		153	14(b)	Transportation	Central Region Highways and Aviation	Anchorage Snow Haul (Roads) Snowfall in Anchorage this winter has returned to the amount that used to be considered normal for the area. Including the heavy snowstorms over the holidays, the accumulation of snow plowed from the roads onto the shoulders and sidewalk areas reached the level that required hauling it away. To date, snow haul expenses have nearly exhausted the annual operating budget of $250. Supplemental funding of $250.0 will allow for one additional snow haul for the remainder of the winter. With the appropriation made in sec. 1, the department will have funds for one additional snow haul.	31.5				31.5
		154	14(b)(1)	Capital	Transportation	The unexpended and unobligated balance of the appropriation made in sec. 13, ch. 29, SLA08, page 16, line 13 and allocated on page 160, line 32 (Yakutat Multi-Purpose Dock - $555,000) is reappropriated to the Department of Transportation and Public Facilities, Central region Highways and Aviation for Anchorage snow haul costs.	(5.5)				(5.5)
		155	14(b)(2)	Capital	Transportation	The unexpended and unobligated balance, not to exceed $26,000, of the appropriation made in sec. 7, ch. 82, SLA 2006, page 128, lines 22 - 23 (Willow - Fishhook Road Plowing - $41,000), is reappropriated to the Department of Transportation and Public Facilities, Central Region Highways and Aviation for Anchorage snow haul costs. 13-Mar-09	DNR 2	232		Capital	Natural Resources	Lapse remaining $224,899.82 balance of the completed Juneau Subport Abatement Phase 2 - Mental Health Trust Settlement project originally appropriated in sec. 4, ch. 30, SLA 2007, page 98, line 30.	(224.9)				(224.9)
13-Mar-09	DOR 1	233		Capital	Revenue	Change the name of the FY2009 Power Builder Replacement Project Feasibility Study to Power Builder Replacement and SQL Database Evaluation, Equipment and Training Due to electronic filing and more records being stored electronically, PFD is currently storing more than 1.2 Terabytes of information. It is anticipated that this data storage may double in the next year. Also, PFD is slowly migrating off the state's mainframe while working to fit within state data standards as established by the Department of Administration. The SQL Database is critical to the PFD computer system's ability to perform beyond the next year's data. The feasibility study is now a moot point since PFD needs to improve its system and must meet state standards. None of the original $300.0 GF has been spent to date. This scope change also enables the removal of an FY2010 CIP request.					0.0
13-Mar-09	DOT 8	234		Capital	Transportation	Amend: Airport Improvement Program Appropriation This amendment increases the Airport Improvement Program appropriation to include the new Nulato Airport Improvements request. Representative Jay Ramras
District 10

Sponsor Statement
HB 114
"An Act relating to availability of state transportation facilities and state-owned or state-operated transportation modes for delivering compassionate aid."

House Bill 114 is a compassionate aid bill that would enable the Governor to use state transportation to provide aid to Alaska communities in times of eminent disaster without declaring a disaster.

In the initial week of the 26th Legislative session, the village of Emmonak wrote a declaration of economic disaster to the Department of Commerce, Community and, Economic Development. As private and public entities worked together to raise donations of money and food for relief to Emmonak it became apparent that they were not the only village in desperate need of aid and attention. The following weeks, Representative Ramras and his staff worked with the Fairbanks and Anchorage Food Banks and local faith based organizations to raise over 30,000 pounds of food for eleven villages in Western Alaska.

Due to the current restrictions, state transportation could not be used because a disaster had not been declared. Consequently, Representative Ramras and staff had two options:1)use the monetary donations towards transportation; thus taking away precious funds for additional food or 2)work with transportation companies to provide their services for free or discounted rates.

Ultimately, based on the collective generosity of a few transportation companies, the food was able to arrive in all of the eleven villages.

House Bill 114 would reduce the need to spend donated funds on transportation and instead, allow a sharper focus on gathering the resources needed for relief.

ANALYSIS: *(Attach a separate page if necessary)*

If the Governor determines that public safety or health conditions in an area of the state require emergency assistance, the Governor can utilize state transportation assets to deliver compassionate aid. This legislation would provide that the Alaska Railroad Corporation would not be liable in tort for damages, for the injury to or death of a person, or property damage resulting from assistance provided. Because the Alaska Railroad does not receive state funding for operations or capital improvements, HB 114 would not provide a railroad related cost to the state. The cost to provide this service to the Alaska Railroad would depend on the number of rail cars and locomotive power needed, crew requirements, and the destination.

CS FOR HOUSE BILL NO. 114(TRA)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SIXTH LEGISLATURE - FIRST SESSION

BY THE HOUSE TRANSPORTATION COMMITTEE

Offered: 3/13/09
Referred: Finance

Sponsor(s): REPRESENTATIVES RAMRAS, Dahlstrom, Millett, Johansen, Edgmon, Petersen, Holmes, Foster, Johnson, Tuck, Gruenberg, Salmon, Coghill, Thomas, Joule, Muñoz

A BILL

FOR AN ACT ENTITLED

"An Act relating to availability of state transportation facilities and state-owned or state-operated transportation modes for delivering compassionate aid."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 44.19 is amended by adding a new section to article 2 to read:

Sec. 44.19.051. Emergency assistance transportation; immunity. (a) If the governor determines that public safety or health conditions in an area of the state require emergency assistance, the governor may make available state transportation facilities, state-owned aircraft, vessels of the marine highway system, or railroad rolling stock of the Alaska Railroad for use by nonprofit organizations to deliver compassionate aid to the area, including food, water, fuel, clothing, medicine, and supplies.

(b) Notwithstanding another provision of law, the state and its officers, agents, and employees and the Alaska Railroad Corporation and its officers, agents, and employees are not liable in tort for damages for the injury to or death of a person or

property damage resulting from assistance provided under (a) of this section.

by

Myron P. Naneng, Sr., President
Regarding HB 114

February 9, 2009

BILL: HB 114
BILL VERSION:
CURRENT STATUS: (H) TRA
THEN FIN

SHORT TITLE: USE STATE TRANS FACILITY FOR DISASTER AID
STATUS DATE: 02/04/09

SPONSOR(s): REPRESENTATIVE(s) RAMRAS, Dahlstrom, Millett, Johansen, Edgmon, Petersen, Holmes, Foster, Johnson, Tuck, Gruenberg, Salmon, Coghill, Thomas, Joule, Munoz

TITLE: "An Act relating to availability of state transportation facilities and state-owned or state-operated transportation modes for delivering compassionate aid during a disaster emergency."

We at the Association of Village Council Presidents, Inc. (AVCP) are grateful for Representative Ramras and the co-sponsors of HB 114 in an effort to make use of State transportation resources to ship out compassionate aid to remote, rural Alaska communities in our Yukon Kuskokwim region.

My name is Myron Naneng, I am President of our regional non-profit corporation made up of 56 federally recognized Tribes in the YK Delta. While energy and food relief has been pouring into our communities suffering from food shortages and crippling fuel prices, the efforts have until this point remained primarily by private citizens and groups. We would also like to recognize and thank the redirect of donated Energy Rebates under the United Way.

In the last several weeks, Representative Jay Ramras, has focused on directing some of his food drive activities for relief to our communities. We appreciate his efforts, and are sorry that he, along with other private donors, has been burdened with the shipping expense of getting this compassionate aid out to our remote villages. Our calls to the Governor's office to address our energy crisis have largely gone ignored, and this bill, along with SB 88 and SB 91 finally has State efforts come into play.

Last week, we testified in favor of extending the PCE program and instituting a fuel cap on costs beyond $3 a gallon. Since early last summer, tribal leaders as well as myself were justifiably concerned about our coming winter since we were forced to prepay our winter fuel purchases for our tank farms at the highest costs of oil on record.

Because we are roadless, all of our villages have to import fuel by barge or by air in emergencies. In most cases, we have no choice but to sign no-fault contracts with fuel vendors if weather or acts of god prevent a scheduled delivery. Some of our villages, with human resources turnover or other constraints, are unable to make their fuel orders in concordance to State programs such as the bulk fuel loan in time to lock in at more agreeable rates. Factors such as these aggravate the already challenging nature of providing light and heat to our communities with little or no energy infrastructure.

With continued and full funding by the Legislature of the Renewable Energy Fund coupled with possible federal stimulus infrastructure funds, we may be looking at a reality where accessible energy sources come to fruition in a matter of years, rather than a matter of decades. With affordable energy at the village level, a failed fishing season would not break us as badly as this hard winter has shown.

Though Governor Palin herself has not directly acknowledged the fishery or fuel crisis in our region, in her response to the U.S. Army's reduced retirement payments to 26 Alaska Native Elders who had served in the Territorial Guard during WWII, she argued:

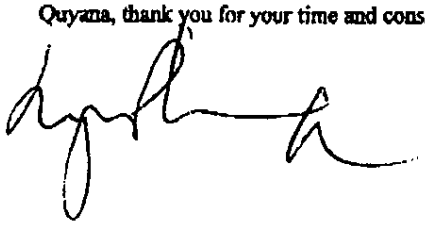
"Rural Alaskans face the highest food and energy costs in the nation, and these veterans need their retirement checks now more than ever," Governor Palin said. "Using the emergency fund to provide monetary protection for these 26 veterans is the right thing to do."

AVCP provides direct assistance to many families in our member villages that include a Housing Improvement Program, TANF and LIHEAP to name a few. Last year we assisted 1,846 households with energy assistance, and we anticipate the same number if not more appeals for the remainder of this season.

We tried to address this crisis proactively, in public statements and resolutions. We warned that the $1,200 rebate would not adequately address the remote / rural fuel needs - and with the taxes due from as little as $90 to over $300 per person, we will continue to see pain in affected households this year. If we had access to affordable energy sources, all the factors we laid out for you would not have hurt us so badly this winter.

With families not having to worry about donated foods delivered from the state, it will go a long way to keeping our homes heated, and save our families from deciding between going cold or going hungry.

Quyana, thank you for your time and consideration.



HB 116
IDITAROD REGISTRATION PLATES

This legislation seeks to honor the admirable accomplishment of those who have shown both great strength and fortitude through finishing the Iditarod Sled Dog Race by authorizing the issue of special license plates.

Finishers will be able to purchase these exclusive plates of a design approved by the Department of Administration after providing specific proof of participation in, and completion of, an Iditarod Sled Dog Race to be verified by the Iditarod Trail Committee. In addition, finishers must have an automobile registered in the state of Alaska on which the plates would be displayed to be eligible to purchase the plates.

I ask for your support in this effort honoring the dedication and work of mushers who ably faced the hardships and challenges of running the "last great race", Alaska's Iditarod Trail Sled Dog Race.

HB 121
"An Act relating to municipal property tax credit for an improvement that aids in improving air quality"
(26-LS0540\A)

The purpose of House Bill 121 is to provide a municipality with the statutory authority to pass an ordinance to provide for air quality tax credits. These tax credits will help offset a portion of the property taxes and encourage property owners to invest in improvements that help improve air quality.

Each municipality will establish the eligibility, conditions and other criteria for a tax credit by passing ordinances that will are based on local public input and specific community conditions.

Alaska Conservation Alliance

Uniting for Alaska's Future

March 13, 2009

State House of Representatives
Alaska State Capitol
Juneau, Alaska 99801-1182

Dear Representatives Coghill and Kawasaki,

On behalf of the 40 conservation groups and the 38,000 Alaskans that are represented by the Alaska Conservation Alliance, I am pleased to acknowledge our strong support for HB121 allowing municipalities to offer property tax credits for reductions in emissions. Offering an incentive to decrease emissions rewards pro-active Alaskans without penalizing others. Current tools available to municipalities to reduce emissions are limited to banning certain actions and other punitive measures and without this change to Title 29, municipalities are missing a very useful tool to use to become compliant with the clean air act.

HB121 could help reduce harmful levels of $PM_{2.5}$ in the air. $PM_{2.5}$ is particulate matter that is 2.5 micrometers in diameter and smaller, less than 1/10 of the diameter of a single strand of hair. This type of air pollution is unhealthy to breath because of its small size. The particles can travel deep into the respiratory tract to the lungs and has been associated with short-term health effects such as eye, nose, throat and lung irritation, coughing, sneezing, runny nose and shortness of breath. Studies also suggest that long term exposure to fine particulate matter may be associated with increased rates of chronic bronchitis, reduced lung function and increased mortality from lung cancer and heart disease. People with breathing and heart problems, children and the elderly may be particularly sensitive to $PM_{2.5}$. While there are many difference sources of pollution, HB121 would address the $PM_{2.5}$ pollution coming from the burning of wood, heating oil, coal and natural gas in Alaskan homes.

In March 2007 the EPA set new requirements for air quality – defining those areas not meeting national $PM_{2.5}$ air quality standards for over 3 years as "non-attainment" areas. Currently there are two areas designated as non-attainment in Alaska - Fairbanks and Juneau. States must submit an implementation plan to the EPA for these non-attainment areas to show how they will address $PM_{2.5}$ levels. By allowing these and other municipalities an additional method for controlling air pollution they can potentially avoid the health and economic consequences of a non-attainment listing. HB121 does not *require* municipalities to make any change but simply puts an additional tool into the toolbox.

BOARD OF DIRECTORS

RESOLUTION #BOD2009-02

A RESOLUTION OF THE ALASKA MUNICIPAL LEAGUE BOARD OF DIRECTORS ADVOCATING FOR AMENDING TITLE 29 TO ALLOW LOCAL GOVERNEMNT OPTION TO CONSIDER PROPERTY TAX CREDITS FOR IMPROVEMENTS TO AIR QUALITY CONDITIONS AND FUEL CONSUMPTION

WHEREAS, Alaska Municipal League Board of Directors supports the issue of local governments being able to develop local responses to Alaska's energy solutions; and

WHEREAS, municipalities should have the ability to adopt local incentives to encourage individuals to make their homes and businesses more energy efficient thereby improving local air quality; and

WHEREAS, local taxation policy determined by Title 29 currently allows a property tax credit only for river bank habitat protection; and

WHEREAS, by providing for an optional tax credit, local municipalities will be able to consider providing property tax credits for actions, such as reducing fuel consumption, that councils or assemblies determine will improve air quality; and

WHEREAS, the Alaska Municipal League Board of Directors believes it is in the best interest of Alaska to allow local government to encourage its citizens to make improvements to their home and businesses that positively impact the community's air quality and to heat their homes and businesses in the most environmentally responsible way possible.

NOW, THEREFORE BE IT RESOLVED that the Alaska Municipal League Board of Directors supports an amendment to Title 29 that provides local municipalities with the ability to provide tax incentives for residences or commercial businesses to improve the energy efficiency of their property, convert from carbon based energy consumption to alternative energy generation or to take other steps that positively impact their community's air quality; and

NOW, THEREFORE BE IT RESOLVED that the Alaska Municipal League Board of Directors supports legislation authorizing an air quality improvement tax credit that allows specific eligibility, conditions, and other criteria for the tax credits to be established by local ordinance so that governments will have flexibility in crafting appropriate tax incentives that meet their individual community's needs.

PASSED AND APPROVED by the Alaska Municipal League Board of Directors on this 30th day of January, 2009.

February 9, 2009

The Honorable Bob Herron, Co-Chair
House Community & Regional Affairs Committee
State Capitol
Juneau, Alaska 99811

Dear Representative Herron:

The Fairbanks North Star Borough appreciates Representative Coghill and Representative Kawasaki's efforts to address a very serious issue facing our community by introducing HB 121. This letter is being offered in support of the change to Alaska Statutes, Title 29 proposed by HB 121, "An Act relating to a municipal property tax credit for an improvement that aids in improving air quality." This bill, if enacted by the legislature, will provide tools to local municipalities that can be used to create incentives for individuals to take actions that will improve local air quality and reduce fuel consumption. Local taxation policy and discretion is governed by Title 29 of the Alaska Statutes. Tax exemptions and tax credits are only permitted within the authority of this section of state law.

The proposed legislation expands the discretion of local municipalities in a manner that allows, by ordinance, creation of programs that will offer tax credits for actions that the local governing body determines will improve air quality. The language proposed requires that eligibility, conditions, and other criteria for the tax credits be established by ordinance.

Example of how this proposed legislation might be used by a municipality include:

- Incentives to residents to exchange old-style wood stoves for EPA certified wood stoves. Data show that EPA certified wood stoves reduce fine particulate emissions by approximately 67% over non-EPA stoves. It is clearly in the interest of any community with air quality nonattainment issues to have citizens who choose to heat with wood do so in the most environmentally friendly way possible.

- Incentives to residences or commercial businesses to improve the energy efficiency of their property. Reduced fuel consumption would lead to reduced emissions from area heating or electric generation. Incentives could be based on calculated BTU savings, MW reductions, etc.

- Incentives to convert from carbon based energy consumption to alternative energy generation. This could involve tax credits for

construction and use of a solar array or wind turbine to power/heat residential or commercial facilities.

As the Fairbanks North Star Borough and the State of Alaska look to find solutions that will help the borough and the state come into compliance with the clean air act, there exists a clear lack of ability to provide incentives at the local level. Compliance efforts will ask individuals to take and pay for actions to benefit the air quality of the entire community. Enactment of this bill will allow local municipalities the ability to lessen the individual cost of action through creation of a tax credit program not presently allowed by state law.

The Fairbanks North Star Borough Assembly passed a resolution including this item as an FNSB legislative priority for 2009 on December 11, 2008. We support this bill and urge its passage as drafted and introduced on February 4, 2009.

Thank you.

Jim Whitaker, Mayor

Nadine Winters, Presiding Officer

HB121
"An Act relating to municipal property tax credit for an improvement that aids in improving air quality"
(26-LS0540\A)

Section 1. AS 29.45 is amended by adding a new section to read:

Sec. 29.45.048 Air quality improvement tax credit. *A municipality may, by ordinance, provide for an air quality improvement tax credit to offset a portion of the property taxes due on property that, during the immediately preceding tax year, has been improved in a way that aids in improving the air quality in the municipality. The amount of the credit shall be based on a percentage of the verifiable costs of the improvement, and the credit may be granted for more than one year. The ordinance may limit the availability of a credit to some, but not all types of improvements for which a credit may be granted under this section and to property located in areas that do not meet air quality standards required by federal or state law or regulation. Eligibility, conditions, and other criteria for the credit shall be established in the ordinance adopted under this section.*

This new section provides municipalities the opportunity to offer property owners a tax credit if they make qualifying air quality improvements on their property.

The amount of the credit is based on a percentage of the verifiable costs of the improvement, and the tax credit may be granted for more than one year.

This new section further states that an ordinance may place some restrictions on availability of the tax credit, the type of improvement, and the property location. The ordinance will establish the eligibility, conditions and other criteria for the tax credit that allows each municipality the leeway to pass an ordinance that is specific to its own unique air quality issues, location, and property.

Alaska State Legislature

Representative Anna Fairclough – House District 17

House Bill 123

"An Act extending the termination date of the Statewide Suicide Prevention Council; and providing for an effective date."

House Bill 123 extends the termination date of the Statewide Suicide Prevention Council to June 30, 2013. Suicide is a very serious public health concern in Alaska, particularly among young males and the Alaska native population. Extension of the Statewide Suicide Prevention Council is important in curtailing this avoidable loss of life. The mission of the Statewide Suicide Prevention Council is to advise the governor and the legislature on issues relating to suicide. In collaboration with communities, faith-based organizations, and public-private entities, the Council works to improve the health and wellness of Alaskans by reducing suicide and its effect on individuals and communities.

By statute the Statewide Suicide Prevention Council consists of 15 members, 11 appointed by the governor and four by the Legislature. The governor appoints two executive branch state employees; one member of the Advisory Board on Alcoholism and Drug Abuse; one member of the Alaska Mental Health Board; a designee from the Alaska Federation of Natives, Inc.; a counselor in a secondary school; an adult active in a statewide youth organization; a person who has experienced a family member's death by suicide; one person who resides in a rural community not connected by a road or Alaska marine highway to the state's main road system; a member of the clergy; and a youth under 18. The senate president appoints one majority member of the Senate; the speaker of the House appoints one majority member and one minority member of the House.

The council serves in an advisory capacity to the Legislature and governor with respect to what actions can and should be taken to improve health and wellness throughout the state by reducing suicide and its effect on individuals, families and communities; broaden the public's awareness of suicide and the risk factors related to suicide; enhance suicide prevention services and programs throughout the state; develop healthy communities through comprehensive, collaborative, community-based approaches; develop and implement a statewide suicide prevention plan; and strengthen existing and build new partnerships between public and private entities that will advance suicide prevention efforts in the state.

I urge your support on this important piece of legislation.

Alaska State Legislature

Representative Anna Fairclough — House District 17

CS House Bill 123

"An Act extending the termination date of the Statewide Suicide Prevention Council; and providing for an effective date."

Sectional Analysis

Section 1. Amends AS 44.29.300

Changes the composition of the council by increasing the number of members from 15 to 16.

States that two members from each body of the legislature sit on the council.

Adds two members one of which shall represent the Department of Health and Social Services and one who shall represent the Department of Education and Early Development.

Changes the classification of the person in a secondary school from a counselor to an employee of a secondary school.

Adds one person who is enrolled in grades 9-12 of a secondary school in the state.

Changes the classification of a member under the age of 18 to a public member.

Section 2. Amends AS 44.29.300

Adds a new subsection that classifies the two members from each body of the legislature that sit on the council are nonvoting members.

Section 3. Amends AS 44.29.330(a)

States that the voting membership shall elect officers.

Section 4. Amends AS 44.29.340

Adds new subsection that changes the quorum requirement to seven voting members

Section 5. Amends AS 44.66.010(a)(8)

Extends the sunset date from June 30, 2009 until June 30, 2013.

Section 6. Amends AS 01.10.070(c)

Immediate effective date clause

November 4, 2008

Members of the Legislative Budget
and Audit Committee:

In accordance with the provisions of Title 24 and Title 44 of the Alaska Statutes (sunset legislation), the attached report is submitted for your review.

DEPARTMENT OF HEALTH AND SOCIAL SERVICES
STATEWIDE SUICIDE PREVENTION COUNCIL
SUNSET REVIEW
November 4, 2008

Audit Control Number
06-20055-08

The review was conducted as required by AS 44.66.050 and under the authority of AS 24.20.271(1). Currently, under AS 44.66.010(a)(8), the Statewide Suicide Prevention Council (council) is scheduled to terminate on June 30, 2009. We recommend the legislature extend the termination date of the council until June 30, 2013.

Four of the fifteen voting members of the council are legislators. Since the Legislative Audit Division is part of the legislative branch, our agency does not meet the independence standard required by generally accepted government auditing standards. Therefore, we are disclosing our lack of adherence to the independence auditing standard.

Except for the independence standard discussed above, the audit was conducted in accordance with generally accepted government auditing standards. Those standards require that we plan and perform the audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides a reasonable basis for our findings and conclusions based on our audit objectives. Fieldwork procedures utilized in the course of developing the findings and discussion presented in this report are discussed in the Objectives, Scope, and Methodology.

Statewide Suicide Prevention Council	23

OBJECTIVES, SCOPE, AND METHODOLOGY

In accordance with Titles 24 and 44 of the Alaska Statutes, we have reviewed the activities of the Statewide Suicide Prevention Council (SSPC or council) to determine if there is a demonstrated public need for its continued existence and if it has been operating in an efficient and effective manner.

As required by AS 44.66.050(a), the legislative committee of reference shall consider this report as part of the oversight process in determining if the termination date of the council should be extended. State law currently specifies SSPC will terminate on June 30, 2009. If no action is taken by the legislature, the council will have one year from that date to conclude its administrative operations.

Objectives

The three central, interrelated objectives of our report are:

1. To determine if the termination date of the council should be extended.
2. To determine if the council is operating in the public interest.
3. To provide a current status on the recommendations made in the prior report.

Our assessment of the operations and performance of the council was based on criteria set out in AS 44.66.050(c). Criteria set out in this statute relate to the determination of a demonstrated public need for the council.

Scope and Methodology

Auditors and audit organizations are required to be independent in both fact and appearance to the entities being audited. Audit organizations are presumed to be organizationally independent per generally accepted government auditing standards under various situations. One of those situations, which is applicable to the Division of Legislative Audit, is when the,

> *. . .audit organization is in a different branch of government within the same level of government as the audited entity; for example, legislative auditors auditing an executive branch program.*

The Division of Legislative Audit does not meet the organizational independence requirements because four of the fifteen voting members of SSPC are members of the Alaska State Legislature. Readers of this report may not view the conclusions, findings, and

recommendations as impartial because of the lack of organizational independence. Nevertheless, we conducted the audit of SSPC as required by AS 24.20.271 and AS 44.66.050.

Our audit reviewed the operations and activities of the council from FY 05 through FY 08.

During the course of our examination, we reviewed and evaluated the following:

- Applicable statutes and regulations.
- Budget documents, session laws, and other legislative information related to the council's operations.
- Council meeting minutes, bi-laws, and website.
- Annual reports to the legislature and governor.
- Financial reports from the State Accounting System.
- The *Statewide Suicide Prevention Plan.*
- Alaska Injury Prevention Center's follow-back studies to the council.
- Other documents related to the council's operations and mission, as necessary.

In addition, we interviewed:

- Various SSPC members, SSPC coordinators, and staff under the Department of Health and Social Services.
- Board members, executive directors and other staff of the Alaska Mental Health Trust Authority (AMHTA), Alaska Mental Health Board (AMHB) and Advisory Board on Alcoholism and Drug Abuse (ABADA).

We also attended the following meetings:

- May 5-6, 2008 meeting of SSPC.
- June 13, 2008 meeting of representatives from SSPC, Division of Behavioral Health, Division of Senior and Disability Services, the Alaska Commission on Aging, AMHTA, ABADA, AMHB, and the Governor's Council on Disability and Special Education.
- June 17, 2008 SSPC teleconference for a working session on the revision of the Suicide Prevention Plan.

ORGANIZATION AND FUNCTION

Under AS 44.29.350, the Statewide Suicide Prevention Council (SSPC or council) is charged with advising the legislature and the governor on,

> *...actions that can and should be taken to improve health and wellness throughout the state by reducing suicide and its effect on individuals, families, and communities.*

In addition to this advisory role, the council's activities include planning, coordinating, educating, training, and providing technical support on the prevention of suicide.

The council consists of 15 members. There are two senators, two representatives, two executive branch employees, and nine public members. The senate seats and the representative seats are appointed by the president of the senate and the speaker of the house, respectively. The executive branch and public seats are appointed by the governor.

Exhibit 1

Council Members
As of September 30, 2008

Officers:
- Brenda Moore, Public, Chair
- Pat Donelson, Public, Chair-Elect
- Renee Gayhart, DHSS, Treasurer

Other Members:
- Charles Jones, Public
- Celena Powder, Public
- William Martin, Public
- Bernard Gatewood, Public
- Vacant, Public
- Vacant, Public
- Vacant, Public
- Bill Hogan, DHSS
- Johnny Ellis, Senate
- Kim Elton, Senate
- Woodie Salmon, House
- Reggie Joule, House

Alaska Statute 44.29.300 specifies the public seats be filled by,

> *...one member of the Advisory Board on Alcoholism and Drug Abuse; one member of the Alaska Mental Health Board; one person recommended by the Alaska Federation of Natives, Inc.; one person who is a counselor in a secondary school; one adult who is active in a statewide youth organization; one person who has experienced the death by suicide of a member of the person's family; one person who resides in a rural community in the state that is not connected by road or the Alaska marine highway to the main road system of the state; one person who is a member of the clergy; and one person who is under the age of 18.*

Except for the members of the House of Representatives who serve two years, council members serve staggered four-year terms.

The council is staffed by a coordinator, who, by statute, is employed by the council and directly responsible to the council. As of July 1, 2008, the coordinator is the project manager for the Prevention and Early Intervention section. The coordinator is employed for the council on a part-time basis and is assisted by a project coordinator from the same division.

The council receives administrative assistance from the Department of Health and Social Services.

REPORT CONCLUSIONS

Under AS 44.66.010(a)(8), the Statewide Suicide Prevention Council (SSPC or council) will terminate on June 30, 2009. If the legislature does not take action to extend the termination date, the council will have one year to administratively conclude its affairs.

Alaska Statute 44.29.350 defines the purpose of the council.

> *The council shall serve in an advisory capacity to the legislature and the governor with respect to what actions can and should be taken to...*

The statute continues, listing the six areas where the council should advise the legislature and the governor. In addition to advising the legislature through testimony to the House and Senate Committees, the council has taken on a direct role in various areas. These areas include broadening the public awareness of suicide and the related risk factors, the development of a statewide suicide prevention plan, and other examples which are discussed in more detail in the Analysis of Public Need section of this report.

Suicide remains a major public health problem in Alaska. Over the last seven years, the crude rate[1] for suicide has ranged from over 16 to 23, while the national average crude rate for suicide was 11 in 2005[2].

Exhibit 2

Suicides of Alaska Residents By Year*

	Year of Death						
	2001	**2002**	**2003**	**2004**	**2005**	**2006**	**2007**
Deaths	103	131	123	154	127	132	146
Crude Rate	16.3	20.5	19	23.4	19.1	19.7	21.6

*2006 and 2007 data is still provisional and subject to change.

Source: Alaska Bureau of Vital Statistics

In addition to the rate of suicide being significantly higher than the national average, the profile of those committing suicide is also substantially different. In national statistics, elderly individuals are more likely to commit suicide; in Alaska, suicide is most commonly committed by individuals in their 20s. Suicide rates in Alaska are also disproportionately high in the native population.

[1] Crude rate is the number of suicides per 100,000 population.
[2] USA Suicide: 2005 Official Final Data, from American Association of Suicidology on its website, http://www.suicidology.org.

4556

In developing our conclusion on whether SSPC's termination date should be extended, we evaluated SSPC's operations using the 11 factors set out in AS 44.66.050(c) to determine if the council has demonstrated a public need for its continued operation.

We found no direct correlation between the activities of the council and the change in the suicide rate for any particular year. However, given that the council's role is primarily advisory and suicide is a public health concern that is often linked with mental illness and substance abuse, both which are long term health issues, it is unlikely that a direct identifiable correlation will ever be clearly visible.

However, through the efforts of the council we have seen a broader and more public acknowledgement of the problem of suicide in Alaska. We saw the council responding to communities by working to revise the statewide suicide prevention plan, making it less clinical and more user-friendly. The council and the Department of Health and Social Services, Division of Behavioral Health (DHSS, DBH) have proposed an initiative to develop a cross-disciplinary, community-driven, and research-based approach to reducing the number of deaths by suicide in Alaska. A Suicide Prevention Strategy and Implementation Plan will be available to the legislature by December 15, 2008.

Overall, we found that the council is operating in the public interest and spearheading efforts that are necessary to address the public health concern of suicide. Therefore, we recommend the legislature extend the termination date of the council to June 30, 2013.

The four year extension is recommended because of the following issues:

- At the end of FY 08, the council was organizationally aligned with the Prevention and Early Intervention section, Division of Behavioral Health. A key to enhancing the effectiveness of the council is a good working relationship between the council and DBH, each focused on its own mission – coordinating but not duplicating. A limited extension will allow for a reevaluation of whether the closer alignment with DBH has impeded the independent voice of the council.

- Secondly, the membership requirements for appointment to the council make it difficult to fill all the seats and to ensure sufficient participation to meet quorum requirements. Again, a limited extension will allow a timely reexamination of this problem.

These issues are more fully discussed in the Findings and Recommendations section of this report.

FINDINGS AND RECOMMENDATIONS

Recommendation No. 1

The Statewide Suicide Prevention Council (SSPC or council) should, in accordance with statutes, appoint its own coordinator and perform annual performance reviews.

Effective July 1, 2008, the Department of Health and Social Services (DHSS) assigned SSPC coordinator responsibilities to the Prevention and Early Intervention section[3] manager in the Division of Behavioral Health (DBH). This SSPC coordinator appointment was not made in accordance with the statutes and appears to diminish SSPC's autonomy and independent voice with the governor and legislature. Also, the coordinator may be placed in a position with potentially conflicting responsibilities between the council and DBH.

DHSS' decision was based on department personnel resource needs and a desire to align the activities of the council and the section.

The hiring, supervision, and evaluation of the SSPC coordinator are part of the council's rights and responsibilities per the statutes.[4] DHSS has traditionally assisted the council with the coordinator's selection. However, SSPC was not involved in the latest selection. Also, the council has not annually evaluated the coordinator's performance for at least the past four years. Neglecting these statutory requirements may have diminished the council's ability to maintain an independence voice.

We recommend the council either accept the current coordinator through a formal vote or initiate actions to hire a new coordinator. In addition, it is critical that the council conduct annual performance evaluations as required by statute, particularly if the coordinator is a DBH employee. Only through the council's interest in remaining autonomous can its independent voice be assured.

Recommendation No. 2

The legislature should consider modifying the composition of council membership.

During FY 05 – FY 08, there were excessive vacancies on the council and significant absences by council members at its meetings. Additionally, those being appointed to the

[3] Prevention and Early Intervention is the section responsible for DHSS programs that address suicide prevention.
[4] Alaska Statute 44.29.330(b) states,

> *The council may employ a coordinator to assist the council. The coordinator is in the partially exempt service. The coordinator shall be directly responsible to the council in the performance of the coordinator's duties. The council shall annually review the performance of the coordinator.*

council did not always meet the statutory qualifications for the position. Exhibit 3 illustrates the extent of vacancies and absences over the last four years.

Exhibit 3

Statutory Qualifications	Do incumbents meet the qualifications	Rate of attendance at SSPC meeting FY 05 – FY 08
Four legislator seats: Senate majority member Senate minority member House majority member House minority member	 Yes No No Yes	Overall 15%
Two persons employed by the executive branch of state government	Yes	Overall 73%
A member of the Advisory Board on Alcoholism and Drug Abuse	Yes	60%
A member of the Alaska Mental Health Board	Yes	100%
A person recommended by the Alaska Federation of Natives, Inc.	Yes	100%
A person who is a secondary school counselor	No[5]	80%
A person who is an adult and active in statewide youth organizations	Yes	73%
A person whose family has experienced death by suicide	Vacant[6]	33%
A person who lives in a rural community – not connected by either the road system or the marine highway	Vacant[7]	0%
A member of the clergy	Yes	93%
A person under the age of 18	Yes	33%
Overall Average[8]		**54%**

The composition of the council's membership is established in AS 44.29.300 and includes very specific qualifications which have created difficulties in filling the positions. Vacancies combined with low attendance rates make it difficult for the council to establish a quorum at its meetings.

The legislature should consider changes to AS 44.29.300 to broaden the qualifications of council members to ensure that appointees are interested in the work of the council and can

[5] The current incumbent is a secondary school principal.
[6] This position has been vacant since November 2005.
[7] This position has been vacant for more than 3 of the 4 years between FY 05 and FY 08.
[8] This average includes one member appointed to the council that does not meet any of the statutory criteria. This member's attendance over the last 4 years has been at 87%.

make the time commitment necessary to serve. Additionally, consideration should be given to making legislative members non-voting to prevent potential quorum issues.

Current Status of Prior Audit Recommendations

Prior Recommendation No. 1

The Division of Behavioral Health Community-based Suicide Prevention Program coordinator should ensure prevention programs conform to the statewide suicide prevention plan .

Current Status
This recommendation is no longer an issue. Starting in FY 06, the State has followed a national trend to provide grants on a more comprehensive programmatic basis. Grant funds are awarded in a way that allows communities to focus the funds according to local priorities, rather than awarding separate grants for mental health, substance abuse, or suicide programs.

Additionally, the council has undertaken a rewrite of the statewide suicide prevention plan to make it more user-friendly, so Alaskan communities can better use the plan in developing their grant activities and community plans.

Prior Recommendation No. 2

The administrative manager for Department of Health and Social Services Boards and Commission and the Statewide Suicide Prevention Council coordinator should develop a more formalized information system of reporting financial information to the council.

Current Status
This recommendation has been resolved. Council members are receiving budget and financial reports as part of their meeting packets.

Prior Recommendation No. 3

The council should ensure it provides public notice of all council meetings as required by Alaska Statute 44.62.310.

Current Status
This recommendation has been resolved.

Prior Recommendation No. 4

The Office of the Governor should make appointments to the council in a timely manner.

Current Status
Appointments to the council continue to be a problem. See current Recommendation No. 2.

(Intentionally left blank)

4561

ANALYSIS OF PUBLIC NEED

The following analysis of commission activities relates to the public need factors defined in the sunset law, AS 44.66.050. This analysis was not intended to be comprehensive, but to address those areas we were able to cover within the scope of our review.

Determine the extent to which the board, commission, or program has operated in the public interest.

To assess whether the Statewide Suicide Prevention Council (SSPC or council) has operated in the public interest, we measured the council's activities against objectives set out by the legislature for SSPC in state law, at AS 44.29.350.[9] From our review of council activities, we conclude SSPC has reasonably addressed its statutory objectives.

The council, as an advisory body, has made presentations to the House and Senate Committees on Health, Education and Social Services. Additionally, they provide the legislature and the governor with the council's annual report.

The council also actively participates in the six areas in which they are intended to advise the legislature and the governor. The following discussion describes the council's areas of active participation:

1. Actions to be taken to improve health and wellness by reducing suicide.

   During FY 08, the council, in partnership with Department of Health and Social Services, Division of Behavioral Health (DHSS, DBH), proposed the Alaska Suicide Prevention Initiative to the governor and the legislature. The initiative proposed developing a cross-disciplinary, community-driven and research-based approach to reduce the number of deaths by suicide in Alaska. The initiative addressed potential activities from FY 09 through FY 13. The FY 09 budget included an increment dedicated to the development of the Suicide Prevention Strategy and Implementation Plan, which is to be completed by December 15, 2008.

---

[9] Alaska Statute 44.29.350 states,

The council shall serve in an advisory capacity to the legislature and the governor with respect to what actions can and should be taken to (1) improve health and wellness throughout the state by reducing suicide and its effects on individuals, families, and communities; (2) broaden the public's awareness of suicide and the risk factors related to suicide; (3) enhance suicide prevention services and programs throughout the state; (4) develop healthy communities through comprehensive, collaborative, community-based and faith-based approaches; (5) develop and implement a statewide suicide prevention plan; and (6) strengthen existing and build new partnerships between public and private entities that will advance suicide prevention efforts in the state.

2. Increasing public awareness of suicide and the related risk factors.

The council has become increasingly diligent in this area. The council continues to maintain a website[10] that provides suicide statistics, risk factors, and prevention. Additionally, the website provides links to resources such as the council's annual reports and statewide suicide prevention plan.

The council participated in many conferences and workshops during FY 05 through FY 08, making presentations or providing information displays. The council also purchased and distributed items such as pens, pencils, magnets, and posters to those needing support for suicide prevention related functions.

In 2006 the council initiated the "Live Your Dream" bracelet campaign which targets the State's youth population. This has been viewed as particularly popular and successful in spreading suicide awareness.

The council has contributed to the "YOU KNOW ME" media campaign which focuses on suicide prevention awareness. The Alaska Mental Health Trust Authority (AMHTA) has sponsored the council in this endeavor since 2005.

3. Enhance suicide prevention services and programs throughout the State.

Overall, the council enhances suicide prevention services and programs by directly providing information or providing direction to other knowledgeable sources. Throughout the year, the council receives two to three requests per week for information or technical assistance. Their web site generates questions from the public and other organizations who then request informational materials from the council. As appropriate, they also provide studies, DVDs, books, and other materials on suicide and suicide prevention.

Other examples of SSPC's enhancement of suicide prevention services include:

- Involvement in the certification of Careline[11] and DBH's targeted gatekeeper training.[12]

- Having the Careline phone number placed in phone books across the State.

[10] http://health.hss.state.ak.us/suicideprevention/default.htm
[11] Careline is Alaska's statewide toll-free crisis intervention and assistance hotline.
[12] DBH has contracted for the development of a training curriculum specific to Alaska. Gatekeepers are individuals who have face-to-face contact with large numbers of people in their community. The council's role in the initiative is to review the developed curriculum and provide feedback.

- Sponsoring travel for communities that needed assistance to attend gatekeeper training.

- Providing funds which allowed the Careline project manager, the Boys & Girls Club representative, and the Survivor Group representative to attend the American Association of Suicidology Conference in 2006.

4. Develop healthy communities though comprehensive, collaborative, community-based and faith-based approaches.

   The council has maintained faith-based partnerships through some SSPC members' participation in faith-based organizations. Other community approaches have included:

   - Sponsoring an Alaska State Council on the Arts workshop in Bethel to orient artists and arts organizations to programs, resources, and grant opportunities.

   - Providing a liaison to assist grassroots community members as they researched and established a nonprofit organization whose mission is suicide prevention, awareness, and support of the survivors.

   - Providing technical support to community programs providing suicide prevention services via research, best practices updates, referral resources, training, and conference opportunities.

   - Recommending the Boys & Girls Clubs' staff development director receive training and certification as a gatekeeper[13] trainer.

5. Develop and implement a statewide suicide prevention plan.

   SSPC completed its first statewide plan in 2004, and it followed the format of the National Strategy for Suicide Prevention and existing plans from other states. However, communities did not find the plan user-friendly in providing guidance in aligning their grant activities and community plans with the statewide plan. The council is now revising the statewide plan to make it more relevant to the granting process for the Comprehensive Behavioral Health Prevention and Early Intervention Services grants.

6. Collaborating on planning activities with other related agencies.

   In 2005 SSPC established a memorandum of agreement (MOA) with the Advisory Board on Alcoholism and Drug Abuse (ABADA), the Alaska Mental Health Board (AMHB), and DHSS. In 2006 an MOA was established with AMHTA. The purpose of the MOAs is coordination and collaboration to achieve the best outcomes for their targeted

[13] See footnote 12 for more information about gatekeepers.

beneficiaries. Their websites are interlinked and these entities participate in reciprocal reporting.

Other boards that SSPC collaborates with include Alaska Commission on Aging, Alaska Brain Injury Network, Governor's Council on Disabilities and Special Education, Faith-Based and Community Initiatives, and Division of Behavioral Health. While there is reciprocal reporting between these boards, MOAs have not yet been established.

Determine the extent to which the operation of the board, commission, or agency program has been impeded or enhanced by existing statutes, procedures, and practices that it has adopted, and any other matter, including budgetary, resource, and personnel matters.

SSPC has not operated in strict compliance with the statutes in regards to the composition of the council and some personnel matters. Specifically:

1. SSPC was not involved in hiring its latest coordinator, a position directly responsible to the council; nor has the council reviewed the coordinator's performance for any of the past four years. These are requirements stated in AS 44.29.330. At least in appearance, these moves could impede the council's independence and autonomy when advising the legislature and the governor. (See Recommendation No. 1)

2. Some council members either do not meet the positions' requirements as presented in the statutes or have excessive absences from the board meetings and other SSPC activities. (See Recommendation No. 2)

Exhibit 4

Schedule of Operating Expenditure and Funding Sources
(Unaudited)

	FY 05	FY 06	FY 07	FY 08
Expenditures				
Personal Services	$ 18,300	$ 26,028	$ 22,307	$ 35,915
Travel	23,847	32,636	41,155	51,072
Services	33,335	37,515	19,821	18,205
Commodities	14,383	6,336	8,461	2,142
Total Operating Expenditures	$ 89,865	$ 102,515	$ 91,744	$ 107,334
Funding Sources				
General Fund Appropriations	$ 89,865	$ 102,515	$ 91,744	$ 107,334
Total Funding	$ 89,865	$ 102,515	$ 91,744	$ 107,334

Determine the extent to which the board, commission, or agency has recommended statutory changes that are generally of benefit to the public interest.

The council has not pursued any statutory changes.

Determine the extent to which the board, commission, or agency has encouraged interested persons to report to it concerning the effect of its regulations and decisions on the effectiveness of service, economy of service, and availability of service that it has provided.

The council provided public notices to all but one of their meetings. However, public comment periods occurred during all of the meetings. The council has conscientiously made efforts to conduct at least one of their four meetings in a remote location such as Bethel, Kotzebue, and Sitka. They have held three town hall meetings, usually following one of their regularly scheduled meetings. Additionally, the public has the opportunity to contact the council, through its website, to offer feedback and request information.

Determine the extent to which the board, commission, or agency has encouraged public participation in the making of its regulations and decisions.

Under AS 44.29.350, the council has developed and implemented a statewide suicide prevention plan. The existing plan is currently under major revision to increase its usability. The council has requested input from participants outside the council such as the grantees, gatekeepers,[14] and members of other boards. Once the plan has been approved by the council, it will be sent out for public testimony. Further revisions, as a result of public testimony, may be made before its release.

Determine the efficiency with which public inquiries or complaints regarding the activities of the board, commission, or agency filed with it, with the department to which a board or commission is administratively assigned, or with the office of victims' rights or the office of the ombudsman have been processed and resolved.

Neither the Office of the Ombudsman nor the Office of Victim's Rights reported any complaints filed with them regarding SSPC.

Determine the extent to which a board or commission that regulates entry into an occupation or profession has presented qualified applicants to serve the public.

This criterion is not applicable since SSPC does not regulate any occupations or professions.

Determine the extent to which state personnel practices, including affirmative action requirements, have been complied with by the board, commission, or agency to its own activities and the area of activity or interest.

Nothing in our review of the council indicated that there were any complaints involving SSPC personnel practices.

[14] See footnote 12 for more information about gatekeepers.

Determine the extent to which statutory, regulatory, budgeting, or other changes are necessary to enable the agency, board, or commission to better serve the interests of the public and to comply with the factors enumerated in this subsection.

As discussed in Report Conclusions, we recommend the council be continued. However, in Recommendation No. 1, we also suggest that the appointment of the council's coordinator be approved by the council and annual performance reviews of the coordinator's performance should be conducted as set out in statute. This is important for SSPC to maintain its autonomy in the future for advising the legislature and governor. Due to personnel resource concerns and the desire for closer alignment between the council and DBH, DHSS has organizationally moved the administration of the council to DBH, specifically the Prevention and Early Intervention section. It is essential that DHSS and the council develop means to assure the council maintains an independent voice.

As discussed in Recommendation No. 2, the council should ensure that appointed members meet the qualifications of AS 44.29.300. We suggest the legislature consider broadening the qualifications for membership to ensure sufficient qualified and interested individuals are available and willing to serve on the council.

Determine the extent to which the board, commission, or agency has effectively attained its objectives and purposes and the efficiency with which the board, commission, or agency has operated.

The council established performance measures which are detailed in the annual reports to the legislature. For the FY 08 annual report, the measures were:

- Reduction of the three-year average rate of Alaska suicides.

  SSPC has been unable to achieve this objective at this time. During FY 08, the council has partnered with DHSS, DBH in an initiative, attempting to accomplish this by FY 13.

- Review and update the statewide suicide prevention plan.

  SSPC members are currently reviewing the plan with the objective of making it more relevant to the granting process for the Comprehensive Behavioral Health Prevention and Early Intervention Services grants.

- Consistently review data to identify trends, make analyses, and provide recommendations regarding suicide prevention, education and services needed in the State.

  The Follow-Back Study, which presented Alaska suicide data and analysis for the period from September 1, 2003 through August 31, 2006, was received by SSPC in February 2007. The council has and continues to use this study to make recommendations to the legislature, executive branch agencies, and the public.

- Support and assist Alaskans in starting a state Suicide Prevention Awareness Network (Network).

  The council supported the Alaska Suicide Prevention Action Coalition (ASPAC) in its research into becoming a Network affiliate. Although the Coalition decided to incorporate and maintain its autonomy, its goals are similar to the Network and further the goals of the council.

- Increase the number of communities that can recognize the warning signs of suicide through increasing the number of community-based suicide prevention grantees who align their community funding with the statewide suicide prevention plan.

  The Prevention and Early Intervention section gave comprehensive prevention grants to communities for the FY 06 - FY 08 three-year grant cycle. A comprehensive prevention grant can be used to address any alcohol, drug, mental health, or suicide related issue. Since none of the grants during this grant cycle were specifically for suicide prevention, no tracking was done to determine whether grantees aligned their funding with the statewide plan. As comprehensive prevention grants continue to be made by DBH, the council should revise this performance measure.

Determine the extent to which the board, commission, or agency duplicates the activities of another governmental agency or the private sector.

The Statewide Suicide Prevention Council mission overlaps with other state entities such as the Alaska Mental Health Board, the Advisory Board on Alcoholism and Drug Abuse, and the Alaska Mental Health Trust Authority. However, the council was established to bring attention and focus, specifically, to the suicide issue in Alaska, so overlapping missions are to be expected.

While the council actively collaborates with various other boards and commissions with related missions, there does not appear to be any duplication of activities between the council and these other governmental agencies or in the private sector.

LEGISLATIVE AUDIT

Pat Davidson
Legislative Auditor
Alaska State Legislature, Division of Legislative Audit
PO Box 113300
Juneau, AK 99811-3300

Dear Ms. Davidson:

Thank you for this opportunity to provide a written response to the *Preliminary Audit Report on the Statewide Suicide Prevention Council, Sunset Review, November 4, 2008.* I have reviewed the report and offer the following comments.

First, we appreciate your staff's careful attention to detail and the thorough nature of the audit process, including the many interviews and opportunities for individuals to be heard and to voice their opinions. Suicide is a critical social issue for the State of Alaska and the Statewide Suicide prevention Council (SSPC) has a significant responsibility to find strategies and solutions to begin reducing the rate of suicide throughout our state.

As stated in the audit report, the SSPC has recently undergone a significant change in location within the department and in their staff coordination. Beginning July 1, 2008, the SSPC is now under the direction of the Division of Behavioral Health, section of Prevention & Early Intervention Services. The reason for this change of location was to allow for better coordination of statewide suicide prevention efforts between the SSPC and Behavioral Health and to promote a more seamless and coordinated approach to suicide prevention in Alaska. While this transition is complete, the SSPC members and Behavioral Health staff are continuing to define and develop their relationship and structure. We are confident this change will accomplish its intended purpose and provide for better statewide alignment in issues related to suicide prevention.

The Department of Health and Social Services (DHSS) supports and agrees with the audit findings and recommendations. We are pleased with the recommendation to extend the SSPC for four more years, with a new sunset date of June 30, 2013. We believe the DHSS and the SSPC are at a critical juncture to make significant progress in reducing and preventing suicide in Alaska. DHSS, in partnership with the council and others, recently received a 3-year federal Garrett Lee Smith Youth Suicide Prevention grant to focus on developing regional strategies to 'turn the corner' on suicide data. In addition, with one-time funding from the FY08 Legislature, we are offering regional suicide prevention planning grants focusing on those regions of Alaska with the highest rates of suicide. It is our intent that these planning grants will become the foundation of the Statewide Suicide Prevention Initiative, a joint effort of the DHSS and the Council. The four (4) year extension will allow these projects to become embedded in our statewide strategy and to develop sustainability of community/regional efforts.

In response to the other two recommendations, again we are in agreement with the findings and recommendation, with the following comments and suggestions.

Recommendation No. 1:

The Statewide Suicide Prevention Council should, in accordance with statues, appoint its own coordinator and perform annual performance reviews.
With the change in location of the SSPC to the Division of Behavioral Health, and the departure of Kathryn Craft as Coordinator, interim decisions were made with minimal input from the council. One decision was to have two current Behavioral Health staff share the role of providing support to the council. L. Diane Casto, Section Manager and James Gallanos, Project Coordinator, are currently sharing the task of providing staff support to the council. It was never the intent that these two staff would be the Council Coordinator, but would be available to provide support and guidance as requested from Council Chairperson Brenda Moore.

Due to limited funding, there are not enough funds for a full-time coordinator, and in fact, Ms. Craft provided approximately .25 FTE services to the council. At the most recent SSPC meeting in September, and again during a November telephonic executive work session of the council , it was decided that the personnel money available in the SSPC budget will be used to hire a . 50 FTE Project Assistant, hired by the council, to provide day-to-day support. We are beginning the process to reclass the current Position Control Number (PCN) previously assigned to Ms. Craft. Once completed, we will begin the solicitation and hiring process, with input and direction from the council. The position will be located in the Juneau offices of the Division of Behavioral Health.

We also support the audit recommendation for the council to conduct annual evaluations of the council staff person and will provide assistance as requested.

Recommendation No. 2:

The legislature should consider modifying the composition of council membership.

As stated in the audit, there have been "excessive vacancies on the council and significant absences by council members at its meetings. "In addition, it is noted that "those being appointed to the council did not always meet the statutory qualifications for the position." We agree with both of these conclusions and support the recommendation to consider modifying the composition of the council membership.

In July, when the SSPC came into the Division of Behavioral Health, section of Prevention & Early Intervention Services, Ms. Casto began a dialogue with the Director of Boards and Commissions about the current vacancies and how best to recruit and/or encourage applications to fill these positions. Through this process, it became evident that the current membership did not directly meet the statutory qualifications for council membership. Discussions with the office of Boards and Commissions continue with DBH staff to make sure vacant positions are

filled in a timely manner and that applicants meet the statutory requirements. The office of Boards and Commissions is currently reviewing a number of applications for SSPC membership.

In addition, at the September meeting of the SSPC, there was a discussion about these current qualifications or categories of representation, and the council agrees that some modifying of the council composition would be beneficial. Providing more flexibility and broader definitions (i.e. expanding a secondary school counselor to a school counselor or K-12 school personnel) would allow for a larger pool of potential candidates.

Another area that has concerned the council is the large number of legislators required as council members. While the council is not concerned with having legislative representation and in fact supports their membership, it is difficult for legislators to be available for meetings, creating difficulty having a quorum for conducting council business. As reported in the audit, legislative members have attended meeting 15% of the time over the last 4 years.

With the challenges the current statutory qualifications have created, the DHSS supports the recommendation to modify the membership and, upon request, will work with the council to develop broader and more flexible categories of representation for possible legislative action.

I want to thank you for the opportunity to review and respond to the preliminary audit report. We support the work of the Legislative Audit team, and believe your recommendations will strengthen the Statewide Suicide Prevention Council, the collaboration with Behavioral Health, and the council outcomes.

Please do not hesitate to contact me if you have questions or would like additional information.

Sincerely,

William H. Hogan
Commissioner

NOV 3 0 2008
LEGISLATIVE AUDIT

From: Statewide Suicide Prevention Council
Brenda Moore, Chair

Re: Department of Health and Social Services
Statewide Suicide Prevention Council, Sunset Review, November 4, 2008

November 28, 2008

Recommendation No. 1

The Statewide Suicide Prevention Council (SSPC or council) should, in accordance with statutes appoint its own coordinator and perform annual performance reviews.

During an executive session, Nov. 24, 2008, the council discussed hiring a part-time coordinator to work in conjunction with the Division of Behavioral Health, Office of Prevention and Early Intervention manager and prevention specialist that currently provides administrative support to the council. There was consensus among council members that it could develop its own goals and implementation plans with input and assistance from its current administrative support staff. A coordinator is needed to organize and carry out operational activities necessary to support the council in achieving its goals. The council determined to form a committee to review the budget and job classification in order to hire a coordinator. A performance review schedule and procedure will also be established.

Recommendation No. 2

The legislature should consider modifying the composition of council membership.

The council is in agreement with the recommendation to broaden the qualifications of council members to ensure that appointees are interested in the work of the council and can make the time commitment necessary to serve. In addition the council agrees to the recommendation that consideration should be made to making legislative members non-voting to prevent potential quorum issues.

or stay and fight.

Just two sheds were destroyed in the Melbourne suburb of Belgrave South before the fire threat eased Monday, but the panic showed how jittery Australians wait out the latest emergency.

At least two new fires broke out in southern Victoria state, where temperatures soared into the mid-80s Fahrenheit (low 30s Celsius) and strong, gusty winds dropped.

The confirmed death toll was increased to 210 early today, and was expected to rise as more remains were identified from the ruins.

we have ended the black wind (of violence) and have started the reconstruction process," al-Maliki told hundreds of officials as Iraqi soldiers with red berets stood guard.

Sam and Gayle Trivette, advocates, long time Alaskans, retired public employees.

Like too many Alaskans, we lost a son to suicide.

YOU KNOW Us...

He was home from college for the summer. He had a wide network of friends. He was so loved. But in retrospect, we realized he had battled depression since high school.

Our loss has led us to suicide prevention efforts. We don't want other parents, or anyone, to feel this wrenching heartbreak. We've joined our community task force (juneausuicideprevention.org.) to get out the word: signs someone's considering suicide, risk factors, how to talk to them, where to get help.

The Statewide Suicide Prevention Council website has even more information.

Alaska needs:

- A committed person to take initiative, a core leadership group and active volunteers
- A partnership involving multiple levels of the community
- Support from school district administrations
- A foundation of mental health, substance abuse and emergency/crisis services
- Training, knowledge of best practices and materials
- A plan with realistic goals and strategies
- Appropriate funding
- Media focus on the issue

(adapted from June 2004 Group Health Community Foundation Evaluation)

"Suicide prevention work must come from (and out of) the community."

Bethel Town Hall meeting participant, May 2005

RISK FACTORS THAT A PERSON MIGHT BE SUICIDAL

Talks about suicide — seriously or "just kidding."

Has attempted suicide before.

Has trouble eating or sleeping.

Prepares for death — makes out a will and final arrangements.

Gives away prized possessions.

Has had recent severe losses; lost someone to suicide

Drastic changes in behavior.

Withdraws from friends, social activities.

Loses interest in hobbies, work, school.

Takes unnecessary risks.

Loses interest or dramatic change in personal appearance.

Increases use of alcohol or drugs.

Council — Historical Overview

By statute the Statewide Suicide Prevention Council consists of 15 members, 11 appointed by the governor and four by the Legislature. The governor appoints two executive branch state employees; one member of the Advisory Board on Alcoholism and Drug Abuse; one member of the Alaska Mental Health Board; a designee from the Alaska Federation of Natives, Inc.; a counselor in a secondary school; an adult active in a statewide youth organization; a person who has experienced a family member's death by suicide; one person who resides in a rural community not connected by a road or Alaska marine highway to the state's main road system; a member of the clergy; and a youth under 18. The senate president appoints one majority member of the Senate; the speaker of the House appoints one majority member and one minority member of the House.

The council serves in an advisory capacity to the Legislature and governor with respect to what actions can and should be taken to:

- improve health and wellness throughout the state by reducing suicide and its effect on individuals, families and communities;
- broaden the public's awareness of suicide and the risk factors related to suicide;
- enhance suicide prevention services and programs throughout the state;
- develop healthy communities through comprehensive, collaborative, community-based approaches;
- develop and implement a statewide suicide prevention plan; and
- strengthen existing and build new partnerships between public and private entities that will advance suicide prevention efforts in the state.

WAYS YOU CAN HELP

Be willing to listen.
Allow expression of feelings.
Accept the feelings.

Be nonjudgmental.
Don't lecture the value of life.

Don't dare someone to do it.

Don't be sworn to secrecy.
Connect with services specializing in crisis intervention.
Offer to accompany the person in need.

Pay attention when a person "just kids" about ending it all.

Offer hope that alternatives are available, but don't offer glib reassurances.

Take action. Remove means, such as guns or stockpiled pills.

Strong communities are an essential part of a successful prevention network.

Statewide Suicide Prevention Council Performance Measures — Fiscal Year 2007 Report on Activities

In response to the 2005 legislative Suicide Prevention Council sunset extension hearings, Council members drafted the following performance measures to guide their work over the next several years. These measures were chosen to respond directly to the legislative audit findings and, more important, to reflect the Council's concern with Alaska's high suicide rate.

1 In an effort to get Alaska off the national list of the "top ten" states with the highest suicide rates for the first time since 1991, the Statewide Suicide Prevention Council will partner with the Division of Behavioral Health to reduce the three-year average rate of Alaska suicides from 21 deaths per 100,000 population to 15 per 100,000, representing a 29 percent decrease from the current rate, over a seven-year period.

The three-year average rate for 2002–2004 = 21.1/100,000

2006	21.1	x 5%	=	1.05	=	20.1 /100,000
2007	20.1	x 5%	=	1.01	=	19.1 /100,000
2008	19.1	x 5%	=	0.95	=	18.14 /100,000
2009	18.14	x 5%	=	.91	=	17.23 /100,000
2010	17.23	x 5%	=	.86	=	16.37 /100,000
2011	16.37	x 5%	=	.82	=	15.55 /100,000
2012	15.55	x 5%	=	.78	=	14.78 /100,000

Progress. The current three-year average Alaska suicide rate for 2003–2005 is 20.86/100,000. This is a decrease from the previous three-year average of 21.1/100,000. There were 131 suicides in 2005, giving Alaska a fatality rate of 19.7/100,000. This rate is well ahead of our scheduled decreases, but it is more accurate to rely on the three-year averages due to the annual fluctuation in rates.

2 On a yearly basis, review and update the Statewide Suicide Prevention Plan as indicated by community feedback and Council members' recommendations.

Progress. Council members are currently reviewing the Statewide Suicide Prevention Plan for revisions to be made during FY07. The FY07 version will include an introductory letter from William Martin, Council chair.

4580

3 Through the Follow-Back Study and other data sources, consistently review data and information in an effort to identify trends, make analysis and forward recommendations to the department regarding prevention, education and services needed statewide. This information may assist in:

a. understanding the suicidal mind more clearly;

b. understanding who decedents thought of as "gatekeepers," (i.e., who they confided in or who may have been able to recognize the ideation);

c. designing new intervention and prevention programs to help suicidal individuals and suicide survivors;

d. bringing new money into the state to combat suicide;

e. providing a better understanding of the age groups and racial groups involved;

f. discovering and providing information on risk and protective factors that can be prevented or enhanced;

g. access and use of behavioral health services;

h. ideation communicated to others;

i. prescription medication being used; and,

j. recent encounters with law enforcement or medical staff.

Progress. The Alaska Injury Prevention Center (AIPC) and our research partners (American Association of Suicidology and the Critical Illness and Trauma Foundation) have collected data on suicides in Alaska from Sept. 1, 2003, through Dec. 31, 2006. A preliminary analysis of data from this three-year period has been completed and submitted to the Alaska Suicide Prevention Council. The final analysis and report of the Follow-Back Study (personal interviews) should be completed in February 2007.

The Alaska Injury Prevention Center presented the suicide data at an international suicide prevention conference in Durban, South Africa (September 2005); at the Alaska Health Summit (December 2005); for the Alaska Native Medical Center, Southcentral Foundation; and to several other small groups. The Follow-Back Study and data were instrumental in the formation of the Mat-Su Valley survivors group. Limited data from the study have been made available to Native health corporations for grant requests, to police chaplains, and to other groups to assist in suicide prevention or coping program design.

4 Support and assist Alaskans in starting a SPAN-Alaska (Suicide Prevention Awareness Network) affiliate. This grassroots community effort enlists the support of individuals to:

a. establish a group that will oversee the SPAN-Alaska affiliate by becoming a 501 (c) 3 nonprofit; draft Articles of Incorporation and bylaws;

b. sign up a minimum of 150 new members; and

c. develop a Survivor Support Group list,

- gather baseline data on the number of Survivor Support Groups, and

- track the increase of Survivor Support Groups.

Progress. While the grassroots community members researching the feasibility of becoming a SPAN affiliate decided not to proceed, they have continued to be active in their work toward suicide prevention and awareness and, more important, as support to other survivors of suicide. Statewide Suicide Prevention Council member Stan Tucker volunteered as liaison between the Council and these community members.

4581

5 Support the Division of Behavioral Health in its efforts to increase the number of communities that can recognize the warning signs of suicide by tracking the number of community-based Suicide Prevention grantees that align their community suicide prevention funding with the Statewide Suicide Prevention Plan by:

- **a** conducting eight community trainings on the use of the Statewide Suicide Prevention Plan; and
- **b** tracking the number of trainings provided from July 1, 2005–June 30, 2006.

Progress. The Division of Behavioral Health Request for Proposals required all grantees to align their suicide prevention efforts with the Statewide Suicide Prevention Plan. At the statewide meeting for prevention grantees (September 2006), the division created a presentation on community-based planning for implementing effective strategies aligned with the statewide plan. The Council with the division has provided two trainings on use of the statewide plan and assessing community readiness for decreasing suicide and non-lethal suicidal behaviors. These trainings took place at the Full Lives Conference (April 2006) and the Rural Behavioral Health Providers Conference (June 2006).

6 Assist the Division of Behavioral Health in its SAMHSA Garrett Lee Smith Memorial Act youth suicide prevention application, and if awarded, in its implementation.

Progress. The Council supported the state's Garrett Lee Smith Memorial Act youth suicide prevention application. Alaska's application was not awarded funding; however, some of the activities that were included in the response, such as Gatekeeper training and extending the Follow-Back Study, will continue to be funded through other avenues. It is planned to apply again at the next opportunity.

7 Provide technical assistance to Boys & Girls Clubs of Alaska statewide youth suicide prevention initiative, Project LEAD (Leadership, Education, Acceptance and Determination). Project LEAD builds protective factors in youth through academic and leadership programming, along with alcohol and substance abuse prevention programming.

Progress. Project LEAD empowers Boys & Girls Clubs Instructors to network with mental health and medical providers, school counselors, cultural leaders, churches and parents to identify and serve at-risk and in-crisis youth. In 2005, due to a lapse in essential grant funding, Project LEAD sites fell from 22 communities to 16. Prevention specialists in these communities intervened with 43 youth in crisis and tracked another 301 youth who exhibited one or more risk factors. Staff continue to seek partnership and grant support for suicide prevention efforts and continue to train front-line professionals in first-response intervention skills. Ninety-five current front-line employees are trained in suicide intervention and prevention.

The Suicide Prevention Council provides technical support to the program via research and best practice updates and referral resources, and training and conference opportunities. In April 2005, the Council sponsored the Project LEAD Coordinator's travel and registration to the National Suicide Prevention and Awareness Conference in Seattle, Wash.; and at the Council's recommendation, Boys & Girls Clubs Director of Staff Development received training and certification as a Gatekeeper Trainer.

8 Gather data from the Division of Behavioral Health on the Substance Abuse and Mental Health Services-funded Gatekeeper Training:

- **a** number of trainings held; and
- **b** number of attendees.

SSPC Performance Measures *(continued from page 5)*

Progress. From Oct. 1, 2005, to Sept. 30, 2006, implementation of Targeted Gatekeeper Training of Trainers (TOT) was completed. Phase II was completed in July 2006. Following the regional TOT's there was a follow-up meeting for all gatekeeper trainers in August to allow them to meet each other, share what is working, and discuss ideas for further expansion of the gatekeeper training program. The trainers have a listserve that enhances their ability to share and support one another.

TABLE ONE Targeted Gatekeeper Testing of Trainers Sessions

SCHEDULED FOR–2007	LOCATION	TARGET AUDIENCE	NUMBER OF PARTICIPANTS
April 21	Anchorage	Northern	7
April 21	Anchorage	Southcentral	8
April 21	Anchorage	Southeastern	8
April 21	Anchorage	Statewide	18

The Statewide Suicide Prevention Council Board members set performance measures for themselves to help them stay involved in spreading the word about the work of the Council. Some of the effort is represented above. The Statewide Suicide Prevention Plan was presented at numerous conferences, health fairs, and health entity gatherings. Board members also participated in talking to their legislators, chairing committee meetings, submitting letters to the editor and participating in suicide awareness efforts in a variety of settings. See Table Two.

TABLE TWO Council Members' Performance Measures

	SCHEDULED TASKS	ACCOMPLISHED TASKS
1	Present statewide suicide prevention plan in two public venues.	★★★★★★★ ★★★★★★ ★★★★
2	Submit two digital photographs and one written article of member or constituent activity relevant to suicide prevention awareness of activities for the legislative report.	★★★★
3	Arrange and attend at least two meetings with legislators, other than council members who are legislators, to discuss the Council's mission, activities and performance measures.	★★★★★★★
4	Submit one Letter to the Editor to a newspaper of member choice addressing suicide prevention awareness and Council activities.	★★★
5	Demonstrate meaningful participation in a statewide or worldwide suicide prevention effort (i.e., Worldwide Suicide Prevention Awareness Day, Sept.10).	★★★★
6	The above items may be substituted for leadership on a significant Council priority/project that impacts the visibility, longevity and/or financial sustainability of the Council.	★★

4585

The Council has various suicide prevention material available free of charge. Please contact Kathy Craft at

Kathryn_Craft@health.state.ak.us

if you would like to receive items that are available.

McDowell Report on the Economic Costs of Alcohol and Other Drug Abuse in Alaska, 2005 Update.

"You KNOW Me," The Alaska Mental Health Trust Authority's coordinated communication campaign, has used print, radio, and television announcements to reduce stigma and increase awareness that treatment works. The Trust also provided the Statewide Suicide Prevention Council with funds to continue statewide suicide prevention and awareness focus through their coordinated communications and advocacy work.

The Trust's daily Web site activity has significantly increased from the year prior to the campaign. Average daily visits are up 50 percent, and page views up 31 percent.

Calls to the Statewide Suicide Prevention toll-free Careline (877-266-HELP) increase when the number appears in print ads. In some months, calls have gone up from 300 to 400, coming from all over the state.

We suspect that there is similar activity on local 24-hour hotlines. (Because the lines are run by volunteers, reports are sporadic.)

4586

Fiscal 2007 Statewide Suicide Prevention Council Highlights and Accomplishments

"Live Your Dream" — Youth Prevention Focus

As part of the Live Your Dream campaign, silicone bracelets with the message "Live Your Dream" have been distributed free of charge to Alaska middle and high school youth. The positive outer message links to a resource on the inside — "To talk, call 1-877-266-HELP." The bracelets are given to schools accompanied by a letter giving ideas of prevention activities such as:

1. Government/Tribal
   a. Declare a Suicide Prevention Awareness Day or Week; the national Yellow Ribbon Week is in September each year.
      - Host a communitywide scavenger hunt for protective factors (i.e., Youth embark with a "Prevention Passport" and receive stamps from elders, health professionals, coaches, school officials, clergy and businesses).

   b. Encourage local businesses, schools and community agencies to give discounts or free items to youth wearing their bracelets during that week/day.

2. Schools/Youth Agencies
   a. Ask the high school students to arrange activities or an assembly to discuss suicide prevention.
      - Hold a "Life" cereal-eating contest for the younger students.
      - Organize a "Life" board game tournament.
      - Create a banner "Celebrating Life" with pictures of friends/families involved in healthy activities/hobbies.

3. Parents/Clergy
   a. Coordinate a "Celebration of Life" event with musicians/bands, dance, art, poetry readings/slams, or photography exhibits that support prevention.

   b. Hold a community/family night with activities and information about prevention and have bracelets available.

4587

Signs of Suicide Curriculum Evidenced-Based Model Program

The Signs of Suicide (SOS) curriculum is rated by the Substance Abuse and Mental Health Services Administration as an evidence-based Model Program. The goal of the SOS program is to teach students the action steps — ACT (Acknowledge, Care and Tell). ACT helps students develop instinctual and familiar skills to respond to signs of suicide. SOS is a school-based program that offers a curriculum to raise awareness of suicide and its related issues combined with a brief screening for depression and other risk factors. This enables students to recognize depression and suicidal thoughts and behaviors in themselves and others, and prompts them to seek assistance.

The Council has 10 copies of the SOS curriculum, five for middle-school and five for high-school ages, available for distribution to selected communities that can demonstrate they are open to the issue of suicide prevention. This is assessed by a community readiness survey, through a planning team supporting this strategy, and through letters of support from key community members who will be able to continue to offer their support through the first two years of implementation.

Because ACT enables students to better recognize depression and suicidal thoughts, each applicant must also document the availability of an on-site referral system for students who need and ask for assistance.

Where Do We Go From Here?

We believe that every Alaskan should understand that while suicide is a problem, there is something that can be done about it.

To enhance public awareness...children as young as sixth grade should be taught to recognize the warning signs for depression and suicide. They need to know how to help a friend who is exhibiting signs, and the resources for help.

Parents need to know about community resources and should be encouraged to push through obstacles to asking for help.

Clergy, community leaders, first responders, teachers and school personnel need to develop crisis plans that encourage staff to respond to suicidal behavior.

To enhance skills and knowledge of gatekeepers...all educators, physicians and health care providers need to be trained to ask directly about suicidal thoughts.

To enhance community-based safety nets... community members need to address the stigma associated with mental illness, substance use disorders and increase the accessibility of crisis resources. Communities should also support funding for community day and evening programs that provide meaningful activities.

Division of Behavioral Health Corner

The Statewide Suicide Prevention Council (SSPC), in partnership with the DBH Section of Prevention & Early Intervention Services, has targeted the reduction of suicide and non-lethal suicidal behaviors in Alaska's communities as one of its long-term outcomes. In FY06, DBH offered a three-year funding opportunity, which combined the Community-Based Suicide Prevention Program with Substance Abuse Prevention funds, FASD funding, and Youth Resiliency funds to reflect an integrated approach to these services. In all, 25 communities received funding under the umbrella of suicide prevention programming. The overall goal for all grantees is "To Promote a Healthy Community Utilizing Effective Practices and Partnerships." Grantee communities receive ongoing technical assistance in implementing effective practices and outcomes measurements to achieve one of three long-term community impacts by:

- reducing the harmful effects of substance abuse in one or more communities;
- reducing incidents of suicide and nonlethal suicidal behaviors in one or more communities; and/or
- increasing community members' connectedness, resiliency and life skills in one or more communities.

Together, the Statewide Suicide Prevention Council and DBH trained grantees on the Statewide Suicide Prevention Plan, which they incorporated in their programmatic goals, and provided an update of the Gatekeeper Suicide Prevention Training (to be completed by September 2006).

During fiscal year 2006, a total of 65,268 contacts were made through our community-based suicide prevention grantees. Nineteen of the programs delivered activities at the universal level of prevention (focusing on the entire population) and six programs focused activities at a selective level (focusing on populations indicated at high risk).

Using the federal Center for Substance Abuse Prevention's six prevention strategies, DBH suicide prevention grantees employed the following strategies:

five used dissemination of information;
14 used prevention education;
19 used alternative activities;
12 used community-based practices;
two used environmental approaches; and
five used identification and referral.

We celebrate our program's success with our grantees in their community:

"Alternative activities with the coordinator/ mentor have taken place, resulting in increased sobriety and outdoor cultural skills acquisition (men and boys are learning trapping and other related skills). Participants are in a positive, alcohol- and drug-free setting and are mutually supporting each other at the same time."

"The verbal feedback from Council members, community members, participants of the activities and the elders have all been positive and they are happy that there is a place to go to do these important cultural and community enhancing activities."

Partners in Prevention

ADVISORY BOARD ON ALCOHOLISM AND DRUG ABUSE AND THE ALASKA MENTAL HEALTH BOARD

In helping Alaskans stay healthy and free from self-harm, the State Suicide Prevention Council has a partnership with other behavioral health agencies — including the Alaska Mental Health Board (AMHB) and the Advisory Board on Alcoholism and Substance Abuse (ABADA).

Why are AMHB and ABADA partners in suicide prevention?

According to an October 2006 report by the World Health Organization (WHO), more than 90 percent of all individuals with completed suicides also had depression, schizophrenia, or alcoholism — or some combination of mental health and substance abuse problems. The WHO looked at completed suicide in 14 countries and found that, in the most rural countries (or, as in Alaska, the most rural regions of a state or country), around 80 percent of individuals with serious behavioral health challenges had not received treatment in the year before the suicide. The WHO Acting Director, Anders Nordstroem, said, "All too often, suicide represents a tragic consequence of failing to diagnose and treat serious mental illness."

The mission of both the AMHB and ABADA is to plan, educate, coordinate, evaluate, and advocate for adequate mental health and substance abuse services for all Alaskans. These services should include early intervention and effective treatments for individuals with depression and alcohol abuse, particularly with the most vulnerable Alaskans, who are often our youth in rural areas.

The WHO report on suicide worldwide points to the same challenges the SSPC, AMHB, and ABADA face — although a great deal is known about how to effectively help individuals with depression and substance abuse, there are gaps in treatment availability and resources. But through partnerships, such as the SSPC has with AMHB and ABADA, Alaskans can strive to reduce rates of suicide, a preventable form of death, by improving mental health and substance abuse services to vulnerable Alaskans.

Alaska Suicide Follow-Back Study — Alaska Injury Prevention Center

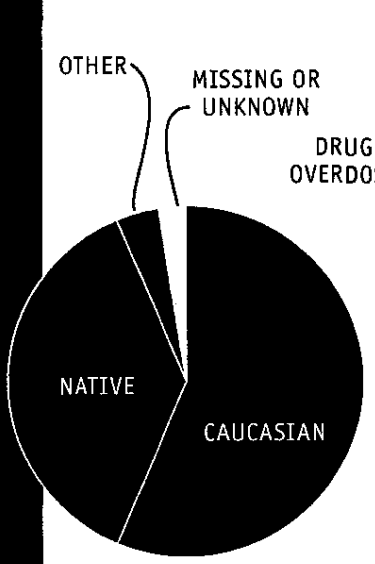
September 1, 2003 through August 31, 2006

In three years of collected data, there were 426 suicide deaths in Alaska as reported by the state Medical Examiners Office for an annual average of 142 deaths. Of those 426 suicides:

- 88 were female, 338 were male;
- 58 were younger than 20;
- 120 were in their 20s;
- 77 were in their 30s;
- 86 were in their 40s;
- 50 in their 50s; and
- 35 were 60 or older.

To date, 70 follow-back interviews have been completed with some still in process. Analysis of all the interview data will be completed in Spring of 2007, and the richer research information from the interviews will be analyzed and available.

The three years of suicide data that we have compiled for deaths taking place between Sept. 2003–Aug. 2006 in Alaska include (not all data are finalized):



ETHNIC DEMOGRAPHICS

241 Caucasian
158 Native

REPRESENTATIVE LES GARA

Sponsor Statement

CSHB 126(HSS): Success for Foster Youth

While we work hard to increase the success rate of Alaska's 2,000 foster youth, the homelessness and criminal activity numbers remain disconcerting. HB 126 makes two important fixes that will improve the lives and success outcomes of our youth. Currently approximately 29% of our foster youth end up incarcerated after leaving care, and roughly 37% end up homeless at some point in their life.

Foster Care Until Age 21

Following federal legislation signed by former President George W. Bush in 2008, 30 states have extended foster care until age 21 where a youth and state agree an extension is warranted. For youth who are not ready to stand on their own, an extra year in care can help develop the life skills and stability needed to succeed. Foster youth often have no one to call for support after leaving care, and an extra year of stability can make a profound difference. Extending foster care to 21 has been a priority for youth advocates, and the federal Fostering Connections Act provides federal funding to states that join in this reform.

Allowing Foster Care Reentry

When a youth leaves foster care, they are unable to return if they realize they made a poor choice. Sometimes a youth, faced with a host of problems, will make a mistake in seeking emancipation or leaving care. HB 126 allows reentry if it is in the youth's best interest, and provides for the Department to attach conditions to the reentry when reasonable. Currently at least 15 states allow reentry.

I would appreciate your support of HB 126, and am happy to answer any questions you may have.

ANALYSIS: *(Attach a separate page if necessary)*

The intent of CSHB126(HSS) is to extend foster care services to youth who stay in custody between the ages of 18 and 21, if it is determined to be in the best interest of the youth, and the youth consents to remain in care. It also extends the option to those youth ages 16 to 21 who have been emancipated to return to foster care.

The Office of Children's Services Online Resource for the Children of Alaska (ORCA) data base is mandated by the federal government and must be continuously updated to reflect changes in both state and federal law and policy. In addition, functionality in ORCA provides OCS the ability to claim federal reimbursement for eligible clients. Without these updates, OCS will not meet federal outcomes and mandates, will not establish the correct foster care rates for care providers of youth that are older than age 19, will not be able to claim federal reimbursement for costs associated with these older youth, and may be subject to federal fines.

ANALYSIS: *(Attach a separate page if necessary)*

The intent of CSHB126 is to extend foster care services to youth who stay in custody between the ages of 18 and 21, if it is determined to be in the best interest of the youth, and the youth consents to remain in care. It also extends the option to those youth ages 16 to 21 who have been emancipated to return to foster care.

This fiscal note addresses increased foster care special needs costs for youth who remain in foster care beyond age 18. Special needs costs include: items such as youth specific travel (foster family vacations, biological family visitation, any necessary treatment or medical costs not paid by Medicaid, school or cultural events, or summer camp; tutoring; prescribed diet or food services; extraordinary clothing related to growth spurts or medically fragile conditions that exceed the allocated 10% of the foster care base rate; or damage costs of up to $5,000 if the damages were caused by an act of the child or youth.

STATE OF ALASKA
2010 LEGISLATIVE SESSION

BILL NO. CSHB 126(HSS)

ANALYSIS CONTINUATION

The following assumptions have been applied:

1) OCS successfully implements all federal program requirements to extend foster care to age 21 within the first 6 months of FY 2011.
2) The number of youth who return to foster care after emancipation will be minimal. An estimate provided by the Facing Foster Care in Alaska group equaled 3.
3) The number of youth who turn age 18 will remain somewhat consistent from year to year and are based on the average number of children in custody ages 17 through 19 as of February, 2010 [80 youth]. No consideration has been included in this note for a possible influx of youth into the program extension during the first year of implementation nor to possible growth in out years.
4) Calculations are based on full time equivalents (FTEs) to account for youth who move in and out of the program for varying reasons. FTEs are calculated using a 94.23% conversion rate.
5) Approximately 45% of youth ages 19 and 20 will remain in care. This assumption is not supported by any known Alaska statistics but is an estimate that ties to the average number of youth who experience some postsecondary education in the State of Illinois. Illinois one of the few states that have experience providing care to age 21. The assumption is that the majority of youth who remain in school may remain in foster care as well.
6) No monetary adjustments have been included to address the possibilities of youth who develop special needs such as medical fragility or pregnancy before age 21 and return to foster care.
7) Calculations use the average cost per child for special needs items.
8) 66% percent of the youth who remain in care will follow through with post secondary education or work at least 80 hours per month and remain within the requirements of the Adoption and Guardianship Fostering Connections to Success and Increasing Adoptions Act of 2008 to be eligible for IV-E federal reimbursement. This assumption is not based on data but an experience-based guess by OCS staff.
9) The foster care penetration rate and the Federal Medical Assistance Percentage will remain somewhat stable.

Average number of youth age 17 through 19 = 81. 81 youth x 94.23% FTE conversion = 76 FTEs. 76 FTEs applying the assumption that about 45% will remain in care through ages 19 and 20 = approximately 35 FTEs.

Estimated cost per FTE = $2,340.00 annually x 35 FTEs = $81,900. Federal reimbursement for these costs is estimated at 5.4% or $4,422.6.

No consideration has been included in this note for a possible influx of youth into the program extension during the first year of implementation nor to possible growth in out years.
4) Calculations are based on full time equivalents (FTEs) to account for youth who move in and out of the program for varying reasons. FTEs are calculated using a 94.23% conversion rate.
5) Approximately 45% of youth ages 19 and 20 will remain in care. This assumption is not supported by any known Alaska statistics but is an estimate that ties to the average number of youth who experience some postsecondary education in the State of Illinois. Illinois one of the few states that have experience providing care to age 21. The assumption is that the majority of youth who remain in school may remain in foster care as well.
6) No monetary adjustments have been included to address the possibilities of youth who develop special needs such as medical fragility or pregnancy before age 21 and return to foster care.
7) 66% percent of the youth who remain in care will follow through with post secondary education or work at least 80 hours per month and remain within the requirements of the Adoption and Guardianship Fostering Connections to Success and Increasing Adoptions Act of 2008 to be eligible for IV-E federal reimbursement. This assumption is not based on data but an experience-based guess by OCS staff.
8) The foster care penetration rate and the Federal Medical Assistance Percentage will remain somewhat stable.

Average number of youth age 17 through 19 = 81. 81 youth x 94.23% FTE conversion = 76 FTEs. 76 FTEs applying the assumption that about 45% will remain in care through ages 19 and 20 = approximately 35 FTEs.

Fiscal Year	FTEs	½ Year Cost/FTE	Annual Cost/FTE	Est. FFP	Total Annual Cost	Federal Funds	General Funds
2011	35	$6.4		16.59%	$224.0	$37.2	$186.8
2012	35		$12.7	16.59%	$444.5	$73.7	$370.8
2013	35		$12.7	16.59%	$444.5	$73.7	$370.8
2014	35		$12.7	16.59%	$444.5	$73.7	$370.8
2015	35		$12.7	16.59%	$444.5	$73.7	$370.8
2016	35		$12.7	16.59%	$444.5	$73.7	$370.8

CS FOR HOUSE BILL NO. 126( )

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SIXTH LEGISLATURE - SECOND SESSION

BY

Offered:
Referred:

Sponsor(s): REPRESENTATIVES GARA, Crawford, Kerttula, Gardner, Harris, Richard Foster, Edgmon, Muñoz, Lynn, Herron, Dahlstrom

A BILL

FOR AN ACT ENTITLED

"An Act relating to extensions and resumptions of state custody of children; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 47.10.080(c) is amended to read:

(c) If the court finds that the child is a child in need of aid, the court shall

(1) order the child committed to the department for placement in an appropriate setting for a period of time not to exceed two years or in any event not to extend past the date the child becomes 19 years of age, except that the department**, the child,** or the child's guardian ad litem may petition for and the court may grant in a hearing

(A) one-year extensions of commitment that do not extend beyond the child's 19th birthday if the extension is in the best interests of the child; and

(B) [AN] additional one-year **extensions of commitment**

[PERIOD OF STATE CUSTODY] past 19 years of age **that do not extend beyond the person's 21st birthday,** if the continued state custody is in the best interests of the person and the person consents to it;

(2) order the child released to a parent, adult family member, or guardian of the child or to another suitable person, and, in appropriate cases, order the parent, adult family member, guardian, or other person to provide medical or other care and treatment; if the court releases the child, it shall direct the department to supervise the care and treatment given to the child, but the court may dispense with the department's supervision if the court finds that the adult to whom the child is released will adequately care for the child without supervision; the department's supervision may not exceed two years or in any event extend past the date the child reaches 19 years of age, except that the department or the child's guardian ad litem may petition for and the court may grant in a hearing

(A) one-year extensions of supervision that do not extend beyond the child's 19th birthday if the extensions are in the best interests of the child; and

(B) an additional one-year period of supervision past 19 years of age if the continued supervision is in the best interests of the person and the person consents to it; or

(3) order, under the grounds specified in (o) of this section or AS 47.10.088, the termination of parental rights and responsibilities of one or both parents and commit the child to the custody of the department, and the department shall report quarterly to the court on efforts being made to find a permanent placement for the child.

*** Sec. 2.** AS 47.10.080 is amended by adding a new subsection to read:

(v) In addition to the extensions of state custody ordered by a court under (c)(1)(A) or (B) of this section, a court may grant in a hearing a resumption of state custody that does not extend beyond a person's 21st birthday if the person

(1) consents to it;

(2) was placed in out-of-home care by the department immediately before being released from state custody and the person was released to the person's

own custody;

(3) is in need of out-of-home care to avoid personal harm or homelessness, or to enhance the person's ability to continue the person's education or training or otherwise improve the person's successful transition to independent living; and

(4) if requested by the department, agrees to reasonable terms for resuming state custody that may include matters relating to the person's education, attainment of a job or life skills, or other terms found by the court to be reasonable and in the person's best interest.

*** Sec. 3.** AS 47.10.990(3) is amended to read:

(3) "child" means a person **who is**

(A) under 18 years of age**;**

(B) [AND A PERSON] 19 years of age if that person was under 18 years of age at the time that a proceeding under this chapter was commenced**; and**

(C) under 21 years of age if that person is committed to the custody of the department under AS 47.10.080(c)(1) or (v);

*** Sec. 4.** This Act takes effect January 1, 2011.

Representatives Stoltze and Hawker:

Please find attached the required materials for a hearing request.

New fiscal notes were adopted in the last committee of referral and are not yet available online. I've attached scanned copies of the documents distributed in the House H&SS committee on April 6, 2010. The committee substitute and fiscal notes will be available soon.

We expect Amanda Metivier of Facing Foster Care in Alaska to testify or answer questions as an expert witness. The Anchorage LIO should be teleconferenced, and we may need an off-net line for Ms. Metivier, depending on her availability.

Please let me know if you need any additional information.

Rose Foley
Aide to Representative Gara
State Capitol, Room 500
Juneau, AK 99801

Amanda Metivier has walked the walk. As program coordinator of Facing Foster Care in Alaska (FFCA), she knows from experience how the foster care system works. A foster care "alumni" and recent graduate of UAA's School of Social Work, Amanda has dedicated her career to improving the foster care system in Alaska.

Amanda moved to Alaska when she was 11 years old, but didn't enter the foster care system until she was 17 – after she dropped out of high school.

As a teen, Amanda had little motivation or desire to do much of anything. She was introduced to FFCA but ditched the first meeting. After much resistance, Amanda attended a statewide retreat where she met several other youth in a similar situation as hers. This time it was different. "I felt like I belonged," she said. "I connected with people in a way that I had never connected with anyone."

Her experience in foster care ended up being a best-case scenario. Oftentimes, siblings are split among different households, but Amanda and her sister were able to stay together. Her sister's friend's parents agreed to foster the pair. "I had a great experience in foster care, but then I started hearing about all these horror stories from different youth," said Amanda. "That keeps me going; I need to work to change those stories." She was in foster care until she "aged out" of the system at 20.

Dropping out of high school put Amanda very far behind, but with the encouragement of her social worker, Tom McRoberts, she worked hard to catch up and earned her GED in '02. She was able to find funding for college, and enrolled in courses at UAA's School of Social Work. She did her practicum work with Casey Family Programs, where she helped develop programs for FFCA. Amanda earned a Bachelor of Social Work from UAA in 2008, and her practicum turned into her first professional job.

In her role as coordinator for FFCA, Amanda helps link youth and foster care alumni to resources and teaches them how to advocate for themselves on an individual level as well as a system-wide level. FFCA is supported by Casey Family Programs and Covenant House of Alaska, and works to improve the system through sharing experiences, supporting and educating youth and social services, and implementing positive change in society as a whole.

After several years, Amanda and Tom have reconnected and are now working together professionally. Tom now works with UAA's Family & Youth Services Training Academy. They work hand-in-hand to co-train social workers on youth development. "Amanda has helped me grow as a trainer," Tom said. "I really learn a lot from her; she's an expert at working with foster care youth and alumni. She knows their issues, their point of view and their concerns."

At 25, Amanda is now a foster parent to a 19-year-old young woman whose initial foster care placement fell through around Christmastime. This is her 24th placement. "There's a serious lack of

Distributed by Rep. Gara

4607

foster homes in Alaska," Amanda said. "Some of these youth have had 50 plus placements; they're so used to being bounced around."

Amanda explained that there's a 12 percent graduation rate among youth in foster care in Anchorage. "It's hard for them to focus on education. As children and youth move from home to home and school to school, the value of education gets lost in the mix."

In a Compass Piece she wrote for the Anchorage Daily News, Amanda stated: "As a former foster child, I know too well about the limited options surrounding education as a child becomes an adult and ages out of the system. ... For many of Alaska's foster children, education or vocational school beyond high school is not really an option."

"I think some foster youth fail because they're not set up for school," Amanda said. She explained how one foster care alumna started taking classes at UAA but soon after dropped out because she didn't know how to manage her time, and she didn't have basic things like an alarm clock and deodorant. "Students have to be willing to seek out the resources available to them and discover their own learning style." Amanda admitted to being very overwhelmed when first starting her classes at UAA. It took her three times to pass a math class. "I finally took it online, and that worked for me."

According to the Alaska Foster Care Alumni Study, 73 percent of foster children wind up on public assistance after leaving foster care. Forty percent are homeless within a year of leaving foster care, 43 percent wind up in the criminal justice system, and 78 percent receive no help in planning their future beyond foster care. The study was a collaborative effort between the UAA School of Social Work, Casey Family Programs, Tribal State Collaboration Group and the State of Alaska Office of Children's Services.

To help combat these trends, Amanda is actively involved with the "Mentoring Spirit" pilot program, organized by Alaska Community Services. Spirit is an acronym: "S" for success, "P" for prosperity, "I" for independence, "R" for respect, "I" for integrity and "T" for tolerance. The program connects youth in the system with mentors that have been through the system themselves.

Besides simply listening and caring, mentors can help youth in foster care learn new life skills, apply for scholarships and plan for a future career. Amanda's hope for the program is to see young people leaving foster care with a permanent connection to a mentor.

Amanda has a passion for child welfare administration and policy. "I see first-hand how policies affect people and I know what needs to be changed." As chair of the Education and Foster Care Committee, Amanda is currently advocating to increase school stability among foster care students. She's also working to make it easier for fostered youth to receive the orthodontia care they need and increase the "age out" to 21.

Though Amanda has done much in her 25 years, she still has ample work ahead of her. "I feel like I have a lot more to learn." She applied to UAA's Master of Social Work program and will begin taking classes this fall.

ALASKA STATE LEGISLATURE

REPRESENTATIVE LES GARA

Sectional Analysis

CSHB 126(HSS): Success for Foster Youth

Section 1

Allows the Office of Children's Services to extend foster care until age 21, and to allow voluntary reentry into foster care.

Section 2

This section will be deleted, as this provision recently passed the legislature in a Senate Bill.

Section 3

Conforming language. Extend the eligibility of foster care to age 21.

Section 4

Established the effective date of January 1, 2011.

January-May: State Capitol • Juneau, AK 99801-1182 • (907) 465-2647 • Fax (907) 465-3518
June-December: 716 W. 4th Avenue • Anchorage, AK 99501• (907) 269-0106• Fax (907) 269-0109

ALASKA STATE LEGISLATURE

REPRESENTATIVE LES GARA

Summary of Changes From HB 126(HSS)

Section 1

Reverts to existing statute, which allows for one-year extensions of commitment under (A) of this section, rather than the two-year extensions in the HSS committee substitute. This change was made at the suggestion of the Department of Law, Child Protection Section.

Subsections (i) through (iv) were moved to Section 2 of the new bill.

Section 2

Section 2 of the HSS committee substitute was recently passed by the full Legislature, and has been deleted.

The new Section 2 defines the situations under which a person may reenter state custody. These provisions were included in subsections (i) through (iv) of the HSS committee substitute.

Section 3

Makes a minor technical change to the definition of a "child" to make clear that the department will have jurisdiction to allow a youth to come back into foster care. "Child" includes a person under 21 if that person is committed to the custody of the department.

This change was made at the suggestion of the Department of Law, Child Protection Section.

Section 4

No change.

January-May: State Capitol • Juneau, AK 99801-1182 • (907) 465-2647 • Fax (907) 465-3518
June-December: 716 W. 4th Avenue • Anchorage, AK 99501• (907) 269-0106• Fax (907) 269-0109

LEGISLATIVE RESEARCH REPORT

MARCH 23, 2010 REPORT NUMBER 10.209

YOUTH RE-ENTERING FOSTER CARE AFTER TURNING 18

PREPARED FOR REPRESENTATIVE LES GARA

BY TIM SPENGLER, LEGISLATIVE ANALYST

You asked whether Alaska or any states allow youth 18 years of age or older to re-enter the foster care system. Additionally, you wanted to know if child welfare organizations have developed a "best practices" model for re-entry after the age of 18.

Alaska law does not allow youth who have left foster care to re-enter after they are age 18 or older.[1] Under Alaska Statute 47.10.080, youth are able, in certain circumstances, to extend their stay in foster care until they are 19 or 20; however, if they have left foster care, and are 18 or older, they are unable to re-enter the system.

We identified 15 states (Alabama, Arizona, Connecticut, Illinois, Indiana, Iowa, Kentucky, Maine, Massachusetts, Minnesota, New York, Oklahoma, Texas, Virginia, and Washington) that allow youth over age 18 to re-enter foster care under varying circumstances. Below we highlight aspects of each state's program.[2] As you will note from this summary, re-entry in many states is dependent on the education plan of the youth in question.

- Alabama - Youth who were in "out of home" care on or after their 18th birthday have the option of returning to care if they are living in a situation in which there is an identifiable risk of harm.

- Arizona - Teens and young adults who left the Arizona foster care system at age 18 or older may request to re-enter foster care prior to their 21st birthday. All foster care services end on the person's 21st birthday.

- Connecticut – Until they turn 21, youth can return to care as long as they were in care on their 18th birthday, and the purpose of re-entry is to either obtain education or work skills for transition into adulthood.

---

[1] Mike Lesmann, community program manager, Office of Children's Services, Department of Health and Social Services at (907) 465-3548.

[2] We identified state programs through a number of sources including the Casey Family Programs (*http://www.casey.org*), the Child Welfare League of America (*http://cwla.org*), and the National Conference of State Legislatures (*http://www.ncsl.org*).

907 465-3908 (fax)

Alaska Legislature
Legislative Research Services
w3.legis.state.ak.us/laa/research/research.php

State Capitol
Juneau, AK 99801

- Illinois – Former foster care youth under 21 may "reengage" with the Department of Children and Family Services in order to secure essential supports and services to learn to live independently as adults.[3]

- Indiana - Youth must meet eligibility requirements to re-enter care under the Older Youth in Foster Care Program. In Attachment A, we include the Indiana Code (31-28-5.7-1) pertaining to this program as well as correspondence from the Department of Child Services outlining the program. Indiana's Independent Living Program is detailed at *http://www.in.gov/dcs/2530.htm.*

- Iowa - A youth can return to care provided that he or she is still working on a high school education or GED. Individuals can remain in care up to the age of 20.

- Kentucky - Youth have up to six months after reaching age 18 to decide if they would like to return to care.

- Maine - Youth must typically enroll in the optional Volunteer Extended Care Program prior to, or within 90-days following, reaching age 18. In some exceptional cases youth who have been out of care for more than 90 days are permitted to re-enter foster care. Program details are available at *http://www.maine.gov/dhhs/ocfs/cw/v92.htm.*

- Massachusetts - Youth may request to re-enter care as long as they have not reached age 22, even if they voluntarily exited at age 18.

- Minnesota - Youth are able to re-enter care as long as they were "wards of the state" and have not reached the age of 21, even if they voluntarily exited at age 18. The re-entry provision does not apply if the youth's parents' parental rights have not been terminated.

- New York - A youth age 18 or older can re-enter care if that individual is on a "trial discharge" and is in need of services. Youth age 18 or older with a status of "final discharge" cannot return to care, although some agencies at their own discretion may provide assistance to these youth.

- Oklahoma - If a youth has exited care without completing the requirements for a high school diploma or without obtaining a GED, that individual may return on a voluntary basis if a placement is available. The youth may remain in care until completing high school or the GED, or until age 21, whichever comes first.

- Texas - The Return to Care program allows certain eligible youth age 18 to 21 years of age to return to care in order to attend high school or GED courses (up to age 22), or to attend a vocational or technical program (up to age 21). In Attachment B, we provide a copy the pertinent Texas Administrative Code (Rule 700.346) as well as Return to Care policy

[3] The full 34-page text of enrolled House Bill 4054, which allows for reengagement of former foster youth, can be accessed at *http://www.ilga.gov/legislation/*

information taken from the Department of Family and Protective Services handbook.

- Virginia - If a youth decides to leave foster care, he or she can resume independent living services as long as he or she returns within 60 days of discontinuance of services.

- Washington - Youth can re-enter foster care via the Foster Care to 21 program within six months of leaving care if they are enrolled in a post-secondary education program. (We include a program description as Attachment C.) A Washington State Institute for Public Policy report from January 2010 found that Foster Care to 21 participants had higher college attendance rates, fewer arrests, and used food stamps for a shorter period of time than did foster youth who graduated from high school before the program was available. The report (also included in Attachment C) estimates a taxpayer benefit of $1.35 for every dollar spent on the program.

In Attachment D, we include the statutory language from both Virginia (CV 63.2-905.1) and Washington (RCW 74.13.031) pertaining to former foster care youth over 18 reentering the system.

We could identify no "best practices" or official policy positions put forth by child welfare or foster care organizations regarding allowing youth over 18 to re-enter foster care. Nevertheless, it is commonly held by experts in the field that many, if not most, 18 year-olds—whether they were in the foster system or not—are ill-equipped to function as independent adults. To that point, we include an issue brief (Attachment E), from the University of Chicago's Chapin Hall Center for Children entitled, "When Should the State Cease Parenting?," which suggests that allowing youth to remain (or re-enter) foster care past age 18 would benefit both them and society.

Attachment E also contains a print article from National Public Radio entitled, "Generation Next in the Slow Lane to Adulthood." The piece examines how the current generation of young adults is quite dissimilar to past generations in terms of becoming independent from their parents and being prepared for the responsibilities of adulthood.

We hope you find this information to be useful. Please let us know if you have questions or need additional information.

Attachments available upon request.

Facing Foster Care in Alaska

Policy Agenda 2008

In May of 2008, the youth and alumni of Facing Foster Care in Alaska, (FFCA) came together from across the state and gathered in Anchorage to share their ideas and experiences about life in Alaska's foster care system. During their gathering youth/alumni brainstormed ideas on what they thought would be most beneficial to them and others in foster care in Alaska. As a result of these ideas, the members of FFCA voted to create this policy agenda.

Tuition Waivers for ALL foster youth in the state of Alaska

The University of Alaska Anchorage currently offers 10 Presidential Tuition Waivers a year to foster youth who are eligible for the OCS Independent Living Program. A young person must have been in foster care on or after their 16th birthday for six consecutive months in order to be eligible for the waiver program. Since these waivers are competing, not every young person in Alaska who applies will receive one. Youth who are placed in a guardianship, adopted, or reunified before age 16 are not eligible to apply for the waiver. Many states provide Tuition Waivers or other forms of reimbursement for college expenses to foster youth interested in pursuing post-secondary education. The youth and alumni of FFCA feel that by providing All of Alaska's foster youth with tuition waivers there would be a higher percentage of foster youth attending post-secondary education. Studies show that approximately 17% of young people who exit foster care pursue post-secondary education, and only about 1% graduate from a four year degree or certificate program. FFCA would like to see that All of Alaska's foster youth are provided with tuition waivers to reduce the stress of worrying about college expenses and knowing that they are guaranteed a higher education.

Support to foster youth pursuing post-secondary education

Many of the youth and alumni who attend post-secondary education programs in Alaska have complained about not having any supports to help them achieve their goals. FFCA members would like to see that universities and vocational programs have supports put in place for foster youth transitioning to higher education. FFCA members recommended adult or alumni mentors, a family to spend the holidays with, and someone within the

university or vocational program to talk with about stressors. If every youth in Alaska's foster care system made a permanent connection with a caring adult during their stay in foster care this would be less of an issue. FFCA members also recommended implementing the, "Circles of Support Program," to ensure youth in care are making permanent connections with caring adults before exiting from care.

More Independent Living Funds going to youth/alumni

The state of Alaska currently gets approximately $500,000 a year (FY2008 $518,814) in Federal Chafee funds to be used for youth in foster care to work toward independent living. There is currently no state match for this money and it is being stretched very thin as the states Independent Living Program grows, and begins to offer more programs and resources to youth in transition. The youth and alumni of FFCA would like to see that more of this money is offered to youth and alumni transitioning from foster care for housing, education, life skills training, and anything that may support them in becoming independent productive members of society. FFCA is also aware that many states provide a match for the Chafee dollars they receive and would like to see that this is made possible by the state of Alaska.

Transitional Living for youth

Alaska currently allows for youth who turn 18 in foster care the option to extend their time in state custody until the age of 20. There many states that allow for youth to extend custody until age 21, or to leave custody and re-enter if they are willing to pursue post-secondary education. According to the Alaskan Alumni Study 38% of Alaska's alumni reported being homeless after exiting foster care. The Covenant House Shelter in Anchorage reports that two-thirds of their current population is comprised of current and former OCS youth. The youth and alumni of FFCA would like to see a stronger focus in the area of transitional housing for youth who exit from the foster care system. FFCA members shared ideas and recommend allowing youth to remain in state custody while living in college dorms, apartments on their own, or other least restrictive environments outside of the traditional family foster home after reaching age 18.

Independent Housing Program

Some states currently allow for foster youth to live, "on their own," after reaching age 18, but to remain in state custody and receive foster care payments on behalf of themselves until the age of 21. This allows for foster youth to continue services with their social worker as well as other services offered to youth in custody, and learn to successfully transition out of state custody. The youth and alumni of FFCA would like to see a program such as this put into place in Alaska, or for the state to consider more creative placements for young people once they reach 18, but are not ready to exit from foster care.

Medicaid increased to age 21 under the Chafee Independence Act

There are currently 17 states that have chosen to enact the Chaffee option to extend Medicaid to age 21 for former foster youth, Alaska is not one of these states. Currently, youth in Alaska's foster care system can receive Denali Kid Care until age 19 under the 1115 Waiver. After age 19 these young people can apply for adult Medicaid, but this holds them back from obtaining decent paying jobs and forces them to choose to go without medical coverage. Youth in foster care often attend counseling and have other medical needs, but they are forced to cut off many of these services when they leave custody. The youth and alumni of FFCA would like to see that Medicaid is increased for Alaska's foster youth to age 21 under the Chafee Foster Care Independence Act.

Braces covered under Medicaid

Children and youth in Alaska's foster care system often have only their Basic needs met because there is a strong emphasis on safety and permanency. There is little or no value put on whether a young person in custody needs braces, as this is usually a cosmetic procedure that parents would normally pay for. The youth and alumni of FFCA felt very strongly about this issue and believe that braces should be covered under Medicaid or by OCS. FFCA members discussed how braces could support higher self-esteem for a young person in foster care, and would give them one less thing to worry about besides the social pressures they face as a, "foster youth." FFCA is also aware that braces are covered under Medicaid in the state of Texas, so this could be an option for Alaska.

Decreased use of Psychotropic Medication for Alaska's foster youth

Many of Alaska's youth and alumni complain about being prescribed psychotropic medications after entering the foster care system for symptoms of depression, anxiety, trauma, attachment issues, and misbehavior. The youth and alumni of FFCA feel that these are all normal symptoms of child maltreatment and dealing with all that comes out of being placed in foster care. There has been a national focus on the use of psychotropic medications being over-prescribed for children and youth in foster care. FFCA members have also complained about side-effects caused by these medications resulting in a decreased ability to focus on their education as well as function in everyday society. The youth and alumni of FFCA would like to see that the prescription of psychotropic medications for Alaska's foster children and youth is decreased and reviewed more closely.

Definitions (according to FFCA)

Youth- A young person currently in state custody (foster care).

Alumni- A person who has spent any period of time in the foster care system

Facing Foster Care in Alaska (FFCA)

Mission Statement: Our mission is to improve the foster care system through sharing our experiences, supporting and educating youth and social services and implementing positive change in society as a whole.

FFCA is Alaska's only foster care advocacy organization completely run by youth and alumni of the foster care system. Since their inception in 2003, FFCA has been working to improve Alaska's foster care system by sharing their experiences with people who can create positive changes for Alaska's foster youth. FFCA is a statewide organization that provides support to Alaska's foster youth and alumni and, gives them the ability to share their voice and become leaders in their community.

Developed and Managed By Child Trends

Educational Stability for Youth in Foster Care

The McKinney-Vento Act[1] applies to many children in DFCS custody and provides those children with rights that promote educational stability.

What is the McKinney-Vento Act?

- McKinney-Vento is a federal law that promotes stability, access, and academic success for homeless youth. McKinney-Vento also provides assistance for homeless youth with enrollment in a new school, transportation to school, and other educational and supplemental services. It promotes educational stability by allowing homeless youth to remain in their school of origin even if homelessness has caused them to move outside the school district. School of origin is defined as the school a student attended before becoming homeless or the school where the student was last enrolled.

Are children in foster care homeless?

- In order to be eligible for the benefits and services provided for by the McKinney-Vento Act, a student must meet the criteria for homelessness. Some children in foster care meet the criteria and are therefore considered homeless under the Act.
- The McKinney-Vento Act defines homeless children and youth as "(A) individuals who lack a fixed, regular and adequate nighttime residence…; and (B) includes – (i) children and youths who are sharing the housing of other persons due to loss of housing, economic hardship, or a similar reason; are living in motels, hotels, trailer parks, or camping grounds due to the lack of alternative accommodations; *are living in emergency or transitional shelters; are abandoned in hospitals; or are awaiting foster care placement*…."[2] Thus, some children in DFCS custody are considered homeless for the purpose of the McKinney-Vento Act, specifically children living in shelters, abandoned in hospitals, and children awaiting foster care placement
- Using McKinney-Vento to secure rights for children in foster care helps to minimize educational disruption. The child is able to remain in the same school, continue with the current academic curriculum, and is less likely to fall behind academically.

Are children covered by McKinney-Vento after they move into a foster home?

- Once the provisions of McKinney-Vento have been met, an eligible child remains eligible for services for the remainder of that school year even if s/he moves into a foster home.
- When the next school year begins, if the child continues to live in a foster home, s/he will no longer qualify under McKinney-Vento and at that time may have to transfer to a school in the district where s/he is residing.

What about the documents schools require to enroll a child in school?

- McKinney-Vento requires schools to immediately enroll homeless children in school even without records normally required for enrollment, such as previous academic records, medical records including immunization records, proof of guardianship, and proof of residency.
- The enrolling school must contact the last school attended to obtain relevant records to facilitate enrollment and the school should refer the child to the school liaison for assistance in obtaining immunization records.

What if the child has moved out of district and the old school refuses to allow the child to continue to attend?

- All decisions about where a homeless child shall be allowed to go to school must be made according to the child's best interests. In determining best interests of the child, the local educational agency shall "to the extent feasible, keep a homeless child or youth in the school of origin, except when doing so is contrary to the wishes of the child's or youth's parent or guardian."[3]

Emory University School of Law
Gambrell Hall
Atlanta, GA 30322
Tel 404 727 0664

- ❖ Whenever there is a disagreement between a school and a parent, guardian, or youth, the school must:
  - Immediately enroll the student in the school the parent, guardian, or youth chooses;
  - Keep the student at that school until the disagreement is settled;
  - Explain, in writing, its decision and the right to have the disagreement settled; AND
  - Send the parent, guardian or youth to the Georgia Liaison/Coordinator of Education for Homeless Children and Youth to settle the disagreement quickly. Please see the contact information below.

What if it is best to transfer the child to a new school in the district where the foster parents or relative placement live?

- ❖ Homeless children and youth have the right to stay in the school they went to before they lost their housing, to stay at whatever school they were enrolled in last, or to attend the local school where they are now living.

Is there any help with transportation?

- ❖ If McKinney-Vento applies to the child, then the school district must provide or arrange transportation for the student to stay at the school of origin, even if the student moves to a different city, county, or school district.
  - If a student is living in the same school district as the school of origin, then that school district has to provide transportation. If the student moves across district lines, then both districts have to work together to provide transportation.

What type of transportation will the school provide?

- ❖ Schools can provide transportation in different ways, including:
  - Re-routing school buses and making sure buses go to shelters, group homes and other places where students live;
  - Providing passes for public buses and subways, including passes for caretakers when needed;
  - Using the transportation systems social services use;
  - Using approved van or taxi services;
  - Reimbursing parents, guardians or youth for gas;
  - Working with service providers and public assistance agencies to make transportation plans or provide transportation;
  - Getting local businesses or other agencies to help with transportation costs; and

Action

- Pass the Foster Care Continuing Opportunities Act.
- Pass the Medicaid Foster Care Coverage Act.
- Expand eligibility and improve services to youth in the child welfare system, or who were formerly in child welfare, through the John H. Chafee Foster Care Independence Program. Expand eligibility for independent living services to age 24, including room and board. Increase funding to at least $200 million to support expansion of eligibility and services.
- Improve education opportunities for youth in foster care by making improvements to the Education and Training Voucher program. Increase funding for the voucher program to at least $60 million and ensure all of the funds are used for this purpose.
- Include provisions in the reauthorization of the No Child Left Behind Act to enhance education supports for children in foster care.
- Provide the necessary resources for implementing the National Youth in Transition Database.

History

Federal support for independent living services for foster youth began in 1986 when Title IV-E was amended to include the Independent Living Program to assist youth who would eventually be emancipated from foster care. In 1993, Congress permanently extended the authority for independent living. Significant improvements were enacted in 1999 with passage of the John H. Chafee Foster Care Independence Program, in honor of the Rhode Island senator who was one of the law's sponsors and who died before it was enacted. The law allows states to extend Medicaid coverage to former foster children between 18 and 21 years old, and funding was doubled to $140 million per year, which became effective in 2001. Also in 2001, Congress authorized an additional $60 million in discretionary funds for education and training vouchers for youth who are eligible for the Foster Care Independence Program, as well as youth who are adopted from foster care after reaching age 16.

Foster Care Continuing Opportunities Act

Senator Barbara Boxer (D-CA) introduced the Foster Care Continuing Opportunities Act (S. 1512) on May 24, 2007. This legislation would extend Title IV-E foster care funding to age 21.

In 2005, 24,211 young people left foster care simply because they became too old. This is referred to as aging-out of foster care. Many young people transitioning out of the foster care system face great instability once finding themselves on their own, with few, if any, financial resources, no place to live, and little or no support from family, friends, and community. The experiences of these youth place them at higher risk for unemployment, poor educational outcomes, health issues, early parenthood, long-term dependency on public assistance, increased rates of incarceration, and homelessness.

This legislation would simply amend the current law that defines foster children to age 18. States would have an option to extend this to age 21. Under current law, limited funds are available under the John H. Chafee Foster Care Independence Program (*see below*).

Medicaid Foster Care Coverage Act

Rep. Dennis Cardoza (D-CA) introduced the Medicaid Foster Care Coverage Act (H.R. 1376) on March 7, 2007. This legislation amends title XIX of the Social Security Act to establish independent foster care adolescents as a mandatory category of individuals for coverage under state Medicaid programs.

For young people leaving foster care, lack of health care poses a substantial challenge. The Chafee Program allows states to extend Medicaid coverage to former foster children between ages 18 and 21. Despite Medicaid's tremendous advantage for youth in foster care, only 17 states had implemented the extension by early 2007.

Given the high rates of physical and mental health problems extensively documented among children and youth in foster care, access to health services is a critical factor as young people transition to adulthood. Because most children and youth in foster care are covered by Medicaid, use of the expansion option would allow a state to readily facilitate the transfer of a youth's Medicaid eligibility from one category to another without any gap in coverage as they exit foster care. Medicaid coverage should continue for all foster youth until at least age 21. Keeping medical records up to date and accessible is another challenge for young people involved with child welfare. Advances have been made in electronic record keeping, but more are needed.

John H. Chafee Foster Care Independence Program

The John H. Chafee Foster Care Independence Program helps states provide services to young people who are likely to remain in foster care until age 18, as well as former foster children beyond age 18. The program helps eligible children make the transition to self-sufficiency through such services as assistance in earning a high school diploma, support in career exploration, vocational training, job placement and retention, and training in daily living skills. In addition to the Medicaid coverage, the program allows up to 30% of the funds be used for room and board. Chafee is a capped entitlement with an annual ceiling of $140 million, which has not been increased since 2001.

Adolescents constitute a major segment of the youngsters the child welfare system serves. Most youth enter outof- home care as a result of abuse, neglect, and exploitation. Others have run away from home or have no home. Young people transitioning out of the foster care system are significantly affected by the instability that accompanies long periods of out-of-home placement during childhood and adolescence.

The resulting harm to the youth themselves, their communities, and the society at large is unacceptably high. To reduce these outcomes, outreach to youth and the quality of services provided need to be improved. In addition, expanding eligibility for critical support for young people leaving

foster care will ensure a successful transition to independence and self-sufficiency, and reduce the numbers of young people who become homeless, unemployed, incarcerated, and/or at high risk of becoming victims and victimizers. To accomplish this improvement and expansion, funding for the Chafee Foster Care Independence Program needs to be increased significantly.

Education

Reauthorizing the Title X, Part C of the No Child Left Behind (NCLB) McKinney-Vento Homeless Assistance Act (McKinney-Vento) is an opportunity to improve education outcomes for children and youth in foster care. McKinney- Vento provides access to essential federal education protections and rights for homeless children and youth. Children and youth who are eligible for McKinney-Vento have access to supports for school success that many children involved in child welfare lack: school stability or immediate enrollment if stability is not possible, school staff charged with ensuring their prompt enrollment, and more. While these protections currently apply to a subset of children involved in foster care, including those "awaiting foster care placement," states have defined this phrase differently. States vary widely in their application of these protections for this population. As a result, the opportunities for children and youth in foster care may depend on where they live. The reauthorization of McKinney-Vento provides an opportunity to ensure these protections are available to all children in foster care, with special accommodation for the needs and family dynamics that face children in foster care.

The Education and Training Voucher (ETV) program provides assistance of up to $5,000 per year for the cost of attendance at an institution of higher education for youth who age out of foster care or are adopted after age 16. Funding for this program has never reached the amount requested by President Bush-$60 million-which itself is not enough to meet the need. The ETV program began receiving funds in 2003 and was set at $42 million. In 2005, funding increased to $46.6 million; however, for FY 2008, funds were reduced to $45.3 million. Funding for the ETV program should be expanded to at least the level proposed by the President. Further improvements to the ETV program are needed, including adjusting eligibility to include youth adopted after age 14, and requiring technical assistance for states to ensure funds are fully utilized. Also, instead of being returned to the federal treasury, unused state ETV funds should be transferred to other states' ETV programs with demonstrated unmet need.

National Youth In Transition Database

Congress should provide the resources necessary for implementation of the National Youth in Transition Database. This new initiative is a tremendous opportunity to provide valuable information that will inform future improvements in services to young people. The funds for implementation should be a priority for Congress and not come at the expense of existing services or supports or reduced services to adolescents receiving Chafee and ETV funding.

Key Facts

- In 2005, 24,211 children aged-out of out-of-home care. [1], [2]
- A study of young adults who had spent a year or more in foster care between age 14 and 18 found that 25% had experienced post-traumatic stress, compared to 4% of the general adult population. [3]
- Three in 10 of the nation's homeless adults report foster care history. [4]

- A recent study found that one-third of older youth in foster care were identified by caseworkers as having one or more special mental health, medical, pregnancy and parenting, substance abuse, or developmental needs that significantly interfered with their ability to live independently. [5]

- In Clark County, Nevada, 55% of former foster youth reported not having health insurance after leaving foster care. [6]

- Forty-four percent of former foster youth in Wisconsin reported difficulty accessing health and mental health services. [7]

- The rate at which foster youth complete high school (50%) is significantly below the rate of their peers (70%), and the rate at which college-qualified foster youth attend postsecondary education (20%) is substantially below the rate of their peers (60%). [8]

- The Census Bureau reports college graduates make $23,000 more per year than those with high school diplomas. [9]

SOCIAL SERVICES

Children of the System

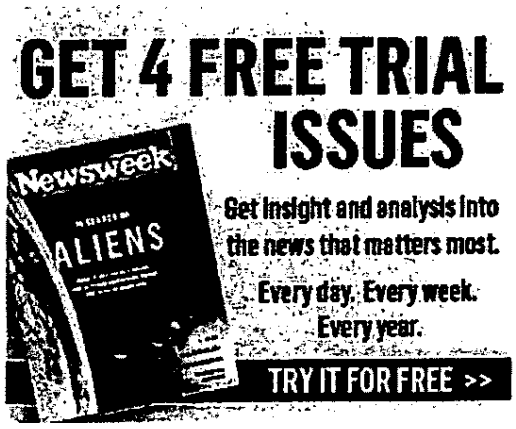
New research supports a radical shift in child-welfare policy for the thousands of teens who 'age out' of foster care at age 18, only to face high rates of homelessness, unemployment and incarceration.

By Daniel Heimpel | Newsweek Web Exclusive
Mar 9, 2009

Eighteen-year-old John Kyzer's blue eyes are bleary and the skin around them puffy as he paces a corner of Hollywood Boulevard in Los Angeles. Kyzer has been spending his nights on a bench in front of a Starbucks. And now, he is dangerously close to entering the ranks of dozens of other former foster youth who "cop a squat" (sit) on concrete stairwells and sleep in "abandos" (abandoned buildings) up and down the street.

Soon after his 18th birthday, the state of California "terminated" Kyzer's case and he was forced to leave his group home. He moved in with his girlfriend and their 4-month-old baby in the home she shared with three generations of her family. Wanting to help support his son, Kyzer got a job at Starbucks and worked as many hours as the boss would give him. For two months his confidence brimmed.

But then he did something many teenagers do. He blew off work and was fired. Now, the door to his girlfriend's house is shut. Kyzer is on his own.



For Kyzer and many of the more than 25,000 other foster youth in the United States who "age out" of the system every year, there is no family and no support network to pick you up when you fall. Within two years of emancipation, half of Los Angeles County's foster youth will be unemployed, one fifth will be homeless and a quarter will have been to prison, according the Children's Law Center. Similar fates can be expected across the country for many of the 500,000 children who call the state their parents.

But a law signed by President Bush in the waning days of his administration could radically change the futures of these children. The Fostering Connections to Success and Increasing Adoptions Act of 2008 offers states matching federal funds to extend care to age 21 for all foster youth who choose to stay in the system after their 18th birthday. What's meant by "care" would vary state by state, but could include extending Medicaid coverage to age 21 (which about 20 states now do), providing housing vouchers or access to group homes, vocational training, educational funding and psychological counseling services.

"We have known for a long time that kids don't suddenly become self-sufficient at the age of 18," says the federal bill's sponsor, Rep. Jim McDermott of Washington state. "The law we passed last year finally

recognized the need to better provide the building blocks of success to these children."

Research released Monday suggests that the approach makes financial sense for a government weighed down by the costs of incarceration, welfare, Medicaid and homelessness incurred by former foster youth who struggle after emancipation. Conducted by the University of Washington School of Social Work, the study finds that caring for young adults until age 21 will represent a return of $2.40 on every government dollar spent in California.

Experts hope the report will lead more states to implement the federal law. But adding anything to a state budget right now is a hard sell. Thus far only seven states have put forward such legislation, including California. And before the passage of the federal legislation, only two states had implemented comprehensive extended care for foster kids after age 18—Illinois and Vermont.

The study's leading researcher, Mark Courtney, director of Partners for Our Children, a public-private collaboration promoting child-welfare reform at the University of Washington, sees the federal legislation as the most radical shift in child-welfare policy in the last decade. "The government has been unwilling to help kids after 18 beyond teaching them independent-living skills," he says. "That is not what parents do. A parent is not happy to kick a kid out at 18 and say good luck."

Courtney's earlier work has shown significant long-term benefits for kids who get a few more year's care versus those who are pushed out of the system at 18. His hallmark "Midwest Study," published in 2005, was instrumental in shaping the current federal legislation. That report followed 732 foster youth through their 17th, 18th and 21st birthdays. It found that along with lower rates of incarceration, homelessness and unemployment, young people in a state like Illinois, which extends care until 21, were 3.5 times as likely to have completed a year of college than peers in states like Iowa and Wisconsin, which routinely cut care at 18. (Census data show that less than 3 percent of foster kids earn college degrees, compared with 28 percent of the population as a whole.)

"The minute we kick them out they start looking for their families," says Karen Bass, speaker of the California Assembly and coauthor of The California Fostering Connections to Success Act. The legislation plans to increase spending to $70 million in California for youths age 18 to 21, largely through the newly available federal funds. "When they can't find their families, they make families of their own on Hollywood Boulevard. In L.A., they are couch surfing; you have groups of young people living together and it is homelessness, just a different form." Bass and coauthor Jim Beall say that despite the budget wrangle and deficits that California faces, the bill bears the name of 26 Assembly members, has wide cross-aisle support and will likely pass.

In this latest study of foster care, Courtney narrowed his focus on higher education. As he had already shown, young people in extended care were better equipped to pursue a higher level of education and thus vastly increased their lifetime earning potential. For an expenditure of $37,948 over the course of extended care, Courtney concludes that those foster youth will earn $92,000 more in their working life. "We are talking about spending $38,000 over one to three years versus what it costs to incarcerate somebody for 20 to 30 years," says Bass. In California, the Department of Corrections anticipates the annual cost of incarceration will jump to $53,000 in fiscal year 2009-10.

But these undeniable statistics are running headlong into the cold reality of a national financial crisis. "Here is the most significant piece of [foster-care] legislation in a decade and it may be slowed down by these

economic times," says Kathi Crowe, executive director of the Foster Care Coalition. "It's almost too bad it is optional." Nonetheless, Courtney believes that the evidence he has presented along with the National Youth in Transition Database, which will be implemented nationwide as of October 2010 and will track young people as they mature into adulthood, will force states to act. "At that point some states may be shamed into changing their laws if the outcomes of their former foster youth look much worse than the outcomes for youth in states that have extended care to 21."

But for Kyzer and the kids currently "copping a squat" on the streets, it may be too late. "I just wasn't ready," Kyzer says of being a father, holding a job and moving into his own place. Tonight he is couch surfing, but tomorrow, his only option may be an abando.

State isn't equipped to give youths a hand after they turn 18

ELISE PATKOTAK
COMMENT
(03/10/09 18:51:28)

I've said it before and I'll say it again. The state makes a lousy parent. It rarely remembers your birthday and it almost never takes a turn having all the relatives over for the holidays. But if you're a kid stuck in state custody, it's often all you have in the way of a parent except maybe for an ever changing cast of foster parents.

This is not a condemnation of the state or its system of caring for children in its custody. Given the resources we are willing to provide for this service, and given the needs of the children who become part of the system, the Office of Children's Services is pretty much doing the best it can.

The problem has always been that words are much cheaper than actual actions. So we make a big fuss about children being our future and then try to meet the needs of the future on a shoestring budget. If you think about what it costs to raise a child from birth to maturity under the best of circumstances, you can pretty much quadruple that cost for a child coming out of a nightmarish family situation who may or may not be already damaged almost beyond repair. Quadrupling the cost is probable a conservative estimate.

For many of these kids, the future is predetermined way before the state is actively involved. Whether it's because mom drank during pregnancy and brought the child into the world with 10 strikes already against him or her, or whether mom and dad created such a hellish family life of physical, sexual and mental abuse that the child is totally screwed up before he or she is 5 years old, the result is pretty much the same. The child starts life at an extreme disadvantage.

Take that child and put him into a state system that tries to supply some stability but is often hampered by rules that require the child to be bounced back and forth between birth family and foster care multiple times before the state is allowed to terminate parental rights, and you have the recipe for total disaster.

Anytime a child comes out of this kind of background with his or her head screwed on right, still able to dream of a better life and future, mentally capable of grasping academic subjects and studying for a career in life outside of adult penal institutions, I must stand up in awe and wonder and applaud that child's resilience.

There is a move in our state Legislature to allow the state to provide graduates of foster care and family services a chance at a postsecondary education, complete with some funding to support their living needs while they get their education. This is nothing more nor less than what most families do for their children as they start the process of emancipation into productive adults.

But kids coming out of the state system usually don't have a family willing and able to pick up the slack while they get that education. They have no one to turn to who can guide them through the shoals of applying for housing, putting a budget together, or getting a part-time job to help meet expenses. These kids don't have something as simple as an adult they can shoot the breeze with

over the future and what's out there for them. You know, the kind of conversation you have with your kid while you're driving them to the movies or school or sitting around during the commercials on ESPN.

The state has already started to try and meet these needs through transitional living assistance to young people as they age out of the system. That's a great start. But it isn't enough, because once we wave goodbye to them when they turn 18, they are on their own at a time when most of us would have been hard pressed to make good decisions for our future without some continuing adult guidance.

That these kids survived despite what their birth families did to them is a miracle. That they can come out of the state system and still have dreams of a better future is astounding. That there is any debate at all that we should be doing all we can for them is mind-boggling.

The Honorable
Representative Les Gara
Alaska State Capitol
Room 500
Juneau, AK 99801

Re: SUPPORT HB 126

Dear Representative Gara,

I am writing to express the support of Friends of Alaska CASA (FAC) for House Bill 126. This bill, as you know, will help foster youth transition more successfully from state care to independent living.

Currently 38% of foster youth aging out of the system end up homeless. This bill attempts to remedy this reality through several assistance measures, including extending foster care to age 21 and allowing for reentry into care until age 21 if a youth is emancipated or voluntarily leaves care after turning 18.

Additionally, HB 126 reflects a larger national movement among children's advocacy groups to extend foster care to 21 years of age. In fact, 30 states already provide this option. Extending foster care will allow youth to better prepare themselves for independent living, and avoid common problems (such as homelessness and dependence on public assistance) faced by foster youth aging out of the system.

Allowing former foster youth to reenter care after leaving voluntarily will support youth in their pursuit of higher education or vocational training. Extending foster care and allowing reentry will improve foster youths' chance of success as they transition to independent living.

Thank you for your consideration.

Sincerely,

Ryan Zinn

April 6, 2010

To the Alaska State Legislature:

As current and former foster youth of Alaska's child welfare system, we would like to express our support for House Bill 126. HB 126 aides foster youth as they make the transition into adulthood, oftentimes without a safety net or family to turn to for support once they have entered into the world on their own.

Studies show that the benefits greatly outweigh the costs to society for youth who extend foster care to age 21. Youth who extend care have better overall outcomes throughout the course of their lives. Allowing young people to remain in care until age 21 is associated with increased postsecondary educational attainment, delayed pregnancy, higher earnings, and a greater likelihood of receiving independent living services.

Statistics show that youth who leave Alaska's foster care system become homeless at a rate of 40%, fall behind in their education, are at risk of early pregnancy, and have a high rate of adult incarceration. The purpose of this bill is to help children and youth in foster care throughout the state make a successful transition to independence.

Many young people who venture out into the world on their own, have caring parents willing to allow them the option of coming home if they fall through the cracks when asserting their independence. Youth who leave the foster care system, don't have the luxury of going home. Allowing youth to re-enter the foster care system once they have left, creates a safety net for our young people and allows them room for growth.

The members of Facing Foster Care in Alaska know that this is an important bill. It will benefit the community at large by creating opportunities for foster youth to become productive, successful members of society as adults.

Thank you for your support in improving the lives of Alaska's foster children.

Sincerely,

Amanda Metivier

To Members of the House Education Committee:

I am writing in support of CS for HB 126 (EDC) which relates to the education of students who are homeless or in foster care or awaiting foster care. As you know, we have a large and growing homeless population in our district; we also have a large and growing number of students awaiting placement in foster care or who are in foster care. One of the major challenges for these young people is finding stability in their lives, including being able to attend school on a regular basis.

It is a well-known fact that when students stay in the same school for the whole school year, there is more opportunity for the student to be academically successful. The Anchorage School District and School Board have worked for years to help parents understand the importance of keeping their children in the same school as long as possible. In the case of homeless students, and those in foster care or awaiting foster care placement, we feel strongly that we need to follow the requirements of the McKinney-Vento Act for homeless students, which requires us to provide transportation to and from the student's original school for the school year. In the case of foster children and those awaiting placement, we support the language is this proposed legislation as long as there is some funding for this requirement. The Anchorage School District provided $150,000 to supplement federal funding for transportation last year and would anticipate an increase again this year.

I commend Representatives Gara, Crawford, and Kerttula for bringing this legislation forward and hope that you will support its passage.

Please feel free to contact me at comeau_carol@asdk12.org if you have need for more information.

Sincerely yours,

Carol Comeau

Representative Les Gara and Senator Bettye Davis
State Capitol
Juneau, AK 99801

February 23, 2009

Dear Representative Gara and Senator Davis,

Thank you for introducing legislation to address the needs of foster care youth, both while they are in the state's custody and when they "age-out" of the current system. Providing resources and support to our foster care children decreases the need for long-term public assistance and criminal justice resources. Responding to research that clearly identifies proven strategies for assisting our youth to independent adulthood is not only compassionate, it is fiscally sound policy.

Between 35% and 50% of foster care youth become homeless after being released from care. Covenant House Alaska (CHA) serves the homeless and at-risk youth of our state through four main programs (50% of CHA youth have been involved in the foster care system). Our Crisis Center provides shelter, food, clothing, primary health care and support resources to homeless youth. Our Community Services Center is a drop-in center that provides case management, employment assistance, educational tutoring, counseling and substance abuse referrals and life skills training. Two different programs, Rights of Passage and Passage House help youth transition to independent living and self-sufficiency. Youth can participate in either program for 18 months with up to 12 months of additional aftercare.

Through these programs, CHA is certain that increased job training, educational opportunities, rental assistance and social worker visits will benefit children in foster care. Similarly, offering consistency whenever possible through maintaining one school for children despite changes in foster care placement is essential. CHA appreciates the multi-faceted approach HB 126 and SB 105 offers.

Thank you for sponsoring this legislation and providing a voice to youth in foster care.

Sincerely,

Deirdre A. Cronin

Dear Representative Gara:

Your continued concern for Alaska's foster children and youth is admirable, and House Bill 126 demonstrates that concern.

As current and former foster youth of Alaska's child welfare system, we would like to thank you for your ongoing support in addressing the need for reform. Many of Alaska's foster children are being set up for failure due to a state system that is lacking many of the resources these young people need to succeed. Statistics show that youth who leave Alaska's foster care system become homeless at a rate of 40%, fall behind in their education, and have a high rate of adult incarceration. We wholeheartedly support your bill that creates opportunities for children and youth in foster care to succeed.

Thank you for your concern and your untiring pursuit to improve the lives of those who are less fortunate. You have our support.

Sincerely,

Amanda Metivier

Re: SUPPORT HB 126

Dear Representative Gara,

I am writing to express the support of Friends of Alaska CASA (FAC) for House Bill 126. This bill, as you know, will help foster youth transition more successfully from state care to independent living.

Currently 38% of foster youth aging out of the system end up homeless. This bill attempts to remedy this reality through several assistance measures, such as financial help for rent and other living expenses for up to a year after aging out, and tuition waivers for vocational or college education.

HB 126 will extend the applicability of transportation funding for foster youth so they can stay at the same school for an entire school year instead of transferring between different schools as is often the case. HB 126 will also require a quicker transfer of school records when kids do switch schools, thus easing the discomfort and disruption caused by the change.

Finally, HB 126 attempts to improve basic services within foster care. The most recent federal review of foster care in Alaska gave our state very low marks. HB 126 looks to set the bar higher by requiring the state meet federal once-a-month visit standards. Currently, some youth in care are only seen once every eight months, hardly sufficient to assist a young person with the myriad of difficult issues brought about by their unique circumstances.

Thank you for your consideration.

Sincerely,

Sallye Werner

DATE: April 8, 2009

RE: HB 168 – State certification and designation of trauma centers and creating the uncompensated trauma care fund
HB 169 – Appropriating $5,000,000 to the uncompensated trauma care fund

POSITION: Support

ANTHC supports HB 168 and HB 169 as important steps in increasing the trauma care capacity in the state.

The Alaska Native Tribal Health Consortium (ANTHC) is a tribally controlled, non-profit statewide tribal health organization formed pursuant to federal law to provide a range of medical and community health services for more than 130,000 Alaska Natives. It is part of the Alaska Tribal Health System (ATHS), which is owned and managed by the 231 federally-recognized tribes in Alaska and by their respective regional health organizations.

ANTHC and Southcentral Foundation jointly manage the Alaska Native Medical Center (ANMC), the tertiary hospital of the ATHS located in Anchorage. ANMC is the only Level II Trauma Center in the Indian Health Service/tribal health system nationally. ANMC is also the only Level II Trauma Center in Alaska. The nearest Level I Trauma Center is in Seattle.

Trauma system development is a public health priority. A comprehensive system of trauma care is an essential part of the public safety net. Regionalized trauma systems based on a network of coordinated Trauma Centers designated at the appropriate level improves health outcomes and reduces costs. ANMC, as the highest level designated Trauma Center in the State of Alaska, is the lynchpin for the state's trauma system, and provides the foundation for continued statewide system development.

Trauma Center designations were created as a way to improve outcomes for patients who face extraordinary medical issues. On balance, early and appropriate medical attention to life-threatening health issues reduces overall length of stay in the hospital and reduced complications for many patients. Without trauma care, the costs of health care for trauma patients will be greater, including trauma patients who are Medicaid eligible.

The cost of providing trauma care at ANMC has more than doubled over the past four years and funding has not kept pace. ANMC's Trauma Center simply cannot be maintained at current revenue levels. If ANMC's Trauma Center designation is discontinued because funding levels have rendered the service unsustainable, the hospital faces reductions in staffing. Diversions of patients to non-tribal providers would increase, and because the federal government reimburses 100% of the cost of services provided for Native clients at Native facilities but a smaller percentage at non-tribal providers, there would be an increased cost to the state's general fund budget.

ANTHC supports HB 168 and HB 169 as important steps by the State to encourage and support appropriate trauma care options for Alaskans. Because we are Alaska's only Level II Trauma Center we recommend removing the language in section (d) on Page 2, Line 11, that limits appropriations to any one facility to 25%.

Thank you for your consideration.

-
- The primary intent with this bill is to help foster youth transition more successfully from state care to independent living. Currently between 30-40% of foster youth aging out of the system end up homeless. This bill attempts to remedy that through several assistance measures, such as financial help for rent and other living expenses for up to a year after aging out, and tuition waivers for vocational or college education.

- The bill also attempts to facilitate better academic success for foster youth, which has long term benefits through the transition out of care and into adulthood. HB126 will extend the applicability of transportation funding for foster youth so they can stay at the same school for an entire school year instead of bouncing around between different schools as is often the case. HB126 will also require a quicker transfer of school records when kids do switch schools, thus easing the discomfort and disruption caused by the change.

- The bill also attempts to improve basic services within foster care. The most recent federal review of foster care in Alaska gave our state very low marks. HB126 tries to set the bar higher by requiring the state meet federal once-a-month visit standards. Currently, some youth in care are only seen once every eight months, and this is hardly enough to know how a youth is coping with the myriad of difficult issues brought about by their unique circumstances.

Subject: HB 126

Dear Representative Keller,

I am writing today to let you know that I strongly support House Bill 126 which provides for necessary support to foster children making the transition from foster care to full adulthood. By definition, foster children have had many ups and downs in their lives under the best of conditions, and as a mother and an active member of my community in Kenai, I am well aware that the transition from teen to adult is a powerful, difficult, important, exciting and dangerous time for everyone regardless of circumstances. It is not the time for their support system to drop them and leave them to fend for themselves.

My own children are past this time, and still turn to their folks for strength and purpose in times of setbacks and questions. As guardians of these children, the State of Alaska has the privilege and duty to offer them support and guidance and in making the best choices available to these citizens. It'll not only give their lives more potential, but will strengthen our state and our nation now and for the next generations.

I urge you to vote yes on House Bill 126.

Representatives-

Please vote to support our foster kids with the benefits this bill will provide. I have been many hours over the years working with children; special needs, homeless and fostered kids there is great need for these kids of services.
Our state of Alaska is one that must do more to help those kids that are having a hard start in life and this is one of those ways. Providing the services that will allow them to transition into 'adulthood' with additional help its critical.
My husband and I, as residents of a 'bush' village are doing more each year to offer support where we can do children in our area.
This particular group of kids covered by this bill could see great benefits from just this small effort.
Please support passage of this bill.

Subject: HB126

Dear Members of the Health and Social Services Committee,
I am writing in support of the HB126 bill that is currently be reviewed and voted on this week. It is my understanding that approximately 40% of Alaska's foster youth end up homeless after coming out of foster care, and less than 10% end up going to college. This is not acceptable and we need to provide more support for those coming out of the foster care system. If we want productive, capable adults then let's help this group overcome the many obstacles that they face. Really the costs of this program will far outweigh the costs of doing nothing and putting this population in greater risk of ending up in the penal system or on social programs that will be much more costly over a lifetime. The loss of economic potential is enormous and we need to help these young adults become productive citizens of our state. Thank you for time and consideration of this legislation.
Sincerely,
Britteny A. Cioni

Subject: HB 126 Homeless Students

Dear Co-Chairs Herron and Keller, and Committee Members:

I am writing about CSHB 126 which will be heard by the House Health and Social Services Committee on Tuesday.

The Anchorage School District continues to support this bill, but some of the changes made by the Committee Substitute raise concerns.

1. The Committee Substitute added a provision requiring transportation during summer school. In the past, we have not provided transportation during summer school except for some of our Title I schools. Not all homeless students have a Title I school as their school of origin. In addition, not all schools of origin will be open during summer school. On its face, this language would require us to transport a homeless student to his or her school of origin even if the school of origin was closed for the summer.

Keeping a student in their school of origin during the regular school year is important. Keeping a student in the same school is less important during summer school because the teachers are different, the students in the school are different, and the curriculum is different. I ask that this new requirement be removed from the bill.

2. The Committee Substitute also removed a provision that currently exists in law and was in the original bill. That provision allowed for a waiver of the transportation requirement if the Superintendent found, in writing, that attending a different school was in the child's best interest. An example of when this waiver might be used is when a homeless child is living with relatives and the homeless student might be better off attending school with the other children in that household. A waiver could also be useful in a district like Kenai where it might not be in the student's best interest to be transported from Seward to the student's school of origin in Homer each day. Please re-insert the waiver provision that was in the original bill.

Thank you for your consideration.

ANALYSIS: *(Attach a separate page if necessary)*

The Alaska Railroad Corporation (ARRC) is a public corporation supported by revenues generated through its freight, passenger and real estate services. ARRC does not receive state subsidies for operations or capital improvements. This bill proposes to make the ARRC subject to the Executive Budget Act.

Making ARRC subject to the Executive Budget Act would have significant financial impact to the corporation, not all of which can be easily quantified at this time.

(Revised 9/10/2008 OMB)

4654

STATE OF ALASKA
2009 LEGISLATIVE SESSION

BILL NO. HB 127

ANALYSIS CONTINUATION

Among the larger impacts are the following:

1. Possible loss of revenue - unquantifiable
Due to decreased operational flexibility caused by rigid budget guidelines it is very probable that ARRC would see a loss of revenue. This loss could be quite large if significant unbudgeted revenue opportunities arise, as they often do.

2. Increased costs for borrowed funds - unquantifiable
This amount is currently unknown and dependent upon level of future borrowing. There would be an impact to debt pricing ARRC would receive from lenders given that future debt payments would be subject to legislative appropriation. Interest costs to the corporation would increase.

3. Implement Accounting & Budget Systems - $1,000.0
The current ARRC financial system is not designed to accommodate legislative appropriation control requirements for either operating or capital activities. Modification to the existing system would be explored, but is most likely not feasible. This would require development and implementation of a new financial system for the corporation. Use of the state's budgeting system would most likely suffice, but the accounting system in use by the state would not meet ARRC's needs for financial and management reporting.

4. ARRC personnel increased costs - $264.6
To appropriately comply with the requirements of the Executive Budget Act, two additional staff will be required, one for financial and accounting assistance and one for legislative and budget coordination.

5. Increased travel increased costs - $10.0
Travel costs associated with Legislative budget hearings and coordination with Department of Commerce, Community and Economic Development and the Office of Management and Budget would increase Anchorage to Juneau travel significantly for the CEO, CFO, and AVP Corporate Affairs.

March 27, 2009

Representative Bill Stoltze
Co-Chair, House Finance Committee
Juneau, Alaska

Re: Opposition to HB 127

Dear Representative Stoltze:

My name is Jack Burton and I have worked for the Alaska Railroad for the past 45 years. For 14 of those years, I was the president of the American Federation of Government Employees, AFL-CIO Local 183 (AFGE), the ARRC's largest union, representing over 330 ARRC employees. For the past 19 years, I have also served as the labor representative on the Alaska Railroad Corporation's (ARRC) Board of Directors. I am writing on behalf of myself and the approximately 620 ARRC union employees to express our opposition to HB 127, which seeks to put ARRC under the Executive Budget Act (EBA).

First and foremost, I speak on behalf of all union employees of the ARRC when I say that we are fiercely opposed to the ARRC's being placed under the EBA because it is a direct impairment of a contractual relationship that our unions have had with the ARRC for decades, and one under which we operate now and will operate for years to come under current collective bargaining agreements. When the state bought the railroad and created the corporation to operate it, the state explicitly mandated that the employees of the railroad were to be employees of the corporation, not employees of the state. The unions were explicitly exempted from coverage by the Public Employee Relations Act (which governs the relationship between the state and its unions), and separate, independent labor laws governing the railroad's unions contracts and its bargaining with the railroad were created solely for the railroad and its unions.

Over the years, the railroad's unions have bargained in good faith with the railroad for all terms and conditions of employment, and have successfully entered into binding contracts with the railroad on each occasion, contracts that contain mutually agreed-upon wages, hours, and working conditions for union members. In doing so, the unions relied on the labor relations provisions of the corporation's statute, the railroad's financial independence from the state, and the railroad's self-sustaining ability to fulfill the promises that it made in those collective bargaining agreements.

Placing the ARRC under the EBA will drastically undermine the very foundation upon which the railroad and its unions have established their relationship and negotiated their collective bargaining agreements. None of the unions' bargaining agreements was negotiated with the understanding that their terms would be "subject to appropriation," nor did the unions ever intend any such restrictions. Instead, the unions bargained for wages that were contractually ensured by railroad-generated revenues, revenues that the unions knew they contributed to by expending their hard efforts. Placing ARRC under the EBA not only improperly subjects the wages and other terms and conditions of my members' employment to the vagaries and uncertainties of the political process, but also directly impairs the rights for which they have already bargained with the ARRC. We steadfastly oppose such an impairment of our current and future employment rights with ARRC.

In addition to the foregoing, my union members also believe that the enactment of HB 127 will violate the mandate in the federal transfer act that requires the revenues generated by ARRC to be retained and managed by ARRC for railroad and related purposes only. Subjecting ARRC to the EBA may generate litigation from employees who feel their contract rights have been violated or that railroad jobs may be lost if the Legislature has the power to divert ARRC's revenues and federal appropriations to non-railroad purposes.

As an employee of the railroad under both governmental financial control and corporate financial independence, I speak from hard-earned experience when I say that the operation of the railroad under political control was a colossal failure. I worked for the Alaska Railroad for 20 years before it was sold to the state and can tell you that a major reason that the railroad lost money every year was its inability to obtain adequate operating and capital funds under the politically charged federal budget appropriation process. The perpetual lack of funds resulted in deterioration of the railroad's track and equipment which in turn increased operating costs which led to the loss of existing business and the inability to obtain new business. It seems we were always operating in a survival mode because the politicians in congress always found better things to do with our tax dollars. We could never count on receiving sufficient funds and as a result could never plan for more than a year in advance. You will risk the same thing happening to ARRC if you put it under the EBA where funding decisions will be based upon political reasons rather good business judgment and management.

I also participated in the transfer process when the railroad was sold to the state and I testified before the Legislature on several occasions with regard to labor issues. Although there were two or three competing bills concerning the structure of the state entity that would own and operate the Alaska Railroad, every one of them required the railroad to be operated as a business as opposed to a government agency and every one of them exempted the railroad from the EBA. The Legislature was very clear that they wanted the railroad to be operated on a self sustaining basis and not require yearly infusions of tax dollars like the federally owned railroad did. Based on the experience of the federally owned railroad, they knew that injecting politics into a business operation was a recipe for disaster. The ARRC business model has worked very successfully for the past 24 years so why risk messing it up now?

Lastly, I am surprised that this bill is being seriously considered by a private sector oriented legislature. In the recent past, the Legislature has looked for ways to reduce government inefficiencies by privatizing prisons, schools, the state ferry system, motor vehicle and driver licensing, etc. etc. The enactment of HB 127 will actually increase government inefficiency by taking what is currently a profitable and self-sustaining public asset and turning it into an inefficient government bureaucracy which is exactly what the Alaska Railroad was before it was sold to the state. It makes no sense to make such a sweeping change in the absence of any concrete evidence that the ARRC business model is some how broken and needs repair.

Representative Stoltze, I am charged with representing the best interests of all of my union brothers and sisters at the ARRC. In that capacity, I cannot emphasize enough the opposition your bill faces from ARRC organized labor. We have an established, successful bargaining relationship with the ARRC under its current status, and we have no interest in being subject to the well-known political whims of the legislative appropriation process. We appreciate your bearing our opposition in mind as you consider this bill.

Sincerely,

Jack F. Burton

Jack Burton

DETAILED COMMENTS ON HB 127

Submitted by the Alaska Railroad Corporation (ARRC)

Loss of Flexibility Needed to React to Business Changes

- **Changes in railroad business require the ability to respond quickly with capital investment and/or operating increases.**

Unlike other public corporations such as AHFC and AIDEA, which are not primarily operating entities, ARRC operates a multifaceted freight and passenger transportation and real estate business that require it to be responsive to the needs of Alaska citizens and businesses in order to be successful. The railroad industry in America is engaged in a capital intensive business that has experienced significant changes in customers' requirements, and therefore significant changes in its infrastructure, equipment and technology. Quick action is often required to respond to customers' needs and to seize business opportunities. For ARRC, this translates into the need for the flexibility to make business decisions unencumbered by rigid yearly appropriation schedules. For example, a decision to acquire new high capacity hopper cars was made during negotiations regarding export coal, in order to make ARRC's coal customer more competitive in the world markets, as well as improve service to other customers. Because this occurred during the middle of a fiscal year, it would have been difficult if not impossible to respond in a timely manner had it been necessary to seek administrative and legislative approval.

Effect on Borrowing and Contracts

- **The proposed bill may impair ARRC's ability to perform its legal obligations under long term contracts and loan agreements.**

The proposed bill does not address several legal problems that may arise if ARRC is subjected to the EBA. First, ARRC has been operating as a business for the past 24 years and has incurred legal obligations under existing long term contracts to provide a wide variety of transportation services to customers under constantly changing market conditions. ARRC also has several long term loan agreements that require ARRC to make periodic interest and principal payments. None of these agreements contains language conditioning ARRC's duty to perform on its receipt of sufficient appropriations from the legislature, as is the case in a typical state contract. Even if ARRC retains all its revenues, if it cannot expend them except in strict accordance with a legislatively approved annual budget, our existing customers/lenders may have valid concerns about its continuing ability to perform as their contracts require and may assert that their contract rights have been impaired in violation of Article I, Section 15 of the Alaska Constitution.

Second, putting ARRC under the EBA may create a risk that ARRC's existing long term commercial debt could be called. All of ARRC's loan agreements contain provisions

327 W. Ship Creek Avenue | MAILING ADDRESS P.O. Box 107500 Anchorage, Alaska, 99510-7500 | TEL 907.265.2300 FAX 907.265.2416
Anchorage, Alaska 99501 | AlaskaRailroad.com

that allow the lender to declare a default and/or accelerate the loan if, as a result of changed circumstances, the lender deems itself insecure. Our lenders may have a legitimate reason to be concerned about ARRC's ability to repay their loans if the corporation is subjected to the EBA because there is little ARRC can do to assure them that the Legislature will appropriate enough money to ARRC to make the payments required on their loans.

Putting ARRC under the EBA will also seriously impact the $165,000,000 in outstanding FTA Formula Funds backed bonds that ARRC issued in 2006 and 2007. ARRC's outside bond counsel has advised that if HB 127 is enacted, (1) it will be viewed by the bondholders as an impairment of their rights in violation of AS 42.40.675, (2) will likely result in a down grade in the ratings of the bonds and (3) may violate the ARTA mandate that revenues generated by ARRC "be retained and managed by the stated-owned railroad for railroad and related purposes."

Third, ARRC must sometimes borrow funds to enable it to fulfill its contract obligations. While this bill leaves intact several provisions regarding borrowing by ARRC, placing the corporation under the EBA may jeopardize the borrowing ability of the corporation. It may be difficult for ARRC to assure its creditors that the legislature will appropriate sufficient money, or approve line entries in its budget, to pay the debt service on their loans.

Fourth, even if ARRC can overcome the non-appropriation risk, borrowing will likely be more costly. ARRC is able to borrow money at a lower interest rate than other tax exempt entities such as the State because ARRC currently meets the definition of a "small debt issuer" under Section 235 of the Internal Revenue Code. This provision allows banks to deduct approximately 80% of their carrying costs on loans to ARRC, which has in the past resulted in an interest rate that is 80-100 basis points lower than the usual tax exempt rate. If ARRC is subjected to the EBA, its finances would no longer be considered separate from the State's and it will no longer qualify for this important benefit. As a result, ARRC's cost of borrowing could increase markedly.

In short, subjecting ARRC to the EBA will limit ARRC's ability to enter into future long term contracts with its customers and lenders because every agreement it negotiates will have to have the caveat at the end "SUBJECT TO LEGISLATIVE APPROPRIATION." If we cannot assure our customers that we will have the funds and the authority to spend them to perform the services they require, they are likely to go elsewhere.

Effect of State Fiscal Year

- **ARRC's business is highly seasonal, and moving to the state fiscal year would split the business season.**

Business activity in Alaska is highly seasonal. Subjecting ARRC to the EBA will require it to change from its current calendar year as fiscal year, to the state fiscal year that ends on June 30. While there does not appear to be a specific mandate to this effect, the requirement to participate in the governor's budgeting process and seek legislative approvals will necessitate such a change. Prudent businesses close their fiscal year at the end of a business cycle, not during its busiest time. The railroad's "busy season" ends

around November 1, and the calendar year is therefore the most appropriate fiscal year for ARRC. Not only would the state fiscal year artificially bifurcate the business year, but it would require the corporation to spend considerable time participating in the budgeting process at the same time it is gearing up to expand operations in May. This is not an efficient use of resources.

Effect on Liability

- **By assuming substantial actual control over the financial and legal obligations of ARRC, the State will likely subject itself to full liability for ARRC's operations.**

A major purpose of setting up an "enterprise fund" such as ARRC is to shield the State from liability in the event the enterprise goes under or incurs a catastrophic liability. ARRC has been a defendant in numerous lawsuits since its creation, and the State of Alaska has never been made a party as a result of ARRC's actions, nor called upon to answer in damages in any of these cases. Obviously, the language of AS 42.40.500 and the arm's length nature of the corporation's past relationship with the State have had the intended effect and spared the State these liabilities. This is not likely to continue once the State injects itself so substantially into the railroad's business decision-making process. Simply put, the more control you exercise over an entity, the more likely you are to become liable for the entity's obligations.

Violation of Alaska Railroad Transfer Act, 45 USC 1201 et seq. (ARTA)

- **The Transfer Act specifically requires that ARRC retain control of its funds and budget. The federal government could raise this violation of ARTA as a breach in its contract with the State of Alaska transferring the railroad.**

Section 1207 of ARTA mandates that the revenues generated by ARRC be "retained and managed by the State-owned railroad for railroad and related purposes". This provision was inserted in ARTA to prevent the state from repeating the mistakes that caused the federally owned railroad to lose money in almost every year of its 60 year history. A major reason that the federal railroad lost money was that all of its funds had to be appropriated under the federal budget process which deprived the railroad of the flexibility needed to respond quickly to business opportunities and prevented it from obtaining needed capital to maintain or improve service.

This bill could infringe on that "management" right in several respects. For example, inclusion of ARRC under the EBA could have the effect of prohibiting the corporation from hiring additional employees or expending any money or incurring other obligations unless these items were included in an operations plan approved by OMB, which must in turn comport with a budget approved by the legislature. See AS 37.07.080(d). If ARRC receives excess funds from its operations (beyond what is expected and accounted for in its approved budget), it must convince the administration to propose a revision to the Legislative Budget & Audit Committee and possibly wait 45 days before expending the money. See AS 37.07.080(h). Not only does this run afoul of "management" rights provided in ARTA, but it also provides another example of the potential loss of business if ARRC is

brought under the EBA. One can foresee a multitude of business opportunities or potential employees that will not wait the time required to obtain such approvals and, accordingly, be lost to the corporation.

As noted below, there does not appear to be any requirement that all of the money generated by ARRC be paid into the state treasury. However, in light of the "appropriation" language used in the bill, the bill's intent is not entirely clear. If the design is for ARRC revenues either (1) to be "state funds" which are then appropriated back to the corporation or (2) to be held by the corporation but only expended pursuant to an approved budget, then the corporation no longer has the "management" rights required by Section 1207 of ARTA. In addition, if all of ARRC's revenues are not either appropriated back to the corporation or approved to be used in the corporation's budget, part of ARRC's revenue could be used to fund a program or project that is totally unrelated to the railroad. This too would violate the mandate of ARTA Section 1207.

EBA Process Adds Time and Cost Without Adding Value

- **Participating in the budgeting process as proposed will substantially increase the costs of doing business. It is unreasonable to expect the customers to bear this additional cost.**

Subjecting ARRC to the EBA will add an unnecessary layer of expense and time consuming government bureaucracy to what is currently a profitable and self-sustaining asset. Numerous provisions throughout the EBA impose procedures with considerably different focus and detail than ARRC currently develops, such as the "agency program," "financial plan" and "operations plan." In addition, involvement of additional layers of governmental agencies (OMB, LB&A, etc.) to business sector decision-making will delay the process and therefore result in less flexibility to react to business climate changes. All of these add significant costs to ARRC's operations without adding any value. These costs will ultimately be paid by railroad customers or, worse still, by the corporation in the form of lost opportunity.

Inconsistency of Approach

- **The inconsistencies found in the bill illustrate the difficulty in separating the financial management of the corporation from the operational management left to ARRC.**

The bill expressly subjects ARRC's revenues to legislative control by making the corporation subject to the EBA. Yet, it does not change the primary legislative purposes embedded throughout the Alaska Railroad Corporation Act that require the corporation (1) to be exclusively responsible for management of the financial and legal obligations of the Alaska Railroad, (2) to carry out its responsibilities on a "self-sustaining basis," and (3) to provide for the "prudent operation of the railroad according to sound business management practices." The bill requires ARRC to "request, in accordance with AS 37.07, appropriations from the legislature to carry out the provisions of this chapter". Under this bill, ARRC will have to seek an annual appropriation for all expenditures of the corporation, with all the

accompanying budget, operations plan and other documents that are generated in the governor's budgeting process. However, the EBA itself does not require ARRC revenues to be paid into the general governmental treasury[1/] and it is unclear whether the bill contemplates this result. If ARRC is to retain its receipts, it is inconsistent to require the corporation to seek appropriations for operating and other expenditures.

Conclusion: HB 127 Seeks to Fix Something That is Not Broken

The most perplexing issue about HB 127 is that the impetus for the bill isn't coming from the citizens or businesses served by the railroad, or from the communities being served. Nor is it supported by any research or studies such as those provided by the Harvard Business School and University of Alaska Institute for Social and Economic Research that led the 13th Legislature to adopt the current business model that exempts ARRC from the EBA. The railroad as it exists today has provided Alaska with the best of all possible worlds-- the State owns the asset but has none of the liability associated with its operations, the railroad pays its own way as well as making a profit, and it operates an essential transportation service without any burden on the taxpayers. In short, the Alaska Railroad is working just fine as it is currently structured. It makes no sense to make so sweeping a change without any demonstrable reason.

[1/] Another section of the Public Finance title, AS 37.05.146, provides that ARRC receipts are not general fund receipts. Without any other section of that title being made applicable to ARRC, there is apparently no requirement that corporation funds be paid over to the state treasury.

HB 127 COMMENTARY

IS IT TIME TO RESTRUCTURE THE ALASKA RAILROAD CORPORATION?

HB 127 seeks to make a fundamental change in the operation of Alaska Railroad Corporation (ARRC) despite the fact that the current operational structure has worked very well for the past 24 years and has produced substantial benefits for the State of Alaska since the State acquired the Alaska Railroad from the Federal Government in 1985. In ARRC as currently formulated, the State has a well-run, self-sustaining transportation instrumentality that provides safe, economical, and efficient transportation to residents, businesses, visitors, and military installations in the State. In the past 24 years since transfer, ARRC has been profitable for 20 of those years, made hundreds of millions of dollars in capital improvements to the railroad's track infrastructure, facilities and railcar/locomotive fleet and has grown to have an asset value approaching $1 billion. All of this was accomplished without ongoing State appropriations.

The enormous success of the present ARRC model did not occur by accident. Rather, it was the result of an essential policy decision made by the decision makers within the State of Alaska after several years of studies, debate, discussions and careful consideration as to the type of entity that would operate the railroad under state ownership.

Alaska Railroad Perspective: Government Agency or Business?

During the 60 years prior to the transfer of the Alaska Railroad to the State in 1985, the Federal Government operated the railroad primarily from a governmental perspective as a typical, inefficient federal bureaucracy within the Federal Railroad Administration (FRA) that required yearly injections of tax payer dollars to meet its operating and capital expenses. Historically, the role of the railroad was subject to considerable confusion. At various times it was a frontier development tool, a part of the national defense system, a vehicle for implementing federal policies, a resource recovery mechanism, a repository for surplus federal material, a means of social service delivery and, on occasion, a market place railroad. The lack of a clear set of goals placed a severe limitation on the railroad's ability to satisfy any one of these purposes adequately. As a consequence, except for a few years during World War II and the pipeline construction, the Alaska Railroad lost money every year.

Moreover, because the Alaska Railroad was subject to the federal capital budget/appropriation process, it was never able to obtain sufficient capital money to fund such necessary items as annual cross-tie replacement, track surfacing, major equipment repair/refurbishing, new equipment acquisitions, building repair, etc. The Federal Government always seemed to have better, more politically motivated things

to do with its money. As a result of the lack of capital investment, the physical plant of the railroad deteriorated, operating expenses increased and service levels declined. At the time of transfer, there was an estimated $100,000,000 in deferred maintenance associated with the property.

By 1979, it became apparent that the Alaska Railroad had become a fiscal and political liability for the FRA and it approached the State of Alaska with a proposal to transfer the railroad to the State. The State responded that while it regarded the railroad as an integral part of Alaska's transportation infrastructure, it was hesitant to involve itself directly in the operation of the railroad which had historically operated at significant annual losses. In 1980, the State commenced an in-depth assessment of the multitude of issues related to the transfer proposal. It retained experts to advise it and commissioned reports and studies to be prepared as to what would be the best organizational alternative for the Alaska Railroad under state ownership, one that would not perpetuate the financial failures of the federally owned railroad.

With this goal in mind and based upon input from several experts, the State made the critical policy decision that a state owned railroad had to be governed by a business orientation rather than a government agency perspective in order to prevent the railroad from becoming entrenched as another state bureaucracy. Based upon studies prepared by such entities as the Harvard Business School and the University of Alaska Institute of Social and Economic Research, the State decision makers determined that each potential organizational structure should be measured by the extent to which it satisfied the following criteria:

1. Freedom from—and equal legal standing with—government to take advantage of management and market opportunities.

2. Ability to access and obtain private and public capital funds.

3. Management freedom for the railroad's operational decisions within established policies.

4. Clear-cut lines of management responsibility and accountability for decisions which are made.

5. Marketing freedom within established policies and budgetary constraints.

6. Clear decision-making authority without a cumbersome and bureaucratic process.

7. Management capability to make long-term commitments within established policies.

8. Management freedom to negotiate solutions to problems and to take advantage of service opportunities.

9. Industrial development capability on railroad land.

10. Performance-based personnel management including the direct ability to hire, fire, promote, train, supervise and direct required railroad employees.

11. Ability to provide financial and other incentives for performance.

Using the above criteria, the 13th Alaska Legislature determined that the organizational structure that would provide the best chance for a viable state owned railroad was a public corporation that (1) would be exclusively responsible for the management of the financial and legal operations of the Alaska Railroad, (2) would have the ability to raise capital from the private sector, (3) would carry out its responsibilities on a self-sustaining basis, and (4) would provide for prudent operation of the railroad according to sound business management practices, i.e. the Alaska Railroad Corporation as it is currently structured under AS 42.40. The 13th Alaska Legislature specifically exempted ARRC from the Executive Budget Act in order to satisfy the abovementioned organization criteria and to assure that the railroad would have the flexibility to operate from a business perspective.

Proposed HB 127 seeks to place ARRC under the Executive Budget Act. If adopted, this legislation will turn the railroad into a line agency of the State that will be unable to respond quickly to business opportunities and may even have to compete for state operating and capital funds with other agencies. This organizational structure was expressly rejected by the 13th Legislature because the same limitations and problems encountered by the Alaska Railroad as a federal agency would also be present with the railroad as a state agency.

The in-depth assessment of the Alaska Railroad conducted during the five years before transfer determined that the majority of the federally owned railroad's financial problems were due to the requirement that the railroad follow federal budgeting procedures rather than allowing its management to develop operating and capital programs on the same basis as a privately owned railroad. Specifically, the federal budget procedures requirement caused the following problems:

1. Obtaining needed capital appropriations was difficult and usually political, providing the Alaska Railroad with little assurance that required funds would be available when needed. The funding by appropriation mechanism made it impossible for the railroad to realistically plan and budget for more than a year in advance. The lack of needed capital also caused the railroad's physical plant to deteriorate, which increased operating costs and made it more difficult for the railroad to compete for new business.

2. Eliminated the flexibility management needed to take advantage of new business opportunities. Alaska's economic activity is dynamic, which means that rail service needs the ability to change frequently during a fiscal year. Under the funding by appropriation mechanism, the federally owned railroad

lost numerous business opportunities because, needing congressional appropriations, it could not make business commitments quickly enough to meet the potential customer's needs.

3. Compliance with the bureaucratic federal budget procedures created an expensive and time consuming burden on the Alaska Railroad. The railroad was required to spend time trying to force its operation into a format that was designed for federal agencies. This resulted in a substantial amount of nonproductive time being expended in preparing reports, budget submittals, etc. that had no significant management value.

Considerable State Oversight Exists in Current Business Model

Although the 13th Legislature took great care to insulate ARRC from unnecessary and burdensome government interference, it also recognized that under State ownership, the Alaska Railroad is a public entity that serves important public purposes. While the exemption of ARRC from the Executive Budget Act (EBA) solved the major problems that plagued the federally owned railroad, in a effort to assure accountability to the public without unnecessarily interfering with the railroad's mandate to operate freely in the competitive market place on a self-sustaining basis, the 13th Legislature imposed several significant State oversight mechanisms over ARRC's operation and management practices to replace the oversight found in the EBA. This oversight is accomplished by the following requirements:

1. The ARRC Board of Directors is responsible for providing an annual report of the operations and financial condition of the corporation to the Governor, making it available to the legislature as well.

2. The ARRC Board of Directors is responsible for initiating both a financial and performance audit each year. As required by statute, the financial audit is performed by an independent certified public accountant. Copies are provided to the Governor and the Legislature each year. In addition, a recognized railroad management expert conducts the annual performance audit to ensure ARRC is managed and operated effectively and efficiently.

3. ARRC must file an oversight report with the Legislature and Governor before it undertakes expansion, reduction, or diversification of train services that represents a significant and permanent change in service level.

4. Legislative approval is required for certain corporate actions, such as disposing of the Railroad's entire interest in land, leasing land for longer than 55 years, extension of rail lines or issuing bonds. In addition, any exercise of the power of eminent domain by the corporation requires the approval of the Governor.

5. The Legislative Budget and Audit Committee regularly reviews ARRC's operation and management practices.

6. ARRC's procurement procedures are required to be substantially equivalent to state procurement requirements.

7. ARRC employees and directors are subject to the Executive Branch Ethics Act.

8. The Commissioners of the Alaska Department of Transportation and Public Facilities and the Department of Commerce, Community and Economic Development both serve on ARRC's board of directors.

9. ARRC's spill prevention and response plans are filed with and regulated by the state. ARRC is required by state law to show sufficient financial responsibility to respond to spills.

10. ARRC must provide public notice before entering into leases or other disposals of an interest in land.

11. ARRC must notify the Department of Law within 30 days before initiating any legal action.

12. The railroad is required to be operated under the jurisdiction of the Surface Transportation Board as required by the Alaska Railroad Transportation Act of 1982.

Conclusion

The rationale for exempting ARRC from the EBA is as valid today as it was 24 years ago. In exempting ARRC from the EBA, the 13th Legislature understood the need for the state-owned railroad to operate as an independent business, free from political concerns and the unnecessary cost of bureaucratic attachments. They understood that railroad business, safety, and environmental decisions have to be made based on the facts and merits of the situation, and not unnecessarily biased or encumbered by political considerations. They understood that dependence on appropriations from the State would automatically slow down day-to-day decision-making in a very complex and dynamic transportation business where customers depend on the railroad's ability to respond quickly to market demands.

In short, the ARRC business model, as it exists today, works very well and, as a result, ARRC has never requested State dollars for its operation. We firmly believe that the Legislature should be proud that this business is providing a valuable service to Alaska's economy, satisfying its customers, and paying its own way. The Alaska Legislature should not undermine ARRC's continuing viability by injecting the EBA into its operations. ARRC needs to be at the very top of its game if it is to someday

support a new pipeline, Department of Defense development, growing tourist numbers, a future need for commuter rail support, and/or expansion into Canada or ultimately north beyond Fairbanks. HB 127 threatens that readiness to take on growth and development within the state, a hallmark of ARRC's history and track record.

COMMENTS ON HB 127
Executive Summary
Submitted by the Alaska Railroad Corporation (ARRC)

Reasons why placing ARRC under the Executive Budget Act (EBA) is a bad idea:

- Will cause ARRC to lose the flexibility needed to respond to business opportunities. Changes in railroad business require the ability to respond quickly with capital investment and/or operating increases when customers or circumstances demand it, a condition no other state entity such as AHFC or AIDEA must contend with. The proposed bill will make it very difficult to respond to market opportunities in a timely fashion.

- Will cause concerns by ARRC's major customers/lenders (e.g. Flint Hills, Usibelli Coal Mine, Lynden, TOTE, Princess, Holland America, Wells Fargo Bank) as to its ability to perform under existing long term contracts. Passage of this bill may also constitute an impairment of contract rights in violation of Article I, Section 15 of the Alaska Constitution and a impairment of bondholders' rights in violation of AS 42.40 675. ARRC's existing agreements do not contain language conditioning ARRC's duty to perform on its receipt of sufficient appropriations from the legislature, as is the case in a typical state contract.

- Will seriously impact $165,000,000 in outstanding FTA Formula Funds Bonds.

- ARRC's current fiscal year is the calendar year. Its business is highly seasonal, and moving to the state fiscal year would split the business season, something no prudent business person would do.

- By assuming substantial actual control over the financial and legal obligations of ARRC, the state may subject itself to full liability for ARRC's operations. The more control you assert over an entity, the more likely it is that you will be held responsible when things go wrong.

- May violate the federal Alaska Railroad Transfer Act (ARTA) which specifically provides that ARRC is to retain control of its funds. This provision was inserted in ARTA to prevent the state from repeating the mistakes that caused the federally owned railroad to lose money in almost every year of its 60-year history. A major reason that the federal railroad lost money was that all of its funds had to be appropriated under the federal budget process which deprived the railroad of the flexibility needed to respond quickly to business opportunities and prevented it from obtaining needed capital to maintain or improve service.

- EBA process adds time and cost without adding value.

- Bill seeks to fix something that is not broken. Putting ARRC under the EBA has been brought up numerous times by various parties since ARRC's creation. In each instance, the current "business" model was determined to be the superior choice.

Sponsor Statement For House Bill 127

House Bill 127 would place the Alaska Railroad Corporation under the Executive Budget Act. The Alaska Railroad Corporation has been owned by the State of Alaska since 1985 and is governed by a seven member board appointed by the Governor.

The Executive Budget Act (AS 37.07) is the statute that outlines the state budget process. It has a successful history of providing transparency and accountability in public expenditures.

The Executive Budget Act outlines procedures for accountability and review by both the Executive and Legislative branches of our government. It is a very straightforward process with nothing to fear and nothing to hide.

Our budget process often involves healthy tensions between the Executive and Legislative branches, but these deliberations provide Alaskans with a better understanding of how public funds are spent. It also provides policy makers and elected officials with the information and reasonable timeframes to make necessary budget decisions.

There are numerous circumstances over the years where public corporations have been brought under the review of the Executive Budget Act. The Alaska Housing Finance Corporation (AHFC), for example, was brought under the act during the 1990's despite concerns expressed at the time by the corporation's management.

Since that time, AHFC has improved its bond rating, purchased billions of mortgages loans and is viewed nationally as an innovator in the development of affordable and energy efficient housing programs. While the rest of our nation is facing a housing crisis, Alaska's housing market is currently considered stable.

In short - the Executive Budget Act was successful in allowing AHFC to be part of the state budget process.

BLANK ROME LLP
COUNSELORS AT LAW

MEMORANDUM

TO: Alaska Railroad Corporation

FROM: Blank Rome LLP

DATE: March 23, 2009

RE: House Bill 127

C/M # 811156-00301

We are furnishing this memorandum to provide analysis of the effects of House Bill 127 ("HB 127"), now pending in the State Legislature, on (i) the Alaska Railroad Corporation ("ARRC") Capital Grant Receipts Bonds, Series 2006 and Series 2007 (FTA Section 5307 Urbanized Area Formula Funds and Section 5309 Fixed Guideway Modernization Formula Funds) (the "Series 2006 Bonds" and "Series 2007 Bonds", respectively, and collectively, the "Bonds"), (ii) the credit ratings assigned to the Bonds, and (iii) compliance with the provisions of the Alaska Railroad Transfer Act, 45 U.S.C. §1201 et seq. ("ARTA").

1. The Effect of HB 127 on the Bonds.

The Bonds are revenue bonds secured solely by and payable solely from FTA Section 5307 and Section 5309 Formula Funds (collectively, the "Formula Funds") received by ARRC for the Federal Fiscal Year commencing October 1, 2006 and each Federal Fiscal Year thereafter. Thus, all Formula Funds received or receivable by ARRC are pledged under the Trust Indenture securing the Bonds ("Trust Indenture") and are required to be paid directly to the Trustee under the Trust Indenture for deposit in a trust fund designated "Grant Receipts Deposit Fund".

The Bonds and the Official Statements used in the primary offerings of the Bonds recite that the Bonds are not a debt or liability of the State of Alaska and further that the Bonds are not general obligations of ARRC and do not pledge the assets or revenues of ARRC except for the Formula Funds.

The Bondholders have been informed in the Official Statements that receipt of Formula Funds is subject to authorization and appropriation by the United States Congress, but that once Congress has acted, the Formula Funds in their entirety are paid directly to the Corporation or the Trustee and the obligation of the Corporation to pay all the Formula Funds over to the

Trustee is absolute and unconditional. This requirement, by the way, includes any Formula Funds ARRC is to receive under the recently enacted Stimulus legislation.

The Bondholders have never been told that the payment of the Formula Funds to the Trustee and of debt service on their Bonds is subject to appropriation by the State Legislature, a risk that would certainly have merited prominent disclosure had it been in the law at the time.

Should HB 127 be enacted, it will be necessary for ARRC to file a material event notice under its Continuing Disclosure Undertakings executed pursuant to SEC Rule 15c2-12 advising the Bondholders that their rights to unfettered payment of the Formula Funds to the Trustee and of debt service on the Bonds have been impaired by the enactment of a law conferring on the State Legislature the discretion to determine the amounts, if any, appropriated to the Grant Receipts Deposit Fund or allocated to pay debt service and that such payments are subject to the risks of non-appropriation and/or delayed appropriation by the State.

We note that in accordance with A.S. 42.40.675, the Trust Indenture includes the pledge made by the State in A.S. 42.40.675 not to impair the rights of the holders of the Bonds. We believe that the provisions of HB 127 would be viewed by Bondholders as an impairment of their rights to receive all of the Formula Funds for the Grant Receipts Deposit Fund to assure payment in full of debt service of the Bonds prior to application of the Formula Funds to other purposes, as required by the Indenture.

Parenthetically, A.S. 42.40.675 makes the same pledge to any federal agency contributing funds to ARRC. You will, no doubt, have ascertained whether any federal agency's rights contained in any grant agreement or other contractual obligation are impaired by HB 127.

2. Effect of HB 127 on Credit Ratings Assigned to the Bonds.

At the time the Bonds were issued, each Series was insured with a policy of municipal bond insurance issued by Financial Guaranty Insurance Company ("FGIC") and the Bonds then carried insured ratings of "AAA" by Standard & Poor's Ratings Service ("S&P") and Fitch ("Fitch Ratings") and "Aaa" by Moody's Investors Service ("Moody's"). ARRC also obtained unenhanced ratings for the Bonds of "A+" by S&P, "A" by Fitch and "A1" by Moody's, based on the structure outlined in Part 1 of this Memorandum.

Since the original issuance of the Bonds, the FGIC ratings have all been downgraded and the Bonds now bear the unenhanced ratings assigned to them by S&P, Fitch and Moody's, since the unenhanced ratings are now higher than the insured ratings.

If HB 127 were to be enacted, ARRC is obligated to notify S&P, Fitch and Moody's (collectively, the "Rating Agencies") that the structure on which the unenhanced ratings were based has been altered and that the Bonds now have two levels of appropriation risk — United States Congress and State Legislature. The unenhanced ratings rely on the transfer of all Formula Funds directly to the Trustee as provided in the Indenture with no risk of delay or diversion once federally appropriated.

There is a high degree of likelihood that the Rating Agencies would take action to change the ratings downward or to at least put them on negative outlook pending a closer review of the actions of the State Legislature.

ARRC will want to consult with its independent financial advisors on the Rating Agencies and their potential actions. We advise you that our experience is that in this difficult economy, rating agencies are quick to take action on the occurrence of a negative event. It is much harder and takes much longer to raise a rating than it does to lower one.

Any rating changes will require that ARRC file a material event notice pursuant to its Continuing Disclosure Undertakings.

Material event notices of the types of adverse changes described in Part 1 of this memorandum and in this Part 2 usually lead to adverse effects in the secondary market for the Bonds and affect pricing and liquidity.

3. Effect of HB 127 on Compliance with ARTA.

In the brief time we have had to review HB 127 and the relevant provisions of ARTA, we have substantial concern that HB 127 in the form now pending, violates ARTA which explicitly provides that revenues generated by ARRC, "including any amount appropriated or otherwise made available to the State-owned railroad shall be retained and managed by the State-owned railroad for railroad and related purposes." 45 U.S.C. § 1207(a)(5). This provision has always been read and applied to mean that **one hundred percent** of ARRC's revenues, whether fares, tariffs, fees or federal funds or investment income are to be kept and managed by ARRC solely for rail and related purposes. HB 127 purports to grant to the State legislature the power to determine how much, if any, of ARRC's revenues can be appropriated to ARRC in each fiscal year and that at least some of them can be deposited in the State's general fund. See HB 127, Section 3. This is clearly at odds with ARTA, which dedicates all of the money to the "State-owned railroad" (defined in ARTA to mean the authority, agency or corporation designated by the State to own, operate or manage the railroad) or, in other words, ARRC. Nothing in HB 127 indicates any recognition by the drafters of the requirement that all of the revenues of ARRC must be retained and managed by ARRC and that the Legislature cannot withhold or divert those funds to other purposes. ARTA was amended in 2004 to insert the phrase, "including any amount appropriated or otherwise made available" in Section 1207(a)(5) to make even more explicit that all revenues of ARRC from whatever source derived are to be retained and managed by ARRC.

Conclusion

HB 127 in the form now pending would be viewed as impairing the rights of the holders of the Bonds, is likely to have an adverse effect on the unenhanced ratings assigned to the Bonds and appears to conflict with Section 1207(a)(5) of ARTA.

March 27, 2009

Honorable Bill Stoltze
Honorable Mike Hawker
House Finance Committee
Capitol Building
Juneau, AK 99801

RE: House Bill 127, Alaska Railroad Subject to Executive Budget Act

Dear Representatives Stoltz and Hawker,

We are writing in opposition to House Bill 127 which would place the Alaska Railroad under the Executive Budget Act.

We are concerned that placing the railroad under the Executive Budget Act (EBA) would adversely affect the operation of the railroad. The railroad needs the flexibility to respond to changes and business opportunities as they arise and it would loose that flexibility if it was under the EBA.

The Alaska Railroad has functioned very effectively for many years. It has made a profit during all but four of the past 24 years. At the same time the railroad has spent more than $500 million to replace subgrade, upgrade the trackage, remove bottlenecks, straighten segments, etc. Much more work is needed for the railroad to be up to modern standards that will accommodate 110 car unit trains (110 tons each car) operating on a 24 our basis. It will take many more years of focused and consistent effort to accomplish this objective. The railroad needs the flexibility to manage its business in a way that will bring this about.

There is also a concern that if the railroad was subject to the EBA, the details of operating the railroad would be driven by changes of Administration and of the Legislature, rather than being allowed to focus on a long term business model. The existing business model has worked well and we urge that it be allowed to continue in that way.

Sincerely,

Steven C. Borell, P.E.
Executive Director

Louanne Christian

Subject: RE: HB 127 - Impact to ARRC Bonds/ARTA

Louanne/Ben:

I understand your concern, as this is stamped as protected by attorney/client privilege. However, as the client of Blank Rome, we can (and do) waive that privilege. Is this sufficient for you to include it?

I'm copying our Associate General Counsel on this, as he may be able to further elaborate on this topic.

Thanks.
Bill

Subject: HB 127 - Impact to ARRC Bonds/ARTA

Wendy:

Attached is a memo from one of ARRC's bond counsel team addressing the impacts HB 127 could have on ARRC's outstanding debt and other issues. Please forward for inclusion into the HFIN package.

Thanks.
Bill

About the Alaska Railroad

March 2009

AlaskaRailroad.com

ARRC Guiding Principles

Alaska Railroad Mission

Safety... Service... Profitability

Alaska Railroad Vision

Building a great Railroad across the Greatland.

An important element in fulfilling this vision is ARRC's success since 1996 in qualifying for federal funding...an entitlement afforded by the railroad's public status and its passenger service mission. As a result, ARRC has been able to greatly accelerate long overdue mainline maintenance and upgrades.

ARRC Core Values

- Integrity
- Service
- Excellence

ARRC Operating Style

- Safe
- Secure
- Customer responsive
- Financially solid
- Environmentally sound
- Employee friendly corporation

"We must provide a stable, reliable foundation that can be counted on to enhance the future economic growth of the state and the municipalities we support," Pat Gamble, President and CEO.

4679

Alaska Railroad Quick Facts

Purchase Price (January 5, 1985)

Paid to federal government	$ 22.3 million
Start-up costs & contributed capital	$ 11.9 million
Total Investment-State of Alaska	$ 34.2 million

Organization (following State purchase)

- Independent corporation owned by State
- Managed by a seven-member board of directors. Position qualifications are spelled out in law, members appointed by the Governor.
- Mandated to be self-sustaining, responsible for all its own financial and legal obligations

Financial Statistics (Jan. 1 - Dec. 31, 2008)

Total Assets	$ 856 million
Total 2008 revenues	$ 138 million
Total 2008 expenses	$ 125.4 million
2008 net income	$ 12.6 million
2009 net income budget	$ 16.8 million

Operating Data

Miles of main line	467
Miles of branch line	54
Miles of yards and sidings	135
Total miles of track	656
Freight cars (owned & leased)	1,381
Passenger cars	51
Locomotives	57

Operating Statistics (Jan. 1 - Dec. 31, 2008)

Passenger ridership	541,019 passengers
Freight tonnage	5.82 million tons

Employees (as of January 2008)

Number of year-round employees	715
Average years of service	11.5
Average age	45
Male	585
Female	130

Unions (as of January 2008)

Most ARRC employees are members in 1 of 5 unions:

United Transportation Union	121
Transportation Communication Union	44
International Association of Machinists	63
American Federation of Govt. Employees	283
American Train Dispatchers Association	10

Benefits

- Corporation provides a defined benefit pension plan
- Corporation provides health and life insurance
- Corporation provides retiree medical benefits

Different from Other State Agencies

The Alaska Railroad Corporation Act of 1984 established an independent state-owned corporation that is governed by a seven-member board of directors appointed by the Governor. The President and CEO of the corporation reports to the board. Although ARRC is not covered under the State's Executive Budget Act, the state government ensures oversight of ARRC's operation and management practices through the following controls:

- The ARRC Board of Directors is responsible for initiating both a financial and a performance audit each year conducted by independent auditors and management companies. The annual performance audit is conducted by a recognized railroad management expert to ensure that ARRC is being managed and operated effectively and efficiently.
- The Legislative Budget and Audit Committee can review ARRC's operation, management and financial practices.
- ARRC must file an oversight report with the Legislature and Governor before it undertakes certain expansion, reduction, or diversification of services.
- Legislative approval is required for certain corporate actions, such as sale or transfer of the Railroad's entire interest in land, or leasing land for longer than 55 years.
- ARRC's procurement procedures are required to be substantially equivalent to state procurement requirements.
- ARRC employees and directors are subject to the Executive Branch Code of Ethics.
- ARRC's spill prevention and response plans are filed and regulated by the State and ARRC is required by state law to show sufficient financial responsibility to respond to spills.
- Bond authorizations must be approved by the Legislature.
- ARRC is required by law to submit an annual report with audited financial statements
- ARRC is required by law to adopt a long-range capital improvement plan each year and shall share that plan with the Governor and Legislature.
- ARRC is defined as an interstate commerce carrier by the Federal Alaska Railroad Transfer Act of 1982 (ARTA).

Alaska's Railroad

- Contributes to health care, business services, and retail payrolls
- Principal transport for heavy and/or bulk commodities to tidewater
- Major mover of jet fuel to Anchorage International Airport.
- Viable passenger alternative to long-distance driving
- Supports the U.S. military with the transport of equipment to and from the "DOD Strategic Port" of Anchorage
- Potential to reduce pressure on State road system … commuting
- Potential to significantly contribute to the Alaska Natural Gas Pipeline

Creates 3,000 jobs and $150 million in payroll across the State

* FTE: Full Time Equivalent. Accounts for seasonal and capital project jobs; includes overtime.

Passenger Bi-level Dome Cars (4 to 6) 50%

Capital Projects

2009 Program

Major Projects

Capital Funding Sources

- ARRC Internal Funding
- DOT/Federal Railroad Administration
  - Alaska Railroad Track Rehabilitation funds
  - Department of Defense Allocations
- DOT/Federal Transit Administration
  - Formula Funds; Grants
  - 9-20% ARRC Match Required
- DOT/FHWA
- Federal funds allocated to ARRC do not routinely affect federal funding for other state transportation projects
- ARRC federal match is *not* from State of Alaska general fund or gas tax...match is solely from ARRC earnings.
- ARRC does not receive operating funds or reimbursements from the State Budget.

2009 Capital Budget

- $785 million+ in federal grant money received since 1996, including $109 million budgeted for 2009:
  - $60 million Department of Defense (administered through FRA)
  - $15 million Federal Transit Administration (FTA)
  - $31 million from Bond sales (repaid by FTA formula funds)
  - $1 million Federal Highway Administration
  - $2 million Federal Emergency Management Administration
- ARRC has provided **$42 million** in federal grant matching funds since 1996, including **$1.3 million** budgeted for 2009.
- Additional **$214 million** ARRC funds spent on non-federally-funded projects since 1996, including **$29 million** budgeted for 2009.
- **Total capital budget for 2009 is $138 million**
- **Stimulus likely to add $26 million**

Stimulus Package Funding

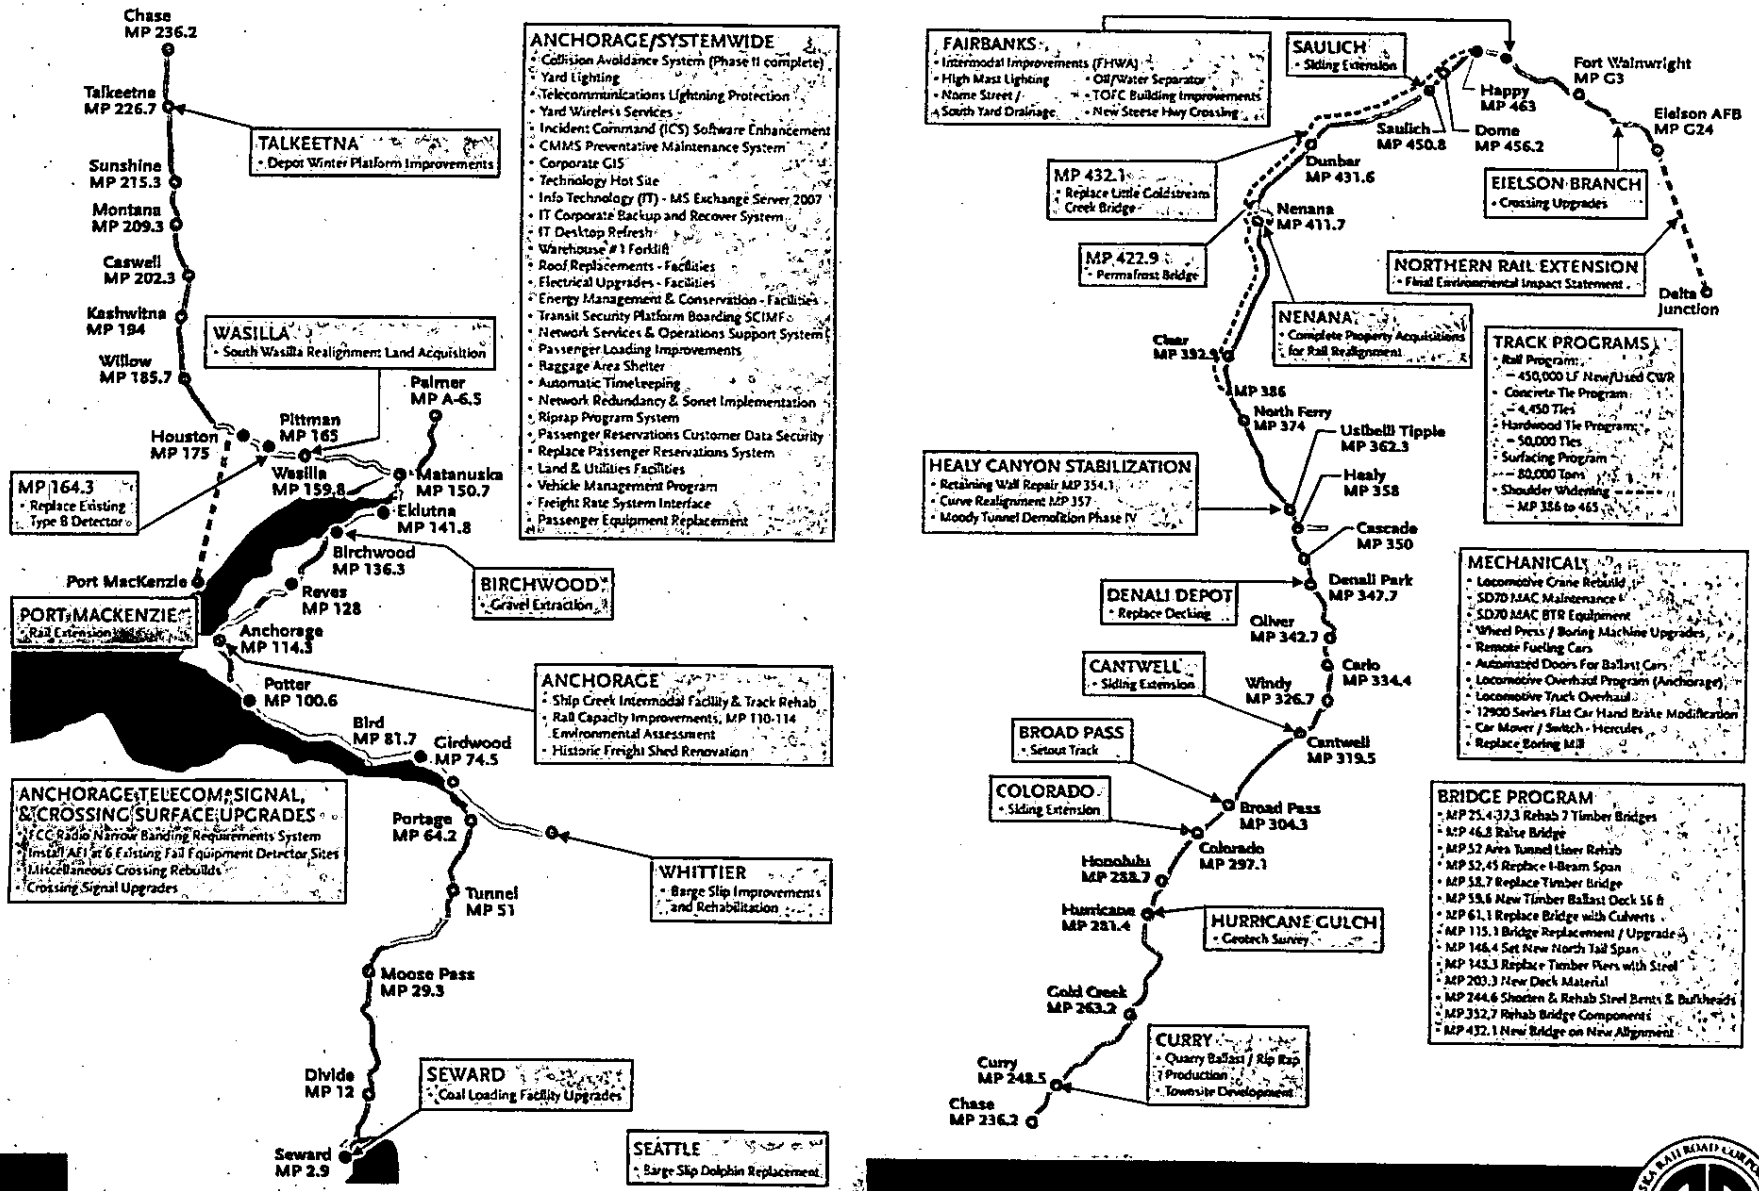
American Recovery and Reinvestment Act of 2009 Final Bill (as of February 17, 2009) Estimated Funding for ARRC		
Funding Pot	Program Amount	Alaska Railroad
Sec 5307 Urbanized Area Formula	$ 5,399,200,000	$ 25,825,000
Energy Program	$ 100,000,000	TBD
Multimodal Discretionary Funds*	$ 1,500,000,000	TBD
Total estimated increased funding from the Economic Stimulus Package		**$ 25,825,000**

* This program is very competitive, with many criteria. Grant minimum $20 million to maximum $300 million.

Major Capital Categories

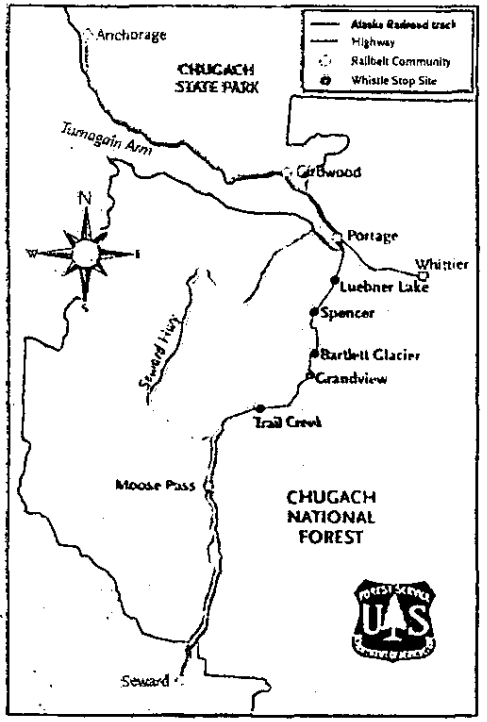
Rail	$	18.7 M
Ties	$	7.5 M
Ballast/Surfacing/Widening	$	3.9 M
Bridges / Docks	$	6.9 M
Slope Stabilization	$	2.0 M
Track Realignment/Extension	$	60.9 M
Technology / Signal / Collision Avoidance System	$	10.8 M
Equipment/Vehicle Purchase	$	2.7 M
Rip Rap / Gravel	$	0.8 M
Mechanical / Equip Maint.	$	3.1 M
Facilities	$	4.4 M

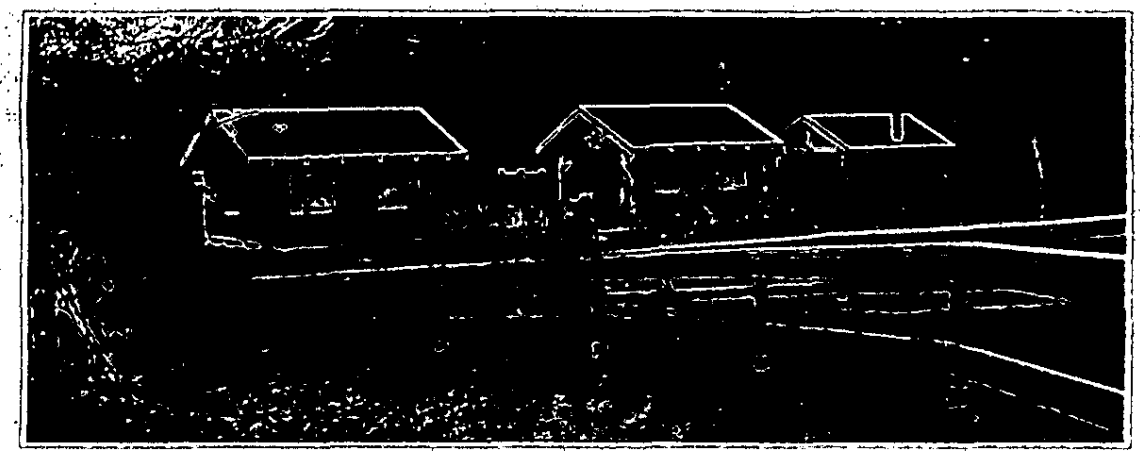
Capital projects started, continued or completed in 2009 are all along the railroad.



Chugach Forest Whistle Stop

- Joint venture with Forest Service to develop camping and viewing facilities at 5 whistle stop sites, interconnected by a system of trails, along the track between Portage and Moose Pass.
- Spencer built 2007-08, with a water well to be installed in 2009. Grandview site is conceptual.
- Self-propelled railcar to be delivered early 2009.



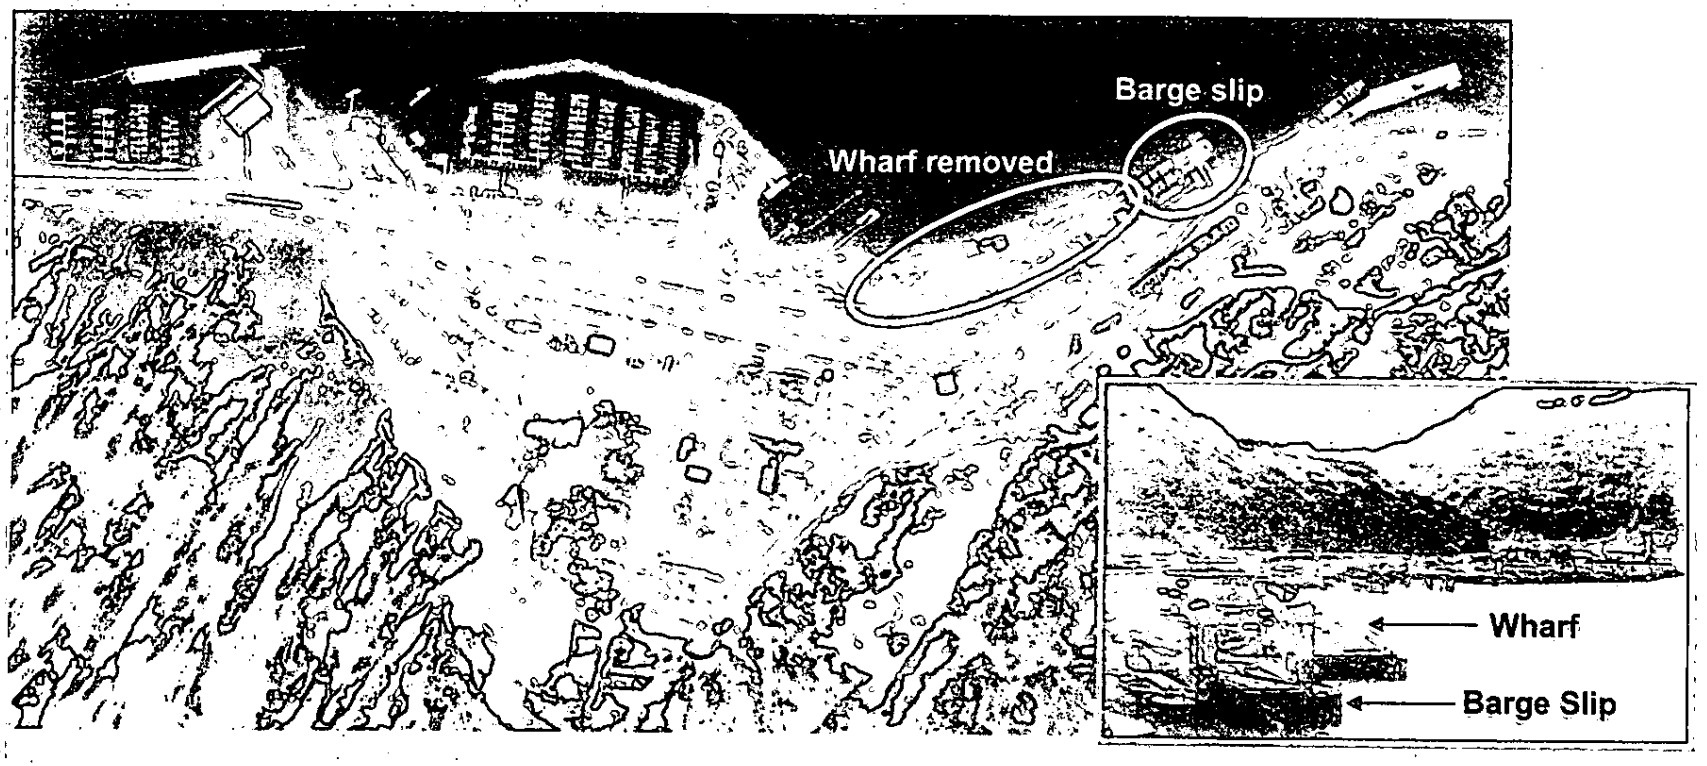


Spencer construction in 2007

Grandview is next.

Whittier Infrastructure

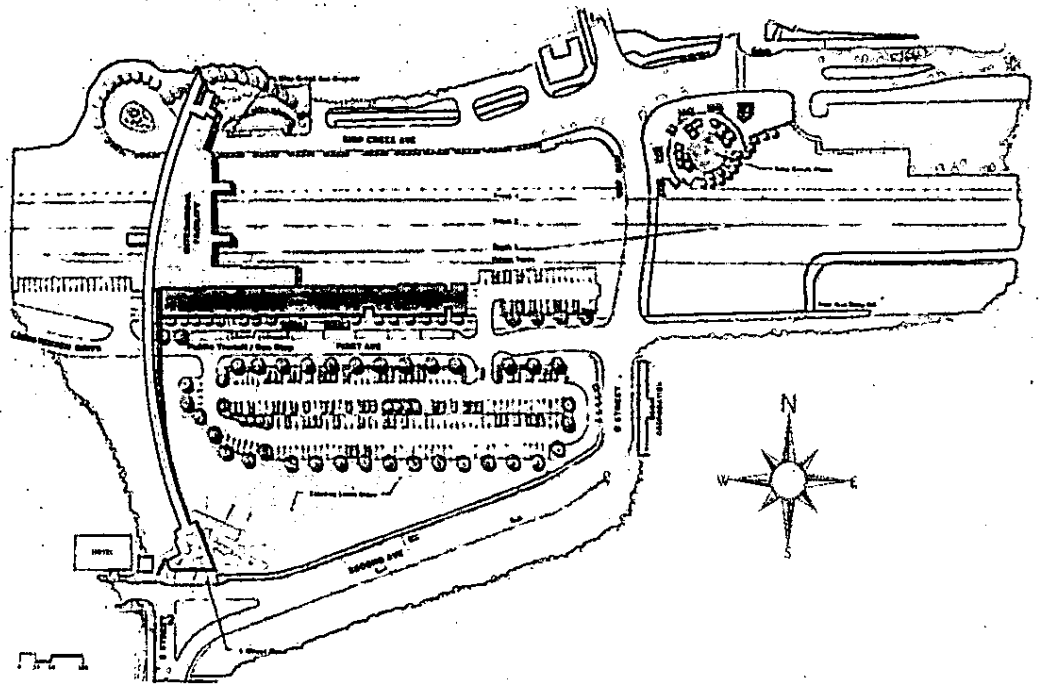
- Marginal Wharf demolished and new winch installed in 2008; Long-term plans for a passenger dock and intermodal facility.
- Freight Barge Slip repairs budgeted for 2009.

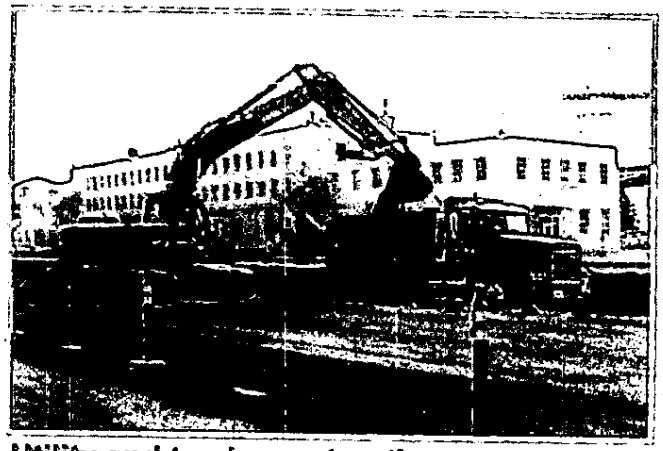


4700

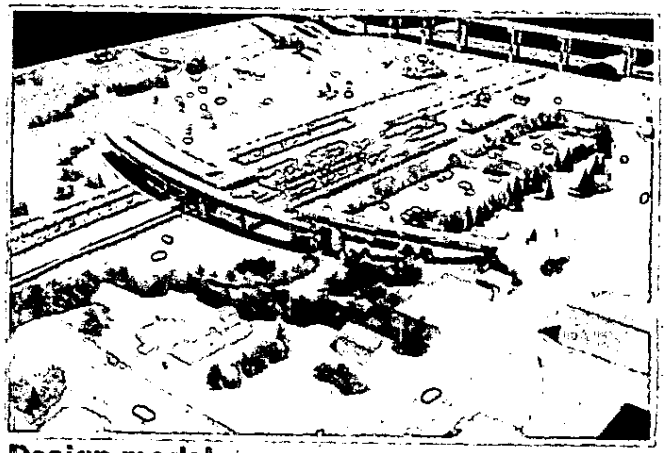
Ship Creek Intermodal Center

- Multi-phased project to build an intermodal hub that incorporates the Historic Depot.
- Phase 1 utility and track work 2007-09.





Utility and track construction

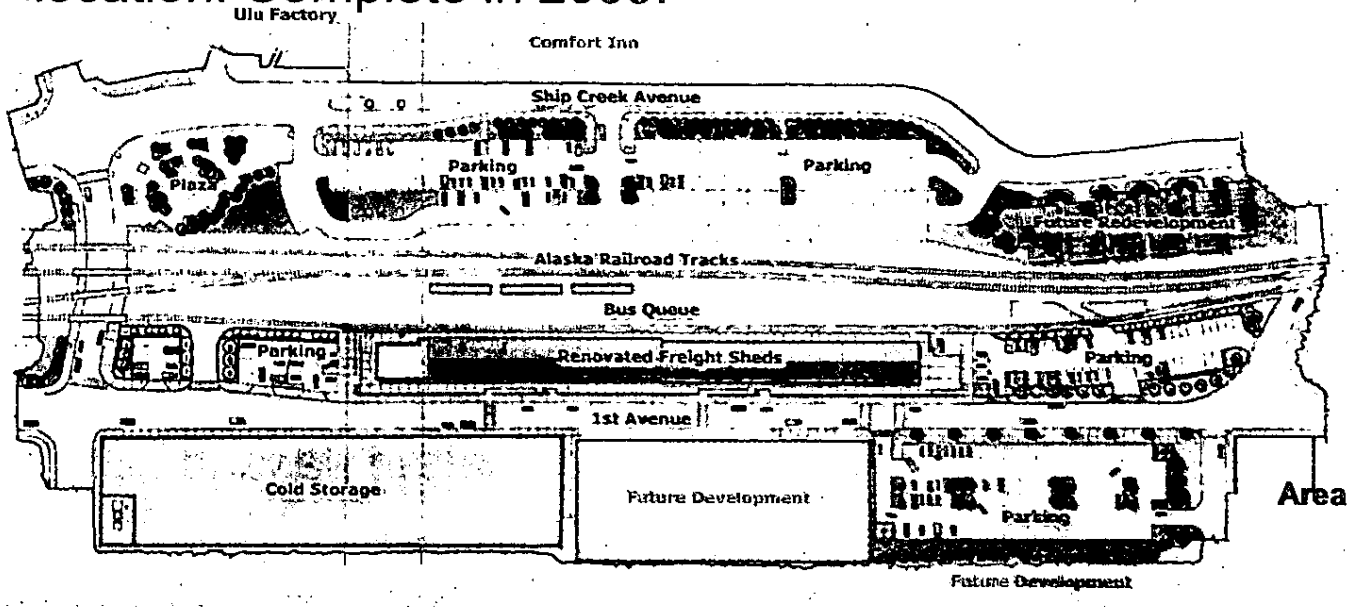


Design model

Historic Freight Shed

- Renovate a 36,000 sf historic large timber freight shed into a LEED-certified office building.
- Green design, ample parking, raised sidewalk, downtown location. Complete in 2009.

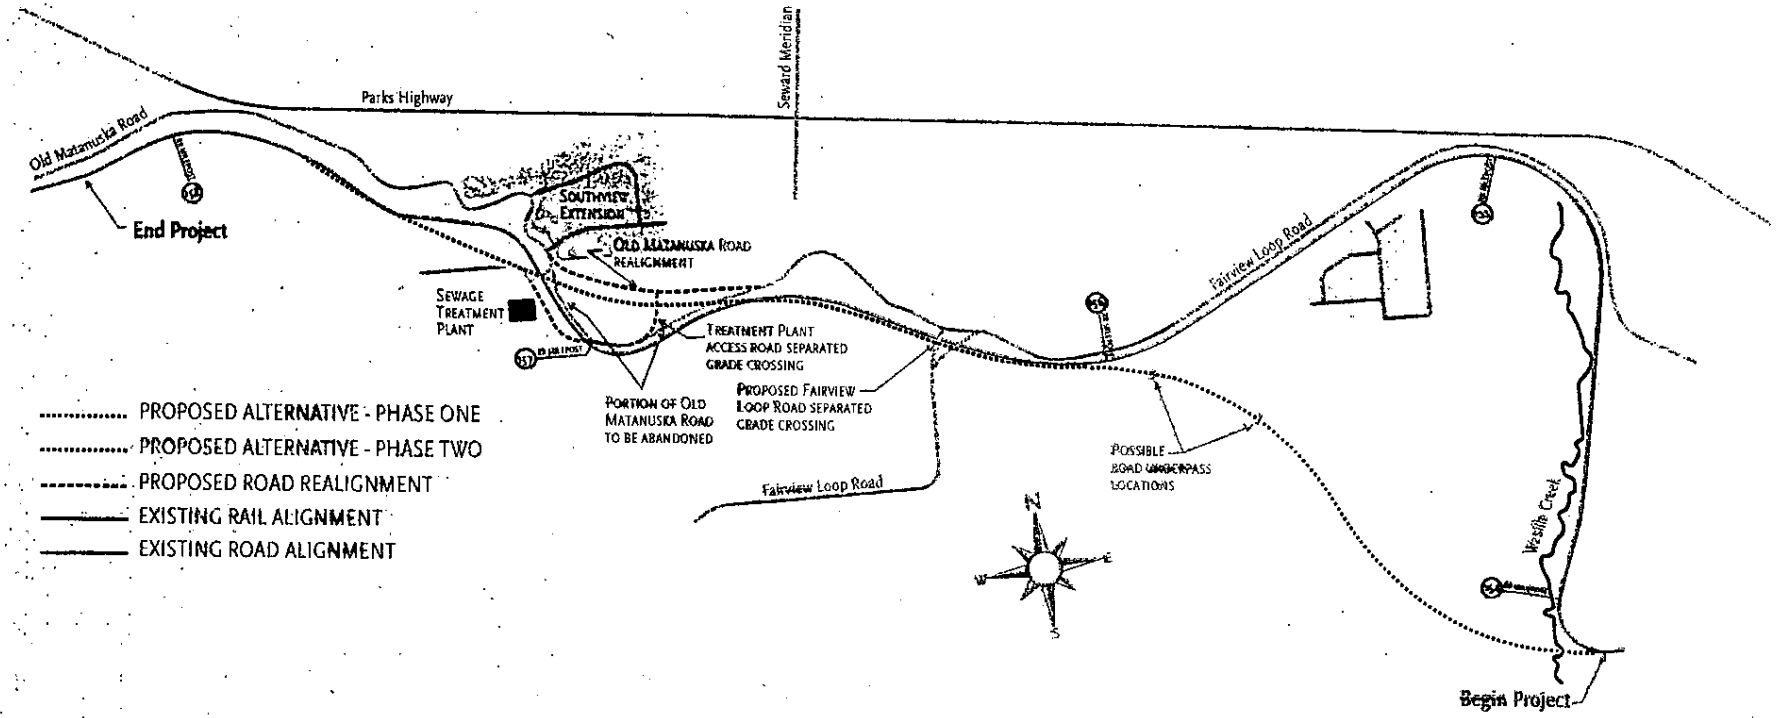
Architect's rendition.

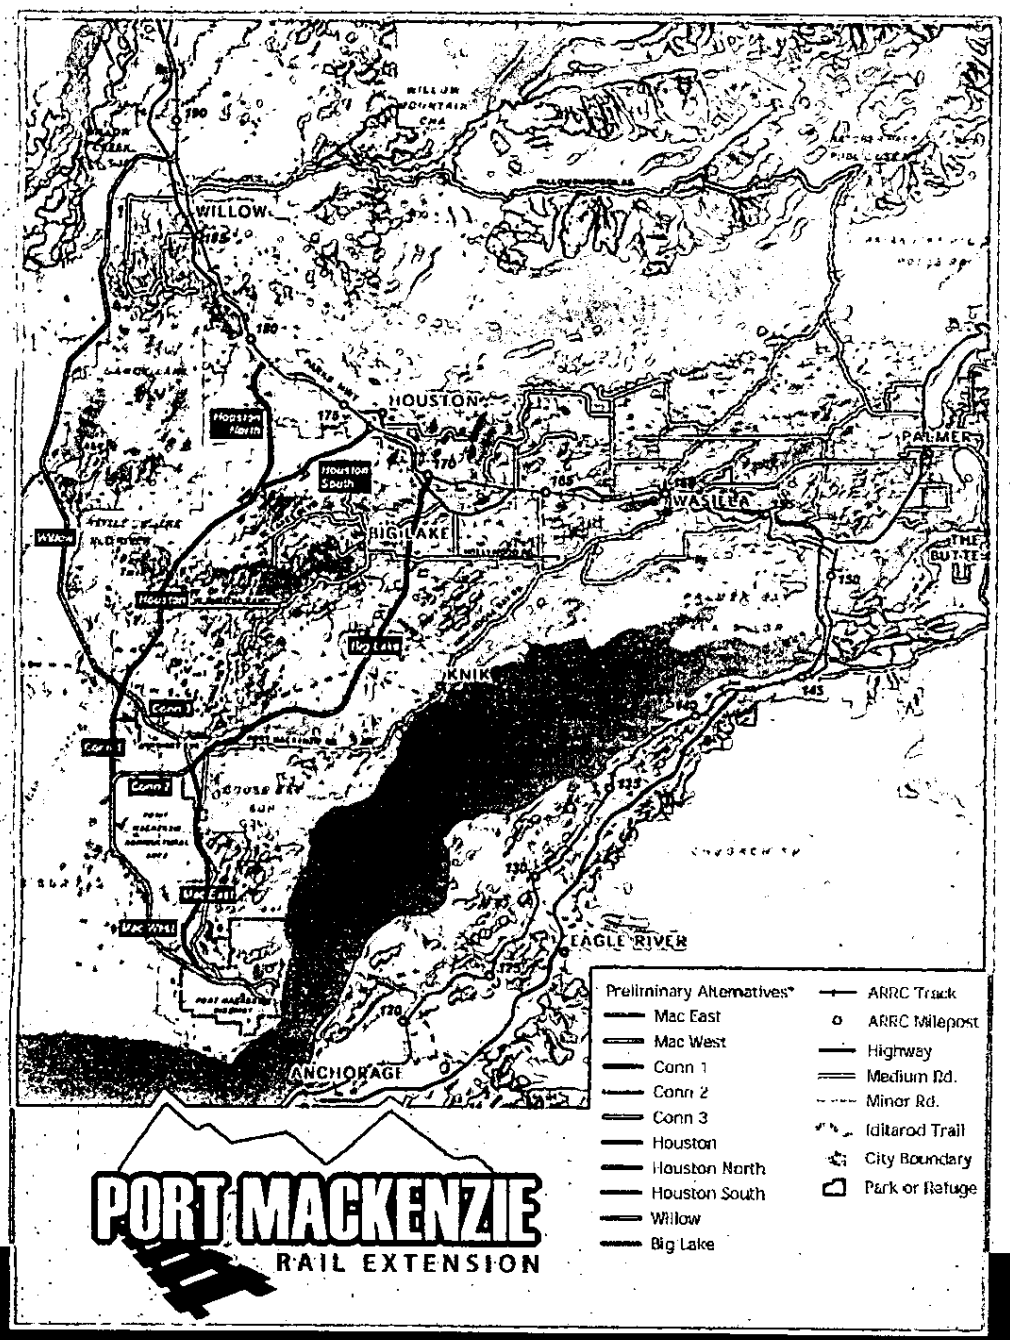


Area Site Plan

South Wasilla Rail Relocation

- Straighten curves along a 4-mile stretch in south Wasilla to eliminate at-grade crossings and increase track speed.
- EA complete, and new ROW land acquisition is underway. Construction cost of $30 million is not yet funded.





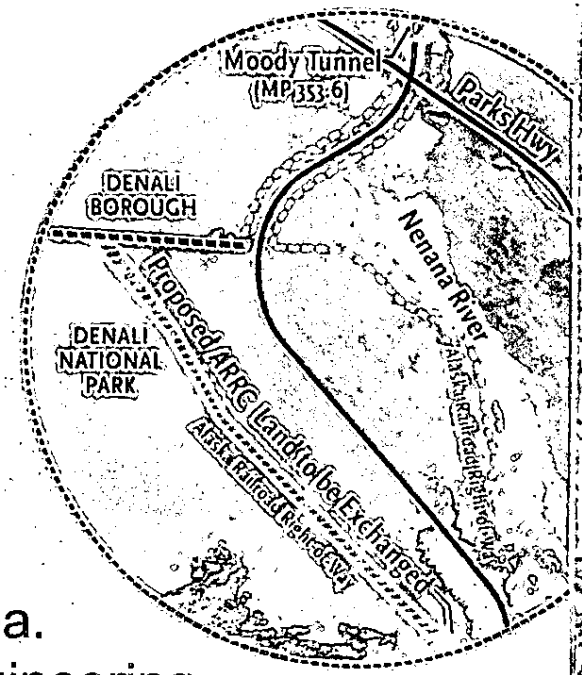
Port MacKenzie Rail Extension

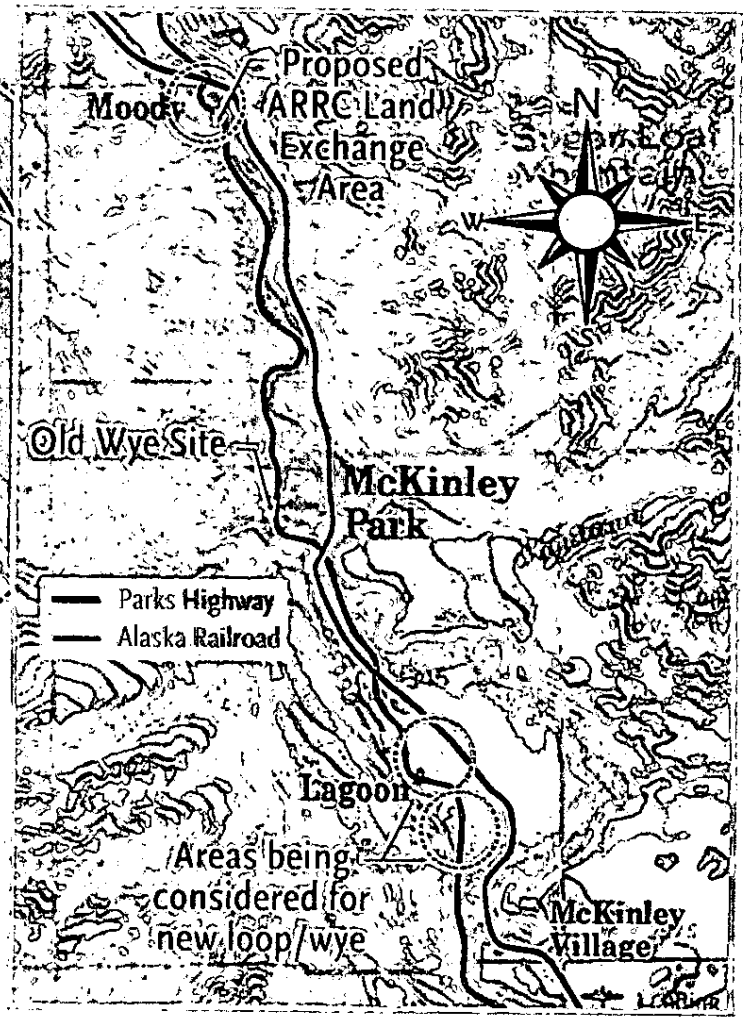
- Construct a 30- to 45-mile rail line to connect the port to the main line.
- Sponsored by the Mat-Su Borough, with $27.5 funds allocated to date by the State Legislature to fund an EIS.
- Surface Transportation Board (STB) is overseeing EIS.

AlaskaRailroad.com

Denali Park Turnaround Track

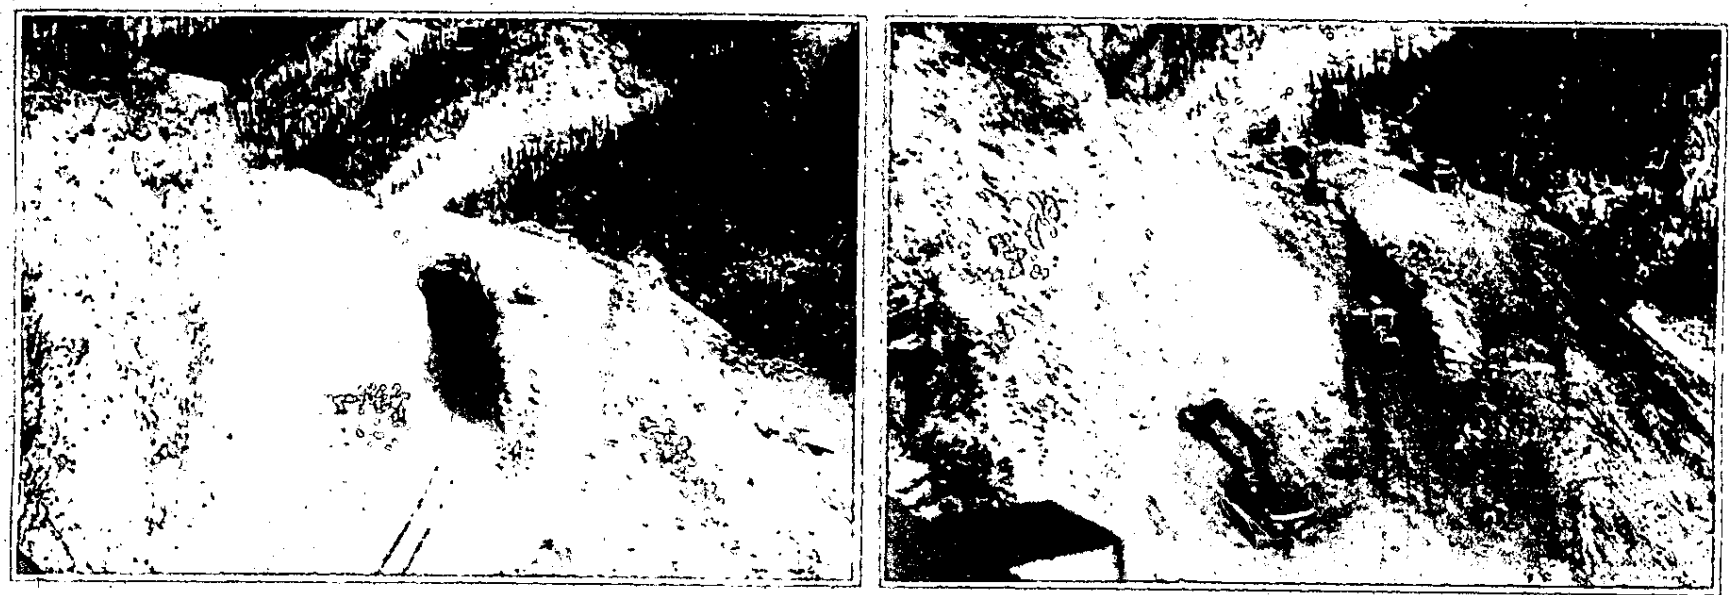
Re-establish a loop or wye track to allow passenger trains to turn around in the Denali Park area. Conceptual engineering recommends a small land exchange, which requires Congressional and Alaska Legislative approval. The National Park Service is preparing the environmental document.





Healy Canyon Stabilization

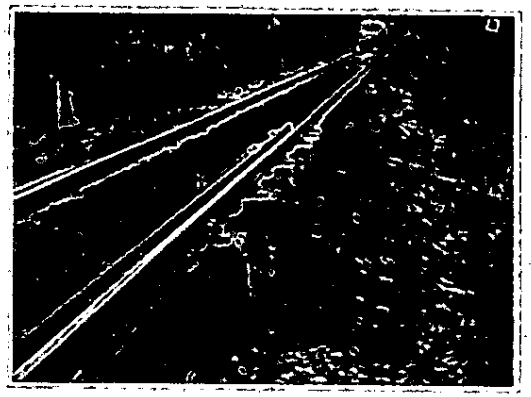
- Series of projects to stabilize track bed, control rock falls, reinforce tunnels and realign the track.
- 2009 Program: **$900,000**. Moody Tunnel Phase 4



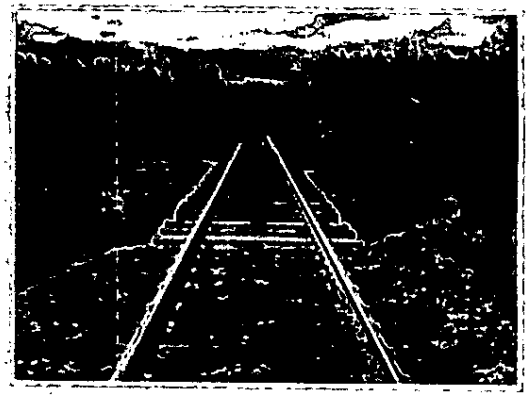
Moody Tunnel before and after a final blast to remove the top in April 2008.

FEMA: Track Flood Repair

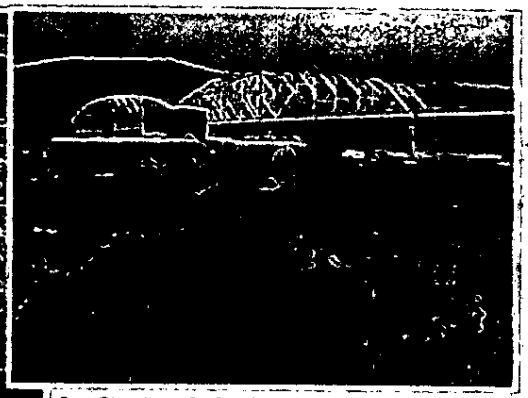
- In August 2008, three Alaska rivers overflowed, flooding several communities, such as Nenana, where road and rail were submerged.



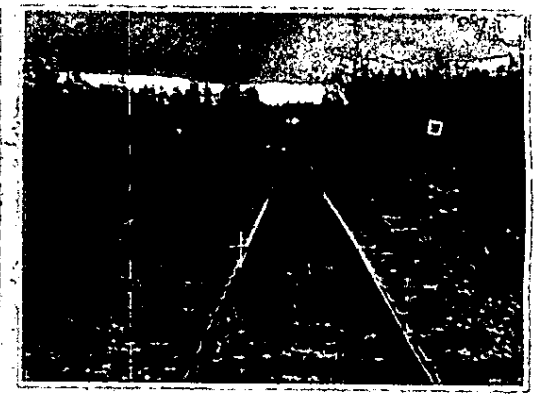
Flood waters flow over the track.



Track bed and ballast washout.



Left: Aerial view show road and rail submerged near the bank of the Nenana River. Above: Submerged rail.

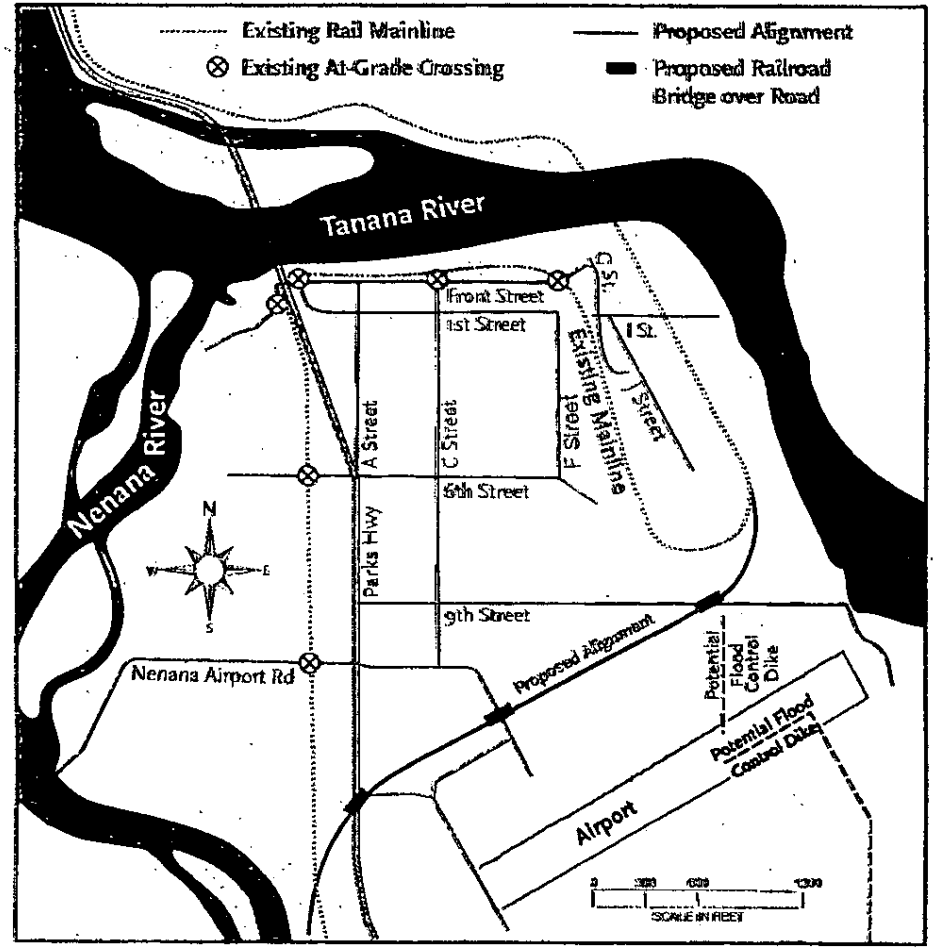


Work trains respond immediately to repair the washouts and other serious track damage.

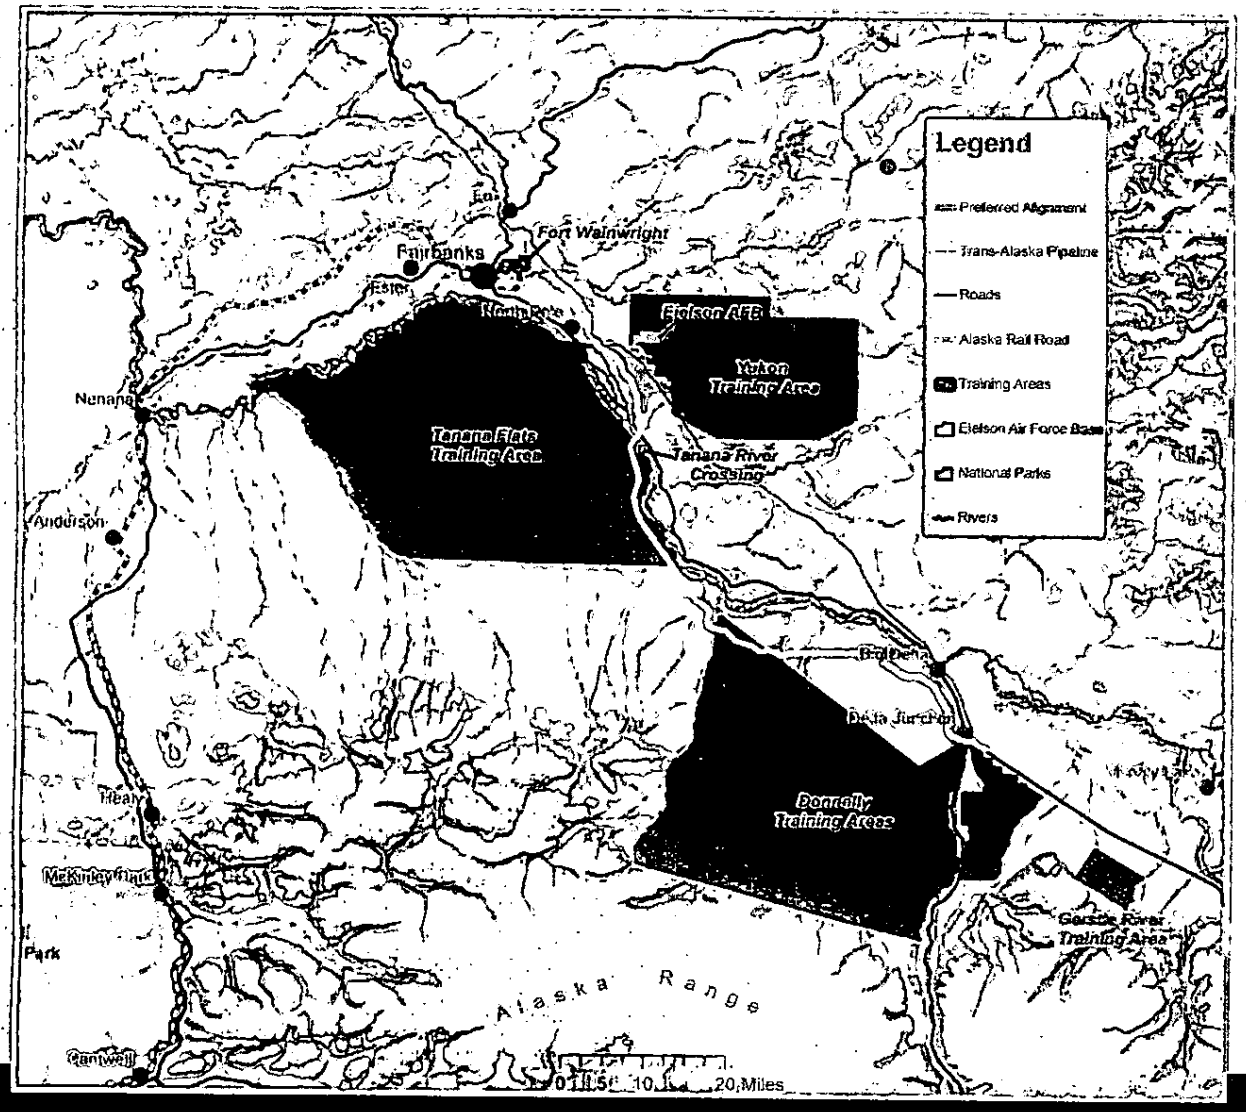
4707

Nenana Rail Realignment

Started in 2008 the project seeks to relocate the tracks around downtown Nenana. The EA was complete in 2004. Right-of-way land acquisition will be complete in 2009. Construction estimate of $25M is not funded.



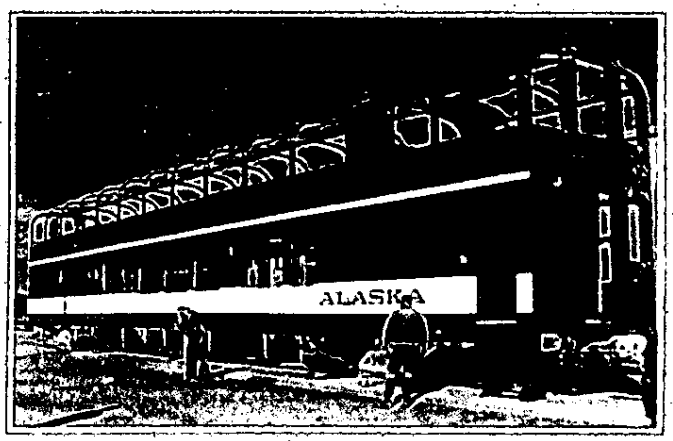
Northern Rail Extension



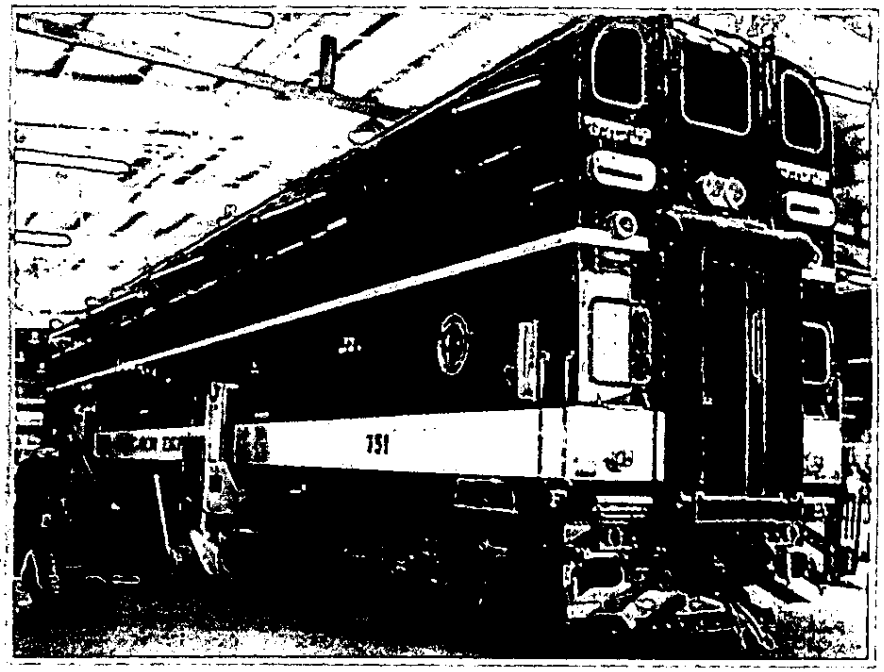
- Construct an 80-mile rail line between North Pole and Delta Junction
- Surface Transportation Board (STB) released draft EA for public comment in December 2008
- STB decision expected in 2009

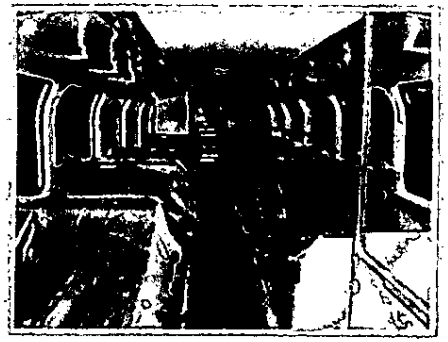
Passenger Rolling Stock

- Colorado Rail Car built one self-propelled DMU and two bi-level railcars for 2009 service.
- Additional Passenger Equipment rehabilitation scheduled for 2009.



Two bi-level dome cars were delivered for *GoldStar* first-class service in 2009.

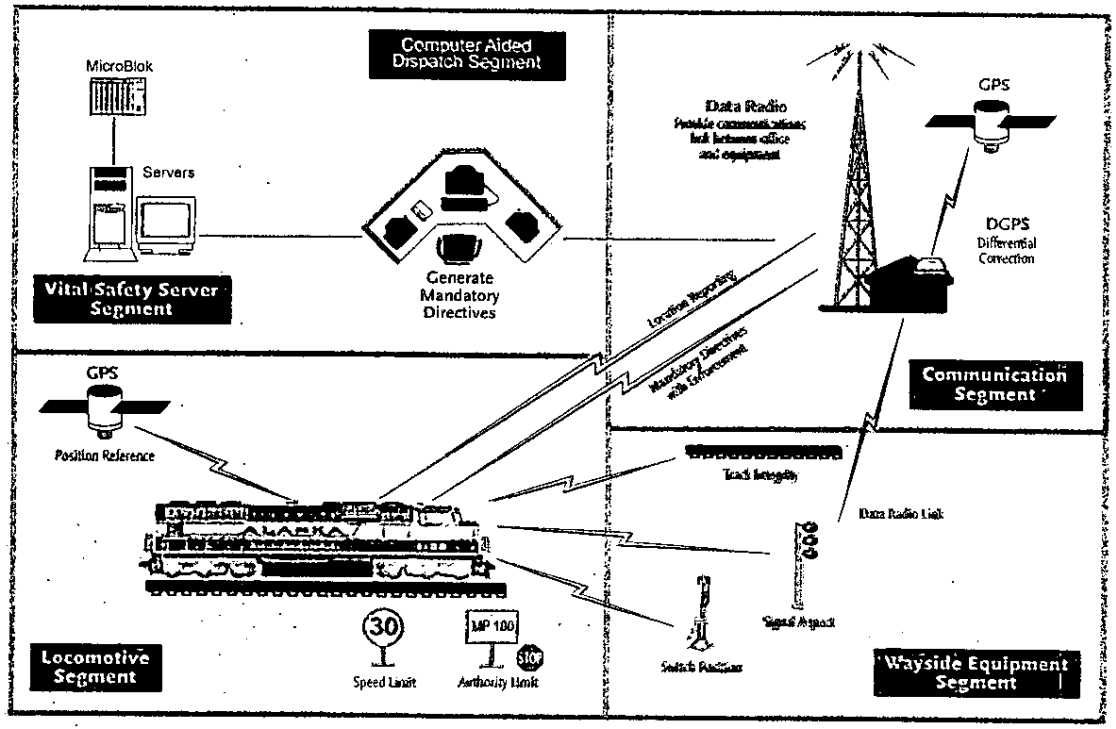




Delivery of the new DMU for service in 2009.

Collision Avoidance System

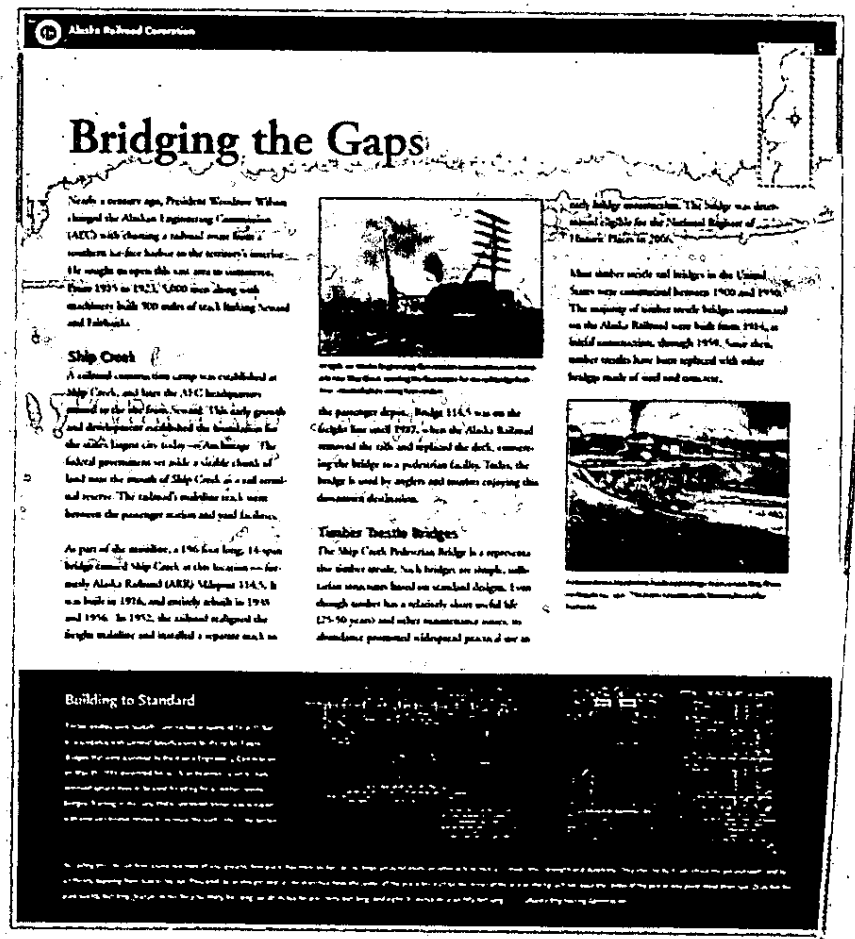
- Multi-phased project to develop and implement a train control system that greatly reduces the risk of human error.
- Integrates a computer aided dispatch system, locomotive on-board computer system, GPS locator, track-side detection devices and a dedicated communications network.



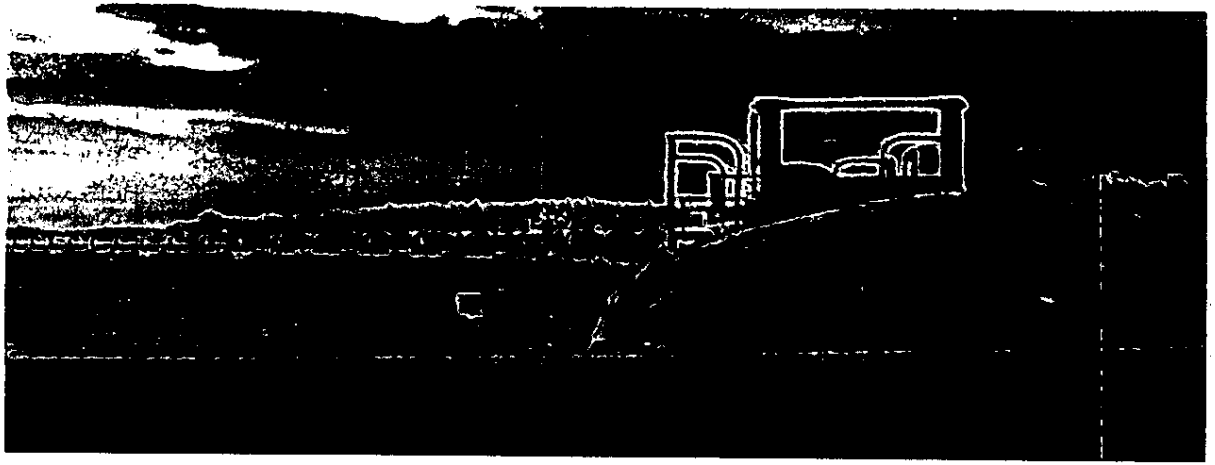
Historic Preservation

ARRC works with state and federal historic preservation agencies and organizations to preserve railroad history.

Preservation efforts include educational and informational materials.



1st Five Year Plan



2002 - 2006

Here Is What Guides Us

PRESIDENT'S OVERVIEW	FOUNDATION	ARRC TODAY	MILESTONES	LANDSCAPE	5-YEAR STRATEGIC PROGRAM
Setting the tone for this working document	History, core values & statement of purpose	Assessing where we've been, who and what we are	Operating, capital benchmarks and forecast	Issues impacting the railroad environment	Plan components and supporting initiatives
2	5	7	11	15	20

4714

The Methodology: Effects Based Thinking

- A way to help stay focused on the strategic level
- What is the high order ***effect*** we are trying to achieve?
- Formulate the desired outcome *first*, freeze it, then consider only the timely, affordable, relevant paths that can get you there

Components of ARRC Planning

- **Strategic** Level – *"Forest"*
  - Describing the desired corporate outcome … effects
- Operational Level – *"Trees"*
  - Major independent elements which jointly compromise the desired outcome.
- Tactical Level – *"Weeds"*
  - Bits and pieces that compromise each operational element.
  - ARRC project list goes here.

Desired Strategic Effects

- Continue to improve safety
- Recruit, train, and retain quality employees
- Establish effective railroad security
- Improve financial soundness
- Improve productivity
- Build constructive community relationships
- Position for growth and sustainability

Productivity

- **A product of:**

  People x Stuff

- Both need attention if you are trying to maximize the outcome
- Depends upon the concept of "balance" across the entire company, regardless of job
- The more employees "feel the love", the more productivity you gain

Productivity Comes From Satisfied Employees, But We Had …

- No 401K match
- No retirement health care account
- Unhappiness over profit sharing
- Working conditions/quality of life needs repeatedly deferred … failing to make the cut in the capital budget
- Extensive wage tiers creating resentment
- Guard/reserve considerations outdated
- Corporate training program lacking
- Sick leave abuse rampant

Conclusion: We needed to do much more

Tactical Activity: We Began Budgeting to Improve Productivity

- Pay
- Benefits
- Workplace tool modernization
- Break/Rest Areas
- Workplace facility improvements
- Recruiting
- Schedules
- Rewards
- Training
- Mentoring

4720

First Five-Year Plan Achievements

2002 - 2006

4721

Safety

- Incident Command Center created
- Response plan, training, field exercises
- Employees create a user friendly Safety Manual
- National Safety Employee of the Year
- Harriman Award

Four record years out of last six

2006 Best Ever !!

4722

Safety (continued)

- 65% reduction in FRA reportable injuries
- 72% reduction in derailments
- ARRC FRA reportable train accidents 82% below US Railroad average
- Employee lost time down 60%

Wholesale Change in Safety Culture

External Affairs

- ARRC public opinion poll approval: 63% → 85%
- Six favorable bills passed in Juneau
- Employee Recognition Program started
- Corporate Branding Program started
- Moose Salvage Program started
- Rebuilt Corporate "Charitable" Giving program, ARRC external website, All Aboard, Community Ties newsletters
- Created Dispatch, Tenant Ties newsletter
- Community outreach visits increased to over 1,000/year
- Sea Train … All Anchorage 5th graders to Sea Life Center
- Conducted 3 employee cultural surveys (2002, 2004, 2008)

4724

Corporate Recognition

Corporate Awards

- 2004: Public Relation Society of America (PRSA):
  - Award of Excellence for 2004 Annual Report
- 2005: International Silver Davey Awards:
  - Consumer Magazine Advertisement – Industrial Strength
  - Print Collateral Annual Report – Alaska Railroad Annual Report
  - Print Collateral (safety advertisement) – Planes, Trains

Corporate Recognition

Marketing Sales & Service Awards

- 2003: Seven awards given from *Onboard Services*. Overall best Railroad; 1st place in safety, Equipment, entertainment, uniforms, and food services; 2nd for onboard services.
- 2004: Rob Halpin receives Distinguished Service Award from National Defense Transportation Association

Corporate Recognition

Operations Awards

- 2005: Dwight West for Safety Person of the Year, American Short Line and Regional Railroad Association (ASLRRA).
- 2004, 2005: "Jake" Award from the ASLRRA for exceeding the industry safety average.
- 2006: Wasilla Chamber "Gold Award" for significant contributions to the visitor industry

4727

Real Estate

- New facilities brought on line
  - Airport, Denali and Fairbanks Depots
  - Anchorage Operation Center
  - Consolidated Projects and Signals Building
  - Facilities Maintenance Shop
  - Seward Intermodal Facility upgrades
  - Railroad Police / Security Building
- Ship Creek property development continues
  - The Bridge
  - C-Street Park
  - Paved parking lots, curbs, landscaping
  - Purchased Railroad HQ building
  - Trail improvements
- Fairbanks Terminal/Yard Heat Conversion Project completed…coal fired boiler plant shut down

4728

Real Estate

- Facilities department created
  - Cradle to grave comprehensive property management and maintenance
  - Owner-user concept applied
  - Standards developed for design, architecture, energy efficiency
  - $11M account
- Real estate facilities acquisition strategy developed
  - "Bundling" for better market response, using debt

Passenger Service

- 2008 sets another passenger revenue record
- GoldStar… first class upgraded service a big winner
- 2009: 2 New luxury bi-level coaches and a new self-propelled DMU to fit growing demand
- New charters:
  - 2007: Cruise Train and Princess "Straight to the Wilderness"
- New Services
  - 2008: U.S. Forest Service Whistle Stop – first site completed at Spencer

Track Rehabilitation Program

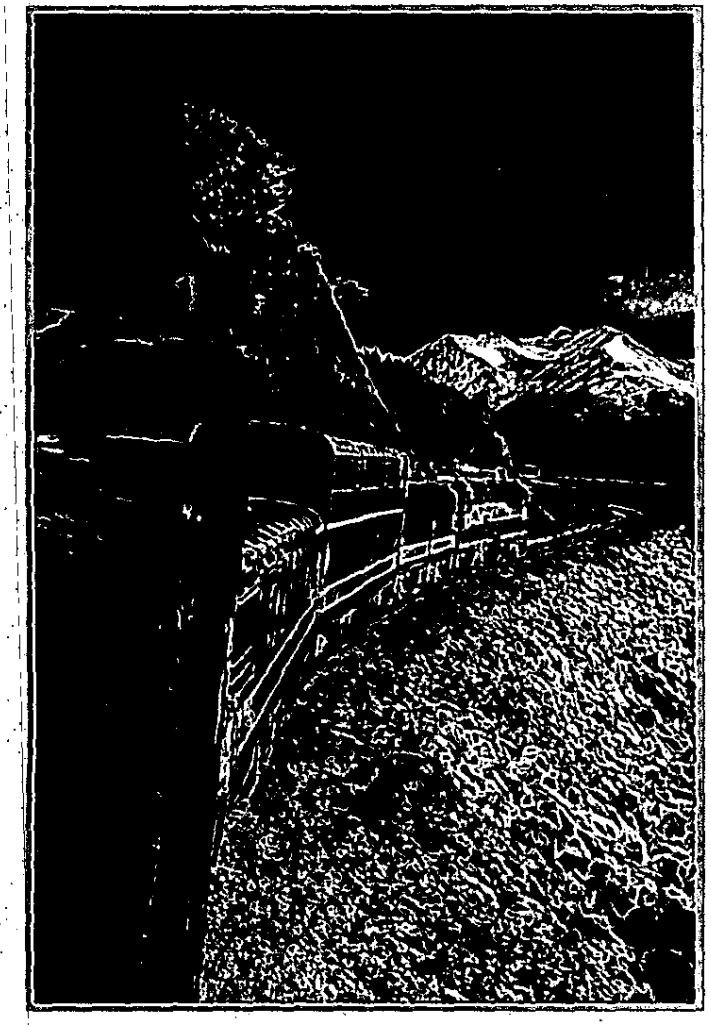
Bridge Replace/Rehab	10	6
Siding Upgrades	0	3

Productivity!

What's in Our Future?



Second Five Year Plan

2008 – 2012

2009 Budget: Challenges

- Core Business… train income from operations … should be profitable
- Financial security … betting the farm on Federal Entitlements is too risky
- Must reverse Operating Ratio trend line
- Railroad must create a culture of thrift throughout
- Railroad must improve ability to control costs despite a tough environment of seasonal demands

Directions from the ARRC Board

- Improve Net Income from Operations and Operating Ratio in the 2009 Budget
- Look at ALL railroad areas for possible cost savings, including manpower

Personnel Impacts, So Far

- 79 positions eliminated (attrition)
  - 39 Management (8 received layoff notices)
  - 26 Represented (attrition)
  - 14 Special Services
- 3 more management reclassified from expense to all capital
- 1 Assistant Vice President position downgraded
- 1 Assistant Vice President position eliminated
- 4 Director-level positions eliminated

2009 Revenue Wild Cards

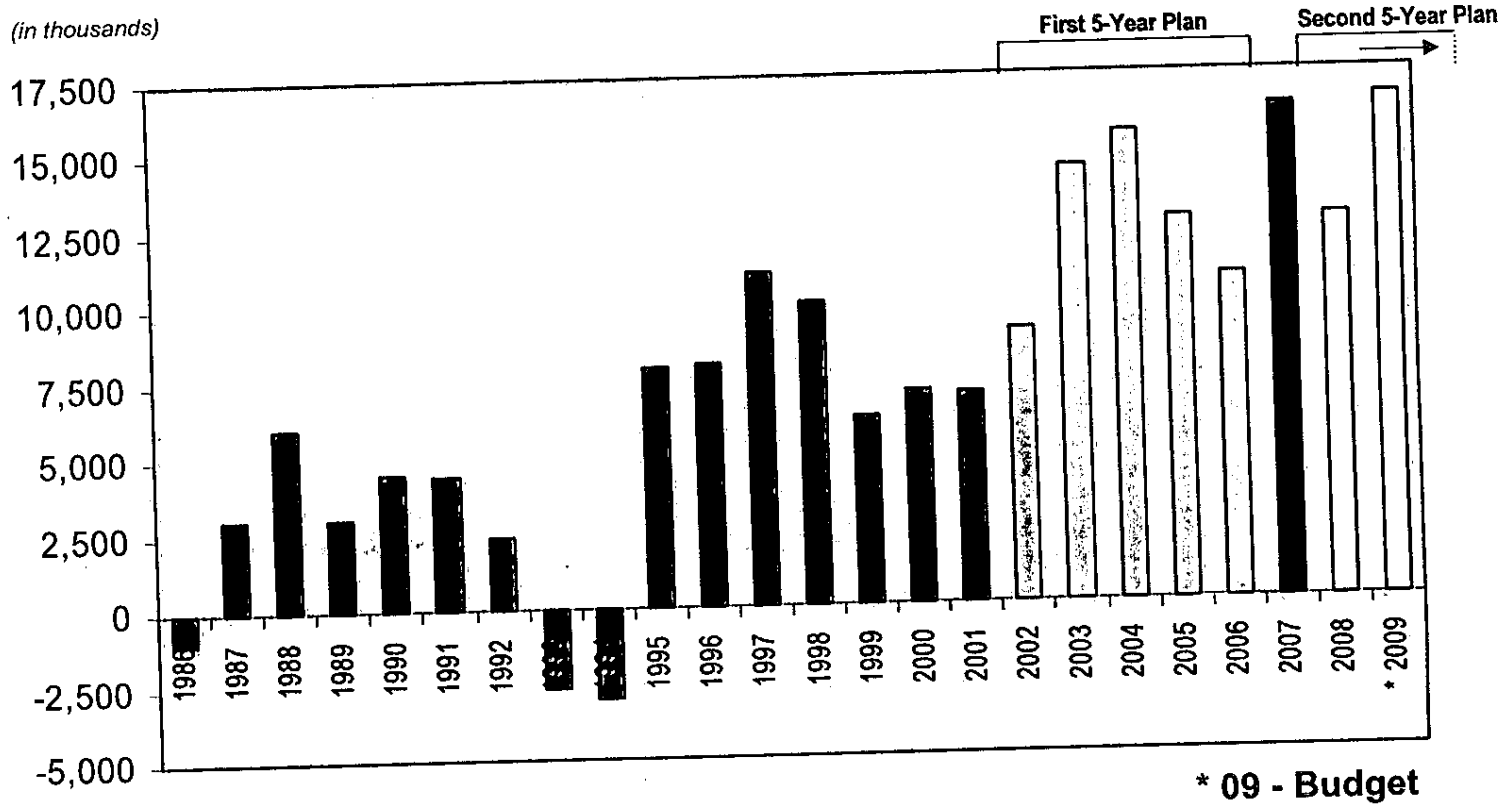
Possible Gains

- Gravel
- Coal
- Pipe

Probable Losses

- Petroleum

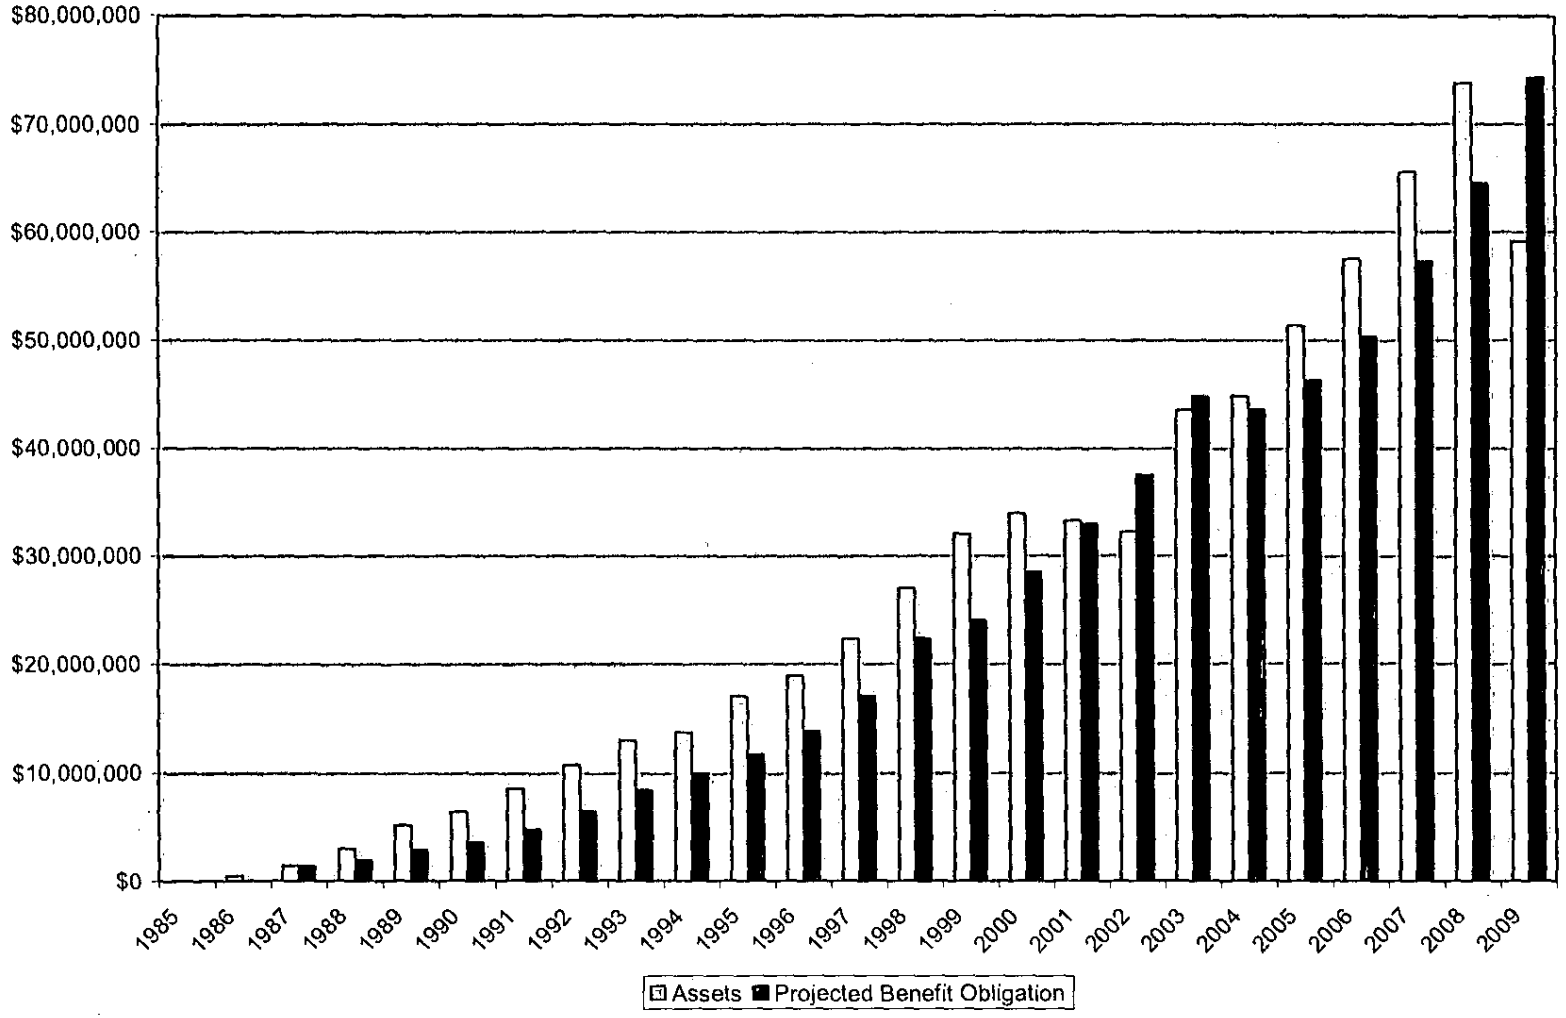
Forecast Impact on ARRC Corporate Net Income



2009 Status of Benefit Trust Funds

- Defined benefit pension trust fund totaled $59.8 million
  - Down $13.8.1 million from year end 2007
  - Liability exceeds funding by $15.1 million (79.6% funding ratio)
- Retiree medical trust fund totaled $19.0 million
  - Down $2.6 million from year end 2007
- Considerable down-market impact

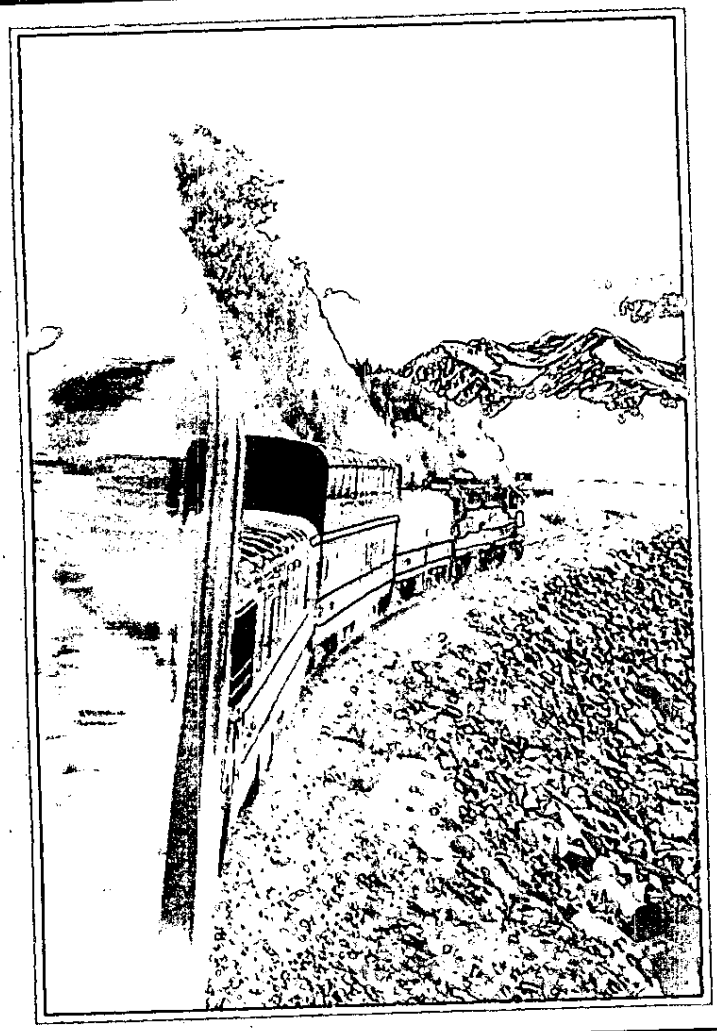
Funded Status of the Pension Plan



Pension Plan Administration

- ARRC Pension and Represented 401(k) Committee
  - Two Union Members
  - Three Management Representatives
- Retirement Specialist in Human Resources

How Does It Work?



Alaska Railroad Post Retirement Medical Program

Post-Retirement Medical

- ARRC Labor Contracts (5 union contracts) provide that retirees can purchase ARRC medical insurance by paying 60% of the monthly premium.
- Non-represented employees are eligible for retiree medical coverage under ARRC policy
- Eligible retirees must be:
  - 62 or older under the ARRC Pension Plan (represented)
  - 58 or older under the ARRC Pension Plan (non-represented)
  - With the Civil Service Retirement System
  - On disability retirement

Post-Retirement Medical

- Retirees who don't meet the criteria above can participate by paying 100% of the premium
- Certain surviving annuitants and family members can continue their participation following the death of the retiree on the same cost sharing basis
- Surviving dependent children of an ARRC pension plan participant are eligible to participate on the same cost sharing basis, without the requirement that there be a pension plan recipient

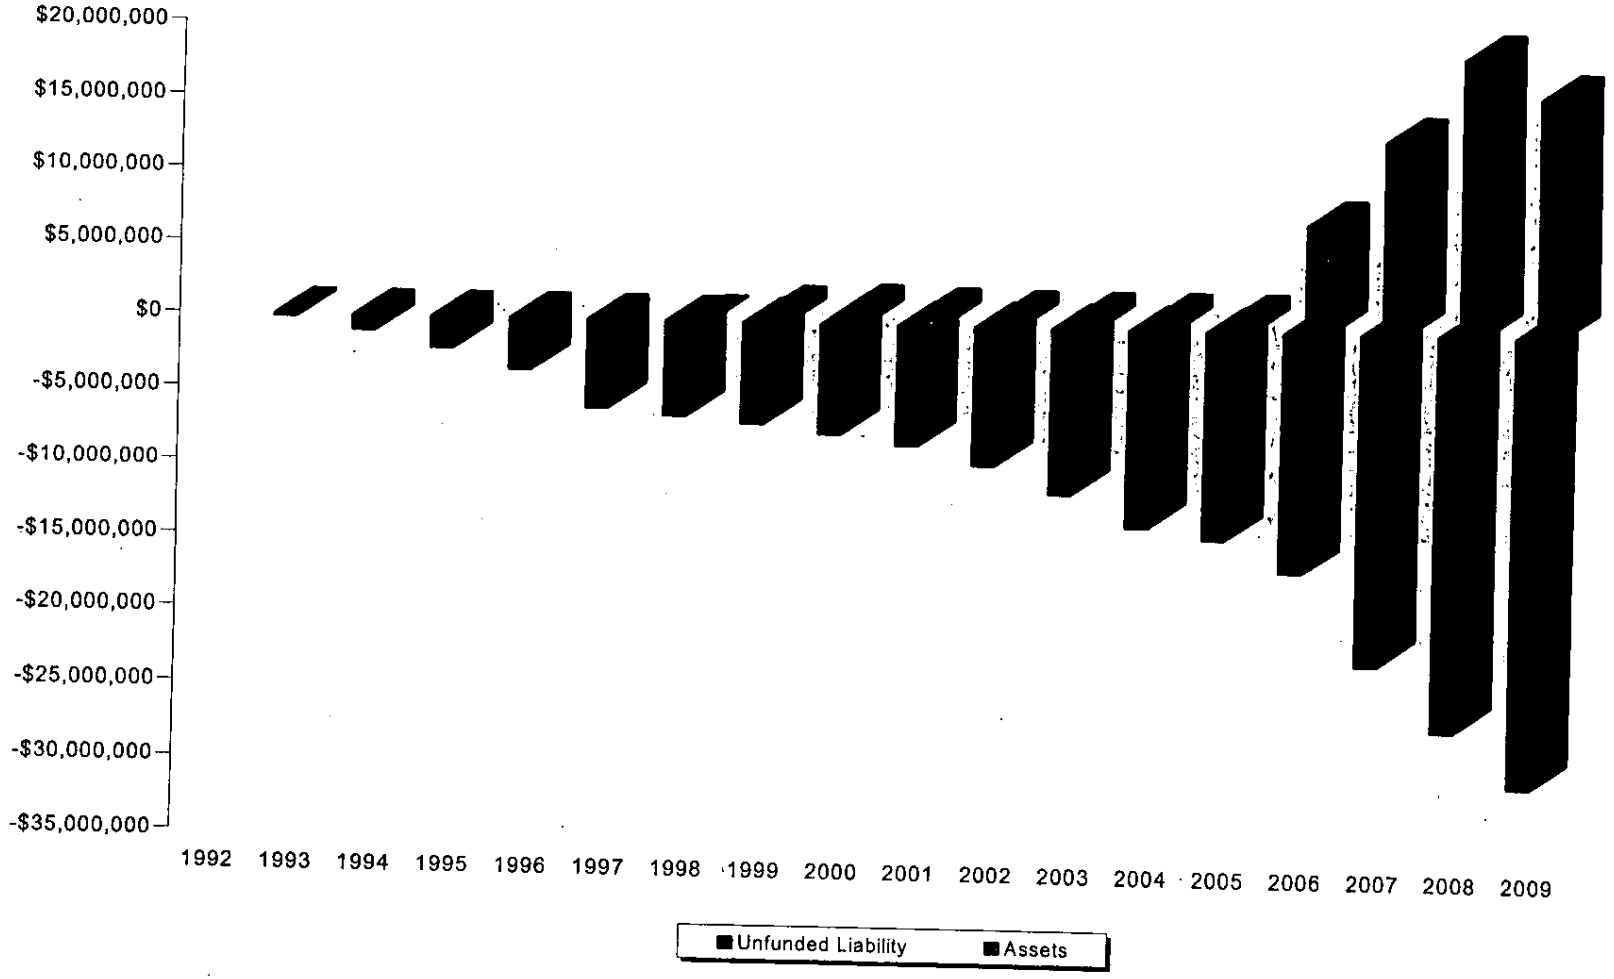
Post Retirement Medical

- Deductible: $500
- Co-insurance: $80/20 up to $1,500
- Includes prescription drug benefit
- Does not include audio, vision and dental coverage
- Medical Plan for retiree is identical to the plan for active ARRC employees

ARRC Contributions

- In addition to the premium contributions, ARRC makes annual contributions to the Post Retirement Medical Trust based on the recommendations of the actuary. The 2008 contribution was $2.8 million.

Post Retirement Medical Expense/Accrued Liabilities/Assets

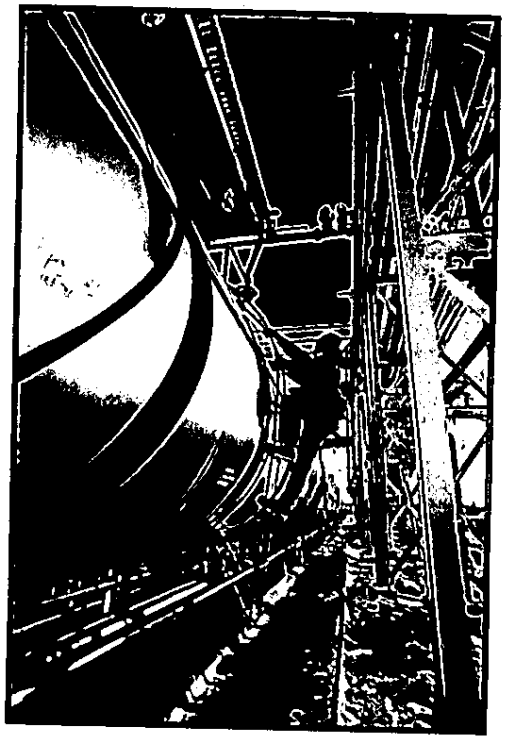


Hot Topics

Issues impacting the rail belt

Importance of Flint Hills to ARRC

- **By far, ARRC's largest and most important customer**
  - 2007 Freight Revenue from Flint Hills Resources (FHR) - $43.6M
    - 45% of total freight revenue
  - Year-round, high-margin business line buffers highly seasonal passenger/gravel revenue fluctuations
  - Land lease revenue >$1.2 million/yr
  - ARRC contracts to maintain FHR leased fleet of ~400 tank cars at > $1 million/yr



- **Partnership that heralded great potential when Flint Hills purchased the North Pole Refinery in 2004… but,**
  - While the petroleum compound annual growth rate (CAGR) between 1998 – 2003 = 11.5%... …the Flint Hills CAGR 2004 – 2008 = 1.2%
  - We have already experienced a 25% volume reduction (200 million gal/yr) between 2004-2008

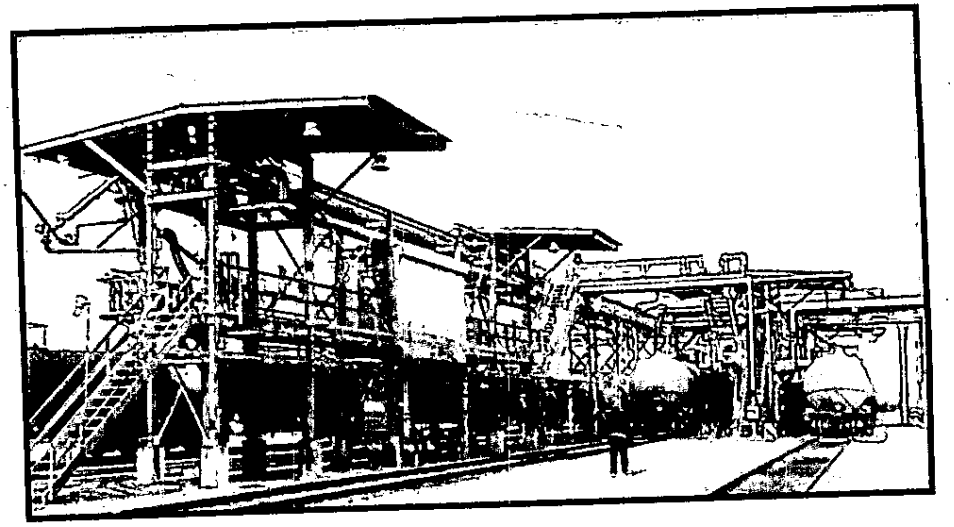
Flint Hills Resources at Crossroads

- FHR had originally indicated it was considering 3 alternatives, with a decision to be made by end of 2008:

1. **Preferred Option:**
   Major capital investment into North Pole Refinery, significantly increasing production capabilities to Alaska, Pacific Rim.

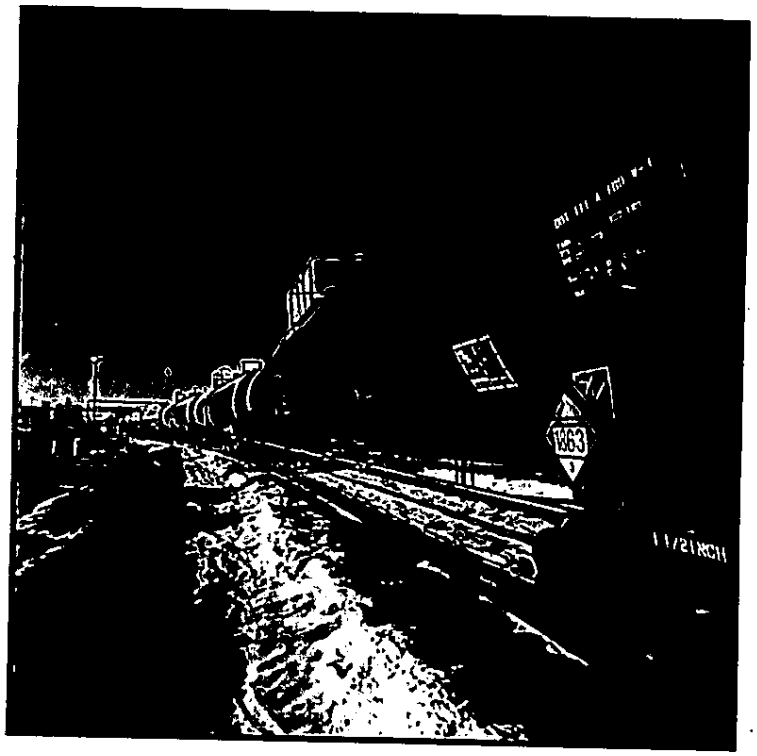
2. **Practical Option:**
   Give up on Alaska… sell North Pole Refinery.

3. **Last Resort:**
   Convert to "terminal operation." Minor amount of refined fuel is shipped north to Fairbanks and there distributed by truck. Refinery closed.
   Flint Hills jobs lost ~165.



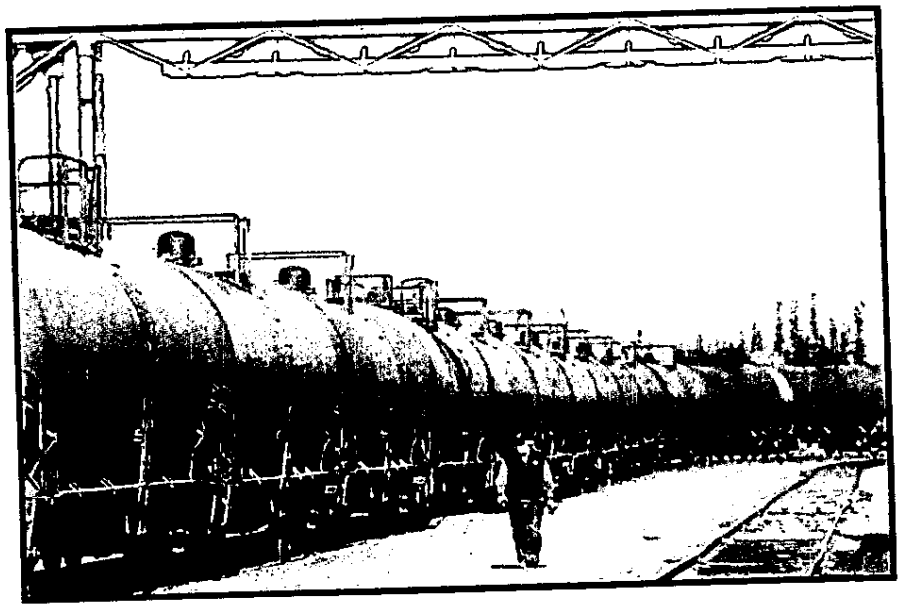
Impact of Terminal Scenario

- **Option #3 would devastate ARRC's economic contribution to the State of Alaska**
- **To fulfill statutory mandate of self-sufficiency, massive restructuring of ARRC would be required**
  - Roughly $25-30 million/yr in expense reductions would need to be offset
  - **200+ high-paying railroad position eliminations**, divestiture of locomotives/track equipment, draconian reductions in rail service and railbelt capital programs necessary
  - Precipitous drop in winter cash flow would necessitate a close look at the ability to provide year-round interior train service.



Railroad Bottom Line

Almost overnight, the Alaska Railroad would cease to be one of the State's most successful and well-recognized annual economic contributors.



Impact of Terminal Scenario

- **Economic Impact to Alaskan communities significant**
  - –ISER quantified impact of ARRC reductions on Alaskan communities
    - **250 non-ARRC jobs lost due to ARRC reductions**
    - **Another $21 million/yr in non-ARRC payroll lost**
  - –Many, many more Alaskan jobs at serious risk from economic shockwave
    - Fairbanks, North Pole, Municipality of Anchorage, Anchorage International Airport, Port of Anchorage
  - –**Loss of annual capital expenditures in the tens of millions/yr.** Significant annual railbelt work that typically uses Alaskan-owned businesses, labor and material purchases, dries up.
  - –Anchorage International Airport left with a single source of jet fuel.
  - –Alaska would need to import POL products and ship them north.

Sponsor Statement

HB 137

"An Act relating to an interstate compact on educational opportunity for military children; amending Rules 4 and 24, Alaska Rules of Civil Procedure; and providing for an effective date."

The purpose of House Bill 137 is to eliminate some of the barriers that face children of military personnel as they transition from one school system to another. The average student will move from six to nine times from kindergarten to 12th grade.

While the armed services has done much to ease the transition for children of military personnel, there is much that can be done at the state and local levels to ensure that these children are afforded the same opportunities for educational success as other children.

Alaska enjoys a close relationship with our service men and women and their families and recognizes the sacrifice and stress they face with frequent moves and deployment. There are 12,106 active duty children between the ages of five and 18 plus the children of active members of the guard and reserve that will benefit from this compact.

Eleven states in 2008 adopted this compact and presently 22 states have pending legislation to join the compact. Passing this legislation will help remove some of that stress by providing the children timely enrollment as the children move from one school district to another.

HB 137

"An Act relating to an interstate compact on educational opportunity for military children; amending Rules 4 and 24, Alaska Rules of Civil Procedure; and providing for an effective date."

Section 1: AS 14. Adds a new chapter:
Chapter 34. Interstate Compact on Educational Opportunity for Military Children

Article I – Purpose
This article describes the purposes of this compact which is to remove barriers to educational success for military children by facilitating enrollment, placement, and timely graduation; providing enforcement of rules, uniform collection and sharing of information; and promoting coordination, flexibility, and cooperation among member states.

Article II – Definitions
This article provides definitions for terms used throughout the compact.

Article III – Applicability
This article defines the children covered by this compact.

Article IV – Educational Records and Enrollment
This article outlines how sending and receiving states handle a military student's unofficial and official educational records. The Interstate Commission determines what information must be included in the records, and the time line for providing the records. It provides a 30-day grace period for immunizations. Kindergarten and first grade entrance is addressed for both grade level and age.

Article V – Placement and Attendance
This article describes course placement; education program placement, and special education services to address federal requirements for students with disabilities. Placement flexibility and absences related to deployment are also addressed.

Article VI – Eligibility
This article provides information on enrollment eligibility. It prohibits the student from being charged a tuition if the student lives in a different jurisdiction, and allows the student to continue to attend the school they were enrolled in while residing with the custodial parent. The military student shall have as many opportunities as possible to participate in extracurricular activities, even if they have missed the application deadlines.

Article VII – Graduation
This article facilitates on-time graduation by providing procedures for waivers, exit exams and transfers during a military student's senior year.

Article VIII – State Coordination
This article establishes requirement for creation of a State Council or other existing body to provide coordination among its government, local and military agencies. Membership requirements are also addressed.

Article IX – Interstate Commission on Ed Opportunity for Military Children
This article deals with creating the commission and its responsibilities, powers, and duties. It details membership, voting rights, meetings, executive committee, bylaws and rules, data collection, and a process for reporting alleged violations.

Article X – Powers and Duties of the Interstate Commission
This article lists the powers and duties of the Interstate Commission: Dispute resolution; promulgate rules; issue advisory opinions; enforce compliance; and other powers and duties related to establishing and running and supporting the state councils at a national level.

Article XI – Organization and Operation of the Interstate Commission
This article provides the structure for the Interstate Commission to organize, establish bylaws, set up executive and other committees, establish procedures for meetings, and providing for start-up rules for the initial administration of the compact.

Article XII – Rulemaking Functions of the Interstate Commission
This article gives the Interstate Commission rulemaking authority, and rulemaking guidelines and a provision for judicial review of a proposed rule.

Article XIII – Oversight, Enforcement, and Dispute Resolution
This article addresses oversight, enforcement and dispute resolution specifically. Oversight: Charges the executive, legislative and judicial branches of state governments regarding the purpose and intent of the Compact. It further states that the Interstate Commission shall receive all service of process and has standing to intervene. Further addresses consequences of default by a member state. Dispute Resolution: If requested the Interstate Commission will attempt to resolve disputes and provide rules for mediation and binding dispute resolution. Enforcement: The Interstate Commission shall enforce the rules and provisions of this compact and may initiate legal action to enforce compliance with the provisions of the compact.

Article XIV – Financing the Interstate Commission
This article provides a method for the Interstate Commission to pay its reasonable expenses by collecting annual assessments from each member state. There are limits on incurring obligations and the need for accurate accounting of all receipts and disbursements, and the requirement for a yearly audit by a certified or licensed CPA.

Article XV – Member States, Effective Date and Amendment
States are eligible to become members, the compact becomes effective when no less than 10 states enact the compact into law and the member state passes the law. Rules for how amendments become effective and binding.

Article XVI – Withdrawal and Dissolution
This article addresses how member states withdraw from the compact, what their responsibilities of notice, time, and responsibility for assessments. This article also addresses reinstatement, and compact dissolution.

Article XVII – Severability and Construction
Provisions of this compact are severable and any portion deemed unenforceable does not affect the remaining compact. The compact should be liberally construed, and nothing in this compact inhibits other interstate compacts.

Article XVIII – Binding Effect of Compact and Other Laws
Nothing in this compact prevents the enforcement of other laws that are not inconsistent with this compact. Conflicting laws are superseded by the compact to the extent of the conflict. All rules of the Interstate Commission are binding on the members states. Any provisions that exceed constitutional limits are ineffective to the extent of the conflict of the member state.

Sec. 14.34.020 Compact Administrator.
Establishing a compact administrator and the duties of that office.

Sec. 14.34.030 State Council.
Establishes the state council as a subcommittee of the membership.

Sec. 14.34.040 Regulations.
The board may adopt regulations to implement this chapter.

Sec. 14.34.090 Short Title.
Interstate Compact of Educational Opportunity for Military Children

Section 2: Uncodified law of the State of Alaska is amended by adding a new section:

INDIRECT COURT RULE AMENDMENTS. The changes made by Sec. 1 of this Act have the effect of changing Alaska Rules of Civil Procedure:

(1) Rule 4 – entitles the Interstate Commission to receive service of process of a judicial proceeding that pertains to a Compact provision or rule.

(2) Rule 24(b) - entitles the Interstate Commission to intervene in a judicial proceeding in which the validity of a compact provision or rule is at issue.

Section 3: Uncodified law of the State of Alaska is amended by adding a new section:

CONDITIONAL EFFECT OF CERTAIN PROVISIONS.

Provisions set out in Section 1 concerning service of process and standing to intervene, take effect only if Section 2 receives two-thirds majority vote of each house required by the State Constitution.

Section 4: Uncodified law of the State of Alaska is amended by adding a new section:

CONDITIONAL EFFECT OF ACT; COMMISSIONER'S DUTY TO NOTIFY.

When Sections 1 and 2 of this Act will take effect and notification requirements when the 10 or more states have ratified this compact.

Section 5: Setting out the effective dates of this Act to be not less than 10 states other than this state ratify the Compact or July 1, 2009, whichever is later.

Representative Paul Seaton
Alaska State Legislature
State Capitol (MS 3100)
Juneau, AK 99801-1182

Dear ~~Representative~~ Paul Seaton:

Last night, the Anchorage School Board passed the enclosed resolution in support of the Interstate Military Compact on Educational Opportunity for Military Children. I am also enclosing the School Board memorandum which accompanied the resolution. The vote was unanimous. Our military representative strongly supported this resolution and testified in support of passage.

I am very grateful to Representative Coghill for introducing this important legislation. This compact reinforces our strong commitment to our military families and students and is more important now than ever as they serve our country in these uncertain times.

I hope that this legislation moves quickly through the House and on to the Senate during this legislative session.

If you have any questions, please do not hesitate to contact me at comeau_carol@asdk12.org or 907-742-4312.

Sincerely yours,

Carol

ANCHORAGE SCHOOL DISTRICT
ANCHORAGE, ALASKA

ASD MEMORANDUM # 252 (2008-2009) March 23, 2009

TO: SCHOOL BOARD

FROM: OFFICE OF THE SUPERINTENDENT Carol Comeau

SUBJECT: RESOLUTION IN SUPPORT OF THE INTERSTATE MILITARY COMPACT ON EDUCATIONAL OPPORTUNITY FOR MILITARY CHILDREN

RECOMMENDATION:

It is the recommendation of the administration that the School Board approve a resolution in support of the interstate military compact on educational opportunity for military children (attachment A). It is further recommended that the School Board and administration communicate the support of the Anchorage School District to the Alaska Legislature, the State Board of Education and Early Development, and the Governor.

PERTINENT FACTS:

The United States Departments of Education and Defense signed a historic agreement in June of 2008. This historic agreement set the state for a formalized working agreement to work collaboratively to ease the challenges of transitions for military dependent students. As of the beginning of the 2008-2009 school year, the following states have passed legislation in support of military compacts: Arizona, Colorado, Connecticut, Delaware, Florida, Kansas, Kentucky, Michigan, Missouri, North Carolina, and Oklahoma. Other states have legislation pending. Subsequent to that action, the State Board of Education and Early Development discussed the military compact and expressed strong support for Alaska entering into this compact. This was communicated to the Alaska Legislature and to Governor Palin.

Subsequently, Representative John Coghill, filed HB 137, "An act relating to the Interstate Compact on Educational Opportunity for Military Children..." It is moving through the legislature during this first session of the twenty-sixth

legislature. Representative Dahlstrom has attended meetings relating to this issue as part of her legislative responsibilities.

The administration has reviewed the military compact and the proposed legislation and urges the School Board to pass this resolution in support of its guiding principles. The administration supports this compact because it validates our close working relationships and current practices with our military installations and dependent families. The Mat-Su, Fairbanks, Kodiak, and Sitka school districts are in support of this compact and are in the process of supporting this action for their districts. The administration would like to work with our military representatives and members of the legislature on this important legislation.

An information packet provided to school districts provides general information to the School Board in support of this administrative recommendation and is included as Attachment B.

CC

Prepared and approved by: Carol Comeau, Superintendent

ANCHORAGE SCHOOL BOARD
ASDR 2008-2009-12

A RESOLUTION ENDORSING THE GUIDING PRINCIPLES OF THE INTERSTATE COMPACT ON EDUCATIONAL OPPORTUNITY FOR MILITARY CHILDREN

WHEREAS, military students are faced with numerous transitions during their formative years, and

WHEREAS, moves during the school years, particularly the high school years, present special challenges to learning and future achievement, and

WHEREAS, there is a large and growing military student population in the Anchorage School District, and

WHEREAS, the Anchorage School District can help ease the school transition challenges faced by its military students through awareness, flexibility and accommodations as reflected in the Interstate Compact on Educational Opportunity for Military Children,

THEREFORE, BE IT RESOLVED that the Anchorage School Board endorses the guiding principles expressed on Attachment B of this document, and urges all employees to institute these practices no later than the beginning of the 2009-2010 school year.

PASSED AND APPROVED by the Anchorage School Board this 23rd day of March, 2009.

Re: IN SUPPORT OF HB137
Hearing: Fri, 20 Mar 09 at 0800

Dear Representative Coghill and Committee Members

Partnership and collaboration are longstanding keystones for military and local community support to Alaska public school students. In this spirit, I provide my support to House Bill HB137 "Interstate Compact on Educational Opportunities for Military Children."

HB137 is groundbreaking legislation written specifically for the unique requirements of a transient student population. Issues such as enrollment, testing standards and graduation requirements are addressed through the interstate compact. These types of standards allow a military student to progress without fear of having to reaccomplish work to meet a new requirement after a move. Additionally, this compact provides an avenue for states to not only establish this list of standards but to collaborate on future issues as they arise.

I look forward to increased cooperation with those who set policy for and educate our children in Alaska. The changes implemented from HB137 will directly impact the social, emotional and academic experience of transitioning students who attend Hawaii public schools.

I personally appreciate the hard work and dedication of all those involved with HB137. Thank you for your submission and continued support of our military families.

Very respectfully

Re: **In SUPPORT of HB# 137 "Interstate Compact on Educational Opportunities for Military Children"**

Dear Representative Coghill:

The United States Army, Pacific (USARPAC) would like to inform you of our **support** for the Interstate Compact on Educational Opportunities for Military Children (House Bill #137). When considering the number of school-age military children impacting each state, Alaska has approximately 12,000 school-age military dependents attending public, private, and homeschooling venues. As these students move from state to state, many of them encounter considerable challenges when dealing with enrollment, eligibility, placement, extra-curricular activities, and graduation requirements. Often, military students lose course credits due to multiple school transfers and are often improperly placed in courses due to the varying school requirements.

USARPAC appreciates all that Alaska public schools have done on behalf of our military children regarding transition and deployment issues. The Interstate Compact on Educational Opportunities for Military Children will only serve to compliment and augment what is already being done in the Alaska public schools. Additionally, this bill will join Alaska with other states in an effort to streamline the school transition process and create much needed uniformity between states.

For these reasons, USARPAC supports this compact and encourages the Alaska House of Representatives to pass House Bill #HB137. If you need additional information, please contact my Well Being/Education Specialist, Ruth Davis, at 808-438-4177 or E-mail nancy.ruth.davis@us.army.mil.

Sincerely,

Benjamin R. Mixon

Subject: Support of House Bill #137, "Interstate Compact on Educational Opportunities for Military Children"

Dear Mr. Coghill:

The United States Army Alaska (USARAK) would like to inform you of our support for the Interstate Compact on Educational Opportunities for Military Children (House Bill #137). In the state of Alaska, there are approximately 12,000 school age children of active duty military personnel. As these students move from state to state, many of them encounter considerable challenges when dealing with enrollment, eligibility, placement, extra-curricular activities, and graduation requirements. Often, military students lose course credits due to multiple school transfers and are sometimes improperly placed in courses due to the varying school requirements. The Interstate Compact on Educational Opportunities for Military Children will help to ease this frustration and will aid military students in the school transition process.

USARAK appreciates all that Alaska public schools have done on behalf of our military children regarding transition and deployment issues. The Interstate Compact on Educational Opportunities for Military Children will only serve to complement and augment what is already being done in the Alaska public schools. Additionally, this bill will join Alaska with other states in an effort to streamline the school transition process and create much needed uniformity between states.

For these reasons, USARAK supports this compact and encourages the Alaska House of Representatives to pass House Bill #137.

Sincerely,

Stephen R. Layfield

March 2, 2009

Twenty-Sixth Alaska State Legislature
House of Representatives
State Capitol
Juneau, AK 99801

Dear Representatives:

Kodiak Island Borough School District wholeheartedly endorses House Bill 137. A substantial number of Kodiak Island students come to us from the United States Coast Guard as well as the United States Navy.

We eagerly join this compact's intent to remove the barriers to educational success imposed on the children of military families due to the frequent moves and deployment of their parents. We will be committed to supporting and enforcing the rules and provisions of this compact. It is our District's goal to provide uniform collection and sharing of information; and to promote coordination, flexibility and cooperation between educational systems and families in order to achieve educational success for the student.

We thank Representative Coghill for sponsoring House Bill 137. His concern is for the best interest of the children whose parents are serving this nation with such honor. We appreciate their service and this bill represents a small token of thanks as well as removes several obstacles that are imposed upon their children during their service to our country.

Sincerely,

Stewart McDonald

Re: **IN SUPPORT of HB 137:**
Interstate Compact on Educational Opportunities for Military Children
Hearing: Friday, March 20, 2009, 1:30 PM

Dear Representative Coghill and Education Committee Members:

The US Pacific Command wishes to formally register support for the Interstate Compact on Educational Opportunities for Military Children. With over 12,000 school-age military dependents, Alaska ranks 15th in the nation for the number of military students educated within the state. Representing the Army, Navy, Air Force, Marines and Coast Guard, the children of our military families in Alaska come from and move to nearly every state in the country and numerous US Department of Defense schools around the globe. Each year, approximately one-third of our children transfer from Alaska and are replaced by incoming military-affiliated students. Because of the mobility imposed on families due to assignments and deployments, our children face significant educational challenges including enrollment, eligibility, placement, and graduation.

The passage of this bill allows Alaska to join with other states to create the Interstate Compact, a program that seeks to remove barriers to educational success due to the frequent military moves. The Interstate Compact provides a venue for states to work together which allows our military families to fulfill the mission of serving our country without penalizing the education of their children.

I wholeheartedly support and urge the passage of House Bill 137. Thank you for all you do for the children of military families who, in their own way, also serve our country.

Sincerely,

Stephen D. Tom
Major General, U.S. Army
Chief of Staff

Follow Up Flag: Follow up
Flag Status: Blue

Chair Seaton and Members of the Education Committee,

I am writing to urge your support for this compact which will be heard by your committee Monday morning.

This compact will provide useful support to our military members and their families. Anchorage educates a large number of students of military families. Many of these families have major transitions during the year as parents are deployed or transferred to or from Anchorage. We work closely with Ft. Richardson and Elmendorf AFB to make these transitions easier, and this Compact will assist us in that process.

Case Study #1

Commissioned Personnel

Family of a Major General, United States Air Force; stationed in Virginia

Due to multiple reassignments for our family, my son attended ten different schools prior to graduating from high school. Though he was certified as academically advanced by previous school systems, he was denied advanced placement in one school system solely because he was not in that system for the required period of time. He was denied advanced placement in another system due to its different qualifying criteria as compared to previous jurisdictions. For one four year period during which we were reassigned each year, my son was required to read Romeo and Juliet for each of those four years despite having done so in each preceding state. He was denied the opportunity to participate in sports on more than one occasion because we were reassigned after team tryouts and he was told he was too late. Finally, we had to take the drastic measure of placing him in a private school after one reassignment because, in order for him to graduate on time from his assigned public school, he would have been required to stay in school for an extra year since the new school system refused to accept all of his credits that he had completed in the previous jurisdiction.

My daughter, currently a high school freshman, has attended seven different schools. She had an IEP (Special Education: Individual Education Plan) from one state that was not continued in the next state because her success out-scored their expectation of what her aptitude score indicated she could achieve. In our current state of residence, she is required to pass six course competency tests, even though she took some of those courses in a different state. Furthermore, the preparatory curriculum for these tests is different than in the last jurisdiction so her burden has been needlessly increased. What is most problematic is that, in order for her to graduate high school on time, she must pass an exit exam which is designed for students who have been in this particular state system for twelve years. For that reason, and because previously earned credits have not been accepted by the present jurisdiction, she must take summer school courses every summer for the next three years.

Case Study #2

Enlisted Personnel

Family of a Technical Sergeant, United States Air Force; stationed in Florida

My daughter is 10 years old and is in the 5th grade. Our family moved to Patrick AFB, Florida from Kirtland AFB in New Mexico last May on military orders. My husband is in the Air Force. We enrolled my daughter in elementary school in Florida during the summer and her new school requested her school records in August from her previous school in New Mexico. By the middle of October, the records had not yet been sent to the new school. After repeated written requests, phone calls and emails from Florida school officials and myself to her previous school in New Mexico, some of her records arrived in late October. However, her complete record did not arrive until November 19th.

When her records finally arrived, the school transferred her to the fifth grade QUEST class which is an advanced placement class for students who are gifted and talented. This is where she should have been placed at the beginning of the semester. However, due to the inexplicable delay in transferring her records, her new school placed her in a less challenging learning environment. Therefore, she spent almost a whole semester in an inappropriate classroom setting. The effects of this delay, which may seem to be of little consequence to adults, have been severe and profound for my 10 year old. She was miserable in school for months, forced to study material she had already mastered. She was bored and restless, and she sometimes got into trouble as a result. She is also not where she should be academically and has some catching up to do.

Despite this setback, now that she is in the proper class, she is back to being my happy, well behaved student. However, had legislation such as the proposed compact been in place in time for my daughter, we could have avoided this situation entirely.

SECTIONAL

HB 141

"An Act relating to the Interstate Compact for Juveniles; relating to the State Council for Interstate Adult and Juvenile Offender Supervision; amending Rules 4 and 24(b), Alaska Rules of Civil Procedure; and providing for an effective date."

Section 1: AS 33.36.140 State Council:

(a) Adds the words **and Juvenile** to the State Council for Interstate Offender Supervision. Adds a reference to the repealed and reenacted statute AS 47.15.010.

Section 2: AS 33.36.140

(b) changes the number of council members from seven to **nine**.

(6) adds the position of **the commissioner of health and social services** and provides that the commissioner may appoint a designee to serve in his/her capacity.

(7) adds the position of the **compact administrator appointed under AS 47.15.020**.

Section 3: AS 44.21.410(a)

(a) (5) deletes the word [UNIFORM], adds the word **for** and deletes the word [ON] in order to change the name of the Compact to the Interstate Compact for Juveniles.

Section 4: AS 47.15.010

The Execution of interstate compact is repealed and reenacted.

Section 5: AS 47.15.020

Changes the designator of the compact administrator from the Governor to the commissioner of health and social services and adds a comma to ensure proper grammar.

Section 6: AS 47.15

Adds a new section: AS 47.15.025 which designates the State Council for Interstate Adult and Juvenile Offender Supervision to serve as the state council under AS 47.15.010.

Section 7: AS 47.15

Adds a new section: AS 47.15.035 which allows the Department of Health and Social Services to adopt regulations to implement the provisions of this chapter.

Section 8: AS 47.15.070

Cleanup of section for clarity.

Section 9: AS 47.15.080

States that the short title of this chapter may be cited as the Interstate Compact for Juveniles.

Section 10: AS 47.15.050

Appointment of attorney or guardian provision is covered in AS 47.12.090.

Section 11: The uncodified law of the State of Alaska is amended by adding a new section:

(1) Changes the name of the Compact to the Interstate Compact for Juveniles in Rule 4 in Alaska Rules of Civil Procedure.

(2) Changes the name of the Compact to the Interstate Compact for Juveniles in Rule 24(b) in the Alaska Rules of Civil Procedure.

Section 12: The uncodified law of the State of Alaska is amended by adding a new section: This section applies the old Compact to the states who do not opt to join the new Compact.

Section 13: The uncodified law of the State of Alaska is amended by adding a new section: Court rule changes only take effect if it is approved by 2/3 of the majority of each house.

Section 14: The uncodified law of the State of Alaska is amended by adding a new section: The Compact takes effect only if at least 34 other states ratify the Interstate Compact for Juveniles.

Section 15: Setting the effective date as either the day after the date on which the commissioner of health and social services or the commissioner's designee notifies the revisor of statutes that at least 34 other states have ratified the new Compact or July 1, 2009 whichever is later.

HOUSE COMMITTEE REPORT

ANALYSIS: *(Attach a separate page if necessary)*

Since 1960, the Interstate Compact on Juveniles has provided states, including Alaska, with the procedural means to regulate the movement of court-supervised juveniles across state lines. Approximately 160 juveniles under the supervision of the Department of Health and Social Services leave or enter Alaska each year. This bill would place a new, extensively revised compact into Alaska statute replacing the current compact. The new compact seeks to correct deficiencies in the existing compact that have been identified at the national level with regard to administration, rules, enforcement procedures, financial management, communications and data sharing.

FISCAL NOTE #1

STATE OF ALASKA BILL NO. HB 141

2009 LEGISLATIVE SESSION

ANALYSIS CONTINUATION

Participation in the new compact requires that the state council implement and oversee compact functions. However, because some of the membership requirements for the juvenile compact council are the same as those required for the Alaska State Council for Interstate Adult Offender Supervision, the state intends to have a single state council oversee both compacts. Combining the two responsibilities under the authority of a single council will save the state the effort and duplication of creating and managing two councils with similar functions.

Being part of the new compact will create additional costs to the division. Costs include the following:

$13.0 Travel associated with membership participation, including travel to required meetings by staff
$27.0 Membership Dues, teleconferences, overhead costs that include chargeback, etc.
$ 5.0 Supplies for staff and required meetings

Dues to participate in the current compact are $400 per year. Dues to participate in the new compact are expected to be $14,000 per year.

The cost estimates for the participation in the state council only reflect those anticipated for the operations for the juvenile justice compact and do not include operational and other costs associated with the ongoing adult council activities. The existing adult council has not had in-person meetings for several years, and at least initially the division anticipates that such meetings will be necessary to address the added juvenile justice functions. The travel costs reflected in this fiscal note are again only intended to portray the costs for the juvenile compact activities. The travel costs also reflect the intent that council members represent all areas of the state.

A possible one-time additional cost to the division may also be incurred by adoption of this bill. The new compact will require use of a national database management system that may need to communicate with the division's MIS. The national system is still under development. Without knowing when the new system will be available, or how difficult it will be to link the two systems, we are not prepared to estimate a cost at this time. The division may need to make a specific request to meet this cost at some point in the future.

In addition, the division will be monitoring the amount of additional staff time required to participate in the new compact. At some point an increment request may be needed to fund a position if absorption of these duties is too challenging for our existing staff. The division needs to ensure we do not hamper our ability to research, apply for, and successfully win grants, such as the federal Re-Entry and Gang Prevention grants that have been invaluable in improving public safety and helping the state monitor and improve its response to gang issues. If the increase in workload forces staff to spend less time involved in the management of existing programs (these include the federal Juvenile Justice and Delinquency Prevention Formula Program, the Enforcing Underage Drinking Laws program, Title V, Juvenile Accountability Block Grants, Bureau of Justice Assistance grant management, and Youth Court earmark) current federal funding that the division receives could be at risk.

April 1, 2009

The Honorable Jay Ramras
Chair, House Judiciary Committee
Alaska State Legislature
Alaska State Capitol
Juneau, AK 99811

Dear Representative Ramras:

In the House Judiciary Committee hearing held on March 27, 2009, Representative Max Gruenberg asked the following questions about House Bill 141 (Interstate Compact for Juveniles):

- When did the first state adopt the new Interstate Compact for Juveniles?

We contacted Keith Scott, Director of the National Center for Interstate Compacts at the Council of State Governments, to answer this question; he reported that the first state to adopt the new Compact did so in March 2003 (North Dakota). The 35th state to adopt the Compact, Illinois, did so in August 2008. Adoption of the Compact by 35 states placed the Compact into "active" status, meaning that participating states are now developing the new rules that will govern interstate travel by juveniles. With the 35th state enacting the Compact, the first Interstate Commission meeting was held in December 2008. States that have not enacted the new Compact by December 2009 will not be able to transfer juveniles to and from states operating under the new Compact at that time, and will be required to develop individualized Memoranda of Agreement to transfer juveniles to and from those states.

- What are Hawaii's amendments to its bill on the Interstate Compact for Juveniles, noted in the materials provided by Rep. Coghill's office?

To answer this question we contacted Hawai's juvenile compact administrator. She stated that Hawaii is currently considering two changes to the Compact:

1.) In Article III, subsection (h)(7), deleting the phrase "regulated person or entity" and replacing it with the word "juvenile." The Hawaiian compact administrator said they believed the phrase "regulated person or entity" to be confusing.

2.) In Article VI of the Compact (found in Section 4 of Alaska's HB 141), deleting section (f), which reads: "The existing rules governing the operation of the Interstate Compact on Juveniles shall be null and void 12 months after the first meeting of the Interstate Commission created under this compact." The Hawaiian compact administrator said they made this change to ensure that Hawaii could continue to work with states that have adopted the new compact as well as states that continue to operate under the old compact.

We consulted with Jan Rutherdale and Deborah Behr at the Department of Law on these issues. Our two agencies agree that Hawaii's amendments are not needed in Alaska's bill and would only complicate what is intended to be a nationally uniform document. In the first case, we do not believe the term used in the Compact, "regulated person or entity," is confusing. It clearly refers to the individuals subject to the compact. In the second case, we believe Alaska's ability to work with other states, including those that do not adopt the new compact, is ensured in Section 12 of Alaska's HB 141, which reads:

> The Department of Health and Social Services may continue to implement the provisions of former AS 47.15.010 (the old Interstate Compact on Juveniles), as it read on the day before the effective date of this Act, to certain states that are compacting states to the Uniform Interstate Compact on Juveniles, but have not yet enacted the Interstate Compact for Juveniles, set out in AS 47.15.010, as repealed and reenacted by sec. 4 of this Act, or a substantially similar form of that compact.

- Have other states made amendents to the Compact?

To answer this question we contacted the Keith Scott, Director of the National Center for Interstate Compacts at the Council of State Governments. We asked Mr. Scott if he could provide a list of other states' amendments to the Interstate Compact for Juveniles. Mr. Scott said no such list has been assembled by the Council. While he has received occasional inquiries and provided feedback on potential amendments on the Compact from various states, he has not maintained a list of these inquiries and does not know which, if any, of these potential amendments have been adopted. To fully answer this question therefore would require us to contact individual states and review their legislation that enacted the Interstate Compact for Juveniles.

At the request of Acting Chair Nancy Dahlstrom we are sending a copy of this response to the members of the House Finance Committee, the next committee of referral for HB 141.

Sincerely,

Tony Newman
Social Services Program Officer

RESOLUTION OF THE
AMERICAN PROBATION AND PAROLE ASSOCIATION

"Interstate Compact for Juveniles"

Whereas, The Interstate Compact on Juveniles was established in 1955 and is the primary compact addressing the needs of juveniles within the justice system who move between states and has not been sufficiently amended in its 47-year existence; and

Whereas, This compact is the only vehicle for the controlled movement of juveniles released from custody or on probation across state lines; and

Whereas, The complexities of the compact have become more difficult to administer, and many jurisdictions have expanded supervision expectations to include currently unregulated practices such as victim input, victim notification requirements and sex offender registration; and

Whereas, After national surveys and a detailed study by a task force appointed by the Office of Juvenile Justice and Delinquency Prevention, the overwhelming recommendation has been to amend the document to bring about an effective management capacity that addresses public safety concerns, offender accountability and effective treatment needs.

BE IT THEREFORE RESOLVED, That the Board of Directors of the American Probation and Parole Association hereby endorses and recommends adoption of the amended and newly titled Interstate Compact for Juveniles by the 50 states and affected territories of the United States of America.

January 5, 2003

CSG GOVERNING BOARD/EXECUTIVE COMMITTEE

RESOLUTION ON

THE INTERSTATE COMPACT FOR JUVENILES

WHEREAS, The Interstate Compact on Juveniles was established in 1955 and is the compact addressing the needs of juveniles within the juvenile justice system who move between states and has not been sufficiently amended in its forty-seven (47) year existence; and

WHEREAS, This compact is the only vehicle for the interstate supervision of juvenile offenders, the return of absconders and escapees, and runaways; and

WHEREAS, The complexities of the compact have become more difficult to administer, and many jurisdictions have expanded supervision and program expectations to include currently unregulated practices such as victim input and notification requirements, sex offender registration, and age related issues; and

WHEREAS, After exhaustive research and detailed study, the Office of Juvenile Justice and Delinquency Prevention and The Council of State Governments convened an Advisory Group and Drafting Team to formulate recommendations and implement changes to the compact language to better address public safety, enforcement, accountability and communication concerns.

NOW THEREFORE BE IT RESOLVED, That The Council of State Governments hereby endorses and recommends adoption of the new compact entitled, "Interstate Compact for Juveniles" by the fifty (50) states, the District of Columbia, Puerto Rico and effected territories of the United States of America.

Adopted this 8th Day of December, 2002 at the
CSG Annual State Trends and Leadership Forum
In Richmond, Virginia

Resolution of the
Association of Juvenile Compact Administrators

"Interstate Compact for Juveniles"

Whereas, The Interstate Compact on Juveniles was established in 1955 and is the compact addressing the needs of juveniles within the juvenile justice system who move between states and has not been sufficiently amended in its forty-seven (47) year existence; and

Whereas, This compact is the only vehicle for the interstate supervision of juvenile offenders, the return of absconders and escapees, and runaways; and

Whereas, The complexities of the compact have become more difficult to administer, and many jurisdictions have expanded supervision and program expectations to include currently unregulated practices such as victim input and notification requirements, sex offender registration, and age related issues; and

Whereas, After national surveys and a detailed study by a task force appointed by the Office of Juvenile Justice and Delinquency Prevention, the recommendation has been to rewrite the document to bring about an effective management capacity that addresses public safety concerns and juvenile accountability.

Be it therefore resolved, That the Association of Juvenile Compact Administrators hereby endorses and recommends adoption of the new compact entitled "Interstate Compact for Juveniles" by the fifty (50) states, the District of Columbia, and affected territories of the United States of America.

Adopted this 10th day of August, 2002.

Representative John Coghill
House of Representatives
State Capitol
Juneau AK 99801-1182

Dear Representative Coghill:

On behalf of the Alaska Peace Officers Association (APOA), I would like to thank you for introducing HB 141, an act relating to the Interstate Compact for Juveniles; relating to the State Council for Interstate Adult and Juvenile Offender Supervision; amending Rules 4 and 24(b), Alaska Rules of Civil Procedure; and providing for an effective date.

The APOA State Board's Legislative Committee recently reviewed this proposed legislation and decided to unanimously support this bill.

We thank you for addressing this issue. Please contact the APOA office in Anchorage at 277-0515, if there is anything our organization can do to assist in the passage of this bill.

Sincerely,

Angella Long
State President

Mr. Daniel M. Sprague
Executive Director
The Council of State Governments
P.O. Box 11910
Lexington, KY 40578-8001

Dear Mr. Sprague:

On behalf of the Board of Directors of the National District Attorneys Association I want to offer our support for the Interstate Compact for Juveniles. Our Board unanimously voted to support your effort during our recent meeting in Texas.

As local prosecutors we have to work daily with juveniles that require the attention of our court system and we recognize the need for interstate supervision of juvenile offenders and for the return of those who have escaped, run away or fail to live up to release expectations.

We also recognize that the changes in the complexities of our society have made many of the provisions of the compact badly out dated. Ideas such as community corrections, sexual predator registrations and victims rights provisions all impact on the how states must relate to each other in dealing with criminal offenders and in this instance, juveniles.

The Board of Directors considered the importance of addressing consistent treatment of juveniles in need of both consequences and treatment. The proposed Compact language provides states with the means of accomplishing these goals.

Sincerely,

Daniel M. Alsobrooks
District Attorney General, 23rd Judicial District, Tennessee
President, National District Attorneys Association

Dear Mr. Sprague:

The National Center for Missing & Exploited Children (NCMEC) is pleased to support the proposed Interstate Compact Initiative for Juveniles. As an organization that provides services to runaway youth and their families, we are pleased that this enhanced initiative will ensure consistent use of those policies governing the Compact.

Although, primarily designed to assist those organizations working within the juvenile justice, and social service systems, the Compact will assist NCMEC in it's work to bring children back home by providing law enforcement professionals with clear guidelines and procedures once a missing youth is recovered.

As you work to implement this initiative throughout the 50 states, please do not hesitate to let us know if we can be of further assistance in this most important venture.

Sincerely,

Ernie Allen
President & CEO

PO Box 11910
Lexington, KY 40578-1910

Dear Mr. Foster:

As one of participating entities, the National Juvenile Detention Association (NJDA) has been actively involved in the review and update of the Interstate Compact or Juveniles, originally established in 1955. The two-year effort to modernize the Compact has been thorough and comprehensive and has engaged the efforts of many practitioners from the juvenile justice field. The process addressed a multiplicity of issues regarding the Compact that have been identified as problematic or outdated in an effort to develop a document that meets the current needs of stakeholders in the signatory states.

The nation's detention centers deal with the Contract frequently as the entities responsible for housing juveniles found to be in violation of placement agreements or of state laws in the receiving states. The proposed modifications to the Compact should address many of the issues that have created problems for detention centers and will offer assistance to them in dealing with both sending and receiving states.

As the association serving juvenile detention nationally, NJDA supports the proposed changes to the Compact. The changes are designed to address the needs of the states, of the agencies within the states, and of the public in ensuring that placement agreements are complied with and community safety is ensured.

We are happy to offer assistance to you in your efforts to achieve adoption of the revised Interstate Compact for Juveniles.

Sincerely,

Earl L. Dunlap

Alaska Legislature
Alaska State Capitol
Juneau, AK 99801

Dear Legislators:

The Alaska Juvenile Justice Advisory Committee (AJJAC) held an in-person meeting in Juneau on March 2-3, 2009. At the meeting Division of Juvenile Justice (DJJ) presented information on HB 141, which included the benefits of passing this legislation as well as the potential public safety issues if HB 141 does not pass.

After discussion, the AJJAC voted unanimously on March 2, 2009 to support HB 141, the Interstate Compact for Juveniles.

Please feel free to contact me if you have any questions.

Sincerely,

Carol Brenckle
AJJAC Chair

HB 150

<target><bill>HB 150</bill><subject>HB 150</subject><comm>HFIN26</comm></target>

Representative Alan Austerman

Alaska State Legislature

Sponsor Statement for HB 150

Power Cost Equalization (PCE) is the program designed to (1) extend power assistance to rural Alaska as a response to the development of other power around the state and (2) make power more affordable to rural Alaskans. HB 150 proposes to make permanent the changes to the program adopted by the last legislature, which made higher cost power eligible for PCE. This helps Alaskan families continue to afford to buy the electricity that provides the basic services that we all take for granted.

Residents of Alaska whose electricity is generated by oil have seen their power costs increase significantly during the past few years. Last year for example, oil was purchased during the summer when delivery by barge was possible. At that time, they paid the highest price ever recorded. In consequence, though the price of a barrel of oil has plummeted, the cost in the villages continues to reflect the price at which it was purchased - currently over $7.00 per gallon in many communities.

During the previous legislative session, this high cost of electricity was acknowledged by a change in the Power Cost Equalization statute. It recognized the high cost of fuel and the subsequent increase in Power Cost Equalization by increasing the upper limit, the ceiling, of the PCE calculation from 52.5 cents per kilowatt hour to $1.00 per kilowatt hour. This change was for this heating season only, and sunsets on June 30, 2009.

The floor is a weighted average of the cost of power in Anchorage, Fairbanks and Juneau; currently a little over 12 cents per kilowatt. Power Cost Equalization is paid only on the first 500 kilowatts of power used each month. Any use above that does not qualify for PCE. The amount of PCE for each eligible family depends on a calculation which determines a floor and an amount per kilowatt which establishes the ceiling. As noted, the ceiling is now $1.00 but will revert to 52.5 cents if this bill were not to pass. PCE payments are made on any cost for power falling within this band. For many utilities, the cost of producing power now exceeds 52.5 cents per kilowatt. Consequently, for many electric users, reverting to a PCE ceiling of 52.5 cents would mean considerably higher power bills.

Because power costs in many rural communities are approaching the $1.00 per kilowatt range, it is crucial that PCE helps households by making power more affordable, particularly for basic services. To not pass this legislation would mean that many rural families would simply not be able to afford to buy the electricity needed for even the basic services that we take for granted.

SECTIONAL ANALYSIS
House Bill 150

"An Act repealing certain provisions relating to modifying the factors that apply to calculate the amount of power cost equalization; providing for ."

Bill Section 1. Repeals the substantive law provision, sec. 3, ch. 2, 4SSSLA 2008, that, if left unamended, would restore the former factors that apply to calculate the amount of power cost equalization payable under the Power Cost Equalization Program.

Bill Section 2. Is a contingency provision so that, if House Bill 150 is passed late in the session and is substantially delayed in transmittal to the governor, or the governor otherwise fails to act to approve the bill until at or beyond the June 30, 2009, transitional date, the new provisions are made retroactive so that the legislature's intent (to eliminate the scheduled formula calculation change) is fully and seamlessly carried out.

Bill Section 3. Repeals the related delayed effective date provision, sec. 11, ch. 2, 4SSLA 2008, that, on June 30, 2009, would provide for restoration of the former factors under that Power Cost Equalization formula. This bill section is, in effect, the repeal of an effective date provision that, under the *Manual of Legislative Drafting*, requires that it be separately set out and noticed in the bill title ("providing for an effective date by repealing the effective date of sec. 3, ch. 2, 4SSLA 2008"). *of Legislative Drafting* at pp. 12-13. This change affects an effective date in the earlier bill and requires a two-thirds vote in each house for adoption.

Bill Section 4. Gives the measure an immediate effective date and requires a two-thirds vote in each house for adoption.

This sectional analysis is drawn from a memorandum prepared by Legal Services, Legislative Affairs Agency, at the request of staff of Senator Lyman Hoffman. The full detail of that memorandum, dated January 28, 2009, is available as part of the bill packet for House Bill 150.

LAWS OF ALASKA

2008

FOURTH SPECIAL SESSION

Source
HCS CSSB 4002(FIN) am H

Chapter No.
_____

AN ACT

Amending the bulk fuel bridge loan fund and the bulk fuel revolving loan fund; relating to power cost equalization; relating to Alaska resource rebates, and increasing the amount of the 2008 permanent fund dividend to provide that rebate; suspending the motor fuel tax; eliminating the authority to make certain provisions of the heating assistance program retroactive to November 1, 2007; and providing for an effective date.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

THE ACT FOLLOWS ON PAGE 1

AN ACT

Amending the bulk fuel bridge loan fund and the bulk fuel revolving loan fund; relating to power cost equalization; relating to Alaska resource rebates, and increasing the amount of the 2008 permanent fund dividend to provide that rebate; suspending the motor fuel tax; eliminating the authority to make certain provisions of the heating assistance program retroactive to November 1, 2007; and providing for an effective date.

*** Section 1.** AS 29.60.660(c) is amended to read:

(c) Loans made from the bulk fuel bridge loan fund to one borrower in a fiscal year

(1) may not exceed **$750,000** [$500,000]; and

(2) shall be repaid within one year after the date of the award.

*** Sec. 2.** AS 42.45.110(c) is amended to read:

(c) The amount of power cost equalization provided **for each** [PER] kilowatt-hour under [SUBSECTION] (b) of this section may not exceed 95 percent of the power costs, or the average rate **for each** [PER] eligible kilowatt-hour sold, whichever is less, as determined by the commission. However,

(1) [DURING THE STATE FISCAL YEAR THAT BEGAN JULY 1, 1999,] the power costs for which power cost equalization **are** [WERE] paid to an electric utility **are** [WERE] limited to minimum power costs of more than 12 cents **a** [PER] kilowatt-hour and less than **$1 a** [52.5 CENTS PER] kilowatt-hour;

(2) **each year** [DURING EACH FOLLOWING STATE FISCAL YEAR], the commission shall adjust the power costs for which power cost equalization may be paid to an electric utility based on the weighted average retail residential rate in Anchorage, Fairbanks, and Juneau; however, the commission may not adjust the power costs under this paragraph to reduce the amount below the lower limit set out in (1) of this subsection; and

(3) the power cost equalization **for each** [PER] kilowatt-hour may be determined for a utility without historical kilowatt-hour sales data by using kilowatt-hours generated.

* **Sec. 3.** AS 42.45.110(c), as amended by sec. 2 of this Act, is amended to read:

(c) The amount of power cost equalization provided for each kilowatt-hour under (b) of this section may not exceed 95 percent of the power costs, or the average rate for each eligible kilowatt-hour sold, whichever is less, as determined by the commission. However,

(1) the power costs for which power cost equalization are paid to an electric utility are limited to minimum power costs of more than 12 cents a kilowatt-hour and less than **52.5 cents** [$1] a kilowatt-hour;

(2) each year, the commission shall adjust the power costs for which power cost equalization may be paid to an electric utility based on the weighted average retail residential rate in Anchorage, Fairbanks, and Juneau; however, the commission may not adjust the power costs under this paragraph to reduce the amount below the lower limit set out in (1) of this subsection; and

(3) the power cost equalization for each kilowatt-hour may be

determined for a utility without historical kilowatt-hour sales data by using kilowatt-hours generated.

* **Sec. 4.** AS 42.45.250(e) is amended to read:

(e) Loans made from the bulk fuel revolving loan fund to one borrower in any fiscal year

(1) may not exceed **$750,000** [$500,000], or, if the borrower is a cooperative corporation organized under AS 10.15 or an electric cooperative organized under AS 10.25 and uses the loan to purchase bulk fuel on behalf of more than one community, may not exceed the lesser of **$750,000** [$500,000] multiplied by the number of communities on whose behalf the bulk fuel is to be purchased, or $1,800,000;

(2) shall be repaid in one year or less; and

(3) may not exceed 90 percent of the wholesale price of the fuel purchased.

* **Sec. 5.** The uncodified law of the State of Alaska is amended by adding a new section to read:

ALASKA RESOURCE REBATE. (a) To provide residents of the state with an Alaska resource rebate, the amount of the 2008 permanent fund dividend shall be increased. After calculating the amount of the 2008 dividend under AS 43.23.025, the commissioner of revenue shall add $1,200 to determine the total amount of that dividend. An individual may elect not to receive the $1,200 resource rebate authorized under this subsection. An individual who elects not to receive the $1,200 resource rebate may provide notice of the election on a form provided by the Department of Revenue. Notice must be postmarked or received by the Department of Revenue not later than September 2, 2008.

(b) A veteran or the spouse or dependent of a living or deceased veteran who did not apply for the 2008 permanent fund dividend and is eligible for veterans' benefits under 38 U.S.C. 1315, 1513, 1521, 1541, and 1542 may apply to the Department of Revenue for a $1,200 Alaska resource rebate payment for 2008. The individual shall apply on a form provided by the department not later than October 1, 2008, and shall demonstrate that the individual would have been eligible to receive a 2008 permanent fund dividend under AS 43.23, except that the individual did not apply for that dividend.

(c) A veteran or the spouse or dependent of a living or deceased veteran who is eligible for veterans' benefits under 38 U.S.C. 1315, 1513, 1521, 1541, and 1542 who is denied or receives reduced payments under those provisions or reduced health care benefits solely because the $1,200 increase in the dividend under (a) of this section or the $1,200 payment under (b) of this section received by the individual is counted as income is eligible for cash assistance under AS 47.25.120 - 47.25.300 (general relief assistance). Notwithstanding the limit in AS 47.25.130, the individual is entitled to receive the same amount as the individual would have received under 38 U.S.C. 1315, 1513, 1521, 1541, and 1542 and as a health care benefit as a result of being eligible under 38 U.S.C. 1315, 1513, 1521, 1541, and 1542, had the $1,200 increase or payment not been received under (a) or (b) of this section.

(d) Subject to appropriation, the amount necessary for resource rebates to increase 2008 permanent fund dividends under (a) of this section shall be transferred from the general fund to the dividend fund (AS 43.23.045).

(e) When issuing checks or pay warrants associated with a direct deposit to residents receiving a permanent fund dividend, the commissioner of revenue shall include the following statement in bold type: "This payment includes a resource rebate of $1,200, which is a one-time payment to qualified Alaskans."

* **Sec. 6.** The uncodified law of the State of Alaska is amended by adding a new section to read:

SUSPENSION OF THE MOTOR FUEL TAX. (a) Notwithstanding any other provision of law, the motor fuel tax imposed under AS 43.40.010 is suspended and may not be collected for a period beginning September 1, 2008, and ending August 31, 2009.

(b) Every person subject to AS 43.40.010(c) in the fiscal year that precedes the suspension established in (a) of this section shall submit a monthly report, under penalty of unsworn falsification, on a form or in a format prescribed by the Department of Revenue showing all sales or transfers of gasoline, diesel, and aviation fuel during the month. The department may require that invoices be attached to the report supporting all sales and transfers of gasoline, diesel, and aviation fuel in the state. The report is due to the Department of Revenue on the last day of the month following the month in which sales or transfers of gasoline, diesel, or aviation fuel were made. The Department of Revenue may assess a penalty

of up to $5,000 against any person that fails to file a monthly report or provide the supporting invoices as required by this subsection.

(c) The Department of Revenue may adopt regulations under AS 44.62 to implement this section.

* **Sec. 7.** Sections 9 and 11, ch. 31, SLA 2008, are repealed.

* **Sec. 8.** Section 6(a) of this Act is repealed August 31, 2009.

* **Sec. 9.** Sections 6(b) and (c) of this Act are repealed October 1, 2009.

* **Sec. 10.** Section 2 of this Act takes effect October 1, 2008.

* **Sec. 11.** Section 3 of this Act takes effect June 30, 2009.

* **Sec. 12.** Except as provided in secs. 10 and 11 of this Act, this Act takes effect immediately under AS 01.10.070(c).

MEMORANDUM January 28, 2009

SUBJECT: Senate Bill 88, repealing delayed amendments to the power cost equalization program in order to make permanent certain formula amendments that were treated as temporary when enacted -- sectional analysis (Work Order No. 26-LS0414\R)

TO: Senator Lyman Hoffman, Co-Chair
Senate Finance Committee

FROM: Jack Chenoweth
Assistant Revisor

Among other additions and amendments, § 2, ch. 2, 4SSLA 2008, temporarily amended the parameters for a community to be eligible to receive power cost equalization payments under the power cost equalization program.[1] For one year, now scheduled to

---

[1] Substantively, § 2, ch. 2, 4SSLA 2008, made changes to AS 42.45.110(c) that increased the maximum allowable kilowatt-hour cost for which power cost equalization payments could be calculated from 52.5 cents to $1.00 per kilowatt hour:

> (c) The amount of power cost equalization provided **for each** [PER] kilowatt-hour under [SUBSECTION] (b) of this section may not exceed 95 percent of the power costs, or the average rate **for each** [PER] eligible kilowatt-hour sold, whichever is less, as determined by the commission. However,
>
> (1) [DURING THE STATE FISCAL YEAR THAT BEGAN JULY 1, 1999,] the power costs for which power cost equalization **are** [WERE] paid to an electric utility **are** [WERE] limited to minimum power costs of more than 12 cents **a** [PER] kilowatt-hour and less than **$1 a** [52.5 CENTS PER] kilowatt-hour;
>
> (2) **each year** [DURING EACH FOLLOWING STATE FISCAL YEAR], the commission shall adjust the power costs for which power cost equalization may be paid to an electric utility based on the weighted average retail residential rate in Anchorage, Fairbanks, and Juneau; however, the commission may not adjust the power costs under this paragraph to reduce the amount below the lower limit set out in (1) of this subsection; and

end June 30, 2009, the standards were relaxed -- made less restrictive. Another provision of that Act, § 3, ch. 2, 4SSLA 2008, effective June 30, 2009, restores the standards to what they were before the temporary adjustment.

The provisions of Senate Bill 88 set aside the provisions of the 2008 Act that would restore the former standards.

Bill section 1 repeals the substantive law provision, sec. 3, ch. 2, 4SSSLA 2008, that, if left unamended, would restore the former factors that apply to calculate the amount of power cost equalization payable under that program.

Bill section 3 repeals the related delayed effective date provision, sec. 11, ch. 2, 4SSLA 2008, that, on June 30, 2009, would provide for restoration of the former factors under that power cost equalization formula. This bill section is, in effect, the repeal of an effective date provision that, under the *Manual of Legislative Drafting*, requires that it be separately set out and noticed in the bill title ("providing for an effective date by repealing the effective date of sec. 3, ch. 2, 4SSLA 2008"). *Manual of Legislative Drafting* at pp. 12 - 13. This change affects an effective date in the earlier bill and requires a two-thirds vote in each house for adoption.

Bill section 2 is a contingency provision so that, if Senate Bill 88 is passed late in the session and is substantially delayed in transmittal to the governor, or the governor otherwise fails to act to approve the bill until at or beyond the June 30, 2009, transitional date, the new provisions are made retroactive so that the legislature's intent (to eliminate the scheduled formula calculation change) is fully and seamlessly carried out.

Bill section 4 gives the measure an immediate effective date and requires a two-thirds vote in each house for adoption.

This sectional analysis was prepared in response to a request from Jay Livey.

JBC:lmb
09-007.lmb

---

(3) the power cost equalization **for each** [PER] kilowatt-hour may be determined for a utility without historical kilowatt-hour sales data by using kilowatt-hours generated.

A related amendment proposed by § 3, ch. 2, 4SSLA 2008, would readjust the maximum allowable, as amended in the last line of AS 42.45.110(c)(1), as shown in the text, from $1 back to the former rate of 52.5 cents.

Representative Alan Austerman

Alaska State Legislature

Power Cost Equalization

Alaska Statutes 42.45.100-170

History:

PCE grew out of other energy assistance programs as far back as 1980 PCE was established in 1984 as part of a statewide energy plan to assist rural communities not on the road system that are dependent on diesel fuel which do not benefit from the large subsidized energy projects such as the Four Dam Pool, Bradley Lake and the Alaska Intertie.

- **Utilities using diesel to generate at least 75% of power in October 1984 were eligible**
- **Cost of power was to be equalized to the average of Anchorage, Fairbanks and Juneau – 8.5 cents per kWh**
- **Costs above 52.5 cents were not covered**
- **All users were eligible for the first 700 kWh used**
- **Community Facilities receive PCE on 100% of their usage**

Changes to the program since 1984

PCE Endowment Fund was created and capitalized in FY 2001 with funds from the CBR and the Four Dam Pool Project Sale Proceeds. Further capitalized in FY07 with General Funds, now totals around $400 million, invested to earn 7% annually

- **The floor has been raised 51% to 12.83 cents**
- **The ceiling is unchanged since 1984 at 52.5 cents**
- **Eligible electricity has been reduced 30% to 500 kwh**
- **Only one meter per resident**
- **6,000 commercial customers are ineligible for PCE**
- **Fuel use the same, but costs up 150% between FY00 and FY07**
- **Non fuel costs are up 62%**
- **Current funding ($28 million) is at 100% level**
- **More utilities crossing through the 52.5 cent ceiling**
- **Next year for the same program estimated cost $48 million**

How does PCE work?

The Regulatory Commission of Alaska determines the PCE level for each utility based on fuel and non-fuel expenses such as salaries, insurance, taxes, interest and other reasonable costs. AEA administers the PCE fund based on appropriation by the legislature, monthly reports submitted by participating utilities and eligibility determination.

~ Representing Alaska State House District 36 ~

Akhiok | Igiugig | Iliamna | Karluk | Kodiak | Kokhanok | Larsen Bay | Levelock
Newhalen | Nondalton | Old Harbor | Ouzinkie | Pedro Bay | Port Alsworth | Port Lions

How is PCE level determined?
A formula is used to determine PCE levels: 95% of a utility's costs between the floor (12.87cents per kWh) and the ceiling (52.5cents) If the eligible costs are more than 52.5cents/ kWh then PCE level is 37.65

52.5 – 12.87 = 39.63 cents / kWh x 95% = 37.65 cents
*base may vary on annual basis per AS 42.45.110(c) (2)

What does PCE cost to the state?
FY 09 projection to be $42 million ($28mil. endowment plus $14mil general fund if program remains unchanged)

Doesn't Most of PCE go to "Overheads?"

FY07 Program Statistics	
Fuel Costs	$75,261,627
Non-Fuel Costs	$67,411,410
Total Electricity Cost	$142,673,037
Total PCE Disbursed	$25,437,093
Percent of Fuel Costs	34%
Percent of Total Costs	18%

Does Wind Power affect PCE rates?
According to AEA, rates are affected only if wind generation makes the rate go down. While there are no implicit incentives in PCE legislation for renewable energy there is the economic incentive to keep a downward pressure on costs and subsequent cost to consumer.

Wind power will not completely displace diesel but can reduce fuel consumption by as much as 30%. Last year Kotzebue reduced diesel consumption by 100,000 gallons for instance, saving the community an estimated $450,000. Kotzebue now gets 10% of its energy from wind and hopes to reach 20% in the next several years.

4805

Does PCE reduce rural power cost to a level equal to urban levels?

	Residential cents/kWh	PCE Rate (cents/kWh)	Effective Residential Rate 2008 (cents/kWh)	400 kWh/Month	700 kWh/Month
Wattage					
Hours per Month					
kWh per Month					
Akiachak	0.5300	0.3460	0.1840	$73.60	$128.80
District 38 Average	0.5009	0.3057	0.1952	$78.08	$136.64
Juneau	AEL&P		0.1031	$41.24	$72.17
Anchorage	Chugach		0.1386	$55.44	$97.02
Anchorage	ML&P		0.0972	$38.88	$68.04
Fairbanks	GVEA		0.1908	$76.32	$133.56
Mat-Su	MEA		0.1341	$53.64	$93.87
All PCE comm. av.	0.4312	0.2545	0.1767	$70.68	$123.69
Weighted Average ANC/FBX/JNU			0.1283	$51.32	$89.81
D-38 High:					
Newtok	0.7200	0.3765	0.3435	$137.40	$240.45
Kotzebue	0.3605	0.1915	0.1690	$67.60	$118.30
Lime Village	1.1700	0.3765	0.7935	$317.40	$555.45
Ambler	0.8098	0.3765	0.4333	$173.32	$303.31
Ruby	0.6500	0.2233	0.4267	$170.68	$298.69

Note: Even with PCE, D-38 has an average of 52% higher electric rates than the A/F/J weighted average. (the average of all PCE communities, it's 38% higher)

Factoids:

PCE only pays a portion of approximately 30% of all kWh's sold by the participating utilities.

Average kWh Usage per household

PCE communities:	412
Anchorage:	725
National Average:	750

Currently 183 PCE eligible communities in Alaska

Power for Rural Alaska
30 year History

- Statewide -almost no transmission in Alaska
  - Chugach Electric owned a line from Beluga through Anchorage to Nikiski
  - Fairbanks relied on local heavy oil and coal
  - Diesel fuel was the primary energy source elsewhere
- Very little hydropower
  - Eklutna – 30 mw, serving ML&P, MEA, CEA
  - Cooper Lake – 20 mw, serving CEA
  - Snettisham – 52 mw, serving Juneau
  - ~20 mw of small projects scattered throughout SE Alaska

Power Development Begins -Oil started flowing down the Pipeline

The State began to spend its newfound wealth

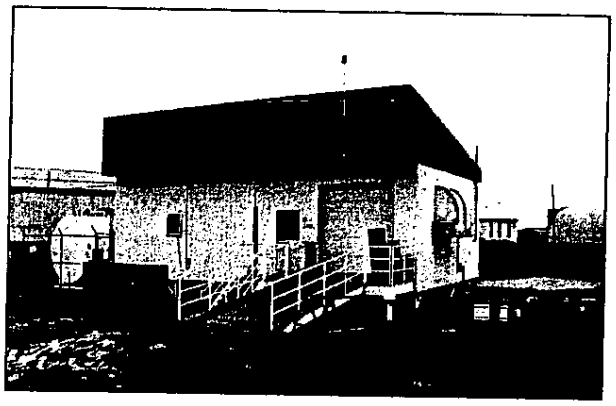
- A transmission line to Fairbanks was started
- The Susitna mega-project design was started - 1981
- The Bradley Lake project was started - 1983
- Kodiak, Valdez, Ketchikan, Wrangell and Petersburg began work on 4 Dam Pool - 1983
- Studies were commissioned to identify projects to reduce the cost of electricity throughout Alaska

Alaska Rural Electrification The First Assistance program

- Oil prices peaked in 1979
- Diesel-fueled utilities were hit hard
- Legislature established the Power Production Cost Assistance Program in 1980 – a one year stop-gap
- In 1981, the program was amended into the Power Cost Assistance Program, which was designed to self-extinguish in five years

RPSU program: Golovin power house

Golovin Before and After



ALASKA ENERGY AUTHORITY

DENALI COMMISSION ALASKA

Alaska Rural Electrification And finally - PCE

- There was no silver bullet to cure rural Alaska's electric needs
- Small loads and small communities spread across thousands of miles could not be interconnected
- Legislature established Power Cost Equalization
  - Cost of power was to be equalized to the average of Anchorage, Fairbanks and Juneau – 8.5 cents per kwh
  - PCA was rewritten as PCE – effective October 1984
  - Utilities using diesel to generate at least 75% of power in October 1984 were eligible
  - Costs above 52.5 cents were not covered
  - All users were eligible for the first 700 kwh used

Power Cost Equalization

- Eligible electricity has been reduced 30% to 500 kwh
- Only one meter per resident
- Commercial customers are ineligible for PCE
- Fuel use the same, but cost up 150% since FY00
- FY09 funding ($28 million) is at 100% level
- More utilities crossing through the 52.5 cent ceiling

PCE Program Changes in Recent Years

	2000	2007
Population served	77,625	78,530
Total Sales (gWh)	391	416
Eligible Sales	116	122
Percentage eligible	29.7%	29.2%
Average Fuel Cost/gallon	$1.10	$2.78
Fuel Consumed – million gallons	27.7	27.6
Fuel cost – millions	$30.4	$75.3
Non-fuel cost – millions	$41.5	$67.4
Total PCE Appropriations– millions	$14.4	$25.6
Percent of costs	20%	18%

Qn. #1 – Does PCE Reduce Rural Power Cost to Urban Levels?

Residential Power Cost per 2007 PCE Report

Chugach Electric	Anchorage	.1205 kWh
Golden Valley	Fairbanks	.2030 kWh
AEL&P	Juneau	.1140 kWh
Kodiak Electric	Kodiak	.1831 kWh
Kotzebue Electric	Kotzebue	.1881* kWh
AVEC	52 Villages	.2362* kWh
Bettles	Bettles	.2859* kWh
MKEC	5 Villages	.4398* kWh
Napakiak	Napakiak	.6014* kWh

*after PCE

Cost of 700 Residential kwh

• Anchorage	$84.35
• Fairbanks	$142.10
• Juneau	$79.80
• Kodiak	$128.17
• Kotzebue	$171.05*
• AVEC Village	$219.56*
• Bettles	$268.63*
• MKEC	$374.88*
• Napakiak	$489.48*

*After PCE

Qn. #2 – Who gets PCE?

- Every residential consumer
  - Only one meter per consumer
  - Only the first 500 kWh
- Community Facilities
  - Up to 70 kWh/resident per month
    - Streetlights
    - Washeterias
    - Water and sewer facilities
    - Community buildings

Qn. #3 – Who doesn't get PCE?

- Schools
- State facilities
- Federal facilities
- Commercial consumers
- Consumers with seriously delinquent accounts

Qn. #4 – How does PCE work?

- Utility applies to RCA to participate
- Utility submits detailed cost and operational data
- RCA determines eligible costs and computes PCE by rate class
- Utility bills customers per normal tariff rates
- Utility applies PCE credit based upon actual consumption (subject to kWh limit)
- Consumer is responsible to pay bill after PCE credit
- Utility bills state (AEA) for all PCE credited
- Utility provides AEA with detailed billing records
- Utility files annual update of costs with RCA, per schedule established by RCA

Qn. #5 – Doesn't PCE discourage Conservation & Innovation?

- Only 29% of all electricity sold in eligible communities receives PCE
- But the smaller the community, the more kwh that are eligible (because of minimal commercial usage)
  - Akiachak 46%
  - Aniak 37%
  - AVEC 48%
  - Cordova 28%
  - Kotzebue 27%
  - Napakiak 72% (School is on own generation)
  - Tanana 38%

Non Fuel Costs –Overhead

- Operating and maintaining power plants
- Operating and maintaining tanks farms
- Operating and maintaining distribution lines
- Connecting customers, billing, collections
- Administration, accounting, engineering, warehouse
- Insurance, depreciation, cost of long-term debt
- Taxes and miscellaneous

Qn. #6 – Would PCE Money be better spent on Alternative Energy?

Wind generation costs 6 times diesel generation

- We cannot use 'utility grade' turbines as in Lower 48
- Average village load is ~150 kw
- There are only 1 or 2 manufacturers of 50-100 kw units
- To accommodate sophisticated integration needs, the existing generation and distribution must be upgraded
- Typical cost of an integrated project $4+ million
- Diesel generation and fuel tankage still needed for the 70%+ energy that wind cannot provide

ALASKA MUNICIPAL LEAGUE
RESOLUTION #2009-14

A RESOLUTION URGING THE GOVERNOR AND THE ALASKA LEGISLATURE TO EXPAND THE POWER COST EQUALIZATION PROGRAM TO INCLUDE MUNICIPAL FACILITIES, SCHOOLS, HEALTH CLINICS, AND COMMERCIAL ENTERPRISES NOT ELIGIBLE UNDER EXISTING LAW.

WHEREAS, energy costs throughout Alaska are creating significant financial burdens for many residents; and

WHEREAS, communities purchase fuel at a contract price that remains fixed even when prices fall; and

WHEREAS, rural municipalities, schools, health clinics and commercial enterprises are facing increasing difficulty meeting energy expenses; and

WHEREAS, the high cost of fuel for space heating and electricity generation threatens the stability of rural communities; and

WHEREAS, communities that pay in excess of the average kilowatt-hour cost of Juneau, Anchorage, and Fairbanks should be eligible for funding; and

WHEREAS, the Alaska Legislature amended the Power Cost Equalization Program during the 2008 Special Session by raising the eligibility ceiling to $1.00 per kilowatt-hour for one year; and

WHEREAS, the State of Alaska administers the Power Cost Equalization Program to provide residents relief from burdensome fuel costs, thereby providing for community stability and economic relief.

NOW, THEREFORE BE IT RESOLVED that the Alaska Municipal League urges the Governor and the Alaska Legislature to expand the Power Cost Equalization Program to include municipal facilities, schools, health clinics, and commercial enterprises with an appropriate increase in the 70 KwH per capita credit used to calculate the subsidy, and provide comprehensive assistance to eligible communities.

AND, BE IT FINALLY RESOLVED that the Alaska Municipal League believes that the expanded PCE program should provide short-term relief from burdensome energy costs and be phased out as the cost of energy is reduced.

PASSED AND APPROVED by the Alaska Municipal League on this 14th day of November, 2008.

RESOLUTION # 09-02

A RESOLUTION FOR AVCP RHA
TO SUPPORT SENATE BILL 88

WHEREAS, The Association of Village Council Presidents Regional Housing Authority (AVCP RHA) provides housing services for the villages in the Yukon-Kuskokwim region; and

WHEREAS, This Senate bill is an act entitled; an Act repealing certain provisions relating to modifying the factors that apply to calculating the amount of power cost equalization, and

WHEREAS, The high cost of electricity is impacting the residents in our region as well as the residents of Alaska; and,

NOW THEREFORE BE IT RESOLVED that the Association of Village Council Presidents Regional Housing Authority hereby supports Senate Bill 88.

CERTIFICATION

The foregoing resolution was passed by the Board of Commissioners of the Association of Village Council Presidents Regional Housing Authority in a duly called meeting where a quorum was present, this 19th day of February 2009 by a vote of 5 ayes, 0 nays and 0 abstaining.

RESOLUTION # 09-05

RESOLUTION SUPPORTING A STATE FUEL CAP AND OTHER MEASURES TO LOWER THE COST OF ENERGY FOR REMOTE RURAL COMMUNITIES THROUGHOUT THE STATE OF ALASKA

WHEREAS, the Kipnuk Traditional Council (hereinafter "TRIBE") is a federally recognized Tribal Governing Body for the Native of Kipnuk; and

WHEREAS, the TRIBE represents to promote and protect the health, education and general welfare of the tribal members of the Native Village of Kipnuk; and

WHEREAS, The TRIBE is continuing to conduct business using its 06-19-2008 fuel delivery from Delta Western, Inc. which was purchased at the bulk fuel cost of $366,095.00 for 71,197 gallons and which was expected to last the TRIBE throughout the winter until next fuel delivery was made in June of 2009; and

WHEREAS, the $1,200 energy rebate provided to Alaska residents in October 2008 by the State in an attempt to assist individuals with high anticipated energy costs this winter did not adequately address the dire economic crisis in Southwest Alaska which were caused by high costs of fuel, a poor commercial fishing season, an early and enduring cold snap, and failed fuel deliveries; and

WHEREAS, the TRIBE has been affected this winter in the same way that the communities of Emmonak and Tuluksak have been affected as reported in this month's recent *Anchorage Daily News and Los Angeles Times* newspaper articles. These articles describe the immediate struggle facing many of our tribal members—a struggle forcing them to choose between using the little money they have to either feed their families or buy fuel to heat their homes; and

WHEREAS, with the reality and hardship of half a winter still ahead of us, it is imperative that more appropriate energy relief be brought to our remote rural community of Kipnuk Traditional Council.

THEREFORE BE IT RESOLVED THAT the Kipnuk Traditional Council fully supports Senator Hoffman's call for the State of Alaska to subsidize the difference when an Alaskan has to pay more than $3 a gallon for residential heating fuel)for up to 600 gallons purchased per residence from the months of September through March).

BE IT FURTHER RESOLVED THAT the Kipnuk Traditional Council wholly supports an extension of the Power Equalization program (PCE) through Senate Bill 88 and supports continued and full funding of the Renewable Energy Fund by the Alaska State Legislature.

CERTIFICATION:

We, the undersigned, hereby certify that the Kipnuk Traditional Council adopted the foregoing Resolution at a duly called, noticed and convened meeting on February 17th 2009, by the affirmative vote of 4 members, with 0 members opposed, and 0 abstaining, and that a quorum was present.

RESOLUTION 09-02-01

TITLE: **RESOLUTION SUPPORTING A STATE FUEL CAP AND OTHER MEASURES TO LOWER THE COST OF ENERGY FOR REMOTE RURAL COMMUNITIES THROUGHOUT THE STATE OF ALASKA**

WHEREAS The Association of Village Council Presidents, (AVCP) is the non-profit Alaska Native regional corporation for its fifty-six federally recognized indigenous Native tribes within Southwest Alaska; and

WHEREAS AVCP's member tribes reside in small isolated villages scattered throughout the Yukon-Kuskokwim Delta in an area that is approximately 59,000 square miles and roughly the size of the State of Oregon. The villages are not connected by road to one another, nor to the rest of Alaska. English is a second language for many tribal members who continue to practice a centuries old hunting, fishing and gathering way of life, congregating at home village sites in the winter and moving to fish camps in the summer; and

WHEREAS AVCP serves its member tribes by providing a variety of social service, human development and culturally relevant programs that promote tribal self-determination and self-governance and work to protect and enhance tribal culture and traditions; and

WHEREAS In an effort to meet this objective, AVCP has repeatedly requested Federal and State assistance to address our region's current energy crisis which has resulted from the high costs of fuel, the catastrophic Lower Yukon commercial fishery, the early and enduring cold snap, and failed fuel deliveries; and

WHEREAS During the last legislative session AVCP supported Senate Bill 4002, Senator Lyman Hoffman's carefully crafted energy subsidy legislation, which attempted to distribute relief to Alaska's rural households facing the daunting challenge of heating and lighting their homes during the grueling winter months; and

WHEREAS Senator Hoffman and Representative Mary Nelson argued that the subsidies provided through Senate Bill 4002 were justified by the fact that the State of Alaska furnishes its own employees living in Southwest Alaska with additional monies to defray the higher cost of living; and

WHEREAS While mid-range income Anchorage families were projected to spend about three percent (3%) of their income on energy costs (based on May's prices) and families residing in other cities or towns connected to Alaska's road system were projected to spend about five percent (5%) of a family's income on energy costs, mid-income households in Alaska's remote rural villages were expected to spend about eleven percent (11%) of their income for energy costs; and

WHEREAS It is estimated that the median annual cost of power and heating costs for an Anchorage family is about $2,400, while it is approximately $4,100 for midsize Alaska towns and cities, and $6,600 for Alaska's remote rural villages; and

WHEREAS Now, more than ever, our communities are confronted with dire economic circumstances preventing them from being able to meet these costs. In fact, recent *Anchorage Daily News* and *Los Angeles Times* newspaper articles focused on our member villages of Emmonak and Tuluksak and described the immediate struggle facing many of our tribal members—a struggle forcing them to choose between using the little money they have to either feed their families or buy fuel to heat their homes; and

WHEREAS With the reality and hardship of half a winter still ahead of us, it is imperative that more appropriate energy relief be brought to the remote rural fifty- six (56) villages of the Yukon-Kuskokwim Delta.

NOW THEREFORE BE IT RESOLVED THAT the Association of Village Council Presidents fully supports Senator Hoffman's call for the State of Alaska to subsidize the difference when an Alaskan has to pay more than $3 a gallon for residential heating fuel (for up to 600 gallons purchased per residence from the months of September through March).

BE IT FURTHER RESOLVED THAT the Association of Village Council Presidents wholly supports an extension of the Power Cost Equalization Program (PCE) though Senate Bill 88 and supports continued and full funding of the Renewable Energy Fund. by the Alaska State Legislature.

ADOPTED by the Association of Village Council Presidents' Executive Board during a meeting at Bethel, Alaska, this 24th day of February, 2009.

Representative Alan Austerman

Alaska State Legislature

MEMORANDUM

To: Representative Mike Hawker, Co-Chair
Representative Bill Stoltze, Co-Chair
House Finance Committee

From: Representative Alan Austerman

Date: April 1, 2009

RE: Public support for HB 150—Power Cost Equalization

There has been a significant volume of support correspondence submitted in reference to House Bill 150. I have attached a small sample of the correspondence for the consideration of the committee members. In addition to support received from individuals, nearly 40 Tribal Councils, Native Corporations, and other organizations such as the Alaska Village Council Presidents and the Alaska Municipal League, submitted their support. I am providing a list of submissions below. Much of the support documentation is available through BASIS.

Please see the attached support packet. Thank you for your consideration of HB 150.

RE: Representative Bob Herron Hearing on Rural Energy issues

Dear Mr. Joseph,

The Kotlik Tribal Council requests that the information regarding the stories about Kotlik be presented in Robert Nick's testimony before the special committee of the State House of Representatives who will be holding a hearing on rural energy issues in Bethel on Saturday, February 28.

The homes in Kotlik are mainly heated with Toyo or Laser stoves, furnaces and other oil burning stoves. Very few homes have wood-stoves.
A lot of homes are poorly constructed which are not insulated enough to block out the cold winds. Therefore, they are "forced" to buy more stove oil than others. There are some who paid over $1,200.00 in one month to heat their home during the month of December 2008 alone.

As many rural villages in Alaska, Kotlik residents and organizations are facing hardship due to the rising cost of energy.

- Freeze up came early the fall of 2008. Beginning October 2008, we have heard of people "missing" stove-oil from their 55 gallon tanks that are connected to their heating system. The high cost of fuel in Kotlik has caused people to "steal" fuel from others, just because they have no other means of purchasing fuel to heat their homes. This has happened many times (in the past) prior to Oct 08, people "stealing" stove-oil from others.
- Some people trade wood and/or borrow money from others for stove oil.
- The Kotlik Yupik Corporation has allowed some people to charge stove oil although they have exceeded their credit limit.
- The price of fuel has forced families to make the choice between paying for bills, food or fuel. Some families chose to buy stove oil over food so the family can sleep in a warm house. The school children were told they can eat breakfast and lunch at the school.
- Between November 20, 2008 and January 26, 2009, thirty eight (38) Kotlik residents were granted the Emergency Fuel Assistance through the Association of Village Council Presidents (AVCP). The emergency funding for Kotlik was used up on January 26, 2009.

- In February 2009, the Kotlik Tribal Council donated a total of 77 gallons of stove oil to families who had no other means of purchasing it themselves. Some people have been ashamed to ask for help whether from AVCP or the tribe, because they never had to in the past.
- More people have applied for the AVCP Energy Assistance than the previous years – hoping to get approved to lower their over-charged credit with the Kotlik Yupik Corporation and/or receive help with fuel.
- For heat, some people are using their electric cook range, portable hot plates and heaters. This has created their electric bills to be $1,000.00 in one month.
- Despite employer's policy, some employees have been granted early pay advance to purchase fuel.

With high energy costs, and no Chinook salmon commercial fishing this summer, the Kotlik Tribe and local organizations have been trying to come up with ideas to help the people of Kotlik. There is a plan for bingo organizations to have special bingo nights and donate those net proceeds to those who are in need.

Sincerely,

Joseph P. Mike
Tribal President

RE: Representative Bob Herron on Rural Energy Issues

Dear Mr. Joseph:

The Ohogamiut Traditional Council (OTC) as a federally recognized tribe with jurisdiction in Marshall, Alaska, is advocating for long-term solutions to address the unrealistically high cost of living in Marshall spurred by high energy and transportation costs. Thus, the OTC requests that Mr. Robert Nick convey our plight to Representative Bob Herron and other dignitaries on the hearing on Rural Energy at Bethel Saturday February 28, 2009.

Marshall resident's pay $7.11 with local taxes for heating fuel. $6.21 with local taxes, and $293.47 for one bottle of 100 pounds of propane. Other petroleum products like motor oil have also dramatically increased as well. Majority of the homes in Marshall are old and inadequately insulated/weatherized that contributes to the high consumption of heating fuel on a given cold spell. People are worried when the temperature drops because it means buying more stove oil with very little or no cash left on hand for groceries. Simply, we are forced to choose between food and heating fuel, which creates dilemma.

Though we in the Marshall area have more firewood available, record snowfall has covered logs along the river and other areas making it harder to look for wood to burn. Majority of the homes are equipped with Toyo, Laser stoves, and the newer AVCP homes utilize central boilers. On the average, families spend over $1,000.00 per month on heating fuel alone with very little cash left to pay for utilities, groceries, and other lines of credit at the local stores. Many families are in debt with utility providers and it is certain that the AVEC will serve many disconnect notices this spring.

The unique challenges in Marshall reflect inflation spurred by the 2008 energy crisis is as follows:

- Colder than usual summer, fall, and winter of 2008-2009.
- Failed summer 2008 king salmon fishery, which is vital to the village economy.
- High grocery and store merchandise prices.
- Lines of local store credit maxed out for groceries and fuel.

- Area air travel to Bethel hub is unaffordable.
- Projected 2009 king salmon commercial fishery closure with subsistence harvest limitations.
- Local wild fire fighters crews did not go out summer 2008; income from this seasonal employment source is another important source of cash flow.
- High unemployment rates in the village as high as 85%.
- 85-90% of the village residents on public assistance.
- Stove oil and firewood theft on the rise.
- CITCO has not distributed free 100 gallons of heating fuel to eligible families to date.
- No local foodbanks for families with low food security.

We are requesting that the State of Alaska, federal government, and other agencies find long-term solutions to address the "third world-like" conditions here in the Wade Hampton District, by far; we are the poorest region in the country. Per capita income for our region was a mere $8,717.00 during the 2000 Census with little changes to date.

Sincerely,

Jason S. Isaac, President

Re: HB 150

Honorable Chairs and Members of the Committee:

On behalf of the Community of Akiak we want to thank the Alaska Legislature's Efforts in addressing the energy needs of all Alaskans, particularly those of our Region which has been faced with challenging humanitarian issues stemming from The ever increasing electric and fuel costs. We are sincerely grateful for last years Increase in the ceiling of the PCE program which has been helping our community The PCE program helps us to maintain the critical circulation of little income and Revenue we are able to have in our village. The PCE program is a priority and we Respectfully ask for, "continuation of the PCE program and perpetuation of the Eligible costs ceiling at $1.00".

The AEA estimates the FY2010 cost of retaining the $1.00 ceiling at $3.4 million. The bulk of our village income is dedicated to paying for the upkeep of energy, and If the PCE rate drops, our electric costs will go up immediately. We realize that Our local utilities will have to collect on those fuel costs in order to recover from 2008. Our families simply cannot afford to pay for this when their energy costs Are already taking up to 70% of their disposable income.

We ask respectfully that the legislature provide funding to continue PCE at a Cost ceiling of $1.00 per kilowatt-hour (kWh). We are also asking you to Consider increasing the household limit form 500kWh per month to the National average of 750kWh per month. Our local economy is fragile and Vulnerable and needs consideration in the PCE program. We are asking for A restoration of PCE eligibility to businesses, clinics and other public Facilities that were included in the program when it was originally enacted. This is critical to keep down inflation and increase the viability of our local Economies in rural Alaska that are struggling or on the brink of failure.

Re: Testimony on HB 150

Honorable Co-Chairs and Members of the Committee:

On behalf of the City of Kwethluk, we want to thank the Alaska Legislature's hard work in addressing the energy needs of all Alaskans, particularly those in our region which face humanitarian issues stemming from the continuous increase of our electrical and fuel costs. Many of us are grateful for last years increase in the ceiling of the Power Cost Equalization Program which has been assisting our community as a whole. The PCE program assists all of us to maintain the critical circulation of what little income and revenue we are able to have in our community. The PCE program is a priority and we respectfully ask for:

Continuation of the Power Cost Equalization Program and perpetuation of the eligible costs ceiling at $1.00.

The AEA estimates the FY- 2010 cost of retaining the $1.00 ceiling at $3.4 million. The bulk of our community income is dedicated to paying for the upkeep of energy, and if the Power Cost Equalization Program rate drops, our electric costs will go up immediately. Our local utilities will have to collect on those fuel costs in order to recover from 2008. Our families cannot afford to pay for this when their energy costs are already taking up to 70% of their income.

City of Kwethluk asks respectfully that the State of Alaska legislature provide funding to continue PCE at a cost ceiling of $1.00 per kilowatt-hour, and we ask that you consider increasing the household limit from 500kWh per month to the national average of 700kWh per month. Our local economy needs the PCE program to make ends meet. We are asking for restoration of PCE eligibility to businesses, clinics, schools, and other public facilities when it was originally enacted. This is critical to keep down inflation and increase the viability of our local economy in rural Alaska. Thank you for giving us the opportunity to comment.

David Epchook, Mayor

Alexie B. Morris, Sr., City Manager

Testimony to:

Alaska State House of Representatives
Community & Regional Affairs Committee
on H.B. 150

By Robert Nick
Nunapitchuk, AK

Introduction

Good morning, my name is Robert Nick, from Nunapitchuk.

Please allow me to express my thanks to co-chairs Rep. Bob Herron of Bethel and Rep. Cathy Munoz of Auke Bay for this opportunity to come before this committee and talk about rural Alaska energy issues, an area which today is dramatically affecting us and our State in many ways.

Energy Costs in Rural Alaska

As you might have heard, gas prices in bush Alaska are between $6 to $8 a gallon, while heating oil equals or costs a little more than gas. In Anchorage, the average electric bill is about $80 to $100 for electricity (around 7 to 8 cents per kWh, plus a few fees) for a 2,000 sq. ft. home in winter, using around 1,000 kilowatt hours (a month). In Bethel, residents with a 1,000 sq. ft. home pay around $150 to $200 for electricity (about 600 kilowatt hours a month) with the help of PCE, with other high fees (surcharges); without it, this cost would have been $300 to $400 month.

This year, we have faced some of the coldest weather, especially in December. People living in bush Alaska villages in some homes, we are told, were trying to keep warm using electric stoves, radiant heaters, or other electric burners. And this has had a dramatic effect on the rise of electricity in relation to the cold weather. And the very cold temperatures this winter have increased heating fuel use also, especially in poorly built homes. And almost all families have fuel-burning furnaces requiring electricity to run. In Kotlik, some families paid $1,000 for electricity in one month. December heating bills were high, with some families in Kotlik and Atmautluak paying $1,200 a month for heating. Some paid less – around $700. Those who only paid $500 or less were "lucky."

You've now heard it said that bush village residents are now choosing fuel over food so their children could sleep in a warm house. As for food, children are told by their parents to eat breakfast and/or lunch at school. And the parents, they say "they make do" with whatever they can. Many homes have empty cupboards and refrigerators, getting by on 100 percent subsistence foods, which in late winter gets harder to get.

Few Jobs in Rural Alaska

Many Alaska village residents that really need help during this energy crisis don't have much money due to little or few jobs or have low-paying jobs because of the depressed local economies of rural communities. To make things worse, grocery or store items are now very, very expensive - first of all, because of high freight costs due to the recent high energy prices and then the high cost of running stores due to high energy costs which is passed down to consumers. And this high cost of consumable foods will be further increased by the proposed By-Pass Mail rate increases in two months (May 11, 2009) by 30 to 40 percent.

Many village residents have limited income and where I come from, the Bethel Census and Wade-Hampton Districts, have high unemployment and poverty rates. The Bethel Census unemployment rate is 16.6%, while the Wade-Hampton unemployment rate is 22.8% (State of Alaska, Jan. 2009). The Bethel Census poverty rate is 20.7% or a fifth of the people out of the 17,147 population, while in Wade Hampton, the poverty rate is 26% or a *quarter* of the population of 7,580 (U.S. Census). (In comparison, the Anchorage poverty rate is around 8 to 10% and unemployment is around 6.8%.)

Conclusion

I am very thankful for last year's increase in the ceiling of the PCE program which has been very helpful to our rural community households this winter. We are asking the Alaska State Legislature to continue fully funding PCE at a cost ceiling of $1.00 per kilowatt-hour (kWh), as per SB 4002, and making this permanent, since that would provide continuing assistance to rural Alaskans in paying for the very expensive electricity found in Bush Alaska.

I am also respectfully asking the Legislature to consider increasing the household limit from 500 kWh per month to the national average of 750kWh per month. Our regional economy is fragile and vulnerable and needs further consideration in the PCE program. Finally, I am asking for a restoration of PCE eligibility to businesses, clinics and other public facilities that were included in the program when it was originally enacted. Without PCE, schools are struggling with high energy and electrical costs, and the cost of maintaining their utilities is taking away from teachers and classroom budgets, compromising the quality of education in those schools.

Thank you very much for listening to me and hearing me out. I don't speak only for myself, but for many of the residents in the Y-K Delta who are facing many hardships this winter because of high energy costs. As part of my testimony, I add some letters that other villages sent (sent by email) and wanted me to include with my other testimony for another energy related bill. Please make time to read them.

Again, thank you for the opportunity to comment.

Supporting HB 150

For Committee Meeting on March 12, 2009 at 8:00 a.m.

The Association of Alaska Housing Authorities' (AAHA) membership includes 14 Regional Housing Authorities created pursuant to AK Statute, 18.55, and the Alaska Housing Finance Corporation (AHFC).

AAHA is in strong support of HB 150.

In partnership with AHFC and an ever-growing list of other state and federal partners, AAHA members serve residents in every part of Alaska. The regional housing authorities have built well over 7,000 housing units since their inception in 1971 and collectively administer well over 100 million in federal and state funds on an annual basis. The vast majority of housing in rural Alaska has been built by AAHA members and AAHA's urban members are a strong presence in Alaska's larger communities. In addition to new construction, AAHA members provide a wide range of other housing and housing related services, including providing weatherization and other housing rehab services throughout the state, developing community infrastructure, and working with our partners like AHFC, are also one of the largest employers in rural Alaska, playing a critical role in helping to sustain many of our local bush economies.

Given the role that AAHA members play in meeting these critical human needs across our state, and given the role and impact of energy costs throughout Alaska, it is obvious that we would have an extremely strong interest in the legislation under consideration today, and the broader issues of both short and long-term state energy policies.

It is our understanding that HB150 continues changes to the Power Cost Equalization Program (PCE), which were approved by the Alaska State Legislature in last July's special session. The changes increase the state subsidy for the PCE Program from up to .52 per kilowatt hour to up to $1.00 per kilowatt hour.

This legislation responsibly addresses the rising cost of energy in the state and the disparity in energy costs in certain parts of the state. Again, on behalf of our many member organizations, serving residents throughout Alaska, we strongly support HB 150.

Heather Arnett, Administrator, Assoc. of AK Housing Authorities
(907) 338-3970, 4300 Boniface Pkwy., Anchorage, AK 99504,

RE: Representative Bob Herron Hearing on Rural Energy issues

Dear Mr. Joseph,

The Kotlik Tribal Council requests that the information regarding the stories about Kotlik be presented in Robert Nick's testimony before the special committee of the State House of Representatives who will be holding a hearing on rural energy issues in Bethel on Saturday, February 28.

The homes in Kotlik are mainly heated with Toyo or Laser stoves, furnaces and other oil burning stoves. Very few homes have wood-stoves.
A lot of homes are poorly constructed which are not insulated enough to block out the cold winds. Therefore, they are "forced" to buy more stove oil than others. There are some who paid over $1,200.00 in one month to heat their home during the month of December 2008 alone.

As many rural villages in Alaska, Kotlik residents and organizations are facing hardship due to the rising cost of energy.

- Freeze up came early the fall of 2008. Beginning October 2008, we have heard of people "missing" stove-oil from their 55 gallon tanks that are connected to their heating system. The high cost of fuel in Kotlik has caused people to "steal" fuel from others, just because they have no other means of purchasing fuel to heat their homes. This has happened many times (in the past) prior to Oct 08, people "stealing" stove-oil from others.
- Some people trade wood and/or borrow money from others for stove oil.
- The Kotlik Yupik Corporation has allowed some people to charge stove oil although they have exceeded their credit limit.
- The price of fuel has forced families to make the choice between paying for bills, food or fuel. Some families chose to buy stove oil over food so the family can sleep in a warm house. The school children were told they can eat breakfast and lunch at the school.
- Between November 20, 2008 and January 26, 2009, thirty eight (38) Kotlik residents were granted the Emergency Fuel Assistance through the Association of Village Council Presidents (AVCP). The emergency funding for Kotlik was used up on January 26, 2009.

- In February 2009, the Kotlik Tribal Council donated a total of 77 gallons of stove oil to families who had no other means of purchasing it themselves. Some people have been ashamed to ask for help whether from AVCP or the tribe, because they never had to in the past.
- More people have applied for the AVCP Energy Assistance than the previous years – hoping to get approved to lower their over-charged credit with the Kotlik Yupik Corporation and/or receive help with fuel.
- For heat, some people are using their electric cook range, portable hot plates and heaters. This has created their electric bills to be $1,000.00 in one month.
- Despite employer's policy, some employees have been granted early pay advance to purchase fuel.

With high energy costs, and no Chinook salmon commercial fishing this summer, the Kotlik Tribe and local organizations have been trying to come up with ideas to help the people of Kotlik. There is a plan for bingo organizations to have special bingo nights and donate those net proceeds to those who are in need.

RE: Testimony on HB 150

Honorable Co-Chairs and Members of the Committee:

On behalf of the Native Village of Platinum, AK: we want to thank the Alaska Legislature's efforts in addressing the energy needs of all Alaskans, particularly those of our region which has been faced with challenging humanitarian issues stemming from the ever increasing electric and fuel costs. We are sincerely grateful for last year's increase in the ceiling of the PCE program which has been helping our community. The PCE program helps us to maintain the critical circulation of little income and revenue we are able to have in our village. The PCE program is a priority and we respectfully ask for:

Continuation of the PCE program and perpetuation of the eligible costs ceiling at $ 1.00.

The AEA estimates the FY 2010 cost of retaining the $ 1.00 ceiling at $ 3.4 million. The bulk of our village income is dedicated to paying for the upkeep of energy, and if the PCE rate drops, our electric costs will go up immediately. We realize that our local utilities will have to collect on those fuel costs in order to recover from 2008. Our families simply cannot afford to pay for this when their energy costs are already taking up to 70 % of their disposable income.

We ask respectfully that the legislature provide funding to continue PCE at a cost ceiling of $ 1.00 per. kilowatt-hour (kwh). And we are also asking you to consider increasing the household limit from 500 kwh per. month to the national average of 750 kwh per. month. Our local economy is fragile and vulnerable and needs consideration in the PCE promgram. We are asking for a restoration of PCE eligibility to businesses, clinics and other public facilities that were included in the program when it was originally enacted. This is critical to keep down inflation and increase the viability of our local economies in rural Alaska that are struggling or on the brink of failure.

Thank you for the opportunity to comment.

Sincerely,

Native Village of Platinum, AK

Gilbert Kilbuck (Mayor)

House Community & Regional Affairs Committee

Re: Testimony on HB 150

Honorable Co-Chairs and Members of the Committee:

On behalf of the Native village of Toksook Bay, we want to thank the Alaska Legislature's efforts in addressing the energy needs of all Alaskans, particularly those of our region which has been faced with challenging humanitarian issues stemming from the ever increasing electric and fuel costs. We are sincerely grateful for last year's increase in the ceiling of the PCE program which has been helping our community. The PCE program helps us to maintain the critical circulation of little income and revenue we are able to have in our village. The PCE program is a priority and we respectfully ask for:

Continuation of the PCE program and perpetuation of the eligible costs ceiling at $1.00.

The AEA estimates the FY2010 cost of retaining the $1,00 ceiling at $3.4 million.
The bulk of our village income is dedicated to paying for the upkeep of energy, and if the PCE rate drops, our electric costs will go up immediately. We realize that our local utilities will have to collect on those fuel costs in order to recover from 2008. Our families simply cannot afford to pay for this when their energy costs are already taking up to 70% of their disposable income.

We ask respectfully that the legislature provide funding to continue PCE at a cost ceiling of $1.00 per kilowatt-hour (kWh.) And we are also asking you to consider increasing the household limit from 500kWh per month to the national average of 750kWh per month. Our local economy is fragile and vulnerable and needs consideration in the PCE program. We are asking for a restoration of PCE eligibility to businesses, clinics and other public facilities that were included in the program when it was originally enacted. This is critical to keep down inflation and increase the viability of our local economies in rural Alaska that are struggling or on the brink of failure.

Thank you for the opportunity to comment.

Sincerely,

House Community & Regional Affairs Committee

Re: Testimony on HB 150

Honorable Co-Chairs and Members of the Committee:

The Association of Village Council Presidents is a non-profit tribal social service organization serving the 56 tribal villages of the Yukon Kuskokwim Delta region of Alaska. Village residents' electric bills and fuel costs have taken up almost all of their disposable income in recent years and in many cases the costs have been overwhelming. As has been reported in news media, many families have had to choose between food and the cost of energy. Because of the energy crisis in our region the PCE program is a priority and we respectfully ask for:

Continuation of the PCE program and perpetuation of the eligible costs ceiling at $1.00.

The AEA estimates the FY2010 cost of retaining the $1,00 ceiling at $3.4 million.

Our residents are already paying upwards of 70% of their available disposable income on energy costs, and if the PCE rate drops, their electric costs will go up immediately. Local utilities will have to collect on those fuel costs in order to recover the 2008 outlay, and this cost is transferred to the households, the families in our villages.

We are asking respectfully that the legislature provide funding to continue PCE at a cost ceiling of $1.00 per kilowatt-hour (kWh.) Increased funding to PCE is definitely part of the solution. PCE does help to equalize energy costs between rural and urban areas on the first 500 kWh used, since a qualifying rural utility receives 95% of eligible costs between the average of ANC/FBX/JNU rates (12.83 cents/kWh) and 1.00 /kWh (the ceiling). It should be noted that only 29% of electricity sold by PCE utilities is eligible for PCE, with the other 71% being paid for by homeowners and businesses at rates almost five times that in urban Alaska.

In addition to increasing the funding to PCE by raising the "ceiling," we also ask that the household limit be increased from 500kWh per month to the national average of 750kWh per month. After last year's fuel prices, virtually all PCE communities are now over the 52.5 cent cost or, as in the larger hub communities, within a few cents. We also ask the legislature to restore PCE eligibility to businesses, clinics and other public facilities that were included in the program when it was originally enacted. This is critical to keep down inflation and increase the viability of local economies in rural Alaska that are struggling or on the brink of failure.

Thank you for the opportunity to comment.

Sincerely,

ASSOCIATION OF VILLAGE COUNCIL PRESIDENTS, INC.

Testimony to:

Alaska State House of Representatives
Community & Regional Affairs Committee
on H.B. 150

By Robert Nick
Nunapitchuk, AK

Introduction

Good morning, my name is Robert Nick, from Nunapitchuk.

Please allow me to express my thanks to co-chairs Rep. Bob Herron of Bethel and Rep. Cathy Munoz of Auke Bay for this opportunity to come before this committee and talk about rural Alaska energy issues, an area which today is dramatically affecting us and our State in many ways.

Energy Costs in Rural Alaska

As you might have heard, gas prices in bush Alaska are between $6 to $8 a gallon, while heating oil equals or costs a little more than gas. In Anchorage, the average electric bill is about $80 to $100 for electricity (around 7 to 8 cents per kWh, plus a few fees) for a 2,000 sq. ft. home in winter, using around 1,000 kilowatt hours (a month). In Bethel, residents with a 1,000 sq. ft. home pay around $150 to $200 for electricity (about 600 kilowatt hours a month) with the help of PCE, with other high fees (surcharges); without it, this cost would have been $300 to $400 month.

This year, we have faced some of the coldest weather, especially in December. People living in bush Alaska villages in some homes, we are told, were trying to keep warm using electric stoves, radiant heaters, or other electric burners. And this has had a dramatic effect on the rise of electricity in relation to the cold weather. And the very cold temperatures this winter have increased heating fuel use also, especially in poorly built homes. And almost all families have fuel-burning furnaces requiring electricity to run. In Kotlik, some families paid $1,000 for electricity in one month. December heating bills were high, with some families in Kotlik and Atmautluak paying $1,200 a month for heating. Some paid less – around $700. Those who only paid $500 or less were "lucky."

You've now heard it said that bush village residents are now choosing fuel over food so their children could sleep in a warm house. As for food, children are told by their parents to eat breakfast and/or lunch at school. And the parents, they say "they make do" with whatever they can. Many homes have empty cupboards and refrigerators, getting by on 100 percent subsistence foods, which in late winter gets harder to get.

Few Jobs in Rural Alaska

Many Alaska village residents that really need help during this energy crisis don't have much money due to little or few jobs or have low-paying jobs because of the depressed local economies of rural communities. To make things worse, grocery or store items are now very, very expensive - first of all, because of high freight costs due to the recent high energy prices and then the high cost of running stores due to high energy costs which is passed down to consumers. And this high cost of consumable foods will be further increased by the proposed By-Pass Mail rate increases in two months (May 11, 2009) by 30 to 40 percent.

Many village residents have limited income and where I come from, the Bethel Census and Wade-Hampton Districts, have high unemployment and poverty rates. The Bethel Census unemployment rate is 16.6%, while the Wade-Hampton unemployment rate is 22.8% (State of Alaska, Jan. 2009). The Bethel Census poverty rate is 20.7% or a fifth of the people out of the 17,147 population, while in Wade Hampton, the poverty rate is 26% or a *quarter* of the population of 7,580 (U.S. Census). (In comparison, the Anchorage poverty rate is around 8 to 10% and unemployment is around 6.8%.)

Conclusion

I am very thankful for last year's increase in the ceiling of the PCE program which has been very helpful to our rural community households this winter. We are asking the Alaska State Legislature to continue fully funding PCE at a cost ceiling of $1.00 per kilowatt-hour (kWh), as per SB 4002, and making this permanent, since that would provide continuing assistance to rural Alaskans in paying for the very expensive electricity found in Bush Alaska.

I am also respectfully asking the Legislature to consider increasing the household limit from 500 kWh per month to the national average of 750kWh per month. Our regional economy is fragile and vulnerable and needs further consideration in the PCE program. Finally, I am asking for a restoration of PCE eligibility to businesses, clinics and other public facilities that were included in the program when it was originally enacted. Without PCE, schools are struggling with high energy and electrical costs, and the cost of maintaining their utilities is taking away from teachers and classroom budgets, compromising the quality of education in those schools.

Thank you very much for listening to me and hearing me out. I don't speak only for myself, but for many of the residents in the Y-K Delta who are facing many hardships this winter because of high energy costs. As part of my testimony, I add some letters that other villages sent (sent by email) and wanted me to include with my other testimony for another energy related bill. Please make time to read them.

Again, thank you for the opportunity to comment.

Re: Testimony on HB 150

Honorable Co-Chairs and Members of the Committee

On behalf of the City of Akiak we want to extend our thank you to the Alaska Legislature's efforts in addressing the energy needs of all Alaskans, particularly those of us in our region who are facing challenging humanitarian issues stemming from the ever increasing fuel and electricity costs. We are very grateful for last year's increase in the ceiling of the PCE program which has been helping our village.

As mentioned in our Fall 2008 request for assistance, some of our head of household customers in our village have to make a choice of having heat in the house or food on the table and as you understand a home without heat and light is no place to live in. The PCE program helps our customers who pay for heating and electrical costs maintain the circulation of the little income and revenue we are able to have in our village. The PCE program is a priority and we respectfully ask for: CONTINUATION OF THE PCE PROGRAM AND PERPETUATION OF THE ELIGIBLE COSTS CEILING AT $1.00.

The bulk of our village income is dedicated to paying for the upkeep of heating and electrical needs, and if PCE rate drops, our electric and heating costs will go up, at present our community members with no other choice have to pay for $.63 cents a kilowatt hour rate and $6.45 for heating fuel, and even the cost of oil is dropping the fuel our vendors paid for does not change and we pay at the same rate to make sure our vendors will be able to purchase more fuel for the up coming year.

We ask respectfully that the legislature provide funding to continue the PCE program at a cost ceiling of $1.00 per kilowatt-hour (KWh.). and we also ask you to consider increasing the household limit from 500kWh per month to the national average of 750kWh per month. We also ask for a restoration of the PCE eligibility to businesses, clinics, and other critical public facilities that were included in the program when it was originally enacted.

This is critical to keep down the inflation and increase the viability of our local economies in rural Alaska that are struggling or even on the verge of failing.

Thank you for the opportunity to comment.

Sincerely,

For the City of Akiak

Debra Jackson
Mayor

Re: Testimony on HB 150

Honorable Co-Chairs and Members of the Committee:

On behalf of the City of Kwethluk, we want to thank the Alaska Legislature's hard work in addressing the energy needs of all Alaskans, particularly those in our region which face humanitarian issues stemming from the continuous increase of our electrical and fuel costs. Many of us are grateful for last years increase in the ceiling of the Power Cost Equalization Program which has been assisting our community as a whole. The PCE program assists all of us to maintain the critical circulation of what little income and revenue we are able to have in our community. The PCE program is a priority and we respectfully ask for:

Continuation of the Power Cost Equalization Program and perpetuation of the eligible costs ceiling at $1.00.

The AEA estimates the FY- 2010 cost of retaining the $1.00 ceiling at $3.4 million. The bulk of our community income is dedicated to paying for the upkeep of energy, and if the Power Cost Equalization Program rate drops, our electric costs will go up immediately. Our local utilities will have to collect on those fuel costs in order to recover from 2008. Our families cannot afford to pay for this when their energy costs are already taking up to 70% of their income.

City of Kwethluk asks respectfully that the State of Alaska legislature provide funding to continue PCE at a cost ceiling of $1.00 per kilowatt-hour, and we ask that you consider increasing the household limit from 500kWh per month to the national average of 700kWh per month. Our local economy needs the PCE program to make ends meet. We are asking for restoration of PCE eligibility to businesses. clinics, schools, and other public facilities when it was originally enacted. This is critical to keep down inflation and increase the viability of our local economy in rural Alaska. Thank you for giving us the opportunity to comment.

Quyana cakneq,

David Epchook, Mayor

Alexie B. Morris, Sr., City Manager

Re: Testimony on HB 150.

Honorable Co-Chairs and Members of the Committee:

On behalf of the Nunapitchuk Limited Corporation, we want to thank the Alaska Legislature's efforts in addressing the energy needs of all Alaskans, particularly those of our region which has been faced with challenging humanitarian issues from the ever increasing electric and fuel costs. We are sincerely grateful for last year's increase in the ceiling of the PCE program which has been helping our community. The PCE program helps us to maintain the critical circulation of little income and revenue we are able to have in our village. The PCE program is priority and we respectfully as for:

Continuation of the PCE program and perpetuation of the eligible costs ceiling at $ 1.00.

The AEA estimates the FY 2010 cost of retaining the $ 1.00 ceiling at $ 3.4 million. The bulk of our village income is dedicated to paying for the upkeep of energy, and if the PCE rate drops, our electric costs will go up immediately. We realize that our local utilities will have to collect on those fuel costs in order to recover from 2008. Our families simply cannot afford to pay for this when their energy costs are already taking up to 70 % of their disposable income.

We ask respectfully that the legislature provide funding to continue PCE at a cost ceiling of $ 1.00 per kilowatt-hour (kWh). And we are also asking you to consider increasing the household limit from 500kWh per month to the national average of 750kWh per month. Our local economy is fragile and vulnerable and needs consideration in the PCE program. We are asking for a resoration of PCE eligibility to business, clinics and other public facilities that were included in the program when it was originally enacted. This is critical to keep down inflation and increase the viability of our local economies in rural Alaska that are struggling or on the brink of failure.

Thank you for the opportunity to comment.

Sincerely,

Nunapitchuk Limited Corporation.
Vice-Chairman- Jerry Sam Wassillie Sr.

House Finance Committee

Re: Testimony on HB 81, FY 2010 Operating Budget

Honorable Co-Chairs and Members of the Committee:

Alaska Village Electric Cooperative is a non-profit, consumer owned utility serving 53 villages – 44% of Alaska's village population. Our average village has some 400 residents and the cost of energy in these communities has been crippling families and businesses for several years, especially in recent years as the world cost of oil has skyrocketed.

During last year's legislative and special sessions, the ceiling on Power Cost Equalization (PCE) costs was raised to $1.00 per kWh for nine months and will automatically revert back to 52.5 cents per kWh unless the legislature acts to perpetuate this rate. If the rate drops, AVEC's residential and community users will see an average rate increase of more than twelve cents a kWh immediately, since we will be collecting on last year's fuel costs through September, 2008.

As you consider the Operating Budget for FY 2010, I respectfully request that funding be included to continue PCE calculated on costs of up to $1.00 per kilowatt-hour (kWh.) There is no doubt that the floor for PCE calculations will be rising substantially since Juneau saw a few months of diesel powered electricity, Fairbanks saw dramatic fuel cost increases and Anchorage consumers also saw rate increases last year. Each penny that the floor increases reduces the PCE program cost by $1,160,000.

It is entirely likely that this year's floor increase will result in the Governor's recommendation of $32,160,000 being sufficient to fully fund PCE even with the higher ceiling of $1.00 per kWh being left in place. However, I urge you to add an additional sum of $5,500,000 to the PCE program to continue funding the program up to costs of $1.00 per kWh, especially since there is no assurance that the cost of oil won't return to the stratospheric heights it reached last year. The $5.5 million figure was computed by the Alaska Energy Authority as being the maximum amount necessary to cover the balance of last year's fuel cost as well as an allowance for higher non-fuel costs and the inclusion of additional communities.

Thank you for the opportunity to comment.

Sincerely,

Meera Kohler

Subject: FW: Expensive living in the Bush

From: Edna Nicolai [mailto:kwetcc@yahoo.com]
Sent: Monday, January 26, 2009 11:54 AM
To: Sen. Lyman Hoffman
Subject: Expensive living in the Bush

Dear Senator Lyman,
Greetings from Kwethluk, Ak.
My question and wonder about fuel prices going down in Anchorage and the lower 48 states, and us in the bush, rural villages with high fuel prices, ranging from 6.23 a gallon for stove oil and 7.15 for gas, still rising in three months, why are gas prices going up
in the bush and they're going down in the cities? Doesn't Alaska have it's own gas pipeline, it's own business in gas? It's really expensive to live in the bush. Not only in
Emmonak are the crisis, it's all over the bush villages! Even in the Kuskokwim, because
the fisheries in the commercial fishing season sell their fish for only .10cents for kings '
and .05 a pound for chums and so forth! We suffer with enormous charge accounts in
the local stores, in debt with credit cards, just to get buy to live like the white man,
to try to afford high prices in fuel and gas. Sometimes I myself, have to decide what to
buy, food or gas or stove oil. Especially to have 7 people to support. I knew that supplement and the dividend had a catch to it too, it's like the state is bribing us constantly, to dry us up. How am I going to come up with 1,800 dollars when taxes
are time, I work my ass off, trying to catch up with my light bill every month, which
mounts up to 287 dollars a month, every month! The other thing I worry about is
running out of stove oil, which 10 gallons of stove oil will last only a week, buy gas
every day because we need woods to keep our house warm, to save up on stove oil,
just so we wouldn't freeze during the night, once a month to go down to bethel to buy groceries, just to save money, and man, oh man, can't even afford to buy a bag of potatoes now a days, which costs almost 30 dollars! Fresh fruits, have to wait some other time, wait until their a little bruised, just to wait until they mark them down, because
their very, very expensive! Once a month to buy food, my fridge is empty by the time
the middle of the month arrives.
The Committee, the Senate, the higher Archy, they've never been here, never lived in the bush before, so they don't know what the heck is going on, it's not only in Emmonak that suffering is happening, it's all over the bush. Just the other day, the troopers were in the village, they confiscated a families caribou meat because they hunted without a license.
I can't afford to buy a license right now and my freezer is empty, my fridge is empty, because we just can't go out and kill edible food at this time, because we can't afford to buy gas either.
I know you've lived in Bethel, but it's worse now. We need help out here.
I appreciate your patience and time.

Thank you.
Sincerely,
Edna Nicolai

Letter from
Mark Leary, Tribal Administrator
Napaimute

2/27/09

I wrote this 4 years ago when fuel prices were closer to half of what they are this winter.

Imagine her situation today at our current energy prices:

3/5/05

Yesterday my family and I went to Tuluksak to watch the regional basketball tournament in their nice new school. During a break in the games we went around town visiting.

We stopped to see one of the elders (age 79). She was sitting there in her dimly-lit HUD house, but it quickly brightened up as she smiled and hugged us – so glad to have visitors.

As we sat there visiting, she mentioned that she was worried that her power was going to turn off and pointed to a little box on the wall. She said that it had been beeping earlier. I asked her what was that little box?

She began to explain:

Her monthly power bill used to be $300 - $400 every month – just for a regular house, nothing fancy in it. 2 bedrooms I think. There was no way she could afford to pay that high of electricity bills. This was the case with most of the village and people fell farther and farther behind in paying their power bills. So the power company came in and installed these little boxes in the houses. A person goes over to the IRA/TC office and puts money down to buy power. They get a card, something like a phone card, debit card, etc. which they slide through the little box on the wall in their house to get the amount of power they are able to pay for. When the amount of power they purchased, begins running low, the little box on the wall begins beeping and they have to go buy some more – if they can.

She said she put down $40 on February 14 – 22 days ago and now was running low on power.

$40 spent on power over 22 days doesn't sound too bad but it seems to come at a price. She talked about how under this system she is worried about her power all the time and tries to be very conservative – this includes living in a dimly lit house much of the time.

She is alone in there a lot and gets depressed and grouchy. Living in dim light must contribute to that – those older HUD houses are dark to begin with – dark paneled walls, bum windows, and even oriented the wrong way to the sun in some villages.

But she brightened up talking about getting out once in awhile and being able to still get a few pikes and ptarmigans to dry.

She offered to make coffee, but I was thinking those coffee makers use something like 900 watts, so told her no – we already had coffee at another house before. I didn't want her to run out of power.

I guess it's good to be conservative in our power consumption, but does this mean our elders have to live in the dark so that they can afford to have a little bit of power?

I woke up this morning wondering if her power was still on.

Back at the school, the maintenance person gave me a tour of the building's mechanical facilities (heating, ventilation, back up power, fire protection, etc.) – the latest high tech computer controlled systems. He can control it all from the computer in his office and even check the systems on the Internet when he is out of town. It was impressive. He said in cold weather the new school uses up to 4,000 gallons of fuel a month – quite bit more than the old school.

These are two examples of why we have to keep an open mind when considering new options for energy, transportation, and economic development for our region.

Respectfully Submitted by:

Letter from Atmautluak

From: David Nicholai [atmautluaktc@hughes.net]
Sent: Friday, February 27, 2009 12:34 PM
To: Allen Joseph
Subject: High Energy Cost and Representative Bob Herron on Rural Energy issues

Dear Mr. Joseph,

The Atmautluak Traditional Council requests that the information regarding the stories about Atmautluak be presented in Robert Nick's testimony before the special committee of the State House of Representatives who will be holding a hearing on rural energy issues in Bethel on Saturday, February 28.

The homes in Atmautluak are mainly heated with Toyo or Laser Stoves, furnaces and other burning stoves. A couple of homes use wood stoves but most of the houses are starting to use the wood stoves because of the high prices of fuel oil.

A lot of homes are poorly constructed which are throughly insulated enough to block out the cold winds, snow and rain. Most are forced to buy more stove oil than others. Most of the residents paid over $1,200 in a month to heat their home during the month of December 2009 alone.

Many rural residents in Alaska are facing hardships due to the rising cost of energy, Atmautluak is also in the hardship situation as follows:

1. The price of fuel has forced families to make the choice between paying for bills, food, and fuel oil. Some families chose to buy stove oil over food so their family can stay warm during nights when they sleep.

2. The high cost of fuel in Atmautluak has caused some residents to steal from nearby households/homes. This has happened many times in the past, people stealing stove-oil from others.

3 Estimated percentage of individuals that recieved Emercency Fuel Assistance for the residents of Atmautluak is 90% from AVCP, but the funding already has been exhausted for the Village of Atmautluak due to most of the residents applying for the assistance. There are more that applied this year (2009) than last year (2008), also most of the residents are applying for Energy Assistance from AVCP.

4. About 30% of the population for the Village of Atmautluak work for a living and despite the policies that they have, most of the employees are being granted advanced pay just to heat their homes.

5. The Native Village of Atmautluak is also in a hardship for keeping up with their electricity. The residents are charged .69 cent a KWH and the whole village is generated thru a 180 KW and a 150 KW generators. Right know the village is using the 150 because the other one needs some parts to be fixed.

6. The Atmautluak Traditional Council had to make/borrow loans for fuel and maintance just to keep the generators running. And is trying to cover the costs by fundraising thru gaming activities. The residents pay about $500.00 a month just to have the fuel burning furnaces running.

With high energy costs, and no Chinook salmon commercial fishing last summer, the Atmautluak Tribe and local organizations have been trying to come up with ideas to help the people Atmautluak.

Sincerely,

Moses A. Pavilla Sr.
Atmautluak Traditional Council

Supporting HB 150

For Committee Meeting on March 12, 2009 at 8:00 a.m.

The Association of Alaska Housing Authorities' (AAHA) membership includes 14 Regional Housing Authorities created pursuant to AK Statute. 18.55, and the Alaska Housing Finance Corporation (AHFC).

AAHA is in strong support of HB 150.

In partnership with AHFC and an ever-growing list of other state and federal partners, AAHA members serve residents in every part of Alaska. The regional housing authorities have built well over 7,000 housing units since their inception in 1971 and collectively administer well over 100 million in federal and state funds on an annual basis. The vast majority of housing in rural Alaska has been built by AAHA members and AAHA's urban members are a strong presence in Alaska's larger communities. In addition to new construction, AAHA members provide a wide range of other housing and housing related services, including providing weatherization and other housing rehab services throughout the state, developing community infrastructure, and working with our partners like AHFC, are also one of the largest employers in rural Alaska, playing a critical role in helping to sustain many of our local bush economies.

Given the role that AAHA members play in meeting these critical human needs across our state, and given the role and impact of energy costs throughout Alaska, it is obvious that we would have an extremely strong interest in the legislation under consideration today, and the broader issues of both short and long-term state energy policies.

It is our understanding that HB150 continues changes to the Power Cost Equalization Program (PCE), which were approved by the Alaska State Legislature in last July's special session. The changes increase the state subsidy for the PCE Program from up to .52 per kilowatt hour to up to $1.00 per kilowatt hour.

This legislation responsibly addresses the rising cost of energy in the state and the disparity in energy costs in certain parts of the state. Again, on behalf of our many member organizations, serving residents throughout Alaska, we strongly support HB 150.

Heather Arnett, Administrator, Assoc. of AK Housing Authorities
(907) 338-3970. 4300 Boniface Pkwy., Anchorage, AK 99504, aaha@alaska.net.

HB 151
USE, REGULATION, AND OPERATION OF BOATS

House Bill 151 extends the sunset dates of the Statewide Boating Safety and Education program.

This program has been successful as more boaters follow safety rules and boating fatalities have steadily decreased during the tenure of the law while bringing Alaskan law into compliance with federal regulations. Under this program, boating deaths in Alaska have decreased by 20% and the lives of at least 17 Alaskan children have been saved by a Kids Don't Float life jacket.

Furthermore, the Statewide Boating Safety and Education Act has allowed the State of Alaska to consistently receive over one million dollars a year in federal funds. To receive full funding for the federal FY 10 this sunset must either be extended or repealed during the 2009 legislative session.

Passage of HB 151 will ensure that a successful program will continue to save lives and that the State of Alaska will continue to have clear and consistent boating safety regulations with ample federal funds to administer safety and educational programs.

I ask for your support extending an effective program that has successfully saved lives.

REPRESENTATIVE MARK NEUMAN

Rep.Mark.Neuman@legis.state.ak.us

Sectional Analysis of House Bill 151:

Section 1 of the bill repeals temporary law sections and amendments to sections of temporary law from ch. 28, SLA 2000. Chapter 28, SLA 2000, created the state boating safety and education program, including boating safety equipment requirements, boating operating restrictions, accident reporting requirements, and provisions related to civil liability for boating accidents. The sections repealed in sec. 1 of the bill provide that the state boating and safety education program will not be amended to remove the program.

Section 2 of the bill provides for an effective date by repealing the effective dates of the temporary law sections listed in sec. 1 of the bill.

Section 3 of the bill provides for an immediate effective date.

Explanation of Changes

HB 151
USE, REGULATION, AND OPERATION OF BOATS

The committee substitute for HB 151 introduced in House Labor & Commerce extends the sunset date for eight years. In its original version HB 151 would have repealed the sunset date instead of extending it as the current version does.

HOUSE COMMITTEE REPORT

(11)
Date Referred to Committee: April 1, 2009 **FURTHER REFERRALS:**

Date of Committee Action: 4-16-09

The FINANCE Committee considered: **HOUSE BILL NO. 151**

"An Act repealing the termination date of the statewide boating safety and education program; providing for an effective date by repealing the effective dates of secs. 3, 5, 7, 9, 11, 14, 16, 18, 20, 23, 26, and 27, ch. 28, SLA 2000, and sec. 3, ch. 119, SLA 2003; and providing for an effective date."

White Paper

Alaska's Boating Safety Dollars at Work

Alaska Division of Parks and Outdoor Recreation
Office of Boating Safety

BACKGROUND

While Congressional attention to recreational boating safety began as early as 1910, the Federal Boat Safety Act of 1971 (46 U.S.C. 13101) provided the first federal funding to the states to *"encourage greater state participation and uniformity in boating safety efforts, and particularly to permit the states to assume the greater share of boating safety education, assistance, and enforcement activities."* Since this act was passed, the U.S. Coast Guard estimates that more than 27,000 lives have been saved. Nationally, the number of non-commercial boating fatalities has been cut in half; even though boat ownership more than doubled over the same period. Even so, recreational boating safety remains on the National Transportation Safety Board's "*12 Most Wanted List*" for needed transportation safety improvements.

Boats are an integral part of the lifestyle of many Alaskans. Alaskans use boats to enjoy the state's world-class recreational opportunities, but also as a primary means of transportation and subsistence. Unfortunately, Alaska's boating fatality rate is nearly 10 times the national average and among the nation's highest. In Alaska, only highway accidents account for more unintentional death than does drowning. Most of these fatalities could have been prevented. However, from 1987 to 1998, Alaska was the *only* state without a boating program. As a result, Alaska's share of federal funding available for boating safety was divided among all the other states. At the same time, because U.S. Coast Guard registered our boats, Alaska's registration fees went into the U.S. Treasury instead of remaining in the state. Alaska became the last state to establish a boating safety program when the State Office of Boating Safety was established by Department Order within the Division of Parks and Outdoor Recreation in June 1998. The Alaska Boating Safety Act (AS 05.25) was drafted and introduced in the 1999 legislative session. The act was signed into law on May 11, 2000, and Alaska qualified for the state's full share of federal grant money for state boating programs. The Alaska Boating Safety Program relies almost entirely on this federal grant. Federal funding now contributes more that $1,000,000 a year to Alaska's economy.

Alaska's investment in boating safety is small when compared to the lives saved

4880

COPY ON FILE

PROGRAM MISSION AND OBJECTIVES

Mission:
It is the policy of the state to promote the safety of persons and property in and connected with the use, operation, and equipment of boats on the water of the state and to promote the uniformity of laws relating to boat safety (AS 05.25.050) with the intended purpose of reducing boating deaths, injuries and property damage, and enhancing enjoyment on Alaska's waterways.

Objectives:
1. Cooperate with other state and federal agencies and organizations to provide for statewide boating safety programs in Alaska.
2. Secure the benefits available to the state under 46 U.S.C. 13101 - 13110; and take the actions necessary to continue to qualify for federal grant funding under 46 U.S.C. 13102, and the U.S. Coast Guard / State of Alaska Memorandum of Understanding.
3. Provide and expand the boating safety education program to increase public awareness of boating risks and the knowledge, skills, and abilities of Alaska's boaters, including:
    - The production of educational materials relevant to the needs of Alaska's urban and rural boaters.
    - Support for statewide boating safety education programs for children 1 and other high - risk groups.
    - Training, certification, and support of boating safety instructors.
    - Evaluation, on an ongoing basis, of the effectiveness of programs.
4. Support the Alaska Boating Safety Advisory Council.
5. Provide for a uniform state waterway marking system.
6. Provide for boating accident and casualties reporting.
7. Serve as liaison between the U.S. Coast Guard and the Division of Motor Vehicles as necessary on state boat registration issues.
8. Provide for boating law enforcement training.
9. Promote the uniformity of laws relating to boating safety.

Alaska faces significant challenges in meeting these goals:

- Less than one third of the state is served by the road system, and many communities are difficult to reach.
- Alaska's population is the second most culturally diverse in the nation. Over 56 different cultural groups, including about 102,000 Eskimo, Athabascan, Aleut, Tlingit, Tsimshian, and Haida natives, are represented. Learning and communication styles differ widely between these groups.
- Alaska's cold water presents a significant risk to boaters and our vast distances often make a timely rescue impossible, significantly reducing the odds of surviving a boating emergency in Alaska.

Because the Alaska Boating Safety program is small compared to most other states, maintaining dynamic and productive partnerships is critical if we are to meet these goals. To that end, the program works closely with the U.S. Coast Guard, the U.S Coast Guard Auxiliary, other agencies, and boating organizations, to make the most out of limited resources and avoid duplication of effort. Alaska also maintains relationships with other states and participates in regional and national boating organizations to identify and adopt best practices of other boating programs, maximize resources, and increase program quality, productivity, and effectiveness.

---

2 According to data published by the State of Alaska, Dept. of Heath and Social Services, drowning was the second leading cause of unintentional death for children and youth under 20 between 1991 and 1998, with an average of 9.2 lives lost per year. From 1994 – 1998 the drowning death rate of Alaska's children, per 100,000, was 4.8 as compared to the national rate of 1.8 per 100,000.

PROGRAM HIGHLIGHTS

The *Kids Don't Float* life jacket loaner program is a collaborative effort between the Alaska Department of Health and Social Services, the Alaska Boating Safety Program, the U.S. Coast Guard, and local sponsors. A total of **514** life jacket loaner board stations in **153** communities have been established statewide. The Alaska Boating Safety Program is the primary supplier for the program, and has thus far provided **20,133** life jackets for *Kids Don't Float.*

Kids Don't Float has an educational component that provides boating safety programs for Alaska's students. To date, classes provided by the program have reached more than **56,235**.

The program offers *Alaska Water Wise (AWW)*, Alaska's nationally approved and Alaska – relevant, boating safety course.

- A total of **1,400** boaters (representing all of Alaska's census areas) have completed an *AWW* course to date.
- The program also trains Alaskans to teach *Alaska Water Wise* courses and supports their efforts to teach boating safety in and around their communities. **250** potential instructors from more than **52** Alaska communities in **24** of the state's 27 census areas have completed the *Alaska Water Wise Instructor* course thus far.
- Those who meet program requirements for state instructor certification are placed on the state boating safety instructor registry and authorized to teach *Alaska Water Wise (AWW).* As of the end of 2008, there were **104** instructors on the state's instructor registry.

The program conducts an ongoing social marketing campaign using variety of boating safety messages on radio and television, and produces publications and articles (including the popular *Alaska Boater's Handbook*, an award - winning boating safety poster series), and instructional films such as *Cold Water Boating.*

The program provides marine law enforcement training for the Alaska State Troopers and other Alaska law enforcement officers

The program provides support for the U.S. Coast Guard Auxiliary Vessel Safety Check program.

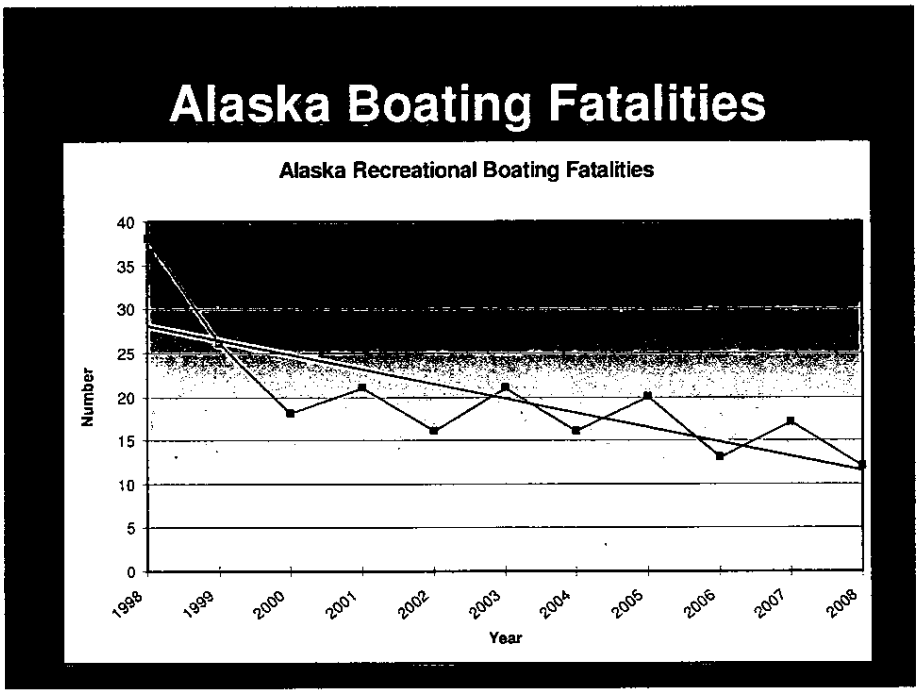
The Alaska Boating Safety Program is entirely user – funded, through the federal *Sport Fish Restoration and Boating Trust Fund* and a portion of Alaska's state boat registration receipts.

Observational behavior studies, statewide boater surveys, instructor and course evaluations, student testing, and U.S Coast Guard statistics are examples of sources used to evaluate program performance.

The Alaska Boating Safety Program and its staff have received multiple awards, including the U.S. Coast Guard *Public Service Commendation*, and the U.S. Department of Transportation's *Partnering for Excellence Award.* The *Kids Don't Float Peer Educator Program* was the 2002 regional winner of the National Safe Boating Council's *Boating Education Advancement Award.*

IS THE PROGRAM IS MAKING PROGRESS?

Alaska's recreational boating fatality rate (fatalities per 100,000 boats) has dropped steadily from 144 in 1998 (when the state's Alaska Office of Boating Safety was established) to 34 in 2007. In comparing the number of fatalities during each of the two five - year periods within the previous 10 years, fatalities have dropped 20% between the two periods.



At least 17 Alaskan children have survived a water emergency thanks to a *Kids Don't Float* loaner life jacket.

<u>Alaska Boater Survey Results:</u>

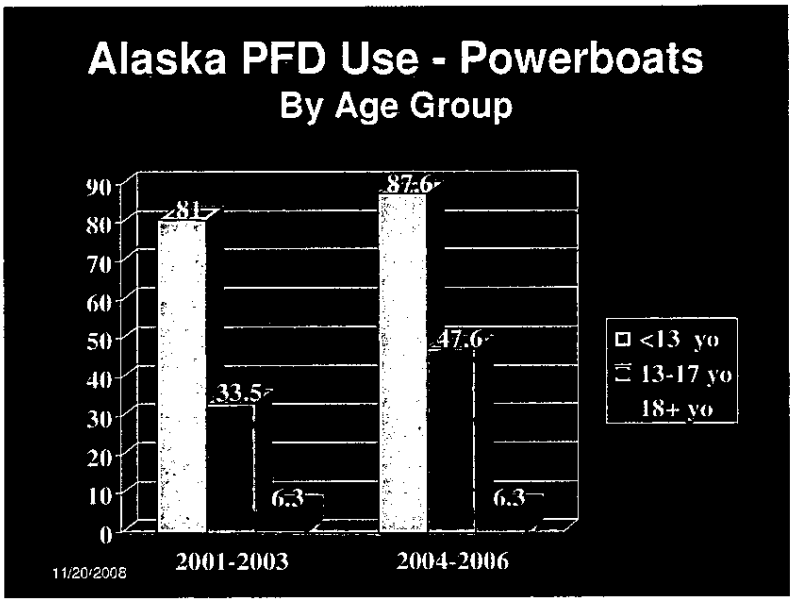
25% of Alaskan boaters say they wear a life jacket more often today than they did five years ago

12% of Alaskan boaters say a life jacket saved the life of someone in their household

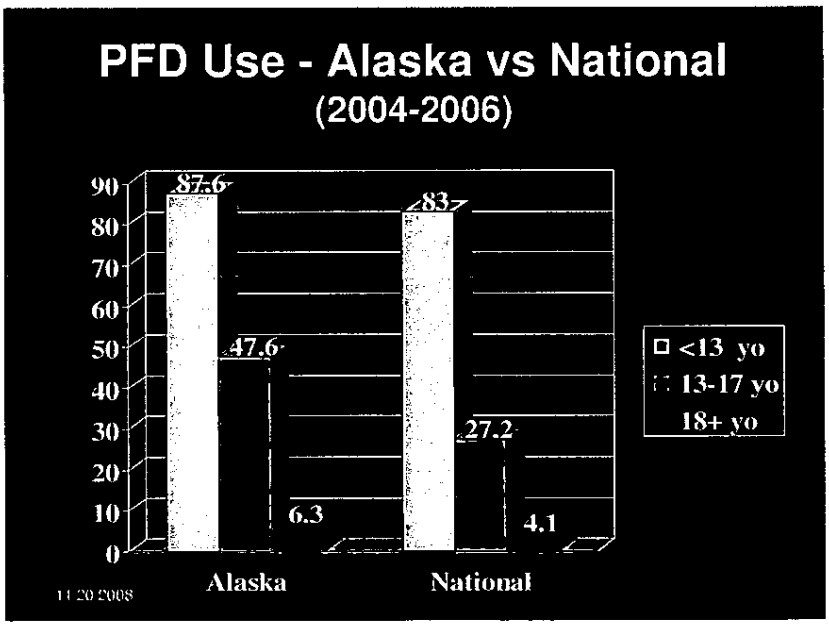
77% of Alaskan boaters believe everyone should be required to wear life jackets when in open boats

72% of Alaskan boaters say they have taken a boating safety course, compared to 46% five years ago

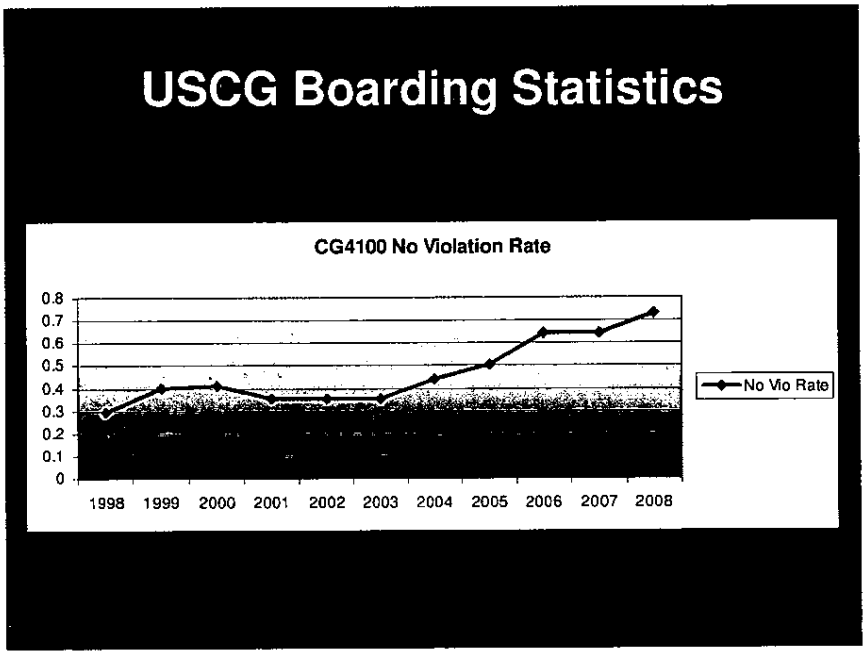
Observational life jacket wear rate studies show increased life jacket wear in ages 17 and younger.



Alaska's life jacket wear rates are above the national average in all age groups.



USCG law enforcement boarding statistics show increasing compliance rate.



STAFFING DETAIL

The Alaska Boating Safety Program has four full time staff. Three were pre – existing positions within the Division of Parks that were moved to the boating safety program.

Boating Law Administrator – (Natural Resource Mgr. I, PCN 10-5101)
Each state's Boating Law Administrator plans, implements, and directs the functions of their state's boating program. This position formulates and revises the program's budget, policies, and management strategies, coordinates with other state agencies that provide Alaska's program elements, assures maximum utilization of financial and human resources, identifies and adopts the best practices of other state boating programs, designs ways to evaluate performance of the program, and leads the analysis of boating related issues affecting the State. The position serves as the state's official representative on local, regional, and national levels with regard to recreational boating issues, policy development, and program funding and also provides regulatory interpretive assistance to agencies and the public.

Boating Education Coordinator – (Park Ranger I, PCN 10-5257)
The Boating Education Coordinator plans, develops, and coordinates the delivery of a variety of educational programs statewide. This position's duties include curriculum development, professional training, and overseeing paid and volunteer boating safety instructors, overseeing all *Kid's Don't Float* schools programs, providing a variety of seminars and presentations, managing the Alaska Boating Safety Instructor Registry, and assisting and supporting boating safety instructors statewide. This position also trains law enforcement officers in boating law and marine law enforcement, and is a law enforcement field - training officer.

Boating Education Specialist – (Park Specialist, PCN 10-5260)
This position independently provides a variety of high quality and Alaska - relevant public boating education and interpretive programs that promote safe, enjoyable boating experiences, for children and adults, performs outreach and schedules programs, develops, prepares for, and executes boating education programs including *Alaska Water Wise* and *Kids Don't Float* classes, workshops, and presentations. Ensures all programs satisfy the standards and policies of the Division of Parks and Outdoor Recreation, Alaska Office of Boating Safety.

Administrative Assistant – (PCN 10-5062)
Administrative support functions in the areas of budget preparation and financial monitoring/reporting, purchasing, inventory, travel, training, personnel, and information dissemination. Duties include gathering information for and preparing budgets, federal grant applications and reports, fiscal and financial tracking of expenditures, procurement of equipment, supplies, and professional services, preparing and tracking reimbursable services agreements, executing payments, processing time sheets, arranging travel, preparing and processing travel authorizations, coding, certifying, and reconciling invoices, attending meetings and drafting meeting minutes, handling public and agency inquiries, assisting unit staff with boating safety program activities, preparing advertising orders, organizing media campaigns, developing and maintaining web pages, and setting up and maintaining a highly organized system of electronic databases, files and records.

The program also funds several other pre-existing Division staff. Currently, **13** seasonal park rangers and other Division staff work on specific boating education projects during a portion of their off season, particularly in the delivery of *Kids Don't Float* school programs.

ENDORSEMENTS FOR
THE ALASKA BOATING SAFETY ACT OF 2000

- Alaska Municipal League
- United States Coast Guard
- United States Coast Guard Auxiliary
- Valdez Harbor Users Association
- Seward Boat Owners Association
- Whittier Boat Owners Association
- Alaska Wilderness Recreation and Tourism Association
- Alaska Marine Dealer's Association
- Trails and Recreational Access for Alaskans Board (TRAAK)
- Alaska Safety Advisory Council
- Kenai River Special Management Area Citizen's Advisory Board
- Alaska Boating Safety Advisory Council (ABSAC)
- Mat-Su State Parks Citizen's Advisory Board
- Big Lake Community Council
- Sitka State Parks Citizen's Advisory Board
- Denali Safety Council (members: National Bank of Alaska, University of Alaska, Teamsters local 302, Carr's, Anchorage Daily News, VECO, Alyeska Pipeline, ARCO, NANA/Marriott, Federal and State OSHA, Anchorage Safe Communities)
- Alaska Department of Public Safety
- Alaska Wildland Adventures
- National Transportation Safety Board
- Alaska Department of Health and Social Services - Community Health and EMS Section
- Western States Boating Administrator's Association
- National Association of State Boating Law Administrators
- South Peninsula State Parks Citizen's Advisory Board
- Alaska Recreation and Park Association
- Kodiak State Parks Citizen's Advisory Board
- Fairbanks Paddlers
- Valdez City Council
- Kachemak Bay State Park Citizen's Advisory Board
- Alaska Harbormaster's Association
- Fairbanks Area Alaska State Parks Citizen's Advisory Board
- Kodiak City Council
- Bristol Bay Area Health Corporation
- Valdez State Parks Citizens Advisory Board
- River Management Society - Alaska Chapter

CS FOR HOUSE BILL NO. 151( )

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SIXTH LEGISLATURE - FIRST SESSION

BY

Offered:
Referred:

Sponsor(s): REPRESENTATIVES NEUMAN, Austerman, Kerttula, Wilson

A BILL

FOR AN ACT ENTITLED

"An Act amending the termination date of the statewide boating safety and education program; providing for an effective date by amending the effective date of secs. 3, 5, 7, 9, 11, 14, 16, 18, 20, 23, 26, and 27, ch. 28, SLA 2000, as amended; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** Section 30, ch. 28, SLA 2000, as amended by sec. 3, ch. 34, SLA 2004, is amended to read:

Sec. 30. Sections 3, 5, 7, 9, 11, 14, 16, 18, 20, 23, 26, and 27 of this Act take effect on the earlier of the following dates:

(1) July 1, **2011** [2010]; or

(2) 90 days after the date the chair of the Alaska Legislative Council notifies the revisor of statutes that in the previous state fiscal year the state did not receive and does not anticipate receiving federal funding for a statewide boating and safety education program; the director of the division of legislative finance shall notify

the chair of the Alaska Legislative Council when the state, in the previous fiscal year, did not receive federal funding for a statewide boating and safety program; the chair of the Alaska Legislative Council may not give the notice described in this paragraph unless the notice is approved by a vote of a majority of the members of the Alaska Legislative Council.

*** Sec. 2.** This Act takes effect immediately under AS 01.10.070(c).

FISCAL NOTE

STATE OF ALASKA
2009 LEGISLATIVE SESSION

April 7, 2009

Representative Bill Stoltze, Co-Chairman
House Finance Committee
State Capitol, Room 515
Juneau, AK 99801

Dear Representative Stoltze,

Thank you for taking the time to read my testimony on behalf of HB 151, The Use, Regulation, and Operations of Boats.

My name is Jane Schultz and I am the Kenai Peninsula EMS Coordinator. I am a volunteer EMT and while I have been fortunate to have never been on a call for a drowning victim, medics who have always walk away with the same thought; "what a senseless and preventable accident."

Statistics reveal that 3 out of 4 boating fatalities are the result of capsizing or falling overboard into cold water, where the boater was not wearing a life jacket.

The Kids Don't Float School Program has reached over 60 thousand children and has proven itself time and again. Boating Safety and Kids Don't Float has been involved with the Safe Kids Fair for the past 8 or 9 years in Kenai and the message they share has helped to save countless lives. It always makes me think of when our son was in school and was taught the importance of seat belts. Ryan and his friends would get in the car and buckle up. It took my husband and me a while longer to learn that important lesson. It is the same for boat safety and life jackets. We can get to the parents by teaching the kids but we also need to have boat safety classes and information available to people of all ages.

The first boating safety class I have ever taken was last fall at the EMS Symposium and was taught by Joe McCullough. It made a tremendous impression on me. I can't tell you how many times I have been out with family and friends and the weather has turned and I thought to myself, "I sure would feel better if I was wearing a life jacket, but no one else was wearing one so I didn't either. Believe me, after taking that class, I will never be out on the water again without a life jacket! The boat safety class taught me that the chance of survival increases tenfold with the simple step of putting on a life vest.

The Boat Safety Program is nearly 10 years old and even though very small has more than proven itself. Nearly all boating mishaps involve operator controllable risk factors. Most are predictable and preventable. With proper attitude, knowledge, skill and sound unimpaired judgment, and enjoyable boating experience can be shared by family and friends and this is what the Boat Safety Program teaches.

The Alaska Boating Safety Program teaches the skills to enjoy that great day on the water. It also trains, certifies, and supports a statewide network of registered boating safety instructors who teach Alaska Water Wise Courses and other boating education programs in their communities.

It truly is a program that saves lives and saves families.

Thank you for allowing me the time to testify for a program that is so vital to our state.

Sincerely,

Jane Schultz,
Kenai Peninsula EMS Coordinator

Spread Sheets

	Sec. No.	Department	Appropriation / Allocation	Description	Federal Funds #1002	Federal Economic Stimulus #1212	Total Funds
1	1	**Transportation**	**Airport Stimulus Projects - Appropriation**	**Airport Stimulus Projects Appropriation** **This appropriation totals $45,600,000.**			**0.0**
2	1	Transportation	Airport Stimulus Projects - Allocation	Akiachak: Airport Relocation This project will relocate and construct a new Akiachak Airport 3,300 foot runway, construct a new airport, new apron, taxiway and airport access road, construct snow removal equipment buildings, and install fencing and airport lighting.		11,500.0	**11,500.0**
3	1	Transportation	Airport Stimulus Projects - Allocation	Allakaket: Airport Improvements Repair and stabilize the runway embankment, taxiway and apron to correct areas that have experienced serious differential settlement, side slope failures and erosion. Work will include resurfacing, addition of a dust palliative and lighting adjustments or replacement as needed, improve apron setback from the runway, and make other improvements as funding allows.		3,600.0	**3,600.0**
4	1	Transportation	Airport Stimulus Projects - Allocation	Fairbanks International Airport: Access Control Improvements This project is the result of a Federal Aviation Administration (FAA) directive to identify access control measures to reduce deviations and incursions at Fairbanks International Airport (FAI), i.e., fencing, gates, and improved signage. The Fairbanks International Airport ranks among the top 20 of 400 certified airports in incursions and deviations. Every effort will be made to implement the least costly and restrictive measures that accomplish the objective of reducing incursions and deviations.		3,000.0	**3,000.0**
5	1	Transportation	Airport Stimulus Projects - Allocation	Fairbanks International Airport: 1L-19R - Taxiway and Apron Improvements This request will fund construction of the initial phase of Taxiway Echo and pave aircraft apron areas proximal to runway 1L-19R. The initial phase of Taxiway Echo consists of excavating, filling, grading, paving, lighting, and marking approximately 400' of new taxiway.		3,000.0	**3,000.0**

	Sec. No.	Department	Appropriation / Allocation	Description	Federal Funds #1002	Federal Economic Stimulus #1212	Total Funds
6	1	Transportation	Airport Stimulus Projects - Allocation	Fort Yukon: Airport Improvements Resurface and include a dust palliative on the apron, taxiway and runway at the Fort Yukon Airport. Correct drainage problems, clear overgrown vegetation, and complete other improvements as funding allows.		6,500.0	**6,500.0**
7	1	Transportation	Airport Stimulus Projects - Allocation	Hoonah: Airport Improvements Extend airport runway to state standard to reduce weight penalty on aircraft serving Hoonah; expand lease lots and apron space to accommodate additional general aviation and commercial traffic, provide additional lease lots for hangars and commercial development; provide dedicated parking area for short and long-term passenger parking; construct a ramp to allow float planes to be hauled out and serviced or based at the airport; and other improvements.		100.0	**100.0**
8	1	Transportation	Airport Stimulus Projects - Allocation	Kodiak: Chemical Storage Building This project will provide a safe storage and mixing area for liquid de-icing materials and equipment. Without the building and storage tanks to mix the dry urea for liquid application, the use of sand for runway de-icing will continue. New Alaska Airlines jets have a less-forgiving engine for sand or foreign object debris ingestion which could lead to engine failure. The need to switch from sand to chemical de-icing at Kodiak is further underscored by Central Region Maintenance and Operations' inability to obtain sand that meets the minimum specifications identified by the Federal Aviation Administration (FAA).		1,200.0	**1,200.0**
9	1	Transportation	Airport Stimulus Projects - Allocation	Kotzebue: Apron Expansion Expand the terminal apron to the south and east. This project will also construct new general aviation aircraft parking, a new access road and taxiway, security fencing and drainage improvements, and will provide new leasing areas.		5,300.0	**5,300.0**
10	1	Transportation	Airport Stimulus Projects - Allocation	Ouzinkie: Airport Reconstruction and Relocation Project will entail the final design, right of way acquisition, and construction of a new airport and access road for the village of Ouzinkie located near Kodiak.		8,400.0	**8,400.0**

	Sec. No.	Department	Appropriation / Allocation	Description	Federal Funds #1002	Federal Economic Stimulus #1212	Total Funds
11	1	Transportation	Airport Stimulus Projects - Allocation	Ted Stevens Anchorage International Airport: North Terminal Gate N8 Reconstruct the deteriorated gate apron pavement, including all associated lighting, hydrant system, jet bridge foundations, drainage, pavement, subgrade preparation, etc. Expand the portland cement area to provide better support for ground service equipment during aircraft servicing. This project is needed to avoid continued high maintenance costs and potential damage to aircraft from Foreign Object Debris (FOD).		3,000.0	**3,000.0**
12	1	**Transportation**	**Transit Stimulus Projects - Appropriation**	**Transit Stimulus Projects - Appropriation** **This appropriation totals $9,083,900.**			**0.0**
13	1	Transportation	Transit Stimulus Projects - Allocation	Statewide: Transit Rural Formula Capital Projects This program provides federal stimulus funding from the Federal Transit Administration (FTA) for the purchase of vehicles and equipment, installation and repair of bus shelters/bus stops and other capital expenditures. These funds require no match and are available to both public transit systems and private nonprofit organizations through a grant process.		5,183.9	**5,183.9**
14	1	Transportation	Transit Stimulus Projects - Allocation	Juneau: Downtown Transit Center Construction This project will construct a combination transit center and parking facility in downtown Juneau. This investment in public transportation will benefit economic development in the capital city, reduce parking congestion, and improve transportation options for those who choose not to drive or who cannot afford a personal vehicle. Adequate public transportation is critical for those making the transition from welfare to work.		3,000.0	**3,000.0**

	Sec. No.	Department	Appropriation / Allocation	Description	Federal Funds #1002	Federal Economic Stimulus #1212	Total Funds
15	1	Transportation	Transit Stimulus Projects - Allocation	Mat-Su: Park and Ride at Seward Meridian/Parks Highway Project would construct a parking and ride area somewhere along the Parks Highway near or east of Wasilla. Possible locations include near the southern extension of Trunk Road and near Seward Meridian Parkway. Approximately 10,000 people commute daily between the Mat-Su Valley and Anchorage and the existing park and ride facilities are consistently over capacity. Van-pool, carpool and bus service from the valley is in the process of being expanded and parking demands are increasing.		900.0	**900.0**
16	1	**Transportation**	**Highway and Bridge Stimulus Projects - Appropriation**	**Highway and Bridge Stimulus Projects Appropriation** **This appropriation totals $148,273,900.**			**0.0**
17	1	Transportation	Highway and Bridge Stimulus Projects - Allocation	Dalton Highway Culverts: Milepost 260 to 321 This project replaces existing culverts at seven locations between MP 260 and 321, addresses the Oksrukuyik Creek Bridge and raises the roadway grade between MP 311.7 and 313.3. This project will preserve and extend the service life of the highway, enhance highway safety and provide adequate fish passage. Within the project area, seven stream crossings have culverts that are undersized and/or failing. Failure of any of these culverts could lead to washouts which would severely diminish transportation capabilities along the Dalton. There is an approximately 2.1 mile stretch of road (MP 311.7 to 313.9) that is routinely overtopped and threatened by floodplain overflow of the Sag River.		26,300.0	**26,300.0**
18	1	Transportation	Highway and Bridge Stimulus Projects - Allocation	Parks Highway: Milepost 72 to 83 Rehabilitation, Willow to Kashwitna Rehabilitate the Parks Highway, from MP 72 to 83, between Willow Creek and the Kashwitna River. The improvements include widening the embankments for 8-foot shoulders; rehabilitate the pavement; add a total of seven miles of alternating north and south bound passing lanes; and construct paved roadside pull outs at Kashwitna Lake and Grey's Creek.		23,000.0	**23,000.0**

	Sec. No.	Department	Appropriation / Allocation	Description	Federal Funds #1002	Federal Economic Stimulus #1212	Total Funds
19	1	Transportation	Highway and Bridge Stimulus Projects - Allocation	Alaska Highway: Milepost 1412 to 1422 This project will rehabilitate, improve drainage, re-level and resurface the Alaska Highway between MP 1412 and 1422 (Delta South). The project design and environmental documentation are complete. Substandard embankment conditions have been identified in this area causing significant pavement failures. This project will improve the Alaska Highway to accommodate increased truck traffic associated with gas line construction.		5,300.0	**5,300.0**
20	1	Transportation	Highway and Bridge Stimulus Projects - Allocation	Glenn Highway: Hiland to Eklutna Resurfacing Mill and resurface mainline driving lanes on the Glenn Highway from the Hiland Interchange to Eklutna Interchange. Project will also resurface all ramps and bridges encompassing Hiland Road and Artillery Road Interchanges, and replace guardrail and pavement markings.		25,000.0	**25,000.0**
21	1	Transportation	Highway and Bridge Stimulus Projects - Allocation	Kotzebue: Shore Avenue Rehabilitation and Erosion Protection Reconstruct Shore Avenue from Lake Street, through the primary commercial area of Kotzebue, approximately 4,400 feet to the end of the road at Crowley Dock. Shore Avenue will be paved, new sidewalks, a pathway, parallel parking, an open space on the seaward side, and an erosion protection revetment on the seaside. This request includes $8.5 million of Federal Receipts and $6.5 million of Federal Economic Stimulus Funds.	8,500.0	6,500.0	**15,000.0**
22	1	Transportation	Highway and Bridge Stimulus Projects - Allocation	Alaska Highway: Milepost 1308 - Tok Weigh Station Reconstruct the Tok Weigh Station to include multi-platform scales, a new scale house, and a heated inspection facility. The current facility does not meet the needs of the vehicle inspection crews on site. A new weighing system is needed to facilitate simultaneous axle group and gross weight enforcement. The site will be expanded to accommodate a new scale house. This request includes $1.0 million of Federal Receipts and $3.0 million of Federal Economic Stimulus Funds.	1,000.0	3,000.0	**4,000.0**

	Sec. No.	Department	Appropriation / Allocation	Description	Federal Funds #1002	Federal Economic Stimulus #1212	Total Funds
23	1	Transportation	Highway and Bridge Stimulus Projects - Allocation	Yakutat: Areawide Paving Resurface Airport Road from approximately MP 0 to MP 4. Extend existing Dangerous River Road pavement approximately 0.2 miles to access new entrance to city landfill. Resurface and extend existing Ocean Cape Road pavement along the segment extending approximately 0.23 miles from the intersection with Airport Road. Pave and improve drainage on approximately 1.4 mile long Max Italio Road. Replace two tidal relief culvers and related work on Mallot Avenue.		3,800.0	**3,800.0**
24	1	Transportation	Highway and Bridge Stimulus Projects - Allocation	Haines: Front Street to Union Street Rebuild this 28'-wide section of road, remove existing asphalt, grade and restore existing subgrade as required, and place new surface to match existing finish grades. Rebuilding this section of roadway will complete reconstruction of the remaining section of highway from town to the ferry terminal, streamlining access to the ferry system and other port facilities. Pedestrian safety is vastly improved, as is transport efficiency.		2,500.0	**2,500.0**
25	1	Transportation	Highway and Bridge Stimulus Projects - Allocation	Glenn Highway: Milepost 34 to 42 - Parks Interchange to Palmer Resurfacing Mill and resurface mainline driving lanes on the Glenn Highway from the Parks Highway / Glenn Highway Interchange to the Palmer-Wasilla Highway Intersection in Palmer. This project will provide an improved driving surface and extend the service life of the facility. The route has pavement ruts ranging from .25 inch to 1.5 inches deep. Guardrail is in need of repair or replacement, and guardrail end terminals need to be upgraded to current design standards.		8,000.0	**8,000.0**

	Sec. No.	Department	Appropriation / Allocation	Description	Federal Funds #1002	Federal Economic Stimulus #1212	Total Funds
26	1	Transportation	Highway and Bridge Stimulus Projects - Allocation	Nome Road Improvements The community has seen an increase in vehicle traffic over the past decade. This increase has made dust mitigation such as paving or chemical treatments on local roads a significant issue. The project will also improve drainage on city streets that are typically impacted by permafrost and migration of fine soil particles caused by snowmelt and seasonal rain. Improving drainage is critical to the effectiveness of any dust-abatement surface treatment. Proper drainage will also prevent potholing and any further loss of pavement on the few paved streets in the community.		4,000.0	**4,000.0**
27	1	Transportation	Highway and Bridge Stimulus Projects - Allocation	Emmonak: Community Road Improvements The community roads in Emmonak lack proper surfacing material. Due to the silty soil conditions in the area, the roads are extremely dusty in dry weather and rutted in wet weather. The roads lack proper drainage structures resulting in standing water in many locations throughout the community. The dusty road conditions are a serious health issue and need to be addressed. Although this project is jointly funded from federal and state sources, additional funding is needed to successfully complete this project and to significantly improve the health and quality of life in Emmonak.		3,000.0	**3,000.0**
28	1	Transportation	Highway and Bridge Stimulus Projects - Allocation	Marshall: Airport Access Road Bridge Replacement Replace the existing temporary bridge on the Marshall Airport Access Road. The existing temporary bridge is inadequate and does not meet the needs of the community. It was installed as a temporary measure several years ago to keep the access to the airport open. This road is the only vehicular access the village has to the airport. Replacing the bridge with a safer more durable structure would make the delivery of passengers and freight more efficient and improve the overall safety for the traveling public.		2,800.0	**2,800.0**

	Sec. No.	Department	Appropriation / Allocation	Description	Federal Funds #1002	Federal Economic Stimulus #1212	Total Funds
29	1	Transportation	Highway and Bridge Stimulus Projects - Allocation	Hoonah: Airport Road Paving - Ferry Terminal to Airport Grind and repave Airport Road from the Ferry Terminal (MP 0) to the Airport (MP 2.2). The degraded condition of Hoonah's airport road has resulted in controllability issues, with extremely poor conditions in front of the post office. Maintenance crews have had difficulty staying on top of patching, and freeze-thaw cycles regularly generate new potholes and other degradations. Rutting is extreme, with ½ inch ruts along at least ½ the length of the road.		3,000.0	**3,000.0**
30	1	Transportation	Highway and Bridge Stimulus Projects - Allocation	AMATS: Stimulus Highway and Bridge Funded Projects This funding will be assigned to specific projects by the Metropolitan Planning Organization (MPO) policy board, as required by federal law. Because of the rapid timeline in developing the Stimulus bill, there has not been time to pre-identify the specific projects.		18,953.9	**18,953.9**
31	1	Transportation	Highway and Bridge Stimulus Projects - Allocation	Valdez: Areawide Bike and Pedestrian Trail Pavement Refurbishment Repave the bike path along the Richardson Highway from Egan Drive to Robe River Subdivision (7 miles). The surface of this bike path has deteriorated and cracked in many areas. This path is used for summer and winter recreational opportunities. The Blueberry Lake Campground road is used to access the popular state recreation site at Blueberry Lake. The existing road is narrow, potholed with no surfacing. These improvements will provide better access to campsites, fishing and trails.		3,290.0	**3,290.0**
32	1	Transportation	Highway and Bridge Stimulus Projects - Allocation	Denali Highway: Milepost 7 Wayside Provide wayside parking and traveler information near the east end of the Denali Highway. Includes parking for RVs and automobiles. Enhancements include interpretive signs along the viewing area, vaulted toilets and trash receptacles. The Department of Transportation and Public Facilities will perform maintenance of the pavement surface and the Bureau of Land Management will perform maintenance of the enhancements.		330.0	**330.0**

	Sec. No.	Department	Appropriation / Allocation	Description	Federal Funds #1002	Federal Economic Stimulus #1212	Total Funds
33	1	**Transportation**	**Highway and Bridge Stimulus Contingency Projects - Appropriation**	**Highway and Bridge Stimulus Contingency Projects Appropriation** **This appropriation totals 139,097,600.**			
34	1	Transportation	Highway and Bridge Stimulus Contingency Projects - Allocation	Richardson Highway: Milepost 276 to 286 Resurfacing Relevel and repave the Richardson Highway from the Tanana River Bridge (MP 276) to just east of Shaw Creek (MP 286). The road surface on this stretch of the Richardson Highway has a remaining service life of approximately 4 years and needs to be releveled and repaved. Maintenance crews are patching this section on a regular basis. This project is needed to preserve the pavement structures to extend the remaining service life of the road surface and to support the construction of a natural gas pipeline.		4,500.0	**4,500.0**
35	1	Transportation	Highway and Bridge Stimulus Contingency Projects - Allocation	Delta Junction Area: National Highway System Repaving Repave the Richardson Highway between MP 265-267 (Delta Junction area) and upgrade the intersection at the junction of the Alaska Highway and Richardson Highway. Work will include resurfacing, repaving, curb, gutter and drainage improvements. The Richardson Highway is a principal arterial connecting with the Alaska Highway to the Canadian Border and also continues south to Valdez. As such, it is one of the few road connections to outside Alaska and also connects to the oil terminal and major recreation opportunities at Valdez. Resurfacing and repaving is necessary to preserve the life of the road.		4,000.0	**4,000.0**
36	1	Transportation	Highway and Bridge Stimulus Contingency Projects - Allocation	Ketchikan: Airport Ferry M/V Bob Ellis Replacement The existing airport ferry M/V Bob Ellis has reached the end of its useful service life and will not pass future Coast Guard inspections without major maintenance investment, which could exceed the cost of a new ferryboat. The Ketchikan International Airport requires a second ferryboat to ensure reliability of service when the other ferry is in overhaul or out of service. The airport also requires a second ferryboat to cover peak summer traffic demand to the airport.		6,800.0	**6,800.0**

	Sec. No.	Department	Appropriation / Allocation	Description	Federal Funds #1002	Federal Economic Stimulus #1212	Total Funds
37	1	Transportation	Highway and Bridge Stimulus Contingency Projects - Allocation	Fairbanks: LED Street Light Conversion Convert existing high pressure sodium (HPS) street lights to light-emitting diode (LED) lights in the City of Fairbanks and North Pole. The City of Fairbanks and North Pole operates approximately 2,900 high pressure sodium (HPS) street lights, which cost approximately $550,000 per year to power and $75,000 per year in maintenance and replacement bulb costs. The light-emitting diode (LED) street lights provide a 70% reduction in power usage and have a lifespan estimated from 50,000 to 100,000 hours. This would result in an annual savings of $400,000 or greater per year for the City of Fairbanks and North Pole residents.		3,310.0	**3,310.0**
38	1	Transportation	Highway and Bridge Stimulus Contingency Projects - Allocation	Fairbanks: Sign Replacement Design and implement a system to assess all traffic signs in the Fairbanks area and replace as needed to improve their visibility and increase road safety. There is a new federal mandate to ensure the retro-reflectivity of all signs are assessed, inventoried, and replaced as needed. By January 2012, a sign assessment or management system has to be in place to track sign data and ensure timely sign replacement. By January 2015, all ground-mounted regulatory, warning and guide signs must comply with retro-reflectivity requirements and by January 2018, all overhead and street name signs must be compliant.		973.6	**973.6**
39	1	Transportation	Highway and Bridge Stimulus Contingency Projects - Allocation	Fairbanks: Wendell Street ADA Improvements Sidewalk improvements are necessary to comply with the Americans with Disabilities Act. Wendell Street is the home of the new Morris Thompson Cultural and Visitor's Center and tourists will be dropped off and picked up there by bus companies. Improving the pedestrian facilities and repaving will enhance this new cultural visitor destination in Fairbanks. The storm drains are 40 year old wood stave pipes and are in dire need of replacement.		814.0	**814.0**

	Sec. No.	Department	Appropriation / Allocation	Description	Federal Funds #1002	Federal Economic Stimulus #1212	Total Funds
40	1	Transportation	Highway and Bridge Stimulus Contingency Projects - Allocation	Kodiak: Rezanof Drive Resurfacing - Coast Guard Access Road to Jack Hinkel Way Resurface Rezanof Drive from the Coast Guard Access Road extending approximately 6.7 miles to Jack Hinkel Way in the City of Kodiak. The surface of the highway is rutted and has been patched to repair potholes. The resurfacing project will eliminate ruts, improve safety, reduce maintenance costs, and extend the useful life of the highway. Damaged guardrail will be replaced as will end terminals not meeting current design standards.		10,000.0	**10,000.0**
41	1	Transportation	Highway and Bridge Stimulus Contingency Projects - Allocation	Sterling Highway Resurfacing: Soldotna to North Coho Loop Resurface approximately 17 miles of the Sterling Highway from Kalifornsky Beach Road passing through the community of Kasilof to South Coho Loop. The surface of the highway is rutted and has been patched in numerous places to repair potholes. The resurfacing project will eliminate ruts, improve safety, reduce maintenance costs, and extend the useful life of the highway. Guardrail will be replaced and will include end terminals meeting current design standards.		15,000.0	**15,000.0**
42	1	Transportation	Highway and Bridge Stimulus Contingency Projects - Allocation	Juneau: Jordan Creek Bridge Replacement and Basin Road Trestle Rehabilitation Replace Jordan Creek Bridge #1786 (Trout Street), and rehabilitate the Basin Road Trestle #0948. The Jordan Creek Bridge, a steel stringer and filled steel grid bridge was built in 1984 and suffers from excessive rust. The replacement bridge is currently being designed, but is anticipated to incorporate a pre-fabricated, single span steel bridge with pony truss. Basin Trestle rehabilitation will include replacing the bridge deck, updating the guard rail, and increasing the load ratings for the first and last span to equal or exceed the intermediate spans. The foundations will be inspected, and replaced or repaired as required.		1,500.0	**1,500.0**

	Sec. No.	Department	Appropriation / Allocation	Description	Federal Funds #1002	Federal Economic Stimulus #1212	Total Funds
43	1	Transportation	Highway and Bridge Stimulus Contingency Projects - Allocation	Richardson Highway: Milepost 345 Moose Creek Railroad Crossing This project will construct an overpass on the Richardson Highway over the Alaska Railroad tracks near Moose Creek (approximately MP 345 of the Richardson Highway). The project will maintain the divided highway and construct separated bridges over the Alaska Railroad. In addition, the project will construct a new approach to the Moose Creek access road and reconstruct an existing median opening near Moose Creek.		14,000.0	**14,000.0**
44	1	Transportation	Highway and Bridge Stimulus Contingency Projects - Allocation	Seward Meridian Parkway: Road Improvements - Parks Highway to Palmer-Wasilla Highway Upgrade Seward Meridian Parkway to a four-lane roadway with a center left turn lane and a separated pathway from the Parks Highway to the Palmer-Wasilla Highway to include intersection improvements at the Palmer-Wasilla Highway. The Seward Meridian Parkway Road Improvements project will increase the capacity of the roadway to address the current congestion issues and future travel demands in the fast growing Wasilla area while addressing the need for safe bicycle and pedestrian improvements. This request includes $2.1 million of Federal Receipts and $11.0 million of Federal Economic Stimulus Funds.	2,100.0	11,000.0	**13,100.0**
45	1	Transportation	Highway and Bridge Stimulus Contingency Projects - Allocation	Sterling Highway Scales Replacement The Sterling Highway scales have just recently failed, requiring closure until they can be replaced. Until the scales are replaced, size, weight and safety compliance checks of all Commercial Motor Vehicles (CMV) south of the Potter Weigh Station can only be conducted during roadside inspections. This process will increase fuel costs and will decrease the efficiency of conducting these types of checks at areas away from the Sterling Highway Weigh Station. The safety of the traveling public as well as Measurement Standards and Commercial Vehicle Enforcement's ability to protect public infrastructure will be impacted as not every CMV south of the Potter Weigh Station will be checked for overweight loads.		2,200.0	**2,200.0**

	Sec. No.	Department	Appropriation / Allocation	Description	Federal Funds #1002	Federal Economic Stimulus #1212	Total Funds
46	1	Transportation	Highway and Bridge Stimulus Contingency Projects - Allocation	Kipnuk: Boardwalk Improvements Construct approximately 4.7 miles of new and replacement boardwalks in the community of Kipnuk. This project will continue the replacement of boardwalk that constitute the village transportation system including thoroughfare and residential laterals. The current boardwalks were constructed by 2' x 6' untreated lumber placed directly on the tundra. They are narrow and insufficient for the volume and type of traffic in the community.		10,000.0	**10,000.0**
47	1	Transportation	Highway and Bridge Stimulus Contingency Projects - Allocation	Glenn Highway: Lighting - Birchwood to Eklutna Install continuous lighting along the Glenn Highway corridor from South Birchwood Loop to Eklutna. Lighting is proposed to be a combination of low mount electroliers with high mast lighting at interchanges.		15,000.0	**15,000.0**
48	1	Transportation	Highway and Bridge Stimulus Contingency Projects - Allocation	Delta Junction: City Street Rehabilitation Improving the city streets in Delta Junction would reduce maintenance costs, improve safety as well as health and air quality by eliminating dust. The project will also improve economic viability for local businesses and farms located on these roads.		4,000.0	**4,000.0**
49	1	Transportation	Highway and Bridge Stimulus Contingency Projects - Allocation	Juneau: Egan Drive and Glacier Highway Resurfacing - Mendenhall Loop to Auke Bay Ferry Terminal Pavement rehabilitation on Egan Drive from Mendenhall Loop road to Brotherhood Bridge. Ruts filled with water pose a hydroplaning and controllability issue, and this hazard can be exacerbated when ice collects in these ruts.		4,000.0	**4,000.0**

	Sec. No.	Department	Appropriation / Allocation	Description	Federal Funds #1002	Federal Economic Stimulus #1212	Total Funds
50	1	Transportation	Highway and Bridge Stimulus Contingency Projects - Allocation	Dillingham: Wood River Road Reconstruction To realign and reconstruct approx 2.8 miles of the Wood River Road from Kanakanak Road to the Wood River Landing. Project also includes a separated Wood River Road pathway and a 1/4 mile Waskey Road pathway spur. The road surface is sub-standard and requires extra maintenance to provide operational efficiency. The Dillingham Airport Master Plan recommends realignment of the road to eliminate conflict with navigational aids. The corridor experiences significant pedestrian and bicycle use that requires separated facilities to ensure adequate safety.		8,900.0	**8,900.0**
51	1	Transportation	Highway and Bridge Stimulus Contingency Projects - Allocation	Ketchikan: North Tongass Highway - Totem Bight to Whipple Creek Reconstruct the highway for approximately two miles to provide a paved width of 36' from the first junction with D-1 Loop Road to Whipple Creek Bridge (#1153). This section of the North Tongass Highway is one of the narrowest, high-volume, high-speed segments in Southeast Alaska. Existing pavement width is only 26 feet, leaving almost no shoulder. The roadside environment is unforgiving when vehicles do exit the roadway. The pavement condition has deteriorated rapidly and, if not repaired, will require significant maintenance.		13,800.0	**13,800.0**

	Sec. No.	Department	Appropriation / Allocation	Description	Federal Funds #1002	Federal Economic Stimulus #1212	Total Funds
52	1	Transportation	Highway and Bridge Stimulus Contingency Projects - Allocation	Juneau: Glacier Highway - Amalga to Eagle Beach Widening Widen the Glacier Highway for 4.6 miles from the intersection with Amalga Harbor Road to the kayak launch site (Boulder Beach Access) at the north end of Eagle Beach. Enhance trailheads and beach access along this route out of Juneau. This project in the City and Borough of Juneau has environmental approval and is ready for construction funding. Pavement on the portion north of Amalga Harbor Road crosses a low-lying wet area and is near failure after years of service. It is the oldest highway pavement still providing service in Southeast Alaska. The sharp curve at Eagle Beach has been problematical for years and has seen two fatalities. Besides rock excavation to improve this curve, the project will increase paved width, provide adequate separation between the fog line and guardrail face and include traversable side slopes beyond the pavement edge. These upgrades will improve safety for the traveling public.		1,700.0	**1,700.0**
53	1	Transportation	Highway and Bridge Stimulus Contingency Projects - Allocation	Ketchikan: Water Street Sidewalk Improvements The project presents the opportunity to provide job stimulus and to resolve long standing safety issues for pedestrian and vehicle traffic. The adjacent Ketchikan waterfront area has experienced a massive increase in pedestrian traffic in recent years resulting from the growing Alaskan tour ship industry. It is the first major Alaskan port stop for northbound cruise ships, which frequently off-load 10,000 or more pedestrians at a time when multiple ships are in port. The existing sidewalks are unable to handle pedestrian demand because they are narrow, are not ADA compliant (do not meet handicap user needs), and are badly damaged (more than 50 years old).		2,500.0	**2,500.0**

	Sec. No.	Department	Appropriation / Allocation	Description	Federal Funds #1002	Federal Economic Stimulus #1212	Total Funds
54	1	Transportation	Highway and Bridge Stimulus Contingency Projects - Allocation	Glenn Highway: Bike Trails Pavement Refurbishment - Eagle River to Birchwood Rehabilitate the bike path adjacent to the Glenn Highway from Eagle River to Birchwood. The pathway is used by commuter and recreational bicycles, and pedestrians. When school is in session the pathway is used by school children in the vicinities of Chugiak Elementary, Mirror Lake Middle School and Chugach High School. The proposed pathway rehabilitation will enhance the safety and usability of the pathway by eliminating cracks, root damage, and shoulder deterioration of the existing surface.		3,000.0	**3,000.0**
55	1	Transportation	**Federal Contingency Projects - Appropriation**	Federal Contingency Projects These funds are used when project costs have increased, a revised program is not feasible and immediate additional funding is required to avoid project delays or loss of federal economic stimulus dollars. Highway, airport or transit projects that are underway and require additional budget authority may be approved for use with this appropriation. Approval of the Commissioner is required to use this authority.		15,000.0	**15,000.0**
56	2			Section 1 Departmental Fund Source Totals			**0.0**
57	3			Section 1 Fund Source Totals			**0.0**
	4			This section changes the fund source of several prior year projects from Federal Receipts to the new fund source of Federal Economic Stimulus. The subsections listed below include the cite of the original appropriation or allocation. Since the fund source change is from one type of federal fund to another, the language in the Economic Stimulus appropriation bill modifies the department's fund source section of each appropriation bill affected.			**0.0**

Fund Source Changes

MEMORANDUM

State of Alaska

Department of Transportation & Public Facilities
Division of Administrative Services

TO: Karen Rehfeld, Director
Office of Management and Budget

DATE: February 26, 2009

TELEPHONE NO: 465-3911
TEXT TELEPHONE: 465-3652
FAX NO: 465-3124

FROM: Nancy J. Slagle
Director

SUBJECT: Fund Source Change

The Department of Transportation and Public Facilities (DOT&PF) is requesting a fund source change on an appropriation that will be used for a federal economic stimulus project. The Federal Aviation Administration (FAA) Office in Alaska has recommended to FAA Headquarters that the Huslia Airport Improvement project bc considered for federal economic stimulus funding. This project has existing legislative authority for receipt and expenditure of federal funds (fund source code 1002). We are requesting a fund source change to the Federal Economic Stimulus fund source (1212) as follows:

$7,525,000 of the appropriation found at:
Section 4, Ch. 30, SLA 2007, page 107, lines 4-5 (Huslia: Airport Improvements - $7,525,000)

Your approval of this request is appreciated.

cc: Christine Klein, Deputy Commissioner for Aviation
Jeff Ottesen, Director, Program Development
Frank Richards, Deputy Commissioner for Highways and Facilities

FY2009 Economic Stimulus Capital Budget Amendment
(HB 154 / SB 123)

Amend sec. 4(h), Fund Source Changes for Federal Economic Stimulus Projects, to read:

(h) Section 5, ch. 30, SLA 2007, page 121, lines 19 - 21, is amended to read:

Department of Transportation/Public Facilities

1002 Federal Receipts	**508,290,800**
	[542,215,800]
1212 Federal Economic Stimulus	**33,925,000**
1003 General Fund Match	56,638,000

This amendment adds a fund source change of $7,525,000 for Huslia Airport Improvements from federal receipts to federal economic stimulus funds.

MEMORANDUM

State of Alaska

Department of Transportation & Public Facilities
Division of Administrative Services

TO: Karen Rehfeld, Director
Office of Management and Budget

DATE: February 20, 2009

TELEPHONE NO: 465-3911

SUBJECT: Fund Source Change

The Department of Transportation and Public Facilities (DOT&PF) is requesting fund source changes on appropriations that will be used for federal economic stimulus projects. To meet the reporting needs of the American Recovery and Reinvestment Act of 2009, a new fund source code has been created. The Department has identified a list of potential projects that meet the criteria of the congressional funding bill. Some of those projects have existing legislative authority for receipt and expenditure of federal funds (fund source code 1002). We are requesting a fund source change for the noted amounts to the Federal Economic Stimulus fund source (1212) as follows:

$170,000 of the appropriation found at:
Section 1, Ch. 135, SLA 2000, page 42, lines 22-24 (Denali Highway: Milepost 60- Information and Orientation Wayside - $170,000)

$7,727,875 of the appropriation found at:
Section 1, Ch. 61, SLA 2001, page 39, lines 3-4 (Dalton Highway: Milepost 175 to 209 Reconstruction - $10,000,000)

$5,020,000 of the appropriation found at:
Section 1, Ch. 1, SSSLA 2002, page 62, lines 18-20 (Dalton Highway: Milepost 175 to 209 Reconstruction - $5,020,000)

$17,000,000 of the appropriation found at:
Section 4, Ch. 30, SLA 2007, page 112, lines 26-28 (Dalton Highway: Milepost 1750to 209 Reconstruction - $17,000,000)

$7,700,000 of the appropriation found at:
Section 1, Ch. 82, SLA 2006, page 99, lines 7-8 (Gustavus: Dock Replacement - $19,000,000)

$5,748,366 of the appropriation found at:
Section 1, Ch. 61, SLA 2001, page 41, lines 21-23 (Ketchikan: Tongass Highway – Viaducts Replacement and Rehabilitation - $5,750,000)

$1,500,000 of the appropriation found at:

Section 1, Ch. 159, SLA 2004, page 44, line 33 and page 45, lines 3-4 (Ketchikan: Tongass Highway – Viaducts Replacement and Rehabilitation - $2,200,000)

$10,500,000 of the appropriation found at:
Section 13, Ch. 29, SLA 2008, page 169, lines 31-33 (Juneau: Glacier Highway – Amalga to Eagle Beach Widening - $10,500,000)

$1,000,000 of the appropriation found at:
Section 1, Ch. 3, FSSLA 2005, page 79, lines 30-31 (Dillingham: Wood River Road Reconstruction - $1,000,000)

$8,500,000 of the appropriation found at:
Section 4, Ch. 30, SLA 2007, page 105, lines 28-29 (Akiachak: Airport Relocation - $10,500,000)

$9,000,000 of the appropriation found at:
Section 1, Ch. 3, FSSLA 2005, page 73, lines 6-8 (Ouzinkie: Airport Reconstruction and Relocation - $9,000,000)

$3,900,000 of the appropriation found at:
Section 13, Ch. 29, SLA 2008, page 163, lines 21-23 (Ouzinkie: Airport Reconstruction and Relocation - $10,000,000)

$4,200,000 of the appropriation found at:
Section 1, Ch. 3, FSSLA 2005, page 72, lines 10-11 (Kotzebue: Apron Expansion - $8,000,000)

$1,500,000 of the appropriation found at:
Section 1, Ch. 159, SLA 2004, page 37, lines 11-12 (Hoonah: Runway Extension - $1,500,000)

$1,900,000 of the appropriation found at:
Section 1, Ch. 3, FSSLA 2005, page 71, lines 21-22 (Hoonah: Airport Improvements - $1,900,000)

$3,000,000 of the appropriation found at:
Section 1, Ch. 159, SLA 2004, page 36, lines 29-30 (Fort Yukon: Resurfacing - $3,000,000)

$2,765,625 of the appropriation found at:
Section 1, Ch. 3, FSSLA 2005, page 71, lines 9-10 (Fort Yukon: Airport Resurfacing - $2,765,625)

$4,725,151 of the appropriation found at:
Section 1, Ch. 82, SLA 2006, page 90, lines 16-17 (Fort Yukon: Airport Improvements - $4,725,151)

$4,220,000 of the appropriation found at:
Section 1, Ch. 3, FSSLA 2005, page 69, lines 31-32 (Allakaket: Airport Improvements - $4,220,000)

$400,000 of the appropriation found at:
Section 4, Ch. 30, SLA 2007, page 105, lines 32-33 (Allakaket: Airport Improvements - $400,000)

$1,950,000 of the appropriation found at:

Section 13, Ch. 29, SLA 2008, page 162, lines 11-12 (Allakaket: Airport Improvements - $1,950,000)

$6,859,375 of the appropriation found at:
Section 1, Ch. 82, SLA 2003, page 38, lines 19-21 (Cordova: Airport Apron, Taxiway, and General Aviation Improvements - $6,859,375)

$1,735,000 of the appropriation found at:
Section 1, Ch. 3, FSSLA 2005, page 70, lines 25-27 (Cordova: Airport Apron, Taxiway, and General Aviation Improvements - $1,735,000)

$500,000 of the appropriation found at:
Section 4, Ch. 30, SLA 2007, page 106, lines 15-17 (Cordova: Airport Apron, Taxiway, and General Aviation Improvements - $1,500,000)

$600,000 of the appropriation found at:
Section 1, Ch. 1, SSSLA 2002, page 53, lines 20-21 (Lake Louise: Runway Rehabilitation - $1,060,000)

$1,840,000 of the appropriation found at:
Section 13, Ch. 29, SLA 2008, page 163, lines 17-18 (Lake Louise: Runway Rehabilitation - $1,840,000)

$1,700,000 of the appropriation found at:
Section 13, Ch. 29, SLA 2008, page 163, lines 11-12 (Kodiak: Chemical Storage Building - $1,700,000)

Your approval of this request is appreciated.

Akiachak: Airport Relocation

FY2009 Request: **$11,500,000**
Reference No: **43254**

AP/AL: Allocation
Project Type: Construction
Category: Transportation
Location: Akiachak
Contact: Christine Klein
House District: Bethel (HD 38)
Contact Phone: (907)269-0724
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Airport Stimulus Projects

Brief Summary and Statement of Need:
This project will relocate and construct a new Akiachak Airport 3,300 foot runway, construct a new airport, new apron, taxiway and airport access road, construct snow removal equipment buildings, and install fencing and airport lighting. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$11,500,000						$11,500,000
Total:	$11,500,000	$0	$0	$0	$0	$0	$11,500,000

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	16,000	0
One-Time Startup:	0	
Totals:	16,000	0

Additional Information / Prior Funding History:
FY2009 - $8,000,000; FY2008 - $10,500,000.

Project Description/Justification:
The purpose of this project is to replace the current airport with a new airport that is up to current design standards to improve safety and operational efficiency. The existing runway and safety areas do not meet minimum length and width standards. The runway is not oriented with prevailing wind patterns, has ruts and dips with loose gravel surfacing, and is reported to be soft when wet. The existing apron is simply a widened portion of the runway. It is deficient in size for the forecasted operations and does not meet separation standards from the runway surface. A 400-foot offset is required to satisfy non-precision GPS approach requirements, which is the current design standard. The new airport will include lighting to improve safety and increase the number of flight operations during marginal weather and light conditions.

Operating and maintenance costs are expected to increase by approximately $16,000 per year beginning in FY2012.

This project meets the Federal Aviation Administration (FAA) discretionary funding criteria for the Economic Stimulus Package and received a high FAA national (ACIP) score. Advertising for this project is estimated to take place in April, 2009.

Allakaket: Airport Improvements **FY2009 Request:** **$3,600,000**
Reference No: **40278**

AP/AL: Allocation **Project Type:** Construction
Category: Transportation
Location: Allakaket **Contact:** Christine Klein
House District: Interior Villages (HD 6) **Contact Phone:** (907)269-0724
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Airport Stimulus Projects

Brief Summary and Statement of Need:
Repair and stabilize the runway embankment, taxiway and apron to correct areas that have experienced serious differential settlement, side slope failures and erosion. Work will include resurfacing, addition of a dust palliative and lighting adjustments or replacement as needed, improve apron setback from the runway, and make other improvements as funding allows. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$3,600,000						$3,600,000
Total:	$3,600,000	$0	$0	$0	$0	$0	$3,600,000

☐ State Match Required ☐ One-Time Project ☐ Phased - new ☑ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
FY2009 - $1,950,000; FY2008 - $400,000; FY2006 - $4,220,000.

Project Description/Justification:
The Allakaket runway was constructed in 1997. However, the existing foundations included extensive permafrost and wet areas. Thaw-settlement has caused serious safety concerns due to differential settlement of the runway, embankment cracking along the fill slopes and safety areas, slope erosion, drainage problems and distress to the lighting system.

Additional funding is requested to reflect the engineer's current cost estimate.

This project meets criteria such as safety and is anticipated to be complete within the timeframes required by the congressional legislation. Advertising for this project is estimated to take place in March, 2009.

Project Type: Construction
Category: Transportation
Location: Fairbanks (Denali/University)
Contact: Christine Klein
House District: Denali/University (HD 8)
Contact Phone: (907)269-0724
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Airport Stimulus Projects

Brief Summary and Statement of Need:
This project is the result of a Federal Aviation Administration (FAA) directive to identify access control measures to reduce deviations and incursions at Fairbanks International Airport (FAI), i.e., fencing, gates, and improved signage. This project contributes to the Department's Mission by improving the mobility of people and goods and by reducing injuries, fatalities and property damage.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$3,000,000						$3,000,000
Total:	$3,000,000	$0	$0	$0	$0	$0	$3,000,000

☐ State Match Required ☑ One-Time Project ☐ Phased - new ☐ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
None.

Project Description/Justification:
The Fairbanks International Airport ranks among the top 20 of 400 certified airports in incursions and deviations. Every effort will be made to implement the least costly and restrictive measures that accomplish the objective of reducing incursions and deviations.

This project meets criteria such as safety and is anticipated to be complete within the timeframes required by the congressional legislation. Advertising for this project is expected to be in August, 2009.

Fairbanks International Airport: 1L-19R - Taxiway and Apron Improvements | **FY2009 Request:** $3,000,000 | **Reference No:** 48361

AP/AL: Allocation
Project Type: Construction
Category: Transportation
Location: Fairbanks (City of Fairbanks)
Contact: Christine Klein
House District: City of Fairbanks (HD 9)
Contact Phone: (907)269-0724
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Airport Stimulus Projects

Brief Summary and Statement of Need:
This request will fund construction of the initial phase of Taxiway Echo and pave aircraft apron areas proximal to runway 1L-19R. The initial phase of Taxiway Echo consists of excavating, filling, grading, paving, lighting, and marking approximately 400' of new taxiway. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$3,000,000						$3,000,000
Total:	$3,000,000	$0	$0	$0	$0	$0	$3,000,000

☐ State Match Required ☐ One-Time Project ☐ Phased - new ☑ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
FY09 Supplemental Request - $18,250,000; FY2007 - $30,250,000; FY2006 - $21,500,000.

Project Description/Justification:
New Taxiway Echo will be located at the southern end of runway 1L-19R (Fairbanks International Airport's [FAI's] main air-carrier runway) and will connect to the far southern end of FAI's smaller runway, 1R-19L. New Taxiway Echo would replace Taxiway Bravo, which currently connects the two runways mid-field of 1L-19R. Mid-field taxiway connectors are more hazardous then end-field taxiway connectors as they place potential air, pedestrian, and vehicle conflicts in a high incident area, the middle of the runway. Constructing the initial Phase of Taxiway Echo now – while runway 1L-19R is closed for construction - will avoid future closure of runway 1L-19R during the remaining phases of Taxiway Echo construction. This request would also fund reconstruction of approximately 180,000 square feet of airfield apron areas proximal to 1L-19R that have exceeded their useful life and have pavement condition indices less than Federal Aviation Administration (FAA) standards. As with the initiation of Taxiway Echo, pavement of these areas while runway 1L-19R is closed will avoid having to close it again in the future to accomplish this objective.

This project meets the FAA discretionary funding criteria for the Economic Stimulus Package and received a high FAA national (ACIP) score. This will be a change order to the existing contract.

Fort Yukon: Airport Improvements | **FY2009 Request:** $6,500,000 | **Reference No:** 41727

AP/AL: Allocation
Project Type: Construction
Category: Transportation
Location: Fort Yukon
Contact: Christine Klein
House District: Interior Villages (HD 6)
Contact Phone: (907)269-0724
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Airport Stimulus Projects

Brief Summary and Statement of Need:
Resurface and include a dust palliative on the apron, taxiway and runway at the Fort Yukon Airport. Correct drainage problems, clear overgrown vegetation, and complete other improvements as funding allows. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$6,500,000						$6,500,000
Total:	$6,500,000	$0	$0	$0	$0	$0	$6,500,000

☐ State Match Required ☐ One-Time Project ☐ Phased - new ☑ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
FY2007 - $4,725,151; FY2006 - $2,765,625.

Project Description/Justification:
The existing runway is now rutted, coarse and soft in some areas. Dust from the airport is considered a major health and safety concern by the community. Northern Region Maintenance and Operations has difficulty dealing with the vegetation overgrowth on the operational surfaces and drainage problems are evident during break-up and wet weather.

This request reflects an update to the engineer's estimate.

In order to meet barge schedules, we need to award the Fort Yukon Airport construction contract in the Spring. If we wait until after July we risk losing the entire construction season. The airport improvements and the building will be bid as one construction contract, with advertising to commence in February 2009.

This project meets the Federal Aviation Administration (FAA) discretionary funding criteria for the Economic Stimulus Package and received a high FAA national (ACIP) score. Advertising for this project is estimated to take place in March, 2009.

King Salmon: Apron and Taxiway Resurfacing

FY2009 Request: **$9,750,000**
Reference No: **AMD 48399**

AP/AL: Allocation
Project Type: Construction
Category: Transportation
Location: King Salmon
Contact: Christine Klein
House District: Bristol Bay/Aleutians (HD 37)
Contact Phone: (907)269-0724
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Airport Stimulus Projects

Brief Summary and Statement of Need:
This is a new request being added as a result of recommendations from the Federal Aviation Administration (FAA) - Alaska Division. Resurface the terminal and transient ("Fish Haul") aprons at King Salmon airport, and also several taxiways (A, B, C, D & E), whose Pavement Condition Indexes (PCI's) are well within the "reconstruct" range. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$9,750,000						$9,750,000
Total:	$9,750,000	$0	$0	$0	$0	$0	$9,750,000

☐ State Match Required ☑ One-Time Project ☐ Phased - new ☐ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☑ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
None.

Project Description/Justification:
The terminal apron and transient apron pavement is unsafe for current aircraft use. Several other taxiways have pavement condition indexes in the "reconstruct" range. Taxiways C and E will become part of the parallel taxiway system at King Salmon Airport once the parallel taxiway is constructed from the terminal apron to runway 18-36 in FFY10, resulting in substantial additional heavy aircraft use.

The pavement on these aprons and taxiways is unraveling and the surfaces are uneven. FAA Part 139 annual inspections since 2003 have directed the Department of Transportation and Public Facilities to address issues with the terminal apron, specifically citing portions of the apron area that exhibited break-up of pavement, depressions, and standing water. In 2006 the Federal Aviation Administration (FAA) noted these conditions and stated that "all of these conditions present a fertile ground for foreign object debris and other safety related issues. Complete pavement rehabilitation is a must for the terminal apron area. " The July 2008 Letter of Correction states that "This is unacceptable; and the pavement discrepancy must be resolved." The correction date given is October 31, 2009.

This project meets criteria such as safety and is anticipated to be complete within the timeframes required by the congressional legislation. Advertising for this project is estimated to take place in May, 2009.

Hoonah: Airport Improvements **FY2009 Request:** **$100,000**
Reference No: **40586**

AP/AL: Allocation
Project Type: Construction
Category: Transportation
Location: Hoonah
Contact: Christine Klein
House District: Cordova/Southeast Islands (HD 5)
Contact Phone: (907)269-0724
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Airport Stimulus Projects

Brief Summary and Statement of Need:
Extend airport runway to state standards, expand lease lots and apron space, and other improvements. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$100,000						$100,000
Total:	$100,000	$0	$0	$0	$0	$0	$100,000

☐ State Match Required ☐ One-Time Project ☐ Phased - new ☑ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
FY2006 - $1,900,000; FY2005 - $1,500,000 Runway Extension

Project Description/Justification:
Extend airport runway to state standard to reduce weight penalty on aircraft serving Hoonah; expand lease lots and apron space to accommodate additional general aviation and commercial traffic, provide additional lease lots for hangars and commercial development; provide dedicated parking area for short and long-term passenger parking; construct a ramp to allow float planes to be hauled out and serviced or based at the airport; and other improvements.

This project meets the Federal Aviation Administration (FAA) discretionary funding criteria for the Economic Stimulus Package and received a high FAA national (ACIP) score. Advertising for this project is estimated to take place in June, 2009.

Kodiak: Chemical Storage Building

FY2009 Request: **$1,200,000**
Reference No: **45436**

AP/AL: Allocation
Project Type: Construction
Category: Transportation
Location: Kodiak
Contact: Christine Klein
House District: Kodiak (HD 36)
Contact Phone: (907)269-0724
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Airport Stimulus Projects

Brief Summary and Statement of Need:
Construct a facility consisting of storage tanks, mixing tank and storage area for de-icing truck. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$1,200,000						$1,200,000
Total:	$1,200,000	$0	$0	$0	$0	$0	$1,200,000

☐ State Match Required ☐ One-Time Project ☐ Phased - new ☑ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	12,000	0
One-Time Startup:	0	
Totals:	12,000	0

Additional Information / Prior Funding History:
FY2009 - $1,700,000.

Project Description/Justification:
This project will provide a safe storage and mixing area for liquid de-icing materials and equipment. Without the building and storage tanks to mix the dry urea for liquid application, the use of sand for runway de-icing will continue. New Alaska Airlines jets have a less-forgiving engine for sand or foreign object debris ingestion which could lead to engine failure. The need to switch from sand to chemical de-icing at Kodiak is further underscored by Central Region Maintenance and Operations' inability to obtain sand that meets the minimum specifications identified by the Federal Aviation Administration (FAA). The de-icing material storage facility will provide a controlled environment, thereby minimizing the possibility of a spill or handling accident.

Operating and maintenance costs will be approximately $12,000 per year beginning in 2011.

This project meets criteria such as safety and is anticipated to be complete within the timeframes required by the congressional legislation. Advertising for this project is estimated to take place in June, 2009.

Kotzebue: Apron Expansion

FY2009 Request: **$5,300,000**
Reference No: **40275**

AP/AL: Allocation
Project Type: Construction
Category: Transportation
Location: Kotzebue
Contact: Christine Klein
House District: Arctic (HD 40)
Contact Phone: (907)269-0724
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Airport Stimulus Projects

Brief Summary and Statement of Need:
Expand the terminal apron to the south and east. This project will also construct new general aviation aircraft parking, a new access road and taxiway, security fencing and drainage improvements, and will provide new leasing areas. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$5,300,000						$5,300,000
Total:	$5,300,000	$0	$0	$0	$0	$0	$5,300,000

☐ State Match Required ☐ One-Time Project ☐ Phased - new ☑ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
FY2009 - $1,220,000; FY2006 - $8,000,000.

Project Description/Justification:
The terminal apron is congested. Apron congestion will be relieved by expanding the terminal apron southward. There are currently no available aviation lease lots at the terminal apron. This project will create additional lease lots.

This will be the first stage of a multi-stage project.

This project meets the FAA discretionary funding criteria for the Economic Stimulus Package and received a high FAA national (ACIP) score. Advertising for this project is estimated to take place in April, 2009.

Ouzinkie: Airport Reconstruction and Relocation **FY2009 Request: $8,400,000**
Reference No: 40289

AP/AL: Allocation
Project Type: Construction
Category: Transportation
Location: Ouzinkie
Contact: Christine Klein
House District: Kodiak (HD 36)
Contact Phone: (907)269-0724
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Airport Stimulus Projects

Brief Summary and Statement of Need:
Project will entail the final design, right of way acquisition, and construction of a new airport and access road for the village of Ouzinkie located near Kodiak. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$8,400,000						$8,400,000
Total:	$8,400,000	$0	$0	$0	$0	$0	$8,400,000

☐ State Match Required ☐ One-Time Project ☐ Phased - new ☑ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	31,000	0
One-Time Startup:	0	
Totals:	31,000	0

Additional Information / Prior Funding History:
FY2009 - $10,000,000; FY2006 - $9,000,000.

Project Description/Justification:
The existing airport does not meet minimum design standards for runway length, runway width, runway safety areas, and runway lighting and is being actively eroded by the ocean. The separation distance between the existing airport and the local landfill and sewage lagoon are less than the minimum allowed by the Federal Aviation Administration (FAA). The location of the existing runway in relationship to the community is constraining the community's ability to expand to the north and east.

Operating and maintenance costs will be approximately $31,000 per year beginning in 2011.

This project meets the FAA discretionary funding criteria for the Economic Stimulus Package and received a high FAA national (ACIP) score. Advertising for this project is estimated to take place in March, 2009.

Ted Stevens Anchorage International Airport: North Terminal Gate N8

FY2009 Request: $3,000,000
Reference No: 47802

AP/AL: Allocation
Project Type: Construction
Category: Transportation
Location: Anchorage (Sand Lake)
Contact: Christine Klein
House District: Sand Lake (HD 27)
Contact Phone: (907)269-0724
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Airport Stimulus Projects

Brief Summary and Statement of Need:
Reconstruct the deteriorated gate apron pavement, including all associated lighting, hydrant system, jet bridge foundations, drainage, pavement, subgrade preparation, etc. Expand the portland cement area to provide better support for ground service equipment during aircraft servicing. This project is needed to avoid continued high maintenance costs and potential damage to aircraft from Foreign Object Debris (FOD). This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$3,000,000						$3,000,000
Total:	$3,000,000	$0	$0	$0	$0	$0	$3,000,000

☐ State Match Required ☑ One-Time Project ☐ Phased - new ☐ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
None.

Project Description/Justification:
Remove all existing concrete pavement and asphalt pavement and necessary subgrade soils. Replace with structural fill and new concrete and asphalt pavement, rehabilitate the storm drainage system, replace the lighting, re-pave and re-stripe the aprons. Expand the portland cement area to provide better support for ground service equipment during aircraft servicing.

The Federal Aviation Administration (FAA) requires that airports have a Pavement Management System (AC 150/5380-7) that facilitates identification of expected pavement needs. Ted Stevens Anchorage International Airport's (ANC's) Pavement Management System identifies pavement condition as a function of the Pavement Condition Index (PCI). The PCI is established through a survey and subsequent software analysis of asphalt and concrete pavement condition. The PCI is a metric value of 0-100, with 100 being the optimum pavement condition. The pavement condition surveys analyze cracks, spalling, rutting, and other pavement conditions that become part of the 0-100 metric. Poor pavement conditions result in FOD on aprons, runways and taxiways and are safety concerns for aircraft moving on the airfield. A 70 PCI is an indication that a project should be programmed in the short term to rehabilitate a runway. A PCI condition below 60 is an indication that

a project should be programmed in the short term to rehabilitate taxiways and aprons and existing paved airfield surfaces.

The existing asphalt and concrete at gate N8 is in poor condition. It has a PCI value below 50 which is less than the desired minimum required under the Pavement Maintenance and Management Plan. The aprons are cracking, deteriorating, and fail to meet minimum PCI requirements. Existing pavement cracks will grow and expand, leading to pavement failures within the apron surface. This involves potential damage to aircraft and surface transportation vehicles from cracks, ruts, FOD and other impediments.

This project meets criteria such as safety and is anticipated to be complete within the timeframes required by the congressional legislation. Advertising for this project is estimated to take place in May, 2009.

Transit Stimulus Projects

FY2009 Request: **$9,083,900**
Reference No: **48365**

AP/AL: Appropriation with Allocations
Project Type: Construction

Additional Information / Prior Funding History:
FY2009 - $750,000 GF mandatory match for federal funds.

Project Description/Justification:
This investment in public transportation will benefit economic development in the capital city, reduce parking congestion, and improve transportation options for those who choose not to drive or who cannot afford a personal vehicle. Adequate public transportation is critical for those making the transition from welfare to work.

Advertising of this project is estimated to take place in April, 2009.

Mat-Su: Park and Ride at Seward Meridian/Parks Highway **FY2009 Request:** **$900,000**
Reference No: **48366**

AP/AL: Allocation **Project Type:** Construction
Category: Transportation
Location: Matanuska Susitna Borough **Contact:** Frank Richards
House District: Matsu Areawide (HD 13-16) **Contact Phone:** (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Transit Stimulus Projects

Brief Summary and Statement of Need:
Project would construct a park and ride area somewhere along the Parks Highway near, or east of Wasilla. Possible locations include near the southern extension of Trunk Road and near Seward Meridian Parkway. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$900,000						$900,000
Total:	$900,000	$0	$0	$0	$0	$0	$900,000

☐ State Match Required ☑ One-Time Project ☐ Phased - new ☐ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
None.

Project Description/Justification:
Approximately 10,000 people commute daily between the Mat-Su Valley and Anchorage and the existing park and ride facilities are consistently over capacity. Van-pool, carpool and bus service from the valley is in the process of being expanded and parking demands are increasing.

Advertising for this project is estimated to take place Spring/Summer 2009.

Highway and Bridge Stimulus Projects **FY2009 Request: $148,273,900**
Reference No: 48354

AP/AL: Appropriation with Allocations **Project Type:** Construction
Category: Transportation
Location: Statewide **Contact:** Frank Richards
House District: Statewide (HD 1-40) **Contact Phone:** (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014

Brief Summary and Statement of Need:
These projects are being proposed for direct Economic Stimulus funding.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Fed Rcpts	$9,500,000						$9,500,000
Federal ES	$138,773,900						$138,773,900
Total:	$148,273,900	$0	$0	$0	$0	$0	$148,273,900

Additional Information / Prior Funding History:

Dalton Highway Culverts: Milepost 260 to 321 **FY2009 Request: $26,300,000**
Reference No: 47605

AP/AL: Allocation **Project Type:** Construction
Category: Transportation
Location: Statewide **Contact:** Frank Richards
House District: Statewide (HD 1-40) **Contact Phone:** (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Highway and Bridge Stimulus Projects

Brief Summary and Statement of Need:
The 414 - mile long Dalton Highway is the sole ground transportation link to the revenue lifeblood of Alaska, the North Slope oil and gas fields. Over the last two decades the roadway surface and roadside drainage structures have fallen into disrepair due to insufficient funding. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$26,300,000						$26,300,000
Total:	$26,300,000	$0	$0	$0	$0	$0	$26,300,000

☐ State Match Required ☑ One-Time Project ☐ Phased - new ☐ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
None.

Project Description/Justification:
This project replaces existing culverts at seven locations between MP 260 and 321, addresses the Oksrukuyik Creek Bridge and raises the roadway grade between MP 311.7 and 313.3.

This project will preserve and extend the service life of the highway, enhance highway safety and provide adequate fish passage. Within the project area, seven stream crossings have culverts that are undersized and/or failing. Failure of any of these culverts could lead to washouts which would severely diminish transportation capabilities along the Dalton. There is an approximately 2.1 mile stretch of road (MP 311.7 to 313.9) that is routinely overtopped and threatened by floodplain overflow of the Sag River.

The Dalton Highway Corridor from Fairbanks to Prudhoe Bay is vital to North Slope oil and gas development. This highway is a statewide priority and provides the sole ground transportation link to Alaska's major revenue source. Overland access to these resources is critical to their continued development, to Alyeska Pipeline operation and maintenance and to future gas pipeline construction. Truck traffic is expected to continue to grow as continued oil and gas development requires increasing amounts of drill pipe, materials for production facilities and other supplies. Traffic growth is

expected to accelerate significantly with construction of the planned gas pipeline.

This project meets the prioritization criteria of serving an economically distressed area, provides logistics benefits for the gas pipeline development, and can turn dirt in 2009. Advertising of this project is estimated to take place in April, 2009.

Parks Highway: Milepost 72 to 83 Rehabilitation, Willow to Kashwitna | **FY2009 Request:** $23,000,000 | **Reference No:** 47696

AP/AL: Allocation
Project Type: Construction
Category: Transportation
Location: Willow
Contact: Frank Richards
House District: Rural Mat-Su (HD 15)
Contact Phone: (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Highway and Bridge Stimulus Projects

Brief Summary and Statement of Need:
Rehabilitate the Parks Highway, from MP 72 to 83, between Willow Creek and the Kashwitna River. Improvements include widening the embankments for 8-foot shoulders; rehabilitate the pavement; add a total of seven miles of alternating north and south bound passing lanes; and construct paved roadside pull outs at Kashwitna Lake and Grey's Creek. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$23,000,000						$23,000,000
Total:	$23,000,000	$0	$0	$0	$0	$0	$23,000,000

☐ State Match Required ☑ One-Time Project ☐ Phased - new ☐ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
None.

Project Description/Justification:
The existing roadway is two lanes with four-foot shoulders, deteriorated pavement, has no passing lanes, and has underlying structural embankment deficiencies that require seasonal weight restrictions. The project will rehabilitate the pavement, widen the shoulders to eight feet (consistent with Alaska's standard for the National Highway System), reconstruct the problematic structural sections, and construct seven miles of passing lanes. The improvements will better accommodate oversize, overweight loads and slow moving traffic associated with gas line construction.

This project meets the prioritization criteria of safety, serves an economically distressed area, provides logistics benefits for the gas pipeline development, leverages other funds (GO Bonds), and can turn dirt in 2009. Advertising of this project is estimated to take place in March, 2009.

Alaska Highway: Milepost 1412 to 1422 **FY2009 Request: $5,300,000**
Reference No: 47697

AP/AL: Allocation **Project Type:** Construction
Category: Transportation
Location: Statewide **Contact:** Frank Richards
House District: Statewide (HD 1-40) **Contact Phone:** (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Highway and Bridge Stimulus Projects

Brief Summary and Statement of Need:
This project is the initial stage of a large scale effort to address highway needs to support the construction of a large diameter natural gas pipeline from the North Slope of Alaska to the Canadian border and midwestern states. The Alaska Highway will be significantly impacted by the projected increases in heavy truck traffic and the movement of pipe and oversized construction modules. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$5,300,000						$5,300,000
Total:	$5,300,000	$0	$0	$0	$0	$0	$5,300,000

☐ State Match Required ☑ One-Time Project ☐ Phased - new ☐ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
None.

Project Description/Justification:
This project will rehabilitate, improve drainage, re-level and resurface the Alaska Highway between MP 1412 and 1422 (Delta South). The project design and environmental documentation are complete.

Substandard embankment conditions have been identified in this area causing significant pavement failures. This project will improve the Alaska Highway to accommodate increased truck traffic associated with gas line construction.

This project meets the prioritization criteria of serving an economically distressed area, provides logistics benefits for the gas pipeline development, and can turn dirt in 2009. Advertising of this project is estimated to take place in April, 2009.

Glenn Highway: Hiland to Eklutna Resurfacing **FY2009 Request: $25,000,000**
Reference No: 48304

AP/AL: Allocation
Project Type: Construction
Category: Transportation
Location: Matanuska-Susitna Borough (Richardson/Glenn Highways)
Contact: Frank Richards
House District: Richardson/Glenn Highways (HD 12)
Contact Phone: (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Highway and Bridge Stimulus Projects

Brief Summary and Statement of Need:
Mill and resurface mainline driving lanes on the Glenn Highway from the Hiland Interchange to the Eklutna Interchange. Project will also resurface all ramps and bridges encompassing Hiland Road and Artillery Road Interchanges, and replace guardrail and pavement markings. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$25,000,000						$25,000,000
Total:	$25,000,000	$0	$0	$0	$0	$0	$25,000,000

☐ State Match Required ☑ One-Time Project ☐ Phased - new ☐ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
None.

Project Description/Justification:
The purpose of the proposed project is to provide an improved driving surface and to extend the service life of the facility. The route has pavement ruts ranging from .25 inch to 1.5 inches deep. Guardrail is in need of repair or replacement, and guardrail end terminals need to be upgraded to current design standards.

This project meets the prioritization criteria of safety, provides logistics benefits for the gas pipeline development, and can turn dirt in 2009. Advertising of this project is estimated to take place in Spring/Summer 2009.

Kotzebue: Shore Avenue Rehabilitation and Erosion Protection | **FY2009 Request:** $15,000,000 | **Reference No:** 34547

AP/AL: Allocation
Project Type: Construction
Category: Transportation
Location: Kotzebue
Contact: Frank Richards
House District: Arctic (HD 40)
Contact Phone: (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Highway and Bridge Stimulus Projects

Brief Summary and Statement of Need:
Reconstruct Shore Avenue from Lake Street, through the primary commercial area of Kotzebue, approximately 4,400 feet to the end of the road at Crowley Dock. Shore Avenue will be paved, new sidewalks, a pathway, parallel parking, an open space on the seaward side, and an erosion protection revetment on the seaside. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Fed Rcpts	$8,500,000						$8,500,000
Federal ES	$6,500,000						$6,500,000
Total:	$15,000,000	$0	$0	$0	$0	$0	$15,000,000

☐ State Match Required ☐ One-Time Project ☐ Phased - new ☑ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
FY2009 - $6,390,000; FY2007 - $3,400,000 SAFETEA-LU Earmark; FY2002 - $10,620,000.

Project Description/Justification:
Beach erosion has reduced Shore Avenue to less than two lanes and forced it onto adjacent property. The situation is progressively worsening as the traffic demand on the route is increasing. The road needs to be reconstructed in its proper location and widened to re-establish two-lane traffic and pedestrian and bicycle traffic. The re-established facility will then need to be protected from further erosion.

This request brings authorization up to total engineer's estimate as reflected in the Statewide Transportation Improvement Program (STIP).

In order to meet the barge schedule, we need to award the Kotzebue Shore Avenue construction contract in the Spring of 2009. If we wait until after July we risk losing the entire 2009 construction season. Losing a season means exposing the infrastructure along the shore to potential storm damage for another year. The project will provide shore protection along with other improvements.

This project meets the prioritization criteria of safety, serves an economically distressed area, leverages other funds (congressional earmarks), and can turn dirt in 2009. Advertising of this project

is estimated to take place in March, 2009.

Alaska Highway: Milepost 1308 - Tok Weigh Station **FY2009 Request: $4,000,000**
Reference No: 40322

AP/AL: Allocation **Project Type:** Construction
Category: Transportation
Location: Tok **Contact:** Frank Richards
House District: Interior Villages (HD 6) **Contact Phone:** (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Highway and Bridge Stimulus Projects

Brief Summary and Statement of Need:
Reconstruct the Tok Weigh Station to include multi-platform scales, a new scale house, and a heated inspection facility. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Fed Rcpts	$1,000,000						$1,000,000
Federal ES	$3,000,000						$3,000,000
Total:	$4,000,000	$0	$0	$0	$0	$0	$4,000,000

☐ State Match Required ☐ One-Time Project ☐ Phased - new ☑ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
FY2009 - $1,350,000; FY2006 - $1,190,000; FY2002 - $190,000; FY2001 - $106,500; FY1999 - $163,500.

Project Description/Justification:
The current facility does not meet the needs of the vehicle inspection crews on site. A new weighing system is needed to facilitate simultaneous axle group and gross weight enforcement. The site will be expanded to accommodate a new scale house.

This project meets the prioritization criteria of serving an economically distressed area, provides logistics benefits for the gas pipeline development, and can turn dirt in 2009. Advertising of this project is estimated to take place in March, 2009.

Yakutat: Areawide Paving

FY2009 Request: $3,800,000
Reference No: 48266

AP/AL: Allocation
Project Type: Construction
Category: Transportation
Location: Yakutat
Contact: Frank Richards
House District: Cordova/Southeast Islands (HD 5)
Contact Phone: (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Highway and Bridge Stimulus Projects

Brief Summary and Statement of Need:
Resurface Airport Road from approximately MP 0 to MP 4. Extend existing Dangerous River Road pavement approximately 0.2 miles to access new entrance to city landfill. Resurface and extend existing Ocean Cape Road pavement along the segment extending approximately 0.23 miles from the intersection with Airport Road. Pave and improve drainage on approximately 1.4 mile long Max Italio Road. Replace two tidal relief culvers and related work on Mallot Avenue. Other improvements as necessary. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$3,800,000						$3,800,000
Total:	$3,800,000	$0	$0	$0	$0	$0	$3,800,000

☐ State Match Required ☑ One-Time Project ☐ Phased - new ☐ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
None.

Project Description/Justification:
In 2002 the International Roughness Index for Airport Road, Dangerous River Road and Mallot Avenue ranged from 145 to 180 (95 to 170 is fair, and anything above 170 is poor). Given the time since the last inspection, it is reasonable to expect that these roadways have deteriorated. The tidal relief culverts at approximately MP 0.2 on Mallot Avenue are extremely rusted and close to failure, causing concerns for safety and for fish habitat. This is the only access to the harbor, and if the culverts fail the community will be cut off from its major economic engine, causing extreme hardship.

Paving Dangerous River Road will allow the use of the plow truck to remove snow, and improve overall maintenance efficiencies. Parts of this road were paved 20 years ago and are in desperate need of repaving – another section will be removed this spring and will need resurfacing. Airport Road has dangerous ruts that fill with water, causing controllability issues when filled with water, ice or a combination of the two. Unlike other communities, Yakutat does not receive magnesium chloride, forcing them to use less effective means of addressing these safety issues.

The project includes paving of Max Italio for transfer to the City of Yakutat (the Memorandum of Understanding is now being negotiated). Transfer of local roads to local entities is a priority in the Commissioner's "Let's Get Moving 2030".

This project meets the prioritization criteria of serving an economically distressed area and can turn dirt in 2009. Advertising of this project is estimated to take place in May, 2009.

Haines: Front Street to Union Street

FY2009 Request: **$2,500,000**
Reference No: **47706**

AP/AL: Allocation
Project Type: Construction
Category: Transportation
Location: Haines
Contact: Frank Richards
House District: Cordova/Southeast Islands (HD 5)
Contact Phone: (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Highway and Bridge Stimulus Projects

Brief Summary and Statement of Need:
Rebuild this 28'-wide section of road, remove existing asphalt, grade and restore existing subgrade as required, and place new surface to match existing finish grades. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$2,500,000						$2,500,000
Total:	$2,500,000	$0	$0	$0	$0	$0	$2,500,000

☐ State Match Required ☑ One-Time Project ☐ Phased - new ☐ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
None.

Project Description/Justification:
Rebuilding this section of roadway will complete reconstruction of the remaining section of highway from town to the ferry terminal, streamlining access to the ferry system and other port facilities. Pedestrian safety is vastly improved, as is transport efficiency.

This project meets the prioritization criteria of serving an economically distressed area, provides logistics benefits for the gas pipeline development, and can turn dirt in 2009. Advertising of this project is estimated to take place in April, 2009.

Glenn Highway: Milepost 34 to 42 - Parks Interchange to Palmer Resurfacing | **FY2009 Request:** $8,000,000 | **Reference No:** 48262

AP/AL: Allocation
Project Type: Construction
Category: Transportation
Location: Palmer (Richardson/Glenn Highways)
Contact: Frank Richards
House District: Richardson/Glenn Highways (HD 12)
Contact Phone: (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Highway and Bridge Stimulus Projects

Brief Summary and Statement of Need:
Mill and resurface mainline driving lanes on the Glenn Highway from the Parks Highway / Glenn Highway Interchange to the Palmer-Wasilla Highway Intersection in Palmer. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$8,000,000						$8,000,000
Total:	$8,000,000	$0	$0	$0	$0	$0	$8,000,000

☐ State Match Required ☑ One-Time Project ☐ Phased - new ☐ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
None.

Project Description/Justification:
The purpose of the proposed project is to provide an improved driving surface and to extend the service life of the facility. The route has pavement ruts ranging from .25 inch to 1.5 inches deep. Guardrail is in need of repair or replacement, and guardrail end terminals need to be upgraded to current design standards.

This project meets the prioritization criteria of safety, serves an economically distressed area, and can turn dirt in 2009. Advertising of this project is estimated to take place in Spring/Summer 2009.

Nome Road Improvements **FY2009 Request:** **$4,000,000**
Reference No: **40579**

AP/AL: Allocation **Project Type:** Construction
Category: Transportation
Location: Nome **Contact:** Frank Richards
House District: Bering Straits (HD 39) **Contact Phone:** (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Highway and Bridge Stimulus Projects

Brief Summary and Statement of Need:
Improve road drainage and provide dust control mitigation on Nome city streets. Solutions to the dust control issues will vary based on existing condition of the streets and material types, including high float, paving or the use of chemical dust palliatives. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$4,000,000						$4,000,000
Total:	$4,000,000	$0	$0	$0	$0	$0	$4,000,000

☐ State Match Required ☑ One-Time Project ☐ Phased - new ☐ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
FY2006 $1,000,000 Congressional Earmark.

Project Description/Justification:
The community has seen an increase in vehicle traffic over the past decade. This increase has made dust mitigation such as paving or chemical treatments on local roads a significant issue. The project will also improve drainage on city streets that are typically impacted by permafrost and migration of fine soil particles caused by snowmelt and seasonal rain. Improving drainage is critical to the effectiveness of any dust-abatement surface treatment. Proper drainage will also prevent potholing and any further loss of pavement on the few paved streets in the community.

This project meets the prioritization criteria of serving an economically distressed area, leverages other funds (congressional earmark), and can turn dirt in 2009. Advertising of this project is estimated to take place in July, 2009.

Emmonak: Community Road Improvements | **FY2009 Request:** $3,000,000 | **Reference No:** 34768

AP/AL: Allocation
Project Type: Construction
Category: Transportation
Location: Emmonak
Contact: Frank Richards
House District: Bering Straits (HD 39)
Contact Phone: (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Highway and Bridge Stimulus Projects

Brief Summary and Statement of Need:
This project will upgrade up to three miles of existing community roads and provide surfacing to mitigate dust. Minor drainage work may be required to ensure embankment sustainability. This project will be partially funded by the Denali Commission. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$3,000,000						$3,000,000
Total:	$3,000,000	$0	$0	$0	$0	$0	$3,000,000

☐ State Match Required ☑ One-Time Project ☐ Phased - new ☐ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
FY2002 - $1,100,000.

Project Description/Justification:
The community roads in Emmonak lack proper surfacing material. Due to the silty soil conditions in the area, the roads are extremely dusty in dry weather and rutted in wet weather. The roads lack proper drainage structures resulting in standing water in many locations throughout the community. The dusty road conditions are a serious health issue and need to be addressed. Although this project is jointly funded from federal and state sources, additional funding is needed to successfully complete this project and to significantly improve the health and quality of life in Emmonak.

This project meets the prioritization criteria of serving an economically distressed area, leverages other funds (Denali Commission, Bureau of Indian Affairs, Department of Commerce, Community, and Economic Development, and GO Bonds), and can turn dirt in 2009. Advertising of this project is estimated to take place in Spring/Summer 2009.

Marshall: Airport Access Road Bridge Replacement **FY2009 Request:** **$2,800,000**
Reference No: **48299**

AP/AL: Allocation **Project Type:** Construction
Category: Transportation
Location: Marshall **Contact:** Frank Richards
House District: Interior Villages (HD 6) **Contact Phone:** (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Highway and Bridge Stimulus Projects

Brief Summary and Statement of Need:
Replace the existing temporary bridge on the Marshall Airport Access Road. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$2,800,000						$2,800,000
Total:	$2,800,000	$0	$0	$0	$0	$0	$2,800,000

☐ State Match Required ☑ One-Time Project ☐ Phased - new ☐ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
None.

Project Description/Justification:
The existing temporary bridge is inadequate and does not meet the needs of the community. It was installed as a temporary measure several years ago to keep the access to the airport open. This road is the only vehicular access the village has to the airport. Replacing the bridge with a safer more durable structure would make the delivery of passengers and freight more efficient and improve the overall safety for the traveling public.

This project meets the prioritization criteria of safety, serves an economically distressed area, and can turn dirt in 2009. Advertising of this project is estimated to take place in Spring/Summer 2009.

Hoonah: Airport Road Paving - Ferry Terminal to Airport **FY2009 Request: $3,000,000**
Reference No: 48298

AP/AL: Allocation
Project Type: Construction
Category: Transportation
Location: Hoonah
Contact: Frank Richards
House District: Cordova/Southeast Islands (HD 5)
Contact Phone: (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Highway and Bridge Stimulus Projects

Brief Summary and Statement of Need:
Grind and repave Airport Road from the Ferry Terminal (MP 0) to the Airport (MP 2.2). This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$3,000,000						$3,000,000
Total:	$3,000,000	$0	$0	$0	$0	$0	$3,000,000

☐ State Match Required ☑ One-Time Project ☐ Phased - new ☐ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
None.

Project Description/Justification:
The Mayor of Hoonah says this is the community's top priority for infrastructure projects. The degraded condition of Hoonah's Airport Road has resulted in controllability issues, with extremely poor conditions in front of the post office. Department maintenance crews have had difficulty staying on top of patching, and freeze-thaw cycles regularly generate new potholes and other degradations. The International Roughness Index ranges from 109-178 (95-170 is considered fair, with anything over 170 considered poor). Rutting is extreme, with ½ inch ruts along at least ½ the length of the road.

This project meets the prioritization criteria of serving an economically distressed area. Advertising of this project is estimated to take place in July, 2009.

AMATS: Stimulus Highway and Bridge Funded Projects **FY2009 Request: $18,953,900**
Reference No: 48269

AP/AL: Allocation **Project Type:** Construction
Category: Transportation
Location: Anchorage Areawide **Contact:** Frank Richards
House District: Anchorage Areawide (HD 17-32) **Contact Phone:** (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Highway and Bridge Stimulus Projects

Brief Summary and Statement of Need:
This funding will be assigned to specific projects by the Anchorage Metropolitan Planning Organization (MPO) policy board, as required by federal law. Because of the rapid timeline in developing the Stimulus bill, there has not been time to pre-identify the specific projects. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$18,953,900						$18,953,900
Total:	$18,953,900	$0	$0	$0	$0	$0	$18,953,900

☐ State Match Required ☑ One-Time Project ☐ Phased - new ☐ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:

Project Description/Justification:
The economic stimulus bill (American Recovery and Reinvestment Act of 2009) calls for some fraction of the Act to include funds for Highway and Bridge work. These funds will be allocated to each state transportation agency under a formula contained in the language of the Act. Included in the bill is a requirement for sub-allocation to the Anchorage MPO, known as AMATS. The MPO board is required to select projects that conform to their long-range metropolitan transportation plan, and which meet the other requirements of the Act, such as rapid obligation of 50% of the funds.

This project meets the prioritization criteria as a mandatory distribution.

Valdez: Areawide Bike and Pedestrian Trail Pavement Refurbishment | **FY2009 Request:** $3,290,000 | **Reference No:** 48267

AP/AL: Allocation
Project Type: Construction
Category: Transportation
Location: Valdez
Contact: Frank Richards
House District: Richardson/Glenn Highways (HD 12)
Contact Phone: (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Highway and Bridge Stimulus Projects

Brief Summary and Statement of Need:
Repave the bike path along the Richardson Highway from Egan Drive to Robe River Subdivision (seven miles). The project will also rehabilitate and pave the access road into the Blueberry Lake Campground. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$3,290,000						$3,290,000
Total:	$3,290,000	$0	$0	$0	$0	$0	$3,290,000

☐ State Match Required ☑ One-Time Project ☐ Phased - new ☐ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
None.

Project Description/Justification:
The surface of this bike path has deteriorated and cracked in many areas. This path is used for summer and winter recreational opportunities. The Blueberry Lake Campground road is used to access the popular state recreation site at Blueberry Lake. The existing road is narrow, potholed with no surfacing. These improvements will provide better access to campsites, fishing and trails.

This project meets the prioritization criteria of serving an economically distressed area, can turn dirt in 2009, and is a mandatory distribution. Advertising of this project is estimated to take place in Spring/Summer 2009.

Denali Highway: Milepost 7 Wayside

FY2009 Request: **$330,000**
Reference No: **47839**

AP/AL: Allocation
Project Type: Construction
Category: Transportation
Location: Paxson
Contact: Frank Richards
House District: Richardson/Glenn Highways (HD 12)
Contact Phone: (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Highway and Bridge Stimulus Projects

Brief Summary and Statement of Need:
Construct a wayside with enhancements at MP 7 of the Denali Highway. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$330,000						$330,000
Total:	$330,000	$0	$0	$0	$0	$0	$330,000

☐ State Match Required ☑ One-Time Project ☐ Phased - new ☐ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
FY2001 - $170,000.

Project Description/Justification:
Provide wayside parking and traveler information near the east end of the Denali Highway. Includes parking for RVs and automobiles. Enhancements include interpretive signs along the viewing area, vaulted toilets and trash receptacles. The Department of Transportation and Public Facilities will perform maintenance of the pavement surface and the Bureau of Land Management will perform maintenance of the enhancements.

This project meets the prioritization criteria of serving an economically distressed area, can turn dirt in 2009 and is a mandatory distribution. Advertising of this project is estimated to take place in April, 2009.

Highway and Bridge Stimulus Contingency Projects **FY2009 Request: $139,097,600**
Reference No: 48355

AP/AL: Appropriation with Allocations **Project Type:** Construction
Category: Transportation
Location: Statewide **Contact:** Frank Richards
House District: Statewide (HD 1-40) **Contact Phone:** (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014

Brief Summary and Statement of Need:
These are the contingency projects that can be done if additional funds become available to Alaska or if something on the direct Economic Stimulus funding list can't be done.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Fed Rcpts	$2,100,000						$2,100,000
Federal ES	$136,997,600						$136,997,600
Total:	$139,097,600	$0	$0	$0	$0	$0	$139,097,600

☐ State Match Required ☑ One-Time Project ☐ Phased - new ☐ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:

Richardson Highway: Milepost 276 to 286 Resurfacing **FY2009 Request: $4,500,000**
Reference No: 48264

AP/AL: Allocation **Project Type:** Construction
Category: Transportation
Location: Big Delta **Contact:** Frank Richards
House District: Interior Villages (HD 6) **Contact Phone:** (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Highway and Bridge Stimulus Contingency Projects

Brief Summary and Statement of Need:
Relevel and repave the Richardson Highway from the Tanana River Bridge (MP 276) to just east of Shaw Creek (MP 286). This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$4,500,000						$4,500,000
Total:	$4,500,000	$0	$0	$0	$0	$0	$4,500,000

☐ State Match Required ☑ One-Time Project ☐ Phased - new ☐ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
None.

Project Description/Justification:
The road surface on this stretch of the Richardson Highway has a remaining service life of approximately four years and needs to be releveled and repaved. Maintenance crews are patching this section on a regular basis. This project is needed to preserve the pavement structures to extend the remaining service life of the road surface and to support the construction of a natural gas pipeline.

This project meets the prioritization criteria of serving an economically distressed area, provides logistics benefits for the gas pipeline development, and can turn dirt in 2009. Advertising of this project is estimated to take place in Spring/Summer 2009.

Delta Junction Area: National Highway System Repaving **FY2009 Request: $4,000,000**
Reference No: 48360

AP/AL: Allocation
Project Type: Construction
Category: Transportation
Location: Delta Junction (Richardson/Glenn Highways)
Contact: Frank Richards
House District: Richardson/Glenn Highways (HD 12)
Contact Phone: (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Highway and Bridge Stimulus Contingency Projects

Brief Summary and Statement of Need:
Repave the Richardson Highway between MP 265 and 267 (Delta Junction area) and upgrade the intersection at the junction of the Alaska Highway and Richardson Highway. Work will include resurfacing, repaving, curb, gutter and drainage improvements. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$4,000,000						$4,000,000
Total:	$4,000,000	$0	$0	$0	$0	$0	$4,000,000

☐ State Match Required ☑ One-Time Project ☐ Phased - new ☐ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
None.

Project Description/Justification:
The Richardson Highway is a principal arterial connecting with the Alaska Highway to the Canadian Border and also continues south to Valdez. As such, it is one of the few road connections to outside Alaska and also connects to the oil terminal and major recreation opportunities at Valdez. Resurfacing and repaving is necessary to preserve the life of the road. This proactive approach of cost effective preventive maintenance to extend the life of a federal-aid highway minimizes costly, time consuming rehabilitation and reconstruction work. This will reduce associated traffic disruptions and the public will see improved mobility, reduced congestion and a smoother, longer lasting pavement.

This project meets the prioritization criteria of serving an economically distressed area, provides logistics benefits for the gas pipeline development, and can turn dirt in 2009. Advertising of this project is estimated to take place in Spring/Summer 2009.

Ketchikan: Airport Ferry M/V Bob Ellis Replacement **FY2009 Request: $6,800,000**
Reference No: 43314

AP/AL: Allocation
Project Type: Construction
Category: Transportation
Location: Ketchikan
Contact: Frank Richards
House District: Ketchikan (HD 1)
Contact Phone: (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Highway and Bridge Stimulus Contingency Projects

Brief Summary and Statement of Need:
Construct a new airport ferryboat to replace the M/V Bob Ellis. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$6,800,000						$6,800,000
Total:	$6,800,000	$0	$0	$0	$0	$0	$6,800,000

☐ State Match Required ☑ One-Time Project ☐ Phased - new ☐ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
FY2008 - $5,750,000 AK Capital Inc funds.

Project Description/Justification:

The existing airport ferry M/V Bob Ellis has reached the end of its useful service life and will not pass future Coast Guard inspections without major maintenance investment, which could exceed the cost of a new ferryboat. The Ketchikan International Airport requires a second ferryboat to ensure reliability of service when the other ferry is in overhaul or out of service. The airport also requires a second ferryboat to cover peak summer traffic demand to the airport.

This project meets the prioritization criteria of safety, leverages other funds (AK Capital Income) and can be obligated in 2009. Advertising of this project is estimated to take place in May, 2009.

Fairbanks: LED Street Light Conversion **FY2009 Request: $3,310,000**
Reference No: 48368

AP/AL: Allocation **Project Type:** Renewal and Replacement
Category: Transportation
Location: Fairbanks Areawide **Contact:** Frank Richards
House District: Fairbanks Areawide (HD 7-11) **Contact Phone:** (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Highway and Bridge Stimulus Contingency Projects

Brief Summary and Statement of Need:
Convert existing High Pressure Sodium (HPS) street lights to Light-Emitting Diode (LED) lights in the City of Fairbanks and North Pole. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$3,310,000						$3,310,000
Total:	$3,310,000	$0	$0	$0	$0	$0	$3,310,000

☐ State Match Required ☑ One-Time Project ☐ Phased - new ☐ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
None.

Project Description/Justification:
The City of Fairbanks and City of North Pole operate approximately 2,900 High Pressure Sodium (HPS) street lights, which cost approximately $550,000 per year to power and $75,000 per year in maintenance and replacement bulb costs. The Light-Emitting Diode (LED) street lights provide a 70% reduction in power usage and have a lifespan estimated from 50,000 to 100,000 hours. This would result in an annual savings of $400,000 or greater per year for the City of Fairbanks and North Pole residents.

This project meets the prioritization criteria of safety and can begin in 2009. Advertising of this project is estimated to take place in Spring/Summer 2009.

Fairbanks: Sign Replacement

FY2009 Request: $973,600
Reference No: 48369

AP/AL: Allocation
Project Type: Renewal and Replacement
Category: Transportation
Location: Fairbanks Areawide
Contact: Frank Richards
House District: Fairbanks Areawide (HD 7-11)
Contact Phone: (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Highway and Bridge Stimulus Contingency Projects

Brief Summary and Statement of Need:
Design and implement a system to assess all traffic signs in the Fairbanks area and replace as needed to improve their visibility and increase road safety. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$973,600						$973,600
Total:	$973,600	$0	$0	$0	$0	$0	$973,600

☐ State Match Required ☑ One-Time Project ☐ Phased - new ☐ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
None.

Project Description/Justification:
There is a new federal mandate to ensure the retro-reflectivity of all signs are assessed, inventoried, and replaced as needed. By January 2012, a sign assessment or management system has to be in place to track sign data and ensure timely sign replacement. By January 2015, all ground-mounted regulatory, warning and guide signs must comply with retro-reflectivity requirements and by January 2018, all overhead and street name signs must be compliant.

This project meets the prioritization criteria of safety and can begin in 2009. Advertising of this project is estimated to take place in Spring/Summer 2009.

Fairbanks: Wendell Street ADA Improvements **FY2009 Request: $814,000**
Reference No: 48370

AP/AL: Allocation **Project Type:** Construction
Category: Transportation
Location: Fairbanks (Fairbanks/Fort Wainwright) **Contact:** Frank Richards
House District: Fairbanks/Fort Wainwright (HD 10) **Contact Phone:** (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Highway and Bridge Stimulus Contingency Projects

Brief Summary and Statement of Need:
Pedestrian improvements, re-paving, utility relocation, and storm drain improvements on Wendell Street. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$814,000						$814,000
Total:	$814,000	$0	$0	$0	$0	$0	$814,000

☐ State Match Required ☑ One-Time Project ☐ Phased - new ☐ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
None

Project Description/Justification:
Sidewalk improvements are necessary to comply with the Americans with Disabilities Act (ADA). Wendell Street is the location of the new Morris Thompson Cultural and Visitor's Center and tourists will be dropped off and picked up there by bus companies. Improving the pedestrian facilities and repaving will enhance this new cultural visitor destination in Fairbanks. The storm drains are 40-year-old wood stave pipes and are in dire need of replacement.

This project meets the prioritization criteria of being able to turn dirt in 2009. Advertising of this project is estimated to take place in Spring/Summer 2009.

Kodiak: Rezanof Drive Resurfacing - Coast Guard Access Road to Jack Hinkel Way | **FY2009 Request:** $10,000,000 | **Reference No:** 48288

AP/AL: Allocation
Project Type: Construction
Category: Transportation
Location: Kodiak
Contact: Frank Richards
House District: Kodiak (HD 36)
Contact Phone: (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Highway and Bridge Stimulus Contingency Projects

Brief Summary and Statement of Need:
Resurface Rezanof Drive from the Coast Guard Access Road extending approximately 6.7 miles to Jack Hinkel Way in the City of Kodiak. The project includes milling and resurfacing the driving lanes and shoulders, striping, and removal and replacement of damaged guardrail. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$10,000,000						$10,000,000
Total:	$10,000,000	$0	$0	$0	$0	$0	$10,000,000

☐ State Match Required ☑ One-Time Project ☐ Phased - new ☐ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
None.

Project Description/Justification:
Rezanof Drive is a National Highway System (NHS) route. The surface of the highway is rutted and has been patched to repair potholes. The resurfacing project will eliminate ruts, improve safety, reduce maintenance costs, and extend the useful life of the highway. Damaged guardrail will be replaced as will end terminals not meeting current design standards.

This project meets the prioritization criteria of safety and serves an economically distressed area. Advertising of this project is estimated to take place in Spring/Summer 2009.

Sterling Highway Resurfacing: Soldotna to North Coho Loop | **FY2009 Request: $15,000,000** | **Reference No: 48265**

AP/AL: Allocation
Project Type: Construction
Category: Transportation
Location: Soldotna
Contact: Frank Richards
House District: Kenai/Soldotna (HD 33)
Contact Phone: (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Highway and Bridge Stimulus Contingency Projects

Brief Summary and Statement of Need:
Resurface approximately 17 miles of the Sterling Highway from Kalifornsky Beach Road passing through the community of Kasilof to South Coho Loop. The project includes pre-leveling existing rutted driving lanes, resurfacing the driving lanes and shoulders, striping, and removal and replacement of guardrail. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$15,000,000						$15,000,000
Total:	$15,000,000	$0	$0	$0	$0	$0	$15,000,000

☐ State Match Required ☑ One-Time Project ☐ Phased - new ☐ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
None.

Project Description/Justification:
The surface of the highway is rutted and has been patched in numerous places to repair potholes. The resurfacing project will eliminate ruts, improve safety, reduce maintenance costs, and extend the useful life of the highway. Guardrail will be replaced and will include end terminals meeting current design standards.

This project meets the prioritization criteria of safety and serves an economically distressed area. Advertising of this project is estimated to take place in Spring/Summer 2009.

Juneau: Jordan Creek Bridge Replacement and Basin Road Trestle Rehabilitation **FY2009 Request: $1,500,000** **Reference No: 48285**

AP/AL: Allocation
Project Type: Construction
Category: Transportation
Location: Juneau Areawide
Contact: Frank Richards
House District: Juneau Areawide (HD 3-4)
Contact Phone: (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Highway and Bridge Stimulus Contingency Projects

Brief Summary and Statement of Need:
Replace Jordan Creek Bridge #1786 (Trout Street), and rehabilitate the Basin Road Trestle #0948. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$1,500,000						$1,500,000
Total:	$1,500,000	$0	$0	$0	$0	$0	$1,500,000

☐ State Match Required ☑ One-Time Project ☐ Phased - new ☐ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
None.

Project Description/Justification:
Though Trout Street is short, it is busy. Average Daily Traffic (ADT) is over 3,900 for this roadway that serves two popular eateries, a hotel and a business center. This steel stringer and filled steel grid bridge was built in 1984 and suffers from excessive rust. The replacement bridge is currently being designed, but is anticipated to incorporate a pre-fabricated, single span steel bridge with pony truss.

The Basin Road Trestle was built in 1936 and is the primary maintenance and operations access to Juneau's water supply in Last Chance Basin. Deck condition is serious, superstructure condition is fair, with a sufficiency rating of 42 out of 100. Commercial trucks are limited to eight tons per axle. In the event that the city's water turbines need to be replaced, they will need to be slung in by helicopter, a high-risk and expensive option. Basin Trestle rehabilitation will include replacing the bridge deck, updating the guard rail, and increasing the load ratings for the first and last span to equal or exceed the intermediate spans. The foundations will be inspected, and replaced or repaired as required.

This project meets the prioritization criteria of safety and leverages other funds. Advertising of this project is estimated to take place in July, 2009.

Richardson Highway: Milepost 345 Moose Creek Railroad Crossing | **FY2009 Request:** $14,000,000 | **Reference No:** 47695

AP/AL: Allocation
Project Type: Construction
Category: Transportation
Location: North Pole
Contact: Frank Richards
House District: North Pole (HD 11)
Contact Phone: (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Highway and Bridge Stimulus Contingency Projects

Brief Summary and Statement of Need:
This project is the initial stage of a large scale effort to address highway needs to support the construction of a large diameter natural gas pipeline from the North Slope of Alaska to the Canadian Border and Midwestern States. The Richardson Highway will be impacted by the projected increases in heavy truck traffic and the movement of pipe and oversized construction modules. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$14,000,000						$14,000,000
Total:	$14,000,000	$0	$0	$0	$0	$0	$14,000,000

☐ State Match Required ☑ One-Time Project ☐ Phased - new ☐ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
None.

Project Description/Justification:
This project will construct an overpass on the Richardson Highway over the Alaska Railroad tracks near Moose Creek (approximately MP 345 of the Richardson Highway). The project will maintain the divided highway and construct separated bridges over the Alaska Railroad. In addition, the project will construct a new approach to the Moose Creek access road and reconstruct an existing median opening near Moose Creek.

This project will increase safety and reduce delay at the railroad crossing. Grade separation between the highway and railroad is needed to eliminate the potential for vehicle-train collisions, rear-end collisions caused when high speed vehicles encounter fuel trucks and school buses that must stop at the tracks, and a history of delay during peak hours when vehicles cannot readily change lanes.

This project meets the prioritization criteria of safety and provides logistics benefits for the gas pipeline development. Advertising of this project is estimated to take place in January, 2010.

Seward Meridian Parkway: Road Improvements - Parks Highway to Palmer-Wasilla Highway

FY2009 Request: $13,100,000
Reference No: 47832

AP/AL: Allocation
Project Type: Construction
Category: Transportation
Location: Wasilla
Contact: Frank Richards
House District: Greater Wasilla (HD 14)
Contact Phone: (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Highway and Bridge Stimulus Contingency Projects

Brief Summary and Statement of Need:
Upgrade Seward Meridian Parkway to a four-lane roadway with a center left turn lane and a separated pathway from the Parks Highway to the Palmer-Wasilla Highway to include intersection improvements at the Palmer-Wasilla Highway. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Fed Rcpts	$2,100,000						$2,100,000
Federal ES	$11,000,000						$11,000,000
Total:	$13,100,000	$0	$0	$0	$0	$0	$13,100,000

☐ State Match Required ☑ One-Time Project ☐ Phased - new ☐ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	26,800	0
One-Time Startup:	0	
Totals:	26,800	0

Additional Information / Prior Funding History:
None.

Project Description/Justification:
The Seward Meridian Parkway Road Improvements project will increase the capacity of the roadway to address the current congestion issues and future travel demands in the fast growing Wasilla area while addressing the need for safe bicycle and pedestrian improvements.

Operating and maintenance costs are expected to increase by approximately $26,800 per year beginning in FY2012.

This project meets the prioritization criteria of serving an economically distressed area and leverages other funds. Advertising of this project is estimated to take place in Spring/Summer 2009.

Sterling Highway Scales Replacement **FY2009 Request: $2,200,000**
Reference No: 47538

AP/AL: Allocation **Project Type:** Renewal and Replacement
Category: Transportation
Location: Kenai Areawide **Contact:** Frank Richards
House District: Kenai Areawide (HD 33-35) **Contact Phone:** (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Highway and Bridge Stimulus Contingency Projects

Brief Summary and Statement of Need:
Replace the failed scales at the Sterling Highway Weigh Station. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$2,200,000						$2,200,000
Total:	$2,200,000	$0	$0	$0	$0	$0	$2,200,000

☑ State Match Required ☑ One-Time Project ☐ Phased - new ☐ Phased - underway ☐ On-Going
9% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
None.

Project Description/Justification:
The Sterling Highway scales have just recently failed, requiring closure until they can be replaced. Until the scales are replaced, size, weight and safety compliance checks of all Commercial Motor Vehicles (CMV) south of the Potter Weigh Station can only be conducted during roadside inspections. This process will increase fuel costs and will decrease the efficiency of conducting these types of checks at areas away from the Sterling Highway Weigh Station. The safety of the traveling public as well as Measurement Standards and Commercial Vehicle Enforcement's ability to protect public infrastructure will be impacted as not every CMV south of the Potter Weigh Station will be checked for overweight loads.

This project meets the prioritization criteria of safety and serves an economically distressed area. Advertising of this project is estimated to take place in Spring/Summer 2009.

Kipnuk: Boardwalk Improvements

FY2009 Request: $10,000,000
Reference No: 47833

AP/AL: Allocation
Project Type: Construction
Category: Transportation
Location: Kipnuk
Contact: Frank Richards
House District: Bethel (HD 38)
Contact Phone: (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Highway and Bridge Stimulus Contingency Projects

Brief Summary and Statement of Need:
Construct approximately 4.7 miles of new and replacement boardwalks in the community of Kipnuk. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES.	$10,000,000						$10,000,000
Total:	$10,000,000	$0	$0	$0	$0	$0	$10,000,000

☐ State Match Required ☐ One-Time Project ☑ Phased - new ☐ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
None.

Project Description/Justification:
This project will continue the replacement of boardwalk that constitute the village transportation system including thoroughfare and residential laterals. The current boardwalks were constructed with 2' x 6' untreated lumber placed directly on the tundra. They are narrow and insufficient for the volume and type of traffic in the community.

This project meets the prioritization criteria of serving an economically distressed area and leverages other funds. Advertising of this project is estimated to take place in Spring/Summer 2009.

Glenn Highway: Lighting - Birchwood to Eklutna **FY2009 Request: $15,000,000**
Reference No: 48291

AP/AL: Allocation
Project Type: Construction
Category: Transportation
Location: Eklutna
Contact: Frank Richards
House District: Chugiak/Southern Mat-Su (HD 16)
Contact Phone: (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Highway and Bridge Stimulus Contingency Projects

Brief Summary and Statement of Need:
Install continuous lighting along the Glenn Highway corridor from South Birchwood Loop to Eklutna. Lighting is proposed to be a combination of low mount electroliers with high mast lighting at interchanges. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$15,000,000						$15,000,000
Total:	$15,000,000	$0	$0	$0	$0	$0	$15,000,000

☐ State Match Required ☑ One-Time Project ☐ Phased - new ☐ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	120,000	0
One-Time Startup:	0	
Totals:	120,000	0

Additional Information / Prior Funding History:
None.

Project Description/Justification:
This project will provide an eight mile extension to the existing highway lighting system on the Glenn Highway corridor between Anchorage and Eklutna, greatly increasing the safety of the traveling public.

Electrical costs and minor maintenance for this project when completed will be $120,000 annually.

This project meets the prioritization criteria of safety. Advertising of this project is estimated to take place in Spring/Summer 2009.

Delta Junction: City Street Rehabilitation **FY2009 Request: $4,000,000**
Reference No: 48296

AP/AL: Allocation **Project Type:** Construction
Category: Transportation
Location: Delta Junction (Interior Villages) **Contact:** Frank Richards
House District: Interior Villages (HD 6) **Contact Phone:** (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Highway and Bridge Stimulus Contingency Projects

Brief Summary and Statement of Need:
Improve community streets within the City of Delta Junction. The project will include resurfacing, paving, grade, and drainage improvements. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$4,000,000						$4,000,000
Total:	$4,000,000	$0	$0	$0	$0	$0	$4,000,000

☐ State Match Required ☑ One-Time Project ☐ Phased - new ☐ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
None.

Project Description/Justification:
Improving the city streets in Delta Junction would reduce maintenance costs, improve safety as well as health and air quality by eliminating dust. The project will also improve economic viability for local businesses and farms located on these roads.

This project meets the prioritization criteria of serving an economically distressed area. Advertising of this project is estimated to take place in Spring/Summer 2009.

Juneau: Egan Drive and Glacier Highway Resurfacing - Mendenhall Loop to Auke Bay Ferry Terminal

FY2009 Request: $4,000,000
Reference No: 48297

AP/AL: Allocation
Project Type: Construction
Category: Transportation
Location: Juneau (Mendenhall Valley)
Contact: Frank Richards
House District: Juneau/Mendenhall Valley (HD 4)
Contact Phone: (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Highway and Bridge Stimulus Contingency Projects

Brief Summary and Statement of Need:
Pavement rehabilitation on Egan Drive from Mendenhall Loop Road to Brotherhood Bridge. Pavement rehabilitation on Glacier Highway from Brotherhood Bridge to the Auke Bay Ferry Terminal. The segment on Glacier Highway from Hamilton Drive to Fritz Cove Road was resurfaced in 2008 and is not included. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$4,000,000						$4,000,000
Total:	$4,000,000	$0	$0	$0	$0	$0	$4,000,000

☐ State Match Required ☑ One-Time Project ☐ Phased - new ☐ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
None.

Project Description/Justification:
The section of road close to Mendenhall Loop is heavily traveled, with an Average Daily Traffic (ADT) of over 14,000 a day. Rutting in the Brotherhood Bridge area ranges from 0.5 to 0.8 inches, and Pavement Serviceability Ratings in the same area are "poor." The portion of the highway from the intersection with Fritz Cove Road to the Auke Bay Ferry Terminal has several rough areas and areas where pavement is breaking up and requires intensive maintenance.

Ruts filled with water pose a hydroplaning and controllability issue, and this hazard can be exacerbated when ice collects in these ruts. As maintenance crews work to reduce costs, the use of costly chemicals that mitigate these issues have been reduced.

This project meets the prioritization criteria of safety. Advertising of this project is estimated to take place in July, 2009.

Dillingham: Wood River Road Reconstruction **FY2009 Request: $8,900,000**
Reference No: 40364

AP/AL: Allocation **Project Type:** Construction
Category: Transportation
Location: Dillingham **Contact:** Frank Richards
House District: Bristol Bay/Aleutians (HD 37) **Contact Phone:** (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Highway and Bridge Stimulus Contingency Projects

Brief Summary and Statement of Need:
Realign and reconstruct approximately 2.8 miles of the Wood River Road from Kanakanak Road to the Wood River Landing. Project also includes a separated Wood River Road pathway and a 1/4 mile Waskey Road pathway spur. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$8,900,000						$8,900,000
Total:	$8,900,000	$0	$0	$0	$0	$0	$8,900,000

☐ State Match Required ☐ One-Time Project ☐ Phased - new ☑ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
FY2006 - $1,000,000; FY2003 - $800,000.

Project Description/Justification:
The road surface is sub-standard and requires extra maintenance to provide operational efficiency. The Dillingham Airport Master Plan recommends realignment of the road to eliminate conflicts with navigational aids. The corridor experiences significant pedestrian and bicycle use that requires separated facilities to ensure adequate safety.

This project meets the prioritization criteria of serving an economically distressed area. Advertising of this project is estimated to take place in Spring/Summer 2009.

Ketchikan: North Tongass Highway - Totem Bight to Whipple Creek

FY2009 Request: $13,800,000
Reference No: 47703

AP/AL: Allocation
Project Type: Construction
Category: Transportation
Location: Ketchikan
Contact: Frank Richards
House District: Ketchikan (HD 1)
Contact Phone: (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Highway and Bridge Stimulus Contingency Projects

Brief Summary and Statement of Need:
Reconstruct the highway for approximately two miles to provide a paved width of 36' from the first junction with D-1 Loop Road to Whipple Creek Bridge (#1153). Roadway work will exclude the 0.2 mile section from the second junction with D-1 Loop Road (at approximately MP 10.5) to Lighthouse Grocery (at approximately MP 10.7), which will be addressed in another project. Construct a paved path (8' in width) on the uphill side. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$13,800,000						$13,800,000
Total:	$13,800,000	$0	$0	$0	$0	$0	$13,800,000

☐ State Match Required ☐ One-Time Project ☑ Phased - new ☐ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
None.

Project Description/Justification:
This section of the North Tongass Highway is one of the narrowest, high-volume, high-speed segments in Southeast Alaska. Existing pavement width is only 26 feet, leaving almost no shoulder. The roadside environment is unforgiving when vehicles do exit the roadway. Posted speed is 50 mph, and Average Daily Traffic (ADT) is 4,000. The pavement condition has deteriorated rapidly and, if not repaired, will require significant maintenance.

This project meets the prioritization criteria of safety and leverages other funds. Advertising of this project is estimated to take place in December, 2009.

Juneau: Glacier Highway - Amalga to Eagle Beach Widening | **FY2009 Request:** $1,700,000 | **Reference No:** 45461

AP/AL: Allocation
Project Type: Construction
Category: Transportation
Location: Auke Bay
Contact: Frank Richards
House District: Juneau/Mendenhall Valley (HD 4)
Contact Phone: (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Highway and Bridge Stimulus Contingency Projects

Brief Summary and Statement of Need:
Widen the Glacier Highway for 4.6 miles from the intersection with Amalga Harbor Road to the kayak launch site (Boulder Beach Access) at the north end of Eagle Beach. Enhance trailheads and beach access along this route out of Juneau. Does not include funding for widening of either bridge (Eagle River/Bridge #735 and Herbert River/Bridge #736) on this segment. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$1,700,000						$1,700,000
Total:	$1,700,000	$0	$0	$0	$0	$0	$1,700,000

☐ State Match Required ☐ One-Time Project ☐ Phased - new ☑ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
FY2009 - $10,500,000.

Project Description/Justification:
This project in the City and Borough of Juneau has environmental approval and is ready for construction funding. Pavement on the portion north of Amalga Harbor Road crosses a low-lying wet area and is near failure after years of service. It is the oldest highway pavement still providing service in Southeast Alaska. The sharp curve at Eagle Beach has been problematical for years and has seen two fatalities. Besides rock excavation to improve this curve, the project will increase paved width, provide adequate separation between the fog line and guardrail face and include traversable side slopes beyond the pavement edge. These upgrades will improve safety for the traveling public.

This request reflects a revised engineer's estimate.

This project meets the prioritization criteria of turning dirt in 2009. Advertising of this project is estimated to take place in March, 2009.

Ketchikan: Water Street Sidewalk Improvements **FY2009 Request: $2,500,000**
Reference No: 48313

AP/AL: Allocation
Project Type: Construction
Category: Transportation
Location: Ketchikan
Contact: Frank Richards
House District: Ketchikan (HD 1)
Contact Phone: (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Highway and Bridge Stimulus Contingency Projects

Brief Summary and Statement of Need:
Widen and modify existing sidewalks from Chapmen Street to the existing Viaduct Tunnel to improve pedestrian capacity, safety and Americans with Disabilities Act (ADA) compliance. Project will include replacement sidewalks, handicap access ramps, bulb-outs, and related safety improvements. Project does not include work within the Viaduct Tunnel itself. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$2,500,000						$2,500,000
Total:	$2,500,000	$0	$0	$0	$0	$0	$2,500,000

☐ State Match Required ☑ One-Time Project ☐ Phased - new ☐ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
None.

Project Description/Justification:
The project presents the opportunity to provide job stimulus and to resolve long standing safety issues for pedestrian and vehicle traffic. The adjacent Ketchikan waterfront area has experienced a massive increase in pedestrian traffic in recent years resulting from the growing Alaskan tour ship industry. It is the first major Alaskan port stop for northbound cruise ships, which frequently off-load 10,000 or more pedestrians at a time when multiple ships are in port. The existing sidewalks are unable to handle pedestrian demand because they are narrow, are not ADA compliant, and are badly damaged (more than 50 years old). These conditions, combined with peak vehicle traffic over 18,000 vehicles on the roadway, present multiple safety concerns for both pedestrian and vehicle users and construction of the project will result in long-term safety improvements to this unusually high traffic environment.

This project meets the prioritization criteria of safety and leverages other funds. Advertising of this project is estimated to take place in September, 2009.

Glenn Highway: Bike Trails Pavement Refurbishment - Eagle River to Birchwood | **FY2009 Request:** $3,000,000 | **Reference No:** 48301

AP/AL: Allocation
Project Type: Construction
Category: Transportation
Location: Eagle River (Military)
Contact: Frank Richards
House District: Military (HD 18)
Contact Phone: (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014
Appropriation: Highway and Bridge Stimulus Contingency Projects

Brief Summary and Statement of Need:
Rehabilitate the bike path adjacent to the Glenn Highway from Eagle River to Birchwood. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$3,000,000						$3,000,000
Total:	$3,000,000	$0	$0	$0	$0	$0	$3,000,000

☐ State Match Required ☑ One-Time Project ☐ Phased - new ☐ Phased - underway ☐ On-Going
0% = Minimum State Match % Required ☐ Amendment ☐ Mental Health Bill

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
None.

Project Description/Justification:
The approximately eight mile section of the Glenn Highway pathway between Eagle River and Birchwood was originally constructed in 1973. A secondary project in 1983 improved some sections within the corridor. The pathway is used by commuter and recreational bicycles, and pedestrians. When school is in session the pathway is used by school children in the vicinities of Chugiak Elementary, Mirror Lake Middle School and Chugach High School. The proposed pathway rehabilitation will enhance the safety and usability of the pathway by eliminating cracks, root damage, and shoulder deterioration of the existing surface.

This project meets the prioritization criteria of mandatory distribution. Advertising of this project is estimated to take place in Spring/Summer 2009.

Federal Contingency Projects **FY2009 Request: $15,000,000**
Reference No: 31376

AP/AL: Appropriation **Project Type:** Construction
Category: Transportation
Location: Statewide **Contact:** Frank Richards
House District: Statewide (HD 1-40) **Contact Phone:** (907)465-3900
Estimated Project Dates: 03/01/2009 - 06/30/2014

Brief Summary and Statement of Need:
These funds are used when project costs have increased, a revised program is not feasible and immediate additional funding is required to avoid project delays or loss of federal economic stimulus dollars. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$15,000,000						$15,000,000
Total:	$15,000,000	$0	$0	$0	$0	$0	$15,000,000

☐ State Match Required ☐ One-Time Project ☐ Phased - new ☐ Phased - underway ☑ On-Going

One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:

Project Description/Justification:
Highway, airport or transit projects that are underway and require additional budget authority may be approved for use with this appropriation. A revised program may not be possible, or the funds may be needed immediately to avoid the loss of federal economic stimulus funds.

Approval of the Commissioner is required to use this authority.

MEMORANDUM

State of Alaska

Department of Transportation & Public Facilities
Division of Administrative Services

TO: Karen Rehfeld, Director
Office of Management and Budget

DATE: February 20, 2009

TELEPHONE NO: 465-3911
TEXT TELEPHONE: 465-3652
FAX NO: 465-3124

FROM: Nancy J. Slagle
Director

SUBJECT: Fund Source Change

The Department of Transportation and Public Facilities (DOT&PF) is requesting fund source changes on appropriations that will be used for federal economic stimulus projects. To meet the reporting needs of the American Recovery and Reinvestment Act of 2009, a new fund source code has been created. The Department has identified a list of potential projects that meet the criteria of the congressional funding bill. Some of those projects have existing legislative authority for receipt and expenditure of federal funds (fund source code 1002). We are requesting a fund source change for the noted amounts to the Federal Economic Stimulus fund source (1212) as follows:

$170,000 of the appropriation found at:
Section 1, Ch. 135, SLA 2000, page 42, lines 22-24 (Denali Highway: Milepost 60- Information and Orientation Wayside - $170,000)

$7,727,875 of the appropriation found at:
Section 1, Ch. 61, SLA 2001, page 39, lines 3-4 (Dalton Highway: Milepost 175 to 209 Reconstruction - $10,000,000)

$5,020,000 of the appropriation found at:
Section 1, Ch. 1, SSSLA 2002, page 62, lines 18-20 (Dalton Highway: Milepost 175 to 209 Reconstruction - $5,020,000)

$17,000,000 of the appropriation found at:
Section 4, Ch. 30, SLA 2007, page 112, lines 26-28 (Dalton Highway: Milepost 1750to 209 Reconstruction - $17,000,000)

$7,700,000 of the appropriation found at:
Section 1, Ch. 82, SLA 2006, page 99, lines 7-8 (Gustavus: Dock Replacement - $19,000,000)

$5,748,366 of the appropriation found at:
Section 1, Ch. 61, SLA 2001, page 41, lines 21-23 (Ketchikan: Tongass Highway – Viaducts Replacement and Rehabilitation - $5,750,000)

$1,500,000 of the appropriation found at:

Section 1, Ch. 159, SLA 2004, page 44, line 33 and page 45, lines 3-4 (Ketchikan: Tongass Highway – Viaducts Replacement and Rehabilitation - $2,200,000)

$10,500,000 of the appropriation found at:
Section 13, Ch. 29, SLA 2008, page 169, lines 31-33 (Juneau: Glacier Highway – Amalga to Eagle Beach Widening - $10,500,000)

$1,000,000 of the appropriation found at:
Section 1, Ch. 3, FSSLA 2005, page 79, lines 30-31 (Dillingham: Wood River Road Reconstruction - $1,000,000)

$8,500,000 of the appropriation found at:
Section 4, Ch. 30, SLA 2007, page 105, lines 28-29 (Akiachak: Airport Relocation - $10,500,000)

$9,000,000 of the appropriation found at:
Section 1, Ch. 3, FSSLA 2005, page 73, lines 6-8 (Ouzinkie: Airport Reconstruction and Relocation - $9,000,000)

$3,900,000 of the appropriation found at:
Section 13, Ch. 29, SLA 2008, page 163, lines 21-23 (Ouzinkie: Airport Reconstruction and Relocation - $10,000,000)

$4,200,000 of the appropriation found at:
Section 1, Ch. 3, FSSLA 2005, page 72, lines 10-11 (Kotzebue: Apron Expansion - $8,000,000)

$1,500,000 of the appropriation found at:
Section 1, Ch. 159, SLA 2004, page 37, lines 11-12 (Hoonah: Runway Extension - $1,500,000)

$1,900,000 of the appropriation found at:
Section 1, Ch. 3, FSSLA 2005, page 71, lines 21-22 (Hoonah: Airport Improvements - $1,900,000)

$3,000,000 of the appropriation found at:
Section 1, Ch. 159, SLA 2004, page 36, lines 29-30 (Fort Yukon: Resurfacing - $3,000,000)

$2,765,625 of the appropriation found at:
Section 1, Ch. 3, FSSLA 2005, page 71, lines 9-10 (Fort Yukon: Airport Resurfacing - $2,765,625)

$4,725,151 of the appropriation found at:
Section 1, Ch. 82, SLA 2006, page 90, lines 16-17 (Fort Yukon: Airport Improvements - $4,725,151)

$4,220,000 of the appropriation found at:
Section 1, Ch. 3, FSSLA 2005, page 69, lines 31-32 (Allakaket: Airport Improvements - $4,220,000)

$400,000 of the appropriation found at:
Section 4, Ch. 30, SLA 2007, page 105, lines 32-33 (Allakaket: Airport Improvements - $400,000)

$1,950,000 of the appropriation found at:

Section 13, Ch. 29, SLA 2008, page 162, lines 11-12 (Allakaket: Airport Improvements - $1,950,000)

$6,859,375 of the appropriation found at:
Section 1, Ch. 82, SLA 2003, page 38, lines 19-21 (Cordova: Airport Apron, Taxiway, and General Aviation Improvements - $6,859,375)

$1,735,000 of the appropriation found at:
Section 1, Ch. 3, FSSLA 2005, page 70, lines 25-27 (Cordova: Airport Apron, Taxiway, and General Aviation Improvements - $1,735,000)

$500,000 of the appropriation found at:
Section 4, Ch. 30, SLA 2007, page 106, lines 15-17 (Cordova: Airport Apron, Taxiway, and General Aviation Improvements - $1,500,000)

$600,000 of the appropriation found at:
Section 1, Ch. 1, SSSLA 2002, page 53, lines 20-21 (Lake Louise: Runway Rehabilitation - $1,060,000)

$1,840,000 of the appropriation found at:
Section 13, Ch. 29, SLA 2008, page 163, lines 17-18 (Lake Louise: Runway Rehabilitation - $1,840,000)

$1,700,000 of the appropriation found at:
Section 13, Ch. 29, SLA 2008, page 163, lines 11-12 (Kodiak: Chemical Storage Building - $1,700,000)

Your approval of this request is appreciated.

cc: Jeff Ottesen, Director, Program Development
Frank Richards, Deputy Commissioner for Highways and Facilities

Administration Responses

The American Recovery and Reinvestment Act (ARRA)
Provides $175.5 Million for Surface Transportation

The following requirements apply to the funding for roads and bridges:

- Funding is provided by formula
- All funds flow through state DOTs
- 50% of the funds must be obligated within 120 days
- Remaining 50% must be spent within one year
- 67% to be used on state highways and roads
- 19% for state & local projects in communities with populations less than 5,000
- 11% projejcts in communities with populations greater than 200,000
- 3% for transportation enhancement projects (sidewalks, bike paths, waysides etc)
- Use it or lose provisions apply
- All projects must be in a current State Transportation Improvement Plan (STIP – Amendment #18 for Alaska is out for public comment)
- No state match is required

In preparation for receipt of federal stimulus funds the department identified projects meeting the following criteria:

- Able to obligate funds for construction within 1 year
- Have completed all phases in accordance with federal regulations

This set of projects was then prioritized using the following criteria:

1. Primary purpose is to improve road safety
2. Located in economically distressed areas as defined in the bill
3. Provides gas pipeline logistical benefits
4. Leverages dollars from other sources such as the Denali Commission
5. Construction can begin ("turn dirt") in 2009

The attached spreadsheet presents the projects separated into 3 categories:

1. Recommended Projects -projects the department recommends for economic stimulus funding
2. Contingent Projects - projects the department recommends if additional funds become available from other states under the "use it or lose it" provisions.
3. Ineligible Projects -projects that had been considered for inclusion and may have appeared on lists but based on the final ARRA provisions are no longer eligible.

$41.6 M in funds for transit projects

- $32.5 M - directly to Anchorage and Fairbanks with a portion to the Alaska Railroad.
- $9.1 M for projects elsewhere in the state with funding going thru DOT&PF
- Transit funding can only be spent on capital expenditures such as:
  - Buses and bus stops and Administrative buildings
  - Passenger service and administrative vehicles

Department staff surveyed the universe of previous transit recipients to develop a "needs list". Two shovel-ready transit projects for construction have been identified; the remainder of the transit funds will be allocated to vehicles and related needs, based on existing transit scoring and criteria. All eligible organizations will be notified. The transit projects are also found on the attached spreadsheet.

EXECUTIVE OFFICE
TEL 907.265.2403
FAX 907.265.2312

The Honorable Bill Stoltze and Mike Hawker
House Finance Co-Chairs
Alaska State Legislature
State Capitol
Juneau, AK 99801-1182

Dear Representative Stoltze and Hawker:

The American Recovery and Reinvestment Act of 2009 (ARRA-09) may provide up to $26 million to the Alaska Railroad Corporation (ARRC) to pursue a number of shovel-ready passenger related projects that will create jobs and promote economic activity. The advent of federal "stimulus" funding and the Alaska Railroad's portion of "fixed guideway" formula funds have spurred a number of questions from our employees, legislators, customers and interested citizens.

We intend to share the following information (which has been thoroughly researched) with the public and our employees through internal and external newsletters in the near future. In the meantime, we thought you might also appreciate this summary information. Please distribute this correspondence to legislative colleagues as you see fit.

Questions and Answers about ARRA-09 Funding for the Alaska Railroad

Where does the ARRC funding come from?
ARRC stimulus money is added to an existing pot of annual federal agency funding. The Alaska Railroad will receive additional money through the Federal Transit Administration (FTA) Section 5307 Urbanized Area Formula funds.

What are the criteria for receiving this funding?
FTA funds must be spent on passenger-related projects. The Alaska Railroad receives FTA funds each year to support scheduled public transportation services. To qualify, the ARRC reports to the National Transit Database its "fixed guideway" infrastructure (miles of rail) and the total miles that passenger railcars traveled while providing passenger transportation service. Information collected nationwide is used to allocate funds based upon an arithmetic apportionment "formula."

Does the railroad compete with other Alaskan transportation infrastructure?
No. Different pots of money are reserved for different types of "fixed guideway" infrastructure. For example, money for highway projects will come to the Alaska Department of Transportation (ADOT) by way of the Federal Highway Administration (FHWA). Stimulus money funneled through FHWA to ADOT will not be impacted by FTA money allocated to the Alaska Railroad and vice versa.

Does the railroad compete with other Alaska public transit providers?
No. Local public bus system providers – such as Anchorage's People Mover – will not be impacted by money allocated to the railroad. Some confusion exists because FTA Section 5307 funding includes a Bus Tier and a Fixed Guideway Tier. "Fixed guideway" refers to any transit service that uses exclusive or controlled rights-of-way or rails (such as rail, trolley, tram and even high-occupancy vehicle lanes [HOV] lanes). ARRC does not operate busses and therefore is not eligible for Bus Tier funding. On the other hand, the Alaska Railroad is the only fixed guideway in Alaska at this time, and therefore, the only eligible system for FTA 5307 Fixed Guideway funding.

Where can funds be spent?
FTA allocates ARRC's entitlement to its 5307 funding to the Anchorage urban area as a matter of convenience. Then, ARRC can spend FTA funds on passenger related projects pretty much anywhere along the rail system because formula fund eligibility is determined using system-wide infrastructure and passenger services data.

What will funds be spent on?
ARRA-09 stipulations require funds to be must be spent on projects that improve infrastructure, safety and passenger facilities. Eligibility includes depot and rail improvements in Seward, Talkeetna, Anchorage and Fairbanks, as well as system-wide track rehabilitation, and the congressionally mandated collision avoidance system. During a regular meeting April 1, 2009, the Alaska Railroad Board of Directors will consider specific projects in light of ARRA-09 and FTA mandates. Selected projects and project details will be posted on the railroad's web site (www.AlaskaRailroad.com) immediately following the Board decision. Information availability underscores the Alaska Railroad's commitment to meeting federal and public expectations for transparency and accountability.

If you have any additional questions, or would like me to further the dialogue in Juneau via in-person meetings or committee testimony, please do not hesitate to call, 265-2403. Please also feel free to coordinate further communication through our Assistant Vice President of Corporate Affairs Wendy Lindskoog, 265-2498.

Respectfully,

Patrick K. Gamble

Support Letters

PORT OF ANCHORAGE

February 24, 2009

Senator Bert Stedman, Co-Chair
Senate Finance Committee
State Capitol 516
Juneau, AK 99801

Senator Lyman Hoffman, Co-Chair
Senate Finance Committee
State Capitol 518
Juneau, AK 99801

Representative Bill Stoltze, Co-Chair
House Finance Committee
State Capitol 515
Juneau, AK 99801

Representative Mike Hawker, Co-Chair
House Finance Committee
State Capitol 505
Juneau, AK 99801

Dear Senators Stedman and Hoffman and Representatives Stoltze and Hawker:

I would like to take this opportunity to address an item that was included in the American Recovery and Reinvestment Act (ARRA) that will be beneficial to port facilities.

It is important to understand the position that port facilities found themselves in regards to the ARRA. Under current federal law and programs, there is no oversight agency or formulary for funding ports, as there is for highways, rail, transit, and air. Automatically, critical infrastructure, such as ports, which provide substantial economic benefit to our regions, states, and nation were left out of the federal stimulus legislation. Fortunately, an opportunity did arise in which port facilities were recognized and eligible for funding under the ARRA.

Federal Highway Administration-Surface Transportation Program:
In the final version of ARRA signed into law by President Obama, language was included in the Surface Transportation section that allows ports to be eligible for the funds dispersed to the state under the formulary Surface Transportation Program, without the requirement of the project being included in the Statewide Transportation Plan (STIP) or local Metropolitan Planning Organization (MPO) Transportation Improvement Plan (TIP). Enclosed with this letter is the language as it appears in the act, as well as the statutory reference that describes port facilities that are eligible for funding. The Port of Anchorage meets the statutory definition of an eligible project, and should be considered for funding made available to the State of Alaska.

I am aware that Governor Palin will introduce legislation this week that will set forth her priority projects for stimulus funding, as well as a separate list of priorities in the event that the State receives additional funds due to the "Use it or Lose it" clause of the ARRA.

I am requesting that the Port of Anchorage expansion project be included on the list of projects to receive stimulus funds. If we cannot be on the primary list, then I respectfully request that the project be listed in the secondary list, eligible for funding that the State may receive due to the "Use it or Lose it" provision.

This is essentially the Port's "one shot" at putting stimulus dollars to work on a fully permitted and statewide beneficial project. I stand by ready to provide any and all information on the Port of Anchorage expansion project including the number of jobs, both short term and long term, that will be created, and the estimated positive economic impact that will be realized with the completion of the project.

I fully understand the complexity of the federal legislation, as well as the position that you, as leadership of the Senate and House are in to put together the most comprehensive package you can to meet the intent of the ARRA. There are many qualified projects that will be put forth by communities around the state. I am sure that you will do due diligence to this funding package.

I will be in Juneau the week of March 9 and look forward to meeting with you at this time, if your schedules allow.

Thank you for your consideration of this information.

Sincerely,

Bill Sheffield
Director, Port of Anchorage

TITLE XII—TRANSPORTATION AND HOUSING AND URBAN DEVELOPMENT, AND RELATED AGENCIES

FEDERAL HIGHWAY ADMINISTRATION
HIGHWAY INFRASTRUCTURE INVESTMENT

For an additional amount for restoration, repair, construction and other activities eligible under paragraph (b) of section 133 of title 23, United States Code, and for passenger and freight rail transportation and port infrastructure projects eligible for assistance under subsection 601(a)(8) of such title, $27,500,000,000, to remain available through September 30, 2010: *Provided,* That, after making the set-asides required under this heading, 50 percent of the funds made available under this heading shall be apportioned to States using the formula set forth in section 104(b)(3) of title 23, United States Code, and the remaining funds shall be apportioned to States in the same ratio as the obligation limitation for fiscal year 2008 was distributed among the States in accordance with the formula specified in section 120(a)(6) of division K of Public Law 110–161: *Provided further,* That funds made available under this heading shall be apportioned not later than 21 days after the date of enactment of this Act: *Provided further,* That in selecting projects to be carried out with funds apportioned under this heading, priority shall be given to projects that are projected for completion within a 3-year time frame, and are located in economically distressed areas as defined by section 301 of the Public Works and Economic Development Act of 1965, as amended (42 U.S.C. 3161): *Provided further,* That 120 days following the date of such apportionment, the Secretary of Transportation shall withdraw from each State an amount equal to 50 percent of the funds awarded to that State (excluding funds suballocated within the State) less the amount of funding obligated (excluding funds suballocated within the State), and the Secretary shall redistribute such amounts to other States that have had no funds withdrawn under this proviso in the manner described in section 120(c) of division K of Public Law 110–161: *Provided further,* That 1 year following the date of such apportionment, the Secretary shall withdraw from each recipient of funds apportioned under this heading any unobligated funds, and the Secretary shall redistribute such amounts to States that have had no funds withdrawn under this proviso (excluding funds suballocated within the State) in the manner described in section 120(c) of division K of Public Law 110–161: *Provided further,* That at the request of a State, the

Secretary of Transportation may provide an extension of such 1-year period only to the extent that he feels satisfied that the State has encountered extreme conditions that create an unworkable bidding environment or other extenuating circumstances: *Provided further,* That before granting such an extension, the Secretary shall send a letter to the House and Senate Committees on Appropriations that provides a thorough justification for the extension: *Provided further,* That 3 percent of the funds apportioned to a State under this heading shall be set aside for the purposes described in subsection 133(d)(2) of title 23, United States Code (without regard to the comparison to fiscal year 2005): *Provided further,* That 30 percent of the funds apportioned to a State under this heading shall be suballocated within the State in the manner and for the purposes described in the first sentence of subsection 133(d)(3)(A), in subsection 133(d)(3)(B), and in subsection 133(d)(3)(D): *Provided further,* That such suballocation shall be conducted in every State: *Provided further,* That funds suballocated within a State to urbanized areas and other areas shall not be subject to the redistribution of amounts required 120 days following the date of apportionment of funds provided under this heading: *Provided further,* That of the funds provided under this heading, $105,000,000 shall be for the Puerto Rico highway program authorized under section 165 of title 23, United States Code, and $45,000,000 shall be for the territorial highway program authorized under section 215 of title 23, United States Code: *Provided further,* That of the funds provided under this heading, $60,000,000 shall be for capital expenditures eligible under section 147 of title 23, United States Code (without regard to subsection(d)): *Provided further,* That the Secretary of Transportation shall distribute such $60,000,000 as competitive discretionary grants to States, with priority given to those projects that demonstrate to his satisfaction their ability to be completed within 2 years of enactment of this Act: *Provided further,* That of the funds provided under this heading, $550,000,000 shall be for investments in transportation at Indian reservations and Federal lands: *Provided further,* That of the funds identified in the preceding proviso, $310,000,000 shall be for the Indian Reservation Roads program, $170,000,000 shall be for the Park Roads and Parkways program, $60,000,000 shall be for the Forest Highway Program, and $10,000,000 shall be for the Refuge Roads program: *Provided further,* That for investments at Indian reservations and Federal lands, priority shall be given to capital investments, and to projects and activities that can be completed within 2 years of enactment of this Act: *Provided further,* That 1 year following the enactment of this Act, to ensure the prompt use of the $550,000,000 provided for investments at

Indian reservations and Federal lands, the Secretary shall have the authority to redistribute unobligated funds within the respective program for which the funds were appropriated: *Provided further,* That up to 4 percent of the funding provided for Indian Reservation Roads may be used by the Secretary of the Interior for program management and oversight and project-related administrative expenses: *Provided further,* That section 134(f)(3)(C)(ii)(II) of title 23, United States Code, shall not apply to funds provided under this heading: *Provided further,* That of the funds made available under this heading, $20,000,000 shall be for highway surface transportation and technology training under section 140(b) of title 23, United States Code, and $20,000,000 shall be for disadvantaged business enterprises bonding assistance under section 332(e) of title 49, United States Code: *Provided further,* That funds made available under this heading shall be administered as if apportioned under chapter 1 of title 23, United States Code, except for funds made available for investments in transportation at Indian reservations and Federal lands, and for the territorial highway program, which shall be administered in accordance with chapter 2 of title 23, United States Code, and except for funds made available for disadvantaged business enterprises bonding assistance, which shall be administered in accordance with chapter 3 of title 49, United States Code: *Provided further,* That the Federal share payable on account of any project or activity carried out with funds made available under this heading shall be, at the option of the recipient, up to 100 percent of the total cost thereof: *Provided further*, That funds made available by this Act shall not be obligated for the purposes authorized under section 115(b) of title 23, United States Code: *Provided further,* That funding provided under this heading shall be in addition to any and all funds provided for fiscal years 2009 and 2010 in any other Act for ''Federal-aid Highways'' and shall not affect the distribution of funds provided for ''Federalaid Highways'' in any other Act: *Provided further,* That the amount made available under this heading shall not be subject to any limitation on obligations for Federal-aid highways or highway safety construction programs set forth in any Act: *Provided further,* That section 1101(b) of Public Law 109–59 shall apply to funds apportioned under this heading: *Provided further,* That the Administrator of the Federal Highway Administration may retain up to $40,000,000 of the funds provided under this heading to fund the oversight by the Administrator of projects and activities carried out with funds made available to the Federal Highway Administration in this Act, and such funds shall be available through September 30, 2012.

Title 23-Highways
Chapter 6-Infrastructure Finance
As referenced in ARRA

TITLE 23 - HIGHWAYS
CHAPTER 6 - INFRASTRUCTURE FINANCE

Sec. 601. Generally applicable provisions
(a) Definitions. - In this chapter, the following definitions apply:

(1) Eligible project costs. - The term "eligible project costs" means amounts substantially all of which are paid by, or for the account of, an obligor in connection with a project, including the cost of -

(A) development phase activities, including planning, feasibility analysis, revenue forecasting, environmental review, permitting, preliminary engineering and design work, and other preconstruction activities;

(B) Construction, reconstruction, rehabilitation, replacement, and acquisition of real property (including land related to the project and improvements to land), environmental mitigation, construction contingencies, and acquisition of equipment; and

(C) Capitalized interest necessary to meet market requirements, reasonably required reserve funds, capital issuance expenses, and other carrying costs during construction.

(2) Federal credit instrument. - The term "Federal credit instrument" means a secured loan, loan guarantee, or line of credit authorized to be made available under this chapter with respect to a project.

(3) Investment-grade rating. - The term "investment-grade rating" means a rating of BBB minus, Baa3, or higher assigned by a rating agency to project obligations.

(4) Lender. - The term "lender" means any non-Federal qualified institutional buyer (as defined in section 230.144A(a) of title 17, Code of Federal Regulations (or any successor regulation), known as Rule 144A(a) of the Securities and Exchange Commission and issued under the Securities Act of 1933 (15 U.S.C. 77a et seq.)), including

(A) a qualified retirement plan (as defined in section 4974(c) of the Internal Revenue Code of 1986) that is a qualified institutional buyer; and

(B) a governmental plan (as defined in section 414(d) of the Internal Revenue Code of 1986) that is a qualified institutional buyer

(5) Line of credit. - The term "line of credit" means an agreement entered into by the Secretary with an obligor under section 604 to provide a direct loan at a future date upon the occurrence of certain events.

(6) Loan guarantee. - The term "loan guarantee" means any guarantee or other pledge by the Secretary to pay all or part of the principal of and interest on a loan or other debt obligation issued by an obligor and funded by a lender.

(7) Obligor. - The term "obligor" means a party primarily liable for payment of the principal of or interest on a Federal credit instrument, which party may be a corporation, partnership,joint venture, trust, or governmental entity, agency, or instrumentality.

(8) Project. - The term "project" means

(A) any surface transportation project eligible for Federal assistance under this title or chapter 53 of title 49

(B) a project for an international bridge or tunnel for which an international entity authorized under Federal or State law is responsible;

(C) a project for intercity passenger bus or rail facilities and vehicles, including facilities and vehicles owned by the National Railroad Passenger Corporation and components of magnetic levitation transportation systems; and

(D) a project that –

(i) is a project –

(I) for a public freight rail facility or a private facility providing public benefit for highway users;

(II) for an intermodal freight transfer facility;

(III) for a means of access to a facility described in subclause (I) or (II);

(IV) for a service improvement for a facility described in subclause (I) or (II) (including a capital investment for an intelligent transportation system); or

(V) that comprises a series of projects described in subclauses (I) through (IV) with the common objective of improving the flow of goods

(ii) may involve the combining of private and public sector funds, including investment of public funds in private sector facility improvements; and

(iii) if located within the boundaries of a port terminal, includes only such surface transportation infrastructure modifications as are necessary to facilitate direct intermodal interchange, transfer, and access into and out of the port.

(9) Project obligation. - The term "project obligation" means any note, bond, debenture, or other debt obligation issued by an obligor in connection with the financing of a project, other than a Federal credit instrument.

(10) Rating agency. - The term "rating agency" means a credit rating agency registered with the Securities and Exchange Commission as a nationally recognized statistical rating organization, as that term is defined in section 3(a) of the Securities Exchange Act of 1934.

(11) Secured loan. - The term "secured loan" means a direct loan or other debt obligation issued by an obligor and funded by the Secretary in connection with the financing of a project under section 603.

(12) State. - The term "State" has the meaning given the term in section 101.

(13) Subsidy amount. - The term "subsidy amount" means the amount of budget authority sufficient to cover the estimated long-term cost to the Federal Government of a Federal credit instrument, calculated on a net present value basis, excluding administrative costs and any incidental effects on governmental receipts or outlays in accordance with the provisions of the Federal Credit Reform Act of 1990 (2 U.S.C. 661 et seq.).

(14) Substantial completion. - The term "substantial completion" means the opening of a project to vehicular or passenger traffic.

(b) Treatment of Chapter. - For purposes of this title, this chapter shall be treated as being part of chapter 1.

ANALYSIS: *(Attach a separate page if necessary)*

This legislation acts to extend the Retiree Return to Work Program for retired teachers and public employees until June 30, 2013. The actuarial consultant has determined there is no effect on employer contribution rates. The Retiree Return to Work Program requires employers to make contributions to both systems based on the rehired retiree's wage at the rate prescribed by the actuary to pay the unfunded liability of the systems.

This bill would move certain exempt DNR positions in the Division of Oil and Gas and the Division of Geological and Geophysical Surveys from AS 39.25.110(9) (special inquiry, studies, and examinations) to subsection AS 39.25.110(14) which addresses certain professional oil and gas positions.

No fiscal impact is anticipated. These positions are already funded as exempt positions and in most cases, filled.

CS FOR HOUSE BILL NO. 157( )

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SIXTH LEGISLATURE - FIRST SESSION

BY

Offered:
Referred:

Sponsor(s): HOUSE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

A BILL

FOR AN ACT ENTITLED

"An Act amending the State Personnel Act to place in the exempt service the state comptroller in the Department of Revenue; relating to reemployment of and benefits for or on behalf of reemployed retired teachers and public employees; amending the effective date of secs. 3, 5, 9, and 12, ch. 57, SLA 2001, and sec. 3, ch. 50, SLA 2005; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 14.20.135(a) is amended to read:

(a) A school district or regional educational attendance area that has or anticipates having a shortage of teachers qualified to teach in a particular discipline or specialty may, **subject to AS 14.25.043(f)** [BY RESOLUTION], adopt**, by resolution,** a policy that permits the employment of retired teachers **who have been separated from employment for at least 90 days and** who are qualified to teach in the discipline or specialty in accordance with this section. The policy must describe

the circumstances that constitute the shortage. If a shortage of teachers exists as described in the policy, the district or attendance area shall notify the administrator of the teachers' retirement system (AS 14.25) that it is hiring retired teachers under this section.

*** Sec. 2.** AS 14.25.043 is amended by adding a new subsection to read:

(f) Notwithstanding (b) and (e) of this section and AS 14.25.135, an employer that is a school district or regional educational attendance area may not allow a member hired to fill a position that requires recruitment to make the election provided in (b) or (e) of this section unless

(1) the employer conducted an initial recruitment for the position for at least 15 days that resulted in fewer than three qualified, eligible, and available applicants, including the retired member; and

(2) the employer then conducted an additional recruitment for the position and the additional recruitment resulted in fewer than three qualified, eligible, and available applicants, including the retired member; the additional recruitment period required by this paragraph added to the initial recruitment period in (1) must total not fewer than 30 days.

*** Sec. 3.** AS 39.25.110 is amended by adding a new paragraph to read:

(43) the state comptroller in the Department of Revenue.

*** Sec. 4.** AS 39.35.150(g) is amended to read:

(g) In accordance with this section, a political subdivision or a public organization that has or anticipates having a shortage of employees qualified for particular job classes may, by resolution, adopt a policy that permits the employment of employees who retired under AS 39.35.370(a), who have been separated from employment for at least **90** [30] days, and who are qualified for particular job classes. The policy adopted by resolution must describe the circumstances that constitute the shortage. The policy must require recruitment procedures [SIMILAR TO THE PROCEDURE] described in (h) of this section for any position filled by a retired employee under (f) of this section. If a shortage of qualified employees exists as described in the policy, the political subdivision or the public organization shall notify the administrator that it is hiring retired members under (f) of this section and shall

provide a copy of the resolution and policy adopted by the resolution to the administrator of the public employees' retirement system (AS 39.35).

*** Sec. 5.** AS 39.35.150(h) is amended to read:

(h) Notwithstanding (b) of this section, an employer [IN THE EXECUTIVE BRANCH OF STATE GOVERNMENT] may not allow a member hired to fill a position that requires recruitment to make the election provided in (b) of this section unless

(1) the employer conducted an initial recruitment for at least 15 days for the position to be filled by the member making an election under (b) of this section that resulted in fewer than **three** [FIVE] qualified, eligible, and available applicants, including the retired member; and

(2) the employer then conducted an additional recruitment and the additional recruitment resulted in fewer than **three** [FIVE] qualified, eligible, and available applicants, including the retired member; this additional recruitment period added to the initial recruitment period must be at least 30 days total.

*** Sec. 6.** Section 12, ch. 57, SLA 2001, as amended by sec. 6, ch. 15, SLA 2003, and by sec. 10, ch. 50, SLA 2005, is amended to read:

Sec. 12. AS 14.20.135, as amended by sec. 2**, ch. 50, SLA 2005** [OF THIS ACT]; AS 14.25.043(b), as amended by sec. 4**, ch. 50, SLA 2005** [OF THIS ACT], 14.25.043(e), added by sec. 3, ch. 15, SLA 2003, and as amended by sec. 5**, ch. 50, SLA 2005** [OF THIS ACT]; AS 39.35.120(b)(2), 39.35.150(b), as amended by sec. 4, ch. 15, SLA 2003, and by sec. 7**, ch. 50, SLA 2005** [OF THIS ACT], and 39.35.150(c) are repealed July 1, **2010** [2009].

*** Sec. 7.** Section 12, ch. 50, SLA 2005, is amended to read:

Sec. 12. **AS 14.25.070(e)** [AS 14.25.070(b)]; AS 39.35.150(f), 39.35.150(g), 39.35.150(h), and **39.35.255(e)** [39.35.270(b)] are repealed July 1, **2010** [2009].

*** Sec. 8.** AS 39.25.120(c)(10) is repealed.

*** Sec. 9.** The uncodified law of the State of Alaska is amended by adding a new section to read:

CONDITIONAL RETROACTIVITY. If secs. 6, 7, 10, and 11 of this Act take effect after July 1, 2009, secs. 6, 7, 10, and 11 of this Act are retroactive to July 1, 2009.

* **Sec. 10.** Section 15, ch. 57, SLA 2001, as amended by sec. 17, ch. 50, SLA 2005, is amended to read:

Sec. 15. Sections 3, 5, 9, and 12 of this Act take effect July 1, **2010** [2009].

* **Sec. 11.** Section 19, ch. 50, SLA 2005, is amended to read:

Sec. 19. Section 3 of this Act takes effect July 1, **2010** [2009].

* **Sec. 12.** This Act takes effect immediately under AS 01.10.070(c).

SPONSOR STATEMENT
HB 157 Reemployment of Retirees; Exempt Service

HB 157 Reemployment of Retirees; Exempt Service contains three personnel topics regarding state employment. First, extending the sunset provision of the "retire/rehire" employment provision would allow state entities to hire retired employees into existing positions. Second, the Department of Revenue is requesting that two professional positions be made "exempt" for the purposes of allowing flexibility in recruitment and paying market value. Third, certain professional positions concerning oil and gas within the Department of Natural Resources are requested to be made "exempt" for flexibility in recruitment and paying market value.

Each of the portions of the bill are presented in order of the bill:

Department of Revenue – Exempt Positions
Two positions in the Department of Revenue have been difficult to fill and retain because the department cannot offer market pay. The state comptroller oversees billions of dollars and coordinates the state's accounts with national banking agencies. This position is currently partially-exempt, meaning that it is not governed by collective bargaining but that it must be paid within a state salary scale. This position has turned over every year for the past four years due to more appealing private-sector offers accepted by the incumbents. The chief economist position is a classified position and has been open for recruitment for approximately one year. Although one of the division's lead economists is filling this position in acting status, the department is seeking an economist who can speak with experience and authority on Alaska's global petroleum economics.

Department of Natural Resources – Exempt Positions
The division of oil and gas and the division of geological and geophysical survey of the Department of Natural Resources (DNR) are responsible for assessing the state's mineral resources, overseeing the assessment and collection of a large portion of the state's revenues related to oil and gas development, as well as management of the state's oil and gas resources. DNR, through these divisions, must maintain an experienced and professional staff as well as recruit new staff. Without exempt status the State cannot be competitive with industry in hiring the best and most experienced employees in areas where that experience can mean millions of dollars in revenue to the employer.

Retire/Rehire Sunset Extension
Legislation was passed in 2005 that allows for the rehire of certain PERS and TERS employees who retired with a normal retirement. These rehires can continue to receive normal retirement benefits by waiving further participation in the retirement systems. This legislation is scheduled to sunset on July 1, 2009.

In a report provided to the legislature on February 6, 2009, the number of waivers in the retire/rehire program in 2008 were 62 PERS and 85 TERS participants. While the number of participants are seemingly low, these individuals play a vital role in the communities where they are employed. Many rural communities and school districts have benefited from the retire/rehire program to retain retirement eligible individuals in these hard-to-fill positions.

February 6, 2009

The Honorable Gary Stevens
Senate President
The Honorable Mike Chenault
House Speaker
25th Alaska State Legislature
State Capitol
Juneau, Alaska 99801-1182

Dear Mr. President and Mr. Speaker:

In 2005, the Twenty-Fourth Legislature enacted House Bill 161 relating to reemployment of retired members of the Teachers' (TRS) and Public Employees' Retirement Systems (PERS) to address a shortage of qualified applicants for teaching and public employment throughout the State of Alaska. Section 12 of this legislation will repeal the Retiree Return Program effective July 1, 2009, unless extended by the Legislature.

In accordance with Section 13 of this legislation, the Department of Administration has prepared this report on the effect of this Act, as amended, on the retirement systems. This report is divided into two separate sections as outlined below:

- Section 1 includes information from the Division of Retirement and Benefits collected from the PERS and TRS employers and retirees participating in HB 161.

- Section 2 includes information from the Division of Personnel regarding the efforts by the State of Alaska to address recruitment difficulties experienced by the executive branch in specific job classes.

Please let me know if you have any questions about this report.

Sincerely,

Annette Kreitzer
Commissioner
Department of Administration

5028

Section 1
Division of Retirement and Benefits

HB 161 Background

Section 1 of this report was prepared by the Division of Retirement and Benefits. It includes information collected from the PERS and TRS employers and retirees participating in HB 161.

HB 161 was introduced April 5, 2005. This legislation allows the rehire of certain PERS and TRS employees who retired with a normal retirement. These rehires can continue to receive normal retirement benefits by waiving further participation in the retirement systems. During the period of reemployment, no contributions to PERS and TRS are required from the employee. HB 161 addressed concerns regarding the affect on rehiring retirees under this program on the funding of the retirement systems by requiring employers to make contributions toward their unfunded liability for each rehired retiree. Retirees that are rehired in a full-time position are also required to enroll in the employer's active health insurance plan. Retirees hired in full time positions under HB 161 have their retirement health insurance benefits suspended while reemployed. Prior to the passage of this legislation members who retired and then reemployed in a PERS or TRS participating position would have their retirement benefit stopped during the period of reemployment. The member would accrue an additional pension benefit for the second period of employment.

HB 161 also addressed retirees who reemployed under the prior Retiree Rehire Program enacted in 2001 by HB 242/SB149. An attorney general opinion issued in 2004 regarding the HB 242/SB 149, stating that retirees could not continue in employment without affecting their retirement benefits if they rehired prior to the sunset date. The Division notified all participants in the Retiree Rehire Program on November 3, 2004 of this interpretation. HB 161 provides retirees who reemployed prior to November 3, 2004 an extension of participation in the program to December 31, 2006. After that date, continued employment in the program would be contingent on meeting the requirements and conditions of HB 161.

Reporting

This report comprises a summary of the waiver activity for the Retiree Return program under HB 161 from January 1, 2008 to the last reporting period, December 31, 2008 for both the TRS and the PERS.

The information provided regarding participating employers for both the TRS and the PERS and the knowledge transfer plans received are a summary activity since the Retiree Return program became effective on July 1, 2005.

PERS Results

As of December 31, 2008, 30 out of 159 or (18%) of PERS employers have participated in the program with a total of 83 waivers filed with the Division of Retirement and Benefits. As of December 31, 2008, 25 out of 30 or 83% of participating employers have submitted a knowledge transfer plan.

The largest number of retirees rehired over 36 months from their termination and retirement. The second largest number of returned retirees were those who had been retired for 1-6 months. Positions filled with rehired retirees were varied.

Additional information regarding the PERS employers that have participated in the program and detailed information regarding the type of positions rehired is included in the statistical section of this report.

TRS Results

As of December 31, 2008, 34 out of 58 or (58.6%) of TRS employers have participated and 143 waivers were filed with the Division of Retirement and Benefits. As of December 31, 2008, 27 out of 34 or 79% of participating TRS employers have submitted a knowledge transfer plan. The largest number of returned retirees were those who had been retired for over 36 months. The second largest number of returned retirees were those who had been retired for 24-36 months. The largest number of positions rehired was general teachers with the second highest being Special Education teachers.

Additional information regarding the employers that have participated in the program and how they have participated is included in the statistical section of this report.

Financial Impact on the PERS and TRS Systems

HB 161 requires employers to make payments of employer contributions sufficient to cover any unfunded liability created by the program. Retirees who rehire under HB 161 in a full time position have their retiree medical benefits suspended for the period of reemployment.

Summary of Retiree Rehire Program - PERS (HB 161)

The following information summarizes the activity reported by employers to the Division of Retirement and Benefits from January 1, 2008 through December 31, 2008.

Total number of PERS employers	159
Total number of PERS employers participating in HB 161	30
Percentage of total PERS employers participating in HB 161	18%
Total number of PERS waivers active during 2008	62
Total number of employers submitting a knowledge transfer plan	25**

- Once an employer has submitted a resolution and policy to participate in the Retiree Rehire Program, the participation is valid until the program sunsets on June 30, 2009.
- ** The State of Alaska is not required to submit a knowledge transfer plan and is not included in this total.

Summary of Retiree Rehire Program - TRS (HB 161)

The following information summarizes the activity reported by employers to the Division of Retirement and Benefits from January 1, 2008 through December 31, 2008.

Total number of TRS employers	58
Total number of TRS employers participating in HB 161	34*
Percentage of total TRS employers participating in HB 161	58%
Total number of TRS waivers received	85
Total number of employers submitting a knowledge transfer plan	27

* Once an employer has submitted a resolution and policy to participate in the Retiree Rehire Program, the participation is valid until the program sunsets on June 30, 2009.

Section 2
Division of Personnel

Division of Personnel and Labor Relations
Retiree Rehire, HB 161 Legislative Report

Section 2 of this report has been prepared by the Division of Personnel & Labor Relations. This Section of the report focuses on the State of Alaska as the largest employer of the PERS system. It includes information on program activity and the efforts of the executive branch to address the recruitment difficulties in job classes in which retired members have been rehired.

House Bill (HB) 161 went into effect on July 1, 2005 and established three sunset dates for re-employed retirees, based upon the date of rehire. In extending the sunset dates of the retiree program, the legislature intended to allow public employers the ability to continue to use this management tool while developing plans to address the knowledge, skills, and abilities that need to be transferred or developed to assure the work can be accomplished following the departure of the retiree.

The final of the three sunset dates established under HB 161 is July 1, 2009 and applies to retirees re-employed on or after July 1, 2005. This group of retirees is eligible to remain employed under a PERS waiver through June 30, 2009. The table below denotes the number of retirees currently employed in the executive branch by agency.

Department*	DMVA	DOC	DNR	F&G	H&SS	Law	DPS	DOT/PF
Classified	1	1	0	9	2	0	1	5
Exempt/Partially Exempt	0	2	1	1	0	3	2	1

*The following departments do not currently employ retirees: Administration, Revenue, Labor & Workforce Development, Education & Early Development, Commerce, Community & Economic Development and Environmental Conservation

To ensure consistent application of the retiree program as intended by the Legislature and compliance with HB 161, the Department of Administration issued a Retiree Rehire Policy (Addendum A) which replaced Administrative Order 225. As with the Administrative Order, the Retiree Rehire Policy placed "side boards" on this program by providing certain criteria that must be met prior to the appointment of a retiree to a position within the classified service.

To make the most effective use of the retiree return program as a management tool, HB 161 requires the hiring authority to work with the Division of Personnel & Labor Relations to develop a plan that addresses efforts to reduce the recruitment difficulties in job classes in which retirees have been hired. The development plan addresses:

- the critical components of the position;

- the knowledge, skills, and abilities that need to be developed in the workplace to assure that the work can be accomplished when the rehired retiree leaves state service; and

- a development plan for accomplishing the transfer of knowledge.

The Division of Personnel & Labor Relations offers a presentation on developing knowledge transfer plans. The presentation addresses identifying the critical components of the job, the knowledge, skills and abilities required to perform the critical components of the job, conducting a skill gap analysis, and finally, developing the knowledge transfer plan. A knowledge transfer plan can be as simple as developing a desk manual for less complex positions, or as detailed as an intensive training program. The division's service centers are available to provide guidance throughout the process.

To date, the director of the Division of Personnel & Labor Relations has received and approved knowledge transfer plans for16 of the 19 classified positions filled by an employee working under a PERS waiver in the retiree/return program. The remaining three have been notified of the requirement to complete.

In an effort to address issues concerning recruitment and retention Governor Palin signed Administrative Order 237 on August 24, 2007. This Administrative Order established an Executive Branch Working Group comprised of six Commissioners and the Director of the Office of Management and Budget to make recommendations regarding recruitment and retention of state employees in the executive branch and efficiencies that the State of Alaska will need to make to address the smaller workforce available to it. The recommendations of the Executive Working Group are attached (Addendum B) in addition to a status update (Addendum C).

The Division of Personnel & Labor Relations will continue to explore opportunities to increase retention and mitigate recruitment difficulties.

Memorandum

Department of Administration
Office of the Commissioner

To: All Commissioners

Date: September 11, 2006

From: Scott J. Nordstrand
Commissioner

Phone: 465-5671

Subject: Retiree Rehire Policy – HB 242 / 161

This memo is intended to respond to questions that have arisen regarding the guidelines for employees who were or are rehired in accordance with House Bills 242 and 161. You may be aware that the extension of HB 242 which was introduced last session as HB 161 (retiree return program) generated some angst with several legislators. In order to address the concerns raised by legislators so that agencies could continue to offer this program as a management tool, Governor Murkowski adopted Administrative Order 225 in March of 2005.

Administrative Order 225 acted to place "side boards" on this program by providing certain criteria that must be met with the appointment of rehired retirees to positions in the classified service under HB 242. However, with the sunset of HB 242 and the passage of HB 161, Administrative Order 225 is no longer operative. Therefore, to ensure consistent application of the retiree rehire program as intended by the legislature and compliance with HB 161, this memo has been hereby formalized into policy as outlined below.

A retiree who intends to seek a PERS waiver may be appointed to a position in the classified service if:

- an open competitive recruitment process is conducted for at least 30 days and results in an applicant pool of fewer than five qualified, eligible, and available applicants;
- all qualified, eligible and available applicants are considered;
- the hiring authority demonstrates why no other applicant will have the knowledge, skills, or ability to perform the duties of the position after serving the full probationary period; and
- the retiree has served a thirty-day separation with the PERS. If the employee currently is covered under HB 242, a second thirty-day separation will not be required if the employee is later appointed under HB 161. However, if the employee has not been rehired under HB 242 and has not served the initial thirty-day separation, a thirty-day separation will be required.

Approval to hire a retiree who intends to seek a PERS waiver must be secured in writing from the Director of the Division of Personnel prior to an offer of employment. Within 60 days after receipt of the Director's approval and acceptance of the position by the retiree, the hiring authority shall work with the Division of Personnel to develop a plan that addresses:

- the critical components of the position;
- the knowledge, skills, and abilities that need to be developed in the workplace to assure that the work can be accomplished when the rehired retiree leaves state service; and
- a development plan for accomplishing the transfer of knowledge.

Completed plans shall be submitted to the Director of the Division of Personnel for approval.

Questions regarding this policy may be addressed to your department's Division of Personnel, Management Services Consultant. Additional information on the application of this policy and HB 161 is available on the Division of Personnel's website.

Executive Working Group
FINAL Report to Governor Sarah Palin
Administrative Order No. 237
Recruitment and Retention of State Employees

I. INTRODUCTION:

Governor Sarah Palin signed Administrative Order No. 237 (AO 237) August 24, 2007. The order established an Executive Branch Working Group to address issues concerning recruitment and retention of State employees in the executive branch. The Working Group was tasked with researching and addressing the issue and providing the Governor with recommendations concerning the findings of the order.

A. The Working Group:

A Working Group, composed of seven members appointed by the commissioner of the Department of Administration was assembled to address recruitment and retention issues. The Working Group members included:

- Department of Administration, Commissioner Annette Kreitzer, chairman;
- Office of Management and Budget, Director Karen Rehfeld;
- Department of Health and Social Services, Commissioner Karleen Jackson;
- Department of Public Safety, Commissioner Walt Monegan;
- Department of Environmental Conservation, Commissioner Larry Hartig;
- Department of Labor and Workforce Development, Commissioner Click Bishop;
- Department of Transportation and Public Facilities, Commissioner Leo von Scheben.

The members' combined experience and accumulated knowledge from 75 plus years working in government service and over 75 years in the private sector ensured a broad-based approach to examining the recruitment and retention situation.

Meetings:

The Working Group held a total of four meetings during September and October. In the short time the Group met, we reviewed current State employee turnover rates that were at 16% in 2006, representing the mid-range for states responding to our request for information. As with other states and the private sector, more troubling is the number of State

employees eligible to retire now and in the next five years, and what that might portend for the State's ability to retain experienced, professional employees to balance and mentor less senior employees.

B. Input:

The Working Group polled the Commissioners from each State department for their views on the current status of recruitment and retention of State employees. Each labor union business manager was contacted and requested to give input. Hiring managers throughout State government, who are on the front lines of hiring decisions and frustrations with the current system of employee recruitment, were canvassed for their ideas and comments. The information gathered from the responses was compiled into a spread sheet which organized the data into categories.

The Working Group specifically requested suggestions without a monetary component, but recognizes there are some solutions that are in the monetary category. The State is faced with employee retention issues on both ends of the spectrum from recruitment to retaining knowledgeable, professional employees. The Working Group identified suggestions to quickly impact a majority of problems brought on by a tight salary schedule and personnel rules. Negotiating fair labor contracts is one piece of the financial puzzle, removing an outdated "longevity" step concept is another. These details are included under, "E. Financial Incentives".

C. Supplemental Data:

Appendices include Administrative Order No. 237, State Employee Unions summary sheet and statistics about State employees excluding the University of Alaska, the Legislature and the Court System. Our efforts were focused only on the Executive Branch departments represented at the Cabinet level.

II. IDENTIFY ISSUES AND PROPOSALS:

AO No. 237 charged the Working Group with identifying the recruitment and retention situation, the costs involved in training, changes that will allow the State to effectively serve its citizens while limiting expansion, opportunities for partnering and cross-training and cost neutral or low-cost solutions to increase worker satisfaction.

A. Costs of training new State employees:

Training costs are a significant expenditure for State agencies.

- A recent federal Department of Labor Study shows that turnover costs one-third to one-half times the annual salary of the employee, not including productivity loss.
- The State must clearly define a training/education track tied to proficiency and advancement in a job series. Some level of mandatory supervisory or other training might be necessary.
- The State may need to provide education incentives and professional development in an effort to provide career-long learning opportunities. The practice of providing education incentives among state agencies is currently inconsistent. The Working Group requested and is awaiting a survey of all departments showing what training and education the State currently pays for and what departments believe would be reasonable for the State to undertake.
- We recommend analyzing the cost of a tuition reimbursement and student loan forgiveness program with payback obligations tied to time on the job, based on a sliding percentage from zero to five years.
- Many departments have commented that the State has become a training ground for other prospective employers. By retaining employees longer with fair contracts and other potential financial considerations, we will lower our total cost of training.

B. Changes that restrain growth of government:

Even with significantly higher oil prices, today's production is only about one-third of what it used to be.

- The State must focus on the highest priorities by division and department to live within our means.
- Contracting some work out where appropriate, should be considered. This currently requires a feasibility study and could require revision to labor contract language.
- The State spends hundreds of millions of dollars on technology to improve and make public documents more accessible. Some of this technology will automate processes meaning that fewer employees will be needed to manually enter data like timesheets. The State needs to plan with these employees an exit strategy to other available State jobs.

C. Opportunities to cross-train within and encourage efficiencies:

The State cannot continue to heavily rely on retirees to return to work as a stop-gap measure to training new employees.

- Develop and implement knowledge transfer plans for soon to be retiring employees.
- High turnover positions must have a "desk manual" to ensure that the most basic information of the position is available when a new employee is hired. Documenting a high turnover position's responsibilities cuts down on the amount of time spent explaining the duties.
- From hiring managers on up, there must be a frank understanding that many entry level jobs will have high turnover. Accepting this and planning for it, while encouraging entry level employees to move up on a State career ladder, will help retention overall.

D. Cost-neutral or low-cost solutions to increase workplace satisfaction:

The State should continue to encourage work/life scheduling flexibility. Hiring managers particularly noted these suggestions related to flexible work schedules and recruitment efforts:

- Broader use of alternate work weeks (4-10's, 9-80's). Some departments are using flexible work schedules but this could be done on a more consistent basis.
- Encourage consideration of broader use of telecommuting and job sharing agreements. An approach could require employees to complete one year on the job in the office location, and be in the office several days a week as part of a telecommuting plan.
- Establish employee recognition and appreciation programs as part of a statewide culture. Department programs should complement the Governor's Statewide Denali Peak Performance Program. Many Commissioners commented that they look for opportunities to recognize excellent customer service or project work by employees.
- Initiate a health and fitness program as part of the State health benefit package. This could pay for itself over time through healthier employees, less sick leave usage, etc. We will need to work with and coordinate with union health trusts on this issue.
- Provide sabbaticals without a break in service or interruption of health benefits. For example, one month after 10 years, three months after 20 years. These could be used in conjunction with

annual leave for continuing education, travel, or just "recharging their batteries".

III. EVALUATE AND RECOMMEND:

The Working Group was charged with evaluating the hiring criteria and practices, education requirements and minimum qualifications, recruitment tools and whether there are ways to improve upon the merit principle to provide better incentives and retain quality employees.

A. Current hiring criteria and practices:

It will take time to inculcate the ideas we believe will result in efficiencies in the State's hiring practices. The processes in place have resulted from years of patchwork attempts to incrementally fix personnel system deficiencies.

- Revamp the classification process and review adequacy of classification resources in the Division of Personnel and Labor Relations to get through all current and backlogged requests and to be more responsive and proactive to workforce changes.
- Conduct a review of the classification system. Review all job classes, update and consolidate with more generic job classes. Minimize or eliminate single-position job classifications.
- Solicit input from younger workers on what it takes to attract, retain, and satisfy the new generation of workers.
- Encourage a broader use of flexibly classed positions, with easier movement between levels in a job series (i.e. I-II-III). (Current list is included in appendices.)
- Review the effectiveness of the HR integration. This should be scheduled in 2008. There continues to be some concern about the impact of the Human Resources integration and its impact on some departments.

B. Current education requirements and minimum qualifications for state employment:

The State needs to be more flexible in its efforts to attract qualified job candidates. The Working Group acknowledges that not every location in the State is having the same challenges drawing applicants.

- Change minimum qualifications to broaden applicant pools. This is not a "dumbing down" of the applicant pools as suggested by some, but a more strategic approach to actual job requirements.

Some examples include removal of a specific degree requirement (i.e. accounting, biology), and replacing with a general degree with a certain number of field-specific credit hours. Specific degree requirements could also be replaced by technical certification or demonstrated expertise. Several departments requested a minimum qualification waiver process.

C. Recruitment tools:

The Workplace Alaska recruitment portal needs to be changed to be more comparable to and competitive with links like monster.com and dice.com – this old technology is not attractive and does not present the State as a progressive, interesting employer. This change will require more planning as it will impact the Online Public Notice system.

- In the short term, we should enable applicants to post resumes on Workplace Alaska similar to other employment websites.
- Each department should have a web link to jobs available on its main website.
- Formalize employee surveys; upon initial hire, after one month, and/or at a minimum an exit survey upon termination. Some suggested making exit interviews mandatory.
- Encourage broader use of internship program. Partner with the University of Alaska on an apprenticeship program. Streamline internship classification with greater flexibility in I-IV levels.

D. Improvements to Merit System:

Efforts should be made to recognize exceptional work and eliminate barriers to employment and promotional opportunities.

- Provide more discretion for increased pay based on performance. Base performance incentives and service steps on the performance evaluations. Use steps (b) through (f) for performance incentives and steps beyond (f) for service steps. This recommendation cannot work if there is not a concomitant effort to prepare proper evaluations.
- Eliminate pay barriers that discourage employees from taking promotions, i.e. not enough pay for the added work and responsibility, loss of over-time pay, if applicable, etc.
- Expand our ability to promote existing employees. In some cases it is easier to hire a new State employee at an advanced step (based on recruitment difficulty or exceptional qualifications).

- Analyze the effectiveness of continued use of market-based pay adjustments. This process addresses specific pay issues but disrupts internal alignment and creates supervisor differentials.

E. Financial Incentives:

In certain areas, the State has become a training ground for the federal government. There is a 24% Alaska cost of living differential between the Federal and State governments that exacerbates this problem.

State labor contracts recently concluded will mean:

1. The 7,920 members of the General Government Unit (GGU) of Alaska State Employees Association will receive a 4% retroactive pay increase contingent on legislative appropriation. The 4% is retroactive to July 1, 2007, followed by 3% increases in FY08 and FY09.
2. The Teachers' Education Association of Mt. Edgecumbe ratified an agreement of a 3% retroactive raise in FY07, followed by 3% in FY08 and 3% in FY09.
3. Labor, Trades and Crafts, Local 71, has ratified an agreement for a two-year contract which includes a 5% increase in FY08 and 2% increase in FY 09. (about 1600 members)
4. Alaska Public Employees Association, bargaining on behalf of the Confidential Employees Association (195 members) ratified an agreement with the State on a three-year contract beginning July 1, 2007 which includes a 4% wage increase on that date, followed by a 3% increase beginning July 1, 2008 and a 3% increase beginning July 1, 2009.

In addition to the monetary components of union contracts the State is a party to, the State makes annual contributions on behalf of each employee to the Public Employee's Retirement System and the Teacher's Retirement System. In the FY09 budget, the State's share of this responsibility for all State employees (union and nonunion) is about $340 million.

The Working Group agrees that we cannot solve, in this fiscal year, all of the inequities that may have built up over time to make the State a less competitive employer. There are concrete steps that can be taken however, some of which will have long lasting effects:

- Eliminate the outmoded longevity steps where employees go years without a pay adjustment. What was meant as an inducement to retain employees has become a barrier to hiring and promoting professional employees. Removing the barrier can be accomplished in some labor contracts, but the statute (AS 39.27.022) must be updated as employees hired at an advanced step are often frozen at that pay range for up to seven years since the system does not recognize private or other government experience. The removal of this barrier would allow the State to recognize experience and provide merit increments in shorter spans of time. Currently, some employees must wait four, nine and 13 years for a pay increase.
- Salaries for the so-called "non-covereds" or non-union State employees will be impacted by the above action in addition to any changes made to the statutory salary schedule to reflect changes negotiated with union employees.
- HB 98 (CHAPTER 53 SLA 05) increased salaries of commissioners among others, but neglected to include deputy commissioner salaries. For a supervisory track beginning with a new single job classification of Administrative Services Manager, which could lead to promotion to a Deputy Division Director and then to Division Director, the Working Group recommends the following structure. We also recognize that professional job classifications within each agency also provide career tracks to director and other management positions. Any changes to existing positions resulting in increases will be absorbed by existing budgets.

Position	Previous	Current	Proposed	Comment
Commissioner	28E	28-30	No change	AS 39.20.080(a)
Deputy Commissioner		28 A-F	28-29	AS 39.20.080(b) requires legislation to increase
Assistant Commissioner		27	27-28	Not widely used, but can be helpful for very large agencies (e.g., HSS)
Division Director	26	27	No change	Increased Nov. 2006
Deputy Director		23	24 or 25	Implement in FY08-no legislation required
Assistant Director		22	23	Not widely used
Admin. Services Manager/Admin Operations Mgr I-III		22-24	23	Make a single job class to progress to deputy director
Administrative Manager I-IV		15-21	No change	

F. Healthy Work Environment:

We know by surveys and studies that employees value a healthy work environment: One where they are encouraged to be proactive about their own health and if a manager, to model good health habits to their co-workers and subordinates.

This cannot be a mandate. Employees must believe this is also important to their abilities in their jobs. This effort is to support those

who willingly want to maintain or make a change in their lifestyles to a healthier one.

As the provider of health insurance coverage for active and retired State employees, the State has incentive to look for ways to encourage both populations to be proactive about fitness and good health.

Through the Alaska Retirement Management Board and the Health Benefits Evaluation Committee (created in the Supervisory Union's labor contract, specific to the 5,500 State of Alaska employees and dependents covered by the Select Benefits health plan) recommendations are coming to the Commissioner of the Department of Administration to make changes to the health plans to entice employees to use preventive health and fitness measures, to provide coverage for colorectal cancer screening for retirees, and for well baby coverage for active employees. This work will continue in conjunction with the Governor's Health Care Strategies Planning Council.

IV. Conclusion:

The State can do better as an employer. We've started down a path to improving our stature as an employer with fair union contracts and a culture of high ethical standards.

The Working Group recognizes that the State must have a plan for implementing further change and intends to continue to meet to provide a roadmap to reach our ultimate goal of regaining and maintaining our status as a competitive employer.

There are many ways the State has constrained itself as an employer through our methods of recruitment. Changes will take time, effort and a commitment from State employees to implement. We can change the current situation and do more to provide a healthy work environment for our employees.

The Working Group evaluated suggestions and comments submitted by various groups throughout the State workforce. The many responses touched on in this report serve as a starting point for State action for current employees as well as those who will work here in the future.

Some have suggested that we should immediately initiate a salary survey. It is our recommendation that we focus on changes encompassed in this report over the next one to two years, and initiate a

salary survey in 2009-10 to help analyze the effectiveness of the changes and identify additional areas needing adjustment.

We encourage all commissioners to carefully review the data available for each department to plan for pending retirements and the knowledge transfer necessary for the State to successfully continue to provide services. The Division of Personnel and Labor Relations will work to streamline this process for departments and provide guidance and tips on successful implementation.

It is imperative that we continue to engage in an open conversation about ways we can improve and continue to meet our recruitment and retention needs.

Action Plan for Administrative Order No. 237

Near Term Actions:

- Continue negotiating and settling labor contracts which are fair and sustainable.
- Prepare legislation to repeal longevity step impediments and replace with a fair alternative.
- Prepare legislation to provide greater flexibility for deputy commissioner's pay.
- Implement deputy director pay increase in FY08.
- Review the training, education and certification survey of all departments and make recommendations for FY09 or FY10.
- There continues to be some concern about the impact of the Human Resources integration and its impact on some departments. A review of the effectiveness of the HR integration should be scheduled in 2008.
- Streamline the intern program process so it is easier for students to come back to work for the State in between college sessions, and it is less cumbersome for those wanting to hire interns.
- Analyze the effectiveness of continued use of market-based pay adjustments.
- Look for opportunities to promote effective healthy living habits that employees can maintain.

Within two years:

- Request funding in the FY09 budget to perform a geographic differential study in accordance with AS 39.27.030.

- Review the history of tuition reimbursement and student loan forgiveness programs and work with the Legislature to determine a flexible plan with payback obligations tied to time on the job, based on a sliding percentage from zero to five years.
- Every department must develop and implement knowledge transfer plans for soon to be retiring employees.
- Every department must continue to audit its use of flexible work schedules (using information already provided by DOA) to determine if broader use of flexible schedules would be welcomed by employees and still accomplish State priorities.
- Revamp the classification process and review adequacy of classification resources in the Division of Personnel and Labor Relations.
- Conduct a review of the classification system. Review all job classes, update and consolidate with more generic job classes. Minimize, eliminate single-position job classifications.

Within three years:

- Conduct a salary survey.
- Replace the Work Place Alaska portal (and the Online Public Notice System).
- Consider legislation to implement a 40-hour work week.

Ongoing Efforts:

- Continue efforts between the DOA and other departments to write less restrictive minimum qualifications for positions, which allow departments more discretion in hiring the most qualified, best person for the position.
- Continue to encourage a broader use of flexibly classed positions, with easier movement between levels in a job series (i.e. I-II-III). (Current list is included in appendices.)

Administrative Order No. 237
Executive Working Group
Status Report of Recommendations

The Executive Working Group on Recruitment and Retention set out a list of action items in the November 2007 report to the Governor. These items and their current status are listed below.

Action Items – Near Term

Action Item	Status	Details
Labor Contracts: ASEA-GGU, APEA-SU, APEA-CEA, PSEA, AVTECTA and IBU	**Completed**	Salary adjustments resulting from HB 417 and labor negotiations have had a cumulative impact of $150 million over three years (FY08-$56.4 million, FY09-$49.8 million, FY10-$44.2 million). See attached cost summary.
LTC, TEAME, ACOA	**Upcoming**	Contracts expire 6/30/09
MM&P, MEBA	**In Negotiations**	Contracts expired 6/30/08
Longevity Step Repeal and replacement with fair alternative	**Completed**	HB 417 repealed longevity steps and implemented pay increments for non-covered employees. PSEA negotiated similar provisions and Letters of Agreement have been signed with GGU, CEA and SU (pending) effective January 1, 2009. Cost to implement estimated at $2.3 million in FY09 and $1.5 million in FY10.
Flexibility for Deputy Commissioner Pay	**Completed**	HB 417 provides for appointment within range 28.
Deputy Director Pay Increase	**Completed**	Division Operations Manager, range 24 Deputy Director, range 25 (partially exempt only)
Training/Certification/ Education Survey Status	**No Action**	Will be put into New Work Plan
HR Integration Study	**Upcoming**	Development of the RFP will begin by October 1, 2008. RFP will be vetted through Working Group before release.
Streamline Intern Process	**Completed**	Levels were consolidated and flex staffing was implemented. Intern openings are now advertised through Workplace Alaska. This allows all interested parties to view/post internships in one central location.
Market-Based Pay	**On Hold**	A contractor will be hired to conduct a salary survey in 2009 to provide a more holistic approach.
Healthy Living Habits	**Ongoing**	Web Portal has been developed and usage is still in discovery stage. The database will be developed in 2009. Incentives for participation are under development.

Action Items – Within Two Years

Action Item	Status	Details
Geographic Differential Study	**In Progress**	$400.0 for study appropriated. The contractor began work on September 16, 2008. The report is planned to be completed by January 31, 2009. The budget impact of implementation will be presented to the 2009 Legislature.
Tuition Reimbursement & Student Loan forgiveness	**In Progress**	Many departments currently reimburse employees for tuition for job-related classes. Departments will be advised of available options. Review of student loan forgiveness will be put into new work plan.
Knowledge Transfer Plans	**In Progress**	DOPLR has a presentation available to assist agencies in the development of these plans.

5063

Administrative Order No. 237
Executive Working Group
Status Report of Recommendations

Flexible Work Schedules (Alternate Workweeks)	**In Progress**	The number of agreements statewide has increased from 1,508 in 2007 to 1,941 in 2008. Effort is continuing to inform departments of available options.
Revamp Classification Process and Review of Resources	**In progress**	Classification studies are being limited to those in class series which have experienced a significant change in duties. A parallel process to address salaries will be explored in conjunction with comprehensive salary survey.
Classification System Review	**In progress**	When appropriate, job classifications are being consolidated and single position job classifications are being eliminated.

Action Items – Within Three Years		
Action Item	**Status**	**Details**
Salary Survey	**In Progress**	Plan to award contract to begin study in January 2009 with expected completion by October 2009.
Workplace Alaska Portal Replacement	**In Progress**	Task Order has been released for the development of system requirements.
Legislation for 40 hour Workweek	**No Action**	Consideration will be given to implement for select groups of employees.

Ongoing Efforts		
Action Item	**Status**	**Details**
Less Restrictive Minimum Qualifications	**In Progress**	21 job class specifications involving over 350 state jobs have been reviewed and updated to ensure MQs reflect current job requirements.
Broader Use of Flexibly Classed Positions	**Completed**	The use of flexibly classed positions has been broadened for use within any series so long as the work exists at the requested levels.
Administrative Clerk Study	**In Progress**	This comprehensive study of 1,150 clerical positions is scheduled for completion by June 30, 2009. The study will examine the changes in clerical work since the classes were last studied (in 1996) and will provide a benchmark for aligning other clerical, paraprofessional and entry-level job classes.
Revamp Employee Evaluation Process	**In Progress**	Newly established pay increments require completion of an evaluation. The evaluation process is being reviewed and streamlined to ensure that employees are evaluated in a meaningful and timely manner.

Discussion Items	
Item	**Details**
Sabbaticals	Explore concept for state employees with extensive service – 15 yrs and up.
Telecommuting	Explore concept for working from home up to three days a week. Policy is under review and development.

REPRESENTATIVE CATHY MUÑOZ

SPONSOR STATEMENT

HB 161

HB 161 will enable the Alaska Mental Health Trust to move forward with construction and ownership of a new office facility on land the Trust owns in downtown Juneau.

The core mission of the Mental Health Trust is to develop and manage Trust assets for the benefit of mental health beneficiaries in the areas of health, safety, quality of life and economic security. Trust beneficiaries live in communities across Alaska. They are friends, neighbors, and family members facing mental illness, developmental disabilities, chronic alcoholism, Alzheimer's disease, and dementia.

The Trust has identified land in Juneau as a top priority for development. HB 161 enables the Trust to develop, through the issuance of certificates of participation, much needed office and retail space. Four State agencies are currently housed in aging facilities, all in need of major renovation. The proposed building, using modern construction standards, and new energy saving technologies, will reduce both operating and maintenance costs. From a centralized location the offices will function with improved efficiencies and better public access.

Most importantly, over time, a new facility will save the State of Alaska money, and will provide a steady revenue stream to Trust beneficiaries. Development of Trust assets will provide a return on investment for beneficiaries, in turn enriching the lives of those served.

House Resolution 6 passed unanimously on February 25, 2009 by the Alaska House of Representatives. It encourages the Trust to pursue this type of project on behalf of its beneficiaries. It states in part:

"**BE IT RESOLVED** that the House of Representatives encourages the Alaska Mental Health Trust Authority to develop its land and resources to the fullest extent possible, consistent with its legal and moral responsibility to advance mental health services and employment opportunities that protect and enhance the lives of those who benefit from the mental health trust."

Explanation of Changes to HB161
CSHB161 26-LSO605\W

Title: The Certificates of Participation amount of $25,000,000 was adjusted to $22,700,000.
The Alaska Permanent Fund Corporation (APFC) is identified by name as the Alaska Mental Health Fund Trust (AMHT) managing entity that will transfer AMHT funds for the project.

Sec.1- Funding amount from the AMHT for half of the project is adjusted from $25,000,000 to $22,700,000.
The total cost of the project is adjusted from $50,000,000 to $45,400,000.
The amount of the Certificates of Participation is adjusted from $25,000,000 to $22,700,000.

Sec.2-Technical amendment to conform to bill sec. 3. Clarifies assets of the AMHT to be managed by requirements of the AK Mental Health Enabling Act. Identifies Dept. of Natural Resources (DNR) as managing entity of the land assets of the AMHT. Aspects of managing conformity for DNR are listed in new subsections (A) thru (E).

Sec. 3-New section to clarify that APFC is the managing entity for AMHT funds. Offers clarifying language specifying APFC will manage AMHT's $22,700,000, which represents the non-financed amount, put forth by the AMHT. Specific language details requirements of the AMHT to exercise the powers of a state fiduciary involving investment of assets of the account, and to contract with the Trust Land Office in DNR to serve as external real estate investment manager.

Sec. 4, 5, 6- technical amendments to conform to bill sec. 3.

Sec. 7-Financing & Lease Agreements.
Certificates of Participation are adjusted from $25,000,000 to 22,700,000.
AMHT amount of investment is adjusted from $25,000,000 to $22,700,000.
Estimated total cost of project is adjusted from $50,000,000 to $45,400,000.
The estimated annual amount of rental obligation under the 20 year lease agreement is adjusted from $2,075,000 to $1,759,802.
The estimated annual amount of lease payments for the full term of the lease agreement is adjusted from $41,500,000 to $35,196,035.
The second lease for 30 years is adjusted from an annual amount of $3,665,029 to $3,665,000.
The estimated total amount for the 30 year lease payments for the full term is adjusted from $136,875,042 to $125,243,047.

The TRUST
The Alaska Mental Health Trust Authority

HB 161 -- Alaska Mental Health Trust Authority Subport Office Building

Why must the Legislature be involved to enable The Trust to move forward on the Subport Office Building project?

1) Legislation is needed for issuing Certificates of Participation for 50% of the construction and term financing. These bonds are issued at an estimated rate of 5.5% for a 20-year term.
2) Legislation is also required for the Alaska Mental Health Trust Authority to withdraw monies from the Trust principal managed by the Permanent Fund Corporation (the remaining 50% balance of the construction and term financing).
3) The combination of these two financing mechanisms reduces the overall cost to the State of Alaska to meet the State's projected budget expenditures.

Why is this project good for the State of Alaska?

1) The Subport Office Building will be located in a central location that is convenient to the public, other State offices and the Legislature.
2) The State's overall cost for the project will be reduced by 50% because the State and The Trust will be funding partners. As a result, each entity will only be obligated for half of the construction cost and half of the related financing for the construction.
3) The State has announced it will seek new space for the Dept. of Labor in Juneau at the end of the current lease. Because of the pre-construction work already completed on the project, the new Subport building could be completed in sufficient time to meet Labor's timeline for moving at the end of its lease.

Why is this project good for The Trust?

1) The lease payments paid by the State to The Trust will be reinvested in programs and services for Trust beneficiaries, benefitting both The Trust and the State over a 30-year lease period, at a minimum.
2) This project may also act as a template for future developments by The Trust throughout the state.
3) Partnering with the State allows The Trust to perform its fiduciary duties while reducing risk and capturing long-term, recurring income.

How does the project fit within the mission of The Trust?

1) Income from the building will help The Trust fulfill its responsibility to ensure there is adequate funding for the state's Comprehensive Integrated Mental Health Program, which provides services to Trust beneficiaries.
2) The project meets The Trust's guiding principles by diversifying The Trust land's revenue resources.
3) The project utilizes Trust land in its most productive use both prudently and effectively.
4) The building's construction plan is consistent with minimizing energy usage and maximizing the value of The Trust's assets over time.

MEMORANDUM March 11, 2009

SUBJECT: Alaska Mental Health Trust Authority Subport Office Building (CSHB 161( ); Work Order No. 26-LS0605\T)

TO: Representative Cathy Muñoz
Attn: Terry Harvey

FROM: Tamara Brandt Cook
Director TBC

Sec. 1. The legislature finds that the Alaska Mental Health Trust Authority intends to use up to $22,700,000 for the Alaska Mental Health Trust Authority Subport Office Building and that the total cost of the facility will be $45,400,000. The legislature intends that the state provide up to $22,700,000 for the facility.

Sec. 2. Technical amendment to conform to bill sec. 3.

Sec. 3. Requires $22,700,000 of the principal of the mental health trust fund to be deposited into a separate trust land development account and directs the Alaska Mental Health Trust Authority to use money in the account to finance the development of facilities on mental health trust land. The authority is required to exercise the powers of a state fiduciary with respect to the investment of assets of the account and to contract with the Trust Land Office in the Department of Natural Resources to serve as an external real estate investment manager.

Sec. 4. Technical amendment to conform to bill sec. 3.

Sec. 5. Technical amendment to conform to bill sec. 3.

Sec. 6. Technical amendment to conform to bill sec. 3.

Sec. 7. (a) Authorizes the state bond committee to provide for the issuance of certificates of participation in an amount of up to $22,700,000 for the construction of the Alaska Mental Health Trust Authority Subport Office Building if the balance of the construction costs in an amount of up to $22,700,000 is made available by the Alaska Mental Health Trust Authority. The estimated total cost of construction, acquisition, certain financing expenses, and equipping the facility is $45,400,000.

(b) The state bond committee may contract for services necessary in the financing of the facility.

(c) The Department of Administration is authorized to enter into a lease with a term of 20 years for the use of the facility by state agencies. As much of the lease payments as necessary shall be used to pay the principal of and interest on the certificates of participation. The estimated annual amount of rental obligation under the lease is $1,759,802. The estimated total amount of lease payments is $35,196,035. At the end of the lease term, the authority will own the facility.

(d) The Department of Administration is authorized to enter into a second lease with a term of 30 years for the use of the facility by agencies. The estimated annual amount of rental obligation is $3,665,000. The estimated total amount of lease payments for the full term is $125,243,047.

(e) The lease payments under both leases are subject to annual appropriation.

(f) The authority shall manage and operate the facility.

Sec. 8. The Act has an immediate effective date.

ANALYSIS: *(Attach a separate page if necessary)*

The above estimates are for the purchase of the building that the Alaska Housing Finance Corporation current resides in at 4300 Boniface Parkway in Anchorage, Alaska. The estimate is for a building purchase cost of no more than $14.5 million, of which approximately $5 million will be a land exchange with the Tatitlek Corporation and $9.5 million would be from the sale of twenty-five year bonds.

AHFC expects a savings of purchasing the building compared to continuing to lease of approximately $15.2 million in net present value cost.

ANALYSIS: *(Attach a separate page if necessary)*

The bill authorizes the state to enter into leases to finance and occupy the proposed Alaska Mental Health Trust Subport Office Building. This fiscal note only relates to the lease authorized in Section 3 (c) and Certificates of Participation authorized in Section 1 (b) that the state would issue to fund up to $22.7 million of the construction cost. The actual amount sold would be equivalent to 50% of the cost of the construction. The numbers in this fiscal note contemplate an issuance of $22.7 million, up to $400,000 of which would be used to pay for the costs of issuance (including ratings, bond counsel, financial advisor, printing, etc), at an interest rate of 5.5% for a term of 20 years. The financing would take place in the first quarter of FY 2010, and the first interest payment would be due in FY 2010. **While debt service costs must be appropriated as GF in order for the state to receive the lowest financing costs, the financing costs will be reimbursed to the state from the proceeds of the lease after the building is occupied.**

ANALYSIS: *(Attach a separate page if necessary)*

This bill authorizes the State to finance, construct, and occupy the proposed Alaska Mental Health Trust (MHTLO) Subport Office Building. Cost of construction and equipping the new facility is estimated to be $45.4 million, of which $22.7 million is to be provided through issuance of certificates of participation outlined in the Department of Revenue fiscal note. The bill also authorizes real estate investment from the Mental Health Trust Fund for the remainder of the capital expenditure for acquisition, construction, and equipping the facility. The MHTLO will directly pay for all utilities and maintenance costs for the new building, which will be offset by the lease revenues from commercial space leasing and the Department of Administration beginning June 30, 2012 (FY2013). The TLO will also provide a contracted onsite Manager who will handle all aspects of the building and property management, including lease and rental agreements, contracting for janitorial services, utilities, snow removal and landscape services, parking lot management, and building systems including heat and plumbing.

ANALYSIS: *(Attach a separate page if necessary)*

In FY 2013, state tenants leasing space in the Department of Labor Building (DOL), and occupying the Douglas Island Building (DIB) and Public Safety Building (PSB) would relocate to the newly constructed AMHTA Office Building authorized in this bill. The amounts reflected above represent the difference between what projected annual lease costs will be for tenants at the new AMHTA Office Building ($5.4 million) versus costs should the building not be constructed ($4.1 million). Included in the $4.1 million is projected cost of a new lease for tenants in the DOL building as the lease expires and it is anticipated DOL tenants will occupy newly procured leased space irrespective of HB 161. In FY 2013, the projected annual cost for 68,278 sq. ft. of DOL space is $3.3 Mil ($4.00 sq.ft) versus the current cost of $1.9 million. ($2.33 sq.ft). Current annual costs for the DOL, DIB and PSB total $2.6 million compared to $4.1 million projected for FY 2013 without HB 161. However, over a 30 year period a $13.5 million savings occurs with construction.

FISCAL NOTE

STATE OF ALASKA
2009 LEGISLATIVE SESSION

BILL NO. CSHB 161

ANALYSIS CONTINUATION

Projected costs with and without HB 161	2009 Current Annual Payments	2013 Projected Annual Payments	2014 Projected Annual Payments	2015 Projected Annual Payments
Labor Building Lease (new lease in 2013)	1,909,052	3,277,440	3,302,906	3,328,937
Public Safety Building (PSB) operating expenses	235,748	287,922	302,318	317,434
Douglas Island Building (DIB) operating expenses	408,517	496,330	521,146	547,204
DIB Parking Leases	19,051	23,156	24,314	25,529
Costs without the passage of HB161	**2,572,368**	**4,084,848**	**4,150,684**	**4,219,104**
Costs with the passage of HB 161	**N/A**	**5,424,830**	**5,450,166**	**5,476,060**
Increase (Decrease) in costs	**N/A**	**1,339,982**	**1,299,482**	**1,256,956**

Although the calculations above indicate an increase in lease payments for the period shown, over a 30 year period the projected total lease payments with the construction of the new AMHTA Office Building are $13.5 million less than costs would be if the building were not constructed. The projected annual lease payments over a 30 period assuming a newly constructed office building total $160,439,082. If the new office building is not constructed, projected lease, operating and capital expenditures for the current buildings (DOL, PSB and DIB) are projected to be $173,956,264. Included in this amount is anticipated deferred maintenance in FY 2013 of $2.5 million for the PSB and $5.8 million for the DIB should the state tenants remain in these buildings. This amount does not include the likely replacement of the DIB or PSB or additional deferred maintenance for these buildings over a 30 year period.

Re: Mental Health Land Trust

Dear Rep. Munoz,

The Juneau Chamber has been presented with the plans to build a new state office building on Mental Health Trust Land located in Juneau on a currently vacant lot downtown.

Listed below are a few reasons why this will be a positive investment in Juneau's future;

- The development of this lot will provide a beautiful gateway to downtown Juneau
- It will provide quality office space to approximately 525 state employees
- $35 mil in construction, an additional $10 mil in development costs, much of which will be spent in the Juneau business community
- Long term investment in Juneau: 20 year initial lease with two 10 year options
- It will greatly improve safety for pedestrian access along Egan Dr linking the Sea Walk from downtown to Gold Creek and to the State Museum

This is an opportunity that is a result of the lease on the Labor Building expiring in 2012, The Trust having land available that is contiguous to the Capitol Complex, The Trust having the ability to finance the development and the State facing spending significant money to address problems with the Public Safety and the Douglas Island Buildings. This new building will have space for Dept. of Labor, the regional office of Fish & Game, Correction and Public Safety and a small portion could be occupied by Admin.

It is our understanding that The Trust will finance approximately ½ of the project with cash that is currently held by the AK Permanent Fund and use Certificates of Participation for the other ½. Both of these need to be approved by the Legislature. If the bills are not approved this session the State will need to go out for an RFP for space for the DOL this summer to allow time for a project to be constructed in time to be occupied when the current lease expires. It is critical for the legislation to pass during this session to avoid unnecessary delays and to avoid renovating expenses on the existing locations that have not yet been budgeted.

We encourage the passage of this legislation in favor of moving forward with the development of this much needed project on Mental Health Trust Land downtown Juneau.

Respectfully,

Cathie Roemmich, CEO

RE: Subport Office Building

Mr. Terry Harvey
Office of Representative Cathy Munoz
Alaska State Capitol
Juneau, AK 99801-1182

Dear Terry:

In response to your question regarding parking variances, there are two requirements we have for parking. One is in the State lease which says 1 space per 357 square feet of "useable" office area and the other is the CBJ parking standard in the Land Use ordinance which requires 1 space per 300 square feet of "gross" building area. The CBJ standard requires more parking than the State standard, so we plan to request a variance that puts the requirement more in alignment with the State standard. The final number of parking spaces that will be required is still being determined, but The Trust will have to meet both the State lease and the Land Use ordinance requirements. This obligation will hold for the life of the project, so when the old Subport Building site is developed, The Trust will still need to provide adequate parking for the office building.

As for the flat roof; no new buildings have dead flat roofs, they are required to slope to drain, so we refer to them as low-slope roofs. The advantage of a low-slope roof in an urban area is that water and snow are not dumped off the roof, which is dangerous and damaging, especially for a multi-story building. The water and melting snow is directed to internal roof drains and then into the storm sewer system so it does not present a problem in the areas surrounding the building. Low slope roofs are generally less expensive to construct and they enclose the building in the most efficient envelope so they are energy efficient. In the case of this building, a steep pitched-roof would increase the height of the building. If we were to design a roof with a 4:12 pitch, which is common for residential construction, the peak of the roof would be 25-30' above the eaves, the equivalent of at least 2 additional stories.

Sincerely,

Wayne K. Jensen, AIA

RE: Subport Office Building- Space Class

Mr. Terry Harvey, Chief of Staff
Office of Representative Cathy Munoz
Alaska State Capitol, Room 409
Juneau, AK 99801-1182

Dear Terry:

There have been questions raised regarding the class of office space that is being proposed. Classifying office is subjective, but one definition that I found is that "a Class A building can be considered a monument and a testament to the success and power of its tenants." With this definition, there are no Class A buildings in Juneau and only a handful in the State. The same source defines Class B buildings as having good locations, management, and construction, and tenant standards are high and rents are competitive with other new buildings. With these characteristics in mind the proposed building should be listed as a Class B building.

The proposed building will provide office space that meets the State space standards and is comparable to other modern office buildings. As buildings become larger the building codes require more consideration to life safety and environmental conditions. Building codes also change over time, so the proposed building will have better and consequently more expensive, environmental and life-safety systems than buildings constructed 20 or 30 years ago, like the State Office Building in Juneau. For a building of the size proposed it will be necessary to use a structural steel or concrete frame and non-combustible, energy efficient wall and roof assemblies. The infrastructure required to support the technology in a modern office building will be provided as will appropriate heating and ventilation systems. Life safety systems like a fire sprinkler system and an addressable fire alarm system are required and will be included. In summary this building will compare to other recently constructed offices that are designed for energy efficiency, low maintenance, and employee productivity.

Sincerely,

Wayne K. Jensen

RE: Subport Office Building – Construction Cost

Architecture
Interiors
Landscape
Architecture

Mr. Terry Harvey, Chief of Staff
Office of Representative Cathy Munoz
Alaska State Capitol, Room 409
Juneau, AK 99801-1182

Dear Terry:

As part of the preliminary planning for the Subport building, we contracted with HMS, Inc. a professional cost estimating firm in Anchorage, to prepare a budget construction cost estimate based on the conceptual design and the state space standards. They estimated that the construction cost should be in the range of $250-$255 per square foot or approximately $37,000,000. Adding the development costs which includes design, permitting, inspection and financing brings the total project cost to approximately $45,000,000 or approximately $300 per square foot.

The construction cost estimate was compared to other recent office building projects in the Anchorage area. These costs ranged from slightly under $200 per square foot to over $400 per square foot before the development costs were added. We feel that the budget of around $250 per square foot represents a reasonable budget estimate for this building. Construction costs were escalating rapidly during the previous 5-10 years, but currently that trend has changed and costs are more stable and hopefully more predictable. It is always difficult to compare buildings on a dollars per square foot basis since very few buildings are identical and have the same level of finishes, site considerations or construction materials.

Sincerely,

Wayne K. Jensen

RE: Subport Office Building- Construction Systems

Mr. Terry Harvey, Chief of Staff
Office of Representative Cathy Munoz
Alaska State Capitol, Room 409
Juneau, AK 99801-1182

Dear Terry:

Regarding the potential difference between a wood frame building and a steel or concrete structure, many of the building systems would be the same or similar cost assuming the design criteria is the same. The cost of carpeting, paint, doors, lighting, ceilings, electrical systems, heating/ventilation and cooling systems would be similar assuming the same standards are used. The major difference would be in the structure and the exterior wall assemblies. These represent approximately 35% of the building cost so a wood frame building may save 10-15% of the overall construction cost, but the building would need to have fewer floors and a larger site. In order to accommodate the 4 agencies that the State has identified for this building on this site, a wood frame building would not be allowed by the building codes. In order to construct a wood frame building to meet the space needs of the State the number of floors would need to be reduced, making the footprint larger and consequently requiring a larger site.

Sincerely,

Wayne K. Jensen

The Honorable Cathy Munoz

Fr: John Williams, Broker/ Owner

John Williams

Re: Analysis of Rent Costs, Proposed AMHT Building on Egan Drive

Terry: Per your request, I have taken a few hours to review the background analysis on the proposed SOA lease of the above described proposed facility. At this time it is clear that substantial additional detail is required before firm projections can be arrived at to generate any investment analysis with a high degree of certainty. Nonetheless, it is clear that the projections being utilized are premised on reasonable assumptions and that they project an "acceptable" to perhaps below average return on investment for the AMHT, subject of course to final design detail, final lease negotiations, etc.

Construction Cost: To begin, the analysis assumes a construction cost of this facility of between $315 - 320 per square foot (excluding land costs). At the time I was working on the Mayor's Capitol Planning Commission and we were investigating the underlying details of a new Capitol building for the State, we were assuming -- based on input from learned sources -- that the low end of the construction cost range would likely exceed $600/SF. Further, the University of Alaska Southeast assumes new construction numbers in the range of $300 - 500 per foot for office buildings appropriate for their use exclusive of land cost or any extraordinary costs associated with utility extensions, special site/foundation costs, etc. Hence, while the proposed facility is better than wood frame/wood siding, it is clearly not "posh," but durable for the intended uses.

Financing: The AMHT intends to perform the development on land they currently own by investing half of the development costs from funds in their endowment and borrow the rest via Certificates of Participation. For the land, they're premising the development on an annual return of 8% of the land value, which is a very typical yield in a long-term lease scenario. They're assuming their cost of funds for the 50% of the development costs to be borrowed will be 5.5%, which of course is subject to potentially notable adjustment between the time of the analysis and the time of issuance due to the uncertainty surrounding the capital markets at present. Finally, their assumptions are that funds withdrawn from their endowment will be invested and receive a return of 7.5%.

Operating Costs: There is intent to construct the facility to be energy efficient, including the use of heat pumps rather than fuel oil for maintaining ambient temperatures. Based on their extensive discussions with several people with expertise in these fields, they have developed some operating cost assumptions which seem if anything a bit aggressive in their implied ability to keep down operating costs. The project won't be burdened with local property tax and will be included in the State's insurance pool (all perils), which will help in terms of overheads. They are also exploring the potential savings of contracting with the State to provide maintenance services via the extant maintenance staff that services State facilities in

this geographic area. However, their projections also exclude a capital reserves component which generally is included in the annual costs to operate even though the real cost of items covered by this category, especially in the early life of the building, is diminimus.

Return to the Risk Taker: The State of Alaska would be considered a gold-plated tenant by most standards. All State leases are of course subject to the constitutional appropriations clause, the risk of which is clearly small but nonetheless there. Also, the income assumptions for the building utilize the proposed state gross lease rate for all spaces, including the 9 - 10,000 SF of commercial space on the ground floor for which the lease certainty or credit risk certainty is entirely different than the remainder of the space. Given the assumption that the entire useable facility is leased without vacancy throughout the 30-year financing horizon at the lease rate paid by SOA, the return to developer is not in any way excessive. In fact, it's safe to say that for this project to realize a fair return to the owner will be in great part dependent on sound and insightful management which minimizes operating costs and vacancies.

Compare to Privately Developed Alternative: The ultimate question for this development seems to come down to how does this facility differ from a similar facility built by the private sector in re: costs to the SOA lessee. Clearly, a major driving force for the AMHT is that they already own the land to be utilized for this development and can put it to use and hopefully generate a return on that asset equal to 8% of its initial value (which is not adjusted with time as the value changes). Since the land in question arguably varies in value between $40/ft for the construction site and $75/ft for the waterfront parcel which will be utilized for parking, While a private investor would likely seek the same 8% return on the land component of their offering, one could argue that less valued land could be found, although I'm at a loss to suggest a site in the down town core that would meet the needs required to construct this facility. For purposes of an apples to apples cost comparison, assume that a private developer could find 145,000 SF of land in the down town core valued at $40/ft rather than the $40 - 75/ft values associated with the two portions proposed for subject development. The reduction in return on investment could be in the range of $0.15 - 0.17/SF/month or approximately 4.2 - 4.8% of the projected cost. Clearly if the site were moved further away from the Capital core land values would further decline. I don't see any other factors that would materially change the cost components for a private developer, as I believe Davis Bacon laws would apply in either scenario.

I hope you find this information of some help. Please don't hesitate to contact me if I may be of further assistance.

SUBJECT: HB 161

Attached are four documents for your information:

"HB161 Anchorage Lease Comparisons" is a spreadsheet of buildings available for lease in the Anchorage area, prepared by well known Anchorage real estate broker, Stuart Bond. We've calculated the conversion from rentable square foot to useable square foot, and included an allowance for our unique State build-out requirements so we could get an equivalent number for comparison to the AMHTA project.

"HB161 Anchorage To Be Built Office Space" is a spreadsheet prepared by Stuart Bond listing office building projects under development in the Anchorage area. This spreadsheet also contains the conversions and allowances for unique State build-out cost comparisons.

"HB161 Existing state leases over 30,000 sq ft in size" lists existing state leases over 30,000sf. We've included the square footage, cost/square foot, date the lease was entered into originally, and our assessment of the class of the buildings.

"Subport Office Building Lease Summary" is a document prepared by my staff which analyzes the State's lease costs for the proposed Sub port office building.

Please let me know if you need any additional information or clarification.

Representative Bill Stoltze, Co-Chair
Representative Mike Hawker, Co-Chair
Alaska State House Finance Committee
State Capitol
Juneau, AK 99801

Dear Representatives Stoltze and Hawker,

In 1995 AHFC acquired approximately 4.3 acres of unimproved land located in midtown Anchorage and entered into a contract to construct an office/warehouse facility on the site. At the direction of the Knowles administration, AHFC cancelled the contract. In 1997 AHFC entered into an agreement to lease office space and parking located at 4300 Boniface Parkway in Anchorage. In 1999 AHFC sought legislative approval to acquire this property. The bill passed the House 38-1 but died in the Senate Finance Committee, thus enabling Tatitlek Native Corporation to purchase the building and become AHFC's new landlord. If AHFC had been able to acquire the facility, the cost of owning and maintaining the property would have been significantly less than the lease payments AHFC continues to make.

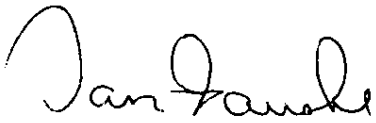
AHFC is seeking legislative approval to enter into negotiations with Tatitlek Native Corporation for the purchase of the office building and parking area located at 4300 Boniface Parkway in Anchorage. The purchase of the existing office space and parking area or the construction of an office building for its use will stabilize the costs associated with housing AHFC's operations, minimize future increases in annual lease payments, and, finally, build equity to both AHFC and the State of Alaska. This should also result in a small increase in AHFC's dividend to the State.

"HOUSING FOR ALASKANS"

EQUAL HOUSING OPPORTUNITY

AHFC estimates that the purchase of the building will save the Corporation approximately $7.5 million in net present value using very conservative assumptions.

Thank you for your consideration.



Sincerely,

Dan Fauske, CEO/Executive Director
Alaska Housing Finance Corporation

40	3,233,661		29,103	3,262,764	40	1,204,524		1,204,524

Assumptions:

* Lease at current rate plus increments for inflation. Rate increases to current market at the end of the lease in 2017.

** Purchase includes $550,000 per year in operating costs, reduced by anticipated $180,000 energy savings and in-house management from improvements to HVAC and lighting systems in year 3.

***The purchase price is a not to exceed amount and includes $2 million for deferred maintenance.

Terry,

As requested, please find a listing of deferred projects for each of the two facilities. Please let me know if you need any further information.

Thank you,
Tanci Mintz
State Leasing & Facilities Manager

Public Safety Building Deferred Capital Expenses

P 039	Electrical upgrades	$500,000
P 015	Repaint common areas	$30,000
P 021	Replace emergency generator	$25,000
P 023	Modify ventilation in generator room	$4,000
P 027	Replace roof	$400,000
P 029	Paint exterior	$30,000
P 030	Recarpet common areas	$20,000
P 031	Replace all exterior windows	$300,000
P 032	Install DDC (direct digital control) system	$55,000
P 034	Add critical building systems to generator	$30,000
P 035	Upgrade south entrance	$10,000
P 040	Replace garage door	$10,000
P 041	Upgrade fire alarm system	$25,000
P 043	Balance hvac system	$25,000
P 044	Install Cooling System	$500,000
P 045	Replace exterior concrete stairs	$15,000
	Subtotal	**$1,979,000**
	25% Contingency	$494,750
		$2,473,750

Douglas Island Building Deferred Capital Expenses

D 016	Replace exterior curtain wall (building envelope)	$3,500,000
D 045	Replace light fixtures	$250,000
D 048	Install new grid and drop ceiling	$80,000
D 050	Replace entry doors	$20,000
D 051	Reslope, reseed lawn install french drain	$35,000
D 054	Electrical upgrades (correct code violations, etc.)	$500,000
D 055	Reinsulate boiler room piping	$10,000
D 056	Install new fire alarm system	$50,000
D 057	Replace flooring at entry	$12,000
D 058	Replace common area carpet	$25,000
D 062	Install new flag poles	$7,500
D 063	Install air curtain	$30,000
D 064	Replace stairs near generator	$35,000
D065	Replace bathroom counters	$50,000
	Subtotal	**$4,604,500**
	25% contingency	$1,151,125
	Projected DIB Capital Total	**$5,755,625**

Briefing Paper
AMHTA Subport Office Building

The Issue: The State is leasing or owns three buildings in Juneau which house State employees. These facilities are very old and in need of significant upgrades. All three buildings provide approximately 116,000 square feet of office space for 525 employees.

The Opportunity: The Alaska Mental Health Trust Authority (AMHTA) has offered to construct a new office building on its land at the former Subport area. The new office building would accommodate all of the employees currently occupying the three buildings in question.

Cost to the State:

Option 1: Enter into an agreement with AMHTA to construct a new office building with surface parking on the site of the old Subport warehouse.

Estimated Cost: $160,439,082 (Lease payments to AMHTA over 30 years)

Action Required: Legislation that allows use of $22.7 million Mental Health Trust funds, currently invested by the Permanent Fund Corporation, and $22.7 million in state bond proceeds to construct the building.

Option 2: Remain in the two state-owned facilities and procure a replacement lease for the Department of Labor.

Estimated Cost: $173,956,264 (Cost calculated for a 30-year period for comparison)

Action Required:

a. Repair and bring into code compliance the two existing state-owned buildings. (These will remain functionally obsolete buildings that will continue to need ongoing repair and maintenance or replacement during the lease period.)
b. Issue a request for proposals (RFP) for a new lease for the Department of Labor.

Justification:

Department of Labor (DOL):

This existing 68,278 square feet lease for DOL expires 6/30/12 and currently accommodates 304 state employees. Since 1982, the DOL occupants have experienced water intrusion, flooding, mold growth, roof leaks, ponding in the parking lot, windows falling out, carpenter ants, etc. Numerous employees have become ill, grievances have been filed by unions and a number of employees have been moved to alternate space outside the facility due to these conditions. An alternate facility, either built by AMHTA or procured through a RFP is necessary. DOA and DOL prefer to vacate the existing facility and relocate all DOL employees to the new AMHTA building by 7/1/12.

Department of Fish & Game (DFG) & Department of Corrections (DOC):
Both agencies are located in a state-owned facility: the Douglas Island Building constructed in 1961. It contains 31,816 square feet and accomodates187 employees. The building is in dire need of major capital improvements including complete replacement of the building envelope to eliminate and prevent rain, wind and snow from entering the building. The total current estimated deferred maintenance cost is $5.8 million.

DOA and tenant agencies prefer to vacate this facility and reuse it for a new defined purpose, or demolish the facility at an estimated cost of $375,000. All DFG and DOC employees would relocate to the new AMHTA building by 7/1/12.

Department of Public Safety (DPS) & Office of Administrative Hearings (OAH):
Both agencies are located in a state-owned facility: the Public Safety Building constructed in 1970 as a temporary structure. It contains 16,103 square feet and accom modates 34 state employees. The facility currently requires major electrical upgrades and code compliance improvements, a new roof, and other repairs. The total current estimated deferred maintenance cost is $2.5 million. DOA and tenant agencies prefer to vacate the facility and relocate to the new AMHTA building 7/1/12.

Future Plans:
The State could demolish the Public Safety Building (at an estimated cost of $180,000) and AMHTA could construct a new parking garage at that location. The garage would accommodate approximately 360 vehicles. It would be used by state employees during the day and be open to the public during non-business hours. This would allow future development of the Subport site by AMHTA.

Detailed Cost Information:

Current Lease/Building Operating Costs:

Lease #1607 & 1632	68,278 sf	exp 6/30/12	$2.33 sf	$1,909,052 annually	DOL Offices (parking included)
Lease #1951	NA	exp 2/28/10	NA	$ 6,451 annually	DIB Surface Parking
Lease #2529	NA	exp 8/31/09	NA	$ 12,600 annually	DIB Surface Parking
Public Safety	16,103 sf	exp n/a	$1.22 sf	$ 235,748 annually	DPS, DOA Offices
Douglas Island Bldg	31,816 sf	exp n/a	$1.07 sf	$ 408,517 annually	DOC, F&G Offices
Totals:	**116,197 sf**			**$ 2,572,368 annually**	

Projected Private New Labor Lease Cost:

New Private Lease	68,280 sf at $4.00 sf	**$ 3,277,440 annually**

Total Projected Public Safety Building Costs thru 6/42: **$ 21,602,392**

Total Projected Douglas Island Building Costs thru 6/42: **$ 38,731,192**

Total Projected Costs 2013 – 2042:
Scenario A: AMHTA building not constructed.

1.	DOL replacement lease	$ 112,083,682
2.	DIB parking leases	1,538,458
3.	Douglas Island Bldg Operating and Capital	38,731,192
4.	Public Safety Bldg Operating and Capital	21,602,932
	Total Scenario A:	**$ 173,956,264***

*Cost estimate does not include likely replacement of the DIB and DPS buildings at some point during the 30-year period.

Total Projected Costs 2013 – 2042:
Scenario B: AMHTA building constructed.

1. AMHTA lease
   Total cost will depend upon state bond financing rates. **$160,439,082****

**Estimate includes repayment of bond proceeds with interest over 20 years and rent payments over 30 years.

Building Purpose:
Office occupancy for State Agency's: DOL, DF&G, OAH, DPS, DOC (approximately 525 employees).

AMHTA Lease Information:
20 year base term with (2) 10-year options
Parking, maintenance and standard services (janitorial, etc.)
Rate: to be determined (estimated range of $3.80 - $4.20 usf)
111,128 usf – State offices
10,000 usf – Private retail on first floor
Four-story facility

Energy Conservation Considerations:

- A heat pump system using either water from Gastineau Channel or the heat from the earth below the building from tubing in the piling or in boreholes. The NOAA Building at Lena Point is incorporating a system using water from the ocean and both the Juneau Airport expansion and the Dimond Park Swimming Pool which will be under construction this spring will use a ground source for the heat pump system.
- A Life Cycle Cost Analysis will be performed to select the optimum insulating values for the exterior envelope of the building including the roof, walls, windows, doors and the concrete floor slab. This analysis will also evaluate the heating, ventilation and lighting systems to achieve efficiencies and lower operating costs in all the building systems.
- The Coast Guard is exploring the use of both wind generated energy at the site and constructing a biomass generation plant to serve their facilities. MHLT will explore opportunities for partnering.
- MHLT will also explore the opportunity to capture waste heat from lighting and/or computer server room cooling systems to offset the heating requirements for the building.

Kevin Brooks
Deputy Commissioner
Administration

Monday, March 16, 2009

Kevin, Kevin

I am writing to ask if you would consider providing more information regarding the Subport Building proposal. When a similar proposal for a building in Anchorage was brought to the legislature, in addition to providing an independent market survey, an RFI (Request for Information) was also issued for comparable office space in the Anchorage area (see attached). I would think it is only appropriate that this proposed project go through the same process. Not only to be sure that we are receiving the best market data, but also to ensure an open and equitable process has been undertaken.

If you do not wish to pursue this action, at the least, I would like the attached questions addressed before moving HB 161, out of committee. If you have any further questions or would like to discuss this request please don't hesitate to call me or my staff at 907-465-3879.

Thank you for your time and consideration in this matter.

Representative Charisse Millet

Information Request

1) What are the lease rates per square foot for each of the buildings currently being occupied by Dept. of Labor, Dept. of Corrections, Dept. of Fish and Game and Dept. of Public Safety?

2) Can you make available a datasheet showing all current leases for state office space in Juneau? We currently have that data for Anchorage and assume it would be easy to produce. (see example)

Lease	Tenants	Common Name	Lessor Name	Sq'	Cost/Sq' (month)	Type
1201	H&SS	Blomfield Building	Fourth & Gambell, LLC	29472	1.485743078	Office

3) What are the lease rates for the new AMHT building?

4) Please provide the draft lease agreement.

5) Please provide the backup data used to create the cost estimate for the AMHT building.

6) What would the maintenance/security costs be for the unoccupied buildings after the departments move to the proposed AMHT Building?

7) If we are intent on entering into a lease-purchase agreement, why not demo the two State owned buildings and replace them with a building with capacity for all affected departments through a lease-purchase agreement so the state retains ownership after completion?

8) On the justification sheet for HB 161 an AMHTA analysis for Option 1 and DGS analysis for Option 2 are mentioned. Please provide the analysis.

9) On the justification sheet there was information on problems with the Labor building – please provide all information you have.

10) Does the Governor support HB 161?

11) How is the AMHT going to pay for a 20 million dollar parking garage, should they decide to sell or develop the property adjacent to the AMHT building (proposed ground parking)? Parking garages currently operate at a loss nationwide, what revenue stream will pay for it?

12) Would the bill sponsor or Administration have any problems with adding the Anchorage Block 39 project to this bill?

STATE OF ALASKA
DEPARTMENT OF ADMINISTRATION
OFFICE OF THE COMMISSIONER

SARAH PALIN, GOVERNOR

P.O. BOX 110200
JUNEAU, ALASKA 99811-0200

Representative Charisse Millett
State Capitol, Suite 412
Juneau, Alaska 99801

Dear Representative Millet:

I am responding to your letter of today regarding HB 161 and the Subport Building proposal. Attached are a list of 12 questions you posed, the answers to those questions, a briefing paper on the project and a number of supporting documents.

Sincerely,

Kevin Brooks
Deputy Commissioner

Response to information request, Rep. Millett

1. See Attachment #3, Subport Briefing Paper
2. Juneau leasing data (Attachment #4).
3. AMHTA building lease rates are estimated at $3.80-4.00/sf (Attachment #3).
4. Attached is the Memorandum of Understanding between the Department of Administration and AMHTA (Attachment #5). Also attached is DOA's standard lease template (Attachment #6). As of now, there is no draft lease agreement for this building.
5. Response from Tim Spernak at AMHTA (Attachments #7 and 8).
6. Alternative use of the Public Safety and Douglas Island buildings have not been established, no cost estimates are currently available. AMHTA is interested in the parcels under its Replacement Lands program.
7. The Department of Administration has an extensive portfolio of both state-owned facilities and leases. Aside from the logistical challenges of relocating employees who would be displaced during the demolition/construction process, the department does not have a parcel of land suitable for building located in the downtown core area. The AMHTA is an attractive partner because they bring both land and $22.7 million to the project. The state offers stability as a tenant with a revenue stream to the Trust for decades into the future.
8. Attached are briefing papers from DOA (Attachment #3) and AMHTA (Attachments #7 & 8) that address this question.
9. The Labor Building leasing file is available upon request.
10. The Governor has not taken a position on this bill. We have provided briefing documents to staff in the Governor's Office.
11. The MOU between DOA and AMHTA includes approximately 392 parking spaces. These will be provided from spaces around the building lot and the vacant sub port lot. At a future date, it is anticipated that AMHTA will build a garage on the lot where the Public Safety building now sits. Future development of the sub port lot would have to support the construction of a parking garage. The state's lease with the Trust would require the specified number of parking spaces as part of the deal, and construction of a parking garage would not alter the terms of that lease.
12. The Department of Administration has no role in the development of Block 39 in Anchorage. Inclusion of the project in HB161 would be a question more appropriately asked of the bill sponsor.

ATTACHMENT #3

Briefing Paper
AMHTA Subport Office Building

The Issue: The State is leasing or owns three buildings in Juneau which house State employees. These facilities are very old and in need of significant upgrades. All three buildings provide approximately 116,000 square feet of office space for 525 employees.

The Opportunity: The Alaska Mental Health Trust Authority (AMHTA) has offered to construct a new office building on its land at the former Subport area. The new office building would accommodate all of the employees currently occupying the three buildings in question.

Cost to the State:

Option 1: Enter into an agreement with AMHTA to construct a new office building with surface parking on the site of the old Subport warehouse.

Estimated Cost: $160,439,082 (Lease payments to AMHTA over 30 years)

Action Required: Legislation that allows use of $22.7 million Mental Health Trust funds, currently invested by the Permanent Fund Corporation, and $22.7 million in state bond proceeds to construct the building.

Option 2: Remain in the two state-owned facilities and procure a replacement lease for the Department of Labor.

Estimated Cost: $165,981,393 (Cost calculated for a 30-year period for comparison)

Action Required:

a. Repair and bring into code compliance the two existing state-owned buildings. (These will remain functionally obsolete buildings that will continue to need ongoing repair and maintenance or replacement during the lease period.)
b. Issue a request for proposals (RFP) for a new Lease for the Department of Labor.

Justification:

Department of Labor (DOL):
This existing 68,278 square feet lease for DOL expires 6/30/12 and currently accommodates 304 state employees. Since 1982, the DOL occupants have experienced water intrusion, flooding, mold growth, roof leaks, ponding in the parking lot, windows falling out, carpenter ants, etc. Numerous employees have become ill, grievances have been filed by unions and a number of employees have been moved to alternate space outside the facility due to these conditions. An alternate facility, either built by AMHTA or procured through a RFP is necessary.
DOA and DOL prefer to vacate the existing facility and relocate all DOL employees to the new AMHTA facility by 7/1/12.

Department of Fish & Game (DFG) & Department of Corrections (DOC):
Both agencies are located in a state-owned facility: the Douglas Island Building constructed in 1961. It contains 31,816 square feet and accomodates187 employees. The building is in dire need of major capital improvements including complete replacement of the building envelope to eliminate and prevent rain, wind and snow from entering the building. The total current estimated deferred maintenance cost is $3.6 million.
DOA and tenant agencies prefer to vacate this facility and reuse it for a new defined purpose, or demolish the facility at an estimated cost of $375,000. All DFG and DOC employees would relocate to the new facility AMHTA building by 7/1/12.

Department of Public Safety (DPS) & Office of Administrative Hearings (OAH):
Both agencies are located in a state-owned facility: the Public Safety Building constructed in 1970 as a temporary structure. It contains 16,103 square feet and accommodates 34 state employees. The facility currently requires major electrical upgrades and code compliance improvements, a new roof, and other repairs. The total current estimated deferred maintenance cost is $1.9 million. DOA and tenant agencies prefer to vacate the facility and relocate to the new AMHTA building 7/1/12.

Future Plans:
The State could demolish the Public Safety Building (at an estimated cost of $180,000) and AMHTA could construct a new parking garage at that location. The garage would accommodate approximately 360 vehicles. It would be used by state employees during the day and be open to the public during non-business hours. This would allow future development of the Subport site by AMHTA.

Detailed Cost Information:

Current Lease/Building Operating Costs:

Lease #1607 & 1632	68,278 sf	exp 6/30/12	$2.33 sf	$1,909,052 annually	DOL Offices (parking included)
Lease #1951	NA	exp 2/28/10	NA	$ 6,451 annually	DIB Surface Parking
Lease #2529	NA	exp 8/31/09	NA	$ 12,600 annually	DIB Surface Parking
Public Safety Bldg	16,103 sf	exp n/a	$1.32 sf	$ 254,271 annually	DPS, DOA Offices
Douglas Island Bldg	31,816 sf	exp n/a	$1.19 sf	$ 455,665 annually	DOC, F&G Offices
Totals:	**116,197 sf**			**$2,638,039 annually**	

Projected Private New Labor Lease Cost:
New Private Lease 68,280 s.f. at $4.00 s.f. **$3,277,440 annually**

Total Projected Public Safety Building Costs thru 6/42: **$18,846,658**

Total Projected Douglas Island Building Costs thru 6/42: **$33,785,326**

Total Projected Costs 2013 – 2042:
Scenario A: AMHTA building not constructed.

1.	DOL replacement lease (w/ 2.22% cpi increases annually)	$112,083,682
2.	DIB parking leases	1,265,726
3.	Douglas Island Bldg Operating and Capital	33,785,326
4.	Public Safety Bldg Operating and Capital	18,846,658
	Total Scenario A:	**$165,981,393***

*Cost estimate does not include likely replacement of the DIB and DPS buildings at some point during the 30-year period.

Total Projected Costs 2013 – 2042:
Scenario B: AMHTA building constructed.

1. AMHTA lease
   Total cost will depend upon state bond financing rates. **$160,439,082****

**Estimate includes repayment of bond proceeds with interest over 20 years and rent payments over 30 years.

Building Purpose:
Office occupancy for State Agency's: DOL, DF&G, OAH, DPS, DOC (approximately 525 employees).

AMHTA Lease Information:
20 year base term with (2) 10-year options
Parking, maintenance and standard services (janitorial, etc.)
Rate: to be determined (estimated range of $3.80 - $4.20 usf)
111,128 usf – State offices
10,000 usf – Private retail on first floor
Four-story facility

Energy Conservation Considerations:

- A heat pump system using either water from Gastineau Channel or the heat from the earth below the building from tubing in the piling or in boreholes. The NOAA Building at Lena Point is incorporating a system using water from the ocean and both the Juneau Airport expansion and the Dimond Park Swimming Pool which will be under construction this spring will use a ground source for the heat pump system.
- A Life Cycle Cost Analysis will be performed to select the optimum insulating values for the exterior envelope of the building including the roof, walls, windows, doors and the concrete floor slab. This analysis will also evaluate the heating, ventilation and lighting systems to achieve efficiencies and lower operating costs in all the building systems.
- The Coast Guard is exploring the use of both wind generated energy at the site and constructing a biomass generation plant to serve their facilities. MHLT will explore opportunities for partnering.
- MHLT will also explore the opportunity to capture waste heat from lighting and/or computer server room cooling systems to offset the heating requirements for the building.

ATTACHMENT #5

Memorandum of Agreement #8084
February 24, 2009

2009 FEB 26 PM 4 28
DIVISION OF GENERAL
SERVICES & SUPPLY

PARTICIPANTS

State of Alaska, Department of Administration, Division of General Services, ("DOA/DGS").

State of Alaska, Department of Natural Resources, Mental Health Trust Land Office, ("MHTLO"), on behalf of the Alaska Mental Health Trust Authority (AMHTA).

PURPOSE

To memorialize the desire and commitment by DOA/DGS and MHTLO to conduct good faith negotiations for entry into long term office and surface parking leases.

AUTHORITY

- Pursuant to Alaska Statute 37.14.009(a)(2), 38.05.801 and 11AAC99, MHTLO is legally authorized to negotiate and execute a Lease Agreement.
- Pursuant to Alaska Statute 36.30.080 and 36.30.850(c), DOA/DGS is legally authorized to negotiate and execute a Lease Agreement with MHTLO.

AGREEMENTS

- DOA/DGS desires to lease office and surface parking from MHTLO for the purpose of replacing existing lease space in Juneau, Alaska for the Department of Labor, Department of Public Safety, Department of Fish and Game, Alaska Department of Corrections and Department of Administration.
- MHTLO has proposed the construction of a new office building and limited on-site parking to be constructed on the existing Subport surface parking lot that is owned by AMHTA.
- DOA/DGS desires to enter into long term office and parking leases with MHTLO. As a matter of sound public policy and in keeping with MHTLO's trust duties, it is understood by the parties that the rental agreement, including rental rates, must be in the best interest of the Trust and its beneficiaries.

In order to facilitate commencement of a preliminary design of the new office building and parking area, DOA/DGS and MHTLO set forth basic terms and conditions each party anticipates would be included in the lease if the contingencies noted below are met:

I. Purpose of Office Building Lease

a) Replace expiring State lease #1607, Alaska Department of Labor Building Headquarters, Juneau, AK, approximately 70,000 s.f.

b) Replace portion of expiring State lease #1627, Alaska Department of Labor Building, Vocational Rehabilitation located in the Goldbelt Building, Juneau, AK, approximately 3,000 s.f.

c) Replace existing State Lease #4009, Alaska Department of Administration, Division of Office of Administrative Hearings, approximately 2,400 s.f.

d) Replace existing State Lease #1011, Alaska Department of Public Safety approximately 8,700 s.f. e) Replace existing State Lease #4023, Alaska Department of Fish and Game, approximately 22,615 s.f.

e) Replace existing State Lease #4022, Alaska Department of Corrections, approximately 9,201 s.f.

f) (Referencing a, b, c, d and e above) – Provide commercially reasonable building visitor, executive State and ADA-compliant accessible on-site parking at new office building. Quantity TBD and agreed upon by all parties.

II. Purpose of Surface Parking Lease

a) Provide approximately 392 parking spaces on the existing Subport area to be used by the State employees working in the new AMHTA Building located on the Subport parcel. MHTLO reserves the unilateral right to relocate parking by State employees from the existing Subport area to a "new parking garage" at a location of MHTLO's choosing, consistent with any required regulations for State employee parking.

III. Term

20 year fixed term full service lease with two 10-year options to renew. This applies to the office building and the surface parking as per AS 36.30.83. Rights of renewal shall be exercised at the sole option of DOA/DGS upon appropriate notice.

IV. Lease Conditions

As mutually agreed upon by all parties.

V. Critical Dates

a) Approximate date office building construction starts, June 30, 2010.

b) Approximate date office building construction is completed, May 15, 2012.

c) Approximate date tenants occupy, June 1, 2012.

VI. The execution of a lease between DOA/DGS and MHTLO is subject to:

a) CBJ approval of a Rezone from Marine commercial to Multi-Use MU-2 and an Allowable Use Permit approval for building height variance and parking ration calculation variance;

b) Approval of a Traffic Impact Analysis by CBJ with conditions acceptable to MHTLO;

c) Approval of all necessary platting actions by CBJ with conditions acceptable to MHTLO;
d) State legislative approval for Certificates of Participation bond financing and third party financing with acceptable conditions to AMHTA, if necessary;
e) Any legislative or administrative approval necessary to carry out this transaction; and
f) AMHTA Board of Trustee approval and a written decision of best interest and consistency finding that the granting of a lease to DOA/DGS is in the best interest of the Trust, as per 11 AAC 99.040, and all other applicable statutes and regulations.

The undersigned agree to the expressed terms and conditions set out in this Memorandum of Agreement. No other changes may be made unless agreed by all parties in writing and execution of an Amendment to this Agreement.

ATTACHMENT #6

STATE OF ALASKA
STANDARD LEASE FORM
LEASE xxx

IN THE EVENT THERE IS A CONFLICT BETWEEN THE TERMS AND CONDITIONS OF THIS LEASE AND THE TERMS AND CONDITIONS OF THE CHOOSE SOL. TYPE, THE TERMS AND CONDITIONS OF THE CHOOSE SOL. TYPE WILL PREVAIL.

THIS LEASE, entered into this _____ day of _____ 2000,

and to be recorded in the **Recording District**, by and between:

hereinafter called the Lessor, and

STATE OF ALASKA
DEPARTMENT OF ADMINISTRATION –
550 WEST 7TH AVENUE, SUITE 601
ANCHORAGE, ALASKA 99501-3558

hereinafter called the Lessee.

The Lessor hereby leases to the State of Alaska the following described premises:

to have and to hold the same, with all appurtenances unto the Lessee for the term of five (5) year **beginning on the day of 2003 and ending on the day of ,** **200** at and for the **rental of $ per month** payable on the first day of each and every month of said term at the office of the Lessor or in advance at the option of the Lessee. Payment for any partial months occupancy shall be prorated based on a thirty (30) day month. Beginning on the monthly rental rate shall be reduced to , plus applicable adjustments specified in this lease.

COVENANTS OF THE LESSEE

1. The Lessee does hereby covenant and agree with the Lessor that it will:

   a) pay said rent at the times and place and in the manner aforesaid;

   b) use and occupy said premises in a careful and proper manner;

   c) not use or occupy said premises for any unlawful purpose;

   d) not assign this lease, not underlet said premises, nor any part thereof, without the written consent of the Lessor, provided however such consent shall not be unreasonably withheld;

   e) not use or occupy said premises or permit the same to be used or occupied, for any purpose or business deemed extra-hazardous on account of fire or otherwise;

f) make no alterations or additions in or to said premises without the written consent of the Lessor, such consent shall not unreasonably be withheld;

g) leave the premises at the expiration or prior termination of this lease or any renewal or extension thereof, in as good condition as received or in which they might be put by the Lessor, excepting reasonable wear and tear and/or, loss or damage caused by fire, explosions, earthquakes, acts of God, other casualty or as provided for in section 2.b below;

h) permit the Lessor to enter upon said premises at all reasonable times to examine the conditions of the same;

COVENANTS OF THE LESSOR

2. And the Lessor on its part covenants and agrees with the Lessee that it will:

a) maintain the demised premises in good repair and tenantable condition during the continuance of this lease or any renewal or extension thereof;

b) indemnity: the Lessor shall hold and save the State, its officers, agents and employees, harmless from liability of any nature or kind, including costs and expenses for or on account of any and all suits or damages of any character whatsoever resulting from injuries or damages sustained by any person or persons or property by virtue of any act performed by the Lessor or the Lessor's agents and employees pursuant to this lease; the Lessor shall also assume all

insurable risks and bear any loss of injury to property or persons occasioned by neglect or accident during the tenure of this lease, excepting only sole negligence of the Lessee.

c) furnish heat and cooling, electricity, water, trash removal, and sewage disposal without additional cost to the Lessee;

d) furnish heating and cooling to all the office space and similar type space uniformly within a 68 degrees Fahrenheit to 72 degrees Fahrenheit temperature range. Heating and cooling in the computer room shall be maintained at a uniform temperature between 60 degrees and 65 degrees Fahrenheit;

e) furnish men and women's restrooms that have hot and cold running water at all lavatories and similar fixtures and which shall be equipped with mirrors, disposals for feminine hygiene products and dispensers for soap, toilet tissue, sanitary seat covers and paper towels. Women's restrooms shall also be equipped with sanitary napkin dispensers.

f) maintain and keep the stairway and common or public hallway used for access to the leased premises in a clean and safe condition;

g) maintain the premises in keeping with good fire prevention practices. The State reserves the right, at reasonable times, to enter and make fire prevention and fire protection inspections of the building and space occupied. Recommended improvements will be given every consideration by the Lessor;

h) the Lessor agrees that facilities provided in this lease are tenantable and that they comply with all laws pertaining to tenantability and performance of this provision is insured by the Lessor agreeing to pay the cost of any building alterations which may be needed during the period of the Lessee's occupancy for purposes of correcting any violation of the law cited by a regulatory agency of government not directly a result of the State's occupancy.

If during the term of this lease, or any renewal or extension thereof, the premises or any part thereof should be rendered untenantable by public authority, or by fire or the elements, or other casualty, a proportionate part of the rent according to the extent of such untenantability shall be abated and suspended until the premises are again made tenantable and restored to their former condition by the Lessor; and if the premises or a substantial part thereof are thereby rendered untenantable and so remain for a period of thirty (30) days, the state may, at its option, terminate the lease by written notice to the Lessor.

The State's decision shall be controlling as to whether or not the premises are fit or unfit for occupancy. This thirty-(30) day period shall not be so restrictively construed that the Lessee is bound to remain in the leased facility if the State's business cannot be safely executed. If warranted due to unsafe condition, Lessee is free to move elsewhere. If the premises are made tenantable again within this thirty-(30) day period, Lessee will return to the facility for occupancy. Lessee may also choose to recover any excess costs, over the abated lease payments, occasioned by relocation due to unsafe condition.

In the event the Lessor fails to correct any violation or remedy any untenantable condition in the time interval prescribed by law, the Lessee shall be free to terminate the lease, or shall have the option by hiring competent workmen, with the Lessor bearing the cost of all materials and labor. Lessor further agrees that alterations performed by the Lessee to correct OSHA violations will not be construed by the Lessor to constitute a breach of the terms of this lease.

In the event that, in the reasonable judgment of the Lessee the lawful enjoyment of the demised premises is threatened by the interruption or severance of utilities and severance provided hereunder by the Lessor, and when such interruption or severance is due to deliberate, or negligent, or tacitly negligent act of the Lessor, the Lessee shall have the right to bind such utilities and services as are threatened, in the name of the Lessee. The Lessee shall be free to deduct from the lease payments the cost of such utilities and services, together with all necessary deposits and the Lessee's actual administrative costs necessary to procure the utilities and services.

i) maintain the building free of any mechanical, structural or electrical hazards and in a good state of general repair and maintenance. Lessor agrees that after reasonable notice in writing by the Lessee that these obligations have not been satisfactorily fulfilled, the Lessee can then obtain competent workmen to correct the deficiencies, all of which will be paid for by the Lessor. Bills for such work will be sent directly to the Lessor for payment. Should there be any delay in payment by the Lessor, the Lessee shall pay the bills and deduct the cost from

the next month(s) rent payments(s), whichever is determined appropriate by the Lessee.

j) Lessor shall renovate the space by refinishing, or replacing all damaged or worn wall, ceiling, floor covering, window covering or built-in building fixtures at least every CHOOSE # YEARS years of occupancy or at the reasonable request of the occupying State agency. All cost associated with the renovations, including moving expenses, will be the responsibility of the Lessor. If Lessor does not respond to such reasonable renovation requests by the occupying State agency, the State reserves the right to hire competent workmen to accomplish such renovation(s) at the lessor's expense.

k) provide janitorial services per CHOOSE TYPE No.

l) If the leased property is sold during the term of the lease, or an extension thereof, the sale will be made subject to the lease. This also applies to any sale as a result of an encumbrance on the property that existed prior to the execution of this lease.

MUTUAL COVENANTS

3. It is mutually agreed by and between the Lessor and Lessee that:

a) all terms and conditions of the preceding covenants of both Lessee and Lessor are agreeable and accepted in their entirety, except as herein noted;

b) all fixtures and/or equipment of whatsoever nature as shall have been installed in the demised premises by the Lessee, whether permanently affixed thereto or otherwise, shall continue to be the property of the Lessee, and may be removed by it at the expiration or termination of this lease or renewal and at its own expense repair any injury to the premises resulting from such removal;

c) if the Lessee shall at any time be default in the payment of rent herein reserved, or in the performance of any of the covenants, terms and conditions, or provision of this lease, and the Lessee shall fail to remedy such default within sixty (60) days after written notice thereof from the Lessor, it shall be lawful for the Lessor to enter upon said premises and again have, repossess, and enjoy the same as if the lease had not been made, and thereupon this lease and everything herein contained on the part of the Lessor to be done and performed shall cease and determine without prejudice however, it shall be the right of the Lessor to recover from the Lessee all rent due up to the time of such entry. In case of any such default and entry by the Lessor, said Lessor may relet said premises for the remainder of said term for the highest rent obtainable, and may recover from the Lessee any deficiency between the amount so obtained and the rent herein reserved;

d) if the Lessee shall pay the rent as herein provided, and shall keep, observe, and perform all of the covenants of this lease by it to be kept, performed, and observed, the Lessee shall and may, peaceably and quietly, have, hold, and enjoy the said premises for the term aforesaid;

e) this lease and all the covenants, provisions and conditions herein contained shall inure to the benefit of and be binding upon the successors and assigns of the parties hereto;

f) the State shall have the option to renew this lease for ( ) additional CHOOSE NUMBER year periods to be exercised by giving the Lessor written notice prior to the expiration of each term.

ADJUSTMENTS: Adjustments in the lease rate may be made if requested in writing by the lessor at least thirty-(30) days prior to the effective date of the adjustment.

Such adjustments may be made annually to reflect changes in the lessor's variable costs, and defined as all operational cost other than debt service and profit and is expressed as: thirty-five percent (35%) of the base monthly lease rate.

The monthly lease rate may be adjusted effective 200 and each thereafter, and will be made in accordance with the percentage change in the U.S. Department of Labor Consumer Price Index, for the Urban Wage Earners and Clerical Workers (CPI-W), All Items, Anchorage Area, issued for each CHOOSE PERIOD six (6) month average of each lease term.

The percentage difference between the six month average CPI-W in effect for the **base year, CHOOSE PERIOD 200 ( )** and the CHOOSE PERIOD six month average thereafter will determine the maximum allowable adjustment of the variable costs over the base monthly lease rate.

Base monthly lease rate is $

Adjustment to the monthly lease rate will be computed as follows:

[(Variable Cost Percentage X Base Monthly Lease Rate) X Percentage of Change In CPI)] + Base Monthly Lease Rate will equal (=) the adjusted monthly lease rate.

The formula is expressed as:

[(35% x Base Monthly Lease Rate) x % change in CPI] +Base Monthly Lease Rate = Adjusted Monthly Lease Rate.

RETROACTIVE adjustments will not be allowed.

g) this lease is subject to all applicable laws of the State of Alaska or local government;

h) FISCAL NECESSITY – NON-APPROPRIATION OF FUNDS: The fiscal year for the Sate of Alaska is a twelve-month period beginning July 1 and ending June 30 of the following calendar year. Lease payments from the State are subject to annual appropriation of funds by the Alaska State Legislature. After the initial fiscal year of the lease, the State has the right to terminate this lease in whole, or in part, if (1) the Alaska State Legislature fails to appropriate funds budgeted for continuation of this lease, and/or (2) the Alaska State Legislature fails to appropriate funds to the occupying agency(s) that results in a material alteration or discontinuance, in whole or in part, of the occupying agency(s)' programs. The termination of the lease for fiscal necessity and non-appropriation of funds

under this section shall not cause any penalty or liability to be charged to the State, and shall not constitute a breach or an event of default by the State.

i) all conditions and covenants of the lease shall remain in full force and effect during any extension hereof. Any holding over after the expiration date of this lease or any extension or renewal thereof, shall be construed to be a tenancy from month to month, at the same monthly rental and on the terms and conditions herein specified so far as applicable;

j) this lease is written as a result of State of Alaska CHOOSE SOL TYPE XXXX opened , 200 , copy attached, which is hereby made a part of this lease and all terms and conditions of said CHOOSE TYPE are binding upon the Lessee and Lessor, their agents or assigns;

k) time is of the essence of this lease.

Other Provisions

4. The following additional provisions, modifications, exceptions, riders, layouts and or forms were, are, agreed upon prior to execution and made a part hereof:

ATTACHMENT #7

The TRUST LAND OFFICE

March 16, 2009

Kevin Brooks
Deputy Commissioner
Department of Administration

Dear Kevin:

Please find attached the Trust Land Office response to the information requested by Representative Millett, March 16, 2009, related to House Bill 161 sponsored by Representative Munoz, et al.

Question 5
Per our discussion I am responding to number 5 with the attached two page financial spreadsheet. These cost estimates were developed by our architect (Jensen, Yorba, Lott) through an extensive programmatic design and survey of state employee office space requirements and a conceptual building design to accommodate their needs.

The building concept design cost estimate was performed by HMS, a construction cost estimating firm used widely throughout the state of Alaska. HMS developed the hard building costs of the Subport Office Building. Added to that hard cost is the state required One Percent for the Arts.

Presently, the TLO continues its due diligence undertaking with a budgeted item of $230,000. The indirect (soft) costs includes architectural, permitting, design and management and equipping of the building totaling $42,898,000.

Construction financing during the course of construction (18 months) is estimated to be $2,400,000. The summation of hard costs, arts, soft costs and construction financing totals $45,311,000 at our current estimate.

The second spreadsheet details the division of financing costs between COPs and The Trust contribution over a period of twenty years; then through the first 10-year renewal period of the state's occupancy. Please note the black line boxes indicating 0.941% reflecting the state's proportional occupancy of the gross building area.

If you have any questions about the numerical presentation please call me at 907/269-8688.

Question 6
Under an agreement with the Department of Natural Resources, and as a result of the 1994 Settlement Agreement, the Trust can nominate "in-lieu" lands for lands already

Alaska Mental Health Trust Land Office
718 L Street, Suite 202 Anchorage, Alaska 99501 Tel: 907-269-8658 Fax: 907-269-8905 www.mhtrustland.org

conveyed to the Trust that may be contaminated or in other respects inconsistent with Trust management principals of Trust assets. Under this program, the TLO has nominated the parcel of land where the current Department of Public Safety building sits on Whittier Street. This parcel will be conveyed to the Trust as a replacement land after DPS employees migrate to the new Subport Office Building. All of this occurs without cost to the State or the Trust through the Replacement Lands program.

The Trust would be eager to evaluate using this same technique to acquire the Douglas Island state office building. Contact Marcie Menefee if you have questions at 907/269-8753.

Question 8
The answer to number 8 is adequately addressed in question #5 along with the two attached spreadsheets.

Thank you and if you have any questions or comments please feel free to contact me at anytime.

Sincerely,

Timothy J. Spernak
Senior Resource Manager
TLO

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

February 25, 2009

The Honorable Mike Chenault
Speaker of the House
Alaska State Legislature
State Capitol, Room 208
Juneau, AK 99801-1182

Dear Speaker Chenault:

Under the authority of Article III, Section 18, of the Alaska Constitution, I am transmitting a bill establishing the Southeast State Forest and relating to the Southeast State Forest. This legislation is one important piece of our overall strategy to revitalize the timber industry and expand wood energy in Southeast Alaska.

This bill designates approximately 25,291 acres of state land as the Southeast State Forest. These lands are presently used for timber harvest, but they are designated "General Use" land, and there is no certainty that they will continue to be available for forest management in future decades. Establishing a Southeast State Forest enables the division of forestry in the Department of Natural Resources to manage this land to increase long-term timber supply for local processors and wood energy needs, provide near-term jobs in thinning, and retain the land in state ownership for multiple uses.

In Southern Southeast (SSE) Alaska, demand for state timber exceeds supply. Most SSE timber is on federal land, but federal timber sales have declined drastically. Local mills now depend heavily on state timber for survival. The state is committed to finding long-term solutions through cooperative efforts to increase economically feasible federal timber sales, and maximizing the sustainable supply of timber from the small state timber base.

Second-growth stands that have been thinned have higher volumes per acre, less impact on wildlife, and shorter rotations. However, thinning is a long-term investment, and is only cost-effective if the land will continue to be available for forest management. A Southeast State Forest will retain the land for long-term forest management, and provide 8 - 10 jobs annually during the thinning season.

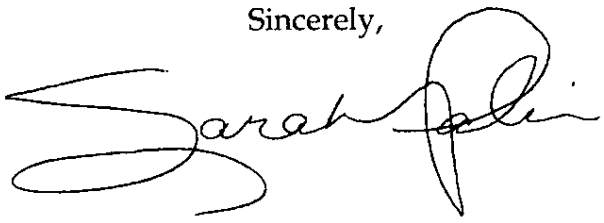
The proposed Southeast State Forest includes 20 parcels totaling approximately 25,291 acres. Parcels are General Use lands on Prince of Wales (8,708 acres), Tuxekan (200 acres), Kosciusko (2,680 acres), Heceta (2,010 acres), Revilla (324 acres), and Gravina islands (5,878 acres), and on the mainland at Crittenden Creek and Bradfield Canal (5,490 acres).

This land would be managed under the State Forest statutes located at AS 41.17.200 - 41.17.230. It would continue to be open for multiple use, including wildlife harvest and recreational activities. Current Department of Natural Resources area plans will continue to direct management until a specific plan, involving interagency and public review, for the forest is adopted. Of these designated lands, approximately 655 acres will be offered for harvest in the near term (within the next two years). The remainder will be scheduled for harvest later, in accordance with the adopted management plan.

Because the City and Borough of Wrangell has not yet selected its full municipal entitlement, and some of the designated lands fall within its municipal boundaries, the bill provides that selections may still be made from those lands. If new municipalities are recognized, this bill will not affect their entitlement amounts, but will prevent these designated lands from being selected.

This bill is an important part of Alaska's effort to maintain timber as part of the southeast economy. I urge your prompt and favorable action on this measure.

Sincerely,



Sarah Palin
Governor

ANALYSIS: *(Attach a separate page if necessary)*

This bill establishes a 25,291-acre State Forest in Southern Southeast Alaska by redesignating certain state-owned parcels. A timber management plan would be developed to actively manage the parcels for higher timber volumes per acre, shorter rotations and less impact on wildlife. This would involve thinning young second-growth stands; a long-term investment not justified for undesignated lands.

Implementation of this bill will not require new positions or funding. The bill will have no short-term impact to the revenue stream, but will provide for long-term increases in forest productivity and subsequent increased timber revenues.

Sectional Analysis
HB 162
Establishing the Southeast State Forest and relating to the Southeast State Forest; and providing for an effective date

This bill would establish a new Southeast State Forest (SESF). The SESF would be managed as part of the State Forest System under AS 41.17.200-.230. Lands in the State Forest would continue to be open for multiple uses, including wildlife habitat and harvest and recreational activities. The State Forest designation would not affect the Wrangell Borough municipal entitlement, nor would it affect calculation of entitlement acreage for future municipalities in southeast Alaska.

Section 1 – Southeast State Forest.

Legal descriptions. Section 1, subsections (a) and (d) provide legal descriptions for the lands to be designated as the Southeast State Forest (SESF). Designated lands include 20 parcels totaling approximately 25,291 acres (see chart) on Prince of Wales, Tuxekan, Kosciusko, Heceta, Revilla, and Gravina islands, and on the mainland at Crittenden Creek. These parcels are an important part of the state timber base, but are classified as General Use land, which may be sold in the future. Legislatively designating a State Forest would ensure that some land will remain available for long-term forest management, and enable thinning to increase timber volumes. Designated lands exclude areas identified as important sites for future state land disposals.

Management plan and transportation corridor. Subsection (b) directs DNR to prepare a management plan for the Southeast State Forest. Under AS 41.17.230 a management plan is required within three years after a State Forest is established. State Forest management plans must consider and permit multiple uses, include recreation and tourism, mining, use of fish and wildlife, and other traditional uses, unless the Commissioner issues a site-specific written finding that a use in incompatible with one or more other uses. Public, interagency, and Board of Forestry review is required prior to adoption of a State Forest management plan. As in other state forests, Subsection (c) states that the DNR Commissioner may also establish transportation corridors within the State Forest.

Municipal entitlements. Subsection (e) clarifies the relationship of the Southeast State Forest to current and potential municipal entitlements. State Forests can affect the amount of land a municipality is entitled to select, and the land

available for selection. The amount of land a municipality may select is based on the maximum total acreage of vacant, unappropriated, unreserved (VUU) land in the borough boundaries within two years after the date of incorporation (AS 29.65.030). Municipal selections are limited to VUU land. Land classified as General Use land is VUU land, but State Forests are not.

The SESF is designed to have no impact on Wrangell Borough land selections. The amount of land that Wrangell Borough may select is already fixed by its date of incorporation, and this bill specifies that the Wrangell Borough may select State Forest land within the borough boundary. Three parcels in the SESF are within the Wrangell Borough boundary.

If new municipalities are incorporated before June 30, 2019, the SESF will not affect the amount of land that they can select. The bill specifies that State Forest lands that were VUU land before establishment of the State Forest will be included in the calculation of the entitlement acreage. However, parcels in the SESF may not be selected. If municipalities form after 2019, the amount and location of their entitlement would be based on the VUU land at that time.

Section 2. Regulations. This section authorizes DNR to immediately adopt regulations to implement the bill.

Section 3. Effective date for regulations. Under Section 3 the authority to adopt regulations (Section 2) takes effect immediately.

Section 4. Effective date for State Forest. Section 4 provides for an effective date of July 1, 2008.

STATE OF ALASKA

DEPARTMENT OF NATURAL RESOURCES

BOARD OF FORESTRY

SARAH PALIN, GOVERNOR

550 West 7th Avenue, Suite 1450
Anchorage, AK 99501

April 3, 2009

Representative Bill Stoltze, Co-chair
House Finance Committee
State Capitol, Room 515
Juneau, Alaska 99801-1182

Dear Representative Stoltze,

The Alaska Board of Forestry is pleased to convey its support for HB 162 to establish a Southeast State Forest. The Board of Forestry provides a forum to discuss and resolve issues on forest practices and management of forests on state land (AS 41.17.947(b)). Board members represent diverse constituencies – the timber, fishing, and mining industries, Native Corporations, professional foresters and fish and wildlife biologists, and environmental and recreational organizations.

The Board of Forestry was briefed on the concept of a Southeast State Forest at the November 12, 2008 Board meeting, and on the specifics of HB 162 at the March 18-19, 2009 Board meeting. HB 162/SB127 would establish a 25,291-acre state forest consisting of 20 parcels in southeast Alaska. This land is currently part of the state timber base, but susceptible to future changes in land use designations. Dedication to long-term management helps provide for long-term forest management to support the southeast timber industry and ensure continued multiple use. It also secures a land base suitable for thinning to increase the volume of second-growth timber and reduce impacts on wildlife habitat.

I am pleased to report that on March 18, 2009 the Board unanimously voted to support passage of House Bill 162.

Sincerely,

Chris Maisch, State Forester
Chair, Alaska Board of Forestry

Re: House Bill 162 – Establishing the Southeast State Forest

Dear Representative Stoltze,

Please accept this request for your consideration to schedule HB 162 before the House Finance Committee at your earliest convenience.

This bill would establish a new Southeast State Forest (SESF) in Southeast Alaska. The SESF would be managed as part of the State Forest System under AS 41.17.200-.230. Designated lands include 20 parcels totaling approximately 25,291 acres on Prince of Wales, Tuxekan, Kosciusko, Heceta, Revilla, and Gravina islands, and on the mainland at Crittenden Creek. Lands in the State Forest would continue to be open for multiple uses, including wildlife habitat and harvest and recreational activities. Legislatively designating a State Forest would ensure that some land will remain available for long-term forest management, and enable thinning to increase timber volumes.

The bill is supported by the Alaska State Forest Association, the Southeast Conference, and Resource Development Council along with recreation groups and surrounding land owners. Attached are a Sectional Analysis, DNR's zero fiscal note and background materials and maps.

If you have any questions regarding the bill, feel free to contact Melanie Lesh, Special Assistant, Department of Natural Resources' and Legislative Liaison at 465-4730, or Marty Freeman, the Forest Resources Program Manager at 269-8473.

Sincerely,

Thomas E. Irwin
Commissioner

"Develop, Conserve, and Enhance Natural Resources for Present and Future Alaskans."

Briefing: **HB 162**

Southeast State Forest

DEPARTMENT OF NATURAL RESOURCES -- DIVISION OF FORESTRY

Alaska Department of NATURAL RESOURCES

April 10, 2009

Background. The state Department of Natural Resources manages over 156,000 acres of forest land in Southern Southeast (SSE) Alaska. Of this land, timber management is allowed on approximately 49,000 acres. The state actively manages this timber base to supply wood to local processors. Remaining land is designated primarily for other uses including land sales, recreation, water resources, and fish and wildlife habitat, including over 25,000 acres of legislatively designated state parks, refuges, and public use areas.

In SSE, demand for state timber exceeds supply. The majority of timber in SSE is on federal land, but federal timber sales have declined drastically. Local mills now depend heavily on state timber for survival. The state is committed to finding long-term solutions by:

- maximizing the sustainable supply of timber from the small state timber base.
- working with the US Forest Service to increase economically feasible federal timber sales, and
- accelerating the transition from old-growth harvesting to harvesting second-growth.

There is broad support for shifting timber harvesting in SE Alaska from old growth to second-growth stands. Actively-managed second-growth stands provide more timber volume per acre on shorter rotations, and have less impact on wildlife. Much of the state timber land was inherited from the USFS with young second-growth stands. We can accelerate the shift to second-growth harvesting and increase timber volume on state land by thinning these stands. However, thinning is a long-term investment, and is only justified if the land will continue to be available for forest management. Legislatively designating a State Forest would ensure that some land will remain available for long-term forest management.

Purpose. This bill would establish a new Southeast State Forest from state lands presently used for timber harvest. The Division of Forestry will be able to manage the State Forest for a long-term supply of timber to local processors, and retain the land in state ownership for multiple uses.

Proposed State Forest land. The proposed Southeast State Forest includes 20 parcels totaling approximately 25,291 acres (see chart). Parcels are General Use lands on Prince of Wales, Tuxekan, Kosciusko, Heceta, Revilla, and Gravina islands, and on the mainland at Crittenden Creek. The Division of Forestry worked with the Division of Mining, Land, and Water Management to identify and exclude lands that are priorities for the state land disposal program.

State Forest Management. The Southeast State Forest would be managed as part of the State Forest System under AS 41.17.200-.230. Lands in the State Forest would continue to be open for multiple uses, including wildlife habitat and harvest and recreational activities. State Forest lands would be managed consistent with the management intent under the current Prince of Wales Island and Central Southeast area plans. Changes to management intent would require public and interagency review through adoption of a State Forest Management Plan under AS 41.17.230.

Municipal Entitlements. The City and Borough of Wrangell boundary encompasses three parcels in the proposed state forest (Crittenden Creek and Bradfield Canal East and West). A State Forest designation will not affect the amount or location of land the Wrangell Borough can select. That determination is based on the maximum total acreage of vacant, unappropriated, unreserved land in the borough boundaries within two years after the date of incorporation (AS 29.65.030). However, a borough would not normally be able to select land within a State Forest. To avoid conflicts with the Wrangell entitlement, the Southeast State Forest bill specifies that the Wrangell Borough may select State Forest land within the borough boundary.

If new municipalities are incorporated before June 30, 2019, lands that were vacant, unappropriated, unreserved land before establishment of the State Forest will be included in the calculation of the municipal entitlement acreage, but may not be selected.

RE: SB127-An Act to Establish the Southeast Alaska State Forest

Dear Senator Olson:

The Resource Development Council (RDC) is writing to support SB 127, the establishment of the Southeast Alaska State Forest.

RDC is a statewide, non-profit, membership-funded organization founded in 1975. The RDC membership is comprised of individuals and companies from Alaska's oil and gas, mining, timber, tourism, and fisheries industries, as well as Alaska Native corporations, local communities, organized labor, and industry support firms. RDC's purpose is to link these diverse interests together to encourage a strong, diversified private sector in Alaska and expand the state's economic base through the responsible development of our natural resources.

The bill would establish a new state forest in Southeast Alaska from state lands presently used for timber harvest. The Division of Forestry would be able to manage the state forest for a long-term supply of timber to local processors, and retain the land in state ownership for multiple use. The forest would be managed as part of the State Forest System and under the current Prince of Wales Island and Central Southeast area plans.

In Southeast Alaska, demand for state timber exceeds supply and local mills are dependent on a consistent supply to stay in business. The majority of the timber in Southeast Alaska is on federal land, but federal timber sales have declined sharply, oftentimes due to incessant litigation from anti-logging groups as well as the federal government consistently putting forward uneconomic timber sales. Subsequently, the demand for state timber has increased significantly.

Much of the proposed forest was inherited from the U.S. Forest Service with young second-growth stands. Establishment of the Southeast Alaska State Forest will help provide a sustainable timber supply to local mills and accelerate the harvest of second-growth timber. Actively managed second-growth stands will provide more timber volume per acre on shorter rotations, and have less impact on wildlife. The shift to second-growth harvesting can be accelerated and timber volume increased on state land by thinning these stands. However, thinning is a long-term investment and is only justified if the land will continue to be available for forest management. A legislatively designated State Forest would ensure that land would remain available for long-term forest management. Thank you for the opportunity to provide comment on SB 127.

Sincerely,

Carl Portman, Deputy Director

February 16, 2009

The Honorable Governor Sarah Palin
PO Box 110001
Juneau, AK 99811-0001

Governor Palin;

The Southeast Conference (SEC) is a broad based association of communities in Southeast Alaska with a mission of undertaking and supporting activities that promote strong economies, healthy communities and a quality environment throughout the region. In furthering that mission, SEC would like to lend its support for the concept of creating a new State Forest in southern southeast.

In southern southeast the demand for state supplied timber far exceeds the supply. The majority of the timber in the area is on federal land; however federal timber sales have declined dramatically. For their survival, the few remaining, local mills now depend heavily on state supplied timber from the 49,000 state acres where timber management is allowed.

Many of the states' managed acres support either second-growth stands on lands previously harvested by the U.S. Forest Service prior to state selection or new-growth on lands that have recently been harvested through state sales. Thus, for a future timber supply from state lands in southeast, the emphasis must be on active management of second-growth stands with higher volumes per acre, less impact on wildlife, and shorter harvest rotations.

In order for the state to expend funds to enter into intensive second-growth management on its timber lands, there must be assurance that the acres will be managed for timber over the long term. That assurance can best come through the designation of the lands as a State Forest with a management plan calling for extended, intensive timber management. With that designation, the Division of Forestry would be able to manage the lands for a reliable, long-term supply of timber to local processors and retain the land in state ownership for multiple uses.

Approximately 3,800 acres of state lands potentially included in a new State Forest are within the new Wrangell Borough. SEC understands that the establishment of State Forest lands within the new borough would not adversely affect the amount of land Wrangell may select. AS 29.65.030 states that borough selections are based on the maximum total acres

ARDOR

of vacant, un-appropriated, unreserved land within the borough boundaries within two years following the date of incorporation. SEC would hope that any legislation designating a new Southern Southeast State Forest would provide for this situation.

In conclusion, SEC would like to lend its support for the establishment of a Southern Southeast State Forest and would like to encourage your administration to advocate its establishment. Further, in order to increase the supply of timber available to the dependent industry in the region, we urge you to take advantage of any opportunities to increase the acreage of timberland managed by the Division of Forestry.

Sincerely,

Shelly Wright

March 10, 2009

Honorable Sarah Palin
State of Alaska Governor
PO Box 110001
Juneau, AK 99811

Dear Governor Palin,

Only about 12% of the commercial timberlands in Southeast Alaska are comprised of young-growth timber. Most of these stands are less than 50-years old and will not be mature for another 30 to 50-years. Therefore, for the next few decades, our industry will have to continue harvesting old-growth timber. However, well managed stands of young-growth timber can produce faster growing, high quality timber on fewer acres than unmanaged stands. *Consequently, we applaud your legislative proposal to add some State General Use lands to the State Forest in Southeast Alaska so that the Division of Forestry can more intensively manage those lands.*

The Division of Forestry has done an excellent job of preparing timber sales to keep a small portion of our industry alive in recent years, but they cannot increase their timber sales level without acquiring more timberlands or by departing from their long-term sustained yield requirement. There is opportunity however for increased timber sales from the Mental Health Trust and the University of Alaska timberlands. *We ask that you encourage both of these land managers to increase their timber sales program.* This would provide additional timber to our industry, would lessen the amount of State funding needed to sustain these two entities and create real, private sector jobs in Alaska.

Lastly, we want to thank you for making State personnel available to assist in the restoration of a viable federal timber sale program. That effort is already producing good results and provides our beleaguered industry some hope for our future.

Sincerely,

Brian Brown
President
Alaska Forest Association

ANALYSIS: *(Attach a separate page if necessary)*

This bill establishes a 25,291-acre State Forest in Southern Southeast Alaska by redesignating certain state-owned parcels. A timber management plan would be developed to actively manage the parcels for higher timber volumes per acre, shorter rotations and less impact on wildlife. This would involve thinning young second-growth stands; a long-term investment not justified for undesignated lands.

Implementation of this bill will not require new positions or funding. The bill will have no short-term impact to the revenue stream, but will provide for long-term increases in forest productivity and subsequent increased timber revenues.

Sponsor Statement

HB 167

"An Act relating to a corporation income tax credit for contributions by a person owning or operating a commercial passenger vessel to a qualified trade association used for planning and executing a destination tourism marketing campaign"

Alaska's tourism industry, a vibrant part of our economy, has made it known that Alaska is struggling to maintain and grow a market share in national and international markets. With the onset of the worldwide economic downturn, and competing destinations far outspending Alaska with increased marketing budgets, Alaska's tourism industry is facing a future of decline.

With all sectors of Alaska's travel industry reporting an unprecedented drop in 2009 summer season advanced bookings, there exists an urgent need for broadening the greatness of Alaska as a destination.

HB 167 will establish a tourism marketing tax credit that will create a sustainable funding source to grown Alaska's tourism marketing program.

The reinvestment of tourism tax revenues will ultimately grow and strengthen Alaska's economy through the travel industry, which is important to aiding Alaska's small businesses who are the backbone of our State and Alaska's tourism industry.

Sectional

CS for HB167
"An Act relating to a corporation income tax credit for contributions by a person owning or operating a commercial passenger vessel to a qualified trade association used for planning and executing a destination tourism marketing campaign"

Section 1. Amends 43.20 by adding a new section to article 1:

Sec. 43.20.047 Tourism marketing tax credit.
Provides for commercial passenger vessels in the state to a credit against the tax due for a cash contribution.

(1) accepted by the qualified trade association awarded a tourism marketing contract by the Department of Commerce, Community, and Economic Development.

(2) used for the destination tourism marketing campaign that received the tourism marketing contract.

(3) no direct benefit or tangible benefit may be provided to the person making the contribution.

(b) the tax credit may not be less than zero and may not exceed the difference between the tax liability as calculated now and as it read on December 16, 2006.

(c) unused tax credits may not reduce a person's tax liability below zero for any calendar year. Unused portions may not be applied to a subsequent calendar year.

(d) commercial passenger vessel has the meaning given in AS 43.52.295.

Section 2 Adds a new section:

Applicability

Cash contributions accepted after June 30, 2009 will be applied to the destination tourism marketing campaign.

STATE OF ALASKA
2010 LEGISLATIVE SESSION

BILL NO. CSHB167(L&C)

ANALYSIS CONTINUATION

Bill Language:

This bill will create a tax credit for contributions to a qualified trade association that has been awarded a contract by the Department of Commerce, Community and Economic Development for planning and executing a destination tourism marketing campaign for Alaska.

The tax credit would be equal to the value of the qualified contributions and could be applied to a liability under the Alaska Corporate Net Income Tax. Unused tax credits could not be carried forward or transferred. The tax credit would be available only to corporations owning or operating large commercial passenger vessels.

A 2006 initiative subjected commercial passenger vessel operations to corporate income tax under AS 43.20. Prior to that initiative, commercial passenger vessel operations were exempt from taxation through Alaska's adoption of Internal Revenue Code Section 883. The credit would have a maximum value equal to the difference between (1) the corporate income tax liability under current law which includes commercial passenger vessels in the tax base, and (2) the corporate income tax liability under laws in place as of December 16, 2006 which exempted commercial passenger vessel operations from the corporate income tax.

The tax credit would apply to contributions after June 30, 2009.

Revenues:

Revenue effects from this bill are indeterminate for two reasons: first, the total tax liability from corporations operating commercial passenger vessels cannot be disclosed due to confidentiality constraints; and second, we do not know to what extent commercial passenger vessel operators will offset their corporate income tax liability through contributions that qualify for the tax credit under this bill.

Expenditures:

This bill would require the Department of Revenue to administer a new tax credit program. We anticipate being able to implement the new credit using existing staff. However, there will be $30,000 in one-time startup expenses. These expenses include $20,000 for enhancements to our tax examination system and $10,000 for updates to our tax forms and education and communication with stakeholders as we implement the credit program.

HOMER CHAMBER of COMMERCE

Celebrating 60 years of Service

Mission: to promote cooperative economic development that preserves the essence of the community while enhancing the quality of life.

March 11, 2009

Representative Coghill
Via fax: 907-465-3258 (Juneau)

Dear Representative Coghill,

The Homer Chamber of Commerce urges the State Legislature to support HB167 which will provide continued marketing funds to the Alaska Travel Industry Association (ATIA), and ultimately assist smaller destination communities like Homer to sustain a viable economic engine – tourism.

Our mission is to promote cooperative economic development that preserves the essence of the community while enhancing the quality of life. A significant share of Homer's economic base comes from the more than 150,000 visitors that travel to Homer each year to experience Alaska. We attribute a key portion of this success to our continued partnership with ATIA.

Homer has numerous tourism related businesses, many of them small businesses, who rely heavily on the marketing success of organizations such as ATIA. Through ATIA's tremendous wide reach and effective marketing efforts, communities like Homer can reach potential customers collectively that individual businesses could not do alone.

Please consider the economic impact that the tourism industry has on Alaska's small communities and support HB167. This is a critical time when economic stimulus and recovery is essential, and with your support we can keep our tourism industry strong.

Sincerely,

Tina Day
Executive Director

cc. Senator Gary Stevens
Representative Paul Seaton

March 11, 2009

Dear Representative Coghill:

On behalf of the visitor industry in the Interior, the Fairbanks Convention & Visitors Bureau heartily thanks you for sponsoring HB 167. By supporting the marketing funding for the Alaska Travel Industry Association (ATIA), you are supporting small businesses in Fairbanks and the Interior.

Entrepreneurialism is one of the hallmarks of the Alaska visitor industry. These local business owners and their employees are your neighbors, friends and constituents. As you know, tourism has a ripple effect throughout our community, generating construction, transportation and countless other services, infrastructure and quality-of-life benefits to our community. The locally-owned Hotel North Pole is a great example of this entrepreneurialism

The beauty of a state destination campaign is that it reaches a depth and breadth of potential customers that is beyond the reach of most small businesses. Destinations operate in a fiercely competitive marketing environment which becomes even more ferocious in trying economic times such as these.

The success of our "mom-and-pop" businesses is not only creativity, hard work and persistence but also relies on the success of the ATIA campaigns. On a daily basis, the FCVB sees the benefits of the marketing and sales efforts of ATIA. Please continue to support small business by doing the following this legislative session:

- Support the Governor's budget that continues the reinvestment of vehicle rental tax revenues into Alaska's tourism marketing program [QTA contract] at the $9 million level in the FY10 operating budget. This will be matched with $2.7 million in private-sector funds, including funding from FCVB.
- As you have proposed, pass the HB 167 legislation to provide a tax credit to payers of the Cruise Line Corporate Income Tax for contributions to Alaska's tourism marketing program. The goal is to sustainably grow Alaska's tourism marketing funding to at least $20 million. 50% of Fairbanks' summer visitation is cruise related. Let this tax credit help us to grow small businesses in Alaska and to grow our winter tourism season!
- Measure the results of Alaska's tourism marketing reinvestment. Appropriate $850,000 in the FY10 capital budget to fund the Alaska Visitor Statistics Program, an economic impact study. FCVB cannot afford this kind of important research on our own.

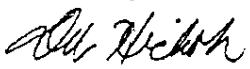
Now in my tenth year at FCVB, over the years, I have seen our marketing team work hand-in-hand with the ATIA marketing team to bring visitors to Fairbanks and the Interior. We feel blessed to share our wonderful Alaska product with visitors from throughout the world.

On a personal note, I have made my living since 1982 as a destination marketing professional. I feel personally blessed to have challenging work in a field that I feel passionate about while supporting my child.

Last but certainly not least, thank you for your tireless efforts in Juneau and especially for yoursupport of this important legislation. It is an honor to work with you to foster the economic development of our community.

I'll be in Juneau on April 1 and 2 and look forward to seeing you then. Meanwhile, if you have any questions, please feel free to contact me at (907) 459-3770 or dhickok@explorefairbanks.com.

Warm Regards,



Deb Hickok
President and CEO

Testimony on House Bill 167

November 5, 2009

Witness: Maryann Ray
Address: 4541 Sawa Circle
Juneau, AK 99801

Representing: Self and Alaska Tourism Industry Association

My family and I realized a lifetime's dream this July when we made Alaska our home. Since our arrival we have purchased a home and invested in a family business. We now own a high-end bed & breakfast and provide wedding planning and excursion scheduling services to our target customers – affluent, independent travelers. We book significant business for Alaskan tour operators, restaurants and others.

Because our target market is not directly related to the cruise ship industry and a significant portion of our customers plan their travel quite early, 2009 was not as difficult for us as it was for many of our colleagues. That said, 2010 is not shaping up the way we had hoped. We are already seeing 2010 travelers negotiate rates harder, plan shorter stays and request fewer and less expensive excursions. Our concern is that, if action isn't taken soon, 2010 may end in a broader downturn than 2009.

We have been doing everything we can to promote our business and the beauty and adventure of travel in Alaska. However, a small business cannot hope to compete with the spending being done by competing state and international tourism groups around the country and the world. Additionally, with the lessening of cruise line interest in Alaska, we expect there will be less frequent cruise line advertising about the adventure of Alaska. The entire Alaskan travel industry has benefited from the advertising done by the cruise industry, which has gone a long way to keeping Alaska in the minds of vacation planners. Fewer cruise ads will lead to fewer visitors overall – including independent travelers. Allowing that void to be filled by competing destinations will heavily impact Alaska's share of tourism dollars.

As a small business, my family must rely on the state to do its share to promote Alaskan travel industry and to provide the reach needed to hit the high end travel market. House Bill 167 is a step in the right direction. My family and I encourage the committee to support HB 167 and the Alaskan tourism industry.

Thank you.

From: Theresa Weiser [apcinc2008@hotmail.com]
Sent: Wednesday, November 04, 2009 3:24 PM
To: LIO Sitka
Subject: Testimony in support of HB 167 Wednesday Nov. 4th!

To Whom It May Concern,

This is Theresa Weiser from Sitka. I am president of the Sitka Charterboat Operators Association in Sitka, Alaska. I have been a sportfishing lodge owner for over 20 years in Sitka and am still currently in business. We TRY to operate six charter vessels daily. This has been a difficult challenge during the last year due to the EVER-INCREASING Sportfishing Restrictions and the faltering economy.
I would like to testify as follows:
I support HB 167.
Our sportfishing lodge business was down over 30% in 2009 from the previous 2008 season. Business for the sportfishing charter industry as a whole, has been down an average of 30% or more in 2009, compared to the previous 2008 season for everyone I have had contact with in our industry these past few months. I know of businesses that are no longer in business, and others that are struggling fiercely to keep going, but do not know if they can make it thru this winter and/or thru another summer.
To say that the 2009 season was debilitating for our industry is an understatement!
It is way past time for our legislative leaders to recognize the economic value of tourism to the State of Alaska and give stronger support to increase the State's marketing efforts by designating $20 million plus in support of the Alaska Visitor's Industry.
I urge you to support HB 167. This is a good idea.

Sincerely,

Theresa Weiser

COMMITTEE NAME

committee on HB167, dated 11/4/09.
BILL/SUBJECT TODAY'S DATE

- My name is Tina Day and I'm the Executive Director of the Homer Chamber of Commerce. I have lived in Alaska since 1980.
- The Alaska visitor industry is an extremely important economic engine in our community.
- As you may know, Homer has numerous tourism related businesses, many of them small business, who rely heavily on the marketing efforts of organizations like ATIA to bring tourists to Alaska and local communities like ours.
- This year overall tourism in Homer was down about 25% across the industry. But some businesses, particularly in the guided fishing charter sector, were down as much as 60%.
- The Homer Chamber for the past 19 years has contracted with the City of Homer to provide marketing services to increase local tourism.
- This year due to budget cutback, some of this funding was reduced causing cutback to marketing programs. Next year we expect even more significant cutbacks – we have already reduced our staff by 1 fulltime person and ½ time person in anticipation of this reduction.
- That is why now more than ever, we rely on our partner organizations like ATIA to develop and implement statewide marketing strategies to sustain the visitor industry in Alaska.
- The Homer Chamber of Commerce urges you to support HB167. It is vital that we provide ATIA, and organizations like them, with the resources to effectively promote Alaska – sustaining the visitor industry in rural Alaskan communities!

HB 168

<target><bill>HB 168</bill><subject>HB 168</subject><comm>HFIN26</comm></target>

ALASKA STATE HOUSE OF REPRESENTATIVES

SENATOR JOHN COGHILL

HB 168 Certification and Designation of Trauma Centers

Sponsor Statement 26-LS0437\E

This legislation would create a trauma care fund which could reimburse trauma centers for uncompensated or undercompensated services. The bill would create incentives for becoming a certified trauma center but does not force facilities to become certified trauma centers.

Trauma is the leading cause of death for Alaskans between the age of one and forty-four and more than 800 Alaskans are hospitalized each year for spinal cord and brain injuries.

There is a "golden hour" after the injury during which proper treatment and appropriate interventions will potentially save a patient's life and prevent further damage to an injured person. Personal trauma is any bodily injury from an external force including car crashes, shootings, falls, snow machine crashes, and stabbings.

A good trauma system is an organized multidisciplinary response to managing treatment of severely injured people and it spans the full spectrum from prevention and emergency care to recovery and rehabilitation. A trauma system enhances the chance of survival by making sure patients are brought to the most appropriate facility in the most efficient manner and that optimal care is delivered every step of the way. Alaska has many good parts to our trauma response but we must do better.

SENATOR JOHN COGHILL

HB 168 Designate Trauma Centers and the Uncompensated Trauma Care Fund

Sectional for Version E

Section 1. AS 18.08.082 currently prescribes by regulation criteria for training programs and for personnel involved in emergency medical services. This section adds a requirement for the commissioner of Health and Social Services establish special designations for varying levels of services offered by a certified trauma center.

Section 2. Establishes a trauma care fund to be used to compensate certified trauma centers for uncompensated trauma care. The fund can accept money appropriated by the legislature, which can include donations, income from the fund, and of the other designated receipts. The commissioner is given authority to establish a special committee for review of the program and limits are set on the distribution of the funds.

Section 3. Would permit the appropriation of unrestricted alcohol beverage taxes to the trauma care fund. The alcohol and other drug abuse treatment and prevention fund. Half of the alcohol beverage taxes are restricted to use in the

Section 4. The bill has an immediate effective date.

CS HB 168 (FIN) creates the trauma care fund to be used to compensate certified trauma centers for practicing at the highest national standards for trauma care. Monies from the Disproportionate Share Hospital (DSH) program can be used as a match to money in the trauma care fund. This would be a 50/50 match.

CS FOR HOUSE BILL NO. 168(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SIXTH LEGISLATURE - SECOND SESSION

BY THE HOUSE FINANCE COMMITTEE

Offered:
Referred:

Sponsor(s): REPRESENTATIVES COGHILL, Kerttula, Lynn, Cissna, Keller, Herron

A BILL

FOR AN ACT ENTITLED

"An Act relating to state certification and designation of trauma centers; creating the trauma care fund to offset trauma care provided at certified and designated trauma centers; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 18.08.082 is amended by adding a new subsection to read:

(c) The commissioner shall establish special designations in regulation for varying levels of trauma care provided by a certified trauma center that shall be used to set compensation eligibility and amounts under AS 18.08.085. The designations shall be based on nationally recognized standards and procedures.

*** Sec. 2.** AS 18.08 is amended by adding a new section to read:

Sec. 18.08.085. Trauma care fund; creation. (a) The trauma care fund is created. The purpose of the fund is to compensate certified trauma centers in the state that receive a special designation under AS 18.08.082(c).

(b) The fund consists of money appropriated to it by the legislature, including

donations, recoveries of or reimbursements for awards made from the fund, income from the fund, and other program receipts from activities under this chapter. Appropriations to the fund do not lapse.

(c) The commissioner shall administer the fund in accordance with the provisions of this chapter. The commissioner shall spend money from the trauma care fund for the purpose established in (a) of this section.

(d) The commissioner shall establish compensation standards under this section. The standards must include funding priorities for trauma centers receiving a special designation under AS 18.08.082(c). The commissioner may seek the advice of a special committee for review of statewide trauma care and compensation standards.

(e) The commissioner may not provide more than 25 percent of the total assets, including earnings, of the fund in a fiscal year to one trauma center.

*** Sec. 3.** This Act takes effect immediately under AS 01.10.070(c).

Trauma System Consultation
State of Alaska
Anchorage, Alaska

November 2nd -5th , 2008
American College of Surgeons
Committee on Trauma

PRIORITY RECOMMENDATIONS AMERICAN COLLEGE OF SURGEONS ALASKA TRAUMA SYSTEM REVIEW

November 2-5 2008

Definitive Care Facilities

- Establish, as soon as practical, a second Level II Trauma Center in Anchorage in accordance with American College of Surgeons Committee on Trauma (ACS-COT) verification criteria to meet the existing volume and acuity demands.
- Mandate participation of all acute care hospitals in the trauma system within a 2 year time frame with trauma center certification/designation appropriate to their capabilities.
  - Facilities should seek trauma center designation at a level appropriate for their capabilities.
  - Other facilities, such as remote health care clinics, should participate with rapid patient assessment and stabilization and by following guidelines for trauma triage and transfer.
- Study pediatric trauma care needs with the goal of establishing one or more centers of excellence in pediatric trauma care.

Coalition Building and Community Support

- Develop and disseminate public information about the challenges in providing trauma care and the status of the trauma system in the state for Alaskans.

Lead Agency and Human Resources Within the Lead Agency

Develop an appropriate position classification and duty statement for a 1.0 full time equivalent (FTE), permanent trauma system manager that specifies education as a health professional, experience in trauma or emergency health care, and the administrative skills and clinical understanding necessary to support trauma system development.

Trauma System Plan

- Develop a comprehensive trauma system strategic plan consistent with the Health Resources and Services Administration (HRSA) *Model Trauma System Planning and Evaluation* document.

Coalition Building and Community Support

- Develop and disseminate public information about the challenges in providing trauma care and the status of the trauma system in the state for Alaskans.

System Integration

- Ensure that the Injury Prevention and Emergency Medical Services

(IPEMS) Section is engaged in planning with disaster preparedness, emergency management, and public health functions for integration of the trauma system.

Financing

• Provide state funding to hire a fulltime trauma system manager.

Emergency Medical Services

• Develop a central coordination center for statewide air medical resources that will maintain an updated registry of all medical aircraft to include medical services and flight characteristics (e.g., load capacity, instrument rating, landing requirements, etc); and to monitor the availability and location of air resources in near real-time.

System Coordination and Patient Flow

• Implement standardized prehospital triage and trauma activation protocols customized to the three response areas (Anchorage, Southeast, and the bush).

Disaster Preparedness

• Integrate all components of the trauma system into state and local disaster planning activities.

System-wide Evaluation and Quality Assurance

• Develop an initial set of 3-5 statewide system performance indicators from among the list of nine provided in the Pre-Review Questionnaire.

Trauma Management Information Systems

• Ensure that all elements considered essential to system development, evaluation and performance improvement in the State of Alaska are included and functional in the new trauma registry and are consistent with the National Trauma Data Standard definitions.

Statutory Authority and Administrative Rules

System Leadership

• Form an Alaska Technical Advisory Committee (ATAC) and task it with providing the Alaska Council on Emergency Medical Services (ACEMS) with recommendations regarding the following functions: data systems, trauma system planning, system-wide performance improvement and patient safety, trauma education (Advanced Trauma Life Support [ATLS], Trauma Nurse Core Curriculum [TNCC], Prehospital Trauma Life Support [PHTLS], etc), trauma center review and certification, injury prevention and control, public policy, and research.

- Enact legislation to expand the membership of the ACEMS to represent the trauma system and to include the following members appointed as follows:

  - One member, appointed by the Governor, shall represent the Alaska Chapter of the American College of Surgeons Committee on Trauma.
  - One member, appointed by the Governor, shall be a general surgeon who routinely participates in the care of injured patients.
  - One member, appointed by the Governor, shall represent the Alaska Chapter of the American Academy of Pediatrics.
  - One member, appointed by the Alaska Legislature, upon the recommendation of the Speaker of the House of Representatives.
  - One member, appointed by the Alaska Legislature, upon the recommendation of the President of the Senate.

Objectives and Methodology

- The Coalition for American Trauma Care commissioned Harris Interactive to conduct a survey of the public's views of and support for trauma systems.
- Telephone interviews were conducted with a nationally representative sample of 1000 adults aged 18 and over, between November 3rd and 14th, 2004.
- Final data were weighted by age, education, gender, income, and region, where necessary, using 2003 Current Population Survey data to adjust for sampling biases, if any.
- With 1,000 respondents, the sampling error is +/- 3%.

Key Topics

- Knowledge about leading causes of death
- Perceived value of and expectations about trauma centers
- Perceived value of and expectations about trauma systems
- Willingness to support funding of trauma centers and systems
- Disaster preparedness and trauma systems

Harris Interactive Ground Rules For Publicly Released Surveys

- Harris Interactive Inc. has very strong ground rules for surveys which may be publicly released. No other survey firm has stronger rules.
- Our **Five Rules** ensure that our surveys are never used to lead or mislead policymakers or the public. We do not do "hired gun surveys."
  1. **The survey must be fair, balanced and comprehensive.**
  2. **If the survey is publicly released, the full survey report must be released.**
  3. We will not include questions for possible publication about our clients' company or their products or brand names, or the names of their competitors. (The one exception: we sometimes do readership surveys or audience measurement surveys which ask about our clients.)
  4. **The survey must not be used to mislead the public, the media, policymakers or anyone else.**
  5. **We need to review the information that is being released prior to its release in order to check for accuracy.**

Overview

- Most Americans are not aware that injury is the leading cause of death for children, youth, and adults under the age of 34.
- After hearing a description of a trauma center, Americans value them highly and appreciate the importance of having one within easy reach.
  - Almost all Americans feel it is extremely or very important to be treated at a trauma center in the event of a life-threatening injury.
  - Nearly nine in ten Americans think it is extremely or very important for an ambulance to take them to a trauma center in the event of a life-threatening injury, even if it is not the closest hospital.
  - Nearly all Americans *believe* that if they had a serious or life-threatening injury, they *would* be taken to the hospital that is best equipped to handle their specific injury in less than 1 hour.
- Majorities of Americans feel that having a trauma center nearby is as important as or more important than having a Fire Department or Police Department.

Overview (cont.)

- After hearing a description of a trauma system, nearly all Americans recognize the importance of having a trauma *system* in place in their state.
- Large majorities feel that having a trauma *system* in place is as important as or more important than having State Police or HAZMAT teams.
- About two in three Americans would be extremely or very concerned if they learned that the trauma system in their state did not meet recognized standards. (*However, a 2002 survey of the status of trauma system development conducted by the Health Resources and Services Administration of the U.S. Department of Health and Human Services shows that only 8 states have fully developed trauma systems, 12 states do not have the authority to designate trauma centers, and the rest are in varying stages of partial development.*)
- Americans are willing to spend their own money to have trauma centers and systems in place in their states.
- Generally, Americans have high expectations of their states' trauma centers and systems when it comes to handling natural disasters or terrorist attacks.

A BILL

FOR AN ACT ENTITLED

"An Act relating to state certification and designation of trauma centers; creating the trauma care fund to offset trauma care provided at certified and designated trauma centers; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 18.08.082 is amended by adding a new subsection to read:

(c) The commissioner shall establish special designations in regulation for varying levels of trauma care provided by a certified trauma center that shall be used to set compensation eligibility and amounts under AS 18.08.085. The designations shall be based on nationally recognized standards and procedures.

*** Sec. 2.** AS 18.08 is amended by adding a new section to read:

Sec. 18.08.085. Trauma care fund; creation. (a) The trauma care fund is created. The purpose of the fund is to compensate certified trauma centers in the state that receive a special designation under AS 18.08.082(c).

(b) The fund consists of money appropriated to it by the legislature, including

donations, recoveries of or reimbursements for awards made from the fund, income from the fund, and other program receipts from activities under this chapter. Appropriations to the fund do not lapse.

(c) The commissioner shall administer the fund in accordance with the provisions of this chapter. The commissioner shall spend money from the trauma care fund for the purpose established in (a) of this section.

(d) The commissioner shall establish compensation standards under this section. The standards must include funding priorities for trauma centers receiving a special designation under AS 18.08.082(c). The commissioner may seek the advice of a special committee for review of statewide trauma care and compensation standards.

(e) The commissioner may not provide more than 25 percent of the total assets, including earnings, of the fund in a fiscal year to one trauma center.

*** Sec. 3.** This Act takes effect immediately under AS 01.10.070(c).

ALASKA STATE LEGISLATURE

REPRESENTATIVE BOB HERRON

State Capitol, Room 411, Juneau, AK 99801-1182 (907) 465-4942

HB 168 Designate Trauma Centers and the Trauma Care Fund

Sectional for Version P

Section 1. AS 18.08.082 currently prescribes by regulation criteria for training programs and for personnel involved in emergency medical services. This section adds a requirement for the commissioner of Health and Social Services establish special designations for varying levels of services offered by a certified trauma center.

Section 2. Establishes a trauma care fund to be used to compensate certified trauma centers for trauma care. The fund can accept money appropriated by the legislature, which can include donations, income from the fund, and of the other designated receipts. The commissioner required to establish compensation standards and is given authority to establish a special committee for review of the program and limits are set on the distribution of the funds.

Section 3. The bill has an immediate effective date.

Alaska Statewide Trauma System

Fact Sheet

What is Trauma?
Trauma is any bodily injury from external force. Although many people think of trauma as "accidents", it is better thought of as a disease. Like heart disease and cancer, trauma has identifiable causes and risk factors; and like these conditions, prevention is the best strategy. However, even with the best prevention efforts we still need to be able to take care of the seriously injured. We need to show the same commitment that we brought to cardiac and cancer treatment to trauma care. The seriously injured require timely diagnosis and treatment by health care professionals who are appropriately trained and provided with the necessary resources to reduce the risk of death or permanent disability.

Impact of Trauma in Alaska
Trauma is a tremendous burden on families and communities. In the 1990s, nearly 5,000 Alaskans died from trauma.

- For Alaskans, ages 1 to 44, trauma is the leading cause of death.
- On average, more than 400 Alaskans die from trauma each year. For every injury death, eleven people are hospitalized for trauma-related injuries. For every trauma death that occurs in the hospital, there are an estimated 3 people discharged with permanent disability.
- On average, more than 800 Alaskans are hospitalized each year for central nervous system injury (spinal cord and brain injuries).
- In 2004, motor vehicles were the leading cause of injury death (117), followed by firearm-related injuries (116).
- In 2004, the economic cost of hospital stay alone for trauma patients in Alaska was estimated at over $73 million. One in four hospital admissions were uncompensated.

Years of Potential Life Lost to Trauma
Death from trauma is tragic at any age. Society's loss is especially great because so many young people die from trauma. The impact can be measured in "years of potential life lost:" the number of years between early death from injury and the average age of death at age 70. Using years of potential life lost, trauma is the leading cause of potential life lost for all Alaskans followed by cancer and heart disease.

What is a Trauma System?
A trauma system is a predetermined, organized, multidisciplinary response to managing the care and treatment of severely injured people. It spans the full spectrum of care; from prevention and emergency care to recovery and rehabilitation. Best practice standards guide each stage of care to ensure that injured patients are promptly transported to and treated at facilities appropriate to their severity of injury and that they receive optimal care at each stage of their treatment.

A statewide trauma system also provides a framework for disaster preparedness and response. As part of its activities, a trauma system coordinates and monitors the

Alaska Brain Injury Network
www.Alaskabraininjury.org

movement and care of severely injured people. Ideally, the trauma system identifies the needs and resources available at any moment and responds to insure optimal care.

Why Have a Trauma System?
For a severely injured person, the time between an injury and receiving definitive care is the most important predictor of survival—the "golden hour." The chance of survival diminishes with time, despite of the availability of resources and modern technology. A trauma system enhances the chance of survival by making sure that patients are brought to the most appropriate facility in the most efficient manner and that they receive optimal care each step of the way. Trauma systems benefit everybody regardless of income, race, party affiliation or locale. States with mature, comprehensive statewide trauma systems have experienced:

- A 9 percent decrease in motor vehicle crash deaths.
- A 15-20 percent increase in the survival rates of seriously injured patients.
- An increase in productive working years.
- An improvement in statewide disaster preparedness.

Disaster Preparedness
Trauma systems play a vital role in the community response to natural disasters or manmade incidents. Despite concerns over bioterrorism, experience has shown that the vast majority of terrorist attacks will involve explosive devices. We also do know that Alaska will experience major earthquakes in the future. A functioning trauma system is the framework for developing an organized coherent response to these incidents

Alaska's Trauma System
In 1990, state authority for designating trauma centers was created in Alaska. Under this statute hospital participation is entirely voluntary. Criteria were established and the process for designation at Levels I-IV outlined. Since the original legislation there have been only three hospitals that have been designated by the state. One level II and four level IV centers. Clearly to fully realize the benefits of a trauma system more widespread participation is needed. Alaska's trauma system is ideally an inclusive system, recognizing the vital role that rural communities, hospitals and health care professionals play in the care and management of the trauma patient. Wide-scale involvement is critical to get optimal outcomes for the seriously injured.

Review of Alaska Trauma Care by the American College of Surgeons November 2008

The Alaska Department of Health and Social Services (DHSS) recently contracted with the Committee on Trauma of the American College of Surgeons to review trauma care in Alaska. The full report is available on the DHSS website (www.chems.alaska.gov). It notes our strengths and weaknesses and makes recommendations for improving trauma care in our state.

Strengths include: well established injury prevention programs; extensive and creative networks for ground and air medical transport; medical subspecialty availability at three

Anchorage hospitals; and a good relationship with Harborview Medical Center (Level I trauma center) in Seattle.

Deficiencies include the lack of an additional Level II trauma center in Anchorage and the existence of two patterns of trauma care, one for Alaska natives that follows national standards and one for the rest of the state. The review team members noted that among the nontribal hospitals " few of the facilities serving the majority population have made a similar commitment to achieving nationally recognized standards of trauma care". They also noted that there is no statewide trauma plan and no incentive or requirements for hospitals to participate in the system. Additionally, there are few resources at the state level for trauma system management and coordination. Perhaps as important as any of the above, they noted that there seemed to be very little public awareness of trauma system issues.

The review team made 15 priority recommendations. Several involve better organization of state resources and development of a comprehensive statewide trauma plan. The most sweeping recommendation was that all acute care hospitals be required to become designated trauma centers at a level appropriate to their resources and size within two years. They further stated that there should be a second level II trauma center in Anchorage as soon as possible. In addition, an assessment of pediatric trauma care needs should be completed with the goal of developing at least one pediatric trauma center of excellence.

The Alaska Trauma Systems Review Committee oversees the statewide trauma system in Alaska. The system addresses four primary components: trauma hospital designation criteria; trauma registry (monitors system performance and provides feedback for improvement); EMS/pre-hospital triage and transport guidelines; and inter-facility (hospital to hospital) transfer guidelines.

Where To Go From Here

- Increased hospital participation is necessary for the statewide trauma system to function optimally.
- There need to be incentives for hospitals to provide the staff and resources required for trauma center designation.
- Legislation to cover the cost of uncompensated trauma care and to limit the medical liability for care given at designated trauma centers are two incentives that have been successful in other states.

  House Bills 168 and 169 have been introduced by John Coghill to encourage hospitals to participate in the trauma system by covering some of the cost of uncompensated trauma care when it is given at designated trauma centers.

The goal of the statewide trauma system is to see every hospital in Alaska designated at an appropriate level.

- *Surveys show that the general public overwhelmingly supports having a hospital in their community that is prepared for and capable of effectively managing a seriously injured patient—and are willing to pay for it!

*2005 Harris Interactive poll, "The American Public's Views of and Support for Trauma Systems: A Congressional Briefing."

Trauma-Emergency Medical Services System in Alaska

Background:

Alaska's Trauma-EMS System is a work in progress. A great deal has been accomplished since 1992 when the state received the first year of a three-year federal grant specifically targeted toward trauma care system development. Since federal funding has been re-instated, there has been further momentum in enhancing our system.

We currently have a committee the Alaska Trauma System Review Committee that assists the State in the development, enhancement, and evaluation of our Trauma-EMS System.

In 1993 Alaska passed enabling legislation for trauma care system development and accompanying regulations, (AS 18.08.010-015, and 7 AAC 26.710-745) were adopted in 1996.

Trauma Center Designation:

An important component of Alaska's trauma care system is certified trauma centers. Trauma centers provide an organized and timely response to traumatic injury. What this means in Alaska is:

- The hospital has demonstrated commitment to providing the best trauma care possible by allowing experts to review staffing and qualifications, procedures, protocols and resources;
- The hospital meets state and national standards for providing timely and optimal care for the trauma patient, and;
- The hospital is prepared to treat and transport trauma patients according to Alaska's system-wide plan.

There are four levels of trauma center designation/certification. Alaska has adopted the criteria set forth by the American College of Surgeons Committee on Trauma (ACSCOT). Prior to applying for state certification, Level I, II, and III

American College of Surgeons recommendations for a trauma system:

- ACS Recommendations Presentation

Trauma Training:

Continuing education training in trauma care for healthcare providers is an important component of a Trauma-EMS System.

Advanced Trauma Life Support (ATLS) Courses are offered periodically throughout the year in Anchorage at the Alaska Native Medical Center (ANMC) and occasionally in other areas of the state. For more information on the ATLS courses at ANMC, contact Mary Leemhuis, RN at (907) 729-2729; or Casie Williams, RN at (907) 729-2936. In addition, Providence Alaska Medical Center is providing ATLS courses. Contact Jeanne Molitor, RN for information.

Basic Trauma Life Support (BTLS) Courses are offered periodically through the EMS Regional offices. Contact the nearest office for more information.

Trauma Nursing Core Course (TNCC) and Emergency Nursing Pediatric Course (ENPC) are other courses available around the state. For more information contact Jeanne Molitor, RN. For TNCC only contact Mary Leemhuis, RN or Margaret (Rocky) Carloni, RN.

Trauma care continuing medical education training is often available at the State and Regional EMS Symposia. Click HERE for more information.

Alaska Trauma Registry:

Alaska is very fortunate to have a great

Copy on file

trauma centers must complete an application to ACSCOT and have a verification visit by a team from ACSCOT. Using ACSCOT criteria, Level IV trauma centers are verified by a state team, appointed by the Alaska Division of Public Health.

• **Level I – Regional Resource Center** – Level I Trauma Centers generally serve large cities or population-dense areas. A Level I Trauma Center is responsible for providing leadership in research, professional and community education. There are no Level I Trauma Centers in Alaska because, there are no trauma research and teaching facilities in Alaska.

• **Level II – Regional Trauma Centers** – A Level II Trauma Center provides comprehensive trauma care and serves as a lead trauma facility for a geographical area. A Level II Trauma Center provides educational outreach and prevention programs and assumes responsibility for trauma system leadership. There are emergency physicians and nurses in-house to initiate resuscitation and stabilization, with surgical teams on call and promptly available.

• **Level III – Area Trauma Center** – The Level III Trauma Center provides assessment, resuscitation, emergency surgery, and stabilization and, for the most critically injured patients, arranges for transfer to a Level I or Level II trauma center that can provide further definitive care. A general surgeon must be promptly available and the facility must be involved with prevention and have an active outreach program for its referring communities.

• **Level IV – Local Trauma Stabilization Center** – Level IV Trauma Centers are small rural facilities that provide initial evaluation and assessment of injured patients prior to transfer to a larger referral facility.

For more information, you can download a brochure about Trauma Center Certification in Alaska.

American College of Surgeons is a scientific and educational association of surgeons founded to improve the quality of care for the surgical patient by setting high standards for surgical education and practice. The Committee on Trauma works to improve the care of injured and critically ill patients – before, en route to, and during hospitalization. Their web site has information on trauma center designation and Advanced Trauma Life Support courses.

American Trauma Society is dedicated to the prevention of trauma and improvement of trauma care. The society is a strong advocate for injury care and prevention and have numerous programs.

American College of Emergency Physicians promotes the highest standards of patient care through its advocacy and leadership efforts. Their web site has numerous resources on a variety of topics.

TRAUMA.ORG provides global education, information and communication resources for professionals in trauma and critical care.

Alaska Trauma/EMS List Server

Alaska Trauma/EMS program is pleased to announce the list server that we have developed to disseminate information from the federal and state Trauma/EMS programs. This forum can also be used to improve communication between the facilities and open opportunities for sharing. Please be advised that if you send a message via the list serve it will go to everyone that is a member.

PREPARING FOR THE WORST: STATES ADDRESS TRAUMA CENTERS' TROUBLES

By Christina Kent

Victims of traumatic events are at least 25 percent more likely to live if they're taken to a certified trauma center than if they are taken to a non-trauma center, according to a carefully controlled, nationwide study in the Jan. 26 *New England Journal of Medicine*.

That finding could give a boost to state legislators who are scrambling to find new sources of funds for the centers, which provide care for the most expensive conditions in the nation. In January, the Agency for Healthcare Research and Quality reported that trauma disorders have become, for the first time, the most expensive condition to treat. According to the agency's Medical Expenditure Panel Survey, trauma-related disorders cost the nation $71.5 billion in 2003 – topping the cost of treating heart conditions ($68 billion), cancer ($48 billion), mental disorders ($47 billion), and cardiopulmonary disease and asthma ($46 billion).

Trauma centers differ from general hospital emergency departments in that they provide, on a 24/7 basis, teams of trauma surgeons, plastic surgeons and other specialists who can deal with the most severe injuries within the "golden hour" – the early period of trauma where skilled intervention may mean the difference between life and death or life-long disability. The centers are capable of dealing with the most severe, life-threatening injuries, including blunt force wounds, multiple internal injuries, burns, broken bones and severe shock.

"Trauma is the number one killer of people aged one to 40," said Dr. J. Wayne Meredith, chairman of the American College of Surgeons' trauma committee. "One of the most prominent tools to prevent those deaths is the trauma system."

The nation's approximately 600 regional trauma centers – which also are often public and teaching hospitals – collectively lose $1 billion a year, according to Connie Potter, executive director of the National Foundation for Trauma Care. And they're facing growing pressure from rising health-care costs, increases in the number of un- and underinsured patients, and physicians' growing unwillingness to provide on-call trauma care, which many regard as underpaid and highly risky (because of possible malpractice lawsuits).

A 2004 report by the Foundation says that, without corrective action, the current rate of closures among the nation's trauma centers will increase, and 10 percent to 20 percent will close within three years.

Preventing Closures

States play an enormously important role in providing trauma care. Not only do they pass legislation authorizing state agencies to design trauma systems, but they strive to keep the trauma centers functioning by channeling to them special funding streams.

Since car crashes are the number one cause of trauma (see chart), many states elect to help pay for trauma care by imposing fines on individuals who are convicted of drunken or reckless driving, or who lose their driver's

license. Some states also use revenues from tobacco, alcohol or firearms taxes, while others tax auto insurance or fine persons convicted of illegal drug distribution.

A number of states are currently considering legislation to shore up their trauma centers; some bills would address the crisis in getting physicians to provide on-call trauma care by increasing their reimbursement.

In New Mexico, HB 356 and SB 356, introduced at the behest of Gov. Bill Richardson, would provide $6 million to create a trauma system fund. Of that amount, $4 million would go to support trauma services at the University of New Mexico hospital and $2 million would go to strengthen the trauma system throughout the state.

In Hawaii, the Legislature is considering HB 3142, which states that Hawaii's "extreme isolation and limited physician re-supply capability renders Hawaii uniquely vulnerable to natural disasters that may occur in a mid-Pacific environment." The bill would create a fund to reimburse the state's only trauma center for documented un- or under-compensated care (including supplemental funding for treatment given to Medicaid beneficiaries). The fund would draw money from state surcharges, the state's environmental response revolving fund, as well as any funds that are separately appropriated by the Legislature or granted by Congress (as long as they don't place an obligation upon the Legislature to continue the purpose for which the federal funds are made available).

In Florida, HB 1697 and HB 497 were signed into law in 2005 after first being vetoed by the governor, who reportedly had concerns about the way the funds were to be distributed. The first bill is expected to raise as much as $4.7 million annually for the state's trauma centers by increasing the penalties for motorists who cause serious injuries (they now will be charged $500) or fatalities ($1,000) in traffic accidents.

The second bill will provide new funding for in-state trauma care by increasing the fine for running a red light from $60 to $125. Florida's 20 trauma centers incur an annual net loss of $96 million, said Amy Maguire, director of the Alliance to Save Florida's Trauma Care. The funds will be distributed to the hospitals based on their state of "readiness" (e.g., how many physicians are on call), and the severity and volume of injuries treated.

Pennsylvania, which has one of the oldest trauma systems in the nation, is considering a bill (HB 502) that would seek to retain trauma providers by increasing their reimbursement. The bill notes that many high-risk health-care providers and institutions in the state are being paid less than Medicare rates by private insurers. "[H]igh-risk health-care providers and institutions may leave this Commonwealth or close down if the low reimbursements continue," the bill states. It would require insurers to pay 25 percent more than the Medicare fee to high-risk providers (defined as those who pay malpractice premiums in one of the four highest classes) for providing covered treatment to trauma patients at a state-accredited Level 1 or 2 trauma center – or the provider's "usual and customary charge," whichever is less.

If states play the primary role in creating trauma centers, the federal government historically also has contributed. For years, the Health Research and Services Administration's (HRSA) Trauma/Emergency Medical Services program provided grants to states to help them plan trauma systems. But the federal FY 2006 budget zeroed out funds for that program. It had been funded at about $3.4 million a year since 2001, Potter said, and grants to individual states had averaged about $40,000 per state.

Both Potter and Meredith were highly critical of the fact that the program was eliminated. "Having a federal agency that supports trauma care is critical," Meredith said. "It's the catalyst, the grist of the mill." Trauma costs the nation billions of dollars a year, he noted. "Spending $3 to $4 million to keep that on track seems like a pretty good investment to me." Repeated calls to HRSA for comment were not returned.

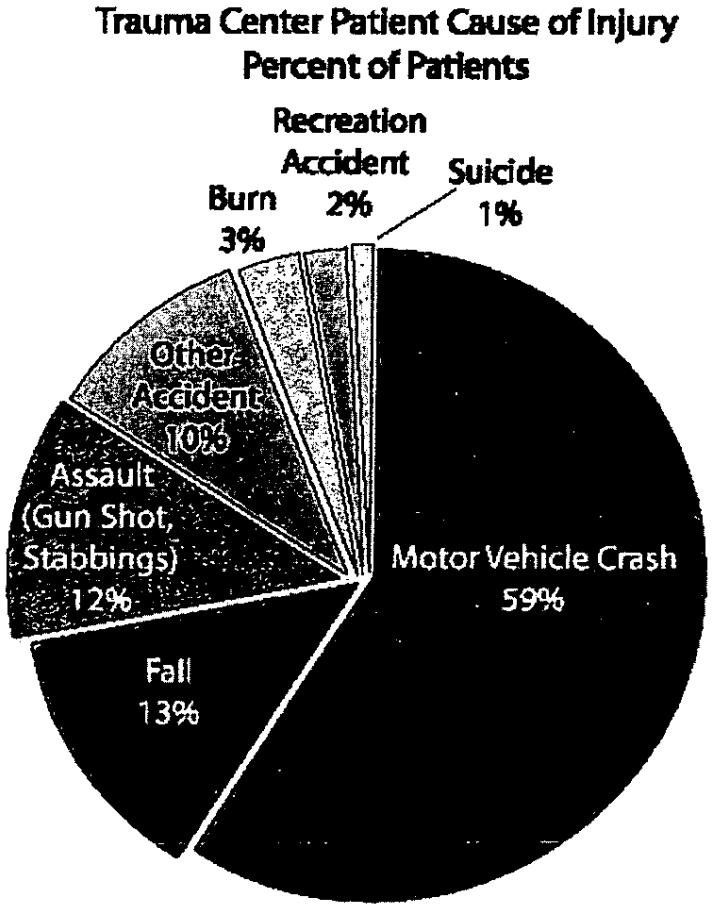
How Many?

September 11th and Hurricanes Katrina and Rita have raised the profile of trauma centers. But it's not clear how many centers the nation needs. A September 2005 issue brief by Charles Branas at the University of Pennsylvania notes that the geographic distribution of trauma centers varies widely across states and regions. Branas and colleagues calculated that 84.1 percent of the U.S. population has access to a Level 1 or 2 trauma center within one hour. (Level 1 and 2 trauma centers provide the most sophisticated care; Level 3 centers transport the most severely wounded patients to a Level 1 or 2 center.)

The Northeast has the greatest access, followed by the West, the Midwest, and the South. About 36.7 million people – most of whom live in rural areas – do not have access within one hour, Branas found.

A significant proportion of people could reach a trauma center within the "golden hour" by crossing state lines, Branas pointed out. As of 2005, 47 states had protocols to enhance interstate cooperation during mass casualty incidents, but just 31 states had standardized protocols for border crossing of day-to-day trauma patients.

Policymakers who are trying to evaluate their trauma systems can measure how long it takes their state's residents to reach a trauma center, in comparison to national norms, Branas suggested. This would enable policymakers to "more realistically allocate scare resources," he wrote.



Tara Lubin contributed reporting to this story.

alaska
brain injury
network

Every 15 seconds someone sustains a traumatic brain injury (TBI) in the U.S.

Thirty years ago, only half of all people with brain injury survived; now 78% survive. This means that many individuals now live with significant disability requiring a full range of services.

Every year the Alaska Department of Health & Social Services reports about 800 traumatic brain injury (TBI) cases resulting in hospitalization or fatality. The Alaska TBI rate is 28% higher than the national average. The TBI rate in rural Alaska is one of the highest in the nation.

It is estimated that at least 10,000 Alaskans are living with brain injury today.

The Alaska Brain Injury Network, Inc. (ABIN) is a non-profit organization dedicated to Alaskans whose lives have been changed by brain injury.

ABIN's Board of Directors represent all regions of Alaska and the extended brain injury community – survivors, family members, service providers, health educators, researchers and those who write laws and policy.

ABIN works with their Alaska Mental Health Trust Authority partner boards to advocate for policy changes, programs, and facilities to better serve the brain injury population.

ABIN's staff focuses on early identification, connecting brain injury survivors with services, providing support and education for families, and bringing professional training to Alaska.

The goal for every brain injury survivor is the best possible recovery for a fulfilling and productive life. Achieving that goal requires full range of services close to home. This includes...

- Prevention
- Early identification and intervention
- Access to skilled specialists
- Community-based post injury services
- Continuing rehabilitation
- Brain injury support groups and in-state resources

What you can do...

- **Be aware of the burden of brain injury nationally and to the state of Alaska**
- **Support a TBI Resolution for Brain Injury Awareness Month.**
- **Become familiar with ABIN Priorities in the GF/MH Budget; Prevention, Training, and Resource Navigation**

Upcoming ABIN Priorities

In-state rehab facility – for neurobehavioral beneficiaries.

Brain Injury Waiver - recommendations for the current Medicaid waiver system to accommodate the services needed by brain injury survivors: neuropsychological assessment, cognitive and functional therapy, case management, counseling, home modifications, transportation, respite care, and more.

TBI Screening and early intervention – promotes better recovery and saves money.

Attracting doctors

Legislature can raise Alaska's stake in competition for docs

Published: March 10th, 2009 06:54 PM
Last Modified: March 10th, 2009 06:54 PM

Alaska's shortage of primary care doctors has been described as grim. A study two years ago found **we needed 400 more doctors to provide the same level of care as is available elsewhere in the country**. One result is that few doctors will accept the low rates paid by Medicare, the government insurance for those 65 and older. **It's a horrible situation for Alaska's senior citizens.**

Two bills introduced during this legislative session would help relieve the shortage of doctors and other health care workers, and both are worth passing.

Senate Bill 18 would increase the number of state-subsidized medical students in each class of the WWAMI program operated through the University of Washington. Alaska WWAMI students spend their first year of study at UAA.

These students offer an excellent return – according to the Alaska Physician Supply Task Force study in late 2006, half of Alaska WWAMI students end up practicing in the state, and a few WWAMI students from other states join them.

The state raised the number of Alaska WWAMI students in each class to 20 in 2007.

SB 18 would increase the number by a modest amount, to 24. That's the most UAA can accommodate without incurring expensive overhead costs, said Sen. Bill Wielechowski of Anchorage, the bill's sponsor.

Adding the four students would cost the state little to no money the first year. But by the fourth year, when we would have an additional 16 Alaska students in med school, the state cost is estimated at $550,000 per year.

A second bill, SB 139 [by Sen. Donny Olson], calls for the state to pay financial incentives to already-qualified doctors, nurses or other health workers if they take certain jobs in Alaska.

The bill, with a bipartisan group of sponsors, would carry out a plan developed by a group of health care professionals including representatives of the Alaska Primary Care Association and the Alaska State Hospital and Nursing Home Association.

The state would offer financial incentives to as many as 90 workers, from physicians to nurses, to come work in Alaska. Those who take hard-to-fill jobs, or treat a share of uninsured patients or those on Medicare or Medicaid, would get priority.

3/12/2009

Each person would be guaranteed the incentive for three years as long as they kept working here.

The state would either repay part of their student loans or, if the health worker didn't have loans, simply pay them directly. The individual payments would range from $20,000 per year for nurses, physicians assistants and some others, to $35,000 for doctors, pharmacists and dentists, to $47,000 for doctors who accept the hardest-to-fill positions.

The state's cost for three years' worth of incentives would be $7.5 million.

That sum is large enough to cause concern this year, with a big drop in state revenues anticipated.

But consider this: Forty-four of the 50 states already offer financial incentives to lure health workers. Alaska is not competitive for health care jobs, and people are suffering because of it.

BOTTOM LINE: **The Legislature should pass two bills to relieve a critical shortage of health care workers in Alaska.**

Not now

Obama right to nix mileage tax

States and the federal government rightly worry that they'll see less revenue to pay for road work as Americans turn to more fuel-efficient vehicles and future technology takes us further from the internal combustion engine.

One solution is **a mileage tax, whereby vehicles would be equipped with GPS tracking devices and people would be taxed according to the miles they drive rather than the gallons of gasoline they purchase.**

Oregon has already run a pilot program for such a tax, and a federal mileage tax has gained favor in the Democratic Congress despite the opposition of President Obama.

Concerns for revenue and how to pay for road building and maintenance are valid. But the mileage tax is the wrong solution, at least for now.

First, a major shift in transportation tax policy shouldn't be done on the fly in the middle of an economic crisis. There are too many unanswered questions. Among them:

• Is the ability to track people's driving one we want governments to have?

• How does such a tax encourage the use of higher-mileage vehicles? Is the owner of a hybrid getting 35 mpg going to pay the same tax as the owner of a gas-guzzling Hummer?

• Do we really want to charge people more for miles driven during rush hours, a premium that's been suggested in some states?

Raise the gasoline tax if necessary, but let's not be talking about a mileage tax until we've done a lot more research.

BOTTOM LINE: Mileage tax? Maybe down the road. Maybe.

COMPASS: *Points of view from the community*

Alaska needs a better trauma system

By FRANK SACCO and MARK S. JOHNSON

Alaska is much safer than it was a generation ago. From 1980 to 2004, the unintentional injury death rate dropped more than 50 percent. Without this improvement, an additional 300 Alaskans would have died in 2004. However, Alaska's 2004 rate remained 30 percent above the national average.

We are all aware of the terrible toll of cancer and cardiovascular diseases, but the leading cause of death for people younger than 44 is injury. It remains a major cause of death and disability for all age groups. For every death approximately three people are left with permanent disabilities.

As with other diseases, prevention is preferable to treatment. Alaska's dramatic reduction in injury deaths is largely attributable to prevention, including use of child restraints and safety belts, reduced rates of drunken driving, and increased use of personal flotation devices. Though prevention is paramount, we also must be prepared to provide the best possible care for those who become injured.

A trauma system is an organized, state-coordinated effort to deliver the full spectrum of care to injured people. The integration of EMS systems, public safety agencies, air medical services and health care facilities ensures that patients receive the most efficient, effective care possible from time of injury through rehabilitation. Trauma systems have been shown to reduce death from injury by as much as 25 percent and are recognized as an integral part of a state's EMS and disaster response system.

According to a 2004 Harris poll, most people want a comprehensive trauma system in their area. Throughout the United States, 83 percent of those surveyed felt a trauma system was as essential as having a fire department and 80 percent were willing to pay extra for it. Interestingly, though 75 percent thought there was a trauma system in their state, only eight states have fully functioning systems and 15 states have no system.

Sacco

Alaska is blessed with exceptional physicians and quality medical resources; but lack of an organized trauma system means that access to timely, quality care cannot be assured.

Johnson

Where do we stand? In 1998, the Alaska Legislature provided authority to the Department of Health and Social Services to verify and certify trauma centers. The statute does not require, or provide incentives for, hospital participation. It does state that no hospital can represent itself as a trauma center unless certified by the state.

Regulations adopted in 1996 require trauma centers to meet standards developed by the American College of Surgeons. Four levels are recognized, from Level I (highest) to Level IV (trauma stabilization facility). There are adequate medical resources to establish Level II trauma centers in Anchorage. In addition, it is feasible to establish Level III and IV centers throughout the state. Because of long transport times, centers of all levels are essential for improving outcomes.

Since the statute and regulations were enacted, only three of 24 eligible hospitals have successfully completed the verification and certification process. (Alaska Native Medical Center — Level II, Yukon Kuskokwim Regional and Norton Sound Regional Hospitals — Level IV).

Alaska is blessed with exceptional physicians and quality medical resources, but lack of an organized trauma system means that access to timely, quality care cannot be assured. In recent years there have been times when critical specialties such as neurosurgery and vascular surgery have been unavailable for emergencies, necessitating transfer of some critical patients to Seattle.

Here are four steps to improve trauma care in Alaska:

1. Residents need to let legislators know that quality trauma care is important.

2. The Legislature should put teeth and incentives in the current statute. Successful approaches in other states include requiring trauma center certification at some level as a condition for hospital licensing and limiting medical liability for injuries treated at trauma centers.

3. Tertiary hospitals should ensure availability of critical sub-specialists 24 hours a day, seven days a week.

4. Local EMS and medical providers should organize regional trauma systems and integrate them with the statewide system.

Developing a comprehensive statewide trauma system, and expanding injury prevention efforts, will make Alaska a safer, healthier place to live.

■ Dr. Frank Sacco is chief of surgery at the Alaska Native Medical Center and chairman of the Alaska Chapter of American College of Surgeons Committee on Trauma. Mark S. Johnson was chief of Emergency Medical Services in the Department of Health and Social Services from 1979 until he retired in 2004.

Emergency trauma care needs improvement in Alaska

BY MARK S. JOHNSON and FRANK SACCO, M.D.

Johnson

You can be confident that you will receive emergency trauma care that compares favorably with care virtually anywhere else in the nation. Right? Maybe, but maybe not.

Sacco

Imagine you and your family driving across Anchorage. As you pass through a major intersection, a drunk driver runs a red light and hits your vehicle broadside. In an instant, you and your passengers face a life or death situation. If you're still conscious, you may think: thank God this happened in Anchorage where we have state of the art emergency medical services.

The Anchorage Fire Department has exceptional ambulance services, staffed with well-trained paramedics. Local hospitals have sophisticated emergency departments staffed 24 hours a day with qualified emergency medicine physicians, nurses and support personnel.

You can be confident that you will receive emergency trauma care that compares favorably with care virtually anywhere else in the nation. Right?

Maybe, but maybe not.

Though Alaskans die from injury at the second highest rate in the U.S., there is no statewide system of trauma care. In Anchorage, only the Alaska Native Medical Center has been verified by the American College of Surgeons and certified by the State of Alaska as a trauma center (Level III). Neither Providence nor Alaska Regional Hospital has achieved this national standard.

Trauma center certification means that a hospital has surgical teams readily available to take care of the most seriously injured patients at all times. Backup teams are available and outcomes are continuously reviewed to improve care.

Serious traumatic injuries can produce internal bleeding in the brain, spinal cord or internal organs. Often, this bleeding can be stopped only by surgeons in hospital operating rooms. Studies have verified the "golden hour" of trauma, meaning that critically injured persons have increased chances of survival if cared for within that time. Trauma centers, as part of a system of care, have been shown to decrease the mortality of the seriously injured as much as 25 percent. Although rural areas may not meet the golden hour standard, improvements in the statewide system have been shown to achieve better outcomes for patients seriously injured in remote areas as well.

The Alaska Department of Health and Social Services recently contracted with the Committee on Trauma of the American College of Surgeons (ACS) to review Alaska's trauma care. That review notes Alaska has excellent injury prevention programs, extensive and creative helicopter and ground air medical transport, medical specialists in Anchorage and a good relationship with Harborview Trauma Center (Level I) in Seattle.

Among Alaska's deficiencies: Anchorage does not have another Level II trauma center, so there are two systems of trauma care, one for Alaska Natives that follows national standards and another for non-Natives. The team identified no statewide trauma plan and no incentives or requirements for hospitals to participate in the system. State government devotes few resources to coordinating trauma care, and there seems to be very little public awareness of these issues.

The review team recommended requiring all acute-care hospitals to become designated as trauma centers at a level appropriate to their resources and size within two years (Levels II, III or IV). They recommended getting a second level II trauma center in Anchorage as soon as possible, along with a pediatric trauma center. Currently due to a shortage of Anchorage surgeons willing to take care of children, some seriously injured non-Native children may need to be treated at the Alaska Native Medical Center.

Representative John Coghill Jr. recently introduced House Bills 188 and 189 to create incentives for hospitals to become trauma centers and to offset some of the cost of uncompensated trauma care. The Department of Health and Social Services should be commended for this comprehensive and impartial review of trauma care in Alaska. We urge Alaskans to support these bills and encourage the legislature and Gov. Palin to carefully consider the recommendations in the ACS report.

We hope the scenario above never happens to you but, if it does, let's make sure that the care we expect for our loved ones is available for all Alaskans when we need it.

Mark S. Johnson, MPH, retired ex chief of Community Health and Emergency Medical Services for the State of Alaska in 2004. Frank Sacco, M.D. is chairman of the Alaska Trauma Systems Review Committee. The full report on Alaska's trauma care system is available at www.chems.alaska.gov.

More Funding Needed To Fight Brain Injuries In Alaska

By Corey Allen-Young, CBS 11 News Reporter
KTVA

Posted:02/26/2009 05:34:33 PM AKST

Known as the silent epidemic, traumatic brain injury here in Alaska is the highest in the country. That's why partnerships are being made statewide to come up with solutions. The key word is solutions as leaders are looking for a permanent fix to decreasing traumatic brain injuries in Alaska. Experiencing a traumatic brain injury can change a life forever. "The recovery process after traumatic brain injury is journey that happens daily and it will continue," said Jill Hodges, of the Alaska Brain Injury Network. With 800 Alaskans being hospitalized or dying and over 10,000 Alaskans currently living with traumatic brain injuries, the consequences could be devastating.

"Yeah it will change your life and everybody else's around you," said Frank Box, who experienced a traumatic brain injury. "It can happen to you while you are walking across the street, you can fall and slip on the ice, or if you are playing a sport or riding a bicycle especially without a helmet, you can also suffer traumatic brain injury," said Christie Artuso, who is the director of the Providence Neuroscience Center. "My brother was a such a vibrant, outgoing person, and for this to happen to him is just unreal," said Duain White, whose brother suffered a traumatic brain injury in an ATV accident.

Taking into account that traumatic brain injuries are the leading cause of death and disability among children and young adults in Alaska, the need to be aware of what exactly can cause an injury is crucial. "We can't do that without the prevention needed and the education needed of our population to tell them about TBI (traumatic brain injury) and to also tell them on how to be healthy," said Don Kashevaroff, who is the CEO of the Alaska Native Tribal Health Consortium. "What we don't have in the state of Alaska is an effective rehabilitative program for people who have been afflicted with a traumatic brain injury can be helped with cognitive therapies, thru rehabilitative therapies to return to a normal functioning life," said Artuso.

Thirty years ago, one half of people who experienced a brain injury survived. Now the number has increased to 78 percent. But officials say the problem in our state is that traumatic brain injury survivors are not getting the services needed for life long living. While people who are victims of traumatic brain injuries do receive initial help there are many questions of what happens next for them. And with money in low supply to provide any additional support, officials say other agencies could be feeling the burden.

With over 10,000 Alaskans currently living with traumatic brain injuries, getting additional care and support is badly needed. "We were just released from the hospital and that was it there was no long term therapy, there was no where to go to offer cognitive therapy, long term physical therapy," said White. "We want to help them maintain their relationships, maintain their families, maintain their lifestyles," said Artuso. "What we need are community and governmental support to do that because currently there is no resources."

Adding more resources is what folks are banking on in helping their loved ones live normal functioning lives. "Is that all we can offer him, is that the best he's going to be doing the rest of his life, its very frustrating," said White. "Treatment, rehabilitation services are essential, they are the key to recovery and sometimes eventual abilities for our brothers or sisters, and family members," said Hodges.With no programs in place to offer continuous follow up service, studies show traumatic brain survivors are more likely to be substance abusers or become jobless or homeless straining other state and city services.

DATE: April 8, 2009

RE: HB 168 – State certification and designation of trauma centers and creating the uncompensated trauma care fund
HB 169 – Appropriating $5,000,000 to the uncompensated trauma care fund

POSITION: Support

ANTHC supports HB 168 and HB 169 as important steps in increasing the trauma care capacity in the state.

The Alaska Native Tribal Health Consortium (ANTHC) is a tribally controlled, non-profit statewide tribal health organization formed pursuant to federal law to provide a range of medical and community health services for more than 130,000 Alaska Natives. It is part of the Alaska Tribal Health System (ATHS), which is owned and managed by the 231 federally-recognized tribes in Alaska and by their respective regional health organizations.

ANTHC and Southcentral Foundation jointly manage the Alaska Native Medical Center (ANMC), the tertiary hospital of the ATHS located in Anchorage. ANMC is the only Level II Trauma Center in the Indian Health Service/tribal health system nationally. ANMC is also the only Level II Trauma Center in Alaska. The nearest Level I Trauma Center is in Seattle.

Trauma system development is a public health priority. A comprehensive system of trauma care is an essential part of the public safety net. Regionalized trauma systems based on a network of coordinated Trauma Centers designated at the appropriate level improves health outcomes and reduces costs. ANMC, as the highest level designated Trauma Center in the State of Alaska, is the lynchpin for the state's trauma system, and provides the foundation for continued statewide system development.

Trauma Center designations were created as a way to improve outcomes for patients who face extraordinary medical issues. On balance, early and appropriate medical attention to life-threatening health issues reduces overall length of stay in the hospital and reduced complications for many patients. Without trauma care, the costs of health care for trauma patients will be greater, including trauma patients who are Medicaid eligible.

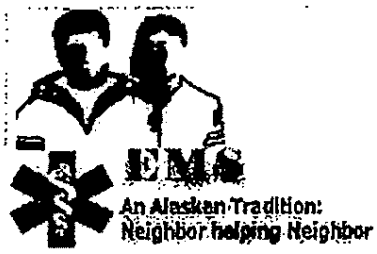
The cost of providing trauma care at ANMC has more than doubled over the past four years and funding has not kept pace. ANMC's Trauma Center simply cannot be maintained at current revenue levels. If ANMC's Trauma Center designation is discontinued because funding levels have rendered the service unsustainable, the hospital faces reductions in staffing. Diversions of patients to non-tribal providers would increase, and because the federal government reimburses 100% of the cost of services provided for Native clients at Native facilities but a smaller percentage at non-tribal providers, there would be an increased cost to the state's general fund budget.

ANTHC supports HB 168 and HB 169 as important steps by the State to encourage and support appropriate trauma care options for Alaskans. Because we are Alaska's only Level II Trauma Center we recommend removing the language in section (d) on Page 2, Line 11, that limits appropriations to any one facility to 25%.

Thank you for your consideration.

ALASKA COUNCIL ON EMERGENCY MEDICAL SERVICES

ACEMS
P.O. Box 110616
Juneau, AK 99811-0616
(907) 465-3027



April 9, 2009

Representative Coghill
Juneau, Alaska

Representative Coghill,

Trauma is any bodily injury from an external force. Trauma puts a tremendous burden on families and communities in Alaska. An average of 400 Alaskans die each year from trauma. For every death, 11 people are hospitalized. One in four hospital admissions is uncompensated which puts an additional burden on the State's health care system. HB 168 is offered to assist in this dilemma.

House Bill 168 provides the DHSS Commissioner authority to establish special designations in regulation for varying levels of trauma care so that a 'Certified Trauma Center' would be eligible to recoup expenses as a result of uncompensated care being rendered. The purpose of the fund is to reimburse certified trauma centers in the state for care uncompensated by the person receiving the treatment or by any other source. HB 169 would then set up the uncompensated trauma care fund that would help cover some of the losses suffered by the trauma center rendering the care.

The Alaska Council on EMS seeks your support for a fully functioning trauma system, including funding for the development of trauma centers and legislation addressing the issue of incentives for trauma center designation and uncompensated care of trauma patients. The added benefit of HB 168, we believe, would be an incentive for more hospitals in the state to become 'Certified Trauma Centers' thereby assisting in the development in a state wide trauma care system.

The American College of Surgeons met 11/08 in Anchorage to assess the States trauma system. The passage of HB 168 & 169 would provide support to address some of the areas that were noted in the report.

Thank you for your support of this critical issue.

RE: Alaska Trauma System

Dear Drs. Chennault and Sacco:

Thank you, Dr. Chennault for presenting at the ASMA House of Delegates Meeting on Saturday, September 27, 2008.

By consensus the ASMA HOD supported the concept of an appropriate trauma system for Alaska. However, the proposal recommended that there be a $500,000 cap on all damages for treatment of trauma patients in a state certified trauma center. The HOD recommended that be dropped from your proposal as any cap on economic damages would likely be found unconstitutional in Alaska. Additionally, the HOD also recommended that the proposal be amended to provide for a mechanism to directly compensate physicians for providing treatment for uninsured trauma patients in a state certified trauma center. (This would be for physicians who are not employees of that certified trauma center).

Several individual HOD members also suggested that you may wish to explore Alaska's "Good Samaritan" laws in lieu of any special economic damages caps which, as previously stated, are constitutionally problematic.

Please let me know if I may be of any future assistance.

Sincerely,

By: James J. Jordan, Executive Director

Amendment 1 3/17/09
Adopted pg 2

26-GH1211\A

HOUSE BILL NO. 172

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SIXTH LEGISLATURE - FIRST SESSION

BY THE HOUSE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

Introduced: 3/9/09
Referred: Education, Finance

A BILL

FOR AN ACT ENTITLED

"An Act relating to an investment in the education loan fund; relating to authority for the commissioner of revenue to enter into a bond purchase agreement and letter of credit with the Alaska Student Loan Corporation; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 37.10.085(a) is amended to read:

(a) Except as provided in AS 14.40.458 or (c) or (d) of this section, **or AS 37.10.089,** neither the state nor a political subdivision of the state may

(1) make a subscription to the capital stock of a corporation;

(2) lend its credit for the use of a corporation; or

(3) borrow money for the use of a corporation.

*** Sec. 2.** AS 37.10 is amended by adding a new section to article 3 to read:

Sec. 37.10.089. Loans to the education loan fund; bond purchase agreements and letters of credit. (a) If the education loan fund established in the corporation under AS 14.42.210 is unable to fully finance loan demand in a fiscal

year, the commissioner may invest in the education loan fund for the purpose of financing education loans under AS 14.43.161 - 14.43.175, 14.43.600 - 14.43.750, and AS 14.44.040. The commissioner may require the corporation to secure the investment of state money. SHALL

(b) Investments under (a) of this section may be made only when the commissioner determines that market conditions relating to tax-exempt private activity revenue bonds make the issuance of such bonds by the corporation not practicable or not economical for the purpose of financing education loans under AS 14.43.161 - 14.43.175, 14.43.600 - 14.43.750, and AS 14.44.040.

(c) Money invested under (a) of this section must be repaid by the corporation under terms established by the commissioner and agreed to by the corporation. Except as provided in this section, the terms shall be consistent with the duties of a fiduciary set out in AS 37.10.071(c).

(d) Notwithstanding any other provision of this section, the commissioner is authorized to enter into an agreement with the corporation to provide a bond purchase agreement and a letter of credit when market conditions relating to such credit enhancement mechanisms are uneconomical. The commissioner may require the corporation to pay the costs associated with providing credit enhancement and may charge the corporation a fee for this service.

(e) The commissioner may charge the corporation interest on the investments under (a) of this section. The rate of interest may not exceed the five year average return on the state's general fund.

(f) The commissioner may charge the corporation an annual fee for the services provided under (d) of this section. The annual fee may not exceed 0.15 percent of the average principal outstanding and interest covered by the bond purchase agreement and the letter of credit.

(g) If a draw on the bond purchase agreement and the letter of credit occurs under this section, the commissioner may charge the corporation an additional annual rate of interest not to exceed three percent on the bonds held under the bond purchase agreement and letter of credit.

(h) The term of the investment under (a) of this section and the commitment

under (d) of this section may not exceed five years from the commencement of the initial investment, bond purchase agreement, and letter of credit.

(i) The maximum amount of the investment under (a) of this section may not exceed $100 million. The maximum amount of the commitment under (d) of this section may not exceed $106 million.

(j) The commissioner may adopt regulations under AS 44.62 to implement this section.

(k) In this section,

(1) "commissioner" means the commissioner of revenue;

(2) "corporation" means the Alaska Student Loan Corporation created under AS 14.42.100.

*** Sec. 3.** This Act takes effect immediately under AS 01.10.070(c).

ANALYSIS: *(Attach a separate page if necessary)*

This legislation allows, but does not require, the Commissioner of Revenue to invest state funds in the education loan fund, if the Commissioner determines that the Alaska Student Loan Corp cannot practically or economically borrow money through issuing private activity revenue bonds. This investment must be made consistent with the duties of a fidiciary and will earn a return to the state. The bill also allows, but does not require, the Commissioner to provide a bond repurchase agreement or letter of credit to the Alaska Student Loan Corp, and to require the ASLC to pay the costs associated with the repurchase agreement or letter of credit. The Department of Revenue does not expect to incur any non-reimbursed costs as a result of the passage of this bill.

Revised: $20,000 is included in interagency receipts to reflect the amount to be paid by ACPE. Originally this would have been paid through unbudgeted RSA once the financing process began.

ANALYSIS: *(Attach a separate page if necessary)*

This legislative proposal, which authorizes the Commissioner of Revenue to: 1) invest in Alaska education loans; and, 2) provide credit enhancement service to the Alaska Student Loan Corporation (ASLC), is designed to be cost-neutral to the state. The appropriation request above represents the ASLC receipts needed to cover costs incurred by the Department of Revenue for legal, rating agency, and consulting services necessary to implement the provisions of the bill.

There is potentially a cost avoidance to the state General Fund. In the event ASLC, without the state assistance provided in the bill, is unable to issue bonds, state appropriations to fund the education loan programs could be required. Current year (2008-2009) loans were funded through internal liquidity. However, those funds will have

BILL NO. HB 172

ANALYSIS CONTINUATION

substantially been exhausted with Spring 2009 disbursements. At this time, there is a need to postpone processing 2009-2010 loan applications until such time as funding has been secured. Currently, market-based issuance costs have reached prohibitive levels relative to the economics of ASLC programs. ASLC has been attempting to issue Variable Rate Demand Bonds (VRDB), for which a market still exists. Structurally, VRDBs are attractive to investors because they are credit enhanced through some form of external liquidity provider, thereby eliminating investor liquidity risk. VRDBs can be held in money market accounts due to the liquidity facility expanding the investor base for ASLC bonds. However, over the course of 2008 the cost of liquidity/credit enhancement increased dramatically as demand grew exponentially and supply declined at an alarming rate due to financial institution consolidations, ratings downgrades, and a general reluctance of the usual players to put further strain on their balance sheets. Liquidity costs have more than quadrupled and there is nothing currently occurring in the financial services arena to indicate this problem will improve any time soon to once again enable ASLC to finance its programs as it has successfully done over the preceding twenty years of operation.

The FY09 cost will require a supplemental amendment of $60,000 to ACPE's Program Administration and Operations component (2738) using postsecondary receipts as the funding source (1106). The remaining FY09 cost of $70,000 will be absorbed by the Department of Revenue's current appropriation of Alaska Postsecondary Education Commission Receipts (1106) which are projected to be available for that purpose.

Sponsor Statement

HB 172 - An Act relating to an investment in the education loan fund; relating to authority for the commissioner of revenue to enter into a bond purchase agreement and letter of credit with the Alaska Student Loan Corporation; and providing for an effective date.

This legislation is necessary to avert a disruption in new education loan origination by the Alaska Student Loan Corporation (ASLC, or the Corporation) beginning in July 2009. The Corporation, since its establishment by the Legislature in 1987, has financed its education loan programs by issuing tax-exempt revenue bonds in the capital market. After 20 years of successful operation in this environment, catastrophic disruptions to the capital market resulted in ASLC being unable to issue bonds in 2008. Education loans continued to be available to Alaska students for the 2008-2009 academic year due to capacity within the Corporation to meet loan demand with available cash. However, after lending a projected $95 million in new loans through June 2009, that capacity will be substantially exhausted. Until such time as sufficient funding is secured, loan application processing for the 2009-2010 academic year will remain suspended.

The modification of Alaska statutes set out in this legislation enables ASLC, in partnership with the Commissioner of Revenue, to meet the immediate need to accept and process loan applications for the upcoming school year, and, additionally, to create a bonding structure to re-access the capital markets in 2009.

The Corporation's largest education loan programs are AlaskAdvantage Stafford Loans (which carry a federal guarantee), and the AlaskAdvantage Supplemental Loans (state loans which carry no guarantee). This year, more than 8,100 Alaska students relied on one or both of these low-cost education loan programs to aid in financing their postsecondary education and training program. More than 60% of those students were attending schools in Alaska.

This bill enables the Commissioner of Revenue to: 1) provide a bridge loan and directly invest in the Corporation's education loans; and, 2) create a credit enhancement facility to assist ASLC in the issuance of bonds during the current economic crisis when, without this facility, it would be uneconomical to issue bonds.

The combination of these two authorities are projected to assist in meeting loan demand through 2010 without the need for a State appropriation, by which time ASLC expects capital markets will have normalized to the extent these State support mechanisms will no longer be required.

ALASKA STUDENT LOAN CORPORATION

March 13, 2009

The Honorable Bill Stoltze
House of Representatives
Co-Chair
Finance Committee
State Capitol, Room 515
Juneau, Alaska 99801

Re: HB172 State Investment in Education Loan Fund

Dear Representative Stoltze:

On behalf of the Alaska Student Loan Corporation (ASLC) I respectfully request a hearing in the House Finance Committee of legislation entitled "An Act relating to an investment in the education loan fund; relating to authority for the commissioner of revenue to enter into a bond purchase agreement and letter of credit with the Alaska Student Loan Corporation; and providing for an effective date."

The bill will authorize the Commissioner of Revenue to 1) provide a bridge loan to ASLC to finance its education loans when market conditions relating to tax-exempt bonds make them uneconomical; and, 2) create a credit enhancement facility to prevent a disruption of lending activities by ASLC during the current economic crisis that has limited its ability to successfully issue bonds and has caused the market-based financing of student loans to be uneconomical.

A copy of Governor Palin's transmittal letter and the associated fiscal note will be referred to the committee. Enclosed is a sponsor's statement, sectional analysis, background information, letters of support, and relevant news articles.

Your favorable consideration of this request will be appreciated.

Sincerely,

Diane Barrans
Executive Officer

Sectional Analysis

HB172 – An Act relating to an investment in the education loan fund; relating to authority for the commissioner of revenue to enter into a bond purchase agreement and letter of credit with the Alaska Student Loan Corporation; and providing for an effective date.

Section 1 Provides authority to the state to loan funds and provide a letter of credit to the Alaska Student Loan Corporation under certain conditions for certain purposes.

Section 2 Authorizes the Commissioner of Revenue to enter into an agreement, not to exceed a five-year term, to provide a secured investment in the Alaska Student Loan Corporation's education loan fund, not to exceed $100 million, to finance certain education loans when the Corporation is unable to finance loan demand due to market conditions that would result in uneconomical issuance of tax-exempt bonds. Interest paid to the state on the investment may not exceed the five-year average return on the state's general fund. The Commissioner is also authorized to enter into an agreement, not to exceed a five-year term, to provide credit enhancement to the Corporation, not to exceed $106 million, when it would otherwise be uneconomical for the Corporation to issue bonds, absent such an agreement, due to market conditions. The Corporation is responsible for associated costs and an annual fee, not to exceed 15 basis points. In the event of a draw on the credit facility, the state may be paid interest by the Corporation not to exceed 3%. The Commissioner is authorized to adopt regulations to implement the bill.

Section 3 provides the Act takes place the day after the Governor's signature or the day after permitted to become law without her signature.

HB172 – An Act relating to an investment in the education loan fund; relating to authority for the commissioner of revenue to enter into a bond purchase agreement and letter of credit with the Alaska Student Loan Corporation; and providing for an effective date.

Background on ASLC Liquidity Issues and Proposed Plan of Action

Precipitating Events/Conditions

In 2007, the market for Auction Rate Securities (ARS), which ASLC has successfully used to finance its variable rate education loans since 2002, collapsed in the wake of the subprime mortgage loan debacle. As a result, ARS are no longer a viable bond mode to finance new loan originations. As an alternative, ASLC intends to issue Variable Rate Demand Bonds (VRDB) or Obligations, for which there is still a market. Structurally, VRDBs attract investors because they are credit enhanced through an external liquidity provider, thereby eliminating investor liquidity risk. Due to the liquidity facility, VDRBs can be held by money market funds as investments.

The ARS market collapse impacted issuers nationwide. Over the course of 2008 the cost of liquidity and/or credit enhancement increased dramatically as demand grew exponentially, and supply declined at an alarming rate due to financial institution consolidations, ratings downgrades, and a general reluctance of the usual players to put further strain on their balance sheets. Liquidity costs, prior to the ARS market meltdown, ranged between 15 and 40 basis points per annum. Currently, those costs start at over 100 bases point, and rise from there. There is nothing occurring in the financial services arena to indicate this problem will improve any time soon. None of the recent federal initiatives to address the nation's economic ailments include a mechanism by which ASLC could acquire the needed liquidity support to issue VRDBs.

ASLC Capacity to Meet New Loan Demand—ASLC was last able to bond in June 2007. 2008-2009 academic year loans were funded through internal liquidity. Annual loan volume is projected to be approximately $95 million. Although confident about its ability to fully fund loans for the year ending June 2009, Corporation projections verify the need to delay processing 2009-2010 loan applications until such time as sufficient external funding is secured. As described above, market-based issuance costs have reached prohibitive levels relative to the economics of the ASLC programs.

ASLC Proposal for Alternative Financing Strategies—A two-pronged approach is recommended:

1—authorize the Department of Revenue to meet the Corporation's immediate need for funding for its Alternative and Federal loan programs using a loan structure. No appropriation of state general funds is required because use of the funds constitutes an investment, not an expenditure. ASLC will cover all related costs, and provide a return on the investment similar to the return the funds would have derived if left in the general fund (with a stipulated not to exceed rate). The loan is governed by a trust agreement between ASLC and Revenue that sets out all related terms. The loan period may not exceed five years.

2—authorize the Department of Revenue to provide ASLC with the liquidity and/or credit support necessary to issue VRDBs. The credit enhancement program would allow ASLC to access the capital markets by attracting institutional purchasers (primarily money market funds), while also keeping bond issue costs low enough that ASLC can continue to offer low-cost education loans to Alaska students. As with the bridge loan, the facility fee will provide revenue to the State. The term length of the facility may not exceed five years and the amount issued with support from the facility may not exceed $106 million.

In combination, these strategies are expected to cover loan demand through 2010, by which time market conditions should have normalized sufficient to dispense with this state support.

Provided on the following page are descriptions of efforts made in support of other state agency or nonprofit education lenders similarly impacted by the credit market collapse.

Other States' Initiatives to Assist State Agency of Nonprofit Education Loan Lenders

Several states have made liquidity and/or credit enhancement available to issuers.

California's approach has been very commercial in that the state's SBPA/LOC facility is available to any issuer inside or outside the state, and the primary goal has been to generate fee income for the funding source (CALPERS).

The State of Arkansas, acting through the State Board of Finance, entered into an $80 million loan agreement with the Arkansas Student Loan Authority (ASLA). The interest rate is a variable rate reset semiannually by the State Bank Commissioner and approved by the State Board of Finance. The loan has a term of 18 months but can be extended. ASLA paid the State's out-of-pocket expenses and legal fees related to the issuance of the Note. A trust was developed to hold education loans made with loan proceeds and payments made on those education loans until the loan to the State is paid in full. The trust also holds state loan proceeds until the education loan is disbursed in the form of qualifying investment vehicles.

The New Mexico State Treasurer's Office purchased a $50 million private placement bond from New Mexico Student Loans (NMSL). The bond is a short-term investment for the State of New Mexico at a competitive rate. A second deal was struck by which their State Treasurer's Office will purchase a bond from NMSL totaling $95.1 million.

The State of Kentucky bought a $50 million bond from the Kentucky Higher Education Student Loan Corp. The bond has a term of 445 days and carries a variable interest rate (originally set at 3.2%).

The South Carolina Student Loan Corporation issued $600 million in student loan backed notes. The notes are variable rate notes rated AAA. A significant portion of the notes have been purchased by the State of South Carolina.

In Colorado, CollegeInvest, a division of the Colorado Department of Higher Education, originates loans to college and graduate students. The State loaned CollegeInvest $30 million to prevent a Spring 2009 interruption in their lending program.

Subject: Ensuring Access to Student Loans in Alaska

At your request, following is First Southwest Company's summary of events and circumstances which have culminated in the Alaska Student Loan Corporation's (ASLC) need for mid-term financing support from the State of Alaska.

Across the approximately thirteen months since the downgrade of the mono-line bond insurers and the collapse of the Auction Rate Securities (ARS) market, a number of additional developments have contributed to the emergence of serious ongoing challenges to the ability of entities like ASLC to fulfill their mission to ensure the uninterrupted availability of low cost loans (including both the Federal Family Education Loan Program (FFELP) and non-guaranteed alternative loans) for students who depend upon such loan products to finance the cost of their post-secondary educational goals.

One of those developments has been the large scale departure of investors from the entire asset-backed finance arena in what is often described as a "flight to quality." Another negative development has been the top to bottom re-examination of cash flow modeling and other credit rating analysis criteria by all three of the nationally recognized securities rating organizations, which development has only served to reinforce the perception on the part of reluctant investors that asset-backed securities are fraught with a higher level of risk than they had been previously led to believe. These two phenomena have reinforced each other to produce an escalating demand for higher interest rates and declining investor base for asset-backed securities in virtually every asset class.

Issuers like ASLC have responded to these negative developments by seeking liquidity and/or credit support from highly rated financial institutions in the form of a Standby Bond Purchase Agreements (SBPA) or Letters of Credit (LOC). At the same time that demand for SBPA or LOC support from national and international financial institutions has exploded in response to the conditions described above, most, if not all, of those financial institutions have been hit with threatened or actual downgrades of both their long term and short term credit ratings. All of this has combined to create a situation where the demand and cost for bank credit/liquidity support is increasing at the very same time that the availability of and investor confidence in the

This communication is for information only, not an offer, solicitation or recommendation, nor an official confirmation of any financial transaction. It is not to be considered research. The information is considered to be reliable, but First Southwest Company does not warrant its completeness or accuracy, prices and availability are subject to change without notice. We may trade, have long or short positions, or act as a market maker in any financial instrument discussed herein. Clients should consult their own advisors regarding any accounting, legal or tax aspects. Investors are instructed to read the entire Official Statement to obtain information essential to the making of an informed investment decision.

reliability of such bank credit/liquidity support has sharply declined. Directly related to all of this is the dramatically increased demand, from investors in the tax-exempt arena, for debt securities issued by, **or credit/liquidity supported by**, highly rated state and local governmental issuers.

The combination of conditions described above has resulted in a number of state governments looking for ways to assist the state agency or not-for-profit student loan providers (both FFELP and alternative) in their state to continue to be able to fulfill their mission of ensuring educational access through low cost college loans. In Arkansas, this cooperation between the State and the student loan agency they created many years ago resulted in a low cost variable rate bridge loan from the State to the loan agency. In South Carolina, the State purchased a significant portion of the state created student loan agency's last bond issue. Both of these cooperative efforts represent viable short-term solutions to a problem that is showing signs of becoming protracted. In other states, similar initiatives are being analyzed or are in various stages of actual development or implementation. The sole example from 2008 where the student loan provider had no market access problems is the Texas Higher Education Coordinating Board, where the State's support for THECB's student loan program includes a State of Texas General Obligation pledge for THECB's debt obligations.

Against the background of the liquidity, credit and market conditions discussed herein, it is becoming quickly apparent that the major Federal initiatives such as TARP and TALF are of very limited, if any, utility to state agency and not-for-profit loan providers in continuing to finance their low cost loan programs without disruption and resultant serious consequences for the students and parents who depend on them.

First Southwest Company serves as financial advisor to a number of such student loan providers in various parts of the country. Based on our knowledge of what is happening in the student loan finance arena on a national basis and our experience with those limited number of student loan providers who have been able to successfully access the capital markets over the past year, it is our very firm belief that the best hope for entities like ASLC to continue their mission without interruption will be a cooperative effort between such entities and their sponsoring state governments to create temporary financing vehicles, and more importantly, credit and/or liquidity facilities that meet investors' demand for the elimination of credit/liquidity risk, but at a level of cost that is sustainable within the economic limitations of the loan programs being offered to students and their parents.

This communication is for information only, not an offer, solicitation or recommendation, nor an official confirmation of any financial transaction. It is not to be considered research. The information is considered to be reliable, but First Southwest Company does not warrant its completeness or accuracy, prices and availability are subject to change without notice. Clients should consult their own advisors regarding any accounting, legal or tax aspects. Investors are instructed to read the entire Official Statement to obtain information essential to the making of an informed investment decision.

UNIVERSITY
of ALASKA
Many Traditions One Alaska

March 05, 2009

Dear Alaskan Legislator:

The educational loans provided by the Alaska Student Loan Corporation are crucial to the success of thousands of University of Alaska students. The funding from loans allows these students to continue and complete their educational goals in Alaska. Only the federal government provides more financial assistance to UA students.

The University of Alaska supports efforts that help the Alaska Student Loan Corporation secure the necessary funding to prevent a disruption of lending activities to Alaskan's seeking a post-secondary education in general and students at the University of Alaska in particular.

The Alaska Student Loan Corporation annually helps over 4700 students at the University of Alaska – at both the urban and rural campuses. Loans totaling over $40 million dollars help students fulfill their educational goals in the state - leading to a more prepared and qualified Alaskan workforce.

Thank you,

Saichi T Oba
Associate Vice President
Office of Student & Enrollment Services
University of Alaska

Office of Student and Enrollment Services

Received from the Chair of Student Senate, Associated Students of the University of Alaska Fairbanks, on 3/12/09.

To Whom It May Concern:

Please accept this letter of full support for legislation and related initiatives to provide interim funding to the Alaska Student Loan Corporation (ASLC), until such time as the markets recover sufficiently for ASLC to complete bonding.

The alternative financing proposed in the Governor's bill and endorsed by the Alaska Student Loan Corporation (ASLC) and the Alaska Department of Revenue is a win/win solution that meets an urgent statewide need to assist students in financing their education programs with no cost to the state's General Fund.

We understand that unless this alternative is approved quickly, Alaska will not be able to provide low-cost financial aid to our students. Without ASLC's loans, we expect that many of Alaska's college and vocational students may not be able to continue in or start school this year. We also understand that nationwide, education loans are becoming much harder to come by. In fact, 177 lenders to date have suspended their education loan programs. Specific to Alaska, several large banks indicate they will no longer be making loans in Alaska. The same economy that caused the market collapse has also resulted in increases in unemployment, resulting in many students staying in school longer, and many adults returning to school for re-training to get better jobs. The bottom line is that these factors result in fewer options for financial aid at the same time as the demand for financial aid is increasing. While there are increased grant provisions included in the American Recovery and Reinvestment Act, those funds are targeted only to the very neediest students.

Your full and prompt support of legislation to provide interim financing to fund AlaskAdvantage loans is urgently needed, and will result in no cost to the state. Without your support, Alaska's students will suffer.

Thank you for your consideration.

Respectfully,

Jennifer S Chambers
ASUAF Senate Chair

Fax (907) 563-8330
career@careeracademy.edu

March 5, 2009

To Whom It May Concern:

Career Academy is Alaska' largest Alaskan owned accredited private career college serving over 600 students annually. Career Academy fully supports legislation and related initiatives to provide interim funding to the Alaska Student Loan Corporation (ASLC), until such time as the markets recover sufficiently for ASLC to complete bonding.

The alternative financing proposed in the Governor's bill and endorsed by the Alaska Student Loan Corporation (ASLC) and the Alaska Department of Revenue is a win/win solution that meets an urgent statewide need to assist our students in financing their education programs with no cost to the state's General Fund.

We understand that unless this alternative is approved quickly, Alaska will not be able to provide low-cost financial aid to our students. Without ASLC's loans, we expect that many of Alaska's college and vocational students may not be able to continue in or start school this year. We also understand that nationwide, education loans are becoming much harder to come by. In fact, 177 lenders to date have suspended their education loan programs. Specific to Alaska, several large banks indicate they will no longer be making loans in Alaska. The same economy that caused the market collapse has also resulted in increases in unemployment, resulting in many students staying in school longer, and many adults returning to school for re-training to get better jobs. The bottom line is that these factors result in fewer options for financial aid at the same time as the demand for financial aid is increasing. While there are increased grant provisions included in the American Recovery and Reinvestment Act, those funds are targeted only to the very neediest students. In addition many many Alaskan students are not eligible to receive these grants due to the increased wage scale in Alaska. These same grant programs do not take into consideration the increased cost of living in Alaska.

Your full and prompt support of legislation to provide interim financing to fund AlaskAdvantage loans is urgently needed, and will result in no cost to the state. Without your support, Alaska's students will suffer. Last year approximately 125 students enrolled at Career Academy used over $692,000 in ASLC funds to at least in part fund their educational programs. Without these loan funds being available they would not have been able to attend college, receive their education, and become valuable trained professional in Alaska's workforce

Thank you for your consideration.

Respectfully,

Jennifer A. Deitz
President & Founder

AVTEC

Great careers for Alaska's future

March 5, 2009

To Whom It May Concern:

Please accept this letter of Alaska Vocational Technical Center's (AVTEC) full support for legislation and related initiatives to provide interim funding to the Alaska Student Loan Corporation (ASLC), until such time as the markets recover sufficiently for ASLC to complete bonding.

The alternative financing proposed in the Governor's bill and endorsed by the Alaska Student Loan Corporation (ASLC) and the Alaska Department of Revenue is a win/win solution that meets an urgent statewide need to assist our students in financing their education programs with no cost to the state's General Fund.

We understand that unless this alternative is approved quickly, Alaska will not be able to provide low-cost financial aid to our students. Without ASLC's loans, we expect that many of Alaska's college and vocational students may not be able to continue in or start school this year. AVTEC provides many training programs and opportunities for Alaskans that are needed for employment in good paying high skilled jobs. These programs are more important now than ever before, as Alaskans face tighter economic conditions.

I urge your full and prompt support of legislation to provide interim financing to fund AlaskAdvantage loans is urgently needed, and will result in no cost to the state. Without your support, Alaska's students will suffer. Last year 79 of the 364 students enrolled at our institution used ASLC educations to fund, at least in part, their educational programs.

Thank you for your consideration.

Respectfully,

Fred W. Esposito

State Agencies Get Creative on Student Loans

As various lenders and some of its peers in other states announced in recent months that they would stop making federal or private loans because of disruptions in the capital markets, the Illinois Student Assistance Commission steadfastly held firm. "We saw it as a must do, and had said we'd be there no matter what," said Andrew Davis, the commission's executive director.

The only problem, Davis acknowledges, is that officials at the agency — which guarantees student loans and oversees most student aid programs in Illinois — "weren't quite sure how we would fund" the operations behind that promise. Like many nonprofit lenders, particularly, Illinois had seen its primary source of financial backing for its loans dry up, because of the collapse of the auction-rate securities market.

Fortunately for the agency and the 20,000-plus students whose federal loans it will finance this academic year, the Illinois commission became one of several state loan providers that have found alternative ways of funding their loans in the current economic climate. Last month, days after the Massachusetts loan agency announced that it would not make federal loans this academic year, the state of Kentucky said that it was issuing a $50 million bond to ensure that the Kentucky Higher Education Student Loan Corp. could continue to issue federal student loans. (Massachusetts officials had considered but then backed away from a similar plan.)

The Illinois agency contemplated several options for finding the money to finance its 2008-9 loans, including bank financing and the federal government's newly designed process for bolstering lenders to ensure that students continue to have access to federal loans. Davis was most intrigued, though, by an idea he liberally borrowed from North Carolina.

There, last spring, officials at the State Employees' Credit Union had approached Steve Brooks, executive director of the North Carolina State Education Assistance Authority, after learning about the turmoil shaking the student loan industry. "It's a very civic-minded group, and they wanted to make sure North Carolina students were protected," said Brooks. The credit union agreed to back a $1.1 billion student loan bond to refinance some of the authority's auction-rate securities (for private and federal loans) and to finance some new loans in the new academic year.

While the credit union's investment will not finance all of the state agency's loans for the year or refinance all of its outstanding debt, the vote of confidence should make it easier, Brooks said, for the

state loan authority to refinance another $1.3 billion through variable rate bonds in the coming months.

"This represented a great breakthrough for us," he said.

North Carolina's arrangement inspired Davis in Illinois. He approached the Illinois Credit Union League to see if its member credit unions might be interested in backing the student loan agency, given the organizations' tradition of making "mission-based loans," Davis said.

The result: a pending agreement for eight credit unions to provide about $100 million, in three traunches timed to the annual financial aid cycle, through the course of the 2008-9 academic year.

"This will more than meet our anticipated need, but if we find there is more need" — more students than usual have been applying for loans through the agency's Web site, Davis said — "we may be able to go back for more." The agency provides loans to most students at about a half dozen colleges in the state, including Western Illinois University, Southern Illinois University at Edwardsville, and the University of Illinois at Springfield, Davis said; many colleges in Illinois participate in the federal government's competing direct loan program.

— Doug Lederman

To Whom It May Concern:

Please accept this letter of Charter College's full support for legislation and related initiatives to provide interim funding to the Alaska Student Loan Corporation (ASLC), until such time as the markets recover sufficiently for ASLC to complete bonding.

The alternative financing proposed in the Governor's bill and endorsed by the Alaska Student Loan Corporation (ASLC) and the Alaska Department of Revenue is a win/win solution that meets an urgent statewide need to assist our students in financing their education programs with no cost to the state's General Fund.

We understand that unless this alternative is approved quickly, Alaska will not be able to provide low-cost financial aid to our students. Without ASLC's loans, we expect that many of Alaska's college and vocational students may not be able to continue in or start school this year. We also understand that nationwide, education loans are becoming much harder to come by. In fact, 177 lenders to date have suspended their education loan programs. Specific to Alaska, several large banks indicate they will no longer be making loans in Alaska. The same economy that caused the market collapse has also resulted in increases in unemployment, resulting in many students staying in school longer, and many adults returning to school for re-training to get better jobs. The bottom line is that these factors result in fewer options for financial aid at the same time as the demand for financial aid is increasing. While there are increased grant provisions included in the American Recovery and Reinvestment Act, those funds are targeted only to the very neediest students.

Your full and prompt support of legislation to provide interim financing to fund AlaskAdvantage loans is urgently needed, and will result in no cost to the state. Without your support, Alaska's students will suffer. Last year 470 of students enrolled at our institution used ASLC educations to fund, at least in part, their educational programs.

Thank you for your consideration.

Respectfully,

Terrance Harris

ANALYSIS: *(Attach a separate page if necessary)*

This legislative proposal, which authorizes the Commissioner of Revenue to: 1) invest in Alaska education loans; and, 2) provide credit enhancement for the Alaska Student Loan Corporation (ASLC), is designed to be cost-neutral to the state. The appropriation above is ASLC receipts needed to cover costs incurred by the Department of Revenue for legal, rating agency, and consulting services necessary to implement the provisions of the bill. Authorization for this support through the Department of Revenue will result in a cost avoidance to the state General Fund because if ASLC, without the state assistance provided in the bill, is unable to issue bonds, state appropriations to fund the education loan programs could be required. Current year (2008-2009) loans were funded through internal liquidity. However, those funds will have substantially been exhausted with Spring 2009 disburse-

ANALYSIS CONTINUATION

ments. At this time, there is a need to postpone processing 2009-2010 loan applications until such time as funding has been secured. Currently, market-based issuance costs have reached prohibitive levels relative to the economics of ASLC programs. ASLC has been attempting to structure a deal to issue Variable Rate Demand Bonds (VRDB), for which a market still exists. Structurally, VRDBs are attractive to investors because they are credit enhanced through some form of external liquidity provider, thereby eliminating investor liquidity risk. VRDBs can be held in money market accounts due to the liquidity facility expanding the investor base for ASLC bonds. However, over the course of 2008 the cost of liquidity/credit enhancement increased dramatically as demand grew exponentially and supply declined at an alarming rate due to financial institution consolidations, ratings downgrades, and a general reluctance of the usual players to put further strain on their balance sheets. Liquidity costs have more than quadrupled and there is nothing currently occurring in the financial services arena to indicate this problem will improve any time soon to once again enable ASLC to finance its programs as it has successfully done over the preceding twenty years of operation.

The FY09 cost will require a supplemental amendment of $60,000 to ACPE's Program Administration and Operations component (2738) using postsecondary receipts as the funding source (1106). The remaining FY09 cost of $70,000 will be absorbed by the Department of Revenue's current appropriation of Alaska Postsecondary Education Commission Receipts (1106) which are projected to be available for that purpose.

ANALYSIS: *(Attach a separate page if necessary)*

This legislation allows, but does not require, the Commissioner of Revenue to invest state funds in the education loan fund, if the Commissioner determines that the Alaska Student Loan Corp cannot practically or economically borrow money through issuing private activity revenue bonds. This investment must be made consistent with the duties of a fidiciary and will earn a return to the state. The bill also allows, but does not require, the Commissioner to provide a bond repurchase agreement or letter of credit to the Alaska Student Loan Corp, and to require the ASLC to pay the costs associated with the repurchase agreement or letter of credit. The Department of Revenue does not expect to incur any non-reimbursed costs as a result of the passage of this bill. The fiscal note is indeterminate as costs will be dependent on the actual financing that occurs

Sponsor Statement

CS House Bill 175 (L&C) - Insurance

CSHB 175(L&C) contains miscellaneous updates to Alaska's insurance code. It will streamline some processes of the division, provide clarity to certain statutory provisions and bring certain statutes into greater uniformity with national standards.

The bill clarifies how the deposits of both domestic and foreign insurance companies will be treated under delinquency proceedings. It allows the director to do a summary suspension of a license in the event of an emergency for public protection and clarifies that rewards under wellness programs in health insurance programs do not constitute rebating.

I urge support for HB 175 to enable the division of insurance to continue to provide effective oversight of the insurance industry.

HOUSE COMMITTEE REPO

(11)

Date Referred to Committee: April 1, 2009 **FURTHER REFERRALS:**

Date of Committee Action: 4/11/09

The FINANCE Committee considered: **HOUSE BILL NO. 175**

"An Act relating to insurance, including treating as confidential certain information submitted to the director of insurance by the National Association of Insurance Commissioners; clarifying conditions for the release of insurer deposits; defining travel insurance that may be sold under a travel insurance limited producer license; establishing criteria for licensing of nonresident independent adjusters as resident adjusters; exempting rewards under a wellness program from treatment as insurance discrimination or rebating; making certain insurance required of the Comprehensive Health Insurance Association permissive rather than mandatory; providing for the administration of loss reimbursement policies and payments to guaranty associations during insolvency proceedings; making certain provisions relating to statements on applications and guaranteed renewability for individual health insurance applicable to hospital and medical service corporations; making public certain forms and related documents filed for approval by a hospital or medical service corporation after the filing becomes effective; relating to deposits of self-funded multiple employer welfare arrangements; repealing reasons that the director of insurance may use to deny or revoke a license; and providing for an effective date."

Sectional Analysis

CSHB 175(L&C) - Insurance

Section 1. Amends AS 21.06.060(f) by removing the restriction that only financial analysis ratios and examination synopses from the NAIC would be held confidential.

Section 2. Amends AS 21.06.180(b) to provide an exception for the emergency summary suspension of a license in AS 21.27.420(d) which requires a hearing within 20 days.

Section 3. Amends AS 21.06.180(c) to provide an exception for 21.27.420(d) which does not provide for a refusal to grant a hearing

Section 4. Amends AS 21.06.190(a) to provide an exception for 21.27.420(d) which does not provide for a stay of an order of suspension.

Section 5. Amends AS 21.24.130(d) clarifies how the deposit in Alaska of a domestic insurer covered by the Alaska Life and Health Insurance Guaranty Association or the Alaska Insurance Guaranty Association will be treated when the insurer is under a delinquency proceeding in AS21.78.

Section 6. Amends AS 21.24.130(f) clarifies how the deposit of a foreign insurer will be treated when the insurer is insolvent. The deposit will be released to the applicable guaranty association. After all liabilities for the insurer's policies in this state are paid, the monies will be paid to the receiver.

Section 7. Amends AS 21.24.130. Adds a new subsection to AS 21.24.130 to provide a process for handling deposits of insurers that are not members of any guaranty association. These deposits are sent to the insolvent insurer's receiver.

Section 8. Amends AS 21.27.140(b) to remove the requirement that the firm's compliance officer must be licensed for all lines of authority the firm holds.

This is a summary only. Note that this sectional analysis should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents.

Section 9. Amends AS 21.27.150(a) changes the definition for products sold by a limited travel licensee to comply with national uniform licensing standards.

Section 10. Amends AS 21.27.270(b) to permit the Director to issue a nonresident adjuster license under AS 21.27.020 if the independent adjuster's home state does not license independent adjusters.

Section 11. Amends AS 21.27.420. Adds a new subsection to AS 21.27.420 to provide authority to Director to do a summary suspension of a license, in the event of an emergency for public protection. Requires a decision be rendered within 30 days of the conclusion of the hearing.

Section 12. Amends AS 21.27.630. Adds a new subsection to AS 21.27.630 clarifying that individuals operating on behalf of the third party administrator are not required to obtain a separate registration.

Section 13. Amends AS 21.27.900 (11) modifies the definition of "home state" to include independent adjusters.

Section 14. Amends AS 21.34.020. Adds a new subsection to AS 21.34.020 enabling large commercial insureds which meet the definition of 'exempt commercial policyholder' to make their own choice of admitted or surplus lines insurers.

Section 15. Amends AS 21.34.040(d) to permit surplus lines insurer's annual statement filing with the National Association of Insurance Commissioners (NAIC) to be accepted as being filed with the division, and clarifies due date of filing between foreign and alien insurers.

Section 16. Amends AS 21.34.080(a) to modify details of surplus lines transaction filing to agree with AS 21.34.170 and remove unnecessary requirement.

Section 17. Amends AS 21.36.110 to clarify that rewards under wellness programs that meet the federal HIPPA requirements do not constitute rebating.

Section 18. Amends AS 21.36.355(a) to allow the Director to accept written consent issued to a nonresident by another insurance regulator official under 18 U.S.C. § 1033 and § 1034

Section 19. Amends AS 21.42.120(d) to allow the Director to require informational form filings (in lieu of filing for approval or before use).

Section 20. Amends AS21.42.160(d) to require foreign insurers (in addition to domestic insurers) to include form numbers on their insurance policy and annuity contract forms.

Section 21. Amends AS 21.42.385(b) to allow the Director to update the dental, vision and hearing coverage mandate requirements to assure that the benefits remain current.

Section 22. Amends AS 21.55.100(b) to allow the board the flexibility to determine whether a Medicare supplement plan should be offered, given that Alaska Comprehensive Health Insurance Association (ACHIA) offers a more comprehensive Medicare carve-out plan.

This is a summary only. Note that this sectional analysis should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents.

Section 23. Repeals and reenacts AS 21.55.500(19) modifies the ACHIA residency requirements to mirror the requirements for Permanent Fund Dividend qualification. Eases administration and allows more individuals would qualify for ACHIA.

Section 24. Amends AS 21.78.010(b) to provide an exception to claim payment priorities for deposits administered under AS 21.24..

Section 25. Amends AS 21.84.465(b) modifies the language regarding the due date of the annual financial statement for fraternal benefit societies to be consistent with the due date statute language of other types of insurers to require filing no later than March 1.

Section 26. Amends AS 21.85.100 to provide that the deposit administration requirements under AS 21.24 (Deposits) are applicable is to multiple employer welfare arrangement deposits required under AS 21.85

Section 27. Amends AS 21.87.180. Adds a new subsection AS 21.87.180(E) to make hospital and medical service corporations filings publicly available consistent with other insurers filings in AS 21.42.123 and AS 21.42.125.

Section 28. Amends AS 21.87.340 to make hospital or medical service corporations subject to the individual health insurance guaranteed renewability laws in AS 21.51.400; and to rules regarding representations and warranties requirements in AS 21.42.110

Section 29. Amends AS 21.90.900 to add new paragraph. Adds the definition of 'working day.'

Section 30. Amends AS 44.64.030(a)(17) to add summary suspensions to the list of insurance exemptions from the Office of Administrative Hearings.

Section 31. Repeals AS 21.07.250(19), AS 21.27.410(a)(10),(11) and (12), AS 21.55.220(b) repeals definitions of working day which was added to general title definitions; Repeals archaic reasons for denial, suspension or revocation of a license issued under AS 21.27.

Section 32. Provides for an effective date of July 1, 2009.

This is a summary only. Note that this sectional analysis should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents.

REPRESENTATIVE REGGIE JOULE

SPONSOR STATEMENT FOR HB 180

A.S. 14.11.008(b) establishes the required participating share for a municipal school district for a construction or maintenance grant project based on the district's full value per average daily membership (ADM). The ADM is calculated by dividing the full and true value of the taxable real and personal property in the district by the district ADM. In 2008, HB 373 passed the legislature near the end of the session. The House passed HB 373 on March 18. The Senate passed out a committee substitute to HB 373 on April 11, the House concurred the same day. The committee substitute made changes to Section 1 of the bill effectively reducing the participating share for some local governments depending upon their full value per ADM calculation breaking it into 4 categories at 5, 10, 30 and 35%. However, the new participating share levels created an undue burden when some of the local governments moved from the 10% to 30% participating share portion since there is no stair-stepping to a 20% participating share level. HB 180 proposes to amend Section 1 by adding a provision that would stair-step the local share from 10% to 20% instead of the large increase from 10% to 30% for these districts. The comparison of the existing and proposed revision is as follows:

Full Value Per ADM	District Participating Share
$1 - $150,000	5 percent
150,001 - 275,000	10 percent
275,001 - **500,000** [800,000]	**20** [30] percent
500,001 - 800,000	**30 percent**
over 800,000	35 percent.

If the 20% participating share level is retroactive to April 1st 2008, the fiscal impact will be **$2,664,859** and is broken down as follows:

Projects funded in FY2009 under AS 14.11.007 and .006 (Major Maintenance and School Construction List) include the following:

- Nome-Belz Jr./Sr High Buildings D and E Roof Replacement $214,731
- Shungnak K-12 School Improvements, Phase 5 $486,973
- Deering K-12 School Improvements, Phase 2 $124,456
- Kobuk K-12 Renovation/Addition $1,083,427
- Hoonah Pool and Boiler Room Roof Replacement $132,877

5303

Projects funded in FY2010 under AS 14.11.007 (Major Maintenance List) include the following:

- Kodiak Schools Seismic Mitigation Project $ 462,307
- Evergreen Elementary School Playground Safety Upgrades $110,100
- False Pass K-12 School Siding Replacement, Recovery of Funds $13,148
- Cold Bay K-12 Heating System Upgrade $10,827
- Sand Point K-12 School Window Replacement, Recovery of Funds $9,706

Projects funded in FY2011 under AS 14.11.007 (Major Maintenance List) include the following:

- Nome Beltz Fire Alarm Replacement – $12,049
- Nome Beltz Generator Switching – $4,259

Districts that would have a 20% local share under HB180 using FY2011 population and assessment information are as follows:

Kake
Dillingham
Northwest Arctic
Klawock
Nome
Kodiak

2-23-10

ANALYSIS: *(Attach a separate page if necessary)*

Section 1 of HB 180 amends the participating share table in AS 14.11.008(b) by adding a 20% participating share level to the table that currently steps from 10% to 30% . Participating share is calculated based on the district's assessed property value per Average Daily Membership (ADM). Section 3 of the bill will require $2,664,859 to be appropriated in the FY2010 budget for additional participating share on projects funded by the legislature in FY09, FY10, and $16,307 added to HB 301 (p5, lns 8-9 & 10-11) for the Nome Beltz Fire Alarm replacement project and Nome generator switch replacement project.

***Due to the unknown future level of funding for either the School Construction list or Major Maintenance list, for districts impacted by the changes in HB 180, it is not possible to assign an amount to the fiscal note for any year beyond FY 11, therefore the out years are indeterminate.

Sponsor Statement – HB 184

HB184 adjusts the current bond debt cap for the University of Alaska to reflect today's construction prices. Current Alaska Statute allows the University of Alaska to borrow money, issue debt or enter into long-term obligations for the purchase of facilities, goods or services without having to provide notice to the legislature as long as the annual debt service payment doesn't exceed $1.0 million. HB184 bumps up the threshold to $2.5 million.

The current bond debt cap limit of $1.0 million was originally issued in 1990. At that time, $1.0 million in annual debt service was the cost of financing a $15.0 million capital project. Taking into account construction inflation in Alaska, a $15.0 million capital project built in 1990 would cost about $40.0 million today. Annual debt service on $40.0 million is $2.5 million assuming a 4.5% interest rate and a 25-year straight line amortization.

The University has operated a viable debt program over the last 18 years. It has issued 14 general revenue bonds plus other financing arrangements that have been critical in securing funding for capital projects. The University has never suffered a rating downgrade. In fact, in December 2007, Moody's Investor Service upgraded the University credit rating to Aa3. The University continues to monitor its debt capacity and compliance with tax exempt bond covenants. Currently, the amount of debt service outstanding is $11.2 million. This is less than half the Board of Regents' policy limit of 5% of unrestricted revenues which is $26.2 million for FY08. This equates to $127 million in outstanding debt with the ability to issue a total of $317 million in debt.

By increasing the bond debt cap approval level, the administrative burden of compliance with the statute for smaller bond issues would be reduced for both the legislature and the University. At the same time, legislative oversight would be retained for larger financings.

I would appreciate your support for HB184.

of the default and the
mailing a notice to the

ing of the decision. The decision of the chief finance officer is a final decision that may appealed to the superior court under the Alaska Rules of Appellate Procedure. (§ 1 ch SLA 2004)

Sec. 14.40.253. Financing notice and approval. If the University of Alaska tends to enter into an obligation, except for refinancing obligations, under AS 14.40.040(a)(5) with an annual payment by the university anticipated to exceed 1,000,000, the university shall provide notice to the legislature. The notice must include he anticipated annual payment amount, the anticipated financing, and the total construction, acquisition, or other costs of the project. The university may not enter into an obligation requiring a financing notice under this section, other than a refinancing obligation, unless the project has been approved by the legislature by law. An appropriation for the project does not constitute approval of the project for the purpose of this section. (§ 2 ch 181 SLA 1990; am § 2 ch 90 SLA 1999)

Sec. 14.40.254. University revenue bonds. (a) Subject to AS 14.40.253, the board may issue revenue bonds to pay the cost of acquiring, constructing, or equipping a facility that the board determines is necessary.

(b) The board may enter into an agreement with a trustee or bond owner for the purpose of securing payment of revenue bonds issued by the University of Alaska to acquire, construct, or equip a facility that the board determines is necessary. The agreement may include the fixing and collection of fees, charges, or rentals pledged to secure payment of the revenue bonds and agreement regarding the use of the proceeds of the revenue bonds.

(c) The state pledges not to limit or alter rights vested under this section in the University of Alaska to fulfill the terms of a contract with revenue bond owners.

(d) The board may pledge revenue received by the University of Alaska as fees, charges, or rentals in order to secure payment of the revenue bonds. A pledge of revenue received by the University of Alaska is considered a perfected security interest and is valid and binding from the time the pledge is made. The pledge creates an immediate lien against property pledged without physical delivery or other act. (§ 1 ch 26 SLA 1991)

Sec. 14.40.255. Investment of surplus money. If the Board of Regents determines that there is a surplus of money, received in the form of state and federal appropriations, above the amount sufficient to meet current and projected cash expenditure needs of the university, the surplus must be invested as set out in AS 37.10.071. Income earned on investments made under this section may be retained by the university and expended in accordance with AS 37.07 (Executive Budget Act.) (§ 4 ch 143 SLA 1986; am § 5 ch 141 SLA 1988)

Sec. 14.40.257. Reimbursement for costs of capital projects. (a) Subject to appropriations for the purpose, during each fiscal year, the legislature may appropriate an amount to reimburse the University of Alaska for the cost to be paid by the university during that same fiscal year for the principal and interest on outstanding debt for the projects listed in (b) of this section.

UNIVERSITY
of ALASKA
Many Traditions One Alaska

March 24, 2009

The Honorable Representative Mike Kelly
State Capitol, Room 513
Juneau, Alaska 99801-1182

Dear Representative Kelly:

On behalf of the University of Alaska and President Hamilton, I offer this letter of support for House Bill 184: "An Act relating to debt authorization of the University of Alaska". My position is Controller for the University of Alaska and I oversee its debt function.

AS14.40.253 requires that when the University anticipates a financing will exceed $1.0 million in annual debt service, notice to and approval from the Legislature is required. This bill updates the statute for construction inflation by increasing that threshold to $2.5 million. I believe this bill will reduce the administrative impact to the University and Legislature for approving smaller debt issuances. At the same time, Legislative oversight is retained for relatively large debt issuances.

AS14.40.253 was originally issued in 1990 and construction inflation in Alaska has been steady since. In 1990, $1.0 million of annual debt service was about a $15 million capital project financing. Now, that same project costs about $40 million, or approximately $2.5 million in annual debt service.

The University has solid credit ratings from Standard and Poor's at AA-, and Aa3 from Moody's Investors Services. With $127 million in debt currently outstanding, the University is below half of the Board of Regents' debt policy limit of five percent of unrestricted revenues, or $317 million. The University's track record shows that it has used debt prudently and responsibly to further its strategic mission in the state.

I appreciate your support of House Bill 184. If there are any questions, please contact me.

Sincerely,

Myron J. Dosch

Subject: Re: Heads up HB 184

Derek -

To follow up on this morning's House Education Committee hearing on HB184.

All UA capital projects need capital project receipt authority regardless of the source(s) of funding.

Under AS14.40.253, if the capital project anticipates annual debt service over $1.0m, then notice _and_ approval is needed. The approval referred to here is not receipt authority, rather it is specific approval language that would need to be written into a bill. (This is why the statute says "An appropriation for the project does not constitute approval of the project for the purpose of this section.")

If the project anticipates annual debt service under $1.0m, AS14.40.253 does not apply. All that is needed is receipt authority. The university can issue debt without any special notice or approval.

Hope this helps,

Myron

ANALYSIS: *(Attach a separate page if necessary)*

This bill attempts to declare that firearms that are made in Alaska are exempt from any federal law or regulation. The bill has significant constitutional issues. These issues would most likely arise in the context of a state citizen being charged with a crime in federal court and could result in significant litigation in both state and federal court. While such litigation is likely, it is difficult to estimate with any certainty the costs that might be incurred and they are therefore indeterminate at this point.

HOUSE BILL NO. 186

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SIXTH LEGISLATURE - FIRST SESSION

BY REPRESENTATIVES KELLY, Wilson, Lynn, Gatto

Introduced: 3/12/09
Referred: Judiciary, Finance

A BILL

FOR AN ACT ENTITLED

"An Act declaring that certain firearms and accessories are exempt from federal regulation."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** The uncodified law of the State of Alaska is amended by adding a new section to read:

FINDINGS. The legislature finds that the authority for this Act is the following:

(1) the Tenth Amendment to the Constitution of the United States guarantees to the states and their people all powers not granted to the federal government elsewhere in the constitution and reserves to the state and people of Alaska certain powers as they were understood at the time that Alaska was admitted to statehood in 1959; the guaranty of those powers is a matter of contract between the state and people of Alaska and the United States as of the time that the compact with the United States was agreed upon and adopted by Alaska and the United States in 1959;

(2) the Ninth Amendment to the Constitution of the United States guarantees

to the people rights not granted in the constitution and reserves to the people of Alaska certain rights as they were understood at the time that Alaska was admitted to statehood in 1959; the guaranty of those rights is a matter of contract between the state and people of Alaska and the United States as of the time that the compact with the United States was agreed upon and adopted by Alaska and the United States in 1959;

(3) the regulation of intrastate commerce is vested in the states under the Ninth and Tenth Amendments to the Constitution of the United States, particularly if not expressly preempted by federal law; the United States Congress has not expressly preempted state regulation of intrastate commerce pertaining to the manufacture on an intrastate basis of firearms, firearm accessories, and ammunition;

(4) the Second Amendment to the Constitution of the United States reserves to the people the right to keep and bear arms as that right was understood at the time that Alaska was admitted to statehood in 1959, and the guaranty of the right is a matter of contract between the state and people of Alaska and the United States as of the time that the compact with the United States was agreed upon and adopted by Alaska and the United States in 1959;

(5) art. I, sec. 19, Constitution of the State of Alaska clearly secures to Alaska citizens and prohibits government interference with the right of individual Alaska citizens to keep and bear arms.

*** Sec. 2.** AS 44.99 is amended by adding a new section to read:

Article 5. Alaska Firearms Freedom Act.

Sec. 44.99.500. State policy, declarations, and requirements concerning certain firearms not in interstate commerce and not subject to federal regulation. (a) A personal firearm, a firearm accessory, or ammunition that is manufactured commercially or privately in this state and that remains in the state is not subject to federal law or federal regulation, including registration, under the authority of the United States Congress to regulate interstate commerce as those items have not traveled in interstate commerce.

(b) This section applies to a firearm, a firearm accessory, or ammunition that is manufactured in this state from basic materials and that can be manufactured without the inclusion of any significant parts imported from another state. Generic and insignificant parts that have other manufacturing or consumer product applications are

not firearms, firearm accessories, or ammunition, and their importation into this state and incorporation into a firearm, a firearm accessory, or ammunition manufactured in this state does not subject the firearm, firearm accessory, or ammunition to federal regulation. Basic materials, such as unmachined steel and unshaped wood, are not firearms, firearm accessories, or ammunition and are not subject to congressional authority to regulate firearms, firearm accessories, and ammunition under interstate commerce as if they were actually firearms, firearm accessories, or ammunition. The authority of the United States Congress to regulate interstate commerce in basic materials does not include authority to regulate firearms, firearm accessories, and ammunition made in this state from those materials. Firearm accessories that are imported into this state from another state and that are subject to federal regulation as being in interstate commerce do not subject a firearm to federal regulation under interstate commerce because they are attached to or used in conjunction with a firearm in this state.

(c) A firearm manufactured or sold in this state and not subject to federal regulation under this section must have the words "Made in Alaska" clearly stamped on a central metallic part, such as the receiver or frame.

(d) The attorney general shall defend a citizen of this state who is prosecuted by the government of the United States under the congressional power to regulate interstate commerce for violation of a federal law concerning the manufacture, sale, transfer, or possession of a firearm, a firearm accessory, or ammunition manufactured and retained within this state. On receipt of written notification by a citizen of this state of intent to manufacture a firearm, a firearm accessory, or ammunition to which this section applies, the attorney general shall seek a declaratory judgment from the United States District Court for the District of Alaska that this section is consistent with the Constitution of the United States.

Amd 2: remove

(e) In this section,

(1) "firearm accessory" means an item that is used in conjunction with or mounted on a firearm but is not essential to the basic function of a firearm, including a telescopic or laser sight, magazine, flash or sound suppressor, folding or aftermarket stock and grip, speedloader, ammunition carrier, and light for target

illumination;

(2) "generic and insignificant parts" includes springs, screws, nuts, and pins;

(3) "manufactured" means a firearm, a firearm accessory, or ammunition that has been created from basic materials for functional usefulness, including forging, casting, machining, or other processes for working materials.

*** Sec. 3.** The uncodified law of the State of Alaska is amended by adding a new section to read:

APPLICABILITY. AS 44.99.500, added by sec. 2 of this Act, applies to firearms, firearm accessories, and ammunition that are manufactured and retained in this state after October 1, 2009.

Sponsor Statement – CSHB 186(JUD)

"ALASKA FIREARMS FREEDOM ACT"

The United States Constitution gives Congress the authority to regulate Interstate Commerce between the states and 18 USC 922 makes it unlawful for any person not licensed as a manufacturer or dealer in firearms to engage in the business of manufacturing or dealing in firearms. Collectively, the Interstate Commerce Clause and 18 USC 922 are used by the federal government as a means to regulate firearms.

The Alaska Firearms Freedom Act addresses this by exempting firearms, firearm accessories, and ammunition manufactured and retained in the state from all federal firearm control laws including registration, as firearms that meet these criteria shouldn't be regulated by the federal government because they have not traveled in interstate commerce. Firearms exempt from this Act must have the words "Made in Alaska" clearly stamped on a central metallic part such as the receiver or frame.

This bill frees certain firearms from federal regulation as long as certain conditions are met. It frees the state of Alaska from restrictive federal firearm regulation and allows the state to take responsible firearm regulation into her own hands. The federal government has historically used the Interstate Commerce Clause to regulate firearms and has consistently pursued legislation that imposes its will on states. Outdoorsmen, hunters, and Alaskans defending their families and property will benefit from the passage of CSHB 186(JUD).

MEMORANDUM

DATE: **April 7, 2009**

TO: **Representative Mike Kelly**

FROM: **Derek Miller**

RE: **Sectional Analysis for CSHB 186(JUD) (26-LS0627\S)**

A sectional summary of a bill should not be considered an authoritative interpretation of the bill. The bill itself is the best statement of its contents. If you would like an interpretation of the bill as it may apply to a particular set of circumstances, please advise.

Section 1.
Findings Section. The authority of this Act is the Second, Ninth, and Tenth Amendments to the Constitution of the United States. The Second Amendment reserves to the people the right to keep and bear arms, the Ninth Amendment guarantees to the people rights not granted in the constitution, and the Tenth Amendment guarantees to the states and their people all powers not granted to the federal government elsewhere in the constitution. The United States Congress has not expressly preempted state regulation of intrastate commerce pertaining to the manufacture on an intrastate basis of firearms, firearm accessories, and ammunition. Article I, Section 19 of the Constitution of the State of Alaska secures to the citizens and prohibits government interference with the right of individual Alaska citizens to keep and bear arms.

Section 2.
(a) A personal firearm, a firearm accessory, or ammunition that is manufactured commercially or privately in this state and that remains in the state is not subject to federal law or federal regulation including registration under the authority of the United States Congress to regulate intrastate commerce.

(b) This section applies to a firearm, a firearm accessory, or ammunition that is manufactured in this state from basic materials without the inclusion of significant parts imported from another state. Generic and insignificant parts that have other manufacturing or consumer applications are not firearms, firearm accessories, or ammunition and their incorporation into a firearm, firearm accessory, or ammunition manufactured in this state does not subject them to federal regulation. Basic materials, such as unmachined steel and unshaped wood are not firearms, firearm accessories, and ammunition and are not subject to federal regulation under intrastate commerce. Firearm accessories imported into this state from another state and are attached to or used in conjunction with a firearm in this state does not subject the firearm to federal regulation under intrastate commerce.

(c) A firearm manufactured or sold in this sate and not subject to federal regulation mush have the words "Made in Alaska" clearly stamped on a central metallic part, such as the receiver or frame.

(d) Definitions section.

"Firearm accessory" – an item that is used in conjunction with or mounted on a firearm but is not essential to the basic function of a firearm. This includes: a telescope or laser sight, magazine, flash or sound suppressor, folding or aftermarket stock and grip, speedloader, ammunition carrier, and light for target illumination.

"Generic and insignificant parts" – includes springs, screws, nuts, and pins.

"Manufactured" – means a firearm a firearm accessory, or ammunition that has been created from basic materials for functional usefulness, including forging, casting, machining, or other processes for working materials.

Section 3.
Applicability section. This Act applies to firearms, firearm accessories, and ammunition that are manufactured and retained in this state after October 1, 2009.

MEMORANDUM April 8, 2009

SUBJECT: Interstate Commerce Clause and CSHB 186(JUD)
(Work Order No. 26-LS0627\S)

TO: Representative Lindsey Holmes

FROM: Gerald P. Luckhaupt
Legislative Counsel

You have asked if the declarations in CSHB 186(JUD) regarding interstate and intrastate commerce would successfully prevent someone from being prosecuted for a firearms violation under federal law. In my opinion, CSHB 186(JUD) would not prevent the federal government from prosecuting someone for a firearms violation under federal law.[1]

The commerce clause is found at Article I, § 8, of the Constitution of the United States:

> The Congress shall have power . . . [t]o regulate commerce with foreign nations, and among the several states and with the Indian tribes . . . .

The extent of the commerce clause was first interpreted to not apply to commerce "which is carried on between man and man in a State, or between different parts of the same State, and which does not extend to or affect other States."[2] Over the years, "certain categories of activity such as 'production,' 'manufacturing,' and 'mining' were within the province of state governments, and thus were beyond the power of Congress under the Commerce Clause."[3] As the interpretation of the commerce clause continued, the United States Supreme Court allowed incidental effects on purely interstate commerce if that

---

[1] 18 U.S.C. §§ 921 - 931 regulate certain firearms and activities. For example, 18 U.S.C. § 922(g) prohibits a felon from possessing in or affecting commerce firearms or ammunition.

[2] *Gibbons v. Ogden*, 9 Wheat. 1, 189 - 190 (1824)

[3] *United States v. Lopez*, 514 U.S. 549 (1995).

COPY ON FILE

regulation was necessary to regulate interstate commerce.[4] The development of the commerce clause continued as explained in this excerpt from *United States v. Lopez*:[5]

> In *A. L. A. Schecter Poultry Corp.* v. *United States*, 295 U.S. 495, 550 (1935), the Court struck down regulations that fixed the hours and wages of individuals employed by an intrastate business because the activity being regulated related to interstate commerce only indirectly. In doing so, the Court characterized the distinction between direct and indirect effects of intrastate transactions upon interstate commerce as "a fundamental one, essential to the maintenance of our constitutional system." *Id.*, at 548. Activities that affected interstate commerce directly were within Congress' power; activities that affected interstate commerce indirectly were beyond Congress' reach. *Id.*, at 546. The justification for this formal distinction was rooted in the fear that otherwise "there would be virtually no limit to the federal power and for all practical purposes we should have a completely centralized government." *Id.*, at 548.
>
> Two years later, in the watershed case of *NLRB v. Jones & Laughlin Steel Corp.*, 301 U.S. 1 (1937), the Court upheld the National Labor Relations Act against a Commerce Clause challenge, and in the process, departed from the distinction between "direct" and "indirect" effects on interstate commerce. *Id.*, at 36-38 ("The question [of the scope of Congress' power] is necessarily one of degree"). The Court held that intrastate activities that "have such a close and substantial relation to interstate commerce that their control is essential or appropriate to protect that commerce from burdens and obstructions" are within Congress' power to regulate. *Id.*, at 37.
>
> In *United States* v. *Darby*, 312 U.S. 100 (1941), the Court upheld the Fair Labor Standards Act, stating:
>
> "The power of Congress over interstate commerce is not confined to the regulation of commerce among the states. It extends to those activities intrastate which so affect interstate commerce or the exercise of the power of Congress over it as to make regulation of them appropriate means to the attainment of a legitimate end, the exercise of the granted power of Congress to regulate interstate commerce." *Id.*, at 118.
>
> See also *United States* v. *Wrightwood Dairy Co.*, 315 U.S. 110, 119 (1942) (the commerce power "extends to those intrastate activities which

---

[4] *Houston, E. & W. T. R. Co. v. United States*, 234 U.S. 342 (1914)

[5] *United States v. Lopez*, 514 U.S. 549 (1995) (syllabus and majority opinion enclosed).

in a substantial way interfere with or obstruct the exercise of the granted power").

In *Wickard* v. *Filburn*, the Court upheld the application of amendments to the Agricultural Adjustment Act of 1938 to the production and consumption of home grown wheat. 317 U. S., at 128-129. The *Wickard* Court explicitly rejected earlier distinctions between direct and indirect effects on interstate commerce, stating:

"[E]ven if appellee's activity be local and though it may not be regarded as commerce, it may still, whatever its nature, be reached by Congress if it exerts a substantial economic effect on interstate commerce, and this irrespective of whether such effect is what might at some earlier time have been defined as 'direct' or 'indirect.' " *Id.*, at 125.

The *Wickard* Court emphasized that although Filburn's own contribution to the demand for wheat may have been trivial by itself, that was not "enough to remove him from the scope of federal regulation where, as here, his contribution, taken together with that of many others similarly situated, is far from trivial." *Id.*, at 127-128.

Jones & Laughlin Steel, *Darby*, and *Wickard* ushered in an era of Commerce Clause jurisprudence that greatly expanded the previously defined authority of Congress under that Clause. In part, this was a recognition of the great changes that had occurred in the way business was carried on in this country. Enterprises that had once been local or at most regional in nature had become national in scope. But the doctrinal change also reflected a view that earlier Commerce Clause cases artificially had constrained the authority of Congress to regulate interstate commerce.

But even these modern era precedents which have expanded congressional power under the Commerce Clause confirm that this power is subject to outer limits. In *Jones & Laughlin Steel*, the Court warned that the scope of the interstate commerce power "must be considered in the light of our dual system of government and may not be extended so as to embrace effects upon interstate commerce so indirect and remote that to embrace them, in view of our complex society, would effectually obliterate the distinction between what is national and what is local and create a completely centralized government." 301 U. S., at 37; see also *Darby*, *supra*, at 119-120 (Congress may regulate intrastate activity that has a "substantial effect" on interstate commerce); *Wickard*, *supra*, at 125 (Congress may regulate activity that "exerts a substantial economic effect on interstate commerce"). Since that time, the Court has heeded that warning and undertaken to decide whether a rational basis existed for concluding that a regulated activity sufficiently affected interstate

commerce. See, *e.g., Hodel* v. *Virginia Surface Mining & Reclamation Assn., Inc.*, 452 U.S. 264, 276-280 (1981); *Perez* v. *United States*, 402 U.S. 146, 155-156 (1971); *Katzenbach* v. *McClung*, 379 U.S. 294, 299-301 (1964); *Heart of Atlanta Motel, Inc.* v. *United States*, 379 U.S. 241, 252-253 (1964).

Similarly, in *Maryland* v. *Wirtz*, 392 U.S. 183 (1968), the Court reaffirmed that "the power to regulate commerce, though broad indeed, has limits" that "[t]he Court has ample power" to enforce. *Id.*, at 196, overruled on other grounds, *National League of Cities* v. *Usery*, 426 U.S. 833 (1976), overruled by *Garcia* v. *San Antonio Metropolitan Transit Authority*, 469 U.S. 528 (1985). In response to the dissent's warnings that the Court was powerless to enforce the limitations on Congress' commerce powers because "[a]ll activities affecting commerce, even in the minutest degree, *[Wickard],* may be regulated and controlled by Congress," 392 U.S., at 204 (Douglas, J., dissenting), the *Wirtz* Court replied that the dissent had misread precedent as "[n]either here nor in *Wickard* has the Court declared that Congress may use a relatively trivial impact on commerce as an excuse for broad general regulation of state or private activities," *id.*, at 197, n. 27. Rather, "[t]he Court has said only that where *a general regulatory statute bears a substantial relation to commerce*, the *de minimis* character of individual instances arising under that statute is of no consequence." *Ibid.* (first emphasis added).

Consistent with this structure, we have identified three broad categories of activity that Congress may regulate under its commerce power. *Perez* v. *United States*, *supra*, at 150; see also *Hodel* v. *Virginia Surface Mining & Reclamation Assn.*, *supra*, at 276-277. First, Congress may regulate the use of the channels of interstate commerce. See, *e.g., Darby*, 312 U. S., at 114; *Heart of Atlanta Motel*, *supra*, at 256 (" '[T]he authority of Congress to keep the channels of interstate commerce free from immoral and injurious uses has been frequently sustained, and is no longer open to question.' " (quoting *Caminetti* v. *United States*, 242 U.S. 470, 491 (1917)). Second, Congress is empowered to regulate and protect the instrumentalities of interstate commerce, or persons or things in interstate commerce, even though the threat may come only from intrastate activities. See, *e.g., Shreveport Rate Cases*, 234 U.S. 342 (1914); *Southern R. Co.* v. *United States*, 222 U.S. 20 (1911) (upholding amendments to Safety Appliance Act as applied to vehicles used in intrastate commerce); *Perez*, *supra*, at 150 ("[F]or example, the destruction of an aircraft (18 U.S.C. § 32), or . . . thefts from interstate shipments (18 U.S.C. § 659)"). Finally, Congress' commerce authority includes the power to regulate those activities having a substantial relation to interstate commerce, *Jones & Laughlin Steel*, 301 U. S., at 37, *i.e.*,

> those activities that substantially affect interstate commerce. *Wirtz*, *supra*, at 196, n. 27.
>
> Within this final category, admittedly, our case law has not been clear whether an activity must "affect" or "substantially affect" interstate commerce in order to be within Congress' power to regulate it under the Commerce Clause. Compare *Preseault* v. *ICC*, 494 U.S. 1, 17 (1990), with *Wirtz*, *supra*, at 196, n. 27 (the Court has never declared that "Congress may use a relatively trivial impact on commerce as an excuse for broad general regulation of state or private activities"). We conclude, consistent with the great weight of our case law, that the proper test requires an analysis of whether the regulated activity "substantially affects" interstate commerce.

Lopez, at 554 - 559. The *Wickard* case is particularly relevant as it involved an individual farmer who grew his own wheat for his own consumption. As noted, Wickard was still subject to federal regulation even though as an individual his potential effect on interstate commerce was small but when combined with others the court noted that the potential effect on interstate commerce could be great.

In *Lopez*, the Court struck down 18 U.S.C. § 922(q), the "Gun Free School Zones Act of 1990," which made it a federal crime to possess a gun within a school zone. The Court found that

> Section 922(q) is a criminal statute that by its terms has nothing to do with "commerce" or any sort of economic enterprise, however broadly one might define those terms. Section 922(q) is not an essential part of a larger regulation of economic activity, in which the regulatory scheme could be undercut unless the intrastate activity were regulated. It cannot, therefore, be sustained under our cases upholding regulations of activities that arise out of or are connected with a commercial transaction, which viewed in the aggregate, substantially affects interstate commerce.
>
> Second, §922(q) contains no jurisdictional element which would ensure, through case by case inquiry, that the firearm possession in question affects interstate commerce.
>
> . . . .
>
> The possession of a gun in a local school zone is in no sense an economic activity that might, through repetition elsewhere, substantially affect any sort of interstate commerce. Respondent was a local student at a local school; there is no indication that he had recently moved in interstate commerce, and there is no requirement that his possession of the firearm have any concrete tie to interstate commerce.

Id., at 561. See also *United States v. Morrison*, 529 U.S. 598 (2000) (striking down the "Violence Against Women Act" that created civil liability for the commission of any gender based violent crime and noting that again there was no "express jurisdictional element which might limit its reach" to those acts connected with or affecting interstate commerce).[6]

The limits of the *Lopez* and *Morrison* decisions were found in the context of medical marijuana. In *Gonzales v. Raich*, 545 U.S. 1 (2005),[7] the Court held the commerce clause authorized Congress to enact federal laws regulating and criminalizing activities involving controlled substances even if those activities were wholly intrastate and were pursuant to a state statutory scheme that authorized the activities.

> Unlike those at issue in *Lopez* and *Morrison*, the activities regulated by the CSA [Controlled Substances Act] are quintessentially economic. "Economics" refers to "the production, distribution, and consumption of commodities." Webster's Third New International Dictionary 720 (1966). The CSA is a statute that regulates the production, distribution, and consumption of commodities for which there is an established, and lucrative, interstate market. Prohibiting the intrastate possession or manufacture of an article of commerce is a rational (and commonly utilized) means of regulating commerce in that product. Such prohibitions include specific decisions requiring that a drug be withdrawn from the market as a result of the failure to comply with regulatory requirements as well as decisions excluding Schedule I drugs entirely from the market. Because the CSA is a statute that directly regulates economic, commercial activity, our opinion in *Morrison* casts no doubt on its constitutionality.
>
> . . .
>
> Second, limiting the activity to marijuana possession and cultivation "in accordance with state law" cannot serve to place respondents' activities beyond congressional reach. The Supremacy Clause unambiguously provides that if there is any conflict between federal and state law, federal law shall prevail. It is beyond peradventure that federal power over commerce is " 'superior to that of the States to provide for the welfare or necessities of their inhabitants,' " however legitimate or dire those necessities may be. *Wirtz*, 392 U.S., at 196 (quoting *Sanitary Dist. of Chicago* v. *United States*, 266 U.S. 405, 426 (1925)). See also 392 U.S., at 195-196; *Wickard*, 317 U.S., at 124 (" '[N]o form of state activity can constitutionally thwart the regulatory power granted by the commerce clause to Congress' "). Just as state acquiescence to federal regulation

[6] Syllabus and majority opinion enclosed.

[7] Syllabus and majority opinion enclosed.

> cannot expand the bounds of the Commerce Clause, see, *e.g.*, *Morrison*, 529 U.S., at 661-662 (Breyer, J., dissenting) (noting that 38 States requested federal intervention), so too state action cannot circumscribe Congress' plenary commerce power. See *United States* v. *Darby*, 312 U.S. 100, 114 (1941) ("That power can neither be enlarged nor diminished by the exercise or non-exercise of state power").

Raich, *id.* at 25 - 26.

The *Wickard* and *Raich* cases seem especially relevant to CSHB 168(JUD). They clearly stand for the proposition that the Commerce Clause allows federal regulation of purely intrastate activities and products if Congress could rationally conclude that those activities could enter or affect interstate commerce. The production of wheat in *Wickard* and the production of marijuana in *Raich* could enter and could affect interstate commerce. Similarly, the production of a firearm, even if performed wholly intrastate and with materials found only in that state, could seemingly affect interstate commerce in firearms generally.

Indeed, this was the decision of the Ninth Circuit Court of Appeals in *United States v. Stewart*, 451 F.3d 1071 (9th Cir. 2006).[8] Robert Stewart manufactured homemade machine guns and machine gun kits wholly within California and was convicted of possessing a machine gun in violation of federal law. Stewart appealed and the Ninth Circuit Court of Appeals, based upon *Lopez* and *Morrison*, and before *Raich* was decided, initially reversed his conviction finding that the simple possession of homemade machines did not have a substantial effect on interstate commerce. See *United States v. Stewart*, 348 F.3d 1132(2003). After the United States Supreme Court decided *Raich*, the Supreme Court vacated the decision of the Ninth Circuit and told the court to reconsider their opinion in light of *Raich*.[9] On remand, the Ninth Circuit found that Congress had the authority to regulate machine guns, including one's wholly a product of intrastate commerce. The court found that "[h]omemade guns, even those with a unique design, can enter the interstate market and affect supply and demand."[10]

SENATE BILL 1644

By Beavers

AN ACT to amend Tennessee Code Annotated, Title 4, relative to exempting from regulation under the commerce clause of the Constitution of the United States a firearm, firearm accessory, or ammunition manufactured and retained in Tennessee.

BE IT ENACTED BY THE GENERAL ASSEMBLY OF THE STATE OF TENNESSEE:

SECTION 1. Tennessee Code Annotated, Title 4, is amended by adding Sections 2 through 6 of this act as a new chapter thereto.

SECTION 2. This chapter shall be known and may be cited as the "Tennessee Firearms Freedom Act".

SECTION 3. The general assembly declares that the authority for this chapter is the following:

(1) The tenth amendment to the United States Constitution guarantees to the states and their people all powers not granted to the federal government elsewhere in the Constitution and reserves to the state and people of Tennessee certain powers as they were understood at the time that Tennessee was admitted to statehood. The guarantee of those powers is a matter of contract between the state and people of Tennessee and the United States as of the time that the compact with the United States was agreed upon and adopted by Tennessee and the United States;

(2) The ninth amendment to the United States Constitution guarantees to the people rights not granted in the Constitution and reserves to the people of Tennessee certain rights as they were understood at the time that Tennessee was admitted to statehood. The guarantee of those rights is a matter of contract between the state and

5339

people of Tennessee and the United States as of the time that the compact with the United States was agreed upon and adopted by Tennessee and the United States.

(3) The regulation of intrastate commerce is vested in the states under the ninth and tenth amendments to the United States Constitution, particularly if not expressly preempted by federal law. Congress cannot preempt state regulation of intrastate commerce pertaining to the manufacture on an intrastate basis of firearms, firearms accessories, and ammunition;

(4) The second amendment to the United States Constitution reserves to the people the right to keep and bear arms as that right was understood at the time that Tennessee was admitted to statehood, and the guarantee of the right is a matter of contract between the state and people of Tennessee and the United States as of the time that the compact with the United States was agreed upon and adopted by Tennessee and the United States; and

(5) The Tennessee Constitution clearly secures to Tennessee citizens, and prohibits government interference with, the right of individual Tennessee citizens to keep and bear arms.

SECTION 4. As used in this chapter, unless the context otherwise requires:

(1) "Firearms accessories" means items that are used in conjunction with or mounted upon a firearm but are not essential to the basic function of a firearm, including but not limited to telescopic or laser sights, magazines, flash or sound suppressors, folding or aftermarket stocks and grips, speedloaders, ammunition carriers, and lights for target illumination;

(2) "Generic and insignificant parts" includes but is not limited to springs, screws, nuts, and pins; and

(3) "Manufactured" means creating a firearm, a firearm accessory, or ammunition from basic materials for functional usefulness, including but not limited to forging, casting, machining, or other processes for working materials.

SECTION 5. A firearm, a firearm accessory, or ammunition that is manufactured commercially or privately in Tennessee is not subject to federal law or federal regulation, including registration, under the authority of congress to regulate interstate commerce. It is declared by the legislature that those items have not traveled in interstate commerce. This section applies to a firearm, a firearm accessory, or ammunition that is manufactured in Tennessee from basic materials and that can be manufactured without the inclusion of any significant parts imported into this state. Generic and insignificant parts that have other manufacturing or consumer product applications are not firearms, firearms accessories, or ammunition, and their importation into Tennessee and incorporation into a firearm, a firearm accessory, or ammunition manufactured in Tennessee does not subject the firearm, firearm accessory, or ammunition to federal regulation. It is declared by the legislature that basic materials, such as unmachined steel and unshaped wood, are not firearms, firearms accessories, or ammunition and are not subject to congressional authority to regulate firearms, firearms accessories, and ammunition under interstate commerce as if they were actually firearms, firearms accessories, or ammunition. The authority of congress to regulate interstate commerce in basic materials does not include authority to regulate firearms, firearms accessories, and ammunition made in Tennessee from those materials. Firearms accessories that are imported into Tennessee from another state and that are subject to federal regulation as being in interstate commerce do not subject a firearm to federal regulation under interstate commerce because they are attached to or used in conjunction with a firearm in Tennessee.

SECTION 6. A firearm manufactured or sold in Tennessee under this chapter must have the words "Made in Tennessee" clearly stamped on a central metallic part, such as the receiver or frame.

SECTION 7. This act shall take effect upon becoming a law, the public welfare requiring it.

HB 190

<target><bill>HB 190</bill><subject>HB 190</subject><comm>HFIN26</comm></target>

Alaska State Legislature

Representative Anna Fairclough – House District 17

CS for House Bill 190 (HSS)
"An Act amending the children's trust."

The Alaska Children's Trust (ACT) was established in 1988 with the goal of improving the status of children in Alaska by generating funds and committing resources to eliminate child abuse and neglect. The initial legislative appropriation was made in 1996 for $6 million. Today, the Alaska Children's Trust totals approximately $7 million.

Because of the serious problem of child abuse and neglect in Alaska, and because the current structure of the trust has limited its effectiveness, the Trustees of the Alaska Children's Trust (ACT) and the Board of Directors of the Friends of the Alaska Children's Trust (FACT), the 501(c)(3) non-profit organization established to raise funds and advocate for the mission of the Alaska Children's Trust, have engaged in activities to assess the effectiveness of the Trust in accomplishing its mission and to plan for the future of the Trust including how FACT can help to accomplish that mission. These activities included strategic planning, research on the structure of children's trusts in other states, and an organizational assessment completed by The Giving Practice (Philanthropy Northwest). To solve the problems outlined above, CS for HB 190 (HSS) would do the following:

CSHB 190(HSS) would allow the legislature to appropriate annually 5% of the market value of the trust, as calculated on a 5-year average, for a named recipient grant. The named recipient shall be a nonprofit established to enhance the mission of the ACT and to raise funds for the prevention of child abuse and neglect. The named recipient will then make grants to community organizations working to prevent child abuse and neglect. The named recipient will enter into an agreement with the Department of Commerce, Community and Economic Development that will allow the named recipient to create and grow an endowment to help fund grantees at a consistent level from year to year, and increase the funds going to child abuse and neglect prevention programs.

The named recipient will be monitored by the ACT board. Still located within the Office of the Governor, the board will now have with seven voting members (as in current statute) and two nonvoting members from the legislature.

CS for HB 190(HSS) will allow the ACT board, working in concert with the named recipient, greater flexibility to create a more stable, streamlined and simplified administrative structure that would greatly enhance its ability to raise funds and pursue its mission efficiently and effectively.

Session: Alaska State Capitol • Juneau, AK 99801 • 907-465-3777 • Fax 907-465-2819
Interim: 10928 Eagle River Road, Suite 238 • Eagle River, AK 99577 • 907-694-8944 • Fax 907-694-8945
Representative_Anna_Fairclough@legis.state.ak.us

Alaska State Legislature

Representative Anna Fairclough – House District 17

CS for House Bill 190 (FIN) (26-LS0502\N)

"An Act amending the Alaska children's trust and relating to the trust; relating to special request Alaska children's trust plates; and amending State Procurement Code to exempt the Alaska children's trust and the Alaska Children's Trust Board."

House Bill 190 establishes an Alaska Children's Trust (ACT) grant account in the general fund and provides for private restricted-use donations, and an annual legislative appropriation of five percent average market value (preceding three years) of the trust account into the grant account. In addition it exempts the ACT and the ACT board from the state procurement code and would require the board to establish regulations as required by state statute.

It would preserve the present revenue sources of children's trust license plates, birth and marriage certificates annually appropriated by the legislature into the grant account for child abuse and neglect prevention activities and programs.

The ACT board of directors is given the authority to enter into a joint arrangement with a non-profit entity or entities for grant-making and fundraising without delegating its duties or authority. ACT will continue to be managed by seven board of directors; including the Governor or designee, Commissioners of the Departments of Health and Social Services and Education and Early Development, four public members appointed by the Governor with expertise in children's or prevention programs including child abuse and neglect prevention programs.

In summary, HB 190 provides ACT and the ACT board with greater flexibility to create a more stable, streamlined and simplified administrative structure that would greatly enhance the Trust's ability to pursue its mission efficiently and effectively.

I urge your support on this piece of legislation.

Alaska State Legislature

Representative Anna Fairclough – House District 17

CS for House Bill 190 (HSS)

"An Act amending the children's trust."

Sectional Analysis

Section 1. Amends AS 37.14.200

Allows the legislature to annually appropriate 5% of the market value, as calculated on a five year average, of the Alaska Children's Trust to a named recipient grantee through the Department of Commerce, Community and Economic Development.

Section 2. Amends AS 37.14.225

Defines the membership of the ACT board, and their qualifications.

Section 3. Amends AS 37.14.230

Describes the powers and duties of the ACT board, including monitoring grants to child abuse & neglect prevention programs, raising funds for the trust and overseeing the activities of the nonprofit named recipient.

Section 4. Amends AS 37.14.240

Allows 5% of the market value of the trust to be appropriated to a named recipient and also allows $150,000 from the trust principle to be used for administrative expenses.

Section 5. Amends AS 37.14.250

Describes the qualifications and obligations of the named recipient, including that it shall be a non-profit dedicated to the prevention of child abuse and neglect, and requires that the named recipient comply with certain grant conditions.

Session: Alaska State Capitol • Juneau, AK 99801 • 907-465-3777 • Fax 907-465-2819

CS for House Bill 190 (HSS)

"An Act amending the Alaska children's trust."

Explanation of Changes

Page 1, line 5

Deleted the words "market value of the unencumbered balance" and inserted the words **average of the market values**

Page 1, line 6

Immediately following the word "principle" insert **on June 30 for the first five of the six fiscal years immediately preceding that fiscal year**

After the two changes described to Page 1 above, Section 1 now reads in its entirety:

(d) The legislature may appropriate annually an amount that is equivalent to five percent of the average of the market values of the trust income and principal on June 30 for the first five of the six fiscal years immediately preceding that fiscal year, taking into account administrative expenses, as a grant to a named recipient under AS 37.05.316 subject to terms and conditions set by the board under AS 37.14.250.

Page 2, line 8

Deleted "." and inserted **and**

Page 2, line 8

Insert the following new paragraphs to read:

(5) one nonvoting member appointed by the speaker of the house of representatives;
(6) one nonvoting member appointed by the president of the senate.

The Honorable Anna Fairclough
Alaska State Legislature
State Capitol, Room 421
Juneau, AK 99801-1182

Dear Representative Fairclough:

As a trustee of the Alaska Children's Trust (ACT) and a longtime supporter and former member of the Friends of the Alaska Children's Trust (FACT), I want to thank you for your leadership in sponsoring House Bill 190, an act amending the Alaska Children's Trust. Your attention and diligence to this matter could result in significantly impacting the incidence of child abuse and neglect in Alaska.

The Finance Committee Substitute for HB190 addresses head-on many of the issues that have made the FACT fundraising and ACT grantmaking processes cumbersome. In particular, the creation of a grant account within the general fund allows FACT volunteers to raise funds from individual Alaskans to support issue-specific grants. if enacted, Alaskans will for the first time have assurances that their gifts to ACT can be directed to a specific purpose.

The ACT and FACT have struggled to find a way to meet the original intent of donors and ensure that their gifts are treated with the highest level of stewardship. While the trustees and friends continue to believe that privatization of the Trust through a public-private sector partnership is still the best approach, this CS to HB190 goes a long way toward resolving issues that have confounded advocates for prevention of child abuse and neglect for many years.

I hope this legislation is favorably considered by your colleagues in the Alaska State Legislature.

Best regards,

Diane Kaplan
President

Representative Anna Fairclough – House District 17

CS for House Bill 190 (FIN) (26-LS0502\N)

"An Act amending the Alaska children's trust and relating to the trust; relating to special request Alaska children's trust plates; and amending State Procurement Code to exempt the Alaska children's trust and the Alaska Children's Trust Board."

Sectional Analysis

Section 1, 2, 3. Amends AS 18.50.225(d); 18.50.272(e); 28.10.421(d)(14)

Allows the legislature to appropriate funds generated from birth certificates and heirloom marriage certificates suitable for display; and Alaska children's trust license plates to the Alaska children's trust grant account.

Section 4. Amends AS 36.30.990(1)

Exempts the Alaska children's trust and the Alaska Children's Trust Board from the State Procurement Code.

Section 5. Amends AS 37.14.200(b)

Defines the assets of the trust to include appropriations, donations to the trust, and income earned on investments of trust assets.

Section 6. Repeals and reenacted AS 37.14.200(c)

Provides for the commissioner of revenue to manage the trust as an endowment.

Section 7. Amends AS 37.14.200 by adding new subsections AS 37.14.200(d)(e)(f)(g)

The commissioner of revenue shall provide reports to the board on condition and investment of the trust.

Allows the legislature to annually appropriate 5% of the market value, as calculated on a three year average, of the Alaska Children's Trust to the grant account.

Allows the legislature to appropriate from the principal of the trust up to $150,000 for administrative expenses of the board; and appropriate expenses related to the commissioner of revenue's management of trust assets.

Representative_Anna_Fairclough@legis.state.ak.us

copy on file

Explains that this section does not create a dedicated fund.

Section 8. Amends AS 37.14 by adding new section AS 37.14.205

Creates an Alaska children's trust grant account as an account in the general fund and allows the legislature to appropriate funds from the trust to the grant account.

Defines uses of the grant account to include making grants; obtaining private and federal; solicit contributions, gifts and bequests for the trust and grant accounts; and expend private restricted-use donations from the grant account without further appropriation.

Section 9. Amends AS 37.14.225

Defines the membership of the ACT board, and their qualifications.

Section 10. Amends AS 37.14.230

Describes the powers and duties of the ACT board, to include awarding grants, maintaining records of all donations to the trust and grant account; apply for and use funds from grant account to obtain private and federal grants for child abuse & neglect prevention programs; solicit donations to the grant account; account for interest earned on private restricted donations not fully expended.

Section 11. Amends AS 37.14.230 by adding new subsection AS 37.14.230(b)

Allows the Alaska Children's Trust Board to enter into joint arrangement with a private non-profit entity or entities for grant-making and fundraising without delegating its duties or authority.

Section 12. Amends AS 37.14 by adding new section AS 37.14.235

Provides support staff from the Department of Health & Social Services.

Section 13. Amends AS 37.14 by adding new section AS 37.14.245

Allows the Alaska Children's Trust Board to adopt regulations not subject to the requirements of the Administrative Procedures Act.

Section 14. Amends AS 37.14.270 is repealed and reenacted

Defines board, grant account, private restricted-use donation, and trust.

Section 15. Amends AS 37.14.210, 37.14.240, 37.14.250, and 37.14.260 are repealed

ANALYSIS: *(Attach a separate page if necessary)*

HB 190 makes several changes to the Alaska Children's Trust (ACT) board and trust account management. The Trust is to be managed by the Commissioner of Revenue with five percent of the market value of the unencumbered balance of the trust to be appropriated for awarding a named recipient grant by the Department of Commerce, Community and Economic Development to be used by the non-profit selected by the board to award subgrants to organizations and projects designed to prevent child abuse and neglect in Alaska.

The Department does not expect to need additional funds to manage this grant.

ANALYSIS: *(Attach a separate page if necessary)*

The Committee Substitute Bill is an amendment to the Alaska Children's Trust statute which allow the legislature to appropriate funds generated from birth and heirloom marriage certificates and trust license plates to the Alaska Children's Trust Grant Account and defines the assets of the trust to include appropriations, donations and income earned on investments of trust assets. Treasury would continue to invest the assets of the Trust and would calculate 5% of market value of the Trust on a three year average for appropriation to the grant fund. No appropriation is required as implementation will be carried out through existing personal services and custodial resources. The effect this bill will have on investment performance is unknown.

CS FOR HOUSE BILL NO. 190(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SIXTH LEGISLATURE - SECOND SESSION

BY THE HOUSE FINANCE COMMITTEE

Offered:
Referred:

Sponsor(s): REPRESENTATIVES FAIRCLOUGH, Hawker, Holmes, Peggy Wilson

A BILL

FOR AN ACT ENTITLED

"An Act amending the Alaska children's trust and relating to the trust; establishing a children's trust grant account; relating to birth certificates and certificates of marriage; relating to special request Alaska children's trust license plates; and amending the State Procurement Code to exempt the Alaska children's trust and the Alaska Children's Trust Board."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 18.50.225(d) is repealed and reenacted to read:

(d) The estimated amount by which the fees received under this section exceed the cost of issuing birth certificates under (a) of this section may be appropriated annually by the legislature to the Alaska children's trust grant account (AS 37.14.205).

*** Sec. 2.** AS 18.50.272(e) is repealed and reenacted to read:

(e) The estimated amount by which the fees received under this section exceed the cost of issuing heirloom certificates of marriage under (a) of this section may be

appropriated annually by the legislature to the Alaska children's trust grant account (AS 37.14.205).

*** Sec. 3.** AS 28.10.421(d)(14) is amended to read:

(14) special request Alaska children's trust plates ..... $100 plus the fee required for that vehicle under (b), (c), (h), or (i) of this section; the fee required by this paragraph shall be collected only on the first issuance and the replacement of special request plates; the commissioner of administration shall separately account for the fees received under this paragraph that the department deposits in the general fund; notwithstanding (g) of this section, the annual estimated balance in the account that is in excess of the cost of issuing special request plates may be appropriated by the legislature into the **Alaska children's trust grant account established in AS 37.14.205** [PRINCIPAL OF THE ALASKA CHILDREN'S TRUST UNDER AS 37.14.200];

*** Sec. 4.** AS 36.30.990(1) is amended to read:

(1) "agency"

(A) means a department, institution, board, commission, division, authority, public corporation, the Alaska Pioneers' Home, the Alaska Veterans' Home, or other administrative unit of the executive branch of state government;

(B) does not include

(i) the University of Alaska;

(ii) the Alaska Railroad Corporation;

(iii) the Alaska Housing Finance Corporation;

(iv) a regional Native housing authority created under AS 18.55.996 or a regional electrical authority created under AS 18.57.020;

(v) the Department of Transportation and Public Facilities, in regard to the repair, maintenance, and reconstruction of vessels, docking facilities, and passenger and vehicle transfer facilities of the Alaska marine highway system;

(vi) the Alaska Aerospace Corporation;

(vii) the Alaska Retirement Management Board;

(viii) the Alaska Seafood Marketing Institute;

(ix) the Alaska children's trust and the Alaska Children's Trust Board;

* **Sec. 5.** AS 37.14.200(b) is amended to read:

(b) The [PRINCIPAL OF THE] trust consists of

(1) legislative appropriations to the trust; [AND]

(2) **donations to the trust; and**

(3) income earned on investments of trust assets appropriated by the legislature to the trust [GIFTS, BEQUESTS, AND CONTRIBUTIONS OF CASH OR OTHER ASSETS FROM A PERSON].

* **Sec. 6.** AS 37.14.200(c) is repealed and reenacted to read:

(c) The commissioner of revenue shall manage the trust as an endowment, with the goal that the purchasing power of the trust will not diminish over time without regard to additional contributions that may be made to the trust. The commissioner shall invest the assets of the trust in a manner likely to yield at least a five percent real rate of return over time. The commissioner may comingle the assets of the trust with other public funds for purposes of investment.

* **Sec. 7.** AS 37.14.200 is amended by adding new subsections to read:

(d) In carrying out the investment duties under AS 37.14.200 - 37.14.270, the commissioner of revenue has the powers and duties set out in AS 37.10.071. The commissioner shall provide reports to the board on the condition and investment performance of the trust.

(e) As soon as is practicable after July 1 of each year, the commissioner of revenue shall determine the average of the market values of the trust on June 30 for the immediately preceding three fiscal years. The commissioner shall identify five percent of that amount as available for appropriation to the grant account from which the board may award grants under AS 37.14.230. The commissioner shall also report as available for appropriation a total of amounts previously identified as available for appropriation to the grant account that have not been appropriated.

(f) The legislature may appropriate from the principal of the trust up to

$150,000 each year for the administrative expenses of the board relating to AS 37.14.200 - 37.14.270. The legislature may also appropriate from the principal of the trust expenses related to the commissioner of revenue's management of trust assets.

(g) Nothing in this section creates a dedicated fund.

* **Sec. 8.** AS 37.14 is amended by adding a new section to read:

Sec. 37.14.205. Alaska children's trust grant account. (a) The Alaska children's trust grant account is established as an account in the general fund. The legislature may appropriate funds to the grant account from

(1) the trust account in the amount described in AS 37.14.200(e);

(2) program receipts from special request Alaska children's trust plates under AS 28.10.421(d)(14);

(3) program receipts from birth certificates under AS 18.50.225;

(4) program receipts from certificates of marriage under AS 18.50.272;

(5) private restricted-use donations; and

(6) any other source.

(b) The board may use money in the grant account for the following purposes and without further appropriation:

(1) to make grants under AS 37.14.230;

(2) to obtain private and federal grants for the trust and the grant account;

(3) to solicit contributions, gifts, and bequests for the trust and the grant account;

(4) to expend private restricted-use donations in conformity with the donor's restrictions.

* **Sec. 9.** AS 37.14.225 is amended to read:

Sec. 37.14.225. Trust board established. The Alaska Children's Trust Board is established in the Office of the Governor. The board is composed of

(1) the governor or a designee of the governor;

(2) the commissioner of health and social services or the commissioner's designee;

(3) the commissioner of education and early development or the commissioner's designee; and

(4) four public members appointed by the governor [; IN APPOINTING THE PUBLIC MEMBERS, THE GOVERNOR SHALL GIVE A PREFERENCE TO PERSONS] who have experience and expertise in

(A) children's or prevention programs**, including child abuse and neglect prevention programs**; or

(B) private sector finance.

*** Sec. 10.** AS 37.14.230 is amended to read:

Sec. 37.14.230. Powers and duties of the board. The [WHEN ACTING AS ADMINISTRATOR OF THE TRUST, THE] board shall

(1) hold regular and special meetings it considers necessary; the board may hold meetings by teleconference;

(2) award grants from the **grant account** [NET INCOME OF THE TRUST] to community-based programs [AND PROJECTS] that the board finds will aid in the prevention of child abuse and neglect;

(3) monitor approved programs [AND PROJECTS] for compliance with AS 37.14.200 - 37.14.270 **and specified grant conditions**;

(4) **maintain records for all donations to the trust and the grant account; the records must reflect the amount of the donation, the date of the donation, the donor's intent, if any, with respect to how the donation is to be used, the account into which the donation was deposited, and the manner in which the donation was expended** [BEFORE PROVIDING ASSISTANCE TO A PROGRAM OR PROJECT, APPROVE WRITTEN FINDINGS ON THE PROGRAM OR PROJECT THAT INCLUDE A CONSIDERATION OF THE MEANS OF MEASURING THE EFFECTIVENESS OF THE PROGRAM OR PROJECT];

(5) apply for, and use **funds from the grant account** [NET INCOME FROM THE TRUST] to obtain[,] private and federal grants for the prevention of child abuse and neglect;

(6) solicit contributions, gifts, and bequests to the trust **and the grant**

account;

(7) keep **electronic** [AUDIO TAPE] recordings of each meeting of the board to be made available on request; and

(8) submit to the governor and make available to the legislature by February 1 each year a report describing

(A) the child abuse and neglect prevention services that were provided by the programs [AND PROJECTS] to which the board awarded grants; and

(B) the annual level of contributions, income, and expenses of the trust **and the grant account;**

(9) make arrangements with the commissioner or a financial depository to manage private restricted-use donations that are not fully expended and account for any interest earned on the donations.

* **Sec. 11.** AS 37.14.230 is amended by adding a new subsection to read:

(b) The board may enter into joint arrangements with a private nonprofit entity or entities for the purpose of making grants and fundraising for the support of child abuse and neglect prevention programs. In entering into a joint arrangement, the board may not delegate its duties or authority under AS 37.14.200 - 37.14.270.

Amend! delete entire section

* **Sec. 12.** AS 37.14 is amended by adding a new section to read:

Sec. 37.14.235. Staff. The Department of Health and Social Services shall provide staff for the board.

* **Sec. 13.** AS 37.14 is amended by adding a new section to read:

Sec. 37.14.245. Regulations. (a) The board may adopt regulations to implement AS 37.14.200 - 37.14.270. Regulations adopted by the board are not subject to AS 44.62 (Administrative Procedure Act). The board shall comply with the requirements of AS 44.62.310 and 44.62.312.

(b) Notwithstanding (a) of this section, a regulation adopted under AS 37.14.200 - 37.14.270 shall be published in the Alaska Administrative Register and Alaska Administrative Code for informational purposes. A regulation adopted under this section shall conform to the style and format requirements of the drafting manual for administrative regulations that is published under AS 44.62.050.

(c) At least 30 days before the adoption, amendment, or repeal of a regulation under this section, the board shall provide notice of the action that is being considered. The notice must include publication in a newspaper of general circulation in the state.

(d) A regulation adopted under this section takes effect 30 days after adoption by the board unless a later effective date is stated in the regulation.

(e) Notwithstanding the other provisions of this section, a regulation may be adopted, amended, or repealed, effective immediately, as an emergency regulation. For an emergency regulation to be effective, the board must find that the immediate adoption, amendment, or repeal of the regulation is necessary. The board shall, within 10 days after adoption of an emergency regulation, give notice of the adoption under (c) of this section. An emergency regulation adopted under this subsection may not remain in effect past the date of the next regular meeting of the board unless the board complies with the procedures set out in this section and adopts the regulation as a permanent regulation.

(f) In this section, "regulation" has the meaning given in AS 44.62.640(a).

* **Sec. 14.** AS 37.14.270 is repealed and reenacted to read:

Sec. 37.14.270. Definitions. In AS 37.14.200 - 37.14.270, unless the context otherwise requires,

(1) "board" means the Alaska Children's Trust Board;

(2) "grant account" means the Alaska children's trust grant account established in AS 37.14.205;

(3) "private restricted-use donation" means a donation related to the prevention of child abuse and neglect where a donor specifies in writing that the donation be used for any purpose other than to be placed in the corpus of the trust and invested with trust assets;

(4) "trust" means the Alaska children's trust established in AS 37.14.200.

* **Sec. 15.** AS 37.14.210, 37.14.240, 37.14.250, and 37.14.260 are repealed.

3/24/09

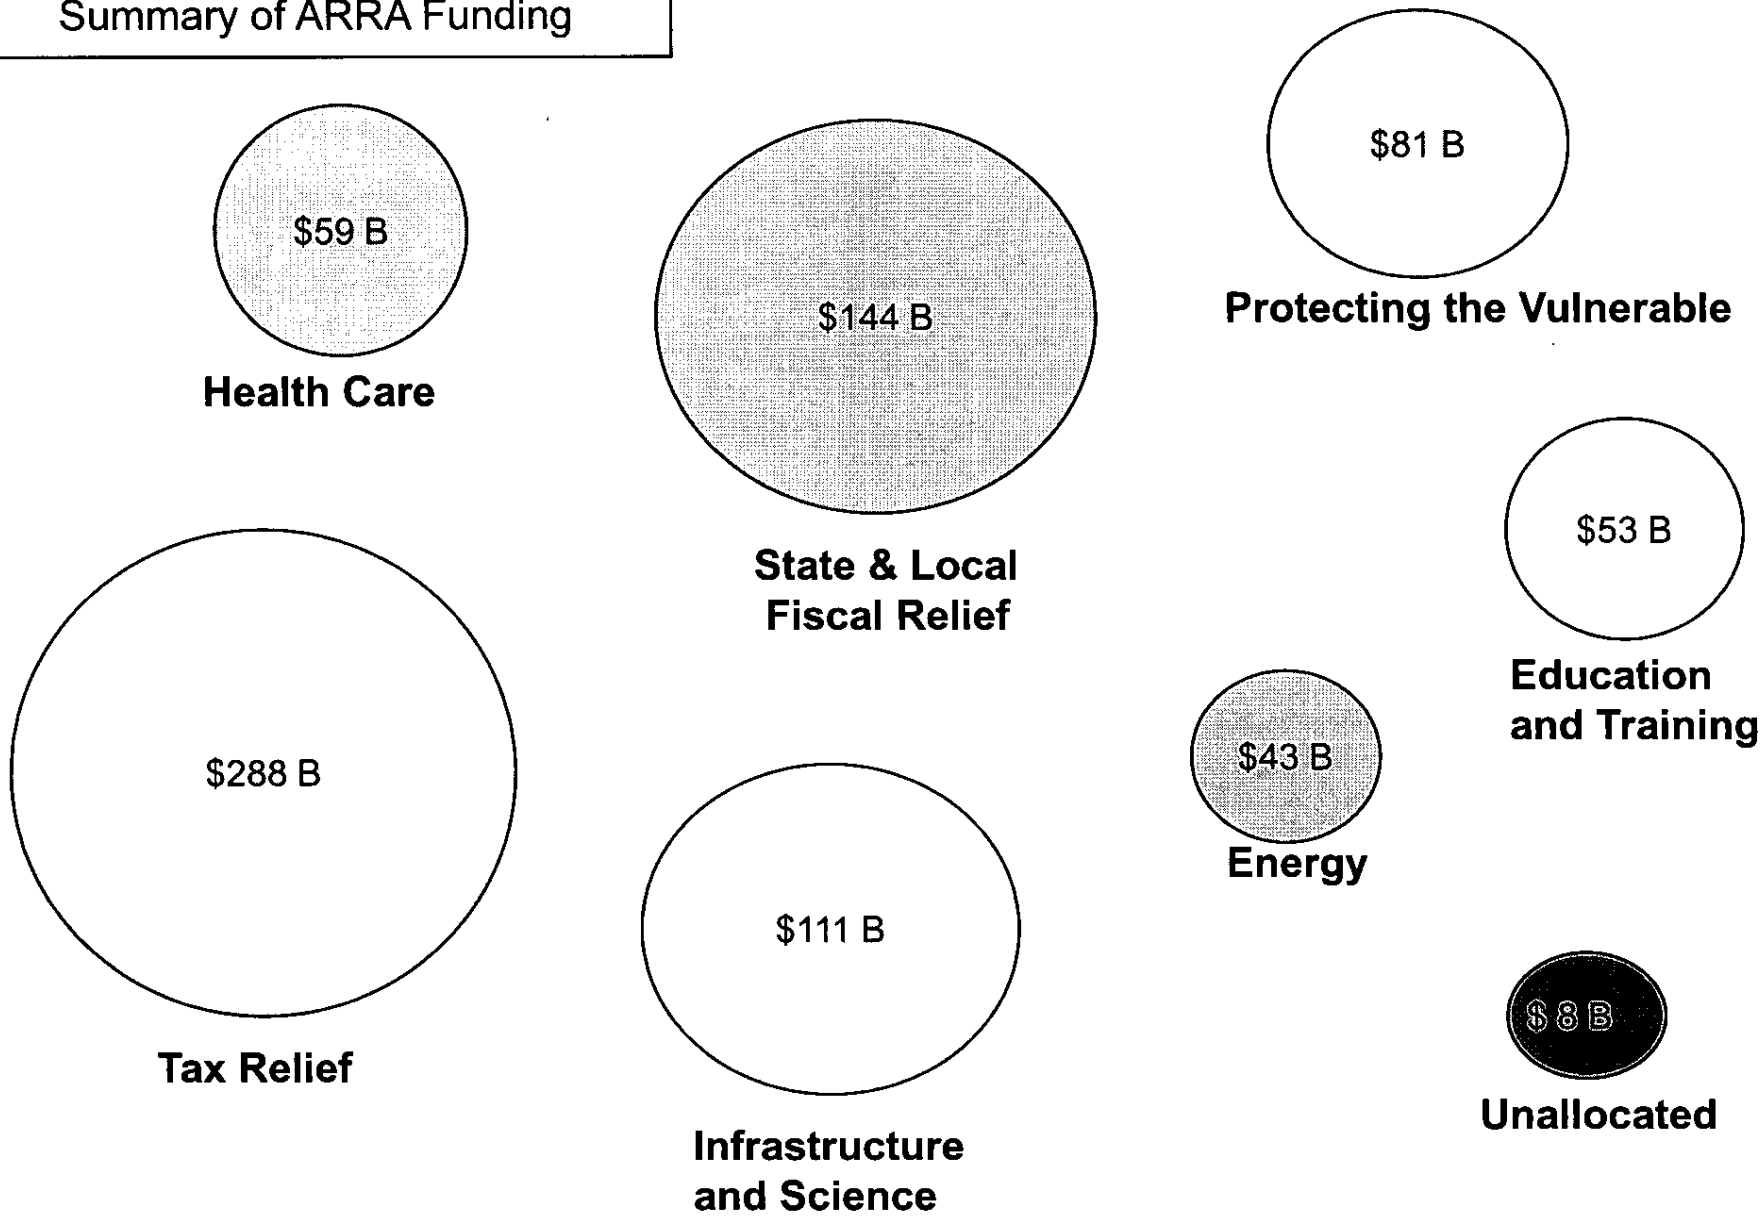
American Recovery and Reinvestment Act (ARRA)

Enacted February 17, 2009

ARRA - WHAT IS IT?

- $787 billion economic stimulus package to accelerate the nation's economic recovery
  - Federal tax relief
    - $288 billion in tax relief between now and close of FFY 2011
  - Federal spending increases
    - $499 billion in additional federal spending.

Summary of ARRA Funding



OBJECTIVES OF LEGISLATION

- Recovery
  - Job preservation and creation
  - Stabilize state and local economies
- Reinvest
  - Build and repair infrastructure
  - Energy efficiency and science

FEDERAL SPENDING TIMELINES

- 20 percent of the ARRA federal spending will occur before October, 2009
- An additional 38 percent is projected to be spent before October 2010.
- By October 2011, about 80 percent of the stimulus package-related spending will have occurred.

FEDERAL FUNDS DISTRIBUTION
FIVE PRIMARY METHODS

1. **Formula**: Medicaid (FMAP), Education, Highway Infrastructure
   - Limits need for new processes to receive and expend funds

2. **Demand**: Premium Subsidies for COBRA Continuation Coverage, Unemployment Insurance, Food Stamps

3. **Competition**: Broadband, COPS, National Science Foundation
   - States, Communities, Non-profits, Others

4. **One-Time Automatic Disbursement:** Social Security payments, Veterans & Supplemental Security Income beneficiaries

5. **Federal Agency Operating and Spending Plans**: Environmental cleanup of nuclear waste sites, National Parks construction, Defense and Veterans infrastructure programs

5370

UNPRECEDENTED ACCOUNTABILITY & TRANSPARENCY

- Distribution of funds through formula programs
  - Existing framework for tracking and reporting
- Inspector General Funding
  - Appropriations for IG services in every department
- Recovery Act Accountability & Transparency Board
- Expedited application for and obligation of funds
  - State agencies continue to meet application deadlines
- Certifications & Assurances by the State

GOVERNOR CERTIFICATION BY APRIL 3, 2009

SEC 1607 (a) Not later than 45 days after the date of enactment of this Act, for funds provided to any State or agency thereof, the Governor of the State shall certify that:

(1) the State will request and use funds provided by this Act; and

(2) the funds will be used to create jobs and promote economic growth.

OTHER GOVERNOR CERTIFICATIONS & ASSURANCES

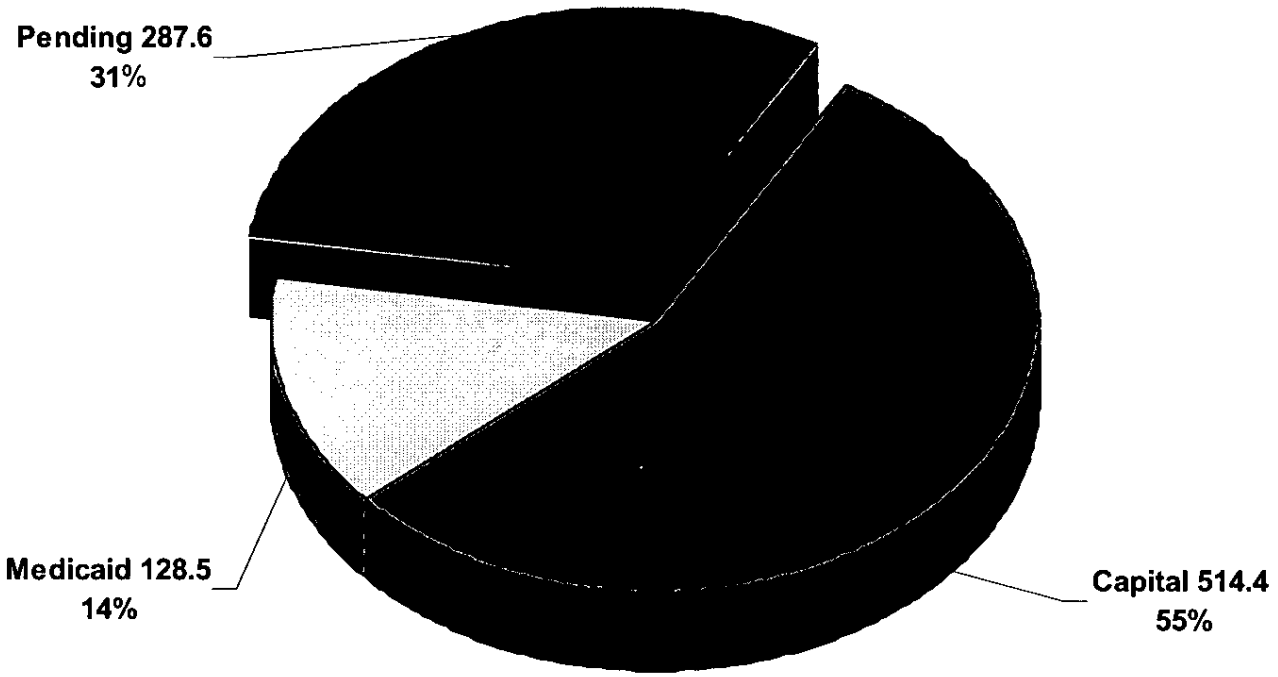
- Unemployment Insurance $25 weekly increase
  (*signed February 18, 2009*)

- Transportation maintenance of effort
  (*signed March 12, 2009 Sec 1201*)

- Transportation appropriate use of taxpayer dollars
  (*signed March 12, 2009 Sec 1511*)

- Energy – three assurances required; to meet two of these would require changes to Alaska's regulatory energy policy and a statewide energy building code

Estimated Allocation
State Government $930.5 million

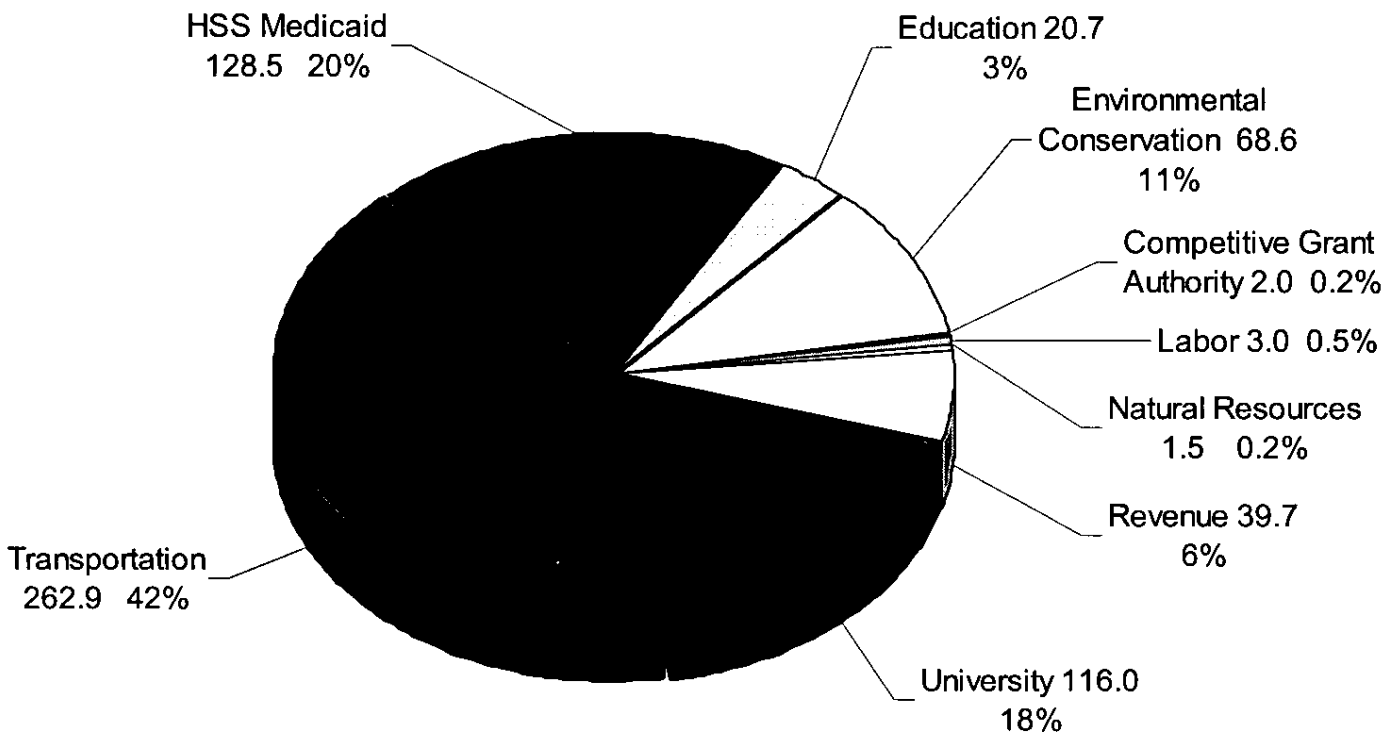


LEGISLATION SUBMITTED TO DATE

- Total ARRA Request to Date : $642.9* million
  - $262.9 Transportation HB154/SB123*
  - $251.5 Non- DOT Economic Stimulus SB161
  - $128.5 Medicaid FY09 & FY10 Amendments

Transportation Bill includes request for excess authority for contingent funding that is not included here.

ARRA BUDGET REQUEST
$642.9 million



WHAT IS THERE TO DISCUSS?

⌘ Policy Issues $73.2 million

- Statewide policy and code changes that effect individuals and/or businesses
- Statute changes that impact the way a state agency does business and may effect the public
- Permanent increased liability for the State and employers

⌘ Operating and Capital Issues $214.4

- One Time Funds
- Managing Expectations
- Opportunities to benefit the state that will not increase long term costs to the state

GOVERNOR ASSSURANCES ENERGY

Sec 410

(a)(1) that the state regulatory authority will seek to implement a policy to ensure utility financial incentives are aligned with helping customers use energy more efficiently.

(a) (2) requires that the state, or the applicable units of governmental that have authority to implement building codes will implement:

- building energy code for residential buildings that meets the International Energy Conservation Code
- building energy code for commercial buildings that meets standards ANSI/ASJHRAE/IESNA standards
- a plan for achieving compliance with the above energy codes within 8 years of enactment in at least 90 percent of new and renovated buildings, the plan shall include training and enforcement programs and measurement of the rate of compliance each year.

(a)(3) that the grants will be prioritized, "to the extent practicable," toward energy efficiency and renewable energy programs.

ENERGY ASSURANCE STATE GUIDANCE

- USDOE written guidance needed
  - Are energy assurances an "all or nothing" requirement?
    - State Energy Program $28.6 million
    - Weatherization Program $18.5 million
    - Energy Efficiency Grants $ 8.5 million
- Application Timelines
  - March 23, 2009 – Initial
    - Withhold until assurances issues resolved *(per DOE)*
  - May 12, 2009 - Final

ENERGY CODE CONSIDERATIONS

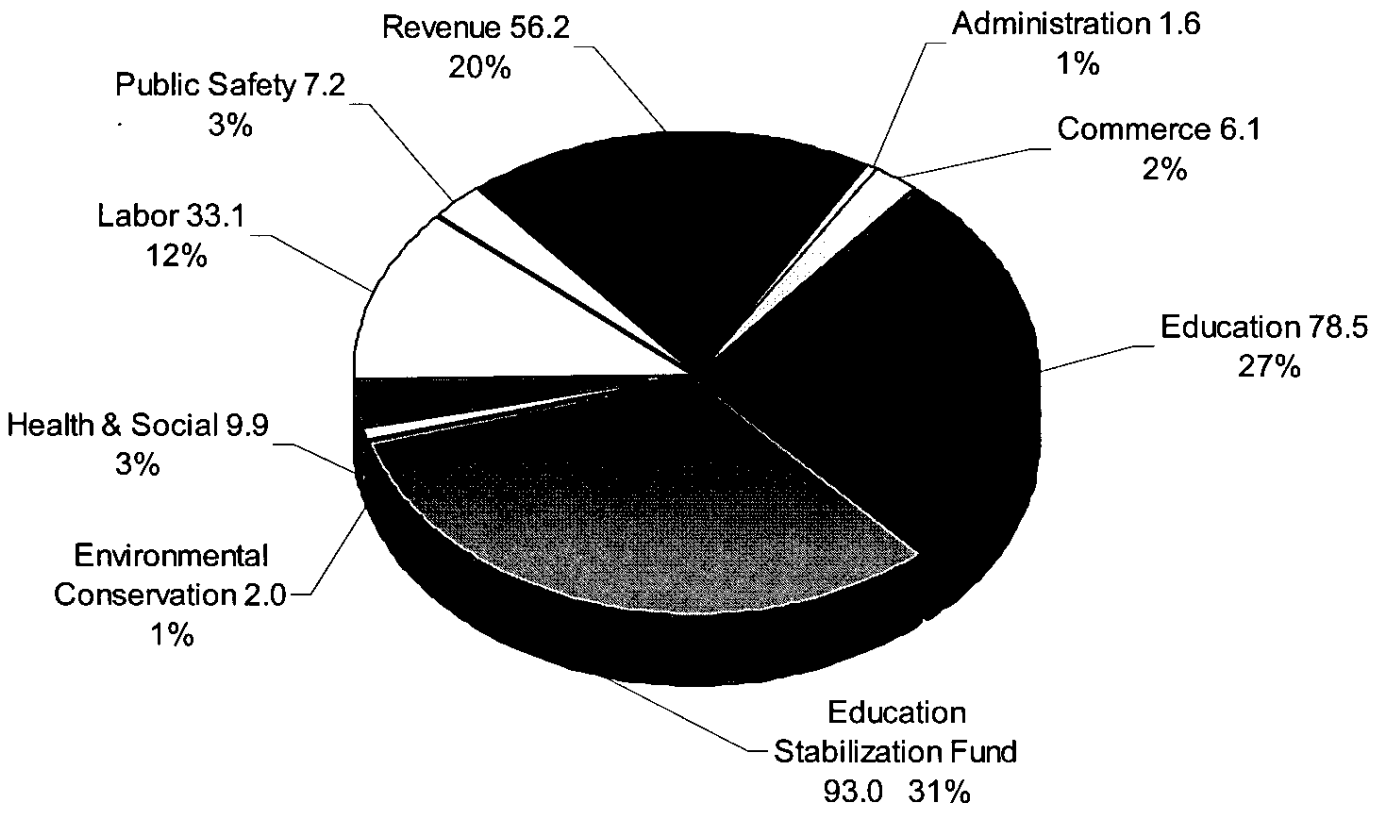
- Public debate on energy building code
  - Cost versus potential savings to homeowners
  - Cost to enforce at state and local levels
  - Local control concerns
  - Cost to the state to continue funding renovation programs for buildings that are not built to energy efficiency standards

UNEMPLOYMENT STATUTE CHANGE ALTERNATE BASE PERIOD

An estimated increase in the number of individuals that could be eligible for unemployment insurance would result in:

- $2 million annual impact on UI Trust fund
- $10 per worker cost to the employer
- .03% employer rate increase

ARRA ITEMS PENDING DISCUSSION
$287.6 million



ONE TIME FUNDS

- ARRA Funds Used For:
  - Salaries may delay, but not prevent, layoffs
  - Expansion of services to Alaskans will abruptly end
  - Public Safety capacity increases will create on-going position costs
  - Permanent changes in programs may create expectations for continuing programs once the federal funds are no longer available

ACCOUNTABILITY

- Significant responsibility is incumbent upon the State, even for pass through funds

- Accountability attaches to the Governor
  - Ladder certifications down to sub-grantees
  - Tracking of expenditures
  - Reporting requirements

RESPONSIBLE QUESTIONS
Before Committing Alaska

- Are we fully utilizing the federal funds that are currently available to us?

- Is the state ready and willing to accept these as onetime funds or will there be an expectation that the state will backfill the hole when federal funds are gone?

- Is the public fully informed and in concurrence with proposed increases to the state operating budget ?

POTENTIAL OPPORTUNITIES
Benefit Without Long Term Cost

- Intensive teacher training
- Expand student and teacher use of technology in schools
- Obtain state-of-the art assistive devices that reduce barriers to obtaining employment, learning, or living independently
- Equipment, technology and software upgrades to sustain or enhance services in education, public safety, and workforce training programs
- Rapid deployment of workforce development strategies on work skills and work preparedness for targeted populations
- Modifications to facilities for safety, efficiency, improved durability and longevity

Change Record Detail with Description

Department of Administration

Scenario: Economic Stimulus FY2009 and FY2010 (7400)
Component: Finance (59)
RDU: Centralized Administrative Services (13)
Title: Premium Assistance for COBRA Benefits

	Trans Type	Totals	Personal Services	Travel	Services	Commodities	Capital Outlay	Grants, Benefits	Miscellaneous	Positions PFT	PPT	NP
	IncOTI	1,489.0	0.0	0.0	1,489.0	0.0	0.0	0.0	0.0	0	0	0
1212 Federal E	1,489.0											

This provides for a federally funded subsidy for COBRA health insurance coverage to assistance eligible individuals (AEIs). AEI is defined as an individual who is involuntarily terminated from employment between September 1, 2008 and December 31, 2009, who elects to receive COBRA coverage and pays 35% of the premium due as of March 1, 2009. The employer pays the remaining 65% of the premium and is reimbursed by the federal government by withholding premiums paid from payroll taxes reported on the quarterly 941 employer tax form.

The amount requested here is based on estimates of the number of involuntary terminations, the number of individuals who will elect to participate, and the number of COBRA subsidy months.

1212 Federal E‹	40,000.0											

This request is for the full federal allocation of $40,000,000.

Education for the Disadvantaged - Title 1-A (Grants to LEAs and School Improvements Grants): To help school districts mitigate the effect of the reduction in local revenues and State support for education by distributing funding to schools and school districts with a high percentage of students from low-income families, and by providing funding for academic assessment and LEA and school improvement.

State pass-through by formula or grant to LEAs for distribution during school years 2009-2010 and 2010-2011. Each LEA receiving funds must file a school-by-school listing of per-pupil educational expenditures from State and local sources during the 2008-2009 academic year to its State education agency no later than December 1, 2009. States must report that information to the Secretary of Education by March 31, 2010.

Authority impact is estimated to double state allocation and must be expended by Sept. 30, 2010 (bill page 67).

This request is for the full federal allocation of $328,000.

Education for Homeless Children and Youth: To ensure that homeless children, including preschoolers and youths, have equal access to free and appropriate public education.

Each State will receive a grant that is proportionate to the number of homeless students identified as such during the 2007-2008 school year relative to the number of homeless children nationally during the same year.

States will award subgrants to LEAs on a competitive basis, or using a formula based on the number of homeless students identified in each school district in the State (bill page 68).

1212 Federal E		93,043.2										

This request is for the full federal allocation of "base" stabilization funds totaling $93,043,200.

Alaska's allocation of the ES State Stabilization Funds is a total of $113,774,697. 81.8% are considered "base" stabilization funds and amounts to $93,043,200. 33% of these "base" funds ($30,704,190) will be distributed from the USDOE and made available to the State between July 1 and September 30, 2009.

The Department of Education & Early Development will allocate these "base" funds to LEAs based on their relative share of funding under Title 1-A grants for the most recent year for which data are available (currently 2009). LEAs may use the funds for activities authorized by ESEA, IDEA, Adult Family Literacy Act, Carl D. Perkins Career & Technology Act, or for the repair, modernization or renovation of public school facilities that is consistent with State law.

1212 Federal E	286.0											

This request is for the full federal allocation of $286,000.

The ARRA allocation for the National School Lunch Program (NSLP) will provide funding under the Richard B. Russell National School Lunch Act to carry out a grant program for the NSLP equipment assistance.

Funds must be provided in proportion to each State's administrative expense allocation. States must provide competitive grants to school food authorities based on the need for equipment assistance in participating schools. Priority will be given to schools in which 50% or more of the students are eligible for free or reduced priced meals under the NSLP. Eligible applicants include public and non-profit private schools and residential child care institutions.

Title: CMS - Medicaid Provider HIT Adoption and Operation Payments - Electronic Health Records

	Trans Type	Totals	Personal Services	Travel	Services	Commodities	Capital Outlay	Grants, Benefits	Miscellaneous	Positions PFT	PPT	NP
	IncOTI	2,040.0	400.0	0.0	0.0	0.0	0.0	0.0	1,640.0	4	0	0
1003 G/F Match	40.0											
1212 Federal E	2,000.0											

Total Funds: Unknown FFY2009 - 2015. Operating and capital State's share will be based on the number and type of qualifying providers. Federal Funds (FF) at 100% for incentive payments to qualified Medicaid providers. 90% FF is for administrative cost. Four permanent positions to be added SFY2010.

Purpose: In addition to providing funding to incentivize Medicaid providers to implement and use Electronic Health Records (EHR) and Health Information Technology (HIT) exchanges, the administrative funding is to coordinate with other state or local HIT projects, national standards setting, and coordinate with Medicare, Indian Health Service, tribal health organizations, and other federal agencies to assure interoperability of systems and avoidance of duplicate provider payments for this purpose. Also included is imposition of Health Information Portability and Accountability Act (HIPAA) privacy requirements into the new electronic health records.

Timing: Funding runs FFY2009-2015. CMS indicated guidance on administrative activities will be published in March with follow-up guidance in June. Should be able to access federal administrative funds in SFY2010.

Requirements: The details of the requirements will be provided by CMS over time. The first phone call with CMS raised many issues that CMS was not even aware of, let alone ready to answer. The general requirements as laid out in this law will require a tremendous effort by the department. (See pages136-141, 144-164, 375-380)

Recipients: The state, Medicaid providers that qualify for these IT funds, other contracted organizations

	Trans Type	Totals	Personal Services	Travel	Services	Commodities	Capital Outlay	Grants, Benefits	Miscellaneous	Positions PFT	PPT	NP
	IncOTI	507.3	0.0	0.0	0.0	0.0	0.0	507.3	0.0	0	0	0
1212 Federal E‹		507.3										

The Employment & Training Services (E&TS) component is requesting federal economic stimulus authorization in the amount of $507.3 to support additional training and employment opportunities for unemployed low-income seniors. Grantees will expand the number of Senior Community Service Employment Program (SCSEP) participants assigned to community service work, especially in those growth industries emphasized in the Recovery Act (e.g., health care, child care, education, green jobs, energy efficiency and environmental services) and in expanded public service activities that utilize Recovery Act funds. The wages paid to these low-income seniors will provide a direct stimulus to the economies of local communities which will also benefit from the community service work performed by SCSEP participants.

The funds will be used to provide high quality job training, on-the-job training and employment assistance to an estimated 80 low income older workers and to assist employers that are faced with the challenges of today's workplace by developing a viable workforce that is trained, qualified, reliable, and ready to work.

Component: Employment and Training Services (2761)
RDU: Employment Security (107)
Title: Economic Stimulus - Add Federal Authority to Provide Labor Exchange Services to Assist Workers in Obtaining Employment

	Trans Type	Totals	Personal Services	Travel	Services	Commodities	Capital Outlay	Grants, Benefits	Miscellaneous	Positions PFT	PPT	NP
	IncOTI	4,304.7	2,208.8	25.0	1,732.5	220.9	117.5	0.0	0.0	8	0	0
1212 Federal E‹		4,304.7										

The Employment & Training Services (E&TS) component is requesting federal economic stimulus authorization in the amount of $4,304.7. Successful implementation of the Recovery Act includes not only quick and effective provision of services and training for workers in need, but also leveraging changes in the systems' basic operations to develop a strong, invigorated, innovative public workforce system capable of helping enable future economic growth and advancing shared prosperity for all Americans.

The Wagner-Peyser Act dictates that employment service staff administer the work test for the state Unemployment Insurance (UI) system and provide job finding and placement services for UI claimants. At this time, the department is providing UI claimants identified for reemployment services with an online orientation which they must complete to receive their UI benefits. To meet the increasing demand and to improve results, staff will provide in-person reemployment services including case management to Reemployment Services participants. This represents a new body of work that is not currently assigned to existing staff.

These funds will be used to hire an additional 8 full time, front-line service delivery staff to assist with the increased volume of labor exchange customers and unemployment insurance claimants. Six Employment Security Specialist II positions (qualified in case management) will provide job search assistance, labor market information, case management, and other reemployment services in the job centers. Two Community Development Specialist positions will provide career support and training services to unemployment insurance claimants who need training to upgrade skills in order to obtain employment. Funds will also be used to support salary and benefit costs of existing staff engaged in these front-line services to an increased volume of labor exchange customers. The outcome will be to increase the number of customers receiving staff assisted services by approximately 2,250.

The Employment Security Specialist II positions will be located in Anchorage (3), Fairbanks, Ketchikan and Wasilla. The Community Development Specialists will be located in Anchorage and Fairbanks.

Travel costs will be for trainers to provide hands-on training of workforce system enhancements and service delivery strategies so front-line service delivery staff will be able to provide better services to a greater number of job center customers.

Contractual service costs will include position support costs, enhancement of the Alaska Labor Exchange System (ALEXsys) including integrating it into the MyAlaska web portal, improving reemployment services client identification and tracking functionality, incorporating Workplace Alaska functionality, and modification of federal as well as ad hoc reporting capabilities. All enhancements will be designed to increase capacity and provide a greater array of services.

Commodity and equipment funds will be used to replace approximately one third of the statewide Alaska Job Center Network servers, computers, monitors, printers, and other public resource room equipment to avoid delays due to compatibility or antiquated equipment issues.

1212 Federal E		1,115.7										

The Unemployment Insurance (UI) component is requesting federal economic stimulus authorization in the amount of $1,115.7 for improvement of UI benefit and tax operations and to respond to an increased demand for UI benefits.

Funds will be used to upgrade computers on the department's annual replacement schedule, UI tax and benefit program enhancements, software and associated data processing costs, and office equipment. The funds will support a UI claim center phone call routing software package along with licensing and installation charges. They will also purchase a Tax auditing software package; web based Quality Control audit software; software to record and retrieve claim center calls for staff performance review; software for managing UI workflow and documentation processes; and computer enhancements to existing Employment Security Division on-line systems integration.

All of these items will enhance the overall UI program, ensure faster and more efficient customer service, and reduce future costs in operations.

Title: Economic Stimulus - Add Federal Authority for Workforce Investment Act Employment Training Services

	Trans Type	Totals	Personal Services	Travel	Services	Commodities	Capital Outlay	Grants, Benefits	Miscellaneous	Positions PFT	PPT	NP
	IncOTI	9,161.9	766.0	29.4	373.7	17.5	0.0	7,975.3	0.0	0	0	0
1212 Federal E		9,161.9										

This increment will add $9,161.9 of federal economic stimulus authorization to the Business Services component. The increment will be utilized to increase workforce development training opportunities in the Workforce Investment Act programs for Adult $1,679.5, Dislocated Worker $3,546.4, and Youth $3,936.0. These amounts are estimates as the division has not received a Notice of Obligation from the US Department of Labor for the additional Workforce Investment Act formula funding that will be provided to the state. The division is awaiting the specific guidelines and performance standards from the US Department of Labor regarding the use of the stimulus funds to determine if the allowable use varies from the annual formula Workforce Investment Act funding received by the division.

The funds will be used for personal services to support existing staff for Stimulus related activities, travel to monitor grantees, commodities and contractual services for normal office and staff related costs, and contractual and grant funds to provide training. The division is estimating these amounts using information available from allowable activities under our current formula allocation of Workforce Investment Act funding.

Using prior year cost per participant data we anticipate increasing our ability to provide training opportunities to an additional 729 Adult, 733 Dislocated Worker and 1,681 Youth participants. This funding will be subject to the same 17 negotiated performance measures as identified in the WIA Statewide Plan.

The Client Services component is requesting federal economic stimulus authorization in the amount of $1,800.0 for the Vocational Rehabilitation Services program under Title I of the Rehabilitation Act of 1973. The federal purpose of these funds is to provide vocational rehabilitation services to disabled individuals to either obtain or maintain employment. The division has not received specific guidelines and performance standards from the US Department of Education and the division is basing use of the economic stimulus funds on activities allowable under our current federal regulations. The division will use these funds to provide vocational rehabilitation services to disabled individuals and improve the infrastructure of the program to better serve disabled individuals.

The funds will also be used to provide grants for vocational rehabilitation services to severely disabled individuals. These services include assessment for determining eligibility for services, job development, orientation and mobility services, and supported employment services.

These funds will be used for Vocational Rehabilitation Counseling staff to meet the minimum federal standard which is a Certified Rehabilitation Counselor. This standard is required to approve participant's eligibility for the program and approval of individual rehabilitation plans. Counseling staff will be trained to better serve individuals with traumatic brain injury as well as those with significant personality disorders. The training will ensure counseling staff understand the implications for assessment and career planning for individuals with these disabling conditions.

The division will develop two video presentations. The first video will educate parents, special education teachers and students receiving special education on the services and benefits available to them from the division. The second video is to orientate all prospective customers to the rehabilitation process and the services they may receive to achieve an employment goal.

A grant will be issued to enhance the statewide program of vocational supports to blind individuals. The supports include assessment of assistive technology needs at a current or prospective work site, job coaching to succeed at work, and on-going supports.

The division will work with the Division of Behavioral Health in developing two programs: 1) a program to provide national certification for individuals with a significant behavioral health diagnosis to work and provide supports to their peers through local community mental health agencies; and 2) to establish a supported employment program with one local community mental health center. The mental health center, through the grant, will employ professionals in the field of vocational service and develop a model program that achieves successful employment outcomes for individuals with significant behavioral health diagnoses.

Funds will be used for contracts to upgrade the division's management information system to add reports which are being manually produced and are not available on-demand, update program regulations, and improve the accessibility of the division's website. Funds will also be utilized to improve the infrastructure of the program. Staff computers, which are four to five years old, will be replaced. The computers are used to provide services to disabled individuals who are interested in employment. The warranty on these computers has expired and many are encountering hardware failures.

Change Record Detail with Description

Department of Labor and Workforce Development

Scenario: Economic Stimulus FY2009 and FY2010 (7400)
Component: Client Services (1828)
RDU: Vocational Rehabilitation (65)
Title: Economic Stimulus - Add Federal Authority to Provide Vocational Rehabilitation Services

Trans Type	Totals	Personal Services	Travel	Services	Commodities	Capital Outlay	Grants, Benefits	Miscellaneous	Positions PFT	PPT	NP

Travel authority is requested for staff to travel to serve clients in rural areas of the state.

The anticipated outcome is to improve our service delivery system including those delivered by Community Rehabilitation Providers. It is anticipated we will serve an additional 280 individuals who are typically underserved such as those with brain injuries, blindness or behavioral health disabilities.

Change Record Detail with Description

Department of Labor and Workforce Development

Scenario: Economic Stimulus FY2009 and FY2010 (7400)
Component: Independent Living Rehabilitation (203)
RDU: Vocational Rehabilitation (65)
Title: Economic Stimulus - Add Federal Authority to Provide Independent Living/Blind Services

	Trans Type	Totals	Personal Services	Travel	Services	Commodities	Capital Outlay	Grants, Benefits	Miscellaneous	Positions PFT	PPT	NP
	IncOTI	246.2	0.0	0.0	0.0	0.0	0.0	246.2	0.0	0	0	0
1212 Federal E	246.2											

The Independent Living (IL) Rehabilitation component is requesting federal economic stimulus authorization in the amount of $246.2 for the Independent Living and Older Blind program under Title VII of the Rehabilitation Act of 1973. The federal purpose of these funds is to provide independent living services to disabled individuals to allow them to live independently and remain in their communities. The division has not received specific guidelines and performance standards from the US Department of Education and is basing use of the economic stimulus funds on activities allowable under current federal regulations. The division will use these funds to provide independent living services.

These funds will be granted to the four Centers for Independent Living (CILs) to support activities that lead to competitive employment, independent living and business ownership by Alaskans with disabilities. Activities include providing home accessibility modifications, adaptive equipment and/or services that allow people to remain in their homes and communities. Funds will also be used to expand independent living services statewide to under-served populations of Alaskans with disabilities including those in rural and remote areas of the state by encouraging partnerships, collaborative efforts, training and outreach. Outcomes include improved health and independence of elders and people with disabilities, including those who are under-served or reside in rural Alaska.

The funds will also support operations of the State Independent Living Council (SILC). This funding will examine the State Plan for Independent Living resource plan in response to population changes, rural demand for services, and changes in funding levels that have occurred over the past several years to determine if the resource plan needs to be updated. Outcomes will include sustained operations of the SILC, equitable distribution of IL funding, and to establish performance outcomes.

1212 Federal E	5,821.0											

These federal funds may be used to support a wide range of activities to prevent and control crime and improve the criminal justice system. The department will use these funds to cover the personal services costs of five new trooper and one administrative support positions, travel, training, supplies and for sub-grants to other state agencies and to units of local government to fund projects that support approved federal Justice Assistance Grant (JAG) purpose areas. The positions will provide investigative capability for major crimes such as sexual assault, crimes against children and white collar crimes.

Department of Revenue

Scenario: Economic Stimulus FY2009 and FY2010 (7400)
Component: Child Support Services Division (111)
RDU: Child Support Services (41)
Title: Temporary Resumption of Prior Child Support Law - H.R. 1-335

	Trans Type	Totals	Personal Services	Travel	Services	Commodities	Capital Outlay	Grants, Benefits	Miscellaneous	Positions PFT	PPT	NP
	FndChg	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0	0	0
1003 G/F Match	400.0											
1156 Rcpt Svcs	-1,012.5											
1212 Federal E	612.5											

The federal economic stimulus bill includes language that allows the state to use federal incentive receipts as state match for the child support enforcement program. For the state to benefit from the temporary change, the ratio of state and federal funding for the Child Support Services Division (CSSD) must be adjusted.

The child support enforcement program has a federal financial participation (FFP) rate of 66%, with a state match requirement of 34%. In addition, the state annually receives federal funding in the form of earned incentive receipts. The stimulus bill allows the state to use the federal incentive receipts as part of the state match funding, which reduces the amount of state funding needed as match and increases the amount of federal receipts that can be collected as part of the 66% FFP. The division is also requesting a fund source change from receipt supported services to general fund match to offset declining receipts from Temporary Assistance to Needy Families (TANF) cases.

This fund source change increases federal receipts by $612.5 and decreases receipt support services (RSS) by the same amount. An additional $400.0 of RSS is replaced with general fund match. This request does not increase the overall amount of the annual CSSD operating budget. No new programs are established and no new positions are added. Once the federal incentive language change expires on September 30, 2010, the state will need to re-adjust the ratio of state and federal funding for this program.

(SECTION 10 OF THIS ACT BEGINS ON PAGE 16)

*** Sec. 10.** LEGISLATIVE INTENT. (a) It is the intent of the legislature regarding P.L. 111-5 (American Recovery and Reinvestment Act of 2009) that

(1) federal stimulus money not be expended for any purpose that creates an obligation for the state to replace those funds after they have been exhausted and that stimulus funds be used primarily to supplement or improve existing programs rather than create new services or programs;

(2) all state agencies notify recipients of grants funded by federal stimulus money of the limited and temporary nature of the grant funds, and that the state will not be granting additional funds to continue the programs after the federal aid is exhausted;

(3) state agencies awarding grants funded in whole or in part by federal stimulus money disclose in writing to all grant recipients that the program funding source will expire;

(4) notwithstanding any other provision of this Act, federal stimulus money may be expended to recruit, train, equip, and compensate new peace officers;

(5) the executive branch not use any federal stimulus money to enter into lease obligations, equipment contracts, or professional services contracts that extend beyond the end date of federal stimulus funding without a financial plan in place to use existing funds to complete the obligation or contract;

(6) the executive branch refuse any federal stimulus money that would violate the strong constitutional right to privacy enjoyed by Alaskans;

(7) the Department of Transportation and Public Facilities diligently pursue any federal stimulus grant money that could be used for construction of new vessels for the Alaska marine highway system fleet;

(8) the Department of Labor and Workforce Development, to the extent practical, use federal stimulus money to extend or expand job training programs with existing, proven contractors rather than start new programs with new contractors;

(9) each school district receiving federal stimulus money through the Department of Education and Early Development be required to acknowledge, in a letter signed by the school superintendent and school board president or their designees, that the funding is a one-time addition and that the legislature does not intend to replace the federal stimulus money when it expires;

makes no representation that it will replace

Conceptual Amend. 3

(10) the executive branch, to the fullest extent possible, minimize its expenditure of federal stimulus money on administrative costs;

(11) the executive branch, to the fullest extent allowed by law, strive to ensure that projects and programs funded with federal stimulus money hire Alaska workers and use Alaska contractors and vendors and minimize the use of out-of-state consultants;

(12) federal stimulus money for energy or energy-related programs be used to help reduce energy costs of Alaskans whenever possible and practical;

(13) federal stimulus money for education programs be spent for best-practices improvements, training, equipment, services, and facility modernization, renovation, and repair that do not expand programs or create continuing obligations for state funding when federal stimulus money is exhausted;

(14) school districts focus on short-term investment with long-term gains for student and teacher performance and pay particular attention to the advisory statement issued by the United States Department of Education that "These funds should be invested in ways that do not result in unsustainable continuing commitments after the funding expires."

(b) It is the intent of the legislature that the two positions funded in sec. 11 of this Act coordinate compliance with the accounting and reporting requirements related to P.L. 111-5 (American Recovery and Reinvestment Act of 2009).

* **Sec. 11.** DEPARTMENT OF ADMINISTRATION. The sum of $200,000 is appropriated from the general fund to the Department of Administration, division of finance, to fund two positions and related office expenses relating to accounting and reporting requirements of P.L. 111-5 (American Recovery and Reinvestment Act of 2009) for the fiscal year ending June 30, 2010.

* **Sec. 12.** DEPARTMENT OF REVENUE. (a) The sum of $1,730,500 is appropriated to the Department of Revenue, child support services, for the fiscal year ending June 30, 2010, from the following sources:

SOURCE	AMOUNT
General fund match	$ 400,000
Federal economic stimulus	1,330,500

(b) The federal receipts and receipt supported services appropriated to the Department of Revenue, child support services, in the version of HB 81, Twenty-Sixth Alaska State

Legislature, that is enacted into law are amended to reduce the amount of the appropriation by $1,730,500 for the fiscal year ending June 30, 2010, from the following sources:

SOURCE	AMOUNT OF REDUCTION
Federal receipts	$ 612,400
Receipt supported services	1,118,100

(c) Section 3, ch. 27, SLA 2008, page 61, line 7, is amended to read:

FUNDING SOURCE		OPERATING	NEW LEGISLATION	TOTAL
1002	Federal Receipts	**33,355,800**	0	**33,355,800**
		[34,153,800]		[34,153,800]

(d) Section 3, ch. 27, SLA 2008, page 62, lines 16 - 19, is amended to read:

FUNDING SOURCE		OPERATING	NEW LEGISLATION	TOTAL
1156	Receipt Supported Services	**6,730,100**	0	**6,730,100**
		[7,315,600]		[7,315,600]

1192	Mine Reclamation Trust Fund	24,000	0	24,000
1212	**Federal Stimulus: ARRA 2009**	**1,383,500**	**0**	**1,383,500**

*** Sec. 13.** OFFICE OF THE GOVERNOR. The sum of $20,701,535 is appropriated from federal economic stimulus funds received by the state under P.L. 111-5 (American Recovery and Reinvestment Act of 2009) to the Department of Commerce, Community, and Economic Development for distribution on a per capita basis to entities that are eligible to receive community revenue sharing under AS 29.60.850 - 29.60.879 to be used by the entity for purposes consistent with sec. 14002(b), P.L. 111-5, for the fiscal year ending June 30, 2011.

*** Sec. 14.** CONTINGENCY. The appropriation reduction made in sec. 12(b) of this Act is contingent on passage by the Twenty-Sixth Alaska State Legislature in the First Regular Session and enactment into law of a version of HB 81 that appropriates not less than $612,400 in federal receipts and $1,118,100 in receipt supported services to the Department of Revenue, child support services.

*** Sec. 15.** LAPSE. (a) The appropriations made in secs. 4 and 7 of this Act are for capital projects and lapse under AS 37.25.020.

(b) The appropriations made in sec. 1 of this Act lapse June 30, 2010.

*** Sec. 16.** RETROACTIVITY. Sections 1 - 15 of this Act are retroactive to February 17, 2009.

*** Sec. 17.** This Act takes effect immediately under AS 01.10.070(c).

adopted 4-7-09

CONCEPTUAL AMENDMENT No. 1

OFFERED IN: The House Finance Committee

TO: House CS for CSHB 199(FIN) _ Version \S

OFFERED BY: Representative Hawker

New Section - Conditional Language

DEPARTMENT OF HEALTH AND SOCIAL SERVICES. An appropriation is made from federal economic stimulus funding for the Federal Matching Assistance Percentage (FMAP) for Medicaid programs in the amount to be received for FY09 and FY10 contingent upon state unemployment rates increasing. General fund appropriations for the same periods will be reduced in the amount offset by the additional federal stimulus funding received.

EXPLANATION:
The Medicaid FMAP rate will likely increase again once the Unemployment Rate figures come out for March on April 17th.

Alaska's FMAP rate will increase by another 2.44% if our unemployment rate is above 7.5% (seasonally adjusted) for three consecutive months. Since January's Unemployment rate is 7.8% and February is 8.0%, it is probably that March will be at or higher than 7.5%.

This could impact both FY09 and FY10 Medicaid budgets. The impact to FY09 could be relatively small depending on whether we can claim retroactive to Oct. 1st 2008 (the law is not clear on this point); It is clear that we can claim the state 4th quarter and all of FY10 at the higher rate of an additional 2.44% (FY09 likely $5 million? and FY10 approx. $20 million).

Revisions to CS for HB 199 Version \E: Non-Transportation Stimulus Funds Incorporated in the New CS for HB 199 Version \ S

1) **Language changes needed to ensure funding will be available in FY09 and FY10 for operating appropriations – added in Lapse Section 15 (b).**

2) **Over Authorization of Stimulus Funding for the University Research Vessel was removed from the language section.** The total amount of federal stimulus funding currently available for this project is $116.0 million and is authorized in the CS. The $80million fund source change from Federal to Federal Stimulus for the prior year appropriation Section 2. ch. 159, SLA 2004, page 54, line 8 (FY05 Capital Budget) has been removed. The $80million in Federal authorization remains.

3) **Fund Source Language: (page 18, line 20)**
Delete: Federal Economic Stimulus
Add: Federal Stimulus: ARRA 2009

4) **Updated** Education Temporary Emergency Food Assistance number in DEED: add $3.5 of federal stimulus funding, bringing the total allocation to $389.5. (In numbers, section 1)

5) Language section: directing $20.7 million to the Capital Income Fund was deleted and new language directing funding:

Section 13:
from OFFICE OF THE GOVERNOR to Community Revenue Sharing on a per capita basis to entities that are eligible to receive Community Revenue Sharing under AS 29.60.850 in FY09.

Amendment – Conceptual: (see attached)
FMAP Contingency Language – FY09 and FY10
Should FMAP rate increase due to unemployment figures – authorization to accept funds with corresponding federal and general fund reductions.

Sent: Thursday, March 26, 2009 1:48 PM
Subject: H.B. 199 please read into record for me

I am not able to attend public discusion so please READ my comments into public testemony about HB 199 stimulis money.

My name is
Tim Staton
4636 Fairchild
Fairbanks Alaska 99701
907-378-1828.

I would like to be there for this public testimony but I am not able to attend due to the fact that I work for a living. With that said I would obviously be interested in speaking to this issue at a time that is more accessible after normal working hours. my suggestion would be 6:30 or 7:00 pm.

I am not in favor of supporting this bill if it is going to saddle the state of Alaska or any of it's programs to continued financial support beyond the amounts being dedicated to them.

If these money's coming from the federal stimulus program have no strings attached, and do not inflate financially or cause an increase in the State of Alaska, the state's Departments, or the cities, communities, boroughs or other state and/or federal governmental agencies that benefit from this money and this money is not CREATING more government or governmental agencies or inflating, expanding, or hiring more government workers that the State is responsible for paying wages, bonuses, retirement, and health and welfare in the future then I will support accepting it. But if this package has even one proposed dollar value that is at all causing the a for mentioned state entities to be continued or created at the expense of the State or any money from the state, then that line Item shall be deleted from the the bill before acceptance of the package.

Tim Staton

(SECTION 10 OF THIS ACT BEGINS ON PAGE 16)

*** Sec. 10.** LEGISLATIVE INTENT. (a) It is the intent of the legislature regarding P.L. 111-5 (American Recovery and Reinvestment Act of 2009) that

(1) federal stimulus money not be expended for any purpose that creates an obligation for the state to replace those funds after they have been exhausted and that stimulus funds be used primarily to supplement or improve existing programs rather than create new services or programs;

(2) all state agencies notify recipients of grants funded by federal stimulus money of the limited and temporary nature of the grant funds, and that the state will not be granting additional funds to continue the programs after the federal aid is exhausted;

(3) state agencies awarding grants funded in whole or in part by federal stimulus money disclose in writing to all grant recipients that the program funding source will expire;

(4) notwithstanding any other provision of this Act, federal stimulus money may be expended to recruit, train, equip, and compensate new peace officers;

(5) the executive branch not use any federal stimulus money to enter into lease obligations, equipment contracts, or professional services contracts that extend beyond the end date of federal stimulus funding without a financial plan in place to use existing funds to complete the obligation or contract;

(6) the executive branch refuse any federal stimulus money that would violate the strong constitutional right to privacy enjoyed by Alaskans;

(7) the Department of Transportation and Public Facilities diligently pursue any federal stimulus grant money that could be used for construction of new vessels for the Alaska marine highway system fleet;

(8) the Department of Labor and Workforce Development, to the extent practical, use federal stimulus money to extend or expand job training programs with existing, proven contractors rather than start new programs with new contractors;

(9) each school district receiving federal stimulus money through the Department of Education and early Development be required to acknowledge, in a letter signed by the school's superintendent and school board president or their designees, that the funding is a one-time addition and that the legislature does not intend to replace the federal stimulus money when it expires;

(10) the executive branch, to the fullest extent possible, minimize its expenditure of federal stimulus money on administrative costs;

(11) the executive branch, to the fullest extent allowed by law, strive to ensure that projects and programs funded with federal stimulus money hire Alaska workers and use Alaska contractors and vendors and minimize the use of out-of-state consultants;

(12) federal stimulus money for energy or energy-related programs be used to help reduce energy costs of Alaskans whenever possible and practical;

(13) federal stimulus money for education programs be spent for best-practices improvements, training, equipment, services, and facility modernization, renovation, and repair that do not expand programs or create continuing obligations for state funding when federal stimulus money is exhausted;

(14) school districts focus on short-term investment with long-term gains for student and teacher performance and pay particular attention to the advisory statement issued by the United States Department of Education that "These funds should be invested in ways that do not result in unsustainable continuing commitments after the funding expires."

(b) It is the intent of the legislature that the two positions funded in sec. 12 of this Act coordinate compliance with the accounting and reporting requirements related to P.L. 111-5 (American Recovery and Reinvestment Act of 2009).

* **Sec. 11.** FUND SOURCE CHANGES FOR FEDERAL ECONOMIC STIMULUS PROJECTS FOR THE UNIVERSITY OF ALASKA. Section 2, ch. 159, SLA 2004, page 54, line 8, is amended to read:

Federal Receipts	**36,000,000**
	[116,000,000]
Federal Economic Stimulus	**80,000,000**

* **Sec. 12.** DEPARTMENT OF ADMINISTRATION. The sum of $200,000 is appropriated from the general fund to the Department of Administration, division of finance, to fund two positions and related office expenses relating to accounting and reporting requirements of P.L. 111-5 (American Recovery and Reinvestment Act of 2009) for the fiscal year ending June 30, 2010.

* **Sec. 13.** DEPARTMENT OF REVENUE. (a) The sum of $1,730,500 is appropriated to the Department of Revenue, child support services, for the fiscal year ending June 30, 2010,

from the following sources:

SOURCE	AMOUNT
General Fund Match	$ 400,000
Federal Economic Stimulus	1,330,500

(b) The federal receipts and receipt supported services appropriated to the Department of Revenue, child support services, in the version of HB 81, Twenty-Sixth Alaska State Legislature, that is enacted into law are amended to reduce the amount of the appropriation by $1,730,500 for the fiscal year ending June 30, 2010, from the following sources:

SOURCE	AMOUNT OF REDUCTION
Federal Receipts	$ 612,400
Receipt Supported Services	1,118,100

(c) Section 3, ch. 27, SLA 2008, page 61, line 7, is amended to read:

FUNDING SOURCE		OPERATING	NEW LEGISLATION	TOTAL
1002	Federal Receipts	**33,355,800**	0	**33,355,800**
		[34,153,800]		[34,153,800]

(d) Section 3, ch. 27, SLA 2008, page 62, lines 16 - 19, is amended to read:

FUNDING SOURCE		OPERATING	NEW LEGISLATION	TOTAL
1156	Receipt Supported Services	**6,730,100**	0	**6,730,100**
		[7,315,600]		[7,315,600]
1169	Power Cost Equalization Endowment Fund	211,000	0	211,000
1192	Mine Reclamation Trust Fund	24,000	0	24,000
1212	**Federal Economic Stimulus**	**1,383,500**	**0**	**1,383,500**

*** Sec. 14.** ALASKA CAPITAL INCOME FUND. The sum of $20,701,535 is appropriated from federal economic stimulus funds received by the state under P.L. 111-5 (American Recovery and Reinvestment Act of 2009) to the Alaska capital income fund (AS 37.05.565).

*** Sec. 15.** CONTINGENCY. The appropriation reduction made in sec. 13(b) of this Act is contingent on passage by the Twenty-Sixth Alaska State Legislature in the First Regular

Session and enactment into law of a version of HB 81 that appropriates not less than $612,400 in federal receipts and $1,118,100 in receipt supported services to the Department of Revenue, child support services.

*** Sec. 16.** LAPSE. The appropriation made in sec. 14 of this Act is for the capitalization of a fund and does not lapse.

*** Sec. 17.** RETROACTIVITY. Sections 1 - 14 of this Act are retroactive to February 17, 2009.

*** Sec. 18.** This Act takes effect immediately under AS 01.10.070(c).

ASSOCIATION OF ALASKA SCHOOL BOARDS

ADVOCATES FOR ALASKA'S YOUTH

Position Statement on Education Funding in The American Recovery & Reinvestment Act

Alaska's locally elected school officials understand the need for an open and transparent discussion about investing these funds wisely in programs that will benefit our kids without growing the bureaucracy. Alaska and other states have faced mandated programs from the federal government for several decades. The American Recovery & Reinvestment Act offers a promise of funding to help meet these mandates, from IDEA and Title I to English language proficiency, 21st Century skills, as well as improving graduation rates. School districts in Alaska also need to ensure that we can continue to address infrastructure and equipment needs, such as broadband communication capabilities.

It is for these reasons that we support state certification under section 1607 of the new federal law and that we accept all requirements for accountability and transparency.

The Office of Management and Budget has suggested potential opportunities to use these funds without long-term costs. The suggestions include:

- Intensive teacher training
- Expand student and teacher use of technology in schools
- Obtain state-of-the-art assistive devices that reduce barriers to employment, learning or living independently
- Equipment, technology and software upgrades to sustain or enhance services in education
- Rapid deployment of workforce development strategies on work skills and work preparedness for targeted populations
- Modifications to facilities for safety, efficiency, improved durability and longevity.

Our member districts believe we are in the business of human development, and these suggestions describe many of the needs that exist in local schools. AASB would also encourage the state to take advantage of other funding opportunities in the American Recovery & Reinvestment Act.

ASSOCIATION OF ALASKA SCHOOL BOARDS

ADVOCATES FOR ALASKA'S YOUTH

The Honorable Sarah Palin
Office of Governor
P.O. Box 110001
Juneau, Alaska 99811-0001

March 20, 2009

Dear Governor Palin,

The announcement by your administration of your intent to decline an estimated $170 million in federal funding for public education programs in Alaska startled many members of the education community. I am writing this letter to explain why our 53 member school districts believe it makes sense for the State of Alaska to accept this funding on behalf of our public school children.

As you may know, Alaska and other states have been under a federal mandate since 1975 to provide educational services to disabled students. This laudable initiative for approximately 18,000 Alaska children has been hampered, however, by the failure of the federal government to provide adequate funding for this mandate. The State of Alaska has requested assistance to overcome this unfunded mandate of the Individual with Disabilities Education Act (IDEA), but until the stimulus package was proposed in Congress, only incremental progress was made in eliminating this funding gap. The $33 million proposed for IDEA programs in Alaska public schools would go a long way towards providing relief from what amounts to a federal tax on our schools.

Another $29.5 million in stimulus funding is proposed for Title I schools in Alaska. By declining to accept this funding, the State of Alaska would be forfeiting an opportunity to help approximately 285 schools across the state that serve predominately children from economically disadvantaged families. At a time when schools in every district in Alaska face ever higher standards to meet the requirements of the No Child Left Behind Act, the extra Title I funds offered by the federal government would be most welcome.

The fiscal stabilization funds offered to Alaska total $113.7 million, of which $93 million would be dedicated to early childhood, K-12 and post-secondary education. As fashioned by Congress and the U.S. Department of Education, these monies can go towards most anything in our schools, including modernization, renovation or repair of classrooms and student housing. It cannot be spent on school district central office administration.

The "strings" attached to the fiscal stabilization money require the state to document plans to improve teacher effectiveness, establish better student tracking data through their educational career, enhance academic standards and support academically struggling schools. As yet, we have not heard from the Alaska Department of Education & Early Development whether statutory changes would be necessary to implement these requirements. Our member districts may also face additional burdens due to the

1111 West 9th Street, Juneau, AK 99801

(907) 586-1083 (907) 586-2995 aasb@aasb.org http://www.aasb.org

requirements of this funding program. But, I understand, the stimulus bill has grant money available, if needed, to help meet the requirements.

In conclusion, our association asks that your administration and the Legislature consider the impact of turning away $170 million for our schools. The funds would provide relief from a federal tax on local schools, improve programs for some of our most needy students and allow our education community to tap the innovative spirit of Alaska's teachers and students.

Sincerely,

Carl Rose
Executive Director

Sammy Crawford

March 31, 2009

The Honorable Representative Mike Hawker, Co-chair
The Honorable Representative Bill Stoltze, Co-chair
House Finance Committee
Alaska State Legislature
Juneau, Alaska 99801

Dear Co-chairs:

Saturday, March 28, 2009, in a House Finance Committee meeting regarding economic stimulus funding, the Department of Health and Social Services staff was asked whether or not the Governor supported the funding for the Health Information Technology component of the American Recovery and Reinvestment Act (ARRA) funding. The response was affirmative.

Rather than leave the committee with the wrong impression of the Governor's position regarding the acceptance of these funds, I wish to clarify the administration's position. The Governor supports in concept the creation of a Health Information Exchange system and the use of electronic health records by healthcare providers. However, at the present time, there is little information available regarding the ramifications of accepting ARRA funding for that purpose. Once the federal government has made additional guidance available regarding what it means to accept these funds, the Governor will be better positioned to determine if acceptance of these funds is in the best interests of the State of Alaska. Until such information has been received, the Governor continues to express reservations regarding the use of ARRA funds for this purpose.

Sincerely,

William H. Hogan
Commissioner

(SECTION 10 OF THIS ACT BEGINS ON PAGE 16)

*** Sec. 10.** LEGISLATIVE INTENT. (a) It is the intent of the legislature regarding P.L. 111-5 (American Recovery and Reinvestment Act of 2009) that

(1) federal stimulus money not be expended for any purpose that creates an obligation for the state to replace those funds after they have been exhausted and that stimulus funds be used primarily to supplement or improve existing programs rather than create new services or programs;

(2) all state agencies notify recipients of grants funded by federal stimulus money of the limited and temporary nature of the grant funds, and that the state will not be granting additional funds to continue the programs after the federal aid is exhausted;

(3) state agencies awarding grants funded in whole or in part by federal stimulus money disclose in writing to all grant recipients that the program funding source will expire;

(4) notwithstanding any other provision of this Act, federal stimulus money may be expended to recruit, train, equip, and compensate new peace officers;

(5) the executive branch not use any federal stimulus money to enter into lease obligations, equipment contracts, or professional services contracts that extend beyond the end date of federal stimulus funding without a financial plan in place to use existing funds to complete the obligation or contract;

(6) the executive branch refuse any federal stimulus money that would violate the strong constitutional right to privacy enjoyed by Alaskans;

(7) the Department of Transportation and Public Facilities diligently pursue any federal stimulus grant money that could be used for construction of new vessels for the Alaska marine highway system fleet;

(8) the Department of Labor and Workforce Development, to the extent practical, use federal stimulus money to extend or expand job training programs with existing, proven contractors rather than start new programs with new contractors;

(9) each school district receiving federal stimulus money through the Department of Education and early Development be required to acknowledge, in a letter signed by the school's superintendent and school board president or their designees, that the funding is a one-time addition and that the legislature does not intend to replace the federal stimulus money when it expires;

(10) the executive branch, to the fullest extent possible, minimize its expenditure of federal stimulus money on administrative costs;

(11) the executive branch, to the fullest extent allowed by law, strive to ensure that projects and programs funded with federal stimulus money hire Alaska workers and use Alaska contractors and vendors and minimize the use of out-of-state consultants;

(12) federal stimulus money for energy or energy-related programs be used to help reduce energy costs of Alaskans whenever possible and practical;

(13) federal stimulus money for education programs be spent for best-practices improvements, training, equipment, services, and facility modernization, renovation, and repair that do not expand programs or create continuing obligations for state funding when federal stimulus money is exhausted;

(14) school districts focus on short-term investment with long-term gains for student and teacher performance and pay particular attention to the advisory statement issued by the United States Department of Education that "These funds should be invested in ways that do not result in unsustainable continuing commitments after the funding expires."

(b) It is the intent of the legislature that the two positions funded in sec. 12 of this Act coordinate compliance with the accounting and reporting requirements related to P.L. 111-5 (American Recovery and Reinvestment Act of 2009).

* **Sec. 11.** FUND SOURCE CHANGES FOR FEDERAL ECONOMIC STIMULUS PROJECTS FOR THE UNIVERSITY OF ALASKA. Section 2, ch. 159, SLA 2004, page 54, line 8, is amended to read:

Federal Receipts	**36,000,000**
	[116,000,000]
Federal Economic Stimulus	**80,000,000**

* **Sec. 12.** DEPARTMENT OF ADMINISTRATION. The sum of $200,000 is appropriated from the general fund to the Department of Administration, division of finance, to fund two positions and related office expenses relating to accounting and reporting requirements of P.L. 111-5 (American Recovery and Reinvestment Act of 2009) for the fiscal year ending June 30, 2010.

* **Sec. 13.** DEPARTMENT OF REVENUE. (a) The sum of $1,730,500 is appropriated to the Department of Revenue, child support services, for the fiscal year ending June 30, 2010,

from the following sources:

SOURCE	AMOUNT
General Fund Match	$ 400,000
Federal Economic Stimulus	1,330,500

(b) The federal receipts and receipt supported services appropriated to the Department of Revenue, child support services, in the version of HB 81, Twenty-Sixth Alaska State Legislature, that is enacted into law are amended to reduce the amount of the appropriation by $1,730,500 for the fiscal year ending June 30, 2010, from the following sources:

SOURCE	AMOUNT OF REDUCTION
Federal Receipts	$ 612,400
Receipt Supported Services	1,118,100

(c) Section 3, ch. 27, SLA 2008, page 61, line 7, is amended to read:

FUNDING SOURCE		OPERATING	NEW LEGISLATION	TOTAL
1002	Federal Receipts	**33,355,800**	0	**33,355,800**
		[34,153,800]		[34,153,800]

(d) Section 3, ch. 27, SLA 2008, page 62, lines 16 - 19, is amended to read:

FUNDING SOURCE		OPERATING	NEW LEGISLATION	TOTAL
1156	Receipt Supported Services	**6,730,100**	0	**6,730,100**
		[7,315,600]		[7,315,600]
1169	Power Cost Equalization Endowment Fund	211,000	0	211,000
1192	Mine Reclamation Trust Fund	24,000	0	24,000
1212	**Federal Economic Stimulus**	**1,383,500**	**0**	**1,383,500**

*** Sec. 14.** ALASKA CAPITAL INCOME FUND. The sum of $20,701,535 is appropriated from federal economic stimulus funds received by the state under P.L. 111-5 (American Recovery and Reinvestment Act of 2009) to the Alaska capital income fund (AS 37.05.565).

*** Sec. 15.** CONTINGENCY. The appropriation reduction made in sec. 13(b) of this Act is contingent on passage by the Twenty-Sixth Alaska State Legislature in the First Regular

Session and enactment into law of a version of HB 81 that appropriates not less than $612,400 in federal receipts and $1,118,100 in receipt supported services to the Department of Revenue, child support services.

*** Sec. 16.** LAPSE. The appropriation made in sec. 14 of this Act is for the capitalization of a fund and does not lapse.

*** Sec. 17.** RETROACTIVITY. Sections 1 - 14 of this Act are retroactive to February 17, 2009.

*** Sec. 18.** This Act takes effect immediately under AS 01.10.070(c).

Items Not Included in the March 19 Economic Stimulus Bill

	ARRA Page Ref.	FY	Department	RDU/ Component	PFT	PPT	NP	Description	General Funds	Federal Funds	Other Funds	Fund Source	Total Funds
Operating Items													
1	p. 314-316	FY2009 - FY2010 Operating	Administration	Finance				This provides for a federally funded subsidy for COBRA health insurance coverage to assistance eligible individuals (AEIs). AEI is defined as an individual who is involuntarily terminated from employment between September 1, 2008 and December 31, 2009, who elects to receive COBRA coverage and pays 35% of the premium due as of March 1, 2009. The employer pays the remaining 65% of the premium and is reimbursed by the federal government by withholding premiums paid from payroll taxes reported on the quarterly 941 employer tax form.		1,489.0			1,489.0
2	p. 16	FY2009 - FY2010 Operating	Administration	Violent Crimes Compensation Board				Funding will be used to pay claims for assistance received from Alaskans and visitors to Alaska that suffer financial losses that are the direct result of violent crimes. Categories of expenses covered include mental health counseling, medical expenses, lost wages, funeral expenses, and other expenses as authorized by statute.		149.4			149.4
3	p. 70	FY2009 - FY2010 Operating	Commerce	Alaska State Community Services Commission				Funding will provide grants to existing AmeriCorps grantees for performing volunteer programs.		1,500.0			1,500.0
4	p. 67	FY2009 - FY2010 Operating	Education	Student and School Achievement				ESEA Title I-A Grants to LEAs and School Improvement Grants will help school districts mitigate the effect of the reduction in local revenues and State support for education by distributing funding to schools and school districts with a high percentage of students from low-income families, and by providng funding for academic assessment, LEA and school improvement.		40,000.0			40,000.0
5	p. 68	FY2009 - FY2010 Operating	Education	Student and School Achievement				ESEA Title II-D Education Technology Grants will improve student achievement through the use of technology in elementary and secondary schools.		3,210.0			3,210.0
6	p. 68	FY2009 - FY2010 Operating	Education	Student and School Achievement				McKinney Vento Homeless assistance Grants to ensure that homeless children, including preschoolers and youth, have equal access to free and appropriate education.		328.0			328.0
7	p.68	FY2009 - FY2010 Operating	Education	Student and School Achievement				IDEA Part B (611 and 619) Grants to States, Preschool Grants to provide services to students with disabilities ages three through twenty-one who are enrolled in special eduation programs. The state will receive the allocation as a grant and pass-through to LEAs based on the number of children with disabilities who are receiving special education and related services. Funding will also be provided for services to children with disabilities ages three through five (and optionally to two-year olds who turn three during the school year). The state will receive the allocation as a grant and pass-through to LEAs based on population, including consideration for the number of children living in poverty.		34,300.0			34,300.0
8	p. 168	FY2009 - FY2010 Operating	Education	Student and School Achievement				State Stabilization Funds (base) will be distributed by the department to LEAs based on their relative share of funding under Title I-A grants for 2009. LEAs may use the funds for activities authorized by ESEA, IDEA, Adult Family Literacy Act, Carl D. Perkins Career and Technology Act, or for the repair, modernization or renovation of public school facilities that is consistent with State law.		93,043.2			93,043.2
9	p. 5	FY2009 - FY2010 Operating	Education	Child Nutrition				Temporary Emergency Food Assistance Program will provide funding for the emergency food assistance program, allocated as a grant to the State distributing agency who then distributes to public or private nonoprofit organizations that provide food and nutrition assistance to the needy.		100.0			100.0
10	p. 5	FY2009 - FY2010 Operating	Education	Child Nutrition				National School Lunch Program Grants provides funding to the state for National School Lunch Program equipment assistance in proportion to the State's administrative expense allocation. In turn, the state will provide competitive grants to school food authorities based on the need for equipment assistance in participating schools. Priority given to schools in which at least 50% of the students are eligible for free or reduced priced meals.		286.0			286.0
11	p. 57	FY2009 - FY2010 Operating	Education	Alaska State Council on the Arts				National Endowment for the Arts Funding to provide an additional distribution to State Art Agencies. The Arts Council submitted an application for the additional funds by the March 13, 2009 deadline.		300.0			300.0
12	p. 369	FY2009 - FY2010 Operating	Health & Social Srvcs	Health Care Services/Medical Assistance Administration	4			This request will allocate funds for Medicaid provider Health Information Technology (HIT) adoption and Electronic Health Records (EHR) payments. Administrative funding is to be used to coordinate with other state or local HIT projects, national standards setting, and coordinate with other agencies to assure interoperability of systems and avoid duplicate provider payments.	40.0	2,000.0			2,040.0

3/27

Items Not Included in the March 19 Economic Stimulus Bill

	ARRA Page Ref.	FY	Department	RDU/ Component	PFT	PPT	NP	Description	General Funds	Federal Funds	Other Funds	Fund Source	Total Funds
13	p. 61	FY2009 - FY2010 Operating	Health & Social Srvcs	Public Assistance/Child Care Benefits				Child Care Development Block Grants - increased funding to improve the quality of child care and provide for the expansion of child care services. These funds cannot be used to supplant state funding. Of this allotment, $333.7 is targeted for quality expansion and $193.2 is for improving the quality of infant and toddler care.		4,036.0			4,036.0
14	p. 5	FY2009 - FY2010 Operating	Health & Social Srvcs	Public Assistance/Public Assistance Administration			4	Supplemental Nutrition Assistance Program (SNAP) - formerly Food Stamps - funding for increased administrative costs beginning April 1, 2009. This expands the benefit but is not an expansion of the program. Includes funding for 4 non-perm staff to assist with increased caseload, outreach and administrative process revisions for greater efficiency.		462.0			462.0
15	p. 5	FY2009 - FY2010 Operating	Health & Social Srvcs	Public Assistance/Women, Infants and Children				Additional funds to support Women, Infants and Children (WIC) operations and establish, improve or administer WIC management information system. Funds are to be used for extension and expansion of programs.		777.7			777.7
16	p. 63	FY2009 - FY2010 Operating	Health & Social Srvcs	Public Health/Chronic Disease Prevention and Health Promotion				Increased funding for immunization, prevention and wellness and infection reduction grants. The department assumes that current Health and Human Serviecs (HHS) requirements apply.		2,000.0			2,000.0
17	P. 65	FY2009 - FY2010 Operating	Health & Social Srvcs	Children's Services/Infant Learning Program Grants				Expand Infant Learning Program grants established as part of the Individuals with Disabilities Education Act, Part C.. Department will focus on one-time infrastructure improvements; any service expansions are intended to be backfilled with enhanced Medicaid claiming through program changes.		2,139.8			2,139.8
18	p. 62	FY2009 - FY2010 Operating	Health & Social Srvcs	Senior and Disabilities Services/ Senior Community Based Grants				Administration on Aging, Home Delivered Meals and Congregate Meals Continue and enhance food security for current eligible groups. These funds are limited to senior meal programs only.		485.0			485.0
19	p. 59-60	FY2009 - FY2010 Operating	Labor	Employment Training Services	8			These funds will be used to hire an additional 8 full time, front-line service delivery staff to assist with the increased volume of labor exchange customers and unemployment insurance claimants. Six Employment Security Specialist II positions (qualified in case management) will provide job search assistance, labor market information, case management, and other reemployment services in the job centers. Two Community Development Specialist positions will provide career support and training services to unemployment insurance claimants who need training to upgrade skills in order to obtain employment. Funding will also be used to support salary and benefit costs of existing staff, travel for trainers, enhancements to the Alaska Labor Exchange System (ALEXsys) and equipment replacement and upgrade to support the federal Stimulus effort. These efforts include continuing to provide front-line employment and reemployment services, and career support and training services, to an increased volume of labor exchange customers. The outcome will be to increase the		4,304.7			4,304.7
20	p. 59	FY2009 - FY2010 Operating	Labor	Employment Training Services				Funding will support additional training and employment opportunities for unemployed low-income seniors. Grantees will expand the number of Senior Community Service Employment Program (SCSEP) participants assigned to community service work, especially in those growth industries emphasized in the Recovery Act (e.g., health care, child care, education, green jobs, energy efficiency and environmental services) and in expanded public service activities that utilize Recovery Act funds. The funds will be used to provide high quality job training, on-the-job training and employment assistance to an estimated 80 low income older workers and will assist employers that are faced with the challenges of today's workplace.		507.3			507.3
21	p. 329	FY2009 - FY2010 Operating	Labor	Unemployment Insurance				Funds will be used to upgrade computers on the department's annual replacement schedule, UI tax and benefit program enhancements, software and associated data processing costs, and office equipment. The funds will support a UI claim center phone call routing software package along with licensing and installation charges. They will also purchase a Tax auditing software package; web based Quality Control audit software; software to record and retrieve claim center calls for staff performance review; software for managing UI workflow and documentation processes; and computer enhancements to existing Employment Security Division on-line systems integration.		1,115.7			1,115.7

Items Not Included in the March 19 Economic Stimulus Bill

	ARRA Page Ref.	FY	Department	RDU/ Component	PFT	PPT	NP	Description	General Funds	Federal Funds	Other Funds	Fund Source	Total Funds
22	p. 58-59	FY2009 - FY2010 Operating	Labor	Business Services				Additional funding will be utilized to increase workforce development training opportunities in the Workforce Investment Act programs for Adult $1,679.5, Dislocated Worker $3,546.4, and Youth $3,936.1. It will be used for personal services to support existing staff engaged in Stimulus related activities, travel to monitor grantees, commodities and contractual services for normal office and staff related costs, and contractual services and grant funds to provide training. It is estimated to provide training opportunities to an additional 729 Adult, 733 Dislocated Worker and 1,681 Youth participants.		9,161.9			9,161.9
23	p. 69	FY2009 - FY2010 Operating	Labor	Client Services				Funding will provide vocational rehabilitation services and grants to disabled individuals. These services include assessment for determining eligibility for services, job development, orientation and mobility services, and supported employment services.		1,800.0			1,800.0
24	p. 266	FY2009 - FY2010 Operating	Labor	Employment and Training Services				The ARRA reauthorized and permanently expanded the Trade Adjustment Assistance program. Eligibility was expanded to include workers in the services sector. The funds will be utilized to support salary and benefit costs of existing staff to provide employment and case management services to increased participants to include comprehensive and specialized assessment of skill levels and service needs; development of an individual employment plan; information on how to apply for financial aid; information on training available in local and regional areas; short-term prevocational services; individual career counseling; employment statistics information; and information relating to local occupations that are in demand and the earnings potential of such occupations. In addition, the Trade Adjustment Assistance database will need to be upgraded as mandated by new federal regulations. The estimated outcome is 115 participants will utilize Trade Adjustment Assistance program benefits such as job search activities, relocation benefits, training, health care		350.0			350.0
25	p. 69	FY2009 - FY2010 Operating	Labor	Independent Living Rehabilitation				These funds will be granted to the four Centers for Independent Living (CILs) to support activities that lead to competitive employment, independent living and business ownership by Alaskans with disabilities. Activities include providing home accessibility modifications, adaptive equipment and/or services that allow people to remain in their homes and communities. Funds will also be used to expand independent living services statewide, including rural and remote areas of the state, by encouraging partnerships, collaborative efforts, training and outreach. The funds will also support operations of the State Independent Living Council (SILC), examining the State Plan for Independent Living resource plan to determine if it needs to be updated.		246.2			246.2
26	p. 16	FY2009 - FY2010 Operating	Public Safety	Alaska State Troopers/Special Projects				Funds are to be used to enhance law enforcement's response to online child victimization and child pornography cases. The department will use the funds to cover personal services costs of investigators and associated supplies and equipment. The Anchorage Police Department is the only eligible applicant in Alaska and is expected to subgrant these funds to the department.		50.0			50.0
27	p. 16	FY2009 - FY2010 Operating	Public Safety	Alaska State Troopers/ Narcotics Task Force	6			Justice Assistance Grant (JAG) will be used to cover the personal services costs of new trooper positions, travel, training, supplies and sub-grants to other state agencies and to units of local government to fund projects supporting approved JAG purpose areas.		5,821.0			5,821.0
28	p. 16	FY2009 - FY2010 Operating	Public Safety	Council on Domestic Violence and Sexual Assault/Council on Domestic Violence and Sexual Assault				Victim compensation and assistance. These federal funds may be used to provide services to victims of criminal violence. The funds will be sub-granted to approved victim services programs to provide immediate safety and support to victims of domestic violence and sexual assault in Alaska.		545.0			545.0
29	p. 15	FY2009 - FY2010 Operating	Public Safety	Council on Domestic Violence and Sexual Assault/Council on Domestic Violence and Sexual Assault				Services*Training*Officers*Prosecutors (STOP) Grant. These funds may be used to provide for law enforcement, prosecution and victim services enhancements such as training public safety and court-related personnel, expanding specialized units and enhancing technology. Funds will be sub-granted to law enforcement and prosecutorial agencies, courts and approved victim services programs.		803.6			803.6

	ARRA Page Ref.	FY	Department	RDU/ Component	PFT	PPT	NP	Description	General Funds	Federal Funds	Other Funds	Fund Source	Total Funds
30	p. 335, Sec. 2104	FY2009 - FY2010 Operating	Revenue	Child Support Services Division				The division had originally requested a $1.9 million fund source change from RSS to GF Match. Neither the House or Senate Finance Subcommittee budgets include that change. The combination of a change in federal policy that now allows federal incentive funds to be used as match and the unexpected level of FY10 carryforward due to high PFD collections now result in just $400.0 GF Match being required. The $400.0 GF Match is necessary to collect the federal funds.	400.0	612.5	(1,012.5)	Receipt Supported Services	0.0

Alaska Department of Labor and Workforce Development

American Recovery and Reinvestment Act
Unemployment Insurance Modernization

March 27, 2009

Unemployment Insurance Modernization Incentive $15.6 Million

To receive 1/3 of the incentive payment, Alaska must change law to provide an "Alternate Base Period"

To receive the remaining 2/3, Alaska must have an Alternate Base Period **and** provide benefits for at least 2 of the following 4:

- Leaving work because of domestic violence, illness or disability of family member or to accompany a spouse*
- Dependents' allowance*
- Seeking Part-time work
- Leaving work to attend approved training

* DOLWD and Department of Law have determined that Alaska already complies with these provisions; therefore, no additional legislation would be required to receive these funds.

Federal Guidance Issued March 19, 2009: The ARRA requires changes to be in effect as permanent law; however, "If a state eventually decides to repeal or modify any of these provisions, it may do so, and it will not be required to return any incentive payments...."

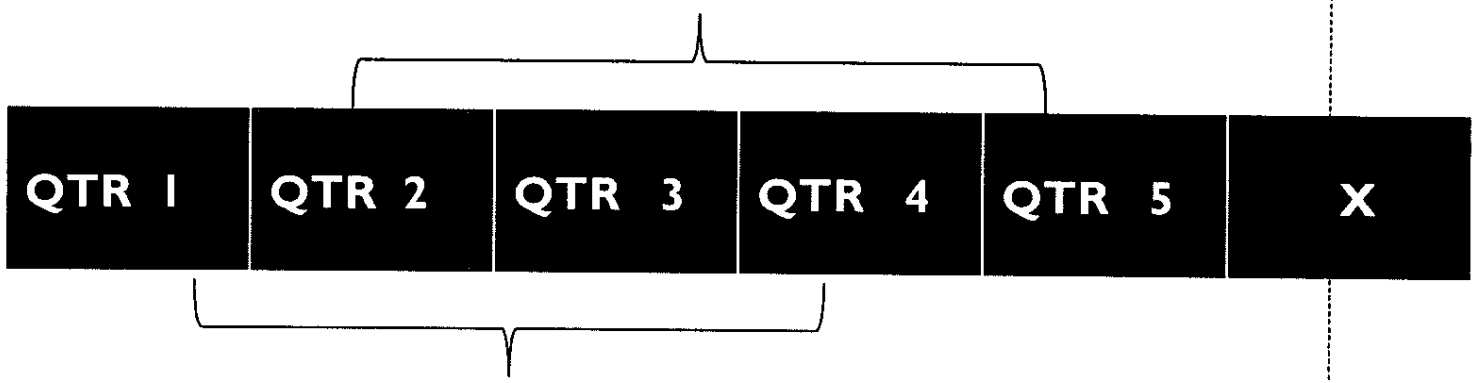
Source: Alaska Department of Labor and Workforce Development

5495

5496

Alternate Base Period = 4 most recent completed calendar quarters

Current quarter



Current Base Period = first 4 of last 5 completed calendar quarters

Claim initiated

If the ABP were in place in 2008, an additional $1.9 million in Unemployment Insurance benefits would have been paid. If the full cost were realized in that year, the average employer cost per worker would have been $386 rather than $376.

Unemployment Insurance Modernization Incentive

"(C)(i) No certification of compliance with the requirements of the act may be made with respect to any State whose State law is not otherwise eligible for certification under section 303 of the Social Security Act or approvable under section 3304 of the Federal Unemployment Tax Act".

- Alaska risks decertification unless we pass conformity legislation dealing with unemployment insurance tax status of federally recognized tribal entities—to enable them to become reimbursable.

Source: Alaska Department of Labor and Workforce Development

Incentive Uses

- Incentive money deposited in the Alaska UI Trust for:
  - Unemployment benefit payments
  - Unemployment Insurance Program Administration/Technology
  - Reemployment Services
- No time limit on fund expenditures

Building Energy Codes Program

Status of State Energy Codes

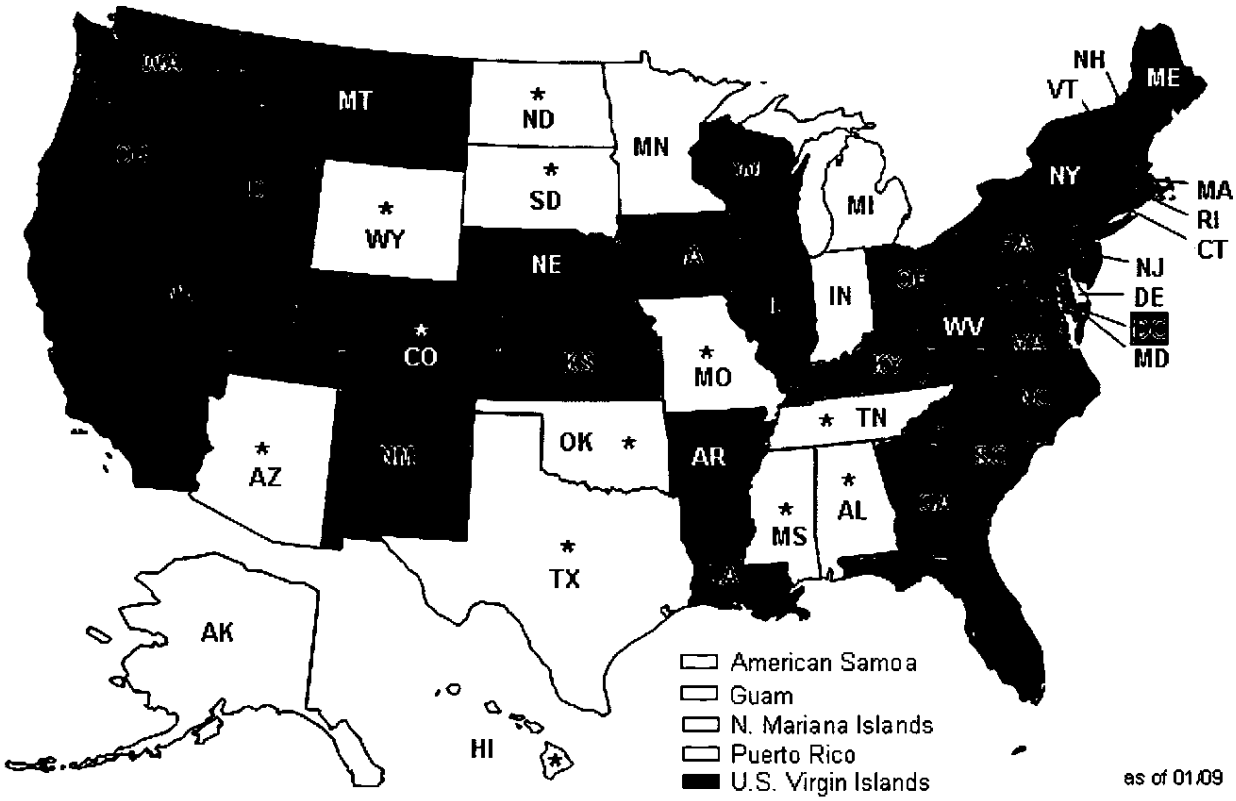
State contacts, current code status, code history, and construction data are located in the state energy codes database.

To view the energy code that is in effect for a particular state, select the State from one of the maps below, or from the drop down state list. Maps of States that can use RES*check* or COM*check* for building energy code compliance are also available.

State List

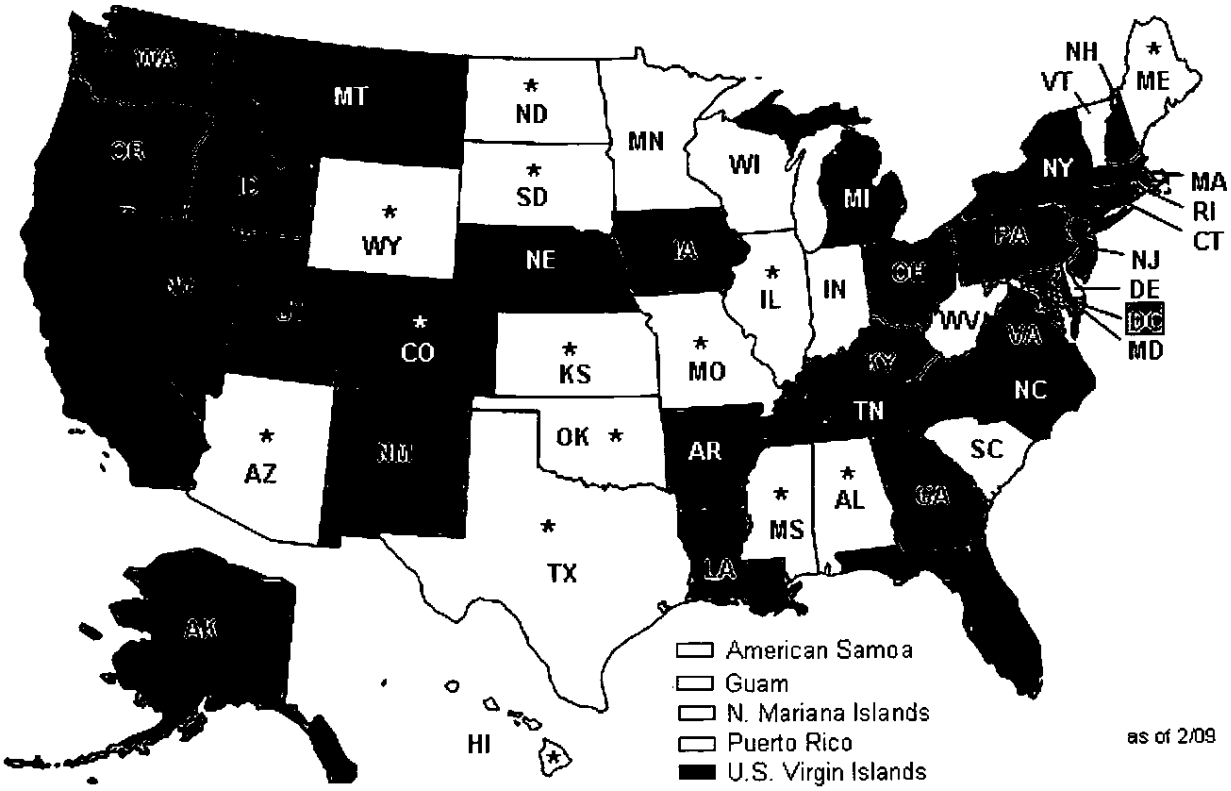
View all states' code status

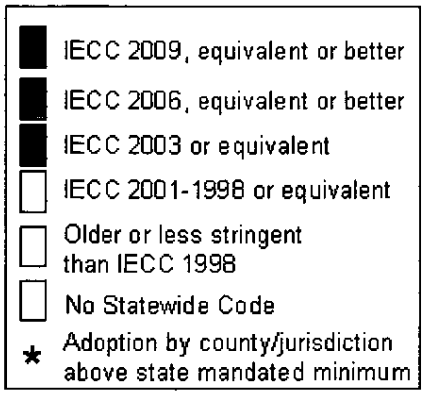
Status of Commercial Energy Codes



- ASHRAE 90.1-2007/2009 IECC, equivalent or better
- ASHRAE 90.1-2004/2006 IECC, equivalent or better
- ASHRAE 90.1-2001/2003 IECC or equivalent
- ASHRAE 90.1-1999/2001 IECC or equivalent
- ASHRAE 90.1-1989/2000 IECC or equivalent
- Older or less stringent than ASHRAE 90.1-1989/2000 IECC
- No statewide code
- * Adoption by county/jurisdiction above state mandated minimum

Status of Residential Energy Codes





For information on State Energy Program (SEP) Special Projects for Building Energy Codes, see: http://www.eere.energy.gov/state_energy_program/projects_all_by_topic.cfm/topic=10

Regional Efficiency Alliances work directly with the states to increase and coordinate energy efficiency and market transformation efforts in the U.S.

U.S. DOE Building Technologies Application Centers work directly with the states in the Pacific Northwest and Southern United States.

Community Development Block Grant Program **FY2009 Request:** **$679,900**
Reference No: **48423**

AP/AL: Appropriation
Category: Development
Location: Statewide
House District: Statewide (HD 1-40)
Estimated Project Dates: 03/16/2009 - 09/30/2010

Project Type: Economic Assistance
Recipient: Various
Contact: Tara Jollie
Contact Phone: (907)269-7959

Brief Summary and Statement of Need:
Authorization is being requested due to passage of the American Recovery and Reinvestment Act (H.R. 1). In FY2009 the Department of Commerce, Community and Economic Development will be receiving funding for the Community Development Block Grant (CDBG) program. This program provides grants (not to exceed $850,000) to municipalities for planning activities, infrastructure projects, and economic development activities which benefit low to moderate-income individuals.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$679,900						$679,900
Total:	$679,900	$0	$0	$0	$0	$0	$679,900

☐ State Match Required ☑ One-Time Project ☐ Phased - new ☐ Phased - underway ☐ On-Going

Operating & Maintenance Costs:

	Amount	Staff
Project Development:	0	0
Ongoing Operating:	0	0
One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:

Project Description/Justification:
The CDBG program provides funding for standard allowable CDBG activities meeting low-income benefit requirements including, but not limited to, property acquisition, code enforcement, clearance / rehab / reconstruction / construction of buildings, public and social services (15% limit), planning and capacity building, nonprofit development activities, economic development assistance, relocation, technical assistance, housing services, and homeownership assistance. This program has been in existence since 1983. The federal Department of Housing and Urban Development (HUD) provides the funding.

Project Description/Justification:

STATE ENERGY PROGRAM (SEP)
Total Funds: $28,563.0 Federal ES – FY2009 Capital Budget
Purpose: The State Energy Plan (SEP) is designed to provide a range of services which work toward the reduction of fossil fuel energy use, encourage energy efficiency and energy conservation. This wide ranging program allows funding for energy efficiency and conservation to be spent in buildings, transportation, commerce or industry. A Memorandum of Agreement between the Alaska Housing Finance Corporation and the Alaska Energy Authority under the AIDEA agrees to split this funding on a 50/50 basis.
Requirements:
- 20% non-federal match is required for original SEP, waived for American Reinvestment and Recovery Act funding.
- Restrictions on equipment capital purchases waived for American Reinvestment and Recovery Act funding.

Timing:
- The entire amount is available upon enactment. Funds must be obligated within 180 days, and spent in their entirety within three years.

Restrictions: The bill requires that in order to receive stimulus funds, the Governor of a state must notify the Secretary of Energy in writing that the Governor has obtained necessary assurances that each of the following will occur:

- The applicable state regulatory authority will seek to implement in appropriate proceedings with each utility, a general policy that ensures utility financial incentives are aligned with helping customers use energy more efficiently and provides the utility with timely cost recovery and a timely earnings opportunity
- The State or applicable local government that has authority to adopt building codes will adopt residential codes that exceed the most recently published International Energy Conservation Code or achieves equivalent/greater savings; adopt a commercial building code that meets or exceeds ANSI/ASHRAE/IESNA Standard 90.1-2007 or achieves equivalent/greater savings; a plan is developed for the jurisdiction achieving compliance to do so within 8 years of the date of enactment in at least 90 percent of new or renovated residential and commercial building space.
- The State will give priority to the extent practicable to projects that include an expansion of existing energy efficiency programs approved by the State or appropriate regulatory authority, including building and industry retrofits funded by the state or through ratepayers; the expansion of existing programs to support renewable energy projects and deployment activities and cooperation and joint activities between States to advance more efficient and effective use of this funding to support energy efficiency priorities.
- Matching funds not required on ARRA funding, 20% on Standard SEP grants
- Competitive grant information not yet available ($25 million available nationwide) AHFC is reviewing or awaiting additional federal guidance before determining whether to apply.

Recipients: Alaska Housing Finance Corporation

Sub-recipients:

- Alaska Energy Authority
- University of Alaska Cooperative Extension Service
- Other non-profit organization through competitive bid process

AHFC - Weatherization Program **FY2009 Request: $18,466,200**
Reference No: 48434

AP/AL: Appropriation **Project Type:** Renovation and Remodeling
Category: Housing/Social Services
Location: Statewide **Contact:** Les Campbell
House District: Statewide (HD 1-40) **Contact Phone:** (907)330-8356
Estimated Project Dates: 03/16/2009 - 06/30/2013

Brief Summary and Statement of Need:
Federal U. S. Department of Energy (DOE) funds to assist low- and moderate- income families attain decent, safe, and affordable housing through the weatherization and rehabilitation of existing homes. Weatherization provides for fire safety through furnace and electrical repairs, education, chimney and woodstove repairs, and egress windows (installed during bedroom window replacements).

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$18,466,200						$18,466,200
Total:	$18,466,200	$0	$0	$0	$0	$0	$18,466,200

Project Description/Justification:

WEATHERIZATION PROGRAM
Total Funds: $18,466.2 Federal ES - FY2009 Capital Budget
Purpose: Provide funding for standard allowable Weatherization activities. The average cost per unit under DOE moves from $3,000 to $6,500. The reweatherization dates moves to 1994 (possibly more), and the income moves to 200% of poverty (lower than state guidelines). All efficiency measures must have a savings to investment ration of one or more. Health and Safety tied to implementation are allowed. Some electrical efficiency measures allowed such as lighting and refrigeration. Primary measures include attic insulation and air sealing; crawl/basement insulation and air sealing; heating system repair and replacement; ventilation, etc.
Timing Issues:
- Funding will be made available by April 1, 2009
- 75% funding must be obligated/expended prior to Sept. 30, 2010
- Will utilize five existing Subgrantees and assist with expansion at that level
- Agencies will train and hire more staff and contractors to deliver services

- Seasonal nature or some of work will delay implementation and completions

Other Restrictions

- Guidance details will be issued regarding funding
- Process for application for funds may follow public notification and hearing process
- Amendments or new grants issued to grantees

Recipients

- Grantee/recipient is AHFC-Research
- Funding will be distributed to sub-grantees that received funding in FFY08
  1. Alaska Community Development Corporation
  2. Interior Weatherization
  3. Municipality of Anchorage
  4. Rural Alaska Community Action Partnership
  5. Tanana Chiefs Conference

AHFC - Energy Efficiency and Conservation Block Grants **FY2009 Request: $8,500,000**

Project Description/Justification:

ENERGY EFFICENCY & CONSERVATION BLOCK GRANTS (EECBG)

Total Funds: $8,500.0 Federal ES – FY2009 Capital Budget (Estimated about $29 million total to Alaska, $19.8 Million direct grants to municipalities, $8.5 million to the state energy office (AHFC).)

Purpose: Provide funding for energy efficiency and conservation activities for communities, including but not limited to:

- Developing/implementing an energy efficiency and conservation strategy;
- Retaining technical consultant services to assist in the development of such a strategy;
- Conducting residential and commercial building energy audits;
- Establishing financial incentive programs for energy efficiency improvements *(e.g., loan programs, rebate programs, waive permit fees)*;
- Providing grants to nonprofit organizations to perform energy efficiency retrofits;
- Developing/implementing programs to conserve energy used in transportation *(e.g., flex time by employees, satellite work centers, promotion of zoning requirements that promote energy*

efficient development, transportation infrastructure: bike lanes/pathways, pedestrian walkways, and synchronized traffic signals);
- Developing and implementing building codes and inspection services to promote building energy efficiency;
- Implementing energy distribution technologies;
- Developing public education programs to increase participation and efficiency rates for recycling programs;
- Purchasing/implementing technologies to reduce and capture methane and other greenhouse gases generated by landfills or similar sources;
- Installing light emitting diodes (LEDs);
- Developing, implementing, and installing on or in any government building, onsite renewable energy technology that generates electricity from renewable resources (solar and wind energy, fuel cells, and biomass); and
- Any other activity as determined by the Secretary of Energy in consultation with the Secretaries of Transportation and Housing and Urban Development and the Administrator of the Environmental Protection Agency.

Timing Issues:
- Funding is available until September 30, 2010
- Recipients prioritize projects that award bid-based contracts within 180 days from funding availability
- 68% designated for cities over 35,000 or county/boroughs over 200,000; or ten largest cities will be direct recipients from US DOE
- 2% designated for Indian tribes
- 2% competitive
- Of the 28% to the state, 60% of that must be passed through to municipalities not eligible for direct funding
- Matching funds not required
- Competitive grant information not yet available. AHFC is reviewing or awaiting additional federal guidance before determining whether to apply

Other Restrictions
- Application due to US DOE within 60 days of grant guidance issue
- State has 180 days to encumber the funds
- All funding must be spent within 3 years

Recipients
- Cities and municipal governments
- Alaska Housing Finance Corporation

Total ARRA Funds Available: $9,161.9

Budget Request: $0 Operating

Purpose: Support efforts to prepare at-risk youth between the ages of 14 and 24 for summer and year-round employment opportunities, for adult employment and training activities, with an emphasis on low-income individuals needing assistance to obtain employment, and for dislocated worker employment and training activities. No new positions requested. Expands an existing program.

Timing Issues

- The application deadline for these funds was 3/13/09, it was submitted 3/11/09.
- Guidance that money must be spent quickly and effectively; expenditure authority expires on June 30, 2011.

Other Restrictions

- There are no state matching requirements.

Sub-Recipients

- Qualifying youth and adult clients will be served by grantees, the Job Center Network or Eligible Training Providers.

WAGNER PEYSER JOB CENTER SERVICE FUNDS

Total ARRA Funds Available: $4,304.7

Budget Request: $0 Operating

Purpose: Available for job center and labor exchange services to assist workers in obtaining employment and employers in finding qualified employees. Requesting eight PFT positions. Expands an existing program.

Timing Issues

- The application deadline for these funds was 3/13/09, it was submitted 3/12/09.
- Funding is available until September 30, 2010; expenditure authority expires on June 30, 2011.

Other Restrictions

- There are no state matching requirements.

VOCATIONAL REHABILITATION SERVICES

Total ARRA Funds Available: $1,800.0

Budget Request: $0 Operating

Purpose: Assist individuals with disabilities to obtain and retain employment. Expands an existing program.

Timing Issues:

- No separate application is necessary to receive these funds; distribution is automatic based on formula funding already being received.
- Expenditure authority expires on September 30, 2011.

Other Restrictions

- There are no state matching requirements.

Sub-Recipients

- Eligible individuals with significant disabilities served by agency staff, vendors, and grantees.

UNEMPLOYMENT INSURANCE ADMINISTRATION

Total ARRA Funds Available: $1,115.7

March 24, 2009

Budget Request: $0 Operating

Purpose: To address increased unemployment insurance workloads.

Timing Issues:

- No separate application was necessary to receive these funds; the funds were deposited directly into the UI Alaska Trust Fund on February 27, 2009.
- Expenditure authority expires on June 30, 2011.

Other Restrictions

- There are no state matching requirements.

INDEPENDENT LIVING/BLIND SERVICES

Total ARRA Funds Available: $246.2

Budget Request: $0 Operating

Purpose: Assisting individuals with disabilities to live at home. Expands an existing program.

Timing Issues:

- No separate application is necessary to receive these funds; distribution is automatic based on formula funding already being received.
- Funding is available until September 30, 2011.

Other Restrictions

- There is a 10% State match requirement which will be met using existing budgeted General Funds.

Sub-Recipients

- State Independent Living Council, Centers for Independent Living, and the Alaska Center for Blind and Visually Impaired.

SENIOR COMMUNITY SERVICE EMPLOYMENT PROGRAM

Total ARRA Funds Available: $507.3

Budget Request: $0 Operating

Purpose: Provides employment opportunities for low-income persons age 55 or older, to foster individual economic self-sufficiency and transition individuals to unsubsidized employment. Expands an existing program.

Timing Issues:

- The application deadline for these funds was 3/09/09, it was submitted 3/11/09, the first half of the funds were made available to the state on 3/19/09.
- Funding is available until September 30, 2010; expenditure authority expires on June 30, 2011.

Other Restrictions

- There is a 10% State match requirement which will be met using existing budgeted STEP funds.

Sub-Recipients

- Grantees providing service to qualifying seniors.

TRADE ADJUSTMENT ASSISTANCE PROGRAM

Total ARRA Funds Available: $350.0

Budget Request: $0 Operating

Purpose: Provides additional statewide administrative and client counseling and case management services.

Expands an existing program.

Timing Issues:

- At this time the department has not received instructions regarding applying for the funds.
- Funding is available until September 30, 2010; expenditure authority expires on June 30, 2011.

Other Restrictions

- There are no state matching requirements.

March 24, 2009

Recipients

- Qualifying clients.

√ECONOMIC DEVELOPMENT ADMINISTRATION

Total ARRA Funds Available: $3,000.0

Budget Request: $3,000.0 Fed FY09 Capital

Purpose: Provides additional funds necessary to complete the Alaska Vocational Technical Center culinary building replacement and cafeteria upgrade for which the construction bids are coming in $3,000.0 over the general funded FY09 capital project.

Timing Issues:

- The application deadline for these competitively awarded funds was 3/12/09, it was submitted 3/12/09.

Other Restrictions

- There are no state matching requirements.

UNEMPLOYMENT INSURANCE MODERNIZATION

Total ARRA Funds Available: $15,600.0

Budget Request: $0 Operating

Purpose: This financial incentive is available to Alaska if our unemployment insurance program includes specific eligibility criteria for unemployment insurance benefits. Based on our analysis, receipt of the incentive would require one statutory change: the addition of an alternate base period for benefit qualification. This statutory change would result in an estimated .03% increase in employer unemployment insurance rates; however this would be offset with the statutory reduction in the employer share of UI costs in FY 10. Incentive funds may be used to pay unemployment insurance benefits, or, subject to appropriation, maintain and support existing UI and Employment Service operations.

Timing Issues:

- Must apply for funds by September 30, 2011.
- Federal guidance is that these funds will not terminate until fully expended..

Other Restrictions

- There are no state matching requirements.

March 24, 2009

Dropout Rates in Alaska
Fact Sheet

The Dropout Rate is computed by dividing the number of dropouts in the current school year by the number of students enrolled in grades 7-12 on October 1 of the current school year. School year is defined as the12-month period beginning with July 1 and ending June 30.

A **Dropout** is defined as a student who was enrolled in the district at some time during the school year and whose enrollment terminated. This does not include an individual who:

- graduated from high school or completed a state or district approved education program, as evidenced by receipt of formal recognition from school authorities;
- transferred to another public school, private school or state or district approved education program;
- is temporarily absent due to suspension;
- is absent due to illness or medical condition;
- died.

The statewide Dropout Rate has decreased as well as the number of dropouts for three consecutive years:

School Year	Dropout Rate	Dropout Count (Grades 7-12)
2005	6.0%	3,791
2006	5.8%	3,642
2007	5.5%	3,434
2008	5.2%	3,232

The Alaska Native/American Indian Dropout Rate has not reflected the proportionate decrease over the same time period:

School Year	Dropout Rate	Dropout Count (Grades 7-12)
2005	8.2%	1,276
2006	8.4%	1,333
2007	8.3%	1,299
2008	8.5%	1,224

In 2007-2008 Alaska showed a wide range in difference with district by district comparisons of Dropout Rates. Four districts reported 0 dropouts. Two districts reported over 25% Dropout Rates. Both districts with the highest rates, Delta/Greely School District and the Nenana City School District, had a large percentage of dropouts reported in the statewide correspondence schools.

Graduation Rates in Alaska
Fact Sheet

The Graduation Rate is reported as a fraction. The numerator is the sum of the number of graduates receiving a regular diploma before June 30. The denominator is the sum of the number of graduates, plus the number of dropouts in grade nine three school years prior, plus the number of unduplicated dropouts in grade ten two school years prior, plus the number of unduplicated dropouts in grade eleven in the prior school year, plus the number of unduplicated dropouts in grade 12 during the current year, plus the number of grade 12 continuing students.

A **graduate** is defined as a student who was received a regular diploma from a state- or district-approved education program, as evidenced by receipt of a secondary school diploma from school authorities. Any student who receives a diploma under a waiver from the competency examination required under AS 14.03075 (a), as specified by the state board is considered to be a graduate. This does not include an individual who:

- receives a certificate of completion;
- receives a certificate of attendance;

The statewide Graduation Rate has remained relatively consistent over the last five years, however the number of graduates has increased for four consecutive years:

School Year	Graduation Rate	Graduate Count
2004	62.9%	7,290
2005	61.4%	6,905
2006	61.6%	7,361
2007	63.0%	7,666
2008	62.6%	7,855

The Alaska Native/American Indian Graduation Rate has shown improvement over the same five year time period:

School Year	Graduation Rate	Graduate Count
2004	46.1%	1,327
2005	43.2%	1,233
2006	45.1%	1,442
2007	51.2%	1,689
2008	48.1%	1,523

Please note that the new Graduation Rate required by the Final Title 1 Regulations under NCLB will use a different calculation. The new Graduation Rate, also known as the Four-Year Adjusted Cohort Rate, will follow an actual group of students across four years of high school. Alaska will no longer be incorporating prior years' counts of dropouts to calculate the Graduation Rate.

THE AMERICAN RECOVERY AND REINVESTMENT ACT OF 2009

SAVING AND CREATING JOBS AND REFORMING EDUCATION

In a global economy where the most valuable skill you can sell is your knowledge, a good education is no longer just a pathway to opportunity— it is a pre-requisite. The countries that out-teach us today will out-compete us tomorrow.

—President Barack Obama, Feb. 24, 2009

The *American Recovery and Reinvestment Act of 2009* (*ARRA*) provides approximately $100 billion for education, creating a historic opportunity to save hundreds of thousands of jobs, support states and school districts, and advance reforms and improvements that will create long-lasting results for our students and our nation including early learning, K-12, and post-secondary education. This document describes the principles and strategy that will guide the distribution and implementation of the *ARRA* funds appropriated to the U.S. Department of Education. Accompanying documents provide initial guidelines for three components of *ARRA* education funding: the State Fiscal Stabilization Fund (SFSF), Title I, Part A of the *Elementary and Secondary Education Act* (Title I), and the *Individuals with Disabilities Education Act* (*IDEA*), Part B. Separately, we will issue guidelines on other *ARRA* funds as they are developed. The Department will periodically provide updated information at www.ed.gov.

Principles: The overall goals of the *ARRA* are to stimulate the economy in the short term and invest in education and other essential public services to ensure the long-term economic health of our nation. The success of the education part of the *ARRA* will depend on the shared commitment and responsibility of students, parents, teachers, principals, superintendents, education boards, college presidents, state school chiefs, governors, local officials, and federal officials. Collectively, we must advance *ARRA*'s short-term economic goals by investing quickly, and we must support *ARRA*'s long-term economic goals by investing wisely, using these funds to strengthen education, drive reforms, and improve results for students from early learning through post-secondary education. Four principles guide the distribution and use of *ARRA* funds:

a. **Spend funds quickly to save and create jobs.** *ARRA* funds will be distributed quickly to states, local educational agencies and other entities in order to avert layoffs, create and save jobs and improve student achievement. States and LEAs in turn are urged to move rapidly to develop plans for using

5523

funds, consistent with the law's reporting and accountability requirements, and to promptly begin spending funds to help drive the nation's economic recovery.

b. **Improve student achievement through school improvement and reform.** ARRA funds should be used to improve student achievement. In addition, the SFSF provides funds to close the achievement gap, help students from all backgrounds achieve high standards, and address four specific areas that are authorized under bipartisan education legislation – including the Elementary and Secondary Education Act and the America Competes Act of 2007:

    1. Making progress toward rigorous college- and career-ready standards and high-quality assessments that are valid and reliable for all students, including English language learners and students with disabilities;

    2. Establishing pre-K-to college and career data systems that track progress and foster continuous improvement;

    3. Making improvements in teacher effectiveness and in the equitable distribution of qualified teachers for all students, particularly students who are most in need;

    4. Providing intensive support and effective interventions for the lowest-performing schools.

c. **Ensure transparency, reporting and accountability.** To prevent fraud and abuse, support the most effective uses of *ARRA* funds, and accurately measure and track results, recipients must publicly report on how funds are used. Due to the unprecedented scope and importance of this investment, *ARRA* funds are subject to additional and more rigorous reporting requirements than normally apply to grant recipients.

d. **Invest one-time *ARRA* funds thoughtfully to minimize the "funding cliff."** *ARRA* represents a historic infusion of funds that is expected to be temporary. Depending on the program, these funds are available for only two to three years. These funds should be invested in ways that do not result in unsustainable continuing commitments after the funding expires.

Categories of funds and schedule for distribution: Balancing the need for speedy investments and for rigorous accountability and transparency, the Department has designed the following approaches for distributing different categories of funds. Some funds will be distributed in stages to states on a formula basis and then distributed from states to local education agencies (LEAs) or institutions of higher education (IHEs) for use over the next two school years (2009–10 and 2010–11); some funds will be distributed all at once; some funds will be distributed through a competitive grant process.

The *ARRA* Pell grant and work study funding will be used for school year 2009–2010. These funds are available, pending disbursement, beginning July 1.

- Pell Grants—$17.1 billion. This will increase the maximum Pell award for all eligible students from $4,850 to $5,350.

- Work Study—$200 million.

The funds under the SFSF, Title I, Part A and *IDEA*, Part B will be available in two stages. Funds from these very large programs are to be delivered by formula from the Department to the states. The Department will release 50 percent of Title I, Part A and 50 percent of *IDEA*, Part B funds before the end of March 2009, without requiring new state applications. Streamlined, user-friendly applications for the initial 67 percent of the SFSF will be available to governors by the end of March, and funds will be made available by the Department within two weeks after receipt of an approvable application. For these three categories of funds, we expect to make available the remainder of the funds during the period July 1 to Sept. 30, 2009, conditioned on states providing additional information. The guidelines for securing these funds will be available on our Web site at www.ed.gov.

- SFSF delivered to the state governors ($48.6 billion)
    - $39.8 billion is devoted to public early learning, K-12, and higher education. This amount must be distributed by formulae from the state to local education agencies and through a mechanism determined by the state to institutions of higher education.
    - $8.8 billion is allocated to governors for education (including school modernization), public safety, or other government services.
- Title I, Part A ($10 billion) to State educational agencies.
- *IDEA*, Part B ($11.7 billion) to State educational agencies.

A minimum of 50 percent of the funds for the following programs will also be available by the end of March as soon as guidelines are issued:

- *IDEA* Part C ($500 million).
- Vocational Rehabilitation State Grants ($540 million).

For the following programs under $500 million, all of the formula funds will be available by the end of March:

- Impact Aid Construction ($100 million: only 40 percent will be distributed by formula; 60 percent will be distributed through competitive grants at a later date).
- Independent Living Services ($140 million; only $52.5 million will be distributed by formula; remaining $87.5 will be distributed by competitive grants at a later date).
- Education for Homeless Youth ($70 million).

For the following programs, funds will be made available beginning in fall 2009, and will be conditioned upon receipt of further information that will be outlined in future guidance:

- Title I School Improvement Grants ($3 billion).

- Educational Technology State Grants ($650 million).

The following funds will be made available beginning in fall 2009, based on the quality of the applications submitted through a competitive grant process. Guidelines for these funds will be posted shortly:

- Teacher Incentive Fund ($200 million).
- Teacher Quality Enhancement ($100 million).
- Statewide Data Systems ($250 million).

Under the $5 billion in SFSF reserved for the Secretary of Education to make competitive grants, the Department will conduct a national competition among states for a $4.35 billion state incentive "Race to the Top" fund to improve education quality and results statewide. The Race to the Top fund will help states drive substantial gains in student achievement by supporting states making dramatic progress on the four reform goals described above and effectively using other *ARRA* funds. $650 million of the $5 billion will be set aside in the "Invest in What Works and Innovation" fund and be available through a competition to districts and non-profit groups with a strong track record of results. Guidelines and applications for the competitive funds will be posted expeditiously. Race to the Top grants will be made in two rounds—fall 2009 and spring 2010).

In the coming months, the Department will also announce opportunities to compete for discretionary funds under non-*ARRA* programs. The priorities for these competitions will be aligned with the reform goals of the Race to the Top fund, and will recognize states and LEAs that optimize the use of the varied funding streams provided under *ARRA*. In addition, the Department will identify technical assistance resources to help states and localities effectively implement the most promising and evidence-based reforms using all relevant federal, state, and local resources. With federal funds available for R&D, the Department also hopes to work with schools to support rigorous testing of interventions that states and districts support with *ARRA* funds, to build the knowledge base about what works.

What must states do to receive SFSF, Title I, Part A and *IDEA*, Part B funds? States will receive initial Title I, Part A and *IDEA*, Part B funds under pre-existing applications. For the first round of state stabilization funds, governors must provide three things:

- Assurances that they are advancing the four reforms described in the statute and maintenance of effort;
- Baseline data on their current status in each of these areas; and
- Basic information on how the funds will be used.

The Department intends to provide governors with a streamlined, user-friendly initial SFSF application package.

For the second round of funds, state educational agencies (SEAs) must provide information regarding their ability to meet reporting requirements under the *ARRA* under Title I, Part A and *IDEA,* Part B. In the case of the SFSF, governors must provide plans outlining the state's plans and progress in the four reform areas described above. As part of its application for the second part of the SFSF, a state must describe how the state and its LEAs plan to use SFSF and other funding in a fiscally prudent way that substantially improves teaching and learning. Governors and chief state school officers should work closely with other state and local officials in the state to develop effective data reporting systems and plans that will meet the assurances required by SFSF.

Conclusion: This distribution strategy balances the need for speed and economic stimulus with the need for aggressive and effective education improvement and reform in order to drive our nation's long-term economic well-being. It provides significant resources quickly while giving states and local educational agencies time to carefully plan thoughtful use of funds. It seeks to align the use of the funds provided through SFSF, Title I, *IDEA* and state incentive grants, with the purposes of prudent investment under the *ARRA* and improving student achievement. Success will depend on the quality of leadership, judgment, coordination, and communication of all involved. It represents a historic opportunity to restore America's global leadership in education.

STATE FISCAL STABILIZATION FUND

The State Fiscal Stabilization Fund (SFSF) program is a new one-time appropriation of $53.6 billion under the *American Recovery and Reinvestment Act of 2009* (*ARRA*). Of the amount appropriated, the U. S. Department of Education will award governors approximately $48.6 billion by formula under the SFSF program in exchange for a commitment to advance essential education reforms to benefit students from early learning through post-secondary education, including: college- and career- ready standards and high-quality, valid and reliable assessments for all students; development and use of pre-K through post-secondary and career data systems; increasing teacher effectiveness and ensuring an equitable distribution of qualified teachers; and turning around the lowest-performing schools.

These funds will help stabilize state and local government budgets in order to minimize and avoid reductions in education and other essential public services. The program will help ensure that local educational agencies (LEAs) and publicly funded institutions of higher education (IHEs) have the resources to avert cuts and retain teachers and professors. The program may also help support the modernization, renovation, and repair of school and college facilities. In addition, the law provides governors with significant resources to support education (including school modernization renovation, and repair), public safety, and other government services. The Department will award the remaining $5 billion competitively under the "Race to the Top" and "Investing in What Works and Innovation" programs.

SFSF is a key element of the *ARRA* and is guided by the principles of *ARRA*.

Overview of *ARRA*

Principles: The overall goals of the *ARRA* are to stimulate the economy in the short term and invest in education and other essential public services to ensure the long-term economic health of our nation. The success of the education part of the *ARRA* will depend on the shared commitment and responsibility of students, parents, teachers, principals, superintendents, education boards, college presidents, state school chiefs, governors, local officials, and federal officials. Collectively, we must advance *ARRA*'s short-term economic goals by investing quickly, and we must support *ARRA*'s long-term economic goals by investing wisely, using these funds to strengthen education, drive reforms, and improve results for students from early learning through college. Four principles guide the distribution and use of *ARRA* funds:

a. **Spend funds quickly to save and create jobs.** *ARRA* funds will be distributed quickly to states, LEAs and other entities in order to avert layoffs and create jobs. States and LEAs in turn are urged to move rapidly to develop plans for using funds, consistent with the law's reporting and accountability requirements, and to promptly begin spending funds to help drive the nation's economic recovery.

5528

b. **Improve student achievement through school improvement and reform.** *ARRA* funds should be used to improve student achievement and help close the achievement gap. In addition, the SFSF requires progress on four reforms previously authorized under the bipartisan Elementary and Secondary Education Act and the America Competes Act of 2007:

   1. Making progress toward rigorous college- and career-ready standards and high-quality assessments that are valid and reliable for all students, including English language learners and students with disabilities;

   2. Establishing pre-K-to college and career data systems that track progress and foster continuous improvement;

   3. Making improvements in teacher effectiveness and in the equitable distribution of qualified teachers for all students, particularly students who are most in need;

   4. Providing intensive support and effective interventions for the lowest-performing schools.

c. **Ensure transparency, reporting and accountability.** To prevent fraud and abuse, support the most effective uses of *ARRA* funds, and accurately measure and track results, recipients must publicly report on how funds are used. Due to the unprecedented scope and importance of this investment, *ARRA* funds are subject to additional and more rigorous reporting requirements than normally apply to grant recipients.

d. **Invest one-time *ARRA* funds thoughtfully to minimize the "funding cliff."** *ARRA* represents a historic infusion of funds that is expected to be temporary. Depending on the program, these funds are available for only two to three years. These funds should be invested in ways that do not result in unsustainable continuing commitments after the funding expires.

Awarding SFSF Grants

- In order to help alleviate the substantial budget shortfalls that states are facing, the Department has developed a streamlined, user-friendly process for expeditiously providing to states SFSF allocations:
  - Sixty-one percent of a state's allocations will be on the basis of their relative population of individuals aged 5 to 24, and 39 percent will be based on relative shares of total population.

  - The Department will award SFSF funds to governors in two phases. To receive its initial SFSF allocation, a state must submit to the Department an application that provides (1) assurances that the state is committed to advancing education reform in four specific areas (described below); (2) baseline data that

5529

- As part of its application for initial funding, the state must assure that it will take actions to: (a) increase teacher effectiveness and address inequities in the distribution of highly qualified teachers; (b) establish and use pre-K-through-college and career data systems to track progress and foster continuous improvement; (c) make progress toward rigorous college- and career-ready standards and high-quality assessments; and (d) support targeted, intensive support and effective interventions to turn around schools identified for corrective action and restructuring.

- Within two weeks of receipt of an approvable SFSF application, the Department will provide a state with 67 percent of its SFSF allocation.

- A state will receive the remaining portion of its SFSF allocation after the Department approves the state's plan detailing its strategies for addressing the education reform objectives described in the assurances. This plan must also describe how the state is implementing the record-keeping and reporting requirements under *ARRA* and how SFSF and other funding will be used in a fiscally prudent way that substantially improves teaching and learning.

- In the near future, the Department will issue guidance on the specific requirements that a state must meet to receive its phase two allocation. The Department anticipates that the phase-two funds will be awarded beginning July 1, 2009, on a rolling basis.

- If a state demonstrates that the amount of funds it will receive in phase one (67 percent of its total stabilization allocation) is insufficient to prevent the immediate layoff of personnel by LEAs, state educational agencies, or publicly funded institutions of higher education, the Department will award the state up to 90 percent of its SFSF allocation in phase one. In such cases, the remaining portion of the state's allocation will be provided after the Department approves the state's plan.

- Of the amount appropriated for the SFSF, the Department will use at least $4.35 billion to make competitive grants under the "Race to the Top" fund. These grants will help states to drive significant improvement in student achievement, including through making progress toward the four assurances noted above.

- The Department will use up to $650 million to make competitive awards under the "Invest in What Works and Innovation" fund. These awards will reward LEAs or nonprofit organizations that have made significant gains in closing achievement gaps to serve as models for best practices.

Funds to Restore Support for Education

- States must use 81.8 percent of SFSF funds for the support of public elementary, secondary, and higher education, and, as applicable, early childhood education programs and services.
- States must use their allocations to help restore for FY 2009, 2010, and 2011 support for public elementary, secondary, and postsecondary education to the greater of the FY 2008 or FY 2009 level. The funds needed to restore support for elementary and secondary education must be run through the state's primary elementary and secondary education funding formulae. The funds for higher education must go to IHEs.
- If any SFSF funds remain after the state has restored state support for elementary and secondary education and higher education, the state must award the funds to LEAs on the basis of the relative Title I shares but not subject to Title I program requirements.

Funds to Support Public Safety and Other Government Services

- States must use 18.2 percent of the SFSF funds for education (school modernization, renovation, and repair), public safety, and other government services. This may include assistance for early learning, elementary and secondary education, and IHEs. In addition, states may use these funds for modernization, renovation, or repair of public school and public or private college facilities.

LEA and IHE Uses of Funds

- LEAs and IHEs should use funds consistent with the intent and overall goals of *ARRA*: to create and save jobs and to advance the education reforms set forth in the assurances section so as to produce lasting results for students from early learning to college. LEAs and IHEs are also encouraged to consider uses of funds that create lasting results without creating unsustainable recurring costs.
- Subject to limited restrictions in *ARRA* as defined in further guidance LEAs may use their share of 81.8% of the SFSF education funds for any activity authorized under the *Elementary and Secondary Education Act of 1965* (*ESEA*) (which includes the modernization, renovation, or repair of public school facilities), the *Individuals with Disabilities Education Act* (*IDEA*), the *Adult Education and Family Literacy Act* (*Adult Education Act*), or the *Carl D. Perkins Career and Technical Education Act of 2006* (*Perkins Act*).
- Any funds that an LEA receives from the 81.8 percent of the SFSF program (whether distributed through the state's primary funding formulae or on the basis of the relative Title I, Part A) may be used for any activity listed in the above paragraph.
- LEAs may use SFSF to pay salaries to avoid having to lay off teachers and other school employees.
- To the extent LEAs use funds for modernization, renovation or repair, they should consider the use of facilities for early childhood education and for the community and should create "green" buildings.
- Subject to limited restrictions in *ARRA*, IHEs may use program funds for: (1) education and general expenditures, and in such a way as to mitigate the need to raise tuition and

fees for in-state students; or (2) the modernization, renovation, or repair of IHE facilities that are primarily used for instruction, research, or student housing. IHEs may not use funds to increase their endowments.

Fiscal Issues

- The Department strongly encourages governors to award or otherwise commit program funds as soon as possible after receipt of their grant awards. However, funds are available for obligation at the state and local levels until Sept. 30, 2011.
- As part of the state's application, each governor must include an assurance that the state will maintain the same level of support for elementary, secondary, and postsecondary education in FY 2009 through FY 2011 as it did in FY 2006. However, the statute authorizes the Department to waive this maintenance-of-effort requirement under certain conditions.
- With prior approval from the secretary of education, a state or LEA may count program funds used for elementary or secondary education as non-federal funds to maintain fiscal effort under Department of Education programs that have maintenance-of-effort requirements.

Accountability Principles

- The president and secretary are committed to spending *ARRA* dollars with an unprecedented level of transparency and accountability. Therefore, states and LEAs that receive SFSF should expect to report on how those funds were spent and the results of those expenditures. The administration will post reports on *ARRA* expenditures on the www.Recovery.gov Web site.
- The SFSF authorization also contains specific reporting requirements to help ensure transparency and accountability for program funds. For example, states must report to the Department on, among other things: (1) the use of funds provided under the SFSF program; (2) the estimated number of jobs created or saved with program funds; (3) estimated tax increases that were averted as a result of program funds; and (4) the state's progress in the areas covered by the application assurances.
- States must maintain records that will permit the Department to monitor, evaluate, and audit the SFSF effectively.

Additional Information

- In the near future, the Department will make available the SFSF grant application and provide detailed program guidance.
- If you have any questions or concerns, please e-mail them to: State.Fiscal.Fund@ed.gov.

American Recovery and Reinvestment Act of 2009

State Fiscal Stabilization Fund (SFSF)

- 48.6 billion total nationally
- 67% upon receipt by USED of States application
- Remaining after approval of application, or fall '09

Assurances that must be agreed upon to accept SFSF –

1. Making progress toward rigorous college- and career-ready standards and high-quality assessments that are valid and reliable for all students, including English language learners and students with disabilities;
2. Establishing pre-K-to college and career data systems that track progress and foster continuous improvement;
3. Making improvements in teacher effectiveness and in the equitable distribution of qualified teachers for all students, particularly students who are most in need;
4. Providing intensive support and effective interventions for the lowest-performing schools.

Base Stabilization Fund

- 81.8% of the funding – 39.8 billion total nationally
- $93 million in Alaska

  Process

  Funds to Restore Support for Education
  - States must use 81.8 percent of SFSF funds for the support of public elementary, secondary, and higher education, and, as applicable, early childhood education programs and services.
  - States must use their allocations to help restore for FY 2009, 2010, and 2011 support for public elementary, secondary, and postsecondary education to the greater of the FY 2008 or FY 2009 level. The funds needed to restore support for elementary and secondary education must be run through the state's primary elementary and secondary education funding formulae. The funds for higher education must go to IHEs.
  - If any SFSF funds remain after the state has restored state support for elementary and secondary education and higher education, the state must award the funds to LEAs on the basis of the relative Title I shares but not subject to Title I program requirements.
  - LEA Use: to create and save jobs and to advance the education reforms set forth in the assurances section so as to produce lasting results for students from early learning to college. An LEA can use the funds, while advancing the four assurances required to accept the SFSF money, for the following programs:
    - ESEA
    - IDEA

- Adult Family Literacy Act
- Perkins
- Repair, modernization or Renovation of Public School Facilities

Discretionary Stabilization Fund

- 18.2%
- $20.7 million in Alaska
- Governor can utilize for education, safety or other government services

Incentive Grants

- $4.35 billion total nationally
- Competitive grants
- Secretary is referring to grants as "Race To The Top" grants
- Fall 2009 (FY 2010) – 30% in December '09 and 70% in May/June/July '10
- Application
  - Status on assurances
  - How groups not meeting AYP will make progress toward targets
  - Achievement and graduation rates
  - How will funds be used to improve achievement
  - Evaluation plan
- For a state that seeks and receives funding 50% of funding will be provided via grants to LEAs based on Title I-A formula for most recent year
- USED wants to pick 10-15 states or consortia (consortia strongly encouraged)
- USED is looking for states who do something dramatically different

Innovative Funds

- $650 million total nationally
- Fall 2009 and spring 2010
- Expand work and serve as models for best practices; allow work with the private sector; document best practices – and take to scale; invest in What Works and Innovation
- States not eligible
- Eligible applicants include L.E.A.s, other Agencies or Consortia – with strong track records of results
- Application
  - Significantly closing achievement gaps or increase student achievement
  - Exceeding states AMO
  - Significant improvement in other areas, such as graduation rates, recruitment, placement of HQT and school leaders
  - Partnerships with private sector, including philanthropic that will provide match to help bring results

Grants not related SFSF

Teacher Incentive Fund

- $200 million total
- Fall 2009
- Competitive grants
- LEA.s, states, or partnerships of one or more LEAs or states and at least one non-profit organization
- Ideas promoted include:
  - Performance-based teacher and principal compensation
  - High needs schools (30% of its enrollment low-income)
  - Must consider gains in student achievement
  - Multiple classroom evaluations
  - Incentives for educators to take on additional responsibility
- I.E.S. must evaluate rigorously

Longitudinal Data Systems

- $250 million (Up to $5m may be used to fund Data Coordinator for States), FY 09 money
- Fall 2009 (50% June/July, 50% Sept/Oct) – Audio conferences already taking place on first round of RFPs
- Competitive grants to SEAs
- Link P-16, teacher ID linked to student data, and workforce information
- Work toward meeting the America COMPETES act
- Institute of Educational Sciences at USED will Administer

AMERICAN RECOVERY AND REINVESTMENT ACT OF 2009
TITLE I, PART A RECOVERY FUNDS FOR GRANTS TO LOCAL EDUCATION AGENCIES

The *American Recovery and Reinvestment Act of 2009* (*ARRA*) provides significant new funding for programs under Title I, Part A of the *Elementary and Secondary Education Act of 1965* (Title I). Specifically, the *ARRA* provides $10 billion in additional fiscal year (FY) 2009 Title I, Part A funds to local education agencies (LEAs) for schools that have high concentrations of students from families that live in poverty in order to help improve teaching and learning for students most at risk of failing to meet state academic achievement standards. These funds create an unprecedented opportunity for educators to implement innovative strategies in Title I schools that improve education for at-risk students and close the achievement gaps while also stimulating the economy. The additional resources will enable LEAs to serve more students beyond the approximately 18 million currently served and boost the quality of teaching and learning. Preliminary estimates of Title I, Part A recovery allocations to each state and LEA are available at: http://www.ed.gov/about/overview/budget/news.html#ARRA.

This document provides states and LEAs with basic information regarding how and when Title I, Part A recovery funds will be awarded by the U.S. Department of Education. In the coming weeks, the Department will provide more guidance regarding these funds, including how they should be used, the submission of waiver requests, and the reporting requirements. It also will provide information about Title I School Improvement grants, for which a $3 billion appropriation will be made available beginning fall 2009. Additional information and documents will be posted on www.ed.gov.

Title I, Part A recovery funds are a key element of the *ARRA* principles as described below.

Overview of *ARRA*

Principles: The overall goals of the *ARRA* are to stimulate the economy in the short term and invest in education and other essential public services to ensure the long-term economic health of our nation. The success of the education part of the *ARRA* will depend on the shared commitment and responsibility of students, parents, teachers, principals, superintendents, education boards, college presidents, state school chiefs, governors, local officials, and federal officials. Collectively, we must advance *ARRA*'s short-term economic goals by investing quickly, and we must support *ARRA*'s long-term economic goals by investing wisely, using these funds to strengthen education, drive reforms, and improve results for students from early learning through college. Four principles guide the distribution and use of *ARRA* funds:

a. **Spend funds quickly to save and create jobs.** *ARRA* funds will be distributed quickly to states, LEAs and other entities in order to avert layoffs and create jobs. States and LEAs in turn are urged to move rapidly to develop plans for using funds, consistent with the law's

reporting and accountability requirements, and to promptly begin spending funds to help drive the nation's economic recovery.

b. **Improve student achievement through school improvement and reform.** *ARRA* funds should be used to improve student achievement, and help close the achievement gap. In addition, the SFSF requires progress on four reforms previously authorized under the bipartisan Elementary and Secondary Education Act and the America Competes Act of 2007:

    1. Making progress toward rigorous college- and career-ready standards and high-quality assessments that are valid and reliable for all students, including English language learners and students with disabilities;

    2. Establishing pre-K-to college and career data systems that track progress and foster continuous improvement;

    3. Making improvements in teacher effectiveness and in the equitable distribution of qualified teachers for all students, particularly students who are most in need;

    4. Providing intensive support and effective interventions for the lowest-performing schools.

c. **Ensure transparency, reporting and accountability.** To prevent fraud and abuse, support the most effective uses of *ARRA* funds, and accurately measure and track results, recipients must publicly report on how funds are used. Due to the unprecedented scope and importance of this investment, *ARRA* funds are subject to additional and more rigorous reporting requirements than normally apply to grant recipients.

d. **Invest one-time *ARRA* funds thoughtfully to minimize the "funding cliff."** *ARRA* represents a historic infusion of funds that is expected to be temporary. Depending on the program, these funds are available for only two to three years. These funds should be invested in ways that do not result in unsustainable continuing commitments after the funding expires.

Awarding Title I, Part A Recovery Funds

- The Department plans to award 50 percent of each state's Title I, Part A recovery funds by the end of March 2009. These funds will be awarded under each state's existing approved *Elementary and Secondary Education Act of 1965* (*ESEA*) Consolidated State Application. No new or amended application will be required to receive this portion of the funds. However, in order to receive the remaining Title I, Part A recovery funds, a state must submit, for review and approval by the Department, an amendment to its Consolidated Application that addresses how it will meet the recordkeeping and reporting requirements of the *ARRA*.
- The Title I, Part A *ARRA* awards will be in addition to the regular FY 2009 Title I, Part A grant awards that the Department plans to make on July 1 and Oct. 1, 2009. Together, these four grant awards (i.e., the two phases of the Title I, Part A recovery funds, and the

two phases of the regular FY 2009 Title I, Part A funds) will constitute a state's total FY 2009 Title I, Part A allocation.

- The fact that Title I, Part A recovery funds are FY 2009 funds does not preclude a state from awarding some or all of these funds to an LEA on the basis of existing, approved LEA applications.
- In accordance with the goals of the *ARRA*, the Department encourages states to award Title I, Part A recovery funds to their LEAs as quickly as possible, consistent with prudent management, so that LEAs can begin using the funds. Similarly, an LEA should use its Title I, Part A recovery funds expeditiously but sensibly. Note that, in the absence of a waiver, an LEA must obligate at least 85 percent of its total FY 2009 Title I, Part A funds (including *ARRA* funds) by Sept. 30, 2010. Any remaining FY 2009 Title I, Part A funds will be available for obligation until Sept. 30, 2011.

LEA Eligibility for Title I, Part A Recovery Funds

- An LEA is eligible to receive Title I, Part A recovery funds if it is eligible under the statutory eligibility criteria established in sections 1125(a)(1) and 1125A(c) of the *ESEA* for the Targeted and Education Finance Incentive Grant formulas of Title I, Part A.

Reservation of Title I, Part A Recovery Funds

- A state must reserve 4 percent of its Title I, Part A recovery funds for school improvement activities under section 1003(a) of the *ESEA*. Of this 4 percent of funds, at least 95 percent must be allocated directly to LEAs for school improvement activities.
- Except as noted above concerning the 4 percent reservation, a state would need a waiver to reserve any portion of its Title I, Part A recovery funds for state administration, because section 1004(b) of the *ESEA* limits the amount that a state may reserve for the administration of Title I. As it did last year, the Department will provide a table showing the base each state should use in determining the amount it may reserve for state administration.

Uses of Title I, Part A Recovery Funds

- LEAs may use their Title I, Part A recovery funds consistent with the Title I, Part A statutory and regulatory requirements, including the requirements to provide equitable services to eligible private school students. Uses should be aligned with the core goals of *ARRA* to save and create jobs and to advance reforms.
- Because the recovery funds constitute a large increase in Title I, Part A funding that will likely not be available at the same level beyond Sept. 30, 2011, schools and LEAs will have a unique opportunity to improve teaching and learning and should focus these funds on short-term investments with the potential for long-term benefits, rather than make ongoing commitments that they might not be able to sustain once recovery funds are expended.
- Congress in its ARRA conference report indicated its intent that grantees use some of their Title 1 funds for early childhood programs and activities. The Administration is committed over the long term to expanding early childhood educational opportunities and

creating a more seamless web of high-quality services for parents and children. In coming weeks, the Department will provide additional guidance on opportunities to use ARRA funds to expand high-quality early childhood educational services.

- Examples of potential uses of the Title I, Part A recovery funds that are allowable under Title I and consistent with ARRA principles:
    - Establishing a system for identifying and training highly effective teachers to serve as instructional leaders in Title I schoolwide programs and modifying the school schedule to allow for collaboration among the instructional staff;
    - Establishing intensive, year-long teacher training for all teachers and the principal in a Title I elementary school in corrective action or restructuring status in order to train teachers to use a new reading curriculum that aggressively works on improving students' oral language skills and vocabulary or, in some other way, builds teachers' capacity to address academic achievement problems;
    - Strengthen and expand early childhood education by providing resources to align a district-wide Title I pre-K program with state early learning standards and state content standards for grades K–3 and, if there is a plan for sustainability beyond 2010–11, expanding high-quality Title I pre-K programs to larger numbers of young children;
    - Providing new opportunities for Title I schoolwide programs for secondary school students to use high-quality, online courseware as supplemental learning materials for meeting mathematics and science requirements;
    - Using longitudinal data systems to drive continuous improvement efforts focused on improving achievement in Title I schools;
    - Providing professional development to teachers in Title I targeted assistance programs on the use of data to inform and improve instruction for Title I-eligible students;
    - Using reading or mathematics coaches to provide professional development to teachers in Title I targeted assistance programs; and
    - Establishing or expanding fiscally sustainable extended learning opportunities for Title I-eligible students in targeted assistance programs, including activities provided before school, after school, during the summer, or over an extended school year.

Invitation for Waivers

- The secretary of education will consider a request for a waiver with regard to the use of *ARRA* Title I funds:
    - of one or more of the "set-aside" requirements in Title I, Part A that apply to the use of funds by LEAs;
    - to calculate the per-pupil amount (PPA) for supplemental educational services (SES) based on an LEA's FY 2009 Title I, Part A allocation without regard to some or all of the recovery funds;
    - to allow a state to grant its LEAs a waiver of the carryover limitation in section 1127 of Title I, Part A more than once every three years; or
    - of the Title I, Part A maintenance-of-effort requirement (see below).

- The secretary intends to issue regulations to allow reasonable adjustments to the limitation on state administration expenditures to help states defray the costs of ARRA data collection requirements.

Fiscal Issues

- Maintenance of effort: With prior approval from the secretary of education, a state or LEA may count expenditures of SFSF used for elementary or secondary education as non-federal funds for purposes of determining whether the state or LEA has met the Title I, Part A maintenance of effort requirement. This may reduce the incidence of LEAs failing to maintain fiscal effort and the need to seek a waiver from the Department.
- Supplement, not supplant: the Department may not waive the Title I, Part A "supplement, not supplant" requirement. Note, however, that in certain circumstances, including cases of severe budget shortfalls, an LEA may be able to establish compliance with the "supplement, not supplant" requirement, even if it uses Title I, Part A funds to pay for allowable costs that were previously paid for with state or local funds. (For additional information, see Title I Fiscal Issues Non-Regulatory Guidance, available at: http://www.ed.gov/programs/titleiparta/fiscalguid.pdf.)
- Comparability: the Department may not waive the Title I, Part A comparability requirement.

Accountability Principles

- Each state and LEA is responsible for ensuring that Title I recovery funds are used prudently and in accordance with the law.
- Each LEA receiving Title 1 Part A recovery funds shall shall report a school-by-school listing of per-pupil educational expenditures from state and local sources. Further information will be provided in forthcoming department guidance.
- The President and the Secretary are committed to ensuring that *ARRA* dollars are spent with an unprecedented level of transparency and accountability. Therefore, each state and LEA that receives Title I, Part A recovery funds must report on how those funds were spent at www.recovery.gov.

Additional Information

- The Department will provide regular updates as additional information regarding the Title I, Part A recovery funds becomes available.
- The Department will provide information on the government-wide data collection and reporting requirements under the *ARRA* as this information becomes available.

American Recovery & Reinvestment Act (ARRA)

Education Title I & NCLB Stimulus Overview for Alaska

March 16, 2009

Title I, School Improvement 1003(g), Education Technology, & McKinney-Vento Education for the Homeless

Purpose: The overall goals of the *ARRA* are to stimulate the economy in the short term and invest in education and other essential public services to ensure the long-term economic health of our nation.

All funds under ARRA should be spent according to the following principles:

a. Spend funds quickly to save and create jobs.
b. Improve student achievement through school improvement & reform.
c. Ensure transparency, reporting, & accountability.
d. Invest one-time ARRA funds thoughtfully to minimize the "funding cliff." These funds should be invested in ways that do not result in unsustainable continuing commitments after the funding expires.

Title I ARRA Funds

a. About $29,480,000 to Alaska. This is almost as much as the 2008-2009 allocation to the state which was $38,846,309. The estimate for regular Title I for Alaska is $40,130,523.
b. Distributed based on two parts of the Title I formula – EFIG & Targeted, not all 4 parts.
c. First distribution to states by end of March (50% of the funding).
d. Second distribution to be determined, probably early fall, after state revises application to USDOE.
e. Will be considered as additional funding for 2009-2010 school year. Funds will be available until 9/30/2011.
f. Formula for district allocations will be generated using regular Title I funding rules, including the 4% state set-aside for School Improvement funds under 1003(a).
g. Waiting on final guidance from USDOE about possibility of waivers of Title I requirements including 20% for SES/choice, per pupil amount required for SES, and 15% limitation on carryover.
h. Districts must report a school-by-school listing of per-pupil educational expenditures from state and local sources to EED by December 2009.
i. EED reviewing ways to distribute the funding, the district will probably be able to apply for the total Title I funding through the NCLB 2009-2010 application, but may need to receive the funding through a separate grant award and create separate budgets for ARRA funds to meet the reporting and accountability requirements.
j. A district that would like to receive its portion of the Title I ARRA funds prior to July 1 may submit a budget request to EED once EED has received the funding from USDOE. It is anticipated that EED will be able to create a grant award for July 1, 2009 with authority to spend funds during the pre-award period.
k. District estimated amounts provided based on 2008-2009 data (current data), but *will change* with the actual distribution from USDOE.
l. Link to the US Department of Education fact sheet for Title I ARRA funds: http://www.ed.gov/policy/gen/leg/recovery/factsheet/title-i.html

School Improvement 1003(g) ARRA Funds

a. About $9.8 million to Alaska. This is 6 times more than the $1,578,096 that Alaska received in 2008-2009. The state is also expected to receive about $1.6 million for FY 2009-2010 in regular 1003(g) funding.
b. The state must submit a revised application to the USDOE for these funds. They must be distributed to Title I schools in improvement, corrective action, or restructuring according to the approved state application in amounts of at least $50,000 per school with a maximum of $350,000 per school.
c. Funds will probably be distributed to states in September, 2009. Funds will be available for use until 9/30/2011.

Enhancing Education through Technology (Title IID)

a. About $3.2 million to Alaska. This is about 2.5 times the funding that Alaska received in 2008-2009.
b. The funds will be split 50% through formula funding to districts, 50% through competitive grants.
c. USDOE is expected to distribute the first half of the funds in June or July and the second half in early fall. The funds will be available for use until 9/30/2011.

McKinney-Vento Homeless Education

a. No estimate available yet for Alaska, but could be about $190,000. Alaska received $177,203 in 2008-2009 and is estimated to receive $177, 939 in 2009-2010 in regular McKinney-Vento funds.
b. States will distribute funds either through competitive grants or through a formula.
c. EED is awaiting further guidance on whether these funds can be distributed with the regular funding through the normal competitive grant process.
d. Funds will be allocated to states based on the number of homeless students reported for 2007-2008. That data was just submitted to USDOE in final form on Friday, 3/13.
e. Funds will be distributed to states in April, and must be awarded by states within 120 days. The funds will be available for use until 9/30/2011.

AMERICAN RECOVERY AND REINVESTMENT ACT OF 2009
***IDEA* RECOVERY FUNDS FOR SERVICES TO CHILDREN AND YOUTHS WITH DISABILITIES**

The *American Recovery and Reinvestment Act of 2009* (*ARRA*) appropriates significant new funding for programs under Parts B and C of the *Individuals with Disabilities Education Act* (*IDEA*). Part B of the *IDEA* provides funds to state educational agencies (SEAs) and local educational agencies (LEAs) to help them ensure that children with disabilities, including children aged three through five, have access to a free appropriate public education to meet each child's unique needs and prepare him or her for further education, employment, and independent living.

The *IDEA* recovery funds under *ARRA* will provide an unprecedented opportunity for states, LEAs, and early intervention service providers to implement innovative strategies to improve outcomes for infants, toddlers, children, and youths with disabilities while stimulating the economy. Under the *ARRA*, the *IDEA* recovery funds are provided under three authorities: $11.3 billion is available under Part B Grants to States; $400 million is available under Part B Preschool Grants; and $500 million is available under Part C Grants for Infants and Families. Preliminary information about each state's allocation is available at: http://www.ed.gov/about/overview/budget/Statetables/recovery.html. This Web site also provides information about the State Fiscal Stabilization Fund (SFSF) under the *ARRA*, which is separate from the *IDEA* recovery funds described in this fact sheet. This document focuses on Part B; additional information on Part C will be available shortly.

IDEA, Part B recovery funds are a key element of the ARRA principles as described below:

Overview of *ARRA*

Principles: The overall goals of the *ARRA* are to stimulate the economy in the short term and invest in education and other essential public services to ensure the long-term economic health of our nation. The success of the education part of the *ARRA* will depend on the shared commitment and responsibility of students, parents, teachers, principals, superintendents, education boards, college presidents, state school chiefs, governors, local officials, and federal officials. Collectively, we must advance *ARRA*'s short-term economic goals by investing quickly, and we must support *ARRA*'s long-term economic goals by investing wisely, using these funds to strengthen education, drive reforms, and improve results for students from early learning through college. Four principles guide the distribution and use of *ARRA* funds:

a. **Spend funds quickly to save and create jobs.** *ARRA* funds will be distributed quickly to states, LEAs and other entities in order to avert layoffs and create jobs. States and LEAs in turn are urged to move rapidly to develop plans for using funds, consistent with the law's

5543

reporting and accountability requirements, and to promptly begin spending funds to help drive the nation's economic recovery.

b. **Improve student achievement through school improvement and reform.** *ARRA* funds should be used to improve student achievement, and help close the achievement gap. In addition, the SFSF requires progress on four reforms previously authorized under the bipartisan Elementary and Secondary Education Act and the America Competes Act of 2007:

   1. Making progress toward rigorous college- and career-ready standards and high-quality assessments that are valid and reliable for all students, including English language learners and students with disabilities;

   2. Establishing pre-K-to college and career data systems that track progress and foster continuous improvement;

   3. Making improvements in teacher effectiveness and in the equitable distribution of qualified teachers for all students, particularly students who are most in need;

   4. Providing intensive support and effective interventions for the lowest-performing schools.

c. **Ensure transparency, reporting and accountability.** To prevent fraud and abuse, support the most effective uses of *ARRA* funds, and accurately measure and track results, recipients must publicly report on how funds are used. Due to the unprecedented scope and importance of this investment, *ARRA* funds are subject to additional and more rigorous reporting requirements than normally apply to grant recipients.

d. **Invest one-time *ARRA* funds thoughtfully to minimize the "funding cliff."** *ARRA* represents a historic infusion of funds that is expected to be temporary. Depending on the program, these funds are available for only two to three years. These funds should be invested in ways that do not result in unsustainable continuing commitments after the funding expires.

Awarding *IDEA* Part B Grants to States and Preschool Grants Recovery Funds

- The Department of Education plans to award 50 percent of the *IDEA*, Part B Grants to States and Preschool Grants recovery funds to SEAs by the end of March 2009. The other 50 percent will be awarded by Oct. 1, 2009. These awards will be in addition to the regular Fiscal Year (FY) 2009 Part B Grants to States and Preschool Grants awards that will be made on July 1 (Grants to States and Preschool Grants) and Oct. 1, 2009 (Grants to States only). Together, these grant awards will constitute a state's total FY 2009 Part B Grants to States and Preschool Grants allocations.
- A state does not need to submit a new application to receive the first 50 percent of the Part B Grants to States and Preschool Grants recovery funds because these funds will be made available to each state based on the state's eligibility established for FY 2008 Part B funds. The assurances in the state's FY 2008 application will apply to these recovery funds. In order to receive the remaining 50 percent of *IDEA*, Part B recovery funds, a state must

- The additional *IDEA* funds provided under the *ARRA* do not increase the amount a state would otherwise be able to reserve for state administration or other state-level activities under its regular grants to states FY 2009 award.
- LEA eligibility for the first 50 percent of the *IDEA* recovery funds is based on eligibility established by the LEA for FY 2008 funds.
- In accordance with the goals of the *ARRA*, a state should obligate *IDEA* recovery funds to LEAs expeditiously. A state should make the Part B Grants to States and Preschool Grants recovery funds that it receives in March available to LEAs by the end of April 2009.
- Similarly, an LEA should use the *IDEA* recovery funds expeditiously. An LEA should obligate the majority of these funds during school years 2008–09 and 2009–10 and the remainder during school year 2010–11. States may begin obligating *IDEA*, Part B recovery funds immediately upon the effective date of the grant. All *IDEA* recovery funds must be obligated by Sept. 30, 2011.

Uses of *IDEA*, Part B Recovery Funds

All *IDEA* recovery funds must be used consistently with the current *IDEA*, Part B statutory and regulatory requirements and applicable requirements in the *General Education Provisions Act* (*GEPA*) and the Education Department General Administrative Regulations (EDGAR). An LEA must use *IDEA* recovery funds only for the excess costs of providing special education and related services to children with disabilities, except where *IDEA* specifically provides otherwise.

- The *IDEA* recovery funds constitute a large one-time increment in *IDEA*, Part B funding that offers states and LEAs a unique opportunity to improve teaching and learning and results for children with disabilities. Generally, funds should be used for short-term investments that have the potential for long-term benefits, rather than for expenditures the LEAs may not be able to sustain once the recovery funds are expended. Some possible uses of these limited-term *IDEA* recovery funds that are allowable under *IDEA* and aligned with the core reform goals for which states must provide assurances under SFSF include:
    - Obtain state-of-the art assistive technology devices and provide training in their use to enhance access to the general curriculum for students with disabilities.
    - Provide intensive district-wide professional development for special education and regular education teachers that focuses on scaling-up, through replication, proven and innovative evidence-based school-wide strategies in reading, math, writing and science, and positive behavioral supports to improve outcomes for students with disabilities.
    - Develop or expand the capacity to collect and use data to improve teaching and learning.
    - Expand the availability and range of inclusive placement options for preschoolers with disabilities by developing the capacity of public and private preschool programs to serve these children.
    - Hire transition coordinators to work with employers in the community to develop job placements for youths with disabilities.

Invitation for Waivers

- The Secretary intends to issue regulations to allow reasonable adjustments to the limitation on state administration expenditures to help states defray the costs of *ARRA* data collection requirements.

***IDEA*, Part B Fiscal Issues**

- An LEA may be able to reduce the level of state and local expenditures otherwise required by the *IDEA* LEA maintenance of effort (MOE) requirements. Generally, under section 613(a)(2)(C), in any fiscal year that an LEA's *IDEA* allocation exceeds the amount the LEA received in the previous year, under certain circumstances, the LEA may reduce the level of state and local expenditures by up to 50 percent of the amount of the increase, as long as the LEA uses those freed-up local funds for activities that could be supported under the *ESEA*. If an LEA takes advantage of this provision, the required MOE for future years is reduced consistent with the reduction it took, unless the LEA increases the amount of its state and local expenditures on its own. SEAs should encourage LEAs that can and do take advantage of this flexibility to focus the freed-up local funds on one-time expenditures that will help the state make progress on the goals in the SFSF program, such as improving the equitable distribution of effective teachers and the quality of assessments. SEAs will be expected to collect and report information on the use of the freed-up funds.
- Alternatively, an LEA may (or in some cases must) use up to 15 percent of its total *IDEA*, Part B Grants to States and Preschool Grants for early intervention services for children in grades K through 12 who are not currently identified as children with disabilities, but who need additional academic and behavioral support to succeed in a general education environment. However, an LEA may use only up to 15 percent of its allocation minus any amount (on a dollar-for-dollar basis) by which the LEA reduced its required state and local expenditures under section 613(a)(2)(C).
- State-level MOE may be waived under Part B of the *IDEA* by the Secretary of Education on a state-by-state basis, for a single year at a time, for exceptional or uncontrollable circumstances, such as a natural disaster or a precipitous and unforeseen decline in the financial resources of a state. LEA-level MOE may not be waived.
- With prior approval from the Secretary of Education, a state or LEA may count SFSF (but not *IDEA* recovery funds) under the *ARRA* that are used for special education and related services as non-federal funds for purposes of determining whether the state or LEA has met the *IDEA*, Part B MOE requirements. (See separate fact sheet on SFSF for more information.)

Accountability Principles

As with all federal funds, states and LEAs are responsible for ensuring that the *IDEA*, Part B recovery funds are used prudently and in accordance with the law.

- *ARRA* requires that recipients of funds made available under that act separately account for, and report on, how those funds are spent and the results of those expenditures.

5546

- The President and the Secretary are committed to ensuring that *ARRA* dollars are spent with an unprecedented level of transparency and accountability. The administration will post reports on *ARRA* expenditures on the Recovery.gov Web site.

Additional Information

- The Department will provide updates as additional information becomes available regarding the details of the *IDEA* recovery funds.
- The Department will also provide further information on the government-wide data collection and reporting requirements as this information becomes available.
- If you have questions about these provisions or ideas you would like to share about innovative ways these funds could be used to improve teaching and learning, please e-mail them to: IDEARecovery.Comments@ed.gov. While we will not be able to respond to every question, all questions will be compiled and considered as we develop further guidance and Q and A documents.

Alaska Special Education Funding for 2009-2010
And
The American Recovery and Reinvestment Act of 2009

- Current Federal Funding for Title VI-B and Section 619 Preschool Disabled
  - The Application is on-line
  - DEED provided a "NOTICE of Grant Application" on 3-10-2009
    - Funding amounts are "estimated" at 80% of the district's 08-09 funding levels.
    - The funding for 09-10 will likely be the same as 08-09
  - Must abide by general assurances.
  - USE OF FUNDS defined by state and federal regulations.

- Additional funding from the American Recovery and Reinvestment Act (ARRA)
  - The best information available can be found at http://www.ed.gov/recovery/
    - This information was provided to district in a 3-11-2009 email from Erik Stimpfle
    - These documents are Preliminary Guidelines by the USDOE regarding the use of ARRA funding.
      - The American Recovery and Reinvestment Act of 2009: Saving and Creating Jobs and Reforming Education (Mar 7, 2009)
      - State Fiscal Stabilization Fund (Mar 7, 2009)
      - Title I, Part A Recovery Funds for Grants to Local Educational Agencies (Mar 7, 2009)
      - Individuals with Disabilities Education Act (IDEA) Recovery Funds for Services to Infants, Toddlers, Children and Youth with Disabilities (Mar 7, 2009)
      - The American Recovery and Reinvestment Act of 2009: Education Jobs and Reform (Feb 18, 2009)
      - Budget Information, Including State Allocations

  - IDEA Funding
    - Likely to be nearly the same as 08-09 funding. ***See attached schedules for Title VI-B and Section 619 Preschool Disabled.***
    - Alaska DEED must determine HOW TO Award
      - Notification by USDOE by 3-31-2009
      - Notification by AK DEED to Districts by 4-15-2009
        - Districts will likely add the ARRA funding to the 2009-2010 grant application and award with separate funding codes as appropriate.
    - Districts should be aware of and familiar with the Assurances as noted in the US-DOE guidance documents (above)
    - Districts should be aware of appropriate USE of FUNDS

USE OF FUNDS:

- These ARRA funds constitute a large one time increment in IDEA Part B funding
- Generally these funds should be used for short term investments that have the potential for long term benefits.
- These funds are allowable under IDEA and aligned with the core reform goals that states and LEAs must provide assurances.

Four principles guide distribution of the ARRA funds.

a. **Spend funds quickly to save and create jobs.** *ARRA* funds will be distributed quickly to states, LEAs and other entities in order to avert layoffs and create jobs. States and LEAs in turn are urged to move rapidly to develop plans for using funds, consistent with the law's reporting and accountability requirements, and to promptly begin spending funds to help drive the nation's economic recovery.
b. **Improve student achievement through school improvement and reform.** *ARRA* funds should be used to improve student achievement, and help close the achievement gap. In addition, the SFSF requires progress on four reforms previously authorized under the bipartisan Elementary and Secondary Education Act and the America Competes Act of 2007:
    1. Making progress toward rigorous college- and career-ready standards and high-quality assessments that are valid and reliable for all students, including English language learners and students with disabilities;
    2. Establishing pre-K-to college and career data systems that track progress and foster continuous improvement;
    3. Making improvements in teacher effectiveness and in the equitable distribution of qualified teachers for all students, particularly students who are most in need;
    4. Providing intensive support and effective interventions for the lowest-performing schools.
c. **Ensure transparency, reporting and accountability.** To prevent fraud and abuse, support the most effective uses of *ARRA* funds, and accurately measure and track results, recipients must publicly report on how funds are used. Due to the unprecedented scope and importance of this investment, *ARRA* funds are subject to additional and more rigorous reporting requirements than normally apply to grant recipients.
d. **Invest one-time *ARRA* funds thoughtfully to minimize the "funding cliff."** *ARRA* represents a historic infusion of funds that is expected to be temporary. Depending on the program, these funds are available for only two to three years. These funds should be invested in ways that do not result in unsustainable continuing commitments after the funding expires.

Some possible USE of Funds:

1. Obtain state-of-the art assistive technology devices and provide training in their use to enhance access to the general curriculum for students with disabilities. ***Use Assistive Technologies of Alaska (ATLA) or SESA as a resource for these types of materials an interventions.***
2. Provide intensive district-wide professional development for special education and regular education teachers that focuses on scaling-up, through replication, proven and innovative evidence-based school-wide strategies in reading, math, writing and science, and positive behavioral supports to improve outcomes for students with disabilities. ***RTI, PBIS, are critical areas of need.***
3. Develop or expand the capacity to collect and use data to improve teaching and learning. ***School-Wide Information Systems and systems to do self and focused monitoring.***
4. Expand the availability and range of inclusive placement options for preschoolers with disabilities by developing the capacity of public and private preschool programs to serve these children.
5. Hire transition coordinators to work with employers in the community to develop job placements for youths with disabilities. ***Develop stronger coordinated or collaborative effort with DVR.***

RE: HB 199

Dear Finance Committee Members:

The City of Homer appreciates this opportunity to share our thoughts regarding funding through the American Recovery and Reinvestment Act. We will limit our comments here to one topic: ARRA funding for energy efficiency, renewable energy, and energy conservation.

Homer was the first community in Alaska to complete an inventory of its energy use and consider the impacts both in terms of financial costs and greenhouse gas emissions. The City Council adopted a Climate Action Plan in December 2007 and has been working since then to implement the plan.

Increasing energy efficiency of buildings and use of local renewable energy are major components of the Climate Action Plan. We are also seeking to increase energy conservation and recently adopted an employee policy guide to help accomplish this goal.

As you might imagine, securing funding to carry out building retrofits, other energy efficiency and conservation measures, and renewable energy initiatives is a major challenge. We recognize that these efforts represent an investment that will pay off in the long run, but it is nevertheless difficult to cover up-front costs in these challenging financial times. (Currently, we are anticipating a 40% reduction in local tax revenues in the next budget year.)

We strongly urge the Alaska Legislature to accept all available ARRA funding for the Energy Efficiency and Conservation Block Grant program, the State Energy Program, and for weatherization assistance.

We further urge the Legislature to fund the Alaska Energy Authority renewable energy grant program at the full $50 million expressed in intent language last year. We were informed just this week that our proposed Kachemak Bay Tidal Power project has been recommended for funding by AEA; however, it will likely not be funded unless the Legislature restores the program to the full $50 million funding level for FY 2010.

Homer wants to do its part to reduce the financial burden associated with fossil fuel consumption, reduce the environmental impacts, reduce the nation's dependence on foreign oil, and help with the economic recovery by putting Americans to work in the emerging fields of energy efficiency and renewable energy. We ask for your help in this important endeavor.

Sincerely,

CITY OF HOMER

Walt Wrede

March 25, 2009

All legislators,

The Anchorage School Board passed the enclosed resolution Monday night urging the legislature and the governor to accept the available education funds under the American Recovery and Reinvestment Act. I believe that most of you support this and urge your continued support for the legislation on this issue.

I can assure you that Superintendents and School Boards know how to invest these funds in support of our neediest students and their families. We have many families who are in dire straits in our schools, and their children are coming to us with many challenges which often impede their opportunities to learn. We know that we can invest these two years of funding in a way that we will not incur expenses of a continuing nature. We do this all the time with grants, which have expirations and finite completion dates. If a program or staffing situation is proving to be an excellent one, then most of us make the decision to reduce the budget in another area in order to keep a program.

As all of you know, the federal government has underfunded special education since its inception in 1975. The additional stimulus funding in this area will allow us to increase our training for all of our staff so they can better meet the needs of these students in the regular classroom. We can invest in much needed assistive technology and the supporting teacher aides, and enhance parental outreach. We recognize that to meet the individualized and mandated needs takes adequate staff; this will allow us to hire the staff and NOT take away resources from our non-disabled students. We know NOT to commit to permanent staffing after the two year period of the stimulus funding.

I appreciate your consideration of our request and I will be happy to answer any questions you might have.

Sincerely yours,

Carol Comeau

ANCHORAGE SCHOOL BOARD
ASDR 2008-2009-13

A RESOLUTION REQUESTING
ALASKA'S ACCEPTANCE OF EDUCATION FUNDS UNDER
THE AMERICAN RECOVERY AND REINVESTMENT ACT

WHEREAS, Congress has passed the American Recovery and Reinvestment Act (ARRA), making federal funds available to the states to stimulate the national economy through investment and support in key state and local government services; and

WHEREAS, education is a key service for which federal funding is available under the ARRA, particularly targeting areas already regulated by, but not fully funded by, the federal government under Title I of the Elementary and Secondary Education Act and under the Individuals with Disabilities Education Act (IDEA); and

WHEREAS, although ARRA funds are intended to save or create jobs, they are also designed to help school districts develop innovative programs to improve academic performance; and

WHEREAS the limited duration of ARRA education funds poses a legitimate concern and need to ensure that such funds do not create an unsustainable fiscal obligation or expectation on state and local resources that outlasts and outweighs the benefits of ARRA funding; and

WHEREAS, school districts throughout Alaska, including the Anchorage School District, have begun to plan for creative and productive use of funds available under ARRA, fully recognizing their limited duration; and

WHEREAS, ARRA education funding could be used across Alaska to contribute significantly toward increasing student achievement and reducing the dropout rate through limited-term efforts with long-lasting effects, all the while stimulating the state and local economies at a time when employment is otherwise depressed; and

WHEREAS, the potential for such long-lasting educational benefits is enormous, while the Department of Education and Early Development and local school districts are fully capable of, and their school boards fully accountable for, avoiding fiscal obligation or expectation after the ARRA funds are no long available; and

WHEREAS, the Anchorage School District and other districts in Alaska have already proven this capability and accountability through extensive prior experience, receiving and wisely using one-time federal and state grant funds without committing to, or creating undue public expectation of, future spending once those grants expire; and

WHEREAS, with ARRA education funds available, the Department of Education and Early Development could, if necessary, work with local districts to develop additional principles and criteria to ensure that ARRA funding does not obligate or pressure districts to spend additional local or state money after ARRA funding expires; and

WHEREAS, the Anchorage School Board's Minority Education Concerns Advisory Committee recently passed a resolution supporting the acceptance of ARRA education funds; and

WHEREAS, rejection of Alaska's share of ARRA education money would not reduce federal stimulus spending, but only divert to schools in other states money that rightfully should be used to strengthen the education of some of Alaska's neediest students and schools ;

NOW, THEREFORE, BE IT RESOLVED that the Anchorage School Board urges Governor Palin and the Alaska Legislature to take all action necessary to ensure that the State of Alaska can and will receive the full amount of stimulus funds for education available under the American Recovery and Reinvestment Act.

PASSED AND APPROVED by the Anchorage School Board this 23rd day of March, 2009.

Alaska Head Start Association

Support Brings Success!

AHSA Leadership Council

Represented by Grantee Agency Directors, Staff, Parents, and Friends of Head Start in communities throughout Alaska

March 23, 2009

Dear Senator or Representative,

On behalf of the 17 Head Start grantees across the state of Alaska, who provide services in over 100 communities, the Alaska Head Start Association (AHSA) is encouraging you to consider accepting further ARRA funding that can benefit the State of Alaska.

We are aware of the importance and need to very closely examine the use of these funds and to carefully weigh how our long term state budget will be impacted. However, we believe that there are many potential opportunities for one-time or short term projects that could have a tremendous positive impact in the communities we serve.

One especially relevant example is the use of the State Fiscal Stabilization Fund (SFSF) intended to be used for educational purposes. Within the language describing these funds the following statement is found:

States must use 81.8 percent of SFSF funds for the support of public elementary, secondary, and higher education, and, as applicable, ***early childhood education programs and services****.*

AHSA believes that these funds represent an unprecedented opportunity for Alaska to support badly needed capital investments in Head Start. The state has not provided capital support for facilities or buses in the past, although many Head Start children are served every year with State funds. These SFSF capital funds could be invested on a one time basis to build new centers and purchase new buses. They would not require future state funding. Smaller investments of SFSF funds could support weatherization improvements, pay for deferred maintenance and facility repairs, or fund the purchase of materials needed to extend the life of our current buses.

Many of the other ARRA items that the Governor has proposed to reject can also directly improve the quality of life for many of our children and families. In particular Title 1, School Lunch Program, WIC, Immunizations, Infant Learning, Public Safety and Child Support Enforcement dollars all offer important resources and supports for families.

AHSA requests that the legislature consider utilizing these funds. We have vast challenges throughout our state, and we believe that these funds can help to strengthen families and prepare young children for school success.

Thank you for your continued advocacy for children and families in our state. Please contact your local Head Start grantee if you have any questions.

Sent: Sunday, March 22, 2009 7:00 PM
To: Rep. Mike Hawker
Subject: Independent Living and DVR stimulus funds in jeopardy

Dear Representative Hawker,
Alaskans with disabilities need your help...this past week Governor Palin suggested rejecting all the funding for Independent Living (IL) and Vocational Rehabilitation (VR) that is allotted for Alaska in the stimulus package - more than $1.8 million.

It is my understanding that her rationale rests in not wanting to "grow" government or create expectations that the State carry-on funding in future years at stimulus levels. We get that. We also get that this is a tremendous opportunity to provide one-time services that would make a lifelong difference for Alaskans with disabilities. We fully understand these monies are allocated for one-time projects and are prepared to use the funds in that manner. In fact, the governor-appointed State Independent Living Council discussed multiple one-time projects during the most recent meeting in Juneau. Some suggestions included one-time ramp-building projects or installing video-conferencing technologies for VR and IL offices.

Concerning the IL funding:
I urge you to support acceptance of the $242,913 that was allocated for Independent Living programs in the American Recovery and Reinvestment Act. These funds would be used to provide valuable services directly to many Alaskans with disabilities which would enable them to continue living in their home communities.

Concerning the Voc Rehab funding:
I urge you to support acceptance of the $1,800,000 that was allocated to Alaska's Vocational Rehabilitation Program in the American Recovery and Reinvestment Act. These funds would be used to provide valuable services to help Alaskans with disabilities secure and maintain employment.

Anything you can do to bring these monies to Alaska would be greatly appreciated.

March 20, 2009

Representative Mike Hawker
State Capitol Rm 505
Juneau AK 99801-1182

Dear Representative Hawker:

I am writing to you on behalf of the Alaska Association of School Administrators (AASA) to strongly urge you to support the legislative acceptance of the education portion of the American Recovery and Reinvestment Act. AASA's members are dismayed at the Governor's decision to reject these funds.

Governor Palin rightly expressed concern for the potential that this money will cause district level programmatic or personnel changes that would be difficult to sustain at the end of the two year stimulus window. However, after corresponding with superintendents throughout Alaska, it is clear that they understand Governor's reservation and have plans for spending the money in a way that will not leave their districts in a vulnerable position. Further, the Department of Education and Early Development would provide quality control over the money through their established process that is used for distribution of all federal money. That is, a district would have to submit a plan for DEED's approval prior to being awarded money.

If accepted, the funds would be used by school districts for new, innovative activities including: staff training for working with students with disabilities, preschool opportunities, increasing technological infrastructure, and teacher induction services. As you know, many of our school districts are experiencing financial hardship because of the extremely high cost of energy; this money will allow districts to offer some of what they cannot afford.

Thank you for considering this request to accept the education portion of the state's stimulus money. I know that the state's most needy children will benefit from this funding.

Sincerely,

Steve Atwater
President

Subject: Stimulus Funding

Dear Rep. Hawker,

Thank you for the support you have given to Alaskans with disabilities in the past. We at the Statewide Independent Living Council and at the four Alaskan Centers for Independent Living have always used your support wisely to assist Alaskans who experience mental, physical and emotional disabilities. We have helped thousands, across the state, to remain in their homes, working and living as valued members of their communities.

I urge you now to support acceptance of the $242,913 that was allocated for Independent Living programs in the American Recovery and Reinvestment Act. I also urge your support for the $1,800,000 that was allocated to Alaska's Vocational Rehabilitation Program, and the $3,170 that was allocated for Older Blind Programs. These funds would not be used to grow unsustainable government positions. Instead, these funds would be used to provide valuable, one-time services to many Alaskans who experience disabilities. Services such as job coaches, home accessibility modifications, adaptive equipment and other goods and services would enable these Alaskans to continue living and working in their home communities.

Please let me know if you have any questions concerning our programs. We look forward to working with you in the future.

Sincerely,

Andi Nations
Executive Director
Alaska State Independent Living Council, Inc.

Subject: Governor refuses ARRA funds

Dear House Finance Committee,

I sent the email below to the Governor just now, expressing outrage at the refusal of ARRA nutrition funds. I urge you to take rapid action to override the Governor's decision.

Dear Governor Palin,

We at Food Bank of Alaska were appalled to learn through the Anchorage Daily News today that you have chosen to refuse federal economic stimulus package funds that would help feed our neighbors. Given that 13% of the Alaskan population accesses food assistance each year, and that food pantries across the state have seen 30% increases in requests for food in the past two years, our State needs to use every tool at its disposal to ensure adequate nutrition.

The funding that you are refusing includes:
- **The Emergency Food Assistance Program, $50,000.** These funds pay for shipping federal commodities to rural communities such as Emmonak. Since you traveled to Western Alaska last month and experienced the need, we are stunned that you would not take every possible action to provide food assistance to our rural neighbors.
- **School Lunch Program, $300,000.** Since food prices have skyrocketed in the past year, school districts are struggling to provide lunches to low income children. We can't understand why you would choose to endanger meals for children.
- **Supplemental Nutrition Assistance Program, $500,000.** Formerly known as Food Stamps, this program serves the most needy families in Alaska by providing monthly funds restricted to food purchase. Nearly 57,000 individual Alaskans receive benefits through this program. SNAP is urgently in need of more caseworkers to better serve Alaskans.
- **WIC, $800,000.** The Women, Infants and Childrens program serves the most vulnerable - low income pregnant and postpartum women and children under the age of 5 - and it universally lauded as one of the most successful federal programs of all time. This program needs more resources now to keep up with the increasing demand for nutrition assistance.
- **Senior Meals, $500,000.** 10% of people receiving food assistance are seniors. You visited Food Bank of Alaska right before Thanksgiving in 2008; if you had had the opportunity to visit the Thanksgiving Blessing food distribution project, you would have seen hundreds of low income seniors, living on a fixed income, seeking food assistance. As a State, we need more resources, not fewer, to ensure that our elders have enough to eat.

Some of the ARRA funding is unsustainable, it is true; it will disappear in a few years. However, we need to do everything RIGHT NOW to prevent widespread hunger. By choosing not accept these funds, you are condemning our neighbors to several needless years of deprivation.

Subject: Stimulus funds could employ blind Alaskans

Dear Representative Hawker,
At the Alaska Center for the Blind & Visually Impaired, we were dismayed to learn that Governor Palin plans to reject stimulus funds meant for **vocational rehabilitation** in the Department of Labor. Some of this money could be used to put to work Alaskans who are blind and visually impaired – a group that already experiences a 60% rate of unemployment. Especially in these tough economic times, turning away money meant to help employ people with disabilities is more than unfair.

Rejecting dollars that can meet needs now because we're not sure how to meet similar needs in the future only digs the hole deeper.

Our agency's volunteer Board of Directors and management understand that one-time money is not ongoing and will certainly take this into account in planning for use of any stimulus funding from the Alaska Division of Vocational Rehabilitation. While it lasted, however, we would be able to help people who would not have the chance otherwise to be self-supporting and to use their talents to enrich our state.

I urge you to work with other legislators to overturn the Governor's decision before the April 3 deadline.

Thank you for your consideration of this urgent matter,

Karla Jutzi

March 26, 2009

Dear Committee Members:

Good afternoon Mr. Chairman and members of the committee. Thank you for this opportunity to testify. My name is Peggy Brown and I am the Executive Director of the Alaska Network on Domestic Violence and Sexual Assault. On behalf of the eighteen member programs that comprise the Network, I am here to request that you accept the federal economic stimulus money available through the American Recovery and Reinvestment Act of 2009 for CDVSA and STOP grants.

During this legislative session, many of you have been very cognizant of the direct correlation between economic distress and increased intimate partner violence. Several national studies funded by the National Institute for Justice reveal the causal link between employment instability, financial strain, and increased incidents of Intimate Partner Violence (IPV). Unfortunately, Alaska is no exception. As the economic downturn continues to drift to Alaska and unemployment rates continue to climb, we are seeing an increased number of victims seeking program services.

The purpose of the economic stimulus is to promote job growth and economic stability while the global, national and local economies rebound. The economic stimulus funds that we are seeking will do all of this. We will be able to fill existing staff vacancies, provide employment and training to people in urban areas, rural villages and small communities, throughout Alaska. I understand the committee's concern that if program services are expanded to meet the needs of Alaskans during this time, there will be an expectation in two years that the programs will need general funds to retain these services. However, this money will not be used to expand services, but only to absorb the impact of the economic downturn and the resulting increased need for services that the programs are already providing.

As I am sure you are aware, the economic downturn has an additional adverse affect on non-profits making it exceedingly difficult for many to meet their missions. With increasing debt burden and employment uncertainty, individuals are not able to continue their charitable giving to their local shelters, as they have in the past. Further, the stock market losses over the past year has significantly reduced, and in some cases, eliminated both foundational and private philanthropic giving. With these economic stimulus funds, member programs will be able to weather the economic storm, provide services to those directly affected by the economic downturn, while being able to focus on developing creative strategies, diligently pursuing and securing alternative funding through private foundations and grant sources as they become available again in the future.

I urge this committee to request the CDVSA program money and STOP grant money available through the ARRA. Thank you the opportunity to testify before you today.

Economic Distress and Intimate Partner Violence

The National Institute for Justice (NIJ) has funded a number of studies that look at aspects of economic distress, unemployment, neighborhood characteristics and Intimate Partner Violence (IPV) including studies that examine the relationship between:

- Employment instability and risk for IPV
- IPV and financial strain
- Repeat victimization and financial strain
- Financial strain and abusive relationships
- IPV victimization and employment stability
- Economic Disadvantage, Neighborhoods and IPV

A recent study looked at data from the National Survey of Families and Households to examine whether employment instability and financial strain were related to the risk for IPV against women. The study also looked at the relationship between feelings of financial strain and the likelihood of IPV.

Employment instability increases the risk for IPV

The study showed that for couples where the male was always employed, the rate of IPV was **4.7 percent**. When men experienced one period of unemployment the rate rose to **7.5 percent** and when men experienced two or more periods of unemployment the rate for IPV rose to **12.3 percent**.

Intimate partner violence is more likely to occur when couples feel financial strain

The same study showed that there was a strong relationship between subjective feelings of financial strain and the likelihood of IPV.

- The rate of IPV for couples experiencing low levels of subjective financial strain was **2.7** percent.
- The rate of IPV for couples experiencing high levels of subjective financial strain was **9.5** percent.

Repeat victimization of women is more frequent in couples feeling financial strain.

- Women in couples with low levels of financial strain report **less than 2 percent** of repeat victimizations or being injured by their male partner, while
- **Just over 5 percent** of women in couples with high levels of subjective strain report repeat victimizations or being injured by their male partner

Financial strain may keep women in abusive relationships.

Women at greatest risk of IPV tend to be those in couples with few economic resources, high subjective stress about finances, higher unemployment and proximity to economically disadvantaged neighborhoods. The choice to stay or leave violent relationships may be based on the decision that a partner's economic contribution to the relationship outweighs the risk of violence, and may compel women to live with men's violent behavior rather than seek help or take other steps to leave violent relationships.

Women who are victimized by IPV may experience unstable employment as a result.

One study examined the impact of intimate partner violence (IPV) on labor force participation. The study interviewed 1311 women in Illinois once a year for three years and found that:

- Women experiencing recent IPV (but not long past intimate violence) experienced unstable employment over the three year period.
- Women who were victims of recent IPV worked fewer months compared to women who were not abused during that period or were abused only in the past.
- Women who reported that they had been abused by their partner at time one rated their health as poorer and their need for mental health services as greater a year later as compared to non abused women.
- Women with abusive partners reported more stress related concerns and emotional problems. Additionally they reported more headaches, ulcers, and back problems than did non-abused women.
- Chronic IPV is associated with poor health.
- **Most notably:** IPV contributes to stress related physical and mental health problems for as long as a year after the abuse has occurred. In turn these health problems decrease women's ability to hold stable employment even as long as two years after the abuse has occurred.

Economic Disadvantage, Neighborhoods and IPV

Researchers examined two types of economic distress — employment instability and subjective financial strain and concluded that both are strong risk factors for intimate violence against women. This study defined employment instability as the number of periods of unemployment for men between waves of the National Survey of Families and Households (NSFH). Subjective financial strain was defined as perceptions of financial inadequacy and was operationalized by combining responses to questions about satisfaction with finances and questions regarding worry about money.

- Violence against women in intimate relationships occurred more often and was more severe in economically disadvantaged neighborhoods. According to a recent study the rate of IPV in economically disadvantaged neighborhoods is **8.7**

percent compared **with 4.3 percent** in more economically advantaged neighborhoods.

- Women living in disadvantaged neighborhoods were more than twice as likely to be the victims of intimate violence compared with women in more advantaged neighborhoods.
- Women who live in economically disadvantaged areas and while in relationships are struggling to make ends meet are at the greatest risk for IPV.
- African-Americans and whites with the same economic characteristics have similar rates of IPV however African-Americans have a higher overall rate of IPV due in part to higher levels of economic distress and residence in economically disadvantaged neighborhoods.
- Women in disadvantaged neighborhoods were more likely to be victimized repeatedly or injured severely by their partners than women who lived in more advantaged neighborhoods (**6% vs. 2%** respectively).

The link between individual economic stress and community economic disadvantage raises the possibility that these two conditions may combine or interact in ways to influence the risk of IPV against women.

Press Release

Contact Information:
Peggy Brown, Executive Director
pbrown@andvsa.org
(907) 586-3650
FOR IMMEDIATE RELEASE: February 13, 2009

(February 13, 2009) *Juneau, AK* – In a single day, more than **550** adults and children in Alaska sought services from domestic violence agencies. This startling data comes from the release of **Domestic Violence Counts:** the National Census of Domestic Violence Services (NCDVS). Conducted by the National Network to End Domestic Violence, the NCDVS is the most recent data documenting the number of victims who reach out for help.

550 Alaskans in a 24-hour period – that's more than could fit into the Anchorage Sheraton Hotel!

The NCDVS collected a national, unduplicated count of adults and children who received life-saving services from domestic violence programs on September 17, 2008. According to the Alaska Network on Domestic Violence and Sexual Assault (ANDVSA), all ANDVSA member programs participated in the census.

During the 24-hour survey period, more than **269 Alaskans** found refuge in emergency shelter or transitional housing; **281 Alaskans** received non-residential services such as counseling, legal advocacy and children's support groups. In addition, **73 hotline calls** were answered by local domestic violence advocates.

That's more than 3 hotline calls every hour!

"While these numbers provide advocates with tremendous insight into the need for domestic violence services, we know there are still victims out there who have not sought help," said Peggy Brown, Executive Director for ANDVSA. "We need to ensure resources are available to not only meet current needs, but to also increase public awareness so all victims know help is available."

Every year the National Network to End Domestic Violence (NNEDV) conducts a 24-hour survey of domestic violence programs across the country to gain a snapshot of domestic violence and service providers in the United States. Despite the many victims that received services, an additional 8,927 requests for assistance were unmet because of limited funding. In **Alaska** alone, nearly **50** requests for services such as transportation, childcare and counseling went unmet due to a shortage of either funds or staff.

5564

As in years past, this year's census paints an appalling picture of the problem. But even more disturbing is another picture: the frightening reality of a bad economy that impacts the victims of domestic violence.

"During these times of economic uncertainty, more victims are unable to meet basic needs. Finding employment and safe housing will continue to be increasingly difficult leaving women and children more vulnerable to violence," said Ms. Brown.

For more information about domestic violence and sexual assault services contact your local DV/SA program or visit the Alaska Network on Domestic Violence and Sexual Assault website at www.andvsa.org.

The National Census of Domestic Violence Services is available online at www.nnedv.org/census.

The American Recovery and Reinvestment Act of 2009:

A Guide for State and Local Governments

Prepared for The Council of State Governments by:
LATHAM & WATKINS LLP

The contents of this document constitutes legal information not legal advice. Persons or individuals seeking guidance on specific facts and circumstances related to this memorandum should seek counsel.

Introduction

President Obama signed the American Recovery and Reinvestment Act of 2009 (the ARRA) into law on February 17, 2009, advancing an ambitious plan to revitalize the nation's economy. This $787 billion package seeks to stimulate economic growth through federal spending on such programs as education, energy, health care, housing, and transportation.

The ARRA provides funds for a wide array of public and private actors, including federal entities. This paper summarizes key opportunities for state, local, territorial, and tribal governments to secure federal support through the ARRA. This includes direct funding as well as opportunities to act as a conduit for funds to constituents. Many of the provisions in the ARRA increase funding for existing programs. This paper summarizes current law where appropriate, but assumes familiarity with such existing programs.

This paper is not intended as a comprehensive guide to any particular program, but is intended as a general summary of the law to help identify funding opportunities for further inquiry. Any organization or entity interested in a specific program or opportunity referenced in this paper should seek additional information from the relevant government agencies, and consult with competent counsel to determine applicable legal requirements in a specific situation.

Time is an important consideration in evaluating opportunities under the ARRA. By 45 days after the date of enactment (April 3, 2009), state governors (or in some cases, state legislatures) must certify that their states will request and use funds and that these activities will create jobs and economic growth. The ARRA emphasizes rapid expenditure by imposing deadlines for application and disbursement and granting priority to projects that can use funds quickly. Therefore, authorities that are able to take quick action will benefit most from the new funding. Any date contained in this paper is either explicitly set forth in the text of the ARRA or is calculated based on the number of calendar days from the enactment thereof. Dates determined by calculating the number of days from enactment of the ARRA are determined without regard to whether the date falls on a weekend or federal holiday and, therefore, are necessarily estimates. Legal counsel should be consulted to determine these dates with certainty.

Many provisions of the ARRA do not provide guidance on the distribution of funds provided therein. In the coming weeks, relevant government agencies will issue guidance regarding application and disbursement of funds under their jurisdiction.

Latham & Watkins LLP has prepared this paper on behalf of The Council of State Governments. All or part of this document has been or may be used in other materials published by the authors or their colleagues at Latham & Watkins and may be updated or changed in other materials. The information contained in this document is published by Latham & Watkins for the convenience of its client and should not be construed as legal advice. This document is not intended to be relied upon by third-parties. Should further analysis or explanation of the subject matter of this document be required, please contact any of the authors listed above.

1. EDUCATION AND FISCAL STABILIZATION

A. Fiscal Stabilization Fund - $53.6 billion

State Allocations - ***$48.318 billion***
[A.XIV] [1]

- The ARRA provides funds, awarded by the Secretary of Education, for grants to states based on their relative populations, for elementary, secondary, and higher education, public safety, and other government services. The Secretary will award 61 percent of the funds to states based on their relative populations of individuals aged 5 through 24, and will award the remaining 39 percent of the funds based on states' relative total populations. The Secretary can reserve up to $14 million of these funds for administration and oversight of the program.

  - **Fiscal Stabilization Funds for Education.** State must dedicate **$39.5 billion** (81.8 percent) of these funds to elementary, secondary, and higher education. These funds must be used first to restore state support of primary, secondary, and higher education through 2011 to the greater of 2008 or 2009 levels, and also must follow existing formula increases for elementary and secondary fiscal support for 2010 and 2011.

  - **General Fiscal Stabilization Funds.** States may use the remaining **$8.8 billion** (18.2 percent) of the funds to support any public safety or other government service, including education. *States have total discretion in the use of these funds, so long as their use is for some government service and is not otherwise prohibited by law.*

  - Funds that are not subgranted or otherwise committed within two years must be returned to the Secretary of Education to be reallocated to the remaining states based on the proportion set forth above.

- If states choose to dedicate a portion of their grants to institutions of higher education, states cannot consider the mission or type of institution in making awards. An institution is eligible so long as it is an "institution of higher education" under the Higher Education Act of 1965 (HEA); 42 U.S.C. §§ 2751 *et seq.*, and if it continues to be eligible to participate in programs under Title IV of that Act.

- Each governor must apply for his or her State's allotment of funds under this program. Applications must describe how the funds will be used and make five required assurances (Allocation Assurances) to the Secretary of Education that, in accordance with various other statutes, the state will: (1) maintain fiscal support of elementary, secondary, and higher education through 2011 at least at 2006 levels; (2) improve teacher effectiveness and equity in teacher distribution; [2] (3) establish a longitudinal data system; [3] (4) enhance academic standards and assessments; [4] and (5) support struggling schools.[5]

---

The contents of this document constitutes legal information not legal advice. Persons or individuals seeking guidance on specific facts and circumstances related to this memorandum should seek counsel.

*State Incentive Grants/Innovation Funds - **$5 billion***
[A.XIV]

- The ARRA provides $5 billion to fund state incentive grants and an Innovation Fund. Of the total amount, the Secretary of Education may dedicate up to $650 million to local educational agencies through the Innovation Fund.

- **State Incentive Grants**. The Secretary of Education has discretion to award grants in FY 2010 to states that make significant progress in fulfilling and improving upon the goals identified in Allocation Assurances 2 through 5 made in connection with the state's application for its allocation of funds under this program. State applications for incentive grants must, in addition to satisfying the requirements of applications for state allocations under this program, show how such grants will help the state further meet the goals of Allocation Assurances 2 through 5.

  - The Secretary of Education can evaluate applications under Allocation Assurances 2 through 5 and under any other criteria chosen by the Secretary, such as a state's financial need to meet such assurances.

  - States that receive incentive grants must give at least 50 percent of the grants to local educational agencies in subgrants based on the local agencies' relative shares of funding under part A of title I of the Elementary and Secondary Education Act of 1965 (ESEA); 20 U.S.C. §§ 6301 *et seq.* for the most recent fiscal year.

- **Innovation Fund**. The ARRA provides that the Secretary of Education has discretion to award innovation grants to local education agencies or partnerships between non-profit organizations and local educational agencies or schools, so that grantees can expand their work, partner with private sector and philanthropic community organizations, and document best practices.

  - To be eligible for an award, an entity must: (1) have made significant gains in closing the achievement gap as described in section 1111(b)(2) of the ESEA; 20 U.S.C. § 6311(b)(2)(B); (2) have exceeded the state's annual objectives from section 1111(b)(2) of the ESEA for two consecutive years or have increased student achievement for all student groups described in that section through another measure such as those described in 1111(c)(2) of the ESEA; 20 U.S.C. § 6311(b)(2)(C)(v); (3) have made significant improvements demonstrated by data in other areas such as graduation rates or teacher recruitment; and (4) demonstrate partnerships with private sector or philanthropic groups which agree to match the innovation grant funds.

  - If a local educational agency cannot meet the above criteria for eligibility, the agency can partner with an eligible philanthropic organization.

*Fiscal Stabilization Funds for Outlying Areas - **$268 million***
[A.XIV]

- The Secretary of Education will also award grants to outlying areas for educational purposes after consultation with the Secretary of the Interior. There is no specified application process. Grants will be awarded based on each area's respective needs as determined at the discretion of the Secretary of Education.

The contents of this document constitutes legal information not legal advice. Persons or individuals seeking guidance on specific facts and circumstances related to this memorandum should seek counsel.

Fiscal Stabilization General Rules and Restrictions

- These rules and restrictions apply to the Fiscal Stabilization funds, Division A, Title XIV, including the three areas outlined immediately above.
- The Secretary of Education may determine the time, manner, and information required for applications. The governor shall submit all applications on behalf of a state. Each state receiving funds under this title must file annual reports in the manner and containing the information as determined by the Secretary, including the uses of funds, distribution of funds, estimated job creation, estimated tax increases averted, and state progress in specified education initiatives.
- No funds can be used for financial assistance (vouchers) for students to attend private elementary or secondary schools.
- If necessary to relieve fiscal burdens on states and local agencies, the Secretary may waive or modify any requirement of this title relating to maintenance of fiscal effort.

Uses of Funds by Local Educational Agencies

- **Allowed**. Any activity authorized by the ESEA, the Individuals with Disabilities in Education Act (IDEA), the Adult and Family Literacy Act, or the Perkins Act; and modernization, renovation, or repair of public school facilities, including projects consistent with a recognized green building rating system.
- **Prohibited**. Maintenance costs; modernization; renovation, or repair of stadiums; purchasing vehicles; and improvements to stand-alone non-educational facilities.

Uses of Funds by Public Institutions of Higher Education

- **Allowed**. Uses that mitigate the need to raise tuition and fees for in-state students and modernization, renovation, or repair of public school facilities—including projects consistent with a recognized green building rating system.
- **Prohibited**. Increases to an institution's endowment; maintenance of systems, equipment, or facilities; and modernization, renovation, or repair of sports or religious facilities.

B. Other Educational Funds

*Education for the Disadvantaged - **$13 billion***
[A.VIII]

- The ARRA provides:
  - **$5 billion** in additional funds for targeted grants to local educational agencies under section 1125 of the ESEA, to be distributed as set forth in 20 U.S.C. § 6337. Local

educational agencies are eligible to receive targeted grants as set forth in 20 U.S.C. § 6335.

- **$5 billion** in additional funds for education finance incentive grants to states under section 1125A of the ESEA. *See* 20 U.S.C. § 6337.

- **$3 billion** in additional funds for school improvement grants to states under section 1003(g) of the ESEA (20 U.S.C. § 6303(g)) for distribution as subgrants to local educational agencies to assist in school improvements satisfying the requirements set forth in 20 U.S.C. § 6316.

- Local educational agencies receiving funds are required to file with the state educational agency a school-by-school listing of per-pupil expenditures from state and local sources during the 2008-2009 academic year no later than December 1, 2009. In turn, the state educational agency must report that information to the Secretary of Education by March 31, 2010.

*Special Education - **$12.2 billion***
[A.VIII]

- The ARRA provides additional funding for grants to states to carry out parts B and C of the IDEA: **$11.3 billion** for section 611 of the IDEA; **$400 million** for section 619 of the IDEA; and **$500 million** for part C of the IDEA. *See generally* 20 U.S.C. §§ 1400 *et seq.*; 34 C.F.R. §§ 300 *et seq.*

- If every state reaches its maximum allocation under section 611(d)(3)(B)(iii) of the IDEA, remaining funds will be proportionally allocated to each state subject to the maximum amounts contained in section 611(a)(2) of the IDEA.

- By July 1, 2009, the Secretary of Education will reserve the amount needed for state Incentive Grants under section 643(e) of the IDEA, with any remaining funds to be allocated to the states in accordance with section 643(c) of the IDEA.

- The total amount, under this and all other acts, available for each of sections 611(b)(2) and 643(b)(1) of the IDEA ("Outlying Areas and Freely Associated States; Secretary of the Interior" under Part B and "Payments to Indians" under Part C) must be equal to the amount available for that section during FY 2008 increased by the amount of inflation as specified in section 619(d)(2)(B) of the IDEA.

*School Improvement Programs - **$720 million***
[A.VIII]

- The ARRA provides:

  - **$650 million** in additional funds to states for subgrants to local educational agencies and local entities pursuant to the Enhancing Education through Technology program. *See generally* ESEA, Title II, Part D, Subpart 1; 20 U.S.C. § 6761 *et seq.*

  - **$70 million** in additional funds for grants under subtitle B of title VII of the McKinney-Vento Homeless Assistance Act to each state in proportion to the number of homeless students identified by the state during the 2007-2008 school year relative to the number of such children identified nationally during that period. The Secretary of Education

The contents of this document constitutes legal information not legal advice. Persons or individuals seeking guidance on specific facts and circumstances related to this memorandum should seek counsel.

must distribute the McKinney-Vento funds to states within 60 days of the date of enactment (by April 18, 2009).

- Each state must award the McKinney-Vento funds as subgrants to local educational agencies no later than 120 days after receiving such funds from the Secretary of Education. State educational agencies must subgrant such funds to local educational agencies on a competitive basis or according to a formula based on the number of homeless students identified by the local educational agencies in the state.

Innovation and Improvement - ***$200 million***
[A.VIII]

- The ARRA provides $200 million for distribution to states, local educational agencies, institutions of higher learning and other public and private agencies for educational innovation and improvement pursuant to the Fund for the Improvement of Education. *See generally* ESEA, Title V, Part D, Subpart 1; 20 U.S.C. §§ 7243 *et seq*. Funds must be expended as directed in the fifth, sixth, and seventh provisos under the heading "Innovation and Improvement" in the Department of Education Appropriations Act, 2008.

Impact Aid - ***$100 million***
[A.VIII]

- The ARRA provides that the Secretary of Education will make construction payments and will award school facility emergency and modernization grants to local educational agencies as set forth in section 8007 of title VIII of the ESEA. *See* 20 U.S.C. § 7707. No further details are provided.

Pell Grants - ***$15.64 billion***
[A.VIII]

- The ARRA provides additional funds to address program shortfalls and increase the maximum grant allowed.

Student Financial Assistance - ***$200 million***
[A.VIII]

- The ARRA provides funding for grants to institutions of higher education to assist in the operation of work-study programs under the HEA.

Higher Education - ***$100 million***
[A.VIII]

- The ARRA provides additional funding for teacher quality enhancement grants to states and eligible partnerships on a competitive basis under part A of title II of the HEA. *See generally* 20 U.S.C. §§ 1021 *et seq*.

NSF Research and Related Activities - ***$2.5 billion***
[A.II]

- *See* Technology and Science.

*National Institute of Standards and Technology Research Facilities - **$360 million***
[A.II]

- *See* Technology and Science.

*Institute of Education Sciences - **$250 million***
[A.VIII]

- The ARRA provides additional funding for competitive grants to state educational agencies for statewide longitudinal data systems as set forth in section 208 of the Educational Technical Assistance Act. *See* 20 U.S.C. § 9607.

- Funds may be used for statewide data systems that include postsecondary and workforce information, of which up to $5 million may be used for state data coordinators and for awards to public or private organizations or agencies to improve data coordination.

2. EMERGENCY MANAGEMENT

*Firefighter Assistance Grants - **$210 million***
[A.VI]

- Federal Emergency Management Agency (FEMA) administers grants to fire stations through the Assistance to Firefighters Grants (AFGs). The ARRA adds an additional $210 million in the form of AFGs for construction or modification of state and local fire authorities. FEMA can reserve $5 million for program administration.

- To ensure that FEMA distributes these grants to as many fire stations as possible, FEMA cannot award an AFG for over $15 million.

Federal Fire Prevention and Control Act Grants
[A.VI]

- The ARRA waives the cost-sharing requirements for all grants under the Federal Fire Prevention and Control Act (15 U.S.C. § 2229(a)) for FY 2009 and FY 2010.

*Public Transportation and Railroad Security Assistance - **$150 million***
[A.VI]

- The ARRA provides an additional $150 million for Public Transportation and Railroad Security Assistance. The FEMA currently awards grants to state and local governments, among other entities, for security-related expenses under the Implementing Recommendations of the 9/11 Commission Act (the 9/11 Act). *See* 6 U.S.C. §§ 1135, 1163.

- Public Transportation Security Assistance grants are available for public transportation agencies, but agencies must first develop a security plan or undergo a security assessment under section 1135 of the 9/11 Act.

- State and local governments will have to compete for Railroad Security Assistance grants with railroad carriers, owners of railroad cars, Amtrak, the Alaska Railroad, and offerors of security-sensitive materials who ship by railroad.

The contents of this document constitutes legal information not legal advice. Persons or individuals seeking guidance on specific facts and circumstances related to this memorandum should seek counsel.

*Port Security Grants - **$150 million***
[A.VI]

- FEMA currently awards risk-based grants to port authorities, facility operators, and state and local governments. *See* 46 U.S.C. § 70107. The ARRA provides an additional $150 million for Port Security Grants, and waives state and local cost-sharing requirements for these additional funds.

*Emergency Food and Shelter Grants - **$100 million***
[A.VI]

- FEMA administers grants for state and local governments, and non-profit institutions, to provide food and shelter to homeless individuals, under the McKinney-Vento Homeless Assistance Act. *See* 42 U.S.C. § 11331. The ARRA provides an additional $100 million for this program. The Emergency Food and Shelter Program National Board, which consists of directors of national charities, distributes the funds.

Disaster Assistance Direct Loan Program
[A.VI]

- FEMA provides loans to local governments under the Robert T. Stafford Disaster Relief and Emergency Assistance Act. *See* 42 U.S.C. § 5121. For loans in response to 2008 disasters, the ARRA amends the ceiling for disaster assistance loans from 25 percent of a local government's annual operating budget to 50 percent, and allows loans to exceed $5 million, provided the local government has experienced a 25 percent or greater loss in tax revenue.

- The ARRA provides that the cost of such loans is to be determined based on the definitions provided in the Congressional Budget Act. *See* 2 U.S.C. § 661(a).

*Wildland Fire Management Grants - **$250 million***
[A.VII]

- The ARRA provides an additional $250 million to the Forest Service to be distributed as grants to state and private organizations for hazardous fuel reduction, forest health, and ecosystem improvement projects on state and private forests. (Another $250 million is designated for federal lands.) Up to $50 million can be used to make wood-to-energy grants to promote increased utilization of biomass from federal, state, and private lands.

- These additional grants are not subject to matching or cost sharing requirements.

3. EMPLOYMENT AND FAMILY SERVICES

A. Unemployment Compensation

Extension of Emergency Unemployment Compensation Program
[B.II]

- The ARRA extends the period for which individuals can be eligible for extended unemployment benefits under the Unemployment Compensation Extension Act of 2008

The contents of this document constitutes legal information not legal advice. Persons or individuals seeking guidance on specific facts and circumstances related to this memorandum should seek counsel.

(Public Law 110-252; 26 U.S.C. § 3304 note) from March 31, 2009, to December 31, 2009. Pursuant to the ARRA, states can receive funds, as directed by the Secretary of Labor, to cover the extended unemployment benefits and the administrative costs of the extension. Benefits may be paid as late as May 31, 2010. The funds provided under this section need not be repaid.

Increase in Unemployment Compensation Benefits
[B.II]

- The ARRA provides an additional, federally funded, $25 weekly unemployment benefit available to all individuals receiving any form of state unemployment compensation benefit. States must distribute this benefit on the same weekly basis as any regular unemployment compensation otherwise payable, and without changing their benefit formulas in a way that would subsume this additional benefit. Also, the additional benefit must be disregarded in determining income eligibility for Medicaid and State Children's Health Insurance Program (SCHIP).

- Under the ARRA, a state will be eligible to pay the additional compensation to individuals upon entering into an agreement with the Secretary of Labor, for weeks of unemployment beginning at the agreement and ending before January 1, 2010. In turn, the state will receive funds for the total amount permitted under the agreement and for administrative expenses. Payments will be made to states on a monthly basis, and the funds need not be repaid. A state can terminate an agreement with 30 days' written notice.

Special Transfers for Unemployment Compensation Modernization - Up to ***$7 billion***
[B.II]

- The ARRA provides "incentive payments" to states which agree to amend their unemployment compensation laws to provide more generous base-period calculations and adopt less restrictive grounds for disqualifications based on availability of and applicants' search for work. The maximum incentive payment allowable for a state will be calculated by multiplying $7 billion by the same ratio as required for excess funds under the Reed Act, 42 U.S.C. § 1103.

- This section of the ARRA provides that one-third of the incentive payment will be contingent on the state's adoption of a more generous base period for determining eligibility for unemployment benefits. This revised base-period calculation would include the most recently completed calendar quarter before the start of the benefit year for at least those individuals that would not otherwise be eligible for unemployment compensation (UC) under state law by using a different base period. If a state qualifies for the first one-third of the ARRA incentive payment, it will be eligible for the remaining two-thirds of the payment if it adopts more lenient disqualification standards for unemployment compensation and pays higher allowances to eligible UC recipients with dependents, as specified under ARRA § 2003.

- The Secretary of Labor is required to issue rules regarding state law modernization provisions within 60 days after enactment (by April 18, 2009). The Secretary has 30 days after receiving a complete application to determine if states are eligible for modernization incentive payments.

- States must have permanent laws in place, or set to take effect within 12 months, that contain the revised provisions. The Secretary of Labor will determine whether a state's laws meet the stated requirements. All incentive payments must be made before October

The contents of this document constitutes legal information not legal advice. Persons or individuals seeking guidance on specific facts and circumstances related to this memorandum should seek counsel.

1, 2011, and all applications must be submitted after the date of enactment but not later than the date necessary for final payment to be made before October 1, 2011.

Special Transfers for Unemployment Compensation - ***Up to $500 million***
Modernization – Special Transfer in FY 2009
for Administration
[B.II]

- In addition to any other amounts awarded, states agreeing to make changes to their laws receive funds for administrative costs of carrying out the changes, for improved outreach of UC-eligible individuals, for improvement of unemployment benefit or unemployment tax operations, and for staff-assisted reemployment services for UC claimants. The states' portion of the $500 million, calculated by a statutory formula, is transferred to the states' accounts in the Unemployment Trust Fund within 30 days of the date of enactment (by March 19, 2009).

- The Secretary of Labor may set rules for carrying out this subsection.

Full Federal Funding of Extended Unemployment Compensation for a Limited Period
[B. II]

- The Federal-State Extended Unemployment Compensation Act of 1970 (EUCA) established an Extended Benefit (EB) program that extends receipt of Unemployment Benefits (UB) at the state level if certain economic conditions exist within the state. The ARRA temporarily eliminates state cost-sharing for extended unemployment compensation benefits for states that are eligible for EB under the EUCA, from the date of enactment through January 1, 2010. States may opt to extend eligibility until June 1, 2010, with respect to those workers who receive extended compensation after enactment and before January 1, 2010.

- This provision of the ARRA temporarily allows states to award EB to individuals who qualified for, but exhausted, benefits under the 2008 Extended Unemployment Compensation Act, even if the individual has received benefits past the state-determined benefit year (usually 52 weeks). The existing one-week waiting period for extended benefit compensation remains suspended until the week ending before May 30, 2010.

B. Temporary Assistance for Needy Families (TANF)

Emergency Fund for TANF Program - ***$5 billion***
[B.II]

- The ARRA provides $5 billion in new funds over two years to the TANF block-grant program to states and tribes experiencing increased cash welfare caseloads. States with separate state programs funded with TANF state maintenance of effort dollars are also eligible for grants from the fund, as are states with increased short-term non-recurrent benefit expenditures or increased subsidized employment expenditures under TANF and separate state programs. Grantees are subject to funding caps from the emergency fund, which is repealed as of October 1, 2010.

Extension of TANF Supplemental Grants
[B.II]

- The ARRA extends through FY 2010 $319 million in supplemental grants to 17 states that have high rates of population growth or historically low federal welfare allocations relative to their existing poverty levels. The ARRA extends these supplemental grants by amending section 7101(a) of the Deficit Reduction Act of 2005, as amended by section 301(a) of the Medicare Improvements for Patients and Providers Act of 2008. 42 U.S.C. §§ 1305 *et seq.*

- The 17 states that qualify for supplemental grants are: Alabama ($11.1 million); Alaska ($6.9 million); Arizona ($23.9 million); Arkansas ($6.2 million); Colorado ($13.6 million); Florida ($60.0 million); Georgia ($37.3 million); Idaho ($3.5 million); Louisiana ($17.0 million); Mississippi ($9.0 million); Montana ($1.1 million); Nevada ($3.7 million); New Mexico ($6.6 million); North Carolina ($36.1 million); Tennessee ($21.6 million); Texas ($52.7 million); and Utah ($8.7 million).

Clarification of Authority of States to Use TANF Funds Carried Over From Prior Years to Provide TANF Benefits and Services
[B.II]

- The ARRA allows states to use reserve TANF funds for any TANF benefit, service, or activity.

C. Trade Act Provisions

Administrative and Case Management Funds for Trade Act Training
[B.I]

- The ARRA provides additional funds for states to defray administrative and case management expenses incurred in providing training under section 236 of the Trade Act of 1974 (Trade Act). States will receive an additional payment equal to 15 percent of the funds they would normally receive.

- The ARRA also provides a lump sum payment of $350,000 to each state for the same purposes described above. States may decline this payment and return the funds to the Secretary of Labor.

*Training Funding - **$853.75 million***
[B.I]

- The ARRA amends section 236 of the Trade Act by increasing funds to states for training as defined in section 236(a)(2) of that act. The ARRA provides $575 million for FY 2009 and FY 2010, and $143.75 million for the period beginning October 1, 2010 and ending December 31, 2010.

- The Secretary of Labor must make an initial distribution of training funds to the states as soon as practicable based on: (1) the trend in numbers of certified workers (as defined in the Trade Act); (2) the trend in numbers of workers participating in training; (3) the number of workers enrolled in training; (4) the estimated amount of funding needed to provide approved training; and (5) other factors the Secretary determines are appropriate.

The contents of this document constitutes legal information not legal advice. Persons or individuals seeking guidance on specific facts and circumstances related to this memorandum should seek counsel.

The initial distribution must not be less than 25 percent of the initial distribution to any individual state in the previous fiscal year.

- In making an initial distribution of funds, the Secretary of Labor must hold in reserve 35 percent of the funds for that fiscal year in order to provide for additional distributions. However, not less than 90 percent of the available funds must be distributed by July 15 of that fiscal year.

- Upon a state's request, the Secretary of Labor may distribute funds held in reserve if additional training funds are deemed necessary. The Secretary will establish procedures for the distribution of additional funds. These procedures must be issued not later than one year after the date of enactment (by February 17, 2010).

Trade Adjustment Assistance for Communities - ***$150 million***
[B.I]

- The ARRA provides grants for "eligible communities" (those affected by trade) to undertake projects to adjust to the impact of trade. Grant application is a two-step process:

  - First, a community (city, county, other state political subdivision, or consortium thereof) must petition the Secretary of Commerce to be designated as an "eligible community" and will be so designated if (1) there is a certification that workers, firms, or agriculture commodity producers are eligible for adjustment assistance under the Trade Act, 19 U.S.C. § 2371; and (2) the community is significantly affected by the threat to, or the loss of, jobs associated with that certification. *See* ARRA § 1872 (amending Trade Act § 273(b)(3)).

  - Second, an eligible community may apply for a grant (not exceeding $5 million) by submitting a description of its strategic plan to adjust to trade and the particular project therein to be funded. The community itself must fund at least 5 percent of the project. Priority will be given to small and medium-sized communities.

- Communities may also apply for grants ($56.25 million out of the $150 million authorized) to help develop the strategic plan, which must contain several enumerated components, such an analysis of the community's economic development and its capacity for adjustment. *See* ARRA § 1872 (amending Trade Act § 276(b)-(c)).

- The Secretary of Commerce will establish additional rules for grant applications.

Community College and Career Training Grants - ***$90 million***
[B.I]

- The ARRA amends chapter 4, subchapter B of the Trade Act, and authorizes the Secretary of Labor to award Community College and Career Training grants to eligible institutions (as defined in section 102 of the Higher Education Act (20 U.S.C. § 1002)). The provision authorizes, but does not appropriate, $90 million for the program. Institutions are eligible for only one grant, not to exceed $1 million.

- No later than June 1, 2009, the Secretary of Labor will issue guidelines for the submission of grant proposals. Proposals must include a detailed description of: (1) the specific project for which the proposal is submitted, including the manner in which the funds will be used to develop, offer, or improve an education or career training program that is suited to

The contents of this document constitutes legal information not legal advice. Persons or individuals seeking guidance on specific facts and circumstances related to this memorandum should seek counsel.

workers eligible for training under section 236 of the Trade Act; (2) the extent to which the project will meet the education and career training needs of workers in the community served by the eligible institution who are eligible for training under section 236 of the Trade Act; (3) the extent to which the project fits within any overall strategic plan developed by an eligible community under section 276 of the Trade Act; (4) the extent to which the project relates to any project funded by a Sector Partnership Grant awarded under section 279A of the Trade Act; and (5) any previous experience of the institution in providing education or career training programs to workers eligible for training under section 236 of the Trade Act.

- The absence of any previous experience in providing training to section 236 workers will not automatically disqualify an institution from receiving a grant.

- In order to be considered by the Secretary of Labor for a grant, the eligible institution must demonstrate that it has reached out to employers described in section 276(a)(2)(B) of the Trade Act to identify any shortcomings in existing training opportunities within the community, and has reached out to similarly situated institutions or eligible partnerships in the community to identify appropriate best practices and to avoid duplication of efforts. Institutions must provide a detailed description of such efforts.

*Industry or Sector Partnership Grant Program for Communities Impacted by Trade - **$90 million** [B.I]*

- The ARRA amends chapter 4, subchapter C of the Trade Act and authorizes, but does not appropriate, $90 million for grants to facilitate efforts by industry or sector partnerships to strengthen and revitalize industries and create employment opportunities for workers in communities impacted by trade.

- The program contemplates the establishment of partnerships between a private industry or sector within the community, state and local governments, local workforce investment boards (as established under section 117 of the Workforce Investment Act of 1998 (29 U.S.C. § 2832)), labor organizations, and educational institutions. The partnership is to be directed by a "lead entity," defined as an entity designated by the partnership to be responsible for submitting a grant proposal, or as a state agency designated by the governor of a state.

- The lead entity of a partnership must submit a grant proposal to the Secretary of Labor. Proposals must: (1) identify the members of the partnership; (2) identify the targeted industry or sector for which the partnership intends to carry out projects; (3) describe the partnership's goals; (4) describe the projects the partnership will undertake to achieve its goals; (4) demonstrate that the eligible partnership has the organizational capacity to carry out such projects; (5) explain whether the community impacted by trade has sought or received a community grant under section 275 of the Trade Act, a Community College and Career Training Grant under section 278, or funds pursuant to any other federally funded training project, and explain how the partnership will coordinate the use of Sector Partnership Grants with the use of other grants to avoid duplication of effort; and (6) include performance measures, based on those issued by the Secretary.

- Only one grant may be awarded to a partnership. The grant must not exceed $2.5 million, unless the partnership is located in a community impacted by trade that is not served by an institution receiving a Community College and Career Training Grant, in which case the maximum grant is $3 million.

The contents of this document constitutes legal information not legal advice. Persons or individuals seeking guidance on specific facts and circumstances related to this memorandum should seek counsel.

- Projects eligible for grant awards must be carried out within three years. No later than one year after receiving a Sector Partnership Grant, and three years thereafter, the lead entity must submit to the Secretary of Labor a report containing a detailed description of the progress made toward achieving the goals elaborated in the original grant proposal, and a detailed description of the expenditure of grant funds.

D. Other Employment and Family Service Provisions

Workforce Investment Programs - ***$3.95 billion***
[A.VIII]

- The Department of Labor, Employment and Training Administration administers funds under the Workforce Investment Act (29 U.S.C. § 2801). The ARRA adds $3.95 billion to these funds, which are available in the form of grants to state and local governments, in addition to non-profits, between the date of enactment (February 17, 2009) and June 30, 2010. The ARRA allows local workforce investment boards to contract with institutions of higher education if this would boost enrollment in training programs for high-demand occupations. Of the additional funds provided by the ARRA:
  - **$500 million** is designated for adult employment and training programs. States must give priority for inclusion in these programs to recipients of public assistance and other low-income individuals, as defined in 29 U.S.C. § 2864.
  - **$1.2 billion** is designated for youth job training programs. The maximum age is increased to twenty-four. None of these funds are to be reserved for youth opportunity grants pursuant to 29 U.S.C. § 2852.
  - **$1.25 billion** is designated for employment and training programs for dislocated workers.
  - **$200 million** is designated for the national reserve for assistance to dislocated workers.
  - **$50 million** is designated for the YouthBuild program, which provides housing-construction skills to at-risk youth. In 2009, YouthBuild programs can include high school drop-outs who have enrolled in an alternative school.
  - **$750 million** is designated for competitive grants for worker training and placement in high-growth and emerging industry sectors. Of this total, $500 million is designated for training and placement in energy efficiency and renewable energy jobs, as defined in 29 U.S.C. § 2916. The Secretary of Labor shall give priority in awarding the remaining $250 million for programs that train and place workers in the health care sector.

Children and Family Services Programs - ***$3.15 billion***
[A.VIII]

- The ARRA provides $3.15 billion for children and family services programs as follows:
  - **$1 billion** for Head Start grants under the Head Start Act (42 U.S.C. § 9831). Grants are available to state and local governments, as well as for-profit and non-profit organizations.

The contents of this document constitutes legal information not legal advice. Persons or individuals seeking guidance on specific facts and circumstances related to this memorandum should seek counsel.

- **$1.1 billion** for Early Head Start, which provides funding for infants and toddlers under § 645(A) of the Head Start Act (42 U.S.C. § 9840a). Grants are available for state and local governments and for-profit and non-profit organizations.

- **$1 billion** for Community Service Block Grant programs under the Community Service Block Grant Act (42 U.S.C. § 9901). For such grants provided by the ARRA during FY 2009 and FY 2010, states can increase the income eligibility ceiling for receipt of services from 125 percent to 200 percent of the federal poverty level.

- **$50 million** for unspecified spending under section 110 of the Social Security Act (42 U.S.C. § 1310), which provides grants to states and local organizations.

*Child Care and Development Block Grants - **$2 billion***
[A.VIII]

- The ARRA makes additional funds available for grants to state programs that provide low-income families and public-assistance recipients with child care so that parents can work or attend work-training or education classes. The ARRA requires that such grants be used to supplement, not supplant, state funding for child care assistance to low-income families.

- Of the total, **$255,186,000** is designated for activities such as programs to improve consumer education, parental choice, and the quality and availability of child care. **$93,587,000** of this amount is designated for programs that improve the quality of infant and toddler care.

- The grants are administered by the Department of Health and Human Services, Administration for Children and Families, under the Child Care and Development Block Grant Act (42 U.S.C. § 9858).

*Rehabilitation Services and Disability Research - **$680 million***
[A.VIII]

- The ARRA provides additional funding for grants to states to carry out the Vocational Rehabilitation Services program under the Rehabilitation Act of 1973 (Rehabilitation Act):

  - **$540 million** for grants to state vocational rehabilitation agencies under part B of title I of the Rehabilitation Act. *See generally* 29 U.S.C. §§ 720 *et seq*.

  - **$140 million** for Independent Living programs, per parts B and C of chapter 1 and chapter 2 of title VII of the Rehabilitation Act, including $18.2 million for grants to states; $87.5 million for independent living centers; and $34.3 million for services for older blind individuals. *See generally* 29 U.S.C. §§ 796 *et seq*.

- The ARRA eliminates state cost-sharing for the use of these additional funds for vocational rehabilitation services.

*State Unemployment Insurance and Employment Services Grants - **$400 million***
[A.VIII]

- The ARRA provides funds for grants for unemployment insurance and employment services made available to the states through September 30, 2010, by the Department of Labor, Employment and Training Administration.

The contents of this document constitutes legal information not legal advice. Persons or individuals seeking guidance on specific facts and circumstances related to this memorandum should seek counsel.

- Grants will be distributed according to the formula found in section 6 of the Wagner-Peyser Act (29 U.S.C. § 49). This formula allots two-thirds of grant monies based on the ratio of civilian laborers in each state to the total in all the states; the remaining one-third is allotted based on the ratio of the unemployed in each state to the total in all states.

- The Secretary of Labor must designate $250 million of the total for reemployment services for unemployment insurance claimants.

*Job Corps Centers - **$250 million***
[A.VIII]

- The Department of Labor, Office of Jobs Corps, currently oversees Job Corps Centers, which provide education and vocational training for eligible individuals between the ages of 16 and 24. Pursuant to section 147 of the Workforce Investment Act (29 U.S.C. § 2887), the Secretary of Labor currently selects operators for Jobs Corps Centers from applications submitted by federal, state, local, and private entities.

- The ARRA allocates an additional $250 million to the Office of Job Corps for the construction, rehabilitation, and acquisition of these Job Corps Centers. The Secretary of Labor may allocate up to 15 percent of these funds to Jobs Corps Centers for operation, which may include training for careers in energy efficiency, renewable energy, and for environmental protection agencies.

- These funds are available from the date of enactment (February 17, 2009) and remain available for obligation through June 30, 2010.

*Corporation for National and Community Service Programs - **$154 million***
[A.VIII]

- The Corporation for National and Community Service (CNCS) manages a series of volunteer programs, including AmeriCorps and Senior Corps, under the Domestic Volunteer Service Act (42 U.S.C. § 4950) and the National and Community Service Act (42 U.S.C. § 12501). In addition, the CNCS provides grants to national, state, and local governments, as well as non-profits, for performing volunteer programs.

- The ARRA provides an additional **$89 million** for existing AmeriCorps grantees, including state and local governments, and allows these funds to be used for increases in grants made prior to September 30, 2010, if the Chief Executive Officer for CNCS deems it appropriate to waive the cost-sharing requirements.

- The ARRA provides an additional **$65 million** for the AmeriCorps Volunteers in Service to America (VISTA) program. State and local governments, as well as non-profit organizations, can obtain this money by applying for grants for local service projects.

*Community Service Employment for Older Americans Grants - **$120 million***
[A.VIII]

- The ARRA increases the amount available for grants to state and local governments and non-profit organizations that provide work training to Americans over age 55, administered by the Department of Labor, Employment and Training Administration, under the Older Americans Act (42 U.S.C. § 3001). Funds are available only to existing 2008 grantees.

The contents of this document constitutes legal information not legal advice. Persons or individuals seeking guidance on specific facts and circumstances related to this memorandum should seek counsel.

- The Department of Labor will automatically increase the amount of 2008 grants within 30 days of the date of enactment (by March 19, 2009). Grantees must spend additional amounts before July 1, 2010, or unspent funds may be recaptured and reallocated by the Secretary.

Temporary Resumption of Prior Child Support Law
[B.II]

- Under current law, the federal government provides incentive payments to states to encourage them to develop and implement effective child support enforcement (CSE) programs. *See* 42 U.S.C. § 655(a)(1). The ARRA temporarily provides federal matching for federal CSE incentive funds that are reinvested back into state CSE programs or related activities. Federal matching funds for child support incentive payments are to be provided for FY 2009 and FY 2010.

4. ENERGY

*Weatherization Assistance Program - **$5 billion***
[A.IV]

- The Department of Energy currently provides grants to states for distribution to low-income homes to purchase and install materials and implement other weatherization measures to improve energy efficiency under the Weatherization Assistance Program, 42 U.S.C. §§ 6861 *et seq*. The ARRA expands the number of households eligible for assistance by increasing eligibility levels to households at or below 200 percent of the federal poverty level and increasing maximum assistance to $6,500. States can also receive funding for the administrative costs of retaining technical professionals to develop strategies to implement their weatherization program.

- Under the existing program, states must submit an annual application to the Department of Energy requesting available funds and identifying the number of dwelling units to be weatherized, relevant climate conditions, and other factors. 42 U.S.C. § 6864. A state also must provide reasonable assurances to the Department that it has: (1) established a broadly-representative policy advisory council with appropriate qualifications to channel funding for weatherization projects; (2) established priorities to govern the provision of weatherization assistance to low-income persons, and established methods to prioritize assistance to elderly and handicapped low-income persons; and (3) has selected non-profits and other agencies to undertake weatherization activities in an open, public process. Although there is no maintenance of effort provision tied to fiscal year, states applying for weatherization funds are required to make certain additional assurances regarding the level of state and local funding to be provided. 42 U.S.C. § 6864.

- If a state fails to submit an application to the Department of Energy for weatherization assistance, any unit of general purpose local government or a community action agency carrying out weatherization programs may submit an application in lieu of the state. 42 U.S.C. § 6864(c).

- The Secretary of Energy may impose reporting requirements on funding recipients.

The contents of this document constitutes legal information not legal advice. Persons or individuals seeking guidance on specific facts and circumstances related to this memorandum should seek counsel.

*Energy Efficiency and Conservation Block Grants - **$3.2 billion***
[A.IV]

- The ARRA will provide $3.2 billion for grants to states and local governments to develop and implement energy efficiency and conservation strategies. The Department of Energy will distribute the funds to states participating in the Energy Efficiency and Conservation Block Grants Program. *See* Energy Independence and Security Act of 2007, 42 U.S.C. §§ 17151-58. The Department has not yet published rules governing this program.

- Of the funds provided by the ARRA, **$2.8 billion** will be automatically distributed by statutory formula, which takes into account population and other factors. 42 U.S.C. § 17153. The remaining $400 million is available through a competitive grant program.

- Funding can be used to conduct energy audits, perform energy efficiency retrofits, implement more efficient energy distribution technologies, develop or install renewable energy technologies, and incentivize energy efficiency improvements in the private sector. Grantees may use up to the greater of 20 percent or $250,000 of funds to establish revolving loan funds and the same amount to provide subgrants to assisting non-government organizations.

- Applicants must provide DOE with a proposed energy efficiency and conservation strategy within one year of receiving funding. DOE must approve the proposed plan within 120 days or return it to the community for revision.

- Grantees must provide DOE with a report detailing the implementation of its Energy Efficiency and Conservation Strategy, as well as realized energy efficiency gains, no later than two years after the date on which funds were initially provided.

*State Energy Programs - **$3.1 billion***
[A.IV]

- The ARRA provides $3.1 billion in additional funds for the Department of Energy to distribute as grants to applicant states to assist in preparing and implementing comprehensive state energy conservation plans (State Energy Programs), pursuant to the Energy Policy and Conservation Act of 1975. 42 U.S.C. § 6321; 10 C.F.R. §§ 420.1-.38.

- The ARRA conditions grants to a state upon certification by the governor that: (1) the state utility commission will implement polices that ensure the state-regulated electric and gas utilities have appropriate financial incentives to help their customers reduce energy use (i.e., the "decoupling" of a utility's revenues from energy consumption);[6] and (2) the state, or the applicable unit of local government, will implement energy codes for residential and commercial buildings that meet or exceed certain conservation and efficiency standards. States also are required to prioritize funding to energy efficiency and renewable energy projects, such as building retrofits.

[6] Whereas the House version of the bill provided a clear mandate to decouple, the ARRA is less definite, merely requiring the governor to certify that the state *will* take certain actions that seem to amount to decoupling.

The contents of this document constitutes legal information not legal advice. Persons or individuals seeking guidance on specific facts and circumstances related to this memorandum should seek counsel.

Alternative Fueled Vehicles Pilot Grant Program - **$300 million**
[A.IV]

- The ARRA provides an additional $300 million to the Department of Energy's Energy Efficiency and Renewable Energy program for an existing Alternative Fueled Vehicles Pilot Grant program for state and local governments or metropolitan transportation authorities.

Wildland Fire Management Grants - ***$265 million***
[A.VII]

- *See* Emergency Management.

Workforce Investment Programs: Energy Efficiency and Renewable Energy Jobs - ***$500 million***
[A.VIII]

- *See* Employment and Family Services.

5. ENVIRONMENT AND NATURAL RESOURCES

Clean and Drinking Water State Revolving Funds - ***$6 billion***
[A.VII]

- The Environmental Protection Agency currently provides capitalization grants to states and tribal organizations to fund water quality protection projects and infrastructure improvements in drinking-water systems under the Federal Water Pollution Control Act (FWPCA) (33 U.S.C. § 1251) and the Safe Drinking Water Act (SDWA) (42 U.S.C. § 300), respectively. The ARRA provides an additional $4 billion for the Clean Water State Revolving Fund and an additional $2 billion for the Drinking Water State Revolving Fund, and waives state and local matching and cost-sharing requirements for these additional grants under the program.

- Priority will be given to projects that are ready to begin construction within 12 months of the date of enactment (by February 17, 2010). Projects must be under contract or construction within 12 months; otherwise, the Administrator will recapture and reallocate funds under this program.

- Each state must use 20 percent of its grants for green infrastructure, water and energy efficiency, water quality improvements, wastewater treatment, storm water runoff mitigation, or water conservation, unless a state lacks sufficient applications from eligible projects.

- These grants cannot be used to purchase either land or easements. They can, however, be used to restructure the debt obligations of grant recipients, but only if this debt was incurred on or after October 1, 2008.

Bureau of Reclamation Water Resources Projects - ***$1 billion***
[A.IV]

- The ARRA provides an additional $1 billion to the Bureau of Reclamation of the Department of the Interior for water and related resources infrastructure projects under a variety of its programs. Bureau of Reclamation projects are generally funded through a

The contents of this document constitutes legal information not legal advice. Persons or individuals seeking guidance on specific facts and circumstances related to this memorandum should seek counsel.

combination of state and federal funds. The Department of the Interior, after collaboration with states, submits project or program proposals to Congress for funding through the appropriations process.

- The Secretary of the Interior has unlimited reprogramming authority with respect to the funds appropriated to Bureau of Reclamation projects. However, the Secretary of the Interior must file quarterly reports describing the expenditure of funds under this program, beginning no later than 45 days after the date of enactment (by April 3, 2009).

- ARRA funds that may provide assistance to state water resources include:

  - **$126 million** for water reclamation and reuse projects authorized under Title XVI of the Reclamation Projects Authorization and Adjustment Act of 1992. Under this program, Reclamation States receive federal funding to assist in the construction of wastewater reclamation and reuse feasibility and demonstration projects.

  - **$50 million** that may be transferred to the Department of the Interior for programs, projects, and activities implemented under the Central Utah Project Completion Act.

  - **$50 million** that may be used for programs, projects, and activities authorized by the California Bay-Delta Restoration Act. This program funds flood control projects and other measures designed to improve the overall health of San Francisco Bay. Under the existing program, federal funds may not exceed 33 percent of project costs, a provision that appears to be unaltered under the ARRA.

  - At least **$60 million** that must be used for rural water projects, primarily water intake and treatment facilities.

- Other funds available under this appropriation can be used under existing authority to fund extraordinary maintenance and replacement activities.

*Army Corps of Engineers Construction Projects - **$2 billion***
[A.IV]

- The ARRA provides an additional $2 billion to the Army Corps to allocate to construction projects. Army Corps projects are generally funded through a combination of state and federal funds, and are selected through collaboration among governments.

- These funds are only to be used for programs, projects, and activities that receive funding in legislation making appropriations for energy and water development. At least $200 million of these funds must be spent on water-related environmental infrastructure assistance.

- The funds are not subject to current cost-overrun rules, which may erect barriers to additional federal funding once an initial project amount has been approved. Eligible projects must not require the creation of new budget authority.

The contents of this document constitutes legal information not legal advice. Persons or individuals seeking guidance on specific facts and circumstances related to this memorandum should seek counsel.

Army Corps of Engineers Mississippi River and Tributaries Program - ***$375 million***
[A.IV]

- The ARRA provides $375 million in additional funding to the Army Corps for eligible projects under the Mississippi River and Tributaries program. Army Corps projects are generally funded through a combination of state and federal funds, and are selected through collaboration among governments.

- These funds are only to be used for programs, projects, and activities that receive federal appropriations for energy and water development. Like the funds appropriated to general construction projects, appropriations under this program are not subject to cost-overrun rules, but must not require the creation of new budget authority.

- The Secretary of the Army has unlimited reprogramming authority with respect to the funds appropriated to this program. However, the Secretary must file quarterly reports describing the expenditure of funds under this program, beginning no later than 45 days after the date of enactment (by April 3, 2009).

Army Corps of Engineers Operation and Maintenance Projects - ***$2.075 billion***
[A.IV]

- The ARRA provides $2.075 billion in additional funding to the Army Corps for Operation and Maintenance projects. Army Corps projects are generally funded through a combination of state and federal funds, and are selected through collaboration among governments.

- These funds are only to be used for programs, projects, and activities that receive federal appropriations for energy and water development. Projects funded under this appropriation must not require the creation of new budget authority.

- The Secretary of the Army has unlimited reprogramming authority with respect to the funds appropriated to this program. However, the Secretary must file quarterly reports describing the expenditure of funds under this program, beginning no later than 45 days after the date of enactment (by April 3, 2009).

Hazardous Substance Superfund - **$600 million**
[A.VII]

- The ARRA provides an additional $600 million to the Environmental Protection Agency for the Superfund remedial program. Under existing law, states may enter into cooperative agreements with EPA to conduct certain remedial actions at Superfund sites and receive a credit from the federal government for 90 percent of eligible expenses. *See* 42 U.S.C. § 9604.

Leaking Underground Storage Tank Trust Fund Program - **$200 million**
[A.VII]

- The ARRA provides an additional $200 million for the Leaking Underground Storage Tank Trust Fund program for cleanup activities under EPA's response program for petroleum authorized by 42 U.S.C. § 6991b(h). The ARRA waives the state and local cost-sharing requirements of 42 U.S.C. § 6991b(h)(7)(B) for these additional grants.

*Brownfield Projects - **$100 million***
[A.VII]

- The EPA currently administers grants available to states, local governments, land clearance authorities, and regional authorities (but not available to for-profit or non-profit organizations), under the Comprehensive Environmental Response, Compensation, and Liability Act (42 U.S.C. § 9604).

- The ARRA provides an additional $100 million for grants for "brownfields" (contaminated land) revitalization projects. The ARRA waives cost-sharing requirements for grants made to brownfields under this provision.

*Diesel Emission Reduction Act Grants - **$300 million***
[A.VII]

- The ARRA provides an additional $300 million for an EPA program to promote diesel emission reduction through grants and low cost loans to state, local, and tribal governments and port authorities, under the Energy Policy Act of 2005 (42 U.S.C. § 16131). The ARRA waives state matching requirements for these additional grants.

*Watershed and Flood Prevention - **$290 million***
[A.I]

- The Department of Agriculture, Natural Resources Conservation Service provides grants to state, local, and tribal governments for watershed and flood prevention. The ARRA provides an additional $145 million for these grants, designated for the purchase of floodplain easements from public or private land owners under section 403 of the Agriculture Credit Act (42 U.S.C. § 2203).

- Grant recipients must be able to begin work promptly and be able to complete the projects without the need for additional funding.

*Watershed Rehabilitation Program - **$50 million***
[A.I]

- The Department of Agriculture, Natural Resources Conservation Service, provides grants to state, local, and tribal governments for watershed rehabilitation. The ARRA provides an additional $50 million for these grants.

- Grant recipients must be able to begin work promptly and be able to complete the projects without the need for additional funding.

6. HEALTH CARE

A. Medicaid Provisions (State Fiscal Relief)

State Fiscal Relief - ***$87 billion***[7]
[B.V]

- **Temporary Increase in Federal Medical Assistance Percentage (FMAP).** The ARRA increases the federal share of Medicaid payments in three ways. First, states are "held harmless" for any reductions in their FMAP that would have applied this year and through the first quarter of 2011 due to stronger economic conditions that may have prevailed in the state in past years. Second, the ARRA increases each state's FMAP by 6.2 percent through December 31, 2010. Third, states with increasing unemployment, determined on a quarterly basis, qualify for additional increases during the recession adjustment period (October 1, 2008, through December 31, 2010); any additional increase will remain in place at least through July 1, 2010.

  - States are not eligible for FMAP increases if (1) they have more restrictive Medicaid eligibility standards, methodologies, or procedures than those in place on July 1, 2008; (2) they have failed to make prompt payments; or (3) they attempt to hold onto any resulting state savings in a rainy day fund. If a state has restricted its Medicaid policies since July 1, 2008, it is eligible for an increased FMAP, retroactive to October 1, 2008, if it reinstates less restrictive policies by July 1, 2009. If a state reinstates less restrictive policies after July 1, 2009, it is eligible for an increased FMAP beginning with the first calendar quarter in which the less restrictive policies are reinstated. States that benefit from an increased FMAP are subject to certain reporting requirements and must submit a form regarding how funds were expended by September 30, 2011.

  - Note for local governments: If a state requires political subdivisions to contribute to the non-federal share of the state Medicaid plan, the state cannot require a greater percentage of the non-federal share than would have been required prior to the temporarily enhanced FMAP.

  - Note for territories: Each territory can select, via a one-time special election, a 6.2 percent increase in its FMAP and a 15 percent increase in its spending cap; otherwise it will be granted a 30 percent increase in its spending cap.

- **Temporary Increase in Disproportionate Share Hospital (DSH) Allotments.** The ARRA provides for a temporary increase in the DSH allotment for each state. For FY 2009, this provision will increase DSH allotments by 2.5 percent above the allotments states would have received under preexisting law. States' DSH allotments in FY 2010 will be equal to the FY 2009 allotments further increased by 2.5 percent. These increases will only apply if the state would not receive a larger increase under preexisting law. DHS allotments for FY 2011 and beyond will be calculated without regard to the temporary increases.

---

[7] Based on estimates from the Government Accountability Office and the Center on Budget and Policy Priorities.

The contents of this document constitutes legal information not legal advice. Persons or individuals seeking guidance on specific facts and circumstances related to this memorandum should seek counsel.

- **Extension of Transitional Medical Assistance (TMA)**. The ARRA provides for an eighteen-month extension of work-related TMA (through December 31, 2010). States may use a 12-month, rather than 6-month, initial extension period for families transitioning from welfare to work (in which case the additional 6-month extension no longer applies). States may also grant extensions to families that have received such aid for less than three months. States are subject to statistical reporting requirements, with reports due to HHS.

- **Extension of the Qualifying Individual Program**. The ARRA provides a for a one-year extension of the qualifying individual program (through December 2010) with an allocation of $412.5 million for the period between January 1, 2010 and September 30, 2010 and $150 million for the period between October 1, 2010 and December 31, 2010.

- **Indian Medicare and Medicaid Provisions**. The ARRA eliminates premiums, cost sharing, co-payments and similar charges for Indians who receive treatment from the Indian Health Service, an Indian Tribe, a Tribal Organization, an Urban Indian Organization, or a health care provider through referral under the contract health services program. Medicaid payments to those organizations will not be reduced by any amount that would be due from an Indian, if such charges were permitted. Furthermore, with respect to Indians, the ARRA exempts certain property for Medicaid eligibility determinations, protects tribal property from Medicaid estate recovery, and sets forth rules to provide access to Indian primary care providers and assure payment to Indian health care providers.

B. Electronic Health Record (EHR) Technology

Incentives for Providers to Adopt EHR Technology - ***$63,750 (per Medicaid Provider)*** *[B.IV]*

- Under the ARRA, the federal government will provide contributions for amounts states pay to eligible Medicaid providers to encourage the adoption of EHR technology, in order to promote health care quality and the exchange of health care information. The contributions can be as much as $21,250 per provider for the first year of payments (which may not be later than 2016), and as much as $8,500 for up to five years thereafter. Providers eligible for both Medicare and Medicaid incentive payments are required to choose one.

- Eligible providers include physicians, nurses and midwife nurses who are not hospital based and whose patient volume is at least 30 percent attributable to Medicare. Such providers are eligible for payment of up to 85 percent of their net allowable technology costs, up to the maximum and subject to specified annual limits. Acute care hospitals with Medicaid patient volume of 10 percent or more and children's hospitals with any Medicaid volume are also eligible. Payments to hospitals are limited to amounts analogous to those specified for Medicare hospitals in § 4312 of the Act.

- In order to be eligible for federal contributions, states must provide assurances that the amounts are paid directly to Medicaid providers without deductions or rebates. States may receive contributions for the administrative costs of making payments to encourage the use of certified EHR technology. Additionally, the state must conduct adequate oversight of its EHR technology encouragement program.

The contents of this document constitutes legal information not legal advice. Persons or individuals seeking guidance on specific facts and circumstances related to this memorandum should seek counsel.

Incentives for Hospitals to adopt EHR Technology - ***Variable Amount (per Hospital)***
[B.IV]

- The ARRA provides funding for hospitals that are "meaningful users" of EHR technology, as defined by the ARRA. The hospital must demonstrate (via attestation, claim submission, survey, or other method specified by the Secretary) that meaningful EHR technology is connected in a manner that provides for the electronic exchange of health information to improve the quality of health care coordination. Information relating to clinical quality measures must be submitted in a form and manner specified by the Secretary.

- The amount of federal funding for each hospital using EHR technology is determined by a formula contained in Section 4102(a)(1) of the ARRA, with a base amount of $2 million. Critical Access Hospitals may receive additional EHR technology-related payments under Section 4102(a)(2) of the ARRA.

C. National Coordinator for Health Information Technology

Grants to the Office of the National Coordinator for Health Information Technology - ***$2 billion***
[A.VIII]

- The ARRA allocates $2 billion to the Department of Health and Human Services's Office of the National Coordinator for Health Information Technology (ONCHIT) for efforts to create a national medical record database. Of this allocation, **$300 million** is designated for "regional or sub-national efforts" toward health information exchange.

Immediate Funding to Strengthen the Health Information Technology Infrastructure - ***At least $300 million***
[A.XIII]

- The ARRA requires the Secretary of Health and Human Services (HHS Secretary) to promote the use and exchange of electronic health information (HIT). Funds are to be administered through federal agencies with expertise to support the following: (1) HIT architecture to support the secure electronic exchange of information; (2) electronic health records for providers not eligible for HIT incentive payments under Medicare and Medicaid; (3) training and dissemination of information on best practices to integrate HIT into health care delivery; (4) telemedicine; (5) interoperable clinical data repositories; (6) technologies and best practices for protecting health information; and (7) HIT use by public health departments.

- The HHS Secretary is required to invest $300 million to support regional health information exchanges, and may use funds to carry out other authorized activities.

Health Information Technology Implementation Assistance
[A.XIII]

- The ARRA requires the HHS Secretary, acting through the National Coordinator for HIT, in consultation with NIST and other agencies, to establish an HIT extension program to assist providers in adopting and using certified electronic health resource technology. The Secretary is also required to support HIT Regional Extension Centers affiliated with non-profit organizations to provide assistance to providers in the region. The Secretary is required to give priority to public, non-profit, and critical access hospitals, community

The contents of this document constitutes legal information not legal advice. Persons or individuals seeking guidance on specific facts and circumstances related to this memorandum should seek counsel.

health centers, individual and small group practices, and entities that serve the uninsured, underinsured and medically underserved individuals. Funded entities may receive up to four years of funding to cover up to 50 percent of their capital and annual operating and maintenance expenditures.

- The HHS Secretary is required to publish a notice describing the program and the availability of funds within 90 days of the date of enactment (by May 18, 2009). Each regional center receiving funding would be required to submit to a biennial evaluation of its performance against specified objectives, and continued funding after two years is contingent on receiving a positive evaluation. The HHS Secretary may require an annual report. An annual review by the National Coordinator for HIT is required.

State Grants to Promote Health Information Technology
[A.XIII]

- The National Coordinator for HIT is authorized to award planning and implementation grants to states or qualified state-designated entities to facilitate and expand electronic health information exchange.

- The state or state-designated entity (as defined under § 3013(f) of the Public Health Service Act) must submit a plan describing the activities to be carried out to facilitate HIT exchange. States must contribute a certain portion of matching funds after FY 2011 and the HHS Secretary has the discretion to require such matching funds before then. The Secretary may require annual reports. An annual review by the National Coordinator for HIT is required.

Competitive Grants to States and Indian Tribes for the Development of Loan Programs to Facilitate the Widespread Adoption of Certified EHR Technology
[A.XIII]

- The National Coordinator for HIT is authorized to award competitive grants to states and Indian tribes to establish loan programs for health care providers to purchase EHR technology, train personnel in the use of that technology and improve the secure exchange of health information. Grantees would be required to (1) establish a qualified HIT loan fund, (2) submit a strategic plan, updated annually, that describes the intended uses of the funds and provides assurances of their proper use by health care providers, and (3) provide matching funds (at least $1 for every $5 of federal funds).

- No awards are permitted under this subsection before January 1, 2010. The HHS Secretary may require an annual report. An annual review by National Coordinator for HIT is required.

Demonstration Program to Integrate Information Technology Into Clinical Education
[A.XIII]

- The ARRA authorizes the HHS Secretary to award competitive grants to graduate health education programs to integrate HIT into the clinical education curriculum. Grantees must submit a strategic plan. The grant cannot cover more than 50 percent of the costs of any assisted activity (absent a waiver). The HHS Secretary may require an annual report. An annual review by the National Coordinator for HIT is required.

Information Technology Professionals in Health Care
[A.XIII]

- The ARRA requires the HHS Secretary to provide financial assistance to universities to establish or expand medical informatics programs, in consultation with the Director of the National Science Foundation. Such grants cannot cover more than 50 percent of the costs of any assisted activity (absent a waiver). The HHS Secretary may require an annual report. An annual review by the National Coordinator for HIT is required.

D. National Institute of Standards and Technology

Research and Development Programs
[A.XIII]

- The ARRA requires the National Institute of Standards and Technology (NIST), in consultation with the National Science Foundation (NSF) and other federal agencies, to award competitive grants to universities or research consortia for establishing multidisciplinary Centers for Health Care Information Enterprise Integration. The Centers are to generate innovative approaches to the development of a fully interoperable national health care infrastructure, as well as develop and use HIT.

- Grants are to be awarded on a "merit-reviewed, competitive basis." The NIST Director will establish rules governing submission of applications, which must, at minimum, describe the proposed Center's research projects, how the Center will promote interdisciplinary collaboration, technology transfer activities to diffuse research results, and how the Center will contribute to education and training.

E. Other Health Care Provisions

*Prevention and Wellness Fund Grants - **$1 billion***
[A.VIII]

- The ARRA provides $50 million to the Department of Health and Human Services to award grants to the states for infectious disease reduction strategies.

- Furthermore, the ARRA provides $650 million to the Centers for Disease Control (CDC) to develop "community-based" prevention and wellness strategies to address chronic disease rates, that may benefit state and local governments.

- The ARRA provides $300 million to the CDC to administer an immunization program in partnership with health care providers in the public and private sectors, including state and local health departments and clinics. *See* Public Health Service Act, § 317, 42 U.S.C. § 247(b).

*National Center for Research Resources - **$1 billion***
[A.VIII]

- *See* Technology and Science.

The contents of this document constitutes legal information not legal advice. Persons or individuals seeking guidance on specific facts and circumstances related to this memorandum should seek counsel.

*Construction of State Extended Care Facilities - **$150 million***
[A.X]

- *See* National Guard and Veterans.

*Rural Community Facilities Program - **$130 million***
[A.I]

- *See* Law Enforcement and Community Services.

7. HOUSING

*Public Housing Capital Fund - **$4 billion***
[A.XII]

- The ARRA provides additional funding for public housing agencies to carry out capital and management activities including rehabilitation and retrofitting of public housing to increase energy efficiency and safety. The funding is authorized by section 9 of the United States Housing Act of 1936. *See* 42 U.S.C. § 1437g, 24 C.F.R. Part 905 and 990.

- **$1 billion** is for competitive grants for priority investments including those that leverage private funding or finance energy conservation renovations or retrofits. These funds will be allocated no later than September 30, 2009.

- **$3 billion** is to be allocated automatically, within 30 days of the date of enactment (by March 19, 2009), under the formula used in FY 2008, except that funds will be withheld from public housing agencies that are designated as troubled or that do not want the funding.

- Funding may not be used for operating or rental assistance activities or to replace existing sources of funding. Public housing agencies are required to prioritize projects that are already underway, that can award contracts within 120 days of when funds are made available, or that are included in the 5-year capital fund plans required by 42 U.S.C. § 1437c-1(a). Priority should also be given to rehabilitation of vacant rental units.

- Public housing agencies must: (1) obligate all funds within one year of receipt; (2) spend at least 60 percent of funds within two years of receipt; and (3) spend all funds within three years of receipt. If these timelines are not met, the Secretary of Housing and Urban Development (HUD Secretary) may recapture and reallocate remaining funds.

*HOME Investment Partnerships Program - **$2.25 billion***
[A.XII]

- The ARRA provides additional HOME funds for state housing credit agencies to provide gap financing grants in coordination with the Low Income Housing Tax Credit to catalyze stalled housing development. Funds will be automatically distributed to the states based upon FY 2008 HOME funds apportionment.

- State agencies must grant the funds competitively to recipients of low income housing tax credits pursuant to their qualified allocation plans and must give priority to projects that are expected to be completed within three years. Projects awarded low income housing

The contents of this document constitutes legal information not legal advice. Persons or individuals seeking guidance on specific facts and circumstances related to this memorandum should seek counsel.

tax credits under section 42(h) of the federal tax code in FY 2007, 2008 or 2009 are eligible for this funding. *See* 26 U.S.C. § 42(h).

- State agencies must commit at least 75 percent of the funds within one year of the date of enactment (by February 17, 2010) and must demonstrate that project owners spend 75 percent of the funds within two years of the date of enactment (by February 17, 2011) and the rest within three years (by February 17, 2012). State agencies must provide the HUD Secretary access to information about funded grants. HUD will list all funded projects on a Web site.

*Assisted Housing Stability and Energy and Green Retrofit Investments - **$2.25 billion***
[A.XII]

- The ARRA provides $2.25 billion in funds for public housing agencies (and others) insofar as they are "owners" of properties receiving project-based assistance under the Supportive Housing for the Elderly program (12 U.S.C. § 1701q; 24 C.F.R. Part 891), the Supporting Housing for Persons with Disabilities program (42 U.S.C. § 8013; 24 C.F.R. Part 891), and the Section 8 Low Income Housing Assistance program (42 U.S.C. § 1437f). *See, e.g.*, 42 U.S.C. § 1437f(1) (defining "owner" to include public housing agencies).

- The ARRA provides **$2 billion** as additional funds for Project Based Rental Assistance (Public Law 110-161) for payments to owners for 12-month periods and **$250 million** for grants and loans for energy retrofitting and green investments in assisted housing. The funding will be governed by the existing policies, contracts, and infrastructure of the programs within HUD's Office of Affordable Housing Preservation. The HUD Secretary may establish additional terms and conditions as necessary, and the Secretary is authorized to provide incentives to owners to undertake energy and green retrofitting investments.

- The owner must have at least a satisfactory management review rating and be in substantial compliance with applicable requirements. Owners must commit to make housing affordable for at least 15 years, and for additional periods as determined by the HUD Secretary. Grants or loans must include a financial and physical assessment of the property. Owners will be required to spend funds within two years of receipt.

*Neighborhood Stabilization Program - **$2 billion***
[A.XII]

- The ARRA provides additional funds for competitive grants, available to state and local governments as well as non-profits, to purchase abandoned and foreclosed property for use as affordable housing, as authorized by title III of the Housing and Economic Recovery Act of 2008 (HERA), Public Law 110-289, as amended. *See* 42 U.S.C. §§ 5301, *et seq.*

- The HUD Secretary will establish criteria for grant competition within 75 days after the date of enactment (by May 3, 2009). Applications are due to HUD within 150 days after the date of enactment (by July 17, 2009). Applicants will have to demonstrate capacity, ability to leverage investment, and ability to achieve neighborhood stabilization. Grants must be given to areas with the highest foreclosure numbers and rates and where the funding can be used within the established timeline.

The contents of this document constitutes legal information not legal advice. Persons or individuals seeking guidance on specific facts and circumstances related to this memorandum should seek counsel.

- Grantees must spend half of the funds within two years of receipt and must spend the entire amount of funds within three years of receipt. Grantees cannot discriminate against "Section 8" participants. Use of funds is further governed by HERA. [8]

*Homelessness Prevention Fund - **$1.5 billion***
[A.XII]

- The ARRA provides funding to states and local governments for short- and medium-term rental assistance, relocation and stabilization services for homelessness prevention, and "rapid re-housing." The HUD Secretary will establish the requirements for this program within 30 days of the date of enactment (by March 19, 2009) and distribute funds according to a pre-existing formula.

- Grantees must spend at least 60 percent of the funds within two years of receipt and must spend all funds within three years; otherwise, the Secretary may recapture and redistribute the funds. Grantees must collect, and submit to HUD, data on the use of the funds.

*Community Development Block Grant Program - **$1 billion***
[A.XII]

- The ARRA provides additional funding for the Community Development Block Grant program (42 U.S.C. §§ 5301 *et seq.*). Funds will be automatically distributed to grantees who received funding in FY 2008 pursuant to 42 U.S.C. § 5306.

- The HUD Secretary will establish criteria to expedite the use of funds, and recipients of the funding should give priority to projects that can award contracts within 120 days of when funds are made available. HUD may waive certain requirements to expedite the use of funds.

*Native American Housing Block Grants - **$510 million***
[A.XII]

- *See* Tribal Governments.

*Lead Hazard Reduction Program - **$100 million***
[A.XII]

- The ARRA provides additional funding for the Lead Hazard Reduction Program for competitive grants to local governments and non-profits for lead-based paint removal. In previous years, the criteria and application process for this program were established through HUD's Notice of Funding Availability for HUD's Discretionary Programs (SuperNOFA). Information about previous grant cycles and SuperNOFAs is available on HUD's Web site.

- Priority will be given to applicants who applied in FY 2008, but were not awarded grants because of funding limitations. Remaining funds will be added to the FY 2009 program. Each applicant must submit a detailed plan that demonstrates it capacity to carry out the proposed use of funds.

---

[8] The ARRA repealed section 2301(d)(4) of the HERA, which limited reinvestment of profits, and amended section 2301(c)(3)(C), which establishes eligible uses.

The contents of this document constitutes legal information not legal advice. Persons or individuals seeking guidance on specific facts and circumstances related to this memorandum should seek counsel.

- Recipients must spend half of the funds within two years of receipt and all funds within three years; otherwise, the HUD Secretary may recapture and redistribute the funds.

Election to substitute grants to states for low-income housing projects in lieu of low-income housing credit
[B. I]

- The ARRA provides an option for state housing credit agencies to elect to receive an amount for distribution of grants in lieu of the states' low-income housing tax credit allocation. Grants under this provision must be used to finance the construction or acquisition and rehabilitation of qualified, low-income buildings as defined in 26 U.S.C. § 42.

- States may make awards to finance a qualified low-income building regardless of whether the building has an allocation of low-income housing credit. However, in such a case, the state housing credit agency must determine that such an award will increase the total funds available to the state to build and rehabilitate affordable housing. In order to make such a determination, the state must establish a process by which applicants for awards demonstrate good faith efforts to obtain investment commitments before the state housing credit agency makes awards.

- Any grant recipient must satisfy low income housing credit rules. State housing credit agencies must perform asset management functions to ensure compliance with the low-income housing credit rules and the long-term viability of buildings financed with these awards. States may collect reasonable fees from award recipients to cover the expense of the agency's asset management duties. The state may alternatively retain a third party to perform these asset management duties.

- States must use the funds before January 1, 2011. Any funds unused during this period must be returned to the Treasury Department.

8. LAW ENFORCEMENT AND COMMUNITY SERVICES

A. Law Enforcement

*Edward Byrne Memorial Justice Assistance Grants - **$2.225 billion***
[A.II]

- The Edward Byrne Memorial Justice Assistance Grant program allocates money to states and local law enforcement agencies to help prevent, fight, and prosecute crime. 42 U.S.C. §§ 3750 *et seq.* The ARRA provides additional funds to support state and local law enforcement under this program.

- Of the total additional funds, the Department of Justice will provide **$2 billion** by statutory formula to states and local law enforcement agencies to help prevent, fight, and prosecute crime. Additionally, the Department of Justice will provide **$225 million** in competitive, peer-reviewed grants, available to units of state, local, and tribal governments for law enforcement assistance to improve the administration of justice, provide services to victims of crime, support critical nurturing and mentoring of at-risk children and youth, and support other similar activities.

*Community Oriented Policing Services - **$1 billion***
[A.II]

- The ARRA provides additional funds for the Department of Justice to distribute to states for hiring and rehiring additional career law enforcement officers, pursuant to the existing Community Oriented Policing Services (COPS) program. *See* Omnibus Crime Control and Safe Streets Act of 1968, Title I, § 1701; 42 U.S.C. § 3796dd. Funding under this grant program will remain available until September 30, 2010.

- The ARRA waives the $75,000 per officer cap and 25 percent local match requirement for all funds for COPS for FY 2009 and FY 2010. *See* 42 U.S.C. §§ 3796dd-3(c), 3796dd(g).

*Preventing Violence Against Women - **$225 million***
[A.II]

- The ARRA provides additional funding for grants to state, local and tribal governments and courts (including juvenile courts) for use in combating violence against women. These funds are to be used to provide personnel, training, technical assistance, data collection, and equipment for the apprehension, prosecution, and adjudication of persons committing violent crimes against women. The federal share of qualifying projects cannot exceed 75 percent of the cost.

- Out of the total amount, **$50 million** is allocated to transitional housing assistance grants for victims of domestic violence, stalking, or sexual assault, under section 40299 of the Violent Crime Control and Law Enforcement Act of 1994. *See* 42 U.S.C. § 10419. The remaining funds will be available by application in amounts determined by statutory formula as authorized by part T of the Omnibus Crime Control and Safe Streets Act of 1969, 42 U.S.C. §§ 3796gg *et seq.*

- Grantees must submit performance reports to the U.S. Attorney General.

*Tribal Law Enforcement Assistance - **$225 million***
[A.II]

- The ARRA provides additional funding for discretionary grants to American Indian and Alaska Native tribes upon application indicating a need for law enforcement assistance. Funds are to be distributed based upon the guidelines set forth by the Correctional Facilities on Tribal Lands program. *See* 42 U.S.C. §§ 13701 *et seq.*; 28 C.F.R. Part 91. In the past, grants under this program could not exceed 90 percent of the total project cost.

- The grant approval process must consider the detention bed space needs of the applicant tribe and its violent crime statistics.

*Rural Law Enforcement Assistance - **$125 million***
[A.II]

- The ARRA provides additional funds for assistance to law enforcement in rural states and rural areas to prevent and combat crime in rural America. These funds are distributed to states under the formula set forth in 42 U.S.C. § 3796bb. Money can be used to hire police officers and for community drug prevention and treatment programs. 42 U.S.C. § 3796bb.

The contents of this document constitutes legal information not legal advice. Persons or individuals seeking guidance on specific facts and circumstances related to this memorandum should seek counsel.

*Victim's Compensation - **$100 million***
[A.II]

- The ARRA provides additional funds to be distributed by the Department of Justice by statutory formula, under 42 U.S.C. § 10601(d)(4), to support state compensation and assistance programs for victims and survivors of domestic violence, sexual assault, child abuse, drunk driving, homicide, and other federal and state crimes.

*Internet Crimes Against Children Task Force - **$50 million***
[A.II]

- The ARRA provides additional funds for the Department of Justice to distribute money under the Internet Crimes Against Children Task Force Program to states and local law enforcement agencies to enhance investigative responses to offenders who use the Internet to sexually exploit children. In the past, qualifying public agencies, such as state agencies, units of local and tribal government, and public universities, were required to file applications demonstrating eligibility under the guidelines provided in a solicitation.

*Southwest Border Assistance - **$40 million***
[A.II]

- The ARRA provides additional funds for the Department of Justice to award as competitive grants to fund programs that provide assistance and equipment to local law enforcement along the Southern border or in High-Intensity Drug Trafficking Areas.

- **$10 million** of these funds will be transferred to the Federal Bureau of Alcohol, Tobacco, Firearms, and Explosives for distribution under Project Gunrunner, a cooperative effort among federal, state, and Mexican law enforcement officials to eliminate firearm trafficking along the United States-Mexico border.

B. Other Community Services

*Rural Community Programs - **$1.51 billion***
[A.I]

- The ARRA provides the following additional funding:

  - **$1.38 billion**, under the Rural Water and Waste Disposal Program, for loans and grants to regional, local, non-profit, and tribal organizations for the development of water and waste disposal systems in rural areas and towns with a population below 10,000.

  - **$130 million**, under the Rural Community Facilities Program, for loans and grants to regional, state, local, and tribal organizations for the construction or maintenance of rural community facilities, including hospitals, health clinics, and child and elder care facilities.

The contents of this document constitutes legal information not legal advice. Persons or individuals seeking guidance on specific facts and circumstances related to this memorandum should seek counsel.

- **$150 million**, under the Rural Business Program, for loans and grants to regional, state, local, and tribal organizations for improving business, industry, and employment opportunities in economically-distressed rural communities.

- The Department of Agriculture administers these programs. Of the pool of funds appropriated in the ARRA to these, and certain other rural programs, 10 percent must be designated for "persistent poverty counties" (defined as those counties in which 20 percent of the population have lived below the federal poverty level for the past 30 years).

National Endowment for the Arts - ***$50 million***
[A.VII]

- The ARRA provides the NEA an additional $50 million to distribute in grants for arts projects which preserve jobs in the arts sector otherwise threatened by declines in philanthropic support during the economic downturn.

- The NEA will distribute 40 percent of these funds to state and regional arts agencies to fund arts projects. The National Council on the Arts will distribute the remaining 60 percent to deserving arts projects; state and regional arts agencies will potentially be eligible to receive these funds as well.

- The ARRA also waives the matching requirements for use of these funds under § 5(e) of the National Foundation on the Arts and Humanities Act (20 U.S.C. § 954) for these additional funds.

Historic Preservation Fund - ***$15 million***
[A.VII]

- The ARRA provides the Department of the Interior, National Park Service with an additional $15 million in grants for historic preservation projects at historically black colleges and universities (HBCUs). HBCUs are defined in the Historic Preservation Fund Act and the Omnibus Parks and Public Lands Act. *See* 16 U.S.C. § 470a. Many HBCUs are publicly-funded; states with public HBCUs are eligible to receive these grants.

- The ARRA also waives any matching requirements for these additional funds found in the Historic Preservation Fund Act and the Omnibus Parks and Public Lands Act.

9. MILITARY

A. Coast Guard

Funding for Bridge Alteration - ***$142 million***
[A.VI]

- The ARRA provides the Coast Guard with an additional $142 million for the reconstruction or removal of railroad or highway bridges under § 6 of the Truman-Hobbs Act (33 U.S.C. § 516).

The contents of this document constitutes legal information not legal advice. Persons or individuals seeking guidance on specific facts and circumstances related to this memorandum should seek counsel.

- Any bridge owner, including any state, county, or local government, can apply for use of these funds. The Coast Guard will give priority to projects ready to begin construction immediately.

B. National Guard

Military Construction, Army National Guard - ***$50 million***
[A.X]

- The ARRA provides additional funding to the Army National Guard for planning, design and military construction projects in the U.S. that are not otherwise authorized. The Secretary of Defense, in consultation with the Director of the Army National Guard, is directed to submit a funding plan to Congress within 30 days of the date of enactment (by March 19, 2009).

Military Construction, Air National Guard - ***$50 million***
[A.X]

- The ARRA provides funding to the Air National Guard for planning, design and military construction projects in the U.S. that are not otherwise authorized. The Secretary of Defense, in consultation with the Director of the Air National Guard, is directed to submit a funding plan to Congress within 30 days of the date of enactment (by March 19, 2009).

C. Veteran Services

Construction of State Extended Care Facilities - ***$150 million***
[A.X]

- The ARRA provides additional funding for grants to assist states in the acquisition and construction of extended care facilities as well as the remodeling, altering or modifying existing facilities for furnishing care to veterans. States should submit applications in accordance with 38 U.S.C. § 8135 and 38 C.F.R. §§ 59.20, 59.60.

10. NUTRITION

Supplemental Nutrition Assistance Program (SNAP) – ***approximately $20 billion***
(formerly known as the Food Stamp program)
[A.I]

- The ARRA provides additional SNAP funds to be distributed to state agencies by the Department of Agriculture, Food and Nutrition Service, under the Food and Nutrition Act (7 U.S.C. 2036(a)), which provides funding to state agencies.

- Individuals are entitled to SNAP benefits based on their income and asset levels. Beginning in April 2009, individuals receiving the maximum benefit will receive a 13 percent increase in their benefit levels, which translates to an approximately $19 billion increase in the monies flowing through state agencies. This increase ends after September 30, 2009. However, after that date, the Secretary of Agriculture may not reduce the minimum or maximum benefit levels (or the block grants for Puerto Rico and American

The contents of this document constitutes legal information not legal advice. Persons or individuals seeking guidance on specific facts and circumstances related to this memorandum should seek counsel.

Samoa) below the level in effect for FY 2009. The ARRA also suspends from April 2009 to October 2010 the three-month program time limit faced by many unemployed, childless adults.

- Of the additional SNAP funds, the ARRA provides **$295 million** to the states for the administrative expenses of the program ($145 million for 2009; $150 million for 2010), and **$5 million** for administrative expenses for programs on Native American reservations.

*Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) - **$500 million***
[A.I]

- The ARRA provides additional funds for this existing program, administered by the Department of Agriculture, Food and Nutrition Service, under the Child Nutrition Act of 1966 (42 U.S.C. § 1786).

- **$400 million** will be placed in the Secretary of Agriculture's reserve fund, to be distributed to the states as the Secretary deems necessary, notwithstanding the usual procedure for distribution of funds found in § 17(i) of the Child Nutrition Act.

- **$100 million** will be granted to the states to improve information management systems, pursuant to § 17(h)(10)(B)(ii) of the Child Nutrition Act.

*Emergency Food Assistance Program - **$150 million***
[A.I]

- The ARRA provides in-kind support valued at $150 million to be distributed to the states according to the number of individuals in each state with incomes below the federal poverty level. Allocations come in the form of food commodities, not dollars, which are then distributed to local and non-profit direct-service agencies (e.g. food banks, soup kitchens).

- This program is administered by the Department of Agriculture, Food and Nutrition Service, under the Food and Nutrition Act (7 U.S.C. § 2036(a)) and the Emergency Food Assistance Act (7 U.S.C. § 7508(a)(1)).

*National School Lunch Program - **$100 million***
[A.I]

- The ARRA provides additional funds for improvements in program equipment distributed to the states, in proportion to each state's administrative expense allocation. States must then distribute these funds via competitive grants to local school food authorities, with priority given to those schools in which at least 50 percent of students are eligible for free or reduced lunch.

- This program is administered by the Department of Agriculture, under the Richard B. Russell National School Lunch Act (42 U.S.C. § 175) and the Child Nutrition Act of 1966 (42 U.S.C. § 1771).

The contents of this document constitutes legal information not legal advice. Persons or individuals seeking guidance on specific facts and circumstances related to this memorandum should seek counsel.

*Senior Meals Programs - **$100 million***
[A.VIII]

- The ARRA provides additional funding for grants to state and local governments, with the following designations: $65 million for Congregate Nutrition Services; $32 million for Home-Delivered Nutrition Services; $3 million for Native American Nutrition Services

11. TECHNOLOGY AND SCIENCE

*Broadband Technology Opportunities Program - **$4.7 billion***
[A.II; B.VI]

- The ARRA provides at least $4.35 billion in funding for the National Telecommunications and Information Administration (NTIA) of the Department of Commerce to distribute under the Broadband Technology Opportunities Program (BTOP) for broadband deployment efforts. 47 U.S.C. §§ 1301 *et seq.* State, local, and tribal governments are eligible for funding, as are certain private organizations.

- Funding can be awarded for a wide range of projects, including acquisition of equipment, training, and support for schools, libraries, health care providers, community colleges and other community institutions; construction of broadband infrastructure; ensuring access for vulnerable populations.

- Of the $4.35 billion, at least $200 million is available for competitive grants to expand public computer center capacity, including at community colleges and public libraries. At least $250 million is available for competitive grants for innovative programs to encourage sustainable adoption of broadband service.

- The Assistant Secretary of Commerce for Communications and Information must establish and implement the program "expeditiously" in consultation with the Federal Communications Commission. Applicants must provide assurances that funded projects will be completed within two years of receipt of funds. Applicants must provide at least 20 percent matching funds (absent a need-based waiver). All awards must be made before the end of FY 2010. The NTIA will award at least one grant in each state.

- In making awards, the NTIA will look for applications that provide the greatest affordability and speed of broadband service to the greatest population; and those that target broadband service for children, education, and health care delivery. Grantees will be subject to quarterly reporting requirements.

- The NTIA also will distribute up to $350 million under the BTOP to establish the State Broadband Data and Development Grant program, and develop and maintain a national broadband inventory map. 47 U.S.C. § 1301 note.

*Distance Learning, Telemedicine, and Broadband Program - **$2.5 billion***
[A.I]

- The ARRA provides additional funds for broadband infrastructure, available to local governments, utility districts, irrigation districts, and others. This will provide grants, loans and loan guarantees, as administered by the Department of Agriculture under the Rural Electrification Act. *See* 7 U.S.C. §§ 901 *et seq.*, and 918c.

The contents of this document constitutes legal information not legal advice. Persons or individuals seeking guidance on specific facts and circumstances related to this memorandum should seek counsel.

- Any local government can apply for a grant or loan, provided 75 percent of the area to be served by the loan or grant is rural and without sufficient access to broadband service (as determined by the Secretary of Agriculture).

- The Secretary of Agriculture will give priority to applications: (1) from current or former borrowers under the Rural Electrification Act; that (2) deliver consumers a choice of more than one service provider; (3) provide service to the highest proportion of rural residents lacking broadband service; (4) demonstrate that if the application is approved, all project elements will be fully funded; (5) can be completed if the requested funds are provided; and (6) can commence promptly upon approval.

- However, project areas funded under this program may not simultaneously receive funding for broadband access under the BTOP program described above.

*National Science Foundation Research and Related Activities - **$2.5 billion***
[A.II]

- The ARRA provides $2.5 billion in funding for "research and related activities" to the National Science Foundation (NSF). Funds will only be available until September 30, 2010. The NSF appears to have significant discretion in channeling the expenditure of these funds, but several programs are specifically designated to receive funding:

  - **$400 million** for the Major Research Equipment and Facilities Construction program, which makes funding available to colleges and universities through competitive grants for the acquisition of research equipment, such as telescopes, observatories, and advanced computing systems.

  - **$300 million** for the Major Research Instrumentation program, which makes funding available to state colleges, universities, and research museums for acquisition or development of major research instrumentation. Under previous solicitations, applications for funding to acquire general purpose computer networks were returned without further review, but proposals for computer networks required to perform specific research tasks were eligible. Previous grantees were subject to reporting requirements.

  - **$200 million** for available for academic facilities modernization under the Academic Research Infrastructure Facilities Modernization Program. Under previous solicitations, funds were made available to colleges and universities to renovate and modernize existing facilities. This program does not fund new construction projects.

*National Center for Research Resources - **$1 billion***
[A.VIII]

- The National Center for Research Resources (NCRR), administered under the Department of Health and Human Services, National Institutes of Health, provides resources for medical and scientific research throughout the United States.

- The ARRA provides an additional $1 billion to the NCRR for the construction, renovation, and repair of non-federal research facilities. In addition, § 481A of the Public Health

The contents of this document constitutes legal information not legal advice. Persons or individuals seeking guidance on specific facts and circumstances related to this memorandum should seek counsel.

Service Act (42 U.S.C. § 287a-1) allows state and local entities to compete for contracts for construction and renovation of these facilities.

- The ARRA allows the NCRR to use up to $300 million of these funds to provide research equipment to recipients of NCRR grants.

- Furthermore, the ARRA also: (1) waives the cost-sharing and cost-limiting provisions of the Public Health Service Act for the additional $1 billion in funds; (2) reduces the time period (from 20 years to 10 years) for which recipients of grants must assure the NCRR that the facility will be used for its original purpose; and (3) limits the federal government's ability to recapture the funds if the facility is not used for its original purpose. *See* Public Health Service Act §§ 481A(c)(1)(B)(ii), 481A(e), 481B, 481A(c)(1)(B)(i), 481A(f); 42 U.S.C. §§ 287a-2, 287a-3.

Health Information Technology

- *See* Health Care.

*National Institute of Standards and Technology Research Facilities - **$360 million** [A.II]*

- The National Institute of Standards and Technology (NIST) in the Department of Commerce will distribute $360 million to finance the maintenance, renovation, and new construction of research facilities. Of this sum, **$180 million** will fund a competitive construction grant program for research science buildings. This funding has previously been used for projects, such as laboratories, test facilities, measurement facilities, and observatories, at public and state-controlled colleges and universities.

Weatherization and Energy Efficient Technology

- *See* Energy.

12. TRANSPORTATION

General Provision for ARRA Funding Distributed by the Department of Transportation [A.XII]

- For each state or state agency that receives transportation funds under the ARRA, the governor of that state must certify to the Secretary of Transportation "that the State will maintain its effort with regard to State funding for the types of projects that are funded by the appropriation." The state must report the amount of state funds it plans to expend from the date of enactment through September 30, 2010. The certification is due within 30 days of the date of enactment (by March 19, 2009).

- Grant recipients are subject to periodic reporting requirements to the relevant offices within the Department of Transportation, due 90 days (by May 18, 2009), 180 days (by August 16, 2009), one year (by February 17, 2010), two years (by February 17, 2011) and three years (by February 17, 2012) after the date of enactment.

The contents of this document constitutes legal information not legal advice. Persons or individuals seeking guidance on specific facts and circumstances related to this memorandum should seek counsel.

*Highway Infrastructure Investment - **$27.5 billion***
[A.XII]

- The ARRA provides an additional $27.5 billion in funding for restoration, repair, construction, rail transportation and port infrastructure projects eligible under 23 U.S.C. §§ 601(a)(8), 133(b).

- The Secretary of Transportation will distribute **$60 million** to states as competitive grants for capital expenditures related to ferry boats and ferry boat terminals. *See* 23 U.S.C. § 147. Priority for these competitive grants will be given to projects that can be completed in less than two years. Additional set-asides include **$310 million** for the Indian Reservation Roads Program; **$105 million** for Puerto Rico and **$45 million** for the Territories.

- After the required set-asides, the remainder will be apportioned to the states by statutory formula. *See* 23 U.S.C. § 104(b)(3); Public Law 110-161, div. K, § 120(a)(6). The Secretary of Transportation will automatically distribute the funds within 21 days after the date of enactment (by March 10, 2009). The ARRA also requires sub-allocation of funds apportioned to each state including a 3 percent set-aside for Transportation Enhancements Activities (23 U.S.C. § 133(d)(2)) and 30 percent of funds must be divided between urbanized and other areas pursuant to 23 U.S.C. § 133(d)(3)(A), (B), and (D).

- The Secretary of Transportation will redistribute 50 percent of all unobligated funds 120 days after apportionment and any remaining unobligated funds after one year. However, the state can request an extension of the second deadline. Priority should be given to projects that will be completed within three years and are located in economically distressed areas.

*Capital Assistance for High Speed Rail Corridors and Intercity Passenger Rail Service - **$8 billion***
[A.XII]

- The ARRA provides additional funding for grants to the states under the High Speed Passenger Rail Corridor program and the Intercity Passenger Rail Service program. *See* 49 U.S.C. §§ 26101, 24401(2)(A), (B). Priority will be given to projects for intercity high speed rail service. The ARRA waives state and local cost-sharing requirements for these additional funds.

- The Secretary of Transportation will decide how to allocate the funding between the two programs within 60 days of the date of enactment (by April 18, 2009). The Secretary will provide guidance for applicants on grant terms, conditions, and procedures within 120 days of the date of enactment (by June 17, 2009).

*Transit Capital Assistance - **$6.9 billion***
[A.XII]

- The ARRA provides additional funding for transit capital assistance authorized under 49 U.S.C. § 5302(a)(1). The Secretary of Transportation will automatically distribute funds within 21 days after the date of enactment (by March 10, 2009), pursuant to statutory formulae, with 80 percent of grants going to urbanized areas, 10 percent going to rural areas (with 2.5 percent thereof for tribes), and 10 percent going to growing and high density states. *See* 49 U.S.C. §§ 5307, 5311, 5311(c)(1) & 5340.

- Of the funds provided under this section, the ARRA sets aside **$100 million** for discretionary grants to public transit agencies for capital investments designed to reduce energy consumption and greenhouse gas emissions. The Secretary will prioritize grant awards based upon projected total energy savings.

- The ARRA waives state and local cost-sharing requirements for these additional funds and specifies that funds may not be commingled with prior year funds. The Secretary of Transportation will recapture and redistribute 50 percent of all unobligated funds 180 days after apportionment and any remaining unobligated funds after one year. However, a state receiving funds may request an extension of the second deadline.

*Supplemental Discretionary Grants for a National Surface Transportation System - **$1.5 billion***
[A.XII]

- The ARRA provides for competitive grants to states, local governments and transit agencies for projects involving all modes of surface transportation that have a "significant impact" on the nation, a metropolitan area, or a region. Eligible activities include, for example, projects relating to highways, bridges, public transportation, passenger and freight rail transportation, and port infrastructure investments.

- The Secretary of Transportation will award individual grants of at least $20 million, up to a maximum of $300 million. The Secretary of Transportation may waive the minimum grant requirement in order to fund "significant" projects in small cities, regions, or states. Grants must be geographically diverse and should balance rural and urban needs. The ARRA waives state and local cost-sharing requirements for these additional funds.

- The Secretary of Transportation is required to publish selection criteria for the grant competition within 90 days of the date of enactment (by May 18, 2009); applications for grants must be submitted within 180 days of the Secretary's publication of the selection criteria; and the Secretary must announce awards within one year of the date of enactment (by February 17, 2010). The Secretary of Transportation will give priority to projects that depend on federal funds to complete a financing package, and to projected expected to be completed within three years of the date of enactment (by February 17, 2012).

*Grants-in-Aid to Airports - **$1.1 billion***
[A.XII]

- The ARRA provides for additional discretionary grants to airports to improve critical infrastructure, airport improvement and noise abatement, and runway safety systems. Information on existing airport improvement grant programs can be found at 49 U.S.C. § 7105 and information on noise compatibility planning grants can be found at 49 U.S.C. § 47505. The Secretary of Transportation will give priority to projects that will be completed within two years of the date of enactment (by February 17, 2011), and that supplement rather than replace planned expenditures from other sources. The ARRA waives state and local cost-sharing requirements for these additional funds.

- The Secretary of Transportation must grant half of the funds within 120 days of the date of enactment (by June 17, 2009), and the rest within a year of the date of enactment (by February 17, 2010).

The contents of this document constitutes legal information not legal advice. Persons or individuals seeking guidance on specific facts and circumstances related to this memorandum should seek counsel.

Fixed Guideway Infrastructure Investment - ***$750 million***
[A.XII]

- The ARRA provides an additional $750 million in funding for capital projects to modernize fixed guideway systems, transit systems under 49 U.S.C. § 5309(b)(2) and 49 C.F.R., Part 611. Fixed guideway systems are transit systems using controlled rights-of-way or rails. The ARRA waives state and local cost-sharing requirements for these additional funds and requires that they may not be commingled with prior year funds.

- The Secretary of Transportation will automatically distribute funds within 21 days after the date of enactment (by March 10, 2009), under a pre-existing formula. The Secretary will take away and redistribute 50 percent of all unobligated funds 180 days after apportionment and any remaining unobligated funds one year after apportionment. However, an urbanized area can request an extension of the second deadline.

Capital Investment Grants - ***$750 million***
[A.XII]

- The ARRA provides an additional $750 million for discretionary grants for transit capital investment under the New Starts and Small Starts provisions. State and local government authorities should apply according to 49 U.S.C. § 5309 and 49 C.F.R. Part 611. Priority will be given to projects currently under construction or that are able to obligate funds within 150 days of the date of enactment (by July 17, 2009). Additional funds awarded under this section may not be commingled with prior year funds.

Supplemental Funding for Facilities and Equipment - ***$200 million***
[A.XII]

- The ARRA provides an additional $200 million in funding for Federal Aviation Administration (FAA) infrastructure to improve power systems, air route traffic control centers, air traffic control towers, terminal radar approach control facilities, and navigation and landing equipment. Funding may be in the form of grants, contracts, leases, cooperative agreements, or other transactions with airports. *See* 49 U.S.C. § 106(l)(6). The ARRA waives state and local cost-sharing requirements for these additional funds.

- The FAA Administrator must establish a process for the grant program within 60 days of the date of enactment (by April 18, 2009). The FAA Administrator will give priority to projects that will be completed within two years of the date of enactment (by February 17, 2011).

Public Transportation and Railroad Security Assistance - ***$150 million***
[A.VI]

- *See* Emergency Management.

Port Security Grants - ***$150 million***
[A.VI]

- *See* Emergency Management.

*Funding for Bridge Alteration: Coast Guard - **$142 million***
[A.VI]

- *See* Military.

*Supplemental Grants for Assistance to Small Shipyards - **$100 million***
[A.XII]

- The ARRA provides an additional $100 million in funding for grants to small shipyards under the Assistance to Small Shipyards Grant Program authorized by 46 U.S.C. § 54101. Guidance from the 2008 application process for the Assistance to Small Shipyards program specified that small shipyards can either apply directly for the grants or have state or local governments apply on their behalf. *See* Assistance to Small Shipyards Grant Program, 73 Fed. Reg. 1912 (Jan. 10, 2008). The Secretary of Transportation must ensure that the funds are obligated within 180 days of their distribution.

13. TRIBAL GOVERNMENTS

*Native American Housing Block Grants - **$510 million***
[A.XII]

- The ARRA provides additional funding to Native American housing authorities to rehabilitate and improve energy efficiency in public housing.

- The Department of Housing and Urban Development (HUD) will distribute half of the funds by competitive grants to eligible entities—Indian tribes or certain tribally designated housing entities (TDHEs)—that apply under the Native American Housing Assistance and Self-Determination Act of 1996. *See* 25 U.S.C. §§ 4111 *et seq.*; 24 C.F.R. Part 1000. These funds will be allocated no later than September 30, 2009. HUD will give priority to projects that spur construction and rehabilitation and create job opportunities for low-income and unemployed citizens.

- HUD will allocate the other half of the funds automatically, within 30 days of the date of enactment (by March 19, 2009), according to the formula used in FY 2008. These funds are to be used for the construction, acquisition, and rehabilitation (including energy efficiency and conservation) of Native American housing and for infrastructure development. Priority should be given to projects where contracts can be awarded within 180 days from when funds are made available to recipients.

- Recipients must obligate all funds within one year of receipt. Recipients must spend half of the funds within two years of receipt and all funds within three years. Otherwise, the HUD Secretary may recapture and reallocate the funds.

*Indian Construction Projects - **$450 million***
[A.VII]

- The ARRA allocates $450 million to the Department of the Interior, Bureau of Indian Affairs, for repair and restoration of roads, replacement school construction, school improvements and repairs, and detention center maintenance and repairs on Indian lands.

The contents of this document constitutes legal information not legal advice. Persons or individuals seeking guidance on specific facts and circumstances related to this memorandum should seek counsel.

Tribal Transportation Funding

- *See* "Transit Capital Assistance" and "Transportation Highway Infrastructure Investment" set-asides in Transportation.

*Indian Health Facilities - **$415 million***
[A.VII]

- The ARRA provides funds, to be distributed by the Indian Health Service for grants to tribal organizations for construction, maintenance, and improvement projects on Indian health facilities as well as the purchase of equipment for such facilities. Of the total additional funds, $227 million is designated for two construction projects which have already begun. The ARRA waives spending caps that would otherwise apply to annual appropriations for Indian health facility projects.

*Indian Health Services - **$85 million***
[A.VII]

- The ARRA provides funds, administered by the Department of Health and Human Services, Indian Health Service, which may be used for tribal services, including telehealth services development and related infrastructure projects despite the fact that such development is typically funded through the Indian Health Facilities account. The Indian Health Service Director has discretion to allocate funds for health information technology.

*Indian Workforce Training and Housing Improvement - **$40 million***
[A.VII]

- The ARRA package allocates $40 million for workforce training programs and housing improvement projects for tribal organizations, to be administered by the Bureau of Indian Affairs. The ARRA allocates $40 million for these workforce training and housing improvement projects.

*Indian Guaranteed Loan Program - **$10 million***
[A.VIII]

- The ARRA provides an additional $10 million in business-loan guarantees for Indians. The Department of the Interior, Bureau of Indian Affairs, guarantees loans obtained by individual Indians or tribes to stimulate Indian-owned businesses.

14. GENERAL PROVISIONS

Government Accountability Office Reviews, Reports, and Access
[A.IX]

- The Government Accountability Office must review and report on the use of funds under the ARRA by selected states and localities on a bimonthly basis. These reports will be published on a Web site established by the Recovery Accountability and Transparency Board (RATB). The Comptroller General is authorized to examine records related to the obligation and use of funds by state and local agencies and to interview employees.

The contents of this document constitutes legal information not legal advice. Persons or individuals seeking guidance on specific facts and circumstances related to this memorandum should seek counsel.

Accountability and Transparency
[A.XV]

- Before a state or local agency can receive infrastructure investment funding under the ARRA, the governor, mayor, or chief executive overseeing use of the funds must certify that any money used for infrastructure investments is spent appropriately. The certification must include a description of the investment, the total estimated cost of the project, and the amount of funds to be used. The state or local agency also must post the certification on the Web site of the RATB before receiving funds.

- Recipients of funds under the ARRA are subject to quarterly reporting requirements and oversight by federal agency inspectors. Federal agencies may adjust the limits on administrative expenditures for grants under the ARRA to help state and local government recipients of funds defray the costs of complying with reporting requirements.

- The ARRA establishes the RATB and the Recovery Independent Advisory Panels. Also, the ARRA provides whistleblower protection for state and local—but not federal—employees who report fraud, waste, or corruption affecting funds.

Other General Provisions
[A.XVI]

Several general provisions apply to funding allocations throughout the ARRA:

- Within 45 days after the date of enactment (by April 3, 2009), state governors must certify that their states will request and use funds and that these activities will create jobs and economic growth. If a governor does not accept funds provided to a state, the state legislature, by concurrent resolution, may accept the funds for state use. Funds accepted by legislation can be distributed either by formula or at the state's discretion.

- Quick-start projects are given priority, especially those that use 50 percent of the funds within 120 days after the date of enactment (by June, 17, 2009). Funds are available until September 30, 2010, unless otherwise specified. Funds cannot be used by any state or local government for any casino or other gambling establishment, aquarium, zoo, golf course, or swimming pool.

- All projects must use American iron, steel, and manufactured goods, unless (1) there are insufficient quantities available, (2) such use harms the public interest, or (3) such use would increase the total cost of the project by more than 25 percent. A waiver is granted by the head of the federal agency or department distributing the funds used for the particular project. States and local governments cannot waive the requirement unilaterally. If the agency waives the provision, the agency head must publish a detailed written explanation of this decision in the Federal Register. The ARRA states that this section shall be applied in a manner consistent with United States obligation under international trade agreements. Projects must also abide by Davis-Bacon wage rates. *See* 40 U.S.C. § 3141-42.

General Provision for Title VII
[A.VII]

- Agencies allocated funds under Title VII can transfer up to 10 percent of their allocation from one account to another account within the agency if doing so will enhance the efficiency or effectiveness of the allocation.

The contents of this document constitutes legal information not legal advice. Persons or individuals seeking guidance on specific facts and circumstances related to this memorandum should seek counsel.

Appendix:

Schedule of Key Dates

Set forth below is a summary of certain key deadlines ascertainable on the face of the ARRA. All dates set forth below are either explicitly set forth in the text of the ARRA or calculated based upon the number of calendar days from the enactment thereof. Dates determined by calculating the number of days from enactment of the ARRA are determined without regard to whether the date falls on a weekend or federal holiday and, therefore, are approximate. Legal counsel should be consulted to determine these dates with certainty.

Date	Topic	Program Name	Applicable Funds
July 1, 2008	Temporary Increase in Federal Medical Assistance Percentage ("FMAP") (Section 6(A))	States enacting more restrictive Medicaid requirements past this date are excluded from additional FMAP funding.	$89.7 billion
October 1, 2008	Clean and Drinking Water State Revolving Funds (Section 5)	Last date for incurring debt that is eligible for restructuring under the ARRA.	$6 billion
March 10, 2009	Fixed Guideway Infrastructure Investment (Section 12)	Deadline for the Secretary of Transportation to automatically distribute funds under this section.	$750 million
March 10, 2009	Highway Infrastructure Investment (Section 12)	Deadline for the Secretary of Transportation to automatically distribute funds under this section.	$27.5 billion
March 10, 2009	Transit Capital Assistance (Section 12)	Deadline for the Secretary of Transportation to automatically distribute funds under this section.	$6.9 billion
March 19, 2009	Community Service Employment for Older Americans Grants (Section 3)	Deadline for Department of Labor to increase the amount of 2008 grants awarded to grantees. All ARRA funds must be spent by July 1, 2010.	$120 million
March 19, 2009	General Provision for Funding Distributed by the Department of Transportation (Section 12)	Deadline for states to certify to the Secretary of Transportation "that the State will maintain its effort with regard to State funding for the types of projects that are funded by the appropriation."	n/a

March 19, 2009	Homelessness Prevention Fund (Section 7(C))	Deadline for HUD Secretary to establish requirements for this program.	$1.5 billion
March 19, 2009	Military Construction, Army National Guard and Air National Guard (Section 9(B))	Deadline for the Secretary of Defense to submit funding plans to Congress for planning, design and military construction projects in the U.S. that are not otherwise authorized.	$50 million each
March 19, 2009	Native American Housing Block Grants (Section 13)	Deadline for HUD to automatically distribute half the funds under this section according to the FY2008 formula.	$510 million
March 19, 2009	Public Housing Capital Fund (Section 7(A))	Deadline for automatic allocation of funds using the FY2008 formula.	$3 billion
March 19, 2009	Special Fiscal Year 2009 Transfers for Unemployment Compensation Modernization Administration (Section 3)	Deadline for funds to be transferred to state accounts in the Unemployment Trust Fund.	up to $500 million
April 3, 2009	Army Corps of Engineers Mississippi River and Tributaries Program (Section 5)	Deadline for the Secretary of the Army to file first quarterly report on the expenditure of funds under this program.	$375 million
April 3, 2009	Army Corps of Engineers Operation and Maintenance Projects (Section 5)	Deadline for the Secretary of the Army to file first quarterly report on the expenditure of funds under this program.	$2.075 billion
April 3, 2009	Bureau of Reclamation Water Resources Projects (Section 5)	Deadline for the Secretary of the Interior to file first report on the expenditure of funds under this program.	$1 billion
April 3, 2009	Other General Provisions (Section 14)	Deadline for state governors to certify that their states will request and use funds and that these activities will create jobs and economic growth.	n/a
April 18, 2009	Capital Assistance for High Speed Rail Corridors and Intercity Passenger Rail Service (Section 12)	Deadline for the Secretary of Transportation to decide how to allocate the funding between High Speed Rail Corridors and Intercity Passenger Rail Service.	$8 billion

The contents of this document constitutes legal information not legal advice. Persons or individuals seeking guidance on specific facts and circumstances related to this memorandum should seek counsel.

April 18, 2009	School Improvement Programs (Section 1(B))	Deadline for Secretary of Education to distribute McKinney-Vento funds to states.	$70 million
April 18, 2009	Special Transfers for Unemployment Compensation Modernization (Section 3)	Deadline for the Secretary of Labor to prescribe requirements in relation to the unemployment compensation modernization provisions.	Up to $7 billion
April 18, 2009	Supplemental Funding for Facilities and Equipment (Section 12)	Deadline for the FAA Administrator to establish a process for the grant program under this section.	$200 million
May 3, 2009	Neighborhood Stabilization Program (Section 7(B))	Deadline for HUD Secretary to establish criteria for grant competition for funds to purchase abandoned and foreclosed property for use as affordable housing.	$2 billion
May 18, 2009	General Provision for Funding Distributed by the Department of Transportation (Section 12)	First Reporting deadline for recipients of grants under this section.	n/a
May 18, 2009	Health Information Technology Implementation Assistance (Section 6(C))	Deadline for HHS secretary to publish notice describing program and availability of funds.	Yet to be determined
May 18, 2009	Supplemental Discretionary Grants for a National Surface Transportation System (Section 12)	Deadline for the Secretary of Transportation to publish criteria for the grant competition under this section.	$1.5 billion
June 1, 2009	Community College and Career Training Grants (Section 3)	Deadline for Secretary of Labor to promulgate guidelines for the submission of grant proposals.	$90 million
June 17, 2009	Capital Assistance for High Speed Rail Corridors and Intercity Passenger Rail Service (Section 12)	Deadline for the Secretary of Transportation to provide guidance to applicants on grant terms, conditions, and procedures under this section.	$8 billion
June 17, 2009	Grants-in-Aid to Airports (Section 12)	Deadline for the Secretary of Transportation to grant half the funds under this section.	$1.1 billion

June 17, 2009	Other General Provisions (Section 14)	Deadline for projects to use 50 percent of the funds allocated to them in order to be considered "quick-start."	n/a
July 1, 2009	Special Education (Section 1(B))	Deadline for Secretary of Education to determine amounts to be distributed as State Incentive Grants.	$12.2 billion
July 17, 2009	Capital Investment Grants (Section 12)	Projects not under construction by the date of enactment must be able to obligate funds by this date in order to receive priority funding.	$750 million
July 17, 2009	Neighborhood Stabilization Program (Section 7(B))	Applications due to HUD for grants to purchase abandoned and foreclosed property for use as affordable housing.	$2 billion
August 16, 2009	General Provision for Funding Distributed by the Department of Transportation (Section 12)	Second Reporting deadline for recipients of grants under this section.	n/a
September 30, 2009	Native American Housing Block Grants (Section 13)	Deadline for HUD to distribute half the funds by competitive grant under this section.	$510 million
September 30, 2009	Public Housing Capital Fund (Section 7(A))	Deadline for allocation of funds for grants, including those that leverage private funding or finance energy conservation renovations or retrofits.	$1 billion
December 1, 2009	Education for the Disadvantaged (Section 1(B))	Deadline for local educational agencies to file with the state educational agency a school-by-school listing of per-pupil expenditures from state and local resources during the 2008-2009 academic year. (See March 31, 2010)	$13 billion
December 31, 2009	Extension of Emergency Unemployment Compensation Program (Section 3)	End of extension of period during which individuals are eligible for extended unemployment benefits.	Indeterminate
January 1, 2010	Competitive Grants to States and Indian Tribes for the Development of Loan Programs to Facilitate the Widespread Adoption of Certified EHR Technology (Section 6(C))	Date awards may begin to be granted.	Yet to be determined

The contents of this document constitutes legal information not legal advice. Persons or individuals seeking guidance on specific facts and circumstances related to this memorandum should seek counsel.

January 1, 2010	Full Federal Funding of Extended Unemployment Compensation for a Limited Period (Section 3)	End of full federal funding for extended unemployment compensation benefits. (Can be extended; see June 1, 2010)	Indeterminate
January 1, 2010	Increase in Unemployment Compensation Benefits (Section 3)	End of period during which federal government will finance extra $25 per week in unemployment compensation.	Indeterminate
February 17, 2010	Clean and Drinking Water State Revolving Funds (Section 5)	Deadline for beginning construction if projects are to receive priority status.	$6 billion
February 17, 2010	General Provision for Funding Distributed by the Department of Transportation (Section 12)	Third Reporting deadline for recipients of grants under this section.	n/a
February 17, 2010	Grants-in-Aid to Airports (Section 12)	Deadline for the Secretary of Transportation to grant all the funds under this section.	$1.1 billion
February 17, 2010	HOME Investment Partnerships Program (Section 7(A))	Deadline for state agencies to commit at least 75 percent of the funds.	$2.25 billion
February 17, 2010	Supplemental Discretionary Grants for a National Surface Transportation System (Section 12)	Deadline for the Secretary of Transportation to announce grant awards under this section.	$1.5 billion
February 17, 2010	Training Funding (Section 3)	Deadline for the Secretary of Labor to issue procedures regarding the distribution of funds held in reserve if additional training funds are deemed necessary.	$853.75 million
March 31, 2010	Education for the Disadvantaged (Section 1(B))	Deadline for state educational agencies to file with the Secretary of Education a school-by-school listing of per-pupil expenditures during the 2008-2009 academic year. (See Dec. 1, 2009)	$13 billion
June 1, 2010	Full Federal Funding of Extended Unemployment Compensation for a Limited Period (Section 3)	End of extension period with respect to certain workers for full federal funding for extended unemployment compensation benefits.	Indeterminate

June 30, 2010	Job Corps Centers (Section 3)	Deadline for obligation of construction, rehabilitation, and acquisition funds for Job Corps Centers.	$250 million
June 30, 2010	Workforce Investment Programs (Section 3)	End of period during which additional Workforce Investment Act funds are available.	$3.95 billion
September 30, 2010	Broadband Technology Opportunities Program (Section 11)	Deadline for awards under this section to be made.	$4.35 billion
September 30, 2010	Community Oriented Policing Services (Section 8(A))	End of additional funding for career law enforcement officers.	$1 billion
September 30, 2010	Corporation for National and Community Service Programs (Section 3)	Existing AmeriCorps grantees whose grants were made prior to this date can take advantage of funds in the ARRA.	$89 million
September 30, 2010	Extension of TANF Supplemental Grants (Section 3)	End of extension period for TANF supplemental grants.	$319 million
September 30, 2010	NSF Research and Related Activities (Section 11)	Extra funding for "research and related activities" is available until this date.	$2.5 billion
September 30, 2010	Other General Provisions (Section 14)	All ARRA funds are available until this date unless otherwise specified.	n/a
September 30, 2010	State Unemployment Insurance and Employment Services Grants (Section 3)	End of period during which additional unemployment insurance and employment services funds are available.	$400 million
September 30, 2010	Temporary Increase in Federal Medical Assistance Percentage ("FMAP") (Section 6(A))	Deadline for states to submit form regarding how additional FMAP funds were expended.	Indeterminate
December 31, 2010	Extension of the Qualifying Individual Program (Section 6(A))	End of twelve-month extension of Qualifying Individual Program.	$562.5 million
December 31, 2010	Extension of Transitional Medical Assistance ("TMA") (Section 6(A))	End of eighteen-month extension of work-related TMA.	Indeterminate
December 31, 2010	Temporary Increase in Federal Medical Assistance Percentage ("FMAP") (Section 6(A))	End of period during which each state's FMAP is increased by 6.2 percent.	$89.7 billion

The contents of this document constitutes legal information not legal advice. Persons or individuals seeking guidance on specific facts and circumstances related to this memorandum should seek counsel.

January 1, 2011	Election to substitute grants to states for low-income housing projects in lieu of low-income housing credit (Section 7(A))	Deadline for states to use the funds provided for in this section.	Yet to be determined
February 17, 2011	General Provision for Funding Distributed by the Department of Transportation (Section 12)	Fourth Reporting deadline for recipients of grants under this section.	n/a
February 17, 2011	Grants-in-Aid to Airports (Section 12)	Projects must be scheduled to be finished by this date in order to receive priority funding.	$1.1 billion
February 17, 2011	HOME Investment Partnerships Program (Section 7(A))	Deadline for state agencies to demonstrate that project owners have spent at least 75 percent of the funds.	$2.25 billion
February 17, 2011	Supplemental Funding for Facilities and Equipment (Section 12)	Projects must be scheduled to be finished by this date in order to receive priority funding.	$200 million
October 1, 2011	Special Transfers for Unemployment Compensation Modernization (Section 3)	Final date when incentive payments for unemployment compensation modernization will be paid to states.	up to $7 billion
February 17, 2012	General Provision for Funding Distributed by the Department of Transportation (Section 12)	Final Reporting deadline for recipients of grants under this section.	n/a
February 17, 2012	HOME Investment Partnerships Program (Section 7(A))	Deadline for state agencies to demonstrate that project owners have spent all the funds.	$2.25 billion
February 17, 2012	Supplemental Discretionary Grants for a National Surface Transportation System (Section 12)	Projects must be scheduled to be finished by this date in order to receive priority funding.	$1.5 billion

Items Not Included in the March 19 Economic Stimulus Bill

	ARRA Page Ref.	FY	Department	RDU/ Component	PFT	PPT	NP	Description	General Funds	Federal Funds	Other Funds	Fund Source	Total Funds
Operating Items													
1	p. 314-316	FY2009 - FY2010 Operating	Administration	Finance				This provides for a federally funded subsidy for COBRA health insurance coverage to assistance eligible individuals (AEIs). AEI is defined as an individual who is involuntarily terminated from employment between September 1, 2008 and December 31, 2009, who elects to receive COBRA coverage and pays 35% of the premium due as of March 1, 2009. The employer pays the remaining 65% of the premium and is reimbursed by the federal government by withholding premiums paid from payroll taxes reported on the quarterly 941 employer tax form.		1,489.0			1,489.0
2	p. 16	FY2009 - FY2010 Operating	Administration	Violent Crimes Compensation Board				Funding will be used to pay claims for assistance received from Alaskans and visitors to Alaska that suffer financial losses that are the direct result of violent crimes. Categories of expenses covered include mental health counseling, medical expenses, lost wages, funeral expenses, and other expenses as authorized by statute.		149.4			149.4
3	p. 70	FY2009 - FY2010 Operating	Commerce	Alaska State Community Services Commission				Funding will provide grants to existing AmeriCorps grantees for performing volunteer programs.		1,500.0			1,500.0
4	p. 67	FY2009 - FY2010 Operating	Education	Student and School Achievement				ESEA Title I-A Grants to LEAs and School Improvement Grants will help school districts mitigate the effect of the reduction in local revenues and State support for education by distributing funding to schools and school districts with a high percentage of students from low-income families, and by providng funding for academic assessment, LEA and school improvement.		40,000.0			40,000.0
5	p. 68	FY2009 - FY2010 Operating	Education	Student and School Achievement				ESEA Title II-D Education Technology Grants will improve student achievement through the use of technology in elementary and secondary schools.		3,210.0			3,210.0
6	p. 68	FY2009 - FY2010 Operating	Education	Student and School Achievement				McKinney Vento Homeless assistance Grants to ensure that homeless children, including preschoolers and youth, have equal access to free and appropriate education.		328.0			328.0
7	p.68	FY2009 - FY2010 Operating	Education	Student and School Achievement				IDEA Part B (611 and 619) Grants to States, Preschool Grants to provide services to students with disabilities ages three through twenty-one who are enrolled in special eduation programs. The state will receive the allocation as a grant and pass-through to LEAs based on the number of children with disabilities who are receiving special education and related services. Funding will also be provided for services to children with disabilities ages three through five (and optionally to two-year olds who turn three during the school year). The state will receive the allocation as a grant and pass-through to LEAs based on population, including consideration for the number of children living in poverty.		34,300.0			34,300.0
8	p. 168	FY2009 - FY2010 Operating	Education	Student and School Achievement				State Stabilization Funds (base) will be distributed by the department to LEAs based on their relative share of funding under Title I-A grants for 2009. LEAs may use the funds for activities authorized by ESEA, IDEA, Adult Family Literacy Act, Carl D. Perkins Career and Technology Act, or for the repair, modernization or renovation of public school facilities that is consistent with State law.		93,043.0			93,043.0
9	p. 5	FY2009 - FY2010 Operating	Education	Child Nutrition				Temporary Emergency Food Assistance Program will provide funding for the emergency food assistance program, allocated as a grant to the State distributing agency who then distributes to public or private nonoprofit organizations that provide food and nutrition assistance to the needy.		50.0			50.0
10	p. 5	FY2009 - FY2010 Operating	Education	Child Nutrition				National School Lunch Program Grants provides funding to the state for National School Lunch Program equipment assistance in proportion to the State's administrative expense allocation. In turn, the state will provide competitive grants to school food authorities based on the need for equipment assistance in participating schools. Priority given to schools in which at least 50% of the students are eligible for free or reduced priced meals.		286.0			286.0
11	p. 57	FY2009 - FY2010 Operating	Education	Alaska State Council on the Arts				National Endowment for the Arts Funding to provide an additional distribution to State Art Agencies. The Arts Council submitted an application for the additional funds by the March 13, 2009 deadline.		300.0			300.0

Items Not Included in the March 19 Economic Stimulus Bill

	ARRA Page Ref.	FY	Department	RDU/ Component	PFT	PPT	NP	Description	General Funds	Federal Funds	Other Funds	Fund Source	Total Funds
12	p. 369	FY2009 - FY2010 Operating	Health & Social Srvcs	Health Care Services/Medical Assistance Administration	4			This request will allocate funds for Medicaid provider Health Information Technology (HIT) adoption and Electronic Health Records (EHR) payments. Administrative funding is to be used to coordinate with other state or local HIT projects, national standards setting, and coordinate with other agencies to assure interoperability of systems and avoid duplicate provider payments.	40.0	2,000.0			2,040.0
13	p. 61	FY2009 - FY2010 Operating	Health & Social Srvcs	Public Assistance/Child Care Benefits				Child Care Development Block Grants - increased funding to improve the quality of child care and provide for the expansion of child care services. These funds cannot be used to supplant state funding. Of this allotment, $333.7 is targeted for quality expansion and $193.2 is for improving the quality of infant and toddler care.		3,153.1			3,153.1
14	p. 5	FY2009 - FY2010 Operating	Health & Social Srvcs	Public Assistance/Public Assistance Administration			4	Supplemental Nutrition Assistance Program (SNAP) - formerly Food Stamps - funding for increased administrative costs beginning April 1, 2009. This expands the benefit but is not an expansion of the program. Includes funding for 4 non-perm staff to assist with increased caseload, outreach and administrative process revisions for greater efficiency.		462.0			462.0
15	p. 5	FY2009 - FY2010 Operating	Health & Social Srvcs	Public Assistance/Women, Infants and Children				Additional funds to support Women, Infants and Children (WIC) operations and establish, improve or administer WIC management information system. Funds are to be used for extension and expansion of programs.		777.7			777.7
16	p. 63	FY2009 - FY2010 Operating	Health & Social Srvcs	Public Health/Chronic Disease Prevention and Health Promotion				Increased funding for immunization, prevention and wellness and infection reduction grants. The department assumes that current Health and Human Serviecs (HHS) requirements apply.		2,000.0			2,000.0
17	P. 65	FY2009 - FY2010 Operating	Health & Social Srvcs	Children's Services/Infant Learning Program Grants				Expand Infant Learning Program grants established as part of the Individuals with Disabilities Education Act, Part C.. Department will focus on one-time infrastructure improvements; any service expansions are intended to be backfilled with enhanced Medicaid claiming through program changes.		1,000.0			1,000.0
18	p. 62	FY2009 - FY2010 Operating	Health & Social Srvcs	Senior and Disabilities Services/ Senior Community Based Grants				Administration on Aging, Home Delivered Meals and Congregate Meals Continue and enhance food security for current eligible groups. These funds are limited to senior meal programs only.		485.0			485.0
19	p. 59-60	FY2009 - FY2010 Operating	Labor	Employment Training Services	8			These funds will be used to hire an additional 8 full time, front-line service delivery staff to assist with the increased volume of labor exchange customers and unemployment insurance claimants. Six Employment Security Specialist II positions (qualified in case management) will provide job search assistance, labor market information, case management, and other reemployment services in the job centers. Two Community Development Specialist positions will provide career support and training services to unemployment insurance claimants who need training to upgrade skills in order to obtain employment. Funding will also be used to support salary and benefit costs of existing staff, travel for trainers, enhancements to the Alaska Labor Exchange System (ALEXsys) and equipment replacement and upgrade to support the federal Stimulus effort. These efforts include continuing to provide front-line employment and reemployment services, and career support and training services, to an increased volume of labor exchange customers. The outcome will be to increase the number of customers receiving staff assisted services by approximately 2,250		4,304.7			4,304.7
20	p. 59	FY2009 - FY2010 Operating	Labor	Employment Training Services				Funding will support additional training and employment opportunities for unemployed low-income seniors. Grantees will expand the number of Senior Community Service Employment Program (SCSEP) participants assigned to community service work, especially in those growth industries emphasized in the Recovery Act (e.g., health care, child care, education, green jobs, energy efficiency and environmental services) and in expanded public service activities that utilize Recovery Act funds. The funds will be used to provide high quality job training, on-the-job training and employment assistance to an estimated 80 low income older workers and will assist employers that are faced with the challenges of today's workplace.		507.3			507.3

Items Not Included in the March 19 Economic Stimulus Bill

	ARRA Page Ref.	FY	Department	RDU/ Component	PFT	PPT	NP	Description	General Funds	Federal Funds	Other Funds	Fund Source	Total Funds
21	p. 329	FY2009 - FY2010 Operating	Labor	Unemployment Insurance				Funds will be used to upgrade computers on the department's annual replacement schedule, UI tax and benefit program enhancements, software and associated data processing costs, and office equipment. The funds will support a UI claim center phone call routing software package along with licensing and installation charges. They will also purchase a Tax auditing software package; web based Quality Control audit software; software to record and retrieve claim center calls for staff performance review; software for managing UI workflow and documentation processes; and computer enhancements to existing Employment Security Division on-line systems integration.		1,115.7			1,115.7
22	p. 58-59	FY2009 - FY2010 Operating	Labor	Business Services				Additional funding will be utilized to increase workforce development training opportunities in the Workforce Investment Act programs for Adult $1,679.5, Dislocated Worker $3,546.4, and Youth $3,936.1. It will be used for personal services to support existing staff engaged in Stimulus related activities, travel to monitor grantees, commodities and contractual services for normal office and staff related costs, and contractual services and grant funds to provide training. It is estimated to provide training opportunities to an additional 729 Adult, 733 Dislocated Worker and 1,681 Youth participants.		9,161.9			9,161.9
23	p. 69	FY2009 - FY2010 Operating	Labor	Client Services				Funding will provide vocational rehabilitation services and grants to disabled individuals. These services include assessment for determining eligibility for services, job development, orientation and mobility services, and supported employment services.		1,800.0			1,800.0
24	p. 266	FY2009 - FY2010 Operating	Labor	Employment and Training Services				The ARRA reauthorized and permanently expanded the Trade Adjustment Assistance program. Eligibility was expanded to include workers in the services sector. The funds will be utilized to support salary and benefit costs of existing staff to provide employment and case management services to increased participants to include comprehensive and specialized assessment of skill levels and service needs; development of an individual employment plan; information on how to apply for financial aid; information on training available in local and regional areas; short-term prevocational services; individual career counseling; employment statistics information; and information relating to local occupations that are in demand and the earnings potential of such occupations. In addition, the Trade Adjustment Assistance database will need to be upgraded as mandated by new federal regulations. The estimated outcome is 115 participants will utilize Trade Adjustment Assistance program benefits such as job search activities, relocation benefits, training, health care tax credits and trade readjustment allowance benefits.		350.0			350.0
25	p. 69	FY2009 - FY2010 Operating	Labor	Independent Living Rehabilitation				These funds will be granted to the four Centers for Independent Living (CILs) to support activities that lead to competitive employment, independent living and business ownership by Alaskans with disabilities. Activities include providing home accessibility modifications, adaptive equipment and/or services that allow people to remain in their homes and communities. Funds will also be used to expand independent living services statewide, including rural and remote areas of the state, by encouraging partnerships, collaborative efforts, training and outreach. The funds will also support operations of the State Independent Living Council (SILC), examining the State Plan for Independent Living resource plan to determine if it needs to be updated.		246.2			246.2
26	p. 16	FY2009 - FY2010 Operating	Public Safety	Alaska State Troopers/Special Projects				Funds are to be used to enhance law enforcement's response to online child victimization and child pornography cases. The department will use the funds to cover personal services costs of investigators and associated supplies and equipment. The Anchorage Police Department is the only eligible applicant in Alaska and is expected to subgrant these funds to the department.		50.0			50.0
27	p. 16	FY2009 - FY2010 Operating	Public Safety	Alaska State Troopers/ Narcotics Task Force	6			Justice Assistance Grant (JAG) will be used to cover the personal services costs of new trooper positions, travel, training, supplies and sub-grants to other state agencies and to units of local government to fund projects supporting approved JAG purpose areas.		5,821.0			5,821.0

Items Not Included in the March 19 Economic Stimulus Bill

	ARRA Page Ref.	FY	Department	RDU/ Component	PFT	PPT	NP	Description	General Funds	Federal Funds	Other Funds	Fund Source	Total Funds
28	p. 16	FY2009 - FY2010 Operating	Public Safety	Council on Domestic Violence and Sexual Assault/Council on Domestic Violence and Sexual Assault				Victim compensation and assistance. These federal funds may be used to provide services to victims of criminal violence. The funds will be sub-granted to approved victim services programs to provide immediate safety and support to victims of domestic violence and sexual assault in Alaska.		545.0			545.0
29	p. 15	FY2009 - FY2010 Operating	Public Safety	Council on Domestic Violence and Sexual Assault/Council on Domestic Violence and Sexual Assault				Services*Training*Officers*Prosecutors (STOP) Grant. These funds may be used to provide for law enforcement, prosecution and victim services enhancements such as training public safety and court-related personnel, expanding specialized units and enhancing technology. Funds will be sub-granted to law enforcement and prosecutorial agencies, courts and approved victim services programs.		803.6			803.6
30	p. 335, Sec. 2104	FY2009 - FY2010 Operating	Revenue	Child Support Services Division				The division had originally requested a $1.9 million fund source change from RSS to GF Match. Neither the House or Senate Finance Subcommittee budgets include that change. The combination of a change in federal policy that now allows federal incentive funds to be used as match and the unexpected level of FY10 carryforward due to high PFD collections now result in just $400.0 GF Match being required. The $400.0 GF Match is necessary to collect the federal funds.	400.0	612.5	(1,012.5)	Receipt Supported Services	0.0

Capital Projects													
32	p. 103		Commerce					Community Development Block Grant Program This program provides grants (not to exceed $850,000) to municipalities for planning activities, infrastructure projects, and economic development activities which benefit low- to moderate-income individuals.		679.9			679.9
33	p. 65		Commerce					Community Services Block Grant Program The CSBG program is designed to provide a range of services which assist low-income people to attain skills, knowledge and motivation necessary to achieve self-sufficiency. The program may also provide low-income people immediate life necessities such as food, shelter, medicine, etc. As authorized by federal Public Law 97-35, the U.S. Department of Health and Human Services (H&HS) has designated 950 Community Action Agencies (CAAs) -- all of whom may then receive federal funding that passes through their appropriate state agency. Within Alaska the federal H&HS has designated only one CAA. That entity is the non-profit corporation Rural Alaska Community Action Program, referred to as RurAL CAP.		3,960.0			3,960.0
34	p. 56		Environmental Conservation					Air Non-Point Mobile Source Stimulus Projects include diesel emission reduction, increasing the fuel efficiency of stationary source diesel power generation in Alaska villages, coupling use of ultra low sulfur diesel with oxidative catalysts or particulate traps, development and use of fish oil and waste vegetable oil derived biodiesel, and installation of anti-idling technologies. These funds will be managed by the Air Non-Point Mobile Source program.		2,000.0			2,000.0
35			Revenue					AHFC - State Energy Program U.S. Department of Energy (DOE) funds for State Energy Program (SEP) special projects such as building technologies, codes and standards, wind and power technologies, renewable energy for remote areas, or transportation technologies.		28,563.0			28,563.0
36			Revenue					AHFC - Weatherization Program U.S. Department of Energy (DOE) funds to assist low- and moderate-income families attain decent, safe, and affordable housing through the weatherization and rehabilitation of existing homes. Weatherization provides for fire safety through furnace and electrical repairs, education, chimney and woodstove repairs, and egress windows (installed during bedroom window replacements).		18,466.2			18,466.2
37			Revenue					AHFC - Energy Efficiency and Conservation Block Grants U.S. Department of Energy (DOE) funds for energy efficiency and conservation activities for communities, including but not limited to: developing/implementing an energy efficiency and conservation strategy; retaining technical consultant services to assist in the development of such a strategy.		8,500.0			8,500.0

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

March 19, 2009

The Honorable Mike Chenault
Speaker of the House
Alaska State Legislature
State Capitol, Room 208
Juneau, AK 99801-1182

Dear Speaker Chenault:

I am transmitting a second appropriation bill to implement the $787 billion American Recovery and Reinvestment Act of 2009 (ARRA). This bill contains authorization requests for capital projects designed to create jobs and promote economic growth within the State of Alaska. This appropriation bill does not include every ARRA program that runs to or through the State of Alaska.

Under the direction of the Office of Management and Budget, I have asked our departments to review the Federal spending package with jobs for Alaskans in mind. This is particularly important because I must certify that all the funds I am requesting on behalf of the state will create jobs and promote economic growth. However, because I cannot yet in good conscience certify that all funds in the Federal stimulus package will be used to create jobs and stimulate our economy, I am requesting only job-ready funding and am encouraging a public discussion through the legislative process.

There are three categories of funding that are not included in this legislation: programs with potential strings attached for receipt of the funds; competitive funding where the federal guidance and requirements are uncertain or unknown; and operating funds that increase existing federally funded programs above what is already included in the state budget to provide services to Alaskans.

Programs that have been left out of this bill include those with outstanding questions, such as the impact on Alaskans of "strings" Congress attached to the funding, and tenuous or unclear links to job creation or economic growth. Descriptions of the specific issues for each program that has not been included in this legislation are set out in more detail later in this letter.

My concerns about ARRA spending too much on operating programs that leave the state responsible to pay for expanded services after federal funding ends were stated even before it was passed by Congress. I was disappointed when the final bill cut billions in spending for infrastructure and jobs in favor of operating programs. Despite such changes to the final version of ARRA, Congress maintained a requirement for Governor's to certify that ARRA funds will be used to create jobs and promote economic growth within their respective states.

I respectfully request your assistance and that of the entire Legislature to hold hearings for review, and allow public testimony and debate on the projects included for funding in the bill as well as programs that have not been included. I understand the amount of hard work this effort will require and that this approach is definitely not the easy way out. The easy way would be to blindly say "yes" to all ARRA federal funds without concern, review, or discussion for the consequences to the state, individual Alaskans, and the nation. Our efforts at review and discussion would likely be made easier by issuance of clear final guidance documents from all federal agencies and adequate answers to specific questions we have posed about certain programs.

The appropriation bill I am transmitting today contains capital projects requests totaling $252.5 million, with all but $1.0 million coming from economic stimulus funds. Capital projects requested include $20.7 million for education and job training, $68.6 million for water and sewer projects and storage tank replacements, $3.0 million for the Alaska Vocational Training Center, $2.5 million for Fire Fuels and Forest Management, $39.6 million for public housing projects through the Alaska Housing Finance Corporation, and $116.0 million for the University of Alaska Fairbanks Research Vessel. We have also included two $1.0 million placeholders for competitive grant opportunities for state agencies and the University.

After careful review of the assurances and requirements in ARRA under each title for receipt of federal economic stimulus funds, there are several items that are not included in this appropriation bill. Some items require statutory changes in order to receive and expend these funds, or, in some instances, we have not yet obtained sufficient information upon which to base recommendations to you. Following is a list of the items and policy questions for legislative consideration:

Unemployment Insurance - after review of the requirements to expand unemployment insurance benefits, I will not propose a revision to Alaska's current law to permanently change the calculation of unemployment insurance benefits that would result in a cost increase to employers and businesses. The statutory change would require that Alaskan businesses pick up this increased cost once the federal funds are no longer available. Increasing taxes on business is simply not the way to stimulate the economy. $15 million would be available to the state if the legislature makes a statutory change to comply with the new requirement. Once those funds are no longer available, the Department of Labor estimates a $2 million annual cost to the UI Trust Fund in the future.

I would like to note that Alaska has already moved forward on accepting the additional $25 a week for unemployment benefits provided in ARRA. The additional weekly benefit is 100 percent federally funded and will benefit unemployed Alaskans and support the stability of Alaska's economy. The $25 additional benefit is payable for weeks of unemployment beginning February 22 2009 and continuing through the end of 2009 with a phase out for existing claims through July 3, 2010.

Energy – three assurances that present challenges for Alaska are required in order to receive energy funds: (1) implementation of a general policy that ensures that electric and gas utility financial incentives are aligned with helping customers use energy more efficiently; (2) implementation of a statewide building energy code; and (3) an implementation plan for both pieces in order to achieve 90% compliance on new or renovated buildings within eight years. Without these assurances, the state will not qualify for $28.6 million for the State Energy Program, $18.5 million for Weatherization, and $8.5 million for Energy Efficiency and Conservation Block Grants.

This administration is taking a proactive approach to address areas where federal requirements in the economic stimulus bill create significant hurdles for receipt of funds, such as the adoption of a statewide building energy code. We currently are working with the U.S. Department of Energy to determine possible solutions that will allow Alaska to receive these funds.

Air Quality Grants - Granting authority is needed by the Department of Environmental Conservation (DEC) to receive and expend approximately $2 million from the Environmental Protection Agency (EPA) for the Diesel Emission Reduction Program. The goal of the program is to reduce diesel emissions with new technologies and to further advance these technologies to a larger audience.

This is not a new program; DEC currently has a grant award from EPA and is already spending this funding on diesel emission reduction projects. Current funding is distributed to other government agencies such as the Alaska Energy Authority to increase the fuel efficiency of stationary source diesel power generation, the Alaska Railroad, and the Department of Transportation & Public Facilities for diesel equipment retrofit. Statutory language would be necessary for DEC to identify grantees beyond government agencies, such as smaller private sector businesses, that are looking to forward more efficient diesel fuel usage.

Broadband and health information technology grants – These are two other areas that are not included in the appropriation bill. Gaining sufficient guidance from the federal agencies and a clear understanding of the requirements for receipt of the funds require additional time in order to develop the requests for these significant program areas. These programs fall under the long-range economic development strategies in the economic stimulus legislation. The administration is closely monitoring the evolution of guidelines in the relevant federal agencies in order to determine the benefits and timing of these funds.

Other competitive grant funds for state agencies are also not included in this appropriation bill due to lack of information regarding the application process, amounts available, requirements, and other needed guidance. The Legislative Budget & Audit (LB&A) Committee process is certainly an option for legislative consideration of funding requests during

the interim or the FY2010 supplemental process is another option once more information on these programs becomes available. We have included a statewide placeholder for capital project grants for state agencies and also for the University to allow for LB&A consideration should agencies be successful in obtaining grant funds for capital projects.

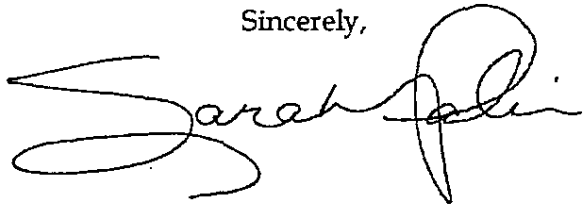
ARRA also provides competitive grant funding to non-state entities, communities, and organizations through the discretion of federal agencies that will flow directly to project applicants. We are communicating information to interested parties and guiding them to <Recovery.gov>, <Grants.gov>, and federal department websites. We are also posting information on the state website at alaska.gov/recovery.

In conclusion I am required to certify that the requests I am forwarding for legislative approval will meet the requirements of the ARRA to create jobs and promote economic growth in Alaska. We are open to discussions on the operating funds that are not included in this appropriation bill. These program increases should be fully debated as part of the ongoing budget process. The Legislature has been working diligently on the operating budget for the next fiscal year to provide for the needs of Alaskans. Simply expanding these programs based on receipt of economic stimulus funds does not meet the ARRA certification requirement and creates an unrealistic expectation that the state will continue these programs when the federal funds are no longer available.

The federal economic stimulus package will have profound implications for Alaska and the nation. The legislative process to consider proposed ARRA spending is crucial to developing a responsible approach to use of these funds. When the final tally of spending and borrowing is added up, current and future generations of Alaskans and all Americans will be required to pay what amounts to the biggest credit card bill in history.

I appreciate your consideration of this legislation.

Sincerely,



Sarah Palin
Governor

American Recovery and Reinvestment Act of 2009 **FY2009 Request:** **$1,000,000**
Statewide Competitive, Discretionary, and Incentive Grants **Reference No:** **48442**

AP/AL: Appropriation **Project Type:** Economic Assistance
Category: Development
Location: Statewide **Contact:** Karen J. Rehfeld
House District: Statewide (HD 1-40) **Contact Phone:** (907)465-4660
Estimated Project Dates: 03/16/2009 - 09/30/2014

Brief Summary and Statement of Need:
Congress has passed and President Obama has signed the American Recovery and Reinvestment Act of 2009 (ARRA). The purpose of the federal appropriation bill is: "Making supplemental appropriations for job preservation and creation, infrastructure investment, energy efficiency and science, assistance to the unemployed, and State and local fiscal stabilization, for the fiscal year ending September 30, 2009, and for other purposes." This capital project ensures that the State of Alaska can receive and expend any economic stimulus funding from the ARRA that departments become eligible for through competitive, discretionary or incentive grants.

Additional Information / Prior Funding History:
No prior funding history.

Project Description/Justification:
Agencies of the Executive Branch do not yet have comprehensive information about the competitive, discretionary, or incentive grants for which they may be eligible to apply. Rather than have a "placeholder" capital grant appropriation in each department, this "placeholder" appropriation is applicable to all departments. In the event that a department is awarded an economic stimulus capital grant, with this enacted appropriation, the department will be able to comply with the requirements of AS 37.07.080(h).

House District: Statewide (HD 1-40)
Contact Phone: (907)465-3379
Estimated Project Dates: 03/16/2009 - 09/30/2010

Brief Summary and Statement of Need:
Economic Stimulus (ES) funding provides support to mitigate hazardous fuels to reduce risk to communities from catastrophic wildfire; Community Wildfire Protection Planning and Firewise Education; enhanced local community energy independence through wood to energy projects and community forestry. This project meets the mission of continued protection, development, and management of the State's natural resources, by enlisting cooperation at the local level throughout Alaska. ES funding from the US Forest Service and ES funding for local governments will be used for project-specific forestry and fire work.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total

Additional Information / Prior Funding History:
New project - no prior funding history

Project Description/Justification:
This project supports the Department's mission to develop, conserve, and enhance natural resources for present and future Alaskans by delivering federally and locally funded forest management and development, community forestry, and hazardous fuels reduction programs. AS 41.17.030 gives management of state forests to the Department of Natural Resources. The threat of catastrophic wildland fires in the urban interface areas in the state is increasing as the citizens of Alaska continue to move into the forested areas of the state, increasing fire risk. Division of Forestry has an unprecedented opportunity to put Alaskans to work, especially those from rural communities where unemployment is high and seasonal, and has opportunity to reduce the build up of hazardous fuels. These federal funds from the American Recovery and Reinvestment Act (ARRA) will allow the Division to improve and enhance the ability to support both resources and wildland fire programs that benefit the citizens and resources of Alaska and create jobs.

Through economic stimulus funding from the USDA Forest Service, Forestry can quickly implement hazardous fuels reduction and wood to energy projects that will minimize the risk of wildland fire to

homes and community infrastructure while providing much needed wood energy and employment. A common thread for each of the hazard fuel reduction projects will be the additional training for Alaska's Type II firefighting crews to upgrade their capabilities in tree felling and sawyer skills. This will enable crews to attain a critical requirement in the Type II-Initial Attack certification process. This higher crew rating will improve the crew's ability to compete for fire assignments in state and in the Lower 48 jurisdictions during future fire seasons.

Wood to energy projects stimulate local economies, aid Alaskans in becoming more energy independent, and will decrease local energy costs. Funds can go to local vendors and local governments supporting local economies and jobs as well improving conditions and capabilities. Forest restoration and productivity on Alaska Native Lands and State land from pre-commercial thinning provides the immediate benefits of road infrastructure repair, fish habitat restoration, water quality improvement and enhanced forest growth and yield on private lands and provides the long term benefits of enhancement to forest product and fishing industries, enhanced community planning for wildfires, hazardous fuel mitigation and an active Firewise education program. Programs receiving benefit from ARRA funding include but are not limited to:

- Forest resources and management
- Insect and Disease projects – Invasive pests
- Community Forestry
- Natural Resources Intern Program
- Forest Stewardship
- Forest Practices
- Forest Resource Inventory
- Hazardous Fuels Mitigation
- Prevention and education emphasizing Firewise concepts
- Provide funding for the development of Community Wildfire Protection Plans

The Project does not directly raise state revenue. However, it expands the state's effectiveness in both forest management and wildland fire management.

Federal Economic Stimulus funds of up to $1.5 million will pass through the Division of Forestry to local governments for project specific forestry and fire work. In some cases, the local governments will contract with the Division of Forestry to implement projects. The $1.0 million request for SDPR is for authorization to receive funds and provide services to local governments.

Why is this Project Needed Now?

This project will allow the Division to address one-time unfunded project needs in both forest resources and hazardous fuels reduction. The State has the opportunity to reduce risks to public health and safety (i.e., through wildland/urban interface education, hazardous fuel mitigation), focus on getting wood to energy, and put federal funding into local economies. Benefits from the proposed projects bolster local security from mitigation of hazardous fuels and strengthen local communities, improve climate for residential expansion and business opportunities and enhance local community infrastructure (trees).

Specific Spending Detail:

LINE ITEM	DOLLAR AMOUNT	DESCRIPTION (text)
Personal Services	$ 1,000,000	Non-perm firefighting crews to perform hazard fuel mitigation work. Firewise education, forestry intern crew expansion, project coordinators from non-perm or seasonal extensions to manage projects with boroughs and municipalities.
Travel	$ 50,000	Travel costs associated with statewide hazardous fuels mitigation and wood to energy projects
Services	$ 250,000	Contractual Services related to ARRA projects, including mechanical fuels treatment contracts.
Commodities	$ 100,000	Miscellaneous supplies for hazard fuel reduction projects, Firewise Education, Community Wildfire Protection Planning,
Grants	$1,100,000	Pass thru grants to cities and boroughs, and local govt. for community forestry projects. Note: Actual expenditures will depend on which projects are identified by the USFS.

**Note - For fire fuel mitigation crews, the state will create limited duration short-term non-perm positions (approximately 60 to 80) to work at specific project locales.

The one-time projects are estimated to put almost 200 people to work in the private sector or with the state in non-perm firefighting/fuels crews. The State does not bear the burden of continued operating budget obligations for the projects and services. As fuel treatment projects are completed in a geographic location, the vacant non-perm positions will be transferred to new duty stations for reuse with new crew hires on new projects. Project management costs will be billed as direct costs.

Project Support:
Broad support is anticipated from the public, local government, volunteer fire departments, Alaska Native organizations, numerous state, and federal government cooperating agencies, and grantees.

Project Opposition:
No opposition is anticipated for this project.

Estimated Project Dates: 03/16/2009 - 06/30/2013

Brief Summary and Statement of Need:
This program allows taxpayers to receive a grant from the Treasury Department in lieu of low-income housing tax credits. State housing agencies would receive a grant in an amount up to 85 percent of 40 percent of the State's low-income housing tax credit allocation in lieu of credits. The grants would apply to each State's 2009 low-income housing tax credit allocation.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total

Project Description/Justification:

LOW-INCOME HOUSING GRANTS IN LIEU OF TAX CREDITS
Total Funds: $28,500.0 Federal ES – FY2009 Capital Budget
Purpose: The Act allows taxpayers to receive a grant from the Treasury Department in lieu of low-income housing tax credits. State housing agencies would receive a grant in an amount up to 85 percent of 40 percent of the State's low-income housing tax credit allocation in lieu of credits. The grants would apply to each State's 2009 low-income housing tax credit allocation.
Timing Issues:
- Funding must be spent within two years of receiving the funds.

Other Restrictions – Beyond the existing regulations and statutes of 26 USC Section 42, unknown at this time. The US Treasury department hasn't issued regulations yet and ARRA didn't detail out any other restrictions.
Recipients - Multi-family rental projects that are unable to syndicate a tax credit allocation received in 2009.

AHFC - Home Investment Partnerships **FY2009 Request: $5,490,700**
Reference No: 48436

Project Description/Justification:

HOME INVESTMENT PARTNERSHIPS – Modified for Low-Income Housing Tax Credit
Total Funds: $5,490.7 Federal ES – FY2009 Capital Budget
Purpose: To provide capital investments in low-income housing tax credit projects
National Funding Level: $2.25 billion
Allocation Method: AHFC will distribute funds competitively (after receiving the initial formula allocation to States, based on Fiscal Year 2008 HOME formula)
Decision-Maker: HUD Office of Community Planning and Development, then state housing credit agencies - AHFC
Eligible Applicants: Affordable housing developers of qualified projects that, within a certain timeframe, received or simultaneously receive a Low Income Housing Tax Credit (LIHTC)
Special Criteria:
Timing
Housing credit agencies must commit at least 75 percent of funds within one year of enactment, and demonstrate that project owners have expended 75 percent of funds within two years of enactment and 100 percent within three years – failure by an owner to do so will result in redistribution of funds within the State
Available until September 30, 2011

Project Selection Criteria:
For housing credit agencies decisions, prioritize projects that will be completed within three years
Eligible projects must be awarded LIHTC in Fiscal Years 2007, 2008, or 2009
Housing credit agencies shall assure asset management functions comply with LIHTC requirements

Eligible basis of a qualified LIHTC building receiving assistance cannot be reduced by the amount of any stimulus grant
Environmental compliance remains subject to HOME requirements

CAPITAL FUND PROGRAM (CFP)
Total Funds: $3,307.0 Federal ES FY2009 Capital Budget
Purpose: Provide funding for the capital and management activities of Public Housing Agencies as authorized under Section 9 of the United States Housing Act of 1937 (42 U.S.C. 1437g), including modernization and development of public housing.
Timing Issues:
- Funding must be obligated 100% within one year of the effective date
- Funding must be 60% expended within two years of the effective date
- Funding must be 100% expended within three years of the effective date
- Grantees must submit an annual statement and board resolution no later than 21 calendar days from the effective date
- Recipients prioritize projects that can award bid-based contracts within 120 days from the effective date
- Recipients prioritize capital projects that are already underway or included in the five-year Capital Fund Plan

Other Restrictions
- Funds cannot be transferred to operations or used for rental assistance activities
- Extensions to the obligation and expenditure dates are not permitted
- Priority consideration shall be given to the rehabilitation of vacant rental units

- Funds provided in this grant to supplement expenditures not supplant expenditures from other Federal, State, or local sources or funds independently generated by the grantee
- Grantee will provide a physical needs assessment as specified by HUD
- Requirements relating to the procurement of goods and services arising under state and local laws and regulations shall not apply to the CFP assistance provided by this agreement
- Secretary of HUD may waive or specify alternative requirements for any provision of any statute or regulation in connection with the obligation if necessary to expedite or facilitate the timely use of this funding and if it is not inconsistent with the overall purpose of the statute (42 U.S.C. 5301)

Recipients

- Funding will be distributed to grantees that received funding in FFY08

Project Description/Justification:

EMERGENCY SHELTER GRANTS (ESG)
Total Funds: $1,144.0 Federal ES – FY2009 Capital Budget
Purpose: To provide funding for foreclosure prevention and re-housing; case management and social services; renovation, major rehabilitation, or conversion of buildings for use as emergency shelters or transitional housing; shelter operating costs; and related activities.
Decision-Maker: HUD Office of Community Planning and Development
Eligible Applicants: Commerce and AHFC have agreed to transfer this program to AHFC because of AHFC's role as the coordinator of homeless housing programs in Alaska. A request is being prepared for the Governor's approval.
Special Criteria:
Timing Issues:
Grantees must expend at least 60 percent of funds within two years of fund availability, and 100 percent within three years;
HUD may recapture unexpended funds if two-year expenditure requirement is not met and reallocate to others in compliance;
HUD must publish a notice establishing requirements within 30 days of enactment; and
HUD may set a minimum formula grant result for localities to receive funds that ensures critical mass of resources to have impact.

Eligible Use:
Including short- and medium-term rental assistance and prevention activities, housing relocation, and stabilization services including: housing search, mediation or outreach to property owners, credit repair, security or utility deposits, utility payments, rental assistance for a final month at a location, moving cost assistance, and case management, or other activities for homelessness prevention and rapid re-housing of persons who have become homeless.
Grantee Administration – There is an Administrative cost allowance of up to five percent; Data collection to be in HUD's Homeless Management Information System.

UAF Alaska Region Research Vessel Additional Receipt Authority | **FY2009 Request:** $116,000,000 | **Reference No:** 45331

AP/AL: Appropriation
Project Type: Construction
Category: University
Location: Statewide
Contact: Michelle Rizk
House District: Statewide (HD 1-40)
Contact Phone: (907)450-8180
Estimated Project Dates: 03/16/2009 - 06/30/2014

Brief Summary and Statement of Need:
The American Reinvestment and Recovery Act directed $3 billion to the National Science Foundation (NSF) to enable U.S. investment in America's scientific enterprise. Of this funding, NSF will direct $196 million to the University of Alaska Fairbanks (UAF) for the construction of the Alaska Region Research Vessel. In FY05, UAF was given receipt authority up to $80 million for NSF funding to purchase a new research vessel. Since this time the NSF funding has increased by $116 million to accommodate inflation and changes in scope of work over the past few years.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total
Federal ES	$116,000,000						$116,000,000
Total:	$116,000,000	$0	$0	$0	$0	$0	$116,000,000

Additional Information / Prior Funding History:
FY05 $80M, Federal Receipt Authority

Project Description/Justification:
The Alaska Region Research Vessel (ARRV) is a 236-foot ice-capable vessel to support research in high latitudes. The ARRV will be owned by the National Science Foundation and operated by UAF on behalf of the entire ocean sciences community, through the University-National Oceanographic Laboratory System. The new vessel will open up the ice-choked waters of the Alaska region to scientists from all over the world and will be the first vessel in the U.S. academic research fleet capable of breaking ice up to 2.5 ft thick. In addition to its ice-breaking capabilities, the ARRV will allow researchers to collect sediment samples directly from the seafloor, host remotely operated vehicles and use a suite of flexible winches to raise and lower testing equipment throughout the water column. The ship will also be able to transmit real-time information directly to classrooms all over the world. The ARRV will accommodate 26 scientists and students at a time, including those with disabilities.

With its ability to penetrate the polar and sub-polar regions, the ARRV will allow scientists and graduate students to study global issues, such as sea-level rise and climate change and the effects of both on the coastal and arctic ecosystems.

UA Economic Stimulus Federal Receipt Authority **FY2009 Request:** **$1,000,000**
Competitive, Discretionary, and Incentive Grants **Reference No:** **48433**

AP/AL: Appropriation **Project Type:** Research / Studies / Planning
Category: University
Location: Statewide **Contact:** Michelle Rizk
House District: Statewide (HD 1-40) **Contact Phone:** (907)450-8191
Estimated Project Dates: 03/16/2009 - 06/30/2014

Brief Summary and Statement of Need:
The University of Alaska plans to pursue economic stimulus grant funding opportunities from various federal agencies. The main areas of focus will be energy, research, technology, and health. Research projects are temporary in nature and carry no on-going continuation of funding beyond the terms of the contract. Requests for capital funding is limited to one-time items, or facilities that can be supported completely by indirect cost recovery from on-going research projects. This capital project ensures that the University of Alaska can receive and expend, with legislative approval, any economic stimulus funding from the ARRA that becomes available through competitive, discretionary or incentive grants.

Funding:	FY2009	FY2010	FY2011	FY2012	FY2013	FY2014	Total

One-Time Startup:	0	
Totals:	0	0

Additional Information / Prior Funding History:
None.

Project Description/Justification:
The University of Alaska has identified several federal agencies which are likely to award economic stimulus grants to the University. The American Recovery and Reinvestment Act (ARRA) has directed funds to the Federal Department of Energy (DOE) for energy efficiency and renewable energy. UA plans to pursue grant funding in areas such as: wind-diesel applications; carbon sequestration; assessing geothermal resources; and small scale biomass development. Energy grants such as these are focused on reducing the use of fossil fuels and improving delivery of energy to rural Alaska.

In addition to the DOE, several other federal agencies have been identified as likely sources of research funding for the University. The National Science Foundation (NSF) and the National Oceanic and Atmospheric Administration (NOAA) will have grant funding available for scientific research. UA plans to pursue grant funding for projects such as climate modeling in Alaska, North Pacific Storm and Climate research and professional development for Alaska's science teachers.

Re: Fund Source Change

Dear Ms. Rehfeld:

The University of Alaska is requesting a fund source change on an FY05 appropriation that will be used for a federal economic stimulus project. To meet the reporting needs of the American Recovery and Reinvestment Act of 2009, a new fund source code has been created. We are requesting a fund source change for the UAF Alaska Region Research Vessel in the amount of $80 million from Federal Receipts (1002) to the Federal Economic Stimulus fund (1212) as follows:

FUND SOURCE CHANGES FOR FEDERAL ECONOMIC STIMULUS PROJECTS.

Sec. 2, ch. 159, SLA 2004, page 54, lines 7 – 9, is amended to read:

University of Alaska	
Federal Receipts	**36,000,000** [116,000,000]
Federal Economic Stimulus	**80,000,000**
University of Alaska Restricted Receipts	26,302,500

Please let me know if you have any questions.

Sincerely,

Michelle Rizk
