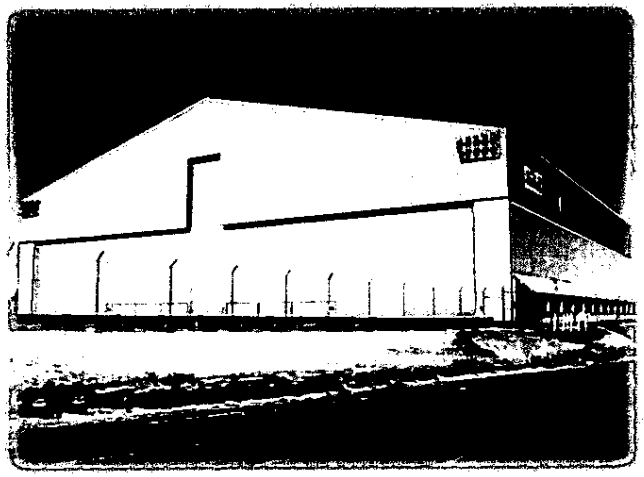
Development Finance Program

- Under AS 44.88, the project must be **endorsed** by the local government
- The project and its development must be **economically advantageous to the state** and to the general public welfare and will contribute to the economic growth of the state;
- The project applicant is **financially responsible**
- The project is economically and financially feasible and able to **produce revenue** adequate to repay the bonds or loans with which it is financed.

Development Projects

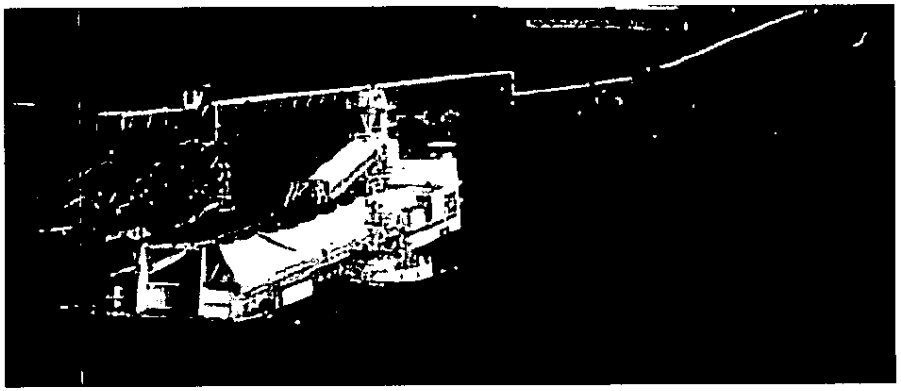
- DeLong Mt. Transportation System
- FedEx Maintenance Facility
- Snettisham Hydroelectric Project
- Ketchikan Shipyard
- Skagway Ore Terminal
- Healy Clean Coal Project





Port of Anchorage Fuel Terminal

- 500,000 to 1,000,000 barrels of fuel storage capacity
- Open access
- Product transferred by pipeline, barge, truck and railcar
- Enhance the statewide fuel system
- AIDEA contract with operator
- Open season for storage commitment
- Estimated cost $75 – 100 million



Our Mission is to promote, develop and advance economic growth and diversification in Alaska by providing various means of financing and investment

With the vision to be an active partner with Alaskans and a dynamic resource in Statewide economic development

CS FOR HOUSE CONCURRENT RESOLUTION NO. 21(L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SIXTH LEGISLATURE - SECOND SESSION

BY THE HOUSE LABOR AND COMMERCE COMMITTEE

Offered: 4/10/10
Referred: Finance

Sponsor(s): HOUSE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

A RESOLUTION

Creating and relating to the Economic Development Planning Commission.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

WHEREAS the state has a significant need for economic development; and

WHEREAS it would be beneficial to the state and its citizens to develop visions and strategies to encourage economic development; and

WHEREAS Wyoming, North Dakota, Indiana, and Oregon, among other states, have taken steps to integrate private sector leadership into economic development efforts administered by their state governments; and

WHEREAS multiple economic development strategic planning initiatives are underway in Alaska, including the Alaska Partnership for Economic Development's Alaska Forward Initiative and the Governor's Legacy Initiative;

BE IT RESOLVED that the Alaska State Legislature establishes in the legislative branch the Economic Development Planning Commission to develop and recommend to the Governor and to the legislature visions and strategies that will encourage economic development in the state; and be it

Alaska Legislature <- Add

FURTHER RESOLVED that the ~~(~~Alaska Legislative Council~~)~~ shall provide adequate

Called in 4/13 10:15a

staffing for the commission; and be it

FURTHER RESOLVED that the commission shall consist of the following members:

(1) one member of the House of Representatives appointed by the Speaker of the House of Representatives;

(2) one public member appointed by the House Minority Leader who is working in the private sector and who possesses business expertise and demonstrated leadership skills;

(3) one member of the Senate appointed by the President of the Senate;

(4) one public member appointed by the Senate Minority Leader who is working in the private sector, and who possesses business expertise and demonstrated leadership skills;

(5) two public members with private sector business expertise and demonstrated leadership skills, appointed by the chair or jointly by the co-chairs of the House Finance Committee;

(6) two public members with private sector business expertise and demonstrated leadership skills, appointed by the chair or jointly by the co-chairs of the Senate Finance Committee;

(7) the commissioner of commerce, community, and economic development, ex officio, or the commissioner's designee;

(8) the commissioner of labor and workforce development, ex officio, or the commissioner's designee;

(9) the president of the Alaska Partnership for Economic Development, or the president's designee; and be it

FURTHER RESOLVED that appointed public members of the commission serve without compensation but are entitled to per diem and travel expenses authorized for boards and commissions under AS 39.20.180; and be it

FURTHER RESOLVED that a vacancy in the commission shall be promptly filled in accordance with the requirements applicable to the original commission member who left the office; and be it

FURTHER RESOLVED that the commission shall

(1) review recommendations produced by various economic development planning processes, including the Alaska Forward Initiative, the Governor's Legacy Initiative, and others, advise the legislature on its potential role in implementing the vision or the plans or both, and provide draft legislation to accomplish the recommendations;

(2) consider and make recommendations regarding methods, programs, and financing that may be used by the state to foster economic development;

(3) prepare proposed legislation to carry out recommendations of the commission that the commission determines may need to be implemented by law;

(4) present its recommendations and proposed legislation to the Alaska Legislative Council, the Legislative Budget and Audit Committee, the House Labor and Commerce Committee, and the Senate Labor and Commerce Committee not later than January 30, 2011; and be it

FURTHER RESOLVED that the commission may, after considering the recommendations in the Alaska Forward Initiative, the Legacy Initiative, and other economic development strategies, prepare legislation to restructure economic development activities of state government so that those functions are moved from existing state agencies to a

(1) newly created public corporation or a newly created department; or

(2) division within the Department of Commerce, Community, and Economic Development; and be it

FURTHER RESOLVED that the commission may, not later than December 15, 2011, present a supplemental report, which may include additional recommendations and proposed legislation; and be it

FURTHER RESOLVED that the commission is authorized to begin work immediately on the appointment of the members who are appointees or on April 30, 2010, whichever date is earlier, and is terminated on June 30, 2012.

ANALYSIS: *(Attach a separate page if necessary)*

CS HCR21(L&C) creates an eleven member Economic Development Planning Commission to develop and recommend to the Governor and to the Legislature visions and strategies that will encourage economic development in the State. The Commission is composed of two Legislators, seven public members, and the Commissioners of Commerce, Community, and Economic Development and Labor and Workforce Development or their designees. It is anticipated the Commission will meet by teleconference and will also hold 3 meetings per year which require travel. The Commission will review recommendations of various economic development planning processes, consider and make recommendations regarding ways to foster economic development, prepare legislation based on the recommendations of the Commission, and present the recommendations and proposed legislation to the Legislative Council, Budget and Audit Committee, and the House and Senate Labor and Commerce Committees by January 30, 2011, and may present a supplemental report by December 15, 2011. The Commission is authorized to begin work immediately on the appointment of members or April 30, 2010, whichever is earlier and will terminate June 30, 2012. Costs to print the Commission report and to teleconference meetings will be absorbed within existing budgets. Any FY10 Legislative costs for the Commission will be absorbed in the Legislative Council Budget.

Sponsor Statement

HCR 21, Economic Development Planning Commission

House Concurrent Resolution 21 creates the Economic Development Planning Commission whose purpose would be to develop and recommend to the Governor and the Legislature visions and strategies that will encourage economic development in Alaska.

The Commission would consist of a ten-member board: one state Representative and one public member appointed by the co-chairs of House Finance, one Senator and one public member appointed by the co-chairs of Senate Finance, one public member appointed by the House Speaker and one by the Senate President, one public member appointed by the House Minority Leader and one by the Senate Minority Leader, the Commissioner of DCCED and the Commissioner of ADOL&WD.

There are numerous economic development strategy projects underway in Alaska, including the Governor's LEGACY initiative, the Alaska Forward strategic economic development planning initiative, and many regional and local level efforts. In addition, a review of state economic development best practices suggests that private sector input into economic development efforts in state government are critical for aligning state resources behind meaningful economic activities.

The Commission would integrate private sector advice and input into legislative oversight and action supporting economic development.

The Commission will monitor the planning processes currently underway, as well as state government's efforts, and make recommendations to the legislature on those economic development initiatives that may require statutory action by a future Legislature to come to fruition.

The Commission would be tasked with providing draft legislation and recommendations in advance of the 2011 legislative session. In addition, the commission may be tasked with legislation to reconfigure the state's economic development agencies and investments based on their assessment and that of other planning initiatives.

HCR 21, Economic Development Planning Commission

For House Finance Committee

Heard in EDT&T: Changes from HCR 21 to CS HCR 21 (EDT)

- Gave one public appointment each to the Senate and House Minority Leaders, and removed one public appointment each from the Senate President and House Speaker
- Directed the Commission report to Legislative Council as well as Legislative Budget & Audit
- Changed the first reporting deadline from June 30, 2011 to January 30, 2011
- Inserted second reporting deadline of December 15, 2011
- Changed commencement of Commission work from March 15, 2010 to April 30, 2010
- Changed sunset from June 30, 2011 to June 30, 2012

Heard in L&C: Changes from CS HCR 21 (EDT) to CS HCR 21 (L&C)

- Added the President of the Alaska Partnership for Economic Development, or their designee, as a commission member (bringing total membership to 11)
- Added a requirement that the Commission report its findings to the House and Senate Labor and Commerce Committees (in addition to Legislative Budget & Audit and Legislative Council)
- Removed the requirement that appointees not be "an officer of the state or employed by officers of the state" in order to leave open the opportunity for appointments by qualified individuals in state employ
- Made changes so that Legislative members of the Commission are appointed by the presiding officers (rather than the Finance Co-Chairs); and added an additional public appointment to the Finance Co-Chairs from each body.

BRIEFING PAPER:
ECONOMIC DEVELOPMENT
IN STATE GOVERNMENT

A review of economic development configuration in Alaska's agencies, models from other states, and potential changes to Alaska's economic development system

---

Alaska's Department of Commerce, Community and Economic Development includes both **Economic Development** and **Community Development** functions. The department's mission is to "promote a healthy economy, strong communities, and protect consumers in Alaska."

The difference between economic development and community development is not always well-understood. To establish a shared understanding of these terms, the following definition is presented:

> Community development is capacity building; economic development is wealth creation.
> --Robert Shively, *Economic Development for Small Communities*

To go further, community development often refers to projects that create infrastructure and community capacity. Public works projects, schools, bridges, libraries, community centers and parks... these are community development projects. Economic development projects, on the other hand, would be the construction of a new clinic by a group of private physicians, or the expansion of a metal fabrication shop by a business owner. Community development and economic development are deeply intertwined, because economic development—and the private investors, owners, and entrepreneurs who lead the way—also requires community infrastructure, either to support their businesses or to enable a lifestyle that makes them want to live and stay in a community. At their cores, both community development and economic development are about resilience, the ability of a community or economy to respond to both opportunities and threats, to adapt to change. But the two functions are quite different, *and the appropriate activities and roles for government in economic development are much different than in community development.*

The purpose of this paper is to examine ***economic development*** activities in state government. While we recognize the interconnectedness of the two functions, the focus of this work is on resources within state government that support private sector investment in Alaska's economy.

Current Resources within State Government and the University System

Alaska's Office of Economic Development (OED), within DCCED

- The mission of OED, as described in the FY10 Governor's Operating budget, is to "Advance successful tourism, film, fisheries, forest products, minerals, and small business assistance programs in order to increase economic activity in Alaska and create new employment opportunities for Alaska."

- Alaska's OED currently has a division head, plus 11 employees in five sub-programs, many of which can be tied to one or more functions in Alaska Statute.
    - The Alaska Film Office (3 employees, one of whom is shared with Tourism) (AS 44.33.231, Film Office)
    - Business Development (2 employees, one of whom is a forest products specialist) (AS 44.33.900 Alaska Forest Products Research and Marketing Program)
    - Office of Fisheries (1) (AS 44.33.065, Regional Seafood Development Associations)
    - Office of Mineral Development (2) (AS 44.33.431, Alaska Minerals Commission)
    - Tourism Program (4, one of whom is shared with Film) (AS 44.33.119, Alaska Division of Tourism)

Alaska Industrial Development and Export Authority (AIDEA), within DCCED

- The mission of AIDEA, as described in the FY10 Governor's Operating budget, is "to provide means of financing to promote economic growth and diversification in Alaska."
- AIDEA's board of directors consists of five individuals
    - The Commissioner of Revenue
    - The Commissioner of Commerce, Community, and Economic Development
    - One other person appointed by the executive branch
    - Two public members appointed by the governor
- AIDEA's economic development programs have approximately 30 staff assigned to it, with 30 who are professional staff (estimate from AIDEA staff, October 2009)
    - AIDEA is a "public corporation of the state and a body corporate and politic constituting a political subdivision within the Department of Commerce, Community and Economic Development, but with separate and independent legal existence," under AS 44.88.010—44.88.159
    - AIDEA has a number of loan participation, revolving loan, and bond programs
    - AIDEA has ownership stakes in several major projects
- AIDEA also is home to another agency, Alaska Energy Authority (AEA) which currently has a community development mission
    - Though the agencies are separate, they share employees and resources

Alaska Division of Investments (DOI), within DCCED

- DOI's "primary responsibility is to administer and service twelve state loan programs under the Department of Commerce, Community, and Economic Development. These programs were primarily designed to promote economic development through direct state lending in industries that are not adequately serviced by the private sector."
- DOI typically interfaces with individual lenders and small businesses (in contrast to AIDEA, which handles significant industrial investments)
- DOI has 44 FTE employees (FY2010 budget)
- Loan programs authorized in statute are not comprehensive across range of Alaska industry

Non-Governmental Economic Development Organizations in Alaska

ARDORs

- Alaska Regional Development Organizations (ARDORs) are established under 44.33.895 (Alaska regional economic assistance program) and is subject to regulations at 3 AAC 57.010-900.
    - Under the statute the department can provide grants of up to $100,000 annually to match funds from non-state sources.

- The state's contributions to the ARDOR under this program are $50,000 annually. With the addition of an ARDOR in the last two years, the state's total contribution has increased, but organizations still receive the same amount. (Annual funding since 1992 is flat at $620,000; except for increase of $57,000 starting in FY09 with addition of twelfth ARDOR)
- According to the website of OED, ARDORs are intended to
  - *enable communities to pool their limited resources, and work together on economic development issues;*
  - *develop partnerships among public, private and other organizations,*
  - *offer a technical, nonpartisan capacity to develop and implement an economic development strategy,*
  - *often have extensive experience with federal/State programs, and*
  - *provide needed technical assistance via direct links with local citizens.*
- With large service regions and limited funding, some ARDORs have very difficult times attracting experienced staff to run economic development programs
  - Some conversations have been had to establish system-wide capacity-building fund for the ARDORs so that staff of the ARDORs can take advantage of professional development opportunities despite limited budgets

Additional Regional Economic Development Groups

- Regional/local groups also exist, such as Juneau Economic Development Council, Fairbanks Economic Development Corporation, Alaska Village Initiatives.
  - These have more local focus

University Economic Development Resources and Coordination with State Resources

The University of Alaska has several economic development programs doing technical assistance, training, etc.

- **Center for Economic Development, at the Institute of Social and Economic Research, UAA**
  - One of 52 university centers nationally designated by Economic Development Administration
  - Works at level of *municipalities, large non-profits, service-providing for profits (such as Alaska Native Corporations)*
    - 2008 Annual Report includes list of clients: http://ced.uaa.alaska.edu/publications/2008AnnualReport.pdf
  - According to their website, CED "leverages the resources of the university system to support economic development in Alaska, providing technical assistance in the form of information, data, and know-how in evaluating, shaping and implementing specific projects and programs that promote economic development across the state." (http://ced.uaa.alaska.edu)
  - Supported by fee for service in most cases, in order to support program delivery costs; some budget also from State
  - CED helps with local and regional planning, feasibility analysis, strategic planning (organizational and community) financial analysis, market and economic research
  - Recently, CED began coordinating accredited certification courses for the International Economic Development Council, to certify IECD economic development professionals
    - NB: Currently, there is not a single certified economic development professional working in Alaska

- **Small Business Development Centers**
  - Works at level of small, individual entrepreneurs
  - Provide free- and low-cost consulting to small business and micro-enterprise
  - Funded by US Small Business Administration with matching funds from state.
  - Provides consulting services and low-cost educational programs to entrepreneurs
  - Program's "business advisors" are certified through the Alaska SBDC's professional Certification program
  - Has a rural outreach program

How are Other State Governments Doing Economic Development?

Several states are recognized for their innovation in economic development within state government. Some of these are profiled below.

The states profiled below were selected because of their recognition as successful models, or commonalities with Alaska (rural Western). This report profiles North Dakota, Wyoming, Indiana, and Kentucky, which are all recognized for their economic development programs, as well as Oregon, which shares some similarities with Alaska as a Western state with large rural areas. All of these states have advisory and/or policy bodies that primarily comprise private sector leaders.

NB: Descriptions below reference "primary" or "basic" industries. These are industries that bring new dollars into a state's economy. Oftentimes these are because the business outputs are produced for markets outside the state. In some cases federal government programs, which bring dollars into state economies, can also be seen as contributing to the primary/basic sectors. This differs from support sector businesses, which provide services within the state. Primary/basic businesses are the economic pumps for an economy.

North Dakota www.business.nd.gov

- Economic Development & Finance is a division within a department that also houses Tourism and Community Development
  - Tourism is separate because development approach differs significantly from standard "primary/basic" sector activities.
- North Dakota has an Economic Development Foundation, a private foundation established by the Legislature, to provide guidance and private-sector oversight of state economic development efforts. It maintains a strategic plan for economic development.
  - 23 "business leaders," meet quarterly
  - has the ability to raise private funding to support state efforts
- Division heads are professional positions, not appointed
- Majority of staff at Economic Development and Finance Division are certified economic development professionals through the IEDC
- Primary function of division is to work with businesses to identify the state programs and resources that will help them establish, grow, or retain in North Dakota; deal structuring (not technical assistance, which is pointed to university, SBDCs, etc.)
- North Dakota has a development bank, the Bank of North Dakota, which manages nearly all of the state's loan and investment programs, with very few exceptions
- Department ***only works on inquiries/investments that are in the Basic sector of the economy*** (Basic industries bring new money into the economy from out of state, while secondary industries provide services to support the basic industries)

- Web presence: North Dakota has http://www.business.nd.gov/, which is a user-friendly portal to information necessary to do business in North Dakota
- 17 staff for ED&F, including 2 finance people to run loan programs outside the Bank of North Dakota

Wyoming www.wyomingbusiness.org

- Wyoming Business Council is the economic development group in state government
  - It has a corporate structure, incorporates private business practices, regional offices
  - Has a Board of Directors and CEO, though it is within state government
    - Board members are successful business owners from Wyoming
    - Board members appointed by Governor; CEO hired by Board
    - Employees of agency are at-will
    - Board does "business plan" for department
  - Staff of 53 for WBC, plus 19 for Tourism
    - 7-8 administrative staff, all other work on economic development and management of community grant programs
  - History of the WBC: http://www.wyomingbusiness.org/about/history.aspx
  - Enabling Legislation: Wyoming Statutes 9-12-101 through 9-12-804 (http://legisweb.state.wy.us/statutes/statutes.aspx?file=titles/Title9/T9CH12.htm)
  - WBC focuses on basic industries, with few exceptions in rural areas where basic service infrastructure (grocery stores) do not exist
    - Industries have to produce something sold outside the region to get WBC attention.
  - WBC works closely with university programs, including SBDCs, Intellectual property, incubators, etc.

Kentucky www.thinkkentucky.com

- Primary state agency for economic development is the Cabinet for Economic Development, which is governed by the Kentucky Economic Development Partnership Board
- Kentucky Economic Development Partnership Board
  - Enabled in 1992 by HB 89.
    - Thirteen members representing each of eight congressional districts and different industries, plus secretaries from four cabinets (Econ. Development, Finance and Administration, Environmental and Public Protection, and Tourism), plus Governor
    - Cabinet includes
      - Office of Secretary
      - Department for Business Development
        - "Responsible for coordinating the recruitment and attraction of new companies that will enhance the overall viability of the state's economy, as well as assisting and encouraging job retention and creation by working with existing Kentucky business. The Department partners with outside agencies and communities to conduct workshops, community assessments, and business surveys to support local development efforts"
      - Department of Financial Incentives
      - Department of Commercialization and Innovation

- "Responsible for developing and implementing a strategy to create, attract, and assist knowledge-based companies to Kentucky."

Indiana www.in.gov/iedc

- Primary state group for economic development is the Indiana Economic Development Corporation
  - Created in February 2005 to replace the former Department of Commerce
  - Has a board of 12, including governor and 11 private industry participants
  - According to IEDC website, "The IEDC is focused exclusively on economic development and has incorporated all state entities with economic development responsibilities into its organizational structure."

Oregon www.oregon4biz.com

- Economic development is a division within the Oregon Business Development Department, which also houses community development functions
  - About 25% of department budget goes to economic development
- Economic development overseen by the Oregon Business Development Commission, which is statutorily authorized, and consists of seven private sector individuals (not agency) appointed by the Governor
  - Entity sets policy direction for agency activity
- Department head is appointed, but division heads are professional staff
- 13 people working in field around Oregon, plus five people specializing in international development
- No certification/training requirements specific to department; some perhaps specific to positions, particularly for international development people
- Primary role of business development division is deal structuring, pulling state resources together to support creation or retention of jobs
- Staff only work on primary (basic) sector industries, refer others to university, SBDCs, other partners

Points to Consider about Alaska's Current System

- State government's oversight and/or policy direction from private sector is currently limited to two of five seats on the board of AIDEA.
  - There is no private sector input built into OED or DOI
  - Without private sector input it may be difficult to align state programs across divisions with real needs in Alaska economy
- Incentive programs in Alaska Statute are limited
  - New Business Incentive Program (DCCED), established under 45.81.010, is not funded
  - Film Incentive office supported by two staff at OED (DCCED)
  - Exploration Incentive Credits (DNR)
  - AGIA (DNR)
  - Various AIDEA Programs
- Economic Development functions are distributed between several divisions and/or offices, including:
  - Division on Investments (Greg Winegar, Division Director)
  - Office of Economic Development (Joe Austerman, Director)
  - Alaska Industrial Development and Export Authority (Ted Leonard, Executive Director)

- Economic development staffing in these offices are about 15% of total DCCED personnel
  - Viewed alone they are 8%, 2%, and 6% respectively
  - May have difficulty getting strategic focus within larger mission of department
- No certified economic developers currently working in state (compares to other states where professional certification is common among economic development staffers)
  - University's Center for Economic Development has started offering training modules several times per year (the standard for these courses is multi-day intensives) for certification through the International Economic Development Council
    - This is a relatively new service
    - Department estimates cost in training to reach certification goals, before travel and lost work time, is $3,400 per person
  - Currently there are no practicing certified economic development professionals working in Alaska (in state government or out of state government)
- State government's interaction with University resources may be inefficient; economic development resources may be "siloed"
  - Do OED and AIDEA have regular practice of directing inquiries to existing University resources?
  - Do agencies and universities work closely to avoid duplicating tools and services?
  - What gaps should agencies fill that are not natural to the University?
- State government, through OED, is currently focused on a small set of industries
  - Focus may be broadened to allow room for additional industries/ideas
- Alaska state government does not maintain a web presence focused on attracting or retaining business
  - For contrast, see Oregon, http://www.oregon4biz.com/, found in two clicks from the State of OR homepage); North Dakota, http://www.business.nd.gov; Kentucky http://www.thinkkentucky.com/

Possible Areas of Discussion for Legislature

1. Restructuring economic development functions within state government under alternate models such as public/private partnerships, corporate structures, strengthened divisions, or others.
2. Consideration of creation of a non-governmental (private sector) policy group at head of state economic development. Depending on departmental structure the advisory entity could be modeled on corporate, foundation, policy, or other board structures
3. Establishment or reestablishment of incentive programs to support economic development programs
4. Budgeting for ARDOR programs
5. Budgeting for University programs that support small business development
6. Oversight hearings prior to and within the budget process to assess focus and resources of state offices with economic development missions
7. Establishment of additional loan programs to support small business economic development

Additional Resources

- Alaska Economic Development Programs, prepared by Office of Economic Development
  - Document attached to this transmission
  - Note: This matrix does not differentiate between Economic Development and Community Development programs (see definition on Page 1). True "economic development" programs are fewer than one dozen.
- Department and subunit missions: Office of Management and Budget
  - See http://gov.state.ak.us/omb/results/agencies.php#10 for missions related to DCCED and its divisions
- Alaska SourceLink www.aksourcelink.com. A web portal hosted by the university that provides information on all economic development support resources in the state

EXECUTIVE SUMMARY

About this Report

Alaska's economy is challenged to provide quality jobs for the state's residents, cover the costs of government services, and build the economic infrastructure needed to be globally competitive. With support from the Denali Commission, the Alaska Partnership for Economic Development (APED) has initiated a multi-phase process to analyze the economy, create an economic development strategy and identify action initiatives to address the state's challenges.

This report is a first step in that process. It is a situational analysis that describes and analyzes the current economic development system in Alaska and the state's unique set of economic and business climate factors. Along with a suggested path forward, the report is designed to inform a next phase of collaborative formulation of practical strategic and tactical action initiatives to safeguard the future success of Alaska.

APED is a 501(c)(3) umbrella organization consisting of the 12 designated Alaska Regional Development Organizations (ARDORs). APED selected a team to undertake this report consisting of IHS Global Insight (lead consultant), the Economic Competitiveness Group, and Alaska's McDowell Group. The project's steering committee comprised representatives of the ARDORs, as well as representatives of other industry and public sector organizations, such as the State Chamber of Commerce, the University of Alaska, Western Alaska Community Development Association, Office of the Governor and the Economic Development Administration.

The research for the report was conducted from September to December 2009. The team collected and analyzed existing information and insight, conducted surveys and interviews, presented and discussed preliminary results at conferences, and engaged in a wide variety of discussions with steering committee members and other public sector and business stakeholders.

Key Findings

The economic development system in Alaska is largely ineffective both from the perspective of Alaskans as well as in comparison to best practices in other jurisdictions. A web survey of 300 business and community leaders showed that 52% of them felt that economic development efforts in Alaska have been ineffective and 61% of them felt that, at best, the outlook for Alaska's economy over the next 10 years is uncertain.

Alaskans should worry not because of any immediate economic crisis, but because of the accumulating levels of future risk and declining economic resiliency associated with:

- Poor relative economic performance compared to the rest of the country.
- A high level of dependence on the price of oil, federal government spending, and natural resource industries facing supply or regulatory/legal constraints.
- Weak linkages to rapidly expanding global market opportunities.
- Ignoring opportunities for diversification and increased resiliency by optimizing the needs and linkages within and among the state's existing portfolio of export-oriented industry "clusters."
- Weak culture of entrepreneurship.
- Sub-par support from the state's economic foundations compared to other peer states in the area of transportation and other infrastructure, quality of workforce/education, and technology.

This risk represents the basis of our call to action for a different approach to economic development. Oil prices may stay at or above current levels, significant new sources of oil and gas may be tapped, and federal government spending may keep rising. However, the probability that these events will not happen is uncomfortably high.

The path forward involves moving away from competition among industries, regions, and communities. It involves moving towards a more collaborative, state-wide approach to economic development that is focused on developing a stronger portfolio of export-oriented industry clusters. The effort should be lead by the private sector and supported by the public sector and to take a state-wide approach knowing that a stronger portfolio of industry clusters will benefit all the regions of the state.

Existing Economic Development Objectives and Strategies

The economic development system in Alaska is decentralized and fragmented with little overarching structure tying the pieces together to foster a sustainable and resilient economy for the future. Only 2.5% of the respondents to our survey felt that economic development efforts have been very effective and only 6% felt that the economic outlook over the next 10 years was very good. Interviews with economic development professionals and business leaders produced a more detailed diagnosis of the situation, but overall painted a consistent picture of generally ineffective economic development efforts and concern about the longer term outlook for the state's economy.

Past development efforts have come up short largely because of poor implementation planning and resourcing, inadequate consideration of market fundamentals, and shifting political priorities. Furthermore, it is clear that very few economic development best practices from other regions are being deployed or even tested in the state. There is no shortage of imaginative economic development ideas across the state. However, without a framework for action, these ideas are just biding their time in reports on shelves or flowing in the daily stream of ad hoc policy discussion.

While the interviews and web survey uncovered a broad range of views and insights, the following common themes were identified:

Alaska's Economic Development Organizations (EDOs) operate in an extreme environment. Alaska is a relatively new state that is remote from other business or industrial regions and has under-developed infrastructure, high energy and labor costs, and severe geographic and climate conditions.

Large-scale development of publicly owned resources has been a dominant theme in the Alaska economy. This includes seafood harvesting, mining, timber harvesting, oil exploration and, most recently, large-scale tourism. Alaska's economic development efforts have evolved, in part, around how to minimize regulatory restrictions and how to siphon off local benefits from these large, externally driven industries.

Government funding of local services, particularly rural healthcare and local and tribal government is another dominant theme. Federal funding has the greatest impact, but state employment is also very significant.

Alaska has established a workforce training infrastructure, but some question whether the types of training available are strategically targeted to support development. Although many say that consolidation of the Alaska community colleges within the University of Alaska in the 1980s was a setback to vocational education, workforce training efforts are now wide-spread. Training typically has focused on replacing imported labor with resident labor in existing industries. Critics say that training gaps include higher level technical and professional education. Other criticisms are that entry-level workers lack basic reading and math skills and what are often referred to as "soft skills" or "work ethic" by employers.[1]

[1] These criticisms are typical of feedback obtained during workforce assessments and training program evaluations performed by McDowell Group.

2312

There is a lack of state-wide planning, leadership and coordination. Although Alaska has a large number and variety of economic development entities, their focus is local or regional, rather than statewide, and this limits their effectiveness.

Alaska has a wide diversity of economic interests that must be aligned for major development efforts to succeed. For example, the large oil and gas producers and the largest seafood and shipping companies are multi-national corporations for which Alaska is only one of a portfolio of operating venues.

Within the environment described above, Alaska EDOs typically:

- Have small staffs and uncertain funding.
- Have limited established networks with other EDOs, federal and state economic development programs, businesses, or the University of Alaska. However, there has been some recent progress in this area.
- Can find themselves overwhelmed by the sheer size and number of challenges they face. For example, EDOs are largely unequipped to have an impact on natural resource development.
- Have often focused on infrastructure projects because basic issues like transportation and energy cost seem to preclude more typical business development efforts.
- Feel the State should provide more strategic direction and resources for economic development.
- Have a hard time attracting enough resources (of all kinds) to have a statewide impact.
- Have been frustrated by the financial, regulatory and practical barriers to developing projects, especially larger ones.
- Have been frustrated by what many consider an over-reliance by Alaskans in general on government, rather than business, to take the lead in economic development.
- Have had success in helping to foster workforce development programs.
- Have had some success working with the oil, mining and seafood industries (primarily) to maximize employment and other benefits to Alaskans.
- Have had limited success at fostering in-state value-added industries, either for purposes of export or for import-substitution.

In summary, the effectiveness of Alaska's EDO's is subject to six key overarching economic development issues:

1. **Need for leadership and coordination.** Lack of high-level leadership and coordination was among the most-cited challenges facing Alaska's development efforts. This leaves local, regional and statewide efforts fragmented and potentially contradictory.
2. **Need for explicit goals and strategies.** Economic development is an incremental process that requires long-term consistency and commitment.
3. **Need to integrate short-term and long-term initiatives.** Economic development is a long-term undertaking, but funding and local priorities tend to be driven by short-term needs.
4. **Challenges of geographic isolation.** EDOs have no choice but to try to address the fact that geography and climate define much of Alaska's development potential. Transportation was identified as one of the state's most significant barriers in both EDO and industry interviews.

5. **Challenges supporting and adding value to existing industries.** Import substitution, value-added processing, and support services have been widely recognized as key to Alaskans reaping more of the benefits of in-state development.
6. **Developing an institutional framework to elevate the impact of knowledge within all industries.** Alaska's next-generation economy must be one that produces and utilizes knowledge workers to facilitate growth in traditional industries and emerging industries.

Comparison with Best Economic Development Practices in Other Regions

Much can be gained by an inward analysis of Alaska's economic development system. However, a look at how other regions have tackled similar issues is also informative. From these insights and "best practices," a number of lessons for Alaska are drawn. Each should be instructive as leaders grapple with the question of how to organize for, and improve the state's economy.

In highlighting best practices, we have focused on leadership approaches, systemic changes and/or institutional efforts that were implemented in order to transform the subject region's economy. Of course, there is no single domestic or international best practice that aligns perfectly with Alaska's particular situation. But there are no doubt elements within these models that are appropriate to Alaska's particular context and the state's long-term goals.

Six regions were examined in this overview of best practices:

- Puget Sound Region—Economic development leadership and coordination
- Oregon—Explicit economic development goals and strategies
- Alberta, Canada—Integration of short- and long-term initiatives
- Chile—Addressing the challenge of geographic isolation
- Austin, Texas—Adding value to existing industries
- North Carolina—Institutional framework to elevate the impact of knowledge in its industries

Some leaders may feel that Alaska's unique history and atypical development challenges are such powerful constraints on economic development that the system and approaches that have evolved over the years are the best way forward. But the examples show that other regions having different fundamental characteristics than Alaska's have nevertheless been successful in overcoming barriers to economic development. In many instances these barriers are not so different than those faced by the state. All of the cases presented have just a few themes in common, and each theme is relevant to Alaska.

Leaders can take steps to affect the trajectory of an economy—the destiny of a state's economy is not preordained. Interventions in the status quo in the form of new public policies, bold private sector initiative, new public-private partnerships and strategic resource allocation can all affect the trajectory of an economy. The province of Alberta in Canada is a good example. The vision of a single leader in the 1970's drove new thinking in the 1980s about how to achieve a far more diverse economy. Subsequent policy initiatives launched new economic development organizations with new missions. New initiatives in education and training and in science and technology began to shift the structure of the economy in the 1990s. Analysts looking at the province's economic transformation typically note that its success relative to neighboring provinces can be attributed to successful diversification into new economic sectors that now complement resource extraction and industrial manufacturing.

Strategic planning can have a payoff—Economic analysis cannot end with a simple statement of the problems. The Situational Analysis contained in this report is meant to be a foundational document

2314

upon which a strategic plan will be based. The situation analysis is necessary but insufficient to spark the new thinking and new behaviors that will be needed to move Alaska's economy in new directions. In every best practice case analyzed, leaders took steps to design, launch and implement a comprehensive strategic plan to guide their region's development.

Leaders in states whose economies are threatened cannot afford to be idle and wait for economic conditions to improve—Waiting for new economic conditions is not a strategy. Oil prices might go up, and that would be good. But they might, as they have in years past, go down. By their nature commodity prices will vary according to demand conditions far removed from Alaska's control. Alaska's leaders need to inform residents of the "razors edge" on which the economy rests and organize for new collective action.

Assessment of Entrepreneurship and Business Climate

Alaska doesn't appear to have a particularly good climate for business risk-taking. We are told by interviewees that Alaskans do not have a willingness for "change," "innovation" or "rejuvenation." Many informed leaders told us that Alaskans seems to have an "entitlement mentality."

Ultimately, the goal is to provide a good environment for innovation—for new companies to start-up and grow and for new thinking and new behavior within and among the state's EDOs and other development organizations. This will require a significant shift in both how leaders think about the economy and in economic policies going forward. On the other hand, if incentives in the economic system can be fundamentally altered, the entrepreneurial spirit is never lurking far below the surface, and can rise to strike at good economic opportunities and to meet new economic challenges.

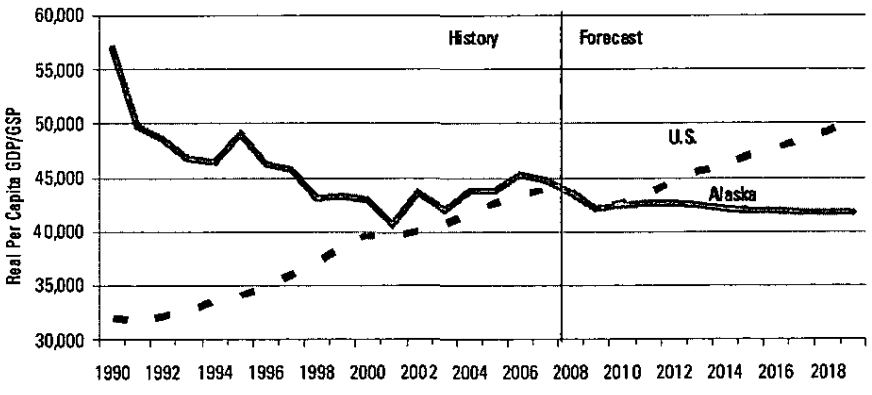
The Economy

Alaska weathered the Great Recession of 2009 well compared to other parts of the U.S. economy and Alaska will be participating in the global recovery. However, from a longer term perspective there are risks and concerns that ultimately provide a rationale for a new approach to economic development to deal with potential risks and a loss of economic resiliency.

The top line view of Alaska's economy is one of stagnation and lagging economic performance in large part due to declining oil production.

Gross state product (GSP) measures the output or total value added of all industries in Alaska. By this measure, Alaska's economy has been stagnating for the past 20 years. Over the 1990 to 2020 period we expect the U.S. economy to have doubled in constant dollar terms. Over the same period, Alaska will have barely returned to its level of total economic activity in 1990.

Figure 1. Twenty Years of Comparative Stagnation

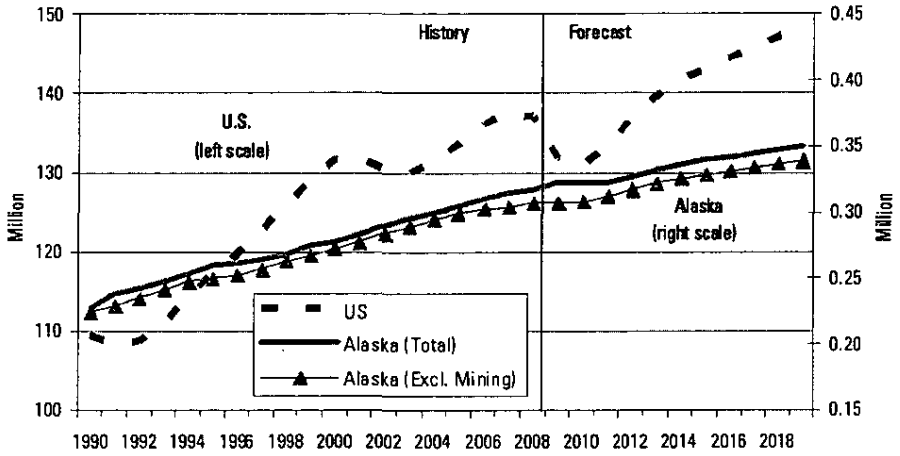


Sources: BEA and IHS Global Insight

Overall employment in the state economy may reflect more directly how people feel about the economy's performance. The oil industry is very capital intensive, so both increases and decreases

in output have a more muted impact on employment than in labor intensive industries. Second, sectors with large numbers of workers like travel and tourism have been growing and generating jobs. Third, while prices of the state's commodities are lower than the highs of 2008, they are still at historically high levels. These high price levels are supporting income and employment across the state. In this way Alaska is doing better than the GSP data alone suggests.

Figure 2. Steady, but Lagging, Employment Growth

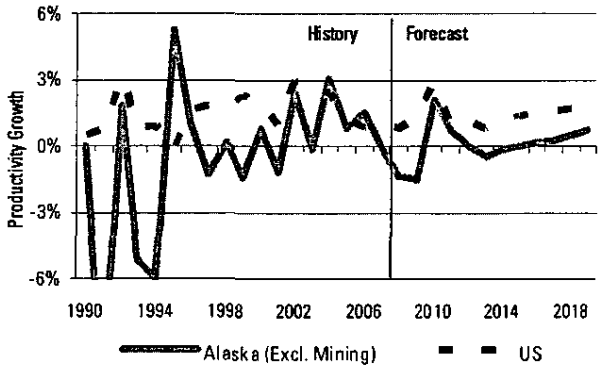


Sources: Bureau of Labor Statistics (BLS) and IHS Global Insight

It's important to notice that per capita income and non-mining labor productivity is lagging. High commodity prices are hiding structural problems and of course commodity prices can quickly become a curse when they start to fall. IHS CERA has published a number of alternative scenarios for world energy markets and not all of these scenarios envision higher prices for crude into the future. The Global Fissures Scenario has West Texas Intermediate (WTI) averaging only about $40 per barrel. In addition there is significant risk that future cutbacks in federal government spending will have a large impact on Alaska.

Figure 3. Future Risk: Lagging Labor Productivity and Oil Price Risk

Labor Productivity, Excluding Mining and Oil and Gas



Sources: BEA, BLS and IHS Global Insight

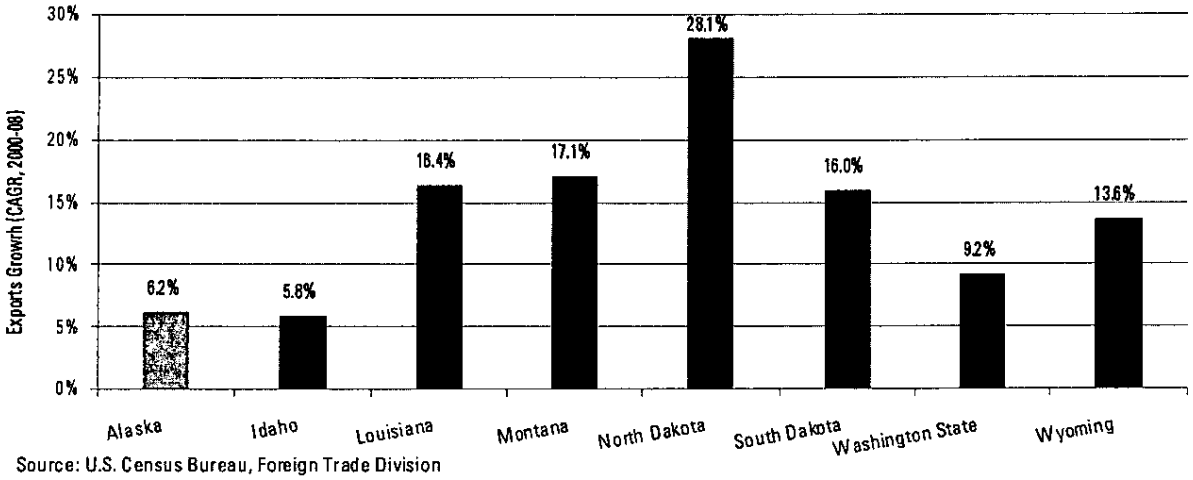
2316

Global Opportunities

There are many attractive market opportunities around the world for a resource-rich state like Alaska. However, the state is in danger of letting those opportunities go to competing regions around the world. Alaska's trade with the rest of the world expanded at a compounded annual rate of 6.2% over the period from 2000 to 2008. Most of the peer states[2] we selected for this study had considerably stronger export performances.

Figure 4. Export Perfomance of Peer States



Source: U.S. Census Bureau, Foreign Trade Division

Table 1. Top-Five Exports, 2008—Alaska and Peer States

Alaska	Idaho	Louisiana	Montana
Fishing and Seafood Processing (50.6%)	Computer and Electronic Products (58.6%)	Crop Production (37.7%)	Chemical Manufactures (25.3%)
Mining (20.2%)	Processed Foods (9.3%)	Petroleum and Coal Products (23.9%)	Mining (15.8%)
Oil and Gas Extraction (8.6%)	Chemical Manufactures (5.2%)	Chemical Manufactures (16.9%)	Machinery Manufactures (13.3%)
Transportation Equipment (6%)	Paper Products (4.6%)	Processed Foods (8.9%)	Transportation Equipment (10.9%)
Primary Metal Manufactures (4.2%)	Transportation Equipments (4.4%)	Machinery Manufactures (3.0%)	Primary Metal Manufactures (8.2%)
North Dakota	**South Dakota**	**Washington State**	**Wyoming**
Machinery Manufactures (42.7%)	Computer and Electronic Products (30.7%)	Transportation Equipment (41.1%)	Chemical Manufactures (73.1%)
Crop Production (22.1%)	Processed Foods (21.0%)	Crop Production (20.9%)	Oil & Gas Extraction (7.4%)
Transportation Equipment (8.4%)	Machinery Manufactures (15.7%)	Computer and Electronic Products (5.9%)	Machinery Manufactures (6.6%)
Processed Foods (7.9%)	Beverage & Tobacco Products (7.2%)	Processed Foods (4.9%)	Mining (5.4%)
Oil and Gas Extraction (7.5%)	Transportation Equipment (5.7%)	Petroleum and Coal Products (4.9%)	Fabricated Metal Products (1.2%)

Note: number in parenthesis is the share in total exports
Source: U.S. Census Bureau, Foreign Trade Division

[2] The peer states chosen for this study include Idaho, Louisiana, Montana, North and South Dakota, Washington and Wyoming. The criterion used for selecting the peer states is explained in Economic Foundations.

2317

There are many countries around the Pacific Rim that offer export opportunities for Alaska. However, taking advantage of these opportunities will require more of a state-wide approach to focusing on Alaska's position in the global market.

The growth prospects for Alaska's exports depend on the economic outlook for its major trading partners. These are the important end markets for Alaska's exporters. The outlook for certain industry sectors is also important.

Real GDP contracted in most of Alaska's export markets in 2009 however China and South Korea managed to avert a recession. As the world economy recovers from recession demand for Alaska's key exports will revive. The recovery patterns differ significantly across the countries. China will be leading the recovery with real GDP growth forecast of 9.8% for 2010. For Germany and Japan real GDP growth is expected to stay below 2% until 2012.

Table 2. Real Global GDP Growth
(% change)

Alaska's Trading Partners	2009	2010	2011	2012	2012	Real GDP, CAGR 2009-19
Canada	-2.6	2.2	3.4	3.6	3.2	2.7
China	8.5	9.8	8.5	8.6	8.6	8.4
Germany	-4.8	1.5	1.6	1.8	1.9	1.6
Japan	-5.3	1.4	1.3	1.9	2.3	1.5

Alaska's Clusters

The consulting team has identified 11 industry clusters that can serve as a powerful focus for a new approach to economic development. By developing strategic and tactical action initiatives on expanding and deepening the capabilities, foundations, and linkages within and among its "portfolio" of clusters, Alaska can start down the road of diversification and increased value added.

The clusters that have been identified are

- Fishing and Seafood Processing
- Oil and Gas Extraction / Pipeline / Refinery
- Military
- Mining
- Federal Government

2318

- Tourism
- Logistics and International Trade
- Community and Social Services
- Advanced Business Services
- Specialized Machinery/Capital Goods
- Forestry and Wood Products

The clusters are grouped into four segments based on employment concentration in Alaska compared to the U.S. national average and the estimated dynamism, or growth potential over the next 10 years. This segmentation is an important consideration when formulating strategic economic development policy.

In addition, we found evidence of some unique, technology-based capabilities in the state that can serve as potential future seed clusters or assets to potentially aid the 11 identified clusters. These are: Cold climate technology, Rocket launch technology, Cold climate housing, Specialized super computing capabilities, Distance delivery -- education, medical, and management services, Alternative energy and Clean-energy (bio fuels, clean coal/coal gasification, etc), Specialty solvents, Light aircraft operations and maintenance/navigation, Marine and arctic biological sciences/potential for aquaculture, Remote communications technologies/systems, Aerospace technology/operations, and Naturally grown/grazed food products.

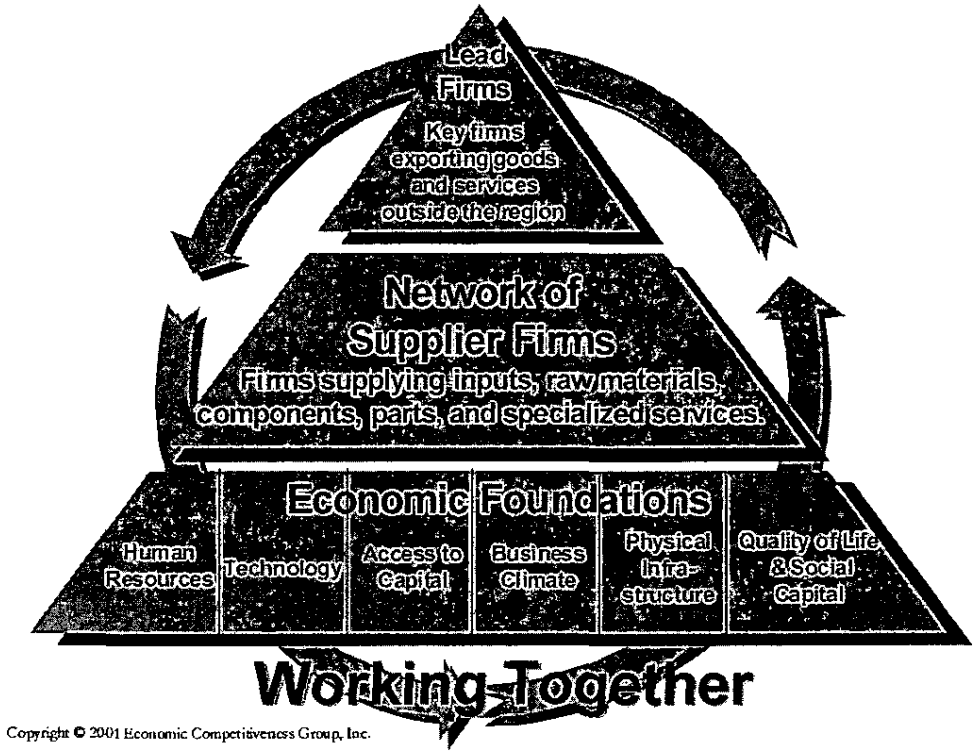
Economic Foundations

Six key economic foundation areas underpin the development of these clusters. A strong foundation is a vital element for cluster development. Alaska's economic foundations are evaluated against a set of peer states including North and South Dakota, Louisiana, Idaho, Montana, Washington and Wyoming. The selection of these states was based on a number of factors that include: (1) population and urban orientation; (2) cluster structure; (3) economic performance; (4) strategy-oriented economic development; and (5) multi-modal transportation issues.

Underpinning every successful cluster are the economic foundations of a region as described here and shown as the base of the pyramid in the cluster diagram below.

- ***Human Resources:*** an educated and productive workforce.
- ***Technology:*** the quality of research and development and other sources of innovation.
- ***Access to Capital:*** the ability of firms in the region to obtain financing.
- ***Business Climate:*** a competitive business climate; adequate funding for necessary services.
- ***Physical Infrastructure:*** well-developed, cost-effective and efficient roads, highways, transit, ports, and airports that meet the transit and transportation needs of both workers and business.
- ***Quality of Life and Social Capital:*** The quality of life a region offers its residents is comprised of many things—many of them intangible. It also consists of what is known as "social capital"—the inter-personal and organizational networks that enhance a region's ability to facilitate transactions and investment due to trust and access to information.

Figure 5. Economic Foundations of a Cluster-Based Economic Development Framework



Relative to the peer regions, Alaska offers a low tax business environment and a high level of quality of life for those that have settled in the state. In addition, the state's workforce is relatively well-educated.

Relative weaknesses of the state are its high secondary school dropout rate and the associated need of its resident workforce for educational remediation for employment. Cluster development would benefit from a tighter linkage between education and industry so that specific occupational skills are targeted. There is also evidence of a relative lack of technological commercialization within the state. Indicators such as per-capita or per-employee R&D spending show an average level of innovative activity. Data on the number of patents registered shows challenges related to the commercialization of new technology within the state. Finally, a poor system of roads and highways is a unique challenge that Alaska faces.

Conclusion: A Path Forward

Alaska's EDOs and approaches to economic development have evolved according to the state's unique characteristics and needs. This report analyzed the current situation from several perspectives. In the first section, we looked at the array of EDOs in the state and provided an outline of their various strategies and objectives. We then looked at the strengths and weaknesses of today's organizational structure and provided comments on the main features of Alaska's approach to economic development. Our findings in these two sections came from a review of past reports as well as from input from informed leaders in interviews and surveys.

From these analyses, we developed six overarching economic development themes for continuing study. Each theme highlights a critical issue for Alaska, ranging from the need for more leadership and coordination of Alaska's economic development infrastructure, to the need for new thinking about how to add more value to Alaska's important natural resource sectors. Finally, we looked at how other

2320

states and regions have addressed similar challenges. There are lessons here for Alaska's leaders that focus on how the state should organize its efforts and work toward a more competitive economy.

The next step in the analytical process was to understand the state and global economic challenges and opportunities and match these with our understanding of the state's clusters and economic foundations. For example, we noted in the Economic Profile section of the report that the slowdown in revenues from the natural resources sectors, notably in oil and gas, has caused real GSP to stagnate since 1998-9 when compared to the national economy. Over the last few years GSP has slipped even further behind the national average and the forecast is for this gap to widen. As a result per capita income has also slipped alarmingly. The forecast is for Alaska to fall well below the national average.

Looking Forward

Our comprehensive approach has lead us to conclude that Alaska's economic future is, at best, cloudy we have identified a few significant risks. Going forward commodity prices might work to the state's advantages and push per-capita income higher. Betting on this outcome however would be unwise. The conclusions of our economic research has been largely confirmed by our recent interviews and surveys. Informed leaders in Alaska know that the state is potentially facing serious economic challenges.

It seems that economic development efforts at the state, regional and local levels need to be stepped up however the basic organizational infrastructure and today's typical economic development objectives and strategies are less than optimal. The state's institutional capacity to address fundamental economic problems, while well intentioned and at times successful with tactical interventions, may not have evolved a shared economic vision among key stakeholders. Stronger and higher-level leadership and coordination is needed in order to make the most of efforts expended.

The area where we see opportunity is largely at the statewide level. We believe that a different overarching approach to economic development is needed, perhaps one driven by a public-private leadership group, with the public sector providing the initial funding and the private sector providing its knowledge of how markets work, where the opportunities for diversification lie and what makes an economy competitive. The approach might be based on contemporary economic development models used in other states (such as Oregon's cluster-based economic development networks or the Puget Sound region's well coordinated Prosperity Partnership and industry working groups to define needed policy initiatives).

With a different policy framework, such as a statewide cluster development and leadership and coordination towards this end, regional and local practitioners would have both an overarching policy framework and the flexibility to implement the policy as local needs dictate. A cluster policy strategy would not only outline the main implementation features and suggest tools for regional and local EDOs, but provide a way of coordinating most of the practices of regional and local economic development agencies. It is important to point out that whatever economic development model Alaska's moves toward in the future it needs to be an "Alaska Model." The state is too atypical in too many ways for a textbook approach to have the desired outcomes.

Moving Forward: Toward What Kind of Economy?

If asked, most people in Alaska would say that the state, fundamentally, has a natural resource economy, and that it always will. Our analysis suggests that Alaskans begin looking at the state's economy in a broader way, as a "*natural resources, PLUS*" economy. Oil, gas, mining, and fishing, along with tourism, will be the most important engines of economic growth for as long as one can see into the future. Economic development policy and practice must continue to focus on making the most of these sectors. But the notion of "*natural resources, PLUS*" means that in the future, Alaska will look to its natural resources as the state's primary economic engines while simultaneously developing emerging sectors (e.g., logistics and trade, advanced business services, specialized machinery) where the state has

comparative advantages. Some attention must also be paid to the pre-clusters, where much more research is needed to better define if these or other "faint signs on the radar" can, with the right policy support, be elevated from "radar blips" to something more. To a great degree, economic development efforts should be shifted from the very difficult task of trying to get more job and revenue impact from the state's natural resources sectors to trying to make the most of the PLUS side of the envisioned new economy.

The country's security equation is changing and these changes are likely to affect both the missions of Alaska's military installations as they shift to respond to changing threats as well as the role and reach of the Department of Homeland Security Coast Guard. Keeping abreast of how agency missions are changing, and are likely to change in the future as well as how federal resources will be spent on military and national security priorities should be a high priority of the state's economic development leaders. Federal funding for national security is not likely to decrease in the near- to mid-term.

Developing the PLUS side of the new economy should be a high priority of APED's Phase 2, Strategy Development. But there is little doubt that new strategies will be needed to address the state's climate for business entrepreneurship. For example, young people in Alaska should learn about small business, the pros and the cons, throughout their formal education. They should have a working knowledge of markets and how investment flows to economic opportunity.

New policies are most likely needed at University of Alaska (UA) to try to move basic research closer to commercialization and to support more applied research. The key roles that the university can play in long-term development strategies include: educating and nurturing the next generation of workers and leaders; conducting applied research that is critical to industrial innovation; engaging in transferring new technology and processes to businesses; conducting policy analysis to inform decision-makers; supporting small business development with skills and information and creating forums for networking and information exchange. To perform these roles well, universities must examine and mitigate policies, procedures and organizational structures that could interfere with their economic development functions. Furthermore they should initiate and align internal incentives so that faculty and staff work toward common development goals. This process must be led from the top and must be ongoing.

Putting in place other features in the state's economic environment should likewise be a priority. For example, Alaska doesn't need to lose its applied research investments, or its graduates to other states. Keeping both in-state might require implementing not only technology commercialization strategies but also complementary "technology capture" strategies that work to keep innovation in-state, within existing firms and in the hands of local entrepreneurs. Fledgling entrepreneurs will need help from the state's EDOs to secure financial resources and other pre-requisites for market success, suggesting in this light at least a review of small business programs and state financing programs designed to help launch small businesses. The range of potential new economic development strategies is wide and deep.

Three Stategic Thrusts

We envision three main strategic thrusts (similar to the three-legged stool[3] suggested by the Institute of Social and Economic Research at the University of Alaska (UAA ISER). The first strategic thrust would be to make the most of the natural resources that have made the state what it is today. Existing priorities will need to be reviewed in the context of economic forecasts and specific tactics will need to be developed to support the strategy of making the most of the state's resource advantages. An essential element of such a strategy would be continued refinement of approaches to natural resource preservation—in which Alaska is already a leader in many respects—so that future generations also derive benefits from those resources.

[3] This is referenced at http://www.alaskaseconomy.org/.

2322

The second strategic thrust would be to work with the federal government in strategic ways to maintain, if not grow, its presence in the state and generate all the public and private sector jobs associated with the government's priorities in Alaska that are possible. While this thrust has been a strategic priority for some time, opportunities noted earlier may exist for new or expanded military and homeland security initiatives as global security threats evolve. Even changes in polar region access can change the military and security calculus, potentially leading to new federal investment in preparedness. Again, specific program tactics will need to be developed to achieve this objective. Keeping track of these opportunities should be a heightened priority of Alaska's Congressional delegation. Put in the context of this initiative, *Alaska Forward: Towards a Next Generation Economy*, elected leaders and their staff should be encouraged to redouble efforts to get inside the decision-making processes of key federal agencies and influence decisions with an aim at securing new jobs and new investment, consistent with broad government needs.

The third strategic thrust would be to create a stronger entrepreneurial climate that is pro-small business. The suggestion is to nurture those that take the risks to create small companies and who most likely live in Alaska because they love it. These business people and entrepreneurs, while present today, are not particularly well-supported with the necessary ingredients for growth-oriented, commercial success. This area is wide open for new, contemporary initiatives designed to achieve the goal of new firms in small population centers. Books have been written on the topic, one published just a few months age titled "Generating Local Wealth, Opportunity and Sustainability through Rural Clusters," by Stewart Rosenfeld of Regional Technology Strategies, Inc. The author is a thought leader on the topic because his work is empirical, years of study of what kinds of firms cluster in less populated regions, and why. Rosenfeld's conclusions regarding cluster development success factors in places with small populations point to the importance of certain community characteristics including social capital trust and connections to urban centers, all of which can be enhanced through policy interventions and new community and economic development practices.

Next Steps

Can Alaska make the necessary changes in policy and practice to build a more diversified and sustainable economy? This report has made the point that when faced with similar challenges, other regions have made difficult decisions and moved in new directions with new thinking, new economic development policies, and new practices.

This report concludes that Alaska's leaders need to begin to address the risk of declining economic resiliency by transitioning from today's approaches to economic development to new approaches, based in part on the best practices of other regions. Bridging from this Situational Assessment to the upcoming Phase 2 Strategy Development work should begin immediately. We recommend the process start as other regions have started their strategic planning efforts. Puget Sound's Prosperity Partnership, for example, moved quickly from its analysis of economic conditions and opportunities to form a new strategic planning-oriented "Alaska Forward Leadership Council."

This group should be comprised of leaders drawn from companies, institutions and organizations across the state. By virtue of their position and visibility, these leaders would command a degree of authority. Involving high level government leaders who have a strong incentive to address the state's economic challenges would bring resources to the effort. Having top level private sector leaders involved would help assure that market-based principles would guide new initiatives and help avoid undesirable focus on grand, "pie in the sky" efforts. Private sector leadership would also bring executive and managerial talent to the task, helping to keep the strategic planning process lean, focused and "business-like."

From this starting point, the leadership group would prepare to launch Phase 2. If the strategy development process has a significant component which is cluster-based, as we suggest, the next step would

be to select specific clusters for priority attention. All the clusters would eventually be given full attention, but the Leadership Council should not try to take on too much at once. Top-level leaders in each cluster would be identified and briefed on their role to help coordinate and lead from their cluster's perspective an 8-10 month-long cluster development strategy effort. The notion is that each cluster would generate a set of cluster-specific priorities aimed at addressing impediments to growth and development. Facilitated discussions would lead to a shared economic vision for each cluster as well as development of a number of policy initiatives, each designed to address an impediment to the cluster's growth. Each initiative would have its own business plan and an "implementation champion" (i.e., ownership) to help take the initiative forward. In addition, a limited number of cross-cutting initiatives and policy recommendations would also emerge from each cluster group, which would be integrated into the broader state-wide strategy.

With the overall plan to move from Phase 1 to Phase 2 laid out, the Leadership Council should consider launching the effort with a high visibility event, perhaps a statewide Economic Summit. Stakeholders from across the state would be invited to a day-long program, hosted by the Leadership Council who would be introduced to the assembled leaders by the chairman. Presentations of the Situation Analysis would be made with the objective of impacting how the audience hears the messages. Questions would be solicited and answers provided by knowledgeable leaders, economists, and other experts.

In this way, Alaska will have kick-started the needed transition from its current approaches to economic development to a more strategic approach, led by leaders from the private and public sector. Similar approaches have been used, in many cases repeatedly making collaborative strategic economic development planning the prevailing practice in many regions. There is no reason that Alaska's leaders can't move in similar ways, evolving a 21st century "Alaska Model" for economic development and start afresh to build a more diverse and more sustainable economy.

Southeast Conference

March 16, 2010

Representatives Jay Ramras, Chair
Economic Development, Trade & Tourism Committee
Alaska State Capitol Building
Juneau, Alaska 99801

RE: HCR21 "A resolution creating and relating to the Economic Development Planning Commission."

Dear Representative Herron:

Southeast Conference strongly supports House Concurrent Resolution 21, a resolution to create an economic development planning commission. The state has significant need for economic development and is in dire need of a strategic plan for our future. This commission and its duties spelled out in HCR21 would serve as a valuable tool for this strategic planning. It is important that we take steps to integrate private sector leadership into economic development efforts administered by our state government.

Southeast Conference is a private membership organization that works to advance the collective interests of the people, communities, and businesses of Southeast Alaska. It is the Alaska Regional Development Organization (ARDOR), Federal Economic Development District (EDD), and USDA Resource Conservation and Development (RC&D) Council for the region. The Conference's Mission is to help develop strong economies, healthy communities, and a quality environment in Southeast Alaska.

Please adopt HCR21 for the future of our communities and our state.

On Behalf of the Board of Directors,

Shelly Wright

Dear Representative Ramras:

TEAM Network Inc supports a resolution to create an economic development planning commission. It is important that more private sector input be solicited and included in the economic planning process. Our current process is not adequately preparing Alaska for the new economic realities before us.

TEAM Network Inc. is a business mentoring organization that creates and participates in active learning opportunities to network been-there-done-that businessmen/businesswomen with want-to-go-there innovators and entrepreneurs. Alaska is in last place in the 2008 Milken Risk Capital and Entrepreneurial Infrastructure Composite Index. Our current model is preparing Alaska for yesterday's opportunities instead of laying the foundation for tomorrow's.

State Technology and Science Index

Enduring Lessons for the Intangible Economy

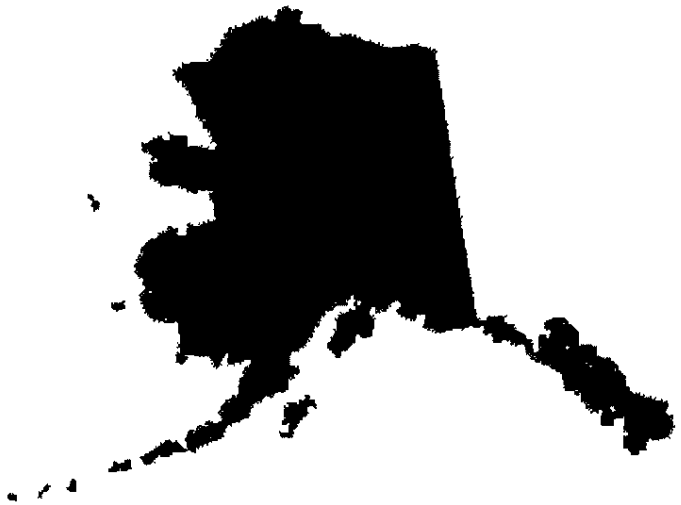
ALASKA STATE LEGISLATURE

House Community & Regional Affairs Committee

Rep. Cathy Muñoz, Co-Chair **Rep. Bob Herron, Co-Chair**

HCR 21 – Creating an Economic Development Planning Commission



Presentation to the House Finance Committee

2328

Current Statewide Processes

- Alaska Forward
  - Led by the Alaska Partnership for Economic Development (ARDORs), other members
  - $500K Denali Commission money for Phase I
  - Currently working on Phase II funding
- Legacy
  - Governor Palin's Administrative Order
  - Project has morphed under Governor Parnell
  - Anticipate alignment of Legacy behind Alaska Forward
- Other regional, industry-specific efforts

Commission Membership	Appointment Authority
• One State Representative	← House Speaker
• One State Senator	← Senate President
• Two Public Members	← House Finance Co-Chairs
• Two Public Members	← Senate Finance Co-Chairs
• One Public Member	← House Minority Leader
• One Public Member	← Senate Minority Leader
• DCCED Commissioner	← By Resolution
• L&WFD Commissioner	← By Resolution
• President of APED	← By Resolution

Goal of HCR 21 is to provide Legislature with direct input and collaboration with private sector on subjects of economic development.

SB330

Kinds of Opportunities Commission May Identify

- Could identify financial tools to target particular areas of economic development:
  - Loan programs, incentive/tax programs
  - Target particular industry clusters, geographic regions, or other policy goals
- Enables the Legislature to address identified needs by preparing legislation in advance of sessions.
- Possible restructuring of departmental participation in economic development:
  - public corporation to work on economic development issues
  - new department
  - new division

HCR 21 – Timeline

- March, 2010: AK Forward Phase I Report
- April 30, 2010: Commission Begins Work
- Spring 2010: AK Forward Phase II Launches
- January 30, 2011: First Legislative Report Deadline
- December 15, 2011: Second Report Deadline
- June 30, 2012: Sunset

Identified Need for Cooperation on Statewide Economic Development

- "Lack of an overall Alaska Strategic plan for Economic Development is a barrier to expanded AIDEA participation in major projects."
  – AIDEA Strategic Plan

- "There is a lack of statewide planning, leadership, and coordination. Although Alaska has a large number and variety of economic development entities, their focus is local or regional, rather than statewide, and this limits their effectiveness."
  – Alaska Forward: Phase I Situational Analysis Executive Summary

- Calling for a Comprehensive Economic Development Strategy for Alaska and supporting both the "Alaska Forward" project and the Governor's "Legacy" plan.
  – Alaska State Chamber of Commerce 2010 Position Paper

MEMORANDUM

Date: April 9, 2010

To: Representative Bill Stoltze, Co-Chair
Representative Mike Hawker, Co-Chair
House Finance Committee

From: Rep. Bob Herron, Co-Chair
Rep. Cathy Muñoz, Co-Chair

RE: House Concurrent Resolution 21,
Economic Development Planning Commission

I respectfully request a hearing for HCR 21, "Creating and relating to the Economic Development Planning Commission."

HCR 21 creates the Economic Development Planning Commission, a working commission that will report its findings and recommendations to the Alaska State Legislature. The commission will act as a bridge between the legislature and several current economic development initiatives in the state, offering recommendations and possible statutory action to the Legislature.

Witness List:

- Rob Earl, Staff to Rep. Herron & Erin Harrington, staff to Rep. Austerman (in person presenting together)
- Wayne Stevens, Alaska Chamber of Commerce (in person)
- Marty Metiva, President, AK Partnership for Economic Development (LIO)
- Kathryn Dodge, FNSB ARDOR Director (LIO)

If you have any questions or need additional information, please call Rob Earl at 465-5141.

ANALYSIS: *(Attach a separate page if necessary)*

CS HCR22(FIN) establishes the Alaska Northern Waters Task Force in the Legislative Branch. The Task Force consists of eleven members composed of four Legislators, one member from the Executive Branch, and seven public members. It is anticipated that the Task Force will hold seven meetings in the first year and three meetings in the second year. Travel funding is included in this fiscal note and includes the cost for experts to attend the meetings. Meetings will be held in Barrow, Nome, Kotzebue, Unalaska and Anchorage at Legislative Information Offices or local government facilities at no rental cost to the Task Force. The Task Force Chair may assign their staff to support the Task Force. The Task Force will assess and facilitate the creation of a state and federal commission responsible for overseeing the development of state and federal northern ocean waters; inform and incorporate local stakeholders input into the process, and identify and coordinate efforts of mutual concern for federal, state, and local agencies. Funding for professional services contracts is included in this fiscal note. Costs to teleconference meetings and print the proposals and reports due in January 2012 will be absorbed in the Legislative Affairs Agency Budget.

CS FOR HOUSE CONCURRENT RESOLUTION NO. 22(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SIXTH LEGISLATURE - SECOND SESSION

BY THE HOUSE FINANCE COMMITTEE

Offered:
Referred:

Sponsor(s): HOUSE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

A RESOLUTION

Establishing and relating to the Alaska Northern Waters Task Force.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

WHEREAS Alaska is the only Arctic state in the nation; and

WHEREAS recent warming trends have resulted in the depletion of Arctic perennial sea ice by nine percent a decade; and

WHEREAS, according to the National Aeronautics and Space Administration, the rate of depletion is accelerating because of the interaction among the ice, oceans, and atmosphere; and

WHEREAS rapidly retreating sea ice is altering fish and wildlife habitats and affecting the accessibility and viability of certain species, on which many local communities rely for nutritional and cultural purposes; and

WHEREAS reduced sea ice is affecting polar route navigation by opening oceans previously frozen year-round; and

WHEREAS the new accessibility of the Northern waters is resulting in increased marine transportation, access to resources, tourism, fisheries, and the presence of United States government agencies in the North; and

WHEREAS the waters of Northern Alaska are of national security and strategic importance to the United States and the State of Alaska; and

WHEREAS, because of national security concerns, the United States Coast Guard is increasing its presence in the North and has plans to build new infrastructure to support its heightened activity, including housing and office facilities and possibly a deep water port; and

WHEREAS Northern Alaska contains important mineral and other resources both in state waters and on the outer continental shelf; and

WHEREAS commercial activities, including resource development, and the revenue they generate for the state may be significantly affected by the changing Arctic waters; and

WHEREAS those changes will affect local communities, businesses, the state, and the natural resources on which they rely; and

WHEREAS there is no comprehensive state plan for Alaska's Northern waters; and

WHEREAS various federal agencies and international bodies are working together to form a commission to address the changing ocean patterns and the opportunities and problems that may arise as a result of those changing patterns; and

WHEREAS the State of Alaska should be involved in the process of forming the commission; and

WHEREAS a comprehensive plan to address the warming ocean, including the economic, ecological, and security effects, will benefit the state and its residents;

BE IT RESOLVED by the Alaska State Legislature that the Alaska Northern Waters Task Force is created in the legislative branch and shall consist of 11 members as follows:

(1) two senators appointed by the President of the Senate;

(2) two representatives appointed by the Speaker of the House of Representatives; and

(3) seven members appointed jointly by the President of the Senate and the Speaker of the House of Representatives, as follows:

(A) five public members, three of whom reside in coastal areas of the state;

(B) one member representing the executive branch of state government;

(C) one member representing the federal government; and be it

FURTHER RESOLVED that a vacancy on the task force shall be filled in the manner of the original appointment; and be it

FURTHER RESOLVED that the legislators on the task force shall select a chair from among themselves and the chair may assign staff to provide support to the task force; and be it

FURTHER RESOLVED that the public members, and, if the member does not receive reimbursement for expenses from the federal government, the federal government member of the task force may receive per diem and travel expenses authorized for boards and commissions under AS 39.20.180; and be it

FURTHER RESOLVED that the task force may meet during and between legislative sessions and the duties of the task force include the following:

(1) assess and facilitate creation of a state and federal commission responsible for overseeing the development of state and federal northern ocean waters;

(2) facilitate regional coordination, cooperation, and outreach regarding the creation of the commission to keep local stakeholders informed and to incorporate their input into the process;

(3) identify and coordinate efforts of mutual concern for federal, state, and local agencies, as well as international interests in the creation of the commission; and

(4) conduct hearings in the Northern region of the state to fulfill its purpose; and be it

FURTHER RESOLVED that the task force shall provide recommendations regarding the formation of the commission and shall deliver a preliminary report of its findings to the legislature by January 20, 2012, and deliver a final report to the legislature on January 30, 2012, together with legislative proposals for consideration; and be it

FURTHER RESOLVED that the task force shall be available for legislative hearings regarding its final report and recommendations; and be it

FURTHER RESOLVED that the continuation or termination of the task force shall be reevaluated during the Second Regular Session of the Twenty-Seventh Alaska State Legislature.

ANALYSIS: *(Attach a separate page if necessary)*

CS HCR22 (CRA) establishes the Alaska Northern Waters Task Force in the Legislative Branch. The Task Force consists of nine members composed of three Legislators, one member from the Executive Branch, and five public members. It is anticipated that the Task Force will hold five meetings in the first year and three meetings in the second year. Travel funding is included in this fiscal note and includes the cost for experts to attend the meetings. Meetings will be held in Barrow, Nome, Kotzebue, and Anchorage at Legislative Information Offices or local government facilities at no rental cost to the Task Force. The Bush Caucus Chair may assign staff of the Bush Caucus Chair to support the Task Force. The Task Force will assess and facilitate the creation of a state and federal commission responsible for overseeing the development of state and federal northern ocean waters; inform and incorporate local stakeholders input into the process, and identify and coordinate efforts of mutual concern for federal, state, and local agencies. Funding for professional services contracts is included in this fiscal note. Costs to teleconference meetings and print the proposals and reports due in January 2012 will be absorbed in the Legislative Affairs Agency Budget.

Sponsor Statement
House Concurrent Resolution 22
Establishing the Alaska Northern Waters Task Force

House Concurrent Resolution 22 establishes the Alaska Northern Waters Task Force to facilitate regional coordination and State of Alaska leadership in the ongoing development of the United States' policies related to the opening of Arctic marine transportation routes, national security, and resource development. The task force will comprise Legislators from Northwestern Alaska, leaders from Arctic communities, and key federal agencies. Together, they will assess and facilitate the creation of a joint state and federal entity to coordinate United States and Alaska interests that result from the opening of Arctic waters.

Perennial ice in the circumpolar Arctic waters is reducing in size at a rate of nine percent per decade. Arctic nations such as Norway, Canada and Russia are proactively promoting and defending their interests in increasingly ice-free areas. As the only Arctic state in this nation, Alaska has a unique role and interest in the development and evolution of U.S. policy in its northernmost region.

The creation of the Alaska Northern Waters Task Force anticipates increased federal attention to navigation routes, resource development, military activity and commerce in the Arctic. HCR 22 foresees the future creation of a joint federal/state commission that guides interagency and inter-jurisdiction actions in

the Arctic. It provides an opportunity for Alaska's Legislature and Arctic communities to assume a proactive role in shaping such a body, and ensures that Alaska's unique interests are strongly represented.

In the execution of its responsibilities, the Alaska Northern Waters Task Force will hold hearings in the northern communities of Barrow, Nome and Kotzebue, as well as Anchorage. By meeting in these regions, the task force will be able to seek guidance and feedback from the residents of the regions most likely to experience impacts from increased activity in the Arctic.

The Alaska Northern Waters Task Force will deliver its findings to the Alaska Legislature in January 2012, including legislative proposals for consideration.

MEMORANDUM

Date: March 30, 2010

RE: Changes to House Concurrent Resolution 22, Northern Waters Task Force

---

Changes from HCR 22 to CS HCR 22 (CRA):

- Merging the first two Resolves from the original bill for better readability (on page 2, line 20 of the CS)
- P. 3, lines 4-5: changed so that the legislators on the task force shall select a chair from amongst themselves (rather than the task force selecting a chair from among the entire legislature).
- P. 3, line 5: adding that the chair of the task force may assign staff to the task force.
- Removed "FURTHER RESOLVED that the Bush Caucus chair may assign staff to provide support services for the task force; and be it" (p. 3, lines 13-14 of the original bill.)
- P. 3, lines 11-21: combining the two RESOLVED clauses before and after the one removed.
- P. 3, lines 20-21: Adding "(4) conduct hearings in the Northern Region of the state to fulfill its purpose; and be it" (originally another FURTHER RESOLVED on p.3, lines 23-24 of the original bill.)

White House Interagency Ocean Policy Task Force

On June 12, 2009, President Obama sent a memorandum to the heads of executive departments and federal agencies establishing an Interagency Ocean Policy Task Force, led by the White House Council on Environmental Quality. The Task Force is charged with developing a recommendation for a national policy that ensures protection, maintenance, and restoration of oceans, our coasts and the Great Lakes. It will also recommend a framework for improved stewardship, and effective coastal and marine spatial planning.

The oceans, our coasts, and the Great Lakes provide jobs, food, energy resources, ecological services, recreation, and tourism opportunities, and play critical roles in our Nation's transportation, economy, and trade, as well as the global mobility of our Armed Forces and the maintenance of international peace and security," President Obama wrote in the memorandum. "We have a stewardship responsibility to maintain healthy, resilient, and sustainable oceans, coasts and Great Lakes resources for the benefit of this and future generations."

"The challenges our oceans, coasts, and Great Lakes are facing are complex, and to meet these challenges we must have the participation of a wide spectrum of views from within the federal government," said Nancy Sutley, Chair of the White House Council on Environmental Quality. "The Task Force has a wealth of opportunity to make our oceans, coasts and Great Lakes healthier - both environmentally and economically."

The recommendations and frameworks developed by the Task Force will be cost effective and improve coordination across federal agencies. The Chair will terminate the Task Force upon the completion of its duties.

The time period to submit comments to the Task Force has closed, but you can read comments from others. The Task Force's Interim Framework is open for comment through Friday, February 12, 2010.

Read the President's Proclamation on National Oceans Month

White House Interagency Ocean Policy Task Force

In 2009, the White House Council on Environmental Quality (CEQ), the Office of Science and Technology Policy (OSTP), and the National Oceanic and Atmospheric Administration (NOAA) initiated the Interagency Climate Change Adaptation Task Force, which includes representatives from more than 20 Federal Agencies. When the President signed the Executive Order on Federal Leadership in Environmental, Energy, and Economic Performance, on October 5, 2009, he called on the Task Force to develop, within one year, Federal recommendations for adapting to climate change impacts both domestically and internationally.

Interim Progress Report

On March 16, 2010, the Task Force released an Interim Progress Report which outlines the Task Force's progress to date and recommends key components to include in a national strategy on climate change adaptation. These six components include:

1. Integration of Science into Adaptation Decisions and Policy
2. Communications and Capacity-building
3. Coordination and Collaboration
4. Prioritization
5. A Flexible Framework for Agencies
6. Evaluation

The Interim Progress Report is available for 60 days of public comment. Submit your comment here.

Workgroups

The Interagency Climate Change Adaptation Task Force formed workgroups to consider the capabilities of the Federal Government to respond to the impacts of climate change on various critical sectors, institutions, and agency mission responsibilities. Five initial workgroups began by reviewing existing policies, operations, procedures, and other tools that affect the Federal Government's response, and will suggest options for improving the government's capacity for adaptation to climate change. The five initial workgroups are focused on the following topics:

- **Agency Adaptation**: Develop recommendations on how agencies should plan and implement adaptation
- **Science Inputs to Policy**: Develop recommendations to couple the production of scientific and technical support to adaptation planning, prioritization, and resilience building within the USG, in the US, and internationally
- **Insurance**: Develop recommendations on opportunities for the United States Government to support insurance and adaptation issues
- **Water Resources Adaptation**: Develop recommendations on how Federal water management agencies should plan and implement adaptation actions related to climate impacts on water resources
- **International Resilience**: Develop recommendations on opportunities for the United States Government to support and lead international adaptation efforts

These workgroups have defined their scope and end products, and have begun initial analysis. Most workgroups have used stakeholder listening sessions to solicit feedback from various government and regional actors on adaptation issues within their respective issue area.

Listening Sessions

The five initial Interagency Climate Change Adaptation Task Force workgroups hosted twenty listening sessions with key stakeholders and experts. The listening sessions were designed to engage the expertise and recommendations of external organizations into the workgroup deliberations early in this review process.

Final Product

In October 2010, the Task Force will report to the President on the development of domestic and international dimensions of a U.S. approach to climate change adaptation and what Federal Agencies are doing to support this effort. The Task Force also will recommend additional aspects to consider in the development of a comprehensive national strategy.

Senator Begich - Inuvikput Package

Introduced August 3, 2009, the *Inuvikput Package* consists of seven pieces of legislation:

S.1560 Arctic OCS Revenue Sharing Act - Alaska Natives who have subsisted on marine mammals and other arctic resources for thousands of years would bear the direct risks of increased commercial activity in their waters. This bill directs a portion of federal revenues from offshore oil and gas development - the same share Louisiana receives from drilling in the adjacent Gulf of Mexico - to the State of Alaska with a percentage of those funds directed to those most affected.

S.1561 Arctic Marine Shipping Assessment Implementation Act - As the polar icecap recedes, the Arctic region is increasingly accessible to shipping and tourism. This bill is designed to ensure safe and reliable maritime transportation in the Arctic and protect its waters. It would boost the nation's investment in needed infrastructure, including replacement of America's aging fleet of icebreakers and building new forward operating air bases for the Coast Guard to assert our national interest in the region.

S.1562 Arctic Science, Coordination and Integration Act - Numerous scientists and agencies conduct important and needed research into various aspects of the Arctic but concerns remain that these efforts are not well coordinated and leave gaps in our understanding of Arctic issues. This bill calls on the National Research Council to undertake a study toward a comprehensive strategy to coordinate Arctic research and make recommendations to Congress on a long-term Arctic Ocean research plan.

S.1563 Arctic Ambassador Act - Russia, Canada, Norway and other Arctic nations are represented at the ambassadorial level before the Arctic Council and U.S. interests would benefit from an enhanced diplomatic presence in Arctic matters. This bill is intended to strengthen U.S. representation before the Arctic Council and other international forums by appointment of a U.S. ambassador to the Arctic.

S.1564 Arctic Oil Spill Research and Recovery Act - Vast energy reserves are believed to lie beneath Arctic waters and it is vital that any development of such resources be conducted in a responsible manner that protects the environment upon which residents of the region depend. This bill directs the Secretary of Commerce to conduct research to improve oil spill prevention, response and recovery in Arctic conditions and requires the Coast Guard to assess and reduce risk from such development.

S.1565 Arctic Health Research Act - People of the Arctic suffer from increased rates of alcohol abuse, diabetes, high blood pressure, and death from injury and suicide. This act would initiate a study into the mental, behavioral and physical health problems in the Arctic, institute an Arctic health assessment program at the Centers for Disease Control and create an "Arctic desk" at the National Institute of Health that was called for in 1984 but has never been established.

S.1566 Arctic Climate Change Adaptation Act - Alaska villages and public infrastructure are already suffering from coastal erosion, flooding, permafrost melting and other impacts of climate change. This bill would help the State of Alaska, Alaska Native organizations, affected Arctic communities and the private sector adapt to the impacts of climate change and assist in dealing with habitat restoration, clean energy development and other economic development activities.

Northern Waters Commission

A Call to Action

China declares itself an Arctic nation. Building an icebreaker.

Canada renames the much sought-after Northwest Passage the "Canadian Northwest Passage."

Two new-built container ships cut the shipping time from East Asia to Rotterdam in half. Sea route across northern Russia. Icebreaker escorts not needed.

Norway seeks talks with Alaskans.

Canada – Alaska border dispute flares up.

Iceland envisions a transshipment role for itself.

Russia claims undersea territories and resources.

Disclaimer.
This paper is NOT -- repeat NOT -- a treatise on global warming or explanations for it. This is a look at Alaska's potential role in new strategies and opportunities brought forward by receding sea ice in Northern Waters,

Discussion

Reports clearly indicate that the sea ice in Northern latitudes is receding.

No matter what the cause might be, what meaning does that fact have for Alaska and the United States?

Other nations and their governments are already hard at work on their own interests. Russian, Canada, Norway, Iceland and even our own Federal government are players.

These governments and their commercial partners are at the table. What should the State of Alaska and the Alaskan people be doing? We are not very active yet, but we should be.

How and when do we claim our place at the table? Or should we maintain a subordinate, quasi-colonial posture? Most are repulsed by the very thought of the latter.

The situation in Northern Waters could be summed up as follows.

The waters north and northwest of Alaska have strategic importance for at least these four reasons:

1. **Protection of routes of ocean transit.**
2. **Mineral and other resource rights, sub-surface and on-shore.**
3. **Territorial rights and claims by foreign governments.**
4. **Rights and welfare of local inhabitants.**

As governments, the interests listed above are shared by the Federal government and the State of Alaska.

Some independent Federal agencies are taking actions, and some bilateral or multilateral international forums exist. Not all these agencies are coordinating with one another.

2360

Although these shared interests are critical, yet, as of now, there is no organized Federal-State mechanism for handling or even discussing these matters.

Fortunately, there is an approach that is time-proven and very successful.

Suggestion

1. Use the very successful Fishery Management Council model, on which Federal and State appointees sit, deliberate, form policy and approve actions.

2. Feds and State agree to form a **Northern Waters Commission** (working title).

3. A balanced membership is formed comprised of Federal and State of Alaska appointees.

The **Northern Waters Commission** would be the forum at which to discuss policy issues, such as those listed in the four strategic areas above.

Regular meetings would be held, just as with the North Pacific Fishery Management Council, in a balanced atmosphere, with advice and input from staff, local governments, public agencies and the public.

Initial discussions about the **Northern Waters Commission** have been held with members and staff of our Congressional delegation, members of the State Legislative and Executive branches, the US Arctic Research Commission, the Mayor of the North Slope Borough, and experienced members of the public.

There is universal acknowledgement of the general issues involved with receding sea ice, and there is a real interest in the course of action outlined above as a means of addressing those issues.

As further background, in New York City a March 1, 2010 conference was held at the Council on Foreign Relations on the general subject of the retreating sea ice in the North. Senators Murkowski and Begich both made statements there, as well as Mayor Edward Itta.

Many notables were at the conference including the Norwegian Ambassador to the United Nations; David Rockefeller Jr.; Theodore Roosevelt IV; Nome Mayor Denise Michels; Alaska State Representative Carl Gatto; Bering Straits Native Corporation executive Gail Schubert; Alaska Native Arts Foundation chair Alice Rogoff; US Arctic Research Commission chair Mead Treadwell; and former Alaska Commissioner of Commerce, Community and Economic Development Bill Noll.

There was also an evening reception on March 1st at the Alaska House New York on the same subject. Mead Treadwell, Alice Rogoff and Bill Noll shared the podium at the reception. Mead gave a great power point presentation, followed by a lively Q&A.

About 80 had attended the Council on Foreign Relations event. Follow up is expected. As one example, an officer from Norway's General Consulate requested bilateral talks with Alaskans on this general subject.

Here is a link to the text of the afternoon session at Council on Foreign Relations, including the remarks by Senator Murkowski, Senator Begich and Mayor Itta:
http://www.cfr.org/publication/21623/adapting_to_climate_change_in_the_arctic_coordinating_a_federal_state_and_private_sector_response.html?breadcrumb=%2Fbios%2F13363%2Fscott_g_borgerson

Here is a link to the evening session at Alaska House New York:
http://www.ustream.tv/recorded/5121092

So, the question is, what to do next?

Recommendation

The State of Alaska perform work to create a report that will be the basis for taking actions deemed prudent to protect the interests of Alaska and Alaskans and advance these interests in the face of the receding sea ice.

There are and will be opportunities for people and businesses. Will Alaska play the role of a colony or foil for Federal and international protagonists? Or will Alaska step into the breach and take its rightful place alongside the sovereign powers already working for their own ends?

Proposed Scope of Work

A. The current and recent commercial and recreational marine transits passing Alaska over the top across Russia and Canada. The nature of this shipping and its potential. The economics.

B. Estimated oil, gas and other minerals in Northern Waters and their value.

C. Territorial claims to sea, sub-sea or land areas and resources.

D. Current actions by the US Coast Guard and the US Navy. Port potentials.

E. Other commercial potential such as tug support, pilotage, and ice breakers.

F. Shoreside support needs and potential for commerce. Infrastructure.

G. Social and economic potentials for local residents, businesses and governments.

H. Federal agencies currently involved in any way. International forums.

I. Existing Federal laws and regulations, and those pending in Congress.

J. The Law of the Sea Treaty: situation report.

K. The North Pacific Fishery Management Council budget and funding source.

L. Public hearings in key Northern locations.

Respectfully submitted.

William C. (Bill) Noll, Owner

Former Mayor of Seward

Former Alaska Commissioner of Commerce, Community and Economic Development

Founding president, Seward Association for the Advancement of Marine Science, dba Alaska Sealife Center

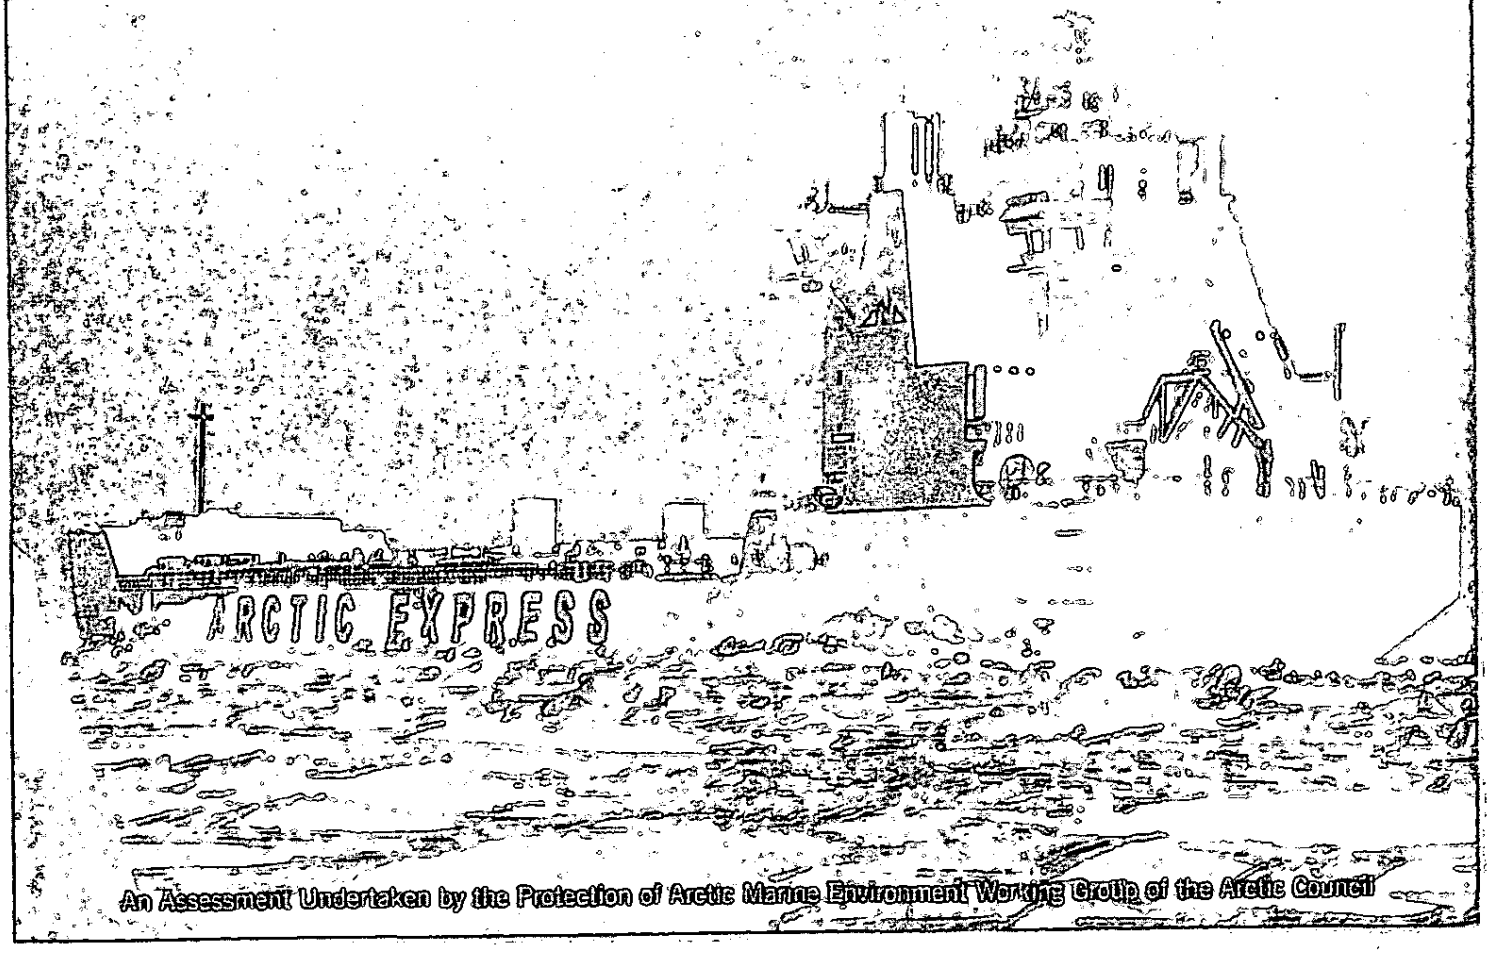
ARCTIC MARINE SHIPPING ASSESSMENT



An Assessment Undertaken by the Protection of Arctic Marine Environment Working Group of the Arctic Council

Scenarios on the Future of Arctic Marine Navigation in 2050

Arctic Marine Shipping Assessment (AMSA)

The Arctic Council – an intergovernmental forum that addresses environmental protection and sustainable development issues, as well as challenges faced by the Arctic governments and people – is conducting an assessment of current and future Arctic marine activity. The lead countries for AMSA are Canada, Finland and the United States with the Arctic Council's working group on Protection of the Arctic Marine Environment (PAME) responsible for the assessment. A key element of AMSA is the creation of a set of scenarios, or plausible futures, for Arctic marine navigation.

Scenario Framework

The high-level scenario summaries were created at two AMSA/PAME Scenarios Workshops held in San Francisco (April 2007) and Helsinki (July 2007). The workshops were designed and facilitated by Global Business Network of San Francisco. Through brainstorming, work in small groups and spirited plenary discussion, workshop participants collectively agreed that the two factors detailed below – Governance and Resources & Trade – are the most important and uncertain in shaping the future of Arctic marine navigation in mid-century. By crossing these two critical uncertainties, participants formed the scenario matrix illustrated to the right. This framework also allows the incorporation of many of the uncertainties explored at the workshops, while still creating four different scenario spaces that are plausible and relevant to the range of Arctic stakeholders. When completed, the scenario stories willbe posted on the PAME website, www.pame.is.

Governance

This uncertainty axis describes the degree of relative *Governance stability*, both within the Arctic region and internationally.

← **Less stability** implies shortfalls in legal structure and transparency, as well as a propensity for stakeholders to work on a more unilateral basis rather than by collaborating in a cooperative, international fashion.

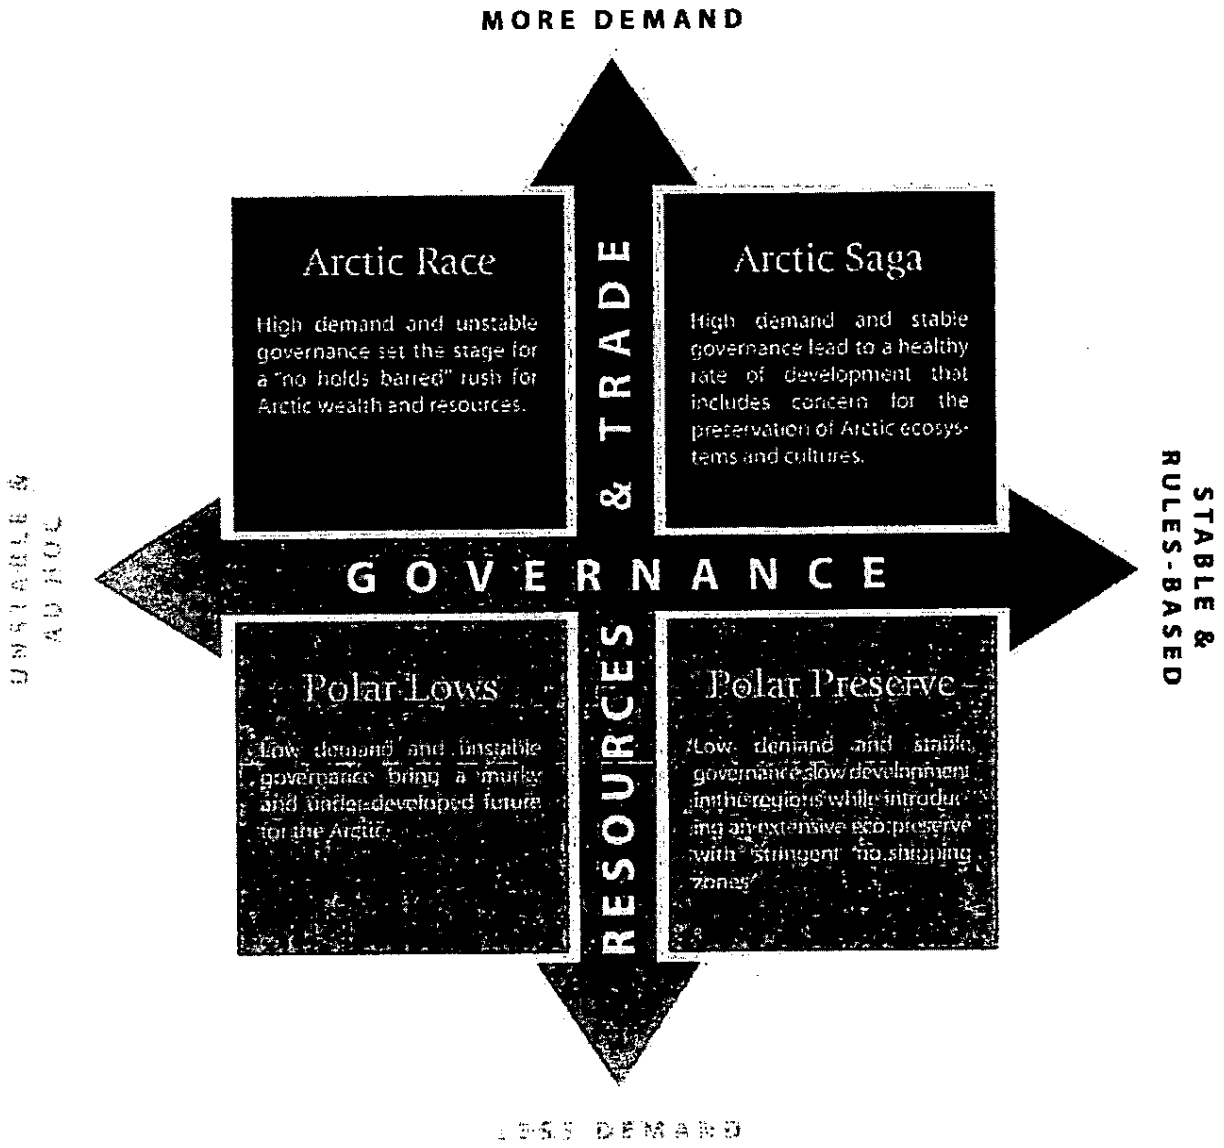
→ **More stability** implies not only efficiently operating legal and regulatory structures, but an international atmosphere more conducive to collaborative and cooperative development.

Resources & Trade

This uncertainty axis describes the level of demand for Arctic natural resources and trade. Framing this in a global context exposes the scenarios to a broader range of potential market developments, such as the rise of Asia or political instability in the Middle East.

↑ **More demand** implies exactly that – higher demand from more players and markets around the world – for natural resources and commerce in the Arctic.

↓ **Less demand** is also straight forward, with fewer global players interested in utilizing Arctic commerce and natural resources.



Development of the AMSA scenarios is being facilitated by Global Business Network of San Francisco.
Support for this effort has been provided by: Aker Arctic Technology, BP Shipping, Finnish Ministry of Foreign Affairs, Institute of the North, Transport Canada, U.S. Arctic Research Commission, U.S. Department of State and U.S. National Oceanic & Atmospheric Administration.

Arctic Climate Impact Assessment Key Finding #6:

"Reduced sea ice is very likely to increase marine transport and access to resources."

The Arctic Sounder

Published on March 18th, 2010

Opinion: Visit to New York, D.C. gets Arctic message across

By EDWARD ITTA

We Inupiaq like to say that the Arctic Ocean is our garden. It feeds us with its bounty of whales, seals, walrus, ugruk, fish and other subsistence foods. Our harvest is better in some years than in others. Weather, ice and ocean currents all affect the amount of "crops" we are able to feed to our families from year to year.

These are times of change for the ocean. Offshore oil and gas exploration is gearing up. We have seen plenty of evidence that climate change may cause dramatic shifts in the polar ice cap and in our weather. Receding ice could open up new shipping routes between Europe and Asia. We may see increased ocean traffic from commercial fishing boats and tourist ships.

What can we do about it? As mayor, I believe the borough should be engaged in the planning, monitoring, research and mitigation efforts that are being crafted right now as government agencies at all levels respond with a new sense of urgency to challenges and opportunities in the Arctic Ocean. That's why I spent the past week in New York and Washington, D.C. I joined Senators Begich and Murkowski in New York and the three of us made presentations on adapting to climate change in the Arctic to a group of policymakers, business people, scientists and journalists, who then participated in a roundtable discussion.

Policymakers are eager to hear our views, because they recognize that we have the most intimate knowledge of the Arctic and the most to lose if the ocean is not adequately protected. My message to them was that we don't want offshore development, but if it is going to happen, we insist on participating in decisions that will govern offshore activities and precautions. I showed them the Arctic policy principles adopted by ICC in 1984 as an example of longstanding Inuit leadership on protecting the polar region.

In Washington, I met with several of the highest officials in the Interior Department, including Interior Secretary Ken Salazar; his assistant secretary for Land and Minerals Management, Wilma Lewis; Liz Burnbaum, director of the Minerals Management Service (MMS); and Bob Abbey, director for BLM. I stressed that if the government is going to allow OCS activity, then it should set the bar very high when it comes to clean and cautious operations in the water.

I said that the shutdown requirement MMS wrote into Shell's Camden Bay permit is a good step in the right direction, since it gives that requirement the force of law for the first time. I argued for larger deferral areas around traditional Barter Island and Cross Island whaling areas, a moratorium on leasing new acreage, zero discharge of drilling wastes, a cumulative impacts analysis, and the need for better baseline science.

I invited Secretary Salazar to visit the North Slope this summer so he can get a first-hand look at some of the places that mean so much to our people. He agreed to pay us a visit in August.

At NOAA, I talked with two key officials about their efforts in preparing a new Environmental Impact Statement concerning the effects of oil and gas activities in the Arctic Ocean. Rather than the annual Incidental Harassment Authorizations (IHA) that are now issued, they are looking at doing five-year Incidental Take Authorizations. They believe it will build certainty and flexibility into their mitigation requirements, and I can see their point. I told them that we need more monitoring and study of the effects of noise on migrating whales. I discussed the Obama administration's new planning initiative for oceans and coastal areas with the head of the President's Council on Environmental Quality (CEQ). CEQ is spearheading the president's effort to deal with climate change. How this new ocean planning program will work is still something of a mystery, but it has a high priority in the administration. I focused on the need to be sensitive about traditional uses of the coastal and ocean areas and to make sure our voices are heard as these large-scale management programs are designed.

At the U.S. Fish and Wildlife Service, we discussed the ongoing management plan for Steller's eiders. I pointed out that our people are conservationists by nature and that education efforts about threatened species can be much more effective than hardball enforcement tactics. I thanked them for establishing a liaison position in Barrow (now held by Emma Huntsman) and said I look forward to better communication between the community and the agency.

Although I spent time with Senators Murkowski and Begich in New York, I was able to meet with each of them again in D.C. I also met with Congressman Young. In each case, I went over a range of issues that we can work on together, and I thanked them for legislation they sponsored in response to my eight-point OCS policy position.

All in all, it was a very productive week. If our voice is going to be heard in the halls of political power, it will be because we take our message to the decision makers and state our point clearly and forcefully. My staff and I will continue to engage with the agencies that shape the regulatory framework for North Slope activities of all kinds. In these challenging times,

these changing times, I want to make sure they can't forget our concerns as they plan the future in offices that are thousands of miles from the Arctic.

Edward Itta is mayor of the North Slope Borough.

Monday March 01 2010

Murkowski Speaks at Arctic Policy Roundtable at New York Council on Foreign Relations

NEW YORK - U.S. Sen. Lisa Murkowski, R-Alaska, helped lead a discussion on U.S. Arctic policy at a roundtable forum today at the Council on Foreign Relations in New York City. Also participating in the discussion was U.S. Sen. Mark Begich, D-Alaska, a number of Arctic policy experts and several Alaskans, including Mayor Edward Itta of the North Slope Borough. Following is a text of Sen. Murkowski's remarks as prepared for delivery:

"Good afternoon. It is my distinct pleasure to be back at the Council on Foreign Relations today to discuss one of my favorite subjects, the Arctic. As all of us in this room are aware, the United States is an Arctic nation because of Alaska. But, what does it mean to be an Arctic nation? I believe that the Federal Government is just waking up to this reality and we are frantically trying to define exactly what that distinction means. In my view, being an Arctic nation means that the United States has certain obligations and responsibilities in the region to the land, the water and the people. And we all need to help our nation understand what those are.

"The pace of change in the Arctic demands that greater attention be focused on the region. The implications of the dynamic changing Arctic for the residents and important U.S. security, economic, environmental, and political interests, depend on it.

"One of those responsibilities I spoke of is to have the necessary infrastructure in the region. I recently introduced legislation that directs the Department of Defense and the Department of Homeland Security to study the feasibility, location and resource needs for an Arctic deep water port. This study will determine whether it is in the strategic interest of the United States, as I believe it is, to build a port and where it might be located. A deep water port would not only serve our military and Coast Guard needs, but as we develop our offshore oil and gas reserves and see more shipping, tourism and vessel traffic in the Arctic, a deep water port could provide valuable support. I will insure that the Navy and Coast Guard actively consult with the communities and leaders of the region, as well as the State of Alaska.

"As we all are keenly aware, while the Arctic is becoming more and more ice free in the summer months, Arctic ice is not going to completely disappear. One of the major challenges that we face is our aging ice breaker fleet. I was able to get an appropriation to refurbish the Polar Star last year, and the Coast Guard has embarked on a study to determine whether we need to rebuild or replace our aging polar class vessels, but no matter the result of the study, we must have the commitment of the Administration and Congress that ice breakers are a national priority. And I will do all I can to advocate that position.

"As you know, I am a strong proponent of ratification of the United Nations Convention on the Law of the Sea. The United States must ratify the treaty but we remain at a stalemate: the White House looks to the Senate to lead and the Senate waits for stronger support from the

Administration. As the only Arctic nation not a party to the treaty, failure to ratify continues to keep the United States at a disadvantage internationally and outside the process, without a seat at the table.

"Even though we are not a party to the Treaty, the United States is making progress on mapping our extended continental shelf. The results of Coast Guard ice breaker HEALY's hydrographic missions in the Arctic have been remarkable and I have supported this initiative with appropriations and legislation to authorize more funding. I was gratified to see the cooperation in the Beaufort between with the HEALY and the Canadian icebreaker the Louie St. Laurent. This is yet one example of international cooperation in the Arctic.

"While I was pleased that the United States released its long awaited Arctic Regional Policy in early 2009, implementation is still lagging. It may be necessary for Congress to step in and help move the process. While certain branches of the government, like the Navy and Coast Guard, are developing and implementing their portions of the policy, it is still not nearly to the degree I would like. Certainly other Arctic and non-Arctic nations are moving much more quickly to develop policies and support them, than we are.

"I believe we are at a very critical time in the Arctic. As many of us have identified, there are two paths we can go down in regards to international relations -- one is a path of competition and conflict, and the other is one of cooperation and diplomacy. This decision, and the direction it takes, will require vision and dynamic leadership, both at home and abroad. I believe the United States, as one of the most powerful Arctic nations, must step up and provide it.

"A changing Arctic brings risks and challenges to the environment and indigenous people of the region. But it also brings opportunity and awareness. and if we can work to identify and minimize the risks, and use the opportunities to better the lives of the people of the Arctic region, we can all prosper.

"Thank you and I look forward to a lively conversation this afternoon."

Melting ice could mean new riches

Jill Burke
Mar 1, 2010

"It's not a question of if but when."

That's what Mead Treadwell, chairman of the U.S. Arctic Research Commission, told a New York City crowd Monday about the prospect of a booming northwest passage.

Treadwell made the remarks during a moderated panel discussion, "Will the Bering Strait become the Panama Canal of the North?" hosted by the Council on Foreign Relations at Alaska House New York. (Alaska House is a nonprofit organization founded by Alaska Dispatch publisher Alice Rogoff to promote education about Alaska and its Native culture and foster economic development within the state.)

The day's discussion, which pulled together Alaska's congressional delegates, regional leaders and industry representatives, centered on the sense of urgency seemingly missing both in the state and nationwide for developing the infrastructure -- like deep water ports and international rules -- that will be needed to tap into a new hustling, bustling Bering Strait.

Two of the world's largest mining operations are above the Arctic Circle, including the Red Dog zinc mine in Alaska off the coast of Kivalina, according to Treadwell -- and the Arctic is poised to deliver even more resources. Minerals, fishing, oil and gas, exploration and science, and tourism all have northern footholds. Capturing opportunities related to those activities with the prospect of shorter shipping routes as ice recedes is something Americans need to be thinking about now, Treadwell said.

The challenge is building the infrastructure. Deep water ports are needed to accommodate large container ships and provide an anchor for the military presence that will need to increase to keep pace with a rise in offshore activity near the United States' northern coast.

Participants, including Rogoff, suggested that developing port infrastructure for Alaska's western coast, from Adak to Barrow, could be an economic boom as important to the state as the trans-Alaska oil pipeline, particularly when even a handful of new port jobs has the potential to pull villages teetering on the brink of economic failure into sustainability.

Alaska Sens. Lisa Murkowski, a Republican, and Mark Begich, a Democrat, attended the event and told participants they are aware of the critical role Alaska is poised to play in a changing Arctic environment. Murkowski is pushing for a Department of Defense and Homeland Security feasibility study for a deep water port off Alaska's shores.

"This study will determine whether it is in the strategic interest of the United States, as I believe it is, to build a port and where it might be located. A deep water port would not only serve our military and Coast Guard needs, but as we develop our offshore oil and gas reserves and see more shipping, tourism and vessel traffic in the Arctic, a deep water port could provide valuable support," Murkowski said.

A full transcript of the day's discussion will be posted online at the Council on Foreign Relations' Web site.

ANALYSIS: *(Attach a separate page if necessary)*

The passage of this resolution would require the constitutional amendment to appear on the 2010 general election ballot. The cost of providing information about the constitutional amendment in the Official Election Pamphlet, as required by AS 15.58 is $1.5. Should the addition of this question require printing an 8-1/2 by 18 inch ballot, the cost will increase to $22.0.

(Revised 10/13/2009 OMB)

Rep. Mike Kelly introduces state finance plan

Published Thursday, January 29, 2009

JUNEAU — Rep. Mike Kelly has introduced a plan to stabilize the state's finances by evening out the steep peaks and valleys of the "oil price roller coaster."

The Fairbanks Republican this week introduced House Joint Resolution 8, which, if approved by the Legislature, would ask voters to amend the Alaska constitution to require the state to base spending on a five-year average of oil and other minerals revenue.

That, Kelly said, would limit state spending and restore some financial stability.

"This government seems to have a ratchet, but it's only in the up direction," he said. "We have got to live within our means, and we've got to control the seemingly endless growth in state government."

He charged that state spending has doubled since 2005, when he entered the Legislature, and roughly tripled since 2000.

"If the people had to pay for that, they would be screaming bloody murder," he said.

About 90 percent of unrestricted state revenue in fiscal year 2009 came from oil production.

Kelly's plan calls for calculating state revenues on an average of the last four years and the current year and wouldn't affect the Permanent Fund. The proposal also would create a Balanced Budget Account, a short-term holding fund that could be drawn on to balance the budget at the end of each fiscal year. Any surpluses would flow into the Constitutional Budget Reserve.

The new, short-term account could help save money by eliminating steep spending in flush years and dramatic cuts in lean years, he said.

Lawmakers have to round up a three-fourths majority to tap into the CBR. That's generally done by promising money for special projects to legislators who will vote yes, Kelly said.

"If you want a billion, you're going to pay a lot more than that to get it out," he said.

His proposal would average revenues from all oil, natural gas and other mineral sources. At the same time, Rep. Mike Hawker, R-Anchorage, has filed a resolution for a constitutional amendment that would establish an endowment fund with natural gas revenue. Kelly said he and Hawker will discuss how the two plans could dovetail.

Sen. Joe Thomas, D-Fairbanks, agreed the state needs a long-term fiscal plan, but he has some initial concerns about Kelly's proposal. He sits on the Senate Finance Committee.

He would like a look at scenarios of how a five-year average would have affected revenue and spending during the last several years.

An average could still pack some wallops when years with major movement, such as 2008 with $140 per barrel oil, factor in. He cautioned against the possibility of "economic whiplash."

And, Thomas noted, while a five-year average could smooth some ups and downs, less revenue could lead to cuts to some state services that are as essential in lean times as in boom years.

Kelly's resolution was referred to the House state affairs, judicial and finance committees.

If the resolution passes the Legislature, he doesn't expect too much trouble convincing voters to make the amendment.

"I think this is something that the public understands clearly the need for," he said. "It's about responsible budgeting."

Rep. Mike Kelly shows some common sense: His plan has no chance.

Posted on ***29 January 2009***

By Dan Fagan

Like it or not, here in Alaska we live in a boom or bust economy. Alaska is known for its extremes and our economy is no different. The fluctuation in the price of oil has never been more dramatic than it was in 2008. So what's a state to do when it comes to a budget?

Republican Rep. Mike Kelly of Fairbanks has an idea. House Joint Resolution 8 sponsored by Kelly is designed to even out the up and down nature of state revenue.

The measure calls for changing the Alaska constitution requiring our big spending legislators to base budgets on a five-year of oil and other mineral revenues. It would take into account the past fours years and the current year of state revenue when putting together a budget.

This plan would prevent what happened last year when the state was flush with cash and blew much of it including a massive giveaway of free cash. Rep. Kelly hopes the plan would limit state spending in boom years.

"This government seems to have a ratchet, but it's only in the up direction," Kelly told the Fairbanks News Minor. "We have got to live within our means, and we've got to control the seemingly endless growth in state government."

Kelly is on the right track. Something has to be done. In the past three years, state spending has doubled. There's no justification for that kind

of irresponsible growth. Kelly says that type of growth is only possible because Alaskans, for the most part, don't directly have to pay for state government.

"If the people had to pay for that, they would be screaming bloody murder," Kelly said.

Nine out of every ten dollars the state collects comes from the oil industry.

Rep. Kelly's plan also creates a Balanced Budget Account. Lawmakers would draw on it to balance the budget at the end of each fiscal year. Any surplus would flow into the Constitutional Budget Reserve.

Kelly hopes the new, short-term account could help save money by eliminating steep spending in flush years and dramatic cuts in lean years, he said. The truth is we do spend like drunken sailors in boom years and yet during lean years we still spend too much. Kelly's plan would at least restrict legislators from going crazy when the price of oil is high.

Does Kelly's plan have a shot? Three quarters of legislators would have to be on board so it faces an uphill battle. Democrats typically oppose any legislation that would limit government spending. And the D's seem to have firm control in the Senate with the newly formed coalition.

HJR 8

Balanced Budget Resolution
House Finance Committee
March 18, 2010

Representative Mike Kelly
26th Legislature

Control Spending

In 1982, voters approved an amendment to the Alaska Constitution to control state spending.

The 1982 amendment established an annual appropriation limit of $2.5 billion plus adjustments for changes in population and inflation.

Today's Dollars

For FY 09, the Office of Management and Budget estimated the 1982 Constitutional limit to be approximately:

$8.3 billion

(Source: State of Alaska Comprehensive Financial Report Fiscal Year Ended June 30, 2009, page 59)

FY 09 budget

The FY 09 budget passed by the legislature after vetoes was $6.7 billion (unrestricted General Fund revenue), or $1.6 billion less than the 1982 constitutional spending limit.

Translation: The 1982 spending limit passed by voters is either functionally ineffective; or, we're doing a fine job of controlling government growth.

Constitutional Budget Reserve Fund (CBRF)

In 1990, another attempt was made by voters to impose budget stability. Voters approved a Constitutional Amendment creating the Constitutional Budget Reserve Fund (CBRF).

CBRF

The CBRF was created to receive and protect excess revenues generated in high revenue years, rather than leaving excess funds in the General Fund (where they may be more easily accessed and spent). Taking money from the CBRF requires a supermajority ¾ vote, making it more difficult to tap and arguably a spending controller.

State General Fund Spending FY90 – FY10

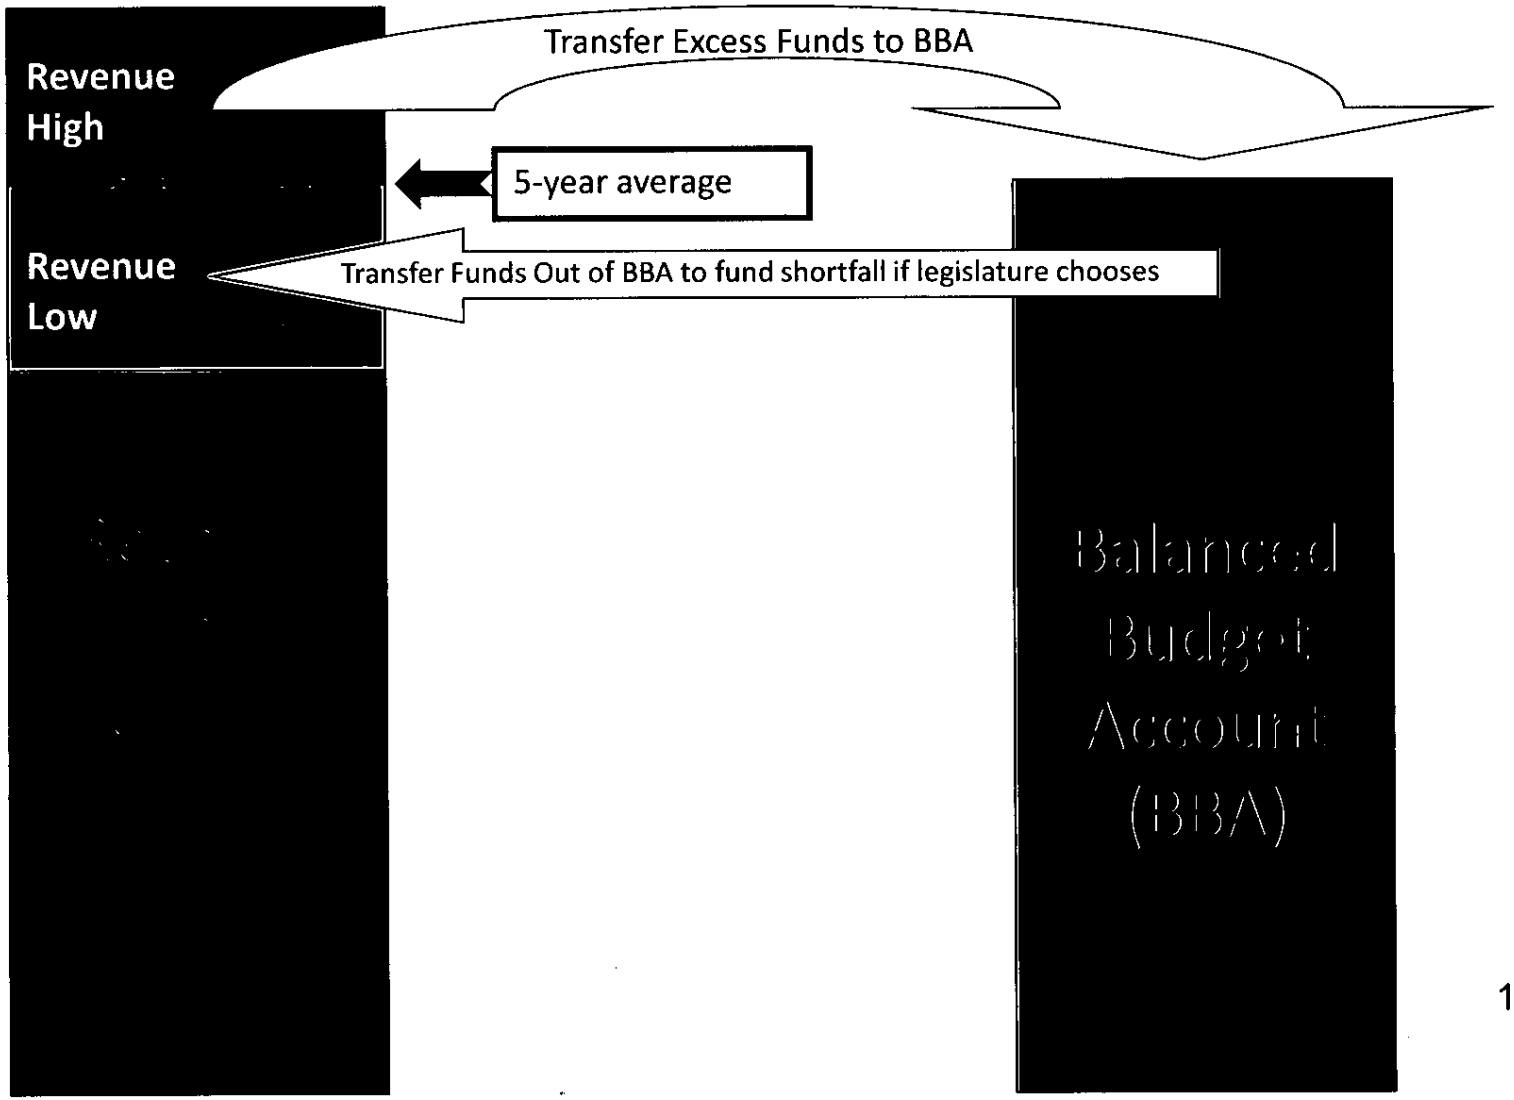
Basic Concept of Balanced Budget Resolution



Sacred Cows

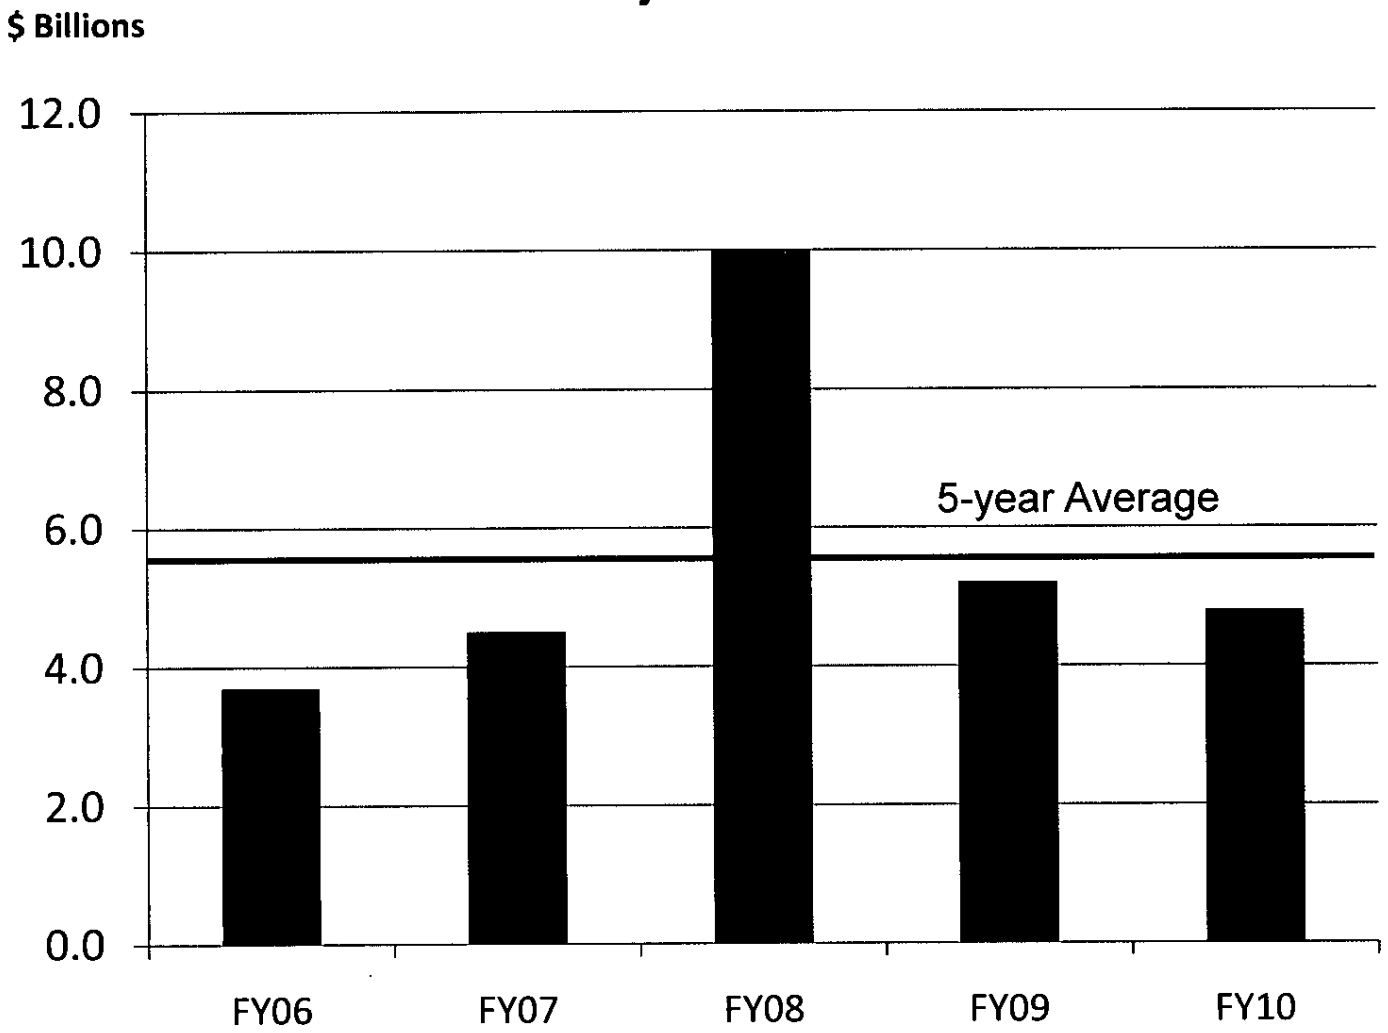
<u>HJR 8 Does NOT touch:</u>

- Permanent Fund Dividend
- Permanent Fund Corpus
- Permanent Fund Earnings
- Amerada Hess

CBR Sweep

The Balanced Budget Account is NOT subject to the Constitutional Budget Reserve sweep.

HJR 8/BBA Relationship

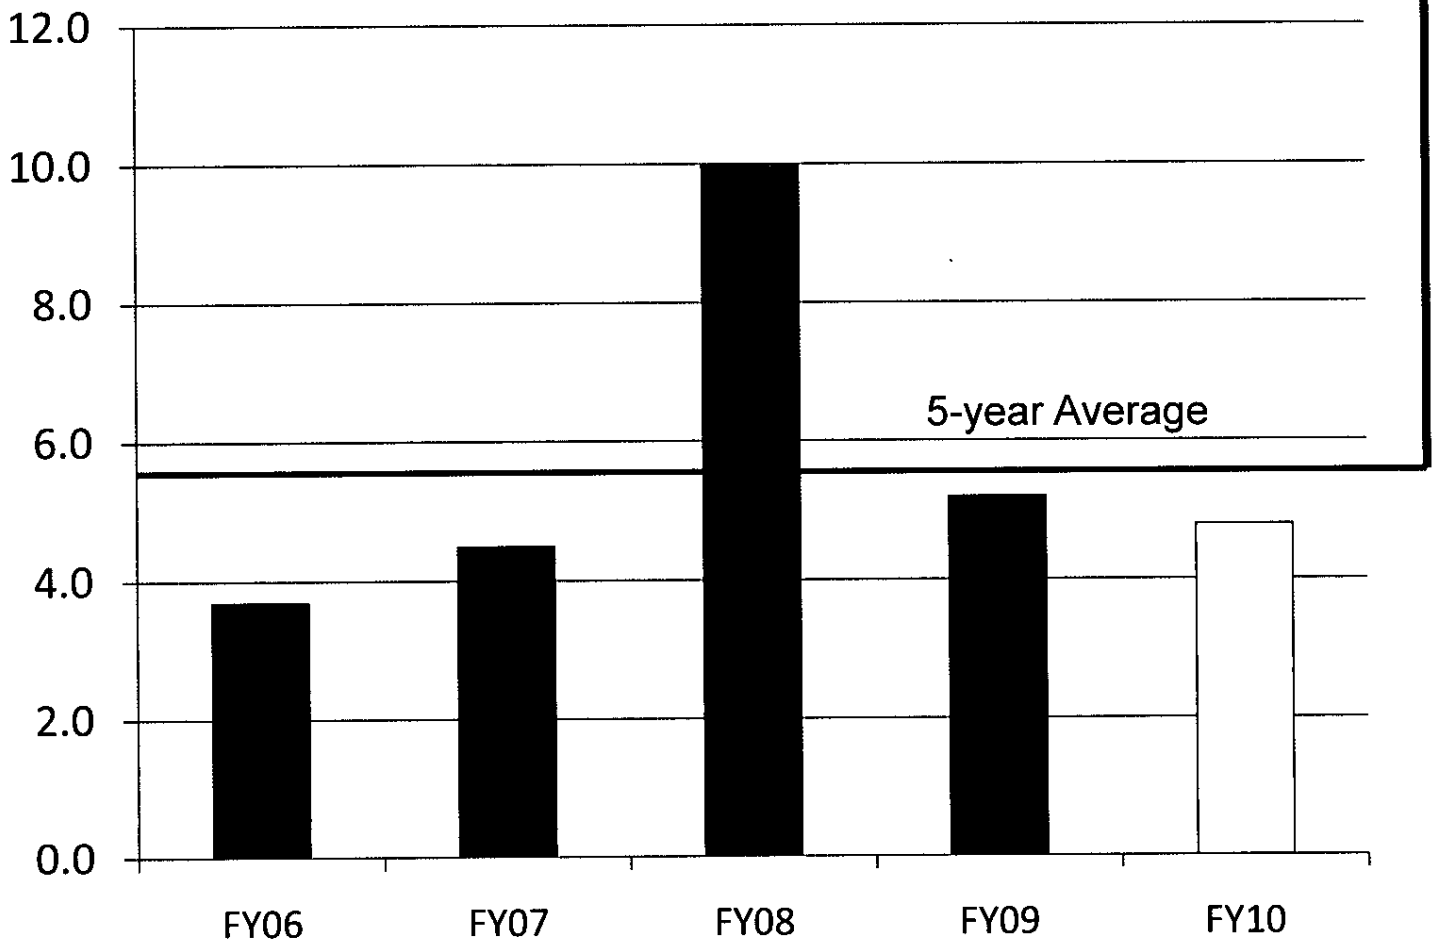


Balanced Budget Account (BBA)

- HJR 8 transfers funds into the BBA when oil prices are high and, with a simple majority vote, transfers funds out of the BBA to fill the gap when oil prices are low. When the balance of BBA exceeds 2 years of appropriations, excess will be transferred into the CBR.

Source: Fall 2009 Revenue Sources Book & Dept. of Revenue's revised 2010 Estimate (February 8, 2010)

5-year Average Calculation – FY11'



$ 5.6

5-year Average Calculation:

(For '11 Budget)

Take the Petroleum Revenue for the past 4 years, plus the Dept. of Revenue's current fiscal year projection and divide by 5.

Example:

$ (Billions)

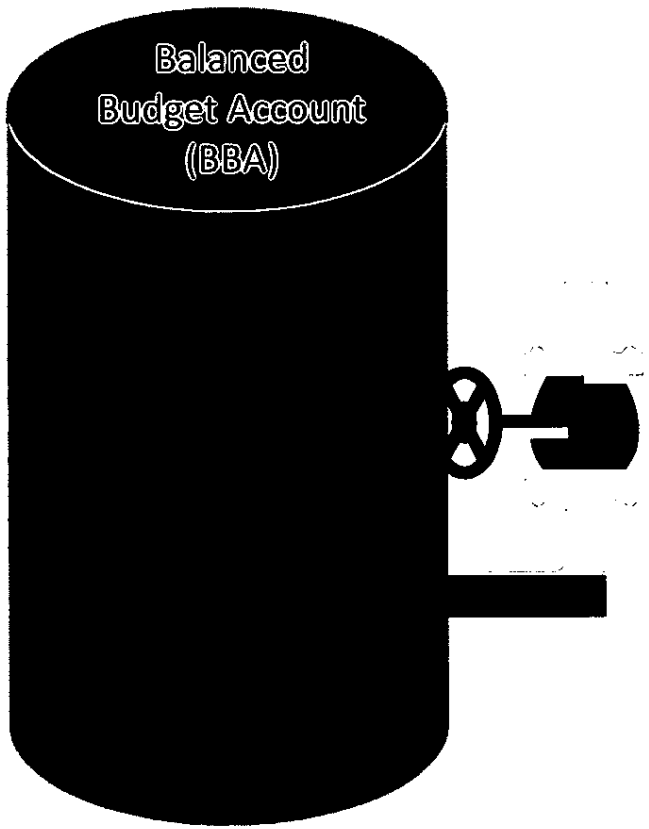
'06	$ 3.7
'07	$ 4.5
'08	$ 10.0
'09	$ 5.2
'10	$ 4.8
Total	$ 28.2

Divided by 5 =

$ 5.6

Source: Fall 2009 Revenue Sources Book & Dept. of Revenue's revised 2010 Estimate (Feb. 8, 2010)

The BBA and CBR



Constitutional Budget Reserve (CBR)

HJR 8 transfers funds into the CBR when the BBA exceeds its 2 year limit. The legislature would still need a ¾ vote to access the CBR.

2396

Fiscal Responsibility

- Encourages a better budgeting system than "when you have it, spend it – when you don't, cut."
- Provides a simple but effective mechanism to help save budget surpluses and avoid deficits while encouraging government to live within its means.
- Eliminates need for complicated "rat holing" and "parking" of excess funds to avoid ¾ vote.

Why a Constitutional Amendment?

- The legislature can easily overpower, ignore or change statutory appropriation constraints.

- Let the people speak concerning this simple fiscal framework. It may be the only fiscal plan they will endorse at this time.

HJR 8 & POMV

"If the people of Alaska choose a Percent of Market Value approach to funding government using the Permanent Fund Earnings, HJR 8 would accommodate that approach."

- Excerpts from Bradners' Alaska Legislative Digest No. 29/07 Dec. 19, 2007:

- **Fiscal policy is more than savings and sound bites; it requires long-haul skilled political crafting.**

- Long term fiscal policy has been elusive in Alaska, especially since the beginning [of] the pipeline flow and the flow of easy money. The citizen taxpayer close scrutiny faltered and was replaced by all of us with our hands out. There are reasons why we have failed, and continue to do so.

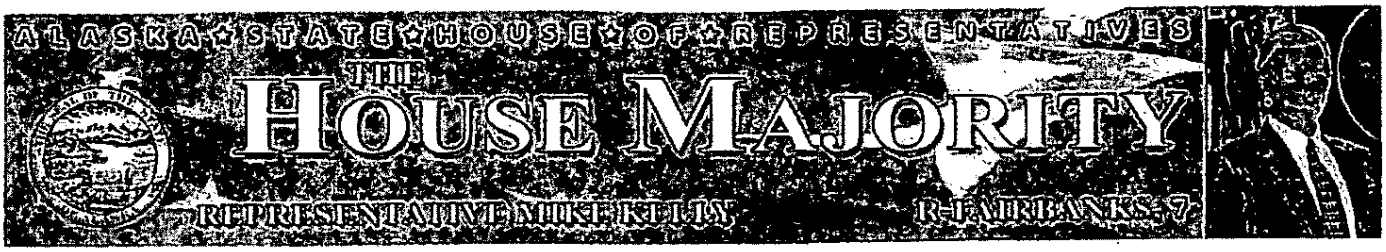
  - **We play the budget game from the seat of our pants.**

- Lawmakers are besieged with demands to spend, especially when there is the perception or the reality as is the current case, that there is money on the table. Fiscal restraint then becomes someone else's business, or the business of tomorrow, although tomorrow brings the same appetites.

- **The same people who demand that they see a critical need in their community, or in relation to their institution or industry, will still say the Legislature "spends too much."**

2400

Questions?



FOR IMMEDIATE RELEASE **PRESS RELEASE**

KELLY'S FISCAL PLAN CONST. AMEN. MOVES FROM COMMITTEE

HJR 8 will base State spending on 5-year oil revenue average

Tuesday, April 07, 2009, Juneau, Alaska – The House State Affairs Committee moved House Joint Resolution (HJR) 8 out of committee today. The resolution, sponsored by Rep. Mike Kelly, R-Fairbanks, would place before voters a constitutional amendment limiting State spending appropriations. The resolution bases State spending on a 5-year rolling average of oil revenue. According to the State Dept. of Revenue, 90% of the total unrestricted revenue in fiscal year 2009 is attributable to oil production.

"I appreciate the House State Affairs Committee's recognition that this resolution should be moved forward and the level of discussion regarding State spending should be dialed up," Kelly said. "We've gone from a significant deficit in FY '03 to a significant surplus in FY '06, and now back to a projected deficit in FY '10. State spending chases this oil price roller coaster, making rational budgeting extremely difficult and living within our means politically unachievable."

"This resolution looks to the future, through the past," said Rep. Craig Johnson, R-Anchorage, who co-sponsored the bill. "This is the first time I've ever heard a discussion of how we allocate our dollars in a finite world. Instead, the discussion has always been 'well, we'll just go get more from someplace else then.' This bill has brought more discussion on financial decisions than I have heard on any finance committee, sub-committee or anywhere else."

"This resolution takes money off the table in high revenue years and saves it for years when revenue is low," said House State Affairs Committee Chair Bob Lynn, R-Anchorage, who also co-sponsored the bill. "This is an appropriate discussion for the legislature to have in light of the doubling in State spending over the past 5 years. I support moving this bill along and encouraging my colleagues to consider how we allocate our resources."

HJR 8 now moves to the Judiciary Committee and Finance Committee.

HJR 8

"An Act proposing amendments to the Constitution of the State of Alaska limiting appropriations from certain mineral revenue, relating to the balanced budget account, and relating to an appropriation limit."

The largest contributor to our state's unrestricted revenue is also the most volatile component. 85-90 percent of unrestricted revenues for FY '07 through FY'10 will come from oil. Since 1988 Alaska North Slope crude oil production has declined by 64% - from over 2 million barrels per day to under 720 thousand barrels per day. During that same period of time the market price of oil has increased sixfold. We have gone from a significant deficit in FY '03, a $500 million draw on the CBR, to a significant surplus in FY '06 of over $1 billion, back to a projected deficit in FY '09. This makes rational budgeting nearly impossible. HJR 8 provides an appropriation smoothing and limiting mechanism applicable to the wildly fluctuating portion of the budget that is oil revenue.

In recognition of the difficulty in building and balancing our budget in a responsible manner when the price of oil fluctuates, HJR 8 forces the legislature to incorporate its oil revenues into the budget in any given fiscal year on a five-year rolling average, (4 years back and 1 year forward). This averaging would act as a "dampener" to prevent spending sprees when oil prices are high and crashes when oil prices are low.

HJR 8 also establishes a "Balanced Budget Account" in the State Treasury. Any oil and other mineral revenue received by the state in excess of the 5-year average amount referenced above would be deposited into the Balanced Budget Account. This account would not be subject to the Constitutional Budget Reserve sweep, but would be limited to a maximum amount that is equal to the oil and other mineral revenue appropriations for the current fiscal year, plus the immediate preceding fiscal year. Any excess amount would be transferred to the Constitutional Budget Reserve.

This resolution would also provide for transfer of funds from the Balanced Budget Account into appropriations during years when actual revenue from oil and other minerals falls below the 5-year average. In lean years, the legislature may with a majority vote transfer funds from the Balanced Budget Account necessary to fill the "gap" between the revenue available and the 5-year average. If the legislature requires appropriations above what the 5-year average permits, it may choose to live within its means or seek funds from other sources of revenue including the CBR.

HJR 8 could end the constant search by the legislature for rat holes in which to stash excess revenues so they can access those funds to balance the budget in the following years, without having to buy the ¾ vote to get funds from the Constitutional Budget Reserve. The resolution also avoids "sacred cows" by having no effect on the permanent fund corpus or the earnings of the Permanent Fund, the Amerada Hess Account or the Permanent Fund Dividend.

Questions & Answers for HJR 8 in House State Affairs Committee

Tuesday, April 7, 2009

Question: Where did the definition of "mineral revenue" come from on page 1, lines 8-10 of the resolution?
Answer: Article 9, Section 15 of the Alaska Constitution, which says: "At least twenty-five per cent of all **mineral lease rentals, royalties, royalty sale proceeds, federal mineral revenue sharing payments and bonuses** received by the State shall be placed in a permanent fund, etc..."

Mineral production refers to the State's production tax (ACES) on oil. Mineral Transportation refers to the State's tariff on transporting oil through the Trans-Alaska Pipeline System. This section would apply to a potential gasline as well.

Question: Has the Constitutional Budget Reserve been repaid?
Answer: According to the Comprehensive Annual Financial Report of the State of Alaska, the remaining indebtedness to the CBR is $150 million and change. In FY08 the legislature appropriated $3 billion from the general fund to the CBR. Additionally, at the end of FY08 over $2 billion was swept from a variety of GF sub-funds and accounts, and transferred to the CBR.

Question: Can we include fish receipts and tourism in the 5-year appropriation limit?
Answer: Yes we can, but the state receives minimal revenue from these sources when compared to mineral revenue. For example, total unrestricted income from Fish Taxes was $22.4 and $22.6 million in FY07 and FY08. If these receipts were included in HJR 8, they would represent ½ a percent of total revenue in FY07 and even less in FY08. The Fall 2008 Revenue Sources book includes other restricted revenue from fish receipts, but because they are restricted they should not be included in the HJR 8 model.

Total unrestricted income from tourism includes: $9 million from the Car Rental Tax, $12.3 million from the Cruise Corporate Income Tax, $3.5 million from the Tourism Corporate Income Tax, and $6.7 million from the Cruise Gaming Tax. Total unrestricted revenue from tourism in FY08 was $31.5 million. These funds represent a 1/3 of a percent of total revenue for FY08. The Fall 2008 Revenue Sources book includes other restricted revenue from tourism, but because they are restricted they should not be included in the HJR 8 model.

Question: Can we calculate a 3-year Average, deleting the high extreme and the low extreme?
Answer: Yes. (See Attached)

HOUSE JOINT RESOLUTION NO. 11

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SIXTH LEGISLATURE - FIRST SESSION

BY THE HOUSE FINANCE COMMITTEE

Introduced: 1/30/09
Referred:

A RESOLUTION

Relating to the federal stimulus package.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

WHEREAS the economy of the United States is experiencing a recession that is causing significant loss of employment and income for many American families; and

WHEREAS significant financial hardship is also occurring in Alaska and is exacerbated by the current price of oil and the continuing high cost of other types of energy; and

WHEREAS the loss of income in the state has made it difficult for many families in the state to afford the necessities of life, including fuel, food, and health care; and

WHEREAS the federal government is considering a stimulus package to alleviate the dire consequences of the nation's economic downturn; and

WHEREAS the proposed federal stimulus package emphasizes the need for each state to boost its local economies through the initiation of a wide range of projects, including projects involving transportation facilities, school construction, health care services, and energy resources, and these projects will temporarily provide employment to workers to help them and their families weather the current economic hardships; and

With drawn: Consistent w/ amended AKD: job training

WHEREAS the Alaska State Legislature recognizes the need for the state to submit to the federal government a project package that provides a variety of assistance to families in all parts of the state;

BE IT RESOLVED that the Alaska State Legislature desires a comprehensive federal stimulus package that allocates to Alaska the state's fair share of funding so that the citizens of all regions of the state will benefit; and be it

FURTHER RESOLVED by the Alaska State Legislature that Alaska's participation in the federal stimulus package should recognize the breadth of the state's economy by stimulating a variety of the segments of the state's economy, including transportation, energy, education, health care, nutrition, the environment, information technology, and other areas.

COPIES of this resolution shall be sent to the Honorable Lisa Murkowski and the Honorable Mark Begich, U.S. Senators, and the Honorable Don Young, U.S. Representative, members of the Alaska delegation in Congress.

STATE OF ALASKA

Federal Economic Stimulus Package - Questions & Answers

1. What has Alaska requested in the federal economic stimulus package?
Alaska requested that the federal economic stimulus package use existing formula programs to allocate funding fairly to states. The attached letter dated January 7, 2009, from Governor Palin to Alaska's Congressional Delegation further describes Alaska's request.

Initially, four projects were submitted informally to staff in the Alaska congressional delegation offices in November 2008. The initial submission was made very early in the process when it was unclear what would be included in the legislation. The projects submitted were based on preliminary criteria that projects needed to be "bid-ready" and focused on projects with national significance, including development of the gas line and national security.

The specific projects submitted total $139.3 million as follows:

Dalton Highway Improvements	$75.0 million
Parks Highway Improvements	$34.0 million
Alaska Highway MP 1412-1422	$ 5.3 million
Central Regional Surface Repairs	$25.0 million

In her January 7, 2009, letter to the Congressional Delegation, the Governor also suggested consideration of infrastructure improvements to the Kodiak Launch Facility based on national security interests. A brief description of the projects is included at the end of this document.

2. What guidelines has Alaska received and from whom?
Alaska had not received any guidelines other than the statements by President-elect Obama and leadership in Congress from both Houses that there would not be any earmarks in the stimulus bill and that formulas would be used instead. Federal legislation was introduced on January 15, 2009. The administration is reviewing the legislation, will monitor developments and respond accordingly.

3. When is action on the federal economic stimulus package expected?
The latest news reports indicate that leadership in Congress would like to have the economic stimulus bill passed by mid-February, 2009.

4. What process did Alaska use, and who was involved, in determining the requests?
The process Alaska has used and will continue to use is to monitor developments as they occur and provide information accordingly. The Governor, her staff, and agency personnel are involved in reviewing the package and preparing additional comments or requests to the delegation as the federal legislation progresses and what is signed into law by the President.

5. What can communities do to submit projects for the economic stimulus package?
Development of the economic stimulus package continues to evolve at the federal level. Communities and organizations seeking funding for projects should submit their requests directly to Alaska's Congressional Delegation for consideration in the federal appropriation process. However, all indications from the President elect and Congressional leaders suggest there will <u>not</u> be any earmarks in the stimulus legislation.

Date: January 15, 2009

Brief Project Descriptions

Dalton Highway Improvements - $75.0 million
Improvements to the Dalton Highway are critical to construction of the natural gas pipeline and resource development on Alaska's North Slope. This project consists of rehabilitation, including widening, resurfacing, culvert replacement and other road enhancements. Grade raises, delineator installation, brush cutting, drainage repairs, repair of damaged bridges, and additional surfacing are also planned. These improvements will better accommodate oversize and overweight loads associated with gas line construction.

Parks Highway Improvements $34.0 Million
The existing roadway is two lanes with 4-foot shoulders, deteriorated pavement, has no passing lanes, and has underlying structural embankment deficiencies that require seasonal weight restrictions. This project will rehabilitate pavement, widen the shoulders to 8 feet (consistent with Alaska's standard for the National Highway System), reconstruct the problematic structural sections, and construct 7 miles of passing lanes. These improvements will better accommodate oversize, overweight loads and slow moving traffic associated with gas line construction.

Alaska Highway Milepost 1412 to 1422 - $5.3 million
This project will rehabilitate, improve drainage, re-level and resurface the Alaska Highway between MP 1412 and 1422 (Delta South). Substandard embankment conditions have been identified in this area causing significant pavement failures. This project will improve the Alaska Highway to accommodate increased truck traffic associated with gas line construction.

Central Region Surface Repairs - $25.0 Million
This project will provide funding for rut and pavement repairs on National Highway System (NHS) routes in Central Region. 67.25% of all the State's vehicle travel occurs in Central Region. Central Region has over 700 lane miles of badly rutted roads that would cost $350 million in today's dollars to repair. Repairs to these routes will facilitate the movement of people, goods and services associated with gas line construction.

Kodiak Launch Facility - $35.0 Million
Launch Pad 3 and Rocket Motor Storage Facility Construction
The Alaska Aerospace Development Corporation (AADC) Kodiak Launch Complex (KLC) is ideally situated to support rapid response launch programs that address increasing demands on the use of space-based capabilities to achieve national objectives. AADC was recently awarded two U.S. Air Force contracts for satellite launches that are demonstrators of the rapid response concept. To gain a sustained rapid response launch capability KLC requires an additional launch pad and rocket motor storage facility. With receipt of funding, construction will begin in the spring of 2009 and be completed and fully operational within 18-24 months.

Prepared by: Alaska Office of Management & Budget
Date: January 15, 2009

Summary of Medicaid / health insurance in House economic stimulus bill

The health care provisions in the House economic stimulus package would provide $87 billion in matching payments to state Medicaid programs, subsidize health insurance (COBRA) for the unemployed ($30.3 billion), fund Medicaid for the unemployed ($8.6 billion), and invest in health information technology ($20 billion).

Alaska would receive an estimated $246 million in additional Medicaid funds over FY2009-2011.

Medicaid

The package would increase the federal medical assistance percentage (FMAP) for all states by 4.9 percentage points, on top of a hold-harmless provision for states scheduled for a decrease in their FMAP. States with high unemployment rates would receive an additional increase directly related to their unemployment rate. The FMAP increase would last until Dec. 31, 2010.

The package also would give states the option to cover family planning services and supplies for low-income women who are ineligible for Medicaid. Under current law, states must apply for waivers in order to provide such benefits.

COBRA

The provision would provide a 65% federal subsidy for COBRA health insurance premiums for up to 12 months following a job loss. It also would allow employees who have held their job for 10 or more years to retain COBRA coverage at their own expense after the subsidy ends and until they qualify for Medicare.

In addition, the package would allow states to provide Medicaid coverage to certain groups of the unemployed who are uninsured, such as those receiving unemployment benefits, those receiving food stamps who are otherwise ineligible for Medicaid, or those in families with gross incomes less than 200% of the federal poverty level. The federal government would assume 100% of the benefit and administrative costs of the option.

Health information technology

The package would include $20 billion for HIT infrastructure, training and state grants, among other initiatives. Physicians would be eligible for $40,000 to $65,000 for demonstrating HIT use, and hospitals could qualify for funding of several million dollars through the Medicare and Medicaid programs.

Re: Economic Stimulus Legislation

Dear Members of the Alaska Congressional Delegation:

I am writing to communicate some additional thoughts concerning the economic stimulus package now under discussion in Congress.

This letter compliments our previous list of four infrastructure projects that would support construction of the Alaska natural gas pipeline. These bid-ready projects strongly reflect the goal of creating new jobs, both in construction and the operation of the pipeline, while also promoting sound national energy policy.

I strongly recommend that federal funds to states be allocated pursuant to formulas that are fair and equitable. As you know, formulas already exist in federal law for such programs as highways and bridges, aviation, and Medicaid. In those instances where there are no formulas–for example in the case of renewable energy projects and ports and harbors–formulas and grant programs could be devised and included in the economic stimulus package.

The use of formulas would help ensure fairness among the states and would avoid the unhealthy practices and results that often occur in the Congressional earmarking process. In this regard, it is my understanding that President-elect Obama and much of the Congressional Leadership, both Republicans and Democrats, support a formula approach.

For transportation projects, federal funds should be allocated to the Federal Highway Administration's Surface Transportation and National Highway System programs. Likewise, funding for aviation should be put into the discretionary category of the Federal Aviation Administration's Airport Improvement Program. In our opinion, the minimum guarantee provisions that protect rural and less populous states like Alaska should continue to be used in these formulas.

We also believe that there are timing and other considerations that should be addressed through these formula programs. For instance, new transportation projects may require an amendment of each state's statewide transportation improvement program (STIP). STIP amendments can take as long as 90 days under current requirements. In addition, the stimulus package should recognize that, in the case of Alaska and the northern tier states, transportation construction does not start until well into the spring.

We further recommend that any increase in Medicaid-related programs should, at a minimum, be equitable to all states, meaning each state's benefit under a formula should be proportionately the same as to other states.

In addition to the four gas pipeline-related projects described earlier, I want to mention one other project of national significance for your consideration. The Kodiak Launch Facility conducts activities that contribute greatly to our national defense and knowledge of missile ballistics.

It is my understanding that you have received funding requests from local governments, non-profits, and other entities throughout Alaska. In large part, these requests reflect local concerns. It is not appropriate for the state to comment on each project that has come to our attention. Instead, we would prefer to focus on the rationale for our own recommendations to you.

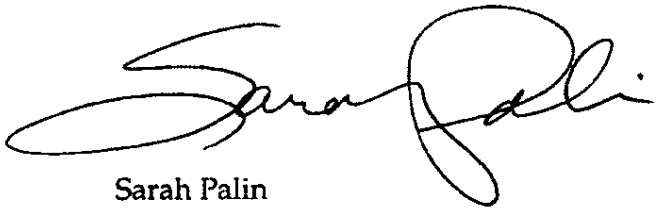
Although it is beyond my purview as Governor, I also urge you to consider how the economic stimulus package will affect the national debt and the future economic health of the country. The need for economic stimulus should not become an excuse for the continuation of the unsound policies of the past. The nation's economy will never achieve long-term stability if we continue borrowing hundreds of billions of dollars from foreign countries, all the while simultaneously sending huge amounts of money

overseas to OPEC countries for oil that could be produced domestically. In this regard, I am astounded by amounts of a trillion dollars and more that are currently being discussed in some quarters.

I believe our nation is truly at an economic crossroads. Properly constructed, the economic stimulus package will greatly assist in sending our country down the right road. Without question, you will be called upon to make very difficult decisions on behalf of Alaska and the nation, and I want to assure you of the cooperation of my administration in achieving the best possible result. Toward this end, I have asked my Washington, D.C. office to follow up with your respective staffs on our recommendations.

Thank you for considering my views.

Sincerely,



Sarah Palin
Governor

PRELIMINARY ANALYSIS OF MEDICAID ASSISTANCE FOR STATES IN THE HOUSE ECONOMIC RECOVERY PACKAGE

By Iris J. Lav, Edwin Park, Jason Levitis, and Matthew Broaddus

The economic recovery package under consideration by the House of Representatives includes an approximately $88 billion temporary increase in the share of the Medicaid program paid by the federal government over nine calendar quarters (October 1, 2008 through December 31, 2010). The states urgently need this type of assistance; states on their own are not able to provide critically needed health insurance under Medicaid as need swells in a recession and in its immediate aftermath.

- Medicaid rolls are soaring, as they have in previous recessions. As people lose their jobs and their incomes, they often also lose their health insurance and qualify for Medicaid. As employers try to cut costs, they drop health coverage. And people who are still working but with reduced hours or income and who lack health insurance may newly qualify for Medicaid. All of these factors drive up enrollment.

- State revenues are dropping. As unemployment rises and consumption declines, state income and sales taxes dwindle. States are projected to face deficits of $350 billion over the next 30 months.[1] Since almost all states have to balance their budgets, most cannot afford to maintain their existing Medicaid programs, and certainly cannot afford to accommodate a large influx of new enrollees resulting from the recession.

- The gap between the need for Medicaid and states' ability to meet that need is large. In a recent Kaiser Foundation report, the Urban Institute estimates that the gap over the next two and a half years between Medicaid costs and states' ability to meet those costs — considering both enrollment increases and revenue losses — would be approximately $100 billion if unemployment averages 9 percent.[2] However, that was calculated as the estimated sum of the "exact" amount each state would need to meet its Medicaid costs. Since it is not practically possible to craft legislation that would give each state exactly what it needs, total federal assistance would need to be significantly more than $100 billion to keep the program whole.

[1] McNichol and Lav, *State Budget Troubles Worsen*, January 14, 2009. http://www.cbpp.org/9-8-08sfp.htm

[2] Holahan and Garrett, *Rising Unemployment, Medicaid, and the Uninsured*, January, 2009. http://www.kff.org/uninsured/upload/7850.pdf

The House proposal would provide three elements of Medicaid fiscal relief assistance to states:

- First, all states would be "held harmless" for drops in the federal share of Medicaid — known as FMAP — that states would otherwise automatically experience this year (federal fiscal year 2009) and into federal fiscal year 2011. This is necessary to prevent states from losing federal funding as a result of much stronger economic conditions that may have prevailed in a state three years ago, since FMAP is calculated based on a state's per capita income and with a substantial lag.

- Second, all states would receive a "base"4.9 percentage point increase in the share of the Medicaid program the federal government pays. Thus in a state like New York in which the federal government usually pays 50 percent of the program, the base federal share for the period of assistance would equal 54.9 percent. In a state like Mississippi in which the federal government usually pays approximately 76 percent of the program, the base federal share for the period of assistance would be 80.9 percent.[3]

- Third, states that are experiencing particularly poor economic conditions, as indicated by a significant increase in unemployment, would receive additional assistance. Depending on the extent of the percentage point increase in the state's unemployment rate, a state could receive an 8 percent, 12 percent, or 14 percent reduction in the share of Medicaid that the state pays. (See technical note for further explanation of these provisions.)

This fiscal assistance for states would be effective for the period October 1, 2008, through December 31, 2010. The qualification of each state for a higher level of assistance because of unemployment rate increases would be evaluated each quarter, and states would receive the additional assistance if their economic situation worsens. While a state's additional assistance could be increased, no state's additional assistance would be reduced as a result of dropping unemployment before July 1, 2010.

To receive any increased FMAP, a state must not have Medicaid eligibility levels that are more restrictive than were in effect on July 1, 2008. Restrictions on eligibility include changes that make it more difficult for recipients to meet procedural requirements for enrollment or periodic renewal of their coverage. States that restrict eligibility would be allowed to reverse their actions and still qualify for an increased FMAP in the first calendar quarter they have restored their Medicaid eligibility.

The tables below show illustrative estimates of the amount of assistance each state would potentially receive, based on projections of future economic conditions. Of course, those projections are highly uncertain; the uncertainty is greater than usual because no one knows how successful efforts to stimulate the economy through this economic recovery legislation and other means will be. (The projections used here do incorporate some economic improvement as a result of the recovery legislation.) As a result of these uncertainties, readers should be aware that the amount of assistance any state would receive under this legislation could differ substantially from the estimates shown here.

---

[3] The higher FMAP increase would apply to the costs of Medicaid benefits and Title IV-E foster care and adoption assistance, but not to CHIP and other Title IV programs that have federal matching rates based on the FMAP.

TABLE 2: FEDERAL FUNDING FOR STATE MEDICAID COSTS UNDER THE HOUSE STIMLUS BILL, BY STATE FISCAL YEAR (in $ thousands)				
STATE	**SFY09**	**SFY10**	**SFY11**	**TOTAL**
Alabama (a)	$304,121	$378,779	$100,365	$783,265
Alaska	$58,612	$120,176	$67,534	$246,321
Arizona	$574,437	$851,879	$453,475	$1,879,792
Arkansas	$135,625	$304,248	$174,989	$614,862
California	$3,612,818	$4,911,064	$2,545,330	$11,069,212
Colorado	$227,926	$413,516	$214,193	$855,635
Connecticut	$331,769	$569,075	$306,343	$1,207,187
Delaware	$79,417	$151,013	$83,715	$314,145
District of Columbia (a)	$114,100	$137,174	$36,960	$288,235
Florida	$1,397,307	$1,883,953	$973,819	$4,255,079
Georgia	$495,803	$750,027	$391,598	$1,637,428
Hawaii	$94,592	$160,729	$84,860	$340,182
Idaho	$81,105	$127,836	$67,918	$276,859
Illinois	$881,106	$1,311,197	$686,745	$2,879,048
Indiana	$323,329	$578,157	$300,123	$1,201,609
Iowa	$108,062	$219,255	$114,213	$441,529
Kansas	$83,746	$192,180	$112,597	$388,522
Kentucky	$250,803	$438,715	$232,633	$922,150
Louisiana	$339,286	$774,318	$438,514	$1,552,118
Maine	$116,056	$209,458	$108,901	$434,414
Maryland	$371,181	$664,190	$371,118	$1,406,488
Massachusetts	$554,879	$1,361,344	$720,329	$2,636,552
Michigan (a)	$964,393	$1,002,009	$262,860	$2,229,262
Minnesota	$490,780	$919,917	$481,477	$1,892,174
Mississippi	$164,959	$347,217	$185,294	$697,470
Missouri	$402,175	$713,927	$378,536	$1,494,639
Montana	$44,706	$84,344	$45,029	$174,078
Nebraska	$59,193	$121,558	$63,032	$243,783
Nevada	$140,589	$197,135	$103,187	$440,910
New Hampshire	$49,659	$113,188	$68,816	$231,664
New Jersey	$554,530	$1,029,288	$551,329	$2,135,147
New Mexico	$133,951	$250,001	$144,534	$528,486
New York (b)	$1,940,569	$5,848,185	$4,663,241	$12,451,995
North Carolina	$702,147	$1,028,683	$536,209	$2,267,040
North Dakota (c)	$22,981	$43,131	$24,357	$90,469
Ohio	$780,600	$1,341,859	$704,414	$2,826,874
Oklahoma	$191,907	$429,750	$238,373	$860,029
Oregon (c)	$249,599	$364,575	$188,397	$802,571
Pennsylvania	$1,062,155	$1,902,492	$1,010,246	$3,974,892
Rhode Island	$148,809	$201,224	$104,096	$454,129
South Carolina	$211,876	$342,265	$178,337	$732,477
South Dakota	$24,463	$47,654	$24,544	$96,661
Tennessee	$408,664	$707,616	$364,259	$1,480,539
Texas (d)	$1,491,757	$2,658,083	$965,358	$5,115,199
Utah	$76,326	$138,968	$78,163	$293,457
Vermont	$61,955	$124,180	$68,012	$254,147
Virginia	$339,795	$705,969	$377,455	$1,423,220
Washington (c)	$504,133	$960,921	$520,531	$1,985,585
West Virginia	$95,649	$182,762	$103,888	$382,299
Wisconsin	$241,882	$538,209	$313,342	$1,093,433
Wyoming (c)	$18,479	$51,996	$31,802	$102,277

Note: Unless otherwise indicated, states operate on July-to-June fiscal years. Fiscal years are referred to by the year in which they end. Thus, in most states, FY2010 covers July 1, 2009 through June 30, 2010. (a) The fiscal years of Alabama, the District of Columbia, and Michigan end September 30. (b) New York's fiscal year ends March 31. (c) North Dakota, Oregon, Washington, and Wyoming operate on biennial budgets ending in June. For those states, aid estimates are for half a budget cycle. (d) Texas's fiscal year ends August 31.

DETAILED TECHNICAL EXPLANATION OF THE HOUSE FMAP PROVISION

Under Section 5001 of the House economic recovery package, states would receive a temporary increase in the federal Medicaid matching rate (known as the "FMAP") for the period October 1, 2008 through December 31, 2010.

The FMAP increase primarily consists of three components:

1. "Hold Harmless": A state whose FMAP rate in fiscal year 2009 is scheduled to be lower than the FMAP in FY 2008 would be able to remain at the higher FY 2008 rate for 2009. States whose fiscal year 2010 rate would otherwise be lower than its fiscal year 2009 and/or fiscal year 2008 rate would be able to remain at the prior year rate, whichever is highest. Finally, states whose fiscal year 2011 rate would otherwise be lower than its fiscal year 2008, fiscal year 2009 and/or fiscal year 2010 rates would be able to remain at the highest rate for those three fiscal years during the first quarter of fiscal year 2011.

   Example: State X has a 60 percent FMAP in fiscal year 2008 and is scheduled to have its FMAP in fiscal year 2009 reduced to 59.5 percent. Under the hold harmless provision, the state's FMAP would remain at 60 percent in fiscal year 2009. If the FMAP for State X for fiscal years 2010 and 2011 is otherwise scheduled to be less than 60 percent, the state would have a 60 percent FMAP for 2010 and the first quarter of 2011 as well.

2. Base Increase: Each state's FMAP, after application of the hold harmless provision, would be further increased by 4.9 percentage points.

   Example: After application of the hold harmless provision, State X's FMAP would be increased from 60 percent in to 64.9 percent for fiscal years 2009 and 2010 and the first quarter of fiscal year 2011.

3. Additional Increase for States with Unemployment Rate Increases: A state qualifying as a "high unemployment" state would be eligible for an additional increase of their FMAP, after application of the hold harmless provision and the base increase. A state qualifies as a high unemployment state if its average unemployment rate for the most recent three month period for which unemployment data is available exceeds by at least 1.5 percentage points the lowest average monthly unemployment rate for any three-month period after January 1, 2006 (the base period).[4] The additional FMAP increase a high unemployment rate state receives is determined by the number of percentage points by which the unemployment rate exceeds the lowest rate in that state, measured as described above:

   - If the state's unemployment rate exceeds the lowest rate by 1.5 to 2.5 percentage points, the state's FMAP would be increased by the number of percentage points equal to the amount necessary to reduce the state's share of the cost of Medicaid by 6 percent. This calculation is made after application of the hold harmless provision but *before* application of the base increase.

[4] Under the House provision, first two quarters of assistance would be based the increase in the unemployment rate between the base period and the fourth quarter of calendar year 2008.

- If the state's rate exceeds the lowest rate by 2.5 to 3.5 percentage points, the state's FMAP would be increased to reduce the share of the cost of Medicaid by 12 percent.

- If the state's share exceeds the lowest rate by at least 3.5 percentage points, the state's FMAP would be increased to reduce the share of the cost of Medicaid by 14 percent.

If a state during any quarter becomes a high unemployment state, or if a high unemployment state experiences an unemployment rate increase that qualifies the state for even greater assistance, the state would become eligible for the larger FMAP increase in the next calendar quarter. No state would have its additional assistance reduced from the levels provided in the previous calendar quarter based on changes to its unemployment rate at least through July 1, 2010.

Example: State X has already experienced a 2.6 percentage point increase in its unemployment rate based on the most recent data compared to its lowest unemployment rate since January 1, 2006. After application of the hold harmless provision, State X's FMAP is 60 percent. This means that the state's share of thee cost prior to application of the base increase equals 40 percent. This share of the cost would be reduced by 12 percent, or 4.8 percentage points, because the state qualifies for the second level of additional assistance. State X's FMAP would thus be further increased by 4.8 percentage points, which translates into a FMAP of 69.7 percent. If State X subsequently sees its unemployment rate increase exceed 3.5 percentage points, it will qualify for the highest level of additional assistance in the next calendar quarter. Its share of the cost would then be reduced by 14 percent, or 5.6 percentage points. State X's FMAP would then be 70.5 at least through July 1, 2010.

The FMAP increase would generally apply to all Medicaid costs. (As of this writing, it is still unclear whether Disproportionate Share Hospital (DSH) payments made to hospitals that serve low-income patients and Medicaid beneficiaries are included. The tables do not apply the FMAP increases to DSH payments.) The increase would not apply to non-Medicaid program costs like SCHIP whose matching rates are based on the FMAP, with the exception of title IV-E costs. (Only the increase in the matching rate due to the hold harmless provision and the base increase, however, would apply to title IV-E.)

The territories — Puerto Rico, American Samoa, Guam, the Northern Marianas Islands, and the Virgin Islands — would generally receive a temporary increase in their federal funding cap. While the FMAP for each of the territories is set at 50 percent and total federal funding for each of the territories is capped. The cap would be increased by 20 percent for the period October 1, 2008 through December 31, 2010. (A territory, however, may elect instead to have its cap increased 10 percent and its FMAP increased 4.9 percentage points to 54.9 percent.)

States would generally only be eligible for the FMAP increase if they ensure that their Medicaid eligibility criteria and enrollment/renewal procedures are no more restrictive than those in place on July 1, 2009. States that restrict their eligibility during the duration of the FMAP become eligible again for the FMAP increase in the first calendar quarter in which they reinstate their eligibility to July 1, 2008 levels. States who have restricted eligibility after July 1, 2008 but before enactment of this provision would be eligible for the FMAP increase starting with the first calendar quarter of fiscal year 2009 if they reinstate their eligibility no later than July 1, 2009.

States that require local governments to finance a portion of the state's share of the cost of Medicaid would be prohibited from raising the effective proportion paid by local governments compared to the levels prior to any temporary FMAP increase. In addition, states would not be permitted to deposit any federal funds provided through the temporary FMAP increase into their rainy day funds.

COMMITTEE ON APPROPRIATIONS

DAVE OBEY (D-WI), CHAIRMAN

For Immediate Release
Thursday, January 21, 2009
Contact: Kirstin Brost, 202-225-2771

SUMMARY: AMERICAN RECOVERY AND REINVESTMENT
AS PASSED BY THE FULL COMMITTEE

The economy is in a crisis not seen since the Great Depression.

Credit is frozen, consumer purchasing power is in decline, in the last four months the country has lost 2 million jobs and we are expected to lose another 3 to 5 million in the next year.

Conservative economist Mark Zandi was blunt: "the economy is shutting down."

In the next two weeks, the Congress will be considering the American Recovery and Reinvestment Bill of 2009. This package is the first crucial step in a concerted effort to create and save 3 to 4 million jobs, jumpstart our economy, and begin the process of transforming it for the 21st century with $275 billion in economic recovery tax cuts and $550 billion in thoughtful and carefully targeted priority investments with unprecedented accountability measures built in.

The package contains targeted efforts in:

- Clean, Efficient, American Energy
- Transforming our Economy with Science and Technology
- Modernizing Roads, Bridges, Transit and Waterways
- Education for the 21st Century
- Tax Cuts to Make Work Pay and Create Jobs
- Lowering Healthcare Costs
- Helping Workers Hurt by the Economy
- Saving Public Sector Jobs and Protect Vital Services

The economy is in such trouble that, even with passage of this package, unemployment rates are expected to rise to between eight and nine percent this year. Without this package, we are warned that unemployment could explode to near twelve percent. With passage of this package, we will face a large deficit for years to come. Without it, those deficits will be devastating and we face the risk of economic chaos. Tough choices have been made in this legislation and fiscal discipline will demand more tough choices in years to come.

Since 2001, as worker productivity went up, 96% of the income growth in this country went to the wealthiest 10% of society. While they were benefitting from record high worker productivity, the remaining 90% of Americans were struggling to sustain their standard of living. They sustained it by borrowing... and borrowing... and borrowing, and when they couldn't borrow anymore, the bottom fell out. This plan will strengthen the middle class, not just Wall Street CEOs and special interests in Washington.

Our short term task is to try to prevent the loss of millions of jobs and get our economy moving. The long term task is to make the needed investments that restore the ability of average middle income families to increase their income and build a decent future for their children.

EXECUTIVE SUMMARY

Unprecedented Accountability: A historic level of transparency, oversight and accountability will help guarantee taxpayer dollars are spent wisely and Americans can see results for their investment.

- In many instances funds are distributed through existing formulas to programs with proven track records and accountability measures already in place.
- How funds are spent, all announcements of contract and grant competitions and awards, and formula grant allocations must be posted on a special website created by the President. Program managers will also be listed so the public knows who to hold accountable.
- Public notification of funding must include a description of the investment funded, the purpose, the total cost and why the activity should be funded with recovery dollars. Governors, mayors or others making funding decisions must personally certify that the investment has been fully vetted and is an appropriate use of taxpayer dollars. This will also be placed on the recovery website.
- A Recovery Act Accountability and Transparency Board will be created to review management of recovery dollars and provide early warning of problems. The seven member board includes Inspectors General and Deputy Cabinet secretaries.
- The Government Accountability Office and the Inspectors General are provided additional funding and access for special review of recovery funding.
- State and local whistleblowers who report fraud and abuse are protected.
- There are no earmarks in this package.

This plan targets investments to key areas that will create and preserve good jobs at the same time as it is strengthening the ability of this economy to become more efficient and produce more opportunities for employment.

Clean, Efficient, American Energy: To put people back to work today and reduce our dependence on foreign oil tomorrow, we will strengthen efforts directed at doubling renewable energy production and renovate public buildings to make them more energy efficient.

- $32 billion to transform the nation's energy transmission, distribution, and production systems by allowing for a smarter and better grid and focusing investment in renewable technology.
- $16 billion to repair public housing and make key energy efficiency retrofits.
- $6 billion to weatherize modest-income homes.

Transform our Economy with Science and Technology: We need to put scientists to work looking for the next great discovery, creating jobs in cutting-edge-technologies, and making smart investments that will help businesses in every community succeed in a global economy. For every dollar invested in broadband the economy sees a ten-fold return on that investment.

- $10 billion for science facilities, research, and instrumentation.
- $6 billion to expand broadband internet access so businesses in rural and other underserved areas can link up to the global economy.

Modernize Roads, Bridges, Transit and Waterways: To build a 21st century economy, we must engage contractors across the nation to create jobs rebuilding our crumbling roads, and bridges, modernize public buildings, and put people to work cleaning our air, water and land.

- $30 billion for highway construction;
- $31 billion to modernize federal and other public infrastructure with investments that lead to long term energy cost savings;
- $19 billion for clean water, flood control, and environmental restoration investments;
- $10 billion for transit and rail to reduce traffic congestion and gas consumption.

Education for the 21st Century: To enable more children to learn in 21st century classrooms, labs, and libraries to help our kids compete with any worker in the world, this package provides:

- $41 billion to local school districts through Title I ($13 billion), IDEA ($13 billion), a new School Modernization and Repair Program ($14 billion), and the Education Technology program ($1 billion).
- $79 billion in state fiscal relief to prevent cutbacks to key services, including $39 billion to local school districts and public colleges and universities distributed through existing state and federal formulas, $15 billion to states as bonus grants as a reward for meeting key performance measures, and $25 billion to states for other high priority needs such as public safety and other critical services, which may include education.
- $15.6 billion to increase the Pell grant by $500.
- $6 billion for higher education modernization.

Tax Cuts to Make Work Pay and Create Jobs: We will provide direct tax relief to 95 percent of American workers, and spur investment and job growth for American Businesses. [marked up by the Ways and Means Committee]

Lower Healthcare Costs: To save not only jobs, but money and lives, we will update and computerize our healthcare system to cut red tape, prevent medical mistakes, and help reduce healthcare costs by billions of dollars each year.

- $20 billion for health information technology to prevent medical mistakes, provide better care to patients and introduce cost-saving efficiencies.
- $4.1 billion to provide for preventative care and to evaluate the most effective healthcare treatments.

Help Workers Hurt by the Economy: High unemployment and rising costs have outpaced Americans' paychecks. We will help workers train and find jobs, and help struggling families make ends meet.

- $43 billion for increased unemployment benefits and job training.
- $39 billion to support those who lose their jobs by helping them to pay the cost of keeping their employer provided healthcare under COBRA and providing short-term options to be covered by Medicaid.
- $20 billion to increase the food stamp benefit by over 13% in order to help defray rising food costs.

Save Public Sector Jobs and Protect Vital Services: We will provide relief to states, so they can continue to employ teachers, firefighters and police officers and provide vital services without having to unnecessarily raise middle class taxes.

- $87 billion for a temporary increase in the Medicaid matching rate.
- $4 billion for state and local law enforcement funding.

CREATE JOBS WITH CLEAN, EFFICIENT, AMERICAN ENERGY

To put people back to work today and reduce our dependence on foreign oil tomorrow, we will make investments aimed at doubling renewable energy production and renovate public buildings to make them more energy efficient.

- **Reliable, Efficient Electricity Grid:** $11 billion for research and development, pilot projects, and federal matching funds for the Smart Grid Investment Program to modernize the electricity grid making it more efficient, secure, and reliable and build new power lines to transmit clean, renewable energy from sources throughout the nation.
- **Renewable Energy Loan Guarantees:** $8 billion for loans for renewable energy power generation and transmission projects.
- **GSA Federal Buildings:** $6.7 billion for renovations and repairs to federal buildings including at least $6 billion focused on increasing energy efficiency and conservation. Projects are selected based on GSA's ready-to-go priority list.
- **Local Government Energy Efficiency Block Grants:** $6.9 billion to help state and local governments make investments that make them more energy efficient and reduce carbon emissions.
- **Energy Efficiency Housing Retrofits:** $2.5 billion for a new program to upgrade HUD sponsored low-income housing to increase energy efficiency, including new insulation, windows, and furnaces. Funds will be competitively awarded.
- **Energy Efficiency and Renewable Energy Research:** $2 billion for energy efficiency and renewable energy research, development, demonstration, and deployment activities to foster energy independence, reduce carbon emissions, and cut utility bills. Funds are awarded on a competitive basis to universities, companies, and national laboratories.
- **Advanced Battery Loans and Grants:** $2 billion for the Advanced Battery Loan Guarantee and Grants Program, to support U.S. manufacturers of advanced vehicle batteries and battery systems. America should lead the world in transforming the way automobiles are powered.
- **Department of Defense Efficiency:** $1.8 billion for efforts to make our military bases more energy efficient, beyond benefits that will come from replacing and repairing facilities.
- **Energy Efficiency Grants and Loans for Institutions:** $1.5 billion for energy sustainability and efficiency grants and loans to help school districts, institutes of higher education, local governments, and municipal utilities implement projects that will make them more energy efficient.
- **Home Weatherization:** $6.2 billion to help low-income families reduce their energy costs by weatherizing their homes and make our country more energy efficient.
- **Smart Appliances:** $300 million to provide consumers with rebates for buying energy efficient Energy Star products to replace old appliances, which will lower energy bills.
- **GSA Federal Fleet:** $600 million to replace older vehicles owned by the federal government with alternative fuel automobiles that will save on fuel costs and reduce carbon emissions.
- **Electric Transportation:** $200 million for a new grant program to encourage electric vehicle technologies.
- **Cleaning Fossil Energy:** $2.4 billion for carbon capture and sequestration technology demonstration projects. This funding will provide valuable information necessary to reduce the amount of carbon dioxide emitted into the atmosphere from industrial facilities and fossil fuel power plants.
- **Department of Defense Research:** $350 million for research into using renewable energy to power weapons systems and military bases.
- **Alternative Buses and Trucks:** $400 million to help state and local governments purchase efficient alternative fuel vehicles to reduce fuel costs and carbon emissions.
- **Industrial Energy Efficiency:** $500 million for energy efficient manufacturing demonstration projects.
- **Diesel Emissions Reduction:** $300 million for grants and loans to state and local governments for projects that reduce diesel emissions, benefiting public health and reducing global warming. This includes technologies to retrofit emission exhaust systems on school buses, replace engines and vehicles, and establish anti-idling programs. 70% of the funds go to competitive grants and 30% funds grants to states with approved programs. Last year EPA was able to fund only 27% of the applications received.

TRANSFORMING OUR ECONOMY WITH SCIENCE AND TECHNOLOGY

We need to put scientists to work looking for the next great discovery, create jobs in cutting-edge technologies and making smart investments that will help businesses in every community succeed in a global economy.

Broadband to Give Every Community Access to the Global Economy

- **Wireless and Broadband Grants:** $6 billion for broadband and wireless services in underserved areas to strengthen the economy and provide business and job opportunities in every section of America with benefits to e-commerce, education, and healthcare. For every dollar invested in broadband the economy sees a ten-fold return on that investment.

Scientific Research

- **National Science Foundation:** $3 billion, including $2 billion for expanding employment opportunities in fundamental science and engineering to meet environmental challenges and to improve global economic competitiveness, $400 million to build major research facilities that perform cutting edge science, $300 million for major research equipment shared by institutions of higher education and other scientists, $200 million to repair and modernize science and engineering research facilities at the nation's institutions of higher education and other science labs, and $100 million is also included to improve instruction in science, math and engineering.
- **National Institutes of Health Biomedical Research:** $2 billion, including $1.5 billion for expanding good jobs in biomedical research to study diseases such as Alzheimer's, Parkinson's, cancer, and heart disease - NIH is currently able to fund less than 20% of approved applications – and $500 million to implement the repair and improvement strategic plan developed by the NIH for its campuses.
- **University Research Facilities:** $1.5 billion for NIH to renovate university research facilities and help them compete for biomedical research grants. The National Science Foundation estimates a maintenance backlog of $3.9 billion in biological science research space. Funds are awarded competitively.
- **Centers for Disease Control and Prevention**: $462 million to enable CDC to complete its Buildings and Facilities Master Plan, as well as renovations and construction needs of the National Institute for Occupational Safety and Health.
- **Department of Energy:** $2 billion for basic research into the physical sciences including high-energy physics, nuclear physics, and fusion energy sciences and improvements to DOE laboratories and scientific facilities. $400 million is for the Advanced Research Project Agency – Energy to support high-risk, high-payoff research into energy sources and energy efficiency.
- **NASA:** $600 million, including $400 million to put more scientists to work doing climate change research, including Earth science research recommended by the National Academies, satellite sensors that measure solar radiation critical to understanding climate change, and a thermal infrared sensor to the Landsat Continuing Mapper necessary for water management, particularly in the western states; $150 million for research, development, and demonstration to improve aviation safety and Next Generation air traffic control (NextGen); and $50 million to repair NASA centers damaged by hurricanes and floods last year.
- **Biomedical Advanced Research and Development, Pandemic Flu, and Cyber Security:** $900 million to prepare for a pandemic influenza, support advanced development of medical countermeasures for chemical, biological, radiological, and nuclear threats, and for cyber security protections at HHS.
- **National Oceanic and Atmospheric Administration Satellites and Sensors:** $600 million for satellite development and acquisitions, including climate sensors and climate modeling.
- **National Institute of Standards and Technology:** $300 million for competitive construction grants for research science buildings at colleges, universities, and other research organizations and $100 million to coordinate research efforts of laboratories and national research facilities by setting interoperability standards for manufacturing.
- **Agricultural Research Service:** $209 million for agricultural research facilities across the country. ARS has a list of deferred maintenance work at facilities of roughly $315 million.

- **U.S. Geological Survey:** $200 million to repair and modernize U.S.G.S. science facilities and equipment, including improvements to laboratories, earthquake monitoring systems, and computing capacity.

Creating Small Business Opportunity

- **Small Business Credit:** $430 million for new lending assistance and loan guarantee authorities to make loans more attractive to lenders and free up capital. The number of loans guaranteed under the SBA's 7(a) business loan program was down 57% in the first quarter of this year compared to last.
- **Rural Business-Cooperative Service:** $100 million for rural business grants and loans to guarantee $2 billion in loans for rural businesses at a time of unprecedented demand due to the credit crunch. Private sector lenders are increasingly turning to this program to help businesses get access to capital.
- **Industrial Technology Services:** $100 million, including $70 million for the Technology Innovation Program to accelerate research in potentially revolutionary technologies with high job growth potential, and $30 million for the Manufacturing Extension Partnerships to help small and mid-size manufacturers compete globally by providing them with access to technology.
- **Economic Development Assistance**: $250 million to address long-term economic distress in urban industrial cores and rural areas distributed based on need and ability to create jobs and attract private investment. EDA leverages $10 in private investments for $1 in federal funds.

DTV Conversion Coupons: $650 million to continue the coupon program to enable American households to convert from analog television transmission to digital transmission.

MODERNIZE ROADS, BRIDGES, TRANSIT AND WATERWAYS

To build a 21st century economy, we must engage contractors across the nation to create jobs - rebuilding our crumbling roads and bridges, modernizing public buildings, and putting people to work cleaning our air, water, and land.

Highway Infrastructure: $30 billion for highway and bridge construction projects. It is estimated that states have over 5,100 projects totaling over $64 billion that could be awarded within 180 days. These projects create jobs in the short term while saving commuters time and money in the long term. In 2006, the Department of Transportation estimated $8.5 billion was needed to maintain current systems and $61.4 billion was needed to improve highways and bridges.

Transit: Public transportation saves Americans time and money, saving as much as 4.2 billion gallons of gasoline and reducing carbon emissions by 37 million metric tons each year.

- **New Construction:** $1 billion for Capital Investment Grants for new commuter rail or other light rail systems to increase public use of mass transit and to speed projects already in construction. The Federal Transit Administration has $2.4 billion in pre-approved projects.
- **Upgrades and Repair:** $2 billion to modernize existing transit systems, including renovations to stations, security systems, computers, equipment, structures, signals, and communications. Funds will be distributed through the existing formula. The repair backlog is nearly $50 billion.
- **Transit Capital Assistance:** $6 billion to purchase buses and equipment needed to increase public transportation and improve intermodal and transit facilities. The Department of Transportation estimates a $3.2 billion maintenance backlog and $9.2 billion in needed improvements. The American Public Transportation Association identified 787 ready-to-go transit projects totaling $15.5 billion. Funds will be distributed through the existing formulas.

Amtrak and Intercity Passenger Rail Construction Grants: $1.1 billion to improve the speed and capacity of intercity passenger rail service. The Department of Transportation's Inspector General estimates the North East Corridor alone has a backlog of over $10 billion.

Airport Improvement Grants: $3 billion for airport improvement projects that will improve safety and reduce congestion. An estimated $41 billion in eligible airport infrastructure projects are needed between 2007-2011.

Transportation Security Administration Explosive Detection Systems: $500 million to install Aviation Explosive Detection Systems in the nation's airports, improving security, and making life easier on travelers by speeding security lines. Funds are competitively awarded based on security risk.

Coast Guard Bridges: $150 million for ready-to-go investments to repair or remove bridges deemed hazardous to marine navigation, thereby removing obstructions and improving the safety of marine navigation.

Technology Improvements for a More Efficient and Secure Government

- **Social Security Administration Modernization:** $400 million to replace the 30 year old Social Security Administration's National Computer Center to meet growing needs for processing retirement and disability claims and records storage.
- **Farm Service Agency:** $245 million for critical IT improvements to systems that have been unable to handle workload increases.
- **State Department Technology:** $276 million to upgrade and modernize information technology platforms for the Department to meet security requirements post-9/11.
- **Department of Agriculture:** $44 million for repairs and security improvements at USDA's headquarters.

Department of Defense Facilities

- **Medical Facilities:** $3.75 billion for new construction of hospitals and ambulatory surgical centers, and $455 million in renovations to provide state-of-the-art medical care to service members and their families.
- **Facilities Renovations:** $2.1 billion to address needed repairs to military facilities.
- **Troop Housing:** $1.2 billion for new construction and $154 million for renovations to improve housing for our troops.
- **Child Development Center:** $360 million for new child development centers.
- **Guard and Reserve:** $400 million for new construction to support Guard and Reserve units across the country with operations and training facilities and utilities infrastructure.

Veterans Administration Facilities

- **Veterans Medical Facilities:** $950 million for veterans' medical facilities. The Department has identified a $5 billion backlog in needed repairs, including energy efficiency projects, at its 153 medical facilities.
- **Veterans Cemeteries:** $50 million to put people to work making monument and memorial repairs at cemeteries for American heroes.

Border Ports of Entry: $1.15 billion to construct GSA and Customs and Border Protection land ports of entry to improve border security, make trade and travel easier and reduce wait times, and to procure non-intrusive inspection technology at sea ports of entry, which is used to scan cargo containers to reduce the risk that containers can be used to smuggle weapons of mass destruction.

Job Corps Facilities: $300 million to upgrade job training facilities serving at-risk youth while improving energy efficiency.

Construction on Public Lands and Parks: $3.1 billion for infrastructure projects on federal lands including improvements to visitor facilities, road and trail restoration, preservation of buildings of cultural and historic importance, rehabilitation of abandoned mines and oil fields, and environmental cleanup projects. This includes $1.8 billion for the National Park Service, $325 million for the Bureau of Land Management, $300 million for the National Wildlife Refuges and National Fish Hatcheries, and $650 million for the Forest Service.

National Treasures: $400 million, including $200 million to address the deterioration of the National Mall, such as repair of the Jefferson Memorial's collapsing Tidal Basin walls; $150 million to address the repair backlog at the Smithsonian; and $50 million for the National Endowment for the Arts.

Clean Water

- **Clean Water State Revolving Fund:** $6 billion for loans to help communities upgrade wastewater treatment systems. EPA estimates a $388 billion funding gap. The Association of State and Interstate Water Pollution Control Administrators found that 26 states have $10 billion in approved water projects.
- **Drinking Water State Revolving Fund:** $2 billion for loans for drinking water infrastructure. EPA estimates there is a $274 billion funding gap. The National Governors Association reported that there are $6 billion in ready-to-go projects, which could quickly be obligated.
- **Rural Water and Waste Disposal:** $1.5 billion to support $3.8 billion in grants and loans to help communities fund drinking water and wastewater treatment systems. In 2008, there were $2.4 billion in requests for water and waste loans and $990 million for water and waste grants went unfunded.

Water Resources

- **Corps of Engineers:** $4.5 billion for environmental restoration, flood protection, hydropower, and navigation infrastructure critical to the economy. The Corps has a construction backlog of $61 billion.
- **Bureau of Reclamation:** $500 million to provide clean, reliable drinking water to rural areas and to ensure adequate water supply to western localities impacted by drought. The Bureau has backlogs of more than $1 billion in rural water projects and water reuse and recycling projects.
- **Watershed Infrastructure:** $400 million for the Natural Resources Conservation Service watershed improvement programs to design and build flood protection and water quality projects, repair aging dams, and purchase and restore conservation easements in river flood zones.
- **International Boundary and Water Commission:** $224 million to repair flood control systems along the international segment of the Rio Grande damaged by hurricane Katrina and other serious storms.

Environmental Cleanup

- **Superfund Hazardous Waste Cleanup:** $800 million to clean up hazardous and toxic waste sites that threaten health and the environment. EPA has 1,255 sites on its National Priority List, selected based on a hazard ranking system. There are many Superfund sites ready for construction, but not funded due to budget shortfalls and over 600 sites with ongoing construction that could be accelerated.
- **Leaking Underground Storage Tanks:** $200 million for enforcement and cleanup of petroleum leaks from underground storage tanks at approximately 1,600 additional sites. There are an estimated 116,000 sites with the potential to contaminate important water supplies.
- **Nuclear Waste Cleanup:** $500 million for nuclear waste cleanup at sites contaminated as a result of the nation's past nuclear activities. Accelerating the completion of projects will reduce long-term costs.
- **Closed Military Bases:** $300 million for cleanup activities at closed military installations allowing local communities to redevelop these properties for productive use. The Department estimates that there is a $3.5 billion environmental cleanup backlog at bases closed during previous BRAC rounds.
- **NOAA Habitat Restoration:** $400 million for ready-to-go habitat restoration projects.
- **Brownfields:** $100 million for competitive grants for evaluation and cleanup of former industrial and commercial sites - turning them from problem properties to productive community use. Last year EPA was only able to fund 37% of Brownfields applications.

Reducing Wildfires Threats: $850 million for hazardous fuels removal and other efforts to prevent wildfires on public lands. Making these investments today will create jobs in the short run, but also save long term costs of fighting fires in the future.

- **State and Private Forest Service Wildfire:** $550 million for state and local volunteer programs and hazardous fuels reduction efforts which states and communities have determined are of the highest priority.
- **Federal Forest Service Wildfire:** $300 million for urgently needed hazard reduction on federal lands.

Bureau of Indian Affairs: $500 million to address maintenance backlogs at schools, dams, detention and law enforcement facilities, and over 24,000 miles of roads. BIA schools alone have an over $1 billion construction and maintenance backlog including shamefully unsafe conditions.

EDUCATION FOR THE 21st CENTURY

We will put people to work building 21st century classrooms, labs, and libraries to help our kids compete with any worker in the world.

21st Century Classrooms

- **School Construction:** $20 billion, including $14 billion for K-12 and $6 billion for higher education, for renovation and modernization, including technology upgrades and energy efficiency improvements. Also includes $100 million for school construction in communities that lack a local property tax base because they contain non-taxable federal lands such as military bases or Indian reservations, and $25 million to help charter schools build, obtain, and repair schools.
- **Education Technology:** $1 billion for 21st century classrooms, including computer and science labs and teacher technology training.

Higher Education: Tuition is up, unemployment is up, and as a result more people are choosing to go to school to upgrade their skills and more of these students need student aid. This investment addresses those short term needs while investing in our nation's future economic strength.

- **Pell Grants:** $15.6 billion to increase the maximum Pell Grant by $500, from $4,850 to $5,350.
- **College Work-Study:** $490 million to support undergraduate and graduate students who work.
- **Student Loan Limit Increase:** Increases limits on unsubsidized Stafford loans by $2,000.
- **Student Aid Administration:** $50 million to help the Department of Education administer surging student aid programs while navigating the changing student loan environment.

K-12 Education: As states begin tackling a projected $350 billion in budget shortfalls these investments will prevent cuts to critical education programs and services.

- **IDEA Special Education:** $13 billion for formula grants to increase the federal share of special education costs and prevent these mandatory costs from forcing states to cut other areas of education.
- **Title I Help for Disadvantaged Kids:** $13 billion for grants to help disadvantaged kids in nearly every school district and more than half of all public schools reach high academic standards.
- **Statewide Data Systems:** $250 million for competitive grants to states to design and develop data systems that analyze individual student data to find ways to improve student achievement, providing teachers and administrators with effective tools.
- **Education for Homeless Children and Youth:** $66 million for formula grants to states to provide services to homeless children including meals and transportation when high unemployment and home foreclosures have created an influx of homeless kids.
- **Improving Teacher Quality:** $300 million, including $200 million for competitive grants to school districts and states to provide financial incentives for teachers and principals who raise student achievement and close the achievement gaps in high-need schools and $100 million for competitive grants to states to address teacher shortages and modernize the teaching workforce.

Early Childhood Development

- **Child Care Development Block Grant:** $2 billion to provide child care services for an additional 300,000 children in low-income families while their parents go to work. Today only one out of seven eligible children receives care.

- **Head Start:** $2.1 billion to provide comprehensive development services to help 110,000 additional children succeed in school. Funds are distributed based on need. Only about half of all eligible preschoolers and less than 3 percent of eligible infants and toddlers participate in Head Start.
- **IDEA Infants and Families:** $600 million for formula grants to help states serve children with disabilities age 2 and younger.

LOWER HEALTHCARE COSTS

To save not only jobs, but money and lives, we will update and computerize our healthcare system to cut red tape, prevent medical mistakes, and help reduce healthcare costs by billions of dollars each year.

- **Health Information Technology:** $20 billion to jumpstart efforts to computerize health records to cut costs and reduce medical errors.
- **Prevention and Wellness Fund:** $3 billion to fight preventable chronic diseases, the leading cause of deaths in the U.S., and infectious diseases. Preventing disease rather than treating illnesses is the most effective way to reduce healthcare costs. This includes hospital infection prevention, Preventive Health and Health Services Block Grants for state and local public health departments, immunization programs, and evidence-based disease prevention.
- **Healthcare Effectiveness Research:** $1.1 billion for Healthcare Research and Quality programs to compare the effectiveness of different medical treatments funded by Medicare, Medicaid, and SCHIP. Finding out what works best and educating patients and doctors will improve treatment.
- **Community Health Centers:** $1.5 billion, including $500 million to increase the number of uninsured Americans who receive quality healthcare and $1 billion to renovate clinics and make health information technology improvements. More than 400 applications submitted earlier this year for new or expanded CHC sites remain unfunded.
- **Training Primary Care Providers:** $600 million to address shortages and prepare our country for universal healthcare by training primary healthcare providers including doctors, dentists, and nurses as well as helping pay medical school expenses for students who agree to practice in underserved communities through the National Health Service Corps.
- **Indian Health Service Facilities:** $550 million to modernize aging hospitals and health clinics and make healthcare technology upgrades to improve healthcare for underserved rural populations.

HELP WORKERS HURT BY THE ECONOMY

High unemployment and rising costs have outpaced Americans' paychecks. We will help workers train and find jobs, and help struggling families make ends meet.

Helping Workers Find Jobs

- **Training and Employment Services:** $4 billion for job training including formula grants for adult, dislocated worker, and youth services (including $1.2 billion to create up to one million summer jobs for youth). The needs of workers also will be met through dislocated worker national emergency grants, new competitive grants for worker training in high growth and emerging industry sectors (with priority consideration to "green" jobs and healthcare), and increased funds for the YouthBuild program. Green jobs training will include preparing workers for activities supported by other economic recovery funds, such as retrofitting of buildings, green construction, and the production of renewable electric power.
- **Vocational Rehabilitation State Grants:** $500 million for state formula grants to help persons with disabilities prepare for gainful employment.
- **Employment Services Grants:** $500 million to match unemployed individuals to job openings through state employment service agencies and allow states to provide customized services. Funds are targeted to states with the greatest need based on labor force, unemployment, and long-term unemployed rates.
- **Community Service Employment for Older Americans:** $120 million to provide subsidized community service jobs to an additional 24,000 low-income older Americans.

Unemployment Insurance Benefits

- **Benefits Extension:** $27 billion to continue the current extended unemployment benefits program – which provides up to 33 weeks of extended benefits - through December 31, 2009 given rising unemployment.
- **Increased Benefits:** $9 billion to increase the current average unemployment insurance benefit from roughly $300 per week, paid out of State trust funds, by $25 per week using Federal funds, through December 2009. There are currently 5.3 million workers receiving regular UI and an additional 1.9 million receiving extended benefits.
- **Unemployment Insurance Modernization:** Provides funds to states though a "Reed Act" distribution, tied to states' meeting specific reforms to increase unemployment insurance coverage for low-wage, part-time, and other jobless workers.

COBRA Healthcare for the Unemployed: $30.3 billion to extend health insurance coverage to the unemployed, extending the period of COBRA coverage for older and tenured workers beyond the 18 months provided under current law. Specifically, workers 55 and older, and workers who have worked for an employer for 10 or more years will be able to retain their COBRA coverage until they become Medicare eligible or secure coverage through a subsequent employer. In addition, subsidizing the first 12 months of COBRA coverage for eligible persons who have lost their jobs on or after September 1, 2008 at a 65 percent subsidy rate, the same rate provided under the Health Care Tax Credit for unemployed workers under the Trade Adjustment Assistance program. [Ways and Means]

Medicaid Coverage for the Unemployed: Provides 100 percent federal funding through 2010 for optional State Medicaid coverage of individuals (and their dependents) who are receiving unemployment benefits or have exhausted those benefits and have no health insurance coverage. Other optional coverage groups are individuals (and their dependents) who are involuntarily unemployed and uninsured and whose family income does not exceed 200 percent of poverty, and unemployed uninsured individuals who are receiving food stamps.

Attacking the Housing Crisis

- **Public Housing Capital Fund:** $5 billion for building repair and modernization, including critical safety repairs. Every dollar of Capital Fund expenditures produces $2.12 in economic return. $4 billion of the funds will be distributed to public housing authorities through the existing formula and $1 billion will be awarded through a competitive process for projects that improve energy efficiency.
- **HOME Investment Partnerships:** $1.5 billion to help local communities build and rehabilitate low-income housing using green technologies. Thousands of ready-to-go housing projects have been stalled by the credit crunch. Funds are distributed by formula.
- **Native American Housing Block Grants:** $500 million to rehabilitate and improve energy efficiency at some of the over 42,000 housing units maintained by Native American housing programs. Half of the funding will be distributed by formula and half will be competitively awarded to projects that can be started quickly.
- **Neighborhood Stabilization:** $4.2 billion to help communities purchase and rehabilitate foreclosed, vacant properties in order to create more affordable housing and reduce neighborhood blight.
- **Homeless Assistance Grants:** $1.5 billion for the Emergency Shelter Grant program to provide short term rental assistance, housing relocation, and stabilization services for families during the economic crisis. Funds are distributed by formula.
- **Rural Housing Insurance Fund:** $500 million to support $22 billion in direct loans and loan guarantees to help rural families and individuals buy homes during the credit crunch. Last year these programs received a record number of applications.
- **Self-Help and Assisted Homeownership Program:** $10 million for rural, high-need areas to undertake projects using sustainable and energy-efficient building and rehabilitation practices. Funds will be awarded by competition to projects that can begin quickly.

- **Lead Paint:** $100 million for competitive grants to local governments and nonprofit organizations to remove lead-based paint hazards in low-income housing.
- **Rural Community Facilities:** $200 million to support $1.2 billion in grants and loans to rural areas for critical community facilities, such as for healthcare, education, fire and rescue, day care, community centers, and libraries. There are over $1.2 billion in applications pending.

Alleviating Hunger

- **Supplemental Nutrition Assistance:** $20 billion to provide nutrition assistance to modest-income families and to lift restrictions that limit the amount of time individuals can receive food stamps.
- **Senior Nutrition Programs:** $200 million for formula grants to states for elderly nutrition services including Meals on Wheels and Congregate Meals.
- **Afterschool Meals:** $726 million to increase the number of states that provide free healthy dinners to children in need.
- ***Emergency Food Assistance Program**: $150 million to purchase commodities for food banks to refill emptying shelves.
- **Supplemental Nutrition Program Information Systems:** $100 million to improve state management information systems for the WIC program.

Payments to Disabled and Elderly: $4.2 billion to help 7.5 million low-income disabled and elderly individuals with rising costs by providing an additional SSI payment in 2009 equal to the average monthly federal payment under the program (approximately $450 for an individual and $630 for a couple). This one-time payment will serve as an immediate economic stimulus as half of SSI recipients have no other form of income and the other half average outside income of less than $450 per month.

Community Services Block Grant: $1 billion for grants to local communities to support employment, food, housing, and healthcare efforts serving those hardest hit by the recession. Community action agencies have seen dramatic increases in requests for their assistance due to rising unemployment, housing foreclosures, and high food and fuel prices.

Community Development Block Grants: $1 billion for community and economic development projects including housing and services for those hit hard by tough economic times.

Emergency Food and Shelter: $200 million to help local community organizations provide food, shelter, and support services to the nation's hungry, homeless, and people in economic crisis including one-month utility payments to prevent service cut-off and one-month rent or mortgage assistance to prevent evictions or help people leave shelters. Funds are distributed by formula based on unemployment and poverty rates.

Low-Income Home Energy Assistance: $1 billion to help low-income families pay for home heating and cooling at a time of rising energy costs.

Child Support Enforcement: $1 billion to provide federal incentive funds for states to collect support owed to families.

Social Security Administration Disability Backlog and Claims Processing: $500 million to help the Social Security Administration process a steep rise in disability and retirement claims, getting people their benefits faster, and preventing existing backlogs from getting worse. Within this total, $40 million will help SSI upgrade health information technology.

Centers for Independent Living: $200 million for state formula grants to help individuals with disabilities continue to live in their communities.

AmeriCorps Programs: $200 million to put approximately 16,000 additional AmeriCorps members to work doing national service, meeting needs of vulnerable populations and communities during the recession.

Compassion Capital Fund: $100 million for grants to faith- and community-based organizations to provide critical safety net services to needy individuals and families.

Department of Labor Worker Protection and Oversight: $80 million to ensure that worker protection laws are enforced as recovery infrastructure investments are carried out.

SAVE PUBLIC SECTOR JOBS AND PROTECT VITAL SERVICES

We will provide relief to states, so they can continue to employ teachers, firefighters, and police officers and provide vital services without having to unnecessarily raise middle class taxes.

Medicaid Aid to States (FMAP): Approximately $87 billion to states, increasing through the end of FY 2010 the share of Medicaid costs the federal government reimburses states, with additional relief tied to rates of unemployment. In the previous recession the federal government increased its contribution to Medicaid to help states avoid cuts in health benefits at a time when low-income patient loads are increasing and State revenues are declining.

State Education and Other Budget Priorities: $120 billion to states and school districts to stabilize budgets and prevent tax increases and deep cuts to critical education programs, including:

- $41 billion to local school districts through Title I ($13 billion), IDEA ($13 billion), a new School Modernization and Repair Program ($14 billion), and the Education Technology program ($1 billion).
- $79 billion in state fiscal relief, including: $39 billion to local school districts and public colleges and universities distributed through existing state and federal formulas; $15 billion to states as bonus grants as a reward for meeting key performance measures; and $25 billion to states for other high priority needs such as public safety and other critical services, which may include education.

Temporary Assistance for Needy Families: $2.5 billion for block grants to help States deal with the surge in families needing help during the recession and to prevent them from cutting work programs and services for abused and neglected children.

State and Local Law Enforcement: $4 billion to support state and local law enforcement including $3 billion for the Byrne Justice Assistance formula grants to support local law enforcement efforts with equipment and operating costs, and $1 billion for the COPS hiring grant program, to hire about 13,000 new police officers for three years. The grantee is responsible for at least 25% in matching funds and must commit to use their own funds to keep the officer on board in the fourth year.

Periodic Census and Programs, Communications: $1 billion for work necessary to ensure a successful 2010 census, including $150 million for expanded communications and outreach programs to minimize undercounting of minority groups.

OTHER IMPORTANT POLICY PROVISION

Medicare and Medicaid Regulations: The bill extends the moratorium on Medicaid and Medicare regulations.

***E-Verify:** Extends the E-Verify authorization for 5 years as passed by the House in July 2008 (H.R. 6633) on a vote of 407-2.

***Buy America:** Mandates that iron and steel used in construction and repair projects funded under the bill be produced in the United States unless found to be prohibitively expensive.

***Davis Bacon:** Requires that federal contractors and subcontractors pay workers no less than the local prevailing wage.

***Illinois:** Prevents Governor Blagojevich from directing the use of funds provided in the package.

U.S. Senate Committee on Appropriations

PRESS RELEASE

For Immediate Release: January 23, 2009

John Bray w/Inouye 202-224-3751

Senate Appropriations Committee Releases Highlights of American Recovery and Reinvestment Plan

Committee Announces $365 Billion Investment Package

Washington, DC – As Americans contend with the painful effects of the most serious economic crisis since the Great Depression, the U.S. Congress is responding with a bold plan to revive our struggling economy, put millions of people to work, and lay the foundation for America's economic competitiveness in the 21st century. Combined with the economic recovery tax cuts and mandatory programs announced by the Senate Finance Committee, the Senate legislation totals $825 billion. It is estimated that this legislation will create or sustain over 4 million jobs.

In the coming weeks, the Senate will work closely with the House of Representatives and the Obama Administration in a bi-partisan effort to enact strong and responsible legislation that will put our nation back on the road to economic recovery.

"We must respond to this crisis with all weapons at our disposal," said Senator Daniel K. Inouye (D-Hawaii), Chairman of the Senate Appropriations Committee. "If we fail to act, the situation will almost certainly worsen, and the American people will continue to pay a heavy price. These investments will not only create jobs now, but will also address neglected priorities here at home and lay the foundation for economic growth in the long-term. The road to recovery will not be quick or easy, but I am confident that working together, our nation will meet this historic challenge."

The Economy in Crisis

Unemployment: In December, the number of unemployed persons increased by 632,000 to 11.1 million and the unemployment rate rose to 7.2 percent. Job losses were large and widespread across most major industry sectors. Leading economists have predicted that in the absence of dramatic government action, the unemployment rate could reach 10 percent by 2010.

Housing: U.S. foreclosures increased by more than 81 percent last year, a record, with over 2.3 million foreclosures total.

State Budgets: 44 States are facing budget shortfalls totaling $90 billion for Fiscal Year 2009 and $145 billion for Fiscal Year 2010, and are faced with the prospect of dramatic cuts in basic services or painful tax increases.

Stock Market: In 2008, U.S. stocks lost roughly $7 trillion in value.

Bank Failures: During 2008, 25 banks with $373.6 billion in total assets failed in the U.S.
Gross Domestic Product: The U.S. has officially been in a recession since December of 2007. Real gross domestic product -- the output of goods and services produced by labor and property located in the United States -- decreased at an annual rate of 0.5 percent in the third quarter of 2008.

Cost of Living and Poverty: Overall participation in the Food Stamps program increased by 3.9 million people, or 14 percent, between October 2007 and October 2008, the latest month for which data is available. Food costs have increased 7.0 percent since November 2007, and are forecast to increase an additional 4.5 percent in 2009, according to the United States Department of Agriculture's (USDA) latest estimates.

Urgent Infrastructure Needs

- The American Society of Civil Engineers (ASCE) estimates that $1.6 trillion is needed over a five-year period to bring the nation's infrastructure to a good condition.
- 27.1 percent of our nation's bridges are structurally deficient, or functionally obsolete.
- 34 percent of America's major roads are in poor or mediocre condition, and 36 percent of America's major urban roads are congested. Americans spend 4.2 billion hours a year stuck in traffic, at a cost of $78.2 billion a year to the economy. Poor road conditions cost U.S. motorists $67 billion a year in repairs and operating costs.

The American Recovery and Reinvestment Plan

To meet these enormous challenges, the American Recovery and Reinvestment Plan focuses on five areas critical to rebuilding our economy and creating the conditions for economic growth in the long-term: Infrastructure and Science; Education and Training; Energy; Protecting the Vulnerable; and Health. It is estimated that this legislation will create or sustain over 4 million jobs.

The American Recovery and Reinvestment Plan provides unprecedented oversight, accountability, and transparency to ensure that taxpayer dollars are invested effectively, efficiently, and as quickly as possible.

- Funds are distributed whenever possible through existing formulas and programs that have proven track records and accountability measures already in place.
- Numerous provisions in the bill provide for expedited but effective obligation of funds so that dollars are invested in the economy as quickly as possible.
- The Government Accountability Office and the Inspectors General are provided additional funding for auditing and investigating recovery spending.
- A new Recovery Act Accountability and Transparency Board will coordinate and conduct oversight of recovery spending and provide early warning of problems.
- A special website will provide transparency by posting information about recovery spending, including grants, contracts, and all oversight activities.

- State and local whistleblowers who report fraud and abuse are protected.
- There are no earmarks in this bill.

Please note: The following is a summary of the highlights of the proposed legislation only - not a complete listing of all the programs or spending included in the legislation.

Infrastructure and Science

In order to rebuild our weakening economy, these investments in our physical and cyber infrastructure will put Americans immediately to work rebuilding our crumbling roads and bridges, and will also enable the creation of a stronger and more efficient infrastructure for the 21st century economy. Highlights include:

Top line spending of approximately $140 Billion

Infrastructure Improvements:

- School Modernization: $16 billion to repair, renovate and construct public schools in ways that will raise energy efficiency and provide greater access to information technology, and $3.5 billion to improve higher education facilities.
- Broadband: A total of $9 billion for the National Telecommunications and Information Administration's (NTIA) Broadband Technology Opportunities Program to improve access to broadband.
- Public Parks: $3.4 billion for repair, restoration and improvement of public facilities at parks, forests, refuges and on other public and tribal lands.
- Department of Defense Facilities: The stimulus includes $2.4 billion for quality of life and family-friendly military construction projects such as family housing and child care centers.
- $3.2 billion for Facilities Sustainment, Restoration and Modernization to be used to invest in energy efficiency projects and to improve the repair and modernization of Department of Defense facilities to include Defense Health facilities.
- $3.4 billion for VA hospital and medical facility construction and improvements, long-term care facilities for veterans, and improvements at VA national cemeteries.
- $1.2 billion to accelerate procurement and installation of baggage screening and checkpoint security equipment at airports across the country.
- $500 million to secure high risk critical infrastructure such as dams, tunnels, and bridges.
- $4.6 billion to construct, repair or rehabilitate water resource infrastructure nationwide to benefit navigation, hydropower, flood control, environmental restoration, shore protection and other purposes.
- $1.4 billion to construct, repair, or rehabilitate water delivery infrastructure in the Western U.S. to benefit irrigation, municipal and industrial water supplies, power production, and environmental and other purposes.
- $2.25 billion for the HOME Investment Partnerships Program block grant to enable state and local governments, in partnership with community-based organizations, to acquire, construct, and rehabilitate affordable housing and provide rental assistance to poor families.

Transportation:

- $27 billion for formula highway investments.
- $8.4 billion for formula investments in public transportation.
- $5.5 billion for competitive grants to state and local governments for surface transportation investments.
- $1.3 billion for investments in our air transportation system.
- $1.1 billion for investments in rail transportation.
- $160 million for investments in maritime transportation.
- Public Lands Roads: $830 million for repair and restoration of road on park, forest, tribal, and other public lands.

Public Housing:

- $5 billion to the public housing capital fund to enable local public housing agencies to address a $32 billion backlog in capital needs - especially those improving energy efficiency in aging developments.
- $2.1 billion for full-year payments to owners receiving Section 8 project-based rental assistance.
- Neighborhood Stabilization Program - The bill includes $2.25 billion for the redevelopment of abandoned and foreclosed homes.
- Homeless Prevention Fund - The bill includes $1.5 billion for homeless prevention activities, which will be sent out to states, cities and local governments through the emergency shelter grant formula.

Environmental Clean-Up/Clean Water:

- A total of $6.4 billion is directed towards environmental cleanup of former weapon production and energy research sites.
- $6 billion for sewer, wastewater, and drinking water systems nationwide through EPA's Clean Water and Drinking Water State Revolving Funds.
- $1.4 billion to support $3.8 billion in loans and grants for needed water and waste disposal facilities in rural areas.
- $1.4 billion for EPA's nationwide environmental cleanup programs, including Superfund.

Science:

- National Science Foundation (NSF) Research: $1.4 billion in funding for scientific research, infrastructure and competitive grants.
- National Aeronautics and Space Administration (NASA): $1.5 Billion for NASA, including $500 million for Earth science missions to provide critical data about the Earth's resources and climate.

Education and Training

In order to compete in the 21st century, Americans must have a well-educated workforce, capable of adapting to an ever-changing economic environment. Investing in education now will ensure that the next generation of American workers is ready and able to meet the challenge of global competition. In the near-term, millions of workers have seen their jobs disappear, and find themselves unable to match their skill sets with existing opportunities. Providing job training in new and expanding fields will help to lower the unemployment rate and help today's workers better compete against foreign competition. Highlights include:

Top line spending of approximately $125 Billion

Education:

- $39 billion to local school districts and public colleges and universities distributed through existing State and federal formulas.
- $15 billion to states as incentive grants as a reward for meeting key performance measures.
- $25 billion to states for other high-priority needs such as public safety and other critical services, which may include education.
- Title I: $13 billion to help close the achievement gap and enable disadvantaged students to reach their potential.
- Special Education/IDEA: $13 billion to increase the Federal share of special education services to its highest level ever.
- Pell Grants: $13.9 billion to increase the Pell Grant maximum award and pay for increases in program costs resulting from increased eligibility and higher Pell Grant awards.

Training:

- Training and Employment Services: $3.4 billion for job training including formula grants for adult, dislocated worker, and youth programs.
- Vocational Rehabilitation State Grants: $500 million for state formula grants to help individuals with disabilities prepare for and sustain gainful employment.
- Employment Services Grants: $400 million to match unemployed individuals to job openings through state employment service agencies and allow states to provide customized reemployment services.

Energy

The bill provides investments in areas critical to the development of clean, efficient, American energy, including modernizing energy transmission, research and development of renewable energy technologies, and modernizing and upgrading government buildings and vehicles. Highlights include:

Top line spending of approximately $51 Billion

- $40 billion to the Department of Energy for development of clean, efficient, American energy.
- GSA Federal Fleet: $2.6 billion to replace older motor fleet vehicles owned by the Federal Government with alternative fuel automobiles that will save on fuel costs and reduce carbon emissions.
- Green Buildings: $6 billion for repair of federal buildings to increase energy efficiency using green technology. This funding will help eliminate the backlog of $8.4 billion in building repair projects.
- $1.3 billion for grants or loans to owners for energy and green retrofit investments.
- $613 million for Department of Defense energy efficiency upgrades and construction of alternative energy projects, including wind and solar power and photovoltaic system installation.
- $400 million for rural businesses initiatives including development of renewable energy.

Protecting the Vulnerable:

The current economic crisis has affected all Americans, but none more so than the most vulnerable among us. The spending proposed here will serve to lessen the blow of the current recession, providing immediate relief for children, the poor, and others who may find themselves struggling to put food on the table or a roof over their head. It will also address the urgent need to provide safe and secure places to live, even in neighborhoods that are struggling with high unemployment and surging foreclosure rates.

Top line spending of approximately $25 Billion

Nutrition:

- $16.5 billion for additional Supplemental Nutrition Assistance Program (SNAP) benefits (formerly the Food Stamp program).
- Special Supplemental Program for Women, Infants, and Children (WIC). The Committee recommends a total of $500 million for WIC. In addition, the bill provides $150 million for Food Banks.

Helping Children:

- $4.6 billion to increase investments in early childhood programs.

Other Programs:

- Community Development Financial Institutions: $250 million to immediately provide capital to qualified community development financial institutions (CDFIs) to invest in the development of underserved communities.
- Social Services Block Grant: $400 million for States and local non-profits to deliver critical services to unemployed and low-income individuals struggling with the effects of the recession.
- Homeowners Assistance Program: $410 million to expand the Department of Defense Homeowners Assistance Program (HAP) during the national mortgage crisis.

Health

The bill provides investments in areas critical to immediate and long-term healthcare for millions of Americans. Improved information technology, research facilities, and health and wellness programs, will all provide a better foundation for providing quality healthcare to consumers. Highlights include:

Top Line spending of approximately $16 Billion

Health Information Technology:

- Health Information Technology: $5 billion to jumpstart efforts to computerize health records to cut costs and reduce medical errors.

Research:

- $3.5 billion to conduct biomedical research in areas such as cancer, Alzheimer's, heart disease and stem cells, and to improve NIH facilities.
- $1.1 billion to the Agency for Healthcare Research and Quality, NIH and the HHS Office of the Secretary to evaluate the relative effectiveness of different health care services and treatment options.

Treatment and Prevention:

- Prevention and Wellness: $5.8 billion to fight preventable diseases and conditions.
- Pandemic Flu Preparedness: $870 million to complete funding for the President's initiative on pandemic flu preparedness.

Small Business, Law Enforcement, Other

Top Line spending of approximately $8 Billion

- $110 Million for GAO and Agency Inspectors General in order to provide appropriate oversight of spending contained in this bill.
- Loans for Small Businesses: $730 million to stimulate lending to small businesses.
- State and Local Law Enforcement: $3.95 billion total to support law enforcement efforts.

FOR IMMEDIATE RELEASE **No. 09-05**

Governor Palin Notes Limits on Stimulus Package

January 12, 2009, Anchorage, Alaska – Governor Sarah Palin today emphasized that the stimulus package pending in Congress likely will be based largely on existing federal formulas for appropriations and will not be the vehicle for earmarked spending on specific projects for states.

"As I wrote to our congressional delegation on January 7, our administration recognizes that President-elect Obama and the congressional leadership of both parties favor the use of formulas to ensure fairness among the states and to avoid the earmark abuses of the past," Gov. Palin said. "We also have to be mindful about the effect of the stimulus package on the national debt and the future economic health of the country. We won't achieve long-term stability if we continue borrowing massive sums from foreign countries and remain dependent on foreign sources of oil and gas."

The governor has recommended five specific projects for the stimulus package, all of them in accordance with previous guidelines requiring that any individual spending requests must be in the national interest. Those projects are infrastructure upgrades to accommodate the natural gas pipeline, which will bring clean fuel to Lower 48 markets, and the Kodiak Launch Facility, which is important for the nation's defense. While the latest comments in D.C. suggest that no earmarks will be accepted, the governor is hopeful that the extraordinary nature of these national-interest projects will allow their inclusion.

While others have compiled wish-lists of Alaska-specific projects, many of them meritorious, the governor says the administration will not be commenting on or ranking them, given that they might not be considered for the stimulus package. "We don't want to get hopes up among community leaders that their local projects are likely to be included, when that probably won't be the case," she said.

Meanwhile, formula funds for transportation, health care and other areas, when received by the state through the stimulus package, will be subject to appropriations by the Legislature through its budget process.

President-elect Obama said last week: "We are going to ban all earmarks, the process by which individual members insert pet projects without review. ... We are going to bring a long-overdue sense of responsibility and accountability to Washington."

A spokesman for Senate Majority Harry Reid was even more blunt: "There will be no earmarks in the stimulus. Nada. Zero. Zilch." House Speaker Nancy Pelosi has expressed agreement.

"It's understandable that many Alaskans want to see some local projects advanced," Gov. Palin said. "But it's pretty clear that it won't happen in this stimulus package, and we need to be realistic about that."

Recent quotes on the stimulus package:

"[O]ur goal is not to create a slew of new government programs, but a foundation for long-term economic growth. That also means an economic recovery plan that is free from earmarks and pet projects. I understand that every member of Congress has ideas about how to spend money. Many of these projects are worthy; they benefit local communities. But this emergency legislation must not be the vehicle for those aspirations. This must be a time when leaders in both parties put the urgent needs of our nation above our own narrow interests."

- *President-Elect Obama, 1/8/09; Speech on economic recovery*

"There will be no earmarks in this economic recovery plan…I know it's the Christmas season, but President-elect Obama and I are absolutely determined that this economic recovery package will not become a Christmas tree."

- *Vice President-Elect Biden; 12/24/08*

"I can pledge to you that no earmark or any of that, any description you want to make of it will be in the bill that passes the House."

- *Speaker Pelosi, 1/11/09; CNN's "Late Edition"*

"Congress should have public hearings in the appropriate committees, the text of the measure should be made available online for the American people to review for at least one week, and it should be free from special-interest earmarks. This is the taxpayers' money, and they deserve to know their hard-earned tax dollars aren't being wasted."

- *House Minority Leader Boehner; 1/5/09*

"We must also make distinctions between what is 'stimulus'—defined by Speaker Pelosi earlier this year as 'timely, targeted and temporary'—and what is merely more government spending on favored projects we don't need with money we don't have."

- *Senate Minority Leader McConnell; Press Release 12/29/08*

ANALYSIS: *(Attach a separate page if necessary)*

The passage of this resolution would require the constitutional amendment to appear on the 2010 general election ballot. The cost of providing information about the constitutional amendment in the Official Election Pamphlet, as required by AS 15.58 is $1.5. Should the addition of this question require printing an 8-1/2 by 18 inch ballot, the cost will increase to $22.0.

SPONSOR STATEMENT

HJR 35 – HEALTHCARE FREEDOM ACT

"Proposing amendments to the Constitution of the State of Alaska prohibiting passage of laws that interfere with direct payments for health care services and the right to purchase health care insurance from a privately owned company, and that compel a person to participate in a health care system."

HJR 35 would give Alaskans the opportunity to vote on a Constitutional Amendment prohibiting the passage of laws that would force any person or employer to participate in a particular health care system or plan. Similar measures are under consideration in 35 states.

The Health Care Freedom Act seeks to protect two essential rights. First, it would protect a person's right to participate or not in any health care system, and it would prohibit the government from imposing fines or penalties because of that person's decision. Second, it would protect the right of an individual to purchase – and the right of doctors to provide – lawful medical services without government fines or penalties. HJR 35 would place these essential rights in the state constitution.

Few Alaskans question the need for effective health care reform to improve access, quality and affordability while ensuring that personal health care is patient-driven. Advocates of a larger government role in regulating and providing health insurance and care support forcing individuals to join a government-approved health insurance plan, whether or not they want it, can afford it, or it best meets their personal needs. But the overwhelming majority of Alaskans oppose this mandate.

If the federal government adopts nationalized health care and a significant block of states change their constitutions to protect their citizens, a legal clash may well be winnable for the states. This United States Supreme Court may just be in the mood to protect individual liberty and state sovereignty in such a private matter as personal health care.

MEMORANDUM

DATE: **February 8, 2010**

TO: **Representative Kelly**

FROM: **Derek Miller**

RE: **Sectional Analysis for HJR 35 (26-LS1063\R)**

A sectional summary of a bill should not be considered an authoritative interpretation of the bill. The bill itself is the best statement of its contents. If you would like an interpretation of the bill as it may apply to a particular set of circumstances, please advise.

Section 1.
Proposes to amend Article 1, Section 15 of the State of Alaska Constitution by inserting **(a)** before the clause.

Section 2.
Proposes to amend Article 1, Section 15 of the State of Alaska Constitution by inserting a new section that would prohibit the passage of laws that prohibit a person or penalize a person for making direct payments to a health care provider for tendering health care services or prohibit or penalize the purchase of health care insurance from a privately owned health care insurance company. The section also prohibits the passage of laws that compel a person, employer, or health care provider to participate in a health care system or that penalizes a person, employer, or health care provider for declining to participate in a health care system. The section exempts a health care system that provides indemnity and medical benefits to injured workers.

Section 3.
Places the amendments proposed by this resolution before the voters of the state at the next general election in conformity with Article 13, Section 1 of the Constitution of the State of Alaska and the election laws of the state.

RE: HJR 35

To House Finance Committee: Co-Chairs, Rep. Hawker and Rep. Stoltze, Vice Chair, Thomas and Committee Members: Reps. Austerman, Fairclough, Joule, Kelly, Doogan, N. Foster, Gara, Salmon and Chenault,

I urge you to vote on passage of HJR 35, as this legislation is of utmost importance to the people of Alaska and to the state as a whole. These proposed changes to the Constitution For The State of Alaska are needed to protect the people and the state. It is your sworn duty to do so.

Thank you for your public service.

Please enter this letter as my testimony for the hearing on April 10, 2010 on HJR 35.

Health Care Policy and Constitutional Rights:

The Health Care Freedom Amendment

Testimony Presented Before the Alaska House Finance Committee

April 10, 2010

by Dave Roland

Co-Chairperson Hawker, Co-Chairperson Stoltze, Vice-Chairperson Thomas, and members of the committee, I thank you for the opportunity to offer this testimony. My name is Dave Roland, and I am a policy analyst for the Show-Me Institute, a non-profit, non-partisan, Missouri-based think tank that supports free-market solutions to the state's social challenges. Prior to joining the Show-Me Institute, I spent several years in Washington, D.C., gaining expertise in constitutional law as a litigator with the Institute for Justice, a public-interest law firm that specializes in the protection of Americans' liberties. The ideas I will offer today are my own, and should not be taken as necessarily representative of the organizations with which I am affiliated.

Among the elements of the new health care reform law that was passed by Congress is a requirement that almost every adult would either have to purchase a health insurance policy or face punitive fines to be collected by the Internal Revenue Service.[1] There has been widespread debate in legal circles about whether the courts would uphold such a requirement, but lawmakers in at least 40 states are trying to do what they can to insulate their citizens from such a requirement. In Alaska, members of this legislature are considering HJR 35, which very closely resembles the legislation known in other states as "Health Care Freedom" amendments. HJR 35, if passed by this legislature, would offer citizens the opportunity to modify the Alaska Constitution to formally recognize their right to decide for themselves whether they will participate in any private health care system. Under this amendment, the government would not be permitted to prevent citizens from offering or accepting direct payment for health care services, and neither could it substantially limit the purchase or sale of health insurance in private health care systems.[2]

---

[1] The law makes exceptions for members of religious groups whose beliefs forbid the acceptance of modern medical treatments.

[2] It appears from the current text of the Health Care Freedom Amendment that the Legislature would retain the ability to pass a comprehensive, tax-based, single-payer public health insurance system, so long as in doing so it did

My testimony today is not intended as an endorsement of any legislation, but rather to explain the policies implicated by the state bill and the federal law just mentioned. I will particularly address the constitutional issues raised by one element of the federal health care reform law, the way that courts would likely resolve those constitutional issues, and the likely impact of the Health Care Freedom Amendment on the courts' resolution.

Should Everyone Have Health Insurance?

The linchpin of the new federal health care reform law is a requirement that by 2014 almost every adult in the nation must obtain a health insurance policy that would meet certain requirements imposed by Congress. In addition to the fact that many Americans currently carry health insurance policies that would *not* fit the requirements Congress is considering, there are also many who have reasons for choosing to remain uninsured. A brief look at the basic mechanics of the health insurance industry will help illustrate why some people make these choices.

Insurance is gambling, both for the insurers and the insured. The insurer looks at your profile and makes a careful statistical determination of how much your health care is likely to cost them over a given period of time. They then charge you a premium that - if their calculations are correct - would allow them not only to cover your expenses, but also to pay their employees and to make a profit on top of that. Their risk lies in the possibility that you might incur costs greater than they expect and/or sooner rather than later. But the odds are heavily stacked in their favor. These companies are very good at making their guesses, and the large pool of resources that results from their customer base means that, just like a casino, they almost always come out ahead.

For the insured, there is also a gamble involved. If, in fact, the insurance companies are correct (as they usually are), the insured will end up paying far more for their health care than they would have if they had remained uninsured. This is the risk they assume in order to gain peace of mind that, should a catastrophic injury or illness occur sooner rather than later, they will be taken care of. But, financially speaking, the great majority of people would be better off

---

not either outlaw the sale or purchase of private insurance policies or restrict citizens' abilities to offer or accept direct payment for health care services.

putting 85% of what their insurance premium would have been into a savings account earmarked for health care expenses.[3] Then, whenever health care costs emerge, the money is ready to be used - and, importantly, it can be used for any procedure and any health care provider the insured prefers.[4]

So the health insurance trade off is, the insured sacrifices extra money and a significant range of choice as to providers and procedures for the assurance that they will have their expenses covered if they should need treatment sooner than they would otherwise be able to pay for it. It is not a necessity, and a large majority of people would ultimately be better off if they simply saved their money instead of giving it to insurance companies. That is why it very easily could make economic sense to forgo health insurance.

While some people may not carry health insurance because it is unaffordable, many Americans *choose* not to purchase health insurance. Some people's religions may not permit the use of modern medicine, while others may not believe it to be effective. Still others are simply confident enough in their propensity for health that they are willing to risk the costs of illness or injury in order to direct their money to concerns that they believe to be more pressing for themselves and their families. And there are some who, recognizing that most people pay far more to insurance companies than they are ever likely to need for their own treatment costs, would prefer to self-insure by creating their own health fund. For each of these people, a congressional directive to purchase a health insurance policy would mean giving up a huge amount of money — as well as a significant amount of autonomy and privacy — committing themselves to a contract for goods and services that they do not want, and in some cases may be prohibited from using.

The Federal Constitution

As we all remember from high school, congressional authority is limited to those powers explicitly granted by the Constitution.[5] In this case, the question would be whether the

[3] Even the best of health insurance companies usually only apply about 85% of the premiums they receive on their clients' health care costs.

[4] Most health insurance companies place limits on the doctors from whom a policy holder can receive treatment as well as on the types of treatment that are covered.

[5] These eighteen powers are enumerated in Article I, section 8, of the U.S. Constitution: 1) To tax and spend for "the common defense and general welfare of the United States"; 2) To borrow money; 3) To regulate commerce with

Constitution gives Congress the authority to punish citizens for refusing to purchase health insurance.

Those arguing in favor of the law's constitutionality suggest that this authority is part of part of Congress' power "to regulate commerce ... among the several states[.]"[6] It is true that since 1937 courts have generally interpreted this power very broadly,[7] resulting in a U.S. Supreme Court decision that a farmer named Filburn was bound by agricultural regulations regardless of whether he took his grain to market.[8] More recently, the Supreme Court also held that Angel Raich was subject to federal drug laws even though her medical marijuana was homegrown and neither bought nor sold.[9]

But courts have also recognized that congressional authority under the Commerce Clause *is* limited. In *U.S. v. Lopez*, the Supreme Court held that the Commerce Clause did not permit Congress to create a federal law banning possession of firearms in a school zone.[10] In *U.S. v. Morrison*, the court struck down a law that addressed the subject of gender-based violent crime.[11] The primary reason that the court struck down the laws in *Lopez* and *Morrison* was that the subjects Congress sought to regulate lacked a clear nexus with commerce among the states.

Even though much of the health insurance industry is handled within the bounds of individual states,[12] courts will likely find that health insurance as a whole is an issue with a sufficient connection to interstate commerce to permit congressional regulation. But now that

---

foreign nations and among the several states; 4) To establish rules governing naturalization of citizens and bankruptcies; 5) To coin money and regulate its value; 6) To punish counterfeiting; 7) To establish a postal service and post roads; 8) To establish copyright laws; 9) To constitute a federal court system inferior to the Supreme Court; 10) To punish piracies on the high seas and offenses against the law of nations; 11) To declare war and make rules concerning captures on land and water; 12) to raise and support armies; 13) To provide a navy; 14) To make rules to govern the army and navy; 15) To provide for the use of militia to enforce laws, suppress insurrections, and repel invasions; 16) To provide for organizing, arming, and disciplining the militia; 17) To govern the District of Columbia; and 18) to make laws "necessary and proper for carrying into execution the foregoing powers".

[6] U.S. Const. Art. I, § 8.

[7] Prior to 1937, the power of the federal government was regularly held in check by the Supreme Court. A number of factors, including President Franklin Roosevelt's threat to pack the court with his own appointments in order to ram through New Deal legislation, led to what has been termed a "constitutional revolution". For the past 73 years, the general rule has been for courts to presume that the Commerce Clause grants Congress nearly unlimited authority to regulate the behavior of citizens—particularly as pertains to their ability to obtain, keep, and use property.

[8] *Wickard v. Filburn*, 317 U.S. 111 (1942).

[9] *Gonzalez v. Raich*, 545 U.S. 1 (2005).

[10] *U.S. v. Lopez*, 514 U.S. 549 (1995) (finding no clear connection between mere possession of a firearm in some proximity to a school and the stream of interstate commerce).

[11] *U.S. v. Morrison*, 529 U.S. 598 (2000).

[12] In part as a result of federal law, it is very unusual for individuals to be able to purchase insurance from companies outside the state in which they are currently domiciled.

Congress has passed a law mandating that individuals must either buy health insurance or face financial sanctions, courts will still have to answer a very specific question: Does the power to regulate interstate commerce give Congress the authority to penalize citizens *who do not wish to engage in commerce*?

As Prof. Randy Barnett pointed out at a Heritage Foundation debate,[13] the Supreme Court has never faced such a question, so we cannot be certain of its answer. I tend to agree with Barnett that the Court's response will likely hinge on the solicitor general's ability to explain which aspects of citizens' lives (if any) would remain beyond the reach of congressional regulation if the Court permitted these mandates to be enforced. If the Solicitor General offers a reasonable response that acknowledges clear limits to the powers available under the Commerce Clause, the Court may sustain the individual health insurance mandate. If not, I believe that the majority of justices will strike the mandate as unconstitutional.

Some professors have argued that even without relying on the Commerce Clause, authority for the health insurance mandate could be found in Congress' power "to lay and collect taxes ... [to] provide for the ... general welfare of the United States",[14] or even in the Sixteenth Amendment's authorization of an income tax.[15] I disagree. While the taxation power *might* permit Congress to create a tax-based, universal public health insurance system like Medicare,[16] this sort of comprehensive, tax-based program is not the object of the penalties that would be assessed upon those who choose not to comply with the insurance mandate. In fact, these penalties cannot properly be considered "taxes" at all unless their primary purpose is to raise revenue for the government rather than to regulate the behavior of citizens.[17] Thus, while

---

[13] Video available at http://volokh.com/2009/12/09/video-of-heritage-session-on-constitutionality-of-health-care-mandate/.

[14] U.S. Const. Art. I, § 8.

[15] U.S. Const. Amendment XVI.

[16] This might be possible, though politically impractical. First, they could not apply such a tax against everyone. It would have to take the form of some kind of an income tax or else it would violate the constitutional prohibition on "capitation" or "direct" taxes. See Article I, section 9. So, in order to mirror the effect of the current proposal while relying on the taxing power, they'd have to jack up the income tax rates by 2% across the board, then offer a 2% tax credit for anyone who obtains a qualifying health insurance policy. That would likely pass muster, constitutionally, but it would almost guarantee an enormous political backlash because people hate having their taxes raised - even if many would have a relatively easy way to get out from under it. This approach, by the way, would also make it much harder to exempt people with religious reasons for not obtaining health insurance, which would be another major knock against such a plan.

[17] "The test to be applied is to view the objects and purposes of the statute as a whole and if from such examination it is concluded that revenue is the primary purpose and regulation merely incidental, the imposition is a tax and is controlled by the taxing provisions of the Constitution. Conversely, if regulation is the primary purpose of the statute, the mere fact that incidentally revenue is also obtained does not make the imposition a tax, but a sanction

Congress can properly impose fines for violation of a law that it is permitted to enforce pursuant to its authority to regulate commerce, it may not call a fine a "tax" in order to justify penalties for behavior *not* within its authority to regulate commerce. Furthermore, even if the fees for failing to purchase health insurance were classified as a tax authorized by Article I, section 8, Congress is specifically denied the authority to impose capitation taxes "unless in proportion to the census," a requirement that the current proposal does not seem to meet.[18] Therefore, Congress may not justify the mandate and its penalties unless they are enacted pursuant to one of the other powers enumerated in Article I, section 8.

The next question courts would have to answer is whether the issue should be reserved to the states under the Tenth Amendment.[19] This is shakier ground for a constitutional defense than one would really like to have. While the original intent of the Tenth Amendment was clearly to keep the federal government in its proper, limited sphere, the test of the amendment states that it applies only where courts have determined that a specific power has not been delegated to Congress. If a court has already located congressional authority in either the Commerce Clause or the taxing power, it is a near certainty that it will also determine that the Tenth is simply inapplicable as a barrier against the federal statute.

After considering the question of whether Congress generally has the authority to create an individual health insurance mandate, the question will then become whether such a mandate violates liberties preserved under the first nine amendments to the U.S. Constitution. The relevant provisions are contained in the First, Fifth, and Ninth Amendments.[20] The Supreme Court has previously recognized that the Constitution protects citizens' rights to associate with

---

imposed for the purpose of making effective the congressional enactment. There is a marked distinction between taxation for revenue, as authorized and limited by Article 1, Sections 2 and 9 and Clauses 3 and 4 of the Constitution, and the imposition of sanctions by the Congress under the commerce clause. The power of Congress to 'regulate commerce' is the power to prescribe the rules by which commerce is to be governed and the Congress is at liberty to adopt any method which it deems effective to accomplish the permitted end. Congress has a discretion as to what sanctions shall be imposed for the enforcement of the law and this discretion is unlimited so long as the method of enforcement does not impinge upon some other constitutional prohibition." *Rogers v. United States*, 138 F.2d 992 (6th Cir. 1943)

[18] It might be argued that the penalties for failing to obtain health insurance could be considered an "income tax" of the sort that is exempted from the limitations of Article I, section 9. I think that such a penalty could not be considered an "income tax" because it would be selectively applied and collected separately from the general income tax authorized in the Sixteenth Amendment.

[19] U.S. Const. Amendment X.

[20] While the U.S. Supreme Court has rarely discussed the Ninth Amendment as a substantive source of individual liberties, its text—"The enumeration in the Constitution of certain rights shall not be construed to deny or disparage others retained by the people"—suggests that it should be seen as such. See Justice Arthur Goldberg's concurring opinion in *Griswold v. Connecticut*, 381 U.S. 479 (1965).

others of their choosing,[21] to enter into contracts, to make their own decisions regarding health care, and, of course, their right to privacy.[22] A violation of any one of these rights could be sufficient to invalidate the health insurance mandate.

Unfortunately, merely establishing an infringement of constitutional rights does not usually end the analysis. In fact, the Supreme Court has long permitted infringement of these kinds of liberty, as long as the government could advance an interest in doing so that a majority of the justices considered sufficiently important. In the case of the individual health insurance mandate, the government's interest is to make insurance premiums more affordable and, thus, to increase the number of people with access to health care. The courts will have to balance this interest against the liberty and privacy interests violated when citizens are forced to purchase coverage that they do not want and may have no intention of using. My opinion is that, particularly given the extremely high value that several current justices place on protecting the privacy rights of individuals, it will be difficult for the Solicitor General to convince a majority that the *potential* for lower health insurance premiums (because, in fact, there is no guarantee that the plan will work in the way Congress intends) can justify forcing someone to disclose private information about themselves and their health care.

The Health Care Freedom Amendment

If everything I've discussed above fails to persuade the courts to strike down the individual health insurance mandate, then the arguments will come down to state constitutional protections. This is one reason (but only *one* reason) why Alaskans should take the Health Care Freedom Amendment seriously.

The Bill of Rights in the U.S. Constitution does not demarcate the outer limits of individual freedoms to which citizens are entitled. Rather, it merely establishes a baseline of liberty that cannot be violated by any level of government. The states, however, each have their own constitutions, and those documents can—and frequently do—provide an even higher level of protection for liberty than is afforded by the U.S. Constitution. Generally speaking, these additional protections are only applied against the actions of state and local governments, but if

[21] U.S. Const. Amendment I.
[22] U.S. Const. Amendments V and XIV (Due Process Clause).

Congress tried to enforce a law that directly violated the terms of the Health Care Freedom Amendment (or some other freedom guaranteed under a state constitution), the courts would have to decide whether a state's guarantee of liberty to its citizens can protect them from actions of the federal government that would violate that liberty.

This is currently an open question. There are cases in which federal courts have noted that the application of a federal statute could result in a violation of certain freedoms secured under state constitutions. In several of these cases, the courts required the government to come up with a sort of alternative structure that would respect the state constitutions – but in each of those cases there were also usually indications from Congress that they wanted to avoid violating state constitutional freedoms. In the case of the individual health insurance mandate, it would seem clear that Congress is not concerned with respecting state constitutional protections. This would set up a battle under the U.S. Constitution's Supremacy Clause.

The Supremacy Clause, found in Article VI, reads as follows:

> "This Constitution, and the Laws of the United States which shall be made in Pursuance thereof; and all Treaties made, or which shall be made, under the Authority of the United States, shall be the supreme Law of the Land; and the Judges in every State shall be bound thereby, any Thing in the Constitution or Laws of any state to the Contrary notwithstanding."

Of course, the central question here will be just how the courts will apply this language. The answer may not be as simple as it seems. Despite the text's indication that state laws and constitutions are subject to federal laws and treaties, a look into history shows that several important Founders rejected the idea that Congress could always enforce laws deemed unconstitutional by the states. When in 1798 Congress passed the Alien and Sedition Laws, which made it a criminal offense to publicly criticize certain government officials, James Madison—widely known as the Father of the Constitution—and Thomas Jefferson—author of the Declaration of Independence and the sitting Vice-President—drafted the Kentucky and Virginia Resolutions, in which those states rejected the constitutionality of the acts.[23] The U.S. Supreme Court was not called upon to resolve the question of whether states could legitimately

[23] Madison later said that, in his opinion, these resolutions were primarily useful as tools through which the power of Congress could be called into question—though not necessarily nullified. He believed that similar resolutions would signal to other states the potential necessity of modifying the current system of government to eliminate further abuses.

deny congressional authority in this way, but up until the Civil War different states repeatedly adopted similar measures.[24]

Without any directly applicable judicial precedent, some legal scholars have attempted to guess at how the justices might be inclined to resolve such a conflict between state constitutional liberties and federal laws. One of my colleagues, Clint Bolick, a co-founder of the Institute for Justice and the current leader of a constitutional litigation center at the Goldwater Institute in Arizona, has noted a recent judicial trend in which the Supreme Court has shied away from allowing federal laws to trump state constitutional requirements.[25] This might well signal that the justices are inclined to protect freedoms enshrined in state constitutions, but the only way we will be sure is if the U.S. Supreme Court is presented with a direct conflict. The Health Care Freedom Amendment, if adopted by the people of this state, could provide just such a conflict.

Summing Up

Now that Congress has passed the health care reform law, it will likely be several years before a case evaluating the constitutionality of the individual health insurance mandate reaches the U.S. Supreme Court. In fact, we have already seen a number of lawsuits filed in federal courts. Once the federal district courts have decided that this issue is ripe for adjudication, they are likely to deal with the issues quickly, render a decision, and kick the cases up to the circuit courts. Once the circuit courts have weighed in on the constitutional issues, the Supreme Court will choose the set of facts on which it will base its consideration of the law. Keep in mind that it doesn't have to take the *first* case to get resolved by a circuit court, although it only takes four justices agreeing in order to get a case in front of the Supreme Court.

---

[24] Many northern states refused to enforce the provisions of the Fugitive Slave Acts passed by Congress. Indeed, South Carolina's attempted nullification of a tariff passed by Congress in 1832 nearly sparked secession and armed conflict.

[25] Instead, the Supreme Court has generally tried to avoid finding a direct conflict between federal laws and state constitutional provisions. For example, in *Wheeler v. Barrera*, 417 U.S. 402 (1974), Congress had passed Title I, which required public educational funds to be distributed to disadvantaged children regardless of the schools they attended. This conflicted with Missouri's constitutional prohibitions against public dollars being sent to religious schools. Rather than address this apparent conflict, the Supreme Court noted that the legislative history of Title I suggested that Congress was sensitive to the presence of such state constitutional provisions and that they did not intend to require violation of those provisions. To get around the problem, the Court decided that a separate public fund – which would not be part of the state treasury – would be established as the conduit for Title I funds to the assistance of needy children in religious schools.

When the issue gets in front of the Court, I believe that proponents of the mandate (in other words, the Solicitor General) will have to satisfactorily answer at least two vitally important questions if they are to win a majority: 1) If the Commerce Clause permits Congress to force individuals to purchase goods and services that they do not want, where is the limit of that power - if, indeed, a limit can be articulated?, and 2) Is Congress's interest in (potentially) lowering the cost of health insurance premiums sufficiently compelling as to justify forcing individual citizens against their will to associate with others and to divulge to them all sorts of private information about one's health?

I believe, based on the current composition of the Supreme Court,[26] that the individual health insurance mandate would probably be found unconstitutional, either as a violation of the Commerce Clause or the individual right to privacy. I cannot see any of the four conservative-leaning justices (Roberts, Alito, Scalia, or Thomas) approving such a mandate as an exercise of the Commerce Clause, nor can I see any of the three liberal-leaning justices (Ginsburg, Breyer, and Sotomayor) disapproving the mandate. The deciding factor, then, will be whether Justice Kennedy will go for or against it, and I believe that will largely depend on how the Solicitor General articulates what limits might remain on congressional authority if the mandate is approved.

A more interesting question is how the justices might vote on the question of whether the right to privacy precludes the imposition of an individual health insurance mandate. Justices Thomas and Scalia have both rejected the notion that there *is* any such right to be found in the constitution, making it unlikely that they would rely on this right to strike down legislation as unconstitutional. On the other hand, several of the more liberal justices have previously written passionately about the importance of the right to privacy. It is possible that the privacy question might result in a majority of justices voting to strike down the mandate, but with Scalia and Thomas dissenting on this point.

Either way, it is my opinion that the Supreme Court is likely to find that an individual health insurance mandate violates the provisions of the U.S. Constitution. While the Supreme Court is thus unlikely to reach the question of whether the Health Care Freedom Amendment

[26] The April 9, 2010, announcement that Justice John Paul Stevens would be retiring from the Supreme Court is unlikely to alter this analysis. Justice Stevens was a reliable vote in favor of governmental authority to regulate individual citizens' lives, and he was widely expected to favor the constitutionality of the new health care reform law. Thus, no justice appointed by President Obama will improve the likelihood of the mandate's constitutionality being upheld – and they might actually become a vote *against* the mandate's constitutionality.

would be seen as an additional bulwark for liberty, the adoption of this amendment (and others like it in other states) would at a minimum offer the potential for a case that would test the boundaries of state sovereignty under our current constitutional system.

MEMORANDUM

DATE: **February 15, 2010**

TO: **Representative Mike Kelly**

FROM: **Derek Miller**

RE: **Answers to Questions @ 2/9/10 HESS Hearing**

---

1) **Does HJR 35 prevent the State of Alaska from initiating a new tier to the state retirement system? How would this constitutional amendment impact future changes to the current State of Alaska retirement system?**
This resolution does NOT prevent the State from initiating a new tier to the state retirement system. Changes can be made to the retirement system as long as those changes aren't a mandate on individuals or employers to purchase insurance. The state would also be prohibited from passing laws that penalize or fine individuals or employers from choosing not to purchase coverage.

2) **Does this resolution prevent the federal government from making changes to Medicare, Tricare, Indian Health Services, etc...?**
This resolution does NOT preclude the federal government from doing anything. Individuals would still have the option to participate in the federal health insurance program. This act simply protects a person's right not to participate.

3) **How does this legislation address the problems the HESS committee has looked at? Example: Access, quality, affordability? Are there any fixes in the bill?**
HJR 35 prevents a one-size-fits-all universal coverage system. Alaska legislators must work on a targeted set of policy solutions to cover the uninsured and there are reforms that will advance this goal, along with HJR 35.

4) **Does this bind future legislatures from adopting the program the federal government comes up with?**
Yes, if that program includes mandating individuals and employers to purchase insurance or penalizes individuals for choosing not to purchase insurance. Individuals however, would still have the option to participate in the program.

5) **Does this amendment prevent the state from implementing a plan if it penalized employees and employers for not purchasing health insurance?**
Yes.

Governor Sean Parnell
STATE OF ALASKA

January 13, 2010

The Honorable Lisa Murkowski
United States Senate
709 Hart Senate Office Building
Washington, DC 20510

The Honorable Mark Begich
United States Senate
144 Russell Senate Office Building
Washington, DC 20510

The Honorable Don Young
United States Congress
2111 Rayburn House Office Building
Washington, DC 20515

Dear Senators Murkowski and Begich and Congressman Young,

As Congress contemplates final passage of the proposed health care reform legislation, I ask that you consider the concerns raised by my administration on behalf of Alaska's residents. As I have previously communicated to you, both publicly, and through my staff, the current federal proposal does little to address the main health care issues facing Alaskans – cost and access.

The current health care reform legislation before Congress is troubling on several levels. For the many Alaskans currently unable to afford insurance, the proposal, as outlined by Congress, will do nothing but mandate they purchase it, while increasing the insurance premiums. I am particularly concerned with the increase in costs by the pending legislation for Alaska's seniors, families, small businesses, and physicians. Beyond this burden, which is placed squarely on the shoulders of Alaskans, the legislation will put a significant strain on the State of Alaska's General Fund budget.

In addition to the enormous cost Alaskans would face, the proposal does little to address Alaska's health care workforce shortage; requiring individuals to purchase health insurance does not guarantee that people will have access to health care.

Beyond the practical concerns about the benefits of this legislation that I have raised, I am concerned about the constitutionality of forcing Americans to purchase health insurance. As you know, I have directed Alaska's Attorney General to conduct a review of the reform legislation, including this requirement.

So that you are fully aware of the State of Alaska's concerns, I am including two supplementary documents provided to you over the course of the health care reform debate. The first document updates a previously submitted policy review of the healthcare legislation passed by the Senate. The second document provides Alaska's perspective on the so-called "Nebraska Compromise" whereby the cost of

Medicaid expansion in Nebraska will be indefinitely supported by the federal government. As you will note, this expansion will cost Alaskans $700 million over the first 20-year window of implementation while Nebraskans will not be responsible for paying anything.

Finally, I ask that you consider securing a 100-percent federal Medical Assistance Percentage for services rendered to Native Americans and Alaska Natives outside of Tribal facilities. Such a provision would be advantageous to Alaska and other states with large Native populations. Supporting documents outlining this request have previously been submitted to you.

Thank you for your serious consideration of my concerns regarding the proposed legislation. I look forward to continue to work with you to ensure that Alaskans are treated fairly, and that the health care needs of the citizens of this great state are adequately met.

Sincerely,

Sean Parnell
Governor

Policy Considerations

Insurance Market Reforms
Guaranteed issue and guaranteed renewal rules would be imposed on all individual and small group plans, and exclusions for preexisting conditions and annual or life time caps would be prohibited. Rating rules would limit variations in premiums to geographic area, tobacco use, age, and family composition.

Guaranteed issue and renewal, modified community rating rules, and preexisting exclusions could be very problematic and potentially drive the cost of insurance premiums up significantly unless there is sufficient participation in the individual and small group markets to spread the risk. It could be anticipated that some employers and low risk individuals may chose to face tax penalties rather than enroll in insurance plans, leading to adverse selection.

Any insurance market rating reforms must provide adequate time to transition to new federal minimum standards and preserve state regulatory authority to ensure consumer protections.

Health Insurance Exchange Sec 1311
By 2014 states would be required to establish, using federal grant funds, an insurance exchange for individual and small group markets. Large employers may participate beginning in 2017. Insurers operating in the state, or multistate plans operating under this proposal, would be required to participate in the exchange. The exchange would develop standardized enrollment forms and formats for comparing plans. Individuals could only receive tax credits if they purchase coverage through the exchange. Exchanges must be fiscally self sustaining beginning Jan. 2015.

A health insurance exchange could assist individuals and groups to comparison shop for insurance and potentially enhance competition in the insurance market. This proposal envisions exchanges as tools for aggregating the risk of individual and small group coverage resulting in premium reductions. Should an exchange be required by law, an Alaska-based and administered exchange, or a state option to join with other states in a multi-state exchange, would be preferred over a national model.

The administrative and regulatory challenges will be very complex particularly considering that the legislation is overly prescriptive of operational requirements. There also appears to be potential for confusion between the role and authority of the Secretary of HHS and state insurance regulatory responsibilities. Becoming fiscally self sustaining can be a significant issue in a state such as Alaska where there is a very limited pool of insurers and the Exchange fees, whether on the plans or individuals, adds additional cost to already high insurance premiums.

The language should be modified to ensure maximum state flexibility to design and operate exchange mechanisms that facilitate the purchase of insurance.

Individual and Employer Mandates

The bill would require individuals to purchase at minimum a basic plan (that would cover 65% of health care expenses) beginning 2013, and would impose a tax penalty (graduated based on income) on those who do not enroll. Employers with more than 50 employees would be required to pay a tax for each employee who receives a tax credit through a state exchange.

Individual Alaskans and Alaska's business community are likely to oppose such mandates, which essentially translate into a new tax on families and individuals who currently do not have health insurance. Also, because the state's workforce includes a high level of seasonal and part-time employees, mandates would be difficult to track and enforce.

Medicaid Expansion Sec 2001

Beginning Jan. 2014 the bill expands Medicaid coverage for all legal residents up to 133% FPL, including childless adults. Income disregards would be prohibited and eligibility would be determined based on adjusted gross income through the annual IRS income tax reporting. The bills impose maintenance of effort requirements on eligibility, which means that eligibility standards and categories of eligibility cannot be reduced or made more stringent. The proposals also mandate new eligibility groups and additional benefits, again creating an additional cost to the state.

While the bill proposes significant increases in FMAP rates (91% in the House bill and about 82% in the Senate bill) to cover increased program costs to states for the expansion, the full cost of expansion is not assumed by the federal government, and there is no guarantee the higher FMAP levels would be maintained. The State of Alaska opposes new unfunded federal mandates. Requiring additional matching state funds is not viable in the current economic recession, the expected states' budget shortfalls anticipated over the next several years, and the competing state General Funds needs for education, corrections, public safety, etc.

New programmatic mandates, as outlined in the bill, will further exasperate this concern.

It is important to note that state participation in Medicaid is voluntary, but if a state chooses to participate then all of the federal requirements must be met. It may be that a state or some states are facing such severe economic difficulty in 2016 when significant state costs begin that opting out of Medicaid participation may become the only viable option in order to maintain other state programs.

Additionally, a huge increase in administrative burden and costs would be assumed by states to manage the expansion without an enhanced FMAP. This burden will be compounded by the proposed new eligibility processes which are very different from the current process, resulting in significantly increased costs to states to implement the change, while maintaining the current eligibility process for other programs, such as food stamps and TANF. In particular, an enhanced FMAP is needed to accommodate costs of enrollment for the currently eligible but not enrolled population.

Any Medicaid expansion should not increase costs to the state or include new unfunded mandates. Congress should include a 100% federal share for expansion.

Medicaid Quality Subtitle I
Establishes Medicaid Quality Measurement Program. Prohibits payments for health care acquired conditions. Establishes a bundled payment demonstration project.

Non-payment for services related to health care acquired conditions should serve as an effective incentive for health care providers and facilities to reduce infection and medical error rates. A demonstration project that comprehensively tests payment bundling to determine viability and effectiveness of this methodology may be a first step toward payment reform. Development of a quality measurement program will support Alaska's vision of moving toward performance-based purchasing for Medicaid.

CHIP(DKC) Sec 2101
The House version ends CHIP in 2014 and children then obtain coverage through the Exchange or Medicaid. The Senate continues CHIP to 2019 and provides a 23% FMAP boost the last three years.

CHIP programs have been well supported throughout the states and considered quite successful in insuring children. It is likely Congress will have significant difficulty ending CHIP as a distinct program and merging it with Medicaid or Exchange coverage. Continuation as proposed by the Senate will save some GF the last three years, however it is unlikely Congress will end the program.

Should these provisions remain intact, the state requires maximum flexibility to transition children into Exchange plans.

Definition of Medical Assistance
Redefines "medical assistance" in the Medicaid program to include both the means of payment of part or all of the cost of medical care and the services and care themselves.

Based on past Ninth Circuit Court of Appeals decisions, this proposed change would increase lawsuits against states. As a result, states will lose much of their ability to control programs and expenditures.

This new definition should be deleted.

Maternal and Child Health Sec 2951
Establishes new federal grant program or optional Medicaid service expansion for early childhood home visitation programs

Alaska (DHSS) would seriously consider developing this program if federal resources become available and operational control is minimized at the federal level. Research-based home visitation models have demonstrated good return on investment and positive outcomes for families, including improved maternal and newborn health, child development and early identification of problems, school readiness, juvenile delinquency and family self sufficiency.

Promoting Disease Prevention and Wellness Title II

Authorizes incentives for Medicare and Medicaid enrollees who complete healthy lifestyles programs. Creates new Medicaid state plan option for "health homes" providing care coordination/management and health promotion (among many other services) through integrated care teams for enrollees with multiple chronic conditions. Incentivizes states to cover preventive services and immunizations under Medicaid. Appropriates funding for Childhood Obesity Demonstration Project.

Improving health and wellness behaviors of Medicaid recipients is important for their long term health, though educating recipients and providers about the proposed incentives and also tracking recipient compliance might prove to be a challenge. Also, financial incentives alone for completing a healthy lifestyle program cannot be expected to automatically translate into improved behaviors, but should be accompanied by programs (such as the proposed Childhood Obesity Demonstration Project) that address the barriers individuals face to engaging in healthy behaviors.

Alaska could benefit from a Medicaid option that would provide a mechanism to reimburse for the services of integrated health care teams serving as the medical "health" home for Medicaid recipients with multiple chronic conditions.

Payment Reform Sec 2705
Establishes CMS Innovation Center to test new provider payment models, and pilot program to encourage improved coordination of care between hospitals, physicians, and post-acute providers through payment bundling.

Alaska's private medical sector is behind most states in development of integrated care systems, and there are no health maintenance organizations in our state. Encouraging service integration through new payment mechanisms could help improve the efficiency of Alaska's health care delivery system.

Workforce Title V
Provides 10% Medicare bonus for primary care providers and general surgeons practicing in HPSAs; redistributes unused graduate medical education training slots and encourages residencies in outpatient settings, and proposes a number of committees, studies and pilot projects related to health workforce development. The senate version appropriates significant funds for the National Health Service Corp and various other sections of this expansive provision, including loan repayment and retention funding.

The proposal does not go far enough in supporting the development of the health care workforce. Ensuring an adequate supply and distribution of health care workers is as essential (if not more so) to increasing access to health care as expanding access to health insurance. To support health workforce development, additional resources above and beyond the provisions in these bills need to be provided for training and for recruitment.

It does not appear that the significant reimbursement changes needed to encourage and support primary care practitioners are present in the legislation..

Title V – Fraud, Waste, and Abuse

Proposed strategies for reducing fraud, waste and abuse in Medicare and Medicaid include a new provider enrollment process, data sharing across federal programs, increased penalties, and requirement for providers to implement a compliance program.

Though fraud and abuse are significant concerns, these proposals, in addition to current requirements, will increase costs and increase procedural requirements imposed on providers. These proposals may serve as a deterrent to provider participation in Medicare and Medicaid, further decreasing access to care and services for Alaskan enrollees.

Congress has created fraud and abuse detection and compliance programs in addition to other such programs. It appears that there is minimal coordination or collaborative effort to determine what works and is cost effective. Federal auditors and contractors overlap and overlay with state and other federal fraud and abuse efforts. While this is all well intended, it appears to be duplicative and ineffective. Congress and the administration should examine all of the current programs and proposed programs to find cost effective methods to better combat fraud and abuse across all private and public programs.

Revenue Items

Proposal increases revenue to partially cover cost of service expansion through taxes on insurers, drug companies, medical device makers, laboratories, and high cost insurance plans.

The proposed new taxes on the health care sector is likely to increase costs to the consumers and government health care programs, potentially off-setting the income generated by these new fees.

"Cadillac Plan" taxation in the Senate version would affect AlaskaCare plan members, and raises questions about who or what entity would be liable for the tax, and if the State plans are considered "insurance companies." If the tax is levied on insurance companies, can the Federal Government tax the State? Are retiree health trusts similarly "insurance companies" subject to tax?

Community Living Assistance Services and Supports Sec 8001

Both bills propose a national voluntary long term care insurance financed by wage based premiums. The senate bill requires a long term actuarially sound benefit of at least $50/day.

This may be of some benefit to individuals permit them to remain in their own homes longer. However, a benefit of at least $50/day will not cover the significant cost of assisted living. It will only supplement other payers or perhaps briefly delay eligibility for public programs. To the degree that it delays eligibility for Medicaid or offsets Medicaid payments this will benefit states, but likely not to a significant extent.

Indian Health Care Reauthorization Act Sec 10221

Both bills have differing versions of reauthorization. This is important to Alaska as this act has not been reauthorized for many years and new provisions should strengthen the tribal health care organizations, which benefits the state.

For the first time federal law will recognize that tribal services are no longer linked to provision in a facility, but can be provided in the community. This clearly allows tribal organizations to

expand into providing long term care services for their beneficiaries, which several in Alaska wish to do. This is important in securing 100% FMAP for these Medicaid services. (*See discussion paper on tribal 100% FMAP).* In addition there are programs to increase Indian health care workforce, new models of behavioral health delivery and disease prevention and youth suicide prevention, all items that could benefit Alaska.

Medicaid Pharmacy Changes Sec 2503

Beginning January 2010, both the House and Senate bills increase the federal Medicaid drug rebate minimum level for brand and generic products.

While these proposals will increase the federal rebate dollars, the net effect will be to decrease the state drug rebate collection. Currently Alaska and many other states collect supplemental drug rebates above the federally mandated amount. Increasing the federally mandated base rebate lessens or eliminates the supplemental rebate states have been collecting. In addition, the savings attributable to the new rebate bands accrue only to the federal government. These savings should be shared between the state and federal government as under current law.

Increase Funding for Federally Qualified Health Clinic Sec 5601

The House bill increases funding by $12 billion over 5 years and the Senate bill provides $33 billion over 6 years.

New funding can be used to expand current public capacity as well as build new capacity. This will be critical in creating access for Medicare, Medicaid and tribal beneficiaries as the other provisions in these bills do not significantly address workforce and private reimbursement issues.

Considering Alaskans' reliance on FQHCs, it is imperative that the state receive a large allocation.

Medicare Subtitle B

The bills phase in payment reductions to Medicare Advantage plans, develop quality measures and payment models, begins to reduce the 'doughnut hole' for Medicare pharmacy and other extensive changes.

The changes to Medicare Advantage plan reimbursement will likely have minimal impact upon Alaskans. It appears that the few plans operating in Alaska were recently pulled. Closing the "doughnut hole", while apparently phased in slowly, will eventually provide significant out of pocket cost savings for Medicare eligible Alaskans that have significant drug usage. Individual savings will be determined by the rate at which the "doughnut" hole is closed. This has yet to be resolved by the legislation.

These bills do not address the physician payment reductions that result from the Sustainable Growth Formula. Until resolved, it is likely to dampen provider willingness to serve Medicare eligible patients.

State as Employer Considerations

1. *Excise tax on insurers for employer-sponsored health plans: a 40% tax on value above $8,000/individual and $21,000/family for 2013 and indexed on CPI beginning 2014. The threshold amounts will be increased for retirees and employees engaged in high risk professions by $750/individual and $2000/family.*
    - Value is defined broadly as the aggregate value of all employer-sponsored health insurance coverage, including coverage in the form of reimbursement under a Health flexible spending/reimbursement arrangement, dental and vision coverage and other supplementary coverage. First, it is not clear that state governmental plans are included; clarification is necessary. Second, if the state is subject to this bill and provision, it would be taxed to some degree.

2. *New fees on segments of health care sector including annual fee on health insurance sector.*
    - Unclear whether state's self-insured healthcare programs would be included as insurance sector.

3. *Plans report proportion of premium dollars spent on administrative expenses.*
    - Self-insured plans use a per capita fund accumulation and are not-for-profit, unclear if this will affect the state.

4. *Large employers prohibited from annual and lifetime limits.*
    - State plans have annual limits for some coverage, lifetime unlimited for Actives, $2mm for Retirees.

5. *Preventive care must be covered 100% or value based design.*
    - Will require changes to state's plans. "Preventive Care" is ill-defined; costs unknown. "Value-based" also poorly defined, but may result in lower payments on behalf of members who do not follow protocols. Impact unknown.

6. *Maximum out-of-pocket limit.*
    - Will require changes to state's plans. Impact unknown.

7. *Plan applicability uncertain – Retiree Plans.*
    - Uncertain if applicable to retiree plans. Alaska is a rare pre-funder of retiree health obligations. Uncertain if SB125 contributions and/or investment returns will be considered in measuring excise tax triggers. Plan design changes may violate Alaska Constitution if perceived as "diminishment."

Health Care Reform Medicaid Cost Gap Analysis
Applying the "Nebraska Compromise" to Alaska

Health care reform, as passed in the Senate, contained the so-called "Nebraska Compromise." This provision states that new Medicaid spending in Nebraska would be funded at 100% by the federal government. The Alaska Medicaid Budget Group performed an analysis to determine the amount of funding that the state would receive for the newly eligible Medicaid population should Alaska benefit from a similar provision. Over the 20-year period from 2017 to 2036, the cost of covering this newly eligible Medicaid population will amount to over $700 million in state general funds. In this scenario, additional annual state general fund spending will increase from $17 million in 2017 to approximately $60 million in 2036.

These figures were determined by using the most recent 3-year average of uninsured adults; estimated population growth among adults; estimated health care inflation (3.4%); and an estimated increase in utilization of Medicaid services (2.1%/year).

Children at or below 133% of the Federal Poverty Level are currently eligible for Medicaid and are not included in the newly eligible group. In determining these figures, the Alaska Medicaid Budget Group assumed that only 75% of newly eligible non-Natives adults and 50% of newly eligible Native adults would enroll.

Care provided at Indian Health Service (IHS) facilities for current and newly eligible Alaska Native adults would be covered at a 100% Federal Medical Assistance Percentage (FMAP). The above calculation assumes that two-thirds of all care for newly enrolled Alaska Natives would be provided at IHS facilities and one-third of care would be provided at non-IHS facilities. Care provided at non-IHS facilities would be reimbursed at the FMAP set for the newly eligible non-Native population.

Finally, it is difficult to assume the final cost to the state per new Medicaid enrollee. In response, the Alaska Medicaid Budget Group assumed that new enrollee cost would amount to $3540 per person in 2009. This amount equates to the average costs for the Family Medicaid and Transitional Medicaid groups. Given the data currently available, this is the most reasonable cost estimate available; actual costs may be much higher.

January 13, 2010

The Honorable Harry M. Reid
Majority Leader
United States Senate
Washington, D.C. 20510

The Honorable Mitch McConnell
Minority Leader
United States Senate
Washington, D.C. 20510

The Honorable Nancy Pelosi
Speaker
U.S. House of Representatives
Washington, D.C. 20515

The Honorable John Boehner
Minority Leader
U.S. House of Representatives
Washington, D.C. 20515

Dear Senator Reid, Senator McConnell, Speaker Pelosi, and Representative Boehner:

As governors, we believe the reform of the health care system can be very beneficial to our nation's economic future and the well-being of our citizens; however, the current health care bills are a lost opportunity to improve the lives of Americans, create a sustainable system of health care and help stabilize both our state and national economies.

Health care reform should be about fixing our broken Medicaid and Medicare systems; instead, the current health care bills entitle 15-20 million more people to Medicaid. While providing health care to low income individuals is important, the net result of this entitlement expansion will be a significant cost shift to those privately insured around the country. According to the Congressional Budget Office (CBO), the unfunded mandate to states and territories is $25 billion; although many states disagree with that figure. For example, Texas costs are estimated to be $21 billion over ten years.

The National Association of State Budget Directors (NASBO) has demonstrated states/territories are in no position to comply with the maintenance of effort provisions found in the bills or to accept any increased costs or additional administrative burdens to expand Medicaid. State general fund expenditures have dropped for the second year in a row. The December 2009 survey shows that the budget situation faced by states truly is unprecedented. Many states cannot afford their current share of the Medicaid program, and they will also have to face a funding cliff whenever the stimulus-enhanced FMAP dollars are exhausted. States have already been forced to cut vital services with 30 states cutting education, 29 states cutting Corrections, and 28 states already cutting Medicaid.

Current federal proposals would strip the states of our ability to negotiate Medicaid provider rates, and we believe that states and territories should be allowed to negotiate Medicaid provider rates as found in current law. The pending bills cause states and territories to lose money through the bills' treatment of the prescription drug rebate provisions. States and territories also should not be asked to forego a share of the savings from any new Medicaid rebates collected for the dual eligible population receiving prescription drugs through the Medicare Part D program.

These bills also impose a one-size-fits all federally-designed health insurance exchange and the insurance rating rules tie states' and territories' hands. Health insurance exchanges desired by any state should be state-based and state-designed to ensure maximum state flexibility to design and operate exchange mechanisms that facilitate the purchase of insurance. Utah should not be forced to replicate Massachusetts' exchange, and vice versa. In the same vein, the health insurance rating rules should account for the existing variation in state and territory statutes and the state and territory should retain the authority to provide oversight and adopt tighter rating bands if necessary.

In order to pay for the bills, the legislation cuts Medicare $571 billion in the House bill and $466.7 billion in the Senate bill. Also included are far-reaching massive tax increases which will impact American individuals and families at all income levels. From employer mandates and taxes on high-value insurance plans to taxes on both branded and generic drugs and medical devices, these bills are funded, and thereby the bills' costs are lowered, by taking more from taxpayers and reforming the health care system less. In particular, the Senate's $6.7 billion insurance premium tax will be passed directly to consumers and will impose new costs on Americans who already have coverage. The unfunded mandates to states likely will require many states to necessarily raise taxes, too.

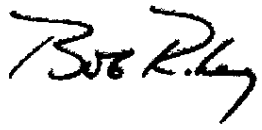
Although CBO has scored the Senate bill at $842 billion and the House bill at $1.3 trillion both bills are full of budget gimmicks. The bills delay spending until the fourth year and exclude the costly "Doc Fix" which ignores the over $200 billion price tag associated with stopping the unavoidable cuts to physicians under the Medicare program.

Governors agree we should work to enhance the quality of health care while making it more affordable and efficient. Unfortunately, the opportunity to truly lower the cost of care has been lost in the rush to try to finish health reform. Both CBO and the Chief Actuary of the Centers for Medicare and Medicaid Services have warned the current legislation will increase the overall costs of health care. The federal government and the states should refocus efforts to lowering the cost of care which will in turn increase coverage, but simply increasing the number of individuals on the public plans without a plan to improve the public programs for participants is irresponsible.

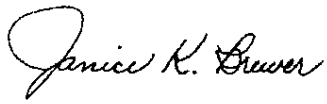
At this juncture, small businesses, seniors, states and territories, and taxpayers have anxiety about Congress' pending health care legislation and rightfully so-- one-sixth of our GDP is at stake. As Republican Governors, we believe in a system which eliminates red tape, empowers consumers to engage in making good health care decisions in the private market, and guarantees affordable coverage for patients with preexisting conditions. Missing from this important legislation is real medical liability reform and provisions which protect seniors' Medicare benefits and access to care. Several states have already implemented medical liability reform with good results; no real medical reform can be accomplished without tort reform. Instead, premiums are increased and small businesses are faced with onerous mandates rather than given the power to pool together and offer health care at lower prices, just as corporations and labor unions do.

Along with the majority of Americans and as leaders of 20 states and territories, we are disappointed with the lack of transparency. We urge you not to circumvent the normal committee process and to conduct an open, fully-bipartisan negotiation. It is time to slow down and pass meaningful health care reform, not hastily prepared partisan legislation which omits reform and saddles American taxpayers for generations to come.

Sincerely,



Governor Bob Riley, Alabama



Governor Jan Brewer, Arizona

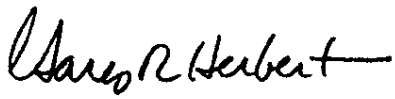
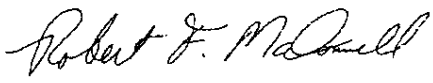
Governor Mike Rounds, South Dakota

Governor Rick Perry, Texas



Governor Gary Herbert, Utah



Governor-elect Bob McDonnell, Virginia

AMERICAN LEGISLATIVE EXCHANGE COUNCIL

Questions and Answers: ALEC's *Freedom of Choice in Health Care Act*

For more information, contact Christie Herrera, director of ALEC's Health and Human Services Task Force, at (202) 742-8505 or christie@alec.org.

Why does my state need the *Freedom of Choice in Health Care Act*?
Efforts in our state capitol, and in Washington, are gaining steam to put complete control over your health care in the hands of government bureaucrats and appointed "experts." Government control means you will have less freedom to make the health care choices that are best for you and your family. The *Freedom of Choice in Health Care Act* will protect your health care freedom from these threats.

What does the *Freedom of Choice in Health Care Act do*?
The *Freedom of Choice in Health Care Act* will preserve and protect your right to make your own health care and health insurance choices. Specifically, it would protect your right to pay directly for medical care, and it would prohibit any individual or employer from being penalized for not purchasing government-defined health insurance.

Why should my state's constitution protect the right of patients to pay directly for medical care?
Single-payer systems, like in Canada, make it illegal for citizens to go outside of the government's health care plan and contract for their own medical services. The *Freedom of Choice in Health Care Act* would make this fundamental provision of Canadian-style, single-payer health care unconstitutional.

Patients should have the right to pay directly for medical services with their own money. When consumers control the dollars, they make the treatment decisions. When the government controls the dollars, they make treatment decisions based on what's best for the government, not what's best for the patient.

The consequences of government making medical decisions are often dire, and sometimes deadly. In New Zealand, breast cancer patients were blocked from accessing the lifesaving drug Herceptin because it cost too much. In Sweden the wait for heart surgery can be as long as 25 weeks. In Canada more than 800,000 patients are currently on waiting lists for medical procedures.

The *Freedom of Choice in Health Care Act* will ensure that patients, not government bureaucrats, decide which doctor to see or what medical treatments to get.

More information about the consequences of single-payer health care can be found in:

* Michael Tanner, "The Grass Is Not Always Greener: A Look at National Health Systems Around the World," Cato Institute Policy Analysis No. 613, March 18, 2008: http://www.cato.org/pubs/pas/pa-613.pdf.

* John C. Goodman, Linda Gorman, Devon Herrick, and Robert M. Sade, *Health Care Reform: Do Other Countries Have the Answers?*, National Center for Policy Analysis, March 10, 2009: http://www.ncpa.org/pdfs/sp_Do_Other_Countries_Have_the_Answers.pdf.

* http://BigGovHealth.org: A website with "single-payer horror stories" and fact sheets on the U.S. and worldwide infant mortality/life expectancy statistics; whether the U.S. Veterans Administration is a model for health reform; and much more.

Why should my state's constitution block penalties for individuals or employers who don't purchase health insurance?

It is important for people to have health insurance coverage, but a government requirement to purchase health insurance is ineffective, bureaucratic, and costly. The *Freedom of Choice in Health Care Act* would strike at heart of individual and employer mandates—implemented in Massachusetts, Hawaii, and elsewhere—that just don't work.

In Massachusetts—a state that imposed an individual mandate and an employer mandate in 2006—more than 1/3 of their uninsured still don't have coverage; health insurance is 40% more expensive than in the rest of the country; it's getting harder to see a doctor since before "reform" was enacted; and legislators expect a $2-$4 billion shortfall over the next decade.

The Massachusetts mandate didn't just affect the uninsured. The Massachusetts government actually told 20% of its already-insured citizens to buy more health insurance, because their existing coverage wasn't "good enough." When the government enforces a requirement for people to buy health insurance, they need to define what "insurance" is. The Cato Institute estimates that a federal individual mandate will force 100 million Americans to drop their existing plans and buy more expensive health insurance that is "good enough" for bureaucrats.

Employer mandates don't yield universal coverage and are harmful for consumers and workers. Hawaii has had a "pay or play" employer mandate for 35 years, and yet the number of uninsured has remained the same because employers shifted jobs to (exempt) part-time employees. And when the government forces businesses to buy health insurance for their

workers, it really means higher taxes and fewer jobs. When businesses face cost increases, they'll pass on those costs in the form of increased prices, job cuts, or wage freezes.

An individual mandate would harm patients, and an employer mandate would threaten our fragile economy. The *Freedom of Choice in Health Care Act* would protect our citizens from these threats.

More information about the consequences of individual and employer mandates can be found in:

* Michael Tanner, "Massachusetts Miracle or Massachusetts Miserable: What the Failure of the 'Massachusetts Model' Tells Us About Health Reform," Cato Institute Briefing Paper No. 112, June 9, 2009: http://www.cato.org/pubs/bp/bp112.pdf.

* James Sherk and Robert A. Book, "Employer Health Care Mandates: Taxing Low-Income Workers to Pay for Health Care," Heritage Foundation WebMemo No. 2552, July 21, 2009: http://www.heritage.org/Research/HealthCare/upload/wm_2552.pdf.

Does supporting the *Freedom of Choice in Health Care Act* mean that I favor "free riders" who choose to not purchase health insurance and then show up in the emergency room?
Free riders do present a cost-shifting problem as uncompensated care costs are borne by the already-insured—although researchers estimate uncompensated care to be just 2-3% of overall health costs. The Massachusetts data reveal that at best, an individual mandate didn't affect ER visits at all—and at worst, an individual mandate actually increased ER usage by 17%.

The Massachusetts example shows that an individual mandate alone will not decrease ER usage. One Massachusetts survey reported that although the newly-insured had "insurance coverage" on paper, 90% of them did not have access to care from a non-ER provider. Other reports indicate that average wait times to get appointments with doctors in Boston ranged from 21 days for cardiologists to 70 days for obstetrician-gynecologists. And the Massachusetts Medical Society reports that the average wait to see a primary care doctor is 36 days.

Lawmakers cannot artificially create a growing demand for care without other policies (encouraging "minute clinics," enacting medical liability reform to encourage more doctors to practice, loosening scope of practice laws, etc.) to encourage healthcare supply. And those reforms can be achieved without a bureaucratic, ineffective, and costly requirement to

purchase health coverage.

More information about the why an individual mandate won't solve the "free rider" problem can be found in:

* Minna Jung, "What Massachusetts Teaches Us About Emergency Departments and Reform," Robert Wood Johnson Foundation's User's Guide to the Health Reform Galaxy Blog, October 5, 2009: http://rwjfblogs.typepad.com/healthreform/2009/10/what-massachusetts-teaches-us-about-emergency-departments-and-reform.html.

* Liz Kowalczyk, "ER Visits, Costs in Massachusetts Climb," *Boston Globe*, April 24, 2009: http://www.boston.com/news/local/massachusetts/articles/2009/04/24/er_visits_costs_in_mass_climb/.

Does the *Freedom of Choice in Health Care Act* only benefit insurance companies?
The *Freedom of Choice in Health Care Act* prohibits the forced purchase of private health insurance plans. This benefits patients, not insurance companies.

How will the *Freedom of Choice in Health Care Act* affect Medicaid, SCHIP, or Medicare?
The *Freedom of Choice in Health Care Act* will not in any way impact the funding of, or functioning of Medicaid, SCHIP, or Medicare. The language "This section does not affect laws or rules in effect as of January 1, 2009" clarifies this matter. Citizens will be free to participate in any safety net program (Medicaid, Medicare, SCHIP) to which they are entitled, as well as participate in any proposed programs (the public option or the national health insurance exchange) as they do today. The *Freedom of Choice in Health Care Act* simply ensures that citizens are not forced into these programs.

Does the *Freedom of Choice in Health Care Act* enable my state to block any kind of federal health reform?
No. The *Freedom of Choice in Health Care Act* would not attempt to block implementation of any federal law as long as the federal law does not require an individual/employer mandate, or forbid patients from paying directly for medical services.

Congress is still debating health reform. Doesn't this solve a problem that doesn't yet exist?
Two hundred and twenty years ago, some founders questioned the need for the Bill of Rights to be included in the U.S. Constitution. Eventually, they realized that the Bill of Rights was essential in protecting the people from a powerful central government. Today, the First through Tenth Amendments preserve our freedoms—and the *Freedom of Choice in Health Care Act* will protect our right to health care freedom in the same way.

But this is more than an issue of federal encroachment. Threats of single-payer health care, or of an individual/employer mandate, also exist at the state level. In 2009, 14 states introduced legislation to enact state-based, single-payer health care. Countless other states have proposed requirements for individuals or employers to purchase health coverage or else pay a fine to the state. The *Freedom of Choice in Health Care Act* would make these state-based assaults on patients' rights unconstitutional.

Does supporting the *Freedom of Choice in Health Care Act* mean that I am against health reform? Doesn't this tie our hands with future reforms?
No. The *Freedom of Choice in Health Care Act* simply states that the cornerstone of any future health care reform must be the preservation and protection of patients' rights.

GOLDWATER
INSTITUTE

The Health Care Freedom Act:
Questions & Answers

by Clint Bolick, Litigation Director, Goldwater Institute

The Health Care Freedom Act will appear as a proposed constitutional amendment on Arizona's 2010 election ballot, and similar measures are under consideration in more than 30 other states. With the possibility that Congress will enact some sort of national health insurance legislation, questions are being raised about the scope of the Health Care Freedom Act and its effect should a federal bill become law. In the following pages, Clint Bolick, who helped to author the Health Care Freedom Act, answers frequently asked questions.

Q: What is the Health Care Freedom Act?

A: The Health Care Freedom Act is a proposed amendment to the Arizona Constitution that would preserve certain existing rights that individuals have regarding health care. It was initially proposed by two Arizona physicians, Dr. Eric Novack and Dr. Jeffrey Singer, with drafting assistance from the Goldwater Institute. The measure qualified as a voter initiative on the 2008 ballot, and despite a well-financed opposition campaign, it was defeated by less than one-half of 1 percent of the vote. Changes were made to address concerns raised by the opponents, and the Arizona Legislature voted to refer the revised version to the 2010 ballot.

The American Legislative Exchange Council adopted model legislation based on the Arizona measure, and activists and legislators in at least 35 additional states are pursuing constitutional amendments or statutes based on the Arizona model.

Q: What are the key provisions?

A: Although the precise language varies from state to state, the Health Care Freedom Act seeks to protect two essential rights. First, it protects a person's right to participate or not in any health care system, and prohibits the government from imposing fines or penalties on that person's decision. Second, it protects the right of individuals to purchase—and the right of doctors to provide—lawful medical services without government fine or penalty. The Health Care Freedom Act would place these essential rights in the state constitution (or, in some states, it would protect them by statute).

Q: What motivated the Health Care Freedom Act?

A: No one questions the need for serious health care reform. However, the proponents of the Health Care Freedom Act believe that regardless of how such reform is fashioned, either at the state or federal level, the essential rights protected by the Health Care Freedom Act should be preserved. Many advocates of a larger government role in regulating or providing health insurance support a mandate that would compel individuals to join a government-approved health insurance plan, whether or not they can afford it and whether or not the system best fits their needs. In some countries in which government plays a large role in providing health insurance, medical services are rationed and individuals are prevented or discouraged from obtaining otherwise lawful medical services. Supporters of the Health Care Freedom Act have a variety of perspectives on the form that health care reform should take. But they agree that no matter what legislation is passed, it should not take from Americans their precious right to control their own medical affairs.

Q: By what authority can states pass the Health Care Freedom Act?

A: It is well-established that the U.S. Constitution provides a baseline for the protection of individual rights, and that state constitutions may provide additional protections—and all of them do. For instance, some states provide greater protections of freedom of speech or due process rights. Because the Health Care Freedom Act offers greater protection than the federal constitution, states are allowed to enact it.

Q: Does it matter whether the Health Care Freedom Act is passed as a statute or as a constitutional amendment?

A: A state constitution is the organic law of the state, reflecting the most fundamental values shared by the citizens of the state. Moreover, a state constitutional amendment will ensure the state legislature can never infringe upon the protected rights. So a constitutional amendment is preferable, especially to protect against legislative tinkering. However, for purposes of a federalism defense against excessive federal legislation, it should not matter whether the people of the state have acted through their constitution or by statute.

Q: Does the Health Care Freedom Act attempt to "nullify" federal health insurance legislation?

A: Absolutely not. If federal legislation is enacted, individuals would still have the option to participate in federal health insurance programs. This act simply protects a person's right not to participate.

Q: To the extent that the Health Care Freedom Act conflicts with provisions of federal legislation, isn't the state law automatically preempted by the Supremacy Clause of the U.S. Constitution?

A: No. In any clash between state and federal provisions, at least four federal constitutional provisions are relevant. The Supremacy Clause establishes the Constitution as the supreme law of the land and provides that federal laws prevail over conflicting state laws where Congress has the legitimate authority to enact the legislation and where it does not impermissibly tread upon state sovereignty. The federal government will have to demonstrate that its legislation legitimately is derived from congressional authority to regulate interstate commerce. It will also have to show the legislation does not violate the 10th Amendment, which reserves to the states all government power not expressly delegated to the national government; and the 11th Amendment, which protects states from being used as mere instrumentalities of the national government. This constitutional construct is known as federalism.

Q: Are certain provisions of proposed federal health care legislation vulnerable to constitutional challenge even without the Health Care Freedom Act?

A: Yes, in at least three ways. First, to the extent that the legislation purports to regulate transactions that do not directly affect interstate commerce, such as mandating insurance for individuals, Congress may lack authority to do so under the Commerce Clause. Several relatively recent decisions by the U.S. Supreme Court have invalidated federal legislation on this basis. In *U.S. v. Lopez* (1995), the Court struck down federal laws that restricted guns in school zones; and in *U.S. v. Morrison*, it struck down a federal statute involving violence against women. In both cases, the Court found the subject matter of the federal laws did not "substantially affect" interstate commerce, so Congress had no power to regulate it under the circumstances presented.

Second, to the extent the legislation interferes with the individual's right to choose health insurance providers, doctors, or lawful medical services, it may violate the right to medical self-determination recognized under the U.S. Constitution. As the Court declared in *Griswold v. Connecticut* (1965), "We have recognized that the special relationship between patient and physician will often be encompassed within the domain of private life protected by the Due Process Clause." Several of the early abortion cases involved what Justice William O. Douglas, concurring in *Doe v. Bolton* (1973), described as the "right to seek advice on one's health and the right to place reliance on the physician of one's choice." Whether or not one agrees with those abortion rulings, they establish a strong basis for challenging certain federal and state intrusions.

Third, several recent decisions have invalidated federal laws that "commandeer" state governments to do their bidding. In *New York v. United States* (1992), for instance, the Court struck down federal rules requiring states to take ownership of certain radioactive waste and to expose themselves to liability. Speaking for the Court, Justice Sandra Day O'Connor ruled that

"no matter how powerful the federal interest involved, the Constitution simply does not give Congress the authority to require the States to regulate." Tellingly, she added "the Constitution protects us from our own best intentions: It divides power among sovereigns . . . precisely so that we may resist the temptation to concentrate power in one location as an expedient solution to the crisis of the day." To the extent that federal health insurance legislation forces states to implement its provisions, it could be subject to robust constitutional challenge.

Q: Could the Health Care Freedom Act provide additional protection against federal health insurance legislation that violates protected rights?

A: Yes. Although the federal government usually prevails in federalism clashes, the current U.S. Supreme Court is the most pro-federalism Court in decades. There are no cases precisely on point, but the Court under Chief Justice John Roberts has sided with the states in at least three major recent federalism clashes. In the case most closely on point, *Gonzales v. Oregon* (2006), the Court upheld the state's "right-to-die" law, which was enacted by Oregon voters, over the objections of the U.S. Attorney General, who argued that federal law pre-empted the state law. Applying "the structure and limitations of federalism," the Court observed that states have great latitude in regulating health and safety, including medical standards, which are primarily and historically a matter of local concern. Holding that the attorney general's reading of the federal statute would mark "a radical shift of authority from the States to the Federal Government to define general standards of medical practice in every locality," the Court interpreted the statute to allow Oregon to protect the rights of its citizens.

Horne v. Flores (2009) considered a measure adopted by Arizona voters to require English immersion as the state's educational policy for students for whom English is a second language. Lower federal courts had imposed an injunction based on a finding that Arizona was failing to comply with federal bilingual education requirements. The Supreme Court held that injunctions affecting "areas of core state responsibility, such as public education," should be lifted as quickly as circumstances warrant. It observed that "federalism concerns are heightened when . . . a federal court decree has the effect of dictating state or local budget priorities." The Court remanded the case to lower courts to reconsider the injunction.

In *Northwest Austin Municipal Utility District No. 1 v. Holder* (2009), the Court examined a challenge to section 5 of the Voting Rights Act, which places certain states and localities in a penalty box, requiring them to obtain "pre-clearance" by the U.S. Department of Justice for any changes that impact voting. The Court was sharply critical of the "federalism costs" imposed upon the covered jurisdictions. It avoided the constitutional question by applying the federal law in a way that allowed the utility district to "bail out" from pre-clearance requirements under section 5.

In each of these cases, the Court sided with states in federalism disputes with the federal government.

Q: Will the Health Care Freedom Act affect future state legislation regarding health insurance?

A: Yes. If it is passed as a constitutional amendment, it would prevent any future legislation that infringes upon the rights protected by the amendment.

Q: Won't this be really expensive for the states to defend in court?

A: The Goldwater Institute has offered to defend the constitutionality of the Health Care Freedom Act at no cost to any state. Because legal challenges would involve purely constitutional issues and would not require expensive trials, to the extent that states become involved in litigation, they should be able to do so within existing Attorney General litigation budgets. Moreover, depending on the details of national health insurance legislation, the cost of federal mandates is likely to far exceed the cost of litigation.

Q: Even if the states and individuals did not prevail in a challenge to intrusive federal health insurance legislation, would there be reasons to support the Health Care Freedom Act?

A: Yes. First, if these rights are given additional protection under state constitutions, they will create an absolute barrier to future state legislation that violates those rights. Moreover, efforts to enact the Health Care Freedom Act send a powerful message to our nation's capitol that people at the grassroots take these rights very seriously and intend to protect them.

Q: Does the Health Care Freedom Act impair drug laws?

A: Absolutely not. It protects the right to purchase or provide "lawful" medical services. It does not limit the power of any government to determine what constitutes lawful medical services.

Q: Does the Health Care Freedom Act affect the issue of abortion?

A: No. Again, to the extent that states may regulate abortion under applicable constitutional doctrine and state or federal law, this measure would not alter that power in any way. The Health Care Freedom Act does, however, prevent the government from forcing individuals into health care systems against their will, and matters of conscience may influence such individual decisions.

Q: Does the Health Care Freedom Act affect Veterans' Administration programs, workers' compensation, Medicare, Medicaid, or state health-care systems?

A: Generally, no. The Health Care Freedom Act leaves intact any rules and regulations that were in place as of January 1, 2009. The only way such programs could be affected is if they are changed in the future in ways that violate the freedom of choice protected by the Health Care Freedom Act.

Q: Will this restrict the government from limiting the choice of providers or imposing other limits for the people who do opt-in to a government health care system?

A: No and yes, respectively. If a person voluntarily joins a government health care system, the government may set the terms and conditions, including choice of providers. However, the government cannot prevent a person from purchasing, or a health care professional from providing, lawful medical services outside that system.

Q: Is the Health Care Freedom Act supported financially by insurance companies?

A: No. Many insurance companies support an individual mandate (requiring individuals to buy health insurance or face government fines), which the Health Care Freedom Act would prohibit. An individual mandate guarantees a customer base to the insurance industry. It is present in some legislative proposals as a means to subsidize health insurance for others. If insurance companies play a role in the battle over the Health Care Freedom Act, we expect they will oppose it, possibly with significant resources.

Q: Are there other ways in which freedom advocates can use state constitutions to protect their liberties?

A: Absolutely. State constitutions are full of provisions unknown to the U.S. Constitution that are designed to protect individual liberty and limit the power of government, such as the line-item veto, anti-monopoly provisions, prohibitions against corporate subsidies ("gift clauses"), constraints against earmarks ("special law clauses"), and the like. Citizens and legislatures can amend their state constitutions to add additional protections; and taxpayers can enforce their state constitutional rights in state courts. State constitutions were intended to be the first line of defense in protecting the freedoms of the people. As the power of government grows at every level, we need to use whatever tools are available to us to safeguard our rights. For more on how state constitutions can protect liberty, see the recent Goldwater Institute report, **"50 Bright Stars: An Assessment of Each State's Constitutional Commitment to Limited Government."**

The Voice of Small Business®

ALASKA

January 19, 2010

The Honorable Mike Kelly
Room 513
State Capitol
Juneau, Alaska 99801-1182

Dear Representative Kelly

RE: HJR 35

On behalf of the National Federation of Independent Business/Alaska, I wish to express our support for House Joint Resolution 35. The National Federation of Independent Business/Alaska is the largest small-business advocacy group in our state.

HJR 35 provides for placing an amendment to Alaska's Constitution before voters during the next general election making explicit the individual right to health care free choice. The constitutional amendment would prohibit passage of laws that compel any person or employer to participate in a particular health care system. The proposed constitutional change will also permit the purchase of private insurance and allow Alaskans to pay their own health care provider directly.

NFIB/AK is critically concerned about the cost and access to health care for Alaskans. The current versions of health care reform that have passed the U.S. House and U.S. will not address those issues. The mandates they include clearly impose unreasonable burdens on Alaskans and Alaskan businesses. These mandates cannot address the needs of Alaskans.

This proposal will protect Alaskans from the unconstitutional federal mandates to purchase health insurance that may not meet their needs. It will protect small businesses from being taxed for not providing health insurance designed by the federal government that may not meet the needs of their employees.

Sincerely yours,

Dennis L. DeWitt
Alaska State Director

SPONSOR STATEMENT
House Joint Resolution 42

"Proposing amendments to the constitution of the State of Alaska creating a transportation infrastructure fund"

HJR 42 will put a constitutional amendment before voters to change the Alaska constitution to allow a dedicated fund for Capital Transportation Projects.

In FY10 87% of our transportation budget came from the federal government. The current federal reauthorization legislation has already expired and is being extended month to month until new legislation can be passed. The new federal reauthorization bill is unfavorable for states with small populations by emphasizing mass transit and green transportation. It favors toll roads, bridges, and other transportation that are self-funding. Alaska's small population makes these self pay options prohibitive. There aren't enough cars on the road, people on the ferries or residents landing at our airports to generate the economy of scale that is needed.

The roads, bridges, airports, ferries and transit systems that make up our state's transportation system are essential to mobility, commerce and economic development. This system enhances economic competitiveness, increases safety and enhances quality of life. There is a growing imbalance between system use and capacity as well as the need for new infrastructure to access our valuable resources. To insure Alaska has the infrastructure necessary to develop our resources as well as providing a quality of life for our citizens we must commit to funding transportation. Having a guaranteed amount that can be counted on from year to year will allow Alaska to tackle today's congestion and maintenance projects as well as developing the needed access to resources and energy.

The crafters of the constitution grandfathered in dedicated funds. They realized that some funds would be needed no matter the economic or political climate. Transportation was one of the funds that predated the constitution. It lasted for several years until it was eliminated.

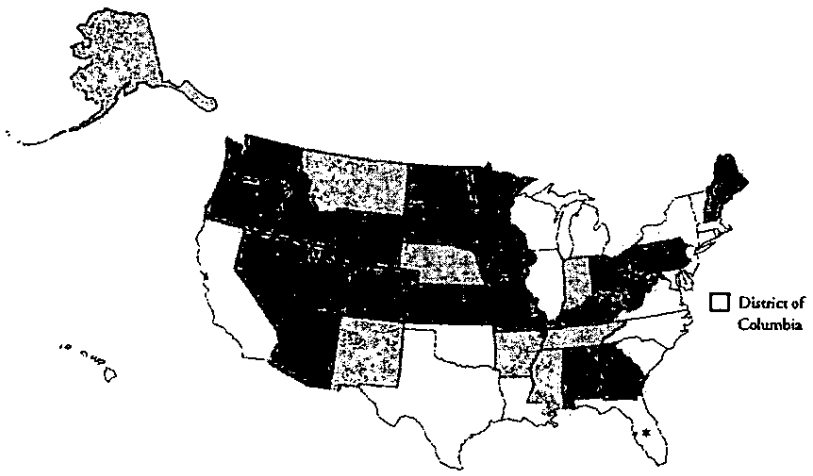
Figure 1. Use of Gas Tax Revenue for Highways



■ Constitutional Dedication of Gas Tax Revenue for Highway Purposes
▨ Statutory Dedication of Gas Tax Revenue for Highway Purposes
□ No Exclusive Dedication of Gas Tax Revenue for Highway Purposes

*The Florida constitution designates fuel tax revenues for highway purposes, but statute apportions some to mass transportation.
Source: *Fueling Transportation Finance: A Primer on the Gas Tax*, The Brookings Institution, March 2003.

In 2005, South Dakota eased its restriction on spending from the state highway fund, allowing expenditures for public transportation.

One consequence of gas tax use restriction is that it limits states' ability to spend on transit. From 1998 to 2001, only 11 states spent more than 5 percent of gas tax revenues on transit,[23] and only 4 percent of states spent more than 15 percent of gas tax receipts on transit. If states do not use gas tax revenue for transit, it often is difficult for them to receive federal funds for transit projects due to federal matching requirements. Funding for transit in Rhode Island, South Carolina and Tennessee is totally funded by gas tax revenue.[24] Gas tax assists with public transportation funding in 15 states.

Another restriction issue relates to distribution of gas tax receipts within states. The 2003 Brookings report on the gas tax concluded that gas tax distribution in some states appears to penalize cities and urban areas.[25] In many states—such as Colorado, Ohio, Missouri and Washington—urban areas are "donors" of gas tax revenue to other regions. Distribution formulas in some states date to the time when the state highway network was under construction and greater investment needs existed in rural areas.[26] Other states apportion funds evenly among all counties. Such formulas hurt the heavily populated, congested urban areas. Washington has acted to change the formula to more accurately reflect current needs, and California uses a formula based on tax receipts, registered motor vehicles and in each county. [27]

Federal Earmarking

Federal earmarks decrease the amount of flexible transportation money for states and divert money from higher priority projects.

House Finance Committee Co-Chair Rep. Mike Hawker

RE: **Funding options for a long-term statewide transportation plan**

DATE: **Sept. 28, 2009**

As per your request, I have prepared this summary of possible funding options for a multiyear, statewide transportation initiative. There are three basic options for raising a substantial amount of money for a comprehensive transportation plan: Taxes, taking from savings, or borrowing against future state revenues in one form or another. All of the most feasible choices fall into those three categories.

I did not include as an option the possibility of relying on annual legislative appropriations in the state capital budget. Though that certainly is an option in the legal and political sense, and would not require new or increased taxes or issuing bonds or any legislative action outside of the annual budget battles, it also would not create any new money for highways, roads, harbors, airports or ferries. Simply put, it would not add anything to the state's financial resources and would merely continue the annual fight for transportation funds vs. other needs statewide. It doesn't get us anywhere that we haven't been for years. Therefore, I have left it off the list of productive options, assuming the status quo is not acceptable to the committee as it looks at how to generate a substantial amount of money or a dedicated revenue stream to fund the state's growing backlog of highway, road and other transportation projects.

For this discussion, the Department of Transportation has compiled the numbers for state capital spending the past 10 years on highways and roads, harbors, airports and ferries. The numbers are included in a separate Power Point presentation; they fluctuate year to year, generally linked to the rise and fall of oil prices and state revenues.

The rest of this report explains options for a statewide transportation funding plan, including some history; some legal, financial and political considerations; and pros and cons for several of the options. Please consider this report an ongoing work in progress, which I can expand or amend or update to meet the committee's needs.

Motor fuel taxes

Certainly, one option would be for the state to dedicate motor fuel taxes to highway construction and repair and other transportation needs.

The cleanest way would be for the Legislature to seek voter approval of a constitutional amendment for a dedicated fund. Such an account existed at statehood but was abolished the next year. Some have suggested over the years that perhaps the Legislature could somehow "reclaim" the dedicated fund for transportation-related purposes. Not likely, say the lawyers. A 1990 attorney general's opinion was not favorable to this approach, nor was a Sept. 15, 2009, Legislative Legal Affairs opinion prepared for this committee or a recent attorney general opinion. The Alaska Constitution prohibits dedicated funds, except for those that existed at statehood or are required by federal law. The 1990 attorney general legal opinion, the Sept. 15 Legislative Legal opinion and the recent attorney general opinion said the Legislature's 1960 decision to eliminate the motor fuel tax dedication cannot be reversed by legislative action; it would require an amendment to the constitution.

If legislators go with the constitutionally dedicated fund approach, a two-thirds majority vote is required in each legislative chamber to put a constitutional amendment on the ballot. State law requires that amendments must be scheduled for the next general election after legislative action.

As for the tax itself, after a one-year hiatus the state on Sept. 1, 2009, resumed collecting its excise tax on motor fuel. The 8-cent-a-gallon tax on highway fuel is the lowest state motor fuel tax in the nation. Alaska's tax rate has not changed since 1970.

The average state tax nationwide (total of excise and all other state taxes on motor fuel) is 28.6 cents on gasoline and 27 cents on diesel (Alaska collects the same 8 cents per gallon on gasoline and diesel). In addition, several states allow counties and municipalities to impose a local tax, plus many states add a sales tax, gross receipts tax, underground storage tank fee and other fees to motor fuels. Wyoming, at 14 cents a gallon in total gasoline taxes, is the closest to Alaska, while at least 16 states collect more than 30 cents a gallon when all their taxes are combined.

The federal tax rate is 18.4 cents per gallon.

If, for example, an Alaskan owned a vehicle that got 20 miles per gallon and drove 15,000 miles a year, the state tax would be $60 for the year, with $138 in federal taxes.

The 2008 legislative suspension of motor fuel taxes applied to all tax types, including marine fuel, jet fuel and aviation gasoline. The state does not tax heating fuel, fuel sales to government agencies, or fuel for electrical generating plants operated by utilities.

Consumers who use gasoline or diesel for off-road vehicles and equipment, such as mining and construction equipment that does not travel the highway, can apply to the state for a refund of 6 cents per gallon from the 8-cent tax.

The tax is paid not at the retail level but by fuel wholesalers, which greatly reduces the number of tax returns to the state. There are about 230 taxpayers that collect and remit motor fuel taxes to the state.

Alaska in Fiscal Year 2008 collected:

- $30 million from its 8-cent tax on highway fuel (gasoline and diesel).
- $5.6 million from marine fuel (5 cents a gallon).
- $4.5 million from jet fuel (3.2 cents per gallon, with an exemption for flights originating in a foreign country and refueling in Alaska and also flights leaving Alaska for a foreign destination).
- $670,000 for aviation gasoline (4.7 cents).

Alaska's motor fuel revenues do not vary much year to year; collections have ranged between $39.2 million and $41.8 million over the past five years.

All of the state's motor fuel revenues are deposited into the general fund. State law requires that 60 percent of aviation fuel tax proceeds must be shared with municipalities that own and operate an airport. The state in FY2007 sent $147,322 to municipalities under this revenue-sharing provision:

- Juneau, $79,914
- Ketchikan Gateway Borough, $23,428
- Kenai, $16,822
- Anchorage (Merrill Field), $16,510
- Kodiak, $6,955
- Soldotna, $1,531
- Palmer, $1,093
- Wasilla, $1,069

The approximately $41 million a year Alaska collects in all motor fuel taxes puts it between tobacco taxes ($74 million) and alcohol taxes ($39 million) among state excise tax revenues in FY2008. Motor fuel taxes provided about 7 percent of the state's non-oil and gas tax revenues in FY2008.

If, for example, the Legislature wanted to seek voter approval for a constitutional amendment to dedicate motor fuel taxes (gasoline and diesel only, not aviation or marine fuels) to transportation projects, and at the same time double the tax rate to 16 cents a gallon (still far below the national average), that would generate an estimated $60 million a year for a comprehensive highway funding initiative.

With such a constitutionally dedicated fund, the Legislature could either appropriate the tax receipts annually, paying cash for projects, or the state could issue revenue bonds to raise a large amount of money up front and then use the tax receipts to repay the bonds over time. This is just a hypothetical suggestion, not a recommendation.

In addition to needing a constitutional amendment, in order to issue bonds secured by a dedicated motor fuel tax the Legislature also would need to adopt statutory authority for the State Bond Committee to issue the bonds on behalf of the state. A statute similar to the Alaska International Airport System authority at AS 37.15.410 - 37.15.550 would need to be established to provide the framework for the motor fuel tax bond issuance.

Pros Easy to collect and administer; no new program.
Clear link between users and payers.
Provides option of dedicated annual appropriations or revenue to repay bonds, or both.
Revenue stream continues indefinitely.
Taxing ourselves could help Alaska's congressional delegation counter the argument that Alaskans have their hand out too much in Washington.

Cons: Cost to consumers of higher taxes.
Politics of a tax increase.
Politics of opening the door to dedicated funds.

Revenue bonds and general obligation bonds

If lawmakers prefer raising cash up front for immediate transportation needs, rather than stretching out the construction work to match the motor fuel tax revenues available each year, the Legislature could opt for issuing bonds.

Continuing with the example of a 16-cent tax on gasoline/diesel that raises $60 million a year, the state could use that revenue stream to cover debt service on a revenue bond issue of about $400 million in today's market for transportation projects. Even though $60 million a year, plus any potential gain from increased motor fuel consumption over the years, would cover annual debt service on closer to $800 million in bonds, investors would discount the annual estimated tax receipts to reduce any risk that the revenues might come up short. The market, for example, would require that the state's estimated tax revenues equal two times the annual debt service on the bonds, to provide protection for investors. That's likely what it would take to earn an AA rating for the bonds.

Under this scenario, $60 million in estimated annual tax receipts would cover $30 million in annual debt service. The remaining $30 million a year would be available for annual appropriation for transportation projects.

The actual amount the state could borrow in revenue bonds would depend on the motor fuel tax rate, bond interest rates at the time of issuance and other factors. The interest rate charged on revenue bonds would depend mostly on the creditworthiness of the revenue source — does the market believe the tax (or some other revenue source) would actually raise enough money to pay off the debt.

If it wanted, the state could borrow additional funds — beyond what it could access under the traditional scenario above — by paying a higher interest rate and issuing what is called subordinate debt. Under that scheme, the state could go to the market and essentially say to borrowers, OK, the first-lien bond holders have claim to the first 50% in tax revenues each year, but any subordinate borrowers willing to bet on the next 30% of the estimated tax receipts each year could earn a higher interest rate for loaning money to the state. Under such a debt issuance, the state would be compensating those subordinate borrowers for the higher risk that perhaps, just maybe, Alaskans would buy less motor fuel and tax revenues would fall short of what's needed to fully cover the bond debt. Under such a plan, the state could leverage 80% of its estimated tax revenues to raise a total of $600 million on today's bond market. This would leave 20% of the tax available for annual appropriations after the debt service payments, or about $12 million a year. Leveraging anything more than 80% of the projected revenues would be extremely costly to the state in high interest rates.

Dedicating motor fuel taxes for transportation spending is not a new idea; half of the states have revenue bonds backed by motor fuel taxes.

One point to keep in mind is that any dedication of motor fuel taxes to repay revenue bonds would mean those tax dollars are no longer available in the general fund for annual appropriation. In a real sense, it is a cut to future revenues, leaving a little less for legislators as they build the annual state budget.

Another option — if lawmakers wanted to raise even more money at a bond sale than motor fuel taxes could support in a straight revenue bond issuance — would be to go to voters twice: Once, for a constitutional amendment to dedicate motor fuel taxes to highway projects, and, in a second vote, to seek public approval of general obligation bonds for highway projects. The Legislature could use the two approvals to issue both revenue and general obligation bonds to amass a larger war chest for transportation funding.

If legislators want to go with debt, using revenue bonds to pay for some of the state's transportation needs would avoid placing the entire burden on the state's capacity for general obligation bonds.

Or the legislature could skip the dedicated-fund, revenue-bond approach and go with straight general obligation bonds to raise substantial funds for transportation projects.

General obligation bonds are painless in a way, in that they do not require a new tax or dedicated revenue stream. Rather, they are a binding pledge that one way or another, no matter what other demands are placed on state revenues, the State of Alaska will repay the debt. The money could come from motor fuel taxes, driver's license fees, oil production taxes — it really doesn't matter where the dollars come from once the taxes or fees are deposited into the general fund. And bondholders don't much care either where the debt service money comes from, as long as the state pays on time. The debt service payments simply become part of the annual appropriations package approved by legislators, the same as the state share of municipal school construction debt.

General obligation bonds require a vote of the public; revenue bonds do not.

A downside to general obligation bonds is that the promise to use general fund revenues to make payments on the debt means there would be less money available in the years ahead for legislators to spend on other needs. For example, a bond issue of $700 million or so that commits the state to repay $50 million a year for 20 years means that much less money would be on the table for school foundation funding, public health, state troopers or anything else.

Certainly, there is an element of fiscal risk for the state to borrow money and promise to pay it back from future general fund revenues at a time of declining North Slope oil production and uncertainty of the proposed Alaska natural gas pipeline. Oil has been the major source of state revenues for more than three decades, and Alaskans hope that new oil discoveries — and a gas pipeline — will do the same for many more decades to come. But there is no guarantee of future oil and gas revenues, and Alaska has always been cautious not to overextend itself in general obligation borrowing.

The bond market would react negatively if the state tried to issue too much general obligation debt. Unfortunately, there is no exact answer to the question: How much debt could the state issue without risking a downgrade by rating agencies and subsequently higher borrowing costs. The imprecise answer is: It depends on the future price of oil.

Assuming oil hung out around today's $65- to $70-per-barrel price range, the state next year probably could take on an additional $500 million in new general obligation debt without much risk of a rating downgrade. If the Legislature wanted to build on that initial $500 million, and if the public approved, the state probably could issue as much as an additional $1.5 billion or so over the next five to ten years and still keep within the guideline that total debt load not exceed 5 percent to 8 percent of annual unrestricted revenues.

Of course, those numbers assume oil prices stay high enough to avoid any budget deficits; no other substantial new debt shows up on the state's books to eat away at cash flow; and the state retires its existing debt on schedule.

The state in Fiscal Year 2010 will pay about $200 million on debt (general obligation bonds, certificates of participation, state share of municipal school construction debt and other borrowings). The Department of Revenue Spring 2009 forecast predicted unrestricted general fund revenue in Fiscal 2010 at $3.2 billion, at $58.29 oil — 5 percent to 8 percent of that would be $160 million to $256 million. The state's $200 million in debt payments fall well within the acceptable range.

At $65 oil, however, due to the revenue boost from the progressivity factor in the state's oil production taxes, the acceptable range for debt service from unrestricted revenues would climb to $300 million to $400 million, giving the state capacity to take on additional debt. This example, while showing the benefit of higher oil prices, also shows the risk of betting on future oil revenues.

In considering a possible general obligation bond issuance for transportation projects, the Legislature would want to consider:

- How much money is needed for projects statewide?
- How much could Alaska borrow without jeopardizing its favorable credit ratings?
- What other needs exist that might also require general obligation bonds in the future? If the state issues too much debt for transportation projects it could leave Alaska short of borrowing capacity for other needs in the years ahead, until the highway bonds are retired or new revenues boost the state's cash flow.
- How much less would it cost the state to spend cash each year for transportation projects rather than borrowing money and paying interest? Legislators would want to weigh the cost of borrowing against the benefit of having a substantial amount of cash up front to complete projects sooner than paying for the work by annual appropriations. Inflation will drive up the cost of construction in the years ahead, so the sooner the state contracts for the work the less it would cost. But interest on bonds adds up to a substantial amount. There's also the calculation that future dollars used to repay debt are worth less than today's dollars — a consideration when borrowing money and paying it back in the years ahead.
- The Legislature would want to ask how much the state already owes, if there is any new debt coming on line, and the schedule for paying off existing debt.

  The state's debt obligations as of June 30, 2009, totaled $502.8 million in general obligation bonds. State officials expect to issue an additional $150 million in bonds in 2010 (the second half of a transportation bond issue approved by voters in November 2008). The debt service on the state's general obligation bond debt in Fiscal 2011 is scheduled at $53.8 million — not counting any payments that might be due on the $150 million in bonds to be issued next year.

In addition to its general obligation debt, the state had $51.4 million outstanding in certificates of participation debt as of June 30, 2009, with no additional debt authorized. Payments on the outstanding certificates of participation total about $8 million a year.

The state also is responsible for the debt on the Atwood Building (state office building) in Anchorage, the Anchorage jail and the soon-to-be-built Matanuska-Susitna Borough Goose Creek prison. That debt totaled $309.7 million as of June 30, 2009. No additional debt is authorized at this time. The annual payments on the existing debt are about $26.5 million.

And as of June 30, 2009, the state's share of annual debt service on municipal school bonds totaled about $106 million a year — with more debt possible after this fall's municipal elections. The state's share of outstanding municipal school bond debt is about $900 million.

One other requirement to remember for general obligation bonds is this: The ballot question must list the specific projects that would be funded by the bonds. The ballot issue can be written to allow some discretion for state transportation planners, but the general requirement to list actual projects usually forces a political discussion and compromise along geographical lines — there has to be something (enough) on the list for each region to garner sufficient legislative votes and the public's vote for passage.

Pros: Revenue bonds would not directly limit the state's future general obligation bond capacity.
Revenue bonds stand alone and do not draw directly from general fund.
General obligation bonds do not require new or increased taxes.
The state could raise a substantial amount of funds with a bond issue.

Cons: Basing revenue bonds on the public's acceptance of higher motor fuel taxes.
There is a real cost to borrowing money.
Debt service commits future state revenues and could create tighter budgets in the future.

Toll road financing

The state could use highway tolls instead of motor fuel taxes to cover the debt on revenue bonds for specific, high-traffic projects. Many states pay for mayor highways through toll-financed debt issuance. But is there a highway project in Alaska with enough traffic to generate enough money to pay the bills? It takes a lot of cars and trucks paying a lot of dollars to pay back tens of millions or maybe hundreds of millions in toll road bonds, along with maintenance costs.

At one extreme, for example, New Jersey's two toll roads — the Turnpike and the Garden State Parkway — recorded more than 670 million vehicle trips in 2007, deriving 92 percent of their revenues from tolls (the rest came from roadway concessions). Of that toll revenue, more than half was paid by out-of-state motorists driving all or some of the more than 320 miles on the two toll roads. The revenues covered all expenses and debt payments; as of 2007, the New Jersey Turnpike Authority carried almost $5 billion in outstanding bond debt. The state opened its first toll road segment more than 50 years ago.

At the other end of the traffic scale, South Carolina sold revenue bonds to finance construction and opened the Southern Connector eight years ago, providing a 16-mile bypass around a congested traffic area south of Greenville (on the road between Atlanta and Charlotte). The short toll road carries fewer than 6 million vehicles a year, less than 1% of the traffic on New Jersey's toll roads. Though the road is short, it took a very long time to build the project — 34 years from the first proposal to ribbon cutting.

In Alaska, the Knik Arm Bridge and Toll Authority proposes to pay for most of the crossing's construction costs with bonds financed by toll revenues. KABATA estimates 6 million toll-paying trips per year by the third year of operations for the proposed Knik Arm Crossing. The authority believes the toll revenues would be sufficient to cover several hundred million dollars in construction costs, though skeptics are less certain of traffic projections. The bond market could very well require state backup for toll road revenue bonds to protect investors against unknown toll receipts falling short of projections.

The only existing toll operation in Alaska is the Whittier Tunnel, though the toll revenues cover only a small portion of the actual construction costs and operations.

Pros: Users pay the costs.
No general fund dollars.

Cons: Are Alaskans willing to pay a toll to use existing highways that are now free?
Are Alaskans willing to pay a toll for new highways?
And is the state willing to back the bonds, in case toll revenues come up short?

Public-private partnerships

Public-private partnerships, known as 3Ps, were quite the rage in the 1990s as states and municipalities looked for new ways to pay for highway construction. But, like many hot new financing schemes, the 3Ps are less popular these days.

The Knik Arm Bridge and Toll Authority had pegged its financing future to a 3P plan — a privately run toll road.

The state-established toll authority is waiting for federal approval for the Knik Arm Crossing and dealing with the Endangered Species Act listing for Cook Inlet beluga whales. Meanwhile, further negotiations on the details of a financing plan are mostly on hold. The private firms interested in financing, building and operating the project had wanted the state to guarantee a minimum level of traffic and toll revenues; anything less than the guaranteed minimum and the state could have been required to write a check to cover the shortfall. Using the state treasury as a backstop for financing did not go over very well with the Palin administration. Besides, the problems in the worldwide credit market have dampened interest in privately financed, publicly owned transportation projects, leaving such a financing option uncertain for the Knik Arm crossing. But all that is waiting for federal permit approval and more work on belugas.

One difficulty the Knik Arm crossing faces — and why investors would like some kind of guarantee — is that traffic is an unknown. It's not like when the State of Indiana cut a deal in 2006 to lease out the Indiana Toll Road for 75 years to a joint venture of Spanish and Australian firms. In exchange for handing over the next 75 years of toll revenues, Indiana received $3.8 billion cash for the deal. But in making the deal, Indiana could point to a 50-year history of proven toll revenues on the highway.

Simply put, it's difficult to sell Blue Sky (unknown revenues from future projects) to investors.

Endowment funded by the Permanent Fund or Constitutional Budget Reserve

Lawmakers could withdraw a large sum of money from the Constitutional Budget Reserve or earnings reserve account of the Permanent Fund, using the money to establish a separate, dedicated Alaska Transportation Fund. The choice then would be whether to use investment earnings from the new fund to pay for construction projects on an annual cash basis, or issue debt and use the earnings to pay back the bonds.

Either way — annual appropriations for specific projects or making debt service payments on bonds — would require a constitutional amendment to establish the endowment and dedicate it and its revenues to transportation projects.

Withdrawing money from the Permanent Fund principal also would require its own constitutional amendment. Taking the money for the new endowment from the Permanent Fund earnings reserve or Constitutional Budget Reserve would require a legislative appropriation — not a constitutional amendment — though certainly a politically contentious appropriation.

And any reduction in the investment balance of the Permanent Fund — from principal or earnings reserve — would reduce future dividends. The less money in the fund earning a profit on investments, the less earnings would be available for future dividends.

As for taking the money from the Constitutional Budget Reserve Fund, that could leave the state short if a steep drop in oil prices required a deep draw on the CBRF. The fund's balance as of Sept. 21 was about $8 billion, sufficient for several years of small to moderate budget deficits if oil prices fall. There is always the risk, however, of large draws on the fund if world oil prices collapse. Tapping the budget reserve for a new transportation endowment also would reduce future earnings by the reserve fund — a $2 billion reduction in the CBRF, for example, would significantly reduce the annual investment earnings that help feed the fund.

To secure bonds and receive the lowest interest rate possible, the state likely would have to pledge not only the earnings from the transportation fund but also the principal to protect investors in case earnings fall short in any given year and cannot cover the debt service.

Pros: No new taxes.
Substantial funds could be made available.

Cons: A dedicated fund would require a constitutional amendment.
Any withdrawal from the Permanent Fund would reduce future dividends.
Any draw on the Constitutional Budget Reserve could cause problems in the years ahead if oil prices fall and the state runs a deficit.
A year of low or negative investment earnings on the transportation fund would require a draw on the fund's principal to pay debt service or fund projects.

Allocating a portion of oil royalties or Permanent Fund earnings

Instead of withdrawing money from the Constitutional Budget Reserve or the Permanent Fund, the Legislature could consider diverting a percentage of future oil and gas royalties away from the general fund to a transportation fund. Or diverting a portion of Permanent Fund earnings to transportation projects.

For example, Alaskans amended the constitution in 1976 to direct at least 25 percent of oil and gas royalties to the Permanent Fund. They could be asked a similar question to establish the Alaska Transportation Fund. A 2.5 percent annual dedication of oil and gas royalties would raise approximately $55 million a year at $65 oil. The fund could be used to pay directly for projects each year or as collateral for a revenue bond issue with earnings to help cover debt service payments.

Of course, any diversion of royalties to a special fund would reduce state general fund revenues in future years. And it would require a constitutional amendment for the dedicated fund.

There also is the option of drawing each year on Permanent Fund earnings. The Legislature could adopt a percent-of-market-value approach for imposing a limit and governing the availability of Permanent Fund earnings for annual appropriation. If, for example, the Legislature wanted to adopt an annual withdrawal limit of no more than 5 percent of the Permanent Fund's market value (as the Permanent Fund trustees and others have long proposed), it could choose to dedicate — from within that 5 percent — 0.25 percent of the market value for annual appropriation to transportation projects. At a market value of $32 billion, that would generate $80 million a year.

Though much of the public is skeptical of the POMV approach for limiting annual expenditures from the Permanent Fund, perhaps some would react more favorably if a comprehensive, statewide transportation initiative were part of the deal?

Pros: No new taxes.
Substantial sum of money would be available.

Cons: Any diversion of oil and gas taxes or royalties away from the general fund could create revenue shortages in years of low oil prices.
Dedicated funds require a constitutional amendment.
Using Permanent Fund earnings could result in lower future dividends.
The politics of using Permanent Fund earnings would be controversial.

Selling off future state oil taxes or royalties

The state could raise cash today by selling off a portion of its future revenue stream from oil taxes or royalties. The state could approach investors and turn over a percentage of future taxes or royalties or even a fixed amount of barrels of oil each month in exchange for a large, up-front cash payment. Mining companies often generate cash for new developments this way by forward selling future gold production.

The risk to investors is that oil prices or production could fall, leaving them short. Which means investors would pay the state a discounted price for the future revenue stream.

The risk to the state is shortchanging the general fund of future revenues.

Pros: No new taxes.

Cons: Diverts future state revenues away from the general fund and annual appropriation process.
It would cost less to raise the same amount of money by general obligation or revenue bonds.

Stimulus Build America Bonds

The state could save money by availing itself of the Build America Bond program offered under the federal economic stimulus act. Under this program, the federal government pays a substantial portion of the interest on taxable public debt issues. The subsidy is available only on financings that could otherwise be sold as tax-exempt debt but where the issuer elects to sell taxable bonds to receive the federal subsidy equal to 35% of the interest expense on the bonds. The federal aid essentially buys down the state's cost to below the interest rate of tax-free debt

The State of Alaska could save 25 to 100 basis points on actual debt costs under the program, depending on the market, the term of the bonds, size of the bond issue and the issue's debt rating. It is estimated that in the current market a $100 million, 20-year AA-rated bond issue by the State of Alaska would be priced at about 4.2% on a tax-exempt basis, while under the Build America Bond program the true cost to the state would be approximately 3.3%.

The idea is that the higher interest earned on taxable bonds would be attractive to some investors (such as pension funds and other institutional investors that do not pay income tax), and attractive to investors looking for lower-risk public debt, while the federal subsidy would drop the actual cost to states and municipalities below the lower interest rate they normally pay on tax-exempt bonds.

The federal subsidy on Build America Bonds is 35 percent of the interest rate for the life of the bonds. The subsidy is available on bonds issued through Dec. 31, 2010. There is no limit on the amount of bonds that can be issued under the program, though only government projects that otherwise would qualify for tax-exempt financing — such as schools, roads, universities and such — are eligible for the program.

The White House reported that 66 bond issues, totaling $11 billion, were issued in the first seven weeks of the program. Several of the early issuances were for transportation work, including the New Jersey Turnpike Authority and New York State's Metropolitan Transportation Authority.

The state would face an extremely tight timeline to get in on this program, and the Legislature would need to consider changing statute to eliminate the requirement for a competitive bond sale to speed up the process.

Pros: Federal assistance reduces cost of borrowing.
No dollar limit to federal program.

Cons: Dec. 31, 2010, deadline for participation. That could be extremely tight if the bonds cannot go before voters until the November 2010 general election.

Creative financing

One idea the state has discussed with financial services firm J.P. Morgan Chase is using a general fund appropriation, say maybe $2 billion, to create an oversize reserve for a bond issuance of an equal amount by a public corporation of the state. Debt service on the bonds, perhaps around $145 million a year, could be covered by the general fund with help from earnings on the $2 billion reserve.

The benefit of the oversized reserve is that it likely would achieve an AAA rating for the bond issue and therefore lower interest rates. The downside is that the $2 billion in reserve is then yield restricted to the yield on the bonds that are issued. This essentially guarantees that the state would earn less on the $2 billion than it would pay in interest on the bonds. This is because in periods of low investment earnings the state would still be responsible for all of the debt service, but in periods of high earnings any investment earnings on the reserve in excess of the rate on the bonds must be paid to the IRS.

While this idea would ensure that $2 billion would be available for transportation projects, it is not beneficial from a financial perspective and the state would be better off simply appropriating $2 billion to fund projects without any borrowing.

And, as with all debt, there would be costs of issuing the bonds — about $20 million for $2 billion in bonds

An additional downside is such a large appropriation for the bond reserve would be dependent on high oil prices to generate the extra general fund cash needed to fund the reserve. Or lawmakers could draw on the Constitutional Budget Reserve to set up the $2 billion account, reducing the state's oil-price cushion in future years.

Pros: Ensures $2 billion for transportation projects.
No new taxes.

Cons: It would reduce the state's earnings on the $2 billion put into reserve.
The state would lose flexibility in using the $2 billion while it's held in reserve.

Federal funds

Separate but pertinent to this discussion is the fact that the federal Highway Trust Fund is running close to empty. The account, which pays the federal share of highway projects nationwide, is supposed to be continuously refilled with federal motor fuel tax receipts. But tax revenues are not keeping up with spending needs, with the gap especially troublesome as Americans buy less gasoline and diesel and pay less in taxes.

Congress approved a stopgap $7 billion appropriation for the highway fund before adjourning for its summer recess. The money, however, is not expected to last much past the end of the federal fiscal year Sept. 30, which means Congress will need to take further action to maintain the fund.

This was the second year Congress has had to appropriate general fund dollars to bail out the trust fund. Lawmakers added $8 billion to the account last September.

The point of this information is the reality that Alaska probably should not look to Congress and the federal government for substantial additional amounts of transportation funds for the next several years. Congress will have enough trouble finding the money just to maintain existing commitments for federal sharing.

The separate Power Point presentation accompanying this report shows year-to-year federal funding for transportation projects in Alaska.

CAMBRIDGE SYSTEMATICS

Alaska Transportation Finance Study

final report

prepared for

Alaska Municipal League

prepared by

Cambridge Systematics, Inc.

Executive Summary

The Alaska Municipal League (AML) commissioned Cambridge Systematics, Inc. to conduct an objective assessment of the current finance trends, challenges, and possible options to meet Alaska's transportation funding needs. This work involved a significant amount of analysis and produced multiple layers of findings that have been documented in this report, the Transportation Finance Study. Nevertheless, the work may be summarized into the following three categories of findings.

UNDER INVESTMENT IN THE STATE'S TRANSPORTATION INFRASTRUCTURE

Almost every state and the Federal Government have been chronically under investing in their transportation infrastructure and Alaska is not an exception. Over the last several years, studies at the national and state levels have painted a dire picture of transportation funding over the long term: the average funding gap for the Federal shortfall is almost $60 billion annually through 2017 (10-year average) to maintain the current condition and performance of the nation's surface transportation system.

- Underinvestment in Alaska may have more severe consequences than for almost any other state because the Alaska's economy is highly dependent on resource extraction industries. These industries are highly transportation-intensive; their growth is the most likely offset to declining oil production and may be the State's best opportunity to diversity, but will require investment. In addition, the State's far-flung communities, harsher environment and less mature roadway network amplify the effects of under investment.
- In its 2030 Transportation Plan, the Alaska Department of Transportation and Public Facilities (ADOT&PF) estimated its annual highway and bridge needs at approximately $1.1 billion per year of which about $530 million is unfunded on state-owned facilities alone (excluding local roads and street needs), with Federal and state funding covering about half of the needs.
- In Alaska, routine highway maintenance remains underfunded and the backlog in life-cycle needs is over three times the level of spending in annual highway maintenance activities at the state level. Adding the AMHS unfunded needs, and Alaska's transportation funding gap increases to $720 million. These figures still do not include needs of transit, and locally funded roads, both in urban and rural areas of the State, or aviation. Furthermore, it does not include any transportation capacity needs to meet travel demand growth in the future.

2520

- Alaska's transportation capital spending (from state and local revenue sources) as a percentage of the Gross State Product (GSP) for 2006 is the fourth lowest compared to other states. If Federal funding is included, the transportation spending as a percentage of GSP increases placing Alaska in the top 10 states, clearly indicating the State's reliance on Federal funding to meet its transportation needs.

CURRENT FEDERAL FUNDING AT RISK

Alaska has historically received on average roughly 75 percent of its total transportation funding needs from Federal sources. This dependence is quite likely to put Alaska in a very vulnerable position when the Federal transportation funding is reauthorized next year for the following reasons:

- Federal Highway Trust Fund went broke this past year and Congress provided only one year of stop-gap funding. Longer-term fixes, however, may include lower levels of funding, which would increase state competition for Federal allocations.
- The current negotiations over reauthorization are further reducing the difference between donor states (which have increased in the previous reauthorization from 90 percent of their contribution to 92 percent) and donee states, of which Alaska is one of the highest.
- Reauthorization funding policies appear to place far more emphasis on tolling or other user fees and metropolitan transit/transportation networks, rather than highway funding or legislative earmarking. Some proposals would push greater responsibility to states or cities for financing their transportation improvements.
- Federal support for Alaska's transportation needs is being challenged by other states because of the perception that Alaska's financial capacity is substantially better off than other states. The lower 48 and the Federal government see the Alaska Permanent Fund currently has almost $28 billion and Alaska is the only State that collects neither income taxes nor state sales taxes, and its 8 cents-per-gallon (cpg) gas tax is the lowest rate in the country.

OPTIONS FOR CLOSING THE GAP

In order for Alaska to close some of the gap in underinvestment and improve its competitive position for the next reauthorization of Federal transportation legislation, we propose some options for increasing state revenues with a mix of six sources that include increases to user fees such as the fuel tax and vehicle registrations fees, new sales tax on vehicles and the wider use of local sales taxes, reinstitution of the Local Service Roads and Trails (LSR&T) fund, and establishment of an Alaska Transportation Fund (ATF) or comparable fund.

Option One would generate roughly $151 million annually, or about 28 percent of the $535 million annual gap. It has the following six components:

- Increase fuel taxes from 8 cents per gallon (cpg) to 18 cpg (national average) and index the rate to inflation, generating about $38 million annually.
- Increase vehicle registration fees by 50 percent from $100 to $50 biannual fee, generating slightly less than $23 million annually.
- Impose a vehicle sales tax of 0.5 percent, yielding about $10 million annually
- Encourage local jurisdictions to impose a 0.5 percent sales tax, which if enacted throughout the State would earn about $30 million annually
- Capitalize the Alaska Transportation Fund (ATF) with $1 billion, which with a 8 percent return should earn about $50 million annually.

Option Two would generate roughly $291 million annually, or about 55 percent of the $535 million annual gap. It has the following six components:

- Increase fuel taxes from 8 to 28 cpg and index the rate to inflation, generating about $76 million annually.
- Double vehicle registration fees from $100 to $200 biannual fee, generating over $45 million annually.
- Impose a vehicle sales tax of 1.5 percent, yielding over $31 million annually
- Encourage local jurisdictions to impose a 1.5 percent sales tax, which would earn about $89 million annually
- Capitalize the Alaska Transportation Fund (ATF) with $1 billion, which with a 8 percent return should earn about $50 million annually.

Option Three also would generate $291 million annually (55 percent of the $535 million annual gap), but it would reduce the two sales taxes and instead reinstitutes the Local Service Roads and Trails (LSR&T) fund:

- Same increase in fuel taxes (8 cpg to 28 cpg and index the rate to inflation), generating about $76 million annually.
- Same doubling of vehicle registration fees from $100 to $200 biannual fee, generating over $45 million annually.
- Impose a state vehicle sales tax of 1.25 percent and a 1.25 percent local sales tax, which would earn over $26 million and $74 million annually, respectively
- Capitalize the Alaska Transportation Fund (ATF) with $1 billion, which with a 8 percent return should earn about $50 million annually.
- Assume the State reinstitutes the LSR&T program at about $20 million annually.

ANALYSIS: *(Attach a separate page if necessary)*

The passage of this resolution would require the constitutional amendment to appear on the 2010 general election ballot. The cost of providing information about the constitutional amendment in the Official Election Pamphlet, as required by AS 15.58 is $1.5. Should the addition of this question require printing an 8-1/2 by 18 inch ballot, the cost will increase to $22.0.

SWAMC RESOLUTION 09-02

A RESOLUTION OF THE SOUTHWEST ALASKA MUNICIPAL CONFERENCE URGING THE GOVERNOR AND THE ALASKA LEGISLATURE TO CAPITALIZE STABLE LONG-TERM TRANSPORTATION FUNDING FOR ALASKA

WHEREAS, Alaska's transportation system has fallen far behind the needs of Alaska for cost effective transportation which allows economic growth and the safe cost effective movement of people, goods, and services; and

WHEREAS, the Alaska Highway System, the Alaska Marine Highway System, Alaska Airports, Alaska ports and harbors, and Alaska's local roads all need several years of significant funding for infrastructure improvement, upgrade and expansion; and

WHEREAS, the general appropriation process has resulted in significant underfunding of transportation infrastructure; and

WHEREAS, the Federal Highway Trust Fund is experiencing significant shortfalls, further contributing to a decrease in transportation funding for Alaska; and

WHEREAS, the economic future of Alaska is highly dependent upon a quality, cost effective transportation system; and

WHEREAS, the development of Alaska transportation infrastructure is dependent upon a steady and reliable stream of revenue; and

WHEREAS, the development of an energy policy that works for Alaska requires a quality transportation system in order to be successful; and

WHEREAS, estimates of annual funding needs for transportation infrastructure improvements, upgrades, and expansions exceed $300 million per year; and

WHEREAS, the State of Alaska is in a position to proactively develop a long-term transportation financing program.

-MORE-

NOW, THEREFORE BE IT RESOLVED that the Southwest Alaska Municipal Conference urges the Governor and the Alaska Legislature to establish a Transportation Trust Fund for Alaska or other suitable and sustainable funding mechanisms that generate at least $300 million annually to accomplish the following purposes:

- Generate investment earnings to develop transportation infrastructure in Alaska.
- Improve, upgrade and expand State of Alaska roads and highways.
- Improve, upgrade and expand the Alaska Marine Highway System.
- Improve, upgrade and expand the airports in Alaska.
- Improve and expand Alaska's ports and harbors.
- Provide regular funding to Alaska's communities to improve, upgrade and expand local roads built to local road standards.

AND, BE IT FURTHER RESOLVED that not less than 15-percent of the total funding will be allocated to each of the five programs each year (roads and highways; Alaska Marine Highway System; airports; ports and harbors; public transit and local roads).

PASSED AND ADOPTED by a duly constituted quorum of the Southwest Alaska Municipal Conference Membership this Thirtieth day of January, 2009.

Signed:

Tom Abell
President

Attest:

Michael Catsi

A RESOLUTION

Urging the United States Congress not to enact Cap and Trade legislation.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

WHEREAS Senate Bill 1733, the Clean Energy Jobs and American Power Act is waiting to be heard in the United States Senate; and

WHEREAS House Resolution 2454, the American Clean Energy and Security Act of 2009, has passed the United States House of Representatives and is waiting to be voted on in the United States Senate; and

WHEREAS cap and trade legislation has been a presidential priority and is before Congress; and

WHEREAS, while emissions cap and trade legislation attempts to minimize the impact of environmental restrictions on industry by offering economic incentives, the legislation would result in unnecessary regulation and economic interference by the federal government; and

WHEREAS additional environmental regulation and incentive programs will hinder the nation's free market economy, increase federal involvement in business, and mandate state oversight; and

WHEREAS the United States refrained from ratifying the Kyoto Protocol in 2007 because of the economic hindrances that would be imposed on businesses in the United States; and

WHEREAS the America's Climate Security Act of 2007, a less severe alternative to the Kyoto Protocol, was rejected by the United States Senate in the interest of protecting the United States economy; and

WHEREAS cap and trade measures make traditional electricity, heating, and transportation fuels more costly through rationing, while generating hundreds of billions of dollars in federal tax revenue from oil, coal, and natural gas production; and

WHEREAS stringent economic constraints threaten to drive industry out of the United States at a time when our economy requires encouragement rather than hindrance; and

WHEREAS arguments for phasing out fossil fuel uses have relied primarily on global climate calculations compiled by the climate Research Unit of the University of East Anglia (CRU), the National Climate Data Center (NOAA-NCDC), and the NASA Goddard Institute for Space Studies, on behalf of the International Panel on Climate Change; and

WHEREAS recent discoveries of fraudulent activities within these international reporting organizations, which have concluded that the planet is rapidly warming despite substantiated evidence of cooling over the last decade, have rendered the 2007 IPCC Assessment Report 4 (AR4) scientifically questionable and unreliable as a foundation for establishing public policy; and

WHEREAS the process of allocation for the distribution of emissions allowances in the Senate Bill 1733 does not take into account the unique situation of Alaska relative to the remainder of the nation, including its population, geographic size, and extreme climate, and, as such, disadvantage the state as a whole; and

WHEREAS cap and trade legislation will have unforeseen effects on the economy and on the livelihood of the citizens of Alaska; and

WHEREAS the economy of the State of Alaska relies on the responsible development of our abundant natural resources, unburdened by superfluous regulations that are not specific to Alaska's market and industrial character; and

WHEREAS Alaska is a major exporter of carbon-based energy, and receives more than 80 percent of its unrestricted general fund revenue directly from oil and gas operations

and produces approximately 13 percent of the nation's oil supply; and

WHEREAS Alaska's refineries, which are essential to our economy and cold weather fuel needs, are uniquely vulnerable to increased costs associated with cap and trade legislation; and

WHEREAS prospects for the construction of an Alaska natural gas pipeline with the capacity to supply affordable and clean energy to the state and the nation as a whole ~~would~~ may be ~~severely~~ damaged on both the developmental and delivery levels under cap and trade legislation; and

WHEREAS the cap and trade program, as proposed in the American Clean Energy and Security Act of 2009, will be fundamentally detrimental to the economy and to workers in the state, by stifling economic development, resulting in potentially enormous job losses; and

WHEREAS natural resource development in the state, including refinery operations and proposed infrastructure projects will be negatively impacted by limiting carbon dioxide and greenhouse gas emissions;

BE IT RESOLVED that the Alaska State Legislature urges the United States congress not to enact any version of cap and trade legislation that would negatively affect Alaskans through the elimination of jobs and increased costs for goods and services, and, instead, enact legislation that encourages states to establish and develop their own renewable energy portfolio standards; and be it

FURTHER RESOLVED, that the Alaska State Legislature supports measures that encourage investments in technology to address carbon dioxide and greenhouse gas emissions.

COPIES of this resolution shall be sent to the Honorable Barack Obama, President of the United States; the Honorable Joseph R. Biden, Jr., Vice-President of the United States and President of the U.S. Senate; the Honorable Nancy Pelosi, Speaker of the U.S. House of Representatives; the Honorable Harry Reid, Majority Leader of the U.S. Senate; and the Honorable Lisa Murkowski and the Honorable Mark Begich, U.S. Senators, and the Honorable Don Young, U.S. Representative, members of the Alaska delegation in Congress.

and ① Senator Barbara Boxer, Chair ~~man~~, U.S. Senate Committee on Environ. & Public Works ~~Committee~~.

② and Senator James Inhofe, Ranking Member, the Environment & Public Works ~~Committee~~

Thank you,

Ellen Rojcewicz
Petersburg LIO

HJR 45

I would like to express my support for HJR 45. Thank you Representative Stoltz , Representative Wilson and other sponsers for recognizing the geographic disproportional impacts of mandatory greenhouse gas reductions on the State of Alaska. In S. E. Alaska this cap and trade bill will cripple our tourism, fishing industry and barge service. Everything we buy and do will cost more. These cost of living increases will force many families to leave.

We ordinary people are learning, the goal of this cap and trade bill is to make carbon dioxide the number one commodity on the planet. Quoting the February issue of Harper's magazine. "Unlike traditional commodities, which sometime during the course of their market exchange must be delivered to someone in physical form, the carbon market is based on the delivery of an invisible substance to no one. It's value resides entirely in the promise of it's absence." c wd quote

Big banks and big multinationals love the trillions of dollars tied to this bill, they can work both ends and it is ripe for abuse. China and India love it, they have made it absolutely clear that they are not going to, perpetuate their poverty, by initiating unrealistic regulations and will inherit our wealth. This Cap and Trade bill has nothing to do with the environment and everything to do with power and greed.

Furthermore there is no scientific consensus on climate change. There is, however, a petition to the U.S. government signed by 31,478 American scientists, including 9,029 with Ph.Ds, urging our government to reject the Kyoto protocol and any similar proposals.

Additionally it may be good to send a copy of HJR 45 to Senators Boxer and Inhofe, the ranking members of the Senate committee on Environment and Public Works.

Thank you very much, are there any questions?

Re: Clean Energy Jobs and American Power Act (S. 1733)

Dear Chairman Boxer and Ranking Member Inhofe,

The State of Alaska wishes to comment on the Clean Energy Jobs and American Power Act (S. 1733). This legislation, which aims to drastically modify U.S. fossil fuel consumption, stimulate greater use of renewable energy resources, and address the challenges of climate change adaptation, involves some of the most important issues facing the State of Alaska.

Alaska supports the transition to lower-carbon and renewable energy. However, as a major exporter of carbon-based energy, producing approximately 13 percent of the nation's oil supply and receiving more than 80 percent of its unrestricted general fund revenues directly from oil and gas operations, the State cannot ignore the potential economic consequences of a "cap-and-trade" system. We are currently preparing analyses that assess the possible impacts of this legislation on State revenues, the economic viability of our oil refineries, and future construction of an Alaska natural gas pipeline. The State fears this act may disadvantage domestic fossil fuel producers and shift production overseas, resulting in lost revenues and jobs while reducing our nation's energy security.

While climate change legislation could pose economic threats to our state, Alaska is also primed to help lead a clean energy economy. In the Alaska natural gas pipeline, the State of Alaska offers a promising low-carbon energy option, which could provide a vital bridge to other clean energy alternatives. Alaska also holds vast renewable energy potential, from hydropower, to biomass, wind, geothermal, solar, and ocean power.

In the area of adaptation, Alaska is already facing a host of serious developments related to climate change. This includes addressing the impacts to critical infrastructure associated with accelerated coastal erosion, increased storm effects, sea ice retreat, and permafrost melt. Efforts to protect and relocate Alaskan communities are already underway and the State values the partnerships we have formed with many federal agencies and other entities. More resources, however, are needed along with a designated federal agency lead to coordinate the federal efforts.

Coupled with climate change impacts are opportunities, including the potential for increased marine access to Arctic waters and the resources they contain. The United States is slowly waking to the fact it is an Arctic nation and the importance of the Arctic in general. It is imperative that this legislation not foreclose possible opportunities in the Arctic.

Enclosed you will find the State's analysis of provisions in S. 1733. This document identifies key priorities for Alaska and a number of areas for improvement. Some of the items the State advocates for in this bill include:

- **Adequate funding for climate change adaptation:** the State supports sufficient funding to address Alaska's pressing adaptation needs on various fronts, including protecting critical and valuable infrastructure.

- **Measures to preserve domestic refineries:** Alaska calls for provisions aimed to protect Alaska's refineries, which are essential to our economy and cold weather fuel needs, as well as uniquely vulnerable to increased costs posed by cap-and-trade legislation.

- **Fair allocations for Alaska:** the State is concerned that the Environmental Protection Agency (EPA) has underestimated emissions in Alaska, based on estimates provided to Senator Feingold by EPA. This could disadvantage the state as a whole in the distribution of allowances.

- **Avoidance of unfunded mandates:** Alaska opposes burdensome and unrealistic unfunded mandates that may be created through new climate change programs.

- **Respect for states' rights:** the State supports the protection of states' rights and notably recognition of the State of Alaska's role as primary trustee over fish and wildlife.

- **Exclusion of problematic broad policy statements:** Alaska opposes broad policy statements that open the door to stricter enforceable regulations and future litigation.

- **Emphasis on domestic production:** the State supports expanding access and incentives for responsible domestic onshore and offshore oil and gas exploration as part of a strategy for creating a secure energy future.

- **Promotion of the natural gas pipeline:** the State seeks to promote the Alaska natural gas pipeline as a clean and reliable fuel source which would provide significant economic benefits for the nation, consistent with the Alaska Natural Gas Pipeline Act of 2004 (P.L. 108-324, 118 Stat. 1220).

- **Carbon capture and sequestration incentives:** Alaska supports the commercial deployment of carbon capture and sequestration (CCS) technologies, and in particular, sequestration as a result of Enhanced Oil Recovery (EOR) projects.

- **Program flexibility:** The State believes that effective mitigation and adaptation programs must acknowledge regional differences. Alaska has particular concerns regarding the proposed natural resources adaptation framework.

- **Focus on monitoring and research:** Alaska supports collaborations among federal, State, and other partners in monitoring and research that will lead to better decisions in the management of land and marine resources.

- **Exclusive role of climate change legislation:** We believe climate change legislation should be the sole instrument for addressing climate change mitigation, not the strained use of existing statutes such as the Endangered Species Act or the Clean Air Act.

We appreciate the opportunity to share our views and hope the committee will give them its fullest consideration.

Sincerely,

Sean Parnell
Governor

State of Alaska Comments on Clean Energy Jobs and American Power Act (S. 1733)
Senator Boxer's Chairman's Mark

INTRODUCTORY NOTES:

This document describes the positions of the State of Alaska on notable elements of Senator Barbara Boxer's Chairman's Mark of the Clean Energy Jobs and American Power Act (S. 1733), which was introduced by Senators John Kerry and Barbara Boxer. The Alaska Departments of Environmental Conservation, Fish and Game, Law, Natural Resources, Revenue, Transportation and Public Facilities, and the Governor's Washington, DC office contributed to the analysis of this bill.

While particular design elements of "cap-and-trade" legislation, like S. 1733 and the American Clean Energy and Security Act of 2009 (H.R. 2454), raise broad concerns about the economic interests of Alaska, this document focuses instead on specific provisions of S. 1733. The State is currently preparing separate analyses of the possible impacts of this legislation on State revenues, the economic viability of Alaska's oil refineries, and future construction of an Alaska natural gas pipeline.

In many ways, Alaska is ground zero for obvious and costly climate change impacts. Alaska is currently experiencing coastal erosion, increased storm effects, sea ice retreat and permafrost melt. The villages of Shishmaref, Kivalina, and Newtok have already begun relocation plans and the U.S. Army Corps of Engineers has identified over 160 additional rural Alaskan communities threatened by erosion.

The effects of climate change are expected to occur most rapidly and be most pronounced at higher latitudes. Thus, no discussion about climate change is complete without recognition of the issues facing the Arctic. Surprisingly, in the 925-page bill, offered as a U.S. response to climate change, the word "Arctic" appears only once.

The State of Alaska strongly encourages that the following key components be incorporated in any climate change legislation:

- Mitigation and adaptation strategies that account for regional differences and avoid a "top-down" approach, likely to produce inflexible and inefficient policy;
- avoidance of broad policy statements that open the door to stricter enforceable regulations and future litigation;
- an effort to spare states from burdensome and unrealistic unfunded mandates;
- emphasis on climate change legislation as the sole instrument for addressing climate change mitigation, rather than the strained use of existing statutes, such as the Endangered Species Act or the Clean Air Act;
- incentives for a diverse spectrum of clean energy alternatives;
- respect for states' rights, and notably recognition of a state's role as primary trustee over fish and wildlife;
- a focus on studying the Arctic climate and environment;
- appropriate funding for adaptation efforts in Alaska where there is a pressing need to respond on numerous fronts, including the protection of critical infrastructure;
- aid for consumers burdened by climate change-related regulations;
- provisions aimed to protect Alaska's refineries, which are essential to our economy and cold weather fuel needs, as well as uniquely vulnerable to increased costs posed by cap-and-trade legislation; and
- promotion of Alaska's natural gas pipeline as a clean, reliable, long-term fuel source.

In the remainder of this document, the State considers how S. 1733 addresses these and other priorities important to Alaska.

STATE POSITIONS AND ANALYSIS OF S. 1733:

Section 1. Short Title; Table of Contents

Findings. (Sec. 2)

- Alaska Natural Gas Pipeline Projects. The State supports the addition of a finding, that the completion of the Alaska Natural Gas Transportation Projects is vital to the country to provide a clean fuel alternative to coal and petroleum as a bridge to power generation that does not involve the combustion of fossil fuels. This finding would be consistent with the Alaska Natural Gas Pipeline Act of 2004 (P.L. 108-324, 118 Stat. 1220).

- Arctic Impacts. The State supports the addition of a finding that the impacts of climate change are expected to occur first and be most severe in the Arctic and in the higher latitudes, creating unique adaptation needs in these areas.

Division A – Authorizations for Pollution Reduction, Transition, and Adaptation

Title I – Greenhouse Gas Reduction Programs

Subtitle A – Clean Transportation

Greenhouse Gas Reductions through Transportation Efficiency; Transportation Greenhouse Gas Emission Reduction Program Grants. (Sec. 112-113)

- Funding. The State fears Section 112 would create a substantial unfunded mandate and shift resources away from Alaska's transportation priorities. S. 1733 would amend Title VIII of the Clean Air Act to require the EPA Administrator, in consultation with the Alaska Department of Transportation and Public Facilities (DOT), to establish national greenhouse gas (GHG) emission reduction goals. States and metropolitan planning organizations (MPOs) would, in turn, be required to develop targets consistent with the national goals. The State would need to perform extensive data gathering and modeling, compute baseline emissions, and develop new strategies and programs to meet their goals. Section 113, which outlines a grant program for transportation GHG reduction, does not clearly provide funding to states for planning. If Alaska is unable to secure sufficient funding, it would be forced to divert resources from other programs, such as transit and road improvements, in order to absorb the new costs. The State supports a funding mechanism that will ensure adequate assistance to states working to comply with this new mandate.

- Adequate Time Frame. The State has concerns about the time requirements for data production and analysis. Adequate time is necessary to produce data on local conditions. Default national data does not accurately reflect Alaska's environmental conditions and emissions. The State believes this legislation should contain provisions ensuring states have sufficient time to collect and incorporate local data.

The State also supports inclusion of a statutory process to extend State target deadlines should federal agencies fail to meet deadlines or should there be legal changes to models or methodologies. New standardized models and methods adopted may differ from those used to establish the 2005 emissions reduction baseline. If this is the case, analysis would be necessary to properly compare new results with the 2005 baseline. If EPA and DOT lag in making this adjustment, it will shorten the timeframe states have to meet their deadlines.

Furthermore, the State fears the timeline for new regulations in this section is not realistic. Regulations must be proposed within 12 months and promulgated within 18 months of enactment. Preparing regulations and completing the public process for adopting the regulations can take months under ideal circumstances. If the regulation process is not completed on schedule, states and MPOs would be left with insufficient time to achieve emission reduction targets.

- Authority. The State also questions whether states possess the requisite authority to carry out their new duties under this section. State transportation programs generally do not operate transit, rail, or intercity bus systems, control land use, or regulate the amount of driving or method of vehicular propulsion. This authority is traditionally reserved for local government planning and zoning departments. Yet it will be impossible to meet ambitious emissions targets without regulating these activities. Furthermore, Section 112 holds MPOs to a lesser standard than states, though MPO emission plans are central to meeting state targets.

- Public Health. The State also has reservations about use of the term "public health," which has certain connotations within the Clean Air Act. A provision may be necessary to ensure the term does not invoke actions related to the Clean Air Act Section 109(b)(1), which directs EPA to set ambient air quality standards to "protect the public health" and allow for an adequate margin of safety. Recent EPA actions have shown an increased propensity for moving beyond the agency's traditional authority.

- Surface Transportation. The State believes the language of this section should be clarified to describe "surface" transportation-related greenhouse gas emissions reduction targets in all cases. Further, the term "surface transportation-related" should be defined to specifically exclude maritime (except ferries), rail, and off-road vehicles.

- Lead Planning/Modeling Agency. The State supports establishing the U.S. Department of Transportation, not the EPA, as the lead agency regarding the development of transportation planning and modeling tools. S. 1733 does this.

- Vehicle Miles Traveled. The State is concerned by provisions creating goals for reduced "vehicle miles traveled." Construction of the natural gas pipeline may create large short-term increases in vehicle miles traveled, but will generate benefits that far outweigh these increases. The State supports an exception for large construction projects promoting clean energy.

- Clean Air Act Incorporation. Section 112 also raises concern because of its incorporation into the Clean Air Act. The provision could subject planning and activities to burdensome Clean Air Act statutes and regulations.

Subtitle F – Energy Efficiency and Renewable Energy

Renewable Energy. (Sec. 161)

- Grants for Renewable Resource Programs. The State supports the nation's transition to increased reliance on renewable energy. Alaska possesses vast renewable energy potential, including hydro, biomass, wind, geothermal, solar, and ocean power. S. 1733 authorizes EPA grants for projects that increase the quantity of energy that a state uses from renewable resources, with priority to applicants in states with a binding Renewable Portfolio Standard. The State approves of the provision's goal.

  The State, however, has concerns about the definition of "qualified hydropower," used in Section 102. It appears hydropower can be considered "qualified" in two ways. First, incremental gains or capacity additions to projects in place before 1988 are considered qualified hydropower. Second, energy produced from capacity added after 1988 to a dam that was originally in place for reasons other than power generation qualifies. This narrow definition would exclude large portions of existing hydropower, making it difficult for Alaska to meet a Renewable Portfolio Standard and compete for grants under Section 161, despite having an abundance of hydropower. The definition would also leave out new hydro projects. The State supports the expansion of the definition of "qualified hydropower."

Energy Efficiency in Building Codes. (Sec. 163)

- National Building Codes. The State opposes setting national energy efficiency building codes. S. 1733 would create national codes for residential and commercial buildings, in order to meet national energy efficiency targets. The EPA Administrator would publish an annual report on energy efficiency building code adoption and compliance by states. Though penalties for noncompliance are not defined in S. 1733, Alaska opposes the existence of national standards in this area. A federally mandated, universal energy code is a poor fit for a state with Alaska's vast size and varied conditions.

Subtitle H – Clean Energy and Natural Resources

Clean Energy and Accelerated Emission Reduction Programs. (Sec. 181)

- Clean Energy Incentives. The State supports Section 181, which rewards companies that switch from power sources with higher emissions than the 2007 power sector average to cleaner fuels, including natural gas, and Section 182, which would establish a new federal grant program encouraging investment in advanced natural gas technologies.

Title III – Transition and Adaptation

Part 1 – Domestic Adaptation

Subpart A – National Climate Change Adaptation Program

National Climate Change Adaptation Program. (Sec. 341)

- Existing Programs. The State supports the inclusion of language to clarify that the proposed National Climate Change Adaptation Program (NCCAF) will not replace existing federal programs already providing state and local governments and tribes with funds for projects that will assist in adaptation. The NCCAF should be a supplemental source of funding that prioritizes meeting urgent needs.

Climate Services. (Sec. 342)

- Coordination. The State believes a lack of specificity in the bill's natural resources adaptation strategy could hamper coordination and produce a duplication of efforts. In this section, the Department of Commerce (NOAA) is tasked with developing a National Climate Service. Section 365 creates a Natural Resources Climate Change Adaptation Panel, chaired by the Council for Environmental Quality. Section 367 establishes a National Climate Change and Wildlife Science Center. These provisions leave ambiguity as to how the bodies will interact. At the State level, federal agencies have competed for leadership and funds in the climate change arena. The vagueness in these provisions could produce a similar dynamic.

Subpart B – Public Health and Climate Change

National Strategic Action Plan; Advisory Board. (Sec. 353-354)

- Public Health. The State supports the inclusion of a section dedicated to addressing public health. However, the bill calls for development of a Health Impact Assessment. The requirement that Health Impact Assessments be conducted by the federal government within the National Environmental Policy Act (NEPA) process has produced challenges in Alaska. Additionally, no funding mechanism is provided to develop these assessments or the strategic plan called for by the bill. The section also lacks a mandate for State or Native representation on the Advisory Board.

Subpart C – Climate Change Safeguards for Natural Resources Conservation

Natural Resources Climate Change Adaptation Plan; Natural Resources Climate Change Adaptation Strategy; Natural Resources Adaptation Science and Information. (Sec. 365-367)

- Mission of Panel. The State believes the purpose of the Natural Resources Climate Change Adaptation Panel should be expanded to address other forms of adaptation, such as infrastructure. As introduced, the bill lacks a strategy for coordinating federal policy on climate change effects outside of the natural resources area.

Federal Natural Resource Agency Adaptation Plans; State Natural Resources Adaptation Plans. (Sec. 368-369)

- Flexibility. The State fears the natural resource adaptation framework in S. 1733, like that in H.R. 2454, is too top-down driven for success. The bill calls for each federal agency to develop a natural resource adaptation plan, with which subsequently-formed state plans must be consistent. Climate impacts, however, differ regionally and locally, requiring maximum flexibility. Development of a national plan will hamstring local identification and prioritization of issues and associated strategies to address them, stifle innovation, and prevent the local "buy-in" vital to effective implementation. A national focus also impedes the development of regional strategies.

  States should be allowed to negotiate cooperative natural resource agreements with the federal government on a state-by-state basis with maximum flexibility. In the face of significant intrusion by the federal government on a state's authority to regulate fish and game, states may reasonably prefer departing from the national strategy. If a state does so, however, it will be penalized through denial of funding under programs in this subtitle and potentially other federal programs. The scenario is counterproductive and could be alleviated with greater flexibility.

- Competing Interests. The State fears efforts to assist species in adapting to climate change and ocean acidification will require controlling human activities to reduce other stressors on these species. Large new conservation units may be carved out and human activities in migration corridors could be substantially limited. The bill does not state how the adaptation strategy and planning called for is to be reconciled with human population growth, resource development, commercial, and other human activities. With this approach, other competing interests of importance to the people of Alaska will be marginalized.

National Resources Climate Change Adaptation Account. (Sec. 370)

- Other Statutes. The State believes the bill should specifically de-link existing statutes, such as the Endangered Species Act (ESA), from the climate change policy process. The State opposes use of the ESA as a vehicle for carrying out climate change policy. Section 370 provides for an expansion of ESA programs, which, without further guidance, could result in significant increases in listings that provide little benefit to those species. The bill should include language affirming that climate change legislation is the appropriate instrument for responding to climate change and that ESA should retain its traditional role of conserving species most at risk.

- Corps of Engineers. The State also believes this section should be modified to explicitly grant the U.S. Army Corps of Engineers the authority to use Natural Resources Climate Change Adaptation Account funding for coastal erosion reduction projects and infrastructure adaptation.

- Funding Allocation. The State appreciates that, of the funds made available to states in this account, a portion (six percent) is set aside for coastal agencies. Coastal states will have unique adaptation needs. To ensure adequate funding where climate change impacts are most severe, though, the State advocates for a separate allocation for Arctic adaptation efforts.

National Wildlife Habitat and Corridors Information Program. (Sec. 371)

- State's Role. The State fears this section undermines the State's role as primary trustee over fish and wildlife. The proposed National Fish and Wildlife Habitat and Corridors Information Program centers around developing Geographic Information System (GIS) databases and maps to support decision-making in this area. The State approves of this approach. The stated purpose of the effort, however, is to allow the Secretary of the Interior to recommend how the information developed "may be incorporated" into relevant State and federal plans that affect fish and wildlife including land management plans, and the State Comprehensive Wildlife Conservation Strategies. Further, the Secretary is granted authority to "ensure that relevant State and federal plans that affect fish and wildlife (1) prevent unnecessary habitat fragmentation and disruption of corridors; (2) promote the landscape connectivity necessary to allow wildlife to move as necessary to meet biological needs, adjust to shifts in habitat, and adapt to climate change; and (3) minimize the impacts of energy, development, water, transportation, and transmission projects and other activities expected to impact habitat and corridors." The State is leery of this expansion of federal authority. To be successful, adaptation efforts must respect the primary roles and authorities of State fish and wildlife agencies in managing fish and wildlife and be built on this precept.

- Landscape Conservation Planning Programs. The relationship of this program to existing landscape conservation planning programs (such as the Landscape Conservation Cooperatives) should also be clarified.

Subpart D – Additional Climate Change Adaptation Programs

Coastal and Great Lakes State Adaptation Program. (Sec. 384)

- Funding Formula. The State approves of this program's focus on coastal states. By factoring in the proportion of shoreline miles, the formula also acknowledges that a state's amount of coastline is an important consideration in assessing adaptation needs. Once again, however, the State feels the formula should account for the unique needs experienced in the Arctic and high latitudes.

Division B – Pollution Reduction and Investment

Title I – Reducing Global Warming Pollution

Subtitle A – Reducing Global Warming Pollution

Reducing Global Warming Pollution. (Sec. 101)

"International Offset Credits." (Clean Air Act [CAA] Sec. 744)

- International Offsets. The State supports the inclusion of international offsets (the ability for companies to reduce emissions outside the U.S. and have it count towards domestic reductions). Like H.R. 2454, S. 1733 allows international offsets, though the portion of overall offsets comprised by international offsets is smaller in S. 1733 than in H.R. 2454.

Definitions. (Sec. 102)

"Definitions." (CAA Sec. 700)

- Alaska Refineries. Alaskans are uniquely dependant on in-state refineries for their fuel needs. Alaska has limited fuel storage and is located thousands of miles from the nearest non-Alaskan refinery. The state's refineries are particularly vulnerable to increased costs because they are relatively simple on the Nelson Complexity Index, meaning they operate at lower levels of economic efficiency than more sophisticated refineries which can extract more refined product from a barrel of crude oil. If Alaska's refineries are disadvantaged to the point of closing, it would likely produce a wide range of negative consequences across the state. These may include higher costs associated with importing fuel by tanker and building storage tanks in addition to increased economic burdens on Alaska's rural communities.

  The Chairman's Mark includes provisions granting small business refiners additional time to comply with the Pollution Reduction and Investment program and distributes additional allowances to small business and medium refineries. These provisions could help Alaska's refineries, but may not be sufficient to protect them from substantial costs.

  The State would support an exemption for certain domestic refineries to prevent regional market failures and promote the interest of regional energy security. One way of achieving this is through modifications to the definition of "covered entities" in the Clean Air Act. First, the language in S. 1733 could be amended to match the corresponding language in H.R. 2454, requiring that a stationary source producing petroleum products do so in "interstate commerce" to be covered under CAA Section 700(13)(B). Second, CAA Section 700(1)(F) subsection (viii) for "petroleum refining" could be removed. These modifications would exempt refineries, like those in Alaska, that sell virtually all of their saleable product in-state.

- Embedded Emissions, Direct Emissions, and Fossil Fuel Based Carbon Dioxide. The State supports adding definitions for Embedded Emissions, Direct Emissions, and Fossil Fuel Based Carbon Dioxide to clarify that natural gas produced at the wellhead or flowing through a pipeline will not be burdened with the requirement of emission allowances for the carbon dioxide that may one day be produced when the natural gas is burned.

- Natural Gas Liquids. The State seeks clarification on this section, which differs from H.R. 2454 in its definition of natural gas liquids as being "ready for commercial sale or use." This change raises concern given the value natural gas liquids bring in a major gas sale scenario.

Disposition of Allowances for Global Warming Pollution Reduction Program. (Sec. 111)

- Fair Allocation of Allowances. The State is very concerned about the disposition of allowances for Alaska under a cap-and-trade regime. An EPA memo provided to Senator Feingold indicated that the agency drastically underestimated emissions in Alaska. The document gave the false impression that Alaska would be sufficiently accommodated through the provision of free allowances under H.R. 2454. EPA's estimates for capped emissions in 2012 appear to have been based exclusively on Alaska's electric generation, primarily electricity generated for retail electricity sales, leaving out all facilities that generate their own power, such as oil and gas fields and some military bases. As a result, EPA estimated the state's emissions at three million tons per year (MMt/yr). For the same year, the State's models estimated capped emissions at 24.2 MMt/yr. This inaccuracy could substantially disadvantage Alaska in the distribution of allowances.

- Emission Allowances for Alaska Natural Gas Transportation Projects. The State supports specific free emission allowances for the operation of Alaska Natural Gas Transportation Projects. The 1,700 mile Alaska Gas Pipeline will be a source of substantial CO2 emissions, estimated to be between 20-50 percent of total Alaskan capped emissions.

"Electricity Consumers." (CAA Sec. 772)

- Regulatory Commission Approval. This section describes an allocation process for allowances to electric utilities with a requirement that applicants first seek approval from the Regulatory Commission of Alaska. This requirement could create a costly unfunded mandate for the State as regulatory proceedings have become contentious and expensive.

- Hydropower Projects. See discussion for section 161.

"Home Heating Oil and Propane Consumers." (CAA Sec. 774)

- Heating Oil Allocation. CAA Section 774 addresses allocations to states based on domestic oil and propane consumption and, as written, is unfavorable to Alaska. Free allowances for heating oil and propane would be allocated to the states based on each state's relative share of total domestic heating oil and propane consumption. Alaska consumes a significant amount of oil due to heating degree days and the prevalence of heating oil use across the state. Heating oil and propane, however, appear to be weighted equally. Thus, states like California and Texas that may consume more propane for barbecue grills and hot tubs than Alaska consumes heating oil, would receive larger shares. The State believes heating oil and propane should be separated for allocation purposes.

"Exchange of State-Issued Allowances." (CAA Sec. 777)

- State-Issued Emission Allowances. Although Alaska is only an observer of the Western Climate Initiative (WCI), it supports WCI's position that the work of the states should be integrated into a new climate regime, rather than completely preempted. This bill would integrate state efforts by exchanging regional allowances for federal allowances.

"Commercial Deployment of Carbon Capture and Sequestration Technologies." (CAA Sec. 780)

- CCS in High-Cost Locations. The State supports the commercial deployment of carbon capture and sequestration (CCS) technologies, and in particular, sequestration as a result of Enhanced Oil Recovery (EOR) projects. CCS is afforded special treatment through the "bonus allowance value," which is essentially a subsidy when compared to the value of purchased or freely distributed allowances.

  The State supports EOR activities in Alaska, especially on the North Slope. This activity produces multiple benefits. Sequestration of CO2 in a known, well-defined hydrocarbon reservoir and trap is inherently safer than in those that are less defined. Furthermore, increased production due to EOR will lengthen oil field life. Since a gas pipeline from the North Slope is economically dependent on the oil field facilities, increasing oil field life improves the economics of a gas pipeline. Gas, as a fuel source, is more environmentally friendly than other carbon fuel sources.

  The costs of CCS on the North Slope may still be prohibitive, however, even with a boost from these allowances and incentives through carbon costs. Costs have been found to be significantly higher for CCS on the North Slope than the averages published for the Lower 48, primarily due to the North Slope's location and weather. The State supports inclusion of provisions that account for greater expenses in high-cost locations in order to make CCS economically feasible in these areas.

Ensuring Real Reductions in Industrial Emissions. (Sec. 141)

"Definitions; Eligible Industrial Sectors." (CAA Sec. 762, 763)

- Foreign Competition for Domestic Refineries. These sections protect certain manufacturing industries from "off-shoring" and foreign competition, but specifically exclude domestic refineries. The State believes domestic refineries should be protected as well.

Title II – Program Allocations

State and Local Investment in Energy Efficiency and Renewable Energy. (Sec. 202)

- Allocation Formula. The allocation method in this section unfairly disadvantages Alaska. While 30 percent of the allowances are granted to states on an equal basis, 30 percent is allocated based on population and another 40 percent is allocated based on state energy consumption as a share of total domestic consumption. By these standards, Alaska would receive fewer allowances than almost any other state. This proposal is unfair to Alaska because the state has more heating degree days and thus Alaskans use more energy on average than residents of other states, costs are highest in rural Alaska where incomes are typically lowest, and switching to other fuel sources is not possible or cost effective in most cases for rural Alaskans. The State would support an increased percentage distributed equally among states, measuring energy consumption per capita rather than as a share of total consumption, or allocating some allowances based on energy costs as a share of per capita income using Census data.

- Indian Tribes. In addition, the State supports Section 202, which provides for the distribution of allowances to Indian tribes, which may benefit some rural areas of Alaska.

Additional Issues:

Domestic Production. The State believes S. 1733 should be modified to expand access and incentives for responsible domestic onshore and offshore oil and gas exploration and production. The U.S. Department of Energy's recent forecast for growth in the energy sectors shows demand for fossil energy continuing to increase in the nation, and to remain above 80 percent of the total portfolio of energy supply through 2030 and beyond. Therefore, it is clear that fossil fuels will be needed as a bridging fuel in the coming decades, and access to domestic production, and specifically clean-burning natural gas, is imperative. Increased domestic production, carbon mitigation, expanded development of renewables, and long-term nuclear energy planning is the only viable path to a secure energy future.

OMB Funding Criteria. The State believes the Office of Management and Budget should be tasked with developing common criteria federal agencies can use to prioritize funding to state and local governments and tribes for infrastructure and other projects addressing climate change vulnerabilities. Existing funding criteria may not be appropriate for this purpose. For example, in sparsely populated but more vulnerable areas like western Alaska, federal assistance may be withheld despite great vulnerability if the primary criterion for funding is the number of people or the dollar value of infrastructure at risk.

EPA Limitation Provision. S. 1733 does not include important language related to the Environmental Protection Agency that appeared in H.R. 2454. The House bill contains language preventing the EPA from requiring performance standards on stationary sources under the federal cap. The State feels limitation language like that in the House bill should be included in S. 1733 and that EPA officials should not set climate change policy.

Adaptation Priorities. The State has identified the following as high priorities and areas of need with respect to adaptation:

- Changing Risks. The State supports collaboration between the states, federal agencies, and academia to challenge traditional assumptions on weather and climate. This effort should focus on data collection and analysis, forecasting models, hydrology, flood plains and inundation, coastal and riverine erosion, critical infrastructure, and related topics.

- Community Profile. The State believes the initial focus and study on adaptation should be on Alaskan coastal and riverine communities. These communities are currently threatened due to climate change and cannot relocate without extreme disruption and costs.

- Evacuation Routes. The State seeks federal assistance in identifying, designing, constructing, and maintaining all-weather evacuation routes from endangered communities to safe havens from approaching storms.

- Safe Havens. The State seeks federal assistance in selecting and equipping safe havens near the endangered communities, with full consideration of the hydrology, geology, and current and more accurate digital mapping. These safe havens should be outfitted with sufficient housing, water and fuel sources, and communications capabilities.

- Shoreline Protection and Stabilization. The State supports a program of shoreline protection and stabilization and considers such projects as the most effective means of protecting against the sudden onslaught of storms.

- Science, Analysis, and Informed Decisions. The State calls for creating and sustaining a program of coordinated, collaborative scientific examination and study of the Arctic climate and environment.

- Other Key Areas. Alaska's needs will also encompass other key areas such as consequences to natural resources, national security, infrastructure, emergency response capacity, etc., resulting from climate change impacts due to diminishing Arctic sea ice and from ocean acidification.

Sponsor Statement

HOUSE JOINT RESOLUTION NO. 48

Urging the United States Congress to pass the Crime Victims Fund Preservation Act.

Created by the Victims of Crime Act (VOCA) in 1984, the Crime Victims Fund provides critical funding for victim compensation and often life-saving direct services. Victim assistance programs, funded through state VOCA grants, help over four million crime victims every year, including victims of domestic violence, sexual assault, child abuse, elder abuse and drunk driving, as well as family members of homicide victims. The Crime Victims Fund is financed entirely from a collection of criminal fines, forfeitures and special assessments, not taxpayer revenues. To ensure a stable level of program funding from a fund dependent on fluctuating deposits, Congress began capping annual obligations that can be made from the Fund starting in 2000. Under the VOCA statutory formula, state assistance grants receive whatever amount remains after all the other VOCA programs are funded. Unless the cap is high enough, increases in other VOCA programs and new costs reduce the amount available for state victim assistance grants. Despite unprecedented deposits into the Crime Victims Fund, state VOCA victim assistance grants were cut significantly between 2006 and 2008, creating a gap of at least $106 million between funding requests and funds available.

The Crime Victims Fund Preservation Act would preserve and enhance federal assistance to crime victims under the Victims of Crime Act. A new $705 million VOCA cap in 2010 will restore stable VOCA assistance funding and take a small first step in meeting the growing needs of victims. The direct services supported by VOCA grants include crisis intervention and counseling, emergency shelters, hotlines, legal advocacy and assistance in participating in the criminal justice system. Reduced funding has meant hundreds of thousands fewer crime victims received services in 2008 than the previous year. In Alaska, there was an $189,000 reduction from 2006 to 2008 in victim assistance grants.

The impact of VOCA assistance grant cuts is devastating to those who, through no fault of their own, have become victims of the most vicious crimes. Without this funding and the direct services it supports, crime victims go without advocacy, medical, mental health, and/or legal services, which are crucial in a victim's healing process. I appreciate your consideration of House Joint Resolution No. 48.

Dear Representative Kerttula:

Please accept this letter as one of support from the Alaska Women's Lobby for HJR 48, Crime Victims Fund Preservation Act. The Crime Victims Fund provides victim assistance dollars to eighteen programs across the state of Alaska and over 4,000 direct crime victim service agencies nationwide. The funds can only be used to provide direct services to crime victims and programs include domestic violence shelters, rape crisis centers, child abuse treatment programs, support groups for survivors of homicide victims and victims of drunk driving crashes, mental health counseling, crisis response programs, court-appointed special advocates, child advocacy centers, prosecutor and law enforcement-based victim assistance and many others.

S. 1340 and H.R. 3402, the Crime Victims Fund Preservation Act of 2009 would establish increasing minimum caps on annual Crime Victims Fund obligations through the year 2014. This is a sound idea and should be adopted by Congress. From its inception in 1984 until 2000, all moneys deposited into the Fund in any fiscal year were distributed to support victim services the following fiscal year. Since 2000, Congress has delayed or "capped" obligations from the Fund "to ensure that a stable level of funding will remain available for these programs in future years" {Conf. Rpt. 106-479}. As a result of these caps, a substantial balance has been retained in the Fund. Unfortunately without a process in place to determine the caps there have been years when a cap has actually meant a decrease in funds to state victim assistance programs. A process for increasing the minimum caps will hopefully ensure that as much money as possible will be made available each year for victim assistance while meeting the goal of providing stable funding in the years ahead.

Thank you for introducing HJR 48. Adding Alaska's voice to those nationwide can only benefit the congressional debate.

Sincerely,

Steering Committee of the Alaska Women's Lobby

Representative Beth Kerttula
State Capitol
Juneau, AK 99801

Dear Representative Kerttula:

On behalf of our organization, I want to thank you introducing a resolution urging the United States Congress to pass the Crime Victims Fund Preservation Act. As a victim service provider, we have seen a clear increase in the number of victims of crime and the growing need for victim assistance and compensation. Although there has been an increase in recent years of criminal fines and penalties collected into the Crime Victims Fund, due to "capping" of Fund obligations, crime victim assistance requests typically far exceed available resources. The reduction in state assistance grant funding experienced by all states including Alaska, together with the current economic climate, has proved devastating to victim service providers, deeply affecting the well-being and recovery of many crime victims. The Crime Victims Fund is one of the main sources of money and support for crime victims and crime victim services; we believe the Fund can provide more help.

Congress has reaffirmed its commitment to stable program funding and has the ability to provide predictable growth. The Crime Victims Fund Preservation Act would establish a minimum funding level for programs under VOCA to ensure reasonable growth in victim services through FY 2014. Providing a stable funding stream will help states with their ongoing program efforts, as well as expansion of programs and outreach to a growing number of crime victims. The cost of this does not come from taxpayer funds but will come exclusively from Federal criminal fines and penalties. The additional funding is greatly needed right now and would be sincerely appreciated by victim service providers and the millions of victims they serve. This legislation is a small first step in meeting victims' needs.

Sincerely,

Gerad Godfrey
Chairman

March 10, 2010

The Honorable Beth Kerttula
Alaska State House of Representatives
State Capitol
Juneau, AK 99801

Dear Representative Kerttula:

On behalf of the Council on Domestic Violence & Sexual Assault, I want to thank you for introducing a resolution urging the United States Congress to pass the Crime Victims Fund Preservation Act. As the funding agency through which victim assistance is distributed in Alaska, we have seen an increase in the number of victims of crime and the growing need for victim assistance and compensation.

Although there has been an increase in recent years of criminal fines and penalties collected into the Crime Victims Fund, due to "capping" of Fund obligations, crime victim assistance requests typically far exceed available resources. The reduction in state assistance grant funding experienced by all states including Alaska, together with the current economic climate, has made it difficult for victim service providers to continue to offer the level of service necessary to meet all the needs of crime victims. The Crime Victims Fund is one of the main sources of money and support for crime victims and crime victim services, we believe the Fund can provide more help.

Congress has reaffirmed its commitment to stable program funding and has the ability to provide predictable growth. The Crime Victims Fund Preservation Act would establish a minimum funding level for programs under VOCA to ensure reasonable growth in victim services through FY 2014. Providing a stable funding stream will help states with their ongoing program efforts, as well as expansion of programs and outreach to a growing number of crime victims. The cost of this does not come from taxpayer funds but will come exclusively from Federal criminal fines and penalties. The additional funding is greatly needed right now across the nation and would be sincerely appreciated by victim service providers and all of the victims they serve. This legislation is a small first step in meeting victims' needs.

Sincerely,

Sandy Samaniego

www.navaa.org

Victims of Crime Act (VOCA)
Crime Victims Fund

Background Information

- Created by the Victims of Crime Act (VOCA) in 1984, the Crime Victims Fund provides critical funding that helps millions of victims of all types of crimes every year. The Fund comes from the collection of Federal criminal fines and penalties; ***not taxpayer revenues***.
- The Office of Management and Budget estimates that the Crime Victims Fund will open 2011 with a $4.3 billion balance, with an additional $1 billion to be deposited during the year.
- VOCA-funded state victim assistance grants support direct services, such as emergency shelter, crisis intervention, counseling and assistance in participating in the criminal justice system, through 4,400 agencies to about 4 million victims of all types of crimes every year. VOCA-funded projects employ 13,500 FTE advocates, counselors and other direct victim service providers.
- 2008: Despite unprecedented deposits into the Crime Victims Fund, state VOCA victim assistance grants were cut by $86.5 million (22 percent) between 2006 and 2008. Because of reduced funding, 336,580 *fewer* crime victims received services in 2008 than during the previous year.
- 2009: Congress took important steps to reverse this downward trend by restoring $56 million for state VOCA victim assistance grants. Combined with one-time Recovery Act grants, these grants in 2009 were restored to the 2006 funding level (including inflation).
- 2010: The $705 million cap is expected to keep state VOCA victim assistance programs at roughly the same total amount available in 2009.
- Meanwhile, crime victims' needs for assistance continue to increase. The economic downturn has resulted in greater incidences of domestic and family violence; new types of crimes (e.g. identify theft, financial frauds, dating violence, stalking) have emerged and new types of services are required.
- The Administration's proposed 2011 VOCA budget raises the VOCA cap but the increase would be more than offset by new and expanded earmarks. These additional costs mean that state assistance grants could be cut by as much as $20 million in 2011.
- **An $867 million cap would support core VOCA assistance grants with a 3.5 percent increase in real dollars over the amount received in 2006.**

Programs currently supported by the Crime Victims Fund:

- Children's Justice Act grants
- U.S. Attorney's victim/witness coordinators (170 FTEs)
- F.B.I. victim assistance specialists (112 FTEs)
- Federal victim notification system
- OVC discretionary grants for nationwide training/technical assistance and services to victims of Federal crimes
- State compensation formula grants
- State victim assistance formula grants
- Antiterrorism Emergency Reserve

Administration 2011 Budget – New/Expanded VOCA Programs

- $100 million discretionary grants for victims of violence against women
- Increase USAO victim witness coordinators to 240 FTEs
- Increase FBI victim assistance specialists to 155 FTEs

VOCA's Crime Victims Fund

- The Crime Victims Fund is a "separate account" made up entirely of "special and trust fund receipts" from Federal criminal fines, forfeitures and special assessments – not taxpayer revenues – which, by law, are to be used exclusively to support victim services.
- The Victims of Crime Act of 1984 originally created the Crime Victims Fund solely to support direct victim assistance services and state crime victim compensation programs. Over the years, additional programs and activities became dependent upon the Fund.
- From 1985 to 2009, $11.7 billion has been deposited into the Fund. According to OMB estimates, the Fund will have a balance of $4.3 billion at the beginning of 2011 with an additional $1 billion expected to be deposited during the year. Thus, $5.3 billion will be available to support VOCA programs in 2011.
- Since its inception, amounts deposited into the Fund in one year were distributed for victim services the next year. Because of fluctuations in Fund deposits, Congress in 2000 started delaying or "capping" the annual obligations that can be made from the Fund in order to ensure stable funding for victim services. By law, amounts not spent are kept in the Fund for victim services in future years.
- The VOCA statute sets out the formula for the annual distribution of VOCA funds. Under this formula, the amount available for state victim assistance grants is, in effect, whatever remains after the other programs are funded. (See next page.)
- ***Unless the annual cap on total VOCA spending is high enough, state grants for direct victim assistance are reduced as funding for other programs increase or other "under the cap" earmarks and costs are added.***
- Between 2006 and 2008, state victim assistance grants were cut by $87 million (22 percent). The Office for Victims of Crime (OVC) reported that 336,580 *fewer* crime victims received VOCA assistance funded services in 2008 compared to 2007.
- In 2009, Congress raised the VOCA cap and added $100 million in Recovery Act funds for VOCA programs which, together, raised state assistance grants back to the 2006 level. 2010 grants are expected to remain level with the total 2009 funding, i.e. VOCA formula plus Recovery Act grants.
- While the Administration proposes a 2011 VOCA cap of $800 million, that is not enough to offset a new $100 million earmark for discretionary grants to support assistance for victims of violence against women, and significantly expanded use of VOCA to fund victim witness coordinators in United States Attorneys' Offices and victim assistance specialists in the FBI.
- Despite the proposed 13.5 percent increase in the total VOCA cap, the Administration's budget could ***cut*** state VOCA assistance grants by $20 million (5 percent).

A 2011 VOCA cap of $867 million will support state VOCA victim assistance grants with a 3.5 percent increase in real dollars over 2006 grants.

2562

HOW THE CRIME VICTIMS FUND IS DISBURSED

The following amounts are allocated according to the VOCA statutory formula (42 U.S.C. 10601(d)):

Under the cap on annual obligations:

- The first $10 million to $20 million is used for formula grants to states to improve the investigation and prosecution of child abuse (Children's Justice Act);

- After that, funds are set aside for certain Federal victim services at levels specified by Congress:
  - Victim witness coordinators in U.S. Attorneys' offices (170 FTE);
  - Victim assistance staff in FBI offices (112 FTE);
  - Federal Victim Notification System ($5 million per year).

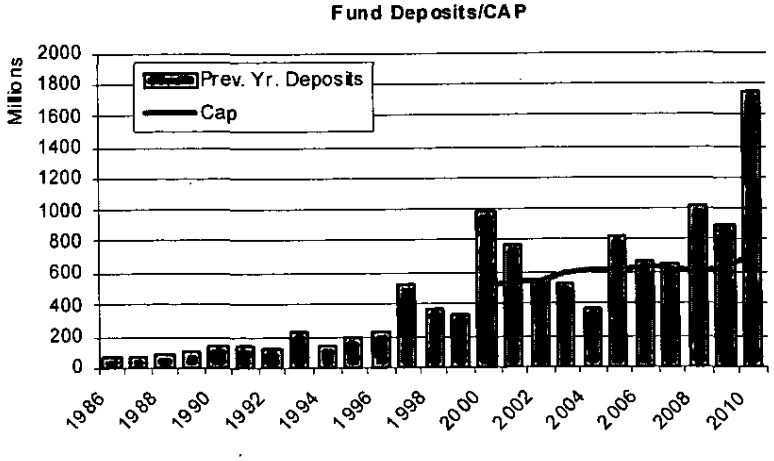
- Of the amount remaining, after the above allocations:
  - Five percent for discretionary grants administered by the Office for Victims of Crime for demonstration projects, training and technical assistance and services to victims of Federal crimes.
  - 47.5% of funds remaining under the cap are available for state crime victim compensation grants with each state receiving a grant based upon 60% of its state-funded compensation benefits.
  - 47.5% of funds remaining under the cap plus any amount not used for state crime victim compensation grants are allocated for formula grants to states to support direct assistance services to victims of crime (each state receives a base amount plus an amount apportioned on population).

Under this formula, the amount available for state assistance grants is, in effect, whatever remain after all the other VOCA programs are funded. For that reason, unless the cap is high enough, increases in the other VOCA programs or funding new programs under the VOCA cap reduce the amount otherwise available for state victim assistance grants.

In addition, according to the VOCA statute, up to five percent of amounts remaining in the Fund after the above annual allocations ("above the cap") may be used to replenish the Antiterrorism Emergency Reserve (AER) which is available to assist victims of international and domestic terrorism or mass violence and compensation to international terrorism victims.

Fiscal Year	Previous Year Deposits	Cap on Obligations
2000	985,185,354	$500,000,000
2001	776,954,858	537,500,000
2002	544,437,015	550,000,000
2003	519,466,480	600,000,000
2004	361,341,967	621,312,498*
2005	833,695,013	620,000,000*
2006	668,268,054	625,000,000
2007	649,631,046	625,000,000
2008	1,017,977,475	590,000,000
2009	896,316,825	635,000,000
2010	1,745,677,602	705,000,000

* Includes rescissions and carryovers



2563

2011 Administration Budget Proposal

The Administration's 2011 budget proposal would:

- Increase the annual cap on obligations from the Crime Victims Fund to $800 million—an increase of $95 million (13.5 percent).

- Create a new earmark from the Crime Victims Fund of $100 million in additional Office for Victims of Crime "discretionary grants for temporary shelter, transitional housing, and other assistance for victims of violence against women."

- Increase VOCA-funding for U.S. Attorney victim witness coordinators to $32.6 million to support 309 victim-witness services positions (including 139 new positions) and 240 FTE.

  The 2000 appropriations for U.S. Attorney victim witness coordinator positions was limited to 170 FTEs at $14.4 million a year, stating "the conferees expect that appropriate sums will be made available under this provision in succeeding fiscal years to continue this program at the current level." [Conf. Report 106-479] The 2011 request is an increase of 126 percent over the original appropriations.

- Increase VOCA-funding to $21.4 million to support 155 victim assistance specialist positions (including 33 new positions) and 155 FTE.

  VOCA funding for the FBI victim assistance positions was first provided in the 2001 appropriations and was limited to 112 FTEs at $7.4 million a year. [Conf. Report 106-1005]. The 2011 request is an increase of 189 percent over the original appropriations.

The Administration's 2011 budget proposal could reduce state VOCA victim assistance grants by as much as $20 million (5 percent).

A 2011 VOCA cap of $867 million will support state VOCA victim assistance grants with a 3.5 percent increase in real dollars over 2006 grants.

Stability of the Crime Victims Fund

There is more than enough money in the Crime Victims Fund to support state victim assistance grants without jeopardizing the Crime Victims Fund's long-term sustainability:

OMB estimates the opening 2010 balance in the Crime Victims Fund was $3.148 billion and that deposits will total $1.861 billion in 2010 and $999 million in 2011. Even with an $867 million VOCA cap, the Fund will continue to grow:

(in millions)	2010	2011
Balance, start of year	3,148	4,304
+ Deposits	1,861	999
Amount Available	5,009	5,303
- Obligations (cap)	705	867
Balance, end of year	4,304	4,436

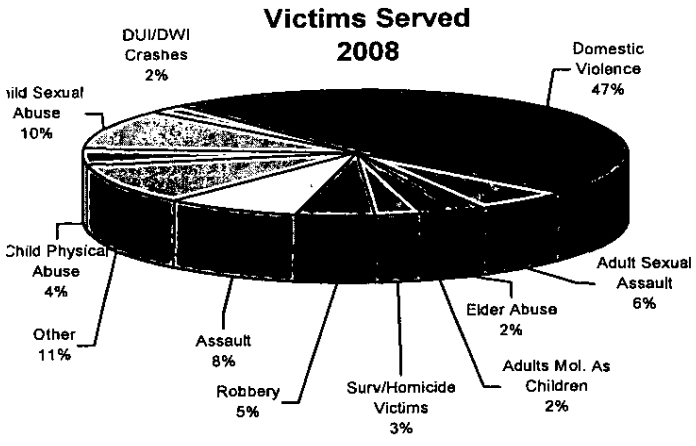
Adult Sexual Assault	237,047	224,374
Elder Abuse	69,782	57,644
Adults Molested As Children	92,946	89,188
Survivors of Homicide Victims	115,813	106,276
Robbery	179,216	176,446
Assault	313,847	300,667
Other	573,641	400,140
TOTAL	**4,116,648**	**3,780,068**

Source: FY 2007 and 2008 OVC National Performance Reports



VOCA funds more than 13,500 full-time equivalent paid jobs for victim advocates, counselors and others who provide direct victim assistance services. (Average salary for non-profit advocates is $25,000-30,000).

In addition, more than 36,000 volunteers (full time equivalent) donate their time and effort annually to provide direct services to crime victims through VOCA-funded projects.

2565

IMPACT OF VOCA ASSISTANCE GRANT CUTS

Because of inadequate caps, state VOCA victim assistance grants experienced severe cutbacks from 2006 to 2008 which had a devastating impact on programs providing direct services to crime victims. The following is indicative of the impact of these cuts:

- 336,580 ***fewer*** crime victims received VOCA-funded assistance services in 2008 compared to 2007. This included 67,431 fewer victims of domestic violence, 12,673 adult victims of sexual assault and 38,409 child victims of physical and sexual abuse.
- The National Network to End Domestic Violence (NNEDV) 2008 census found that 60,799 crime victims were served a single day but **8,927** requests for services went **unmet** that day due to inadequate funding and resources.

> *"We are a bare-bones operation.... VOCA funding for staff and services is the only way most of our poor and homeless clients ever get assistance."*
> –Nonprofit service provider (TX)

- According to a survey of 1,000 providers conducted by the National Center for Victims of Crime (NCVC):
  - Nearly all respondents said that VOCA funding was **"very important."** This ranged from 91.5 percent for prosecutor-based programs to 99.5 percent for domestic violence programs.
  - Fifty-eight percent said they will have to serve fewer crime victims; 55 percent will reduce outreach to victim and 46 percent will provide fewer services.
  - Rural areas will be especially hard hit; many will have to close satellite offices and clients will have to travel 3 or 4 hours to receive services.
  - Many programs said they would use restored VOCA funding for services to elderly victims, teen victims, tribal victims, victims with disabilities, human trafficking, and homicide victims.

> *"VOCA funding is the life-blood of an agency like ours dedicated solely to helping child victims of felony sexual and physical abuse crimes and their non-off ending family members."*
> –Nonprofit service provider (AL)

- State VOCA assistance administrators reported that multiple funding cutbacks had severe cumulative impact. Examples --
  - Anticipated annual reductions in victim assistance subgrants of 8 percent in Washington State; 26 percent in Kansas; 27 percent in Pennsylvania; 16 percent in Iowa; 11 percent in Oregon; and 17 percent in Wisconsin.
  - Continued cuts in Minnesota's VOCA assistance grants meant the loss of the equivalent of five programs, eliminating services in five counties.
  - Since FY 2005, the number of Iowa victim service programs has decreased from 88 to 74.
  - Wyoming was unable to fund programs, such as Sexual Assault Nurse Examiners, Sexual Assault Response Teams and Child Advocacy Centers, that provide specialized crime victim services.
  - Massachusetts expects an across-the-board cut of 27 percent, reducing the number of funded programs from 90 to 65.

> *"VOCA funding is vital in providing services to those who, through no fault of their own, have become victims of the most vicious of crimes. If this funding were not available, these victims would go without advocacy, medical, mental health, and/or legal services, which is crucial in a victim's healing process."*
> –Nonprofit service provider (WV)

  - All states fear the loss of dedicated, experienced, and well-trained victim advocates because of the inability to pay a decent wage. The average annual salary for a victim service professional in South Carolina is $18,000-$24,000.
  - Oregon cut the number of victim advocate positions funded under its competitive VOCA projects from 18 FTEs to 4 FTEs.
  - Because of funding cuts in Pennsylvania, 20 percent of programs have waiting lists; 16.5 percent have discontinued programs; 22 percent imposed hiring freezes; 31 percent have decreased or eliminated staff and 13.7 percent implemented layoffs.
  - An Arizona sexual assault counseling service reported a five months' waiting period.

Other Programs Currently Supported by the Crime Victims Fund

Children's Justice Act

- Up to $20 million in formula grants to states to improve the investigation/prosecution of child abuse cases.
- 85 percent awarded by HHS to States; 15 percent by OVC for Native American grants.

United States' Attorneys Office victim/witness coordinators

- VOCA funded since 2000.
- Congress specified VOCA funding for 170 FTE Federal victim/witness coordinators in United States Attorneys' Offices in each of 94 United States Attorneys Offices.
- Costs have increased from $14.4 million in 2000 to $21.4 million in 2009.
- **The Administration's 2011 budget would increase the number of VOCA-funded positions to 240 FTE at a cost of $32.6 million, a 126 percent increase over the original appropriation.**

F.B.I. victim assistance specialists

- VOCA funded since 2001 between $2 million - $14 million/year.
- Congress funded 112 victim assistance specialists in 56 F.B.I. field offices, 25 largest Resident Agencies and 31 across Indian Country.
- Annual costs have fluctuated greatly from a low of $1.9 million to $14.1 million.
- **The Administration's 2011 budget would increase the number of VOCA-funded positions to 155 FTE at a cost of $21.4 million, a 189 percent increase over the original appropriation.**

Federal Victim Notification System (VNS)

- VOCA funded since 2003 between $5 – $6.4 million/year.
- Automated notification to victims on case status and offender status used by USAO, FBI and Bureau of Prisons.

Office for Victims of Crime Discretionary Grants

- Five percent of annual allocations after CJA, federal earmarks.
- At least half used for national scope training and technical assistance, demonstration projects, program evaluations, and compliance efforts.
- No more than half used for services to victims of Federal crimes.

	2004	2005	2006	2007	2008	2009	2010 est.
CJA	20,000,000	20,000,000	20,000,000	19,898,701	19,019,518	20,000,000	20,000,000

Other/Adj				1,400,915	34,171,634*		

*Office of Justice Programs charges for management and administrative costs.

Replenishment of Antiterrorism Emergency Reserve (AER)

- Five percent of balance ("above the cap") in Crime Victims Fund available (after other programs are funded) to replenish $50 million reserve available for:
  - Supplemental grants to assist and compensate victims of domestic or international terrorism or mass violence.
  - OVC International Victims' of Terrorism Compensation Program.

Crime Victims Fund Preservation Act of 2009
S. 1340 and H.R. 3402
Fact Sheet

- The Crime Victims Fund is a special account made up entirely of fines and other penalties paid by convicted federal offenders and dedicated exclusively to a variety of services to help crime victims; **there are no taxpayer dollars** in the Fund.

- Grants to state VOCA victim assistance programs fund services to more than 4 million victims of all types of crimes, including, among others, domestic violence, sexual assault, child abuse, survivors of homicide victim, drunk driving crashes, stalking, identity theft, and elder abuse.

- Because of fluctuations in Fund deposits, Congress limits or "caps" annual obligations from the Fund, resulting in an accumulated "rainy day" balance to ensure stable funding for victim services.

- Because the VOCA cap did not keep pace with the costs of programs, state crime victim assistance grants were cut by $87 million (22 percent) from 2006 to 2008.

- During this same period, however, the Fund's "rainy day" balance increased by more than $700 million — from $1.3 billion in 2006 to $2 billion in 2008. Based on criminal fines that federal courts have already imposed but not yet collected, the balance is projected to grow even more through 2014.

- **Crime victims' needs continue to increase.** Although these prior cuts were restored by a combination of the 2009 Appropriations Act and the economic recovery act, the need to support crime victim services continue to increase. Examples:
    - According to U.S. Department of Justice Office for Victims of Crime, 366,000 *fewer* crime victims received VOCA funded victim assistance services in 2008 than in 2007.
    - The National Census of Domestic Violence Services reports that, on one day in 2008, nearly 61,000 adults and children sought support from local domestic violence programs. But on that same day, almost 9,000 requests were unmet due to lack of resources.
    - Calls to the National Crime Victim Hotline operated by the National Center for Victims of Crime have increased, especially for victims of a variety of frauds, such as work at home, secret shopper and investment schemes, mortgage and construction fraud.

- **S. 1340 (introduced by Senators Patrick Leahy and Mike Crapo) and H.R. 3402 (introduced by Representatives Ted Poe and Jim Costa) are essential to preserving the Fund and meeting victims' needs.** These bills will statutorily establish a minimum annual cap on VOCA through 2014. The caps will increase the VOCA cap by 23 percent each year yet leave a balance of at least $800 million, enough to ensure the Fund's sustainability.

- The bills will provide a steady, reasonable and predictable growth in victim services through 2014 without jeopardizing the Fund's ability to continue supporting victim services.

111TH CONGRESS
1ST SESSION

S. 1340

To establish a minimum funding level for programs under the Victims of Crime Act of 1984 for fiscal years 2010 to 2014 that ensures a reasonable growth in victim programs without jeopardizing the long-term sustainability of the Crime Victims Fund.

IN THE SENATE OF THE UNITED STATES

JUNE 24, 2009

Mr. LEAHY (for himself and Mr. CRAPO) introduced the following bill; which was read twice and referred to the Committee on the Judiciary

---

A BILL

To establish a minimum funding level for programs under the Victims of Crime Act of 1984 for fiscal years 2010 to 2014 that ensures a reasonable growth in victim programs without jeopardizing the long-term sustainability of the Crime Victims Fund.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Crime Victims Fund Preservation Act of 2009".

SEC. 2. CRIME VICTIMS FUND.

Section 1402(c) of the Victims of Crime Act of 1984 (42 U.S.C. 10601(c)) is amended—

(1) by inserting "(1)" after "(c)"; and

(2) by adding at the end the following:

"(2) The amount made available from the Fund for the purposes of paragraphs (2), (3), and (4) of subsection (d) shall be not less than—

"(A) $705,000,000 for fiscal year 2010;

"(B) $867,150,000 for fiscal year 2011;

"(C) $1,066,594,500 for fiscal year 2012;

"(D) $1,311,911,235 for fiscal year 2013; and

"(E) $1,613,650,819 for fiscal year 2014.".

111TH CONGRESS
1ST SESSION

H. R. 3402

To establish a minimum funding level for programs under the Victims of Crime Act of 1984 for fiscal years 2010 to 2014 that ensures a reasonable growth in victim programs without jeopardizing the long-term sustainability of the Crime Victims Fund.

IN THE HOUSE OF REPRESENTATIVES

JULY 30, 2009

Mr. POE of Texas (for himself and Mr. COSTA) introduced the following bill; which was referred to the Committee on the Judiciary

---

A BILL

To establish a minimum funding level for programs under the Victims of Crime Act of 1984 for fiscal years 2010 to 2014 that ensures a reasonable growth in victim programs without jeopardizing the long-term sustainability of the Crime Victims Fund.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Crime Victims Fund Preservation Act of 2009".

SEC. 2. CRIME VICTIMS FUND.

Section 1402(c) of the Victims of Crime Act of 1984 (42 U.S.C. 10601(c)) is amended—

(1) by inserting "(1)" after "(c)"; and

(2) by adding at the end the following:

"(2) The amount made available from the Fund for the purposes of paragraphs (2), (3), and (4) of subsection (d) shall be not less than—

"(A) $705,000,000 for fiscal year 2010;

"(B) $867,150,000 for fiscal year 2011;

"(C) $1,066,594,500 for fiscal year 2012;

"(D) $1,311,911,235 for fiscal year 2013; and

"(E) $1,613,650,819 for fiscal year 2014.".

Dear Chairman Mollohan and Ranking Member Wolf:

We are greatly appreciative of your subcommittee's efforts in the FY 2009 Omnibus Appropriations Act to take important and positive steps to repair the serious erosion of support for critical services for victims of crime, and especially for your improvements regarding funding for the Victims of Crime Act (VOCA) through the Crime Victims Fund.

As you know, the Fund supports a wide range of important services for victims of crime. Some 4,200 agencies provide these services to more than 4 million victims of all types of crime every year, largely through the formula state victim assistance grants. Because of increases in other VOCA-funded program areas and lowered cap, these state grants were cut by nearly $90 million between 2006 and 2008.

For FY 2009, your committee recommended a significant increase in the annual limit of Fund obligations and recognized the inappropriateness of using the Crime Victims Fund (and other Office of Justice Program grant programs) for OJP management costs. We commend the subcommittee for these two steps that restored two-thirds of the previous reductions in VOCA funding for state victim assistance grants.

As work begins on the FY 2010 appropriations bill, we urge the subcommittee to continue this progress by further reflecting the growing needs for the important services that are supported with VOCA funds. We believe that a FY 2010 cap on Fund obligations of $705 million would complete the restoration of state assistance grants to the amount received in FY 2006, including inflation, and be a down payment to meet the growing needs of crime victims.

A recent survey of state VOCA victim assistance administrators demonstrates that additional funding is essential. Indeed, according to that survey, a minimum of $106 million in additional VOCA state victim assistance grants would be necessary to fill the identified gap in funding between requested funding needs and VOCA funds available. Our request for a $705 million cap in FY 2010 would meet just one-quarter of those additional needs.

We are also aware of the need to ensure that the Crime Victims Fund be able to sustain adequate funding levels for future victim services. Last year, OMB projected that the FY 2009 opening Fund balance would be $1.9 billion. We also know that based on public announcements of negotiated agreements in a number of Federal criminal cases, deposits into the Fund will increase significantly over the next several years. Thus, the Fund will be assured of maintaining a balance that can ensure adequate, stable support for VOCA victim services.

The original drafters of the VOCA legislation designed the Crime Victims Fund to be a self-sufficient source of support for victim services. Appropriators have consistently explained the purpose of the annual caps on VOCA obligations as a means to ensure a stable source of funding. Our request is consistent with both of these goals.

We also need to note that the previous four Presidential budgets sought to rescind the entire balance in the Fund. Congress has properly and resoundingly turned down those requests. Although lacking in details, the FY 2010 budget announced last month suggests that another Fund rescission proposal may in the works. Should that happen, we trust that Congress will again protect the Fund to ensure its continued availability to support victim services.

Thank you for your consideration of this request.

STATE ATTORNEYS GENERAL SUPPORT MORE FEDERAL FUNDING FOR THE VICTIMS OF CRIME ACT GRANTS

Washington, DC---Attorneys General from 54 states and territories signed a letter sent to members of Congress expressing their support for the Crime Victims Fund Preservation Act of 2009 (S. 1340; HR 3402). The bill would increase the maximum amount of annual Victims of Crime Act (VOCA) grants to states over the next five years.

VOCA grants are allocated through the Crime Victims Fund, a special account dedicated to providing services to crime victims and made up entirely of fines and penalties paid by convicted federal offenders. The funds are crucial at the state level in educating victims, training for law enforcement, and administering programs providing compensation. The funds available to provide victims services have declined precipitously in recent years.

"Grants to state VOCA victim assistance programs fund services to more than four million victims of all types of crimes, including, domestic violence, sexual assault, child abuse, survivors of homicide victims, drunk driving crashes, stalking, identity theft, and elder abuse," the letter states.

The bill raises the cap on federal VOCA grants to $705 million for fiscal year 2010, and then increases the cap by 23 percent each year through 2014.

"...this reasonable and sustainable increase in federal support will help to ensure that we are able to continue to support victims at a high level and for years to come."

The standards and formula for allocating the funds will not change and the Crime Victims Fund is projected to maintain a sustainable balance of at least $800 million through 2014.

The Honorable Patrick Leahy
Chairman, Senate Judiciary Committee
United States Senate

The Honorable Jeff Sessions
Ranking Member, Senate Judiciary Committee
United States Senate

The Honorable John Conyers
Chairman, House Judiciary Committee
U.S. House of Representatives

The Honorable Lamar Smith
Ranking Member, House Judiciary Committee
U.S. House of Representatives

Dear Senators Leahy and Sessions and Representatives Conyers and Smith:

We, the undersigned Attorneys General, write to express support for, and ask for your help in passing, Senate Bill 1340 (companion, HR 3402). Also called the Crime Victims Fund Preservation Act of 2009, the bill was introduced by Senators Patrick Leahy and Mike Crapo, and will increase the maximum amount of annual VOCA (Victims Of Crime Act) grants to states over the next five years.

As you know, VOCA grants provide much-needed support to victims and victim service agencies throughout the nation. The grants are allocated through the Crime Victims Fund, a special account dedicated to providing services to crime victims and made up entirely of fines and penalties paid by convicted federal offenders. States receive these grants and administer programs providing compensation and education for victims, and training for law enforcement. Grants to state VOCA victim assistance programs fund services to more than 4 million victims of all types of crimes, including, domestic violence, sexual assault, child abuse, survivors of homicide victims, drunk driving crashes, stalking, identity theft, and elder abuse.

Because annual VOCA caps have not kept pace with the costs of providing victim services, states have been doing more with less. Likewise, because the caps have not kept pace with income to the Crime Victims Fund, the balance in the fund has risen to $2 billion over the past two years. The Crime Victims Fund Preservation Act of 2009 will raise the cap on federal VOCA grants to $705 million for fiscal year 2010, and then increase the cap by 23 percent each year through 2014. The standards and formula for allocating the funds will not change, and even with the increased caps, the Crime Victims Fund is projected to maintain a sustainable balance of at least $800 million through 2014.

The funds available to provide victims services such as these have declined precipitously in recent years. Efforts are underway in the office's of VOCA state funds administrators to staunch that decline and to operate the Crime Victims Assistance and Prevention programming more efficiently. VOCA grants make up a large portion of this funding, and this reasonable and sustainable increase in federal support will help to ensure that we are able to continue to support victims at a high level and for years to come.

We urge you to preserve the intent of the offender-generated revenues and the assistance it provides to innocent victims by passing the Crime Victims Fund Preservation Act of 2009.

POLICY RESOLUTION: Support of Passage of the "Crime Victims Fund Preservation Act"

COMMITTEE: Law and Criminal Justice

TYPE OF POLICY: Action

The National Conference of State Legislatures (NCSL) recommends to the Congress of the United States that an increasing minimum annual cap on obligations from the Crime Victims Fund be established as provided for in "The Crime Victims Fund Preservation Act of 2009."

WHEREAS, the Victims of Crime Act of 1984 (Public Law 98-473, 42 U.S.C. § 10601 et seq.) established the Crime Victims Fund, which is one of the main sources of money and support for crime victims and crime victims services all states, the District of Columbia, Puerto Rico, U.S. Virgin Islands and territories; and

WHEREAS, the Crime Victims Fund provides critical funding for formula grants to states for victim compensation and victim assistance and for Federal discretionary grants, in addition to earmarks for Federal victim assistance within the United States Attorneys' Offices, FBI and Victim Notification System and the Children's Justice Act; and

WHEREAS, state compensation programs pay directly for medical care, counseling, lost wages and funerals for victims of domestic violence, child abuse, rape and homicide; and

WHEREAS, state victim assistance programs provide critical, often life-saving services, including crisis intervention, counseling, emergency shelter, child care and emergency transportation; and

WHEREAS, discretionary grants awarded by the Office for Victims of Crime to organizations fund demonstration projects, training and technical assistance to expand and improve the delivery of services to crime victims as well as support for services to victims of Federal offenses; and

WHEREAS, all funds placed in the Crime Victims Fund are derived from criminal fines and other penalties paid by offenders of Federal crimes and does not rely on any tax-generated revenues; and

WHEREAS, states may utilize compensation grants and victim assistance grants over a four-year period, thus enabling them to plan and manage the distribution of funds over time; and

WHEREAS, since 2000, Congress began capping annual obligations from the Crime Victims Fund which has limited the amount of funding that would otherwise have been available to support victim assistance services; and

WHEREAS, in the past eleven years, a total of nearly $9 billion has been deposited into the Crime Victims Fund while only $6 billion has been obligated resulting in an accumulated balance of nearly $3 billion in the Fund as of the beginning of 2010; and

WHEREAS, Congress has repeatedly affirmed that the cap was imposed to ensure that a stable level of funding remains available for use to fund crime victim programs in future years; and

WHEREAS, victim service programs in all states and jurisdictions are facing severe budgetary shortfalls because of cutbacks in other victim funding programs and private donations while the need for services continue to increase; and

[Note: should be S. 1340]

WHEREAS, the Crime Victims Fund Preservation Act, S. 1304 introduced by Senators Patrick Leahy and Mike Crapo and H.R. 3402 introduced by Representatives Ted Poe and Jim Costa would establish increasing minimum caps on annual Crime Victims Fund obligations through the year 2014 which will significantly increase the amount available for state VOCA victim assistance grants and discretionary grants awarded by the Office for Victims of Crime without jeopardizing the long-term sustainability of the Fund; and

THEREFORE, BE IT RESOLVED That the National Conference of State Legislatures fully supports purposes of the Crime Victims Fund Preservation Act (S. 1304/H.R. 3402); and the purposes recommend that Congress enact the Crime Victims Fund Preservation Act; and

BE IT FINALLY RESOLVED that a copy of this resolution shall be sent to state legislative leaders, Congressional sponsors of S. 1304 and H.R. 3402, and members of the Senate Committee on the Judiciary, Senate Committee on Appropriations, House Committee on the Judiciary, and the House Committee on Appropriations.

CS FOR HOUSE RESOLUTION NO. 6(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SIXTH LEGISLATURE - FIRST SESSION

BY THE HOUSE FINANCE COMMITTEE

Offered:
Referred:

Sponsor(s): REPRESENTATIVES STOLTZE, Thomas, Chenault, Austerman, Coghill, Dahlstrom, Edgmon, Fairclough, Foster, Gatto, Harris, Herron, Johansen, Johnson, Joule, Keller, Kelly, Lynn, Muñoz, Neuman, Olson, Ramras, Seaton, Millett, Hawker

A RESOLUTION

Encouraging the Alaska Mental Health Trust Authority to develop its land and resources to the fullest extent possible consistent with its legal and moral responsibility to advance mental health services and employment opportunities that protect and enhance the lives of those who benefit from the mental health trust.

BE IT RESOLVED BY THE HOUSE OF REPRESENTATIVES:

WHEREAS the Alaska Mental Health Trust Authority is the trustee of the trust established under the Alaska Mental Health Enabling Act of 1956, P.L. 84-830, 70 Stat. 709; and

WHEREAS the mental health trust was established with more than 1,000,000 acres of land and $200,000,000 to serve the beneficiaries of the trust with services related to mental health and to enable the Alaska Mental Health Trust Authority to act as a catalyst for change in the systems and services that serve the beneficiaries of the trust; and

WHEREAS many of Alaska's most vulnerable citizens, who experience mental illness, developmental disabilities, Alzheimer's disease and related dementia, alcohol and substance addictions, traumatic brain injuries, and other mental health disabilities, are

beneficiaries of the mental health trust; and

WHEREAS many of these vulnerable Alaskans suffer neglect; sexual, physical, and emotional abuse; homelessness; and exposure to domestic violence; and

WHEREAS many communities lack adequate mental health care and treatment facilities; and

WHEREAS employment opportunities, treatment, education, and housing for beneficiaries of the mental health trust are particularly limited in the rural areas of the state; and

WHEREAS the lack of jobs in the rural areas of the state contributes to unlawful behavior, feelings of despair, and, in extreme cases, suicide; and

WHEREAS more than 40 percent of the offenders in Alaska's correctional facilities are beneficiaries of the mental health trust; and

WHEREAS many of the beneficiaries of the mental health trust who have access to an adequate support program are capable of being employed; and

WHEREAS prevention and early intervention by mental health organizations can prevent more costly institutional and intensive care; and

WHEREAS the costs of providing mental health care services are increasing; and

WHEREAS the Department of Health and Social Services, the Alaska Mental Health Trust Authority, and other partner organizations work cooperatively to plan, budget, and implement an integrated and comprehensive mental health program for the state; and

WHEREAS the ability of the Alaska Mental Health Trust Authority to assist the state in developing a better mental health program is largely dependent on the authority's ability to generate revenue from the land and natural resources of the trust; and

WHEREAS development of the land held by the mental health trust creates jobs for beneficiaries of the mental health trust and other Alaskans;

BE IT RESOLVED that the House of Representatives encourages the Alaska Mental Health Trust Authority to develop its land and resources to the fullest extent possible, consistent with its legal and moral responsibility to advance mental health services and employment opportunities that protect and enhance the lives of those who benefit from the mental health trust.

for recreational purposes or other public purposes for which the water is used or capable of being used consistent with the public trust.

(d) This section may not be construed to affect or abridge valid existing rights or create a right or privilege of the public to cross or enter private land. (§ 4 ch 56 SLA 1999)

Distributed by Rep. Gara

Sec. 38.05.127. Access to navigable or public water. (a) Before the sale, lease, grant, or other disposal of any interest in state land adjacent to a body of water or waterway, the commissioner shall,

(1) determine if the body of water or waterway is navigable water, public water, or neither;

(2) upon finding that the body of water or waterway is navigable or public water, provide for the specific easements or rights-of-way necessary to ensure free access to and along the body of water, unless the commissioner finds that regulating or limiting access is necessary for other beneficial uses or public purposes.

(b) The department shall adopt regulations implementing this section.

(c) Nothing in this section affects valid existing rights or limits in any way the constitutional right of the public to use and have free access to the navigable or public waters of the state.

(d) Upon application by a municipality or an affected owner of land, the department may vacate, release, modify, or relocate an easement and right-of-way for public access to or along navigable or public waters reserved by the department in a patent issued under AS 29.65 or former AS 29.18, if the commissioner determines the action is consistent with the public interest.

(e) The establishment of easements or rights-of-way for oil and gas, gas only, and mineral leases under (a) of this section need not be made until the leases are ready to be developed.

(f) Rights-of-way or easements to waterways established under (a)(2) of this section shall be established approximately once each mile unless the commissioner makes a written finding that regulating or limiting access is necessary for other beneficial uses or public purposes.

(g) The commissioner may exchange land under AS 38.50 to create access to public water of the state. (§ 2 ch 117 SLA 1976; am § 32 ch 113 SLA 1981; am §§ 37, 38 ch 152 SLA 1984; am § 57 ch 74 SLA 1985; am § 3 ch 82 SLA 1985; am § 2 ch 53 SLA 1988; am § 13 ch 49 SLA 2004)

Cross references. — For legislative findings and purpose in connection with the 1985 amendment to (c) of this section, see § 1, ch. 82, SLA 1985 in the Temporary and Special Acts; for legislative findings and intent in connection with the enactment of (f) and (g) of this section, see § 1, ch. 53, SLA 1988 in the Temporary and Special Acts.

Effect of amendments. — The 2004 amendment, effective June 5, 2004, inserted "gas only" in subsection (e).

Legislative history reports. — For report on ch. 117, SLA 1976 (HCS 2d CSSB 215), see 1975 Senate Journal, p. 452; 1975 House Journal, p. 1296.

NOTES TO DECISIONS

CS FOR SENATE BILL NO. 1(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SIXTH LEGISLATURE - FIRST SESSION

BY THE SENATE FINANCE COMMITTEE

Offered: 4/7/09
Referred: Rules

Sponsor(s): SENATORS WIELECHOWSKI, ELLIS, THOMAS, DAVIS, AND FRENCH, Paskvan, Menard

A BILL

FOR AN ACT ENTITLED

"An Act increasing the minimum hourly wage; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 23.10.065(a) is repealed and reenacted to read:

(a) Except as provided in (b) of this section and as otherwise provided by law, for hours worked in a pay period, whether the work is measured by time, piece, commission, or otherwise, an employer shall pay to each employee wages at a rate that is not less than $7.25 an hour until December 31, 2009, and thereafter not less than 50 cents an hour more than the federal minimum wage. An employer may not apply tips or gratuities bestowed on employees as a credit toward payment of the minimum hourly wage required by this section. Tip credit as defined by the Fair Labor Standards Act of 1938 as amended does not apply to the minimum wage established by this section.

*** Sec. 2.** This Act takes effect July 24, 2009.

Sponsor Statement: CS for SB 1 (FIN)
Raising the Minimum Wage

Alaska's cost of living is one of the highest in the nation. The cost of food, housing, utilities, transportation and health care are far greater here than in most states. Despite this, Alaska has the lowest minimum wage on the West Coast. Oregon, Washington, California and Hawaii all have higher minimum wages, as do 15 other states. In addition, in July 2009, the federal minimum wage will increase to $7.25, surpassing Alaska's current rate of $7.15. This will be the first time since statehood that Alaska's minimum wage will fall below the federal level.

CS for SB 1 (FIN) would increase Alaska's minimum wage from $7.15/hour to 50 cents above the federal minimum wage on January 1, 2010. If Alaska's minimum wage, last raised in 2003, were to have kept pace with the rate of inflation, it would be roughly $8.75/hour in 2010. This bill would raise our minimum wage to $7.75/hour in 2010 – a modest increase in these difficult economic times.

More than 8,000Alaskans earn less than $7.75/hour and would benefit from this legislation. Workers that earn the current Alaska minimum wage make roughly $14,872/year, which is little more than the federal poverty level for Alaska ($13,530). Nationally, 25% of those who earn just under $8/hour are parents. Many are the sole wage earners in their household.

Economic studies show that higher wages lead to greater productivity, lower recruiting and training costs, decreased absenteeism, and increased worker morale. Studies have not documented negative employment impacts (e.g., job loss) due to modest increases in the minimum wage, such as that proposed by this bill.

A minimum wage increase will help improve the standard of living for many Alaskan families and recognizes Alaska's high cost of living. This legislation received broad bipartisan support in the Alaska State Senate. Please join us in supporting CS for SB 1 (FIN).

4-16-09

SB 1: Raising the Minimum Wage

4/15/09 Remarks to House Finance Committee

- Mr. Chairman and members of the committee, thank you for scheduling a hearing on SB 1, a bill jointly introduced by Senate Majority Leader Ellis as well as Senators Thomas, Wielechowski, Davis and French.
- All of the prime sponsors of the bill are currently ~~on the floor~~ in caucus, so they asked me to make these remarks on their behalf.
- As you know, CS for SB 1 (FIN) passed the Senate by a 17 - 2 margin with strong bipartisan support. It is the product of much compromise and proposes two modest increases to Alaska's minimum wage.
- The first increase would take place on July 24, when Alaska's minimum wage will fall -- for the first time in the state's history -- under the level of the federal minimum, which rises in July to $7.25.
- This increase would make Alaska's minimum wage equal to the federal minimum.
- The second increase would become effective on January 1, 2010, when our minimum wage would rise to 50 cents above the federal level. Effectively this would create a state minimum wage of $7.75/hour.
- The sponsors of this bill believe these small increases are appropriate for several reasons.
- Alaska's cost of living is one of the highest in the nation. The cost of food, housing, utilities, transportation and health care are far greater here than in other states.

- Despite this, Alaska's minimum wage is currently the lowest on the West Coast and lower than 19 other states. In July, our minimum wage will be lower than 39 other states.

- This is not only unacceptable, but contrary to Alaska's long tradition of being at least 50 cents above the federal minimum.

- Had our minimum wage, last raised in 2003, been adjusted annually for inflation, it would be $8.46 today – significantly less that what this CS proposes.

- At least 9 states adjust their minimum wage annually for inflation, including Arizona, Colorado, Montana, Nevada, Oregon, and Washington.

- It's important to note that this CS does not do that. It merely proposes to increase the wage on a one-time basis to reflect Alaska' increasing cost of living and the difficulty faced by Alaskans struggling to live on the minimum wage.

- More than 8,000 Alaskans earn less than $7.75/hour. Most work in accommodation and food service, retail trade, educational services, and manufacturing.

- A full-time worker that makes the minimum wage earns about $15,000/year, before taxes. This is barely above the poverty level for a single person ($13,500) and is $3,000 less poverty level for a family of two ($18,000.)

- This is important because 25% of those who earn between $7.15 and $8/hour are parents. Many are the sole wage earners in their household.

- We also know that roughly 58% of minimum wage earners are adults, and the average age of those adults is 38. It's a fallacy that most minimum wage earners are kids.

- It's important to note that Alaska law currently exempts employees under age 18 working 30 hours or less/week from the state's minimum wage. The minimum wage is not a "training wage" for kids -- it's a wage provided to many adults for sustained periods of time.

- State law (AS 23.10.070) also allows the Commissioner of Labor to set a lower minimum wage for individuals whose earning capacity is impaired by physical or mental deficiency, age, or injury.

- One question many people ask is whether raising the minimum wage will result in loss of jobs. This is an important question. Fortunately, there is a growing consensus among economists that increases in the minimum wage do not result in negative employment impacts.

- Recently, over 650 economists, including 5 Nobel prize winners, signed a statement that minimum wage increases can "significantly improve the lives of low-income workers and their families, without the adverse impacts that critics have claimed."

- Alaska's own experience backs this up.

- If we look at the food and beverage industry where the greatest number of minimum wage earners work, we see that the number of employees was not affected by the passage in 2002 of a minimum wage increase.

- In the years following implementation of the wage hike, the number of workers rose steadily.

- The same pattern can be seen in the retail trade industry.

- Economic studies also indicate that higher wages lead to greater productivity, lower recruiting and training costs, decreased absenteeism, and increased worker morale.

- As today's economic downturn forces more poor families to rely on their earnings from low-paying jobs, a minimum wage increase can help lower income Alaskans improve their standard of living and achieve greater financial independence.

- It may also reduce the number of Alaskans forced to rely on public assistance.

- Working for a minimum wage should not mean working for a minimum quality of life.

- On behalf of Senators Ellis, Thomas, Davis, French and Wielechowski, I urge you to support this compromise version of SB 1.

Raising the Minimum Wage: CS for Senate Bill 1 (FIN)

Proposal:

Increase Alaska's minimum wage from $7.15/hour to 50 cents above the federal minimum wage, effective January 1, 2010.

Background:

- Alaska's cost of living is one of the highest in the nation. The cost of food, housing, utilities, and health care are far greater than in other states.
- Despite this, 19 states have a higher minimum wage than Alaska, including California, Connecticut, Hawaii, Iowa, Illinois, Michigan, Oregon, Rhode Island, Vermont, and Washington. By July 2009, this number will increase to 39.
- Alaska's minimum wage was last raised in January 2003. Since then, the prices of fuel, medical care, and other goods in Alaska have skyrocketed.
- If Alaska's minimum wage were to keep pace with inflation, it would be $8.78/hour in 2010, when Senate Bill 1 would go into effect. Projected 2010 minimum wages are $8. 88 in Washington and $8.72 in Oregon. California is already at $8.00/hour.
- At least nine states adjust their minimum wage annually for inflation, including Arizona, Colorado, Florida, Missouri, Montana, Nevada, and Oregon. This compromise proposal does not call for annual inflation-proofing.
- On July 24, 2009, the federal minimum wage will increase to $7.25, surpassing Alaska's. This proposal would increase Alaska's minimum wage to $7.25 on July 24 and to 50cents above the federal level on January 1, 2010.
- More than 8,000 Alaskans earn less than $7.75/hour and would benefit from this legislation.
- Workers that earn the current Alaska minimum wage make roughly $14,872/year, little more than the federal poverty level for Alaska, which is $13,530. Nationally, 25% of those who earn slightly less than $8/hour are parents. Many are the sole wage earners in their household.
- Economic studies have not found negative employment impacts (e.g., job loss) due to modest increases in the minimum wage, perhaps because higher wages lead to greater productivity, lower recruiting and training costs, decreased absenteeism, and increased worker morale.

These estimates are based on information collected in cooperation with the U.S. Bureau of Labor Statistics (BLS), but have not been reviewed nor validated by BLS. The Research and Analysis Section is responsible for the creation of these estimates.

SB1

My name is Silvia Villamides director of Anchorage CHARR representing over 250 small businesses in our community.

Anchorage CHARR supports a minimum wage increase for all non-tip employees. We would like to see an amendment added that reflects the inclusion of federally taxed tips as wages. Anchorage CHARR cannot support the bill as written. I wish to comment on an aspect of the minimum wage debate that is not included in this bill and it is called tip credit.

So what is tip credit? With tip credit, employers can count a certain part of their employees' tips toward meeting their employees' minimum wage. Tip credit has long been on the books. There are 43 States who have tip credit. Labor laws recognize it, tax laws recognize it. It is an issue that impacts small businesses and their workers--mostly in the hospitality industry, such as restaurant workers.

Proposal:

1. Employees would be able to keep the current minimum wage of $7.25 which would be in line with the new increased Federal Wage effective July 24.
2. In the event of future minimum wage increases, employers will be able to receive a credit if their tipped employees make at least $7.25 per hour in tips and for employees who do not meet the minimum tip amount would receive the established minimum wage.
3. Employees who make the $7.25 tipped amount would maintain the $7.25 per hour in wages for a wage base of a minimum of $14.50.

An employee who makes $7.25 an hour in wages and at a minimum of $7.25 an hour in tips working full time will make over $30,000 a year.

If this legislation passes as written, hospitality establishments would have to make tough decisions, such as raising prices, cutting the workforce, reducing employee hours or, worse, shutting down their businesses. A small business with 20 employees will be affected with at least $25,000 in labor cost.

I wish to make it clear that by adding tip credit to this law, it will not result in a lowering of the new Federal minimum wage.

As minimum wage keeps increasing, let's also ensure that our businesses can operate on a more level playing field with the rest of the 43 States that have the tip credit. Without the tip credit, the hospitality businesses and workers will continue to suffer.

It is my hope that the minimum wage proposal will also allow for tip credit, which is critical to the future of many small businesses and workers, and in the end, about fairness and, most importantly, about keeping jobs in these though times.

2009 Poverty Guidelines for Alaska	
Persons in family	**Poverty guideline**
1	$13,530
2	18,210
3	22,890
4	27,570
5	32,250
6	36,930
7	41,610
8	46,290
For families with more than 8 persons, add $4,680 for each additional person.	

The current Alaska minimum wage yields an annual income of $14,872. This is barely above the federal poverty level for a single person and is under the poverty level for a single parent with one child.

Based on the Alaska Permanent Fund Corporation's forecasted inflation rate of 3.85%.

LEGISLATIVE RESEARCH REPORT

JANUARY 30, 2009 REPORT NUMBER 09.113

ALASKA'S MINIMUM WAGE ADJUSTED FOR INFLATION

PREPARED FOR SENATOR BILL WIELECHOWSKI

BY ROGER WITHINGTON, LEGISLATIVE ANALYST

INFLATION-PROOFING THE MINIMUM WAGE 1

Figure 1: The Inflation Rate and the Inflation Adjusted Minimum Wage, 2004 through 2009, and Projected for 2010 3

HISTORY OF THE MINIMUM WAGE 4

Table 1: The Minimum Wage in Alaska and the Federal Minimum Wage 5

You asked for information regarding Alaska's minimum wage. Specifically, you wished to know what the minimum wage would be today if the minimum wage inflation-proofing provisions of HB 56, passed in 2002, had not been repealed in 2003. You also asked us to project what the minimum wage would be in 2010. Based on our calculations, had the minimum wage been adjusted for inflation each year since October 2003, the current minimum wage in Alaska would be $8.46 per hour and the projected minimum wage for 2010 would be $8.78 per hour. *

INFLATION-PROOFING THE MINIMUM WAGE

As you may know, an inflation-proofing provision was added to the Alaska minimum wage law through the enactment of HB 56 in 2002, which also raised the minimum wage from $5.65 (which was 50 cents above the federal minimum wage) to $7.15 per hour. The bill, which took effect on January 1, 2003, also instructed the Department of Labor and Workforce Development (DOLWD) to calculate the first inflation-adjusted minimum wage rate by October 1, 2003, and each year thereafter. Because HB 199, which removed the inflation-adjustment provision, passed prior to October 1, 2003, the DOLWD was never required to calculate inflation-related minimum wage increases.

Juneau, AK 99801

The annual rate of inflation for each calendar year is not available until January of the following year. Since the inflation-proofing provisions of HB 56 required the minimum wage be adjusted by October 1st of each year, we adjusted the minimum wage using the previous two semi-annual Anchorage Consumer Price Index (CPI) figures.[1] Based on our calculations, if the minimum wage had been adjusted for inflation each year since October 2003, the current minimum wage would be $8.46 per hour.

You also asked us to project the minimum wage, using a forecasted inflation rate, for 2010. Using the projected rate of inflation used by the Alaska Permanent Fund Corporation (APFC) for 2009 of 3.85 percent, the inflation-adjusted minimum wage for 2010 would be approximately $8.78 per hour.[2] Please use caution when considering this figure. As you know, we are in a period of significant economic uncertainty, and as such, the AFPC's projected rate of inflation for 2009 is unlikely to reflect actual events.

In Figure 1 we provide the inflation rate and the inflation adjusted minimum wage for each year since 2003, as well as the projected inflation rate for 2010.

---

[1] The U.S. Department of Labor, Bureau of Labor Statistics (BLS) only calculates the consumer price index for Anchorage.

[2] According to Laura Achee, Director of Communications for the Alaska Permanent Fund Corporation (APFC), the methodology used by the APFC to calculate the rate of Inflation can be found in AS 37.13.145(c). Ms. Achee can be contacted at 907-796-1522. We obtained the projected inflation rate from *http://www.apfc.org/_amiReportsArchive/2008_12_PROJ.pdf.*

Figure 1: The Inflation Rate and the Inflation-Adjusted Minimum Wage, 2004 through 2009, and Projected for 2010

	2004	2005	2006	2007	2008	2009	2010
Adjusted Minimum Wage	$7.30	$7.51	$7.70	$8.00	$8.15	$8.46	$8.78
Inflation Rate	2.11%	2.94%	2.40%	3.97%	1.85%	3.78%	3.85%

Notes: The 2003 minimum wage was $7.15. We used this figure to base all subsequent adjustments.
HB 56 required the Department of Labor and Workforce Development (DOLWD) to calculate an inflation adjusted minimum wage by October 1st of each year. This adjusted minimum wage would go into effect January 1st of the following calendar year. Because HB 199, which removed the inflation-adjustment provision, passed prior to October 1, 2003, the DOLWD did not calculate inflation-related minimum wage increases.
The Inflation rate is based on the Anchorage Consumer Price Index (CPI), which is the rate used to adjust the minimum wage. Since the annualized CPI rate for each year is not available until January of the following year, and because the minimum wage was to be adjusted by October 1st of each year, we used the CPI for the first half of one year and the second half of the previous year, divided by two to get the average, and then calculated the percentage difference from the year before. This is the rate we applied to the minimum wage in order to make the adjustment for inflation.
The figures for 2010 are projected.

Projected rate of inflation is from the Alaska Permanent Fund Corporation, *http://www.apfc.org/_amiReportsArchive/2008_12_PROJ.pdf*.

HISTORY OF THE MINIMUM WAGE

As you know, the federal Fair Labor Standards Act (FLSA), first passed by Congress in 1938, addresses many employment issues including overtime and the minimum wage. Congress set the first federal minimum wage at $0.25 per hour.[3] States could also set their own minimum wages, and in 1959 the first Alaska legislature established the Alaska minimum wage at $1.50 per hour—at that time, the federal minimum wage was $1.00 per hour.[4] As with the FLSA, Alaska law included several exemptions to coverage by the minimum wage requirement, including farmers, fishermen, domestic help, and public employees.[5]

In 1962, the Alaska legislature changed the statute so that the minimum wage in Alaska would be at least $0.50 per hour greater than the federal minimum wage, which at that time was $1.25 per hour.[6] In 1974, the Alaska legislature again addressed the issue of the minimum wage, and amended the statute to establish the minimum wage at "not less than 50 cents an hour greater than the prevailing Federal Minimum Wage Law or $2.60 an hour, whichever is greater."[7] In 1990, the legislature included a requirement that school bus drivers be paid a rate of not less than two times the minimum wage.[8] Table 1 shows the amount of the minimum wage in Alaska from 1959 to the present.

[3] "Federal Minimum Wage Rates under the Fair Labor Standards Act," Wage and Hour Division, Employment Standards Administration, U. S. Department of Labor, *http://www.dol.gov/esa/minwage/chart.htm.*

[4] Section 5, Chapter 171, SLA 1959.

[5] Section 2, Chapter 171, SLA 1959. According to the U. S. Department of Labor, "The 1938 Act was applicable generally to employees engaged in interstate commerce or in the production of goods for interstate commerce. The 1961 Amendments extended coverage primarily to employees in large retail and service enterprises as well as to local transit, construction, and gasoline service station employees. The 1966 Amendments extended coverage to State and local government employees of hospitals, nursing homes, and schools, and to laundries, dry cleaners, and large hotels, motels, restaurants, and farms. Subsequent amendments extended coverage to the remaining Federal, State, and local government employees who were not protected in 1966, to certain workers in retail and service trades previously exempted, and to certain domestic workers in private household employment."

[6] Section 4, Chapter 2, SLA 1962.

[7] Section 1, Chapter 41, SLA 1974.

[8] Sections 3 & 4, Chapter 12, SLA 1990.

Table 1: The Minimum Wage in Alaska and the Federal Minimum Wage		
Year	**Alaska**	**Federal**
1959-1962	$1.50	$1.00
1963-1967	$1.75	$1.25
1968-1974	$2.10	$1.60
1975-1978	$2.80	$2.30
1979	$3.40	$2.90
1980	$3.60	$3.10
1981-1990	$3.85	$3.35
1991	$4.30	$3.80
1992-1996	$4.75	$4.25
1997	$5.25	$4.75
1998-2002	$5.65	$5.15
2003-2006	$7.15	$5.15
2007	$7.15	$5.85
2008	$7.15	$6.55

Notes: Minimum wages are per hour.
The federal minimum wage provisions for covered, non-exempt employees are contained in the Fair Labor Standards Act (FLSA). The Fair Minimum Wage Act of 2007 included phased increases to the federal minimum wage. For work performed on or after July 24, 2009, the federal minimum wage will be $7.25 per hour. *http://www.dol.gov/dol/topic/wages/minimumwage.htm.*

Note: This exhibit shows how much more or less it would cost for a family of four to live in different cities while maintaining the same standard of living.
Source: Runzheimer International, Runzheimer's Living Cost Index, *February 2008*

show that it generally costs a little extra to live in Alaska – and in some cases more than just a little.

ACCRA index says Alaska cities cost more

Every quarter the ACCRA[5] Cost of Living Index provides comparisons of living costs for about 300 urban areas in the United States. ACCRA's focus is on professional and managerial households with incomes in the top 20 percent for the area and is often used by companies trying to equalize pay for their employees in different locations.

[5] The ACCRA Cost of Living Index was originally produced by the American Chamber of Commerce Researchers Association. It's now produced by The Council for Community and Economic Research, but the index's name hasn't been changed.

The data used in the ACCRA index are collected in each city by organizations that volunteer for the task. As a result, there is more room for error than in some surveys and ACCRA encourages users not to use the percentage differences produced by the index as exact measures.

The most recent ACCRA data include three Alaska cities – Anchorage, Fairbanks and Kodiak – and indicate that all three are at least 23 percent more expensive than the average city in the index. (See Exhibit 7.) Until recently, Juneau was regularly included in the index and was generally the most expensive of the Alaska cities studied.

The three Alaska cities are more expensive than average in every category – groceries, housing,

2622

critics and those trying to understand what's behind changes to the overall CPI.

What's more, there's an especially wide range of dollar amounts that consumers spend on housing, making it more likely that a person's individual expenses will differ from the calculated average.

Some people have paid off their home loans and pay only property taxes and maintenance costs, neither of which are likely to change significantly with the vagaries of housing markets. Others spend very little on housing because they live with parents or other relatives. On the other end of the spectrum, new homeowners can pay large monthly mortgage payments and see increases far in excess of those represented by the CPI.

Where is inflation headed?

Whether inflation will stay low is impossible to predict with any certainty, but it appears unlikely. Most forecasts for U.S. inflation are generally higher, due to the current trends in both energy and food costs, and in three out of the first four months of 2008[3] the national CPI has been up at least 4 percent over the year.

The higher national inflation has been driven largely by rising energy and food prices, increases Anchorage is unlikely to escape. Consultants for the Alaska Permanent Fund Corporation, which uses the CPI to make sure the principal of the Permanent Fund keeps up with inflation, have forecasted a 2.8 percent U.S. inflation rate for the next five years.[4] Anchorage data for the first half of 2008 will be released in late July.

[3] The national CPI is produced every month. Monthly CPI data are also available for the nation's four Census regions (Northeast, Midwest, South and West) and for three major metropolitan areas. Data for 11 metropolitan areas are published every other month. Anchorage is in a group of 13 smaller metropolitan areas for which data are published every six months.

[4] The forecast comes from the investment consulting firm, Callan Associates.

Alaska Cities Generally More Expensive 7

Note: Index numbers represent a comparison to the average for all cities for which ACCRA volunteers collected data.

[1] The ACCRA Cost of Living Index was originally produced by the American Chamber of Commerce Researchers Association. It's now produced by The Council for Community and Economic Research. The focus of the index, which has been published since 1968, is on professional and managerial households with incomes in the top 20 percent for the area.

Source: ACCRA Cost of Living Index

The CPI can't be used for geographic comparisons

The CPI gives the most authoritative answer to how much prices are rising over time in a particular location, but it is not designed to say whether one location is more expensive than another. Index numbers for the U.S. CPI are higher than they are for Anchorage, but that only means that prices have increased more nationally than they have for Anchorage since the 1982-1984 base period (when the index was set at 100).

Studies and surveys designed to compare the cost of living in different locations continue to

February 19, 2009

Senator Bill Wielechowski
Alaska State Capitol
Juneau, Alaska 99801

Re: SB 1 Raising Alaska's Minimum Wage

Dear Representative Wielechowski,

The Advisory Board on Alcoholism and Drug Abuse and Alaska Mental Health Board appreciate your recognition of the need for an increase to Alaska's minimum wage. While the proposed increase to minimum wage does not alleviate all the problems faced by Alaska's working poor, it would help low-wage workers better provide for their families. Many of these low-wage workers are people experiencing mental illness or in recovery from mental illness or addiction, so we support moving minimum wage closer to a meaningful wage.

Despite arguments that raising minimum wage endangers small businesses and the jobs they provide — or that minimum wage is only paid to entry-level positions from which workers quickly graduate to a higher wage — research by the Economic Policy Institute shows "no significant job loss associated with the 1996-1997 [federal] minimum wage increase." Instead, low-wage labor markets performed better after the minimum wage was increased.

Of low-wage workers, women and minority workers benefit most from an increase in minimum wage. Among low-income families with children, low-wage workers contribute over half of the family income — which means that raising the minimum wage will benefit the more than 19,000 Alaskan children living in poverty.

It is not just teenagers working for spending money who hold minimum wage jobs in Alaska. Parents, seniors trying to supplement their limited income, individuals experiencing disabilities, and students putting themselves through school are all represented in the low-wage labor market. Their work is a valuable part of our economy, and should be recognized as such. Thank you for your work, and please let us know if the Alaska Mental Health Board and Advisory Board on Alcoholism and Drug Abuse can assist in the effort to pass this important legislation.

Sincerely,

Debi Keith, Chair
AMHB

National Employment Law Project

Delivering Economic Opportunity

Protect the Economic Security of Thousands of Alaska's Tipped Workers

February 13, 2009

Thousands of hard-working waiters and waitresses are counting on Alaska lawmakers to protect their economic security in the current minimum wage debate. Tipped workers like the waitress at your local diner are already struggling to get by, and a disproportionate number live in poverty. And this hard-working group of workers (overwhelmingly women) is currently seeing its pay drop as economically squeezed customers leave smaller tips. Moreover, economic studies show that, contrary to the restaurant industry's claims, guaranteeing a strong minimum wage for tipped workers is simply not a major factor, one way or the other, in the economic health of the industries that employ these workers.

1. **More than 5,900 working Alaskans already struggle to get by on the minimum wage and tips.**

   - Alaska has thousands of tipped workers – including at least 4,200 waiters and waitresses and 1,700 bartenders alone, according to the U.S. Bureau of Labor Statistics (BLS).[1] These workers represent nearly 2% of the state's workforce – more than the number of the state's elementary and middle school teachers combined.[2] And the total number of Alaskans who rely on tips to get by is likely higher, since this number does not include tipped workers in other occupations.

   - But the BLS employer survey reports that as of 2007 Alaska's waiters and waitresses earned just $9.67 an hour even after tips – about $2.50 more than the minimum wage at the time, but less than half of the average hourly wage in the state ($22.00).[3]

   - Over the course of a year, the average waiter or waitress earns $20,114 – just below the federal poverty line for a family of three in Alaska.[4] In reality, even a single adult Alaskan can have trouble making ends meet on less than $10 per hour, and more realistic calculations find that a one-parent, one-child family needs to earn closer to $38,000 annually (about $18.28 per hour) to get by in Anchorage – and closer to $44,000 in rural Alaska.[5]

2. **Tipped workers need a strong minimum wage because they can't count on tips.**

   - Tips are notoriously erratic – varying based on broader economic trends, and from season-to-season or even shift-to-shift. This is especially true now, as national reports show that economically struggling customers are leaving smaller tips.

   - Workers who rely on tips are open to sudden pay drops that prevent them from paying their bills and caring for their families.

   - States that, unlike Alaska, allow employers to pay tipped workers less than the minimum wage under complicated "tip credit" systems have found that they are vulnerable to abuse that results in many tipped workers being paid very low wages and not receiving all of their tips.

   - Rejecting this approach, Alaska has followed the approach of other western states including California, Minnesota, Montana, Nevada, Oregon, and Washington by requiring employers to pay tipped workers the full minimum wage in order to ensure workers like the waitress at the local diner receive a dependable base income that cushions them against economic hardship.

3. **Across the country, tipped workers are overwhelmingly working women, and a disproportionate share live in poverty.**

- NELP's analysis of the Current Population Survey shows that 62% of tipped workers overall and 72% of waiters and waitresses are women. More than two-thirds of tipped workers are adults 21 and older, and 86% of waiters and waitresses are over 19.

- Tipped workers like waiters and waitresses face triple the poverty rate of the workforce as a whole, with one in seven living in poverty (14.9%).

4. **Studies of states and cities that have high tipped worker minimum wages consistently show that the tipped worker minimum wage – like the minimum wage in general – is simply not a major factor, one way or the other, in the economic health of the industries that employ these workers.**

- For example, a 2006 study the Fiscal Policy Institute found that the 10 states that had raised their minimum wages (and tipped worker minimum wages) between 1998 and 2003 had *faster* job growth in their small businesses than the 40 other states.[6]

- In a 2006 study, Dartmouth economist Paul Wolfson found no evidence of job loss in the restaurant industries of 17 states and the District of Columbia that had raised their minimum wages and tipped worker minimum wages (the latter in 16 of those 18 jurisdictions).[7]

- A University of California study of San Francisco's restaurant industry found no restaurant closures, job loss, or substantial price increases after the city raised the minimum wage for all workers – including tipped workers – by $1.75 an hour in 2004.[8]

- Even the National Restaurant Association's own analysis of industry trends projects that Alaska will be one of the top five states in terms of restaurant job growth over the next decade —joining Nevada, another state that requires tipped workers be paid the full minimum wage ($6.85).[9]

AKPIRG

April 15, 2009

Alaska State Legislature
House Finance Committee
State Capitol
Juneau, Alaska 99801

To House Finance Committee Members:

Please accept this letter as written support for Senate Bill 1 by the Alaska Public Interest Research Group (AKPIRG). We believe that maintaining a wage for workers in Alaska above the federal standard is essential for families struggling to make ends meet.

For more than 35 years, AKPIRG has provided research and advocacy on behalf of thousands of members across the state and the general public. We are non-partisan, non-profit 501(c) 3 organization dedicating to serving the public interest.

Alaskans deal with some of the highest living costs in the nation, yet without making substantial changes to our minimum wage laws, working families will be tied to the federal minimum standard used in states with much lower costs of living. Around the country states have moved forward with their own standards for a minimum wage, including some of Alaska's closest neighbors in Washington and Oregon, whose minimum wages are $8.55 and $8.40 respectively.

Economic studies show that higher wages lead to greater productivity, lower recruiting and training costs, decreased absenteeism, and increased worker morale.

In recent years all Alaskans have seen prices of essential items like food, gasoline and energy skyrocket with many receiving no increase in their wages. Alaska is overdue for a new standard that will serve its lowest wage workers around the state.

AKPIRG supports SB 1, Raising the Minimum Wage, and urges committee members to support it.

Sincerely,

Gabe

Gabe Aceves
Executive Director
AKPIRG

Letter in Support of Increasing Minimum Wage

Name: FRANCENE LILLEY
Address:
4314 San Roberto Ave. #6
An/AK, 99508
Phone Number: 929-5296

During the 2009 State Legislature, Senate Bill 1 is sponsored by Senators Bill WIELECHOWSKI, Johnny ELLIS, Joe THOMAS, and Bettye DAVIS. This very important Bill could increase Alaska's minimum hourly wage from it's current $7.15 to a potential $8.75 per hour. Once increased, the minimum wage will be adjusted annually (every year) according to a determined rate of inflation. I support this piece of legislation and would like the Senate sponsors, and other like-minded Senators, to vote for this increase. Here are my reasons why:

I'm working hard and am barely making it at $10.00 p/hr I can't imagine how you do it on minimum wage.

Thank you for taking my thoughts into consideration. ~~I am a registered voter~~. If you have any questions, please call me at the above number.

Letter in Support of Increasing Minimum Wage

Name: Kokayi Nosakhere
Address:
617 W. 18th
Anchorage, Alaska, 99503
Phone Number: 884-4710

During the 2009 State Legislature, Senate Bill 1 is sponsored by Senators Bill WIELECHOWSKI, Johnny ELLIS, Joe THOMAS, and Bettye DAVIS. This very important Bill could increase Alaska's minimum hourly wage from it's current $7.15 to a potential $8.75 per hour. Once increased, the minimum wage will be adjusted annually (every year) according to a determined rate of inflation. I support this piece of legislation and would like the Senate sponsors, and other like-minded Senators, to vote for this increase. Here are my reasons why:

As someone committed to confronting poverty, however it manifests, I desire to see a living wage adopted in Alaska. This increase to $8.75 is a step in the right direction. In the Fairview community, 1 out of 3 citizens exist at the federal definition of poverty. Access to resources is the number one contributor to personal success. Please increase the minimum wage!

Thank you for taking my thoughts into consideration. I am a registered voter. If you have any questions, please call me at the above number.

Letter in Support of Increasing Minimum Wage

Name: Rachel Hollander
Address:
4081 E. 20th Ave. #37
Anchorage, AK [redacted], 99508
Phone Number: 907.279.0305

During the 2009 State Legislature, Senate Bill 1 is sponsored by Senators Bill WIELECHOWSKI, Johnny ELLIS, Joe THOMAS, and Bettye DAVIS. This very important Bill could increase Alaska's minimum hourly wage from it's current $7.15 to a potential $8.75 per hour. Once increased, the minimum wage will be adjusted annually (every year) according to a determined rate of inflation. I support this piece of legislation and would like the Senate sponsors, and other like-minded Senators, to vote for this increase. Here are my reasons why:

People work hard and receive little recognition let alone compensation for their labor. It is not acceptable to have a population of "working poor" in Alaska. We are too valuable a community to be treated as less than. It costs more to live here; the pay of our workers should reflect our worth as a state.

Thank you for taking my thoughts into consideration. I am a registered voter. If you have any questions, please call me at the above number.

Letter in Support of Increasing Minimum Wage

Name: Diana Mansal
Address:
911 Medfra St. Unit A
Anch., AK, 99504
Phone Number: (907)310-4119

During the 2009 State Legislature, Senate Bill 1 is sponsored by Senators Bill WIELECHOWSKI, Johnny ELLIS, Joe THOMAS, and Bettye DAVIS. This very important Bill could increase Alaska's minimum hourly wage from it's current $7.15 to a potential $8.75 per hour. Once increased, the minimum wage will be adjusted annually (every year) according to a determined rate of inflation. I support this piece of legislation and would like the Senate sponsors, and other like-minded Senators, to vote for this increase. Here are my reasons why:

There is a lot of things going on with the economy these days and we all have to suffer for it. Prices are being raised and 7.15 is not going to cut it, also if this raises maybe that'll decrease the population of teenagers shoplifting.

Thank you for taking my thoughts into consideration. I am a registered voter. If you have any questions, please call me at the above number.

Letter in Support of Increasing Minimum Wage

Name: Stacy Haubrich
Address:
4012 San Roberto Ave #A
Anchorage AK, 99508
Phone Number: 310-1854

During the 2009 State Legislature, Senate Bill 1 is sponsored by Senators Bill WIELECHOWSKI, Johnny ELLIS, Joe THOMAS, and Bettye DAVIS. This very important Bill could increase Alaska's minimum hourly wage from it's current $7.15 to a potential $8.75 per hour. Once increased, the minimum wage will be adjusted annually (every year) according to a determined rate of inflation. I support this piece of legislation and would like the Senate sponsors, and other like-minded Senators, to vote for this increase. Here are my reasons why:

The cost of living in Alaska is much higher than anywhere else in the States food and transportation being the hardest to sustaine. With this State having one of the highest rates of obesity we need to be able to purchase healthy foods not just cheap junk.

Thank you for taking my thoughts into consideration. I am a registered voter. If you have any questions, please call me at the above number.

Letter in Support of Increasing Minimum Wage

Name: Eric Cover

Address: PO Box 242492

Anchorage AK, 99524

Phone Number: (907) 952-1021

During the 2009 State Legislature, Senate Bill 1 is sponsored by Senators Bill WIELECHOWSKI, Johnny ELLIS, Joe THOMAS, and Bettye DAVIS. This very important Bill could increase Alaska's minimum hourly wage from it's current $7.15 to a potential $8.75 per hour. Once increased, the minimum wage will be adjusted annually (every year) according to a determined rate of inflation. I support this piece of legislation and would like the Senate sponsors, and other like-minded Senators, to vote for this increase. Here are my reasons why:

Because it makes Sense! It will allow and encourage people to live legally and give them a higher sense of worth. Alaska's cost of living is high and necessary all the time. People want to pay their own way and feel like they are doing their part.

Thank you for taking my thoughts into consideration. I am a registered voter. If you have any questions, please call me at the above number.

Letter in Support of Increasing Minimum Wage

Name: GINA T

Address: 8138 E 3rd

, 99564

Phone Number: (907) 764-2319

During the 2009 State Legislature, Senate Bill 1 is sponsored by Senators Bill WIELECHOWSKI, Johnny ELLIS, Joe THOMAS, and Bettye DAVIS. This very important Bill could increase Alaska's minimum hourly wage from it's current $7.15 to a potential $8.75 per hour. Once increased, the minimum wage will be adjusted annually (every year) according to a determined rate of inflation. I support this piece of legislation and would like the Senate sponsors, and other like-minded Senators, to vote for this increase. Here are my reasons why:

Because people aren't making enough money to put up with at least a month pay. Also because if only one person is working, it's not going to be enough for a month pay on their own.

Thank you for taking my thoughts into consideration. I am a registered voter. If you have any questions, please call me at the above number.

Letter in Support of Increasing Minimum Wage

Name: Mariah Ramsdell
Address: 1851 Bellevue Loop
Anchorage, AK, 99515
Phone Number: 301-3713

During the 2009 State Legislature, Senate Bill 1 is sponsored by Senators Bill WIELECHOWSKI, Johnny ELLIS, Joe THOMAS, and Bettye DAVIS. This very important Bill could increase Alaska's minimum hourly wage from it's current $7.15 to a potential $8.75 per hour. Once increased, the minimum wage will be adjusted annually (every year) according to a determined rate of inflation. I support this piece of legislation and would like the Senate sponsors, and other like-minded Senators, to vote for this increase. Here are my reasons why:

I believe that every hard-working individual deserves to make the minimum amount of money necessary to pay their bills and support their families. Our current minimum wage does not allow our community members to do this. Please help!!!

Thank you for taking my thoughts into consideration. I am a registered voter. If you have any questions, please call me at the above number.

Letter in Support of Increasing Minimum Wage

Name: Kyle Yan
Address:
3031 Horizon St.
Anchorage, AK, 99517
Phone Number: (907) 240-0944

During the 2009 State Legislature, Senate Bill 1 is sponsored by Senators Bill WIELECHOWSKI, Johnny ELLIS, Joe THOMAS, and Bettye DAVIS. This very important Bill could increase Alaska's minimum hourly wage from it's current $7.15 to a potential $8.75 per hour. Once increased, the minimum wage will be adjusted annually (every year) according to a determined rate of inflation. I support this piece of legislation and would like the Senate sponsors, and other like-minded Senators, to vote for this increase. Here are my reasons why:

I have seen many college students working minimum-wage and struggling to pay off all their expenses and educational costs, not to mention food or housing. An increase to $8.75 would greatly help young adults who are struggling financially and balancing school with work. Since they will provide the future workforce in Alaska, I strongly support an increase in minimum wage.

Thank you for taking my thoughts into consideration. I am a registered voter. If you have any questions, please call me at the above number.

Letter in Support of Increasing Minimum Wage

Name: John Scott
Address:
6230 Dunbar Ln
Anchorage, Ak, 99504
Phone Number: (907) 947-8614

During the 2009 State Legislature, Senate Bill 1 is sponsored by Senators Bill WIELECHOWSKI, Johnny ELLIS, Joe THOMAS, and Bettye DAVIS. This very important Bill could increase Alaska's minimum hourly wage from it's current $7.15 to a potential $8.75 per hour. Once increased, the minimum wage will be adjusted annually (every year) according to a determined rate of inflation. I support this piece of legislation and would like the Senate sponsors, and other like-minded Senators, to vote for this increase. Here are my reasons why:

A lot of employees do hard work for minimum wage, and, as a student, I have a hard time getting high paying jobs. An increase in minimum wage would help me support myself.

Thank you for taking my thoughts into consideration. I am a registered voter. If you have any questions, please call me at the above number.

Letter in Support of Increasing Minimum Wage

Name: LeXANIER Kitchen
Address:
P.O Box 188 Kodiak
AK 99615, 995
Phone Number: 907-741-1251

During the 2009 State Legislature, Senate Bill 1 is sponsored by Senators Bill WIELECHOWSKI, Johnny ELLIS, Joe THOMAS, and Bettye DAVIS. This very important Bill could increase Alaska's minimum hourly wage from it's current $7.15 to a potential $8.75 per hour. Once increased, the minimum wage will be adjusted annually (every year) according to a determined rate of inflation. I support this piece of legislation and would like the Senate sponsors, and other like-minded Senators, to vote for this increase. Here are my reasons why:

Things are becoming more expensive we need need make more/ just to get by 7.15 doesn't get you by. if it was 8.75 you'd have less poor and unwealthy families

Thank you for taking my thoughts into consideration. ~~I am a registered voter~~. If you have any questions, please call me at the above number.

Letter in Support of Increasing Minimum Wage

Name: Jeannie A. Hall
Address: 4126 San Roberto #5
Anch, AK, 99508
Phone Number: 770-5569

During the 2009 State Legislature, Senate Bill 1 is sponsored by Senators Bill WIELECHOWSKI, Johnny ELLIS, Joe THOMAS, and Bettye DAVIS. This very important Bill could increase Alaska's minimum hourly wage from it's current $7.15 to a potential $8.75 per hour. Once increased, the minimum wage will be adjusted annually (every year) according to a determined rate of inflation. I support this piece of legislation and would like the Senate sponsors, and other like-minded Senators, to vote for this increase. Here are my reasons why:

finding a real job is hard now in days, and supporting cause living in apartment ~~cause~~ cost alot and I hope people like me or any other people who helps alot so my vote is Yes.

Thank you for taking my thoughts into consideration. I am a registered voter. If you have any questions, please call me at the above number.

Letter in Support of Increasing Minimum Wage

Name: Eric Cowen
Address: PO Box 242492
Anchorage AK, 99524
Phone Number: (907) 952-1021

During the 2009 State Legislature, Senate Bill 1 is sponsored by Senators Bill WIELECHOWSKI, Johnny ELLIS, Joe THOMAS, and Bettye DAVIS. This very important Bill could increase Alaska's minimum hourly wage from it's current $7.15 to a potential $8.75 per hour. Once increased, the minimum wage will be adjusted annually (every year) according to a determined rate of inflation. I support this piece of legislation and would like the Senate sponsors, and other like-minded Senators, to vote for this increase. Here are my reasons why:

Because it makes Sense! It will allow and encourage people to live legally and give them a higher sense of worth. Alaska's cost of living is high and necessary all the time. People want to pay their own way and feel like they are doing their part.

Thank you for taking my thoughts into consideration. I am a registered voter. If you have any questions, please call me at the above number.

Letter in Support of Increasing Minimum Wage

Name: Jason Domingo
Address:
8941 Woodstock
Anch, AK 99502, 995
Phone Number: 727-9541

During the 2009 State Legislature, Senate Bill 1 is sponsored by Senators Bill WIELECHOWSKI, Johnny ELLIS, Joe THOMAS, and Bettye DAVIS. This very important Bill could increase Alaska's minimum hourly wage from it's current $7.15 to a potential $8.75 per hour. Once increased, the minimum wage will be adjusted annually (every year) according to a determined rate of inflation. I support this piece of legislation and would like the Senate sponsors, and other like-minded Senators, to vote for this increase. Here are my reasons why:

It's Hard To Survive with 3 children with minimum wage

Thank you for taking my thoughts into consideration. I am a registered voter. If you have any questions, please call me at the above number.

Letter in Support of Increasing Minimum Wage

Name: Roland Sparks
Address: 8050 Pioneer Dr #805
Anchorage AK, 99504
Phone Number: 907 230-4918

During the 2009 State Legislature, Senate Bill 1 is sponsored by Senators Bill WIELECHOWSKI, Johnny ELLIS, Joe THOMAS, and Bettye DAVIS. This very important Bill could increase Alaska's minimum hourly wage from it's current $7.15 to a potential $8.75 per hour. Once increased, the minimum wage will be adjusted annually (every year) according to a determined rate of inflation. I support this piece of legislation and would like the Senate sponsors, and other like-minded Senators, to vote for this increase. Here are my reasons why:

It important the people recieve a livable wage. The current minimum wage isn't sufficent for people to have a home in Alaska. With energy costs skyrocketing people need money to stay warm and buy food.

Thank you for taking my thoughts into consideration. I am a registered voter. If you have any questions, please call me at the above number.

This very important Bill could increase Alaska's minimum hourly wage from it's current $7.15 to a potential $8.75 per hour. Once increased, the minimum wage will be adjusted annually (every year) according to a determined rate of inflation. I support this piece of legislation and would like the Senate sponsors, and other like-minded Senators, to vote for this increase. Here are my reasons why:

It important the people recieve a livable wage. The current minimum wage isn't sufficent for people to have a home in Alaska. With energy costs skyrocketing people need money to stay warm and buy food.

Thank you for taking my thoughts into consideration. I am a registered voter. If you have any questions, please call me at the above number.

Once increased, the minimum wage will be adjusted annually (every year) according to a determined rate of inflation. I support this piece of legislation and would like the Senate sponsors, and other like-minded Senators, to vote for this increase. Here are my reasons why:

The (cost) cost of living is high in the State of Alaska. So the pay needs to be raised.

Thank you for taking my thoughts into consideration. I am a registered voter. If you have any questions, please call me at the above number.

Letter in Support of Increasing Minimum Wage

Name: MARTIN POZOS JR.
Address:
3230 PETERKIN AVE #18

ANCHORAGE AK, 99508

Phone Number: 310-7320

During the 2009 State Legislature, Senate Bill 1 is sponsored by Senators Bill WIELECHOWSKI, Johnny ELLIS, Joe THOMAS, and Bettye DAVIS. This very important Bill could increase Alaska's minimum hourly wage from it's current $7.15 to a potential $8.75 per hour. Once increased, the minimum wage will be adjusted annually (every year) according to a determined rate of inflation. I support this piece of legislation and would like the Senate sponsors, and other like-minded Senators, to vote for this increase. Here are my reasons why:

COST OF LIVING IN ALASKA IS ABOVE THE NATIONAL AVG FOR FAMILIES TO SUPPORT THEMSELVES WIT THAT LOWER MINIMUM WAGE

Thank you for taking my thoughts into consideration. I am a registered voter. If you have any questions, please call me at the above number.

Letter in Support of Increasing Minimum Wage

Name: Kim C. Anderson
Address:
P.O. Box 210913
Anchorage, Ak, 99521
Phone Number: 907-980-1257

During the 2009 State Legislature, Senate Bill 1 is sponsored by Senators Bill WIELECHOWSKI, Johnny ELLIS, Joe THOMAS, and Bettye DAVIS. This very important Bill could increase Alaska's minimum hourly wage from it's current $7.15 to a potential $8.75 per hour. Once increased, the minimum wage will be adjusted annually (every year) according to a determined rate of inflation. I support this piece of legislation and would like the Senate sponsors, and other like-minded Senators, to vote for this increase. Here are my reasons why:

Your average person can not survive on their own with this kinda of income. With the way the economy is today, this is not even enough to cover Rent, transportation, & personal care and any other expenses that occurs.

Thank you for taking my thoughts into consideration. I am a registered voter. If you have any questions, please call me at the above number.

Phone Number: 258-1206

During the 2009 State Legislature, Senate Bill 1 is sponsored by Senators Bill WIELECHOWSKI, Johnny ELLIS, Joe THOMAS, and Bettye DAVIS. This very important Bill could increase Alaska's minimum hourly wage from it's current $7.15 to a potential $8.75 per hour. Once increased, the minimum wage will be adjusted annually (every year) according to a determined rate of inflation. I support this piece of legislation and would like the Senate sponsors, and other like-minded Senators, to vote for this increase. Here are my reasons why:

You just can not make it on this wage with the cost of living being so high.

Thank you for taking my thoughts into consideration. ~~I am a registered voter.~~ If you have any questions, please call me at the above number.

Phone Number: 307-320-7617

During the 2009 State Legislature, Senate Bill 1 is sponsor
WIELECHOWSKI, Johnny ELLIS, Joe THOMAS, and Bettye
important Bill could increase Alaska's minimum hourly wage from
potential $8.75 per hour. Once increased, the minimum wage will
(every year) according to a determined rate of inflation. I support th
and would like the Senate sponsors, and other like-minded Sena
increase. Here are my reasons why:

The cost of Living is high in Ancho
The cost of driving to and from
hardly makes the minimum wage +

Thank you for taking my thoughts into consideration. ~~I am a registe~~
have any questions, please call me at the above number.

Letter in Support of Increasing Minimum Wage

Name: Chris Douglas
Address: 4110 Cope St #3
Anch, AK, 99503
Phone Number: 541-961-7660

During the 2009 State Legislature, Senate Bill 1 is sponsored by Senators Bill WIELECHOWSKI, Johnny ELLIS, Joe THOMAS, and Bettye DAVIS. This very important Bill could increase Alaska's minimum hourly wage from it's current $7.15 to a potential $8.75 per hour. Once increased, the minimum wage will be adjusted annually (every year) according to a determined rate of inflation. I support this piece of legislation and would like the Senate sponsors, and other like-minded Senators, to vote for this increase. Here are my reasons why:

I lived in a retirement community in Oregon and the low min. wage was not well correlated w/ the economy causing lots of low income situations and poor economy, and people did not take care of the area. I do not want that to happen to Alaska

Thank you for taking my thoughts into consideration. I am a registered voter. If you have any questions, please call me at the above number.

During the 2009 State Legislature, Senate Bill 1 is sponsored by Senators Bill WIELECHOWSKI, Johnny ELLIS, Joe THOMAS, and Bettye DAVIS. This very important Bill could increase Alaska's minimum hourly wage from it's current $7.15 to a potential $8.75 per hour. Once increased, the minimum wage will be adjusted annually (every year) according to a determined rate of inflation. I support this piece of legislation and would like the Senate sponsors, and other like-minded Senators, to vote for this increase. Here are my reasons why:

Inflation - High Rents

Letter in Support of Increasing Minimum Wage

Name: Anthony Seaves Adams
Address:
533 price st. #2
Anch, Ak, 99508
Phone Number: (907) 764-1430

During the 2009 State Legislature, Senate Bill 1 is sponsored by Senators Bill WIELECHOWSKI, Johnny ELLIS, Joe THOMAS, and Bettye DAVIS. This very important Bill could increase Alaska's minimum hourly wage from it's current $7.15 to a potential $8.75 per hour. Once increased, the minimum wage will be adjusted annually (every year) according to a determined rate of inflation. I support this piece of legislation and would like the Senate sponsors, and other like-minded Senators, to vote for this increase. Here are my reasons why:

I believe that the minimum wage as it is is well under enough to support and sustain the average americans lifestyle even with it at its minimums. I believe that america and the world is based on the workforce as its backbone and every american should be able to survive on a hard days work. even if unpractical, any step in that direction helps

This very important Bill could increase Alaska's minimum hourly wage from it's current $7.15 to a potential $8.75 per hour. Once increased, the minimum wage will be adjusted annually (every year) according to a determined rate of inflation. I support this piece of legislation and would like the Senate sponsors, and other like-minded Senators, to vote for this increase. Here are my reasons why:

- More pay = teens just starting to work would make them want to work more
- As a student, I find it hard to find well paying jobs. If minimum wage is increased so is campus pay.

Thank you for taking my thoughts into consideration. I am a registered voter. If you have any questions, please call me at the above number.

Letter in Support of Increasing Minimum Wage

Name: John Scott
Address:
6230 Dunbar Ln
Anchorage, Ak, 99504
Phone Number: (907) 947-8614

During the 2009 State Legislature, Senate Bill 1 is sponsored by Senators Bill WIELECHOWSKI, Johnny ELLIS, Joe THOMAS, and Bettye DAVIS. This very important Bill could increase Alaska's minimum hourly wage from it's current $7.15 to a potential $8.75 per hour. Once increased, the minimum wage will be adjusted annually (every year) according to a determined rate of inflation. I support this piece of legislation and would like the Senate sponsors, and other like-minded Senators, to vote for this increase. Here are my reasons why:

A lot of employees do hard work for minimum wage, and, as a student, I have a hard time getting high paying jobs. An increase in minimum wage would help me support myself.

Thank you for taking my thoughts into consideration. I am a registered voter. If you have any questions, please call me at the above number.

Letter in Support of Increasing Minimum Wage

Name: Kyle Yan
Address:
3031 Horizon St.
Anchorage, AK, 99517
Phone Number: (907) 240-0944

During the 2009 State Legislature, Senate Bill 1 is sponsored by Senators Bill WIELECHOWSKI, Johnny ELLIS, Joe THOMAS, and Bettye DAVIS. This very important Bill could increase Alaska's minimum hourly wage from it's current $7.15 to a potential $8.75 per hour. Once increased, the minimum wage will be adjusted annually (every year) according to a determined rate of inflation. I support this piece of legislation and would like the Senate sponsors, and other like-minded Senators, to vote for this increase. Here are my reasons why:

I have seen many college students working minimum-wage and struggling to pay off all their expenses and educational costs, not to mention food or housing. An increase to $8.75 would greatly help young adults who are struggling financially and balancing school with work. Since they will provide the future workforce in Alaska, I strongly support an increase in minimum wage.

Thank you for taking my thoughts into consideration. I am a registered voter. If you have any questions, please call me at the above number.

During the 2009 State Legislature, Senate Bill 1 is sponsored by Senators Bill WIELECHOWSKI, Johnny ELLIS, Joe THOMAS, and Bettye DAVIS. This very important Bill could increase Alaska's minimum hourly wage from it's current $7.15 to a potential $8.75 per hour. Once increased, the minimum wage will be adjusted annually (every year) according to a determined rate of inflation. I support this piece of legislation and would like the Senate sponsors, and other like-minded Senators, to vote for this increase. Here are my reasons why:

Because its so expensive. Cost of living is very high!

Bridge the gap between low income & middle class.

Thank you for taking my thoughts into consideration. I am a registered voter. If you have any questions, please call me at the above number.

IN HFC / APRIL 9, 2009

TIM BENINTENDI
C/O SN. OLSON
465-4989

SPONSOR PRESENTATION - SB 3

CFEC as Information Resource

Senate Bill 3 would provide a benefit to the state's economic development organizations, the ARDORs, by allowing them to obtain public information from the Commercial Fisheries Entry Commission without charge.

The bill would provide only public information; no confidential information would be made available, and no custom research would be authorized.

The information would especially benefit the eight ARDOR's which have commercial fishing as a significant portion of their economies, and would help them anticipate regional economic trends and development opportunities.

AS 37.10.052 says that resource agencies shall charge for services,

and AS 16.43.100 (16) says the CFEC shall establish reasonable user fees for services. Thus, the provisions of SB 3 must be done by statute instead of regulation.

The CFEC supports the bill, and feels the loss of fees would be negligible at less than $10,000 per year.

The bill carries two ZERO fiscal notes.

With that, I'll see if you have any questions.

SB 3 – C.F.E.C. As An Information Source

Version 26-LS0018/A, February 5, 2009
STAFF: Tim Benintendi, 465-4989

SPONSOR STATEMENT and SECTIONAL ANALYSIS

SPONSOR STATEMENT:

SB 3 would allow Alaska Regional Development Organizations (ARDORs) to benefit from commercial fishery and related information generated by the Commercial Fisheries Entry Commission (CFEC), at no cost. No confidential information would be disclosed, per AS 16.05.815.

The intent of the bill is to provide public information to the ARDORs at no cost. Contractors to ARDORs would be able to obtain the information for contract work, if they receive it from the ARDORs themselves, or if they have a letter of request from an ARDOR.

There are eleven ARDORs established under AS 44.33.895. These are non-profit organizations comprised of representatives of the economic, political, and social interests in each region. Their purpose is to encourage and assist with economic development in their specific areas.

Eight ARDORs would especially benefit from this legislation: Southwest Alaska Municipal Conference, Bering Strait Development Council, Lower Kuskokwim Economic Development Council, Northwest Arctic Borough Economic Development Commission, Kenai Peninsula Borough Economic Development District, Mat-Su Resource Conservation & Development, Inc., Prince William Sound Economic Development District, and the Southeast Conference.

For these organizations, commercial fishing activities provide a substantial portion of their regions' economic base. To illustrate, the wholesale value of the 2005 commercial fishery exceeded $3 billion. Earnings of the 27,700 participating fishermen accounted for $1.2 billion. Another 22,500 persons participated in the seafood processing workforce, earning $277 million in wages. For coastal communities, approximately 37% of private-sector workers were employed in fish harvesting and seafood processing activities. CFEC information can be critical for ARDOR understanding of economic trends in their regions, and development opportunities which may emerge.

The CFEC supports Senate Bill 3, and regards the loss of fees under this bill as negligible.

SECTIONAL ANALYSIS:

SECTION 1: Would amend AS 16.43.100(a) by adding to CFEC responsibilities, providing without charge to regional development organizations formed under AS 44.33.895, public information relevant to fisheries, participants in fisheries, permit holders' harvests, and earnings data. No confidential information would be released under Senate Bill 3.

FISCAL NOTE: Zero note from CFEC.

The Honorable Donny Olson
Alaska State Senator
State Capitol, Room 514
Juneau, AK 99801-1182

RE: SB 3 "An Act authorizing an Alaska regional development organization to use the Alaska Commercial Fisheries Entry Commission as an informational resource"

Dear Senator Olson:

We have reviewed SB 3 and support this legislation.

We understand that the intent of SB 3 is to allow Alaska Regional Development Organizations (ARDORS) established under AS 44.33.895 to request public information from the Commercial Fisheries Entry Commission (CFEC) fishery database without charge. As you know, CFEC has a wealth of public information regarding Alaska's commercial fisheries that we regularly make available upon request to any person or entity. However, there may be a fee required depending on the extent of the effort needed to provide the data. Under SB 3 we would provide data to ARDORS just as we would without this bill, however, without charge.

As a clarification, any CFEC public information available from CFEC data sources must comply with AS 16.05.815 "Confidential nature of certain reports and records." (See enclosed) Basically this statute prohibits the release of any individual fisherman's earnings and harvests obtained from fish ticket information unless aggregated to protect confidentiality. That prohibition is not affected by SB 3.

We do not believe SB 3 would be a significant impact on CFEC resources since there are a limited number of ARDORS and not all represent coastal areas.

Thank you for the opportunity to comment on SB 3.

Sincerely,

Frank Homan
Chairman

Senator Donny Olson
Alaska Legislature
Juneau, AK 99811

Re: Senate Bill 3

Dear Senator Olson:

The Southwest Alaska Municipal Conference is an Alaska Regional Development Organization (ARDOR) and also a federally recognized Economic Development District. Our region includes three of the biggest seafood ports (2006) in the nation for total volume landed: Dutch Harbor (#1), Kodiak (#4), Naknek (#12) and includes the world's largest sockeye run – Bristol Bay. This region also includes three of the most valuable seafood ports (2006) in the nation for total landed value: Dutch Harbor (#2), Kodiak (#3), and Naknek (#8). The fisheries of Alaska have just been rated as the ninth largest fishery in the world and account for sixty two percent (62%) of the nation's total seafood catch.

Much of our region's economic vitality and development potential is based on commercial fisheries and their health. We do a lot of research and analysis of fisheries data for the region to assist in our efforts to promote development opportunities in the region. So for SWAMC to have free access to commercial fisheries data from the Commercial Fisheries Entry Commission is vital to our mission and the quality of work.

On behalf of our Board of Directors and staff we fully support your efforts to allow ARDORs free access to this critical economic data that is vital to our economic development efforts.

Sincerely,

Michael Catsi
Executive Director

Economic development and advocacy for Southwest Alaska.

FAXED 1/30/09

Senator Donny Olson
Alaska Legislature
Juneau, Alaska 99811

SENT BY FAX 907-465-4821

Reference Senate Bill No. 3

Dear Senator Olson, Donny

The Kenai Peninsula Economic Development District is an Alaska Regional Development Organization, (ARDOR) and also a federally recognized Economic Development District.

Our region includes the ports in Seward, Homer, Seldovia, Port Graham and other parts of the Cook Inlet.

Part of our responsibilities as an ARDOR is to do research, analysis and planning for our region. A large part of that is to have the free flow of information from other State and Federal agencies of the data that each is responsible to collect.

Your proposed legislation, Senate Bill No. 3, goes a long way to ensure that this data exchange is open and free flowing.

The Kenai Peninsula Economic Development District is in full support of this legislation.

Thank you for taking a leadership role in providing this economic data to the effective ARDORS.

Senator Bettye Davis

SB 13 "An Act relating to eligibility requirements for medical assistance for certain children and pregnant women; and providing for an effective date."

Repercussions of the unmet health needs of Alaska's uninsured children

---

- The number of uninsured children in Alaska is estimated to be about 18,000 or 9% of the population age 18 and under (Urban Institute and Kaiser Commission on Medicaid and the Uninsured).
- Over the last 10 years Alaska has seen a 31% decline in the number of children covered by private health insurance (Robert Wood Johnson Foundation).
- Nationally, more than 80% of uninsured children are from working families (Kaiser Commission on Medicaid and the Uninsured).
- Uninsured children have much higher health risks than do covered children. The receive less preventative care and are diagnosed at more advanced stages of illness (Kaiser, *supra*).
- Uninsured children are more likely to develop throat, eye, and ear infections, serious dental problems, and chronic conditions such as asthma and diabetes. They are more than five times as likely as insured children to have an unmet need for medical care and nine times more likely not to be examined by a regular doctor. They are also four times more likely to use emergency rooms which are much more costly than care in physicians' offices (*Pediatrics* 105, 113; "Care for Children," *New England Journal of Medicine*, 330).
- Almost 1/3 of uninsured children received no medical treatment during a 1-year period between 2002 and 2003 (*Health Affairs* 23, no. 5, September-October 2004).
- Uninsured children are 25% more likely to miss school than insured children (Children's Defense Fund, Minnesota). Continued illness affects school performance and, in the long run, workforce participation (Southern Institute on Children and Families). A National Institute of Medicine study indicates that lack of insurance results in lost national economic productivity of $65-$130 billion annually.

Senator Bettye Davis

SB 13 "An Act relating to eligibility requirements for medical assistance for certain children and pregnant women; and providing for an effective date."

Background of SCHIP/Denali Kid Care

- SCHIP was created in 1997 to reduce the number of uninsured children by providing subsidized insurance to children of those parents who are too poor to afford insurance but make too much to receive Medicaid coverage. About 1/3 of all children in America get health services through Medicaid or the State Children's Health Insurance Program (SCHIP), which is administered in Alaska through the Denali KidCare Program.
- The Denali KidCare Program is 70% funded by the federal government up to the state's allocated funding level. After that, the reimbursement rate declines to slightly over 50%. In fiscal year 2006 the cost of Denali KidCare was $25.9 million, of which $18.2 million was paid by the federal government.
- Denali KidCare provides health insurance for children age 18 and pregnant women who meet income guidelines. There is no cost to eligible children, teens and pregnant women. However, youth who are 18 may be required to contribute a limited amount for some services.
- Roughly 7,600 children were covered by Denali KidCare as of December, 2006.
- The cost per child of Denali KidCare is about $1,700 annually, compared to over $12,000 for an elderly person who qualifies for federal aid.
- By comparison, private health insurance for a family of three, *e.g.*, a pregnant woman with two children, is estimated at $8,000-$17,000 annually. Unlike Denali KidCare, this insurance may require a $1,000 deductible, 20% co-pay, and no vision, dental or hearing benefits.
- Alaska remains one of the lowest eligibility rates in the nation. Forty-one states allow participation by families at or above 200% of the FPL. Seven have rates at or above 300% of the FPL. The US and state governments' rationale for higher eligibility for children's health insurance is that it will save huge sums in transfer costs and improve health in the future through early detection and care.

Why Coverage for Pregnant Women is Important In Alaska

- Alaska has one of the nation's highest documented pregnancy-associated mortality ratios – 58 per 100,000 live births during 1990-1999 (DHSS). National data indicate that women who receive no prenatal care are al increased risk of pregnancy-related death.
- Only 58% of women in Alaska receive adequate prenatal care, compared with 75% nationally.
- Mothers having late or no prenatal care are more likely to have low birth weight or pre-term infants and are at increased risk fro pregnancy-related mortality and complications of childbirth (DHSS).
- The average cost of hospital care for a premature baby was $75,000 in 2001, compared with $1,300 for a healthy, full-term infant. The March of Dimes Prenatal Data Center reports that premature babies cost about $13.1 billion annually.

Senator Bettye Davis

SB 13 "An Act relating to eligibility requirements for medical assistance for certain children and pregnant women; and providing for an effective date."

Sponsor Statement

SB 13 increases and restores to original levels 12 years ago the qualifying income eligibility standard for the Denali KidCare Program to 200% of the Federal Poverty Line (FPL). Alaska as one of the nation's wealthiest states is only one of 5-7 states which funds its SCHIP program below 200% FPL. SB 13 makes health insurance accessible to an estimated 1277 more uninsured children and 225 pregnant women in Alaska. Denali KidCare is an "enhanced" reimbursement program with up to 70% matching funds (Alaska currently receives about 66%) under the federal government's State Children's Health Insurance Program (SCHIP), which was created in 1997. Congress reauthorized the SCHIP program for five years and President Obama just signed into law on February 4, 2009 with expanded coverage for 4 million more children.

Consider the following information from the Kaiser Commission on Medicaid and the Uninsured, January, 2009:

- 44 states, including D.C., cover children in families with incomes at 200% FPL or higher.
- 33 states cover children in families with income between 200% and 250% FPL.
- 19 states including D.C., cover children in families with income at 250% or higher. 10 of these states cover children in families with income at 300% FPL or higher.
- 35 states allow premiums or enrollment fees, and 24 states have co-payments for selected services in SCHIP programs on a sliding scale of FPL.
- 46 states do not require asset tests

Denali KidCare serves an estimated 7900 Alaska children and remains one of the least costly medical assistance programs in the state at about $1,700 per child with full coverage, including dental, which is about 20% of the cost of adult senior coverage.

Early intervention and preventative care under SB 13 will greatly increase Alaska children's health and yield substantial savings to the state and public and private sector hospital emergency rooms which must admit indigent and uninsured patients for non-emergency treatment. It is estimated that

uninsured children with a medical need are five times as likely not to have a regular doctor as insured children and four times more likely to use emergency rooms at a much higher cost.

There are still an estimated 18,000 uninsured children in Alaska, or about 9% of the children age 18 and under. Private health care coverage for children has declined over 30% in the last ten years, and the deepening recession is pulling more children and families into the uninsured ranks. The reauthorized SCHIP program and "Stimulus Package" should help, and Alaska should do its share and take advantage of available federal matching funds by insuring its low income children up to and including 200% FPL under SB 13.

MEMORANDUM January 22, 2009

SUBJECT: Sectional Summary (SB 13; Work Order No. 26-LS0076\A)

TO: Senator Betty Davis
Attn: Tom Obermeyer

FROM: Jean M. Mischel
Legislative Counsel

You have requested a sectional summary of the above-described bill.

As a preliminary matter, note that a sectional summary of a bill should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents. If you would like an interpretation of the bill as it may apply to a particular set of circumstances, please advise.

Section 1. Amends the medical assistance eligibility provisions for persons under 19 years of age and for pregnant women by increasing the household income limit from 175 to 200 percent of the federal poverty line.

Section 2. Increases the household income limit from 175 to 200 percent of the federal poverty line for requiring premiums and cost-sharing contributions from medical assistance recipients who are under 19 years of age.

Section 3. Provides for an immediate effective date.

ANALYSIS: *(Attach a separate page if necessary)*

This legislation increases the income level for covering children and pregnant women under Denali KidCare to 200 percent of the federal poverty guidelines, up from 175%. It restores family income eligibility guidelines to the levels used when the Denali KidCare(DKC) program was originally created.

This fiscal note represents the additional administrative costs needed to support the increased eligibility determination workload resulting from more pregnant women and children applying for medical assistance, using the assumptions from the companion fiscal notes for the Division of Health Care Services and the Division of Behavioral Health.

FISCAL NOTE #5

STATE OF ALASKA

2010 LEGISLATIVE SESSION

BILL NO. SB 13

ANALYSIS CONTINUATION

The eligibility decision includes verifying information and determining whether a pregnant woman or child qualifies for DKC when they apply, acting on changes, and periodically re-examining a household's eligibility.

The cost estimates assume that 218 pregnant women and 1,277 children will enroll in Medicaid if the qualifying income limit is revised to 200% FPG, and that implementation will begin July 1, 2010. Two additional Eligibility Technician I (Range 13) positions will be needed to manage this additional work in FY2011.

Total Administrative Costs for ET I Positions:

Personal Services: Two Eligibility Technician I (Range 13) for 12 months cost of $134.4, including benefits.
Contractual: Annual cost for office space, phones, etc. will be $17.6.
Commodities: Annual cost for the office supplies will be $1.0.

Additional Cost of FY2011:
Equipment/Supply: A one-time cost of $14.4 for desktop computer, software, printer, and work stations will be needed for the new positions.

ANALYSIS: *(Attach a separate page if necessary)*

This legislation increases the income level for covering children and pregnant women under Denali KidCare to 200 percent of the federal poverty guidelines, up from 175%. It restores family income eligibility guidelines to the levels used when the Denali KidCare (DKC) program was originally created.

Between October 2003 and July 2007, the upper income limits for children and pregnant women were frozen at dollar amounts equivalent to 175% of the 2003 federal poverty guideline (FPG). By April 2007, those amounts corresponded to about 150% of the 2007 FPG. Senate Bill 27, implemented in summer 2007, made the upper income standard for children and pregnant women equal to 175% of the federal poverty guideline for Alaska, as published annually in the federal register, and effectively raised the income level from 150% to 175% FPG. However, children and pregnant women with incomes between 176% and 200% of the prevailing FPG did not regain eligibility at that time. (continued on page 2)

Prepared by: William J. Streur, Deputy Commissioner
Phone 269-7827

Date/Time 1/20/10 12:00 AM

Approved by: Alison Elgee, Assistant Commissioner
Date 3/5/2010
DHSS Finance & Management Services

2010 LEGISLATIVE SESSION

ANALYSIS CONTINUATION

Between 2003 when the upper guideline was still 200% FPG, and 2006 when the statutory income amount was approaching 150% FPG, the number of individuals enrolled annually in this income category decreased by 2,553 children and 436 pregnant women. This fiscal analysis assumes that the additional enrollment due to this bill will be equal to about half that number of people (estimated as 218 pregnant women and 1,277 children).

This analysis extends the projected budget impact through 2016. It assumes that implementation will occur in early FY2011, that most people affected by this bill will enroll by the end of that first year, and that enrollment and utilization will resume normal growth thereafter. The formula for federal funds has been updated to reflect the higher regular federal match percentage for 2011 only. The annual growth percentage for costs between 2011 and 2016 (8.6%) and the annual growth percentage for enrollment after 2011 (2%), are from the department's Long Term Forecast of Medicaid Spending (2006 update).

First year costs are based on estimates for the number of new enrollees and the average cost per enrollee for the affected eligibility subtypes in 2008. Medicaid children in the income range addressed by this bill tend to have lower Medicaid costs than those from families with lower incomes, and those lower costs are reflected in the estimates.

Fund source calculations are based on the relative proportion of costs that were reimbursed at IHS, Title XIX, or Title XXI rates for these eligibility groups during 2008 and our best estimates for federal medical assistance percentages (FMAPs) between 2011 and 2016. Children affected by this legislation are included in the State Children's Health Insurance Program (SCHIP) so most of their Medicaid costs are expected to be matched at the enhanced rate for Title XXI services. Fund projections assume federal SCHIP allocations adequate to fully fund the additional children between 2011 and 2016.

Expenditures for the Behavioral Health Medicaid Services component were determined based on the component's share of expenses for the affected eligibility subtypes in 2008. Behavioral Health paid about a quarter of the costs for affected DKC children in 2008. No charges for services for DKC pregnant women were paid by this component in 2008.

Notes:
1: Eligibility levels reflect the highest income eligibility level in the state using federal Medicaid/CHIP funds, without regard to income disregards or deductions. Note that Illinois, Massachusetts, and Wisconsin provide state-financed coverage to children above Medicaid/CHIP levels; eligibility for state-funded coverage is shown in parentheses.
2: Arkansas planned on implementing its expansion on July 1, 2009. The state awaits CMS approval.
3: Due to the August 17th CMS directive, Indiana submitted a CHIP state plan amendment expanding to 250% FPL (gross income); CMS aproved the limited expansion on 5/9/08. Implementation to 250% began on October 1, 2008.
4: Note that the CHIP eligibility level is 250% of the 2008 FPL (or approximately 240% of the 2009 FPL).
5: Due to the August 17th CMS directive, Louisiana submitted a CHIP state plan amendment expanding to 250% FPL (gross income) with a 12-month waiting period; CMS approved the limited expansion on 2/27/08. Implementation to 250% began on May 1, 2008.
6: Ohio planned to implement its expansion on July 1, 2009; however, funding has not yet been secured.
7: Due to the August 17th CMS directive, Oklahoma submitted a waiver amendment expanding CHIP to 250% FPL; the amendment was never approved. Since the directive has been rescinded, the state has submitted a state plan amendment to expand through premium assistance to 300%.

United States Senate

WASHINGTON, DC 20510

February 25, 2009

The Honorable Gary Stevens
Senate President
State Capitol, Room 111
Juneau, AK 99801-1182

The Honorable Lyman Hoffman
Co-Chairman, Senate Finance Committee
State Capitol, Room 518
Juneau, AK 99801-1182

The Honorable Bert Stedman
Co-Chairman, Senate Finance Committee
State Capitol, Room 516
Juneau, AK 99801-1182

Dear Senators Stevens, Hoffman and Stedman:

As the Alaska Senate this week resumes committee work on Denali KidCare, I urge your support of proposals to increase the number of children and pregnant women eligible for health insurance under this valuable program. One of my first acts as U.S. Senator was to vote in favor of the Children's Health Insurance Program Reauthorization Act of 2009. The measure also was supported by Senator Lisa Murkowski and Congressman Don Young. Now that Congress has reauthorized and funded the Children's Health Insurance Program (CHIP) for the next five years, it is time to give more Alaska families the chance to qualify for basic health care.

The federal legislation authorizes states to offer coverage for families earning up to 300 percent of the federal poverty level (FPL), and some already do. It is troubling that Alaska – recognized in the early days of Denali KidCare as a national leader for its outreach and signup efforts – is now at only 175 percent of FPL and one of the strictest states in the nation for eligibility.

At a minimum, I urge you and your colleagues to restore Alaska's eligibility guidelines to 200 percent. As you know, that step would return Alaska to 2003 levels and immediately qualify an estimated 1,277 additional children and 218 more pregnant women for Denali KidCare. I and many other Alaskans would celebrate that improvement. However, merely restoring the program to where it was six years ago is not exactly a huge victory for Alaska's families. We can and should do better. I support efforts to increase eligibility levels beyond 200 percent of FPL, including the possibility of an effective but equitable co-pay provision for families that can afford to buy into the program. I applaud your Senate and House colleagues on both sides of the political aisle who are working to improve Alaska's program.

We know the need is great. According to the respected Kaiser Family Foundation, there are more than 21,000 children in Alaska without health insurance. Many are from hard-working families who make too much for regular Medicaid but not enough to afford a private health plan. This results in less preventive care, more sickness and more lost school days. Emergency room visits also increase – last-minute care that is often uncompensated and results in higher insurance premiums and medical costs for everyone.

As you deliberate, let me alleviate concerns about federal support. When President Obama signed the CHIP reauthorization bill earlier this month, he and Congress effectively joined forces to provide states with funding certainty (CHIP is now authorized through FFY2013). That continuity is especially important during these times of economic instability. If families do lose employer-provided health coverage or fall further behind in their efforts to afford private insurance, it is essential that Denali KidCare be available to cover basic health care needs. Coupled with the fact that the federal government is offering financial incentives to states that increase enrollment and will pay up to 70 percent of the total cost of the program (currently estimated at 66 percent in Alaska), this is frankly a very good deal.

Given action by Congress to reauthorize CHIP, the Legislature's obvious interest in this issue and Governor Palin's announced intent to support an expansion of Denali KidCare, it looks as if the stars are finally aligned.

Thank you for your work on this matter. Please feel free to contact me if I can be of assistance.

Sincerely,

Mark Begich
U.S. Senator

THE 2009 HHS POVERTY GUIDELINES

One Version of the [U.S.] Federal Poverty Measure

[*Federal Register* notice, January 23, 2009 (PDF - 3 pages]
[Prior Poverty Guidelines and *Federal Register* References Since 1982]
[Frequently Asked Questions (FAQs)]
[Further Resources on Poverty Measurement, Poverty Lines, and Their History]

There are two slightly different versions of the federal poverty measure:

- The poverty thresholds, and
- The poverty guidelines.

The **poverty thresholds** are the original version of the federal poverty measure. They are updated each year by the **Census Bureau** (although they were originally developed by Mollie Orshansky of the Social Security Administration). The thresholds are used mainly for **statistical** purposes — for instance, preparing estimates of the number of Americans in poverty each year. (In other words, all official poverty population figures are calculated using the poverty thresholds, not the guidelines.) Poverty thresholds since 1980 and weighted average poverty thresholds since 1959 are available on the Census Bureau's Web site. For an example of how the Census Bureau applies the thresholds to a family's income to determine its poverty status, see "How the Census Bureau Measures Poverty" on the Census Bureau's web site.

The **poverty guidelines** are the other version of the federal poverty measure. They are issued each year in the *Federal Register* by the **Department of Health and Human Services** (HHS). The guidelines are a simplification of the poverty thresholds for use for **administrative** purposes — for instance, determining financial eligibility for certain federal programs. The *Federal Register* notice with the 2009 poverty guidelines (PDF - 3 pages).

The poverty guidelines are sometimes loosely referred to as the "federal poverty level" (FPL), but that phrase is ambiguous and should be avoided, especially in situations (e.g., legislative or administrative) where precision is important.

Key differences between poverty thresholds and poverty guidelines are outlined in a table under Frequently Asked Questions (FAQs). See also the discussion of this topic on the Institute for Research on Poverty's web site.

Acknowledgments

The authors would like to extend our deep appreciation to the many Medicaid and SCHIP officials throughout the country who participated in this survey and so generously shared their time and expertise with us. We are grateful for their willingness to explain recent program developments -- from the broadest policy change to the most detailed program rule. Their important contribution to improving the health of children and families deserves recognition and our thanks. We also would like to thank our colleagues at the Center on Budget and Policy Priorities, particularly Matthew Broaddus, for their assistance and helpful suggestions as we prepared this report. We also appreciate the assistance of the Center for Children and Families at Georgetown University's Health Policy Institute.

Executive Summary

Medicaid and SCHIP have been instrumental in covering more low-income uninsured children over the last decade. While much progress has been made, nine million children remain uninsured. As SCHIP reauthorization approached in 2007, states were poised to move forward with efforts to cover more uninsured children. However, federal obstacles, including the Medicaid citizenship documentation requirements, the issuance of a CMS-directive on August 17th 2007 limiting state expansions, and the failure to reauthorize SCHIP have hampered progress. A temporary extension provided funds for SCHIP through March 31, 2009.

When states adopted their budgets for the fiscal year starting July 1, 2008, many were able to include funding for children's coverage expansions. Later, the severity of the unfolding fiscal crisis became clearer and state budget shortfalls are now expected to total $350 billion for the remainder of FY 2009 and through 2011. States face mounting pressure to cut Medicaid and SCHIP just as the need for coverage rises due to climbing unemployment and loss of health coverage. In the last downturn, some states implemented restrictive enrollment procedures and reported dramatic declines in children's enrollment as a result. States may soon feel pushed to take such steps. Key findings from the annual KCMU survey of state Medicaid and SCHIP policies for children and parents that were implemented or authorized between January 2008 and January 2009 in the 50 states and D.C. include:

- **States continued to make progress on improving access to health coverage, particularly for children, but several significant setbacks warn about impending problems.** One-third of states (19) increased access to health coverage, while ten states enacted at least one measure to restrict coverage. The most common restriction was imposing new or higher premiums in SCHIP, but two states also restricted eligibility. California increased the frequency of renewal, a change estimated to affect more than 260,000 children as well as large numbers of parents.

- **The economic crisis is widespread and serious healthcare cuts are looming, but the commitment to children is still strong.** States continued to enact eligibility expansions for children, and state officials in several of those states plan to go forward even though they are facing significant budget shortfalls. Federal constraints, such as the unresolved reauthorization of SCHIP and the August 17th directive, have caused some states to put expansions on hold temporarily. Others are using state funds to pay for coverage precluded by the directive.

- **Parent coverage is still more difficult to obtain than children's coverage.** The median income at which children qualify for coverage is 200 percent of the federal poverty line, but is much lower — 68 percent of the federal poverty line — for working parents. However, for unemployed parents, the median income eligibility for Medicaid is just 41 percent of the federal poverty line, $601 per month for a family of three in 2008. Jobless parents who need coverage may find that unemployment payments put them over the income limit for Medicaid.

- **Outreach budgets were increased in a number of states, however, some are beginning to report that these funds are being curtailed.** Outreach, including community-based application assistance, is critical in a recession, since newly eligible families may be unfamiliar with public programs. But in light of budget shortfalls, some states expressed skepticism for conducting aggressive outreach. About half the states are using technology to implement or develop online applications and to develop more efficient enrollment and renewal systems.

As the economic crisis deepens, states will be under major pressure to contain costs. This may lead them to take steps that not only reverse coverage gains, but intensify the hardships that many families are already facing as a result of losing their jobs and their health insurance. Congress is currently considering SCHIP reauthorization and an economic recovery package that would provide additional federal Medicaid matching funds. These would help states to maintain vital coverage for low-income families, support state efforts to enroll more eligible children, and make program improvements. Strengthening Medicaid and SCHIP in these ways is an essential precursor to the larger task of enacting broad health care reform.

I. Introduction

A commitment to providing health coverage for uninsured children has inspired nationwide efforts that began in earnest with enactment of the State Children's Health Insurance Program (SCHIP) in 1997. Like Medicaid, the chief source of health coverage for low-income families, SCHIP finances coverage through a partnership between the federal and state governments. State measures to expand eligibility and adopt streamlined enrollment procedures in Medicaid and SCHIP have strengthened both of these programs, and they have been instrumental in reducing the percentage of low-income uninsured children by one-third over the last decade.[1] Notably, the number of low-income uninsured parents increased over the same period, since eligibility levels and resources for addressing their health coverage needs do not approach those related to children.

While considerable progress has been made, nine million children in the United States remain uninsured, with nearly two-thirds of them eligible for Medicaid and SCHIP. In 2007, with relatively robust state budgets and the reauthorization of SCHIP at hand, across the country, states came forward to reaffirm their commitment to closing this gap. That year, state efforts to expand children's health coverage represented the most aggressive steps forward since the early years of SCHIP. Of the 20 states that expanded eligibility for children, 12 raised or authorized raising SCHIP income limits to 300 percent of the federal poverty line, more than doubling the number of states that previously had eligibility set at this level. States also made progress on adopting simplified enrollment and renewal procedures in both Medicaid and SCHIP, emphasizing strategies that reduce paperwork and jump-start enrollment.[2]

Despite this burst of activity, efforts to advance children's coverage met unanticipated federal obstacles. The Medicaid citizenship documentation requirement, enacted in 2006 as part of the Deficit Reduction Act, sent state simplification efforts backwards by requiring U.S. citizens applying for Medicaid to present original documents proving their citizenship and identity. States reported that this new rule ushered a deep decline in the enrollment of eligible U.S. citizens, especially children.

The expected reauthorization of SCHIP also encountered roadblocks. Congress passed two versions of legislation to reauthorize SCHIP and President Bush vetoed each of them. And, on August 17, 2007, as SCHIP reauthorization was proceeding, the Centers for Medicare and Medicaid Services (CMS) issued a directive that impeded states' ability to expand coverage.[3] The year ended with these problems unresolved, meaning states were without the infusion of funds they were anticipating, and the new tools to bolster outreach and enrollment did not materialize. A temporary extension provided funds for SCHIP through March 31, 2009.

When states adopted their budgets for the state fiscal year starting July 1, 2008, they were able to include funding for children's coverage expansions. Later, the economy began to show signs of trouble, but it was not until September 2008 that the breadth and depth of the unfolding fiscal crisis became clear as financial markets collapsed and unemployment started to rise sharply. States are now facing an extremely threatening fiscal situation, with state budget shortfalls expected to total $350 billion for the remainder of FY 2009 and through 2010 and 2011.[4]

So far, most states have managed to maintain existing eligibility levels and procedural improvements. For example, despite serious financial pressures, states that enacted earlier children's coverage expansions, such as Iowa and New York, have reiterated their intentions to go forward. But, there are warning signs that this will become more and more difficult.

As in past economic downturns, states will continue to struggle with the mounting pressure to cut health coverage programs just at the time that an increasing number of people need the vital services they provide. Many states have already implemented or announced major cuts to health programs, mainly in the area of provider rates and benefits, which have a significant impact on access and the quality of care. States that have not yet expanded are likely to be deterred from increasing coverage because of the dire economic environment.

Medicaid enrollment and spending growth peaked in 2002 at the same time state revenues dropped sharply. In response, states adopted an array of cost containment strategies to control spending growth. Then federal fiscal relief was made available to states through the Jobs and Growth Tax Relief Reconciliation Act of 2003, increasing the federal share of Medicaid costs, and lifting some of the burden states were carrying. The legislation restricted states from lowering Medicaid eligibility between September 2003 and June 2004, as a condition of receiving relief funds. Thus, no state retracted Medicaid eligibility during this time period. SCHIP eligibility also remained relatively constant, with only a few states cutting back.

However, because they were still grappling with budget shortfalls, nearly half the states put in place enrollment procedures that made it more difficult for children and parents to secure and retain health coverage between April 2003 and July 2004.[5] Some states reported dramatic declines in children's enrollment as a result of these budget-driven changes, and children who were most likely *eligible* for existing programs became uninsured. For example, in Texas, SCHIP enrollment dropped by more than 149,000 children (a 29 percent decline), in large measure, due to reducing continuous coverage from 12 months to six months. Washington state also repealed the guarantee of 12 months of coverage and required parents to renew their child's eligibility every six months as well as report changes in the interim. This, along with other procedural changes, led to a dramatic caseload reduction of more than 40,000 children. In Wisconsin's BadgerCare program, establishing more rigorous documentation requirements resulted in an enrollment decline of 13,000 children and parents in just the first four months of implementation. Several states also froze SCHIP enrollment. In addition to turning away children who qualified for coverage under SCHIP, this strategy adversely affected Medicaid-eligible children not subject to the freeze. Eligible applicants' path to coverage was limited when states stopped taking joint Medicaid/SCHIP applications or because families mistakenly interpreted news reports to mean that all coverage programs were closed to new applicants.[6]

Coming out of the last economic downturn, states worked to eliminate SCHIP enrollment freezes and reverse some of the enrollment barriers they had imposed. This enabled caseloads to recover somewhat. An important lesson learned, however, is that the problematic effects of changing administrative procedures can endure if such changes send conflicting messages to prospective and current program participants.

As this report goes to press, two major developments are within reach. Congress has taken up SCHIP reauthorization once again and is working towards passing a bill that will likely be one of the first pieces of legislation to be presented to the nation's new president, Barack Obama. Next will come a significant economic recovery package that will contain substantial state fiscal relief in the form of enhanced federal matching funds for Medicaid that will reduce the share of the costs states will have to contribute for the program. Passage of both these bills would provide needed relief, as well as the support to move forward on enrolling more eligible, uninsured children. These measures would also help reinforce the federal/state partnership that is fundamental to the viability of health coverage programs. Strengthening Medicaid and SCHIP by making sure they are in a position to provide coverage to more

low-income uninsured individuals, is also an essential precursor to the larger task of enacting broad health care reform.

II. About this Survey

This report presents the findings of a survey of eligibility rules, enrollment and renewal procedures, and cost-sharing practices in Medicaid and SCHIP for children and families that were implemented or authorized between January 2008 and January 2009 in the 50 states and the District of Columbia. These policies have a large influence on how effectively Medicaid and SCHIP can deliver health coverage to the eligible children, pregnant women and parents who rely on the vital services these programs provide. They are the driving forces behind efforts to reduce the number of low-income people who lack adequate insurance but cannot afford to pay for it on their own.

This study, the eighth annual survey conducted by the Center on Budget and Policy Priorities for the Kaiser Commission on Medicaid and the Uninsured, was carried out in the summer and early fall of 2008, through extensive telephone interviews with state Medicaid and SCHIP program administrators. Detailed follow-up interviews proceeded through the end of the year. The findings reflect policies and procedures in effect in the states in January 2009, as well as coverage expansions that were authorized, but were not implemented, by states during the survey period.

III. Key Survey Findings – Current Status of Coverage for Children and Parents

States continue to make progress on improving access to health coverage for low-income families. As of January 2009, income eligibility levels are as follows:

States provide health coverage for children and pregnant women under Medicaid or SCHIP as follows (Figures 1 & 2):

- 44 states, including DC, cover children in families with income at 200% FPL or higher. ($35,200 for a family of three in 2008).
- 33 states cover children in families with income between 200% and 250% FPL. (200%: $35,200 for a family of three in 2008; 250% FPL: $44,000 for a family of three in 2008).
- 19 states, including D.C., cover children in families with income at 250% FPL or higher. 10 of these states cover children in families with income at 300% FPL or higher. ($52,800 per year for a family of three in 2008).
- 40 states, including DC, cover pregnant women with income 185% FPL or higher. ($32,560 for a family of three in 2008).

Figure 1

Children's Eligibility for Medicaid/SCHIP by Income, January 2009

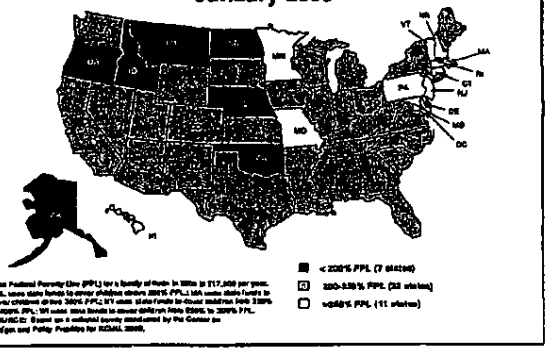

Figure 2

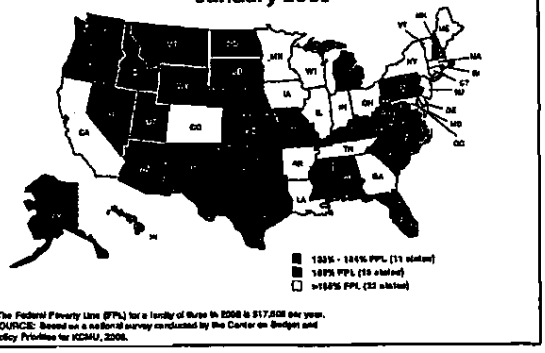
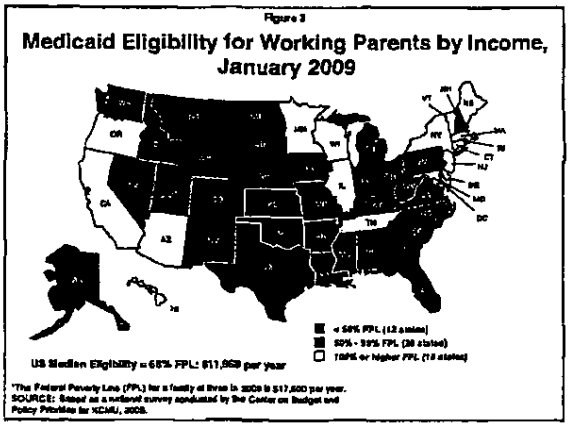
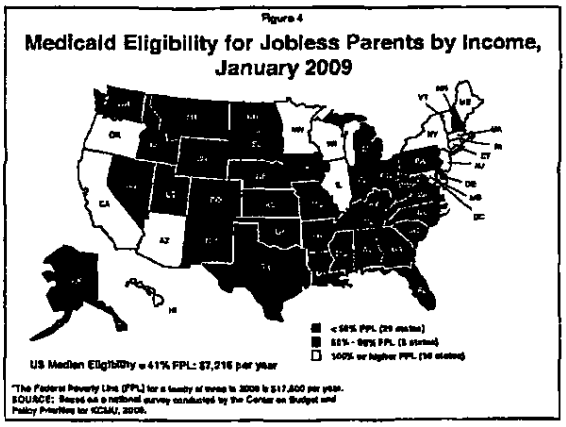
Medicaid Eligibility for Pregnant Women by Income, January 2009



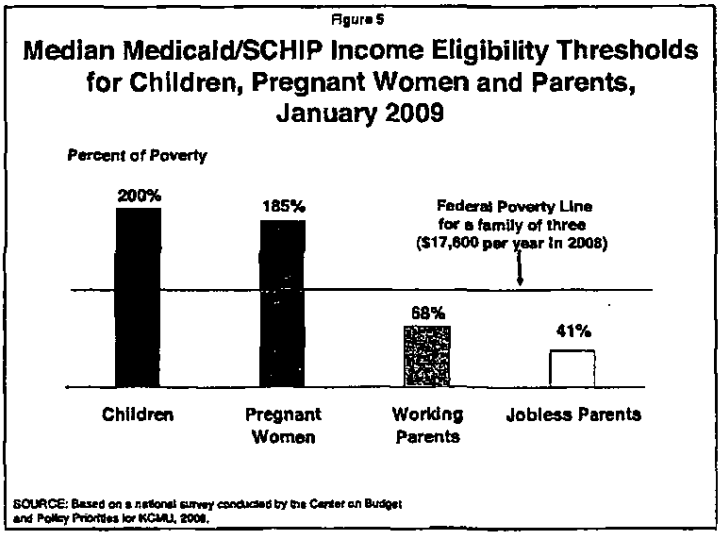
States provide health coverage for parents under Medicaid as follows (Figures 3 & 4):

- In 12 states, family income must be less than half the federal poverty line for a working parent to qualify for Medicaid ($8,700 per year for a family of three in 2008).
- In 29 states, family income must be less than half the federal poverty line for a jobless parent to qualify for Medicaid ($8,700 per year for a family of three in 2008).
- 18 states, including the District of Columbia, cover parents in families with income at 100 percent of the federal poverty line or higher ($17,600 per year for a family of three in 2008).
- In 28 states, a parent in a family of three, working full-time at the minimum wage, earning on average, $1,092 per month, cannot qualify for Medicaid.





It continues to be more difficult for a low-income parent to qualify for health coverage than for a child (Figure 5). The median income at which children qualify for Medicaid or SCHIP is 200 percent of the federal poverty line, but is much lower — 68 percent of the federal poverty line — for working parents. For jobless parents, the median income eligibility for Medicaid is just 41 percent of the federal poverty line, $601 per month for a family of three in 2008. In an economic downturn, this low income limit can take a serious toll on families. For many individuals who have lost their jobs and also their health insurance, COBRA coverage is likely to be prohibitively expensive or may not be available, and parents may turn to public programs for coverage. However, they may find that the unemployment compensation payments they receive put them over the income limit for Medicaid. (Since unemployment compensation is unearned income, "earnings disregards" that are designed to help working families qualify do not apply.) Jobless parents may eventually become eligible, but in the interim they are subject to health risks and financial exposure that can have deleterious consequences for themselves and their families.



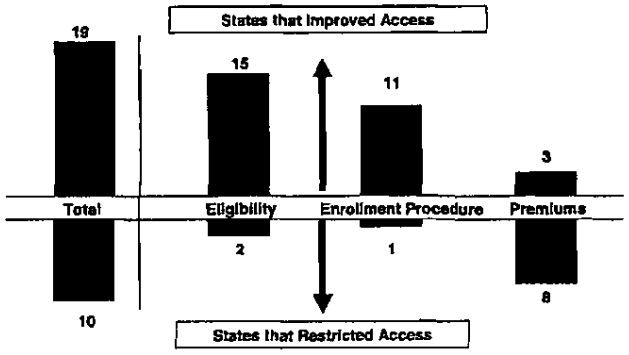
IV. Key Survey Findings – State Actions During 2008

Overall, states continued to make progress on improving access to health coverage, but a few setbacks warn about impending problems (Figure 6).

- **More than one-third of the states (19 states) took steps to increase access to health coverage for low-income children, pregnant women and parents.** Fifteen(15) states authorized or implemented coverage expansions *(CO, LA, IN, KS, LA, MD, MT, ND, NJ, NY, OK, OR, SC, TN, WI)*; 11 states reduced procedural barriers *(AZ, CO, LA, KY, LA, MD, MT, NV, OR, SC, UT)* and three states reduced financial barriers to Medicaid and SCHIP *(TN, WA, WI)*.

Figure 6

Number of States Taking Action Affecting Access to Health Care Coverage, Jan 08 – Jan 09



SOURCE: Based on a national survey conducted by the Center on Budget and Policy Priorities for KCMU, 2009.

- **Ten states (10 states) enacted at least one measure to restrict coverage.** The most common restriction was to increase financial barriers such as new or higher premiums in SCHIP programs. Eight states *(GA, LA, MN, MO, NJ, NV, PA, RI)* went in this direction. *Rhode Island* and *South Carolina* restricted eligibility, the former cutting income eligibility for parents, and the latter establishing a three-month waiting period in its new separate SCHIP program, during which children must remain uninsured before they can enroll. *California*, increased the frequency with which parents and children are required to renew coverage.

  The actions taken by *Rhode Island* and *California*, among the first states to feel the effects of the economic downturn, raise concerns about where other states could be headed if their fiscal pressures go unaddressed. The premium increases in *Rhode Island* are steep, coming at a time when families are likely to be financially strapped. Premiums of $45 per child per month are now required for children in families with incomes as low as 133 percent of the federal poverty line ($23,467 for a family of three in 2008), as compared to the previous starting point, 150 percent of the federal poverty line. Premiums for other children range from $86 per month to $114 per month, representing an increase of up to $29 per month for some.

  California's retraction of 12-month continuous eligibility for children withdraws the guarantee of full-year coverage, which is critical for children with ongoing medical needs. In addition, the state will

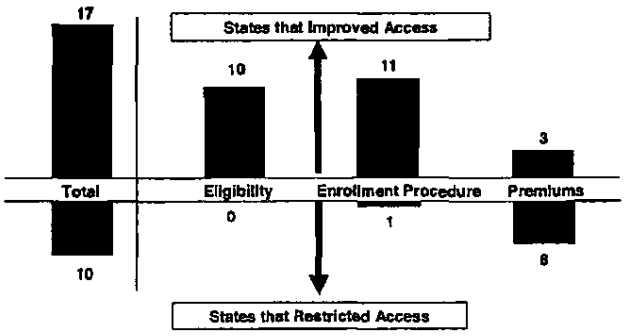
2954

now require children and parents on Medicaid to comply with a semi-annual reporting procedure that is likely to cause otherwise avoidable gaps in coverage for eligible families. It will also create unnecessary and costly administrative burdens, since eligible families dropped from the program are likely to reapply within a short period of time. These changes could result in more than 260,000 children losing coverage by 2011. A large number of parents would be affected as well.[7]

The economic crisis is widespread, and serious health care and other cuts are looming, but states are demonstrating a steadfast commitment to covering children (Figure 7). States continued to enact eligibility expansions for children, and state officials in several of those states, such as *Iowa* and *New York*, plan to go forward even though they are facing significant budget shortfalls. Federal constraints that have dampened states' ability to expand, such as the unresolved reauthorization of SCHIP and the August 17th directive, have caused several states to put expansions on hold or scale back temporarily. Others, such as *Wisconsin* and *New York*, are using state funds to pay for children whose coverage is precluded by the August 17th directive.

Figure 7

Number of States Taking Action Affecting Children's Access to Health Care Coverage, Jan 08 – Jan 09



SOURCE: Based on a national survey conducted by the Center on Budget and Policy Priorities for KCMU, 2009.

- **One-third of the states (17 states) increased access to coverage for children.** Ten (10) states implemented or authorized eligibility expansions for children. *Iowa* and *Montana* raised children's coverage (scheduled to begin later this year), to 300 percent of the federal poverty line and 250 percent of the federal poverty line, respectively; *Kansas* implemented a children's coverage expansion to 250 percent of the federal poverty line. If the August 17th directive remains in place, these states will be subject to the strict conditions it imposes. Eligibility increases were also implemented, but to more modest levels in *Colorado, North Dakota* and *South Carolina. New York* adopted the option to allow children leaving foster care upon reaching age 18 to keep their Medicaid coverage.

  Of the ten states that expanded coverage for children, four were implementing expansions that were authorized last year, but which had been held back by the August 17th directive or by the uncertainty surrounding SCHIP reauthorization. *Louisiana* and *Indiana* increased eligibility to 250 percent of the federal poverty line, rather than 300 percent. *Wisconsin* and *New York* chose to move forward with their full expansions, funding coverage over 250 percent of the federal poverty line with state funds only. *Illinois* has been funding its expansion using state dollars. Planned expansions in five additional states (*NC, OH, OK, WA,* and *WV*) remain stalled.

Iowa Children Get A Coverage Boost

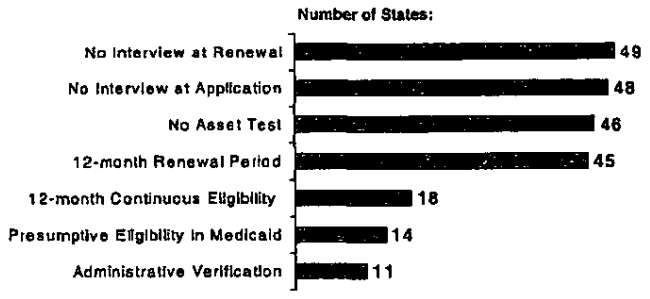
Buoyed by a groundswell of public support for covering children, Iowa Governor Chet Culver, along with state legislators, remain strong in their pledge to expand health insurance to more of the state's uninsured children. In the last legislative session, state legislators passed an expansion of hawk-i, the state's SCHIP program, to 300 percent of the federal poverty line, which will be implemented in July 2009, and cover an estimated 5,000 new children. Program improvements have already proceeded. The state now guarantees children a full 12 months of continuous coverage and is pursuing ways to ease premium payment policies. For example, families new to the program will not have to pay premiums for the first two months of enrollment. Outreach is expected to go forward as well, but may possibly be scaled back. Like many other states, Iowa is in a severe budget crunch, with an expected shortfall of more than $600 million in the coming year. Major spending cuts are being planned, but it appears that the children's coverage expansion will go forward. Senate Majority Leader, Mike Gronstal (D) stated recently, "We committed to providing access to affordable coverage to every kid in the state of Iowa. I'm not interested in backing up on that commitment."

* "Health Promises Persist: Iowa lawmakers reconcile health care goals, budget" The Hawkeye, January 15, 2009.

- **Eleven (11) states took steps to reduce procedural barriers to coverage for children (Figure 8).** *Arizona, Kentucky,* and *Utah* no longer require families to participate in face-to-face interviews to obtain health coverage for their children, and *Colorado* adopted "administrative verification and renewal," meaning the state no longer requires families to provide paper documentation of their income and eligibility workers use existing databases to verify the information families provide on the application. *Maryland, Montana, Louisiana, South Carolina* and *Utah* have revised their applications to allow parents to apply using the same simplified forms that are used for children, a change that benefits both children and parents. *Iowa, North Dakota* and *Oregon* now guarantee 12 months of continuous eligibility, considered to be one of the most effective tools for keeping children covered for as long as they qualify. One serious setback, the changes to the renewal procedures in *California,* was discussed earlier.

Figure 8

Simplifying Enrollment and Renewal: Strategies States are Using in Children's Health Coverage Programs, Jan 09



SOURCE: Based on a national survey conducted by the Center on Budget and Policy Priorities for KCMU, 2009.

States Explore the Use of Technology to Facilitate Enrollment

Emergence of Online Applications

About half the states reported that they are implementing, or are in the process of designing, on-line applications. Several of these states also report allowing the use of electronic signatures, so that a follow-up signature page does not have to be printed and mailed in. (Other states appear unsure about the permissibility of electronic signatures and point to the lack of clear federal guidance on this subject.) Some states at the forefront of using on-line applications also report that their applications currently interface with existing eligibility systems (or will in the future), so that information from the on-line application does not have to be re-entered by eligibility workers and an eligibility determination can move forward more rapidly.

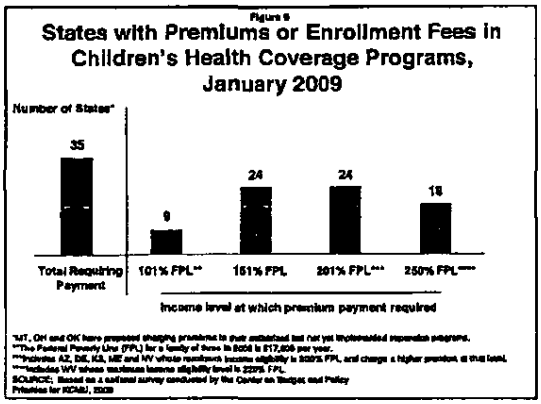
Database Usage

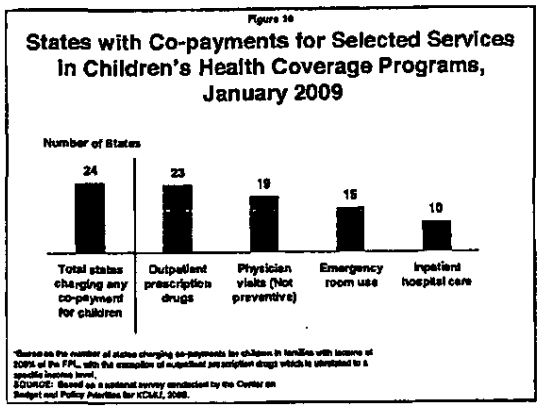
Eleven states (12 states at renewal) report using technology to streamline the enrollment and renewal process. States report conducting matches with existing databases to verify income and other information, as well as eliminating rules requiring families to submit pay stubs or other paper documentation. This procedure is referred to as "administrative verification and renewal." Many states also are conducting data matches with their Vital Records departments to help families comply with the Medicaid citizenship documentation requirement, however, the technological capacity to do this efficiently varies considerably. Finally, states are exploring the use of technology to target outreach, for example, by conducting data matches with existing databases to identify children and parents who are likely to qualify for health coverage but who are not enrolled. States report using matches with food stamp databases for this purpose, and have expressed interest in using state tax system databases.

- **Outreach budgets in a number of states were increased in 2008, however, some states are beginning to report that these funds are being curtailed.** Several states reported increases in outreach funding in 2008, sometimes associated with new expansions, but also for ongoing promotional activities and community-based application assistance. In recent follow-up interviews, some state officials indicated that their outreach budgets have now been cut; others expressed skepticism for conducting aggressive outreach in light of budget shortfalls. Still others said their outreach activities would go forward, with some indicating that activities would emphasize renewal assistance so that already enrolled children do not lose coverage.

- **A few states reduced financial barriers to children's coverage, eliminating or lowering premiums for some children, while other states increased premiums (Figure 9).** *Tennessee, Washington* and *Wisconsin* either reduced premiums or eliminated them for some children. *Georgia, Minnesota, Missouri, Nevada, New Jersey, Pennsylvania* and *Rhode Island* increased premiums for children, with two of these states showing significant increases. *Minnesota* premiums increased by up to $14 per month for some children. Premium increases in *Rhode Island*, discussed earlier, represented the most severe increases for children this year. New premiums implemented in *Louisiana*, apply to the state's new expansion group (children with incomes between 200 percent and 250 percent of the federal poverty line).

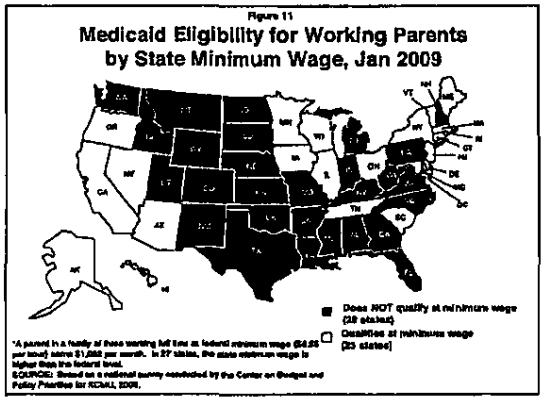
- **Co-payments for health services were adopted in one state and increased in two states (Figure 10).** Currently, 24 states charge co-payments for children's health services. *Wisconsin* adopted new co-payments, and *West Virginia* and *Utah* increased co-payments for prescription drug coverage. Only one state, *Montana* decreased co-payment amounts.

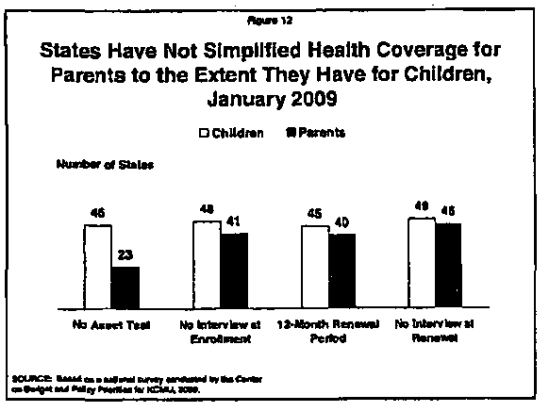




Low-income parents applying for Medicaid coverage continue to face substantially restricted income eligibility and access as compared to their children (Figure 11 and 12).

- **A few states took steps to boost coverage and simplify procedures for parents.** Three states — *New Jersey, Maryland,* and *Wisconsin* — implemented parent coverage expansions. Still, in 28 states, parents working full time at minimum wage cannot qualify for Medicaid. One state, *Rhode Island*, cut parent coverage. *Maryland* also stopped counting assets in determining eligibility for parents, a step that fewer than half the states have taken. Given the restrictive income eligibility levels for parents in most states, the majority of parents applying are not likely to have substantial bank accounts, multiple vehicles of significant value, or other resources that would disqualify them. The burdensome and intrusive paperwork associated with proving that one does not exceed the asset limit often deters eligible parents from completing the application process. Other measures were implemented to reduce procedural barriers for parents, including eliminating interviews and reducing the frequency of renewal (*AZ, MD, UT),* but these practices are still more prevalent in children's coverage programs.





2958

Maryland Expands Medicaid Eligibility for Low-Income Parents

Access to health coverage increased measurably for thousands of low-income Maryland parents this year when an income eligibility expansion and a package of procedural improvements were implemented on July 1, 2008. The state boosted parent eligibility from about 30 percent of the federal poverty line to 116 percent. The state also eliminated the asset test and no longer requires parents to have a face-to-face interview at the Medicaid office. This streamlined the process for parents and also aligned procedures for parents and children to a greater extent so that they can apply using the same simplified application form. Since its implementation, 29,682 adults have enrolled as a result of the expansion.

To achieve this early success, a logical first step was to identify children already in Medicaid whose family income is below 116 percent of the federal poverty line and enroll the parents when they renew their child's coverage. Traditional outreach efforts including TV, print and radio publicity, as well as activities with the Baltimore Ravens football team, also have done much to inform families about the new coverage opportunity. In addition, the Medicaid and revenue agencies coordinated on a new initiative that used the tax system to identify 150,000 people who were potentially eligible. They were sent a letter from the state Comptroller inviting them to call a toll-free number for an application. Between December 1 and December 12, 2008, nearly 1,800 hotline callers were sent applications. Others obtained applications on-line and through other avenues.

Enrollment continues to increase and the recession is apparently a driving force: there were more approvals of parents in the expansion group during the first two weeks in December than there have been since it was implemented in July and state officials say they are seeing people who previously had secure jobs and are seeking help, perhaps for the first time. The budget is tight in Maryland, but in two rounds of cuts, the expansion has not been targeted.

*Conversations with Maryland State Officials, January 2009.

- **Income eligibility for pregnant women remained stable with nearly half the states covering pregnant women at 185 percent of the federal poverty line.** Two states, *Tennessee* and *Wisconsin*, increased eligibility for pregnant women to 250 percent and 300 percent of the federal poverty line respectively. *Oklahoma* and *Oregon* both adopted the option to use SCHIP funds to cover unborn children of pregnant women.

V. Discussion

Recession Jeopardizes States' Ability to Maintain and Advance Coverage for Low-Income Children and Parents

States have made substantial progress in reducing barriers to health coverage for low-income children and families. They continued to do so during the first half of 2008 by further expanding eligibility and streamlining enrollment and renewal procedures. Now, as the economic crisis deepens, states will be under major pressure to contain costs. This may lead them to take steps that would not only reverse critical coverage gains, but would intensify the hardships so many families are already facing as a result of losing their jobs and their health insurance. In the last economic downturn, federal fiscal relief was successful in helping states address budget shortfalls, avoid deeper Medicaid cuts, and preserve eligibility, which was a condition of receiving enhanced federal funds. However, to deal with tight budgets, many states made procedural changes to their programs which blocked eligible children and parents from obtaining coverage at a time when they could least afford health care on their own.

Easing Eligibility and Simplifying Procedures Are Especially Important During an Economic Downturn

Individuals who have lost health coverage due to unemployment need a smooth path to Medicaid and SCHIP.[8] Any period of time without insurance could cause ongoing medical conditions to escalate if it is not possible for families to find or pay for needed medication or other treatment on their own. Parents who are recently unemployed may find that the unemployment compensation payments they receive put them over the income limit for Medicaid. States can choose to disregard these payments or a portion of them in determining eligibility for jobless parents. States can eliminate their SCHIP waiting periods or at least ensure that a job-loss exemption is available. Minimizing documentation requirements and rescinding face-to-face interviews also are important since complicated, burdensome forms and procedures often discourage families from completing the process. Enrolling children for a full 12 months and simplifying renewal helps ensure beneficiaries remain covered for as long as they qualify. In addition to protecting children and families, taking such steps also saves administrative costs by reducing the workload on eligibility workers. Eligibility staff may have been cut at the same time application volume has increased.

Premium Payment Policies Matter

It also is important to ensure that unreasonable out-of-pocket costs do not keep eligible children from obtaining coverage and needed care. When a family has lost income or a job, it will be more difficult to keep up with premium payments on top of regular living expenses. Numerous studies show that premiums for low-income individuals can depress enrollment in health coverage programs.[9] Similarly, burdensome co-payments can be an obstacle to getting needed care or medication. Programs should also avoid imposing strict payment timeframes after which children are disenrolled from SCHIP, as well as lock-out periods that bar children from returning to SCHIP if the lack of a premium payment forces them to lose coverage.

Outreach Is Critical During Economic Downturns

In tight budget times, it may appear sensible to cut outreach funds as states seek ways to contain the costs associated with expanding caseloads. Conducting outreach may also seem counterintuitive when hiring freezes and lay-offs mean there are fewer eligibility workers to process a larger volume of applications. However, families that previously had stable jobs with health insurance are likely to have little or no experience navigating the public benefits system. They may not know where to turn for help when they become jobless, nor are they likely to know much about Medicaid and SCHIP or realize that they may qualify. Community-based organizations and institutions can play a vital role in alerting families to the availability of free or low-cost coverage and in assisting families with application procedures.

States are attempting to balance these competing pressures. For example, although New Mexico has had to make significant cuts to its Medicaid budget, the state will continue to reach out and enroll more uninsured children, a goal Governor Richardson has prioritized. A state Medicaid official explained that, while available funding will continue to be used for outreach, "the state does not have funds to do anything very aggressive or costly. It's difficult to justify spending on outreach when we're cutting elsewhere, however we will conduct some data matches to identify eligible but unenrolled children."[10] Given the demands that outreach generates and the limitations created by personnel cuts, adopting simplified procedures are more important that ever. Streamlining renewal, in particular, protects the investment in outreach since it guards against eligible children and parents losing coverage unnecessarily.

Federal Legislation May Provide Needed Help for States

Two major pieces of legislation are being considered in Congress as this report is being written. Both are critical to addressing the challenges states are facing as they report mounting deficits and also attempt to assist the growing demand for health coverage among families that are suffering the effects of the weakening economy. The first is reauthorization and extension of SCHIP legislation, which is currently operating with temporary funding through March 2009. This legislation would provide the additional funds to maintain coverage for children currently enrolled and cover additional uninsured children. It would also provide bonus payments designed to encourage states to enroll more eligible children under Medicaid.

The second piece of legislation is the economic recovery package. In this recession, with substantial state deficits, one form of assistance the federal government could provide is an increase in the federal share of financial assistance for the Medicaid program (FMAP). The amount of funding for the enhanced FMAP, the duration of the relief, the distribution of the funds across states, and the conditions or maintenance of effort requirements related to eligibility are critical issues in the design of a recovery package. In 2003, one of the conditions for states receiving an increased FMAP was that they were prohibited from reducing eligibility levels in order to qualify for this financial assistance. Congress could also consider requiring states to maintain enrollment procedures to qualify for federal assistance and additional provisions to extend temporary Medicaid coverage to individuals affected by the economic downturn.

The SCHIP reauthorization and economic recovery plan could provide an essential boost that would enable states to sustain the coverage gains they have achieved and give families hard-hit by the recession the confidence that assistance with health coverage will be available.

Subject: SCHIP Cost Sharing Rules

Senator Davis,

We enjoyed listening to your Health and Social Services committee meeting on Monday. This memo is intended to answer the question posed about the SCHIP cost-sharing rules.

Alaska's SCHIP program is a Medicaid expansion program and therefore must comply with Medicaid's cost-sharing rules as specified under the Deficit Reduction Act of 2005. Under provisions of the Deficit Reduction Act of 2005 (DRA), states generally cannot impose cost sharing on children in families with income below 150 percent of the federal poverty guidelines except in certain circumstances. In addition, even at more moderate-income levels, federal rules exempt some special services from any cost sharing requirements.

Most children under the age of 18 are exempt from premiums and from cost-sharing on most services. However, the DRA rules allow states to require co-payments for prescription drugs and use of the emergency room for non-emergency care on all children in certain circumstances. The DRA also allows states to assess premiums and cost-sharing charges on some children in families with income above the poverty line. The total amount of premiums and cost-sharing charges cannot exceed a cap of five percent of family income, which is calculated on a monthly or quarterly basis at the option of the state.

Please see the following document by the Center on Budget and Policy Priorities for more detailed information about cost-sharing and premiums in Medicaid:
Cost-sharing and Premiums in Medicaid: What Rules Apply? February 28, 2007
http://www.cbpp.org/2-28-07health.pdf

In addition, you may also find the following document by the Congressional Research Service helpful. The table on page 5 compares service-related cost-sharing rules in traditional Medicaid, the DRA options and SCHIP.
Medicaid Cost-Sharing Under the Deficit Reduction Act of 2005 (DRA)

CRS Report for Congress, January 25, 2007
http://assets.opencrs.com/rpts/RS22578_20070125.pdf

The following document by the Centers for Medicare and Medicaid Services (CMS) also summarizes these Medicaid requirements and you may find the "Important Links" on the bottom of page 2 helpful.
See the CMS document here:
http://www.cms.hhs.gov/DeficitReductionAct/Downloads/Costsharing.pdf

For more general information about cost sharing and SCHIP, please see the following CMS website:
http://www.cms.hhs.gov/MedicaidGenInfo/05_SCHIP%20Information.asp
(Scroll down to see the information under the heading "Cost Sharing.")

To create cost sharing requirements that differ from the Medicaid requirements, states can do so by submitting a waiver to and obtaining approval from the Centers for Medicare and Medicaid Services (CMS) or by creating a stand-alone SCHIP program.

If you have more specific or detailed questions regarding cost-sharing requirements under Alaska's SCHIP program, I would suggest that you contact CMS directly.

Best regards,
Jennifer Saunders

Alaska rewarded for kids' health insurance

The Associated Press
(12/21/09 21:40:13)

Alaska is among nine states being rewarded by the federal government for enrolling more uninsured children in Medicaid. Health Secretary Kathleen Sebelius said Alaska is receiving a $789,000 bonus for boosting health insurance coverage for children.

The payouts were part of the Children's Health Insurance Program reauthorization signed into law by President Barack Obama.

The amounts totaled $72.6 million in this fiscal year.

SPONSOR STATEMENT

Senate Bill 24

"An Act naming the bridge over Hammer Slough on Nordic Drive in Petersburg the Louis Miller Bridge"

Senate Bill 24 would name a bridge in Petersburg in honor of Louis Miller. Mr. Miller was an early Alaskan pioneer who helped found and build the community of Petersburg.

Louis Miller came to Alaska as part of the Klondike Gold Rush. He arrived in Petersburg in 1901 and worked for town founder Peter Buschmann as a carpenter. Miller is credited with building some of Petersburg's first houses and serving as foreman for the construction of the community's Sons of Norway Hall. He operated a moorage and warehouse on the site of the present day bridge over Hammer Slough until his death in 1955. Senate Bill 24 would name this bridge in his honor.

Under current law (AS 35.40.015), the State of Alaska may name public works infrastructure through an act of the legislature. Senate Bill 24 would honor a historic figure in Petersburg's history and is supported by the City of Petersburg.

CITY OF PETERSBURG, ALASKA

RESOLUTION # 1877

Offered by: Jensen
Supported by: Sarff

A RESOLUTION REQUESTING PETERSBURG'S LEGISLATORS TO SPONSOR AN ACT DESIGNATING THE BRIDGE ACROSS HAMMER SLOUGH ON THE MITKOF HIGHWAY AS THE LOUIS MILLER MEMORIAL BRIDGE

WHEREAS, the Petersburg City Council received a letter dated June 20, 2008 from Leif O. Wikan asking the Council to acknowledge the contribution of two Petersburg pioneers for their dedication to the community by naming the downstream bridge across Hammer Slough the Rasmus Enge Bridge and the upstream bridge the Louis Miller Bridge, a copy of which is attached and made a part of this resolution by reference; and

WHEREAS, the Council has formally designated the downstream bridge across Hammer Slough as the Rasmus Enge Memorial Bridge by a motion passed and approved at a meeting held July 7, 2008; and

WHEREAS, the bridge upstream of Hammer Slough is a structure that is owned and maintained by the Alaska Department of Transportation and Public Facilities; and

WHEREAS, AS 35.30.040 provides authority for the Alaska Legislature to designate memorial public works by an Act sponsored by a member of the legislature.

NOW, THEREFORE, BE IT RESOLVED that the Petersburg City Council hereby petitions its state legislators to sponsor an Act amending AS 35.40 by adding a new section designating the bridge across Hammer Slough in the City of Petersburg on the Mitkof Highway as the Louis Miller Memorial Bridge.

PASSED and **APPROVED** by the City Council of the City of Petersburg, Alaska this 20nd day of October 2008.

SPONSOR STATEMENT

Senate Bill 25

"An Act naming the South Mitkof Island ferry terminal the Richard 'Dewey' Duvall Ferry Terminal."

Senate Bill 25 would name the South Mitkof Ferry Terminal in Petersburg in honor of Richard "Dewey" Duvall. Mr. Duvall was a proponent of marine transportation in Southeast Alaska, a founding board member of the Inter-Island Ferry Authority (IFA), and a longtime resident of Petersburg.

A strong advocate of marine transportation, Richard Duvall served his community for many years as an IFA Board Member and Petersburg city councilman. His tireless advocacy on behalf of the IFA is credited with helping the authority organize and expand routes across southern Southeast Alaska. Up until his passing, he was a recognized leader who sought to improve Alaska's quality of life through connecting communities. For over 10 years Richard played an important role in the leadership of the IFA and construction of its terminal at the southern end of Mitkof Island. Senate Bill 25 would name that terminal in his honor.

Under current law (AS 35.40.015), the State of Alaska may name public works infrastructure through an act of the legislature. Senate Bill 25 would honor a longtime resident of Petersburg who contributed a great deal to his community and Southeast Alaska. The bill is supported by the City of Petersburg.

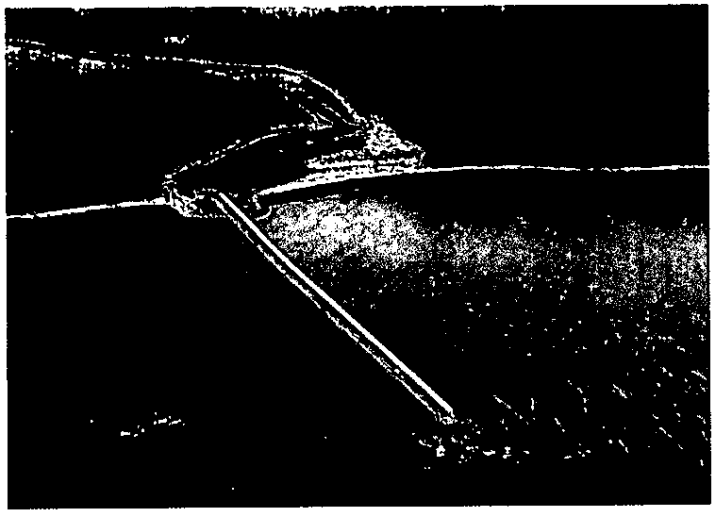
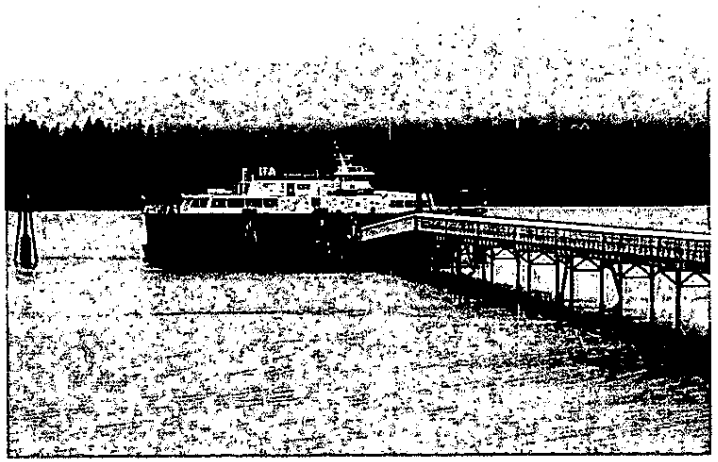
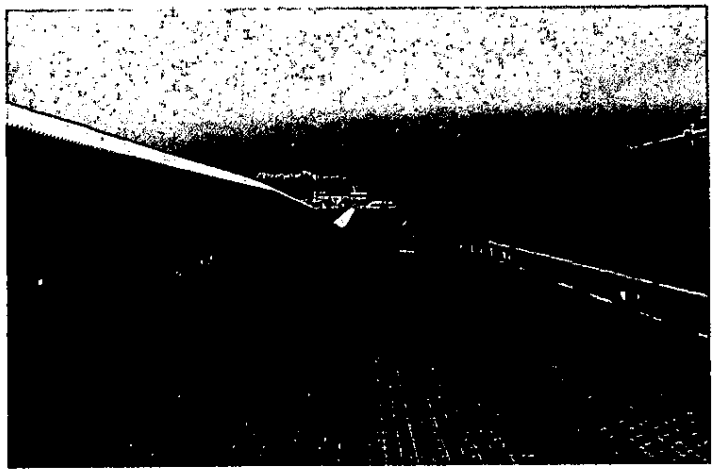
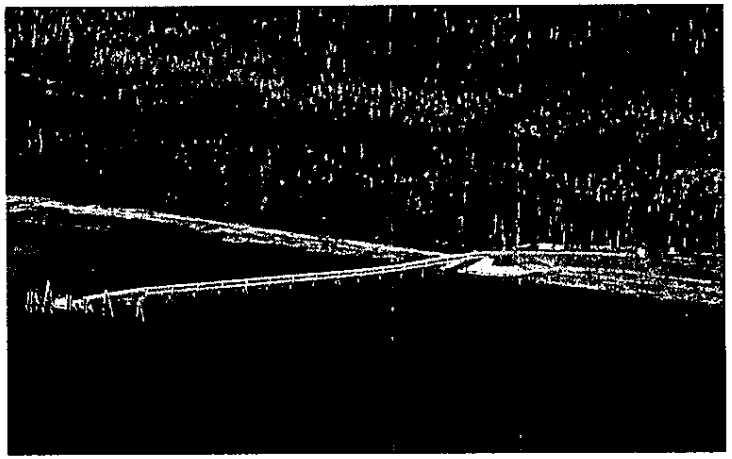
Proposed Richard "Dewey" Duvall Ferry Terminal
Petersburg, Alaska









CITY OF PETERSBURG, ALASKA

RESOLUTION # 1878

Offered by: Sarff
Supported by: Jensen

A RESOLUTION REQUESTING PETERSBURG'S LEGISLATORS TO SPONSOR AN ACT DESIGNATING THE SOUTH MITKOF ISLAND FERRY TERMINAL AS THE RICHARD "DEWEY" DUVALL MEMORIAL FERRY TERMINAL

WHEREAS, Richard "Dewey" Duvall, recently deceased, played important roles in the organization of the Inter-Island Ferry Authority, the construction of the South Mitkof Island Ferry Terminal and the paving of the Mitkof Highway from Blind Slough to the South Mitkof Island Ferry Terminal; and

WHEREAS, Richard "Dewey" Duvall served the community of Petersburg with distinction as a member of the Petersburg City Council for two terms, one term being a two year commitment from October, 1996 to October, 1998 and the most recent being a three year commitment from October, 2003 to October, 2006, and

WHEREAS, Dewey always understood the importance of water transportation needs of Southeast Alaska and was an avid promoter for the development and operation of the Inter-Island Ferry Authority (IFA). Dewey knew that the general health, security and welfare of the residents of Prince of Wales Island, Ketchikan, Wrangell and Petersburg, as well as the need to develop commerce and industry in this area, was dependant on increasing ferry transportatin services, and

WHEREAS, since the Inter-Island Ferry Authority's creation, by overwhelming voter support in October, 1997, no other individual from the Petersburg community has put more time and effort into making the IFA a success. Dewey was Petersburg's very first IFA Board Member, serving on the IFA Board from November 3, 1997 until April, 2006. For over 10 years, he witnessed first hand the enormous challenges and successes of the Authority. He grined with pride when the first Hollis-Ketchikan ferry run began in January, 2002 and he beamed with joy when the northern run into Petersburg began in May, 2006, and

WHEREAS, Dewey has now ended his service to the IFA, which included not only his past service as a Board Member, but most recently as the very first employed Agent for the Petersburg Terminal. Dewey has also ended his many years of service and dedication to the community of Petersburg and we believe the hard work should be acknowledged by naming the IFA Terminal on Mitkof Island in his honor, and

WHEREAS, the South Mitkof Highway Ferry Terminal is a facility that is owned and maintained by the Alaska Department of Transportation and Public Facilities; and

WHEREAS, AS 35.30.040 provides authority for the Alaska Legislature to designate memorial public works by an Act sponsored by a member of the legislature.

NOW, THEREFORE, BE IT RESOLVED that the Petersburg City Council hereby petitions its state legislators to sponsor an Act amending AS 35.40 by adding a new section designating the South Mitkof Island Ferry Terminal as the Richard "Dewey" Duvall Memorial Ferry Terminal.

PASSED and **APPROVED** by the City Council of the City of Petersburg, Alaska this 20nd day of October 2008.

JOHNNY ELLIS

SPONSOR STATEMENT – SENATE BILL 32

AN ACT RELATING TO MEDICAL ASSISTANCE PAYMENTS FOR HOME- AND COMMUNITY-BASED SERVICES

Senate Bill 32 creates a mechanism for regular Medicaid rate review for providers of home- and community-based services to Alaska's elderly and developmentally disabled citizens. Institutional service providers receive regular reviews in order to bring rates in line with costs.

However, home and community-based services (HCBS) have been conclusively proven to lower overall long-term Medicaid costs. One recent study in the academic journal *Health Affairs* found that states with long-established high proportions of HCBS spending saw a 3% overall decrease in long-term care spending between 1995 and 2005 as opposed to a 14.5% increase in low-HCBS states. The study concluded:

> "*Justifications based on financial constraints can no longer be credibly offered as reasons for forcing such people [seniors and persons with developmental disabilities] into nursing homes and other institutions. HCBS programs may be one instance in which offering people greater choice also helps reduce costs.*"[1]

Over the last few years, however, rates for home- and community-based services have been frozen. During that time, not only have costs increased, the medical environment – including regulations, technology, and client expectations – has shifted dramatically. These shifts threaten the continued viability of the hundreds of HCBS providers, primarily private businesses that employ thousands of Alaskans in every region of the state.

Home and community based services are the key to helping our seniors and those living with developmental disabilities live their lives as productive members of our communities while controlling the growth of health care costs. Without the regular review process in Senate Bill 32, many providers will be forced out of business and HCBS services will be taken away from thousands of Alaskans across the state.

SENATE MAJORITY LEADER
JOHNNY ELLIS

EXPLANATION OF CHANGES – SENATE BILL 32

SB 32 – An Act relating to medical assistance payments for home and community-based services and provision of personal care services in a recipients home; and providing for an effective date.

Both the Senate Health and Social Services Committee and the Senate Finance Committee adopted committee substitutes for SB32 which made the changes outlined below. The Senate Finance Committee CS was passed unchanged by a unanimous vote on the Senate floor, and approved without amendment by the House Health and Social Services Committee. All page and line references are to the current (Senate Finance CS) version of the bill.

1) Section 1 – page 1 line 5 through page 2 line 21
   a. S HSS: The language in section one was moved to create a new section of statute, AS 47.07.069. The bill as originally introduced amended AS 47.07.070 and AS 47.07.074. This change was to alleviate the concern of hospitals and nursing homes that the current rate review process they participate in would not be affected, and the concern of both the Department of Health and Social Services (DHSS) and the home and community based service (HCBS) providers that the audit and cost monitoring process would not be subject to the strict federal rules that apply to the hospital and nursing home rate review process.

2) Section 1 – page 1 line 5 through page 2 line 21
   a. S HSS: Added personal care services and assisted living homes for vulnerable and needy adults to the services that would be covered by the rate review process. As originally drafted, the bill only applied to home and community-based services provided under a Medicaid waiver. Most HCBS providers take part in all three services, and applying the review process to their entire clientele would make the process easier to participate in.
   b. S FIN: Removed assisted living homes for vulnerable and needy adults to the services covered. These services are funded through general relief medical, and the services remaining (including some assisted living home services) are funded through Medicaid.

3) Section 1 – page 2 line 5
   a. S FIN: Changed the requirements that rates be "based on" cost to rates that "consider" cost. This change allows DHSS to develop a less complex rate review process that cut the costs of administration for the Department and the costs of accounting and

compliance for the providers and Medicaid, while at the same time preserving the intent of the legislation. This and the other related changes (#3, 4, 5, and 6) cut the administrative fiscal note by over 90% from $3.8M in FY11 to just $360,000.

4) Section 1 – page 2 line 6 and 15-16
   a. S FIN: Replaced the phrase "reasonable costs related to patient care" with a requirement of "periodic cost surveys, to be conducted at least once every four years." The previous phrase is used to define the more complex rate review process used by hospitals and nursing homes, and this is another change that allows for a more flexible system.

5) Section 1 – page 2 line 8
   a. S FIN: Removed the qualification that audits and cost reports be done under the requirements of AS 40.07.074, the rate review process currently used by hospitals and nursing homes. This is another change related to the more flexible and lower rate review system needed for HCBS providers.

6) Section 1 – page 2 lines 10-12
   a. S HSS: Added the home health agency inflation rate to the calculation used to determine rates. As originally drafted, the bill only considered the cost of services. This addition allows DHSS to develop a less complex rate review process that cut the costs of administration for the Department and the costs of accounting and compliance for the providers and Medicaid.

7) Section 2 and 3 (of S HSS CS)
   a. S HSS: Conforming language to amend statutes regarding assisted living homes for vulnerable and needy adults (see change #2 above).
   b. S FIN: Deleted (see change #2 above)

8) Section 2 and 3 – page 2 line 22 through page 3 line 6
   a. S HSS: Required a report to the Legislature detailing trends in rates as the rate review process in the bill was implemented, and sunsets the report in 2014. Concern was expressed about the effect a cost-based review system would have on rates, and the report was a way to keep the Legislature informed as the new system went into place. The report was sunsetted after 2014 because by that time, the review system would be fully operational and an annual report would be superfluous.

9) Section 4 – page 3 line 7
   a. S HSS: Added a delayed effective date of July 1st, 2011. The original bill had no effective date. DHSS asked for the additional time to develop a rate review process that would fairly include the wide variety of providers.

ANALYSIS: *(Attach a separate page if nece*

The bill requires DHSS to set rates for home and community-based services and personal care under the Medicaid program by regulation. DHSS is to review the rates annually and subject to legislative appropriation and available federal funds, set rates that consider the results of periodic provider cost surveys, at least once every four years, audit and inspection reports, and the Home Health Agency Market Basket data (an annually published inflation factor for a related service) are also items required for consideration in rate setting under the bill.

Providers are required to participate in cost surveys, and allow DHSS access to client records and any state or federal audits or inspections.

(continued on page 2)

Prepared by: William J. Streur, Deputy Commissioner
Division: Health Care Services
Phone 907-269-7827
Date/Time 4/14/10 12:00 PM

Approved by: Alison Elgee, Assistant Commissioner
DHSS Finance & Management Services
Date 4/15/2010

ANALYSIS CONTINUATION

This statute would affect appoximately 350 businesses who are providers of home and community based services (HCBS), including residential living services. These services are delivered under four Medicaid waivers: Adults with Disabilities, Children with Complex Medical Conditions, Mental Retardation/ Developmental Disabilities, and Older Alaskans. Expenditures for these waivers in FY2008 were $141.5 million. This bill would also affect an estimated 52 businesses not included above that provide personal care services. Expenditures for personal care services in FY2008 were $72.3 million. Total costs in FY2008 that would be subject to the rates is $213.8 million.

Current rates for Medicaid home and community-based services are not subject to regular review and adjustment to costs. Rate increases have been sporadic and have not grown with inflation.

This bill would require the review those rates annually and set rates based on provider cost surveys, audits and inspections, and inflation. DHSS recognizes that any increases in provider rates under this legislation are subject to appropriation; however, the estimates in this fiscal note reflect the funds DHSS would need to request in order to comply with the bill.

ESTIMATED RATE ADJUSTMENT

The department has worked with expert consultants and prepared a draft design of a new reimbursement system for home and community based providers which would meet the requirements of SB32. The new reimbursement system proposal is based on historical costs with inflation as required by SB32. The proposal phases rates in from current levels to an average cost level after 4 years. The consultants have modeled the cost of implementing the newly designed system effective July 1, 2011 and the cost increases from state fiscal year 2010 are estimated for 2012 (yr 1) at $18,339,601, for 2013 (yr 2) at $30,025,677, and for 2014 (yr 3) at $44,537,582. If the department pursues this methodology, a rebasing to actual costs would likely occur in 2014, which could affect the cost estimate to an unknown extent during 2014. All of the rate models are based to some extent on costs, however, so the department wouldn't expect potential differences in 2014 projections to be material. After the rebasing, rates would increase according to projected inflation (current projection 2.1%) for 4 more years. SB 32 has an effective date of July 1, 2011.

FUND SOURCE

Costs are eligible for the federal medical assistance percentage which is projected to be 50% in FY2012 and beyond.

ANALYSIS: *(Attach a separate page if nece*

The proposed legislation amends AS 47.07 to add payment rate provisions for Medicaid providers of personal care services and home and community-based services. This legislation would require the Department to review rates annually and set rates considering periodic cost surveys and the Centers for Medicare and Medicaid Services' home health agency inflation rate. The effective date is July 1, 2011.

STATE OF ALASKA

2010 LEGISLATIVE SESSION

BILL NO. CSSB032(FIN)

ANALYSIS CONTINUATION

Under this legislation, the Department would periodically survey providers to obtain cost information. There are approximately 350 home and community-based service providers , including assisted living homes, and an additional 50 personal care providers. Beginning in FY2010, the Department would need to begin developing cost surveys and providing training and technical assistance to providers as they modify their accounting systems to be able to respond to the surveys. The department needs to be able to provide this assistance to providers, so there is clear understanding of the information needed and clear definitions of cost centers; otherwise, it is likely that providers will be unable to provide accurate survey responses.

The Department would also perform some review and inspection of survey information to ensure accuracy before using survey data to set rates. Staff positions would be necessary to oversee the surveys and conduct rate setting operations. These positions are included in the FY2011 operating budget.

Alaska State Legislature

Official Business, State Capitol, Juneau, Alaska, 99801

Secretary Kathleen Sebelius
United States Department of Health and Human Services
200 Independence Avenue SW
Washington, D.C. 20201

August 5, 2009

Dear Secretary Sebelius,

We write today to urge the Center for Medicare and Medicaid Services (CMS) to lift the moratorium on new applicants to Alaska's Medicaid waiver programs as CMS and our Department of Health and Social Services work together to resolve the underlying problems in these programs. Too many of Alaska's most vulnerable citizens will be hurt if these services are put on hold. In turn, we commit to working with CMS and DHSS to implement any statutory changes that would help these programs continue to serve as the most cost-effective, least restrictive form of care for disabled and elderly Alaskans.

We recognize the severity of the problems CMS identified with Alaska's waiver services, and have struggled with some of these issues for years. In fact, this past year, Senate Majority Leader Johnny Ellis introduced Senate Bill 32, which would create a fair and predictable system of rate reviews for home- and community-based service providers, one of the major issues raised by the CMS audit.

The bill is poised to move quickly in the next legislative session, having passed the Alaska Senate unanimously. This legislation holds bi-partisan co-sponsors in both houses of the Alaska Legislature. Senator Ellis has pledged to work with all parties involved, and has offered up his legislation as a vehicle for additional statutory changes that may become necessary during this process.

We hope that our willingness to work with you will be a sign of good faith – Alaska's disabled and elderly populations need us to work together to solve this problem, and can't afford to wait any longer.

Sincerely,

Senate Majority Leader Johnny Ellis

Senate President Gary Stevens

Senator Dennis Egan

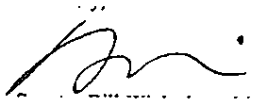
Senator Hollis French

Senator Linda Menard

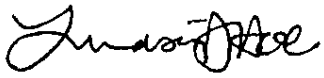
Senator Donald Olson

Senator Joe Paskvan

Senator Joe Thomas



Senator Bill Wielechowski



Rep. Lindsey Holmes

Representative Beth Kerttula

DEPARTMENT OF HEALTH & HUMAN SERVICES

Centers for Medicare & Medicaid Services

Region 10
2201 Sixth Avenue, MS/RX 43
Seattle, Washington 98121

AUG 19 2009

The Honorable Johnny Ellis
Alaska State Legislature
Official Business
State Capitol Room 103
Juneau Alaska, 99801

Dear Senate Majority Leader Ellis:

Thank you for writing to Secretary Sebelius regarding the Alaska home and community-based waivers that serve disabled and elderly beneficiaries. The Secretary has received your letter of August 5, 2009, and has asked that I respond to you on her behalf. We share your concern about the waivers and the need to resolve the outstanding issues as quickly as possible so the State can resume enrollment of beneficiaries.

On July 31st, the Centers for Medicare & Medicaid Services (CMS) clarified its position on the moratorium as it relates to personal care services. As a result, Medicaid beneficiaries will be able to receive personal care services, which will help them remain in their homes and communities. CMS is working closely with State officials to identify the most expeditious ways to resume waiver services to beneficiaries, while ensuring that those services are provided in an environment that assures beneficiaries' health and welfare.

CMS is pleased to see the responsiveness from the Alaska Department of Health and Social Services in recent weeks to expedite resolution of some of the issues of concern. Specifically, State officials identified a job recruitment strategy that allows a wider range of health care professionals to apply for the vacant evaluator positions. Filling these vacancies with qualified staff should help the State eliminate the backlog in evaluations and re-evaluations, which was one of the reasons for the imposition of the moratorium.

I sincerely appreciate your interest and willingness to respond to the health and welfare needs of Alaska's Medicaid beneficiaries, including your willingness to make possible legislative changes that may be required to address some of the issues with the waivers. This will certainly help expedite the process if state laws are needed to be changed.

Please know that the Department of Health and Human Services and CMS are committed to moving the process forward with speed and attention to the needs of our most vulnerable beneficiaries.

If you have any questions, please feel free to call me at (206) 615-2267. I will also provide this response to the co-signers of your letter.

Sincerely,

Barbara K. Richards
Associate Regional Administrator
Division of Medicaid and Children's Health Operations

FAX: (907) 465-1398

December 8, 2009

Senator Johnny Ellis
716 West 4th Ave. Suite 500
Anchorage, AK 99501-2133

Dear Senator Ellis:

The Alaska Commission on Aging (ACoA) is pleased to present to you our FY2011 legislative priorities for the upcoming session. These top issues were identified with input from older Alaskans, family caregivers, providers, and senior advocates statewide. The ACoA is a state agency under the Department of Health and Social Services, established in 1982. Our charge is to plan, educate and advocate on behalf of all older Alaskans (persons aged 60 years and older) through inter-agency collaboration so that Alaska seniors/elders may lead useful and meaningful lives with dignity and independence and have access to quality services when seniors need them to remain safely in their homes and chosen communities for as long as possible.

1. **Establish a regular and periodic schedule of rate reviews for home- and community-based services** that serve persons who are Medicaid-eligible and meet nursing home level of care. This measure will promote ongoing awareness of the true costs of providing services. SB 32, sponsored by Senator Johnny Ellis, passed the Senate and the House Health and Social Services Committee last session and waits to be scheduled for a hearing in House Finance. ACoA encourages passage of this legislation.

2. **Eliminate, or alternatively, adjust the cap on adult dental services reimbursed by Medicaid** to provide program benefits that keep pace with higher health care costs due to inflation, and **allow Medicaid patients access to two-years program benefits in a single year** to permit scheduling of treatment around the oral health care needs of the patient. The current law places a statutory $1,150 limit on dental health care expenditures per eligible client. When the Medicaid Adult Dental program was created in 2005, this amount was sufficient to pay for one half of a set of dentures, either an upper or lower, with the idea that a patient who needed dentures could have both sets if the treatment was scheduled around the turn of the fiscal year. Although health care costs continue to rise, the cap has not been increased in three years. Allowing Medicaid patients access to two years of program benefits in a single year furnishes Alaskans and their dentists the flexibility needed to provide treatment addressing oral health emergencies that can occur at any time.

3. **Provide increased operating and capital funding to establish an Alaskan Public Transportation Fund for operations of local coordinated transportation systems** which the State can use to leverage additional federal funds to improve accessible, affordable transportation for older Alaskans, persons with disabilities, low-income individuals, youth and others without access to transportation so that Alaskans with special needs may have greater access to employment and community participation opportunities. According to the Governor's Coordinated Transportation Task Force Report (2009), Alaska is one of only three states in the nation that does not provide any specific state funding for public transportation.

4. **Provide operating funding to enhance the Aging and Disability Resource Centers**, administered under the Division of Senior and Disabilities Services, to streamline access to more efficient information and referral services by providing eligibility screening, options counseling, and assessments so that Alaskans can make informed decisions and have access to long-term care services through a "one-stop shop," reducing confusion and program fragmentation.

5. **Return to the original wording of AS 47.07.020 (b) (6), the Medicaid statute establishing income eligibility for persons requiring nursing home level of care, referencing 300% of the maximum Supplemental Security Income (SSI) benefit rate rather than the current frozen dollar amount ($1,656 a month) to reflect changes in cost of living** so that seniors and other Medicaid-eligible persons will not be disqualified for services, including home- and community-based waiver services, due to small increases to their Social Security and other benefits. The amount of $1,656 is the monthly amount of 300% of SSI in 2003. The 2009 income equivalent is $2,022 monthly.

We also want to take this opportunity to share with you highlights from the Alaska Elder/Senior Community Forums that we hosted in Kotzebue (August) and Anchorage (December) to increase understanding about the issues that are of most importance to older Alaskans and to identify unmet needs. These forums, to be held in other locations statewide in the coming year, are being conducted to gather public input that will be used to develop the next Alaska State Plan for Senior Services, FY2012-2016. This document, prepared every four years, provides the State with a guide for delivering senior services and meets the requirement of the U.S. Administration on Aging for the state to access funding from the Older Americans Act which provides federal funding for a range of senior programs. Although these forums will be ongoing, Anchorage and Kotzebue participants identified the following issues as the most important:

- Provide improved access to quality and affordable health care, long-term supports that include home- and community-based services in communities where older Alaskans live, and promote disease prevention and wellness programs;
- Promote financial security, increase affordable senior housing, and improve elder safety;
- Provide safe, dependable, and affordable coordinated community transportation services so that seniors/elders can get to medical appointments and remain actively engaged in their communities;
- Enhance information and assistance services to help individuals access long-term support services and make informed decisions regarding their care.

Upon retirement, more seniors are choosing Alaska as their lifelong home to be close to family, friends and the unique Alaskan lifestyle. For the first time, Alaska is now the state with the fastest growing senior population, according to the U.S. Administration on Aging (2008), replacing Nevada, which held that position for many years. Alaska is home to approximately 80,000 persons aged 60 years and older who comprise about 12% of the state's population (Alaska Department of Labor). Alaska's senior population is expected to increase by four to six percent each year through 2020, as baby boomers become of age, by which time the total number of seniors will grow by almost 64 percent. The oldest Alaska seniors, 85 and older, are expected to triple during the next 25 years, vastly increasing the number of Alaskans living with Alzheimer's disease and related disorders.

Please feel free to contact Denise Daniello, ACoA's executive director (465-4879 or denise.daniello@alaska.gov) for additional information about these issues or with any questions concerning Alaska's senior population.

The Alaska Commission on Aging will be meeting in Juneau February 10th-12th, 2010 and hopes to schedule a meeting with you to discuss our priorities in person. We look forward to working with you this legislative session. We appreciate your consideration of these advocacy priorities and thank you for your support of services for older Alaskans.

Sincerely,

Sharon Howerton-Clark
Chair, Alaska Commission on Aging

Sincerely,

Denise Daniello
ACoA Executive Director

INSIGHTS

Different needs. One dream.

Alaskans with Disabilities Held Hostage by Medicaid Moratorium

- More than 2,000 people kept waiting for critically needed assistance
- Solution is at least six months away

The Arc was helping 21 families with the paperwork that would finally allow them to receive services when the state of Alaska announced a moratorium on new cases. A federal audit of Alaska's Medicaid program revealed deficiencies of such significance the federal government has forbidden the state to sign up any new people or process applications until improvements are made.

The federal Centers for Medicare & Medicaid Services made the announcement June 26. The two programs involved are the "Home and Community Based Medicaid Waivers" and "Personal Care Assistance." Almost 2,000 people were initially affected. The moratorium on personal care services was lifted August 10, but the freeze on community-based services remains.

Community-based services help Alaskans who experience disabilities with the activities of daily life, including in-home care for medically fragile children, renovations to make homes wheelchair accessible, job training services, and residence in group homes or assisted living homes.

"Most people agree with the federal audit's findings," said Executive Director Gwen Lee. "There are problems with the state's management; but the moratorium hurts the people the program is supposed to help. Surely they could have found a better way to move the state into compliance."

The state says it will take at least six months to satisfy federal requirements. Meanwhile hundreds of Alaskans who are otherwise eligible for these services will remain in limbo. Until then, families and non-profit organizations like The Arc are struggling to bridge the gap.

Community Living Services Team Leader Katrena Betts (left, with balloon) spent her lunch hour marching in support of families affected by the moratorium.

Rally Protests Harsh Remedy

- Federal response to state's management problems hurts Alaskan families, especially those with disabilities

On the day the federal moratorium ended for the state's personal care services program, which affects predominantly elderly Alaskans, Alaskans with disabilities took to the streets to protest the continued moratorium on the program that provides them with the assistance they need to lead ordinary lives.

State Sen. Johnny Ellis (D-Anch) and state Rep. John Harris (R-Valdez) addressed the crowd of several hundred. The administration must craft short-term solutions to get the moratorium lifted, but the two legislators pledged to continue working on long-term legislative solutions to the management problems that precipitated the federal sanction.

Ellis introduced SB 32 last year to reform the state's process for paying for the services non-profit organizations provide people with disabilities. His staff is working to resolve concerns of key legislators in hopes of quick passage when the legislature reconvenes in January.

Jerry Stoops and Individual Service Provider Pedro Ramirez joined several hundred people protesting the federal moratorium that prevents people from enrolling or even applying for disability services.

Medicaid Moratorium to Baby Charlie: Sorry, Fella

- While bureaucrats dither, giggly 18-month old waits for diapers, clothes, blankets
- The Arc throws his sacrificing foster family a baby shower, but your help is needed, too

In many ways, Charlie seems like a typical 18-month old child. He's a happy little boy. When he hears his foster dad's voice in the hall, he giggles so hard his crib shakes.

Until two weeks ago, however, Charlie's crib was in a hospital, where he had spent every day of his life. He has chronic lung disease, motor and vision problems, and growth insufficiency syndrome. He has no pituitary gland.

His biological parents are unable to care for him, so The Arc's nurses asked Mary and Robert Rupe to be his foster parents. The Rupes' adopted daughter, Kathryn, 7, was born with multiple disabilities and receives services at The Arc. And Mary Rupe is a licensed practical nurse, which makes her a natural choice for medically fragile children, for whom it is often difficult to find qualified foster homes.

Mary had several job opportunities, but once she met Charlie, she was smitten. She and Robert started the licensing process for foster parents; then they and their two teenage sons went through extensive training specific to Charlie's needs.

Everything was moving ahead just fine . . . and then the Medicaid moratorium was announced (see story on page 1).

Charlie is one of hundreds of Alaskans caught up in the state and federal government's disagreement over management of the Medicaid system. Until that is resolved, the state is prohibited from taking new cases or even accepting applications for community-based services to people who experience disabilities.

Despite the setback, The Arc and the Rupes were determined to bring him home as scheduled on August 5. "He's already waited eighteen months," said Lynne Stevens, one of The Arc's staff nurses. "He shouldn't have to wait another six months for the state to comply with the federal government's requirements."

The moratorium does not affect payment for medical equipment like the g-tube, trach, and ventilator. And Charlie will still be able to see his doctors and get medical treatment. That's the good news.

The bad news is that the state will not be paying the stipend for medically fragile children until after the moratorium ends. That means the Rupes have to come up with the money right now to pay for Charlie's basic needs like diapers, clothes and blankets. The second income Mary could be earning as a nurse is not available, so the whole family will make sacrifices. The Arc's staff chipped in for a baby shower.

Finally, on August 8, surrounded by his team from The Arc, the Rupes took Charlie home. Kathryn and her brothers are overjoyed with their new brother and Charlie couldn't be happier.

Kathryn Rupe welcomes foster brother Charlie into the family. Charlie's homecoming would have been set back by the Medicaid moratorium but for the Rupes' determination not to let bureaucracy interfere with Charlie's best interests.

Help Charlie!

If you'd like to help 18-month old, medically fragile Charlie and the Rupe family, his foster parents, here's the wish list.

To donate, simply contact Katie Shurosky, Care Coordinator, at 277-6677. We'll take care of the rest.

- Winter clothes (size 18-24 mo.)
- Clothes (size 18-24 mo.)
- Blankets
- Diapers (size 18 lbs.)
- Baby wipes
- Desitin
- Diaper genie
- Diaper bag
- Bumpo tray
- Jumparoo
- Inflatable bathtub
- Burb cloths
- Aveno baby wash and lotion
- Baby thermometer

A Nail-Biting Happy Ending for One Family Caught in the Moratorium

- With dad being deployed and mom too petite to lift his breathing equipment, premie's future looked horribly uncertain
- Secondary insurance, an option not available to many affected by the moratorium, was persuaded to fill the gap left by Medicaid freeze

Eddie Murray and his family are among the fortunate ones.

Eddie, now four months old, was born prematurely. He needs an oxygen concentrator to help him breath, as well as cardiac and apnea monitors. He would probably qualify for Medicaid as a "child with complex medical conditions," but the federal moratorium prevented The Arc's nurses from sending in his application.

Eddie's family lives in a two-story house on base. The oxygen concentrator weighs fifty pounds and until now, Eddie's dad has been around to move it up and down the stairs. But the Army is deploying Dad at the end of August.

Eddie's mom is petite; carrying fifty pounds around each time Eddie was moved put her at risk of a back injury or a fall.

Without the moratorium, Medicaid would have paid for a solution that would keep both mother and child safe. For several weeks after the moratorium was announced, the family struggled to find an answer before Dad leaves.

Luckily, the family was able to persuade Tri-Care, the insurer for military families, to buy a second concentrator. With one upstairs and the other downstairs, Eddie's mom can move him without risk.

It was a relief for all concerned; but there are many families who cannot rely on other insurance for the help they need while the moratorium continues. For them, a happy ending might be a long way off.

IN SIGHTS

Different needs. One dream.

Still waiting for Juneau's approval: Rate reform and other "corrective actions" Medicaid officials demand

- 289 stalled applications from desperate families are now (finally!) moving forward again, including 21 here at The Arc
- Up for debate: Legislative bill SB 32, "absolutely critical to the long-term survival" of The Arc and other non-profits

"We're thrilled that families can get the help they need, and of course, that's the most important part of the story, said Ms. Lee. "But there's another part of this story: the silent crisis of Medicaid rates that don't reflect what it actually costs The Arc to provide those services."

The corrective action plan acknowledges this problem and promises to fix it. Resolution will require legislative action. SB 32, introduced last session by Sen. Johnny Ellis (D-Anc), provides for annual review of the reimbursement rates, similar to those already enjoyed by hospitals.

"SB 32 is absolutely critical to the long-term survival of not-for-profit service providers," said Dave Falsey, Board Vice President. "It's also imperative to do something in the short term to fix the problems caused by a six-year freeze on rates."

When the Medicaid moratorium began last summer, 21 families served by The Arc went into limbo, unable to get urgently needed funding for disability services. The federal government ended the controversial moratorium on community-based services in August.

For those 21 families, the two-month moratorium was a long wait. They can breathe a sigh of relief now that their applications are moving forward again. When the moratorium ended, 289 people statewide had applications on hold—people desperate for services.

"What this means is people who were stuck can now get services," said Executive Director Gwen Lee.

The moratorium put a hold on new applications for community-based services for Alaskans experiencing disabilities or serious health issues. The alternative is long-term hospitalization, a nursing home, or other facility – which is more expensive and less attractive to people, who generally prefer living at home.

Call Chris at 777-0340 to join our Action Brigade for SB 32.

We'll alert you when it's time to contact your legislators.

Troubled Alaska health programs face federal restriction

IN-HOME CARE: Lawsuits, huge case backlog prompt moratorium on applications.

By LISA DEMER
ldemer@adn.com

(07/14/09 22:11:34)

State programs intended to help disabled and elderly Alaskans with daily life -- taking a bath, eating dinner, getting to the bathroom -- are so poorly managed, the state cannot assure the health and well-being of the people they are supposed to serve, a new federal review found.

The situation is so bad the federal government has forbidden the state to sign up new people until the state makes necessary improvements.

No other state in the nation is under such a moratorium, according to a spokeswoman for the federal Centers for Medicare & Medicaid Services.

In the meantime, frail and vulnerable Alaskans who desperately need the help are struggling. One elderly woman is stuck in a nursing home, for lack of care at home. Another woman, suffering from chronic pain and fatigue, said she's so weak, she often can't even pop dinner into the microwave.

The moratorium is expected to last four or five months. State officials estimate about 1,000 Alaskans will be affected.

A particularly alarming finding concerns deaths of adults in the programs. In one 2 1/2 year stretch, 227 adults already getting services died while waiting for a nurse to reassess their needs. Another 27 died waiting for their initial assessment, to see if they qualified for help.

The programs at issue provide in-home help for thousands of Alaskans with the basics of life, from medication to meals. The goal is to help people stay in their own homes rather than go into nursing homes or other institutions.

The services are paid for by Medicaid, the state-federal health program for the poor and the disabled, and overseen by the state Division of Senior and Disabilities Services. Individuals qualify based on income and need. Private contractors do most of the work. The programs cost about $250 million this year, with the federal government currently paying 61 percent of the bill.

Two broad categories of programs are at issue: One, providing just personal care, serves 3,200 people and the other, with a broader range of services including home health care, helps about 3,800 through what are known as Medicaid waivers. Some clients get help through both types of program.

Division officials on Tuesday acknowledged serious problems, including a backlog of about 2,000 people waiting for a nurse assessment to determine what services they need. They said fixes are coming.

People in the programs are well served, the officials say, once they are signed up for services. They claim it's mainly a paperwork and documentation problem.

"We do believe that quality care is happening in Alaska. Our system for getting that information is not well established. That's what we have to fix," said Rebecca Hilgendorf, director of senior and disabilities services.

One person waiting for her assessment is 80-year-old Esteen Knights-Thomas, who has been at Providence Extended Care most of the last month. She is recovering from an incident in Pennsylvania when her legs were scarred by acid from a strong insecticide used in her rented apartment, her daughter said.

Knights-Thomas said Providence is very nice, but "I would rather be at home with somebody helping me."

For one, she'd like to eat what she wants. "Here you can't do that. You have to eat what they give you," said Knights-Thomas, who also is blind in one eye.

Her daughter La Verne Jones, 60, can't provide the care herself. She can barely get around, suffers from a rare eye disease, and is overdue for a hip replacement. She was approved for personal care services before the moratorium, but that help can't extend to her mother.

In March, the state told officials with the federal Centers for Medicare & Medicaid Services about the huge backlog of people waiting to be evaluated.

"That was the first red flag that went up for us, that something was going on there that was not meeting our expectations," said Mary Kahn, a spokeswoman for the federal agency.

"Rather than continue to let the state admit more and more people into what we believe has been a poorly managed system, we just said hold the phone, we're going to try to find other ways to serve these people," Kahn said. "And we're going to stop enrollment in this program because we are quite concerned."

State officials said some private agencies in Alaska provide similar services through grant funding. But advocates say those services are very limited.

Another sign of trouble for the feds: eight lawsuits against the state division.

Most were brought by the Northern Justice Project, a private civil rights firm created in 2006 to pursue class action suits and other big cases.

"I think the lawsuits reflect that these two programs are and have been run incompetently for some time," said Jim Davis, one of the partners and founders of the justice project.

The common thread in the suits is that seniors and disabled Alaskans aren't getting the services they are entitled to, under the law, Davis said. In one big win, the state Supreme Court ruled last year that the state had improperly cut off or reduced services to more than 1,000 needy people.

State officials say they are trying to settle those lawsuits.

As to the backlog, most of the people waiting for an assessment already are getting services but are overdue for their annual check by a nurse to see if they need more or less help, state officials said.

An earlier attempt to reform the personal care assistance program may have inadvertently created some of the current trouble. After costs soared from $8 million a year in fiscal 2000 to $80 million five years later, the Legislature ordered the state Department of Health and Social Services to control the spending. The state eventually decided to hire its own nurses to

determine who needed how much care. The cost of that program dropped.

But a nationwide nursing shortage means about 40 percent of the nurse positions stay vacant, hence the backlog, said Marcy Rein, chief of programs for senior and disabilities services.

The state now is looking into allowing other types of professionals, including clinical social workers, to do the assessments -- something the feds say it should have already done.

State officials say a new project manager starts work Thursday to oversee improvements. They also are working to update the division's data collection system.

Doctors and other health care providers wrote to the Centers for Medicare & Medicaid with concerns that the state wasn't responsive. Some alleged that the lack of state controls "has resulted in the death(s) of the active clients," the federal review said.

While the people served are frail and suffer from chronic health issues, the state never investigated to determine if any failure in service contributed to the deaths, the federal review found.

"Thus, if someone passed away because a (personal care assistant) did not show up, for example, there was no indication this would have been reported or investigated," the report said.

The state plans to start doing fatality reviews.

Davis, the attorney who has brought many of the suits, said he doesn't believe people are dying because of poor quality care or abuse. While the state doesn't allow as many hours of care as people need, he said, the care itself is good. The multitude of private contractors makes the field competitive, and clients can switch providers if they aren't satisfied, he said.

Federal officials conducted their "focused review" in May and notified Health and Social Services Commissioner Bill Hogan of the moratorium in a June 26 letter.

Feds crack down on Alaska home care programs

Moratorium bars new participants until problems solved

Wednesday, July 15, 2009
By Pat Forgey | **JUNEAU EMPIRE**

The federal government is barring Alaska from accepting more of its frail and elderly residents into its home and personal care services programs until the state shows it can fix a series of problems that may be endangering seniors.

Alaska Senior and Disability Services Director Rebecca Hilgendorf acknowledged problems at a press conference Tuesday, but said the state was already on its way to addressing those issues.

"Some of them are absolutely correct," she said. "We want to make improvements."

A lack of staffing, especially in the number of nurses who assess prospective clients for home health services and monitor care, has been hampering Alaska. The home care program has a 40 percent vacancy rate, said Marcy Rein, chief of SDS programs.

Money is available in the state budget, Hilgendorf said, but a nationwide shortage of registered and licensed nurses has made hiring in Alaska particularly difficult, she said.

What Hilgendorf did dispute was whether anybody had been hurt by the lack of care or supervision.

"We believe there is a very good quality of care being given to Alaskans," Hilgendorf said.

It is unclear what impact the understaffing has had. The CMS review noted that from October, 2006 to May 2009 there had been 27 deaths among people waiting for initial assessments, and 227 deaths among those waiting to be reassessed.

Alaska officials said they don't know if any of those deaths were caused by inadequate care, but had not done the mortality studies that would help answer that question.

Federal regulations require Alaska to have necessary safeguards in place to protect the health and welfare of the recipients of services, said Barbara Richards, associate regional administrator for the federal Centers for Medicare & Medicaid Services (CMS), in a letter to Commissioner Bill Hogan of the Department of Health and Social Services.

"The Alaska State Medicaid Agency has not provided CMS sufficient assurance that those necessary safeguards are currently in place and/or being followed," Richards wrote.

A hiring freeze instituted earlier this year by Gov. Sarah Palin as a cost savings measure delayed some hiring, Hilgendorf said, though some hires were granted waivers.

Hilgendorf said that while some nurses were hired elsewhere while awaiting waivers, that happens

sometimes in the highly competitive world of nurse recruiting anyway and can't be directly linked to the freeze. Palin lifted the freeze June 1.

The state has taken new steps to boost hiring, Rein said, including advertising on Yahoo.

State officials say they expect the backlog of assessments for service eligibility to be resolved in four to five months.

While the federal moratorium will bar new people from the programs, it will not affect the several thousand people already in it, Hilgendorf said.

Alaska has waivers from federal authorities to provide frail and elderly residents with community and home-based care, and keep them out of expensive nursing homes and hospitals.

The home and community services can also help move people out of spendy specialized facilities, freeing up space for those with greater need.

Half the cost of those programs is picked up by Medicare and Medicaid, which must approve how Alaska manages its programs.

Alaska began using nurses in 2007 to do assessments, replacing a system in which assessments were sometimes done by those who would be doing care, setting up a conflict of interest.

Using nurses in its employ to do the assessments provided significant cost savings, Hilgendorf said.

FOR IMMEDIATE RELEASE: August 5, 2009

LEGISLATORS URGE FEDS TO END MEDICAID MORATORIUM

Offer Ellis Bill as Vehicle for Comprehensive Solution

ANCHORAGE – Today 11 Senators and Representatives of both parties sent a joint letter to Secretary Kathleen Sebelius of the US Department of Health and Human Services asking her to lift the moratorium on new applicants to Alaska's Medicaid waiver services in the wake of an unsuccessful audit by the federal Center for Medicare and Medicaid Services (CMS). In recognition of the seriousness of the problems discovered by the CMS audit, and as a sign of their commitment to finding a long-term solution, the legislators noted an existing bill, Senate Majority Leader Johnny Ellis' Senate Bill 32, which partially addresses the issue and could be revised to encompass further changes if necessary.

"Home and community based services have long been proven to be the most cost-effective and least-restrictive form of care," said Senator Ellis. "Unfortunately, over 2000 of Alaska's most vulnerable citizens are put at risk while bureaucrats in Washington and Juneau look for a solution. We can work together to solve this problem, and continue to serve our elderly and disabled friends and neighbors."

Senate Bill 32 passed the Senate on a unanimous vote, holds 12 co-sponsors from both parties in both houses of the Legislature, and awaits a hearing in the House Finance Committee when the Legislature returns to session in January.

###

3001

MUNICIPALITY OF ANCHORAGE

Department of Health and Human Services

907-343-6718

Mayor Dan Sullivan

SENIOR CITIZEN ADVISORY COMMISSION

February 9, 2010

The Honorable Johnny Ellis
State Capitol Room 103
Juneau AK, 99801

Dear Senator Ellis,

RE: Letter of Support for SB 32

The Municipality of Anchorage Senior Citizens Advisory Commission strongly supports the passage of SB 32, which provides for a regularly scheduled rate review for home and community based services similar to the annual rate review already in place for nursing homes and hospitals.

Many older Alaskans are receiving home and community based services which allow them to remain in their own home rather than in an institution. These services cost much less than the costs associated with the level of care provided in an institutional environment. However, the costs of providing care in any environment are continually on the rise. Reimbursement rates must be in line with rising costs.

As our Alaskan population continues to grow older, more home and community based services are needed. Service providers will not be able to stay in business if the costs outweigh the reimbursement rates, or they will have to serve fewer Alaskans, who require these services to maintain their independence as long as possible in their golden years. This is a workforce development issue for all Alaskans.

The Commission supports SB 32 and urges passage of this important legislation.

Respectfully,

Dawnia Clements, Chair
Senior Citizens Advisory Commission

Juneau, Alaska 99801-1182

RE: Support for Senate Bill 32 from the Alaskan Association of Homes for Children (AAHC).

Dear Senator Ellis,

On behalf of the membership of this Association, we thank you for your introduction of SB 32.

We support the development of a rate review mechanism for home and community based service providers as a necessary step to assure continued services to those in need throughout the state. Successfully conducting business within our agencies is contingent on a reimbursement rate that can keep up with inflation and cost of living. Employers in this arena currently struggle with recruiting and maintaining workforce within a fixed rate system. We hope this model of reimbursement will be applied to other providers delivering health care services in the future.

Please let us know if there is anything else our membership can do to support your legislation of SB 32.

Respectfully,

Brad Ohs
AAHC President

Dear Senator Ellis:

The Palmer Senior Citizens Center, Inc. (PSCC) wanted to express our sincere appreciation for your support and commitment to the seniors in the state of Alaska. PSCC supports your efforts to pass SB32 which will put into statute a regular review of home and community based waiver rates.

Thank you for making the time to meet with Kenneth Anderson, PSCC Board President, and Rachel Greenberg, Office Manager, on Tuesday, January 10th at 2:00.

The Palmer Senior Citizens Center, Inc. hopes that your busy schedule will allow time for you or your staff to visit us. Thank you again.

With Best Regards,

Kenneth A. Anderson
Board President

Alaska Behavioral Health Association

alaskabehavioralhealth.net

The Honorable Senator Johnny Ellis
State Capitol
Juneau, Alaska 99801-1182

Dear Senator Ellis;

I am writing in support of SB 32 on behalf of the membership of the Alaska Behavioral Health Association. The issues of rates and the mechanism and frequency of adjusting those rates are the primary issue for our membership this year.

We support the effort to put into place rate setting mechanisms for the home and community based services and that this model will be applied to the other providers that contract with the State of Alaska to deliver services. It is difficult to manage a business that is focused on delivering health care services when the cost for reimbursement does not keep pace with inflation and cost of living. Fixed costs don't go away and agencies have been trying to meet their grant obligations while keeping the business solvent. Employers are not able to offer competitive wage and benefit packages because of insufficient reimbursement rates.

Please let me know what else our members can do to support your legislation.
Thank you.

In Health,

Steve Horn
Executive Director

The Honorable Bettye Davis, Chair
Senate Health, Education and Social Services Committee
Alaska State Capitol, Room 30
Juneau, AK 99801-1182

RE: SB 32-Ellis--Support

Dear Chair Davis:

On behalf of the members of AARP in Alaska, we encourage you and your colleagues on the Senate Health and Social Services Committee to support SB 32, authored by your Committee colleague Senator Johnny Ellis and co-sponsored by you.

SB 32 would allow annual rate reviews of all home and community based services similar to the process for hospitals. Rates for HCBS services under Medicaid have remained the same for several years, discouraging needed providers from entering the field and forcing current providers to reduce their services and cut back on clients.

As we age, many of us would prefer to stay at home or with our families but sometimes we need extra help to do so. With the growing numbers of older people who need support to live on their own, private and public organizations now offer many different options to allow us to "age in place" in our homes and communities. These options form the continuum of home and community based services, ranging from meals on wheels to adult day care. In addition to meeting our personal preferences to remain home and in our communities, HCBS services are much less expensive than institutional care.

Younger persons with disabilities are also primary users of HCBS services to allow them to continue their education, work and participate as full citizens in their communities and with their families.

We cannot expect the providers of HCBS to continue to operate on rates often set years ago. It makes sense to review HCBS rates every year just as we do with hospitals.

AARP requests an "AYE" vote on SB 32.

Should you have any questions about our position, please feel free to contact me (586-3637) or Patrick Luby, AARP Advocacy Director (907-752-3314).

Thank you for your consideration.

Sincerely,

Marie Darlin

Alaska Mental Health Board

Governor's Council on Disabilities and Special Education

Alaskan Seniors Living Longer Growing Stronger

from the Alaska Commission on Aging

The TRUST

The Alaska Mental Health Trust Authority

Establish a Regular and Periodic Schedule of Rate Reviews for Home and Community-Based Services

The Governor's Council on Disabilities and Special Education, Alaska Mental Health Board, Advisory Board on Alcoholism and Drug Abuse and the Alaska Commission on Aging, in collaboration with the Alaska Mental Health Trust Authority, the Alaska Brain Injury Network and the Alaska Suicide Council, have identified the establishment of a regular and periodic schedule of rate reviews for home and community based services one of their four legislative priorities for 2009. Regular and periodic rate reviews, for both Medicaid and grant-funded services, are imperative to maintaining the systems of care that serve Alaska's most vulnerable populations. The provisions for this legislation are in SB 32, sponsored by Senator Ellis.

- Before last year's rate rebasing for FY09, most home and community-based services providers had been over a decade without a rate review or increase. This resulted in an erosion of the system, as frozen rates resulted in a diminishing pool of resources – reducing the quality and availability of services.

- In FY07, home and community based services were provided to nearly 57,000 people who would have otherwise been served by costly institutional or nursing home care.

- In order for the Department of Health and Social Services (DHSS) and the State of Alaska to create and maintain a 10-year fiscal plan that adequately budgets for the costs of home and community-based services, a schedule of rate reviews is necessary.

- Our system of care for Alaskans with special needs is based on a network of non-profit providers. Without adequate funding, our providers cannot continue to provide quality services. Without our providers, we have no system of care.

Overview

Home and community-based services include a wide range of Medicaid and grant-funded services for Trust beneficiaries and other vulnerable Alaskans. Mental health care, infant learning, personal care attendant services, assisted living services, senior care, substance abuse counseling, and services for Alaskans with developmental disabilities are all examples of services provided at home or in our communities. These services maintain individuals' quality of life and reduce the need for more costly institutional, emergency and nursing home care.

For more that 10 years, providers have struggled to meet the demand for services while maintaining an acceptable quality of service because there has been no structure for reviewing the rates paid for those

Senator Olson, member - Senate Finance Committee
Senator Thomas, member - Senate Finance Committee

I am writing this letter in support of SB32, a bill which I believe will strengthen Home and Community Based (HCB) Providers like Access Alaska and many others. We HCB providers form the backbone of Alaska's long-term care system. We HCB providers are not only the current backbone, but given our cost-effectiveness and desirability – consumers want to age in place – we are the state's answer to the long-term care dilemma.

Like hospitals and nursing homes, we are businesses with actual costs – we pay rent or mortgages, insurance, and personnel. As these costs have grown while reimbursement rates stay flat, our ability to pay workers a living wage has decreased to the point that in many communities, direct service workers can earn more working at a fast food restaurant than they can helping to care for our elders. This has limited our ability to attract workers and in some cases is creating a crisis in the long-term care system.

This is but one example of the ravages of the current rate-setting regime.

In the larger view, it is important to keep in mind that a strong HCB provider system is critical to the state's ability to meet the coming wave of long-term care users. Policy groups from the National Conference of State Legislatures to the AARP have all recommended states rebalance their Medicaid spending in favor of HCB and take advantage of new waiver and partnership opportunities, in order to meet the growing demand for Medicaid long-term care services. In many cases, Alaska has not taken advantage of these opportunities.

Alaska has the envious position of being one of the top states in the nation in terms of balanced spending between institutional (nursing home) care and HCB care. However, the system has been strained to the point of breaking over the last several years, primarily because of the inattention to Medicaid reimbursement rates. Therefore, it makes sense that the state should do everything it can to strengthen the system.

I believe SB32 goes a long way toward doing just that. We greatly appreciate your leadership on this issue and stand ready to support its passage and implementation.

Sincerely,

Jim Beck

February 3, 2009

Senator John Ellis
Senator Bettye Davis
via email

Dear Senator Ellis and Senator Davis,

I am writing to support SB 32, which establishes periodic rate reviews for home and community-based services. Ensuring consistent rate increases for providers enables less expensive care for the elderly and develops a workforce aimed at the medical field.

As the second largest provider of in-home care services, we are intimately familiar with the associated challenges. The cost of doing business has increased while rates have been flat. Without entrepreneurial incentive, providing direct care may rest on the more expensive option; state-managed assisted living facilities and state-managed skilled nursing facilities

Workforce development for the medical field starts with our in-home care staff. Our Personal Care Assistants (PCA's) can receive certification and provide low level care for the elderly. Many family members and college-age PCA's get their first glimpse at the medical field.

Thank you for your support of SB 32. Please contact me with any questions. My direct line is extension 104 at (907) 336-3365.

Best regards,

Brian Richardson

The Honorable Senator Bert Stedman
Alaska State Legislature
State Capitol Building, Room #516
Juneau, Alaska 99801-1182

Dear Senator Stedman:

Agenet, Alaska's Association of Senior Service Providers, would like to formally offer our support for your efforts to ensure the ongoing viability of long term care in the home and community by introducing Senate Bill 32. By including in statute the regular review of rates for services provided by home and community based providers, Alaskans of all ages who experience disabilities will have a much greater opportunity to continue to reside in their own homes and communities.

The members of Agenet appreciate your efforts to codify a process which will ensure that the long term home and community based system of care in this state remains vibrant and able to meet the increased demands for service in the future. Through passage of SB 32, the Alaska State Legislature and the Department of Health and Social Services will have the information necessary to plan for our growing senior population and the system of care which will be needed. Our thanks and appreciation and support are with you.

Sincerely,

Marianne Mills

AGENET'S 2009 Legislative Priorities

The Association of Alaska's Providers of Services to Older Alaskans

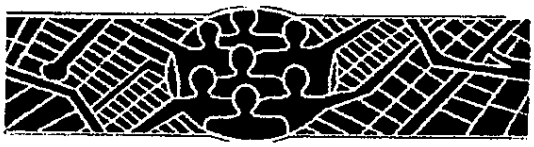
Contact Information: Marianne Mills (463-6154) or Ken Duff (262-6331)

1. Support legislation, such as SB 32, which would put into statute a regular review of Home and Community-Based Medicaid Waiver rates similar to the process for institutions (hospitals, nursing homes).

- Services available to persons eligible for the Home and Community-Based (HCB) waiver program include meals, transportation, chore, respite, care coordination, adult day services, specialized medical supplies/equipment and home modifications.
- These services are provided for a fraction of the cost of institutionalized care to older Alaskans in their own homes and traditional communities.
- Investing in home and community-based care is the most cost effective way to provide long-term care while supporting local communities throughout the state.
- Regular rate reviews will provide parity with hospitals and nursing homes which have had a similar statute in place since 1999.
- Regular rate reviews will provide a good management tool for the Department of Health and Social Services to determine program costs, budget adequately, and create a 10-year fiscal plan.

2. Work with the legislature to adjust grant rates with a $2 million increment for Family Caregivers, Nutrition, Transportation & Support Services grants.

- Senior grants help pay for home and community-based services for senior citizens who are not eligible for the HCB Medicaid Waiver program, services such as meals, rides, adult day, chore, respite, care coordination, and health promotion.
- Investing in senior grants upfront save millions of dollars the State would otherwise pay for expensive institutional care (nursing homes). In Alaska, the cost of one month's stay in a nursing home is $10,000-$20,000 per senior (compare this to a package of grant services for only $61 to $83 per month).
- Alaska's long term care policy is aimed at allowing Older Alaskans to remain at home for as long as possible; these grants help them remain at home, saving the state money, and also support the unpaid work of their family caregivers, work which has been valued at $534 million in Alaska.
- In July 2009, a regional funding formula will shift senior grant monies out of seven (of nine) regions of the State, jeopardizing local communities from providing much-needed services; this shift will happen even though senior populations in all regions are still increasing and as the costs for food, fuel and workers increase.
- The proposed $2 million increase in senior grants will help ensure that all regions of the State receive adequate funding to continue senior grant services so that seniors may remain in their traditional communities.



CENTER FOR COMMUNITY
700 Katlian Street, Suite B

RE: **Support on behalf of constituents in Sitka, Yakutat, Hoonah, Kake, Angoon, Wrangell, and Ketchikan, for SB 32**, "An act relating to medical assistance payments for home and community-based services."

Center for Community is a non-profit organization that provides personal care and home and community based services throughout the services throughout South East Alaska: with clients and employees in nearly every community from Yakutat to Metlakatla. In these communities, we employ a total of 71 Southeast residents and serve 113 Southeast clients at the current time (not counting Juneau).

Senate Bill 32 will cure a long-standing problem in Alaska's Medicaid system for long term care of our seniors and other children and adults with disabilities of all kinds. SB 32 will finally ensure that the Legislature and the Administration regularly receive information about the true cost of providing care to Alaskans--at home--who are trying to avoid more expensive institutionalized long term care. SB 32 gives everyone the information necessary to make both short term budgetary and long term policy choices.

Thank you for your introduction of Senate Bill 32. If we can do anything to further legislative support for passage of SB 32, please call upon us.

Sincerely

Co-Chairs Senate Finance Committee
Alaska State Legislature
Capitol Building
Juneau, Alaska 99801

March 2, 2009

Senators Stedman & Hoffman,

The Alzheimer's Disease Resource Agency of Alaska (ADRAA) formally requests your support of the CS for Senate Bill 32 which has just been referred to the Senate Finance Committee and is currently awaiting a hearing date. As you are aware, CSSB 32 would regulate rate review for medical assistance payments for home and community based (HCB) personal care services for providers working in personal and assisted living homes. Currently, no such review is regularly mandated for HCB or Assisted Living Care, although facility based providers such as nursing homes are reviewed regularly to keep up with the growing population served and accurate information regarding cost of care.

The Alzheimer's Resource of Alaska provides in home care services for individuals affected by Alzheimer's disease and related dementias and for frail elders. In FY08, we provided 57,452 hours of services statewide. The services provided include personal care, respite for family caregivers, and household chores such as meal preparation, snow shoveling, and chopping wood. It is the work of unpaid family caregivers as well as professional in home workers that allows elders to remain in their homes, and their communities rather than being placed in full time nursing care at great cost to the state.

ADRAA thanks the bill's sponsor and co-sponsors for their foresight on this issue and for their continued support of seniors across Alaska. We enthusiastically support SB 32 which would strengthen the existing infrastructure of home and community based services and would allow for the best possible outcome for both our clients and employees.

Sincerely,

Dulce Nobre
Executive Director

Juneau, Alaska 99801

The Honorable Bill Stoltze
House of Representatives
Alaska State Capitol
Juneau, AK 99801

January 15, 2010
RE: SB 32 Medicaid: Home/Community Based Services

Dear Representative Stoltze,

My name is Jeannette Lacey Dunn and I am writing on behalf of the Community Resource Network (CRN). The CRN is comprised of many Juneau community agencies that provide services such as health care, home health care, care coordination, long-term care, assisted living, independent living, and others. Members work together to better serve our clients and our community through collaboration and actively working to improve services. We are in support of SB 32, which will establish a process for regular rate review for home and community based services (HCBS) in statute comparable to the one in place for nursing homes to serve persons who are Medicaid-eligible and meet nursing home level of care. We understand this bill was passed by the Senate and has been referred to the House Finance Committee.

Home and Community Based Services help to keep overall Medicaid costs down by allowing more people to remain in their homes rather than utilizing more costly in-patient long-term-term care. However, over the last few years, rates for HCBS have been frozen, which restricts agencies that are providing these services. The rate review will allow agencies to continue to provide HCBS for those who need them to maintain their independence. It will also assist the Department of Health and Social Services and the Alaska State Legislature to plan and make informed decisions related to long term care for older Alaskans and persons with disabilities.

We believe that regular rate reviews are essential in serving both our clients and the State of Alaska by being as fiscally responsible as possible. Please schedule SB 32 for a hearing in the House Finance Committee. We would appreciate your support of this important legislation.

Respectfully,
Members of the Community Resource Network

The Alaska Mental Health Trust Authority

Alaskan Seniors Living Longer Growing Stronger
from the Alaska Commission on Aging

brain injury network

Governor's Council on Disabilities and Special Education

Advisory Board on Alcoholism and Drug Abuse

abada amhb

Alaska Mental Health Board

Joint Advocacy 2010 Legislative Priorities

The Alaska Mental Health Board, Advisory Board on Alcoholism and Drug Abuse, Governor's Council on Disabilities and Special Education and the Alaska Commission on Aging, in collaboration with the Alaska Mental Health Trust Authority and the Alaska Brain Injury Network, have identified the following as their top legislative priorities for the 2010 session:

Home and Community-Based Services Rate Review. SB 32, Medicaid home and community based services, sponsored by Sen. Johnny Ellis (D-Anchorage), passed the Senate last session and is currently in the House Health and Social Services committee. The bill establishes a framework for periodic reviews and adjustments so that Alaska's system of care can continue to meet the needs of Trust beneficiaries. Advocacy efforts will focus on passing this bill.

Adult Dental Reimbursement. The Alaska Mental Health Trust Authority is working with its partners to develop a solution that will allow for adjustment of the current cap on adult dental services reimbursed by Medicaid. Currently, the annual cap for dental services – such as cleanings, exams, crowns, root canals and dentures – is $1,150 per individual. With the rising cost of dental care, this cap is proving inadequate. Trust beneficiaries continue to list dental services as a priority unmet health need. Advocacy efforts will focus on raising this cap.

Supported Housing. The Alaska Mental Health Trust Authority, in collaboration with the Alaska Housing Finance Corporation, is requesting $4 million this session for the Homeless Assistance Program (supported housing services for homeless individuals, families and people with disabling conditions earning 30% below the Area Median Income (AMI)). This request is in the same amount of general funds that was approved in last year's budget. Supported housing services are key to continued and sustained recovery for many Trust beneficiaries. Current economic trends have made this priority increasingly important for action. With an approach of maintaining affordability while offering outreach and support services, Trust beneficiaries can afford housing that provides a safe and healthy environment. Advocacy efforts will focus on passing this funding request.

Coordinated Transportation. With the establishment of the Governor's Coordinated Transportation Task Force in October 2008, the state is researching how to "facilitate and enhance the coordination and integration of community-based public transportation services for the benefit of persons with special needs." The partner boards support taking the next step and developing policies and funding to support community-coordinated public transportation systems.

Re: Support for Senate Bill 32 – An Act relating to medical assistance payments for home and community-based services.

Dear Senator Davis:

Thank you for scheduling Senate Bill 32, sponsored by Senator Johnny Ellis, for a hearing in Senate H&SS on Wednesday, February 4th. As a provider of services to individuals experiencing developmental disabilities, Assets Inc. strongly supports this legislation and greatly appreciates the added authority of your co-sponsorship.

All too frequently I have to account to families and guardians our inability to hire and keep employees qualified to work with their family member. Years of frozen rates and no manner in which to regularly review them have been very destructive to the goal of maintaining meaningful therapeutic relationships between our clients and staff.

Each year about this time I have to make the painful decisions about what part of employee benefits to reduce or eliminate. It impacts our ability to recruit and maintain employees and destroys morale. These good people aren't leaving to work for another provider, but rather are leaving the field altogether.

We are extremely grateful that Senator Ellis has introduced this much needed legislation and urge the Committee to pass it on to the next Committee of Referral.

Thank you for your consideration.

Respectfully,

The Honorable Johnny Ellis
Alaska State Senate
Alaska State Capitol Room 103
Juneau, AK 99801

Dear Senator Ellis:

This is a letter of support for SB 32.

Our membership is well aware of the problems with home and community based services, and particularly when it comes to the elderly and developmentally disabled. We favor anything that can be done to lower costs and regular reviews are a mechanism that can work. At the very least, it will lead to the establishment of rate uniformity within the industry.

We are a particularly pleased with Section 2 which requires Health and Social Services (HSS) to submit an Annual Report on medical assistance. We interpret this to mean that this review will be ongoing responsibility for HSS.

The only addition we would like to suggest is to add a (3) at the end of the section which requires HSS to place the Annual Review on its website.

Thank you very much for you sponsorship of this important piece of legislation.

Sincerely,

LaVerne M. Demientieff

AGENET

Alaska Geriatric Exchange Network

The Association of Alaska Providers of Senior Services

April 29, 2009

Senator Johnny Ellis
State Capitol, Room 103
Juneau, Alaska 99801-1182

Dear Senator Ellis:

On behalf of the members of AGENET (the Alaska Geriatric Exchange Network), I want to thank you for your leadership in order to establish regular rate reviews for Home and Community Based (HCB) services. Through your sponsorship of Senate Bill 32 and your efforts to educate others about its importance, we nearly reached our goal this past session.

As you know, establishing regular rate reviews in statute was the number one priority of HCB provider groups (serving senior citizens, persons with developmental disabilities and behavioral health) as well as the Alaska Mental Health Trust Beneficiary boards. You and your staff worked closely with our rate review coalition to move the bill forward. I especially want to commend Max on the countless hours he put into making SB 32 successful.

We look forward to working with you and the rest of the Alaska State Legislature next session to pass Senate Bill 32 so that we can implement it as soon as possible. Feel free to contact me at 463-6154 for further information. Thank you again.

Sincerely,

Marianne Mills

ALASKA STATE SENATE

SPONSOR STATEMENT SENATE BILL 45

By the passage of this legislation, a new Veterans' Cemetery would be created in Fairbanks to serve those members of the military wishing to be buried in this specially designated cemetery. The United States standards for creating veterans' cemeteries suggests that designated cemeteries be established within 75 miles of any populated area to honor deceased military personnel. At this time, Fairbanks is home to a significant military population but does not have a designated Veterans' Cemetery.

The Veterans' Cemetery fund would be established as a sub account of the general fund to be used to support programs benefiting Alaska veterans. The fund would receive deposits through appropriation and by proceeds from the purchase of special veterans' license plates. The balance of the fund could be used for the construction, operation and maintenance of a Veterans' Cemetery.

Veterans' employment preferences are currently established in AS 39.25.150 however they are somewhat difficult to understand. The existing statute is rewritten for clarification and does not change the preferences already established. The employment preferences as rewritten are similar to most other United States and do not breach collective bargaining agreements within the State of Alaska.

We urge your support in this legislation regarding honor and benefits for Alaska's military veterans.

Bill to Establish Veterans' Cemetery in Interior Moves Out of Senate State Affairs Committee

JUNEAU – Legislation under which the State of Alaska would authorize the establishment and maintenance of a veterans' cemetery to serve the Interior and northern Alaska was approved by the Senate State Affairs committee.

SB 45, Sponsored by Sen. Charlie Huggins, R-Wasilla, and Sen. Gene Therriault, R-North Pole, gives the Department of Military and Veterans' Affairs the authority to establish veterans' cemeteries and to set up a fund to provide for maintenance of the cemeteries. The bill also allows the Legislature to appropriate income from the sale of veterans' commemorative license plates to the cemetery fund and clarifies veterans' hiring preferences in state statutes.

"In addition to clarifying veterans' hire preferences, SB 45 sets up a mechanism to create and fund a veterans' cemetery in the Interior to complement the national cemeteries in Sitka and at Ft. Richardson," Huggins said. "This is an appropriate use of the revenues generated by the sale of special veterans' license plates, and a good way for us to express our appreciation for the service of these veterans."

"It is estimated there are about 100,000 veterans in Alaska, including roughly 11,000 in the Interior," Therriault said. "We should be prepared to honor them as they deserve for their sacrifices made in defense of our nation. I appreciate the quick action by the State Affairs committee to move the bill forward."

SB 45 has next been referred to the Senate Labor and Commerce committee.

ANALYSIS: *(Attach a separate page if necessary)*

This bill establishes establishes an Alaska cemetery fund.

Our estimate for the amount of special request plates commemorating Alaska veterans is based on 2 year history of special veterans plates purchased per DOA/Division of Motor Vehicles. DMVA estimates that 100 sets of plates will be purchased annually at $100/set.

Operations and maintenance of the Veteran's cemetery includes contracted services for maintenance, utilities, communications, supplies and materials is estimated at $250,000 per year beginning in FY2012. Out years reflect additional receipts from sale of special license plates.

FAIRBANKS NORTH STAR BOROUGH

RESOLUTION NO. 2009 - 08

A RESOLUTION SUPPORTING THE CREATION OF A STATE VETERANS' CEMETERY

WHEREAS, according to the Department of Veterans Affairs there are over 9,400 veterans living in the Fairbanks area; and

WHEREAS, according to the 2000 Census Alaska has the highest percentage of veterans per capita than any other state; and

WHEREAS, Interior Alaska veterans deserve access to a military cemetery that honors their service; and

WHEREAS, the nearest cemetery to Fairbanks is Fort Richardson National Cemetery located 350 miles away; and

WHEREAS, a State Veterans' Cemetery in the Interior would better serve the needs of veterans and their families, and provide a place that is centrally located in the Interior for soldiers to be laid to rest with full military funeral honors; and

WHEREAS, funding to establish and maintain a state veterans' cemetery could be made available through the U.S. Department of Veterans Affairs, State Cemetery Grants Program, and through money set aside from special license plates purchases and gifts designated to a special account; and

NOW, THEREFORE, BE IT RESOLVED that the Assembly of the Fairbanks North Star Borough supports the creation of a State Veterans' Cemetery in the Interior.

BE IT FURTHER RESOLVED that copies of this resolution shall be sent to the Honorable Governor Sarah Palin and the Alaska Interior Delegation.

PASSED AND APPROVED THIS 12th DAY OF MARCH 2009.

The Honorable Linda Menard, Chair
Senate State Affairs Committee
Alaska State Capitol, Room 9
Juneau, AK 99801-1182

RE: SB45 (Therriault and Huggins)--Support

Dear Chair Menard:

On behalf of the AARP members of Alaska, we urge you and your colleagues on the Senate State Affairs Committee to support SB 45, authored by Senators Gene Therriault and Charlie Huggins.

SB 45 would establish a fund for the maintenance of and development of future veterans' cemeteries in Alaska. As you know, the only veterans' cemeteries are in Anchorage and Sitka yet the Fairbanks area alone has over 11,000 veterans, many of whom are AARP members. Certainly veterans and their families would like to have a cemetery closer to where they live.

Burial in a veterans' cemetery is one of the last honors we can offer our fellow citizens who have served in the Armed Forces. We think it is a well-deserved tribute to these men and women who served our country. It is a proper thank-you to the veterans and their families.

Undoubtedly there may be some costs associated with a new cemetery. SB 45 does provide some provisions for partial funding although additional funding might be required. Our veterans didn't weigh the costs when they joined the armed services. Surely we can bear the costs of this final thank-you to them.

SB 45 also has provisions for state employment preferences. AARP has no official position on this.

AARP recommends an "AYE" vote on SB 45.

Should you have any questions about our position, please feel free to contact me (586-3637) or Patrick Luby, AARP Advocacy Director (907-762-3314).

Thank you for your consideration.

Sincerely,

Marie Darlin

JOINT LEGISLATIVE ISSUES FOR 2009 SESSION

The American Legion, Veterans of Foreign Warsand Disabled American Veterans

Support Statements

1. ***State Veterans' Service Officers Grant***: For over 50 years, Alaska service organizations have been assisting our state veterans with much needed assistance in receiving state and federal benefits to which they are entitled. Each year, through the assisted representation of these State Service Officers, our veterans have received over 25 million dollars in federal benefits. VA statistics have shown that veterans representing themselves receive some $7,000 less in annual benefits than those represented by a State Service Officer. This coming year, we are budgeted the same grant amount as last year, $651,000, which is part of the Governor's budget under the Department of Military and Veterans Affairs. These dollars will provide salaries and travel for the Joint Venture for the coming year. Our Service Officers cover the entire state, working closely with our members, the Alaska Department of Labor and the Department of Veterans Affairs, providing services to our State's veterans. This coming year will be exceptionally important as we provide for our returning Gulf veterans, assisting them with the complex laws and paperwork necessary to receive all of the benefits to which they are entitled. ***Therefore, we ask the full support of our Legislature in approving the Governor's budget proposed grant of $651,000.***

2. ***Property Tax exemption***: Currently, veterans rated by the Department of Veterans Affairs at 50% or more disabled and senior citizens 65 and older receive a tax exemption on the first $150.000.00 of their annual property tax. Our concern is the loss of this exemption. This could be devastating to both the seniors and veterans who, in many cases, receive the lowest of incomes, with many living on fixed incomes and concerned about loosing there existing home mortgages. ***Therefore, we request the tax exemption for the Disabled Veterans and Seniors remains***.

3. ***Flag Amendment:*** The flag amendment is an issue unresolved. Over 80% of Americans polled believe that our flag should be protected by amending our Constitution. We do not expect this issue to go unresolved forever; however, should it pass the United States Congress to constitutionally protect our flag, we request that Alaska be the first State to ratify the amendment to the Constitution. ***Therefore, we ask our Legislature that, if Congress passes the amendment, our Alaska Legislature be the first to ratify that amendment.***

4. ***State Veterans Cemetery:*** If the issue of establishing a State Veterans Cemetery comes before legislature we request the legislature to consider supporting such legislation.

MEMORANDUM February 3, 2009

SUBJECT: Veterans, former prisoners of war, and members of the national guard (SB 45)

TO: Senator Charlie Huggins
Attn: Sharon

FROM: Dan Wayne
Legislative Counsel

You have requested a sectional summary of the above-described bill.

As a preliminary matter, note that a sectional summary of a bill should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents. If you would like an interpretation of the bill as it may apply to a particular set of circumstances, please advise.

Section 1 would allow the legislature to appropriate, to the Alaska veterans' cemetery fund, fees from the sale of special request motor vehicle license plates that commemorate Alaska veterans.

Sec. 2 adds certain gifts, donations and grants related to establishing and maintaining Alaska veterans' cemeteries to the list, under AS 37.05.146(c), of programs for which receipts are accounted for separately. (Receipts from programs on this list are not appropriated from the unrestricted general fund).

Sec. 3 creates a special account in the general fund called the Alaska veterans' cemetery fund., from which amounts may be appropriated for building and operating Alaska veterans' cemeteries.

Sec. 4 adds a requirement that state personnel rules must provide for the grant of employment preference rights to members of the national guard under AS 39.25.159, a statute under which veterans, former prisoners of war and members of the national guard already receive preference when they apply for a position, either in the form of extra points being added to their numerical rating (when assessments using numerical ratings are used in hiring), or, when hiring is based on assessments that are not based on numerical ratings, a guarantee that they will be considered for the position.

Sec. 5 and 6 amend AS 39.25.159, a statute with the catch line "employment preference for veterans and former prisoners of war," by combining repetitious language from subsections (a) and (c) and moving it to a new subsection, and changing "preference," in subsections (a) and (c), to the more explicit "employment preference as a matter of form."

Sec. 7 defines "member of the national guard" under AS 39.25.159.

Sec. 8 adds two new subsections to AS 39.25.159. Subsection (e) consolidates and restores language that the bill, as noted above, removes from AS 39.25.159(c) and (d). Subsection (f) limits the applicability of subsections (a), (c), and (e) so that they may not be interpreted to amend the terms of a collective bargaining agreement.

Sec. 9 adds language permitting the department of military and veterans affairs to establish and maintain Alaska veterans' cemeteries, allowing the department to raise funds for that purpose, and listing administrative duties and options of the department, including the duty, or in some instances the option, to adopt regulations.

If I may be of further assistance, please advise.

February 23, 2009

Senator Charlie Huggins
Alaska State Capitol, Room 119
Juneau, Alaska 99801-1182

Subject: Support for SB 45

Dear Senator Huggins:

The Alaska Commission on Aging (ACoA) encourages support for SB 45 sponsored by you and Senator Therriault to establish, maintain, and develop the Alaska veterans' cemetery fund.

Although Alaskan veterans come from all areas of the state, the only designated veteran cemeteries in Alaska are located in Anchorage and Sitka. We believe that veterans and their families would appreciate having a cemetery closer to where they live. Burial in a veterans' cemetery is a well-deserved honor and tribute to those who have served our country and their families.

Partial funding for this program would come from the sales of special request plates commemorating Alaska veterans, according to estimates provided by the bill's fiscal note, and additional funding may be required. Nevertheless, persons who joined the armed forces did not allow the personal costs of their service to dissuade their decision to serve and protect our nation.

ACoA supports SB 45 and believes that establishment of a veterans' cemetery is our responsibility and obligation to honor veterans through this final gesture of gratitude. Please feel free to contact Denise Daniello, ACoA's executive director (465-4879), should you have any questions regarding our position. Thank you for your consideration.

Sincerely,

Sharon Howerton-Clark
Chair, Alaska Commission on Aging

WASHINGTON, DC 20510

February 20, 2009

The Honorable Sarah Palin
Governor
State of Alaska
P.O. Box 110001
Juneau, AK 99811

Dear Governor Palin:

I write to underscore the request of a Fairbanks veteran to urge your support and action to advance an Alaska State Veterans Cemetery, likely to be located in Alaska's Interior. During my Veterans Town Hall meeting in Fairbanks earlier this week, veteran Morgan Solomon asked that I approach you about this issue. His request, in firm and colorful language, received the overwhelming support of the more than 40 veterans in attendance, and my support as well.

As you know, at issue is a federal program which provides support to states to establish veterans' cemeteries. I commend you for including $250,000 in your original Fiscal 2010 capital budget submission for initial architecture and engineering for this cause. But I was disappointed that you eliminated it in your revised budget as part of your overall budget cutting exercise. Meanwhile, I understand the Alaska Department of Military and Veterans Affairs can submit a grant pre-application to the U.S. Department of Veterans Affairs for construction of the cemetery, but has not yet done so.

The VA estimates that 1,500 veterans will die in the next 10 years in the Fairbanks area. A Veterans Cemetery in the Interior is broadly supported by Alaska's veterans community and would serve as a relatively affordable yet highly visible way to demonstrate our respect to the men and women who have served and sacrificed so much for our state and nation.

As a member of the U.S. Senate Committee on Veterans Affairs, I am pleased to work with you and your departments on this vital issue and to ensure that a pre-application is well received by the VA when it is submitted.

Thank you for your attention to this matter.

Sincerely,

Mark Begich
U.S. Senator

SB 50
IDITAROD FINISHER LICENSE PLATES

By passage of this legislation, a new provision is added for special issue license plates to honor those who have shown the dedication, perseverance and exemplary athletic ability that finishing the Iditarod Trail Sled Dog Race requires.

Design work for the new plate must be approved by the Department of Administration. It's anticipated that the Iditarod Trail Committee and the Iditarod Official Finishers Club will be advisors and participants in the design. The finishers will be able to purchase these exclusive specialty plates by providing specific proof of participation and completion of the race. The race finisher must have an automobile registered in the state of Alaska on which the plates would be displayed.

I request your support for this new category of specialty license plates honoring mushers who have endured the challenges and shown the courage and ability to complete what is affectionately known as the "last great race," the Iditarod Trail Sled Dog Race.

MEMORANDUM February 4, 2009

SUBJECT: Sectional Summary - SB 50 (Work Order No. 26-LS0319\A)

TO: Senator Charlie Huggins
Chair of the Senate Rules Committee

FROM: Gerald P. Luckhaupt
Legislative Counsel

You have requested a sectional summary of the above-described bill. As a preliminary matter, please note that a sectional summary of a bill should not be considered an authoritative interpretation of the bill - the bill itself is the best statement of its contents.

Section 1. Authorizes the Department of Administration to issue special request Iditarod race finisher license plates.

Section 2. Sets the fee for the special request Iditarod race finisher license plates authorized in section 1.

Senate Works on Bill to Provide Special Iditarod Finisher License Plates

(JUNEAU) – With the start of this year's Iditarod Trail Sled Dog Race just a few days away, Alaska's legislators are considering a bill that would create special license plates for people who are official finishers of the Iditarod.

"I am proud that the district I represent is home to the start of the 'last great race'," said Senator Charlie Huggins (R-Mat-Su), sponsor of the legislation. "It is fitting that we honor the more than 600 hearty souls who have finished this grueling competition which is so synonymous with our state."

Senate Bill 50 would allow Iditarod finishers, upon proving that they have finished the race, to get a special "Iditarod finisher" license plate for $50. Presently, there are specialty plates for National Guard members, military veterans, Purple Heart recipients and custom collector vehicles.

SB 50 was passed out of the Senate State Affairs Committee Tuesday, and will be considered next by the Finance Committee. "I am pleased the bill is before us now, during Iditarod season; it adds to the celebration of the start of the 37th running of this great competition," said Senator Huggins. "A lot of folks who have run the race have expressed enthusiasm about getting one of these license plates, which highlights the pride Alaskans have for the Iditarod and the state as a whole."

For more information, contact Senator Huggins or Sharon Long at 907-465-3878.

ANALYSIS: *(Attach a separate page if necessary)*

This bill would increase funding for charter and alternative schools.

Alternative schools with an Average Daily Membership [ADM] of 175 or greater will adjust through the school size table independently.
If the alternative school has an ADM of 120 but less than 175 and in the 1st year of operation; or had an ADM count of 175+ in the prior year but fell below 175 in the current fiscal year, then the ADM count will be multiplied by 1.33.

If the charter school is under 150 ADM, then the ADM count will be multiplied by 1.18.
Otherwise if the charter school has an ADM of 120 but less than 150 and in the 1st year of operation; or had an ADM count of 150+ in the prior year but fell below in the current fiscal year, then the ADM count will be multiplied by 1.38.

The GF appropriation capitalizes on the Public Education Fund [PEF].

Charter School Funding: CSSB 57 (FIN)

- CSSB 57 (FIN) is about supporting school choice and doing away with the charter school penalty.
- Current law results in charter schools, with fewer than 50 students, receiving 30% to 45% less state funding than neighborhood schools of their same size.
- The root of the problem is the way the foundation formula calculates the "adjusted student count" for charter and alternative schools versus neighborhood schools. Almost all schools have their enrollment adjusted upward by a formula in the state education law that is based on the size of the school.
- The adjusted student count is the basis of school funding. The adjusted count is multiplied by the BSA, the area cost differential and other factors to determine funding.
- Charter schools with an enrollment of fewer than 150 students, and alternative schools with fewer than 200 students, are not treated as separate schools, and the result is their enrollment is adjusted downward. Neighborhood schools are always funded as separate schools, regardless of their enrollment.
- Senate Bill 57 fixes the funding problem in an equitable, fiscally responsible manner.
- CSSB 57(FIN) funds charter schools with fewer than 150 students at the same per-student rate as neighborhood schools with 400 students. This requires charter schools to be significantly more efficient than other schools, but it is a manageable funding level.
- CSSB 57(FIN)also addresses the problem created for school districts, when their charter and alternative schools unexpectedly enroll fewer students than the number required for the state to fund them as separate schools.
- Today, when charter and alternative schools fall just one student below their separate-school threshold, the state cuts funding by $500,000 - $700,000. This is a disaster for the school and its district.
- CSSB 57(FIN) contains a one-year, hold-harmless provision for charter schools and alternative schools that unexpectedly fall below the threshold, and are either in their first year of operation or were above the threshold the previous year. For one year, these schools will receive 95% of the per-student rate they would have received at the threshold.
- Finally, CSSB 57(FIN) lowers the separate-school threshold for alternative schools from 200 to 175.
- Alaska has a serious problem with school achievement and high school graduation. One type of school is not best for all students. Charter schools and alternative schools offer parents choice within the public school system.
- CSSB 57(FIN) has received strong support from around the state. The Alaska Association of School Boards, and representatives of the Fairbanks, Nome, Juneau, Anchorage, Lower Kuskokwim, Ketchikan and Mat-Su school districts, as well as numerous parents have testified in favor of this bill.
- Our school funding system has limited communities' ability to create and sustain innovative programs. It is essential that the legislature takes action this session.

JUNEAU SCHOOL DISTRICT

CITY AND BOROUGH OF JUNEAU

Board of Education 2009 Legislative Priorities

INCREASE SMALL CHARTER SCHOOL FUNDING

JSD supports equitable state funding for charter schools so these educational options are financially feasible for districts. The Board supports legislation giving small charter schools a student count adjustment of 1.17, which would be comparable to the funding for a neighborhood school with an enrollment of 400. Current statute funds charter schools of 150 or more at the same rate as neighborhood schools. Charter schools of fewer than 150 students are funded so inequitably that they are at risk of closing and new ones cannot open. The legislature has recognized the value of charter schools in providing educational options for public school students, but has not provided the funding to make those options truly accessible or available to all students.

"Developing citizens for a global society by inspiring students to think, learn, achieve, and care".

April 16, 2009
Testimony on Senate Bill 57

Good Morning, my name is **Ray DePriest** and I am the Director of the Career and Technical Education Department for the Mat-Su Borough School District. Thank you for this opportunity to testify in favor of Senate Bill 57.

The Mat-Su Borough School District supports Senate Bill 57 and is supportive of school choice and currently hosts 4 charter schools and 3 alternative schools, which enroll approximately 1500 students.

I do believe that Senate Bill 57 will correct the funding problem in an impartial and fiscally dependable manner.

By lowering the threshold for alternative schools from 200 to 175 Senate Bill 57 will address a financial setback that occurred this year for MSBSD, one of our alternative schools unexpectedly dropped below the required 200 number by 6 students, resulting in a $780K deficit to the school district.

The one-year, hold-harmless provision for charter schools and alternative schools that unexpectedly fall below the threshold, allows charter and alternative schools to focus student education and not financial deficit created by the current funding.

Charter schools and alternative schools offer parents choice within the public school system that provides smaller learning communities, drop out prevention and increased graduation rates.

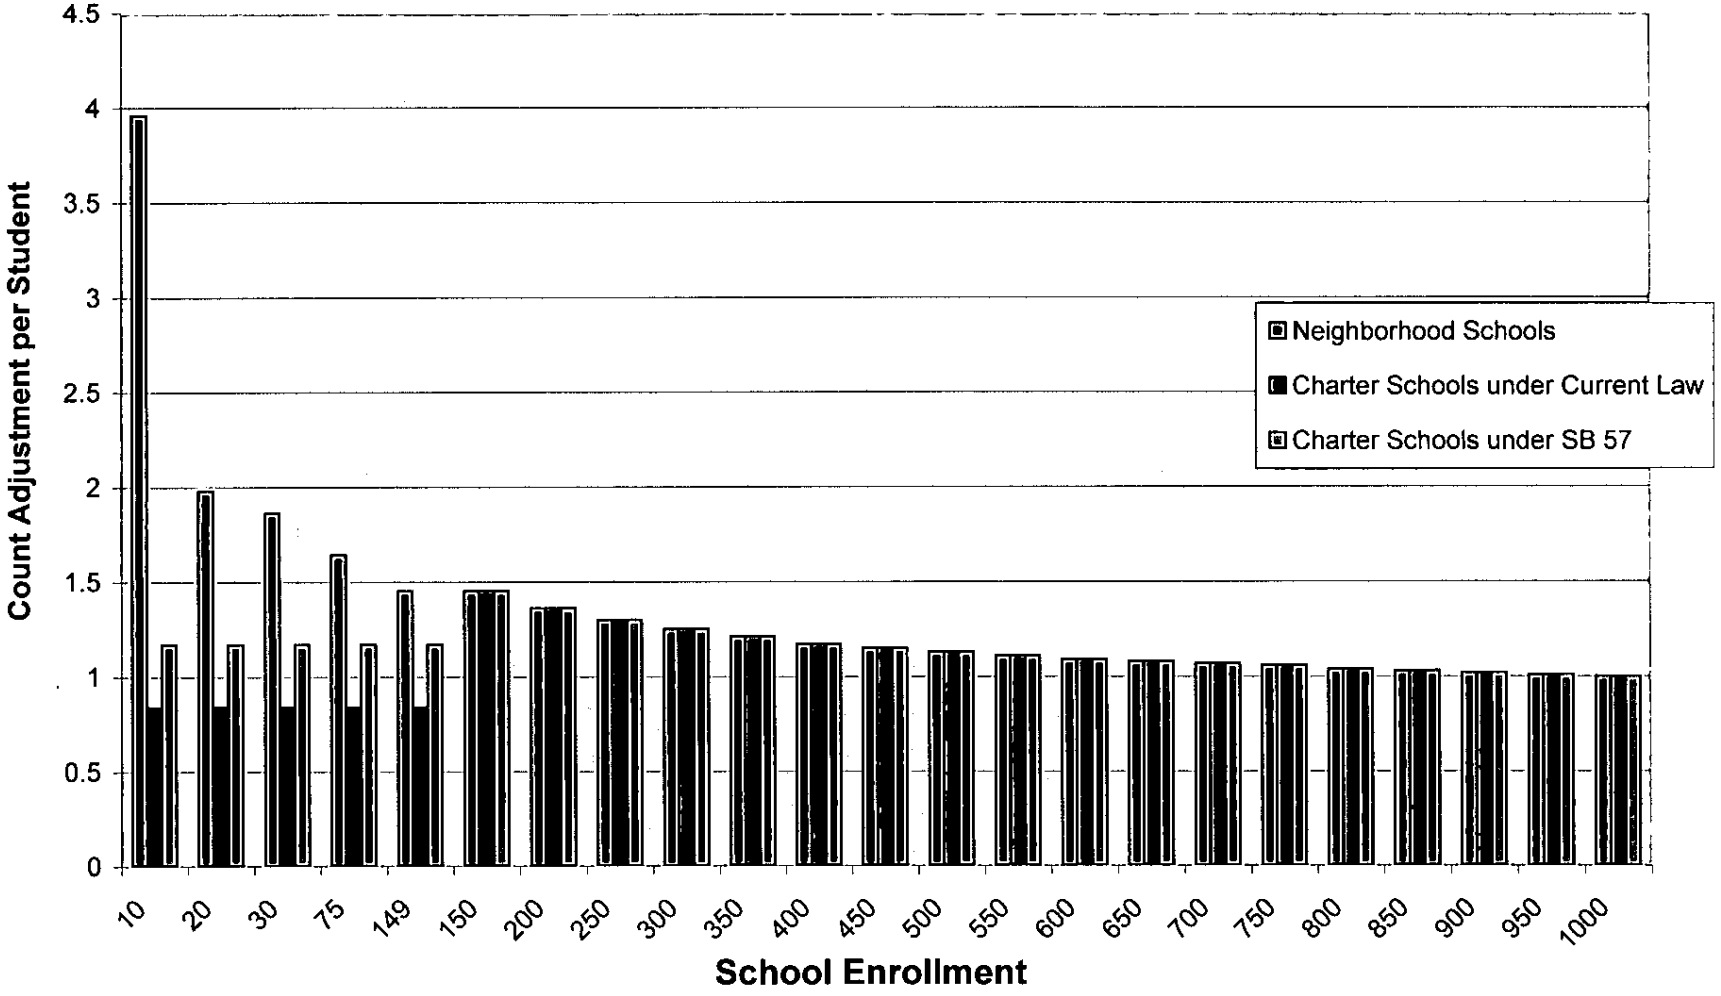
In conclusion Senate Bill 57 creates a sustainable funding system for innovative programs. I thank you for your time and effort that all of you put in for the students of Alaska.

Sincerely,

Ray DePriest
Director, Career & Technical Education

Adjusted Student Count for Charter Schools vs. Neighborhood Schools

The adjusted student count of each school is the basis of state funding. The number of students enrolled in a school is increased or decreased according to the formula in AS 14.17.450, to determine the school's adjusted student count. That adjusted student count is then multiplied by the district cost factor, the special needs factor and, finally, by the base student allocation to determine the amount of funding.



* This chart assumes that a charter school with fewer than 150 students has a student count adjustment of .84 under current law, because it is located in a district that contains a school with over 750 students, such as Anchorage, Fairbanks, Mat-Su or Juneau. A charter school in a community such as Kenai, Bethel, Ketchikan or Nome would have a student count adjustment of .92 or .97.

COPY ON FILE

Senator Thomas

Sectional Analysis
CSSB 57(FIN)

Section 1

Subsection (c) states that charter schools with fewer than 150 students will have their student count adjusted by the same per-student rate as neighborhood schools with 400 students.

Under the school size factor statute, AS 14.17.450(a), the per-student rate of adjustment for 400-student neighborhood schools is 1.18, which means their student enrollment is multiplied by 1.18 to determine their "adjusted student count." The adjusted student count is the basis for the calculation of state funding provided to school districts.

Subsection (d) is an exception to subsection (c) for charter schools that are either in their first year of operation or had more than 150 students the previous year. It grants these charter schools a one-year hold-harmless period, during which they will receive 95% of the per-student rate of neighborhood schools with 150 students.

Under the school size factor statute, the per-student rate of adjustment for 150-student neighborhood schools is 1.45, and 95% of that rate is 1.38. Charter schools in the hold-harmless year will have their enrollment multiplied by 1.38 to determine their adjusted student count.

Subsection (d) requires charter schools that are in the hold-harmless year to submit a plan for the following year to their local school board. The plan must describe what will happen the following year if the school again has fewer than 150 students and no longer qualifies for the hold-harmless provision.

Subsection (e) creates a one-year hold-harmless period for alternative schools similar to the subsection (d) provision for charter schools. Alternative schools that enroll 121-174 students, but are either in their first year of operation or had at least 175 students the previous year, will receive 95% of the per-student rate of neighborhood schools with 175 students.

Under the school size factor statute, the per-student rate of adjustment for 175-student neighborhood schools is 1.40, and 95% of that rate is 1.33. Alternative schools in the hold-harmless year will have their enrollment multiplied by 1.33 to determine their adjusted student count.

Subsection (f) defines the term "student rate." The student rate is the base plus the multiplier under AS 14.17.450(a) divided by the student count.

Section 2: lowers the number of students that an alternative school must enroll, in order to be funded as a separate school, from 200 students to 175 students.

This section also makes a technical amendment creating the exception from the existing requirement that charter schools have at least 150 students to have their own adjusted student count calculation. Without this amendment, the Department of Education would continue to calculate school funding as if the students at charter schools under 150 attended the largest school in their district.

Statutes That Determine Adjusted Student Count

Sec. 14.17.905. Facilities constituting a school.

(a) For purposes of this chapter, the determination of the number of schools in a district is subject to the following:

(1) a community with an ADM of at least 10, but not more than 100, shall be counted as one school;

(2) a community with an ADM of at least 101, but not more than 425, shall be counted as

(A) one elementary school, which includes those students in grades kindergarten through six; and

(B) one secondary school, which includes students in grades seven through 12;

(3) in a community with an ADM of greater than 425, each facility that is administered as a separate school shall be counted as one school, except that each alternative school with an ADM of less than 200 shall be counted as a part of the school in the district with the highest ADM.

(b) Notwithstanding (a)(3) of this section, a charter school shall be counted as a separate school if the charter school has an ADM of at least 150 students.

Sec. 14.17.450. School size factor.

(a) For purposes of calculating a school's ADM to determine state aid, the ADM of each school in a district shall be computed by applying the following formula:

If the student count In a school is			**The adjusted student count is**				
At least		**But less than**	**Base**		**Multiplier**		**The number of Students in excess of**
10	-	20	39.6				
20	-	30	39.6	+	(1.62	x	20)
30	-	75	55.8	+	(1.49	x	30)
75	-	150	122.85	+	(1.27	x	75)
150	-	250	218.1	+	(1.08	x	150)
250	-	400	326.1	+	(0.97	x	250)
400	-	750	471.6	+	(0.92	x	400)
750 or over			793.6	+	(0.84	x	750).

(b) If the ADM in a school is less than 10, those students shall be included in the ADM of the school in that district with the lowest ADM as determined by the most recent student count data for that district.

Senator Thomas
April 6, 2009

Example Adjusted Student Count Calculations

100 Students in a Neighborhood School have an Adjusted Student Count of **154.6**
And a per student adjustment of 1.55.

122.85 base + 1.27 multiplier X (100 – 75 = 25) 122.85 + 31.75 = 154.6
154.6/ 100 = 1.55

100 Students in a Charter School under Current Law have an Adjusted Student Count of **84**
And a per student adjustment of .84

No base + .84 multiplier X all 100 students 0 + 84 = 84
84/100 = .84

100 Students in a Charter School under SB 57 have an Adjusted Student Count of **118**
And a per student adjustment of 1.18.

No base + 1.18 multiplier X all 100 students 0 + 118 = 118
118/100 = 1.18

The adjusted student count of each school is the root of state funding for school districts. The number of students enrolled in a school is increased or decreased according to the formula in AS 14.17.450, to determine the school's adjusted student count. The adjusted student count is then multiplied by the district cost factor, the special needs factor and by the base student allocation, to determine the amount of funding.

MATANUSKA-SUSITNA BOROUGH SCHOOL DISTRICT
RESOLUTION NO. 09-002

A RESOLUTION OF THE MATANUSKA-SUSITNA BOROUGH SCHOOL BOARD IN SUPPORT OF SENATE BILL NO. 57 "AN ACT RELATING TO CHARTER SCHOOL FUNDING."

WHEREAS, the Matanuska-Susitna Borough School Board invites support of Senate Bill No. 57 "An Act Relating To Charter School Funding"; and

WHEREAS, charter schools give opportunities outside of the traditional public schools for innovative programs to be implemented; and

WHEREAS, charter schools gain momentum and interest from a broader larger audience as a program is developed in the initial year of operation; and

WHEREAS, charter schools like all schools have fluctuations in enrollment and losing program gravity because of a slight drop in enrollment below 150 students for one year could have a longer term detrimental impact on the school; and

WHEREAS, a school that is not recognized as a school site for funding purposes receives a reduced financial allocation; and

WHEREAS, being recognized as a school site gives economic relief by bringing a greater dollar amount to the school allowing for more comprehensive and adequate funding; and

WHEREAS, this Bill offers the initial year of operation for a charter school as an opportunity to build community support and student numbers and ultimately strengthens the quality of the program and the potential for program and student accomplishment; and

WHERAS, encouragement is offered to add language to this Bill to lower the enrollment for alternative school's recognition as a school site from 200 students to 175 as a measure to support an alternative school's need for a smaller learning community.

THEREFORE BE IT RESOLVED that the Matanuska-Susitna Borough School Board supports Senate Bill No. 57 "An Act Relating to Charter School Funding."

ADOPTED by the Matanuska-Susitna Borough School Board this 18th day of February, 2009.

Senator Joe Thomas
1292 Sadler Way, Suite 313
Fairbanks, Alaska 99701

Dear Senator Thomas:

I am sending you a resolution by the Ketchikan Gateway Borough School District Board of Education in support of Senate Bill 57, an Act relating to charter school funding.

We believe charter schools are public schools that provide valuable education options to Alaska families in addition to encouraging parent and community involvement in our schools. The current funding system results in a significant decrease in funding for charter schools as compared to other neighborhood schools of their same size, should small changes in student enrollment take place.

The Ketchikan Gateway Borough School District supports the passage of Senate Bill 57 in modifying the current school funding law as it applies to charter schools.

Thank you for your time and consideration.

Sincerely,

Robert Boyle
Superintendent

KETCHIKAN GATEWAY BOROUGH SCHOOL DISTRICT
RESOLUTION #09-04

A RESOLUTION OF SUPPORT OF SENATE BILL NO. 57, WHICH IS AN ACT RELATING TO CHARTER SCHOOL FUNDING

WHEREAS, Senate Bill 57 will modify the current school funding law as it applies to charter schools with fewer than 150 students; and

WHEREAS, charter schools provide valuable education options to Alaska families and encourage parent and community involvement; and

WHEREAS, the current funding system results in a dramatic decrease in funding for charter schools as compared to neighborhood schools of their same size ; and

WHEREAS, adjusted student count as determined under AS 14.17.450 is the basis of state funding for all schools in Alaska; and

WHEREAS, Senate Bill 57 funds charter schools with fewer than 150 students to an adjusted student count by the same per-student rate as neighborhood schools with 400 students; and

NOW THEREFORE BE IT RESOLVED, the Board of Education of the Ketchikan Gateway Borough School District supports passage of Senate Bill 57.

Adopted by the Ketchikan Gateway Borough School District on this 11th day of February, 2009

Karen Eakes
Karen Eakes, Board President

Michael Fitzgerald, Vice President

TONGASS SCHOOL OF ARTS AND SCIENCES RESOLUTION

Urging the Governor of Alaska and the Alaska State Legislature to pass Senate Bill 57, "An Act relating to charter school funding."

BE IT RESOLVED BY THE ACADEMIC POLICY COMMITTEE OF THE TONGASS SCHOOL OF ARTS AND SCIENCES:

WHEREAS the Constitution of the State of Alaska and other laws and policies of the State require educational opportunities for all children; and
WHEREAS Charter schools are public schools that provide valuable education options to Alaska families; and
WHEREAS Charter schools increase learning opportunities and encourage parent and community involvement in our schools; and
WHEREAS the current state funding system limits communities' ability to create and sustain these innovative programs; and
WHEREAS current state law results in charter schools receiving 30% to 45% less state funding than neighborhood schools of their same size; and
WHEREAS Senate Bill 57 funds charter schools with fewer than 150 students at a per-child rate closer to that of average, urban elementary schools; and
WHEREAS Senate Bill 57 solves the funding problem in an equitable, fiscally responsible manner; and
WHEREAS Senate Bill 57 will support our schools and districts as they carry out the legislature's intent in creating the charter school law;
BE IT RESOLVED that the Tongass School of Arts and Sciences Academic Policy Committee supports the passage of Senate Bill 57; and
BE IT FURTHER RESOLVED the Tongass School of Arts and Sciences Academic Policy Committee urges the Governor of Alaska and the Alaska State Legislature to pass Senate Bill 57, "An Act relating to charter school funding."
COPIES of this resolution shall be sent to the Honorable Sara Palin, Governor of Alaska; the Honorable Gary Stevens, Senate President; the Honorable Mike Chenault, House Speaker; the Honorable Senators Hoffman and Stedman, Senate Finance Committee Co-Chairs; the Honorable Senators Ellis, Elton, Huggins, Olson, and Thomas, Senate Finance Committee Members; the Honorable Kyle Johansen, Representative, House District 1; and members of the Ketchikan Gateway Borough School Board.

ASSOCIATION OF ALASKA SCHOOL BOARDS

ADVOCATES FOR ALASKA'S YOUTH

Position Statement on SB 57
Charter School Funding

In 1995, AASB supported the creation of charter schools in statute. Over the years, school boards have subsidized and otherwise assisted local charter schools in providing Alaska families with a viable choice in public education.

AASB encourages the Legislature to amend AS 14.17.450 as outlined in SB 57 to establish a more equitable means of funding charter schools.

School boards find themselves caught between local citizen initiatives to create choices within public schools and an inadequate funding stream in statutes that require supplemental funding from local districts.

Anvil City Science Academy
Nome, Alaska

My name is Todd Hindman and I am the lead teacher at Anvil City Science Academy in Nome.

I am speaking in support of SB57 on behalf of Nome Public Schools' Board of Education and the Academic Policy Committee of Anvil City Science Academy.

In a small community such as Nome, a charter school with a student population of 150 is highly unlikely and if it were able to achieve that enrollment, it would most likely have an adverse effect on the other public schools.

The small size of ACSA is one of its strengths. It allows for flexibility in its daily operation to provide unique educational opportunities to its students. This allows students to easily get out in the community and environment to use it as a resource in their education, providing a more meaningful learning experience. Our small size also creates a culture around family values to ensure student success through daily engagement of parents.

Thank you for your efforts at providing support for small charter schools, which are identifying and meeting specific needs in the communities they serve.

Nancy Wagner, Ed.D.
Superintendent of Schools
Fairbanks North Star Borough School District
520 Fifth Avenue, Fairbanks, Alaska 99701
Ph-(907) 452-2000, ext. 401 Fax-(907) 451-0541

Thank you Chairman Seaton and members of the House Education Committee.

I am representing the Fairbanks North Star Borough School District and want to express our support for Senate Bill 57.

I would like to thank the House Education Committee for scheduling SB57. This Bill is extremely important to Charter schools which provide choice and alternative educational programs for our students.

We currently have three charter schools and a new one coming on-line next year. Two of our current charter schools and our new charter school have target enrollments at about 155 students, so struggling to meet the 150 funding threshold is not uncommon.

This year, one of our charter schools just missed the 150 student "average daily membership" threshold during the count period, even though they had over 150 students by the end of the count. Falling short of the current enrollment threshold cost our district about $680k...All because of a small timing difference related to student enrollments.

While we expect that all our existing charter schools will be larger than 150 students next year, this bill helps addresses the catastrophic impact should a school fail to meet that 150 student threshold, even if by the thinnest of margins. It is a fair compromise for funding of existing charter schools.

We also expect our new charter school to exceed 150 students next year. But this bill also provides a fair funding compromise should their startup enrollments fall a little short. It would still be difficult to offer the curriculum as originally envisioned, but it would not be impossible, as is currently the case. It provides a great incentive for schools to get to their targeted enrollments.

SB87 fixes the funding problem in an equitable, fiscally responsible manner.

I encourage you to pass this Bill. Providing alternative educational programs is important for the public school system. We are charged with the responsibility of meeting the needs of EVERY child enrolled in our district. Alternative and Charter Schools provide the opportunity for Alaska families to choose the program that best meets their child's needs. Without the previsions outlined in SB57, at least one of our charter schools could be in danger of having to close.

Thank you for the opportunity to testify in support of SB57.

Senator Joe Thomas
State Capitol, Room 510
Juneau, AK 99801-1182

Dear Senator Thomas:

Thank you for introducing SB 57, this bill directly aligns with Doyon, Limited's mission statement, which includes promoting the economic and social well-being of our shareholders and future shareholders. The Effie Kokrine Charter School is important to the Alaska Native community in the interior. With almost 25% of our 17,500 shareholders residing in the Fairbanks community we believe that a culturally sensitive school is essential to the well-being of our shareholders.

Therefore, on behalf of our shareholders, Doyon, Limited supports SB 57.

Thank you again and please let me know if we can do anything else to help. I can be reached at (907) 459-2000 or by e-mail at phillipsn@doyon.com.

Sincerely,

Norman L. Phillips, Jr.

Cc: Sen. Kim Elton; Sen. Charlie Huggins; Sen. Donny Olson; Sen Joe Thomas
Subject: SB 57

Dear Senators,

I would like to thank all of you in your past support of for schools in Alaska, especially those that are small in numbers and therefore needing more support when it comes to funding issues. I am requesting your support for the passage of SB 57.

Charter Schools allow parents, community members, and teachers to be in charge of developing unique educational programs and to be involved in decision making for school policies. As a parent of three Charter School children and two more that will soon be in Charter schools, it means a lot to me to be involved in school policies and the operations of our school. Our educational process is very flexible, which provides for the needs of our children and parents alike.

The Anvil City Science Academy has been in operation for eleven years now, it was created by parents, teachers, and many community members who were interested in a family oriented school characterized by high academic standards and a well-rounded curriculum, with an emphasis in science and math. The Science Academy serves 5th through 8th grade students who come to the school with a wide variety of backgrounds, learning styles, experiences, and needs. We are able to address the individual differences and learning styles, and creativity we see an increase in learning and creativety for all students. Our students at this time are involved in a salmon habitate restoration project grant from the Department of the Interior, and are working with Charlie Lean of Norton Sound Economic Development Company ,because of this project the Academy students were nominated and won the "Spirit of Youth" award in the catagory of Science . Another project that is noteworthy is the
Artist in Schools project in which students are interviewing Nome residents in preparation for writing a play about the last 50 years in Nome.

Anvil City Science Academy has 44 students, with two and half certified teachers, no support personnel. This gives the school the needed flexibility to provide opportunities to the studetns to go beyond the traditional classroom walls in order to utilize community and environmental resources. In addition, in a small community such as Nome, a program like ACSA cann't reach a student count of 150 students, without having an adverse affect on the other public schools in the district. Therefore, a smaller program like ACSA is beneficial to the community by providing an alternative education program, while minimizing the possible impact on other schools.

Respectfully submitted,

Vickie Erickson

Donny,
I want to thank you any your fellow Senators for supporting Charter Schools in Alaska. We have actively worked for the past several years to provide a more permanent "fix" to the funding dilemma that we face due to the typical charter school enrollment and the current method of funding. We believe that great strides have been taken with SB 57.

Our school here in Nome has an enrollment of 44 which is capped due to space constraints at the current facility. We are paired with the largest school in our district causing concerns each year of whether we still can continue to provide the Nome community with optional educational opportunities. We have a proven program and a waiting list each year.

We work hand in hand with our district, many times providing a venue to try new methods that can later be implemented into the larger district.
Providing a more equitable funding formula for charter schools only furthers the endless opportunities that our Alaskan education system can provide all Alaskan children especially in the future.

Thank you again for your continued support. The community of Nome appreciates this most important work for our children.

Subject: Support for SB 57

Dear Senator Thomas,

I teach at Anvil City Science Academy in Nome. I hope that you will consider the following points in order to help SB 57 pass this stage with the Finance Committee in order that it may be heard by all and voted upon.

Respectfully,
Lisa Leeper
Teacher, Anvil City Science Academy

- Charter schools are public schools that provide valuable education options to Alaska families.
- The existing school funding law results in charter schools that enroll fewer than 150 students receiving 30% to 45% less state funding than neighborhood schools of their same size.
- Inequitable funding limits communities' ability to create and sustain these schools.
- There is a dramatic decrease in funding ($500,000 - $700,000 loss) when a charter school's enrollment drops from 150 students to 149, which creates a financial crisis for both the school and its host district.
- Senate Bill 57 solves the funding problem in an equitable, fiscally responsible manner.
- SB 57 funds charter schools with fewer than 150 students at the same per-student rate as neighborhood schools with 400 students.
- SB 57 contains a one-year, hold-harmless provision for charter schools that are either in their first year of operation or had more than 150 students the previous year, reducing the financial damage to their district.
- SB 57 will allow school districts to carry out the intent of the legislature in creating the charter school law, by increasing quality education options available to Alaska families.
- SB 57 is supported by the Alaska Association of School Boards, and superintendents and parents of charter school students from across the state. The bill has been co-sponsored by Senators Thomas, Stevens, Elton, and Davis.

Subject: Support for SB57

Dear Senators and Staff,

Thank you for taking a moment out of your busy schedules to read this email.

I am writing to request your full support of SB57-An Act Relating to Charter School Funding.

As you are well aware; education is not a one size fits all. It is important for families to have a choice and different settings are a better fit for different children and their families. By creating more equitable funding it helps ensure small charter schools will continue to exist. Small Charter Schools are constantly trying to reach out to families with diverse needs for their children; whether it is a smaller overall school size so children don't feel "lost" in the crowd or children that have special learning needs. Small Charter Schools have the ability to help more children that are in danger of falling through the cracks, *if* they are properly funded. In my humble opinion this also helps relieve the stress larger schools may feel from trying to help children in need while maintaining the needs of the general school populous.

Full funding for ALL our children and schools should be every Alaskans priority; we owe it to our children and their future.
Thank you for your time and your service to our State.

Sincerely,

Diane Cathcart (Juneau Community Charter School 4/5/6 Class parent)
310 Irwin St Apt B
Juneau, AK 99801

January 26, 2009

Dear Senator Elton, Senator Davis, Senator Olson, Senator Huggins and Senator Stevens; members of the Senate Education Committee:

I am writing in support of Senate Bill 57. It is a well written piece of legislation that would help small charter schools continue to serve students all across Alaska. These students' schools are in need of more equitable funding to support salaries and supplies. I am grateful you support charter schools as an option for parents to meet their child's needs.

I have three children in the Juneau School District public school system. I chose to enroll in the lottery when my eldest child was in the first grade. Luckily she got in the charter school and since the second grade it has been a wonderful educational and social environment for her and her siblings.

While I attended Arizona State University as a college student, I took almost every math class offered. I have always loved math and the sciences. The methods used to teach math at the charter school are rigorous, build solid understandings of number patterns and such strong flexibility in solving problems that I sincerely wished I had had the opportunity to be exposed to and to learn math in such a progressive, skill-building, visual way. It is exciting to see students experience this type of meaningful math.

I attended public school throughout my life and I loved school, however I believe my children are far more comfortable and intensely involved in their projects while also thoroughly enjoying attending school. They are being given an exceptional chance to become all they can. The projects that incorporate writing, research, art, social studies/science and teambuilding are solid methods of fun and learning. The parents of these students become involved as well and work hard to support this small charter school.

The Juneau Community Charter School is in need of financial support. Parents contribute by supporting teachers in the classroom, helping teachers prep for the week to come, we work around the school facility to build shelves, clean and make it work efficiently. Parents also work very hard to fundraise to meet the financial commitments it takes to run the charter school. It is sorely underfunded at present.

The charter school has been part of the Juneau School District, serving a wide array of students for over ten years. It sets high standards and builds leadership, competence and love of our environment in such a compassionate manner.

To be very honest, if it were not for the charter school, I know I would begin a small child-care business and home school my children.

It has been stated, from President Obama to our Governor's State of the State, that education is one of the top legislative priorities. I sincerely hope that funding small

charter schools, through creative use of resources, educate children in a way that many children need, to become successful is also a priority within your committee.

In Alaska, small charter schools are funded dramatically lower per student compared to district counterparts. This bill recognizes charter schools as important options and is an attempt to balance educational funding per student at a reasonable percentage.

Please continue your support and know that small charter schools are doing important works on behalf of students all across Alaska, in particular here in Juneau. Please know that besides the many, many parents and educators who believe in the success of small charter schools and its' students high achievement, test scores and critical thinking skills we have no lobbying force to help other Senators or House members understand this issue. Please I ask each of you to help by sharing your support for SB 57.

Thank you for your work on behalf of Senate Bill 57.

Sincerely,

Beth Rivest, wife of a hard-working, small business owner; loving and caring parent of three wonderful children; and a member of the Juneau Community.

Subject: Fwd: Thank you for Senate Bill 57

Dear Members of the Senate Education Committee: My wife and I are forwarding a copy of this email that we sent to Senator Kim Elton earlier this week. We are sending this to you so that you can see how much we appreciate his co-sponsorship of Senate Bill 57, and so that you will know that we are grateful to you for considering this bill. Thank you for the support you've provided charter schools in the past; we hope you will support this effort to assist Alaska's small charter schools, which currently operate under an inequitable and unsustainable funding scheme. We look forward to the discussion about the bill at your Thursday meeting.

Sincerely,

Tony and Linda Newman
newman@alaska.net

Begin forwarded message:

> **From:** Linda Newman <newman@alaska.net>
> **Date:** January 25, 2009 11:11:53 PM AKST
> **To:** Senator_Kim_Elton@legis.state.ak.us
> **Subject: Thank you for Senate Bill 57**
>
> Senator Elton: Every year for the past several we've written to you to ask for your help in trying to fund Alaska's small charter schools, including Juneau's, in a more equitable way. We're extremely pleased and excited to be able to write to you tonight and thank you for taking leadership on this issue right away this session, by cosponsoring Senate Bill 57.
>
> If this bill successfully makes it through the legislative process and passes into law this year it will provide relief to the Juneau Community Charter School just in the nick of time. We know that we've said in my prior letters to you that the situation is already urgent, but this year, for the first year in the seven years that we've been involved as parents of JCCS students, we are operating at a budget deficit and drawing down the school's savings. We probably have less than two years of funding left at the rate we're depleting the savings. The Charter School simply can't operate indefinitely on the unfair funding formula that leaves charter schools funded at a per-student rate that is significantly lower than other similar-sized schools in the district. We've all but resigned ourselves to the fact that our kids' school will likely need to close in a year or two because it will simply run out of money. (Believe us, we've exhausted ourselves trying to fundraise out of this mess.)
>
> The importance of this bill for all of Juneau's kids is demonstrated by the fact that the Juneau School District has made more equitable small charter school funding one of its legislative priorities this year, and has resolved to support us in our efforts to correct the current funding inequity. We've just reviewed the bill and have exchanged a few emails with our fellow Charter School parents, and we are in agreement that the approach outlined

through this bill may be the best one yet. This bill makes it possible for small schools to operate, but still maintains the legislature's intent to encourage the formation of larger schools.

In our prior-year emails and letters to you on this issue we've taken much time and space to tell you about our kids and how much they--our whole family--gain from our participation in Juneau's Charter School. All of those things remain true. Our kids are learning so much and so well, but best of all, the Charter School has become an important part of all our lives because of the community that's grown around it.

Let us know what you would like us to do to assist you in securing passage of this bill this year.

Sincerely,

Tony and Linda Newman

Senator Elton,

I quick word in support of the funding formula equalization bill. I am a charter school parent. We do school jobs to save our school money to make our program happen. My wife and I perform janitorial service and recess duty to save cost. Its not that we mind doing these jobs but we would like to be able to spend our volunteer efforts on jobs that would directle lead to improving oue children's educational experience. AS it is the Juneau charter school is an educational success meeting core standards and for all social classes. Please help us help our kids.

FOR AN ACT ENTITLED

"An Act relating to use of child safety seats and seat belts."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 19.10.095 is amended to read:

Sec. 19.10.095. Signs promoting the use of safety belts and child safety devices. The department may erect and maintain signs encouraging the use of safety belts **and child safety devices** at the site of a motor vehicle accident where a fatality occurred as the result of a person's failing to use a safety belt **or child safety device**. This section does not limit the authority of the department to erect or maintain signs to protect the public safety and welfare of persons using the highways of the state.

*** Sec. 2.** AS 28.05.095(b) is amended to read:

(b) Except as provided in (c) of this section, a driver may not transport a child under the age of 16 in a motor vehicle unless the driver has provided the required safety device and properly secured each child as described in this subsection. A [IF THE] child

(1) less than one year of age or a child one year of age or older who

weighs less than 20 pounds shall be properly secured in a rear-facing child safety seat that meets or exceeds [IS LESS THAN FOUR YEARS OF AGE, THE CHILD SHALL BE PROPERLY SECURED IN A CHILD SAFETY DEVICE MEETING THE] standards of the United States Department of Transportation **and is used in accordance with the manufacturer's instructions;**

(2) one or more years of age but less than five years of age who weighs 20 pounds or more shall be properly secured in a child restraint device that meets or exceeds the standards of the United States Department of Transportation and is used in accordance with the manufacturer's instructions;

amend 1 65 adopted

(3) over four years of age but less than eight years of age who is less than 57 inches in height and weighs 20 or more pounds but less than 80 pounds shall be properly secured in a booster seat that is secured by a seat belt system or by another child passenger restraint system that meets or exceeds the standards of the United States Department of Transportation and is used in accordance with the manufacturer's instructions;

(4) over four years of age who exceeds the height and weight requirements in (3) of this subsection shall be properly secured in a seat belt;

(5) eight years of age [FOR A CHILD SAFETY DEVICE FOR INFANTS. IF THE CHILD IS FOUR] but **less than** [NOT YET] 16 years of age **who does not exceed the height and weight requirements in (3) of this subsection** [, THE CHILD] shall be properly secured in a child safety device approved for a child of that [AGE AND] size by the United States Department of Transportation or in a safety belt, whichever is appropriate for the particular child **as determined by the driver**.

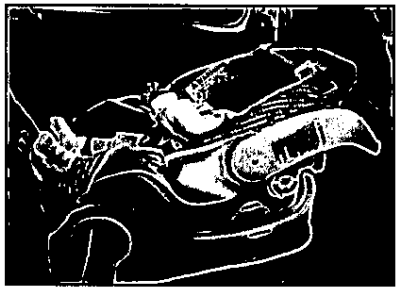
SB 72

Child Safety Seats and Seat Belts



1) A child under one year, or over one year but under 20 pounds shall be secured in a rear facing child safety seat

2) A child one to four years of age who is over 20 pounds shall be properly secured in a child restraint device.

3) A child over four years, but under eight years who is less than 57 inches and under 80 pounds shall be secured in a booster type seat or another child passenger restraint system secured by a belt system.

4) A child over four years of age who exceeds the height and weight requirements of **3)** shall be secured in a seat belt.

5) A child between the ages of eight and sixteen who does not meet the height and weight requirements of **3)** shall be secured in a child safety device or a seat belt, whichever is appropriate.

AS 28.05.098 - A person may not sell, offer for sale, or install a child safety device that does not meet federal standards

(COPY ON FILE)

Alaska State Legislature

Senator Hollis French

Sponsor Statement

SB 72 - Child Safety Seats and Seat Belts

Booster seats save lives. Of the 61 children under the age of eight injured in auto accidents in Alaska between 2001 and 2005, only five were considered properly restrained by federal standards. Nearly two thirds of those 61 children were between the ages of four to eight, making the injured too large for a car seat but too small for an adult seat belt.

Current Alaska law requires the use of proper safety devices for children under the age of 16 as approved by the US Department of Transportation. The National Highway Traffic Safety Administration recommends that children under 80 pounds and under 57'' use a child safety seat or a belt positioning booster seat. SB 72 puts USDOT National Highway Traffic Safety Administration (NHTSA) recommendations in statute, clarifying for law enforcement officials what devices are required for proper child restraint.

All safety devices, boosters and child seats must meet or exceed the standards set out by the United States Department of Transportation.

As of September 2008 43 other states mandate booster seat use. While any restraint is better than no restraint, national studies have shown booster seats to be sixty percent safer than seat belts alone when used by children of the correct height, weight and age. The rough cost of a booster seat ranges from $25 to $100, depending on the model. By passing this legislation, the state of Alaska will become eligible for close to $200,000 in federal highway safety funds.

Please join me in promoting passenger safety by supporting this legislation.

MEMORANDUM

Date: 4/11/2009

To: Representative Bill Stoltze, Co-Chair
Representative Mike Hawker, Co-Chair
House Finance Committee

From: Senator Hollis French HSF

RE: Summary of changes - SB 72 Child Safety Seats and Seat Belts

---

This memo describes the changes made to Senate Bill 72 during this legislative session.

HOUSE STATE AFFAIRS CS FOR SENATE BILL NO. 72:

The House State Affairs committee passed a conceptual amendment for children between 8 and 15 years old who do not fit neatly into the other categories. The amendment makes clear that the driver of the car is empowered to decide whether the child uses a booster seat or a regular seat belt.

HOUSE CS FOR CS FOR SENATE BILL NO. 72 (TRA):

This CS added a new Section 1 to the bill, which specifies that the Department of Transportation can erect signs encouraging the use of child safety devices where a fatality occurred as a result of a child not being properly restrained. Section 1 of the original draft is now Section 2 of the bill.

CS FOR SENATE BILL NO. 72(STA)

This CS made two minor changes:

1. Page 1 line 15: Changed the phrase "over twenty pounds" to "twenty pounds or more." This change was recommended by the Department of Transportation's Chief Counsel to make it extra clear that children who weigh 20 pounds or more

require the use of a child restraint device. Before, with the bill specifying requirements for children under 20 pounds and children over 20 pounds, the legislation could be read as not requiring any special restraints for children weighing exactly 20 pounds.

2. Page 2 line 12: Changed "not yet 16 years of age" to "less than 16 years of age." This doesn't change the bill at all - it is purely stylistic to match everywhere else in the bill that refers to individuals below a certain age.

Report from the Alaska Trauma Registry on Motor Vehicle Injuries to Children

A query of the Alaska Trauma Registry data for the most recent years available, 2001-2005, identifies 61 children, from birth through eight years of age, seriously injured in a motor vehicle crash on the highway. The National Highway Traffic Safety Administration recommends that children be restrained in a child safety seat or belt positioning booster seat up through age eight.

All of these injuries required admission to the hospital, three died, and one two-year-old's injuries resulted in quadriplegia. **Only five of the 61 injured children were recorded to have been restrained properly in the recommended child safety seat at the time of injury** – and none of the four mentioned above was properly restrained. There was one additional injury, not included in the 55, which involved a fetus who was subsequently delivered by C-section.

A further breakdown of age groups and safety equipment use is as follows:

< 1 year:	7 injured	3 restrained in child safety seats; **4 unrestrained**
1 year old:	4 injured	1 restrained in a child safety seat; **1 unrestrained**; 2 unrecorded
2 years old:	5 injured	2 in child safety seat (**1 child seat failed-was ejected**); **2 with safety belt/harness; 1 unrestrained**
3 years old:	6 injured	**1 lap belt only; 5 unrestrained**
4-8 years old:	39 injured	**15 with safety belt/harness; 9 lap belt only; 11 unrestrained**; 4 unrecorded

Total: 61

Clearly the incidence of not using restraints is very high among the injured population in this study. However, also remarkable, is the incidence of improper restraint, especially among children ages 4 through 8. Without belt positioning booster seats, this group is not adequately protected during a motor vehicle crash.

Child restraint laws

March 2009

Overview | Safety belt use laws | Children not covered by safety belt or child restraint laws

	Who is covered?		
State	**Must be in child restraint**	**Adult safety belt permissible**	**Maximum fine 1st offense**
Alabama	younger than 1 or less than 20 pounds in a rear-facing infant seat; 1 through 4 years or 20-40 pounds in a forward-facing child safety seat; 5 but not yet 6 in a booster seat.	6 through 14 years	$25[1]
	law states no preference for rear seat		
Alaska	3 years and younger	4 through 15 years	$50[1]
	law states no preference for rear seat		
Arizona	4 years and younger	not permissible	$50
	law states no preference for rear seat		
Arkansas	5 years and younger and less than 60 pounds	6 through 14 years or 60+ pounds	$100
	law states no preference for rear seat		
California	5 years and younger or less than 60 pounds[2]	6 through 15 years or 60+ pounds	$100[1]
	children 5 years and younger or less than 60 pounds must be in the rear seat[2]		
Colorado	younger than 1 year and less than 20 pounds in a rear-facing infant seat; 1 through 3 years and 20-40 pounds in a forward-facing child safety seat; 4 through 5 years and less than 55 inches in a booster seat[3]	6 through 15 years or 55 inches or more	$50
	law states no preference for rear seat		
Connecticut	younger than 1 year or less than 20 pounds in a rear-facing restraint system; 1 through 6 years who is less than 60 pounds in a child restraint system (booster seats may only be used in a seating position with a lap and shoulder belt)	7 through 15 years and 60+ pounds[4]	$60[4]
	law states no preference for rear seat		
Delaware	7 years and younger and less than 66 pounds[5]	8 through 15 years or 66+ pounds[5]	$25
	children 11 years and younger and 65 inches or less must be in rear seat if passenger airbag is active[5]		
District of Columbia	7 years and younger	8 through 15 years	$75[1]
	law states no preference for rear seat		
Florida	3 years and younger	4 through 5 years	$60[1]
	law states no preference for rear seat		
Georgia	5 years and younger and 57 inches or less[6]	more than 57 inches	$50[1]
	5 years and younger must be in rear seat if available[6]		
Hawaii	3 years and younger in a child safety seat; 4 years through 7 years must be in a booster seat or child restraint	4 through 7 years who are taller than 4'9"; 4 through 7 years who are at least 40 pounds seated in a rear seat where if there are no available lap/shoulder belts, may be restrained by a lap belt	$100[7]

	law states no preference for rear seat		
Idaho	6 years and younger	not permissible	$100
	law states no preference for rear seat		
Illinois	7 years and younger	8 through 15 years; children who weigh more than 40 pounds seated in the rear where only a lap belt is available	$50
	law states no preference for rear seat		
Indiana	7 years and younger when driver holds an Indiana license[8]	8 through 15 years	$25[1]
	law states no preference for rear seat		
Iowa	younger than 1 year and less than 20 pounds in a rear-facing child seat; 1 through 5 years	6 through 10 years	$25
	law states no preference for rear seat		
Kansas	all children 3 and younger must be in a child restraint; children 4 through 7 who weigh less than 80 pounds and children 4 through 7 who are less than 57 inches tall must be in a child restraint or booster seat	all children 8 through 13 years; children 4 through 7 years who weigh more than 80 pounds, and children 4 through 7 years who are taller than 57 inches	$60
	law states no preference for rear seat		
Kentucky	40 inches or less in a child restraint; 6 and younger who are between 40 and 50 inches tall in a booster seat	6 and younger who are taller than 50 inches	$50 child restraint; $30 booster seat
	law states no preference for rear seat		
Louisiana	younger than 1 year or less than 20 pounds in a child safety seat; 1 through 3 years or 20-39 pounds in a forward-facing child safety seat; 4 through 5 years or 40-60 pounds in a child booster seat	6 through 12 years or greater than 60 pounds	$100
	law states no preference for rear seat		
Maine	less than 40 pounds in a child safety seat; 40-80 pounds and less than 8 years in a safety system that elevates the child so that an adult seat belt fits properly	8 through 17 years or less than 18 years and more than 4'9"	$50
	11 years and younger and less than 100 pounds must be in rear seat if available		
Maryland	7 years and younger and either less than 57 inches or 65 pounds or less	8 through 15 years; children who are at least 57 inches or 65 pounds	$25
	law states no preference for rear seat		
Massachusetts	7 years and younger and less than 57 inches	8 through 12 years; children who are at least 57 inches tall	$25
	law states no preference for rear seat		
Michigan	7 years and younger and less than 57 inches	8 through 15 years; children who are at least 57 inches tall	$10
	law states no preference for rear seat		
Minnesota	3 years and younger	not permissible	$50
	law states no preference for rear seat		
Mississippi	3 years and younger must be in a child restraint; 4 through 6 years and either less than 57 inches or less than 65 pounds must be in a booster seat	6 years and younger who either weigh 65 pounds or more or who are 57 inches or taller	$25
	law states no preference for rear seat		

Missouri	3 years and younger must be in a child restraint; all children who weigh less than 40 pounds must be in a CR; 4 through 7 years who weigh at least 40 pounds but less than 80 pounds and who are 4'9" or shorter must be in either a CR or booster seat; children 4 years and older who weigh at least 80 pounds or who are at least 4'9" tall must be in either a booster seat or safety belt	all children 8 through 16 years; all children 4 years and older who weigh 80 pounds or more or who are taller than 4'9"	$50; $10 for violations involving children taller than 4'9" or who weigh 80 pounds or more
	law states no preference for rear seat		
Montana	5 years and and younger and less than 60 pounds	not permissible	$100
	law states no preference for rear seat		
Nebraska	5 years and younger	6 through 17 years[9]	$25[1]
	law states no preference for rear seat		
Nevada	5 years and younger and 60 pounds or less	not permissible	$500[10]
	law states no preference for rear seat		
New Hampshire	5 years and younger who are less than 55 inches	6 through 17 years; younger than 6 who are at least 55 inches tall	$25
	law states no preference for rear seat		
New Jersey	7 years and younger and less than 80 pounds	not permissible	$25
	children 7 years and younger and less than 80 pounds must be in the rear seat if available		
New Mexico	younger than 1 year in a rear-facing infant seat; 1 through 4 years or less than 40 pounds in a child safety seat; 5 through 6 or less than 60 pounds in a booster seat	7 through 17 years	$25
	children younger than 1 year in a rear-facing infant seat must be in the rear seat if available		
New York	3 and younger unless they weigh more than 40 pounds and are seated where there is no available lap/shoulder belt; 4 through 6 years unless they are seated where there is no available lap/shoulder belt	7 through 15 years; children who weigh more than 40 pounds or children 4 through 6 years in a seating position where there is no available lap/shoulder belt	$100[1]
	law states no preference for rear seat		
North Carolina	7 years and younger and less than 80 pounds	8 through 15 years + children 40-80 pounds in seats without shoulder belts	$25[1]
	children 4 years and younger who weigh less than 40 pounds must be in the rear seat unless the front passenger airbag is deactivated or the restraint is designed for use with airbags		
North Dakota	6 years and younger and less than 57 inches or less than 80 pounds	7 through 17 years; 6 years and younger and at least 57 inches tall and at least 80 pounds; 6 years and younger and at least 40 pounds, if there are no available lap/shoulder belts, may be restrained by a lap belt	$25[1]
	law states no preference for rear seat		
Ohio	3 years and younger or less than 40 pounds in child restraint; 4 through 7 years who weigh 40 pounds or more and who are shorter than 57 inches in booster seat (effective 10/07/09)	8 through 14 years[11] (effective 10/07/09)	$75[11] (effective 10/07/09)
	law states no preference for rear seat		
Oklahoma	5 years and younger[12]	6 through 12 years	$25
	law states no preference for rear seat		

Oregon	younger than 1 year or 20 pounds or less must be in a rear facing child safety seat; 40 pounds or less must be in a child safety seat; more than 40 pounds but 4 feet and 9 inches or less must be in a safety system that elevates the child so that an adult seat belt fits properly	taller than 4 feet and 9 inches	$90
	law states no preference for rear seat		
Pennsylvania	7 years and younger[13]	not permissible	$100
	law states no preference for rear seat		
Rhode Island	6 years and younger and less than 54 inches and less than 80 pounds	6 years and younger who either weigh 80 pounds or more or who are at least 54 inches tall; 7 through 17	$75
	children 6 years and younger must be in rear seat if available		
South Carolina	younger than 1 year or less than 20 pounds in a rear-facing infant seat; 1 through 5 years and 20-39 pounds in a forward-facing child safety seat; 1 through 5 years and 40-80 pounds in a booster seat secured by lap-shoulder belt (lap belt alone is impermissible)	1 through 5 years and 80+ pounds or any child 5 years and younger if the child's knees bend over the seat edge when sitting up straight with his/her back firmly against the seat back	$150
	children 5 years and younger must be in rear seat if available		
South Dakota	4 years and younger and less than 40 pounds	5 through 17 years; all children 40+ pounds, regardless of age	$20
	law states no preference for rear seat		
Tennessee	younger than 1 year or 20 pounds or less in a rear-facing infant seat; 1 through 3 years and 20+ pounds in a forward-facing infant seat; 4 through 8 years and less than 4'9" in a booster seat	9 through 15 years or any child 12 or younger who is 4'9" or taller	$50
	children 8 years and younger and less than 4'9" must be in rear seat if available; rear seat recommended for children 9 through 12		
Texas	4 years and younger and less than 36 inches	not permissible	$200
	law states no preference for rear seat		
Utah	7 years and younger and shorter than 57 inches	8 through 15 years; all children 57 inches or taller	$45
	law states no preference for rear seat		
Vermont	younger than 1 year or less than 20 pounds in a rear-facing infant seat; 2 through 7 and more than 20 pounds	8 through 15 years and more than 20 pounds	$25
	children 1 year and younger or less than 20 pounds must be in the rear seat unless the front passenger airbag is deactivated		
Virginia	7 years and younger unless they have a physician exemption[14]	8-15 years[14]	$50
	children in rear-facing devices must be in a rear seat if available; if not available, they may be placed in front only if front passenger airbag is deactivated[14]		
Washington	7 years and younger and less than 4'9"	8 through 15; 7 years and younger and 4'9" or taller; children who weigh more than 40 pounds in a seating position where there is only a lap belt available	$124
	12 years and younger must be in rear seat if practical		
West Virginia	7 years and younger and less than 4'9"	7 years and younger and 4'9" or taller	$20
	law states no preference for rear seat		

Wisconsin	children younger than 1 and all children who weigh less than 20 pounds are required to be in a rear-facing infant seat; children 1 through 3 years who weigh at least 20 pounds but less than 40 pounds are required to be in a forward-facing child safety seat; children 4 through 7 who both weigh at least 40 pounds but less than 80 pounds and who are less than 57 inches tall are required to be in a booster seat	8 years and younger and more than 80 pounds and 57 inches or taller	$75
	children 3 and younger must be in a rear seat, if available		
Wyoming	8 years and younger	not permissible	$50
	children 8 years and younger must be in the rear seat if available		

[1]This state assesses points for violations.

[2]In California, children weighing more than 40 pounds may be belted without a booster seat if they are seated in the rear seat of a vehicle not equipped with lap/shoulder belts. The California rear seat requirement does not apply if: there is no rear seat; the rear seats are side-facing jump seats; the rear seats are rear-facing seats; the child passenger restraint system cannot be installed properly in the rear seat; all rear seats are already occupied by children under 12 years; or medical reasons necessitate that the child not ride in the rear seat. A child may not ride in the front seat of a motor vehicle with an active pasenger airbag if the child is under 1 year of age, or weighs less than 20 pounds or is riding in a rear-facing child restraint system.

[3]In Colorado, if a child 4-5 years and less than 55 inches is being transported in a vehicle equipped with a lap belt only, then the child must be restrained with the lap belt. The law is secondary for children ages 4-5 years who must be in booster seats.

[4]The fine in Connecticut is $15 if the child is 4-16 years and 40 pounds or more. Connecticut also requires a mandatory child restraint education program for first or second violation.

[5]In Delaware, children younger than 12 years/65 inches or less must be restrained in a rear seat if a vehicle has a passenger airbag unless the airbag has been either deactivated or designed to accommodate smaller people. Exceptions: no rear seat or rear seat occupied by other children younger than 12 years/65 inches or less.

[6]In Georgia, children weighing more than 40 pounds are permitted to be restrained in the back seat of a vehicle by a lap belt if the vehicle is not equipped with lap and shoulder belts or when the lap and shoulder belts are being used by other children who weigh more than 40 pounds.

[7]Hawaii drivers are charged $50 for a mandatory child restraint education program and a $10 surcharge deposited into a neurotrauma special fund.

[8]In Indiana, children younger than 8 years must be restrained in adult belts if it's reasonably determined they cannot fit in child restraints. If the driver does not hold an Indiana driver's license, then children under 16 must be restrained by either a child restraint or a safety belt. Children weighing more than 40 pounds are permitted to be restrained by a lap belt if the vehicle is not equipped with lap and shoulder belts or if all lap and shoulder belts other than those in the front seat are being used to restrain other children who are younger than 16.

[9]Nebraska's law is secondary for those children who may be in safety belts and standard for those who must be in a child restraint device.

[10]In Nevada, the minimum fine is $100. An alternative to the fine is at least 10 but not more than 50 hours of community service.

[11]In Ohio, the law is secondary for children 4 through 14 years.

[12]In Oklahoma, children weighing more than 40 pounds are permitted to be restrained in the back seat of a vehicle by a lap belt if the vehicle is not equipped with lap and shoulder belts or when the lap and shoulder belts are being used by other children who weigh more than 40 pounds.

[13]In Pennsylvania, the law is secondary for children ages 4 through 7 years who must be in booster seats.

[14]In Virginia, children at least 4 years but less than 8 years may be belted if any licensed physician determines that use of a child restraint system by a particular child would be impractical by reason of the child's weight, physical fitness, or other medical reason, provided that any person transporting a child so exempted shall carry on his person or in the vehicle a signed written statement of the physician identifying the child so exempted and stating the grounds for the determination.

Jill Hodges
Alaska Brain Injury Network
3745 Community Park Loop #140
Anchorage, Alaska 99501
February 10, 2009

Senator Hollis French
Alaska State Legislature
Capitol Building
Juneau, Alaska

Dear The Honorable Hollis French:

Thank you for your continued concern for safety for Alaskans, as well as prevention of injury and death. SB 72 –Child Safety Seats and Seat Belts will help prevent death as well as traumatic brain injury in children.

The Alaska Brain Injury Network is a non-profit 501 (c) 3 whose mission is to educate, plan, coordinate, and advocate for a comprehensive service delivery system for survivors of traumatic brain injury and their families. Our vision begins with prevention.

There are 800 Alaskans each year hospitalized for more than 24 hours with a moderate to severe traumatic brain injury (Alaska Trauma Registry). Motor vehicle crashes are one of the leading causes of traumatic brain injury in Alaska. The Alaska Brain Injury Network, "10 Year Plan for TBI in Alaska" highlights Prevention, Advocacy, and Public Awareness on pages 49-57 (http://www.alaskabraininjury.org/documents_akbrain/10%20Year%20TBI%20Plan.pdf) with a specific objective "to prevent TBI in child occupants of motor vehicle crashes through correct booster seat use." (attachment).

Centers for Disease Control and Prevention highlights traumatic brain injury as the 'silent epidemic' and a public health issue. There are many causes of traumatic brain injury and preventative factors are specific to each cause. The CDC recommends wearing a seatbelt every time you drive and buckling children in the car using a child safety seat, booster seat, or seat belt (according to the child's height, weight, and age) (http://www.cdc.gov/ncipc/tbi/Prevention.htm).

In 2003, the Alaska Legislature passed legislation for a primary seatbelt law. The TBI rate due to motor vehicle crashes on the highway has decreased 38% from 2001 to 2005

(attachment). The Alaska Brain Injury Network will continue to study the TBI data to see if TBI-disability among children due to motor vehicle crashes decreases.

Thank you for your concern and your untiring pursuit of keeping Alaskans safe. You have our support.

Sincerely,

Jill Hodges

ATTACHMENT 1:

(Alaska Brain Injury Network "10 year plan for TBI in Alaska p. 55
http://www.alaskabraininjury.org/documents_akbrain/10%20Year%20TBI%20Plan.pdf)

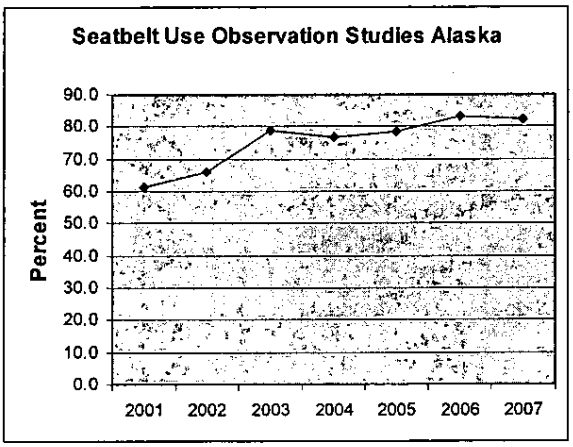
Goal 2: Reduce the incidence of TBI-related disability

Objectives
A. To prevent TBI in child occupants of motor vehicle crashes through correct booster seat use.
B. To prevent TBI in young Alaskans in off-road vehicle and bicycle crashes through helmet use.
C. To reduce risky behaviors among teens.
D. To prevent TBI in elders due to falls through awareness and training of long-term care, community service providers and other caretakers.
E. To prevent repetitive injuries by educating individuals with TBI, family members and others about the risk of second and third injuries.
F. To promote collaboration among prevention agencies and organizations to include TBI in the prevention message (in addition to fatalities).
G. To reduce TBI among elders due to falls.

ATTACHMENT 2:

Primary Enforcement Seatbelt Law

On May 1, 2003 Alaska passed a law to change their seat belt law from secondary enforcement to primary enforcement state, ie. a vehicle can be stopped solely for seat belt non-use by an occupant. A study of Alaska has seen a steady increase in seatbelt use in the last decade. In 2007 the percent use as seen in the annual observations study was 82.4%. The national rate is 82%. The NHTSA goal is 95% use.



Source: Alaska Highway Safety Office

States with primary seat belt laws on average had seat belt use rates about 10 percentage points higher than States without primary laws in 2005. Wearing a seat belt is the best defense for an occupant in a motor vehicle crash and the single most effective measure to prevent serious traumatic brain injury. 56% of Alaskans with TBI resulting from a motor vehicle crash on the highway were not wearing seat belts. If every state with a secondary seat belt law upgraded to primary enforcement, about 1,000 lives and $4 billion in crash costs could be saved each year.

Senator Hollis French
Alaska State Senate
State Capitol
Juneau AK 99801-1182

Dear Senator French:

On behalf of the Alaska Peace Officers Association (APOA), I would like to thank you for introducing Senate Bill 72, an act relating to use of child safety seats and seat belts.

The APOA State Board and Legislative Committee reviewed this proposed legislation and unanimously support this bill.

Thank you for addressing this issue. Please contact the APOA office in Anchorage at 277-0515 if there is anything our organization can do to assist in the passage of this bill.

Sincerely,

Angella Long
State President

VIA HAND DELIVERY

April 9, 2009

House State Affairs Committee
The Honorable Bob Lynn, Chair
Alaska House of Representatives
State Capitol, Room 104
Juneau, Alaska 99801-1182

Re: Support for SB 72 - Child Safety Seats and Seat Belts

Dear Representative Lynn and Members of the State Affairs Committee:

I am pleased to express State Farm's strong support for SB 72 - "Child Safety Seats and Seat Belts." We encourage your committee to hear this bill and pass it out as soon as possible. This legislation will not only result in $200,000 in federal highway safety funds, more importantly it will without question reduce injury and even save the lives of some of Alaska's young children. The bill really only involves implementation of safety standards approved by the US Department of Transportation.

We recognize the session is coming to a close and it is a busy time, but we respectfully ask you to have this bill heard in your committee this Saturday and pass it out. With any luck and some coordination of effort, we can get this bill passed this year. As you know, a similar bill went through an extensive committee process over a two year period in the 25th Legislature, only to be delayed at the last moment. This bill has been heard extensively this session. Further delay until next session would mean no federal highway funds and, more importantly, another year of injury and death that could have been prevented. Thank you for your prompt consideration of this bill.

Sincerely,

Sheldon E. Winters
Lobbyist for State Farm Insurance

cc: Senators French & Paskvan
Representatives Holmes, Harris, Gruenberg, Millett

SEW/cafsB 72 letter of support to House SA.wpd

ADVOCATES
for Highway & Auto Safety

March 17, 2009

To the House Transportation Committee:

Vote YES on Senate Bill 72

As president of Advocates for Highway and Auto Safety (Advocates), I urge you to support **Senate Bill 72**, legislation that will save the lives of children in Alaska. **SB 72** would require children age four to age eight, who are less than 57 inches in height, and weigh between 20 and 80 pounds, to be secured in a vehicle with a child booster seat that meets federal safety standards. Advocates is a nonprofit coalition of consumer, safety, medical, law enforcement, and insurance organizations working to improve highway safety, and booster seat laws are one of our top priorities.

This bill is common sense legislation supported by science. According to the National Highway Traffic Safety Administration (NHTSA), the American Academy of Pediatrics, and The Children's Hospital of Philadelphia, booster seats are critical for children who have outgrown child safety seats but are not big enough for adult seat belts to fit them properly. Children who are not restrained in a booster seat are 3.5-times more likely to suffer a serious injury and four times more likely to suffer a significant head injury than if they were properly restrained. Booster seats reduce the risk of injury by 59 percent compared to the use of seat belts only. Nearly every state has some form of a booster seat requirement, and Alaska needs to join these ranks by adopting this lifesaving legislation.

Some opponents of booster seat legislation argue that the decision about protecting a child in a booster seat should be left to the parent or caregiver. While the safety of a child is the responsibility of parents and caregivers, they rely on state law to set the standard for proper protection in motor vehicles, as is the case with child safety seat and seat belt laws. Other opponents of this bill argue that parents and caregivers are already too burdened with things they need to do for their children, and car-pooling presents challenges. If parents and caregivers are willing to transport children with sports equipment to protect them from getting injured on the soccer field, they surely should be concerned about a child's life while riding in a motor vehicle, the most dangerous activity of the day. Another misconception is that booster seats are very costly. Many booster seats cost approximately the same as a tank of gas.

A 2004 Lou Harris public opinion poll commissioned by Advocates found that over 80 percent of those surveyed support extending child safety seat laws to include booster seats. For this and all the other reasons state above, **we urge you to vote YES on SB 72.**

Sincerely,

Judith Lee Stone

Safe Kids®
Alaska

February 4, 2009

The Honorable Senator Hollis French and Members of the State of Alaska Legislature

Dear Senator French and Member of the Alaska Legislature,

On behalf of Safe Kids Alaska, I urge you to support Senate Bill 72, the proposed upgrade to Alaska's child passenger safety law. I strongly urge you to approve this legislation in its entirety during the current legislative session.

As you may know, motor vehicle crashes remain the leading cause of unintentional injury-related death among children ages 14 and under. Each year, nearly 1,600 child occupants ages 14 and under die in motor vehicle crashes and close to 228,000 are injured as occupants in motor vehicles. Unrestrained children are more likely to be injured, to suffer more severe injuries, and to die in motor vehicle crashes than children who are restrained.

We know that strong occupant protection laws that are consistently enforced are one of the best ways to prevent injuries and save children's lives. Senate Bill 72, if enacted into law, would close a significant gap in Alaska's child occupant protection law by clearly requiring some older children to ride properly restrained in a booster seat or high-weight-harness child restraint, secured by the motor vehicle's safety belt system.

If Safe Kids Alaska can be of any assistance to you regarding Senate Bill 72, please do not hesitate to contact me. Thank you for your leadership on this important safety initiative for Alaska's children!

Sincerely,

Sara L. Penisten, RN, BSNS, CPSTI
Safe Kids Alaska State Coalition Coordinator
Child Passenger Safety Technician Instructor

Alaska State Legislature January 31, 2009

Support Letter: SB 72: Child Safety Seats and Seat Belts

As a private citizen, I support clarification of the current Alaska Child Passenger Safety Law by re-writing, in terms more easily understood, the recommendations of the Departments of Transportation and NHTSA. The reference for parents to look and follow DOT recommendations was always the goal of the original 1985 law.

Correct positioning of children riding in cars and booster seats DO save lives and DO prevent life long injuries. We have discovered since the writing the original law, through the advancement of technology, of on-scene crash investigations, hands-on emergency trauma treatment, through pediatric intensive care, and months, if not years, of rehabilitation due to the serious consequences of non-use and misuse of child restraints, how current law has been the misinterpreted.

I have been an emergency department registered nurse in three major western trauma centers during my 42 professional years. The last 22 of those years, I worked in the largest emergency department in an Anchorage, Alaska and coordinated a statewide, national injury prevention program for children.
Currently, in "retirement", I serve as the Chair of the Alaska Committee for Child Passenger Safety (CPS) and am a nationally certified CPS Instructor.

Beginning in 1987 in Alaska, CPS technicians and instructors began "checking" car seats, educating parents and caregivers how to choose and correctly install seats. Annual evaluation of thousands of car seat "check" records, indicated an 85% misuse rate in the most commonly used seats, with three or more critical errors. We also continued to find, through the years, parents and caregivers misunderstood the Alaska Child Passenger Safety Law. Most, when questioned, said the law allowed children to turn forward facing BEFORE one year of age and children could MOVE to a "safety belt" at age 4.

Due to muscle instability and bone growth, children MUST remain rear facing until they are at the very least one-year of age and 20 pounds. The American Academy of Pediatrics recommends, baring any medical conditions, children remain rear facing for even longer depending on the range of the car seat. Car seat belts (lap only and lap-shoulder) were designed by all car manufacturers for individuals over 4 foot 9 inches and heavier than originally indicated, fitting over the upper thighs, across the chest, with knees bent at seat edge, feet touching the floor, holding an individual safely in the restraint.

It is past time to join the majority of states and update Alaska's Child Passenger Safety Law. We have the knowledge and the data indicating children are at risk if not secured properly and secured in booster seats for a longer period than previously indicated. Parents look to our current law for guidance and have been confused, putting children at risk.

There is nothing quite so tragic as the loss of a child due to preventable injuries.

Thank you for your consideration: Margaret (Peggy) Hayashi, R.N.

Alaska Auto Dealer's Association
P.O. Box 71577
Fairbanks, Alaska 99707

February 4, 2009

Re: SB 72

To All Members of the House and Senate:

The Alaska Auto Dealers Association Board of Directors passed a unanimous resolution in support of SB 72 and we urge you to support this worthy bill. The same bill was introduced as SB 218 during the last session. The bill was unanimously supported in all committees and in the Senate. Unfortunately, time ran out before the bill could be heard on the House floor. SB 72 bill, if passed, will help protect young children by updating the current infant and booster seat law which has become outdated.

For example, the current law gives the parent the option of placing a small four year old in a booster seat or utilizing a seat belt. Vehicle safety systems have advanced dramatically since the current law was written with a variety of active and passive safety devices being added to vehicles. Front, side and curtain airbags, which have tremendous explosive force if triggered, are just one example of safety devices that weren't in existence when the current law was written.

As automobile dealers, we can assure you that no vehicle manufacturer recommends placing a small four year old in a seat belt only. Doing so could result in serious injury or death to the child.

Nearly forty two states have updated their infant and booster seat laws along the lines proposed. By adopting new legislation, the State will be eligible for grant monies which could be used for a safety campaign. Most importantly, however, updating our law will insure that children are better protected on Alaska's roads. We urge and appreciate your support of SB 72.

Sincerely,

Jon Cook

January 26, 2009

Jon Cook
PO Box 71577
Fairbanks, AK 99707

Dear Mr.Cook,

On behalf of the Alaska Chapter AAP I would like to lend our chapter's support for SB 72 that will update and modernize our Child Safety Seat laws to include the use of booster seats, and to spell out safe practices of child restraint devices that are appropriate for infants and children of all ages.

Seat belts are made for adults. Children should stay in a booster seat until adult seat belts fit correctly, usually when the child reaches 4' 9" in height and is between 8 and 12 years of age. The Alaska Chapter AAP recommends that state child safety seat laws are brought up to this standard.

Results from the 2007 National Survey of the Use of Booster Seats conducted by the National Center for Statistics and Analysis of the National Highway Traffic Safety Administration reveals alarmingly that booster seat use rates for children ages 6 and 7 dropped from 36 percent in 2006 to 25 percent in 2007. The study concludes that there is premature graduation of children from birth to age 12 to restraint types that are inappropriate for their height or weight.

SB 72 would help to alleviate confusion among parents and caregivers as to which safety devices are appropriate for their children. Alaska's pediatricians are happy to do their part by counseling parents during doctors' visits on how to keep their children safe while riding in vehicles.

Sincerely,

Jodyne L. Butto, MD, FAAP
President

ALASKA STATE LEGISLATURE

SENATOR JOE THOMAS

Sponsor Statement
SB 57

SB 57 corrects a flaw in the school funding law as it applies to charter schools with fewer than 150 students. Current law results in these charter schools receiving 30% to 45% less state funding than neighborhood schools of their same size. SB 57 funds these charter schools at a per-child rate closer to that of average, urban elementary schools.

Charter schools are public schools that provide valuable education options to Alaska families. They increase learning opportunities and encourage parent and community involvement in our schools. Charter schools are designed and managed by parent-elected boards, under contract with their local school district. In 1995, the legislature passed Alaska's initial charter school law, authorizing local school districts to approve charter schools in their communities. However, the funding system has limited communities' ability to use the law to create and sustain these innovative programs.

SB 57 solves the funding problem in an equitable, fiscally responsible manner. It will support our schools and districts as they carry out the legislature's intent in creating the charter school law.

The Current Funding System

The root of the problem is the way the foundation formula calculates the "adjusted student count" for charter schools versus neighborhood schools.

The adjusted student count is the basis of state funding for all schools in Alaska. The funding a school district receives is calculated by multiplying the adjusted student count by the district cost factor, the special needs factor and, finally, by the dollar amount in the base student allocation.

The adjusted student count is determined by the school size formula in AS 14.17.450. The formula recognizes that economies-of-scale make it less expensive to operate a large school than a small school. Therefore, the enrollment of small schools is increased by a factor much higher than the adjustment for large schools. For example, the enrollment of a school with 75 students is adjusted to 123, a school with 400 students is adjusted to 472, and a school with 1,000 students is adjusted to 1,004.

Charter schools with an enrollment of less than 150 students are not treated as separate schools for the purpose of the adjusted student count calculation. Instead, the Department of Education adds

(Copy on File)

the charter students to the students attending the largest school in their district, and calculates the adjusted student count for the combined enrollment. This system makes the adjusted student count of the charter schools lower than their actual enrollment, while almost all other schools are adjusted upwards.

The Consequences

The impact of this system on charter schools is shown in the attached graph. The consequences include:

1. School districts can be penalized for allowing school choice.
The adjusted student count calculation for charter schools with fewer than 150 students can result in districts receiving less state funding than they would if their charter school students attended their neighborhood schools. The state will spend more if these charter schools close.

2. The law provides an inadequate amount of money for charter schools with fewer than 150 students to survive. Charter schools with fewer than 150 students in Anchorage, Fairbanks and Juneau have a count adjustment of .84, which is lower than even the largest high schools in those communities, and is close to the .80 rate the state provides to correspondence programs that do not have to pay for school buildings and teachers.

3. There is a dramatic decrease in funding when a charter school's enrollment drops from 150 students to 149. The loss of that one student costs a school district $500,000 - $700,000. The unanticipated funding cut occurs in November, when it is too late to significantly reduce costs. In the past five years, this has happened to the Anchorage School District, the Fairbanks North Star Borough School District and the Lower Kuskokwim School District.

The Solution

SB 57 states that charter schools with fewer than 150 students will have their student count adjusted by the same per-student rate as neighborhood schools with 400 students. Under the school size factor statute, the per-student rate of adjustment for 400-student neighborhood schools is 1.18.

SB 57 also contains a one-year, hold-harmless provision for charter schools that are either in their first year of operation or had more than 150 students the previous year. These schools will receive 95% of the per-student rate of neighborhood schools with 150 students. Under the school size factor statute, the per-student rate of adjustment for 150-student neighborhood schools is 1.45, and 95% of that rate is 1.38.

Finally, SB 57 requires charter schools that are in the hold-harmless year to submit a plan for the following year to their local school board. The plan must describe what will happen the following year if the school again has fewer than 150 students and no longer qualifies for the hold-harmless provision.

HOUSE CS FOR CS FOR SENATE BILL NO. 75(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SIXTH LEGISLATURE - FIRST SESSION

BY THE HOUSE FINANCE COMMITTEE

Offered:
Referred:

Sponsor(s): SENATE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

A BILL

FOR AN ACT ENTITLED

"An Act making and amending appropriations, including capital appropriations, supplemental appropriations, and appropriations to capitalize funds; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

(SECTION 1 OF THIS ACT BEGINS ON PAGE 2)

* **Section 1.** The following appropriation items are for capital projects and grants from the general fund or other funds as set out in section 2 of this Act by funding source to the agencies named for the purposes expressed and lapse under AS 37.25.020, unless otherwise noted.

	Appropriation	General	Other
Allocations	Items	Funds	Funds
*****	*****		
***** **Department of Administration** *****			
*****	*****		
Alaska Public Offices Commission Online System Completion (HD 1-40)	175,000	175,000	
Enterprise Security Projects (HD 1-40)	2,500,000		2,500,000
Facilities Deferred Maintenance (HD 1-40)	2,800,000		2,800,000
*****		*****	
***** **Department of Commerce, Community and Economic Development** *****			
*****		*****	
Alaska Energy Authority - Electrical Emergencies Program (HD 1-40)	330,400	330,400	
Alaska Energy Authority - Renewable Energy Project Grants (AS 42.45.045) (HD 1-40)	25,000,000		25,000,000
Alaska Energy Authority Energy Projects (HD 1-40)	25,500,000	4,500,000	21,000,000
Community Block Grants (HD 1-40)	6,100,000	70,000	6,030,000
Community Development and	2,630,000	430,000	2,200,000

	Allocations	Appropriation Items	General Funds	Other Funds
Assistance (HD 1-40)				
Grants Tracking System (HD 1-40)		255,000	255,000	
Kodiak Launch Complex Infrastructure (HD 36)		17,500,000	3,500,000	14,000,000
Manufacturing Extension Program (HD 1-40)		806,401	806,401	
Organization Grant (HD 1-40)		100,000	100,000	
Grants to Named Recipients (AS 37.05.316)				
Arctic Power (HD 1-40)		120,000	120,000	
Grants to Municipalities (AS 37.05.315)				

The following appropriation is contingent upon the Municipality of Anchorage Assembly adopting a resolution identifying a specific ferry landing location for the M/V Susitna.

Anchorage - Port of Anchorage Expansion (HD 17-32)	10,000,000	10,000,000	

It is the intent of the legislature that the Municipality of Anchorage, specifically the Port of Anchorage, assist the Matanuska Susitna Borough and Port MacKenzie in applying for grants from the United States Department of Transportation for port infrastructure investments, including projects that connect ports to other nodes of transportation and improve the efficiency of freight movement.

Kenai - River Bluff Erosion Project (HD 33-35)	2,000,000	2,000,000	

It is the intent of the legislature that no state funds be released for this project until sufficient local and federal funds are secured to complete the project.

1185 Election Fund	3,821,720
Total Duplicated Funds	$4,734,220

(SECTION 13 OF THIS ACT BEGINS ON PAGE 63)

*** Sec. 13.** LEGISLATIVE INTENT. For the appropriation made in sec. 21 of this Act, it is the intent of the legislature that

(1) the funds be used solely to plan, coordinate, and facilitate private-sector construction, ownership, and management of a natural gas pipeline from the Alaska North Slope, south to Fairbanks, and through the Railbelt region to connect with or enhance the existing pipeline system that reaches to tidewater on the Kenai Peninsula;

(2) an economically feasible in-state pipeline and any connecting lines serve industrial, residential, and utility customers along the entire route, including any other regions of the state that could be served by the line at commercially feasible rates;

(3) the Office of the Governor use this appropriation to

(A) coordinate with the private-sector entities that could build, own, and operate the line;

(B) assist with preparing cost estimates for the project to determine its economic feasibility and cost to consumers;

(C) apply for and obtain right-of-way permits for the project route, with the intent that the state would transfer the permits to the private entity best able to complete the project; and

(D) work with private and public entities to promote the gas supply and gas purchase contracts that would be required for the project to be commercially viable;

(4) the state not take an equity stake of any amount in the project;

(5) the coordination effort use to the fullest extent possible any and all existing work by other state agencies before contracting for new reports, research, and analyses, and that the coordination effort not expand beyond the scope of coordinating private interests to build, own, and operate the natural gas pipeline;

(6) the Office of the Governor submit written quarterly reports to the senate president and the speaker of the house of representatives, detailing progress to date on the project and a work plan for each subsequent quarter.

*** Sec. 14.** FEDERAL AND OTHER PROGRAM RECEIPTS. (a) Federal receipts, designated program receipts as defined in AS 37.05.146(b)(3), information services fund program receipts as defined in AS 44.21.045(b), receipts of the University of Alaska as

described in AS 37.05.146(b)(2), receipts of commercial fisheries test fishing operations under AS 37.05.146(c)(21), corporate receipts of the Alaska Housing Finance Corporation, corporate receipts of the Alaska Aerospace Development Corporation, Exxon Valdez oil spill trust receipts as defined in AS 37.05.146(b)(4), and receipts of the Alaska Fire Standards Council under AS 37.05.146(b)(5), that exceed the amounts appropriated by this Act are appropriated conditioned on compliance with the program review provisions of AS 37.07.080(h).

(b) If federal or other program receipts as defined in AS 37.05.146 and in AS 44.21.045(b) exceed the estimates appropriated by this Act, the appropriations from state funds for the affected program may be reduced by the excess if the reductions are consistent with applicable federal statutes.

(c) If federal or other program receipts as defined in AS 37.05.146 and in AS 44.21.045(b) fall short of the estimates appropriated by this Act, the affected appropriation is reduced by the amount of the shortfall in receipts.

*** Sec. 15.** FUND TRANSFERS. (a) The income earned during fiscal year 2010 on revenue from the sources set out in AS 37.13.145(d) is appropriated to the Alaska capital income fund (AS 37.05.565).

(b) The interest earned on amounts in the election fund, estimated to be $320,000, are appropriated to the election fund required by the federal Help America Vote Act.

(c) The sum of $2,500,000 is appropriated from the general fund to the information services fund (AS 44.21.045(a)).

(d) The sum of $15,000,000 is appropriated from the dividend paid to the state by the Alaska Industrial Development and Export Authority under AS 44.88.088 to the Alaska Gasline Inducement Act reimbursement fund (AS 43.90.400(a)) for the natural gas pipeline project construction inducement under AS 43.90.110(a)(1).

(e) The sum of $25,000,000 is appropriated from the dividend paid to the state by the Alaska Housing Finance Corporation under AS 18.56.089 to the renewable energy grant fund (AS 42.45.045).

*** Sec. 16.** INSURANCE CLAIMS. The amounts to be received in settlement of insurance claims for losses and the amounts to be received as recovery for losses are appropriated from the general fund to the

(1) state insurance catastrophe reserve account (AS 37.05.289(a)); or

(2) appropriate state agency to mitigate the loss.

* **Sec. 17.** NATIONAL PETROLEUM RESERVE - ALASKA IMPACT GRANT PROGRAM. (a) The sum of $15,967,840 of the amount received by the National Petroleum Reserve - Alaska special revenue fund (AS 37.05.530) under 42 U.S.C. 6506a(*l*) or former 42 U.S.C. 6508 by August 31, 2009, estimated to be $16,035,066, is appropriated from that fund to the Department of Commerce, Community, and Economic Development for capital project grants under the National Petroleum Reserve - Alaska impact grant program to be allocated to the following municipalities in the amounts stated:

MUNICIPALITY	PROJECT	ALLOCATION
(1) North Slope Borough	North Slope Borough workforce development three-year program enforcement	$2,500,620
(2) North Slope Borough	Arctic Fox supplemental studies to include the prevalence and incidence of rabies and other related diseases in the National Petroleum Reserve - Alaska	409,262
(3) City of Atqasuk	Local government operations and youth program	226,500
(4) City of Wainwright	Operations and maintenance equipment	49,269
(5) North Slope Borough	Continuing waterfowl survey in the National Petroleum Reserve - Alaska	900,000
(6) North Slope Borough	Police officers for National Petroleum Reserve - Alaska impacted communities	1,354,712
(7) North Slope Borough	Meade River school counselor	243,598

(8) City of Barrow	New boat ramp	2,000,000
(9) City of Nuiqsut	Youth center operations and maintenance	188,847
(10) City of Wainwright	Wainwright youth recreation program	240,000
(11) North Slope Borough	Communications system upgrade	5,000,000
(12) North Slope Borough	Emerging disease surveillance: continuation of wildlife population health assessment in the National Petroleum Reserve - Alaska	335,032
(13) City of Nuiqsut	Local government operations and maintenance	420,000
(14) City of Wainwright	Wainwright local government operations	300,000
(15) City of Barrow	Local government operations and maintenance	1,800,000

(b) If the amount received by the National Petroleum Reserve - Alaska special revenue fund (AS 37.05.530) under 42 U.S.C. 6506a(*l*) or former 42 U.S.C. 6508 by August 31, 2009, is less than $15,967,840, the Department of Commerce, Community, and Economic Development shall work with the municipalities listed in (a) of this section to reduce the allocations made in (a) of this section to equal the amount received.

* **Sec. 18.** DEPARTMENT OF COMMERCE, COMMUNITY, AND ECONOMIC DEVELOPMENT. (a) The sum of $8,000 is appropriated from the anatomical gift awareness fund (AS 13.50.160) to the Department of Commerce, Community, and Economic Development for payment as a grant under AS 37.05.316 to Life Alaska Donor Services, Inc., for promoting the donation program under AS 13.50.150 for the fiscal year ending June 30, 2010.

(b) Section 60(b), ch. 29, SLA 2008, is amended to read:

(b) The sum of $125,000 is appropriated from the general fund to the

Department of Commerce, Community, and Economic Development for payment as a grant under AS 37.05.316 to World Trade Center Alaska for the international trade program partnership for the fiscal year ending **June 30, 2010** [JUNE 30, 2009].

(c) Section 10(b), ch. 159, SLA 2004, is amended to read:

(b) **The** [CONTINGENT UPON THE FORMATION OF A BOROUGH THAT ENCOMPASSES THE CITY OF DELTA JUNCTION, THE] balance owing on the loan made under (a) of this section on **June 30, 2009,** [THE DATE OF INCORPORATION OF THE BOROUGH] is redesignated as a grant under AS 37.05.315 to the City of Delta Junction for the payment of the costs of the settlement agreement for litigation regarding the establishment of a private prison in the vicinity of the city.

*** Sec. 19.** DEPARTMENT OF ENVIRONMENTAL CONSERVATION. Section 1, ch. 135, SLA 2000, page 10, lines 30 - 31, is amended to read:

	ALLOCATIONS
Village Safe Water Study, Design, and Construction Projects (HD 1-40)	834,387
[TUNUNAK FLUSH TANK AND HAUL, AND WASHETERIA PROJECT (ED 38)]	

*** Sec. 20.** DEPARTMENT OF HEALTH AND SOCIAL SERVICES. The sum of $9,000,000 is appropriated from the general fund to the Department of Health and Social Services, division of public assistance, for the heating assistance program that administers federal assistance under 42 U.S.C. 8621 - 8629 (Low-Income Home Energy Assistance Act of 1981) and the Alaska heating assistance program (AS 47.25.621) for the fiscal years ending June 30, 2009, and June 30, 2010.

*** Sec. 21.** OFFICE OF THE GOVERNOR. The sum of $9,000,000 is appropriated from the general fund to the Office of the Governor for the development of an in-state natural gas pipeline for the fiscal years ending June 30, 2009, and June 30, 2010.

* **Sec. 22.** HOUSE DISTRICT 1. (a) The unexpended and unobligated balance of the appropriation made in sec. 1, ch. 82, SLA 2003, page 5, lines 29 - 31 (Thorne Bay, medivac landing site construction - $175,000) is reappropriated to the Department of Commerce, Community, and Economic Development for payment as a grant under AS 37.05.315 to the City of Thorne Bay for emergency vehicle access and response.

(b) The unexpended and unobligated balance of the appropriation made in sec. 35(b), ch. 159, SLA 2004 (Ketchikan Area Arts and Humanities Council, design and project development of the Ketchikan community center for the arts) is reappropriated to the Department of Commerce, Community, and Economic Development for payment as a grant under AS 37.05.316 to the First City Players for design and project development of the Ketchikan community center for the arts.

(c) The unexpended and unobligated balance of the appropriation made in sec. 1, ch. 135, SLA 2000, page 51, lines 7 - 9, as amended by sec. 33(b), ch. 30, SLA 2007 (Ketchikan Gateway Borough, multi-purpose maintenance facility improvements) is reappropriated to the Department of Commerce, Community, and Economic Development for payment as a grant under AS 37.05.315 to the Ketchikan Gateway Borough for a multi-purpose maintenance facility.

* **Sec. 23.** HOUSE DISTRICT 2. (a) Section 41(a), ch. 29, SLA 2008, is amended to read:

(a) The unexpended and unobligated balance of the appropriation made in sec. 1, ch. 1, SSSLA 2002, page 8, lines 8 - 10 (Wrangell, water tank and connection to upper water reservoir - $180,000) is reappropriated to the Department of Commerce, Community, and Economic Development for payment as a grant under AS 37.05.315 to the City of Wrangell for water tank and connection to upper water reservoir for the fiscal **years** [YEAR] ending June 30, 2009**, June 30, 2010, and June 30, 2011**.

(b) The unexpended and unobligated balance of the appropriation made in sec. 7, ch. 29, SLA 2008, page 27, lines 5 - 7 (Wrangell, medical center, 12-passenger handicapped van - $39,000) is reappropriated to the Department of Commerce, Community, and Economic Development for payment as a grant under AS 37.05.316 to the Wrangell Medical Center to purchase snow removal equipment.

(c) The unexpended and unobligated balance of the appropriation made in sec. 7, ch. 29, SLA 2008, page 12, lines 13 - 15 (Alaska Native Brotherhood Sitka Camp #1, Sitka ANB

hall renovation - $50,000) is reappropriated to the Department of Commerce, Community, and Economic Development for payment as a grant under AS 37.05.316 to Sitka Kaagwaantaan, Inc. for the Sitka ANB hall renovations.

(d) The unexpended and unobligated balances of the appropriations made in sec. 7, ch. 29, SLA 2008, page 26, lines 10 - 12 (Sitka, Moller Park lighting improvements - $150,000) and sec. 7, ch. 29, SLA 2008, page 26, lines 13 - 14 (Sitka, Moller Park synthetic infield - $300,000) are reappropriated to the Department of Commerce, Community, and Economic Development for payment as a grant under AS 37.05.315 to the City and Borough of Sitka for Moller Park baseball field improvements.

*** Sec. 24.** HOUSE DISTRICTS 3 - 4. (a) Section 1, ch. 82, SLA 2006, page 85, lines 30 - 31, is amended to read:

	APPROPRIATION ITEMS	GENERAL FUND
Gastineau Channel Crossing EIS and Dredging **and North Douglas Highway Extension** (HD 3-4)	3,000,000	3,000,000

(b) The unexpended and unobligated balance of the appropriation made in sec. 1, ch. 82, SLA 2006, page 23, lines 8 - 11 (St. Vincent de Paul Society, community nonprofit service center construction - $250,000) is reappropriated to the Department of Commerce, Community, and Economic Development for payment as a grant under AS 37.05.316 to Southeast Alaska Independent Living, Inc., for construction of a community nonprofit service center.

*** Sec. 25.** HOUSE DISTRICT 5. (a) The unexpended and unobligated balance of the appropriation made in sec. 33(k), ch. 159, SLA 2004 (Yakutat, teen center construction - $25,000) is reappropriated to the Department of Commerce, Community, and Economic Development for payment as a grant under AS 37.05.315 to the City and Borough of Yakutat for the Yakutat Community Health Center dental clinic remodel.

(b) The unexpended and unobligated balance of the appropriation made in sec. 42(e), ch. 29, SLA 2008 (Craig, Craig Elementary School roof replacement) is reappropriated to the Department of Commerce, Community, and Economic Development for payment as a grant under AS 37.05.315 to the City of Craig for Craig Clinic debt relief for the fiscal year ending

June 30, 2010.

(c) The unexpended and unobligated balance of the appropriation made in sec. 42(d), ch. 29, SLA 2008 (Craig, Prince of Wales health care facility project) is reappropriated to the Department of Commerce, Community, and Economic Development for payment as a grant under AS 37.05.315 to the City of Craig for costs incurred, construction of, and equipment for the Craig seafood processing and cold storage plant.

(d) The unexpended and unobligated balance of the appropriation made in sec. 52(a), ch. 61, SLA 2001 (Hydaburg, construction of a road and parking lot) is reappropriated to the Department of Commerce, Community, and Economic Development for payment as a grant under AS 37.05.316 to the Metlakatla Boys and Girls Club for equipment, projects, and improvements.

(e) The unexpended and unobligated balance, not to exceed $4,671, of the appropriation made in sec. 1, ch. 1, SSSLA 2002, page 6, lines 15 - 17, as amended by sec. 42(b), ch. 29, SLA 2008 (Hydaburg, water turbine impellors) is reappropriated to the Department of Commerce, Community, and Economic Development for payment as a grant under AS 37.05.316 to the Metlakatla Boys and Girls Club for equipment, projects, and improvements.

(f) The unexpended and unobligated balance, not to exceed $10,000, of the appropriation made in sec. 1, ch. 1, SSSLA 2002, page 6, lines 15 - 17, as amended by sec. 42(b), ch. 29, SLA 2008 (Hydaburg, water turbine impellors) is reappropriated to the Department of Commerce, Community, and Economic Development for payment as a grant under AS 37.05.316 to the Angoon Boys and Girls Club for equipment, projects, and improvements.

(g) If the amount available for reappropriation under (e) and (f) of this section is less than $14,671, the reappropriations made in (e) and (f) of this section shall be reduced in proportion to the amount of the shortfall.

(h) The unexpended and unobligated balance of the appropriation made in sec. 34(c), ch. 30, SLA 2007 (Angoon Community Association, ANB hall renovation) is reappropriated to the Department of Commerce, Community, and Economic Development for payment as a grant under AS 37.05.315 to the City of Angoon for community projects and improvements.

* **Sec. 26.** HOUSE DISTRICT 6. (a) Section 4, ch. 30, SLA 2007, page 87, lines 19 - 21, is

amended to read:

	APPROPRIATION ITEMS	GENERAL FUND
Galena - Ptarmigan Dorm Sprinkler System Installation **and Steam Heat Delivery, Monitoring, and Safety Improvements** (HD 6)	1,001,040	1,001,040

(b) The unexpended and unobligated balances of the appropriations made in sec. 1, ch. 61, SLA 2001, page 61, lines 20 - 21 (Gulkana, RV park construction completion, phase 2 - $25,000), sec. 1, ch. 1, SSSLA 2002, page 80, lines 7 - 8 (Marshall, teen and youth center - $27,179), sec. 8(a)(16), ch. 159, SLA 2004 (Lake Minchumina, community projects and improvements - $58,672), and sec. 8(b)(26), ch. 159, SLA 2004 (Marshall, community projects and improvements - $1,259) are reappropriated to the Department of Commerce, Community, and Economic Development for payment as a grant under AS 37.05.316 to the Tetlin Village Council for community projects and improvements.

* **Sec. 42.** COASTAL IMPACT ASSISTANCE PROGRAM. (a) The share of money received by the state under the federal coastal impact assistance program, sec. 384, P.L. 109-58 (Energy Policy Act of 2005), expected to be $53,600,000, is appropriated in the following amounts to the departments listed for the projects described:

(1) $25,950,000 to the Department of Natural Resources for state-initiated capital projects, as allowed under federal and state laws governing the use of coastal impact assistance program funds;

(2) $750,000 to the Department of Fish and Game for the Western Alaska Salmon Coalition's chum and sockeye genetic identification program;

(3) $16,000,000 to the Department of Commerce, Community, and Economic Development for capital project grants to be awarded through an open public solicitation process and as allowed under federal and state laws governing the use of coastal impact assistance program funds;

(4) $10,900,000 to the Department of Commerce, Community, and Economic Development for competitive capital project grants, as allowed under federal and state laws governing the use of coastal impact assistance program funds, to be allocated to the following coastal resource service areas and municipalities in the amounts stated:

RECIPIENT	AMOUNT
Cenaliulriit CRSA	$3,000,000
City and Borough of Juneau	1,900,000
Aleutians West CRSA	1,200,000
Bering Straits CRSA	1,100,000
City and Borough of Sitka	900,000
Ketchikan Gateway Borough	900,000
Aleutians East Borough	700,000
Bristol Bay CRSA	500,000
City and Borough of Yakutat	300,000
Haines Borough	200,000
Municipality of Skagway	100,000
City and Borough of Wrangell	100,000

(b) If the amount available for appropriation in (a) of this section is less than $53,600,000, the appropriations made in (a)(1) - (4) of this section shall be reduced in proportion to the amount of the shortfall.

* **Sec. 43.** DEPARTMENT OF HEALTH AND SOCIAL SERVICES. (a) The sum of $24,547,500 is appropriated from federal economic stimulus funds received by the state under P.L. 111-5 (American Recovery and Reinvestment Act of 2009) to the Department of Health and Social Services, health care services, for a statewide electronic health information exchange system.

(b) The sum of $2,727,500 is appropriated from the general fund to the Department of Health and Social Services, health care services, for a statewide electronic health information

exchange system.

*** Sec. 44.** DEPARTMENT OF FISH AND GAME. The sum of $750,000 is appropriated from the general fund to the Department of Fish and Game to supplement the appropriation of federal funds in sec. 42(a)(2) of this Act for the Western Alaska Salmon Coalition's chum and sockeye genetic identification program for the fiscal year ending June 30, 2010.

*** Sec. 45.** FUND SOURCE CHANGES FOR FEDERAL ECONOMIC STIMULUS PROJECTS FOR THE DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES. (a) Section 2, ch. 61, SLA 2001, page 65, line 24, is amended to read:

Federal Receipts	**658,269,373**
	[664,017,739]
Federal Stimulus: ARRA 2009	**5,748,366**

(b) The fund source amendment in (a) of this section is for $5,748,366 of the allocation made in sec. 1, ch. 61, SLA 2001, page 41, lines 21 - 23 (Ketchikan: Tongass - viaducts replacement and rehabilitation - $5,750,000).

(c) Section 2, ch. 159, SLA 2004, page 53, line 28, is amended to read:

Federal Receipts	**1,095,667,288**
	[1,100,167,288]
Federal Stimulus: ARRA 2009	**4,500,000**

(d) The fund source amendment in (c) of this section is for

(1) $3,000,000 of the allocation made in sec. 1, ch. 159, SLA 2004, page 36, lines 29 - 30 (Fort Yukon: resurfacing - $3,000,000); and

(2) $1,500,000 of the allocation made in sec. 1, ch. 159, SLA 2004, page 44, line 33, through page 45, line 4 (Ketchikan: Tongass Highway - viaducts replacement and rehabilitation - $2,200,000).

(e) Section 2, ch. 3, FSSLA 2005, page 93, line 27, is amended to read:

1002 Federal Receipts	**742,445,086**
	[757,030,711]
1212 Federal Stimulus: ARRA 2009	**14,585,625**

(f) The fund source amendment in (e) of this section is for

(1) $4,220,000 of the allocation made in sec. 1, ch. 3, FSSLA 2005, page 69, lines 31 - 32 (Allakaket: airport improvements - $4,220,000);

(2) $2,765,625 of the allocation made in sec. 1, ch. 3, FSSLA 2005, page 71, lines 9 - 10 (Fort Yukon: airport resurfacing - $2,765,625);

(3) $6,600,000 of the allocation made in sec. 1, ch. 3, FSSLA 2005, page 73, lines 6 - 8 (Ouzinkie: airport reconstruction and relocation - $9,000,000); and

(4) $1,000,000 of the allocation made in sec. 1, ch. 3, FSSLA 2005, page 79, lines 30 - 31 (Dillingham: Wood River Road reconstruction - $1,000,000).

(g) Section 2, ch. 82, SLA 2006, page 113, line 23, is amended to read:

1002 Federal Receipts	**1,026,284,951**
	[1,036,719,351]
1212 Federal Stimulus: ARRA 2009	**10,434,400**

(h) The fund source amendment in (g) of this section is for

(1) $2,734,400 of the allocation made in sec. 1, ch. 82, SLA 2006, page 90, lines 16 - 17 (Fort Yukon: airport improvements - $4,725,151); and

(2) $7,700,000 of the allocation made in sec. 1, ch. 82, SLA 2006, page 99, lines 7 - 8 (Gustavus: dock replacement - $19,000,000).

(i) Section 5, ch. 30, SLA 2007, page 121, line 20, is amended to read:

1002 Federal Receipts	**531,315,800**
	[542,215,800]
1212 Federal Stimulus: ARRA 2009	**10,900,000**

(j) The fund source amendment in (i) of this section is for

(1) $3,500,000 of the allocation made in sec. 4, ch. 30, SLA 2007, page 105, lines 28 - 29 (Akiachak: airport relocation - $10,500,000);

(2) $400,000 of the allocation made in sec. 4, ch. 30, SLA 2007, page 105, lines 32 - 33 (Allakaket: airport improvements - $400,000); and

(3) $7,000,000 of the allocation made in sec. 4, ch. 30, SLA 2007, page 107, lines 4 - 5 (Huslia: airport improvements - $7,525,000).

(k) Section 14, ch. 29, SLA 2008, page 177, line 9, is amended to read:

1002 Federal Receipts	**551,465,150**
	[563,745,150]
1212 Federal Stimulus: ARRA 2009	**12,280,000**

(*l*) The fund source amendment in (k) of this section is for

(1) $1,780,000 of the allocation made in sec. 13, ch. 29, SLA 2008, page 162, lines 11 - 12 (Allakaket: airport improvements - $1,950,000); and

(2) $10,500,000 of the allocation made in sec. 13, ch. 29, SLA 2008, page 169, lines 31 - 33 (Juneau: Glacier Highway – Amalga to Eagle Beach widening - $10,500,000).

* **Sec. 46.** REVENUE AND APPROPRIATION BALANCE; CONSTITUTIONAL BUDGET RESERVE. (a) If the unrestricted state revenue available for appropriation in fiscal year 2009 is insufficient to cover general fund appropriations made for fiscal year 2009, the amount necessary to balance revenue and general fund appropriations is appropriated from the budget reserve fund (AS 37.05.540) to the general fund.

(b) If, after the appropriation made in (a) of this section, the unrestricted state revenue available for appropriation in fiscal year 2009 is insufficient to cover general fund appropriations made for fiscal year 2009, the amount necessary to balance revenue and general fund appropriations is appropriated to the general fund from the Alaska Housing Capital Corporation, a subsidiary of the Alaska Housing Finance Corporation created under authority of AS 18.56.086.

(c) The amount calculated to be available for appropriation under art. IX, sec. 17(b), Constitution of the State of Alaska, for fiscal year 2010 is appropriated under art. IX, sec. 17(b), Constitution of the State of Alaska, from the budget reserve fund to the general fund.

* **Sec. 47.** CONTINGENCY. Section 43 of this Act is contingent on passage by the Twenty-Sixth Alaska State Legislature in the First Regular Session and enactment into law of a version of SB 133 relating to a statewide electronic health information exchange system.

* **Sec. 48.** LAPSE. (a) The appropriations made by secs. 15 and 16(1) of this Act are for the capitalization of funds and do not lapse.

(b) The appropriations made by secs. 17, 22(b), 23(b), 23(c), 24(b), 25(d) - (f), 26(b) - (e), 26(g) - (i), 30, 34(c), 34(e), 34(f), 37(a), 38, 39, 40(a)(1), 40(a)(2), 40(a)(4), 40(c), 40(d), and 41 - 43 of this Act are for capital projects and lapse under AS 37.25.020.

(c) A grant awarded in this Act to a named recipient under AS 37.05.316 is for a capital project and lapses under AS 37.25.020, unless otherwise specified.

* **Sec. 49.** Sections 4, 7, 10, 19 - 21, 45, 46(a), and 46(b) of this Act take effect April 19, 2009.

* **Sec. 50.** Sections 18(b), 18(c), and 22 - 41 of this Act take effect June 30, 2009.

* **Sec. 51.** Except as provided in secs. 49 and 50 of this Act, this Act takes effect July 1, 2009.

AMENDMENT 4

Offered by: **Representative Fairclough**
To: **House CS for CS for Senate Bill 75 (Fin)**

amendment to Amendment 4 adopted

Insert:
Page 53
After line 15

It is the intent of the legislature that the Department of Transportation and Public Facilities install a new drainage culvert at MP 14.4 of the Glenn Highway prior to paving this section of the highway.

"if feasible & within the project's scope, schedule & budget, prior to paving this section of highway"

Explanation: This amendment allows construction and installation of a culvert to alleviate long standing drainage and flooding issues along the Glenn Highway and in the Eagle Glen Subdivision.

Renumber accordingly

HOUSE CS FOR CS FOR SENATE BILL NO. 75(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SIXTH LEGISLATURE - FIRST SESSION

BY THE HOUSE FINANCE COMMITTEE

Offered:
Referred:

Sponsor(s): SENATE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

A BILL

FOR AN ACT ENTITLED

"An Act making and amending appropriations, including capital appropriations, supplemental appropriations, and appropriations to capitalize funds; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

(SECTION 1 OF THIS ACT BEGINS ON PAGE 2)

* **Section 1.** The following appropriation items are for capital projects and grants from the general fund or other funds as set out in section 2 of this Act by funding source to the agencies named for the purposes expressed and lapse under AS 37.25.020, unless otherwise noted.

	Allocations	Appropriation Items	General Funds	Other Funds
	*****	*****		
	***** **Department of Administration** *****			
	*****	*****		
Alaska Public Offices Commission Online System Completion (HD 1-40)		175,000	175,000	
Enterprise Security Projects (HD 1-40)		2,500,000		2,500,000
Facilities Deferred Maintenance (HD 1-40)		2,800,000		2,800,000
	*****		*****	
***** **Department of Commerce, Community and Economic Development** *****				
	*****		*****	
Alaska Energy Authority - Electrical Emergencies Program (HD 1-40)		330,400	330,400	
Alaska Energy Authority - Renewable Energy Project Grants (AS 42.45.045) (HD 1-40)		25,000,000		25,000,000

It is the intent of the legislature that the Alaska Energy Authority award $25,000,000 of grants from the Renewable Energy Fund to the projects listed as the top ranked $25,000,000 on the Renewable Energy Fund, Round II prioritized project list, dated March 23, 2009.

Alaska Energy Authority Energy Projects (HD 1-40)	25,500,000	4,500,000	21,000,000

	Allocations	Appropriation Items	General Funds	Other Funds
Community Block Grants (HD 1-40)		6,100,000	70,000	6,030,000
Community Development and Assistance (HD 1-40)		2,630,000	430,000	2,200,000
Grants Tracking System (HD 1-40)		255,000	255,000	
Kodiak Launch Complex Infrastructure (HD 36)		17,500,000	3,500,000	14,000,000
Manufacturing Extension Program (HD 1-40)		806,401	806,401	
Organization Grant (HD 1-40)		100,000	100,000	
Grants to Named Recipients (AS 37.05.316)				
Arctic Power (HD 1-40)		120,000	120,000	
Grants to Municipalities (AS 37.05.315)				
Anchorage - Port of Anchorage Expansion (HD 17-32)		10,000,000	10,000,000	

It is the intent of the legislature that the Municipality of Anchorage, specifically the Port of Anchorage, assist the Matanuska Susitna Borough and Port MacKenzie in applying for grants from the United States Department of Transportation for port infrastructure investments, including projects that connect ports to other nodes of transportation and improve the efficiency of freight movement.

Kenai - River Bluff Erosion Project (HD 33-35)	2,000,000	2,000,000	

It is the intent of the legislature that no state funds be released for this project until sufficient local and federal funds are secured to complete the project.

	Allocations	Appropriation Items	General Funds	Other Funds

(SECTION 13 OF THIS ACT BEGINS ON PAGE 63)

* **Sec. 13.** FEDERAL AND OTHER PROGRAM RECEIPTS. (a) Federal receipts, designated program receipts as defined in AS 37.05.146(b)(3), information services fund program receipts as defined in AS 44.21.045(b), receipts of the University of Alaska as described in AS 37.05.146(b)(2), receipts of commercial fisheries test fishing operations under AS 37.05.146(c)(21), corporate receipts of the Alaska Housing Finance Corporation, corporate receipts of the Alaska Aerospace Development Corporation, Exxon Valdez oil spill trust receipts as defined in AS 37.05.146(b)(4), and receipts of the Alaska Fire Standards Council under AS 37.05.146(b)(5), that exceed the amounts appropriated by this Act are appropriated conditioned on compliance with the program review provisions of AS 37.07.080(h).

(b) If federal or other program receipts as defined in AS 37.05.146 and in AS 44.21.045(b) exceed the estimates appropriated by this Act, the appropriations from state funds for the affected program may be reduced by the excess if the reductions are consistent with applicable federal statutes.

(c) If federal or other program receipts as defined in AS 37.05.146 and in AS 44.21.045(b) fall short of the estimates appropriated by this Act, the affected appropriation is reduced by the amount of the shortfall in receipts.

* **Sec. 14.** FUND TRANSFERS. (a) The income earned during fiscal year 2010 on revenue from the sources set out in AS 37.13.145(d) is appropriated to the Alaska capital income fund (AS 37.05.565).

(b) The interest earned on amounts in the election fund, estimated to be $320,000, are appropriated to the election fund required by the federal Help America Vote Act.

(c) The sum of $2,500,000 is appropriated from the general fund to the information services fund (AS 44.21.045(a)).

(d) The sum of $15,000,000 is appropriated from the dividend paid to the state by the Alaska Industrial Development and Export Authority under AS 44.88.088 to the Alaska Gasline Inducement Act reimbursement fund (AS 43.90.400(a)) for the natural gas pipeline project construction inducement under AS 43.90.110(a)(1).

(e) The sum of $25,000,000 is appropriated from the dividend paid to the state by the Alaska Housing Finance Corporation under AS 18.56.089 to the renewable energy grant fund (AS 42.45.045).

*** Sec. 15.** INSURANCE CLAIMS. The amounts to be received in settlement of insurance claims for losses and the amounts to be received as recovery for losses are appropriated from the general fund to the

(1) state insurance catastrophe reserve account (AS 37.05.289(a)); or

(2) appropriate state agency to mitigate the loss.

*** Sec. 16.** NATIONAL PETROLEUM RESERVE - ALASKA IMPACT GRANT PROGRAM. (a) The sum of $15,967,840 of the amount received by the National Petroleum Reserve - Alaska special revenue fund (AS 37.05.530) under 42 U.S.C. 6506a(*l*) or former 42 U.S.C. 6508 by August 31, 2009, estimated to be $16,035,066, is appropriated from that fund to the Department of Commerce, Community, and Economic Development for capital project grants under the National Petroleum Reserve - Alaska impact grant program to be allocated to the following municipalities in the amounts stated:

MUNICIPALITY	PROJECT	ALLOCATION
(1) North Slope Borough	North Slope Borough workforce development three-year program enforcement	$2,500,620

(b) The unexpended and unobligated balance of the appropriation made in sec. 8(b), ch. 1, SSSLA 2002, page 97, line 28 (Eek, community projects and improvements - $170,838) is reappropriated to the Department of Commerce, Community, and Economic Development for payment as a grant under AS 37.05.315 to the City of Eek for river bank repairs and boardwalks.

(c) The unexpended and unobligated balances of the appropriations made in sec. 8(a)(15), ch. 159, SLA 2004 (Kongiganak, community projects and improvements - $27,770),

sec. 8(a), ch. 1, SSSLA 2002, page 96, line 17 (Kongiganak, community projects and improvements - $55,496), sec. 8(b)(28), ch. 159, SLA 2004 (Napaskiak, community projects and improvements - $6,326), sec. 131, ch. 139, SLA 1998, page 99, lines 19 - 20 (Nunapitchuk, motor grader snowblade - $15,500), sec. 1, ch. 135, SLA 2000, page 53, lines 28 - 30 (Nunapitchuk, washeteria renovation - water improvements - $50,000), sec. 15(b), ch. 61, SLA 2001, page 78, line 19 (Nunapitchuk, capital projects and improvements - $26,322), sec. 1, ch. 1, SSSLA 2002, page 81, lines 30 - 31 (Nunapitchuk, solid waste dumpsite upgrade - $25,000), sec. 8(a), ch. 1, SSSLA 2002, page 96, line 24 (Oscarville, community projects and improvements - $88,107), sec. 71(c), ch. 1, SSSLA 2002 (Oscarville, community facilities and equipment), sec. 8(a)(19), ch. 159, SLA 2004 (Oscarville, community projects and improvements - $58,651), sec. 1, ch. 61, SLA 2001, page 63, lines 12 - 13 (Tuntutuliak, jail house completion - $16,466), sec. 67(b), ch. 61, SLA 2001 (Tuntutuliak, construction of a post office), sec. 8(a), ch. 1, SSSLA 2002, page 97, line 2 (Tuntutuliak, community projects and improvements - $54,518), sec. 8(a)(31), ch. 159, SLA 2004 (Tuntutuliak, community projects and improvements - $7,881), and sec. 8(b)(38), ch. 159, SLA 2004 (Platinum, community projects and improvements - $26,900) are reappropriated to the Department of Commerce, Community, and Economic Development for payment as a grant under AS 37.05.316 to the Association of Village Council Presidents for a demonstration project to use wood as a heating source for the fiscal year ending June 30, 2010.

* **Sec. 35.** HOUSE DISTRICT 39. The unexpended and unobligated balances of the appropriations made in sec. 8(a), ch. 1, SSSLA 2002, page 96, line 26 (Pitka's Point, Community projects and improvements - $77,149) and sec. 8(a)(21), ch. 159, SLA 2004 (Pitka's Point, Community projects and improvements - $35,507) are reappropriated to the Department of Commerce, Community, and Economic Development for payment as a grant under AS 37.05.316 to the Pitka's Point Traditional Council for upgrading the washeteria.

* **Sec. 36.** DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES. (a) The unexpended and unobligated balance of the appropriation made in sec. 1, ch. 82, SLA 2006, page 38, lines 9 - 12 (Kenai Peninsula Borough, Diamond Ridge nonmotorized vehicle safety trail - $65,000) is reappropriated to the Department of Transportation and Public Facilities for Ohlson Mountain Road improvements.

(b) Section 4, ch. 3, FSSLA 2005, page 97, lines 27 - 30, is amended to read:

ALLOCATIONS	
Fairbanks - 2nd Avenue, Moore Street Realignment, [AND] New Airport Way Intersection, **or Alterations and Improvement to Pioneer Park Parking Lot** (HD 7-11)	2,500,000

*** Sec. 37.** REAPPROPRIATION OF LEGISLATIVE APPROPRIATIONS. (a) The unexpended and unobligated balances of the appropriations made in sec. 1, ch. 27, SLA 2008, page 44, line 28 (Legislative Council - $32,960,200), sec. 1, ch. 27, SLA 2008, page 45, line 6 (legislative operating budget - $10,835,500), and sec. 1, ch. 27, SLA 2008, page 44, line 20 (Budget and Audit Committee - $19,123,900) are reappropriated to the Legislative Council for the projects listed in the amounts stated:

PROJECT	AMOUNT
(1) boiler replacement and heating rehabilitation project	$2,900,000
(2) exterior and interior repair, renovation, and safety improvements	2,600,000
(3) addressing the effects of climate and environmental change on the state for the fiscal years ending June 30, 2009, and June 30, 2010	750,000
(4) information technology upgrades and electronic voting improvements	600,000

(b) If the amount available for reappropriation in (a) of this section is less than $6,850,000, the reappropriations made by (a)(1) - (4) of this section shall be reduced in proportion to the amount of the shortfall.

(c) The unexpended and unobligated balance, not to exceed $850,000, after the reappropriation made in (a) of this section, of the appropriation made in sec. 1, ch. 27, SLA 2008, page 44, line 20 (Budget and Audit Committee - $19,123,900) is reappropriated to the

Legislative Council for purchase, restoration, and display of historical art and artifacts in conjunction with statehood celebrations in the capitol.

(d) The unexpended and unobligated balances, after the reappropriations made in (a) and (c) of this section, of the appropriations made in sec. 1, ch. 27, SLA 2008, page 44, line 28 (Legislative Council - $32,960,200), sec. 1, ch. 27, SLA 2008, page 45, line 6 (legislative operating budget - $10,835,500), and sec. 1, ch. 27, SLA 2008, page 44, line 20 (Budget and Audit Committee - $19,123,900) are reappropriated to the Legislative Council for necessary legislative capital projects.

(e) Section 70(c), ch. 29, SLA 2008, is amended to read:

(c) The unexpended and unobligated balances, not to exceed $100,000, of the appropriations made in sec. 1, ch. 28, SLA 2007, page 42, line 22 (Budget and Audit Committee - $14,219,300); sec. 1, ch. 28, SLA 2007, page 42, line 28 (Legislative Council - $30,201,500); and sec. 1, ch. 28, SLA 2007, page 43, line 6 (legislative operating budget - $9,682,300) are reappropriated to the Legislative Council for the Legislative Outdoor Heritage Caucus for the fiscal year ending June 30, **2010** [2009].

(f) The unexpended and unobligated balance, estimated to be $750,000, of the appropriation made in sec. 70(b), ch. 29, SLA 2008 (Legislative Council, Alaska Conference on State and Federal Responsibility Related to Economic Impacts of ESA Listings) is reappropriated to the Legislative Council for the Alaska Conference on State and Federal Responsibility Related to Economic Impacts of ESA Listings and for addressing the effects of climate and environmental change on the state for the fiscal years ending June 30, 2009, and June 30, 2010.

*** Sec. 38.** UNIVERSITY OF ALASKA. The unexpended and unobligated balance of the appropriation made in sec. 4, ch. 30, SLA 2007, page 117, lines 23 - 25 (University of Alaska, Kachemak Bay Campus expansion - city hall purchase - $2,500,000) is reappropriated to the University of Alaska for property acquisition and property improvements to the Kachemak Bay Campus of the Kenai Peninsula College.

*** Sec. 39.** COASTAL IMPACT ASSISTANCE PROGRAM. (a) The share of money received by the state under the federal coastal impact assistance program, sec. 384, P.L. 109-58 (Energy Policy Act of 2005), expected to be $53,600,000, is appropriated in the following amounts to the departments listed for the projects described:

(1) $25,200,000 to the Department of Natural Resources for state-initiated capital projects, as allowed under federal and state laws governing the use of coastal impact assistance program funds;

(2) $1,500,000 to the Department of Fish and Game for the Western Alaska Salmon Coalition's chum and sockeye genetic identification program;

(3) $16,000,000 to the Department of Commerce, Community, and Economic Development for capital project grants to be awarded through an open public solicitation process and as allowed under federal and state laws governing the use of coastal impact assistance program funds;

(4) $10,900,000 to the Department of Commerce, Community, and Economic Development for competitive capital project grants, as allowed under federal and state laws governing the use of coastal impact assistance program funds, to be allocated to the following coastal resource service areas and municipalities in the amounts stated:

RECIPIENT	AMOUNT
Cenaliulriit CRSA	$3,000,000
City and Borough of Juneau	1,900,000
Aleutians West CRSA	1,200,000
Bering Straits CRSA	1,100,000
City and Borough of Sitka	900,000
Ketchikan Gateway Borough	900,000
Aleutians East Borough	700,000
Bristol Bay CRSA	500,000
City and Borough of Yakutat	300,000
Haines Borough	200,000
Municipality of Skagway	100,000
City and Borough of Wrangell	100,000

(b) If the amount available for appropriation in (a) of this section is less than $53,600,000, the appropriations made in (a)(1) - (4) of this section shall be reduced in proportion to the amount of the shortfall.

* **Sec. 40.** DEPARTMENT OF HEALTH AND SOCIAL SERVICES. (a) The sum of $24,547,500 is appropriated from federal economic stimulus funds received by the state under

P.L. 111-5 (American Recovery and Reinvestment Act of 2009) to the Department of Health and Social Services, health care services, for a statewide electronic health information exchange system.

(b) The sum of $2,727,500 is appropriated from the general fund to the Department of Health and Social Services, health care services, for a statewide electronic health information exchange system.

* **Sec. 41.** DEPARTMENT OF FISH AND GAME. The sum of $750,000 is appropriated from the general fund to the Department of Fish and Game to supplement the appropriation of federal funds in sec. 39(a)(2) of this Act for the Western Alaska Salmon Coalition's chum and sockeye genetic identification program for the fiscal year ending June 30, 2010.

* **Sec. 42.** FUND SOURCE CHANGES FOR FEDERAL ECONOMIC STIMULUS PROJECTS FOR THE DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES. (a) Section 2, ch. 61, SLA 2001, page 65, line 24, is amended to read:

Federal Receipts	**658,269,373**
	[664,017,739]
Federal Stimulus: ARRA 2009	**5,748,366**

(b) The fund source amendment in (a) of this section is for $5,748,366 of the allocation made in sec. 1, ch. 61, SLA 2001, page 41, lines 21 - 23 (Ketchikan: Tongass - viaducts replacement and rehabilitation - $5,750,000).

(c) Section 2, ch. 159, SLA 2004, page 53, line 28, is amended to read:

Federal Receipts	**1,095,667,288**
	[1,100,167,288]
Federal Stimulus: ARRA 2009	**4,500,000**

(d) The fund source amendment in (c) of this section is for

(1) $3,000,000 of the allocation made in sec. 1, ch. 159, SLA 2004, page 36, lines 29 - 30 (Fort Yukon: resurfacing - $3,000,000); and

(2) $1,500,000 of the allocation made in sec. 1, ch. 159, SLA 2004, page 44, line 33, through page 45, line 4 (Ketchikan: Tongass Highway - viaducts replacement and rehabilitation - $2,200,000).

(e) Section 2, ch. 3, FSSLA 2005, page 93, line 27, is amended to read:

1002 Federal Receipts	**742,445,086**

[757,030,711]

1212 Federal Stimulus: ARRA 2009 **14,585,625**

(f) The fund source amendment in (e) of this section is for

(1) $4,220,000 of the allocation made in sec. 1, ch. 3, FSSLA 2005, page 69, lines 31 - 32 (Allakaket: airport improvements - $4,220,000);

(2) $2,765,625 of the allocation made in sec. 1, ch. 3, FSSLA 2005, page 71, lines 9 - 10 (Fort Yukon: airport resurfacing - $2,765,625);

(3) $6,600,000 of the allocation made in sec. 1, ch. 3, FSSLA 2005, page 73, lines 6 - 8 (Ouzinkie: airport reconstruction and relocation - $9,000,000); and

(4) $1,000,000 of the allocation made in sec. 1, ch. 3, FSSLA 2005, page 79, lines 30 - 31 (Dillingham: Wood River Road reconstruction - $1,000,000).

(g) Section 2, ch. 82, SLA 2006, page 113, line 23, is amended to read:

1002 Federal Receipts **1,026,284,951**

[1,036,719,351]

1212 Federal Stimulus: ARRA 2009 **10,434,400**

(h) The fund source amendment in (g) of this section is for

(1) $2,734,400 of the allocation made in sec. 1, ch. 82, SLA 2006, page 90, lines 16 - 17 (Fort Yukon: airport improvements - $4,725,151); and

(2) $7,700,000 of the allocation made in sec. 1, ch. 82, SLA 2006, page 99, lines 7 - 8 (Gustavus: dock replacement - $19,000,000).

(i) Section 5, ch. 30, SLA 2007, page 121, line 20, is amended to read:

1002 Federal Receipts **531,315,800**

[542,215,800]

1212 Federal Stimulus: ARRA 2009 **10,900,000**

(j) The fund source amendment in (i) of this section is for

(1) $3,500,000 of the allocation made in sec. 4, ch. 30, SLA 2007, page 105, lines 28 - 29 (Akiachak: airport relocation - $10,500,000);

(2) $400,000 of the allocation made in sec. 4, ch. 30, SLA 2007, page 105, lines 32 - 33 (Allakaket: airport improvements - $400,000); and

(3) $7,000,000 of the allocation made in sec. 4, ch. 30, SLA 2007, page 107, lines 4 - 5 (Huslia: airport improvements - $7,525,000).

(k) Section 14, ch. 29, SLA 2008, page 177, line 9, is amended to read:

1002 Federal Receipts	**551,465,150**
	[563,745,150]
1212 Federal Stimulus: ARRA 2009	**12,280,000**

(*l*) The fund source amendment in (k) of this section is for

(1) $1,780,000 of the allocation made in sec. 13, ch. 29, SLA 2008, page 162, lines 11 - 12 (Allakaket: airport improvements - $1,950,000); and

(2) $10,500,000 of the allocation made in sec. 13, ch. 29, SLA 2008, page 169, lines 31 - 33 (Juneau: Glacier Highway – Amalga to Eagle Beach widening - $10,500,000).

* **Sec. 43.** REVENUE AND APPROPRIATION BALANCE; CONSTITUTIONAL BUDGET RESERVE. (a) If the unrestricted state revenue available for appropriation in fiscal year 2009 is insufficient to cover general fund appropriations made for fiscal year 2009, the amount necessary to balance revenue and general fund appropriations is appropriated from the budget reserve fund (AS 37.05.540) to the general fund.

(b) If, after the appropriation made in (a) of this section, the unrestricted state revenue available for appropriation in fiscal year 2009 is insufficient to cover general fund appropriations made for fiscal year 2009, the amount necessary to balance revenue and general fund appropriations is appropriated to the general fund from the Alaska Housing Capital Corporation, a subsidiary of the Alaska Housing Finance Corporation created under authority of AS 18.56.086.

(c) The amount calculated to be available for appropriation under art. IX, sec. 17(b), Constitution of the State of Alaska, for fiscal year 2010 is appropriated under art. IX, sec. 17(b), Constitution of the State of Alaska, from the budget reserve fund to the general fund.

* **Sec. 44.** CONTINGENCY. Section 40 of this Act is contingent on passage by the Twenty-Sixth Alaska State Legislature in the First Regular Session and enactment into law of a version of SB 133 relating to a statewide electronic health information exchange system.

* **Sec. 45.** LAPSE. (a) The appropriations made by secs. 14 and 15(1) of this Act are for the capitalization of funds and do not lapse.

(b) The appropriations made by secs. 16, 19(b), 20(b), 20(c), 21(b), 22(d) - (f), 23(b) - (e), 23(g) - (i), 27, 31(c), 31(e), 31(f), 34(a), 35, 36(a), 37(a)(1), 37(a)(2), 37(a)(4), 37(c),

37(d), and 38 - 40 of this Act are for capital projects and lapse under AS 37.25.020.

(c) A grant awarded in this Act to a named recipient under AS 37.05.316 is for a capital project and lapses under AS 37.25.020, unless otherwise specified.

*** Sec. 46.** Sections 4, 7, 10, 18, 42, 43(a), and 43(b) of this Act take effect April 19, 2009.

*** Sec. 47.** Sections 17(b), 17(c), and 19 - 38 of this Act take effect June 30, 2009.

*** Sec. 48.** Except as provided in secs. 46 and 47 of this Act, this Act takes effect July 1, 2009.

CAPITAL BUDGET AMENDMENT

OFFERED IN: The House Finance Committee

TO: House CS for CSSB 75(FIN)

OFFERED BY: Representative Gara

DEPARTMENT:	Health and Human Services
APPROPRIATION:	Office of Children's Services
ALLOCATION:	Education &Training Voucher and Presidential Tuition Wavers; Preparation for Adult Living (PAL); Transitional Housing Assistance

ADD: $1,090,000, GF, 1004

DEPARTMENT:	Commerce, Community, and Economic Development
APPROPRIATION:	Grants to Municipalities
ALLOCATION:	Port of Anchorage Expansion

DELETE: $1,090,000, GF, 1004

EXPLANATION: Education & Training Voucher and Presidential Tuition Wavers: The state offers up to $5,000 to youth to obtain job training through the ETV program. While 150 youth qualify, the state only provides $115,000 in funding, to cover a small portion of this demand. An additional $700,000 would allow all youth who qualify to obtain these job training and education benefits. OCS funds, with private and state grants, 10 university tuition scholarships. If we added an additional 20 scholarships for $5,500 in tuition and fees, OCS could advertise their availability, and encourage more youth to set college as a goal. That would cost $110,000. With this $110,000 increment, we can find out how many youth will seek college education knowing that aid is available. Currently foster youth know only 10 scholarships are available, and that is a disincentive for many to pursue college education.

Preparation for Adult Living (PAL): This training effort offers youth life skills for when they leave foster care. It is currently not being offered to youth outside of Anchorage. To add 80 youth/year in Bethel, Barrow, Ketchikan, Kenai, Juneau and Fairbanks, OCS states it would need an additional $80,000.

Transitional Housing Assistance: Many youth coming out of foster care cannot afford rent. Currently OCS offers partial rental help for roughly 3 months to youth. Roughly 200 youth come out of care every year. An additional $200,000 would allow OCS to offer 100 youth up to $2,000 in additional rental help. Assuming $500 in help per month, that would allow youth to receive help for another 4 months as they transition out of foster care.

Attention!

This is being faxed to all local and national news sources!!!!!

Thank You A.P.A. and Govoner Sarah Palin

Hello,

I would like to tell you the story of a cancer patient that the state of Alaska is allowing to die. My name is William Stevens I have been diagnosed with Adenocarcinoma of the lung a 4.1cm tumor. I recently underwent lung surgery and now am in desperate need of chemo in order save my life. I have no medical insurance and applied to the state of Alaska adult public assistance office for medical help. They are refusing to give me aid even though I qualify financially. My oncologist Dr. Subramanian of anchorage only gives me a 15% chance of survival chemo is my only hope and I cant get it because the state has determined that I am not worthy of treatment. The State Of Alaska is committing Murder. I am sending you phone numbers of all Doctors and case workers if you choose to help me save my life for my self and my son you can check out my story.

Why would a convicted Murderer , child molester or inmate on death row get help from the state to save their life but they are killing me. Why is my life not worth saving?

Adult Public Assistance case # 05541992 last 4 of social 1350

Oncologist Dr. Subramanian 569-2627

Dr. Baker 276-2611 LLC "907" area code

Dr. Valdes 258-4430

Social Worker Sarah M. 264-1504

Thank you for any help you can give me I want to live.

William Stevens

SENATE FINANCE COMMITTEE REPORT
First Committee of Referral

DATE: 1/22/09

FURTHER:

Date of 5-Day Notice: _____
(in accordance with Uniform Rule 23)

DATE TURNED IN TO OFFICE: _____

Finance Committee considered SENATE BILL NO. 75

SB 75 BUDGET: CAPITAL, SUPP. & OTHER APPROPS

"An Act making and amending appropriations, including capital appropriations, supplemental appropriations, and appropriations to capitalize funds; and providing for an effective date."

and recommends:

[ ] be **replaced** with [ ] **SCS** or [X] **CS** SB 75 (FIN)

[ ] adopt **previous** [ ] **SCS** or [ ] **CS** _____ (_____)

[ ] attached amendment(s)

[ ] adopt _____ Letter of Intent

[ ] further referral to _____ Committee

SENATE BILL:
[X] Same Title
[ ] New Title

HOUSE BILL:
[ ] Same Title
[ ] Technical Title Change
[ ] New Title w/ SCR #_____

NEW FISCAL NOTE(S):

Department	Date	Fiscal	Indet.	Zero	FN#

PREVIOUS FISCAL NOTE(S):

Department	Date	Fiscal	Indet.	Zero	FN#

[ ] **APPROPRIATION - no fiscal note**

* **Sec. 2.** The following sets out the funding by agency for the appropriations made in sec. 1 of this Act.

Funding Source	Amount
Department of Administration	
1004 Unrestricted General Fund Receipts	175,000
1147 Public Building Fund	2,800,000
*** Total Agency Funding ***	$2,975,000
Department of Commerce, Community and Economic Development	
1002 Federal Receipts	40,630,000
1003 General Fund Match	500,000
1004 Unrestricted General Fund Receipts	15,111,801
1007 Interagency Receipts	300,000
1061 Capital Improvement Project Receipts	1,300,000
1210 Renewable Energy Grant Fund	25,000,000
*** Total Agency Funding ***	$82,841,801
Department of Corrections	
1004 Unrestricted General Fund Receipts	7,000,000
*** Total Agency Funding ***	$7,000,000
Department of Education and Early Development	
1004 Unrestricted General Fund Receipts	43,443,481
*** Total Agency Funding ***	$43,443,481
Department of Environmental Conservation	
1002 Federal Receipts	52,125,000
1003 General Fund Match	14,041,598
1004 Unrestricted General Fund Receipts	23,189,396
1052 Oil/Hazardous Release Prevention & Response Fund	5,750,000
1108 Statutory Designated Program Receipts	500,000
*** Total Agency Funding ***	$95,605,994
Department of Fish and Game

*** Sec. 13.** FEDERAL AND OTHER PROGRAM RECEIPTS. (a) Federal receipts, designated program receipts as defined in AS 37.05.146(b)(3), information services fund program receipts as defined in AS 44.21.045(b), receipts of the University of Alaska as described in AS 37.05.146(b)(2), receipts of commercial fisheries test fishing operations under AS 37.05.146(c)(21), corporate receipts of the Alaska Housing Finance Corporation, corporate receipts of the Alaska Aerospace Development Corporation, Exxon Valdez oil spill trust receipts as defined in AS 37.05.146(b)(4), and receipts of the Alaska Fire Standards Council under AS 37.05.146(b)(5), that exceed the amounts appropriated by this Act are appropriated conditioned on compliance with the program review provisions of AS 37.07.080(h).

(b) If federal or other program receipts as defined in AS 37.05.146 and in AS 44.21.045(b) exceed the estimates appropriated by this Act, the appropriations from state funds for the affected program may be reduced by the excess if the reductions are consistent with applicable federal statutes.

(c) If federal or other program receipts as defined in AS 37.05.146 and in AS 44.21.045(b) fall short of the estimates appropriated by this Act, the affected appropriation is reduced by the amount of the shortfall in receipts.

*** Sec. 14.** FUND TRANSFERS. (a) The income earned during fiscal year 2010 on revenue from the sources set out in AS 37.13.145(d) is appropriated to the Alaska capital income fund (AS 37.05.565).

(b) The interest earned on amounts in the election fund, estimated to be $320,000, are appropriated to the election fund required by the federal Help America Vote Act.

(c) The sum of $2,500,000 is appropriated from the general fund to the information services fund (AS 44.21.045(a)).

(d) The sum of $15,000,000 is appropriated from the dividend paid to the state by the Alaska Industrial Development and Export Authority under AS 44.88.088 to the Alaska Gasline Inducement Act reimbursement fund (AS 43.90.400(a)) for the natural gas pipeline project construction inducement under AS 43.90.110(a)(1).

(e) The sum of $25,000,000 is appropriated from the dividend paid to the state by the Alaska Housing Finance Corporation under AS 18.56.089 to the renewable energy grant fund (AS 42.45.045).

*** Sec. 15.** INSURANCE CLAIMS. The amounts to be received in settlement of insurance claims for losses and the amounts to be received as recovery for losses are appropriated from the general fund to the

(1) state insurance catastrophe reserve account (AS 37.05.289(a)); or

(2) appropriate state agency to mitigate the loss.

*** Sec. 16.** NATIONAL PETROLEUM RESERVE - ALASKA IMPACT GRANT PROGRAM. (a) The sum of $15,967,840 of the amount received by the National Petroleum Reserve - Alaska special revenue fund (AS 37.05.530) under 42 U.S.C. 6506a(*l*) or former 42 U.S.C. 6508 by August 31, 2009, estimated to be $16,035,066, is appropriated from that fund to the Department of Commerce, Community, and Economic Development for capital project grants under the National Petroleum Reserve - Alaska impact grant program to be allocated to the following municipalities in the amounts stated:

MUNICIPALITY	PROJECT	ALLOCATION
(1) North Slope Borough	North Slope Borough workforce development three-year program enforcement	$2,500,620

(b) The unexpended and unobligated balance of the appropriation made in sec. 8(b), ch. 1, SSSLA 2002, page 97, line 28 (Eek, community projects and improvements - $170,838) is reappropriated to the Department of Commerce, Community, and Economic Development for payment as a grant under AS 37.05.315 to the City of Eek for river bank repairs and boardwalks.

(c) The unexpended and unobligated balances of the appropriations made in sec. 8(a)(15), ch. 159, SLA 2004 (Kongiganak, community projects and improvements - $27,770), sec. 8(a), ch. 1, SSSLA 2002, page 96, line 17 (Kongiganak, community projects and improvements - $55,496), sec. 8(b)(28), ch. 159, SLA 2004 (Napaskiak, community projects and improvements - $6,326), sec. 131, ch. 139, SLA 1998, page 99, lines 19 - 20 (Nunapitchuk, motor grader snowblade - $15,500), sec. 1, ch. 135, SLA 2000, page 53, lines 28 - 30 (Nunapitchuk, washeteria renovation - water improvements - $50,000), sec. 15(b), ch. 61, SLA 2001, page 78, line 19 (Nunapitchuk, capital projects and improvements - $26,322), sec. 1, ch. 1, SSSLA 2002, page 81, lines 30 - 31 (Nunapitchuk, solid waste dumpsite upgrade - $25,000), sec. 8(a), ch. 1, SSSLA 2002, page 96, line 24 (Oscarville, community projects and improvements - $88,107), sec. 71(c), ch. 1, SSSLA 2002 (Oscarville, community facilities and equipment), sec. 8(a)(19), ch. 159, SLA 2004 (Oscarville, community projects

and improvements - $58,651), sec. 1, ch. 61, SLA 2001, page 63, lines 12 - 13 (Tuntutuliak, jail house completion - $16,466), sec. 67(b), ch. 61, SLA 2001 (Tuntutuliak, construction of a post office), sec. 8(a), ch. 1, SSSLA 2002, page 97, line 2 (Tuntutuliak, community projects and improvements - $54,518), sec. 8(a)(31), ch. 159, SLA 2004 (Tuntutuliak, community projects and improvements - $7,881), and sec. 8(b)(38), ch. 159, SLA 2004 (Platinum, community projects and improvements - $26,900) are reappropriated to the Department of Commerce, Community, and Economic Development for payment as a grant under AS 37.05.316 to the Association of Village Council Presidents for a demonstration project to use wood as a heating source for the fiscal year ending June 30, 2009.

* **Sec. 34.** HOUSE DISTRICT 39. The unexpended and unobligated balances of the appropriations made in sec. 8(a), ch. 1, SSSLA 2002, page 96, line 26 (Pitka's Point, Community projects and improvements - $77,149) and sec. 8(a)(21), ch. 159, SLA 2004 (Pitka's Point, Community projects and improvements - $35,507) are reappropriated to the Department of Commerce, Community, and Economic Development for payment as a grant under AS 37.05.316 to the Pitka's Point Traditional Council for upgrading the washeteria.

* **Sec. 35.** DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES. The unexpended and unobligated balance of the appropriation made in sec. 1, ch. 82, SLA 2006, page 38, lines 9 - 12 (Kenai Peninsula Borough, Diamond Ridge nonmotorized vehicle safety trail - $65,000) is reappropriated to the Department of Transportation and Public Facilities for Ohlson Mountain Road improvements.

* **Sec. 36.** REAPPROPRIATION OF LEGISLATIVE APPROPRIATIONS. (a) The unexpended and unobligated balances of the appropriations made in sec. 1, ch. 27, SLA 2008, page 44, line 28 (Legislative Council - $32,960,200), sec. 1, ch. 27, SLA 2008, page 45, line 6 (legislative operating budget - $10,835,500), and sec. 1, ch. 27, SLA 2008, page 44, line 20 (Budget and Audit Committee - $19,123,900) are reappropriated to the Legislative Council for the projects listed in the amounts stated:

PROJECT	AMOUNT
(1) boiler replacement and heating rehabilitation project	$2,900,000
(2) exterior and interior repair, renovation, and safety improvements	2,600,000
(3) Alaska Conference on State and Federal	750,000

Responsibility Related to Economic Impacts of ESA Listing and addressing the effects of climate and environmental change on the state for the fiscal years ending June 30, 2009, and June 30, 2010

(4) information technology upgrades and electronic voting improvements 450,000

(5) comprehensive statewide energy plan for the fiscal year ending June 30, 2010 300,000

(b) If the amount available for reappropriation in (a) of this section is less than $7,000,000, the reappropriations made by (a)(1) - (5) of this section shall be reduced in proportion to the amount of the shortfall.

(c) The unexpended and unobligated balances, after the reappropriation made in (a) of this section, of the appropriations made in sec. 1, ch. 27, SLA 2008, page 44, line 28 (Legislative Council - $32,960,200), sec. 1, ch. 27, SLA 2008, page 45, line 6 (legislative operating budget - $10,835,500), and sec. 1, ch. 27, SLA 2008, page 44, line 20 (Budget and Audit Committee - $19,123,900) are reappropriated to the Legislative Budget and Audit Committee for purchase, restoration, and display of historical art and artifacts in conjunction with statehood celebrations in the capitol.

(d) Section 70(c), ch. 29, SLA 2008, is amended to read:

(c) The unexpended and unobligated balances, not to exceed $100,000, of the appropriations made in sec. 1, ch. 28, SLA 2007, page 42, line 22 (Budget and Audit Committee - $14,219,300); sec. 1, ch. 28, SLA 2007, page 42, line 28 (Legislative Council - $30,201,500); and sec. 1, ch. 28, SLA 2007, page 43, line 6 (legislative operating budget - $9,682,300) are reappropriated to the Legislative Council for the Legislative Outdoor Heritage Caucus for the fiscal year ending June 30, **2010** [2009].

(e) The unexpended and unobligated balance, estimated to be $750,000, of the appropriation made in sec. 70(b), ch. 29, SLA 2008 (Legislative Council, Alaska Conference on State and Federal Responsibility Related to Economic Impacts of ESA Listings) is reappropriated to the Legislative Council for the Alaska Conference on State and Federal Responsibility Related to Economic Impacts of ESA Listings and for addressing the effects of

climate and environmental change on the state for the fiscal years ending June 30, 2009, and June 30, 2010.

*** Sec. 37.** UNIVERSITY OF ALASKA. The unexpended and unobligated balance of the appropriation made in sec. 4, ch. 30, SLA 2007, page 117, lines 23 - 25 (University of Alaska, Kachemak Bay Campus expansion - city hall purchase - $2,500,000) is reappropriated to the University of Alaska for property acquisition and property improvements to the Kachemak Bay Campus of the Kenai Peninsula College.

*** Sec. 38.** COASTAL IMPACT ASSISTANCE PROGRAM. (a) The share of money received by the state under the federal coastal impact assistance program, sec. 384, P.L. 109-58 (Energy Policy Act of 2005), expected to be $53,600,000, is appropriated in the following amounts to the departments listed for the projects described:

(1) $25,950,000 to the Department of Natural Resources for state-initiated capital projects, as allowed under federal and state laws governing the use of coastal impact assistance program funds;

(2) $750,000 to the Department of Fish and Game for the Western Alaska Salmon Coalition's chum and sockeye genetic identification program;

(3) $16,000,000 to the Department of Commerce, Community, and Economic Development for capital project grants to be awarded through an open public solicitation process and as allowed under federal and state laws governing the use of coastal impact assistance program funds;

(4) $10,900,000 to the Department of Commerce, Community, and Economic Development for competitive capital project grants, as allowed under federal and state laws governing the use of coastal impact assistance program funds, to be allocated to the following coastal resource service areas and municipalities in the amounts stated:

RECIPIENT	AMOUNT
Cenaliulriit CRSA	$3,000,000
City and Borough of Juneau	1,900,000
Aleutians West CRSA	1,200,000
Bering Straits CRSA	1,100,000
City and Borough of Sitka	900,000
Ketchikan Gateway Borough	900,000

Aleutians East Borough	700,000
Bristol Bay CRSA	500,000
City and Borough of Yakutat	300,000
Haines Borough	200,000
Municipality of Skagway	100,000
City and Borough of Wrangell	100,000

(b) If the amount available for appropriation in (a) of this section is less than $53,600,000, the appropriations made in (a)(1) - (4) of this section shall be reduced in proportion to the amount of the shortfall.

*** Sec. 39.** DEPARTMENT OF FISH AND GAME. The sum of $750,000 is appropriated from the general fund to the Department of Fish and Game to supplement the appropriation of federal funds in sec. 38(a)(2) of this Act for the Western Alaska Salmon Coalition's chum and sockeye genetic identification program for the fiscal year ending June 30, 2010.

*** Sec. 40.** FUND SOURCE CHANGES FOR FEDERAL ECONOMIC STIMULUS PROJECTS FOR THE DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES. (a) Section 2, ch. 61, SLA 2001, page 65, line 24, is amended to read:

Federal Receipts	**658,269,373**
	[664,017,739]
Federal Stimulus: ARRA 2009	**5,748,366**

(b) The fund source amendment in (a) of this section is for $5,748,366 of the allocation made in sec. 1, ch. 61, SLA 2001, page 41, lines 21 - 23 (Ketchikan: Tongass - viaducts replacement and rehabilitation - $5,750,000).

(c) Section 2, ch. 159, SLA 2004, page 53, line 28, is amended to read:

Federal Receipts	**1,095,667,288**
	[1,100,167,288]
Federal Stimulus: ARRA 2009	**4,500,000**

(d) The fund source amendment in (c) of this section is for

(1) $3,000,000 of the allocation made in sec. 1, ch. 159, SLA 2004, page 36, lines 29 - 30 (Fort Yukon: resurfacing - $3,000,000); and

(2) $1,500,000 of the allocation made in sec. 1, ch. 159, SLA 2004, page 44, line 33, through page 45, line 4 (Ketchikan: Tongass Highway - viaducts replacement and

rehabilitation - $2,200,000).

(e) Section 2, ch. 3, FSSLA 2005, page 93, line 27, is amended to read:

1002 Federal Receipts	**742,445,086**
	[757,030,711]
1212 Federal Stimulus: ARRA 2009	**14,585,625**

(f) The fund source amendment in (e) of this section is for

(1) $4,220,000 of the allocation made in sec. 1, ch. 3, FSSLA 2005, page 69, lines 31 - 32 (Allakaket: airport improvements - $4,220,000);

(2) $2,765,625 of the allocation made in sec. 1, ch. 3, FSSLA 2005, page 71, lines 9 - 10 (Fort Yukon: airport resurfacing - $2,765,625);

(3) $6,600,000 of the allocation made in sec. 1, ch. 3, FSSLA 2005, page 73, lines 6 - 8 (Ouzinkie: airport reconstruction and relocation - $9,000,000); and

(4) $1,000,000 of the allocation made in sec. 1, ch. 3, FSSLA 2005, page 79, lines 30 - 31 (Dillingham: Wood River Road reconstruction - $1,000,000).

(g) Section 2, ch. 82, SLA 2006, page 113, line 23, is amended to read:

1002 Federal Receipts	**1,026,284,951**
	[1,036,719,351]
1212 Federal Stimulus: ARRA 2009	**10,434,400**

(h) The fund source amendment in (g) of this section is for

(1) $2,734,400 of the allocation made in sec. 1, ch. 82, SLA 2006, page 90, lines 16 - 17 (Fort Yukon: airport improvements - $4,725,151); and

(2) $7,700,000 of the allocation made in sec. 1, ch. 82, SLA 2006, page 99, lines 7 - 8 (Gustavus: dock replacement - $19,000,000).

(i) Section 5, ch. 30, SLA 2007, page 121, line 20, is amended to read:

1002 Federal Receipts	**531,315,800**
	[542,215,800]
1212 Federal Stimulus: ARRA 2009	**10,900,000**

(j) The fund source amendment in (i) of this section is for

(1) $3,500,000 of the allocation made in sec. 4, ch. 30, SLA 2007, page 105, lines 28 - 29 (Akiachak: airport relocation - $10,500,000);

(2) $400,000 of the allocation made in sec. 4, ch. 30, SLA 2007, page 105,

lines 32 - 33 (Allakaket: airport improvements - $400,000); and

(3) $7,000,000 of the allocation made in sec. 4, ch. 30, SLA 2007, page 107, lines 4 - 5 (Huslia: airport improvements - $7,525,000).

(k) Section 14, ch. 29, SLA 2008, page 177, line 9, is amended to read:

1002 Federal Receipts	**551,465,150**
	[563,745,150]
1212 Federal Stimulus: ARRA 2009	**12,280,000**

(*l*) The fund source amendment in (k) of this section is for

(1) $1,780,000 of the allocation made in sec. 13, ch. 29, SLA 2008, page 162, lines 11 - 12 (Allakaket: airport improvements - $1,950,000); and

(2) $10,500,000 of the allocation made in sec. 13, ch. 29, SLA 2008, page 169, lines 31 - 33 (Juneau: Glacier Highway – Amalga to Eagle Beach widening - $10,500,000).

*** Sec. 41.** ALASKA HOUSING CAPITAL CORPORATION. (a) The available balance of all subfunds and accounts that would be deposited in the budget reserve fund (art. IX, sec. 17, Constitution of the State of Alaska) for fiscal year 2009 by operation of art. IX, sec. 17(d), Constitution of the State of Alaska, to repay appropriations from the budget reserve fund is appropriated to the Alaska Housing Capital Corporation, a subsidiary of the Alaska Housing Finance Corporation created under authority of AS 18.56.086.

(b) Appropriations made to the Alaska Housing Capital Corporation for fiscal year 2009 that are made from subfunds and accounts other than the operating general fund (state accounting system fund number 11100) by operation of (a) of this section are appropriated from the Alaska Housing Capital Corporation to the subfunds and accounts from which those funds were appropriated under (a) of this section.

*** Sec. 42.** REVENUE AND APPROPRIATION BALANCE; CONSTITUTIONAL BUDGET RESERVE. (a) The sum of $1,673,000 is appropriated from the general fund to the Department of Revenue, treasury division, for operating costs related to management of the constitutional budget reserve fund for the fiscal year ending June 30, 2010.

(b) If the unrestricted state revenue available for appropriation in fiscal year 2009 is insufficient to cover general fund appropriations made for fiscal year 2009, the amount necessary to balance revenue and general fund appropriations is appropriated from the budget

reserve fund (AS 37.05.540) to the general fund.

(c) If, after the appropriation made in (b) of this section, the unrestricted state revenue available for appropriation in fiscal year 2009 is insufficient to cover general fund appropriations made for fiscal year 2009, the amount necessary to balance revenue and general fund appropriations is appropriated to the general fund from the Alaska Housing Capital Corporation, a subsidiary of the Alaska Housing Finance Corporation created under authority of AS 18.56.086.

(d) The amount calculated to be available for appropriation under art. IX, sec. 17(b), Constitution of the State of Alaska, for fiscal year 2010 is appropriated under art. IX, sec. 17(b), Constitution of the State of Alaska, from the budget reserve fund to the general fund.

* **Sec. 43.** LAPSE. (a) The appropriations made by secs. 14 and 15(1) of this Act are for the capitalization of funds and do not lapse.

(b) The appropriations made by secs. 16, 19(b), 20(b), 20(c), 22(d) - (f), 23(b) - (e), 23(g) - (i), 26, 33(a), 34, 35, 36(a)(1), 36(a)(2), 36(a)(4), 36(c), 37, and 38 of this Act are for capital projects and lapse under AS 37.25.020.

(c) A grant awarded in this Act to a named recipient under AS 37.05.316 is for a capital project and lapses under AS 37.25.020, unless otherwise specified.

* **Sec. 44.** Sections 4, 7, 10, 18, 40, 42(b), and 42(c) of this Act take effect April 19, 2009.

* **Sec. 45.** Sections 17(b), 17(c), 19 - 37, and 41(a) of this Act take effect June 30, 2009.

* **Sec. 46.** Except as provided in secs. 44 and 45 of this Act, this Act takes effect July 1, 2009.

April 10, 2009

Responsible Cruising in Alaska

Honorable Sarah Palin, Governor
Alaska State Capitol
Juneau, Alaska 99801

Re: SB 75 - Cruise Passenger Fee Appropriations

Dear Governor Palin:

This correspondence addresses and classifies various proposals incorporated in the current version of the State of Alaska's Capital Budget (CSSB-75 (Finance)). This review is limited to the proposals in the appropriation measure funded from the excise tax on passengers of large cruise ships, and uses the same nomenclature as SB 75 at Section 4 of the appropriation measure when describing these proposals.

The analysis and classification of these proposed appropriations is based on a review of the legislative history of the 2006 laws establishing the taxes and to insure that the appropriations are consistent with applicable state and federal law. We believe that the revenues derived from the various taxes passed via the 2006 initiative should, to the greatest extent possible, be spent on projects and activities that have a strong nexus with cruise ships and cruise ship passenger activities. We strongly believe that Alaska should be building more wharfs and facilities for large passenger vessels in coastal communities that now have or are likely to have cruise passenger visits. We also support using the available revenue derived from the cruise related tax levies on ancillary facilities and activities that also have a clear and obvious connection to cruise related activities, e.g., upland improvements adjacent to wharfs, pedestrian harbor walks, and other projects in the immediate vicinity of wharfs and docks used by large passenger vessels. The basic rule of thumb developed during more than a decade of advocating for useful cruise related projects in Alaska comes down to this: "Build a wharf or other infrastructure as close to a wharf as possible." This has proven to be an effective filter for evaluating the many proposals when there is competition for scarce capital funding.

Accordingly, please review and work with the legislative branch to modify and adjust the cruise related projects, as follows:

Obvious and clearly meritorious appropriations consistent with state and federal law:

Grants to Named Recipients per AS 37.05.316

Marine Exchange of Alaska - Vessel Tracking System[1] - $450,000

[1] This is a perfect example of the kind of activity that should be funded with cruise ship excise tax revenue in order to improve the safety and efficiency of cruising in Alaska.

3387

Grants to Municipalities per AS 37.05.315

Hoonah - Cruise Ship Mooring Buoy System - $1,000,000
Juneau - Cruise Ship Dock Improvements - $2,500,000
Ketchikan - Cruise Ship Berth IV Traffic Signal - $1,300,000
Ketchikan - Port of Ketchikan Berth I and II Replacement - $4,000,000
Seward - Bus Transportation Assistance for Cruise Ship Passengers - $167,000
Seward - Dredging Cruise Ship Berthing Basins and Approaches - $4,500,000
Sitka - Commercial Passenger Vessel Lightering Facility Improvements - $2,000,000
Skagway - Municipal Wastewater Treatment Facility Improvements
Due to Seasonal Cruise Impacts - $2,500,000

Appropriations that contain ambiguities and may be inconsistent with the stated purposes of state law, and cause concerns according to federal law:

Grants to Named Recipients per AS 37.05.316

Aviation Heritage Museum - Major Facility Safety, Energy and Collections Care Improvements[2] - $500,000
Alaska Native Heritage Center - Village Site Completion[3] - $275,000
Alaska Wildlife Conservation Center, Inc. -Visitor Education and Sanctuary Research[4] - $1,000,000
Morris Thompson Cultural and Visitors Center - Exhibit Completion[5] - $1,000,000

Grants to Municipalities per AS 37.05.315

Anchorage - Port of Anchorage Expansion[6] - $10,000,000
Haines Borough -Port Chilkoot Waterfront Improvements[7] - $1,900,000
Juneau - Auke Bay Seawalk Construction[8] - $800,000
Ketchikan - Reconstruction of Downtown Bridges and Trestles[9] -$5,000,000
Kodiak - Baranof Park Improvements[10] - $2,000,000

---

[2] The connection between this worthy project and cruise ship passengers is not immediately obvious. However, if cruise passengers are routinely and regularly shuttled to this venue while touring in Alaska, legal concerns about using cruise passenger excise tax funds for this purpose are reduced. Printed materials or other "backup" documentation submitted to the legislature, that outlines a genuine nexus between this project and cruise passengers, would lessen federal and state legal concerns about using cruise passenger excise taxes for this project. Some modification to the legislative appropriation language expressing that these funds will enhance and improve the efficiency of the facilities, based on actual cruise passenger activity, would be appropriate. See, for example, the legislative language pertaining to the proposed Skagway wastewater treatment facility, above.

[3] Id.

[4] Id.

[5] Id.

[6] The Port of Anchorage is increasingly utilized as a port of call for large passenger vessels. The Port has proposed construction of a new cruise passenger terminal, the necessary passenger walkways, gangways and ramps, and building space for security checking and personnel. These needed improvements are likely to cost approximately $6,000,000 - $8,000,000, according to documentation reviewed to date. Clarification of the project should insure that sufficient documentation supports this appropriation. Language in the legislation should specify that the appropriation be used for cruise passenger related activities, not general Port of Anchorage operations or capital needs.

[7] Language clarifying that these waterfront improvements are related to the safe and efficient movement of cruise passengers would significantly improve the prospect of defending this worthy project.

[8] Id.

[9] Id.

Sitka - Crescent Harbor Sidewalk Widening[11] - $1,000,000
Wrangell - Stikine Avenue Sidewalk Extension[12] - $390,000
Valdez - City Dock Information and Interpretative Center[13] - $800,000
Valdez - Dock Improvements[14] - $3,325,000
Whittier - Railroad Station Improvements[15] - $325,000

Department of Transportation and Public Facilities - Cruise Ship-Related Projects

Haines - Beach Road Widening and Front Street Intersection Improvements[16] - $2,945,500
Homer - Homer Spit Pathway[17] - $2,000,000

Appropriations that do not appear to have an obvious relationship with the guidelines in state law, and are problematic according to federal law:

Grants to Municipalities per AS 37.05.315

Anchorage - Egan Center Upgrades[18] - $1,000,000
Cordova - Cordova Center Construction and Equipment[19] - $1,000,000
Fairbanks North Star Borough - Carlson Center Improvements[20] - $1,000,000
Palmer - Visitors Information Center Restrooms[21] - $100,000
Wasilla - Airport Train Station Improvements[22] - $430,000

Department of Natural Resources - State Parks Deferred Maintenance and Emergency Repairs[23] - $6,000,000

---

[10] Id.
[11] Id.
[12] Id. Presumably this sidewalk used by cruise passengers to have safe and efficient access to the famous petroglyphs that cruise passengers are eager to view.
[13] See, e.g., footnote 7, above.
[14] Id.
[15] Id. Because Whittier is a port of call for large passenger vessels, and an embarkation point for cruise passengers traveling by train to points north, this project is certainly appropriate.
[16] Language should be included in the legislative appropriation making it obvious that this project is related to mitigating or improving the efficiency of cruise passenger activities.
[17] Id.
[18] In the absence of a clear and convincing relationship between this proposed project and cruise passengers, use of cruise passenger excise tax funds would likely be a mistake, as this activity appears to be routine construction and/or maintenance.
[19] Id.
[20] Id.
[21] Id.
[22] Id.
[23] Without some sort of showing that there is an obvious relationship between these proposed projects and cruise passengers, use of cruise passenger excise tax funds sequestered in the regional impact fund would probably be a mistake, as this activity appears to be routine and emergency maintenance unrelated to cruise ship passenger activity.

Department of Transportation and Public Facilities - Cruise Ship-Related Projects[24]

Haines - Front Street, Main to Lutak Road - $850,000
Haines - Old Haines Highway Sidewalk Construction - $1,150,000
Juneau - Egan Drive - Whittier to Main Improvements - $1,990,000
Ketchikan - Downtown Pedestrian Enhancements - $375,000
Skagway - Gateway Pedestrian Improvements - $620,000
Valdez - Hazlet Drive Sidewalk - $750,000

Appropriations likely to be found inconsistent with stated purposes of state law and to cause significant concerns according to federal law:

Grants to Named Recipients per AS 37.05.316

Alaska Zoo - Infirmary and Commissary for the Animals - $800,000

Grants to Municipalities per AS 37.05.315

Petersburg - Commercial Dock and Vehicle Drive Down Design[25] - $790,000
Sitka - Swan Lake Recovery and Improvements[26] - $1,650,000
Wrangell - Construction Activities to Complete the Marine Service Center[27] - $2,500,000

Department of Transportation and Public Facilities - Cruise Ship-Related Projects

Juneau - Glacier Spur Pavement Rehabilitation[28] - $2,000,000
Juneau - Thane Road Pavement Rehabilitation - $4,000,000
Seward - Seward Highway Replacement Bridges[29] - Ptarmigan Creek, Falls Creek and Trail River - $3,000,000
Skagway -Dyea Road Taiya River Bridge Replacement[30] - $1,500,000

---

[24] All of these projects, while potentially worthy, have little or no known nexus with cruise passenger activities. At a minimum, each of these projects should expressly state that the project is conceived of and related to mitigating or addressing safety and efficiency concerns related to seasonal cruise passenger traffic and/or pedestrian use.

[25] The relationship between this proposed project and passengers traveling to Alaska on large passenger vessels appears to be negligible. At present, no large cruise vessels call on Petersburg, nor are any large passenger vessels likely to dock there in the foreseeable future. The "commercial" aspects of this project should have a clear connection to cruise passengers.

[26] It is difficult to ascertain the relationship between the project and passengers paying the required excise tax when traveling aboard a large passenger vessel to Alaska.

[27] Id.

[28] While some cruise passengers paying the excise tax will travel over the portion of the road slated to be rebuilt, use of passenger tax funds for this project, at this time, has legal risk and is believed to be imprudent.

[29] This project appears to be a necessary highway maintenance project rather than a tourist related infrastructure proposal.

[30] Tourists and some large cruise ship passengers visiting Alaska will use this proposed bridge while traveling to Dyea to visit significant historic locations. However, there does not appear to be a compelling or obvious relationship between the excise tax funding source and the bridge use by cruise passengers to justify this particular proposal at this time.

We appreciate your attention to our concerns with the emerging budget, and trust that you and your staff will promptly work with the legislature and various agencies to reconcile and improve the language in the final capital projects bill. If I can be of any additional assistance, please contact me your earliest convenience.

Testimony on Capital Budget 041509

Thank you Mr. Chairman and committee members for providing me the opportunity to speak to you on the proposed state capital budget.

For the record, my name is John Duffy and I am the Borough Manager for the Matanuska-Susitna Borough.

I know you have a tight schedule so I will be brief. I have a few prepared comments I wish to provide for your consideration.

Mr. Chairman members of the committee No one in the state is growing like we are: In just eight years our population grew 35 percent...by 2030 our population is projected to triple.

We are now ranked as the 34th fastest growing county in the United States. With this growth comes the need to invest in our infrastructure, particularly our roads, bridges, and port. An efficient and effective transportation system is a basic requirement for a growing economy; without adequate roads and bridges our transportation system will be hampered by congestion which results in higher costs of doing business due to long travel time delays. Other problems associated with poor ~~bridges and~~ roads include higher fatality and injury rates, today 3 of the top 4 most dangerous roads are in the Mat-Su Borough.

We understand that we are facing tough financial times and difficult budgetary decisions. The Mat-Su Borough taxpayer is ~~setting~~ stepping up to the plate by taxing themselves

for local ~~bridge and~~ road repair and improvements. Mat-Su taxpayers pay about $11.2 million for local road and bridges. The Assembly recently appropriated additional funds $500,000 for bridge and culvert repairs. This past October our voters passed a road bond to raise additional funds to improve several key arterial roads in the Borough by taxing themselves an additional $15 million. We ask that that state of Alaska match these funds with a $35 million appropriation so that we may continue on with improving our much needed roads.

We also ask that the financial pain from the budget shortfall be shared equally throughout the state; the past votes and the present capital budget places disproportant amount ~~places too much~~ of this burden on the residents of the Mat-Su Borough. If you look at

the per capita spending in the Senate capital budget, Mat-Su is at rock bottom ...just $294 dollars per Mat-Su resident...~~versus~~ $885 ~~in Anchorage and~~ $993 ~~in Fairbanks; these comparisons are similar to other regions in the state as well;~~ We believe the capital budget should be more balanced and serve all Alaskans.

other communities ~~that~~ are receiving between per resident

We respectfully ask for your consideration for capital funds that may be used to improve our transportation system which will benefit all Alaskans.

Mr. Chairman and members of the committee I appreciate the opportunity to speak with you today. We appreciate your efforts and recognize that you have difficult decisions to make. This ends my comments, thank you.

SENATOR BILL WIELECHOWSKI

Sponsor Statement: CS for SB 77

CS for SB 77 reauthorizes and makes permanent the legislature's Joint Armed Services Committee, which sunset on January 1. The committee was established by the legislature in July 1999 for a 10-year period. It is responsible for influencing federal decisions regarding realignment and closure of military bases in Alaska, increasing military training in Alaska and advocating for Alaskans serving in the Armed Forces.

Over the past ten years, the committee has had substantial success in carrying out its mission. With new base realignment and closure discussions slated to begin within the next two years, the need for the committee continues to be critical.

The committee is also in the middle of organizing a ceremony to honor Alaskans who, since statehood, have lost their lives in combat. The ceremony will take place this coming May in Anchorage and will recognize the sacrifice made by more than 175 men and women.

Immediate passage of CS for SB 77 is necessary to reauthorize the committee and enable it to continue its important activities.

CS FOR SENATE BILL NO. 83(L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SIXTH LEGISLATURE - SECOND SESSION

BY THE SENATE LABOR AND COMMERCE COMMITTEE

Offered: 2/6/09
Referred: Finance

Sponsor(s): SENATE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

A BILL

FOR AN ACT ENTITLED

"An Act repealing the Governor's Committee on Employment of People with Disabilities; creating the State Vocational Rehabilitation Committee and relating to the committee; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 23.15.220 is amended to read:

Sec. 23.15.220. Purpose. The purpose of AS 23.15.220 - 23.15.320 is to create a **State Vocational Rehabilitation Committee** [GOVERNOR'S COMMITTEE ON EMPLOYMENT OF PEOPLE WITH DISABILITIES] for Alaska to carry on a continuing program to promote the employment of people of the state with disabilities by creating statewide interest in the rehabilitation and employment of people with disabilities, and by obtaining and maintaining cooperation with public and private groups and individuals in this field.

*** Sec. 2.** AS 23.15.230 is amended to read:

Sec. 23.15.230. Appointment of committee. The **governor shall appoint the**

members of the State Vocational Rehabilitation Committee [GOVERNOR'S COMMITTEE CONSISTS OF NOT MORE THAN 12 MEMBERS APPOINTED BY THE GOVERNOR] for staggered terms not exceeding three years. **The composition of the committee must be consistent with the requirements of 29 U.S.C. 725 and 3003, as amended** [THE COMMITTEE SHALL BE COMPOSED OF STATE LEADERS OF INDUSTRY, BUSINESS, AGRICULTURE, LABOR, VETERANS, WOMEN, RELIGIOUS, EDUCATIONAL, CIVIC, FRATERNAL, WELFARE, SCIENTIFIC, MILITARY, MEDICAL, AND OTHER PROFESSIONS, OR AS MANY OF THESE AND LIKE CATEGORIES AS MAY BE FEASIBLY REPRESENTED]. A member may be reappointed, and a vacancy shall be filled by the governor.

* **Sec. 3.** AS 23.15.240 is amended to read:

Sec. 23.15.240. Selection [APPOINTMENT] and term of chair. The **members of the committee shall select a chair from among the voting members of the committee, subject to disapproval by the governor. The chair serves** [GOVERNOR SHALL APPOINT A CHAIR OF THE COMMITTEE WHO SERVES AS CHAIR] for one year or until a successor is **selected** [APPOINTED].

* **Sec. 4.** AS 23.15.260 is amended to read:

Sec. 23.15.260. Meetings. The committee shall meet **four times a year** [ANNUALLY], but, at the request of the governor, special meetings may be called. **Meetings may be conducted telephonically.**

* **Sec. 5.** The uncodified law of the State of Alaska is amended by adding a new section to read:

TRANSITION: MEMBERS OF THE GOVERNOR'S COMMITTEE ON EMPLOYMENT OF PEOPLE WITH DISABILITIES. A member of the Governor's Committee on Employment of People with Disabilities on the day before the effective date of this Act, continues to serve as a member of the State Vocational Rehabilitation Committee, created by AS 23.15.220, as amended by sec. 1 of this Act, if the Department of Labor and Workforce Development finds that the member meets the eligibility requirements under AS 23.15.230, as amended by sec. 2 of this Act. A member who continues service under this section after the effective date of this Act

(1) serves until the member's term would have expired as a member of the Governor's Committee on Employment of People with Disabilities; and

(2) may apply to the governor for reappointment to the State Vocational Rehabilitation Committee after the member's term expires.

*** Sec. 6.** The uncodified law of the State of Alaska is amended by adding a new section to read:

REVISOR'S INSTRUCTION. The revisor of statutes shall change the heading of art. 2 of AS 23.15 from "Governor's Committee on Employment of People with Disabilities" to "State Vocational Rehabilitation Committee."

*** Sec. 7.** This Act takes effect immediately under AS 01.10.070(c).

Explanation of Changes between SB 83 and CSSB 83 (L&C)

Short Title: Vocational Rehabilitation Committee

Section 2, Lines 4-5: Corrected U.S. Code citation from 29. U.S.C. 3001 to 3003.

Prepared by Alaska Department of Labor and Workforce Development, March 2010

CS Senate Bill 83 (Vocational Rehabilitation Committee)

- The primary purpose of this legislation is to bring state statute into compliance with federal laws.
- The committee formed by this legislation is an efficient use of resources as it combines two federally required committees with similar membership (State Rehabilitation Council and the Assistive Technology Advisory Committee).
- The bill allows for telephonic meetings. This may result in cost savings and greater participation by members.
- Any additional costs incurred by changes in membership will be absorbed by the agency administering the federal programs requiring the committees.
- Members bring an external view to the public rehabilitation system. They act as a voice for people with disabilities and other stakeholders, including employers. The majority of members also bring the perspective of what it is like to live with a disability.
- The difference between the original bill and the CS was to fix a typographical error.

Prepared by the Alaska Department of Labor and Workforce Development, April 2010

STATE OF ALASKA

DIVISION OF VOCATIONAL REHABILITATION

Governor's Committee on Employment & Rehabilitation
Of People with Disabilities

Sean Parnell, Governor

801 West 10th Street, Suite A
Juneau, AK 99801
V/TTY: (907) 465-2814
Fax: (907) 465-2856

January 26, 2010

Dear Senator:

The Governor's Committee on Employment & Rehabilitation of People with Disabilities strongly supports CS Senate Bill 83(L&C). This legislation will bring state statute into compliance with federal law. It will also eliminate the need to change state statute every time federal law changes. This committee will also function as the assistive technology advisory council which is also required under federal law and has similar membership requirements.

The Governor's Committee on Employment and Rehabilitation of People with Disabilities, which operates as Alaska's State Rehabilitation Council, is mandated by 29 U.S.C. 725 as amended, to have a very specific composition that is comprised of employers, service providers and individuals with disabilities. This varied composition provides an avenue for the Division of Vocational Rehabilitation to receive direct public feedback from a variety of stakeholders throughout Alaska. The Division utilizes this valuable feedback to continuously improve and refine its program.

We support the name change of the Governor's Committee on Employment of People with Disabilities to the State Vocational Rehabilitation Committee. Since this committee provides oversight to the Vocational Rehabilitation program, the name will clearly align it with the State of Alaska, Department of Labor and Workforce Development, Division Vocational Rehabilitation. The name change will also reduce the on-going confusion between this committee and the Governor's Council on Disability and Special Education.

Thank you for considering the CS SB 83(L&C). It is important that this committee is compliant with federal law to ensure continued funding which is critical to assist Alaskans with disabilities to become employed and have access to appropriate assistive technology services and devices. Please contact us if we can be of any assistance or provide any additional information.

Sincerely,

Ron Boynton

WWW.GOV.STATE.AK.US

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

January 23, 2009

The Honorable Gary Stevens
President of the Senate
Alaska State Legislature
State Capitol, Room 111
Juneau, AK 99801-1182

Dear President Stevens:

Under the authority of Article III, Section 18, of the Alaska Constitution, I am transmitting a bill repealing the Governor's committee on employment of people with disabilities, creating the state vocational rehabilitation committee, and relating to the committee.

The purpose of this bill is to eliminate the need to change state law every time federal requirements change the number and or constituency of the membership required for the Governor's committee on employment of people with disabilities and to expand its responsibilities to include the functions of an assistive technology advisory council as required under federal law. Since approximately 70 percent of the financing for the committee comes from the federal government, compliance with federal requirements is necessary.

Assisting those with disabilities in obtaining employment is vital to the economic and social well-being of the state. Given the opportunity, these Alaskans have the ability to contribute significantly to our workforce and to our communities, while granting them financial independence and affirmation of their value to society.

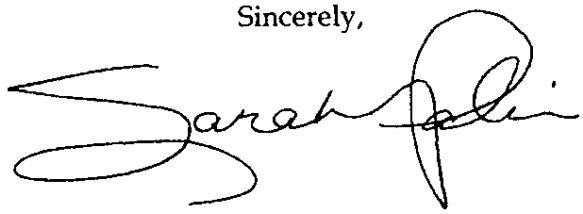
The Governor's committee on employment of people with disabilities has been carrying out the responsibilities of the state rehabilitation council identified in 29 U.S.C. 725, as amended. This bill would replace the existing committee with a federally compliant committee and would allow for adjustments necessary to remain in conformance with federal law without the need for further statute changes. The newly created committee's responsibilities would also include the functions of an assistive technology advisory council required under 29 U.S.C 3001.

The bill would also increase the frequency of meetings of the committee, from a minimum of once each year to four times a year. The bill would allow telephonic participation in committee meetings, and would provide for election of the chair by the committee members, subject to the approval of, rather than appointment by, the Governor.

The bill would also provide a reviser's instruction to change the heading of Article 2 of AS 23.15, to reflect the creation of the new committee.

I urge your prompt and favorable action on this measure.

Sincerely,



Sarah Palin
Governor

CITE-

29 USC Sec. 725

-EXPCITE-

TITLE 29 - LABOR
CHAPTER 16 - VOCATIONAL REHABILITATION AND OTHER REHABILITATION SERVICES
SUBCHAPTER I - VOCATIONAL REHABILITATION SERVICES
Part A - General Provisions

-HEAD-

Sec. 725. State Rehabilitation Council

-STATUTE-

(a) Establishment

(1) In general

Except as provided in section 721(a)(21)(A)(i) of this title, to be eligible to receive financial assistance under this subchapter a State shall establish a State Rehabilitation Council (referred to in this section as the "Council") in accordance with this section.

(2) Separate agency for individuals who are blind

A State that designates a State agency to administer the part of the State plan under which vocational rehabilitation services are provided for individuals who are blind under section 721(a)(2)(A)(i) of this title may establish a separate Council in accordance with this section to perform the duties of such a Council with respect to such State agency.

(b) Composition and appointment

(1) Composition

(A) In general

Except in the case of a separate Council established under subsection (a)(2) of this section, the Council shall be composed of -

(i) at least one representative of the Statewide Independent Living Council established under section 796d of this title, which representative may be the chairperson or other designee of the Council;

(ii) at least one representative of a parent training and information center established pursuant to section 671 of the Individuals with Disabilities Education Act [20 U.S.C. 1471];

(iii) at least one representative of the client assistance program established under section 732 of this title;

(iv) at least one qualified vocational rehabilitation counselor, with knowledge of and experience with vocational rehabilitation programs, who shall serve as an ex officio, nonvoting member of the Council if the counselor is an employee of the designated State agency;

(v) at least one representative of community rehabilitation program service providers;

(vi) four representatives of business, industry, and labor;

(vii) representatives of disability advocacy groups representing a cross section of -

(I) individuals with physical, cognitive, sensory, and mental disabilities; and

(II) individuals' representatives of individuals with

disabilities who have difficulty in representing themselves or are unable due to their disabilities to represent themselves;

(viii) current or former applicants for, or recipients of, vocational rehabilitation services;

(ix) in a State in which one or more projects are carried out under section 741 of this title, at least one representative of the directors of the projects;

(x) at least one representative of the State educational agency responsible for the public education of students with disabilities who are eligible to receive services under this subchapter and part B of the Individuals with Disabilities Education Act [20 U.S.C. 1411 et seq.]; and

(xi) at least one representative of the State workforce investment board.

(B) Separate Council

In the case of a separate Council established under subsection (a)(2) of this section, the Council shall be composed of -

(i) at least one representative described in subparagraph (A)(i);

(ii) at least one representative described in subparagraph (A)(ii);

(iii) at least one representative described in subparagraph (A)(iii);

(iv) at least one vocational rehabilitation counselor described in subparagraph (A)(iv), who shall serve as described in such subparagraph;

(v) at least one representative described in subparagraph (A)(v);

(vi) four representatives described in subparagraph (A)(vi);

(vii) at least one representative of a disability advocacy group representing individuals who are blind;

(viii) at least one individual's representative, of an individual who -

(I) is an individual who is blind and has multiple disabilities; and

(II) has difficulty in representing himself or herself or is unable due to disabilities to represent himself or herself;

(ix) applicants or recipients described in subparagraph (A)(viii);

(x) in a State described in subparagraph (A)(ix), at least one representative described in such subparagraph;

(xi) at least one representative described in subparagraph (A)(x); and

(xii) at least one representative described in subparagraph (A)(xi).

(C) Exception

In the case of a separate Council established under subsection (a)(2) of this section, any Council that is required by State law, as in effect on October 29, 1992, to have fewer than 15 members shall be deemed to be in compliance with subparagraph (B) if the Council -

(i) meets the requirements of subparagraph (B), other than the requirements of clauses (vi) and (ix) of such subparagraph; and

(ii) includes at least -

(I) one representative described in subparagraph (B)(vi); and

(II) one applicant or recipient described in subparagraph (B)(ix).

(2) Ex officio member

The Director of the designated State unit shall be an ex officio, nonvoting member of the Council.

(3) Appointment

Members of the Council shall be appointed by the Governor or, in the case of a State that, under State law, vests authority for the administration of the activities carried out under this chapter in an entity other than the Governor (such as one or more houses of the State legislature or an independent board), the chief officer of that entity. The appointing authority shall select members after soliciting recommendations from representatives of organizations representing a broad range of individuals with disabilities and organizations interested in individuals with disabilities. In selecting members, the appointing authority shall consider, to the greatest extent practicable, the extent to which minority populations are represented on the Council.

(4) Qualifications

(A) In general

A majority of Council members shall be persons who are -

(i) individuals with disabilities described in section 705(20)(B) of this title; and

(ii) not employed by the designated State unit.

(B) Separate Council

In the case of a separate Council established under subsection (a)(2) of this section, a majority of Council members shall be persons who are -

(i) blind; and

(ii) not employed by the designated State unit.

(5) Chairperson

(A) In general

Except as provided in subparagraph (B), the Council shall select a chairperson from among the membership of the Council.

(B) Designation by chief executive officer

In States in which the chief executive officer does not have veto power pursuant to State law, the appointing authority described in paragraph (3) shall designate a member of the Council to serve as the chairperson of the Council or shall require the Council to so designate such a member.

(6) Terms of appointment

(A) Length of term

Each member of the Council shall serve for a term of not more than 3 years, except that -

(i) a member appointed to fill a vacancy occurring prior to the expiration of the term for which a predecessor was appointed, shall be appointed for the remainder of such term; and

(ii) the terms of service of the members initially appointed shall be (as specified by the appointing authority

described in paragraph (3)) for such fewer number of years as will provide for the expiration of terms on a staggered basis.

(B) Number of terms

No member of the Council, other than a representative described in clause (iii) or (ix) of paragraph (1)(A), or clause (iii) or (x) of paragraph (1)(B), may serve more than two consecutive full terms.

(7) Vacancies

(A) In general

Except as provided in subparagraph (B), any vacancy occurring in the membership of the Council shall be filled in the same manner as the original appointment. The vacancy shall not affect the power of the remaining members to execute the duties of the Council.

(B) Delegation

The appointing authority described in paragraph (3) may delegate the authority to fill such a vacancy to the remaining members of the Council after making the original appointment.

(c) Functions of Council

The Council shall, after consulting with the State workforce investment board -

(1) review, analyze, and advise the designated State unit regarding the performance of the responsibilities of the unit under this subchapter, particularly responsibilities relating to -

(A) eligibility (including order of selection);

(B) the extent, scope, and effectiveness of services provided; and

(C) functions performed by State agencies that affect or that potentially affect the ability of individuals with disabilities in achieving employment outcomes under this subchapter;

(2) in partnership with the designated State unit -

(A) develop, agree to, and review State goals and priorities in accordance with section 721(a)(15)(C) of this title; and

(B) evaluate the effectiveness of the vocational rehabilitation program and submit reports of progress to the Commissioner in accordance with section 721(a)(15)(E) of this title;

(3) advise the designated State agency and the designated State unit regarding activities authorized to be carried out under this subchapter, and assist in the preparation of the State plan and amendments to the plan, applications, reports, needs assessments, and evaluations required by this subchapter;

(4) to the extent feasible, conduct a review and analysis of the effectiveness of, and consumer satisfaction with -

(A) the functions performed by the designated State agency;

(B) vocational rehabilitation services provided by State agencies and other public and private entities responsible for providing vocational rehabilitation services to individuals with disabilities under this chapter; and

(C) employment outcomes achieved by eligible individuals receiving services under this subchapter, including the availability of health and other employment benefits in connection with such employment outcomes;

(5) prepare and submit an annual report to the Governor and the Commissioner on the status of vocational rehabilitation programs operated within the State, and make the report available to the public;

(6) to avoid duplication of efforts and enhance the number of individuals served, coordinate activities with the activities of other councils within the State, including the Statewide Independent Living Council established under section 796d of this title, the advisory panel established under section 612(a)(20) of the Individuals with Disabilities Education Act [20 U.S.C. 1412(a)(20)], the State Council on Developmental Disabilities established under section 15025 of title 42, the State mental health planning council established under section 300x-3(a) of title 42, and the State workforce investment board;

(7) provide for coordination and the establishment of working relationships between the designated State agency and the Statewide Independent Living Council and centers for independent living within the State; and

(8) perform such other functions, consistent with the purpose of this subchapter, as the State Rehabilitation Council determines to be appropriate, that are comparable to the other functions performed by the Council.

(d) Resources

(1) Plan

The Council shall prepare, in conjunction with the designated State unit, a plan for the provision of such resources, including such staff and other personnel, as may be necessary and sufficient to carry out the functions of the Council under this section. The resource plan shall, to the maximum extent possible, rely on the use of resources in existence during the period of implementation of the plan.

(2) Resolution of disagreements

To the extent that there is a disagreement between the Council and the designated State unit in regard to the resources necessary to carry out the functions of the Council as set forth in this section, the disagreement shall be resolved by the Governor consistent with paragraph (1).

(3) Supervision and evaluation

Each Council shall, consistent with State law, supervise and evaluate such staff and other personnel as may be necessary to carry out its functions under this section.

(4) Personnel conflict of interest

While assisting the Council in carrying out its duties, staff and other personnel shall not be assigned duties by the designated State unit or any other agency or office of the State, that would create a conflict of interest.

(e) Conflict of interest

No member of the Council shall cast a vote on any matter that would provide direct financial benefit to the member or otherwise give the appearance of a conflict of interest under State law.

(f) Meetings

The Council shall convene at least four meetings a year in such places as it determines to be necessary to conduct Council business and conduct such forums or hearings as the Council considers appropriate. The meetings, hearings, and forums shall be publicly announced. The meetings shall be open and accessible to the general

public unless there is a valid reason for an executive session.

(g) Compensation and expenses

The Council may use funds allocated to the Council by the designated State unit under this subchapter (except for funds appropriated to carry out the client assistance program under section 732 of this title and funds reserved pursuant to section 730(c) of this title to carry out part C of this subchapter) to reimburse members of the Council for reasonable and necessary expenses of attending Council meetings and performing Council duties (including child care and personal assistance services), and to pay compensation to a member of the Council, if such member is not employed or must forfeit wages from other employment, for each day the member is engaged in performing the duties of the Council.

(h) Hearings and forums

The Council is authorized to hold such hearings and forums as the Council may determine to be necessary to carry out the duties of the Council.

REFERENCES IN TEXT

The Individuals with Disabilities Education Act, referred to in subsec. (b)(1)(A)(x), is title VI of Pub. L. 91-230, Apr. 13, 1970, 84 Stat. 175, as amended. Part B of the Act is classified generally to subchapter II (Sec. 1411 et seq.) of chapter 33 of Title 20, Education. For complete classification of this Act to the Code, see section 1400 of Title 20 and Tables.

-MISC1-

PRIOR PROVISIONS

A prior section 725, Pub. L. 93-112, title I, Sec. 105, as added Pub. L. 102-569, title I, Sec. 126(a), Oct. 29, 1992, 106 Stat. 4381; amended Pub. L. 103-73, title I, Sec. 107(d)(1), Aug. 11, 1993, 107 Stat. 721, related to State Rehabilitation Advisory Council, prior to the general amendment of this subchapter by Pub. L. 105-220.

AMENDMENTS

2004 - Subsec. (b)(1)(A)(ii). Pub. L. 108-446, Sec. 305(h)(2), substituted "671 of the Individuals with Disabilities Education Act" for "682(a) of the Individuals with Disabilities Education Act (as added by section 101 of the Individuals with Disabilities Education Act Amendments of 1997; Public Law 105-17)".

Subsec. (c)(6). Pub. L. 108-446, Sec. 305(h)(3), substituted "section 612(a)(20)" for "section 612(a)(21)" and "Individuals with" for "Individual with" and struck out "(as amended by section 101 of the Individuals with Disabilities Education Act Amendments of 1997; Public Law 105-17)" before ", the State Council".

2000 - Subsec. (c)(6). Pub. L. 106-402 substituted "the State

Council on Developmental Disabilities established under section 15025 of title 42" for "the State Developmental Disabilities Council described in section 6024 of title 42".

1998 - Subsec. (b)(3). Pub. L. 105-277, Sec. 101(f) [title VIII, Sec. 402(c)(6)(A)], substituted "Governor or, in the case of a State that, under State law, vests authority for the administration of the activities carried out under this chapter in an entity other than the Governor (such as one or more houses of the State legislature or an independent board), the chief officer of that entity" for "Governor" in first sentence and "appointing authority" for "Governor" in second and third sentences.

Subsec. (b)(4)(A)(i). Pub. L. 105-277, Sec. 101(f) [title VIII, Sec. 402(c)(6)(B)], substituted "section 705(20)(B)" for "section 705(20)(A)".

Subsec. (b)(5)(B). Pub. L. 105-277, Sec. 101(f) [title VIII, Sec. 402(c)(6)(C)], substituted "chief executive officer" for "Governor" in heading and "appointing authority described in paragraph (3) shall" for "Governor shall" in text.

Subsec. (b)(6)(A)(ii), (7)(B). Pub. L. 105-277, Sec. 101(f) [title VIII, Sec. 402(c)(6)(D)], substituted "appointing authority described in paragraph (3)" for "Governor".

-End-

-CITE-

29 USC Sec. 3003

-EXPCITE-

TITLE 29 - LABOR
CHAPTER 31 - ASSISTIVE TECHNOLOGY FOR INDIVIDUALS WITH DISABILITIES

-HEAD-

Sec. 3003. State grants for assistive technology

-STATUTE-

(a) Grants to States

The Secretary shall award grants under subsection (b) to States to maintain comprehensive statewide programs of technology-related assistance to support programs that are designed to maximize the ability of individuals with disabilities across the human lifespan and across the wide array of disabilities, and their family members, guardians, advocates, and authorized representatives, to obtain assistive technology, and that are designed to increase access to assistive technology.

(b) Amount of financial assistance

(1) In general

From funds made available to carry out this section, the Secretary shall award a grant to each eligible State and eligible outlying area from an allotment determined in accordance with paragraph (2).

(2) Calculation of State grants

(A) Base year

Except as provided in subparagraphs (B) and (C), the Secretary shall allot to each State and outlying area for a fiscal year an amount that is not less than the amount the State or outlying area received under the grants provided under section 3011 of this title (as in effect on the day before October 25, 2004) for fiscal year 2004.

(B) Ratable reduction

(i) In general

If funds made available to carry out this section for any fiscal year are insufficient to make the allotments required for each State and outlying area under subparagraph (A) for such fiscal year, the Secretary shall ratably reduce the allotments for such fiscal year.

(ii) Additional funds

If, after the Secretary makes the reductions described in clause (i), additional funds become available to carry out this section for the fiscal year, the Secretary shall ratably increase the allotments, until the Secretary has allotted the entire base year amount.

(C) Higher appropriation years

Except as provided in subparagraph (D), for a fiscal year for which the amount of funds made available to carry out this section is greater than the base year amount, the Secretary shall -

(i) make the allotments described in subparagraph (A); and

(ii) from a portion of the remainder of the funds after the Secretary makes the allotments described in clause (i), the Secretary shall -

(I) from 50 percent of the portion, allot to each State or outlying area an equal amount; and

(II) from 50 percent of the portion, allot to each State or outlying area an amount that bears the same relationship to such 50 percent as the population of the State or outlying area bears to the population of all States and outlying areas,

until each State has received an allotment of not less than $410,000 and each outlying area has received an allotment of $125,000 under clause (i) and this clause;

(iii) from the remainder of the funds after the Secretary makes the allotments described in clause (ii), the Secretary shall -

(I) from 80 percent of the remainder allot to each State an amount that bears the same relationship to such 80 percent as the population of the State bears to the population of all States; and

(II) from 20 percent of the remainder, allot to each State an equal amount.

(D) Special rule for fiscal year 2005

Notwithstanding subparagraph (C), if the amount of funds made available to carry out this section for fiscal year 2005 is greater than the base year amount, the Secretary may award grants on a competitive basis for periods of 1 year to States or outlying areas in accordance with the requirements of subchapter III of this chapter (!1) (as in effect on the day before October 25, 2004) to develop, support, expand, or administer an alternative financing program.

(E) Base year amount

In this paragraph, the term "base year amount" means the total amount received by all States and outlying areas under the grants described in subparagraph (A) for fiscal year 2004.

(c) Lead agency, implementing entity, and advisory council

(1) Lead agency and implementing entity

(A) Lead agency

(i) In general

The Governor of a State shall designate a public agency as a lead agency -

(I) to control and administer the funds made available through the grant awarded to the State under this section; and

(II) to submit the application described in subsection (d) on behalf of the State, to ensure conformance with Federal and State accounting requirements.

(ii) Duties

The duties of the lead agency shall include -

(I) preparing the application described in subsection (d) and carrying out State activities described in that application, including making programmatic and resource allocation decisions necessary to implement the comprehensive statewide program of technology-related assistance;

(II) coordinating the activities of the comprehensive statewide program of technology-related assistance among public and private entities, including coordinating efforts

related to entering into interagency agreements, and maintaining and evaluating the program; and

(III) coordinating efforts related to the active, timely, and meaningful participation by individuals with disabilities and their family members, guardians, advocates, or authorized representatives, and other appropriate individuals, with respect to activities carried out through the grant.

(B) Implementing entity

The Governor may designate an agency, office, or other entity to carry out State activities under this section (referred to in this section as the "implementing entity"), if such implementing entity is different from the lead agency. The implementing agency shall carry out responsibilities under this chapter through a subcontract or another administrative agreement with the lead agency.

(C) Change in agency or entity

(i) In general

On obtaining the approval of the Secretary, the Governor may redesignate the lead agency, or the implementing entity, if the Governor shows to the Secretary good cause why the entity designated as the lead agency, or the implementing entity, respectively, should not serve as that agency or entity, respectively. The Governor shall make the showing in the application described in subsection (d).

(ii) Construction

Nothing in this paragraph shall be construed to require the Governor of a State to change the lead agency or implementing entity of the State to an agency other than the lead agency or implementing entity of such State as of October 25, 2004.

(2) Advisory council

(A) In general

There shall be established an advisory council to provide consumer-responsive, consumer-driven advice to the State for, planning of, implementation of, and evaluation of the activities carried out through the grant, including setting the measurable goals described in subsection (d)(3).

(B) Composition and representation

(i) Composition

The advisory council shall be composed of -

(I) individuals with disabilities that use assistive technology or the family members or guardians of the individuals;

(II) a representative of the designated State agency, as defined in section 7 of the Rehabilitation Act of 1973 (29 U.S.C. 705) and the State agency for individuals who are blind (within the meaning of section 101 of that Act (29 U.S.C. 721)), if such agency is separate;

(III) a representative of a State center for independent living described in part C of title VII of the Rehabilitation Act of 1973 (29 U.S.C. 796f et seq.);

(IV) a representative of the State workforce investment board established under section 111 of the Workforce Investment Act of 1998 (29 U.S.C. 2821);

(V) a representative of the State educational agency, as defined in section 7801 of title 20; and

(VI) representatives of other State agencies, public

agencies, or private organizations, as determined by the State.

(ii) Majority

(I) In general

A majority, not less than 51 percent, of the members of the advisory council, shall be members appointed under clause (i)(I).

(II) Representatives of agencies

Members appointed under subclauses (II) through (VI) of clause (i) shall not count toward the majority membership requirement established in subclause (I).

(iii) Representation

The advisory council shall be geographically representative of the State and reflect the diversity of the State with respect to race, ethnicity, types of disabilities across the age span, and users of types of services that an individual with a disability may receive.

(C) Expenses

The members of the advisory council shall receive no compensation for their service on the advisory council, but shall be reimbursed for reasonable and necessary expenses actually incurred in the performance of official duties for the advisory council.

(D) Period

The members of the State advisory council shall be appointed not later than 120 days after October 25, 2004.

(E) Impact on existing statutes, rules, or policies

Nothing in this paragraph shall be construed to affect State statutes, rules, or official policies relating to advisory bodies for State assistive technology programs or require changes to governing bodies of incorporated agencies who carry out State assistive technology programs.

(d) Application

(1) In general

Any State that desires to receive a grant under this section shall submit an application to the Secretary, at such time, in such manner, and containing such information as the Secretary may require.

(2) Lead agency and implementing entity

The application shall contain information identifying and describing the lead agency referred to in subsection (c)(1)(A). The application shall contain information identifying and describing the implementing entity referred to in subsection (c)(1)(B), if the Governor of the State designates such an entity.

(3) Measurable goals

The application shall include -

(A) measurable goals, and a timeline for meeting the goals, that the State has set for addressing the assistive technology needs of individuals with disabilities in the State related to -

(i) education, including goals involving the provision of assistive technology to individuals with disabilities who receive services under the Individuals with Disabilities Education Act (20 U.S.C. 1400 et seq.);

(ii) employment, including goals involving the State

vocational rehabilitation program carried out under title I of the Rehabilitation Act of 1973 (29 U.S.C. 720 et seq.);

(iii) telecommunication and information technology; and

(iv) community living; and

(B) information describing how the State will quantifiably measure the goals to determine whether the goals have been achieved.

(4) Involvement of public and private entities

The application shall describe how various public and private entities were involved in the development of the application and will be involved in the implementation of the activities to be carried out through the grant, including -

(A) in cases determined to be appropriate by the State, a description of the nature and extent of resources that will be committed by public and private collaborators to assist in accomplishing identified goals; and

(B) a description of the mechanisms established to ensure coordination of activities and collaboration between the implementing entity, if any, and the State.

(5) Implementation

The application shall include a description of -

(A) how the State will implement each of the required activities described in subsection (e), except as provided in subsection (e)(6)(A); and

(B) how the State will allocate and utilize grant funds to implement the activities, including describing proposed budget allocations and planned procedures for tracking expenditures for activities described in paragraphs (2) and (3) of subsection (e).

(6) Assurances

The application shall include assurances that -

(A) the State will annually collect data related to the required activities implemented by the State under this section in order to prepare the progress reports required under subsection (f);

(B) funds received through the grant -

(i) will be expended in accordance with this section; and

(ii) will be used to supplement, and not supplant, funds available from other sources for technology-related assistance, including the provision of assistive technology devices and assistive technology services;

(C) the lead agency will control and administer the funds received through the grant;

(D) the State will adopt such fiscal control and accounting procedures as may be necessary to ensure proper disbursement of and accounting for the funds received through the grant;

(E) the physical facility of the lead agency and implementing entity, if any, meets the requirements of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.) regarding accessibility for individuals with disabilities;

(F) a public agency or an individual with a disability holds title to any property purchased with funds received under the grant and administers that property;

(G) activities carried out in the State that are authorized under this chapter, and supported by Federal funds received

under this chapter, will comply with the standards established by the Architectural and Transportation Barriers Compliance Board under section 508 of the Rehabilitation Act of 1973 (20 (!2) U.S.C. 794d); and

(H) the State will -

(i) prepare reports to the Secretary in such form and containing such information as the Secretary may require to carry out the Secretary's functions under this chapter; and

(ii) keep such records and allow access to such records as the Secretary may require to ensure the correctness and verification of information provided to the Secretary under this subparagraph.

(7) State support

The application shall include a description of the activities described in paragraphs (2) and (3) of subsection (e) that the State will support with State funds.

(e) Use of funds

(1) In general

(A) Required activities

Except as provided in subparagraph (B) and paragraph (6), any State that receives a grant under this section shall use a portion of the funds made available through the grant to carry out activities described in paragraphs (2) and (3).

(B) State or non-Federal financial support

A State shall not be required to use a portion of the funds made available through the grant to carry out the category of activities described in subparagraph (A), (B), (C), or (D) of paragraph (2) if, in that State -

(i) financial support is provided from State or other non-Federal resources or entities for that category of activities; and

(ii) the amount of the financial support is comparable to, or greater than, the amount of the portion of the funds made available through the grant that the State would have expended for that category of activities, in the absence of this subparagraph.

(2) State-level activities

(A) State financing activities

The State shall support State financing activities to increase access to, and funding for, assistive technology devices and assistive technology services (which shall not include direct payment for such a device or service for an individual with a disability but may include support and administration of a program to provide such payment), including development of systems to provide and pay for such devices and services, for targeted individuals and entities described in section 3002(16)(A) of this title, including -

(i) support for the development of systems for the purchase, lease, or other acquisition of, or payment for, assistive technology devices and assistive technology services; or

(ii) support for the development of State-financed or privately financed alternative financing systems of subsidies (which may include conducting an initial 1-year feasibility study of, improving, administering, operating, providing capital for, or collaborating with an entity with respect to,

such a system) for the provision of assistive technology devices, such as -

(I) a low-interest loan fund;

(II) an interest buy-down program;

(III) a revolving loan fund;

(IV) a loan guarantee or insurance program;

(V) a program providing for the purchase, lease, or other acquisition of assistive technology devices or assistive technology services; or

(VI) another mechanism that is approved by the Secretary.

(B) Device reutilization programs

The State shall directly, or in collaboration with public or private entities, carry out assistive technology device reutilization programs that provide for the exchange, repair, recycling, or other reutilization of assistive technology devices, which may include redistribution through device sales, loans, rentals, or donations.

(C) Device loan programs

The State shall directly, or in collaboration with public or private entities, carry out device loan programs that provide short-term loans of assistive technology devices to individuals, employers, public agencies, or others seeking to meet the needs of targeted individuals and entities, including others seeking to comply with the Individuals with Disabilities Education Act (20 U.S.C. 1400 et seq.), the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.), and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794).

(D) Device demonstrations

(i) In general

The State shall directly, or in collaboration with public and private entities, such as one-stop partners, as defined in section 101 of the Workforce Investment Act of 1998 (29 U.S.C. 2801), demonstrate a variety of assistive technology devices and assistive technology services (including assisting individuals in making informed choices regarding, and providing experiences with, the devices and services), using personnel who are familiar with such devices and services and their applications.

(ii) Comprehensive information

The State shall directly, or through referrals, provide to individuals, to the extent practicable, comprehensive information about State and local assistive technology venders, providers, and repair services.

(3) State leadership activities

(A) In general

A State that receives a grant under this section shall use a portion of not more than 40 percent of the funds made available through the grant to carry out the activities described in subparagraph (B). From that portion, the State shall use at least 5 percent of the portion for activities described in subparagraph (B)(i)(III).

(B) Required activities

(i) Training and technical assistance

(I) In general

The State shall directly, or provide support to public or private entities with demonstrated expertise in collaborating with public or private agencies that serve

individuals with disabilities, to develop and disseminate training materials, conduct training, and provide technical assistance, for individuals from local settings statewide, including representatives of State and local educational agencies, other State and local agencies, early intervention programs, adult service programs, hospitals and other health care facilities, institutions of higher education, and businesses.

(II) Authorized activities

In carrying out activities under subclause (I), the State shall carry out activities that enhance the knowledge, skills, and competencies of individuals from local settings described in subclause (I), which may include -

(aa) general awareness training on the benefits of assistive technology and the Federal, State, and private funding sources available to assist targeted individuals and entities in acquiring assistive technology;

(bb) skills-development training in assessing the need for assistive technology devices and assistive technology services;

(cc) training to ensure the appropriate application and use of assistive technology devices, assistive technology services, and accessible technology for e-government functions;

(dd) training in the importance of multiple approaches to assessment and implementation necessary to meet the individualized needs of individuals with disabilities; and

(ee) technical training on integrating assistive technology into the development and implementation of service plans, including any education, health, discharge, Olmstead, employment, or other plan required under Federal or State law.

(III) Transition assistance to individuals with disabilities

The State shall directly, or provide support to public or private entities to, develop and disseminate training materials, conduct training, facilitate access to assistive technology, and provide technical assistance, to assist -

(aa) students with disabilities, within the meaning of the Individuals with Disabilities Education Act (20 U.S.C. 1400 et seq.), that receive transition services; and

(bb) adults who are individuals with disabilities maintaining or transitioning to community living.

(ii) Public-awareness activities

(I) In general

The State shall conduct public-awareness activities designed to provide information to targeted individuals and entities relating to the availability, benefits, appropriateness, and costs of assistive technology devices and assistive technology services, including -

(aa) the development of procedures for providing direct communication between providers of assistive technology and targeted individuals and entities, which may include partnerships with entities in the statewide and local workforce investment systems established under the

Workforce Investment Act of 1998 (29 U.S.C. 2801 et seq.), State vocational rehabilitation centers, public and private employers, or elementary and secondary public schools;

(bb) the development and dissemination, to targeted individuals and entities, of information about State efforts related to assistive technology; and

(cc) the distribution of materials to appropriate public and private agencies that provide social, medical, educational, employment, and transportation services to individuals with disabilities.

(II) Collaboration

The State shall collaborate with entities that receive awards under paragraphs (1) and (3) of section 3005(b) of this title to carry out public-awareness activities focusing on infants, toddlers, children, transition-age youth, employment-age adults, seniors, and employers.

(III) Statewide information and referral system

(aa) In general

The State shall directly, or in collaboration with public or private (such as nonprofit) entities, provide for the continuation and enhancement of a statewide information and referral system designed to meet the needs of targeted individuals and entities.

(bb) Content

The system shall deliver information on assistive technology devices, assistive technology services (with specific data regarding provider availability within the State), and the availability of resources, including funding through public and private sources, to obtain assistive technology devices and assistive technology services. The system shall also deliver information on the benefits of assistive technology devices and assistive technology services with respect to enhancing the capacity of individuals with disabilities of all ages to perform activities of daily living.

(iii) Coordination and collaboration

The State shall coordinate activities described in paragraph (2) and this paragraph, among public and private entities that are responsible for policies, procedures, or funding for the provision of assistive technology devices and assistive technology services to individuals with disabilities, service providers, and others to improve access to assistive technology devices and assistive technology services for individuals with disabilities of all ages in the State.

(4) Indirect costs

Not more than 10 percent of the funds made available through a grant to a State under this section may be used for indirect costs.

(5) Prohibition

Funds made available through a grant to a State under this section shall not be used for direct payment for an assistive technology device for an individual with a disability.

(6) State flexibility

(A) In general

Notwithstanding paragraph (1)(A) and subject to subparagraph

(B), a State may use funds that the State receives under a grant awarded under this section to carry out any 2 or more of the activities described in paragraph (2).

(B) Special rule

Notwithstanding paragraph (3)(A), any State that exercises its authority under subparagraph (A) -

(i) shall carry out each of the required activities described in paragraph (3)(B); and

(ii) shall use not more than 30 percent of the funds made available through the grant to carry out the activities described in paragraph (3)(B).

(f) Annual progress reports

(1) Data collection

States shall participate in data collection as required by law, including data collection required for preparation of the reports described in paragraph (2).

(2) Reports

(A) In general

Each State shall prepare and submit to the Secretary an annual progress report on the activities funded under this chapter, at such time, and in such manner, as the Secretary may require.

(B) Contents

The report shall include data collected pursuant to this section. The report shall document, with respect to activities carried out under this section in the State -

(i) the type of State financing activities described in subsection (e)(2)(A) used by the State;

(ii) the amount and type of assistance given to consumers of the State financing activities described in subsection (e)(2)(A) (who shall be classified by type of assistive technology device or assistive technology service financed through the State financing activities, and geographic distribution within the State), including -

(I) the number of applications for assistance received;

(II) the number of applications approved and rejected;

(III) the default rate for the financing activities;

(IV) the range and average interest rate for the financing activities;

(V) the range and average income of approved applicants for the financing activities; and

(VI) the types and dollar amounts of assistive technology financed;

(iii) the number, type, and length of time of loans of assistive technology devices provided to individuals with disabilities, employers, public agencies, or public accommodations through the device loan program described in subsection (e)(2)(C), and an analysis of the individuals with disabilities who have benefited from the device loan program;

(iv) the number, type, estimated value, and scope of assistive technology devices exchanged, repaired, recycled, or reutilized (including redistributed through device sales, loans, rentals, or donations) through the device reutilization program described in subsection (e)(2)(B), and an analysis of the individuals with disabilities that have benefited from the device reutilization program;

(v) the number and type of device demonstrations and referrals provided under subsection (e)(2)(D), and an analysis of individuals with disabilities who have benefited from the demonstrations and referrals;

(vi)(I) the number and general characteristics of individuals who participated in training under subsection (e)(3)(B)(i) (such as individuals with disabilities, parents, educators, employers, providers of employment services, health care workers, counselors, other service providers, or vendors) and the topics of such training; and

(II) to the extent practicable, the geographic distribution of individuals who participated in the training;

(vii) the frequency of provision and nature of technical assistance provided to State and local agencies and other entities;

(viii) the number of individuals assisted through the public-awareness activities and statewide information and referral system described in subsection (e)(3)(B)(ii);

(ix) the outcomes of any improvement initiatives carried out by the State as a result of activities funded under this section, including a description of any written policies, practices, and procedures that the State has developed and implemented regarding access to, provision of, and funding for, assistive technology devices, and assistive technology services, in the contexts of education, health care, employment, community living, and information technology and telecommunications, including e-government;

(x) the source of leveraged funding or other contributed resources, including resources provided through subcontracts or other collaborative resource-sharing agreements, from and with public and private entities to carry out State activities described in subsection (e)(3)(B)(iii), the number of individuals served with the contributed resources for which information is not reported under clauses (i) through (ix) or clause (xi) or (xii), and other outcomes accomplished as a result of such activities carried out with the contributed resources; and

(xi) the level of customer satisfaction with the services provided.

RECEIVED
MAR 11 2009

March 6, 2009

Senator Bert Stedman
State Capital Building, Room 516
Juneau, AK 99801-1182

Dear Senator Stedman:

I Dorothy Green, Director of Polaris House strongly encourage you to schedule a hearing for SB 83 as soon as possible.

Polaris House is very much in support of SB 83. This legislation will bring state statute into compliance with federal law. It will also eliminate the need to change state statute every time federal law changes. This committee will also function as the assistive technology advisory council as required under federal law.

We support the name change of the Governor's Committee on Employment of People with Disabilities to the State Vocational Rehabilitation Committee. Since this committee provides oversight to the Vocational Rehabilitation program, the name will clearly align it with the State of Alaska, Department of Labor and Workforce Development, Division Vocational Rehabilitation. The name change will also reduce the on-going confusion between this committee and the Governor's Council on Disability and Special Education.

Thank you for considering scheduling a hearing for SB 83. It is important that this committee is compliant with federal law to ensure continued funding which is critical to assist Alaskans with disabilities to become employed and have access to appropriate assistive technology services and devices. Please contact me at Polaris House if we can be of any assistance or provide any additional information.

Sincerely,

Dorothy Green, Director

MEMORANDUM January 28, 2009

SUBJECT: Senate Bill 88, repealing delayed amendments to the power cost equalization program in order to make permanent certain formula amendments that were treated as temporary when enacted -- sectional analysis (Work Order No. 26-LS0414\R)

TO: Senator Lyman Hoffman, Co-Chair
Senate Finance Committee

FROM: Jack Chenoweth
Assistant Revisor

Among other additions and amendments, § 2, ch. 2, 4SSLA 2008, temporarily amended the parameters for a community to be eligible to receive power cost equalization payments under the power cost equalization program.[1] For one year, now scheduled to

---

[1] Substantively, § 2, ch. 2, 4SSLA 2008, made changes to AS 42.45.110(c) that increased the maximum allowable kilowatt-hour cost for which power cost equalization payments could be calculated from 52.5 cents to $1.00 per kilowatt hour:

> (c) The amount of power cost equalization provided **for each** [PER] kilowatt-hour under [SUBSECTION] (b) of this section may not exceed 95 percent of the power costs, or the average rate **for each** [PER] eligible kilowatt-hour sold, whichever is less, as determined by the commission. However,
>
> (1) [DURING THE STATE FISCAL YEAR THAT BEGAN JULY 1, 1999,] the power costs for which power cost equalization **are** [WERE] paid to an electric utility **are** [WERE] limited to minimum power costs of more than 12 cents **a** [PER] kilowatt-hour and less than **$1 a** [52.5 CENTS PER] kilowatt-hour;
>
> (2) **each year** [DURING EACH FOLLOWING STATE FISCAL YEAR], the commission shall adjust the power costs for which power cost equalization may be paid to an electric utility based on the weighted average retail residential rate in Anchorage, Fairbanks, and Juneau; however, the commission may not adjust the power costs under this paragraph to reduce the amount below the lower limit set out in (1) of this subsection; and

end June 30, 2009, the standards were relaxed -- made less restrictive. Another provision of that Act, § 3, ch. 2, 4SSLA 2008, effective June 30, 2009, restores the standards to what they were before the temporary adjustment.

The provisions of Senate Bill 88 set aside the provisions of the 2008 Act that would restore the former standards.

Bill section 1 repeals the substantive law provision, sec. 3, ch. 2, 4SSSLA 2008, that, if left unamended, would restore the former factors that apply to calculate the amount of power cost equalization payable under that program.

Bill section 3 repeals the related delayed effective date provision, sec. 11, ch. 2, 4SSLA 2008, that, on June 30, 2009, would provide for restoration of the former factors under that power cost equalization formula. This bill section is, in effect, the repeal of an effective date provision that, under the *Manual of Legislative Drafting*, requires that it be separately set out and noticed in the bill title ("providing for an effective date by repealing the effective date of sec. 3, ch. 2, 4SSLA 2008"). *Manual of Legislative Drafting* at pp. 12 - 13. This change affects an effective date in the earlier bill and requires a two-thirds vote in each house for adoption.

Bill section 2 is a contingency provision so that, if Senate Bill 88 is passed late in the session and is substantially delayed in transmittal to the governor, or the governor otherwise fails to act to approve the bill until at or beyond the June 30, 2009, transitional date, the new provisions are made retroactive so that the legislature's intent (to eliminate the scheduled formula calculation change) is fully and seamlessly carried out.

Bill section 4 gives the measure an immediate effective date and requires a two-thirds vote in each house for adoption.

This sectional analysis was prepared in response to a request from Jay Livey.

JBC:lmb
09-007.lmb

---

(3) the power cost equalization **for each** [PER] kilowatt-hour may be determined for a utility without historical kilowatt-hour sales data by using kilowatt-hours generated.

A related amendment proposed by § 3, ch. 2, 4SSLA 2008, would readjust the maximum allowable, as amended in the last line of AS 42.45.110(c)(1), as shown in the text, from $1 back to the former rate of 52.5 cents.

Senator Lyman Hoffman

Alaska State Legislature

Sponsor Statement for SB 88

Power Cost Equalization (PCE) is the program designed to (1) extend power assistance to rural Alaska as a response to the development of other power around the state and (2) make power more affordable to rural Alaskans. SB 88 proposes to make permanent the changes to the program adopted by the last legislature, which made higher cost power eligible for PCE. This helps Alaskan families continue to afford to buy the electricity that provides the basic services that we all take for granted.

Residents of Alaska whose electricity is generated by oil have seen their power costs increase significantly during the past few years. Last year for example, oil was purchased during the summer when delivery by barge was possible. At that time, they paid the highest price ever recorded. In consequence, though the price of a barrel of oil has plummeted, the cost in the villages continues to reflect the price at which it was purchased - currently over $7.00 per barrel in many communities.

During the previous legislative session, this high cost of electricity was acknowledged by a change in the Power Cost Equalization statute. It recognized the high cost of fuel and the subsequent increase in Power Cost Equalization by increasing the upper limit, the ceiling, of the PCE calculation from 52.5 cents per kilowatt hour to $1.00 per kilowatt hour. This change was for this heating season only, and sunsets on June 30, 2009.

The floor is a weighted average of the cost of power in Anchorage, Fairbanks and Juneau; currently a little over 12 cents per kilowatt. Power Cost Equalization is paid only on the first 500 kilowatts of power used each month. Any use above that does not qualify for PCE. The amount of PCE for each eligible family depends on a calculation which determines a floor and an amount per kilowatt which establishes the ceiling. As noted, the ceiling is now $1.00 but will revert to 52.5 cents if this bill were not to pass. PCE payments are made on any cost for power falling within this band. For many utilities, the cost of producing power now exceeds 52.5 cents per kilowatt. Consequently, for many electric users, reverting to a PCE ceiling of 52.5 cents would mean considerably higher power bills.

Because power costs in many rural communities are approaching the $1.00 per kilowatt range, it is crucial that PCE helps households by making power more affordable, particularly for basic services. To not pass this legislation would mean that many rural families would simply not be able to afford to buy the electricity needed for even the basic services that we take for granted.

ANALYSIS: *(Attach a separate page if necessary)*

This bill continues a maximum $1.00 per kilowatt-hour cap for power costs paid by the Power Cost Equalization (PCE) program. This fiscal note represents the additional funding needed for the PCE program if the bill passes. The Governor's budget currently contains $32.16 million. The total funding needed if this bill passes is anticipated to be $37.66 million.

ANALYSIS: *(Attach a separate page if necessary)*

This bill continues a maximum $1.00 per kilowatt-hour cap for power costs paid by the Power Cost Equalization (PCE) program.

This fiscal note is informational only because the open-ended language in the operating budget bill [Sec. 11(e), HB 81] appropriates the GF necessary to fund the PCE Program. However, the $5.5 million above represents the additional funding needed for the PCE program if the bill passes. The Governor's budget currently contains $32.16 million. The total funding needed if this bill passes is anticipated to be $37.66 million.

BILL: SB 88 **SHORT TITLE:** POWER COST EQUALIZATION
BILL VERSION:
CURRENT STATUS: (S) FIN **STATUS DATE:** 01/28/09
SPONSOR(s): FINANCE
HEARING: (S) FIN Feb 03 9:00 AM SENATE FINANCE 532 TELECONFERENCE

TITLE: "An Act repealing certain provisions relating to modifying the factors that apply to calculate the amount of power cost equalization; providing for an effective date by repealing the effective date of sec. 3, ch. 2, 4SSLA 2008; and providing for an effective date."

AVCP, Inc.
Testimony to the 26th Alaska State Legislature
Senate Finance Committee
By
Myron P. Naneng, Sr., President

Regarding SB 88

Tuesday, February 3, 2009

Good morning Chairman Hoffman and Co-Chairman Bert Stedman. We at the Association of Village Council Presidents, Inc. (AVCP) are grateful for you to be holding this discussion in order to bring more appropriate energy relief to remote, rural Alaska communities like the 56 villages in our Yukon Kuskokwim region.

My name is Myron Naneng, I am President of our regional non-profit corporation. What we are testifying to today comes as no surprise to either of you, since you tried to address it in the last session through SB 4002. Since early last summer, tribal leaders as well as myself were very nervous about our coming winter since we were forced to prepay our winter fuel purchases for our tank farms at the highest costs of oil on record.

Because we are roadless, all of our villages have to import fuel by barge or by air in emergencies. In most cases, we have no choice but to sign no-fault contracts with fuel vendors if weather or acts of god prevent a scheduled delivery. Some of our villages, with human resources turnover or other constraints, are unable to make their fuel orders in concordance to State programs such as the bulk fuel loan in time to lock in at more agreeable rates. Factors such as these aggravate the already challenging nature of providing light and heat to our communities with little or no energy infrastructure.

Rural Alaska village communities are faced with extremely high costs of living, in particular, the people of the Wade Hampton district are having to pay upwards of $0.62 per kWh for electricity, $7.68 per gallon for heating fuel and, recently upwards of $11.00 for heating fuel that had to be flown into the village of Emmonak when they ran out of fuel. Energy costs are up to 60% or more of household costs for many rural Alaskans in this census district whose average incomes are $30,184. Some households went without electricity and fuel for heat because of the extremely high costs and lack of income to

pay. Clearly, energy costs in rural Alaska makes life unsustainable, and practically unhealthy. The high cost of energy combined with the severe cold winter of 2008 and 2009 is a threat to the general health and wellbeing of the residents of this region.

The villages in our region are extremely remote have great distances from major transportation hubs and commercial centers, have small size and economy of scale, and there are tremendous logistical problems and high costs for transporting fuel for home heating and electricity. This contributes to a high cost of electrical power plants with high capital and operating costs. All the villages in this region are dependent upon diesel fuel for electricity and home heating. It is often the only and best solution when considering the available energy resources, cost for development and deployment, and the small loads often experienced in rural Alaska villages. Diesel-electric power plants provide an efficient and effective energy solution in many cases. PCE provides a buffer against the high costs of electricity.

There have been concerns expressed by some of your colleagues within the Senate and your House counterpart that the subsidy suggested in SB 88 creates an unending entitlement program, that it is an insufficient one-size-fits-all solution to an enduring program. Truthfully, it could be that way should the commercial fisheries continue to collapse; however, the circumstances that brought about this particular energy crisis are unusual. The price of oil topping over $100 a barrel, the commercial salmon fishery on either river no good, but catastrophic on the Lower Yukon, the early freeze-up and particularly hard winter has sopped up whatever energy program and cash most families need for our sub-arctic winters. Because of the poor fishing season, the cash usually generated by that commercial practice was not there to outfit seal, small whale or moose hunting and gathering expeditions that make up most of our winter sustenance.

With continued and full funding by the Legislature of the Renewable Energy Fund coupled with possible federal stimulus infrastructure funds, we may be looking at a reality where accessible energy sources come to fruition in a matter of years, rather than a matter of decades. With affordable energy at the village level, a failed fishing season would not break us as badly as this hard winter has shown.

Though Governor Palin herself has not directly acknowledged the fishery or fuel crisis in our region, in her response to the U.S. Army's reduced retirement payments to 26 Alaska Native Elders who had served in the Territorial Guard during WWII, she argued:

> "Rural Alaskans face the highest food and energy costs in the nation, and these veterans need their retirement checks now more than ever," Governor Palin said. "Using the emergency fund to provide monetary protection for these 26 veterans is the right thing to do."

When argumonts on fairness and equality are thrown around, keep in mind, that families with mid-range incomes who live in Anchorage were projected to spend about 3% of their income on energy costs (based on May prices) and that figure increases to about 5% of your income if you live in other cities or towns on Alaska's road system.

Mid-income households in remote villages (places you can only reach by water or plane) were expected to spend about 11% of the paycheck on energy because we rely on diesel fuel, while the majority of Anchorage families use natural gas.

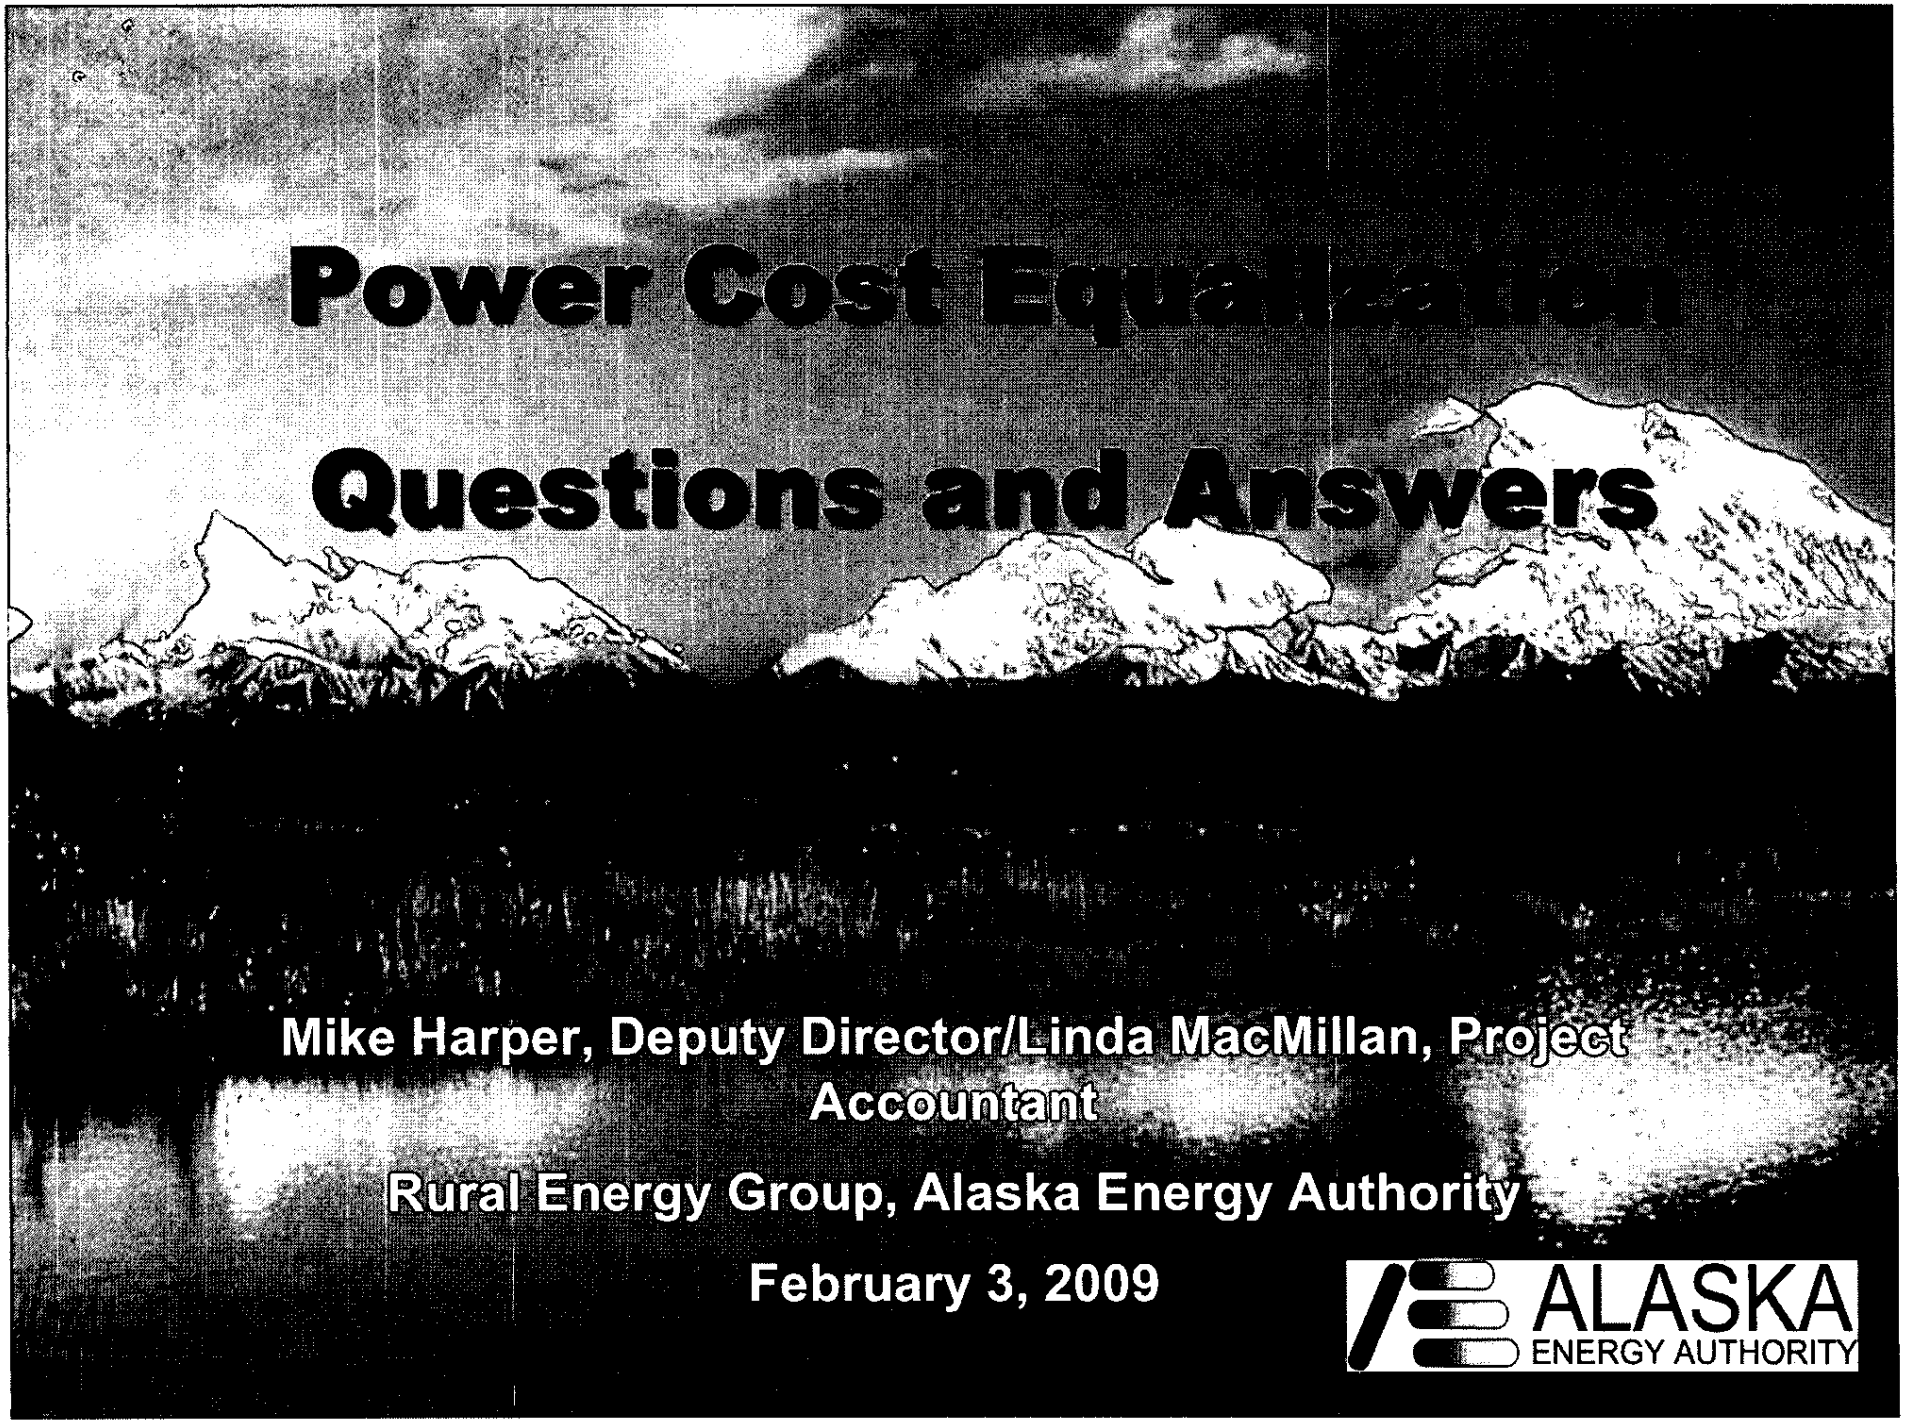
ISER estimates that the median annual cost of power and heating costs for an Anchorage family is about $2,400, compared to about $4,100 for midsize towns and cities and **$6,600 for remote rural villages.**

AVCP provides direct assistance to many families in our member villages that include a Housing Improvement Program, TANF and LIHEAP to name a few. Last year we assisted 1,846 households with energy assistance, and we anticipate the same number if not more appeals for the remainder of this season.

On a related matter, there has been a lot of discussion among regional and tribal entities about heating and lighting village dependent offices that are necessary for operations to the community. When Governor Palin said in her Energy Plan press conference that she had tried to, but failed, to get a hold of people in Emmonak in response to a private citizens appeal for help in the Bristol Bay Times, we were confused as to whom she tried to communicate with. . .the people of Emmonak from the Mayor's office, the tribal council and Nick Tucker all said an hour before in our joint Agency teleconference that their calls were never answered in the Governor's office. It turns out that whatever attempts the Governor's office made - was communicating to a closed up City Office, because the village can't afford to keep the building operational more than one week out of the month. All other entities were operational, all of them frantically calling out for help with the State.

We tried to do this proactively, in public statements and resolutions. We warned that the $1,200 rebate would not adequately address the remote / rural fuel needs - and with the taxes due from as little as $90 to over $300 per person, we will continue to see pain in affected households this year. If we had access to affordable energy sources, all the factors we laid out for you would not have hurt us so badly this winter.

Senator Hoffman's call for the state to make up the difference in the instance where an Alaskan has to pay more than $3 a gallon for residential heating fuel up to 600 gallons purchased per residence from September through March, in addition to SB 88's extension of the PCE program, will go a long way to keeping our homes heated, and saving our families from deciding between freezing or going hungry.



Power Cost Equalization
Questions and Answers
Mike Harper, Deputy Director/Linda MacMillan, Project Accountant
Rural Energy Group, Alaska Energy Authority
February 3, 2009
ALASKA
ENERGY AUTHORITY

Power for Rural Alaska
30 year History

- Statewide -almost no transmission in Alaska
  - Chugach Electric owned a line from Beluga through Anchorage to Nikiski
  - Fairbanks relied on local heavy oil and coal
  - Diesel fuel was the primary energy source elsewhere
- Very little hydropower
  - Eklutna – 30 mw, serving ML&P, MEA, CEA
  - Cooper Lake – 20 mw, serving CEA
  - Snettisham – 52 mw, serving Juneau
  - ~20 mw of small projects scattered throughout SE Alaska

Power Development Begins -Oil started flowing down the Pipeline

The State began to spend its newfound wealth

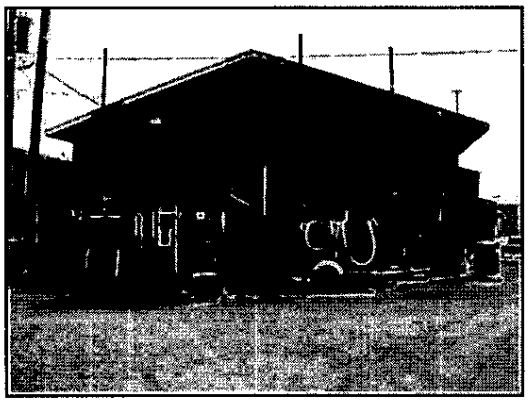
- A transmission line to Fairbanks was started
- The Susitna mega-project design was started - 1981
- The Bradley Lake project was started - 1983
- Kodiak, Valdez, Ketchikan, Wrangell and Petersburg began work on 4 Dam Pool - 1983
- Studies were commissioned to identify projects to reduce the cost of electricity throughout Alaska

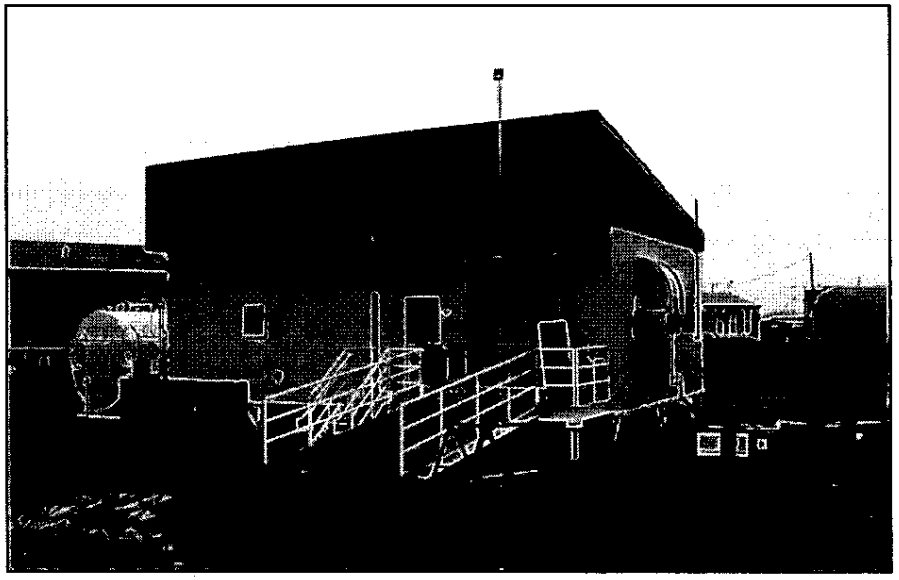
Alaska Rural Electrification
The First Assistance program

- Oil prices peaked in 1979
- Diesel-fueled utilities were hit hard
- Legislature established the Power Production Cost Assistance Program in 1980 – a one year stop-gap
- In 1981, the program was amended into the Power Cost Assistance Program, which was designed to self-extinguish in five years

RPSU program: Golovin power house

Golovin Before and After





ALASKA ENERGY AUTHORITY

DENALI COMMISSION ALASKA

Alaska Rural Electrification And finally - PCE

- There was no silver bullet to cure rural Alaska's electric needs
- Small loads and small communities spread across thousands of miles could not be interconnected
- Legislature established Power Cost Equalization
  - Cost of power was to be equalized to the average of Anchorage, Fairbanks and Juneau – 8.5 cents per kwh
  - PCA was rewritten as PCE – effective October 1984
  - Utilities using diesel to generate at least 75% of power in October 1984 were eligible
  - Costs above 52.5 cents were not covered
  - All users were eligible for the first 700 kwh used

Power Cost Equalization

- Eligible electricity has been reduced 30% to 500 kwh
- Only one meter per resident
- Commercial customers are ineligible for PCE
- Fuel use the same, but cost up 150% since FY00
- FY09 funding ($28 million) is at 100% level
- More utilities crossing through the 52.5 cent ceiling

PCE Program Changes in Recent Years

	2000	2007
Population served	77,625	78,530
Total Sales (gWh)	391	416
Eligible Sales	116	122
Percentage eligible	29.7%	29.2%
Average Fuel Cost/gallon	$1.10	$2.78
Fuel Consumed – million gallons	27.7	27.6
Fuel cost – millions	$30.4	$75.3
Non-fuel cost – millions	$41.5	$67.4
Total PCE Appropriations– millions	$14.4	$25.6
Percent of costs	20%	18%

Qn. #1 – Does PCE Reduce Rural Power Cost to Urban Levels?

Residential Power Cost per 2007 PCE Report

Chugach Electric	Anchorage	.1205 kWh
Golden Valley	Fairbanks	.2030 kWh
AEL&P	Juneau	.1140 kWh
Kodiak Electric	Kodiak	.1831 kWh
Kotzebue Electric	Kotzebue	.1881* kWh
AVEC	52 Villages	.2362* kWh
Bettles	Bettles	.2859* kWh
MKEC	5 Villages	.4398* kWh
Napakiak	Napakiak	.6014* kWh

*after PCE

Cost of 700 Residential kwh

• Anchorage	$84.35
• Fairbanks	$142.10
• Juneau	$79.80
• Kodiak	$128.17
• Kotzebue	$171.05*
• AVEC Village	$219.56*
• Bettles	$268.63*
• MKEC	$374.88*
• Napakiak	$489.48*

*After PCE

Qn. #2 – Who gets PCE?

- Every residential consumer
  - Only one meter per consumer
  - Only the first 500 kWh
- Community Facilities
  - Up to 70 kWh/resident per month
    - Streetlights
    - Washeterias
    - Water and sewer facilities
    - Community buildings

Qn. #3 – Who doesn't get PCE?

- Schools
- State facilities
- Federal facilities
- Commercial consumers
- Consumers with seriously delinquent accounts

Qn. #4 – How does PCE work?

- Utility applies to RCA to participate
- Utility submits detailed cost and operational data
- RCA determines eligible costs and computes PCE by rate class
- Utility bills customers per normal tariff rates
- Utility applies PCE credit based upon actual consumption (subject to kWh limit)
- Consumer is responsible to pay bill after PCE credit
- Utility bills state (AEA) for all PCE credited
- Utility provides AEA with detailed billing records
- Utility files annual update of costs with RCA, per schedule established by RCA

Qn. #5 – Doesn't PCE discourage Conservation & Innovation?

- Only 29% of all electricity sold in eligible communities receives PCE
- But the smaller the community, the more kwh that are eligible (because of minimal commercial usage)
  - Akiachak 46%
  - Aniak 37%
  - AVEC 48%
  - Cordova 28%
  - Kotzebue 27%
  - Napakiak 72% (School is on own generation)
  - Tanana 38%

Non Fuel Costs –Overhead

- Operating and maintaining power plants
- Operating and maintaining tanks farms
- Operating and maintaining distribution lines
- Connecting customers, billing, collections
- Administration, accounting, engineering, warehouse
- Insurance, depreciation, cost of long-term debt
- Taxes and miscellaneous

Qn. #6 – Would PCE Money be better spent on Alternative Energy?

Wind generation costs 6 times diesel generation

- We cannot use 'utility grade' turbines as in Lower 48
- Average village load is ~150 kw
- There are only 1 or 2 manufacturers of 50-100 kw units
- To accommodate sophisticated integration needs, the existing generation and distribution must be upgraded
- Typical cost of an integrated project $4+ million
- Diesel generation and fuel tankage still needed for the 70%+ energy that wind cannot provide

Sponsor Statement
CS for SB 89

Senate Bill 89 would continue providing retirement benefits to the Alaska Territorial Guard veterans whose pensions were reduced by the federal government due to a new interpretation made by the U.S. Department of Defense. SB 89 provides for state funding of benefits beginning April 2009 and ending February, 28th 2010 or until the federal government resumes its full responsibility of the pensions. This funding is a temporary patch meant to give Alaska's Congressional Delegation the time they asked for to reverse the ATG pension reduction.

In January 2009, 26 World War II Alaska Territorial Guard veterans received letters from the U.S. Army Human Resources Command informing them that their pensions will be reduced on February 1st. The pension reduction is based on a legal interpretation that does not classify the time these men spent in the ATG during World War II as applicable toward retirement credit. The people of Alaska have overwhelmingly come out in support of our World War II veterans and believe they should receive their full retirement benefit for their honorable service.

SB 89 supports the honorable men and women of the Alaska Territorial Guard and enacts the overwhelming will of the people of Alaska by funding the difference in what the ATG pensions used to be and what they are now.

Changes made in the CS for SB 89

The changes made in Senate Finance in the CS for SB 89 are as follows:

- The State of Alaska will no longer pay a set amount to each member of the Alaska Territorial Guard deserving a pension. The State will pay the difference between what DOD calculated ATG pensions to be last January and what DOD is now calculating them to be. This difference in pay is described as the "interim benefit."

- If DOD begins paying the full pension benefit then Alaska will be reimbursed for any overlapping payments.

- The State of Alaska will pay the ATG interim benefit until DOD begins paying the full pension or until February 28, 2010.

ANALYSIS: *(Attach a separate page if necessary)*

This bill provides for the Department of Military and Veterans Affairs to pay eligible individuals, each month, who served for in the Alaska Territorial Guard. Monthly pay to each eligible individual is calculated according to the attached spreadsheet (2009 Pay Delta column).

This fiscal note calculation is based on 3 months of payments in FY09 (April 09-June 09) and 8 months of payments in FY10 (July 09-Feb 10) at $10,437.00 per month to 26 eligible individuals. The department anticipates minimal time and cost to process the 26 monthly payments using existing staff.

Congress of the United States

Washington, DC 20515

March 18, 2009

The Honorable Bill Wielechowski
Co-Chair, Joint Armed Services Committee
State Capitol, Room 115
Juneau, AK 99811

The Honorable Nancy Dahlstrom
Co-Chair, Joint Armed Services Committee
State Capitol, Room 411
Juneau, AK 99811

Dear Senator Wielechowski and Representative Dahlstrom:

We write to follow up on the issue of the retirement pay for 26 former members of the Alaska Territorial Guard (ATG).

As you know, in June 2008 these individuals were issued military retirement credit for the period of their service in the Territorial Guard and they began receiving a modest increase in their retirement pay. However, in January 2009, the Defense Finance and Accounting Service (DFAS) stopped the retirement payments, based on a finding that they were erroneously awarded due to a misinterpretation of the law.

We immediately contacted the Secretary of the Army seeking a solution and to his credit, Secretary Pete Geren tapped the Army Emergency and Extraordinary Expense Fund to continue the retirement payments for two months. At the same time, we introduced legislation in Congress providing lifetime retirement pay to these Guardsmen. The regular order in the Congress is to consolidate all defense-related legislation into one defense authorization bill, followed by a defense appropriations bill. Accordingly, it is unlikely that the Congress will consider our legislation until later this year. These bills are usually sent to the President in the summer and fall.

We have been asked by members of the Alaska Legislature whether it would be appropriate for the State to consider a special appropriation representing the difference in retirement pay that each of the 26 would receive if his Territorial Guard service were credited toward military retirement and what each will receive as a result of the January 2009 DFAS reinterpretation for the remainder of calendar year 2009.

We think it is important to maintain the economic safety net for these 26 elders and are supportive of this approach. These payments would serve as a "bridge" so these Guardsmen can continue to receive the modest increase in retirement payments to which we all believe they are entitled while we continue to pursue a permanent solution.

On behalf of these Alaska Territorial Guardsmen, thank you in advance for your consideration of our views.

Sincerely,

Mark Begich
U.S. Senator

Lisa Murkowski
U.S. Senator

Don Young
U.S. Congressman

ANALYSIS: *(Attach a separate page if necessary)*

This bill provides for the Department of Military and Veterans Affairs to pay eligible individuals, each month, who served for in the Alaska Territorial Guard. Monthly pay to each eligible individual is calculated according to the attached spreadsheet (2009 Pay Delta column).

This fiscal note calculation is based on 3 months of payments in FY09 (April 09-June 09) and 8 months of payments in FY10 (July 09-Feb 10) at $10,437.00 per month to 26 eligible individuals. The department anticipates minimal time and cost to process the 26 monthly payments using existing staff.

MEMORANDUM February 27, 2009

SUBJECT: Sectional Summary (CSSB 96( ); (Work Order No. 26-LS0485\E))

TO: Senator Betty Davis
Attn: Lynda Zaugg

FROM: Jean M. Mischel
Legislative Counsel

You have requested a sectional summary of the above-described bill.

As a preliminary matter, note that a sectional summary of a bill should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents. If you would like an interpretation of the bill as it may apply to a particular set of circumstances, please advise.

Section 1. Adds reference to cash medical support to the crime of aiding the nonpayment of child support in the second degree.

Section 2. Adds the Virgin Islands and Indian Tribes to the definition of "state."

Section 3. Amends order of support provision to include both parents, medical support, and insurance.

Section 4. Adds medical support to provision authorizing the initiation of administrative action to establish a duty of support.

Section 5. Amends periodic reviews of support orders to require a three year cycle of review.

Section 6. Deletes motion requirement for correcting an administrative mistake in a support order.

Section 7. Deletes motion requirement for vacating a support order that is based on a default amount.

Section 8. Redefines "arrearage" for child support purposes.

Section 9. Amends the definition of "support order" to include cash medical support

Section 10. Amends garnishment provision to include insurance and cash medical support.

Section 11. Amends the Alaska Native family assistance program to include obligations for cash medical support.

Section 12. Provides for an indirect court rule amendment to Rule 90.3, Alaska Rules of Civil Procedure for changes made in the bill.

Section 13. Makes bill changes applicable to child support actions filed on or after the bill's effective date.

Section 14. Authorizes the Department of Revenue to proceed to adopt regulations needed under the bill.

Section 15. Provides for a conditional effect for the court rule amendment in sec. 12 only for two-thirds majority vote.

Section 16. Makes sec. 14 effective immediately.

Section 17. Provides for a July 1, 2009, effective date for all other bill sections.

JMM:ljw
09-125.ljw

1. This bill adds an "Indian tribe" and "United States Virgin Islands" to the definition of state.

2. This bill adds to existing law the authority for a tribunal to order either or both parents to pay cash medical support, if warranted.

3. In addition, the bill directs Child Support Services Division (CSSD) to review child support orders for modification on a federally mandated three-year cycle.

4. The bill adds cash medical support to the definition of arrearage and the definition of support order thereby enabling CSSD to use its existing enforcement tools to collect a cash medical support obligation on behalf of the child.

5. Finally, the bill removes the language limiting who may request the correction of a clerical mistake in an administrative order or request the vacation of an administrative order based upon a default income.

SB 96 puts Alaska in compliance with the federal requirements which assure that Alaska's children receive the medical support to which they are entitled.

In addition, adoption of SB 96 assures 85 million in federal dollars to Alaska for the Child Support Enforcement and Temporary Assistance for Needy Families (TANF) programs.

I appreciate your support of this important bill.

Legislative Testimony

Robert Loescher
Tribal Judiciary Committee Member
Central Council Tlingit & Haida Indian Tribes of Alaska

HEARING: (H) FIN Apr 16 1:30 PM HOUSE FINANCE 519 TELECONFERENCE TELECONFERENCE

RE: House CS for CS for SB 96 (JUD)

My name is Bob Loescher. I am a member of the Central Council Tlingit & Haida Indians of Alaska Tribal Judiciary Committee. Our testimony today is in support of the enactment of House CS for CS for Senate Bill No. 96 (JUD) with a proposed revised and amended Section (b), as follows:

> (b) The proposed changes made in AS 25.25.101(19) under sec. 3 of this Act are conforming amendments that will result in procedural changes in Alaska for enforcement and modification of child support orders from other jurisdictions. UIFSA does not determine the authority of an Indian tribe to enter, modify, or enforce a child support order. ~~In adopting UIFSA conforming amendments, the legislature does not intend to grant or restrict tribal jurisdiction to enter, modify, or enforce child support orders, and the amendments are not intended, either directly or impliedly, to acknowledge, expand, or restrict tribal jurisdiction.~~ In adopting UIFSA conforming amendments, the legislative intent is to remain neutral on the issue of the underlying child support jurisdiction, if any, for the entities listed in the amended definition of "state." This legislation will not expand or restrict the child support jurisdiction, if any, of the listed "state" entities in the amended definition, nor does this legislation assume or express any opinion about whether those entities have child support jurisdiction either in fact or in law.

Mr. Chairman and members of the committee, we request that you amend the legislation as proposed above. We fully support the enactment of this law with these revisions.

SB 96

TITLE: "An Act relating to nonpayment of child support: relating to certain judicial and administrative orders for medical support of a child;."

SPONSOR STATEMENT (c)

SB 96 brings the state into compliance with the federal Uniform Interstate Family Services Act (UIFSA) that require states to have guidelines addressing how either or both parents will provide for a child's healthcare needs and to include an "Indian tribe" in the definition of state. Both amendments to Alaska's child support state plan are conforming amendments which will result in procedural changes in Alaska for enforcement and modification of child support orders from other jurisdictions.

If a parent is ordered to pay for healthcare including cash medical support, the Child Support Services Division must enforce the ongoing medical support obligation as well as collect any cash medical support arrears. Including an "Indian tribe" in the definition of state does not expand or restrict tribal jurisdiction.

Failure to satisfy these mandated requirements jeopardizes 85 million dollars in federal funding for both Alaska's Child support program and Temporary Assistance To Needy Families (TANF).

Legislative Testimony

Jessie M. Archibald
Staff Attorney, Tribal Child Support Unit
Central Council Tlingit & Haida Indian Tribes of Alaska
320 West Willoughby Ave., Suite 300
Juneau, Alaska 99801
HEARING: (H) JUD Apr 13 8:00 AM CAPITOL 120 TELECONFERENCE

My name is Jessie Archibald. I represent the Central Council Tlingit and Haida Indian Tribes of Alaska Tribal child support program. I would like to request that my written testimony be entered into the record. The purpose of my testimony is to explain the Tribe's objection to the Section 1. (b) language regarding the Definition of "State"; Legislative Intent, contained in CS for House Bill 192 (HHS), and respectfully request that section (b) language be deleted.

Reasons for Objections:

1. Section (b) language is not necessary because UIFSA has built in procedures for the non-registrant to raise objections about the issuing tribunal's subject matter jurisdiction, personal jurisdiction, and other matters that may make a specific order not entitled to recognition and enforcement in Alaska's tribunals.

2. The language specifically segregates out tribal child support orders for particular scrutiny, and carries a not-very-thinly-veiled implication that that scrutiny should be hostile, and even suggests that the legislature is pre-judging the validity of an objection based on a lack of Indian country, essentially endorsing the principal that a child support obligor should able to duck a child support obligation by objecting on that basis. The legislature should leave those issues to the individual litigants and the courts.

3. Child support is hard enough without the legislature of the State of Alaska putting into the statutes language that allows deadbeat parents to use legislative intent language to try to get out from under from having to pay support.

As an alternative, the Tribe would like to propose the following legislative intent language:

Section 1. The uncodified law of the State of Alaska is amended by adding a new section to read:

DEFINITION OF "STATE": LEGISLATIVE INTENT. (a) ....

(b) The legislature recognizes that child support enforcement programs are administered by Federal, State and Tribal entities that address the establishment of paternity and enforcement of

support orders with the intent of promoting the general economic welfare and the best interest of dependent children. UIFSA provides a vehicle for the non-registrant to raise objections about the issuing tribunal's subject matter jurisdiction, personal jurisdiction, and other matters that may make a specific order not entitled to recognition and enforcement in Alaska's tribunals. The intent of the legislature is that tribal child support orders should be subject to the same types of objections, and to the same extent, as child support orders from tribunals of other jurisdictions. It is the intent of the legislature is to provide a procedural vehicle for Tribal child support orders for such orders to be registered in Alaska state tribunals in the same manner child support orders from other tribunals are registered. This legislation is not intended to prejudge the validity of any specific order or the validity of any objections to a specific order.

Short Description of Central Council Tribe's Child Support Program

1. Initially, federal funding was only provided to States that operate federally funded and approved child support programs.

2. More recently, with the adoption of the Final Rule on Child Support Enforcement Programs at 45 CFR 309, federally recognized Indian Tribes became eligible to receive federal funding to operate their own child support programs.

3. With the adoption of the Final Rule, the enforcement of child support has now become a Federal-State-Tribal partnership.

4. To receive federal funding for child support, the Tribe is required to adopt a plan that meets the requirements outlined in 45 CFR 309 which is the Final Rule on Child Support Enforcement Programs.

5. Central Council received federal funding and approval to operate a Tribal Child Support Program in March of 2007.

6. When Alaska initially was required to adopt UIFSA, it did not include the definition of "State" to include an Indian Tribe.

7. Now that Alaska Tribes are beginning to receive federal funding to operate child support programs, it is necessary for Alaska to amend the State UIFSA in order to come into compliance with the rest of the nation.

8. Alaska stands alone as the only state that has not adopted the federal uniform guidelines that define "state" to include an Indian Tribe, probably because when Alaska first adopted the

federal version of UIFSA, it was not considered that Tribes would be receiving federal grants to operate child support programs.

9. The Tribal Child support program is located within the Tribe's Employment and Training Department. Our program is referred to as the "Tribal Child Support Unit."

10. The Tribe's goal is to ensure that Tlingit and Haida children receive the financial and emotional support of both their parents. The program strives to support and affirm the traditions of the Tribe and families. We believe that child support should be a reliable source of income for families. TCSU focuses its efforts on the needs of children, and in doing so, we empower parents to ensure their children's needs are met. Our program has a cooperative approach to establishing and enforcing support obligations.

11. Here are some statements we want to hear our children shout out:

- I'm playing football this year, thanks Dad!
- I made the basketball team, thanks Mom!
- Thanks Dad, I'm getting good grades in school!
- I'm playing soccer this year...thank you Mom!
- I'm going to camp this summer, thank you Dad!
- Even though you're not with me, I know you care! Thanks Mom!

End

Article 1. General Provisions.

Section
101. Definitions
102. Tribunals of this state
103. Remedies cumulative

Sec. 25.25.101. Definitions. In this chapter,

(1) "child" means an individual, whether over or under the age of majority, who is or is alleged to be owed a duty of support by the individual's parent or who is or is alleged to be the beneficiary of a support order directed to the parent;

(2) "child support order" means a support order for a child, including a child who has attained the age of majority under the law of the issuing state;

(3) "duty of support" means an obligation imposed or imposable by law to provide support for a child, spouse, or former spouse, including an unsatisfied obligation to provide support;

(4) "home state" means the state in which a child lived with a parent or a person acting as a parent for at least six consecutive months immediately preceding the time of filing of a complaint or comparable pleading for support and, if a child is less than six months old, the state in which the child lived from birth with a parent or person acting as a parent; a period of temporary absence of a parent or person acting as a parent is counted as part of the six-month or other period;

(5) "income" includes earnings or other periodic entitlements to money from any source and any other property subject to withholding for support under the law of this state;

(6) "income withholding order" means an order or other legal process directed to an obligor, an obligor's employer, an obligor's future employer, or another person, political

subdivision, or departi
income of the obligor u

legal process directed to an or another person, political

subdivision, or department of the state, under AS 25.27 to withhold support from the income of the obligor under AS 25.27;

(7) "initiating state" means a state from which a proceeding is forwarded or in which a proceeding is filed for forwarding to a responding state under this chapter or a law or procedure substantially similar to this chapter, or under a law or procedure substantially similar to the Uniform Reciprocal Enforcement of Support Act or the Revised Uniform Reciprocal Enforcement of Support Act;

(8) "initiating tribunal" means the authorized tribunal in an initiating state;

(9) "issuing state" means the state in which a tribunal issues a support order or renders a judgment determining parentage;

(10) "issuing tribunal" means the tribunal that issues a support order or renders a judgment determining parentage;

(11) "law" includes decisional and statutory law and rules and regulations having the force of law;

(12) "obligee" means

(A) an individual to whom a duty of support is or is alleged to be owed or in whose favor a support order has been issued or a judgment determining parentage has been rendered;

(B) a state or political subdivision to which the rights under a duty of support or support order have been assigned or that has independent claims based on financial assistance provided to an individual obligee; or

(C) an individual seeking a judgment determining parentage of the individual's child;

(13) "obligor" means an individual or the estate of a decedent who

(A) owes or is alleged to owe a duty of support;

(B) is alleged but has not been adjudicated to be a parent of a child; or

(C) is liable under a support order;

(14) "register" means to file a support order or judgment determining parentage with a registering tribunal;

(15) "registering tribunal" means the tribunal in which a support order or judgment determining parentage is registered;

(16) "responding state" means a state in which a proceeding is filed or to which a proceeding is forwarded for filing from an initiating state under this chapter or a law or procedure substantially similar to this chapter, or under a law or procedure substantially similar to the Uniform Reciprocal Enforcement of Support Act or the Revised Uniform Reciprocal Enforcement of Support Act;

(17) "responding tribunal" means the authorized tribunal in a responding state;

(18) "spousal support order" means a support order for a spouse or former spouse of the obligor;

(19) "state" means a state of the United States, the District of Columbia, the Commonwealth of Puerto Rico, or any territory or insular possession subject to the jurisdiction of the United States; the term "state" includes a foreign jurisdiction that has enacted a law or established procedures for issuance and enforcement of support orders that are substantially similar to the procedures under this chapter or under the Uniform Reciprocal Enforcement of Support Act or the Revised Uniform Reciprocal Enforcement of Support Act;

(20) "support enforcement agency" means a public official or agency authorized to seek

(A) enforcement of support orders or laws relating to the duty of support;

(B) establishment or modification of child support orders;

(C) determination of parentage; or

(D) the location of obligors or their assets;

(21) "support order" means a judgment, decree, or order, whether temporary, final, or subject to modification, for the benefit of a child, a spouse, or a former spouse, that provides for monetary support, health care, arrearages, or reimbursement, and may include related costs and fees, interest, income withholding, attorney fees, and other relief;

(22) "tribunal" means a court, administrative agency, or quasi-judicial entity authorized to establish, enforce, or modify support orders or to determine parentage. (§ 4 ch 57 SLA 1995; am §§ 48 — 50 ch 87 SLA 1997)

NOTES TO DECISIONS

Application for child support by custodian. — See Saask v. Yandell, 702 P.2d 1327 (Alaska 1985) (decided under former law).

Arrearages. — Under Alaska law, arrearages were recoverable in actions under the Uniform Reciprocal Enforcement of Support Act. Bailey v. Haas, 655 P.2d 764 (Alaska 1982) (decided under former law).

There was no requirement that a request for arrearages had to be reduced to judgment by the petitioning state. Bailey v. Haas, 655 P.2d 764 (Alaska 1982) (decided under former law).

Cited in McCaffery v. Green, 931 P.2d 407 (Alaska 1997); Fowler v. State, 168 P.3d 870 (Alaska 2007).

Collateral references. — Construction and application of Uniform Interstate Family Support Act, 90 ALR5th 1.

Sec. 25.25.102. Tribunals of this state. The superior court and the child support services agency are the tribunals of this state. (§ 4 ch 57 SLA 1995)

Revisor's notes. — In 2004, "child support enforcement agency" was changed to "child support services agency" in this section in accordance with § 12(a), ch. 107, SLA 2004.

NOTES TO DECISIONS

Collateral estoppel. — Father affirmatively and explicitly waived his argument that the superior court did not give proper legal effect to the administrative decision concerning child support when he appeared and asked the superior court to proceed to decide support obligations for all years. McDonald v. Trihub, 173 P.3d 416 (Alaska 2007).

Sec. 25.25.103. Remedies cumulative. Remedies provided by this chapter are cumulative and do not affect the availability of remedies under other law. (§ 4 ch 57 SLA 1995)

Secs. 25.25.110 — 25.25.200. [Repealed, § 21 ch 57 SLA 1995.]

209. Credit for payments

Sec. 25.25.201. Bases for jurisdiction over nonresident. In a proceeding to establish, enforce, or modify a support order or to determine parentage, a tribunal of this state may exercise personal jurisdiction over a nonresident individual or the individual's guardian or conservator if

(1) the individual is personally served with a citation, summons, or notice within this state;

(2) the individual submits to the jurisdiction of this state by consent, by entering a general appearance, or by filing a responsive document having the effect of waiving any contest to personal jurisdiction;

(3) the individual resided with the child in this state;

(4) the individual resided in this state and provided prenatal expenses or support for the child;

(5) the child resides in this state as a result of the acts or directives of the individual;

(6) the individual engaged in sexual intercourse in this state and the child may have been conceived by that act of intercourse;

(7) the individual acknowledged parentage in a writing deposited with the Bureau of Vital Statistics under AS 25.20.050; or

(8) there is another basis consistent with the constitutions of this state and the United States for the exercise of personal jurisdiction. (§ 5 ch 57 SLA 1995)

NOTES TO DECISIONS

Jurisdiction found. — Contrary to the husband's contention in his challenge to the child support modification order, the trial court had personal jurisdiction over the husband pursuant to AS 25.25.201 after he moved to Missouri as the husband participated in support proceedings in Alaska for several years, he had lived in Alaska with one of the children, agreed to pay for the wife's expenses relating to her pregnancy with the parties' other child and his birth, and presumably conceived the children in Alaska. Teseniar v. Teseniar, 74 P.3d 910 (Alaska 2003).

Sec. 25.25.202. Procedure when exercising jurisdiction over nonresident. A tribunal of this state exercising personal jurisdiction over a nonresident under AS 25.25.201 may apply AS 25.25.316 to receive evidence from another state and AS 25.25.318 to obtain discovery through a tribunal of another state. In all other respects, AS 25.25.301 — 25.25.701 do not apply and the tribunal shall apply the procedural and substantive law of this state, including the rules on choice of law other than those established by this chapter. (§ 5 ch 57 SLA 1995)

Sec. 25.25.203. Initiating and responding tribunal of this state. Under this chapter, a tribunal of this state may serve as an initiating tribunal to forward proceedings to another state and as a responding tribunal for proceedings initiated in another state. (§ 5 ch 57 SLA 1995)

Sec. 25.25.204. Simultaneous proceedings in another state. (a) A tribunal of this state may exercise jurisdiction to establish a support order if the complaint or comparable pleading is filed after a complaint or comparable pleading is filed in another state only if

(1) the complaint or comparable pleading in this state is filed before the expiration of the time allowed in the other state for filing a responsive pleading challenging the exercise of jurisdiction by the other state;

(2) the contesting party timely challenges the exercise of jurisdiction in the other state; and

(3) if relevant, this state is the home state of the child.

(b) A tribunal of this state may not exercise jurisdiction to establish a support order if the complaint or comparable pleading is filed before a complaint or comparable pleading is filed in another state if

(1) the complaint or comparable pleading in the other state is filed before the expiration of the time allowed in this state for filing a responsive pleading challenging the exercise of jurisdiction by this state;

(2) the contesting party timely challenges the exercise of jurisdiction in this state; and

(3) if relevant, the other state is the home state of the child. (§ 5 ch 57 SLA 1995)

Sec. 25.25.205. Continuing, exclusive jurisdiction. (a) A tribunal of this state issuing a support order consistent with the law of this state has continuing, exclusive jurisdiction over a child support order

(1) as long as this state remains the residence of the obligor, the individual obligee, or the child for whose benefit the support order is issued; or

(2) until each individual party has filed written consent with the tribunal of this state for a tribunal of another state to modify the order and assume continuing, exclusive jurisdiction.

(b) A tribunal of this state issuing a child support order consistent with the law of this state may not exercise its continuing jurisdiction to modify the order if the order has been modified by a tribunal of another state under a law substantially similar to this chapter.

(c) If a child support order of this state is modified by a tribunal of another state under a law substantially similar to this chapter, a tribunal of this state loses its continuing, exclusive jurisdiction with regard to prospective enforcement of the order issued in this state and may only

(1) enforce the order that was modified as to amounts accruing before the modification;

(2) enforce nonmodifiable aspects of that order; and

(3) provide other appropriate relief for violations of that order that occurred before the effective date of the modification.

(d) A tribunal of this state shall recognize the continuing, exclusive jurisdiction of a tribunal of another state that has issued a child support order under a law substantially similar to this chapter.

(e) A temporary support order issued ex parte or pending resolution of a jurisdictional conflict does not create continuing, exclusive jurisdiction in the issuing tribunal.

(f) A tribunal of this state issuing a support order consistent with the law of this state has continuing, exclusive jurisdiction over a spousal support order throughout the existence of the support obligation. A tribunal of this state may not modify a spousal support order issued by a tribunal of another state having continuing, exclusive jurisdiction over that order under the law of that state. (§ 5 ch 57 SLA 1995)

NOTES TO DECISIONS

Order not entitled to full faith and credit. — A support order entered by a responding court pursuant to a Uniform Reciprocal Enforcement of Support Act petition, which did not specifically modify an order entered in the initiating state, had no effect on the validity of the earlier order and was not entitled to full faith and credit by courts of the initiating state. State, Dep't of Revenue ex rel. Valdez v. Valdez, 941 P.2d 144 (Alaska 1997) (decided under former law).

Order properly entered on waiver by parties of administrative decision. — Father affirmatively and explicitly waived his argument that the superior court did not give proper legal effect to the administrative decision concerning child support when he appeared and asked the superior court to proceed to decide support obligations for all years. McDonald v. Tribub, 173 P.3d 416 (Alaska 2007).

Interest on support arrearage. — Under the Uniform Interstate Family Support Act, where the child resided in Alaska, the issuing state, Washington could not modify the original support order, and the Child Support Enforcement Division (now the Child Support Services Agency) was entitled to collect interest on father's support arrearage. State, Dep't of Revenue, Child Support Enforcement Div., ex rel. Walklace v. Delaney, 962 P.2d 187 (Alaska 1998).

Jurisdiction found. — Contrary to the husband's contention in his challenge to the child support modification order, the trial court had continuing, exclusive jurisdiction over the support order pursuant to AS 25.25.205(a)(1)-(2) after he moved to Missouri as the wife and the children still resided in Alaska and the parties filed no written consent for Missouri to modify the order. Teseniar v. Teseniar, 74 P.3d 910 (Alaska 2003).

Sec. 25.25.206. Enforcement and modification of support order by tribunal having continuing jurisdiction. (a) A tribunal of this state may serve as an initiating tribunal to request a tribunal of another state to enforce or modify a support order issued in that state.

(b) A tribunal of this state having continuing, exclusive jurisdiction over a support order may act as a responding tribunal to enforce or modify the order. If a party subject to the continuing, exclusive jurisdiction of the tribunal no longer resides in the issuing state, in subsequent proceedings the tribunal may apply AS 25.25.316 to receive evidence from another state and AS 25.25.318 to obtain discovery through a tribunal of another state.

(c) A tribunal of this state that lacks continuing, exclusive jurisdiction over a spousal support order may not serve as a responding tribunal to modify a spousal support order of another state. (§ 5 ch 57 SLA 1995)

Sec. 25.25.207. Recognition of controlling child support order. (a) If a proceeding is brought under this chapter and only one tribunal has issued a child support order, the order of that tribunal is controlling and shall be recognized.

(b) If a proceeding is brought under this chapter and two or more child support orders have been issued by tribunals of this state or another state with regard to the same obligor and child, a tribunal of this state shall apply the following rules in determining which order to recognize for purposes of continuing, exclusive jurisdiction:

(1) if only one of the tribunals would have continuing, exclusive jurisdiction under this chapter, the order of that tribunal is controlling and shall be recognized;

(2) if more than one of the tribunals would have continuing, exclusive jurisdiction under this chapter, an order issued by a tribunal in the current home state of the child shall be recognized, but, if an order has not been issued in the current home state of the child, the order most recently issued is controlling and shall be recognized;

(3) if none of the tribunals would have continuing, exclusive jurisdiction under this chapter, the tribunal of this state having jurisdiction over the parties shall issue a child support order, which is controlling and shall be recognized.

(c) If two or more child support orders have been issued for the same obligor and child and if the obligor or the individual obligee resides in this state, a party may request a tribunal of this state to determine which order controls and shall be recognized under (b) of this section. The request shall be accompanied by a certified copy of every support order in effect. Every party whose rights may be affected by a determination of the controlling order shall be given notice of the request for that determination.

(d) The tribunal that issued the order that shall be recognized as controlling under (a), (b), or (c) of this section is the tribunal that has continuing, exclusive jurisdiction in accordance with AS 25.25.205.

(e) A tribunal of this state that determines by order the identity of the controlling child support order under (b)(1) or (2) of this section, or that issues a new controlling child support order under (b)(3) of this section, shall include in that order the basis upon which the tribunal made its determination.

(f) Within 30 days after issuance of the order determining the identity of the controlling order, the party obtaining that order shall file a certified copy of that order with each tribunal that had issued or registered an earlier order of child support. Failure of the party obtaining the order to file a certified copy as required under this subsection subjects that party to appropriate sanctions by a tribunal in which the issue of failure to file arises, but that failure has no effect on the validity or enforceability of the controlling order. (§ 5 ch 57 SLA 1995; am § 51 ch 87 SLA 1997)

Sec. 25.25.208. Multiple child support orders for two or more obligees. In responding to multiple registrations or complaints for enforcement of two or more child support orders in effect at the same time with regard to the same obligor and different individual obligees, when at least one of the orders was issued by a tribunal of another state, a tribunal of this state shall enforce those orders in the same manner as if the multiple orders had been issued by a tribunal of this state. (§ 5 ch 57 SLA 1995)

Sec. 25.25.209. Credit for payments. Amounts collected and credited for a particular period under a support order issued by a tribunal of another state shall be credited against the amounts accruing or accrued for the same period under a support order issued by the tribunal of this state. (§ 5 ch 57 SLA 1995)

Secs. 25.25.210 — 25.25.270. [Repealed, § 21 ch 57 SLA 1995.]

Sec. 25.25.301. Proceedings under this chapter. (a) Except as otherwise provided in this chapter, AS 25.25.301 — 25.25.319 apply to all proceedings under this chapter.

(b) This chapter provides for the following proceedings:

(1) establishment of an order for child support or spousal support under AS 25.25.401;

(2) enforcement of a support order and income withholding order of another state without registration under AS 25.25.501 — 25.25.507;

(3) registration of an order for child support or spousal support of another state for enforcement under AS 25.25.601 — 25.25.614;

(4) modification of an order for child support or spousal support issued by a tribunal of this state under AS 25.25.203 — 25.25.206;

(5) registration of an order for child support of another state for modification under AS 25.25.601 — 25.25.614;

(6) determination of parentage under AS 25.25.701; and

(7) assertion of jurisdiction over nonresidents under AS 25.25.201 — 25.25.202.

(c) An individual or a support enforcement agency may commence a proceeding authorized under this chapter by filing a complaint or a comparable pleading in an initiating tribunal for forwarding to a responding tribunal or by filing a complaint or a comparable pleading directly in a tribunal of another state that has or can obtain personal jurisdiction over the respondent. (§ 6 ch 57 SLA 1995; am § 52 ch 87 SLA 1997)

Sec. 25.25.302. Action by minor parent. A minor parent, or a guardian or other legal representative of a minor parent, may maintain a proceeding on behalf of or for the benefit of the minor's child. (§ 6 ch 57 SLA 1995)

Sec. 25.25.303. Application of law of this state. Except as otherwise provided by this chapter, a responding tribunal of this state shall

(1) apply the procedural and substantive law, including the rules on choice of law, generally applicable to similar proceedings originating in this state and may exercise all powers and provide all remedies available in those proceedings; and

(2) determine the duty of support and the amount payable under the law and support guidelines of this state. (§ 6 ch 57 SLA 1995)

NOTES TO DECISIONS

Role of Child Support Enforcement Division (now Child Support Services Agency). — Where the state's Child Support Enforcement Division (now the Child Support Services Agency) acted as a responding tribunal, the court appropriately applied state law to modification of a child support order originally issued in another state. State v. Bromley, 987 P.2d 183 (Alaska 1999).

Construction with other provisions. — Because AS 25.25.604 defines when a state may diverge from local law, and because this section provides that local law applies except "as otherwise provided," the sections, when read together, imply that forum law applies in all circumstances not expressly identified by the Uniform Interstate Family Support Act. State v. Bromley, 987 P.2d 183 (Alaska 1999).

e filing of a complaint or

comparable pleading authorized by this chapter, an initiating tribunal of this state shall forward three copies of the complaint or comparable pleading and its accompanying documents

(1) to the responding tribunal or appropriate support enforcement agency in the responding state; or

(2) if the identity of the responding tribunal is unknown, to the state information agency of the responding state with a request that they be forwarded to the appropriate tribunal and that receipt be acknowledged.

(b) If a responding state has not enacted a law or procedure substantially similar to this chapter, a tribunal of this state may issue a certificate or other documents and make findings required by the law of the responding state. If the responding state is a foreign jurisdiction, the tribunal may specify the amount of support sought and provide other documents necessary to satisfy the requirements of the responding state. (§ 6 ch 57 SLA 1995; am § 53 ch 87 SLA 1997)

Sec. 25.25.305. Duties and powers of responding tribunal. (a) When a responding tribunal of this state receives a complaint or comparable pleading from an initiating tribunal or directly under AS 25.25.301(c), it shall cause the complaint or pleading to be filed and notify the petitioner where and when it was filed.

(b) A responding tribunal of this state, to the extent otherwise specifically authorized by law, may do one or more of the following:

(1) issue or enforce a support order, modify a child support order, or render a judgment to determine parentage;

(2) order an obligor to comply with a support order, specifying the amount and the manner of compliance;

(3) order income withholding;

(4) determine the amount of any arrearages, and specify a method of payment;

(5) enforce orders by civil or criminal contempt, or both;

(6) set aside property for satisfaction of the support order;

(7) place liens and order execution on the obligor's property;

(8) order an obligor to keep the tribunal informed of the obligor's current residential address, telephone number, employer, address of employment, and telephone number at the place of employment;

(9) issue a bench warrant for an obligor who has failed after proper notice to appear at a hearing ordered by the tribunal and enter the bench warrant in any local and state computer systems for criminal warrants;

(10) order the obligor to seek appropriate employment by specified methods;

(11) award reasonable attorney fees and other fees and costs; and

(12) grant any other available remedy.

(c) A responding tribunal of this state shall include in a support order issued under this chapter, or in the documents accompanying the order, the calculations on which the support order is based.

(d) A responding tribunal of this state may not condition the payment of a support order issued under this chapter upon compliance by a party with provisions for visitation.

(e) If a responding tribunal of this state issues an order under this chapter, the tribunal shall send a copy of the order to the petitioner and the respondent and to the initiating tribunal, if any. (§ 6 ch 57 SLA 1995; am §§ 54, 55 ch 87 SLA 1997)

NOTES TO DECISIONS

Arrearages. — Under Alaska law, arrearages were recoverable in actions under the Uniform Reciprocal Enforcement of Support Act. Bailey v. Haas, 655 P.2d 764 (Alaska 1982) (decided under former law).

There was no requirement that a request for arrearages must be reduced to judgment by the petitioning state. Bailey v. Haas, 655 P.2d 764 (Alaska 1982) (decided under former law).

The petition's failure to include a prayer for arrearages did not justify dismissal of the claim since the function of a pleading is to give notice of the type of claim asserted, the body of the petition stated that defendant had contributed nothing toward the support for his daughter, and, the motion for an order of support specifically requested arrearages; therefore, defendant had notice of the claim for arrearages at the very latest by the date when the motion was filed. Bailey v. Haas, 655 P.2d 764 (Alaska 1982) (decided under former law).

Enforcement of support obligation for nonvisitation. — In the appeal of an action to enforce an Oregon judgment for accrued and unpaid child support, a provision in the judgment requiring the father to pay the mother $25.00 for each weekend without visitation for child care expenses unless the mother requested no visitation was interpreted according to the rule of contract interpretation that conditions are disfavored. The payments were treated as an absolute obligation that was part of the child support obligation without conditions concerning geographical limitation, impracticality, lack of information about the mother's whereabouts, reimbursement for actual child care expenses or credit for nonweekend visitation. Logghe v. Jasmer, 686 P.2d 694 (Alaska 1984) (decided under former law).

Sec. 25.25.306. Inappropriate tribunal. If a complaint or comparable pleading is received by an inappropriate tribunal of this state, it shall forward the complaint or pleading, and accompanying documents, to an appropriate tribunal in this state or another state and notify the petitioner where and when the complaint or pleading was sent. (§ 6 ch 57 SLA 1995; am § 56 ch 87 SLA 1997)

Sec. 25.25.307. Duties of child support services agency. (a) The child support services agency of this state, upon request, shall provide services to a petitioner in a proceeding under this chapter.

(b) In providing services under this chapter to the petitioner, the child support services agency shall, as appropriate,

(1) take all steps necessary to enable an appropriate tribunal in this state or another state to obtain jurisdiction over the respondent;

(2) request an appropriate tribunal to set a date, time, and place for a hearing;

(3) make a reasonable effort to obtain all relevant information, including information as to income and property of the parties;

(4) send written notice from an initiating, responding, or registering tribunal to the petitioner within two days of receipt, exclusive of Saturdays, Sundays, and legal holidays;

(5) send a copy of a written communication from the respondent or the respondent's attorney to the petitioner within two days of receipt, exclusive of Saturdays, Sundays, and legal holidays; and

(6) notify the petitioner if jurisdiction over the respondent cannot be obtained.

(c) This chapter does not create or negate a relationship of attorney and client or other fiduciary relationship between the child support services agency or the attorney for the agency and the individual being assisted by the agency. (§ 6 ch 57 SLA 1995; am § 57 ch 87 SLA 1997)

Revisor's notes. — In 2004, "child support enforcement agency" was changed to "child support services agency" in this section in accordance with § 12(a), ch. 107, SLA 2004.

Sec. 25.25.309. Private counsel. An individual may employ private counsel to represent the individual in proceedings authorized by this chapter. (§ 6 ch 57 SLA 1995)

Sec. 25.25.310. Duties of state information and locator agency. The child support services agency is the state information agency under this chapter, and it shall

(1) compile and maintain a current list, including addresses, of the tribunals in this state that have jurisdiction under this chapter and the appropriate agency offices in this state and transmit a copy to the state information agency of every other state;

(2) maintain a register of tribunals and support enforcement agencies received from other states;

(3) forward to the appropriate tribunal in this state all documents concerning a proceeding under this chapter received from an initiating tribunal or the state information agency of the initiating state; and

(4) obtain information
within this state that is n

(4) obtain information concerning the location of the obligor and the obligor's property within this state that is not exempt from execution by postal verification and federal or state locator services, examination of telephone directories, requests for the obligor's address from employers, and examination of governmental records, including, to the extent not prohibited by other law, those relating to real property, vital statistics, law enforcement, taxation, motor vehicles, driver's licenses, and social security. (§ 6 ch 57 SLA 1995; am § 58 ch 87 SLA 1997)

Revisor's notes. — In 2004, "child support enforcement agency" was changed to "child support services agency" in this section in accordance with § 12(a), ch. 107, SLA 2004.

Sec. 25.25.311. Pleadings and accompanying documents. (a) A petitioner seeking to establish or modify a support order or to determine parentage in a proceeding under this chapter shall verify the complaint or comparable pleading. Unless otherwise ordered under AS 25.25.312, or otherwise prohibited by law, the complaint or comparable pleading or accompanying documents must provide, so far as known, the name, residential address, and social security numbers of the obligor and the obligee, and the name, sex, residential address, social security number, and date of birth of each child for whom support is sought. The complaint or comparable pleading must be accompanied by a certified copy of any support order in effect. The complaint or comparable pleading may include other information that may assist in locating or identifying the respondent.

(b) The complaint or comparable pleading must specify the relief sought. The complaint or comparable pleading and accompanying documents must conform substantially with the requirements imposed by the forms mandated by federal law for use in cases filed by a support enforcement agency. (§ 6 ch 57 SLA 1995)

Sec. 25.25.312. Nondisclosure of information in exceptional circumstances. Upon a finding, which may be made ex parte, that the health, safety, or liberty of a party or child would be unreasonably put at risk by the disclosure of identifying information, or if an existing order so provides, a tribunal shall order that the address of the child or party or other identifying information not be disclosed in a pleading or other document filed in a proceeding under this chapter. (§ 6 ch 57 SLA 1995; am § 59 ch 87 SLA 1997)

Sec. 25.25.313. Costs and fees. (a) Notwithstanding any other provision of law, including a rule of the Alaska Supreme Court, at the time a complaint or comparable pleading is filed under this chapter, a tribunal may not require the petitioner to pay a filing fee or other costs.

(b) If an obligee prevails, a responding tribunal may assess against an obligor filing fees, including fees that were waived under (a) of this section, reasonable attorney fees, other costs, necessary travel expenses, and other reasonable expenses incurred by the obligee and the obligee's witnesses. The tribunal may not assess fees, costs, or expenses against the obligee or the support enforcement agency of either the initiating or the responding state except as required by other law or court rule. Attorney fees may be taxed as costs, and may be ordered paid directly to the attorney, who may enforce the order in the attorney's own name. Payment of support owed to the obligee has priority over fees, costs, and expenses assessed under this subsection.

(c) The tribunal shall order the payment of costs and reasonable attorney fees, including filing fees that were waived under (a) of this section, by a party who requests a hearing under this chapter if it determines that the hearing was requested primarily for delay. In a proceeding under AS 25.25.601 — 25.25.612, a hearing is presumed to have been requested primarily for delay if a registered support order is confirmed or enforced without change; however, the party who requested the hearing may present evidence to rebut this presumption. (§ 6 ch 57 SLA 1995)

Cross references. — For effect of this section on Alaska Rules of Civil Procedure 79 and 82, see § 22, ch. 57, SLA 1995 in the Temporary and Special Acts.

Sec. 25.25.314. Limited immunity of petitioner. (a) Participation by a petitioner in a proceeding before a responding tribunal, whether in person, by private attorney, or through services provided by the support enforcement agency, does not confer personal jurisdiction over the petitioner in another proceeding.

(b) A petitioner is not amenable to service of civil process while physically present in this state to participate in a proceeding under this chapter.

(c) The immunity granted by this section does not extend to civil litigation based on acts unrelated to a proceeding under this chapter committed by a party while present in this state to participate in the proceeding. (§ 6 ch 57 SLA 1995)

Sec. 25.25.315. Nonparentage as defense. A party whose parentage of a child has been previously determined under law may not plead nonparentage as a defense to a proceeding under this chapter. (§ 6 ch 57 SLA 1995)

Sec. 25.25.316. Special rules of evidence and procedure. (a) The physical presence of the petitioner in a responding tribunal of this state is not required for the establishment, enforcement, or modification of a support order or the rendition of a judgment determining parentage.

(b) A verified complaint or comparable pleading, affidavit, document substantially complying with federally mandated forms, and a document incorporated by reference in any of them, not excluded under the hearsay rule if given in person, is admissible in evidence if given under oath by a party or witness residing in another state.

(c) A copy of the record of child support payments certified as a true copy of the original by the custodian of the record may be forwarded to a responding tribunal. The copy is evidence of facts asserted in it and is admissible to show whether payments were made.

(d) Copies of bills for testing for parentage, and for prenatal and postnatal health care of the mother and child, furnished to the adverse party at least 10 days before trial or other proceeding, are admissible in evidence to prove the amount of the charges billed and that the charges were reasonable, necessary, and customary.

(e) Documentary evidence transmitted from another state to a tribunal of this state by telephone, telecopier, or other means that do not provide an original writing may not be excluded from evidence on an objection based on the means of transmission.

(f) In a proceeding under this chapter, a tribunal of this state may permit a party or witness residing in another state to be deposed or to testify by telephone, audiovisual means, or other electronic means at a designated tribunal or other location in that state. A tribunal of this state shall cooperate with tribunals of other states in designating an appropriate location for the deposition or testimony.

(g) If a party called to testify at a civil hearing refuses to answer on the ground that the testimony may be self-incriminating, the trier of fact may draw an adverse inference from the refusal.

(h) A privilege against disclosure of communications between spouses does not apply in a proceeding under this chapter.

(i) The defense of immunity based on the relationship of husband and wife or parent and child does not apply in a proceeding under this chapter. (§ 6 ch 57 SLA 1995)

Sec. 25.25.318. Assistance with discovery. A tribunal of this state may
(1) request a tribunal of another state to assist in obtaining discovery; and
(2) upon request, compel a person over whom it has jurisdiction to respond to a discovery order issued by a tribunal of another state. (§ 6 ch 57 SLA 1995)

NOTES TO DECISIONS

Cited in Teseniar v. Teseniar, 74 P.3d 910 (Alaska 2003).

Sec. 25.25.319. Receipt and disbursement of payments. The child support services agency of this state shall disburse promptly any amounts received under a support order, as directed by the order. The agency shall furnish to a requesting party or tribunal of another state a certified statement by the custodian of the record of the amounts and dates of all payments received. (§ 6 ch 57 SLA 1995)

Revisor's notes. — In 2004, "child support enforcement agency" was changed to "child support services agency" in this section in accordance with § 12(a), ch. 107, SLA 2004.

Article 4. Establishment of Support Order.

Section
401. Complaint to establish support order

Sec. 25.25.401. Complaint to establish support order. (a) If a child support order entitled to recognition under this chapter has not been issued, a responding tribunal of this state may issue a child support order if
(1) the individual seeking the order resides in another state; or
(2) the support enforcement agency seeking the order is located in another state.
(b) The tribunal may issue a temporary child support order if
(1) the respondent has signed a verified statement acknowledging parentage;
(2) the respondent has been determined under law to be the parent; or
(3) there is other clear and convincing evidence that the respondent is the child's parent.
(c) If a spousal support order entitled to recognition under this chapter has not been issued, a responding superior court of this state may issue a spousal support order if
(1) the individual seeking the order resides in another state; or
(2) the support enforcement agency seeking the order is located in another state.
(d) If, after providing an obligor with notice and opportunity to be heard, an appropriate tribunal finds that the obligor owes a duty of support, the tribunal shall issue a support order directed to the obligor and may issue other orders under AS 25.25.305.
(e) Before issuing an order under (b) of this section, the child support services agency shall adopt regulations for issuing such an order. (§ 6 ch 57 SLA 1995)

Revisor's notes. — In 2004, "child support enforcement agency" was changed to "child support services agency" in (e) of this section in accordance with § 12(a), ch. 107, SLA 2004.

Article 5. Direct Enforcement of Order of Another State Without Registration.

Section
501. Employer's receipt of income withholding order of another state
502. Employer's compliance with income withholding order of another state
503. Compliance with multiple income withholding orders
504. Immunity from civil liability
505. Penalties for noncompliance
506. Contest by obligor
507. Administrative enforcement of orders

Sec. 25.25.501. Employer's receipt of income withholding order of another state. An income withholding order issued in another state may be sent to the person or entity defined as the obligor's employer under AS 25.27 without first filing a complaint or comparable pleading or registering the order with a tribunal of this state. (§ 6 ch 57 SLA 1995; am § 60 ch 87 SLA 1997)

NOTES TO DECISIONS

Personal jurisdiction required for foreign judgment enforcement. — Although personal jurisdiction was not required to register a foreign support judgment under the Uniform Reciprocal Enforcement of Support Act, such jurisdiction was required for enforcement of the foreign judgment. Lagerwey v. Lagerwey, 681 P.2d 309 (Alaska 1984).

Post-judgment dismissal of underlying paternity suit. — The effect of a post-judgment dismissal of the underlying California paternity suit on a final Alaska judgment was determined according to Alaska law. Rubalcava v. Hall, 674 P.2d 767 (Alaska 1983).

Arrears on a pendente lite child support order were due despite the dismissal of the underlying paternity suit. Rubalcava v. Hall, 674 P.2d 767 (Alaska 1983).

Waiver of objection to judgment. — Defendant waived any objection that he could have asserted to an arrears judgment by voluntarily dismissing his appeal from the judgment after the California superior court had dismissed the paternity action pursuant to which the original California pendente lite order had been issued. Rubalcava v. Hall, 674 P.2d 767 (Alaska 1983).

Sec. 25.25.502. Employer's compliance with income withholding order of another state. (a) Upon receipt of an order under AS 25.25.501, the obligor's employer shall immediately provide a copy of the order to the obligor.

(b) The employer shall treat an income withholding order issued in another state that appears regular on its face as if it were issued by a tribunal of this state.

(c) Except as provided by (d) of this section and AS 25.25.503, the employer shall withhold and distribute the funds as directed in the withholding order by complying with the terms of the order, as applicable, that specify

(1) the duration and the amount of periodic payments of current child support, stated as a sum certain;

(2) the person or agency designated to receive payments and the address to which the payments are to be forwarded;

(3) medical support, whether in the form of periodic cash payment, stated as a sum certain, or an order to the obligor to provide health insurance coverage for the child under a policy available through the obligor's employment;

(4) the amount of periodic payments of fees and costs for a support enforcement agency, the issuing tribunal, and the obligee's attorney, stated as sums certain; and

(5) the amount of periodic payments of arrearages and interest on arrearages, stated as sums certain.

(d) The employer shall comply with the law of the state of the obligor's principal place of employment for withholding from income with respect to

(1) the employer's fee for processing an income withholding order;

(2) the maximum amount permitted to be withheld from the obligor's income; and

(3) the time periods within which the employer must implement the withholding order and forward the child support payment. (§ 6 ch 57 SLA 1995; am § 61 ch 87 SLA 1997)

g order;
ne obligor's income; and
nent the withholding order am § 61 ch 87 SLA 1997)

Sec. 25.25.503. Compliance with multiple income withholding orders. If an obligor's employer receives multiple orders to withhold support from the earnings of the same obligor, the employer shall be considered to have satisfied the terms of the multiple orders if the employer complies with the law of the state of the obligor's principal place of employment to establish the priorities for withholding and allocating income withheld for multiple child support orders. (§ 62 ch 87 SLA 1997)

Sec. 25.25.504. Immunity from civil liability. An employer who complies with an income withholding order issued in another state in accordance with AS 25.25.501 -- 25.25.505 is not subject to civil liability to an individual or agency with regard to the employer's withholding of child support from the obligor's income. (§ 62 ch 87 SLA 1997)

Sec. 25.25.505. Penalties for noncompliance. An employer who wilfully fails to comply with an income withholding order issued by another state and received for enforcement is subject to the same penalties that may be imposed for noncompliance with an order issued by a tribunal of this state. (§ 62 ch 87 SLA 1997)

Sec. 25.25.506. Contest by obligor. (a) An obligor may contest the validity or enforcement of an income withholding order issued in another state and received directly by an employer in this state in the same manner as if the order were issued by a tribunal of this state. The provisions of AS 25.25.604 apply to the contest.

(b) The obligor shall give notice of the contest to

(1) a support enforcement agency providing services to the obligee;

(2) each employer that has directly received an income withholding order; and

(3) if

(A) a person or an agency is designated to receive payments in the income withholding order, to that person or agency; or

(B) no person or agency is designated to receive payments in the income withholding order, to the obligee. (§ 62 ch 87 SLA 1997)

Sec. 25.25.507. Administrative enforcement of orders. (a) A party seeking to enforce a support order or an income withholding order, or both, issued by a tribunal of another state may send the documents required for registering the order to the child support services agency of this state.

(b) Upon receipt of the documents, the child support services agency, without initially seeking to register the order, shall consider and, if appropriate, use any administrative procedure authorized by the law of this state to enforce a support order or an income withholding order, or both. If the obligor does not contest administrative enforcement, the order need not be registered. If the obligor contests the validity or administrative enforcement of the order, the child support services agency shall register the order under this chapter. (§ 62 ch 87 SLA 1997)

Revisor's notes. — In 2004, "child support enforcement agency" was changed to "child support services agency" in this section in accordance with § 12(a), ch. 107, SLA 2004.
